EULER, JOHANN ALBRECHT, CARL, and **CHRISTOPH**, three sons of the preceding, were each eminent in their respective walks of life.—The eldest, **JOHANN ALBRECHT**, an able mathematician, was born at St Petersburg, in 1734, and died there in 1800. He was a counsellor of state, and secretary of the Imperial Academy of Sciences; and wrote many memoirs on astronomy, optics, &c.—**CARL**, the second son, who was born at St Petersburg, in 1740, was physician to the court, and a member of the Imperial Academy of Sciences. He died about 1800, and to him is attributed an able treatise on the motion of the planets.—**CHRISTOPH**, the youngest son, was born at Berlin, in 1743; besides being eminent as a mathematician, he was an excellent astronomer, and was one of the persons selected to observe the transit of Venus in 1769. He first held a commission in the Prussian artillery service, and

afterwards in that of a captain. He was a man of strict and generous nature. **EUPHRANON**, an engraver, who lived in the 4th century, wrote some books on sculpture, but they are now lost.

EUPOLIS, a comic poet, who lived about 446-411 B.C. He is reported to have had him writing a play against the democracy, which is now rejected. **EURIPIDES**, an Athenian tragedian, and like his countryman Sophocles, some fragments of his works are still extant.

EURIPIDES, one of the greatest tragic poets, was born at Salamis, in B. C. 481. Accordingly, he took place on the vessel which carried him to Salamis. He was a man of great talents, excelled in Greek drama, and was a philosopher, and a disciple of Anaxagoras. He wrote 32 plays, of which 19 are still extant.

EULET, LEONARD, a celebrated mathematician, born at Basel, in 1707, and was a pupil of Jean Bernouilli. He was one of the literati invited to St Petersburg by Catherine I., and for a time sustained the whole weight of the mathematical department in the new university with great talent and industry. In 1741 he accepted an invitation from Frederick the Great, and remained at Berlin till 1766, when he returned to the Russian capital, where he died in 1783. Though he had been blind for many years before his death, he still continued his literary labours; and in that state he produced his "Elements of Algebra," and his "Theory of the Moon." His writings, which are numerous, are able and original, both in metaphysics and philosophy; and he may justly be regarded as one of the greatest mathematicians of the age.

EULER, JOHANN ALBRECHT, CARL, and **CHRISTOPH**, three sons of the preceding, were each eminent in their respective walks of life.—The eldest, **JOHANN ALBRECHT**, an able mathematician, was born at St Petersburg, in 1734, and died there in 1800. He was a counsellor of state, and secretary of the Imperial Academy of Sciences; and wrote many memoirs on astronomy, optics, &c.—**CARL**, the second son, who was born at St Petersburg, in 1740, was physician to the court, and a member of the Imperial Academy of Sciences. He died about 1800, and to him is attributed an able treatise on the motion of the planets.—**CHRISTOPH**, the youngest son, was born at Berlin, in 1743; besides being eminent as a mathematician, he was an excellent astronomer, and was one of the persons selected to observe the transit of Venus in 1769. He first held a commission in the Prussian artillery service, and

afterwards in that of Russia; but the time and place of his death are unknown.

EUMENES, a celebrated general of Alexander the Great, after whose death he became very powerful, the government of Cappadocia and Paphlagonia being assigned to him; but he was at last conquered by Antigonus, and put to death B. C. 316. He was a man of strict probity, and of a mild and generous nature.

EUPHRANOR, an Athenian painter and sculptor, who lived about 335 B. C. He wrote some books on the arts which he professed, but they are lost.

EUPOLIS, a comic poet of Athens, who lived about 440-411 B. C. Alcibiades is said to have had him thrown into the sea for writing a play against him, but this story is now rejected. Eupolis was the rival of Aristophanes, indulged like him in personal satire, and, like him, attacked Socrates. Some fragments of his plays remain.

EURIPIDES, one of the great Greek tragic poets, was born at Salamis, about B. C. 481. According to a legend, his birth took place on the very day of the battle of Salamis. He was taught rhetoric by Prodicus, excelled in gymnastic exercises, studied painting, and applied himself to physical science and philosophy. He was a disciple of Anaxagoras, and afterwards of Socrates. His first play was exhibited B. C. 455, the year that Æschylus died; and his last in 408. He soon after went to the court of Archelaus, king of Macedonia, and in 406 was killed by the king's hounds, which savagely attacked him in a lonely place.

Euripides was of a serious and speculative turn, could not believe in the popular mythology, yet took from it the subjects of his plays, making any changes to adapt them to his purpose, especially stripping the persons of all ideal greatness. He brought tragedy down to the level of every-day life, and palated men as they are, not as they ought to be. He greatly excelled in delineating the characters and habits of women, and the workings of strong passion. His plays abound in neat quotable sayings, applicable to all circumstances of human life.

He wrote in all 75 or perhaps 92 plays, of which 18 are still extant: among which the most admired are, the "Alcestis," "Medea," "Hecuba," "Ion," "Iphigenia at Tauris," and "Iphigenia at Aulis." The "Cyclops" is interesting, as the only specimen left us of what was called the satyrical drama. To Euripides chiefly was owing the introduction of the prologue, and the *Deus ex machina*, or the practice of solving the difficulties of the plot by direct visible intervention of a god. Euripides was the contemporary and rival of Sophocles, and was one of the victims of the satire of Aristophanes.

EUSEBIUS PAMPHILI, ecclesiastical historian, was born in Palestine about 264. In the persecution by Diocletian, he assisted the suffering Christians by his exhortations, particularly his friend Pamphilus, whose name out of veneration he assumed. Eusebius was chosen bishop of Cæsarea about 315. He was the friend of Arius, but nevertheless assisted at the council of Nice. He was also that of Antioch. The emperor Constan-

tine had a particular esteem for him, and showed him many tokens of favour. He died about 340. He wrote an "Ecclesiastical History," the "Life of Constantine," the "Chronicon," the "Evangelical Preparation," &c. An English translation of the Ecclesiastical History forms part of Bohn's Library.

EUSTACHIO, BARTOLOMEO, an eminent Italian physician of the 16th century. He settled at Rome, where he formed his anatomical tables, and made several important discoveries, among which is the passage from the throat to the internal ear, called the *Eustachian tube*. Boerhaave published this author's *Opuscula Anatomica* in 1707. He died in 1570.

EUSTATHIUS, an eminent critic and archbishop of Thessalonica, was born at Constantinople, and lived in the 12th century. He wrote commentaries on Homer and Dionysius the geographer; displaying, in the former more especially, profound philological learning.

EUTROPIUS, FLAVIUS, a Latin historian of the 4th century. He was secretary to Constantine the Great, and served under Julian in his Persian expedition. He wrote an epitome of the history of Rome, of which numerous editions have been printed.

EUTYCHES, an ecclesiastic of the 5th century, from whom the sect of Eutychians sprung, was a man of strict piety, but who, in opposing the doctrines of Nestorius, fell into the opposite extreme, and denied the human nature of Christ. For this he was excommunicated; but he had many followers, and the sect existed for a long period after his death.

EVAGRIUS, historian, was born at Epiphania, in Syria, about 536. He became a successful advocate, and held various public offices. He was author of an Ecclesiastical History, extending over about sixty years, and terminating at the year 593. It is still extant, and is esteemed tolerably trustworthy. The date of the death of Evagrius is not known.

EVANS, JOHN, Baptist minister, and theological writer, was born at Uske, in Monmouthshire. Having completed his studies at the universities of Aberdeen and Edinburgh, in 1792 he became pastor of a congregation in Worship Street, London, and subsequently opened a school at Hoxton, which he removed to Islington, and finally relinquished it in 1825. He wrote and compiled several works, but is chiefly known as the author of "A Brief Sketch of the several Denominations into which the Christian World is divided." Died, 1827.

EVELYN, JOHN, was the son of Richard Evelyn, Esq., of Wotton, Surrey, where he was born in 1620. Throughout life he evinced a love for the liberal and useful arts; and having at an early period been induced to leave England on account of the civil war, he added greatly to his stock of knowledge while travelling in France and Italy. He returned home in 1661, and was much favoured by Charles II. after his restoration. On the foundation of the Royal Society, he was nominated one of the fellows; soon after which he published his most celebrated

work, entitled "Sylva, or a Discourse of Forest Trees," &c. In 1664, Evelyn was appointed one of the commissioners of sick and wounded seamen; also a commissioner for rebuilding St Paul's cathedra; and he afterwards had a place at the Board of Trade. In the reign of James II. he was made one of the commissioners for executing the office of lord privy seal, and after the revolution he was appointed treasurer of Greenwich Hospital. Evelyn was one of the first who improved horticulture, and introduced exotics into this country. Of his garden at Sayes Court, a curious account may be seen in the Philosophical Transactions. Besides his "Sylva," he wrote "Terra, a Philosophical Discourse of Earth," "Numismata, or a Discourse of Medals," "Sculptura," "Acetaria," &c. His "Memoirs," comprehending a curious Diary and Correspondence, have been several times re-published since 1818, when they first appeared; besides an interesting "Memor of Mrs Godolphin" (which he left in MS.), edited by the present bishop of Oxford; and still more recently a "History of Religion." Died, 1706.

EVELYN, SIR GEORGE AUGUSTUS WILLIAM. (SHUCKBURGH.)

EVERDINGEN, ALDERT VAN, a Dutch painter, celebrated both for landscapes and sea-pieces, was born in 1621. Died, 1675.

EVLIXA, a Turkish traveller, born at Constantinople in 1611. He received a good education, and spent forty years of his life in visiting the principal countries of Europe, besides Arabia, Syria, and Persia. He saw Mecca, was employed sometimes as diplomatist, accompanied armies, and was present at many battles. During the last years of his life he wrote an account of his travels, which is curious, especially for the vivid and accurate picture it affords of the mind and ways of thinking of a thorough Turk. Part of this work has been translated into English. Evlixa died about 1680.

EYREMOND, ST, CHARLES MARQUETEL DE ST DENIS, Lord of, was born in 1613, and became one of the most lively and amusing writers of his time. He studied the law, but subsequently entered the military service, and obtained the rank of general under the prince of Condé; but he lost his commission for having indulged his propensity for satire at the expense of the prince. He then got embroiled with Cardinal Mazarin, was imprisoned in the Bastille, and afterwards escaped a second arrest only by flying to England. He was well received at the gay court of Charles II., and, after indulging in a life of ease and enjoyment, died in 1703.

EWALD, JOHANNES, an eminent Danish poet, was the son of a clergyman, and born at Copenhagen, in 1743. Having lost his father while young, and disliking the clerical life, he left his home when but 15 years of age, and enlisted in the Prussian army. Deserting to the Austrian service, he was made a serjeant, but not being able to obtain his discharge when he wished, he deserted again and returned to Denmark. He now pursued a literary life with great ardour, and produced several very excellent works; that to which he owed his earliest

distinction as a poet, was the "Temple of Fortune." His masterpiece is the dramatic poem entitled "Balder's Death," published in 1773. His "Songs of the Seals," and other pieces after the manner of Ossian, gave him great reputation; and he may be said to have surpassed all preceding Danish poets in spirit and originality. Died, 1781.

EWING, JOHN, an eminent American divine, natural philosopher, and mathematician, was born in Maryland, in 1732. He was pastor to the first Presbyterian Church in Philadelphia; and on visiting Great Britain, in 1773, he received from the university of Edinburgh the diploma of D.D. In 1775 he returned home; and in a few years afterwards was made provost of the university of Philadelphia. He also became one of the vice-presidents of the American Philosophical Society. Died, 1802.

EXMOUTH, EDWARD PELLEW, Viscount, was descended from a Cornish family of respectability, and born at Dover in 1737. At the age of 13 he entered the navy as a midshipman on board the Juno frigate; and during the American war we find him in the Blonde frigate, contending for naval supremacy on Lake Champlain, where he attracted the notice of his superiors by his bold and matchless daring. Continuing to signalize himself in various ways, during the American contest, he was at length sent home with despatches, and strong recommendations for promotion; and having obtained it, he proved, by repeated successes, how much he deserved it. At the commencement of the war with France in 1793, his services were called into immediate action as captain of the Nymph, a 36-gun frigate, which he manned chiefly with Cornish miners; and meeting the Cléopatre, of 40 guns, a "crack ship of France," he had the good fortune to make her his prize, after sustaining one of the most gallant fights on record. This being the first frigate captured after the commencement of hostilities, he was graciously received at court, and had the honour of knighthood conferred on him. He was now appointed to the command of the Archæusa of 44 guns, and hence followed many gallant exploits, while cruising in the Channel with Sir J. B. Warren's squadron. But it was not merely by beating the enemies of his country that Sir Edward distinguished himself: many acts of self-devotion, courage, and presence of mind were displayed by him in saving human life: for one of which, namely, the preservation of the crew of the Dutton, which was shipwrecked, he was created a baronet, and received for an honourable augmentation to his arms a stranded ship for a crest. From 1796 to 1798 a series of daring enterprises well sustained his reputation. In 1799 he removed into L'Impetueux, of 74 guns; and in 1800 was despatched, with a squadron, to assist General Maitland in co-operating with the French royalists at Quiberon. During the short peace he was elected to represent Barnstable in parliament; but on the resumption of hostilities he hoisted his flag on board La Tonnant, of 80 guns. Soon after this he was advanced to the rank of rear-admiral, and proceeded to the East Indies, as commander-

in-chief on that station in 1809. He had not long been in the East Indies before he received the news of the British fleet in the North Sea, and immediately succeeded Sir Charles Cornwallis as commander-in-chief of the British fleet. For a long period he was upholding the patriotic spirit of the British coast of Spain, and in 1809 he was appointed, and on his arrival he proceeded to the peerage, by the title of Viscount of Exmouth, with a pension of £10,000. In March, 1814, he presided at the Congress of Vienna, and concluded the liberation of all the European dominions; but he did not come home before he had violated all their laws, and returned to Algiers, in order of battle, and so on, but no answer being received, he was ordered to return to the coast of Africa, where he was ordered to bombard the city of Algiers, the result of this was, that the British government had abolished the Christian religion, and the conditionally submitted to the will of the Admiral Duckworth, who pointed to the chief of the British fleet, where he continued to retire from the active service, but obtained the rank of admiral of England, and the naval service of the British fleet distinguished as many a gallant part, and combined courage and coolness in the discharge of their arduous duties,

FABBRONI. (FABER.)
FABER, GEORGE STURTEVANT, an American origin, and his father was a member of the church of England. He was educated at Lincoln College, but by marriage; obtained the living of the church, and in 1800 was master of Sherburne, where he spent the remainder of his life. Among his works, many of which are in the interpretation of the Scriptures, are "The Interpretation of the Prophecies," "The Hampton Dissertation on the Millennium," "View of the Conversion, &c. of the Indians," "Sacred Calendar," &c. Died, 1854.

FABER, ABRAHAM, an American commander of the

in-chief on that station, which he held till 1809. He had not long returned to this country before he received the command of the fleet in the North Sea; and a year afterwards succeeded Sir Charles Cotton in the more important command of the Mediterranean fleet. For a long period he was engaged in upholding the patriot cause on the eastern coast of Spain, and in co-operating with the British forces there. His services were appreciated, and on his return he was raised to the peerage, by the title of Baron Exmouth, with a pension of £2000 per annum. In March, 1816, he proceeded to the Barbary States, and concluded a negotiation for the liberation of all Christian slaves in those dominions; but he had scarcely been welcomed home before it was discovered they had violated all their engagements; and he returned to Algiers, drew up his fleet in order of battle, and sent in a flag of truce; but as answer being returned, it was followed by one of the fiercest and most destructive bombardments ever known. The result of this was, that the terms prescribed by the British government, for the total abolition of Christian slavery, &c., were unconditionally submitted to. Lord Exmouth was now created a viscount, and on the death of Admiral Duckworth, in 1817, he was appointed to the chief command at Plymouth, where he continued till 1821, when he finally retired from the active duties of his profession, but obtained the high station of vice-admiral of England, in 1832. Few men in the naval service of this country, eminently distinguished as many have been, ever bore so prominent a part, or evinced more determined courage and coolness in discharge of their arduous duties, than did this gallant,

humane, and active officer. He seemed to be the very *beau idéal* of a British sailor; his undaunted courage and enterprise was strikingly denoted in his manly aspect; and, though a perfect disciplinarian, his hearty and encouraging expressions produced a magic effect on his officers and men, while they always felt the fullest confidence in his skill and intrepidity. He died in January, 1833.

EYCK, HUBERT and JAN VAN, brothers, very distinguished Flemish painters. They were born at or near Maseeyck, Hubert in 1366, John probably about 1390. They lived first at Bruges, whence John is called John of Bruges, and afterwards at Ghent, to which they removed about 1420. They are celebrated as the inventors of *oil-painting*; and it is certain that if they did not literally invent it, they made so great improvement in it as to constitute it a new method. The chef-d'œuvre of the Van Eycks is the "Adoration of the Lamb," the great altar-piece of the church of St Bavoyn, Ghent, which was painted for Judocus Vydt, citizen of Ghent, and was finished by John in 1432. It was in two horizontal divisions, comprising ten panels, of which only the two central ones remain at Ghent. The eight wings are at Berlin. Michael Coxcie made a fine copy of this great work for Philip II. of Spain. Hubert van Eyck died at Ghent in 1426; John at Bruges, in 1440. There are three pictures by the latter in the National Gallery, one of them, the "portraits of Jean Arnolfini and his wife," a most remarkable example of technical skill.—MARGARET VAN EYCK, sister of the above, was also a good painter. She died probably before 1431.

F.

FABRONI. [FABRONI.]
FABER, GEORGE STANLEY, theologian, was born in 1773. His family was of French origin, and his father was a clergyman of the church of England. He studied at Oxford, and graduated M.A. in 1798; was fellow of Lincoln College, but lost his fellowship by marriage; obtained various preferments in the church, and in 1832 was appointed master of Sherburn Hospital near Durham, where he spent the rest of his life. Among his works, many of which relate to the interpretation of prophecy, are "Horæ Mosalæ," the Bampton Lectures for 1801; "Dissertation on the Mysteries of the Covenant of the Coeverston, &c., of Judah and Israel," "Sacred Calendar of Prophecy," &c. Died, 1854.

FABERT, ABRAHAM DE, a French military commander of great reputation, was

born at Metz in 1699. When only 13 years old, his father procured him a commission in the army; and such was his skill and ardour for the service, that he rose to the first rank in his profession, and distinguished himself by a series of exploits which have had but few parallels in modern warfare. He refused the *cordon bleu*, which was offered to him by Louis XIV., and to which none but those of ancient descent were properly entitled, because, said he, "I will not have my mantle decorated by a cross, and my name dishonoured by an imposture." In fact, so highly was he esteemed for his sense of honour, that Mazarin declared, "If Fabert can be suspected, there is no man living in whom we can place confidence." Died, 1662.

FABIAN, ROBERT, an English chronicler of the 15th century. He was a tradesman of London, and served the offices of alderman and sheriff. His "Chronicle of England and

France" was first printed at London in 1616.

FABIUS MAXIMUS RULLIANUS, QUINTUS, Roman general, six times consul, was son of the consul M. Fabius Ambustus. In B. C. 325, he was master of the horse to the dictator, L. Papirius Cursor, and narrowly escaped death for winning a victory over the Samnites against orders. He distinguished himself in the second Samnite war, was dictator in 315, censor in 304, and in his last consulship, 296, won the great victory of Sentinum over the Samnites and their allies.

FABIUS MAXIMUS, QUINTUS, surnamed **VERRUCOSUS** and **CUNCTATOR**, one of the greatest Roman generals, was grandson of Fabius Gurgus and great grandson of the preceding. He was five times consul, the first time in B. C. 233, and twice dictator. He especially distinguished himself when appointed dictator in 217, by his successful cautious policy in opposing Hannibal; which however was misunderstood, and the command was divided between him and Minucius. The latter was saved from the consequences of his own rashness by the generous interference of Fabius. In 209 he retook Tarentum by stratagem. In his old age he opposed Scipio's project of invading Africa. Died, B. C. 203.

FABIUS PICTOR, QUINTUS, the first writer of Roman history in prose, who flourished B. C. 225. He was the grandson of C. Fabius Pictor, the earliest known Roman painter. His history of Rome, which was written in Greek, has perished.

FABRE, JEAN, a native of Nismes, whose name deserves to be handed down to posterity as a noble instance of filial piety. At a period when the spirit of persecution was rife in France, his father was condemned to the galleys for having made one of a Protestant congregation. The son was no sooner informed of the cruel sentence than he solicited to be exchanged for him, and was accepted. Though compelled to herd with the vilest of mankind, he remained in this degrading state of slavery upwards of 6 years, having refused to purchase his liberty on the condition of prevailing upon the Protestant pastor to quit the kingdom. Born, 1729; died, 1797.

FABRE D'EGLANTINE, PHILIPPE FRANÇOIS NAZAIRE, a French dramatist and member of the National Convention, was born at Carcassone in 1755. His youth was spent in dissipation, and in unsuccessful attempts as actor, painter, engraver, and musician. In pursuit of literary fame he went to Paris, and when the revolution broke out he allied himself closely with its leaders, and became a member of the Convention, and of the Committee of Public Safety. He contributed to the fall of the Girondists, and supported in general the most violent measures. At last, he became himself suspected of being an accomplice with "foreign conspirators," and was condemned to death at the same time with Danton, April, 1794. Fabre D'Eglantine left several comedies, the best of which is "Le Philinte de Molière."

FABRETTI, RAFFAELLE, an Italian artist of great merit. He was secretary

to Pope Alexander VIII., and carried on his researches chiefly in the neighbourhood of Rome. His horse must have acquired some archaeological taste and knowledge, for he would stop, it is said, of his own accord, at any ancient inscription. Fabretti's principal works are "De Aquis et Aqueductibus veteris Romæ," "De Columna Trajani," and "Inscriptionum Antiquarum Explicatio." Born at Urbino, 1620; died at Rome, 1700.

FABRI, HONORÉ, a learned Jesuit, was born in 1607 at Bellay, and died at Rome in 1688. He wrote "Physica seu Rerum Corporearum Scientia," 6 vols. 4to; "Synopsis Animatum, et de Homine," 4to, &c. He is said by some to have discovered the circulation of the blood before Harvey.

FABRIANO, GENTILE DA, Italian painter, was born at Fabriano, about 1370. He made great advances both in the theory and practice of his art beyond his predecessors, and gained so great a reputation that he was named "Egregius magister magistrorum." He painted at Florence, Orvieto, Rome, Venice, and other cities; and the senate of Venice gave him the patrician toga and a pension for life for his picture of the victory of the Venetian fleet over Barbarossa, in 1177; and Michael Angelo pronounced his style to be like his name—"Gentile." Many of Fabriano's best works have perished, among them his famous altar-piece in the church of San Niccolo, Florence. Jacopo Bellini was a pupil of this master, and named his son after him, Gentile. Died at Rome, about 1450.

FABRICIUS, CAIUS, surnamed **LUSCINUS**, a Roman general, who was twice consul, and gained several victories over the Samnites and Lucanians. He was famed for his integrity and contempt of riches. This was remarkably shown on occasion of his embassy to Pyrrhus in 280 B. C., when he firmly withstood all the attempts of Pyrrhus to allure him into his service. When consul, he discovered to Pyrrhus a plot formed to poison him by his physician; and in gratitude for so noble an act, Pyrrhus released the Roman prisoners without ransom. Fabricius was afterwards censor, and endeavoured to check the growing passion for luxury. He lived a simple life, and died poor.

FABRICIUS, JOHANN, son of David Fabricius, a German astronomer, and author of a chronicle of Friesland, was also an astronomer, and the first who, by means of refracting telescopes, discovered the spots on the sun's disk, before they were noticed by Galileo. Died, about 1625.

FABRICIUS, or FABRIZIO, GERONIMO, an Italian physician, usually called *Aquapendente*, from the place of his birth. He was a pupil of Fallopius, and professed anatomy with extraordinary reputation at Padua 40 years. Harvey, the discoverer of the circulation of the blood, studied under this great anatomist, and was led towards his discovery by some important hints of his master. He died in 1619. His works on anatomy and surgery form 2 vols. folio.

FABRICIUS, JOHANN ALBRECHT, a learned critic and bibliographer, was born at Leipzig, in 1668. He became professor of

eloquence at Ham-
1736; leaving behind
fame for profound ac-
tion. He is the a-
Græca," 14 vols. 4
work, comprising a
authors and their w-
tina," "Codex Apo-
menti," 3 vols. 8vo,
works.

FABRICIUS, JOHANN, distinguished entomologist, pupil of Linnaeus, was born at Slawick, in 1742, and died in 1807. He was count of Denmark, and professor of economy; on both he wrote; but his life was devoted to the pursuit of his favourite purpose of improving the museums in Entomologie, and mineralogy, are in high repute.

FABRIS, NICOLO, an Italian pianoforte maker, was born at Cremona, and was made counsellor of the city in 1801. He was a distinguished pianist, but studied more with singular ardour the piano-forte, which he wrote down the music of, and which at the same time he translated into Italian hours, and with the equinoxes of various other curious phenomena.

FABRIZIO, GERONIMO, an Italian astronomer, was born at Marradi, in 1625. He is generally known as the Italian literal translator of Aristotle's works, of which works he translated several volumes, and left another unfinished. He also wrote the "Lettere di Cosmo de' Medici," an interesting and valuable literary journal, consisting of 110 volumes. Toward the end of his life he retired to Pisa, where he died.

FABROT, CHARLES, a French Jesuit, was professor of philosophy in Provence, where he died in 1700. His principal work, entitled "L'Élément de la physique," 2 vols. folio, is a translation of the laws of the Eastern philosophers, and several professional works of the Byzantine historians.

FABYAN, ROBERT, an English antiquary, was born at Totnes in 1652. He devoted his life to the study of antiquities, and published new editions of the Greek, Latin, and polyglot Bibles, his pupil and assistant. He conceived the idea of a dictionary, in which every word, with its derivation, should be contained in alphabetical order, a noble and expensive undertaking occupied him for nearly 40 years.

FACINI, PIETRO, an Italian astronomer, who was first a pupil of Riccioli, and afterwards employed in Carrara.

eloquence at Hamburg, where he died in 1736; leaving behind him a justly-acquired fame for profound and comprehensive erudition. He is the author of "Bibliotheca Græca," 14 vols. 4to, his most valuable work, comprising an account of all Greek authors and their works; "Bibliotheca Latina," "Codex Apocryphus Novi Testamenti," 3 vols. 8vo, and many other learned works.

FABRICIUS, JOHANN CHRISTIAN, a distinguished entomologist, and the friend and pupil of Linnæus, was born at Tundern, in Sleswick, in 1742, and died at Copenhagen, in 1807. He was counsellor to the king of Denmark, and professor of rural and political economy; on both of which subjects he wrote; but his life was mainly devoted to the pursuit of his favourite science, and for the purpose of improving it he visited most of the museums in Europe. His "Systema Entomologiæ," and other works on entomology, are in high repute.

FABRIS, NICOLO, an Italian mechanician, was born at Chloggia in 1739, and was made counsellor to the bishop of that city in 1801. He was of the clerical profession, but studied mathematics and music with singular ardour and success. He made a pianoforte, which, while it was played, wrote down the music; also a time-piece, which at the same time marked the French and Italian hours, minutes, and seconds, with the equinoxes and solstices; besides various other curious instruments.

FABRIZIO, GERONIMO. [FABRICIUS.] FABRONI, ANGILOLO, a learned Italian, was born at Marradi, in Tuscany, in 1732. He is generally known by his biographies of Italian literati of the 17th and 18th centuries, of which work he published 18 volumes, and left another ready for the press. He also wrote the Lives of Lorenzo and Cosmo de Medici, and of Leo X.; besides editing a literary journal, which extended to 110 volumes. Towards the close of his life he retired to Pisa, became curator of the university, and there died in 1803.

FABROT, CHARLES ANNIBAL, a learned jurist, was professor of jurisprudence at Aix, in Provence, where he was born in 1581. His principal work, entitled "Basilicon," in 10 vols. folio, is a translation of the *basilicæ* laws of the Eastern empire; but he wrote several professional works, and edited some of the Byzantine historians. Died, 1659.

FABYAN, ROBERT. [FABIAN.] FACCIOLATI, JACOPO, an Italian philologist, was born at Torreglia, near Padua, in 1652. He devoted great attention to reviving the study of ancient literature; and published new editions of several lexicons, Greek, Latin, and polyglot. Forcellini was his pupil and assistant. The latter having conceived the idea of a Latin lexicon, in which every word, with all its significations, should be contained and illustrated by examples from the classical writers, this immense undertaking occupied the two scholars for nearly 40 years. Died, 1769.

FACINI, PIETRO, a native of Bologna, who was first a pupil, and afterwards the rival, of Annibale Caracci. He was extensively employed in ornamenting churches

and mansions; but few of his frescoes are preserved. Born, 1561; died, 1602.

FAGEL, GASPAR, an eminent Dutch statesman, born at Haerlem, in 1629, was grand pensionary of Holland, and distinguished himself not more by the firmness with which he opposed Louis XIV., when he invaded his country, than by the activity with which he supported the prince of Orange in his plans for the expulsion of James II. from England. Died, 1688. He was never married; but the name was well kept up by his nephews and great nephews, five of whom filled the most important offices in the state; and one of them, FRANCIS NICHOLAS, was a renowned military commander. He greatly distinguished himself at the battle of Fleurus, 1690; the defence of Mons, 1691; the siege of Namur, and the capture of Bonn, 1703; in Portugal, and at the great battles of Ramillies and Malplaquet. He died in 1718.—HENRY, the last of the Fagels who has figured as a statesman, signed the treaty of peace between Great Britain and the Netherlands, in 1814, and at all times showed a devoted attachment to the house of Orange.

FAGIUS, the Latin name of PAUL BUCHER, one of the German reformers, and a celebrated Hebrew scholar. He was born in the Palatinate in 1504, studied at Heidelberg and Strasburg, and became professor of Hebrew at the latter city. He was afterwards pastor at Iny in Suabia, and for a short time director of a printing-office for oriental literature, in which office he was assisted by the learned rabbi, Elias Levita. In 1649, on the invitation of Cranmer, he accompanied Martin Bucer to England, and became professor of theology at Cambridge. He died before the end of the same year. In the reign of Queen Mary his remains, with those of Bucer, were exhumed and publicly burnt with his books, and the two reformers were openly condemned. This sentence was repealed in the reign of Elizabeth. The works of Fagius are grammatical and critical, and include some translations from the Hebrew.

FAHRENHEIT, GABRIEL DANIEL, an eminent natural philosopher. He was a native of Dantzic; born in 1686, and died in Holland, in 1736. He is principally known as the inventor of the thermometer-scale which bears his name. He was a fellow of the Royal Society of London.

FAIRFAX, EDWARD, was the son of Sir Thomas Fairfax, of Denton, in Yorkshire, and is regarded as one of the great improvers of English versification. Settling at New-hall, in Knaresborough Forest, he led the life of a retired country gentleman, devoted to literary pursuits. His chief reputation as a poet rests on his translation of Tasso's "Jerusalem Delivered," which is written in the same stanza as the original, and combines fidelity with vigour of style. He also wrote Eclogues, and a prose work on Demology, in which he was, it seems, a believer. He died about 1632.

FAIRFAX, THOMAS, Lord, a distinguished commander in the civil wars, was the eldest son of Lord Fairfax, to whose titles and estates he succeeded in 1648. When the dis-

putes between Charles I. and the parliament terminated in open rupture, Fairfax warmly espoused the cause of the latter, and joined his father in making active preparations for the approaching contest. In the earlier part of his career, he suffered various checks from the royalist forces, but he retrieved his character at Marston Moor, and was appointed general-in-chief when Essex resigned. He was afterwards victorious at Naseby, reduced the west to obedience, and compelled Colchester to surrender. But he was opposed to the execution of the king; and considerable jealousy appears to have been entertained of him by Oliver Cromwell. At length he resigned the command of the army, and retired for a while from public life. At the restoration he crossed over to Holland for the purpose of congratulating Charles II. on his accession, and was formally reconciled to that monarch. He devoted his leisure hours to the encouragement and cultivation of letters, and left behind him a volume of poems and miscellanies, including an interesting sketch of his own life. Died, 1671.

FAITHORNE, WILLIAM, an English engraver of the 17th century, whose works were very numerous and popular in his day. He chiefly engraved portraits, and among them are those of Queen Henrietta Maria, Cromwell, Milton, Hobbes, Fairfax, &c. He also published a book on the "Art of Graving and Etching." Died, 1691. His son, **WILLIAM**, was also an engraver, but died young.

FALCONER, HUGH, botanist and palaeontologist, vice-president of the Royal Society, was born in Morayshire in 1808. He was educated at King's College, Aberdeen, and at the university of Edinburgh, where he graduated M.D. He entered the East India Company's service and went to India in 1833, as assistant-surgeon, and before he had been there a year, was chosen, for his love and knowledge of botany, to be superintendent of the botanical gardens at Seharunpoor. Thence he passed to a similar post at Calcutta, where he remained, an ardent and laborious student of nature and science, till about 1854. His services to science were of high importance and in various fields. As palaeontologist he explored the lower ranges of the Himalaya, and formed a very large collection of fossil remains, which he also classified and described. The first establishment of tea plantations in Assam, and the introduction of the Peruvian bark-tree into the Himalaya, were owing to his suggestions. After his return to Europe he visited the drift of Amiens, the caves of southern France and Sicily, and the bone-caves of Gibraltar. His published writings are few, and inadequately represent his varied acquirements and his valuable contributions to science. They consist of his "Fossil Zoology of the Sewalik Hills," the "Descriptive Catalogue of the Fossil Remains of Vertebrata in the Museum of Bengal," and memoirs contributed to the Royal and Geological Society's Transactions. Died at London, 31st January, 1865.

FALCONER, THOMAS, an ingenious scholar, and the author of "Chronological

Tables," &c., was born at Chester, in 1736, and died in 1792.

FALCONER, WILLIAM, an English poet and writer on naval affairs, was born at Edinburgh, about 1730. When very young, he went to sea in the merchant service, and had risen to the situation of second mate, when the vessel to which he belonged was cast away. Thus furnished with the incidents of his "Shipwreck," it was published in 1762, and dedicated to Edward, duke of York, by whose patronage the author was appointed a midshipman on board the Royal George, and next a purser in the Glory. In 1769, he was appointed purser of the Aurora, which ship was never heard of after she quitted the Cape of Good Hope, in December, 1769, and was therefore supposed to have foundered at sea, and all her crew to have perished. Besides "The Shipwreck," he wrote some minor poems, and a "Nautical Dictionary."

FALCONER, WILLIAM, a skilful physician, residing at Bath, was an able writer on chemical and medical subjects; and many able treatises owe their existence to his professional skill and industry. To him belongs the discovery of the properties of carbonic-acid gas, which has been erroneously attributed to Dr Priestley. Born, 1748; died, 1824.

FALCONET, ETIENNE MAURICE, a celebrated French sculptor, was born at Paris, in 1716. Although he had been apprenticed to a cutter of barber's blocks, he became an excellent modeller, and, assisted by Lemoine, the sculptor, rose to eminence as an artist; while, owing to his persevering application, he also shone as an author. In 1768 he was invited to Russia, to execute the colossal statue of Peter the Great, and there he resided 12 years. His writings on the finances form 6 vols. 8vo. Died, 1791.

FALIERI, MARINO, a Venetian noble, succeeded Andrew Dandolo as doge of Venice, in 1354. He had previously commanded the troops of the republic at the siege of Zara, in Dalmatia, where he gained a brilliant victory over the king of Hungary; and was afterwards ambassador to Genoa and Rome. When he succeeded to the office of doge, he was 76 years of age, and had a young and beautiful wife. Jealous of Michael Steno, he quarrelled with and was insulted by him at a masquerade; but Steno being sentenced to no more than a month's imprisonment for his offence, Falieri, burning with revenge, entered into a conspiracy with the plebeians to overturn the government and massacre the patricians. On the night before it was to be carried into effect, the plot was discovered, and Falieri suffered decapitation, April 17, 1355. His character is delineated with historical truth by Lord Byron, in one of his noblest tragedies.

FALK, or FALCK, JOHN PETER, a Swedish naturalist and traveller, and a pupil of Linnæus. Having finished his studies at Upsal, he went to St Petersburg, and was engaged by the Imperial Academy of Sciences to assist in exploring the Russian dominions. After some years spent in this employment, he was afflicted with hypochondria to such a degree, that, while at Kasan,

FANEHAWE, Sir RICHARD
poet, was born at Ware
and educated at Cam

In 1774, in one of his paroxysms, he killed himself with a pistol. His travels were afterwards published in 3 vols.

FALKLAND, HENRY CARY, Viscount, son of Sir Edward Cary, master of the jewel office to Queen Elizabeth and to James I., was made comptroller of the king's household, and elevated to the (Scottish) peerage of Falkland in 1620. Subsequently he was made lord deputy of Ireland, but the Catholic party being much opposed to him, he resigned the difficult post in 1629, after having occupied it about seven years. He was a man of considerable literary talent, and published "Letters to the Duke of Buckingham," "A History of that unfortunate prince, Edward II.," &c. Died, 1633.

FALKLAND, LUCIUS CARY, Viscount, son of the preceding, was born at Burford about 1610. He was educated at Trinity College, Dublin, and at Cambridge; and on inheriting a large fortune, married, and in happy retirement devoted himself to earnest study, enjoying the society of Selden, Millingworth, and other eminent men. In 1639 he accompanied the expedition to Scotland, and in the following year entered parliament. On the trial of Strafford he interposed in behalf of moderation and delay. His purity and sensitiveness of character made him incapable of being a partisan, and so unfitted him for action in such stormy times. In 1641 the king succeeded, through the agency of Clarendon, in attaching Falkland to the royalist cause, and made him secretary of state. But Falkland distrusted the king and despised the court; and the king feared him. Though he thenceforth attended the king, his sympathies were on the side of freedom, and the distractions and calamities of his country broke his heart. He fell among the first at the first battle of Newbury, 20th September, 1643, according to his presentiment, and his body was found the following day.

FALLOPIO, GABRIELLO (Latin, FALLOPIUS), an eminent anatomist and physician, was born at Modena; studied at Ferrara and Padua; was professor of anatomy for three years at Pisa; and, lastly, filled the chair of anatomy and surgery at Padua, where he remained till his death, in 1562. He was the first who accurately described the vessels of the bones of the fetus; and his account of Fallopiian tubes has served to perpetuate his name. His chief work is entitled "Observationes Anatomicae."

FALLOWS, FEARON, was a distinguished mathematician and astronomer, who in 1821 was appointed to the office of astronomer royal at the Cape of Good Hope. During the following years, though furnished with few instruments, he formed a catalogue of 73 stars belonging to the southern hemisphere; nor is there a doubt but that, had life been spared for a few years, and his observatory made complete, he would have succeeded in making the catalogues of the stars in the southern hemisphere equal in accuracy to those of the northern. He died in 1831.

FANEHAWKE, Sir RICHARD, a statesman and poet, was born at Ware Park, Herts, in 1610, and educated at Cambridge. In 1635

he was sent ambassador to Spain, whence, in 1641, he returned, and acted steadily for the royal cause. He was taken prisoner at the battle of Worcester, and closely confined for a considerable time; but at last recovered his liberty, and went to Breda, where he was knighted by Charles II., in 1650. At the restoration he was made master of requests, and sent to Portugal to negotiate the marriage of the king with the Infanta Catharine. In 1684 he was sent ambassador to Spain, and died there in 1666. He translated into English the Pastor Fido, or Faithful Shepherd, of Guarini; also the Lusid Shepherd, of Camoens. His letters during his embassies in Spain and Portugal were printed in 1702.

FANT, ERIC MICHAEL, professor of history at the university of Upsal, was born in Sweden in 1754, obtained the post of sub-librarian to the university at the age of twenty-five, and became in 1781 professor of history. He held his professorship for thirty-five years. He is chiefly known as projector and editor of a valuable collection of early Swedish historians, entitled "Scriptores rerum Suecicarum mediæ ævi," of which he did not live to see the publication, and which remains unfinished. Died, 1817.

FARE, ANNE LOUIS HENRI DE LA, Cardinal, archbishop of Sens, was born in La Vendée in 1752. He early obtained ecclesiastical preferment, was agent-general of the clergy in Burgundy in 1784, and bishop of Nanci four years later. He was chosen deputy to the states-general in 1789, and made the opening speech; emigrated and was agent to the Bourbon princes till the restoration, when he returned with them and became almoner to the duchess of Angoulême. He was subsequently appointed archbishop of Sens, and in 1823 was created cardinal. Died, 1829.

FAREL, GUILLAUME, one of the most celebrated of the French reformers, was born near Gap in 1489. He was early distinguished for his piety and his zeal in all observances of the Catholic church. He studied at Paris, and was there a disciple of Lefèvre d'Étaples; under whose influence he began to study the Bible, and soon adopted the reformed faith. His fervency and impetuosity of disposition, while it made him an effective preacher, brought him frequently into trouble, and he led a very unsettled life, seldom staying long anywhere. In 1524 he was at Basle, where he was the friend of Zwingle, Myconius, and Haller. Erasmus, reserved and cowardly, got him expelled. At Strasburg he was the associate of Bucer and Capito. We next find him preaching at Montbéliard, Metz, Aigle, and other Swiss towns, with great success though in the face of great dangers. In 1532 he preached at Geneva, but was expelled, and a second mission ended in the same way. In 1534 he went a third time, and reform was established. Two years later he was joined by Calvin, to whom he resigned the conduct of affairs. Agn banished in 1538, he undertook to organize the church of Neuchâtel, and afterwards preached at various places, returning, however, to Neuchâtel. He accompanied Beza in 1537 on a mission to seek the aid of the Protestant princes of Germany

arranged. His libertinism of language and sentiment are, however, highly reprehensible; but it was the vice of the age rather than of the author, whose offence was less glaring than that of many of his contemporaries.

FARRANT, RICHARD, an English musician. He held situations in the Chapel Royal and St George's Chapel, Windsor, from 1584 to 1590, and is remarkable for the devout and solemn style of his compositions.

FARRAR, NICHOLAS. [**FERRAR**.]
FARRER, ELIZA, Countess of **DERBY**, was the daughter of a surgeon at Cork, who falling in his profession, became a provincial actor, and died young, leaving his family in destitute circumstances. Eliza was born in 1759; made her first appearance at Liverpool, when 14 years of age; and in 1777, appeared at the Haymarket Theatre, London, as Miss Hardecastle, in "She Stoops to Conquer." She afterwards played at Drury Lane and Covent Garden; and eventually succeeded Mrs Abingdon in her principal characters, which she played with great écart, and established her theatrical fame. At this period she was much noticed by persons of distinction, and conducted the private theatricals at the duke of Newcastle's house in Privy Gardens, where Lord Derby, Lord Henry Fitzgerald, Charles Fox, Lord John Townshend, the Hon. Mrs. Damer, and others, assumed the principal characters. An honourable attachment for the accomplished actress was soon after formed by Lord Derby; and, in 1787, on the death of Lady Derby, from whom his lordship had been for some years separated, he raised Miss Farrer to the rank of a countess. Died, 1829.

FASTOLEF, SIR JOHN, a renowned English general, was descended of an ancient and honourable Norfolk family, and was born about 1378. He was left under the guardianship of John, duke of Bedford, afterwards regent of France; married the wealthy widow of Sir Stephen Scrope, in Ireland, in 1406, and soon after appears to have gone abroad as a soldier, being employed by Henry IV., Henry V., and Henry VI., in the wars in France for upwards of 40 years. He served with distinction at the battle of Agincourt and at the siege of Rouen, and soon after the latter was knighted. In 1423 he was named lieutenant for the king and regent in Normandy, and governor of Anjou and Maine, and before the battle of Verneuil was created knight-banneret. For other services he was chosen, in 1425, K. C. G. He was charged with the convoy of supplies to the besieged in Orleans, defeated the French at the "battle of herriags," and succeeded in his undertaking. At the battle of Patay, in 1429, he is said to have saved himself by running away. He was afterwards lieutenant of Caen in Normandy, ambassador to the council of Basel, and ambassador to conclude peace with France. He returned to England in 1440, and died at his family seat at Calstow, near Yarmouth, in November, 1459.

FAUCHER, LÉON, an eminent writer on political economy and financial questions, was born at Limoges, in France, in 1803. He received his education at the college of

Toulouse, where he attained great distinction. Being without independent means, he resolved to begin his career by tuition, and, with that view, came to Paris in 1825, where he became tutor to the sons of M. Dally, "Maitre de Poste;" and about the same time entered upon a connection with the press. The revolution of 1830, by promoting many of its leaders to important political employments, opened to him the editorship of the Journal "Le Temps," at that time a distinguished parliamentary organ. He subsequently became editor of the "Courrier Français," and, in 1838, began to contribute to the "Revue des Deux Mondes" a series of papers on financial questions, which have given him high rank among the political economists of his age. In the last years of Louis Philippe's reign he sat as deputy for Rheims, entered keenly into the political contests which then raged in parliament, and ardently opposed M. Guizot. When that minister's hostility to reform led to the overthrow of the monarchy in 1848, M. Faucher obtained a seat in the National Assembly, and became, for a short period, minister of the interior during the presidency of Louis Napoleon. After the *coup d'état* of Dec. 1851, he was offered the post of senator; but he refused to serve the despotic government then established, and retired from public life. Died, at Marseilles, in 1854.

FAUJAS DE ST FOND, BARTHÉLEMI, an eminent French geologist, was born at Montélimart, in 1741; became professor at the Museum of Natural History; and wrote various works connected with his favourite pursuit; among which are "The Mineralogy of Volcanoes," "A Natural History of Dauphiné," "A Journey in England, Scotland, and the Hebrides," &c. Died, 1819.

FAUST or FUST, JOHANN, one of the three artists to whom the invention of printing has been ascribed, was the son of a goldsmith at Mentz. The other two were Gutenberg and Schæffer; to the former of whom the invention of printing with wooden blocks is attributed; and to the latter, who married the daughter of Faust, is allowed the honour of having invented punches and matrices, by means of which this grand art was carried to perfection. It has been pretended that, when Faust went to Paris to sell a second edition of his Bible of 1462, he was arrested on the supposition that he effected the printing of them by magic; but this story appears to be a mere fiction. There is reason to believe that he died of the plague in 1466.

FAUST or FAUSTUS, DR JOHANN, the famous magician, about whose name and existence so many obscuring legends have grown, lived in the beginning of the 16th century, and was probably born at Knittlingen, in Suabia. After receiving his education at Wittenberg, he went to Ingolstadt, where he studied medicine, astrology, and magic; and occupied himself in alchemical experiments. That he was a man of great scientific acquirements there is little doubt; and, according to legendary tradition, he made use of his power in a manner calculated to inspire his countrymen with a firm

belief that he had familiar dealings with the devil. The story of Dr Fauustus furnished the subject of a remarkable dramatic poem by Christopher Marlowe, and has been immortalized by the genius of Goethe.

FAUVEL, —, an eminent French antiquary, chiefly known for his researches, at first alone in Greece, and subsequently in the East with M. de Choiseul-Gouffier, whom he aided in valuable researches. M. Fauvel is well-known in connection with the "Voyage Pittoresque de la Grèce." Born, 1753; died, 1838.

FAVART, CHARLES SIMON, a dramatic poet, to whom the comic opera in France is greatly indebted, was born in 1710. At an early period he devoted himself to poetical pursuits, continuing, with little intermission, to write for the stage till his death, which happened in 1792.

FAWCETT, JOHN, an eminent actor, was the son of an actor of humble pretensions at Drury Lane, and was born in London, in 1769. At the age of 15 he was apprenticed to a linen-draper, but clandestinely left the shop for the Margate Theatre, where, under the name of Foote, he made his first appearance. In 1791 he made his bow to a London audience, at Covent Garden, as Caleb, in "He would be a Soldier." His dramatic reputation was at length fixed by his representation of Dr Pangloss, Ollapod, Caleb Quotem, and Job Thornberry. In 1798 he joined the Haymarket company, and became acting manager, in 1800, of that theatre. In 1813 he appeared at the English Opera, and in 1815 rejoined the Haymarket. He afterwards became manager of Covent Garden Theatre, which situation he held till his retreat from the stage in 1836. In private life his conduct was irreproachable, but there was a bluntness in his manners, which, to a stranger, often appeared like intentional rudeness. Died, 1837.

FAWCETT, Sir WILLIAM, a distinguished military officer, was a native of Yorkshire. Entering young into the army, he served under General Elliot, with reputation, in the Seven Years' War, and was made aide-de-camp to the Marquis of Granby. He was soon after promoted to the rank of lieutenant-colonel in the Guards, and continued to rise gradually till he became colonel in the army, knight of the Bath, and governor of Chelsea Hospital. Sir William translated the "Reveries" of Marshal Saxe. Born, 1728; died, 1804.

FAWKES, GUY, one of the conspirators in the Gunpowder Plot, was born in Yorkshire, of a respectable family, and enlisted in the Spanish army in the Netherlands. There he was found by Winter, one of the conspirators, and with him returned to England, in 1604, agreeing to assist in the plot. He passed under the name of Johnson, as servant to Thomas Percy, another conspirator, and was placed in the house next the parliament house. He collected the necessary materials, and made the preparations in the coal-cellar under the House of Lords; was sent to the Netherlands on a mission to Sir William Stanley and Owen; and was chosen to the dangerous office of firing the mine. The government having

learned the great secret, the house and cellar was searched, and Fawkes was there arrested, Nov. 8, 1605. He made no attempt at concealment, was soon after tried, and on January 31, 1606, was executed at Westminster with several of the other conspirators.

FAYETTE. [LAFAYETTE.]
FAZIO, BARTOLOMEO, an historian and biographer of the 16th century, was by birth a Genoese, and patronized by Alphonso, king of Naples, at whose instance he translated Arrian's History of Alexander into Latin; but his most important work is entitled "De Viris Illustribus," containing brief accounts of the most famous of his contemporaries.

FECKENHAM, JOHN DE, the last abbot of Westminster, was born in the village from which he took his name, in Worcestershire. He was early sent to the abbey of Evesham, and thence to Oxford University, after which he took orders, and became chaplain first to the bishop of Worcester, and then to Honner, bishop of London. When the Reformation commenced, he opposed it with spirit, and was sent to the Tower on the accession of Edward VI., where he continued till the accession of Queen Mary. The queen made him her chaplain, and sent him to Lady Jane Grey, to convert her, if possible, to the Catholic faith. Feckenham became dean of St Paul's, and in 1556 he was made abbot of Westminster. He remained a firm opponent of the Reformation, refused, it is said, the archbishopric of Canterbury, was several times imprisoned, and at last in the late of Ely, where he died, 1585.

FEDERICI-CAMILLO, Italian dramatist, was a native of Piedmont. His real name was VIASSOLO, and he was born in 1751. He became an advocate at Turin, but his passion for the stage led him to quit the law, and he joined a company of players. He lived afterwards at Venice and at Padua, and composed his plays for the theatres of those cities. He gained a great reputation, but his health failed him, and he died in 1802. His "Opere Teatrali" are in 14 vols.

FEITH, RHYNVIS, a popular Dutch poet, born at Zwolle in 1755, studied at Leyden, and graduated doctor of laws, married in 1772, and spent a long life, for the most part in literary retirement. He filled for some time the office of burgo-master of Zwolle. His voluminous writings consist of didactic poems, among which are "The Grave" and "Old Age;" spirited patriotic odes and songs; tragedies, among which are "Thira" and "Lady Jane Grey;" novels, an "Essay on Epic Poetry," and many religious works, mostly of the prize-essay kind. He lost his wife in 1813, and died in 1824.

FELIBIEN, ANDRÉ, a writer on the fine arts, was born at Chartres, France, in 1619. He studied at Paris; after which he went as secretary to the French embassy at Rome, where he formed an intimacy with the celebrated painter, Nicolas Poussin. On his return to France he was appointed superintendent of the royal buildings, and of arts and manufactures. His works, which are esteemed, illustrate the principles of painting, architecture, and sculpture. Died, 1695.

FELIBIEN, JEAN, of the foregoings, held by his father, lives and writings architects. Died, 1695.

FELIBIEN, MICHAEL, was born at a Benedictine of Maur, and died in 1695, toire de l'Abbaye de France," and projector of Paris, which he died.

FELL, SAMUEL, d.

born in London in Westminster School to Christchurch, Oxford, the civil wars he was the royal cause, on ejected in 1647, from cellor of the univers following year. The of Charles I. is said to

FELL, Dr JOHN, the preceding, was in Berkshire, in 1625, a church, Oxford, of dean. In the civil father, ejected from ally. [FEL]

FELIBIEN, JEAN FRANÇOIS, eldest son of the foregoing, succeeded to the offices held by his father, and wrote a work on the lives and writings of the most celebrated architects. Died, 1733.

FELIBIEN, MICHEL, brother of the preceding, was born at Chartres in 1686, became a Benedictine of the Congregation of St Maur, and died in 1719. He wrote a "Histoire de l'Abbaye Royale de Saint-Denis en France," and projected a History of the City of Paris, which he did not live to complete.

FELL, SAMUEL, dean of Christchurch, was born in London in 1694, and educated at Westminster School, whence he proceeded to Christchurch, Oxford, in 1691. During the civil wars he was a staunch adherent of the royal cause, on which account he was ejected in 1647, from the office of vice-chancellor of the university; and he died in the following year. The news of the execution of Charles I. is said to have broken his heart.

FELL, Dr JOHN, bishop of Oxford, son of the preceding, was born at Longworth, in Berkshire, in 1625, and educated at Christchurch, Oxford, of which his father was dean. In the civil war he was, like his father, ejected from the college for his loyalty. At the restoration he was made canon and dean of Christchurch; in 1686 he became chancellor of the university, and ten years later he was raised to the see of Oxford. He was a learned prelate, and a liberal benefactor to his college, the magnificent tower of which, called the "Tom Gate," he built. Several valuable works from his pen are extant; among others, a Latin translation of Wood's "History and Antiquities of Oxford University," in 2 vols. folio; a "Paraphrase on St Paul's Epistles," &c. Died, 1686.

FELLENBERG, EMANUEL DE, whose labours in the cause of education have earned for him immortal fame, was born at Berne in Switzerland, in 1771. His father was of patrician rank, and a member of the government of Berne; his mother, a great-granddaughter of the celebrated Dutch admiral Van Tromp. He went to the university of Tübingen in 1790, to complete his studies in civil law; but these he soon abandoned for the more congenial pursuits of politics and philosophy. In order to acquaint himself with the moral state of his countrymen, he spent much of his time in travelling through Switzerland, usually on foot, with his knapsack at his back. Immediately after the fall of Robespierre in 1795 he visited Paris. During his sojourn there he perceived the storm which was impending over Switzerland, and hastened back to warn his countrymen. But his predictions were disbelieved, and his warnings disregarded. Berne was taken, and the cause lost, before any efficient force could be organized; and Fellenberg was proscribed, a price was set upon his head, and he was compelled to fly into Germany. He was, however, soon recalled, and sent to Paris, to demonstrate against the oppressive conduct of the agents of the French republic; but the want of faith and public spirit on the part of his own government confirmed his disengagement with public life, and he resolved to exchange a political career for the more peaceful pursuits of agriculture and educa-

tion. To promote the object so dear to his heart, he became a member of the council of education at Berne, but convinced that nothing adequate could be accomplished by legislative commissions, he resolved to form on his own estate a model institution, in which it should be proved what education could accomplish for the benefit of humanity. In pursuance of his great design, he purchased, in 1799, the estate called Hofwyl, two leagues from Berne; and his life forms, henceforward, an important page in the records of benevolent enterprise. But it would be impossible within our limits to give even an outline of the various schemes for the improvement and diffusion of education that emanated from M. de Fellenberg during the long period of forty-five years that followed; of the skill and tact with which he defeated the combinations of interested and jealous opponents; and the success which ultimately crowned his labours. Died, Nov. 21st, 1844.

FELLOWES, ROBERT, LL.D., a writer chiefly on religious and political subjects, was born in Norfolk, 1770. He was educated at St Mary Hall, Oxford, where he attained the degree of M.A. in 1801; and was ordained in 1795; but he gradually relinquished the doctrines of the Church of England, and at length adopted the opinions maintained in the work which he published in 1836, under the title of "The Religion of the Universe." He was the intimate friend of Dr Parr and the Baron Maseres; the former presented him to Queen Caroline, whose cause he espoused with great zeal; and the latter left him nearly £200,000, which enabled him at once to gratify his own tastes for literature, and to benefit his fellow-creatures. He entered with much spirit into the project of establishing a university in London, supporting it both by his counsel and his purse; and on recovering from a tedious illness, to express his gratitude to Dr Elliotson in a way which he thought would be most agreeable to that gentleman, he founded two annual gold medals, called the Fellowes medals, for the greatest proficients in clinical science. Died, 1847.

FELLOWS, Sir CHARLES, traveller; discoverer of the Xanthian marbles, was born at Nottingham in 1799. He first explored the valley of the Xanthus, in Lycia, in 1838, and discovered the remains of the two cities of Xanthus, the old capital, and Tlos. Under the auspices of the trustees of the British Museum he made further explorations in Lycia in 1839 and 1841, and on the latter occasion succeeded in obtaining and shipping for England the valuable marbles now occupying the Lycian saloon at the Museum. He was knighted by the Queen in 1845. Sir Charles Fellows wrote "Travels and Researches in Asia Minor," a volume which comprises the separate Journals of his first two explorations; "Coins of Ancient Lycia before the reign of Alexander," &c. Died, November, 1860.

FELTHAM, OWEN, was born early in the 17th century in Suffolk. Little more is known of him than that he resided many years in the family of the earl of Thomond, during which period he published, in 1628, a work of great merit, entitled "Resolves, Divine,

Political, and Moral," which went through 13 editions before the year 1709. Died, probably about 1678.

FELTRE, HENRI JACQUES GUILLAUME CLARKE, Duke of, was born in 1765, at Landrecies, where his father was a keeper of the public stores. In 1781 he entered the military school at Paris; in 1780 he went to London with the French embassy, and afterwards served in the infantry and cavalry, until he was suspended, and imprisoned as a noble. He was subsequently employed by Carnot; and the Directory, in 1795, created him general of division. In 1807 he was made minister of war, and shortly after created duke of Feltre. Though indebted to Buonaparte for his dukedom, he contributed towards the restoration of the Bourbons, and held office under the government at his death, which took place in 1818.

FENELON, FRANÇOIS DE SALIGNAC DE LA MOTTE, archbishop of Cambray, was born in 1651, at the château de Fénelon, in Périgord, of a family illustrious in church and state. He studied at Cahors and Paris, where he made such progress in the most difficult studies, that, in his 15th year, he preached with great applause. At the age of 24, Fénelon took holy orders, and commenced his regular ministerial functions in the parish of St Sulpice. He was afterwards appointed chief of a mission for the conversion of heretics in Saintonge and Auais; and on his return he became known to the public as a writer, by a work, "Sur le Ministère des Pasteurs," and a treatise, "De l'Éducation des Filles." In 1689, Louis XIV. intrusted to him the education of his grandsons, the dukes of Burgundy, Anjou, and Berry. Fenelon was successful in forming the mind of the young duke of Burgundy, heir presumptive to the throne of France, and sowed the seeds of every princely virtue in his heart; but his premature death blasted the pleasing anticipations entertained respecting him. In 1694, Fenelon was created archbishop of Cambray; soon after which, a theological dispute with Bossuet, his former instructor, respecting the devotional mysticism of the celebrated Madame Guyon, whose opinions Fenelon favoured, terminated in his condemnation by Pope Innocent XII. and his banishment to his diocese by Louis XIV. From this time he lived in his diocese, sustaining the venerable character of a Christian philosopher, and scrupulously performing his sacred duties. His works in the departments of philosophy, theology, and the belles lettres, have immortalized his name. He was familiar with the best models of ancient and modern times, and his mind was animated by a gentle spirit of benevolence. In person and manners Fenelon was one of the most attractive of men. He wrote many excellent works; among the chief of which may be reckoned his "Dialogues of the Dead," "Dialogues on Eloquence," &c. But his most celebrated production is his "Adventures of Telemachus," in which he endeavoured to exhibit a model for the education of a prince; and more pure and elevated maxims were never woven into a tale either of truth or fiction. His death

was accelerated by the overturning of his carriage, which brought on a fever, and the amiable and virtuous prelate expired in Jan. 1715.

FENN, Sir JOHN, antiquary, was born in 1738, at Norwich, educated at Caius College, Cambridge, and died in 1794. He was a fellow of the Society of Antiquaries, and selected and published the well-known collection of letters, in 5 vols., written by members of the Paston family. The authenticity of these famous Paston Letters has recently been impugned by Mr Hermann Merivale, and has been discussed by the Society of Antiquaries. The question was set at rest by the production (Nov. 1865) of the original MSS. of the fifth volume. The MSS. of the first four volumes were given by Sir John Fenn to George III., and it is hoped they may yet be found in the Royal Collections.

FENTON, ELIJAH, an English poet, was born in 1683, at Shelton, near Newcastle, in Staffordshire. Having received a classical education, the earl of Orrery, in 1710, made him his private secretary, and studied his eldest son under his care. He afterwards lived with Lady Trumbull as tutor to her son, and died at her seat in Berkshire, in 1730. He became acquainted with most of the wits of the age, and assisted Pope in his translation of the Odysey. Besides this, he published "Marianne," a tragedy, and the lives of Milton and Waller.

FENTON, Sir GEOFFREY, miscellaneous writer, was born in Nottinghamshire, and died at Dublin, in 1608. He translated Guicciardini's History of the Wars of Italy.

FERBER, JOHN JAMES, a Swedish mineralogist of note, was born at Cariscrona, in 1745; and died in Switzerland, while on a scientific tour, in 1790. He wrote "Lettres from Italy," and other works descriptive of mines and minerals in different parts of Europe.

FERDINAND V., THE CATHOLIC, king of Spain, son of John II., king of Navarre and Aragon, was born in 1452. He married in 1469 the Princess Isabella of Castile, in whose right he succeeded on the death of her brother, Henry IV., to the throne of Castile. A rival claimant, Joanna, was supported by Alfonso, king of Portugal, who invaded Leon and was defeated by Ferdinand at Toro, in 1476. Three years later Ferdinand succeeded his father in the kingdom of Aragon, thus reuniting the two crowns of Castile and Aragon. He applied himself to the reform of the great abuses in the administration, and in 1480, at the instigation of Torquemada, established the Inquisition at Seville, and, after courageous resistance on the part of the people, at Saragossa also. One of the greatest events of this reign was the conquest of Granada. The war with the Moors began in 1488, victory after victory attended the arms of Ferdinand, and in 1492 the capital city was taken after a siege of eight months. The "two kings," as they called Ferdinand and Isabella, made their entrance in January, 1493. The dominion of the Moors in Spain had lasted 800 years. By a cruel edict of the same year, 1493, the Jews in Spain were commanded to receive baptism or quit the country in four months.

Multitudes of them to 170,000, became were filled with this vessels furnished by made his memorabilia America; which the assumed authority reigns. FERDINAND I., younger brother of Alcala in 1603. He daughter of Ladislaus Bohemis, became king and at the same time Zapolski for the crow war lasted many years by an unsatisfactory was elected king of took the title of emp of his brother Char nized by the electors Paul IV., refused to It was resolved that should be thenceforth election of the emper moderate and just aimed at reconciling parties in the empire to the council of Trent the year before his death 1564.

FERDINAND II., grandson of Ferdinand He was crowned king of Hungary in elected emperor on Matthias in 1619. He revolted and chose for V., elector palatine, w the crown, and lost t battle of Prague in famous Thirty Years Protestants contendi Tilly and Wallenstein selves at the head of Gustavus Adolphus, Weimar, Generals Ho

Multitudes of them, counted at from 30,000 to 170,000, became exiles, and the prisons were filled with those who remained. It was at this period that Columbus, with vessels furnished by Ferdinand and Isabella, made his memorable voyages and discovered America: which the pope, Alexander VI., assumed authority to give to those sovereigns. The great Cardinal Ximenes was then confessor to Isabella, and in 1495 was made archbishop of Toledo. In 1500 Gonsalvo was sent to make the conquest of Naples, which, partly by the sword, and partly by the most unscrupulous perfidy, he effected. On the death of Isabella in 1504, the kingdom of Castile passed to Philip, son-in-law of Ferdinand. But on Philip's death, two years later, Ferdinand again assumed the government. In 1507 Ximenes became first minister, laboured successfully for the conversion of the Moors, and achieved the conquest of Oran. The infamous *League of Cambray* was concluded in 1508. Soon after Navarre was conquered and united to Castile and Aragon. Ferdinand died in 1516, and was interred in the cathedral of Granada with his Queen Isabella. Of Ferdinand's four daughters, one was married to the Archduke Philip, two in succession to Emmanuel, king of Portugal, and the fourth, Catherine, first to Prince Arthur of England, and afterwards to his brother, Henry VIII. The brilliant "History of the Reigns of Ferdinand and Isabella," by Prescott, the American historian, is well known.

FERDINAND I., emperor of the West, younger brother of Charles V., was born at Alcalá in 1503. He married in 1521 Anna, daughter of Ladislaus, king of Hungary and Bohemia, became king of Bohemia in 1527, and at the same time contended with John Zapolski for the crown of Hungary. The war lasted many years, and was terminated by an unsatisfactory treaty. Ferdinand was elected king of the Romans in 1531, took the title of emperor on the abdication of his brother Charles V., and was recognized by the electors in 1558. As the pope, Paul IV., refused to acknowledge his title, it was resolved that the pope's consent should be thenceforth dispensed with in the election of the emperor. Ferdinand was a moderate and just ruler, and especially aimed at reconciling the conflicting religious parties in the empire. He sent ambassadors to the council of Trent, which he saw closed the year before his death. Died, at Vienna, 1564.

FERDINAND II., emperor of the West, grandson of Ferdinand I., was born in 1578. He was crowned king of Bohemia in 1617, king of Hungary in the next year, and was elected emperor on the death of his cousin Matthias in 1619. His Bohemian subjects revolted and chose for their king, Frederick V., elector palatine, who reluctantly accepted the crown, and lost it by his defeat at the battle of Prague in 1620. Thus began the famous Thirty Years' War, Catholics and Protestants contending for the supremacy: Tilly and Wallenstein distinguishing themselves at the head of the Imperial armies; Gustavus Adolphus, Bernhard of Saxe-Weimar, Generals Horn and Banner, at the

head of the Protestants. The bigotry and intolerance of Ferdinand led him, at the beginning of the war, to take the most violent measures against the Bohemian Protestants, and 30,000 families quitted the country. Died at Vienna, 1637.

FERDINAND III., Emperor, surnamed Ernest, was the son of the preceding, and born in 1608; made king of Hungary in 1638, of Bohemia in 1637, and succeeded his father in the empire in 1637. He died in 1657.

FERDINAND I., king of Naples and of Sicily, succeeded Alphonso in 1456. His false and cruel character provoked a civil war, in which John of Anjou took part with the barons, and the king was aided by the pope, Sforza, duke of Milan and Scanderbeg. The king defeated his rival in 1462, and made peace. But breaking his word, war broke out again. Again the king won, and established order by terror. He afterwards joined with the pope against the Florentines, but Lorenzo de Medici, by the bold step of a personal visit to Naples, succeeded in detaching him from that alliance and negotiated a treaty of peace. He died in 1494, aged 70, detested for his debaucheries and cruelties, at the very time that Charles VIII. of France was setting out on his celebrated expedition for the conquest of Naples.

FERDINAND OF CORDOVA, a learned scholar and accomplished cavalier of the 15th century, whose attainments at a very early age made him a prodigy. That he was possessed of great and versatile abilities may fairly be supposed; but the accounts related of him are so extravagant as to stagger the belief of the most credulous. Died, about 1480.

FERDINAND I., king of the Two Sicilies, was born in 1751, and succeeded his father Charles III. on the throne of Naples, in 1759, on the accession of the latter to that of Spain. During his minority, the government was conducted by a council of regency; and at that time Ferdinand was a great favourite with the people, in consequence of the familiarity of his demeanour. In 1768 he married Maria Caroline, daughter of the Empress Maria Theresa, who soon acquired such a decided influence over him, that he consulted her upon all occasions. His faithful minister, Tanucci, who had been the president of the council of regency, having lost the favour of Charles III. of Spain, gave in his resignation in 1777, and was succeeded by the Marquis Sambuca. This minister, observing that the influence of the queen over her husband was unbounded, attempted to alienate the king from her, by means of a beautiful English woman, who had married a Frenchman named Goudar, at Naples; but the queen discovered the plot; M. and Mme. Goudar were banished from Naples, and Sambuca thought it prudent to retire. Acton, his successor, followed implicitly the wishes of the queen; and the cabinet of Madrid now lost all influence in that of Naples, which became more closely united with those of Austria and Great Britain. But a new era was approaching. The French revolutionary government demanded that Naples should renounce all connection with

Great Britain, and enforced its demand by sending a fleet into the bay of Naples. On the death of Louis XVI., however, Ferdinand joined the coalition against France, and took part in the general war from 1793 to 1796. After two years of peace, the victory of Nelson at Aboukir again engaged Ferdinand against the French, who, on the defeat of the Neapolitans under General Mack, took possession of the whole kingdom, and proclaimed the Partenopean republic, in 1799. But, during the same year, the capital again fell into the hands of the royalist army, under Cardinal Ruffo, and many adherents of the republic were executed. In this way, under the imbecile rule of Ferdinand, Naples continued to change sides, according to the power and influence of the two great belligerent nations, until the Congress of Vienna, in 1814, finally re-established him in all his rights as king of the Two Sicilies. Unfit as this monarch was to wield the sceptre, all agree that he felt a strong sympathy for the sufferings of his subjects, that he was a patron of charitable institutions, and decidedly good-natured. He died Jan. 4, 1825.

FERDINAND VII., king of Spain and the Indies, son of Charles XV. and Maria Louisa of Parma, was born at St. Ildefonso, in 1784. He was recognized prince of Asturias when 6 years old. It was at this epoch, in 1790, that the deputies of the Spanish provinces demanded the re-establishment of the Cortes, which Charles IV. had abolished; but after some difficulties the claim was abandoned. The duke of San Carlos and Don Juan Escobedo were appointed governors of the young prince, who is said to have made brilliant progress in mathematical studies. Spain was at that time governed by Godoy (Prince of Peace) with little short of absolute royal power. This minion saw an insurmountable obstacle to his ambition in the heir-apparent to the crown, and aimed at obtaining the same influence over Ferdinand as he had obtained over his parents; but the design was defeated by his two governors, who succeeded in inspiring him with a disgust and dread of Godoy. Finding he could not succeed, he sought to thwart him in all his designs and wishes. In 1801, Ferdinand married Maria Antonia, a princess of Naples, who was highly accomplished, possessed great independence of character, and attracted all hearts by her beauty and talents. The envy of the queen-mother, thus excited, was speedily converted into hatred; and the princess from that time was subjected to the most cruel persecutions; nay, it is even alleged that she was despatched by poison given to her in a cup of coffee, in 1806. The designs of Napoleon on Spain now began to operate. Beauharnois, the French ambassador at Madrid, was instructed to open a secret conference with Ferdinand, to detach him from the projects of Godoy, and induce him to connect himself with the Buonaparte family by marrying the eldest daughter of Lucien Buonaparte. Ferdinand assented by letter to this overture. Godoy was informed of it, and, trembling for his interest, hastened to detail the secret transaction to Charles IV., taking care to paint it in the most odious

colours, and accusing Ferdinand of a design to possess himself of the throne. The king was so enraged, that he immediately ordered the prince to be imprisoned at the Escorial, and his papers to be seized. On the 30th of October following, a decree was addressed to the council of Castile, declaring Ferdinand, and all those who had abetted his designs, traitors to the state. This extreme measure was the work of Godoy; but, with his usual hypocrisy, he opened negotiations with Ferdinand, offering to act as mediator between him and his father. He induced him to write a letter of unconditional submission to the king, and the consequence was a public reconciliation of the parties. But astonishment succeeded to the expressions of public joy caused by this event, when it was now for the first time learned that the French army had crossed the frontiers, and was marching directly on Madrid. The king then gave out that he was on the point of setting out for Andalusia. The mob rose at Andalus and elsewhere, proceeding to violence, and asserting a determination not to allow the king to quit the kingdom; but it was against Godoy, and with a view to his dismissal, that the public indignation was chiefly excited. Alarmed at these popular tumults, Charles abdicated his throne; and Ferdinand, being proclaimed his successor, began his reign by reducing taxes, and issuing a decree for devoting the crown lands to public purposes. Meanwhile, the French advanced towards Madrid, and all parties (including the new king) were ignorant that this proceeding was the result of a treaty concluded between Godoy and Napoleon at Fontainebleau. Ferdinand sent the latter a deputation requesting the preservation of unity; to which Napoleon replied, that Charles IV. was his ally and friend, and that he could not recognize the rights or pretensions of any other claimant to the throne. Murat, then advancing on Madrid, returned a similar answer, and was in actual possession of that capital when Ferdinand made his public entry. Being apprized by Murat and the duke of Rovigo that Napoleon was coming to Bayonne, the former persuaded Ferdinand to meet Napoleon there, with a view to separate him from his subjects. On his arrival he was not long before he was made aware of the snare into which he had fallen. After dining with Napoleon, who treated him with cordiality, he was apprized by Savary that Napoleon claimed the right of disposing of the Spanish crown, and absolutely demanded his renunciation of it. Napoleon afterwards proposed to give him one of his nieces in marriage, and make him king of Etruria; but Ferdinand refused to assent, and was from that time, notwithstanding the remonstrances of his minister Cevallos, treated as a prisoner. Godoy shortly after arrived with Charles IV. and the queen. The latter instantly reclaimed the crown of Ferdinand, who then made a public resignation of it to his father. Meanwhile, the Spaniards, stimulated by the junta left by Ferdinand at Madrid, with powers to convoke the Cortes, were rising in arms in all directions; and Napoleon, alarmed, now induced the

whole of the royal Bourdeaux, and then of the crown. He and his brother Joseph and his family were in confinement and his family were under surveillance of the custody till December, after his illness, impossible to retain a treaty of peace between him and Ferdinand was restored to powers. This release six years, the young Catalan frontier, received everywhere appalling to the French army, and wail of affection constantly refused to be established by the Cortes, although he had protracted Valencia. He dissolved the Cortes power. The old Inquisition and the Inquisition were the causes of dissatisfaction, their effects, but at lieutenant-colonel, pl of a party at Cadiz, a by a very small force of 1812, established Ferdinand, composed the Cortes on the 7th after swore fidelity to But from this time the military of the church and openly to oppose lution, and perpetual occurred between the party. Popular tumult were instantly pleaded the constitution. FERDUSI, or **FIR**, Persian poet, whose tale the notice of Mahmoud

whole of the royal family of Spain to go to Bordeaux, and there make a formal cession of the crown. He immediately proclaimed his brother Joseph king, and placed Ferdinand in confinement at Valençay, where he and his family were kept under the rigorous surveillance of the police, and remained in custody till December, 1813; when Napoleon, after his disasters in Russia, found it impossible to retain possession of Spain, and a treaty of peace was signed at Valençay between him and Ferdinand, by which the latter was restored to the exercise of his royal powers. Thus released from a captivity of six years, the young monarch reached the Catalonian frontier, March 24, 1814. He was received everywhere with the distinctions appertaining to royalty by the retiring French army, and with the warmest testimonies of affection by the people. But he constantly refused to sign the constitution established by the Cortes during his absence, although he had promised to do so before quitting Valençay. On arriving at Madrid he dissolved the Cortes, and assumed absolute power. The old institutions were restored, and the Inquisition was re-established. These causes of dissatisfaction were long producing their effects, but at length, in 1820, Riego, a lieutenant-colonel, placed himself at the head of a party at Cadiz, and, although supported by a very small force, proclaimed the constitution of 1812; established by the Cortes; and Ferdinand, compelled to yield, convoked the Cortes on the 7th of March, and shortly afterwards fidelity to the constitution of 1812. But from this time the noblesse and the dignitaries of the church set themselves secretly and openly to oppose the march of the revolution, and perpetual shocks and collisions occurred between them and the popular party. Popular tumults occurred, which were instantly pleaded against, the cause of the constitution. Protests were made by Russia against the continuance of this revolutionary anarchy; France was prompted to adopt a pretended *ordonnance sanitaire*, with an obvious intention to seize the first opportunity of invading Spain; mutual charges and recriminations were made between the Spanish and French ministers; and England's voice, as an umpire, was appealed to, but was scarcely heard. At length France declared war; and the Duke d'Angoulême entered Spain, with an avowed design of putting down the constitutionists, and restoring Ferdinand to absolute power. It is not our place in this biography to detail the events of the campaign. It is sufficient to record that Ferdinand was restored, at its termination, to the exercise of an unmitigated arbitrary tyranny, which he indulged in, without compunction, till his death. In 1816, Ferdinand married Maria Theresa, a princess of Portugal, for his second wife; in 1819, Maria-Josepha Amelia, a princess of Saxony, for his third. She died in 1826, and in 1829 he married Maria Christina, the daughter of Francis I., king of Naples, and mother of the present queen of Spain. Died, 1832.

FERDUSI, or **FIRDUSI**, a celebrated Persian poet, whose talents having attracted the notice of Mahmoud, the reigning sultan,

he gave him a distinguished reception at his court, and employed him to write a metrical history of the Persian sovereigns. This work, which is called the *Schahnameh*, contained 60,000 couplets, and occupied him 30 years, during which long period the enemies of Ferdusi succeeded in prejudicing Mahmoud against him. Instead of being rewarded, according to promise, with 60,000 pieces of gold, the same number of the smallest silver coin was sent to him, which the poet indignantly distributed among the menials, wrote a severe satire on the sultan, and fled to Bagdad. Born, 916; died, 1020. Ferdusi is one of the greatest of Oriental poets; and although the "*Schahnameh*" has little historical value, it is much read by his countrymen for its poetic beauties, and the excellence of its language and style. The extant MSS. vary in quantity to a surprising extent. A complete edition was published at Calcutta by Turner Macan in 1828. Portions only of the poem have been translated into English.

FERGUSON, ADAM, an eminent historian and moral philosopher, was born, in 1724, at Logierait, Perthshire, of which parish his father was minister. He was educated at St Andrews and Edinburgh; was chaplain to the 42nd regiment, in Flanders, till the peace of Aix-la-Chapelle; and, on his return to Edinburgh, was chosen professor of natural philosophy, which chair he subsequently resigned for that of moral philosophy. In 1767 appeared his "*Essay on Civil Society*," which procured him the degree of LL.D. In 1773 he accompanied the earl of Chesterfield on his travels; and, in 1776, having repiled to Dr Price on Civil Liberty, he was appointed to the secretaryship of a conciliatory mission to America in 1776. On his return he resumed his professional duties, and composed his "*History of the Roman Republic*," in 3 vols. 4to. Several years after this appeared his "*Treatise on Moral and Political Science*," 2 vols. 4to; and "*Institutes of Moral Philosophy*." Died, 1816.

FERGUSON, JAMES, astronomer and mechanist, was the son of a labourer, and born, in 1710, at Keth, in Banffshire, Scotland. His extraordinary genius quickly displayed itself, as he learned to read in infancy by hearing his father teach one of his brothers; and when only eight years of age he constructed a wooden clock. When old enough to work, he was placed out as servant to a farmer, who employed him in keeping sheep; in which situation he acquired a surprising knowledge of the stars; and his abilities being discovered by some neighbouring gentlemen, one of them took him to his house, where he learnt decimal arithmetic and the rudiments of algebra and geometry. From a description of the globes in Gordon's grammar, he made one in three weeks sufficiently accurate to enable him to work problems; and, having a taste for drawing, began to draw portraits with Indian ink, by which he supported himself creditably some years. In 1743 he came to London, where he published some astronomical tables and calculations, and gave lectures in experimental philosophy, which he

repeated with success throughout the kingdom. His chief work is his "Astronomy explained upon Sir Isaac Newton's Principles, and made easy to those who have not studied Mathematics." On the accession of George III. who had attended his lectures, he received a pension of £50 a year; and he was elected a fellow of the Royal Society. He published numerous works on astronomy, mechanics, drawing, electricity, &c., and he died possessed of considerable property—the sole result of his persevering industry. Died, 1776.

FERGUSSON, ROBERT, a Scotch poet, was born at Edinburgh in 1760. He was educated for the ministry, but a love of dissipation disqualified him for that profession, and he obtained a place in the sheriff-clerk's office at Edinburgh. His conversational powers rendered his company highly attractive; and the excesses into which he was led, impaired his naturally feeble constitution, and rendered him an inmate of the Edinburgh lunatic asylum, where he died in 1774. His poems written in the Scottish dialect have considerable merit, but those in English are often below mediocrity.

FERISHTA, MOHAMMED CASEM, a Persian historian, who flourished in the 16th and 17th centuries, was born at Astrabad in Persia, but went early to India, and lived at Ahmednagar, in the Deccan. He was liberally patronized by the sovereign of Visapour, under whose auspices he published his "History of India under the Mussulmans," a work of acknowledged merit for impartiality and truth. No complete English translations of Ferishta's work appeared previously to that of Colonel Briggs in 1829.

FERMAT, PIERRE DE, an eminent mathematician, civil engineer, and poet, was born at Toulouse, in 1608, and died in 1664. He was a good scholar, and wrote poetry in the Latin, French, and Spanish languages. His prose works were collected and published under the title of "Opera Varia Mathematica."

FERNANDEZ, JUAN, a Spanish pilot and navigator, who, in 1572, discovered the island which bears his name.

FERNANDEZ XIMENES DE NAVARRETE, JUAN, a celebrated Spanish painter, and a pupil of Titian, was born at Logrono, in 1526, and surnamed *El Mudo*, in consequence of being deaf and dumb. He was appointed painter to Phillip II.; and died in 1579.

FERNANDEZ DE NAVARRETE. [NAVARETE.]

FERRACINO, BARTOLOMEO, a self-taught genius of Padua. He was born in 1604, and bred a sawyer. His first invention was a saw worked by the wind. He made curious clocks and hydraulic engines, but his greatest work is the bridge over the Brenta, which is remarkable for the boldness of the design, and its firmness. He died about 1764.

FERRAR, NICHOLAS, church of England divine, and founder of the semi-monastic establishment at Little Gidding, was born at London, in 1593. He was remarkable, even

in his childhood, for his devotional tendencies, and acquired the designation of St. Nicholas. After studying at Cambridge he went abroad for the benefit of his health, returning in 1618. He engaged for a time in commercial affairs, and was even elected member of parliament, but in 1628 he carried out the design he had long cherished of retiring from the active life of the world. He settled with his mother and family at Little Gidding, a village in Huntingdonshire, where at that time the church was used as a barn. He had it cleaned and restored to its proper uses, and established in his house a round of prayers, watchings, repetition of Scripture, &c., for every hour of the day and night. The young women were trained for household duties, acquired some medical knowledge for common cases, and spent much time in helping and nursing the poor. This "nunnery," as it was called, attracted many visitors; even the king, Charles I., visited it twice, in 1633 and 1641. It was broken up during the civil war. In his last illness Nicholas Ferrar had a spot marked out for his grave, and on it had hundreds of hooks, plays, romances, &c., which he had learnt to despise, burnt. He died in December, 1637, about three years after his mother. This remarkable man was the intimate and beloved friend of George Herbert. There are Lives of Nicholas Ferrar, by his brother John and Dr Jobb.

FERRAR, ROBERT, an English prelate of the 16th century, was born at Hallifax, Yorkshire, and became prior of the monastery of St Oswald, which he surrendered on the dissolution in 1540, and, embracing the principles of the Reformation, was made bishop of St David's by Edward VI. But, neglecting some formal admissives of the king's supremacy, he was fined beyond his ability to pay, and imprisoned. On the accession of Mary he was brought before Gardiner, bishop of Winchester, tried, and declared guilty of heresy, and burnt at Caermarthen in 1558.

FERRARI, FRANCISCO BERNARDINO, born in 1577, was a doctor of the Ambrosian college of Milan, and celebrated throughout Europe for his intimate acquaintance with books and literature in general. His collection of rare books formed the foundation of the celebrated Ambrosian library; and his own writings display great erudition. Died, 1669.

FERRARI, OTTAVIO, born in 1607, was professor of rhetoric and historiographer at Milan. He afterwards settled at Padua, where the fame of his learning brought him numerous scholars, and the patronage of crowned heads. Among these were Christina of Sweden and Louis XIV., from the latter of whom he enjoyed a pension of 400 crowns. Distinguished as he was by his great talents, he was not less remarkable for suavity of manners and disposition, universally acquiring thereby the appellation of Pacificator. He followed Scaliger in an able work, entitled "Origines Lingue Italice," and wrote various treatises on ancient manners, customs, &c. Died, 1682.

FERRARI, GAUDENZIO, an eminent painter, was born at Valdugie, in 1544,

studied under Luini, in the Vatican. He painted **FANNI ANDREA**, celebrated paintings of fruit, landscapes and historical scenes. He was born at Genoa in 1699, and died in 1770.

FERRARI, LUDOVIC, an Italian mathematician, was born at Parma, where he became professor of Cardan, and the director of resolving biquadrates.

FERRARIS, JOSEPH, an Italian general, distinguished and skillful engineer. He was born at Udine, in 1728; entered the army in 1747, was appointed captain of artillery for the Netherlands, and he undertook and completed the map of that country, &c. He served against the French in the campaign of 1793; afterwards he was made a field-marshal in 1814.

FERRARS, GEORGE, an English naturalist, was born in 1512, and educated at Oxford; and died in 1580. He was in great esteem by Elizabeth VIII., who gave him a manor at Hertfordshire. He was mentioned in the Mirror of Princes, published in 1559; and his daughter, Mary, in Gratton's Chronicle. His political life is, however, more remarkable than his personal. He obtained the recognition of a variety of privileges. While attending the House of Commons he was arrested and sent to prison. He demanded his release, and his serene majesty, while defending himself, demanded the release of the officers of the Commons, who were referred to the Lords, and exempt to be very greatly respected magistrates at long authority of parliament. His sentence did not exempt him from imprisonment; but the sheriff at whose suit Ferrar was committed to the Tower, was to be sent to the Tower; and an act of discharging Ferrar from prison. Died, 1579.

FERRERA, ANTONIO, a Portuguese astronomer, was born at Lisbon, in 1600. He wrote a regular tragedy that appeared in several of the European letters in Europe. **FERRERAS, JUAN DE**, a Spanish historian and ecclesiastical writer, was born at Valencia, in 1632, of a poor family. He completed his studies at Valencia, and wrote several works on history, and the chronology of the world. He is the author of his "History of the Kingdom of Valencia." He also assisted in the great Spanish Dictionary. **FERRI, GIRO**, an eminent Italian architect, was born at Bologna, and was a pupil of Pier

studied under Luini, and assisted Raffaella in the Vatican. Died about 1550. — GIOVANNI ANDBRA, celebrated as well for his paintings of fruit and flowers, as for his landscapes and historical pieces, was born at Genoa in 1599, and died in 1669.

FERRARI, LUDOVICO, an Italian mathematician, was born in 1629, at Bologna, where he became professor. He was a pupil of Cardan, and the discoverer of the method of resolving biquadratic equations.

FERRARIS, JOSEPH, Count de, an Austrian general, distinguished as a geographer and skilful engineer. He was born at Lunaville, in 1738; entered the army in 1741, and in 1767 was appointed director-general of artillery for the Netherlands, at which time he undertook and completed the 35-sheet map of that country, which bears his name. He served against the French in the campaign of 1793; afterwards became vice-president of the aulic council of war at Vienna; was made a field-marshal in 1808; and died in 1814.

FERRARS, GEORGE, a lawyer and poet, was born in 1512, near St Albans; educated at Oxford; and studied at Lincoln's Inn. He was in great esteem with Henry VIII, who gave him a large grant of lands in Hertfordshire. He wrote some pieces inserted in the Mirror for Magistrates, published in 1559; and the History of Queen Mary, in Granfon's Chronicle. One event of his political life is, however, more memorable than his personal history, as it records the recognition of a valuable parliamentary privilege. While attending his duty as a member of the House of Commons, he was arrested and sent to prison for debt, which the Commons no sooner heard of than they demanded his release. This was refused, and their serjeant had his mace broken in this defending himself in an affray with the officers of the Compter. The case was referred to the Lords, who judged the complaint to be very great; and although the city magistrates at length submitted to the authority of parliament, their tardy obedience did not exempt the parties from punishment; but the sheriffs and the plainiff at whose suit Ferrars was arrested, were committed to the Tower, and the clerks to the stocks; and an act of parliament passed, discharging Ferrars from liability for the debt. Died, 1672.

FERRERA, ANTONIO, a poet ranked by the Portuguese as one of their classic authors, was born at Lisbon, in 1528. He carried to perfection the elegiac and epistolary style, and his "Iaes de Castro" is the second regular tragedy that appeared after the revival of letters in Europe. Died, 1560.

FERRERAS, JUAN DE, a learned Spanish historian and ecclesiastic, was born at Laceda, in 1652, of a poor but noble family, and completed his studies at Salamanca. He wrote several works on philosophy, theology, and history, the most considerable of which is his "History of Spain," in 10 vols. He also assisted in the compilation of the great Spanish Dictionary. Died, 1736.

FERRI, CIRO, an eminent Italian painter and architect, was born at Roma in 1634. He was a pupil of Pietro da Cortona, to

whose style his pictures bear a strong resemblance. Died, 1689.

FERRIER, ARNOLD DU, an eminent French lawyer and diplomatist, was born at Toulouse, in 1506. Having a strong predilection for the Protestant religion, although brought up a Catholic, he at length openly avowed his opinions, and availed himself of the patronage of the king of Navarre, who made him his chancellor. Father Paul was greatly indebted to Ferrier for his assistance in compiling the History of the Council of Trent, where he had attended in his capacity of advocate, and been distinguished for the boldness of his language. Died, 1585.

FERRIERE, Miss, a Scottish novelist, was born at Edinburgh, about 1782. She passed her whole life there, enjoying the friendship of Sir Walter Scott, and the society of the most eminent persons of the day. Her works, which became very popular, are entitled, "Marriage," "The Inheritance," and "Destiny, or the Chief's Daughter." They are vigorous and lively pictures of Scottish character and life, and still hold their place among favourite novels. Died, 1864.

FERRIER, JAMES FREDERICK, an eminent Scottish philosopher and litterateur, was born at Edinburgh, in 1808. After studying at the university of his native city he went to Oxford, where, in 1832, he graduated B.A., and afterwards continued his studies in Germany. Though called to the Scottish bar in the following year, he devoted himself mainly to philosophical studies and literature, contributing many papers to Blackwood's Magazine. In 1842 he was chosen professor of history in the university of Edinburgh, and three years later professor of moral philosophy at St Andrews. He was on two occasions subsequently an unsuccessful candidate for a chair in the university of Edinburgh. His most important work is his "Theory of Knowing and Being," published in 1844. An acute thinker, an elegant and attractive lecturer, he was beloved by his students, and endeared to a large circle of friends by his generous character, great accomplishments, philosophical power, and his stores of wit and humour. Died at St Andrews, June 11, 1844.

FESCH, JOSEPH, senior priest-cardinal of the sacred college, and archbishop of Lyons, and brother of Letitia Ramollini, mother of Napoleon Buonaparte, was born at Ajaccio, in Corsica, in 1764, educated in France, and was in that country when the revolution broke out. Young and ardent, he instantly became attached to the new state of things, threw off the clerical attire of the seminary at which he was studying, and entered the army under General Montesquieu, in Savoy, in the capacity of a store-keeper. In 1790 we find him commissary-general to the army of Italy, which was then commanded by his nephew, Buonaparte. Having in this capacity realized a princely fortune, he retired from the army, resumed his clerical studies and profession, and in 1802 was consecrated archbishop of Lyons. Early in the following year he received a cardinal's hat, and went to Rome as ambassador from France. There he was received with peculiar distinction; but the cardinal's hat, any more than the

monk's hood, does not always cover true piety. His luxurious way of living, and a certain air of the camp that appeared both in his mien and in his conversation, gave considerable scandal to the graver Romans; and that scandal was especially increased by his obstinately persisting in giving concerts at his palace, even in Lent, in defiance of a particular and very strict order to the contrary. In 1804 the cardinal accompanied Plus VII. to Paris, and assisted in the consecration of Napoleon; by whom, in the following year, he was made grand almoner of France, grand officer of the Legion of Honour, and a member of the Senate. As president of the council of Paris, he opposed his self-willed nephew in many of his unjust schemes, and both boldly and constantly, though ineffectually, protested against the violence with which he insulted the unfortunate pope. Napoleon showed how deeply he felt his uncle's opposition, by depriving him of his succession to the arch-chancellorship, and nominating in his stead Eugene Beauharnois, with the title of grand-duke of Frankfurt. When his disgrace with the emperor was thus published, he retired at first to Lyons, and subsequently to Rome, where, with Madame Buonaparte, he lived a quiet but most luxurious life. His library and picture gallery were the finest that even Rome, that city of the arts, could boast. Died, 1839.

FEUERBACH, PAUL JOHANN ANSELM, a very eminent German jurist, was born at Jena, in 1775. He was educated at the university, and became professor of Feudal Law in 1801. He was afterwards professor at Kiel, and at Landshut, in Bavaria. In 1804 he was charged to prepare a project of a new penal code for Bavaria, and in the following year he removed to Munich, where he was subsequently made privy councillor. His code was highly approved and adopted; the wisdom, justice, and humanity of its provisions were generally recognized, and a reform of criminal law in the same spirit was undertaken in many other states. Feuerbach drew up also a civil code, which however was not adopted. In 1814 he was made second president of the court of appeal at Bamberg, and three years later president of the court of appeal at Anspach. Among the writings of this great jurist are—"Anti-Hobbes," on the just limits of the supreme power; "Philosophical and Critical Inquiry respecting High Treason," and, his great work, "Review of the Fundamental Principles and Ideas of Penal Law." Died at Frankfurt, 1833.

FEUILLEE, LOUIS, an eminent naturalist and mathematician, was born in Provence, about the middle of the 17th century. Louis XIV. sent him to South America to make researches in natural history and philosophy, of which he wrote a "Journal," in 2 vols. 4to. He was afterwards employed in an expedition to the Canary Islands, to ascertain the relative position of the meridian of Ferro, which having satisfactorily performed, he was rewarded with a pension and the situation of botanist to the king. Died, 1732.

FEVRE, ANTOINE LE, an eminent states-

man, was ambassador at Brussels in 1507, when he discovered the conspiracy of Marshal Blron against his master, Henry IV. He was twice ambassador to England, and died in 1615.

FEVRE, TANNEQUI (TANAQUILLUS FABER), a classical scholar, of great eminence, was born at Caen, in Normandy, in 1616. Cardinal Richelieu procured him a pension of 2000 livres, with the office of Inspector of works printed at the Louvre. He was subsequently professor of classical literature at Saumur, and died there in 1672. His works, which are very numerous, chiefly consist of commentaries on, and translations from, the Greek and Latin authors. The celebrated Madame Dacler was his daughter.

FEYJOO Y MONTENEGRO, BENEDICTO JEROME, a Spanish Benedictine monk of the last century, who published a variety of essays designed for popular use, whence he has been sometimes styled the *Spanish Addison*. His "Teatro Critico Unversale," and his "Cartas eruditas y curiosas," both works of merit, are devoted to a common object—the refutation of error, and the removal of prejudice. A selection from his essays and discourses was translated into English, and published in 4 vols. in 1780.

FICHTE, JOHANN GOTTLIEB, one of the greatest philosophers of modern times, born at Rammenau, in Upper Lusatia, May 12, 1762. After spending five years at the public school of Pforta he entered the university of Jena in 1780, where his study of dogmatic theology led him directly to the higher philosophical speculations. In 1788 he accepted a tutorship at Zurich, and among the friends he gained there was Hartmann Rahm, whose daughter Johanna, a woman of a noble and beautiful character, afterwards became his wife. Fichte left Zurich in 1790. It was about that period that he first studied the philosophy of Kant, which took him, as he says, into a new world, and in 1791 he visited Kant at Königsberg. His first work, the "Critique of all Revelation," was published in 1792. In the following year he was married. In May 1794 he entered upon the duties of professor of philosophy at the university of Jena, where his influence, especially as a moralist, became immense. Among his friends were Goethe, Schiller, Novalis, the Schlegels, and many other of the distinguished men of that age. A charge of atheism was brought against Fichte, in 1799, in consequence of which he left Jena, and settled in Prussia, where he applied himself to the further development of his philosophy. In 1805 he was appointed professor of philosophy at Erlangen. The French occupation of Berlin drove him for a time to Königsberg and Copenhagen. On his return to Berlin, in 1807, he was intrusted with the task of organizing the new university, established by Frederick William. Fichte's voice was heard at this time like that of a prophet, in the famous "Addresses to the German People," calling them to shake off the foreign yoke, and re-establish the independence of their country. In 1810 he was elected rector of the university. Among his fellow-teachers were Humboldt, De Wette, Schlegelmacher, and Neander. During

the campaigns of 1806 he was seized with a nervous fever, and died of her brave and noble spirit. She received the attacks with the most heroic fortitude, and proved fatal in a few days, on the 27th January, 1814. Fichte lived him about five years, and the value of Fichte's question of the verity of the moral doctrine, or the influence it has exerted on the minds, and on the behaviour of men. One well fitted to support a robust intellect, a powerful, and immovable mind, in philosophical discussions. "Luther." The popular name, well known in England, of the able translations of English works of "The Vocation of Man," "The Nature of the Scholar of Man," "The Character of the Present Age, and the Value of Life."

FICINO, MARSILIO, an Italian philosopher of the 15th century, and one of the Platonic philosophers, born at Florence, in 1433. He was a physician to Cosmo de Medici, and himself patronized by Lorenzo. He was successively the publisher of the writings of Plato, and only made a Latin version of the academy promulgation, but ever since has been published a few years. **FIELD, RICHARD**, a learned man, born in 1561, at Hemeley, in Hertfordshire, and educated at Magdalen College, in 1598, being then a chaplain in ordinary to the king, and afterwards a preacher. He was a great favourite of James I., bestowed upon him the office of chaplain, and proposed sending him to compose the differences between the Lutherans and Calvinists; his appointment did not succeed, and he remained great reputation as a defender of the Church; and his views of the Controversy which he did not live to publish. **FIELDEN, JOHN**, M.P. for Northampton, in behalf of the labouring poor, a man of honourable mention, was a self-taught labouring man, but by his way up to competent authority; and when through his combined industry and energy he had become a master, he had become a master of his caste made him the champion of the rights of the poor, and he sat in parliament for Northampton in 1847. His exertions in favour of the ten hours' bill were forgotten. Died, 1849. **FIELDING, COPLEY**, an English water-colour painter, born about 1788. He early turned to his favourite branch of painting, and attracted attention by his first exhibi-

the campaigns of 1813 Fichte's wife was seized with a nervous fever, the consequence of her brave and devoted services in the hospitals. She recovered only to see him attacked with the same disease, which proved fatal in a few days. He died on the 27th January, 1814. His noble partner survived him about five years. Whatever be the value of Fichte's philosophy, there is no question of the very high worth of his moral doctrine, or of the wholesome influence it has exerted on some of the highest minds, and on the best literature of our age. One well fitted to speak of him says: "So robust an intellect, a soul so calm, so lofty, so massive, and immovable, has not mingled in philosophical discussion since the time of Luther." The popular works of Fichte, well known in England through the admirable translations of Mr W. Smith, consist of "The Vocation of the Scholar," "The Nature of the Scholar," "The Destination of Man," "The Characteristics of the Present Age, and the Way towards the Blessed Life."

FICINO, MARSILIO, an eminent scholar of the 15th century, and one of the revivers of the Platonic philosophy in Europe, was born at Florence, in 1433. His father was physician to Cosmo de Medici, and he was himself patronized by Cosmo, Piero, and Lorenzo. He was such an enthusiastic admirer of the writings of Plato, that he not only made a Latin version of them, and pre-empted over the academy established for their promulgation, but even preached their doctrines from the pulpit. Died, 1499. His Works, in 2 vols. folio, and his Latin Letters, were published a few years before his death.

FIELD, RICHARD, a learned divine, was born in 1561, at Hemel Hempstead, Herts, and educated at Magdalen College, Oxford. In 1598, being then a D.D., he was made chaplain in ordinary to Queen Elizabeth, and afterwards a prebendary of Windsor. He was a great favourite of James I., who bestowed upon him the deanery of Gloucester, and proposed sending him into Germany to compose the differences between the Lutherans and Calvinists; but for some reason his appointment did not take place. He gained great reputation by a work, entitled "Of the Church," and he commenced "A View of the Controversies in Religion," which he did not live to finish. Died, 1616.

FIELDEN, JOHN, M.P., whose exertions in behalf of the labouring classes deserve honourable mention, was originally himself a labouring man, but gradually worked his way up to competence, influence, and authority; and when through the medium of his combined industry and intelligence he had become a master, his fidelity to his caste made him the earnest and untiring champion of the rights of his fellow-tollers. He sat in parliament for Oldham, from 1832 to 1847. His exertions in regard to the memorable ten hours' bill will not speedily be forgotten. Died, 1849.

FIELDING, COPLEY VANDYKE, one of the best English water-colour painters, was born about 1788. He early applied himself to his favourite branch of art, and attracted attention by his first exhibited works in

1810. He painted a very large number of landscapes, and especially excelled in delineating the scenery of the south downs, and stormy seas. He was very successful as a teacher, and became president of the Society of Water-colour Painters. Died, at Worthing, 1855.

FIELDING, HENRY, an English novelist and political writer, pre-eminently distinguished for genuine humour and a knowledge of the world, was the son of Lieutenant Fielding, of Sharpham Park, Somerset, where Henry was born, April 22, 1707. He was first sent to Eton, whence he removed to his father's straitened circumstances of which, added to a love of gaiety and dissipation, led him to turn his attention to the stage. His first piece, which came out in 1727, was entitled "Love in several Masks," and its success induced him to persevere. Some of his dramatic efforts were, however, failures; though neither wit, humour, nor sprightliness is generally wanting in them. In his 27th year, he married Miss Craddock, a lady of some fortune; and, at the same time, by the death of his mother, became possessed of a small estate in Dorsetshire. Unfortunately, instead of husbanding these resources, he immediately set up for a country gentleman, on a scale which, in three years, reduced him to greater indigence than ever, with a young family to support. He then, for the first time, dedicated himself to the bar as a profession, and, for immediate subsistence, employed his pen on various miscellaneous subjects, "The History of Jonathan Wild" being among the early fruits of his literary industry. In 1742 appeared his first novel, "Joseph Andrews," in which with Cervantic humour he ridiculed Richardson's novel "Pamela," then just published. It immediately received the attention to which it was entitled; but success as a novelist was not very likely to advance his practice at the bar: nor was the emolument attached to it sufficient for a manner of life never sufficiently regulated by the rules of prudence. He was further impeded in his profession by repeated attacks of the gout; added to which, his domestic affliction was greatly increased by the death of his wife. Neither disease nor grief, however, paralysed his pen. In rapid succession he brought out four periodical papers, called "The Champion," "The True Patriot," "The Jacobite Journal," and "The Covent Garden Journal," "Essays on Conversation, and on the Knowledge and Characters of Men," "A Journey from this World to the Next," and the novels of "Tom Jones" and "Amelia." During the rebellion of 1745, he lent the assistance of his literary talents to the government, and was rewarded with the then not altogether reputable office of a Middlesex justice. To the credit of Fielding, however, he did much to render it more respectable by the prevention of crimes and the improvement of the police. Ill health at length obliged him to try the milder air of Lisbon, and a Narrative of his Voyage to that place was the last of his works. He, unhappily, received no benefit from the change, but died in the Portuguese capital,

in 1754. Notwithstanding the lapse of a century, and the change in manners, the inimitable wit of Fielding is still relished, and his accurate knowledge of character universally admitted.

FIELDING, SARAH, the third sister of Henry Fielding, was born in 1714, lived unmarried, and died at Bath, in 1768. She was a woman of talent, and wrote several novels, &c., of which "David Simple" is the principal. She also translated from the Greek Xenophon's Memorabilia of Socrates.

FIENNES, WILLIAM, Lord Say and Sele, was born in 1582, and educated at New College, Oxford. In 1624 he was made a viscount; yet, like many others who had experienced the favours of the court, he joined the popular party and became a close friend of Cromwell. He, however, concurred in the restoration, and was made lord privy seal and chamberlain of the household. He died in 1662.

FIENNES, NATHANIEL, second son of the above, was born in 1608, and educated at New College, Oxford, after which he went to Geneva. He was a considerable leader of the independent party, and commanded at Bristol when that city was taken by Prince Rupert, and would have suffered death for his disloyalty, but for the influence of his father. Died, 1669.

FIESCHI, JOSEPH MARIE, inventor of the "infernal machine," was a native of Corsica. He was born in 1790, entered the French army in 1808, and was sentenced in 1816 to 10 years imprisonment for robbery. He went to Paris after the revocation of July, 1830, got a pension under the pretext of being a victim of the restoration, and obtained various employments. His misconduct lost him his places, and he fell into great distress. In 1835 he devised the too celebrated "infernal machine," with which he attempted the assassination of Louis Philippe, at Paris, on the 28th July. Eleven persons were killed, but the king escaped, and Fieschi was arrested, tried, and condemned to death. He was executed in February, 1836.

FIESCO, GIOVANNI LUIGI, count of Lavagna, a Genoese of an illustrious family, and a victim of unsuccessful ambition, was at the head of the conspiracy which was formed against the celebrated Andrea Doria and his nephew. On the evening of the 1st of January, 1647, Fiesco, who had prepared a galley under pretence of a cruise against the corsairs, waited upon Doria to request permission to depart from the harbour early in the morning. Having succeeded in lulling his intended victims into a false security, he sailed forth in the night at the head of 600 men; and despatching parties to take possession of different posts, himself proceeded to the dock, where the galleys lay; but in passing on a plank from one galley to another, he fell into the water, and, owing to the weight of his armour, was unable to rise again. His confederates failed in their attempt on Doria, though Giannettino, his nephew, fell beneath their swords; and the family of Fiesco were made to pay the penalty of his ambition by ruin and proscription.

FIESOLE, FRA GIOVANNI DA. [ANGELICO.]

FILANGIERI, GAETANO, a celebrated writer on political economy and legislation, was born at Naples, in 1752. He was at first intended for the army, but being of studious habits, he was allowed to gratify his inclination for a literary life. His great work, entitled "The Science of Legislation," notwithstanding it was never completed according to his original design, attracted great attention, from its bold and original views, and the liberality of its sentiments; and placed him in the rank of a first-rate writer upon one of the most difficult and important subjects that can engage the mind of man. In 1787 he was made a member of the supreme council of finance, and died in 1798.

FILICAIÀ, VINCENZO DA, an eminent Italian poet, was born at Florence, in 1642, and studied at Pisa. His "Canzoni," commemorating the deliverance of Vienna by John Sobieski, fully established his poetical fame, and obtained for him from the duke of Tuscany the title of senator, while more solid rewards awaited him in being appointed governor, first of Volterra, and afterwards of Pisa. Died, 1707.

FILIPEPI, SANDRO, or **ALESSANDRO**, a celebrated Italian painter, was born at Florence, in 1447. He is usually called **BOTTICELLI**, after the goldsmith to whom he was first apprenticed. He became a pupil of Filippo Lippi, executed many paintings at Florence, painted three of the frescoes in the Sistine Chapel, and having become a friend of Savonarola, neglected his art and fell into a state of destitution. Died at Florence, 1515. The National Gallery has two pictures by Botticelli.

FILLANS, JAMES, a Scottish sculptor, was born at Wilsontown, Lanarkshire, in 1808. He was first a shepherd-boy, then a weaver, and at last a stone-mason. By industry and perseverance he conquered difficulties, and made himself a sculptor. He settled at London in 1836, and lived there 15 years. Among his works are "The Blind teaching the Blind," "Boy and Fawn," a series of designs in alto-relievo illustrating the life and writings of Burns, many portrait busts, including those of Professor Wilson, Allan Cunningham, &c., and a statue of Sir James Shaw. Died at Glasgow, 1852.

FILMER, SIR ROBERT, an English writer, was born in Kent, and educated at Trinity College, Cambridge. He wrote "The Anarchy of a limited and mixed Monarchy," "Patriarcha," in which he contends that government was monarchical in the patriarchal ages; and "The Freeholder's Grand Inquest." He was a man of talent, but a more bigoted champion of absolute monarchy has seldom appeared; and it was to refute the doctrines of Filmer that Locke wrote his Treatises on Government. Died, 1647.

FINCH, HENEAGE, first earl of Nottingham, was the son of Sir Heneage Finch, recorder of London. He was born in 1611, and educated at Westminster School, from whence he removed to Christchurch, Oxford, and afterwards to the Inner Temple. Charles II. made him solicitor-general, and created him a baronet. He was returned to parlia-

ment for the university. In 1670 he was appointed and soon after lord-chancellor. In 1678 he was made a peer. In 1679 he was made a knight, and in 1681 created earl of Nottingham. He was a powerful orator, and Dryden has handed down his name to posterity in his poem "The Rival," under the character of "Finch."

FINCH, DANIEL, earl of Nottingham, eldest son of the above, was born in 1647, and finished his education at St. Paul's church, Oxford. In 1670 he was made a peer. In 1671 he was made a knight, and in 1672 he was made a peer. He held the office of secretary of state. He was a powerful orator, and Anne, when queen, made him a peer. He was one of the administrators of the government in 1716. He was dismissed in 1716, which he made in behalf of the king, and was condemned for high treason. He died in 1730. His remaining years were spent in retirement and literary pursuits, which appeared in the "Whiston on the subject of the Bible." Died, 1730.

FINCH, ROBERT, archbishop of London, was born in London, in 1651. He was educated at St. Paul's school, and entered into holy orders in 1670. He was made a peer in 1679, and died at Rome, in 1730. He was a powerful orator, and his remaining years were spent in retirement and literary pursuits, which appeared in the "Whiston on the subject of the Bible." Died, 1730.

FINDEN, WILLIAM, a celebrated engraver, was the elder brother of the above. He was born in London, in 1710, and was educated at St. Paul's school. He was made a peer in 1710, and died at Rome, in 1730. He was a powerful orator, and his remaining years were spent in retirement and literary pursuits, which appeared in the "Whiston on the subject of the Bible." Died, 1730.

FINDEN, WILLIAM, a celebrated engraver, was the elder brother of the above. He was born in London, in 1710, and was educated at St. Paul's school. He was made a peer in 1710, and died at Rome, in 1730. He was a powerful orator, and his remaining years were spent in retirement and literary pursuits, which appeared in the "Whiston on the subject of the Bible." Died, 1730.

He was made a peer in 1710, and died at Rome, in 1730. He was a powerful orator, and his remaining years were spent in retirement and literary pursuits, which appeared in the "Whiston on the subject of the Bible." Died, 1730.

ment for the university of Oxford, in 1661. In 1670 he was appointed attorney-general, and soon after lord-keeper, with the rank of a peer. In 1675 he was made lord chancellor, and in 1681 created earl of Nottingham. His powers as an orator were highly rated; and Dryden has handed down his portrait to posterity in his poem of "Absalom and Achitophel," under the character of Amri. Died, 1682.

FINCH, DANIEL, second earl of Nottingham, eldest son of the preceding, was born in 1647, and finished his education at Christchurch, Oxford. In 1680 he was appointed first lord of the Admiralty, and in 1682 succeeded his father as earl of Nottingham. He held the office of secretary of state under William and Mary, and for a short time under Queen Anne. On the death of Queen Anne, he was one of the lords justices for the administration of affairs, and soon after was made president of the council; but in 1716 he was dismissed, on account of a speech which he made in behalf of the Scottish lords condemned for high treason. He devoted his remaining years to the enjoyment of retirement and literary leisure, the fruits of which appeared in an eloquent reply to Whiston, on the subject of the Trinity. Died, 1730.

FINCH, ROBERT, an ingenious antiquary, was born in London, in 1783; educated at St Paul's School and Balliol College, Oxford; and entered into holy orders. He travelled through the south of Europe and Palestine; and died at Rome, in 1830; bequeathing to the Ashmolean Museum, at Oxford, his valuable library, medals, coins, pictures, and antique curiosities.

FINDEN, WILLIAM, a distinguished engraver, was the elder brother of Edward Finden, in conjunction with whose name his own is honourably mentioned, and will be remembered hereafter in the history of Art in this country. He was a pupil of Charles Warren—known to collectors by his exquisite engraving after "The Broken Jar," by Wilkie—and of James Heath (father of the late Charles Heath); and many of his early works bear unmistakable evidence how carefully he had given his days and nights to the study of Heath's engravings. Mr Finden's larger works are not numerous; among them are his full-length portrait of George IV. seated on a sofa, from the original picture painted by Sir Thomas Lawrence, the "Highlander's Return," and "The Village Festival," after Wilkie, and "The Naughty Boy," after the original by Sir Edwin Landseer. In conjunction with his brother, he next produced "The Byron Illustrations,"—a really beautiful work, conceived and executed with great spirit and taste. Buoyed up by the success of his speculation, Finden launched into other expensive undertakings: of which the most important was "The Gallery of British Art," containing a well-selected collection of examples of the living English School. But this undertaking proved unsuccessful as a commercial speculation. The last work on which he was employed was an engraving for the Art-Union of London, after Hilton's large picture of "The Crucifixion." Died, 1852.

FINIGUERRA, TOMMASO, a celebrated sculptor and goldsmith, to whom is ascribed the invention of copperplate printing. He lived at Florence, about the middle of the 15th century, and was especially distinguished for his skill in *niello* work, which consisted in enchasing dark metallic substances into cavities worked on gold and silver, and fixing them by fusion. Died, 1476.

FIRDUSI. [FERDUSI.]

FIRENZUOLA, AGNOLO, a distinguished Italian litterateur, was born at Florence in 1493. He studied law, but afterwards entered the church and was made an abbot. He wrote "Discorsi degli Animalii," Tales, an imitation of the "Golden Ass" of Apuleius, a Dialogue on the Beauty of Ladies, and some poems. The purity of his language and the grace of his style have made his works not only admired but authorities on questions of words and idiom. They have been very frequently reprinted. Died, before 1548.

FIRMIN, THOMAS, a distinguished philanthropist, was born at Ipswich, in 1632, and brought up to business in London, as a linen-draper, which he carried on with good success. He adopted anti-trinitarian opinions, in consequence of having formed an intimacy with the persecuted Socinian, John Biddle, whose necessities he relieved; and his upright conduct, piety, and liberality were so conspicuous, that Archbishop Tillotson and other eminent prelates were proud of his friendship. Having established a linen manufactory for the purpose of giving employment to those who would otherwise have been vagrants, he published, in 1678, "Some Proposals for the Employment of the Poor, and especially in and about the City of London, and for the Prevention of Beggings," &c. His charity was extended to all sects and parties, and his useful life terminated in 1697.

FISCHER, JOHANN BERNHARD, an eminent German architect, born at Vienna, in 1650. He erected the palace of Schoenbrunn, the church of St Charles Borromeo, and a number of other fine buildings at Vienna; and was appointed chief architect to Joseph I., who created him Baron d'Erlach. Died, 1724.

FISCHER, KARL VON, German architect, was born at Mannheim in 1782. He spent several years at Vienna in the study of his art, visited France and Italy, and in 1809 was appointed to the chair of architecture at the Academy of Munich, a post which he filled till his death. His masterpiece is the "Hof Theater" at Munich, which was commenced in 1811, and occupied him for seven years. It was burnt down after his death, but was rebuilt after the first design. Fischer built many private mansions, and in a better style than was previously usual. Died, 1820.

FISHER, JOHN, bishop of Rochester, was born at Beverley, in Yorkshire, in 1459. He became vice-chancellor of Cambridge; and being appointed confessor to Margaret, countess of Richmond, it was through his influence that she founded St John's and Christ's colleges. In 1504, he was unexpectedly promoted to the see of Rochester, and subsequently declined translation to a more

"Natura Brevium," &c. He is also supposed to have written a book on the Surveying of Lands, and another on Husbandry, though some have ascribed these to his brother, John Fitzherbert.

FITZHERBERT, MARIA ANNE, a lady who at one period of her life occupied a prominent place in the history of this country, was the sister of Walter Smythe, Esq., of Bambridge, near Winchester, and was married in 1775 to Edward Weld, Esq., of Lulworth Castle, uncle to Cardinal Weld. Her husband died soon after their marriage, and she was united to Thomas Fitzherbert, Esq., who also died, leaving no offspring, in 1781. Having found it necessary to speak of Mrs Fitzherbert, at some length, in our memoir of George IV., we shall here merely observe, that the prince pressed his suit, and a marriage, according to the forms of the Catholic church, took place in 1787. From this period she naturally became the object of great public and political interest; but the influence she possessed was always exercised for the honour of him to whom she was united; and she found, after her retirement from the meretricious splendour that had once surrounded her, ample means for the employment of her mind in acts of unostentatious benevolence. Died, March, 1837.

FITZJAMES, EDWARD, Duke of, was the great-grandson of the duke of Berwick, who was natural son of James II. of England, by his sister of the duke of Marlborough. He was born at Versailles in 1776, and at the time of the French revolution, his name was placed on the list of proscription, in consequence of his having emigrated; but, at the restoration of the Bourbons, he returned to France, and became aide-de-camp and first gentleman of the chamber to the Count d'Artois, afterwards Charles X. In the Chamber of Peers he was remarkable for the constancy yet moderation with which he upheld the royal authority. After the revolution of 1830, he was no less a favoured person than before it, having readily sworn allegiance to the new state of things. He is chiefly noticeable as a member of the Stuart family. Died, 1838.

FITZROY, ADMIRAL ROBERT, superintendent of the Meteorological Department of the Board of Trade, was born in 1805. He entered the navy at the age of fourteen, was made lieutenant in 1824, served on the Mediterranean and South American stations, and at the close of 1828 was appointed to take part, as commander of the "Beagle," in the government expedition for the survey of the coasts of South America. In 1831 he was charged with the conduct of a second scientific expedition to South America, in command of the "Beagle," Mr Darwin accompanying the expedition as naturalist. The valuable scientific results of this voyage, which occupied five years, were published in Darwin's well-known "Journal of Voyage round the World," and in a separate narrative by Admiral Fitzroy. In 1841 Admiral Fitzroy entered parliament as member for Durham, and two years later he was appointed governor of New Zealand, a post which he held till 1846. In the subsequent portion of his life he has been greatly distin-

guished for his patient researches in meteorology, and his admirable practical application of the new science to navigation. As superintendent of the Meteorological Department of the Board of Trade he rendered very important services by the establishment of his system of "storm warnings" and forecasts, communicated to the principal ports of Great Britain; which though of so recent date has no doubt contributed to the acknowledged decrease in the rate of deaths of our sailors. His latest publication is "The Weather Book," containing the explanation of his method of forecasts and the chief results of his studies and observations. He was a fellow of the Royal Society, and of the Royal Geographical Society, and a correspondent of the French Academy of Sciences. At the time of his death he was engaged with Le Verrier and other foreign men of science in establishing a European system of storm signals. Mental over-work and excessive wear and tear of brain and nerves undermined his health, and destroyed his powers, and in a state of extreme depression or derangement he committed suicide by cutting his throat, at his residence, Upper Norwood, 30th April, 1865.

FITZSTEPHEN, WILLIAM, a learned English monk of the 12th century, and the friend of Thomas à Becket, archbishop of Canterbury, whose Life he wrote. Prefixed to this Life is a "Description of the City of London, and of the Manners and Customs of its Inhabitants," which is curious on account of its being the earliest account of London extant, and has been preserved by being printed at the end of Stowe's Survey. Died, 1191.

FITZWILLIAM, the Right Hon. WILLIAM WENTWORTH FITZWILLIAM, Earl, was born in 1748; commenced his education at Eton, finished it at Oxford, and took his seat in the House of Peers in 1769. Inheriting a good fortune from his father, and coming into possession, on the death of the marquis of Rockingham, of the fine domain of Wentworth and other large estates, his lordship was naturally looked up to as a nobleman of influence and high connections, which his marriage with Lady Charlotte Ponsonby had of course extended. Up to the period of the French Revolution, Earl Fitzwilliam acted with the Whigs; but when Mr Fox held up the Gallic system of liberty and equality as a model for imitation, and the levelling principle was spreading far and wide throughout the kingdom, the warning voice of Edmund Burke was not lost upon him; and seeing the necessity of sacrificing the attachments of party to the general good, like many others of the hereditary nobility, he joined the duke of Portland and Mr Pitt, thus giving strength to the ministry and confidence to the nation. This was an extraordinary period of popular clamour and discontent; and at this critical juncture Earl Fitzwilliam was appointed to the government of Ireland. Finding that the Catholic party there was all-powerful, and dreading the propagation of revolutionary principles at the very time the French fleet was hovering on the island, his lordship favoured those who were seeking "emancipation," and en-

deavoured to conciliate, rather than punish, the disaffected; but his measures were not approved of by the ministry, and he was recalled, to make room for Earl Camden. In 1798 he was appointed lord-lieutenant of the West Riding of Yorkshire; and on Mr Pitt's death, in 1806, he became president of the council, which he retained until the fall of the Grenville administration in the following year. After this he gradually retired from public life; and on the 8th of February, 1833, he died, aged 84.

FLACCUS, CAIUS VALERIUS, a Roman poet of the 1st century, who lived at Padua, and died young. He wrote an epic poem, entitled "Argonautica," of which seven books, and part of the eighth, were completed. In subject and in plan this poem is an imitation of the work of Apollonius Rhodius.

FLAMINIUS, T. QUINTIUS, a distinguished Roman general, made consul B. C. 198. He was sent to Macedonia, and had the honour of terminating the Macedonian war by the defeat of Philip at Cynoscephale, B. C. 197. At the Isthmian Games of the following year he had formal proclamation made of the restoration of Greece to independence. He remained in Greece till 194, to organize the new administration of the cities, and by his wisdom, forbearance, and humanity won the general esteem and gratitude of the people. Before he returned to Rome he made war on Nabis, tyrant of Sparta, and compelled him to make peace with the Romans. Flaminius had a triumph of three days on his return, was sent again to Greece in 192, and in 183 was ambassador to Prusias, king of Bithynia, to demand the surrender of Hannibal, who had taken refuge at his court. Died about 175.

FLAMSTEED, JOH. N., an eminent astronomer, was born at Denby, in Derbyshire, in 1646, and received his education at the free-school of Derby. He was led to the study of astronomy by perusing Sacrobosco's work, "De Sphæra;" and he prosecuted his studies with so much assiduity as to be appointed first astronomer-royal, and the Observatory at Greenwich was erected for him in 1676, where, during the remainder of his life, he assiduously cultivated the sublime science. His principal work is entitled "Historia Cœlestis Britannicæ." This work contains his famous Catalogue of the fixed stars, the first trustworthy one made; the immense mass of celestial observations of which the Catalogue was the fruit, or rather the first fruit; and a full account of his methods of observation and his instruments. Flamsteed was a friend of Sir Isaac Newton, whose lunar theory rested on Flamsteed's observations. But a coolness grew up between these two great workers, which ended in open and painful dissension, the details of which we have no space for. The story is involved in much obscurity. Died, 1719.

FLANDRIN, JEAN HIPPOLYTE, a distinguished French painter, was born at Lyons in 1809. He became a pupil of Ingres, at Paris, and in 1832, having obtained the grand prize of the Academy, went to study at Rome, where he was subsequently made director of the Academy of Painting. On his return to

France he settled at Paris, and devoted himself to historical painting, and especially of sacred subjects. Among his chief works are "Dante and Virgil," "Saint-Louis dictates ses Etablissements," for the Chamber of Peers; "Mater Dolorosa," "Saint Louis taking the Cross the second time," and the fine series of frescos in the churches of St Germain-des-Prés and St Vincent de Paul, which are reckoned among the masterpieces of modern painting. Flandrin was an officer of the Legion of Honour, and a member of the Academy of the Fine Arts. His brothers, AUGUSTE and JEAN PAUL, are also eminent painters. Died at Rome, in March, 1864.

FLAVEL, JOHN, a Nonconformist divine, was born in Worcestershire, and educated at University College, Oxford. In 1650 he settled at Dartmouth, in Devonshire, where he wrote his "Navigation Spiritualised." He was ejected from his living in 1662, but continued to preach privately. At the accession of James II. he returned to Dartmouth. He died suddenly at Exeter, in 1691. He was a man of exemplary piety and conduct, and his works were long highly esteemed by all who held Calvinistic sentiments.

FLAXMAN, JOHN, one of the greatest English sculptors, was born at York in 1755. His father, who settled in London about the end of that year, was a figure-moulder, and worked for Roubiliac and Scheemaker. The son, from his earliest years, exhibited and cultivated his talent for designing, and was also attracted by the picturesque conceptions of Greek mythology. He began to study at the Royal Academy in 1770, earning for some time a living by making designs for Wedgwood, the famous potter, and other persons. He went to Italy in 1787, and during the seven years he spent there, his wife accompanying him, he acquired the highest reputation by his three series of designs, the illustrations to Homer, Æschylus, and Dante. He was chosen A. S. in 1797, and professor of sculpture in 1810. The monument to Lord Mansfield in Westminster Abbey, the group of "Cephalus and Aurora," "Psyche," the group of the "Archangel Michael and Satan," are among his best works. He executed many exquisite bassi-relievi, compositions from Scripture subjects, and marked by some special religious sentiment. The monuments to Nelson, Howe, and Reynolds in St Paul's are by his hand. One of his latest and finest productions is the "Shield of Achilles." He mourned the loss of his wife in 1820, and died at the close of the year 1826. The sculptures and sketches of Flaxman are now deposited and exhibited in a Gallery, called the "Flaxman Hall," at University College, London. His "Lectures on Sculpture" were published, and a new edition is announced (Dec. 1865) for publication in Bohn's Illustrated Library. There is a portrait of Flaxman by Romney in the National Portrait Gallery. Jackson's portrait of him, exhibited at the International Exhibition in 1862, is one of the finest works of the English school.

FLECHIER, ESPRIT, a famous French bishop, was born in 1632, at Fernel, in the

county of Avignon. As a preacher at Paris, he set him on a 1673 he was received, and in 1685 he was shortly after he was named; and died in were published after 8vo. Among them a the Great and Cardinal

FLETCHER, JOHN,

dramatic poet, was th

Fletcher, bishop of Lon

1676. He received his

county of Avignon. He was greatly admired as a preacher at Paris, and his funeral orations set him on a level with Bossuet. In 1673 he was received at the French Academy, and in 1685 he was made bishop of Lavaur. Shortly after he was promoted to the see of Nîmes; and died in 1710. His entire works were published after his death, in 10 vols. 8vo. Among them are Lives of Theodosius the Great and Cardinal Ximenes.

FLECKNOE, RICHARD, an English poet and dramatic writer, whose name is now more remembered on account of its having been held up to ridicule by Dryden, in his invective against Shadwell, than for the value of his own compositions. Died, 1678.

FLEETWOOD, CHARLES, a parliamentary general in the civil wars, was the son of Sir William Fleetwood, who belonged to the household of Charles I. He entered the army, and on the breaking out of the civil wars, declared against the king; commanded a regiment of cavalry in 1644; and at the battle of Worcester bore the rank of lieutenant-general. Becoming allied to the family of the Protector by marrying his daughter on the decease of her first husband, Ireton, he was sent as lord-deputy to Ireland; but, on the death of Cromwell, he joined in inducing his son Richard to abdicate. Died, 1692.

FLEMING, or FLEMMYNG, RICHARD, bishop of Lincoln, was born at Crofton, in Yorkshire. He received his education at University College, Oxford, and in 1408 obtained a prebend in the cathedral of York. He became a follower of Wycliffe, but afterwards distinguished himself by his bitter hostility to the great reformer. Flemmyng attended the famous Council of Constance, and to him was intrusted the task of burning the bones of Wycliffe. The pope would have rewarded him with the archbishopric of York, but his project was opposed by the royal council. Flemmyng founded Lincoln College, Oxford, and died in 1431.

FLETCHER, ANDREW, a Scottish political writer, was the son of Sir Robert Fletcher, of Saltoun, and born in 1653. When a child, he had been placed under the tuition of Dr Gilbert Burnet, and he acquired from him that attachment to free principles of government which distinguished him through life. Having given offence to the Scottish parliament, of which he was a member, he was outlawed; but in 1683 he came over to England to concert with others who were opposed to the designs of James II.; and in 1685 joined the enterprise of the duke of Monmouth. While on this expedition, having killed in a quarrel another partisan of the same cause, the duke dismissed him. He then repaired to Spain, and afterwards to Hungary, where he distinguished himself in a war against the Turks. When the revolution took place, he resumed possession of his estate, and opposed the Scottish union. As a political writer he possessed great power; and he wrote with great boldness on the popular side. Died, 1716.

FLETCHER, JOHN, an eminent English dramatic poet, was the son of Richard Fletcher, bishop of London, and was born in 1582. He received his education at Cam-

bridge, and wrote several plays in conjunction with Beaumont. In this dramatic partnership, it is said that Fletcher found fancy, and Beaumont judgment. He died of the plague at London in 1625, and was buried in St Saviour's church, Southwark. The principal piece of his own writing is a dramatic pastoral, entitled "The Faithful Shepherdess," and there is no doubt that it suggested the idea of Milton's "Comus." Edward Phillips, the nephew of Milton, classes Fletcher with Shakspeare and Ben Jonson, as one of the "happy triumvirate" of the age.

FLETCHER, GILES, son of Giles Fletcher, who was sent ambassador to Russia by Queen Elizabeth in 1588, and whose account of his mission was suppressed; was born in 1588; educated at Cambridge; and died at his living of Alderton, Suffolk, in 1623. He was the author of a fine poem, entitled "Christ's Victory and Triumph in Heaven and Earth, over and after Death."

FLETCHER, PHINEAS, brother of the foregoing, was born about 1582, and educated at Eton and Cambridge. In 1621 he obtained the living of Hilgay, in Norfolk, where he died in 1660. He is known by a poem, entitled "The Purple Island," which is an allegorical description of man, in 12 books, written in Spenserian verse.

FLEURIEU, CHARLES PIERRE CLARET, Count de, a French naval officer, and one of the most learned hydrographers of modern times, was born at Lyons, in 1738. Having turned his attention to nautical studies, he invented the sea chronometer. In 1790 he was made minister of the marine; but the revolution obliged him to discontinue his public occupations, and he was committed to prison in 1793. Having, however, survived the Reign of Terror, he was nominated by Buonaparte, in 1799, a member of the Council of State; and he was also made intendant of cavalry and governor of the Tulleries, which offices he resigned in 1806, and died in 1810.

FLEURY, ANDRÉ, HERCULE DE, cardinal and prime minister of France, under Louis XV., was born at Lodève, in Languedoc, in 1663. Coming to court, he won general favour by his pleasing person and fine understanding; became bishop of Fréjus; and, through the interest of Madame Maintenon, was appointed instructor to Louis XV. In 1726 he was made cardinal, placed at the head of the ministry, and from his 73rd to his 90th year, he administered the affairs of his country with great success. Died, 1743.

FLEURY, CLAUDE, a French historian and divine, was born in 1640. He was educated as an advocate, and became a counsellor of the parliament of Paris in 1658; but subsequently took orders, and acquiring a great reputation for learning, was appointed preceptor to the princes of Conti, and afterwards associated with Fénelon in the task of educating the young dukes of Burgundy, Anjou, and Berri. He subsequently obtained the priory of Argenteuil, where he resided till 1716, when he left it to become confessor to Louis XV. His most important works are "Ecclesiastical History," "Manners of the Israelites," and "Manners of the Christians." Died, 1723.

FLINDERS, MATTHEW, an eminent English navigator, was born at Donnington, Lincolnshire, and entered early into the merchant service, from which he removed into the royal navy, as a midshipman, in 1795. In 1801 he was appointed to the command of an expedition of discovery to New Holland, having previously distinguished himself by the discovery of Bass's Straits; and after exploring a considerable part of the coast, his vessel was wrecked on a coral reef, and he was obliged to return to Port Jackson. On his passage homeward, in 1803, having touched at Mauritius, he was detained by General Decaen, the governor, who, notwithstanding he had passports from the French government, thought proper to make him a prisoner. There he was kept till 1806, when, through the intercession of the Royal Society of London and the National Institute of France, he was set at liberty and had his vessel restored. He died in 1814, having prepared an account of his researches, under the title of "A Voyage to the Terra Australis," &c., which was published after his decease.

FLINK, GOVAERT, Dutch painter, was born at Cleves, in 1616. He studied painting first under Lambert Jacobsen and then under Rembrandt, whose style he succeeded in acquiring. He painted many historical and portrait pieces, and had the patronage of the elector of Brandenburg and the duke of Cleves. His chef-d'œuvre is said to be the picture of "Solomon asking for wisdom," in the council hall of Amsterdam. Died, 1660.

FLOREZ, ENRIQUE, Spanish historian, was born at Valladolid, in 1701, entered the order of St Augustine at the age of 14, and taught theology at the university of Alcalá. The greater part of his life was, however, spent in the compilation of various historical works, among which are—"Clave histórica," "España Sagrada," of which he completed 27 volumes, to which 20 more have since been added; "Memorias de las Reynas Católicas," &c. Died at Madrid, 1773.

FLORIAN, JEAN PIERRE CLARIS DE, a popular French novelist, was born in 1755. He was recommended by Voltaire as page to the duke of Penthièvre, who gave him a company in his own regiment, and on discovering his talents and literary tastes, ultimately treated him as a confidential friend, and afforded him the means of pursuing a literary career. Among his earliest works were "Galatea," "Estelle," and "Numa Pompilius." He also produced some admirable "Fables," and various dramatic pieces. During the tyranny of Robespierre he was arrested and imprisoned for having affixed to his "Numa" some verses in praise of Marie Antoinette; and while in confinement he composed the first book of his "Guillaume Tell." Died, 1794.

FLORIDA BLANCA, FRANCISCO ANTONIO MONINA, Count de, a Spanish statesman, distinguished as an opponent of the French revolution, but who, becoming unpopular, was dismissed from office in 1792, and subsequently committed to the castle of Pampeluna. He was, however, speedily re-

leased; and, after several years of seclusion, chosen president of the Cortes in 1808, in which year he died, aged 80.

FLORIS, FRANS, a Flemish painter, who acquired the title of the Raphael of Flanders, was born at Antwerp, in 1520, and died there in 1570.

FLORUS, LUCIUS ANNEUS, a Latin historian, said to be of the same family as Seneca and Lucan. He is the author of a "Compendium of Roman History," in four books, which is concise and elegant. He lived in the reigns of Trajan and Adrian.

FLOYER, Sir John, an eminent physician, was born at Hintons, in Staffordshire, in 1649; settled at Lichfield; was knighted, and died in 1734. His works are, "The Touchstone of Medicines," 2 vols., "The Virtues of Cold Water," 2 vols., "The Physician's Pulse Watch," 2 vols., "The Galenic Art of Preserving Old Men's Health," &c.

FLUDD, ROBERT, an English physician and philosopher, was the son of Sir Thomas Fludd, and born at Milgate, in Kent, in 1574. He was fascinated by the system of Paracelsus, and endeavoured to find a sanction in the sacred records for the fanciful speculations he indulged in. In this respect he resembled his contemporary, the "Teutonic Philosopher," Jacob Boehmen, who died a few years before him. His works fill 6 folio vols. Died, 1637.

FOIX, GASTON DE, the nephew of Louis XII. of France, was born in 1489. He had the command of the army of Italy, and on account of his daring exploits was deominated the thunderbolt of Italy. After performing prodigies of valour, he was killed at the battle of Ravenna, in 1512.

FOIX, GASTON III., Count de, viscount de Béarn, was born in 1331, and acquired the surname of Phœbus. He was handsome, accomplished, and brave, and spent his life in war and the chase. His first service in arms was against the English in 1345. During the revolt known as *la Jacquerie* he contributed to the rescue of the Dauphin at Meaux. He made war on the count of Armagnac, and took him prisoner; was for a short time governor of Languedoc; and in 1390 magnificently entertained Charles VI. at his château of Mazères. Gaston was of excessively violent temper, and probably was guilty of the murder of his own son. He wrote a book on the pleasures of the chase, of which several editions were published. Died, 1390.

FOLARD, JEAN CHARLES, an eminent military tactician, was born at Avignon, in 1669, and entered the army early in life. He served with distinguished reputation under Vendôme, in Italy, during the war of succession. He served next in Flanders, was severely wounded at the battle of Malplaquet, and was taken prisoner by the Imperialists at Aire. In 1714, he volunteered his services, and assisted in the defence of Malta against the Turks; and fought under Charles XII. of Sweden till the death of that prince, when he returned to France and obtained the command of a regiment. His system of tactics was allowed to be very judicious, and the works he published were held in considerable repute. His most cele-

brated work is his ed voluminous comment Folard was a fellow of London. Died, 1752.

FOLCZ (FOLZ), HAN berg, born at Ulm, in a celebrated German class called *Mastrer* sprung up in Germany after the extinction of the Suabian bards. They lodged to the humblest met at taverns, where for the cultivation of their great music, subject to censure and Folcz distinguished the invention of a number of his pieces was published, 1474.

FOLEY, Sir THOMAS was descended from a Wales, and served as lieutenant George, of 98 guns, at Clarence, afterwards a midshipman in that ship promoted to post rank in the commencement of the war command of the St George the recapture of the St of immense value. He capturing the *Ça Ira*, Censeur, of 74, when en Hotham, with the Toulmorable battle off Capota at the Nile, Captain skill, having, on the honour to lead the British and again, with his frigate, he shared in the day conflict before Copenhagen, advanced to the rank of in 1830 received the command-in-chief at Port station he died, January

FOLIOT, GILBERT, [FOLKES, MARTIN], philosopher and antiquary, was born in Westminster in 1690, and died in 1754. At the age of 23 he was elected a fellow of the Royal Society, succeeded Sir Hans Sloane as the learned body, and was of the Royal Academy of Antiquaries. He wrote of papers in the Philosophical Table of English Ships, Normans Conquest to which he died, 1754.

FOLLETT, Sir WILLIAM, a lawyer, was born in 1798. His education was at the school of Mr Lempiere, at Cambridge. In 1811 he was called to the bar of the Inner Temple as a special pleader. The following year he was called to the bar, and his legal abilities were of great eminence was raised to an advocate of the law, and was universally admitted.

brated work is his edition of Polybius, with voluminous commentaries. The chevalier Folard was a fellow of the Royal Society of London. Died, 1752.

FOLCZ (FOLZ), HANS, a barber of Nürnberg, born at Ulm, in the 15th century, was a celebrated German poet, belonging to the class called *mastersingers*,—a class which sprung up in Germany in the 14th century, after the extinction of the Minneingers, or Suabian bards. These *Mastersingers* belonged to the humbler sort of artisans, who met at taverns, where they established clubs for the cultivation of this branch of literature. Their great merit was that of being able to invent some new and difficult species of metre, subject to certain rhythmical laws; and Folcz distinguished himself by the invention of a number of them. The earliest of his pieces was printed at Nürnberg, in 1474.

FOLEY, Sir THOMAS, a veteran admiral, was descended from a respectable family in Wales, and served as lieutenant in the Prince George, of 98 guns, at the time the duke of Clarence, afterwards William IV., was a midshipman in that ship. In 1790 he was promoted to post rank; and, at the commencement of the war, in 1793, he had the command of the *St George*, and assisted in the recapture of the *St Jago*, a Spanish ship of immense value. He also bore a part in capturing the *Ca Ira*, of 80 guns, and the *Censeur*, of 74, when engaged, under Admiral Hotham, with the Toulon fleet. At the memorable battle off Cape St Vincent, as well as at the Nile, Captain Foley displayed great skill, having, on the latter occasion, the honour to lead the British fleet into action; and again, with his friend the gallant Nelson, he shared in the danger and glory of the conflict before Copenhagen. In 1812 he was advanced to the rank of vice-admiral; and in 1830 received the appointment of commander-in-chief at Portsmouth, in which station he died, January, 1833.

FOLIOT, GILBERT (GILBERT FOLIOT).

FOLKES, MARTIN, an English natural philosopher and antiquary, was born at Westminster in 1690, and educated at Clare Hall. At the age of 23 he was chosen a fellow of the Royal Society, and in 1741 he succeeded Sir Hans Sloane as president of that learned body, and was elected a member of the Royal Academy of Sciences at Paris. Mr Folkes was also a fellow of the Society of Antiquaries. He wrote, besides a number of papers in the *Philosophical Transactions*, a "Table of English Silver Coins, from the Normans Conquest to the Present Time." Died, 1764.

FOLLETT, Sir WILLIAM WEBB, an eminent lawyer, was born at Topsham, Devon, in 1798. His education commenced under Mr Lempriere, at the Exeter Grammar School, and was completed at Trinity College, Cambridge. In 1818 he became a member of the Inner Temple, commenced practice as a special pleader in 1823, and in the following year he was called to the bar. His legal abilities were of the first order, and his rise to eminence was rapid, his superiority as an advocate on the western circuit being universally admitted. Sir William aspired

to parliamentary honours in 1832, but he did not succeed till three years later, when he was returned for the city of Exeter. On Sir R. Peel's accession to place as prime minister, in 1834, Sir W. Follett was appointed solicitor-general; but upon Sir Robert's resignation in 1835, he also quitted office, and was knighted. At the general election of 1837, and again in 1841, he was re-elected member for Exeter. On Sir Robert Peel's resumption of office, he was once more appointed solicitor-general. On Sir F. Pollock's elevation to the judicial bench in 1844 he succeeded him as attorney-general. The health of Sir W. Follett had never been robust in his youth, and it was unequal to the exertions necessary to fulfil the duties of his extensive practice. After repeated attacks of illness in previous years, and occasional relaxations from his professional labours, he at length sought to restore his health by a residence on the Continent: it was thought that he had received benefit from the change; but he had not long returned to his native country, and engaged again in the busy scene of his former activity, before the hand of "the Destroyer" was upon him. Died, June 28, 1845. There is a noble statue of this great lawyer, by Behnes, in St Paul's.

FONBLANQUE, JOHN DE GRENIER, an eminent barrister, was descended from a noble family in the south of France, some of whom, on the revocation of the Edict of Nantes, came to England, and founded the celebrated house of agency, into which they subsequently admitted as a partner, Mr Thelluson, originally their bookkeeper, but who afterwards realized that prodigious fortune which so often occupied public attention, through its singular testamentary disposition. John Fonblanque, the subject of this article, was born in 1769; received his education at Harrow and Oxford; and in 1783 was called to the bar. In 1790 he acted as leading counsel for the London merchants, in opposition to the Quebec bill, at the bar of the House of Commons. In 1793 appeared his celebrated "Treatise on Equity," which went through several editions, and was long regarded by the courts as an authority. In 1802 he was elected M.P. for Camelford, and continued a member until the dissolution in 1806. In 1804 he obtained a silk gown with a patent of precedence, and for many years enjoyed an extensive equity practice. He was an able advocate of the Whig party, and a personal friend of the prince of Wales, for whom he is supposed to have written the celebrated letters to the king, on the subject of his royal highness's exclusion from the army, which were generally attributed to Lord Moira. He died, Jan. 4, 1837.

FONTAINE, JEAN DE LA, the inimitable fabulist, was born in 1621, at Château Thierry, where his father was overseer of the forests. His taste for poetry was first aroused by hearing one of Malherbe's odes recited; but to the patronage of the duchess of Bouillon, who invited him to Paris, and encouraged him to write his *Tales*, he owed much of the distinction in literature he afterwards acquired. For 35 years he lived in Paris, residing successively with the duchesses of

of the bay of Naples, by order of Lord Nelson; and whilst engaged on that service, in conjunction with Cardinal Ruffo, he signed a treaty with the insurgents. This was disapproved of and annulled by Nelson, and the circumstance gave rise to much animadversion at the time; some considering that Captain Foote had been the dupe of the cardinal, and others blaming the British admiral for having greatly exceeded his authority. He was promoted to the rank of rear-admiral in 1812, and vice-admiral in 1821. Died at his residence, Highfield House, near Southampton, 1833, aged 66.

FOOTE, SAMUEL, a comic writer and actor (whose satiric wit and imitative powers, though perhaps never surpassed, were often indecent and personally offensive), was born, in 1721, at Truro, Cornwall; educated at Worcester College, Oxford; and intended for the bar. After a course of dissipation, to which his small fortune fell a sacrifice, he turned his attention to the stage, and appeared in "Othello," but having little success, he struck out an untrodden path for himself in the double character of dramatist and performer. In 1747, he opened the Haymarket Theatre with some very humorous imitations of well-known individuals; and thus, having discovered where his strength lay, he wrote several two-act farces, and continued to perform at one of the winter theatres every season, usually bringing out some pieces of his own, and regularly returning to his summer quarters. In 1766, he was thrown from his horse, and fractured his leg in such a manner, that amputation was rendered necessary. He soon, however, recovered his health and spirits, and even improved the incident to the suggestion of characters for his own acting. This accident also proved of service to his fortune, as it induced the duke of York to procure for him a patent for life of the Haymarket Theatre. In 1777, having been charged with an infamous crime by a discarded manservant, he was tried for the crime, and, though fully acquitted, it had such an effect upon his mind and health, that he died in a few months after. He wrote twenty-six dramatic pieces, all replete with wit, humour, and satire; but there is not one which at present keeps possession of the stage.

FORBES, Sir CHARLES, bart., an eminent Indian merchant, was born in Aberdeenshire, 1773. He was for more than 40 years the head of the first mercantile and financial house in India; and his name stood in the highest repute in the commercial world for ability, foresight, and rectitude of character. He was returned to parliament in 1812 for Beverley; and during five parliaments, from 1818 to 1832, he sat for Malmesbury. Connected from early youth with India, and devoted to the welfare of its people, he was ardent in his advocacy for "justice to India;" and he had the happiness to see many of his benevolent schemes for the well-being of his numerous clients completely realized. On returning from India he was presented by the natives with a magnificent service of plate; and 27 years after his departure from Bombay, a statue from the

chisel of Chantrey was erected to his honour in the town hall of Bombay. But it was in his private charities that the character of Sir C. Forbes was peculiarly manifested; they were distributed without reference to any other consideration than the necessities of the recipient; and so unostentatiously were they administered, that almost literally it might be said of him, that his right hand knew not what his left bestowed. He was created a baronet in 1823. Died, 1849.

FORBES, DUNCAN, an eminent Scottish judge, was born at Culloden, in 1685; studied at Paris, Utrecht, and Edinburgh; and rose, in 1737, to the rank of president of the court of session, discharging the functions of his high office with zeal, ability, and patriotism. It was mainly owing to his exertions that the rebellion of 1745 was prevented from spreading more widely among the clans; but so ungratefully was he treated by the government, that he was never able to obtain repayment of the various sums he had expended to uphold it. He was the author of "Thoughts on Religion," the "Culloden Papers," &c. Died, 1747. There is a portrait of President Duncan Forbes in the National Portrait Gallery.

FORBES, Professor EDWARD, F.R.S., &c., one of the most eminent naturalists of his age, was born in 1815, in the Isle of Man, where his father was a banker. His love of natural history dated from his earliest childhood, and he had accumulated a large stock of knowledge when, in 1832, he went to the university of Edinburgh, to attend the lectures of Professor Jameson, at that time reputed the first naturalist in the empire. Here he gained great distinction, and the qualities which he displayed predicted for him a brilliant career. After visiting Norway, Sweden, France, Germany, and other countries, in order to extend his knowledge of natural history, he delivered a course of lectures on his favourite science in Edinburgh in 1839, and in 1840-41, appeared his "History of British Star-fishes," which at once gave him high rank as a naturalist. In 1841 he was attached to a scientific expedition sent to Asia Minor under the auspices of government. During his absence of two years he made important observations and discoveries in the botany, zoology, and geology of the Mediterranean Sea, islands, and coasts, many of which are embodied in the remarkable account of his voyages, which he published in conjunction with Lieutenant Spratt. During his absence, he was appointed to the professorship of botany in King's College, London. His vast knowledge was soon appreciated, and he became secretary and curator to the Geological Society of London, and was afterwards placed at the head of the palaeontological department of the Museum of Economic Geology, where he laboured for some years with zeal and assiduity. Besides the works already mentioned, he contributed a variety of papers and memoirs to scientific journals; he also constructed the Geological and Palaeontological Map of the British Isles; and a World Map of great interest, entitled "Distribution of Marine Life," &c., embodying the results

[FOR]

[FOR]

FORD, Sir JOHN, was born at Harting, Sussex, in 1805; educated at Oxford; and knighted by Charles I., after having served the office of sheriff for his native county. During the civil wars he commanded a regiment of horse, and suffered much in the royal cause, being imprisoned on suspicion of aiding the king's escape from Hampton Court; but owing to the interest of Ireton, whose sister he had married, he obtained his release. He was a man of considerable mechanical ingenuity; and at the request of the citizens of London he contrived machinery for raising the Thames water into all the high streets, which machinery was afterwards used to drain mines and lands in other parts of the country. He projected various other beneficial improvements, and died in 1670.

FORD, RICHARD, a distinguished author and connoisseur, was born in London in 1799, educated at Winchester, graduated at Trinity College, Oxford, and called to the bar in Lincoln's Inn in 1819, though he never practised his profession. After several years spent in foreign travel, and a lengthened sojourn in Spain, he settled at Heavitree, near Exeter, and there, amidst his celebrated collection of pictures, rare books, and articles of virtue, gathered from every to his literary tastes, he gave himself up to the "Quarterly Review" brilliant essays on politics, literature, and art, and gathering around him a host of admiring and congenial friends, who were attracted not less by the bonhomie of the man than by the treasures of art and knowledge he could place before them. Though possessed of great and varied acquirements, Spain and everything connected with it were his favourite subjects; and his "Handbook of Spain," first published in 1845, has taken its place among the best books of travel, humour, and history, social, literary, political, and artistic, in the English language. His "Gatherings in Spain," a kind of popular abridgement of the larger work, was published in 1848, and, like its predecessor, attained great success. Died, 1858.

FORDUN, JOHN DE, a Scotch historian of the 14th century; author of a history of Scotland, entitled, "Scotchchronicon," which contains much valuable information, mingled with much that is absurd and fabulous. A good edition was published by W. Goodall in 1759.

FORDYCE, JAMES, Scottish divine, was born, in 1720, at Aberdeen, and educated at the university. His first settlement, as a minister, was at Brechin, from whence he removed to Allon; and having obtained the degree of D.D. from the university of Glasgow, he came to Monkwell Street chapel, London, where he drew crowded audiences by his eloquence. In 1782 he resigned his situation, and went to live first in Hampshire, and next at Bath, where he died in 1796. He published "Sermons to Young Women;" "Addresses to Young Men;" a volume of poems; and some single sermons.

FORDYCE, GEORGE, an eminent physician, nephew of the preceding, was born in 1736; educated at the university of Aberdeen, and obtained the degree of M.A. at the

age of 14. The year following he was placed with his uncle, who was a surgeon and apothecary at Uppingham, in Rutlandshire. He went from thence to Edinburgh, and next to Leyden, where, in 1758, he took his doctor's degree. In 1759 he settled in London, and commenced lecturer on the materia medica and practice of physio, in which he acquired an unrivalled reputation. In 1770 he was chosen physician to St Thomas's Hospital, and in 1778 a fellow of the Royal Society. In 1787 he was elected, *speciali gratia*, a fellow of the College of Physicians. Dr Fordyce is known by his "Dissertations on Fever," a "Treatise on Digestion," "Elements of the Practice of Physio," &c. He was also an excellent experimental chemist, and published "Elements of Agriculture and Vegetation." He died in 1802.

FOREST, JEAN, painter to the king of France, was born at Paris in 1636, and died in 1712. His landscapes are much admired.

FOREST, PIERRE DE LA, cardinal, archbishop of Rouen, was born in 1814. He acquired much reputation as a teacher of law in the schools of Orleans and Angers, and next practised as an advocate at Paris. After holding various offices he was made chancellor of France by Philip of Valois, and in that capacity took a prominent part in state affairs. He assisted on two occasions in negotiating a truce between France and England; was made archbishop of Rouen in 1352; opened the States-general in 1365 and 1358; was deprived for a time of the chancellorship because he was obnoxious to the states; and was created cardinal and legato in Sicily by Innocent VI. Died at Ville-neuve, near Avignon, 1361.

FORKEL, JOHANN NICHOLAS, an eminent writer on the history and theory of music, and director of music in the university of Göttingen, was born in 1749, and died in 1810. His "General History of Music," 2 vols. 4to, is reckoned the most valuable of his numerous works. He was also a composer and a good pianist, and a man of general and extensive knowledge.

FORLI, MELOZZO DA. [MELOZZO.]

FORSKAL, PETER, a young Swedish naturalist, the scholar and friend of Linnæus, who, after completing his studies at Upsal, travelled into the East with Niebuhr, but died at Djerim, in Arabia, during the second year of his travels, and before he had attained his 28th year. Niebuhr, on his return, published, in 3 vols. 4to, Forskal's remarks on the productions of the countries through which he had passed.

FORSTER, GEORGE, an English traveller, was in 1782 engaged in the civil service of the East India Company. He was well acquainted with the oriental languages, which rendered him a fit person to undertake a journey from Bengal to Persia, and thence through Russia to England. A full narrative of this journey was published in 1798, in 2 vols. 4to. Died at Allahabad, in 1792.

FORSTER, JOHANN REINHOLD, an eminent naturalist and traveller, was born, in 1729, at Dirschau, in Polish Prussia; educated at Berlin and Halle; and officiated as minister of Dantzic, and afterwards at Vassenhoff. He then came to England, as

teacher of the French and German languages, and natural history, at the dissenting academy at Warrington. In 1772 he accompanied Captain Cook in his second voyage round the world, as naturalist to the expedition, and took his son with him as a companion. On his return, in 1775, the university of Oxford conferred on him the degree of LL.D., and he seemed on the high road to preferment; but a quarrel arising respecting the publication of the narrative of the voyage by his son, Forster quitted England, and he was appointed professor of natural history, &c., at Halle, in Saxony, to which place he retired; and died in 1798. Besides his "History of Voyages and Discoveries in the North," he wrote several other original works, and translated many into German. He united great penetration and quick apprehension with astonishing powers of memory. He spoke or wrote 17 living and dead languages, and was well-acquainted with almost every department of literature; while in history, botany, and zoology, he stands among the first investigators of the last century.

FORSTER, JOHANN GEORGE ADAM, son of the preceding, was born in 1784; accompanied his father in the voyage round the world; was professor of natural history in Hesse Cassel, and afterwards at Wilna. He subsequently settled at Mentz as a bookseller, and entered warmly into the revolutionary principles of France, on which account he was nominated a deputy to Paris to arrange the reunion of Mentz with the French republic; but Mentz being besieged and taken by the Prussians, Forster was obliged to remain at Paris, where he died in 1794, while preparing, as it is said, for a voyage to Hindostan and Thibet. He was the author of several works on geography, natural history, philosophy, and politics.

FORSYTH, ALEXANDER JOHN, A.M., LL.D., the discoverer of the percussion principle, was born 1st of January, 1769. He was the son of the Rev. James Forsyth, minister of Belhelvie, near Aberdeen, and Isabel Syme, daughter of the Rev. Gilbert Syme, minister of Tullynessie. (A son of Mr Syme married a daughter of Principal Robertson, of Edinburgh, whose only daughter, Eleonora Syme, was married to Henry Brougham, Esq., of Brougham Hall, Westmoreland, and was the mother of Henry, Lord Brougham and Vaux.) He completed his education at King's College, Aberdeen, where he took the degree of A.M. He succeeded his father in the pastoral charge of the parish of Belhelvie, 24th of August, 1791. Soon after his settlement, he commenced, for his amusement, a series of chemical experiments, principally on fuming powders, and other explosive compounds. In the year 1805, he was called to London, to make experiments for the government on the percussion principle, which he had about two years previously discovered. His stay in London was prolonged to nearly a twelvemonth, and he had all but succeeded in convincing the officials at the ordnance office of the propriety of adopting the percussion lock, when a change of ministry, and the bustle of new appointments, or the

contempt for everything done or proposed by predecessors, led to an order to him to remove from the Tower, where he had been experimenting, and take his "rubbish" with him. That "rubbish" consisted of beautiful and ingenious applications of the percussion principle; a principle which now, after half a century has elapsed, is generally adopted. About a year previous to his death, his claims were acknowledged by government, who gave him an annuity of £200. As a parish clergyman he was much esteemed, and for the gentleness and modesty of his demeanour secured for himself the warm attachment of a wide circle of friends and acquaintance. He died suddenly, 11th June, 1843, aged 74.

FORSYTH, WILLIAM, an able horticulturist, was born at Old Meldrum, Aberdeenshire, in 1737. He was a pupil of the celebrated Philip Miller, and succeeded him at the physic-gardens of the apothecaries' company at Chelsea. In 1784 he was made superintendent of the royal gardens at Kensington and St James's, and died in 1804. Forsyth was a fellow of the Society of Antiquaries, the Linnæan Society, and other learned bodies. His chief work is the "Treatise on the Cultivation of Fruit Trees."

FORTESCUE, SIR JOHN, an eminent judge and writer on the law, was a son of Sir Henry Fortescue, lord chief justice of Ireland. He studied at Lincoln's Inn, was called to the bar, and in 1442 was made chief justice of the court of King's Bench. He was a principal counsellor in the court of Henry VI., and for his devotion to that monarch he was attainted by the parliament under Edward IV.; and in 1463 he fled, with Queen Margaret and her suite, to Flanders, where he remained in exile several years; during which time he wrote his well-known work, "De Laudibus Legum Angliæ." Returning to England, to join in the struggle for the restoration of the house of Lancaster, he was taken at the battle of Tewkesbury; but obtained his pardon from Edward, and was allowed to retire to his seat in Gloucestershire, where he died, in his 90th year.

FORTESCUE. [ALAND.]

FORTIGUERRA, NICOLÒ, an Italian poet and dramatist, was born at Pistoia in 1574, and died in 1735. He was the author of a burlesque poem, entitled "Ricciardetto," a lively and elegant production, in which the styles of Ariosto and Pulci are by turns very happily imitated.

FOSBROOKE, THOMAS DUDLEY, F.S.A., a learned and industrious antiquary and archaeologist, was born in 1770, and received his education at St Paul's School, London, and Pembroke College, Oxford. Mr Fosbrooke commenced his literary career in 1798, with a poem entitled "The Economy of Monastic Life;" and in 1799 he produced his "British Monachism," 2 vols. 8vo, having previously applied himself with extraordinary diligence to the study of the Saxon language. His next work was a collection of materials for the History of Gloucestershire, in 2 vols. 4to; and in 1819 appeared his "History of the City of Gloucester." These were followed by the "Wye Tour," "Ariconsensia," and the "Berkeley Manuscripts." In 1824 he published his most im-

portant work, the "Elementary Principles of Antiquities, and Elements of Archaeology," 4 vols. 4to; and, in 1828, he published a work, called "Foreign Tourist's Grammar," which, as well as his "Tourist's Grammar," works, also appeared for many years as the "Gentleman's Library." He was also the author of a book on the church of Gloucester, and his literary industry was his literary industry. He was for many years he officiated as a curate at Walford (the Wye); and for the life he was vicar of the New-year's day, 1842.

FOSCARINI, MARCO, the historian of Venice, was born in 1698. He early entered himself in the public service, and was successively ambassador to Turin, maintaining for neutrality in the wars of Austria, and writing up his diplomatic proceedings, matters which fell upon him for some time he was professor of Padua, a college of Venice in 1762. His work is entitled, "Della storia di Venezia, e della sua libertà otto." He published, some of which, given to the world, Foscarini's collection of forms part of the Imperial Library.

FOSCOLO, UGO, a distinguished Italian writer, was born at Sestri, near Genoa, in 1791. His father was governor of Padua, and produced "Thyestes" before he was employed as secretary who was sent ambassador in endeavour to preserve the Venetian republic. Unsuccessful, and Foscolo, where he produced "Letters of Ortis," which fame. Having enlisted in the army, he was formed. He was general Massena, and was wounded two of his finest talents in the Italian army till sent to Calais was the destined for the invasion of France after he quitted the service. He was appointed professor of literature in 1808; but the bold language of his lectures in Buonaparte, and the pro- immediately suppressed. He wrote a tragedy of "Ajax," which was at the theatre della Scala. It was supposed to contain a character of Buonaparte, and he was obliged to withdraw to Florence. He subsequently engaged the Austrians for every taking place, he was driven to Switzerland, and moved to England, where he died by the literati and artists. Besides publishing

important work, the "Encyclopedia of Antiquities, and Elements of Archaeology," 2 vols. 4to; and, in 1828, a kind of sequel to it, called "Foreign Topography." "The Tourist's Grammar," and several other works, also appeared from his pen; and he was for many years a prolific contributor to the "Gentleman's Magazine." Mr Fosbrooke's church preferment was as scanty as his literary industry was great. For 16 years he officiated as curate of Horsley, in Gloucestershire; during the next 20 years he was curate at Walford (on the banks of the Wye); and for the last 12 years of his life he was vicar of that parish. Died on New-year's day, 1842.

FOSCARINI, MARCO, Doge of Venice, and the historian of Venetian literature, was born in 1698. He early distinguished himself in the public service, and was successively ambassador to Vienna, Rome, and Turin, maintaining for his country a strict neutrality in the wars between France and Austria, and writing valuable accounts of his diplomatic proceedings, and of other matters which fell under his observation. For some time he was at the head of the university of Padua, and he was elected Doge of Venice in 1762. His great literary work is entitled, "Della Litteratura Venetiana libri otto." He left other works unpublished, some of which were, after his death, given to the world. Died, 1763. Foscarini's collection of manuscripts now forms part of the Imperial Library, Vienna.

FOSCOLO, UGO, a distinguished Italian writer, was born at sea, in 1776, in a Venetian frigate lying near Zante, of which island his father was governor. He was educated at Padua, and produced his tragedy of "Thyestes" before he was 20. He was soon after employed as secretary to Battaglia, who was sent ambassador to Buonaparte, to endeavour to preserve the independence of the Venetian republic. The embassy was unsuccessful, and Foscolo retired into Lombardy, where he produced his celebrated "Letters of Otis," which established his fame. Having enlisted in the first Italian legion that was formed, he was shut up in Genoa during the famous siege of 1799, with General Massena, and while there he composed two of his finest odes. He remained in the Italian army till 1805, when he was sent to Calais with the troops professedly destined for the invasion of England; but he soon after quitted the service. He was appointed professor of literature at Pavia, in 1808; but the bold language of his introductory lecture led him to have offended Buonaparte, and the professorship was immediately suppressed. In 1812 he produced his tragedy of "Ajax," which was represented at the theatre Della Scala, at Milan; but it was supposed to convey a satire on the character of Buonaparte, he found it necessary to withdraw to Florence. He is said to have subsequently engaged in a conspiracy to expel the Austrians from Italy; but a discovery taking place, he was obliged to depart, first to Switzerland, and shortly after to France, where he was well received by the literati and people of distinction. Besides publishing his "Essays on

Petrarch," "Disputations and Notes on Dante," &c., he contributed to the Edinburgh, Quarterly, and other reviews; and he might have enjoyed an easy competence, if he had not involved himself in pecuniary difficulties. Died, 1827. The grave of Foscolo, at Chiswick, was visited by Garibaldi in April, 1864.

FOSSE, CHARLES DELA, an eminent painter, was born at Paris, in 1640. He became successively professor, director, and chancellor of the Academy of Painting, and died in 1716.

FOSCOMBONI, VITTORIO, Italian statesman and natural philosopher, was born at Arezzo in 1754. He was educated at the university of Pisa, and, in 1782, obtained a public appointment in Tuscany. He subsequently superintended the drainage works of the Val di Chiana, which he had specially studied and discussed in a valuable memoir. In 1796 he became minister for foreign affairs to the grand duke of Tuscany; held high offices in the new kingdom of Etruria and under the French empire; and on the restoration of the grand duke became again chief minister, and remained so, with the greatest advantage to Tuscany, till his death. Foscomboni was author of many works on mathematics and natural philosophy, especially on hydraulics. Died, 1844.

FOSTER, JAMES, D.D., dissenting minister, was born at Exeter, in 1687; and commenced preaching there in 1718. He afterwards removed to Trowbridge, in Wiltshire, where he turned Baptist; and in 1724 was chosen successor to Dr John Gale, of the chapel in Barbican, London, where he officiated nearly 20 years, and also as lecturer at a meeting-house in the Old Jewry. He was so eloquent a preacher that crowds flocked to hear him, and Pope has made honourable mention of him in his satires. In 1746 he attended Lord Kilmarnock to the scaffold, which is said to have affected him with a settled melancholy, from which he never entirely recovered. He wrote a "Defence of Revelation," in reply to Tindal; "Tracts on Heresy," "Discourses on Natural Religion and Social Virtue," &c. Died, 1753.

FOSTER, JOHN, one of the most able writers and original thinkers of modern times, was born near Halifax, in Yorkshre, 1770. At an early age he entered the Baptist college at Bristol, and on the completion of his theological studies, was successively settled as a preacher at various places, the last of which was Downend, near Bristol; but he soon relinquished his pastoral duties, and the last 20 years of his life were chiefly devoted to literary pursuits. He was a frequent contributor to the "Eclectic Review" (some of his articles have been collected and published separately); but his chief reputation is founded on his "Essays," which have gone through numerous editions, and which, although no longer perhaps to be called "popular," have too much solid worth, wealth of manly thought, and charm of poetic imagination, to be forgotten or neglected by thoughtful readers. Died, 1843. His "Life and Correspondence," edited by J. E. Ryland, appeared in 2 vols. 8vo, in 1846, and has

and in 1727 he was appointed warden of the Mint. Died, 1753.

FOUQUIER TINVILLE, ANTOINE QUENTIN, one of the most execrable monsters of the French revolution, was born in 1747. As director of Robespierre's revolutionary tribunal in 1793, he boasted of pronouncing only one word—"Death." It was he that made the infamous accusation against Marie Antoinette; to which she replied, "I appeal to all mothers whether the charge is possible." He called the guillotine the coining machine of the revolution; and to such a state of savage fury had his thirst for blood arisen, that its repeated gratification appears to have produced a real insanity. At length, after the fall of Robespierre, in 1795, Tinvillle was denounced by Fréron in these appropriate words, "I demand that Fouquier Tinvillle may wear off the remains of his drunken surfeit of blood in hell." Being tried and condemned to the guillotine, the people used his own death-dealing phrase as he went to execution, while he replied with hoarse curses and distorted gesticulations to their execrations, but his courage failed him at the foot of the scaffold, and he died like a coward.

FOUQUIERES, JACOB, a Flemish painter, was born at Antwerp in 1580. He was the disciple of "Velvet" Breughel, and excelled in painting landscapes. Died, 1659.

FOURCROY, ANTOINE FRANÇOIS DE, an eminent French chemist and natural philosopher, was born at Paris, in 1755; and, having adopted the profession of medicine, he applied himself closely to the study of the sciences connected with it, especially to chemistry. In 1784 he was appointed professor of chemistry at the Jardin du Roi; and about this period he became associated with Lavoisier, Berthollet, &c., in researches which led to vast improvements and discoveries in chemistry, and, in conjunction with them, he drew up the new "Méthode de Nomenclature Chimique." When the revolution took place, he engaged in politics, and was chosen a deputy from Paris to the National Convention. In 1794 he became a member of the Committee of Public Safety, and, next year, passed into the Council of Ancients. In 1799, Buonaparte gave him a place in the council of state, when he was intrusted with the management of all affairs relating to public instruction, and acquitted himself in a manner highly meritorious. He was the author of many valuable works on chemical science and natural philosophy. Died, 1809.

FOURIER, FRANÇOIS CHARLES MARIE, inventor of the co-operative system, was born at Besançon, in 1768. He was son of a clothier, and was brought up to mercantile employment at Lyons and Marseilles. The agitation of the first years of the revolution led him to reflect and speculate on the evils which afflict society and possible remedies for them, and in 1808 he announced his discovery or theory in a volume entitled, "Thorie des Quatre Mouvements et des Destinées Générales," which, after exciting a "line-days" wonder, was forgotten. It was merely the prospectus of a voluminous work which he began to publish in 1822; the first

portion being entitled "Traité de l'association Domestique et Agricole." No notice was taken of it by the press or by the public men to whom Fourier sent copies; nor did his compendium entitled "Le Nouveau Monde Industriel et Sociétaire" find a better reception. By a severe attack on the principles of the St Simonians and Owenites in 1831, Fourier gained attention and attracted disciples, and he soon after began publishing a journal, "La Phalange," for the propagation of his views. The attempt made to give practical shape to them came to nothing, but the craving for realization of his ideal—a better distribution of labour and the profits of it by means of social organization—is wide-spread and deep-seated, especially in France. Fourier published various other works, and died in 1837.

FOURMONT, ETTENNE, an eminent orientalist, was born, in 1683, at Herbecai, near Paris. He was professor of Arabic at the Collège Royal, and was the first to make known in Europe the Chinese characters. His most important works are "Meditations Sinicas" and "Grammatica Sinica." Fourmont was a member of the Academy of Inscriptions and of the Royal Society of London. Died, 1745.

FOURNIER, PIERRE SIMON, a Parisian type-founder and engraver; author of "Manuel Typographique," and other works illustrative of his art. Born, 1712; died, 1768.

FOX, EDWARD, an eminent English prelate and statesman in the 16th century, was born at Dursley, Gloucestershire; educated at Eton, and King's College, Cambridge, became provost of the latter; and was sent by Cardinal Wolsey on a mission to Rome, in conjunction with Gardiner, to procure the divorce of Henry VIII. from Queen Catharine. He was subsequently engaged in embassies to France and Germany; and, in 1535, he was promoted to the see of Hereford. He secretly promoted the cause of the reformation; but though he used his influence in that cause as a politician, as a divine he never openly espoused it. Died, 1538.

FOX, GEORGE, founder of the Society of Friends, or Quakers, was born at Drayton, Leicestershire, in 1624, and apprenticed to a grazier, and afterwards to a shoemaker. At the age of 19 he persuaded himself that he had received a divine command to devote himself solely to religion. He accordingly forsook his relations, made himself a suit of leather, and wandered from place to place, leading a wandering life, in which he fasted much, walked abroad in retired places, studying the Bible, and sometimes sat in a hollow tree for a day together. In 1648 he began to propagate his opinions, and commenced public preacher. The nickname "Quaker" is said to have been first used by a country justice before whom Fox appeared at Derby. He was taken up in 1653, and sent a prisoner to Cromwell, who, being satisfied of his pacific intentions, set him at liberty. In fact, he was more than once indebted to the Protector for his freedom, when committed to prison by the country magistracy for his frequent interruption of ministers while performing divine service.

In 1666 he was liberated from prison by order of Charles II., and immediately commenced the task of organizing his followers into a formal and united society. In 1669 he married the widow of judge Fell, and soon after went over to America, for the express purpose of making proselytes. On his return he was again thrown into prison, but was soon released, and went to Holland. Returning to England, and refusing to pay tithes, he was cast in a suit for the recovery of them, and again visited the Continent. His health had now become impaired by the incessant toil and suffering he had endured, and he again revisited his native land, living in a retired manner till his death, in 1690. The preaching and life of George Fox was a passionate and very practical protest against formalism in religion, world-worship and spiritual slavery. Spite of all obstacles, he at least did see the inner truth and reality of things. To do the will of God and to persuade men to do it, this was what he lived for. And with the greatest courage, patience, and self-renunciation he devoted himself to his prophet's task. His writings consist of his "Journals," "Epistles," and "Doctrinal Pieces."

FOX, HENRY, the first Lord Holland, an eminent statesman, was born in 1705, and educated at Eton. After filling lower offices in the state, he was in 1746 appointed secretary at war; retired in 1756, to make way for Mr Pitt, afterwards earl of Chatham, but returned to office the following year as paymaster of the forces; and in this situation his public conduct has been much admired upon. In 1763 he was created Baron Holland of Foxley, and died in 1774.

FOX, CHARLES JAMES, the great statesman and orator, was the second son of the preceding, and was born Jan. 13th, 1748; he received his education at Westminster, Eton, and Oxford, where his proficiency in classical literature attracted considerable notice. It was the intention of his father, who had a high opinion of his capacity, that he should occupy a prominent station in the political world, and he accordingly procured for him a seat in parliament for the borough of Midhurst when he was only 19. He, however, prudently remained silent till he had attained the legal age of a member, and then we find him, in 1770, aiding the ministry, who rewarded him with the office of one of the lords of the admiralty; but he resigned that situation in 1772; and, in 1773, was nominated a commissioner of the treasury, from whence he was suddenly dismissed, in consequence of some disagreement with Lord North. Mr Fox now entered the lists of opposition, and throughout the whole of the American war proved a most powerful antagonist to the ministers of that period. On the downfall of Lord North he was appointed, in 1782, one of the secretaries of state, which situation he resigned on the death of the marquis of Rockingham; when the earl of Shelburne, afterwards marquis of Lansdowne, was appointed to succeed him. On the dissolution of that short-lived administration, he formed the coalition with Lord North (a coalition which was odious to the great

mass of the people), and resumed his former office. He now brought in his India bill, which, after having passed the House of Commons, was unexpectedly thrown out by the House of Lords, and occasioned the resignation of the ministry, of which he formed a part. Mr Pitt then came into power, while Mr Fox placed himself at the head of the opposition, and a long contest took place between these illustrious rivals. Worn out, and perhaps disgusted, with public business, he, in 1788, repaired to the Continent, in company with Mrs Fox, and after spending a few days with Gibbon, the historian, at Lausanne, entered the classic regions of Italy. In consequence, however, of the sudden illness of the king, and the probable necessity of constituting a regency, he was soon recalled. The regency bill, the trial of Mr Hastings, and, above all, the French revolution, and its effects on this country, gave ample scope for his talents and eloquence, which he continued to exert against the administration of Mr Pitt; inveighing against the war with France, and denouncing the measures of his great rival on every subject of importance. However men may differ as to the soundness of Mr Fox's political views, no one denies that he was a sincere friend to the freedom and best interests of mankind, or that in private life a more amiable and pleasant companion could not be found. In the senate he was argumentative, bold, and energetic; in the domestic circle, no one was more ingenious, bland, and courteous. His literary abilities were of a high order; and had he lived in less stirring times, there is every probability his country would have benefited by his writings. As it was, he left little behind him but his eloquent speeches, and "The History of the early Part of the Reign of James II." On the death of Mr Pitt he was again recalled to power, and set on foot a negotiation for peace with France, but did not live to see the issue of it. He died, in the 59th year of his age, on the 13th of September, 1806. "Memorials of Charles James Fox" have been edited by Earl Russell, in 4 vols. 8vo; and two volumes of his "Life," also by Earl Russell, have appeared.

FOX, JOHN, a celebrated church historian and divine, was born, in 1517, at Boston, Lincolnshire, and educated at Oxford. Applying himself closely to the study of theology, he became a convert to the principles of the Reformation, was expelled his college on a charge of heresy, and suffered great privation. A short time before the death of Henry VIII., he was employed as tutor in the family of the duchess of Richmond, to educate the children of her brother, the earl of Surrey, then a state prisoner. In the reign of Edward VI. he was restored to his fellowship; but when Mary ascended the throne he found it prudent to retire to the Continent, where he gained a livelihood as corrector of the press for an eminent printer at Basel. On Elizabeth's accession he returned to his native country, and settled in the family of his former pupil, the duke of Norfolk, where he remained till his death; and he also received a prebendal stall in the cathedral of Salisbury. He

[FOX]

[FRA]

was the author of many controversial and other works; but the only one now read is his "History of the Acts and Monuments of the Church," commonly called "Fox's Book of Martyrs." After having been subjected to severe attacks on the part of those whose interest it was to put such a witness on Fox out of court, it is not longer to be questioned that this remarkable work is substantially accurate and trustworthy, and that the appalling picture it presents of a persecuting church and its martyr-victims, is not overdrawn nor false in colouring. Fox died in 1587, aged 69.

FOX, RICHARD, an English prelate and statesman, was born about 1466, at Ropesy, near Grantham, and educated at Oxford, Cambridge, and Paris. He was in high favour with Henry VII., who employed him in various missions; and successively made him bishop of Exeter, Bath and Wells, Durham, and Winchester. But in the following reign he found himself supplanted by Wolsey, whom he had introduced and fostered; he therefore retired to his diocese, and passed the remainder of his days in acts of charity and munificence. He was a patron of learning, and the founder of Corpus Christi College, Oxford, and of the free-schools of Linton and Grantham. Died, 1528.

FOY, MAXIMILIEN SEBASTIEN, General, was a native of Ham, in Picardy, where he was born in 1775. He entered the army at 15 years of age, and made his first campaign under Dumouriez in 1792. He displayed his military talents to great advantage in Italy, Germany, and Portugal; and succeeded Marmont, as commander-in-chief after the battle of Salamanca; when he conducted a skillful retreat to the Douro. He received his 15th wound on the field of Waterloo, but refused to quit his post until close of that engagement. He was afterwards employed as inspector-general of infantry; and in 1819 was elected a member of the Chamber of Deputies; when he distinguished himself as an orator, and was a great public favourite. He died in 1825; and having left his widow and family in destitute circumstances, a most liberal subscription was immediately entered into, to provide for them, and to erect a monument to his memory. From his MSS. a "History of the Peninsular War" has been published by his widow.

FRA DIAVOLO, a Neapolitan robber, whose real name was Michael Pozzo, was born about 1769. He was at first a stocking-maker, afterwards a friar, and in the latter capacity united himself as leader to a gang of outlawed banditti in Calabria. In his public character of robber and priest, he exercised his offices, in 1799, to Cardinal Ruffo, who headed the counter-revolutionary party in favour of the Bourbons of Naples. For his services, although a price had been previously set on his head, he obtained pardon, distinction, and a pension of 3600 francs, with which he retired to an estate which he purchased. On Joseph Napoleon becoming king, the expelled government again set him in motion. He made a descent in 1806, with a large body of banditti and priests, at Sperlonga, threw open the pri-

sons, and was joined by numerous lazzaroni; but, after a severe action, he was defeated and taken prisoner, condemned by a special commission, and executed. He died with disdainful indifference. He often, like Robin Hood, restored their liberty and property to captives who interested him, especially women, even making them presents, and affecting to protect the poor.

FRA GIOVANNI DA FIESOLE. [ANGELICO.]

FRANCESCO, PIERO DELLA, Italian painter, was born at Borgo San Sepolcro, whence he is called Piero Borghese. The chronology of his life is involved in obscurity, but it appears probable that he was born soon after 1410. He at first applied himself to mathematical studies, which were of great service to him as a painter, especially in rendering the effects of light and perspective. In 1439 he was assistant to Domenico Veneziano at Florence, and afterwards at Loreto. He executed many works in his native town, at Urbino, Ferrara, Rome, and Arezzo. Pietro Perugino, Luca Signorelli, and Luca Pacioli, were pupils of this master. He became blind in his old age, and died after 1493. Two of his works are in the National Gallery, a portrait, and the "Baptism of Christ," an altar-piece from the priory of Borgo San Sepolcro.

FRANCESCO DA BOLOGNA. [FRANCIA.]

FRANCIA, an eminent painter, whose real name was FRANCESCO RAIBOLINI, was born at Bologna in 1450. It is now known that FRANCESCO DA BOLOGNA, celebrated as a type-founder, is the same person as Francia the painter. In his youth he was a goldsmith and an engraver of medals, but afterwards applied wholly to painting. Being employed by Raphael, in 1517, to place his picture of St Cecilia in a church at Bologna, it is said that he was so struck with its beauty, and convinced of his own inferiority to Raphael, that he fell into a desponding state, which hastened his end. He had however nearly lived his threescore years and ten. Three works of this artist are in the National Gallery, one of which, the "Virgin and Two Angels weeping over the dead body of Christ," is infinitely attractive and impressive. It is one of the most precious pictures in the Gallery. Died, 1518.

FRANCIA, Dr JOSE GASPAR RODRIGUEZ, the celebrated dictator of Paraguay, was the son of a small French proprietor in that country, and born at Assumption, in 1757. His mother was a Creole. Arrived at the proper age, he was sent to the university of Cordova, with a view to entering the church; but his plans underwent a change while he was still a student, and on his return to his native town with the degree of doctor of laws, he began his public career as a barrister. His high reputation for learning, but still more for honesty and independence, procured him an extensive practice; and he devoted himself to legal pursuits for thirty years, varying his professional avocations with a perusal of the French Encyclopedians writers, and with the study of mathematics and mechanical philosophy, to which he re-

mained addicted throughout his life. In 1811, soon after the revolution of the Spanish possessions of South America became general, Dr Francia, then in his 64th year, was appointed secretary to the independent junta of Paraguay; and such was the ability he displayed in this capacity, that on the formation of a new congress, called in 1813, he was appointed consul of the republic, with Yegros for his colleague. From this moment the affairs of his country underwent a favourable change; the finances were re-arranged; peace was obtained in Paraguay, while the rest of the South American continent was a prey to anarchy; and the people's gratitude to their deliverer was characteristically exhibited in conferring upon him, in 1817, unlimited despotic authority, which he exercised during the remainder of his life. Died, 1840. Dr Francia's life and character is the subject of one of Carlyle's "Miscellaneous Essays."

FRANCIS I., king of France, ascended the throne in 1515, at the age of 21. He was the son of Charles of Orleans, and of Louisa of Savoy, grand-daughter to Valentine, duke of Milan, in right of whom he laid claim to that duchy. The Swiss opposed his passage through their territories, and were defeated at the battle of Marignano. Francis then entered the Milanese, and forced Maximilian Sforza to relinquish the sovereignty. On the death of the emperor Maximilian, Francis I. and Charles, king of Spain, were rival candidates for the empire, and the latter was elected. In 1520 took place the famous interview between Henry VIII. and Francis I., which from the splendour of the display on both sides is known as the interview of the "Field of the Cloth of Gold." A war afterwards broke out between Francis and Charles V., in which Francis lost a considerable part of his territories, was made prisoner at the battle of Pavia, and conveyed to Madrid. In 1526 he renounced his liberty, after renouncing his claim to Naples, the Milanese, Burgundy, Flanders, and Artois. In 1535 he marched again into Italy, and possessed himself of Savoy; but a peace was hastily made up, which was soon after broken, and Francis was again engaged in war with Spain and England. Peace with the emperor was signed at Crespi in 1544. He died in 1547. He was the patron and friend of literature and art, and possessed a generous and chivalric spirit. He founded the Royal College of Paris, and furnished a magnificent library at Fontainebleau, besides building several palaces, which he ornamented with pictures and statues, to the great encouragement of the fine arts. He is frequently termed "the Great," and "the Restorer of Learning;" and though not entitled to these appellations in their fullest sense, he may be fairly considered as one of the most distinguished sovereigns that ever swayed the sceptre of France. In his relation to the great religious movements of his age, Francis showed himself entirely without principle or earnest belief. In his support of the Protestants in Germany, in his sanction of the revolt of Geneva, and in his cruel persecution of the Protestants in his own dominions, he was

evidently guided by nothing higher or better than selfish policy.

FRANCIS II., king of France, was the oldest son of Henry II., and his queen, Catharine de Medici, and was born at Fontainebleau in 1544. He succeeded his father in July, 1559, having in the preceding year married Mary Stuart, daughter of James V. of Scotland. He made the cardinal of Lorraine first minister, and his brother, the duke of Guise, commander-in-chief. The insolence and cruelty of their rule produced profound discontent, and led to the conspiracy of Amboise, and the beginning of the civil war between Catholics and Protestants. The states-general were convoked at Orleans in 1600, the prince of Conde, who had joined the Protestants, was there arrested, and sentenced to death; but the sentence was not executed in consequence of the death of the king soon after, December, 1601.

FRANCIS I., of Lorraine, emperor of the West, was born in 1708, and married in 1730 Maria Theresa, daughter of Charles VI. On the death of her father, in 1740, Maria Theresa appointed her husband co-regent with herself, and on the death of Charles VI., in 1745, he was elected emperor. The peace of Aix-la-Chapelle was concluded in 1748, but in 1756 war again broke out (the Seven Years' War), and was only terminated by the peace of Hubertsburg. Died, 1765.

FRANCIS II., JOSEPH CHARLES, emperor of the West and I. of Austria, king of Lombardy, &c., was born in 1768, and succeeded his father, Leopold II., in 1792. It was in 1804, when France had been declared an empire, that he assumed the title of hereditary emperor of Austria; and, on the establishment of the confederation of the Rhine in 1806, he renounced the title of Roman emperor and king of Germany. At the age of 20 he accompanied his uncle, the emperor Joseph II., on a campaign against the Turks. France declared war against him in 1792; and Prussia, though at first his ally, concluded a separate peace with the republic; but the Emperor Francis continued the war with energy. In 1794 he put himself at the head of the army of the Netherlands, and defeated the French at Cateau, Landrecy, and Tournay. In 1797 he procured a temporary repose by the peace of Campo Formio; but in 1799 he entered into a new coalition with Russia and England against France; which was dissolved by Austria and Russia being compelled to conclude the peace of Luneville in 1801. War again broke out between France and Austria in 1805; but, after the battle of Austerlitz, the terms of an armistice and basis of a treaty were settled in a personal interview between Francis and Napoleon, at the bivouac of the latter. This peace lasted till 1809, when the restless ambition of the French emperor induced Francis to declare war against him once more. The disastrous campaign of Wagram followed; but a favourable peace was obtained, and, by the marriage of his eldest daughter, Maria Louisa, to Napoleon, a strong tie seemed to be formed between the two imperial houses. This family tie, however, was not sufficient to appease the ambition of his son-in-law,

In 1813 Francis found himself compelled to enter into an armistice with Prussia against Napoleon, and in the close of the contest, leaving a more extensive successor than any of his predecessors.

FRANCIS, ST. OF PAVIA, the founder of the order of the Most Holy Trinity, was born at Asti, in Italy, in 1181, and was the son of a merchant. He was of a dissolute and intemperate life, and from a dangerous illness was miraculously cured. He was afterwards a monk, and in 1210, joyfully underwent the penance and mortification of a severe and extravagant penitence. He died at Asti, and his body, which had been buried in the church of St. Francis, was taken up, and placed in the church of St. Francis at Asti, in order formally to be interred in his paternal estate. He was canonized in 1228, but literally strangled by the numbers joining him in the order. He drew up rules for the order, which were sanctioned by Pope Innocent III. The order of Franciscans was established in 1209, and they increased, that year, which was attended by the death of Francis. After having made a fruitless attempt to convert the sultan Meled, he died at Asti, and was canonized by Pope Gregory IX. in 1228.

FRANCIS OF PAULI, a Franciscan monk, was born in Calabria, in 1416. He was a zealous Franciscan convent; and in the desert part of Calabria he soon obtained followers, and thus commenced a sect. He enjoined a total abstinence from meat, besides which they were to abstain from wine, and to sleep on the ground. He died in 1507, and was canonized by Leo X.

FRANCIS DE SALES, a French philosopher, was born at Geneva, founder of the order of the Most Holy Trinity, was born of a noble family, and was educated at the chateau of Sales, in 1567. He was educated at Paris, studied law at Bourges, and returned to Geneva bent to theology, and entered the church. He was a preacher, he was secretary to the duke of Savoy, and was appointed bishop of Geneva in 1602. He had a large number of conferences with Calvin, and was succeeded by Calvin's successor at Geneva, without result. He preached there with great success, and he hadly refused the offer of the French king. He was appointed bishop of Geneva in 1602, and Charles Borromeo as his successor. He was very zealous to the reform of his monasteries. He was free from worldly attachments, and was the offer of a cardinal's hat, which he refused. He founded the Order of the Most Holy Trinity, which the first direct

[FRA]

[FRA]

In 1818 Francis found himself again compelled to enter into an alliance with Russia and Prussia against France; and, to the loss of the contest, he was present with the allied armies. He died, March 3, 1835, leaving a more extensive empire to his successor than any of his ancestors ever possessed.

FRANCIS, ST. or FRANCIS OF ASSISI, the founder of the order of Franciscan friars, was born at Assisi, in Umbrin, in 1182. He was the son of a merchant, and was said to be of dissolute habits; but on recovering from a dangerous illness he became enthusiastically devout, and devoted himself to solitude, joyfully undergoing every species of penance and mortification. Thinking his extravagance proceeded from insanity, his father had him closely confined; and at length, being taken before the bishop of Assisi, in order formally to resign all claim to his paternal estate, he not only assented to it, but literally stripped himself. He was now looked upon as a saint; and great numbers joining him in his vow of poverty, he drew up rules for their use, which being sanctioned by Pope Innocent III., the order of Franciscans was established. So rapidly did they increase, that in 1219 he held a chapter, which was attended by 6000 friars. After having made a fruitless effort to convert the sultan Meleddin, he returned to Assisi, where he died in 1226, and was canonized by Pope Gregory IX. in 1230.

FRANCIS OF PAULO, ST. born at Paulo, in Calabria, in 1416. He was brought up in a Franciscan convent; and retired to a cell in the desert part of the coast, where he soon obtained followers, built a monastery, and thus commenced a new order, called *Minims*. He enjoined on his disciples a total abstinence from wine, flesh, and fish; besides which they were always to go barefoot, and never sleep on a bed. He died in France, aged 91, in 1507, and was canonized by Leo X.

FRANCIS DE SALES, ST. bishop of Geneva, founder of the Order of the Visitation, was born of a noble Savoyard family, at the château of Sales, near Geneva, in 1567. He was educated by the Jesuits at Paris, studied law at Padua, and having a strong bent to theology and a religious life, entered the church. Earnest and successful as a preacher, he was sent, in 1594, with his companion, Louis de Sales, to preach in the duchy of Chablais, and bring back, if possible, to the Catholic church, the followers of Calvin. He had a large measure of success. His conferences with Théodoro de Bèze, Calvin's successor at Geneva, were, however, without result. He went to Paris in 1602, preached there with great success, and readily refused the offers of dignities made by the French king. The same year he was appointed bishop of Geneva, and, taking St. Charles Borromeo as his model, applied himself zealously to the reform of the diocese and its monasteries. He was disinterested and free from worldly ambition, declined the offer of a cardinal's hat and the renewed invitations of the king of France. In 1610 he founded the Order of the Visitation, of which the first directress was his friend

Madame de Chantal. He was sent again to Paris in 1618, and died in 1622. His best-known works are the "Introduction de la Vie Dévote," "Philothée, ou Traité de l'Amour de Dieu," and his "Lettres Spirituelles." He was canonized by Pope Alexander VII. in 1665.

FRANCIS XAVIER. [XAVIER.]
FRANCIS, PHILIP, son of the dean of Llanorc, was a poet and dramatic writer, though much more celebrated for his translations of Horace and other classic authors, than for his original compositions. He was educated at Dublin; and having taken orders, first settled at Esher, Surrey, where he kept an academy, and had Gibbon the historian among his pupils. He afterwards held the living of Harrow, Suffolk, and was chaplain to Chelsea Hospital. He wrote two tragedies, "Engenia" and "Constantine," some controversial tracts, &c. Died, 1773.

FRANCIS, SIR PHILIP, a political character of some distinction, and a son of the preceding, was born at Dublin in 1740, and received his education at St Paul's School. He entered into public life as a clerk in the secretary of state's office; after which he went out as secretary to the embassy to Portugal; and, in 1773, he became a member of the council of Bengal. He remained in India till 1780, during which time he was the constant and strenuous opponent of the measures of Governor Hastings; and his opposition savouring too much of personal hostility, a duel was the result. On his return to England he was chosen member for the borough of Yarmouth, in the Isle of Wight; and, joining the opposition, he took a prominent part in most of their measures, particularly in the impeachment of Mr Hastings. He published many political pamphlets and speeches, all of which are imbued with considerable spirit and party feeling. The celebrated "Letters of Junius" have been attributed to him, and many circumstantial proofs are brought forward to support the opinion; he, however, always disavowed the authorship; the supposition therefore rests only on strong conjecture, founded on certain events of his life and a supposed similarity of style between the Letters and his acknowledged productions. He died in 1818.

FRANCIS, JOHN, an eminent portrait-sculptor, was born at Lincoln in 1780. He became a farmer in his native county, but on the death of Lord Nelson, a relative of his wife, he carved in jet a funeral car, which procured him the patronage of Mr Coke, of Holkham, afterwards earl of Leicester, and by his advice he went to London, and studied sculpture under Chantroy. Francis soon had a large connection, and became a favourite at court. His portrait-busts, which would form a large gallery, include those of her Majesty Queen Victoria, the Prince Consort, and many of the most distinguished statesmen of the time. Among his pupils were his daughter, Mrs Thornycroft, Matthew Noble, and Joseph Durham. Died at London, in August, 1861.

FRANCKLIN, Dr THOMAS, was the son of the printer of the celebrated anti-minis-

duced a war between that country and England. In 1783 he signed the definite treaty of peace, and in 1786 returned to America, where he was chosen president of the supreme council. He died in 1790. Besides his political, miscellaneous, and philosophical pieces, he wrote several papers in the American Transactions, and two volumes of Essays, with his Life prefixed, written by himself. He was a man of much practical wisdom, possessing a cool temper and sound judgment; and though never inattentive to his own interest, he united with it a zealous solicitude for the advancement of the general interests of mankind. There are Lives of Franklin by his grandson, W. T. Franklin, by Jared Sparks, and by James Parton.

FRANKLIN, SIR JOHN, the celebrated Arctic voyager, was born at Spilsby, in Lincolnshire, in 1786. He entered the navy in 1800, and was present at the battle of Copenhagen; then accompanied Flinders in his expedition to Australia; distinguished himself at Trafalgar; and in 1814 at the attack on New Orleans. Four years later he was joint-commander, with Captain Buchan, of an expedition to the Polar Sea, which failed in consequence of injuries to one of the vessels. In 1819 he conducted the overland expedition to explore the northern coast of North America, and, accompanied by Richardson, travelled more than 5000 miles, bravely enduring the greatest hardships and privations. He undertook a similar journey in 1825, and on his return was knighted, made D.C.L. Oxford, and a correspondent of the French Institute. He soon after served in the Mediterranean, and was next appointed governor of Van Diemen's Land, a post which he honourably occupied for seven years. In 1845 he undertook the command of an expedition for the discovery of a North-west passage, and sailed, with the Erebus and Terror, in May of that year. The ships were seen by a whaler in the following July, and from that time nothing was heard of them. Numerous expeditions were sent out, the first in 1848, to discover the fate of Sir John Franklin, but all in vain, till 1857. In that year the steam yacht "Fox," Captain McClintock, was sent out by Lady Franklin, and the painful mystery was solved by Lieutenant Hobson's discovery at Point Victory of various relics and a written record, placed in a cairn, from which it appeared that the Erebus and Terror were lee-bound off Point Felix, in September, 1846, that the heroic commander died on board his ship 11th June, 1847, and that the officers and crew abandoned the ships in the following spring. Accounts of the Expeditions in search of Sir John Franklin have been published by John Brown, Capt. McClintock, and Sir John Richardson. There is an account of his last voyage by Sherard Osborn.

FRANZEN, FRANS MICHAEL, Swedish poet and theologian, was born in Finland, in 1772, studied at the university of Abo, of which he became librarian, and in 1809 settled in Sweden. He became secretary to the Swedish Academy, and was appointed bishop of Hermosand in 1834. He left, besides his poems, narrative and lyrical, a series of short biographies, some sermons,

and other theological writings. He also assisted in the preparation of the new Swedish metrical translation of the Psalms. Died, 1847.

FRASER, JAMES BAILLIE, a distinguished traveller and novelist, was born in Invernesshire in June, 1783. After finishing his education he went to the West Indies to push his fortune, but after a short residence there, he resolved to proceed to the East, where, after some delay, he entered the Civil Service of the Company and rose to some distinction. On his return from India he settled in his native county, and devoted himself to the production of the numerous works which have brought his name before the public, and all of which sprung out of his personal history and experiences. In 1820 he published "A Tour through the Snowy Range of the Himalaya Mountains;" in 1825, "A Narrative of a Journey into Khorasan, in the years 1821 and 1822, including an account of the countries to the north-east of Persia;" and, in 1826, "Travels and Adventures in the Persian Provinces." In 1828, like his contemporary, Mr Morier, he described the life and manners of the Persians in a fictitious narrative, "The Kussibash, a Tale of Khorasan." In 1838 appeared his work "A Winter Journey from Constantinople to Teheran, with Travels through various parts of Persia." He wrote, also, a history of Persia for the Cabinet Library of Oliver and Boyd, contributed various short pieces to the annuals, and ventured once more into the regions of fiction by a Scottish story, "The Highland Smugglers." His last work was a military memoir of Colonel Skinner—a distinguished Indian officer, who died at Delhi in 1841. Died, 1856.

FRAUENHOFER, JOSEPH VON, professor of philosophy in the Royal Bavarian Academy, was the son of a glazier at Straubing, and apprenticed to a glass-cutter. After struggling with many difficulties, he acquired a knowledge of the theory of optics and mathematics, constructed a glass-cutting machine, and ground optical glasses. His subsequent discoveries and inventions in optics, the excellence of the telescopes which he manufactured, and his "Researches concerning the Laws of Light," printed in Gilbert's Annals of Physics, all contributed to establish his fame; and he died in 1826, after having been raised to deserved celebrity as a man of science. The great equatorial at Dorpat Observatory is one of the most celebrated works of Frauenhofer.

FREDERICK I., surnamed BARBAROSSA, emperor of the West, son of Frederick, duke of Swabia, was born in 1121, and was chosen to succeed his uncle Conrad III. in 1152. He had accompanied Conrad to Palestine five years previously, and his great qualities had already appeared. He was crowned at Aix-la-Chapelle a few days after his election. His great ambition was to secure the independence of the empire, and above all to be master of Italy. His first expedition to Italy was made in 1154, when, after subduing several towns in Lombardy, he went to Rome, and, after some delays, had himself crowned emperor by Adrian IV. He marched a second time into Italy, in 1156, took

[FRE]

[FRE]

most powerful of Germany. Died at Lintz, 1493.

FREDERIC WILLIAM, generally called the GREAT ELECTOR, was born in 1620, and at the age of 20 years succeeded his father as elector of Brandenburg. He is considered as the founder of Prussian greatness; and from him was derived much of that military spirit which became the national characteristic. He made Prussia free from feudal subjection to Poland, conquered Pomerania, joined the league against Louis XIV., and defeated the Swedes who invaded Prussia in 1674. He applied himself with much wisdom and earnestness to the promotion of the well-being of his subjects, favouring trade, making roads, &c. By affording protection to the French Protestant refugees, he gained, as citizens of the state, 20,000 industrious manufacturers, an acquisition of no slight importance to the north of Germany; and he also gave great encouragement to agricultural improvements. He founded the library at Berlin, and a university at Duisburg; and at his death he left to his son a country much enlarged, and a well-supplied treasury. Died, 1688, aged 69.

FREDERICK I., first king of Prussia (FREDERICK III. as elector of Brandenburg), was son of Frederiek William, the GREAT ELECTOR, and was born in 1657. He succeeded his father in 1688, entered into the alliance against France, and seized Bonn and other towns, sent auxiliaries to the emperor against the Turks, and, after a dispute of some years, sold to the emperor the circle of Schwlebus, which the Great Elector had acquired in exchange for the principalities of Liegnitz, Breg, and Wohlau. He supported the emperor in the war of the Spanish Succession, and in 1701 obtained from him the title of king, which he had long coveted. Frederiek gratified his love of pomp in the ceremony of his coronation at Königsberg, the cost of which exhausted his treasury for a time. He placed the crown on his head with his own hands. In 1694 he founded the university of Halle; two years later, the Berlin Academy of Painting; and, in 1707, he established the Academy of Sciences, Berlin, and made Leibnitz first president. He was thrice married; his third wife became insane, but her state was concealed from him. One day she escaped, rushed into the king's apartment, smashing the glass door, and so terrified him that he immediately fell into a fever, and after six weeks illness died, February, 1713.

FREDERICK WILLIAM I., king of Prussia, son of Frederiek I., and father of Frederiek the Great, was born in 1688, and ascended the throne in 1713, having previously married a daughter of the elector of Hanover, afterwards George I. of England. His habits were entirely military; and his constant care was to establish the strictest discipline among his troops. But he had such a ridiculous fondness for tall soldiers, that, in order to fill the ranks of his favourite regiment, he would use force or fraud, if money would not effect his object, in order to obtain the tallest men in Europe. Being void of science and ornamental literature, he treated his professors with every kind of discour-

agement. He had a keen sense of justice, and was prompt enough to get justice done wherever his arm could reach. His efficient interference on behalf of the Heidelberg Protestants was a striking example. His subsequent decisive intervention in behalf of the persecuted Salzburg Protestants, not only saved them, but added to his kingdom many thousands of industrious workers, who peopled fifty towns which pestilence had desolated. He was rigorous in his punishments, and always showed an inclination to aggravate rather than mitigate them. He died in 1740, leaving an abundant treasury, and an efficient army of 68,000 men.

FREDERICK II., king of Prussia, commonly called THE GREAT, and sometimes erroneously styled Frederiek III., was born in 1712. He obtained but a scanty education, owing to his father's predilection for military discipline, and his determination to check the strong inclination which he perceived in the heir-apparent to cherish literature. This led him, in 1730, to attempt an escape from Prussia; but the scheme being discovered, the prince was confined in the castle of Custrin, and his young companion, Katte, executed before his face. After an imprisonment of some months, a reconciliation was effected; and in 1733 he married the princess of Brunswick Wolfenbüttel, in obedience to his father's command. The young prince devoted himself during the period of retirement between his forced marriage and his accession, chiefly to literary pursuits, composing several works, and corresponding with Voltaire and other distinguished men. In 1740 he succeeded to the throne, and it was not long before he asserted his claim to a part of Silesia, invaded the country, defeated the Imperialists at Mollwitz, and added Lower Silesia to his dominions. In 1744 he took Prague, with its garrison of 16,000 men. In 1745 he defeated the prince of Lorraine at Friedberg, and then marched into Bohemia, where he defeated an Austrian army. Shortly after, he took Dresden, laid it under heavy exactions, and there concluded a highly favourable peace. During the ten years of comparative tranquillity that followed, Frederiek employed himself in bringing his troops into a state of discipline never before equalled in any age or country. He also encouraged agriculture, the arts, manufactures, and commerce, reformed the laws, and increased the revenues; thus improving the condition of the state, and rendering it more than a match for foreign enemies. Secret information of an alliance between France, Austria, Russia, and Saxony gave him reason to fear an attack, which he hastened to anticipate by the invasion of Saxony, in 1756. This commenced the Seven Years' War, in which he contended single-handed against the united force of Russia, Saxony, Sweden, France, Austria, and the great majority of the other German states; till at length, after various changes of fortune, he was left, in 1763, in the peaceful possession of all his paternal and acquired dominions. He now entered into a league with his former enemies, which in 1772 was cemented by the partition of Poland, an act which was then,

as it is now, denounced by every lover of freedom. The remainder of his life, with the exception of a short demonstration of hostility towards Austria, which was terminated by the mediation of Russia, was passed in the tranquillity of literary leisure, and in an unreserved intercourse with learned men; among whom Voltaire and Maupertuis were for a long time his especial favourites. His own literary attainments were far above mediocrity, as may be seen by his "History of his own Times," "The History of the Seven Years' War," "Considerations on the State of Europe," "Memoirs of the House of Brandenburg," poems, &c. Frederick, on ascending the throne, found in his states a population of only two millions and a quarter, and left it with six millions, a result to which his talents as a general and a legislator chiefly contributed. His habits were singularly simple and unostentatious; he rose constantly at five, when he employed himself in reading despatches and reports, all of which were addressed to himself in person, and to each of which he marked an answer in the margin, consisting generally of no more than a single word; at eleven he reviewed his regiment, and dined at twelve; the remainder of the day was passed in literary pursuits, and in the enjoyment of musical performances; and at ten he invariably retired to rest. He was an avowed sceptic in matters of religion, yet he encouraged the observance of it among his subjects; and though he is justly chargeable with ambition, his vigorous understanding and undaunted courage rendered him equal to his position; while the splendour of his reign endeared him to the people, and they willingly accorded to him the epithet of "the Great." He died in 1786, aged 75. The "History" of this Last of the Kings has been written by Thomas Carlyle, whose great work forms 6 vols. 8vo.

FREDERICK WILLIAM II., king of Prussia, was nephew to Frederick the Great, and was born in 1744. He succeeded his uncle in 1786, and gave himself up, as he had long done, to low pleasures, wasting his resources on his mistresses and favourites. He entered into the Triple Alliance in 1788; made an alliance with the Porte; sent an army under the duke of Brunswick to invade France, in 1792; took part in the second partition of Poland; and made peace with France in 1795. Died, 1797.

FREDERICK WILLIAM III., king of Prussia, son of Frederick William II., and grand-nephew of Frederick II., was born in 1770. He entered the army, and served in the first campaign of the war with France; married, in 1794, the Princess Louisa Augusta of Mecklenburg-Strelitz, and succeeded his father in 1797. His first aim was to improve the financial state of his kingdom, seriously damaged by the reckless expenditure of his father. He professed to maintain the neutrality of Prussia in the great war then going on; secretly purposing to extend his dominions by foreign aid, if it should be possible. He hastened to recognize Napoleon as emperor, and was deceived by his professions of good-will; till, in 1805, he hopelessly offended him by granting Russian troops a

passage through Prussia. In the following year the victory of Jena made Napoleon master of Prussia, and Frederick William, by the treaty of Tilsit, 1807, lost the greater part of his dominions. His noble and beautiful queen, Louisa, was present at Tilsit, vainly sought to modify the humiliating conditions of peace, and was insolently treated by Napoleon. Berlin was occupied by the French for three years, the king and his family retiring first to St Petersburg, and returning to their capital in December, 1809. In the following year he lost his queen. Important reforms were effected in the administration; the university of Berlin was founded; and, in 1813, began the great war which ended with the liberation of Prussia and the overthrow of Napoleon. In 1814 Frederick William, with the emperor of Russia, visited England, and then attended the Congress of Vienna. After Waterloo he accompanied the allies to Paris, and signed the treaty of peace. Throughout the remainder of his reign he was chiefly occupied with internal improvements; the promotion of trade, agriculture, and manufactures; founded the "Zollverein;" quarrelled with his subjects about the "constitution," which he solemnly promised and would not give them; opposed liberal principles wherever he could; and especially interfered in a despotic manner in religious affairs. Died, 1840.

FREDERICK WILLIAM IV., king of Prussia, was the eldest son of Frederick William III. and his queen, Louisa, and was born in 1795. He received a liberal education, and early showed that love for the fine arts which characterized him through life. He served in the army in the war of liberation of 1813, and was head of the commission for forming a constitution for Prussia. He succeeded his father in 1840, and by the measures he adopted excited hopes in the liberal party which his after-course disappointed. He was more a generous dreamer than a man of action and energy. The greatest desire of his life was German unity, but indecision, timidity, and vacillation marred all the fair hopes and promises of its realization. He was ambitious for Germany, not for Prussia, nor for himself. In 1847 he convoked by patent the Provincial States at Berlin, and created a House of Lords. But the people were dissatisfied, insurrection broke out at Berlin in 1848, and tranquillity was only restored by calling to power the popular leaders and publishing an amnesty. From that time he became more conservative and unpopular. He took no part in the Crimean War, and by his vacillation pleased neither Russia nor the allies. In consequence of an affection of the brain, followed by apoplexy, a regency was established in 1858, Prince Frederick William Louis, the king's brother, being appointed to that office. Died at Sans Souci, 2nd January, 1861. The "Diaries" of Varnhagen von Ense abound in graphic, minute, and faithful delineations of the condition of Prussia under the rule of this sovereign. So true they are that the volumes have been seized in Prussia as they appeared.

FREDERICK III., THE WISE, elector of

Saxony, born in 1463, Ernest, in 1486. He was founder of the university of the university as the friend and very Luther, who was one of the new university; management that Luther Worms, was seized at Wartburg. He had no in his dominions the worship. He became emperors in 1519, and was crown, but declined it.

FREDERICK AUGUSTUS, king of Saxony and king of Poland, succeeded his brother in 1694. He carried on wars with Hungary, and in 1697 Poland, abjuring Protestantism with Peter the Great, Charles XII. of Sweden, but was defeated by Charles II. Clissau; in 1702, two years later formally to Stanislaus I. He was victorious of the Russians but had no peace while remaining fifteen years not marked by any impact at Warsaw, 1733. The Maurice of Saxony was Frederick Augustus.

FREDERICK WILLIAM, known as **FREDERICK I.**, king of Prussia, was the son of Duke Frederick born in 1744. He received a liberal education, and early showed that love for the fine arts which characterized him through life. He served in the army in the war of liberation of 1813, and was head of the commission for forming a constitution for Prussia. He succeeded his father in 1840, and by the measures he adopted excited hopes in the liberal party which his after-course disappointed. He was more a generous dreamer than a man of action and energy. The greatest desire of his life was German unity, but indecision, timidity, and vacillation marred all the fair hopes and promises of its realization. He was ambitious for Germany, not for Prussia, nor for himself. In 1847 he convoked by patent the Provincial States at Berlin, and created a House of Lords. But the people were dissatisfied, insurrection broke out at Berlin in 1848, and tranquillity was only restored by calling to power the popular leaders and publishing an amnesty. From that time he became more conservative and unpopular. He took no part in the Crimean War, and by his vacillation pleased neither Russia nor the allies. In consequence of an affection of the brain, followed by apoplexy, a regency was established in 1858, Prince Frederick William Louis, the king's brother, being appointed to that office. Died at Sans Souci, 2nd January, 1861. The "Diaries" of Varnhagen von Ense abound in graphic, minute, and faithful delineations of the condition of Prussia under the rule of this sovereign. So true they are that the volumes have been seized in Prussia as they appeared.

FREDERICK V., elector of Bohemia, succeeded his father, in 1610. In 1618 Princess Elizabeth, daughter of England, and in the following year the crown of Bohemia. His entry into Prague, followed by total defeat by the Imperial army at the battle of Prague, and the loss of hereditary states. He was Holland, and died in 1631.

FREELING, SIR FRANCIS, was the general post-office, was in 1764, and commenced his post-office of that city in 1764, and commenced his establishment of the new system

SAXONY, born in 1463, succeeded his father, Ernest, in 1486. He is known chiefly as founder of the university of Wittenberg, and as the friend and very cautious protector of Luther, who was one of the first professors at the new university. It was by his arrangements that Luther, after the Diet of Worms, was seized and carried off to the Wartburg. He had not courage to establish in his dominions the reformed faith and worship. He became administrator of the empire in 1519, and was offered the imperial crown, but declined it. Died, 1525.

FREDERICK AUGUSTUS I., elector of Saxony and king of Poland, born in 1670, succeeded his brother in the electorate in 1694. He carried on war with the Turks in Hungary, and in 1697 was elected king of Poland, abjuring Protestantism. He joined with Peter the Great in the war against Charles XII. of Sweden, invaded Livonia, but was defeated by Charles near Riga; and again at Clissau; in 1704 was deposed, and two years later formally resigned his crown to Stanislaus I. He recovered it after the victory of the Russians at Pultawa, in 1709, but had no peace while Charles lived. The remaining fifteen years of his reign were not marked by any important events. Died, at Warsaw, 1733. The celebrated Prince Maurice of Saxony was a natural son of Frederick Augustus.

FREDERICK WILLIAM CHARLES, known as **FREDERICK II.**, and also as **FREDERICK I.** king of Wurtemberg, was son of Duke Frederick Eugene, and was born in 1764. He entered the Prussian army, and afterwards took service in Russia, and was made governor of Finland. He was in France, at the outbreak of the revolution; succeeded his father, in 1797, and joined the second coalition against France; having the same year married the princess royal of England. On the occupation of his duchy by the French, in 1800, he fled to Vienna, and in 1803 obtained the title of elector, with nine imperial towns. Two years later he had an interview with Napoleon, and furnished him with a large auxiliary force, Napoleon soon after giving him the title of king. He joined the Confederation of the Rhine, took part in the Congress of Erfurt, furnished a contingent for the Russian expedition, and in 1813 went over to the allies. He attended the congress of Vienna, offered a new constitution to the states of Wurtemberg, which they rejected, and was preparing another, when he died suddenly, in 1816.

FREDERICK V., elector-palatine and king of Bohemia, succeeded his father, Frederick IV., in 1610. In 1618 he married the Princess Elizabeth, daughter of James I. of England, and in the following year accepted the crown of Bohemia. He had a triumphal entry into Prague, followed in 1620 by his total defeat by the Imperial forces at the battle of Prague, and the loss of his kingdom and hereditary states. He took refuge in Holland, and died in 1631.

FREELING, Sir **FRANCIS**, bart., secretary to the general post-office, was born at Bristol, in 1764, and commenced his official career in the post-office of that city. On the establishment of the new system of mail coaches

by Mr Palmer, in 1785, he was selected by that gentleman, on account of his superior ability and intelligence, to assist him in carrying his improvements into effect, and was introduced into the general post-office, in 1787, where he successively filled the offices of surveyor, joint secretary, and sole secretary, for nearly half a century. The unremitting attention which he bestowed upon the duties of his office, the skill with which he managed its most difficult transactions, and the unbounded confidence which he enjoyed both of his sovereign and the highest functionaries in the state, together with his unimpeachable character, enabled him to effect improvements of the highest importance and value to the interests of commerce and the prosperity of the country. The honour of a baronetcy was conferred upon him in 1828, and was the spontaneous act of George IV., from whom, as well as from his royal father, he had received many flattering testimonials of approval. Sir Francis was a fellow of the Society of Antiquaries, and one of the original members of the Roxburghe Club. He died, July 10th, 1836, aged 72.

FREIND, JOHN, a learned physician and writer on medical science, was born in 1675, at Crofton, in Northamptonshire. In 1703 he distinguished himself by an able work on diseases peculiar to females, which raised him to eminence as a physiologist. The next year he was appointed chemical professor at Oxford; and in 1705 he accompanied the earl of Peterborough in his expedition to Spain, as physician to the army. On his return in 1707 he published a vindication of the earl's conduct in Spain, which gained him considerable reputation. He then obtained his diploma of M.D., and in 1709 published his "Lectures on Chemistry." In 1711 he was chosen a member of the Royal Society, and the same year he accompanied the duke of Ormond in his expedition to Flanders. In 1716 he was elected a fellow of the College of Physicians, and in 1722 he was brought into parliament for Launceston. The year following he was sent to the Tower on suspicion of being concerned in Atterbury's plot, but was soon released on bail. While in confinement, he wrote an epistle to his friend Dr Mead, "De quibusdam Variolarum Generibus." He also formed the plan of his greatest literary undertaking, which he afterwards published, under the title of "The History of Physic," &c. At the accession of George II. he was appointed physician to the queen. Died, 1726.—Dr **ROBERT FREIND**, his brother, was master of Westminster School, and died in 1754, aged 83.

FREINSHEIM, or **FREINSHEMIUS**, **JOHANN**, a learned German, was born at Ulm, in 1608, and became professor of rhetoric in the university of Upsal, and librarian to Queen Christina of Sweden; but returned to Germany in consequence of ill health, and died at Heidelberg, in 1660. He showed himself a profound scholar, particularly by his celebrated supplements to fill the place of the lost books and passages of Quintus Curtius and of Livy.

FREMINET, MARTIN, chief painter to

Henry IV. and Louis XIII., of France, was born at Paris, in 1667, and died in 1619.

FRÉRET, NICOLAS, a French historical writer, was born at Paris, in 1688, and abandoned his profession of law to devote himself to the study of history and chronology. His first work, "On the Origin of the French," wounded the national vanity so deeply, that it occasioned his imprisonment in the Bastille. He was early received at the Academy of Inscriptions, and was made perpetual secretary. His immense learning gained him a great reputation in Europe, and he rendered great service by his industrious researches in the field of history. He contributed many valuable memoirs to the Academy, and also wrote a "Défense de la Chronologie contre le Système de M. Newton," "Recherches Historiques sur les Anciens Peuples de l'Asie," &c. Died, 1749.

FRÉRON, ELIE CATHERINE, a French critic, was born at Quimper, in 1719, and was originally a Jesuit, but quitted the society at the age of 20. In 1749 he commenced his "Letters on certain Writings of the Times," which extended to 13 vols.; and, as he freely criticised the works and actions of others, it procured him some powerful enemies, among whom was Voltaire. He then began his "Année Littéraire," which he continued till his death, in 1776. Besides the above works, he wrote "Opuscules," &c.

FRÉRON, LOUIS STANISLAUS, son of the preceding, was one of the most violent of the French revolutionists. In 1789 he commenced an incendiary journal, called "L'Orateur du Peuple," associated himself with Marat, and was guilty of many enormities at Toulon and elsewhere. Born, 1757; died, 1802.

FRESCOBALDI, GIROLAMO, an eminent musician and composer of the 17th century, born at Ferrara, and appointed organist at St Peter's, Rome. He is the first Italian who composed in fugue for the organ; and is considered as the father of that species of organ-music known in England by the name of "voluntaries."

FRESNEL, AUGUSTIN JEAN, an eminent French natural philosopher, born at Broglie near Bernay, in 1788, and educated at the École Polytechnique. After serving as engineer in the provinces he was called to Paris, became the friend and associate of Arago, and distinguished himself by his researches and discoveries on the diffraction and polarisation of light. He was received at the Academy of Sciences in 1823, soon after became a fellow of the Royal Society of London, and obtained the Rumford medal. Died, near Paris, 1827.

FRESNOY. [DUFRESNOY and LENGLET.]

FREY, JOHANN JACOB, a celebrated engraver, born at Lucerne in 1681. He settled early in Italy, where he was a pupil of Westermout, and by his engravings, after some of the greatest Italian masters, acquired the highest reputation. Died at Rome, 1732.

FRIBICH, JOHANN LEONHARD, a German naturalist and philologist, was born in Suis-

bach, in 1666. He was the founder of the silk manufactory in Brandenburg, and was the first who cultivated mulberry-trees in that country. He was author of a German and Latin Dictionary, a Description of German Insects, &c. Died, 1743.

FRISCHLIN, NICODEMUS, a German writer, who distinguished himself by his classical attainments, and still more by his poetical satires. He was born at Balingen, in the duchy of Wirtemberg, in 1647; studied at the university of Tübingen, where he obtained a professorship at 20 years of age; and wrote a critical work, entitled "Strict Grammatica," which involved him in much angry controversy. Having written an abusive letter to the duke of Wirtemberg, for refusing to grant him some pecuniary favour, he was arrested, and sent to the prison of Ayrach; from which he attempted to escape, but fell down a frightful precipice, and was dashed to pieces. This happened in 1690.

FRISI, PAOLO, Italian mathematician and natural philosopher, was born at Milan in 1728. He entered the order of the Barabites, but when about 40 years of age he obtained a dispensation from his monastic vows. Having obtained much reputation by his dissertation on the figure of the earth, written after the principles of Newton, he was appointed, in 1756, professor of mathematics at Pisa, a post which he held eight years and then settled at Milan. He visited the principal capitals of Europe, and became a member of almost all the European Academies of Science. His scientific works are very numerous, written mostly in Italian, but some of them in Latin and French. Died at Milan, 1784.

FROBENIUS, or FROBEN, JOHANN, a learned printer, was born at Hammelburg, in Franconia, in 1460. He established a press at Basel, at which Erasmus, who was his intimate friend, and lodged in his house, had all his works printed. Died, 1527.

FROBISHER, Sir MARTIN, a celebrated English navigator, was born near Doncaster, Yorkshire, and brought up to a maritime life. The discovery of a north-west passage to the Indies excited his ambition; and, after many fruitless attempts to induce merchants to favour his project, he was enabled, by the ministers and courtiers of Queen Elizabeth, to fit out a private adventure, consisting only of two small barks and a pinnace. In the course of his enterprise he explored various parts of the arctic coast, and entering the strait which has ever since been called by his name, returned to England with some black ore, which being supposed to contain gold, induced Queen Elizabeth to patronize a second, and even a third voyage, but all of them proved fruitless. In 1585, Frobisher accompanied Drake to the West Indies; and, at the defeat of the Spanish Armada, was honoured with knighthood for his bravery. In 1590 and 1592, he commanded squadrons successfully against the Spaniards; and in 1594, being sent with four ships of war to the assistance of Henry IV. of France, he was wounded in attacking fort Croyzan, near Brest, and died on his return home. Some relics of his Arctic ex-

pedition were discovered by the English captain, G. F. Hood, in 1791. He was made in 1860-62, a circulating story of maux."

FROISSART, JACQUES, a French chronicler and poet, was born at Valenciennes, about 1337. He was a member of the church; his poetry was soon appreciated, and accompanied by a great talent for the church; and a fondness for the church; and a wish to divert his mind from an unsuccessful love, which he was likely, a desire to do so, and the mouths the achievement of the temporary warriors, in 1363, and he visited England, where he was patronized by Philip the Bold, of Edward III., who was open to the gay and poetic deeds. In 1363 he was the Black Prince deaux. On the death of Philippa, Froissart went with England; and, as a diplomatist and a domestic chaplain to the king, who was a poet as whose verses, united, he formed a kind of eulogist. On the death of Edward III., he entered the service of the king who induced him to do so. He paid another visit to France, and was introduced to the dethronement of the Flemings, where his historical writings, of a character and manner highly valuable for the time, and maintained the nearly 80 years, and died in 1405.

FROLICH, ERASMUS, a German scholar, born at Gratz, in Styria, came professor of history and librarian of the University of Vienna, and was author of several works besides numerous Greek, Roman, and Arabic. Died at Vienna, 1758.

FRONTINUS, SEXUS PRUDENTINUS, a Roman author, of a patrician family, consul, and commander of the British as pro-prætor, author of a work entitled "De re militari," on the art of war, and "De Aqueductibus," on the art of aqueducts. He died early in the 2nd century.

FRUGONI, CARLO, an Italian poet, born at Bergamo. He originally belonged to the military orders, but obtained a professorship at Parma, and settled at Parma, and was a poet. He was a fertile and his works included of poetical compositions, and a moral and pious zeal in his moral and spiritual work, which will hand down her name as a benefactor of mankind. He was Joseph Fry, Esq., of London, sister to Joseph John Fry.

pedition were discovered by the American captain, C. F. Hall, during explorations made in 1860-62, and narrated in his fascinating story of "Life with the Esquimaux."

FROISSART, JEAN, an early French chronicler and poet, was born at Valenciennes, about 1337. He was originally destined for the church; but his inclination for poetry was soon apparent, and was accompanied by a great passion for the fair sex, and a fondness for feasts and gallantry. The wish to divert his mind from the chagrin of an unsuccessful love-suit, or, what is more likely, a desire to learn from their own mouths the achievements of his contemporary warriors, induced him to travel; and he visited England, where he was kindly patronized by Philippa of Hainault, queen of Edward III., whose court was always open to the gay poet and narrator of chivalric deeds. In 1366 he accompanied Edward the Black Prince to Aquitaine and Bordeaux. On the death of his protectress, Philippa, Froissart gave up all connection with England; and, after many adventures as a diplomatist and soldier, he became domestic chaplain to the duke of Brabant, who was a poet as well as himself, and of whose verses, united with some of his own, he formed a kind of romance, called "Melidor." On the duke's death, in 1384, he entered the service of Guy, count of Blois, who induced him to continue his chronicles. He paid another visit to England in 1395, and was introduced to Richard II., but on the dethronement of this prince he returned to Flanders, where he died, in 1401. His historical writings strikingly exhibit the character and manners of his age, and are highly valuable for their graphic simplicity and minuteness. They embrace a period of nearly 80 years, and end at the year 1400.

FROLICH, ERASMUS, numismatist, was born at Gratz, in Styria, in 1700. He became professor of history and archaeology, and librarian of the Theresian College at Vienna, and was author of many important works besides numerous dissertations on the Greek, Roman, and Asiatic coins and medals. Died at Vienna, 1788.

FRONTINUS, SEXTUS JULIUS, a Roman author, of a patrician family. He was thrice consul, and commanded the Roman army in Britain as pro-prætor. Frontinus was author of a work entitled "Strategemata," on the art of war, and a work on the Roman Aqueducts. He died in the reign of Trajan, early in the 2nd century.

FRUGONI, CARLO INNOCENZIO, a celebrated Italian poet, born at Genoa, in 1692. He originally belonged to one of the monastic orders, but obtained leave to quit it, settled at Parma, and was appointed court poet. He was a fertile and elegant writer, and his works include almost every variety of poetical composition. Died, 1768.

FRY, Mrs ELIZABETH, whose active exertions and pious zeal in administering to the moral and spiritual wants of the wretched will hand down her name to posterity as a benefactor of mankind, was the wife of Joseph Fry, Esq., of Upton, Essex, and sister to Joseph John Gurney, Esq., of Eari-

ham Hall, near Norwich; also sister to Lady Buxton, widow of Sir Fowell Puxton. Mrs Fry has been emphatically called "the female Howard;" and although she did not confine her sphere of observation to the unhappy inmates of the prison alone, but dispensed her blessings to the poor and helpless wherever found, her main object through life was the alleviation of the sorrows of the captive. "She took the gauge of misery, not as a matter of curiosity and philosophical speculation, but with the hope of relieving it. The lips that had been seldom opened but to blaspheme their Maker, were taught to praise him; the hands hitherto employed in theft were employed in honest labour. Infants, in a doubly-lamented sense, born in sin and bred in vice, were snatched from a destruction which had appeared inevitable, and put into a train of improvement. The gloomy mansion, which had lately been a scene of horror only to be exceeded by those more dreadful future mansions to which it was conducting them, changed its face. The loathsome prison, which had witnessed nothing but intoxication and idleness, and heard no sounds but those of reviling and of imprecation, gradually became a scene of comparative decency, sobriety, and order." Died, Oct. 12, 1845, aged 65.

FRYE, THOMAS, an artist, born in Ireland, in 1710. He is said to have been the first manufacturer of porcelain in England, but the heat of the furnaces having injured his health, he adopted the profession of a portrait painter and mezzotinto engraver. Died, 1782.

FRYTH, JOHN, a Protestant martyr, in the reign of Henry VIII. He was the son of an inn-keeper at Sevenoaks, in Kent, and educated in King's College, Cambridge. Thence he removed to Oxford, where he became acquainted with William Tyndale, the translator of the Bible, who converted him to Lutheranism. Avowing his opinions publicly, he was apprehended, examined, and confined to his college. After undergoing various hardships, he was apprehended for making proselytes, and sent to the Tower. Refusing to recant, he was burnt in Smithfield, July 4, 1533.

FUCA, JUAN DE, whose real name was APOSTOLOS VALERIANOS, was a native of Cephalonia, and died at Zante, in 1602. For upwards of forty years he acted as a pilot in the Spanish American possessions; and, in 1592, he was sent by the viceroy of Mexico to explore the west coast of North America for an inlet which might form a communication with the Atlantic. But the account of his discovery was mingled with such romantic tales, that it was disbelieved until the trading vessels which frequent this coast, in the fur trade, having approached the shore from which Captain Cook had been driven by contrary winds, discovered the inlet mentioned by De Fuca between the 48th and 49th parallels. This strait was thoroughly explored by Vancouver, in 1792.

FUCHS, or FUCHSIUS, LEONARD, a Bavarian physician and botanist, was born in 1501, and educated at Ingolstadt. He settled at Tübingen, where he was appointed to a professorship in the university, which

he held for 35 years. Besides works on medicine and anatomy, he was the author of a work on the History of Plants, and his name has been perpetuated by being applied to a genus of plants, of which the scarlet fuchsia is a well-known species. Died, 1566.

FUENTES, DON PEDRO HENRIQUEZ D'AZEVEDO, Count of, a Spanish general and statesman, born at Valladolid, in 1560. He served his first campaign in Portugal, under the duke of Alva, and greatly distinguished himself; as he also did in the Low Countries, under Alexander Farnese. He was afterwards sent on important embassies to foreign courts. In the reign of Philip III. he was made governor of Milan, and rendered himself formidable to the Italian states, by causing them to feel the superiority of the Spanish power. In 1643, when Spain wished to take advantage of the death of Louis XIII. and the minority of his successor, Fuentes, then 82 years of age, was sent with an army into Champagne. He laid siege to Roeroy; but the young and brave Duke d'Enghien (afterwards the great Condé) attacked the besiegers with inferior forces, and, falling with his cavalry upon the Spanish infantry, destroyed nearly the whole army. The old general, who at the time was severely afflicted with the gout, caused himself to be carried, in a chair, into the midst of the fight, and there perished by the sword.

FUESSLI, JOHANN CASPAR, a Swiss artist, born at Zurich, in 1707; author of a "History of the best Painters of Switzerland," in 5 vols. &c. He died in 1782, leaving three sons:—**RODOLPH**, afterwards librarian to the emperor; **HENRY**, the eminent painter, better known by the name of **FUSELI** [which see]; and **CASPAR**, a skillful entomologist, who resided at Leipsic, and published several works on his favourite science.

FUGER, FRIEDRICH HEINRICH, an eminent painter, and director of the imperial picture-gallery of the Belvidere, at Vienna, was born at Hellbron, in 1751. He began by painting miniatures while a mere child; but as he grew up, his passion for historical subjects led him to emulate the great masters in that branch of the art. In 1774 he went to Vienna, and was sent as a pensioner to Rome by the empress Maria Theresa. After a diligent study of seven years there, he went to Naples, and resided two years in the house of the imperial ambassador, Count Von Lamberg, where he had a fine opportunity of exerting his talents. On his return to Vienna, in 1784, he was appointed vice-director of the school of painting and sculpture. He painted many portraits, miniatures, and historical pieces; some of which are highly esteemed. His "St John in the Wilderness," painted for the imperial chapel, in 1804, is a masterpiece, and for it he received 1000 ducats. Died, 1816.

FUGGER. The name of a rich and noble family, whose founder was John Fugger, a weaver, residing in a small village near Augsburg. His eldest son, John, likewise a weaver, obtained, by marriage, the rights of a citizen of Augsburg, and carried on a linen trade in that city, then an important commercial place. He died in 1409. His eldest son, Andrew, acquired such great wealth,

that he was called the *rich Fugger*. He died without issue; and his three nephews, Ulrich, George, and James, married ladies of noble families, and were raised to the rank of nobles by the emperor Maximilian. Under the emperor Charles V. this family rose to its highest splendour. When Charles held the memorable diet at Augsburg, in 1530, he lived for a year and a day in Anthony Fugger's splendid house near the wine-market. The emperor derived considerable pecuniary aid from him, and in return raised him and his brother Raimond to the dignity of counts and bannerets, invested them with the estates of Kirchberg and Weissenhorn, and granted them letters giving them princely privileges, and the right of coining money. Anthony left at his death 6,000,000 gold crowns, besides jewels and other valuable property, and possessions in all parts of Europe and the Indies. It was of him that the Emperor Charles, when viewing the royal treasure at Paris, exclaimed, "There is at Augsburg a linen weaver, who could pry as much as this with his own gold." And it was he also who did one of the most graceful and princely courtesies on record, as the following anecdote will show:—When Charles V. returned from Tunis, and paid Anthony a visit, the latter produced the emperor's bond for an immense sum of money with which he had supplied him; and on a fire made of cinnamon wood which had been lighted in the hall, he nobly, though somewhat ostentatiously, made a burnt-offering of it to his imperial visitor. "This noble family," says the Mirror of Honour, "contained, in five branches (1619), 47 counts and countesses, and, including the other members, young and old, about as many persons as the year has days." Even while counts, they continued to pursue commerce, and their wealth became such, that, in 54 years, they bought real estate to the amount of 941,000 florins, and in 1762 owned 4 counties, 6 lordships, and 57 other estates, besides their houses and lands in and around Augsburg. They had collections of rich treasures of art and rare books. Painters and musicians were supported, and the arts and sciences were liberally patronized by them. Their gardens and buildings displayed good taste, and they entertained their guests with regal magnificence. But while the industry, the prudence, the honours, and the influence of the Fugger family is mentioned, we ought also to state that these were equalled by their unbounded charity and their zeal to do good. In acts of private benevolence, and in the foundation of hospitals, schools, and charitable institutions, they were unrivalled.

FULK, count of Anjou, and king of Jerusalem, succeeded his brother in the county of Anjou in 1109. He soon after seized Maine, was involved in war with Henry I. of England, and was aided by the king of France. In 1119 his daughter Meud was married to Henry's son William, who however died soon after. He went to the Holy Land in 1129, married the daughter of Baldwin II., king of Jerusalem, and succeeded him in 1131. He was almost constantly at war with the Saracens, and defended Anti-

och against the emperor. Died, 1144.

FULK of Neully, 12th century, who his piety, miracles, & who, on the process of Innocent crusade by Innocent granted himself as the successful of its promotion.

FULLER, ANDREW, minister, and secretary of the Congregational Society, was a small farmer, who gave a small education at the university, though principally employed as a husbandry till he was so diligently, that an invitation, the pastor at Soham, and after the establishment of the Society, by Dr. Carey, exerted himself with labours of his future life. He was its labourer. His principles. "On the Calvinistic compared as to their criticism. Indefinite own Witness," "Disc Genesis," &c. Died, Lives of Andrew Fullerton of his Writings in one large volume, son.

FULLER, MARGARET, daughter of the Rev. Mr. Fuller, of the University of Cambridge.

FULLER, THOMAS, and divine of the church of England, was born in 1717, in the county of Cambridgeshire, in 1608, at the College, Cambridge. His pointment was that of a parish, Cambridge, where his popularity as a preacherwards colliated to a cathedral, and obtained Winsor, Dorsetshire. His duction was a poem entitled "The History of the Holy Land," which he removed to the Strand. On the departure of London, previously to the hostilities, Fuller departed for Westminster Abbey, where his majesty's inauguration of 2 Samuel ix. 30—"all, so that my lordly peace," which greatly leaders, and endange preacher. About this "Holy and Profane" went to Oxford, and having lost his living also all his books, he became Ralph Hopton, and making collections relating to antiquities, the siege of Basing House of Exeter. About 16

och against the emperor John Comnenus. Died, 1144.

FULK of Neully, a French priest of the 12th century, who became celebrated for his piety, miracles, and powerful preaching, and who, on the proclamation of the fourth crusade by Innocent III., in 1189, distinguished himself as the boldest and most successful of its promoters. Died at Neully, 1201.

FULLER, ANDREW, an eminent Baptist minister, and secretary to the Baptist Missionary Society, was born at Wicken, in Cambridgeshire, in 1754. His father was a small farmer, who gave his son the rudiments of education at the free school of Soham; and though principally engaged in the labours of husbandry till he was of age, yet he studied so diligently, that in 1775 he became, on invitation, the pastor of a congregation, first at Soham, and afterwards at Kettering. In the establishment of the Baptist Missionary Society, by Dr Carey and others, Mr Fuller exerted himself with great energy, and the whole of his future life was identified with its labours. He was also an able controversialist. His principal works are, a treatise "On the Calvinistic and Socinian Systems compared as to their Moral Tendency," "Socinianism Indefensible," "The Gospel its own Witness," "Discourses on the Book of Genesis," &c. Died, 1815. There are several Lives of Andrew Fuller, and a complete edition of his Writings was published in 1845, in one large volume, with a Memoir by his son.

FULLER, MARGARET. [OSSOLI, Countess of.]

FULLER, THOMAS, an eminent historian and divine of the church of England, in the 17th century, was born at Aldwinkle, Northamptonshire, in 1606, and educated at Queen's College, Cambridge. His first clerical appointment was that of minister of St Benet's parish, Cambridge, where he acquired great popularity as a preacher. He was afterwards collated to a prebend in Salisbury Cathedral, and obtained the rectory of Broad Winsor, Dorsetshire. His first literary production was a poem entitled "David's Hallow'd Sin, Heartie Repentance, and Heavie Punishment." In 1640 he published his "History of the Holy War;" soon after which he removed to London, and was chosen lecturer at the Savoy church, in the Strand. On the departure of Charles I. from London, previously to the commencement of hostilities, Fuller delivered a sermon at Westminster Abbey, on the anniversary of his majesty's inauguration in 1642, from 2 Samuel ix. 30—"Yea, let them take all, so that my lord the king return in peace," which greatly offended the popular leaders, and endangered the safety of the preacher. About this time he published his "Holy and Profane State." In 1643 he went to Oxford, and joined the king, but having lost his living by sequestration, and also all his books, he became chaplain to Sir Ralph Hopton, and employed his leisure in making collections relative to English history and antiquities. He was present at the siege of Basing House, and at the siege of Exeter. About 1648 he was appointed

rector of Waltham. In 1650 appeared his "Pisgah Sight of Palestine," and his "Abel Redivivus;" and six years later, his "Church History of Great Britain;" but it was not till after his death that his principal literary work was published, entitled "The Worthies of England"—a production valuable alike for the solid information it affords relative to the provincial history of the country, and for the profusion of biographical anecdote and acute observation on men and manners. In 1658 he quitted the living of Waltham for that of Cranford, in Middlesex; and at the restoration he was reinstated in his prebend of Salisbury, of which he had been deprived by the parliamentarians. He was also made D.D. and chaplain to the king. Dr Fuller's writings possess much learning, wit, and humour, with an elaborate display of quaint conceit—a quality highly esteemed at the time he wrote, and one which appears quite natural to him. Many extraordinary stories are told respecting his prodigiously retentive memory; the following punning anecdote, old as it is, and though not strictly biographical, is worth repeating. Dr Fuller was, it seems, an inveterate punster; but once attempting to play off a joke upon a gentleman named Sparrowhawk, he met with the following retort:—"What is the difference," between an owl and a sparrow-hawk?" "It is," replied the other, "fuller in the head, fuller in the body, and fuller all over." Died, 1661. The fullest account of this remarkable man is to be found in "Memorials of the Life and Works of Thomas Fuller, by the Rev. A. T. Russell. An interesting Essay on his Life and Genius, by Henry Rogers, appeared in the Edinburgh Review, Jan., 1842, and was reprinted, with a Selection from his Writings, in the "Travelers' Library" of Messrs Longman, in 1856.

FULMAN, WILLIAM, a learned antiquary of the 17th century, born at Penshurst, in Kent, in 1632. Through the friendly offices of Dr Hammond, then rector of that parish, he was sent to study at Oxford, graduated M.A., and was chosen a fellow of Corpus Christi College. He was presented to the rectory of Meysay Hampton, in Gloucestershire, and there spent the rest of his life. He was author of "Academice Oxoniensis Notitia," and left some manuscript collections. But he is chiefly remembered as editor of the works of his patron and friend Dr Hammond. These he collected and published in 4 vols. folio, in 1684. Died in 1688; or perhaps in 1697.

FULTON, ROBERT, an American engineer and projector, of considerable celebrity, was born in Little Britain, Pennsylvania, in 1765. Having acquired some knowledge of portrait and landscape painting, he came to England, and studied under his distinguished countryman, West, with whom he continued an inmate several years; and, after quitting him, he made painting his chief employment for some time. He afterwards formed an acquaintance with another fellow-countryman, named Rumsey, who was well-skilled in mechanics, and hence he ultimately adopted the profession of a civil engineer. He also

became acquainted with the duke of Bridgewater, so famous for his canals, and with Earl Stanhope, a nobleman celebrated for his attachment to the mechanic arts. In 1786, he published a treatise on "Inland Navigation;" and after making public some clever inventions and useful contrivances, in spinning, sawing, &c., Mr Fusell went, in 1797, to Paris, where he lived seven years, and studied the higher mathematics, physics, chemistry, and perspective. It was there that he perfected the plan for his submarine boat, or torpedo. Returning to America in 1806, he immediately engaged in building a steam-boat, of great size, and which began to navigate the Hudson river in 1807, its progress through the water being at the rate of five miles an hour. He had meditated on this experiment since 1793, and was the first who applied water-wheels to the purpose of steam-navigation, but though he claimed the invention, the credit of it was due to Mr Miller, of Dalawinton, Dumfriesshire. [See the Scots Magazine, for Nov. 1788.] It is said that vexation at being denied the merit of this discovery, and prevented from deriving the whole benefit of it, preyed on his mind, and hastened his death. Died, 1815.

FURST, WALTHER, was a native of Altdorf, Switzerland, by whose means, aided by the heroic William Tell and Arnold of Melchthal, the liberty of his country was established, in 1307.

FURSTENBERG, FERDINAND VON, an eminent prelate, born at Bilstein, in Westphalia, in 1626. He was raised to the bishopric of Paderborn in 1681, by Pope Alexander VII., who afterwards made him apostolical vicar for all the north of Europe. He collected a number of MSS. and other monuments of antiquity, and published them under the title of "Monumenta Paderbornensia:" he also published a valuable collection of Latin poems. Died, 1683.

FUSELI, HENRY, or FUESSLI, the more correct way of spelling the family name, was the second son of Johann Caspar Fuessli, and born at Zurich, 1741. He was originally intended for the church; but he had employed himself, while under his father's roof, in making copies from engravings of the works of Michael Angelo and Raphael, and this had inspired him with an insurmountable desire to devote himself to art. While at the Caroline College, in Zurich, he formed an intimate friendship with the celebrated Lavater, and became enamoured of literature. He studied English, read the best authors in that language, and translated the tragedy of Macbeth into German. In 1783, Fuseli came to England; he was then in his 22nd year; and on his showing his specimens of painting to Sir Joshua Reynolds, the latter expressed himself in terms of high commendation, and advised him to go to Rome. This he did; and after

eight years spent in studying the Italian masters, he returned to England. Having suggested to Alderman Boydell the idea of forming his "Shakspeare Gallery," for which he painted eight of his pictures, that splendid design was accordingly executed. In 1790, Fuseli became a royal academician; and during the next nine years he painted a series of 47 pictures, afterwards exhibited as the "Milton Gallery." In 1799 he was appointed professor of painting, and, in 1804, keeper of the Royal Academy. Fuseli was an excellent scholar, and enjoyed the friendship of his most eminent literary contemporaries. His imagination was lofty and exuberant; but, in aspiring to the sublime, he frequently fell into extravagance and distortion. His anatomical knowledge was extensive; and so predominant is the display of it in some of his paintings, that the thoughts of the spectator are carried to the dissecting-room. The works of Fuseli, once popular enough, are now willingly forgotten, and his name has become a mere shadow. Fuseli experienced the unchanged attachment of Mr Coutts, the banker, who was on all occasions his sincere and generous friend; and he was on a visit to Lady Guildford, when he was seized with his short, but fatal illness; and he died at her house, Putney Hill, on the 16th of April, 1825, in the 84th year of his age.

FUSI, NICHOLAS, VON, a distinguished mathematician and natural philosopher, born at Basel, in 1756. He first studied under Bernouilli, then professor of mathematics at the university of that city, who procured him a situation, when he was 17, with his friend, the celebrated Euler, at St. Petersburg, who wished to obtain a young man of talent in the prosecution of his philosophical inquiries. Here he soon obtained distinction and preferment. In 1776 he was appointed adjunct of the Academy of Sciences for the higher mathematics. In 1781, Catharine II. gave him a professorship in the corps of noble land cadets; and in 1792 he was appointed secretary to the Free Economical Society. In 1800 he was raised to the dignity of a counsellor of state; in 1805 he was constituted one of the council for the organization of military schools; and, continuing to advance the interests of science in the various honourable stations to which he was promoted, he was rewarded with the order of Vladimir and a pension. He was a regular contributor to the Memoirs of the Academy of Sciences at Petersburg during a period of 60 years, and published various works, chiefly on mathematics and astronomy. Died, 1826.

FUST, JOHANN. [FAUST.]

FYT, JAN, Dutch painter, born at Antwerp, in 1625. His subjects are chiefly game, beasts, birds, fruit, and flowers; and they are remarkable for their fidelity to nature in the drawing, and for their rich and glowing colours. Died, 1671.

GABRIANI, ANTONIO, painter: born at Florence, accidentally killed by a fall from a ladder while employed in painting the ceiling of the church of Castello, in 1728. Called the "painting child."

GABRIEL SIONITI, an Italian scholar, and professor of the Arabic language at Rome and at Paris. He assisted Le Jay in his edition of the Arabic Geography, and published an Arabic title of "Geographia."

GABRIELLE D'ESSE, the daughter of Antonio, grand master of artillery in France, and IV., visiting her father in love with her, and retaining his affections, and enjoying the honor of queen. She was the daughter of the duchess of Beaufort. The children she had pressed for a marriage with the king of France, Valois had not yet concluded, and Sully, the chief minister, had opposed the marriage of Gabrielle. At Easter, 1609, Gabrielle, while the king observing the Fontainebleau. She was a fit of apoplexy or palsy, which could arrive she was poisoned in a remains unanswered. The king's marriage with quickly followed the death of Gabrielle.

GADESSEN, JOHN, a French physician, and was the first Englishman to hold an office. He compiled a book of medical writers, and was called "F" of physic, entitled "F" is full of absurdities and monies. Among the facts he he learnt from fresh water from salt water, and was supposed to have discovered.

GADDI, GADDO, an Italian painter and mosaic worker in mosaic, in 1239. He was the inventor of the "F" style, and perhaps assisted at Assisi. He was also the inventor of the "F" style, and perhaps assisted at Assisi. He was also the inventor of the "F" style, and perhaps assisted at Assisi. He was also the inventor of the "F" style, and perhaps assisted at Assisi.

GADDI, TADDEO, an Italian painter and architect, was born at Florence, in 1300. He had Giotto for his teacher, and worked with him in the greatest of his works.

G.

GABRIANI, ANTONIO DOMENICO, Italian painter; born at Florence in 1652, and accidentally killed by falling from a scaffold, while employed in painting the large cupola of Castello, in 1726. Gabbiani especially excelled in painting children.

GABRIEL SIONITA, a learned Maronite, and professor of the Oriental languages at Rome and at Paris, where he died in 1648. He assisted Le Jay in his Polyglot Bible, and published an Arabic Grammar, a translation of the Arabic geography of Edrisi, with the title of "Geographia Nubienalis," &c.

GABRIELLE D'ESTRÉES, born 1571, was the daughter of Antoine d'Estrées, 40 years grand master of artillery in France. Henry IV., visiting her father's château in 1590, fell in love with her, and she became his mistress, retaining his affection for many years, and enjoying the honours though not the title of queen. She received the title of duchess of Beaufort. Anxious to legitimate the children she had borne to the king she pressed for a marriage. But Margaret of Valois had not yet consented to a divorce, and Sully, the chief minister, opposed the marriage of Gabrielle from reasons of state. At Easter, 1593, Gabrielle was sent to Paris, the king observing the Easter ceremonies at Fontainebleau. She was there seized with a fit of apoplexy or paralysis, and before the king could arrive she was dead. Whether she was poisoned is a question which remains unanswered. Negotiations for the king's marriage with Marie de Medicis quickly followed the death of Gabrielle.

GADDESSEN, JOHN OF, an English physician of high repute in the 14th century. He was appointed physician to Edward III., and was the first Englishman that held such an office. He compiled, chiefly from the Arabian medical writers, a work on the practice of physic, entitled "Rosa Anglicana," which is full of absurdities and superstitious ceremonies. Among the very few remarkable facts to be learnt from it is this; that he was acquainted with the mode of procuring fresh water from salt by distillation; a process supposed to have been a modern discovery.

GADDI, GABDO, an early Italian painter and worker in mosaic, was born at Florence in 1239. He was the intimate friend of Cimabue, and perhaps assisted him in his works at Assisi. He was also a friend of Giotto, who became godfather to his son Taddeo. He is said to have executed mosaics in the Duomo of Florence, at Rome, and other cities, but not a single work can now be authoritatively assigned to him. Died, 1312.

GADDI, TADDEO, a distinguished early Italian painter and architect, son of the preceding, was born at Florence, probably about 1300. He had Giotto for his godfather, lived and worked with him for 24 years, and was the greatest of his scholars. He painted

some frescos in the Baroncelli chapel in Santa Croce in 1330, still preserved, several altar-pieces now in the Berlin Gallery, and a grand fresco of the Last Supper in the refectory of Santa Croce. Many of his frescos have perished, and some works are attributed to him on doubtful authority. As an architect he distinguished himself by erecting the two bridges at Florence named the Ponte Vecchio and Ponte a Santa Trinita. He also completed the beautiful Campanile designed by his master. The time of his death is not known, but he was living in 1368, and was in that year admitted to the painters' guild at Florence.

GADDI, AGNOLO, early Italian painter, was son and scholar of the preceding, on whose death he was instructed by Giovanni de' Milano and Jacopo di Casentino, scholars of Taddeo. He was occupied with the pursuits of commerce as well as those of art, and, like his father, grew rich by both. Many of his paintings are no longer extant, but of those preserved the best are his frescos in the chapel of the Sacred Girdle at Prato, near Florence, and those representing the legend of the Cross in the choir of Santa Croce. He was admitted to the guild of painters at Florence in 1367, and died in 1398. Antonio of Ferrara, Stefano of Verona, and Cennino Cennini were pupils of this master.—There are several works of the Gaddi school in the National Gallery.

GAELEN, ALEXANDER VAN, a Dutch painter, was born in 1670, and died in 1728. He settled in London, and painted some battle-pieces, particularly one of the battle of the Boyne.

GAERTNER, JOSEPH, an eminent German naturalist, was born at Caln, in Suabia, in 1732. Having graduated in the university of Göttingen, he travelled through a great part of Europe in the pursuit of his botanical studies. In 1759 he went to Leyden, where he attended the botanical lectures, and applied himself to vegetable anatomy. With this view he visited England, and communicated some interesting papers to the Philosophical Transactions. In 1768 he went to Petersburg, and was appointed professor of botany and natural history. After filling that place with great credit, and exploring the Ukraine for botanical discoveries, he returned to his native place in 1770. Died, 1791.

GAERTNER, FRIEDRICH VON, German architect, born at Coblenz in 1792. He studied his art at Munich, Paris, and in Italy, and became professor of architecture at Munich in 1820. Among his numerous works there are the Ludwigs-Kirche, the Library, and the University. Visiting Athens with King Louis in 1836, he re-opened the long-disused quarries of Pentelic marble. In 1841 he was chosen director of the Munich Academy of Art. Died, 1847.

GAFORI, FRANCHINO, an eminent Italian composer and professor of music, was born at Lodi in 1481. He took holy orders, and afterwards became head of the choir in the cathedral of Milan, where also he was appointed musical professor. He died about 1530. His works are "Theoricum Opus Musicæ Disciplinæ," "Practica Musicæ utriusque Cantus," his most important work, and the first treatise on music ever printed, "Angelleum et Divinum Opus Musicæ," &c. His works were highly esteemed at the time, and his rules generally adopted.

GAILLARD DE LONGJUMEAU, bishop of Apt, in Provence, was the first who projected a universal historical dictionary, and employed Moreri, who was his almoner, to execute the work. Died, 1695.

GAILLARD, GABRIEL HENRI, a French historian, born at Ostel near Solsons, in 1728, and died in 1806. He was a member of the French Academy, and the Academy of Inscriptions. His best work is the "Histoire de la Rivalité de la France et de l'Angleterre." Among his other works are, "Histoire de Charlemagne," "Histoire de François I.," &c.

GAINSBOROUGH, THOMAS, one of the greatest English landscape and portrait painters, was born at Sudbury, in Suffolk, in 1727. He grew up a lover of nature, and began early to draw and paint. About 1741 he went to London, received some instruction from Cravelot, an engraver, and Hayman, the painter, and after four years married and settled at Ipswich. In 1760 he removed to Bath, and in 1774 to London, where he rose to the highest reputation as a portrait painter, and was the friend and rival of Sir Joshua Reynolds. He was one of the first members of the Royal Academy, and after his death his character was the subject of a eulogistic discourse of the president. He was often careless in his drawing, and produced some of his finest effects in landscape by rough scratches and suggestions which look like chance-work. But his pieces charm by their truth to nature, their simplicity, and purity. In his portraits he distinguishes himself by a singular delicacy and airy grace, and especially excelled in depicting childhood and maidenhood. Among his most pleasing landscapes are, the "Cottage Door," "Market Cart," "Two Boys and Fighting Dogs," and the "Woodman." Among the best of his portraits are those of Mrs Siddons, the Hon. Mrs Graham, the "Blue Boy," "Nancy Parsons," the duchess of Devonshire, Charlotte Lady Sheffield, &c. The National Gallery possesses nine of his works. Died at London, 1788, and is buried at Kew.

GAIUS. [CAIUS.]
GALAS, MATTHIAS, field-marshal in the imperial army, was born at Trent in 1599. He served in Italy and Germany, and rendered eminent services to the Emperor Ferdinand II. and Philip IV., king of Spain. He was deprived of the command, after being defeated by the Swedes near Magdeburg, and died at Vienna in 1647.

GALBA, SERVIUS SULPICIUS, Roman emperor, was descended from the ancient family of the Sulpicii. He was successively p...

proconsul of Africa, and general of the Roman armies in Germany and Spain. He retired to avoid the jealousy of Nero; but the tyrant having issued an order for his death, Galba revolted against the emperor in 68, and Galba declaring for him, Nero killed himself. Galba gave himself up to the government of his provinces, and he was slain by the prætorian band, who proclaimed Otho in his stead, A. D. 69.

GALE, THEOPHILUS, a nonconformist divine, was born, in 1628, at King's Teignton, in Devonshire, and in 1647 entered Magdalen College, Oxford. He commenced as a preacher at Winchester to a congregation of Independents, from which he was ejected in consequence of the Act of Uniformity, in 1662. He then became tutor to the sons of Lord Wharton, with whom he went to Caen, in Normandy. In 1665 he returned to England, and was pastor of a dissenting congregation, and master of a seminary at Newington. He died in 1678. He wrote many works, the principal of which is his "Court of the Gentiles," 3 vols. 4to; in which he attempts to prove that the theology and philosophy of the pagans were borrowed from the Scriptures.

GALE, THOMAS, a learned English divine, was born in 1636 at Scruton, in Yorkshire. He was educated at Westminster School, and elected to Trinity College, Cambridge, of which he became fellow. In 1666 he was chosen Greek professor, and in 1673 master of St Paul's School. He was chosen F. R. S. in 1677. In 1697 he was promoted to the deanery of York, where he died in 1702. He published a collection of the Greek Mythologists, "Historia Poeticæ antiquæ Scriptores Græcæ et Latine," "Herodoti Hæcarnassensis Historiarum, libri x.," "Historia Britannicæ, Saxonicæ, Anglo-Danicæ Scriptores," &c. Dr Gale corresponded with some of the most eminent scholars on the continent, by whom his abilities were highly esteemed.

GALEN, CLAUDIUS, one of the most celebrated physicians of ancient times, was born at Pergamum, in Asia, in 131. After studying philosophy and general literature, he travelled through Egypt and other countries in the East for the purpose of acquiring medical and anatomical knowledge. On his return, he practised four years in his native city, and then went to Rome, but was driven from thence by the intrigues of his jealous rivals, who attributed his success to magic. From Rome he returned to Pergamum; but was recalled by an especial mandate of the Emperor Marcus Aurelius, who, on quitting Rome to make war on the Germans, confided to Galen the care of the health of his son Commodus. The place and time of his death are uncertain; but he is supposed to have died at Rome, in about the 70th year of his age. A part only of his very numerous writings has been preserved; but even that part forms a folio volume, and affords undoubted proof of his practical and theoretical skill. The system of Galen, which was the first theoretical system of medicine, was based on the physical doctrines of Aristotle: it admitted no chemical preparations as medicines, but only organic substances. "The views of

Galen," says Lieber, of disease and the regarded during prenable truths, dire infallibility of creed. Their au- chemical science longer tenable. S. papal bulls, Parnoc works of Galen.

GALEN, CHRIS, the warlike bishop of Westphalia, about his decided bent to compelled to enter was chosen prince was obliged to best of the opposition of ever, conquered it, cure his power. In one of the leaders against the Turks wards fought again alliance with England taking from them resses. After this against the Swedes, and in 1674 he formed and again gave battle Dutch. He was an enterprise, one of his time, and an ad 1678, aged 73.

GALERIUS, CAT
MIANUS, Roman emperor as a common s highest franks by adopted by Diocletian daughter in marriage imperial throne in 305 was naturally of a during his reign the C persecution.

GALLANI, FERDIN
celebrated for his w Chieti, in the provin in 1728. He made a studies, and was noles ful wit than for more Having made a collect various volcanic prod he sent them to the labelled, "Beattissime lasti panes flant"—"H that these stones be m to which the pope gra of Amalfi, worth 4000 One of his earliest prod written on the death tione, in order to rid custom of pouring fo prose and verse, on the songs. In 1759 he wa to the French embassy among the wits and he wrote a number of ab are a "Treatise on Mo upon Horace," "Dial Trade," "On the Recip trial and Belligerent Fr several important offic tan government, and die in 1767.

GALLIET, GALILEO,

Galen," says Liebig, "in regard to the cause of disease and the action of remedies, were regarded during thirteen centuries as irrefragable truths, and had acquired the entire infallibility of the articles of a religious creed. Their authority only ceased when chemical science advancing made them no longer tenable. Soon after Luther burnt the papal bulls, Paracelsus burnt at Basel the works of Galen.

GALEN, CHRISTOPH BERNHARD VAN, the warlike bishop of Munster, was born in Westphalia, about 1607. Notwithstanding his decided bent to a soldier's life, he was compelled to enter the church. In 1650 he was chosen prince-bishop of Munster, but was obliged to besiege the city on account of the opposition of the citizens; he, however, conquered it, and built a citadel to secure his power. In 1664 he was appointed one of the leaders of the imperial army against the Turks in Hungary. He afterwards fought against the Dutch, first in alliance with England and then with France, taking from them several cities and fortresses. After this he joined the Danes against the Swedes, and made new conquests; and in 1674 he formed an alliance with Spain, and again gave battle to his old enemies the Dutch. He was a man of extraordinary enterprise, one of the greatest generals of his time, and an adroit diplomatist. Died, 1678, aged 73.

GALERIUS, CAIUS VALERIUS MAXIMIANUS, Roman emperor. Entering the army as a common soldier, he rose to the highest ranks by his bravery, and was adopted by Diocletian, who gave him his daughter in marriage. He ascended the imperial throne in 305, and died in 311. He was naturally of a cruel disposition, and during his reign the Christians suffered great persecution.

GALLANI, FERDINAND, an Italian, abbé, celebrated for his writings, was born at Chieti, in the province of Abruzzo, Naples, in 1728. He made a rapid progress in his studies, and was no less remarkable for playful wit than for more solid acquirements. Having made a collection of specimens of the various volcanic productions of Vesuvius, he sent them to the pope in a box, thus labelled, "Beatissime Pater fac ut lapides isti panes fiant."—"Holy Father, command that these stones be made bread," in answer to which the pope gave him the canonry of Amalfi, worth 400 ducats per annum. One of his earliest productions was a volume written on the death of the public executioner, in order to ridicule the academical custom of pouring forth lamentations, in prose and verse, on the death of great personages. In 1759 he was appointed secretary to the French embassy, and soon took a lead among the wits and literati in Paris. He wrote a number of able works; among which are a "Treatise on Money," "Annotations upon Horace," "Dialogues on the Corn Trade," "On the Reciprocal Duties of Neutral and Belligerent Princes," &c. He held several important offices under the Neapolitan government, and died, greatly esteemed, in 1787.

GALILEI, GALILEO, the illustrious astro-

nomer, mathematician, and philosopher, was the son of a Florentine nobleman, and was born at Pisa, in 1564. He was intended by his father for the medical profession; but his love for mathematical studies was so decided, and his aversion for medical studies so strong, that he was allowed to pursue the former, which he did with such unwearied diligence, that at the age of 24 he was appointed mathematical professor at Pisa. There he was constantly engaged in asserting the laws of nature against the scholastic philosophy, which raised up such a host of enemies against him, that, in 1592, he was obliged to resign his professorship. He then went to Padua, where he lectured with unparalleled success, and students flocked to hear him from all parts of Europe. After remaining there 18 years, Cosmo III. invited him back to Pisa, and soon after called him to Florence, with the title of principal mathematician and philosopher to the grand duke. Galileo had heard of the invention of the telescope by Jansen; and making one for himself, a series of most important astronomical discoveries followed. He found that the moon, like the earth, has an uneven surface; and he taught his scholars to measure the height of its mountains by their shadow. A particular nebula he resolved into individual stars; but his most remarkable discoveries were Jupiter's satellites, Saturn's ring, the sun's spots, and the starry nature of the milky way. The result of his discoveries was his decided conviction of the truth of the Copernican system; though the blind and furious bigotry of the monks charged him with heresy for it, and he was twice persecuted by the Inquisition, first in 1615, and again in 1633. On both occasions he was compelled to abjure the system of Copernicus; but it is said, that in the last instance, when he had repeated the abjuration, he stamped his foot on the earth, indignantly muttering, "yet it moves!" In the following year, when he was 70 years old, and his health was declining, a very heavy blow fell on him by the death of his beloved daughter, Maria, who would have sweetly soothed him in his enforced retirement. Two years later he became blind. He bore this affliction, to him of unusual severity, with great patience. The latter years of his life were spent at his own country-house near Florence, where he devoted himself to the perfecting of his telescope; and he died, at the age of 78, in 1642, the year in which Newton was born. The greatest work of Galileo is the "Dialogue on the Copernican and Ptolemaic Systems." Among his others are "Dialogues on Motion," "Sydercus Nuncius," "Treatise on the Sphere," &c.

GALL, ST., an Irish monk of the 8th and 7th centuries, born of a noble family, and educated at the monastery of Banchor, accompanied St Columban to France about 585, and took part with him in all his missionary labours. Banished from France, they went together into the wilder regions of Switzerland, and at Arbon, on the lake of Constance, they founded the monastery which bore the name of St Gall, and gave name to the town which grew around it, and also to the canton. After a few years Columban

[GAM]

[GAR]

ruler over the country, called the *samorin*, or king, had his residence. He returned to Orlobo in two years and two months from the time of his setting out; and the result of this expedition promised such great advantages, that, in 1502, he went out with 20 ships, but he was attacked by an opposing fleet on the part of the *samorin*, which he defeated, and returned the following year with 12 rich vessels which he had captured in the India Seas. John III. of Portugal appointed him viceroy of India on the death of Albuquerque in 1524; on which he went there a third time, and established his government at Cochin, where he died in 1525. The Lusad of Camoens, who accompanied Gama, is founded on the adventures of his first voyage.

GAMBIER, the Right Hon. JAMES, Lord, British admiral, was born, in 1758, at the Bahama Islands, his father being at that time the Lieutenant-governor. He entered the naval service at an early age, was actively engaged on various occasions, and was rewarded by different gradations of rank, till he reached that of post-captain, with the command of the *Raleigh*, of 32 guns, in 1788. In this frigate he was engaged in repelling the French in their attempt upon Jersey, in 1791; he afterwards served on the American coast, was present at the reduction of Charleston, and captured the *Mifflin*, an American ship of war, mounting 20 guns. When hostilities commenced with France in 1793, Captain Gambier was appointed to the *Defence*, of 74 guns, and had the merit of sharing in Earl Howe's celebrated victory. On the first anniversary of that battle (June 1, 1795), he was advanced to the rank of rear-admiral. Passing over minor events, we find him, in 1807, intrusted with the command of the fleet sent to Copenhagen to co-operate with Lord Cathcart in demanding possession of the Danish navy; which, though at first resisted, ended in the surrender of 19 sail of the line, 23 frigates, sloops, &c. For his share in this important service, his lordship was created a baron of the united kingdom, and offered a pension of £2000, which he declined. He was next appointed to the command of the Channel fleet; and in 1809, in conjunction with Lord Cochrane, who commanded the fire-ships, an attack was made on a French squadron in the Aix Roads, which, though successful to a considerable extent, was considered by Lord Cochrane as inefficiently performed, and caused a serious misunderstanding between them. A court-martial on Lord Gambier, and his honourable acquittal, were the results of this disagreement. His lordship occupied a seat at the admiralty for many years, and on the accession of William IV. he was advanced to the rank of admiral of the fleet. He was pious and benevolent; and is memorable for his zeal in inculcating moral and religious principles among the seamen. Died, April, 1833.

GANDOLPHY, PETER, an English Catholic priest, greatly distinguished as a preacher, was born about 1760. He was a controversialist, and published "A Defence of the Ancient Faith," in 1811; and "A Full Ex-

position of the Christian Religion," in 1813; but a sermon on the Relations between Spiritual and Temporal Authority exposed him to the censure of his diocesan, in 1816. He appealed to Rome, and made an able defence of his opinions; but the affair caused him to quit his situation as missionary at the Catholic chapel in Lincoln's Inn Fields. He died at East Sheen, Surrey, in 1821.

GANDON, JAMES, an eminent English architect, and the first who received the architectural gold medal of the Royal Academy. His reputation was much enhanced by his editorial labours in continuing the "Vitruvius Britannicus;" after which he went to Ireland, and remained there till he died, in 1824, aged 84. He designed the custom-house, the four courts, and many other elegant structures in Dublin.

GANS, EDWARD, one of the most distinguished German jurists, was born of a Jewish family at Berlin, in 1798. He studied at the universities of Berlin, Göttingen, and Heidelberg, and was appointed lecturer on law at Berlin in 1820. He took a leading part in the controversy between the historical and philosophical schools of jurists, visited France and England, in 1830, was persecuted by the government of Prussia for his free speaking on history and politics, and died suddenly in 1839. His principal works are—"Scholia to Gaius," "the Law of Succession in its historical development," "System of the Roman Civil Law," and "The Basis of Possession." He also edited the works of Hegel, whose disciple he was, and founded the review entitled "Annual for Scientific Criticism."

GARAMOND, CLAUDE, a celebrated French engraver and type-founder, was born at Paris toward the close of the 15th century. He brought the art of type-founding to such perfection, that all parts of Europe were supplied with his types. Among his works are some beautiful specimens of Greek, and it was he who brought the Roman character to perfection. Died, 1661.

GARAY, JUAN DE, a brave Spanish officer, born at Badajoz, in 1641. He went to America, as secretary to the governor of Paraguay; where he displayed so much enterprise and talent, that he was raised to the rank of lieutenant-general and governor of Assumption. He founded Santa Fé, rebuilt and fortified Buenos Ayres, and endeavoured by kindness to civilize the Indians. He was killed on the banks of the Parana, about 1692.

GARCAO, PEDRO ANTONIO CORREA, the Portuguese lyric poet, was born at Lisbon about 1735. His ambition was to effect a reformation in the literary taste and style of his countrymen, and he succeeded at least in setting them a better example. Died in prison, about 1775.

GARCIA, MANUEL, a distinguished musical performer and composer, was born at Seville, in Spain, in 1782. He showed great proficiency at an early age, and appeared as a public singer at the opera-houses of Madrid, Paris, Rome, Naples, Turin, and London. He was engaged as principal male singer at the king's theatre, London, in 1824; and his abilities attracted much attention,

both as a vocalist and as an actor. His dramatic compositions are too numerous for mention here, and many of them possess great merit. Madame Malibran de Beriot was his daughter. Garcia died in 1832.

GARCIA DE MASCARENHAS, BLAIGE, a Portuguese soldier and poet, was born in 1598, at Avo. In 1614 he entered into the military service, and went to Brazil, where he remained 26 years, and on his return to Lisbon was appointed governor of Alfayates. Having been falsely charged with treason and imprisoned, and being denied the use of pens and ink, he composed a letter in verse to the king, in the following ingenious manner—he procured a printed book, cut out the words he wanted, and pasted them on a blank leaf; this he threw from his window to a friend, who delivered it, and it procured his liberation. Died, 1656.

GARCIA, LASSO, or **GARCILASO DE LA VEGA**, called the prince of Spanish poets, was born at Toledo, in 1503. He was early distinguished for his wit and fancy, wrote several pathetic pastorals and sonnets, and did much towards uprooting that taste for bombast, which, at the period in which he flourished, disgraced the productions of his countrymen. Garcilaso followed the profession of arms, and attended Charles V. in many of his expeditions, and fell in battle, in 1536.

GARCILASO DE LA VEGA, surnamed **THE INCA**, because by his mother's side he was descended from the royal family of Peru, was born at Cuzco, in that country, in 1530. Philip II, dreading the influence of Garcilaso among the natives, summoned him to Spain, where he died. He wrote a History of Peru, and also a History of Florida.

GARDEN, ALEXANDER, an eminent botanist and zoologist, was born in Scotland, in 1730, and educated at the university of Edinburgh. He went to America, and settled as a physician at Charleston, South Carolina, where he engaged in botanical researches, and was very successful in the discovery and verification of new species among the animal and vegetable tribes of North America. He opened a correspondence with Linnæus, which was attended with many reciprocal advantages. After a residence of 20 years in America, he returned to England, where he died in 1791. Garden was a fellow of the Royal Society, to which he was elected in 1753.

GARDINER, JAMES, a Scotch military officer in the reign of George II., distinguished for his bravery and piety. He was born, in 1688, at Carriden, Linlithgowshire; entered the army when only 14, and obtained a commission in the Dutch service. He afterwards distinguished himself at the battle of Ramillies; and at the breaking out of the rebellion, he commanded a regiment of dragoons, and fell at the battle of Preston Pans, being cut down by a blow from a Lochaber axe, in sight of his own house, Sept. 21, 1745. Dr Doddridge, his biographer, says, that in his youth he was very gay and licentious, but the accidental perusal of a book, entitled "Heaven taken by Storm," made him serious, and from that time he became as distinguished for his piety as he had be-

fore been for the absence of all religion and a course of vice. It is also said that he received a supernatural intimation of his own approaching death. There is a passage in Dr Alexander Cadyle's Autobiography, recently published, respecting Colonel Gardiner and Dr Doddridge's narrative of his conversion, which excited an interesting discussion and throws doubt on the popular narrative.

GARDINER, STEPHEN, a celebrated preacher and statesman, was born at Burr St Edmund's, in Suffolk, in 1483. He was the illegitimate son of Dr Woodville, bishop of Salisbury, and brother of Elizabeth, queen of Edward IV. He was educated at Trinity Hall, Cambridge; from whence he went into the family of the duke of Norfolk, and afterwards into that of Cardinal Wolsey, who made him his secretary. In this situation he acquired the confidence of Henry VIII., to whom he was serviceable in procuring his divorce from Queen Catharine; he also defended the king's supremacy, and for these services he was appointed secretary of state, and soon after promoted to the see of Winchester. Gardiner drew up articles against Henry's last queen, Catharine Parr, of heresy; but the queen avoided the storm, and he fell into disgrace. At the accession of Edward VI. he opposed the Reformation, and was committed first to the Fleet, and afterwards to the Tower, where he was a prisoner during the remainder of the reign. He was also deprived of his bishopric; but on the accession of Mary he was restored to his see, and appointed chancellor of England. His conduct towards the Protestants was cruel and sanguinary. He died in 1555. He was a learned man, but artful, dissembling, ambitious, and proud.

GARDINER, WILLIAM, a distinguished musical amateur and writer, was born at Leicester in 1770. He inherited his love of music from his father. When very young he was a performer on the viola and the piano; and it is worthy of record, as a proof of his musical foresight, that he was the first in England to appreciate the genius of Beethoven. Meanwhile he carried on business as a stocking merchant, and having to visit different parts of the country, made many acquaintances and friends, among others Hummel, Von Winter, Godwin (the political writer), Perry (of the "Morning Chronicle"), Robert Hall, Hone, Jenner, and Dr Parr. But the most gratifying of Mr Gardiner's literary acquaintanceships was that with the poet Moore, whom he met at Langley Priory, in 1812; and two years subsequently visited in Derbyshire. Mr Gardiner's literary labours began with his publication of the Sacred Melodies, in the year 1812, when his author was presented at Court to the Regent. His "Lives of Haydn and Mozart," "Oratorio of Judah," "Music of Nature," "Music and Friends," and "Sights in Italy," followed each other at intervals between the years 1812 and 1833; and all his works, which are full of interesting matter about music and musicians, prove him to have been as amiable as a man as he was enthusiastic in the culture of his much-loved art. Died, 1833.

GARDINER, WILLIAM, of talents rarely exceeded after a life of great industry during which he had published bookseller, painter, &c. a paper on the miseries of himself in 1814.

GARDNER, ALAN, an officer. At the age of 15 he was shipman, and, having received several promotions, was made captain of 60 guns, in 1762, with the French fleet. He commanded the ship in which he first sailed. In 1763 he was raised to the rank of admiral, and appointed to the Leeward Islands. In the execution of the late J. supported Lord Howe's expedition with a baronetcy. During the mutiny of the mouth, it was with difficulty that he was able to come off with his life, in consequence of the efforts he made to quell it by his own exertions. In 1800 he was created a baron. In 1807 succeeded Earl St. Vincent in the command of the Channel fleet. He succeeded in several successive parliaments the English peerage, a baron.

GARNERIN, JACQUES, a French aeronaut. He was the first to make the merit (if it can be called so) of making the daring experiment in a parachute. His first trial was at St Petersburg, in 1781, and was fully repeated in London, in September, 1802. Died, 1802.

GARNET, HENRY, an American abolitionist, famous for being a powder plot. He was born in 1791.

GARNIER, JEAN JACQUES, a philosopher of France, was born in 1715, in the province of Maine, and at the age of 17 he was appointed to the reversion was professor of logic in the College Royal; an appointment which he received in 1760. He was a member of the Académie des Sciences, Man of Letters, &c. He was the author of "Man of Letters," 2 vols. He was the origin of the Government of France, "Continuation of Velly's History of France," a treatise on the "Continuation of Velly's History of France," a treatise on the "Continuation of Velly's History of France," &c. Died, 1805.

GAROFALO, whose name was VENUTO TISIO, an artist. He was born in 1481. During his stay in Rome he was in intimacy with Raphael. His works unite the grandeur of Raphael with the rich colouring of the school of the Venetians, and his Madonnas are full of beauty and expression. He was in fresco and in oil, and his frescoes are still preserved in various parts of Italy. Died, 1639.

GARRICK, DAVID, a Scotch actor that ever appeared on the stage, was descended from a family who, being Protestants, were banished from the revocation of the Edict of Nantes. His father, Peter Garrick, was a soldier in the army, and generally resided in Scotland, but being on a recruiting party, he was born there in 1717. He received his education partly at Glasgow, and partly at Lichfield, and partly

GARDINER, WILLIAM, an Irish engraver, of talents rarely excelled, born in 1760; who, after a life of great vicissitude and distress, during which he had been alternately jockey, bookseller, palater, priest, and actor, wrote a paper on the miseries of life, and destroyed himself in 1814.

GARDNER, ALAN, Lord, an English naval officer. At the age of 13 he became a midshipman, and, having passed through various promotions, was made post-captain in the *Preston*, of 60 guns, in 1766. In the action with the French fleet on the 12th of April, 1782, he commanded the *Duke*, of 98 guns, in which ship he first broke the French line. In 1793 he was raised to the rank of rear-admiral, and appointed commander-in-chief on the Leeward Islands station; and in the action of the 1st of June, 1794, he so ably supported Lord Howe, that he was rewarded with a baronetcy and further promotion. During the mutiny of the fleet at Portsmouth, it was with difficulty that he escaped with his life, in consequence of his endeavours to quell it by severe measures. In 1800 he was created an Irish peer, and in 1807 succeeded Earl St Vincent in the command of the Channel fleet. He sat in three successive parliaments, was finally raised to the English peerage, and died in 1809.

GARNERIN, JACQUES ANDRÉ, a celebrated French aeronaut, to whom belongs the merit (if it can be called such) of first making the daring experiment of descending in a parachute. His first attempt was made at St Petersburg, in 1800; and he successfully repeated it in England on the 21st of September, 1802. Died at Paris, 1823.

GARNET, HENRY, an English Jesuit, memorable for being concerned in the Gunpowder Plot. He was executed in 1606.

GARNIER, JEAN JACQUES, historiographer of France, was born in 1729, at Goron-sur-Maine, and at the breaking out of the revolution was professor of Hebrew in the College Royal; an appointment which he received in 1780. He was the author of "The Man of Letters," 2 vols.; a treatise on "The Origin of the Government of France," a "Continuation of Velly and Villaret's History of France," a treatise on "Civil Education," &c. Died, 1805.

GAROFALO, whose real name was **BENVENUTO TISIO**, an artist of Ferrara, born in 1481. During his stay in Rome he formed an intimacy with Raphael, and assisted him. His works unite the grace and clearness of Raphael with the rich colouring of the Lombard school, and his Madonnas and angels are full of beauty and expression. He painted in fresco and in oil, and some of his finest frescoes are still preserved at Ferrara. Died, 1539.

GARRICK, DAVID, the most celebrated actor that ever appeared on the English stage, was descended from a French family, who, being Protestants, fled to England on the revocation of the Edict of Nantes. His father, Peter Garrick, was a captain in the army, and generally resided at Lichfield; but being on a recruiting party at Hereford, David was born there in 1716. He received his education partly at the grammar school at Lichfield, and partly under Dr Johnson,

with whom he first came to Lcadon, in 1736, and prepared himself for the study of the law. The death of his father, however, disturbed this arrangement; and having been left £1000 by his uncle, he went into partnership with his brother in the wine trade. A love for the stage had long been deeply rooted in his mind, and, abandoning the wine trade, he resolved on being an actor. His first attempt was at Ipswich in 1741, under the assumed name of Lyddal; and the applause he met with induced him to make his appearance at the theatre, Goodman's Fields, in the character of Richard III. The effect of this was immediate and decisive. The other theatres were quickly deserted, and Goodman's Fields became the resort of people of fashion, till that theatre was shut up. Garrick then formed an engagement with Fleetwood, the patentee of Drury Lane, where his reception was equally flattering. In the summer of 1743 he visited Dublin; and in 1747 he became joint patentee of Drury Lane Theatre. In 1749 he married Mademoiselle Violette, the subject of our next article. The remainder of his career was a long and uninterrupted series of success and prosperity until its close, which took place in 1776, when he determined upon a retreat, and sold his moiety of the concern for £37,000. The last part which he performed was *Don Felix*, in "The Wonder," for the benefit of the theatrical fund. At the conclusion of the play, he addressed a brief farewell to the audience. The general feeling with which this was delivered and received, rendered it truly impressive; and few persons ever quitted the stage with plaudits so loud and unanimous. In 1769 he projected and carried into effect the famous Stratford Jubilee, a striking proof of his enthusiasm for Shakspeare. It occupied three days there, and its representation at the theatre lasted for 92 nights. He died, Jan. 20th, 1779, his remains being interred, with great pomp, in Westminster Abbey. As an actor, Garrick seems never to have been equalled for truth, nature, variety, and facility of expression, though perhaps surpassed by some of his contemporaries in the enunciation of calm, sentimental eloquence. He wrote or adapted for the stage nearly 40 pieces, besides producing a great number of prologues and epilogues. The style of acting introduced by Garrick was the very opposite of that formal declamation practised before his time; it was natural, vigorous, and impassioned; the plays of Shakspeare grew into greater repute; and a reform both in the conduct and licence of the drama, honourable to his taste and genius, was effected by his example. There is a portrait of Garrick, painted by Pine, in the National Portrait Gallery. His Correspondence was published with a Memoir in 1831.

GARRICK, EVA MARIA, wife of the preceding, was born at Vienna, in 1725. Her maiden name was Veigel, which she changed to that of Violette, by command of the empress, Maria Theresa, whose notice she had attracted as an opera dancer. In 1744 she arrived in England, bringing with her a recommendation from the countess of Stahrenberg to the countess of Burlington, who received her, on her obtaining an engage-

In 1592, at Chantersier, in Provence. Before he was 20 years of age he became professor of philosophy at Aix; but he soon resigned the chair, and gave himself up wholly to his scientific pursuits. In 1645 he was appointed professor of mathematics in the college-royal of Paris, and his lectures were exceedingly popular. In fact, he was distinguished as an astronomer, naturalist, theologian, and mathematician. Gassendi combated the metaphysics of Descartes, and divided with that great man the philosophers of his time, almost all of whom were Cartesians or Gassendians. Gibbon calls him the most philosophic among the learned, and the most learned among the philosophic of his age. He died in 1655. Gassendi's most important works are his "De Vita et Moribus Epicuri," "Syntagma Philosophiæ Epicuri," and "Syntagma Philosophicum." In the first two he gives an account of the life and doctrines of Epicurus, with great learning clearing them of misrepresentation, and while controverting some of the speculative notions of Epicurus, vindicates and extols his moral teaching. In the last he expounds his own system. Among his other works are several astronomical treatises and Lives of Tycho Brahe and Copernicus.

GASSICOURT, CHARLES LOUIS CADET DE, a French miscellaneous writer, was the son of an apothecary at Paris, and first attracted notice by his essays on political subjects. On the death of his father, who was himself a man of scientific pursuits, and the personal friend of Buffon, Lalande, and Condorcet, he turned his attention to chemistry and physics; and in 1803 appeared his "Dictionary of Chemistry," afterwards introduced into the Polytechnic School. He followed the French army into Austria in 1809, and wrote a history of the campaign. The modern plan for the organization of the French board of health owes its origin to him, and he had not only the satisfaction of seeing it adopted, but of obtaining the appointment of reporting secretary, which situation he held till his death, in 1823. Besides many other productions not here enumerated, he was the author of a series of epistles on London and the English nation; and a treatise "On the Application of Physical Science to Military Purposes."

GASTON DE FOIX. [FOIX.]

GATAKER, THOMAS, an English divine, was born in 1574, in London, and educated at St John's College, Cambridge. He became preacher to the society of Lincoln's Inn, and in 1611 obtained the rectory of Rotherhithe. In 1619 he published a curious treatise on the "Nature and Use of Lots," which occasioned considerable controversy. In 1620 he made a tour through the Low Countries; and, in 1624, published in London a work, entitled "Transubstantiation, declared by the confession of the popish writers to have no necessary foundation in God's word." He wrote also a defence of this doctrine. In 1642 he was chosen one of the famous assembly of divines at Westminster; but he disapproved of the introduction of the covenant, and declared in favour of episcopacy. He zealously opposed the trial of Charles I. Died, 1654. His "Opera Critica"

were published long after his death, and included his Latin translation of the "Thoughts" of Marcus Aurelius, and various pieces of biblical criticism and philology.

GATES, HORATIO, an American officer who greatly distinguished himself in the war of independence, was born in England, in 1728. After serving in the army, and obtaining considerable promotion, he purchased an estate in Virginia, and resided on it until the commencement of the revolutionary war in 1776, when congress appointed him adjutant-general; and during the struggle which followed, he rendered many brilliant services to his adopted country. On the 8th of October, 1777, he totally defeated General Burgoyne, who, on the 16th, was compelled to surrender his whole army, which was considered the most important achievement of the whole war, and had the greatest effect in obtaining the result that followed. He was, however, unfortunate after he had obtained the chief command of the southern districts, being signally defeated at Camden, by Lord Cornwallis. Died, 1806, aged 77.

GATTINARA, MERCURINO ARBORIO, Count DI, chancellor to the Emperor Charles V., was born of a noble family at Verceili, in Piedmont, in 1465. He first distinguished himself as an advocate, became in 1507 president of the parliament of Burgundy under the Duchess Margaret, and in 1520 chancellor of the empire, a post which he worthily filled till his death. He was a lover of justice, and advocated moderation towards the Protestants; was the friend of Erasmus, tried to induce the pope to call a general council, and make necessary reforms in the church, and in 1529 assisted in negotiating the treaty of Cambrai, and received a cardinal's hat from Clement VII. Died, at Innsbruck, on his way to attend the diet of Augsburg, in 1530.

GAUBIL, ANTOINE, a learned French missionary in China, was born at Caillac, in 1689, and died at Pekin in 1759, where he was for thirty years interpreter to the court. He wrote the History of Genghis Khan, and an "Historical and Critical Treatise on Chinese Astronomy." He also translated the book called the "Choo-King," containing the most ancient traditions of China and its sovereigns.

GAUBIUS, JEROME DAVID, a celebrated physician, was born at Heidelberg in 1705. After studying medicine under his uncle, a physician at Amsterdam, he went to Harderwyck, and from thence to Leyden, where he contracted an intimate friendship with Boerhaave, whom he succeeded as lecturer in botany and chemistry; and in 1734 he obtained the medical professorship. His treatise on the "Method of Prescribing, or of Writing Receipts," is one of his most important works, and has been frequently reprinted. Died, 1780.

GAUDEN, JOHN, bishop of Worcester, born at Mayland, in Essex, in 1605: studied at Cambridge, and was made chaplain to the earl of Warwick. He at first leaned to the side of the parliament in the civil war, and was presented to a living. He was nominated one of the assembly of divines at Westminster, but was, it is said, excluded. As

soon as he saw the king was in personal danger, he changed sides, and protested against his trial. He published, soon after the king's execution, the book entitled "Ionn Basitke, or the Portraiture of his Sacred Majesty in his Solitude and Sufferings." This he afterwards asserted to be entirely of his own writing, and thereby gave occasion for the curious controversy respecting the authorship of the "Ionn," which is still unsettled. In 1640 he became preacher at the Temple; and when Charles II. was restored he was preferred to the see of Exeter, and in 1659 to that of Worcester, where he died soon after.

GAUTIER, LOUIS, a French noble, whose life was spent in attempting to make education a scientific amusement rather than a task, was born about the year 1748. He had observed that the ordinary course of scholastic discipline deprived children of that portion of happiness so necessary to the development of their moral and physical faculties, and he endeavoured to smooth the rugged path of education by inventing various games which should combine amusement with instruction. The horrors of the revolution drove him from France; and he retired to the Hague, where he became tutor to the children of the British ambassador, whom he accompanied to England. After the peace of Amiens he returned in France, and continued to teach according to his system until his death, which took place in 1818, the abbé being then in his 70th year. His works are well known, and very popular.

GAUSS, CARL FRIEDRICH, a distinguished mathematician and astronomer, was born at Brunswick in 1777. While attending the public school of his native city, his extraordinary intelligence attracted the notice of his teacher, on whose recommendation of his merits to the duke of Brunswick, the boy was furnished with the means of pursuing his studies, first at the college at Brunswick and subsequently at Göttingen. Here he made several of his greatest discoveries in analysis, which induced him to make the cultivation of science the chief subject of his life. His first great work, the "Disquisitiones Arithmetice," published in 1801, attracted the attention of all the scientific world, and stamped its author as one of the most profound and original mathematicians of the age. In 1807 he received the appointment of Ordinary Professor and Director of the Observatory at Göttingen, which situation he held for nearly forty-eight years, in spite of many tempting and flattering invitations from other German and foreign universities. During this long period he gave to the world a host of treatises on pure mathematics, geodesy, astronomy, and the cognate sciences, which all bear the impress of original genius, besides contributing largely to scientific journals, and making observations on terrestrial magnetism which have proved of great utility to the cultivation of science. In fact there are hardly any of the scientific men of Europe or America at the present time, who have not directly or indirectly derived great advantage from his labours. Died, 1855.

GAYARD, HYACINTHE, one of the most

anatomists of the 18th century, was born at Mumiindin, in 1703, and was a pupil of Boerhaave. He published treatises on anatomy, zoology, and pneumatology, the latter of which especially has been highly praised. Died, 1802.

GAYESTON, PIERRE, favourite of Edward II. was a Gascon by birth, and on account of his father's services to Edward I. was chosen companion to the prince of Wales. He acquired a complete and very mischievous ascendancy over the prince, corrupting his morals, wasting his resources, and breeding dissension between him and his father. Edward I. banished him in 1307, but dying the same year, Edward II. at once recalled him, made him Earl of Cornwall, and gave him in marriage his niece, Margaret de Clare. Intoxicated with his elevation and honours, he became intolerably insolent, and the nobles were exasperated. He was again banished, again recalled, and in 1319, the barons having declared war, Gayeston was besieged in Beaulieu castle, captured, and executed near Warwick, June 19.

GAY, JOHN, an eminent English poet, was born at Barnstable, Devon, in 1688, and was apprenticed to a silk-mercer in London; but, showing a marked aversion to trade, his indentures were cancelled by mutual agreement, and he devoted himself to literature. In 1711 he published his "Hudibras," which he dedicated to Pope, then a young poet like himself; a compliment that introduced them to each other, and proved the foundation of a friendship which lasted for life. The year following he was appointed secretary to the Duchess of Mounmouth. About this time came out his burlesque poem, entitled "Trivia, or the Art of Walking the Streets of London;" which was succeeded, in 1714, by the "Shepherd's Week, a series of Pastorals," in ridicule of Philips. The same year he went to Hanover with the earl of Clarendon, as secretary to the embassy; but though he had great expectations from the court they were never realized. In 1720 he published his poems, in 2 vols. 4to, by subscription; which produced him a considerable sum, but he lost it all in the South Sea scheme. After producing many ingenious and agreeable works, some instances of court favour encouraged him to employ himself in his well-known "Fables," written expressly for the instruction of the duke of Cumberland, and published with a dedication to that prince in 1726; but though they were popular, they failed to serve him at court. He thereupon wrote "The Beggar's Opera," which was first acted in 1727, and ran for 63 successive nights; but it so offended the persons in power, that the lord chamberlain refused to license for performance a second part of it entitled "Tolly." This induced Gay's friends to come forward on its publication with so handsome a subscription, that his profits amounted to £1000. The cause of Gay was taken up by the duke and duchess of Queensberry, who gave him a residence in their house, where he died, Dec. 11, 1732. He was buried in Westminster Abbey, and a monument was erected to his memory.

GAY-LUSSAC, distinguished by his discovery of chlorine in 1774. His scientific technique, applied to the expansion of the atmosphere, led to the height of a with instrument and observations in the following which greater than half. His subordination to Valtair conducted as by means of a cul government. He Arago, Alexander and other eminent professor of the technique, and a du 1801; was a in Solonca, and his government. At Philippe de France, Chamber of Dup France. Died at

Mo gregation at Auch mained 10 years; ar

GAY-LUSSAC, NICOLAS FRANÇOIS, a distinguished French chemist, was born in 1778. He studied at the Ecole Polytechnique, applied himself to the investigation of the expansion of gases, and in August 1801 made, with Rief, a balloon ascent to the height of above 18,000 feet, furnished with instruments for making experiments and observations. He made a second ascent in the following month, and attained the much greater elevation of four miles and a half. He subsequently devoted much attention to Voltaic electricity, and with Thénard conducted some important experiments by means of a colossal pile furnished by the government. He was the friend of Laplace, Arago, Alexander von Humboldt, Berthollet, and other eminent men; became, in 1816, professor of chemistry at the Ecole Polytechnique, and subsequently at the Jardin du Roi; was a member of the Academy of Sciences, and held various offices under the government. After the accession of Louis Philippe he was chosen member of the Chamber of Deputies, and made a peer of France. Died at Paris, 1850.

GAZA, THEOPHIL, one of the chief reviewers of the study of Greek literature in the 18th century, was born at Thessalonica about 1408. On the invasion of his country by the Turks, in 1430, he went to Italy, where he obtained the patronage of Cardinal Bessarion, to whom he presented a manuscript of the Iliad. He was afterwards employed at Rome in translating Greek authors into Latin; but, on proposing one of his best performances to Sixtus IV., who gave him a trifling sum for it, he said that he threw the money into the Tiber, exclaiming, "It is time to return home, since these asses have no relish for anything but tithes." Died, at Rome, in 1478.

GEHLEIT, a great Arabian chemist of the 8th century, of whose history little is known, but whose writings contain notices of so many important chemical facts, not found in any previous writer, that he is considered entitled to the designation of the father and founder of chemistry. He was acquainted with nearly all the chemical processes in use down to the 16th century: with the sulphuric and nitric acids, corrosive sublimate, saltpetre, potash, and soda. But he did not, as a philosopher, rise above the spirit of his age and countrymen; explaining phenomena by "occult causes," and firmly believing in and seeking the "philosopher's stone." Geber's work was translated from Arabic into Latin by Gollus of Leyden, who entitled it "Lapis Philosophorum." In 1678 an English translation by Richard Russell appeared. It is the eldest chemical treatise known.

GED, WILLIAM, the inventor of the art of stereotyping, which he practised in 1725, was a goldsmith of Edinburgh. In 1729 he entered into partnership with Fenner, a stationer of London, but not succeeding in his attempt to introduce his new method, he returned to Scotland. Died, 1749.

GEDDES, DR ALEXANDER, a Roman Catholic priest, born at Rathven, Banffshire, in 1737. He had the charge of a congregation at Auchinhalg, where he remained 10 years; and in 1779 the university

of Aberdeen granted him the degree of D.D., being the first Catholic since the Reformation to whom it had been given. About this time he removed to London, and began to devote himself to a new translation of the Bible into English. In 1784 he published his prospectus of that work; and in its progress he was liberally supported by Lord Petre. The first volume of it appeared in 1792, comprising the Pentateuch and the Book of Joshua; and in 1797 appeared the second volume; after which he published "Critical Remarks," in vindication of his work, and an "Apology for the Roman Catholics of Great Britain." He died in 1802. Dr Geddes was a man of learning; but his new views in respect to the inspiration and authority of the Bible, miracles, and other difficult matters were offensive and alarming to his countrymen, and he was regarded with suspicion by orthodox Christians. His opinions were to a great extent identical with those which public discussion has now made us familiar with, and which we summarily describe as "rationalistic."

GEDDES, DR MICHAE, an eminent English divine of the 17th century. He was chaplain to the factory at Lisbon, where he was apprehended by the Inquisition in 1686, and interdicted from officiating in his ministerial capacity; on which he returned to England, and was made chancellor of Salisbury. He wrote the "History of the Church of Malabar," and the "Church History of Ethiopia." Died before 1741.

GEE, JOSHUA, a merchant of London in the 18th century, who wrote "The Trade and Navigation of Great Britain considered," published about 1730, and assisted in the earlier work entitled "The British Merchant," which appeared as a periodical in 1713. Nothing is known of his life.

GEHR, CHARLES DE, a celebrated Swedish naturalist, was born in 1720. He studied at Utrecht and Upsal, and at the latter place had Linnæus for his master. He possessed a share in the iron-works at Dannemora, which mines he improved by the application of new machinery. He also invented an apparatus for drying corn by the heat of the smelting-houses. By these means he gained great wealth, which he applied to the noblest purposes, in feeding the poor, repairing churches, and establishing schools. He was appointed marshal of the court, knight of the polar star, and created a baron. He wrote in French "Mémoires pour servir à l'Histoire des Insectes," &c., 7 vols. Died, 1778.

GEIJER, ERIK GUSTAV, Swedish historian and poet, was born in 1783. He studied at the university of Upsal, and first attracted notice by a oulogy of Sten Sture, administrator of the kingdom, which gained the prize of the Academy. He visited England in 1809, and after making himself known by various literary undertakings, was a pointed professor of history at Upsal in 1817. He was deputy to the Diet on two occasions, and twice declined the offer of a bishopric. He enjoyed the friendship of Tegner, Frederika Bremer, Jenny Lind, and other distinguished Swedes, and was for some time president of the Swedish Academy. Among his works

are a "Complete History of Sweden," an introduction to a more extensive History, "Reminiscences," a work on the Poor Laws, &c. Died, 1847.

GELÉE, CLAUDE. [CLAUDE LORRAINE.]

GELL, Sir WILLIAM, a celebrated antiquarian and classical scholar, was born in 1777, and graduated at Cambridge, where he was a fellow of Emanuel College. For many years Sir William resided in Italy; first at Rome, and afterwards at Naples. In 1814 the princess of Wales, afterwards Queen Caroline, appointed him one of her chamberlains, and he accompanied her in her travels for several years. He settled afterwards at Naples, and there devoted his time to literary pursuits. He published "The Topography of Troy," "The Geography and Antiquities of Ithaca," "The Itinerary of Greece," "The Itinerary of the Morea," "The Topography of Rome," and, lastly, the interesting and beautiful work, entitled "Pompeiana, or Observations upon the Topography, Edifices, and Ornaments of Pompeii." Died, 1836.

GELLERT, CHRISTIAN FÜRCHTEGOTT, a German poet and writer on morals, was born at Haynichen, in Saxony, in 1715. He received his education at Leipsic, and acquired great celebrity by his tales, fables, and essays. He was appointed extraordinary professor of philosophy at Leipsic, where he read lectures on poetry and eloquence, which were received with great applause. His complete works were published in 10 vols. Died, 1789.

GELLERT, CHRISTLIEB ERREGOTT, brother of the preceding, was a celebrated metallurgist. He was professor of metallurgy at St Petersburg, and afterwards administrator of the foundries at Freyberg in Saxony. He introduced very important improvements into the method of separating metallic substances by amalgamation, and wrote on chemistry and metallurgy. Born, 1713; died, 1795.

GELLI, GIAMBATTISTA, an Italian littérateur, born at Florence, in 1498. He followed his father's trade, that of hosier and tailor, but attained great distinction by his literary talent, and became a member of the Academy of Florence. He gave a course of lectures on the "Inferno" of Dante, which were afterwards published. Among his most esteemed works are—"Capricci del Bottajo," and "la Circe." They have been frequently republished. Died, 1563.

GELLIBRAND, HENRY, mathematician, born in London, in 1597, and educated at Trinity College, Oxford. In 1627 he was elected professor of astronomy at Gresham College; but, in 1631, he was brought into the high commission court for publishing an almanack, in which the names of the saints were changed for the Protestant martyrs. As, however, similar almanacks had been printed, the information was dismissed. He wrote several useful works on the longitude, the variation of the magnetic needle, on trigonometry, and on navigation. Died, 1638.

GELLIUS, AULUS, a Roman writer of the second century. He studied philosophy at

Athens, held a judicial post at Rome, and is known as author of "Noctes Atticæ," a kind of common-place book, made up of selected passages from many ancient authors on all sorts of subjects, with some original observations, critical and philological.

GELON, tyrant of Syracuse, was a native of Gela, who commanded with distinction in the wars carried on by Hippocrates, tyrant of Gela, and seized the sovereign power himself, B. C. 491. In 485, through the influence of the aristocratical party at Syracuse, he became sovereign there, and gave up Gela to his brother Hieron. He greatly increased the power and importance of Syracuse by his conquests and good government, and his aid was sought by the Greeks against Xerxes. A formidable invasion of the Carthaginians, however, detained him in Sicily, and he won a great victory over them near Himera on the day, it is said, either of the battle of Salamis or Thermopylæ. Died, B. C. 478. His memory was long held in honour at Syracuse.

GEMINIANI, FRANCESCO, an eminent musical composer, was born at Lucca, about 1680, and completed his studies under Corelli. In 1714, he came to London, and was patronized by George I. He published various compositions, and a work entitled, "Guida Armonica, or a sure Guide to Harmony and Modulation." Died, 1762.

GEMISTHUS PLETHO, GEORGE, philosopher and philologist, born at Constantinople. He was a zealous defender of the Platonists against the Aristotelians, and of the Greek Church against that of Rome. On going to the council of Florence, 1438, when he was at a very advanced age, his zeal and eloquence gained him the admiration of all. He contributed to the revival of Platonism, in Italy; and Cosmo de Medici, who was his constant auditor, determined to found at Florence an Academy for the study of the Platonic philosophy. He died in his native country, at the age of 101. His works are chiefly controversial and theological.

GENDEBIEN, JEAN FRANÇOIS, a distinguished Belgian, born in 1753; took part, in 1789, in shaking off the yoke of Austria; in 1790 was chosen deputy to the states-general, and in 1796 was chosen to represent the Belgian republic, when united with France, in the council of Five Hundred. This post, however, he did not accept. He was afterwards a member of the Legislative Body. In 1815 he was nominated one of the commission for drawing up the constitutional act, uniting Belgium and Holland as the kingdom of the Netherlands. As a member of the Second Chamber, he steadily opposed the arbitrary acts of the royal authority, especially those which emanated from Van Maanen, the minister of justice; and took a decided part in the revolution of 1831, by which Belgium again separated itself from Holland, and declared its independence. Died, 1838.

GENGIS-KHAN, or ZINGIS-KHAN, the son of a petty Mongolian prince, was born in Tartary, in 1163. After much intestine warfare with various Tatar tribes, this renowned conqueror was proclaimed Khan of the united Mogul and Tatar tribes. He re-

organized his army and made preparation to which he call. In 1210 he capital of which plundered several of the ambassadors sent to Turkestan, of that country, in 700,000 men; and Bokhara and Samanlaged, burnt, and mstroyed with them. of devastation for se though more than 6 in person, at the h against the king of shelter to two of his surrender them. A on plains of Ice, for which the king of feated, with the los glis-Khan, whose rav race, if we are to ac generated computation wards of 5,000,000 l by dint of successive territory extending Northern China, E whole of Tartary. GENLIS, STEPHAN de, celebrated for her born near Autun, i name was Ducrest c connection of her fa Aubin procured her years of age, as a chapter at Aix; from called La Comtesse married the Count de ringe she became niec tesson, who was priv duke of Orleans; and Chartres, chose her, in the education of his ch Madame de Genlis v "Adela and Theodor Castle," "The Theatr "Annals of Virtue," v pular. In 1791 she ca her pupil, Mademoisell their return to France both were ordered to q out delay. After som Switzerland, but were side there; and Gene tained them an asylum Clair. In 1800, she ret in 1805, Napoleon gave srsenal at Paris, and a of 5000 francs. On the bone, she seemed to fo and her love of republ stimulation for the rest her old pupil, Louis P throne, both he and his est attention to the con Genlis; and her pen wa to the last day of her ex amount altogether to They embrace nearly a

organized his army, published a code of laws, and made preparation for the course of conquest to which he professed he had a divine call. In 1210 he first invaded China, the capital of which was taken by storm and plundered several years later. The murder of the ambassadors whom Gengis-Khan had sent to Turkestan, occasioned the invasion of that country, in 1218, with an army of 700,000 men; and the two great cities of Bokhara and Samareand were stormed, pillaged, burnt, and more than 200,000 lives destroyed with them. He continued his career of devastation for several years; and in 1225, though more than 60 years old, he marched in person, at the head of his whole army, against the king of Tangut, who had given shelter to two of his enemies, and refused to surrender them. A great battle was fought on plains of ice, formed by a frozen lake, in which the king of Tangut was totally defeated, with the loss of 300,000 men. Gengis-Khan, whose ravages had cost the human race, if we are to accept the perhaps exaggerated computation of Eastern writers, upwards of 5,000,000 human beings, became, by dint of successive victories, monarch of a territory extending 1500 leagues, including Northern China, Eastern Persia, and the whole of Tartary. He died in 1227, in the 64th year of his age, and in the 52nd of his reign: having, before his death, divided his immense territories between his four sons.

GENLIS, STEPHANIE FELICITÉ, Countess de, celebrated for her literary talents, was born near Autun, in 1746. Her maiden name was Ducrest de St Aubin, and the connection of her family with that of St Aubin procured her admission, at four years of age, as a canoness into the noble chapter at Aix; from which time she was called La Comtesse de Laney. At 17 she married the Count de Genlis. By this marriage she became niece to Madame de Montesson, who was privately married to the duke of Orleans; and his son, the duke de Chartres, chose her, in 1782, to superintend the education of his children. At that period, Madame de Genlis wrote several works, "Adela and Theodore," "Evenings at the Castle," "The Theatre of Education," and "Annals of Virtue," which were highly popular. In 1791 she came to England with her pupil, Mademoiselle d'Orleans; and on their return to France, the following year, both were ordered to quit the country without delay. After some time, they went to Switzerland, but were not permitted to reside there; and General Montesquieu obtained them an asylum in the convent of St Clair. In 1800, she returned to France; and in 1805, Napoleon gave her apartments in the arsenal at Paris, and allowed her a pension of 5000 francs. On the return of the Bourbons, she seemed to forget her old patron, and her love of republicanism gave way to admiration for the restored dynasty. When her old pupil, Louis Philippe, ascended the throne, both he and his family paid the kindest attention to the comforts of Madame de Genlis; and her pen was actively employed to the last day of her existence. Her works amount altogether to nearly 90 volumes. They embrace nearly all subjects, and are

characterized by fertility of imagination and a pleasing style. Died, 1830.

GENNARI, CESARE and BENEDETTO, Italian painters, who were the nephews and disciples of Guercino. After working together some years, Cesare established himself at Bologna, and Benedetto came to England, where he became painter to James II., on whose expulsion he returned to Italy. He died in 1715, aged 82.

GENOVESI, ANTONIO, an Italian philosopher and metaphysician, was born at Castiglione in 1712. He read lectures in philosophy at Naples with great reputation for some time; but at length he was attacked by numerous enemies for publishing his metaphysics, in which he recommended the works of Galileo, Grotius, and Newton. The king of Naples, however, protected him, and made him professor of political economy and moral philosophy in the Neapolitan University. He was the author of "Elements of Metaphysics," "Philosophical Meditations on Religion and Morality," a "System of Logic," and "Lessons on Commerce," the last of which had the charm of novelty in Italy, and excited much interest. Died, 1769.

GENSERIC, king of the Vandals, succeeded his brother Gunderic A. D. 428. In the following year, on the invitation of Bonifacius, the Roman governor of Africa, he passed from Spain into that province. He soon quarrelled with Bonifacius, defeated him, and besieged him in Hippo. After a siege of 14 months, during which the great Augustine died in the city, it was taken and burnt. In 439 Genseric became master of Carthage, and of the most fertile parts of North Africa. Genseric was an Arian, and banished all the Catholic bishops from his dominions. He formed a powerful fleet, ravaged the coasts of Sicily and Italy, and in 455 entered Rome, which was plundered for 14 days. The bishop Leo went out to intercede with him, and was treated with respect. Genseric's power was firmly enough established to resist two great attempts, by the western and eastern emperors to overthrow it. He continued to ravage the coasts of Italy and Sicily, but made peace with Zeno in 475. Died at Carthage, after a reign of forty-eight years, A. D. 477. He is charged with having persecuted the Catholics with great cruelty.

GENSONNÉ, ARMAND, distinguished in the French revolution, was born in 1758. He was one of the best and most eloquent of the Girondist party, who struggled first to save Louis XVI., and next to arrest the sanguinary violence of Robespierre and the Jacobins, by which they were finally overwhelmed. The 10th of August, 1792, which established the republic on Louis XVIth's destruction, was fatal to Gensonné; for Robespierre then became paramount, and never forgave his bitter witticisms on him. Gensonné refused to fly, and he and his 21 Girondist colleagues were guillotined, on the 31st October, 1793. A tranquil heroism characterized his death. "Respect the laws," he said, "my countrymen, while you reject tyrants."

GENT, THOMAS, a native of York, and by trade a printer in that city. He was author

of "An Ancient and Modern History of York," "The History of Kingston-upon-Hull," and other similar publications. Born, 1691; died, 1778.

GENTZ, FRIEDRICH VON, a distinguished publicist, and an uncompromising antagonist of revolutionary France, was born at Breslau, 1774; studied at Königsberg; and after a short sojourn in England, where he gained the goodwill of Pitt, he repaired to Vienna in 1803, where he entered into the Austrian civil service, under the most favourable auspices and hopes. Here his skilful and facile pen was soon turned to account. His able manifestoes and pamphlets proved almost as formidable obstacles to the invasions of Napoleon as the combined forces that opposed him; and Austria and Prussia hastened to do honour to the man who could so vigorously support their views and defend their cause. He was appointed one of the secretaries at the Congress of Vienna in 1814, and at Paris in 1815, and he took an active part in the various congresses that sprung out of the restoration. A selection from his various works, comprising political questions, a "Life of Mary, Queen of Scots," and numerous articles written for the *Journal Historique*, was published in 1838. Died, 1832.

GEOFFREY OF MONMOUTH, a British historian who flourished in the 12th century. He was a native of Monmouth, became its archdeacon, and was raised to the see of St Asaph; but, in consequence of the disturbed state of the north of Wales, he left his bishopric, retiring at first to the monastery of Abingdon, and then taking up his abode at the court of Henry II. His chief work, which is entitled "Chronicon sive Historia Britonum," is full of legendary tales, and has very little historical value.

GEOFFROY SAINT-HILAIRE, ETIENNE, a distinguished zoologist and comparative anatomist, sprung from a family well-known in science, was born at Etampes, 1772. He was originally destined for the church, but he preferred dedicating himself to science, a taste for which he had imbibed from the instructions of Brisson, at the college of Navarre, and in the company of Haüy, his colleague, at the college of Cardinal Lemoine. During the massacres of September, 1792, he saved, at the risk of his life, several priests, and among others Haüy, who had been imprisoned for recusancy. This act of devotion so endeared him to his teachers, especially Daubenton, that he was, through their instrumentality, in 1793, appointed to an office in the *Jardin des Plantes*, where he founded the vast zoological collections, which are one of the glories of Paris. In 1798 he accompanied the great scientific expedition to Egypt, explored all the conquered countries, and was one of the founders and most active members of the Institute, of which he afterwards became professor. In 1808 he went on a scientific mission to Portugal; in 1815 he was a member of the Chamber during the Hundred Days; but, on the return of the Bourbons, he retired from political life, and thenceforward devoted himself solely to study. The great merit of Geoffroy Saint-Hilaire as

a naturalist consists in his discovery of the law of unity that pervades the organic composition of all animal bodies—a theory glanced at by Buffon and Goethe; and in his having founded the theory of "Analogues," or the method by which the identity of organic materials is determined in the midst of all their transformations. With him too originated the doctrine of "development," which found a supporter among ourselves in the author of the "Vestiges of the Natural History of Creation." His chief works are "Histoire Naturelle des Mammifères," "Philosophie Anatomique," "Principes de la Philosophie Zoologique," "Etudes Progressives," &c. Died, 1844. His "Life, Works, and Theories" has since been published by his son, the subject of the following notice.

GEOFFROY SAINT-HILAIRE, ISIDORE, a distinguished French zoologist, son of the preceding, was born at Paris, in 1805. He was appointed, at the age of nineteen, assistant-naturalist to his father, and five years later graduated M.D. In 1830 he commenced his career as lecturer for a course on ornithology; taught, for several years, zoology at the Royal Athenæum, and was received at the Academy of Sciences in 1833. He became inspector of the Academy of Paris in 1840, soon after succeeded his father in his chair at the Museum, was named successively inspector-general of the university of Paris, member of the council of Public Instruction, and, in 1860, professor of zoology. Among his later labours was the establishment of the Acclimatization Society. His principal works are "Histoire générale et particulière des Anomales de l'Organisation chez l'Homme et les Animaux;" "Essais de Zoologie générale;" "Vie, Travaux, et Doctrine Scientifique d'Etienne Geoffroy Saint-Hilaire;" "Histoire Naturelle générale des Règnes Organiques;" and "Acclimatation et Domestication des Animaux utiles." He also wrote a large number of Memoirs on zoology, anatomy, &c., for the principal scientific journals of France. Died, November, 1861.

GEORGE, LEWIS, I., king of Great Britain, was the son of Ernest Augustus, elector of Hanover, by Sophia, daughter of Frederick, elector-palatine, and grand-daughter of James I. He was born in 1660; was trained to arms under his father; married his cousin, Sophia Dorothea, daughter of the duke of Zell, in 1682; served in three campaigns with the emperor's army against the Turks in Hungary; and succeeded to the electorate in 1700. In 1706 he was created duke of Cambridge, and succeeded to the throne of England on the death of Queen Anne, in 1714. The next year a rebellion broke out in Scotland, in favour of the Pretender, but this was soon entirely quelled, and several of the leaders lost their lives on the scaffold. The new family, however, was by no means popular; and the Whigs, with a view to support it, introduced septennial parliaments; while the king, who probably considered the British crown precarious, endeavoured to increase his continental power by the purchase of Bremen and Verden. This involved him in a quarrel with Charles XII.

of Sweden, who, after Peter, meditated in favour of the Pretender Charles XII., in alarm. The same was supported by Spalding Alberoni, had a quadruple alliance. This was met on the sailing of a naval George Byng, who Spanish fleet, and Sardinia, which then in 1720 the famous was the source of sands of families, disturbances, that to visit his Germanly recalled. I lands, and was joined by obtaining various success fully defeated by the at Culloden, in 1746. the king received numer

of Sweden, who, in conjunction with the czar Peter, meditated an invasion of Scotland in favour of the Pretender; but the death of Charles XII. in 1717, put an end to this alarm. The same project was afterwards supported by Spain, whose minister, Cardinal Alberoni, had formed the celebrated quadruple alliance to carry it into effect. This was met on the part of England by the sailing of a naval expedition under Sir George Byng, who nearly destroyed the Spanish fleet, and recovered Sicily and Sardinia, which the Spaniards had seized. In 1720 the famous "South-sea Bubble" was the source of great calamity to thousands of families, and produced such disturbances, that the king, who had gone to visit his German possessions, was suddenly recalled. In 1722 a new conspiracy against the government was discovered, but no serious result occurred from it. In 1725 a treaty between Spain and the emperor excited the jealousy of the king, who deemed it necessary to counteract it by another between Great Britain and most of the other European powers. The Spaniards then commenced the siege of Gibraltar; but all disputes being arranged by negotiation, the British monarch set out on a journey to the continent, where he was seized with a paralytic attack, and died at Osnaburg, June 11th, 1737, in the 68th year of his age, and the 13th of his reign. George I. was plain and simple in his taste and appearance; though grave and sedate in public, he was gay and familiar with his intimates, combining a good share of sense with natural prudence, and showing much skill in the management of his hereditary dominions. His marriage was an unhappy one, and he had repudiated his wife many years before his death.

GEORGE AUGUSTUS, II., son of George I. was born in 1683; married, in 1705, the Princess Caroline, of Brandenburg-Anspach, who died in 1737; came to England with his father at the accession of the latter; was created prince of Wales; and in 1727 succeeded to the throne. The country was at this time in the most flourishing condition both at home and abroad, and had a powerful influence in all the courts of Europe, Spain excepted, with which country we were at war; but peace was restored in 1729. At length, owing to an infraction of the treaty of Seville by the Spaniards, and their repeated encroachments on our foreign trade and settlements, war was declared against Spain in October, 1739; and Admiral Vernon was sent with a squadron to the West Indies, where he demolished Porto Bello, but failed in his attempt on Carthagena. In 1743 the king headed his army on the continent, and gained the battle of Dettingen against the French, Lord Stair commanding under him. No English sovereign has since led an army in person in the field. In 1745 the Pretender's eldest son, Charles Edward Stuart, called the young Pretender, landed in the Highlands, and was joined by several clans. After obtaining various successes, the rebels were finally defeated by the duke of Cumberland, at Culloden, in 1746. During these events the king received numerous demonstrations

of attachment to his person and family; and it was obvious that the majority of the nation were satisfied that, by supporting the House of Hanover, they, in fact, maintained the interests of civil liberty. In 1748, the war, which had produced no good to England, was concluded by the treaty of Aix-la-Chapelle. In 1751 died, universally lamented, Frederick, prince of Wales, between whom and his father there never was any cordiality. In 1755 war broke out between England and France, which was at first very unpromising; but soon after Mr Pitt (first earl of Chatham) took the helm of state, public affairs wore a different aspect. In 1758 two treaties were entered into between England and Prussia, for granting subsidies to Frederick the Great, then engaged in the Seven Years' War. A similar treaty was concluded in 1759. The French power was nearly destroyed in the East Indies. In America, Louisbourg was taken; and the capture of Quebec was followed by the conquest of Canada. The island of Guadaloupe and the settlement of Senegal were taken by the English. Admiral Hawke defeated the French fleet under Conflans, and the British flag waved triumphant in every part of the world. Amid these successes, George II. died suddenly, Oct. 25, 1760, in the 77th year of his age, and the 33rd of his reign. He was a plain, blunt man; of an ingenuous disposition, but hasty, obstinate, and parsimonious; and wholly regardless of science or literature. Still he was not unpopular; and dying in the midst of a successful war, the blaze of national glory would have been strong enough to eclipse his personal defects, had they even been more glaring. The history of this reign is included in Lord Mahon's (Earl Stanhope's) "History of England from the Peace of Utrecht."

GEORGE III., king of Great Britain, eldest son of Frederick, prince of Wales, and grandson of George II., was born June 4, 1738, being the first sovereign of the Hanoverian line that could boast of England as the place of his birth. On the death of his father, in 1751, his education was intrusted to the earl of Harecourt and the bishop of Norwich; though he was greatly indebted to the princess-dowager, his mother, for the formation of his mind and character. He ascended the throne on the death of his grandfather, in 1760: his reputation was unspotted, and the first speeches he delivered to his council and parliament were hailed as signs of a patriotic regard for the liberties of the people, over whom he was destined to rule. A prosperous war had made the existing administration popular, and no change was thought necessary; but when Mr Pitt resigned, the earl of Bute, who had long maintained confidential relations with the princess-dowager, and possessed great influence with the king, was made prime minister. On the 8th of September, 1761, the king married the Princess Charlotte of Mecklenburg-Strelitz. The new administration having entered into negotiations with France and Spain, preliminaries of peace were signed Nov. 3, 1762, at Fontainebleau. In 1763, the country was kept in continual agitation by political pamphlets and libels of various

the measure, the ministers allowed a tacit understanding to prevail, that it would be followed by certain political concessions. George III., however, could never be persuaded that he could admit the Catholics to political power, without violating the spirit of his coronation oath; and the consequence of which was, the retirement from office of Mr Pitt and his colleagues in 1801, and the formation of a new ministry, headed by Mr Addington. Negotiations were now speedily entered into, which led to the treaty of Amiens. The king, however, consented to it with great reluctance. It was, in fact, very unpopular; and when the resumption of hostilities took place in 1803 there was an evident demonstration of public satisfaction throughout all ranks. The Addington administration proved incompetent to their task, and Mr Pitt, in 1804, again took the helm of state; but he died in 1806, and the Grenville party, which Fox had joined, went into office. In 1807, Lord Grenville and his colleagues attempted to change the king's opinions with regard to Catholic emancipation; but his majesty was inflexible, and declared, "that although he had firmness sufficient to quit his throne and retire to a cottage, or place his neck on a block, if his people required it, yet he had not resolution to break the oath which he had taken in the most solemn manner at his coronation!" This led to the ejection of the Fox and Grenville party, and the Percival administration succeeded them. On the 25th of October, 1809, the king commenced the 50th year of his reign, and a jubilee took place on the occasion. The rapid decay of the king's sight at this period was very apparent, and considerably affected his spirits; and the death of his youngest and darling child, the Princess Amelia, which happened towards the close of 1810, gave him a shock from which he never recovered. His insanity returned, and, early in December, it assumed so violent a character, that but slight hopes were entertained of his recovery. A regency bill was therefore passed, similar to that proposed by Mr Pitt in 1788. The remaining years of the king's life are little more than a blank in biography, for his lucid intervals were "short, and far between;" but it is said that in 1814, when the allied sovereigns visited England, he evinced indications of returning reason, and even expressed a wish to see the royal visitors—a wish which it was not deemed proper to indulge. At length deafness was added to his other calamities, and his manner and appearance are described as pitiable in the extreme. On the 17th of November, 1818, the queen died; but the king never became acquainted with her death, or with the subsequent appointment of the duke of York to the office of custos of his person. At the latter end of 1819, his appetite began to fail, his weakness rapidly increased, and on the 29th of January, 1820, he breathed his last, in the 82nd year of his age, and the 60th of his reign. The political character of George III. may be deduced from the course of policy pursued during his long and eventful reign, for no limited monarch ever had a more decided influence on public affairs. He lived in perilous times,

when thrones and states tottered around him; but he was firm and consistent; and, rather than give up any opinion he had conscientiously formed, or deviate from what appeared to him to be the strict line of duty, though it were to mount the scaffold. If his obstinacy were censurable on some occasions, his unflinching firmness, even in the face of danger, was admirable on others. His deportment as a father and a husband accorded with the strictest notions of propriety; and the morality and decorum of his court afforded a happy contrast to the profligacy of many others. He was religious, temperate, and sincere; and, in all his tastes and amusements, so plain and practical, that he may be said to have approached almost to patriarchal simplicity. He was particularly fond of music, and afforded encouragement to its professors. He granted a charter to the Royal Academy, knighted its first president, Reynolds, and patronized his successor, West, who, in the course of thirty years, painted sixty-four pictures for the king, and received of science by the encouragement he gave Herschel, and other men eminent for their professional attainments. There is a "History of England during the Reign of George III.," by W. Massey, in 4 vols. 8vo, and a work entitled "The Court and Cabinets of George III.," edited by the duke of Buckingham. The "Constitutional History of England, since the Accession of George III.," by T. E. May, C.B., is in course of publication; and the "Correspondence of George III. with Lord North" (1769-82), from the Royal Library at Windsor, edited, with Notes and Introduction, by W. B. Donne, is announced for publication. (Dec. 1865.)

GEORGE AUGUSTUS FREDERIC, IV., king of Great Britain, &c., the eldest son of George III. by Queen Charlotte, was born Aug. 12, 1762. His education, together with that of his brother Frederic, was intrusted to Dr Markham, subsequently archbishop of York, with the assistance of Dr Cyril Jackson, as sub-preceptor; and after 1776, to Dr Hurd, bishop of Worcester, and Mr Arnold of St John's College, Cambridge. The prince was by no means deficient in natural abilities; and under his tutors he acquired a competent knowledge of literature and science. Nor was the ornamental part of education neglected; and, as he possessed a handsome person, buoyant spirits, and agreeable manners, he soon became the idol of the world of fashion, and attained considerable popularity. But great as his talents might be, his love of dissipation, which preys on the intellect while it debases the heart, was still greater. Up to his eighteenth year, the prince had been restricted as much as possible to the society of his relatives and tutors; but he now associated with the Whig nobility, and formed political connections with Lord Moira, Fox, Sheridan, &c., while he figured in the annals of intrigue as the protector of the beautiful and accomplished Mrs Robinson. This lady, three years older than the prince, had first attracted his notice when performing Perdita, in the Winter's

Tale. Other illicit loves succeeded, and were followed by a more permanent connection with Mrs Fitzherbert, a widow lady of good family, and a professed Catholic. A private marriage took place, which not only seriously displeased the king, but also became the subject of public animadversion; such a contract being a violation of the act of settlement, and of the more recent royal marriage act. His dissipated mode of life, and the building of Carlton House, had loaded the prince with a debt of more than £230,000 sterling, his annual income being at this time £30,000. He adopted a variety of expedients to raise funds for the satisfaction of his creditors; all of which having apparently proved fruitless, he, at length, applied to his majesty. The king refused to afford him any aid. He therefore adopted a system of retrenchment, sold off his stud of racing horses, discharged many of his servants, and intimated his resolution of living in a state of retirement, so that he might be enabled to liquidate his debts. At length, in 1787, his ease was brought before parliament; and the king having announced his intention of adding £10,000 per annum to his son's income out of the civil list, the house voted £161,000 to satisfy the prince's creditors, and £20,000 for the completion of Carlton House. This for a time patched up his credit; but his habits of expense frustrated all hopes of his living within his income. A sumptuous residence had been prepared for Mrs Fitzherbert at Brighton, which place he had previously raised into fashionable importance, by making it his usual place of abode during the summer. Many demireps of fashion fluttered round him, and shared his attentions, the most notorious of whom was the countess of Jersey. Yet in the midst of his dissipation many traits of noble-mindedness were seen; and hopes were entertained that the blandishments of beauty would ere long cease to lead him astray. The king and his ministers were anxious that the heir-apparent should marry; but he had a great aversion to a royal union, and even said that he would forfeit his right to the throne rather than agree to it. At length, being encumbered with debts, he was induced by the conditional promise of their liquidation, together with an increase of his income, to consent to a match with his cousin, the Princess Caroline Amelia Elizabeth, daughter of the duke of Brunswick. She arrived in this country, April 5, 1795; their marriage was celebrated on the 8th, and on the following day they proceeded to Windsor, whither they were accompanied by Lady Jersey, for whose establishment in his household the prince had peremptorily provided. The princess discovered by degrees the whole of the mortifying circumstances—his debts and dissipation, his reluctant consent to the marriage, and the true object of it,—and, lastly, the neglect with which he treated her, while he lavished his caresses on others. The princess of Wales gave birth to a daughter (the Princess Charlotte) in January, 1796; and the prince, shortly after, sent her proposals for a separation, to which she promptly acceded. Little else occurred

to disclose to the public their mutual aversion till the year 1804, when the right to the guardianship and charge of their daughter was maintained on both sides with much acrimony. The result was that George the Third undertook the care of the young princess, and her mother retired to a private residence at Blackheath, where she remained, subject to many indignities and suspicions, till she quitted the country in 1814.

When Napoleon threatened England with an invasion, the prince, then only colonel of a regiment of dragoons, while his brothers were generals, and the duke of York was commander-in-chief, desired to be placed in a more ostensible situation; but the ministry coolly declined his request. In consequence of George the Third's mental derangement, the prince was appointed regent in February, 1811. The state of public affairs had long been critical; but our repeated victories in the Peninsula had rendered the prospect more cheering; and, at length, its final abandonment by the French, and the failure of Napoleon's invasion of Russia, made way for the restoration of Louis XVIII, who declared himself indebted for his crown, under God, to the prince regent of England. Soon after (in 1814), the prince received a visit from the emperor of Russia, the king of Prussia, and other foreign princes, heroes, and statesmen, whom he entertained with dignified hospitality. In May, 1816, his daughter, the Princess Charlotte, was united to Prince Leopold of Saxe Coburg (late king of Belgium); and when, in the following year, she died, it threw her father into such a paroxysm of grief, as to bring on a serious illness. Notwithstanding that the war had been splendidly terminated, peace did not bring with it its usual attendant, plenty; a spirit of discontent, for several years, pervaded a large mass of the people; and an unsuccessful attempt was made on the life of the prince regent, as he was going to Westminster, January 28, 1817, to open the session of parliament. In 1819 and 1820, very serious riots occurred in the large manufacturing towns; and in the metropolis, a few desperate men, known afterwards as the Cato Street conspirators, were tried and executed for plotting to assassinate the prince and the leading members of the administration. On the 29th of January, 1820, George IV. succeeded to the throne on the death of his father; and was crowned in Westminster Abbey, with great pomp, July 19, 1821. Previous to this, a process was instituted in the House of Lords against the queen, for the purpose of depriving her of her rights and privileges as queen of England. (See CAROLINE.) In the August of 1821, the king visited Ireland; in September he went to Hanover; and in 1822, he paid a similar visit to Scotland. On his return he sent the duke of Wellington to the congress of Verona; and, at the earnest solicitation of Lord Liverpool, he appointed Mr Canning to succeed Lord Londonderry as secretary of foreign affairs, although Canning's opposition to the proceedings against the queen had greatly offended him. Lord Liverpool still continued premier, but the new secur-

tary introduced effected the success of the Holy Alliance. Liverpool became and Mr Canning, but in less than a year he died, and his rich succeeded him; only till the following of the leading T. Wellington at the The most remark part of the reign of for abolishing the th Roman Catholic. During the latter king had suffered other infirmities of out of his own cir his courts entirely aced by the whole occlusion at the roy for a long time. a length, on the 26th vessel burst in his instantly expired, f is death." As regent IV. held the sceptre years. Notwithstan extravagant habits of hood, we must not redeeming qualities kind and generous; marked with acts of that he encouraged country; and that patron of our public for charitable object ment of science. The Reign of George IV. ingham.

GEORGE, PRINCE of Queen Anne, was one of the sons of T mark, and married London, in 1683. At over to the prince of after naturalized and When Anne succeeded George was named a high admiral, but his pacity left him with affairs. He died at K GEORGE GADOU GERANDO, Baron writer on philosophy at Lyons, 1772; education took part in 1793 in the city against the troop was forced to flee in c 1796, and was pres Zurich, 1799. But in he had found time to for his "Comparative H of Philosophy" (first tract, and gradually au it extended to eight vo notice of Lucien Buonap secretary-general to the venor in 1804; and in Napoleon to Italy, wh some years endeavouri French system of adm of his life was spent e

tary introduced more liberal measures, and effected the secession of England from the Holy Alliance. In April, 1827, the earl of Liverpool became incapacitated for office, and Mr Canning was appointed premier; but in less than four months this enlightened and popular minister died. Lord Goderich succeeded him; but he retained office only till the following January, when most of the leading Tories, with the duke of Wellington at their head, returned to power. The most remarkable event in the latter part of the reign of George IV. was the bill for abolishing the political disabilities of the Roman Catholics, passed in April, 1829. During the latter period of his life the king had suffered much from the gout and other infirmities of age; he was seldom seen out of his own circle; till at length he held his courts entirely at Windsor, and passed nearly the whole of his time in comparative seclusion at the royal cottage. He lingered for a long time, and suffered greatly; at length, on the 26th of June, 1830, a blood-vessel burst in his stomach, and he almost instantly expired, faintly exclaiming "This is death." As repent and sovereign, George IV. held the sceptre of Great Britain twenty years. Notwithstanding the dissipated and extravagant habits of the king's early manhood, we must repeat that he had many redeeming qualities; that he was naturally kind and generous; that his whole life was marked with acts of private benevolence; that he encouraged the literature of his country; and that he was the munificent patron of our public institutions, whether for charitable objects, or for the advancement of science. There is a "History of the Reign of George IV.," by the duke of Buckingham.

GEORGE, PRINCE, of Denmark, consort of Queen Anne, was born in 1653. He was one of the sons of Frederick III. of Denmark, and married the Princess Anne, at London, in 1683. At the revolution he went over to the prince of Orange, and was soon after naturalized and made an English peer. When Anne succeeded to the throne, Prince George was named generalissimo and lord high admiral, but his indolence and incapacity left him without any influence on affairs. He died at Kensington, in 1708.

GEORGE CADOUAL. [CADOUAL.]

GERANDO, Baron de, a distinguished writer on philosophical subjects, was born at Lyons, 1772; educated by the Oratorians, took part in 1793 in the defence of his native city against the troops of the Convention, was forced to flee in consequence, returned in 1796, and was present at the battle of Zurich, 1799. But in the heart of the camp he had found time to cultivate literature; for his "Comparative History of the Systems of Philosophy" (first published as a small tract, and gradually augmented till, in 1847, it extended to eight volumes) attracted the notice of Lucien Buonaparte, who made him secretary-general to the minister of the interior in 1804; and in 1805 he accompanied Napoleon to Italy, where he remained for some years endeavouring to introduce the French system of administration. The rest of his life was spent chiefly in promoting

schemes for the moral and physical improvement of the people. In 1837 he was raised to the peerage. Died, 1842.

GERARD, FRANÇOIS, a French historical painter, of the highest merit. He became, at the early age of 14, a pupil of the celebrated David, and is thought by many to have equalled, if not surpassed, his master. His first and also one of his most celebrated works was the picture of "Bellairia." His "Entrance of Henry IV. into Paris" is probably his masterpiece. Among his other works are the "Battle of Austerlitz," "Psyche," "Thetis," and a large number of portraits of distinguished men. Gérard was the greatest portrait-painter of his time in France. His studio was visited in 1814 by the emperors of Russia and Austria, and the king of Prussia. He was first painter to Louis XVIII., member of the Institute, and of the Legion of Honour, &c. Born, 1770; died, 1837.

GERARD, LOUIS, an eminent French physician and botanist, born in 1733. He was distinguished for his researches in various branches of natural science; and he first proved the natural affinities of plants, in his "Gerardi Flora Gallo-Provincialis." Died, 1819.

GERARD, MAURICE ETIENNE, Count, marshal of France, was born in 1773. He entered the army at the age of 18, and soon after was made aide-de-camp to Bernadotte. He served at the battles of Austerlitz and Wagram, in the Peninsula, and in the expedition to Russia, in which he greatly distinguished himself. He took part in the campaigns of 1813, 1814, and 1815, and was severely wounded at Leipzig. He was created marshal in 1830, and held for a short time the portfolio of war. Two years later he besieged and took the citadel of Antwerp; held the office of first minister in 1834, and died in 1852. He had been a member of the Legion of Honour since 1805, and was made Grand Chancellor four years before his death.

GERARD, JEAN IGNACE ISIDORE, best known by his assumed name GRANDVILLE, a celebrated French caricaturist and book-illustrator, was born at Nancy about 1803. He first made himself known by the publication of his "Métamorphoses du Jour," in 1828. Compelled by the censorship to abandon the field of political caricature, he applied himself with great success to designing for the illustration of books; and among those to which he gave fresh charms are Robinson Crusoe, Gulliver's Travels, Fontaine's Fables, &c. The loss of several of his children in rapid succession deprived him of health and reason, and he died in 1847.

GERARD DOUW. [DOUW.]

GERARD THOM, or TENQUE, founder of the order of St John of Jerusalem, was born at Amalfi, about the year 1040. He first visited Jerusalem for commercial objects; but about 1100 he assumed the religious habit, and associated with others, who took the vows of chastity, poverty, and obedience; the object of their institution being to defend Christian pilgrims in their journey to and from the Holy Land. Thus arose the powerful order of knights hospitallers of St John, who afterwards became the knights of Malta,

and acquired such distinguished fame. Died, about 1120.

GELARDE, JOHN, an English botanist and surgeon, born at Nantwich in Cheshire, in 1547, and died in 1607. He was the author of "Catalogus Arborum, Fruticum, et Plantarum," and the "Herbal, or General History of Plants," a work which contributed to diffuse a taste for botany.

GERARDS, or GARRARD, MARK, a painter of Bruges, was born in 1561. About 1580 he came to England, and was appointed painter to Queen Elizabeth. He was eminent in history, portraits, and landscapes; and died in 1635.

GERBERT, MARTIN, a celebrated writer on music, born in the Austrian states in 1720. He was prince-abbot of St Blaise, a Benedictine abbey, in the Black Forest; and was eminent for his knowledge of, and taste for, the fine arts, particularly music. He travelled throughout the continent for the materials of a work on the history of church music, and in 1774 it appeared under the title of "De Cantu et Musica Sacra a primâ Ecclesiæ Ætate usque ad presens Tempus." A still more valuable one, now very scarce, appeared in 1784, entitled "Scriptores Ecclesiastici de Musica Sacra potissimum." Died, 1793.

GERBERT. [SYLVESTER II.]

GERBIER, Sir BALTHAZAR, a painter, was born at Antwerp in 1592. He came to England with Rubens, and was knighted by Charles I., who made him his agent at Brussels, and employed him in different negotiations. At the Restoration he designed the triumphal arches for the reception of the king. Died, 1667.

GERBILLON, JEAN FRANÇOIS, a Jesuit missionary in China, born in 1654. He wrote "Observations on Great Tartary," and an account of his travels is inserted in Du Halde's History of China. He was in great favour with the emperor, for whom he composed the Elements of Geometry, and was his instructor in mathematics and philosophy. He was also allowed to preach the Christian religion in China, and finally became superior-general of the Jesuit mission in China. He died at Pekin in 1707.

GERLE, A. C., a French ecclesiastic, born in 1740, who in the states-general, in 1789, warmly adopted the popular cause. He subsequently advocated the pretensions of a would-be prophetess, named Suzanne, who proclaimed the political millennium; and in 1793, he was imprisoned as an accomplice of the pretended prophetess, Catharine Theos, who called herself the Mother of God, and was believed in and protected by Robespierre. Gerle lived to be employed in the office of the minister of the interior under the empire.

GERMANICUS CÆSAR, the son of Claudius Drusus Nero, and the younger Antonia, a niece of Augustus, was adopted by Tiberius, his paternal uncle. He was at the head of the Roman armies in Germany when Augustus died; and after gaining many great victories there, Tiberius, jealous of his nephew's glory, called him home under pretence of granting him a triumph. In order, however, to get rid of a man whose popu-

larity appeared dangerous, he sent him, invested with almost absolute power, into the east, where he died, under strong suspicions of being poisoned, A. D. 19, aged 34. His death was regarded at Rome as a public loss, and all the houses were closed on the day of his funeral.

GERSON, JEAN CHARLIER DE, chancellor of the university of Paris, was born at Gerson, near Rhetel, in 1365. He was educated at Paris, distinguished himself not only by his acquirements, but by his piety, honesty, and fearlessness, and suffered much persecution from the party of the Burgundians during the civil war. He became chancellor of the university and canon of Notre Dame. He took a leading part at the councils of Pisa and Constance; contributed to the deposition of Pope John XXIII.; maintained the superiority of the church over the pope, and the necessity of reforms; and zealously opposed John Huss. After the council of Constance he was obliged to live some years in Germany. His writings are numerous, and have frequently been reprinted. The "Imitation of Jesus Christ" was long attributed to Gerson, but erroneously, and the real author is still unknown. Died at Lyons, 1429.

GESENIUS, FRIEDRICH HEINRICH WILHELM, one of the most distinguished orientalisists of modern times, was born at Nordhausen, 1786. He was professor of theology at Halle; and during the 30 years that he lectured in that university, he published numerous works, which have made a new era in oriental literature. His "Hebrew Grammar" and many analogous productions enjoy a universal reputation, and some of them are translated into most European languages. Died, 1842.

GESNER, CONRAD, an eminent physician and naturalist, was born at Zurich in Switzerland in 1516, and was professor of natural history there for 24 years. His fame as a botanist was spread over Europe, and he maintained a correspondence with learned men of all countries. He wrote numerous able works on different branches of natural history; of which his "Historiæ Animalium" is reckoned his greatest performance, and procured him the appellation of the *Pliny of Germany*. His "Bibliotheca Universalis," a full catalogue of all writers extant in three languages, Greek, Latin, and Hebrew, is a monument of immense learning and industry. He otherwise rendered much service to science, and for his various and great merits he was ennobled. Died, 1665.

GESNER, SOLOMON, poet and painter, was born at Zurich in 1730. He was placed under a bookseller at Berlin, but soon ran away from his master, and employed his time in painting and poetry. On his return to Zurich he published his Idylls and Pastorals. He added to his reputation by the popular piece of "The Death of Abel," which appeared in 1758, and made his name known throughout Europe. He then published his "First Navigator," "Moral Tales," "Dramas," &c.; and afterwards turned his attention more particularly to painting and engraving, and produced several

GESSNER, JOHANN MATHIAS, a profound scholar and critic, was born at Roth, in Anspach, in 1691. His most esteemed works are, editions of some of the classics, and an excellent Latin Thesaurus, 4 vols. folio. Died, 1761.

GETA, SEPTIMIUS, second son of the emperor Severus, and brother of the infamous Caracalla, with whom he was associated in the empire on the death of his father. Caracalla, who envied his virtues and was jealous of his popularity, after having endeavoured to effect his death by poison, murdered him, and wounded their mother, who was attempting to save him. He was born A. D. 189, and had not reached his 23rd year when he was murdered.

GEZELIUS, GEORGE, a Swedish divine, and almoner to the king. He was the author of a "Biographical Dictionary of Illustrious Swedes." Born, 1738; died, 1789.

GERALDESCA, UGOLINO DELLA, immortalized in the "Inferno" of Dante, under the appellation of Count Ugolino, was a Neapolitan, who in the 13th century endeavoured to usurp the government of Pisa, and found a new principality, after the example of Della Scala at Verona. After a time he succeeded, but governed his countrymen with great despotism; and Roger d'Ubalini, the archbishop of Pisa, who was as cruel and ambitious as himself, formed a conspiracy against him; the result of which was, that Count Ugolino was attacked in his palace, and, after a brave resistance, taken prisoner, with three of his sons and one of his grandsons; all of whom were imprisoned, and left to die of starvation.

GHIBERTI, LORENZO, a distinguished Italian sculptor, was born at Florence in 1378. He learnt the goldsmith's art from his step-father, and applied himself also to the study of painting, so successfully that at the age of 16 he assisted in painting some frescoes in the palace of the Malatesta at Rimini. In 1401 he was the successful competitor for the execution of the bronze gate of the Baptistery at Florence, Brunelleschi, his only real rival, generously withdrawing from the contest. The gate, in twenty-eight panels, was not completed till 1424, and the same year Ghiberti undertook to set up in 1452. This was finished the reliefs on these famous gates drew from Michael Angelo the assertion that they were worthy to be the gates of paradise. During the progress of this, his chef-d'œuvre, Ghiberti executed many statues, reliefs, and pieces of goldsmith's work: a life and cope button for Pope Martin V., a casket, or reliquary of St Zenobius, for the Duomo of Florence, &c. He was for several years joint architect with Brunelleschi of the Duomo, but the engagement showed his incapacity as architect, and mercenary disposition. Died at Florence, 1455, and was buried in Santa Croce. Among his scholars and assistants of Ghiberti were two sons, Vittorio and Tommaso, Michelozzi and Antonio Pollajuolo. A copy of the Baptistery Gates is among the attrac-

tions of the Renaissance Court of the Crystal Palace.

GHIRLANDAJO, DOMENICO, one of the greatest Italian painters, was born at Florence in 1449. His family name was BIGORDI, and his father, it is said, was a jeweller, who had acquired the surname of GHIRLANDAJO, or Garland-maker. He was probably taught the goldsmith's art, but little is known of his early life. He is said to have been the pupil of Alesso Baldovinetti, who was a celebrated mosaicist as well as painter. The life and works of Ghirlandajo form one of the great landmarks in the history of Italian art. A mind of great creative power and large aims, he gathered up by patient study and thought the various lessons and essential elements of art, and presented them in a unity such as had only been seen previously in Giotto; whose works with those of Masaccio he carefully studied. He was a great master of composition, of form, proportion, and light and shade, and contributed greatly to the perfection of Florentine art. Among the finest works of Ghirlandajo are the frescoes in the public palace of Florence; the "calling of Peter and Andrew," in the Sistine Chapel; frescoes of the Sassetti Chapel, in Santa Trinita at Florence, representing scenes from the life of St Francis; the great series in the choir of Santa Maria Novella, completed in 1490; the Apotheosis of Christ in the Badia di Voiterra, and the Adoration of the Magi in the church of the Innocenti. Ghirlandajo was the master of Michael Angelo. Died about 1498. His brothers, David and Benedetto, assisted him in some of his works, and his son, Ridolfo, became an eminent painter, studying under Fra Bartolomeo, and enjoying the friendship of Raphael.

GHISI, GIOVANNI BATTISTA, also called BERTANO, and more frequently MANTUANO, from his birth-place, was born about 1500, and distinguished himself as painter, sculptor, architect, and engraver. He was a scholar of Giulio Romano, and head of a family of artists, like him called Mantuano. He was living in 1558.

GHISI, GIORGIO, called IL MANTUANO, a distinguished Italian engraver, was born at Mantua in 1524. He was son of the preceding, studied under him, and engraved many of the works of Michael Angelo, Raphael, and Giulio Romano; among them the "Last Judgment," and the "School of Athens." Living at Rome in 1578.—Other engravers of this family were ADAMO and DIANA, brother and sister of Giorgio.

GIAMBERTI, FRANCESCO, a Florentine architect of the 15th century, who made the designs for many buildings in Florence and Rome, composed a work containing drawings of ancient monuments of Greece and Rome.—His son, GIULIANO, was architect, sculptor, and engineer to the house of Medici; built a magnificent palace for the Grand-duke Lorenzo, besides many other palaces, churches, and fortresses, and was appointed, in 1514, architect of St Peter's at Rome. Born, 1443; died, 1517.

GIANNONE, PIETRO, an Italian historian, was born at Ischitella, in Apulia, in

1766, and became an advocate at Naples. He wrote a valuable "History of Naples," in 4 vols. 4to, which, for its dauntless exposure of papal usurpation, gave great offence to the court of Rome, and exposed him to its resentment. His book was prohibited, himself excommunicated, and, after having been driven into exile, he died at Turin, in 1748.

GIARDINI, FELIX, a Piedmontese musician, who in 1780 came to England, where he met with great encouragement, and remained about 30 years. He afterwards went to Russia, where he died in 1793.

GIBBON, EDWARD, the celebrated historian, was born at Putney in 1737; sent to Westminster School, but soon transferred to a private tutor; then to Magdalen College, Oxford, where he became a convert to the Romish Church, and finally to Lausanne, where he renounced the Catholic faith, without embracing any other, and became a confirmed sceptic. On returning to England, he entered upon the duties of active life, but read much, and prepared himself for authorship. In 1763 he went to Italy; and while sitting amidst the ruins of the capitol at Rome, he conceived the idea of writing the history of the decline and fall of that city. In the mean time, he joined M. Deyverdun, a Swiss scholar, in publishing a journal called "Mémoires Littéraires de la Grand Bretagne," which met with no success. In 1770 he began his celebrated history of the "Decline and Fall of the Roman Empire;" the 1st vol. of which, in 4to, appeared in 1776; the 2nd and 3rd in 1781; and the concluding 3 vols. in 1788. Previous to this undertaking Mr Gibbon was chosen member of parliament for Liskeard; and when hostilities commenced between this country and France, in 1778, he was employed to draw up the manifesto on that occasion, for which he was made commissioner of the Board of Trade, but lost the place on the change of administration in 1783. He then went to reside at Lausanne, where he continued till the French Revolution obliged him to return to England; and died in 1794. Mr Gibbon's great history abounds with proofs of immense learning, of a mind penetrating and sagacious, and of almost unrivalled talents for ridicule. His cold, unsympathetic, sarcastic manner of treating Christianity and the history of the Church excited, not without reason, both anger and regret among religious men, loud shrieks of alarm were uttered, and many passionate attacks were made on him. But Christianity and the Church survive his ridicule, and the history outlives the invectives of its fierce critics. No other proof of the substantial trustworthiness of the "Decline and Fall" is needed than the fact, perhaps unparalleled, that notwithstanding the very great advance made in historical studies and criticism during the present century, it still holds its place as the history of the period it embraces. It has been frequently reprinted, and is almost as well-known in other European countries as in England. Gibbon was author of various other works, but they need not be here particularized.

GIBBONS, GRINLING, an eminent sculptor and wood-carver, was born in London

about the middle of the 17th century. His flowers and foliage carved in wood have almost the lightness of nature; and he executed several fine pieces also in marble and bronze. He was employed by Charles II. to execute some ornamental work in St George's Chapel, Windsor, and in St Paul's Cathedral. He was similarly employed at the palace at Chatsworth. Among his other works are the wooden throne at Canterbury, the monument of Viscount Camden, at Exton, in Rutlandshire, the font in St James's Church, the statue of Charles II. at Chelsea Hospital, and the statue of James II. in Privy Gardens. He died in 1721.

GIBBONS, ORLANDO, an eminent musician, was born at Cambridge, in 1583. He became organist of the chapel royal at the age of 21, and in 1622 was created doctor of music. He was the best church composer of his time; and he also published some charming madrigals. Died, 1623. His two brothers and son were likewise good musicians; the latter, Dr Christopher Gibbons, was organist to Westminster Abbey.

GIBBS, JAMES, architect, was born at Aberdeen, in 1683. He designed the churches of St Martin's and St Mary-le-Strand, London; the senate-house, and the new buildings of King's College, Cambridge; the Radcliffe Library, Oxford, &c. Died, 1764.

GIBBS, SIR VICARY, chief justice of the Common Pleas, was born in 1752, at Exeter, in which city his father was a surgeon. He was educated at Eton, and King's College, Cambridge; entered at Lincoln's Inn; and, through the friendship of Mr Dunning, afterwards Lord Ashburton, he obtained briefs in abundance. On the death of Mr Richard Burke, he was appointed recorder of Bristol, and was soon distinguished as an eloquent pleader and an able advocate. The trials of Horne Tooke, Hardy, and others, for high treason, brought the talents of Mr Gibbs still more conspicuously before the public; and soon after he became king's counsel. He was also elected into parliament for the university of Cambridge; made chief justice of Chester; next solicitor, and afterwards attorney-general, with the honour of knighthood. In 1813, he was appointed a puisne judge of the Common Pleas; and, the year following, lord chief justice. After discharging the duties of this office about four years, he resigned it, at the end of 1818, on account of infirmities, and died in 1820.

GIBSON, EDMUND, a learned prelate and antiquary, who was born at Knipe, Westmoreland, in 1689. After receiving a grammatical education at a free school in his native county, he was sent to Queen's College, Oxford, where he applied particularly to the study of the northern languages. In 1692 he translated the Saxon Chronicle and published a new edition of Camden's Britannia: of his original works, the principal was his "Codex Juris Ecclesiastici Anglicani," in 2 vols. fol. In 1715, he was made bishop of Lincoln; was transferred to London in 1723, and died in 1748.

GIBSON, RICHARD, the dwarf, an English painter in the time of Sir Peter Leys, was in manner he studied. In his youth he was servant to a lady at Mortlake, who perceived

ing his taste for De Cleyn, for In Charles I., and wherd, who was aoured the weddingave away the stature, each m nine children, five of maturity, and Gibson died in 16 wife in 1709, at t

his remains were Abbey. Mr Gifford master of the band o with a salary of £30 he was comptroller a year. He also en Lord Grosvenor. H caustic and powerf vigorous and correct generally distinguis and good taste.

GIL, FATHER, a who took an active

ing his taste for painting, put him under De Cleyne, for instruction. He was page to Charles I., and when he married Anne Shepherd, who was also a dwarf, the king honoured the wedding with his presence, and gave away the bride. They were of equal stature, each measuring 3 ft. 10 in. They had nine children, five of whom arrived at years of maturity, and were of the usual stature. Gibson died in 1690 in his 75th year, and his wife in 1709, at the age of 89.

GIFFORD, WILLIAM, a celebrated critic and satirist, was born at Ashburton, Devon. His father, who was a plumber and glazier, at South Molton, died when he was 12 years old. The widow soon followed her husband to the grave; and the orphan was at first sent to sea in a coasting vessel, but shortly after apprenticed to a shoemaker in his native town. There he remained till he was in his 20th year: but being disgusted with his employment, and evincing talents of a superior order, Mr Cookesley, a surgeon of the town, proposed to some of the inhabitants to raise a subscription, with a view of purchasing his freedom, and giving him an education. This being effected, he was sent to Oxford, to pursue studies more congenial to his mind. While at the university he was fortunately introduced to the late Lord Grosvenor, who engaged him to accompany his son, Lord Belgrave, on his travels over the continent. On his return to England, he settled in London, devoting his time to literature; and thenceforward fortune smiled on his career. In 1791, he published "The Bayard," a poetical satire, in which he severely lashed the poets and poetasters of the day; and, in 1794, appeared "The Mæviad," a satire on the degraded state of the drama. In 1797, Mr Gifford became editor of the Anti-Jacobin, a weekly paper, established by Mr Canning, and others of brilliant talents and high connections; and in which a corner was reserved for the insertion of a critical notice of the misrepresentations displayed by contemporary editors—which it was Gifford's peculiar province to detect and expose. This publication, which continued only one year, involved him in a quarrel with Dr Wolcott, against whom he published a poetical squib, entitled "An Epistle to Peter Plindar." In 1802, appeared his translation of Juvenal; in 1805, an edition of Massinger's plays; and, subsequently, the works of Ben Jonson, Ford, and Shirley; but it was in his capacity of editor of the Quarterly Review (which he conducted from its commencement in 1809 till 1824), that he was most generally known. He died in 1828; and his remains were interred in Westminster Abbey. Mr Gifford held the office of paymaster of the band of gentleman pensioners, with a salary of £300 a year; and for a time he was comptroller of the lottery, with £600 a year. He also enjoyed an annuity from Lord Grosvenor. His poetical satires are caustic and powerful; his prose writings vigorous and correct; and his criticisms are generally distinguished by sound judgment and good taste.

GIL, FATHER, a Spaniard, born in 1748, who took an active part in the insurrection

of 1808; greatly contributed to the surrender of Baylen; and is generally supposed to have originated, or greatly promoted, the guerilla warfare carried on by order of the juntas of Seville and Cadiz, of which he was a member.

GILBART, JAMES WILLIAM, the eminent writer on Banking, was born in London, in 1794. He was of a Cornish family, became clerk in a London bank at the age of 19, cashier in a Birmingham bank in 1825, and about two years later manager of a branch of the Provincial Bank of Ireland. This post he quitted on being appointed manager of the London and Westminster Bank. On his retirement from that office in 1859 he was chosen a director of the company. During his clerkship, Mr Gilbert was an active member of the Athenian Debating Society and the Union Society, and was thus brought into association with John Stuart Mill, Lord Macaulay, Edward Baines, and other eminent men. His principal works are—"A Practical Treatise on Banking," first published in 1827; the "History and Principles of Banking," "The Logic of Banking," and "Logic for the Million." These works have attained a high place in their class, have passed through several editions, and are now (1865) being republished in a complete and uniform edition. Mr Gilbert was a fellow of the Royal Society. Died at London, August 8, 1863.

GILBERT, DAVIES, an eminent man of science, vice-president of the Royal Society, and member of numerous other learned and scientific societies, was born at St Erth, in Cornwall, 1767. His family name was Gliddy, but having in 1808 married the daughter of a wealthy Sussex gentleman named Gilbert, he assumed his name and arms in 1817. Endowed with large wealth, Mr Davies Gilbert did not content himself with aiding the advance of science by his own exertions, but took every opportunity of bringing forward talent from obscurity, and of affording its possessor those advantages which poverty might otherwise have denied him. He it was to whom Sir Humphry Davy mainly owed it, that his great talents were not lost to society in the obscurity of a Cornish apothecary's shop; and several less distinguished, but able and useful, men were equally indebted to him. He contributed several papers to the Transactions of scientific societies, and published "A Plain Statement of the Bullion Question;" but he seems to have been far less ambitious of bringing his own abilities before the public, than of indirectly exerting them for the public good. He represented the borough of Bodmin in parliament from 1806 to 1832. Died, 1840.

GILBERT, Sir HUMPHREY, an enterprising English navigator in the reign of Elizabeth, was born at Dartmouth, in 1539. He lost his father at an early age, and his mother married Mr Raleigh, by whom she became the mother of the celebrated Sir Walter Raleigh. Humphrey received his education at Eton and Oxford; after which he went, in a military character, to Ireland, where, for his services, he was knighted in 1570. He returned soon after to England, and married a rich heiress, but lost great part of his property in a joint speculation with Sir

Thomas Smith, for converting iron into copper. He published, in 1576, a discourse to prove the practicability of a north-west passage to China; and in 1578 he himself sailed on a voyage of discovery to the coast of America. In a second voyage, in 1583, he took possession of Newfoundland; but his ship foundered on her return to England, and all on board perished.

GILBERT, WILLIAM, an eminent English physician and natural philosopher, author of the first classical treatise on magnetism, was born at Colchester, in 1540. He studied at the English universities, graduated M.D. at a foreign university, and settled at London, where he attained considerable reputation, and was appointed physician to Queen Elizabeth, and afterwards to James I. His fame rests on his great and original work, entitled "New Physiology of the Magnet, and Magnetic Bodies, and the Earth as a great Magnet," which appeared in 1600. It was the fruit of thirty years' labour, and excited the highest admiration among his contemporaries. It is very frequently referred to by Humboldt in his "Kosmos," and is acknowledged to have a character of cosmical grandeur. It is asserted to contain all the fundamental facts of the science so fully examined that little has been added to them. Galileo and Erasmus gave the highest praise to Gilbert, while his great countryman, Bacon, was unjust to him. Gilbert was a fellow of the Royal College of Physicians, and died unmarried in 1603.

GILBERT OF SEMPRINGHAM, founder of the order of Gilbertines, also called the order of Sempringham, was born in Lincolnshire about 1084. He was of an illustrious family, and of a noble character. He entered the church, and was ordained priest; founded the order at Sempringham about 1148 or a little earlier; drew the statutes of his order partly from the rule of St Augustine and partly from that of St Benedict; was head of the monastery for some years, but resigned the government to one of his disciples, and died in 1189. He founded in his life-time 12 monasteries, besides that of Sempringham.

GILBERT FOLIOT, bishop of London in the latter half of the 12th century, distinguished himself as the dauntless antagonist of Becket. He was a good scholar, an ambitious churchman, and a man of pure, even austere morals. After holding the office of abbot of Gloucester, he was named bishop of Hereford, which see he held at the time of Becket's advancement to the primacy. He was soon after (1162) made bishop of London. When Becket entered the king's hall bearing the cross, Foliot remonstrated with him, and even strove with the aid of the bishop of Hereford to take it from him. Foliot was one of the ambassadors sent by Henry II. to Pope Alexander at Sens. He was twice excommunicated, as one of the king's councillors, by Becket, but made light of it, and even asserted that the primacy belonged of right to the see of London. On occasion of the king's doing penance at the tomb of the murdered primate at Canterbury, in July, 1174, Bishop Foliot preached to the people, vindicating the king's innocence. He wrote

a Commentary on the Song of Solomon, and died in 1187.

GILCHRIST, JOHN BORTHWICK, a distinguished orientalist, was born at Edinburgh, 1769. He was for many years professor of Hindostanee and Persian at the college of Calcutta, whence he returned to England with a large fortune, and he subsequently taught these languages in Edinburgh and London. His works gave a great impetus to the study of Eastern languages. Died at Paris, where he had long resided, 1841.

GILDAS, the reputed author of an early treatise entitled "De Excidio Britannie," containing a history of Britain from the incarnation to A.D. 560. He is usually supposed to have lived in the 6th century, but the accounts of him are mainly legendary, and nothing is certainly known of his country, parentage, period, or works. The work has been several times republished, and there are several English translations.

GILL, JOHN, a divine of the Baptist persuasion, was born at Kettering, in Northamptonshire, in 1697. His education was limited, owing to the humble circumstances of his parents; but, by application, he became a good classical and oriental scholar. He commenced as a preacher at Ilgham Ferrers, about 1716, from whence he removed to a congregation at Horsleydown, Southwark, in connection with which he remained till his death. He wrote many theological works, chiefly in defence of the Calvinistic system of doctrines, but his principal works were an "Exposition of the Bible," 10 vols. 4to, and a "Body of Divinity," in 3 vols. 4to. These books long held a high place in the school of theologians to which the author belonged. But they are not likely to escape the oblivion into which so many weighty tomes of the same class have fallen.

GILLIES, JOHN, L.L.D., F.R.S., historian, was born at Brechin, Forfarshire, Jan. 18, 1747, and received his education at the university of Glasgow. When a young man he went to London, with the view of making literature his pursuit, and was engaged as travelling tutor by the earl of Hopetown. He was appointed historiographer for Scotland on the death of Dr Robertson; and he continued his literary labours to a late period of his life. His chief works are, "A History of Ancient Greece," 4 vols. 8vo; "View of the Reign of Frederic II.," "History of the World, from Alexander to Augustus;" translations from Aristotle, Isocrates, &c. Died, Feb. 15, 1836, aged 90.

GILPIN, BERNARD, one of the English Protestant reformers, was born at Kentmere in Westmoreland, in 1517, and educated at Queen's College, Oxford, of which he became fellow. But he afterwards removed to Christchurch, where, by the preaching of Peter Martyr, he was led to embrace the principles of the Reformation. In 1556 he was presented by his uncle to the archdeaconry of Durham, and the rectory of Acheborough, where he laboured with truly apostolical zeal; and, in his capacity of archdeacon, made strict visitations, being a great enemy to non-residence and pluralities. He was next presented to the rectory of Houghton-le-Spring, where

his labours in prison were as remarkable as his labours as Bishop Bonner's stake in a fire for the north road, however, while the lady in Queen Mary died carried to the gallows. In the offered the blessing of the both, contending where he died, parishioners, in 1580, and glorious titles of and the Father of

GILPIN, WILLIAM, of England, and died in 1724, at Carlisle, Queen's College, years he kept a school and afterwards became the New Forest, and he died in 1804, and published the "Life of an ancestor, above-measure, Wickliffe, Huss, and an "Exposition of Observations relative Beauty," "Remarks, &c. He left the property for the endowment of

GILPIN, SAWREY, preceding, was born in 1700, and was placed with a school, which attracted market groups, which window. But it was a painter that he died, 1807.

GIL-POLO, CASPAR, advocate, was born at died there in 1572. He was an Enamorada," so famous, as combining and purity.

GILRAY, JAMES, a list, unrivalled in his humour and keen satire. Died, 1815.

GIL VICENTE, a 16th century, was plays, and excelled in fertility of invention. Portuguese Plautus, a creator of Spanish drama, was born at Barcellos, Evora, in 1537.

GINGUENÉ, PIERRE, historical and miscellaneous, at Rennes, in Britany, and obtained a small government, in which year, he associated himself moderate writers upon the subject, and narrowly escaped during the Reign of Terror appointed him ambassador to Bonaparte gave him a commission being removed from himself wholly to literature.

[GIO]

his labours in promoting the Protestant faith were so remarkable, that the sanguinary Bishop Bonner threatened to bring him to the stake in a fortnight, and sent a messenger into the north for that purpose. On the road, however, Mr Gilpin broke his leg, and while he lay in the hands of the surgeon, Queen Mary died; so that, instead of being carried to London, he returned to his parishioners. In the reign of Elizabeth he was vobship of the bishopric of Carlisle, and the proboth, contenting himself with Houghton, where he did, deeply lamented by his parishioners, in 1583. His piety, unwearied exertions, and benevolence, earned him the glorious titles of the Apostle of the North, and the Father of the Poor.

GILPIN, WILLIAM, a divine of the Church of England, and an elegant writer, was born in 1724, at Carlisle, and received his education at Queen's College, Oxford. For many years he kept a school at Cheam, in Surrey, and afterwards became vicar of Boldre, in the New Forest, and prebendary of Salisbury. He died in 1804, aged 80. Mr Gilpin published the "Life of Bernard Gilpin," his ancestor, above-mentioned; Lives of Latimer, Wickliff, Huss, and Archbishop Cranmer, an "Exposition of the New Testament," "Observations relative to Picturesque Beauty," "Remarks on Forest Scenery," &c. He left the profits of his publications for the endowment of a school at Boldre.

GILPIN, SAWREY, painter, brother of the preceding, was born at Carlisle in 1733. He was placed with a ship-painter, and his first market groups, which he sketched from his window. But it was principally as an animal painter that he acquired his reputation. Died, 1807.

GIL-POLO, CASPAR, a Spanish poet and advocate, was born at Valencia, in 1516, and died there in 1572. He is the author of "Dianas Enamorada," so highly extolled by Cervantes, as combining elegance, sweetness, and purity.

GILRAY, JAMES, a celebrated caricaturist, unrivalled in his art for the rich humour and keen satire of his ready pencil. Died, 1815.

GIL VICENTE, a Portuguese dramatist of the 16th century, who wrote nearly fifty plays, and excelled in elegance of style and fertility of invention. He was called the Portuguese Plautus, and is considered the creator of Spanish dramatic literature. He was born at Barcellos, in 1485, and died at Evora, in 1557.

GINGUENÉ, PIERRE LOUIS, a French historical and miscellaneous writer, born in 1748, at Rennes, in Brittany, was descended from an ancient but impoverished family, and obtained a small government office. At the revolution, in which he took an active part, he associated himself with the more moderate writers upon the affairs of the nation, and narrowly escaped the scaffold during the Reign of Terror. The Directory appointed him ambassador at Turin, and Comarpe gave him a seat in the tribunate. Upon being removed from this he applied himself wholly to literature. The work to

which he is chiefly indebted for his fame is his "Histoire Littéraire d'Italie," in 9 vols. He died in 1816.

GINKELL, GODART DE. [ATHLONE, Earl of.]

GIOBERTI, VINCENZO, a distinguished Italian writer and statesman, was born at Turin, in 1801. After a brilliant educational career, he was ordained priest in 1825, and soon afterwards was appointed court chaplain at Turin. Banished in 1833, without any formal process, on account of his liberal tendencies, the remaining 19 or 20 years of his life were spent chiefly in exile. After to teach philosophy in a public school at Brussels. His first writings were philosophical, viz., "La Teorica del Sovranaturalismo," published in 1837, the "Introduzione allo Studio della Filosofia," in 1840, following out the subject of the former treatise, and combating the principles of Kant and Victor Cousin in favour of the doctrines of three volumes more in 1841, entitled "Esercizi Filosofici di Antonio Rasmini;" and other treatises, "Del Bello" and "Del Buono," on Moral. In 1843 appeared the most celebrated of his works, "Primato Morale e Civile degli Italiani," in which the moral and civil pre-eminence of Italy over all the nations of the earth is set forth; and the success of which was exemplified in the Italian frenzy for the reforms of Pius IX. and the enthusiasm that led to the revolution of 1848. In that year Gioberti was acclamation to his native country amid popular Sardinian constitution he was elected deputy for Turin, took an active part in all the great political questions then agitating Europe, and finally became prime minister of Sardinia. But his hopes for Italy were soon blighted. In 1849 he returned into voluntary exile, and spent his last years in Paris in writing his "Rinnovamento Civile d'Italia"—the final manifesto of the great statesman and philosopher. Died, at Paris, 1852. His country gave him an honoured sepulchre, and he rests among his own people in the city which had excluded him during 15 years of his laborious life.

GIOCONDO, Fra GIOVANNI, in Latin, JOCUNDUS, an Italian architect and antiquarian, born at Verona about 1435. He built the bridge of Nôtre Dame, at Paris, and various other edifices both there and in Italy; fortified the city of Treviso; and was summoned to Rome by Leo X. after the death of Bramante, to assist in the building of St Peter's. Fra Giocondo was also a skilful engineer, and distinguished himself by great works in the lagoons of Venice. He belonged to the Dominican order, according to some authorities; but according to others, to the Franciscan. Died, after 1520.

GIOJA, FLAVIO, an Italian mathematician of the 14th century. He was a native of Pasitano, near Amalfi, and was long considered the inventor of the mariner's compass; but that valuable instrument seems to have been known in Europe before his time.

essor Brewer, under the direction of the master of the Rolls, is in course of publication. Giraldus was living in 1218, but the date of his death is not known.

GIRARDON, FRANÇOIS, a French sculptor and architect, was born at Troyes, in 1628. He was received at the Academy of Painting in 1687, and became chancellor in 1695. His chief works are the mausoleum of Richelleu, in the church of the Sorbonne; the equestrian statue of Louis XIV., and the Rape of Proserpine, in the gardens of Versailles. Died, 1715.

GIRODET-TROSON, ANNE LEUIS, a distinguished French painter, was born at Montargis, in 1767; was first a pupil of Regnault, and afterwards of David. Among his principal works are Endymion sleeping, a scene from the Deluge, the Burial of Atala, &c. He also painted Napoleon receiving the keys of Vienna; full-length portraits of the Vendean leaders, Bonchamp and Cathelineau; and St Louis in Egypt, which was his last great work. He was a member of the Academy of Painting, of the Institute, and of the Legion of Honour. Died, 1824.

GISBORNE, THOMAS, prebendary of Durham, an eminent theological and miscellaneous writer, was born at Derby, 1758. He was educated at Harrow and Cambridge, where he greatly distinguished himself, and soon after entering holy orders, in 1792, he obtained the living of Barton, in Staffordshire, and in the same year removed to Yoxall Lodge, near Barton, where he ever after resided. Many of the works which Mr Gisborne gave to the world attained great popularity; among which are the "Principles of Moral Philosophy investigated," &c., "An Inquiry into the Duties of the Female Sex," "A Familiar Survey of the Christian Religion and History," &c. Besides sermons, and two volumes of poetry under the titles of "Walks in a Forest," and "Poems, Sacred and Moral." Died, 1846.

GIULIO ROMANO, or GIULIO PIPPI, a celebrated Italian painter and architect, the most distinguished of the scholars of Raphael, was born at Rome, in 1492 or 1498. At an early age he became the pupil of Raphael, assisted him in several important works, and was chosen, with his fellow-scholar Penni, to complete several of his master's unfinished frescoes in the hall of Constantine in the Vatican. In 1524 he entered the service of the duke of Mantua, rebuilt his palace and decorated the interior with frescoes of the Fall of the Giants, and the story of Cupid and Psyche, considered his master-pieces. The execution of these pictures was in great part left to his scholars. He founded a school of art at Mantua, and had among his pupils Primaticcio, Rinaldo Mantuano, and Pagni. In the National Gallery are four examples of Giulio Romano. Died at Mantua, 1646.

GIUSTINIANI. [JUSTINIANI.]

GLANVIL, Sir JOHN, an eminent lawyer and statesman in the reign of Charles I. He graduated at Oxford; entered at Lincoln's Inn; obtained a serjeant's coat in 1639; and, being a member of parliament, was chosen speaker of the House of Commons in the year following. His attachment to the royal cause rendered him obnoxious to the repub-

licans, who imprisoned him, and he was not restored to liberty till 1648. He recovered his rank on the return of Charles II.; but died soon after, in 1661. Glanvil's "Reports," a well-known book, were published in 1775.

GLANVILL, JOSEPH, an English philosopher and theologian, was born at Plymouth, in 1636. He graduated M.A. at Oxford, entered the church, and held several livings, among them the rectory of the Abbey Church, Bath, to which he was presented in 1666. About the same time he was chosen a fellow of the Royal Society, an honour awarded him for his remarkable work, entitled "Scepasis Scientifica." Glanvill wrote also a defence of the Royal Society, a work on the Pre-existence of Souls, Considerations on Witchcraft, and other works. He was popular as a preacher, and was a great admirer of the writings of Henry More. Died, 1680.

GLANVIL, or GLANVILLE, RANULPH DE, an English baron of the 12th century, celebrated as a lawyer and a warrior. During the reign of Henry II., he was chief justiciary of the kingdom, and signalized his valour by repelling the invasion of William, king of Scotland, who was taken prisoner while besieging Alnwick Castle. Richard I. is said to have extorted from him the sum of £15,000 towards the expenses of a crusade to the Holy Land. The aged magistrate accompanied his master on the expedition to which he had so largely contributed, and was killed at the siege of Acre, in 1190. A curious treatise on the laws and customs of England is attributed to his pen.

GLASS, JOHN, founder of the religious sect of Glassites in Scotland; born in Fifeshire, 1695; died, 1773.

GLAUBER, JOHN RODOLPH, a chemist, alchemist, and physician of Amsterdam, who died in 1688. Chemistry is indebted to him for facilitating many useful processes, as well as for the discovery of the purgative salt which bears his name. Like others of his day, he was incessantly occupied in attempts to find out the philosopher's stone; and his experiments, however futile for his professed object, threw light on the composition and analysis of various metals, inflammable substances, &c.

GLEIM, WILHELM LUDWIG, a celebrated poet, sometimes called the German Anacreon, was born in 1719, at Ermleben; filled the office of secretary to the chapter of Halberstadt; and died in 1809, aged 84. He owes his chief fame to his war songs, composed for the Prussian army; and they will long be remembered by his countrymen for their spirit-stirring power.

GLENDOWER (properly GLYNDWR-DU), OWAIN, the distinguished leader of the Welsh in their last revolt against the English government, was born about 1349. He was great-grandson of Llewellyn, last prince of Wales; came to London and studied at one of the Inns of court; was afterwards esquire to Richard II., to whom he faithfully adhered; was knighted in 1387, and was one of the prisoners taken with the king at Flint Castle. A personal dispute about land with Lord Grey de Ruthyn, in which Glendower was wronged, grew into a

national revolt of the Welsh; which, beginning with an attack on Ruthyn Castle, in 1440, was maintained, by the ability and energy of Glendower and the enthusiasm of his countrymen, for fifteen years. He drew over the Percios to his side, but the alliance was ended by Hotspur's death at the battle of Shrewsbury. He was formally crowned prince of Wales, was recognized by Charles VI. of France, who sent him auxiliary forces; took many of the towns and castles built by the English in Wales, and invaded England; and after the defeat and departure of the French, still kept up, on a smaller scale, a spirited and harassing warfare. The terms of a treaty with Henry V. were under discussion when the great rebel chieftain died, at Mornington, in Herefordshire, 1416.

GLISSON, FRANCIS, anatomist and physician, was born at Ramplsham, in Dorsetshire, in 1696; educated at Caius College, Cambridge; and appointed regius professor of physic, which office he held 40 years. On the breaking out of the civil wars, he settled at Colchester, but removed to London, and became president of the College of Physicians. Among his works which have been warmly praised by Boerhaave and Haller, are Treatises on the Rickets, and the Anatomy of the Liver, and a metaphysical work entitled "De Natura Substantiæ Energetica, seu de Vita Naturæ," &c. Died, 1877.

GLOUCESTER, ROBERT OF, an early English chronicler of the 13th century. He lived in the reign of Henry III., and wrote a metrical chronicle of England from "Brute the Trojan" to the year 1271, the year before the accession of Edward I. Though once much read, it was not printed till 1724, when Hearne edited it. It is an interesting specimen of the state of the English language at the close of the 13th century.

GLOUCESTER, WILLIAM FREDERIC, Duke of the son of Prince William Henry, duke of Gloucester (brother to George III.), by his wife, the countess-dowager of Waldegrave, was born at Rome, in January, 1776; and his education was completed at the university of Cambridge. He entered the army, served a campaign under the duke of York, in Holland, and subsequently attained the rank of field-marshal. In 1816, he married his cousin, the Princess Mary, fourth daughter of George III., but had no issue by her. The duke usually acted with the Whig opposition, and was generally distinguished by the support of popular philanthropic measures, especially of the Anti-slavery Society. But he opposed the reform bill, introduced by his quondam political friends, and voted and spoke against it. He was of an open disposition and affable manners, and utterly devoid of ostentation. He was chancellor of the university of Cambridge; in which office he was succeeded by the marquis of Camden. He died in 1834, bequeathing to his illustrious widow the greater portion of his property, which was very large, owing to the inexpensive, though not illiberal, style with which he supported his high rank. His venerable widow died in 1867, at the age of 81.

GLOVER, RICHARD, poet and dramatist, was the son of a London merchant, and born

in 1712. He was educated at Cheam school, then took part, under his father, in the Hamburg trade. In 1737 he published his "Leonidas," an epic poem. His poem of "London, or the Progress of Commerce," appeared in 1739. The same year he published his popular ballad, entitled "Hosier's Ghost," intended to rouse the national spirit against the Spaniards. About this time he distinguished himself as a city politician; and was appointed to manage an application to parliament in behalf of the London merchants. In 1733 his tragedy of "Boadicea" was brought out at Drury Lane, but it was performed only 9 nights; his "Medea," some years after, met with greater attention. At the accession of George III. he was chosen M.P. for Weymouth, and was esteemed by the mercantile interest as an active and able supporter. He died in 1786, aged 73.

GLOVER, Mrs. a distinguished actress, was born at Newry, in Ireland, in 1781. Under the auspices of her father, Mr Betterton, she commenced her theatrical career at the age of six; and after a successful appearance in the provinces, she was engaged at Covent Garden, where she made her debut, as Elvina, in Hannah More's "Percy," in 1797. She soon afterwards exchanged the "buskin" for the "sock," and it will be long before her impersonations of "Dame Heideberg" and "Mrs Malaprop" will be forgotten. For the last few years of her life Mrs Glover appeared chiefly at the Haymarket. Latterly she had no equal in her theatrical walk; her Shakespearian readings also ranked very high. Died, July 16th, 1860.

GLUCK, CHRISTOPH, one of the most eminent musical composers of modern times, was born in Bavaria, in 1714, devoted himself to the study of music, and became a skilful performer on several instruments. He came to London in 1745, and composed for the Italian opera. He then went to the continent; and Vienna, Naples, Rome, Milan, and Venice, were in turn the theatres of his glory. His "Alceste," and "Orpheus," produced at Vienna, between the years 1762 and 1769, had an immense effect, by their boldness and originality, and served to establish the fame of their author. In 1774, Gluck went to Paris; and the celebrated "Armida" was produced shortly after, the French were struck upon the merits of the two operas, which scene, indeed, of musical rivalry, before his long-promised opera of "Armida" in Aulis." It was received with enthusiastic applause, and represented 170 times in the course of two seasons. In 1787 he returned to Germany, with a large fortune, and died at Vienna in the same year.

GMELIN, JOHANN GEORG, botanist and physician, was born at Tubingen, in 1709. He went to Petersburg, where he became member of the Academy, and professor of chemistry and natural history. In 1773, he was sent with an expedition employed to explore the boundaries of Siberia. He published "Flora Sibirica" and "Travels through Siberia." Died, 1755.

GMELIN, SAMUEL GOTTLIEB, traveller, nephew of the preceding, was born at Tübingen,

gen, in 1733. He obtained a professorship in travelling Caspian, when he was thrown into prison. He wrote "Toria Fuorum" and "Systema Naturæ." He was indebted to his excellent dyes, vegetable substances, and distinguished himself in 1760. He wrote the military program, he entered into the grave of Anspach, was in America, the auxiliary troops, British pay. In the Prussian army, in 1807, he had attained the rank of colonel, and distinguished himself against the French, his skill and bravery was promoted; and in 1813, he commanded a regiment of Prussia, after the battle of Breslau; and subsequently he greatly contributed to the French on the Rhine. In reward of his services, Prussia raised him to the rank of count, made him a member of the Prussian Academy of Berlin, and gave him 10,000 dollars a year.

GODDARD, JONATHAN, a physician, born at New York, in 1717. He was graduated at Cambridge, and served in the parliamentary army. He was physician to the wardens of Merton College, Oxford. Died, 1787.

GODEFROY, (GOTTFRED), a German painter, born at Brunswick, in 1704. He copied nature with accuracy; and, by his skill, gave an exact and beautiful colouring. Died, 1768.

gen, in 1753; went to Petersburg, and obtained a professorship. He spent some years in travelling through the countries on the Caspian, where he died in prison, into which he was thrown by one of the chiefs, in 1774. He wrote "Travels through Russia," "Historia Fucorum," &c.

GMELIN, JOHANN FRIEDRICH, physician and chemist, was born at Tübingen, in 1748. He became professor of medicine at Göttingen; and published many works on chemistry, mineralogy, and natural history. He prepared a new edition of the "Systema Naturæ" of Linnæus. He compiled a History of Chemistry; and the world is indebted to him for the discovery of several excellent dyes, extracted from mineral and vegetable substances. Died, 1805.

GNEISENAU, NEIDHARD, Count, an able and distinguished Prussian general, was born in 1760. He was educated with a view to the military profession; and, at the age of 20, he entered into the service of the Margrave of Anspach. His first employment was in America, whither he was sent with the auxiliary troops of the margrave in British pay. In 1792, he became attached to the Prussian army as a subaltern; and, in 1807, he had attained the rank of a lieutenant-colonel, and defended the fortress of Colberg against the forces of Buonaparte. For his skill and bravery on that occasion he was promoted; and he was afterwards employed in a secret mission to England. In 1813, he commanded in the memorable retreat of the combined forces of Russia and Prussia, after their defeat at Lützen and Breslau; and subsequently, under Blücher, he greatly contributed to the victories over the French on the Katsbach, and at Brienne. In reward of his numerous services, the king of Prussia raised him to the dignity of a count, made him a field-marshal and governor of Berlin, and granted him an estate in Silesia, producing an income of more than 10,000 dollars a year. Died, 1823.

GOBBO, PIETRO PAOLO BONZI, called IL CORTONESE, a celebrated painter of fruit and landscapes, born at Cortona, in 1580. He copied nature with the greatest accuracy; and, by his skill in the chiaroscuro, he bis fruits, &c., but he chiefly excelled in colouring. Died, 1640.

GOBELIN, GILES, a French dyer of the 17th century, who resided at Paris, and is said to have invented or greatly improved the process of dyeing scarlet. In 1666, a royal establishment for the manufacture of fine tapestry was founded on the spot where his house stood, whence the work produced there was termed the Gobelin tapestry.

GODDARD, JONATHAN, an able chemist and physician, born at Greenwich, about the year 1617. He was educated at Oxford, graduated at Cambridge, and on the breaking out of the civil war was attached to the parliamentary army. He attended Cromwell in his expeditions to Scotland and Ireland, as physician to the forces; was appointed warden of Merton College; and, in the parliament of 1653, sat as sole representative for Oxford. Died, 1674.

GODFREY. [GOTHFREDUS.]

GODFREY OF ROUILLON, chief of the first crusade, and king of Jerusalem, was the son of Eustace II., count of Boulogne and Lens. He served with great gallantry in the armies of the Emperor Henry IV., and when the first crusade was set on foot, the fame of his exploits caused his election as one of the principal commanders. In 1096, Baldwin, he commenced the great undertaking. The united hosts forming the Latin army encamped before Constantinople, and Godfrey compelled the Emperor Alexius Comnenus to allow him a free passage to the East. Resistance was made to the advance of the crusaders at every step, and Godfrey distinguished himself as bravest of the brave. After much hard fighting, battles, and sieges which cost thousands of lives, and the capture of Nicæa, Antioch, Edessa, Acre, and many other towns, in which garrisons were left, they arrived before the Holy City in June, 1099. The city was at once invested, and was carried by storm, after a siege of five weeks (July 15, 1099); and, eight days unanimous voice of the crusading army; but his piety and humility would not suffer him to wear a crown in the Holy City, and he declined the regal title, contenting himself with that of Defender and Baron of the Holy Sepulchre. The sultan of Egypt, at the head of all his forces, attempted to dispossess him, but Godfrey gave him battle in the plain of Ascalon, and 100,000 men were left dead on the field. One of the most important acts of Godfrey was the publication of a code of laws, called the "Assize of Jerusalem." He died after one year's reign, in 1100. The exploits of this great soldier occupy a large space in Tasso's great poem, the "Jerusalem delivered."

GODFREY OF VITERBO, an historian who lived in the 12th century, was chaplain and secretary to the emperors Conrad III., Frederick I., and Henry VI. He laboured 40 years in compiling a chronicle from the creation of the world to the year 1186. It is written partly in prose and partly in verse; and was first printed at Basel in 1559.

GODOLPHIN, SIDNEY GODOLPHIN, Earl of Cornwall, prime minister of England, was a native of Cornwall. He was educated at Oxford, and after the Restoration entered the service of Charles II. and was made a lord of the treasury. After holding the office of secretary of state for a short time, he was in 1684 made first lord of the treasury, and raised to the peerage. He supported the Exclusion Bill, but was nevertheless retained in office, though not as first lord, by James II.; as he was, also, by William III., with whom he had long been in correspondence. In November, 1690, he became first lord of the treasury a second time, and held that post for more than six years. He was called to it a third time in 1700, and soon after the accession of Queen Anne he was appointed lord high treasurer. He was the intimate friend and supporter of the duke of Marlborough, but passed gradually from the ranks of the Tory party into those of the Whig; and after a long struggle with his rival Harley, he was dismissed from office by the queen in 1710. Godolphin had

of Geoffrey Chaucer," "History of the Commonwealth of England," two unsuccessful tragedies, a treatise on Population in opposition to the doctrine of Malthus, "Cloudeley," a novel; "Thoughts on Man; his Nature, Productions, and Discoveries;" and "The Lives of the Necromancers." As a novelist, Godwin is decidedly original, combining depth of thought, singular independence, and energy of style; but he draws a very dark and repulsive picture of mankind. During the administration of Earl Grey, he was appointed to the sinecure office of yeoman-usher of the exchequer, by which his latter days were rendered comfortable. Died, April, 1836.

GODWIN, Mrs., wife of the preceding, though better known as **MARY WOLLSTONECRAFT**, was born in 1759. The poverty of her parents could only afford her the commonest education. Reading and reflection, with extraordinary talents, supplied all deficiencies; so that, at the death of her mother, she opened a school with her sisters at Islington, from whence they removed to Nowington Green. Shortly after, Mary quitted her sisters to attend upon a sick lady who had been her benefactress, and who died at Lisbon. Upon her return she engaged herself as governess to Lord Kingsborough's children. In 1786, she fixed her residence in London, and began her literary pursuits with "Thoughts on the Education of Daughters." In 1797, she was married to William Godwin, and died a few months afterwards.

GOERTZ, GEORGE HENRY, Baron von, was an active and intelligent statesman, born of a noble family in Franconia. He joined Charles XII. of Sweden, at Stralsund, on his return from Turkey; and, by his activity and intelligence, was soon placed at the head of affairs. But scarcely had Charles fallen before Frederickshall (Dec. 11th, 1718), when the foreign minister fell a sacrifice to the hatred of the nobility and of the successor to the throne. He was arrested, and charged with having induced the Swedish monarch to engage in ruinous enterprises, and of having mismanaged the sums intrusted to him; no time for repelling the accusations was allowed; and on the 28th of February, 1719, he was condemned and beheaded, without a hearing.

GOES, HUGO VAN DER, an early Dutch painter, born at Ghent. He studied under John Van Eyck and in Italy, and had acquired considerable reputation before 1467. Among his best works are the altar-piece of Santa Maria Nuova at Florence, and a "Cruelty" at Bruges. There is a portrait of a Monk by him in the National Gallery. He is said to have been crossed in love, and he entered a monastery of the Augustine order near Brussels, where he died probably about 1473.

GOETHE, JOHANN WOLFGANG VON, the greatest modern poet of Germany, and the patriarch of German literature, was born at Frankfurt-on-the-Maine, August 28, 1749. His father was doctor of law and imperial counsellor; and being in good circumstances, possessing a taste for the fine arts, and having made a tolerable collection of pictures and subjects of birth, young Goethe had an early

opportunity of indulging his fancy and improving his mind. Drawing, music, natural science, the elements of jurisprudence, and the languages, occupied his early years; and when he was 15, he was sent to the university of Leipzig, but did not follow any regular course of studies. In 1768 he quitted Leipzig, and subsequently went to the university of Strasburg, to qualify himself for the law; but he paid more attention to chemistry than to law. In 1771 he took the degree of doctor, and then went to Wetzlar, where he found, in his own love for a betrothed lady, and in the suicide of a young man named Jerusalem, the subjects for his "Sorrows of Werther;" which appeared in 1774, and at once excited the attention of his countrymen. Having in 1779 entered the service of the duke of Saxe-Weimar, whom he had met in travelling, he was made president of the council-chamber, ennobled, and loaded with honours. A splendid galaxy of distinguished men assembled at Weimar, and united itself to Goethe. The direction of the theatre was confided to him, and he there brought out some of the dramatic *chef-d'œuvre* of Schiller, with an effect worthy of them. There, too, his own dramatic works first appeared, viz. "Goetz von Berlichingen," "Faust," "Iphigenia in Tauris," "Tasso," "Clavigo," "Stella," and "Count Egmont." In 1786 he made a journey to Italy, where he remained two years, visited Sicily, and remained a long time in Rome. In 1792 he followed his prince during the campaign against France in Champagne. He was afterwards created minister; received, in 1807, the order of Alexander-Newsky from Alexander of Russia, and the grand cross of the Legion of Honour from Napoleon. He died at Weimar, March 22, 1832, aged 83. Goethe was an intellectual giant; and represents in himself alone, says Madame de Staël, the whole of German literature. His keen and profound insight to human life and character, his encyclopedic knowledge, his sublime imagination, his exquisite sensibility and play of fancy, and his consummate style, place him in the highest circle of intellectual and literary glory. His mighty influence has reached all spheres of human thought, and grows with time. Admiration of this poet forms a sort of masonic password uniting men of all countries. "Faust" is his greatest poem, perhaps his greatest work. Its subject is the life of man in the world; the aspiration, the resistance, the temptation, the sin, the agony, the failure; mysterious and very mournful; furnishing matter for comment and controversy, for admiration and blame, for many a year yet. This great poem has been repeatedly translated into English. The greatest prose work of Goethe is "Wilhelm Meister's Apprenticeship," well known in England through Carlyle's admirable translation. His beautiful songs and shorter poems, elegies, &c., are all tinged with the profound reflections of his philosophical mind, and continually touch the deep springs whence flow our griefs and joys, our fears and hopes, and all the emotions of the soul. Goethe's writings are by far too voluminous to be here enumerated, occupying 40 volumes.

Besides those already named we can only mention the charming idyllic poem "Hermann and Dorothea," and the fascinating memoirs of his own life entitled "Poetry and Truth; Out of my Life." Books about Goethe, in the shape of Recollections, Letters, Conversations, &c., are almost innumerable. Especially noteworthy in English literature are the several "Essays" on his Life and Works by Carlyle; and the "Life of Goethe" by G. H. Lewes. There is an English translation of his "Poems and Ballads," by W. E. Aytoun and Theodore Martin, and translations of "Faust," by Dr Anster, Hayward, Miss Swanwick, Theodore Martin, and others. A curiosity of literature has just appeared (1865) in the shape of a Hebrew translation of "Faust," under the title of "Ben Abuja," by a German scholar, Dr Max Letters.

GOETZE, JOHANN, AUGUST EPHRAIM, a German naturalist, was born at Aschersleben, in 1731. He made many microscopic discoveries, and wrote several books on natural history; among which are "Entomological Memoirs," 4 vols.; "A History of Intestinal Worms," and an "European Fauna," 9 vols. He was pastor of the church at Quedlinburg, and died in 1793.

GOGOL, NIKOLAY, a Russian novelist and miscellaneous writer, born probably about 1810. He was author of a novel entitled "Dead Souls," which was received with great enthusiasm by his countrymen, and was translated into English with the title of "Home Life in Russia;" of a comedy entitled "The Revisor," and two collections of short tales illustrative of rural life in Little Russia, his native country. The reputation of Gogol was seriously impaired by his subsequent writings. He spent the last years of his life abroad, and died about 1849.

GOGUET, ANTOINE YVES, a Parisian advocate, and miscellaneous writer. His principal work, exhibiting much industry and learning, appeared in 1758 (the year in which he died), and is entitled "Origine des Loix, des Sciences, et des Arts, et de leurs Progrès chez les Anciens Peuples."

GOLDONI, CARLO, a celebrated Italian dramatist, was born at Venice, in 1707; and so early did his taste for the drama appear, that before he was eight years old he had sketched the plan of a comedy. His father, who was a physician, having settled at Perugia, intended that his son should follow the medical profession; but Goldoni, dissatisfied with this pursuit, obtained permission to study law in Venice. After committing many youthful follies, he brought a few pieces upon the stage, which procured but little profit, and not much praise; and he continued to live in a continual scene of dissipation and intrigue, until he married the daughter of a notary in Genoa, and removed to Venice. Here he first began to cultivate that department of dramatic poetry in which he was to excel; namely, description of character and manners, in which he took Molière, whom he began to study about this time, for his model. Having taken the direction of the theatre at Rimini, he set about the reformation of the Italian stage, and in 1781 he undertook a similar office at Paris.

On the conclusion of his engagement, he was appointed Italian master to the princesses, with apartments in Versailles, and a pension. For 30 years he resided in the French capital; but the revolution having deprived him of his chief resources, he sank into a profound melancholy, and died in 1793, aged 85.

GOLDSMITH, OLIVER, the poet, historian, and essayist, was born in 1728, at Pallas, in the county of Longford, Ireland. He was the son of a clergyman, and was educated at the universities of Dublin, Edinburgh, and Leyden, with a view to the medical profession. But his eccentricities and careless conduct were the prolific source of difficulty to himself and friends; and when he abruptly quitted Leyden he had but one shirt, and no money, though he intended to make the tour of Europe on foot. He travelled through Flanders, part of France, Germany, Switzerland, and Italy, often subsisting on the bounty of the peasants, and returning the obligation of a night's lodging, or a meal, by playing on the German flute, which he carried with him as his stock in trade. In 1758 he arrived in England; and, by the assistance of Dr Sleight, his countryman and fellow-colleague, obtained a situation as usher in a school at Peckham; where, however, he did not remain long, but settled in London, and assisted by writing for periodical publications. One of his first performances was an "Enquiry into the State of Poetic Learning in Europe;" but he emerged from obscurity, in 1765, by the publication of his poem, entitled "The Traveller, or a Prospect of Society," of which Dr Johnson said, "that there had not been so fine a poem since Pope's time." The year following appeared his well-known novel of the "Vicar of Wakefield." His circumstances were now respectable, and he took chambers in the Temple; but the liberality of his temper, and a propensity to gaming, involved him in frequent difficulties. In 1768 he brought out his comedy of the "Good-Natured Man" at Covent Garden, but its reception was not equal to its merits. In 1770 he published "The Deserted Village," a poem, which, in point of description and pathos, is above all praise; yet such was his modest opinion of its merits, that he could hardly be induced to take the proffered recompense of £100 from his bookseller. In 1772 he produced his comedy of "She Stoops to Conquer," which was highly successful and profitable. Besides these works he produced "A History of the Earth and Animated Nature," 8 vols.; his well-known "Historics of Greece, Rome, and England," which even yet hold their ground in many schools in stupid indifference to Niebuhr, Grote, Sir George Lewis, and the rest of the modern critics; "Chinese Letters," &c. Goldsmith was the friend of Johnson, Reynolds, and Burke, and a member of the Literary Club established by the former. He died at his chambers, in the Temple, April 4, 1774; and was buried in the chamber-yard of the Temple; but a monument was afterwards erected to his memory in Westminster Abbey. An admirable Life of Goldsmith has been written by John Forster, the distin-

glished historian Washington Irving, which is in the National Periodical Review.

GOLIUS, JANUS, a Latin scholar, was born at Leiden, and educated at Leiden. He was interpreter to the king of Sicily. On his return to Leiden he was nominated professor of Arabic at the University of the United Provinces, and translated an "Arabic Lexicon" into Latin, and a great Arabian chronicle into Latin. His brother PETRUS was an excellent orientalist, and founded a Carmelite monastery at Libanus. He died in East India, while on a voyage.

GOLTZ, HEINRICH, a painter and engraver, was born in 1598. He lived so long that he was an able engraver. He went to work at the "The Boy and Dog," a celebrated engraving distinguished school in 1617.

GOLTZIUS, HUGO, a Dutch scholar and numismatist, was born in 1526. He was patronized by Ferdinand, and made the Low Countries, Italy, in pursuit of illustration of his valuable works. He died in 1595.

GOMAR, or GOMARUS, a Protestant divine, was born at Oxford, and became theological professor in 1594; and afterwards in 1641. He was the fellow-professor of Aristotle, and remarkable for his display while defending predestination in the discussions at Dort, in 1618, at which he was condemned. He was called GOMARUS, and his name in Holland was called GONGORA, LUIS DE, a poet, was born at Compostela, in 1593. He introduced a composition, which was pedantic, artificial, and did much to corrupt the Spanish language and literature of the people. It was often difficult to compare themselves, and almost as many centuries ago, in 1627. An attempt was made against him, by a historical essay, in which he was translated, which appeared in 1627.

GONGORA, LUIS DE, a poet, was born at Compostela, in 1593. He introduced a composition, which was pedantic, artificial, and did much to corrupt the Spanish language and literature of the people. It was often difficult to compare themselves, and almost as many centuries ago, in 1627. An attempt was made against him, by a historical essay, in which he was translated, which appeared in 1627.

ruished historian. There is also another by Washington Irving. A portrait of Goldsmith, which belonged to himself, is now in the National Portrait Gallery.

GOLIUS, JAMES, an eminent oriental scholar, was born at the Hague, in 1598; educated at Leyden; and in 1622 went as interpreter to the Dutch embassy in Morocco. On his return he was appointed professor of Arabic at Leyden, and afterwards also nominated professor of mathematics, and interpreter of the oriental languages to the United Provinces. His principal work is an "Arabic Lexicon." Golius published a Latin translation of the works of Geber, the great Arabian chemist. He died in 1667.—His brother **PETER**, who was also an excellent orientalist, became a Catholic, and founded a Carmelite convent on Mount Libanus. He died, in 1673, at Surat, in the East Indies, whither he had gone as a missionary.

GOLTZ, HEINRICH (GOLTZIUS), German painter and engraver, born at Mulbrecht, in 1558. He lived some time at Haarlem, and was an able engraver before he began to paint. He went to Italy, and studied and worked after the remains of ancient art. "The Boy and Dog" is one of his most celebrated engravings. Goltz had several distinguished scholars. Died at Haarlem, 1617.

GOLTZIUS, HUBERT, an eminent antiquary and numismatist, born at Venioo, in 1526. He was patronized by the Emperor Ferdinand, and made several tours through the Low Countries, Germany, France, and Italy, in pursuit of his favourite study; in illustration of which he published some valuable works. Died, 1583.

GOMAR, or GOMARUS, FRANCIS, a Protestant divine, born at Bruges, in 1563; educated at Oxford and Cambridge; and became theological professor at Leyden, in 1604; and afterwards professor of Hebrew and divinity at Groningen, where he died in 1641. He was the great opponent of his fellow-professor Arminius, and is chiefly remarkable for the intolerant bigotry he displayed while defending the points of election and predestination. Gomar took part in the discussions at the famous synod of Dort, in 1618, at which the doctrine of Arminius was condemned. His partisans in Holland were called Gomarites.

GONGORA, LUIS DE, a celebrated Spanish poet, was born at Cordova, in 1592, and is called by his countrymen the prince of lyric poets. He introduced a new style of poetical composition, which speedily became the rage. It was pedantic, artificial, and extravagant, and did much to corrupt the purity of the Spanish language and to vulgarize the taste of the people. It was subsequently named after him "Gongorism." His writings are often difficult to comprehend, even to the Spaniards themselves, among whom he has had almost as many censurers as admirers. Died, 1627. An attempt has been made to rescue Gongora from the charge usually brought against him, by Archdeacon Chubb, in a historical Essay, accompanied by translations, which appeared in 1863.

GONSALVO, or GONZALO of Cordova,

HERNANDEZ Y AGUILAR, surnamed "the Great Captain," was born near Cordova, in Spain, in 1453. He was of a noble family, and at an early age entered the army. He first distinguished himself in the great war of Ferdinand and Isabella with the Moors, which ended with the conquest of Granada in 1492. His next achievement was the recovery of the kingdom of Naples from the French, who conquered it under Charles VIII. in 1495. When Louis XII. renewed the invasion of Italy, Gonzalo was again sent there, and after a temporary division of the country between France and Spain, he again expelled the French, and established the Spanish rule, and was named viceroy of Naples. Through the jealousy of Ferdinand, and the calumnies of the courtiers, the great captain was deprived of his office in 1507, when he retired to Granada, and died there in 1515.

GONZAGA, one of the great historical families of Italy, sovereigns of Mantua from the year 1328, when Luigi Gonzaga was made captain-general and invested with the supreme power, till 1708, when Ferdinand, the last descendant of the eldest branch, died. Mantua was raised into a marquisate by the Emperor Sigismund in 1433, and into a duchy by the Emperor Charles V. in 1530. A collateral branch of the Gonzaga family became dukes of Guastalla, from the middle of the 16th century, and became extinct in 1746.

GOOD, JOHN MASON, physician, poet, and miscellaneous writer, was the son of a dissenting minister, and born, 1764, at Epping, in Essex. Having been apprenticed to a surgeon, he first practised at Coggeshall; but in 1793 he settled in London, as a surgeon and apothecary. He sought also literary employment, and found it; and having obtained a diploma from the university of Aberdeen, he commenced practice as a physician in 1820. Dr Good exercised the most indefatigable perseverance in the attainment of knowledge, without allowing his literary studies to interfere with the duties of his profession. It is stated of him, that so incessant and multifarious were his labours in 1803, that he was finishing a translation of "Solomon's Song," carrying on his "Life of Dr Geddes," walking from 12 to 14 miles a day to see his patients (his business as a surgeon then producing upwards of £1400 per annum), editing the Critical Review, and supplying a column of matter, weekly, for the Sunday Review; added to which he had, for a short period, the management of the British Press Newspaper. In the winter of 1810, he commenced his lectures at the Surrey Institution, which were published in 1826, in 3 vols., entitled "The Book of Nature." He produced many other works, among which is "The Study of Medicine," 4 vols. Died, 1827.

GOODAL, WALTER, a Scotch antiquary, was born about 1706; studied at King's College, Aberdeen; and afterwards became keeper of the Advocates' Library, at Edinburgh. His principal literary performance is "An Examination of the Letters said to be written by Mary, Queen of Scots, to James, Earl of Bothwell," 2 vols. 8vo; in

which he tried to prove that the whole are forgeries.

GORDIANUS, MARCUS ANTONIUS, the elder, surnamed **AFRICANUS**, Roman emperor, was descended from the Gracchi, and the family of Trajan. He was born A. D. 187, and the early part of his life was spent in literary pursuits. After being edile, twice consul, and proconsul of Africa, he was, at the age of 80, raised to the throne, in conjunction with his son; who being slain in battle six weeks after their accession, the father, in an agony of grief, put a period to his own existence.

GORDIANUS, MARCUS ANTONIUS, Roman emperor, grandson of the preceding, was called to the throne in A. D. 238, when he was only 13 years of age. He became a renowned warrior, and was styled the Guardian of the Commonwealth. He was treacherously assassinated near Circesium, in 244, by Philippus, the Arabian, who was one of his generals, and his successor in the empire.

GORDON, ALEXANDER, a Scotch antiquary, who lived many years in Italy, and other parts of the continent, and, in 1736, was appointed secretary to the Society of Antiquaries. In 1741, he went to Carolina, where he held several offices, and had some grants of land. He died about 1750. Among his works are the "Lives of Pope Alexander VI. and his son Cæsar Borgia," "A Complete History of Ancient Amphitheatres," &c.

GORDON, Lord GEORGE, son of Cosmo George, duke of Gordon, was born in 1750. He entered when young into the navy, but left it during the American war, in consequence of a dispute with Lord Sandwich, relative to promotion. He sat in parliament for Luggershall, and became conspicuous by his opposition to ministers; but, though eccentric, he displayed no deficiency of wit or argument. He soon, however, became an object of great notoriety; for a bill having been introduced into the House, in 1780, for the relief of Roman Catholics from certain penalties and disabilities, he collected a mob, at the head of whom he marched to present a petition against the proposed measure. The dreadful riots which ensued led to his lordship's arrest and trial for high treason; but, no evidence being adduced of such a design, he was acquitted. In the beginning of 1788, having been twice convicted of libelling the French ambassador, the queen of France, and the criminal justice of his country, he retired to Holland; but he was arrested, sent home, and committed to Newgate, where he died, in 1793.

GORDON, Sir JOHN WATSON, president of the Royal Scottish Academy, was born at Edinburgh, in 1790. He was a pupil of John Graham, and the fellow-student of Wilkie and Allan. He applied himself almost exclusively to portrait-painting, in which he attained great excellence; the excellence, however, of the determined realist. A large number of the most distinguished Scotchmen of his time sat to him; among them, Sir Walter Scott, Professor Wilson, Dr. Chalmers, Principal Lee, the earl of Aberdeen, &c. He succeeded Sir William Allan as president of the Scottish Academy in 1850,

and was knighted the same year, and also appointed limner to her majesty for Scotland. In the following year he was chosen R.A. London. He died at Edinburgh, 1st June, 1864.

GORDON, ROBERT, a Scottish geographer, born about 1880. He was educated at Aberdeen and the university of Paris, and was employed in 1841 to complete the "Theatrum Scotiae," part of the great atlas of Biacu. His maps and accompanying descriptions are very elaborate, and were so highly esteemed that he had the singular honour conferred on him of exemption from various public burdens. A "History of Scots Affairs," not published till 1841, was prepared by his son from materials he had collected. Died, 1861.

GORDON, THOMAS, a political writer, was born at Kirkcudbright, in Scotland, and settled in London as a classical teacher, but soon turned his attention to politics, and was employed by Harley, earl of Oxford. Mr. Trenchard next took him to live with him, and they wrote in conjunction "Cato's Letters" and the "Independent Whig." On the death of Trenchard, Gordon married his widow, and thus gained possession of a fine estate. They were both zealous Whigs, and inveterate enemies of priestcraft and superstition. Sir Robert Walpole employed Gordon to defend his administration, and made him a commissioner of wine-licences. He translated Tacitus and Sallust; and after his death, which happened in 1760, appeared "A Cordial for Low Spirits," and the "Pillars of Priestcraft and Orthodoxy shaken."

GORDON, WILLIAM, M.D., whose philanthropic virtues and Christian graces gained for him a wide celebrity, was born at Fountain's Hall, near the abbey of the same name in Yorkshire, in 1801. He acquired the rudiments of learning at the grammar school of Ripon. After leaving school he was articled to a general practitioner, at Otley, where he gained "golden opinions" from the warm interest he took in the welfare of the poor. His father having suffered from a reverse of fortune before he had completed his studies, he borrowed money, and went first to London and then to Edinburgh, where it was his intention to graduate as a physician. But his design was thwarted; and after three years of intense study and application, he retired to Welton, where he commenced his professional career as a general practitioner. In 1828 he married the daughter of James Lowthrop, Esq., of Welton Hall; and after 12 years' successful practice in that neighbourhood, varied by the cultivation of many branches of literature and science, he went once more to Edinburgh, where he remained two years, and took his degree of M.D. in 1841. He then settled in Hull, devoting himself with ardour to his professional duties, and taking part in every movement which he thought likely to promote the welfare of the people. Freedom in trade, education, religion, parliamentary and financial reform, extension of the suffrage, peace, temperance, and other kindred subjects, found in him an earnest advocate; and the Christian graces of his temper, displayed in harmonious concert

with his high and disinterestedness, title,—engraved gratitude of many of the "People's" **GORE, CATHI**, and miscellaneous reputation in her born in London ab however, in uncer ticulars of her life she married Capital and in the same novel, "Theresa's rapid and prolific about 200 volumes. clever pictures of sparkle with wit, not a single dull pa poems and plays. reckoned "Ocell," "The Hamiltons." with a large family later succeeded to a no less celebrated fo social qualities than During her last year died in retirement a in Hampshire, 28th **GORE, CHRISTOP** state of Massachuset in 1788, his father bei the first United State istrict of Massachuset elected by the preside the celebrated Willi the American claimt spoiliations. gratitude of many erected to his memory,—
of the "People's Friend." Died, 1849.

GORE, CATHERINE FRANCES, novelist
and miscellaneous writer, of extraordinary
reputation in her day, is said to have been
born in London about 1800. Her birthplace,
however, is uncertain, and very few par-
ticulars of her life are ascertained. In 1823
she married Captain Gore, of the Life Guards,
and in the same year published her first
novel, "Theresa Marchmont." She was a
rapid and prolific writer, and her works fill
about 200 volumes. Most of her novels are
clear pictures of fashionable life; they
sparkle with wit, and are said to contain
not a single dull page. She wrote also some
poems and plays. Among her best tales are
reckoned "Cecily," "Mrs Armytage," and
"The Hamiltons." She was left a widow
with a large family in 1846, and a few years
later succeeded to a large fortune. She was
no less celebrated for her wit and brilliant
social qualities than for her literary works.
During her last years she was blind, and she
died in retirement at Linwood, Lyndhurst,
in Hampshire, 28th January, 1861.

GORE, CHRISTOPHER, governor of the
State of Massachusetts, was born at Boston,
in 1758, his father being an opulent mechanic
there. In 1789, Washington appointed him
the first United States' attorney for the dis-
trict of Massachusetts; and in 1796 he was
elected by the president as the colleague of
the celebrated William Pinkney, to settle
the American claims upon England for
collations. In this situation he evinced
his wonted energy and talent, and recovered
property to a very great amount for his
fellow-citizens. In 1803 he was left in Lon-
don as *chargé d'affaires*, when Rufus King,
the American minister, returned to America.
In 1809 he was chosen governor of Massa-
chusetts, but retained his dignity only for
one year. In 1814, he was called to the
senate of the Union, and served in this
capacity for three years; when he retired from
public affairs, and died in 1827, aged 68. He
was a good scholar, and had an excellent
knowledge of the world; which qualities
were set off to the best advantage by his
easy and graceful manners.

GORGIAS, a celebrated Greek sophist,
was born at Leontini, in Sicily, about B.C.
480. When he was nearly 60 years of age
he was sent ambassador to Athens, and his
rhetorical displays so fascinated the people
that he was induced to spend the rest of his
life in Greece, and chiefly at Athens. He was
a very popular teacher of rhetoric, had several
distinguished pupils, and Plato named one of
his disciples after him. Gorgias lived a tem-
perate life, retained his faculties to the last,
and died, it is said, aged 105 or more.

GORTON, JOHN, an industrious English
writer, known as author of a "General
Biographical Dictionary," and a "Topogra-
phical Dictionary of Great Britain and Ire-
land," both of which enjoyed considerable
popularity. The former first appeared in
the years 1828-30, and was subse-
quently enlarged and republished several

times. The latter also appeared in parts in
the years 1830-33. We have not been able to
discover any dates or particulars of Gorton's
life or death. His first publication is dated
1815. He was probably dead in 1851, a new
edition of his Biographical Dictionary ap-
pearing in that year under the care of
another editor.

GORTSCHAKOFF, Prince MICHAEL, born
in 1795, came into notice as an officer of ar-
tillery in the war between Russia and Turkey
in 1828, 1829. In the subsequent campaign
against Poland he commanded the artillery,
and had 70 guns under his orders in the bat-
tle of Ostrolenka. In 1846 he was named
military governor of Warsaw; and in 1852
he visited London to represent the Russian
army at the funeral of the duke of Wellin-
ton. In the following year he was appointed
to command the army for the occupation of
the Danubian principalities, which gave oc-
casion to the Crimean war. In that war he
distinguished himself not more on the field
than in the defence of Sebastopol. He was
subsequently appointed governor of Poland;
and in this office he died at Warsaw, May
30, 1861, aged 65.

GOSSEC, FRANÇOIS JOSEPH, an eminent
French musical composer, was born in 1733;
and died at Passy, in 1829. His compositions
are numerous, and the character of his music
is light, pleasing, and spirited. In 1770, he
founded the Concert of Amateurs, at which
the Chevalier de St George played the first
violin. He composed the apotheosis of Vol-
taire and J. J. Rousseau, and the funeral
hymn for Mirabeau.

GOSSELIN, PASCAL FRANÇOIS JOSEPH,
an eminent French geographer, born at Lille,
in the Netherlands, in 1751. He was engaged
in a tour through Europe, for several years,
and made many valuable researches con-
cerning ancient geography. In 1789, he was
deputy to the National Assembly, and, in
1791, nominated a member of the central
administration of commerce. He was sub-
sequently employed in the war department,
and was ultimately made keeper of the king's
cabinet of medals, &c., at Paris. His works
relate to ancient geography, and possess
much merit. Died, 1830.

GOSSON, STEPHEN, divine and poet; born
in Kent, in 1554; educated at Christchurch,
Oxford; held the living of St Botolph, Bl-
shopgate; and died in 1623. He wrote three
dramatic pieces; which he appears to have
regretted, as he afterwards published "Plays
confuted in Five several Actions," and "The
School of Abuse," against poets and actors.

GOTHOFFREDUS, DENIS GODEFROY, an
eminent French lawyer, born of an illu-
strious family at Paris, in 1549. France being
involved in confusion by the leaguers, he
accepted in confusion by the leaguers, he
in 1580; but being afterwards deprived of his
office, as a Huguenot, he retired to Germany,
and held professorships successively at Stras-
bourg and Heidelberg, and died at the former
city in 1622. He wrote many books, but his
most important work is his edition of the
"Corpus Juris Civilis."

GOTHOFFREDUS, THEODORE GODEFROY,
son of the preceding, was born at Geneva, in

1580. As soon as he had finished his studies, he went to Paris; where he conformed to the Romish religion, and applied with indefatigable industry to the study of history. In 1632, Louis XIII. made him one of his historiographers, with a stipend of 3000 livres; and, in 1636, he was sent to Cologne, and subsequently to Munster, to assist at the treaty of peace negotiating there. He died in 1649. His works are numerous, and among them is the first edition of the "Ceremonial of France."

GOTHOFFREDUS, JACQUES GODEFROY, brother of the preceding, an eminent Genevese statesman and jurist, was born in 1587. He became professor of law and councillor of state at Geneva, was several times Syndic of the republic, and was charged also with several diplomatic missions. His great work is the "Codex Theodosianus cum perpetuis notis," in 6 vols. folio. It occupied him for 30 years, and appeared in 1655. It is one of the works to which Gibbon acknowledges his obligations in the preparation of his "Decline and Fall of the Roman Empire." Among the other works of this laborious scholar are—"Fontes quatuor Juris Civilis," "Le Mercure Jesuite," &c. Died at Geneva, 1652.

GOTHOFFREDUS, DENIS GODEFROY, son of Theodore, was born at Paris, in 1615. He studied history, after his father's example; became as eminent, and obtained the reversion of his father's place of historiographer royal, from Louis XIII., when he was but 25 years of age. He published new editions of the Memoirs of Philippe de Commines, of the "Ceremonial of France," and of Jaligny's history of Charles VIII. Died, in 1681.

GOTSCHALK, a German monk of the Benedictine order, who in the first half of the 9th century attracted attention by his speculations on predestination. His doctrine was condemned by the council of Mentz in 848, and he was sent for final judgment to Hincmar, archbishop of Rheims, who had him in the following year condemned, flogged, and imprisoned at Hautvillers, and his writings burnt. He lingered 20 years in his prison, and died there in 868. A Life of this monk was written by Archbishop Ussher.

GOTTSCHEDE, JOHANN CHRISTOPH, German miscellaneous writer, was born at Königsberg, in 1700; and is considered to have contributed towards the reformation of German literature. He was successively professor of the belles-lettres, philosophy, metaphysics, and poetry, in the university of Leipzig; and died in 1766. He was assisted in his dramatic writings by his wife, a woman of splendid talents.

GOUGH, RICHARD, an eminent antiquary and topographer, the son of a London merchant, was born in 1735. He received a private education, and at the age of 11 years translated from the French, a "History of the Bible." In 1762, Mr Gough became a student of Benet College, Cambridge; but antiquities were his favourite study, and he left the university without taking a degree, and devoted the rest of his life to antiquarian researches. Besides many papers in the *Archæologia*, the *Bibliotheca Topographica*, and the *Gentleman's Magazine*, he published

"Anecdotes of British Topography," 2 vols. 4to; "The Sepulchral Monuments of Great Britain," 2 vols. folio; and an enlarged edition of Camden's *Britannia*, &c. Died, 1809.

GOUJON, JEAN, a French sculptor and architect of the 16th century, who, being a Protestant, fell in the massacre of St Bartholomew, 1572. He designed the fine facade of the old Louvre, and other works, which procured him the title of the French Phidias.

GOUVION ST CYR, General LAURENT, Marquis de, an eminent French commander, commenced his military career during the revolution. In the campaign on the Rhine, in 1795, he repeatedly distinguished himself; and in the following year he attracted the attention of Moreau, who hesitated not to attribute to his skill and bravery much of the success which attended the French arms. He was afterwards intrusted with several diplomatic missions; and when these were discharged, he returned to the camp, and in 1800 commanded the centre of the army of the Rhine. In 1804 he was made colonel-general of the cuirassiers, and grand officer of the Legion of Honour. He continued to pursue a successful career during the following campaigns in Italy and Germany; and when the French first invaded Spain he was employed in Catalonia, where he also displayed considerable ability. In the disastrous campaign of Buonaparte in Russia, he succeeded Marshal Oudinot in the command of the central army; and for his services on that occasion he was promoted to the rank of marshal. He behaved with great judgment and bravery at the battle of Dresden, and was left there with a garrison of 16,000 men; but succeeding events rendered it impossible for him to maintain the place. On the restoration of the Bourbons he was created a peer, and made a commander of the order of St Louis. In 1817 he was appointed minister for naval affairs, and he subsequently filled the highest office in the war department. Died, 1830.

GOWER, JOHN, an English poet of the 14th century, supposed to have been born in Yorkshire, about 1320. He was a member of the society of the Inner Temple; and some writers assert that he became chief justice of the Common Pleas; though the more general opinion is, that the judge was another person of the same name. He died in 1409, and was buried in the conventual church of St Mary Overy, Southwark, to which he was a benefactor, and where his tomb is still to be seen. He was the friend of Chaucer, but far enough from rivaling him as a poet. He wrote three poems, entitled "Speculum Meditantis," "Vox Clamantis," and "Confessio Amantis." The last only is in English, and has been printed. The first is in Norman-French and the second in Latin.

GOYEN, JAN VAN, a painter of landscapes, cattle, and sea-pieces, was born at Leyden, in 1596; and was the pupil of Vanderelde. He possessed great facility in execution, and his works are consequently numerous, but such as are finished and remain undamaged are highly valued. Died, 1656.

GOZZI, GASPARE, Count, Italian litterateur, born at Venice in 1716. He started in

life with a fair for and neglect lost it, bread. His papers for "Veneto," a periodical for "Spectator," healthy morality, elegance. life with a fair fortune, but from indolence and neglect lost it, and he had to write for bread. His papers forming the "Osservatore Veneto," a periodical of the same class as our "Spectator," are admired for their healthy morality, playful satire, and easy elegance. Among his numerous translations are Fleury's Ecclesiastical History, Mar-montel's Tales, Pope's Essay on Man, &c. Count Gaspare was charged to prepare the plan for the public schools in 1774, and soon after was called to Padua to reorganize the university. Died there in 1788.

GOZZI, CARLO, Count, Italian dramatic writer, was brother of Count Gaspare, and was born about 1718. His first literary success was achieved in 1761, when he produced his dramatic piece entitled "The Love of the Three Oranges." In purpose it was polemical; an attack on the popular Goldoni and the regular comedies after the French model. And in form it is a fairy tale dramatized. It was written to be represented by Sacchi and his company of national masks, who were accustomed to extemporize the dialogue. Perfectly novel in character it was also perfectly successful, and was followed by a series of other compositions of the same class; among them, "The Raven," "The Lady Serpent," "Zobeide," "The Green Bird," &c. Gozzi was for some time an earnest and formidable rival of Goldoni, but theatrical orthodoxy was too much for him, and he gave up his "Fables," as they were called, for regular plays. He took no remuneration for his fairy plays. They do not appear to have been ever represented on other theatres than those of Venice, and the cause for them seems to have been merely local. They have, however, been received with enthusiasm in Germany, and some of them translated. Schiller translated "Turdodot." Tieck imitated the "Fables" of Gozzi in his "Phantasia;" and to the same source are traceable the popular fairy melo-dramas of the English stage, of which "Blue-bird" is the best known. Died, 1806. A French translation of Gozzi's fairy plays, with a short biography, by Alphonse Royer, was just appeared. (1865.)

GOZZOLI, BENEZZO, a celebrated Italian painter, was born at Florence in 1424. He was a scholar of Fra Giovanni da Fiesole, whom he followed to Rome and assisted in the Duomo of Orvieto in 1447. He soon after settled at Montefalco in Umbria, and there painted, in the style of Angelico, some of his most beautiful works. In 1457 he re-turned to Florence, and was employed in the chapel of the Medici Palace. After a short period spent at San Gimignano, he went in 1468 to Pisa; and there spent 16 years in painting the magnificent series of twenty-two frescoes of scenes from Old Testament history in the Campo Santo, which form his principal work. During the progress of these frescoes he painted many other pictures. A special acknowledgment of his services was made by the Pisans in 1478, by the gift of a building erected for him in the Campo Santo. He was still living at Florence in January, 1492. Two examples of Gozzoli are in the National Gallery.

GRABE, JOHANN ERNST, a learned divine

and critic, was born in 1666, at Konigsberg, Prussia. Being dissatisfied with Lutheranism, he was prevailed upon to go to England; here he received considerable patronage; King William III. allowing him an annual pension of £100, and the university of Oxford conferring on him the degree of D.D. He also entered into orders, and published several valuable works, the principal of which is, an edition of the Septuagint, from the Alexandrian MS. in the royal library. He died in 1712.

GRACCHUS, TIBERIUS SEMPRONIUS, the celebrated Roman tribune and reformer, was born about B.C. 168. He was the eldest son of the consul of the same name, and of Cornelia, daughter of Scipio Africanus; and losing his father at an early age, was brought up by his noble mother, with the aid of Greek tutors. He married the daughter of Appius Claudius, chief of the Senate, and soon after distinguished himself under Scipio at the siege of Carthage. At the age of about 30 he served as quaestor in Spain. But deeply moved by the frightful evils which he saw in the state of Italy and its population, he resolved to devote himself to the task of reform, and especially to the formation of a middle class of small landed proprietors. He entered on the office of tribune B.C. 133, and soon proposed a measure reviving with some modifications the long disregarded Licinian law, for the more equal distribution of the public lands. This measure, eagerly welcomed by the country tribes, roused bitter opposition on the part of the rich holders of those lands, and at their instance Octavius, one of the tribunes, interposed his veto and prevented its passing into law. This course was repeated on a second attempt of Gracchus; but at a third assembly Gracchus was deposed and the bill passed. Soon after Gracchus made a proposal for distributing the property of Attalus, king of Pergamus, recently bequeathed to the Romans, among the poor. He also brought forward several measures of reform, which were subsequently carried by his brother Caius. On his offering himself a candidate for the tribuneship the next year a riot arose, the senators making an attack on the people, and the reformer was killed with many of his adherents. His body with theirs was thrown into the Tiber, leave being refused to Caius to bury it.

GRACCHUS, CAIUS SEMPRONIUS, younger brother of the preceding, and like him, tribune and reformer, was born about B.C. 157. He served under Scipio at Numantia, and in his absence was named one of the commissioners for carrying out the distribution of public lands. After his brother's death he lived in retirement till B.C. 126, when he was sent as quaestor to Sardinia. Two years later, disregarding an order of the Senate who would fain have him absent, he returned to Rome and was chosen tribune. He was by careful study and training an accomplished orator, and he applied all his powers to avenge the death of Tiberius, and to carry out his measures. He renewed, and extended the Agrarian law; planted new colonies in Italy and the

provinces; provided for the sale of corn at a low price; deprived the Senate of their judicial power; and had new roads made and old ones restored in all parts of Italy. These measures are called the Sempronian laws. Calus was re-elected tribune for 122, and at once proposed a wide extension of the Roman franchise. To diminish his popularity the Senate employed Lilius Drusus to outbid him for popular favour. At the same time Calus was sent, with his chief supporter Flaccus, to Carthage, to establish the new colony there. He was not again chosen tribune, and a meeting of the Senate was called to revoke one of his laws. The irritation was immense, the friends of Gracchus were armed, blood was shed, the great reformer was declared a public enemy, and in the combat which took place next day three thousand are said to have fallen, and Gracchus had his slave put him to death. Cornelia survived her sons many years, living in retirement at Misenum.

GRÆVIUS, or **JOHANN GEORG GRÆFE**, a learned classical scholar, born at Naumburg, Saxony, in 1682. His avidity for study in his early years was astonishing. He succeeded Gronovius in the professorship of history at Deventer, and removed from thence to Utrecht, where he died in 1703. He published editions of several of the classics; but his greatest works are his "Thesaurus Antiquitatum Romanarum," 12 vols. folio, and "Thesaurus Antiquitatum et Historiarum Italiae," 45 vols. folio.

GRAFTON, **AUGUSTUS HENRY FITZROY**, Duke of, was born in 1736; succeeded his grandfather in the family honours in 1757; and in 1765 was appointed secretary of state; but the year following he relinquished that station, and soon after became first lord of the treasury, which he held till 1770. During his administration, he was virulently attacked by Junius, who seems to have been actuated quite as much by personal enmity as by political hostility. In 1771 the duke was nominated lord privy seal, which office he resigned in 1775, and acted in opposition to the court till 1782, when he was again in office for a short time. After this, he was uniformly an opponent of ministers, till his death. He was the author of a volume of theological essays, &c. Died, 1811.

GRAFTON, **RICHARD**, an English historian, who carried on an extensive business in London as a printer, in the 16th century. He continued and reprinted "Hall's Chronicle," and also produced another, entitled "A Chronicle at large, of the Affaires of England from the Creation of the Worlde unto Queene Elizabeth." Grafton's Chronicle was republished, in 2 vols. 4to, in 1809.

GRAHAM, **GEORGE**, an ingenious watchmaker and mechanic, was born at Kirklington, Cumberland, in 1678. He came to London, and lived with Tomplion the watchmaker, whom he succeeded in business, but far excelled in scientific attainments. He invented various astronomical instruments, by which the progress of science was considerably furthered. The great mural arc in the observatory of Greenwich was made for Dr Halley, under his inspection, and divided

by his own hand. He invented the sector with which Dr Bradley discovered the phenomena of aberration and nutation. He furnished the members of the French Academy, who were sent to the north to measure a degree of the meridian, with the instruments for that purpose; and he composed the model from which all succeeding oracles have been formed. Graham was a member of the Royal Society, to which he communicated several useful discoveries. He died in 1761, and was interred in Westminster Abbey.

GRAHAM, **SIR JAMES ROBERT GEORGE**, the second baronet, and the descendant of an ancient Scottish family, was born at Netherby, June 1, 1792, and was educated at Westminster School, and afterwards at Queen's College, Cambridge. While travelling abroad he became private secretary to Lord Montgomerie, British minister in Sicily, during whose illness he took on himself the whole work of the mission. So indefatigable was he in this office that Lord William Bentinck on his return requested him to retain the post. At the close of the war he returned to England, and after a severe struggle, was elected member of parliament for Hull, pledging himself to the side of Parliamentary Reform and the suppression of the slave trade. Losing his seat for Hull in 1820, he became afterwards member for Carlisle, when his pamphlet on "Corn and Currency," advocating the free importation of corn, with a moderate protective duty, brought him prominently into notice. He had a seat in the cabinet in the Reform ministry of Lord Grey, and subsequently became first lord of the Admiralty. Having seceded from the Whigs in 1834, he joined the party of Sir Robert Peel, who received from him the most effective and thorough-going support. He was not, however, a popular man. Strong disapprobation was expressed on the opening of certain letters in the General Post Office, which Sir James Graham judged to be necessary; and in Scotland he was regarded with much dislike for his method of dealing with the Kirk during the period which ended in the great disruption of 1843. After Sir Robert Peel's death, he withdrew gradually from more prominent and laborious posts; but, although not in office, he exhibited an undiminished zeal in his attendance on parliamentary business, taking an especial interest in the financial debates of the session. It was said that whenever he opened his mouth in the House, it was worth fifty votes; and although he was not born to sway an assembly or to head a government, his support was always of the greatest moment, while his oratory, aided by his striking personal appearance, was very effective. Without the power, or at least the courage, to fill the first place, he was a formidable opponent or a most valuable helper to any government. During the last eighteen months of his life he was attacked by constantly recurring spasms of the heart, which, however, yielded to treatment two or three days before his death. He died, with his faculties unimpaired to the last, on the 26th of October, 1861, in the 70th year of his age. A "Life of Sir James Graham"

has been since
Torrens.

GRAHAM, SIR JOHN, the faithful companion and fellow-patriot of Sir William Wallace. He fell at the battle of Falkirk, July 22, 1298.

GRAHAM, JOHN, of Claverhouse, Viscount Dundee, "a soldier of distinguished courage and professional skill, but rapacious and profane, of violent temper, and of obdurate heart," whose name, "wherever the Scottish race is settled on the face of the globe, is mentioned with peculiar energy of hatred," was born in 1650. His career in arms commenced as a soldier of fortune in France; he subsequently entered the Dutch service; and on his return to Scotland, in 1677, he was nominated to the command of a regiment of horse that had been raised against the Covenanters. He obtained a command in the Horse-guards, and a seat in the privy council of Scotland. He supported the cause of James II. against William III., and was finally raised to the peerage by the title of Viscount Dundee. Killed at Killfcrankie, in the hour of victory, in 1689. Among many cruel instruments of a tyrannous sovereign, he made himself conspicuous by his barbarity, and has obtained an unenviable notoriety in history, romance, and local tradition. It is probable, however, that many of the stories of his cruelty are exaggerated. He is the subject of a glowing panegyric by Picaire, who calls him "last and best of Scots."

GRAHAM, SIR RICHARD, Lord Viscount Preston, was born in 1648. He was sent ambassador by Charles II. to Louis XIV., and was master of the wardrobe and secretary of state under James II. When the revolution took place, he was tried and condemned, on an accusation of attempting the restoration of that prince, but, through the queen's intercession, he was pardoned. He spent the remainder of his days in retirement, and published an elegant translation of Boethius on the Consolations of Philosophy. Died, 1695.

GRAHAME, JAMES, a Scottish poet, was born, in 1745, at Glasgow, and educated at the university of that city. He was bred to the law, but relinquished forensic pursuits for clerical; and died in 1811, curate of Sedgfield, near Durham. His poetry is mostly of a religious character. His principal piece is "The Sabbath."

GRANGER, JAMES, poet and physician, was born at Dunse, in Scotland, in 1722. After serving his time to a surgeon at Edinburgh, he became a regimental surgeon in the English army in Germany; but on the restoration of peace in 1748, he settled as a physician in London; where, however, he principally supported himself by writing for the press. An "Ode to Solitude," published in Dodsley's collection, first procured him reputation; and the acquaintance of Shenstone and Dr Percy. In 1759 he published his *Elegies of Tibullus*, which involved him in a paper war with Smollett. He then went to the West Indies, and established himself as a medical practitioner in the island of St Christopher's, but did not lay aside his pen. He wrote a didactic poem,

entitled "The Sugar Cane," and died in 1767.

GRAMMONT, or GRAMONT, PHILIBERT, Count of, a celebrated wit of Charles the Second's court, was the son of Anthony, duke of Grammont. After serving in the army under Condé and Turenne, he came to England in the early part of the reign of Charles II., with whom, as well as with his mistresses, he became a great favourite. He married the daughter of Sir George Hamilton, fourth son of the earl of Abercorn, and died in 1707. He is described as possessing, with a great turn for gallantry, much wit, politeness, and good-nature; but he was a great gamester, and seems to have been indebted for his support chiefly to his superior skill and success at play. His memoirs were written by his brother-in-law, Anthony, usually called Count Hamilton, who followed the fortunes of James II., and ended his days in the service of France.

GRANBY, JOHN MANNERS, Marquis of, a famous English general, was the eldest son of the duke of Rutland, and commanded with honour during the Seven Years' War in Germany. After the peace of 1763, he retired to private life, greatly beloved by all ranks for his many virtues. He died in 1770, aged 50.

GRANDIER, URBAIN, curate and canon of Loudon, whose tragical end disgraced France in the 17th century, was born at Bouvère, near Sablé. On obtaining the living of Loudon, he became so popular as a preacher, that the envy of the monks was excited against him. He was first accused of incontinency; but being acquitted, his enemies instigated some nuns to play the part of persons possessed, and in their convulsions to charge Grandier with being the cause of their visitation. This horrible though absurd charge was countenanced by Cardinal Richelieu, who had been persuaded that Grandier had satirized him; and he was tried, declared guilty, and burnt alive, April 18, 1634.

GRANGER, JAMES, an English divine, who published a valuable and highly interesting work, entitled "The Biographical History of England," in 4 vols. 8vo. He was a native of Berkshire; received his education at Christchurch, Oxford; became vicar of Shiplake, in Oxfordshire; and his death was occasioned by a fit of apoplexy while administering the sacrament, in 1776.

GRANT, ANNE, usually designated Mrs Grant of Laggan, a miscellaneous writer, whose maiden name was M'Vicar, was born in Glasgow, 1756. Her early years were passed in America, whither her father, who held a commission in the British army, had removed with the intention of settling there; but returned to Scotland and was appointed barrack-master of Fort Augustus. Here his daughter became acquainted with the Rev. James Grant, chaplain to the fort; and they were married in 1779. In 1801 left a widow with a large family, and but scanty means, she was induced to publish a volume of poems, which proved successful; and the literary ice once broken, she adopted literature as a profession, and produced her "Letters from the Mountains"

(which have been often reprinted), "Memoirs of an American Lady," "Essays on the Superstitions of the Highlanders of Scotland," &c. Nearly the last 30 years of her life were spent in Edinburgh, where she numbered among her friends Sir Walter Scott, Lord Jeffrey, Henry Mackenzie, and all the Scotch "notables" of the day; and where her Christian resignation amid many calamitous events, and her amiable character, procured her general esteem and regard. Died, 1838. Her "Memoirs and Correspondence" have since been published.

GRANT, JAMES, a Scotch barrister, and at the time of his death the father of the Scottish bar. He was early distinguished for his liberal political principles, and could number among his friends Henry Erskine, Sir James Mackintosh, and many others, eminent for their talents and the lead they took in the movements of the day. He was author of "Essays on the Origin of Society," "Thoughts on the Origin and Descent of the Gael," &c. Died, 1835, aged 92.

GRANT, Sir WILLIAM, Master of the Rolls; an excellent equity judge, the promptitude and wisdom of whose decisions were appreciated no less by the public than by the profession, of which he was a distinguished member. Born at Elchies, in Scotland, 1754; died, 1832.

GRANVILLE, or GREENVILLE, Sir RICHARD, was a native of Cornwall, born in 1540, and entered early into the military service, as a volunteer against the Turks. He afterwards joined Sir Walter Raleigh in his expedition to America; and, in 1591, became vice-admiral under Sir Thomas Howard, who was sent out to the Azores to intercept the Spanish fleet. The Spaniards, however, being apprized of the design, despatched a powerful squadron, which succeeded in cutting off Greenville's ship from the rest; and in a desperate contest with them he was mortally wounded.

GRANVILLE, or GREENVILLE, Sir BEVIL, grandson of the preceding, was born in 1598. At the commencement of the civil war, he raised a troop of horse at his own expense, and was killed at the battle of Lansdowne, in 1643.

GRANVILLE, or GREENVILLE, GEORGE, Lord Lansdowne, statesman and poet, was grandson to Sir Bevil Granville (or Greenville), and was born in 1667, sent to Trinity College, Cambridge, when only 11 years of age; admitted M.A. at 13; having, before he was 12, spoken a poetical address of his own composition to the duchess of York, when she visited the university. He had a strong inclination for a military life; but this was checked by his friends, and he employed himself, during the various political changes that occurred, in cultivating his taste for literature. In 1696 his comedy, called "The Gallants," was performed at the theatre royal in Lincoln's Inn Fields, as was his tragedy of "Heroic Love" in 1698. On the accession of Queen Anne, he made his first appearance at court; took his seat in the House of Commons as member for Fowey; became successively secretary of war, comptroller of the household, treasurer, and privy councillor. On the queen's death he not

only lost his post, but being suspected of disaffection to the Hanoverian succession, was arrested and sent to the Tower, where he remained upwards of a twelvemonth. He then retired to the continent for ten years; and on his return passed his life as a country gentleman, amusing himself with the republication of his poems, and in writing a vindication of his uncle, Sir Richard, against the charges of Clarendon and Burnet. Died, 1735.

GRANVILLE, Lord. [CARTERET.] GRASSE, FRANÇOIS JOSEPH PAUL, Count de, French admiral, was born in 1723. He entered the navy and passed successively through all grades to the highest. He was engaged in 1779 and the following years in various combats with the English fleet in the West Indies; made an unsuccessful attack on Admiral Hood at Martinique; contributed to the capture of Tobago; co-operated in 1781, in Chesapeake Bay, with Washington and the French auxiliaries by land, in the attacks which ended with the capitulation of Lord Cornwallis at Yorktown; was defeated by Hood off St Christopher's in January, 1782; and again defeated and captured, with his ship the *Ville de Paris* of 100 guns, by Admiral Rodney in April following. Died at Paris, 1788.

GRATIAN, a Benedictine monk of the 12th century, was a native of Chiust, in Tuscany. He employed 24 years in compiling an abridgment of the canon law, commonly called Gratian's Decretal.

GRATIANUS, Roman emperor, was the son of Valentinian I. by his wife Severa, and born in 359. His father took him as his associate in the empire when he was only 8 years old. In his 17th year he succeeded to the throne, on the death of his father. Gratianus appointed Theodosius, who had just defeated the Goths, emperor of the East in 379, and he exerted himself with energy in defending the empire, but was put to death in a revolt, in Gaul, A. D. 383.

GRATTAN, HENRY, an eminent Irish orator and statesman, was born about the year 1750, at Dublin, of which city his father was recorder. He finished his education at Trinity College, whence he removed to England, and became a student in the Middle Temple. He was called to the Irish bar in 1772, and brought into the parliament of Ireland in 1775, where he immediately became distinguished for his patriotic speeches, and that vigorous opposition to the statute of 6th Geo. I., which roused the whole island, and produced its repeal, in 1782. For his share in this transaction, Mr Grattan received addresses from all parts of the country, and was rewarded with the sum of £30,000 voted to him by the parliament of Ireland. In 1790, he was returned for the city of Dublin, principally for the purpose of opposing the union; but when that measure was carried, he did not refuse a seat in the united House of Commons. The latter years of his parliamentary attendance were chiefly devoted to a warm and energetic support of Catholic emancipation; and it may be truly said, that he died in the service of this cause. Mr Grattan was the zealous and unequalled friend of Ireland, and what he deemed her

best interests, nothing temporary was a war. As a public speaker, he was a defective voice at all times, and with beauty, &c. Died, 1820, aged 70. L. Carow, 1st pl. statesman in 5. minister.

GRAUN, KARL German musician the Great, was born in 1683. He enjoyed a reputation inferior to that of his countrymen; and was the composer of a number of musical compositions.

GRAVESANDER, eminent Dutch geographer, was born at Gravesend, in 1673. He was bred a civil engineer, and was at the bar with visited England, in 1717. He became prominent philosopher, and taught the Newtonian system in 1742.

GRAVINA, GIOVANNI, brated jurist and Calabria, in 1664; and canon law at the founders of the Arc. early protector of 1718. His works are principally on "Original Jurisdiction," and "Original Jurisdiction."

GRAY, STEPHEN, to the Charter House, century, distinguished mental philosopher. His method of communication not naturally possessed contiguity with electricity, a kind of luminous planetarium; thus leading to discoveries and improvements.

GRAY, THOMAS, poet, was born in London, at Eton, and Peter House, entered at the Inner Temple, studying for the bar. He was, however, with Horace, induced to accompany his father to the West Indies; but he returned to England in 1701, and spent himself several years in which he admirably combined energy to mature. So much, that it was not until 1704, that he appeared; and it was not until 1705, that he appeared; and it was not until 1706, that he appeared; and it was not until 1707, that he appeared; and it was not until 1708, that he appeared; best interests, from first to last. There was nothing temporising or uncertain about him; he was a warm friend, or a bitter enemy. As a public speaker, he had to contend with a defective voice; but his eloquence was at all times animated, combining strength with beauty, and energy with elegance. Died, 1820, aged 70. A statue of Grattan, by L. Carew, is placed among those of other statesmen in St Stephen's Hall, Westminster.

GRAUN, KARL HEINRICH, an eminent German musician, chapel-master to Frederick the Great, was born in 1701, and died in 1759. He enjoyed a reputation in Germany scarcely inferior to that which Handel enjoyed in England; and was the author of an immense number of masses, oratorios, and other musical compositions.

GRAVESANDE, WILLEM JACOB'S, an eminent Dutch geometrical and philosopher, was born at Bois-le-Duc, in 1688. He was bred a civilian, and practised some time at the bar with reputation. In 1710 he visited England, and was elected F.R.S. In 1717 he became professor of mathematics and natural philosophy at Leyden, where he taught the Newtonian system. He died in 1742.

GRAVINA, GIOVANNA VINCENZO, a celebrated jurist and littérateur, was born in Calabria, in 1664; became professor of civil and canon law at Rome; was one of the founders of the Arcadian Academy, and the early protector of Metastasio; and died in 1718. His works are numerous; and the principal one, "Origines Juris Civilis," is a very learned and luminous treatise on Roman jurisprudence.

GRAY, STEPHEN, a gentleman belonging to the Charter House, who, early in the 18th century, distinguished himself as an experimental philosopher. He discovered the method of communicating electricity to bodies not naturally possessing it, by contact or contiguity with electric; and he projected a kind of luminous orrery, or electrical planetarium; thus leading the way to future discoveries and improvements.

GRAY, THOMAS, a celebrated English poet, was born in London, in 1716; educated at Eton, and Peter House, Cambridge; and entered at the Inner Temple, with a view of studying for the bar. Becoming intimate, however, with Horace Walpole, he was induced to accompany him in his tour of Europe; but they parted at Reggio, and Gray returned to England in 1741. Here he occupied himself several years in literary schemes, which he admirably commenced, but wanted energy to mature. So slow was he to publish, that it was not until 1747, that his "Ode to a Distant Prospect of Eton College" made its appearance; and it was only in consequence of the printing of a surreptitious copy, that, in 1751, he published his "Elegy written in a Country Church-yard." He declined the office of laureate on Cibber's death, in 1757; and the same year published his "odes" "On the Progress of Poesy" and "The Bard." In 1768, the duke of Grafton presented him with the professorship of modern history at Cambridge. But though Gray published little besides his poems, he was a

man of extensive acquirements in natural history, the study of ancient architecture, &c.; his correspondence places him among our best epistolary writers; and some of his posthumous pieces afford proof of his profound and varied erudition. As a poet, he is energetic and harmonious; and his lyrics, though few, have been rarely, if ever, surpassed. Died, 1771. Gray's works have passed through numerous editions; memoirs have been written by Mason, Mitford, and others, and a careful edition of his Correspondence with Mason was published by Mr Mitford in 1833.

GREATOREX, THOMAS, an eminent musician, was born at North Winfield, Derbyshire, in 1758. He was a pupil of Dr Cooke; and he afterwards went to Italy, where he studied vocal music under Santarelli, at Rome; and having visited the principal cities of Italy, Germany, Switzerland, and the Netherlands, he returned to England in 1788, and established himself in London as a teacher of music. He harmonized various airs, adapted parts of Handel's productions, and arranged parts for the grand orchestra, with great ability. In 1793 he was appointed director of the king's concerts of ancient music, a post which he held till his death. In 1819 he became organist of Westminster Abbey. But he did not devote his attention wholly to music; mathematics, astronomy, botany, and chemistry, each occupied his mind by turns; and he was a fellow of the Royal Society; and he was a fellow of the

GREAVES, JOHN, an orientalist and mathematician, was born at Colmore, Hants, in 1602; educated at Balliol College, Oxford; and chosen professor of geometry at Greatham College, in 1630. He next went to Leyden, where he studied the Arabic language under Golius; after which he travelled into the Levant, to purchase manuscripts for Archbishop Laud. He also visited Egypt, and made a survey of the pyramids; and, in 1640, returned to England, when he was deprived of his Gresham professorship; but the king gave him that of astronomy at Oxford, which he also lost on the ruin of the accurate measurement of the principal pyramids, which he gave to the world under the title of "Pyramidographia;" he also published an ingenious work, entitled "Epochæ Romanæ Foot and Decarius." Died, 1682.—also men of learning; the former, a good orientalist; the latter, eminent as a physician, and created a baronet by Charles II.

GRECHETTO, IL. [CASTIGLIONE.]
GREEN, JOSEPH HENRY, F.R.S., D.C.L. the distinguished surgeon, but more distinguished as the disciple and interpreter of Coleridge, was born in 1791. After studying three years in Germany, during which he acquired the fondness for metaphysical speculation which never left him, he chose the medical profession, and was apprenticed to his uncle, Mr Clive, an eminent surgeon. Having passed the hospitals in London, he married, and commenced practice in London, holding the post of demonstrator in anatomy at St Thomas's Hospital. In the following

year he made acquaintance with Tieck, then in London, and went hastily to Berlin to study philosophy under Solger. His friendship with Coleridge had begun as early as 1817, and year by year he grew more fascinated by the influence of that fine thinker and eloquent talker. Till Coleridge's death he was his almost daily companion, and side by side with his arduous professional work went on his enthusiastic study of philosophy with his beloved master. In 1820 Green was appointed surgeon at the College of Surgeons, professor of anatomy at the College of Surgeons in 1824, and at the Royal Academy in 1825. His extraordinary ability as lecturer is testified by Professor Owen, who was among his hearers. In 1830 he became professor of surgery at King's College, London; was five years later chosen member of the council of the College of Surgeons; was Hunterian orator in 1840 and 1847, and president of the college in 1849 and 1858. Subsequently he was named president of the Council of Medical Education and Registration. But meanwhile, Coleridge having died in 1834, Green, named his literary executor, retired from practice and from his chair at King's College in 1836, and spent the rest of his life in studious seclusion at The Mount, Hadley. After more than twenty years of preparatory studies,—studying Hebrew at sixty, and Sanscrit still later,—“as he neared seventy years of age,” says a writer in the *Saturday Review*, “with a mind as vigorous as ever, and with an eye still as cloudless as a child's, he undertook the building of the monument for which he had been so long collecting the materials.” This work, the product of a life, is entitled “*Spiritual Philosophy*”; founded on the Teaching of the late Samuel Taylor Coleridge,” and was published in November, 1865. Green lived to complete it, but not to see it through the press, and it was edited by his friend Mr Simon, who prefixed to it a charming memoir of the author. The same “serenity of faith and strength” which characterized the life of this Christian philosopher marked his death, which took place December 13, 1863.

GREEN, VALENTINE, a celebrated engraver in mezzotinto, was a native of Warwickshire, and intended for the legal profession; but he left it for the art in which he afterwards excelled. He settled in London in 1765; was keeper of the Royal Institution, and associate of the Royal Academy; and produced many fine engravings from Reynolds, West, the Düsseldorf Gallery, &c. He was also known as the author of a “*History of Worcester*,” and some other works. Died, 1813.

GREENE, ROBERT, a humorous poet in the reign of Elizabeth, was born at Norwich, or Ipswich, about 1560. He was educated at St John's College, Cambridge; and after making “the grand tour,” it is said that he took orders. But he disgraced his profession by a life of libertinism, and died of a surfeit, in 1692. He wrote five plays, and various sketches in prose; among which is one with the quaint title of “*A Groat's Worth of Wit bought with a Million of Re-*

pentance.” A valuable edition of all the poetical works of Greene has been published by Mr Dyce.

GREENE, DR MAURICE, a musical composer, was a native of London, and brought up in the choir of St Paul's, of which he became organist in 1718. He was afterwards appointed to the same situation in the chapel royal; and, in 1730, was chosen professor of music in the university of Cambridge, from which he had previously obtained his musical degree. Besides his anthems, which are much esteemed, he produced several excellent catches, duets, &c. Died, 1755.

GREENFIELD, WILLIAM, an oriental scholar and linguist, was editor of the “*Comprehensive Bible*,” and made many valuable translations of the Bible into Eastern dialects. His literary acquirements were made under great difficulties, and while pursuing his daily occupation of a book-binder. He died in 1832. In consequence, it is said, of neological sentiments being attributed to him during the Trinitarian controversy.

GREENOUGH, HORATIO, an American sculptor, was a native of Boston, U. S. He was born in 1803, and after completing his education, went to study sculpture at Rome. He afterwards visited Paris, and then settled at Florence. He executed, under a government commission, a colossal statue of Washington, and a large group entitled “*The Rescue*.” He also made many portrait-busts, among them one of Lafayette, and numerous monuments. Died in America at the close of 1852.

GREENVILLE, [GRANVILLE.]

GREGORIO, ROSARIO, a Sicilian historian and archaeologist, was born at Palermo in 1753. He entered the church, and became canon of the cathedral of Palermo; was also professor of diplomacy at the university, and held various government offices. He spent his life chiefly in studious retirement, and aimed at the illustration of the history and antiquities of his native country. He edited collections of Arabic and other early historical writings on Sicily; and wrote an Introduction to the Study of Sicilian Law; Considerations on the History of Sicily, and other works. Died, 1809.

GREGORY I., Popo, surnamed the Great, was born of a noble family at Rome, about the year 544. He discovered such abilities as a senator, that the Emperor Justinus appointed him prefect of Rome; after which he embraced the monastic life, in a society founded by himself. Pope Pelagius II. sent him as nuncio to Constantinople, and on his return made him apostolical secretary. He was elected successor to that pontiff in 590; and, among other instances of his zeal, we may mention that of his being the means of converting the Anglo-Saxons to Christianity, by sending over some monks under the direction of St Augustin. Pope Gregory was pious and charitable, had lofty notions of the papal authority, and after his death was clerical discipline, and after his death was canonized. He is, however, accused, but on slight and doubtful evidence, of burning a multitude of the works of ancient authors; lest the attention to heathen literature

Bologna, and suc-

should supersede the monkish and ecclesiastical studies of the age. His works are comprised in 4 vols. Died, 604.

GREGORY VII., Pope, first known as the monk **HILDEBRAND**, of Cluny, was a native of Tuscany. He was the friend and councillor of Leo IX. and the four succeeding popes, and on the death of Alexander II. was elected to succeed him, 1073. He obtained confirmation of his election from the Emperor Henry IV., and immediately applied himself zealously to reform two of the grossest evils of the church, simony, and the licentiousness of the clergy. In his view, however, marriage no less than concubinage was a sin in them. He menaced the emperor and the king of France, the latter without effect. In 1074 he assembled a council by which it was forbidden the prelates to receive investiture of a layman; and this was the first step in the quarrel with the emperors, which lasted so many years. Henry, disregarding the papal authority, was summoned to Rome; but he held a diet at Worms, and pronounced the deposition of the pope. To this Gregory replied by procuring the deposition of the emperor, and the election of another, Rudolph of Suabia. Henry now promised submission, and in the early winter of 1077 went with his wife and child to Italy. The pope was at the castle of Canossa, and there, after keeping the penitent king of Germany three days waiting at the gate, he received and gave him absolution. The terms imposed on him were intolerable, and he soon broke them; made war on Rudolph and defeated him; set up a rival pope in Gulbert, archbishop of Ravenna, with the title of Clement III.; and after several unsuccessful attempts entered Rome in 1084, had himself crowned emperor by his own pope, and besieged Gregory in San Angelo. The pope was delivered by Guiscard, and retiring to Salerno, died there in 1085. A haughty, inflexible man, whose aim was to establish the supremacy of the papacy over not only all churches, but all temporal sovereignties.

GREGORY IX., Pope, **UGOLINO**, was a native of Campania, and a near relation of Innocent III. He became bishop of Ostia and cardinal, and in 1227 succeeded Honorius III. His coronation surpassed in magnificence any which had preceded it, and the ceremony lasted three days. The principal events of his pontificate were the various incidents of his contest with the great Emperor Frederick II., whom he repeatedly excommunicated, absolving his subjects from their allegiance, and proclaiming a crusade against him. In 1229 Gregory levied a tithe on all moveables in England towards the expenses of his war with Frederick. He established a few years later the Inquisition at Toulouse and Carcassonne; excited by his haughty demeanour a revolt at Rome in 1234, and was driven from the city, to which he did not return for three years. St Anthony of Padua, St Dominic, and St Elizabeth, were canonized by Gregory IX. Died in 1241, at a very advanced age.

GREGORY XIII., Pope, was a native of Bologna, and succeeded Pope Pius V. in

1572. He was deeply versed in the canon and civil law, and had distinguished himself at the Council of Trent. The massacre of St Bartholomew took place a few months after the accession of this pope, and he had it celebrated at Rome by public thanksgivings in the churches, and by illuminations. Yet he was naturally of a gentle spirit, and did not delight in cruelty. It was to him a grand triumph of the church over its enemies. He ornamented Rome with many fine buildings and fountains; but his pontificate is chiefly memorable for the reformation of the calendar, which took place under his auspices, and bore his name. Died, 1585.

GREGORY XV., Pope, was a native of Bologna, and descended of an ancient family; his real name was **ALESSANDRO LUDOVISIO**. He was elected to the papal dignity in 1621; and was the founder of the College of Propaganda. It was this pope who, in 1622, canonized Ignatius Loyola, Francis Xavier, and Philip de Neri. He was author of several works, one of which is entitled "Epistola ad Regem Persarum, Shah Abbas."

GREGORY XVI., **MAURO CAPELLARI**, was born at Belluno in 1766, and succeeded Pius VIII. in the papal chair, 1831. His reign embraced a period of no ordinary interest and difficulty in the history of the church, and in the relations of the Vatican with the temporal powers of Christendom. Simple in his habits, though narrow in his ideas and timid in his manners, he nevertheless displayed great energy in conducting the affairs of the church; but incapable of civil government, he displayed a bigoted resistance to the practical improvements of the age; and the volcano, on which his temporal throne rested, has since broken out with an eruption, the subsidence of which no man can foretell. Died, 1846.

GREGORY NAZIANZEN, St, bishop of Constantinople, eminent for his piety, eloquence, and learning, was born in 326, near Nazianzus, in Cappadocia, of which place his father was bishop. He received an excellent education, which he improved at Athens, where he formed an acquaintance with St Basil. On his return home he was ordained; hesitated long between the contemplative and the active life; adhered to the Nicene doctrine, and endeavoured to keep together its persecuted adherents; assisted his father in his pastoral duties, and at length became minister to a small congregation of the Nicene Christians at Constantinople. Distinguishing himself greatly by his fervent eloquence, and no less by his wisdom and moderation, he was made bishop of Constantinople by Theodosius in 390. After filling this high and difficult post for one year, he resigned it, and returned to his native place, where he died in 389. He excelled all his contemporaries in pulpit eloquence; and his style has been compared to that of the orators of ancient Greece. Many works of Gregory Nazianzen are extant, and consist of orations, letters, and poems. Ullmann's interesting monograph on this eminent preacher has been translated into English.

GREGORY, bishop of Neo-Cæsarea, in the

3rd century, was surnamed THAUMATURUS, or the Wonder-worker, on account of the miracles which he is said to have performed. The Church flourished under his care until the Decian persecution, in 250, when he thought it prudent to retire for a time. He was a pupil of the celebrated Origen, and appears to have been a man of learning. Died about 265.

GREGORY OF NYSSA, St. was ordained bishop of Nyssa, in 372. The zeal he displayed against the Arians excited the resentment of the Emperor Valens, who belonged to that sect, and he was banished; but, on the accession of Gratian, he was restored to his see. He was present at the council of Constantinople in 381, and at another in 394, and died soon afterwards.

GREGORY, commonly called GREGORY OF TOURS, was born in 544, in Auvergne. He was chosen bishop of Tours in 573, and died in 595. He was author of a "History of the Franks," and is the most ancient of the French historians.

GREGORY, JAMES, an eminent mathematician and philosopher, was born at Aberdeen, in 1698. He received his education in the Marischal College of his native place, where he published, in 1663, his "Treatise on Optics," in which he made known his invention of the reflecting telescope. About 1665 he went to Padua, where he printed a work on the "Quadrature of the Circle and Hyperbola." On his return from his travels, he was chosen a fellow of the Royal Society of London; and merit procured him the mathematical chair at St. Andrew's. In 1674 he removed to Edinburgh, on being appointed to the mathematical professorship; but he held the situation only for a short time, for while showing the satellites of Jupiter to some pupils, in October, 1675, he was suddenly struck blind, and died a few days after.

GREGORY, DAVID, nephew of the preceding, was born at Aberdeen, in 1661, studied at Edinburgh, and became professor of mathematics in that university. He was afterwards elected Savilian professor of astronomy at Oxford, carrying his election against Halley, who was also a candidate. In 1695 he published his "Catoptricæ et Dioptricæ Sphericæ Elementa." His greatest work was published in 1702, and entitled "Astronomiæ Physicæ et Geometricæ Elementa." It was afterwards translated into English, in 2 vols. 8vo. Dr Gregory died while engaged in superintending an edition of Apollonius's Conics, in 1708.

GREGORY, JAMES, M.D. and F.R.S., was born at Aberdeen in 1753, and was long one of the brightest ornaments of the university of Edinburgh. He was the author of "Philosophical and Literary Essays," 2 vols.; "Cullen's First Lines of the Practice of Physic, with Notes," 2 vols.; and "Conceptus Medicinæ Theoreticæ," 2 vols. Died, 1821.

GREGORY, JOHN, M.D., a physician and miscellaneous writer, was born in 1724, at Aberdeen; studied at Edinburgh and Leyden; became professor of philosophy at Aberdeen, and afterwards professor of physic at Edinburgh; and was appointed first physician to

the king for Scotland. His works are, "A Comparative View of the State and Faculties of Man with those of the Animal World," "Observations on the Duties and Offices of a Physician," "Elements of the Practice of Physic," and "A Father's Legacy to his Daughters." Died, 1773.

GREGORY, OLINTHUS, LL.D. was born at Yaxley, in Huntingdonshire, in 1774. He commenced his literary career at the age of 19; but the works which chiefly brought him into notice were his "Treatise on Astronomy" and the "Pantologia," a comprehensive dictionary of the arts and sciences, of which he undertook the general editorship. Through the interest of his friend Dr Hutton, he was appointed, in 1802, mathematical master at the royal military academy, Woolwich; in which establishment he eventually obtained the professor's chair, filling it with reputation until he was obliged, through ill-health, brought on by intense study, to resign it in 1838. Besides the works above mentioned, and many others, Dr Gregory was the author of "Elements of Plane and Spherical Trigonometry," "Mathematics for Practical Men," "Letters to a Friend, on the Evidences, Doctrines, and Duties of the Christian Religion," 2 vols., "Memoir of Robert Hall," and "Memoirs of the Life, Writings, &c., of the late John Mason Good, M.D." His original papers and editorial labours, also, on different branches of art and science, were numerous; and from the year 1817 he had the whole of the general superintendence of the almanacks published by the stationers' company. Died, 1841.

GREGOIRE, HENRI, Count, bishop of Blois, a French prelate, distinguished by his love of democracy, no less than by his inflexible integrity and active philanthropy, was born in 1750, near Lunéville. In 1789 he was nominated by the clergy of his province a member of the States-general; and in the Constituent Assembly he distinguished himself by the boldness of his opinions relative to civil and religious liberty. He was among the first of the clergy who swore fidelity to the constitution; and during the Reign of Terror, when the bishop of Paris abdicated his office, and several of the clergy abjured Christianity, the bishop of Blois stood forward as the undaunted supporter of the religion of his country. He also opposed the accession of the first consul to the throne of France; and he, alone, objected to the obsequious address of the Senate to the new sovereign. On the restoration of the Bourbons, he was excluded from the Institute, and deprived of his bishopric. He spent the remainder of his life in retirement, and died at Paris in 1831. As a literary character, the constitutional bishop of Blois was also distinguished. Among his writings are, "Essai sur l'Amélioration Politique, PAYSANNE, et Morale des Juifs;" "Mémoires en faveur des Gens de Couleur, ou Sang-mêlés de St Domingue;" "Essai Historique sur les Libertés de l'Eglise Gallicane;" "Les Ruines de Port Royal," &c.

III. was younger brother of Richard Grenville, Earl Temple, and the father of Lord Grenville. He entered parliament as member for Buckinghamshire, and was distinguished for his eloquence. He successively filled the situations of treasurer of the navy, first lord of the admiralty, and first lord of the treasury. In 1763 he became chancellor of the exchequer, but, in 1765, he resigned his post to the marquis of Rockingham. His administration having been violently attacked by the press, he published "Considerations on the Commerce and Finances of England, and on the Measures taken by the Ministers," &c., in its defence. He died in 1770.

GRENVILLE, Rt. Hon. WILLIAM WYNDHAM, Lord, third son of the preceding, was born in 1759. On completing his studies at Oxford, he entered one of the inns of court, with an intention of studying for the bar; but forming an early acquaintance with Mr Pitt, it caused him to abandon all thoughts of the law, and seek distinction in the Senate. In 1782 he accompanied Earl Temple to Ireland as his secretary, and after a stay of only one year, he succeeded Mr Burke in the office of paymaster-general of the army. He began his parliamentary career as the representative for Buckinghamshire, filled the speaker's chair 6 months, and then succeeded Lord Sidney as secretary for the home department. In 1790 he was raised to the peerage, and in the following year made secretary of state for foreign affairs. The revolutionary principles of that period were making rapid progress, and it appeared to Lord Greville that a war with France was inevitable. Acting on this opinion, he refused to admit the visits of the ambassadors from the French Directory, which being contrary to the opinion of Mr Pitt, his lordship resigned, and was succeeded in his office by Lord Dundas. He signalized himself as a powerful orator on the debate following the bill for "providing for the better security of his Majesty's person;" which had been introduced in consequence of the king having been grossly treated by the mob on his way to the parliament house. Lord Greville took an active part in promoting the union with Ireland, and joined with Mr Pitt in favourable intimations to the Catholics; and when, afterwards, ministers found that there were strong reasons why those intimations could not be fulfilled, they resigned. Lord Greville then took part with the opposition, and adhered to that party till the death of Mr Pitt in 1806. In the cabinet which followed that event, he was made first lord of the treasury, which office he held but for a short period; and he lost his popularity by filling, at the same time, the office of auditor. On the dissolution of the ministry, his lordship principally confined his senatorial exertions to the cause of Catholic emancipation, for which he was always a steady and consistent advocate. He was distinguished for his general literary attainments, as well as for his political knowledge; and he held the office of chancellor of the university of Oxford; to which, on his death, in 1834, the duke of Wellington was elected.

GRESHAM, Sir THOMAS, merchant and citizen of London, the son of Sir Richard Gresham, merchant and lord mayor of London, was born in 1619, and educated at Cambridge. On leaving the university he was placed under his uncle, Sir John Gresham; and being designed for a mercantile company, was enrolled a member of the mercers' company. His father had been the king's agent at Antwerp; and the person who succeeded him having mismanaged the royal affairs there, Sir Thomas was sent over, in 1662, to retrieve them. This he did so effectually, that in two years he paid off a heavy loan, and raised the king's credit considerably. Elizabeth, on her accession, removed him from his office, but soon restored it, and knighted him. He now planned and erected an exchange for the merchants of London, in imitation of that of Antwerp; and in 1670 it was opened by the queen in person, who dined with the founder, and named it the Royal Exchange. Sir Thomas was also anxious to promote the interests of science; for which purpose he determined on founding a college. Having built a mansion in Bishopsgate Street for his town residence, he directed by his will that it should be converted into habitations and lecture-rooms for seven professors or lecturers on the seven liberal sciences, who were to receive a salary out of the revenues of the Royal Exchange; but Gresham College has since been converted into the general excise office, and the lectures are now given in a room over the Exchange. This magnificent patron of commerce and made many charitable bequests; and his liberality, together with the situation he held, universally procured for him the name of "the royal merchant." He died in 1679.

GRESSET, JEAN BAPTISTE LOUIS, a French poet and dramatist, born in 1709; entered the society of Jesuits, but withdrew from them at the age of 26. For a long time he excited the admiration of Parisian circles, wrote some elegant poems, became a member of the Academy, and was the companion of the wits and literati of the French capital; but at length he renounced his favourite pursuits, and retired from the gay world, to enjoy the tranquillity of retirement. Died, 1777. His literary fame rests principally on his "Vert, Vert," his "Chartreuse," and "Le Méchant."

GRETREY, ANDRÉ ERNESTE MODESTE, an eminent musical composer, was born, in 1744, at Liege; and such was the precocity of his talents and the sweetness of his voice, that his future fame was very early predicted. He first studied under Moreau, then went to Rome, and finally settled at Paris in 1768. He produced upwards of 40 operas, some of which retain possession of the stage, and two of them, "Zemire et Azor" and "Richard Cœur de Lion," were translated, and played in London with success. Died, 1813.

GREBUZE, JEAN BAPTISTE, a celebrated French painter, was born at Tournus in 1725. He studied at Lyons, Paris, and Rome, and attracted great attention by his portraits and genre pieces. His subjects are mostly taken from domestic life, and at once

appeal to the commonest emotions. Among his most esteemed works are—"The little Girl with the Dog," the "Village Bride," the "Paralytic Father," the "Broken Pitcher," &c. His pictures generally fetch very high prices, and one of them was recently (1865) sold, at the sale of the Fourtales collection, for 100,000 francs. A "Head of a Girl," by Greuse, in the National Gallery, is a fair specimen of his skill and of the meretricious style he frequently adopted. Died, very poor, in 1805.

GREVILLE, SIR FULKE, Lord Brooke, a patron of letters and an ingenious writer, was born in 1534, and descended from the noble families of Neville, Beauchamp, and Willoughby de Brooke. He was in great favour with Elizabeth, and was created Lord Brooke by James I., who gave him Warwick Castle. In 1614 he was made under-treasurer, chancellor of the exchequer, and one of the privy council. He founded a history lecture at Cambridge. This accomplished nobleman was stabbed by a servant, named Haywood, whom he had reprimanded for an insolent expression; after which the assassin committed suicide with the same weapon. This was in 1628. After his death appeared several of his posthumous works, and his life of his friend Sir Philip Sidney.

GREY, CHARLES, Earl, a British statesman, distinguished for his senatorial abilities generally, but more especially for his long and inflexible advocacy of parliamentary reform, was born at Fallowden, near Alnwick, March 15, 1764. He received his education at Eton and King's College, Cambridge, entered parliament at the age of 21, as member for Northumberland; and espousing Whig politics with all the vehemence of youth, he soon ranked among the most prominent of that party. To detail the chief events of his public life from its commencement, would be almost to write the parliamentary history of England for that period. We can therefore only say, in brief, that he was almost constantly occupied in the discussion of the most important questions that engaged the attention of parliament. At the outset of his career his oratorical powers were displayed as one of the managers of the impeachment of Warren Hastings; and from that time he always held a conspicuous station among the Whigs. At that period also he was foremost among the leaders of the great political confederation styled "The Friends of the People," from which even Charles Fox thought it prudent to stand aloof. The war of the French revolution had now commenced; and at a time when most men of property, rank, or influence in this country considered it their duty to quench the revolutionary furor that was widely spreading, Mr Grey, by constantly opposing the vigorous measures brought forward by the minister, Mr Pitt, appeared to uphold principles which seemed to threaten our existence as an independent nation. But when in January, 1803, Mr Pitt was removed from the helm of state by death, Mr Grey took office, under Mr Fox, as first lord of the admiralty; and when, in the following October, the great Whig leader died, Lord Howick (as

he had then become) was appointed secretary of state for foreign affairs. The Whig ministry was soon after dismissed; parliament was dissolved; and, on the death of Lord Grey's father, in 1807, he removed to the Upper House. On several occasions, subsequently, negotiations were entered into to promote such a union among the leading men of both parties as should give public confidence and satisfaction, but insuperable difficulties presented themselves. The Perceval administration was succeeded, in 1812, by that of Lord Liverpool; and, on his retirement in 1827, Lord Grey declined to support Mr Canning, Lord Liverpool's successor. But on the sudden termination of the Wellington administration, in 1830, a fairer field seemed to lie before him; and, in obedience to his sovereign's wish, he assumed the reins of government, and had the satisfaction, during his four years of office, to see two of the great measures for which he long contended, triumphantly carried, namely, parliamentary reform and the abolition of slavery. After his retirement from office, he took no part in politics. Died, July 17, 1845, aged 81.

GREY, LADY JANE, whose accomplishments and misfortunes have rendered her an especial object of interest, was the daughter of Henry Grey, marquis of Dorset (afterwards duke of Suffolk), by the Lady Frances, daughter of Charles Brandon, duke of Suffolk, and Mary, younger sister of Henry VIII. She was born in 1537, at Bradgate, her father's seat in Leicestershire; and early in life gave proofs of talents of a superior order. She wrote an incomparable hand, played well on different instruments, and acquired a knowledge of the Greek, Hebrew, and Latin, as well as of the French and Italian languages. Roger Ascham has given a beautiful and affecting narrative of his interview with her at Bradgate, where he found her reading Plato's Phædo in Greek, while the family were amusing themselves in the park. In 1551 her father was created duke of Suffolk; and at this time Lady Jane Grey was much at court, where the ambitious duke of Northumberland projected a marriage between her and his son, Lord Guildford Dudley, which took place at the end of May, 1553. Soon after this Edward VI. died, having been prevailed upon, in his last illness, to settle the crown upon the Lady Jane, who reluctantly accepted it, and was proclaimed with great pomp. This gleam of royalty, however, was of short duration; for the pagenet reign lasted but nine days. The kingdom was dissatisfied, and the nobility indignant at the presumption of Northumberland, so that Mary soon overcame her enemies, and was not backward in taking ample revenge. The duke of Northumberland was beheaded, and Lady Jane and her husband were arraigned, convicted of treason, and sent to the Tower. After being confined some time, the council resolved to put these innocent victims of a parent's unprincipled ambition to death. Lord Guildford suffered first, and as he passed her window his lady gave him her last adieu. Immediately afterwards she was executed on the same scaffold; suffering with calm

resignation, and Protestant religion. GREY, DR. H. divine, was born at Lincoln College successively the ter, and Hinton, a prebend in St Paul's cathedral. His principal works are, "New Method of English System of English Law and Easy Method without Points."

GREY, DR. ZACHARY, well known for his published in 1744. He was on Shakespeare, and on Neale's History of the

stories over the Catalo who had committed a noose, for a long time decided maritime ascen in 1353, the Catalon Venetians, under the Pisan, gave him battle his whole fleet.—3. GR celebrated for the victo

resignation, and a firm attachment to the Protestant religion, Feb. 12, 1554.

GREY, Dr. RICHARD, a learned English divine, was born in 1693. He was educated at Lincoln College, Oxford. He obtained successively the livings of Kilncoote, Leicester, and Hinton, in Northamptonshire; and a prebend in St. Paul's Cathedral. His principal works are, "Memoria Technica, or a New Method of Artificial Memory;" "A System of English Ecclesiastical Law;" "A New and Easy Method of learning Hebrew, without Points," &c. Died, 1771.

GREY, Dr. ZACHARY, an English divine, well known for his edition of Hudibras, published in 1744. He also published "Notes on Shakspeare," 2 vols.; and an "Answer to Neale's History of the Puritans," in 3 vols. Died, 1766, aged 79.

GRIESBACH, JOHANN JACOB, an eminent German theologian and biblical critic, was born in Hesse Darmstadt in 1745. After a successful course of study at several German universities he visited England, France, and Holland, for the purpose of examining the various manuscripts of the New Testament preserved in the principal libraries, and collecting materials for a new critical edition of the sacred text. The preparation of this work formed the principal labour of his life. In 1773 he became professor extraordinary of theology at the university of Halle, from which he soon after passed to Jena, and in 1780 was named rector of the university. His New Testament, which appeared in 1774, was at that time the most important of all critical editions, and was received with the highest praise. It excited also much earnest controversy. Griesbach wrote in Latin many learned works of biblical criticism. Died, 1812.

GRIFFIER, JOHN, known by the appellation of Old Griffier, an eminent painter, was born at Amsterdam in 1658, and died at London in 1718. He succeeded chiefly in landscapes, and painted several views on the Thames. He also etched prints of birds and beasts.—His son ROBERT, called the Younger Griffier, was born in England, and was a good landscape painter, though not equal to his father.

GRIMALDI. The Grimaldi family have ever been of great importance in Genoa, and many of its members are conspicuous in the history of that republic.—1. HANIERI GRIMALDI was the first Genoese who conducted the naval forces of the republic beyond the Straits of Gibraltar. In the service of Phillip the Fair of France, Grimaldi sailed to Zealand, in 1304, with 16 Genoese galleys and 20 French ships under his command; and defeated and made prisoner the Count Guy of Flanders, who commanded the enemy's fleet of 80 sail.—2. ANTONIO GRIMALDI was also a distinguished naval commander. His victories over the Catalonians and Arragonese, who had committed aggressions on the Genoese, for a long time gave the latter a decided maritime ascendancy; but at length, in 1353, the Catalonians, assisted by the Venetians, under the command of Nicholas Pisani, gave him battle, and nearly destroyed his whole fleet.—3. GIOVANNI GRIMALDI is celebrated for the victory he gained over the

Venetian admiral Trevisani, on the Po, in 1431; when, in sight of Carmagnola's army, he succeeded in taking 28 galleys, and a great number of transports, with immense spoils.

—4. DOMENICO GRIMALDI, cardinal, archbishop, and vice-legate of Avignon, was eminent both as a naval commander and as a zealous extirpator of heresy from the Romish church. At the battle of Lepanto, in 1571, though a bishop at the time, he is said to have distinguished himself by his skill and courage.—5. GERONIMO GRIMALDI, born in 1597, was sent by Urban VIII. as Nuncio to Germany and France; and the services he rendered the Roman court were rewarded, in 1643, by a cardinal's hat. His whole career was highly honourable. He was bishop of Aix, and endeavoured to reform the manners of the clergy in his diocese, by establishing an ecclesiastical seminary; he also founded a hospital for the poor, and annually distributed 100,000 livres of his vast property in alms. He died at Aix, in 1685, aged 89.

GRIMALDI, GIOVANNI FRANCESCO, an eminent painter, also called Bolognese, was born at Bologna, in 1606. He studied under Annibale Caracci, to whom he was related; and became distinguished chiefly as a landscape painter, though he was also employed on historical subjects, particularly in the Vatican. He was greatly distinguished as an architect and an engraver. Cardinal Mazarin invited him to Paris, where he enjoyed a pension, and was much noticed by Louis XIII. He died at Rome in 1680.

GRIMALDI, JOSEPH, an unrivalled pantomime clown, born in 1779, was the son of Signior Grimaldi, an *artiste*, noted for his humour and eccentricities, who by day followed the profession of a dentist, and by night that of ballet-master at Drury Lane. For a period of 40 years, "Grimaldi, the clown," delighted the laughter-loving audiences of Drury Lane, Covent Garden, and Sadler's Wells, with a rich and (paradoxical as the term may seem) *intellectual* species of buffoonery, peculiarly his own—portraying to the life all that is grotesque in manners, or droll in human action. Died, 1837.

GRIMM, FREDERICK MELOHIO, Baron de, counsellor of state of the Russian empire, and a man of letters, was born, in 1723, at Ratisbon. Going to Paris, he became principal secretary to the duke of Orleans, and acquainted with Rousseau and other Parisian philosophers; an account of whose writings, friendships, disputes, &c., has been preserved in his "Correspondence," which extraordinary medley, after a lapse of 30 years, was published in 16 vols. In 1776, being appointed envoy from the duke of Saxe-Gotha to the French court, he was honoured with the title of baron, and invested with several orders. On the revolution breaking out, he retired to the court of Gotha, where he found a safe asylum. In 1795, the empress of Russia made him her minister plenipotentiary to the states of Lower Saxony; and he was confirmed in that post by Paul I., and retained it till ill-health obliged him to relinquish it. He then returned to Gotha, where he died, in 1807.

GRIMM, JACOB LUDWIG, the distinguished German philologist, was born at Hanau, in Hesse-Cassel, in 1785. He was educated at the university of Marburg, and in 1805 spent some months at Paris as assistant to Savigny. Three years later he was appointed librarian to Jerome Buonaparte, king of Westphalia, and had leisure for his favourite studies in early German literature. On the overthrow of the new Kingdom of Westphalia, in 1813, he was made secretary of legation under the restored electorate, and in that capacity was present at the Congress of Vienna. He was twice sent to Paris to recover books and manuscripts carried off by the French. He held the office of sub-librarian to the elector from 1818 till 1829, his younger brother, Wilhelm, being also employed in the library. In the latter year he became first librarian to the university of Göttingen, which post, with a professorship, he held till 1837. In that year he was dismissed, as was also his brother from his similar offices, for protesting against the violation of the constitution by the king of Hanover. In 1841 they both settled at Berlin, as professors in the university, and members of the Academy of Sciences. Among the principal works of this great scholar are "Deutsche Grammatik," "Deutsche Mythologie," and "Geschichte der Deutschen Sprache." The great "Deutsches Wörterbuch," the joint production of the two inseparable brothers, and perhaps their most important work, was left unfinished by them, but is in course of completion on their plan, and from their materials. The well-known "Kinder-und Haus-Märchen" was also their joint work. Jacob Grimm died in September, 1863. His singularly fascinating Autobiography has since appeared; and also a separate Biography by Scherer.

GRIMM, WILHELM KARL, younger brother of the preceding, and like him eminent as a philologist and antiquary, was born at Hanau in 1786. He studied at Marburg, was employed with Jacob in the Cassel Library, and in the library of the university of Göttingen, where also he held a professorship, was dismissed in 1837, and accompanied his brother to Berlin in 1841. Besides the works published in conjunction with Jacob, he edited several collections of German mediæval poetry, a work on German Runic inscriptions, &c. Died in 1869.

GRIMOARD, Count PHILIPPE DE, a French diplomatist, general, and author, descended from an ancient family, one of whose members was Pope Urban V. Louis XVI. intrusted him with a negotiation in Holland, and on his return he formed the plans, offensive and defensive, for the campaign of 1793. The fall of the king interrupted his career, and he retired to private life, devoting himself to literature. He wrote "Essai Théorique et Pratique sur les Batailles," "Recherches sur la Force de l'Armée Française," &c.; and "Tableau Historique de la Guerre de la Révolution de France," 1808, in conjunction with General Servan; of which work only 3 vols. were published, when it was suppressed by order of Buonaparte. Died, 1815.

GRIMSTON, Sir HARBOTTLE, an eminent

English lawyer in the time of Cromwell, was born in Essex, about 1594. He studied in Lincoln's Inn, and in 1638 became recorder of Colchester, for which place he was also returned to parliament in 1640. He acted for some time in opposition to the king, but disapproved of the violent measures to which his party had recourse, and after the king's death he went abroad. In 1660 he was chosen speaker of what was called "the healing parliament," and he was one of the commissioners who waited on Charles II. at Breda; on whose restoration he was made master of the rolls. He published the "Reports of Sir George Croke," and died in 1683.

GRINDAL, EDMUND, archbishop of Canterbury, was born at Kensington, in Cumberland, in 1519. In 1559, he was chosen master of Pembroke Hall, and the same year preferred to the see of London; in 1670 he was translated to York, and in 1676 to Canterbury. Two years afterwards he was suspended from his archiepiscopal functions, for refusing to obey Queen Elizabeth's order to suppress prophesying, or associations of the clergy to expound the Scriptures. At length his sequestration was taken off, though he never completely recovered the royal favour. He contributed to "Fox's Acts and Monuments," and founded the celebrated school of St Bee's, in Cumberland. He was a man of great learning, piety, and moderation; and an ornament to the church of which he was a prelate. Died, 1683.

GROCVN, WILLIAM, a distinguished classical scholar, born at Bristol, in 1442, and educated at Winchester School, and New College, Oxford. He went to Italy to study Greek, and afterwards taught it publicly at Oxford. This was an alarming innovation, and excited much opposition. Grocyn was the friend of Dean Colet, the tutor of Erasmus, and godfather to Lilly the grammarian. A Latin epistle of his to Aldus Manutius is prefixed to Linaere's translation of Proclus de Sphæra. Died, 1519.

GRONOV, or GRONOVIVS, JOHANN FRIEDRICH, a learned critic and philologist, born at Hamburg, in 1611. He studied at Leipzig and Jena; travelled through France, Holland, and England; and became professor of belles lettres at Leyden, where he died in 1671. With extensive knowledge he combined indefatigable industry, a modest opinion of his own merit, and amiable manners. He published a number of the classics, with valuable notes and improved readings; "Commentarius de Sesterciliis," and an edition of Hugo Grotius's work, "De Jure Belli et Pacis."

GRONOVIVS, JACOB, son of the preceding, was born at Deventer, in 1645. He was educated entirely under his father, whom he surpassed in learning, though he fell short of him in modesty and liberality. After studying the civil law, he visited England, where he resided some months in both universities; and, on his return to Leyden, published editions of Macrobius and Polybius. In 1672 he went to France, and from thence to Italy, where the grand-duke of Tuscany gave him a pension, and obtained for him a

professorship at Pisa, and then returned to be appointed to the professorship of history, geography, and antiquities in the university of Leiden. His works are very extensive; his "Thesaurus Antiquitatis" is in 10 vols. folio; and edited the "Antiquities of France." Died, 1716.

GROS, ANTOINE, distinguished French painter, born at Paris, 1771. He devoted to the illustrious history of France, Napoleon; and his picture of Napoleon is very conspicuous for execution. Died, 1845.

GROSE, FRANCIS, antiquary, was born in Surrey. His father left him a good fortune, and became adjutant in the Hampshire militia. His wit and humour, position, but his impetuosity, which he published in his histories in England and France. The success of this work made a tour of Scotland, and before he had finished his tour he was elected to the office of surveying and sketching the king's domain, but he died, at Dublin, in 1791. His "Antiquities," "The Ancient Armour and Antiquities," and other works are very valuable.

GROSSETESTE, ROBERT, one of the great energetic prelates of the 12th century, was born about 1175. He distinguished at the university of Paris, and became a theologian. He obtained the patronage of the king, and was appointed bishop of Lincoln, and subordinate church appointments of that diocese. He displayed episcopal courage in his decision, and courage in his ecclesiastical and political opinions, and in opposing his authority and church alike against pope Urban IV. He published the "Life of this prelate." Dr Pegge in 1783. Died, 1253.

GROTEFEND, DR GOTTFRID, distinguished antiquary and oriental scholar, was born at Hanover, studied at Göttingen, and became the director of the university, which office he held for many years. He was the author of many works on various branches of science, and held the title of fame rests on his decipher the Persepolitan inscriptions, which have been the result of his labours. He died, 1852.

GROTIVS, or DE GROTIUS, a distinguished scholar and statesman, was born at Delft, in Holland, in 1583.

professorship at Pien. This he held two years, and then returned to Leyden, and was appointed to the professorship of belles lettres and geography in that university. His acquirements in criticism and philology were very extensive; he compiled the valuable "Thesaurus Antiquitatum Græcarum," 13 vols. folio; and edited many of the classica. Died, 1716.

GROS, ANTOINE JEAN, Baron, a distinguished French painter, professor of painting at the Ecole Royale des Beaux Arts, was born at Paris, 1771. His pencil was chiefly devoted to the illustration of subjects from the history of France during the career of Napoleon; and his pictures, though coarse, are conspicuous for vigour and facility of execution. Died, 1836.

GROSE, FRANCIS, an eminent English antiquary, was born in 1731, at Richmond, in Surrey. His father was a jeweller, and left him a good fortune, which he soon spent, and became adjutant and paymaster in the Hampshire militia. He was remarkable for his wit and humour, and of a generous disposition, but his imprudence involved him in great difficulties, to clear himself from which he published his "Views of Antiquities in England and Wales," 8 vols. 4to. The success of this work induced him to make a tour of Scotland with the same object; and before he had completed this publication he went to Ireland, with the design of surveying and sketching the antiquities of that kingdom, but while thus employed he died, at Dublin, in 1791. Besides his "Antiquities," he published a "Treatise on Ancient Armour and Weapons," "Military Antiquities," and other works.

GROSSETESTE, ROBERT, bishop of Lincoln, one of the greatest scholars and most energetic prelates of his age, was born probably about 1175. He studied with great distinction at the universities of Oxford and Paris, and became a teacher at the former. He obtained the patronage of Hugh de Wells, bishop of Lincoln, and after holding several subordinate church appointments, he became bishop of that diocese in 1235. During his episcopate he displayed great earnestness, decision, and courage in the discharge of his ecclesiastical and political duties, maintaining his authority and the liberties of the church alike against pope or king. A valuable Life of this prelate was published by Dr Pegge in 1793. Died, 1263.

GROTEFEND, DR GEORG FRIEDRICH, a distinguished antiquary and classical and oriental scholar, was born at Munden, in Hanover, studied at Göttingen, and after holding various appointments as a teacher, became the director of the Lyceum at Hanover, which office he held till his death. He was the author of many profound treatises on various branches of philology; but his chief title to fame rests on his being the first to decipher the Persopolitan cuneiform inscriptions, which have proved so fertile in their results in the hands of Botta, Hincks, Leyard, Rawlinson, and other eminent scholars. Died, 1853.

GROTJUS, or DE GROOT, HUGO, an eminent scholar and statesman, was born at Delft, in Holland, in 1583. He was de-

scended from a noble family, received an excellent education, and gave early manifestations of surprising talents. In 1599 he commenced his career as advocate; and he was successively appointed historiographer, advocate-general of Holland and Zealand, a member of the states-general, and envoy to England. Hitherto his life had been marked by splendour, but now it began to be clouded by the part which he took in the Arminian controversy. In 1613 he became syndic, or pensionary, of Rotterdam; and, declaring himself on the side of Barneveldt, he supported him, and the cause of the Arminians, by his pen and influence. But he narrowly escaped the fate of Barneveldt, who suffered on the scaffold, and received sentence of imprisonment for life in the fortress of Loevestein. From this, however, at the expiration of 18 months, which he had employed in writing his celebrated "Treatise on the Truth of the Christian Religion," he succeeded in escaping. This was effected by the management of his wife, who contrived to have him carried out of the castle in a chest that had been used for the conveyance of books and linen. Grotius at first sought an asylum in France; and it was during his residence there that he composed his great work, "De Jure Belli et Pacis." After an absence of 12 years, he returned to his native country, relying on the favour of Frederic Henry, prince of Orange, who had written him a sympathizing letter. But, by the influence of his enemies, he was condemned to perpetual banishment. He passed the remnant of his life in the diplomatic service of Sweden, and died, at Rostock, in 1645. With the talents of the most able statesman, Hugo Grotius united deep and extensive learning. He was a profound theologian, a distinguished scholar, an acute philosopher, a profound jurist, and an erudite historian. Among his works not mentioned above may be noticed, "De Antiquitate Reipublice Batavicae," "History of the Goths," &c.

GROUCHY, EMANUEL, Marquis of, a distinguished marshal of France, and a scion of a noble Norman family, was born at Paris, 1766. In 1789 he was a sub-lieutenant of the royal gardes du corps; but embracing the new ideas, he took part in the wars of the revolution, and gained great distinction, especially in the Alps and La Vendée, where he was named general of division in 1793. The decree which deprived all the nobles of France of military rank fell heavily upon him; but nothing daunted, he joined the army as a private, and his distinguished gallantry soon led to his restoration. Despatched in 1798 to the army of Italy, under the command of Joubert, he planned the abdication of the king of Sardinia, and thus united Piedmont to France. He took a glorious part in the battle of Novi, where he received 14 wounds, and fell into the enemy's hands. His bravery was no less conspicuous on the fields of Hohenlinden, Eylau, Friedland, Wagram, Moscow, &c.; and he obtained the marshal's baton from the hands of the emperor shortly before his abdication. During the Hundred Days he was opposed to the Duke d'Angoulême in the south, and made him prisoner. He was then summoned into

Belgium, where he played an important part. He had already carried the villages of Fleurus (June 16), and Ligny (June 17), and was marching according to his instructions in pursuit of Blücher, with a body of 30,000 men, when the battle of Waterloo was fought. Not getting instructions in time, he could not take part in the battle, and his absence may in some measure be said to have decided the fortune of the day. At the restoration his title of marshal was not acknowledged, and remained so till 1830. In 1832 he was created a peer. Died, 1847.

GRUBENMANN, JOHANN ULRIC and JOHANN, two Swiss mechanics, who having been brought up as carpenters, devoted their entire attention to the construction of wooden bridges without the support of piers. The most extraordinary of these were at Reichenau, Wettingen, and Schaffhausen; the latter, over the Rhine, being nearly 400 feet long. During the campaign of 1799 they were all destroyed by the French. The ingenious builders died about the end of the 18th century.

GRUBER, JOHANN GOTTFRIED, a distinguished German scholar, was born at Naumburg, in 1774. He was educated at the university of Leipzig, became a professor in the university of Wittenberg, and afterwards at Halle, where he made the acquaintance of Ersch, then librarian to the university. In 1818 he undertook, in conjunction with Ersch, the editorship of the vast "Encyclopædia of Arts and Sciences," now so well known and highly esteemed, but still far from completion. On the death of Ersch, in 1828, Gruber became sole editor of section A to G. He was author of many separate works, among which are, "Wörterbuch für Aesthetik und Archæologie," "Geschichte des menschlichen Geschlechts aus dem Gesichtspunkte der Humanität," and "Wieland's Leben." Died, 1851.

GRUTER, JOHN, an eminent Dutch philologist, born at Antwerp, in 1560. His mother was an Englishwoman, and he was educated at the universities of Cambridge and Leyden. He held professorships at Wittenberg and Heidelberg, but suffered greatly from the wars of that period, losing his valuable library at the sack of Heidelberg. He published editions of many of the Latin classics, but his great work was the "Corpus Inscriptionum antiquarum totius Orbis Romani," which appeared in 1601; and was republished, greatly extended, by Grævius, in 1707. Died, near Heidelberg, in 1627.

GRYPHIUS, ANDREAS, a celebrated German dramatist, was born at Glogau, in 1616. He was called the Cornelle of Germany, and his tragedies acquired great popularity. He also wrote a keen satire on the old comedies of his countrymen, and produced some smart epigrams. Died, 1684.

GRYPHIUS, SEBASTIAN, a printer in the 16th century, who settled at Lyons, and was distinguished for the beauty of his Greek and Hebrew types. Died, 1556.

GUADET, MARGUERITE ELIE, one of the most distinguished of the Girondists, was born in 1758. He practised as an advocate at Bordeaux, and was chosen deputy to the Legislative Assembly, in 1791. He joined at

first the extreme party of the Jacobins, but sought afterwards to check their excesses, in vain. He was a member of the Convention, and soon after the fall of his party was arrested, and guillotined at Bordeaux, July, 1794.

GUARINI, BATTISTA, a celebrated Italian poet, born at Ferrara, in 1637. He was secretary to Alphonso, duke of Ferrara; next, to Ferdinand de Medici, grand-duke of Tuscany; and, subsequently, to the duke of Urbino. He was well acquainted with polite literature; wrote several admired poems; but his chief composition is his pastoral drama, entitled "Il Pastor Fido." In some respects this poem is considered rival Tasso's "Aminta;" and it has passed through a very great number of editions, besides being translated into almost all European languages. Died, 1812.

GUARINI, or GUARINO, a native of Verona, descended of an illustrious family, and celebrated as having been the first Italian who taught Greek after the restoration of letters in Europe. Died, 1460.

GUELF, or GUELFH (from the Italian *Guelfo* and the German *Welfen*), the name of a celebrated family, which, in the 11th century, was transplanted from Italy to Germany, where it became the ruling race of several countries. The family still continues in the two lines of Brunswick—the royal in England, and the ducal in Germany. The memory of this ancient name was revived by the foundation of the Hanoverian Guelphic order.

GUERCINO (properly GIANFRANCESCO BARDIERI, but surnamed *Guercino* from his squinting), was a celebrated painter, born at Cento, near Bologna, in 1593. He studied under Cremonini and Gennari; but adopted two or three styles in succession, and was most successful, perhaps, in his imitation of Caravaggio. He had a school of painting at Cento attended by many students. His finest work is the great picture of St Petronilla in the Capitol. One fine specimen of Guercino is in the National Gallery, "Angels weeping over the dead body of Christ." The duke of Mantua conferred on him the honour of knighthood; and several sovereigns endeavoured, in vain, to draw him into their service. He died in 1666, very rich, notwithstanding he had expended large sums in building chapels, founding hospitals, and other acts of charity and devotion.

GUERICKE, OTTO VON, a distinguished experimental philosopher, was born, 1696; studied at Leipzig, Jena, and Leyden; travelled in France and England; and settled at Magdeburg, where he eventually became burgomaster. He invented the air-pump, and in 1654 made the first public experiment with his machine at the diet at Ratibon, before the Emperor Ferdinand III., several electors, and other estates of the empire. The pressure of the atmosphere he exhibited by means of two large hollow hemispheres of copper and brass, an ell in diameter. These being fitted closely together, the air contained in the hollow sphere thus formed was exhausted by means of an air pump. Guericke then harnessed horses to strong rings, attached to the hemispheres, and they

attempted to y number of the without access at length made report. His el knowledge also 1684.

GUERIN, PIERRE, painter, was born a scholar of Bern, the most eminent school. Among h were "Marcus Se" "the Emperor par" "Cairo;" "Clytem" "Aurora." "Dido" came professor at baron, and member of Honour. A Gricault, Ary Schriek, who all disti masters in the New Rome, director of th in 1838.

GUERIN, MAURICE, poet, was born of a the south of France, Paris to be educated, went to John Lamenn at La Chanaye, in H there about a year, b to recognize the nobl lieve in the mislon comparatively unfini and uninterested in h now to live troubled the life, but his marri 1838, promised to set h his health, however, consumption within a letters, and Poems, w and have excited much France, but in England the principal composi poems entitled "Le C accchante," in which melody he expresses wreek feeling and thoug the world. attempted in vain to separate them. The number of the horses was increased to 30 without success; but an additional number at length made them separate with a loud report. His electrical and astronomical knowledge also was considerable. Died, 1684.

GUÉRIN, PIERRE NARCISSE, French painter, was born at Paris in 1774. He was a scholar of Bagnant, and became one of the most eminent painters of the classical school. Among his most celebrated works were "Marcus Sextus" exhibited in 1800; "the Emperor pardoning the Insurgents at Cairo," "Clytemnestra," "Cephalus and Aurora," "Dido and Æneas." Guérin became professor at the school of Fine Arts, and member of the Institute and Legion of Honour. Among his scholars were Gérard, Ary Scheffer, and Eugène Delacroix, who all distinguished themselves as masters in the new Romantic School. Died at Rome, director of the French Academy there, in 1838.

GUÉBIN, MAURICE DE, a young French poet, was born of a poor but noble family in the south of France, in 1810. He was sent to Paris to be educated, and at the close of 1832 went to join Lamennais, in his retirement at La Chenaye, in Brittany. He remained there about a year, but although he seemed to recognize the noble character, and to believe in the mission of Lamennais, he felt comparatively uninfluenced by his teachings, and uninterested in his aims. The problem now to live troubled the next few years of his life, but his marriage to a rich lady, in 1834, promised to set him free from low cares. His health, however, failed, and he died of consumption within a year. His Journal, Letters, and Poems, were published in 1862, and have excited much interest, not only in France, but in England and other countries. His principal compositions are the prose poems entitled "Le Centaure" and "La Mouchante," in which with much grace and melody he expresses what he supposes as the true feeling and thought respecting nature and the world. From childhood he showed singular and profound susceptibility to the beauties of nature, and a fondness for dreamy speculation. He was of a religious temperament, but seems not to have had latterly any definite belief in Christianity.—His sister,

VICENTE DE GUÉRIN, five years older than himself, was a woman of equally remarkable character. The love of her brother was the predominant element of her life; it was such a pure, deep, and absorbing love as is most rarely seen. She was a fervent Catholic, and saw with pain the loosening of her brother's hold on his early beliefs. She kept a journal, which was intended for his eye, and of no other. It has been published since his death, and has been read with great interest.

GUERRERO, VICENTE, elected president of the United Mexican States in 1829, was born in a Creole. At the very commencement of the revolution in Mexico he took arms against the royalists, and never ceased to occupy a prominent position in the affairs of his country. On repeated occasions, from 1819 to 1828, General Guerrero became

the rallying point of the liberal or popular party, the Yorkinos, and was repeatedly called into active service in his military capacity. Having been successful in his military contests with the aristocratical party, he at length, in 1829, was elected to the presidency. The expedition of Barradas soon gave employment to the new government; and the better to enable the president to meet the exigency, he was invested with extraordinary powers; but after the victory over the Spanish troops, and when the invading expedition was destroyed, Guerrero evinced an unwillingness to relinquish the dictatorship, which became the pretext of another revolution; and Bustamante, the vice-president, assumed the reins of government. Guerrero, however, was not long idle; in September, 1830, he collected a large force at Valladolid, and established a form of government in opposition to that of Bustamante, and the whole country was agitated almost run. In February, 1831, he was taken, and shot.

GUESCLIN, BERTRAND DU. [DUGUES-CLIN.]

GUEST, Sir J. J., Baronet, one of the largest ironmasters in the world, deserves a place in our Biographical Treasury, as one of that class to which this country owes so much of her wealth and prosperity. Like the Arkwrights and the Peels, by his own skill and industry, he raised to the greatest prosperity a most important branch of British trade, and accumulated a colossal fortune. His grandfather, John Guest, the son of a small freeholder at Broseley, in Shropshire, accompanied, in the middle of the last century, to South Wales, a well-known cannon-founder named Wilkinson, and the superintendence, under their joint management, at Dowlais. The works were sold at his death to a firm, of which his son, the father of the late baronet, was the manager. In 1806 they only produced yearly about 6000 tons of iron, and were, on the death of the proprietors, in considerable pecuniary embarrassment. The entire management then devolved upon Sir J. J. Guest, whose extraordinary capacity for business, his mechanical ingenuity (to which many of the most important improvements in the working of iron are to be attributed), and by a judgment in mercantile transactions rarely equalled, not only cleared the firm from debt, but raised the produce of the mines in a few years to no less than 68,000 tons. In 1849 the entire property in the Dowlais works became vested in him. He was returned for the newly created borough of Merthyr after the passing of the Reform Bill, and represented that place till his death. He was made a baronet in 1838; and married in 1833 (being then a widower) the Lady Charlotte Bertie, only daughter of the earl of Lindsay—a lady to whom is owing much of the moral and social improvement that has taken place in the population connected with the Dowlais works. Identifying herself with the people, she acquired their language, translated and published their national traditions, and directed her well-deserved influence to the establishment

appointment of royal interpreter in 1745. He was afterwards professor of Syriac at the College Royal. He was author of the "Histoire Générale des Huns, des Turcs, des Moguls, et de autres Tartares Occidentaux," 5 vols. &c. and of many able memoirs contributed to the Academy of Inscriptions, of which he was a member; but was reduced to poverty by the revolution, and died at Paris, in 1800.

GUILLOTIN, JOSEPH IGNACE, a French physician, who, during the revolution, proposed the use of the guillotine, an instrument made after the fashion of the *maiden*, which was used on the Scottish borders in the 16th century. Mons. Guillotin practised medicine in Paris many years, and was much respected. He was a member of the National Assembly, where his political principles were marked by moderation; and his introduction of this instrument of death was from a humane motive—that of rendering capital punishment less painful. He was not, as has been reported, the victim of his own contrivance, and was greatly annoyed by its being called by his name. He died, in a peaceful retirement, in 1814.

GUISCARD, ROBERT, duke of Apulia, one of the most celebrated of the Norman adventurers in Italy, joined his brothers there about 1033, and in the following year, with his brother Humphrey, defeated and took prisoner Pope Leo IX. at the battle of Civitella. At the head of a small band he penetrated into Calabria, his aim pillage, his means force or knavery. On the death of Humphrey, in 1037, Robert was accepted as the leader of his countrymen, completed the conquest of Apulia, and obtained from Pope Nicholas II. the title of duke of Apulia and Calabria. He was joined in 1060 by his younger brother Roger, with whom he quarrelled, but soon made peace, Calabria being divided between them. He made himself master of Tarentum and Otranto, and took Bari in 1071 after a siege of four years. He assisted Roger at the siege of Palermo, of which he retained the sovereignty, giving the rest of Sicily to his brother. In 1074 he was excommunicated by Pope Gregory VII., and again four years later; but in 1080 he was reconciled, and did homage to the pope for his duchies. In the following year he engaged in war with the emperor of the East, and at the same time his subjects revolted. He returned and quickly suppressed the revolt. In 1084 Gregory VII., then besieged in San Angelo, the Emperor Henry IV., called Robert to his aid. The emperor did not wait to encounter him, but home was, nevertheless, besieged and partly burnt by the army of Normans and Saracens. He was continuing successfully the war with the Greeks, when he died at Cephalonia in 1085. Robert, by his first wife, was father of Bohemond, married to Constantine Duca, son of the Emperor Michael; another to a son of Azzo, count of Barcelona.

GUISE, FRANCIS OF LORRAINE, Duke of the most illustrious of his family, three times lieutenant-general of the kingdom, was born at France in 1519. He entered the army, and

soon gained, by his generous and affable conduct, the affections of both officers and privates. He distinguished himself at the siege of Houlougno in 1545, where he received a severe wound in the head. In 1552 he was named lieutenant-general of the three bishoprics, and successfully defended Metz when besieged by Charles V. with an army of 100,000 men. He commanded the army sent to Italy in 1557; was soon after invested general, and took Calais from the English. He exercised the chief power under Francis II., and with great rigour; discovered and some of his influence under Charles IX., and retired, but was recalled by the king of Navarre; by the "Massacre of Vassy" kindled the civil war of Catholic and Huguenot; took Rouen; contributed to the victory of Dreux; and was again made lieutenant-general of the kingdom. While engaged at the siege of Orléans, he was assassinated in February, 1563.

GUISE, CHARLES OF, usually called the **CARDINAL OF LORRAINE**, was the minister of Francis II. and Charles IX. He was one of the first chiefs of the Catholic "League," and though he had some great qualities, he is notorious for his violent and intolerant spirit, and his memory will ever be held in execration for the furious persecution he promoted against the Protestants of France. Born, 1525; died, 1574.

GUISE, HENRY OF LORRAINE, eldest son of Francis, duke of Guise, was born in 1550. He is memorable in the history of France for his bravery; but he was of a turbulent, ambitious, and cruel disposition. After having distinguished himself in Hungary by his valour against the Turks, he returned and took part in the religious wars of his own country, advised the massacre of St. Bartholomew, and murdered the great Admiral Coligny. He placed himself at the head of the League, professedly established to defend the Roman Catholic religion, the king, and the state, against the designs of the Huguenots, or French Protestants. This league was formed by his brother the cardinal, and the Huguenots were massacred by thousands. Paris soon became an open rebel; he entered Paris against the king's express order, and the streets being barricaded to prevent his progress, this fatal day is called in French history, "the day of the barricades." The king escaped to Blois, and convened the states-general; and the duke of Guise had the boldness to appear there, and was named lieutenant-general of the kingdom. A forced reconciliation then took place; but it being discovered that Guise had formed a plan to dethrone the king, the latter procured his assassination as he was entering the council chamber, Dec. 23, 1588.

GUISE, HENRY II., DUKE OF LORRAINE, grandson of the preceding, was born in 1614. He is described as prodigal and brave, addicted equally to love and war. After having joined in the rebellion of the Count de Soissons, and received a pardon, he was induced to join the revolted Neapolitans; and, at their head, displayed great gallantry; but

he at length fell into the hands of the Spaniards. He made another attempt to conquer Naples, returned to Paris, and was made grand chamberlain of France. Died, 1664.

GUIZOT, ELIZABETH CHARLOTTE PAULINE, a French miscellaneous writer, was born at Paris, in 1773. Her father died when she was a child, and her family having been brought to distress by the revolutionary changes, she was induced to attempt authorship, in order to provide for their wants. She produced the novels entitled "Les Contradictions" and "La Chapelle d'Ayton;" she also wrote in the public journals; and her articles on manners, the drama, &c., attracted considerable attention. In 1812 she married M. Guizot, the distinguished statesman; and she subsequently acquired no small share of literary distinction by her "L'Ecolier ou Baoul et Victor," 4 vols., "Nouveaux Contes," and "Lettres de Famille sur l'Education Domestique." Died, 1827.

GUNDULF, bishop of Rochester, 1077, was one of the Norman ecclesiastics brought over by William the Conqueror. He was a celebrated architect; and built that part of the Tower of London called the White Tower. He also rebuilt Rochester Cathedral. Died, 1108.

GUNNER, JOHN ERNEST, bishop of Drontheim, was born at Christiania, in Norway, in 1718. He founded the Royal Norwegian Society, in the Transactions of which he published several valuable papers on natural history. On account of his zeal for botany, Linnaeus gave his name to a plant in his system. He published "Flora Norvegica," and died in 1773.

GUNST, PIETER VAN, Dutch engraver, was born about 1666. He engraved many portraits after Vandyck, Vander Werf, Karel de Moors, and other painters, and a few historical pieces.

GUNTER, EDMUND, mathematician, was born in Herefordshire, in 1581. He was educated at Westminster School; from whence he went to Christchurch, Oxford. He was promoted to the professorship of astronomy in Gresham College, where he died in 1626. He invented the sector, and the famous "rule of proportion," which, in its mechanical form, is styled "Gunter's scale." He also discovered the variation of the magnetic needle. His works have been repeatedly published. Died, 1628.

GURNEY, JOHN JOSEPH, a distinguished philanthropist, the brother of Elizabeth Fry, and her companion in her memorable visits to the prisons of Great Britain and the continent, was born at Earlham Hall, Norfolk, Aug. 2, 1768. When four years of age he lost his mother, and his early education was intrusted to his three eldest sisters. At a later period he went to Oxford, where he enjoyed many advantages of the university without becoming a member, or subscribing to the thirty-nine articles. His preference ultimately became settled in favour of the views and profession of the "Quakers," among whom he was born; and consistently with them he lived and died, by no means finding in them any barrier to the freest and freest association with any other body of

Christians, or to a personal friendship with the highest ecclesiastical dignitaries of the diocese. Mr Gurney was the author of numerous works which gained him a highly respectable rank in the republic of letters. Among these may be mentioned his "Notes on Prisons and Prison Discipline," which was reviewed by the Rev. Sydney Smith in the "Edinburgh;" "Essays on the Evidences, Doctrines, and Practical Operations of Christianity;" "A Winter in the West Indies," &c., &c., besides numerous minor tracts on religious and philanthropical subjects. Died, 1847. "Memoirs" of this truly excellent man were published by J. B. Fraithwaite, in 1854.

GURWOOD, Colonel JOHN, the celebrated editor of the "Duke of Wellington's Despatches," entered the army as an ensign in the 52nd foot, in 1806, and served in the Peninsula with that regiment from that year to 1812. At the assault of Ciudad Rodrigo he led the forlorn hope at the lesser breach, and received a wound in his skull from a musket-ball, which affected him for the remainder of his life; and on this occasion he took the governor, General Banier, prisoner, whose sword was presented to him by Lord Wellington. After serving with great credit during the closing campaigns of the war, we find him among the heroes of Waterloo, where he was again severely wounded. He obtained his rank as lieutenant-colonel in 1841; but he had been placed on the unattached list in 1830. Having filled the highly honourable post of private secretary to field-marshal the duke of Wellington, he undertook the grateful office of editing the Wellington Despatches, in connection with which his name will be handed down to posterity. In order to testify the high opinion the duke had of his services, he appointed him deputy-lieutenant of the Tower of London. The Wellington Despatches, which had been in the course of publication during many years, was a work of labour, requiring great care and scrupulous fidelity, while it continually called into exercise great vigour of thought and judgment; and it had not long been concluded when the health of the gallant soldier and faithful secretary gave way, and he put an end to his valuable life in a fit of temporary insanity, at Brighton, Dec. 25, 1845.

GUSTAVUS I., called **GUSTAVUS VASA**, King of Sweden, was son of Eric Vasa, duke of Gripsholm, a descendant of the royal family, and was born in 1490. Having formed the project of delivering his country from the yoke of Denmark, he was seized and imprisoned by Christian II. But he escaped, and notwithstanding great perils he reached Dalecarlia; gradually roused the peasants against the foreign despot, took Upsal and other towns in 1521, and received the title of regent from the states. In 1523 he was proclaimed king, took Stockholm, and expelled Christian. He did not at first, however, accept the title of king, and was not crowned till 1528. In a national council the following year he procured the abolition of the Catholic religion in Sweden, and established Protestantism. In 1544 the kingdom was declared hereditary in his family. He was

an able ruler, authority; rose his country, in its education, in 1540, he left sure full, with towns fortified.

GUSTAVUS den, was the and was born father Charles the war with D He selected a minister, and the nobles to the right they had been them to his inter with Denmark terms; was crowned 1590 Eleanor, d Brandenburg, w celebrated Christian throne; acquired Livonia, and su Sigismund, king crown of Sweden ante of German prompted, too, by the Protestant faction at the crucial the Protestants w in 1630, to their 8000 men, which a body of Engl of Hamilton. There is Gustavus Adolphus, b **GUSTAVUS XII.**, ki son of Adolphus Freder sister of Frederick II. was born in 1746, and in 1771. The kingdom traction and anarchy monopolized the chil themselves divided in Gustavus immediately suppression of these bloodless revolution c A new constitution w

an able ruler, and exercised almost absolute authority; rendering very great services to his country, in its legislation, its manners, its education, and its commerce. At his death, in 1660, he left his country at peace, the treasury full, with a fine fleet, and the frontiers fortified.

GUSTAVUS ADOLPHUS, King of Sweden, was the grandson of Gustavus Vasa, and was born in 1624. He succeeded his father Charles IX. in 1611, and continued the war with Denmark, Russia, and Poland. He selected Axel Oxenstiern for his chief minister, and by his counsel restored the nobles to the rights and privileges of which they had been deprived, and thus attached them to his interests. He concluded peace with Denmark in 1613 on advantageous terms; was crowned in 1617; married in 1620 Eleanor, daughter of the Elector of Brandenburg, who became the mother of the celebrated Christina, his successor on the throne; acquired subsequently great part of Livonia, and successfully fought against Sigismund, king of Poland, who claimed the crown of Sweden. Invited by the Protestants of Germany, and urged by France; prompted, too, by his own earnest regard for the Protestant faith, and his sorrowful indignation at the cruel persecution under which the Protestants were suffering, he marched, in 1630, to their aid, with a small force of 8000 men, which was afterwards augmented by a body of English troops under the duke of Hamilton.

From the Isle of Rügen, of which he first made himself master, he advanced from point to point in Pomerania and Mecklenburg, victorious at every step. He took eighty fortified towns in eight months. At length the emperor sent his great general Tilly to oppose him, and Gustavus won a great victory over him at Leipsic on the 7th September, 1631. Saxony heartily supported Gustavus, who soon after took Mentz, and in April 1632 defeated Tilly again at the passage of the Lech. The emperor, alarmed by the invasion of Bohemia, made Wallenstein commander-in-chief; who recovered Bohemia, and after holding a strong position near Nürnberg for many weeks, met Gustavus on the field of Lützen on the 6th November, 1632. Victory was with the Swedes, but their heroic leader fell in the fight, not without suspicion of assassination. Gustavus Adolphus was one of the noblest men, and one of the greatest military commanders of modern times. He was great, also, as a ruler and administrator, and did not allow war to exclude commerce and the internal regulation of his states from his earnest attention. There is a recent English Life of Gustavus Adolphus, by B. Chapman.

GUSTAVUS III., king of Sweden, was the son of Adolphus Frederick and Louisa Ulrica, sister of Frederick II., king of Prussia. He was born in 1746, and succeeded his father in 1771. The kingdom was in a state of distraction and anarchy, and the nobles had monopolized the chief power, and were themselves divided into two hostile parties. Gustavus immediately applied himself to the suppression of these disorders, and by a bloodless revolution completely succeeded. A new constitution was introduced and ac-

cepted, and the king became supreme. The amendment of the laws next engaged his attention. He abolished the practice of torture, and introduced other good regulations in the administration of justice. He also formed a college of commerce, and reformed his army and navy. In 1788 he was involved in a war with Russia and Denmark. Gustavus headed his army himself, and stormed the defences of Frederickshall, where he took and destroyed a great number of vessels. In 1789 the king, harassed by the opposition of some of the nobles, arrested the leading men, and compelled their acceptance of a measure which extended his authority considerably. On the breaking out of the French revolution, a coalition was formed between the northern powers and Spain, by which it was agreed that Gustavus should march against France at the head of a considerable army; but while preparations were making, he was shot at a masquerade by Ankarstroem, a disbanded officer of the army, March 15, 1792, and died on the 29th.

GUSTAVUS IV., ex-king of Sweden, son of Gustavus III., was born in 1778, and ascended the throne when his father fell by the hand of an assassin, March 29, 1792. When the duke of Enghien was seized, and after a mock trial shot, by the orders of Napoleon, Gustavus vowed eternal hostility to the French emperor. He ordered his ambassador to leave Paris, dismissed the French ambassador from Sweden, and returned to the king of Prussia, and the black eagle, with which Napoleon had been invested, nobly saying, "that he never consent to be brother companion of an assassin." His hostile proceedings, however, became at last so pregnant with danger to his country, that a council of state entreated him to make peace. This he refused to do; a revolution in Sweden was the consequence; Gustavus was imprisoned, and he afterwards signed his abdication. His uncle, the duke of Sudermania, was then raised to the throne by the title of Charles XIII., and Christian Augustus, of Holstein Augustenburg, and Christian Augustus, of Holstein Augustenburg, was invested with the title of prince royal of Sweden, or heir-apparent. This prince dying soon after, the succession was transferred to Marshal Bernadotte, who in 1818 ascended the Swedish throne as Charles John XIV. After his abdication, Gustavus was a mere wanderer upon the face of Europe, sometimes bearing the designation of Count Gottorp, sometimes that of the duke of Holstein, and again the more humble one of Gustavson. He was in England, at Hartwell, with Louis XVIII. His latter years were spent in poverty. Died at St Gall, 1837.

GUTCH, JOHN, an antiquarian writer, who was registrar of the university of Oxford, rector of St Clement's, and chaplain of All Souls' College. He published "Collectanea Curiosa," from the MSS. of Archbishop Sancroft, 2 vols.; "The History and Antiquities of the Colleges," &c., from MSS. in the Bodleian Library, written by Anthony Wood; "The Antiquities and Annals of the University," &c. Died 1831, aged 86.

GUTENBERG, JOHN or HENNE, inventor of printing with moveable types, was born

at or near Mentz about 1400. He was of a noble family, and was compelled, probably by civil dissensions, to retire to Strasburg about 1424. He appears to have lived there for twenty years, and it is pretty certain that his great invention was perfected before his return to Mentz in 1443. Harassed by lawsuits and pecuniary difficulties, he entered in 1450 into a kind of partnership with John Fust, a rich goldsmith of Mentz, which was dissolved five years later, Fust thenceforth carrying on the business with Schöffer. Gutenberg is said to have established another press, and went on printing. In 1465 he was received among the courtiers of the Elector of Mentz, and died in 1468. A festival was held at Mentz in 1837 on occasion of the erection there of a fine statue of Gutenberg.

GUTHRIE, WILLIAM, an indefatigable writer, was born at Brechin, Scotland, in 1708; and after receiving his education at King's College, Aberdeen, settled in London as an author. Among the various works which bear this author's name are, a "History of England," 3 vols. folio; a "History of Scotland," 10 vols.; an "Universal History," 13 vols.; the "Geographical Grammar," &c. Died, 1770.

GUTZLAFF, DR CHARLES, the well-known Chinese scholar, traveller, and missionary, was a native of Stettin, in Prussia, in 1803. In early life he was remarkable for an ardent love of learning, joined to an adventurous spirit; and having resolved to devote himself to missionary labour in foreign parts, he volunteered to go to the Dutch settlements in the East, under the auspices of the "Netherlands Missionary Society." Before proceeding thither he came to England, where he became acquainted with many friends of missions, and especially with Dr Morrison, then on a visit to this country after a long residence in China. This meeting with Dr Morrison gave Gutzlaff a strong bias towards China as his ultimate field of labour. In 1823, being then only in his twenty-first year, he proceeded to Singapore; and such was his aptitude for languages, that before he had been there two years, he was able to converse fluently in five eastern languages, and to read and write as many more. In August, 1828, in company with Mr Tomlin, an English missionary, Dr Gutzlaff set out to visit the kingdom of Siam. They remained for six months at Bangkok. Early in 1830 he returned alone to Siam, and in the spring of the following year made his first voyage to China. At Bangkok he became naturalized as a subject of the celestial empire, by adoption into a particular clan or family. Having assumed a Chinese name, and wearing the Chinese dress, and conforming to their customs, he visited, along with the crew of the junk in which he sailed, a large tract of the coast without any molestation. After a six months' voyage he reached Macao safely, in December, 1831, when he had the satisfaction of being welcomed by his friend Dr Morrison. In February of the following year he was appointed surgeon and interpreter to an expedition that was sent out by the East India Company to survey the coasts,

and obtain information as to the ports where commerce might be established. They returned to Macao early in September. In little more than a month he started on a third voyage, as far as Tientsin and Mantchou Tartary. Of these voyages he published, in 1834, an account entitled "A Journal of Three Voyages along the coast of China, in 1831, 1832, and 1833," containing much interesting information, and full of the author's personal adventures. He afterwards published two other works,—"A History of China," and "China Opened," the last of which contains the most comprehensive and correct account up to that time given in English popular literature of the topography, history, customs, laws, and literature of the Celestial Empire. In 1834 he was appointed interpreter to the British Superintendency, and subsequently secretary to the plenipotentiary, secretary to the government of Hong Kong, and superintendent of trade in China, which offices he held at the time of his death. In 1849 he revisited Europe, after nearly twenty-seven years' absence, but returned to his post at Victoria in the following year, and was actively engaged there until a fortnight before his death, which took place in 1851.

GUY OF LUSIGNAN, having married Sybilla, daughter of Amaury I., king of Jerusalem, succeeded Baldwin V., in 1186. He had a rival in Raymond, count of Tripoli. In the great battle of Tiberias, which lasted three days, Guy was defeated and made prisoner by Saladin. Jerusalem was soon after taken by the Saracens, and Guy was set free. He began the siege of Acre in 1189, and to aid him the third crusade was undertaken. He subsequently renounced his title, and received the sovereignty of Cyprus at the hands of Richard I. of England. Died, 1194.

GUY, THOMAS, the founder of Guy's Hospital, was the son of a lighterman of Hoveleydown, and born in 1644. He was brought up to the business of a bookseller, and had a lucrative trade in the importation of Bibles from Holland, and afterwards contracting with Oxford for those printed at that university; but his principal gains arose from the disreputable purchase of seamen's prize tickets, and jobbing in South Sea stock. By these means, joined to most penurious habits, he amassed a fortune of nearly half a million sterling, of which he spent about £200,000 in building and endowing the hospital in Southwark, which bears his name. He also erected almshouses at Tamworth, and made bequests to Christ's Hospital and various other charities; besides leaving £80,000 to be divided among those who could prove any degree of relationship to him. He died in 1724, aged 80.

GUYON, JEANNE MARIE BOUVIER DE LA MOTHE, a French religious enthusiast, was born at Montargis in 1648, and became a widow with three children at the age of twenty-eight. Having a strong predilection for a kind of mystical devotion, she relinquished the care of her children to others, and gave up a part of her fortune for their maintenance, while she professed to be wholly guided by "divine impulses," there-

by implying the silence of all earthly which has since been imagined the extraordinary years she was preaching her views; till her calamity having terminated, she was by a convent. The name de Maine obtained her: Her attractions of herness and fervour only made prosecution, but ended in her case.

by implying a complete renunciation of self, the silence of the soul, and the annihilation of all earthly cares and emotions, a condition which has since obtained the name of *quietism*. Misled by her heated imagination, she imagined that heaven destined her for an extraordinary mission. Thus for several years she wandered from place to place, preaching her doctrines and making converts; till her fame, reaching Paris, and calumny having been busy with her character, she was by the king's order shut up in a convent. Through the intercession of Madame de Maintenon, however, she soon obtained her liberty; and such were the attractions of her eloquence, and the tenderness and fervour of her piety, that she not only made proselytes of many ladies of the court, but enlisted the illustrious Fénelon in her cause. Her doctrines and conduct at length excited the resentment of Bossuet and other rigid ecclesiastics, and she was compelled to sign a recantation. But again pursuing the same career in Paris, she was confined in the Bastille. On being liberated, in 1702, she retired to Blois, and there passed the remainder of her life in private. Her works, which are very voluminous, are now little known. Many of her "Cantiques Spirituels" were translated by the poet Cowper, who warmly admired them. Her biography, partly written by herself, possesses deep interest for all who can enter with sympathy into the history of a mind. It was translated by Cowper, but his translation was not published. Died, 1719. There is a recent work entitled "The Life and Opinions of Madame Guyon," by T. C. Upham.

GUYTON DE MORVEAU, LOUIS BERNARD, an eminent French chemist, was the son of a lawyer at Dijon, where he was born in 1737. He was bred to the bar, and became advocate-general to the parliament of his native city; but he applied chiefly to natural philosophy and chemistry, in which latter science he made many discoveries. In 1777 he was appointed to examine the coal-mines of Burgundy, on which he made a mineralogical tour of that province; and, in the course of these inquiries, he discovered a rich lead mine. Soon after this he was engaged in writing the articles on chemistry in the *Encyclopédie Méthodique*; in 1782 he published his new chemical nomenclature, paid great attention for a time to the aerostation, and by various discoveries materially promoted the advance of science. He figured among the earliest and most violent of the revolutionists; bore a decided

enmity to the kingly authority and the priesthood; became successively a member of the Legislative Assembly, the Convention, the committee of Public Safety, and the member of the Legion of Honour; and was made an emper by Buonaparte; and was director of the Polytechnic School and administrator of the Mint. Besides his share in the *Encyclopédie Méthodique*, he was one of the principal editors of the *Annals of Chemistry*, and wrote some other chemical works. Died, 1816.

GWILT, JOSEPH, an eminent English architect and writer on architecture, was born in London in 1784. He was educated at St Paul's School, and after spending two years in the office of his father, who was an architect, he became a student of the Royal Academy in 1801. In 1816 he visited Italy, and on his return published his "Notitia Architectonica Italiana," containing short notices of the buildings and architects of Italy, with dates and useful tables. The work by which he is best known is the great "Encyclopædia of Architecture, Historical, Theoretical, and Practical." It first appeared in 1842, and has passed through several editions. Among his other works are "A Treatise on the Equilibrium of Arches;" "Scolography, or Examples of Shadows;" a translation of the "Architecture of Vitruvius;" "Rudiments of Architecture;" and the Decorative Part of Civil Architecture; and an edition of Nicholson's "Principles of Architecture." He contributed all the articles on architecture and music to the Brande's "Dictionary of Literature, Science, and Art," and the treatise on music to the *Encyclopædia Metropolitana*. His principal work as practical architect was Markree Castle, near Sligo. He was a fellow of the Society of Antiquaries from 1815, and a member of the Royal Astronomical Society or surveyor to several companies. He spent the last years of his life at Honley-on-Thames, and there died, September 14, 1863.

GWILLYM, DAVID AP, a British bard, known by the name of David of Glamorgan, and styled the Welsh Ovid, was born in 1340, in the county of Cardigan. He was one of the itinerant bards, and became steward and tutor in the family of Ivor Hael, where he died, in 1400. His poems were published in 1792, and are said, by those who profess to be judges, to be unsurpassed by any of his bardic successors.

H.

HAAAS, WILHELM, a type-founder at Basel, who improved the art of printing by the invention of a balance-press, &c. Died, 1800.

HABINGTON, THOMAS, a gentleman of fortune at Henlip, in Worcestershire, who was implicated in various treasonable practices, but who had the good fortune, though detected, to escape from the full penalty of them. He was found guilty of engaging in a conspiracy to release Mary, queen of Scots, for which he was imprisoned six years; and he was afterwards convicted of concealing some of the agents in the gunpowder-plot, and received sentence of death; but obtained a pardon, owing, as some assert, to his having been the godson of Queen Elizabeth; though, more probably, to the circumstance of his daughter being the wife of Lord Montague, and the supposed writer of the mysterious letter that led to its discovery. He was, however, restrained from leaving Worcestershire, and employed the rest of his life in collecting the topographical materials which formed the foundation of Dr Nash's history of that county. Born, 1560; died, 1647.

HABINGTON, WILLIAM, poet and historian, son of the preceding, was born at Henlip, Worcestershire, in 1605. He was educated at St Omer's and Paris; married the daughter of the first Lord Powis; and published a volume of poems, under the title of "Castara;" which, according to the judgment of modern critics, possess much fancy, elegance, and pure moral feeling. His other works are, "The Queen of Arragon," a trag-comedy; "Observations upon History," and "A History of Edward IV." Died, 1645.

HACHETTE, JEAN NICOLAS PIERRE, French mathematician, was born at Mezières in 1789. He assisted Monge and Guyton de Morveau in the establishment of the Ecole Polytechnique, in which he was named professor of geometry in 1796. After the restoration of Louis XVIII. he was deprived of his chair, and was prevented by the government from entering the Academy of Sciences; to which he only obtained admission in 1830. Among his works are—"Traité Élémentaire des Machines;" "Éléments de Géométrie;" besides numerous memoirs communicated to the Institute and other learned bodies. Fresnel and Arago were scholars of Hachette. Died at Paris, 1834.

HACKERT, PHILIPP, German painter, was born at Prenzlau in 1737. After acquiring some skill in painting, he went to Italy, his brother Johann accompanying him. He gained a great reputation by his landscapes, and was employed to paint for Catharine of Russia, and Pope Pius VI. In 1782 he settled at Naples, and soon after was appointed principal painter to the king, Ferdinand IV., who made a familiar friend

of him. Among his works are a series of large pictures of a naval victory of the Russians, views of the seaports of Naples and Sicily, and numerous Italian landscapes. Hackert's Life was written by Goethe, who praised his fidelity to nature. Died at Florence, 1807.

HACKET, DR JOHN, bishop of Lichfield, was born in 1592, received his education at Westminster and Trinity College, Cambridge; and became chaplain to James I. This appointment soon led to other church preferment. In 1623 he was presented to a stall in Lincoln cathedral, and shortly after, to the rectory of St Andrew's, Holborn, with that of Cheam, in Surrey. In 1631 he was made archdeacon of Bedford; and in 1641 he exchanged his prebend at Lincoln for a residentiaryship at St Paul's. At the Restoration he was made bishop of Lichfield and Coventry; and in that situation he exhibited a degree of munificence worthy of his station, by expending £20,000 in repairing his cathedral, and by being a liberal benefactor to the college of which he had been a member. He was author of the "Life of Archbishop Williams," &c. Died, 1670. The Life of Williams is of great interest, and even historical importance: written in a quaint and learned style, half made up of quotations, like Burton's Anatomy of Melancholy; and giving a vivid picture of the general character and position of the learned divines of the Church of England during the first half of the 17th century, and many curious glimpses of the court and the times.

HACQUET, BALTHASAR, an eminent naturalist, born at Conquet, in Brittany, in 1740. After making a scientific tour, he settled at Laybach, in Carniola; became professor of surgery at the Lyceum there; and in 1788 professor at Lemberg, and a member of the council of mines at Vienna. He produced several works illustrative of the natural history and state of the countries he explored; and died in 1815.

HADDON, WALTER, an eminent English lawyer, who, on the deprivation of Gardiner, bishop of Winchester, of the mastership of Trinity Hall, was selected to fill the vacant situation. He was afterwards president of Magdalen College, Oxford; but during the reign of Mary he was compelled to seek obscurity. Under Elizabeth he became judge of the prerogative court; and he was one of the three commissioners who met at Bruges in 1566, to arrange a treaty of commerce between England and the Netherlands. He was otherwise much employed for the government; particularly in translating into Latin the celebrated code, "Reformatio Legum Ecclesiasticarum;" and he wrote various poems and treatises in Latin, the purity and elegance of which are highly commended. Died, 1572.

HADLEY, JOHN, an English natural phil

osopher, 18th century of having in his name, belongs of Thomas Gooden, who is about the five-foot of several paper-tions. Died,

HADRIAN, emperor, born was cousin to years old, and of his illustrious, the heir painted in his cessively praetor consul. On the assumed the g the Persians s mitted the arre surr. He spent his reign in tra provinces of the Gaul, and then where he built length, from the way Frits, to be next travelled in his return, was in mysterious at Athens. In 122 the ling of a temple of holy alty, began on with seven de years. It is said th in this war. After which had its nat per, Hadrianus di the code of law Edict was public emperor. He was wise ruler, favor arts, and especial by the great archi executed or proje and many other He adopted Antor cessor.

HAEN, ANTHON, celebrated physician where he studied ur settled as a physician 20 years' residence, where he obtained in 1776.

HARTZ, or HAFERDIN, the most pop was born at Shiraz, a century. Like Anacat-1 to love and win tion of his odes is e they have been the commentaries, and l very whether they literally or allegorica have been translated Jones and others, and has been translated i about 1389; and his

osopher, who lived in the early part of the 18th century. He obtained the reputation of having invented the quadrant which bears his name, the honour of which, however, belongs of right to Sir Isaac Newton and Thomas Godfrey, an American mathematician, who separately made the invention about the same time. Hadley invented a five-feet reflecting telescope; was vice-president of the Royal Society; and contributed several papers to the Philosophical Transactions. Died, 1744.

HADRIANUS, PUBLIUS ÆLIUS, Roman emperor, born A. D. 76. His father, who was cousin to Trajan, died when he was 10 years old, and left him in the guardianship of his illustrious kinsman. He married Sabina, the heiress of Trajan, whom he accompanied in his expeditions, and became successively prætor, governor of Pannonia, and consul. On the death of Trajan, in 117, he assumed the government, made peace with the Persians and the Sarmatians, and remitted the arrears of taxes due to the treasury. He spent the remaining 18 years of his reign in travelling through the various provinces of the empire. In 120 he visited Gaul, and thence passed over to Britain, where he built the great wall, 80 miles in length, from the mouth of the Tyne to Solway Firth, to secure the Roman provinces from the incursions of the Caledonians. He next travelled into Africa and Asia, and, on his return, was initiated into the Eleusinian mysteries at Athens, where he lived for three years. In 132 the Jews, irritated by the building of a temple of Jupiter on the site of the holy city, began a war which they carried on with fierce determination for nearly four years. It is said that 980,000 persons perished in this war. After several years of ill health, which had its natural bad effects on his temper, Hadrianus died at Baise, in 138, aged 63. The code of laws entitled the Perpetual Edict was published in the reign of this emperor. He was on the whole a just and wise ruler, favoured literature and the arts, and especially distinguished himself by the great architectural works which he executed or projected at Rome, Athens, and many other cities which he visited. He adopted Antoninus Pius as his successor.

HAEN, ANTHONY DE, or VAN HAEN, a celebrated physician, was born at Leyden, where he studied under Boerhaave. He first settled as a physician at the Hague; but, after 20 years' residence, he removed to Vienna, where he obtained a professorship, and died in 1776.

HAÏZ, or HAFEZ, MOHAMMED SHEMS-EDDIN, the most popular of the Persian poets, was born at Shiraz, and flourished in the 14th century. Like Anacreon, his verse is dedicated to love and wine. The complete collection of his odes is entitled the "Divan;" commentaries, and it is a standing controversy whether they are to be interpreted literally or allegorically. Some of the odes have been translated into English by Sir W. Jones and others, and the whole collection has been translated into German. He died about 1369; and his countrymen erected a

monument to his memory, which was destroyed by an earthquake in 1825.

HAGEDORN, FRIEDRICH, a German poet, was born at Hamburg, in 1708. He was educated in the college of his native city; came to London in the suite of the Danish ambassador; and, in 1733, was appointed secretary to the English factory at Hamburg. He was author of Fables, Songs, Tales, and Moral Poems; in all of which there is considerable originality, and many of them are extremely graceful. Died, 1754.

HAGER, JOSEPH VON, professor of oriental languages in the university of Pavia, was born at Milan, in 1750; studied at Vienna, and devoted himself to the acquisition of a critical knowledge of the Chinese tongue. He resided some time in London, where he published several works explanatory of the Chinese language; but meeting with little success, he went to Paris, and falling there, went to Italy, and was professor at the university of Pavia. Among his works are, "The Chinese Pantheon," "An Explanation of the Elementary Characters of the Chinese Language," "A Dissertation on the Chinese discovered Babylonian Inscriptions," &c. Died at Pavia, 1819.

HAHN, PHILIP MATTHEW, a celebrated mechanical genius, born in 1739, at Scharnhagen. While at the university of Tübingen, he spent his leisure hours in making sundials and speaking-trumpets, grinding glasses, &c. He produced a clock showing the course of the earth and other planets, as well as that of the moon and other satellites, and their eccentricities, a calculating machine; and many other ingenious inventions. Died, 1790.

HAHNEMANN, SAMUEL, inventor of Homœopathy, was born at Meissen, in Saxony, in 1755. Educated at the high school of his native town, he studied successively at Leipzig, Vienna, and Erlangen, where his zeal in the pursuit of knowledge procured him the regard of all his teachers; and having taken his degree of M.D., he was appointed, in 1781, district physician at Gomers, near Magdeburg, where he relieved his professional labours by the study of chemistry and mineralogy. In 1784 he removed to Dresden, where he gained a high reputation; but struck with the great uncertainty of the healing art, he retired from practice, and devoted himself exclusively to chemistry and literary occupations. While thus employed he lighted on the so-called law of "similia similibus curantur," and, in 1796, he announced it to the medical world, and his whole time was now spent in testing his principles by practice, and in making known the results in various publications. In 1813 he removed to Leipzig as Magister Legens; but the persecutions of the apothecaries drove him thence to Cothen, where the duke of Anhalt-Cothen offered him an asylum in 1820. Here he remained for 15 years, extending his fame and practice; but in 1835, having married a French lady when in his 80th year, he removed with her to Paris, where he remained in the active exercise of his profession, and surrounded by numerous disciples from all parts of the world, till his decease, which took place in

1843. His chief works are the "Organon of the Healing Art," published in 1810; and "Chronio Diseases, their peculiar Nature and Homoeopathic Cure," published in 1829.

HAILES, Lord. [DALRYMPLE, Sir DAVID.]

HAKLUYT, RICHARD, historian, was born at Eyton, in Herefordshire, in 1553. He received his education at Westminster School, and at Christchurch, Oxford, where he made geography his favourite study, and read lectures on naval history. About 1584 he went to Paris as chaplain to the English ambassador, and, during his absence, was made prebendary of Bristol. On his return to England he published several works, particularly a translation from the Spanish of "Leo's Geographical History of Africa," and "Peter Martyr's" History of the West Indies." In 1605, he was promoted to a prebend of Westminster, and the rectory of Whetheringsat, in Suffolk. Died, 1616. His principal work is a valuable collection of voyages entitled "The Principall Navigations and Discoveries of the English Nation by Land and by Sea," in 3 vols. folio. This work appeared first in one volume in 1589, and was dedicated to the great minister, Sir Francis Walsingham. Hakluyt in compiling it had the assistance of Sir Walter Raleigh. The collection contains, besides the accounts of voyages of discovery, many curious and interesting documents chiefly relating to English commerce. The name of this eminent man is perpetuated in the Hakluyt Society, established in 1846.

HALDANE, ROBERT, and JAMES ALEXANDER, theologians and philanthropists, two brothers, who exercised great influence on the times in which they lived, were the sons of Captain James Haldane, representative of the old barons of Gleneagles in Perthshire, who occupied a prominent place in Scottish History. Their mother was sister of Admiral Duncan, Viscount Camperdown. In early life they both entered the navy, and distinguished themselves by gallantry and good conduct. Robert Haldane was midshipman on board the "Foudroyant," under Captain Sir John Jervis, in 1781, in the celebrated night action with the "Pégase," which was the foundation of Lord St Vincent's great fame. When yet only 25 years of age, James had risen to the command of one of the East India Company's ships, in those days manned and armed like ships of war, and often engaged in important service. But, led by various circumstances, and influenced doubtless by early impressions received from a pious mother, both brothers left the naval service, and dedicated their time, labour, and wealth to works of piety and usefulness. The first scheme in which Robert Haldane took deep interest was the introduction of Christianity among the natives of India. This was in 1795. His was no sentimental philanthropy, for he had himself resolved to go as one of the first missionaries, and he sold his estate of Airthrey in order to provide funds for the undertaking. But his designs were for the time frustrated, and the Indian mission proceeded under the direction of Dr Carey and his coadjutors. Meanwhile James Haldane en-

tered the ministry in Scotland, devoting himself to the same kind of work which Wesley and Whitefield had at an earlier period undertaken in England. He travelled over the whole country, from the Solway Frith to the Orkneys, preaching everywhere to large audiences, and producing much good effect, in spite of violent opposition both from the clergy and magistrates. Suffice it to say, that in all the great measures of Christian philanthropy which marked the first half of the present century, the Haldanes took a zealous and prominent part. Robert Haldane died in 1842, in the 79th year of his age. James died in 1851. Both of the Haldanes were authors of various works, the most important of which in theological literature are, a "Treatise on the Doctrine of the Atonement," by James Haldane; and by Robert Haldane, "An Exposition of the Epistle to the Romans," "On the Evidences and Authority of Divine Revelation," and "On the Inspiration of Scripture." These works have been widely circulated on the continent as well as in America and this country. An interesting memoir of their lives has been published.

HALDE, DU. [DUHALDE.]

HALE, Sir MATTHEW, an eminent English judge, was born at Alderley, in Gloucestershire, in 1609; educated at Magdalen Hall, Oxford; and removed to Lincoln's Inn, where he studied the law with great diligence, and overcame the loose and dissipated habits in which he had previously indulged. He rose to eminence at the bar, and succeeded in preserving a singular neutrality through the momentous crisis of the civil war. He acted as counsel for Strafford, Laud, Hamilton, and even for Charles himself; yet Cromwell prevailed upon him to become one of the justices of the Common Bench; but it is said that he never formally acknowledged the authority of Cromwell, and he at length refused to try any more criminal causes. In the parliament which recalled the king he sat for his native county; and, soon after the Restoration, was made chief baron of the exchequer; from which he was advanced to the chief-justiceship of the King's Bench. He resigned his office in 1675, and died the following year. He was a learned man, an upright judge, and an exemplary Christian. His belief in witchcraft, avowed on occasion of the trial of two women, whom he sentenced to death; and his preference of personal ease to honest participation in the great political conflict of his age, are symptoms of a certain feebleness of character, and detract somewhat from his otherwise fair fame. His writings are numerous on theological, philosophical, and legal subjects. The principal are, "The History of the Pleas of the Crown," "History of the Common Law," and "Contemplations, Moral and Divine," 3 vols. 8vo. He also wrote various mathematical and philosophical works; and left a valuable collection of manuscripts relating to history and jurisprudence, which are preserved in the library of Lincoln's Inn.

monastery in Gloucestershire, and afterwards studied at Paris, where in 1223 he was created D.D., and a few years later was professor of theology. His "Summa Theologiae" was based on the "Sententiae" of Peter Lombard; but he gave a syllogistic form to the propositions of that work, and has been on that account called, by Tiedemann, the first Schoolman. He was author also of some exegetical works, and perhaps of a Commentary on Aristotle's "Metaphysics." Died at Paris, 1245.

HALES, JOHN, commonly called "the ever-memorable," was born at Bath, in 1584. He was Greek professor at Oxford, and canon of Windsor. He suffered great hardships in the rebellion, and died in 1656. He was a man of learning and skill in argument, and his works were collected after his death, and published under the title of "Golden Remains of the ever-memorable Mr John Hales, of Eton College," 3 vols.

HALES, STEPHEN, divine and natural philosopher, was born in Kent, in 1677, and educated at Benet College, Cambridge, of which he became fellow in 1703. He invented a machine for demonstrating the motions of the planets, nearly similar to the orrery, and in 1741 published a new method of ventilation. He contented himself with the rectory of Teddington, near Hampton Court, refusing higher dignities; and died in 1761. Hales was a fellow of the Royal Society and an associate of the French Academy of Sciences. He was indefatigable in his scientific researches, particularly in those which relate to vegetable physiology; and his communications to the Philosophical Transactions were very numerous; besides which he published an important work entitled "Vegetable Statics," which was translated into several languages, and several other works.

HALEVY, JACQUES ELIE FROMENTAL, celebrated French musical composer, was born at Paris, in 1799. He studied music first at the Conservatoire, and then under Cherubini, and very early attained distinction in his art. He obtained the prize of the Institute, and was sent to finish his education at Rome. His first operas were "Pygmalion," and "Phidias;" the latter of which was produced in 1827. His chef-d'œuvre, "La Juive," appeared in 1835, and rapidly obtained a European celebrity. Among his other works are—the comic opera "L'Éclair;" "Guido et Ginevra;" "Val d'Andorre;" "La Fée aux Roses;" "The Tempest," after Shakespeare, &c. HALEVY was a member of the Institute, officer of the Legion of Honour, and secretary to the Academy of Music. Died at Nice, 17th March, 1862.

HALFORD, Sir HENRY, bart., M.D., G.C.H., one of the most eminent and successful of modern English physicians, was the son of Dr John Vaughan, of Leicester. His education was at Rugby and Oxford. His extraordinary success Sir Henry owed by a most gentlemanly appearance and manners, and by fortunate influential connections, but also to his great professional skill, which inspired such confidence, that he attended George III. and Queen Charlotte; George IV., and Queen Victoria. In 1809,

he was already so much esteemed by his illustrious patients, that he was created a baronet; and he exchanged his paternal name of Vaughan for that of Halford in 1815, by act of parliament, on his inheriting a peerage. He became president of the College of Physicians in 1824, and filled the office till his death. He published a variety of professional subjects. Died March 9, 1844; aged 78.

HALHED, NATHANIEL BRASSEY, orientalist, was educated at Harrow School, and afterwards became a civil officer in the East India Company's service. He published "A Code of Gentoo Laws on Ordinances of the Pundits, from a Persian Translation of the Grammar of the Bengalee Language;" "A Narrative of the Events which have happened in Bombay and Bengal, relative to the Mahratta Empire since July, 1777." After this he returned to England, and obtained a seat in parliament as a member for Lymington. He defended the lunatic program he denounced in parliament as an instance of tyranny and oppression. Horn, 1751; died, 1830.

HALIBURTON, THOMAS CHANDLER, better known under his assumed name of "Sam Slick," was born in the colony of Nova Scotia in 1797. He was brought up to the law, practised as a barrister, and was appointed a judge at Halifax in 1842. He subsequently resigned that office, settled in England, and sat in parliament as member for Launceston. The first of his numerous works, nearly all of which are in the same vein, humorous delineations of character, dialect, was entitled "The Clockmaker, or Sayings and Doings of Sam Slick of Slickville," and appeared in two volumes in 1837. It was successful, and established his reputation. He soon wrote two additional volumes. His subsequent books are—"The Attaché, or Sam Slick in England;" "The Old Judge, or Life in a Colony;" "Sam Slick's Wise Saws and Modern Instances;" "Nature and Human Nature," &c. In politics Judge Haliburton was a thorough-going Tory, and he indulged in a passionate expression of his Toryism in his "English in America," published in 1851. Died at his seat, at Isleworth, August 27, 1865.

HALIFAX, GEORGES AVILLE, Marquis of, an eminent statesman, was born in 1630; contributed to the restoration of Charles II., who made him a privy councillor, and rewarded him with a coronet. On the accession of James he was appointed president of the council, from which he was dismissed for refusing his consent to a repeal of the test acts. In the convention parliament he was chosen speaker of the House of Lords, and at the accession of William and Mary was made lord privy seal. He died in 1695. His lordship wrote various political tracts, among which is one entitled "Character of a Trimmer," a term which sets forth substantially his own political position.

HALL, BASIL, Captain, R.N., a distinguished traveller, the son of Sir James Hall, was born at Edinburgh in 1788. After pur-

using his studies at the High School, he entered the navy in 1802, and gradually rose through the minor ranks till he became post-captain in 1817. But though, like most other British officers, he discharged his official duties with great distinction and success, it is on the field of literature that he reaped his most honoured laurels; for to whatever quarter of the world he was summoned at the call of duty, he viewed men and manners with a searching eye, and various interesting and popular works were the result of his eager and indefatigable pursuit of knowledge. Besides contributing numerous papers on scientific subjects to various journals and encyclopedias, Capt. Hall wrote "A Voyage of Discovery to the Western Coast of Corea and the great Loo-Choo Island in the Japan Sea;" a most interesting work, which went through many editions; "Extracts from a Journal written on the Coasts of Chili, Peru, and Mexico, in the years 1820, 1821, 1822;" "Travels in North America," "Fragments of Voyages and Travels," "Schloss Heinfeld, or a Winter in Lower Styria," &c. His last work was published in 1841, under the title of "Patchwork," consisting, as its name implies, of detached papers, embracing recollections of foreign travels, incidents worked up into short tales, and a few essays. Having been unfortunately seized with insanity, Capt. Hall was placed in the Royal Hospital, Haslar, Portsmouth, where he died, 1844.

HALL, EDWARD, an old English chronicler, whose works rank with those of Holinshed and Stowe. He was a native of London, and being a lawyer by profession, attained the rank of a judge in the sheriff's court. His death took place in 1547. As affording delineations of the manners, dress, and customs of the age, his "Chronicle," which Grafton continued, is very curious.

HALL, Sir JAMES, bart., F.R.S., and F.S.A., Edinburgh, was the eldest son of Sir John Hall, the third baronet of Dunglass, and born in 1760. He was the author of "An Essay on the Origin, Principles, and History of Gothic Architecture," and of many papers in the Transactions of the Royal Society of Edinburgh. He devoted much of his time to scientific pursuits, and made some ingenious researches and discoveries in mineralogy and geology, particularly by his experiments in the fusion of stony substances—endeavouring to establish the truth of the Huttonian theory of a central fire against the Wernerian or aqueous system. Died, at Edinburgh, 1832.

HALL, JOSEPH, an eminent and learned English prelate. He was born, in 1674, at Ashby-de-la-Zouch; was educated at Emanuel College, Cambridge; and became dean of Worcester. In 1624 he refused the bishopric of Gloucester; but, three years afterwards, he accepted that of Exeter; from which see he was removed, in 1641, to that of Norwich. In a few weeks after his translation he was sent to the Tower, with twelve other prelates, for protesting against any laws passed in parliament during their forced absence from the House. In June, 1642, he obtained his release; but the next year he suffered much persecution from the Puritans, who

plundered his house, and despoiled the cathedral. His estate also was sequestered; and thus, in his old age, he was reduced to poverty, which he endured with fortitude, and continued still to preach occasionally. His "Meditations" are well known; and his poetical talents, chiefly exercised in satire, were very respectable. He is universally allowed to have been a man of great wit and learning, and of as great meekness, modesty, and piety. His works have gained him the appellation of the "Christian Seneca." Died, 1656.

HALL, ROBERT, a celebrated Baptist preacher and theological writer, was born at Arnsby, in Leicestershire, in 1764. His father, who was also a Baptist minister, in 1773 placed him under the instruction of Dr John Ryland, of Northampton. At 16 he became a student in the Baptist college at Bristol; and at 18 he entered King's College, Aberdeen, where he took the degree of M.A. He was chosen as colleague with Dr Caleb Evans, in the ministry at Bristol, and adjunct professor in the institution. Here he attained great popularity; but he was obliged to retire from this situation, in consequence of symptoms of approaching mental derangement. By judicious treatment, during a long seclusion from the world, his powerful mind regained its former vigour; and, in 1791, he removed to Cambridge, being chosen successor to the celebrated preacher Robert Robinson. He now appeared as the author of a pamphlet, entitled "Christianity not inconsistent with the Love of Freedom." This was shortly after followed by his "Vindication of the Freedom of the Press," which passed through several editions. But it was his "Sermon on Modern Infidelity" that established his fame as a divine. In 1803 Mr Hall's mind again received a shock, which obliged him to suspend his pulpit labours; and on his recovery he removed to Leicester, where he remained as pastor of the Baptist congregation upwards of 20 years. On the death of Dr Ryland, in 1808, he succeeded to the presidency of the Bristol Academy, and the pastorate of Broadmead Chapel; and there he continued till his death, which took place in 1851. Mr Hall was gifted with a powerful and persuasive eloquence; and to great talents and learning he united a benevolent disposition and a truly liberal mind. Dr Parr, who was his intimate friend, says of him, in his last will and testament, "Mr Hall has, like Jeremy Taylor, the eloquence of an orator, the fancy of a poet, the subtlety of a schoolman, the profoundness of a philosopher, and the piety of a saint." His works have been collected and published since his death, in 6 vols. 8vo.

HALLAM, HENRY, one of the most distinguished of English historians, born at Windsor in 1777. His father was dean of Bristol. After studying at Eton he was sent to the university of Oxford, where he distinguished himself by his classical attainments. He afterwards settled in London, and entered upon his career of literary labour as one of the first contributors to the *Edinburgh Review*. His "View of the State of Europe during the Middle Ages," pub-

lished in 1818, his studies and work on the "England" was Hallam belonged to, but he pre- and exemption in wrote with an in- rivalled. Ages," pub-

lished in 1818, was the first great result of his studies and researches. His masterly work on the "Constitutional History of England" was given to the world in 1827. Hallam belonged to the Whig party in politics, but he preserved a singular calmness and exemption from political passions, and wrote with an impartiality which is rarely rivalled. In 1833 a very heavy blow fell on him in the death of his eldest son, a young man of high promise, and the chosen friend of Alfred Tennyson, whose love and sorrow are recorded in those exquisite lyrics which form his "In Memoriam." The next great work of Hallam, published in 1837-39, was his "Introduction to the Literature of Europe in the 16th, 16th, and 17th Centuries." Other family bereavements followed in rapid succession, and after losing his daughter, his wife, and his second son (the last in 1850), the aged and mourning father himself died in January, 1859. Hallam's works have passed through many editions, and have been translated into several continental languages. He was a fellow of the Royal Society, and one of the trustees of the British Museum. A statue of Hallam, by Theed, has been placed in St Paul's cathedral.

HALLAM, ARTHUR HENRY, eldest son of the great historian, and the early friend of Alfred Tennyson, was born at London in 1811. He was educated at Eton and Cambridge; was ranked at Eton as one of the first Latin verse-writers, and the best Greek scholar; distinguished himself at the Eton Debating Society by his depth of thought, vigour of imagination, and mastery of language; and enjoyed at the university a reputation and an influence which were extraordinary for one so young. His studies were interrupted by a visit to Italy, and subsequently by the delicacy of his health, and he died suddenly at Vienna, September 15, 1833. His "Remains in Verse and Prose," first printed in 1834, for private circulation among his friends, to whom he was singularly dear, and who entertained the highest hopes of his future distinction, were given to the public in 1842. They are of rare excellence, and are held fully to justify the largest expectations of his personal friends. The name of Arthur Hallam will, however, be especially held in remembrance on the account of the magnificent though sorrowful poetry of "In Memoriam."

HALLAM or HALAM, ROBERT, Cardinal, Bishop of Salisbury, lived in the reigns of Henry IV. and Henry V. He was a native of Oxford, and was elected chancellor of the university in 1403. From archdeacon of Canterbury he was made, in 1408, bishop of Salisbury, and was created cardinal by Pope John XXIII. in 1411. He was a man of high character, great practical wisdom, and thorough independence and firmness, and was chosen one of the deputies to represent the English church at the general council of Constance. He was the most strenuous supporter of the emperor in asserting the supremacy of the civil power, and in demanding reformation of all orders in the church. He almost alone condemned, the burning of Jerome of Prague, and was bold to say that the pope, for his shameful life, de-

served to be burned at the stake. His influence long kept the German and English deputies united in opposition to the Italian party; but the state of affairs was wholly changed, and the prospect of reform before the election of a new pope lost, by the death of Hallam at Constance, September 4, 1417.

HALLER, ALBERT VON, an eminent Swiss physician, the father of modern physiology, was born at Berne in 1708. The early dis-when in his abilities was extraordinary; and distinguished for his knowledge of Greek and Latin, but also for his poetical genius. In his 16th year he began to study medicine at Tübingen, but the fame of Boerhaave induced him to remove to Leyden, where, animated by the example of the great geniuses around him, he spent his days and nights, with the least possible intermission, in the most intense study. In 1727 he visited England, and formed an acquaintance with Sir Hans Sloane, Cheselden, and other eminent men. He received afterwards the title of physician and counsellor to King George II., at whose request the Emperor Francis I. gave him a patent of nobility, as a baron. He was appointed in 1736 professor of medicine, anatomy, &c., at Göttingen, a post which he held for seventeen years. By his labours and teaching the fame of his medical school was greatly extended. He returned in 1763, to Berne, where his countrymen received him with the respect due to his great fame and talents. Having been elected a member of the sovereign council of the state, he soon obtained one of its magistracies; and his various duties as a statesman, a physician, and a medical teacher, occupied his attention till his death. His "Elementa Physiologie," published in 8 vols. 4to, is one of the most important medical works ever written, and for its elegance of style is no less remarkable than for the fulness and accuracy of its matter. His various "Bibliothecæ," of anatomy, surgery, medicine, &c., consisting of catalogues and sketches in chronological order of all the principal works on those subjects, with notices of the lives of their authors, include above 50,000 works, and occupy 10 vols. 4to. Haller is said to have written above two hundred separate treatises, besides many contributions to the memoirs of various scientific societies. These works afford ample proofs of his penetrating genius, immense learning, and solid judgment; and his poems display great depth of thought and richness of imagination. He was, in short, a profound philosopher, an admirable poet, and a first-rate physiologist and botanist; yet not more eminent for his various scientific knowledge than for his piety and active benevolence. Haller was a fellow of the Royal Society of London, and of many other similar societies. He died in 1777.

HALLER, JOHANN, a German sculptor, born in 1752. He studied his art at Munich and at Rome, and was employed to execute some of the sculptures, statues, and bas-reliefs of the Glyptothek at Munich. Died young, in 1823.

HALLEY, EDMUND, an eminent English astronomer and mathematician, was born,

considerable success in a medical career, and advanced to Portugal. He was the assault upon the battle of Waterloo. His stock in his prepossession, both was selected for a medical attendant, and was the author of his works are a "Observations on the Disease which Air into the Remarks on the Memoir of History of the menburg," and "Novel." Died,

Portrait of 1684, who was to Vandryke. HALLS, was makings and 168.

Several famous being of Hannibal command in there for the Roman. Peace being War ended, the mercenary went to Spain, and part of it attended him. He died with the

From separable command of the war, and on the most of the war, Colonel commenced the on admitted as a member of New York. The greatest he contributed to the description of the wrote, in connection with Jay, in the instruction of the He was secretary; and at office, about

five years, he raised the public credit from the lowest state of depression to a height altogether unprecedented in the history of the country. In 1798, when an invasion was apprehended from the French, and a provisional army had been called into the field, his public services were again required; and on the death of Washington, in 1799, he succeeded to the chief command. When the army was disbanded, Hamilton again returned to the bar, and continued to practise, with increased reputation and success, until 1804. A quarrel having taken place between him and Colonel Burr, the latter challenged him, and they met at Hoboken on the 11th of July. At the first fire Hamilton fell, mortally wounded, on the same spot where, a short time previously, his eldest son had been killed in a duel. The sensation which this occurrence produced throughout the United States was very great; for, of all the American statesmen, he displayed the most comprehensive understanding and the most varied ability. A valuable work on "The Life and Times of Alexander Hamilton," by C. J. Riethmüller, has lately appeared.

HAMILTON, ANTHONY, Count, a courtier and man of letters in the 17th century. He was descended from an ancient Scotch family, but born, in 1646, in Ireland; from whence he was taken to France, when a child, by his parents, who were attached to Charles II. When James II. was obliged to contend for his crown in Ireland, he gave made him governor of Limerick; and on the ruin of the royal cause, he accompanied James to France, where he passed the rest of his life. His wit and talents secured him admission into the first circles; and he died at St Germain, in 1720. Count Hamilton is chiefly known as an author by his "Memoirs of Count Grammont," a lively and spirited production, exhibiting a free and faithful delineation of the voluptuous court of Charles II. His other works are, "Poems and Fairy Tales," which, as well as the memoirs, are in French, and display elegance of style with fertility of invention.

HAMILTON, DAVID, Scottish architect, was a native of Glasgow, and was born in 1768. His principal work is the Exchange Theatre also, Lennox Castle, Hamilton Palace, and other mansions. He was one of the competitors for the erection of the Westminster Palace, and obtained a premium for his design. Died at Glasgow, 1813.

HAMILTON, ELIZABETH, novelist and miscellaneous writer, was born at Belfast, Ireland, in 1758. Her numerous works are forgotten, with one exception, that of the pretty and touching tale of the "Cottagers of Glenburnie." Died, 1816.

HAMILTON, GAVIN, painter, and connoisseur of ancient art, was born at Lanark, Scotland. Having discovered an early talent for painting, he was sent to Italy, and placed under Augustine Massucci; after which he applied to the study of the antique. One of his best works was his series of pictures from the Iliad. The latter part of his

life was employed in making excavations, at Tivoli, among the ruins of Hadrian's villa; and at other places in Italy; by which he was enabled to bring to light many of the long-buried treasures of antiquity; and many collections of classical antiquities are the richer for his discoveries. He died at Rome, about 1796.

HAMILTON, JAMES, Duke of, was born in Scotland, in 1606; became a favourite at court; and, when the troubles broke out in Scotland, had the command of the fleet. In 1643 he was created a duke; but soon afterwards his loyalty became suspected, and he was sent prisoner to Pendennis Castle, and next to St Michael's Mount, in Cornwall. There he remained till 1646, when he regained his liberty and went to Scotland, where he was accused of having betrayed the king, and received a share of the money. To wipe off this disgrace he raised some forces, and entered England; but was defeated at Preston, in Lancashire, August 17, 1648, and sent to Windsor Castle. After a summary trial before Bradshaw, he was sentenced to be beheaded, which was put in execution March 9, 1648-9.—His brother WILLIAM, who succeeded him in the title, was mortally wounded at the battle of Worcester, Sept. 3, 1651.

HAMILTON, JAMES, inventor of the Hamiltonian system of teaching languages, died at Dublin, where he had gone for the purpose of giving lectures, Sept. 16, 1829.

HAMILTON, PATRICK, the first Scotch reformer, was nephew to James, earl of Arran, and born in 1503. He was educated at St Andrew's; after which he went abroad, where he imbibed the opinions of Luther. On his return home he was made abbot of Ferne, in the shire of Ross, where he promulgated the new doctrines with so much zeal as to excite the wrath of the clergy, who caused him to be apprehended and sent to Beaton, archbishop of St Andrew's. After a long examination he was declared contumacious, and burnt at the stake opposite St Salvador's College, March 1, 1527.

HAMILTON, Captain THOMAS, is chiefly known as the author of "Cyril Thornton," a stirring novel of military adventure, combining the elegant style of an excellent classical scholar with the graphic description and vivid feeling of one who had participated in the scenes and circumstances that he described. After serving through the Peninsular and American campaigns, Capt. Hamilton devoted his time chiefly to literature, and he was a voluminous contributor to Blackwood's Magazine, in which Cyril Thornton originally appeared. His chief separate works after Cyril Thornton are, "Annals of the Peninsular Campaign," and "Men and Manners in America." Died, Dec. 7, 1842, aged 53.

HAMILTON, WILLIAM, painter, was born about 1750. He went to Italy when very young, and was there placed under the instruction of Zucchi, the painter of arabesque ornaments, at Rome. On his return to England he acquired considerable employment; and, in 1789, was admitted a royal academician. Died, 1801.

HAMILTON, WILLIAM, a Scotch poet, was born at Bangor, in Ayrshire, in 1704. He joined the Pretender in 1745, and narrowly escaped being taken after the battle of Culloden. Died, 1764. Among his songs and ballads is the well-known "Braes of Yarrow."

HAMILTON, WILLIAM GERARD, a statesman who obtained the appellation of "Single Speech Hamilton," from the extraordinary impression produced by the first and almost only speech he ever made in the British parliament, was the son of a barrister of Lincoln's Inn, where he was born in 1729. He was educated at Winchester School and Oriel College, Oxford. In 1764 he was elected into parliament for Petersfield, and the year following delivered the speech alluded to. In 1761 he went to Ireland as secretary to Lord Halifax, and in the parliament of that kingdom he confirmed the reputation which he had gained in England by his oratory. He was above twenty years chancellor of the exchequer in Ireland, but retired from public life in 1784. His works, consisting of "Parliamentary Logic," "Speeches," &c., were printed in 1808, with the Life of the Author prefixed. Among the many to whom the Letters of Junius were once ascribed, Mr Hamilton was one; but there was scarcely the shadow of an argument to support the conjecture. Died, 1796.

HAMILTON, Sir WILLIAM, bart., diplomatist and antiquary, was a native of Scotland; born in 1730. His mother having been the nurse of George III., young Hamilton naturally obtained that prince's patronage. Sir William was generally distinguished for his taste in the polite arts, employed a large portion of his life in the study of natural history, and supplied the Philosophical Transactions and the Archæologia with many articles. During his residence as ambassador from England to the court of Naples, a post to which he was appointed in 1764, and held for thirty-six years, he published his "Campi Phlegrei," a valuable record of his careful and long-continued observations of Mount Vesuvius. He presented many books, manuscripts, and geological specimens to the British Museum; and, after his death, his superb collection of antique vases was purchased by parliament for that institution. The celebrated Lady Hamilton, who took so prominent a part in the affairs of Naples at the time of the French invasion, and captivated Lord Nelson by her beauty and her spirit, was the second wife of Sir William. [See following notice.] Died, 1803.

HAMILTON, EMMA, Lady, wife of the above-mentioned, was the daughter of a female servant named Hart; and at the age of 13 she went to service as nursemaid. At 16, she went to London, and after various adventures in low life, she was reduced to the greatest distress. From this state she was relieved by the infamous Dr Graham, who took her to his house, and there exhibited her, covered with a transparent veil, under the name of the goddess Hygeia. Painters, sculptors, and others, paid their tribute of admiration at the shrine of this new goddess. Charles Greville (of the Warwick family) would have married her, but

for the interference of his uncle, Sir W. Hamilton, who, according to some accounts, made an agreement with Greville to pay his debts, on condition that he should give up his mistress; or, as others state the circumstance, in his endeavours to save his nephew, fell into the snare himself, and became the victim of her arts. He made her his wife in 1781; introduced her at the court of Naples, where the queen became so infatuated with the new ambassadress, as frequently to keep her a visitor at the palace. It was there that a violent passion for each other sprang up between her and Nelson, England's naval hero, then commanding the "Agamemnon;" and, from that period, she became the companion of Nelson, to whom she was sometimes useful as a political agent. After the victory of Aboukir, when the conqueror was received in Naples with extravagant rejoicings, Lady Hamilton was the heroine of the crowd, and accompanied Nelson wherever he went. To her advice is attributed the ignominious death of Prince Caracciolo, the oldest and the best officer in the Neapolitan navy. She died in 1816, in the neighbourhood of Calais.

HAMILTON, Sir WILLIAM ROWAN, astronomer royal for Ireland, and one of the most distinguished mathematicians of the age, was born at Dublin in 1805. He was educated at Trinity College, where he studied with such distinction that he not only carried off all the honours which were attainable by a student, but was appointed, before he took his degree, to succeed Dr Brinkley as professor of astronomy. About the same time (1827) he was named astronomer royal for Ireland, and this post he held till his death. He contributed numerous important papers to various Irish and English scientific societies, which are reckoned among the most brilliant examples of the higher analysis. Among them are memoirs on systems of rays, on a method in dynamics, on algebra as the science of pure time, on the propagation of light in vacuo and in crystals, &c. He predicted on theoretical grounds the previously unobserved and unimagined phenomenon of the *conical refraction* of a ray of light. This was one of his earliest discoveries. But though so great in his special field of thought, he was a man of wide and liberal culture, poet, metaphysician, and genial man of the world: and withal upright, modest, and kind-hearted. He received the honour of knighthood from the lord-lieutenant on occasion of the first meeting of the British Association in Ireland in 1835, and two years later was chosen president of the Royal Irish Academy. Died at Dunswick Observatory near Dublin, Sept. 2, 1865. His only separate work, the "Lectures on Quaternions," appeared in 1853: and a second series, entitled "The Elements of Quaternions," has appeared since his death. Sir W. R. Hamilton married in 1833, and a pension of £200 has been conferred on his widow and daughter.

HAMILTON, Sir WILLIAM, bart., a distinguished metaphysician, was born at Glasgow in 1788, studied first at the university of his native city, and secondly, at Oxford, where he obtained first-class honours. In

1813 he was called in 1821 he was appointed to a universal history in Edinburgh;—but this was an honorary appointment obtained the office of his studies pre-eminently in the chair of logic and metaphysics, which he filled with such lustre for Scotland its field of metaphysics. volume under the title of "Philosophy," consisting chiefly from the Elements which on their appointment both at home and abroad of the works of Aristotle in 1846, displayed profound thought; and he given to his collection of Dugald Stewart—It began in 1854. His "Lectures" have been published and these abundantly afford differences may hereafter be as to the success or speculations, his common inextricable analysis, his truth, and honesty of heretics of every system and lasting honours of his labours themselves to three vindication of the doctrine his elaborate discussion of the world, and his condition as he had the absolute authority in the direct school, the last is more with German influence which he has given unassisted by agreement, is more powerful the next starting-point of. Died, 1856. A volume made by Mr J. S. Hamilton of Sir W. Hamilton's of the principal Philosophical Writings, published in his Writings, containing his philosophical perception; he was an Analyst HAMMER-FURGTON, an eminent orientalist, was born in Prussia and studied at Vienna, private secretary to the Austrian emperor in 1799 he was sent as diplomat to the court of Prussia, whence he was transferred to the court of Prussia in Sir Ralph Abercrombie and was subsequently in Moldavia. His whole life was devoted to oriental literature, and his works, philosophical and historical, were published numerous times which his "History of the Ottoman Empire" was considered the chief. H

1813 he was called to the Scottish bar; and in 1821 he was appointed professor of universal history in the university of Edinburgh;—but this chair was little more than an honorary appointment, and in 1836 he obtained the office for which his tastes and his studies pre-eminently qualified him—the chair of logic and metaphysics,—which he filled with such lustre as to have regained for Scotland its former distinction in the field of metaphysics. In 1852 he published a volume under the title of "Discussions in Philosophy," consisting of essays reprinted chiefly from their appearance had attracted attention both at home and abroad. His edition of the works of Dr Thomas Reid, published in 1846, displays vast erudition and profound thought; and a similar award must be given to his collected edition of the works of David Stewart—the publication of which began in 1854. His "Lectures on Metaphysics" have been published since his death, and these abundantly evince that whatever differences may hereafter agitate the schools as to the success or failure of some of his speculations, his comprehensive grasp, his inexorable analysis, his prodigious learning, truth, and honesty of dealing with the adherents of every system, will secure a universal and lasting homage. The prominent results of his labours in philosophy reduce themselves to three heads—his profound vindication of the doctrine of common sense, his elaborate discussion of the theory of perception in relation to our belief in an external world, and his enunciation of the law of the conditioned as bearing on our knowledge of the absolute and infinite. The two first are in the direct line of the Scottish school, the last is more original, or coloured with German influences; and the impulsion which he has given under this third head, if less marked by agreement amongst his followers, is more powerful, and is likely to be the next starting-point of British philosophy. Died, 1856. A very formidable assault upon Sir W. Hamilton's system has recently been made by Mr J. S. Mill in his "Examination of the principal Philosophical Questions discussed in his Writings." (1865.) Mr J. H. Stirling has also published a work entitled, "Sir W. Hamilton; being the Philosophy of Perception: an Analysis."

HAMMER-PURGSTALL, JOSEPH, Baron von, an eminent oriental scholar and historian, was born at Purgitz in Styria in 1774, and studied at Vienna, and in 1796 became private secretary to the Baron de Jenisch, then attached to the Austrian Foreign Office. In 1799 he was sent as dragoman to Constantinople, whence he was transferred to Egypt and employed as interpreter to the English army in Sir Ralph Abercrombie's campaign, and was subsequently Austrian consul in Moldavia. His whole life was devoted to oriental literature, and besides contributing papers, philological and historical, on his favourite subject to many literary journals, he published numerous independent works, of which his "History of the Assassins," and "History of the Ottoman Empire," may be considered the chief. His last years were

spent at his estate of Purgstall in the Tyrol. Died, 1856.

HAMMOND, HENRY, D.D., one of the most learned English divines of the 17th century, was born at Chertsey, in Surrey, in 1605. His father, Dr John Hammond, was professor of Greek at Cambridge, and physician to Henry, prince of Wales. The prince was godfather to him, and gave him his own name. He was educated at Eton and Magdalen College, Oxford, of which he became a fellow in 1625; was an indefatigable student and reader, and having taken orders was presented, in 1633, to the rectory of Penshurst in Kent, by the earl of Leicester. In 1639 he graduated D.D., was a member of Convocation the next year, and subsequently archdeacon of Chichester. During his residence at Penshurst his nephew, (Sir) William Temple, was placed under his charge as a pupil. In 1643 he had to quit Penshurst and live in seclusion at Oxford; assisted on the king's side at the treaty of Uxbridge; was made canon of Christchurch, university orator, and chaplain to Charles I., whom he was for some time permitted to attend. At the close of 1647, no longer allowed to do so, he returned to Oxford; was deprived soon after of his office of sub-dean of Christchurch, but continued his studies and writing. After the king's execution he went to live at Westwood, in Worcestershire, and there spent the rest of his life. The works of Dr Hammond were collected and edited after his death by William Fulman, and appeared in 4 vols. folio, in 1684. His most important work is the "Paraphrase and Annotations on the New Testament," first published in 1653. It was translated into Latin by Leclerc. Died, April 24, 1660.

HAMPDEN, JOHN, one of the illustrious statesmen of the Commonwealth, was born at London in 1594. He was the head of a wealthy family which had been settled in Buckinghamshire before the Norman Conquest, and was cousin to Oliver Cromwell. He was educated at Oxford, and then studied law at the Inner Temple. In 1619 he married, and continued to live as a country gentleman till 1625, when he was returned to parliament for the borough of Gramppound. His sympathies were with the popular party, but he did not at first take a prominent part in debate. In 1626 he was one of those who refused to contribute to the general loan required by the king, and was imprisoned. After being unconditionally set free, he began to take an active part in affairs, and his reputation grew rapidly. He was several times returned member for Wendover, and finally for his own county of Buckinghamshire, for which he sat in the Long Parliament. In 1636 he set the example of refusing to pay the ship-money, a tax devised by Attorney-general Noy, and arbitrarily imposed by the king; his refusal was without passion but firm; his resolution was to have the question of right tried in his own person. Proceedings were instituted against him, and in the following year the trial took place, and lasted thirteen days. The decision was against Hampden, but it made him more than ever the favourite of the people, who felt it as a heavy blow fallen on their

ated B. C. 221, he became commander-in-chief of the Carthaginian army. To complete the conquest of all Spain south of the Ebro, he besieged the city of Saguntum, and after a heroic defence of eight months, took it. The city being in alliance with Rome, its fall was the occasion of the great war between Rome and Carthage known as the Second Punic War. Hannibal at once prepared for the invasion of Italy, and in the spring of B. C. 218 he set out on the arduous march from the Ebro, through hostile and unknown countries, across great rivers and mountain-chains, to the Po. His army, composed of Africans and Spaniards, was greatly reduced in numbers by the withdrawal of a large body, and by losses on the march; but he crossed the Pyrenees, forced the passage of the Rhone before Scipio arrived to oppose it, and in October made the passage of the Alps in fifteen days. The terrible hardships of this enterprise cost him a very large number of his troops, both foot and horse, and elephants. The first engagement took place near the Ticinus, and resulted in the defeat of the Romans. The battle of the Trebia was fought towards the end of December, and the Romans were again defeated. Hannibal was joined by the Gaulish tribes, and took up his winter quarters among them. In the spring of 217 he defeated the consul Flaminius on the shores of Lake Trasimene, and destroyed the Roman army. So fierce was the struggle that a shock of earthquake passed unfelt by the armies engaged. Hannibal advanced southward, and passed the Apennines into Apulia, harassed however by the new policy of the cautious Fabius, who avoided fighting. In the spring of 216 Hannibal won the great victory of Cannæ, and again destroyed the Roman army. After this victory almost all south Italy declared for him, and he went into winter quarters at Capua. From that time the war changed its character, and it is not possible here to give even a summary of its progress. The conquest and loss of Tarentum, the loss of Capua, the defeat and death of Hasdrubal at the battle of the Metaurus in 207, still left Hannibal strong enough to hold his ground in the southern extremity of Italy for four years longer; but in 203 the scene of war was changed to Africa, and in the following year Scipio finally defeated Hannibal at the battle of Zama, and peace was concluded. The great Carthaginian did not lose hope, but applied himself to political and financial reforms and preparation for fresh war. His enemies, however, accused him to Rome, and he fled to the court of Antiochus, king of Syria, who was just entering on a war with the Romans. After three years, the war ending with the defeat of Antiochus, Hannibal, to avoid being given up to Rome, took refuge with Prusias, king of Bithynia, B. C. 190. And when his surrender was demanded in 183, he put an end to his life by poison. It is acknowledged that Hannibal ranks with the greatest generals of ancient or modern times. His great bodily strength and agility, capacity of endurance, frank and fascinating manners, marvellous sagacity, caution in planning, and rapidity in action, made him the idol of

his troops. And his power over them, composed though they were of men of so many nations, was such that during the sixteen years of the war there was never a mutiny in his camp. He was a man too of considerable cultivation, and shone as a statesman almost as much as a general.

HANNO. There were several eminent Carthaginians of this name.—One of the most celebrated is the maritime discoverer who made a voyage on the western coast of Africa, of which he has left a description, called the "Periplus of Hanno." The purpose of this voyage was to make discoveries for the benefit of commerce, and to settle colonies, of which he established several.—Two Carthaginian generals, of the name of Hanno, commanded in Sicily, successively, during the first Punic war. Another was eminent both as general and statesman, and was the persistent opponent of the party which maintained the war with Rome.—Another Hanno was one of the commanders under Hannibal in Italy, and was successful on several occasions.

HANS SACHS, the most noted of the German Master-singers of the 16th century, was born at Nürnberg, in 1494. He was the son of a tailor, and was bred to the trade of a shoemaker. He had a taste for poetry and music, learned the mystery of versing from one Nunnebeck, a weaver, and became a member of the Guild of Singers in his native town. To see the wonders of the world, he set out in 1511 on a tour, visiting the chief cities of Germany, fighting manfully against evil passions and temptations to a frivolous life, and after several years' absence, returned and settled at Nürnberg, getting an honest living by shoemaking. He married in 1519. He was quick to recognize and embrace the doctrine of his great contemporary Luther, who made hearty acknowledgment of the service rendered to the truth by his numerous religious songs, which were household words throughout Germany. The quantity of his productions is amazing. He wrote above 6000 poetical pieces, of which 208 were tragedies and comedies. He married a second time, in 1561, his first wife having died the previous year; and soon after, with impaired sight and hearing, he withdrew from society, and in study and meditation spent tranquilly his last years; "Not without genius and a shrewd irony," says Carlyle of him: "and above all, the most gay, childlike, yet devout and solid character; a singular product, and a still legible symbol, and clear mirror of the time and country, where he died." Died at Nürnberg, in 1576.

HANSARD, LUKE, an industrious and successful printer, was born at Norwich, in 1752. He served his apprenticeship in his native city; and, at its expiration, he started for London, with a good character, and one solitary guinea in his pocket. His first situation in London was that of a compositor in the printing-office of Mr Hughs, printer to the House of Commons; in which he acquired the full confidence of his employer, and, by his indefatigable attention, extended the business. In 1774, Mr Hansard became a partner in the concern; and when

the whole of the business devolved upon him, by the death of Mr Hughs, he spared no cost nor personal labour in performing the important duties intrusted to him. He amassed a very considerable property, and finished his useful and laborious life in 1828, aged 78.

HANWAY, JONAS, an eminent philanthropist, was born at Portsmouth, in 1712, and being bred a merchant, formed a connection with a commercial house at St Petersburg, in consequence of which he travelled into Persia, of which country he published an account, in 2 vols. 4to. He was the chief founder of the Marine Society and the Magdalen Hospital; and contributed to the establishment of Sunday-schools. He wrote several religious books; but it is by his numerous acts of benevolence, more than by his writings, that Mr Hanway will be remembered. He died in 1788, and a monument was erected to his memory in Westminster Abbey.

HARDENBERG, KARL AUGUST, Baron, afterwards Prince von, Prussian chancellor of state, was born in Hanover, in 1750. He studied at the universities of Göttingen, Leipsic, and Wetzlar, travelled in France, Holland, and England, and in 1778 entered on official service at the court of Hanover. He was employed on several missions to England, became minister to the duke of Brunswick, and in 1791 Prussian minister of state. His influence steadily increased, and the most weighty affairs were intrusted to him. On the accession of Frederick William III. Haugwitz became first minister, but Hardenberg held the portfolio of foreign affairs in 1804-5, after which, with trifling exceptions, he was in retirement till 1810. In that year he was appointed chancellor of state, and it was his task to raise the country from its almost hopeless depression, revive the spirit of the people, recruit the army and replenish the treasury, and direct the movements of the war of liberation. This was the most brilliant period of his life, and he had the happiness of signing the treaty of peace in June, 1814. He received the title of Prince with a large estate; accompanied the allied sovereigns to London; assisted at the congress of Vienna, at the conferences at Aix-la-Chapelle, and at the congress of Troppau, Laybach, and Verona. He signed a concordat at Rome in 1822, was taken ill on his journey northward, and died at Genoa in November of the same year.

HARDENBERG, FRIEDRICH VON, known in literature as NOVALIS, a German poet and philosopher, was born in Saxony, in 1772. He was brought up in a retired manner, his father, then director of the Saxon Salt-works, being a man of resolute, honest, and religious character, and his mother also a noble and Christian woman. After a severe illness in his ninth year he became remarkably eager to learn, and showed extraordinary intelligence. In 1790 he went to the university of Jena, where he became acquainted with Fichte and Friedrich Schlegel, and studied Fichte's philosophy with intense delight. He afterwards studied at Leipsic and Wittenberg. Towards the close

of 1794 he settled at Arnstadt and applied himself to business pursuits. There he soon fell in love with a beautiful young girl, whose death two years later made a profound impression on his heart and character. After a short residence at Weisenfels he went to Freyberg to study mineralogy under Werner; and there he formed a new engagement to marry. He made the acquaintance too of August W. Schlegel and Tieck, in 1800, and associated with them in their warfare against the "Old School" of literature. But the promise of his marvellous genius was not to be fulfilled; he died of consumption in March, 1801. His unfinished literary works were collected and edited by his friends, Tieck and Friedrich Schlegel. They consist of the first part of "Heinrich von Ofterdingen," a kind of Art-Romance, or, as he called it, an Apotheosis of Poetry; the "Pupils at Saiz," fragment of another romance; the "Hymns to Night," written in the period of his sorrow for the death of his first love; and a selection of philosophical, moral, and critical fragments, parts of an encyclopaedic work only planned by the author. An interesting essay on this remarkable man was contributed by Caryilo to the "Foreign Review," in 1829, and is republished in his "Essays."

HARDICANUTE, king of England and Denmark, was the son of Canute, and succeeded his father on the Danish throne in 1039; and at the same time laid claim to that of England, which had devolved to his half-brother, Harold. A compromise was effected, by which he governed the southern part of the kingdom during Harold's life, and succeeded to the whole on his death. His conduct was violent and tyrannical; he revived the odious tax called *danegeld*; and his subjects rejoiced at his early death, which happened in 1041.

HARDING, STEPHEN, the real founder of the Cistercian order, was an English monk of Sherborne, in Dorsetshire, who, finding his spiritual cravings satisfied there, went as a pilgrim to Rome. Still longing for a more austere life and a higher strain of devotion, he settled for a time at the recently founded monastery of Molesme, in Burgundy; and at last, unsatisfied, sought with six others of the brethren a more dismal and desolate seclusion at Cîteaux. There he became abbot in 1109, and died in 1134. The great St Bernard, with his kindred and followers, entered the monastery of Stephen Harding in 1113.

HARDING, THOMAS, an English divine, born at Combe-Martin, Devonshire, in 1512. He was educated in the Roman faith at Winchester and New College, Oxford, where he obtained a fellowship. In 1543 he was chosen Hebrew professor, and conformed to the established religion during that reign and the next. He was also tutor to Lady Jane Grey, whom he instructed in the Protestant faith. But on the accession of Mary he apostatized; for which his excellent pupil remonstrated with him, as appears by an admirable letter of hers preserved by Fox. In 1554 he took his doctor's degree, and was made prebendary of Winchester and treasurer of Salisbury. When Elizabeth came

to the crown, Har where he carried with Bishop Jewel. HARDING, JAMES, eminent painter, teacher was born at Deptford his first instruction and from Prout; time; and greatly study of Turner's soon became a teacher furnishing studies of practised lithographic success. He published lithographic sketches "Trees," "Sketches "The Park and the showed himself a and effective drawing instructive manuals "Elementary Art," "Practice of Art," and have been several Admirable landscape variety, clever and principles and method's title to honour at Barnes, 4th Decem

HARDINGE, HENRY, marshall, governor-g the third son of the rector of Stanhope, born in 1785, entered thirteen, and served the Peninsula war, as deputy quartermaster general of the army. Amongst which he was present at Vimiera, Corunna, Albufera, distinguished himself served also at the siege of Almeida. In the month of Waterloo he was intrusted with the important of the Prussian head-quarters in the combat at created clerk of the subsequently entered secretary at war, during the duke of Wellington of Sir Robert Peel in sent out to replace the governor-general of India out of the Sikh war, the scene of action, answering all questions of discipline in command of the 1st Moolokee, Ferozeshah, brilliant services, both the field, he was created of Lahore, and various honours upon him. He was appointed by Lord Derwent the duke of Wellington's chief, an office which he discharged with successful epoch of the the mean while been the field-marshal. During the war, Lord Hardinge distinguished courage, unflinching sense of duty, a high disposition, and even years and of lengthened

to the crown, Hardlag went to Louvain, where he carried on a long controversy with Bishop Jewell. Died, 1874.

HARDING, JAMES DUFFIELD, an eminent palater, teacher, and writer on art, was born at Deptford, in 1798. He received his first instruction in art from his father, and from Prout; studied engraving for a time; and greatly improved himself by the study of Turner's "Liber Studiorum." He soon became a teacher, and to aid him in furnishing studies of foliage to his pupils, he practised lithography, and with marked success. He published several series of his lithographic sketches, entitled "Lessons on Trees," "Sketches at Home and Abroad," "The Park and the Forest," in which he showed himself unrivalled in the truthful and effective drawing of trees. Among his instructive manuals of art we may name—"Elementary Art," and "The Principles and Practice of Art," which are much esteemed, and have been several times republished. Admirable landscape sketches, and in great variety, clever and successful exposition of principles and methods, these are Mr Hardlag's title to honourable remembrance. Died at Barnes, 4th December, 1863.

HARDINGE, HENRY, Viscount, field-marshal, governor-general of India, was the third son of the Rev. Henry Hardinge, rector of Staquohe, in Durham, and was born in 1765, entered the army at the age of thirteen, and served through the whole of the Peninsular war, during which he acted as deputy quartermaster-general of the Portuguese army. Among the numerous battles at which he was present, we may name Vimeira, Corunna, Albuera, where he greatly distinguished himself, and Vittoria. He served also at the sieges of Badajoz and Salamanca. In the memorable campaign of Waterloo he was intrusted by Wellington with the important office of commissioner at the Prussian head-quarters, and lost his left arm in the combat at Ligny. In 1823 he was created clerk of the ordinance; and having subsequently entered parliament, he became secretary at war, during the administrations of Sir Robert Peel in 1829, 1830, and 1841. In 1844 he was appointed to replace Lord Ellenborough as governor-general of India. On the breaking out of the Sikh war, in 1845, he hurried to the scene of action, and generously postponed all questions of dignity, acted as second in command during the fierce conflicts of Moodkee, Ferozeshah, and Soobraon. For his brilliant services, both in the cabinet and in the field, he was created Viscount Hardinge and awarded various other honours were showered upon him. In 1852 he was appointed by Lord Derby master-general of the ordinance; the same year he succeeded Sir Robert Peel as commander-in-chief, an office which he held through the eventful epoch of the Russian war, having in the mean while been advanced to the rank of field-marshal. During his long and varied career, Lord Hardinge was remarkable for unflinching courage, unwearied zeal, a never-failing sense of duty, and great geniality of disposition, and even when the weight of years and of lengthened services was begin-

ning to tell upon him, he was a ready and efficient man of business. Died, 1856.

HARDOUIN, JEAN, a learned French Jesuit, the author of several works, but remarkable as the author of one in particular (which excited equal interest and animadversion at the time), the object of which was to show that almost all the writings under the names of the Greek and Roman poets and historians are spurious productions of the 13th century. Born, 1647; died, 1720.

HARDWICKE, PHILIP YORKE, Earl, lord chancellor of England, was born at Dover, in 1690. After serving the offices of solicitor and attorney-general, he was in 1733 appointed chief justice of the King's Bench, and created a peer. In 1736 he was made lord chancellor, which situation he held 20 years. In 1754 he was created earl of Hardwicke. The reputation of Lord Hardwicke as an equity judge was very high indeed. So great confidence was placed both in his uprightness and his professional ability that of all his decisions as chancellor not one was set aside, and only three were tried on appeal. Died, 1784.

HARDWICKE, PHILIP YORKE, Earl of, eldest son of the preceding, was born in 1720. In 1738 he was appointed one of the tellers of the exchequer; and in 1764 succeeded his father in the earldom. He died in 1790. Lord Hardwicke, in conjunction with his brother, the Honourable Charles Yorke, projected the "Athenian Letters, or the Epistolary Correspondence of an Agent of the King of Persia, residing at Athens during the Peloponnesian War." A few copies only of this work were at first printed for private circulation; but in 1798 an elegant edition, in 2 vols. 4to, was published. Lord Hardwicke edited "The Correspondence of Sir Dudley Carleton, in the Reign of James I.;" and "Miscellaneous State Papers from 1501 to 1726."

HARDY, Vice-admiral Sir THOMAS, G.C.B., a gallant officer, of whom, for his own fame's sake, it might suffice to say that he was the friend and brother-in-arms of the gallant Nelson, whose last breath he received on board the Victory. At the early age of 12 he entered the royal navy as a midshipman on board the Helena, of 14 guns, and in November, 1793, was made lieutenant in the Meleager, of the squadron of Nelson, under whose notice he was thus brought. He was thenceforth constantly employed under the hero, who, in 1797, promoted him to the command of the brig La Mutine, of the capture of which he was the main cause. His constant gallantry, and especially his conduct at the battle of the Nile, in which his vessel, La Mutine, was the only single-decker that was present, caused Nelson to promote him to the command of the Vanguard. In July, 1803, he became flag-captain to Nelson, on board the Victory, and he it was who, on the fatal though glorious 31st of October, 1805, received the last orders of the greatest naval chief the world has ever seen. For his services at Trafalgar he was created a baronet. After 36 years of arduous and efficient service in every quarter of the globe, he was, in 1834, appointed to the honourable post of governor of Greenwich Hospital, where he

constantly resided till the close of his valuable life. Born, 1769; died, 1839.

HARDYNG, or **HARDING**, **JOHN**, an early English historian, was born about 1378, and entered the service of the Percy family. He was actively engaged through the greater part of his life, and was present at many battles in Scotland and in France; but has been chiefly celebrated as the discoverer or more probably the fabricator of documents proving the feudal subjection of Scotland to England, for which he obtained rich rewards. His Chronicle is in metre, and extends "from the first beginning of England unto the reign of Edward the Fourth." He appears to have gathered materials for it diligently, and in the last years of his life rewrote it entirely. A continuation in prose to 1538 was written by Grafton. Hardyng was living in 1465.

HARE, **JULIUS CHARLES**, the Venerable Archdeacon, was born in 1795, at Hurstmonceux, in Sussex, of which parish his father was vicar, and was educated at Trinity College, Cambridge. In 1832 he was instituted to the rectory of Hurstmonceux (the advowson of which was in his family), and in this sphere he laboured till his death. His name was first brought before the world as translator, in conjunction with Dr Thirlwall, of the first two volumes of Niebuhr's "History of Rome." The next production of his pen was "Guesses at Truth," a volume of miscellaneous essays and fragments, published in conjunction with his brother, Augustus William Hare. These writings were the first fruits of his intercourse with that little band who looked up to Samuel Taylor Coleridge as their guide and teacher. His subsequent works were chiefly on theological subjects. He was generally considered as the leader of that party in the Church of England to which the name of "Broad Church," has been given. In "The Mission of the Comforter" a volume of sermons, with an appendix twice the bulk of the text, replete with minute learning, classified by a master hand, he made an attempt to lay down a form of belief on this subject which may be more widely accepted than any hitherto propounded. His other theological works consist chiefly of sermons and charges, which it has been observed form a complete history of the times, in their bearing on the interests of the Church. In 1848 he edited the "Remains of John Sterling," for seven months his curate at Hurstmonceux; and in 1852 he published the "Contest with Rome," an answer to Dr Newman's lectures on the present position of Catholics in England. Died, 1855.

HARGRAVE, **FRANCIS**, an eminent legal writer and barrister, born in 1741. He was less distinguished at the bar than as a chamber counsel, and was author of numerous professional works. Among his publications are the collection of "State Trials," 11 vols. folio; and "Juridical Arguments and Collections," 2 vols. 4to. Died, 1821.

HARRINGTON, **Sir JOHN**, miscellaneous writer, was born in 1561. He was grandson, by the mother's side, to Henry VIII., and had Queen Elizabeth for his godmother. He was educated at Cambridge, and then

attached himself to the court, enjoying the favour of the queen till her death. At her desire he translated the "Orlando Furioso" of Ariosto into English verse; for Prince Henry, son of James I., he wrote a "Brief View of the State of the Church;" and he was author of some epigrams and other poems. Died, 1612.

HARIOT, **THOMAS**, an English mathematician, was born at Oxford, in 1660, and educated at St Mary Hall. He accompanied Sir Walter Raleigh to America, and published an account of the discovery of Virginia. He found a generous patron in the earl of Northumberland, and lived some time in Slou College. He is now known to have paid much attention to astronomy, to have held correspondence with Kepler, and made several great discoveries. He died in 1621. His "Actis Analyticis Paris," a treatise on Algebra, was printed after his death, and as it appeared a few years before Descartes published his work on Geometry, it has been charged that Descartes owed many of his discoveries to Hariot. But this charge has not been sustained.

HARLEY, **ROBERT**, earl of Oxford and Mortimer, a distinguished English statesman, was born in 1661. At the revolution he was returned to the House of Commons for Tregony, in Cornwall; and in 1701 he was chosen speaker, which office he held while secretary of state, but resigned the latter place in 1708. In 1710 he again came into office, as a commissioner of the treasury, and chancellor of the exchequer. Shortly after he was stabbed by the marquis of Guiscard, a Frenchman, when under examination at the council-board; but he recovered from his wound, and the assassin died in prison. He was then advanced to the peerage, and made lord high treasurer; which office he resigned a few days before the death of Queen Anne, in 1714. On the accession of George I. he was impeached by the House of Commons, and committed to the Tower, where he was kept two years, and then, after a public trial, he was acquitted. After this he retired wholly from public business, and died in 1724. Lord Oxford was a liberal encourager of literature, the patron of Pope and Swift, author of some few pamphlets himself, and a great collector of books. The important collection of manuscripts in the British Museum known as the Harleian Collection was formed by him and his son Edward, who succeeded him.

HARLOW, **GEORGE HENRY**, an English painter, was born in 1787; studied under Drummond and Sir Thomas Lawrence; and obtained much reputation as a portrait painter. On occasion of a visit to Rome he copied Raphael's great picture of the Transfiguration in a surprisingly short time. He produced several good historical pictures; among which is the well-known scene from Shakespeare's Henry the Eighth, in which he introduced portraits of the Kemble family. Died, 1819.

HARMER, **THOMAS**, a dissenting minister at Wattlefield, in Suffolk, was born in 1715, and became eminent as an oriental scholar. His chief work is entitled "Observations on

divers Passages of Accounts of Travels, &c.

HARMODIUS, [HAROLD I.,] a king of England, succeeded 1035. He reigned 1039.

HAROLD II., king, second son of Godwin, the death of Edward he took possession of the more legal claim or the asserted bequest of William, duke of Normandy, accordingly invaded England, and was engaged in the invasion of the king by Tostig, the brother of Harold, who was defeated at the battle of the Marston, and their leader after heard of the king's death, marched southward to the memorable battle of Hastings, on 14, 1066; by which the dominion by the Normans was established.

HAROUN AL RAESHID, caliph of the Saracens, in 786, and was the most famous of his race, ruling over territories in Egypt to Khorasana, splendid victories over the Persians, and obtained immense bravery, magnificence, but he was cruel and tyrannical. Al Rashid was the coronator of the Great, emperor of the East, and his court, beautiful clypsydra or 809.

HARRINGTON, **JAMES**, a political writer, was born in Hampshire. His chief work is "The Oceana," a political treatise, which defended republican government, and was a charge of treason against him, from whence he was removed to the Tower, near Plymouth, and was released on bail.

HARRIS, **General LEWIS**, of the 73rd foot, and general, entered the army in 1759. He served during the American war, and received a wound at the battle of Bunker Hill, but he was not returned in time to be retraced in time, and was previously to the army in India. He subsequently made secretary and was in service until the capture of the city, when his services were rewarded with the Bath, and died, 1829.

HARRIS, **JAMES**, a writer, was born at Salisbury, and was made secretary and was in service until the capture of the city, when his services were rewarded with the Bath, and died, 1829.

His chief work is entitled "Observations on

divers Passages of Scripture, illustrated by Accounts of Travellers in the East." Died, 1788.

HARMODIUS. [ARISTOGITON.]
HAROLD I., surnamed Barefoot, king of England, succeeded his father, Canute, in 1035. He reigned four years, and died in 1039.

HAROLD II., king of England, was the second son of Godwin, earl of Kent. Upon the death of Edward the Confessor, in 1066, he took possession of the throne, disregarding the more legal claim of Edgar Atheling, or the asserted bequest of Edward in favour of William, duke of Normandy. The latter accordingly invaded England while Harold was engaged in the north in repelling an invasion of the king of Norway, supported by Tostig, the brother of Harold. The invaders were defeated at the battle of Stamford Bridge, and their leaders slain. Harold soon after heard of the Norman invasion, and marched southward without delay. He fell at the memorable battle of Hastings, Oct. 14, 1066; by which the conquest of the kingdom by the Normans was commenced.

HAROUN AL HASHID, a celebrated caliph of the Saracens, ascended the throne in 786, and was the most potent prince of his race, ruling over territories extending from Egypt to Khorassan. He gained many splendid victories over the Greek emperors, and obtained immense renown for his bravery, magnificence, and love of letters; but he was cruel and tyrannical. Haroun Al Hashid was the contemporary of Charles the Great, emperor of the West, and sent an embassy to his court, with a present of a beautiful clepsydra or water-clock. Died, 808.

HARRINGTON, JAMES, a celebrated political writer, was born, in 1611, in Northamptonshire. His chief work is entitled "Ocena," a political romance, in which he defended republicanism. In 1661 he was, on a charge of treason, sent to the Tower, from whence he was removed to St Nicholas's Island, near Plymouth, but was afterwards released on bail. He died, deranged in his intellects, in 1677.

HARRIS, General Lord GEORGE, colonel of the 73rd foot, and governor of Dumbarton Castle, entered the army as a cadet in the royal artillery, before he was 13 years of age, in 1759. He served during the campaign in America, and received a wound in the head at the battle of Buaker Hill, which obliged him to be trepanned and to be sent home; but he returned in time to take the field previously to the army landing on Long Island. He subsequently distinguished himself in India, and continued in active service until the capture of Seringapatam; when his services were rewarded with the honours of the Bath, and a British peerage. Died, 1829.

HARRIS, JAMES, a philological writer, was born at Salisbury, in 1709. In 1774 he was made secretary and comptroller to the queen; and died in 1780. He wrote "Three Treatises; the first concerning Art; the second concerning Music, Painting, and Poetry; and the third concerning Happiness;" "Hermes, or a Philosophical Inquiry

concerning Language and Universal Grammar;" "Philological Inquiries," &c. His "Hermes" displays much ingenuity, and an extensive acquaintance with the writings of the Greek poets and philosophers.

HARRIS, JAMES. [MAIMESBURY, Earl of.]

HARRIS, JOHN, an English divine and mathematician, who was secretary and vice-president of the Royal Society, and died in 1719. He published a collection of Voyages and Travels, various mathematical works, a "History of the County of Kent," &c.; but he is best known as the first projector of a Cyclopaedia, or Dictionary of Arts and Sciences. This work, entitled "Lexicon Technologicum," was completed about 1710, in 2 vols. folio.

HARRIS, JOHN, Principal of New College, London, was born in Devonshire, about 1803. He was educated at the Dissenting College, at Hoxton, afterwards removed to Highbury, and was pastor for some years of an Independent congregation at Epsom. He first came into public notice as author of the prize-essay entitled "Mammon," published in 1836, and which had an immense popularity. In the following year he became professor of theology at Cheam College, and in 1850, on the union in one of the several Independent Colleges in London, he was named Principal of the "New College." His first work, and one of his best, was "The Great Teacher," which only became popular after "Mammon" had made its author famous. Dr Harris was an eloquent, not theoretical, preacher; and as author he further distinguished himself by the publication of "The Pre-Adamite Earth," "Man Primeval," and "Patriarchy," all of which are rich in thought and attractive by their grace of style. Died at New College, December 21, 1856.

HARRIS, WILLIAM, a biographical writer, was born at Salisbury, in 1720. He became a dissenting preacher, and afterwards applied himself to literary labour. He wrote a "Life of Hugh Peters," which appeared anonymously; "Life of James I." in 1753; "Life of Charles I." in 1758; "Life of Cromwell" in 1761; and "Life of Charles II." in 1765. He professed to follow "the manner of Bayle," "a very bad manner," says Carlyle, "more especially when a Harris presides over it." His books, however, have some worth, as containing very numerous careful excerpts, and the Lives of Cromwell, Charles I., and James I. were republished in 1814. Harris received the degree of D.D. from the university of Glasgow in 1765, and died in 1770.

HARRISON, JOHN, celebrated as the inventor of the time-keeper for ascertaining the longitude at sea, was born at Foulby, near Pontefract, Yorkshire, in 1693. His father, a carpenter or builder, brought him up to the same occupation; but by dint of his own ingenuity and perseverance, he learned to make clocks and watches; and having turned his attention to the improvement of pocket watches, he was induced to make a time-keeper, in that form, which he finished in 1759. This chronometer, in two voyages, having been found to correct

the longitude within the limits required by the act of parliament, Harrison applied for the proposed reward of £30,000, which he received. Harrison was also the inventor of the compensation pendulum, named, from the manner of its construction, the *gridiron* pendulum, and of the going fusee, by means of which a watch goes while being wound up. Died, 1776.

HARRISON, JOHN, one of the judges who sat upon the trial of Charles I., was the son of a butcher, and became a colonel in the parliamentary army. He was chosen to bring the king from the Isle of Wight to London, and was one of the eleven members of the High Court of Justice who were executed after the Restoration. Harrison was a man of noble character and deeply religious. He met death bravely, rejoicing, he said, "to die for the good cause."

HARRISON, WILLIAM HENRY, President of the United States of America, was born in Virginia, in 1773; his father being one of the most conspicuous among the patriots of the revolution. After receiving the customary education at Hampden Sydney College, he studied for the medical profession; but participating in the general excitement which prevailed throughout the country against the barbarous mode of warfare at that time practised by the Indians on the north-western frontiers, he suddenly abandoned the study of Galen, and joined his brethren in arms, as an ensign in the U.S. artillery, in 1791. Ten years later he was made governor of Indiana, and he held that post till 1813. Both as an officer of the government, and subsequently as an able representative in congress, he displayed the principles of a disinterested patriot. During the year 1811, General Harrison commanded against the Indians, who, under Tecumseh, had created serious disturbances on the frontier. The most signal success crowned his efforts, and he was appointed by Mr Madison to negotiate with those enemies against whom his military skill had been so ably directed. In 1812, he took part in the war with the English. In 1828, he was sent as United States' minister to Columbia; and, in 1840, he received the highest honour that can be bestowed upon a citizen of a free country, in being elected to preside over it as its chief magistrate. But just as his measures were coming into operation, and when at the height of his popularity, he was seized with an illness, and died April 4, 1844.

HARTE, WALTER, an English poet and historian, was born and educated at Marlborough, in Wiltshire. He published a poetical collection, called the "Amaranth," a "History of Gustavus Adolphus," 2 vols. 4to; and "Essays on Husbandry." Died, 1773.

HARTLEY, DAVID, an English philosopher and physician, was born at Illingworth in 1705. After studying at Cambridge, where he became a fellow of Jesus College, he adopted the medical profession, and practised it with success at Newark, Bury St Edmunds, London, and Bath. The pursuit of science and philosophy occupied all the time that could be spared from his profession, and in 1748, he published the work on which

his reputation is founded,—"Observations on Man, his Frame, his Duty, and his Expectations." In it he developed the hints and inquiries of Locke on purely materialist principles. "The association of ideas he made the foundation of all intellectual energy; and derived it from certain vibrations of the nerves." Coleridge was at one period of his life an admirer of Hartley, and named his son after him. Hartley died at Bath, in 1757.

HARTSHORNE, CHARLES HENRY, an eminent archaeologist, was born at Brocton, in 1802. He was educated at Shrewsbury School, and the university of Cambridge, graduating M. A. in 1820; was ordained priest in the Church of England two years later; held several curacies in succession, and in 1838 became rector of Cogenhoe, in Northamptonshire. In 1850, he was presented by the queen to the rectory of Houldenby in the same county, which he held till his death. He was an enthusiastic and accomplished antiquary and a prolific writer. Among his separate works are—"Salopia Antiqua, or an Enquiry into the early Remains in Shropshire;" "Historical Memorials of Northampton;" and "Memoirs illustrative of the History and Antiquities of Northumberland." He edited "Ancient Metrical Tales," and contributed papers to the archaeological and other journals. Died at Houldenby, 11th March, 1865.

HARTSOECKER, NICHOLAS, a Dutch metaphysician and natural philosopher, was born at Gouda, in 1696. While studying at Leyden, he made the acquaintance of Huygens, who soon after took him to Paris, and introduced him to Cassini. Hartsoecker was then applying himself chiefly to the construction of telescopes, in which he was very successful. After a long residence at Paris he went, in 1696, to Rotterdam. In 1704, he became professor of philosophy at Düsseldorf, and mathematician to the elector palatine. He died in 1725. He wrote an "Essai de Dioptrique," "Principes de Physique," and other scientific works. It is said that Hartsoecker first made the discovery of the spermatic animalcules, to which physiologists are indebted for a new theory of generation.

HARVARD, JOHN, a Nonconformist divine, who died in 1688, at Charlestown, in New England. He is deserving of commemoration as the founder of the college bearing his name at Cambridge, in North America.

HARVEY, WILLIAM, the distinguished physician, discoverer of the circulation of the blood, was born at Folkstone in 1578. He studied at the university of Cambridge, completing his medical studies and graduating M. D. at Padua. After his return to England he became fellow of the Royal College of Physicians, and physician to St Bartholomew's Hospital. In 1623 he was named physician to James I., and he held the same post under Charles I. For a short time he was master of Merton College, Oxford, and he was chosen president of the College of Physicians, but did not accept the appointment on account of his advanced age. His great discovery, developed and

completed by careful dissection, was published in 1628, under the title of "Exercitatio Anatomica de Motu Cordis et Sanguinis in Animalibus." It was received, and though many opponents were written against it. And against it. The rest of the European. The rest of any of his opponents, professor of anatomy, author also of "Exercitatio Anatomica de Motu Cordis et Sanguinis in Animalibus." The manuscripts of during the civil war served in the British army, and died in 1657. He had an estate to the College, and the yearly "Harveian" a portrait of Harvey in the Portrait Gallery.

HASSAN PACHA, Ottoman empire, was born in Algiers, and when he was in the Algerine navy. He was made, but his life was spent in the service of the Spanish crown, whence he was introduced to the court of Louis XIV. In 1760 he went to Constantinople, and was made pasha of the Turkish empire. He distinguished himself by his bravery, and was appointed high admiral. He was an insurgent; took part in the French Revolution, and hehed the French power of the Porte. He was appointed pasha of Egypt to assist with him vast treasures. In the war between France and England, 1798, although Hassan Pacha was appointed commander of all the forces in Egypt; but though he was a man of great energy on his part, he was subjected to repeated reverses, and was accordingly high command, and died in 1790.

HASSE, JOHANN, a musical composer, was born in Hamburg, in 1699. He was successful, by composing operas, in the theatres of Italy, he died in 1733, where he was residing. He soon, however, died, and finally removed to Hamburg, where he died in 1783. He was celebrated as one of the best and agreeable composers of his time. His wife, FAUSTINA, who was aged 90, was eminent for her new method of singing, and with astonishing neatness.

HASSELQUIST, PER, a naturalist, and one of the pupils of Linnæus, was formed the scheme of an expedition into the natural history of the island of Smymna

completed by careful and laborious investigation, was published in 1628, in the treatise entitled "Exercitatio de Motu Cordis et Sanguinis." It was at once generally received, and though controverſy was excited and many opponents started up, many more books were written in favour of than against it. And no Englishman wrote against it. The reputation of Harvey was European. The only reply he published to any of his opponents was that to Rivianus, professor of anatomy, Paris. Harvey was author also of "Exercitationes de Generatione Animalium." He wrote other works, the manuscripts of which were mostly burnt during the civil war: two only being preserved in the British Museum. Harvey died in 1657. He had given his library and estate to the College of Physicians, providing at the same time for the delivery of the yearly "Harveiana Oration." There is a portrait of Harvey in the National Portrait Gallery.

HASSAN PACHA, grand vizier of the Ottoman empire, was said to be an African by birth, and, when young, served in the Algerian navy. He rose to the highest command, but his life being in danger from a party envious of his rise, he took refuge in Spain, whence the king gave him letters of introduction to the court of Naples. In 1760 he went to Constantinople, and entered into the Turkish service. Here he soon distinguished himself by his superior skill and bravery, and was appointed captain pacha, or high admiral. He vanquished the Egyptian insurgents; took Gaza, Jaffa, and Aero; and beheaded the famous Daher, sheik of the latter city, who had for years defied the power of the Porte. He twice reduced the beys of Egypt to subjection, and carried with him vast treasures to Constantinople. In the war between Turkey and Russia, in 1788, although Hassan was then 85 years old, he was appointed to the supreme command of all the forces, and made grand vizier; but though there was no want of energy on his part, age had impaired his abilities, and the Ottoman forces were subjected to repeated discomfiture. The vizier was accordingly dismissed from his high command, and he was put to death in 1790.

HASSE, JOHANN ADOLPH, German musical composer, was born at Bergedorf, near Hamburg, in 1699. After gaining great success, by composing operas for the chief theatres of Italy, he came to London, in 1733, where he was received with great distinction. He soon, however, went to Dresden, and finally removed to Venice, where he died in 1783. Hasse is deservedly celebrated as one of the most natural, elegant, and agreeable composers of his time.—His wife, **FAUSTINA**, who died in the same year, aged 90, was eminent as the inventor of a new method of singing, by running divisions with astonishing neatness and precision.

HASSELQUIST, FREDERICK, a Swedish naturalist, and one of the most celebrated pupils of Linnæus, was born in 1722. Having formed the scheme of making researches into the natural history of Palestine, he embarked for Smyrna in August, 1743, went

to Egypt, remained some time at Jerusalem, and afterwards visited other parts of the country. Returning to Smyrna, he brought with him an admirable collection of plants, minerals, fishes, reptiles, insects, and other natural objects. His memoirs and careful observations formed the material from which his friend and master Linnæus compiled and published the work, entitled "Iter Palestinum." Died at Smyrna, 1752.

HASTED, EDWARD, a topographer and antiquary, was born at Hawley, the seat of his family, in Kent, in 1732. He devoted the greatest part of his life to the labour of compiling a history of his native county, which was published in 4 vols. folio, 1799. He was master of the hospital at Corsham, in Wiltshire, where he died in 1812.

HASTINGS, Lady ELIZABETH, daughter of Theophilus, earl of Huntingdon, was born in 1682. She remained single through life, and distinguished herself by works of piety and benevolence. She erected schools, built churches, supported many indigent families, and founded five scholarships in Queen's College, Oxford. Died, 1739.

HASTINGS, WARREN, first governor-general of British India, was born in 1733, at Churchhill, near Daylesford, in Worcestershire, of which parish his father was rector. He was educated at Westminster, and, at the age of 17, went out to India as a writer in the Company's service. On his arrival he applied with diligence to the duties of his station, and at his leisure studied the oriental languages. After 14 years' residence in Bengal he returned to England; but in 1769 he went out as second in council at Madras, where he remained about two years, and then removed to Calcutta as president of the Supreme Council of Bengal. This was a critical period, and the state of Hindostan soon became perilous from the revolt of the native subjects, the defection of allies, and the increasing power of Hyder Ally, the sovereign of Mysore, aided by the land and sea forces of France. In this exigency the governor-general had to depend solely upon his own exertions; and he succeeded, beyond all expectations, in saving British India from a combination of enemies, and in increasing and strengthening the power of the Company at the expense of the native princes. Notwithstanding this, party spirit at home turned the merit of Mr Hastings into a crime, and charges were brought against him in parliament. In 1786 he returned to England, when he was accused of having governed arbitrarily and tyrannically; of having extorted immense sums of money; and of having exercised every species of oppression. An impeachment, conducted by Burke, followed, which, in contempt of all the principles of justice, lasted 9 years. He was at length acquitted, and sentenced to pay only the costs of the defence, above £70,000 sterling, for which the East India Company indemnified him by a pension of £4000 for life. He lived, however, to see his plans for the security of India publicly applauded; and died in 1818. Mr Hastings was a man of mild and unassuming manners, and an elegant scholar. He wrote "A Narrative of

the Insurrection at Benares," "Memoirs relative to the Stato of India," some fugitive poetry, &c. There is a *Life of Warren Hastings* by Gleig, and a brilliant *Essay* on his career by Lord Macaulay. His portrait, painted by Kettle, is in the National Portrait Gallery.

HASTINGS, FRANCIS RAWDON, Marquis of, and governor-general of India, was the son of the earl of Moira, was born in 1764, and entered the army in 1771. He greatly distinguished himself in the American war; was appointed, in 1778, adjutant-general of the British forces in America, and rose to the rank of a brigadier-general; but a severe illness compelled him to return home before the conclusion of hostilities, when he was made *aid-de-camp* to the king, and created an English peer. Advanced to the rank of a major-general in the summer of 1794, he was sent, with a reinforcement of 10,000 men, to join the duke of York, opposed to the French in Holland; and materially contributed to mitigate the disasters of that memorable campaign. When the Whigs, with whom he had acted, came into power, in 1806, he was appointed master-general of the ordnance, which post he resigned on the fall of his party. In 1812 he obtained the appointment of governor-general of British India, which he held till 1822; and during the 10 years of his sway he overcame the Nepauls, the Pindarees, and other native powers, and rendered the British authority supreme in India. While absent he was created marquis of Hastings. Ill health compelled him to return; and in 1824 he was appointed governor of Malta; but his health growing worse, he proceeded to Naples, and died on board the *Revenge*, in Bala Bay, Nov. 29th, 1825. He was an excellent officer, an acute statesman, and a man of a noble-minded and generous disposition. The marquis left a letter, in which, among other requests, he desired that his right hand might be cut off, and preserved until the death of the marchioness, and be put into the coffin to be buried with her. His request was complied with.

HATFIELD, THOMAS, bishop of Durham, was the especial favourite of Edward III., at whose desire he was elected to the bishopric in 1345. He distinguished himself soon after his consecration, by repelling the Scots, who had invaded the principality, and were defeated by Lord Percy and the bishop in person, at the head of their respective forces. On this occasion the king of Scotland fell into the hands of the victors, and was afterwards ransomed. He was the founder of Trinity College, Oxford, which was at first called Durham House; and he founded a Carmelite friary at Northallerton, in Yorkshire. He died in 1381, and was buried in his cathedral, where his effigy is still to be seen.

HATTON, Sir CHRISTOPHER, lord chancellor of England, was born at Holdenby, in Northamptonshire; educated at St Mary Hall, Oxford; and studied at the Inner Temple. Instead, however, of following the law, he became a courtier, and attracted the queen's notice by his graceful dancing in a masque. From this time he rose in favour,

and, in 1587, was made both chancellor and knight of the garter. His inexperience created much prejudice against him at first, but his natural capacity and sound judgment were seldom found defective. He died in 1591 of a broken heart, as some historians affirm, occasioned by the queen's demanding a debt, which he was unable to pay. He wrote the fourth act in the tragedy of "Tancred and Sigismunda;" and to him is ascribed "A Treatise concerning Statutes or Acts of Parliament."

HATZFELD, FRANCIS LOUIS, Prince of, was born at Vienna, in 1756, and was governor of Berlin when the French entered that city in 1806. The French having discovered that Prince Hatzfeld continued to give the Prussian government information, &c., Napoleon ordered him to be tried as a spy. The wife of the prince being informed of the danger, hastened to Napoleon, and threw herself at his feet, assuring him that her husband was incapable of doing a dishonourable action; but when the emperor showed her the letter, and she recognized the handwriting of the prince, she flung it away. On her recovering, Napoleon told her that she held in her hand the only document there was against her husband, and asked her why she did not burn it. The hint was of course sufficient, and Napoleon pardoned him. The Memorial of Las Cases contains the affecting letter which Napoleon wrote on this occasion to the empress. Hatzfeld was afterwards employed on various diplomatic missions, and died, at Vienna, in 1827.

HAUBOLD, CHRISTIAN GOTTLIEB, a celebrated German jurist, was born at Dresden, in 1766. He was made doctor of law in 1788; and eventually became ordinary professor of law in the university of Leipzig. He was profoundly versed in the science of jurisprudence; and especially in the study of Roman law. As an academical instructor he was pre-eminent, and crowds of students from all parts of Germany flocked to his lecture-room. His library, consisting of nearly 10,000 volumes, on Greek and Roman law, was purchased by the Emperor Alexander for the university of Abo. Died, 1841.

HAUFF, WILHELM, one of the most graceful prose writers of Germany, was born at Stuttgart, 1802. After the usual preliminary education, in which he distinguished himself more by his love of romances than his classical attainments, he went to the university of Tübingen from 1820 to 1824, where he studied philosophy and theology, with a view to the church. While discharging the duties of tutor in a noble family at Stuttgart, he published the "Märchen Almanach auf das Jahr, 1826;" the success of which was such that he was induced to embrace literature as a profession. Among his numerous writings are "Memoires des Satans," "Mann im Monde," "Lichtenstein," "Die Bettlerin vom *Pont des Arts*," &c. He had just undertaken the editorship of the journal called the "Morgenblatt," when he was seized with typhus fever, and died Nov. 1827.

HAUGWITZ, GRATIAN HEINRICH KARL, Count of, an eminent Prussian statesman,

was born in Silesia, in 1750. He was Prussian minister of public affairs, from 1806 to 1813. He was a friend of Haugwitz with the affairs and the press in this situation he gave the Black Eagle, a South Prussia. When the station; and the to bring France a connection. But, occupied Hanover ed dangerous to th Germany, which maintain, and the changed. Haugwitz; and Hardenb adopted a different remained neutral. his retreat, to negot Vienna; and concl Austerlitz, the con over was ceded to P ily of northern Germ But this treaty inv England, while her became more embarr witz then went to tending interests, effecting his object, to his estates in Siles in 1832.

HAUKAL, ABUL BEX, an Arabian traveller of the 10th century, dad, whence he set the purpose of visitin travelled in Syria, Mo Africa, and gave the and observations in Book of Roads and K work, translated in Ouseley, in 1800, was to be a translation of kal was living in 975.

HAUKSBEE, FRANZ, a philosopher, and or tricians, lived in the He contributed accoun in electricity to the Royal Society, of whi low in 1705. A few y ed his "Physico-Mech which was translated Han. He was also an scientific works. The death are not known.

HAUSER, KASPAR, story excited so mu that of the "From M tury, first became kn 1828, when he appa young man of about Unable to talk, ignor and delicate in body, letter without signatur an account of his origi trate, not knowing w had him shut up as a v with toys and pictur little by little gained H related that he had

was born in Silesia, in 1738. When the Prussian minister, Hertzberg, retired from public affairs, Frederick William intrusted Haugwitz with the portfolio of foreign affairs and the presidency of the cabinet. In this situation he gave the king great satisfaction, and was rewarded with the order of the Black Eagle, and the grant of estates in South Prussia. When Frederick William III. ascended the throne, Haugwitz retained his station; and the tendency of his policy was to bring France and Prussia into a closer connection. But, when the French troops occupied Hanover in 1803, this step appeared dangerous to the neutrality of northern Germany, which Prussia had sought to maintain, and the views of the king were changed. Haugwitz now retired to his estates; and Hardenberg, who succeeded him, adopted a different system, so that Prussia remained neutral. In 1805 Haugwitz left his retreat, to negotiate with Napoleon at Vienna; and concluded, after the battle of Austerlitz, the convention by which Hanover was ceded to Prussia, and the neutrality of northern Germany was acknowledged. But this treaty involved his country with England, while her position with France became more embarrassing than ever. Haugwitz then went to Paris to reconcile contending interests, but returned without effecting his object, and once more retired to his estates in Silesia. He died at Vienna, in 1832.

HAUKAL, ABUL KASEM MOHAMMED BEN, an Arabian traveller and geographer of the 10th century, was a native of Baghdad, whence he set out about A. D. 940, for the purpose of visiting other countries. He travelled in Syria, Mesopotamia, Persia, and Africa, and gave the results of his studies and observations in a work entitled "A Book of Roads and Kingdoms." A Persian work, translated into English by Major Ouseley, in 1800, was erroneously supposed to be a translation of Haukal's book. Haukal was living in 975.

HAUKSBEE, FRANCIS, an English natural philosopher, and one of the earliest electricians, lived in the 17th and 18th centuries. He contributed accounts of his experiments in electricity to the Transactions of the Royal Society, of which he was chosen fellow in 1705. A few years later he published his "Physico-Mechanical Experiments," which was translated into French and Italian. He was also author of several other scientific works. The dates of his birth and death are not known.

HAUSER, KASPAR, whose mysterious story excited so much interest, rivalling that of the "Iron Mask" in the 17th century, first became known to the world in 1828, when he appeared at Nürnberg, as a young man of about sixteen years of age. Unable to talk, ignorant as a baby, feeble and delicate in body, he had in his hand a letter without signature, professedly giving an account of his origin. The police magistrates, not knowing what to do with him, had him shut up as a vagabond. He played with toys and pictures like a child, and little by little gained the power of speech. He related that he had passed his life in

an under-ground dungeon, seeing no one, knowing no difference of night and day, always lying or seated; that latterly some one had taught and helped him to walk, and at last had carried him out, and set him down on the road to Nürnberg, giving him the letter and then leaving him. In the month of October he was mysteriously attacked and wounded, and ran to hide himself in a cave. He was then removed to another house for safety. But in a few months another mysterious accident befell him, and suspicion was excited that he was an impostor, but Feuerbach, the eminent jurist, maintained that he was the victim of a great crime. In 1832 Lord Stanhope took great interest in his case, charged himself with the care of him, and placed him with a teacher at Anspach; furnishing the means also for a thorough investigation of the mystery. But in December, 1833, he was noticed from the house by a stranger, returned mortally wounded by a dagger in the side, and died three days after.

HAUTEFEUILLE, JEAN DE, a French mechanician, was born at Orleans, in 1647. He made several discoveries and improvements in clockmaking, and invented the spiral spring which moderates the vibration of balance-wheels in watches, and which Huygens afterwards perfected. He also wrote several short treatises on mechanical subjects; also, "The Art of Breathing under Water," "The Perpetual Pendulum," "A new System of the Flux and Reflux of the Sea," &c. Died, 1724.

HAUY, RENÉ JUST, Abbé, a celebrated mineralogist, born at St Just, in Pleadry, in 1743. He first studied theology, and was twenty-one years professor of languages. But mineralogy was his favourite pursuit; and to him science is indebted for an admirable theory of crystallization, founded on geometrical laws. In 1783 he was admitted a member of the Academy of Sciences; and wholly devoting himself to his studies, he long remained a stranger to the revolution and all its horrors. But at length, having refused to take the oath of obedience to the constitution required of the priests, he was deprived of his place, and was arrested, in the midst of his calculations, as a recusant priest. He was, however, released through the affectionate exertions of his pupil and friend, the celebrated Geoffroy Saint-Hilaire; and was subsequently appointed, by Buonaparte, professor of mineralogy at the botanic garden, and to the faculty of sciences, at Paris. In 1803, at the command of Napoleon, he wrote his "Traité de Physique;" and when the emperor, after his return from Elba, visited the museum, he said to Haüy, "I read your physics again in Elba, with the greatest interest;" and then decorated him with the badges of the Legion of Honour. The esteem which the emperor had for this distinguished man was the more honourable, both to him and to Haüy, as the latter had opposed Buonaparte's elevation to the imperial dignity, by signing *noy* when the question was proposed for the ratification of the nation. He died in 1822, aged 80. His treatises on mineralogy, crystallography, and natural history are all highly esteemed;

and his beautiful collection of minerals, for which he had refused an offer of 600,000 francs, was bought by the duke of Buckingham.

HAYU, VALENTINE, a brother of the preceding, born in 1746, was the founder of the Institution for the Blind at Paris. The Institution did not, however, succeed to the extent anticipated, and was therefore abandoned; but a pension of 2000 francs was granted to him, and he accepted an invitation to go to St Petersburg, to undertake one there. He returned to Paris in 1806, and died a few months before his brother, in 1822.

HAVELOCK, Sir HENRY, a distinguished British general, was born at Bishopwearmouth in 1795, and educated at the Charterhouse. He was subsequently entered of the Middle Temple, where his most intimate associate was Talfour, the author of "Ton." He obtained a commission as a second lieutenant in the rifle brigade (the 95th), where his military training was assisted by Captain (afterwards Sir) Harry Smith. After serving for eight years in England, Scotland, and Ireland, he exchanged into the 13th light infantry, and embarked for India in 1823. On the breaking out of the first Burmese war he was appointed deputy assistant-adjutant-general, and was present at several actions. At the close of the war he was associated with Captain Lumsden and Dr Knox in a mission to the Court of Ava, and had an audience of the "Golden Foot," when the treaty of Yandaboo was signed. In 1827 he published the "History of the Ava Campaigns," and in that year he was appointed adjutant of the military depot at Chinsurah. He subsequently visited Calcutta, and was appointed adjutant of his corps. In 1838 he was promoted to a company, after having served 23 years as a subaltern. In the first Affghan campaign he was present at the storming of Ghuznee and the occupation of Cabul, and prepared a "Memoir of the Affghan Campaign." When the Eastern Ghilziees blockaded Cabul, Have-lock was sent to join Sir Robert Sale, and was present at the forcing of the Khoord Cabul pass, at the action of Tezeen, and all the other engagements of that force till it reached Jellalabad. In the final attack on Mahomed Akbar, in April, 1842, Have-lock commanded the right column, and defeated him before the other columns could come up. For this he was promoted to a brevet majority, and was made Companion of the Bath. He was then nominated Persian interpreter to General Pollock; proceeded with Sir John M'Caskill's force into the Kohistan, and had an important share in the brilliant affair at Istaliff. Next year he was promoted to a regimental majority, and nominated Persian interpreter to the commander-in-chief, Sir Hugh Gough. At the close of 1843 he accompanied the army to Gwalior, and was engaged in the battle of Maharajpore. In 1844 he was promoted to the rank of lieutenant-colonel by brevet. In 1845 he proceeded with the army to meet the invasion of the Sikhs, and was actively engaged in the battles of Moodkee, Ferozeshah, and Sohraon. During the second Sikh

war he quitted his staff employment at Bombay in order to join his own regiment which had been ordered to take the field, and had proceeded as far as Indoro when his further progress was countermanded, and he returned to his post. Twenty-five years of incessant and laborious services now began to tell on his constitution, and his medical advisers, in 1849, sent him to Europe for two years for the restoration of his health. He returned to Bombay in 1851, and was soon after made brevet-colonel, and appointed quartermaster-general, and then adjutant-general, of Queen's troops in India. On the despatch of the expedition to Persia, in 1856, he was appointed to the second division, and commanded the troops at Mohammerah. On the conclusion of peace he returned to Bombay, and on reaching Calcutta, was immediately sent up to Allahabad as brigadier-general, to command the column appointed to traverse Bengal, after the breaking out of the formidable insurrection in 1857. With the greater portion of the 64th and 78th regiments he first attacked the mutineers at Futtehpore, on the 12th of July, and, on the 15th, at Aoung and at Pandoo Nuddee; and on the 16th at Cawnpore, where he had a horse shot under him, and where the enemy lost twenty-three guns. Advancing from Cawnpore on the 29th, he captured Oonso and Busserut Gunge and nineteen guns. This position he was obliged to give up, but retreating on the 5th of August, inflicting great slaughter. On the 12th of August he again defeated the mutineers, and on the 16th attacked them at Bilthoor. On receiving reinforcements under Sir James Outram, he entered Lucknow on the 25th of September, having in two months gained no less than nine victories over forces, five, eight, and ten times numerically stronger than his own, and captured during these operations seventy pieces of cannon. Here he gallantly held his ground until the garrison was finally relieved by Sir Collin Campbell (Lord Clyde) on November 6th, but his health had been undermined by the cares and anxieties he had undergone, and an attack of dysentery put an end to his noble and eventful career. November 21, 1857, four days after he had received the tidings of his having been created a K.C.B. The Queen had conferred upon him the dignity of a baronet, by the title of Sir Henry Have-lock of Lucknow, with a pension of £1000 a year for life. But these honours came too late. Have-lock died the day before the patent was sealed, and the title with the pension was transferred to his son, Captain, now Sir Henry Marshman Have-lock, bart. The country mourned the loss of Sir H. Have-lock, as that of a true patriot. He had always been remarkable for his unassuming earnestness as a Christian as for his gallantry in the field, and he has left behind him a name conspicuous for all that was noble, courageous, and good. Lives of Sir H. Have-lock have been published by Marshman and Heddley, and a volume of "Memorials" by Brock.

HAVERCAMP, SIGEBERT, a celebrated philologist, was born at Utrecht, in 1688, and became professor of Greek, history, and eloquence, at Leyden. From travelling in

Italy, he derived medals and coins, which, besides on numismatists, rested on his critical authors; among which were Lucertius, Joseph Censorinus. Died.

HAWES, STEPHEN, was a native of Oxford. He afterwards, in the household of great pleasure in works are, "Pastoral Temple of Glass," &c.

HAWES, WILLIAM, and founder of the born at Islington, in and followed the profession until 1780, when he became a physician. Before he became deservingly exertions in the estimation of the humane Society, founded in that situation he may truly be said to have voted the best part of several useful tracts. "An Examination of the Primitive Physical and Historical and serious difficulties of that product physician died in 1808.

HAWKE, EDWARD, admiral, was the son of and entered into the In 1734 he obtained the of-war, and distinguished bravery in the famous French before Toulon. British fleet was commanded by Lord Anson, and Rowley, res-admiral of the W. a large French fleet, a of the line; on which knight of the Bath. Admiral Conflans, off-warded with a pension of £765 he was appointed Britain, and first lord of 1776 he was created a 1781.

HAWKER, Dr ROBERT, clergyman of some note, was vicar of the parish of St. Mary, at Plymouth.

commentary on the other religious works. **HAWKER, Lieut.-Colonel**, distinguished in the Peninsular war, was the Peninsular war, and the "Journal of a Regiment of Foot," &c.

was a man of great talents; his knowledge of practice and theory, was very valuable improvement of his chief title to position his "Instructions to which relates to Gun which work nine large. At the time of his death, of the North Hampshire.

Italy, he derived a taste for the study of medals and coins, and published some treatises on numismatics. But his chief fame rested on his critical editions of classic authors; among which are his Tertullian, Lucrotius, Josephus, Orosius, Sallust, and Censorinus. Died, 1742.

HAWES, STEPHEN, a poet of the 15th century, was a native of Suffolk, and educated at Oxford. He afterwards held a situation in the household of Henry VII., who took great pleasure in his conversation. His works are, "Pastime of Pleasure," "The Temple of Glass," &c.

HAWES, WILLIAM, an English physician, and founder of the Humane Society, was born at Islington, in 1736; studied medicine, and followed the profession of an apothecary, until 1780, when he took his degree as a physician. Before this, however, he had become deservedly popular by his zealous exertions in the establishment of the Humane Society, founded in 1774, to which institution he may truly be said to have devoted the best part of his life. He wrote several useful tracts, and among others, "An Examination of the Rev. J. Wesley's Primitive Physic," being at the same time an ironical and serious exposure of the absurdities of that production. This benevolent physician died in 1808.

HAWKE, EDWARD, Lord, a brave British admiral, was the son of an eminent barrister, and entered into the navy at an early age. In 1734 he obtained the command of a man-of-war, and distinguished himself by his bravery in the famous engagement with the French before Toulon, in 1744, wherein the British fleet was commanded by Matthews, Latock, and Rowley. In 1747 he was made rear-admiral of the White, when he defeated a large French fleet, and captured five ships of the line; on which he was created a knight of the Bath. In 1759 he defeated Admiral Conflans, off Belleisle, and was rewarded with a pension of £2000 a year. In 1765 he was appointed vice-admiral of Great Britain, and first lord of the admiralty. In 1776 he was created a British peer, and died in 1781.

HAWKER, Dr ROBERT, an evangelical clergyman of some note, who, for half a century, was vicar of the parish of Charles the Martyr, at Plymouth. He was the author of a commentary on the Bible, sermons, and other religious works. Died, 1827.

HAWKER, Lieut.-Col. PETER, whose reputation in the sporting world has been rarely surpassed, served with distinction in the Peninsular war, was wounded at the battle of Talavera, and afterwards published the "Journal of a Regimental Officer during the recent Campaign." Colonel Hawker was a man of great and varied accomplishments; his knowledge of music, both in practice and theory, was profound; he made many valuable improvements in fire-arms; but his chief title to posthumous fame rests on his "Instructions to Young Sportsmen in all that Relates to Guns and Shooting," of which work nine large editions have been sold. At the time of his death he was Lieut.-Colonel of the North Hampshire Militia. Died, 1833.

HAWKESWORTH, JOHN, LL.D., miscellaneous writer, the son of a watchmaker at Bromley, Kent, was born in 1716, and apprenticed to his father's trade; but he soon left it for literary pursuits, and eventually became an author of eminence. He is chiefly remembered for his account of the first voyage of Captain Cook, and his contributions to the "Adventurer," a series of periodical essays. A marble monument was erected to his memory in Bromley church. Died, 1773.

HAWKINS, Sir JOHN, a brave English admiral under Queen Elizabeth, was a native of Devonshire. He was rear-admiral of the fleet sent against the Spanish Armada, and had a great share in the glorious victory. He was afterwards made treasurer of the navy. But his memory is disgraced by his being the first European who carried off slaves from the coast of Africa, and introduced them into the West Indies. Queen Elizabeth honoured his bravery by knighthood, and appears to have approved his project of a trade in slaves. He died in the West Indies in 1595, aged 74.

HAWKINS, Sir JOHN, historian of music, and miscellaneous writer, was born in London, in 1719. He practised as a solicitor, with reputation, for some years; and having made general literature the study of his leisure hours, he also wrote for the periodical press. A taste for music led him to become a member of the Academy of Ancient Music; and in 1742 he was chosen a member of the literary club, established by Dr Johnson, with whom he formed an acquaintance, which lasted during their lives. Having, in 1753, married a lady of great fortune, and becoming possessed of a much greater one in 1759, on the death of her brother, he gave up his profession, and became a magistrate for Middlesex. His principal work is, "A General History of the Science and Practice of Music," in 5 vols. 4to; and his edition, with notes, of Isaac Walton's "Complete Angler," acquired deserved popularity. Died, 1789.

HAWKSMOOR, NICHOLAS, an English architect, was born in 1666. He was a scholar of Sir Christopher Wren, and is said to have been assistant to Vanbrugh, the architect of Blenheim Palace. The principal work of Hawksmoor was St George's church, Bloomsbury. He built several other London churches, and executed some repairs at Westminster Abbey, and at All Soul's College, Oxford. Died, 1736.

HAWKWOOD, Sir JOHN, a general of the 14th century, who distinguished himself in the wars of Edward III., and received the honour of knighthood from that monarch. After the peace of 1360 he associated with other soldiers of fortune, who harassed and plundered their old enemies, the French, notwithstanding the cessation of national hostilities. From France they passed into Italy, where Sir John found employment in the service of Pisa, and next in that of Florence, which state he defended so successfully, that his death, in 1393, was considered as a public loss. He was buried with great pomp in the church of Santa Reparata, and an equestrian portrait was placed over his tomb. Sir John Hawkwood was one of the

founders of a hospital for English travellers at Rome.

HAWLEY, JOSEPH, a distinguished American patriot, was born, in 1724, at Northampton, Massachusetts, and being bred a lawyer, soon acquired great eminence in his profession. But he was most distinguished for his knowledge of political history and the principles of free government—a circumstance that rendered him one of the ablest advocates of American liberty in the legislature, previous to and during the contest between the colonies and the parent state. Died, 1788.

HAWTHORNE, NATHANIEL, the distinguished American novelist, was born at Salem, Massachusetts, about 1807. He was educated at Bowdoin College, Maine, where he had among his fellow-students the poet Longfellow and Franklin Pierce, afterwards president of the United States. Leading for a time a sequestered dreamy life, he first appeared as a writer, but anonymously, in 1832. Five years later he published his "Twice-told Tales," and in 1838 he accepted an appointment in the Custom House at Boston, which he held for three years. In 1846 he was appointed surveyor in the Custom House at Salem, but was removed on the change of administration in the following year. From 1853 to 1857 he filled the post of American consul at Liverpool, to which he was appointed by his early friend President Pierce. After travelling on the continent of Europe, he returned to America. His principal works are "The Scarlet Letter;" "The House of Seven Gables;" "The Blithedale Romance," founded on reminiscences of his life at Brook Farm; "The Marble Faun;" "Life of President Pierce;" and "Our Old Home," a volume of charming delineation of the characteristic scenery of England, and of strangely contrasted ungenial criticism on the English people. Hawthorne, though a prose-writer only, is in spirit a poet. Intense love, and minute observation, and painstaking delineation of nature; glowing passion, great powers of mental analysis, vivid imagination, pure moral sentiment, and an exquisitely simple, clear, and delicate style; these are the admitted characteristics of his works. After suffering long from failing health he died very suddenly at Plymouth, New Hampshire, May 19, 1864.

HAYDN, JOSEPH, an eminent German musician, was born, 1732, in the village of Rohrau, on the borders of Hungary and Austria. He was the son of a poor wheelwright, who, having a taste for music, played the harp on Sundays, his mother accompanying with her voice; a circumstance which accounts for the strong predilection which their son showed for the science even in his infancy. When but 8 years old, he became a chorister in St Stephens, and at 10 years of age composed pieces for several voices. With his fine soprano he lost his place, and his situation was very discouraging; but he had the good fortune to become acquainted with Prince Esterhazy, who placed him at the head of his private chapel. For this prince he composed some beautiful symphonies,—a department in which he excelled

all other composers,—and the greatest part of his fine quartets. When, after a period of above 20 years, the prince reduced his court, and Haydn received his discharge, he accepted an engagement to take part in some concerts in London, composing and superintending the performances. In 1784, having made a second journey thither, he found a most splendid reception, and the university of Oxford conferred upon him the degree of doctor of music. It was during these visits to England that Haydn composed his "Twelve Grand Symphonies." On his return from England, he purchased a small house and garden in one of the suburbs of Vienna, where he died. To the English public he is universally known by his noble oratorio of the "Creation," first published in 1798, which is considered a *chef-d'œuvre*. Among his numerous works are, "The Seasons," an oratorio; also a *Te Deum*, a *Stabat*, with many concerts, marches, masses, &c. He was inexhaustible in invention and execution—always new and original—always surprising and satisfying his enraptured hearers. Died, 1809.

HAYDN, JOSEPH, an industrious litterateur, chiefly known as the compiler of the "Dictionary of Dates," which notwithstanding its uncritical character has been extensively used, and has reached the eleventh edition. The later editions under the care of Mr. Vincent are enlarged and greatly improved. Haydn also published "The Book of Dignities," professedly a modernized form of Beason's Political Index. A small pension was granted to him shortly before his death, and was continued to his widow. Died at London, 1846.

HAYDON, BENJAMIN ROBERT, historical painter, was born at Plymouth, where his father was a bookseller, in 1768. He commenced his studies at the Royal Academy in 1804. His first picture was exhibited in 1807; the subject of it, "Joseph and Mary resting with our Saviour after a day's journey on the road to Egypt." His second work, "Dentatus," was exhibited in 1809, and in the following year it obtained the prize at the British Institution. His "Judgment of Solomon" appeared next; but during its progress his resources failed, and the directors of the British Institution voted him a present of 100 guineas. Previous to this the artist had for some time devoted 10 or 12 hours a day to the study of the Egyptian hieroglyphs, and that he had studied them with intense delight and veneration may be learned from the manner in which he speaks of them in his "Lectures on Painting and Design." He went, accompanied by Wilkins, to Paris in 1814, to study at the Louvre, and on his return commenced his largest work, "Christ entering into Jerusalem." This picture was exhibited in 1820, both in London and Edinburgh, and was considered a triumph of modern art. But, with all the acknowledged powers, he mistook or declined to follow the more certain path of fame and fortune. While his more successful brethren were engaged on cabinet pictures or portraits, his works were on a large scale to be hung in private rooms; hence the orders he obtained were comparatively few; and he died in poverty. In 1827 he gave the following account of the fate of his picture: "My 'Judgment of Solomon' is in a warehouse in the Strand, and 'Christ entering into Jerusalem,' once the admiration of the rank and file of kingdoms, is doubled and trebled in Holborn! my 'Lazarus raised from the dead' is in a hay-loft. Some of these pictures have been afterwards painted, and sold at low prices; but many others have been painted, and sold at high prices; and though he has had the courage and determination to stand free from the pangs of poverty, an ardent admirer of the equally ardent artist, his picture of excellence, ever distinguished by the lightning of his cartoon, has been on occasion of the decorative 'The Fall of Man' was the death of the painter who had borne up under his misfortune, and heered under his disappointment. But, alas! unaided enterprise, and even perseverance, were not sufficient to save him from an adverse fate. He died on June 22, 1846, aged 60; and was lying on the floor of a room in the street in front of a colliery, the Great and the First of which, he had just before his death, discovered that he had the disease of the brain. The body of Mr. Haydon ever received a pension of Sir R. Peel; and a reference in behalf of his widow, from her majesty a pension of £25 from the civil list; 1. d. per annum, which was afterwards increased to £200. The artist's name was compiled and published by Taylor.

HAYES, WILLIAM, an English clergyman, was originally organist of St. Mary's Church, Oxford, where he was a student of music, and was elected vicar of the church in 1777. He published several ballads, but is best known for his compositions and catches, and for his pamphlet against Avilon, London, 1708; died, 1777.

HAYLEY, WILLIAM, an English poet, was the friend of Cowper, was born in 1745. After quitting his profession at Cambridge, he settled at Littlebury, and devoted his time to poetry. He was the author of "The Three Poets," "The Poet and the Cobbler," "Triumph of Painting and Poetry on Old Maids," "The Life and Correspondence of William Hayley," &c. Died, 1820.

HAYMAN, FRANCIS, an English poet, was the son of one of the first members of the Society of Friends.

[HAY]

[HAZ]

tively few; and he became embarrassed. In 1827 he gave the following melancholy account of the fate of his great pictures:—"My Judgment of Solomon" is rolled up in a warehouse in the Borough! my "Entry into Jerusalem," once graced by the enthusiasm of the rank and beauty of the three kingdoms, is doubled up in a back room in Holborn! my "Lazarus" is in an upholsterer's shop in Mount Street! and my "Crucifixion" is in a hay-loft in Lisson Grove!" Some of these pictures, and others which he afterwards painted, fetched considerable prices; but many others proved unsuccessful; and though he displayed indomitable courage and determination, he was never free from the pangs of blighted ambition. An ardent admirer of ancient art, and an equally ardent ambition to attain its highest excellence, ever distinguished him. The alighting of his cartoon by the royal commission on occasion of the competition for the decoration of the Palace at Westminster, was the death-blow to his hopes. He would have borne up had he but realized the hope of painting one of the rescues, or been cheered under his disappointment by popular support. But, alas! undoubted genius, noble enterprise, and even persevering industry, were not sufficient to turn aside the shafts of adverse fate. He died by his own hand, June 22, 1846, aged 60; and was discovered lying on the floor of his studio, immediately in front of a colossal picture (Alfred the Great and the First British Jury), on which he had just before been engaged, his white hairs saturated with blood! It was discovered that he had long suffered from disease of the brain. The last sum of money Mr Haydon ever received was a present of £50 from Sir R. Peel; whose generous interference in behalf of his widow obtained from her majesty a pension of £50 a year from the civil list; Lady Peel also assigned her a pension of £25; and a public subscription, which was afterwards entered into for the benefit of Mrs Haydon and family, amounted to £2000. The Life of this eminent painter was compiled and edited by Mr Tom Taylor.

HAYES, WILLIAM, musical composer, was originally organist of St Mary's, Shrewsbury; from whence he removed to Christchurch, Oxford, where he took his degrees in music, and was elected professor in that faculty. He published a collection of English ballads, but is best known by his church compositions and catches. He defended Handel against Avison, with some asperity. Born, 1708; died, 1777.

HAYLEY, WILLIAM, an English poet, the friend of Cowper, was born at Chichester, 1745. After quitting Trinity College, Cambridge, he settled at Earham, in Sussex, and devoted his time principally to literature. He was the author of an "Essay on Poetry," "Three poetical Epistles to Edward Gibbon," "Triumphs of Temper," "Tracts on Painting and Sculpture," a prose poem on Old Maids, 3 vols.; and, lastly, "The Life and Correspondence of the Poet Cowper." Died, 1820.

HAYMAN, FRANCIS, an English painter, was one of the first members of the Royal

Academy, was born in 1708, at Exeter. Coming to London when young, he was employed as a scene painter at Drury Lane Theatre. The principal productions of his pencil are historical paintings, with which he decorated some of the apartments at Vauxhall. He also furnished designs for the illustration of the works of Shakespeare, Milton, Pope, Cervantes, &c. Died, 1776.

HAYNE, ISAAC, a colonel in the American army, and a martyr (according to the opinion of many of his countrymen) to the cause of independence, was descended from a highly respectable family in South Carolina. After the capitulation of Charleston, he consented to subscribe a declaration of his allegiance to the king of Great Britain, provided he might not be compelled to bear arms against his countrymen. He was summoned, however, after the successes of Greene had changed the face of affairs, to repair immediately to the British standard. This he refused, as a violation of the compact he had entered into, and hastened to the American camp. Being shortly after taken prisoner by the English, he was tried, and condemned to be hanged, "for having been found under arms, and employed in raising a regiment to oppose the British government, though he had become a subject, and accepted the protection of that government." This cruel sentence, notwithstanding the mitigating circumstances of the case, was accordingly put into execution, Aug. 4, 1781.

HAYWARD, Sir JOHN, an English historian, who flourished in the reigns of Elizabeth and James I. Some passages in his "Life of Henry IV.," concerning hereditary right in matters of succession, gave great offence to a queen, and he was thrown into prison; but upon the accession of James he was released, resumed his literary labours, obtained the honour of knighthood, and continued to receive proofs of court favour during the remainder of his life. Died, 1627.

HAZLITT, WILLIAM, a distinguished modern writer, both as a critic and essayist, was the son of a dissenting minister, and educated at the Unitarian College at Hackney. He began life as an artist; but though he always preserved an intense love for the arts, he soon relinquished the pencil for the pen; and when he was not worn away by violent prejudices, he appeared as one of the most able and judicious critics of the day. Besides being a constant contributor for many years to the Morning Chronicle and Examiner newspapers, he occasionally wrote in others; and was so indefatigable, that he was continually producing some new work of merit. Among the most popular of his writings are several volumes collected from periodical works, under the titles of "Table Talk," "The Spirit of the Age," and "The Plain Speaker." The largest and most elaborate, though not the most successful, of his works, is the "Life of Napoleon," 4 vols. His "Characters of Shakespeare's Plays" attracted much notice; as did also his "View of the English Stage," "Political Essays and Sketches of Public Characters," "The Literature of the Elizabethan Age," "The Mo-

dern Pygmalion," &c. His last work was a very interesting volume, entitled "Conversations of James Northcote, Esq., R.A." A contemporary writer, in an eulogistic analysis of his character and abilities, makes the following remarks: "Connected with the philosophical examinations of painting and sculpture, the drama and the theatre came naturally within his inquiries. Into these subjects he poured the tide of his luminous mind, and soon acquired the reputation of being one of the highest critical authorities on the drama and the fine arts. He penetrated boldly, and wrote graphically; and whether his opinions were always profound or just, you felt that they were dexterously said, and hardly cared to question farther." Died, 1830.

HEAD, SIR GEORGE, eldest brother of Sir Francis Bond Head, baronet, was born in 1782, educated at the Charter-house, entered the commissariat department, after serving a short time in the West Kent Militia, and joined the British army at Lisbon in 1809. Gaining promotion in this department, he served during the remainder of the Peninsular war, and followed the army to the fields of Vittoria, Nivelle, and Toulouse, and the actions in the Pyrenees, of which he published an interesting account in his "Memoirs of an Assistant Commissary-General." Subsequently to the peace of 1814, he was sent to superintend the commissariat in Canada, where he afterwards remained for five years on the peace establishment. In 1829 he published his Canadian reminiscences, entitled, "Forest Scenes and Incidents in the Wilds of America." He afterwards gained great repute for his "Home Tour," in which he described the manufacturing and other districts. In 1831 he received the honour of knighthood in consequence of having acted as knight marshal at the coronation of King William IV. In 1842 he published his "Rome: a Tour of many Days," in three volumes: and he subsequently translated the "Metamorphoses of Apuleius." In all his writings he displayed much of the graphic power of description possessed so eminently by his brother, Sir Francis H. Head, though he never attained the same wide-spread reputation. Died, 1855.

HEAPY, THOMAS, a celebrated painter in water colours, and the first president of the Society of British Artists. Died, Oct. 1835, at the age of 60. His pictures are well known and appreciated.

HEARNE, SAMUEL, an English traveller, who, from 1769 to 1772, was employed by the Hudson Bay Company to explore the north-west coast of America, and who was the first European that succeeded in reaching the Arctic Ocean. Born, 1742; died, 1792.

HEARNE, THOMAS, an eminent antiquary, was born in 1678, at White Waltham, in Berkshire, of which parish his father was clerk and schoolmaster. He was educated at Oxford, and held for a short time the post of second librarian of the Bodleian. He resigned in consequence of his Jacobite sympathies. He published several ancient MSS. and editions of old books; as the Life of Alfred the Great by Spelman; Leland's

Itinerary, 9 vols. 8vo; Camden's "Annals," the "Scotichronicon" of John de Fordun, a collection of curious Discourses written by eminent antiquaries, &c. Died, 1738.

HEARNE, THOMAS, an artist of considerable talents, was born in 1744, at Brinkworth, in Wiltshire. He was eminent as a topographical designer; but his great merit lay in landscape-painting in water colours—a branch of the art which has since arrived at great perfection in this country, and of which he was one of the first who successfully practised it. Died, 1817.

HEATH, JAMES, a distinguished engraver, was born about 1757. He was the early associate and friend of Stothard, and engraved his designs for the old "Novelists' Magazine." After employing himself for some years on illustration of books he struck out on a bolder path, and among his larger works are the "Death of Major Pearson," and "Death of Lord Nelson," after West; the "Dead Soldier," after Wright of Derby; portraits of Washington and Pitt, &c. Heath was highly esteemed in private life, and had among his friends Sir Joshua Reynolds, Sir Thomas Lawrence, John Keble, West, and other eminent men. The French engraver, Godefroy, was his pupil, and his son, Charles Heath, became a distinguished engraver. Died at London, 1834.

HEATH, CHARLES, an eminent line engraver, son of the preceding, was born, 1784. His taste for art was fostered and matured by his father, James Heath; and his serial artistic publications, the "Book of Beauty," and the "Keepsake," &c., for many years kept his name before the world as one of the first English engravers, besides exercising a marked influence over that department of art. Died, 1848.

HEATH, JAMES, an historical writer during the reigns of Charles I. and II. He wrote "A Chronicle of the late War," "The Glories and Triumphs of the Restoration of Charles II.," "Flagellum, or the Life and Death of Oliver Cromwell," &c. Died, 1684.

HEATHCOTE, RALPH, a clergyman of the Church of England, to whom the merit is due of being the projector of the General Biographical Dictionary. He was also the author of "The Irenarch, or Justice of the Peace's Manual," "Sylva, or the Wood," "A Sketch of Lord Bolingbroke's Philosophy," and other polemical works, which caused his introduction to Dr Warburton, who nominated him his assistant preacher at Lincoln's Inn. He subsequently obtained higher church preferments, and died in 1795.

HEATHFIELD. [ELIOT.]

HEBER, REGIN ALD, D.D., bishop of Calcutta, was born at Malpas, Cheshire, in 1780, and received the first rudiments of his education at Whitechurch. He entered at Brasenose College, Oxford, in 1800, and 3 years after carried the English prize for his beautiful poem, "Palestine." In 1805 he took his B.A. degree, and was elected a fellow of All Souls. He soon after quitted the university, and made a tour through Germany, Russia, and the Crimea. From 1807 to 1823 he spent his time in discharging the duties of a parish priest; during which he pub-

lished some elegant sermons, and was at Lincoln's Inn. He died in the fall of 1823, at the age of 43. He was a native of Celsruth, in the county of Down, in the north of Ireland. He was educated at the University of Cambridge, and was a member of the Society of Jesus. He was a very able and successful preacher, and was highly respected by his hearers. He was also a very able and successful writer, and his sermons were highly valued. He was a very able and successful preacher, and was highly respected by his hearers. He was also a very able and successful writer, and his sermons were highly valued. He was a very able and successful preacher, and was highly respected by his hearers. He was also a very able and successful writer, and his sermons were highly valued.

ished same elegant poems, and the Life of Jeremy Taylor. He was then elected preacher at Lincoln's Inn. On the death of Dr Middleton in the following year, the bishopric of Calcutta was offered to Mr Hobor, who after some hesitation accepted it; and on the 16th of June, the bishop, with his wife and infant daughter, embarked for India. On the 11th of October he reached his destination, and from constant occupation in the exercise of his official duties. On the 18th of June, 1824, he left Calcutta, to make a visitation of the upper provinces, on which occasion he traversed the breadth of his diocese, taking in their course the eastern, northern, and western extremities of British India, everywhere sowing the seeds of Christian instruction among the wilds, and informing himself of the wants of the new congregations. In 1826 he took another journey in the discharge of his episcopal duty, to Trichinopoly, where he arrived on the 1st of April, 1826. The next day he was seized with an apopleptic fit, whilst bathing, which terminated his valuable life. After his death, a "Narrative of a Journey through the Upper Provinces of India" appeared, and his widow also published his biography.

HEBERDEN, WILLIAM, F.R.S., a distinguished medical practitioner, was born in London in 1710, and educated at St John's College, Cambridge, in which town he practised as a physician for several years before he settled in the metropolis. He was the projector of, and a principal contributor to, the Medical Transactions of the College of Physicians, and author of "Medical Commentaries on the History and Curo of Diseases." Dr Heberden was a fellow of the Royal Society. Died, 1801.

HEBERT, JACQUES RENE, commonly called *Père Duchêne* (from the title of a column paper of which he was the editor), was born at Alençon, in 1755. He was one of the most violent and unprincipled artisans of the French revolution. Having nothing to lose, he entered with eagerness to the execution of any plot by which the guillotine could be plundered. He was made a member of the commune, for his part in the September massacres, and the cruel murder of the Princess de Lamballe. It was hebert who so grossly insulted the noble woman, Marie Antoinette, by a vile accusation; and put questions to the children of Louis XVI., which, when reported to Robespierre, called forth reprobates even from his bosom. Having dared to oppose his intrigues and masters, they accomplished his destruction with a promptitude that astonished him. At the place of his execution, contempt and insult were added to the severity of his sufferings, and he died amidst hisses of the populace, on the 24th March, 1794.

HEDERIC, or HEDERICHS, BENJAMIN, a German lexicographer; author of the once known Greek lexicon which bears his name, and several other works of a similar nature. Born, 1675; and died, rector of the school of Grossenayn, in 1748.

HEDLINGER, JOHANN CARL, the most celebrated die-cutter of his age, was born

at Schweltz, in 1691. Many crowned heads, among whom were Charles XII. of Sweden, Peter the Great, and Pope Benedict XIII., honoured him with their patronage. He frequently visited Sweden; and in 1745, he lost the greater part of his property by shipwreck. His works are distinguished by great simplicity, softness, and correctness of design. Died, 1771.

HEDWIG, JOHANN, a German botanist and physician, was born in 1730, at Cronshurg, in Transylvania. After studying at where he assisted Professor Bose as demonstrator of plants in his botanical lectures. He took his doctor's degree in 1759; practised afterwards as a physician, first at Chemnitz, and professor of physic and botany there, and made superintendent of the public garden. His most important work is entitled "Stirpes Cryptogamæ." 4 vols. folio. Died, 1799.

HEEMSKERK, MARTIN VAN (whose real name was Van Veen, but who derived the name of Heemskerk from his native village), was born in 1498. After studying under some of his most eminent countrymen, he went to Italy, and there formed his style under Michael Angelo, who was at that time enriching the capital of the Christian world with the productions of his pencil. Heemskerk was a diligent and prolific artist, the best of them were burnt when Harlem was taken by the Spaniards in 1673. Died, 1674.

HEERE, LUCAS VAN, a Dutch poet and painter, was born at Gheint about 1534. He received instruction from his father, who was a sculptor, and afterwards from the painter Floris. He visited England, and was employed by Queen Elizabeth, of whom he painted several portraits. He was author of a poem entitled the "Garden of Poetry," and of another which is no longer extant. Died, 1584.

HEEREN, ARNOLD HERMANN LUDWIG, one of the most distinguished German historians, was born near Bremen in 1760. At the age of nineteen he went to the university of Göttingen, where under the influence of Heyne then professor of eloquence and that of philology. He then travelled in Italy, France, and Germany, and in 1787 was named Professor Extraordinary of Philosophy at Göttingen. His life at Göttingen flowed on evenly, his time and energies absorbed by his professional duties and the labours of composition, and his rancionship of his wife, a daughter of Heyne. His most important works are—"Ideen über die Politik, den Verkehr und den Handel der vornehmsten Völker der alten Staaten des Alterthums," well known in England as the "Manual of Ancient History," and the "Handbuch der Geschichte des Europäischen Staatensystems." The reputation of Heeren was shown by his being chosen member of the principal Academies of Europe, and of the Asiatic Societies of

London and Calcutta. Died, full of years and honours, in 1842.

HEGEL, GEORGE WILHELM FRIEDRICH, the founder of a new school of philosophy, was born at Stuttgart, 1770. He was professor successively at Jena, Heidelberg, and Berlin. He was at first the disciple of Schelling, with whom he was associated in the conduct of a philosophical journal in 1802-3. But his opinions gradually took a different turn. He rejected Schelling's intellectual intuition as an unwarrantable assumption, although he continued to maintain its leading idea,—the unity of the subjective or ideal, and the objective or real; and in this idea endeavoured to establish that absolute cognition and absolute truth, which alone, according to this school, can satisfy the demands of the philosophical spirit. Hegel seems not to have perfected his system; and as he had no power of exposition, or of lucid expression of his thoughts, it is impossible to give a clear view of his philosophy. Indeed, it would appear that he himself had the same notion; for he is said to have remarked, that, "of all his numerous disciples, only one had ever understood him, and even he had understood him falsely." He is as it may, his system is at present the centre of nearly all philosophical interest in Germany, chiefly from the widely discrepant deductions, political and religious, which his friends and enemies draw from it; some maintaining it to be favourable to the present order of things in church and state, others founding upon it conclusions at variance with all ordinary notions of religion or morality. His most important works are his "Phenomenology of the Mind," "Logic," and "Encyclopædia of Philosophical Sciences." Died of cholera, at Berlin, 1831. A very remarkable discovery of a French anticipation of Hegelianism has recently been made. For an account of it see [DESCHAMPS, DOM].

HEIDEGGER, JOHN JAMES, a very extraordinary character, by birth a Swiss, who took up his residence in London, in 1660, and, obtaining a commission in the Guards, was known in fashionable society by the appellation of the Swiss count. He undertook the management of the opera house, and in his conduct of that establishment was very fortunate; added to which, by giving concerts, masquerades, &c., under the patronage of the court, he gained a handsome income, which he expended in keeping an hospitable table, and relieving the unfortunate. In his person he was extremely ugly, but he was the first to joke upon his own homely features. Being in company where a debate took place as to which nation in Europe was the most ingenious, Heidegger claimed it for the Swiss, and, when asked for the proof, said, "I was born a Swiss, and came to England without a farthing, where I found the means of gaining £5000 a year, and how to spend it. Now I defy any Englishman to do the same in Switzerland." He died in 1749, aged 90.

HEIM, FRANÇOIS JOSEPH, French historical painter, was born at Belfort, in the department of the Haut-Rhin, in 1787. After receiving his first lessons in art at

Strasburg, he went in 1803 to Paris, became a pupil of Vincent, and having obtained the grand prize, went to Rome in 1807. He first exhibited at Paris in 1812, and from that year had a long course of success. He was admitted to the Academy of Fine Arts, in which he became a professor, and was made chevalier, and subsequently officer of the Legion of Honour. He was employed in the decoration of several galleries of the Louvre. Among his numerous paintings are—"The Martyrdom of St Cyr and his Mother;" "Martyrdom of St Hippolytus;" "Taking of the Temple of Jerusalem by Titus;" "Massacre of the Jews;" "St Myrcinthe;" "Louis Philippe receiving the Deputies at the Palais Royal;" "Victory of Judas Maccabeus," &c. Some of his best works were those executed in the Hall of Conference of the Chamber of Deputies. Died, at Paris, in October, 1865.

HEINE, HENRICH, a celebrated German poet and littérateur, was born of Jewish parents at Düsseldorf in 1800. Intended for a mercantile career, he was sent to Hamburg for the necessary training, but after several years' trial he preferred to study law, and went to the new university of Bonn, where he became a pupil and friend of August W. Schlegel. He afterwards studied at Berlin and Göttingen; became acquainted with the philosophy of Spinoza and Hegel; associated at Berlin with Varnhagen von Ense and his gifted wife, with Chamisso, Grabbe, and other leading literary characters of the day; graduated LL.D., and in 1825 renounced Judaism and professed Christianity. The change, however, was merely formal, as he had apparently no religious faith, and ridiculed all forms alike. He led an unsettled life for some years, irritated and depressed by the failure of his first literary ventures. After the French revolution of July, 1830, he settled at Paris, frequently, however, travelling in various parts of Europe. About 1835 he married a French lady, whose faithful ministrations alleviated the bitter sufferings of his last years. By an attack of paralysis in 1847 he lost the sight of one eye, and the following year he became totally blind, and subject to the severest bodily pains. From that time he was confined to his room, but endowed all with singular fortitude, and continued his literary labours to the last. He expressed in his will his regret for the frivolous and trifling way in which he had written of sacred things, and avowed that he was once more under the influence of religion. His best works are the "Buch der Lieder," published in 1827; "Neue Gedichte," 1841; "Romanzen," 1851; and the "Reisebilder," his first successful book, which appeared in 4 vols. between 1825 and 1831. Among his other writings are "Kahldorf über den Adel," "Der Salon," the bitter personal satire "Über Börne," "Deutschland, ein Winter-Mährchen," and "Atts Troll." Heine will probably be longest remembered for his songs, many of which are of exquisite beauty, and are even thought by some to rival in their delicacy and finish the earlier songs of Goethe. Heine died at Paris in February, 1856. An English translation

of his songs, by W. Year. A translation subsequently been HEINECCIUS, celebrated civilian at Eisenberg, in A having studied at became professor 1710; and in 1711 civil law, with the court. His great states of Friesland in 1724; but in revealed on him to law at Frankfurt distinguished himself as a dean professor at H all his death in 1 Marburg, Denmark. many works, all of HEINEKEN, CH extraordinary child, We give the story a confess that, not worthy by powerful level it. He spoke fluently twelve months he acts in the Pentateuch was master of the and New Testament half he answered the rography, and in a story; and he spoke great facility before near. His constitution was not weakened by his death. M. Martin pamphlet in 1730, in give natural reason capacity of this child year, and on his death almost firmness and r HEINSIUS, ANTH Dutch statesman, who high station of grand erence, skill, and p confidence and regard ough, and Prince died, 1720. HEINSIUS, DANIE philologist, professor of Leyden, and librarian was born at Ghent, in pupil of Joseph Scaliger, greatly indebted to him which he staid in a hshed himself as a many classical auth onoured at home andolphus gave him a of fellows of state; the p man's knight of the orope Urban VIII. invit expressed it, to rescue R he died in 1666, leav works both in verse and HEINSIUS, NICHOL was born at Leyden, and distinguished himself as a Died, 1681. HEISTER, LORENZ, and naturalist, was born he-Main, in 1683. He nysch and Boerhaave,

of his songs, by Walla, appeared in the same year. A translation by E. A. Bowring has subsequently been published.

HEINECCIUS, JOHANN GOTTLIEB, a celebrated civilian of the 18th century, born at Eisenberg, in Altenburg, in 1681. After having studied at Goslar and Leipsic, he became professor of philosophy at Halle, 1710; and in 1711 he was made professor of civil law, with the title of counsellor of the court. His great reputation induced the states of Prussia to invite him to Franeker, in 1724; but in 1727 the king of Prussia prevailed on him to accept of a professorship of law at Frankfort-on-the-Oder, where he distinguished himself till 1733. Becoming again professor at Halle, he remained there till his death in 1741, though invited to Marburg, Denmark, and Holia. He wrote many works, all of them much esteemed.

HEINECKEN, CHRISTIAN HEINRICH, an extraordinary child, born at Lübeck, in 1721. We give the story as usually told, but have no confess that, notwithstanding it is supported by powerful evidence, we cannot believe it. He spoke fluently at ten months old; at twelve months he could recite the principal facts in the Pentateuch; in two months more he was master of the entire history of the Old and New Testaments; at two years and a half he answered the principal questions in geography, and in ancient and modern history; and he spoke Latin and French with great facility before he had reached his fourth year. His constitution was so delicate, that he was not weaned till a few months before his death. M. Martini, of Lübeck, published a pamphlet in 1730, in which he endeavoured to give natural reasons for the extraordinary capacity of this child. He died in his fifth year, and on his death-bed displayed the utmost firmness and resignation.

HEINLIUS, ANTHONY, a distinguished Dutch statesman, who for 40 years filled the highest station of grand pensionary; and whose prudence, skill, and probity gained him the confidence and regard of William III., married, and Prince Eugene. Born, 1641; died, 1720.

HEINLIUS, DANIEL, a celebrated Dutch philologist, professor of politics and history at Leyden, and librarian to the university, was born at Ghent, in 1580. He became a pupil of Joseph Scaliger at Leyden, and was greatly indebted to him for the eminence to which he attained in literature. He distinguished himself as a critic by his editions of many classical authors; and was highly honoured at home and abroad. Gustavus Adolphus gave him a place among his counsellors of state; the republic of Venice made him a knight of the order of St Mark; and Pope Urban VIII. invited him to come, as he expressed it, to rescue Rome from barbarism! He died in 1666, leaving several original works both in verse and prose.

HEINLIUS, NICHOLAS, the son of Daniel, was born at Leyden, and like his father, distinguished himself as a critic and a Latin poet. Died, 1681.

HEISTER, LORENZ, physician, surgeon, and naturalist, was born at Frankfort-on-the-Main, in 1683. He was a pupil both of Boerhaave and Boerhaave; became physician-

general to the Dutch military hospital; and, in 1710, was professor of anatomy and surgery at Altorf. From thence he removed to Helmatadt, where he died in 1768. He wrote several works on anatomy and surgery, and also distinguished himself in botany as a strenuous opponent of the Linnæan system.

HELENA, ST. the mother of Constantine the Great, was of obscure birth in Bithynia. Constantine Chlorus fell in love with her, and married her, while in that country; but, when he became associated with Diocletian in the empire, he divorced Helena, and married Theodora, daughter of the Emperor Maximilianus. Constantine, at his accession, paid due honours to his mother, and conferred on her the title of Augusta. At the age of 80 she went to Palestine, where, it is said, she assisted at the discovery of the holy cross; soon after which she died. Her native village was raised to the rank of a city by the name of Helenopolis.

HELIODORUS, a native of Emesa, in Phoenicia, and who lived near the end of the 4th century, was bishop of Tricea, in Thessaly, but deposed towards the close of his life. His youthful work, "Ethiopia," a story of the loves and surprising adventures of Theagenes and Chariclea, in poetical prose, is distinguished, by its strict morality, from the other Greek romances. It has been frequently republished, and translated into many languages. It is said, that the alternative of burning his romance, or resigning his bishopric, being given him, the bishop preferred the latter.

HELIOGABALUS. [ELAGABALUS.]

HELL, MAXIMILIAN, a learned astronomer, born at Chemnitz, in Hungary, in 1720. He was director of the observatory at Vienna; went to Lapland, on the invitation of the king of Denmark, to observe the transit of Venus, in 1769; published annually the Ephemerides; and rendered other services to the science of astronomy. Died, 1792.

HELMONT, JOHN BAPTIST VAN, a celebrated chemist, was born at Brussels, in 1577; studied at Louvain, and made such rapid progress in natural history and medical science, that he delivered public lectures at 17 years of age. He then travelled through various countries for 10 years, and acquired a great knowledge of chemistry, to which science he afterwards constantly devoted himself, and in which he made some valuable discoveries. His first literary production was a treatise on the Spa waters, which is remarkable on account of the author having used the German word *geist*, answering to the English ghost, or spirit, to denote the air on which the properties of the Spa water depend, and from which is derived the modern word *gas*. In 1609, he settled at Vilvorden, where he practised medicine gratuitously, and is said to have performed some very wonderful cures. He professed to disregard all book-learning on the healing art; and had he lived at the present day, would have been styled an impudent quack; but though his works abound with crude and visionary dogmas, they contain also many observations on the Galenic system, which are shrewd and pertinent. Died, 1644.

HELMONT, FRANCIS MERCURY VAN,

Baron, son of the preceding, was born at Vilvorden, in 1618, and there practised as a physician and experimental chemist. If the father be charged with eccentricity or quackery, the son had a tenfold right to be so; yet that he was a man of talent none have denied. His acts speak for themselves; he travelled over a part of Europe with a caravan of Bohemians (a gang of gipsies), to learn their language and opinions; pretended to have discovered the original language of man; and had the impudence to affirm that a child born deaf and dumb, would be able to articulate the characters at first sight. He professed to believe in the doctrine of transmigration of souls, in the philosopher's stone, and other things no less wild and visionary. Died, 1699.

HELOISE, or **ELOISE**, celebrated for her beauty and wit, but still more on account of her love for Abelard, was born at Paris, in 1101, and died in 1164. Cruelly separated from her illustrious lover, she first became prioress of the convent of Argenteuil, and afterwards abbess of the Paraclete, where she founded a new convent, and lived in exemplary piety.—For a further account, see **ABELARD**.

HELST, **BARTHOLOMEW VAN DER**, an admirable Dutch painter, excelling in portraits, but also great in landscapes and historical subjects. Born at Haerlem, 1601 or 1613; died, 1670.

HELVETIUS, **CLAUDE ADRIEN**, a French philosopher, son of Jean Claude Helvetius, an eminent French physician and F.R.S., London, was born at Paris, in 1715, and, at the age of 23, obtained the honourable and lucrative post of a farmer-general, but resigned it, and afterwards purchased the place of maître d'hôtel to the queen. In 1758, he published "De l'Esprit," the materialism of which drew upon him many attacks; and it was condemned by the parliament of Paris, as derogatory to the nature of man, by confining his faculties to animal sensibility, and destroying the distinctions between vice and virtue. The book, however, obtained a rapid celebrity, though its author found it necessary to insure his personal safety by withdrawing for a time first to England, and afterwards to Prussia. He at length returned to France, and led a retired and domestic life on his estate at Voré, till his death, which happened in 1771. A posthumous work, entitled "De l'Homme," is a continuation of the former treatise, and contains a fuller development of the doctrines laid down in it; but at the same time many new ones, particularly relating to education.

HELWIG, **AMELIA VON**, a distinguished German poetess, born at Weimar, in 1776. Her father travelled in France, England, and Holland; and, at a very early age, she discovered a remarkable aptitude in learning languages, while her poetical talents were at the same time successfully cultivated. Among the literary men whose friendship she obtained were Schiller and Goethe. Died, 1832.

HEMANS, **FELICIA DOROTHEA**, whose maiden name was Browne, an amiable and accomplished poetess, was born at Liverpool, in 1794, of respectable parents, who

subsequently took up their residence near St Asaph, Wales. She married young; but her marriage was unhappy; and, after the birth of five children, a permanent separation between herself and her husband took place. From childhood she had an ardent thirst for knowledge, and her reading was extensive and varied. It has been truly said that, of all the sex, "few have written so much and so well as Felicia Hemans; although her writings possess an energy equal to their beauty, yet are they so pure and so refined, that not a line of them would deliaey blot from her pages. Her imagination was rich, chaste, and glowing; and in her social intercourse she was no less amiable than vivacious. After her establishment at St Asaph was broken up, she retired to Wavertree, near Liverpool, but remained about three years only, when she settled in Dublin, where she died on the 16th of May, 1835, in the 41st year of her age, leaving five sons to bowell her loss. Mrs Hemans enjoyed the friendship of Heber, Campbell, Wordsworth, Walter Scott, and Archbishop Whately. Her works, consisting for the most part of lyrical compositions, have been collected and published in 7 vols. Among them may be named the "Vespers of Palermo," "The Forest Sanctuary," "Records of Woman," "Songs of the Affections," "National Lyrics and Songs for Music," &c.

HEMINGFORD, or **HEMINGBURGH**, **WALTER DE**, an English chronicler of the 14th century, was canon of Gisborough abbey, in Yorkshire, and flourished in the reign of Edward III. He compiled a history of England, from the Conquest to 1368.

HEMMLING or **HEMMLINK**, **HANS** [**MEMLINC**].

HEMSTERHUY, or **HEMSTERHUYSTUS**, **TIBERIUS**, a celebrated Dutch philologist, was the son of a physician, and born at Groningen, in 1685. At the age of fourteen, he was entered a student of the university of his native place, from whence he removed to Leyden, where he was held in great esteem. In 1705 he became professor of mathematics and philosophy at Amsterdam, where he applied himself zealously to the study of the Greek authors. He became Greek professor at Franeker in 1720, and afterwards holding that post about twenty years, was called to a similar one at Leyden. Unlike many of his countrymen who have attained to great classical learning, Hemsterhuy had no taint of pride or dogmatism, but was remarkable for his modesty and mildness of character. Died, 1766.—His son **FRANCOIS** inherited his classical acquirements, and was, moreover, an acute philosopher and a critical judge of the fine arts. Born, 1722; died, 1790.

HENAULT, **CHARLES JEAN FRANÇOIS**, an eminent French historian, and president of the parliament of Paris, was born in 1660. He became president of the first chamber of Inquests in 1710, which led him to make the Roman law his study, though he still amused himself with poetry; and, in 1713, produced his tragedy of "Cornelia," which, however, had no success on the stage. About six years afterwards he gave the manuscript to Horace Walpole, who printed it at the

strawberry-hill place in the Strand. He set himself to order the history, entitled "Abrégé de France," appended translated into French. He also wrote the death appeared in a titled "Histoire des François dans les Indes de Deffand, and his talents, he had among the literati.

HENDERSON, was born in London, great celebrity at the Garden Theatres, staff, Richard II. characters with un- 1785.

HENDERSON, royal for Scotland; 1798. He was brother for some years necessary to various nobles to the Cape of Good Hope, direction of the his principal achievements, in the same of the finest double star sphere (a Centauri) his return home, an professor in the university astronomer-royal finished several volumes besides memoirs or periodical works. Died,

HENKEL, or **HENRICH**, a Saxon chemist, considerable celebrity in 1679. Augustus, councillor of mines, charged with much a It was under his direction certain manufactory son. He wrote "P scientific works. Died,

HENRIETTA MARIE of England, was born was the daughter of Medici, and married afterwards Charles I. beautiful and high-spirited and her attachment to the Church made her very and the suspicion that king to take some measures made her speeches she went returned with a supply tion; but in 1644 she France, only retaining time at the restoration II., and dying at the 1669. Her funeral oration by Bossuet. Her "Charles I. has been published. **HENRIETTA MARIE**, duchess of Orleans, the II., was born at Exeter, turbulent scenes of the happy mother died with

strawberry-hill press. In 1723 he obtained a place in the French Academy; after which he set himself to digest into a chronological order the history of France. This work, entitled "Abrégé chronologique de l'Histoire de France," appeared in 1744, and has been translated into most European languages. He also wrote three comedies, and after his death appeared a work under his name, entitled "Histoire Critique de l'Etablissement des François dans les Gaules," 2 vols. 8vo. He was intimately connected with Madamo de Defand, and from his rank, as well as his talents, he held a distinguished place among the literati of Paris. Died, 1770.

HENDERSON, JOHN, a first-rate actor, was born in London, in 1747. He acquired great celebrity at Drury Lane and Covent Garden Theatres, where he performed Falstaff, Richard III., and other Shakspeare characters with unbounded applause. Died, 1785.

HENDERSON, THOMAS, first astronomer-royal for Scotland, was born at Dundee in 1798. He was brought up to the law, but for some years filled the post of private secretary to various noblemen. In 1832 he went to the Cape of Good Hope to undertake the direction of the observatory there. One of his principal achievements was the calculation, in the same year, of the parallax of the finest double star of the southern hemisphere (a Centaur). Ill health occasioned his return home, and in 1834 he was named professor in the university of Edinburgh, and astronomer-royal for Scotland. He published several volumes of his Observations, besides memoirs contributed to various periodical works. Died at Edinburgh, 1844.

HENKEL, or HENCKEL, JOHANN FRIEDRICH, a Saxon chemist and mineralogist of considerable celebrity, was born at Friburg, in 1678. Augustus II. of Poland made him counsellor of mines; an office which he discharged with much advantage to his country. It was under his direction also that the porcelain manufactory was established at Meissen. He wrote "Pyritologia," and other scientific works. Died, 1744.

HENRIETTA MARIA, of France, queen of England, was born at Paris in 1609. She was the daughter of Henry IV. and Mary de Medicis, and married the prince of Wales, afterwards Charles I., in 1625. She was a beautiful and high-spirited woman, but her levity and her attachment to the Romish Church made her very unpopular in England, and the suspicion that her influence led the king to take some of his most offensive measures made her more so. To escape impeachment she went abroad for a time, and returned with a supply of money and ammunition; but in 1644 she finally withdrew to France, only revisiting England for a short time at the restoration of her son Charles II., and dying at the convent of Chaillot in 1669. Her funeral oration was pronounced by Bossuet. Her "Correspondence" with Charles I. has been published.

HENRIETTA MARIA, of England, duchess of Orleans, the daughter of Charles I., was born at Exeter, in 1644, amid the turbulent scenes of the civil war. Her unhappy mother fled with her to France when

she was scarcely three weeks old; and after the death of the king the queen repaired to the convent of Chaillot, and there devoted herself to the education of her daughter. She united with great sweetness of character the charm of beauty, and was married to Philip, duke of Orleans. Their marriage was, however, rendered unhappy by the jealousy of the duke, who feared that his brother, Louis XIV., had supplanted him in his wife's affections. Louis wished to detach the king of England from the triple alliance with Holland and Sweden. The duchess went, therefore, in 1670, with the court to Flanders, and, under pretence of visiting her brother, passed over to Dover, where Charles was awaiting her arrival. Mademoiselle de Kéroual, a native of Brittany (afterwards mistress of Charles II., under the title of duchess of Portsmouth), accompanied her. Nor was their mission in vain; for in ten days the persuasions of the sister, aided by the fascinations of her companion, gained over to the French interest the profligate and unprincipled monarch. Soon after her return to France, the duchess of Orleans was suddenly seized with violent pains, which terminated her life; and though a *post mortem* examination took place, which was declared to be satisfactory, there is little doubt that she fell the victim of a base revenge. She died at St Cloud, in 1670.

HENRIOT, FRANÇOIS, one of the most infamous men that were thrown to the surface during the stormy period of the French revolution, was born at Nanterre, in 1761. Having robbed his master, an attorney in Paris, he was left without resource, and became a spy of the police. He first appeared in his revolutionary character the day after the taking of the Tuileries, in 1792. A few months after, he was one of the most sanguinary of the *Septembriseurs*; and presided at the massacre of the prisoners of Orleans. The commune of Paris made him chief of the *Sans-culottes* section; their object being to organize a system of terror over the national representatives. With these banditti, armed with bayonets and cannon, he marched to the Convention, and demanded the proscription of the Girondists. Under terror, the assembly consented to give up 29 of their most talented and trustworthy members to the guillotine. He afterwards became the willing satellite of Robespierre. When his leader was outlawed, and condemned to death by the Convention, Henriot and Coffinhal, the vice-presidents of the revolutionary tribunal, made an effort to raise the Jacobin factions in his favour; and might have succeeded, but his courage failed just as the brigands were pointing their cannons against the Convention, and the moment was lost; some of the sections, and a body of *gens-d'armes*, rallied in favour of the latter, and Henriot was outlawed, and arrested in a state of intoxication, produced by drinking large draughts of brandy. His colleague, Coffinhal, was so maddened by the loss of the day, that, rushing upon him in the upper room of the Hotel de Ville, where both were confined, he threw him out of the window. Henriot fell into a drain, and tried to hide himself, but his groans discovered his hiding-place;

he was dragged out, and sent next day to the scaffold, with Robespierre and his colleagues. This monster was only 33 when he suffered. It was he that made a motion for burning all the public libraries and books in France.

HENRY I., king of Germany, surnamed **THE FOWLER**, was the son of Otho the Illustrious, duke of Saxony and Thuringia, and born in 876. When he was elected sovereign of Germany, in 918, he had to contend with anarchy at home and enemies abroad, but his activity and prudence overcame them all. He improved the art of war among the Germans; surrounded the cities which, before his time, were, for the most part, nothing but a collection of log and mud huts, with walls and moats; and, as he compelled part of the nobility and freemen to reside in these cities, and insisted on all meetings for the discussion of public affairs being held in them, their progressive civilisation and great encouragement to commerce and manufactures were the result. After a fortunate and glorious reign of 16 years, he died at Quedlinburg, in 936.

HENRY II., king of Germany and emperor of the West, was great-grandson of the preceding, and was born in 972. He succeeded his father as duke of Bavaria, and in 1002 was elected king of Germany and crowned at Mentz and at Aix-la-Chapelle. Two years later he was crowned king of Lombardy, at Pavia, his rival, Harduin, avoiding a combat with him. He was engaged in frequent wars, in Italy, in Bohemia, Bavaria, &c. In 1014 he received the imperial crown at Rome, his wife Cunegunda being crowned with him. They were both distinguished for their piety and devotion to the Church, and were canonized. Henry died in Saxony, in 1024. He was the last emperor of the house of Saxony.

HENRY III., king of Germany, son of the Emperor Conrad II., succeeded his father in the imperial dignity, 1039. Nature had given him the talents, and education the character, suitable for an able ruler. In everything he undertook, he displayed a steady and persevering spirit: the clergy were compelled to acknowledge their dependence on him, and the temporal lords he held in actual subjection. He deposed three popes for their licentious lives, and raised Clement II. to the vacant chair; and he was as successful in his wars as in his administration. Born, 1017; died, 1056.

HENRY IV., son of the preceding, was born in 1050, and at the death of his father was only five years old. His mother Agnes was made regent, and on her death the chief power was seized by his uncles, the dukes of Saxony and Bavaria. Henry made war on them, and threw off their yoke. He, however, offended his subjects by the licentiousness of his manners, and quarrelled with the pope, Gregory VII., about investitures. The latter being appealed to in a subsequent dispute between Henry and the duke of Saxony, cited Henry to his tribunal, who then deposed the pope, to be in turn excommunicated by him. The emperor was compelled to submit, went to Canossa, where the pope then was, and after being kept three days in the court-yard, received absolution. The

quarrel was soon renewed, deposition, excommunication, and election of new popes and emperors followed. Henry's eldest son, Conrad, rebelled against him, but was overcome, and died at Florence in 1101. He then caused his second son, Henry, to be elected his successor, and crowned; but the latter also rebelled, and making himself master of his father's person in 1105, by stratagem, compelled him to abdicate the throne. Henry IV. ended his life and sorrows in neglect, at Liège, in 1106; and, as he died under sentence of excommunication, was not buried till five years after, when the sentence was taken off, and his remains were interred at Spire.

HENRY V., Emperor, the son and successor of the preceding, was born in 1081. In 1106 he rebelled against his father and dethroned him, assuming the imperial crown in his stead. In 1111 he married Matilda, the daughter of Henry I., king of England; and the rich dowry he received with his princess gave him the means of undertaking an expedition to demand the imperial crown from the pope. Finding that Pascal refused to crown him, Henry caused the pope to be conveyed away from the altar while at mass; and cut down, in the streets of Rome, all who opposed him. At length the pope yielded, and Henry was crowned in 1112, without making any new concessions. Soon after his return to Germany the pope excommunicated him; which led to a new war, invasion of Italy, and the election of a rival pope. Peace was not made till 1122, when the emperor renounced his claims. Died, 1125.

HENRY VI., Emperor, was son of Frederick Barbarossa, and was born in 1155. He was elected king of the Romans when four years of age, and succeeded his father on the imperial throne in 1190. The same year, on the death of William II., king of Sicily, he claimed that crown in right of Constance his wife, daughter of King Roger. After being crowned at Rome with his wife in 1191, he made an unsuccessful attempt to conquer Naples. In 1193 he gave Leopold, duke of Austria, a small price to hand over to him, keeping his royal prisoner, Richard I. of England; whom he detained nearly a year and released for a heavy ransom. With this money he undertook another expedition against Sicily, and succeeded. He was crowned at Palermo in 1194. A revolt broke out, in consequence of his tyranny, and he returned to suppress it. Died at Messina in 1197.

HENRY VII., Emperor, succeeded Albert I. in 1308. He undertook an expedition to Italy, and compelled the Milanese to crown him king of Lombardy. He then suppressed a revolt which had broken out in Upper Italy; took several cities by storm; and, having captured Rome, he was crowned Roman emperor by the cardinals sent from Avignon, while in the streets the work of murder and pillage was still going on. Died, 1313.

HENRY, THE LION, duke of Saxony and Bavaria, one of the most able and energetic sovereigns of the twelfth century, was the son of Henry the Proud, and was born in

1129. He was Saxony in 1142, death, and Bavaria till Emperor Frederick I. Italy, by the emperor's son, having hoped session to the himself with several expect the north. He was the

1129. He was invested with the duchy of Saxony in 1142, three years after his father's death, and he did not recover the duchy of Bavaria till more than ten years later. He was a great soldier, and accompanied the Emperor Frederick I. on two expeditions to Italy, perhaps on three; but their alliance was interrupted by the election of the emperor's son, king of the Romans, the duke having hoped for that honour and the succession to the empire. Henry also allied himself with Waldemar, king of Denmark, in several expeditions against the pirates of the north. In 1172 he made a pilgrimage to the Holy Land, and was received with great honours by the Emperor Manuel, both as he went and as he returned. In 1180 this powerful sovereign was deprived of his states by the diet of Wurzburg, and exiled. He went first to England, and took refuge with Henry II., whose daughter Matilda he had married in 1168. Having returned to Germany, he was a second time exiled by the emperor; and making an attempt, after the emperor's departure to the Holy Land, to recover his states by arms, he was defeated, and compelled to make a humiliating peace. He died at Brunswick in 1195. Henry the Lion founded the city of Munich, and built or rebuilt two bridges over the Danube, at Ratisbon and Lauenburg.

HENRY DE BLOIS, bishop of Winchester, nephew of William Rufus, and brother of king Stephen, was an active prelate and a bold, ambitious, and enterprising statesman. When England was invaded by the partisans of the Empress Matilda, he at first joined her standard, but subsequently deserted it, and became her most determined enemy. The empress queen and her followers having taken refuge in the castle of Winchester, he laid siege to it, set the city on fire, and consumed 20 churches, a number of religious houses, and many other buildings, so little respect did he pay to the capital of his diocese when he had an ulterior object in view. Yet after this he formed a project for erecting it into an archbishopric; and had actually arranged the business with Pope Lucius II., but the sudden death of the pontiff prevented its completion. He is now remembered chiefly as the founder of the hospital of St Cross, near Winchester, the church of which is regarded by many antiquaries as furnishing the model of the distinguishing features of the Gothic or pointed style of architecture. Died, 1171.

HENRY THE NAVIGATOR, the fourth son of John I., king of Portugal, was born in 1394. He gave early proofs of brilliant courage; but his love of arms was surpassed by his love of the sciences, particularly mathematics, astronomy, and navigation. While vigorously prosecuting a war against the Moors in Africa, he neglected no opportunity to obtain from them a knowledge of the regions bordering on Egypt and Arabia, and to inquire into the probability of a passage to the treasures of India by a voyage round the western coast of Africa. He conversed with men of learning; and, finding their testimony agreeable to the reports he had collected, he resolved to execute his designs. He was the first who applied the

compass to navigation; and to him also a principal part is ascribed in the invention of the astrolabe. Various expeditions were undertaken, and discoveries made, under his patronage and at his expense; but, at length, companies were formed of enterprising men, who were tempted with the prospect of obtaining gold dust, and the whole people became animated with the love of discovery. In 1446, Nuno Tristan doubled Cape Verde; and, two years later, Gonzalo Vaillo discovered three of the Azores, islands about 800 miles from the continent. Henry continued these efforts till his death, in 1463, and thus secured for himself an undying name as the patron and friend of navigation.

HENRY II., king of France, son of Francis I. and his queen, Claude, was born in 1518. His marriage with Catherine de Medicis was celebrated at Marseilles, in 1533, by her uncle, Pope Clement VII. Henry succeeded his father in 1547, and at once made a complete change in the court and ministry. The most influential persons in his reign were the cardinal of Lorraine and his brother Francis, duke of Guise, the constable de Montmorenci, the marshal de St André, and Diana of Poitiers, the king's favourite mistress, whom he made duchess of Valentinois. He carried on war with England and recovered Boulogne for France; war with the pope and with Spain; fighting for the Protestants in Germany, while he persecuted them in France; acquired by conquest Metz, Toul, and Verdun, and retained them under the treaty of Cateau-Cambresis, which closed the war in 1559. By the same treaty Calais was confirmed to France. The siege of Metz by Charles V., and its defence by the duke of Guise; the battle and Spanish of Renti; the great victory of the Gravelines at St Quentin; and the battle of this reign, are the chief military events of his reign. Mary, the young queen of Scots, was brought to France about 1549, and bedded, in July, 1559, from the effects of a Montgomerly at a splendid tournament a few days before. He left four sons and three daughters, three of the former reigning after him in succession.

HENRY III., king of France, third son of Henry II. and Catherine de Medicis, was born in 1551. He was first known as duke of Anjou, and distinguished himself as a soldier at the battles of Jarnac and Moncontour. He was elected king of Poland in 1573, but being proclaimed king of France on the death of Charles IX., in 1574, he escaped, not without risk, from Poland, and returned to France. The country was distracted with conflicting factions, and wasted with civil war; and the king, feeble in character, and self-indulgent, was governed by ignoble favourites. The famous Catholic League was formed, with the duke of Guise at its head; Henry of Navarre put himself at the head of the Huguenots, and won the battle of Coutras; Paris fell into the power of the League, in 1588, and the king fled to Chartres and Rouen; later in the same year he convoked the states-general at Blois, and there had the two Guises assassinated, a

crime which excited the revolt of Paris and the principal cities of the kingdom. The duke of Mayenne was named by the League lieutenant-general of the royal estate and crown of France, and Henry, roused at last to action, joined his rival, Henry of Navarre, and advanced to besiege Paris. At St Cloud, which he made his head-quarters, he was stabled by the fanatic Jacques Clément, and died the day after, 1st August, 1589. Henry III. left no children, and was the last sovereign of the Valois branch.

HENRY IV., called THE GREAT, king of France and Navarre, was born in 1553, at Pau, in Berne. His father, Anthony of Bourbon, was descended from a son of Louis IX.; his mother was Jeanne d'Albret, daughter of Henry, king of Navarre. He was brought up in the simple and hardy manner of the peasantry of Béarn, and this laid the foundation of a vigorous constitution and temperate habits. He was placed under the tuition of Florent Chréten, a learned man and zealous Protestant. In 1569 he accompanied his mother to Rochelle, and learned the art of war under Admiral Coligni. When the perfidious design of destroying the Huguenot chiefs, by a massacre, was formed by Charles IX. and his mother, Catherine, one of their means to lull suspicion was, to propose a marriage between Henry and Margaret of Valois, the king's youngest sister. While preparations were making for the marriage festival, Henry's mother died at Paris, not without strong suspicions of poison. Having assumed the title of *King of Navarre*, his marriage took place, Aug. 18th, 1572. Then followed the horrible scenes of St Bartholomew, Aug. 24. Henry was obliged to make profession of the Catholic faith to save his life; but Catherine of Medicl endeavoured to dissolve the marriage just celebrated. As she was unsuccessful in this, she adopted the plan of corrupting the noble youth by the pleasures of a licentious court; and he did not escape the snare. In 1576, however, he took advantage of a hunting excursion to quit the court, and professed himself again of the Protestant Church. Catherine, who, after the decease of Charles IX., administered the government in the name of his successor, Henry III., now thought it advisable to conclude a treaty of peace with the Huguenots (1576), securing to them religious freedom. Exasperated by this event, the Catholics formed the celebrated League, which Henry III. was obliged to confirm; and the religious war recommenced. In 1587 Henry obtained a victory over the Catholics at Coutras, in Guylene. In 1589, on the assassination of Henry III., Henry of Navarre succeeded to the throne; but he had to secure his claim by hard fighting and by a profession of the Catholic faith. The same year he won the victory of Arques, and the following year that of Ivry, over the forces of the League, headed by the duke of Mayenne. After a protracted and obstinate struggle, convinced that he should never enjoy quiet possession of the French throne without professing the Catholic faith, Henry at length yielded to the wishes of his friends, was instructed in the doctrines of the Roman

Church, and professed the Catholic faith, July 25th, 1593, in the church of St Denis. He happily escaped an attempt to assassinate him; was solemnly anointed king at Chartres, in 1594; and entered the capital amid the acclamations of the people. Peace was not fully re-established till 1598, when the treaty of Vervins was signed. Henry made use of the tranquillity which followed to restore the internal prosperity of his kingdom, and particularly the wasted finances; and in this design he was highly successful, with the aid of his prime minister Sully. To his former brothers in faith and in arms, the Protestants, he granted a certain measure of religious freedom and political security, by the edict of Nantes, in 1598. In 1610, while riding through the streets of Paris, his coach was obstructed in the Rue de la Ferronnerie, by two waggons. A fanatic, named Ravallae, took advantage of this moment to perpetrate a long-meditated deed; and the king received a fatal stab from the hand of this assassin, in the 62nd year of his age, and 22nd of his reign. His character is thus summed up by Henault:—"He united to extreme frankness the most dexterous policy; to the most elevated sentiments a charming simplicity of manners; to a soldier's courage an inexhaustible fund of humanity." The eulogists of Henry IV. draw a veil over his private character, yet are compelled to acknowledge that it was stained by great vices, especially by extreme licentiousness and fondness for gambling. His first wife, Margaret, bore him no children; by his second, Mary of Medicis, he had six, one of whom was Henrietta Maria, after wards queen of Charles I. of England. He had also several children by his mistresses. A new and valuable French "History of the Reign of Henry IV.," by A. Poirson, has appeared, in 3 vols., between 1257-65.

HENRY I., king of England, surnamed, on account of his superior education, BEACCLERC, was the youngest son of William the Conqueror, and was born at Selby, in Yorkshire, in 1068. Jealousies and dissensions early broke out between him and his elder brothers, Robert and William (the Red), and on the sudden mysterious death of William in the New Forest, in 1100, Henry, who was hunting with him, immediately seized the crown and the public treasures, his brother Robert being not yet returned from the crusade. To strengthen his hold on the affections of his subjects, he granted a charter re-establishing the laws of the Confessor, abolished the curfew, professed a reform in his own character and manners, and married the Princess Maud, daughter of Malcolm, king of Scotland, and niece of Edgar Atheling, thus uniting the Norman and Saxon races. When Robert invaded England in 1101, war was prevented by negotiation and the grant to Robert of a pension of 2000 marks. The same year began the quarrel between the king and Anselm, archbishop of Canterbury, respecting investitures. Henry, ambitious of the crown of Normandy, invaded that country in 1105, and took Caen, Bayeux, and several other places. He completed the conquest in the following year by the defeat and capture of Robert at the bat-

the of Tenchebrai. In 1109 the Princess Matilda (Maud) was betrothed to the Emperor Henry V. but, in consequence of her youth, the marriage was deferred for several years. Troubles in Normandy and in Wales, and war with the king of France, occupied Henry in the next few years. In 1118 he lost his queen, Maud, and two years later his only legitimate son, the Prince William, who, with his retinue, perished by shipwreck, on the passage from Normandy to England. It is said that the king was never seen to smile again. In 1121 he married Adelala, or Alice, daughter of Geoffrey, duke of Lorraine, and on the failure of his hope of offspring, he had his daughter, the Empress Maud, then a widow, acknowledged heiress to the throne. Henry died at Rouen, from the effects of gluttony, 1 December, 1135, having been absent from England nearly two years and a half.

HENRY II., king of England, first of the Plantagenet line, was the eldest son of Geoffrey, earl of Anjou, and his wife, the empress Maud, daughter of Henry I., and was born at Mans, in March, 1133. He received his education in England, under the care of his uncle Robert, earl of Gloucester. On the death of his father, in 1151, he succeeded to the earldom of Anjou, Touraine, and Maine, and in the following year, by his marriage with Eleanor of Aquitaine, the divorced wife of Louis VII. of France, he became possessor of the duchy of Aquitaine or Guienne. The same year he invaded England, but a treaty was concluded, in 1153, by which it was agreed that he should succeed to the throne of England on the death of Stephen. This event took place in October, 1154, and Henry was crowned without opposition at Westminster, in December. His first measures were directed to the redress of the disorders and anarchy which had prevailed in the reign of Stephen. He seized and destroyed most of the baronial castles; dismissed the foreign troops; renewed the charter granted by Henry I.; and resumed most of the lands which had been alienated from the crown by Stephen. On the death of his brother Geoffrey he claimed and got possession of Nantes, and was thus master of the whole western coast of France. His attempt on Toulouse, in 1169, involved him in a war with the king of France, which was only terminated two years later. In 1162 Thomas Becket was elected archbishop of Canterbury, and the great struggle between the civil and ecclesiastical powers began, which resulted in the murder of Becket, war with France, the repeal of the Constitutions, the exile and king's penance at Becket's tomb, and the invasion of Ireland, and, under the authority of a bull of Pope Adrian IV., which had been published in 1155, effected the conquest of that island. The remaining years of his reign were embittered by the numerous revolts of his sons, instigated by their mother, Eleanor, whose jealousy was excited by the king's affection for fair Rosamond, attempted to follow her sons to the court of France, but was seized and imprisoned during Henry's life. The king of Scotland, who supported the rebellion of the young princes,

was taken prisoner at Alnwick, in 1174, but was released after a few months, on doing homage to Henry. A formal reconciliation with the princes took place, but was followed by a fresh revolt and civil war. Prince Henry, who as heir-apparent had been crowned in 1170, died in France, in 1183. Geoffrey was killed at a tournament, two years later; and John joined his brother Richard in a new rebellion against their father, in which they were aided by Philip Augustus. The old king was prostrated by sickness, and the revolt of his youngest son John was the last and fatal blow from which he could not recover. He died at Chinon, 6 July, 1189, and was buried at Fontevraud. Notwithstanding the conflicting estimates of the character and measures of Henry II., viewed as the champion of state supremacy, it is evident that he was a man of powerful intellect, superior education, great energy, activity, and decisiveness, and also of impetuous passions. Ruling almost despotically, he greatly diminished the power of the nobles, and thus relieved the people of their intolerable tyranny. Good order and just administration of the laws were established, and the practice of holding the "assizes" was introduced. He revived the trial by jury in order to check the resort to trial by battle, which he could not abolish.

HENRY III., king of England, eldest son of King John and Isabella of Angoulême, was born at Winchester in 1207. He succeeded his father in 1216, and was crowned at Gloucester, in the presence of Gualo, the papal legate, 28th October of that year. The regency was intrusted to William Marshal, earl of Pembroke, who in 1217 defeated the French army at Lincoln, and compelled the dauphin Louis to retire to France. On Pembroke's death, in May, 1219, Hubert de Burgh, became regent; but mutual jealousies and dissensions disturbed their administration and weakened their power. Henry was crowned a second time, in 1220, and two years later was declared of age, but his feebleness of character unfitted him to rule, and the real power remained with his ministers. His fondness for foreign counsellors, his unsuccessful wars with France, and his attempts to govern without parliaments excited much ill-humour in the nation. This was increased by the papal exactions which he permitted, and by the heavy impositions on his subjects, made necessary by his acceptance of the crown of Sicily for his son Edmund. At length, in 1268, he was virtually deposed by the "Mad Parliament," which assembled at Oxford, and a council of state was formed under the presidency of Simon de Montfort. The popular leaders quarrelled among themselves, while the king was a prisoner in their hands. But in 1263 civil war began, the king being compelled to employ foreign mercenaries. In 1264 the battle of Lewes was fought, at which the king, Prince Edward, Earl Richard, king of the Romans, and his son Henry, were made prisoners by the barons. Soon after De Montfort, now virtually sovereign, summoned a parliament, which met in January, 1265, and was the first to which knights of

the shire and representatives of cities and boroughs were called; thus constituting the first *House of Commons*. In August of that year De Montfort was defeated and killed by Prince Edward at the battle of Evesham, and the king regained his liberty. But the war lasted two years longer. In 1270 Prince Edward set out on the crusade, and before his return Henry died at Westminster, 18th November, 1272.

HENRY IV., king of England, surnamed **OF BOLINGBROKE**, from the place of his birth, was born in 1366. He was the son of John of Gaunt, duke of Lancaster, the fourth son of Edward III. In the reign of Richard II. he was made earl of Derby and duke of Hereford. Having accused the duke of Norfolk of treason, the latter challenged him to single combat; but on the appearance of the two champions, at the appointed time and place, Richard would not suffer them to proceed. Both were banished the kingdom, Norfolk for life, and Hereford for a term of years. On the death of his father, in 1399, he succeeded to the dukedom of Lancaster, and, returning before the stated time for the purpose of claiming his duchy, and having been joined by the earls of Northumberland and Westmoreland, soon found himself at the head of 60,000 men. Richard was defeated, taken prisoner, and deposed; and the duke was unanimously declared king, under the title of Henry IV. This usurpation gave rise afterwards to the civil war between the houses of York and Lancaster. The reign of Henry IV. was full of difficulties and disturbances. The Welsh revolted under Owen Glendower; the Scots invaded England, and were defeated at the battle of Homildon Hill; the powerful house of Percy turned against the king, and headed an insurrection, which was suppressed at the battle of Shrewsbury; and there were frequent plots against the king's life, and parliaments stoutly maintaining their rights, and falling finances. Henry persecuted the Lollards, and got the famous statute "*De heretico comburendo*" passed. He lost all his popularity, his health broke down, and his conscience was ill at ease during the latter years of his life. Henry died in 1413, and was succeeded by his son.

HENRY V., king of England, called, after his birthplace, **OF MONMOUTH**, was born in 1388, and succeeded his father, Henry IV., in 1413. His dissipated habits while a prince gave his father great uneasiness; but he frequently displayed noble traits of character, and on ascending the throne he cast off his former companions, and justified the best expectations. France being at the time torn asunder by the opposing factions of the dukes of Orleans and Burgundy, Henry took the favourable opportunity of reviving the claims of his predecessors upon that country, and he landed with an army at Harfleur, Aug. 14, 1415. With 15,000 men he gained the battle of Agincourt, though the French immensely outnumbered him. He then returned to England; but three years afterwards he went again to France, espoused the Princess Katharine, on condition that the French crown should pass to him and his heirs on the death of the king of France, and be in-

separably united to the crown of England. While all his great projects appeared to be rapidly advancing towards a successful issue, a painful disease arrested his progress, and he died in 1422, aged 34, and in the 10th year of his reign. The career of Henry V. was more showy than useful; for while his successes entailed great misery on France, they did more harm than good to the true interests of England.

HENRY VI., king of England, was the only son of Henry V. and his queen, Katharine of France, and was born at Windsor, in 1421. At the age of nine months he succeeded his father, 1st September, 1422, the government being intrusted to his uncles the dukes of Gloucester and Bedford, of whom the former was named Protector of the Realm of England, and the latter Regent of France. The guardianship of the young king was intrusted to Richard Beauchamp, earl of Warwick. Henry was crowned at London, in 1429, and at Paris in 1431. The war in France was continued, and several victories were gained by the English, but in 1429 the extraordinary intervention of the maid of Orleans compelled them to raise the siege of that city, and the English power in France rapidly declined. In 1444 the king married Margaret of Anjou, daughter of René, king of Sicily and duke of Anjou, who by her high spirit, ambition, and audacity, gained a complete ascendancy over her "meek" and feeble husband. The king had little influence personally on the course of events, and the government was weakened by the quarrels of his uncles. The measures of the ministers, Suffolk and Somerset, excited much popular irritation, and insurrections broke out in 1450; the most serious of which was that headed by Jack Cade. In 1453 the brave Talbot was defeated and killed at Castillon, Bordeaux was soon after taken by the French, and nothing was left in France under English dominion but Calais. The same year the king fell into a state of mental aberration and incapacity for governing; and about the same time his son Edward was born. Then began the civil Wars of the Roses, which filled up the remaining years of Henry's reign; and, after various alternations of fortune, victory remained with the Yorkists. The accession of Edward IV. and the exile of Henry took place in 1461. The war, however, continued, chiefly through the courage and energy of the Queen Margaret, but in 1466 Henry was captured and imprisoned in the Tower. Released by the great earl of Warwick in 1470, he was again imprisoned by Edward in the following year, and was soon after found dead in the Tower. Whether he was murdered or died a natural death from overpowering grief is uncertain. Henry was a man of sincerely religious character, but without the strength and capacity to rule, and his misfortunes and tragic end may justly be pitied. An endeavour was made by Henry VII. to get him canonized, but unsuccessfully.

HENRY VII., king of England, first sovereign of the Tudor line, was the son of Edmund Tudor, earl of Richmond, and his wife, Margaret Beaufort, a descendant of the

eldest son of probably a father dying charge of by accession of tainted and William Her the restoration have studied the victory of was taken by duke of Britta him up when and by Richard Henry was pla attempt to inv that year, but leaders, the d them, were ex made a second Haven, and w Richard III. at which Richard crowned in Oct married the Prin although this u alliance of the Lancaster, Henriless and unscr lists. England, was the queen, Katherine Windsor, in 1421. He succeeded his government, as the duke of whom the former Realm of England of France. The attempt to invade England in October of that year, but failed, and several of the leaders, the duke of Buckingham among them, were executed. In August, 1485, he made a second attempt, landed at Milford Haven, and won a decisive victory over Richard III. at the battle of Bosworth, in which Richard was killed. Henry was crowned in October following. In 1486 he married the Princess Elizabeth of York, but although this union was looked on as an alliance of the rival houses of York and Lancaster, Henry showed himself the merciless and unscrupulous enemy of the Yorkists. Numerous insurrections broke out to trouble the peace of his reign. First that under Lord Lovel and the Staufords, which was easily suppressed; next that of Lambert Simnel, who, under the instruction of Richard Simon, a priest of Oxford, personated Edward, earl of Warwick, and was crowned in Ireland as Edward VI., in May, 1487; was supported by Margaret, duchess of Burgundy; and was defeated and taken prisoner by Henry at the battle of Stoke; then, in 1492, that excited in favour of the so-called Perkin Warbeck, giving himself out as Richard, duke of York, son of Edward IV. He was acknowledged as such by Margaret, duchess of Burgundy; attempted unsuccessfully to invade England in 1495; was received in the following year by the king of Scotland, who gave him in marriage Lady Katherine Gordon; again invaded England in 1497, and on the approach of Henry fled to Beaulieu Abbey, and was sent prisoner to London; made his escape, but was retaken, and in 1499 executed. The rest of Henry's reign was undisturbed, and he could indulge his master passion of his nature, the love of money. He had by popular feeling been compelled more than once to declare war on France, but it did not come to fighting. He gained subsidies by declaring war, and then by secret treaties made peace and got well paid for it. He employed in the latter years of his reign the notorious Empson and Dudley, for the purpose of extorting money on any pretex from his subjects; and on the death of his queen, in 1503, cast about for a new bride with a rich dowry. Illness came upon him in 1507, and he began to build monasteries and release prisoners for debt. He died at Richmond, 21st April, 1509, and was buried in the magnificent chapel erected by himself, at Westminster. His reign was the epoch of one of the most important social changes; the destruction of the feudal system and the growth of a

eldest son of John of Gaunt, and was born, probably at Pembroke Castle, in 1456. His father dying the same year, he was taken charge of by his uncle, Jasper Tudor; on the accession of Edward IV., in 1461, was appointed and placed under the care of Sir William Herbert; was taken to court on the restoration of Henry VI., and is said to have studied a short time at Eton; and after the victory of Edward IV. at Tewkesbury was taken by his uncle to Brittany. The duke of Brittany ateadly refused to deliver him up when pressed to do so by Edward and by Richard III. A rising in favour of Henry was planned in 1483, and he made an attempt to invade England in October of that year, but failed, and several of the leaders, the duke of Buckingham among them, were executed. In August, 1485, he made a second attempt, landed at Milford Haven, and won a decisive victory over Richard III. at the battle of Bosworth, in which Richard was killed. Henry was crowned in October following. In 1486 he married the Princess Elizabeth of York, but although this union was looked on as an alliance of the rival houses of York and Lancaster, Henry showed himself the merciless and unscrupulous enemy of the Yorkists. Numerous insurrections broke out to trouble the peace of his reign. First that under Lord Lovel and the Staufords, which was easily suppressed; next that of Lambert Simnel, who, under the instruction of Richard Simon, a priest of Oxford, personated Edward, earl of Warwick, and was crowned in Ireland as Edward VI., in May, 1487; was supported by Margaret, duchess of Burgundy; and was defeated and taken prisoner by Henry at the battle of Stoke; then, in 1492, that excited in favour of the so-called Perkin Warbeck, giving himself out as Richard, duke of York, son of Edward IV. He was acknowledged as such by Margaret, duchess of Burgundy; attempted unsuccessfully to invade England in 1495; was received in the following year by the king of Scotland, who gave him in marriage Lady Katherine Gordon; again invaded England in 1497, and on the approach of Henry fled to Beaulieu Abbey, and was sent prisoner to London; made his escape, but was retaken, and in 1499 executed. The rest of Henry's reign was undisturbed, and he could indulge his master passion of his nature, the love of money. He had by popular feeling been compelled more than once to declare war on France, but it did not come to fighting. He gained subsidies by declaring war, and then by secret treaties made peace and got well paid for it. He employed in the latter years of his reign the notorious Empson and Dudley, for the purpose of extorting money on any pretex from his subjects; and on the death of his queen, in 1503, cast about for a new bride with a rich dowry. Illness came upon him in 1507, and he began to build monasteries and release prisoners for debt. He died at Richmond, 21st April, 1509, and was buried in the magnificent chapel erected by himself, at Westminster. His reign was the epoch of one of the most important social changes; the destruction of the feudal system and the growth of a

middle class. Lord Bacon wrote a "History of the Reign of Henry VII."

HENRY VIII., king of England, second son of Henry VII. and his queen, Elizabeth of York, was born at Greenwich, in 1491. He was very early created duke of York, and at four years of age was named lord-lieutenant of Ireland. He became heir-apparent on the death of his elder brother, Prince Arthur, in April, 1502, and was soon after created prince of Wales. He succeeded his father on the throne in April, 1509, and his handsome person, frank and spirited bearing, accomplishments, and graceful familiarity with his inferiors, secured him general liking, and excited sanguine hopes. He had the infamous Dudley and Empson tried for conspiracy, imprisoned, and afterwards executed. His marriage with Katherine of Aragon, his brother's widow, an event leading to such great and unlooked-for issues, took place in June, 1509. Henry joined the Holy League against France, and in 1513, with Maximilian, won the "Battle of the Spurs," and took Terouanne. The same year the victory of Flodden was won by the earl of Surrey over the Scots. The influence of Wolsey soon after became predominant, and he had a leading part in the intrigues carried on by the English king with Francis I. of France and his great rival, the Emperor Charles V. Henry had a friendly interview with Charles at Dover, in the spring of 1520, and very soon afterwards Francis near Calais, at the famous "Field of the Cloth of Gold." For several years, however, he united with the emperor against France; and after the battle of Pavia, he allied himself with Francis against Charles. The series of momentous changes which have made the reign of Henry VIII. so memorable, and which are summed up in the name "Reformation," may be said to have commenced in the year 1527; when the king first moved for a divorce of Katherine. It is impossible here to give even an epitome of the details of the great struggle. The sentence of divorce was pronounced by the Cranmer, who rose into power after the fall of Wolsey, and was made archbishop of Canterbury. Cranmer's sentence was annulled by the pope; but Henry married Anne Boleyn, and the Church of England was finally separated from Rome. The royal supremacy was enacted by parliament; Fisher and More were put to death for practically denying it; and under the administration of Thomas Cromwell the dissolution of the monasteries was carried out. Insurrections were provoked and rigorously suppressed; the king's proclamations were declared to have the force of laws; and, at the instigation of Bishop Gardiner, the famous act of the "Six Articles" was passed, in under which a large number of executions took place. The cruelty and tyrannical disposition of Henry became more and more apparent as he advanced in years and more in health. And the fearful series of political executions, which had commenced with that of Edmund de la Pole, duke of Suffolk, in 1513, was terminated by that of Henry, earl of Surrey, in January, 1547. According to Holinshed, the number of executions in this

reign amounted to 72,000. Henry VIII. married six wives; Katherine of Aragon, divorced after 34 years; Anne Boleyn, beheaded; Jane Seymour, who died in child-bed; Anne of Cleves, put away in a few months; Katherine Howard, beheaded; and Katherine Parr, who survived him. Katherine of Aragon was the mother of Queen Mary; Anne Boleyn, of Queen Elizabeth; and Jane Seymour, of Edward VI. Henry had several other children who died young. He died 28th January, 1547. His character and the great events of his reign have furnished matter of continued controversy, and are likely to do so for a long time yet to come. Mr Froude in his History of England has done his best to vindicate the character of this king, and to show that the popular conception of it is not justified by the facts; but his view is not generally accepted. The important collection of "Letters and Papers, Foreign and Domestic, of the Reign of Henry VIII.," edited by Prof. Brewer, is still in course of publication.

HENRY OF HUNTINGTON. [HUNTINGDON, HENRY OF.]

HENRY, CHARLES, M.D., distinguished for his chemical knowledge and scientific pursuits, was the son of an eminent manufacturing chemist at Manchester, and was born in 1775. He finished his education at the university of Edinburgh, where he attended the lectures of Dr Black, and was the associate and friend of Brougham, Jeffrey, and Mackintosh. He relinquished the medical profession for the sake of co-operating in his father's lucrative pursuits. He began his public career by delivering, in Manchester, his lectures on chemistry, which have passed through several editions, and are remarkable for the precision of their information and the elegance of their style. The same observation may be applied to his characters of Priestley, Davy, and Wollaston; and, in short, to his various contributions to the Transactions of the Royal Society of London, the memoirs of the Literary and Philosophical Society of Manchester, and other periodical works. He attended the meeting of the British Association at Bristol, in 1836, where he was appointed one of the secretaries for the next year's meeting at Liverpool; but he had been for some time observed to labour under great nervous irritability, and to have suffered an almost total privation of sleep, which at length overpowered his faculties, and he shot himself, Aug. 30, 1836.

HENRY, MATTHEW, a Nonconformist divine, was born in 1662. He was educated by his father, Philip Henry, an eminent Presbyterian divine; studied the law at Gray's Inn, but renounced it for the ministry, and settled at Hackney. His chief work is an "Exposition of the Bible," in 5 vols. folio; besides which he wrote other books of practical divinity. Died, 1714.

HENRY, PATRICK, an American statesman and orator, was born in Virginia, in 1736. He was one of a large family, grew up uneducated, made several unsuccessful ventures in trade, and at last turned advocate. He remained without distinction and without briefs for several years, but at last

brought himself into notice and practice, in 1763, by his clever and successful pleading in a case respecting the legal income of the clergy. He opposed the clerical claim, and by the view he presented of the matter made it a great question of colonial independence. He removed to Louisa, and in 1765 was chosen a member of the Virginian legislature, and there made a very exciting speech against the famous "Stamp Act." He was one of the members of the first Congress in 1774, and was the first to call his countrymen to arms for recovery of their independence. He was elected for several years Governor of Virginia. Embarrassed with debts, he preferred then to retire from public office, and devote himself to his profession. He opposed the federal constitution as not democratic enough, and interfering too much with State rights. The post of secretary of state was offered him by Washington, but he did not accept it. Died, 1799.

HENRY, ROBERT, a Scottish historian, was born in Stirlingshire, in 1718. Educated at the university of Edinburgh, he filled the office of parish minister successively at Carlisle, Berwick-upon-Tweed, and Edinburgh, first at the new, and then at the old, church. He was author of a "History of Great Britain written on a new plan," which appeared in 6 vols. 4to, between 1771-1782, and was frequently republished. Though now superseded by the advance of historical knowledge and criticism, it is interesting as the first attempt on a large scale to tell the story of social progress and civilization as well as that of civil and military events. It is admitted to contain many curious particulars not found in histories better known. The degree of D.D. was conferred on Henry by the university of Edinburgh, Dec. 1788.

HENRYSON, ROBERT, a Scotch poet in the 16th century, was schoolmaster at Dunfermline, and a monk of the Benedictine order. His "Fables" were printed at Edinburgh in 1621; and his "Testament of Fair Cresside" in 1593. He wrote a number of other pieces, which are to be found in the collections of Hailes, Pinkerton, &c.

HENSLOW, JOHN STEVENS, a distinguished naturalist, professor of botany in the university of Cambridge, was born at Rochester, in 1796. He was educated at the Grammar School of his native town and at Cambridge, where he graduated M.A. in 1821, having previously entered the church. He took a leading part with Professor Sedgwick in establishing the Cambridge Philosophical Society; succeeded Dr Clarke as professor of mineralogy in 1822; and after the death of Professor T. Martyn, in 1824, was appointed to the chair of botany. Having been ordained priest in 1827, he became rector of Hitcham, in Suffolk, in 1837, and there passed the rest of his life. He showed himself a thoroughly practical and energetic clergyman, in all ways striving to raise and benefit the people of his charge; and his efforts were singularly successful. School-studies, parochial allotments, friendly societies, cricket-clubs, pleasure-excursions, and horticultural shows, all became in his hands instruments of good as well as sources

of enjoyment to young and old. He was author of "The Principles of Descriptive and Physiological Botany;" a "Catalogue of British Plants;" a "Dictionary of Botanical Terms;" "A Geological Description of Angles;" and other works. Died at Hitcham, 16th May, 1861. A Memoir of his life, by the Rev. L. Jenyns, has since appeared.

HEPBURN, JAMES DONAVENTURA, orientalist, was born at Hamstocks, in Haddingtonshire, in 1573. He was bred in the Protestant religion by his father, who was a presbyterian minister; but, after studying at St Andrew's, he embraced the Romish faith, and went to Italy. He next travelled through Turkey, Persia, Palestine, and most of the countries of the east; and it is asserted, that he became master of so many languages that there was scarcely a region of the globe with whose inhabitants he could not converse in their own tongue. On his return he entered into the order of Minims; but the fame of his acquisitions having reached the ears of Pope Paul V., he invited him to quit his retirement, and made him keeper of oriental books and manuscripts in the Vatican. He is supposed to have died at Venice, about 1620. He published a Hebrew and Chaldean Dictionary and an Arabic Grammar.

HEPHESTION, the personal friend of Alexander the Great, was son of Amyntor of Pella, in Macedonia. He accompanied Alexander on his expedition to Asia, and after the defeat of Darius, was intrusted with several important commands. When the nuptials were celebrated at Susa between Alexander and Statira, daughter of Darius, Hephestion married Drypetis, Statira's sister, and he was one of the officers who soon after had crowns of gold given them. He died after a short illness at Ecobatana, B. C. 325, and was passionately mourned by his master and friend, who ordered a general mourning for him, had his corpse removed to Babylon, and a funeral pile of unparalleled magnificence erected. He was also worshipped as a hero, and temples were built in his honour.

HERACLITUS, of Ephesus, a Greek philosopher, by birth belonging to the Ionian school, flourished about B. C. 500. He was a profound thinker, well acquainted with the systems of preceding philosophers, travelled in his youth, and by his melancholy temperament and unsocial habits, acquired the title of the Weeping Philosopher. Dissatisfied with society, he withdrew at last to mountain solitude, and lived on herbs; but when seized with illness returned to Ephesus and died there. He founded a philosophical sect named after him, but his system, originally remarkable for its obscurity, is now perfectly known. His fundamental principle was that fire was the first element of things and the universal agent. Plato and the Stoics adopted many of the acute original views of Heraclitus.

HERACLIUS, emperor of the East, was son of Heraclius, the governor of Africa, and was born about A. D. 575. In 610, he was sent to Constantinople to deliver the empire from the tyrant Phocas, whom he deposed and put to death; and was then

crowned emperor. His long reign was for the most part full of disasters, the empire being ravaged by the Persians, the Avars, the Bulgarians, and at last by the Saracens. After some years of inaction and gradual preparation, Heraclius set out in 622 to six campaigns he showed himself a brave soldier and a great general, defeating Chosroes in person, and concluding an honourable triumph with his successor in 627. After a sojourn at Constantinople he visited Jerusalem, and thenceforth he became theologian instead of soldier, adopting the so-called Monothelite heresy, and published an edict, titled "Ecthesis" or exposition in favour of it. Meanwhile the great Khalid, "Sword of God," was overrunning the empire, and conquering Syria and Palestine, and invading Egypt. Died, 641.

HERAULT DE SEHELLES, MARIE JEAN, advocate-general in the parliament of Paris under the old regime, and afterwards a member of the National Convention, was born at Paris, in 1760. Though he conducted upright before the revolution as an able and intrepid magistrate, he subsequently advocated vindictive measures against the royalists, and even charged Louis XVI. with a series of treasons, and recommended his condemnation. But he chiefly distinguished himself in the contest between the Mountain and Girondist parties, and he powerfully cooperated in the destruction of the latter; but all his services to the terrorists did not save him from the scaffold: he was executed, with Danton, in 1795.

HERBART, JOHANN FRIEDRICH, a German philosopher, was born at Oldenburg in 1776. He studied at the university of Jena, where he became a disciple of Fichte, whose system, however, he soon abandoned. Soon after he was introduced to Pestalozzi, whose influence confirmed his own tendency to the practical in philosophy. After teaching philosophy for several years at the university of Göttingen, he was appointed, in 1809, professor of philosophy at Königsberg, and superintendent of the high schools in East Prussia. In 1833, he was appointed to the same chair at Göttingen, which he held till his death. Herbart developed peculiar opinions in opposition to most of the existing systems of philosophy, rejecting the method of psychology, aiming at a science of mind based on mathematics, and maintaining that philosophy is not a science or explanation of any one subject, but a certain method of treating any subject; a development and elaboration of notions or conceptions. But his views are sometimes left in obscurity from the brevity with which he states them. He wrote several works on education in the earlier part of his career, and expounded his philosophical views in the following, among other, works:—"Psychologie als Wissenschaft, neu gegründet auf Erfahrung, Metaphysik und Mathematik;" "Einleitung in die Philosophie;" "Allgemeine Metaphysik;" and "Kurze Encyclopädie der Philosophie." Died at Göttingen, 1841.

HERBELOT, BARTHÉLEMI D', a learned orientalist, was born at Paris, in 1625. After travelling twice into Italy, in search of

eastern manuscript, and to converse with oriental travellers, he was appointed regius professor of Syriac at the College Royal, Paris, and obtained a pension. He was the author of the "Bibliothèque Orientale," a dictionary of oriental history and antiquities, on which he laboured for many years, and which first appeared in 1697. He died in 1695, not less regretted for his virtues than admired for his learning.

HERBERT, EDWARD, Lord, of CHERBURY, an English philosopher, was born in 1581, at Montgomery Castle; was sent, when only 12 years old, to University College, Oxford; was made a knight of the Bath, soon after the accession of James I.; having previously travelled on the continent, where his elegant manners and chivalric accomplishments attracted the greatest notice. He served in the Netherlands in 1610 and 1614, distinguishing himself by his romantic bravery; was twice ambassador to France; and on his return, in 1625, was created an Irish peer, and afterwards an English baron. He at first espoused the parliamentary cause during the civil wars, but afterwards the royalist, and died in 1648. His principal work is entitled, "Tractatus de Veritate." The contemporary, and in his method the opponent, of Hobbes of Malmesbury, Lord Herbert protested by his philosophy against the prevailing empiricism and materialism of his day. He taught the existence in man of a faculty above sense and understanding, to which they are subordinate, and from which, under the stimulating influences of nature and the world, all our knowledge is derived. He boldly asserted the supremacy in all things of this spiritual faculty, especially its right and capacity to judge of all claims to revelation. His philosophy called forth some timid opposition from theologians, but did not make way or attract the attention it deserved. Lord Herbert also wrote "De Religione Gentilium," his own "Memoirs," a "Life of Henry VIII.," &c.

HERBERT, GEORGE, one of the best of our minor poets, was a brother of the preceding, and was born in 1593. He was educated at Westminster School and Trinity College, Cambridge, obtained a fellowship of his college and the office of public orator of the university, and after spending several years at court, renounced his prospects of worldly preferment, and entered the church. He was appointed rector of Bemerton, in Wiltshire, in 1630, having shortly before married. He was a man of singular piety, distinguished for intense devotion to his pastoral duties, and reverent observance of all church ceremonies. Among his most intimate friends were Dr Donne and Nicholas Ferrar. His well-known sacred poems entitled, "The Temple, or Sacred Poems and Ejaculations," were first printed at Cambridge in 1633, and a fifteenth edition appeared at London in 1805; since which time they have been many times republished. Abounding in wise thought and graceful fancies, pervaded by a spirit not of this world, revealing the spiritual conflicts of a noble soul with its consolations and victories, this book, in spite of its fro-

quent quaintness and its too prominent ritualism, has been, and must continue to be, a favourite with the thoughtful and the pious. The prose works of George Herbert consist of "The Priest to the Temple," Proverbs, Letters, &c. Died at Bemerton, 1633. His Life was written by Isaac Walton.

HERBERT, The Right Hon. SIDNEY, 5th Lord Herbert of Lea, was the second son of George Augustus, eleventh earl of Pembroke. He was born in 1810, and educated at Harrow and at Oriol College, Oxford. In 1832 he entered parliament as member for the southern division of Wiltshire, which he continued to represent till December, 1840, when he was called to the House of Lords. In 1845 he held the office of secretary at war, but retired from it during the government of Lord Derby in 1852. He resumed it in December of that year, and held it during the Russian war, but again withdrew from the public service in consequence of the resolutions of the Sebastopol committee. After a time, the real nature of his services, and his untiring devotion to the duties of his office and the interests of his country, were generally recognized, and in June, 1859, he returned to the War Department, where he increased his already high reputation. His exertions in adding to our naval and military resources in every possible way greatly impaired his health, and it became necessary that he should rest from his work, it was hoped, only for a while; but his disorder soon became serious, and he returned home only a few days before his death, which took place at Wilton, August 2, 1861, in the 51st year of his age. As a speaker, he never failed to command the attention and win the admiration of the House of Commons; as a statesman he was indefatigable, and to his zeal he sacrificed his life. He was also an accomplished scholar, and possessed a most refined taste in architecture and painting. Still more will he be remembered for his efforts in improving the condition of the working classes, especially by the encouragement of emigration; and his name will remain as an eminent example of one who, with the most ample fortune and temptations to learned leisure, devoted all his time and strength to the service of his country, and refused to abandon his post in the hope that by so doing he might regain the strength of body which his constant and unwaried labour had impaired.

HERBERT, WILLIAM. [PEMBROKE, Earl of.]

HERBERT, WILLIAM, earl of Pembroke, a poet and the patron of learned men, was born in 1580, at Wilton House, the family seat. He was educated at New College, Oxford; and in 1626 was elected chancellor of that university, to which he was a liberal benefactor through life, and bequeathed to it at his death a valuable collection of manuscripts. Died, 1630.

HERBERT, Sir THOMAS, a descendant of one of the branches of the Pembroke family, was the son of an alderman at York. After receiving his education at Oxford, he travelled for 4 years in Asia and Africa, of which travels he published an account. On the

breaking out of the parliament to attend upon became worn himself a seal to him up to he survived his life principally assisted Dugdale's "Census," and last 2 years of the title of "The created a baron died in 1682.

was fortunate enough to be favored and pope when between them. The pope was, and the emperor made empire. He invited after the death of the emperor, and then invaded by the emperor's troops, which he entered in 1270. He was nearly half of Prussia, and the sovereignty of the was the first who was Master, his predecessor was Master. He was a sagacious man of 1239.

breaking out of the civil wars he sided with the parliament; but having been appointed to attend upon Charles in his captivity, he became warmly attached to him, and proved himself a zealous and incorruptible servant to him up to the hour of his execution. He survived his royal master 20 years, devoting his life principally to literary pursuits. He assisted Dugdale in his "Monasticon Anglicanum," and published an account of the last 2 years of the life of King Charles, under the title of "Threnodia Carolina." He was created a baronet at the Restoration, and died in 1683.

HERDER, JOHANN GOTTFRIED VON, a German philosopher, theologian, poet, and miscellaneous writer, was born in 1744, of poor parents, at Mohrungen, in Prussia; was educated for the church, and became court preacher, ecclesiastical counsellor, and vice-president of the consistory to the duke of Saxe Weimar; and died in 1803. At the moment when he died he was writing a hymn to the Deity, and the pen was found on the unfinished line. He was greatly esteemed by all who knew him. His works form 45 vols. 8vo, and embrace the most various branches of science, philosophy, philology, natural and civil history, and politics. Among those best known are the "Ideen zur Philosophie der Geschichte der Menschheit," "Geist der Hebräischen Poesie," and "Gedichte."

HERITIER DE BRUTELLE, CHARLES LOUIS L', a French botanist, was born at Paris, in 1745. In 1788, Dombey having brought from Peru and Chili an inestimable collection of plants, L'Heritier published a description of them in London, under the title of the Flora of Peru. On his return to Paris he published a work with the singular title of "Flore de la Plaine Vendome." This ingenious man was assassinated in 1801.

HERMAN OF SALZA, Grand Master of the Teutonic Order, succeeded Herman of Sverd in 1210. Under his able direction the order rapidly rose from the state of depression in which he found it, and acquired both strength and important privileges. Salza took a leading part in the wars with the Saracens, and especially distinguished himself at the siege and taking of Damietta in 1219. His services on that occasion were rewarded by the privilege, conferred by John of Brienne, of wearing the gold cross of the Kingdom of Jerusalem, in addition to the black cross of his order. Salza was afterwards employed by the Emperor Frederick in various diplomatic negotiations, and was fortunate enough to satisfy both the emperor and pope when called to arbitrate between them. The pope gave him a costly empire. The emperor made him a prince of land. Invited afterwards to succour the emperor, then invaded by the Prussians, he undertook the enterprise, intrusting its conduct to Herman de Balck. In a few years nearly half of Prussia submitted to the sovereignty of the order. Herman of Salza was the first who bore the title of Grand Master, his predecessors being called only Master. He was one of the most able and sagacious men of his age. Died, 1239.

HERMANN, (ARMINIUS,) naturalist, was born at Barr, near Strasburg, in 1738. He acquired a taste for the sciences from his father, who was a Protestant clergyman; and after going through his studies at Strasburg, he took his doctor's degree. He became professor of botany and chemistry there, and rendered great services to science, both by his lectures and the treatises which he published, and devoted all his property to the formation of a cabinet of natural history. Died, 1800.

HERMANN, PAUL, botanist, was born at Halle, in Saxony. He resided some time in the East Indies, particularly at Ceylon, where he acted as physician to the Dutch settlement. On his return he was chosen professor of botany at Leyden (1779), published various botanical works, and died in 1855.

HERMAS, one of the earliest Christian writers, author of the work entitled "Christianity," or "the Shepherd." He was probably the same person as Hermas, brother of Pius, bishop of Rome, and lived about A. D. 136. Origen and other early Christian teachers supposed him to be Hermas the companion of St Paul. His work was held in very high esteem, and was even reckoned by some as written in Greek, but is now known translated in a Latin version. Archbishop Wake translated it into English.

HERMELIN, SAMUEL GUSTAVUS, Baron, a Swedish mineralogist, was born in 1744, at Stockholm. After having travelled extensively, and studied the statistics and geology of the countries which he visited, he settled in his native land, and for more than 50 years held the most important posts in the administration of the Swedish mines. Hermelin wrote various works on the mineralogy, metallurgy, and natural resources of Sweden; and spent 15 years in perfecting a Swedish Atlas, a geographical undertaking of vast magnitude. He died in 1820.

HERMES, GEORGE, an eminent German Catholic theologian, was born in Westphalia, in 1775. He was educated at the academy of Münster, where, in 1807, he was appointed professor of theology. In 1819 he was called to fill the same chair at the new university of Bonn, which he occupied till his death. He was very popular as a teacher, and his views, his ability, and his kindly disposition and manners, drew a large number of students to him from all parts of Germany, and even from the Netherlands. While remaining perfectly orthodox, and holding the doctrines of the Catholic church, he sought a basis in reason and philosophy for the creed of the church, and substantially maintained the right of private judgment in matters of theology. After the publication, in 1831, of a second edition of his "Introduction to the Christian Catholic Theology," it was denounced to the pope, Peronne taking a zealous part against Hermes, and in 1835 his principles were formally condemned by a papal brief. The archbishop of Cologne, his personal enemy, executed the brief with great rigour, and a

hot controversy raged for some time respecting Hermetism. Hermetes died at Bonn, highly honoured and beloved, in 1831.

HERMOGENES, a distinguished rhetorician, born at Tarasus, in Cilicia, lived about the middle of the 2nd century, and is celebrated for the precocity and rapid extinction of his talents. At the age of 18, he was famous for his powers of oratory; at 17, he published his work on rhetoric, which ranked him high among writers upon that subject; but, in his 25th year, he wholly lost his memory, and sank into a state of mental imbecility. The precise date of his death is not known.

HERODES, ATTICUS. [ATTICUS.]

HERODIANUS, a Greek historian, flourished in the 3rd century, and held several public offices at Rome. His history is written in Greek, and comprises the period from the death of Marcus Aurelius to the year 238.

HERODOTUS, the great Greek historian, usually named the father of history, was born of a distinguished family of Halicarnassus, in Caria, B. C. 484. In consequence of civil dissensions, in which his family was involved, and the tyranny of Lygdamis, Herodotus had to quit his native city, probably about 482. He took refuge in the island of Samos, and appears to have lived there a long time. He undertook extensive travels, not for trading or political purposes, but for the purpose of satisfying his love of knowledge: visited all the principal towns of Greece, the Greek islands, Asia Minor, and Syria, Thrace, Egypt, and Libya. He embodied the results of these wide journeyings in his great work, but it is uncertain at what period of his life he undertook them. From Samos he again went to Halicarnassus, and succeeded in liberating the city from the tyranny of Lygdamis. Continued political strife, however, drove him away once more, and he spent the latter years of his life at Thuril, in Italy, whither he went either with the first Greek settlers, or soon afterwards. It was probably during the leisure of this part of his life that he composed his history; although it is possible that detached passages of it may have been at an earlier date recited, as alleged, at the great festivals. The object of Herodotus, in his history, is to set forth the origin and progress of the great war between the Greeks and the Persians; and at the successive stages of the main story he introduces episodes and branch stories of great interest, and which contribute to the illustration of the principal subject. Thus he gives the history of Cræsus and the kingdom of Lydia; the conquest of Lydia by Cyrus, and the rise of the Persian monarchy; the Persian invasion of Egypt leads him to give a copious and minute account of Egypt, its early civilization and established institutions; the invasion of Scythia by Darius gives occasion for an account of that country; the history of Cyrene follows; and then the great Ionian insurrection and the Persian war. The history ends with the siege of Sestos, B. C. 478. The work is written in a profoundly religious spirit, which recognizes the opera-

tion of divine purpose and laws in the world of men. It is written also with great simplicity and truthfulness; what the historian saw and learnt for himself being distinguished from what he was told by others; and the result of modern researches has been to a great extent to confirm his authority. His style is more that of an animated talker than of a formal writer, and has a charm which can hardly be described. There are several English translations of Herodotus; among which the most recent are those by Cary, and by Colonel Rawlinson and Sir J. G. Wilkinson. "The Tale of the Great Persian War," by the Rev. G. W. Cox, is an "attempt to clothe in an English dress, and without the restraints imposed on a professed translation, a narrative rich with all the wealth of Homeric imagery, and never perhaps surpassed in the majesty of epical conception."

HERRERA, FERNANDO, a celebrated Spanish poet, was born at Seville about 1515. An ardent admirer of the literature of Greece and Rome, he aspired to effect a reform in the poetry of his own country after classic models. He acquired great reputation and the surname of "the Divine." Besides his "Works in verse," which appeared in 1582, he wrote a narrative of the war of Cyprus and the battle of Lepanto, and translated into Spanish Stapleton's Life of Sir Thomas More. He also edited the works of Garcilaso. Died about 1586.

HERRERA, FRANCESCO, the elder, a Spanish painter, born at Seville in 1530. He was employed to paint in the palaces and churches of his native town, and also painted many *genre* subjects. A "Last Judgment," and a "Descent from the Cross" are among his principal works. Died, at Madrid, about 1650 or a little later.

HERRERA, FRANCESCO, the younger, Spanish painter, was son of the preceding, and was born at Seville about 1622. He studied at Rome, and after his return became second president of the Academy of Painting, Murillo being then president. He afterwards went to Madrid, and became first painter to Phillip IV. Died, about 1680.—There were several other artists of the name of Herrera contemporary with the above.

HERRERA TORDESILLAS, ANTONIO DE, a Spanish historian, who wrote a General History of the Spanish conquests in America between 1492 and 1554, a very elaborate and valuable work, in 4 vols. folio. He also wrote a "General History of Spain during the reign of Phillip II.," in 3 vols. folio, and other important historical works. Died, 1589; died, 1625.

HERRICK, ROBERT, an English poet of the 17th century. He received his education first at St John's College and next at Trinity Hall, Cambridge; after which he entered into orders, and obtained, in 1629, the living of Dean Prior, in Devonshire. He was deprived of this living by Cromwell, but recovered it at the Restoration, and died in 1633. A complete edition of his poetical works, in 2 vols. 8vo, was published at Edinburgh, in 1823.

HERRING, JOHN FREDERICK, the eminent animal painter, was born in Surrey in 1795. He began life as a painter of sign-boards, but at the age of eighteen received the impulse which determined his future career. The enthusiasm with which he witnessed the St Leger, at Doncaster, in 1813, led him to paint the winner, and after several years spent as the driver of stage-coaches, he applied himself entirely to his favourite art. The horse was with him a passion: and for thirty years he painted the winner of the St Leger, besides executing portraits of a great many racers and favourite horses for eminent persons. He anticipated Rosa Bonheur in painting a "Horse Fair;" and among his popular works, well-known by engravings, are the "Members of the Temperance Society," "The Baron's Charger," "Feeding," "Quintette," &c. Mr Herring was employed by the queen to paint several of her favourite horses, and he executed many pictures for foreigners of distinction. Died at Meopham Park, Tunbridge, Kent, 23rd Sept., 1865. His picture entitled "The Frugal Meal," is in the National Gallery.

HERSCHEL, SIR WILLIAM, one of the most distinguished astronomers of modern times, was born at Hanover, in 1738. His father, who was a musician, brought him up to his own profession, and, at the age of 14, he was placed in the band of the Hanoverian Guards. Towards the close of the Seven Years' War, when the French armies entered England, but not being able to obtain employment in London, he accepted a situation in the band of the Durham militia. When the regiment came to Doncaster, Herschel formed an acquaintance with Dr Miller, an eminent composer and organist of that town. It happened about this time that an organist was also wanted at Halifax, and, by the advice of the doctor, his young friend offered himself as a candidate for the place, and was successful. In 1766, he removed from Yorkshire to Bath, where he was chosen organist of the Octagon Chapel, and leader of the concertina at the public rooms. Although enthusiastically fond of music, he had for some time devoted his leisure hours to the study of mathematics and astronomy; and, in 1779, having constructed a telescope, and begun a regular survey of the heavens, stars, &c., he discovered, March 13th, 1781, a new primary planet, which he named the Georgium Sidus (now Uranus), in honour of George the Third. The same year he was elected a fellow of the Royal Society, and the gold medal awarded him for his discovery. His majesty, now called Herschel, gave him a house at Slough, with a pension to enable him to prosecute his favourite pursuits. After a long series of arduous and valuable labours, in 1802 he published before the Royal Society a catalogue of new nebulae, nebulous stars, planetary nebulae, and clusters of stars, which he had discovered; and, in consequence of the important additions made by him to the stock of astronomical knowledge, received from the university of Oxford the honorary degree of doctor of laws—a honour which was

followed up, in 1816, by the Guelphic order of knighthood from the king. He continued his astronomical observations till within a few years of his death, which took place in 1822. Herschel constructed several very large telescopes, and at last the celebrated forty-foot reflector, which he erected in his grounds at Slough, and with which he discovered the two innermost satellites of Saturn. A portrait of Herschel, painted by L. F. Abbot in 1785, is in the National Portrait Gallery. His highly-gifted son, the father's scientific course with great distinction.

HERSCHEL, CAROLINE LUCRETIA, sister of the above, and, like him, distinguished for her zeal in astronomical pursuits, was born at Hanover, 1750. Having joined her brother at Bath, in 1771, she voluntarily undertook the arduous duties of his astronomical assistant, not only acting as his amanuensis, but executing the laborious numerical calculations necessary to render his discoveries available to science, and labouring in the cause of astronomy with an ardour and activity which neither the fatigue of the body, nor the inclemencies of the season, could exhaust. Her own observations were so numerous and important, that the Royal Society published them in one volume; and her "Zone Catalogue" was honoured, in 1828, with the gold medal of the London Astronomical Society, of which she was also elected an honorary member. She had resided in Hanover since her brother's death in 1822; and her latest years were spent in the learned, and cheered by the regard and esteem of all who knew her, whether inmates of a palace or a cottage. Died, 1846.

HELTZBERG, EWALD FRIEDRICH, Count von, Prussian statesman and historian, was born in Pomerania, in 1725. He became minister of foreign affairs to Frederick II., and filled that post with great ability and success for about thirty years. Among his diplomatic performances were the treaties of Hubertsburg, Teschen, and Reichenbach, and Sweden, in 1762, and the pacification of Belgium and Holland. He was keeper of the secret archives of the kingdom, and was author of numerous historical and diplomatic works. Died, 1795.

HERVEY, JAMES, an English divine of exemplary piety, was born, in 1714, at Hardingstone, near Northampton; received his education at Lincoln College, Oxford; and eventually succeeded his father, as rector of Weston Favell and Collingtree. His chief writings are, "Theron and Aspasia; or, a Series of Dialogues and Letters on the Most Important Subjects." These two works had a very extraordinary popularity, but are probably now almost unknown. They were attracted by their religious sentiment, and by their flowery prose-run-mad style. Died, 1758.

HERVEY, JOHN, Lord, son of John, first earl of Bristol, was born, 1698. Educated at Westminster and Clare Hall, Cambridge, he took his degree of M.A. in 1715; and after

a short tour on the continent, he returned to England, where he spent much of his time in the literary and fashionable circles of the metropolis. In 1720 he married Miss Lepell, so well known in Pope's letters and verses; in 1723 he succeeded to the title of Lord Hervey by the death of his elder brother; and in 1725 became member for Bury, when he attached himself to Sir Robert Walpole's party in opposition to Pulteney's, and was made vice-chamberlain in 1730, and lord privy seal in 1740. From an early age Lord Hervey took an active part in the literary and political contests of the day. His pamphlets in answer to the "Craftsman" involved him in a duel with Pulteney; his quarrel with Pope, which extended over many years, gave rise to some of the bitterest satirical sketches ever penned (we allude especially to Pope's celebrated prose letter, the epistle to Dr Arbuthnot, and the character of Sporus); and he carried on an active correspondence with Dr Middleton regarding the mode of electing the Roman senate, besides writing some able pamphlets on foreign affairs. His "Memoirs of the Reign of George II., from his Accession to the Death of Queen Caroline," were published in 1848, with an interesting account of the author by the Right Hon. John Wilson Croker. Died, 1743.

HESIOD, one of the earliest Greek poets, who is usually supposed to have lived in the 8th century, B. C. He was a native of Ascra, in Bœotia, but almost nothing is known of his life. A family dispute drove him from Ascra, and he settled at Orchomenos. The works attributed to him are the poems entitled "Works and Days," "Theogony," "Shield of Hercules," and the lost "Catalogue of Women." The poetry of the "Works and Days" is of a homely and didactic character, dealing with the practical interests of common life. It is "a faithful transcript," says Otfried Müller, "of the whole condition of Bœotian life." The "Theogony," however, is of a different character; an attempt to present a systematic view of the origin and powers of the gods, and of the order of nature. It is of great importance for the history of the religion of the Greeks.

HESS, HEINRICH VON, one of the most distinguished of modern German painters, was born at Düsseldorf in 1798. He was of a family illustrious in art, and was first taught by his father. After distinguishing himself by several fine religious paintings, he was sent to Rome under the patronage of the king of Bavaria, and in 1826 was appointed professor in the Academy of Munich, and director of the Painted-Glass Manufactory. He prepared the designs for the windows of the cathedral of Ratisbon, for those of the Au-church at Munich, and for those presented by King Ludwig to Cologne cathedral. His most celebrated frescoes are those of All-Saints church, the Court Chapel, and the basilica of St Boniface, the latter representing scenes in the life of the saint. Among his other works are named a "Holy Family," exhibited in 1817. "Faith, Love, Hope," "Apollo and the Nine Muses," painted during his stay at Rome, and a "Last Supper." The works of this great

artist form one of the principal attractions of Munich. He obtained great reputation also as a portrait-painter, was honorary member of several academies, and knight of various orders. Among his latest works were the cartoons for the great north window of Glasgow cathedral. Died, at Munich, March 29, 1863.

HESEYCHIUS, a grammarian of Alexandria, who has left a valuable lexicon of Greek words, first published by Aldus Manutius in 1513. Hesychius is supposed to have lived about the 5th or 6th century of the Christian era.

HEVELIUS, JOHANNES, an eminent Polish astronomer, and one of the best observers of his time, was born at Dantzig in 1611. He began to devote himself to astronomical pursuits about 1640, and soon after built an observatory. He belonged to a noble family, and long held the office of consul in his native city. He engaged in a controversy with Hooke respecting the use of telescopes for observation of the heavens, was chosen in 1664 a fellow of the Royal Society of London, and was the correspondent of many distinguished scientific men. Among his numerous works are—"Selenographia," "Cometographia," "Machina Cœlestis," and a standard star-catalogue entitled "Firmamentum Sobieskianum," which appeared after his death. His observatory, with its valuable instruments and his library, were burnt in 1679, but he rebuilt it and continued his labours. Died, at Dantzig, 1688.

HEWSON, WILLIAM, a celebrated anatomist and physiologist, was the son of a weaver at Hexham, in Northumberland, when he was born in 1739. After studying his profession under his father, he resided for some time at Newcastle, London, Edinburgh, and Paris; and he subsequently became a pupil of Dr Hunter, whom he also assisted in his lectures. In 1771 he obtained the Copley medal of the Royal Society, for his discoveries of the lymphatic system in birds and fishes, and was elected a fellow of that learned body. He also published "Experimental Inquiries into the Properties of the Blood." Died, 1774.

HEYDEN, JAN VAN DER, a celebrated Dutch painter, was born at Gorcum in 1627. He was first taught by a painter on glass, and attained great reputation for his skill in architectural painting. Among his works are views of the Hotel-de-Ville, the Exchange, and the new church of Amsterdam, and the Royal Exchange, London. He was a skilful bread-baker, of effect with precision of detail, and very great finish. Died, at Amsterdam, in 1712.

HEYLIN, PETER, D.D., an English divine, was born at Burford, in Oxfordshire, in 1600. He became a student of Hart Hall, Oxford, but afterwards obtained a fellowship in Magdalen College, which he resigned in 1629, on being appointed chaplain to Charles I. Heylin lectured at Oxford on cosmography, and published the substance of his lectures in the work entitled "Mysticæ cosmæ," which became very popular. In 1651 he published his "History of St George," for which the king gave him the rectory

Hemmingford, prebend of West of Durham. Ot lowed; but, becoming a private property. After this he wrote a weekly paper, Heylin was a churchman, and wrote a defence of the church. He died before being reinstated by Charles II. HEYNE, CHRISTIAN, a distinguished classical scholar, in Saxony, a poor linen weaver, who acquired a remarkable proficiency in the ancient languages, and was soon after appointed professor of Greek at the university of Altdorf. He obtained the most distinguished honors, and his chief works, which has been translated, etc., translated, besides his "Ancient History and Geography," were the "Propriety and Decorum of the most ancient men of his time," and his "Memory dear to the memory of the most distinguished men of his time." Died, 1742.

HEYWOOD, JOHN, an English dramatist, was born at Northampton, and educated at Oxford, where, through Sir Thomas Digges, he became acquainted with Henry VIII. He was a favorite of the court of Edward VI., and of the confidence of Queen Elizabeth, being a Roman Catholic, and died at Merton, in 1584. He wrote several plays, and epigrams, "The Under and Fly," &c. HEYWOOD, THOMAS, an English actor in the reigns of Charles I. He is a voluminous author, and wrote more than 220 plays, of which he also wrote a life of Queen Elizabeth. HEYWOOD, THOMAS, an English actor in the reigns of Charles I. He is a voluminous author, and wrote more than 220 plays, of which he also wrote a life of Queen Elizabeth. HEYWOOD, THOMAS, an English actor in the reigns of Charles I. He is a voluminous author, and wrote more than 220 plays, of which he also wrote a life of Queen Elizabeth.

Hemmingford, in Huntingdonshire, and a prebend of Westminster, to which was added the living of Houghton, in the bishopric of Durham. Other church preferment followed; but, becoming obnoxious to the parliamentarians, he was soon ejected, and his private property was also sequestered. After this he went to Oxford, and published a weekly paper, called "Mercurius Aulicus." Heylin was a chure man of the school of Laud, and wrote his *Life*, and several treatises in defence of the church and its institutions. He died in 1662; having shortly before been reinstated in all his former appointments by Charles II.

HEYNE, CHRISTIAN GOTTLÖB, a distinguished classical scholar, was a native of Chemnitz, in Saxony, whither his father, a poor linen weaver, had fled from Gravenhutz, in Silesia, on account of religious persecution. Though destitute and obscure, he acquired a remarkable acquaintance with the ancient languages, and succeeded Gessner as professor of eloquence at Göttingen, where he was soon after appointed first librarian to the university. By his editions, and commentaries on, classic authors, Heyne obtained the reputation of one of the most distinguished philologists and archaeologists. His *chef-d'œuvre* is his edition of Virgil, with learned notes and commentaries, which has been frequently republished. He published also editions of Homer, Lucian, &c., translations of Epictetus and Seneca, besides learned dissertations on ancient history and art. It is not, however, merely the fame of his great learning, but his propriety and delicacy of his conduct, that procured him the acquaintance and regard of the most accomplished and eminent men of his time, and rendered his memory dear to them. He died in 1812, aged 82.

HEYWOOD, JOHN, one of the earliest of the English dramatic poets, was born at London, or at North Mims, in Hertfordshire, and educated at Oxford; after which he became, through Sir Thomas More, a great favourite with Henry VII. He also continued the confidence of Queen Mary; on whose death, being a Roman Catholic, he went abroad, and died at Mechlin, in Brabant, in 1534. He wrote several dramatic pieces of an irregular kind, a volume of versified proverbs and epigrams, "The Parable of the Talents and Jasper," &c.—He left two sons, JOHN and JASPER, both of whom possessed talents similar to those of their father; but being Catholics, they quitted England, and the remainder of their lives in Italy.

HEYWOOD, THOMAS, a dramatic writer and actor in the reigns of Elizabeth, James I. and Charles I. He is said to have been a voluminous author, having written no less than 220 plays, of which only 24 are extant. He also wrote a "Life of Merlin," "Life of Queen Elizabeth," "Lives of the Worthies," &c. Neither the date of birth nor that of his death are on record.

HERBERT, GEORGE, an eminent merchant and citizen of London, alike distinguished for his talents and public spirit, was born in Manchester in 1757. Being destined

from his youth to a commercial life, he was introduced into a leading mercantile house in the city, engaged in the West India trade; in which, first as a junior partner, and eventually as head of the firm, he continued nearly half a century. Possessing strong common sense, a retentive memory, and a mind richly stored with various information, together with the faculty of expressing himself in a public assembly with clearness and fluency, he became a valuable adviser and coadjutor on all commercial questions; and was accordingly selected to move the resolutions of the merchants, bankers, and traders, which led to the imposition of the property-tax in 1798, when the exigencies of the war required the sacrifice; and again to move those resolutions which forced its repeal in 1836. In 1806 he was elected M. P. for Sea'rd, and sat for that borough till 1812. He was greatly instrumental in originating and maturing that noble undertaking, the West India Dock; "in grateful testimony" of which, in 1804, he was presented by the company with some splendid ornaments. Mr Hibbert was elected F.R.S. in 1810; he was also F.S.A., and a member of the Roxburghe Club. Botany likewise engaged his attention; it served as an emulative duty of commercial life; and he was the means of introducing into this country many new and beautiful species of plants. Died, Oct. 8, 1837.

HICKES, GEORGE, an eminent divine and learned antiquary of the 17th century, was born at Newsham, in Yorkshire, in 1642, and educated at Oxford. In 1681 he was appointed one of the king's chaplains, and soon after made dean of Worcester. At the Revolution he refused to take the oaths to William III., and was deprived of all his benefices. In 1693 he was sent by the non-juring clergy to St Germain's, to concert measures with the exiled king for the appointment of bishops, in the English church, from their party. He returned from this dangerous mission in the following year, and was himself shortly after consecrated bishop of Thetford. Dr Hickes was a profound scholar, particularly in Saxon lore; but in theological matters the violence of his prejudices sometimes obscured his judgment. His greatest work is entitled "The-saurus Grammatico-Criticus et Archæologicus Linguarum veterum Septentrionalium." Died, 1716.

HICKES, JOHN, brother of the preceding, was a Nonconformist minister, and as remarkable for his zeal in advocating those principles, as Dr George Hickes was in defending the high church party. Hearing it was the intention of government to apprehend him as a state criminal, he procured an introduction to Charles II., and not only obtained indemnity for himself, but also the promise of protection for the Devonshire Nonconformists. In the ensuing reign Hickes joined the duke of Monmouth, was taken prisoner, and executed as a traitor, in 1685.

HIERON I., tyrant of Syracuse, succeeded his brother Gelon, B. C. 478. He carried on war for several years with Theron, tyrant

of Agrigentum, and his son and successor Thrasydæus, the latter of whom he defeated and had expelled. In 474 he gained, in conjunction with the Cumæans, a great victory over the Etruscans, whose naval power did not recover the blow. Hieron was a patron of scholars, and his court was made illustrious by the presence of Æschylus, Pindar, Simonides, Xenophanes, and other distinguished Greeks. He was also frequently a successful competitor in the games at Olympia and Delphi. His government was very despotic, and was supported by mercenary guards and a spy-system. Died, at Catania, B. C. 467.

HIERON II., king of Syracuse, was the son of Hierocles, said to be a descendant of Gelon. After distinguishing himself in the Sicilian war of Pyrrhus, he was chosen, in B. C. 275, general of the Syracusan army. He carried on war with the Mamertines, who had invaded the island and taken Messana, and in 270 was chosen king by the Syracusans. The Mamertines having obtained the alliance of Rome, Hieron in 264 allied himself with the Carthaginians, who had gained a footing in the island, and thus began the first Punic war. Defeated by Appius Claudius in the following year, Hieron made peace with the Romans, and became their faithful and very useful ally. Under his government his subjects enjoyed great prosperity; he made some excellent laws, which the Romans retained after their conquest of Sicily; avoided all parade of royalty; fostered commerce, and strengthened and beautified Syracuse. The mathematician Archimedes lived in his reign. Hieron died B. C. 215, aged 92.

HIGHMORE, JOSEPH, a portrait and historical painter, born in London, 1692. He was intended for the legal profession; but, on the expiration of his clerkship, he abandoned the law, out of love for art, and studied painting under Sir Godfrey Kneller. He attained some popularity as a portrait painter, and executed a few pictures of higher pretension though of little merit. Among his best paintings is the Hagar and Ishmael, in the Foundling Hospital. He distinguished himself also as an author by his "Practice of Perspective." Died, 1780.

HILARION, ST., the principal founder of Monachism in Palestine, was born near Gaza about A. D. 292. Sent to study at Alexandria, he was there converted to Christianity, and the fame of St Anthony attracted him to the desert and made him a monk. He then returned to Palestine, gave away his property, and retired, still very young, into the desert. He founded several monasteries, lived the most austere life, and gained the highest reputation for sanctity, and even for miraculous powers. He afterwards visited the deserts of Egypt, Sicily, and Dalmatia, and died in the Isle of Cyprus, about 372. His life was written by St Jerome.

HILARIUS, ST., bishop of Poitiers, one of the greatest church-teachers of his age, was a native of Poitiers, and was raised to the episcopal office about A. D. 360. On the arrival of the Emperor Constantius in the west, and the consequent introduction of the Arian controversy into the Gallic church, he

presented a memorial to the emperor, frankly, yet respectfully, pleading for freedom of worship for the Catholics. It was in vain, and he was soon after banished to Phrygia. He appeared at the council of Seleucia in 359, and afterwards at Constantinople, but he was ordered to return to his diocese. He continued his exertions in behalf of the orthodox faith, held several councils in Gaul, and also visited Italy. Hilary wrote several works of divinity, and some hymns, and translated many works of Origen into Latin. Died at Poitiers in 387.

HILARIUS, ST., bishop of Arles (*Arelate*), born about the beginning of the 5th century, was the pupil and successor of Honoratus of the see of Arles. His piety and beneficence procured him general esteem, but he is now chiefly remembered for the controversy in which he was involved with Pope Leo the Great. He presided at the council of Arles in 439, at that of Orange in 441, and at a third, perhaps of Besançon, in 444. At the latter he had a certain bishop named Celdonus deposed, but on appeal to the pope the sentence was annulled, and Hilary was severely treated, and was glad to escape from Rome. In the following year Leo convoked a council at Rome, by which Celdonus was reinstated, and Hilary deprived of his metropolitan authority. A rescript was soon after issued by the young emperor, Valentinian III., establishing the authority of the pope over all the Gallic bishops, and making resistance to his authority an offence against the state. Hilarius appears to have retained his former authority as metropolitan of Gallia Narbonensis, and he died in 449. Most of his writings are lost.

HILDEBRAND. [GREGORY VII.]

HILL, Sir JOHN, a voluminous writer, was born in 1718, at Peterborough. He was brought up as an apothecary, and practised as a physician; wrote numerous books with great rapidity, and was the inventor of several lucrative quack medicines. Under the auspices of the Earl of Bute he published a "System of Botany," in 17 vols. folio; and on presenting a copy of it to the king of Sweden was invested with the order of Vasa. He also published a Supplement to Chambers's Cyclopædia, "Essays on Natural History and Philosophy;" conducted a periodical called "The Inspector," and wrote several novels, farces, &c. He was a constant attendant at every place of public amusement; and, being a satirical "busybody," was often involved in quarrels with the wits of the day. On one of these occasions he was characteristically hit off by Garrick in the following epigrammatic couplet:—
"For physic and farces his rival then scarce is;
His farces are physic, his physic a farce is."

HILL, ROWLAND, minister of Surrey Chapel, was a younger brother of Sir Richard Hill, bart., M. P. for Shropshire, a noted adherent of the Calvinistic Methodists, and was born at Hawkstone, near Shrewsbury, in 1744. He received his education at Eton, and at St John's College, Cambridge, at the time he quitted the university Oseph

Whitfield was in it, and so congenitally, that he quitted the party of Hill, and became a member of the great assembly. He was a native of Surrey, and was educated at Eton, and at St John's College, Cambridge, at the time he quitted the university Oseph

Whitfield was in it, and so congenitally, that he quitted the party of Hill, and became a member of the great assembly. He was a native of Surrey, and was educated at Eton, and at St John's College, Cambridge, at the time he quitted the university Oseph

Whitfield was in the zenith of his popularity, and so congenial to his nature was that extraordinary preacher's manner and doctrine, that he quickly adopted both, and became his zealous disciple, preaching in the streets of Bristol, on the quays, or among the colliers at Kingswood—wherever, in fact, he could gain an audience; but resuming, at stated periods, the services of the London and Bristol tabernacles. In 1783 the building of Surrey Chapel was completed; and from that time till his death, a period of 50 years, he continued to pass his winters in town for the purpose of officiating there. Rowland Hill occasionally illustrated the most solemn truths by observations which savoured more of the ludicrous than the pathetic—more of the grotesque than the serious; yet his intentions were pure and sincere, and he was no less indefatigable in his calling as a preacher than he was benevolent as a man. His writings are very numerous, one of which, entitled "Village Dialogues," had a great run of popularity. He was not sparing of wit, humour, or sarcasm, whenever he could make either subservient to his purpose, as was strikingly seen in a satirical pamphlet against the ministers of the Established Church, which he published anonymously, under the title of "Spiritual Characteristics, by an Old Observer." He died, in 1833, aged 88.

HILL, Viscount, General ROWLAND HILL, the second son of Sir John Hill, bart., was born on the 11th of August, 1772; entered the army at the early age of 16; served at Toulon under Lord Mulgrave, General O'Hara, and Sir David Dundas; through the whole of the Egyptian campaign, during which he was wounded in the head; in Ireland, throughout the Peninsular War, and at Waterloo, where he most ably seconded the duke of Wellington. In 1828 he was appointed commander-in-chief, and never can that post be filled to greater public satisfaction, or more beneficially to the army. In the field—in every rank, from that of ensign to that of general—he was remarkable for a rare union of daring, zeal, and prudence; and, as commander-in-chief at home, he was equally remarkable for his anxious and intelligent exertions for the promotion of the comforts of the army, and for the advancement of the service. In the distribution of his patronage he was proverbially impartial; private or political feeling never prevented him from doing justice to professional merit. Died, Dec. 10, 1842, aged 70.

HILLEL the Elder, surnamed HASSAKEN, was an celebrated Jewish doctor or rabbi, who lived in the century preceding the Christian era, and was a native of Babylon. At the age of forty he removed to Jerusalem, where he studied the law with such diligence as to become master of the chief school of that city. He formed a new digest of the traditional law, from which the "Mishna," or the most brilliant part of the Talmud, is derived. His pupil, Hillel the Younger, a disciple of Hillel, one of his disciples, disaffected from his master, and set up a new college, which produced violent contests among the Jews; but the party of Hillel proved victorious. He lived to the great age of 120 years; and while president of the Sanhedrim, he dis-

charged the duties of his office with unexampled wisdom and justice.

HILLEL the Younger, who obtained the title of NABI, or Prince of the Captivity, presided over the Jewish church in the third and fourth centuries, and distinguished himself by his great astronomical learning, reforming the Jewish calendar, regulating the period of the equinoxes, &c. He was also one of the doctors to whom is ascribed that portion of the Talmud called "Gemara."

HILLIARD, NICHOLAS, a celebrated English portrait painter, was born in 1547, at Exeter. He imitated the style of Hans Holbein, and became goldsmith, carver, and painter to Queen Elizabeth. Among his best works are the portraits of Elizabeth and Mary, queen of Scots. The works of Hilliard are still esteemed. Died, 1619.

HILTON, WILLIAM, an eminent English painter, born at Lincoln in 1786. He became at an early age a student of the Royal Academy, and exhibited first in 1803. Ten years R.A. He was chosen A.R.A., and in 1819 from the time of Fuseli's death in 1825 till his own death. Hilton was distinguished for his refined taste in design, skill in composition, and rich harmonious colouring; but his works are perishing from some fault in his preparation of his colours. Among his best pictures are reckoned—"St Peter delivered from Prison," "Una with the Lion," "Rape of Europa," "Serena rescued by Sir Calpeine," "Murder of the Innocents," and "Edith and the Monks Discovering the dead body of Harold." The last, with "Serena," and five other pictures of Hilton, are in the National Gallery. Died at London, 1839. An exhibition of his works took place in the following year.

HILTZ, JOHANN, a German architect of the 16th century. He succeeded Steinbach, builder of the cathedral of Strasburg, the tower of which, 570 feet high, was erected by Hiltz, and is considered a masterpiece of architecture.

HIMMEL, FRIEDRICH HEINRICH, German musical composer, was born at a small town in Brandenburg in 1765. He first studied theology at Halle, but abandoned it for music, and was appointed in 1794 chapel-master to Frederick William II., whose son Himmel was reputed to be. He composed operas, sonatas, songs, &c. Among his works are "Fanchon, the Lyre-maiden," "The Sylphs," both operas; a Funeral Cantata, and a Te Deum. Died at Berlin, 1814.

HINCMAR, archbishop of Rheims, was born of a noble family in France, early in the 9th century. He assisted in reforming the rules of the abbey of St Denis, was appointed abbot of Compiègne, and in 845 archbishop of Rheims. He distinguished himself three years later by his rigorous treatment of the monk Gotschalk, who for his writings on predestination was condemned, deprived, flogged, and imprisoned. In subsequent disputes with Pope Nicholas I. and the Emperor Lewis III., he showed himself the fearless defender of the liberties of the church. Hincmar presided at the council of Solissons in 862, and at that of Douzi in 871; he wrote numerous works, especially two treatises on

Predestination, in opposition to the views of Gotschalk; was compelled to flee from Rheims; and the approach of the Northern men in 882, and died the same year at Epernay.

HIPPARCHUS, the most eminent among the ancient astronomers, was a native of Nicaea, in Bithynia, and flourished about a century and a half before the Christian era. He resided some time in the island of Rhodes, whence he has derived the appellation of *Rhodium*; but he afterwards went to Alexandria, at that time the great school of science. He has been styled the patriarch of astronomy, and was certainly the first who treated the sublime science in a philosophic manner. He discovered the precession of the equinoxes, calculated the eclipses, determined the revolutions and mean motions of the planets, invented the stereographical method of projection, numbered and catalogued the fixed stars, and, in short, by his labours were laid the solid foundations of geographical and trigonometrical science.

HIPPIAS, prince of Athens, was the son of Pisistratus, at whose death he assumed the government, in conjunction with his brother Hipparchus; but the latter being assassinated by a band of conspirators, while conducting a solemn procession to the temple of Minerva, Hippias immediately seized the reins of government, and revenged the death of his brother by putting to death all of whom he entertained the least suspicion. His tyranny at last became so obnoxious to the citizens, that he was expelled from the city B. C. 510. He afterwards found means to induce Darius to apply to the Athenians in his favour; and their decisive refusal kindled the first war of the Persians against the European Greeks. According to some authorities the fate of Hippias was decided on the field of Marathon, where he fell on that memorable day, fighting against his countrymen, B. C. 490.

HIPPOCRATES, the greatest physician of ancient times, usually designated the father of medicine, was a native of Cos, an island of the Ægean. He was one of the family or caste of the Æsclepiads, the reputed descendants of the mythical Æsculapius, and was born about B. C. 460. He was thus the contemporary of Socrates and Plato, and began to be illustrious during the Peloponnesian war. He was educated by his father Heraclides and by Herodius, and it is said that he also became a pupil of the sophist Gorgias and the philosopher Democritus. He travelled extensively, and at length settled in Thessaly, and died at Larissa at an advanced age. Many fables were circulated respecting him in later times, and many works were attributed to him which he did not write. Among his genuine writings are the "Prognosticon," "Aphorisms," the "Books on Epidemics," "On Diet in Acute Diseases," "On Air, Water, and Place," and "On Wounds of the Head." Hippocrates is distinguished for his remarkable skill in diagnosis, and his accurate and vivid description of morbid symptoms. He was one of the first to insist on the importance of diet in cases of disease; appears to have practised auscultation, and taught the doctrine of "critical days."

His works were held in extraordinary honour, and were the subjects of commentaries by Celsus, Galen, and other eminent writers. He wrote, like Herodotus in the Ionic dialect, though Cos was a Dorian colony; and his style is remarkable for condensation. Many striking sayings are scattered through his works which have passed into familiar use.

HIPPOLYTUS, St. bishop of Portus (Rome), near Ostia, flourished about A. D. 220-236. He was a member of the presbytery of Rome, and was one of the most distinguished church teachers of his age. He is spoken of in terms of the deepest reverence by several of the fathers, and is commemorated in the Catholic church as saint and martyr. A statue, bearing his name and a list of his works, was discovered at Rome in the 16th century, and such of his writings as were known were published by Fabricius in 1716. The discovery of a Greek manuscript of a "Refutation of all the Heresies," at Mount Athos, in 1842, became the occasion of exciting fresh interest in Hippolytus. It was at first attributed to Origen, but Chevalier Bunsen, in his learned and elaborate work entitled "Hippolytus and his Age," published in 1862, maintained that it was the lost work of Hippolytus. Great value is justly attributed to it as a document illustrating church doctrines and history at a period a century earlier than the council of Nice. Bunsen, while admitting certain defects of style and faults of intellect in Hippolytus, describes him as "a serene Platonic thinker, with his wide heart for the universality of God's love to mankind in Christ, and with his glowing love of liberty and of the free agency of man, as being the specific organ of the Divine Spirit." His "Confession of Faith" is of great interest and importance. Hippolytus was banished from his see in 235, and though allowed to return, was put to death a year or two later.

HIRT, ALOYSIUS, a Prussian archeologist and writer on architecture, was born in Baden, in 1759. After completing his education and studying the remains of ancient art in Italy, he travelled in Germany with the countess of Lichtenau, and was appointed tutor to Prince Henry of Prussia. He became in 1796 professor of architecture at the Academy of Berlin, a member of the Academy of Sciences, and, on the establishment of the university, professor of archeology. His principal work is the "Geschichte der Baukunst bei den Alten." He wrote also "Baukunst nach den Grundsätzen der Alten," and other treatises, besides various articles in periodical works. Died at Berlin, 1837.

HOADLY, BENJAMIN, a celebrated prelate, was born at Westerham, in Kent, in 1676. He soon distinguished himself as a champion of civil and religious liberty, and an opponent of high church pretensions, in his controversy with Calamy and Atterbury, and was recommended by the House of Commons to Queen Anne, who promised him preferment, but did not give it. On the accession of George I. he was made bishop of Bangor, and soon afterwards translated

to Hereford. In 1712 of Salisbury, and of Winchester. "very," which extends some years, was preached by Hoadly to the see. "My kingdom is not of this world" was his vocation was divided so vehement on the judgment on Hoadly's government interference proceedings by pro-Hoadly was an active his opponents never with attempting to punishment of which 1761. There is a portrait the National Portrait Gallery. **HOADLY, BENJAMIN**, prebendary, was physician to Frederick, prince of some medical and he is best known as pious Husband," died, 1757.

HOARE, SIR RICHARD, and F.R.S., an eminent topographer, was the Hoare, the first baronet in 1818 he printed, among his friends, "Classical Tour" in cases on antiquarian subjects occasionally carried his great work, on with utmost care and attention titles him to a distinguished topographical history of Modern History of the time of his death was 1804. **HOARE, WILLIAM**, was born about 1707, and studied under Grissoni in London, after which he remained in Italy many years, returning painted some portraits, which last were Hoare was one of the midians. Died, 1792.

HOBBES, THOMAS, a high philosopher and writer, was born in 1688, at Malmesbury, and was educated at Oxford, where he was tutor to the son of the Duke of Devonshire, with whom he made a friendship of many years of his day, both in person and in letters, among whom were Bacon, Herbert of Cherbury, and others. He gave a public course in philosophy at Malmesbury, and also became acquainted with Locke. In 1681 he accepted the office of secretary to the young earl of Devonshire, and spent some time in France and Italy. He was a mathematical tutor to the Duke of Devonshire in 1647, and won his situation by the Duke's recommendation. He was testified at the Restoration, and received a pension out of the Exchequer. He spent the latter part of his life at Malmesbury, the seat of the

to Hereford. In 1723 he obtained the bishopric of Salisbury, and in 1734 he became bishop of Winchester. The "Bangorian Controversy," which excited so much interest for some years, was occasioned by a sermon preached by Hoadly, soon after his promotion to the see of Bangor, on the words, "My kingdom is not of this world." Convocation was divided, and the debates were so vehement on the question of a synodical judgment on Hoadly's sermon, that the government interposed and stopped the proceedings by prorogation. Throughout life Hoadly was an active controversialist, and his opponents never ceased to charge him with attempting to undermine that establishment of which he was a prelate. Died, 1761. There is a portrait of this prelate in the National Portrait Gallery.

HOADLY, BENJAMIN, eldest son of the preceding, was physician to George II. and Frederick, prince of Wales. He published some medical and philosophical pieces, but he is best known as the author of "The Suspicious Husband," a comedy. Born, 1706; died, 1757.

HOARE, SIR RICHARD COLT, bart., F.R.S. and F.S.A., an eminent county historian and topographer, was the eldest son of Sir Richard Hoare, the first baronet, and born in 1758. In 1818 he printed, for private circulation among his friends, his recollections of a "Classical Tour," in 4 vols. Various treatises on antiquarian and other kindred subjects occasionally came from his pen; but his great work, on which he bestowed the titles him to a distinguished place among Modern History of Wiltshire, which at the time of his death was not quite complete. Died, aged 79, May 19, 1838.

HOARE, WILLIAM, an English artist, was born about 1707, at Eye, in Suffolk. He studied under Grisoni, an Italian painter in London, after which he went to Rome. He remained in Italy many years, and on his return painted some altar-pieces and portraits, which last were chiefly in crayons. Hoare was one of the first Royal Academicians. Died, 1792.

HOBBS, THOMAS, a distinguished English philosopher and writer on government, was born in 1658, at Malmesbury, Wilts. He was educated at Oxford, and in 1698 became tutor to the son of the earl of Devonshire, with whom he made a continental tour. He had afterwards the advantage of the society and friendship of many of the most eminent men of his day, both in France and England, among whom were Bacon, Ben Jonson, Lord Herbert of Cherbury, who took an exactly opposite course in philosophy to Hobbes, Gassendi, Father Mersenne, and Descartes. He also became acquainted with Galileo. In 1651 he accepted the office of tutor to the young earl of Devonshire, and travelled with him in France and Italy. He was appointed mathematical tutor to the prince of Wales in 1647, and won his sincere esteem, which was testified at the Restoration by the grant of a pension out of the king's privy purse. Hobbes spent the latter years of his life at Malmesbury, the seat of his former pupil the

earl of Devonshire. He holds an important place in the history of the growth and development of free thought in Europe; but endeavoured to give his speculations a practical direction. He was one of the first great English writers on government, and his views have exposed him to severe animadversion. He conceived the state of nature as a state of war, and government as the result of a compact suggested by self-love or reason for the sake of peace. He advocated absolute monarchy as the best form of government. His principal works are—the treatise "De Cive," "Leviathan," both of which were censured by parliament in 1666, "Human Nature," "De Corpore Politico," "De Libertate, Necessitate, et Casu," and "Behemoth," a history of the civil war. He also published a metrical translation of the Iliad and the Odyssey, which did not add to his reputation. A complete edition of the works of Hobbes was published between 1839-45, under the direction and at the cost of Sir W. Molesworth. A portrait of Hobbes, by an unknown artist, is in the National Portrait Gallery. Died, 1679.

HOBBERMA, MEINDERT, a very distinguished Dutch landscape-painter, born in 1638. The place of his birth and the time of his death are not known. He was a pupil of the eminent painter, Ruysdael, and an ardent lover and most diligent student of nature. The simplest scenes supplied him with subjects for his works, which charm by their fidelity and admirable execution, and are now more highly esteemed than ever. The National Gallery has but one specimen of this master, although there are many in English collections. Hobbema was probably living in 1699.

HOCHÉ, LAZARE, an eminent French general, was born in 1768, at Montreuil, near Versailles, where his father was an oster. In 1785 he entered the army; was made a corporal of grenadiers, and having passed with applause through the intermediate gradations of rank, frequently distinguishing himself by acts of bravery, he was raised, in 1793, to the command of the army of the Moselle, where he had to contend with the duke of Brunswick, and was several times beaten. He, however, succeeded better when engaged with the Austrians, whom he drove out of Alsace. In 1795 he was placed at the head of the republican army in La Vendée. In this important and difficult station he acquitted himself well, and succeeded in defeating the emigrants at Quiberon, and in inducing the royalists to yield obedience to the government. After having been sent, in the winter of 1796, as commander of the troops in the expedition to Ireland, and from which he returned in disgrace, he was appointed to the command of the army of the Sambre and Meuse, and had already gained considerable advantages, when his career was stopped by the armistice between the archduke Charles and Buonaparte. He died at Wetzlar, in 1797.

HODY, HUMPHREY, a learned divine, was born at Odcombe, in Somersetshire, in 1659. He studied at Oxford, and when young, published a Latin "Dissertation against Aristote's History of the Seventy-two Interpret-

years after. She commenced her literary career in 1805, by the publication of a volume of poems, from the profits of which she established herself in a school at Harrowgate. Ten years had elapsed since the death of her husband, when she became the wife of Mr Holland the painter. They soon after settled in London; and from that period till her decease she never discontinued writing. Among her writings we should mention "Emily," a novel in 4 vols.; "Beatrice," "The Unloved One," "The Son of a Genius," "Tales of the Priory," "Self-denial," "The Merchant's Widow," "Declension," &c. Died, 1844.

HOFLAND, THOMAS CHRISTOPHER, an English landscape-painter, born at Worksop, in 1777. He became a drawing-master in London, then at Derby, and afterwards gained his living for a long time by making copies of the works of eminent painters. As a landscape painter, his favourite subjects were quiet pleasing scenes on our rivers and lakes, which he succeeded in delineating with much truth, simplicity, and feeling. He was a member of the Society of British Artists. He was a great lover of angling, and published, in 1839, a work entitled "The British Angler's Manual." Died, 1843.

HOGARTH, WILLIAM, head of the British School of oil-painting, was born at London, in 1697. As he had a good eye and a fondness for drawing, his father, then a corrector of the press, apprenticed him to Ellis Gamble, a silversmith in Cranborne Alley, where he learnt to engrave crests on silver plates. At the end of his apprenticeship, in 1718, he studied drawing, it is said, under Sir James Thornhill, and began to engrave on copper for the booksellers. The first of his original engravings which brought him into notice were his illustrations to "Hudibras," which appeared in 1726. Four years later he married Jane, only daughter of Sir James Thornhill, without her father's consent. He applied himself for a time to portrait-painting, and afterwards to historical painting, but in this he failed. He then originated, and in which he stands alone, as a stern moralist, satirist, and humorist. His principal works are the three series of pictures entitled respectively "The Harlot's Progress," 1734; "The Rake's Progress," 1735; and "Marriage à la Mode," 1745. The last-named series, of six pictures, is now in the National Gallery. Among his other celebrated pictures are the "Enraged Muslim," "March of the Guards to Finchley," "The Election," in four scenes, "Modern Midnight Conversation," "Strolling Actresses," and the portraits of himself and Captain Coram. He acquired wealth as well as fame, although his pictures sold at absurdly low prices. In 1763 he published "The Analysis of Beauty," which was translated into the principal languages of Europe. Four years later he was appointed serjeant painter to the king, and he died in 1764. He was buried at Chiswick. Of this extraordinary man a living art-critic has said: "No man more distinctively and decidedly original and creative ever handled art: no one, good or for evil, was ever less affected by pre-existing influences, or by contemporary

criticism. The modern art of Europe began as completely with him, as its modern poetry with Dante; and as Dante's fellow-countrymen were at first unable to believe that a great poem could be written in their mother-tongue; so Hogarth's were incredulous that England could produce a painter. He first, with a serious and widely-extended scheme, put into painting what Fielding put down from writing; he brought the canvases made it tell the real story of common life,—tears, laughter, triumphs, and depths of degradation." A bust of Hogarth, by Ronbillac, is in the National Portrait Gallery.

HOGG, JAMES (the Ettrick Shepherd), a native of Scotland, was born Jan. 25, 1782, the anniversary of the natal day of Burns. His humble occupation, like that of his ancestors "time out of mind," was that of a shepherd; nor had he, as he avers, ever been more than half a year at school. At the age of 18, however, he began to amuse himself in stringing rustic rhymes together; and he continued to tend his sheep, and to write verses, until it was his good fortune to be noticed by Sir Walter Scott (who had seen some of his poetical efforts), which induced him to attempt something of a more decided character. He produced an "Essay on Sheep," which won for him the premium given by the Highland Society; and which, added to the success of a volume of ballads he had shortly before published, under the title of "The Mountain Bard," led him to hope for future fame and profit. He soon afterwards produced his "Forest Minstrel," which gained him but little in either sense; and it was owing to the kindness of Scott and Grievie, that his pecuniary difficulties were relieved. It was not until the publication of the "Queen's Wake" that his fame was established; but from that time he was considered as a somewhat popular author. His publications are numerous; and he contributed to some of the Edinburgh periodicals of the highest literary character. In fact, it was from the repeated mention of "the Shepherd" in the "Noctes" of Blackwood, that his name attained its chief celebrity. He continued the friend and companion of Sir Walter Scott until the decease of the latter. James Hogg died in November, 1835, at Airthrie Lake, on the Yarrow, leaving his widow and five children wholly unprovided for.

HOHENLOHE, ALEXANDER LEOPOLD, Prince of, bishop of Sardica, celebrated for the numerous miraculous cures which credulity has attributed to him, was born at Kupferzell, 1794. Destined from his infancy for the church, he passed through his educational course at Vienna, Berne, and Ellwangen; in 1816 he entered into holy orders at Olmütz; and after a journey to Rome, where he lived chiefly with the Jesuits, he discharged ecclesiastical duties at Bamberg and Munich, to the satisfaction of all the members of his church. In 1820, having been struck with the cures which the prayers of a Badenese peasant, Martin Michel by name, were said to have effected on many distinguished invalids, Prince Hohenlohe

was induced to have recourse to similar means; and having healed some nervous patients, he was soon surrounded by a host of invalids, eager to test the spiritual powers of one whose fame had been noised abroad as having effected cures which had baffled all ordinary medical skill. As in most similar cases, rumour was far in advance of the truth; but the prince was the dupe of his own credulity; and it was not until a thorough exposure of the whole proceedings was given to the world by the burgomaster of Bamberg, that he abandoned his supernatural pretensions. He wrote several tracts and sermons, and died at Grosswarad, in Hungary, 1849.

HOHENLOHE INGELFINGEN, FREDERIC LOUIS, Prince of, was born in 1746; and after having fought with distinction in the early campaigns of the French revolution, was, in 1804, made governor of the principality of Franconia, and commandant of Breslau. After the battle of Jena, Oct. 14, 1806, he directed the retreat, and led the remnants of the great Prussian army; but being exhausted by fatigue, he surrendered, with 17,000 men, at Prenzlau, Oct. 28. He died in 1818.

HOHENLOHE KIRCHBERG, Prince of, a general of artillery in the Austrian service, who greatly distinguished himself in the early campaigns against revolutionary France. He died in 1798, when in command of the army of the Rhine.

HOLJER, BENJAMIN CARL HENRIK, a Swedish philosopher, born in Dalecarlia, in 1767. He was educated at Upsal, distinguished himself among the party who strongly sympathized with the principles of the French revolution, and soon after coolly defended arbitrary power. After many disappointments, he became professor of philosophy at Upsal, in 1808, and obtained considerable reputation by his lectures and writings on metaphysics, and the fine arts. Died, 1812. His works appeared in 5 vols., in 1826-27.

HOLBACH, PAUL THYRY, Baron von, a French philosopher and miscellaneous writer, was born at Heidelberg, in the Palatinate, 1723. He was educated at Paris, and passed almost all his life there. He allied himself with the leaders of French thought, the philosophers of the *Encyclopédie*, entertaining them at sumptuous suppers, and encouraging the freest utterance of their most extreme opinions. He was in philosophy a pure materialist, and wrote numerous works, but anonymously, or under an assumed name. He translated into French some of the works of the English deists, and contributed to the *Encyclopédie* numerous articles on natural history, politics, and philosophy. The most famous of the works written by Holbach, wholly or in part, is the "Système de la Nature." Most of his other writings are forgotten. Died, 1789.

HOLBEIN, HANS, one of the most famous German painters, was born at Augsburg, probably about 1485, and learned the elements of his art from his father, whom he soon excelled. His talents procured him the friendship of Erasmus, for whose "Praise of

Folly," he drew several whimsical designs. At the recommendation of Erasmus he came to England, and was employed first by Sir Thomas More, who introduced him to Henry VIII. He rose to the zenith of fortune in that monarch's court, and painted a great number of portraits, which are still considered masterpieces of art. Some of his earlier productions, especially his "Dance of Death," are also very celebrated; and he excelled in the art of wood-engraving. He died of the plague in 1543. An original cartoon by Holbein, now at Hardwick Hall, in Derbyshire, was described by Mr George Scharf in the *Athenæum* (No. 1988), Nov. 11, 1865. A new Life of this master, by Mr Wornum, is in preparation.

HOLBERG, LOUIS, Baron of, a popular Danish poet, dramatist, and miscellaneous writer, was born at Bergen, in Norway, in 1684. His father had raised himself, by a bold achievement, from the ranks to the office of colonel, but took little care in forming the mind and character of his son, who struggled with great difficulties in acquiring learning. By reading the accounts of travellers, he became desirous of visiting other countries; and though straitened in circumstances, he travelled in England, Holland, France, and Italy; and, on his return to his native country, raised himself to fame, fortune, and rank, by his literary talents. He laid the foundation of his fame by a comic-heroic poem, or national satire, called "Peder Paars." He also wrote numerous dramas, romances, fables, and epigrams, all of which abound with wit, humour, and originality. His other works consist of "The Subterraneous Travels of Nicholas Klimm," an "Universal History," "Parallel Lives of Illustrious Men and Women," a "History of Denmark," &c. Died, 1754.

HOLCROFT, THOMAS, dramatist, novelist, and miscellaneous writer, was the son of a London tradesman, and born in 1744. He at first followed his father's trade (that of a shoemaker), then became an actor, and finally directed his talents to literary pursuits. He produced more than thirty dramatic pieces, several of which were successful, and among these, the "Road to Ruin." On the breaking out of the French revolution, Holcroft rendered himself obnoxious as a strenuous supporter of liberal principles, and was accused of high treason in 1794; on which he surrendered himself; but, owing to his companions, Hardy, Horne Tooke, and Thelwall, being acquitted, he was not brought to trial. Among his productions are, "A Tour in Germany and France," several novels, and numerous translations from the German and French. Died, 1809.

HOLDER, WILLIAM, a clergyman of the church of England, noted as the inventor or improver of a mode of instructing the deaf and dumb. He was a fellow of the Royal Society, canon of St Paul's, and subdean of the chapel royal. Died, 1696.

HOLDSWORTH, EDWARD, an elegant writer, was born in 1688, at North Stoneham, in Hampshire, of which parish his father was rector. He was the author of "Muscipula," a Latin poem, written with classical purity; also of a dissertation, en-

titled "Pharsalia Philippi in VI. Died, 1748.

HOLINSHEAD, a celebrated English writer, descended from a noble family in Shire; and from that in the latter part of the 16th century, was the steward to Thomas, Earl of Warwick, who was killed at the battle of Marston, 1265. He was a learned man, and prefixed to his works a preface, in which he expresses his curiosity and interest in the manners and customs of the English in the 16th century.

HOLKAR, JAMES, a British general, who, for a long time, was the enemy of the British in the East Indies. He was able to bring into the field 100,000 men, half of which were British. Being, however, defeated with other British troops, he fled to the English, and was reduced to a state of poverty. In 1805 he surrendered to the British, and in 1807, induced to return to the English; and he was ultimately restored to his rank, and was ultimately restored to his rank, and was ultimately restored to his rank.

titled "Pharsalia and Philippi, or the Two Philippi in Virgil's Georgics explained." Died, 1746.

HOLINSHED, or HOLINGSHEAD, RAFAEL, an English chronicler of the Elizabethan age. He is said to have been descended from a respectable family in Cheshire; and from his own will it appears, that in the latter part of his life he was a steward to Thomas Burdett, Esq., of Bromcote, Warwickshire. The "Chronicles of Holinshed" were first published in 1577; and prefixed to them is one of the most curious and interesting memorials existing of the manners and domestic history of the English in the 16th century. Died about 1580.

HOLKAR, JESWUNT RAO, a Mahratta chief, who for a long time was a formidable enemy to the English in India, and was able to bring into the field an army of 100,000 men, half of whom were cavalry. Being, however, engaged in frequent contests with other native princes, as well as with the English, his power was very much reduced, and his territories diminished. In 1805 he surrendered all his maritime provinces; but the insurrection of the Pindarees, in 1807, induced him again to make war on the English; when the defection of his ally, the Peishwa, deranged his operations, and he was ultimately deprived of two-thirds of his dominions. Died, 1811.

HOLLAND, first Lord. [FOX, HENRY.]

HOLLAND, HENRY RICHARD VASSAL, Lord, was the only son of Stephen, second Lord Holland, elder brother of the Right Hon. Charles James Fox, and was born in 1773. His father and mother dying while he was in his infancy, the care of him devolved on his uncle, the earl of Upper Ossory, who placed him at Eton, where he remained about 8 years, and then entered as a nobleman at Christchurch, Oxford. On quitting the university, he visited Denmark, France, and Switzerland; and was at Paris about the time when Louis XVI. accepted the constitution, after his attempt to leave the country, and his seizure at Varennes. He subsequently travelled through Spain and Italy, and while in the latter country he formed an intimacy with the wife of Sir Godfrey Webster, bart.; in consequence of which the latter brought an action against him, and obtained £6000 damages. Lady Webster being subsequently divorced, Lord Holland married her in 1797, and on that occasion took, by royal sign manual, the surname of Vassal. During his parliamentary career, which commenced in 1798, he was the uncompromising advocate of the Catholic claims; a zealous promoter of every endeavour to soften the asperities of the law; and an assertor of popular rights in the most extensive sense of the term. When the Whig party came into power in 1830, he became a cabinet minister, and chancellor of the duchy of Lancaster. Though some may condemn the ultra-liberal policy by which he was guided, none can withhold from him the praise of being an urbane gentleman, an accomplished scholar, and a friend of merit wherever it could be found. He died, Oct. 18, 1840. During his lifetime, Holland House, bequeathed over by Lady Holland, who died,

1845, was the most renowned temple of wit and hospitality of which England could boast. Since the death of Lord Holland a volume of his "Foreign Reminiscences" has been published, and also his "Memoirs of the Whig Party."

HOLLAND, HENRY, a London architect, was born about 1745. He built old Drury Lane Theatre, burnt down in 1809, the India House, and for George IV., white prince of Wales, the Pavilion at Brighton, which was afterwards altered by Nash. But his most beautiful work was the façade of Carlton House, a specimen of the Corinthian order, very richly adorned with sculpture. It has unfortunately been demolished. Died at Chelsea in 1806.

HOLLAND, PHILEMON, an English scholar and translator of Greek and Latin classics, was born at Chelmsford in 1651. He studied at the university of Cambridge, and became head-master of the Grammar School, Coventry. He was an indefatigable worker, and found time amidst his ordinary duties to translate the "Cyropædia," Plutarch's "Morals," Pliny's "Historia Naturalis," and the histories of Livy, Suetonius, and Ammianus Marcellinus. Died about 1636.

HOLLAR, WENCESLAUS, an eminent Bohemian engraver, was born, in 1607, at Prague. He was brought to England, in 1636, by the earl of Arundel, on his return from the embassy to Vienna; and, in 1640, he was appointed drawing-master to the prince of Wales and the duke of York. The prospects of Hollar, however, were utterly destroyed by the civil war, and he was one of the prisoners taken at the siege of Basing House; but he contrived to escape to Antwerp, and again attached himself to his noble friend, the earl of Arundel, then living there in exile. In 1682 he returned to England, and applied assiduously to his art; but though he was so much employed, that he is said to have executed 2400 plates, he died so poor that an execution for debt was in his house at the moment of his death, which happened in 1677. His "Ornatus Mullebris Anglicanus" is held in high estimation, portraying with great correctness the dress of women of all classes, in the 17th century.

HOLLIS, DENZIL, Lord, one of the five members of the long parliament who were arrested by King Charles I. He was born in 1597, entered parliament in 1627, and at once took part with the popular leaders against the arbitrary measures of the king. He was imprisoned for supporting the resolutions against Popery and arbitrary levying of tonnage and poundage; became a member of the long parliament, and assisted in the impeachment of Archbishop Laud. In January, 1642, the arrest of the five members took place, an incident which is set in a new light and invested with greater importance by Mr Forster's able narrative. Hollis as a presbyterian was subsequently estranged from the ruling party, and went abroad. At the Restoration he was advanced to the peerage; in 1663 he was sent ambassador to France, and in 1667 was one of the English plenipotentiaries at Breda. Notwithstanding these employments, he remained a zealous friend to liberty and a conspicuous leader

of the opposition. He died, with a high character for honour, integrity, and patriotism, in 1680, aged 82.

HOLLIS, THOMAS, was born in London, in 1720. After a private education among the dissenters, he went to Amsterdam to learn the French and Dutch languages; and on his return completed his studies under Dr Ward, the Gresham professor. He then went on his travels; and having a handsome fortune, employed it in collecting curiosities and books. He contributed largely to Harvard College in America, the public library at Berne, and other foreign institutions; was a fellow of the Royal Antiquarian, and other learned societies; and made many valuable presents to the British Museum. He was a great friend to democratic government; was gentle and polite in his manners; and seems to have united each of the ancient stoles to the modern partisan of freedom and general philanthropist. Died, 1774.

HOLMAN, Lieutenant **JAMES**, known as "the Blind Traveller," was born in 1791, and entered the navy when a boy as first-class volunteer, from which time he was constantly afloat till 1810, when he invalided. His subsequent career was a special illustration of the pursuit of knowledge under difficulties. Obligated to leave the naval service from an illness which ended in the total deprivation of sight, he was appointed a naval knight of Windsor. But the almost monastic seclusion of that foundation was ill-suited for a mind so active, and he determined to undertake travels in all parts of the globe. His first journey, made in the years 1819, 1820, and 1821, was through France, Italy, and Switzerland, the parts of Germany bordering on the Rhine, Holland, and the Netherlands. He afterwards published a narrative of his travels, which was dedicated to the Princess Augusta, and went through four editions. He next travelled through Russia, Siberia, Poland, Austria, Saxony, Prussia, and Hanover in 1822, 1823, and 1824; and while passing through the Russian territories, he was suspected by the government to be a spy, and was conducted as a state prisoner from the eastern parts of Siberia to the frontier. His Russian travels were published in two volumes, and went through three editions. In 1834, he published his principal work, entitled a "Voyage round the World," in four volumes. It was dedicated to the queen, and embraced the journals of a vast route, including Africa, Asia, Australasia, and America, traversed between the years 1827 and 1832. His last journeys were through Spain, Portugal, Wallachia, Moldavia, and Montenegro, Syria, and Turkey, and his last employment was preparing for the press his final journals, which experience and matured observation had rendered more valuable than any of his former records of travel. Died, 1857.

HOLT, Sir **JOHN**, an eminent English judge, celebrated for firmness, integrity, and great legal knowledge, was born at Thame, Oxfordshire, in 1642, studied at Oriel College, Oxford, and became a member of Gray's Inn. He filled the office of recorder of London for about a year and a half, when his

uncompromising opposition to the abolition of the Test Act caused him to lose his situation. Becoming a member of the Lower House, he distinguished himself so much by his exertions and talents in what is called the "convention parliament," that on King William's accession he was made lord chief justice of the King's Bench. On the removal of Lord Somers, in 1700, he was offered the chancellorship; but he refused it, and continued to discharge the important duties of his high judicial authority with a resolute uprightness that gained him popularity while living, and rendered his memory dear to posterity. Died, 1709.

HOLTY, LUDWIG HEINRICH CHRISTOPH, a German poet, excelling particularly in lyrical and elegiac compositions, was born at Marienae, Hanover, in 1748. He was of a mild and penive disposition, pursued his studies beyond his natural strength, and prematurely died, at Göttingen, in 1778.

HOLWELL, JOHN ZEPHANIAH, an ingenious English gentleman, who was governor of Bengal, and one of the persons confined in the Black Hole at Calcutta in 1756, of which event he published a narrative. He wrote several pieces on Indian affairs, and died in 1798.

HOLYOAKE, FRANCIS, a learned lexicographer, was born in Warwickshire about 1567, and died in 1653. His "Etymological Dictionary of Latin Words" was first printed in 1608.—His son **THOMAS** was doctor in divinity, and died in 1675. During the civil wars he commanded a troop of horse in the king's service, although in holy orders, and on the failure of the royal cause he practised medicine; but at the Restoration he resumed his ecclesiastical functions and obtained church preferment. He enlarged his father's dictionary, which was republished in 1677.

HOLYOKE, EDWARD AUGUSTUS, an American physician, born in Essex county, Massachusetts, in 1728. He graduated at Harvard College, and in 1749 began to practise at Salem; was upwards of 100 years old when he died, yet it is said he was never in his life so far as 50 miles from the spot where he was born. He was temperate, cheerful, and active: always took "a due proportion of sleep;" and, in the practice of his profession, did not indulge in riding till he was 80 years of age. Even after he had attained his 100th year he took interest in the investigation of medical subjects, and wrote letters which show that his understanding was still clear and strong. Dr Holyoke was a good anatomist, was versed in natural philosophy and astronomy, and regularly recorded his meteorological observations daily for 36 years. Died, 1829.

HOLZER, JOHANN EVANGELIST, a German painter, was a native of the Tyrol, and was born in 1709. He applied himself to fresco-painting, and had a considerable reputation before he was twenty years of age. He spent some years at Augsburg, and painted many frescoes on the outside of the city in that city, now known only by prints. In 1737 he executed the frescoes in the church of the Benedictine monastery at Schwarzach, near Würzburg, and these were his chief performance. They have been

allowed to fall in worth, whither he coasted, in 1740.

HOMER, Sir **EVERARD**, was born at Greenlaw Castle, and was trained at law, the celebration of 40 years he spent in London; produced numerous high repute. He was the king, surgeon president of the Royal College, created a baronet, and "Lectures on 2 vol. 4to, and "on a variety of diseases, contributions to the arts, &c. Born, 1700.

HOMER, HENRY, a judge and eminent lawyer, was born in 1694. He was instructed in modern languages afterwards studied in the university of success at the bar abilities were made in 1728, of his of the Court of Sessions he practised, with year 1753, when he Eleven years after one of the lords various legal works, concerning British Antiquities, the Principles of Moral Philosophy, "An Introduction to Thinking," and "Essays in which, discarded of literary composition establish a new the human nature. Not his pen till 1772, "Farmer" made its following year, "Skeptic Man," in 2 volumes, published was "Logic, chiefly concerning Heart." It was published when the venerable year of his age. Died

HOMER, JOHN, author of the tragedy of "Douglas," was born at Roxburghshire for the church; but he entered into the taken prisoner at the contrived, however, in 1760, was ordained at Staneford, in East Lothian. "Douglas" was performed in 1756, and gave such offence that the author, to avoid a more subordinate government, wrote four other plays to attract attention. His death in 1745-6" died the expectation. HOMER, Sir EVERARD, bart., an eminent
surgeon, was the son of Robert Home, Esq.,
of Greenlaw Castle, in the county of Ber-
wick; and was trained under his brother-in-
law, the celebrated John Hunter. For more
than 40 years he practised with great suc-
cess in London; and during that time he
produced numerous medical works, held in
high repute. He was sergeant-surgeon to
the king, surgeon to Chelsea Hospital, vice-
president of the Royal Society, president of
the Royal College of Surgeons; and was
created a baronet in 1813. Among his works
are, "Lectures on Comparative Anatomy,"
2 vols. 4to, and "Practical Observations"
on a variety of diseases; besides numerous
contributions to the Philosophical Transac-
tions, &c. Born, 1766; died, 1832.

HOMER, HENRY, Lord KAMES, a Scottish
judge and eminent writer, born in the year
1696. He was instructed in the ancient and
modern languages by a private tutor, and
afterwards studied the civil and Scots' law
in the university of Edinburgh. Mr Home's
success at the bar was not great, till his
abilities were made known by the publica-
tion, in 1728, of his "Remarkable Decisions
of the Court of Session." From that period
he practised, with much success, till the
year 1759, when he was called to the bench.
Eleven years afterwards he was appointed
one of the lords of judicature. Besides
various legal works, he wrote "Essays con-
cerning British Antiquities," "Essays on
the Principles of Morality and Natural Reli-
gion," "An Introduction to the Art of
Thinking," and "Elements of Criticism;"
in which, discarding all arbitrary rules
of literary composition, he endeavours to
establish a new theory on the principles of
human nature. Nothing further came from
his pen till 1772, when "The Gentleman
Farmer" made its appearance; and, the fol-
lowing year, "Sketches of the History of
Man," in 2 volumes, 4to. The last work he
published was "Loose Hints upon Educa-
tion, chiefly concerning the Culture of the
Heart." It was published in the year 1781,
when the venerable author was in the 85th
year of his age. Died, 1782.

HOMER, JOHN, author of the once popular
tragedy of "Douglas," was born near An-
crum, Roxburghshire, in 1724, and educated
for the church; but in the rebellion of 1746,
he entered into the royal army, and was
taken prisoner at the battle of Falkirk. He
contrived, however, to make his escape, and
in 1760, was ordained as minister of Athel-
staneford, in East Lothian. His tragedy of
"Douglas" was performed at Edinburgh in
1748, and gave such offence to the presbytery,
that the author, to avoid ecclesiastical cen-
sure, resigned his living, and ever after ap-
peared and acted as a layman. He obtained
some subordinate government appointments,
and wrote four other plays, which, however,
failed to attract. His "History of the Re-
bellion of 1745-6" also disappointed the pub-
lic expectation. Died, aged 55, in 1808.

HOMER. This great name, or shadow of
great name, is retained in the Biographical

Treasury, not for the purpose of once more
repeating the details of the traditional
story attached to it since the days of Hero-
dorus, but partly from reverence for its
ancient glory and unwillingness to see it
wholly disappear from the roll of famous
names; partly on account of the place
which it must for a long time hold in liter-
ature and in the common speech of men;
and chiefly for the purpose of stating that
there is simply no evidence at all for the
common tale. That Homer was the greatest
poet of Greece and of the ancient world;
that he lived about the 8th century B.C., and
was an Asiatic Greek; that seven cities dis-
puted for the honour of being his birth-
place; that he was blind and poor, and went
about reciting his verses for bread; that the
"Iliad" and the "Odyssey" were his works;
such are the main items of the almost uni-
versal and unquestioned belief respecting
Homer in the ancient world; a belief which
modern criticism has not only shaken but
shown to be untenable. To sum up all
doubts and denial on the matter in one
word—No one knows even so much as the
fact of the existence of a great poet named
Homer. The Iliad and the Odyssey are facts
beyond doubt; their high antiquity, their
immense importance as sources not only of
popular poetic inspiration, but even of the
popular religious faith of the Greeks, and
their incalculable influence on all subse-
quent literature, are also unquestionable.
But of the authorship of these wonderful
poems we can only confess, like Socrates of
vaster problems, that "we nothing know
except that we know nothing." It is, how-
ever, established by recent criticism that
the Iliad is not one poem; that the ground-
work of the Iliad is the same as that of the
Odyssey; and that the tale of each is at bot-
tom identical with that of the Volunga Saga
and the Nibelung Song, as well as with
that of the greatest eastern epics. [For an
admirable account of the recent researches
on this subject, and the conclusions to
which they have led, see the Introduction to
the "Tales of Thebes and Argos," by the
Rev. G. W. Cox, M.A.] Among the numer-
ous English translations of Homer we must
name—the earliest and very spirited version
by Chapman, lately republished; those by
Pope in heroic verse, and by Cowper in
blank verse; and, recently, the Iliad in
blank verse by the earl of Derby, and in the
same metre by Wright; the Odyssey in
blank verse, by Musgrave; the Iliad and the
Odyssey in Spenserian verse, by Worsley;
and the Iliad in hexameters, by Dart. One
of the best modern translations is the Ger-
man in hexameter verse, by Voss. Among
recent works on these poems are Mr Glad-
stone's "Studies on Homer and the Homeric
Age," and Mr Matthew Arnold's "Lectures
on translating Homer." A work by Pro-
fessor Blackie is forthcoming. (Dec. 1865.)

HONDEKOETER, GILES; GYSBRECHT,
his son; and **MELCHIOR**, his grandson;
three Flemish artists of the 16th and 17th
centuries. Melchior, who was by far the
most celebrated of the three, was born at
Utrecht in 1638. He was first taught by his
father, and afterwards by his uncle, Jan

Baptista Weenix. He particularly distinguished himself as a painter of domestic fowls. Died at Utrecht, 1695. The National Gallery possesses one of his works.

HONE, NATHANIEL, a celebrated painter in enamel, was a native of Dublin, but came to London early in life, and was one of the first members of the Royal Academy. Died, 1784.

HONE, WILLIAM, bookseller and miscellaneous writer, was born at Bath in 1779. He was brought up to the law, but abandoned it and established himself as a bookseller in London. He struggled on through difficulties and failures, and about 1812 began to write for periodicals. In 1817 he became conspicuous as the publisher of a series of parodies, in some of which such irreverent use was made of the liturgy, that the government felt bound to prosecute him. He was tried on three charges, and defended himself for three days with considerable ability and with equal courage and temper; and as the government of that day was in ill odour with that large party in whom the reforming spirit was rife, a verdict was returned in his favour. He subsequently had a large sum subscribed for him, as a "persecuted but triumphant champion of the press," and entered business again as a bookseller. His publications now were of a far more useful character; such as the "Every-Day Book," "Table Book," &c. He was, however, so unfortunate in business, that he was arrested for debt, and remained in prison for some time. Through the kindness of Mr Tegg and other friends he was released, and enabled to open the Grasshopper coffee-house, where he edited the "Year-Book." This business, however, did not succeed, and Mr Hone again became involved. Being led to attend the ministry of Mr Binney at the Weigh House, his character became changed; and the new religious connection resulted in his becoming subeditor of the Patriot; this post he continued to hold till his death, which took place in November, 1842.

HONORIUS, FLAVIUS, emperor of the West, the son of Theodosius, was born at Constantinople in 384; succeeded to the throne in 395, his brother Arcadius being emperor of the East. The real power was in the hands of the great general Stilicho during the minority of Honorius, and he obtained several victories over the Goths when they invaded Italy. Honorius had his court first at Milan, but ultimately at Ravenna. In 408 Stilicho was charged with treason and put to death. Soon after Alaric renewed his invasion, and besieged and took Rome. Honorius died at Ravenna, after an inglorious reign, in the 39th year of his age, A. D. 423.

HONORIUS III., Pope, was raised to the papal chair on the death of Innocent III. in 1216. Immediately on his election, he wrote to John of Brienne, king of Jerusalem, to assure him of his support; and to the emperor of Constantinople, to promise him assistance against the schismatics. In 1217 he crowned Peter de Courtenay emperor of the East, and, three years afterwards, Frederick II. emperor of the West. Honorius confirmed the order of St Dominic in the

first year of his pontificate, and was a zealous supporter of the crusade against the Aibigenes. He also obliged Louis of France to renounce his pretensions to the English throne, and reconciled the barons with Henry III. Died, 1227; and was succeeded by Gregory IX.

HONTHORST, GERARD, a celebrated painter, called also GERARDO DALE NOTTI, from his subjects, was born at Utrecht in 1692, and was a pupil of Abraham Bloemert, but finished his studies at Rome, where he was employed by Prince Giustiniani, and other persons of high rank. He painted night-scenes, and pieces illuminated by torch or candle light. On his return from Italy he visited England, and obtained the favour of Charles I. by many able performances; and on his return to Holland, he was much employed by the prince of Orange. Among his numerous pictures, that of Jesus Christ before the tribunal of Pilate is the most celebrated. Died, 1680.

HOOD, ALEXANDER. [BRIDPORT, Lord.]

HOOD, SAMUEL, Viscount, British admiral, the son of a clergyman at Thorncombe, in Devonshire, was born there in 1724, and entered the royal navy at the age of 16. By his bravery in the capture of a 50-gun ship, in 1759, he acquired the rank of post-captain; and he took a distinguished part, as rear-admiral, at the famous defeat of De Grasse, by Rodney, April 12th, 1782, his services on that occasion being rewarded with an Irish peerage. In 1784 he was elected into parliament for Westminster, Fox being the rival candidate; but in 1786 he vacated his seat on being named one of the lords of the admiralty. In 1793 he signalled himself by the taking of Toulon, and afterwards of Bastia, in Corsica; for which achievements he was made a Viscount, and governor of Greenwich Hospital. Died, 1818.

HOOD, THOMAS, the poet, humorist, and miscellaneous writer, the son of Mr Hood, bookseller, was early placed "upon lofty stool, at lofty desk," in a merchant's counting-house, but his health failing, he was sent for a time to his father's relations at Dundee; and upon his return was apprenticed to an uncle, an engraver. A desire for literary occupation had, however, long been uppermost in his mind; and at length we find him contributing to, and in part editing, the London Magazine. But his connection with the press became more publicly known by the various clever and whimsical bagatelles, which adorned the pages of some of the weekly and monthly periodicals. Afterwards came his "Whimsies and Oddities," "National Tales," "Comical Annual," "Whimsicalities," "The Plea of the Midsummer Fairies," "Tynney Hall," "Up the Rhine," &c. Much, however, as we have admired his abilities as a punster and a satirist, and heartily as we have laughed at his original sketches, droll allusions, and grotesque similes; much as we esteem the man of wit who can "shoot folly as it flies," without indulging in personalities or inflicting pain on any but the worthless, we can still both admire and esteem him more

when, with true sympathy of our hearts, we read his poems, and especially the simple, eloquent, and genial critic, "The Shirt." "It never tastes bitter enjoyment. To us, all, there is the science, the pureness, the aroma of a most show during Hood's had, what sorrow gaily, and how he quered all. A beautiful posture was not a wasting illness." A complete edition of "Hood's Own" has been issued, edited by his son, and published May 3, 1845.

HOOD, PIETER, poet and historian, born in 1591. His father was for his courage and the Dutch Cato. He died in 1650, returning to Italy, returning to the presence of some young audience, near Amsterdam, and he was many distinguished as among his friends and his poem, "Granid," and he continued to write verse, throughout his life, to improve and redress the literary style of his prose works, and his "History of Tacitus. He died, and many graceful poems, Hague, 1647.

HOOGSTRATEN, I., poet and critic, born at Amsterdam; was named professor of Latin language; and Latin Dictionary. HOOGVLIET, ARNO, born in 1687. His children in 12 books, entitled "The March," which is read by many countrymen. Died, 1760. HOOK, JAMES, a man of industry and talent, born in 1746. His productions among complete works, many of which are successful; he also set to music songs! Died, 1827. HOOD, Dr Hook, the Rev. Dr Hook, the Rev. Dr Hook, the Rev. Dr Hook, the Rev. Dr Hook.

HOOK, Dr JAMES, doctor of the preceding year, and an able dignitary, was educated at St Mary Hall, Oxford, and chaplain to George of Hertfordbury

A New Universal Biography.

when, with true pathos, he fixes the attention of the reader, and commands the best sympathies of our nature, by his serious poems, and especially by compositions so simple, eloquent, and forceful as "The Song of the Shirt." His higher humour, says a genial critic, "is alone and unparagoned. It never tastes bitter in the mouth after the enjoyment. To us the brightest gems of his humour seem trembling into tears. Above all, there is the clearness of a good conscience, the pureness of a high heart, the aroma of a most sweet nature." Few could know during Hood's life how hard a struggle he had, what sorrows lay behind the visible gaiety, and how heroically he met and conquered all. A beautiful courage and composure was not wanting to him in the long wasting illness which preceded his death. A complete edition of his Works (except "Hood's Own") has been published by his son; and "Memorials" of his life have appeared, edited by his daughter. Born, 1798; died, May 3, 1845.

HOOF, PIETER CORNELIJS, a Dutch poet and historian, was born at Amsterdam, in 1681. His father was burgomaster, and for his courage and prudence, was named the Dutch Cato. Pieter was educated at Leyden, and, in 1699, visited France and Italy, returning to Amsterdam after an absence of some years. The château of Gulden, near Amsterdam, was his principal residence, and he there enjoyed the society of many distinguished persons. Grotius was among his friends. Hoof published his first poem, "Granida," a tragedy, in 1602, and he continued to write, both in prose and verse, throughout his life. He did much to improve and refine the language and literary style of his countrymen. Among his prose works are "Life of Henry IV. of France," "History of Holland," and a translation of Tacitus. He wrote several tragedies, and many graceful love-songs. Died at Hagne, 1647.

HOOGLSTRATEN, DAVID VAN, a Dutch poet and critic, born at Rotterdam, in 1658; became professor of the belles lettres at Amsterdam; wrote several good poems in Latin language; and published a Dutch Latin Dictionary. Died, 1721.

HOOGLIET, ARNOLD, a Dutch poet, born in 1687. His chief fame rests on a poem in 12 books, entitled "Abraham the March," which is much admired by his countrymen. Died, 1763.

HOOK, JAMES, a musical composer of industry and talent, was born at Norwich, in 1746. His operatic and melodramatic productions amount to more than 140 complete works, many of which were highly successful; he also set to music upwards of 100 songs! Died, 1827. He was the father of the Rev. Dr Hook, dean of Worcester, and of Theodore Hook, the celebrated novelist.

HOOK, Dr JAMES, dean of Worcester, of the preceding, was an accomplished scholar, and an able dignitary of the church. He was educated at Westminster School St Mary Hall, Oxford; in 1802 he was made chaplain to George IV.; held the livings of Hertingfordbury and St Andrew's,

in Hertfordshire, which he afterwards exchanged for that of Whippingham, on the Isle of Wight; obtained a prebendal stall in Winchester cathedral, in 1807; succeeded Dr Middleton, as archdeacon of Huntingdon, in 1814; and accepted the deaconry of Worcester, in 1828. Besides some dramas, which he wrote early in life, he published, in 1802, "Anguis in Herba; a Sketch of the true Character of the Church of England and her Clergy," which he inscribed "To the sober sense of his country." Few writers surpassed Dr Hook as a polemical or a political pamphleteer. At all times he was the unflinching castigator of those who upheld doctrines of a revolutionary tendency; and some of the most effective pamphlets that appeared during the war, in support of monarchical principles, owed their origin to him. Died, 1828.

HOOK, THEODORE EDWARD, F.S.A., a celebrated novelist and dramatic writer, but more celebrated for his wit and his powers as a mimic and an improvisator, was the youngest son of James Hook, the popular composer, and brother of the Rev. James Hook, dean of Worcester. He was born in London, in 1788, and received his education at Harrow. Seldom are the indications of genius in youth so apparent as they were in the case of Theodore Hook. At 17 he produced his first drama, "The Soldier's Return," which was speedily followed by "Catch him who can," "Tekholl," "Killing no Murder," and other operatic pieces, nearly all of which were successful. Those, with a host of piquant articles in the Satirist magazine and other periodicals, were hit off before he reached his 25th year. His reputation as a man of rare accomplishments, elegant manners, and pre-eminent convivial talents, being fully appreciated, he was a welcome guest wherever gaiety, wit, and good-humour were in request; and his intimacy with many distinguished characters was the result of it. In October, 1813, he was appointed to the office of accountant-general and treasurer of the Mauritius, which he held till February, 1816, when it was discovered that there was a deficiency in the military chest of about £12,000, abstracted, as it afterwards appeared, by his deputy, who, on the accounts being about to be investigated, destroyed himself; but Mr Hook, as a matter of course, was made answerable for the acts of his subordinate. He was accordingly sent home, his effects were seized and sold, and he became for a considerable time an inmate of the King's Bench. His literary labours were both his solace and support, his industry kept pace with his increasing popularity, and to his fame as a dramatist was now to be added his success as a novelist. The first series of "Sayings and Doings" appeared in 1824. Other novels, as "Jack Brag," "Births, Deaths, and Marriages," "Gilbert Gurney," &c., followed at short intervals. He also wrote "Memoirs of Sir David Baird" and of "Michael Kelly," the composer. But not a little of his notoriety arose from his connection with the John Bull, of which he was editor as well as a joint proprietor; and from his pen proceeded most of those

bold political articles, racy sketches of men and manners, smart poems, and epigrammatic *jeux d'esprit*, which for so long a time distinguished that ultra-Tory paper. For the last few years of his life he was the editor of the *New Monthly Magazine*. Of the numerous works of this ready writer, striking and popular as they were in their day, there are probably none that will stand the test of time. Died, Aug. 24, 1841. The Life of Theodore Hook has been written by R. H. D. Barham. His portrait, by Eddis, is in the National Portrait Gallery.

HOOKER, NATHANIEL. Of this author, whose chief celebrity arose from his "Roman History from the building of Rome to the ruin of the Commonwealth," very little is known. It appears that he was a zealous Catholic, and has been censured for taking a priest to confess a Pope, the poet, on his death-bed. Besides his Roman History, which was once esteemed but is now neglected and superseded, he wrote "Observations on the Roman Senate," translated from the French, Ramsay's "Life of Fénelon," and his "Travels of Cyrus," and received £5000 from Sarah, duchess of Marlborough, for assisting her in the Memoirs of her Life. Died, 1764. His portrait, by Dandridge, has been presented to the National Collection.

HOOKER, ROBERT, an English mathematician and natural philosopher, was born at Freshwater, in the Isle of Wight, in 1635. He was educated at Westminster and Oxford; and early displayed a mechanical genius, and an extraordinary talent for drawing. In 1684 he became professor of mechanics to the Royal Society, and Gresham professor of geometry. In 1685 appeared his "Micrographia;" and in 1686 he produced a plan for rebuilding London, which, though approved, was not adopted. Hooke, however, was appointed one of the city surveyors, by which he realized a handsome fortune. His scientific and mechanical inventions and discoveries were numerous and valuable; but he was a man of an unamiable disposition, and continually engaged in acrimonious controversies with his fellow-philosophers. He had a violent dispute with Hévelius, upon the preference of telescopic to plain sight; he had afterwards a dispute with Oldenburg, on the invention of the mainspring for watches; and he endeavoured also to set up a claim to Newton's theory of gravitation. Hooke was chosen perpetual secretary to the Royal Society, on the death of Oldenburg, in 1677. Died, 1703.

HOOKER, JOHN, a learned antiquary, was born at Exeter, in 1524. He was educated at Oxford, and became a member of parliament for his native town, in 1571. He wrote a "Description of Exeter," a work on the custom of keeping the Parliaments of England, and edited and enlarged "Hollingshed's Chronicle." Died, 1601.

HOOKER, RICHARD, a very eminent Church of England divine, was a native of Devonshire, and was born in 1554. Through the friendly offices of Bishop Jewel, he was sent to study at Oxford, where, in 1577, he graduated M.A., and became fellow of Corpus

Christi College. He took orders about 1581, and soon after married Joan Churchman, who brought him no beauty, nor money, nor peace. After holding some minor preferments he was named Master of the Temple, in 1585. The controversy in which he was there involved with the Puritan, Walter Travers, is said to have occasioned the project of his great work, "The Laws of Ecclesiastical Polity." For quietness and leisure in its composition, he removed to Bosecombe, in Wiltshire, in 1591, whence four years after he went to Bishopscourt, in Kent, and he sought no higher preferment. Four books of his "Ecclesiastical Polity" were published in 1594, a fifth in 1597, and the last three after his death. His profound philosophical ground work, his learning, and dignity and eloquence of style, have given it a place among the masterpieces of English prose literature. Hooker died at Bishopscourt, November 3, 1633. Isaac Walton's charming Life of Hooker is well known.

HOOKER, SIR WILLIAM JACKSON, a distinguished botanist, director of the Royal Gardens at Kew, was born at Norwich, in 1785. He early devoted himself to the study of nature, and soon chose botany for his special pursuit. Between 1806—1814 he made extensive travels for the purpose of collecting plants, and became the friend and correspondent of the most eminent men of science of his day. After five years' residence at Haleworth, in Suffolk, where he began to form his splendid herbarium, he removed, in 1820, to Glasgow, where he spent twenty years as Regius professor of botany, continuing at the same time his literary labours. He was knighted by King William IV. in 1838, and five years later was appointed Director of the Kew Gardens. Under his management the Gardens have been greatly extended, three museums have been established with a magnificent herbarium and botanical libraries; so that it is now unrivalled by any establishment of the kind in the world. His botanical works are very numerous and of standard authority. Among them are his "Tour in Iceland," "Musculægia Britannica," "Flora Scotiæ," "Exotic Flora," "British Flora," and "Icones Thymæ," the last published in conjunction with Dr. Greville. He was editor of the "Botanical Miscellany" from 1828—1833; editor of the "Journal of Botany," and co-editor of the "Annals and Magazine of Natural History." Sir W. J. Hooker was F.R.S., vice-president of the Linnæan Society, Oxford, D.C.L., and a member of the Legion of Honour. He married, in 1815, the daughter of Dawson Turner, F.R.S., of Yarmouth, a lady of great accomplishments, who survives him. His distinguished son, Dr. Hooker, who was assistant-director, has succeeded his father as director of the Kew Gardens. Sir W. J. Hooker died at Kew, 12th August, 1865.

HOOLE, JOHN, dramatic poet and translator, was born in 1727. He was for two years a clerk in the India House, and devoted his leisure hours to literary pursuits, particularly to the study of the Italian language, the fruits of which appeared in

translations of Ariosto's "Orlando Furioso" and Tasso's "Jerusalem Delivered." He also published two volumes of the dramas of Metastasio; and was author of three tragedies, viz. "Cyrus," "Timanthes," and "Cleonee." Died, 1803.

HOOPER, GEORGE, an eminent English prelate, was born at Grimsley, in Worcestershire, about 1640. In 1691 he was appointed dean of Canterbury; and, on the accession of Queen Anne, bishop of St Asaph, whence he was translated to Bath and Wells, over which diocese he presided 14 years, and died in 1727.

HOOPER, JOHN, a pious English prelate and Protestant martyr, was born in Somersetshire, in 1495, and educated at Merton College, Oxford. Having accepted the views of the reformers he had to leave his own country, and he passed several years on the continent. At the accession of Edward VI. he returned, and after a few years was made bishop of Gloucester, to which was added that of Worcester in *commendam*. Here he laboured with great zeal till the restoration of Popery under Mary, when, continuing firm in the faith he had chosen, he was committed to the flames as an obstinate and irreclaimable heretic, and suffered martyrdom with undaunted constancy, at Gloucester, in 1555. He was author of some sermons and controversial treatises.

HOPE, THOMAS, an English gentleman of large fortune, distinguished by his talents and patronage of the fine arts, was the nephew of a rich merchant of Amsterdam. In 1695 he first appeared as an author, by publishing a work, entitled "Household Furniture and Internal Decorations;" this was followed by two elegant publications, "The Costume of the Ancients" and "Modern Costumes;" but his great performance was "Anastasius, or Memoirs of a Modern Monk," which appeared anonymously in 1741, and was for some time very generally ascribed to Lord Byron. In this romance, which holds a distinguished rank among modern English works of fiction, he has presented an interesting picture of the manners and customs of the Turks and Greeks. Another work, of a metaphysical nature, was published after his death, entitled "On the Origin and Prospects of Man." He died in 1831.

HOPITAL, MICHEL DE L', chancellor of France, to which high station he rose through zeal, ability, and integrity he displayed in the various offices he before filled. He was born in 1503; studied jurisprudence in the most celebrated universities of France and Italy; rose rapidly in his profession, and was sent by Henry II. as ambassador to the Council of Trent. In 1554 he was made superintendent of the royal finances, in which his good management, and his inflexible disregard of those rapacious favourites of the court who batten on the public purse, he restored the exhausted treasury, and immediately set himself to resist the persecuting party in church and state, to secure toleration for the Protestants. He succeeded successfully in the convocation of the general at Orleans at the close of the

same year. In 1561 L'Hopital took part in the celebrated conference of Poissy, and he was the principal author of the edict of 1562, which allowed freedom of worship to Protestants. His liberal measures brought on him the hatred of the court of Rome, and of the powerful party of the Guises; his seals of office were taken from him in 1568; and he retired to his country-house. When the atrocious massacre of the Protestants on Bartholomew's Day, 1572, took place, and its victims, he not only refused to take measures for his own safety, but when a party of horsemen advanced towards his house, he refused to close his gates. They were, in fact, despatched by the queen with express orders to save him. On this occasion he was told that the persons who made the list of proscription pardoned him; upon which he observed, "I did not know that I had done anything to deserve either death or pardon." The whole course of this great man's life was fruitful of benefit to his country. He survived the massacre a few months only, dying in 1573.

HOPITAL, GUILLAUME FRANÇOIS ANTOINE L', Marquis de Saint-Meame, and Count d'Antremont, a distinguished French mathematician, was born at Paris, in 1661. He is said to have given, at the age of 15, a solution of a difficult problem respecting the cycloid. He studied under John Bernoulli in 1692, and in the following year was received at the Academy of Sciences. He distinguished himself soon after by his solution of the problem of the curve of quickest descent: Newton, James Bernoulli, and Leibnitz also giving solutions of the same. In 1696 appeared his famous "Analyse des Infinimentaux Petits," which made known the infinitesimal calculus in France, and marked an epoch in science. His "Traité Arithmétique des Sections Coniques," appeared three years after his death, and was long the best text-book on the subject. Died, 1704.

HOPKINS, EMUEL, D.D., founder of the sect called *Hopkinsians*, was born at Waterbury, in the United States, in 1721. He was a pious and zealous man, with considerable talents, and almost incredible powers of application; but his theological opinions have given rise to much controversy. He published numerous sermons, and earnestly advocated the abolition of slavery in the American States. From the year 1780 he presided over a congregation at Newport, Rhode Island, where he died in 1803.

HOPKINS, STEPHEN, an American statesman, and one of those who signed the declaration of independence, was born in 1707, in that part of Providence which now forms the town of Scituate. In 1732 he was elected a representative to the general assembly from Scituate, and was chosen speaker of that body in 1741. In 1751 he was appointed chief justice of the superior court of Rhode Island; and, in 1756, he was elected its governor. After this he was several times chosen a member of congress, and died in 1785. He was a clear and convincing speaker, and a good mathematician; and though he had received but a very limited education,

his knowledge of literature, science, and political economy was varied and extensive. HOPKINS, WILLIAM, D.D., an English divine, born at Evesham, Worcestershire, in 1647, was a celebrated antiquary. He assisted Bishop Gibson in his edition of the Saxon Chronicle, and was the translator of the article "Worcestershire," in Camden's Britannia. In 1675 he was promoted to a prebend in Worcester Cathedral; held the mastership of St Oswald's Hospital; and died in 1700.

HOPKINSON, FRANCIS, an eminent American author, and one of the signers of the declaration of American independence, was born at Philadelphia, in 1737. His father was the intimate friend and scientific coadjutor of Franklin. After graduating at the college of Philadelphia, and making the law his study, Francis visited England, the country of his parents' birth; and, in a few years after his return, entered congress as a delegate from New Jersey. He produced many satires and ironical pieces, such as the "Prophecy," the "Political Catechism," &c., tending to ridicule the old country; while, at the same time, he directed his efforts against the ribaldry of the newspapers, and the exaggerations and prejudices with which the federal constitution was at first assailed. After his retirement from congress he was appointed judge of the admiralty for Pennsylvania, and died in 1791. Among his works, the greater part of which are of a political character, there are many sound essays and scientific papers, acute and learned judicial decisions, and a variety of songs possessing much sweetness and delicacy, which were rendered still more popular by the airs he composed for them.

HOPPER, THOMAS, an English architect of considerable note in his day, was born in Kent about 1775. He had the advantage of an introduction to the Prince Regent, who employed him at Carlton House, and he soon obtained full professional occupation. His most important work is perhaps Penrhyn Castle, near Bangor; but he was employed to build or improve Slane Castle, in Ireland, Easton Lodge, Dunmow, Llanover Court in Monmouthshire, and many other mansions in England and Wales. He was one of the competitors for the erection of the General Post-office, and the Palace at Westminster. Died at Bayswater, 1856.

HOPNER, JOHN, an English portrait-painter, was born at London in 1759. He studied at the Royal Academy, and through the patronage of the prince of Wales became a very fashionable portrait-painter, and for many years was rival of Sir Thomas Lawrence. He presented his own portrait to the Royal Academy; his portraits of the princesses Mary and Sophia are in her Majesty's collection, and were exhibited at the International Exhibition in 1862; and his portraits of Pitt, and the actor "Gentleman Smith," are in the National Gallery. Died, 1810.

HORATIUS FLACCUS, QUINTUS, (HORACE,) one of the most eminent, and certainly the most popular and elegant of the Roman poets, was born at Venusium, a town lying on the borders of Lucania and

Apulia, B. C. 65. His father, although following the calling of a tax-gatherer, was a man of elevated and liberal sentiments, and took the greatest pains in providing for his son's education. At the age of 18 years he went to Athens to complete his studies; and while there, Marcus Brutus passing through the city on his way to Macedonia, Horace, accompanied by other Roman youths, joined the army; became military tribune; fought in the last battle for the freedom of Rome at Philippi, and saved himself by flight. Though he saved his life, he forfeited his estate, and was reduced to great want, till Virgil introduced him to Mæcenas, by whose interest he recovered his patrimony. Augustus now became his friend, and offered to make him his secretary, which Horace declined. When Mæcenas was sent to Brundisium to conclude a treaty between Augustus and Anthony, he took with him Horace, Virgil, and other literary friends; and, not long after, he presented Horace with the Sabine villa; to which, having witnessed such striking examples of the instability of fortune, he withdrew from the tumult of Rome, preferring retirement to a more brilliant life. His Odes are models of that kind of composition, and his Epistles and Satires abound with acute and vivacious observations on life and manners; while his "Ars Poetica," so often quoted, presents under the form of a letter to the Pisos, but with graceful precision, the difficulties of poetical composition, and the principles which should guide the poet in his work. This is not the place, even if our brief limits permitted it, to dwell on the peculiar merits of a classical poet; but we may say with a more competent authority, that "in the easy, agreeable manner in which he philosophises without appearing to do it, the safe with which he seasons his thoughts, and the delicacy and ease with which he expresses himself, afford the most agreeable entertainment. His descriptions are still applicable and interesting, and the poet will therefore ever remain the favourite of those whose morality does not exclude the refinements of life." Horace died suddenly, in the year of Rome 746, and 8 B. C., aged 56. There are many English translations of Horace. Among the most recent are those by F. W. Newman and Theodore Martin.

HORN, CHARLES EDWARD, the best English melodist of modern times, the son of C. F. Horn, a German musician, and teacher of the daughters of George III., was born in London, 1786. At the age of six, he showed evident signs of a taste for composition, his skill at improvisation arresting the attention of his father's visitors, among whom the great Haydn was numbered. On the opening of the English Opera House he was engaged as second tenor, and he subsequently shared the public favour with the first singers of the day. He composed the whole or the greater portion of the music for the numerable operas; and in proof of his success as a ballad composer, it need only be said that he was the author of the three most popular ballads of his time. "Cherry Ripe," "I've been Roaming," "The deep deep Sea," &c. Died at New York, 1843.

HORNE, GEORGE, an English prelate, born in 1730, at Oxford, was educated at Merton College, Oxford, and graduated in 1753, and his elegant style rendered him popular. He was successively, vice-chancellor of the University of Canterbury, dean of Canterbury, and bishop of Ely. He was distinguished for his piety and his literary life was a model to his contemporaries. In 1751 he opposed the proposal of the University as inconsistent with the constitution, and wrote against the creation and favouring of the University. He became involved in a dispute with the Hutchinsons, the supporters of the Hutchinsons, and wrote several numerous works, which were highly valued, and specifying her errors, and commenting on the same, and her elaborate performance, which he bestowed on her.

HORNE, THOMAS, an English biblical scholar, born in 1780. He was educated at Cambridge, and afterwards at Oxford, using his leisure for the study of self-culture, and in the study of subjects which were chosen subject to him, a post which he held for the study of theology, and after years of study, he was introduced to the knowledge of the Holy Scriptures in 3 vols. in 1811. He is known to the public as the author of a readable guide to the study of the Bible through ten years of his lifetime, and was in America. The work was edited by Dr S. I. May, and Dr Tregelless, and Dr Davidson on the subject of the volume, and completed, and was done over again by his hands. In 1815 he was appointed to a university, and was the author of a London curacy, and was appointed to a rectory. Mean while he was senior assistant in the printing of the Bible, and filled that office. He was also made a member of the B.D. of the University of Pennsylvania in 1827, 1827. A volume of his works appeared. HORNE TOOKE, (T. HORNECK, ANTHONY), a learned orientalist, born in Germany, in 164

HORNE, GEORGE, a learned and pious English prelate of the 18th century, was born in 1730, at Otham, Kent; and was educated at Maidstone Grammar School, and at University College, Oxford. He took orders in 1753, and his graceful execution and excellent style rendered him a popular preacher. He was successively chaplain to the king, vice-chancellor of the university, and dean of Canterbury; and in 1790 he was raised to the see of Norwich. He was distinguished for his biblical knowledge, and in early life was a strenuous Hutchinsonian. In 1781 he opposed the Newtonian philosophy as inconsistent with the Bible; in 1754 he wrote against Dr Shuekford's account of the creation and fall of man; and in 1756 he became involved in a controversy with Dr Kennicott, the supposed author of "A Word to the Hutchinsonians." But among his numerous works, which are too numerous for specifying here, the principal is, "A Commentary on the Book of Psalms," an elaborate performance, on the composition of which he bestowed nearly 20 years. Died, 1802.

HORNE, THOMAS HARTWELL, an eminent biblical scholar, was born in London 1780. He was educated at Christ's Hospital, and afterwards was employed as a clerk, using his leisure hours for the purpose of self-culture, and in preparation for higher work. He wrote a large number of books on a variety of subjects, long forgotten, and in 1809 was chosen sub-librarian to the Surrey Institution, a post which he held till 1823. His study of theology and Christian evidences attracted more and more of his attention, and after years of laborious preparation a work on which his reputation rests, the introduction to the Critical Study and Knowledge of the Holy Scriptures," appeared in 3 vols. in 1813. This work at once made him known: it was accepted as an indispensable guide to biblical students, and passed through ten editions in England during his lifetime, and also numerous editions in America. The latest edition was edited by Dr S. Davidson, the Rev. J. Tregelles; and the freer views of Dr Davidson on inspiration led to the revision of the volume which he undertook and completed, and his share of the work was done over again by more "orthodox" hands. In 1819 Mr Horne, though without a university degree, was admitted to holy orders by the bishop of London, and held a London curacy for six years. He was appointed to a rectory in the city in 1825. Meanwhile he had been chosen, in 1824, senior assistant librarian in the department of printed books in the British Museum, and filled that post till the close of 1830. He was also made a prebendary of St Paul's; graduated B.D. at Cambridge, and received the degree of D.D. from the university of Pennsylvania. Died at London, January 27, 1862. A volume of "Reminiscences of T. H. Horne," by S. A. Cheyne, has since appeared.

HORNE TOOKE. [TOOKE, J. HORNE.]
HORNECK, ANTHONY, an eminent divine and learned orientalist, was born at Bacharach, in Germany, in 1641; came to England,

and obtained a prebend in Westminster Abbey, and a chaplainship to the king. He wrote many admirable works on theology and church history, and was an excellent Hebrew scholar. Died 1696.

HORNECK, OTTOCAR, one of the oldest historians in the German language, a native of Styria, lived in the 13th and 14th centuries. About the year 1280, he composed a work on the empires of the world, which concluded with the death of the Emperor Frederick II, and is still extant in manuscript at Vienna. He also wrote a chronicle of the events of his own time, which is said to be rich in portraits of the characters of eminent men, and in descriptions of tournaments and battles, at some of which he was present.

HORNEMANN, FRIEDRICH CONRAD, a celebrated German traveller, born at Hildesheim, in 1772. At the instance of Blumenbach, the famous naturalist, he was, in 1797, employed by the African Association, in London, to explore the interior of Africa. After having visited Cyprus, Alexandria, and Cairo, he crossed the Libyan desert, reached Mourzouk, the capital of Fezzan, and soon afterwards proceeded on an excursion to Tripoli. From this place he set out with the intention of penetrating into Central Africa, and is believed to have died on his return to Fezzan, of a fever caused by drinking cold water, after being exposed to great fatigue. His Journal, which was sent by him from Tripoli, was published in 1802 by the African Society.

HORNER, FRANCIS, barrister-at-law, was born at Edinburgh, in 1778; and educated at the High School and university of his native city. He entered parliament in 1806, and distinguished himself as chairman of the bullion committee; but his severe application to that intricate subject injured his health, which was naturally delicate; and he died, in 1817, at Pisa, whither he had gone for its restoration. Mr Horner's literary talents were of a high order, and he was one of the earliest and most able writers in the Edinburgh Review.

HORROX, JEREMIAH, an English astronomer, was born at Toxteth, in Lancashire, about 1619. He was the first who observed the transit of Venus over the sun's disk, his account of which was published by Hevelius at Dantzic, in 1661, under the title of "Venus in Sole visa, anno 1639, Nov. 24;" and he formed a theory of lunar motion, which Newton did not disdain to adopt. His precocious death, which was a real loss to science, took place soon after he had attained the age of 21 years. Dr Wallis published his posthumous works in 1673.

HORSLEY, JOHN, a learned antiquary, who died in 1731. His work, entitled "Britannia Romana," folio, gives a copious and exact account of the remains of the Romans in Britain.

HORSLEY, SAMUEL, a celebrated English prelate and mathematician, was born in London in 1733; was educated at Westminster School, and Trinity College, Cambridge; and held several livings, in succession, till he arrived at the episcopal dignity. But while he was rapidly rising in the church,

which they refused, and were all expelled, except two. Thus the business stood till September, 1688, when the king, finding that his affairs grew desperate, began to be alarmed, and commissioned the bishop of Winchester to settle the matter regularly and statutely. Dr Hough and the fellows were restored; and in 1690 he was made bishop of Oxford, from whence he removed to Lichfield, and next to Worcester, where, in 1740, he died, honoured for his patriotism, piety, and munificence.

HOVEDEN, ROGER DE, an English historian, who flourished in the reign of Henry II. He wrote Annals in Latin, commencing at 751, the period at which Bede finished, and bringing down affairs to the 3rd year of John, 1201. He is highly esteemed for diligence and fidelity.

HOWARD, CHARLES, Lord Howard of Effingham, lord high admiral of England, was grandson of Thomas, second duke of Norfolk, and was born in 1736. He entered the army early, and distinguished himself in the suppression of the rebellion headed by the earls of Northumberland and Westmoreland, in 1688. He was named lord high admiral in 1685, and, as such, he rendered his country great service in the direction of the preparations against, and the subsequent defeat and dispersion, 1688, of the Invincible Armada. In 1696 he took Cadiz, and destroyed the Spanish fleet there, for which he was created earl of Nottingham. The earl of Essex was commander of the land forces on that occasion. In 1699 Lord Howard was created lieutenant-general of England, and two years later he suppressed the revolt excited by Essex and captured him. He was present at the death of Queen Elizabeth; was sent, in 1604, ambassador to Spain by James I.; retired from public life in 1618, and died in 1624. Throughout his long career he retained, with unstained honour, the esteem and confidence of his sovereign and his countrymen.

HOWARD, LICUT. EDWARD, R.N., the descendant of an ancient and opulent family, was one of the earliest and best of the naval school of novelists. With all the graphic power and stirring eloquence of the other writers of that class, he was, to his honour be it said, wholly free from their too frequent coarseness. "Ratlin the Reefers," "Outward Bound," "The Old Commodore," and "Jack Ashore," attest his powers as a novelist; while his "Life of Sir Henry Morgan, the Buccaneer" gave promise of even higher excellence. Died, 1842.

HOWARD, JOHN, the celebrated philanthropist, was born at Hackney, in 1726. He was apprenticed to a grocer, but his constitution being delicate, and having an aversion to trade, he purchased his indentures, and went abroad. On his return he lodged with a widow lady, whom he afterwards married. After the decease of Mrs Howard, who lived only about three years, he, in 1756, embarked for Lisbon, in order to view the effects of the recent earthquake, but on the passage the ship was taken and carried to France. The hard hips he suffered and witnessed during his imprisonment first roused his attention to the subject of his future labours.

On being released, Mr Howard retired to a villa in the New Forest, and in 1758 he married a second wife, who died in childbed in 1765, leaving him one son. He at this time resided at Cardington, near Bedford, where he indulged the benevolence of his disposition by continually assisting and ameliorating the condition of the poor. In 1773 he cleared, "brought the distress of the prisoners more immediately under his notice," and led him to form the design of visiting the goals throughout England, in order to devise means for alleviating the miseries of the prisoners. Having done so, he laid the result of his inquiries before the House of Commons, for which he received a vote of thanks. He next made a tour through the principal parts of Europe, and published his "State of the Prisons," with a view to render them both more humane and more efficacious. A new subject now engaged his attention, namely, the management of lazarettoes, and the means of preventing the contagious diseases. In this he encountered every danger that can be conceived, and having become personally acquainted with the subject, in 1789 he published "An Account of the principal Lazarettoes in Europe, with Papers relative to the Plague," &c. Actively pursuing this salutary and benevolent object, Mr Howard took up his residence at the town of Cherson, a Russian settlement on the Black Sea. A malignant fever prevailed there, and having been prompted by humanity to visit one of the sufferers, he caught the infection, and died, Jan. 20, 1790. His body was there interred, and every respect was shown to his memory by the Russian authorities.—Edmund Burke, adverting to the merits of this great philanthropist in a speech previous to the election at Bristol, in 1780, thus eulogizes him:—"He has visited all Europe, not to survey the sumptuousness of palaces, or the stateliness of temples; not to make accurate measurements of the remains of ancient grandeur, nor to form a scale of the curiosity of modern art; not to collect medals or to collate manuscripts; but to dive into the depths of dungeons; to plunge into the infection of hospitals; to survey the mansions of sorrow and pain; to take the gauge and dimensions of misery, depression, and contempt; to remember the forgotten, to attend to the neglected, to visit the forsaken, and to compare and collate the distresses of all men in all countries. His plan is original, and it is as full of genius as it is of humanity. It was a voyage of discovery—a circumnavigation of charity." A statue, in a Roman garb, by Bacon, was erected to his memory in St Paul's cathedral. His Life was written by Dr Aikin, and more recently was appeared a Memoir by Mr Hepworth Dixon, and his Correspondence, edited by Field. A portrait of Howard, by Mather Brown, is in the National Portrait Gallery.

HOWARD, SIR ROBERT, an English poet and historian, was the son of Thomas, earl of Berkshire. He was a zealous friend of the revolution of 1688. He wrote several plays, the "History of the Reigns of Ed-

of Great Torrington, and the quietness and devoted him- to the labours of his own testimony public fast-days, a from 9 a.m. till 4 of prayers, reading the Scriptures, sing- of the two sermons delivery. America, with a squadron destined to act against D'Estaing, and, on his return in 1782, he was created an English viscount. In the course of the same year he sailed to the relief of Gibraltar, which he effected in spite of the combined fleets of the enemy. In 1783 he accepted the post of first lord of the admiralty, and in 1788 he was created an earl of Great Britain. In 1793, on the breaking out of the war with France, he took the command of the Channel fleet, and bringing the enemy to an action on the 1st of June, 1794, obtained over them a decisive and most important victory. The rank of general of marines and the vacant garter were both conferred on this successful commander in the course of the next year, which, with a visit from the king on board his ship, who presented him with a valuable sword, were the consummation of his honours. In 1797, Lord Howe exerted himself with great success to quell the mutiny among the seamen at Portsmouth, and died in 1799. There is a Life of Earl Howe, by Barrow; a monument, executed by Flaxman at the national expense, in St Paul's; and a portrait, attributed to Singleton, in the National Collection.

HOWE, Sir WILLIAM, brother of the preceding, succeeded General Gage in the chief command of the British forces in America, having landed at Boston with Generals Clinton and Burgoyne, in May, 1778. General Howe commanded at the attack on Bunker Hill, was besieged in Boston during the next winter, evacuated that town in the ensuing spring, and retired to Halifax. In June, 1776, he arrived at Staten Island, where he was joined by his brother, Lord Howe. Here the brothers informed congress that they had received full power to grant pardon to all the rebels who should return to their obedience; but the commissioners appointed by that body considered both the form and substance of the propositions too objectionable to deserve attention. In August he defeated the Americans on Long Island, and took possession of New York in September. After the campaign of the Jerseys, he set sail from New York, and entered Chesapeake Bay. Having previously secured the command of the Schuylkill, he crossed it with his army, and repelled the attack of the Americans at Germantown. In May, 1778, he was succeeded in the command by General Clinton. Died, 1814.

HOWELL, THE GOOD, or HYWEL DDA, legislator of the Kymry, succeeded his father as prince of Dinevwr, and perhaps also of Powis, about A. D. 910. On the death of Idrwal, prince of Gwynedd, in 943, he acquired his dominions, and thus became acknowledged at least chief, ruler of Wales. He is celebrated as author of a new code of laws, still in use; in the preparation of his code he presided in an assembly of men skilled in the law, and of the higher clergy, at the White House on the Tav, in Carmarthenshire. Some old laws were abolished, some amended, and some retained, and some new ones made: the whole arranged in three parts—the daily law of the palace, the law of the country, and the administration of

each. When all was completed Hywel, in 928 or 926, made a journey to Rome, in company with three bishops and an archdeacon in great repute for learning, and an archdeacon laws to Pope Anastasius, lest anything should be found in them contrary to the law of God, that is, to the canons of the church, and to obtain the papal sanction, which was given. Hywel Dda died in 948 or 950, and in aftertimes was regarded as "the chief and glory of the Britons."

HOWELL, JAMES, miscellaneous writer, was born in 1595, at Abernant, in Caermarthenshire, and after receiving his education at Oxford, travelled on the continent as agent to procure workmen, &c. for a glass manufactory, then for the first time established in England. He was subsequently a member of parliament, secretary to the British ambassador in Denmark, and clerk of the council. For some offence he was imprisoned in the Fleet, but obtained his liberty by applying to Cromwell; became historiographer to Charles II., and died in 1666. He wrote many books; but the one by which he will be longest remembered is, the "Epistolæ Ho-Eliaſæ, or Familiar Letters, domestic and foreign."

HOWLEY, WILLIAM, archbishop of Canterbury, was born at Ropley, in Hampshire, of which parish his father was vicar, in 1766. He was educated at Winchester School, where he had for his teacher Dr Warton, and for a class-fellow William Lisle Bowles, the poet; and after distinguishing himself by the elegance of his academic exercises, he proceeded, in 1783, to New College, Oxford, university with honour and success, till, in 1809, he was appointed regius professor of divinity. This closed his academic career. In 1813 he was nominated bishop of London; and in 1828 translated to the primacy, the onerous duties of which he discharged with zeal and fidelity for 20 years. He seldom took part in the secular discussions in the House of Lords. When bishop of London he supported the bill of pains and penalties against Queen Caroline, laying it down with much emphasis that the king could do no wrong either morally or politically; and, as archbishop of Canterbury, he vehemently opposed the Catholic Emancipation bill, in 1829, as dangerous to the church; and the reform bill, in 1831, as no less dangerous to the constitution. Dr Howley enjoyed, with those who knew him best, a high reputation for scholarship; and the sermons, charges, &c., which he gave to the world, showed him to be possessed of good sense, good feeling, and sincere piety. Died, 1848.

HUARTE, JUAN, a Spanish author of the 17th century, who gained celebrity by a work, entitled "Examen de Ingenios para las Ciencias," which is full of practical wisdom, and has been translated into English, under the title of "The Trial of Wits," and into German by Lessing, as "Prüfung der Köpfe."

HUBER, JOHANN JACOB, a celebrated anatomist, was born at Basel, in 1707. He studied under Haller at Berne, and next at Strasburg; after which he took his doctor's degree at his native place. He assisted

Haller in his great work on the Plants of Switzerland. He obtained the rank of court physician and councillor of state; published a work on the spinal marrow and other parts of the nervous system, entitled "Commentatio de Medulla Spinali;" and died in 1778. There were also several other writers and artists of this name.—**JOHANN RUDOLPH HUBER**, painter, called by Fuseli the *Swiss Titoretto*. Born, 1668; died, 1748.—**JOHANN HUBER**, a Genevese artist, born in 1722. He was a good painter, but devoted much of his attention to the art of cutting profiles, in which he acquired an extraordinary degree of dexterity. He is described as an eccentric character; and, among other fanciful schemes, formed a project for guiding the course of air balloons by the flight of large birds; on which he published a tract, illustrated with plates. Died, 1790.—**THERESA HUBER**, daughter of the celebrated philologist Heyne, and wife of Ludwig Ferdinand Huber, journalist, &c., was a popular German novelist, many of whose works appeared under her husband's name. Born at Göttingen, 1764; died, 1829.—**FRANCIS HUBER**, naturalist, born, in 1750, at Geneva; author of "Nouvelles Observations sur les Abeilles," in which he explains many interesting discoveries which he had made respecting the social organization and habits of bees. Having lost his way on a winter night, the effect of the cold produced total blindness; but the lady whom he afterwards married became his amanuensis. Died at Lausanne, 1831.

HUDSON, HENRY, a distinguished navigator, whose early history is unknown. After making three voyages to find a north-east or north-west passage to China, in the second of which he discovered the river Hudson, he set sail a fourth time, April 17th, 1610, in a bark named the *Discovery*, and proceeding westward, reached, in latitude 60°, the strait bearing his name. Through this he advanced along the coast of Labrador, until it issued into the vast bay, which is also called after him. Here, with his son, and seven infirm sailors, he was turned adrift by a mutinous crew, and was no more heard of.

HUDSON, THOMAS, an English portrait-painter, and one of the most eminent of his time, was born in 1701. He was a native of Devonshire, studied painting in London under Richardson, was very successful in his profession, and had Sir Joshua Reynolds for his pupil. About 1752 he visited Italy, and was at Rome with the sculptor Rubilliac. His portraits are in the manner of Sir Godfrey Kneller, and display little artistic power. One of his best pieces is the family group of the duke of Marlborough. His portrait of Handel, said to be the only one ever taken, is now in the National Portrait Gallery. Died, 1779.

HUERTA, VINCENT GARCIA DE LA, a Spanish poet and critic; born in 1729, at Zafrá, in Estremadura. He acquired considerable fame among his countrymen, and zealously defended Spanish literature from the censures of Voltaire and other French writers. He published various poems and dramas, and edited "Teatro Espanol," in 17 vols. Died, 1797.

HUET, PIERRE DANIEL, a celebrated French critic and classical scholar, born at Caen, in Normandy, in 1630. He was educated in the Jesuits' College, accompanied Rochart to Sweden, and was in vain persuaded to settle there by Queen Christina. In 1670 he was appointed preceptor to the dauphin; and while he filled that situation, he wrote a learned work in defence of Christianity, entitled "Demonstratio Evangelica;" he also published the Latin classics, in 62 vols., with those ample illustrations which made what are called the *Delphin* editions so generally esteemed. In 1689 he was made bishop of Avranches, but resigned that see in 1699, and spent the remainder of his days in literary retirement, producing many works of great merit. He died, at Paris, in 1721.

HUGH CAPET, founder of the third race of French monarchs, was count of Paris and Orleans. He was proclaimed king of France at Noyon, in 987, and died in 996, aged 57.

HUGHES, JOHN, an English poet, dramatic author, and essayist; born, 1677; died, 1720. His last work was, the "Siege of Damascus," a tragedy, which was first acted on the night of the author's death, and was long a favourite. Several papers in the *Tatler*, *Spectator*, and *Guardian* were written by Hughes.

HUGTENBURG or **HUCHTENBURG**, **JAN VAN**, a Dutch painter, born, 1646, and especially distinguished for his battle-pieces. He painted a series of pictures illustrative of the victories of the duke of Marlborough and Prince Eugene. Died, 1733.

HUMBOLDT, WILHELM VON, a distinguished statesman and philologist, the elder brother of the great philosopher and traveller, Alexander von Humboldt, was born at Potsdam, 1767. He received his early education at Berlin, and studied at Göttingen and Jena, where he formed a friendship with Schiller, which lasted through life. In 1800 he was appointed Prussian minister at the papal court, where his love of antiquarian and classical pursuits necessarily received a fresh impulse; and on his return, in 1806, he was created a councillor of state, and nominated minister of education. In 1810 he went as plenipotentiary to Vienna, and he shared in all the great diplomatic transactions of the next few years.—Prague.—at the conferences of Castillon, where he signed the capitulation of Paris, along with Hardenberg,—and at the congress of Vienna, &c. He next went as ambassador extraordinary to London; assisted at the congress of Aix-la-Chapelle, in 1818; and the following year he became a member of the Prussian cabinet, but he soon retired in consequence of the retrograde policy pursued by his colleagues, and thenceforward lived chiefly at his seat, Tegel, near Berlin, in the cultivation of literature and science. It would be impossible within our limits to give a list of his numerous productions. His works were collected by his brother Alexander, and printed in 1841, in 4 vols. They are of a most miscellaneous character, and show the extraordinary versatility of his powers; but his chief fame rests on his

erudite research especially the American, and we forget to mention his amiability "Letters to several translators have appeared HUMBOLDT ALEXANDER of his time, we same year that duke of Wellin gushed persons fort-on-the-Odd and at the Minin the earliest per physical inquiry tivated by the geology, and gr became acquaint whose "Deline lands" he attri of his desire to pany with whom held a mining several years, but ing various parts where he became Soon afterwards a scheme for the this falling, they tide tour of Spa five years they geographically e Orinoco, and the Cordilleras, a sonal risk, succe borazo to a gre been reached bef Havre, rich in e valuable collecti parment of the bold then fixed commenced a ser in almost every science. erudite researches into philology, and more especially the Basque, Sanscrit, North American, and Malay languages; nor should we forget to mention, as most illustrative of his amiability and excellence of heart, his "Letters to a Female Friend," of which several translations, more or less complete, have appeared in England. Died, 1855.

HUMBOLDT, FRIEDRICH HEINRICH ALEXANDER VON, the greatest naturalist of his time, was born at Berlin, 1789, the same year that gave birth to Napoleon, the duke of Wellington, and many other distinguished persons. He was educated at Frankfurt-on-the-Oder, Göttingen, at Hamburg, and at the Mining School of Freiberg. From the earliest period he evinced a faculty for physical inquiry, which he assiduously cultivated by the study of chemistry, botany, geology, and galvanism. At Göttingen he became acquainted with George Forster, to whose "Delineation of the South Sea Islands" he attributes the earliest excitement of his desire to visit the tropics, and in company with whom he made his first tour. He held a mining appointment at Baireuth for several years, but resigned it, and after visiting various parts of Germany, went to Paris, where he became the friend of Bonpland. Soon afterwards he formed with Bonpland a scheme for the exploration of Africa. But this falling, they resolved to make a scientific tour of Spanish America; and during five years they examined geologically and geographically every part of Venezuela, the Orinoco, and the Rio Negro; visited Bogota, the Cordilleras, and Quito, and, at great personal risk, succeeded in climbing the Chimborazo to a greater height than had ever been reached before. In 1804 they landed at Havre, rich in experience, and with an invaluable collection of objects in every department of the natural sciences. Humboldt then fixed his residence at Paris, and commenced a series of gigantic publications in almost every department of physical science. Having visited Italy in 1818, with Gay-Lussac, and afterwards England in 1820, he took up his residence a few years later in Berlin, and enjoyed the personal favour and most intimate confidence of the sovereign, who made a Count of him, and intrusted with more than a diplomatic mission. In 1829, at the persuasion of the czar, he visited Siberia and the Caspian Sea, in company with Gustav Rosen and Ehrenberg. On his return he took up his residence at Berlin, and continued to give to the world the results of his vast research and experience. With a mind in which was treasured up every observation or conjecture of preceding philosophers, he set out measuring heights of mountains, noting temperature, collecting plants, dissecting animals, and every where pressing forward to penetrate the meaning of the relations which he found to subsist between the different portions of the organic world and man. To English readers Humboldt is best known by his latest work "Kosmos," in which he contemplates all created things as linked together and forming one whole, animated by internal forces. This work, which would alone suffice to immortalize his name, has given a

powerful impulse to the study of nature by the fascinating garb in which its ideas and observations are clothed. In addition to the general and ultimate gain to man of such an advance in science as Humboldt effected it is to be reckoned the immediate practical benefit of his observations, according to which charts have been constructed, agriculture extended, and territories peopled. The first published work of this patriarch of science was an Essay on the Basalts of the Rhine, which appeared in 1790. Of his subsequent very numerous and important writings we can only name the "Voyage dans l'Intérieur de l'Amérique," a magnificent library rather than a single book, the "Asie Centrale," "Fragmens Asiatiques," the popular "Personal Narrative of Travels in the Equinoctial Regions of America," and "Views of Nature." Died, 1859.

HUME, DAVID, the celebrated historian, philosopher, and miscellaneous writer, was born at Edinburgh in 1711. He was designed for the law, but having no inclination to that profession, he became, in 1734, clerk in an eminent mercantile house at Bristol. He did not, however, continue long there; for, having a strong propensity to literature, he resolved to apply himself to study, and for the sake of seclusion went to France, where he wrote his "Treatise of Human Nature," published at London in 1738. This work, however, excited no interest friendly or hostile on its first appearance. It holds an important place in the history of philosophy, as a lucid, logical development of the sceptical conclusions that flow from the philosophy of John Locke. Hume's "Essays, Moral, Political, and Literary," appeared in 1742 and 1752, and were favourably received. In 1746 he was invited to reside with the young marquis of Annandale, whose state of mind rendered a guardian necessary. Here he spent a year; meanwhile, the chair of moral philosophy in the university of Edinburgh having become vacant, he became a candidate, but failed. In 1748 he became secretary to General St Clair, whom he accompanied to the courts of Vienna and Turin. In 1752 appeared at Edinburgh his "Inquiry concerning the Principles of Morals," which of all his writings he considered the best. In 1754 he published the first volume of his "History of England," which he did not complete till 1761. While this work was in progress he published "The Natural History of Religion," which was attacked by Warburton in an anonymous tract, ascribed at the time to Mr Hurd. His great work, the "History of England," had now acquired considerable celebrity, and the author gained largely by its popularity, for besides the profits it brought him, he obtained a pension through Lord Bute. In 1763 he accompanied the earl of Hertford on his embassy to Paris, from whose fashionable and literary circles he received an enthusiastic welcome; and where, in 1765, he remained as *chargé d'affaires*. The year following he returned home, accompanied by Jean Jacques Rousseau, to whom he behaved with great delicacy and generosity, but was ill-requited by the morbid sensitiveness and suspiciousness which the "philosopher of Geneva" allowed him-

self to indulge against his friend and benefactor. He became under-secretary of state in 1767. In 1769 he retired to his native country on an independent income of £1000 per annum; and died in 1776.

HUME, JAMES DRACON, whose financial reports have earned for him a high reputation, was born in Surrey, 1774. Having obtained a clerkship in the custom-house, he soon became conspicuous for energy and ability; and at length his ability was so highly appreciated by government, that he was appointed to reduce into one code, the innumerable and conflicting statutes relating to our custom's duties. His services were rewarded with a present of £5000; and soon afterwards (in 1829) he was appointed joint assistant secretary to the Board of Trade, which thus secured to itself the benefit of his profound acquaintance with the mercantile system of this country. In 1840 he retired from public life; and the evidence he gave that year before the import duties committee, has been almost universally quoted as an authority without appeal. Died, 1842. There is a "Life of J. D. Hume" by Charles Badham.

HUME, JOSEPH, whose name is indissolubly associated with the parliamentary history of England, was born in Montrose in 1771. While very young he lost his father; but his mother, a woman of superior intelligence, placed him in a good school, where he obtained an elementary training that prepared him for entering upon his professional studies with advantage. After his apprenticeship to a surgeon in his native town, he went through the regular medical curriculum at the university of Edinburgh, and graduated as M.D. in 1796. Soon afterwards he entered the service of the East India Company as a naval surgeon, and in 1803, during the Mahratta war, his knowledge of the languages of India enabled him to join the office of interpreter to his other duties; while, owing to his surpassing energy and indefatigable perseverance, he at the same time discharged with efficiency the duties of paymaster, postmaster, and commissariat officer. His career in India terminated in 1808. The next two years he spent in visiting Spain and Portugal, then the theatre of war, and the coasts and islands of the Mediterranean. On his return to England in 1811, he obtained a seat in parliament as M.P. for Weymouth, but retained it less than a year. From 1812 to 1818, he remained out of parliament; but during these six years he laboured diligently, as a proprietor of East India Stock, to reform the abuses of our Indian system, and in promoting the cause of education, in establishing Saving Banks, and aiding in many other good and useful works, both on the platform and in the press. In 1818 he was elected for the Aberdeen district of burghs. No sooner had he entered the House of Commons than he commenced his crusade against financial abuses. He commenced it almost single-handed, and for a long time he could number few supporters in the House of Commons. But he was neither to be dismayed nor put down. Nature had not made him an orator, and the glib speakers of the House, and turners of spark-

ling paragraphs in the press, attempted to laugh him into silence. But in spite of sneers and frowns he persisted in his course; his minorities at last became majorities; and the great triumph of his long parliamentary career will be that he taught the House of Commons to exercise in reality its functions as auditor of the national accounts. In 1830 he was elected for the county of Middlesex, which he represented till 1837, when he was replaced by Colonel Wood, a staunch Tory, Mr Hume finding his way into parliament for Kilkenny, which O'Connell placed at his disposal. From 1842 till his death he represented his native district of Montrose. Mr Hume's personal history, taken at a *coup d'oeil*, is a most striking illustration of energetic perseverance. Born poor and unfriended, he acquired at least two regular professions, made a large fortune, and, after all that, sat for more than forty years in the House of Commons, working harder, and speaking oftener, until his very last month, than any man that ever laboured in that busy place. Religious toleration, parliamentary reform, universal education, free trade, and every scheme of popular improvement, found in him an uncompromising champion and advocate. Long before the close of his career, he had the gratification to hear his disinterested services eulogized by the greatest statesman of his age;—and it is not a little curious that among the strange party combinations that have of late been witnessed in England, no exalted office should have been found for a man whose personal character was unimpeachable, whose talents were acknowledged, and most of whose views, political, economical, and financial, maintained with unflinching constancy for a long series of years, were finally sanctioned by the Legislature. In his private relations, he faithfully discharged every duty of kindred and connection; and it is a fact scarcely more pleasing than strange, that he carried, through forty years of incessant strife, and through storms of contumely and ridicule, a placid good-nature, unembittered by one vindictive feeling. Died, 1855.

HUMMEL, JOHN NEPOMUK, an eminent musician, was born at Presburg, in 1778. His friends discovering in him an extraordinary capacity for music, he was placed with Mozart when only seven years of age; and after remaining under his roof about two years, he travelled with his father through various parts of Europe, visiting England in 1791, where his performances on the pianoforte were highly applauded. He soon acquired great celebrity as a composer as well as a performer. In 1820 he became chapel-master to the grand-duke of Weimar, where he continued afterwards to reside, making, from time to time, profitable tours in Germany, Russia, and England. Hummel composed several operas, the most celebrated of which is "Mathilde von Gulse;" his church music was also admirable; but his fame will chiefly rest upon his compositions for the pianoforte. He died in October, 1837.

HUMPHREY, LAURENCE, a learned divine, was born at Newport Pagnel, in Buckinghamshire, about the year 1527. He

studied at Oxford, professor of divinity, and dean of Magdalen College; he was successively dean of Exeter, and might have been a puritanical prelate, but for his leaving several bishoprics, and being succeeded by Bishop Jewel.

HUMPHRY, a Dutch painter, was born in 1743. He first came to London, by the invitation of Joshua Reynolds, and was afterwards where he was employed by W. Jones and others, chosen one of the founders of the Asiatic Society. Died, 1800.

HUNNIADES, a Transylvanian nobleman, king of Lachlan, killed the emperor in the beginning of the 10th century, and fought against the emperor for many years, and was able to them, the emperor's Devil. He was killed after the death of the emperor in 1445, the young emperor held prisoner by Hunniades, and returned to his country. Hunniades lost the greatest achievement of his life, the sultan Mahomet, to raise the siege of Constantinople in 1456. So great was the victory, that it was called the conquest of heaven, whose name was given in 1456, the acknowledgment of the emperor's cause.

HUNNIS, WILLIAM, a Queen Elizabeth, a moral and religious contemporary of the poets sweetest. He was passed into oblivion, and his author who could extract the book of Genesis, "Money," or describe the money as "A Handwritten," might to have the poet's sonnets "delicious." HUNT, HENRY, a man, Wiltshire, about the year 1700, he was well known as a regular attendant at the court. When Mr Hunt was a decided loyalist, his country was approached, he tendered his entire services to the government, and was rewarded; besides which, with three servants, he was equipped, and at his own expense, to any regiment of foot, he first charge upon the field, he proffered service in the lord-lieutenant's army; but, owing to the quarrel between Lord B. and himself, he challenged himself, which he was indicted, and found guilty, and

studied at Oxford, where he became Regius professor of divinity, and fellow and president of Magdalen College. He was successively dean of Gloucester and Winchester, and might have been a bishop but for his puritanical principles. He died in 1690; leaving several scholarly works, a "Life of Bishop Jewell," &c.

HUMPHRY, OZIAS, an eminent miniature painter, born at Honiton, Devon, in 1743. He first settled at Bath; then came to London, by the advice of his friend, Sir Joshua Reynolds, and was made a Royal Academician. In 1785 he went to India, where he was held in high esteem by Sir W. Jones and Warren Hastings, and was chosen one of the first members of the Asiatic Society. Died, in London, in 1810.

HUNNIADIS, JOHN CORVINUS, valvode of Transylvania, and general of the armies of Ladislaus, king of Hungary, was born in the beginning of the 15th century. He fought against the Turks heroically, and for many years rendered himself so formidable to them, that they surnamed him the Devil. He was named regent of Hungary, after the death of Ladislaus IV., in May, 1445, the young heir to the throne being held prisoner by the emperor. On his release and return to his dominions, in 1453, Hunniadis lost his influence. One of his greatest achievements was his victory over the sultan Mahomet II., whom he compelled to raise the siege of Belgrade in the summer of 1456. So great was the enthusiasm excited by this victory that it was commonly said of the conqueror, "A man was sent from heaven, whose name was John." He died in 1456, the acknowledged hero of the Christian cause.

HUNNIS, WILLIAM, chapel-master to Queen Elizabeth, and a voluminous writer of moral and religious poetry. He is said, by a contemporary poet, to have "depainted sonnets sweet." His sonnets, however, have passed into oblivion; but, certainly, the author who could entitle a metrical version of the book of Genesis, "A Hive full of Honey," or describe a volume of psalms and hymns as "A Handful of Honeysuckles," ought to have the power of rendering his sonnets "deliciously nectarous."

HUNT, HENRY, M.P., was born at Upwey, Wilts, about the year 1773, where he was well known as an opulent farmer, and a regular attendant at the Devizes market. When Mr Hunt was a young man, he was a decided loyalist; and in 1801, when the country was apprehensive of an invasion, he tendered his entire stock, worth £20,000, to the government, for its use, if it were needed; besides which he engaged to enter, with three servants well mounted and equipped, and at his own cost, as volunteers into any regiment of horse that might make the first charge upon the enemy; and for this proffered service he received the thanks of the lord-lieutenant of the county. Mr Hunt joined the Marlborough troop of cavalry; but, owing to some misunderstanding between Lord Bruce, its commander, and himself, he challenged his lordship; for which he was indicted in the court of King's Bench, found guilty, fined £100, and impris-

oned six weeks. Mr Hunt became afterwards a "radical reformer," associated with the most disaffected, and was looked up to by many of them as the fearless champion of their party. As "lord of the manor of Glas-tonbury" he acted fairly at his court-leet; and, as a mob orator, he obtained notoriety; but a radical meeting at Manchester, where he presided and declaimed, having ended with loss of life and limb to many of the assembled multitude, he was indicted as the ringleader of an unlawful assembly of the people; tried, found guilty, and sentenced to 3 years' imprisonment in Ilchester gaol. But, though in confinement, he was not idle; he discovered and made known to the public some flagrant malpractices going on at the gaol, which, through his means, were afterwards corrected. He long tried for a seat in parliament, but was unsuccessful at Bristol, Westminster, and for the county of Somerset. He was, however, twice elected for Preston, in 1830-1; but, the year after his second return, his constituents declined his future services. He was seized with paralysis while alighting from his phaeton at Alresford, Hants, where he died, Feb. 12, 1835.

HUNT, LEIGH, born October 19, 1784, died on the 28th of August, 1859, the last of that band of poets which shed a contemporaneous lustre on the early part of the present century. He was the personal friend of Byron, Shelley, Hazlitt, Lamb, and Coleridge, and he is known not only as a poet and an essayist, but also as a political writer. In this latter capacity he came more than once before the public. In 1811 he was tried and acquitted for some remarks on the subject of flogging in the army, published in the "Examiner," a journal which he had founded. He was afterwards sentenced, with his brother, to a fine of £500 and two years' imprisonment for an alleged libel against the Prince Regent. Offers to remit these penalties on a promise to refrain from similar expressions for the future were firmly rejected; and on the expiration of their sentence they continued to write as before in the "Examiner." Subsequently he lived for four years in Italy, whither he had gone to set up the "Liberal." The "Story of Rimini" is his longest and perhaps his best known poem; and among his miscellaneous works may be mentioned his Autobiography, and his essays, entitled "Men, Women, and Books," "Imagination and Fancy," "Wit and Humour," &c. His "Correspondence" has been edited by his eldest son.

HUNT, WILLIAM, one of the best of English water-colour painters, was born in London in 1790. He was for seven years the pupil of Varley, and practised at first landscape-painting, sometimes in oil, but finally applying all the powers of his genius to the boys and girls, and simple fruit and flower pieces. He was chosen a member of the Society of Painters in Water-Colours in 1827, and from that time till death was one of the most indefatigable contributors to the exhibitions of the Society, his works forming, as a contemporary critic has said, an almost innumerable series of small masterpieces.

He was a passionate lover of nature, and sought always faithfully to reproduce in art her forms, colours, and most subtle effects. In his chosen field he stood, and stands, alone. He was a patient student to the end, and by his efforts after higher and exacter truth he was led on to important improvements in the technical methods of his art. Died, February 10, 1864. A Biography of this artist, by F. G. Stephens, is forthcoming. (Dec. 1863.)

HUNTER, HENRY, a Scotch Presbyterian divine, was born at Culross, in Perthshire, in 1741; was educated at the university of Edinburgh, and became tutor to the sons of Lord Dundonald. He was subsequently pastor of the Scottish Church, London Wall, and was elected secretary to the corresponding board of the Society for Promoting Christian Knowledge in the Highlands. He was the author of "Sacred Biography," 7 vols. 8vo; and translated Sonnini's *Travels*, St Pierre's *Studies of Nature*, Lavater's *Physiognomy*, and other French works. Died, 1802.

HUNTER, WILLIAM, a celebrated anatomist and physician, was born at Kilbride, in Lanarkshire, in 1718. His father was a farmer, and designed him for the church; but an acquaintance with Dr Cullen inclining him to the study of physic, he resided with the doctor 3 years. In 1740 he removed to Edinburgh, where he followed his studies with intense application, and the year following visited London, soon after which he was taken by Dr James Douglas into his house as a dissector, and also tutor to his son. In 1746 he succeeded Samuel Sharpe as lecturer to a society of surgeons in Covent Garden, and commenced a series of lectures on anatomy and surgery. He soon rose into extensive practice in surgery, and in 1764 was appointed physician extraordinary to the queen. He was elected F.R.S.; became physician to the British Lying-in-Hospital; and on the foundation of the Royal Academy, the king appointed him professor of anatomy. In 1770, Dr Hunter completed his house in Great Windmill Street, attaching to it a theatre, apartments for lectures and dissections, and a magnificent room as a museum. His valuable museum is now in the university of Glasgow. He wrote several able works on medical subjects, the most elaborate of which is "The Anatomy of the Gravid Uterus." Died, 1783.

HUNTER, JOHN, one of the most distinguished surgeons of modern times, younger brother of the preceding, was born in 1728, and apprenticed to a cabinet-maker; but, hearing of William's success in London, he offered his services to him as an anatomical assistant. In a few months he had attained such a knowledge of anatomy as to be capable of demonstrating to the pupils in the dissecting-room. In 1753 he entered as a gentleman commoner of St Mary's Hall, Oxford; but he could not have pursued his academical studies with much advantage, as in the following year he became a surgeon's pupil at St George's Hospital. He made astonishing progress, but his health being impaired by intense study, he went abroad in 1760, as staff-surgeon, and served

at Belleisle and in Portugal. On his return to London, he pursued his inquiries into comparative anatomy, and erected a manergerie for that purpose at Brompton. In 1767 he was chosen a fellow of the Royal Society, and the next year he was elected one of the surgeons of St George's Hospital. In 1776 he was appointed surgeon-extraordinary to the king; and, subsequently, inspector-general of hospitals and surgeon-general. He died suddenly, having been seized with a spasmodic affection of the heart, in St George's Hospital, Oct. 16, 1793. He wrote several professional treatises, besides recording the results of many of his valuable discoveries in the *Philosophical Transactions*. His perfect acquaintance with anatomy rendered him a bold and skilful operator; but his great fame rests on his researches concerning comparative anatomy, and the structure of the various classes of organized beings. His anatomical museum was purchased by government for £16,000, and transferred to the Royal College of Surgeons, for the use of the public. The portrait of John Hunter was painted by Sir Joshua Reynolds, and is now in the College of Surgeons. It is sadly decayed; but a copy of it, made by Jackson while it was sound, is now in the National Collection.

HUNTER, JOHN, LL.D., an eminent classical scholar, was born at Clooseburn, Dumfriesshire, in 1747. He was principal of the united college of St Salvador and St Leonard; and for more than half a century previous to his obtaining that appointment, he was professor of humanity in the university of St Andrew's. He was one of the most learned men of his time, and was well known by his editions of Virgil, Livy, Horace, and other Latin authors. Died, 1837.

HUNTINGDON, HENRY OF, an early English historian, who flourished in the 12th century. He composed a general history of England from the earliest times to the death of King Stephen, in 1154, the later portions of which were written from his own personal observation. This work forms part of a collection published by Sir Henry Savile in 1596.

HUNTINGDON, SELINA, Countess of, the second daughter of Washington, Earl Peppers, was born in 1707, and married in 1728 to Theophilus, earl of Huntingdon. After she became a widow, in 1746, she espoused the principles of the Calvinistic Methodists, and patronized the famous George Whitefield, whom she made her chaplain; by the influence of her rank and fortune, appearing at the head of a sect; and, after the death of Whitefield, his followers were designated as Lady Huntingdon's Connexion. She founded schools and a college for preachers, and expended annually large sums not only in their support, but in private charity. Died, 1791. "Memorials" of the Countess have been published by A. H. New.

HUNTINGDON, WILLIAM, a religious enthusiast, who attained great notoriety, was born in 1744. He was the son of a farmer, labourer in Kent, and the early part of his life was passed in menial service and other humble occupations. After indulging in

vice and dissipation, according to his vices, and becoming a Calvinistic Methodist at one time to beaver at Thames in religious countenance of tract head of a sect. numerous, and so details relative to religious experience. His first wife, he married Sir James Sande and passed the last years of his life in seclusion. After his death he was interred in the church of St. S. S., or *Sinner's* Church, in 1813.

HUNTINGFORD, JOHN, was born at Winchester, and received his education at Oxford; and subsequently served under Dr Johnson in which he afterwards spent a period of his life in the patronage of Lord North, and was the pupil at Winchester of Gloucester in 1815. This was the author of "Grassroots of the Union with the States," and "Thoughts on the Profound Knowledge of the Truly poetical taste of the admirable qualities of humility, united with a spirit of public utility." Died, 1822.

HUNTINGTON, REGINALD divine, born in 1670, and educated at Cambridge, and seven years in the office of chaplain to the king; and during his travels in Palestine, Egypt, and the East, he was the purpose of producing a large number of MSS. in the Bodleian Library. He was the author of "The History of the Monasteries of the Kingdom of England." After 10 years' protracted study, then held a high office before his death. He was bishop of Raphoe, in 1711.

HUPAZOLI, FRANCIS, one of the few men who were distinguished by their talents. He was born in 1711, and died in 1781. He was a clergyman, and after having been appointed Venetian consul in 1754, he married his 5th wife, whom he married in 1754. He had 4 children, but he never smothered his family game and deal of the juice

er indulging in

vice and dissipation for several years, ac-
cording to his own account, he was con-
verted, and became a preacher among the
Calvinistic Methodists. He was compelled
at one time to earn his bread as a coal-
heaver at Thames Ditton. He soon engaged
his religious controversies, published a vast
number of tracts, and was regarded as the
head of a sect. His publications are very
numerous, and some of them contain curious
details relative to his personal history and
religious experience. After the death of his
first wife, he married the wealthy relict of
Sir James Sanderson, a London alderman,
and passed the latter part of his life in afflu-
ence. After his conversion, he generally
appended to his name the mystical letters,
E. S., or *Sinner Saved*. He died at Tunbridge
Wells in 1813. His portrait, by Pellegrini,
is in the National Portrait Gallery.

HUNTINGFORD, GEORGE ISAAC, bishop
of Hereford, a distinguished classical scholar,
was born at Winchester in 1748; received
his education there, and at New College,
Oxford; and subsequently became an assist-
ant under Dr Joseph Warton, in the seminary
in which he had been educated, and
after which he afterwards presided as warden
for a period of 40 years. Through the
patronage of Lord Sidmouth, who had been
his pupil at Winchester, he obtained the
see of Gloucester in 1802, and that of Here-
ford in 1815. This venerable prelate was
the author of "Greek Monstrophics," "A
Call for Union with the Established Church,"
"Thoughts on the Trinity," &c. With a
profound knowledge of Greek literature and
truly poetical taste, he possessed the more
valuable qualities of Christian piety and
humility, united with an independent mind,
and a spirit of pure benevolence. Died,
1837.

HUNTINGTON, ROBERT, a church of
England divine, born in Gloucestershire in
1666, and educated at Oxford. He spent
seven years in the East, being appointed
in 1670 chaplain to the English factory at
Aleppo; and during that period he travelled
to Palestine, Egypt, and Cyprus, chiefly for
the purpose of procuring oriental manu-
scripts. He obtained and brought home a
very large number, which are now in the
Asiatic Library. It is remarkable that the
Latin version of the Ignatian Epistles,
written by Dr Cureton, was discovered in one
of the monasteries vainly visited by Dr
Huntington. After his return he was for
some years provost of Trinity College,
Oxford; then held a rectory in Essex; and
shortly before his death was appointed
bishop of Raphoe, in Ireland. Died there,
1731.

HUPAZOLI, FRANCIS, centenarian, and
one of the few men who have lived in 3 cen-
turies. He was born in 1687, at Casal, in
Sardinia, and died in 1702. At first he was
a clergyman, and afterwards became a mer-
chant at Scio; and, in his 23rd year, he was
appointed Venetian consul at Smyrna. By
his sixth wife, whom he married at the age of
15 years, he had 4 children. His drink was
water; he never smoked, and ate little
principally game and fruit. He drank a
good deal of the juice of the root of viper's

grass, ate but very little at night, went to
bed and rose early, then heard mass, and
walked and laboured the whole day to the
last. He wrote down everything remark-
able which he had witnessed, in 22 volumes.
He never had a fever, was never bled, and
never took any medicine. At the age of
100, his grey hair again became black.
When 100 years old, he lost his teeth and
lived on soup; and, 4 years later, he cut two
new teeth, and began again to eat meat.

HURD, RICHARD, an eminent English
prelate, was born in 1720, at Congreve, in
Staffordshire; was educated at Emmanuel
College, Cambridge, and obtained a fellow-
ship there in 1742. In 1749 he published
"Horatii Ars Poetica," with an English
commentary. In 1760 he published a com-
mentary on the Epistle of Horace to Augus-
tus; and also a satirical attack on Doctor
Jortin, in defence of Warburton, in an
essay on the "Delicacy of Friendship,"
in which he afterwards endeavoured to sup-
press. His "Dialogues, Moral and Political,"
with "Letters on Chivalry and Romance,"
appeared, at different times, from 1758 to
1764, and were republished collectively in
1765, 3 vols. 8vo. None of his works at-
tracted so much notice as the Dialogues,
which were translated into German. In
1767 he was made archdeacon of Gloucester,
and, in 1768, commenced a series of sermons
on the prophecies, preached at the lecture
coln's Inn. In 1775 he was raised to the
bishopric of Lichfield and Coventry, and
not long after, was made preceptor to the
prince of Wales, and his brother, the duke of
York. He was translated to the see of
Gloucester in 1781; and the king was desirous to
modestly decline the intended honour.
Dr Hurd's latest literary performances were
a biographical sketch of his friend Dr War-
burton, his correspondence, and an edition
of his works. Died, 1808. A Life of Bishop
Hurd, by F. Kilvert, has recently appeared.

HUSKISSON, the Right Hon. WILLIAM,
an English statesman, was born in 1770.
His father becoming a widower, and marry-
ing again, the son was placed under the care
of his uncle, Dr Gem, who took his nephew
with him to France, for the purpose of study-
ing medical science at the Parisian schools of
anatomy. The revolution broke out directly
after, and young Huskisson became one of
its warmest disciples: it is said, indeed, that
he was present at the taking of the Bastille.
In 1790 he obtained an introduction to Lord
Gower, the English ambassador at Paris,
who made him his private secretary; and on
his return to England he was introduced to
Mr Pitt, and made himself agreeable to that
minister by his ability and eloquence. He
was soon after placed at the head of the
alien office; and in 1795 became under-
secretary in the war and colonial depart-
ment. He was brought into parliament for
Morpeth, by government interest, in 1797;
from which time he connected himself on
terms of friendship with Mr Canning, and
supported all the measures of the Pitt ad-
ministration. He retired with his patron,
as did Mr Canning, during the Addington

ministry, and claimed a pension of £1200 per annum. He subsequently lost his seat for Merpeth; offered for Dover; failed, and was returned for Liskeard on Pitt's restoration to power, and the renewal of the continental war. During the Whig administration of 1806, Mr Huskisson was an active member of the opposition; but on its dissolution he returned to office, and remained till the premiership of the duke of Wellington, with the short exception of an interval in 1809, when the quarrel took place between Mr Canning and Lord Castlereagh, and he sided with the former in withdrawing from the government. When Mr Canning was appointed to the government of India, Mr Huskisson succeeded him as member of parliament for Liverpool; was successively treasurer of the navy, joint secretary of the treasury, vice-president and president of the Board of Trade, and was colonial secretary during the Liverpool and Canning administrations. It was during this latter period that he brought forward his celebrated free-trade measures, which caused such diversities of opinion throughout the country, but which were the forerunners of the more thorough and important measures of the same kind which have since been carried and are now universally approved. Mr Huskisson died at Manchester, Sept. 15, 1830, in consequence of the severe injuries he sustained from the wheels of a locomotive steam-engine coming in contact with him, while present at the celebration of the opening of the Liverpool and Manchester railway. There is a portrait of Huskisson, by Rothwell, in the National Portrait Gallery.

HUSS, JOHN, one of the reformers before the Reformation, was born at Hussinatz, in Bohemia, about 1375. He was of a poor family, but through the kindness of a wealthy seigneur, was sent to study at the university of Prague, where he graduated M. A. He entered the church, and was ordained priest in 1400, and soon began propagating the doctrines of Wycliffe. In his bold course he was encouraged by King Wenceslaus and his queen, Sophia, to whom he was confessor. In 1409 he was named rector of the university; was soon after suspended from his office of priest, and continuing to preach in the fields and in houses, against the pope, the authority of tradition, indulgences, &c., was denounced at the court of Rome, and on his failing to answer the charges made against him, was excommunicated by Alexander V. Tumults occurring in Prague between the followers of Huss and the Romish party, Huss retired for a time to his native village. When Pope John XXIII. proclaimed a crusade against Ladislaus, king of Naples, Huss boldly condemned the pope; was again cited to Rome, and at last, in 1414, to the council of Constance. Thither, trusting to the safe-conduct given by the Emperor Sigismund, he went. Unshaken by entreaties or by terrors, he was arrested, degraded from the priesthood, delivered over to the secular arm, and burnt, in July, 1415. His disciple, Jerome of Prague, met a like end in the following year. Their death provoked the Hussite

war in Bohemia, in which Zizka distinguished himself, and which lasted till 1431.

HUSSEY, RICHARD. [VIVIAN, Lord.] HUTCHESON, FRANCIS, LL.D., philosopher, sometimes considered as the founder of the Scottish school, was the son of a dissenting minister in Ireland. He was born in 1694; studied at Glasgow; and on his return to Ireland, officiated in a dissenting congregation, for some time, in the northern part of that kingdom; but, in 1729, he was elected professor of moral philosophy at Glasgow. He had previously published "An Inquiry into the original of our Ideas of Beauty and Virtue," and a "Treatise on the Nature and Conduct of the Passions." In 1755, his son, Dr FRANCIS HUTCHESON, a physician of Glasgow, printed from his father's papers, "A System of Moral Philosophy," 2 vols. 4to; to which is prefixed an account of the author. Died, 1747.

HUTCHINS, JOHN, an English divine and topographer, was born in Dorsetshire, in 1696, and died in 1773. He was the author of the "History and Antiquities of the County of Dorset," 2 vols.

HUTCHINS, THOMAS, geographer-general to the United States of America, was born in New Jersey, about 1730. He served in the army against the Indians in Florida; was imprisoned in England, in 1779, on the charge of having corresponded with Dr Franklin, then American agent in France; afterwards joined the army of General Greene; and died at Pittsburgh, in 1780. He published several topographical and historical works of considerable interest.

HUTCHINSON, JOHN (Colonel HUTCHINSON), governor of Nottingham Castle in the civil war of the 17th century, was born at Nottingham, in 1616. He was son of Sir Thomas Hutchinson, of Owthorpe, a member of the Long Parliament, was educated at Peterhouse, Cambridge, studied law for a short time at Lincoln's Inn, and, in 1638, married Lucy, daughter of Sir Allen Aspley, lieutenant of the tower of London. He settled at Owthorpe in 1641, was soon known for his sympathies with the popular party, became a lieutenant-colonel in the parliamentary army in 1642, and in the following year was appointed governor of Nottingham Castle. In 1645, he was chosen member of parliament for Nottingham, acted with the Independents, had several interviews with Cromwell, was member of the High Court of Justice for the trial of Charles I. and afterwards of the Council of State. He was a true patriot, honest, and earnest in his endeavours to serve the best interests of his country, an uncompromising republican, thoroughly brave, high-minded, and unaffectedly pious. He was discharged from parliament at the Restoration, and from all offices of state for ever, and retired to Owthorpe. In October, 1663, he was arrested and imprisoned at Newark, thence carried to the Tower, and in the next year removed to Sandown Castle, where he fell ill and died, Sept. 11, 1664. His noble wife was refused permission to share his confinement. She wrote the Memoirs of his life, which form one of the most charming volumes of biography in our literature. It was first published in 1804.

HUTCHINSON, natural philosopher, in 1674. He d opponent on scr tonian system, gravitation and of a plenum. H ment contained religious truth, natural philosophy of it must be not wrote numerous defence of his vie of them appear His followers wa sect, but many di Died, 1737.

A New Universal Biography.

HUTCHINSON, JOHN, theologian and natural philosopher, was born in Yorkshire, in 1674. He distinguished himself as an opponent on scriptural grounds of the Newtonian system, rejecting the doctrine of gravitation and maintaining the existence of a plenum. He held that the Old Testament contained not only the revelation of religious truth, but a complete system of natural philosophy, and that interpretation of it must be not literal but allegorical. He wrote numerous treatises in exposition and defence of his views, and a complete edition of them appeared in 12 vols. 8vo in 1748. His followers have not formed a separate sect, but many divines embraced his opinions. Died, 1737.

HUTCHINSON, JOHN HELY, earl of Donoughmore, born in 1757, was the second son of John Hely Hutchinson, an Irish secretary of state. He entered the army in 1774 as a cornet in the 18th dragoons, and rose regularly till he obtained a lieutenant-colonelcy in the 7th, in 1783. At the commencement of the French revolutionary war he found means for gaining access to the French camp, and saw Lafayette compelled to leave those troops of which he had been the favourite, and seek safety in flight. When war was declared against France in 1793, he raised a regiment, and obtained the rank of colonel. He served in Flanders as aide-de-camp to Sir Ralph Abercromby, and subsequently in Ireland during the rebellion. In 1796 he was made a major-general, and in 1799 he was wounded at the Heider, while leading in his brigade in gallant style. In the expedition to Egypt, in 1801, he was second in command to Sir Ralph Abercromby; and when that gallant officer fell at the battle of Alexandria, the chief command devolved on Major-general Hutchinson; who, receiving reinforcements, advanced upon the enemy, and having pursued them to Cairo, a capitulation took place, and the expedition terminated in an agreement for the French to evacuate Egypt. For his able services in this campaign he was raised to the peerage as Baron Hutchinson of Alexandria, and of Knocklofty, in the county of Tipperary, with a pension of £2000 per annum. In 1806 he was sent on an extraordinary mission to the Prussian and Russian armies; afterwards to the court of St Petersburg; and, at a later period, to meet Queen Caroline at St Germer's, as the personal friend of the king. In 1813 he became full general, and in 1825 succeeded his brother as earl of Donoughmore, &c. Died, 1832.

HUTCHINSON, THOMAS, lord chief justice, and afterwards lieutenant-governor, of the colony of Massachusetts, was born at Boston, in 1711. He was greatly respected in his province for his able and irreproachable conduct on the bench; but was covertly taken part with Great Britain against the American colonies, and when the English ministers advice relative to the enforcement of the duty on tea, it was found necessary to remove him and the General Gage his successor. He accordingly came to England, lived in a retired manner at Brompton, and died there in 1793. Governor Hutchinson was author of a

"History of the Colony of Massachusetts Bay," &c.

HÜTTEN, ULRICH VON, knight, poet, and theologian, and one of the boldest promoters of the Great Reformation. He was born of a noble family at the castle of Steckelberg, in Franconia, in 1488. After spending five years at the monastic school of Fulda, he ran away, persuaded that he could better serve God and man than by being a monk. He travelled over Europe, served in the Austrian army, and made himself widely known as the avenger of the shameful murder of his cousin, John Hutten, by the duke of Württemberg. He was head of the league of statesmen, preachers, and scholars, formed to oppose the "Obscurantists," or monkish persecutors of the great Hebraist Reuchlin, and had the chief hand in the powerful satire entitled, "Epistolæ Obscurorum Virorum." In 1517 he was knighted by the Emperor Maximilian, who also gave him the Imperial crown, and the title of Imperial Poet and Orator. The same year he published the so-called Donation of Constantine, and denominated it to the Pope. He soon after dealt "Trias Romana." To escape the storm raised against him by this book, he retired to one of the castles of his friend, Franz von Sickingen; from which, like Luther from the Wartburg, he sent forth frequent letters, orations, and poems. He wrote to Luther, but could not attend the Diet of Worms. After the death of Sickingen, Hutten went to Switzerland, and after visiting Basel, Mulhausen, and Zurich, and meeting Zwingli at the latter, he spent his last days in the little island of Uffnau, in the lake of Zurich. Courage and hope did not fail him; and in the autumn of 1533 he died. No monument has been raised to him, and his burial-place now belongs to the monks of Einsiedeln. Hutten's Life has been written by several eminent German authors, and his works form five volumes octavo.

HUTTON, CHARLES, LL.D., an eminent mathematician, was born at Newcastle-upon-Tyne, in 1737. Having made great progress in his mathematical studies, and distinguished himself by the production of a small work on the principles of bridges, he was appointed professor at the Royal Military College, Woolwich, elected F.R.S., and received the degree of LL.D. from the university of Edinburgh. He produced, in 1796, his "Mathematical and Philosophical Dictionary," 2 vols. 4to; and in 1798 he gave to the world the first edition of his "Course of Mathematics." He was afterwards engaged with Dr Pearson and Dr Shaw in an abridgement of the Philosophical Transactions, published in 18 vols.; for his labours in which work, it is said, he received £6000. He retired from his appointment at Woolwich in 1807, with a pension of £500; and died in 1823.

HUTTON, JAMES, a celebrated geologist and natural philosopher, was born at Edinburgh, in 1726. After finishing his education at the university, he was apprenticed to a writer to the signet, but quitted the legal profession for that of medicine, as the nearest allied to chemistry, which was his

A New Universal Biography.

HYPATIA, was the daughter of Theon, a celebrated mathematician, who governed the Platonic school in Alexandria, in the 4th century. She early exhibited proofs of extraordinary genius; and being educated by her father, she became a teacher in the school in which Hierocles and other celebrated philosophers had presided. Her beauty and graceful address, united with erudition and sound judgment, procured her the admiration of all hearers; and her house became the resort of all the learned in Alexandria, among whom was Orestes the governor. This roused the jealousy of Cyril, a haughty and intolerant prelate, at that time the patriarch of Alexandria; and his monkish partisans conspired against Hypatia's life, and a furious band of assassins seizing her as she was returning home from the schools, they dragged her through the streets, murdered her in the most barbarous manner, and threw her mangled limbs into the flames, A. D. 415.

HYPERIDES, an Athenian orator, was a disciple of Plato and Isocrates, and the contemporary of Demosthenes, against whom he brought that accusation of libery which

procured his banishment. They were afterwards reconciled, and met their tragic fate about the same time, Hyperides being seized in the temple of Ceres, and delivered up to Antipater, who caused him to be put to death, B. C. 322.

HYRCANUS, JOANNES, high priest and prince of the Jews, was son of Simon Maccabæus, on whose assassination he succeeded him as supreme ruler, B. C. 135. Jerusalem was soon after besieged by Antiochus Sidetes, king of Syria, with whom Hyrcanus was compelled to make a burdensome peace. In 131 he accompanied Antiochus in his expedition against the Parthians, and from a victory over the Hyrcanian tribe he acquired the surname Hyrcanus. Antiochus being killed during this war, Hyrcanus threw off the yoke of Syria; conquered Idumea, besieged and destroyed Samaria, and made an alliance with Rome. The last years of his reign were troubled by the dissensions of the Pharisees and Sadducees. Died, B. C. 106, and was succeeded by his son Aristobulus, who took the title of king.

HYWEL DDA. [HOWELL, THE GOOD.]

I.

IBARRA, JOACHIM, a celebrated Spanish painter, was born at Saragossa, in 1726; exhibited his art in Madrid, where he was king's painter; and died there in 1785. He raised the art of typography to an excellence before unequalled in Spain, and from his press issued magnificent editions of the Bible, the remarkable Missal, &c.

IBAS, a bishop of Edessa, in Mesopotamia, in the 6th century, who is noted in ecclesiastical history, on account of the opposite decisions of different councils, relative to the orthodoxy or heterodoxy of his opinions. He was deposed and re-instated, condemned and acquitted, several times, on the charge of favouring the heresy of Nestorius.

IBRAHIM EFFENDI, a native of Poland, who was raised to the first dignities in the Ottoman empire. He established the first printing press in Turkey in 1728, the Count Bonneval furnishing him with the characters. The first work which he produced on the military art: he afterwards published the "Account of an Expedition against the Afghans," a "Turkish Grammar," and the "History of Turkey."

IBRAHIM PACHA, viceroy of Egypt, son and successor of Mehemet Ali, was born at the village of Cavella, in Albania, and reared from infancy to the tolls and toils of a camp, he at an early age displayed the adventurous spirit, high courage, and undaunted resolution, which distinguished his subsequent career. In 1810 he

became generalissimo of the Egyptian army; and charged with the task of remodelling and disciplining it after the French fashion, he proceeded vigorously to work; and in the course of a few campaigns completely defeated the Wahabees in Arabia, who from 1818 to 1824 had resisted all the efforts of the Egyptian forces to subdue them. During the long struggle for Greek independence, Ibrahim was conspicuous as leader of the Turks. His army overran the whole of the Morea, and committed terrible devastations and cruelties; but the battle of Navarino, Oct. 20, 1827, when the combined British, Russian, and French navies, under the command of Admiral Codrington, destroyed the Turko-Egyptian fleet, sent him back to Egypt, shorn of his conquests, and paved the way for the independence of Greece. In 1831 he marched to the conquest of Syria; and having completely routed the sultan's troops at Konieh in 1832, he was only restrained from marching to Constantinople by the intervention of Russia; but his subjugation of Syria was complete, and a few abortive attempts made by the population to throw off the Egyptian yoke only ended in rivetting their chains more firmly than before. In 1839, the sultan, having made another effort for the recovery of Syria, was completely overthrown by Ibrahim at Nisib. But the European powers now interfered. An English fleet, under the command of Admirals Stopford and Napier,

bore down upon Syria, and having reduced Acre, forced Ibrahim to conclude a treaty, by which Syria was once more given up to the sultan. In 1848, Ibrahim visited England and France. On September 1, 1848, he was nominated viceroy of Egypt, in the room of Mehemet Ali, whom increasing years unfitted for the cares of government; a severe attack of bronchitis, acting on a constitution already debilitated by youthful excesses, and unbounded indulgence in his riper years, cut him off after a short reign of two months and ten days. Died, 1848.

IBYCUS, a Greek lyric poet, was a native of Rhegium, and flourished about 540 B. C.

ICTINUS, an Athenian architect, who lived in the 5th century B. C., and was employed by Pericles in the erection of the Parthenon. He also built the temple of Ceres and Proserpine at Eleusis, and the temple of Apollo Epicurius in Arcadia.

IFFLAND, AUGUST, a celebrated German actor and dramatic writer, was born at Hanover, in 1759. In 1798 he was invited to Berlin, to take the direction of the theatre there, and, in 1811, was appointed general director of all the royal plays. He died in 1814. His works comprise 47 plays, memoirs, and reflections upon the theory of his art. So greatly was he admired by many, that he was termed the Molière of Germany; and Madame de Staël said of him, that there was not an accent or a gesture for which Iffland could not account as a philosopher and an artist.

IGNARRA, NICOLA, a learned Neapolitan antiquary, born in 1728. He became principal professor of sacred literature in the college of Urbano, at Naples; was director of the royal printing office; tutor to the hereditary Prince Francis of Bourbon; and published a learned work, entitled "De Palæstra Neapolitana Commentarium." Died, 1808.

IGNATIUS, ST., surnamed Theophorus, an eminent father of the church and a martyr, was a native of Syria, and a disciple of St John the Evangelist, and he was bishop of Antioch from A. D. 90—115. He was there when Trajan entered the city after the earthquake. A persecution of the Christians followed, and Ignatius, after a long conference with the emperor, in 115, was sent to Rome, where he was doomed to suffer the dreadful death of being exposed to wild beasts in the amphitheatre. Seven of his epistles remain, and were published by Ussher, at Oxford, in 1645. The Syriac version of three of these epistles was discovered about 1841, and was published in England by Dr Cureton, in 1845. A warm controversy as to their genuineness immediately began, some of the greatest scholars in Europe taking part in it, and the question is perhaps still open.

IGNATIUS, ST., patriarch of Constantinople, was son of the Emperor Michael Curopalates, and was born about 798. At the age of 14 he became a monk, and was afterwards ordained priest. In 846, on the death of Methodius, he was chosen to the dignity of Patriarch. In consequence of his rebuke and excommunication of Bardas, brother of the Empress Theodora, he was,

in 857, deprived and exiled, Photius being appointed in his stead. On the accession of the Emperor Basilius the Macedonian, in 866, Ignatius was restored to his office, and Photius was banished. At the council of Constantinople held soon after, Photius and his adherents were excommunicated. Ignatius died 878.

IGNATIUS LOYOLA. [LOYOLA.]
IHERE, JOHANN, a learned Swede, was born at Lund, in 1707. His grandfather was archbishop of Upsal, where the subject of this article had his education; after which he travelled into various parts of Europe, and on his return became a member of the Academy of Sciences. In 1748 he was made professor of rhetoric and politics at Upsal, an office the duties of which he discharged with great ability for 40 years; and died in 1780. His chief works are "Glossarium Sueo-Gothicum," 2 vols. folio, and "De Runorum Antiquitate, Patria, Origine, et Occasu." The "Glossary" was compiled at the expense of the state, and is a grand and unique monument of Swedish philology.

IMBERT, JOSEPH GABRIEL, a French painter of considerable merit, who studied under Le Brun and Vander Meulen, was born at Marseilles, in 1684. At the age of 34 he entered into the Carthusian order, but was permitted by his brethren to exercise his pencil on religious subjects. Died, 1748, aged 65.

IMOLA, INNOCENZIO DA, Italian painter, whose family name was Francucci, was born at Imola, about 1494. He was a pupil of Francia and afterwards of Albertinelli, but his style was chiefly formed after that of Raphael, to whom some of his pictures have been attributed. He lived and worked mostly at Bologna, his chief-d'œuvre being an altar-piece, now in the Academy of Bologna, representing the victory of the Archangel Michael over Satan. He painted several Holy Families and Madonnas, one of the finest of the latter being at Faenza. He was living in 1549.

INA, king of the West Saxons, a valiant prince and an able legislator, succeeded Ceadwalla, in 689. Having obtained advantages over the people of Kent in 694, he wrested Somersetshire and other parts of the west of England from the Britons. He afterwards made war upon the Mercians; but the latter part of his reign was spent in works of peace, and he ended his days in a monastery, having resigned his crown in 728. The laws of Ina served as the foundation of those of Alfred, and some of them are still extant.

INCHBALD, ELIZABETH, a novelist and dramatic writer, was born at Stanningfield, near Bury, Suffolk, in 1756. Having lost her father at the age of 16, she went to London with the view of obtaining an engagement for the stage, married Mr Inchbald, an actor of some celebrity, and accompanied him on several provincial tours. He died in 1779, and she obtained an engagement at Covent Garden in 1780, where she continued eight years. After her retirement, in 1789, she depended upon her literary labours. She wrote 19 dramas, besides several novels, "The Simple Story," and "Nature

and Art." She also edited "The British Theatre," in 25 vols.; a similar collection of popular farces, in 7 vols.; and "The Modern Theatre," in 10 vols. She died in 1821, having passed a life attended with many difficulties and temptations with unsullied reputation. Her "Life and Correspondence" was published by Boaden, in 2 vols. 8vo, in 1833.

INCLEDON, BENJAMIN CHARLES, a celebrated English singer, was born at St Keveran, in Cornwall, in 1764, where his father practised as a surgeon. When eight years old the fine tones of his voice induced his parents to article him to Jackson of Exeter, under whose tuition he remained as a chorister in Exeter cathedral until he was 15. He abruptly quitted his situation in 1779, and served in the royal navy five years, during which time he went to the West Indies, and saw some service. His vocal abilities having, however, attracted the notice of his officers, he was advised to try his fortune on the stage. He accordingly did so, and in 1790 he made his debut at the Patent Garden Theatre, with great success, as Dermot, in "The Poor Soldier," and rose to once into popularity, which attended him all the infirmities of age, and an irregular mode of life, compelled him to quit the stage. His voice combined uncommon power, sweetness, and flexibility, both in the natural tones and in the *falsetto*, and his intonation was singularly correct. Died, 1828.

INEZ DE CASTRO, celebrated for her beauty and her tragic end, was a Portuguese lady of noble family, who became one of the attendants on the Princess Constance, wife of the Infant Don Pedro, son of Alfonso IV. Pedro conceived a violent passion for her, and on the death of Constance, in 1345, he secretly married her. She bore him several children, but in 1355 Alfonso had her assassinated. When Pedro came to the throne two years later, he took savage vengeance on her murderers, had her body disinterred and arrayed in royal robes, and compelled the nobles to salute her as queen. Her children were declared capable of succeeding to the crown. The story of Inez de Castro is the theme of a French tragedy, and Mrs Hemans' spirited version of it is well-known.

INGEBURGA, queen of France, was a Danish princess, sister of Canute VI. She was married to Philip Augustus, king of France, in August, 1193, but he immediately conceived a great aversion to her, and in November following had the marriage set aside on the pretext of affinity. She applied to the pope, and retired to a convent in Clusin, where she lived piously, and was soon in want. In 1195 the pope authorized divorce, but in the following year set it aside, and ordered the king to receive her as his wife again. Philip treated the command with contempt, and in June, 1196, married Agnes of Méranie. This marriage the pope shared null, and his successor, Innocent III., in 1200, laid an interdict on the king of France, when Philip at last recalled Ingeburga; she was, however, again sent away, and only received back by the king

in 1213. She died childless, in 1236, having survived Philip 13 years.

INGENHOUSZ, JOHANN, an eminent physician and chemist, was born at Breda, in 1730. He came early to England, and having learnt the Suttonian method of inoculation, went to Vienna, in order to inoculate the daughter of the emperor; for which he was made imperial physician, and obtained a pension. He was the author of several treatises on subjects of natural history, was elected a fellow of the Royal Society, and died in 1799.

INGHIRAMI, FRANCESCO, Italian archaeologist and historian, was born of an ancient and honourable family at Voiterra, in Tuscany, in 1772. He received a liberal education, and early gained distinction as a writer on the antiquities of his native country and on art, and he obtained the post of librarian at the Laurentian Library, Florence. His greatest work is the "Etruscan Monuments," which was published in six volumes 4to, between 1821 and 1826. He published also the "Homeric Gallery," "History of Tuscany," in 16 vols.; a work on ancient Vase-Paintings, in 4 vols. 4to, &c. Died, 1846.

INGLIS, HENRY DAVID, a writer of some distinction, whose earliest works were published in the name of Derwent Conway, was a native of Scotland, and born in 1795. An ardent desire to visit foreign countries, and a not less ardent love of literature, made him at once a traveller and a writer. His first work was entitled "The Talcs of Ardenne," and was followed by "Solitary Walks through many Lands;" after which appeared his "Travels in Norway and Sweden," "Spain in 1830," "The New Gil Blas," &c. After his return from Spain, he made a tour through Ireland, the result of which was an admirable work, entitled "Ireland in 1834." His constitution at length sunk under his literary exertions; he was seized with disease of the brain, and died in 1835.

INGLIS, Sir JAMES, was descended from an ancient family in Fifeshire, where he was born in the reign of James IV. He joined the French faction against the English, and in some skirmishes preceding the battle of Pinkey so distinguished himself that he was knighted on the field. In 1548 he published at St Andrew's his noted "Complaint of Scotland." He died at Culross, in 1554.

INGLIS, Sir JOHN, British major-general, the heroic defender of the Residency of Lucknow, was son of Dr John Inglis, bishop of Nova Scotia, and was born in that colony on the 15th November, 1814. He entered the army at the age of nineteen, as ensign in the 32nd Foot, the regiment in which he served till his death. He served in Canada in 1837, whence he was sent to India, and took part with distinction in the campaign of 1849 in the Punjab. He greatly distinguished himself at the battle of Gujerat, and having risen through every grade, became Colonel of his regiment in June, 1855. On the outbreak of the mutiny in the spring of 1857, he was called to take part with Sir Henry Lawrence in the defence of the Residency of Lucknow,

then threatened by arming thousands of ferocious robbers. And on the death of Sir Henry, soon followed by that of Major Banks, the officiating chief commissioner, the command of the devoted garrison and the whole conduct of the defence devolved on Brigadier Inglis. Through the most terrible dangers, sufferings, and privations, closely invested and exposed to incessant fire of cannon and musketry, no place in the works safe, he held out, and after 87 days the relief of the city was effected by Sir Henry Havelock and Sir James Outram. Brigadier Inglis was promoted for this splendid achievement to be major-general, and named K.C.B., and his countrymen gave him on his return home a most enthusiastic welcome. His young wife, daughter of Lord Chelmsford, shared bravely with him his arduous task and his appalling peril. He was so seriously shaken in health, that soon after he was appointed commander of the forces in the Ionian Isles, he had to visit the baths at Hombourg, and there he died, 27th September, 1862. "Through life," says the United Service Magazine, "he was remarkable for amiability of disposition, and whilst his military services justly classed him as the bravest of the brave, he was equally entitled to admiration for his unassuming demeanour, his friendly warmth of heart, and his sincere desire to benefit by all means in his power, every one with whom he came in contact."

INGLIS, Sir ROBERT HARRY, bart., was born in 1786, was educated at Winchester and at Christchurch, Oxford, and in 1820 entered parliament as member for Dundalk, which he represented till 1826. In that year he was returned for Ripon, and continued its representative till 1828, when Sir Robert Peel, having changed his opinions on Catholic Emancipation, accepted the Chiltern Hundreds, in order to give his constituents of the university of Oxford an opportunity of expressing their opinion upon his conduct. On that occasion the conservatives of the university, seeing the character which Sir Robert Inglis had achieved for himself, brought him to oppose their former representative, and returned him by a large majority. Throughout life, a staunch upholder of "things as they are" in Church and State, he was still the model of an English gentleman, who if sometimes prejudiced, never was carried by his prejudices into ill-feeling or personal rancour. He opposed Catholic Emancipation, the Reform Bill, Jewish Emancipation, the Ecclesiastical Commission of 1836, and the abolition of the Corn Laws in 1846. In 1853, finding his health impaired, he retired from parliament, and was sworn a member of the Privy Council. He was an elegant scholar, both in classic and English literature, and in every private relation an upright, charitable, and benevolent man. Died, 1855.

INGULPHUS, abbot or pretended abbot of Croyland, whose name is attached to a work once highly valued, professing to be a history of the abbey of Croyland from A. D. 624—1089, but which is now believed to be a monkish fabrication of a much later age.

The story of Ingulphus, according to the statements contained in the history, is as follows. He was born in London, about 1030. William, duke of Normandy, while a visitor at the court of Edward the Confessor, made Ingulphus, then of the age of twenty-one, his secretary. He afterwards went on pilgrimage to the Holy Land, and upon his return, entered into the order of the Benedictines, at the abbey of Fontenelle in Normandy, of which he became prior. On the acquisition of the crown of England by William, Ingulphus was created abbot of the rich monastery of Croyland, which he was enabled to rebuild; and, by the favour of the king and Archbishop Lanfranc, he obtained for it many privileges. Died, 1160.

There have been thirteen popes of this name, of whom the following deserve notice here—

INNOCENT I., ST., was a native of Albano, and succeeded Anastasius I., an bishop of Rome, in 402. He supported St. Chrysostom, and renounced communion with the Eastern churches on account of their treatment of that eminent man. In 409, he endeavoured to obtain terms of peace with Alaric, but was unsuccessful, and during the following year Rome was taken and pillaged. Died, 417.

INNOCENT II., a Roman of noble birth, elected, in 1130, by a part of the cardinals, whilst others chose Peter of Leon, who took the name of Anacletus. The party of the latter being the strongest at Rome, Innocent retired to France, where he remained two years. This contest for the papal chair continued until the death of Anacletus, in 1138, although the monarchs of England, France, and Germany espoused the cause of Innocent. In 1139, Innocent was taken prisoner by Roger, king of Sicily, who had been the chief supporter of the rival party. He was released on recognizing Roger's title as king of Sicily. The same year Arnold of Brescia began preaching at Rome, and was banished. Died, 1143.

INNOCENT III., one of the most eminent of the popes, was descended from the Counts of Segni, and born at Anagni, in 1161. He succeeded Celestine III., in 1198; and being endowed by nature with all the talents of a ruler, possessed of great erudition, and favoured by circumstances, he was better qualified than any of his predecessors to extend the papal power. His first care was to recover and secure such portions of the domains of the Holy See as were in the hands of usurpers. He applied himself earnestly to the improvement of the administration of justice in his estates, and with his high notions, derived from Hildebrand, of papal supremacy, he expected that all great questions, civil as well as ecclesiastical, should be decided by himself. He sought to unite the Christian princes in a crusade for the recovery of Palestine, and shortly afterwards began a cruel persecution of an interdict, he had put France under an interdict, because Philip Augustus divorced his queen, Ingeburga; and when John, king of England, refused to confirm the election of Stephen Langton, as archbishop of Canterbury,

Innocent laid dict, and, in 1212, instigated the land. John resigned his crown, and received them, from whom he had taken until he had been elected in 1210 the pope, Otho IV. Innocent and consulate, late in his estate the Adriatic to all Christendom; pope; two crusades, and, in Constantinople, that he enforce clergy, and was private life. In general council more than 1300 late, and ambassador, by which transubstantiation confession were it was at this far-brated orders of were confirmed.

INNOCENT IV. as **SINIBALDI DE** Genoaese family, Bologna, cardinal, cellor of the Roman, to succeed Gregory, election Le was the Frederick II., but incorably maintained between Guelph and his election he led on all the states and he seized on that both the king, lament remonstrance the country. He got what he demanded year 1244 Innocent Lyons, where he lived.

At a general council excommunicated and in the following made against him, mediation of Louis I. death of Frederick crusade against Innocent his successor as king two years later, his ban to the young Count pope. The quarrel, again, and a defeat Manfred hastened the died at Naples in December said to have firstinals the distinction

INNOCENT XI. (1697), born in 1611, was at Como, in the Milanese, served as a soldier in quitted the camp to through the Intermedicate in 1676, on He was eminent sterly, declaring his, restraining luxury

Innocent laid the kingdom under an interdict, and, in 1212, formally deposed John, and instigated the king of France to attack England. John was finally obliged to submit, resigned his territories to Rome, and received them, as a papal fief, from Innocent, from whom he was unable to obtain absolution until he had paid large sums of money. In 1210 the pope excommunicated the Emperor Otto IV., who owed to him his elevation. Innocent abolished the Roman senate and consulate, and thus made himself absolute in his estates, which now extended from the Adriatic to the Mediterranean. Almost all Christendom was now subject to the pope; two crusades were undertaken at his order, and his influence extended even to Constantinople. Yet it must be admitted that he enforced purity of morals in the clergy, and was himself irreproachable in private life. In 1215 he convoked the fourth general council of the Lateran, consisting of more than 1300 archbishops, bishops, prelates, and ambassadors of European princes, by which transubstantiation and auricular confession were established as dogmas; and it was at this famous council that the celebrated orders of St Dominic and St Francis were confirmed. Died, 1216.

INNOCENT IV., Pope, previously known as SINIBALDI DE' FIESCHI, was of a noble Genoese family, became professor of law at Bologna, cardinal of St Lorenzo, and chancellor of the Roman church. He was chosen to succeed Gregory IX. in 1243. Before his election he was the friend of the Emperor Frederick II., but he zealously took up and inexorably maintained the grand quarrel between Gueif and Ghibelline. Soon after his election he levied enormous contributions on all the states of Europe, and in England he seized on many vacant benefices, so that both the king, Henry III., and the parliament remonstrated, and his agent had to flee the country. He persisted, however, and got what he demanded. At the close of the year 1244 Innocent took up his abode at Lyons, where he lived six years and a half. At a general council held there in 1245, he excommunicated and deposed the emperor, and in the following year published a crusade against him, in spite of the friendly mediation of Louis IX. of France. After the death of Frederick in 1250, he preached a crusade against Conrad, Frederick's son and his successor as king of Sicily. Conrad dying two years later, his brother Manfred, guardian to the young Conradino, submitted to the pope. The quarrel, however, broke out again, and a defeat of the papal army by Manfred hastened the end of Innocent. He died at Naples in December, 1254. This pope is said to have first conferred on the cardinal the distinction of the red hat.

INNOCENT XI. (BENEDETTO ODESCALCHI), born in 1611, was the son of a banker at Como, in the Milanese. In his youth he served as a soldier in Germany and Poland, quitted the camp to take orders, and rose through the intermediate dignities to the pontificate in 1678, on the death of Clement X. He was eminent for his probity and integrity, declaring himself against nepotism, restraining luxury and excess, and

even prohibiting women from learning music. He also resolved to put an end to the mischiefs which had grown out of a protective claim of the foreign ambassadors at Rome to a right of asylum. This led to a long quarrel with France, as Innocent would not yield to menaces, or make any exception to his rule not to receive an ambassador who would not renounce such claim. This dislike France was highly favourable to the English revolution, as it induced the pope, in 1689, to unite with the allies against Louis II., in order to lower the influence of Rome under this pontificate, headed by the Spanish priest Molinos, against whose person and doctrines the Inquisition published a decree. Innocent died in 1689, aged 78.

IPHICRATES, a famous Athenian military commander during the 4th century B. C., who raised himself to eminence by his courage and talents early in life. In the war of Corinth, 393 B. C., he successfully opposed Agessilaus, the warlike king of Sparta. He afterwards commanded a body of auxiliary Persia, in the service of Artaxerxes, king of 368 B. C., he relieved Sparta, when invaded by the Theban general Epaminondas. In the social war he was one of the commanders of the fleet fitted out by the Athenians for the recovery of Byzantium, when, being accused of treachery by one of his colleagues, he defended himself with such spirit, that he was acquitted; but though he lived to a great age, he did not again engage in the military operations of Athens.

IRELAND, JOHN, an ingenious writer on art, was born near Wem, in Shropshire, and brought up to the watchmaking business. He afterwards became a dealer in paintings and prints; and died, near Birmingham, in 1789. He is the author of "Hogarth Illustrated," 3 vols.; and the "Life and Letters of John Henderson," the actor.

IRELAND, JOHN, dean of Westminster, celebrated for his learning and for his intimate connection with some of the most eminent men of his time, was born at Ashburton, in Devonshire, 1762, and received, contemporaneously with Gifford, editor of the Quarterly Review, the first rudiments of education at the free grammar school of Ashburton. He was educated at Oxford, and after holding a small curacy in the neighbourhood of his native place, he travelled with the son of Sir James Wright, by whose interest he was in 1793 collated to the vicarage of Croydon, in Surrey. In 1802 he was made a prebendary of Westminster, and succeeded to the deanery of Westminster on the death of Dr Vincent in 1816. He was a somewhat voluminous author; besides writing some of the most important papers in the earlier numbers of the Quarterly Review, he published "Five Discourses containing certain Arguments for and against the Reception of Christianity by the ancient Jews and Greeks," "Vindicta Regia, a Defence of the Kingly Office," "Paganism and Christianity compared," "Nuptis Sacrae, an Inquiry into the Scriptural Doctrine of Marriage and Divorce," and other works, exclusively theological. As his life had been distinguished

presbytery of Annan. So 's of Mr Irving's warmest friends resolved in providing him with a chapel, wherein he might preach uncontrolled. The picture-gallery of Mr West, in Newman Street, was fitted up for that purpose, and there the novelty of what he termed "manifestations of the spirit," as evinced by the ravings in "unknown tongues" of the deluded or the artful, insured him full audiences. About this time he felt it necessary to return to Scotland in the hope of recruiting his health; but, on arriving at Glasgow, he rapidly became worse, and he died on the 6th of December, 1834, with all the external symptoms of old age, though only in his 42nd year. Fresh interest has been excited respecting this remarkable man by the publication of a genial and intelligent account of his life, by Mrs Oliphant. His works are also republished by his nephew, the Rev. G. Carlyle, M.A., and have received warm praise from contemporary critics, who have borne witness to their wealth in truth, beauty, and genuine eloquence.

IRVING, WASHINGTON, the son of a merchant in the city of New York, was born in that city April 3, 1783. He was educated for the law, but very shortly abandoned the profession and joined his brothers, who were merchants in Liverpool and New York. On the failure of that house in 1817, he was thrown upon his own resources, and soon exhibited to the world powers which might otherwise have lain dormant or been less strenuously and successfully employed. Before that time he had published his "History of New York," by Dietrich Knickerbocker, and "The Letters of Jonathan Old Style," but henceforward his genius became more prolific. That his works displayed none of the local and national peculiarities which characterize much of the literature of America, was perhaps in some measure owing to a long sojourn in many parts of Europe, but still more to the innate beauty of his mind and excellence of his taste. He lived for some time in England as secretary to the American embassy, and subsequently was accredited as ambassador to Spain, where he remained four years. This residence suggested to him some of the most pleasing of his works, "The Tales of the Alhambra," "The Chronicles of the Conquest of Granada," "The Legends of the Conquest of Spain," together with the more important "Lives and Voyages of Columbus and of his Companions." As a writer he was remarkable for the extreme purity of his style and the graceful vigour of his narrative, while few writers have so vividly realized the various historical and other associations of the old world. This width of sympathy and impartiality of judgment, together with the beauty of his language, are the special charm of his writings, and have won for him a reputation which will neither be local nor short-lived. The remainder of his life, after his return to America in 1849, was spent in constant labour on his many works. Besides those which have been named, he published, soon after the mercantile failure, his "Sketch Book," "Racebridge Hall," and more recently "Mahomet and his Success-

ors," with several others. His last work, "The Life of George Washington," was completed not long before his death. In early youth he had formed the idea of writing the life of the great man who, when Irving was but five years old, "had laid his hands upon the child's head and blessed him,"—"a blessing" which he believed "had attended him through life." He lived to realize his wish, although the first of five volumes appeared when he was more than seventy years of age. He had begun to write at a time when America had little literature of her own. He had seen a series of writers rise to eminence as historians, poets, and philosophers. He had himself, more than any, contributed to remove the enmities and distrust which had separated Englishmen and Americans; and after a life of singular happiness died November 28, 1859. His "Life and Letters" have since been published in 4 vols.

ISAACSON, HENRY, author of a system of chronology, was the son of Richard Isaacson, sheriff of London. He wrote a Life of Bishop Andrews, whose amanuensis he had been. Born, 1581; died, 1654.

ISABELLA OF CASTILE, queen of Spain, daughter of John II., was born in 1451, and married, in 1469, Ferdinand V., king of Aragon. After the death of her brother, Henry IV., in 1474, she ascended the throne of Castile, to the exclusion of her eldest sister Joanna, who had the rightful claim to the crown. After the kingdoms of Aragon and Castile were united, Ferdinand and Isabella together assumed the title of king and queen of Spain. She was haughty and ambitious, but with the graces and charms of her sex, Isabella united the courage of a hero and the sagacity of a statesman and legislator: she was always present at the transaction of state affairs, and her name was placed beside that of her husband in public ordinances. Private warfare, which had formerly prevailed to the destruction of public tranquillity, she checked, and introduced a vigorous administration of justice. Died, 1504. For the leading events of her reign see FERDINAND V. of Aragon.

ISABEY, JEAN BAPTISTE, a celebrated French painter, born at Nancy, in 1767. He was a pupil of David, but early devoted himself to the practice of miniature-painting, and in 1805 was appointed miniature-painter to the Emperor Napoleon I. In 1814 he accompanied the Empress Maria Louisa to Vienna, returning to Paris the following year. He afterwards visited Russia, and was employed by the Emperor Alexander. He painted portraits of most of the European sovereigns, and of many distinguished men. Among his works are several large tablets with numerous small figures: the "Table des Maréchaux," "Revue de premier Consul dans le cour des Tuilleries," &c. Died, 1855.

ISÆUS, an Athenian orator, the pupil of half of the 4th century B. C., was wholly unconnected with public affairs, and devoted himself to the task of instructing others. Eleven of his orations are still extant.

ISCANUS, JOSEPHUS, or JOSEPH OF EXETER, was a distinguished writer of Latin

poetry, who accompanied Richard Cœur de Lion to Palestine. He was the author of an epic poem, entitled "Antiocheis," or the deeds of Richard which the poet had himself witnessed. This is unfortunately lost; but another, on the Trojan war, is still extant. Died, about 1224.

ISELIN, ISAAC, a Swiss miscellaneous writer, born at Basel, in 1728, of the grand council of which city he became secretary in 1766. His principal work is entitled "The History of Mankind." He took a leading part in the foundation of the Helvetic Society, and carried on an extensive correspondence with the literati of his own and other countries. Died, 1782.

ISEMBERT OF XAINTES, a French architect of the twelfth century, whose skill in building the bridges of Xaintes and Rochelle induced John, king of England, to recommend him to the citizens of London, in 1201, as an engineer, or architect, who might be useful to them in completing the bridge over the Thames then building. The old bridge was commenced under the direction of Peter of Colchurch in 1176, and it was finished in 1209, probably by Isombert; but the style in which it was executed says but little for the state of architectural science in England during the 12th century.

ISIDORE OF MILETUS, a Greek architect of the 6th century, who, together with Anthemius, was employed by the Emperor Justinian to erect the church of St Sophia, at Constantinople. It is now used as a mosque.

ISIDORE OF PELUSIUM, ST, so called from his retiring to a solitude near that town, was a celebrated disciple of St Chrysostom, and flourished in the 5th century. He wrote 3000 epistles on theological questions and ecclesiastical discipline.

ISIDORE OF SEVILLE, ST, was born at Carthage, of which city his father was governor. Isidore succeeded his brother in the bishopric of Seville in 601, and died in 636. His works are numerous, and among them is a chronicle, ending at the year 626. The editions of his Missal and Breviary are very scarce.

ISLA, JOSE FRANCISCO DE, a Spanish Jesuit, was born at Segovia, in 1714; and after the expulsion of his order from Spain, retired to Italy, and died at Bologna, in 1783. His principal work, "The Life of Friar Gerund," is a bitter satire upon the absurdity, fanaticism, and ignorance of the monks, and upon the prevailing faults of pulpit eloquence. He possessed much of that humour for which his countryman Cervantes is famed.

ISOCRATES, one of the greatest orators of Greece, was born at Athens, B.C. 436, and was the son of a musical instrument-maker. His principal teachers were Gorgias, Prodicus, and Theramenes. On account of his weak voice and natural timidity, he took but little share himself in public speaking, but he applied himself with the greatest ardour to instruction in the art of eloquence, and preparing orations for others. He was particularly distinguished for a polished style and a harmonious construction of his sentences; his subjects were the most important

points of morals and politics; and it is recorded to his honour that he never, by writing or accusation, injured a single individual. He was warmly attached to the liberties of his country; and such was his grief on hearing of the fatal battle of Cambrona, that he took no food for four days, and literally died of starvation, in the 60th year of his age.

ITURBIDE, AUGUSTIN DE, emperor of Mexico, was born at Valladolid, in New Spain, in 1784, and entered the military service at the age of 17. In 1810 he was a lieutenant in the regiment of his native city, and in 1816 he had risen to the command of the northern army, which occupied the provinces of Guanajuato and Valladolid. About this time he was accused of want of fidelity to the royal cause; and though acquitted, retired for a while from active service. Subsequent events opened a new career for his ambition. He took the command of an army destined to the South, and marched to Acapulco, in the latter part of 1819. There he matured a plan for the emancipation of Mexico from the yoke of Spain, the protection of religion, and the union of the Spaniards and Mexicans. Iturbide continued his march to Queretaro, and was soon joined by Victoria, the most devoted of the friends of liberty. The road to power was now entirely open before Iturbide. He took possession of the capital in the name of the nation, and established a regency, consisting of members nominated by himself. Finding that the republicans were opposed to his domination, he resolved to seize the crown; and accordingly he was proclaimed emperor, May 19, 1822. It was decreed that the crown should be hereditary in the family of Iturbide, and that a million and a half of dollars should be his yearly allowance; at the same time conferring the title of prince on his sons, and establishing an order of knighthood and other accessories of a monarchy. The friends of liberal institutions fled or temporized. But they could not acquiesce in a state of things so adverse to their feelings. Iturbide was driven by his necessities to exasperate the minds of the people. Defection became general among the officers of the army, so that Iturbide hastily assembled at Mexico the dispersed members of Congress, and tendered to them his abdication of the crown, March 20, 1823. Congress agreed to grant Iturbide a large yearly pension, on condition of his leaving the Mexican territory forever, and residing in Italy. He embarked, May 11, 1823, for Leghorn. But impelled by his insane ambition to attempt the recovery of his lost empire, he left Italy for England, and embarked for Mexico, May 11, 1824, and arrived in sight of the port of Soto la Marina, July 14. During the year that had elapsed, the Mexicans had adopted a republican constitution, and Iturbide had no party nor friends in the nation. The government had been apprized of his leaving Italy, and a decree was passed, declaring him to be proclaimed as a traitor. Iturbide landed at Soto la Marina, accompanied only by Brasco, his secretary, and was almost immediately arrested. His fate was but for a short time delayed, sentence of immediate death

was pronounced for executing Iturbide and protesting his purpose, and duties of patrimonial ordination. Two grandsons other 3, years blood by Maximilian 1863, and took family. The their right to to the crown,

IVAN III., surnamed THE GREAT, his father Vasili years. He assumed the yoke of tributary to the of warfare he success, and a Horde, defeated following years Poles. His province had now made and with his people. He married, a daughter of the theologian, hospitable throne. The king of Russia, Ivan to and made him afterwards engaged of Livonia, and with them. For under Ivan III the pope, the successor of Venice. In the erected many fortifications under the direct invited from violent in tempo he disinherited his second in a fit deed the use of reign of 43 years, IVAN IV., THE RUSSIA, was the g succeeded his father was four years of entrusted to his death, in 1638, to

JABLONOWSKY, IVAN, a Polish prince, offering a life of his dignity when that his country, and v

was pronounced; and while preparations for executing the sentence were making, Irturbide addressed the assembled people, protesting his innocence of any treasonable purpose, and exhorting them to observe the duties of patriotism, religion, and civil subordination. He was shot July 19, 1824. The two grandsons of Irturbide, one aged 16, the other 3 years, were declared princes of the blood by Maximilian, emperor of Mexico, in 1863, and took rank next after the imperial family. The family subsequently resigned their right to live in Mexico, and their claim to the crown, for a pecuniary compensation.

IVAN III., sovereign of all the Russias, surnamed THE THREATENING, succeeded his father Vassili in 1462, at the age of 23 years. He aspired to liberate Russia from the yoke of the Tatars, who had held it tributary for two centuries, and after years of warfare he saw his efforts crowned with success, and Ahmed, khan of the Golden Horde, defeated and slain in 1481. In the following year he won a victory over the Poles. His prowess and extended dominion had now made his alliance worth having, and with his power his ambition also grew. He married, as his second wife, Sophia, daughter of the Emperor Constantine Palaeologus, hoping to attain to the imperial throne. The khan of Kasan having invaded Russia, Ivan totally defeated him in 1487, and made him and his family prisoners. He afterwards engaged in war with the knights of Livonia, and made a truce for 50 years with them. For the first time Moscow saw under Ivan III. ambassadors arrive from the pope, the sultan of Constantinople, the republic of Venice, and the king of Denmark. In the latter years of his reign he erected many fine buildings at Moscow, under the direction of architects and artists invited from other countries. Ivan was violent in temper, cruel, and revengeful; he disinherited his eldest son, and killed his second in a fit of passion; and he introduced the use of the *knout*. Died, after a reign of 43 years, in 1505.

IVAN IV., THE TERRIBLE, first Czar of Russia, was the grandson of Ivan III., and succeeded his father Vassili IV. in 1533. He was four years of age, and the regency was intrusted to his mother Helena, and on her death, in 1538, to a selfish and tyrannical

triumvirate. At the age of 14 Ivan put them to death, and assumed the sovereignty, using his freedom at first only in insane indulgence of his passions. In 1546 he had himself crowned, and took the title of Czar. He soon after married the Princess Anastasia, whose noble character and influence over him were most beneficial. Ivan was rescued from sloth and sensuality, and applied himself to his high duties; publishing wise laws, reforming military discipline, and laying the foundations of a standing army. His first great purpose was to destroy the Tatar power, which had only been broken; and he conquered, first, Kasan, and then Astrakhan, and received the submission of almost all the other Tatar chiefs. In 1563 he lost his wife, and his natural ferocity was thenceforth indulged without restraint. He was afterwards at war with Poland, with the Tatars of the Crimea, and with Sweden. Alarmed by the strength of his numerous enemies, he implored the mediation of the pope, Gregory XIII., who procured a peace for him in 1582, but was disappointed in his hope of uniting Russia with the Roman church. The character of Ivan IV., like that of Peter I., was a compound of heroic and diabolical qualities. A valiant soldier, a wise legislator, a promoter of education, an introducer of printing into his states, he was nevertheless unrivalled in cruelty, and the victims of his untamed passions and lawless will were innumerable. From mere suspicion, and in a fit of passion, he killed his eldest son, whom he really loved. Remorse for this crime embittered his last days, and he died in 1584. The conquest of Siberia was commenced in this reign.

IVETAUX, NICOLAS VAUQUELIN, Seigneur d', a French poet and man of letters, born in 1559. He succeeded his father as lieutenant-governor of Caen, in Normandy; but being of a gay disposition, he quitted it for the metropolis, and was selected by the "Fair Gabrielle" to be tutor to her son, the young duke of Vendomo. He afterwards became tutor to the Dauphin, but his licentious course of life occasioned his dismissal. He, however, received a pension, and lived till he was 90 years of age. He wrote a clever poem, entitled, "Institution d'un Prince," and a variety of other pieces. Died, 1649.

J.

JABLONOWSKY, JOSEPH ALEXANDER IVAN, a Polish prince, born in 1712. Preferring a life of literary ease, he resigned his dignity when the troubles broke out in his country, and went to live at Lelpsic,

where he distinguished himself as the patron of science, and founded a literary society. He wrote "The Lives of Twelve Polish Generals," a "Treatise on Slavonic Poetry," and other works. Died, 1777.

JABLONSKI, KARL GUSTAV, a German entomologist, was born about 1756. He obtained the post of private secretary to the queen of Prussia, but devoted his leisure to an ardent study of natural history, and especially of entomology. On the latter branch of science he projected and began an extensive work, entitled "Natural System of all known Insects, Indigenous and Exotic," which was continued by the naturalist Herbst. The part of the work relating to butterflies occupies 10 vols. 8vo, and was published between 1783—1808; that relating to beetles, in 11 vols., appeared during the same period. Jablonski died in 1787.

JABLONSKI, PAUL ERNST, orientalist, son of Daniel Ernst, an eminent theologian, was the author of a very creditable treatise on the mythology of ancient Egypt, and other able works, theological and antiquarian. Died, 1767.

JACKSON, General ANDREW, president of the United States from 1829 to 1837, was born in South Carolina, 1767. His father was an Irish emigrant. At the age of 16 he took part in the war of independence; at the close of which he became a law student, and was thus enabled to discharge efficiently some high legal offices in Tennessee, to which he was subsequently appointed. On the breaking out of the war with England in 1812, he took vigorous measures for the defence of the menaced territory; in 1814 he was appointed major-general; and, among other exploits, which raised him to the highest point of popularity, he gained the decisive victory over the English, Jan. 8, 1815, at New Orleans, which put an end to the war. The same success attended his arms against the Creek tribes, whom he repeatedly subdued. In 1821, he was appointed governor of Florida; and his gallant deeds being still fresh in his countrymen's recollection, he was brought forward by the democratic party as a candidate for the presidency, elected in 1828, and re-elected in 1832. His period of office is chiefly remarkable for the extension of democratic tendencies which then took place. He obtained from France the payment of an indemnity of 25 millions of francs for injuries done to the commerce of the United States during the empire. His refusal to renew the bank charter, in 1833, led to one of the most violent financial crises on record. General Jackson was endowed with inflexible will and an ardent patriotism; but he brought with him to power the passions of a partisan, and he did not always respect legality, as his treatment of Arbuthnot and Ambrister, during the war with Florida, shows. Died, 1845.

JACKSON, JOHN, chronologist and controversial writer, was born at Lensy, in Yorkshire, in 1686. The corporation of Doncaster gave him the living of Rossington, but the pertinacity with which he supported Arrian principles prevented his further rise in the church. He was the author of "Chronological Antiquities;" and left behind him the character of a learned and sincere writer, though strongly tinged with the faults of a violent polemic. Died, 1763.

JACKSON, JOHN, an eminent English

portrait-painter, was born at Lastingham, in Yorkshire, in 1778, and apprenticed to his father, who was a tailor; but discovering a decided talent for the art in which he afterwards excelled, his abilities procured him the protection of Sir George Beaumont, through whose means he removed to London, and studied at the Royal Academy. At that time Lawrence, Opie, Beecher, and other eminent masters, pre-occupied the ground he had chosen, and for a time he contented himself with painting portraits in water-colours, in which he was very successful. He was, however, determined to take a high stand, if possible, as a portrait painter in oil; and the tact with which he copied the works of the old masters surprised his contemporaries. He was elected Royal Academician in 1817; and when, in 1819, he travelled through Italy, and visited Rome with Chantrey, he was chosen a member of the Academy of St Luke. Jackson "had an uncommon readiness and skill of hand, a rapid facility of finish, which enabled him to dash off, at a few sittings, whatever he undertook; his colouring was deep, clear, and splendid; and in this he more resembled Reynolds than any artist since his day." One of his most admired works, perhaps his chef-d'œuvre, is his portrait of Flaxman the sculptor. Died, 1831.

JACKSON, THOMAS JEFFERSON, better known as "STONEWALL" JACKSON, a very distinguished officer of the "Confederate States" of North America, was born in Western Virginia in January, 1824. He was of a respectable family, but received only a limited education, and at the age of 19 entered, as student, the military academy at West Point, where, in spite of his homely dress and uncouth manners, he outstripped by patient and persistent application many who at first were far ahead of him. His first service as a soldier was in the Mexican war of 1847, in which he gained many steps in advance, and was noticed as a good gunner. He afterwards held for ten years the chair of chemistry at the military academy of Virginia at Lexington. On the death of his first wife he visited Europe, and during his stay in England found his chief delight in our cathedrals, and especially in York Minster. On the outbreak of the civil war, and the secession of Virginia, he offered his services to that State, and received a commission. The two years that followed comprise the whole of his public life, and his brilliant achievements, undimmed by defeat or failure, have earned him the admiration of the world. He contributed to the first memorable victory of the Confederates; at Bull Run; defeated General Banks in the Shenandoah valley; covered Richmond on McClellan's advance to it; distinguished himself greatly in the battles of the Chickahominy; by his march through Thoroughfare Gap in the Blue Mountains, and attack on the rear of General Pope's army; by his capture of Harper's Ferry, and at the battle of Antietam. His was the post of honour and of victory at Fredericksburg, and also at Chancellorsville. It was at the last-named battle that General Jackson received his mortal wound, not from the enemy, but

from a party of his own men, who fired on him in the darkness of the evening, May 2, 1663. His left arm was amputated, and he appeared to be recovering, but he was attacked by pneumonia, and died at Chancellor's House on the 9th of May. General Jackson was a man of fervent, yet unobtrusive piety, distinguished as a soldier for his vigour and dash, no less than for his patient endurance; chivalrous as Bayard; of blameless life; implicitly trusted and deeply beloved by his men; and in his death mourned by the world.

JACKSON, WILLIAM, musical composer, was born in 1730, at Exeter, and received the rudiments of a classical education, with a view to his following one of the liberal professions. His taste for music displayed itself, however, so decidedly while he was yet a youth, that his friends placed him under Travers, the organist of the cathedral of his native city. Having passed two years in the metropolis, he returned to Exeter in 1750, and, succeeding to the situation of organist, there passed the remainder of his life. He published several books of songs, canzoni, hymns, and sonatas, which are held in esteem for their chasteness of conception and truth of expression: he was also author of a treatise "On the Present State of Music," "The Four Ages," &c. Mr Jackson was likewise a landscape painter. Died, 1804.

JACOB, GILES, an industrious English lawyer, who published, among a great variety of works, a "Law Dictionary," and the "Lives and Characters of English Poets." He died in 1744, aged 54.

JACOB, HENRY, pastor of the first congregation of Independents in England, was a native of Kent. After graduating at Oxford, he was preferred to the benefice of Cheriton, near Iythe; but having published a polemical tract, entitled "Reasons taken out of God's word and the best of human testimonies, proving the necessity of reforming our churches of England," he found it necessary to withdraw from England for a time. After a residence at Leyden, where he enjoyed the society of John Robinson, he returned, and established a separate congregation on independent principles; but in 1624 he went to America, and there died.

—His son, of the same name, studied under Epinus at Leyden, and was distinguished for his knowledge of oriental literature. He obtained a fellowship at Merton College, Oxford, and graduated both in arts and physics; but he was ejected from his fellowship by the parliamentary commissioners, and died at Canterbury, in 1652. He wrote many learned works.

JACOB, JEAN, centenarian, was a native of Franche Comté, who, having attained, it was said, the age of 120, was sold by his granddaughter to a mountebank for 100 crowns. Dragged from town to town, and exhibited as a public show, the old man sunk under the fatigue, and shortly after died, 1790.

JACOBI, FRIEDRICH HEINRICH, a German philosopher and poet, born at Düsseldorf, in 1743. He was brought up to a mercantile life, but was at the same time a

diligent student of philosophy and literature, and was soon enabled to devote himself wholly to them. In 1779, he was appointed to a government office at Munich; retired, during the early years of the French revolutionary war, to Wandsee and Hamburg; returned to Munich in 1804, and assisted in the organization of the Academy of Sciences, of which he became president in 1807. Jacobi's first work was a philosophical poem entitled "Woldemar," and published in 1777. Among his other writings, chiefly devoted to the criticism of existing systems of philosophy, are "David Hume, or Idealism and Realism;" an essay on the doctrine of Spinoza; "Letters to Fichte;" and a treatise "On Divine Things and on Revelation." Died at Munich, 1819.

JACOBI, JOHANN GEORG, a German poet, was born in 1740, at Düsseldorf; studied at Göttingen; was professor of philosophy and eloquence at Halle; and, subsequently, of the belles lettres at Friburg, which post he retained during his life. The style of Jacobi was formed on that of the lighter French poets, and possesses much ease and gaiety. Died, 1814.

JACOBS, JURIE, painter, was a native of Switzerland, born in 1810. He studied under Schnyder, and is celebrated for the fidelity and spirit with which he painted animals in his hunting-pieces. Died, 1864.

JACOBS, LUCAS. [LUCAS VAN LEYDEN.]

JACOPONE, or **JACOPO DA TODI**, so called on account of his birthplace, was an Italian poet, whose real name was **DE BENEDETTI**. On being left a widower he distributed his property among the poor, and entered into the order of Minorites as a servitor. He composed Sacred Canticles, Latin poems, and, as it is said, the famous "Stabat Mater," since so celebrated by the compositions of Haydn, Pergolese, &c. Died, 1306.

JACOTOT, JEAN JOSEPH, a native of Dijon, originally a captain of artillery in Napoleon's army, and subsequently sub-director of the Polytechnic School, professor of ancient languages at the Central School, and assistant professor of the Lyceum, and the Law School of Dijon. He was also a member of the chamber during the "Hundred Days." Retiring to Belgium, in 1815, he there conceived and put into partial practice a new system of education, much talked of under the name of Universal Instruction, and in great part similar to the method of Pestalozzi. He has left several works upon the subject, interesting at least for ingenuity. Born, 1770; died, 1840.

JACQUARD, JOSEPH MARIE, the inventor of the beautiful apparatus for figured weaving which bears his name, was born at Lyons, 1762. At an early age he displayed a taste for mechanics, which distinguished him through life; and whether in book-binding, type-founding, or cutlery—all of which he tried in his youth—he showed a strong aptitude for improvement. On his father's death, he attempted to carry on the weaving business, which he inherited from him, but with little success; and soon after-

wards, during the troubles of the French revolution, he lost his little all, having been compelled to flee from Lyons after its reduction by the army of the Convention. He then joined the army of the Rhine; but having seen his son fall in battle by his side, he once more returned to Lyons, where he was obliged to earn a precarious sustenance in the humble occupation of plaiting straw. But a new era was now in store for him. In 1801 he submitted to the "National Exposition" his celebrated machine, which forms a memorable epoch in the textile art; and its merits being at once acknowledged and rewarded, he was soon afterwards employed by Napoleon in the "Conservatoire des Arts et des Metiers," at Paris, where he introduced some ingenious improvements in the models and machinery then in use. On his return to Lyons, he had to struggle against much opposition and prejudice on the part of the weavers; but he outlived it all, and long before his death he had the satisfaction of seeing his machinery introduced into every European and American manufactory; and so far from diminishing employment, as some feared on its first introduction, it has increased the number of workmen in the operations to which it is applied tenfold. Died, 1834.

JACQUIN, NICHOLAS JOSEPH, a celebrated botanist, was born, in 1727, at Leyden, and studied medicine at Antwerp and Louvain. Being induced by his countryman, Van Swieten, to visit Vienna, the Emperor Francis I. sent him to the West Indies to collect plants for the botanical gardens of Vienna and Schoenbrunn; and after an absence of six years, he returned with a superb collection. Two years after appeared his catalogue of plants growing in the neighbourhood of Vienna; and in 1773 a magnificent work, entitled "Flora Austriaca," with 500 coloured engravings. He was author of many other botanical works, was appointed to various offices, was created a baron in 1806, and died in 1817.

JAHN, JOHANNES, a learned German orientalist, who after having been professor of biblical archaeology and theology in the university of Vienna, obtained the chair of oriental literature, which, in 1806, he was obliged to relinquish on account of his heterodoxy. He published a "Hebrew Bible," 4 vols.; "Biblical Archaeology," 3 vols.; Grammars of several oriental languages, &c. His "Biblical Archaeology" has been translated into English. Died, 1817.

JAMBlichus, a Neo-Platonic philosopher who flourished at the beginning of the 4th century, and was a native of Chaicis in Coelosyria. He was the disciple of Anatolius and Porphyry, from whom he learnt the Plotinian system of philosophy, which he taught with great reputation. Among the works of Jamblichus now extant are, one on the Life and Philosophy of Pythagoras, and another on the Mysteries of the Egyptians, Chaldeans, and Assyrians.

JAMES I., king of Scotland, of the house of Stuart, born in 1394, was the son of Robert III. In 1405 he was taken by the Eng-

lish on his passage to France, and kept in confinement 18 years. In 1424 he obtained his liberty, and severely punished those who had governed his country in his absence; for which, and some strong measures which he took to curb a lawless nobility, he fell a victim to assassins, who gained admission to his apartment, and murdered him in his bed, in 1437.

JAMES V., of Scotland, succeeded, in 1513, on the death of his father, James IV., though only 18 months old. At the age of 17 he assumed the government, and assisted Francis I. of France against Charles V., for which that prince gave him his daughter Margaret in marriage. On her decease he married Mary of Lorraine, daughter of Claude, duke of Guise. James died in 1542, leaving his crown to Mary Stuart, his infant daughter, then only 8 days old.

JAMES I. of England, and VI. of Scotland, was the son of Mary, queen of Scots, by Henry Stuart, Lord Darnley, and was born in 1566. In the following year Darnley was murdered, and Queen Mary being forced to resign the crown, he was solemnly crowned at Stirling, and all public acts ran in his name. Among the eminent scholars to whom the education of the young king was intrusted was the great historian and poet, George Buchanan. The earl of Morton resigned the regency in 1578, but very soon had the chief power again in his hands, which he retained till the end of 1580. In 1582 the "Raid of Ruthven" took place, and James was made captive by a party of the nobles. He regained his liberty in the following year. When it became apparent that the life of his mother was in danger he wrote to Queen Elizabeth, appealed to other courts for assistance, and assembled his nobles, who promised to prevent or revenge that queen's purpose. The execution of Mary, however, took place; and though James prepared for hostilities, the inadequacy of his resources prevented him from engaging in actual war. In 1603, on the death of Elizabeth, James succeeded to the crown of England, and proceeded to London. Although James had behaved with great lenity to the Roman Catholics in Scotland, those in England were so disappointed in their expectations of favour, that in the year after his accession, the gunpowder plot was devised by some of their most desperate adherents, to destroy the king, the prince, and parliament. In 1606 he established episcopacy in Scotland. In 1612, Prince Henry, his son, by Anne of Denmark, died, and the same year his daughter, the Princess Elizabeth, was married to Frederick, the elector-palatine. One of the greatest biots upon the character of James I. was the execution of Sir Walter Raleigh. The close of the life of James was marked by violent contests with his parliament, the preliminary skirmishing of religious and political parties, which became a civil war in the following reign. Although this king had received a careful education, prided himself on being a patron of literature, and even wrote many works both in prose and verse, he was not merely destitute of the vigour and ability and wisdom of a

great sovereign, but had neither the intel-
lectual nor moral qualities which go to the
making of a noble man. Feebleness, in-
dolence, vulgarly in tastes and pursuits,
vanity, pedantry, these are the prominent
features of his character. We must not
omit to mention, as one of the memorable
events of this reign, the preparation of the
authorized translation of the Bible. Died in
1825, aged 68.

JAMES II., king of England, second son
of Charles I. and of Henrietta of France,
was born in 1633, and immediately created
Duke of York. After the capture of Oxford
by the parliamentary army, he escaped, and
was conducted to his sister, the princess of
Orsnge. At that time he was 14 years of age.
He soon after joined his mother at Paris,
and, when he had reached his 20th year,
served in the French army under Turenne,
and subsequently entered the Spanish army
in Flanders, under Don John of Austria and
the Prince of Condé. At the Restoration
he returned to England, and married secretly
Anne Hyde, daughter of the earl of Claren-
don, by whom he had two daughters, who
afterwards became queens of England, viz.
Mary and Anne. In the Dutch war, he sig-
nalized himself as commander of the English
fleet, and showed great skill and bravery.
On the death of Charles II., in 1685, the
duke succeeded, under the title of James II.,
and, from the time of his ascending the
throne, seems to have acted with a steady
determination to render himself absolute,
and to restore the Roman Catholic religion.
After disgusting the great majority of his
subjects, by attending mass with all the
ensigns of royalty, he proceeded to levy the
customs and excise without the authority
of parliament. He even sent an agent to
Rome, to pave the way for a solemn re-
mission of England into the bosom of that
church, and received advice on the score of
moderation from the pope himself. A few
months after his accession, severe laws hav-
ing been passed against the Covenanters,
against whom Graham of Claverhouse was
sent, the invasion of Scotland took place
under the earl of Argyll, and the invasion
of England under the duke of Monmouth,
both of which failed, and cost the lives of
several leaders. By virtue of his assumed dis-
tressing power, James rendered tests of no
avail, and filled his army and council with
Roman Catholics; while by a declaration in
favour of liberty of conscience, he also sought
to gain the favour of the dissenters, who
were, however, too conscious of his ulti-
mate object to be deluded by this show of
generality. The resistance to this illegal
declaration led to the trial of the Seven
Bishops, Archbishop Sancroft being one of
them, and their acquittal was an occasion of
great popular rejoicing. Thus the king pro-
ceeded by every direct and indirect attack
to overthrow the established constitution;
these innovations, in regard both to the
religion and government, gradually united
opposing interests, and a large body of the
nobility and gentry concurred in an applica-
tion to the prince of Orange, who had been
secretly preparing a fleet and an army for
the invasion of the country. James, who

was long kept in ignorance of these trans-
actions, when informed of them by his min-
ister at the Hague, was struck with ter-
ror equal to his former infatuation; and im-
mediately repealing all his obnoxious acts, ho
practised every method to gain popularity.
All confidence was, however, destroyed be-
tween the king and the people. William
arrived with his fleet in Torbay, Nov. 4th,
1688; and being speedily joined by several
men of high rank, his ranks swelled, while
the army of James began to desert by entire
regiments. Incapable of any vigorous reso-
lution, and finding his overtures of accom-
modation disregarded, James resolved to
quit the country. He repaired to St Ger-
main, where he was received with great
kindness and hospitality by Louis XIV. In
the mean time the throne of Great Britain
was declared to be abdicated; and William
and his consort Mary (the daughter of James)
were unanimously called to fill it conjointly.
Assisted by Louis XIV., James was enabled,
in March, 1689, to make an attempt for the
recovery of Ireland. The battle of the
Boyné, fought July, 1690, compelled him to
return to France. All succeeding projects
and he spent the last years of his life in
acts of ascetic devotion, dying at St Ger-
main, Sept. 16, 1701, aged 68. To sum up
the character of James in a few words, we
may truly say, that his prejudices were
strong, his understanding narrow, and his
temper cold and ungenerous.

JAMES FRANCIS EDWARD STUART,
known as the Chevalier de St George or the
Old Pretender, was the son of James II., by
his second wife, Mary d'Este, and was born
the 10th June, 1688. In the following December
the queen fled with him to France, and on
the death of James, his father, in 1701, he
was acknowledged as king of England by
Louis XIV., which led to the recall of the
English ambassador and war with France.
He was also acknowledged as king by the
pope, the king of Spain, and the duke of
Savoy, while he was attainted of high
treason by an act passed in 1702. In 1708 he
sailed from Dunkirk with a French fleet for
the invasion of Scotland, but the vigilance
of the English admiral, Sir George Byng,
prevented the execution of the plan, and the
prince returned to France. On the death of
Queen Anne he was refused an interview
with Louis XIV., and ordered to leave
France. In the following year, 1715, a re-
bellion in his favour, headed by the earl of
Mar, broke out in Scotland, and he was
proclaimed on the 8th September. The
rebels were defeated at Preston on the 13th
November, and their leaders made prisoners.
In December the Pretender himself arrived
at Peterhead, assumed royal state, formed
a council, and made a progress through the
country, but the case was hopeless, and he
was glad to escape to Gravelines. He soon
after dismissed Lord Bolingbroke, who had
been his secretary, and appointed the duke
of Ormond to that post. Ordered to quit
France, he went to Italy, and afterwards to
Spain, where he was received as king of
England, and an expedition was undertaken
in his favour, which ended in failure. In

1719 the prince married Maria Clementina, daughter of the king of Poland, by whom he had two sons, Charles Edward, the young Pretender, and Henry. Maria Clementina died in 1735. Disaffection and restlessness continued in Great Britain, and showed themselves from time to time in overt acts, and in 1745 another Jacobite rebellion broke out in Scotland, Prince Charles Edward landing there, and getting his father proclaimed once more. This struggle ended with the defeat of the Jacobites at Culloden by the duke of Cumberland. The Pretender died at Rome, where he had lived for many years, in December, 1765.

JAMES, GEORGE PAYNE RAINSFORD, novelist and miscellaneous writer, was born at London in 1801. He studied in France, and began at an early age his literary career. He wrote with ease, and produced an immense number of works, most of which had a large share of popularity. The first of his novels, which was also one of his best, "Richelleu," was published in 1825. Among his works are "Darnley," "Philip Augustus," "Henry Masterton," "Henry of Guise," "The Huguenot," "The Smuggler," histories of the Black Prince, Charlemagne, and Louis XIV., poems, &c. He was appointed British consul at Norfolk, Virginia, in 1852, and consul-general for the Austrian ports in the Adriatic in 1856. Died, at Venice, 1860.

JAMES, ROBERT, an English physician, was born at Kinverstone, in Staffordshire, in 1703. In 1743 he published his "Medical Dictionary," in 3 vols. folio, in which he was assisted by Dr Johnson, who was his early friend. He also wrote the "Practice of Physic," 2 vols., &c.; but he is best known by a valuable antimonial preparation, familiar to all under the name of James's powder. Died, 1776.

JAMES, THOMAS, an English navigator, who, in 1631 and 1632, attempted to discover a north-west passage. He wintered on Charleton Island, in Hudson's Bay, and next summer proceeded on his voyage, but was unable to penetrate farther than 65 degrees and a half north of Hudson's Bay; to the country on the western side of which he gave the name of New South Wales. On his return to England he published an account of his expedition, entitled "The strange and dangerous Voyage of Captain Thomas James, for the Discovery of a North-west Passage to the South Sea."

JAMES, WILLIAM, the author of a valuable national work, entitled "The Naval History of Great Britain, from the Declaration of War by France, in 1793, to the Accession of George IV., &c. Every accessible source of authentic information was made use of by Mr James in writing this history; and his industry and research deserve the highest praise. Died, 1827.

JAMESON, GEORGE, an eminent painter, sometimes termed the Vandyck of Scotland, was born at Aberdeen in 1688, and died in 1644. He studied painting under Rubens, Vandyck being his fellow-student, but was far from attaining equal excellence as an artist with either of them. He painted chiefly portraits.

JAMESON, MRS., whose maiden name was Anna Murphy, was born in Dublin in 1756, and in 1823 married Mr Robert Jameson, afterwards vice-chancellor of Canada. Her numerous works have gained a wide reputation. The most important may be divided into two classes, of which one relates to women, their characteristics, and social position. In her "Sisters of Charity at Home and Abroad," and the "Communion of Labour," she enters into the subjects of the employment of women and of our criminal laws and reformatory institutions. But she will continue to be known chiefly for her Art-criticism, in which she has been surpassed by few. Her "Handbook to the Public Galleries of Art in and near London," published in 1842, was the first of a series of works of great value on the special subjects of which they treat. Among these are the volumes on "Sacred and Legendary Art," "Legends of the Monastic Orders," "Legends of the Madonna." At her death, which took place March 17, 1860, she left nearly completed a more laborious and elaborate work, on the "History of our Lord and of His Precursor, St John the Baptist, with the Personages and Typical Subjects of the Old Testament as represented in Christian Art." This work has since appeared, completed and edited by Lady Eastlake.

JAMESON, ROBERT, one of the most eminent naturalists of his time, was born in Leith in 1773. He studied for the medical profession, but a love of that science in which he was destined to earn so high a reputation, soon prevailed over every other pursuit, and he devoted himself with ardour to geology, mineralogy, and the kindred sciences. In 1798 he published the "Geology of Arran and the Shetland Isles." This was followed in 1800 by the "Mineralogy of the Scottish Isles," in two volumes 4to; and shortly afterwards by the "Mineralogy of Dumfriesshire." With a spirit of enterprise rare at that time in Scotland, he went, in order to perfect himself in his favourite studies, to Freyburg, in Saxony, where the celebrated Werner had established a school which attracted pupils from all parts of Europe. He remained there two years, and shortly after his return was appointed professor of natural history in the university of Edinburgh on the death of Dr Walker in 1804. From this period his publications were numerous, and his class books in particular rose speedily into high reputation. It would far exceed our limits to give a complete list of his works, but the following will show the zeal and energy with which he devoted himself to the duties of his chair:—"The Characters of Minerals," 1805.—"System of Mineralogy," two vols., 1806; a third volume was added to the last in 1809, on Geology, then termed "Geognosy."—"Notes to Black's Translation of Von Buch's Travels in Norway and Lapland," 1813.—"System of Mineralogy enlarged without the Geognosy," three vols., 1816.—In 1819 he commenced the "Edinburgh Philosophical Journal," which he continued till his death. It extends to seventy volumes, and has enjoyed a European reputation. Died, 1855.

theologian and

philologist, was minister to a congregation of seceders from the Scotch Church at Edinburgh. He applied himself to literary pursuits, and was a most industrious writer. But his works, for the most part, have no lasting value. Among them are an "Etymological Dictionary of the Scottish Language," 2 vols. 4to; "An Historical Account of the Ancient Culdees of Iona," &c. He died, aged 80, July, 1838.

JANSEN, or JANSENIUS, CORNELIUS, bishop of Ypres, and professor of divinity in the universities of Louvain and Douay, was one of the most learned divines of the 17th century, and founder of the sect of Jansenists. He was born in 1585, at Akay, near Leerdam, in Holland; and studied at Louvain. Being sent into Spain on business relating to the university, the Catholic king engaged him to write a book against the French, for having formed an alliance with Protestant states; and rewarded him with the see of Ypres, in 1635. He had already maintained a controversy against the Protestants upon the subject of grace and predestination; and having studied with intense delight the works of St Augustine, he devoted the best years of his life to the composition of a treatise entitled "Augustinus," a kind of epitome of the views of his great master. This book appeared after his death, and was the occasion of the famous and long-continued controversy between the Jesuits and the Jansenists. Died, 1638.

JANSENIUS, CORNELIUS, bishop of Ghent, was born at Hulst, in Flanders, in 1510. He distinguished himself at the council of Trent by his learning and modesty. He wrote a "Harmony of the Gospels," and other works; and died at Ghent, in 1579.

JANSENS, ABRAHAM, an historical painter, was born at Antwerp in 1569. He was contemporary with Rubens, and, in many respects, was accounted not inferior to him.

JANSENS, CORNELIUS, called also **JOHNSON**, an eminent portrait-painter, was born at Amsterdam. He resided in England several years, and was engaged in the service of King James I. His paintings are easily distinguished by their smooth, clear, and delicate tints, and by a strong character of truth and nature. His fame began to be obscured on the arrival of Vandyck in England; and the civil war breaking out some where his paintings were in the highest esteem. Died, 1665.

JANSENS, VICTOR HONORIUS, a celebrated historical painter, was born at Brussels, in 1664. He associated with Tempesta, the celebrated landscape painter, for several years, and painted the figures in the works of that great master as long as they resided together. For small historical pictures, he was preferred to all the painters of his time. Died, 1739.

JARIX, GYSBERT, the Frisian poet, was born in 1608. He was a native of Bolsward, in Friesland, and spent his life there as a schoolmaster and clerk to a congregation. He died of the plague in 1666, as did also his wife and their only surviving son. His

poems entitled "Frisian Rhymes" were not published till 1668. A second edition appeared thirteen years after, a third in 1821, and a fourth in 1855. It had the singular distinction of being for a century the only printed Frisian book. His countrymen are proud of Jarix, and his poems are spoken of with enthusiasm by recent Frisian writers.

JARCHI, SOLOMON BEN ISAAC, a learned rabbi, born at Troyes, in 1104; travelled over a considerable portion of Europe and Asia; and, on his return to France, wrote Annotations on various parts of the Bible, and also on the Talmud, which were thought so highly of, that he was universally called "the prince of commentators." Died, 1180.

JARDYN, KAREL DU, a celebrated painter of landscapes and animals, was born at Amsterdam, in 1640. He studied in Italy, where he acquired great reputation, and died at Venice in 1678.

JARNOWICK, or GIORNOVICH, GIOVANNI MANE, a celebrated violinist, was born at Palermo in 1745, and was the most accomplished pupil of Lulli. For several years he resided in Paris, and was considered at the head of his profession; he afterwards came to England, where he was very popular; but on being invited to settle at Petersburg, he went thither, where he died in 1804. He was an eccentric and irritable as he was clever, and numerous singular anecdotes are recorded of him.

JARS, FRANCIS DE ROCHECHOUART, Chevalier de, a French officer, whose boldness and fortitude deserve to be recorded, was a knight of Malta, and commander of Lagny le Sec. He was arrested and confined in the Bastille, at the time of the prosecution of Chateaufeuf, keeper of the seals, in 1633, him relative to the designs of Chateaufeuf and others; and after eleven months' close confinement, during which he was examined 80 times, without inculpating his friends, he was sent to Troyes, and there tried and condemned. He mounted the scaffold, but a reprieve was announced while his head lay on the block; upon which he was conveyed back to prison, where he continued for some time in a state of insensibility. He lived to play a part in the war of the Fronde, and died about 1660.

JAUCOURT, the Chevalier **LOUIS DE**, member of the Royal Society of London, and of the Academies of Berlin and Stockholm, was born in 1704. He devoted himself entirely to literary pursuits, and died at Compiègne in 1780. He furnished the Encyclopédie Française with many valuable articles, and conducted the "Bibliothèque Raisonnée." He also assisted in publishing the "Museum Sebæanum," 4 vols. folio, and composed a "Lexicon Medicum Universale," the MS. of which, in 6 vols. fol., was lost on board of a ship which foundered on her passage to Amsterdam.

JAY, JOHN, an eminent American jurist and statesman, was born at New York, in 1745. After studying at Columbia (then King's) College, he was admitted to the bar, and in 1774 was chosen a delegate to the first American congress, at Philadelphia. In

1776 he was chosen president of the congress; in 1777 he was a member of the convention which framed the constitution of New York; and in the following year he was appointed chief-justice of that State. He was next sent as minister plenipotentiary to Spain; and in 1782 he was appointed one of the commissioners to negotiate a peace with Great Britain. The definitive treaty having been signed in September, 1783, he returned to the United States; and in 1784 he was sent as envoy extraordinary to Great Britain, and concluded the treaty which has been called after his name. In 1795 he was elected governor of his native State; this post he continued to occupy till 1801, when he declined a re-election, as well as a re-appointment to the office of chief-justice of the United States, and passed the remainder of his days in retirement. Died, 1829.

JAY, WILLIAM, an eminent dissenting divine, was born at Tisbury, in Wiltshire, in 1769. While earning his livelihood as a mason's boy, he attracted the notice of Mr Winter, and under his care and tuition he made such marvellous progress that when he was sixteen he was held worthy to preach before Rowland Hill's congregation in Surrey Chapel. After preaching in various parts of Wiltshire, he became the minister of Lady Maxwell's Chapel at the Hotwells, Clifton, in 1789; and in 1791 he was settled as the minister of Argyle Chapel at Bath; an office which he filled with unrivalled power and ability for the long period of sixty-two years. His works, which are very voluminous, consist of "Sermons," an "Essay on Marriages," *Memoirs of the Rev. Cornelius Winter* (his early benefactor), and the *Rev. John Clark*, "Lectures on Female Scriptural Characters," and his "Autobiography," the last two being posthumous publications. Died, 1853.

JEBB, JOHN, a divine and physician, was the son of Dr John Jebb, dean of Cashel, and born in London in 1736. He studied at Trinity College, Dublin, and Peter House, Cambridge; obtained church preferment, which, however, he resigned, and then commenced practice as a physician, in which he was very successful. He was a violent partisan; and, though conscientious in his religious opinions, their peculiar complexion, and the freedom with which he indulged in the political squabbles of the day, obstructed his professional progress. He was a fellow of the Royal Society, and a contributor to the *Philosophical Transactions*; and his works, theological, political, and medical, form 3 vols. Died, 1786.

JEBB, Dr SAMUEL, an eminent physician and classical scholar, was a native of Nottingham. He studied at Cambridge; and, adopting the principles of the nonjurors, became librarian to the famous Jeremy Collier. While at the university he published the "Dialogue of Justin Martyr with Trypho the Jew," in Greek and Latin. He afterwards married the daughter of an apothecary, procured the degree of M. D., practised as a physician at Stratford, in Essex, and retired to Derbyshire, where he died in 1775. Dr S. Jebb was the conductor of a classical journal, entitled "Bibliotheca

Literaria," and the editor of Roger Bacon's "Opus Majus."

JEFFERSON, THOMAS, third president of the United States, was born in 1743, at Shadwell, in Virginia, and was brought up to the bar. In 1769 he was elected a member of the provincial legislature, married in 1772, and in 1775 he entered congress, and took a conspicuous and very decided part in opposition to the measures which England had adopted towards her American colonies; and it was he who drew up the famous declaration of independence. In 1776 he retired from his seat in congress, and was next chosen governor of Virginia, which post he held two years. On the return of Dr Franklin to America, in 1785, Mr Jefferson was named his successor at Paris, from which he proceeded, as envoy, to London, in 1786. At the usual presentation, however, to the king and queen, both Mr Adams and himself were received in the most ungracious manner, and, after a few vague and ineffectual conferences, he returned to Paris. Here he remained, with the exception of a visit to Holland, and the south of France, until the autumn of 1789, zealously pursuing whatever was beneficial to his country. He subsequently filled the office of secretary of state under Washington, until 1793, when he resigned, and lived in retirement for four years. He was then elected vice-president, and in 1801 chosen president. At the expiration of eight years he again retired to private life; and on the 4th of July, 1826 (the 50th anniversary of American independence), he died. He was the acknowledged head of the republican party, and an acute politician; eloquent and persuasive in conversation, and possessing the faculty of acquiring an ascendancy in his political connections. The "Memoirs and Correspondence" of Jefferson were published in 1829; a "Life" by Tucker in 1837; and more recently a work entitled "Jefferson and the American Democracy," by Cornelius de Witt.

JEFFREY, FRANCIS, Lord, equally eminent on the bench, at the bar, and in the world of letters, was born at Edinburgh, in 1773. Having passed through the usual curriculum of the High School, Edinburgh, he repaired in 1787 to Glasgow University, then famous for its professors; and after a session passed at Oxford he returned to Edinburgh in 1792, where he completed his legal studies. In 1794 he was called to the Scottish bar, and though for some years he made little progress in his profession, yet he had well grounded himself in the principles of both the civil and the Scottish law, and had diligently applied himself to the cultivation of eloquence, as well in speech as in written composition. In the celebrated school of debate, whence many orators have proceeded—the Speculative Society of Edinburgh—he bore a most distinguished part; and there are those still living who can never forget his singular readiness in debate, the subtlety of his reasoning, and the extraordinary liveliness of his fancy. He had obtained a fair share of practice, when he joined a firm

joined a few of

his more intimate friends in establishing the "Edinburgh Review," of which he was sole editor for the long period of 27 years. The first number appeared Oct. 25, 1802, and there were three editions exhausted in as many weeks. The great and increasing success of this journal, while it raised him in the public estimation, in no way interfered with his progress towards extensive practice at the bar. Having for many years been at the head of his profession, he was in 1829 chosen dean of the Faculty, upon Lord Moncrieff being raised to the bench. It was deemed advisable that he should, on this occasion, give up the editorship of the Review, and we believe that he only upon one or two subsequent occasions contributed any papers to this famous journal. On the formation of the Whig ministry, late in 1830, he was made lord advocate; and after sitting a short time for the Perth district of burghs and for Malton, he was, in conjunction with Mr Abercrombie, now Lord Dunfermline, the first member chosen to represent Edinburgh in parliament, immediately after the passing of the Reform Bill. His success in the House of Commons fell short of the expectation of his admirers, chiefly because he entered so late in life on a new field, and partly because he spoke generally above his audience. But he never addressed the House without displaying that subtlety, readiness, and fancy for which he was distinguished. In 1834 he was promoted to the bench; and he is by common consent allowed to rank among the ablest judges that ever sat on the Scottish bench. In society his powers were great, his social intercourse fascinating; and his occasional *jeu d'esprit* cannot be easily forgotten by any who heard them. His integrity, both professional and political, was unimpeachable; his spirit was high and undaunted, his sense of honour quick and delicate, his temper most kindly and sweet, and his affections warm and steady. In short, it would be difficult to name any great man, whether in the world of law or of letters, whose personal good qualities were so entirely without an exception; and hence his removal from this earthly scene was mourned widely and deeply with no common sorrow. Some years before his death he published a selection from his contributions to the Edinburgh Review, accompanied by a graceful preface and explanatory notes. Lord Jeffrey were published shortly after his death by his friend Lord Cockburn.

JEFFREYS, GEORGE, Baron Wem, Lord, commonly known by the name of Judge Jeffrey, was born at Acton, in Denbighshire, towards the middle of the 17th century, and was educated at Shrewsbury School. He studied at Westminster and the Inner Temple, and rose through the gradations of recorder of London, a Welsh judge, and chief justice of Chester, till at length, in 1750, he attained the dignity of chief justice of the King's Bench. On the accession of George II., he became one of the advisers and promoters of all the oppressive and arbitrary measures of his reign; and, for his sanguin-

ary and inhuman proceedings against the adherents of Monmouth, was rewarded with the post of lord high chancellor in 1685. His conduct on the bench was, in the highest degree, discreditable at all times, and he indulged in scurrility and abuse of the most degrading description. On the arrival of the Prince of Orange, he disguised himself as a seaman, in order to get on board a ship unknown to him, but, was detected in a low public house at Wapping, by an attorney whom he had insulted in open court. The latter making him known, he was seized by the populace, carried before the council, and committed to the Tower, where he died, April 18, 1689. His portrait, painted by Kneller, is in the National Portrait Gallery.

JEFFRIES, JOHN, M. D., an American physician, was born at Boston, in 1747. Having studied medicine at the university of Cambridge, he went to London, and on his return to Boston, practised with great success, until the evacuation of that city by the British garrison. He then accompanied General Howe to Halifax, and was made surgeon-general to the forces in 1776. He subsequently resigned his army appointive post of surgeon-general to the forces in India, and in 1780 settled in London. He there occupied himself much in scientific research; and in order to ascertain the correctness of certain preconceived hypotheses relative to atmospheric temperature, he undertook two aerial voyages; the second of which was made Jan. 7, 1785, from the cliffs at Dover, across the British Channel, into the forest of Guinnes in France, and was the only successful attempt that had then been made to cross the sea in a balloon. In 1789 he again returned to Boston, and continued to practise there, with success, till his death, in 1819.

JEHANGHIR, ABUL MUZAFFER NOUR-EDDIN MOHAMMED, Mogul emperor of Hindostan, and son of the famous Akbar, whom he succeeded on the throne of Delhi in 1605. Unlike most eastern despots, he was generous, affable, and easy of access to his subjects, and a patron of literature and arts. He wrote memoirs of the first 17 years of his reign, and added to the historical commentaries of Sultan Baber. Nourjehan, his wife, celebrated equally for her beauty and wit, had great influence on the conduct of state affairs, and has been the fertile theme of oriental poems and romances. An interesting account of the court of Jehanghir, and of the state of India during his reign, was written by Sir T. Roe, who was sent ambassador from James I. to the court of the Mogul in 1615. Jehanghir died in 1627.

JEKYLL, Sir JOSEPH, a lawyer and statesman in the reigns of Queen Anne and George I., was the son of a clergyman in Nottinghamshire. He was a member of parliament, and one of the managers of the trial of Sacheverel; was knighted by George I., who raised him to the office of Master of the Rolls; and died, aged 74, in 1738.

JENKINS, DAVID, a loyal and intrepid judge, was born at Hensol, in Glamorganshire, in 1686. In 1645, when "civil war

ran high," he was taken prisoner at Hereford, and sent to the Tower; from whence he was removed to Newgate, impeached of treason, and brought to the bar of the House of Commons, where he refused to kneel, and called the place "a den of thieves." The assembly, in a fit of rage, were about to sentence him to be hanged; upon which he said that he would suffer "with Magna Charta under one arm, and the Bible under the other." A facetious speech from Henry Marten allayed this tempest as regarded his life; but he was fined £1000 for contempt, and recommitted to Newgate, where he remained till 1656. Died, 1667.

JENKINS, HENRY, a reputed centenarian, was an inhabitant of the parish of Bolton, in Yorkshire. The story is, that he was born about 1501, he was 12 years old at the battle of Flodden Field, which he could remember, and lived 169 years, dying at Ellerton-upon-Swale, 8th December, 1670. He was a poor man, and could neither read nor write; he swore once on an assize-trial to a right of way existing for 140 years; and he retained his faculties to the last. The case is so extraordinary, so contrary to all experience, as to justify disbelief in the absence of any solid and irresistible evidence.

JENKINS, SIR LEOLINE (LEWELLYN), a civilian and statesman, born at Llantrissant, in Glamorganshire, in 1623. He was educated at Jesus' College, Oxford; and, on the breaking out of the civil war, took up arms on the side of royalty. He afterwards became tutor to several young gentlemen, and during the protectorate, quitted the kingdom with them; but at the Restoration he returned to his college, was created LL.D., and elected principal. He then removed to Doctors' Commons, was admitted an advocate, and, in 1665, appointed judge of the court of admiralty. In 1672 he was sent as ambassador to Holland to negotiate a treaty of peace, though without success; but afterwards, in conjunction with Sir William Temple, whom he succeeded as ambassador at the Hague, he effected the treaty of Nimeguen. On his return to England he was sworn a privy councillor, and made secretary of state; which office he resigned in 1684, and died in 1685. His letters and papers were published in 2 vols. fol. 1724. His portrait, by Herbert Tuer, is in the National Collection.

JENNER, EDWARD, an English physician, the celebrated discoverer of vaccination, was born at Berkeley, Gloucestershire, in 1749, and after studying in London under John Hunter, settled at Berkeley as a medical practitioner. About the year 1776, his attention was turned to the cow-pox, by the circumstance of his ascertaining that those persons who had been affected with this disease, were thereby rendered free from variolous infection (small-pox). From that time till 1796 he steadily pursued his investigation of this discovery; and having at length established its general efficacy, amidst all the opposition naturally to be expected in such a case, the practice of vaccination was introduced into the London hospitals, the army and navy, &c., and, finally, extended to every part of the globe. Honours

and rewards were now conferred on Dr Jenner as a public benefactor; parliamentary grants of £10,000 and £20,000 were voted him; learned societies at home and abroad enrolled him as a member; and when the allied sovereigns visited England in 1814, the emperor of Russia sought an interview with him, and offered to bestow on him a Russian order of nobility. Dr Jenner's writings consisted merely of "Observations on the Variolæ Vaccinæ," a paper in the Philosophical Transactions. "On the Natural History of the Cuckoo," and other papers on Natural History. Died, 1823. A portrait of Jenner, by Northcote, is in the National Portrait Gallery. A monument to his memory was erected by the French, at Boulogne, in 1865.

JENYNS, SOAME, an entertaining miscellaneous writer, was the only son of Sir Roger Jenyns, born in London, in 1704. Having entered into public life as representative of the county of Cambridge, he began his career by supporting Sir Robert Walpole, and ever after remained a faithful adherent to the minister for the time being. His attachment to ministers was rewarded by his being made a commissioner of the Board of Trade, an office he held for five-and-twenty years. As a country gentleman and magistrate, Jenyns appeared to much greater advantage than as a politician; but it is as an author, a wit, and a shrewd observer of manners, that he is principally remembered. His chief works are "Poems," 2 vols., "Free Enquiry into the Origin of Evil," "A View of the Internal Evidence of the Christian Religion," "Political Tracts," and some others; all collected into 4 vols. 12mo, with his Life prefixed. Died, 1767.

JERNINGHAM, ELWARD, a poet and miscellaneous writer, was descended from an ancient Roman Catholic family, and born in Norfolk, in 1727. He was educated at Douay and Paris; but on his return to England, he joined the established church. He was author of some tragedies and poems; he also wrote "An Essay on the mild Tenour of Christianity," &c. Died, 1812.

JEROME, or HIERONYMUS, Sr, one of the fathers of the church, was born in 331, at Stridon, on the frontiers of Dacia, and studied at Rome, under Donatus the grammarian. He was ordained a presbyter at Antioch, in 378; and soon after went to Constantinople, where he lived with Gregory Nazianzen. In 382 he visited Rome, and was made secretary to Pope Damasus; but three years afterwards he returned into the east, accompanied by several female devotees, who wished to lead an ascetic life in the Holy Land; and died in 420, superintendent of a monastery at Bethlehem. Jerome was one of the most learned of the fathers, and took a leading part in the religious controversies of his age, combating especially Vigilantius, Jovinian, Rufinus, and Pelagius; but as a theological disputant he was violent and acrimonious in a high degree. His writings are very numerous, the most important being his Commentaries on various parts of the Bible. The church owes to him the Latin translation of the Bible, well-known under the name of the Vul-

gate. His classical.

A New Universal Biography.

gate. His style is singularly pure and classical.

JEROME OF PRAGUE, so called from the place of his birth, studied in the universities of Oxford, Paris, Prague, &c.; was a disciple of Wickliffe, and boldly followed the great reformer, Huss, in propagating his doctrines. He attacked the worship of images and relics with ardour, trampled them under foot, and caused the monks, who opposed him, to be arrested. He publicly burned, in 1411, the bull of the crusade against Ladislaus of Naples, and the papal indulgences. When Huss was imprisoned at Constance, he hastened to his defence; but on his attempting to return to Prague, the duke of Salzburg caused him to be seized, and carried in chains to Constance. He here received, in prison, information of the terrible fate of his friend, and was terrified into a momentary recantation of his principles; but he resumed his courage, and, retracting his recantation, avowed that none of his sins tormented him more than his apostasy, while he vindicated the principles of Huss and Wickliffe with a boldness, energy, and eloquence, that extorted the admiration of his adversaries. He was, however, condemned to be burnt; which sentence he endured with heroic fortitude, May 30, 1418.

JERROLD, DOUGLAS, a celebrated humorist, novelist, and dramatic writer, was born in London, in 1803, though his early home was Sheerness, where his father was manager of a theatre. His first start in life was as a midshipman; but he only remained two years at sea, and in 1818 he came to London, where he entered a printer's office as compositor, and during his leisure hours made himself familiar with the great masters of English literature, with Shakspeare at their head. His early familiarity with the stage soon made itself felt; and before he had completed his twentieth year he had written various theatrical pieces, some of which, such as, "More Frightened than Hurt," still keep possession of the stage. A quarrel with Davidge, manager of the Coburg theatre, for which he had composed some stage pieces, led to his appointment as dramatic author to the Surrey theatre, then under the management of Mr Ellison; and here he produced, in 1826, his famous naval piece of "Black-eyed Susan," which was received with enthusiasm on its first appearance, played for more than 300 nights in succession, and transferred to the larger theatres of the metropolis. This great success was followed by "Nell Gwynne," "The School-fellows," "The Housekeeper," and "The Rent Day," which was suggested and elaborated from Wikkie's famous picture, and brought out at Drury Lane, in 1830. The best part of his life was thus given up to writing for the stage; but after this period appeared in succession the greatest and most successful of his comedies, "The Prisoner of War," "Bubbles of a Day," "Time works Wonders," "The Catpaw," "St Cupid," and "The Heart of Gold." Contemporaneously with these productions for the stage, he had worked his way into notice as a prose writer of a brilliant and original type, chiefly in periodicals. His "Men of Character," first

published in 1838, appeared in Blackwood's Magazine. Soon after the establishment of "Punch," Mr Jerrold became one of its most efficient editors and constant contributors. His first contributions were a series of papers signed "Q." These were followed by the "Story of a Feather," "Punch's Letters to his Son," and "Mrs Caudie's Lecture Lectures," which carried mirth and good humour to every household in the empire, and stamped him as one of the raciest writers and shrewdest observers of the age. In 1843 he founded the "Illuminated Magazines of Clovernook," and some time afterwards he founded "Jerrold's Shilling Magazine," in which his "St Giles and St James" appeared. A collected edition of his works was published in eight volumes, in 1851—1854. But notwithstanding his devotion to literature and the drama, Mr Jerrold was a keen politician. At one period of his life, he had contributed to the "Ballot," and had also acted as sub-editor of the "Examiner;" and in 1852 he became editor of "Lloyd's Weekly Newspaper," at a salary of £1000 a year; a post which he held till his death. In everything that he wrote, his aim was to advance the good of mankind; and in pursuing that object he displayed an amount of skill and good humour, though often concealed under an apparent harshness of phrase, and a brilliancy of wit as rare as it is charming. Douglas Jerrold was one of the greatest wits of the day, and his pointed sayings were in everybody's mouth. Died, 1857. A Life of Jerrold has been published by his son, Mr W. Blanchard Jerrold.

JERVAS, CHARLES, a portrait-painter, was born in Ireland, and studied under Sir Godfrey Kneller. By the generosity of a friend he was enabled to visit France and Italy, and at his return became a fashionable artist, was eulogized in some feeble verses by Pope, to whom he gave instructions in painting. He also published a translation of Don Quixote; to which Dr Warburton added an appendix on the Origin of Romances and of Chivalry. This translation has been several times reprinted, and is still esteemed for its fidelity. Died, 1739.

JERVIS, JOHN, Earl of ST VINCENT, a gallant English admiral, son of Swynfen Jervis, Esq., auditor of Greenwich Hospital, was born in 1734, and, at the early age of 10, entered the navy under Admiral Hawke. In 1755 he served as lieutenant under Sir C. Saunders, in the expedition against Quebec. In 1769 he was sent to the Mediterranean in the Alarm frigate, and on his return, in 1774, was promoted to the Foudroyant, of 84 guns. In this ship he fought under Admiral Keppel, in the memorable engagement of the 27th of July, 1778, and was the next to the Victory. In 1782 he was with Admiral Barrington's squadron, and in a close engagement took the Pegasus, of 74 guns, for which he was highly praised in the public despatches, and rewarded with the order of the Bath. At the end of the same year he was with Lord Howe at the relief of Gibraltar. In 1794, having accepted the command of a squadron equipped for the West Indies, he took the islands of Guada-

loupe, Martinique, and St Lucia. He was next employed on the Mediterranean station; and on the 14th of February, 1797, with 15 sail of the line, he defeated a Spanish force off Cape St Vincent, consisting of 27 ships, the smallest of which carried 74, and seven others from 112 to 130 guns each. For this service he was elevated to the English peerage, by the titles of Baron Ferris and Earl St Vincent, from the scene of his glory. To this was added a pension of £3000 a-year, and the usual vote of thanks. In 1779 he was created admiral; in 1801 he succeeded Earl Spencer as first lord of the admiralty, which post he resigned in 1804; in 1814 he was appointed general of marines, and, in 1821, admiral of the fleet. Lord St Vincent possessed a vigorous mind, and was as much distinguished for his stern and unrelaxing attention to naval discipline, as he was eminent for naval skill and gallantry. The whole of his long life was passed in the active duties of his profession; and he died in 1823, aged 88. A statue to his memory was erected in St Paul's cathedral, by a vote of the House of Commons. There is a biography of this great seaman by Captain Brenton.

JESSEY, HENRY, a learned Nonconformist divine, distinguished for his oriental and biblical knowledge, was born at West Rowton, in Yorkshire. He studied at St John's College, Cambridge, during Cromwell's protectorate, which he lost at the Restoration; and after having been imprisoned on account of his nonconformity, died in 1663. He wrote several theological works, and had made considerable progress in a new translation of the Bible.

JEUFFROY, R. V., an eminent gem and medal engraver, was born at Rouen, in 1749. His taste and genius for the art were such, that while he was at Rome, as an assistant to Pichier, his employer was in the habit of selling the productions of the young artist as antiques. On his return to Paris, he was made director of the school of gem engraving at the institution of the deaf and dumb. Died, 1826.

JEWELL, JOHN, a learned prelate of the church of England, who was bishop of Salisbury in the reign of Queen Elizabeth, and a great polemical writer against Popery. He was born in 1522 at the village of Buden, near Itracombe, Devonshire; studied at Oxford; and in 1546 openly professed the tenets of the Reformers. Having obtained the living of Sunningwell, Berks, he distinguished himself by his zeal and assiduity as a parish priest; but at the accession of Queen Mary, finding they were about to prosecute him as a heretic, he made his escape to the continent, and became vicemaster of a college at Strasburg. On the death of Mary he returned to England, was received with great favour by her successor, and in 1560 he was raised to the bishopric of Salisbury. His principal work is entitled "An Apology for the Church of England," originally written in elegant Latin, but translated into every European language; and which, it is said, had more effect in promoting the Reformation than any other book ever published. He died in 1571.

JEZZAR, surnamed THE BUTCHER, but whose real name was AHMED, was the famous pacha of Salda and Acre, who defended the latter place against Buonaparte. In his youth he was purchased by the celebrated Ali Bey, at that time master of Egypt; and from being a common mamluke, Ahmed, in a few years, became governor of Grand Cairo. Through a variety of conflicting events, not necessary to detail here, Jezzar was appointed pacha of Acre and Salda, on the death of Dagher; and for his zeal in opposing the redoubtable sheik, who had so long defied the power of the grand seignor, he was made a pacha of three tails, with the title of vizier. This advancement gave him an opportunity of extending the boundaries of his government, and in spite of the efforts of the Turkish court to displace him, he retained his authority to the last. After Buonaparte had vanquished the mamlukes he made friendly overtures to Jezzar, but they were indignantly rejected by him, and with the aid of the English squadron, under Sir Sidney Smith, he valiantly defended the city of St Jean d'Acre against the incessant attempts of the French to take possession of it; so that, after a siege of 81 days, the "conqueror of Egypt" was obliged to withdraw his forces, and leave Acre in undisputed possession of its brave defenders. He died, at an advanced age, in 1804, possessed of immense treasures; and, it is said, he delighted in the sanguinary title which he had acquired by his numerous acts of ferocity.

JOACHIM, an Italian monk of the 12th century, was abbot of the Cistercians at Corazzo, and afterwards of Flora in Calabria. He became remarkable for his pretended prophecies, and his speculations in regard to the Trinity, contained in a work entitled "The Everlasting Gospel." Died, 1202.

JOAN OF ARC, called also the Maid of Orleans, one of the most extraordinary characters in history, was born of poor parents, at Domremi, a village on the borders of Loorraine, in 1402; and became a servant at an inn, where she attended the horses, drove the cattle to pasture, and was employed in other similar services. At that time the affairs of France were in a deplorable state, and the city of Orleans was so closely besieged by the earl of Suffolk, that its fall appeared inevitable. In this exigency Joan, a meditative and pious maiden, deeply moved by the calamities of her country, believed and professed that she had received a call from heaven to devote herself to its deliverance. On being introduced, in 1412, to the king, Charles VII., she offered to raise the siege of Orleans, and conduct his majesty to Rheims to be crowned and anointed; at the same time demanding for herself a particular sword, which was in the church of St Catharine. After a little hesitation her request was complied with; and she at once set out. In a male dress, armed cap & pike, she bore the sword and the sacred banner, the signal of victory, at the head of the army. The general belief of her inspired character produced the most extraordinary effects. The first enterprise was successful. With

10,000 men, he took the city of Orleans, and supplies. He then marched the army from their quarters, and did not do the triumph, in the month of May, and followed; and he was not only an ennobler of Domremi, but he declared that and that shall be his life; but the who thought able, induced piégué, then gandy and the Here, after pe she was taken four months' imprisonment, he was deemed by the charge of funded herself and was carried and was carried dauntless court 29th year of her historic donh. French scholar, the execution of documents, it is covered from his still living in 14th century, the authenticity of the cusion.

JOHN, king of son of Henry I and born in 1166 for him, he was plete its conquest dence that it was him; and on the left without any for him the name His brother Rich throne, conferred Mortaigne, in Nor possessions in Eng to the rich heirlo ter. Notwithstan had the ingratit against Richard, king of France, Palestine; but R pardoned him, and his kingdom, in p Britany, the son Geoffry. Some of however, revolted John ultimately re nephew was captu castle of Falaise, v quently removed to more. Being sus Arthur, the states John to answer the Lord, King Philip; appear, the latter as the sentence of forfeit thus, after its aliena own for three centu mandy was recovere

10,000 men she marched from Blois, and, on April the 29th, 1429, entered Orleans with supplies. By bold sallies to which she animated the besieged, the English were forced from their intrenchments, and Suffolk abandoned the siege. Joan entered Orleans in triumph, in June she defeated Talbot at Patay, and in July the coronation at Rheims followed; after which Charles caused a medal to be struck in honour of the heroine, and ennobled her family. Her native town of Domremi also was exempted from all imposts for ever. After the coronation, Joan declared that her mission was at an end, and that she should now retire to private life; but the French commandant, Dunois, who thought she might still prove serviceable, induced her to throw herself into Compiegne, then besieged by the duke of Burgundy and the earls of Arundel and Suffolk. Here, after performing prodigies of valour, she was taken prisoner in a sally; and, after four months' imprisonment, was cruelly condemned by the English to be burnt alive, on the charge of sorcery. She resolutely defended herself from the absurd accusation, and was carried to the stake, where with dauntless courage she met her fate, in the 29th year of her age, May 30, 1431. A curious historic doubt has recently been raised by a French scholar, Deslepievre, as to the fact of the execution of the Maid of Arc: several documents, it is alleged, having been discovered from which it appears that she was still living in 1436, and even 1444. The authenticity of these documents is under discussion.

JOHN, king of England, was the youngest son of Henry II. by Eleanor of Guienne, and born in 1166. Ireland being intended for him, he was sent over, in 1185, to complete its conquest, but such was his imprudence that it was found necessary to recall him; and on the death of his father he was left without any provision, which procured for him the name of *Sans Terre*, or Lackland. His brother Richard, on coming to the throne, conferred on him the earldom of Mortaigne, in Normandy, and various large possessions in England, and married him to the rich heiress of the duke of Gloucester. Notwithstanding this kindness, he had the ingratitude to form intrigues against Richard, in conjunction with the king of France, during his absence in Palestine; but Richard magnanimously pardoned him, and at his death left him his kingdom, in preference to Arthur of Brittany, the son of his elder brother, Geoffrey. Some of the French provinces, however, revolted in favour of Arthur; but John ultimately recovered them, and his nephew was captured, and confined in the castle of Falaise, whence he was subsequently removed to Rouen, and never heard of more. Being suspected of the murder of Arthur, the states of Brittany summoned John to answer the charge before his liege lord, King Philip; and upon his refusal to appear, the latter assumed the execution of the sentence of forfeiture against him; and John, after his alienation from the French crown for three centuries, the whole of Normandy was recovered. A quarrel with the

haughty and able pope, Innocent III., who had nominated Stephen Langton to the see of Canterbury, added to the perplexity of the king, whom the pope excommunicated, and whose subjects he formally absolved from their allegiance. At length John was induced not only to receive Langton as archbishop of Canterbury, but abjectly to resign his kingdom to the holy see, in order to receive it again as its vassal. John had by this time rendered himself the object of such universal contempt and hatred, that his nobles determined, if possible, to limit his power, and establish their privileges; and though the pope declared his disapprobation of their conduct, the barons assembled in arms at Oxford, where the court then was, and immediately proceeded to warlike operations. They were received without opposition in London, which so intimidated the king, that he consented to whatever terms they chose to dictate. Thus was obtained that basis of English constitutional freedom, known as *Magna Charta*, which not only protected the nobles against the crown, but secured important privileges to every class of freemen. But while the monarch appeared to be all-complying and passive, he was secretly purposing to disannul the charter. The pope pronounced a sentence of excommunication on all who should attempt to enforce it; and John, having collected an army of mercenaries, carried war and devastation throughout the kingdom. The barons, taken by surprise, now sent a deputation to Philip of France, offering the crown of England to the dauphin Louis; who speedily, with 600 vessels, landed at Sandwich, and proceeded to London, where he was received as lawful sovereign. John was immediately deserted by all his foreign troops, and most of his English adherents; but the report of a scheme of Louis for the extermination of the English nobility arrested his progress, and induced many to return to their allegiance. While the king's affairs were beginning to assume a better aspect, he was taken ill, and died at Newark, in October, 1216, in the 49th year of his age, and the 17th of his reign.

JOHN XXIII., Pope, BALTHAZAR COSSA, was of a noble Neapolitan family. He was created cardinal in 1402, and elected pope on the death of Alexander V. in 1410. It was during the great schism in the papacy, and his rivals were Gregory XII. and Benedict XIII. He is said to have been an able ruler, but his character was not such as to fit him for the spiritual supremacy. Pressed by the Emperor Sigismund and other Catholic powers, he convoked a general council at Constance in November, 1414, and there he formally resigned the papal see. But he refused to publish a bull of his abdication, and aided by Frederick of Austria, he escaped from Constance, and again assumed his dignity. He was arrested at Friburg, was cited before the council in May, 1415, and then deposed and imprisoned. After four years' confinement he escaped, made his submission to Pope Martin V., and was named dean of the Sacred College. Died at Florence, November, 1419.

JOHN OF BEVERLEY. [BEVERLEY.]

JOHN CANTACUZENE. [CANTAU-ZENE.]

JOHN OF GAUNT, duke of Lancaster, was the fourth son of Edward III. and his queen Philippa, and was born at Ghent about 1340. He married Blanche, daughter of Henry, duke of Lancaster, and was created earl of Derby and duke of Lancaster. He took part with his brother, the Black Prince, in his Spanish expedition; married soon after Constance of Castile, and assumed the title of king of Castile; invaded France in 1373, and marched unopposed from Calais to Bordeaux; and succeeded his brother as governor of Gascony. In 1380 he invaded Scotland, and during his absence his palace at London was attacked and burnt by the insurgents under Wat the Tyler. He afterwards made an attack on Castile in alliance with the king of Portugal; but closed the war by marrying his daughter to the son of the king of Castile, and returned to England in 1389. In the following year Richard II. gave him the duchy of Aquitaine. By his first wife John of Gaunt was father of Henry IV. He married as his third wife Catherine Swynford, and died in 1399. He had distinguished himself as the firm and powerful protector of Wickliffe.

JOHN HYRCANUS. [HYRCANUS.]

JOHN PALÆOLOGUS. [PALÆOLOGUS.]

JOHN, DON, of Austria. [JUAN.]

JOHN OF LEYDEN. [LEYDEN, JOHN OF.]

JOHN OF SALISBURY, bishop of Chartres, in France, was born at Salisbury, in Wiltshire, in the beginning of the 12th century. He studied at Oxford, and under Abelard in France, and other eminent teachers on the continent. After his return to England, he became the intimate friend and companion of Thomas à Becket, whom he had attended in his exile, and he is said to have been present when he was murdered in Canterbury cathedral. He was one of the best classical scholars of his time, and an elegant Latin poet. He has a place too in the history of philosophy, the progress of which he promoted by his attacks on the scholastic logic. He left numerous works, among which are Lives of Archbishops Anselm and Becket, and a very curious book entitled "Polycraticon." Died, 1182.

JOHNES, THOMAS, a gentleman who distinguished himself by his attachment to literary pursuits, was born in 1748, at Ludlow, in Shropshire; studied at Eton, and Jesus College, Oxford; and sat in parliament for Cardigan, and subsequently for Radnorshire. He possessed an estate at Hafod, in Cardiganshire, where he built an elegant mansion, and furnished it with a noble library, and a complete typographical establishment, whence proceeded the works on which his literary reputation is founded. He translated the Chronicles of Froissart and Montrelet, Joinville's History of St Louis, Bertrand de la Brocquière's Travels in Palestine, and St Palays's Life of Froissart. Died, 1816.

JOHNSON, SAMUEL, a divine, eminent for his zeal, and for his numerous writings, in the cause of civil liberty, was born, in 1649, in the county of Stafford; received his

education at St Paul's School and at Trinity College, Cambridge; and became minister of Corringham, in Essex. In the reign of Charles II., while Lord Russell and his coadjutors were promoting the bill for excluding the duke of York from the succession to the throne, he published a tract, entitled "Julian the Apostate," for which he was fined and imprisoned. In 1686, when the army was encamped on Hounslow Heath, he drew up a paper, entitled "An humble and hearty Address to all the English Protestants in the present Army," for which he was tried, and condemned to stand in the pillory in three places, to pay a fine of 500 marks, to be degraded from the priesthood, and to be publicly whipped from Newgate to Tyburn. He bore all these disgraceful punishments with unshrinking fortitude, and continued to employ his pen in the same cause until the revolution, when the king offered him the rich deanery of Durham; but this he refused, as inadequate to his sufferings and services, which he thought merited a bishopric. He finally received a present of £1000, and a pension of £300 per annum for the life of himself and his son. Died, 1703.

JOHNSON, SAMUEL, the celebrated lexicographer, and one of the most distinguished writers of the 18th century, was born in 1709, at Lichfield, where his father was a bookseller. He completed his education at Pembroke College, Oxford; and in 1732 he became under-master of a free-school at Market Bosworth, in Leicestershire, which situation he was soon induced to quit, on account of the haughty treatment he received from the principal; and he next endeavoured to earn a scanty maintenance by literary employment. In 1735 he married Mrs Porter, the widow of a mercer at Birmingham, with a fortune of about £800, by which he was enabled to open a boarding-school; but the plan did not succeed, and, after a year's trial, he resolved to seek his fortune in London, in company with one of his few pupils, the celebrated David Garrick. In March, 1737, the two adventurers accordingly arrived in the metropolis, Johnson with his unfinished tragedy of "Irene" in his pocket, and with little to depend upon but his slender engagement with Cave, the proprietor of the Gentleman's Magazine. At this time he became acquainted with the reckless and unfortunate Savage, and in some respects his personal conduct was unfavourably affected by the intimacy; but from irregularity of this nature he was soon recovered by his deeply grounded religious and moral principles. His first literary production which attracted notice in the metropolis, was his "London," a poem in imitation of the third satire of Juvenal. He was soon after led to a new exercise of his literary powers in the composition of parliamentary debates, which, being then deemed a breach of privilege, were published under the fiction of "Debates in the Senate of Lilliput." The extraordinary eloquence displayed in these productions was almost exclusively the product of his own invention; but it is probable that he adhered more faithfully to the tenor of the arguments of the real speakers than to their language.

A New Universal Biography.

In 1747 he printed proposals for an edition of "Shakspeare," and the plan of his "English Dictionary," addressed to Lord Chesterfield. The price agreed upon between him and the booksellers for the last work was £1575. In 1749, Garrick brought his friend's tragedy of "Irene" on the stage at Drury Lane, but it was unsuccessful. In 1760 he commenced his "Rambler," which was continued till 1762. In this work only five papers were the productions of other writers. Soon after the close of this paper he lost his wife, a circumstance which greatly affected him, as appears from his Meditations, and the sermon which he wrote on her death. In 1755 appeared his Dictionary, and the same year the university of Oxford conferred on him the degree of M.A. Lord Chesterfield endeavoured to bring it into notice by writing two papers in its favour in "The World," but as he had hitherto neglected the author, Johnson treated him with contempt. The publication of this great work did not relieve him from his embarrassments, for the price of his labour had been consumed in the progress of its compilation. In 1759 he began the "Idler," a periodical paper, which was published in a weekly newspaper. On the death of his mother, in 1759, he wrote the romance of "Rasselas" to defray the expenses of her funeral. In 1762 the king granted him a pension of £300 per annum, without any stipulation with respect to his literary exertions. Johnson had the honour of a conversation with the king in the royal library, in 1765, when his majesty asked if he intended to publish any more works? To this he answered, that he thought he had written enough; on which the king said, "so should I too, if you had not written so well." About this time he instituted the Literary Club, consisting of some of the most celebrated men of the age. It was at this period, too, that his intercourse with the Thrale family began, which, for years, produced him so much social enjoyment. In 1773 he went on a tour with Mr Boswell to the western islands of Scotland, of which journey he shortly after published a highly interesting account; but which gave offence to many, by the violent attack therein made on the authenticity of the poems attributed to Ossian. In 1776 the university of Oxford sent him the degree of L.L.D. by diploma. In 1770 a work which, on the whole, may be regarded as a model of literary biography. After a long illness, during part of which he entertained much gloomy apprehensions, his faith which he had so vigorously defended and inculcated by his writings, Dec. 19, 1784. The character of this great man is thus summed up by Bishop Cleig:—"Without claiming for him the highest place among his contemporaries, in any single department of literature, we may use one of his own expressions, 'that he brought more variety to every subject, and had a greater variety of knowledge ready for all occasions, than almost any other man!' Though religious to superstition, he was in every other respect so remarkably incredulous,

that Hogarth said, while Johnson firmly believed the Bible, he seemed determined to believe nothing else. The same energy which was displayed in his literary production was exhibited also in his conversation, lively; like the sage in 'Rasselas,' he spoke, and conviction watched his lips; he reasoned, and nervousness closed his periods; when he pleased, he could be the greatest sophist that ever contended in the lists of declamation; and perhaps no man ever equalled him in a roughness in his manner which subdued the saucy, and terrified the meek; it was only, however, in his manner; for no man was more loved than Johnson was by those who knew him; and his works will be read with veneration for their author, as long as he is understood." Boswell's "Life of Johnson" is too well known to need more than a word of mention; as are also the eloquent Essays of Lord Macaulay and Thomas Carlyle on Johnson's Life and Character.

JOHNSON, THOMAS, an English botanist, was born at Selby, in Yorkshire. He was bred an apothecary in London, and became, says Wood, the best herbalist of his age. He wrote "Iter in Agram Cantuarium" and "Ericetum Hamstedianum," which were the first local catalogues of plants published in England. But his great work was an improved edition of "Gerard's Herbal." In the civil wars he entered into the royal army; at the siege of Basing-house he received a wound, of which he died in 1644.

JOHNSTON, ARTHUR, a physician and poet, was born in 1687, near Aberdeen, and educated at that university; on leaving which he went to Padua, where he took his doctor's degree, and then settled in Paris. After an absence of nearly 40 years, chiefly spent in foreign travel, he returned to Aberdeen, and became principal of the university till Archbishop Laud invited him to London, and obtained for him the appointment of physician in ordinary to Charles I. He published a collection of Latin epigrams, an elegant paraphrase of the works of Latin verse, and a selection of the Psalms in Scottish writers, entitled "Poetarum Scotticorum Deliciae." Died, 1641.

JOHNSTON, GEORGE, an eminent Scottish naturalist, was born in 1798. He graduated M. D. at Edinburgh in 1819, and established himself at Berwick-on-Tweed. But he found time amidst the labours of his profession to gratify his taste for natural history, and to make some valuable contributions to zoology and botany. His first work was a "History of British Zoophytes," which appeared in 1838, and was followed by a "History of British Sponges and Lithophytes," "Elements of the Natural History of Molluscous Animals," and "Botany of the Eastern Borders." He contributed many valuable papers to the Magazine of Zoology and Botany, and the Annals of Natural History, was one of the founders and secretaries of the Ray Society, and one of the founders of the Berwickshire Naturalists' Club. Died, 1855.

JOHNSTON, JAMES F. W., professor of chemistry and writer on scientific agriculture, was born at Paisley about 1796. For the most part a self-educated man, he kept a school at Durham for several years, but after his marriage in 1830 he went to study chemistry in Sweden under Berzelius. He was appointed professor of chemistry and mineralogy at the new university of Durham in 1833, and four years later was chosen F. R. S. He applied himself especially to the study of the relations of chemistry and geology to agriculture, and the fruits of his researches appeared in his "Elements," "Lectures," and admirable "Catechism" of Agricultural Chemistry and Geology. The latter had passed through fifty editions in 1857, has been translated into almost every European language, and introduced into the schools of Germany, Holland, Italy, Sweden, Poland, and some of the provinces and states of both North and South America. His last work was the well-known "Chemistry of Common Life," in which he has with singular felicity combined the clear knowledge of the man of science with the enthusiasm of a poet. He was also author of "Notes on North America," and a contributor to the Edinburgh Review, and to the Transactions of several scientific bodies. Died at Durham, 1853.

JOHNSTONE, Chevalier de, an adherent of the Pretender, was the son of a merchant of Edinburgh, and born in 1720. At an early age he evinced an inclination for a military life; and being brought up in Jacobite principles, he left Edinburgh privately on the breaking out of the rebellion in 1745, and joined the insurgents. He was appointed aide-de-camp to the unfortunate Prince Charles Edward; fought at the battle of Preston Pans; and raised an independent company, with which he served throughout the campaign. After the battle of Culloden, he sought for safety in flight; and, disguised as a pedlar, he passed through England, and at length escaped to the continent. He subsequently entered into the service of France, and acted in the capacity of aide-de-camp in Canada; on the conquest of which by the British he returned to France, and died there at an advanced age. His "Memoirs of the Rebellion in 1745 and 1746," which occupied his latter years, is a very interesting work.

JOHNSTONE, Dr BRYCE, an eminent Scotch divine, born in 1747, was a son of John Johnstone, Esq., a highly respectable magistrate of Annan, in Dumfriesshire. He entered the university of Edinburgh in 1762; in 1771 he was appointed minister of Holywood; and in 1786 the degree of D. D. was conferred on him. He was author of a "Commentary on the Revelation of St John the Divine," 2 vols. 8vo; an "Essay on the Influence of Religion on Civil Society and Civil Government;" and some sermons. He also assisted Sir John Sinclair in drawing up the statistical account of Scotland; and contributed greatly towards the improvement of the agricultural and social condition of his native country. Died, 1805.

JOHNSTONE, JOHN HENRY, a celebrated comic actor and vocalist, was born in 1750

at Tipperary, where his father was a small farmer. At the age of 18 he enlisted in a regiment of Irish dragoons, and soon attracted the notice of his comrades by his fine voice and good-humoured liveliness. The colonel of the regiment granted his discharge, and gave him a recommendatory letter to Mr Ryder, then manager of the Dublin theatre, who engaged him for three years. His fame as a vocalist increased rapidly; and Macklin, the celebrated actor, advised him to try the London boards, and wrote a letter to Mr Harris, of Covent Garden, so strongly in his favour, that he engaged Johnstone and his wife for three years. He made his first appearance at Covent Garden Theatre, in October, 1783, in his favourite character of Lionel. His best efforts were afterwards directed to the personation of Irish characters; and his native humour, rich brogue, and fine voice carried him to a height of excellence in the path he had chosen, which left every competitor far behind. In 1803 he quitted Covent Garden for Drury Lane, and in the summer of that year he visited Dublin, where martial law being then in force, the company performed in the daytime. On his return from Ireland his wife died; and he married again. As an actor, in his line he stood alone, personating his buoyant and blundering countrymen, both patrician and plebeian, with a degree of fidelity altogether unrivalled; while his habits of prudence, which enabled him to accumulate a good fortune, were not so strict as to interfere with his social enjoyments. He died, Dec. 26, 1828, in the 78th year of his age.

JOHNSTONE, JOHN, M. D., an eminent physician of Birmingham, who for upwards of 40 years held a distinguished station among his professional brethren, was the son of Dr James Johnstone, of Worcester, and was educated at Merton College, Oxford. Dr John Johnstone was considered peculiarly successful in his treatment of fever, and somewhat remarkable for the sparing use he made of medicinal preparations; but it is not only of his skill and talents as a physician, but as a man of letters that we have to speak of him. He was the intimate friend of Dr Parr, and his "Life" of that great scholar affords ample evidence of his own literary acquirements and comprehensive mind. Besides these Memoirs of Dr Parr, which is a noble specimen of biography, he was the author of several treatises on medical subjects; he was also a fellow of the College of Physicians and the Royal Society; and was held in high estimation for his acquirements and general character by a large circle of friends, eminent for rank and talents. Died, aged 68, Dec. 28, 1838.

JOINVILLE, JEAN, Sire de, an eminent French statesman and historian of the 15th century. He accompanied Louis IX. in his first crusade or expedition to Egypt, in 1250, sharing his master's captivity, and rendering him many important services. In the king's second crusade, however, he declined taking a part; and subsequently employed himself in writing the "History of St. Louis," one of the most interesting documents existing relative to the history

of the middle ages.

JOLLY, Cardinal de, of his Time, count of tri which is in patron.

JOMELLI was born in of Naples. I in his own c favourite. I Rome, Venice Italy, every from rival m of 36 operas, among which and "Miserer JONAS, or of Iceland, d and historian. the history of also an able science under 85, in 1640.

JONES, JOHN, LL ter, and a philologic of Caermarthenshire tion at the Disen was pastor to a U at Plymouth Doc

of the middle ages. He died in 1318, aged 80.

JOLLY, GUY, the confidential secretary of Cardinal de Retz, and author of "Memoirs of his Times," containing an interesting account of transactions from 1648 to 1668, in which is included the private history of his patron.

JOMELLI, NICCOLO, musical composer, was born in 1714, at Aversa, in the kingdom of Naples. He composed a number of operas in his own country, and became a popular favourite. He afterwards visited Bologna, Rome, Venice, and other principal cities of Italy, everywhere carrying away the palm from rival musicians. He was the author of 36 operas, and many devotional pieces, among which are his celebrated "Requiem" and "Miserere." Died, 1774.

JONAS, or JONAE, AINGRIM, a native of Iceland, distinguished as an antiquary and historian. His works relate chiefly to the history of his own country; but he was also an able astronomer, and had studied the sciences under Tycho Brahe. He died, aged 88, in 1640.

JONES, INIGO, a celebrated architect, and the first who introduced the Italian style of architecture in England, was born in London, about 1572. He was at first an apprentice to a joiner; but his talent for drawing having attracted the notice of the earl of Arundel and Pembroke, the latter supplied him with the means of visiting Italy, for the purpose of studying landscape painting. He went to Venice, where the works of Palladio inspired him with a taste for architecture; and he afterwards devoted all his energies to that art. He soon obtained the situation of first architect to Christian IV., king of Denmark, who, visiting his brother-in-law, James I., in 1606, brought Jones with him to England. The queen chose him as her architect; and the place of surveyor-general of the board of works was granted to him in reversion. Jones went to Italy again in 1612, and on his return was engaged to build a palace at Whitehall, but he only completed the Banqueting-House. In 1620 he was appointed one of the commissioners for repairing St Paul's cathedral; but this was not commenced till 1623. He was much employed in preparing masques for the entertainment of the court, but while thus engaged he quarrelled with the poet, Ben Jonson, who ridiculed him on the stage. Jones realized a handsome fortune; but being a Roman Catholic, and a partisan of royalty, he suffered severely in the civil war. At length, worn down by sorrow and suffering, he died, July 21, 1652. Jones has been much laughed at for the absurd opinion he arrived at respecting Stonehenge, which he pronounced to be a Roman temple, dedicated to Cæsar. Many of his architectural designs have been published by Kent, Ware, and

JONES, JOHN, LL.D., a Unitarian minister, and a philological writer, was a native of Carmarthenshire, and received his education at the Dissenting College, Hackney. He was pastor to a Unitarian congregation, first at Plymouth Dock, and next at Halifax,

in Yorkshire; but he eventually settled in London, and employed himself in literary pursuits and private tuition. He was the author of numerous publications; among which are, "A Development of remarkable Events calculated to restore the Christian Religion to its Original Purity," 2 vols.; "Illustrations of the Four Gospels," 2 vols.; a "Greek and English Lexicon;" &c.; others, both educational and devotional. Died, 1827.

JONES, JOHN GALE, by profession an apothecary, but far better known as a political orator, was born in 1771. At the breaking out of the French revolution he became a leading member of the London Corresponding Society; and, until a few years before his death, he was known as a popular declaimer at the various political meetings held in the metropolis. Having rendered himself obnoxious to the government by his violence, and impugned the proceedings of the House of Commons, he was committed to Newgate in February, 1810, and there remained till the prorogation of parliament, June 21. The part he took in advocating republican doctrines had formerly subjected him to a trial at the Warwick assizes, when he obtained a verdict of acquittal, through the skillful advocacy of his counsel, Sir Samuel Romilly. As a public speaker he was fluent, energetic, and impressive; in private life he is said to have been unassuming and an instructive companion. Died, April, 1838.

JONES, OWEN, a Welsh antiquary, and a member of the Gwyneddigion, or Cambrian Society for encouraging the Bardic Language, and Music of Wales, was born, 1740, and died in 1814. He collected and published "The Archaeology of Wales," the "Poems of Dafydd ap Gwilym," and other productions.

JONES, PAUL (whose real name, it is said, was John Paul), a naval adventurer, was a native of Selkirk, in Scotland, and born in 1747. His first voyage was to America, where he settled early in life; and at the commencement of the struggle between the colonies and the mother country, he offered his services to the former, and was appointed first of the first lieutenants. In 1778 he obtained the command of a ship under Commodore Hopkins, and distinguished himself in several engagements, for which he received his commission as captain. He then sailed to France, and being well acquainted with the Irish coast, and the northern part of England, he conceived the design of effecting a descent. For a long time he kept the northern coast in a constant state of alarm; at length he effected a landing at Whitehaven, and having dismantled a fort, set fire to some shipping in the harbour. From thence he sailed for Scotland, where he landed on the estate of the earl of Selkirk, and plundered his lordship's house of all the plate. He next took the Drake'sloop of war, with which he returned to Brest. He afterwards sailed round Ireland to the North Sea, with three ships, the Richard, the Pallas, and Vengeance. Having committed great mischief on that coast, he fell in with the Baltic fleet, convoyed by the Serapis

frigate, and the Countess of Scarborough armed ship, the former of which, after a severe action, he captured off Flamborough Head. For these services the king of France conferred on him the order of merit, and gave him a gold-hilted sword. He afterwards was invited into the Russian service, with the rank of rear-admiral, where he was disappointed at not receiving the command of the fleet acting against the Turks in the Black Sea. He found fault with the conduct of the prince of Nassau, the admiral; became restless and impatient, was intrigued against at court, and calumniated by his enemies; and had permission, from the Empress Catharine, to retire from the service with a pension, which was never paid. He returned to Paris, sunk into poverty, and died in 1792. Jones was a man of decided courage, conducting all his operations with equal boldness and sagacity; to which may be added, that, notwithstanding the absence of instruction in his youth, he wrote with fluency, strength, and clearness, and was able to sustain his part respectably in the polished circles of Paris, where he was a great pretender to *ton*, and passed for "a poet as well as a hero."

JONES, WILLIAM, an English divine, eminent for his abilities and public spirit, and a strenuous champion of the Hutchinsonian doctrines, was born in 1726, at Lowick, in Northamptonshire. He was educated at the Charter House, and University College, Oxford, where he formed an intimate acquaintance with Mr Horne, afterwards bishop of Norwich. On leaving the university he became curate of Finedon, Northamptonshire, and next of Wadenhoe, where he wrote his "Catholic Doctrine of the Trinity," which passed through numerous editions. In 1762 he published "An Essay on the first Principles of Natural Philosophy." In 1764 the archbishop of Canterbury gave him the vicarage of Bethersden, in Kent, to which was afterwards added the rectory of Pluckley; and at the time of his death he was perpetual curate of Nayland, and rector of Paston and Holingbourne. When the French revolution gave birth to seditious movements in this country, Mr Jones printed "A Letter from Thomas Bull to his brother John," which was widely circulated by the friends of government. He was also concerned in establishing the British Critic; and he published a collection of excellent tracts, under the title of "The Scholar armed against the Errors of the Times." On the death of his friend, Bishop Horne, to whom he had been chaplain, he paid an affectionate tribute to his memory in an account of his "Life and Writings." His theological and philosophical works form 12 vols. 8vo. Died, 1800.

JONES, Sir WILLIAM, an eminent lawyer and orientalist, was the son of an able mathematician; and was only three years of age when his father died, in 1746. He was educated at Harrow School, from whence, at the age of 18, he went to University College, Oxford, where he had been but a few months before he was invited to be private tutor to Lord Althorpe, afterwards Earl Spencer, with whom he made a tour on the

continent. In 1766 he obtained a fellowship, and began his "Commentaries on Aesthetic Poetry." Soon after this he was engaged to translate the Life of Nadir Shah, from an eastern manuscript brought to England by the king of Denmark. Another tour to the continent, with his pupil and family, followed, which occupied his time until 1770, when, his tutorship ceasing, he entered himself as a law student in the Temple. He did not, however, abandon literature; but, on the appearance of the Life and Works of Zoroaster, by Anquetil du Perron, he vindicated the university of Oxford, which had been attacked by that writer, in an able pamphlet in the French language, which he wrote with great elegance. In 1776 he was made a commissioner of bankrupts; about which time his correspondence with his pupil evinced the manly spirit of constitutional freedom by which he was actuated; and to his feelings on the American contest he gave vent in a spirited Latin ode to Liberty. In 1778 appeared his translation of the "Orations of Isæus," with a prefatory discourse, notes, and commentary, which, for elegance of style, and profound critical and historical research, excited much admiration. In the mean time he rapidly advanced in professional reputation, and on the accession of the Shelburne administration, he obtained what had long been the object of his ambition, the appointment of judge in the supreme court of judicature in Bengal. The honour of knighthood was on this occasion conferred on him, and he soon after married Miss Shipley, daughter of the bishop of St Asaph, with whom he embarked for India in April, 1783. One of his earliest acts in India was the establishment at Calcutta of an institution on the plan of the Royal Society, of which he was chosen the first president. Another was, to take vigorous measures for procuring a digest of the Hindoo and Mahometan laws. He applied himself with ardour to the study of Sanscrit, and his health suffering from the climate, he took a journey through the district of Benares, during which cessation of public duties he composed a "Treatise on the Gods of Greece, Italy, and India." His translation of the celebrated "Ordinances of Menu," the famous Indian legislator, published early in 1794, had scarcely appeared, when he was seized with an inflammation of the liver, which terminated his truly valuable life on the 27th of April, in the 48th year of his age. As a judge he was indefatigable and impartial, his legal knowledge was profound, and he was an enlightened and liberal champion of constitutional monarchy. As a poet, essayist, and translator, there were few who excelled him; his translations of the beautiful Indian drama, "Sacontala," and of the collection of Indian Fables, entitled "Hitopadesa," being especially noteworthy. To this let us add, that in private life his character was unimpeachable. A beautiful monument was erected to his memory in St Paul's Cathedral, and a statue at Bengal, at the expense of the East India Company; but the most honourable and imperishable monument of his fame exists in his works, which

were published

4to.
JONSON, dramatist, the Countess of Spere, was a man. He was studied at Widen, at an early age, a brilliant familiarity of his father-in-law. were published by his widow, in 6 vols.

JONSON, BENJAMIN, a celebrated dramatist, the contemporary and friend of Shakspeare, was the posthumous son of a clergyman. He was born at Westminster, in 1574; studied at Westminster School, under Camden, at an early age; till his mother marrying a bricklayer, young Ben, as he was familiarly called, was taken homo by his father-in-law, and employed in his trade. The spirit of the future poet revolted against his condition; he fled from home and entered the army, serving first in Flanders. On his return he went to Cambridge; but poverty obliged him to leave the university and take to the stage. At first he was not very successful, either as an actor or an author; and having killed another actor in a duel, he was imprisoned and narrowly escaped with life. On being released from confinement he married, and recommenced writing for the stage, to which he was encouraged by Shakspeare, who performed in one of his pieces. In 1598 he produced his comedy of "Every Man in his Humour," which was followed by a new play every year, till the reign of James the First, when he was employed in the masques and entertainments at court. But, regardless of prudence, Ben joined Chapman and Marston in writing the comedy of "Entward Hoe," which so grossly libelled the Scotch nation, that the authors were committed to prison, and had they not made a timely and humble submission for the offence, they would have corded their noses and ears in the pillory, according to their sentence. By his address, however, he soon regained the favour of the king; and for the remainder of that reign he continued in high favour as a kind of superintendent of the court revels. In 1619 he was appointed poet-laureate, with a salary of £100, and a butt of canary wine yearly from the king's cellars. Want of economy, however, kept him constantly poor; although in addition to the royal bounty, he had a pension from the city. The principal plays of Ben Jonson are "Sejanus," "Volpone," "Epicene," and "The Alchemist." He died Aug. 16, 1637, and was buried in Westminster Abbey, where a tablet has been erected to his memory in Poets' Corner, inscribed, "O rare Ben Jonson." Dryden, speaking of the great rival dramatist, says, "Shakspeare was the Homer, or the Virgil, the pattern of elaborate writing; I admire him, but I love Shakspeare."

JONSSON, FINN, or in Latin **FINNUS JOHANNÆUS**, an Icelandic historian, was born in 1704. He completed his education at the university of Copenhagen, where he witnessed the terrible fire of 1728. He settled in his native country as a parish priest, and was made bishop of Skalholt, in 1754. His name is likely to be remembered in connection with his "Ecclesiastical History of Iceland," published between 1773-78. It is in four 4to volumes, is written in Latin, and contains much curious matter, literary as well as ecclesiastical. Died, 1789.

JORDAENS, JACOB, an eminent historical and portrait painter, was a native of

Antwerp. He was the son-in-law of Van Oort, under whom he studied; he also received some instruction from Rubens; and his pictures are executed with correctness and brilliancy. Born, 1594; died, 1678.

JORDAN, CAMILLE, a statesman of revolutionary France, was born at Lyons, in 1771. He opposed the tyranny of the Jacobins; and, as a member of the Convention, he had the courage to defend his city when it was denounced as the receptacle of assassins and banditti. For his laudable zeal he was twice compelled to seek safety in exile; and though he returned to France when Buonaparte had subverted the power of the Directory, he lived there as a private citizen. After the restoration of the Bourbons, he became a member of the Chamber of Deputies, and was decorated with the Legion of Honour, and ennobled. Died, 1821.

JORDAN, DOROTHEA, or **DOROTHY** (name), was born at Waterford, about the year 1762. She made her debut on the Dublin stage, in 1777, in the part of *Phæbe*, in "As You Like It." In the following season she appeared at Cork, where she was much admired for her archness and sportive simplicity. In 1782 she came to England, and after several provincial engagements, she made her first appearance before a London audience, in 1785, at Drury Lane, as *Peggy*, in "The Country Girl;" and immediately became a decided favourite. At the close of the season, she visited nearly all the large towns in England, everywhere receiving the most enthusiastic welcome. When the duke of Clarence first made overtures to her, she was the mistress of a Mr Ford; who refused to make her his wife. Mrs Jordan then entered into that connection with the duke, which continued in an almost uninterrupted state of domestic harmony, until it was suddenly broken off in 1811. She was the mother of 10 children by his royal highness; and when his intention of separating from her was disclosed to her, the shock was almost too great. It has been alleged that state reasons had great weight in inducing the duke to insist on this separation; but what was the true cause is still a matter of doubt. A yearly allowance of £4400 was settled on her for the maintenance of herself and daughters; with a provision that if Mrs Jordan should resume her profession, the care of the duke's four daughters, together with £1500 per annum allowed for them, should revert to his royal highness. In a few months afterwards she expressed a wish to return to the stage; and the four children, with the specified allowance for their maintenance, were surrendered to their royal father. Shortly after this she retired to France, under circumstances of great embarrassment. She gradually sank under the weight of her afflictions; and, in a state of extreme mental misery, died at St Cloud, July 3, 1816. Hazlitt, speaking of her attractions on the stage, says, "Her face, her tones, her manner, were irresistible. Her smile had the effect of sunshine, and her laugh did one good to hear it. Her voice was eloquence itself; it seemed as if her heart was always at her

mouth. She was all gaiety, openness, and good-nature. She rioted in her fine animal spirits, and gave more pleasure than any other actress, because she had the greatest sprit of enjoyment in herself."

JORGENSON, JORGEN, a Danish adventurer, who usurped for a time the government of Iceland, was born at Copenhagen, in 1779. He entered the English merchant service, and afterwards the navy, but returned to Denmark, and serving in the war against England, was taken prisoner and brought to London. In 1809 he accompanied an English merchant to Reykiavik, the capital of Iceland, and in consequence of trade with the English being prohibited, he landed with a party of 12 sailors, and without bloodshed, or even resistance, carried off the governor, proclaimed the island free and himself protector. This singular revolution was brought to a close in about two months by English intervention, and its author was again brought to England. He published several books, and was sentenced to transportation for theft, and was sent to Australia, in 1825. He is supposed to have died there soon after.

JORTIN, JOHN, D.D., an eminent scholar and divine, was born in London, in 1698, and educated at Cambridge. Here he acquired so high a character for learning and acuteness; that he was employed by Pope to select the notes from Eustathius, to print with his translation of the *Iliad*. He took orders in 1724; and held successively the livings of Swavesey, St Dunstan's in the East, and Kensington; he was also a prebendary of St Paul's and archdeacon of London. His chief works are, "Discourses concerning the Truth of the Christian Religion," "Miscellaneous Observations upon Authors, ancient and modern," "Remarks upon Ecclesiastical History," "Life of Erasmus," and seven volumes of "Sermons and Charges," which were printed after his death. He was simple in manners, liberal in sentiments, independent in spirit; and as much beloved for his private virtues, as he was admired for his piety and learning. Died, 1770.

JOSE, ANTONIO, a Portuguese dramatist, by birth a Jew, who was burnt alive at the last auto-da-fé in 1745, for having introduced in one of his farces a scene, in which a criminal is conversing at the gallows with his confessor, in a style, as may be supposed, not the most edifying.

JOSEPH I., emperor of the West and king of Germany, the son of Leopold I., was born at Vienna in 1678; received the crown of Hungary in 1689; and was soon after elected king of the Romans. He began his reign in 1705, which, though short, was troubled by wars in the Netherlands, Germany, Italy, Spain, and Hungary. He revived the imperial chamber; and the Protestants enjoyed toleration and some privileges under his reign. Died, 1711.

JOSEPH II., emperor of the West and king of Germany, was the son of the Emperor Francis I. (of Lorraine) and Maria Theresa. He was crowned king of the Romans in 1764; the year following he succeeded his father; and in 1780, by the death

of the empress-queen, he succeeded to the crown of Hungary and Bohemia. In 1788, a declaration of war was published against the Turks, and the same year the emperor in person reduced Schabatz; but this was followed by a defeat of Prince Lichtenstein, who fell in the action. Soon after this a bloody battle was fought between the Imperialists and Turks, on the heights of Rohadin, in which neither could claim the victory. Joseph next made an attempt to possess himself of Belgrade, but without success. But Marshal Laudohn taking upon him the command of the army, took Durbieza and Novi, and in 1789 reduced Belgrade; soon after which, a peace was concluded, chiefly in consequence of the agitation caused in Europe by the French Revolution. In February following the emperor died of a lingering illness; and was succeeded by his brother, Peter Leopold, grand-duke of Tuscany. Joseph II. was of a lively disposition, fickle, and fond of action: his favourite object was to be sovereign in the fullest sense, and to manage the great machine of the state entirely himself. He introduced many reforms in the government, established toleration for all religious sects, promoted education and manufactures, and without wise caution made many offensive innovations. Frederick the Great, in a letter to Voltaire, thus spoke of him:—"Joseph is an emperor such as Germany has not had for a long time. Educated in splendour, his habits are simple; grown up amidst flattery, he is still modest; inflamed with a love of glory, he yet sacrifices his ambition to his duty."

JOSEPHINE, empress of France and queen of Italy, was born at Marbrûne in 1763, and bore the name from her parents, of ROSE TASCHER DE LA PAGÈRE. While very young, she was taken by her father to France, to be the bride of the Viscount de Beauharnois—a marriage having been arranged by the two families when the Marquis Beauharnois was governor-general of the Antilles. They were accordingly married; and, in the enjoyment of each other's society, they lived beloved and respected, while Josephine became the mother of two children, Eugène and Hortense. Prompted by filial attachment, she went, in 1787, to Martinique, to attend upon her mother in sickness; and having taken her daughter with her, she remained in the island three years. The sudden rising of the colony, however, obliged her to quit it for France, with such haste, as not to allow of her taking leave of her parent. After effecting her escape, and surmounting numerous obstacles, Madame Beauharnois began to experience the horrors of the French revolution; and soon saw her husband, who had used every exertion at the head of the French army on the Rhine, dragged to a prison, and thence to the scaffold. She was also included in the proscription; but the death of her husband reduced her to such a state that she could not be removed, and to this circumstance she owed her deliverance. Robespierre at length perished, and the viscountess was delivered from prison by Tallien; who was never forgotten by her, nor by Eugène.

JOSEPHUS, FLAVIUS, a Jewish historian, was born at Capernaum, in Galilee, in the year 37. His father, who was descended from the ancient Jews, and his mother was a Samaritan. He was early in learning, and became a member of the Pharisees, and when he was 28 years old he was sent to Rome for the purpose of obtaining the release of his countrymen whom Felix had imprisoned; on which occasion he was taken notice of by the emperor, afterwards the emperor, was made

from whom he received a considerable pension till his death. Josephine was indebted to Barras for the restoration of a part of the property of her husband; and at his house, after the 13th Vendemiaire, she met General Buonaparte, who was desirous of seeing her, in consequence of her son Eugène, then 15 years old, presenting himself before the general, to solicit that the sword which had belonged to his father might be given to him. Buonaparte from the first was favourably impressed towards the widow; and his attachment strengthened at every succeeding interview, he married her, in 1796. From that day it was her part to encourage him through dangers, and moderate his feelings in the hour of victory. When her husband was raised to the consulate, her beneficent disposition dismanned emigrants owed their restoration; she encouraged the arts, and rewarded industry; her life, in short, was one continued act of benevolence; so that Buonaparte frequently observed to her, "I can win battles, but you give hearts." Her great mind looked to the glory of France, and the fame of her husband, as the two most desirable objects. After Napoleon became emperor, his friends advised him to divorce her, but he at first declined. Josephine had been crowned empress at Paris, and queen of Italy at Milan. When Napoleon became desirous of marrying a princess, and Josephine was made acquainted with the wishes of the nation regarding a private feelings; and giving the archduchess, Maria Louisa, credit for all the estimable qualities which she knew were requisite to the happiness of Napoleon, she consented to the marriage. She, however, would not follow the wishes of her children, who were anxious that she should quit France; but retained the title of empress-queen-dowager. After visiting her daughter-in-law, the vice-queen of Italy, she returned to the former seat of her happiness, and pursued her taste for botany. But she was doomed to see the destruction of that throne on which she had once sat; Napoleon's exile to Elba drew from her expressions of the most poignant regret; and it was evident to every one that her health was rapidly declining. The allied sovereigns treated her with the most respectful distinction. The Emperor Alexander sent his physician, and visited her often in person; but a sudden inflammation of the throat terminated her life on the 29th of May, 1814.

JOSEPHUS, FLAVIUS, the celebrated historian of the Jews, was born at Jerusalem, A.D. 37. His father, Mattathias, was descended from the ancient high-priests of the Jews, and his mother was of the Maccabean race. He was early instructed in Hebrew learning, and became an ornament of the sect of the Pharisees, to which he belonged. When 26 years old he visited Rome, for the purpose of obtaining the release of some prisoners whom Felix had sent to the Capitol, on which occasion he was introduced to Poppea, afterwards the wife of Nero; and, on his return, was made governor of Galilee.

He afterwards obtained the command of the Jewish army, and supported with courage, wisdom, and resolution, a siege of 7 weeks, in the fortified town of Jotapata, where he was attacked by Vespasian and Titus. The town was betrayed to the enemy; 40,000 of the inhabitants were cut to pieces, and 1200 were made prisoners. Josephus was discovered in a cave, where he had concealed himself, and given up to the Roman general, who was about to send him to Nero, but his life was spared at the intercession of Titus, who became his patron, and whom he accompanied to the siege of Jerusalem. On arriving before the city he was sent to his countrymen with offers of peace, and he advised them to submit to the Roman power; but they treated him with Roman tumely, and rejected his counsel. At the capture of the city, however, he was enabled to deliver his brother and several of his friends without ransom. He accompanied Titus back to Rome, where he was rewarded with the freedom of the city, and received a pension and other favours from Vespasian and his son; and, as a mark of gratitude, he then assumed their family name of Flavius. His "History of the Jewish War, and the Destruction of Jerusalem," in 7 books, was composed at the command of Vespasian, and is singularly interesting and affecting, as the historian was an eye-witness of all he relates. St Jerome calls him the Livy of the Greeks. His "Jewish Antiquities," in 20 books, written in Greek, is a very noble work; and his discourse "Upon the Martyrdom of the Maccabees" is a masterpiece of eloquence. He is supposed to have died about the year 95, but the exact date is uncertain. There are various English, French, Italian, and German translations of Josephus. The excellent translation of Josephus, edited by Isaac Taylor, is now (1866) in course of republication.

JOUBERT, BARTHÉLEMI CATHERINE, a distinguished French general, was born at Pont de Vaux, in 1769. He was destined by his father for the bar; but at the age of 15 he forsook his studies, and entered the army. His discharge being obtained, he was sent to Lyons to continue his education, and at the beginning of the revolution he was a student at the university of Dijon. In 1791 he engaged as a volunteer; and displaying great courage and activity in various situations, he rose rapidly, till by his admirable conduct under Kellermann, at the battle of Lonano, in 1795, he was made general of brigade on the field. In the two following years his bravery and talents were conspicuous on many occasions, particularly in the Tyrol, and he rose to the rank of general of division. He was placed at the head of the French army in Italy in 1799, and fell at the battle of Novi, in that year. He was noted for the boldness, promptitude, and impetuosity of his manœuvres; and his personal character is said to have been untainted by that rapacity and recklessness which characterized so many of his comrades.

JOUBERT, LAURENT, a learned French physician, was born at Valence, in 1529. He became professor of medicine at Montpellier, and chancellor of the university. His Latin

works were printed at Lyons in 1582, folio; besides which he wrote some medical treatises in French, particularly one on "Laughter;" and another, entitled "Erreurs Populaires touchant la Médecine," which, owing to its broad humour and a degree of levity that pervaded it, ran through ten editions in six months. Died, 1583.

JOUFFROY, Marquis de, who disputes with Fulton the honour of having been the first to apply steam to the purposes of navigation, was born in Franche Comté, 1751. He made his first attempt on the Doubs in 1776, and renewed it with more success on the Saône in 1783; but he failed to carry it out through want of means and support. He was no less unsuccessful at Paris in 1816; but the Academy of Sciences acknowledged his claim to the discovery in 1840. Died, 1832.

JOURDAN, JEAN BAPTISTE, Count, marshal and peer of France, was born, in 1762, at Limoges, where his father practised as a surgeon. He entered the military service in 1778, and fought in America; but during the peace he attended to commercial affairs. In 1791 he commanded a battalion of volunteers in the army of the North; and in 1793 rose to be general of division. Jourdan received the command of the army of the Moselle, in the place of Hoche, and gained, June, 1794, the victory of Fleurus, by which he became master of Belgium, and drove the allies beyond the Rhine. In 1803, Napoleon made him general-in-chief of the army in Italy; and, in 1804, marshal of France, and grand cross of the Legion of Honour. After losing the decisive battle of Vittoria, June 21st, 1813, Jourdan lived in retirement at Rouen; but, in 1814, he was appointed commander of the 16th division. In this station he declared in favour of Louis XVIII., and ever after continued faithful to the Bourbons. Died, 1833.

JOURDAN, MATHIEU, surnamed COUP-TÊTE, one of the most bloodthirsty of the leading actors in the French revolution, was born in 1749. After being engaged in a great variety of low occupations, beginning with that of a butcher, he was living as a wine-merchant at Paris at the outbreak of the revolution in 1789, and had a hand in some of the earliest assassinations. He was conspicuous with his red-grizzled locks, tile-beard, and leaden breastplate in the insurrection of women and the invasion of the palace of Versailles on the 5th and 6th October, and beheaded two of the guards. But his horrible career reached its climax at Avignon, whither he had fled and where he began to deal in madder. In 1791 he headed the great band of ruffians known as the "Brigands of Avignon," and perpetrated unparalleled atrocities, so that even the revolutionary assembly ordered his arrest. And though he escaped for a time and even renewed his butcheries at Avignon, he was seized at Marseilles in 1793, was again liberated, and in the following year was given up to the revolutionary tribunal, and perished by the guillotine at Marseilles in the month of May.

JOUVENCY, JOSEPH DE, a learned Jesuit, born at Paris, in 1643. His principal work is a continuation of the "History of the

Jesuits." He also wrote a tract, entitled "De Ratione Discendi et Docendi;" and Notes on the principal Latin classics.

JOUVENET, JEAN, an historical painter, born at Rouen, in Normandy, in 1644, and who studied under Poussin. He was employed to adorn the apartments of Versailles and the Trianon; he also painted colossal figures of the twelve apostles in the Hospital of the Invalides at Paris. Died, 1717.

JOUY, JOSEPH ETIENNE DE, a facile and graceful writer, was born in 1764, served in America and India, and took part in the first campaign of the revolution. But he soon abandoned the sword for the pen; and rose to great popularity with his vaudevilles and the librettos which he wrote for Spontini, Cherubini, and Rossini. He was also distinguished as a political writer; but his best known in England for his amusing and satirical work called the "Hermit of the Chaussée d'Antin," which was translated into English. In 1830, Louis Philippe appointed him librarian at the Louvre. Died, 1846.

JOVELLANOS, DON GASPARD MENCHOR DE, one of the most distinguished Spanish statesmen and authors, was born at Gijon, in Asturias, in 1744, of an ancient and noble family. He was endowed with splendid talents; and not only acquired, while at college, an extensive knowledge of jurisprudence, his special object, but also made great progress in archaeology, languages, and the belles lettres. He soon became a member of the criminal branch of the *audiencia* in Seville; and advancing rapidly in his professional career, he was finally appointed to the dignified station of member of the council of the military orders at Madrid. About the same time he was intrusted with some important affairs, and nominated counsellor of state, by Charles III. When, in 1794, Spain found herself loaded with debt, Jovellanos proposed, for the relief of the national difficulties, a tax on the property of the higher order of the clergy; for which he was exiled to the mountains of Asturias, though his project was afterwards carried into execution. In 1799 he was recalled, and made minister of justice for the interior; but before twelve months were past, he was dismissed, and banished to the island of Majorca, where he was confined in the convent of the Carthusians. After the fall of Godoy, Prince of the Peace, in 1808, he recovered his liberty, and subsequently became a member of the supreme junta. He was, however, suspected of favouring the French; and at length, being denounced as a traitor, he was put to death, in 1812, during a popular insurrection. He wrote "Lyric Poems;" "Pelayo," a tragedy; "The Honourable Delinquent," a comedy; several works on subjects connected with political economy; and translated Milton's *Paradise Lost*.

JOVIANUS, FLAVIUS CLAUDIUS, Roman emperor, was born in Pannonia, of a noble family, in 331. He was elected emperor by the Roman soldiers after the death of Julian, with whom he was then serving in the Persian war. He was compelled to make a humiliating peace and give up a large terri-

tory to the his return, people. He died after reigning said by some vapour of but 364.

tory to the Persians. He then set out on his return, visiting Antioch and Constantinople. He died on his way through Galatin, after reigning seven months, owing, it is said by some authorities, to the suffocating vapour of burning charcoal in his room, in 364.

JOVINIAN, an Italian monk of the 4th century, who distinguished himself as a rational, temperate, and spiritual opponent of the ascetic tendencies of the church in that age. He denied the merit of celibacy and virginity, of fasting and of martyrdom (so far as it was a merely outward suffering); he taught that no one regenerated could fall from grace, and that in the resurrection all will be equal. Jovinian and eight of his adherents were condemned by Sixtus, bishop of Rome, at a synod held in 390, and he fled to Milan. There he found a zealous opponent in Ambrose, and was again condemned and banished. Jerome wrote a violent book against Jovinian in 393. This early "Protestant," as he has been called, died before 406.

JOVIUS, PAUL, or more properly **PAOLO GIOVIO**, a celebrated Italian historian and miscellaneous writer, was born at Como in 1483. He graduated M.D. at the university of Pavia, but studied also at Padua and Milan. He practised as physician at Rome, and enjoyed the special favour of Pope Clement VII., who after the sack of Rome, in 1527, gave him the bishopric of Nocera. His character and way of life were however not such as become such a dignity. He accompanied the pope, in 1530, to Bologna, and was present at the conference between him and the Emperor Charles V. Among his writings—written, he says, some of them with a gold pen, others with an iron one—are a History of his own Times, in 2 vols. folio, written in Latin, and translated into Italian and French; "Elogia virorum illustrium;" "Elogia doctorum virorum;" "Commentario delle cose de' Turchi," &c. Died at Florence, while visiting the grand-duke Cosmo I., in December, 1552.

JOY, Right Hon. **HENRY**, an able Irish judge, was called to the bar in 1788, and after enjoying high reputation as a counsel, filled the office of attorney-general, and in 1831 succeeded Lord Guilford as chief baron. Among the "sayings" of Lord Norbury, the following is related:—Being once requested by Mr Hope, the attorney, to wait a few minutes for Mr Joy, his leading counsel in a *visi prius* case just then called on, his lordship did so until his small stock of patience was exhausted; then exclaiming, "Hope told a flattering tale, that Joy would soon return," ordered the next case in rotation to be proceeded with. Born, 1767; died, 1838.

JOYCE, JEREMIAH, an ingenious and industrious writer, whose profession was that of a dissenting minister, was born in 1764; and first attracted public notice as one of the persons included in the state prosecution with Hardy, Horne Tooke, Thelwall, and others for treason. He was the coadjutor of Dr Gregory in the compilation of his "Cyclopædia," and subsequently produced another on a similar plan, which appeared in the

name of Nicholson. He was also the author of "Scientific Dialogues," "Dialogues on Chemistry," "Letters on Natural Philosophy," &c. Died, 1810.

JOYEUSE, ANNE DE, Admiral of France, born about 1561. He first distinguished himself at the siege of La Fère, where he had his jaw broken by a musket-shot. He was a great favourite of the king, Henry III., who rewarded him by making him a duke, with precedence of all dukes except those of the blood royal, and by giving him in marriage Margaret of Lorraine, sister of the queen. In 1582 he was named admiral of France. The duke at first joined the League, but afterwards advised its dissolution. He had a command in the civil war, and showed himself for the first time capable of harsh and cruel deeds against the Huguenots. He encountered the king of Navarre at the battle of Coutras in 1587, and was there defeated and killed. The king reclaimed his body, and gave him a magnificent funeral at Paris.

JUAN, Don, or Don JOHN, of AUSTRIA, a natural son of the Emperor Charles V., and the great military hero of his age, was born at Ratisbon, in 1546. His mother is said to have been a lady named Barbara Blomberg; but this is doubtful, and a veil of mystery hangs over the matter. He was first employed, in 1570, against the Moors of Granada, and acquired great fame by their subjugation. He also signalized himself by the memorable victory over the Turks, in 1571, in the gulf of Lepanto; as well as by the conquest of Tunis, and other places on the African coast. In 1576 he went to Flanders, took Namur by stratagem, and succeeded in reducing the insurgents to obedience. Died, 1577.

JUAN II., Don, a natural son of Philip IV. of Spain, and of Maria Calderona, an actress, was born in 1629; made grand prior of Castile; commanded the Spanish army in Italy, 1647, and took the city of Naples; subjugated Barcelona in 1652, but being afterwards unsuccessful, was exiled. Under Charles II. he was recalled to Madrid, made prime minister, and died in 1679.

JUAN Y SANTACILIA, Don GEORGE, a learned Spanish mathematician and naval officer, was born at Orihucla, in 1712. He made rapid progress in mathematics; and, entering the naval service early, his reputation as a scientific man occasioned his appointment, with Antonio de Ulloa, to accompany Bouguer and La Condamine to Peru, in 1735, to measure a degree of the meridian at the equator. He afterwards directed much attention to naval architecture, and his exertions to improve the Spanish navy were highly successful. He published "Observations on Astronomy and Physics, made in Peru," and treatises on navigation and ship-building. Died, 1774.

JUBA, king of Numidia and Mauritania, after the battle of Pharsalla, he joined his forces to those of Scipio; but being totally defeated at Thapsus, he put an end to his own life, and his kingdom became a Roman province, B. C. 46.

JUBA II., king of Numidia, son of the

preceding, was, when a boy, led as a captive to Rome to adorn the triumph of Cæsar; and the Roman conqueror bestowed on him an excellent education, and he became one of the most learned men of his time. He gained the hearts of the Romans by the courteousness of his manners, and was in great favour with Augustus, who gave him the daughter of Antony in marriage, and made him king of Cilicia; of which dignity he proved himself worthy by governing his dominions with justice and lenity. He was also an able and prolific author, as appears by Pliny, Strabo, Plutarch, and other writers, who speak of his histories of the Arabians, Assyrians, and Romans; his treatises on the fine arts; and his natural history; of all which a few fragments only have been preserved. He died, A. D. 24. The Athenians erected a statue to his memory, and the Ethiopians paid him divine honours.

JUDAH HAKKADOSH, or "Jehudah the Holy," a famous rabbi, who lived in the reign of Marcus Antoninus, and became head of the Sanhedrin, which then sat at Tiberias. He compiled the Mishna, or first Talmud, a digest of the oral law of the Jews.

JUDAH, L. E. D., a learned Protestant divine, was born in Abbece, in 1482. Being sent to Basel to complete his academical studies, he became acquainted with Zuinglius, from whom he imbibed the principles of the reformed faith. He became pastor of the church of St Peter at Zurich, where he undertook a translation of the Old Testament, from the Hebrew into Latin, but did not live to complete it. Died, 1542.

JUDAS LEVITA, or **HALLEVI**, a Jewish rabbi, was born in Spain, in 1090. He was remarkable for his great learning, and distinguished himself as a poet, grammarian, and philosopher. It is related of him, that when on a pilgrimage to Jerusalem, as he approached the holy city, he rent his garments, and recited aloud lamentations for the miseries of his people, which so enraged a Mahometan horseman, that he rode over him and trampled him to death. Judas Levita was author of the work entitled "Coart," a dialogue on the principles of natural religion. It was written in Arabic, and translated into Hebrew, Latin, and Spanish.

JUDSON, ADONIRAM, an eminent American missionary, born in Massachusetts in 1788. He was educated at Brown University, and the Theological Seminary of Andover, and in 1812, after a short visit to England, set out to found a mission in Birmah, arriving at Rangoon in the summer of 1813. It took him several years to master the language, and he then preached, and taught, and set up a printing-press. The great fruit of his labours was the Burmese translation of the Bible, the first edition of which he printed in 1835, and a second, thoroughly revised, in 1840. He also undertook, but did not quite complete, a Burmese-English dictionary. It was published in 1852. Judson was at first a Congregationalist, but he joined the Baptists before commencing his missionary task. He married three wives in succession, each of them an authoress; and Lives of them all as well as of Judson him-

self, have been published. This talented missionary died at sea in 1850.

JUKEL, NICHOLAS, a Danish admiral, who learned his profession under Van Tromp and De Ruyter, in the Dutch navy; after which he returned to his native country, and greatly distinguished himself, in 1666, during the siege of Copenhagen. In 1674 and 1677 he took Gothland, and defeated the Swedes in several engagements. He died in 1697, not less respected for his modesty and piety, than honoured for his bravery.

JUGURTHA, king of Numidia, was the son of Munnastabal. He was brought up and adopted by Mictaph, his uncle, who left the kingdom to him jointly with his own sons. He was endowed by nature with superior talents, and was remarkable for manly strength and personal beauty. Formed for a soldier, his valour and conduct won the esteem of the Roman army, and the friendship of Scipio; but involving himself in intrigues and crimes to obtain the sole sovereignty of Numidia, the Romans made war on him. Their generals have overtook bribes, and failed to subdue him, till at length they sent Metellus against him, who conquered him in many battles, and rejected all his offers. When on the point of signing a shameful peace, and surrendering to the Romans, Jugurtha, through fear that they might inflict vengeance on him for his former crimes, suddenly changed his resolution, and determined once more to abide the worst. The king of Mauritania, his ally, having concluded a peace with the Romans, Sulla persuaded him to draw Jugurtha into his power, and deliver him up to the Romans. He was accordingly seized, and sent in chains, to Marins, at Circa. Thus the war was ended, and Numidia became a Roman province. Jugurtha, having suffered many insults from the people, was thrown into a dark prison, and starved to death after six days, A. D. 106.

JULIANUS, FLAVIUS CLAUDIUS, surnamed **THE APOSTATE**, Roman emperor, was the youngest son of Constantius, brother of Constantine the Great. He was born in 331, educated in the tenets of Christianity, but apostatized to Paganism. In 354 he was declared Cæsar, and sent to Gaul, where he obtained several victories over the Germans, and, in 361, the troops in Gaul revolted from Constantius, and declared for Julian. During the lifetime of his cousin, Constantius, he made profession of the orthodox faith; but, on succeeding to the throne, he threw off all disguise, re-opened the heathen temples, and sought to restore the heathen worship in all its splendour; while he laboured, both by his pen and authority, to destroy Christianity. He took from the Christian churches their riches, which were often very great, and divided them among his soldiers. He sought likewise to induce the Christians, by flattery or by favour, to embrace Paganism; but falling in the attempt, he shut up their schools, prohibited the followers of that religion from teaching grammar and rhetoric, and published an edict that the name of Christian should be abolished. His justice was further evinced, by extraordinary indulgence to the Jews,

and an attempt to restore the Jewish temple, that he failed; he rose from being the workman of his own destruction, to the position of the most illustrious monarch of Persia. The contradictions of his character, and his unpopularity, were his ruin. He was a man of a weak character, and a weak ruler. He was a man of a weak character, and a weak ruler. He was a man of a weak character, and a weak ruler.

JULIANUS, town in Campania, the seat of a famous system of medicine. It was born of a noble family, and became a deacon, bishop, and was a man of a weak character, and a weak ruler. He was a man of a weak character, and a weak ruler. He was a man of a weak character, and a weak ruler.

JULIEN, PIERRI, a French philosopher, many of whose works were published in the metropolis of France. He was a man of a weak character, and a weak ruler. He was a man of a weak character, and a weak ruler.

JULIEN, SIMON, a French philosopher, many of whose works were published in the metropolis of France. He was a man of a weak character, and a weak ruler. He was a man of a weak character, and a weak ruler.

JULIUS I., Pope, the first of the name, who reigned in the year 337, and died in 364. He was a man of a weak character, and a weak ruler. He was a man of a weak character, and a weak ruler.

JULIUS II., Pope, the first of the name, who reigned in the year 1503, and died in 1511. He was a man of a weak character, and a weak ruler. He was a man of a weak character, and a weak ruler.

JULIUS III., Pope, the first of the name, who reigned in the year 1582, and died in 1591. He was a man of a weak character, and a weak ruler. He was a man of a weak character, and a weak ruler.

JULIUS IV., Pope, the first of the name, who reigned in the year 1700, and died in 1703. He was a man of a weak character, and a weak ruler. He was a man of a weak character, and a weak ruler.

JULIUS V., Pope, the first of the name, who reigned in the year 1721, and died in 1724. He was a man of a weak character, and a weak ruler. He was a man of a weak character, and a weak ruler.

d. This esteemed

admiral, who under Van Tromp led the Dutch navy; after a naval victory at himself, in 1674, and defeated the Persians. He died in his modesty and his bravery.

Numidia, was the one brought up and who left the with his own course with superior rank for many years. Formed for conduct won the crown, and the friendship himself in the solo sovereign. Romans made war never took bribes, till at length they were, who conquered and rejected all his offers of signing a treaty, rendering to the king him for his forsaking his resolution, and to abide the wishes of his ally, with the Romans, saw Jugurtha late him up to the Roman camp, and sent him. Thus the king became a Roman, having suffered the people, was thrown to death after

CLAUDIUS, a Roman emperor, was a tyrant, brother of Nero. He was born in the city of Christianity. In 351 he was sent to Gaul, where he over the Germans. In Gaul revolted against the emperor, and declared for Julian, a cousin, Constantine of the orthodox religion to the throne, he opened the theatres, and restored the heathen worship; while he was and authority, he took from the riches, which were divided them among themselves, or by favour, falling in the schools, prohibition from teaching and published at Christian should be as further evidence to the Jews.

[JUL]

and an attempt to rebuild the temple of Jerusalem, that the prophecy of Christ might be fulfilled; but it is said that flames of fire rose from beneath, and consumed some of the workmen, by which miraculous interposition the design was frustrated. He did not long survive this disappointment, being killed in 363, in his expedition against the Persians. The character of Julian is full of contradictions. He displayed learning, magnanimity, justice, and mercy; yet we find him sincere, superstitious, vain, and ambitious.

JULIANUS, bishop of Eclana, a small town in Campania, and founder of the dogmatic system called Semi-pelagianism. He was born of a noble family in the latter part of the 4th century, studied under Pelagius, became a deacon, married the daughter of a bishop, and was chosen bishop of Eclana. He was a man of high character and unspotted character, and the most distinguished of the eighteen bishops who boldly refused to subscribe the anathemism of Pelagius which Zosimus, bishop of Rome, published in A. D. 418, and appealed to a general council. He was then involved with his brethren in the same anathemism, and deposed from his see. The pope, the emperor, and Augustinus, were at one in this matter, and an edict of banishment against the remonstrants was issued by the emperor, in 420. Julianus sought refuge in vain at Constantinople, and for many long years was driven from place to place, proscribed by popular opinion no less than by imperial authority. He spent his last days as a schoolmaster in a small town in Sicily, distinguishing himself to the last by great generosity to the poor. He died, probably, about 450. Some fragments of his writings are preserved.

JULIEN, PIERRE, an eminent French sculptor, many of whose productions adorn the metropolis of France, and whose *chef-d'œuvre* is "The Dying Gladiator." Born, 1731; died, 1804.

JULIEN, SIMON, a Swiss painter, who by his brother artists was called the Apostle, in allusion to the Roman emperor of the same name, as well as to his abandonment of the French school of painting for the Italian. Born, 1736; died, 1799.

JULIUS I., Pope, succeeded to the papal see on the death of Mark, in 337. Celebrated for the part he took in the Athanasian controversy. Died, 362.

JULIUS II., Pope, known at first as Giuliano della Rovere, was nephew of Pope Sixtus IV., and was born near Savona about 1443. He was bishop successively of several sees, last of Avignon, and in 1471 became cardinal. He was in character more a soldier than a priest; had been exiled by Alexander VI., but had influence to procure the election of Pius II., in September, 1503, and on his death, a month later, succeeded him. The pontificate of Julius II. was almost wholly occupied with wars. He recovered part of the Romagna from Cesare Borgia, Bologna from the Bentivoglio, and Perugia from the Baglioni. Against the Venetians, who held part of the Romagna, he concluded, in 1508, the Iniquitous League of Cambray, with the emperor, Louis XII.

of France, and the king of Aragon, and also the Venetians submitted, and he made peace with them in 1510. He then made war on the French, to drive them out of Italy; conducted in person the siege of La Mirandola, and took it in 1511; saw his army defeated at Bologna, and the city again in the hands of the French, and was compelled to retire to Rome. A council being convoked at Pisa by the king of France, Julius convoked another at Rome; excommunicated Louis XII., and put his kingdom under an interdict in 1512; and died early in the following year. It was this pope by whose consent Henry VIII., then prince of Wales, married Catherine of Aragon, sister of the king of France. The rebuilding of St. Peter's at Rome was commenced by Julius, after the design of Bramante; and Michael Angelo and Raphael were among the great artists who found in him a patron.

JULIUS III., Pope, previously known as Cardinal del Monte, was chamberlain to Julius II., whose name he consequently assumed. He took little part in public business, but led a life of indolence at the villa still known by his name. Died, 1555.

JULIUS ROMANUS. [GIULIO ROMANO.]

JUNGE, or JUNGIUS, JOACHIM, an eminent philosopher of the 17th century, was born at Lubeck, in 1687, and distinguished himself as an able antagonist of the Aristotelian philosophy. Like his great contemporary, Lord Bacon, he substituted experiment in the place of tale and antiquated theories; and is ranked by Leibnitz as equal to Copernicus and Galileo, and but little inferior to Descartes. Among his works are "Geometria Empirica," "Doxoscopie Physicæ Minores," and "Isagoge Pnytopscopia," from which latter work Ray and Linnæus appear to have taken some valuable hints. Died, 1657.

JUNGMANN, JOSEPH, the learned Bohemian lexicographer, was born in 1773. He studied at the university of Prague, and after being teacher at a gymnasium for some years he was appointed, in 1815, professor of Latin at the Grammar School of Prague. About twenty years later he became principal, and in 1840 succeeded his brother Antonino as rector of the university. Jungmann set himself with great patience and enthusiasm to promote the study and restore the use in literature of the Bohemian language, and he succeeded. His two great works, both monuments of immense industry, are the "Bohemian-German Dictionary," in 5 vols. 4to, and the "History of Bohemian Literature," which contains lists of all written or printed Bohemian books known to the author. Jungmann translated "Paradise Lost" and other English poems into Bohemian. Died, 1847.

JUNIUS, ADRIAN, an eminent physician and classical scholar, was born at Hourn, in Holland, in 1512. He studied medicine at Paris and Bologna; after which he visited England, and became physician to the duke of Norfolk. While here he published a Greek and Latin lexicon, which the court of Rome condemned, because it was

dedicated to Edward VI. On leaving England he went to Copenhagen, as physician to the king of Denmark; but soon quitted that place and settled at Haarlem, where he was made principal of the college. His translations from, and criticisms on, ancient authors are very numerous; and he was considered inferior only to Erasmus as a scholar. Died, 1575.

JUNIUS, FRANÇOIS, a learned French Protestant divine, was born at Bourges in 1545. He became minister of the Walloon church at Antwerp, after which he officiated as chaplain in the army of the prince of Orange; and, on leaving that service, obtained a professorship at Heidelberg, from whence he removed to Leyden, where he died of the plague, in 1602. He wrote Commentaries on the Scriptures; but is best known by his Latin version of the Bible, made in conjunction with Tremellius.

JUNIUS, FRANCIS, son of the preceding, and eminent as a philologist, was born at Heidelberg, in 1589. After studying at Leyden, he came to England in 1620, and found a patron in the earl of Arundel, with whom he resided 30 years as librarian, and died in 1678. He edited and published the Gothic version of the Gospels, and wrote "De Pictura Veterum," and "Etymologicum Anglicanum," a valuable work, to which later writers have been much indebted.

JUNOT, ANDOCHE, duke of Abrantes, a distinguished French general, was born in 1771, and entered the army, as a volunteer, in 1791. He first attracted the notice of Buonaparte by his coolness and courage when serving as a lieutenant at the siege of Toulon. Buonaparte at once made him his aide-de-camp. He took part in the campaigns of Italy and Egypt, and became general in 1801. A few years later he was made colonel-general of hussars, and appointed to the command of Paris. In 1806 he was placed at the head of the army in Portugal, where he remained two years, and was honoured with his ducal title; but being defeated at the battle of Vimiera by Sir Arthur Wellesley (the duke of Wellington), he was compelled to capitulate. He subsequently served in Spain, and was made governor of the Illyrian provinces. Died, 1813.

JUNOT, Madame, duchess of Abrantes, wife of the preceding, was born in 1784. Her maiden name was Permon, and she was married to Junot about 1800. Her estate being confiscated in 1814, the Emperor Alexander offered their restoration, on condition of her becoming a naturalized Russian. She refused, and remained in Paris, living by the labours of her pen. The best known of her writings are the celebrated "Memoirs," which had a prodigious run. But, harassed by creditors, she retired to a *maison de santé*, where she died, in 1838.

JURIEU, PIERRE, a French Protestant divine and theologian, was born in 1637. He studied in England, under his maternal uncle, Pierre du Moulin; and, while here, was episcopally ordained; but the French Protestants disapproving of episcopal ordination, he was re-ordained according to the form of Geneva. He filled the chair of

divinity at Sedan with reputation; but, when that university was taken from the Protestants, he retired to Holland, and settled at Rotterdam, where he became a violent polemic, and engaged in fierce contentions with Bayle and others. Finding that his work on the "Accomplishment of the Prophecies" produced many severe replies, and being also greatly chagrined by the decisions of the synods against some of his doctrines, he grew hypochondriacal, and died in 1713. His principal works are "La Politique du Clergé," "L'Accomplissement des Prophecies," "Histoire de Calvinisme et du Papisme," 3 vols., and "Histoire des Dogmes et des Cultes," 2 vols. His learning was unquestionably great, but it was obscured by an intolerant and litigious temper.

JURIN, JAMES, an English physician and mathematician, was born in 1684; studied at Trinity College, Cambridge, where he obtained a fellowship; was afterwards physician to Guy's Hospital; was several years secretary to the Royal Society; and died, in 1750, president of the College of Physicians. He published "Physico-Mathematical Dissertations," an "Essay upon Distinct and Indistinct Vision," and a translation of Varenus's Geography. He also contributed many papers on philosophical and mathematical subjects to the Philosophical Transactions; and was a warm defender of the practice of inoculation, and a zealous advocate for the Newtonian system.

JUSSIEU, DE; ANTOINE, BERNARD, and JOSEPH; three eminent French botanists and physicians. The first was born at Lyons in 1688, and died in 1758. He enriched the memoirs of the Academy of Sciences at Paris with several valuable papers, the result of observations made in his travels, on botany and mineralogy. He also wrote the appendix to Tournefort, and edited Barrelier's work upon the plants of France, Spain, and Italy; he was likewise the author of a "Discourse on the Progress of Botany."—BERNARD, brother of the preceding, was born at Lyons in 1699, and died in 1776. He published an edition of Tournefort's History of Plants about Paris, and was the author of a book, entitled "The Friend of Humanity, or the Advice of a good Citizen to the Nation." He was botanical demonstrator at the king's garden, and was much esteemed by Louis XV. Cuvier calls him "the most modest, and, perhaps, the most profound, botanist of the 18th century, who, although he scarcely published anything, is nevertheless the inspiring genius of modern botanists."—The third brother, JOSEPH, who was also a member of the Academy of Sciences at Paris, accompanied Condamine to Peru, in 1748. He was not only a good naturalist and physician, but an excellent engineer. He published a journal of his voyages, and died in 1779.

JUSSIEU, ANTOINE LAURENT, a celebrated French botanist, nephew of the preceding, was born at Lyons, in 1748. He went to study at Paris in 1763, and was placed under his uncle Bernard. Five years later he graduated M.D., and was named demonstrator of botany at the Jardin de Roi. He applied himself to his duties as

teacher with studied the of plants. In Academy of f rator in chief the universit member of i is the "Gene established a of plants, super Linnaeus. Its in 1788, but p the revolution, prejudice in fa in gaining reco still in other co been supersted classification.

JUVENAL, DECIUS JUNIUS, the Roman poet and satirist, was born probably at Aquinum in Campania, about the beginning of the reign of Claudius. He studied rhetoric under the most celebrated masters, and is said to have become an eminent pleader. His first essay as a poetical satirist was directed against the player Paris, and for repeated attacks of the same kind, he is said to have been sent into an honourable kind of exile, by being made commander of a cohort at Pentapolis, on the borders of Egypt, in his 80th year. Juvenal may be said to have been the last of the Roman poets, and as the bold and unflinching castigator of vice he stands without a rival. Good as are his intentions, however, and forcible as are his denunciations, the moral indelicacy of the age in which he lived renders these powerful satires too gross in their details for readers of the present day. English translations have been made by Dryden, Gifford, &c.

JUVENCUS, CAIUS VECTIVS AQUILINUS, one of the first Christian poets, was a native of Spain, and lived in the reign of Constantine. His work is a Life of Christ in Latin verse, entitled "Historiæ Evangelicæ."

JUXON, WILLIAM, archbishop of Canter-

bury, was born at Chichester, in 1532. He was educated at Merebant Taylors' School, and St John's College, Oxford; was patronized by Laud; and, through his influence, obtained the bishopric of Hereford in 1633, and of London in the same year. In 1635 he was made lord high treasurer of England, an office which no churchman had held since the reign of Henry VIII. This gave great offence to the Puritans; but, on his resignation of the office, after having held it something less than six years, the integrity and ability with which he had discharged his various duties were admitted on all hands. During the whole of the civil wars he maintained an unshaken fidelity to the king, whom he attended during his imprisonment in the Isle of Wight, and on the scaffold; on which occasion he received from the hand of Charles, the moment previous to his execution, his diamond George, with directions to forward it to his son. After the king's death, the parliament threw him into confinement for contumacy in refusing to disclose the particulars of his conversation with the king; but he was soon released, and continued to live in privacy until the Restoration. He was then raised to the see of Canterbury, but did not long enjoy the honours and emoluments of the primacy, his death occurring about two years after his elevation, in 1663.

K.

KAAB, BEN ZOHAB, an Arabian Jew, rabbi, and poet. He satirized Mahomet so severely, that "the Prophet" made war on the Arabian Jews for the purpose of getting the poet into his power; but when Mahomet's success was no longer doubtful, Kaab became his zealous panegyrist, and abandoned Judaism for Mahometanism, and is said to have assisted in the composition of the Koran. Died, A. D. 662.

KAAS, NICHOLAS, an eminent Danish statesman, was born in 1335, and studied in the universities of Germany. In 1573 he was made chancellor of Denmark; and, on the death of King Frederic II., in 1589, he was nominated to fill the situation of first regent during the minority of Christian IV. Being attacked with a mortal disease previous to the coronation of that prince, he sent for him as he lay on his death-bed, and telling him that he had promised his royal father in his last moments, to do all he could to see the crown placed on the head of his son, he gave him the key of the place where the crown and other regalia were kept, saying, "Take it in the name of God, and wear the

crown with glory, sway the sceptre with wisdom and clemency, bear the sword with justice, and keep the globe with judgment." Died, 1694.

KABRIS, JOSEPH, a French sailor, who, being taken prisoner by the English in the revolutionary war, obtained permission to enter on board a South Sea whaler, and being wrecked on the coast of the island of Noukahiwa, in the Pacific Ocean, fell into the hands of the cannibal inhabitants. While preparations were making for his death, he was saved by the intercession of the king's daughter, who shortly after became his wife. Being now allied to royalty, he was made chief judge of the island. Nine years thus passed away, and Kabris was then carried off, as he stated, while asleep, by the Russian navigator, Captain Krusenstern. On returning to France, in 1817, he exhibited himself to the public at Paris and elsewhere, his face being tattooed in the New Zealand style. His object was to raise money to enable him to return to Noukahiwa; but he died suddenly at Versailles, in 1822.

KEMPE, physician, born at Letford, studied at Delft, formed a journey, and Persia, Hindostan, Java, in which last in 1692 he retook his degree entered upon author of a folio; "America" 1716.

KAESTNER, mathematician, born in 1719, at the time of profession, with the thea 40 years, numerous, of the tory of Mathematics.

A New Universal Biography.

KEMPFER, ENGELBRECHT, a celebrated physician, naturalist, and traveller, was born at Lemgo, in Westphalia, in 1651; studied at Dantzic, Thorn, and Cracow; performed a journey, in 1683, as secretary to a Swedish embassy, by land through Russia and Persia; after which he visited Arabia, Hindostan, Java, Sumatra, Siam, and Japan, in which last country he resided two years. In 1692 he returned to his native country, took his degree of M. D. at Leyden, and entered upon medical practice. He was the author of a "History of Japan," 2 vols. folio; "Amcenitates Exoticae," &c. Died, 1716.

KAESTNER, ABRAHAM GOTTHELF, a mathematician, astronomer, and poet, was born in 1719, at Leipsic; and filled the situation of professor of mathematics at Göttingen, with the highest reputation for more than 40 years. His scientific works are numerous, of which the principal is a "History of Mathematics." Died, 1799.

KALB, Baron de, a major-general, in the American army, was born in Germany, about the year 1717. He entered into the French service when young, and continued in it 42 years. In 1757, during the war between Great Britain and France, he was sent by the French government to the American colonies, in order to see with what effect the seeds of discontent against the mother country might be sown among them. While in the performance of this commission he was seized as a suspected person, but escaped detection. He then went to Canada, where he remained until its conquest by the British, after which he returned to France. During the war of the revolution he offered his services to the congress, which were accepted, and he was soon after made a major-general. On the 16th of August, 1780, when Lord Rawdon defeated General Gates, near Camden, the baron commanded the right wing of the American army, and fell covered with wounds.

KALKREUTH, FRIEDRICH ADOLPH, Count of a Prussian field-marshal, was born at Elsieben in 1737; entered the army in 1751; served with distinction in the Seven Years' War; arrived, step by step, at the rank of general, and was made a count in 1788. His courage and ability were often conspicuously shown in the war with France; he took Mayence in 1793; had the chief command of the troops in Pomerania in 1793; was appointed governor of Thorn and Dantzic, and made inspector-general of cavalry in 1806; concluded with Berthier, at Tilsit, the truce between Prussia and France, in 1807; after which, in conjunction with Goltz, he concluded a peace with Talleyrand. He was then made field-marshal, and appointed governor of Berlin in 1810, and died in 1818.

KALDI, GEORGE, a learned Jesuit, was born in Hungary about 1572. He was banished from Transylvania with the rest of his order; on which he became professor of theology at Olmutz, and next at Presburg, where he died in 1634. He translated the Bible from the Vulgate into the Hungarian tongue.

KALE, or KALF, WILLEM, a Dutch

painter, was born at Amsterdam in 1630. He had the power of Rembrandt in distributing his light and shade, while in correctness and delicacy he equalled Teniers. Died, 1693.

KALIDASA. [CALIDASA.]

KALKRENNER, CHRISTIAN, an eminent musical composer, was born in 1765, at Munden, in Prussia; was a pupil of Emanuel Bach; and having made considerable progress both in the theoretical and practical branches of the profession, entered the service of Prince Henry of Prussia, and finally settled in Paris, where his reputation obtained him the appointment of singing-master to the Academy of Music, which he held till his death, in 1806. He was the author of several operas, two musical treatises, &c.

KALKRENNER, CHRISTIAN FRIEDRICH, a distinguished pianist, son of the above, was born at Cassel, 1784. Having acquired, at an early age, a high reputation as a brilliant performer on the pianoforte, he removed in 1808 to Paris, whence he made frequent professional tours throughout Europe, his fame daily increasing, both from his own performances and the brilliant compositions which he gave to the world. In 1814 he removed to London, where he remained 9 years. He once more returned to the French capital in 1823, when he joined M. Pleydel as a manufacturer of keyed instruments, and continued to occupy a prominent position in the musical world till his decease. Died of cholera, in Paris, 1849.

KALM, PETER, a Swedish traveller and natural philosopher, was born, in 1715, in Ostro Bothnia; travelled in North America and Russia, for the purpose of exploring those countries; and became professor of botany in the university of Abo. His works consist of "Travels in America," and numerous dissertations, illustrative of the state of commerce, agriculture, and manufactures in Sweden. Died, 1779.

KAMEEL, MALEK EL, Sultan of Egypt, succeeded his father Seif-Eddin in 1218 (615 A. H.). The army of the crusaders was then besieging, and soon after took, Damietta. Kameel however recovered it from them in 1221. He then passed into Syria and took Jerusalem and other towns. These conquests he had to defend against the Emperor Frederick II., who arrived in Palestine in 1229; but by a treaty concluded the same year, he gave up to Frederick the holy city with Bethlehem, Nazareth, and Sidon, Frederick entering Jerusalem and crowning himself there. Kameel was afterwards engaged in disputes with his brothers respecting Damascus. During his reign of 20 years he displayed many great and excellent qualities, his ambition being generally modified by emperor of justice and humanity. He made the apartments a present of a tent in several compartments, the ceiling of one of which represented the heavens and the motions of the stars. Kameel died in 1238 (635 A. H.).

KAMES, LORD. [HOME, HENRY.]

KANE, ELISHA RENT, a distinguished American traveller, was born at Philadelphia in 1822, studied medicine, and entered the United States' navy as assistant surgeon in

1843. He made his first voyage to China, and, pursuing his taste for adventures during the next three years, visited the Philippines, Ceylon and India, Egypt, and Greece. After a perilous visit to Whydah, in Africa, where he nearly lost his life, he was sent to Mexico by President Polk, with important despatches for the United States' general, and remained in Mexico till the close of hostilities. In 1850 he joined the expedition, fitted out by Mr Grinnell, of New York, to search for Sir John Franklin: of this voyage he published an account. In 1853 he again visited the Arctic regions in command of an exploring vessel; and after an absence of two years, during which he had been given up for lost, returned to New York, having made many new and most interesting discoveries, which he described in his work entitled "Arctic Explorations." Died, at the Havannah, 1857.

KANT, EMMANUEL, a celebrated German metaphysician, and the founder of the Critical Philosophy, was born at Königsberg, in Prussia Proper, in 1724. Through the kindness of a rich uncle he was educated at the Frederician College, on leaving which he accepted the situation of tutor in a clergyman's family. He commenced his literary career in his 23rd year; and was appointed professor in the university of Königsberg, in 1770. For a long time his studies were chiefly of physical science, astronomy, mechanics, &c., and among his early works are "Thoughts on the True Valuation of Vital Forces," "General History of Nature and Theory of the Heavens," "Theory of the Winds," &c. It was not till 1781 that he published his "Critical Inquiry into the Nature of Pure Reason," which contains the system commonly known under the title of the "Critical Philosophy." A second part of it, published in 1783, bore the title of "Prolegomena for future Metaphysics." In 1786 he was chosen rector of the university; and, though far advanced in life, he continued to produce works in further development of his philosophical principles until 1798, when he retired from his official situations, and died in 1804. Kant was a man of high intellectual endowments; and was no less distinguished by a profound love of truth, and a pure moral sentiment; and his critical philosophy for a time superseded every other in the Protestant universities of Germany. Dissatisfied both with the dogmatism and the doubt which in his day disputed the field of philosophy, he sought a new path and a higher end. His method was fundamentally an investigation of the faculty of knowledge in man, and he carefully distinguished that part of knowledge which answers truly to objects (the objective) from that which merely pertains to the thinking mind or subject (the subjective). He introduced many new terms into the language of philosophy, which brought on him the old charge of obscurity. His system was met by vigorous opposition, but over all hindrances it held its way, and the whole course of human thought has been modified by it. "The Critical Philosophy," says Carlyle, "has been regarded by persons of approved judgment, as distinctly the

greatest intellectual achievement of the century in which it came to light. August Wilhelm Schlegel has stated in plain terms his belief, that in respect of its probable influence on the moral culture of Europe, it stands on a line with the Reformation. The noble system of morality, the purer theology, the lofty views of man's nature derived from it," have influenced for good the whole spiritual character of Germany and of Europe. Besides the works above mentioned we must name the "Critique of the Practical Reason," "Critique of the Understanding," "Religion within the bounds of Pure Reason," and "Metaphysics of Ethics."

KARAMSIN, NICHOLAS MICHAELOVICH, Russian historian, was born in 1763; educated at Moscow; served for a while in the imperial guards; and travelled for two years through Middle Europe; after which he devoted himself to literature. His "History of the Russian Empire," in 11 vols., is a valuable work, and was very highly appreciated by his countrymen. His "Letters of a Russian Traveller," and "Agails," a collection of tales, are also works of merit, and in much esteem. Died, 1826.

KATER, Captain HENRY, F.R.S., was born at Bristol, in 1777. He was intended for the legal profession, and served two years in a pleader's office, though from his earliest years he had shown a decided predilection for mathematical studies. On the death of his father, in 1794, he quitted the law, and obtained a commission in the 12th regt. of foot, then stationed in India. Soon after he arrived, he was engaged in the trigonometrical survey of India, a stupendous undertaking; but his unremitting study during seven years in a hot climate greatly injured his health, and rendered it necessary for him to return. He subsequently devoted his whole time to science; and, among other useful inventions, his meritorious labours for constructing standards of weights and measures are universally known and appreciated. His most important invention, perhaps, is the floating collimator, an instrument of very great service in astronomical observations. Many learned societies enrolled him among their members, and the emperor of Russia not only employed him to construct standards for the weights and measures of his empire, but presented him with the order of St Anne, and a diamond snuff-box. Died, 1835.

KATONA, STEPHEN, the historian of Hungary, was born in 1732. At the age of 18 he entered the Society of Jesus, and subsequently held several professorships at the university of Buda. His most important work, and one of the highest authority, is his History of Hungary, from the earliest times down to the year 1801. It is written in Latin, and fills 41 volumes. He wrote also a summary of the History, and some other works. Died, 1811.

KAUFMANN, MARIA ANGELICA, a distinguished artist, born at Cole, in the Grisons, 1741. She acquired the first principles of drawing and painting from her father, whom she soon excelled. At Milan, Florence, Rome, and Naples, she increased her skill,

and when, was patron and she became Royal Academy painter; an of her pale lozzi, but he solid basis away.

and when, in 1763, she came to England, she was patronized by royalty, and her reputation and success quickly increased. In 1768 she became one of the first members of the Italo Academy. She remained here seventeen years; married Zucchi, a Venetian painter; and died at Rome, in 1807. Many of her paintings were engraved by Bartolozzi, but her reputation, not resting on any solid basis of excellence in art, has passed away.

KAUNITZ, WENCESLAUS ANTON, Prince von, a German statesman, was born at Vienna, in 1711; and though at first destined for the church, he finally engaged in political life. His talents, aided by a favourable exterior, opened a brilliant career to him. In 1744 he was made minister of state for the kingdoms of Hungary and Bohemia; in 1749 he assisted at the congress of Aix-la-Chapelle; was honoured with the order of the golden fleece by Maria Theresa, and employed as ambassador to Paris; returned to Vienna in 1763, and took the office of chancellor of state; concluded the treaty of alliance between Austria and France, in 1756; was made a prince of the German empire, in 1764; and died, aged 53, in 1764.

KAYE, or CAIUS, Dr JOHN, the founder of Caius College, Cambridge, was born at Norwich, in 1510; was educated for the medical profession, first at Gonville Hall, Cambridge, and subsequently at Bologna, where he graduated as M.D. On his return to England he became physician to the court, and held that office during three successive reigns. He was for several years president of the College of Physicians; and, in 1537, he obtained a royal licence to advance Gonville Hall into a college; which he endowed with several considerable estates, and added to it the quadrangle. Dr Kaye was himself the first master of this increased establishment, now known as Caius College; which he retained till near his death in 1575. He was the author of various works on medicine, natural history, antiquities, &c.

KAYE, Dr JOHN, Bishop of Lincoln, a learned and estimable prelate, was born at Hammersmith in 1783. He received his early education under the celebrated Greek scholar, Dr Charles Burney, and afterwards proceeded to Cambridge, where he had the rare distinction of being highest at once in classics and mathematics. In 1814, he was elected Master of Christ's College; in 1813 was created D.D. by royal mandate; and in 1816, on the death of Dr Watson, bishop of Llandaff, he was appointed his successor, as Regius professor of divinity. Some of the lectures delivered from this chair have been published under the title of "Ecclesiastical History, as illustrated by the Writings of Tertullian and Justin Martyr." In 1820 he was nominated to the see of Bristol, and in 1827 advanced to that of Lincoln. Ecclesiastical history was his favourite study, and few had better acquaintance with patristic lore. His "Account of the Writings and Opinions of Clement of Alexandria," and his "Athenasius and the Council of Nice," attest his learning and research; and his publications on occasional topics include

sermons, charges, and some controversial pamphlets. Died, 1853.

KAZINCZY, FRANCIS, a celebrated Hungarian litterateur, was born at Er-Semlyen, in Bihar, in 1769. He was educated at the public school of Patak, and became Inspector of Schools. He especially distinguished himself by his persevering and successful endeavours to cultivate and restore to literary and official use the Hungarian or Magyar language. He wrote poems and letters, made translations of several foreign works into Hungarian, and, in 1788, established a periodical entitled the "Magyar Museum," the first magazine in that language. Kazinczy was implicated in a conspiracy, in 1794, and suffered an imprisonment of six years. He lived to see the foundation of the Hungarian Academy, in 1800, and was the first member chosen. Died in August, 1831.

KAZWINI, ZACHARIAH BEN MOHAMMED, a learned Arabian geographer and naturalist of the 13th century; of whose labours Bochart, Hyde, Sir W. Ouseley, and other orientalists have availed themselves. He is supposed to have died in 1283.

KEAN, EDMUND, an eminent English tragedian, was the son of a scene-carpen-ter (whose brother, Moses Kean, obtained some notoriety as a mimic and ventriloquist), and his mother was the daughter of the well-known George Saville Carey, a dramatic writer and performer. He was born in Castle Street, Leicester Square, London, in 1787, according to some accounts, and according to others two or three years later. He trod the stage almost as soon as he could walk alone, being employed in processions, &c., acquiring the rudiments of his theatrical education under the eye of John Kemble, whose rival he was afterwards to become. Miss Tidswell, an actress long known on the metropolitan stage, and said to have been a relation, assisted Kean in his first efforts; and recommended him, at the age of 13, to a company of players in Yorkshire. He performed there under the name of Carey, and is said to have obtained much applause in the parts of Hamlet, Lord Hastings, and Cato. He also distinguished himself by his talents for recitation; and his delivery of Satan's Address to the Sna, from Milton's Paradise Lost, and the first soliloquy in Shakspeare's Richard III., having been highly applauded, he repeated his recitations at Windsor, before some of the royal family. He had also the good fortune to attract the notice of Dr Drury, who sent him to Eton, where he remained three years, and is said to have made great progress in classical studies, devoting much of his attention to the precepts and examples of Cicero. On quitting Eton he procured an engagement at Birmingham, where he was seen by the manager of the Edinburgh theatre, who engaged him for twenty nights, on twelve of which he performed Hamlet to crowded houses. He was at this time only sixteen; and we find that his provincial engagements led him, in the course of a few years, to nearly all the principal towns in the south and west of England, playing in tragedy, comedy, opera, and pantomime. In the mean time Dr Drury, his old patron, had recommended him to the

vement of the to light. August ed in plain terms t of its prohibi- ture of Europe, it the Reformation, rality, the purer of man's nature nfluenced for good acter of Germany the works above the "Critique of Critique of the ion within the aud "Metaphysics

retired in 1816. He became governor of Greenwich Hospital in 1821, and died in 1834.

KEILL, JOHN, a learned mathematician, was born at Edinburgh in 1671. In 1698 he published an Examination of Burnet's Theory of the Earth, to which he subjoined "Remarks on Whiston's Theory." The year following he was appointed deputy professor of natural philosophy at Oxford unversity; and in 1701 he published his "Introductio ad Veram Physicam," as a preparation for the study of Newton's Principia. In 1708 he defended Newton's claim to the invention of Fluxions, which brought him into a dispute with Leibnitz. In 1709, he was appointed treasurer to the German exiles from the Palatinate, and attended them in that capacity to New England. He next defended Newton's doctrine against the Cartesians, and received his degree of M.D. In 1710 he was chosen Savilian professor of astronomy at Oxford, and the year following appointed decipherer to the queen. Among his other works are "An Introduction to True Astronomy," and several papers in the Philosophical Transactions. Died, 1721.

KEISER, REINHARD, an eminent German musician and composer, was born at Lelpsic in 1753. He was the author of 118 operas, of which his "Circe," brought out at Hamburg in 1784, was the last and most beautiful. He possessed a most fertile imagination, and is considered as the father of German melody. Died, 1785.

KEITH, GEORGE, hereditary marshal of Scotland, eldest son of William, earl-marshal, was born in 1685. He served with distinction in the campaigns of Marlborough, and as a partisan of the Stuarts, was proscribed after the insurrection of 1715. He afterwards entered the diplomatic service of Spain, and in 1733 passed into Prussia, where he was long employed by Frederick the Great. Died near Potsdam, 1778.

KEITH, JAMES FRANCIS EDWARD, a field-marshal in the Prussian service, and a brave and experienced warrior, was the youngest son of William Keith, earl-marshal of Scotland, and was born in 1696. At the breaking out of the rebellion, in 1715, he joined the Pretender, and was wounded at the battle of Sheriffmuir; but made his escape to France, where he applied himself to military studies, and became a member of the Academy of Sciences. From Paris he went to Madrid, and obtained a commission in Ormond's Irish brigade; but on accompanying the Spanish embassy to Russia, he entered into the service of that state, was promoted to the rank of lieutenant-general, and invested with the order of the Black Eagle. In the Russian service he continued several years, distinguishing himself as well in the field as in the cabinet, during the wars between that country and Turkey and Sweden. He at length left Russia and went to Berlin, where at the king of Prussia, to whom his abilities were well known, received him with open arms, and made him field-marshal of his forces and governor of his capital. In the subsequent wars of this monarch, Keith displayed the greatest talents and bravery, till his career was finally closed on the field of

battle, at the affair of Hochkirchen, Oct. 4, 1758.

KEITH, THOMAS, mathematician, and author of several useful school-books, was born, in 1759, at Brandsburton, near Beverley, in Yorkshire. In 1781 he settled in London, and soon acquired distinction as a mathematician. In 1804 his reputation as an accountant led to his being appointed professor of geography and the sciences to the Princess Charlotte of Wales; and in 1814 the situation of accountant to the British Museum becoming vacant, the archbishop of Canterbury conferred it on Mr Keith, who held it till his death, in 1824. His principal works are, "The Complete Practical Arithmetician," "An Introduction to Geography," "Plane and Spherical Trigonometry," a "Treatise on the Use of the Globes," and "Elements of Geometry."

KEITH. [ELPHINSTONE.]

KELLERMANN, FRANÇOIS CHRISTOPHE, duke of Valmy, peer and marshal of France, &c., was born at Strasburg in 1735; entered the Confians legion as a hussar when 17 years of age, and rose to the rank of quarter-master-general in 1788. At the breaking out of the revolution he distinguished himself by his patriotism and judgment. At the commencement of the war he received the command of the army of the Moselle; under Dumouriez; and sustained, Sept. 20th, 1792, the celebrated attack of the duke of Brunswick at Valmy, thus contributing much to the success of the campaign. He was repeatedly denounced to the National Convention by Custine and others; but his trial not taking place till after the Reign of Terror, he was acquitted. In 1795 he took the command of the army of the Alps and Italy, but he was soon superseded by Buonaparte. In 1798 he was nominated a member of the military board; in 1801 he was president of the conservative senate, and the following year a marshal of the empire. He served under Napoleon in Germany and Prussia; and having, in 1814, voted for the restoration of royalty, was employed under the Bourbons till his death in 1820.

KELLGREN, JOHAN HENRIK, a Swedish poet, was born in 1761. He was educated at the university of Abo, and distinguished himself among his contemporaries as an admirer and imitator of the then fashionable French literature. He wrote several operas, but his lyrics have been the most popular of his works. He became a member of the Swedish Academy, and held the office of secretary to the king. Died, 1795.

KELLY, JOHN, a learned English clergyman, was a native of Douglas, in the Isle of Man, and born in 1750. Having paid particular attention to the dialect of the Celtic tongue spoken in that island, he was introduced to Bishop Hildesley, who employed him in translating the Bible into the Manx language, and ordained him a minister of the episcopal congregation of Ayr, in Scotland. Through the patronage of the duke of Gordon, to whose son, the marquis of Huntly, he was tutor, he obtained the rectory of Copford, in Essex; and having entered at St John's College, Cambridge, he

was there honoured with the degree of LL.D. In 1803 he published "A Practical Grammar of the Ancient Gaelic, or Language of the Isle of Man; and in 1805 issued proposals for publishing "A Trilingual Dictionary of the Celtic Tongue," which was nearly completed when the sheets were destroyed by a fire on the premises of Mr Nichols, the printer. Dr Kelly died in 1809.

KELLY, MICHAEL, a composer and singer, was the son of a wine-merchant in Dublin, who, for many years, acted as master of the ceremonies at the viceregal castle. He was born in 1762, and at an early age gave proofs of genius for music, which induced his father to place him under Ranzini, at that time in Dublin, who prevailed on his friends to send him to Naples, where he arrived when in his 16th year. He there found a patron in Sir William Hamilton, the British minister; studied under Fineroli and April; and subsequently performed at most of the Italian theatres in Germany. He contracted a close intimacy with Mozart during his stay at Vienna; was for some time in the service of the Emperor Joseph; and at length returned to London, where he made his first appearance, in 1787, at Drury Lane Theatre, in "Lionel and Clarissa," and retained his situation as first singer at that theatre, the musical performances of which he directed till his retirement from the stage. He set to music upwards of 60 pieces, most of which were successful, and amongst these are the once highly popular compositions in Colman's musical romance of "Bluebeard." A few months previous to his death appeared his "Reminiscences," a very amusing work, replete with anecdotes of his contemporaries and familiar associates. Died, 1826.

KEMBLE, JOHN PHILIP, the most dignified and accomplished actor on the British stage since the days of Garrick, was the eldest son of Roger Kemble, manager of a company of comedians at Prescott, in Lancashire, where he was born in 1757. Being of Catholic parents, he was sent to the English college at Douay, where he early distinguished himself by his proficiency in elocution, and had Talma for a fellow-student. Finding that his father designed him for the priesthood, he quitted the college clandestinely, returned to England, and, engaging in an itinerant company, performed with great eclat at Liverpool, Edinburgh, York, &c. In 1783 he made his first appearance on the boards of Drury Lane, in the character of Hamlet. His success was complete; and from that time he maintained the character of being the first tragedian of the age. On the secession of Mr King, he became manager of Drury Lane Theatre. In 1802 he took advantage of the peace to visit the continent, in order to study the French and Spanish theatres with a view to the improvement of the English. On his return, he became manager of Covent Garden Theatre, where he continued till 1808, when that building was destroyed by fire. On the restoration of the edifice, Mr Kemble was, during the O. P. riots, as they were called, the object of popular resentment, in consequence of having raised the prices, and made certain obnoxious arrange-

ments in regard to the private boxes. In 1817 he retired from the stage, after a long and honourable career; and, in consequence of ill health, went first to Montpellier, and thence to Lausanne, where he died, Feb. 28, 1823, after a paralytic attack. The learning, elegant manners, and accomplishments of Mr Kemble, introduced him into the best company, by whom he was at once courted and esteemed. As a tragedian, when personating characters more immediately adapted to his style of excellence, such as Cato, Coriolanus, Hamlet, King Lear, Penruddock, &c., he was unrivalled. And his managerial duties were discharged with much refined and accurate taste, in the rectification of scenic decoration, and the adoption of appropriate costume, adding thereby both to the splendour and illusion of the drama. He was the author of "Belshazzar," a tragedy; "Lodolska," an opera; and "The Female Officer," a farce; besides which he altered and modernized many of the old dramas. The portrait of Kemble, by Gilbert Stuart, is now in the National Collection, where also is the bronze bust, modelled by Gibson.

KEMBLE, CHARLES, the last of the great family who for more than half a century held the chief place in the history of the British stage, was born at Brecknock, in Wales, in 1775—the same year in which his illustrious sister, Mrs Siddons, made her first appearance at Drury Lane. At the age of fourteen he was sent to the College of Douay, where his brother, John Kemble, had studied twelve years before. In the winter of 1792-3 he made his first recorded appearance at the Sheffield Theatre as Orlando in "As You Like It," and in April, 1794, through the interest of his brother John, made his debut at Drury Lane as Malcolm in "Macbeth." When Mr John Kemble purchased a share of Covent Garden Theatre in 1803, Mrs Siddons and Mr Charles Kemble both became members of that company. At this time he possessed but few of the requisites of an actor, and the commencement of his career was most unpromising; but he continued to rise by slow and steady progress, and his unremitting exertions were finally crowned with complete success. To Covent Garden Mr Charles Kemble remained attached for a long series of years, though he occasionally fulfilled engagements elsewhere; and he subsequently possessed the share originally held by his brother. In 1832 he visited the United States; and soon after his return, he announced his intention of closing his professional career. This took place on December 23rd, 1836: and on this occasion the public testified its approval of his talents, and his honourable conduct during his extended professional career, by the presentation of a superb vase, designed by Chantrey, of great classic beauty, as "a testimony of his opinion that, by the high quality of his talents, he supported the reputation inseparable from his name in the annals of the British Drama." While Covent Garden was under the direction of Madame Vestris, in 1840, he reappeared before the public for a limited series of nights, and played several of his favourite characters, including Don Felix, Mercutio, and Hamlet. He subsequently

gave a series of lectures, and thus part of Charles will hereafter be brilliant of the dramatic elegance and with which and in his lofty conceit, with Some of his performance, bited such a rivalry for associated with and, in his theman of lodgment—mas, and not was a finished acbridge," achieved othero of the of "Millamours" beils"—character the stage active. gave a series of readings from Shakespeare; and thus passed into retirement. The name of Charles Kemble, says a contemporary, will hereafter be found amongst the most brilliant of those which adorn the portico of the dramatic temple. He possessed the elegance and finished accuracy of the school with which his name is so intimately allied, and in his histrionic portraiture exhibited a lofty conception and an exquisite refinement, with a taste at once pure and classic. Some of his tragic assumptions were unequal performances; but in certain parts he exhibited such surpassing excellence as to leave rivalry far behind. That excellence is chiefly associated with comedy of the higher class; and, in his hands, the gay and polished gentleman of lofty bearing found a perfect embodiment—perfect, because you saw the man, and not the actor. His "Mark Antony" was a finished portraiture, whilst in "Philoconbridge," "Edgar," "Cassio," &c., he achieved other triumphs. He was a fitting hero of the old comedies—the "Doricourts," "Millamours," "Benedicks," and "Mirabels"—characters which seem to have quitted the stage with their favoured representative. As a man, he possessed the virtues which adorn a home, and in his connection with the world, exhibited the greatest integrity and courtesy. Died, 1854.

KEMBLE, GEORGE STEPHEN, brother of John Philip Kemble, and also an able actor, was born at Kingstown, in Herefordshire; his mother having performed the part of Anne Bullen, in the play of Henry VIII., on the evening of his birth. He was intended for the medical profession, and was apprenticed to a surgeon at Coventry; but soon quitted it for the stage. He first appeared at Covent Garden Theatre in 1783. He was afterwards manager of the theatres of Edinburgh, Glasgow, Liverpool, and Newcastle; and was remarkable for playing the part of Falstaff without stuffing. Died, 1822.

KEMBLE, JOHN MITCHELL, an eminent Anglo-Saxon scholar, son of Charles Kemble, the distinguished actor, was born in 1807, and educated at Bury St Edmund's Grammar School, and at Trinity College, Cambridge. Soon after he had taken his degree, he, with some other Englishmen, were induced by General Torrijos to engage in an attempt to deliver Spain from the tyranny of Ferdinand, re-imposed upon the nation by the interference of the Bourbons. But the plot was betrayed to the government, and several of them made a lengthened residence in Germany, where he contracted an intimate friendship with Jacob Grimm, and was regarded by that eminent philologist as one of his most promising disciples. On his return to England he was appointed editor of the "British and Foreign Review," established by Mr Wentworth Beaumont, mainly with the view of directing public attention to the aggressive policy of Russia. Whilst engaged in the editorship of this review, Mr Kemble produced his "Saxons in England," a work which established his reputation as a historian. It was founded in a great measure on his "Codex diplomaticus Evi Saxonici," a collection of documents relating to the

Saxon period which he had amassed from various sources with infinite labour. A great archaeological work, the "Horræ Ferales," for amongst he had found materials in researches and England, was left unfinished. Died, 1857.

KEMP, JOSEPH, an eminent musical composer, was born at Exeter, in 1778; and was a chorister in the cathedral of his native city, where he studied under the celebrated William Jackson. In 1802, having been appointed organist of Bristol cathedral, he removed thither, and in the same year composed one of his best anthems, "I am Alpha and Omega." In 1807 he left Bristol for the degree of M.B. at Cambridge. In 1809 he proceeded to that of doctor, when his exercise entitled "The Crucifixion" was performed. He now became a lecturer in music at several institutions, and invented a new mode of teaching the science. His principal works are, "A new System of Musical Education, being a Self-Instruction," "Twenty Psalmical Melodies," "The Siege of Ischa," an opera; with a variety of songs, glees, duets, &c.

KEMPELEN, WOLFGANG, Baron, a celebrated mechanician, was born in 1734, at Presburg, in Hungary. Among his inventions was the famous automaton chess-player, which he first exhibited at Paris in 1783, and afterwards in London; but the secret of it was never discovered. He also invented a speaking figure, which he himself described in a work called "The Mechanism of Speech." He was also an author, and wrote "Perseus and Andromeda," a drama; "The Unknown Benefactor," a comedy; and some poems. Died, 1804.

KEMPIE, THOMAS A., reputed author of the famous book "De Imitatione Christi," was born at Kempen, in the diocese of Cologne, in 1380. He entered the monastery of Mount St Agnes, of which his brother was prior, and being a good copyist, was chiefly engaged in making copies of the Bible and religious treatises. He became subprior in 1425. In a collection of his beautiful manuscripts was the "Imitation of Christ," which was afterwards erroneously attributed to him as author. His few genuine writings are of little importance. Died, 1471. The "Imitation" is the most universally translated book in the world, next to the Bible. Its various editions and translations amount to 1828 to more than two thousand. Its singular charm and power are confessed by thoughtful men of all sects; who hear in it, nature struggling in its weakness, its disappointments, and its consciousness of an incapacity for a life that shall be a real life and veil a fever, when the cage is broken and the from too many religious books by its clearness, honesty, and simplicity, and freedom from exaggeration and morbidities. Another English translation has been this year (1865) added to those previously existing.

KEN, THOMAS, a learned and pious dignitary of the church of England, was born at Berkhamstead, in Hertfordshire, in 1637.

His conscientious propriety of conduct and unyielding morality found favour even with the licentious Charles II., who made him his chaplain, and afterwards preferred him to the bishopric of Bath and Wells. He opposed the endeavours of James II. to introduce Popery, and was one of the seven bishops sent to the Tower for resisting that monarch's dispensing power. Dr Ken was the author of sermons, poems, &c.; which were published, with his Life, by his nephew, in 4 vols. Died, 1711. A "Life of Bishop Ken," by a Layman, has been recently published.

KENNEDY, JAMES, bishop of St Andrew's, Scotland, born in 1405, was the founder of the college and church of St Salvador, and also of the abbey of the Observantines. He filled the office of lord chancellor for a time; and, in the minority of James III., was one of the lords of the regency. Died, 1466.

KENNEDY, WILLIAM, "the annalist of Aberdeen," was born there in 1759. He received the rudiments of his education at the grammar school, his studies were completed at the Marischal College, and he was admitted a member of the Aberdeen bar in 1783. He early showed a predilection for antiquarian pursuits; and about the year 1813, at the request of the magistrates, he spent a considerable time in drawing up an index to the voluminous city records, which had been accumulating for centuries, and which extend to a more remote antiquity, and are more complete than those of any Scottish burgh. But his chief title to remembrance rests on his justly celebrated work in 2 vols. 4to, "The Annals of Aberdeen." Died, 1836.

KENNET, WHITE, a learned prelate, notorious for his party zeal, was born at Dover, in 1660; and educated at Westminster School, and at Edmund Hall, Oxford. He had originally been a Tory; but he attached himself to the Whigs, and entered into a controversy with Dr Atterbury respecting the rights of convocations; and also opposed Sacheverel. He made himself conspicuous by a funeral sermon preached for the first duke of Devonshire in 1707, which gave great offence as an apology for the sins of the great. The same year he obtained the deanery of Peterborough; but so obnoxious had he now become by the violence of his partisanship, that Welton, the rector of Whitechapel, caused his portrait to be exhibited in the character of Judas, in the altar-piece of that church. This gross act of indecency was properly resented, and the painting removed. In 1718 he was made bishop of Peterborough, and died in 1728. He was an able antiquary, and published various works on theology, antiquities, and ecclesiastical history; besides which he edited the "Collection of English Historians," which bears his name.

KENNICOTT, BENJAMIN, an able divine and biblical critic, was a native of Tetness, Devonshire, of which place his father was parish clerk. He was educated at Wadham College, Oxford; became vicar of Culham, preacher of Whitehall, librarian of the Radcliffe, a prebendary of Westminster, and

canon of Christchurch. Dr Kennicott's literary fame mainly rests on his Hebrew Bible, 2 vols. folio; in collating the numerous manuscripts for the text of which he was incessantly occupied during more than ten years. Though some object to this great work, that the author was insufficiently acquainted with the eastern languages, yet every scholar admits that he rendered great service to the cause of science and religion by opening the way in this department of biblical criticism. He died in 1783.

KENRICK, WILLIAM, miscellaneous writer, was born at Watford, in Hertfordshire. He was brought up as a rule-maker, but quitted his trade, obtained a doctor's degree at Leyden, and became an industrious author and critic. He established the London Review, in which many critiques of merit appeared too often, however, contaminated by vituperative language and unwarrantable personalities. He compiled a "Dictionary of the English Language," and wrote various works, among which are the comedies of "Falstaff's Wedding," "The Widowed Wife," and "The Dubiest," "Epistles, Philosophical and Moral," and various poems. Died, 1779.

KENT, His Royal Highness EDWARD, Duke of, the fourth son of George III., was born Nov. 2, 1767. He received the rudiments of his education in England, but completed it at Göttingen and Hanover. Entering the army at an early age, he became an enthusiastic admirer of military discipline; and having attained the rank of colonel, he served during the years 1790 and 1791, under General O'Hara, at Gibraltar, where he rendered himself so unpopular by his strictness, that his regiment repeatedly mutinied. On quitting Gibraltar, he was sent out as commander of the forces in Canada; after which he received orders to join the expedition under Sir Charles Grey, against the French West India Islands. During the campaign that ensued, his impetuous bravery was so conspicuous at the head of the flank division, particularly when storming the strong and important post of Martinique and Guadeloupe, that "the flank corps" became a standing toast at the admiral's table, as well as at that of the commander-in-chief. In 1802 his royal highness was appointed governor of Gibraltar; but his desire to repress irregularities, and enforce subordination, led to very disagreeable consequences. Having refused a request of the soldiers to celebrate Christmas Eve as a holiday, and put the deputation who brought it under arrest, the men in the garrison became mutinous, and proposed placing General Barnet in the command. Christmas day passed in confusion; and on the following night the prince headed his regiment, and marched against the rebellious party. It was some time before they gave up the contest; at length, after blood had been shed, peace was restored, and the ringleaders were tried by a court-martial; but it was thought prudent to recall the duke, and he accordingly soon after returned to England. On the 20th of May, 1816, the duke of Kent married Maria Louisa Victoria, widow of the prince of Leiningen, and sister of Leopold, after-

wards king of the Belgians. The royal pair soon after arrived in this country, and on the 24th of May, 1819, the duchess gave birth to a daughter, VICTORIA, our present gracious QUEEN. Having accompanied the duchess to Sidmouth, in Devonshire, where she resided during the latter part of the year, with a view to the re-establishment of her health, he caught a violent cold, which being followed by fever and inflammation, the symptoms increased so rapidly as to resist every effort of medicine; and after died, Jan. 23, 1820. His royal highness and liberal principles had rendered him a great favourite with the nation, and his death was generally regretted. There is a Life of the Duke of Kent, by Erskine Neale.

KENT, MARIA LOUISA VICTORIA, Duchess of, mother of Queen Victoria, was born in 1786. She was the youngest child of Francis, duke of Saxe-Coburg-Saalfeld, and was married, at the age of 17, to Enrich Carl, prince of Leiningen, who left her a widow in 1814. After the death of the Princess Charlotte, the princess of Leiningen Coburg, the ceremony being again performed at New in July. In the spring of the following year they removed to England, and their only child, the Princess Victoria, was born at Kensington Palace, 24th May. The duchess was left a widow the second time early in 1820, and the rest of her life she resolved to devote to one object, the training of her daughter for the duties of the throne. This she did with much wisdom and fidelity, with great courage and patience too under the pressure of pecuniary embarrassments; aided and counselled by her noble brother, Prince Leopold, made king of the Belgians in 1831. In that year parliament granted to the duchess of Kent an additional sum of £10,000 a year. After her daughter's accession to the throne the duchess lived with her till her marriage to Prince Albert in February, 1840, and afterwards alternately at Kensington Palace and Frogmore. After long suffering from a most painful disease, cheered, however, by the unchanging love and frequent visits of her daughter, and the kindly regards of the nation, she died at Frogmore, March 18, 1881, and was interred in the royal vault at Windsor.

KENT, JAMES, an eminent musician and composer, born at Winchester in 1700. He was a pupil of Dr Croft, and became successively organist of Trinity College, Cambridge, and of Winchester cathedral; serving in the latter office nearly forty years. He published "Twelve Anthems," which speedily became and have always continued to be general favourites. He also assisted Boyce in preparing his fine "Collection of Cathedral Music." Died, 1776.

KENT, JAMES, a very eminent American jurist, was born at Fredericksburg, New York, in 1763. He was educated at Yale College, entered on the practice of the law in 1785, sat four years in the state legislature of New York, and in 1794 was chosen professor of law at Columbia College. Various offices and honours were successively conferred on him, and he took part with Judge

Radcliffe in the laborious task of revising the legal code of his native State. In 1804 ten years later chancellor, and about New York; and on his quitting the latter office on account of his age, he again undertook the professorship of law at Columbia College. In 1826 and the four following years appeared his important work, "Commentaries on American Law," esteemed an authority both in his own country and in England. Chancellor Kent was no less esteemed for his private virtues than for his professional abilities and his public services. He died in 1847.

KENT, WILLIAM, a landscape-gardener, was born in Yorkshire, in 1685. He was originally a coach-painter, but left that occupation to study the principles of design; for which purpose he went to Rome, where he studied under Piranesi, and found a patron in Lord Burlington, who brought him to England, and lodged him in his own house. In 1715, as a painter, however, he never attained celebrity; his talent lay more in ornamental architecture. But it is as the inventor of the modern style of landscape gardening that he is chiefly known; he broke up the old conformity of straight lines and corresponding parts, and threw wood, water, and ground into the beautiful shapes presented by nature; rendering that graceful, pleasing, and attractive, which before was stiff and formal. Died, 1748.

KENYON, LLOYD, Lord, a celebrated judge, was born at Gredington, in Flintshire, in 1733, and received his education at Ruthin School, in Denbighshire. After being articled to Mr Tomlinson, an attorney at Nantwich, in Cheshire, he became a member of the society of Lincoln's Inn, and was called to the bar in 1761; but he does not appear to have made a conspicuous figure till 1780, when he led the defence, in 1782 he was made attorney-general and chief justice of Chester. He was also returned to parliament for Hirdon, in Wiltshire. In 1784 he was appointed Master of the Rolls; and, on the resignation of the earl of Mansfield, in 1788, he was raised to the office of chief justice of the King's Bench, and created Baron Kenyon. Died, 1862.

KEPLER or KEPPLER, JOHANN, one of the greatest astronomers and mathematicians of modern times, was born in the village of Magstadt, in Wurtemberg, 27th December, 1571. His parents were in narrow circumstances, and he owed his education to the kindness of the duke of Wurtemberg. He graduated M. A. at Tubingen, where he studied under the celebrated Metellus, in 1591, and soon after was appointed lecturer on astronomy at Graz. In 1600, when he was joined with him at Prague as imperial mathematician. Tycho dying the same year, the arduous task of forming the new astronomical tables (called "Rudolphine," in honour of the emperor) devolved on him. Throughout his life Kepler was harassed by pecuniary difficulties, and at this period he "east nativities"

for bread; his salary not being paid him. His first work, entitled "Mysterium Cosmographicum," had appeared in 1596. After publishing several others of minor importance, he gave to the world in 1609 his "Astronomia Nova," one book of which is perhaps the most important he wrote, "De Stella Martis." It contains the discoveries of the elliptic form of the planetary orbits, and of the law of the "quadrato description of areas," two of the three truths known as "Kepler's Laws;" and forms the connecting link between the discoveries of Copernicus and those of Newton. In 1612 he was appointed professor at the university of Linz, retaining, under the Emperors Mathias and Ferdinand III., the title of Imperial mathematician. In 1619 appeared his great work "Harmonice Mundi," in which he announced his third "law" of the relation between the periodic times and the mean distances of the planets from the sun. About the same time he published an "Eptome of the Copernican Astronomy," which was at once placed in the papal index of prohibited books. In 1620 Kepler was visited by Sir Henry Wotton, the English ambassador at Venice, who pressed him to go to England, but in vain. At the same time he was greatly harassed by the trial of his mother, about 70 years of age, for witchcraft. The trial lasted six years, and he succeeded in saving her from the torture, and at last saw her released from prison. The religious agitations of Germany caused the publication of the "Fabrics" to be delayed till 1627; and soon after Kepler attached himself to the great General Wallenstein. But his better fortune was not for long enjoyment. Fatigue and vexation from his fresh attempt to recover arrears of his salary from the Imperial treasury brought on a fever, of which he died at Ratisbon, November, 1630. He was interred there, and no monument was erected to his memory till about 1808. Kepler married a widow in 1596, but the union was only productive of unhappiness. His wife died in 1611, leaving him a son and a daughter; and after an amusing variety of negotiations with eleven ladies he married a second wife, who brought him five children and survived him. He published many works besides those already named, and left a large number of manuscripts. Kepler is characterized by Humboldt as a "great and highly-gifted man, in whom a taste for imaginative combination was combined with a remarkable talent for observation, an earnest and severe method of induction, a courageous and almost unparalleled perseverance in calculation, and a mathematical profoundness of mind."

KEPPEL, AUGUSTUS, Viscount, a celebrated English admiral, was the second son of William, earl of Albemarle. He accompanied Commodore Anson in his voyage round the world, and afterwards passed through all the gradations of the service, till he attained the rank of admiral. In 1778 he commanded the Channel fleet, which, on the 12th of July, in that year, fell in with the French, under Count d'Orvillers, off Ushant. A partial action ensued, which the English

admiral thought to have renewed in the morning, but the enemy had retired. This affair gave great dissatisfaction to the nation, which was aggravated by Sir Hugh Palliser, second in command, preferring a charge against Admiral Keppel; but he was honourably acquitted by a court-martial at Portsmouth. Sir Hugh was then tried and censured. In 1782, Admiral Keppel was raised to the peerage; he was also twice named first lord of the admiralty. Died, 1786.

KERGUELEN TREMAREC, YVES JOSEPH DE, a French navigator, was born at Itreat in 1745. After having been employed on the coast of Iceland, to protect the whaling fishery, he was sent, in 1771, on an exploratory voyage to the South Sea; and having returned with a flattering account of a supposed continent towards the south pole, was again sent on a similar expedition in 1773. On his return he was charged with having abandoned a boat's crew on a desert shore, for which he was cashiered and imprisoned; but he was at length liberated. He published accounts of his voyages to the North and South Seas, and died in 1797.

KESSEL, JAN VAN, a Dutch painter, was born at Antwerp in 1626, and died about 1690. He painted portraits in the manner of Vandyke; but excelled in the representation of flowers, fruits, and insects.

KETTEL, CORNELIUS, a Dutch painter. He came to England in the reign of Elizabeth, whose portrait he painted, as well as the portraits of many of the nobility. On his return to Holland he laid aside the use of pencils, and painted with the tips of his fingers, and even with his toes. Died, 1602.

KETT, WILLIAM, a tanner of Norfolk, who, in the reign of Edward VI., excited a revolt against the government. After taking Norwich and defeating the marquis of Northampton, he was routed by the earl of Warwick, and Kett with several others was hanged, in 1549.

KETTLEWELL, JOHN, a learned and pious English divine, born, 1653; died, 1695. His most celebrated work, entitled "Measure of Christian Obedience," has gained him a lasting reputation.

KEULEN, LUDOLPH VAN, a Dutch geometriean, who acquired great celebrity by his calculation of the approximate proportion between the diameter of a circle and its circumference. He taught mathematics at Breda and Amsterdam. Died, 1610.

KEULEN, JANSSEN VAN, a portrait painter, was born in London, of Dutch parents; and before Vandyke came to England, was in great favour with Charles I. Died, 1665.

KHALED "the Sword of God," one of the generals of Mohammed. At the battle of Ohud, 623, he commanded the cavalry of the Korish against the prophet, but with Amrou afterwards went over to his side. He greatly distinguished himself at the battle of Muta, the first engagement of the Mussulmans with a foreign enemy. In 633 he invaded Persia and gained many victories; next took part in the Syrian expedition; took Bosrah, began the siege of Damascus, won the victory of Almadinah, stormed Damascus, pursued and slaughtered

the fugitives, commanded at the bloody battle of Yermuk, and died in 642. The empire of the caliphs in Arabia and Syria was mainly founded by the valour of Khaled.

KIEN-LONG, emperor of China, distinguished for his love of literature, was born about 1710, and died at the end of the 18th century, aged 90, having reigned above 60 years. He carried on several successful wars, especially one against the Tartar tribes, which lasted about six years, and was terminated in 1760. It was during this war that Kien-Long published an edict against the Christian religion. In the latter part of his reign, 1793, this emperor received the celebrated English embassy under Lord Macartney.

KIERINGS, ALEXANDER, a landscape painter of Utrecht, was born in 1590, and died in 1646.

KILIAN, LUCAS, a German engraver, was born at Augsburg in 1679. He was one of a family remarkable for the number of skilful engravers it produced, and was a pupil of his step-father Custos. He afterwards visited Venice, executed many good works, and died at his native city, 1697.

KILIAN, WOLFGANG, brother of the preceding, studied, like him, under Custos at Venice, and executed numerous portrait-pieces. Born at Augsburg, 1580; died there, 1662.

KILIAN, BARTOLOMÆUS, son of the preceding, was born in 1630. He studied at Frankfurt and Paris, settled at Augsburg at the age of 25, and was in great repute, especially for his portraits. Died, 1696.

KILLIAN, PHILIPP ANDREAS, another engraver of the same family as the above, was born at Augsburg in 1714. He became highly distinguished, was named court-engraver to the king of Poland in 1744, and subsequently spent five years at Dresden in directing the preparation of prints after the best pictures in the Dresden Gallery. Among his portraits are those of Pope Clement XIII, the Emperor Francis I., and Maria Theresa. Died, 1759.

KILLIGREW, WILLIAM, THOMAS, and HENRY, three brothers, distinguished for their talents, wit, and loyalty, in the reigns of Charles I. and II., were the sons of Sir Robert Killigrew, of Hanworth, in Middlesex.—WILLIAM, the eldest, was born in 1603; and after going through the usual course of a university education at St John's college, Oxford, made the tour of Europe. On his return to England he obtained a place at court, as one of the gentlemen ushers of the privy chamber to Charles I. During the civil wars, he suffered materially, both in purse and person, in consequence of his adherence to the royal cause; in recompense of which he received, after the Restoration, the honour of knighthood, and obtained the post of vice chamberlain. He composed four plays, which were popular in their day; also two essays, written in the decline of life, on the instability of human happiness; and died in 1663.—THOMAS, the second son, born in 1611, was page to Charles I., and accompanied the prince of Wales into exile, during his absence from England, he

visited France, Italy, and Spain, and, after the Restoration, was appointed by the new king (with whom he was a great favourite), voh of lively pleasntry, combined with a certain oddity, both of person and manner, placed him high in the good graces of Charles II., who would frequently allow him free access to his person, when characters of the first dignity in the state were refused it; till Killigrew at length became almost an insparable companion of his monarch's familiar hours. This was the Killigrew that obtained the appellation of "King Charles's mirth-creating spirit, his eleven dramatic pieces discover few traces of that facetiousness and whim which one imagines he must have actually possessed. Died, 1652.—

HENRY, the youngest of the three, was bred to the church, and obtained a stall in Westminster Abbey. From this he was ejected by the parliamentarians, but at the re-establishment of monarchy, it was restored to him, with other preferment. Died, 1690.

—His daughter, Anne Killigrew, born in 1660, had a decided genius for painting and poetry, and was distinguished for her exemplary piety and unblemished virtue, amidst the seductions of a licentious court. She was one of the maids of honour of the duchess of York, of whom, as well as of her husband, she executed portraits. She died, a victim to the small-pox, in 1685; and has been characterized by one of her contemporaries as "a grace for beauty, and a muse for wit." Several of her historical paintings are still in existence.

KIMCHI, DAVID, one of the most celebrated Jewish Rabbis, lived in the 12th and 13th centuries. He was a native of Provence, was the son of Joseph, and brother of Moses, Kimchi, both men of great reputation as biblical scholars, and became himself one of the most esteemed and influential teachers among his people. His fame is perpetuated by his commentaries on the Old Testament, and his Hebrew Grammar and Dictionary. Died about 1240.

KING, EDWARD, antiquary, was a native of Norwich; studied at Lincoln's inn; was called to the bar, and became recorder of Lynn. He was F.R.S. and F.A.S.; and produced an excellent work, entitled "Municipalia Antiqua," 3 vols. folio. Born, 1735; died, 1807.

KING, PETER, Lord Chancellor of England, an able and upright judge, nephew of John Locke the philosopher, was born in 1669. While serving his apprenticeship to his father, a grocer at Exeter, he secretly acquired the Greek and Latin languages by self-tuition, and so great was his proficiency that his uncle sent him to Leyden University. After leaving Leyden he entered the Middle Temple, and attained high forensic eminence. In 1705 he became a member of parliament, was made lord chief justice of the Common Pleas in 1716, and raised to the chancellorship in 1725. But he was no less remarkable for his ecclesiastical learning than for his legal attainments, for, besides a variety of controversial works of great ability, he wrote a "History of the

Apostles' Creed," and "An Inquiry into the Constitution, &c., of the Primitive Church," which excited great interest, and may still be consulted with advantage. Died 1743, leaving four sons, who all inherited the title in succession, and one of whose descendants, the seventh Lord King, gained some celebrity by his writings and speeches on political economy, and more especially by his "Thoughts on Bank Restrictions." Lord Brougham, in his "Statesmen of the Reign of George III.," has given an interesting account of this nobleman, who appears to have been as amiable in private life as he was able and liberal in his public career. He died, 1833, in the 58th year of his age.

KING, RUFUS, an American statesman and diplomatist, was born in 1755, at Scarborough, in the district of Maine; entered at Harvard College in 1773; studied the law, and was admitted to the bar in 1778; and was elected a member of congress in 1784. In 1796 he was appointed, by President Washington, minister plenipotentiary to the court of St James's, the functions of which office he continued to discharge till 1803, when he returned home. In 1813 he was a third time sent to the Senate by the legislature of New York; and his speech on the burning of Washington by the English was a most striking display of oratory. In 1816 he lost his election; but in 1820 he was once more re-elected, and continued until the expiration of the term in 1825. He then accepted the appointment of minister plenipotentiary at the court of London; but was taken ill, returned home, and soon after died, aged 72, in 1827.

KING, THOMAS, a celebrated actor and dramatic writer, was born in London, in 1730. Having obtained great celebrity as a comic actor in provincial companies, he was engaged at Drury Lane Theatre in 1769, where he soon became a great favourite with the public, and in 1768 arrived at the height of his professional reputation by the performance of *Lord Ogleby*. He subsequently became manager and part proprietor of the Bath and Bristol theatres, and also of Sadler's Wells; but these he relinquished, and continued to perform principally at Drury Lane, till he retired from the stage in 1801. His dramatic pieces are, "Love at First Sight," "Neck or Nothing," a farce; "A Peep behind the Curtain, or the New Rehearsal," a comedy; "Wit's Last Stake," a comedy; and "Lovers' Quarrels." Died, 1805.

KING, Dr WILLIAM, archbishop of Dublin, was born in 1650, and educated at Trinity College. He was the author of a celebrated treatise, "De Origine Mali," wherein he undertook to show how all the several kinds of evil with which the world abounds are consistent with the goodness of God, and may be accounted for without the supposition of an evil principle. He published several other works, and attained the dignity of archbishop, in 1702. Died, 1729.

KINGSBROUGH, EDWARD, Viscount, eldest son of the third earl of Kingston, was greatly distinguished for his literary acquirements and his attachment to literary pursuits. He was a fellow of the Antiquarian Society, and author of a splendid work on

"The Antiquities of Mexico." Born, 1768; died, 1837.

KIPPIS, ANDREW, a dissenting divine, biographer, and miscellaneous writer, was born at Nottingham, in 1725. He was the pastor successively, of congregations at Boston, Dorking, and Westminster; received a doctor's degree from the university of Edinburgh; and was latterly one of the tutors at the new academy or dissenters' college, Hackney. Dr Kippis laid the foundation of the "New Annual Register," and devoted his principal attention during the latter years of his life to an improved edition of the "Biographia Britannica," of which five volumes were printed; but it was conducted on a plan so elaborate as to afford no prospect of its termination. He also published the Lives of Captain Cook, Pringle, Doddridge, and Lardner, "A Vindication of the Dissenters," a volume of sermons, and "Observations on the late Contests in the Royal Society." Died, 1795.

KIRBY, JOHN JOSHUA, painter, was born in Suffolk, in 1716. On settling in London, he was introduced by Lord Bute to George III., became clerk of the works at Kew, and had the honour of teaching the queen the principles of perspective. He published, at the expense of the king, "The Perspective of Architecture," 2 vols. folio; was F.R.S. and F.A.S.; and died in 1774. Mrs Trimmer was his daughter.

KIRBY, WILLIAM, honorary president of the Entomological Society of London, and fellow of the Royal, Linnæan, Zoological, and Geological Societies, &c.; has left behind him an imperishable name as one of the first entomologists of this or any age. This title he would have assured to himself had he written no other work than his "Monographia Apum Angliæ," published in 1801, which excited the warmest admiration of British and foreign entomologists. But when to this great work we add his other entomological labours,—his numerous and valuable papers in the Transactions of the Linnæan Society; the "Introduction to Entomology," written in conjunction with Mr Spence; the entomological portion of his Bridgewater treatise, "On the History, Habits, and Instincts of Animals;" and his description (occupying a quarto volume, of the insects of the "Fauna Boreali-Americana" of Sir John Richardson, it will be evident how largely and successfully he contributed to the extension of his favourite science. Nor did he permit his love for science to encroach on his professional or social duties: for, while ranking so high as an entomologist, he was during his long life a most exemplary and active clergyman, beloved by his parishioners of all ranks, and one of the most simple-minded, warm-hearted, and pious of men. Died at Barham, Suffolk, of which place he had been rector for 68 years, July 4, 1850, in the 91st year of his age. A Memoir of his Life has since been published.

order at Rome, where he was professor of Hebrew. His works evince great learning; the principal are, "Gdipus Egyptiacus," 4 vols. folio; "Ars Magnesia," "Lingua Egyptiaca restituta," "Mundus Subterraneus," "Organon Mathematicum," "Mursurgia Universalls," &c. Died, 1680.

KIRK, Colonel, an English officer who, in 1885, committed the most inhuman barbarities against the followers of the duke of Monmouth, in the west of England. James II. had the meanness to solicit this butcher to turn Catholic, but Kirk roughly replied, "that when he was at Tangiers he had promised the dey, that if he ever changed his religion, he would turn Mahometan." He afterwards served in the army of King William III., and died at the close of the 17th century.

KIRKALDY, WILLIAM, a distinguished soldier in the reign of Mary, Queen of Scots. He early joined the party known by the name of the Lords of the Congregation, but afterwards attached himself to Melindar, who was at the head of the partisans of Mary. He was executed at Edinburgh in 1573.

KIRSTENIUS, PETER, an eminent physician, and professor of medicine at Upsal, in Sweden, was born at Breslau, in Silesia, in 1577. He was well skilled in Arabic, and understood 25 other languages. His works, which are chiefly on the oriental languages, are numerous and erudite. Died, 1640.

KIRWAN, RICHARD, LL.D., a distinguished writer on chemistry, geology, &c., was a native of Galway county, in Ireland. He was educated at the university of Dublin; devoted himself with great ardour to chemical and mineralogical researches; and became a member of the Royal Irish Academy, and also a fellow of the Royal Society. In 1794 appeared his "Elements of Mineralogy," 2 vols. 8vo. He also published "Geological Essays," a treatise on the "Analysis of Mineral Waters," an "Essay on Phlogiston and the Constitution of Acids," &c. Died, 1812.

KISS, AUGUST, German sculptor, born at Pless, in Upper Silesia, in 1802. At the age of 20 he went to Berlin, studied at the Academy, and afterwards became a pupil of Rauch. After executing many bas-reliefs and other small sculptures, chiefly from designs by Schinkel, he modelled, in 1839, his famous group of the Amazon and the Panther, which excited the greatest enthusiasm in Berlin, and was afterwards executed in bronze for the Berlin Museum. The bronze cast of this fine work was one of the most attractive objects at the Great Exhibition, London, in 1851. Among the other works of Kiss are, a statue of Frederick the Great for Breslau; bronze groups of St Michael and the Dragon and St George and the Dragon; and two statues of Frederick William III. Kiss was a member of the Berlin Academy, and professor at the Industrial Institute. Died at Berlin, 26th March, 1865.

KITCHENER, WILLIAM, a physician and miscellaneous writer, was born about 1775, and was the son of a respectable coal-merchant in London, who left him a large for-

ture. He was educated at Eton, and settled in London as a physician; but he distinguished himself far more by his disquisitions on gastronomy, than by his precepts on medicine. He was a kind-hearted, social man, with more follies than faults; one, in fact, who, rather than not acquire eccentricities, was happy to obtain it by the singularity of his conduct. He wrote a book, under the title of "The Cook's Oracle," in which the laws of the culinary art, professedly founded on his own practice, were promulgated; appointed a "committee of taste" among his friends, who had regular invitations to his dinner-table, while his evening *conversations* were the resort of privileged wits, and literary *bon vivants*. He was a great stickler for punctuality; and, for the regulation of these meetings, a placard was fixed over the chimney-piece, with this inscription, "At seven come, at eleven go," to which the facetious George Coiman added the word "it," making the last sentence, "at eleven go it!" Optics and music were also particular objects of his study. Besides "The Cook's Oracle," which was his most popular work, he published "The Art of Invigorating the Eyes," "The Traveller's Oracle," "Observations on Vocal Music," and "The Loyal and National Songs of England." Died, 1827.

KITTO, JOHN, D.D., who furnishes a striking example of the pursuit of knowledge under difficulties, was born at Plymouth in 1804. His father, who began life as a master builder, was reduced to the position of a jobbing mason, in which business young Kitto's help was required at a very early age. While thus occupied, in 1817, a fall from the top of a house totally destroyed his had been meagre; but the love of reading, which he had already acquired, became the solace of his loneliness, and the foundation of his attainments. In 1819, his parents, being unable to maintain him, placed him in the workhouse; whence he was removed, in 1821, to become an apprentice to a shoemaker, who, however, treated him so ill, that he was compelled once more to take refuge in the workhouse. In 1823, he was enabled, by the kindness of two gentlemen of the neighbourhood, to publish a small volume of essays and letters, and was placed in a position less unfavourable to self-improvement. The next ten years of Dr Kitto's life were spent abroad. He journeyed over a large part of Europe and Asia, and acquired that familiarity with the scenery and customs of the East which was afterwards of such signal service in the department of literature to which he became devoted. Returning to England in 1833, he gained attention by a series of papers in the "Penny Magazine" under the title of "The Deaf Traveller;" and having married, commenced a course of literary activity which was continued without interruption till within a few months of his decease. His chief productions consist of "The Lost Senses," a "Bible History of the Holy Land," "Palestine," "Physical Geography of the Holy Land," &c., &c.; he also founded

and edited "The Journal of Sacred Literature;" but his chief title to fame rests on his "Cyclopaedia of Biblical Literature," first published in 2 vols. in 1845, and of which a second edition, revised and enlarged by Dr L. Alexander, has lately been published. For several years before his death Dr Kitto was exposed to pecuniary difficulties, which a pension of £100 a year did not wholly remove. Died, 1854. Memoirs of Dr Kitto have been written by J. E. Nyland and by Dr Eadie.

KLAPROTH, MARTIN HEINRICH, an eminent chemist and mineralogist, was born at Berlin, in 1743; became chemical professor there; and died in 1817. He was the discoverer of uranium, the earth zirconia, and mellic acid; he also made interesting experiments on copal, and completed the discovery of tellurium and titanium. Among his works are, "A System of Mineralogy," "Chemical Essays," and, in conjunction with Wolf, a "Dictionary of Chemistry."

KLAPROTH, HENRY JULIUS, son of the celebrated chemist of Berlin, was intended by his father to pursue the study of the physical sciences, but abandoned them in favour of the oriental languages, in which he became one of the ablest modern scholars. In 1805 he was selected to accompany the Russian ambassador into China, and in 1807 the Academy of St Petersburg commissioned him to visit the Caucasian provinces. Subsequently he settled at Paris, where he founded and organized the Asiatic Society. He has left many valuable works: "Asia Polyglotta," "Travels in the Caucasus," "Tableaux Historiques de l'Asie depuis la Monarchie de Cyrus," "Mémoires relatifs à l'Asie," "Tableau Historique, &c., du Caucase," besides a large number of smaller works, memoirs, &c. Born, 1783; died, 1835.

KLEBER, JEAN BAPTISTE, a celebrated French general, was born at Strasburg, in 1754. He was originally an architect, but preferred the military profession, and entered into the Austrian service, in which he remained from 1776 to 1783. When the French revolutionary war broke out, he entered as a grenadier into a volunteer regiment of his native department, and rose rapidly into command. He displayed great skill and bravery at the siege of Mentz, after which he was employed in La Vendée, but the sanguinary scenes there so disgusted him that he obtained his recall, and was engaged in the army of the north, defeated the Austrians, took Mons, and drove the enemy from Louvain. He also captured Maestricht, and contributed to the splendid successes which distinguished the campaigns of 1795 and 1796 on the Rhine. The Directory gave him the command of the army of the Sambre and Meuse, which he resigned to Hoche, and for a time retired from the service. Buonaparte, however, who well knew the value of his talents, prevailed upon him to join the expedition to Egypt. He was wounded at the battle of Alexandria, but he marched into Syria, where he commanded the corps of observation during the siege of Acre, and defeated the Turks in several actions. When Buonaparte left Egypt, he appointed Kleber commander-in-chief of the army; and

though, under the then existing circumstances, no situation could be more difficult or disheartening, yet he maintained himself successfully against the enemy, captured the city of Cairo, and made an alliance with Murad Bey; but in the midst of new preparations which he was making for securing possession of the country, he was assassinated by an Arab, June 14, 1800. Of all the military characters that figured during the era of the French revolution, few of them surpassed Kleber for coolness, courage, and activity; while scarcely one was equally distinguished for humanity and integrity.

KLEIST, CHRISTIAN EWALD VON, a German poet, was born at Zebitz, in Pomerania, in 1715. After studying the mathematics, philosophy, and law, at Königsberg, he entered into the Danish service, and next into that of Prussia, where he rose to the rank of major; and was killed, after displaying almost romantic bravery, at the battle of Kunersdorf, in 1759. His principal poem, entitled "Spring," is descriptive, and has been compared to the "Seasons" of Thomson. Kleist also wrote idylls, moral treatises, and a military romance, called "Cassides."

KLEIST VON NOLLENDORF, EMILIU FRIEDRICH, Count, a distinguished Prussian general, was born at Berlin, in 1762. Having risen by his talents and courage to the rank of general, he commanded a corps of Prussians, in 1812, auxiliary to Napoleon's grand army; signalized himself at the battle of Bautzen, May 20, 1813; and was one of the plenipotentiaries who concluded the armistice. After the retreat of the allied troops from Dresden into Bohemia, Kleist gave battle to the army under Vandamme, and by his victory at the village of Nollendorf saved Bohemia, against which Napoleon had directed his best energies. He was afterwards honoured by the title of Count von Nollendorf. He accompanied the king of Prussia to England, but was prevailed upon by ill health from taking part in the campaigns of 1815. Died, 1821.

KLENZE, LEO VON, a very distinguished German architect, was born at Hildesheim in 1784. He studied at Berlin and at the Ecole Polytechnique, Paris, and afterwards travelled in Italy. After holding various appointments in Germany, he settled at Munich, in 1816, as court architect to King Maximilian I., and was employed in preparing designs for the Walhalla and other of the great buildings then projected. He remained in the service of King Ludwig, not only holding high offices at court, but enjoying the friendship and confidence of the king. In 1821 he was named privy councillor and ennobled. Klenze followed in his principal buildings Greek or Roman models, seldom attempting Gothic, and never with any marked success. His great works are, the Walhalla, completed in 1833; the Glyptothek, or Sculpture Gallery, the Pinacothek, or Picture Gallery, the Propylæa, All Saints' Chapel, and the Ruhmeshalle at Munich, and the Imperial Museum at St. Petersburg. Though working mostly after Greek models, Klenze was very successful in inventing novel details of ornamentation.

harmonizing with the antique style. He published a selection of his principal designs, entitled "Sammlung Architectonische Entwürfe," and several other architectural works. Klönze was a member of the Academies of Vienna and St Petersburg, and a foreign associate of the French Institute. Died at Munich, 26th January, 1864.

KLINGEMANN, AUGUSTUS, a dramatic writer, and director of the national theatre at Braunschweig, was born in that city, in 1777. In 1813 he received the direction of the theatre of his native place, and under his superintendence it became one of the first in Germany. His dramatic works form 2 vols., and among them are, "Heinrich der Löwe," "Luther," "Moses," "Faust," &c.

KLINGENSTIERNA, SAMUEL, Swedish mathematician and natural philosopher, was born in 1689. He studied at Upsal, and afterwards spent several years in European travel, during which he became acquainted with the German philosopher Wolf, and the French mathematicians Clairaut, Fontenelle, and Mairan. He was appointed on his return professor of mathematics, and later tutor to the Prince Royal, afterwards Gustavus III.; was named councillor of state member of the Royal Society of Upsal, of the Swedish Academy, and of the Royal Society of London, to each of which he contributed memoirs. His separate works were a Latin translation of Euclid and a Swedish translation of Muschenbrock's "Physics." Died, 1785.

KLOPSTOCK, FRIEDRICH GOTTLIEB, a celebrated German poet, was born at Quedlinburg, in 1724. After receiving a liberal education at his native place, he was sent to study theology at Jena, where he wrote a great part of his "Messiah," which he published in 1748, at Leipzig. Though this poem underwent the ordeal of severe criticism, it was admired by the majority; and in its praises. Klopstock was invited to that country, and while there, the people regarded him with a kind of veneration, from whence he was attracted to Copenhagen by the most flattering promises, which were amply fulfilled. In 1771 he went to reside at Hamburg as Danish ambassador, and counsellor from the court of Baden. He died in 1804, and was buried with great pomp and solemnity. As a lyrical writer, Klopstock is perhaps, amongst the most successful of his countrymen. His patriotism is strong and ardent; and his later odes, called forth by the French revolution, in which at first he took the warmest interest, are distinguished by bold and original turns of expression. His tragedies, though not calculated for the stage, contain beautiful passages and the loftiest sentiments; but his greatest work, "The Messiah," though possessing much sublimity, did not fulfil the expectations of his countrymen, who predicted that it would eclipse the Paradise of Milton. Like Milton's great work, it is not so commonly praised than read. Klopstock was twice married. MARGARET, his first wife, whom he married in 1754, who died in 1768, was a woman of kin-

dred genius and literary accomplishments. Among her productions are, "The Death of Abel," a tragedy; and "Letters from the Dead to the Living."

KLOTZ, CHRISTIAN ADOLPH, an eminent German scholar and critic, was born in 1738, at Hirschowerden, in Lusatia; studied at Leipzig and Jena; and, in 1762, was appointed professor of philosophy at Göttingen. He afterwards, by the invitation of Frederick the Great, held a similar situation at Halle, where he died in 1771. Klotz distinguished himself by his Latin poems, his numismatic treatises, and his works on the study of antiquity and the value of ancient gems.

KLUIT, ADRIAN, a Dutch historian, was born at Dort in 1738; studied at Utrecht; and became professor of archaeology and diplomatic history at Leyden. His political opinions occasioned his removal from the chair in 1795; but in 1806, under the new government, he was professor of statistics. His death, which took place in 1807, was the explosion of a boat laden with gunpowder, which was moored to the quay near where he resided. His chief work is a history of the political affairs of Holland in 1795, in 5 vols.

KMETZ, GEORGE, a distinguished Hungarian general, was born in 1813. He was the son of a Protestant clergyman, and early entered the Austrian army, becoming after seven years' service first lieutenant and adjutant of his regiment. He held that post 14 years, and endeared himself to his men by his frankness, simplicity, and manliness of character. At the commencement of the popular movement in Hungary in the spring of 1848, he was selected to train, at Raab, a battalion of volunteers for the national army, and succeeded so admirably in his task that, in six weeks, they were fit for service in the field. Kmetz soon became colonel, and commanded a division of the army of the Danube under Görgey with much distinction during the campaign which drove the Austrians out of Hungary. The intervention of Russia made the cause of the Hungarian patriots hopeless, and Kmetz, with the remnants of the defeated army, retired to Turkey, where he remained till 1831. He then came to England and worked hard to earn a living as a teacher of music. On the outbreak of the Crimean war he returned to Turkey, and was appointed, early in 1854, as major-general to command the irregulars of the army of Anatolia. The extremes of heat and cold, and the hard outpost work, with no opportunity of distinguishing himself, tried his naturally strong constitution severely. He was soon transferred to command of a division of the regular army, and took a leading part in the famous defence of Kars against the Russians. He had Major Teesdale for his chief of the staff. On the 29th September he totally defeated the Russian army before the plateau of Tachmaz. But the victory was not followed up, and when the surrender of the Hungarian army was inevitable, Kmetz escaped to Constantinople, where he was named lieutenant-general. His last military service was the suppression of the disorders

attending the massacres in Syria, in time to avert the threatened French intervention. He again came to England, with ruined health, hoping for repose and restoration; but he died very suddenly, by paralysis, at London, in April, 1865. His funeral, in Kensal Green Cemetery, was at the expense of the Turkish government, and was attended by many eminent Englishmen.

KNELLER, Sir GODFREY, an eminent portrait painter, born at Lübeck in 1648, was designed for a military life, and sent to Leyden to study mathematics and fortification, but showing a decided bent for painting, was placed under Bol and Rembrandt at Amsterdam. Having visited Italy, where he studied with Carlo Maratti and Bernini, he came to England in 1674; and was first painter to Charles II., James II., William III., Queen Anne, and George I. For William III. he painted the beauties at Hampton Court, and several of the portraits in the gallery of admirals. "The Kit-Cat Club," a collection of portraits, is one of Kneller's most celebrated works. His colouring is lively, true, and harmonious; his drawing correct, and his disposition judicious; he displays, however, a singular want of imagination in his pictures, the attitudes, action, and drapery being tasteless, unvarying, and ungraceful. He has been accused of caring more for money than for lasting fame, and the consequence is that many of his productions are below mediocrity. He was in habits of intimacy with Pope and most of his eminent contemporaries; and, as he possessed a fund of humour, and was of a gay and convivial turn, his acquaintance was eagerly sought after. He continued to practise his art till after he was seventy years of age, amassed a large fortune, and died in 1723.

KNIBB, WILLIAM, a celebrated Baptist missionary, was born at Kettering, in Northamptonshire, at the beginning of the present century. Originally apprenticed to a printer at Bristol, he offered, on the death of his brother, to supply his place as a teacher of a Baptist school in Jamaica; and having repaired thither in 1824, he was in 1829 appointed pastor of the mission church at Falmouth, where his efforts to ameliorate the condition of the negroes were amply rewarded by their gratitude towards him. But these very efforts excited such hostility among the planters, overseers, and others in the slaveholding interest, that when in 1832 a formidable slave insurrection was threatened, Mr Knibb was not only compelled, despite his sacred calling, to serve in the militia, but was treated with marked indignity, and shortly afterwards arrested for being implicated in the threatened rebellion. In the absence of all evidence to support a criminal prosecution he was released; but his chapel and mission premises having been burnt down during the disturbances, he resolved to proceed to England to explain all the circumstances connected with his mission. Feeling that the time for neutrality was passed, he now boldly advocated the entire and immediate abolition of slavery; and it is not going too far to say, that his stirring harangues throughout the country

had no unimportant share in bringing about the emancipation act of 1833. In 1834 he once more returned to Jamaica, where he vigilantly watched the operation of the new act, exposed the evils of the apprenticeship system, raised subscriptions for building new churches, founded schools, and after ten years spent in these and similar undertakings (to obtain sympathy and pecuniary aid for which, he had once more revisited England in 1844), he was suddenly seized with yellow fever, and died after a four days' illness at the village of Kettering, in Jamaica, Nov. 15th, 1845.

KNIGHT, HENRY GALLY, a distinguished traveller and accomplished virtuoso and antiquary, was born in 1786. Soon after succeeding to his father's estates in Nottinghamshire, in 1808, Mr Knight set out on a course of extensive travel in Spain, Sicily, Greece, the Holy Land, &c.; and on his return he published his tour. In 1814 he published a poem, entitled "Europa Pœdiviva;" and this was followed at intervals by "Phrosync, a Grecian Tale," "Alashtor, an Arabian Tale," and "Hannibal in Bithynia." But Mr Knight's chief title to fame consists in the zeal with which he devoted himself to the investigation of architectural history both at home and abroad; and the fruits of which he gave to the world in an "Architectural Tour in Normandy," "The Normans in Sicily," and his last and greatest work, the "Ecclesiastical Architecture of Italy," &c. Mr Knight was a member of the commission for the advancement of the fine arts, and his purse was ever ready to promote the cultivation of literature and art. In 1824 he was for a short period M. P. for Aldborough; in 1830 he sat for Malton; and from 1835 down to his demise he was one of the members for North North. Died, 1846.

KNIGHT, RICHARD PAYNE, a man of fortune, and a patron of learning and the fine arts, was born in 1748. He devoted a great portion of his time to the cultivation of classical literature, and the elucidation of the domestic manners of the ancients; while his splendid collection of ancient bronzes, medals, pictures, and drawings, in his museum at his house in Soho Square, gave sufficient proofs of his taste as a virtuoso. The whole of this valuable collection, worth £50,000, he bequeathed to the British Museum. As an author he was distinguished for the variety of his knowledge, and his critical acumen. Among his works are, "An Account of the Remains of the Worship of Priapus," an "Analytical Inquiry into the Principles of Taste," "Prolegomena in Homerum," "The Landscape, a didactic poem;" and "The Progress of Civil Society." Died, 1824.

KNIGHTON, HENRY, an English historian, was a canon regular of Leicester Abbey, in the reign of Richard II., of whom he wrote an account; also a chronicle from the Conquest to 1399.

KNIGHTON, Sir WILLIAM, bart., physician and private secretary to George IV., originally entered the medical profession as an apothecary at Tavistock, but soon moved to London, where he first practised

as an accoucheur, having also been physician also to the marquis of Bieinan, on the prince regent's physicians. Sir John Moore's papers relating to the prince's case without comment placed in the hands of the owner. The duke manner pointed him out as a baronet, a favourite at court, and his extensive; but to Sir Benjamin's situation of prince regent after the death of the late king, he wholly abandoned the profession, and died in October 1804.

KNOLLER, JACOB, a German fresco-painter, in the Tyrrol, considered by his own countrymen to be one of the most eminent painters of his age, and employed by the emperor of Austria, obtained in 1782 the title of count, and returned to Vienna, where he died in 1804.

KNOLLES, Sir JOHN, a military commander in the reign of Charles II., was of low origin, but, being of an enterprising spirit, rose to the rank of general.

KNOLLIS, or KNOLLS, an English statesman, was created Earl of Elizabeth, and was one of the commissioners who attended the queen of Scots; and was in the royal household of Charles II. He died in 1671.

KNORR, GEORG WILHELM, a German engraver, who also devoted himself to the study of natural history, was the author of "Thesaurus Anatomicus Universalis," &c. Born, 1701.

of Scotland to rule without a parliament. In April, 1559, he would have visited England, but was prevented by the resentment felt by Elizabeth at his late treatise. He therefore proceeded directly to Scotland, where he found a persecution of the Protestants just ready to commence at Stirling. He hurried to the scene of action to share the danger, and, mounting a pulpit, inflamed the people by a vehement harangue against idolatry. The violence of his denunciations, aided by the indiscretion of a priest, who immediately on the conclusion of this discourse was preparing to celebrate mass, precipitated his hearers into a general attack on the churches of the city, in which the altars were overturned, the paintings and finest works of architecture destroyed, the images broken, and the menasteries almost levelled to the ground. From that time forward he never ceased to promote, by all the means in his power, the cause he had espoused. Like Luther, he was one of those extraordinary men of whom few, if any, are observed to speak with sufficient temper; all is either extravagant encomium or violent invective. After his death appeared his "History of the Reformation of Religion within the Realm of Scotland," &c., to the 4th edition of which are appended all his other works. He died, Nov. 24, 1572, and was buried at Edinburgh, several lords attending; and when he was laid in his grave, the earl of Morton, that day chosen regent, exclaimed, "There lies he who never feared the face of man." There is a valuable "Life of John Knox," by M'Crice. A portrait, by an unknown painter, is in the National Collection.

KNOX, ROBERT, an eminent anatomist and medical writer, was born at Edinburgh in 1793. He was descended from the ancient family of Ranfurly, in Renfrew, of which the great reformer, John Knox, was a member. He studied at the High School, and then at the university of Edinburgh, graduated M.D., and served for some years as assistant-surgeon in the army. In 1825, he became the partner of Dr Barclay, a distinguished teacher of anatomy and physiology at Edinburgh, who, however, soon retired, leaving Knox as his successor. Dr Knox continued to teach there with the greatest popularity about eighteen years, and among his very numerous pupils were William Fergusson, Richard Owen, W. B. Carpenter, Edward Forbes, and many others who have attained high positions. In 1845 he settled in London, attaching himself to the Royal Free Hospital, and the Cancer Hospital, visiting occasionally the chief provincial towns to give lectures on his favourite subjects, and working hard also in the field of medical literature. His principal work is on the "Races of Men," and its purport is, that race is everything; that literature, science, art, in a word, civilization, depends on it. Among his other works are—"Manual of Human Anatomy;" "On Man, his structure and physiology;" "Great Artists and Great Anatomists;" and a "Manual of Artistic Anatomy." He translated from the French Cloquet's Anatomy, Milne-Edward's Manual of Zoology, and other works. Dr Knox was an enthusiastic student

of science, a fine talker, had little money and less love for it, and in personal appearance was little favoured by nature. He was F.R.S.E. and correspondent of the French Academy of Sciences. Died at Hackney, 20th December, 1862.

KNOX, VICESIMUS, D.D., an eminent author and an eloquent preacher, was born in 1752; and received his education at Merchant Taylors' School, and St John's College, Oxford. On the death of his father, he was chosen his successor in the head-mastership of Tunbridge Grammar School, over which he presided, with great reputation, thirty-three years; and when, in 1812, he retired, he was himself succeeded by his son, Dr Thomas Knox. In theological and classical learning he excelled most of his contemporaries; in an acquaintance with polite literature he was surpassed by none. He held the living of Ramsden in Essex, and the chapelry of Shipbourne in Kent, at which latter place and at Tunbridge he for many years officiated. His works consist of "Essays, Moral and Literary," 3 vols.; "Liberal Education," 2 vols.; "Winter Evenings," 3 vols.; Sermons, and a pamphlet "On the National Importance of Classical Education." Besides these he published two series of selections from the works of the best English authors, under the titles of "Elegant Extracts" and "Elegant Epistles." He is also regarded as the author of a political work, entitled "The Spirit of Despotism," published anonymously in 1794, and of various anti-belligerent tracts, which appeared at the commencement of the French revolution. Died in 1821.

KOBELL, FERDINAND, a German painter and etcher, born at Mannheim, in 1740. He became cabinet-painter to the elector-palatine, who had encouraged him in his pursuit of art, and was admitted to the Academy of Mannheim. He painted chiefly landscapes, and executed a large number of etchings, of which a collection was published after his death. He spent his last years at Munch, and died in 1799.

KOCH, JOSEPH ANTON, German painter, was born in the valley of the Lech, in 1768. After studying for some years at Stuttgart, he went to Rome, where he spent the rest of his life. He chiefly distinguished himself by his landscapes, but painted some historical pictures, and some illustrations in fresco to Dante. He also executed many good etchings. Died, 1839.

KOENIG, JOHANN GERARD, a physician of Courland, in Lithuania, born 1729, was a celebrated botanist, and travelled to the East Indies and other countries in pursuit of his favourite science, keeping up a correspondence at the time with Linnæus, his old preceptor. Died, 1785.

KOLBE, or KOLBEN, PETER, a German traveller, was born in 1674, at Dorflas, in the principality of Bayreuth. He studied at Halle, in 1700; soon after which he was sent to the Cape of Good Hope, by the king of Prussia, to make astronomical observations. He remained there 10 years, and was afflicted with blindness, but recovered his sight on his return to Europe, and became rector of the Gymnasium of Neustadt. He wrote a

KOLLAR, JAN, a Slavonic poet and miscellaneous writer, was born in Hungary, about 1793. He became a preacher, and settled at Pesth, but chiefly distinguished himself by his literary works. The idea of Slavonic nationality, or Panslavism, found in him its first and most passionate expounder, and most of his writings, both in verse and prose, are inspired and pervaded by it. He wrote chiefly in the Bohemian language, and his works consist of poems, essays, and antiquarian-historical disquisitions. In 1849, he was appointed professor of archaeology at the university of Vienna, and died there in January, 1852.

KÖNIGSMARK, MARIA AUKORA, Countess of, one of the mistresses of Augustus II., king of Poland, was born about 1678. She was equally celebrated on account of her personal charms and extraordinary talents, and of the part which she played in politics. While a girl, she wrote and spoke Swedish, German, French, Italian, and English; read the classics in the original languages; had an extensive knowledge of history and geography; and composed poems in French and Italian. She played on several instruments, composed music, sang and painted with great skill; all which accomplishments were aided by a refined wit and superior conversational powers. Thus gifted and accomplished, she arrived, in 1694, in Dresden, with her two sisters. The elector fell in love with her at first sight; she yielded, appeared at court as his mistress, and bore him a son, the famous Marshal Saxe, to whose training she gave up the remainder of her life. Though the passion of the tickle king cooled, and another favourite supplanted the countess, he always remained on terms of friendship with her; and by his influence she was appointed, by the court of Vienna, superintendent of Quedlinburg, where she chiefly resided until her death, which took place in 1768.

KÖRNER, THEODORE, an eminent poet, often called the German Tyrtaeus, was born at Dresden, in 1791; and, after studying at Leipzig, became a dramatist and secretary to the management of the court theatre of Vienna. Being an enthusiast for the liberty of Germany, he entered as a volunteer into the Prussian army, in 1813; signalized himself equally by his bravery and his martial songs: of Lützen; was afterwards twice wounded; made a lieutenant; and fell in a skirmish with the French, in Mecklenburg, August 26, 1813. His lyrical poems were published after his death, under the title of "The Lyre and Sword;" but innumerable editions of his works, consisting of his dramas, poems and other literary remains, have since been published in Germany; and many of his writings have been repeatedly translated into English.

KOSCIUSKO, THADDEUS, a celebrated Polish general and patriot, was descended from an ancient and noble, though not wealthy, family in Lithuania, and was born in 1756. He was educated at the military

school of Warsaw, and completed his studies in France. On his return to Poland he had a commission given him; but being refused promotion, he went to America, where war was then carrying on between Great Britain and her colonies. He was made a colonel of engineers and aide-de-camp to Washington. At the conclusion of the war he returned to his native country, and lived in retirement; but when the Polish army was formed, in 1789, the diet appointed him a major-general. He declared himself for the constitution of May 3rd, 1791, and served under Prince Joseph Poniatowski. In the campaign of 1792, he distinguished himself against the Russians at Zielonek and Dubienka. At the latter place, under cover of some works which he had thrown up in the course of 24 hours, he repulsed, with 4000 men, three successive attacks of 18,000 Russians, who prevailed only after the loss of 4000 men. When King Stanislaus submitted to Catherine, he, with 16 other officers, left the army, and was, therefore, obliged to retire from Poland. He went to Leipzig; and the legislative assembly of France, at this time, gave him the rights of a French citizen. The Poles becoming impatient under the oppression of Russia, all eyes were turned towards Kosciusko, whom they chose for their leader, and invested with the full powers of generalissimo. Kosciusko then advanced to meet the Russian forces. Without artillery, at the head of only 4000 men, part of whom were armed only with scythes and pikes, he defeated 12,000 Russians at Raslawice, April 4, 1794. His army soon increased to 9000 men, the insurrection extended to Warsaw, and in a few days the Russians were driven from that palatinate. But the enemy poured in on all sides, and at length, after having for six months delayed the fall of Poland, he was wounded and taken prisoner, Oct. 4, at the battle of Macelowice. He was sent to Russia, and confined in a fortress near St Petersburg, till the accession of the Emperor Paul, who set him at liberty. In 1797 he took his departure for the United States of America, but returned to Europe the following year, and settled in France. Buonaparte often endeavoured to engage him in his ambitious schemes for the subjection of Poland; but the disinterested patriot saw through his designs, and rejected his overtures. He died at Soleure, in Switzerland, in 1817.

KOSTER, LAURENCE. [COSTER.]
KOTZEBUE, AUGUST FRIEDRICH FERDINAND VON, a prolific German writer, was born, in 1761, at Weimar. At the age of 16 years he entered the university of Jena, where his inclination for the drama was confirmed by his connection with a private theatre. In 1781 he went to St Petersburg, at the suggestion of the Prussian minister at that court, and became secretary to the governor-general, Von Bawr, who recommended him to the empress, who became his patroness, and he was finally appointed president of the government of Esthonia. In 1793 he retired to a country place about 35 miles from Narva; but soon after went to Weimar, and from thence again to St Petersburg. He had, however, scarcely ar-

rived on the frontiers, before he was arrested and sent to Siberia, without any reason being assigned. A short drama of his, an indirect eulogy of Paul I., was translated into Russian, and laid, in manuscript, before the emperor, who was so delighted with it, that he recalled Kotzebue, and took him into favour. After the death of Paul, he again went to Germany, but, in 1806, revisited Russia, to avoid the French, and never ceased to write against Napoleon. Some subsequent years were spent in travelling, and the remainder of his life in pouring forth his innumerable literary productions. He is said to have written many of the Russian state papers and proclamations. In 1817 he received a salary of 15,000 roubles, with directions to reside in Germany, and to report upon literature and public opinion. This invidious office Kotzebue is said to have filled in a manner hostile to the freedom of his native land, and he was regarded with aversion by the liberals of Germany. His strictures on the conduct of the students of the German universities highly exasperated them; and the feeling was so strong in the case of a young enthusiast named Sand, that he went to Kotzebue's house at Mannheim, and there deliberately murdered him, March 23, 1819, and then immediately gave himself up to justice. Kotzebue was author of 98 dramas, and his name appears to about 200 more, which are either translations, or were written by other persons and retouched by him. Among his other numerous productions are, "A History of the German Empire," "A History of Ancient Prussia," and various "Recollections," such as of Paris, Rome, Naples, &c.

KRAFFT, ADAM, a German sculptor of the 15th century, was born at Nürnberg about 1435. His most famous work is the elaborately decorated stone tabernacle in the choir of the Lorenz-kirche in that city. Little is yet certainly known of the works of this artist or of the dates of their execution. He is said to have died early in the 16th century.

KRANACH, OR CRANACH, LUCAS (whose proper name was Sunder), a distinguished painter, was born at Kranach, in Bavaria, 1472. He was patronized by Frederic, elector of Saxony, whom he accompanied on a journey through Palatinate in 1493, and soon afterwards commenced his career as an historical painter, which, whether we consider the number or the excellence of his works, has been surpassed by few of his countrymen. He was intimately associated with the great reformers, Luther and Melancthon, whose portraits, as taken by him, are amongst the most interesting memorials of their age. Died, 1533. His son Lucas, with whom he is sometimes confounded, gained great distinction in the same career, and died in 1596.

KRANTZ, ALBERT, a German historian and philosopher of the 15th century; author of a Latin "Chronicle of the Kingdoms of Denmark, Sweden, and Norway," a "History of the Ancient Vandals," &c. His reputation as an able and upright diplomatist also was so well established, that in a dispute of a territorial nature, which occurred

between the courts of Holstein and Denmark, the contending potentates agreed to abide by his arbitration.

KRABICKI, IGNATIUS, Count of Sietzen, prince-bishop of Warmia, &c., one of the most illustrious of the Polish literati of the 18th century, was born at Dubecko, in 1735. When the first partition of Poland, in 1772, deprived him of his senatorial dignities, he turned his attention to literature, and produced numerous poems, epic, mock-heroic, and satirical. He was much esteemed by Frederick the Great, who took great pleasure in his lively and agreeable conversation; and the following *morceau* is related of them. The monarch having said, "I hope, Mr Archbishop, you will carry me under your episcopal cloak to Paradiso;"—the prelate replied, "No, sire, your majesty has cut it so short, that it will not serve the purpose of concealing contraband goods." Among his writings are, "The War of Chocslm," in 12 cantos; "Monachomachia, or the War of the Monks;" "fabrics, odes, &c. He died at Berlin, in 1801.

KRAJINSKI, VALERIAN, Count, a Polish historian and miscellaneous writer, was born in White Russia. He was appointed to an important office in the ministry of public instruction, in which he rendered great services to his country. After the revolution of 1830 he was sent on a mission to England, and the liberties of Poland being again extinguished by Russia, he remained here, and applied himself to literary labour. Among his works are—"The Rise, Progress, and Decline of the Reformation in Poland;" "Sketch of the Religious History of the Slavonic Nations;" a translation of Calvin's Treatise on Belles, &c. Died at Edinburgh, 1853.

KRAY, Baron de, an Austrian general, born, 1735, embraced the military profession early in life. He first distinguished himself in the war with the Turks; and in the campaigns in the Netherlands, and on the Rhine, from 1793 to 1797, he was one of the most active of the imperial commanders. The brilliant manner in which he opened the campaign of 1799, made way for the future triumphs of Meiss and Suvwarow, and in 1800 he replaced the Archduke Charles in the command of the army of the Rhine. Died, 1804.

KREUTZER, RUDOLPH, a celebrated violinist and musical composer, was born at Versailles, in 1737. He travelled in Germany, Holland, and Italy; and having established himself as one of the first performers in Europe, he was placed at the head of the orchestra at the grand opera of Paris. He composed the music for the operas of "Lodoviska," "Joan of Arc," "Paul and Virginia," "Charlotte and Werter," and some others. Died, 1831.

KRUDENER, JULIANA, Baroness VALERIE DE, a religious enthusiast, was the daughter of the Russian Baron Vieltinghoff, governor of Riga, where she was born, in 1766. For some years she resided in France, and was the gayest of the gay in the Parisian circles. At the age of 14 she married Baron Krudener, appointed ambassador by Catherine II. to Berlin, and subsequently to

Venice. In love with which ever "Valérie." the friend on her death which was aism. Venice. Here the secretary of legation fell in love with her, and committed suicide; on which event she wrote a romance, entitled "Valérie." Returning to Berlin she enjoyed the friendship of the queen of Prussia, and on her death fell into a profound melancholy, which was succeeded by a religious enthusiasm. She became a follower of Jung Stilling and wandered from state to state, preaching and prophesying. In 1814 she became acquainted with Alexander, emperor of Russia, who had already for some time shown a disposition to religious contemplations, and on whom her conversations had a great influence. In Paris, she had prayer-meetings, attended by distinguished personages, where she was seen in the background of a suite of rooms, in the dress of a priestess, kneeling in prayer. Her predictions excited much attention; and when the allied sovereigns quitted Paris, she retreated into Switzerland, where she preached the approach of the millennium, and drew around her multitudes of the credulous mountaineers, who listened to, and believed in, her mission. At length the states interfered, and she removed to Germany; but wherever she arrived, she was under the surveillance of the police, who ultimately transported her to the Russian frontier. She was, however, ordered not to go to Petersburg or Moscow; she accordingly visited the Crimea, where she died in 1824.

KRUILOFF, IVAN ANDREEVICH, the celebrated Russian fabulist, was a native of Moscow, and was born in 1768. He showed his literary propensities in boyhood by the composition of several plays, but he did not begin to write fables till he was of middle age. The great success of his first attempts encouraged him to persevere in the same field, and he charmed equally the educated and the ignorant by the wit of his inventions and the clearness of his style. He acquired the designation of the Russian La Fontaine. In 1812 he was appointed assistant in the Imperial Library, and through life enjoyed the favour of the court and the friendship and society of other eminent Russian authors. At the age of 60 he set himself to the study of Greek, and gained a good mastery of it. He received from the emperor the honour of no less than three orders of knighthood. Died in 1844.

KRÜMMACHER, FRIEDRICH ADOLPH, a German religious writer, whose "Parables" and many other works are well known in England, was born at Tecklenburg in 1768; and became successively minister of Crefeld, Kellwick, and Bernberg, and ended a long and useful career as an eminent preacher and writer at Bremen, 1845, where he had laboured for 21 years.

KRUNITZ, JOHANN GEORG, a German physician and natural philosopher, was born at Berlin, in 1728; studied at Göttingen, Halle, and Frankfort-on-the-Oder; devoted his whole life to literary pursuits on his return to his native city, and died in 1794. He produced an extraordinary number of works, the most considerable of which is an "Economico-technologica Encyclopædia," which he commenced in 1773. He had completed 73 volumes, and had just reached the article

"Leiche," a corpse, when his progress was arrested by death.

KÜGELGEN, GERHARD and KARL VON, German painters, were twin-brothers, born at Bacharach, in 1772. At the age of 19 they went to study at Rome, but had soon to quit that city; when they retired to St Petersburg, obtained the patronage of the Emperor Alexander, and were sent by him to paint some scenes in the Crimea. They were admitted to the Academia of St Petersburg and Berlin. Gerhard settled at Dresden in 1804, and became director of the School of Painting. He was murdered while on a journey in 1820. Karl chiefly painted landscapes, and continued to be employed at St Petersburg. He died at Revel, 1832.

KUH, EPHRAIM MOSES, a German poet, born of Jewish parents, at Breslau, in 1731. His father intended him for the synagogue, but he had no relish for the subtleties of the Talmud, and at his father's death he went to Berlin, and took a situation in the counting-house of his uncle, where he soon formed an acquaintance with Mendelssohn, Ranier, Lessing, and other men of letters. He afterwards travelled through Holland, France, Italy, and Switzerland; but on his return to Germany he was attacked with hypochondria, which passed into insanity; and it was at this time, in his lucid intervals, that he produced his best poetical pieces. Died in 1790.

KUHMAN, QUIRINUS, a fanatic, and probably a madman, of the 17th century, born at Breslau, in 1651. He pretended to have acquired the faculty of fore-knowledge, and of holding communion with invisible spirits; but while travelling through Russia, where some of his prophecies were distasteful to the government, he was brought to the stake, and suffered with all the fortitude of a martyr, in 1689.

KUNCKELL, JOHANN, an eminent chemist, born at Iluysun, in Sleswick, in 1630, distinguished himself by several important discoveries, especially by the extraction of phosphorus from urine. He was ennobled by the king of Sweden, and made counsellor of mines. Died, 1703.

KUPETZKY, JOHANN, an eminent painter, of Bohemian origin, was born about 1667. He received his first instruction in art from a Swiss painter at Lucerne, and afterwards went to Rome, where, after some struggle with adversity, he found friends and patrons. After a long residence in Italy he settled at Vienna, where his reputation increased and obtained him the imperial favour. Dread of persecution for his religion at last led him to quit Vienna, and he spent the rest of his life at Nürnberg. He was chiefly celebrated for his portraits, but he also painted some historical pieces. One of his most attached friends was the artist and author Johann Caspar Fuessli, who wrote his Life. Died, 1740.

KUSTER, LUDOLPH, a learned German writer, and one of the first Greek and Latin scholars of the age, born at Homburg, in 1670. He visited the principal libraries in Europe, chiefly with the view of collating the manuscripts of Suidas, and was successful in restoring many portions before unpub-

lished. Kuster came to England in 1700, and his edition of *Suidas* was published here five years later. Died, 1716.

KUTUSOFF SMOLENSKOI, or KUTUSOW, MICHAEL, Prince of, a celebrated Russian field-marshal, was born in 1745, and educated at Strasburg. He entered the army in 1759; served in Poland from 1764 till 1769; and afterwards against the Turks, under Romanzoff. He behaved with great gallantry at the siege of Oczacoff, where he was dangerously wounded; and on his recovery he joined Suwarrow at the storming and capture of Ismail, when he was advanced to the rank of lieutenant-general. In the subsequent Polish war, he was particularly conspicuous during the memorable day of Praga. In 1805 the Emperor Alexander gave him the chief command of the first Russian corps against the French, and he headed the allied army at Austerlitz, where he was wounded. In 1810 and 1811 he obtained several advantages over the Turks; and, in 1812, when 70 years of age, the chief command of the Russian army, destined to oppose Napoleon, was bestowed upon him. To commemorate his victories, he received the surname of *Smolenskoï*. He died in 1813.

KUYP, or CUYP, ALBERT, a celebrated painter, whose father was an able land-

scape painter, was born at Dort in 1606. He particularly excelled in the purity and brilliancy of light; and was not surpassed, even by Claude, in an accurate representation of the atmosphere, and of the various effects of sunshine or shade upon the objects delineated. His paintings are all highly finished, and many of them grace the principal collections in Great Britain. Died, after 1682. The National Gallery possesses one fine work of Cuyp, a lovely sunny landscape, with figures.

RYNASTON, Sir FRANCIS, an English poet, born at Otley, in Shropshire, in 1367. He was knighted by Charles I.; became regent of a literary institution, called the "Museum Minervæ;" was the translator of Chaucer's "*Troilus and Cressida*" into Latin, and author of "*Leoline and Sydnis*," &c. Died, 1642.

KYRLE, JOHN, celebrated by Pope as the *man of Ross*, was born at Whitehouse, in Gloucestershire, and possessed an estate of £500 a year at Ross, in Herefordshire, where he died in 1734, aged 90. The good deeds of this estimable man, so highly eulogized by Pope in his "*Moral Essays*," do not appear to be overrated. Warton says, Kyrle was the Howard of his age, and that he deserved to be celebrated beyond any of the heroes of Pindar.

L.

LABAT, JEAN BAPTISTE, a Dominican missionary, was born in Paris, in 1663. He possessed great mathematical knowledge; and while in America, where he remained twelve years, he acted as engineer in defence of Guadaloupe when attacked by the English in 1703. On his return to Europe, in 1706, he accurately surveyed the coast of Andalusia; travelled into Italy and other parts, and finally returned to Paris, where he died in 1738. He wrote many works, the chief of which are his "*Voyage aux Iles de l'Amérique*," "*Travels in Spain and Italy*," a "*Description of the Countries of Western Africa*," &c.

LABBE, PHILIPPE, a learned French Jesuit, was born at Bourges, in 1607. He taught philosophy, divinity, and languages, with great success, and was a most laborious writer, as well as a sound critic. He died at Paris, in 1667. His chief work is the "*Collection of Councils*," 17 vols. folio.

LABÉDOYÈRE, CHARLES ANGÉLIQUE FRANÇOIS HUCHET, Count de, a noted general, born at Paris in 1786. He served as an officer in the imperial guards at the battle of Eylau, and in 1808 and 1809 was aide-de-camp to Eugène Beauharnois. He

was in the retreat from Moscow, and in 1813 distinguished himself at the battles of Lützen and Bautzen. On the abdication of Napoleon, he was, in 1815, appointed to a regiment stationed at Grenoble; but immediately on the return of the French emperor from Elba, Labédoyère was the first to bring him a regiment. He was rapidly promoted, and eventually raised to the peerage; but being found in Paris after its occupation by the allied army, he was tried by a court-martial, and suffered death, August, 1815.

LABLACHE, LOUIS, a distinguished singer, was born at Naples in 1799. He was of French extraction, and after having risen to the highest eminence in Italy, he came to England in 1830, and made his *début* at the Italian Opera (then the King's Theatre) in the character of Geronimo in Cimarosa's comic opera, "*Il Matrimonio Segreto*." From that time his position was established as one of the best comedians, and the most magnificent bass singer of the age. His genius was as versatile as it was great, ranging from the lightest comedy to the most lofty tragedy. His character was manly, generous, and straightforward; his

manners were genial and pleasant; and he was not less respected and beloved as a man than admired as an artist. Died, 1858.

LABORDE, ALEXANDRE LOUIS JOSEPH DE, French statesman, traveller, and antiquary, was born at Paris in 1773. He served in the Austrian army for a short time, returned to his country after the treaty of Campo Formio, travelled then in Italy and Spain to study the monuments of ancient art, and in 1808 entered the service of Napoleon. He held successively various civil offices, and in 1822 became a member of the Chamber of Deputies, where he distinguished himself as the intrepid advocate of liberal views, and of general education. He took an active part on the popular side in the revolution of Italy, 1830, and on the election of Louis Philippe, was appointed prefect of the Seine, aide-de-camp to the king, and general of brigade in the National Guard. His most important literary works are, the "Voyage Pittoresque et Historique de l'Espagne," "Itinéraire descriptif de l'Espagne," "Voyage Pittoresque en Autriche," "Les Monuments de la France considérés sous le rapport des faits historiques et de l'étude des arts," "Plan d'Éducation pour les Enfants Pauvres," &c. He made valuable contributions to periodical literature, and was a member of the Institute and of the Academy of Sciences, and a fellow of the Society of Antiquaries. Died, 1842.

LABORDE, BENJ. DE. [BORDE.]

LABOUREUR, JEAN LE, a French historical writer, was born in 1623, at Montmorency. On entering into orders he was made almoner to the king, and appointed commander of the order of St Michael. He died in 1675. Among his chief works are, "The History of Charles VI." and "Genealogies of Noble Families."

LA CAILLE. [CAILLE, NICOLAS LOUIS DE LA.]

LACÉPÈDE, B. G. E. DE. [DELACÉPEDE.]

LACHMANN, KARL, a distinguished German philologist, was born at Brunswick, in 1793. He was educated at the universities of Leipzig and Göttingen, and was at an early age attracted to the study of the most ancient literature of Germany. He became professor at the university of Königsberg, and in 1827 was transferred to the university of Berlin. Notwithstanding his duties as a teacher, his literary undertakings were very numerous, both as author and editor. His Essays on the Iliad and the Nibelung Song are among his best critical writings. He edited the works of Terence, Babrius, Callisus, &c., among the Roman classics; of Cains, the great writer on Roman law; the Greek New Testament with the Vulgate; the "Nibelungen-Lied;" the poems of Walthar von der Vogelweide, Wolfram von Eschenbach, Ulrich von Lichtenstein, &c. He also published German translations of "Macbeth" and Shakespeare's Sonnets, and of part of Müller's "Sagabibliothek," and contributed critical memoirs to the Academy of Sciences of Berlin, of which he was a member, and to the "Rheinisches Museum."

During the last five years of his life he was engaged on his Commentary on Lucretius, which is esteemed a splendid monument of scholarship. Died, 1831.

LA CONDAMINE, CH. M. [CONDAMINE.]

LACORDAIRE, JEAN BAPTISTE HENRI (FATHER LACORDAIRE), a distinguished French preacher, was born at Recey-sur-Ource (department of the Côte-d'Or), in 1802. He studied at Dijon, and became an advocate, settling at Dijon in 1821. He was at that time a believer in Voltaire, but neither the profession of the law nor the negations of Voltairism could satisfy his ardent passionate nature, and he soon renounced both, began to study theology at the seminary of St Sulpice, and was ordained priest in 1827. He attributed his conversion to the influence of his friend Lamennais, which gave rise to the saying that he was one of the finest works of Lamennais. After holding the office of almoner to the college of Henry IV., he became joint editor, with M. de Montalembert and Lamennais, of a new journal entitled "L'Avenir," organ of the curiously combined opposites, ultramontanism and extreme liberalism. "L'Avenir" first appeared in 1830, and in 1832 the pope, Gregory XVI., published an encyclical condemning it. The editors submitted and discontinued the publication, Lacordaire having gone several times to Rome to defend his opinions. His association with Lamennais ceased from that time. Lacordaire soon after began to distinguish himself as a preacher, and the pulpit of Notre-Dame was opened to him. In 1839 he entered the Dominican order at Rome, ambitious of founding or reviving a monastic order; and immense excitement was produced by his reappearance at Notre-Dame in 1841, in the white dress of his order, and with the shaven head. His discourses were rather historical and political than theological, and his eloquence attracted and charmed crowds, at Paris, Lyons, Bordeaux, and other great towns, where he was called to preach. He was chosen member of the Constituent Assembly of March, 1848, and appeared there in his Dominican habit, but he soon retired. He preached his last great sermon in Paris, in 1853, and was soon after appointed director of the college of Sorrèze. His reception at the French Academy took place in 1860. He was introduced by M. Guizot, and the ceremony attracted much attention as a political demonstration. The writings of Father Lacordaire consist chiefly of a "Vie de Saint Dominique," and his numerous "Conférences" and "Éloges Funèbres." Died at Sorrèze, 22nd November, 1861. Memoirs of the Abbé Lacordaire have been written by the Count de Montalembert.

LACRETELLE, PIERRE LOUIS, a French writer, was born at Metz, in 1751. He was a counsellor of parliament, one of the editors of the Repertory of Jurisprudence and of the Mercure de France, and in 1787 he was appointed member of a committee charged with the reformation of the penal code. When the revolution took place, Lacreteille embraced its principles with moderation,

and sat in the Legislative Assembly; but during the reign of Robespierre he found it necessary to retire from public duty. He afterwards appeared for a short time, but held no official situation, and under the governments of the empire and the restoration he devoted himself wholly to literary pursuits. Among his writings are, "Éloquence Judiciaire et Philosophie Législative," "Roman Théâtral," "Portraits et Tableaux," &c. Died, 1824.

LACROZE. [CROZE, M. V. LA.]

LACRUZ Y CANO, Don RAMON DE, a famous Spanish dramatic poet, born in 1728, and died in 1793. Among his best pieces are, "El Bueno," "El día de Noche Buena," "El Temo," &c.

LACTANTIUS, LUCIUS CÆLIUS, or CÆCILIANUS FIRMIANUS, an eminent father of the church, was by some esteemed an African, and by others a native of Fermo, in Aucona. He studied rhetoric under Arnobius, and by his "Symposium," he obtained such renown, that Diocletian appointed him to teach rhetoric in Nicomedia. Subsequently he was appointed tutor to Crispus, the son of Constantine, who dying not long after, Lactantius was neglected. He wrote many works in vindication of Christianity, from the style of which he has been honoured with the name of the Christian Cicero. His principal work in the "Institutiones Divinæ," in 7 books. Died, probably about 325.

LACY, JOHN, a dramatic writer, was born at Doncaster, and bred a dancing-master; this employment he quitted for the army, but subsequently took to the stage, and acquired such celebrity as a comedian, that Charles II. had his portrait painted in three different characters. He wrote the comedies of "The Dumb Lady," "Sir Hercules Buffoon," "Old Troop," and "Sawney the Scot." Died, 1681.

LAENNEC, RENÉ THÉOPHILE HYACINTHE, an eminent French physician, was born in 1781 at Quimper; studied at Nantes and Paris; and acquired great reputation as an anatomist. He is principally known as the author of a "Treatise on Auscultation," which develops the method of studying the diseases of the chest, by means of the stethoscope, an instrument invented by him, and which has been generally adopted as an invaluable aid to diagnosis. Died, 1826.

LAER, PETER DE, a celebrated painter, usually called Bamboccio. He was born in 1613, at Laeren, in Holland. After studying art at Rome, and increasing his knowledge of it by an acquaintance with Poussin and Claude, he returned to Holland, in 1639, where he enjoyed unrivalled celebrity, till he was compelled to share it with Wouvermans. In energy of touch, in the management of chiaroscuro, and in fertility of invention, he excelled his rival, but not in neatness and delicacy of pencil; yet the competition so much affected his prosperity, that in a fit of despondency he drowned himself in a well, in 1673, when 60 years of age.

LAFAYETTE, GILBERT MOTTIER, Marquis de, one of the most conspicuous characters in France during the revolution,

was born in 1757, at Chavagnac, near Brioude, in Auvergne. At the age of 17 he married the grand-daughter of the duke of Noailles; and although he inherited a large fortune, was of high rank, and had powerful connections at court, he went, in 1777, to take part in the war of independence in America. He there raised and equipped a body of men at his own expense; fought as a volunteer at the battle of Brandywine, in 1777; at that of Monmouth in 1778; and received the thanks of congress. He then proceeded to France, in order to obtain reinforcements; returned with the armaments under General Rochambeau, and commanded Washington's vanguard at the time of the surrender of Lord Cornwallis, in 1782. The capitulation of York Town followed, and, on the peace with the mother country, the general returned to France. He was elected a member of the Assembly of the Notables in 1787, and, on the breaking out of the revolution, he took part with the friends of liberty, though with wise moderation. In October, 1789, he was made commander-in-chief of the national guard, and ordered and assisted in the siege of the Bastille. On the 6th he marched to Versailles, saved the royal family from the outrages of the mob, and placed them under the protection of the National Assembly. In 1790, he proclaimed the "sacredness of the right of insurrection," and established, in conjunction with Bailly, the club of the Feuillans. On the attempted escape of Louis XVI., Lafayette lost some of his popularity, through being suspected of conniving at it; but, dissipating these calumnies, he fought against the emigrants and allies in Flanders; and mutual accusations of counter-revolution passed between him and Dumouriez and Collot d'Herbois. He returned to Paris to denounce them, and to protest against the violence offered to the king. But the Mountain was too strong for him; he was burnt in effigy on the 30th of June, 1792; and, being obliged to escape from France, fell into the hands of the Austrians, who imprisoned him at Olmutz. There he remained five years, till after Buonaparte's first triumphant campaign of Italy, when, on the special demand of the latter, he was set at liberty. Lafayette, however, was consistent: when Napoleon became an apostate from liberty, he voted against the consulate for life, and withdrew from public affairs. But, after the battle of Waterloo, he re-appeared, to protest against a dictatorship; and, having subsequently protested against the dissolution of the legislative body by Prussian bayonets, again withdrew to his estates, till he was returned, in 1818, deputy for the department De la Sarthe. On all occasions, in the Chamber of Deputies, and elsewhere, he proved himself the friend of a real but discreet liberty. In 1821 he made a visit to America, and was received with distinction and popular enthusiasm, as joint founder of American liberty with Washington and Franklin. The unconstitutional ordinances of Charles X., in June, 1830, which caused his own expulsion, brought Lafayette on the stage again, in the character with which he com-

LAFON DE LADERAT, ANDRÉ DANIEL, a French statesman and financier, born at Bordeaux, in 1746. Being the inheritor of a good property, he was able to devote his leisure to the study of political economy and the fine arts. He was one of the founders of the Academy of Painting at Bordeaux, and became a member of the Academy of Arts and Sciences in that city, and also of the agricultural society of Paris. On the 10th of August, 1792, when Louis XVI. and his family took refuge in the hall of the Legislative Assembly, M. Lafon was president of that body; and in the massacre in September following, he saved the life of the Abbé Sicard. He was subsequently himself exposed to great danger; but having survived the proscriptions of the Reign of Terror, he was chosen, in September, 1793, a member of the Council of Ancients for the department of the Seine. In 1797 he was among those who were condemned to deportation, and sent to Cayenne; but returned from exile on the establishment of the consulate. In 1815 he visited England, and collected much information concerning its finances, commerce, and public institutions; and on his return he presented to Louis XVIII. an interesting work on the finances of France. Died, 1829.

LAFITTE, JACQUES, a celebrated French banker and financier, was born in 1768. Having obtained employment in a banking house, he rose from a clerk to be cashier, partner, and, at length, in 1814, governor of the bank of France. Possessed of this conspicuous position, and of great wealth, he became a member of the Chamber of Deputies. His advocacy of extremely liberal principles (as the word liberal is understood in France) rendered him so popular, that when Charles X. was driven from the throne, and the great majority of the public men of the day were for establishing a republic, M. Lafitte, by his single voice, could re-create the monarchy, and establish a monarch. "*Behold the best of republics!*" said Lafitte, and Louis Philippe became the citizen king of the most feeble population in Europe. Lafitte held for a short time the posts of president of the council and minister of finance. But the commercial calamities which followed the revolution fell so heavily upon great houses which were indebted to Lafitte, that his house, too, became insolvent. Nearly a million and a half of francs were raised for him by a public subscription; but when his affairs were finally settled, he was found to have nearly seven millions after paying all demands. Died, 1844; aged 76.

LA FONTAINE. [FONTAINE.]

LA FOSSE. [FOSSE.]

LAGARAYE, CLAUDE TOUSSAINT MAROT DE, a noted French philanthropist, was born at Rennes, in 1675. He devoted his entire life and fortune to alleviating the wants and miseries of his fellow-creatures, founding

schools for the young, and hospitals for the sick and aged. Died, 1755.

LAGERLOFF, PETER, historiographer of Sweden, in the 17th century, and professor of rhetoric at Upsal, was an eminent classical scholar. He wrote an historical description to accompany a collection of national monuments, called "*Succia Antiqua et Moderna*," at the desire of Charles XI., and published numerous historical dissertations, among which was "*Historia Linguae Græcæ*," "*De Magno Sinarum Imperio*," &c. Died, 1699.

LAGNY, THOMAS FANTET DE, an eminent French mathematician, was born at Lyons, in 1660. He was educated for the bar; but a preference for mathematical studies weaned him from the pursuit of the law, and in his chosen science he became particularly eminent. He wrote many works on mathematics, and made many important improvements and discoveries. He died in 1734. Among his works may be mentioned "*New and Concise Methods for Extracting and Approximating to Roots*," "*The Cubature of the Sphere*," &c.

LAGOMARSINI, GIROLAMO, a learned Jesuit and philologist, was born at Genoa, in 1698. He was professor of rhetoric at Florence 20 years, and in 1730 he was appointed professor of Greek in the college at Rome, where he died in 1773. He published many classical works, and left in MS. a collection in 30 vols. having for its object the justification of his order from all the odious imputations that had been cast upon it.

LAGRANGE, JOSEPH LOUIS, a celebrated mathematician, was born at Turin, in 1736. At the age of 16 he became a professor in the royal school of artillery, where he formed an association, which afterwards rose to the rank of an Academy of Sciences. Here he made many important discoveries, particularly in reference to the motion of fluids and to vibrations. He communicated to the society a number of papers, and some to the Academy of Paris, of which he was chosen a foreign member. While on a visit at Paris he wrote his celebrated work, "*Mécanique Analytique*." In 1766 he removed to Berlin, where he was appointed director of the Academy; and in 1787 he settled at Paris, and became successively professor at the Normal and Polytechnic Schools. He pursued his labours till his health giving way under this incessant fatigue, he died in 1813. The most important discovery of Lagrange is that of the calculus of variations. His works, besides the one above-named, are the "*Théorie des Fonctions Analytiques*," "*Leçons sur le calcul des Fonctions*," "*Résolution des équations numériques*," and very numerous memoirs in the transactions of the Academies of Turin, Berlin, and Paris.

LAGUERRE, LOUIS, painter, was born in France, in 1663. Louis XIV. who was his godfather, caused him to be brought up under Le Brun, and in the Royal Academy of Paris. In 1683 he came to England, and was much employed in painting ceilings, halls, &c. He was first engaged by Verrio on the large work at St Bartholomew's Hospital; subsequently he had lodgings assigned him in Hampton Court Palace, where

he painted "The Labours of Hercules." Died, 1721.

L'HAILPE, JEAN FRANÇOIS DE, a French dramatic poet, was born in 1739. His father was an officer in the army, and dying in indigence, the son was taken into the college of Harcourt by the president, M. Asselin; but lost the favour of his patron by a satire, of which he was suspected to be the author. After confinement for some time he was set at liberty; but it disgusted him with his situation, and he resolved to trust to his talents as an author for support. In 1763 he wrote his tragedy of "Warwick," which met with great success. This was followed by "Timoleon," "Pharamond," and some others not equally successful. But when his series of *Éloges* appeared, they gained him great credit, particularly one on Henri Quatre. During the fury of the revolution, though he embraced the principles of republicanism, the moderation of his views rendered him an object of suspicion, and he was thrown into prison in 1793. Though sentenced to deportation, he regained his liberty, and lived in retirement till the time of his death, in 1803. His principal work is his "Cours de Littérature," which earned him from his contemporaries the title of the French Quintilian.

LAINÉZ, JAMES, a Spanish ecclesiastic, associate and successor of the famous Ignatius Loyola as general of the Order of Jesuits, was born in 1512. He studied at the university of Alcalá, and afterwards joined Ignatius Loyola at Paris. Lainéz took a leading part in preparing the constitution of the Order of Jesuits, and succeeded Loyola as general, in 1588. He assisted at the colloquy of Polisy, and at the council of Trent. He obtained the papal decree for rendering the generalship perpetual in the person chosen to fill it, and giving him the power of making any compact without consulting the brethren; also, for giving authenticity to all his comments and explanations of their constitutions, which also he might change or alter at his will; and for having prisons independent of the secular authority, where he might punish the refractory brethren. Lainéz died, 1565.

LAING, ALEXANDER, antiquary and miscellaneous writer, was born at Aberdeen, in 1778. He latterly followed the calling of an itinerant vendor of old books; and being a man of much humour and eccentricity, he gained admission, in the course of his peregrinations, to the archives of several families which have since been closed against more pretentious investigators. The information thus acquired he turned to good account, in the "Donair Tourist," 1 vol. 8vo, written in verse, with copious notes, giving an account of the battles, castles, families, gentlemen's seats, &c., on the banks of the river Don; and "The Caledonian Itinerary," or a Tour on the Banks of the Dee, a poem, with historical notes, 2 vols. 12mo, Aberdeen, 1819. He was also the compiler of the "Eccentric Magazine," which contains many curious and whimsical epitaphs gleaned from various churchyards in Aberdeenshire, 1 vol. 12mo, 1822. Died, 1838.

LAINO, MALCOLM, a Scottish historian, was born at Stroryre, in Orkney, in 1752. He finished his education at the Edinburgh University, and was subsequently called to the bar. On the death of Dr Henry he completed the unfinished volume of that author's History of England. His chief work, however, was a "History of Scotland," 4 vols. 8vo. He also edited a new edition of the poems of Ossian, and died in 1819.

LAIRESSE, GÉRARD, an eminent historical painter, was born at Liège, in 1640. He surpassed his father, under whom he studied, and obtained such renown, as to be considered the Raphael of the Dutch school. He also well understood music and engraving. He lost his sight some time before his death, and died at Amsterdam in 1711. His *chef-d'œuvre* is a large picture of the child Moses trampling on the Egyptian diadem. Lairesse was author of a work on the "Principles of Design," and of "Lessons on Painting."

LAKE, GERARD, Viscount, a distinguished English general, was born in 1744. He early obtained an ensigny in the foot-guards, and served in Germany during the Seven Years' War. Under Cornwallis, in America, in 1781, he greatly signalized himself, and on his return home was made aide-de-camp to the king. In 1793 and 1794 he was prominent in many engagements in Holland, and in 1800 he was appointed commander-in-chief of the British forces in India. He overthrew the Mahratta army and the French General Perron in 1803, and captured Delhi; he next triumphed over Scindiah and Holkar; and on his return to England, in 1807, he was created Lord Lake, baron of Delhi and Laswarri. From this rose to be a Viscount, and was appointed governor of Plymouth. Died, 1808.

LALANDE, JOSEPH JÉRÔME LE FRANÇAIS DE, a very celebrated astronomer, was born at Bourg, in France, in 1732. He showed an early preference for mathematical studies, but he was educated for the law. His intimacy, however, with astronomers and other men of science led him to pursue the early bias of his disposition, and it was not long before the Academy of Sciences deputed him to go to Berlin, to make observations for determining the parallax of the moon, and its distance from the earth. On his return home he was admitted to the Academy of Sciences, and turned his attention to gn-monica. In 1760, on the resignation of Maraldi, Lalande undertook the editorship and publication of the "Connaissance des Temps." Shortly after, he succeeded Delisle as professor of astronomy at the Collège de France; when successive treatises, able and voluminous, proceeded from his pen, contributing to the advancement of astronomical science. Among these mention must be made of the very valuable "Traité de l'Astronomie." Died, 1807.

LALANDE, MICHEL RICHARD DE, a celebrated French musician, born at Paris, in 1637. He attained to great perfection on the various instruments, particularly on the violin, and was appointed master of music in the chapel royal, by Louis XIV. He died

in 1726, leaving sacred and profane

LALLI, GIOVANNI, lawyer and poet, 1572. He was first ambassador by the emperor, and died, much reckoned among the talents, though his talents were the burlesque.

LALLY, THOMAS, Irish officer, attached to the service, and in the battle of Fontenoy, at the appointment of which in 1756 he was made. This town was soon British; and upon the assault, he succeeded in making his way to England, but was permitted to return to that country, public against him, that most unjust sentence, Lally Tollendard his father's estates proceedings.

LALLY TOLLENDARD, MARQUIS DE, born at Paris in 1730, of the college of Harcourt, education were deficient, Countess Dillon, and endeavoured to make the fate of his father (seeing, he wrote, a poem on the story of when he had attained warmly exerted himself to regain the memory of his heretofore possessions.

Previously to the revolution he was in the regiment of Condé, he was nominated deputy of Paris to the states, some one of the most the Constituent Assembly to the declaration of independence proposed by Lafayette, gested as an amendment should be eligible to which was adopted, though a democrat, he proposed the British model of government principles prevailed in justice, he resigned, and retired into St. Louis, in which he retraced the National Assembly, the results of the constitution, the suppression of the state. Having returned was arrested, and sent having fortunately escaped September, he took place and, where he obtained government. On the he wrote to the Convention the official advocate

in 1726, leaving numerous compositions, sacred and profane.

LALLI, GIOVANNI BATTISTA, an Italian lawyer and poet, was born at Noreia, in 1572. He was frequently employed as ambassador by the courts of Rome and Parma, and died, much esteemed, in 1637. He was reckoned among the best poets of his time, though his talent was chiefly employed in the burlesque.

LALLY, THOMAS ARTHUR, Count, an Irish officer, attached to the house of Stuart, and in the service of France. His bravery at the battle of Fontenoy was rewarded by the appointment of brigadier-general; and in 1756 he was made governor of Pondicherry. This town was soon after besieged by the British; and unable to withstand their assaults, he surrendered, and with the garrison was made prisoner. He was conveyed to England, but was soon liberated and permitted to return to France. On arriving in that country, public clamour ran so high against him, that he was beheaded, by a most unjust sentence, in 1766. In 1763, his son, Lally Tollendal, obtained possession of his father's estates, and a reversal of the proceedings.

LALLY TOLLENDAL, TROPHIME GÉRARD, Marquis de, son of the preceding, was born at Paris in 1751, and was educated at the college of Harcourt. The expenses of his education were defrayed by his cousin, the Comtesse Dillon, and by Louis XV., who thus endeavoured to make some atonement for the fate of his father. Prompted by filial feeling, he wrote, when only 15, a Latin poem on the story of Jean Calas, who had been sacrificed to the fury of a mob; and when he had attained a more mature age, he warmly exerted himself to retrieve from oblivion the memory of his father; and in 1783 he regained possession of his paternal estates. Previously to the revolution, he was captain in the regiment of cuirassiers; and in 1789 he was nominated deputy from the nobility of Paris to the states-general. He soon became one of the most popular members of the Constituent Assembly, gave his support to the declaration of the Rights of Man proposed by Lafayette, and subsequently suggested as an amendment, that all citizens should be eligible to public employments, which was adopted by acclamation. But though a democrat, he was not an anarchist; he proposed the British constitution as a model of government; and perceiving that principle prevailed repugnant to his sense of justice, he resigned his seat in the Assembly, and retired into Switzerland. He published a work, entitled "Quintus Capitolinus," in which he retraced the operations of the National Assembly, pointed out the faults of the constitution, and condemned the suppression of the higher orders of the state. Having returned to France in 1792, he was arrested, and sent to the Abbaye, but having fortunately escaped amidst the massacres which took place in the prisons in September, he effected his retreat to England, where he obtained a pension from the government. On the trial of Louis XVI. he wrote to the Convention to offer himself as the official advocate of that prince, and

he afterwards published the speech which he had composed in his defence. When Buonaparte became consul, he returned to France, where he resided till the restoration of the Bourbons in 1814. He accompanied Louis XVIII. to Ghent, as one of the members of his privy council, and he is supposed to have written the manifesto of the king to the French nation. In 1815, Lally Tollendal was made a peer of France, and in the following year a member of the French Academy. He wrote an excellent work, entitled "The Defence of the Emigrants," published in 1796; also an "Essay on the Life of the Earl of Strafford, the Minister of Charles I.;" and a tragedy on the fall of that nobleman. Died, 1830.

LAMARCK, JEAN BAPTISTE PIERRE ANTOINE DE MONNET, Chevalier de, an eminent French naturalist, was born at Bazantin, in 1744. He served a short time in the army, afterwards turned his attention to medicine, and ultimately devoted himself to botany and zoology. He published in his "Flore Française," in 1778, a new method of classification of plants, and in the following year was admitted to the Academy of Sciences. After visiting the principal botanical gardens of Europe he undertook the preparation of the botanical portion of the "Encyclopédie Méthodique," of which he completed 3 volumes. He was employed for some years in the "Cabinet du Jardin du Roi," and on the foundation of the museum of Natural History, was appointed to one of the chairs of zoology. The branch of the science intrusted to him was that which treats of the *Invertebrata*, to the study of which he then applied himself for the first time; and the fruit of these his latest studies appeared in his great work, the "Histoire Naturelle des Animaux sans Vertèbres," in 7 vols., published between 1815 and 1822. He was author of several other works, and of numerous scientific memoirs. He advocated a theory of development nearly resembling that which has recently excited so much attention, as the Darwinian theory of the Origin of Species. In his last years he became blind, and he died at Paris, in 1829.

LAMARQUE, MAXIMILIEN, a distinguished French military officer and statesman, was born at St Sever, in 1770. He entered the army as a private, and soon became captain of grenadiers in a famous corps commanded by Latour d'Auvergne, first grenadier of France. He served in the wars of the republic, and in the campaigns of Austerlitz, the Tyrol, Naples, and Wagram; rendered himself conspicuous in Italy, particularly by the capture of Caprea; and was afterwards sent to Spain, where he was engaged in the most arduous services, and added greatly to his military reputation. On the return of Buonaparte from Elba, he gave Lamarque the command of Paris, and afterwards nominated him general-in-chief of the army of La Vendée. He was placed on the list of proscribed in 1815; but returned to France in 1818, and furnished numerous articles for the opposition journals, chiefly relating to foreign politics. In 1829 he was elected to the Chamber of Deputies,

and after the accession of Louis Philippe, he became one of the most prominent members of the movement party. Died, 1832.

LAMB, CHARLES, the essayist, poet, and miscellaneous writer, was born in London, in 1775, and educated at Christ's Hospital. In 1792 he obtained a situation in the accountant's office of the East India Company, where he remained 35 years, till his salary had gradually risen to £700; when he was allowed a retiring pension of £450, which he continued to enjoy till his death. Being thus in easy circumstances, and living unostentatiously as a bachelor,—with a mind formed for wit and good-fellowship, and possessing a keen relish for literature,—he was able not only to gratify his intellectual cravings, but to luxuriate in the company of men of genius, who might be truly said to enjoy "the feast of reason" by his social fireside. It was thus that, throughout life, he could boast of the friendship of Coleridge, Wordsworth, Southey, Rogers, Hazlitt, and a host of others, whose minds were stored with knowledge, and whose tastes were in the main congenial with his own. He was devotedly attached to the sterling English authors of the Elizabethan age, and no one ever more successfully imitated their epigrammatic wit and quaint morality, while he blended with them touches of pathos and fancy peculiarly his own. He began his literary career in 1797 as a poet, in conjunction with his friends Coleridge and Lloyd, their three names appearing to one volume; and subsequently the attention of the public was for several years called to his occasional Essays, signed "Elia," which were published in various periodicals, and afterwards collected and printed. In 1808 he published "Specimens of English Dramatic Poets who lived about the time of Shakspeare; with Notes," &c. Besides these, he wrote "Rosamund Gray," a tale; "John Woodvill," a tragedy; "Album Verses;" "Tales from Shakspeare;" "The Adventures of Ulysses," &c., in some of which he was assisted by Mary Lamb, his sister. Mary was subject to fits of insanity, and was placed in the charge of her brother, who devoted himself tenderly to her. His writings were select rather than numerous; and his manner of treating the subjects which his fancy suggested was at once piquant, terse, and playful. He died, Dec. 27, 1834. "Final Memorial" of Charles Lamb have been published by Mr Justice Talfourd. Mr Percy Fitzgerald has recently published a work entitled "Charles Lamb; his Friends, his Haunts, and his Books." Another biography of Charles Lamb is promised by "Barry Cornwall."

LAMB, Sir JAMES BLAND BURGESS, bart., D.C.L., son of George Burgess, Esq., comptroller-general of the customs in Scotland, was born at Gibraltar, in 1752. On finishing his education at Oxford University, he travelled through many of the countries of Europe, and, on his return, studied for the bar, to which he was called in 1777. Ten years afterwards he entered the arena of politics, and took his seat in the House of Commons, as member for Helston, in Cornwall. In 1789 he was appointed under-

secretary of state in the foreign department, and shortly afterwards a joint commissioner of the privy seal. About this period he established, under the sanction of the premier, "The Sun," evening newspaper, and took a prominent part in conducting it, giving to his contributions the signature "Alfred." These papers were, in 1792, collected into a volume. In 1795 he was created a baronet, and appointed for life knight marshal of the king's household. The remainder of his life Sir James devoted to literary leisure, and in 1821 obtained permission to assume the name of Lamb only, by which he continued to be known till his death in 1825. He left numerous works connected with politics, poetry, and the drama.

LAMBALLE, MARIE THÉRÈSE LOUISE DE SAVOIE-CARIGNAN, Princess, was born at Turin, in 1749, and was married to the duke of Bourbon Penthièvre, whom she soon lost by death. She was superintendent of the household of Marie Antoinette, queen of France, to whom she was remarkably attached. After the flight of the royal family to Varennes she departed for England; but hearing of the imprisonment of her royal mistress, she hastily returned, and shared with the queen her confinement and misfortunes. She was cruelly murdered in September, 1792.

LAMBARDE, WILLIAM, a lawyer and antiquary, was born in London, in 1536. In 1597 he was made keeper of the Rolls, and, in 1600, keeper of the records in the Tower. He died in 1601. Having considerable property at Greenwich, he founded several almshouses in that parish. He wrote several professional works, the chief of which are a treatise on the ancient law of England, entitled "Archæologia;" and another of the office and duties of a justice of the peace, called "Elrenarcha."

LAMBERT, AYLMER BOURKE, distinguished for his attainment in botanical science, was born in 1761. On the foundation of the Linnæan Society, in 1788, Mr Lambert became a member, and for many years filled the office of vice-president; while he contributed many excellent articles to the Linnæan Transactions. His own Herbarium was considered one of the finest in Europe; and the high estimation in which he was held by his fellow-labourers was amply attested by the numerous discoveries to which they attached his name. Died, Jan. 10, 1842, aged 80.

LAMBERT, GEORGE, an English painter of the last century, who imitated the style of Poussin. He decorated the East India House, in Leadenhall Street, with several pictures of the settlements in India. He died in 1765, and is supposed to have founded the celebrated Beef Steak Club.

LAMBERT, JOHN, a distinguished general of the time of Charles I., was a student-at-law on the breaking out of the civil war. He espoused the cause of the parliament, and distinguished himself as colonel at the battle of Marston Moor; and also acted a conspicuous part at Naseby, and in many other engagements. He vigorously opposed the conferring on Cromwell of the title of king, upon which he lost his commission; yet

a pension was granted him of £2000 a year. Upon the death of Oliver Cromwell, Lambert compelled his son Richard to relinquish his authority, and restored the members of the long parliament to their seats. Subsequently, he suppressed the insurrection of the royalists, and then acting in opposition to the parliament, General Monk marched from Scotland to meet him. His troops deserting, he was compelled to submit, and was confined a prisoner in the Tower. Escaping thence, he again quickly appeared in arms, but was defeated and retaken. At the Restoration, he was brought to trial; but his submissive demeanour gained him a reprieve, and he was banished for life to the Isle of Guernsey. He here lived upwards of thirty years, amusing his leisure with horticulture and flower-painting, and is said to have died a Roman Catholic.

LAMBERT, JOHANN HEINRICH, an eminent mathematician and astronomer, was born at Mulhausen, in 1728. Compelled to follow his father's employment as tailor, for his support, night was the only time he had for study, till 1748, when he became tutor to the children of Baron Sallis, president of the Swiss convention. He now enlarged the sphere of his acquirements, which he made manifest by various scientific compositions and inventions. In 1756 he visited Göttingen, where he published his first work; and next went to Paris. Soon after he published his celebrated work "On Perspective," and in the following year appeared his "Photometry." Other important scientific works succeeded, and in 1764 he visited Berlin, where he was introduced to Frederick the Great, and admitted a member of the Academy of that capital. Died, 1777.

LAMBERT OF HERTZFELD, commonly called LAMBERT OF ASCHAFFENBURG, one of the best German chroniclers of the Middle Ages, was born probably about 1020. He became a Benedictine monk, and entered the monastery of Hertzfeld, in 1058; was ordained priest at Aschaffenburg the same year, and made a pilgrimage to Jerusalem. Returning in 1059, he spent the rest of his life in his monastery, was charged with various ecclesiastical missions, wrote several works, and died about 1080. His most important work is the "Chronicon, sive historia rerum in Germania gestarum;" a most accurate and impartial record of the events of his time down to the year 1077, prefaced, as usual, by a universal history, compiled from Bede and other writers. Lambert had the best opportunities of informing himself of passing events, frequently saw the emperor, Henry IV., at the monastery, and has told what he knew with singular fairness, clearness, and elegance. The manuscript of his Chronicon was discovered by Melancthon in the monastery of the Augustines, at Wittenberg, and was first printed in 1525. It forms one of the most precious parts of Pertz's "Monumenta Germanicæ."

LAMBERTI, LODOVICO, a learned Greek scholar, was born at Reggio, in Lombardy, in 1758. He studied jurisprudence at Modena, and became secretary to the papal nuncio at Bologna. Soon after the breaking out of the French revolution, he re-

turned to Reggio and Milan; and in 1796 aided Buonaparte in establishing a national republic. He had now become a member of the Italian Institute, professor of the belles lettres at the college of Brera, and keeper of the public library. His chief work was an edition of Homer, a copy of which, printed on vellum by Bodoni, he journeyed to Paris to present to Buonaparte, who made him a donation of 12,000 francs. Died in 1813.

LAMBTON, WILLIAM, an English officer, was for twenty years a lieutenant-colonel in India, where he distinguished himself by conducting a grand trigonometrical survey of that continent. He died in 1823, having much enriched the Transactions of the Royal and Asiatic Societies with important papers.

LAMENNAIS, ROBERT FÉLICITE de, a French religious and political writer, was born at St Malo, in 1782. Having from his earliest childhood shown a strong predilection for the Roman Catholic Church, he was allowed to follow his inclination; and his fiery spirit soon displayed itself in supporting the most extreme ultramontane views. Soon after Napoleon had concluded the "Concordat" with the Pope, Lamennais published his "Reflections on the State of the Church," which gave great offence to the Imperial Government, and was suppressed. In 1811 he became teacher of mathematics in the chief school of St Malo. Here he wrote his "Tradition de l'Eglise." As might be inferred from the nature of his opinions, he hailed the restoration of the Bourbons with satisfaction in 1814; and during the "Hundred Days" he escaped to England, where the Abbé Caron gave him the humble office of usher in a school which he had founded for young émigrés. After the fall of Napoleon in 1815, he returned to France; and in 1817, he published the first volume of his "Essai sur l'Indifférence en Matière de la Religion," which, to use the words of one of his disciples, "in one day invested a humble priest with all the authority once enjoyed by Bossuet." Soon afterwards he became connected with the "Conservateur," a Royalist journal; but his independent spirit rebelled against the party intrigues which everywhere prevailed; and after his return from a journey to Rome, where he was received with distinction by Leo XII., he published in 1825 his "Religion considérée dans ses Rapports avec l'Ordre civil et politique," in which he condemned, with great vehemence, the principles of the French Revolution, and even the *Charte* of 1815, and contended that the Pope should be placed, as in the middle ages, at the head of all temporal and spiritual matters. For proclaiming these doctrines he was brought to trial, and condemned to pay a small fine. A change now came over him. Without abandoning his ultramontane views, he became a strenuous advocate for the separation of Church and State. These opinions were set forth with great power in his "Progrès de la Révolution," published in 1829, which distinctly foretold the revolution that placed Louis Philippe on the throne in 1830; and in conjunction with M. Montalembert and the Abbé Lacordaire, he then started the "Avenir," with the view of effecting a Holy Al-

stance between the Papacy and Democracy. But these revolutionary sentiments found no echo at Rome; and after a short period passed in negotiation, and in a visit to the pope, the "Avenir" was discontinued. M. De Lamennais then quitted Paris for some time; and in 1834 he sent forth the "Paroles d'un Croyant," in which he boldly threw off his allegiance to the pope, who, in return, issued an Encyclical Letter, in which the work was formally condemned. This work produced an immense sensation throughout the continent (more than 100,000 copies having been sold in one year), and while the author was proclaimed on the one hand as a heretic, a renegade, and a deserter, he was admitted into the ranks of the democrats and the republicans as a devoted friend and leader. We pass over various works of a similar tendency, which emanated from his fertile pen, till 1840, when he was condemned to a year's imprisonment, and a fine of 2000 francs, for a publication, entitled "Le Pays et le Gouvernement," in which King Louis Philippe, his ministers, and the parliament were assailed with great vehemence. The next few years were occupied with the preparation of his "Esquisse d'une Philosophie," of which four volumes have appeared. After the revolution of 1848, he was elected a member of the Constituent and Legislative Assemblies; and on the *coup d'état*, he retired into private life. Towards the close of 1853, he was attacked by a fatal disorder; and strong efforts were made by his friends to induce him to be reconciled to the Church: but in vain. He died on January 27th, 1854, and in compliance with his will, his remains were cast into the common grave of the poor, no funeral ceremonies being performed over them. It cannot be denied that the Abbé de Lamennais was guilty of many grave errors: but these errors are palliated if not justified by his ardent love of truth, and by the heavy sacrifices which the pursuit of it entailed upon him.

LAMETH, ALEXANDRE DE, one of the distinguished actors in the French revolution, was brother of the Marquis de Lameth, and was born at Paris in 1760. He served under Rochambeau in the American war, travelled in the principal countries of Europe, was deputy to the states-general in 1789, and united himself with the "tiers état." He was one of the most active members of the National Assembly, of which he was president, in November, 1790; but after the arrest of the king at Varennes, he did all he could to save the royal family. Soon after joining the army of the North, he was arrested and imprisoned, was released in 1795, but was not allowed to return to France till 1800. He afterwards held in succession various civil offices, was chosen member of the Chamber of Deputies in 1821, and died in 1829. He wrote many articles for the political journals, besides a History of the Constituent Assembly.

LAMETH, CHARLES MALO FRANÇOIS, Count de, brother of the preceding, was born in 1757. Like his brother, he served in the American war, was chosen deputy to the states-general, joined the third estate, and took a leading part on the popular side. He

also became friendly to the monarchy, was arrested, emigrated, returned to France in 1800, was aide-de-camp to Murat, served in the campaign of Wagram, and was appointed governor of the grand-duchy of Wurtzburg. In 1812 he took the command of the town of Santona, in Spain, and two years later was named lieutenant-general. After the revolution of July, 1830, he was elected to the Chamber of Deputies, and died at Paris, 1832.

LAMI, GIOVANNI BATTISTA, an ecclesiastic, was born at Santa Croce, near Florence, in 1697. He studied at Pisan, of which university he became vice-rector. He afterwards went to Florence, where he was appointed chaplain to the grand-duke of Tuscany, professor of ecclesiastical history in the university, and public librarian. He died in 1770. He published a valuable edition of the works of Mæurius, in 12 folio volumes. His own writings are numerous.

LAMORICIERE, CHRISTOPHE LEON LOUIS INCHAULT DE, a distinguished French general and statesman, was born at Nantes, in 1806. He was educated at the Polytechnic School, and the school of Metz, and in 1830 was lieutenant in Algeria. Captain in the corps of Zouaves, at its formation, it was Lamoricière who trained and disciplined them, and he greatly distinguished himself at their head at the taking of Constantine, in 1837, and was seriously wounded by the explosion of a mine. He made eighteen campaigns in Africa; was made lieutenant-general in 1841; and in 1847, in co-operation with the duke of Aumale, captured the "Smala" (camp) and received the submission of Abd-el-Kader; for which he was soon after named grand cross of the Legion of Honour. Lamoricière, who was a member of the Chamber of Deputies from 1848, was at Paris at the revolution of 24th February, 1848, and endeavouring to check the insurgents by proclaiming the abdication of Louis Philippe and the regency of the duchess of Orleans, he narrowly escaped with his life. He refused the place of minister of war under the provisional government, was chosen a representative of the people, fought under Cavagnac, against the insurgents of June, 1848, and was minister of war from June till December; resigning on the accession to the presidency of Prince Louis Napoleon. He was sent ambassador to St Petersburg, but soon resigned, and for some time was vice-president of the Legislative Chamber. He was one of the victims of the *coup d'état* of 2nd Dec., 1851, and was imprisoned first at Ham and then at Cologne. He courageously refused to swear to the new constitution, and being struck out of the army list, quitted France, till 1857, when he received permission to return. In 1860, under the influence of a pious enthusiasm, he took command, against the judgment of his friends, of the papal army, raised to oppose the revolution proceeding in Italy; but his troops consisted only of Irish recruits, and they were routed instantly by the Sardinian general, Chialdini, at Castel Fidardo, near Loreto, 15th September. Lamoricière took refuge at Ancon. Died suddenly at his seat near Amiens, 10th September, 1863.

LA MOTHE LE VAYER, FRANÇOIS DE, a French philosopher and ingenious writer, was born at Paris, in 1588; relinquished the law for literary pursuits, and in 1639 was admitted a member of the French Academy. In 1647 he was appointed preceptor to the duke of Anjou, and he also obtained the titles of historiographer of France and counselor of state. He died in 1672. His works, in which there is such acuteness and learning, mingled with scepticism, form 14 volumes.

LA MOTTE, ANTOINE HOUDART DE, a French poet, was born at Paris, in 1672. He was bred to the law, but deserted it for dramatic composition. In 1710 he obtained admission into the Academy, at which time he was nearly blind; and many years before his death he lost his sight entirely. He produced several tragedies and comedies, some of which were very successful, particularly that founded on the story of "Inez de Castro." In 1714 he published a translation of the Iliad, although entirely ignorant of the original language. He also published a volume of "Fables," besides some pastoral eclogues, hymns, &c.; but his prose was much superior to his verse. Died, 1731.

LA MOTTE FOUQUÉ, FRIEDRICH, Baron de, celebrated as a poet, historian, and novelist, was born at Brandenburg, 1777. Entering the army, he served in the campaign of the Rhine, and had a share in the numerous engagements that were fought with the French for the liberty of Germany in the beginning of this century. His first works appeared under the name of "Pèlerin;" and the numerous productions of his pen contributed not a little to fan the flame of patriotic ardour which led his countrymen to final victory. On quitting the army, he retired to Nennhausen, the property of his second wife, Caroline, and on her death, in 1831, he removed to Halle, where he delivered lectures upon poetry and history. His beautiful fairy tale "Undine" has gained him a European reputation. Among his other works are "Sinttram," a fairy tale, and the poems "Sigurd," "Corona," "Bertrand du Guesclin," &c. Died, at Berlin, 1843.

LAMOTTE VALOIS, JEANNE, Comtesse de, who became notorious in connection with the affair of the Diamond Necklace, was the offspring of poor parents, and born in 1737. Her occupation of carrying fagots (her father being a woodman) attracted the notice of the lord of the manor, who took the girl to live with her. Hearing her speak of valuable papers which were in her father's possession, the lady, on further inquiry, found they related to the royal family of Valois; and, on investigation, it was proved that she was a descendant of that family. The girl married a private in the guards; and, obtaining an introduction to Cardinal de Rohan, great almoner of France, he advised her to make herself known by letter to Marie Antoinette, the reigning queen; at the same time expressing his bitter regret that an offence he had been (though innocently) guilty of towards that illustrious princess, precluded him from requesting an interview. The queen granted her prayer, and employed her about her person; but Lamotte rewarded her royal benefactress

by the grossest treachery. By means of a person named Villette, the countess kept up a fraudulent correspondence between the queen and the cardinal. Villette forged the queen's handwriting, while the cardinal fancied himself restored to the royal favour, and even honoured by the queen's confidence; for he was led to suppose he had furnished the queen with 120,000 francs, which were in fact kept by the countess. Not being detected she carried on the fraud still further. Böhmer and Bassange, the queen's jewellers, had collected, at an enormous expense, diamonds, which, set as a necklace, they intended to sell for 1,800,000 francs. Lamotte persuaded the cardinal that the queen passionately desired to possess this necklace, and confided to him the commission to purchase it; and that she would give a note in her own writing for the sum, which she would repay from her private purse by instalments, unknown to the king. The cardinal fell into the snare; he bought the desired necklace, which he committed to the care of the countess, who, the better to prevent suspicion, told the cardinal the queen would meet him in the garden, as she wished to thank him. A courtesan of the Palais Royal, Mademoiselle Olivia, personated the queen; in a short speech she thanked the cardinal, and promised him her future protection. Ambition alienated every other idea, and he left the garden related to excess. Meantime the countess sent her husband to London with the necklace; but the period of the first payment being allowed to pass without any notice being taken of it, Böhmer made his complaint to the queen, and the whole plot was discovered. The queen, incensed at the affair, required public satisfaction to be made. The minister, Breteuil, was a sworn enemy to the cardinal, and by his advice, the king ordered the cardinal to be arrested; he was taken in his sacerdotal habit to the Bastille, and proceedings were entered into against Mademoiselle Olivia, who proved to be a prostitute; Cagliostro, the arch-impostor, the forger Villette; and the contriver of all, the countess. She alone was punished; the cardinal was acquitted, because he was a dupe; and the others effected their escape from prison; but Madame la Comtesse was whipped and burnt on each shoulder with the letter V, and then taken to the hospital, where it was intended she should remain for life; but she made her escape at the end of ten months, and proceeded to England, where she published her justification. She died, in London, 1791.

LAMOURETTE, ADRIEN, a French ecclesiastic, was a conspicuous character in the revolution. He became a Lazarist, and in 1789 was grand-vicar of Arras. He much assisted Mirabeau, and in 1791 he was admitted to the Legislative Assembly, where he distinguished himself by his moderation. After the massacres in September, 1792, he retired to Lyons, but on the taking of the city by the republicans, he was captured, and sent to Paris, where he was guillotined in 1794.

LAMOUREUX, JEAN VINCENT FÉLIX, professor of natural history in the Academy

of Caen, was born at Agen, in 1779. He published several valuable and important works on natural history, particularly on marine botany. He died in 1825.

LANA, FRANCISCO DE, an Italian mathematician, was born at Brescia in 1637. He was a Jesuit, and a celebrated teacher of philosophy and mathematics. It has been said that he first gave the hint of balloons in his work entitled "Mngisterium Naturæ et Artis," printed at Brescia, in 3 vols. folio, 1684, which was a collection of inventions. He died 1687.

LANCASTER, THOMAS, Earl of, son of Edmund, earl of Lancastr, and of Blanche, dowager-queen of Navarre, succeeded his father in 1296. Cousin to Edward II., he took the leading part among the barons who in 1310 compelled the dismissal of the favourite Gaveston; and on the recall of the latter in 1312, he headed the barons in arms, and after the capture of the favourite at Scarborough castle, was present at his execution at Warwick. On the king's expedition to Scotland, Lancaster was made president of the council, and was long the most powerful personage in the kingdom. He prevented a fresh invasion of Scotland in 1316, in conjunction with other nobles had the new favourites, the Spensers, banished; and in 1322 joined the Scots, was defeated and captured by the royal troops at Boroughbridge, and beheaded at Pontefract. He was a great popular favourite, and offerings were made at his tomb.

LANCASTER, HENRY, Earl of, brother of the preceding, was at first known as earl of Leicester, but soon after the death of his brother, the family honours were restored to him. In 1326 he joined the queen, Isabella, and her paramour Mortimer against the king, Edward II., in whose deposition he took the leading part. In the following year he was head of the regency appointed by the parliament during the minority of Edward III., but the real power was in the hands of the queen and Mortimer; and the deposed king was taken out of his hands, and soon after murdered. An association of barons was formed in 1328 against the rule of Mortimer, preparations for war were made, but Lancaster was abandoned by his comrades, the earls of Kent and Norfolk, and accepted the royal pardon. He was imprisoned by Mortimer in 1330, released by Edward III. the next year, and died in 1345.

LANCASTER, HENRY, earl of Derby and Duke of, a distinguished English general and diplomatist, was son of the preceding, and received from Edward III. the title of earl of Derby in 1338. He rendered important services in the Scottish and French wars, and was intrusted with embassies to the king of Castille and the pope. He took part in the invasion of France in 1345, and took several towns. He assisted at the siege of Calais, was created Knight of the Garter, and in 1352 received the title of duke of Lancaster. Five years later he was made captain-general for the king in the duchy of Brittany. The treaty of Bretigny was concluded by Edward III. chiefly by his advice. Died at Leicester, 1362.

LANCASTER, JOHN OF GAUNT, Duke of. (JOHN OF GAUNT.)

LANCASTER, SIR JAMES, an English navigator, sailed to the coast of America in 1591, and afterwards doubled the Cape of Good Hope on a voyage to the East Indies. He subsequently, in 1600, effected a commercial treaty with the king of Achen and a friendly intercourse with the state of Bantam; and gave such information relative to a N.W. passage to the East Indies as led to the attempts of Baffin and others to discover it. Died, 1620.

LANCASTER, JOSEPH, a member of the Society of Friends, the author and successful promulgator of the system of mutual instruction, known under the title of "the Lancasterian," to which alone a proportion of the poorer classes in this country owe the blessings of education. He was for many years actively engaged in delivering lectures and forming schools in various parts of England; and rank, wealth, and beauty flocked to hear the earnest though simple eloquence of the enthusiastic and benevolent Quaker. But enthusiastic as were the applauses bestowed upon him, patronage and support were not bestowed in like proportion; he became so much embarrassed in consequence of his benevolent exertions, that he was obliged to seek an asylum in America. There also he suffered many embarrassments, and a subscription was just proposed for his relief, when he was run over in New York, and so severely injured, that he died on the day following the accident. He was the author of several letters and lectures on the subject of his favourite system, and also of some elementary books of instruction. Born, 1771; died, 1838. There is a portrait of this philanthropist in the National Collection.

LANCE, GEORGE, an eminent English painter, chiefly of fruit and flower pieces, was born in Essex, in 1802, and at first studied "high art" under Haydon. He began to exhibit at the Academy in 1828, but it was not till a later period that he devoted himself to the style and subjects by which he gained his reputation. He showed a fine sense of colour, highly cultivated taste, and remarkable technical skill in his numerous beautiful delineations of fruit, flowers, birds, vases, &c. The Vernon Collection, now part of the National Gallery, includes three of his pictures. Died, 18 June, 1864. Mr. Lance was an honorary member of the Belgian Society of Artists.

LANCELOT, CLAUDE, a learned French ecclesiastic, was born, in 1619, at Paris. His reputation for learning procured him the tutorship of the princes of Conti. He afterwards lectured on belles lettres at the monastery of Port Royal, and subsequently became a Benedictine monk. Upon the suppression of his order, he was banished to Quimperlay, in Brittany, where he died in 1695. He was the author of the well-known Port Royal grammars, and of many other useful philological works.

LANCIANI, GIAMARIA, an eminent physician, was born at Rome, in 1654. He studied philosophy and divinity, but preferred the science of medicine; and he early became professor of anatomy in the college

della Sapienza he was at the same time 1720, leaving volumes to for the use of the university. He was esteemed 2 vols. 4to.

LANCINI, JEAN-ANTOINE, a French physician, was born at Lyons, in 1700. He was president of the Academy of Medicine, and was distinguished by his services in the appointment of the Academy. He wrote two works on the subject of medicine. Died, 1690.

LANCINI, GIOVANNI, an Italian painter, was born at Bologna, in 1700. He was distinguished by his services in the appointment of the Academy. He wrote two works on the subject of medicine. Died, 1690.

LANCINI, GIOVANNI, an Italian painter, was born at Bologna, in 1700. He was distinguished by his services in the appointment of the Academy. He wrote two works on the subject of medicine. Died, 1690.

LANDER, JOHN, a mathematician, was born at London, in 1700. He was distinguished by his services in the appointment of the Academy. He wrote two works on the subject of medicine. Died, 1690.

della Sapienza. To three successive popes he was appointed physician, enjoying at the same time other honours. He died in 1720, leaving a library of upwards of 20,000 volumes to the hospital of the Holy Ghost, for the use of the public. His own writings are esteemed, and have been collected into 2 vols. 4to.

LANCRE, PIERRE DE, a native of Bordeaux, was a counsellor of parliament, and presided over the trials of sorcerers and witches in the province of Gascony. Infected with the error of his time, multitudes were condemned to death who would now be looked upon as lunatics or impostors. His services in this capacity were rewarded by the appointment of counsellor of state. He wrote two curious works on demonology. Died, 1630.

LANCRINCK, PROSPER HENRY, an able painter, was born at Antwerp, in 1628. He imitated Titian and Salvator Rosa, and was much encouraged in England, where he assisted Sir Peter Lely, painting the hackgrounds, landscapes, &c., of his principal pictures. His own works are much admired for their originality, colouring, and harmony. Died, 1692.

LANDEN, JOHN, or JAMES, an eminent mathematician, was born at Peakirk, Northamptonshire, in 1713. In 1755 he published a volume of "Mathematical Lucubrations." Soon after, he became agent to Earl Fitzwilliam; and in 1764 he published his "Residual Analysis;" subsequently "New Theory of the Rotatory Motion of Bodies affected by Forces disturbing such Motion," and afterwards his volume of "Memoirs." Died, 1780.

LANDER, RICHARD and JOHN, two brothers, whose names are indissolubly associated with African discovery, were natives of Cornwall, and horn, the former in 1804, the latter in 1808. They were both apprenticed to a printer; but the elder abandoned his occupation to accompany Ciapperton in his expedition to the Niger in 1825; and after his death, in 1827, he returned to England, where he submitted to government a plan for exploring the course of the Niger, which was adopted. Accompanied by his younger brother, he set out for Badaguy in 1830; where, after encountering many dangers, they reached Kirree, but were taken prisoners at Ehoce, and only, after the promise of a high ransom, succeeded in getting arrangements made for conveying them to the sea. This they reached by the channel called by the Portuguese, Nun, and by the English, Brass River; and thus was solved by their agency one of the grandest problems in African geography. This important discovery, opening a water communication into the very heart of the African continent, made a great impression on the mercantile world; and soon after the brothers' arrival in England, an association, of which Mr Macgregor was the head, was entered into for forming a settlement on the Upper Niger; but the expedition that was fitted out for this purpose at Liverpool, in 1832, unfortunately proved a failure; and the Landers, together with nearly all that joined it, fell victims

either to the unhealthiness of the climate, or in contests with the natives, in 1833.

LANDON, LETITIA ELIZABETH, a celebrated English poetess, was born in Hans Place, Chelsea, 1802. At a very early age, she attracted the notice of the reading public by her spirited short poems, published in the Literary Gazette. The reputation she thus acquired was so great, that rival publishers vied with each other in endeavouring to obtain her aid; and, at one time, the Annuals were scarcely thought complete if they did not contain a contribution from L. E. L. The temptation thus held out to hasty composition, however profitable, must of necessity have detracted from the power of the poetess, and accordingly we find her poems too frequently recurring to the same theme. If L. E. L., however, sometimes fell into the too common error of those young writers who think that to wail and be poetical are one and the same thing, her later writings amply atoned for it. In her novels, more especially, there was a vigour and cheerfulness, as well as a depth and clearness of thought, which led us to hope that, beautiful as much of her early poetry really was, we should, during many long years, have to welcome writing from her pen which would not merely far surpass them in value and beauty, but make them appear to have been the mere preparations for a loftier and more daring flight. Her shorter compositions, in the shape of contributions to the periodicals, are almost innumerable; in addition to those, she published "The Improvisatrice," "The Troubadour," "The Golden Violet," "The Golden Bracelet," and the "Vow of the Peacock," all in verse; and three prose novels, "Romance and Reality," "Francesca Carrara," and "Ethel Churchill." In June, 1838, she was married to George Maclean, Esq., governor of Cape Coast Castle, and proceeded thither with him. Died, Oct. 15, 1838.

LANDOR, WALTER SAVAGE, English poet and miscellaneous writer, was born of an ancient and wealthy family at Ipsley Court, Warwickshire, 30th January, 1775. He was educated at Rugby and at the university of Oxford; and at the age of 20 entered on his literary career by the publication of a volume of poems. He inherited the large family estates on the death of his father, but impatient of the burdens and vexations of a landlord, he soon after sold them. During the Peninsular war he raised a troop and served with them on the patriot side against the French until the restoration of Ferdinand VII. He married in 1811, and four years later took up his permanent abode in the neighbourhood of Florence, where he wrote most of his works. He returned to England after several years, and spent some years in literary activity remarkable at his advanced age; but having exposed himself to an action for libel and its disagreeable consequences, he again went to Florence in 1836, and died there 17th September, 1864. His principal poetical works are—"Gebir, Count Julian, and other Poems;" "Hellenics;" "Poemata et Inscriptiones;" "Dry Sticks;" and "The Last Fruit of an Old Tree," published in

active political life, and without having either sat in the House of Commons or held the office of a legal adviser to the Crown. Died, 1851. The "Life of Lord Langdale" has been written by Mr T. D. Hardy.

LANGDALE, SIR MARMADUKE, was a royalist officer in the civil wars of Charles I. He gained many successes over the Scots and General Fairfax, but, on the ruin of the king's cause, he fled to Flanders. Charles II., in 1658, created him a baron in reward of his services, and he died in 1661.

LANGEBECK, JAMES, a learned Danish writer, was born in 1710. He studied theology and the modern languages with much success. Frederick V. employed him to travel in Sweden, to collect everything he could relative to Danish history. He was also made keeper of the archives of the realm, counsellor of justice, and, lastly, counsellor of state. He died in 1774. His most important work is the historical collection, entitled "Scriptores Rerum Danicarum," &c.

LANGHAM, SIMON DE, abbot of Westminster, and archbishop of Canterbury, was born at Langham, in Rutlandshire, in the early part of the 14th century. In 1360 he was made lord high treasurer; in the following year he accepted the bishopric of Ely; in 1364 he became chancellor, and was promoted to the see of Canterbury in 1366. He distinguished himself by the violence of his opposition to Wickliffe, whom he caused to be expelled from Oxford University, and was made a cardinal; but this so offended Edward III. that he seized the temporalities of his see. The archbishop then repaired to the papal court, and was amply recompensed for his loss. He died at Arisaon, in 1376, and his body was brought to England, and buried in Westminster Abbey, to which he had been a liberal benefactor.

LANGHANS, CARL GOTHARD, an eminent architect, was born at Landshut, in Silesia, in 1733. He became a member of the Academy of the Fine Arts at Berlin, where he was also principal decorator of public buildings. His new structures were the Brandeburg Gate and the Salle de Spectacle. He was also a member of the Academy of the Arts and Sciences at Bologna, and died in 1808.

LANGHORNE, JOHN, an English divine, poet, and historian, was born at Kirkby Stephen, in Westmorland, in 1735. His father dying when he was a child, his mother placed him in Appleby School, and, shortly after, he became a tutor in a private family. He was next usher in a school at Wakefield, and while there was admitted into orders. In 1759 he resided with Mr Cracroft, of Hackthorn, in Lincolnshire, as tutor to his sons; and, the year following, he entered at Clare Hall, Cambridge. He published several popular pieces, particularly a poem, entitled "Genius and Valour," and having therein defended Scotland from the scurrility of Churchill in his "Prophecy of Fame," he was complimented with the degree of D.D. by the university of Edinburgh. In 1770, Dr Langhorne, in conjunction with his brother, published a translation of Plutarch's Lives, which is still a

popular work; in 1777 he was presented to a prebendal stall in the cathedral of Wells, and died in 1779. Dr Langhorne printed two volumes of sermons, and, in 1804, his son published his several poems.

LANGLANDE, ROBERT [LONGLAND.] **LANGLES, LOUIS MATHIEU**, a celebrated oriental scholar, was born at Peronne, in France, in 1763. He superintended the publication of Amlot's "Dictionnaire Mantehou-Français," and translated various works from the oriental tongues. In 1792 he was appointed keeper of the oriental MSS. in the royal library, and, in the next year, he was attached to the committee of public instruction. He died in 1824, leaving an admirable collection of books, MSS., &c.

LANGTOFT, PETER, an historian and Augustine friar, was born in Yorkshire, in the 13th century, and is known as author of a Chronicle of England, and as translator of "Roscam's Life of St Thomas of Canterbury."

LANGTON, STEPHEN, archbishop of Canterbury in the time of King John, was born in England, but educated in France. He rose through the various offices of the university of Paris till he became its chancellor; and then, on visiting Rome, Innocent III. so admired his learning and abilities, as to promote him to the see of Canterbury, assuming a power of disposal then disputed by the king of England. John refused to confirm the nomination, and the kingdom was accordingly placed under an interdict. After some years of resistance the pusillanimous monarch yielded, and Langton entered into quiet possession of his diocese in 1213. This prelate was not so subservient to the pope as he was expected to be, but became a strenuous supporter of the liberties of the English church and people, and died in 1228, leaving various works, some of which have been printed.

LANIER, or LANIERE, NICOLAS, an Italian painter and musician, was born about 1568. He was employed by Charles I. of England, both in the formation of a collection of pictures and as chapel-master. The time of his death is uncertain.

LANJUINAIS, JEAN DENIS, Count de, was born at Rennes, in 1753. He was a deputy of the third estate at the breaking out of the revolution; and, when the republic was proclaimed, he was as zealous in defence of the rights of his prince as of the rights of the nation. He opposed the usurpations of Buonaparte, and after the second restoration, he strenuously resisted the extravagant pretensions of the French clergy, defended the liberty of the press and individual freedom, the law of election, and the charter. He died in 1827.

LANNES, JEAN, duke of Montebello, and marshal of France, was born at Lectoure in 1769. He began life as a dyer, but at the commencement of the revolutionary war, in 1792, he entered the army, in which he was rapidly promoted. In 1795 he allied himself with General Buonaparte, and served with him at Paris against the "Sections." He followed Buonaparte to Italy, and greatly distinguished himself at Millesimo, Lodi,

and Arcoia. In 1798 he took part in the expedition of Egypt, was named general of division, and especially displayed his impetuous courage at Aboukir. He returned to France with Napoleon, and contributed to the success of the campaign of Marengo. In 1801 he was sent ambassador to Lisbon, but he had not the bearing of a diplomatist, and though he gained the points insisted on by the First Consul, he was recalled in 1804. He was then created marshal, and soon after duke of Montebello. Marshal Lannes next served, and with great distinction, in the campaign of Austerlitz; in Prussia, Poland, and Spain; conducting in 1809 the famous siege of Saragossa. He was then called to serve in the campaign against Austria, and was mortally wounded at Essling, 22nd May, 1809, dying nine days later, after very great sufferings. Napoleon felt the loss of Lannes very keenly. His son was created a peer of France in 1815.

LANSDOWNE, first Marquis of. [PETTY, Sir WILLIAM.]

LANSDOWNE, GEORGE GRANVILLE, Lord. [GRANVILLE.]

LANSDOWNE, HENRY PETTY FITZMAURICE, third Marquis of, president of the Council, was son of Sir William Petty, earl of Shelburne, and first marquis of Lansdowne. He was born in 1780, and was educated at Westminster School, and at the universities of Edinburgh and Cambridge, graduating M.A. at the latter at the age of twenty-one. At Edinburgh he was the pupil of Dugald Stewart, and distinguished himself among the members of the Speculative Society. He entered parliament as member for Calne in 1801, and on the death of Pitt, five years later, he was named chancellor of the exchequer in Lord Grenville's ministry, and was chosen member for Cambridge university. He was already known as an able debater, and as the fearless advocate of the abolition of slavery, and of the emancipation of the Roman Catholics from all civil disabilities. He lost his seat for the university in 1807, and succeeded to the peerage in 1809; thenceforth co-operating with sincerity and wise moderation in all liberal measures. In 1828 he was named secretary of state for the Home Department, and soon after for Foreign Affairs, but he was again out of office in the following year. In 1831 he was called to the high post of president of the Council, which he held for ten years. He actively promoted the passing of the Reform Act; was leader of the opposition under the Peel administration, and on its fall became again leader of the House of Lords. He finally quitted office in 1852. Lord Lansdowne was especially distinguished and esteemed for his generous encouragement of literature and art; he was the friend or brother rather than the patron of eminent authors and artists; and it was one of his highest pleasures to render secret service to those who needed pecuniary assistance. He displayed his fine taste in the formation of his collection of pictures at Bowood, and in the felicitous and refined adornment of both his principal residences, Bowood and Lansdowne House. In spite of age and deafness he retained his elasticity

of spirit, and the capacity for social pleasures and interest in public affairs to the last. His death, which took place 1st February, 1863, was felt as a personal loss by almost all men of eminence in politics, literature, science, and art.

LANTIER, E. F. DE, poet, dramatist, and miscellaneous writer; born at Marseilles in 1734, and died there in 1826. From his great age he obtained the appellation of the Nestor of literary France. His principal works are, "The Travels of Antenor in Greece" (which has not inaptly been called the Anacharsis of the bouloirs), "Geoffrey Rudel, or the Troubadour," "A Journey in Spain," besides various other poems and tales.

LANZI, LUIGI, Italian archæologist and historian of painting, was born near Macerata in 1732. He entered the order of Jesuits, but on its suppression applied himself to the studies by which he gained his reputation. In 1775 he was named keeper of the cabinet of medals to the grand-duke of Tuscany. The work by which he is best known is the "Storia Pittorica della Italia;" a comprehensive and orderly account of the various schools of painting in Italy, and of the progress of the art from its revival to the close of the 18th century. A third edition in 6 vols. appeared in 1809, and the work has been translated into several languages. The English translation is by Roscoe. Among the other works of Lanzi are, "Saggio di lingua etrusca," and "De vasi antichi dipinti." He was keeper of the gallery of Florence at the time of his death, March, 1810.

LAPLACE, PIERRE SIMON, Marquis de, a celebrated mathematician and astronomer, was born at Beaumont-en-Auge, in 1749; where he became professor of mathematics in the military school. From this place he soon removed to Paris, where he distinguished himself by his knowledge of analysis and the highest branches of geometry, and was chosen a member of the Academy of Sciences, one of the forty of the French Academy, and member of the Bureau des Longitudes. In 1796 appeared his famous work, "Exposition du System du Monde." After the revolution, on the 13th of Brumaire, in 1799, he was made minister of the interior by the first consul. But from this post he was removed, to make room for Lucien Buonaparte, and was then admitted into the senate, of which, in 1803, he became president. Having, in 1814, voted for the deposition of Napoleon, on the re-organization of peers he was made a marquis. He died in 1827, leaving numerous scientific works, the most celebrated of which is the "Traité de Mécanique Céleste."

LAPPO, a Florentine architect of the 13th century. He was a pupil of Niccolò Pisano, and assisted him in the erection of the noble pulpit of the Duomo of Siena, in 1268. He settled there with his two brothers, Donato and Goro, in 1271, and was still living in 1288.

Dijon, in 1726. His first translation was the Electra of Euripides; after which he translated Martinus Scribnerus, from Pope's Miscellanies, and furnished notes to the French version of Hudibras. In 1767, a difference took place between him and Voltaire, on whose Philosophy of History he published remarks, under the title of a "Supplement;" to which the latter replied in his well-known *Défense de mon Oncle*. Larcher rejoined in a "Réponse," with which the controversy ceased on his part; but not so the merciless wit of his opponent. He afterwards published his "Mémoire sur Venus," and his translation of Herodotus, which was his principal work. Died, 1812.

LARDNER, DIONYSIUS, LL.D., an eminent man of science, was born in Dublin in 1793, educated in his native city, and placed in his father's office with a view to his becoming an attorney. Evincing, however, a very decided distaste for the profession, he was entered at Trinity College, Cambridge, and devoted himself to scientific studies. He soon showed that he had now chosen the right path in life, and obtained great distinction in pure mathematics, as well as in natural philosophy, astronomy, and other branches of science. In 1817 he obtained a B.A. degree, and for ten years remained at the university, publishing at first various treatises on mathematics, including the differential and integral calculus, and subsequently on the steam engine. For this he obtained a gold medal from the Royal Dublin Society; and his reputation being now established, he began to contribute to the "Edinburgh Encyclopædia," and the "Encyclopædia Metropolitana," writing elaborate articles on pure mathematics as well as on the applied sciences. In 1827, on the establishment of the London University, Dr Lardner accepted the chair of Natural Philosophy and Astronomy, and removing to London, he set on foot a scheme for the "Cabinet Encyclopædia," which he gradually perfected, obtaining the co-operation of many eminent men, and himself contributing many of the scientific treatises comprised in that work. In 1840 he went to the United States, and delivered with much success a series of lectures which have since been published. After devoting much time to "Railway Economy," and after writing a good deal on this and other subjects, he published his very useful "Handbook of Natural Philosophy," and the serial, the "Museum of Science and Art," which contains many of the best popular treatises on science which have ever been written. All his writings are marked by a clearness of exposition and a simplicity of style rarely to be met with in scientific works. Died, 1859.

LARDNER, NATHANIEL, one of the most learned English theologians and writers on the Evidences of Christianity, was born at Hawkhurst, in Kent, in 1684. He studied at Utrecht and Leyden, and in 1709 became a minister of the Presbyterian denomination, then Unitarian in doctrine. He was afterwards preacher at the Old Jewry, and chaplain to Lady Treby. He spent his life in laborious studies and researches on

Christianity and its Evidences, and gave the world the fruit of them in his great works "On the Credibility of the Gospel History," and "Jewish and Heathen Testimonies in favour of Christianity." He published other lesser works, sermons, &c. Died at Hawkhurst, 1768.

LARGILLIERE, NICOLAS DE, portrait painter, was born at Paris, in 1656. He lived several years in England, and was much employed by Charles II. and James II. On his return to France he became historical painter, and afterwards director of the Academy. Died, 1746.

LA ROCHEFOUCAULD, or ROCHEFOUCAULT, FRANÇOIS, Duke de, prince of Marsillac, a distinguished courtier and man of letters in the reign of Louis XIV., was born in 1613, and died in 1680. He acted a conspicuous part in the civil war of the Fronde; but he is chiefly remembered as the writer of "Réflexions et Maximes," a work which has been extolled and criticized in no ordinary degree. Its distinctive characteristic is that hard, repulsive, worldly wisdom which finds selfishness at the bottom of everything. He also wrote "Mémoires de la Régence d'Anne d'Autriche;" and, during the latter part of his life, his house was a resort of the first-rate wits and literati of France.

LA ROCHEFOUCAULD-LIANCOURT, FRANÇOIS ALEXANDRE FRÉDÉRIC, Duke de, born in 1747, was grand-master of the wardrobe to Louis XV. and Louis XVI. He became a member of the Constituent Assembly in 1789, after the dissolution of which he took the military command at Rouen, in his capacity of lieutenant-general, during 1792. On the downfall of the monarchy he left France, and resided for eighteen months in England; he then travelled through the United States, whence he returned in 1798, and was allowed to revisit his native land, where he devoted himself to the promotion of the useful arts and to acts of benevolence. It was through his influence that vaccination was introduced into France. After the restoration he was created a peer, but, on account of the liberality of his sentiments, he was, in 1823 and 1824, excluded from the council of state, and removed from the several boards of which he was a member. His principal work is, "Travels in the United States." Died, 1827.

LA ROCHEJAQUELEIN, HENRI DE, one of the most distinguished of the Vendean royalists, was born at Châtillon, in Poitou, in 1772, and was a son of the Marquis de la Rochejaquelein. The peasants of the neighbourhood having risen in the royal cause in 1792, he placed himself at their head, and addressed them in the following pithy harangue: "I am young and inexperienced, but I have an ardent desire to render myself worthy of heading you. Let us march to meet the enemy; if I give way, kill me; if I advance, follow me; if I fall, avenge me." He was subsequently chosen commander-in-chief of the Vendéans, and displayed great talent and the most daring valour. After gaining sixteen victories in ten months he fell, at the age of twenty-two years, March 4, 1794, in a single com-

bat with one of the republican soldiers, while defending the village of Nouaillé.

LARREY, DOMINIQUE JEAN, Baron, a very distinguished French surgeon, was born near Bagnères de Bigorre in 1768. He began his medical studies at Toulouse, and completed them at Paris, and was attached, in 1792, to the army of the Rhine. He soon after devised and organized a system of "ambulances volantes," by which means were provided for the immediate succour of the wounded on the field of battle. After holding various important posts, he joined, in 1796, the army of Italy, where he established several schools of surgery. Two years later he accompanied the expedition to Egypt, and greatly distinguished himself by his zealous and self-sacrificing attentions to the wounded at Acre, Aboukir, and Alexandria. In 1804 he was named officer of the Legion of Honour. As inspector of the health of the army he served in the campaigns of Austerlitz and Jena, in Poland and Spain. He distinguished himself at Wagram, and was created baron for his services there. After the battle of Bautzen, he courageously and successfully defended above 1000 of the soldiers against the charge of having mutilated themselves, and received from Napoleon a pension of 3000 fr. He served in the Russian campaign of 1812, and at the battle of Waterloo, where he was wounded and taken prisoner. At the Restoration he was appointed surgeon-in-chief of the "Garde Royal," rendered fresh services at the siege of Antwerp in 1832, and died at Paris in 1842. Larrey was author of "Mémoires de Chirurgie Militaire et Campagnes de D. J. Larrey," which has been translated into several languages, and other valuable medical works, besides numerous memoirs.

LA SALLE, Count de, a brave French soldier, was born at Metz, in 1775, and entered the army, with the rank of an officer, at 11 years of age, under Prince Maximilian, afterwards king of Bavaria. The privilege of birth opened to him a line of promotion; but he resolved that merit alone should distinguish him. He accordingly resigned his commission, became a private soldier, and at length rose, through long and dangerous services, which occupied eight years, to the post which he had before resigned. By his decisive conduct at the battle of Rivoli he possessed himself of the colours of the enemy; upon which the commander-in-chief addressed him in these words: "Rest yourself upon these flags, you have deserved them." He was equally victorious in Egypt, conquered the Prussians on the walls of Königsberg, and finished an honourable career, in the arms of victory, on the field of Wagram, 1809.

LASCARIS, CONSTANTINE and **ANDREW JOHN**, two noble Greeks of the 15th century, who, on the taking of Constantinople by the Turks in 1453, took refuge in Italy. **CONSTANTINE** went to Milan, where he instructed the daughter of the grand-duke in the Greek language. From thence he removed to Rome, and next to Naples, in which city he opened a school for Greek and rhetoric. Lastly, he settled at Messina,

where he died about 1500. His Greek grammar was printed at Milan in 1476, and again by Aidus in 1495. — **ANDREW JOHN**, surnamed **RHYNDACENUS**, took up his residence at Florence, and was patronized by Lorenzo de Medici, who sent him to Greece to purchase certain valuable manuscripts, a mission which he accomplished much to the satisfaction of his employer. In 1494 he entered the service of Louis XII. of France, who made him his envoy to the Venetian senate; in 1513 he went to Rome, and persuaded Leo X. to found the Greek College, of which Lascaris became the principal, and also the superintendent of the Greek press; and in 1518 he returned to France, and was employed by Francis I. in forming the royal library. His taste for literature induced his contemporaries to expect that he would greatly benefit the world by his own productions; his natural indolence, however, prevented him from writing much that was original, though he published translations of several classical works, with annotations, &c. Died, 1535.

LASCARIS, THEODORE, emperor of Nicæa, was a young Greek prince who married, in 1200, Anna, daughter of the elder Alexius, emperor of the East. On the capture of Constantinople by the Crusaders in 1204, Theodore, having vainly attempted to save it, escaped into Anatolia, and under the title of despot ruled over part of the empire at Nicæa. In 1206 he took the title of emperor, and extended his dominion as far as the river Mæander. He was the greatest soldier and the best statesman of his time, and though placed between the Latins on the one hand and the Turks on the other, he resolutely and successfully held his ground, and reigned prosperously eighteen years, leaving his extensive dominions to his son, John Ducaz Vataces. Died, 1222.

LAS CASAS. [CASAS.]

LAS CASES, Count de, celebrated for his fidelity to Buonaparte, was born in the chateau of Las Cases, in the department of the Haute-Garonne, 1766. At the outbreak of the French revolution, 1789, he was lieutenant in the navy. He then emigrated, joined the army of Condé, and took part in the Quiberon expedition, but returned to France after the 18th Brumaire. Having been long devoted to literary pursuits, he published, under the name of Le Sage, an "Atlas Historique, Chronologique, et Géographique," which went through several editions. In 1809 he enrolled himself as a volunteer to ward off the English attack upon Flushing; and from this time attracted the attention of Buonaparte, who soon afterwards made him his chamberlain, admitted him to the council of state, and intrusted him with various confidential missions. In 1814 he refused to devote with the council of state for the dethronement of the emperor, took up arms for him after his return from Elba in 1815, and was one of the four attendants that accompanied him to St Helena. There he remained 18 months with the illustrious prisoner, enjoying his intimacy, and noting down all that he said in a journal, which he subsequently published, under the title of "Mémorial de Sainte Hélène." become an object of suspicion to Sir Hudson Low, the governor, he was seized, and conveyed first to the Cape, and thence to England as a prisoner, and was not allowed to return to France till after the emperor's decease. In 1830 he was elected to the Chamber of Deputies, and took his seat with the opposition. Died, 1842.

LASCY, or LACY, PETER, Count de, a military officer, born in Ireland, in 1678. After the conquest of that country by William III. he entered the French service, and was subsequently an officer in the Austrian, Polish, and Russian armies. He rose to the rank of a Russian field-marshal, was appointed governor of Lithuania, and died in 1751.

LASCY, JOSEPH FRANCIS MAURICE, Count de, son of the preceding, was born at St Petersburg, in 1725; entered the Austrian service, and obtained the rank of general, after having displayed his military talents at the battles of Lowositz, Breslau, and Hochkirchen. In 1760 he penetrated to Berlin, at the head of 15,000 men; for which bold exploit he was made a commander of the order of Maria Theresa, and in 1762 received the baton of marshal. He was employed against the Turks in 1789, and remained in active employment under the Emperor Joseph II., during great part of the remainder of his life. Died, 1801.

LASERNA-SANTANDER, CHARLES ANTHONY, distinguished as a bibliographer in the last century, was a native of Biscay. He went to reside at Brussels in 1772, and there collected a noble library, which he opened to the public; but having been obliged to dispose of it, he was appointed keeper of the public library. He published a "Dictionnaire Bibliographique," &c.; and died in 1813.

LASSO, ORLANDO DI, an eminent musician, was born at Mons, in Hainaut, in 1520. De Thou relates that he was forcibly taken from his parents in his childhood by Ferdinand Gonzaga, on account of his fine voice, and carried by him to Milan, Naples, and Sicily. He subsequently taught music at Rome, Antwerp, &c., and finally settled at Munich as chapel-master to Albert, duke of Bavaria. His productions are numerous, but now rarely to be met with. Died, 1593.—His two sons, RUDOLPH and FERDINAND, were also good musicians; and besides producing many compositions of their own, published their father's works under the title of "Magnus Opus Musicum Orlandi de Lasso."

LATHAM, JOHN, M.D., F.R.S., &c., an eminent ornithologist and antiquary, was born at Eatham, in Kent, in 1740, where his father practised as a surgeon and apothecary. Dr Latham for many years followed similar professional pursuits at Dartford, but he subsequently removed to Romsey, and during the latter period of his life he resided at Winchester. Though chiefly known as a naturalist, he was also much attached to the study of antiquities; while at the same time, as a medical practitioner, he enjoyed a deservedly high reputation. He was the author of several professional works, besides treatises on subjects relating to medi-

cine, antiquities, and natural history, which appeared in the Philosophical Transactions, &c. Among his productions are, "A General Synopsis of Birds," 6 vols. 4to; "Index Ornithologicus," 2 vols. 4to; "Heald's Pharmacopœia Improved," and others; but his great work, which he commenced in his 82nd year, was "A General History of Birds," in 10 vols. 4to. So indefatigable was he, and withal so capable of this undertaking, at such an advanced period of life, that, with singular fidelity to nature, he designed, etched, and coloured the whole of the plates himself. This venerable man, who was in his 97th year, was active and cheerful, and in the possession of all his faculties up to the time of his death, in Feb., 1837.

LATHAM, JOHN, M.D., F.R.S., and F.L.S., was the eldest son of the Rev. John Latham, and was born at Gawsorth, in the county of Chester. After going through his academical course with great credit at Oxford, he commenced practice as a physician in Manchester, where he met with great success, as he did also subsequently at Oxford, and in his native county. He then removed to London, where for many years he was at the head of his profession; and in 1814, after 30 years of most successful practice, he was elected president of the College of Physicians. His only separate publication, we believe, is his volume entitled "Facts and Opinions concerning Diabetes;" but he also contributed several able papers to the Medical Transactions. Died, 1843, aged 82.

LATIMER, HUGH, bishop of Worcester, one of the first reformers of the church of England, was born at Thurcaston, in Leicestershire, in 1470. It is a remarkable circumstance, though not altogether without parallel, that from being a zealous Papist, he became a zealous Protestant, active in supporting the reformed doctrine, and assiduous to make converts. He first became obnoxious to the enemies of innovation by a series of discourses, in which he dwelt upon the uncertainty of tradition, the vanity of works of supererogation, and the pride and usurpation of the Roman hierarchy. Latimer had the courage to write a letter of remonstrance to Henry VIII., on the evil of prohibiting the use of the Bible in English. Although this epistle produced no effect, Henry presented the writer to the living of West Kinton, in Wiltshire. The ascendancy of Anne Holeyne and rise of Thomas Cromwell proved favourable to Latimer, and he was, in 1533, appointed bishop of Worcester. But the fall of his patrons prepared the way for reverses, and the six articles being carried in parliament, Latimer resigned his bishopric rather than hold any office in a church which enforced such terms of communion, and retired into the country. During the short reign of Edward VI. he again preached, and was highly popular at court, but could not be induced to resume his episcopal functions. Soon after Mary ascended the throne, Latimer was cited to appear before the council, in doing which an opportunity was afforded him to quit the kingdom. He, however, prepared with alacrity to obey the citation, and as he passed

through Smithfield exclaimed, "This place has long groaned for me." In 1555, new and more sanguinary laws having been enacted in support of the Romish religion, a commission was issued by Cardinal Pole, the pope's legate, to try Latimer and Ridley for heresy, who were, in consequence, delivered over to the secular arm, and condemned to the flames. This sentence was put in execution at Oxford, Oct. 16, 1555. At the place of execution, having thrown off the old gown which was wrapped about him, Latimer appeared in a shroud prepared for the purpose, and, with his fellow sufferer, was fastened to the stake with an iron chain. A fagot, ready kindled, was then placed at Ridley's feet, to whom Latimer exclaimed, "Be of good comfort, master Ridley, and play the man. We shall this day light such a candle, by God's grace, in England, as, I trust, shall never be put out." He then recommended his soul to God, and, with firm composure, expired amid the flames.

LATOUR, General Count **THEODORE**, an eminent Austrian officer, was born at Vienna, 1790. Educated at the Imperial Engineers' School, he soon obtained distinction in the field by his zeal, merit, and courage; and during the long peace that succeeded the campaigns of 1813—1815, his great administrative abilities were repeatedly called into action by his native government. For many years he was president of the military board of the German confederation. Soon after the revolutionary outbreaks in 1848, he was nominated minister of war, the duties of which office he discharged with equal firmness and moderation; but a rumour having been spread that he was intriguing for the re-establishment of the absolute form of government which had been overthrown in the spring of 1848, the populace, during the insurrection that burst forth in Vienna in October of the same year, broke into the war office, and having seized the minister of war, ruthlessly murdered him, and suspended his corpse upon a gibbet, where it was exposed to the most ignominious and barbarous insults.

LATOUR D'AUVERGNE CORRET, **THÉOPHILE MALO DE**, a distinguished soldier, citizen, and scholar of the French republic, was born, in 1743, at Carhalx, in Lower Brittany. He first served in the army during the American war; and when the French revolution broke out, he was living in retirement, on his half-pay. This called him again into active life, and he was intrusted with the command of 8000 grenadiers, and distinguished himself in various successful enterprises on the Spanish frontier. In 1795 he returned to his studies; but, in 1795, he once more took the field, generously serving in lieu of a friend's only son, who had been drawn as a conscript. Buonaparte rewarded his bravery by bestowing on him the honourable title of First Grenadier of France; but he did not long retain it, being killed at the battle of Neuburg, in 1800. He was well versed in history, and an eminent linguist; author of a Franco-Celtic Dictionary, and various other philological works of merit.

LATREILLE, **PIERRE ANDRÉ**, a cele-

brated French naturalist, born at Brives in 1762. At the age of 16 he was sent to Paris and educated for the church, but the persecutions of ecclesiastics in the early years of the revolution led him to devote all his time and energies to the study of natural history, and especially of entomology, in which he had long delighted. He had already gained the friendship of many eminent men of science, among whom were the Abbé Haüy, Fabricius, Lacépède, Cuvier, and Geoffroy Saint Hilaire; and on the death of Lamarck he was appointed to the vacant chair of zoology. He was a correspondent of the Institute, member of the Academy of Sciences, and of most of the European Academies, and chevalier of the Legion of Honour. Among the most important of his numerous works are "Genera Crustaceorum et Insectorum," published in 4 vols. in 1808; "Histoire Naturelle des Reptiles;" "Histoire Naturelle des Crustacées et des Insectes;" the entomological portion of Cuvier's "Règne Animal;" and contributions to the "Encyclopédie Méthodique," and other scientific works. Latreille was also distinguished for his great geographical knowledge. Died, at Paris, 1833.

LAUD, **WILLIAM**, archbishop of Canterbury in the reign of Charles I., was born in 1573, at Reading in Berkshire; was educated at the free school of his native place, and at St John's College, Oxford; was ordained in 1601; became president of his college in 1611; accompanied James I. to Scotland, as one of his chaplains, in 1617; was installed prebendary of Westminster in 1620; and obtained the see of St David's in the following year. On the accession of Charles I. his influence became very great; and he was translated to the see of Bath and Wells, and, in 1628, to that of London. In 1630 he was elected chancellor of the university of Oxford; to which he was a great benefactor, and which he enriched with an invaluable collection of manuscripts, in a great number of languages, ancient, modern, and oriental. In 1633 he attended Charles into Scotland, who went there to be crowned; on his return, he was promoted to the see of Canterbury, and during the same year he was chosen chancellor of the university of Dublin. The zeal which he displayed for conformity to the church, and his endeavours to introduce the liturgy into Scotland, created him numerous enemies. At the commencement of the long parliament, therefore, he was impeached by the Commons and sent to the Tower. After lying there three years, he was brought to his trial before the Lords, by whom he was acquitted, but the lower house passed a bill of attainder, declaring him guilty of treason, which they compelled the Peers to pass; and the archbishop was accordingly beheaded on Tower Hill, Jan. 10, 1644-5. He was in the 72nd year of his age, and met his fate with great fortitude. The works of Archbishop Laud consist of Sermons, the Report of his famous controversy with the Jesuit Fisher in 1622, his Speeches, Diary, Book of Devotions, History of his Troubles, and Correspondence. His character has been depicted in exaggerated colours by opposite parties; some expressing, like

Mesaulay, unmitigated contempt, others almost unlimited reverence.

LAUDER, Sir THOMAS DICK, bart., whose versatile pen has acquired for him a high place in Scottish literature, was born near Edinburgh, 1784. He was one of the first contributors to Blackwood's Magazine. His two novels, "Lochandlu," and "The Wolf of Badenoch," published in early life, are remarkable for freedom and felicity of style; and these were followed at intervals by various other works, among which are "The Floods of Moray in 1829," "Highland Rambles," "Tour round the Coasts of Scotland," "The Queen's Visit to Scotland in 1842," &c. Sir Thomas took a great interest in politics; his zeal in behalf of the reform bill was conspicuous even at that period of general excitement; and few who heard him will forget his amusing and humorous harangues. His last contribution to literature was a series of papers on the rivers of Scotland, which appeared in Talbot's Magazine. Died, 1848.

LAUDER, WILLIAM, a literary impostor, who acquired an unenviable notoriety by endeavouring to hold up Milton as a plagiarist, was a native of Scotland. In 1747 he began an attack upon Milton in the Gentleman's Magazine, which he followed up by a pamphlet, entitled "An Essay on Milton's Use and Imitation of the Moderns in his Paradise Lost." His alleged quotations from Grotius, Massenius, and others, passed as genuine for a time, until they were exposed by Dr Douglas, bishop of Salisbury, which drew from the fabricator an acknowledgment of his guilt. Yet after this he returned to the charge in a tract, with this title, "The Great Impostor detected, or Milton convicted of Forgery against Charles I." Lauder died at Barbadoes, in 1771.

LAUDERDALE, JAMES MAITLAND, Earl of, a very active and energetic statesman, whose opinions were at one time deemed to be of great weight, both by his own party and by his opponents, was born in 1759. In 1780 he was returned to parliament for Newport, in Cornwall, and subsequently for Malmesbury. As a member of the Lower House he joined the party of his friend Mr Fox, and took an active part in opposing the North administration; supported Mr Fox's India Bill, and was one of the managers of the impeachment of Warren Hastings. In 1789 he succeeded to the title, and was in the following year sent to the House of Lords as one of the sixteen Scottish representative peers. In 1795 the state of his health caused him to reside for some time in France, and he witnessed the attack on the Tuilleries, and the imprisonment of the royal family. In 1806, on the dissolution of the Pitt administration, he was created a peer of the United Kingdom, sworn a privy councillor, and received the great seal of Scotland. In August of the same year he was sent as full powers to conclude a peace, with termination of that negotiation this is not the place to speak, the mere fact of his being intrusted with the task of negotiating with such men as Buonaparte and Talleyrand is sufficient to show the high estimation

in which his judgment was then held. The short-lived "all the talents" administration being broken up in 1807, the earl of Lauderdale had to resign the great seal of Scotland to its former keeper, the duke of Gordon. He subsequently held no office, but he was, to a very late period of his life, punctual and active in his parliamentary duties. Born, 1759; died, 1840.

LAUDERDALE, JOHN MAITLAND, Duke of, was born at Lethington, in 1616. He was with Charles II. at the unfortunate battle of Worcester, where he was taken prisoner and committed to the Tower. At the Restoration he obtained his liberty, and was appointed secretary of state and high commissioner of Scotland. In 1670 he was one of the members of the famous Cabal ministry. Died, 1682.

LAUDONN, GIBSON ERNEST, a celebrated Austrian general, was born at Totzen, in Livonia, in 1716. He displayed great talents in the Seven Years' War, for which he was made a major-general, and invested with the order of Maria Theresa. The victories at Hochkirchen, Kunnersdorf, Landshut, and Glutz were such proofs of his skill and valour, that Frederick the Great used to own there was nobody he feared so much as Laudon. On the conclusion of peace he was created a baron of the empire; in 1766, nominated an aulic councillor; and, in 1778, made field-marshal. He next commanded against the Turks; and, in 1789, took Helgrade. Died, 1790.

LAUNEY, BERNARD RENÉ JOURDAN DE, last governor of the Bastille in Paris, which was erected in 1370—1383, and destroyed July 14, 1789. He was a son of the former governor, and his official life had given to his character a bluntness of manner, and inflexibility of temper, which proved the cause of his own destruction. Fifteen days before the prison was attacked, three men, disguised, but whose manners and address showed they had popular interest, came to the prison, and asked the governor how he purposed to act in case of an attack. "My conduct is regulated by my duty; I shall defend it," was his reply. In fact, he resolved to do so, and rather to set fire to the magazine, and perish in the ruins, than yield to the desire of the people. He executed his intention as long as he could, but was at length brought out by the populace, and murdered in a most cruel and inhuman manner.

LAURA DE NOVES or DE SADE. (PE-TRARCH.)

LAURENS, HENRY, a distinguished American statesman, born at Charleston, South Carolina, in 1724. He was chosen president of the Council of Safety in 1774; elected a delegate to congress, and soon after taking his seat, was made president of that body. Having resigned in 1779, he received the appointment of minister plenipotentiary to Holland, and on his way thither, being captured by the British, was carried to London, and committed to the Tower. His confinement lasted for more than fourteen months, during which time, various efforts were made to shake his constancy, but without effect. Soon after his release, he received

a commission from congress to be one of their ministers for negotiating a peace with Great Britain, and, having repaired to Paris, he signed the preliminaries of the treaty. Died, 1792.

L AURISTON, JAMES ALEXANDER BERNARD LAW, Count de, grandson of the celebrated projector Law, was born in 1768. He embraced the military profession at an early age, and served in the artillery, in which he obtained a rapid promotion, owing to his own activity and to the friendship of Buonaparte, whose aide-de-camp he was, and who employed him on several important missions. He brought to England the ratification of the peace of Amiens; and was received with enthusiasm by the populace of London, who took the horses from his carriage, and conducted him in triumph to Downing Street. He was in every campaign of note in Spain, Germany, and Russia, and decided the victory in favour of the French at Wagram, by bringing up to the charge, at full trot, 100 pieces of artillery. After the conclusion of the general peace, Louis XVIII. created him grand cordon of the Legion of Honour, and he subsequently rose to the rank of marshal. Died, 1828.

L AVALETTE, MARIE CHAMANS, Count de, was born at Paris in 1769. He was at first destined for the clerical profession; but while pursuing his studies, the revolution broke out, and he became an officer of the national guards. Though he concurred with the revolutionary feeling, he displayed moderation, voting, by petition, against the camp under the walls of Paris, and was prosecuted for leading his detachment of the national guards to the defence of the Tuilleries. He sought refuge in the army of the Alps as a volunteer, and obtained military promotion in several fields of battle, in Italy and on the Rhine. In 1796, after the battle of Areola, Buonaparte appointed him his aide-de-camp, and he was frequently charged by him with difficult missions. In 1797 he sent him to Paris, to judge of the state of the public feeling previous to the memorable crisis of September. After the revolution, which he correctly appreciated, he returned to Napoleon, with whom he arrived at the capital towards the close of the same year, and whose friendship procured him a marriage-union with Emilie de Beauharnais, Josephine's niece. Lavalette next accompanied Buonaparte to Egypt, and there improved his title to public estimation. On his return to France, he was first appointed a commissary, and, finally, director-general of the post-office and counsellor of state. After Napoleon became emperor, in 1803, he was appointed a count of the empire. In 1811 he was removed from the post-office; but on the 20th of March, 1815, by virtue of orders from Napoleon, who entered Paris in the evening, he resumed his former duties, and gave notice to stop the departure of the journals, despatches, and travelling post-horses without signed orders. At the same time, he despatched a courier to Napoleon, to describe the actual condition of the capital. On the 2nd of June he was nominated a peer. On the second restoration, in July, 1815, he was

deprived of his functions, arrested by the sub-prefect of police, Lecarce, and condemned to death as an accomplice in Buonaparte's treason against the royal authority. An appeal having been rejected, and Madame Lavalette's application for pardon being declined, his execution was fixed for the 21st December. On the evening of the 20th, his wife, her daughter, twelve years old, and her governess, presented themselves at the prison door, and were admitted by the gaolers as usual. A short time after the daughter and governess reappeared, supporting Madame Lavalette, apparently in great affliction. They were scarcely gone when the turnkey appeared in his cell, and Lavalette was not to be found—his wife, Madame Lavalette, had taken his place. The alarm was given, the carriage which brought the visitors was overtaken, but only the daughter found in it. Orders were given to close the barriers, and descriptions of the person of the fugitive were despatched in all directions. Meanwhile Lavalette was occupied with the care of quitting Paris, and passing the frontiers. The means of doing so were supplied by Sir R. Wilson and Messrs Bruce and Hutchinson. Dressed as an English officer, he went to their quarters, and started at seven in the morning with Sir R. Wilson in a cabriolet. He passed the barriers without being recognized, and arrived at Mons, where he obtained permission to settle at Munich. Five years after, a royal ordinance revoked the sentence of death, and permitted him to rejoin his family in France. On the escape of Lavalette being known, his wife was arrested, and tried, with her governess, Sir Robert Wilson, and Messrs Hutchinson and Bruce, by the *Cour Royale*. The latter were condemned to a short imprisonment, the wife and the governess acquitted; but Madame Lavalette never recovered the shock caused to her nerves and constitution by the risks to which her noble fidelity had exposed her. A fixed mental alienation succeeded. Died, 1830.

L AVATER, JOHANN GASPAR, the celebrated physiognomist, was born at Zurich, in 1741. He became pastor of the principal church of St Peter at his native place, and was distinguished by his unwearied zeal in behalf of practical Christianity. He died in 1801, in consequence of a wound which he received in 1799, when the French troops under Massena took Zurich by storm. He was the author of the "Journal of a Self-Observer," "Jesus the Messiah," in 4 vols.; "Spiritual Hymns," "Swiss Lays," &c.; but the work by which he is universally known, and which once was highly popular, is his "Physiognomic Fragments," which was first published in 1775, and has been translated into most European languages. Lavater was pious, but credulous; enthusiastic, but sincere.

L AVOISIER, ANTOINE LAURENT, a celebrated French chemist, was born at Paris, in 1743; was educated at the Mazarin College; and, on quitting it, devoted himself wholly to the sciences, but more particularly to chemistry. The discoveries of Black, Cavendish, and Priestley, relative to the

LAURENT, a cele-
was born at Paris,
the Mazarin Col-
, devoted himself
out more particu-
discoveries of Black,
, relative to the

nature of elastic fluids or gases, having at-
tracted his notice, he entered on the same
field of inquiry, with all his characteristic
ardour, in the enso of science; and, possess-
ing the advantage of a considerable fortune,
he conducted his experiments on a large
scale, and obtained highly interesting re-
sults. His new theory of chemistry was re-
ceived with applause in Germany and France,
though strenuously opposed by Dr Priestley,
whose phlogistic hypothesis it tended to
overthrow. In 1789 he published his "Ele-
ments of Chemistry," a work of great merit
and importance. He succeeded Buffon and
Thilet as treasurer of the Academy, and be-
came also farmer-general; but notwith-
standing his talents and virtues, he was
condemned to death by the revolutionary
tribunal of Paris, on the frivolous charge of
having adulterated the tobacco with ingre-
dients obnoxious to the health of the citi-
zens, and was guillotined in 1794. Besides
his Elements, he wrote "Chemical and Philo-
sophical Miscellanies," 2 vols.; "Report
of the Commissioners charged to examine
Animal Magnetism," "Instructions for
making Nitre," &c.

LAW, EDMUND, a learned prelate, was
born at Cartmel, in Lancashire, in 1703; re-
ceived his education at St John's College,
Cambridge; and, after obtaining various
church preferments, was raised to the see of
Carlisle in 1769. He was the author of many
able theological works; among which are,
"Considerations on the Theory of Religion,"
"Reflections on the Life and Character of
Christ," an "Enquiry into the Ideas of
Space, Time," &c. He also wrote a Life, and
edited the works, of John Locke. Died, 1787.

LAW, EDWARD. (ELLENBOROUGH,
Lond.)

LAW, JOHN, a celebrated financial pro-
jector, was born, in 1681, at Edinburgh,
where his father, a goldsmith, resided. He
was bred to no profession, but studied the
mathematics, and particularly excelled as
an accountant. For the purpose of remedy-
ing the deficiency of a circulating medium,
he projected the establishment of a bank,
with paper issues, to the amount of the
value of all the lands in the kingdom; but
this scheme was rejected. Having seduced
a young lady in England, he killed her
brother in a duel, and was obliged to leave
the country. He went first to Holland, and
afterwards to Venice and Genoa, from
which cities he was banished as a design-
ing adventurer; but, at length, he secured
the patronage of the regent duke of Orleans,
and established his bank at Paris, 1716, by
royal authority. To this was joined the
Company of the Mississippi, a pretended
scheme for paying off the national debt, and
for enriching the subscribers. The project be-
came extravagantly popular, and every one
converted his gold and silver into paper.
In 1720, Law was made comptroller of the
finances. The bubble, however, burst; and
the people, enraged, besieged the palace of
the regent, crying out, as they held up their
hands full of bills, "See the fruits of your
system." Law was exiled to Pontoise, from
whence he escaped to Italy, and died at
Venice in 1729.

LAW, WILLIAM, a pious English divine,
was born at King's Cliffe, Northampton-
shire, in 1686; was educated at Emanuel
College, Cambridge; and lived for the most
part a retired life at the house of Mrs
Hester Gibbon, aunt of the celebrated his-
torian, to whom he had been tutor. He wrote
against Bishop Hoadly, and was also the
author of some valuable practical books, as,
"A Serious Call to a Devout and Holy Life,"
"A Treatise on Christian Perfection," &c.
In his latter days he fell into the mystic
reveries of Jacob Behmen, whose works he
intended to publish. Died, 1761.

LAWES, HENRY, an admirable musical
composer of the 17th century, was born in
1600. He was the son of a musician of Salis-
bury, and at the age of 25 entered the service
of Charles I., in which he remained till the
king's death. He was the intimate friend of
Milton, whose "Comus" he set to music,
and who addressed to him one of his exqui-
site sonnets. He was also the friend of
Waller, Herrick, and other poets of his day,
and composed music for their songs. A
large collection of his compositions, entitled
"Ayres and Dialogues," appeared in three
sets in his life-time. Lawes re-entered the
royal service at the Restoration, as gentle-
man of the Chapel-Royal, and died in 1662.
He was honoured with a burial in West-
minster Abbey.—His brother, WILLIAM
LAWES, was also a good musician and com-
poser. He served in the royal army in the
civil war, and was killed at the siege of
Chester in 1645.

LAWRENCE, Sir HENRY MONTGOMERY,
brother of Sir John Lawrence, whose name
will descend to posterity as the saviour of
the British dominion in India, was born in
Ceylon in 1806, educated at Addiscombe, and
entered the East India Company's service
in 1821, as a cadet in the Bengal Artillery.
He soon acquired the reputation of being
a most able and intelligent officer, and
gradually rose through the various milita-
ry ranks till the close of the campaign on the
Sutlej, when he attained the rank of Lieut-
colonel, and was appointed resident at
Lahore in 1848. For his administration of
this important office he was made a K.C.B.
in 1848; and his administrative powers were
still further displayed on his appointment to
the superintendance, first, of the Punjab,
and afterwards of the Rajpoot States. On
the annexation of the kingdom of Oude to
the British dominions, he was selected to be
the governor of the new province. On the
breaking out of the formidable insurrection in
1837, he long held his mutinous regiments to
their allegiance by the force of his character,
and when finally the torrent of disaffec-
tion swept them away also, he retired into
the Residency, which he had hastily fortified
with a handful of brave Europeans, soldiers
and civilians, and there maintained his
ground against the besiegers with a courage,
a devotion, and self-sacrifice, almost with-
out a parallel in history. He died from the
effects of the bursting of a shell, July 4,
1857. In recognition of his important
services his eldest son was created a
baronet. A statue has been erected to his
memory in St Paul's.

LAWRENCE, STRINGER, an eminent general, in the service of the East India Company. He was born in 1697; was employed during a period of 20 years on the coast of Coromandel, where he added greatly to the British possessions; and died in 1775. The Company erected a fine monument to his memory in Westminster Abbey.

LAWRENCE, Sir THOMAS, the most celebrated portrait painter of his age, was born in 1769, at Bristol, where his father kept an inn. He early exhibited proofs of his talent for the art, having, it is said, sketched portraits in his fifth year. At the age of six he was sent to school, where he remained two years; and this, with the exception of a few lessons subsequently in Latin and French, constituted his whole education. Young Lawrence, however, had access to the galleries of some of the neighbouring gentry, in which he employed himself in copying historical and other pieces. In 1782 his father, who had been unsuccessful in business, removed to Bath, where his son was much employed in taking portraits in crayon; and having made a copy of the Transfiguration by Raphael, the Society for the Encouragement of Arts bestowed on him their prize of five guineas and a silver palette. In 1787 the family removed to London, and Lawrence was admitted a student at the Royal Academy. His subsequent career was successful and brilliant. He was elected royal associate in 1791, and on the death of Sir J. Reynolds, the next year, was made painter to the king. He was honoured with the personal friendship of the Prince of Wales (afterwards George IV.), who sat to him for several portraits, and bestowed on him the order of knighthood. After the peace of 1814 he painted the portraits of the allied sovereigns, and the Generals Blücher, Platoff, and Wellington; also Louis XVIII. and Charles X. of France; besides numerous others, consisting of the principal nobility of England, the Pope, Cardinal Gonsalvi, and many other distinguished personages on the continent. On the death of Mr West, in 1820, Sir T. Lawrence was elected president of the Royal Academy. No artist ever possessed in a higher degree the merit of preserving exquisite likenesses, while at the same time he heightened the beauty and characteristic expression of his originals. In early life he was remarkably handsome, and he retained much of personal beauty to the last. He obtained high prices for his productions, and his income has been estimated at from £10,000 to £15,000 a year, yet so profusely liberal was he, particularly in the purchase of scarce and valuable works of art, that he died in embarrassed circumstances; though the collection which he left of drawings, etchings, &c., was valued at £50,000. He died, and was buried in St Paul's cathedral, 1830.

LEACH, WILLIAM ELFORD, an eminent English naturalist, was born at Plymouth in 1790. He studied medicine at St Bartholomew's Hospital, London, under Abernethy, and at Edinburgh, where he graduated M.D. in 1811. He was then appointed keeper of the Natural History Department of the British Museum; and in this office he

rendered great services to science by his researches and discoveries. He undertook a great work on the History of the British Crustacea, of which only seventeen parts were published. He edited for three years the "Zoologist's Miscellany," contributed to the French "Dictionnaire des Sciences Naturelles," and the "Mélanges Zoologiques," suggested a better arrangement of the Crustacea, and wrote many memoirs for the transactions of various scientific societies, of which he was a fellow. Failing health compelled him to resign his post at the British Museum about 1818, and some years later he went to Italy, where he died in 1836.

LEAKE, Sir JOHN, the son of Richard Leake, who was master-gunner of England, and one of the bravest men that ever served in the British navy, was a gallant and successful English admiral, born in 1656. He was distinguished by many great actions; but chiefly by his relief and preservation of Gibraltar from the French and Spaniards in 1705. He also took Carthage and Minorca; and afterwards, as commander-in-chief of the fleet, greatly signalized himself in the Mediterranean. Died, 1720.

LEAKE, WILLIAM MARTIN, was born in 1777. He entered the Royal Artillery, and, during the early part of his military life, some special missions on which he was sent to Asia Minor as well as European Turkey gave a permanent direction to his studies, which were henceforth devoted to the illustration of Greek topography and antiquities. These subjects he has treated with great learning and accuracy, in his "Researches in Greece," published in 1814, and in his "Topography of Athens," and "Journal of a War in Asia Minor," published in 1821 and 1824. These were followed by "Travels in Northern Greece," "Peloponnesiaca," and "Numismatica Hellenica." He died January 6, 1860, aged 83.

LEBRUN, CHARLES, a celebrated painter, was born at Paris, in 1618. He studied under Vouet and Poussin; and, after his return from Rome, was made president of the new Royal Academy of Painting and Sculpture. From 1661 he was principally employed in embellishing the residences of Louis XIV. and his nobles with works of art, and in superintending the brilliant spectacles of the court. He died in 1690. Lebrun possessed a comprehensive genius, which was cultivated by the incessant study of history and national customs. He wrote a treatise on the passions, and another on physiognomy.

LEBRUN, CHARLES FRANÇOIS, duke of Placentia, was born in 1739, at Coutances, in Normandy; came at an early age to Paris; and being nominated deputy to the states-general in 1789, he occupied himself, during the session, with affairs of police, finance, and domestic administration. In 1795 he was elected to the council of elders, and became president in 1796. He was appointed third consul in December, 1799; nominated arch-treasurer of the empire in 1804; and, in 1805, governor-general of Liguria and duke of Placentia. Having signed the constitution that recalled the house of Bourbon to the throne, he was created a peer of France by the king, and, in the beginning of July, was

appointed Chamberlain, and like the universe him incapable of Peers early part and Odysseus 1824.

LEBRUN, novelist, and graphically in some of the Field and died.

LEBRUN, French poet, appellation in 1729; Conti, and writer of the birth of songs; but long, sufficient his unhappy foot of a establishment became a received f. sul, a pens.

appointed president of the first bureau of the Chamber of Peers. After the return of Napoleon, he accepted the peerage from him, and likewise the place of grand-master of the university, a proceeding which rendered him incapable of sitting in the new Chamber of Peers, formed in August, 1815. In the early part of his life he translated the *Iliad* and *Odyssey*, and Tasso's *Jerusalem*. Died, 1824.

LEBRUN, FIGAULT, an eminent French novelist, who for humour, truth to nature, and graphic powers of description, particularly in scenes of low life, may be regarded as the *Ficiding* of France, was born in 1742, and died at Paris, in 1835.

LEBRUN, PONCE DENIS ÉCOUCHARD, a French poet, who for a time obtained the appellation of the French *Pindar*, was born in 1729; became secretary to the prince of Conti, and early distinguished himself as a writer of elegant lyrics. At the commencement of the revolution, he celebrated the birth of freedom in odes, epigrams, and songs; but, like many others, he saw, ere long, sufficient reason to deplore the fate of his unhappy country, crushed beneath the foot of anarchy. When the academical establishments were re-organized, Lebrun became a member of the *Institute*; and he received from Buonaparte, when first consul, a pension of 6000 francs. Died, 1807.

LECCE, MATTEO DA, Italian painter, flourished under the pontificate of Gregory XIII. He was one of the anatomical imitators of Michael Angelo, and was chosen to paint in the Sistine Chapel, the Fall of the Rebel Angels. He afterwards painted at Madrid and Seville, went to Holland, and thence to the Indies. Whether he returned to Europe or died in the East, and when, is unknown.

LECOHI, GIOVANNI ANTONIO, an Italian Jesuit, born in 1702, was an excellent mathematician, and published several clever treatises on hydrostatics, navigable canals, geometry, trigonometry, conic sections, &c. He was professor of mathematics at the university of Pavia for more than 20 years, and was afterwards court-mathematician at Vienna. Recalled to Italy, he was appointed by Clement XIII. director of the survey and measurement of several rivers of north Italy. Died, 1776.

LECLERC, JEAN, an eminent critic, born at Geneva, in 1657. He was the author of numerous works; among which are, "*Ars Critica*," "*Harmonia Evangelica*," and three voluminous "*Bibliothèques*." He was professor of philosophy, the belles lettres, and Hebrew, at Amsterdam, where he died in 1726. So prone was he to dogmatize, and so impatient of contradiction, that he has been styled the self-constituted inquisitor of the republic of literature.

LECLERC, NICOLAS GABRIEL, physician, was born in France Comté, in 1726. In 1757 he was appointed first physician to the forces of the German emperor, afterwards served with the duke of Orleans, and, in 1769, went to Russia, with the title of first physician to the grand-duke, and director of the schools of the Imperial corps of cadets. In 1777 he returned to France, and published

his "*Histoire Physique, Morale, Civile, et Politique de la Russie*," 6 vols. 4to; for which the French government rewarded him with a patent of nobility and a pension of 6000 livres; he also published many other works, medical and historical. He was deprived of his pension by the revolution, and died in 1798.

LECLERC, SEBASTIEN, an eminent French designer and engraver. The patronage of Colbert procured him a pension, and the professorship of perspective and geometry in the Academy of Painting and Sculpture. Besides his numerous engravings, of which there are said to be no fewer than 3000, he left a treatise "*On Architecture*," and some other works of the like nature. Died, 1714.

LECLERC, CHARLES EMANUEL, a French general, was born at Pontoise, in 1772; entered the army as a volunteer in 1791; and, having distinguished himself at the siege of Toulon, was promoted to be major. He was attached to the army of Italy, under the command of Buonaparte, in 1796; was made general of brigade in 1797; married one of the sisters of Buonaparte; and, in 1799, was placed at the head of the army of the Rhine. In December, 1801, he sailed from Brest, on an expedition intended for the conquest of St Domingo; and, in a few months after his arrival, he was seized with the yellow fever, and died in 1802.

LECOMTE, FELIX, a celebrated French sculptor. Having obtained a prize for a bas-relief of the Massacre of the Innocents, while he was a pupil of Vassé, he was sent to Rome as a pensionary of the French School of Arts. His statue of Phorbas preserving *Edipus* procured him admission into the Academy; but the statue of *Fénélon*, which ornaments the hall of the National *Institute*, is considered his *chef-d'œuvre*. During the revolution he lived in retirement; but, at the restoration of the Bourbons, he was nominated professor in the Academy of Sculpture. Died, aged 80, in 1817.

LE CONTEUR, JOHN, lieutenant-general, was born in Jersey in 1761; entered the army when a boy of 15 years of age, and bore a conspicuous part in the defence of his native island in 1781; for which he was promoted to a lieutenantcy. In the following year he joined the 100th foot in India, and was among those who, under General Mathews, so bravely defended the town and fort of Nagur against Tippee's army of 2000 French and 100,000 Sepoys, the British force consisting of only 500 Europeans and 1000 natives. After losing 500 men in killed and wounded, they surrendered; and, with the other subaltern officers, he was marched, naked and fettered, 150 miles up the country. The general and all his captains were poisoned; the lieutenants, &c., were threatened with a similar doom, and sustained the greatest privations and hardships in prison for 11 months; when, peace having been made with Tippee, the prisoners were released. He was during a long life engaged in active service in different parts of the world, and was promoted to the rank of major-general in 1811. Died, 1833.

LECZINSKI, STANISLAUS I., king of Poland, was born of one of the most ancient and honourable families of Poland, in 1677. He was elected king by the diet of the confederates on the designation of Charles XII., king of Sweden, in July, 1704; his predecessor, Frederick Augustus, having been deposed. He was driven from Warsaw by Augustus a few months after his election, and was only crowned in October, 1705, when the king of Sweden assisted incognito at the ceremony. After the defeat of Charles XII. by the Russian at Pultawa in 1709, Stanislaus lost his throne, and Augustus was restored. After various adventures he settled at Deux-Ponts, the revenues of the duchy being assigned him for his income. He afterwards lived in Alsace, was again elected king of Poland in 1733, through the influence of Louis XV. of France, who had married his daughter Maria; but the influence of Austria and Russia prevailed, and he was compelled to retire to Dantzic, where he bravely held out for six months against the Russians who besieged him. He then made his escape, and after most romantic adventures reached Franco in June, 1736. He was then made duke of Lorraine and Bar for life, retaining his title of king of Poland. Died in 1766.

LE DESPENSER, HUGH, an English noble who in 1320 became the favourite of Edward II., who gave him in marriage Eleanor, one of the daughters of his sister, the countess of Gloucester, with immense estates. In the following year the barons rose, and compelled the king to banish both Despenser and his father. He soon recalled them, and having defeated the earl of Lancaster and his adherents at Boroughbridge, he had many of them put to death, and gave their estates to the favourite. In 1325, the queen, who had been sent on a mission to France, became head of a new association against the king and his favourites; she invaded England in 1326, and was supported by the barons, the king fleeing into Wales; the elder Despenser, left governor of Bristol, was besieged there, given up by the garrison, and hanged; and the younger was taken a month later, and shared the same fate at Hereford.

LEDWICH, EDWARD, a learned antiquary and topographer, was born in Ireland, in 1733; received his education at Trinity College, Dublin, where he obtained a fellowship, and the degree of LL.D.; and was presented to the living of Aghadoc. His principal work is the "Antiquities of Ireland," 3 vols. 4to; in which he disproved many of the legendary tales and saintly miracles currently believed, and thereby brought upon himself the enmity of the credulous and bigoted. Died, 1823.

LEDYARD, JOHN, an adventurous American traveller of the last century, was born at Groton, in Connecticut, in 1751. For a short time he resided among the Six Nations, with whose language and manners he became acquainted. He then came to England, enlisted as a marine, and sailed with Captain Cook on his second voyage, of which he published an account. He next determined to make the tour of the globe from London

eastward, on foot, and proceeded to St Petersburg in the prosecution of this design, through the most infrequented parts of Finland. After waiting there nearly 3 months, he obtained his passport for the prosecution of his journey to Siberia. On his arrival at Yakutsk, he was prevented by the Russian commandant of the place from proceeding any farther; and was conducted to the frontiers of Poland, with a threat of being consigned to the hands of the executioner, should he again be found in the Russian territories. He was next employed by the African Association to explore the interior of Africa; but he had proceeded no farther than Grand Cairo, when he was attacked with a fatal disease, and died in 1788.

LEE, ANNE, a celebrated leader of the sect of the Shakers, was a native of Manchester. She was born in 1735, and married a drunken blacksmith by whom she had several children, who died young. She joined the sect in 1758, and was subsequently recognized as their spiritual chief under the title of "Mother in Jesus Christ," but being abandoned by some of her followers, went with the rest and her husband to America in 1774. She gained many adherents there, and announced herself as the second Christ, said she should never die, and nevertheless died in 1784. The sect has probably now become extinct in Great Britain; there is no mention of it in the census report on religious worship for England and Wales of 1851. But there are still communities of Shakers in the United States. They resemble the Quakers in dress and manners, worship Anne Lee as their Messiah, and live in villages by themselves, men and women apart from each other. By conversions, and the adoption of poor and orphan children, they keep up their numbers.

LEE, CHARLES, a military officer, distinguished during the American war, was a native of North Wales. Entering the army at a very early age, he served under Burgoyne in America, and afterwards in Portugal. In the contest between the colonies and England, he wrote on the side of the former, and engaged in their service. In 1775 he received a commission from congress, and, as a major-general, accompanied Washington to the camp before Boston. He was afterwards invested with the chief command in the southern department, where his conduct on the memorable attack of the British upon Sullivan Island raised his military reputation. While marching through the Jerseys to join Washington, Lee was made prisoner by the English, as he lay carelessly guarded, at a considerable distance from the main body, and carried to New York. Howe affected to consider him as a deserter from the British army, and he was treated in a manner unworthy of a generous enemy, until the surrender of Burgoyne; after which event he was exchanged. He was brave in action, and possessed military talents of a high order; but he was jealous of the power of Washington; and at this battle of Monmouth, in 1778, he disobeyed that general's orders. For this he was tried by a court-martial, and suspended for a year.

A New Universal Biography.

He then retired from the service, and died in 182.

LEE, HENRY, an American general, was born in the State of Virginia, in 1756. He commenced his military career as captain of one of the six companies of cavalry raised by Virginia, after she had thrown off the authority of the mother country; and having shown much skill and energy on several occasions, was raised to the rank of major, and intrusted with the command of a separate corps. In the famous retreat of Greene, before Cornwallis, into Virginia, Lee's legion formed the rear-guard of the American army, and repelled every attempt of the enemy to impede its march. From that time to the termination of the war, General Lee was constantly engaged, and performed many valuable services to the republic. When the independence of the United States was ratified, he was appointed a member of the house of delegates, was made governor of Virginia in 1792, chosen a member of congress in 1799, and retained his seat till the accession of Mr Jefferson to the president's chair, when he retired into private life. Died, 1818.

LEE, NATHANIEL, an English dramatic writer, was born at Hatfield, in Hertfordshire; and was educated at Westminster School, and at Trinity College, Cambridge. Being disappointed of a fellowship, he made an attempt as an actor, but without success; on which he turned his attention to dramatic composition, and in 1675 produced the tragedy of "Nero." He afterwards became insane, and was confined in Bedlam for 2 years, and died in 1692, in consequence of some injury received in a drunken frolic. He wrote 11 tragedies, of which "The Rival Queens" and "Theodosius" are the best; and "the Duke of Guise." Lee's dramas are not deficient in poetic genius, but a degree of turgid eloquence too often destroys the effect of his most pathetic scenes.

LEE, SAMUEL, D.D., orientalist, an eminent example of the power of application in overcoming the most adverse circumstances, was born at Lognor, in Salop, in 1783, educated, as he himself says, at "a charity school," and at the age of 12 years was apprenticed to a carpenter. By extraordinary diligence during his leisure hours he made himself master of the Latin, Greek, and Hebrew languages; and the fame of his acquirements having reached Archdeacon Corbett in 1810, he obtained through the interest of the latter the mastership of Bowdler's foundation school in Shrewsbury; but meanwhile prosecuted his study of languages, and made a rapid progress in Arabic, Persian, and other Eastern languages, together with French, German, and Italian. In 1818 he entered Queen's College, Cambridge, where he graduated B.A. in 1817; two years afterwards he was elected professor of Arabic, and in 1831 Regius professor of Hebrew in the same university. The degree of D.D. was conferred upon him in 1833. His works comprise, among others too numerous to mention, translations of the Scriptures into various Eastern languages; controversial and other pamphlets; "Translation of the

Book of Job;" and a Hebrew, Chaldaic, and English Lexicon. Died, 1850.

LEE, SOPHIA, the daughter of an able actor, was born in London, in 1730, and had the advantage of an excellent education. In 1780 she produced the comedy of "The Chapter of Accidents," which was so successful that the profits of it enabled her to establish a ladies' school at Hath, which was conducted by herself and sisters for several years with reputation. Her next literary performance was "The Recess," a romance, which became very popular, and established her fame. She also wrote "Almeyda," a tragedy; "The Assignation," a comedy; "A Hermit's Tale," a poem; "The Life of a Lover," and three of the stories in her sister's Canterbury Tales. Died at Clifton, near Bristol, in 1824.

LEECH, JOHN, the admirable "Punch" artist, was born in London in 1817. He was educated at the Charterhouse, and began to study for the medical profession. But his talent for drawing led to his accepting an engagement to design a set of illustrations to the "Ingoldsby Legends," and he soon after renounced the study of medicine. He joined the staff of "Punch" in 1841, his first sketch appearing in August of that year; and in that field he worked with pre-eminent success till his death. He was far more artist than caricaturist; with the most genial humour, perfect naturalness, and as perfect purity, presenting in his charming pictures, week after week, and year after year, scenes and persons of English life and society, of town and country, in rich and endless variety. Welcome as a personal friend in all English homes, he brought smiles to all faces, and never a blush not innocent. His delightful English girls; his swells and snobs; his street-boys; his cabmen and conductors; his hunting-pieces, and his "Briggs;" his broad landscapes, and his seascapes; are not easily to be forgotten. He was a hard worker, and most probably ruined his health by too much work. Latterly he could not bear noise, and changed his residence in vain to escape it. His death took place suddenly, October 27, 1864, and he was buried beside his friend Thackeray in Kensal Green Cemetery.

LEEDS, Duke of. [DANBY, Earl of.]

LEEVES, WILLIAM, rector of Wrington, in Somersetshire; author of the plaintive air of "Auld Robin Grey," which he composed in 1770, but was not known to be the author until 1812. He also composed much sacred music, in which were united considerable taste and feeling. He died, aged 79, in 1828.

LEFEBVRE, FRANCIS JOSEPH, duke of Dantzic, French marshal, was born at Ruffach, in the department of the Upper Rhine, in 1755. He entered, when young, into the French guards; was a serjeant at the beginning of the revolution, reached the rank of adjutant-general in 1793, and in 1794 was general of division. In June that year he distinguished himself at the battle of Fleurus; and, after the death of Hoche, was raised to the command of the Meuse and Sambre. Being wounded at the battle of Stockach, in 1799, he retired to Paris, where

he assisted Buonaparte in seizing the supreme power, and was rewarded by him with the dignities of senator, marshal of the empire, and grand cross of the Legion of Honour. At the battle of Jena he commanded the imperial guard; but his greatest exploit was the taking of Dantzic, May 24, 1807; after which he was raised to the dignity of a duke. He subsequently commanded in Spain and Germany, and he contributed greatly to the success of the French at Eckmühl and Wagram. After the restoration of royalty he was made a peer, and died at Paris, in 1820.

LEFEVRE, ROBERT, an eminent French artist, distinguished chiefly as a portrait painter. He also produced several historical pieces of great merit. Died, 1831.

LEFORT, FRANCIS, noted as the favourite of Peter the Great, was the son of a merchant at Geneva, where he was born in 1656. Having an inclination for a military life, he entered the French army when a mere boy, and afterwards went into that of Holland; which he left to go to Moscow, by the way of Archangel, in 1675. Here he became secretary to the Danish ambassador; and a fortunate accident gave him an opportunity to gain the favour of the young Czar, which he retained till his death. Peter felt that he needed an instructor and assistant, and Lefort possessed talents fitted for both offices. The first great service which he rendered the Czar was in a rebellion of the Strelitzes (1688). Lefort quelled the insurrection, and saved the prince from the danger which threatened his life. This exploit gained for him the unbounded confidence of the Czar, who was now become the absolute master of Russia. Lefort's influence increased daily. He established the military system of Russia, and laid the foundation of her navy, which Peter afterwards carried to such a degree of perfection. Lefort had a comprehensive and cultivated mind, a penetrating judgment, much courage, and an uncommon knowledge of the resources of the Russian empire. He died in 1699.

LEGENDE, ADRIEN MARIE, one of the first mathematicians of his age, filled the professor's chair at the military school at Paris, was a member of the French Academy of Sciences, and a knight of the Legion of Honour. In 1757 he was employed by the French government to assist Cassini and others, in obtaining accurate estimates of the relative meridional situations of Paris and Greenwich. He also distinguished himself by very profound researches concerning the attraction of elliptic spheroids, and was the first who demonstrated that the ellipse is the only figure in which the equilibrium of a homogeneous fluid mass can be preserved under the influence of rotatory motion, and that all its component molecules would be mutually attracted in the inverse ratio of the squares of their distances. On the formation of the Institute he became a member of that body; and under the Imperial government he was nominated a counsellor for life of the university of Paris. In 1815 he was made an honorary member of the council of public instruction; and in 1816, conjointly with M. Poisson, examiner of can-

didates for the Polytechnic School. Among his works are, "Elémens de Géométrie," "Mémoires sur les Transcendentes Elliptiques," "Nouvelle Théorie des Parallèles," &c. Died, 1832.

LEGENDE, LOUIS, one of the leading French revolutionists, who after having made himself notorious by heading street processions, was employed by Marat, Danton, and other leaders of the popular party, to forward their schemes; and became one of the chiefs of the Jacobin club. In 1792, he was chosen deputy from Paris to the National Convention, and voted for the death of the king. For a long time he figured as one of the most violent terrorists under Robespierre; but he afterwards joined Tallien and his party, in the destruction of his former master; and signaled himself by driving away the members of the Jacobin club, locking up their hall, and delivering their keys to the Convention. From this time he pretended to be the friend of moderate measures, continually declaiming against the sanguinary measures in which he had before participated; and when the Jacobins revolted against the Convention, he put himself at the head of the troops who defended the legislative body, and contributed much to the defeat of his old associates. He ultimately became a member of the Council of Ancients, and died in 1797.

LEGNANI, STEPHANO MARIA, painter, was born at Bologna, in 1660. He was the pupil of Carlo Maratti, and his works are held in much estimation. Died, 1715.

LEIBNITZ, GOTTFRIED WILHELM, Baron von, an eminent German philosopher, theologian, and mathematician, was born at Lelpsic in 1646. He was educated at the university of that city, and early gave evidence of the genius which was to render him so distinguished. His studies were very varied, law and mathematics for a time holding the chief place; but philosophy and theology gradually attracted him, and engaged his most earnest attention. He first appeared as an author at the age of 18, and two years later graduated L.L.D. at Altdorf, where he refused the offer of a professorship. He then lived for a short time at Nürnberg, and was secretary to a society of alchemists. He removed to Frankfort on being appointed councillor to the elector of Mentz, a post which he held till 1675. Visiting Paris and London in 1672, he became acquainted with the leading men of science of the age, among them Sir Isaac Newton, Robert Boyle, Henry Oldenburg, Huyghens, Malebranche, and Cassini. In 1676 he visited London again, having just previously been appointed aulic councillor and librarian to the duke of Brunswick-Lüneburg. About this period he invented an arithmetical machine, and made the discovery of the Differential Calculus; Newton at the same period inventing his similar method of Fluxions. Having undertaken to write the history of the House of Brunswick, he made extensive travels for the purpose of collecting materials, and soon after published several historical and political works. In 1692, Leibnitz took a leading part in a project of union

of the Catholic and Protestant churches, and had a correspondence with Bossuet respecting it. But the scheme was found to be impracticable. Some years later he was called to Berlin and named president of the newly-founded Academy of Sciences. He was consulted by Peter the Great on his plans for the advancement of civilization in his empire, and received from him a pension with the title of councillor of state. Similar honours were bestowed on him by the German Emperor Charles VI. Leibnitz passed the last years of his life at Hanover. The writings of Leibnitz are very numerous, and treat of a wide variety of subjects. The most important are:— in mathematics—"Theoria Motus Abstracti et Motus Concrete," which was written against the views of Descartes; "Règles du Calcul Différentiel," published in 1684; in philosophy—"De Arte Combinatoria;" the "Essai de Théodicée," in which he builds up his system of Optimism, maintaining that the world as it is constituted is the best of all possible worlds; the "Monadologic," or exposition of his original theory of *Monads*, the central point of his system of philosophy; "Principia Philosophica;" "Harmonie Pré-établie;" "Nouveaux Essais sur l'Entendement Humain," his answer to Locke's Essay on the same subject; and "Meditationes de Cognitione, Veritate et Ideis;" and in history and law—"Quæstiones Philosophicæ ex Jure collectæ;" "Nova Methodus docendi discendique Juris;" "Scriptores rerum Brunsvicensium," and "Codex juris Gentium diplomaticus." There are also large collections of the letters of Leibnitz, who carried on a very extensive correspondence. Among these are his letters to John Bernoulli, in 2 vols. 4to. and his correspondence with Dr Clarke on the principles of Natural Philosophy and Religion. The aim of Leibnitz, was to apply to philosophy the method of demonstration, and to reconcile philosophy and theology: he maintained the existence of innate ideas and necessary truths, and our capacity of discovering them; and though he did not present his system as a whole, he became the founder of a new school of philosophy, and gave an extraordinary stimulus to metaphysical studies by "the infinitude of bright ideas, hints, and conjectures which were perpetually scintillating from his brilliant mind." He died at Hanover, 14th November, 1716, and was buried at Leipzig, his monument there bearing the inscription—"Ossa Leibnitii."

LEICESTER. [DUDLEY.]
LEICESTER, THOMAS WILLIAM, Earl of, and Viscount COKE, was distinguished throughout a long and active life as one of the most princely and efficient of all the improvers of English agriculture. When he succeeded to his extensive estates at Holkham in Norfolk they were but little better than a mere sheepwalk and rabbit warren; all the corn used in the neighbourhood was purchased from more favoured districts; and in his early leases he let land as low as one shilling and sixpence per acre. That same land, once so sterile, is now some of the finest wheat land in the country, and forests are waving where formerly scarcely a blade of

grass was to be seen; nay, it is recorded, that a few years before his death this excellent landlord and sensible man actually stood, with his wife and sons, on board of a vessel, then first launched, which was built of oak from acorns which he himself had planted! While thus transforming the whole face of his estates, and benefiting his tenants, and, by their example, the country at large, Mr Coke wonderfully increased his own property; his rental being only £2200 when he succeeded to the estate, and upwards of £20,000 in later years; during which, indeed, timber has been felled to more than the annual amount of the former whole rent. When upwards of 85 years of age he was raised to the peerage. He was twice married. By his first marriage he had three daughters; and by the second, contracted when he was 70 years of age and the bride not 19, five sons and one daughter. He sat in his elevation to the peerage, and always spoke and voted on the Whig side. Died, June 1842, aged 90.

LEIGH, CHARLES, physician and naturalist, who published the "Natural History of Lancashire, Cheshire, and the Peak in Derbyshire," a "History of Virginia," and "Exercitationes de Aquis Mineralibus." He died at the beginning of the 18th century.

LEIGH, SIR EDWARD, a learned biblical critic and historian, born at Shawell, in Leicestershire, in 1602. He was educated at Oxford, studied in the Middle Temple, and afterwards devoted several years to professional and literary researches. He was M.P. for Stafford, and a colonel in the parliamentary army; was expelled from the House in 1648, along with other presbyterian members; and occupied himself, after the Restoration, in literary pursuits. His most important work is entitled "Critica Sacra." Died, 1671.

LEIGHTON, ALEXANDER, a Scotch divine and physician, was born at Edinburgh, in 1568. He became professor of moral philosophy in that university, but afterwards went to Leyden, and took his doctor's degree. He then visited London, where he had a lectureship, till he was prosecuted in the Star Chamber for publishing two libels, one entitled "Zion's Plea," and the other "The Looking-glass of the Holy War." He was sentenced to stand in the pillory, to have his ears cut off, his nose slit, branded on the cheek, publicly whipped, and imprisoned in the Fleet, where he remained 11 years, and died insane, in 1644.

LEIGHTON, ROBERT, archbishop of Glasgow, son of the preceding, was born in London, in 1613; he received his education at Edinburgh; and in 1643 settled as minister of Newbottle, near that city. He then quitted the presbyterian church for the episcopal; was successively principal of Edinburgh University, bishop of Dumblane, and archbishop of Glasgow; and died in 1684. He was a good theologian, an eloquent preacher, and a pious and disinterested man. His works have enjoyed considerable popularity and are still read. Most of the aphorisms in Coleridge's "Aids to Reflection" are selected from Leighton.

LE JAY, GUI MICHEL, an advocate in the parliament of Paris, eminent as a biblical critic, and who rendered himself remarkable by printing, at his own expense, a Polyglot Bible. He refused to suffer it to appear under the name of Cardinal Richelieu, though he had neglected his profession, and impoverished himself by the undertaking. He afterwards became an ecclesiastic, and obtained the deanery of Vezelin, and the rank of a counsellor of state. Died, 1675.

LE KEUX, JOHN, a distinguished English engraver, was born in London, in 1784, and became a pupil of Basire. He applied himself to architectural engraving, and especially excelled in engravings of Gothic architecture. He was employed on the illustrations to several of the large and important works of Britton and Pugin, on Neale's "Westminster Abbey," and more recently on the "Memorials" of Oxford and Cambridge. Died, 1846.

LELAND, JOHN, an English antiquary, was born in London, about the end of Henry the Seventh's reign; was educated at St Paul's School, Christ's College, Cambridge, and All Souls, Oxford; and was made chaplain and librarian to Henry VIII., who also appointed him his antiquary, with a commission to examine all the libraries of the cathedrals, abbeys, and colleges in the kingdom. He spent six years in travelling to collect materials for the history and antiquities of England and Wales; and retired to his house in London, to arrange and methodize the stores of information which he had collected; but, after about two years, he died insane in 1552, without having completed his undertaking. The great bulk of his collections, after passing through various hands, was placed in the Bodleian Library, in an unfinished state. Hearne published his "Itinerary" and "Coliectanea," and Hall edited his "Commentarii de Scriptoribus Britannicis," 2 vols.

LELAND, JOHN, a dissenting minister; author of "A View of the Principal Deistical Writers in England," 3 vols.; "The Advantage and Necessity of the Christian Revelation," 2 vols.; and "Sermons," 4 vols. He also wrote against Tindal, Dodwell, and Holingbrooke. Born, 1631; died, 1766.

LELY, Sir PETER, a celebrated painter, whose family name was Vander Vaes, was born at Soest, in Westphalia, in 1617, and was a pupil of Grebber, of Huerlem. In 1641 he came to England, and from that period he gradually rose in reputation. He painted portraits both of Charles I. and Cromwell, but it was not till the Restoration that he reached the height of fame and prosperity. He fell in with the voluptuous taste of the new court, in his representation of the beauties who adorned it; and, by the delicacy and grace of his pencil, became the favourite painter, and was knighted by Charles II., who highly esteemed him. Died, 1680.

LEMAIRE, JAMES, a Dutch navigator of the 17th century, was the son of a merchant of Egmont, in North Holland. He embarked on an expedition with Cornelius Schouten, and in 1616 discovered the straits

which now bear his name. He also visited some hitherto unexplored islands in the South Sea, and died soon after his return, Dec. 31, 1616.

LEMOINE, FRANÇOIS, an historical painter, born at Paris, in 1688. His principal work is the ceiling in the Hall of Hercules, at Versailles, the largest painting in Europe, containing 142 figures, and being 64 feet long and 54 broad, without being divided by any architectural interruptions. He destroyed himself in a fit of insanity, in 1737.

LEMON, ROBERT, F. S. A., deputy-keeper of his majesty's state papers; born, 1774; died, 1835. In the duties of his office, Mr Lemon evinced the most praiseworthy zeal; and it has been truly said, that "nearly every recently published historical work bears a testimony to his exertions."

LEMONNIER, PIERRE CHARLES, an eminent French astronomer, was born at Paris in 1715, and accompanied Maupertuis in his expedition towards the north pole for measuring a degree of the meridian. He wrote several works on the science, and had the honour of numbering among his pupils the celebrated Lalande. Died, 1796.

LEMONTEY, PIERRE EDOUARD, a French poet and jurist, was born at Lyons, in 1762. In the deliberations on the fate of Louis XVI., and in the other wild and despotical measures of the revolutionists, he advocated the cause of humanity and justice; but he was obliged to save himself from the fury of the terrorists by precipitately quitting France for Switzerland, where he resided till after the overthrow of the Mountain party. Deeply affected with the calamity which had involved Lyons, his native city, in ruin, he published his beautiful ode, "Les Ruins de Lyon." He afterwards travelled through Italy, and wrote various operas, romances, and poems; in 1804 he was appointed one of the censors of the drama; and at the restoration he was invested with the order of the Legion of Honour, and appointed director-general of the book trade. Among his works are the opera of "Palma, ou le Voyage en Grèce;" "Essai sur l'Établissement Monarchique de Louis XIV.;" and a romance, entitled "La Famille de Jura, ou Irons-nous à Paris?" Died, 1826.

LEMOT, FRANÇOIS FRÉDÉRIC, a French statuary, was born at Lyons, in 1773. At the age of seventeen he obtained a prize for a bas-relief, representing "The Judgment of Solomon;" was afterwards taken as a conscript, and served in the artillery under General Piehgru. In 1795 he was ordered to Paris, to assist in the execution of a statue of Henry IV., to be placed on the Pont Neuf. Many of his productions adorn the principal buildings of the French capital. Died, 1827.

LEMPRIERE, JOHN, D.D., an eminent classical scholar, was a native of Jersey; received his education at Winchester, and Pembroke College, Oxford; graduated at that university, was head-master of Abingdon grammar-school, and afterwards of the school at Exeter; and, on resigning the latter, was presented to the livings of Meeth and Newton Petcock, in Devonshire, which

he held till his decease, in 1824. His principal works are, the "Bibliotheca Classica, or Classical Dictionary," which so long held its ground as a popular authority, but is now superseded and almost forgotten, and a "Universal Biography."

LENCLOS, ANNE, or NINON DE, distinguished alike by her beauty, wit, and accomplishments, was born at Paris, in 1616. She was left at an early age the mistress of a good fortune; and, being possessed of the highest personal as well as intellectual charms, and giving free scope to the indulgence of her passions, she drew around her a circle of lovers and suitors, distinguished either for their rank or gallantry. Strange as it may appear to those who have been bred up in the paths of virtue, this modern *Lais* was countenanced, complimented, and consulted by some of the most eminent writers of the day. Scarron, we are told, considered her on his romances, St Evremont on his poems, Mollère on his comedies, Fontenelle on his dialogues, and Rochefoucault on his maxims! Nay, her friendship was sought by some of the most respectable of her own sex! "The power of her natural beauty," says one of her biographers, "was indeed tragically illustrated by the often told adventure of one of her own sons, who being brought up in ignorance of his birth, fell desperately in love with his mother, and when she discovered to him the fatal secret, he, in a fit of despair and desperation, stabbed himself in her presence!" This terrible scene was introduced by Le Sage into his *Gil Bias*. She died in 1705, in the 90th year of her age.

LENFANT, JACQUES, a French Protestant divine, was born in 1661, and died in 1728. He was educated at Saumur and Geneva, and after being for a short time chaplain to the elector palatine, he went to Berlin and was pastor there above 40 years. He published histories of the councils of Constance, Basel, and Pisa, very faithfully written. He likewise translated the New Testament with notes, in conjunction with

DU FRESNOY, NICOLAS, a French diplomatist and miscellaneous writer, was born at Beauvais, in 1674. He was a classicist, and was employed in some diplomatic negotiations, but he was so much given to satire and political intrigues, that he was frequently sent to the Bastille. His death was occasioned by falling into the fire, in 1755. Among his voluminous works, the best are, his "Méthode pour étudier l'Histoire," and "Tablettes Chronologiques de l'Histoire Universelle," which have been translated into English.

LENOIR, ALEXANDRE, founder of the Museum of French Monuments, was born at Paris in 1762. He was educated at the Mazarin College, and studied painting under Doyen. At his suggestion a collection of works of art from the churches of France and the suppressed monasteries was made in 1790, and was intrusted to his care. It was afterwards named the *Musée des Monuments*, but after the Restoration it was suppressed, and the monuments were restored to their places. Lenoir was a member of the French

Society of Antiquaries, and author of the following works: "Musée des Monuments français," in 8 vols., commenced in 1800; "Histoire des Arts en France par les Monuments," "Nouvelle Explication des Hiéroglyphes," &c. Died, 1839.

LENTHALL, WILLIAM, an English statesman of the 17th century, was born at Henley, in Oxfordshire, in 1591. He studied at Oxford University, and was called to the bar at Lincoln's Inn. In 1639 he was elected into parliament for Woodstock, and in 1640 he was chosen speaker. He held that office at the time of the arrest of the Five Members by Charles I.; and rising above himself on that grand occasion, made this memorable reply to the king's demand: "I have neither eyes to see nor tongue to speak in this place, but as the House is pleased to direct me, whose servant I am here." He was a timid, indecisive man, from first to last a time-server. Dismissed by Cromwell in 1653, the year following he became speaker again, as he did also of the Rump. Died, 1683. There is a portrait of Lenthall in the National Portrait Gallery.

LEO I., ST, surnamed THE GREAT, Pope, succeeded Sextus III. in 440. He took a very decided part against the Manicheans and other schismatics, held a council at Rome against Eutyches in 449, and presided by his legates at the General Council of Chalcedon two years later. When Attila invaded Italy Leo was sent by the Emperor Valentinian to dissuade him from his threatened march on Rome, and Rome was saved. Leo afterwards saved the city from being burned by Genseric. St Leo is the first pope of whom we possess any written works. Died, 461.

LEO III., Pope, was born at Rome, and succeeded Adrian I. in 795. His first act was to acknowledge the suzerainty of Charles the Great (Charlemagne) by sending him the keys of St Peter's, and the standard of the city of Rome. In 799 a conspiracy was formed against him by two of the Roman clergy, and he was attacked and shamefully treated while assisting at the procession of St Mark. Through the aid of some faithful attendants he escaped to Paderborn to seek the protection of Charles, who, the same year, sent him back with a powerful escort to Rome. In the following year, 800, Charles visited Rome, and was there crowned by the pope emperor of the Romans. A fresh conspiracy against Leo was discovered in 815, the authors of which were among the leading citizens of Rome, and were condemned to death. Leo died the following year.

LEO IX., Pope, previously named BRUNO, was born in Alsace, 1002. He was cousin to the Emperor Conrad the Salic, and was made bishop of Toul at the age of 22. Through the influence of the Emperor Henry III., son of Conrad, and also by the counsel of the monk Hildebrand, he was elected at the Diet of Worms, in 1048, to succeed Damasus II. as pope. Well received at Rome, he applied himself zealously to the reform of discipline in the church, visiting France, Italy, and Germany, and holding several councils against the prevalent vices of alimony and concubinage. In 1053 he led

an army against the Normans in Italy, but was defeated and taken prisoner by their leader, Robert Guiscard, at the battle of Civitella. He was confined at Benevento about ten months, and, falling ill, was allowed to return to Rome, where he died in 1054. During his pontificate the schism between the Greek and Latin churches was widened by the writings of Michael Cerularius, patriarch of Constantinople. The pope and the patriarch excommunicated each other.

LEO X., GIOVANNI DE' MEDICI, Pope, son of Lorenzo the Magnificent, sovereign of Florence, was born at Florence in 1475, eight years before the birth of Luther. His father had him dedicated to the church, and made a cardinal by Innocent VIII. at the age of 13 years. Exiled from Florence with his family in 1494, he spent some years in travel in Germany, France, and Flanders, and made acquaintance with many eminent men. In 1503 he returned to Rome, and applied himself to the cultivation of science and the fine arts. He was appointed by Julius II. legate with the papal army, and on the 11th April, 1512, he was taken prisoner by the French at the battle of Ravenna, and only regained his liberty after the evacuation of Milan by the French. The Medici were restored to their supremacy at Florence by the arms of the Spaniards. In the following year, 1513, Cardinal de' Medici was elected pope on the death of Julius II., and made his entry into Rome on April 11, the anniversary of his capture at Ravenna. His pontificate of nine years is one of the most momentous periods in modern history, in relation to great political changes, to the revival of literature and art, and, above all, to the Reformation. Leo X. succeeded in terminating the disputes between Louis XII. and the court of Rome; he continued and brought to a close the Council of the Lateran; and at a conference held at Bologna concluded a concordat with Francis I. of France. In 1517 he discovered a conspiracy formed against him by two cardinals, one of whom was hung and the other imprisoned for life. The same year he created the unexampled number of 31 cardinals, among whom were Cajetan, Campeggio, Trivulzio, and other learned and eminent men. He formed the project of a great war against the Turks, and resolved about the same time to complete the church of St Peter at Rome. To raise the necessary money for these schemes he resorted to the sale of indulgences, the preaching of which in Saxony became the occasion of Luther's great enterprise. Leo published his first bull against Luther in June, 1520; Luther appealed to a general council, and publicly burnt the bull at Wittenberg. A second bull appeared against the great heretic in January, 1521, and the papal anathema was echoed by the doctors of the Sorbonne. At the same epoch war broke out afresh between the Emperor Charles V. and Francis I., the pope allying himself first with Francis, and soon after with Charles. In the midst of these political and religious agitations Leo died, 1st December, 1521. The patron of literature and the fine arts, he was surrounded with

many of the most distinguished men of his time; encouraged the study of Greek and the collection of ancient manuscripts; restored the Roman University and the great Laurentian Library of Florence; yet he did not show himself either an able politician or an exemplary pope. Fond of show, surrounded by wits and flatterers, many of them of licentious manners, he did not escape the contagion of their influence; but indulged with them in frivolous and often in criminal amusements. Roscoe's "Life and Pontificate of Leo X." is well known.

LEO XII., ANNIBALE DELLA GENGA, Pope, was born at Genoa, in 1760, and succeeded Pius VII. in the papal chair, in 1823. By the remission of many taxes, as well as by his benevolence and personal attention to the hospitals, prisons, and public institutions for the poor, he obtained the love of the people; he also endeavoured to free the States of the Church from robbers and banditti, as well as to suppress the remains of Carbonarism. Leo died in Feb., 1829, and was succeeded by Cardinal Castiglione, who took the name of Pius VIII. Pius died Dec., 1830, and was succeeded by Cardinal Capellari (Gregory XVI.).

LEO III., surnamed THE ISAURIAN, emperor of the East, was a native of Isauria. His father, for a large price, gained him admission to the guards of Justinian II., and after distinguishing himself by his courage and ability, he was made by Anastasius II. commander of the imperial forces in Anatolia. Refusing, in 717, to acknowledge Theodosius III., he marched on Constantinople, and was raised by the army to the imperial throne. The Saracens soon after laid siege to Constantinople, but they were ultimately defeated by Leo, both by land and sea. He suppressed a revolt in Sicily, and thwarted the attempts of Anastasius to recover the crown, and had him beheaded. After the first nine years of his reign, in which he showed himself a great soldier and an able ruler, he involved himself in theological strife by his attempt to suppress image-worship, and thus began the great Iconoclast controversy, which lasted above a hundred years. The common accounts of Leo are derived from the statements of his bitter enemies; and they have depicted him in the blackest colours. His first measures were envious and moderate; they were followed by more decisive ones; insurrections broke out at Constantinople, the patriarch Germanus being opposed to the emperor; the pope, Gregory II., condemned his edicts and remonstrated with him in two letters which are extant; Italy revolted, and was virtually lost to the empire; the succeeding pope, Gregory III., had the Iconoclasts condemned at the Council of Rome in 732, which provoked retaliatory measures on the part of the emperor; and in the midst of the momentous struggle Leo died, 741. In the year preceding his death the city was partly destroyed by a great earthquake, which extended also through Thrace, Asia Minor, and Egypt.

elled the patriarch Photius, who was his personal enemy. He made war on the Bulgarians and Hungarians, but only to be defeated, and his whole reign was troubled by invasions of the barbarians, and disgraceful war intrigues. Leo distinguished himself as an author, and especially by his treatise on "Tactics," and by completing the body of laws entitled "Basilica."

LEO, JOHN, surnamed AFRICANUS, a traveller and geographer of the 16th century, was born of Moorish parents, at Granada, in Spain. On that city being taken by the Spaniards, in 1492, he retired to Africa, through various parts of which he afterwards travelled. Having been captured by pirates, he was taken to Italy, and presented to Pope Leo X., who persuaded him to embrace Christianity, and gave him his own name on being baptized. At Rome, he acquired a knowledge of the Italian language, into which he translated his "Description of Africa," originally written in Arabic. This is a very curious and interesting work, comprising accounts of several countries rarely visited by Europeans. Died about 1526.

LEO, LEONARDO, an eminent musician, was born in 1694, at Naples, and is regarded as one of the greatest of the Italian masters. He composed nineteen operas, two oratorios, and numerous sacred pieces. His operas are lost, but his church music survives, and is of a high order. Leo was the pupil of Alessandro Scarlatti, and the teacher of Piccini and Jomelli.

LEO, of Modena, a learned rabbi of Venice, in the 15th century, who wrote a "History of the Jewish Rites and Ceremonies;" also a dictionary, Hebrew and Italian. Died, 1654.

LEON, FRAY LUIS DE, a Spanish poet and ecclesiastic, was born in 1627, and died in 1691. His ode, entitled "La Profecia del Tago," was translated into English by Mr Wigen, and published at the end of his translation of the poems of Garcilaso de la Vega.

LEONARDO DA VINCI. [VINCI.]

LEONIDAS, the Spartan king and hero, was the son of King Anaxandrides, and succeeded his half-brother, Cleomenes, B. C. 491. When Xerxes, king of Persia, invaded Greece, with an immense army, Leonidas marched to Thermopylae (B. C. 480), and, on arriving there, posted his army, which, including the allies, amounted only to 7000 men, so skillfully, that the enemy, on coming to the narrow pass, became aware of the difficulty of carrying it by force. Xerxes, therefore, attempted to bribe Leonidas, offering him the dominion of all Greece. This proposal being rejected with scorn, the despot sent a herald to order the Greeks to surrender their arms:—"Let him come and take them," was the hero's reply. Thrice did the Persians advance in great force, and thrice were they repelled, with enormous loss. Meanwhile, a traitorous Greek, named Ephialtes, led 10,000 of the enemy, by a secret path, over the mountain, who thus gained the rear of Leonidas. He now saw that all was lost, but resolved to show, by a memorable example, what the Greeks could perform in the cause of their country.

After a long contest, the hero fell, surrounded by countless assailants. The gratitude of Greece raised a splendid monument to the memory of Leonidas and his brave associates, and annually celebrated the great event by warlike games and orations.

LEOPOLD I., emperor of the West, was son of Ferdinand III., and was born in 1640. Destined for the church, he was educated by the Jesuits, and became well versed in metaphysics and theology, but not at all in the art of government. At the age of 15 he was crowned king of Hungary, in the following year king of Bohemia, and was elected emperor in 1658. His long reign of 49 years is marked by many events of European importance, but Leopold personally had little influence: he was led by his ministers. There were wars with Sweden, with Turkey, with Hungary, and three with France; and the peace of Oliva, the peace of Nimwegen, the league of Augsburg, the Grand Alliance, the peace of Ryswick, and the peace of Carlowitz are landmarks of this period. The severities exercised by the emperor occasioned the junction of the Hungarians with the Turks in 1683, and Vienna was besieged. It was on this occasion that John Sobleski, the heroic king of Poland, interposed, won a great victory over the Turks, and saved the empire; for which Leopold gave him very cold thanks. Sobleski withdrew his army, declaring he would still fight the Turks, but never the insurgent Hungarians. Leopold then adopted more severe and merciless measures in Hungary. It was during the second war with France that the infamous devastation of the palatinate took place, under the orders of Louvois, minister to Louis XIV. The war of the Spanish succession began in 1700, and while it was still going on Leopold died, 1705.

LEOPOLD II., emperor, was the second son of Francis I. and Maria Teresa, and was born in 1747. He became grand-duke of Tuscany in 1763, and his government was marked by wisdom and moderation, and by the establishment of important reforms, both civil and ecclesiastical. He succeeded his brother Joseph in the Austrian hereditary dominions in 1790, and the same year was chosen emperor. Very grave political difficulties beset him, and the Netherlands were in revolt, disaffection was growing to insurrection in Hungary and Bohemia, and the principal states of Europe were unfriendly. By wise measures he re-established tranquillity, recovered the Netherlands, and pleased his subjects by restoring with modifications the form of government which had existed before the innovations of his brother. The French revolution made fresh and greater difficulties. In 1791 he concluded the treaty of Pilnitz with the king of Prussia, and died in March, 1792.

LEOPOLD I., king of the Belgians, Leopold George Christian Frederick, prince of Saxe-Coburg-Saalfeld, was born on the 16th Dec., 1790. He was the youngest survivor of the nine children of Duke Francis, who died in Dec., 1806. Driven from his country by the calamities which followed the battle of Jena, Leopold entered the serv-

ice of Russia; was present at the famous interview of the emperors Alexander and Napoleon, at Erfurt, in 1808; lived some time at Paris, and became acquainted there with many distinguished persons; and, after passing several years in comparative obscurity, re-entered the Russian service in 1813, and had the command of a corps at the battles of Lützen, Bautzen, and Leipzig. He took part in several subsequent actions, entered Paris with the allied sovereigns, and accompanied them to London in 1814. On this occasion he met the Princess Charlotte, then 18 years of age. After serving in the army of the Rhine in the campaign of 1815, he returned to England, and became the accepted suitor of the heiress to the throne. He was naturalized in the following year, made duke of Kendal and general in the army, and on the 2nd May the marriage of Prince Leopold with the Princess Charlotte was celebrated at Carlton House. After a little more than a year and a half of sweet household and studious retirement, the position and prospects of Leopold were suddenly changed by the death of the princess in Nov., 1817. He continued, however, to reside at Claremont; and his sister Victoria having married the duke of Kent, and being left a widow in England, he found a new duty as her friend and adviser, sharing the responsible task of training her daughter, the Princess Victoria, then heiress to the crown of England. Early in 1830 the crown of the new kingdom of Greece was offered him, but was declined. In September of the same year the revolution took place at Brussels, and after four days' gallant struggle, Prince Frederic of Holland and the Dutch army was defeated by the Belgian volunteers, and a provisional government constituted. After the proposal and rejection of several candidates for the throne, it was offered, chiefly through the influence of the wise and single-minded patriot, Joseph Lebeau, to Prince Leopold. He accepted it, the election took place in June, 1831, and he soon after entered Brussels and took the oath to observe the constitution and maintain the independence of the kingdom. The Dutch still opposed the separation and invaded Belgium, but by the aid of the French they were driven back, and Leopold applied himself to the task of establishing order and consolidating his government. In 1832 he married the Princess Louise, eldest daughter of Louis Philippe. The same year the various questions relating to the status and limits of the new kingdom were discussed in a Conference of the Great Powers held at London, and a final settlement was effected by the treaty signed 15th November. In these negotiations Lord Palmerston, then secretary for foreign affairs, took a prominent part, and to his energetic endeavours was largely owing their successful result. Antwerp being still held by the Dutch, it was besieged with the sanction of France and England, and in Dec. 1832 capitulated. From that time Belgium, enjoying a liberal constitution, a wise ruler, and freedom from foreign embroilments, advanced in prosperity; an army was organized and well-disciplined; railways were constructed; a Na-

tional Bank established; manufactures and commerce flourished; and no history has to be written of it except a social and parliamentary one. Tranquillity was preserved by the prudence of the king during the revolutionary movements of 1848. He met the leading statesmen, and offered to resign the crown if the nation wished it; the nation had no other wish than that he should keep it. The chief difficulty of the king is in the passionate conflict of the Catholic and Protestant parties for supremacy; and in his successful dealing with this difficulty he especially displayed the wisdom and sagacity of a statesman. But Leopold held a position in Europe, by his character and influence, far more important than mere royalty would have been. He was generally recognized as the calm, impartial judge to whose decision governments and kings might always safely appeal: the trusted "Juge de Paix de l'Europe." His mediation was frequently of the greatest value to France and England. His family alliances with the principal sovereign houses of Europe gave him immense advantages in this respect. Son-in-law to George IV. and to Louis Philippe, uncle to Queen Victoria and also to the Prince Consort, he was connected by the marriage of his sister with the reigning house of Russia; his eldest son, the duke of Brabant, married the Archduchess Maria of Austria; his daughter the Archduke Maximilian, now emperor of Mexico; and his great-nephew is king of Portugal. After suffering severely at intervals for several years from heart-disease, and a still more distressing malady, he died at the palace of Laeken, 9th December, 1865, after a reign of 34 years. His remains were interred at Laeken, and his funeral (16th Dec.) was attended by the king of Portugal, the prince of Wales, the crown prince of Prussia, Prince Louis of Hesse, Prince Arthur, Prince de Joinville, the duke of Anhalt, the duke of Nemours, and envoys extraordinary from most of the courts of Europe. His son was proclaimed as Leopold II. on the following day. Two interesting historical works on his reign have appeared this year (1865), one entitled "Histoire Populaire de Règne de Leopold," the other, "Les Fondateurs de la Monarchie Belge," &c., by Théod. Juste.

LEPIDUS, MARCUS EMILIUS, THE TRIUMVIR, was a member of a distinguished patrician family of Rome. In B. C. 49 he held the office of prætor, and at the outbreak of the civil war he joined the popular party. Left præfect of the city while Cæsar was in Spain, he procured the appointment of Cæsar as dictator. He became master of the horse, and in 46 consul with Cæsar; was at Rome at the time of the murder of the latter, and succeeded him as pontifex maximus; had the government of Narbonne Gaul, and Hither Spain; joined Antony, and was declared an enemy to the state. In October, 43, the first triumvirate was formed, and the Roman world was divided between Octavianus, Antony, and Lepidus. He was again consul in 42; was made governor of Africa after the defeat of Brutus and Cæsius at Philippi; attempted afterwards an-

LERMONTOV, MICHAEL IVANOVICH, a Russian poet and novelist, was born in 1811. He entered the army, and rose to be an officer in the Guards, but in 1837, for his poem on the death of Pushkin, he was cashiered and sent to the Caucasus, where he spent the rest of his life. He was killed in a duel in 1841. An edition of his poems appeared soon after, and has been followed by several other editions. Lermontov also wrote a novel entitled, "A Hero of our own Times." As a poet he belongs to the Byronic school.

LE SAGE, ALAIN RÉNÉ, a distinguished French novelist and dramatist, was born in 1668, at Sarzeau, in Brittany, and studied at the Jesuits' College at Vannes. In 1692 he went to Paris, where his talents and manners procured him admission into the best society, and he soon adopted the profession of an author. He studied the Spanish language, and produced a multitude of translations, or imitations, of Castilian dramas and romances. His comedy of "Crispin the Rival of his Master," first attracted the public notice; but his success as a novelist has most contributed to make him known to foreigners. "Le Diable Boiteux," known in England by the title of "The Devil upon Two Sticks," became extremely popular, the comedy of "Turcaret" added to his fame; and that fame was soon rendered imperishable by his admirable "Gil Blas." Le Sage was endowed with great literary fertility; he composed 24 dramatic pieces, and had a share in the composition of 76 others. Among his novels are, "The Adventures of Guzman d'Alfarache," "The Bachelor of Salamanca," "The History of Estorville Gonzales," &c. Died, 1747.

LESLEY, JOHN, bishop of Ross, in Scotland, was born in 1527. He accompanied Queen Mary from France to Scotland in 1561, and soon after became bishop of Ross and privy councillor. He zealously defended the Romish religion, and when Queen Elizabeth appointed commissioners to meet at York, to consider the complaints made against Mary, Lesley appeared in behalf of his mistress, whose cause he pleaded with great ability. He also tried many experiments to procure her liberty, for which he was committed to the Tower; but in 1573 he recovered his liberty, and after residing some years in France, was made bishop of Constance. Died, 1596.

LESLIE, CHARLES ROBERT, R.A., a distinguished modern painter and author, was born in London of American parents, in 1734. In 1799 his father quitted England and settled in Philadelphia. After receiving the ordinary school education, young Leslie was apprenticed to a bookseller in Philadelphia, but the occupation was from the first distasteful to him; and eventually he was allowed to follow the bent of his inclination, and returned to London in 1813, with the view of becoming an artist. His first instructors in England were both American-born artists—the venerable president, Weez, and Washington Allston, a painter of refined taste, better known on the

other side of the Atlantic than on this. The first picture which gained him fame was "Anne Page and Slender," exhibited at the British Institution in 1819. This was followed at the succeeding exhibition of the Royal Academy by "Sir Roger de Coverley going to Church," a work which excited general interest and admiration; and from this time forward his pictures steadily displayed increasing power. Most of his productions are illustrative of the works of Shakspeare, Addison, Fielding, Goldsmith, Cervantes, Molière, &c., &c.; but he has taken subjects suggested rather than described by them; and to use the words of a contemporary, it may be doubted whether the passages of quaint humour in any of these writers were ever represented with so genial a feeling, so much regard for the author, and so much respect for the spectator. In 1821 Leslie was elected Associate of the Academy; and in 1826, R.A. In 1833 he was appointed by the United States Government professor of drawing in the Military Academy at West Point; which post, after a trial of five months, he resigned, and returned finally to England. Mr Leslie used with success the pen as well as the pencil. In 1845 he published a life of his friend Constable, the painter. From 1848 to 1851 he filled the post of professor of painting at the Academy, and his lectures have been published, with additions, as a "Handbook for Young Painters." At the time of his death he was engaged on the "Life of Sir Joshua Reynolds," which has been since published under the editorship of Mr Tom Taylor. Died, 1859.

LESLIE, CHARLES, son of the bishop of Clogher (who died at the age of 100 years, 50 of which he had been a bishop), was born in Ireland; studied at Trinity College, Dublin, and the Temple; quitted the law for divinity, and obtained preferment in Ireland. He was a zealous Protestant, but refused to transfer his allegiance to the new government, by taking the oaths to King William. Both by his personal exertions and his writings, he endeavoured to promote the interests of the exiled family; and, on the termination of the rebellion in 1715, he accompanied the Pretender into Italy. He wrote many political tracts, against the doctrine of resistance, and in defence of hereditary right, the most important of which were in a weekly paper, called the *Rehearsal*. He also wrote some treatises against deists and Socinians, among which are "The Snake in the Grass," and "A Short and Easy Method with the Deists." Died, 1722.

LESLIE, Sir JOHN, a celebrated mathematician and natural philosopher, was born at Largo, in Fifeshire, in 1706. His father, who was a joiner and cabinet-maker, intended to bring him up to some useful trade; but his fondness for calculation and geometrical exercises brought him at an early period under the notice of professors Robinson, Playfair, and Dugald Stewart; and, when he was 13, his parents were induced to let him enter as a student at the university of St Andrew's. After remaining there some time, he removed to that of Edinburgh,

where he was engaged by Dr Adam Smith to assist the studies of his nephew, afterwards Lord Reston. In 1790 he proceeded to London, with an intention of delivering lectures on natural philosophy; but being disappointed in his views, he found it expedient to commence writing for the press as the readiest means of obtaining a subsistence. His first undertaking of any importance was a translation of Buffon's "Natural History of Birds," which appeared in 1793, in 9 vols. 8vo; and the sum he received for this laid the foundation of that pecuniary independence, which his prudent habits fortunately enabled him to attain. In 1794, Mr Leslie spent a short time in Holland; and in 1796 he made a tour of Germany and Switzerland with Mr Thomas Wedgwood. In 1800 he invented that admirable and delicate instrument the differential thermometer; and in 1804 appeared his celebrated "Inquiry into the Nature and Properties of Heat." For this performance he was honoured by the council of the Royal Society with the Rumford medals; and in 1805 he was elected to the mathematical chair in the university of Edinburgh, which, in 1819, he exchanged for that of philosophy on the death of Professor Playfair. By the invention of his hygrometer he succeeded in making the discovery of that singularly beautiful process of artificial freezing, or consolidation of fluids, which enabled him to congeal mercury, and convert water into ice by evaporation. Early in the year 1832 he was invested with the knighthood of the Gueiphic order, an honour he was not destined long to enjoy, for he died the same year. The chief works of Sir John Leslie are, "An Account of Experiments and Instruments depending on the Relation of Air to Heat and Moisture," the "Philosophy of Arithmetic," "Elements of Geometry," "Elements of Natural Philosophy," besides many admirable treatises in Nicholson's Philosophical Journal, the Encyclopædia Britannica, &c. Died, Nov. 3, 1832.

LESŒUR. [SOEUR, L.E.]
LESSING, GOTTHOLD EPHRAIM, a distinguished German critic, dramatist, and miscellaneous writer, was born at Kamenz, in Lusace, in 1729. He was educated at the public school of Meissen and the university of Leipsic, and was from the first an ardent and laborious student. He was attracted to the stage, and his first essays in literature were dramatic compositions. After various literary attempts at Berlin he went to Wittenberg, where he graduated M.A.; and on his return to Berlin, in 1753, he became the intimate friend and coadjutor of Moses Mendelssohn, and the publisher Nicolai. Under their joint care appeared the journal entitled—"Bibliothek der schönen Wissenschaften." Lessing remained at Berlin, zealously pursuing his chosen tasks, till 1760, when he removed to Breslau, having been named secretary to the Prussian general in command there. After five years he again returned to the capital, and in 1770 was appointed librarian to the prince of Brunswick, at Wolfenbüttel. He made a short visit to Italy two years later, lost his wife in 1776, and after a long decline of health, spirits,

and mental power, he died in 1781. Lessing's great aim was to infuse a new spirit into the literature of his country, and to refine and polish its style, and he succeeded. His writings are among the classics of German literature, and are especially distinguished for masterly criticism, forcible reasoning, and clear nervous style. "He thinks," says Carlyle, "with the clearness and piercing sharpness of the most expert logician; but a genial fire pervades him, a wit, a heartiness, a general richness and fineness of nature, to which most logicians are strangers." Among his dramatic works are—"Miss Sara Samson," "Mina von Barnhelm," "Emilia Galotti," and "Nathan the Wise," his last work, which was only published in 1779. Of his prose works may be named—"Fabeln," "Litteratur-Briefe," "Dramaturgie," which first made Shakespeare really known to the Germans; and "Laocoon." The celebrated "Wolfenbüttelsche Fragmente," in which so bitter an attack was made on Revelation, first appeared in 1774, in the work entitled "Beitrag zur Geschichte und Litteratur aus den Schätzen der Herzoglichen Bibliothek zu Wolfenbüttel." They were long attributed to Lessing, but were in fact written by the elder Reimarus, and only annotated by Lessing. Coleridge was a diligent student of Lessing's works, and some passages in the "Confessions of an Inquiring Spirit," were made the ground of a charge of plagiarism from Lessing. [See Mr Green's "Introduction" to the "Confessions."]

L'ESTRANGE, Sir ROGER, a political and miscellaneous writer, was born in 1616. His father, Sir Hammond l'Estrange, of Hunstanton Hall, Norfolk, was a zealous royalist; and the son, following his example, was concerned in raising forces, and in some unsuccessful enterprises in favour of Charles I. during the civil wars, for which he was obliged to leave the kingdom. In 1653 he returned, and in 1663 established an English newspaper, under the title of "The Public Intelligencer," which he discontinued upon the publication of the first London Gazette. He was author of many violent political tracts; translated Josephus, Cicero's Offices, Seneca's Morals, the Colloquies of Erasmus, the "Visions" of Quevedo, and Æsop's Fables. He died in 1704.

LESUEUR, EUSTACHE, a distinguished French painter, was born at Paris, in 1617, and obtained from his countrymen the name of "The French Raphael." His conceptions are noble and elevated; his composition is simple, careful, and well arranged; the drawing is correct, in good taste, and proves his diligent study of the antique and of the great Italian masters; but his colouring is deficient in truth and vigour, which often renders his pictures too uniform. He died in his 38th year.

LESUEUR, JEAN FRANÇOIS, a French musical composer, born in 1760. After completing his studies at Amiens, he obtained various appointments, as director of music in cathedrais; and in 1784 became organist of Notre Dame, Paris; but having an inclination for theatrical compositions, he resigned his place at Notre Dame in 1788, and produced

several operas. "Télémaque" was his first. He afterwards composed "La Caverne," which met with the most brilliant applause; and in 1793 he produced "Paul et Virginie," the "Mort d'Adam," and "Les Bardes." In 1804 he was appointed chapel-master to Napoleon, and in 1815 was admitted to the Institute. Died, 1837.

LETI, GREGORIO, an Italian historian, was born in 1630, at Milan, and, after studying at Rome, went to Geneva, where he abjured the Catholic religion, and afterwards resided in England. While there he was known to be collecting materials for a history of the court of Charles II., and Charles seeing him one day at his levée, told him to take care that his history did not give offence. To which Leti replied, "I will do what I can; but if a man were as wise as Solomon, he would hardly be able to avoid giving some offence." "Why then," retorted Charles, "be as wise as Solomon; write proverbs, and let history alone." Leti, however, did not take this advice. The history appeared, under the title of "Teatro Britannico; and the author was ordered to quit the kingdom. He then went to Amsterdam, where he died in 1701. Among his works are, Lives of "Sixtus V.," 3 vols.; "Charles V.," 4 vols.; "Queen Elizabeth," 2 vols.; "Oliver Cromwell," 2 vols.; the "History of Geneva," 5 vols.; and a "History of the Cardinals." But the whole is interspersed with error and fiction, that they are rather romances than histories.

LETTSON, JOHN COAKLEY, an eminent physician, was born in 1744, in the island of Little Vandyke, near Tortola, in the West Indies. He was educated in England, served his time to an apothecary, and became a pupil at St Thomas's Hospital; after which he practised for a short time at Tortola; then returned to Europe, took his degree at Leyden, and settled in London, where he attained considerable celebrity, not merely as a medical practitioner, but as an active philanthropist. He was a member of many literary and scientific institutions, and the author of "Hints on Beneficence, Temperance, and Medical Science," a "Life of Dr Fothergill," and other useful works. Died, 1815.

LEUCIPPUS, a Greek philosopher, whose writings are lost, but who is celebrated as the originator of the atomic system. He is commonly said to have been the disciple of Zeno, and the master of Democritus, who more fully expounded his system. It is impossible to fix the age in which Leucippus lived.

LEUSDEN, JOHN, a celebrated biblical critic and theologian, was a native of Utrecht, where he distinguished himself as one of the most erudite scholars and able divines of the age. His theological works are numerous and valuable. He was born in 1624, and died about the close of the 17th century.

LEUWENHOEK, or LEENWENHOEK, ANTHONY VAN, a distinguished Dutch naturalist and microscopist, was born at Delft, in 1632. He acquired great reputation for his skill in constructing microscopes of admir-

able delicacy, and afterwards for the numerous interesting and important discoveries, anatomical and physiological, which he made by the use of them. Among the subjects of his laborious investigations were the continuity of the arteries, veins, and capillary vessels; the form of the blood-globules, and the chemical changes of the blood; the substance of the brain and nerves; the spermatozoa, which he claimed to have discovered in 1677, &c. His learning and his critical acumen were not equal to his skill in observation. He was chosen F.R.S. London, and contributed above a hundred memoirs to the "Philosophical Transactions." He was also a correspondent of the French Academy of Sciences. He spent his whole life at his native town, and died there, 1723.

LEVAILLANT, FRANÇOIS, traveller and naturalist, was born at Paramaribo, in Guiana, and from childhood showed a strong predilection for the study of natural history, particularly of ornithology. In furtherance of this desire, he undertook to penetrate into the interior of Africa, which he twice accomplished, though under circumstances of great difficulty. He published two narratives of his "Travels into the Interior of Southern Africa," and a "Natural History of African Birds," of "Parrots," and of the rare "Birds of the Indies." Insurmountable obstacles prevented him from pursuing his researches so far as he wished; but his travels are very amusing, and also afford much information. He died at Sézan, in 1824, aged 70.

LEVASSEUR, JEAN CHARLES, a French engraver, born at Abbeville in 1734. He studied at Paris, and became engraver to the king, and member of the Academy of Painting. He was the friend of the painter Greuze, and engraved several of his works. Died, 1816.

LEVESQUE, PIERRE CHARLES, a French historian, was born in 1736, at Paris, and was apprenticed to an engraver, but was removed and sent to the Mazarin College. In 1773 he visited St Petersburg, and was appointed professor of belles lettres at the School of Cadets. After seven years' absence he returned to France, and became professor at the Royal College. He was subsequently made a member of the Institute, and died in 1812. Among his writings are, "A History of Russia," "Histories of France, of Greece, and of the Roman Republic; a translation of Thucydides, &c."

LEVI, DAVID, a London Jew, of considerable acquirements, though of humble birth and occupations. He was first a shoemaker, and afterwards a hatter, but the works he published evinced much study and ability. In 1787 he entered into a polemical controversy with Dr Priestley, whose "Letters to the Jews" he answered in two series of epistolary essays. He was also the author of a volume on the rites and ceremonies of the Jews: "Lingua Sacra, or a Hebrew and English Dictionary," 3 vols.; "The Pentateuch in Hebrew and English," a translation of the Hebrew Liturgy, in 6 vols.; "Dissertations on the Prophecies," and some other works. Born, 1740; died, 1799.

LEVIS, PIERRE MARC GASTON, Duke de, a French nobleman of distinguished talents,

who at the beginning of the revolution was chosen deputy to the states-general by the nobility of Dijon; but, though friendly to a reform of abuses in government, he opposed the destruction of the monarchy, and in 1792 became an emigrant, and joined the royalist army. Being wounded in the engagement at Quiberon Bay, he came to England, where he resided till the establishment of the consular government, when he returned to France, but passed his time in retirement and literary pursuits. On the restoration of Louis XVIII. he was raised to the peerage, and admitted a member of the Academy. His works consist of "Maxims and Reflections," "The Travels of Kungli, or New Chinese Letters," 2 vols., "Recollections and Portraits," and "England at the Beginning of the Nineteenth Century." Died, 1830.

LEVIZAC, JEAN PONS VICTOR LECOUTZ DE, a French grammarian, was born at Alby, in Languedoc, emigrated to Holland at the beginning of the revolution, and settled in England as a French teacher. He commenced his literary career as a poet; but he is best known by his grammars, dictionaries, and other practical works on the French language. Died, 1813.

LEWIS, SIR GEORGE CORNEWALL, bart., an illustrious English statesman, historical critic, and political philosopher, was born in October, 1806. He was of an ancient and influential family of Radnorshire, and his father, Sir Thomas Frankland Lewis, bart., was long a member of the House of Commons, and filled several high offices of state. His son was educated at Eton and the university of Oxford, where he graduated B.A. in 1828. He was early introduced to official life, being a member of the commission appointed in 1831, on the Irish church and the condition of the Irish people, and soon after joint commissioner with the great jurist, John Austin, in Malta. In 1839 he succeeded his father as chief commissioner of Poor Laws, and held that office for eight years, distinguishing himself by great practical sagacity and business habits. He was returned to parliament, in 1847, for Herefordshire, and was at once appointed secretary of the Board of Control. In the following year he became under-secretary of the Home Department, and in 1850 secretary of the Treasury. Two years later he lost his seat, and did not again sit in parliament till 1855, when on his father's death he became member for the Radnorshire boroughs, and was soon after named by Lord Palmerston Chancellor of the Exchequer. His remarkable qualifications for this high office soon gained him the confidence both of the House and of the country. After retirement from office during the Derby administration in 1858-9, he was appointed home secretary, and applied himself with great earnestness to his very laborious duties. On the death of Lord Herbert, of Lea, in 1861, Sir George Lewis removed to the War Office, and remained in that department till his death. To the almost continual toil of the statesman he added that of the scholar and author; the latter forming indeed his chosen recreation. And the fruits of his labour in this

field are so abundant and of such rare value, that for most men they alone would have sufficed for the energy and devotion of a life. His first literary production was the translation, executed in conjunction with H. Tufnell, of Otfried Müller's "Die Dorer," in 1830. Some years later he translated, in conjunction with Dr Donaldson, Müller's "History of the Literature of Ancient Greece," written for the Library of Useful Knowledge. His most important work however, and that which has had the most powerful influence, is probably his learned and elaborate "Inquiry into the Credibility of Early Roman History," in which the acuteness of his singularly sceptical intellect is especially shown. It is a merciless demolition of the historical structure so laboriously reared by Niebuhr. The other principal works of Sir George Lewis are—the "Influence of Authority in Matters of Opinion;" "Methods of Observation and Reasoning in Politics;" an essay "On the Romance Language;" and his latest work, the "Historical Survey of the Astronomy of the Ancients." For a short time in 1834-5, he was editor of the "Edinburgh Review." He was throughout life distinguished for his ardent love of knowledge, wide and accurate scholarship, singular power of marshalling all the authorities on any subject of discussion, so as to let the conclusion show itself, great capacity of doubt in all fields of inquiry, and the utmost honesty and fairness. He disbelieved the Egyptologists, ridiculed the readings of cuneiform inscriptions, and refused to believe in centenarians. His simple, guileless character charmed all who knew him; and it is said that he never made an enemy, nor failed to make of every acquaintance a friend. He died, leaving no children, 13th April, 1863. A memorial cross, designed by Gibbs, has been erected to him at New Radnor; a bronze statue, by Baron Marochetti, has been set up in front of the Shire Hall, Hereford; and a bust, by Weckes, is placed in Westminster Abbey. Sir G. C. Lewis married, in 1844, Lady Theresa Lister, sister of Lord Clarendon and his Contemporaries; as editor of two novels, "The Semi-Detached House," and "The Semi-Attached Couple;" and, most recently, of the interesting "Journals of Miss Berry." Lady Theresa Lewis, died at Oxford, 9th Nov. 1865.

LEWIS, JOHN, a learned divine and antiquary, was born at Bristol in 1675, and died at Margate in 1746. He published "The Life of Wickliffe," "Wickliffe's Translation of the New Testament," "The History and Antiquities of the Isle of Thanet," "The History of the Abbey Church of Feversham," "The Life of William Caxton," &c.

LEWIS, MATTHEW GREGORY (famously styled "Monk" Lewis), a popular romance writer and dramatist, was born in London, in 1773, and was the son of the under-secretary at war. He was educated at Westminster School; after which he travelled on the continent, and imbibed while in Germany that taste for the marvellous and romantic which characterizes most of his writings. His first novel was "The Monk," admired for its talent, but justly censured

for its licentiousness. Tyranis, vols.; Spectre, was a magnificent gushed died in 1818.

LEWIS, MERIWETHER, an American officer, born in 1774, and employed by the government of the United States, with Clarke, to make discoveries in the northern parts of the American continent, with a view to the extension of commerce to the Pacific Ocean. In 1805 they undertook a journey for the purpose of discovering the sources of the Missouri; and they passed the winter in an icy region, 500 leagues beyond its confine. Lewis was soon after made governor of Louisiana, and Clarke a general of militia, and agent of the United States for Indian affairs. Lewis died in 1809.

LEYBOURN, WILLIAM, a mathematical writer, was originally a printer in London. He became schoolmaster, and published a number of practical works, which were once popular and of great utility, particularly "A Treatise on Surveying," "A Course of Mathematics," and the "Traders' Sure Guide." He died about 1696.

LEYDEN, JOHN OF, leader of the Anabaptists of Munster, was born at the Hague about the close of the 15th century. Brought up at Leyden to the trade of a tailor, he spent several years in travelling, stayed four years in England, visited Flanders, Portugal, and other countries, and then settled at Leyden as an innkeeper, and married. In his leisure hours he indulged his natural taste for literature, composed verses, played the comedian, and discussed theology. He went to Munster in 1533, and there adopted the opinions of the Anabaptists, and after a short visit to his own country he returned to Munster with Mathison. Crowds flocked to hear them, and looked on them as prophets, and Catholics and Protestants alike feared and hated them. At length, at the close of 1534, the prince-bishop of Munster resolved to regain his lost sovereignty by arms. All who were on his side left the town, and the Anabaptists were left masters of it. The siege began, vigorous defence was made, a government being organized—twelve "ancients of the new Israel" with John of Leyden as prophet at their head—the people armed, provisions stored, and the fortifications repaired. John was soon named king. After a successful defence, protracted for more than six months, the bishop's troops were admitted by treachery, in June, 1535, most of the people perished, John and two of his companions were taken alive, and for eight days the town was sacked by the soldiers. In January, 1536, John of Leyden and his two friends were publicly tortured with red-hot pincers, stabbed and mutilated, and their bodies hung up in iron cages on the tower of a church.

LEYDEN, JOHN, physician, but more distinguished as a poet and orientalist, was born in 1775, at Denholm, Roxburghshire, and was the son of a small farmer.

Displaying in early youth an eager desire for acquiring knowledge, his parents sent him to Edinburgh, where he first studied theology, but relinquished it for medicine, and, in addition to the learned languages, he acquired French, Spanish, Italian, German, Arabic, and Persian. In 1801 he assisted Sir Walter Scott in procuring materials and illustrations for his "Minstrelsy of the Scottish Border," and republished "The Complaynt of Scotland," with a learned preliminary dissertation, notes, and a glossary. Having obtained a doctor's degree, he was appointed assistant surgeon on the Madras establishment; after which he was made professor of the native dialects in the Bengal College; from which situation, however, he removed, to be judge of the 24 Pergunnahs of Calcutta. His power of acquiring languages was wonderful, and during his residence in India he devoted himself to the study of oriental literature; but he did not long survive the influence of the climate. His "Poetical Remains" were published in 1821. Died, 1811.

LEYDEN, LUCAS VAN, an early Dutch painter and engraver, was born at Leyden in 1494, was a pupil of Engelbrechtsen, and at a very early age had attained a high reputation both as painter and engraver. About 1521 he travelled through the provinces of his native country to study the principal works of art, being accompanied through part of his tour by the painter Mabuse. He was visited at Antwerp by Albert Dürer. His health was ruined by the incessant dissipation in which he indulged during his tour, and he died in 1533. His pictures are now very rare, and his prints fetch high prices.

L'HOPITAL, [HOPITAL, MICHEL DE L.]

LHUYD, EDWARD, an eminent antiquary and naturalist, born about 1670, was a native of Wales; studied at Jesus College, Oxford, in which university he succeeded Dr Plot as keeper of the Ashmolean Museum; and was the author of a learned and valuable work, entitled "Archæologia Britannica." He also published "Lithophylacii Britannici Iconographia;" and left in manuscript an "Irish-English Dictionary," and other curious papers on antiquarian subjects. Died, 1709.

LIBANIUS, a celebrated Greek rhetorician, born at Antioch in 314. He studied at Athens, and afterwards became famous as a teacher of eloquence at Constantinople, till the jealousy of the other professors being excited by his success, he was accused of magical practices, and banished. He afterwards became preceptor to Basil and John Chrysostom, so celebrated in the Christian church; and on the accession of Julian, he was honoured with his friendship, and is supposed to have assisted the emperor in some of his compositions. Many of his orations and declamations are extant, but they are verbose and pedantic.

LICHTENBERG, GEORG CHRISTOPH, an eminent natural philosopher and moralist, was born near Darmstadt, in 1742; studied at Göttingen, where he was appointed professor extraordinary of the physical sciences; and succeeded Erleben, in 1777, as professor

of experimental philosophy. His astronomical observations were original and important. He indulged much in satire; and among others, possessing much wit and humour, was an effusion, entitled "The Physiognomy of Tails," in which Lavater and his system were held up to ridicule. Lichtenberg visited England twice, and on the second occasion made a long stay. He afterwards undertook the composition of his clever "Illustrations of the Engravings of Hogarth," but died before he had finished the work. Died, 1799.

LICHTENSTEIN, JOHANN JOSEPH, Prince von, Austrian general and diplomatist, was born in Vienna, in 1760. He entered the army, and made his first campaign in the Turkish war. He was engaged in the principal campaigns of the war with France, was taken prisoner with Mack at Ulm, negotiated the armistice of Austerlitz, and assisted in the treaty of Presburg, and was made, in 1809, governor of Upper and Lower Austria. He greatly distinguished himself by his valour at the battles of Aspern, Essling, and Wagram. He enjoyed the confidence of his sovereign, and was employed by him on various occasions. Died at Vienna, 1836.

LICHTENSTEIN, JOSEPH WENCESLAUS, Prince of, an Austrian general and diplomatist, was born at Vienna, 1696. He had the chief command of the Austrian army in Italy, with the title of field-marshal, in 1746, when he gained the victory of Placentia. From that time he was chiefly employed in diplomatic affairs, and the duties of his office, as director-general of the artillery. He was a patron of the arts and artists, and founder of the Lichtenstein Gallery at Vienna. Died, 1772.

LICINIO, GIOVANNI ANTONIO. [PORDENONE.]

LICINIUS CALVUS STOLO, CAIUS, an eminent Roman tribune and consul. He was of a plebeian family, was chosen tribune of the people with L. Sextius, B.C. 376, and distinguished himself as author of several laws by which the strife of patrician and plebeian was terminated. He was re-elected with his colleague, L. Sextius, every year till 366, when after a hard contest of ten years his rogations became laws. By these it was enacted that consular tribunes should no more be elected, but that one of the consuls should be a plebeian: that no one should hold more than 500 acres of the public land; and that ten men, half of them plebeians, should have the care of the Sibylline Books. An arrangement was also made for the relief of debtors. Licinius was consul in 364 and 361. He was subsequently convicted and fined for a breach of his own law respecting the public land.

LIGHTFOOT, JOHN, a learned English divine, was born at Stoke-upon-Trent, in Staffordshire, in 1602, and educated at Christ's College, Cambridge. He made extraordinary advances in the Greek and Latin languages, and applied himself to Hebrew with singular assiduity and success. In 1629 he printed his first work, entitled "Eruhim, or Miscellanies, Christian and Judaical." He distinguished himself as a zealous pro-

motor of the Polyglot Bible, and, at the Restoration, was appointed one of the assistants at the Savoy Conference. He became vice-chancellor of Cambridge, and died in 1675. The works of Lightfoot, who, for biblical learning, has had few equals, were printed in 2 vols. folio, and his "Remains" were published by Strype, in 1700.

LIGHTFOOT, JOHN, a botanist, born at Newent, in Gloucestershire, in 1735, was educated at Pembroke College, Oxford, and became, successively, rector of Shelden, in Hampshire, and of Gotham and Sutton, in Nottinghamshire. He was patronized by the duchess of Portland, and drew up the catalogue of her museum. He was a fellow of the Royal and Linnæan Societies, and published the "Flora Scotica," 2 vols. He died in 1788, and his Herbarium was purchased by George III.

LIGNE, CHARLES JOSEPH, Prince de, was born at Brussels, in 1735; entered the Austrian army at the age of 17; distinguished himself in the Seven Years' War; was invited to the French court by the Count d'Artois, and admitted into the privacy of the Royal family; was sent on a mission to Russia, where his talents and personal accomplishments rendered him a great favourite with Catharine, who made him a field-marshal, and gave him an estate in the Crimea; and after enjoying great popularity, he died in 1814. His knowledge, experience, activity, and acute observation appear by the numerous writings which he published; and the information he gives of the leading persons and events of his time, is detailed in a lively and instructive manner.

LIGONIER, JOHN, Earl of, field-marshal of the English army. He served in all the wars of Queen Anne, under the duke of Marlborough, and especially distinguished himself at the battle of Lawfeldt in 1747, where he was captured by the French, presented to Louis XV., and soon released. He became ten years later commander-in-chief. He died in 1770, aged 92.

LILBURNE, JOHN, an "Independent" of the Commonwealth period, and one of the victims of Star-Chamber tyranny, was born at Durham in 1618. He was apprenticed to a clothier in London, and at the age of 18 was prosecuted for circulating the writings of Prynne and Bastwick. He was whipped from the Fleet to Westminster, set in the pillory, gagged, fined, and imprisoned; and, for the heroism with which he suffered, was named by the admiring people "sturdy John." Released by order of the long parliament in November, 1640, and awarded an indemnity, which he did not receive, he continued to make passionate and dauntless resistance to tyranny both by speech and writing. He entered the parliamentary army, fought at Edgehill and at Brentford, where he was taken prisoner, and was made major and lieutenant-colonel. He possessed at first the fullest confidence in Cromwell, but afterwards became bitter against him, and for his violent harangues and pamphlets was several times imprisoned. Cromwell paid him a visit in the Tower in 1647. Two years later he published his "England's New Chains Discovered," an attack on Cromwell

and the Council of State, for which he was
committed to the Tower, and after seven
months was tried for high treason. He so
ably defended himself that after three days'
trial he was acquitted, but suffered three
months' longer imprisonment. In 1652 he
was sentenced by act of parliament to ban-
ishment for life, returned the next year, was
again tried, hundreds attending his trial in
arms, resolved to rescue him, and was ac-
quitted amidst shouts of joy that were heard
a mile off. Cromwell had him sent to Jersey,
but allowed him to return a few years later,
and gave him a pension. Lilburne joined
the Quakers, and died at Eitham, in Kent,
August, 1657.

LILLO, GEORGE, a tragic writer of the
last century, was born in London, in 1693.
He carried on the business of a Jeweller
many years in a style of great respectability,
and contrived to devote no small portion of
his time to dramatic productions. He well
knew how to touch the heart, and his pieces,
which are subservient to the cause of virtue,
are "George Barnwell," "Fatal Curiosity,"
and "Arden of Feversham." He died in
1739.

LILLY, or LYLY, JOHN, called the *Eu-
phuisist*, an English dramatist and miscellane-
ous writer of the 16th century. He was
born in Kent, probably in 1554, and gradu-
ated M.A. at Oxford University in 1575. His
plays, nine in number, possess little intrinsic,
but much historical, interest, as illustrations
of the age. Lyly's chief prose works are
those entitled "Euphues, or the Anatomy
of Wit," and "Euphues and his England,"
which appeared respectively about 1580 and
1582. Lilly was a favourite at the court of
Queen Elizabeth, and by his writings gave a
new tone and style of speech to the courtiers,
a style artificial and affected, and which was
ridiculed enough afterwards. He ranked
high as a dramatist, and some of his best
passages are supposed to have been para-
phrased by Shakespear. His plays were
reprinted, with notes and a memoir, by
Fairholt, in 1858. It is unknown when this
author died.

LILLY, WILLIAM, an English astrologer,
was born in Leicestershire, in 1602. After
receiving a common education, he went to
London, and became book-keeper to a trades-
man, at whose death he married his widow.
In 1632 he became the pupil of Evans the
astrologer, and soon excelled his master. He
was employed by both parties during the
civil wars, and even Charles I. is said to
have made use of him. Lilly was certainly
consulted respecting the king's projected
escape from Carisbrook Castle. He, however,
gained more from the parliament party; and
the predictions contained in his almanacks
had a wonderful effect upon the soldiers
and common people. He died at Horsham,
in 1681. His principal works are, "Christian
Astrology," "A Collection of Nativities,"
and "Observations on the Life and Death of
Charles, late King of England."

LILLY, WILLIAM, a learned grammarian,
born at Odham, in Hampshire, in 1468. He
was appointed first master of St Paul's
School by the founder, Dr Colet, in 1512,
and died of the plague in London, in 1522.

He is highly praised by Erasmus for his
uncommon knowledge of languages, and
admirable skill in the instruction of youth.
He wrote some poems and tracts, but he is
chiefly remembered by the Latin Grammar
which bears his name.

LIMBORCH, PHILIP VAN, a celebrated
Dutch theologian, of the sect of Remon-
strants, born at Amsterdam, in 1633, chosen
professor of divinity there in 1668; and died
in 1712. He was author of "A History of
the Inquisition," "A System of Christian
Theology," and other works.

LINACRE, or LYNACER, THOMAS, a dis-
tinguished English physician and classical
scholar, was born at Canterbury about 1460.
He studied at Oxford University, and in
1484 became a fellow of All Souls. He con-
tinued his studies at Bologna, Padua, Flo-
rence, and Rome, profiting by the assistance
of Poizziano, Chalcondylas, and other emin-
ent scholars. He afterwards taught Greek
at Oxford, and was appointed tutor and
physician to Prince Arthur. He enjoyed
the highest reputation as a physician, and
published Latin translations of a treatise
of Paulus Aegineta and of several works
of Galen, of which Erasmus pronounced
the Latin more elegant than the original
Greek. Linacre is also considered the
founder of the Royal College of Physicians,
of which he was also first president. He was
the friend of Dean Colet, William Lily,
Grocyne, and other scholars, and shares with
them the honour of greatly promoting the
study of classical literature in England. He
was author of a learned work "De Emendata
Structura Latini Sermonis," and of an ele-
mentary Latin Grammar. Linacre entered
the church early in the 16th century, and
held several preferments, became prebendary
and precentor of York Minster, and died
in 1524. He was buried in St Paul's, Lon-
don.

LINCOLN, ABRAHAM, president of the
United States, was born in Kentucky, in
1809. His father was a working farmer, and
the first occupations of the son were those
of a labourer in the bush of Illinois, whither
the family had removed, and of a common
boatman, on the Mississippi. But he had a
taste for reading, and made up to some ex-
tent for the defects of his education. At
the age of 25, he was chosen a member of
the legislature of Illinois, and three years
later began to practise at the bar at Spring-
field. In 1847, he sat in congress as repre-
sentative of his own district, and was a
steady supporter of the Whig party, then
in opposition. He was several times a can-
didate for the rank of senator, but without
success; and he failed also in the candi-
dature for the office of vice-president in 1856.
He was then one of the chiefs of the recently
formed Republican party. He was nomi-
nated for the presidency by the Chicago Na-
tional Republican Convention in June, 1860,
and elected in November, his competitor
being his friend Seward. Lincoln had long
been known as an uncompromising oppo-
nent of slavery, and his election caused the
most profound agitation in the Southern
States of the Union. One after another these
States announced their secession from the

Union, and the first open act of civil war was the attack on and capture of Fort Sumter, Charleston, by a Southern force. The story of the president's remaining years is the story of the civil war, which lasted four years, and ended with the submission of the "Confederates." President Lincoln had been re-elected in 1864, lived to see the triumph of his policy, and on the evening of April 14, 1865, while present in Ford's Theatre, at Washington, was shot by Wilkes Booth, an actor and a fanatical secessionist. His death took place the next morning, and the tidings of it was received with deep sorrow and indignation on both sides of the Atlantic. President Lincoln, though a man of no more than average ability, and of limited education, discharged the arduous duties of his office with much good sense and moderation. He understood his countrymen and had their confidence: and it was anticipated that he would have shown a conciliatory spirit in dealing with the subdued States, and lessened the grave difficulties of the reunion. He had a deep sense of religion, great good nature, considerable humour, and homely, pleasant manners. He left a widow and several children; and Queen Victoria addressed an autograph letter of condolence to Mrs. Lincoln. A "History of the Administration of President Lincoln," drawn from official documents and private papers, by Henry J. Raymond, has already appeared. There is a fine portrait of Mr. Lincoln by Matthew Wilson.

LINDE, SAMUEL BOGUMIL, Polish lexicographer, was born of a Swedish family at Thorn, in 1771. He studied at the university of Leipzig, under the philologist Ernesti, whose friendship he gained, and through whose influence he was named, in 1792, professor of the Polish language and literature there. His studies and intercourse with several eminent Poles excited in him the desire to prepare a complete dictionary of his native tongue. He worked at it almost incessantly for above twenty years, and the last of the six bulky quartos was published in 1814. He had long retired from his Leipzig chair, and after holding the post of librarian to Count Ossolinski, settled at Warsaw, where he became afterwards librarian to the university. He died at Warsaw, in 1847.

LINDLEY, JOHN, L.L.D., professor of botany at University College, London, was born at Catton, near Norwich, in 1799. He was the son of a gardener, and was thus early led into the path which he steadily pursued through life. In his twentieth year he began his career as a writer by a translation of Richard's "Analyse du Fruit," and after publishing several other works he came to London, and was for some time engaged in the heavy task of writing the descriptive portion of the "Encyclopædia of Plants," projected by Mr. Loudon, which appeared in 1829. The same year he was appointed professor of botany at the London University the duties of which office he very successfully discharged for a long course of years. He was for some time lecturer on botany at the Royal Institution and at the Chelsea Botanic Gardens. His

services as secretary to the Horticultural Society were of great value, many new plants and new methods of cultivation being introduced under his management. But it is as the able and earnest advocate of the natural system of botany, in opposition to the artificial system of Linnæus, that Dr. Lindley earned his high reputation. As early as 1830 he announced his views of its importance and advantages, in the essay accompanying his "Introduction to the Natural System of Botany;" and to establish and illustrate it was the chief aim of his works. His works are very numerous, and among the most important are—"The Vegetable Kingdom," published in 1846; "Flora Medica;" "Fossil Flora of Great Britain," in which he was assisted by Mr. Hutton; "The Genera and Species of Orchidaceous Plants," a family in which he took enthusiastic interest; "Folia Orchidaceæ;" and "Theory of Horticulture." From 1841 till his death, Dr. Lindley was editor of the "Gardener's Chronicle." He wrote a large number of the botanical articles in the Penny Cyclopædia, and contributed to the Botanical Register, in which he first made known some of our now familiar garden flowers: Fuchsias, Verbenas, and Calceolarias. Dr. Lindley was a fellow of the Royal Society, and received their medal in 1838, for his services to science. He was also a fellow of the Linnæan and Geological Societies, and member of many foreign scientific societies. He received the degree of Ph.D. from the university of Munich. In 1860, he was appointed examiner in botany in the university of London; but he had to resign his professorship several years since from injured health. The last literary work on which he was engaged was the "Treasury of Botany," recently published as a companion volume to Maunder's Treasuries. Died at Aeton Green, near London, 1st November, 1865.

LINDSAY, or LYNDSEY, Sir DAVID, an ancient Scottish poet, descended from a noble family, was born at Garaylton, in Haddingtonshire, about 1490, and became page of honour to James V, then an infant. His first poetical effort was the "Dreme;" after which he wrote the "Complaynt," and presented it to the king. In 1539 he was inaugurated Lyon king-at-arms, knighted, and sent on a mission to Charles V.; on his return from which he occupied himself on a drama of a singular kind, entitled a "Satyre of the Three Estates," which was followed by "The History and Testament of Squire Meldrum," and other poems. During the regency, he espoused the cause of the reformers, and entered with great zeal into religious disputes. His death took place after 1567. A complete edition of his works was published in 1806.

LINDSEY, THOPHILUS, an eminent Unitarian divine, was born in 1725, at Mid-dlewich, in Cheshire, and was educated at St John's College, Cambridge. He entered into orders, and held the vicarage of Catterick, in Yorkshire, which from conscientious scruples he resigned, and embraced the principles of Unitarianism. From 1774 till 1783 he was minister of a congregation in Essex

LINGARD, JOHN, the Roman Catholic historian of England, was born at Winchester, in 1771. He was educated at the college of Douay, and on its removal to England during the French revolution, accompanied it thither. He commenced his laborious literary career in 1805, by a series of Letters on Catholic Loyalty, contributed to a north of England newspaper. The work on which his fame rests is his "History of England, from the first Invasions by the Romans, to the Accession of William and Mary, in 1688;" the first edition of which appeared between 1819—1823. It was subsequently considerably enlarged, and has now passed through six editions, having deservedly attained the rank of a standard work. Based for the most part on original researches; abounding in solid learning and acute suggestion; written in a lucid, manly, unaffected style; it is esteemed one of the best text-books on our history yet written. While looking at ecclesiastical affairs and persons from the Romanist point of view, Dr Lingard has the merit of not overpassing the limits of fairness and moderation in his treatment of controverted matters. He was author also of the "History and Antiquities of the Anglo-Saxon Church," a work charged by Southey with much sophistry and misrepresentation. The dignity of cardinal was offered to Dr Lingard, and declined. Died at Hornby, where he had lived since 1811, in July, 1851. He was in receipt of a pension of £300 a year from the Queen.

LINGUET, SIMON NICOLAS HENRI, a French political and miscellaneous writer, was born at Rheims, in 1736. Early in life he entered the army, and served as aide-de-camp to the Prince de Beauvau, in Portugal; he afterwards studied the law, and became an advocate; but being expelled from the bar, in consequence of some dispute with his professional brethren, he turned political writer, and having given offence to the ruling powers, was sent to the Bastille. On obtaining his liberty, he published an account of his imprisonment, a work which produced a strong sensation, and is said to have prepared the way for subsequent events. He retired to Brussels in 1787, and there published his "Anales Politiques," for which he was rewarded by the Emperor Joseph II. with a present of 1000 ducats. He then returned to France, took an active part in the revolution, and died by the guillotine, at Paris, in 1794.

LINLEY, THOMAS, the name of two distinguished English musicians, father and son. The elder received his musical education under Chilcott, the organist at Bath, and for many years conducted the oratorios and concerts in that city. One of his daughters became the object of a most romantic attachment to, and subsequently married, the celebrated Richard Brinsley Sheridan; and on that gentleman complet-

ing the purchase of Drury Lane Theatre, Linley became joint patentee with him, and conducted the musical department. In conjunction with his son, whose professional abilities were of a high order, he composed the airs to numerous operas, many of which are still held in great esteem. A melancholy fate awaited the younger Linley. In August, 1788, while on a visit, with his sisters, at Grimsthorpe, the seat of the duke of Ancaster, he went on board a pleasure-boat in the canal, with three other young men, when, through some mismanagement, the boat upset; his companions saved themselves by clinging to the keel, but he sank in his endeavours to reach the shore. On the intelligence being conveyed to his father, he was seized with a brain fever, and though he lived till the year 1795, he never recovered the shock which the loss of his favourite and gifted son occasioned.

LINNAEUS, or, more properly, LINNÉ, CARL VON, one of the most celebrated of modern naturalists, and the founder of the botanic system named after him, was born in 1707, at Roshult, in Sweden. From his infancy he discovered a propensity to the study of plants; and though destined for the church, his predilection for natural history withdrew his attention from theological studies, and his destination was changed for the medical profession. While at the universities of Lund and Upsal, he laboured under great disadvantages, from the narrowness of his father's circumstances; but the patronage of Celsius, the theological professor, who was also a naturalist, improved his condition, and he obtained some private pupils. It was at this period that he formed the conception of that botanical system which has immortalized his name. In 1732 he made a tour through Lapland, and, visiting the mining district round Fahlun, sketched the system which he afterwards developed in his "Systema Naturæ." He next resided for three years in Holland, where he took his doctor's degree, and was superintendent of Clifford's celebrated garden at Hartecamp, near Haarlem. After visiting England, in 1738, he made an excursion to Paris, and, towards the end of that year, returned to his native country, and settled as a physician at Stockholm, where the establishment of a Royal Academy, of which he was one of the first members, contributed to the advancement of his reputation, by the opportunities which it afforded for the display of his abilities. In 1741 he succeeded to the professorship of medicine at Upsal, to which was added the superintendence of the botanic garden. His fame had now spread through the civilized world, and scientific bodies eagerly enrolled him among their members; in 1747 he was nominated first physician to the king; in 1753 he was created a knight of the Polar Star—an honour never before bestowed on a literary man; soon afterwards he was elevated to the rank of nobility, and acquired a moderate degree of opulence, sufficient to enable him to purchase an estate and mansion at Hammarby, near Upsal, where he chiefly resided during the last years of his life. He died in 1778. The private character of this great

botanist is stained by his cruel treatment of his son. His chief works are the "Systema Naturæ," "Species Plantarum," "Genera Plantarum," "Philosophia Botanica," "Materia Medica," &c.

LINSCHOTEN, JOHN HUGH VAN, a Dutch traveller, of the 16th century, who wrote narratives of his voyages to the East Indies, and a description of the coasts of Guinea, Congo, and Angola. Born, 1533; died, 1633.

LINT, PETER VAN, an historical and portrait painter of Antwerp, was born in 1609. He painted in Italy several years, and returned to his own country increased in wealth and reputation.—A relation of his, HENDRIC VAN LINT, was an eminent landscape painter, and executed some fine views about Rome.

LINWOOD, Miss, whose unique "Exhibition," in Leicester Square, for so many years attracted public notice, was born in Birmingham in the year 1755; but when she was only six years old her friends removed to Leicester, and in that town she continued to reside till her death. The "Exhibition" was first opened at the Hanover Square Rooms in 1798; it was subsequently removed to Edinburgh, Glasgow, Dublin, &c., and was finally located in Leicester Square. Her productions consist of copies from the paintings of the best masters, wrought in worsted. The entire collection comprises nearly 100 pictures, the largest of which, "The Judgment upon Cain," was completed in her 75th year; the gem of the whole, however, is probably the "Salvator Mundi," from the original by Carlo Dolce; for which, it is said, she refused the offer of 3000 guineas. This picture she bequeathed to her Majesty Queen Victoria. But it is not only of her peculiar talent that we ought to speak. She was a kind and encouraging patroness of unassuming merit; and her name will long be remembered with affectionate regard by those who knew her moral worth and her disinterested benevolence. Died in the 90th year of her age, March 2, 1845. Her collection was afterwards sold by public auction, and realized but a very trifling sum.

LIPPI, FRA FILIPPO, one of the greatest Italian painters, was the son of Tommaso Lippi, a butcher of Florence, where he was born about 1412. Early left an orphan, he was placed in the monastery of the Carmine in 1429, and lived there twelve years. He showed great taste for drawing, and probably studied the great works of Masaccio in the Brancacci chapel. He is said to have painted in the cloister a companion fresco to one of Masaccio's, but whatever he did there has since perished. The usual story of his life is that he left the monastery in 1430 and went to Ancona; was there captured by pirates and sent as a slave to Africa; by his skill in drawing obtained his liberty in 1435, and went to Naples, and shortly after returned to Florence; that he executed great works at Florence, Arezzo, Prato, and Spoleto; that at Prato he seduced a young maiden, Lucrezia Buti, who was being educated in the convent, and sat to him for a Madonna, and carried her off; that this

brought him into endless trouble, and that at last he was poisoned. Considerable doubt is now thrown upon many of the gravest points of this story. It is certain that Fra Filippo did not leave the Carmelite monastery till 1432, and that throughout his life he retained the appellation of Fra or Frater; his capture is believed to be a myth; there is no evidence of his living at Ancona or at Naples; the tale of the seduction rests solely on the testimony of Vasari, as does that of the poisoning. It is certain that although he had more commissions as a painter than he could execute, he was almost constantly struggling with poverty in consequence of having a number of female relatives dependent on him. In 1442 he was appointed chaplain to the convent of San Giovannino at Florence, and five years later rector of San Quirico at Legnani. As an artist he belongs to the school of Masolino, Angelico, and Masaccio, and his works show that he was incessantly active and progressive to the last. Among his most famous works are the altarpiece of the Barbadori chapel; a Coronation of the Virgin, painted in 1441, and now in the Academy of Arts, Florence; frescoes of scenes from the lives of St Stephen and John the Baptist in the Duomo of Prato, painted in 1456-65; the Transit of St Bernard, in the same church; and frescoes in the cathedral of Spoleto. There are many fine pictures of Fra Filippo in the galleries of Florence, Munich, and Berlin; and our own National Gallery has five works attributed to him. Died at Spoleto, 1469. A monument was there erected to him by Filippino Lippi, his reputed son by Lucrezia Buti, at the expense of Lorenzo the Magnificent.

LIPPI, FILIPPINO, a very distinguished Italian painter, respecting whose parentage, time of birth, and works, there is considerable uncertainty. He is usually said to be the son of Fra Filippo Lippi by Lucrezia Buti, and to have been born at Florence in 1460. But there is very slight evidence for these statements. The style of his paintings marks him out as a scholar of Fra Filippo, and his name Filippino may merely denote that relation. There are also points of resemblance between some of the pictures of Filippino and Botticelli, supporting the assertion that he was a pupil of Botticelli; or perhaps indicating their common relationship to Fra Filippo. His earliest known work is the very fine "Vision of St Bernard," in the Badia at Florence, executed in 1480. He was employed to complete the frescoes in the Brancacci chapel at Florence probably between 1482-90. There he painted the Crucifixion of St Peter, St Peter and St Paul before the proconsul, St Paul's visit to St Peter in prison, and part of the picture of the Resurrection of the King's Son, begun by Masaccio. Raphael's St Paul in the cartoon of the preaching at Athens was adopted from Filippino's fresco of the visit of that apostle to St Peter. In 1485 Filippino painted the great altarpiece of the Madonna and Saints for the public palace of Florence, now in the Gallery of the Uffizi. Among his other works are the altarpiece of the Nerli chapel in San Spirito; frescoes in the Caraffa chapel

at Rome; altarpiece of San Donato at Florence in 1498; and the frescos in the Strozzi chapel of Santa Maria Novella at Florence, which by their extravagance, carelessness, and bad taste reveal the decline of the great artist. There are three pictures by Filippino in the National Gallery. Died at Florence, 1505.

LIPPI, LORENZO, an Italian painter and poet, was born at Florence in 1606, and died in 1684. He executed many fine pictures for the chapels and convents of his native city. As a poet he is known by a burlesque piece entitled "Malmantile Raquistato," printed at Florence in 1688, 4to, under the name of Periozo Zipoll.

LIPSIUS, JUSTUS, an eminent critic and scholar, born at Overysche, a village of Brabant, in 1547. He studied at Aeth, Cologne, and Louvain; then went to Rome, and became secretary to Cardinal Granvella. On his return to the Netherlands, after a short time spent at Louvain, he visited Vienna, and then accepted a professorship in the university of Jena. He held it but a short time, was afterwards professor of history at Leyden, and finally at Louvain, where he died, in 1606. Lipsius changed his religion several times; and whether as a Catholic, a Lutheran, or a Calvinist, he was for the time equally zealous, and equally bigoted. He wrote many learned treatises, and his works fill 6 folio volumes.

LISLE, SIR GEORGE, a gallant royalist officer during the civil war of the 17th century in England, was a native of London, where his father was a bookseller. He distinguished himself so much by his courage at the battle of Newbury, that Charles I. knighted him on the field. In 1648 he defended Colchester with great bravery; but being at length compelled to surrender the town, he was tried by court-martial and shot by the parliamentary leaders. He submitted to his fate with heroic fortitude.

LIST, FRIEDRICH, a distinguished political economist, was long a member of the Warttemberg parliament, whence he was expelled for the boldness of his opinions. In 1818 he conceived the idea of the "Zollverein" (the Customs Union of the German states, an institution which, after encountering many obstacles, was finally adopted by nearly the whole of Germany), established a journal to support his views, and published several valuable works on political economy. But a series of disappointments preyed upon his mind, and in a fit of insanity he committed suicide, 1846, in the 57th year of his age.

LISTA Y ARAGON, ALBERTO, a celebrated Spanish poet, mathematician, and political and miscellaneous writer, was born at Seville in 1755. He was bred a silkweaver, but at a very early age began to teach mathematics, studied at the university of his native city, and in 1808 was made professor of poetry and rhetoric. Falling under popular suspicion during the Peninsular War, he fled to Spain in 1817. He established a college at Madrid, and had among his pupils several who became eminent men. Political hostility again led him to quit his country, and he

lived for some time at Bayonne and at Paris, visiting England in 1833. He was soon after recalled, and undertook the editorship of the "Madrid Gazette;" was called to the chair of mathematics at Madrid, and died professor of mathematics at Seville in 1848. The poems of Lista first appeared in 1822. His "Treatise on Mathematics" became the standard work of his class. Among his other writings are "Lectures on Spanish Dramatic Literature," "Essays, Literary and Critical," and various political tracts. He was the intimate friend of the writer known in England as Blanco White, and dedicated his poems to him.

LITTON, JOHN, a very popular actor of low comedy, whose natural humour and peculiar drolleries afforded many a rich treat to the playgoers of London, was born in St Anne's parish, Soho, and in the early period of his life was engaged as teacher in a day-school. Forsaking the school-room, and fancying he possessed the necessary qualities for the stage, he formed an acquaintance with, and often exhibited as an amateur performer on the same boards as C. Matthews. Having made several provincial tours, he was at length seen at Newcastle by C. Kemble, who recommended him to Colman, and he appeared in 1805 before a London audience at the Haymarket. He also obtained an engagement at Covent Garden, where he remained, increasing in public favour, till 1823, when Elliston having offered him £40 a week, he transferred his services to Drury Lane, and continued there till 1831; but the enormous salary of £100 a week tempted him to enlist under Madame Vestris at the Olympic Theatre, where he performed six seasons, and may be said to have closed his theatrical career. He died rich, March 22, 1846, aged 69.

LITTON, ROBERT, a surgeon of great celebrity, was born at Ecclesmachan, near Linlithgow, of which parish his father was minister, in 1794. At the termination of his professional studies he fixed his residence in the Scottish metropolis, where he speedily rose to the highest eminence both as a lecturer and operator. In 1834 he was appointed surgeon to the North London Hospital; and he subsequently became professor of clinical surgery in University College, and continued until his death one of the brightest ornaments of that institution. In 1846 he was appointed one of the examiners of the Royal College of Surgeons. His practice had become very extensive, and was steadily increasing; his name was familiar in every medical school throughout the world; a rich harvest of honour and wealth lay before him; but, in the zenith of his manhood and his reputation, he was struck down by sudden death. His chief work was his "Principles of Surgery," the first edition of which appeared in 1833; but his fame, like that of Sir Astley Cooper, rests mainly on his accurate anatomical knowledge, and the extraordinary facility with which he performed the most difficult operations. Died, 1847.

LITHGOW, WILLIAM, traveller, was a native of Scotland, who in the reign of Queen Elizabeth travelled on foot through vari-

ous countries in Europe, Asia, and America, over a distance of more than 36,000 miles; during which he encountered many hardships, and was at length thrown into the prisons of the Inquisition in Spain, and so cruelly tortured as to be deprived of the use of his limbs. On regaining his liberty, and coming to England, he published an account of his adventures, which he presented to James I. He also wrote a narrative of the siege of Breda. Died, 1640.

LITTLE, WILLIAM, an ancient English historian, known also by the name of Guilielmus Neubrigensis, or William of Newbury, was born, it is said, at Bridlington, in Yorkshire, in 1136, and educated at the abbey of Newborough, in the same county. In his advanced years he composed a History of England, in 5 books, from the Norman conquest to 1197, which is esteemed for veracity and purity of language. He sharply criticized the tales of Geoffrey of Monmouth. His Chronicle forms part of Hearne's Collection. He is said to have been living in 1220.

LITTLETON, ADAM, a learned divine, was born at Hales Owen, in Shropshire, in 1627, and educated at Westminster School, from whence he was elected student of Christchurch, Oxford, but was ejected by the parliamentary visitors in 1648. He then became usher to Dr Busby, and in 1658 was appointed under-master. In 1674, being D.D., he obtained the living of Chelsea, and a prebend of Westminster. He was the author of "Elementa Religiosis," a Latin and English Dictionary, several sermons, and other works. Died, 1694.

LITTLETON, or LYTTLETON, THOMAS, a celebrated English judge, and writer on law, was born at Frankley, in Worcestershire. He studied at the Temple, was appointed one of the Judges of the Common Pleas, in 1466, and continued to enjoy the esteem of his sovereign, Edward IV., and the nation, until his death, at an advanced age, in 1481. The memory of Judge Littleton is preserved by his celebrated treatise on "Tenures," which is written in Norman French, and is esteemed the principal authority for the law of real property in England. This work has been commented on by Coke, Sir M. Hale, Lord Chancellor Nottingham, and other eminent lawyers.

LITTLETON, EDWARD, an able English judge, was of the same family as the preceding, and born at Henley, in Shropshire, in 1589. In 1639 he was made chief justice of the Common Pleas, and the year following lord keeper of the great seal, at which time he was created a peer by the title of Lord Littleton. He died at Oxford in 1645.

LIUDPRAND, bishop of Cremona in the 10th century, is distinguished as a diplomatist and historian. He was sent on two embassies to Constantinople; first in 946 by Berengarius, then regent of Italy, and again, in 969, by the Emperor Otho I. to the usurper Phocas. He was also employed by Otho in 962 on a mission to the pope, John XII., and assisted at the council of Rome, at which John was deposed. Liudprand was one of the most learned men of his time, and has left a very amusing narrative of his em-

bassy to the East, besides a history of the Emperor Otho the Great, and a history of Italy between 862—964. Died at Cremona, probably about 970. The works of Liudprand form part of the great series of Pertz, entitled "Monumenta Germaniæ Historica," and have been recently republished in a separate form. They are our chief authority for the period they treat of.

LIVERPOOL, CHARLES JENKINSON, Earl of, eldest son of Colonel Jenkinson, was born in 1727, and was educated at the Charterhouse, and at University College, Oxford. He entered parliament in 1781, and soon took office as under-secretary of state; in 1766 he was made a lord of the admiralty; in 1772, vice-treasurer of Ireland; in 1778, secretary at war; and, in 1784, president of the Board of Trade. He was a great favourite of George III., and was often accused of being one of his secret advisers. In 1786 he was created Baron Hawkesbury; in 1790, earl of Liverpool; and he died in 1808.

LIVERPOOL, ROBERT BANKS JENKINSON, Earl of, prime minister of England, son of the preceding, was born in 1770, and received his education at the same seminaries of learning as his father. On quitting college, he spent some time in foreign travel; was in Paris during the siege of the Bastille, and rendered himself useful at that period to the English government by his communications to Mr Pitt. At the general election in 1790, Mr Jenkinson was returned member for Rye; and, as he wanted twelve months of his majority, before which he could not sit in parliament, he spent that time in acquiring further information respecting continental affairs. His maiden speech in 1792 indicated his future eminence as an orator, and as a member of the cabinet. In 1790, his father being created earl of Liverpool, he became Lord Hawkesbury, and was made a commissioner of Indian affairs. In 1801 he was appointed secretary of state for foreign affairs; which office, four years after, he exchanged for that of the home department. This he resigned on the dissolution of the Addington administration; and, at the death of Mr Pitt, succeeded him as lord warden of the Cinque Ports. In 1807 he was again minister for the home department; and on the death of his father, in the year following, succeeded to the title of earl of Liverpool. At the death of Mr Perceval, in 1812, his lordship was raised to the premiership, and he held that elevated station till 1827, when an apoplectic and paralytic attack rendered him incapable of public business. He died in 1828.

LIVINGSTONE, ROBERT, an eminent American politician, was born at New York, in 1746; in which city he practised the law with great success. He was one of the committee to prepare the Declaration of Independence; was appointed secretary of foreign affairs in 1780; and, throughout the war of the revolution, signalized himself by his zeal and efficiency in the cause. He was afterwards chancellor of the State of New York; and, in 1801, was appointed by President Jefferson, minister plenipotentiary to France, where, during a residence of several years, he was treated with marked atten-

LIVINGSTONE, EDWARD, a distinguished American statesman and the legislator of Louisiana, was born in New York State in 1764. He was a brother of Robert Livingstone, chancery officer of that State, was educated at Princeton College, and was called to the bar in 1785. In 1794 he was elected member of congress, and distinguished himself by his opposition to the Alien and Sedition Bills. He belonged to the party then called Republican and since Democratic. In 1801 he retired from congress, and accepted the two offices of mayor of New York and attorney-general for the district of New York. In consequence of pecuniary difficulties in the latter office, occasioned by his own negligence and the fraud of an agent, he quitted New York in 1804, thus losing his fair prospects of advancements; and having given up his property to the State, settled at New Orleans. He soon took a high place at the bar, served under General Jackson against the English in 1814; and in 1820 became a member of the legislature of Louisiana, and was employed to revise the municipal law. His next task was to draw up a new code of criminal law for the State, the existing laws being a confused mass of French, Spanish, and English. On this code his fame rests. His manuscript was burnt the night it was finished, and he did the work over again, at the cost of two years' labour. In 1829 he became senator of the United States, secretary of state under President Jackson, and in 1833 ambassador to France; when he succeeded in recovering long-delayed compensation for injuries to American commerce during the empire. While at Paris he was chosen Foreign Associate of the Academy of Sciences. Died at his own seat, 1836.

LIVUS, TITUS, or LIVY, the celebrated Roman historian, was born in the territory of Patavium, now Padua (B. C. 59). Few facts are known respecting his life. He probably went early to Rome, and there spent the chief part of his life, enjoying the patronage of the Emperor Augustus, and the friendship of many distinguished men. His reputation was widely spread during his lifetime, and one curious Spaniard was attracted to Rome merely to look at Livy and return. His reputation is built upon his History of Rome from the foundation of the city to the death of Drusus, in 142 books, of which only 35 have been preserved. The rest are partly known to us by means of some elegant epitomes. The first book of this great work was written between the years 29 and 25 B. C., and the composition of the whole occupied probably about 18 years. While Livy charms us by his clear, flowing, and beautiful style, and while we feel that we possess in his annals one of the most valuable relics of ancient literature, modern critical inquiry has made it impossible that we should accept his account of things as true and trustworthy. His patriotic partisanship, his ignorance of practical life, his want of acquaintance with original authorities, and his uncritical habit of mind, are

very serious drawbacks from his character as historian. Livy retired to his native town and died there B. C. 17. An English translation of Livy is included in Bohn's Classical Library.

LORENTE, DON JUAN ANTONIO, a Spanish historian and ecclesiastic, born in 1756. He was secretary-general to the Inquisition, of which court he published a "Critical History." He was also the author of "Memoirs relative to the History of the Spanish Revolution," "Political Portraits of the Popes," and other works. Having accepted a situation under Joseph Buonaparte, and written in his favour, he was compelled to quit Spain on the restoration of Ferdinand VII. in 1814. Died, 1823.

LOYD, DAVID, a biographical writer of the 17th century, was born in Merionethshire, in 1625; was educated at Oxford, became reader at the Charter-house; subsequently obtained a prebend at St Asaph; and died in 1691. His principal works are, "Memoirs of the Statesmen and Favourites of England," "Memoirs of Persons who suffered for their Loyalty," a "Life of General Monk," and a "History of Plots and Conspiracies."

LOYD, HENRY, an eminent military officer and writer on tactics, was born in Wales, in 1729. He served with great reputation in the Austrian, Prussian, and Russian armies, and rose to the rank of general. On his return to England he surveyed the coasts, wrote a memoir on the "Invasion and Defence of Great Britain," "The History of the Seven Years' War," and other military treatises. Died, 1783.

LOYD, WILLIAM, a learned English prelate, was born, in 1627, at Titchhurst, in Berkshire; was educated at Oxford; obtained a prebend in the collegiate church of Ripon, soon after the Restoration; was appointed chaplain to the king in 1666; and collated to a prebend in Salisbury the year following. Other church preferments followed; and, in 1680, he was raised to the bishopric of St Asaph, when he joined Archbishop Sueroff and other prelates in presenting a petition to James II. deprecating his assumed power of suspending the laws against Popery. This led to the imprisonment and trial of the "Seven Bishops," who were, however, at once acquitted. On the revolution taking place, Lloyd was made almoner to King William; was promoted to the see of Lichfield, in 1692; and died, bishop of Worcester, in 1717. His writings, which relate to divinity and history, display much learning and acuteness. Among them are, "A Dissertation upon Daniel's Prophecy of the Seventy Weeks," "An Account of the Life of Pythagoras," "The History of the Government of the Church," &c.

LOBAU, Count, marshal of France, whose family-name was MOUTON, was, at the breaking out of the revolution, employed as a journeyman baker in his native town, Phalsburg, in the Meurthe. But on entering the army he signalized himself by acts of bravery, which were rewarded by promotion, until, in 1804, at the camp of Boulogne, Napoleon, amid the applause of the whole army, made him his aide-de-camp,

and gave him the command of the third regiment of the line. In the campaign of 1805 his gallantry obtained him the rank of general of brigade, and in 1807 that of general of division. In the campaign of 1809 he defended the little island of Lobau (from which he took his subsequent title) against the Austrians, completely beat them off, and took his troops, comparatively unhurt, across the Danube. In 1812 he was made aide-major of the imperial guard; in 1813, commander of the first corps of the grand army; and, in 1814, chevalier of St Louis. During the memorable "Hundred Days" he gave his support to Napoleon, and was made commandant of the first military division, and a member of the Chamber of Peers. In the brief campaign of 1815, he commanded the sixth corps of the army of the north. He gave the Prussians a severe defeat on the 8th of June in that year, but was wounded and sent prisoner to England from that burial-place of his aspiring master's hopes — Waterloo. From that time until 1818 he remained in England; he was then permitted to return home, and in 1828 was chosen deputy for the Meurthe, and took his seat on the opposition benches. In the revolution of July, 1830 he took an active part; and when Lafayette resigned the command of the national guard, Count Lobau was appointed his successor. Shortly afterwards he received his marshal's baton from Louis Philippe, by whom he was greatly respected. Born, 1770; died, 1839.

LOBEIRA, VASCO, author of the celebrated romance of chivalry entitled "Amadis de Gaul," was a native of Porto, in Portugal, and lived in the 14th century. In 1386 he was knighted by John I. on the field of battle at Aljubarotta; and he died at Elvas, in 1403. Dr Southey translated Lobeira's work, and has satisfactorily proved it to be an original, and not a translation from the French, as many had before imagined.

LOBEL, MATTHEW, physician and botanist, was a native of Flanders. He was born about 1538, studied medicine at Montpellier, and after extensive European travels came to England, and was appointed physician to the king, James I. He was author of several botanical works, and is distinguished as the first who gave the hint of classification of plants in their natural orders. His works are "Stirpium Adversaria Nova," which was dedicated to Queen Elizabeth, in 1570; "Plantarum seu Stirpium Historia," and "Icones Stirpium," the latter with an index in seven languages. Died at Highgate, 1616.

LOBO, JEROME, a Portuguese Jesuit, was born at Lisbon, in 1593. He went as a missionary to India, and thence, in 1624, to Abyssinia, and, on his return to Europe, became rector of the college of Coimbra, where he died in 1678. He wrote a "History of Ethiopia," of which Dr Johnson published a translation.

LOCK, MATTHEW, an eminent English musician, was born at Exeter, where he became a chorister in the cathedral. He published some musical pieces in 1637, and, after the Restoration, he was employed as a composer of operas. He was also appointed composer to the chapel royal, and has ac-

quired considerable reputation by his beautiful music to Macbeth. Died, 1677.

LOCKE, JOHN, one of the most eminent philosophers of modern times, was born at Wrington, in Somersetshire, in 1632. He was educated at Westminster School, and Christchurch College, Oxford, where he distinguished himself by his general proficiency; and finally applied to the study of medicine. In the year 1666 he was introduced to Lord Ashley, afterwards the celebrated earl of Shaftesbury, to whom he became serviceable in his medical capacity, and who formed a high opinion of his general ability, and introduced him to the duke of Buckingham, the earl of Halifax, and other distinguished men. He also confided to him the superintendance of his son's education; and when, in 1672, Lord Shaftesbury was appointed lord chancellor, he made Locke secretary of presentations, and, at a later period, secretary to the Board of Trade. On his patron retiring to Holland, to avoid a state prosecution, Locke accompanied him, and remained there several years. So obnoxious was he to James's government, that the English envoy demanded Mr Locke of the States, on suspicion of his being concerned in Mornmouth's rebellion, which necessitated his temporary concealment. At the revolution he returned to England, and was made a commissioner of appeals, and in 1695 a commissioner of trade and plantations. He resided the last few years of his life with his friends, the Mashams, at Oates, in Essex, and there he died, 28th October, 1704. As philosopher, Locke stands at the head of what is called the Sensational School, in England. His great work is the "Essay on the Human Understanding," in which he endeavours to show that all our ideas are derived from experience, that is, through the senses, and reflection on what they reveal to us. He also investigates the general character of ideas, the association of ideas, the reality, limits, and uses of knowledge, the influence of language, and the abuses to which it is liable. This Essay was first published in 1690, and became immediately popular. It passed through numerous editions in rapid succession, and was translated into French and Latin. Whatever may be thought of Locke's theories, his Essay has a solid and permanent worth, and will not cease to attract and charm inquirers and lovers of truth. His other works are the "Treatise on Civil Government," "Letters on Toleration," "On the Conduct of the Understanding," "Vindication of the Reasonableness of Christianity," &c. The grave of Locke, in the parish of High Laver, in which the mansion of Oates is, after long lying neglected and in decay, was repaired and restored in 1865. Among the eminent men who contributed to the cost of this general tribute to his memory were Victor Cousin and Barthélemy St-Hilaire. The portrait of Locke, by Brownover, is now in the National Portrait Gallery. His Life, by Lord King, was published in 1829.

LOCKE, JOSEPH, civil engineer, was born at Attercliffe, near Sheffield, in 1805. At the age of 18, he was apprenticed to the great engineer, George Stephenson, whom

he substituted of the way, consequently separate tion Line led to his lines, both continent Legion o House of chosen F president cineers.

he subsequently assisted in the construction of the Manchester and Liverpool railway, completed in 1830. Mr Locke's first separate undertaking was the Grand Junction Line; his skill and economy in which led to his being engaged in many other new lines, both in Great Britain and on the continent. He was made a member of the Legion of Honour in 1845; entered the House of Commons two years later; was chosen F.R.S., and held the office of vice-president of the Institution of Civil Engineers. Died, 18th September, 1860. Since his death an estate at Barnsley, now called "Locke Park," has been given to the inhabitants of that town as a place of public recreation, by his widow; and a statue of Mr Locke has been erected in the park (Jan. 1866). His Life has been written by Joseph Derry.

LOCKHART, JOHN GIBSON, whose name as editor of the "Quarterly Review," as author of successful works of various kinds, and as son-in-law of Sir Walter Scott, will always be connected with the literary history of this country, was born in 1793, his father being the Rev. Dr John Lockhart, the minister of the parish of Cambusnethan, and afterwards of the College Church, Glasgow. From Glasgow University, where he studied for three years, he was enabled, by the acquisition of one of the Snell Bursaries, to proceed to Balliol College, Oxford, and at both of these seats of academical learning he considerably distinguished himself as a student. On concluding his college course he settled in Edinburgh, and studied for the bar, to which he was called in 1816. The legal profession, however, had few attractions for him. On the establishment of "Blackwood's Magazine" in 1817, he became one of its principal contributors, and was understood to be the author of some of the most severe and unsparing articles and criticisms in that periodical. Between this time and the year 1825, when he went to London as editor of the "Quarterly," Mr Lockhart published the four novels through which his name is still counted among our modern romancists, "Valerius," "Adam Blair," "Reginald Dalton," and "Matthew Wald;" his biographies of Burns and Napoleon; his "Peter's Letters to his Kinsfolk;" and his admirable translation of the "Spanish Ballads." He married Sir Walter Scott's eldest daughter in 1820, and on Sir Walter's death in 1832 was left his sole literary executor, the result of which trust was his well-known Life of Scott, in nine volumes, completed in 1839, and since revised and published in an abridged form in two volumes. In 1843, he was appointed auditor of the Duchy of Lancaster, with a salary of £400 a-year. In 1853, after having been editor of the "Quarterly Review" for nearly thirty years, he went to Italy in search of health; but he soon returned with little or no improvement, and Mr Lockhart was well loved by those that knew him best; but the sharpness of his pen, his proneness to personalities, and a certain want of generosity in controversy, gained him little esteem among his opponents, and alienated not a few who were naturally and

had been actually his friends. But his faults, which were more conspicuous than great, were redeemed by his many good moral qualities; and none will deny that he was endowed with an acuteness and vigour of intellect that entitled him to the first rank among the critics of his age.

LODGE, EDMUND, Clarendon-king-at-arms, K. H., and F. S. A., author of the well-known "Portraits of Illustrious Personages of Great Britain," was in early life a cornet of dragoons. He also published several other works, "Illustrations of British History," the "Life of Sir Julius Caesar," &c., &c., besides some elaborate and erudite papers in the Quarterly Review. Born, 1756; died, 1830.

LODGE, THOMAS, an English dramatist and miscellaneous writer, who died in 1625. He wrote "The Wounds of Civil War," a tragedy; "Looking-glass for London and England," a tragi-comedy, and "Rosalynde," a novel. He also assisted Robert Greene in writing some of his works.

LOFFT, CAPEL, barrister, and miscellaneous writer, was born in London in 1751. He was educated at Eton and Cambridge, and was called to the bar in 1773. On succeeding to the Capel estates, in 1781, he removed to Troston, in Suffolk, and became an active magistrate of the county till 1800; when, for having too zealously exerted himself as under-sheriff to delay the execution of a young woman who had received sentence of death, he was removed from the commission. Mr Lofft was a contributor to most of the magazines of the day; he was the friend of Henry Kirke White; and it was to his active patronage that the public was indebted for the publication of the "Farmer's Boy," and other poems of Robert Bloomfield. Died, 1824.

LOGAN, JOHN, a Scottish poet and prose writer, was born in 1748. Having studied for the church, his eloquence and ability procured for him the living of South Leith, in 1773. But his conduct having rendered him unpopular with his parishioners, he resigned his charge; and he then proceeded to London, where he became connected with the press; and, among other productions, wrote a pamphlet, entitled "A Review of the principal Charges against Mr Warren Hastings," which led to the prosecution of the publisher, Mr Stoekdale, who, however, was acquitted. Logan's poems, usually printed with those of Michael Bruce, whose merits he was the first to make known, are chiefly lyrical; but he also wrote "Runnymede," a tragedy; and "Elements of the Philosophy of History," under the pseudonym of Rutherford; besides a volume of sermons, published posthumously, which enjoyed great popularity. Died, 1788.

LOGGAN, DAVID, an eminent designer and engraver of the 17th century, was a native of Prussia. He was born at Dantzic about 1630, became a pupil of Simon Passa, and of Hondius, and after spending some years in Holland, settled in England. He drew and engraved a large number of portraits of the most distinguished persons of the time, and also executed sets of prints of the colleges of Oxford and Cambridge, and

of the academical dresses of Oxford. Died at London, 1693.

LOKMAN, surnamed **AL-HAKIM**, or **THE WISE**, an eastern philosopher and fabulist, who by some is supposed to have been an Abyssinian, and by others an Arabian, is said to have been contemporary with David, and to have embraced the Jewish faith; but neither the age in which he lived, nor the country which gave him birth, are known. His fables were published at Leyden, by Erpenius, in Arabic and Latin, in 1616.

LOMBARD, PETER, designated "Magister Sententiarum," a distinguished scholastic philosopher, was born of poor parents near Novara in Lombardy. He studied at Bologna, Rheims, and Paris, was created doctor of theology, and in 1159 became bishop of Paris. His principal work is the "Libri Sententiarum," a compilation from the works of the fathers, so methodically and effectively arranged that it became and continued for centuries a standard authority in the schools. Hundreds of commentaries were written upon it, and it was prized as an armoury for theological warfare. The Lombard was one of the most illustrious disciples of Abelard. Died, 1164.

LOMBARDI, ALFONSO, Italian sculptor, was born at Ferrara in 1487. He was a pupil of Nicolo da Puglia, and early showed great skill in the execution of portraits in wax and in terra-cotta. He was introduced by Titian to the Emperor Charles V., and was charged with the erection of a monument to Pope Clement VII.; but Bandinelli was afterwards preferred to him, and chagrin is said to have hastened his end. Died, 1536.

LOMENIE DE BRIENNE, ETIENNE CHARLES, cardinal, archbishop of Toulouse, and afterwards of Sens, and first minister of Louis XVI., was born at Paris in 1727, and was educated at the Sorbonne, where he received his doctor's degree in 1752. He was appointed bishop of Condom; archbishop of Toulouse in 1763, and in 1770 was received at the French Academy. He was in great reputation as a clever administrator and man of business, and was on good terms with the daring thinkers, the "philosophes" of the day. He was a member of the famous Convocation of the Notables held under the administration of Calonne, in February, 1787, and on the disgrace and dismissal of the latter, a few months later, Loménie was appointed controller of finance and first minister. His life-long ambition was satisfied, but he soon showed his entire incapacity to deal with the huge difficulties of his high position. After getting several edicts of a soothing kind passed, he attempted to get a stamp-tax registered, and the parliament of Paris resolutely refusing to register, he arrested the members, above a hundred, and exiled them to Troyes, in Champagne. After a month terms were made, and they returned to Paris. Loménie then conceived the scheme of a plenary court and minor courts to take the place of the rebellious parliament of Paris, but the scheme was discovered and frustrated. He next arrested, by "lettres de cachet," two of the members, D'Espréménil and Gœslard, and had them

carried far away to the south of France, and the whole parliament turned out of their hall in the palace of justice. But it did not help; and the minister, bewildered, sick, and daily more odious to the people, was compelled, in August, 1788, to retire and make room for Necker. Rich gifts and places consoled him in his fall, and he was made cardinal. He retired to Brienne, thence to Italy; returned to Brienne, was arrested and released in 1793, and, in the next year, was again arrested in his palace of Sens by Jacobin officers, and so shamefully treated that he was found dead in his bed, 17th February, 1794. A few days after Loménie's dismissal his effigy was burnt, after a mock trial, on the Pont-Neuf, Paris.

LOMONOZOF, MICHAEL WASILOVITZ, a Russian poet and historian of the last century, was born in 1711. He was the son of a fishmonger, and having fled from his father, he took refuge in a monastery, where he received his education, which he afterwards completed at a German university. In 1741 he returned to his native country, and became member of the Academy of Petersburg, and professor of chemistry. In 1764 he was made a counsellor of state, and died in the course of the same year. His Odes excited great admiration, and he has been justly called the father of Russian lyrical poetry. He also wrote numerous works in prose, particularly a "History of the Empire of Russia," and a grammar of the Russian language.

LONDONDERRY, CHARLES WILLIAM VANE, Marquis of, son of Robert, first marquis of Londonderry, and brother of the celebrated Viscount Castlereagh, was born at Dublin in 1778. When little more than fourteen years of age, he entered the army as an ensign in the 108th foot, accompanied the earl of Moira in his expedition to Holland in 1794, was attached to Colonel Crawford's mission to the Austrian armies from 1795 to 1797, and was severely wounded at the battle of Donauwerth. On his return home he was appointed aide-de-camp to his uncle, Earl Camden, then lord-lieutenant of Ireland; and after rising through the various grades of his profession, he joined Sir John Moore in the Peninsula, as brigadier-general, gallantly distinguished himself in the field; and he subsequently held the post of adjutant-general to the army under Sir Arthur Wellesley from 1809 to 1813. During the pursuit of Marshal Soult's army across the Douro, he led two squadrons of the 16th and 20th dragoons, which charged the enemy most gallantly, and took many prisoners; and on many other occasions his name was most honourably mentioned, particularly in the affair at El Bodon. For these services he received the thanks of the House of Commons, and was created a knight of the Bath and various foreign orders. In 1813 he went to Berlin as ambassador; and during the summer he acted as military commissioner to the armies of the allied sovereigns, and was especially charged with the supervision of Bernadotte, the Swedish king, who had armed his troops by the help of subsidies from England, and was at that time wavering in his allegiance. Next year

he was raised to the rank of Baron Stearns, and sent to Austria at the close of the year 1815. In his Irish year he was sent to Seaham in the name of a peer, with a view to his seeing the Duke of Devonshire, but he was previously dismissed. Besides attending to the great emergency of the war, he was through his works with the Duke of Devonshire, a Tory party, but he was his exertions in Napoleon's Ham, and a fortune's wife, president of the liberation of the favourable interests. In of the 2nd, he succeeded the had borne the attachment, in Londonderry. Among his Steam Vessels of the Peninsula through man North of England literature was responded to Londonderry. Marquis of, as Lord Camden, and born in Armagh and having on his return to parliament. the first place, he took his seat in 1797, having for Ireland, the lords of the was nominated tenant, and, his great opposition, the greatly facilitated secret but, on the until the dissolution of the situation in until the illness, led to succeeded the

he was raised to the peerage by the title of Baron Stewart, was appointed ambassador to Austria, and one of the plenipotentiaries at the congress of Vienna in 1814 and 1815. In 1822 he succeeded his brother in his Irish Marquisate; and the following year he was made Earl Vane and Viscount Seaham in the peerage of the United Kingdom, with special remainder to his children by his second wife, in right of whom he had previously assumed the name of Vane. Besides attending regularly to his parliamentary duties, Lord Londonderry displayed great energy in developing the resources of the vast possessions which he had inherited through his wife; and among other grand works with which his name will be connected, was the construction of Seaham Harbour,—a private enterprise almost unprecedented in its magnitude and importance. In politics he was always attached to the Tory party, and consequently unpopular; but he was a man of generous impulses, and his exertions to mitigate the rigour of Louis Napoleon's imprisonment in the fortress of Ham, and subsequently, when the change in fortune's wheel had made him prince-president of France, to obtain from him the liberation of Abd-el-Kader, gained him the favourable regard even of his political opponents. In 1843 he obtained the command of the 2d life-guards; and in 1853 he succeeded the duke of Wellington, to whom he had borne through life a strong personal attachment, in the insignia of the Garter. Lord Londonderry was also known as an author. Among his works may be enumerated "A Steam Voyage to Constantinople;" "Story of the Peninsular War" (which has gone through many editions); "A Tour in the North of Europe;" and his last service to literature was his publication of the Correspondence of his brother, the second marquis of Londonderry, K.G. Died, 1854.

LONDONDERRY, ROBERT STEWART, Marquis of, who for many years was known as LORD CASTLEREAGH, was a native of Ireland, and born in 1769. He was educated at Armagh and St John's College, Cambridge; and having made the tour of Europe, was, on his return, chosen a member of the Irish parliament. He joined the opposition in the first place, and declared himself an advocate for parliamentary reform; but, on obtaining a seat in the British parliament, he took his station on the ministerial benches. In 1797, having then become Lord Castlereagh, he was made keeper of the privy seal for Ireland, and soon after appointed one of the lords of the treasury. The next year he was nominated secretary to the lord-lieutenant, and, by his strenuous exertions and his great ability in the art of removing opposition, the union with Ireland was greatly facilitated. In 1805 he was appointed secretary of war and the colonies; but, on the death of Mr Pitt, he retired, until the dissolution of the brief administration of 1806 restored him to the same situation in 1807; and he held his office until the ill-fated expedition to Walcheren, and his duel with his colleague, Mr Canning, led to his resignation. In 1812 he succeeded the Marquis Wellesley as foreign

secretary (which office he held till his decease), and the following year proceeded to the continent, to assist in negotiating a general peace. In 1814 he was plenipotentiary extraordinary at the peace of Paris, and, towards the close of the same year, at the congress of Vienna. For these services he received the thanks of parliament, and was honoured with the order of the Garter. On the death of his father, in 1821, he succeeded to the title of marquis of Londonderry; but he did not long enjoy it, for in a fit of insanity, brought on by excessive mental and bodily exertion in attending to his public duties, he put an end to his existence by severing the carotid artery with a penknife. This event took place on the 12th of August, 1822; and, on the 20th, his remains were interred in Westminster Abbey.

LONG, EDWARD, an English historian, was born in 1734, at St Malze, Cornwall. He was brought up to the law, and became judge of the vice-admiralty court in Jamaica, where his father possessed estates, and of which island his brother-in-law, Sir Henry Moore, was lieutenant-governor. Being obliged to return to England for the restoration of his health, in 1769, he devoted his time to literary pursuits, and wrote a "History of Jamaica," 3 vols.; "Letters on the Colonies," &c. Died, 1813.

LONG, ROGER, an English divine, eminent as an astronomer and a mathematician, was born in 1679, in Norfolk; was educated at Pembroke Hall, Cambridge, of which college he became master in 1733; was chosen Lowndes' professor of astronomy; held livings in Huntingdonshire and Essex, and died in 1770. Dr Long was the author of a valuable "Treatise on Astronomy," and constructed, at Pembroke Hall, a hollow sphere, 18 feet in diameter, on the interior surface of which were represented the stars, constellations, &c., the whole being moved by means of machinery.

LONG, ST JOHN, was born at Newcastle, in Limerick, in 1798. The name of his father was John Long, whose vocations were no less numerous than those of Caleb Quotem himself. John inherited the genius of his sire, and was considered a prodigy in painting, glazing, and basket-making; and a certain lady, pleased with his attempts at drawing, had a subscription raised for him and sent him to Dublin for two years; during which period he attended the school of painting attached to the Dublin Society. Having made some progress in the art, he returned to Limerick, started as drawing-master, and adopting the maiden name of his mother (St John), he set out, in 1822, to seek his fortune in London with some of his own pictures, a light purse, and a good share of confidence. His genius as a painter was, however, not so highly appreciated in London as he had expected; and he resolved to turn doctor. He proclaimed his competency to cure consumption, rheumatism, and all other diseases. He made his professional début in Howland Street. Here business increased so rapidly, that in the following year he was settled in Harley Street, Cavendish Square, in an elegantly-

furnished house, with servants in attendance to usher in his patients, who were not only numerous, but of the highest rank. After two years a temporary check was given to his success, in consequence of a young lady having died through the effects of his nostrums, for which he was tried, and found guilty of manslaughter. In the following year, 1831, another lady died under the same mode of treatment, and he was again tried, but acquitted. On the first of these trials, no less than 63 of his patients, who were all persons of rank and wealth, appeared in his favour! He died, July 2, 1834.

LONGHI, GIUSEPPE, a distinguished Italian engraver, was born in 1766. He was a pupil of Vangelisti, professor of engraving at Milan, and also studied at Rome. He acquired a very high reputation both as a designer and engraver, was appointed professor at the Academy of the Brera, Milan, and was chosen member of the Institute of France, and of the Academies of Berlin, Vienna, &c. Among the principal works engraved by him are Raphael's Marriage of the Virgin, Vision of Ezekiel, and a Holy Family; a Magdalene by Correggio, some of Rembrandt's works for the "Musée Français," and Michael Angelo's Last Judgment. Longhi wrote a treatise on engraving and some minor works. Died at Florence, 1831.

LONGINUS, DIONYSIUS, a celebrated Greek critic and philosopher of the third century; but whether born at Athens, or in Syria, is uncertain. In his youth he travelled for improvement to Rome, Athens, and Alexandria, and attended all the eminent masters in eloquence and philosophy. At length he settled at Athens, where he taught philosophy, and where he also published his inimitable "Treatise on the Sublime." His knowledge was so extensive, that he was called "the living library;" and his fame having reached the ears of the celebrated Zenobia, queen of Palmyra, she invited him to her court, intrusted to him the education of her two sons, and took his advice on political affairs. But this distinction proved fatal to him; for, after the surrender of Palmyra, Aurelian basely put him to death, for having advised Zenobia to resist the Romans, and for being the real author of the spirited letter which the queen addressed to the Roman monarch. His death took place in 273. He met his fate with calmness and fortitude, saying to his friends "The world is but a prison; happy therefore is he who gets soonest out of it, and gains his liberty."

LONGLAND, or LANGELANDE, ROBERT, an old English poet, was born in Shropshire. He was a fellow of Oriol College, Oxford, and a secular priest, but espoused the doctrines of Wickliffe. He is believed to have been the author of the "Vision of Piers Plowman," a curious poem, containing severe reflections on the clergy, and exhibiting a curious picture of the times. Longland lived in the 14th century. The most recent edition of "Piers Plowman" is that of Mr Thomas Wright, F.S.A.

LONGMAN, THOMAS NORTON, known for

nearly half a century as the head of the eminent and long-established publishing firm of Messrs Longman and Co., of Paternoster Row, was born in the year 1770. In him were united strict business habits with that enterprising spirit, which happily combines prudence and foresight with honour and liberality. The every-day routine of regular trade, although requiring the patient exercise of the intellect, has nothing in it of startling incident, or personal adventure, wherewith to furnish the more attractive materials for biography; but in conducting important commercial pursuits with credit and advantage, the union of several valuable qualities is requisite, and these Mr Longman possessed in no ordinary degree. In transacting business he was prompt and decided; in his intercourse with friends, courteous and agreeable; on all occasions proving, that in a well-regulated mind the habits of trade tend neither to circumscribe the sphere of action, nor to counteract the natural tendencies of a benevolent disposition. Mr Longman had for many years been accustomed to ride on horseback from his residence at Hampstead to the city; and on the 28th of August, 1842, when on his way home, his horse having stumbled, he was thrown on his head, and received such severe injury, that he expired shortly after the occurrence of the accident. His personal friends being desirous "to record their deep sense of the many excellencies that distinguished his private character, and of the advantages conferred on literature by his ability, integrity, and enterprise," erected a monument to his memory in Hampstead church.

LONGOMONTANUS, CHRISTIAN, a celebrated astronomer, was born in 1562, at Langsberg, in Jutland, and was obliged to earn his bread by hard labour, having been left an orphan in his eighth year; notwithstanding which he studied hard, and with the assistance of the minister of the parish, acquired a good knowledge of the mathematics. At last he became a servitor in the college of Wibourg; the professors of which university recommended him to Tycho Brahe, whom he assisted in his astronomical researches, and with whom he lived 11 years. In 1605 he was made professor of mathematics at Copenhagen, where he died in 1647. He was the author of several works, of which one of the principal is his "Astronomia Danica."

LONGUERUE, LOUIS DUFOUR DE, an eminent scholar, was a native of Charleville, in France, and born in 1652. He was a child of such precocious talent, that before he had attained his fifth year, he attracted the notice of Louis XIV. As he grew up, his application and perseverance in literary pursuits were quite in character with his early proficiency, and he became one of the most profound orientalists of the age. His chief works are, "Annals of the Arsacides," an "Historical and Geographical Description of Ancient and Modern France," and "A Dissertation on Tatian," written in Latin. Died, 1733.

LOPE DE VEGA. [VEGA.]

LOPES or LOPEZ, FERNAO, a celebrated early Portuguese historian, born about 1380. He was attached to the royal household, and was named by John I. keeper of the archives in 1418. He subsequently received a pension, and was employed to write chronicles of the kings of Portugal; a task to which he gave himself with ardour, collecting written records, and travelling to gather additional information. Lopes is highly esteemed not only for his accuracy, but for his excellent style and the graphic power with which he paints the events and manners of the times. He died about 1449, having retired from his office several years previously.

LORENZETTI, PIETRO and AMBROGIO, brothers, distinguished Italian painters of the 14th century, the dates of whose births and deaths are unknown. Pietro is first mentioned as a painter at Sienna, in 1305; Ambrogio, not till 1324. They often worked together, were distinguished for a grand and manly style, and of all the Siennese school most nearly approached the standard of Giotto. Many of their works have perished or are seriously injured. Among the best works of Pietro are, an altarpiece in the church of San Ansano, Sienna, painted 1329; a "Nativity," 1342; the altarpiece in the Pieve of Arezzo, still in pretty good preservation; and a series of frescos in the church of San Francisco, Assisi. Among the works of Ambrogio are, frescos in the church of San Francisco of Sienna, of which only fragments remain; and three large frescos in the palace of Sienna, executed 1337-39; the first an allegory of peace, the second and third of good and bad government. The first is in good preservation. It appears probable that both the brothers may have died of the plague in the year 1348.

LORENZO DE MEDICI. [MEDICI.]

LORRAINE, Cardinal of. [GUISE.]

LORRAINE, CHARLES of. [MAYENNE.]

LORRAINE, ROBERT LE, an eminent French sculptor, was born at Paris, in 1665; studied under Girardon, and afterwards in Italy; and on his return, in 1701, produced the most beautiful of his works, the "Galeata," which at once procured his admission into the society of which he eventually became the president. Died, 1743.

LORRIS, GUILLAUME DE, a French poet of the 12th century, was born at Lorris, near Montargis; and was the first author of the "Romance of the Rose," a composition in part imitating Ovid's Art of Love, and which during the Middle Ages had a great influence on the literature of France and England. He died young, and left his work unfinished; but it was completed, about forty years later, by Jean de Meung.

LOUDON, JANE WEBB, well known as the authoress of many beautiful and popular works on botany and floriculture, was the daughter of Thomas Webb, Esq., of Kitwell House, near Birmingham, and was born in 1800. At the time of his death Mr Webb's property was so deeply involved that his daughter found herself entirely dependent on her own exertions for support. In 1828

she came up to London and wrote "The Mummy," a remarkable work of fiction, which passed through several editions, and not only secured the young authoress a name, but by various scientific improvements mentioned in it as having taken place in the year 2126 (the period in which the story was laid) attracted the attention of the well-known botanist, Mr Loudon, and led to an acquaintance which ended in their marriage. During the first years of her married life, Mrs Loudon assisted her husband in his various publications, but wrote but little on her own account: when, however, the whole profit of her husband's publications was absorbed in paying the debt of the "Arboretum et Fruticetum Britannicum," a most expensive work, which he had published on his own account, Mrs Loudon once more put forth her energy and talents, and for many years supported her own family entirely by her own writings. Her works were chiefly on botanical subjects, of which "The Ladies' Flower-Garden" in six quarto volumes, "The Amateur Gardener's Calendar," "The Ladies' Country Companion," "Botany for Ladies," "Gardening for Ladies," "British Wild Flowers," and "The Ladies' Companion to the Flower Garden," were the principal. Died, 1858.

LOUDON, JOHN CLAUDIUS, long known as a distinguished writer on horticultural subjects, was born at Cambuslang, in Lanarkshire, in 1783, and brought up as a landscape gardener. Coming to England in 1803, with numerous letters of introduction to some of the first landed proprietors in the kingdom, and displaying considerable taste as well as industry, he obtained much lucrative employment, and afterwards took a large farm at Tew, in Oxfordshire, where he greatly improved his circumstances. In the years 1813, 1814, 1815, he made the tour of northern Europe, traversing Sweden, Russia, Poland, and Austria; and as it was undertaken just after the close of the French disasters in their retreat from Moscow, many of the incidents he met with created no common interest in the mind of so intelligent and observing a traveller. In 1819 he travelled through Italy; and, in 1828, through France and Germany. But though Mr Loudon occasionally gratified his inclination for foreign travel, his literary labours were during nearly 40 years almost unceasing. "No man," says one of his biographers, "has ever written so much, under such adverse circumstances, as Mr Loudon. Many years ago, when he first came to England (in 1803), he had a severe attack of inflammatory rheumatism, which disabled him for two years, and ended in an ankylosed knee and a contracted left arm. In the year 1820, whilst compiling the "Encyclopedia of Gardening," he had another severe attack of rheumatism; and the following year, being recommended to go to Brighton to get shampooed in Mahomet's baths, his right arm was there broken near the shoulder, and it never properly united. Notwithstanding this, he continued to write with his right hand till 1825, when the arm was broken a second time, and he was then obliged to have it amputated, but not before a general breaking up of the frame had coun-

menced, and the thumb and two fingers of the left hand had been rendered useless. He afterwards suffered frequently from ill-health, till his constitution was finally undermined by the anxiety attending on that most costly and laborious of all his works—the "Arboretum Britannicum." His works were both important and numerous; among the principal were the "Arboretum Britannicum," the "Encyclopædia of Agriculture," the "Encyclopædia of Gardening," "Hints on the Formation of Gardens," the "Encyclopædia of Cottage, Farm, and Villa Architecture," the "Suburban Horticulturist," and the "Encyclopædia of Trees and Shrubs," besides which he latterly edited the Gardener's and Agricultural Magazines, and contributed to other publications. Died, Dec. 14, 1843.

LOUGHBOROUGH, Lord. [ROSSLYN, Earl of.]

LOUIS VII., called **LE JEUNE,** king of France, was son of Louis VI., and was born in 1120. He succeeded his father in 1137, having the same year married Eleanor, heiress of William, duke of Aquitaine. A quarrel with Pope Innocent II. in 1142 brought an interdict on his kingdom, and led to a war with Thibaut, count of Champagne. Louis took and pillaged Vitri, and burnt a church in which 1300 persons had taken refuge; and for this sacrilege he resolved, by the advice of St Bernard, but against the counsel of his able minister, the abbé Suger, to go to the Holy Land. He received the cross at the hands of St Bernard, at Vezelai, in 1146, and the next year set out at the head of a large host, his queen accompanying him. Well received by Mannel, emperor of the East, he lost a large part of his forces before he reached Antioch, in March, 1148. He joined the Emperor Conrad at Jerusalem, and with him began the siege of Damascus; but failing in this, he returned to France, end of 1149. He divorced his Queen Eleanor in 1153, for her licentious conduct in the East, and the next year married Constance of Castile. He married, for his third wife, Alice, daughter of the count of Champagne, in 1160. Eleanor married, immediately after her divorce, Henry, duke of Normandy, afterwards Henry II. of England, who thus became possessed of Guienne, the Limousin, and Poitou, the three fairest provinces of France. In 1164 Louis received the fugitive Becket, and resolutely protected him. Later he also received the sons of Henry II., and encouraged them in their revolt against their father. A war between England and France followed, which lasted several years. In 1179 Louis visited the tomb of Becket to pray for the restoration of his son Philip, then dangerously ill. Died at Paris, 1180.

LOUIS VIII., THE LION, king of France, was born in 1187. He was son of Philip Augustus and his queen, Isabella of Hainault. In 1216 he accepted the call of the barons of England, provoked to revolt by the tyranny and treachery of King John, and, though prohibited by the papal legate, sent them aid, and soon after landed in England himself. He took Rochester and Winchester, besieged Dover unsuccessfully, and received the homage of the barons at Lon-

don; but, after the death of John, was abandoned by most of his adherents, and was excommunicated by the legate; his troops were defeated by the earl of Pembroke at "The Fair" of Lincoln; and Louis, besieged in London, made terms with Pembroke, and withdrew to France in September, 1217. He succeeded his father in 1223, and in the following year recovered most of the English possessions in France, in spite of papal excommunications. In 1226 he undertook a crusade against Raymond, count of Toulouse, and the Albigenes; took Avignon after a three months' siege; overran Languedoc; and died in Auvergne, November of the same year. Louis VIII. had married, in 1200, Blanche of Castile, by whom he had seven sons and one daughter.

LOUIS IX., or **ST LOUIS,** king of France, was born in 1214, and succeeded his father, Louis VIII., in 1226. Being then only in his 12th year, he was placed under the guardianship of his mother, Blanche of Castile, who was made regent of the kingdom. He was declared of age in 1236. A severe struggle was going on between the crown and some of the great feudal nobles, in which the latter were assisted by Henry III. of England. In 1243 Louis defeated the English in several engagements, and a truce for five years was concluded. Having made a vow, in the event of recovering from a dangerous disease, to march against the infidels in the Holy Land, he made preparations for doing so, and, in 1248, embarked at Aigues-Mortes, with an army of 50,000 men, accompanied by his queen, his brothers, and almost all the chivalry of France. The particulars of his disastrous campaign, which led to his surrender, and that of the remains of his army, cannot be recorded here: but we may remark, that a greater union of fortitude, punctilious honour, humanity, and personal bravery, has seldom been witnessed in the conduct of a prince than was displayed by Louis throughout this expedition. The town of Damietta, which had been taken by the French, was demanded as the price of the monarch's freedom, and a vast ransom was also claimed for his followers. These terms being fulfilled, Louis embarked with about 6000 men, the sole remains of his fine army, for Acre, and spent four years more in Palestine. On his return to France, he applied to the government of his kingdom with exemplary diligence, and ruled with impartiality and moderation. Notwithstanding the disasters of his crusade, he undertook a new one, the object of which was the conquest both of Egypt and Palestine. Tunis, however, was the first point of attack; but while engaged at the siege of that place, a pestilence broke out among the French troops; and, after seeing one of his sons, and a great part of its victims, August 24, 1270. Louis was canonized by Boniface VIII. in 1297, and his life was written by his friend, the sire de Joinville.

LOUIS XI., king of France, was the son of Charles VII., and born at Bourges, in 1423. Active, bold, and cunning, he was in all respects unlike his well-disposed but imbecile father, of whose ministers and mistress,

Agnes Sorel, he soon showed himself a de-
cided enemy. In 1440 he left the court,
and put himself at the head of an insurrec-
tion. Charles defeated the rebels, and exe-
cuted some, but pardoned his son, whom he
even trusted with a command against the
English and Swiss. Louis conducted him-
self with valour and prudence, and his father
became entirely reconciled to him; but hav-
ing soon entered into new conspiracies, he
was obliged to take refuge first in Dauphiny
and afterwards in Burgundy, and lived there
five years in a dependent condition. On the
death of his father, in 1461, he dismissed the
former ministers, and filled their places with
obscure men without character or talents to
recommend them. Insurrections broke out
in various parts of his dominions; but they
were soon quelled, and followed by many
executions. In everything he did, his
crooked policy and sinister views were evi-
dent. Whilst he pretended to reconcile con-
tending parties, he secretly instigated them
against each other; and when he had a ne-
gotiation with a foreign prince, he corrupted
his courtiers by bribes, and established secret
correspondences with them. He became in-
volved in a war with Charles the Bold, duke
of Burgundy, which lasted from 1465 to 1472.
In the course of the war Louis, having re-
quested a passport from the duke, went to
visit him at Peronne, though he had just be-
fore secretly instigated the people of Liège
to rise, and promised them aid. Charles
having discovered this act of treachery, was
furious with rage, and incited three days
(during which he kept the king in prison) as
to what course he should adopt. Nothing but
the aversion of Charles to take the life of a
king, and the greatest persistency in false-
hood on the part of the latter, who asserted
his innocence under the most solemn oaths,
saved him. He was obliged to accompany
Charles to Liège, and to witness the pillage
and slaughter of which he had been the
cause. A peace was concluded on favour-
able terms for Charles and his allies; but
when Louis returned to Paris, he used every
artifice to evade its fulfilment. He died in
1483. The great object of Louis was the
establishment of the royal power, and the
overthrow of the feudal aristocracy; but it
is almost impossible to convey a just idea of
his character, so contradictory were its
qualities. He was at the same time coufid-
ing and suspicious, avaricious and lavish,
audacious and timid, mild and cruel. Louis
XI. was the first French monarch who had
the title of "most Christian king."
LOUIS XII., king of France, was the son
of Charles, duke of Orleans, and born in 1462.
On ascending the throne, in 1498, he pardoned
the wrongs he had suffered before his acces-
sion. "The king of France," said he, "must
not revenge the injuries done to the duke of
Orleans." His reign was a continued scene
of warfare; he conquered the Milanese,
Genoa, and Naples; but after ravaging
Italy for 15 years the French were expelled
in 1513. The Emperor Maximilian, Henry
VIII. of England, and the Swiss, attacked
Louis in his own dominions; he was obliged
to sue for peace, and died in 1516. About
three months before his death he had mar-

ried the young Princess Mary, sister of Henry
VIII. She was his third wife, and after his
death was married to her first lover, Charles
Brandon, duke of Suffolk. Louis XII. pos-
sessed many of the qualities of a good ruler;
he was honest, kind-hearted, and magnanim-
ous; he was also a friend to science; and
France enjoyed under him a high degree
of prosperity and security.

LOUIS XIII., king of France, was the
son of Henry IV., and born in 1601. Being
only nine years old at the death of his father,
the care of him and of the kingdom was in-
trusted to his mother, Mary de Medici.
During the early part of his reign, France
became the prey of civil dissensions, which
Marshal d'Ancre, prime minister at that
time, was utterly unable to suppress; and
when the king, in 1615, married a Spanish
princess, the disturbances grew still more
alarming. At length the Huguenots rose in
arms, with Rohan and Soubiscat at their head;
and a great part of the kingdom rebelled
against the king, who now delivered himself
up to the guidance of Cardinal Richelieu.
After victory had inclined, sometimes to one
side and sometimes to the other, and both
parties felt deeply the necessity of repose,
peace was concluded in 1623. But it was of
no long duration. Rochelle, the head-
quarters of the Huguenots, revolted, and was
supported by England. The king drove the
English to the sea, conquered the island of
Rhé, and at last took Rochelle, which had
sustained all the horrors of a siege for twelve
months, and cost the crown 40 million livres.
After this event, so fatal to the Protestant
interest in France, Louis assisted the duke
of Mantua against the emperor, and entered
on the campaign in person, in which he
showed skill and bravery. In 1631 a treaty
was concluded, by which the duke was con-
firmed in his estates. The year following,
Gaston of Orleans, only brother of the king,
revolted, out of dislike to Richelieu, and was
assisted by the duke de Montmorency, who
being wounded and taken prisoner at the
battle of Castelnaudari, in 1632, was be-
headed at Toulouse. Louis and the cardinal
were attacked with a mortal disease nearly
at the same time; the latter died in Decem-
ber, 1642, and the king in May following.

LOUIS XIV., king of France, called the
"Grand Monarque," son of the preceding,
was only five years old on the death of his
father, the regency being in the hands of
the queen-mother, Anne of Austria, under
whom Mazarin acted as prime minister. The
nation was then involved in a war with
Spain and the emperor, which was main-
tained with glory to the French arms by
the prince of Condé and the famous Tu-
renne: but although Louis was successful
abroad, his kingdom was distracted by inter-
nal divisions; the Parisians, irritated against
Mazarin and the queen, took up arms; and
the king, his mother, and the cardinal, were
obliged to fly. The Spaniards, profiting by
these troubles, made several conquests in
Champagne, Lorraine, and Italy. In 1651
the king assumed the government, but Ma-
zarin returning to power the year following,
the civil war was renewed. On the war
breaking out between England and Hol-

land, Louis joined with the latter; but after a few naval actions, the peace of Brede was concluded in 1667. In 1672 the French king made an attack on Holland, and reduced some of the provinces in a few weeks. This invasion produced a new confederacy against Louis, between the emperor, Spain, and the elector of Brandenburg, in which all the allies were unsuccessful, and which terminated, in 1678, by the treaty of Nimeguen. Amidst all his glory, Louis committed an act of impolitic cruelty, by the revocation, in 1685, of the Edict of Nantes, granted by Henry IV. in favour of the Protestants—a measure which drove from France a vast number of ingenious mechanics and others, who settled in England and Holland. About this time another league was formed against France by the prince of Orange, the duke of Savoy, and the electors of Bavaria and Brandenburg. To this league were afterwards added the German emperor and the king of Spain. The dauphin had the command of the French army, and he opened the campaign by taking Phillipburg in October, 1688, but he was soon forced to retreat before a superior force. It was on this occasion that Louis and his first minister, Louvois, disgraced themselves by ordering the devastation of the palatinate by fire and sword. In 1690 Luxembourg gained the battle of Fleurus, and Catinat took Nice, and gained a victory over the troops of the duke of Savoy; this was followed by the taking of Mons in Flanders, Valencia in Catalonia, Carmagnola, and Montmelian in Savoy. These successes were counterbalanced by the defeat of Tourville's squadron off La Hogue, by Admiral Russell, June 2, 1692. Louis in person took Namur, and Luxembourg gained the battles of Steenkerk and Neerwinden. In 1698, Savoy made a separate peace with France, which was followed by a general one at Ryswick, in 1697. The tranquillity of Europe, however, was again broken by the death of Charles II., king of Spain, in 1700. He left his crown to Philip V. of France, duke of Anjou, who assumed the title of Philip V. In opposition to him the Archduke Charles laid claim to the throne; and he was supported by the emperor, Holland, and England. Prince Eugene had the command of the imperial forces, with which he took Cremona. In 1704, Eugene and Marlborough gained the great battle of Hochstedt, or Hohenheim; the year following, Nice and Villafranca were taken by the French, who also gained a dear victory at Cassano over Eugene; on the other hand, Barcelona surrendered to the archduke, and Gironne declared in his favour; the battle of Ramillies was gained by the duke of Marlborough, and Prince Eugene saved Turin by defeating the duke of Orleans. In 1708, Lille was retaken by the allies, who also gained the battle of Oudenarde, and the Imperialists made themselves masters of Naples. The year following the French lost Tournay, and suffered a great defeat at Malplaquet. In 1713 a treaty of peace was signed at Utrecht by France, Spain, England, Savoy, Portugal, Prussia, and Holland; and the next year peace was concluded with the emperor at Radstadt. Louis died in 1715, aged 77: by

his first wife he had one son, Louis, dauphin of France, who died in 1711, leaving three sons, Louis, Philip, and Gaston, besides several illegitimate children by his mistresses. The reign of Louis XIV. was adorned by great statesmen and generals, ecclesiastics, and men of literature and science, who made the national glory the object of their exertions. At his court, which became a model for all the others of Europe, everything had reference to the king, and tended to augment his dignity; while no man possessed in a higher degree than Louis the requisite qualities for playing well the part of a monarch. He was 20 years of age, and devoted to the pleasures of the court and chase, when Mazarin died. "To whom shall we now apply?" asked his secretaries of state. "To me," he replied with dignity; and he who had grown up in perfect ignorance, with his heart full of romantic gallantry, devoted himself sedulously to business. But his natural pride degenerated into haughtiness, his love of splendour into useless extravagance, his firmness into despotism. Determined no longer to tolerate Calvinism in France, which had for some years existed in peaceful separation from the national church, he said, "My grandfather loved the Huguenots without fearing them; my father feared, without loving them; I neither fear nor love them." But his conduct showed that a stern and unfeeling rigour towards them was uppermost in his mind: their privileges were gradually infringed; missionaries, supported by dragons, were employed for their conversion; and severities were practised which excited the horror and indignation of every breast that was not hardened by bigotry and intolerance.

LOUIS XV., king of France, great-grandson and successor of the preceding, was born in 1710; and Louis XIV. dying when he was only five years of age, the kingdom was placed under the regency of Philip, duke of Orleans. Louis was crowned in 1722, and declared of age the following year. The beginning of his reign was rendered disastrous by the Mississippi scheme of Law, the famous financier, which ruined thousands of people. On the death of the duke of Orleans, in 1723, he was succeeded as prime minister by the duke of Bourbon, who was displaced in 1725, and was succeeded by Cardinal Fleury. The same year the king married the daughter of the king of Poland. On the death of the last-mentioned monarch, in 1733, Louis supported the election of his father-in-law Stanislaus, against the elector of Saxony, which occasioned a war between France and the emperor: Stanislaus, however, was forced to abandon the throne; but the French were successful in Italy, and a peace was concluded in 1738. The death of the Emperor Charles opened a new scene. The succession of the house of Austria was disputed by four persons, and Louis declared himself against Maria Theresa, daughter of the late emperor, contrary to his own engagements. He supported the pretensions of the elector of Bavaria, who called himself Charles VII. That prince took Prague, where he was crowned king of Bohemia;

but in 1741, with their head. In 1744, Louis captured C. was also p. and negotia. but in 1742 that city was retaken, and the allies, with the king of Great Britain at their head, gained the battle of Dettingen. In 1744, Louis took the field in person, and captured Courtray, Menin, and Ypres; he was also present at the battles of Fontenoy and Lawfeld. These advantages were accompanied by the taking of Ghent, Ostend, Brussels, Bergen-op-Zoom, and other places. On the other hand, the troops of the duke of Saxony, and of the queen of Hungary, ravaged Provence, and the English completely ruined the French commerce at sea, and negotiations were opened which ended in the peace of Aix-la-Chapelle, in 1748. In 1755 a new war broke out between France and England, in which the latter power had Prussia for an ally, while Austria leagued with France. At first the French were successful, taking Port Mahon, defeating the duke of Cumberland at Hastinbeck, and forcing the English general and his army to capitulate at Closter Seven. The electorate of Hanover was conquered; but in 1757 the French and Austrians were defeated by Frederick the Great at Rossbach; this was followed by other losses both by land and sea, particularly by the conquest of Canada by the English, and Louis, humiliated, despised by his subjects, given up to the grossest immoralities, with his mistresses, and his "Parc aux Cerfs," died in 1774. He was polite, affable, and naturally humane; but want of strength of character, and sensual indulgences, degraded him equally as a monarch and a man. The storm, which burst on the head of his devoted successor, was fully expected by him; but he selfishly congratulated himself, that, had as things were, they would last his time.

LOUIS XVI., king of France, son of Louis the dauphin, and of Maria Josephine, daughter of Frederic Augustus, king of Poland, was born in 1754, and immediately created duke of Berry. On the death of his father, in 1763, he became the heir to the throne; and in 1770 he married Marie Antoinette, an Austrian princess, of great beauty and accomplishments. In 1774 he succeeded to the crown. France was in a deplorable state; her finances were nearly exhausted, her trade diminished, her navy destroyed, and the nation groaned under a weight of debt. In this state of things the people looked to the young king to recover their lost greatness, and he seconded their hopes by calling around him those persons whom he thought most likely to redeem the errors of the late administration. He chose Turgot and Malesherbes for his first ministers. His first act was very popular; he dispensed with the customary tax paid by the people at the beginning of every new reign. In 1774 the parliament was recalled, and affairs began to assume a favourable aspect, when, unfortunately, the French government, always jealous of England, took part with the revolted Americans, and a ruinous war ensued between the two countries; which, though it terminated in the loss of the colonies to the English, brought about a bloody revolution in France. The finances were completely exhausted, and Necker was made controller-general in 1776. He made such

practical reforms as he could, but was dismissed in 1783. The sanguine Calonne took the post, and strove as vainly against the overwhelming embarrassment of the government; and the Cardinal de Brienne, who succeeded Calonne, laid such intolerable burdens upon the people, that the parliament refused to register them. For this the members were exiled to Troyes, but were afterwards recalled by Louis, who, at the suggestion of Necker, again in office, convened the states-general. This assembly met in May, 1789; the public mind was agitated. Mirabeau was the leader of the popular party. At his voice the people of Paris arose, and on the 14th of July, that year, stormed the Bastille. Revolution had begun, and in October the armed mob, with a prodigious number of women, marched to Versailles, forced the palace, murdered the guards, and searched in vain for the queen, who would have shared the same fate, had she not escaped from her bed, which the miscreants pierced with their sabres. The result of this insurrection was, the leading of the king and his family in triumph to Paris, amidst all the insults of a lawless rabble. In February, 1790, Louis was forced to accept the new constitution; but, notwithstanding all his concessions, finding himself a mere prisoner at Paris, and exposed daily to new injuries, he resolved to escape. Accordingly, in the night of June 21, 1791, he and his family quitted the Tuilleries; but at Varennes he was recognised, and was conducted back to Paris, where he became a prisoner in his own palace. War was declared against Franco by the emperor and the king of Prussia; and the duke of Brunswick marched into the country, but was forced to retreat. In the mean time the people were wrought up to a pitch of savage ferocity, and assailed the Tuilleries, in storming which they murdered the brave and loyal Swiss guards. The king and royal family sought refuge in the National Assembly, which ordered them to be sent to the Temple. The Legislative Assembly gave way to the National Convention, which brought Louis to trial; his defence was conducted by Malesherbes, Tronchet, and Dessezze, and his own deportment was, as it had uniformly been during his confinement, firm and modest, dignified and resigned. Jan. 17, 1793, he was adjudged to death for conspiring against the public good: his separation from his family was uncommonly affecting, yet in every scene he manifested the spirit of a Christian, and employed the short interval allowed him in preparation for death. On the 21st of January he waded to the scaffold, where he showed the calm fortitude which had distinguished him through all the scenes of suffering and indignity to which he had been exposed. He declared his innocence to the surrounding crowd, but was interrupted while addressing the people, by the noise of drums and the interference of his executioners. He was accompanied by his confessor, the Abbé Edgeworth, who, as the monarch laid his head on the fatal block, exclaimed, "Ascend, O son of St Louis, ascend to heaven!" His body was thrown into a pit filled with lime, and no vestige left of the place

of his interment. Louis XVI. was one of the most moral and best-intentioned sovereigns of France: and in spite of all the prejudices to which the misrule of his ancestors had subjected him, was allowed to possess an amiable heart, an upright mind, and a refined and enlarged understanding.—His son, Louis Charles, the dauphin, regarded by the mockery of etiquette as Louis XVII., was, at the death of his father, only 8 years old. He was placed with a shoemaker named Simon, who treated him with savage barbarity; and the innocent victim died shortly after, as was generally believed, of poison. The daughter of Louis, after the death of her parents and brother, was suffered to quit France, and she married her cousin, the duke of Angoulême.

LOUIS XVIII., STANISLAUS XAVIER, surnamed LE DESIRÉ, second son of the dauphin (the son of Louis XV.), was born in 1755, and was originally known as the Count of Provence. At the accession of his brother, Louis XVI., in 1774, he received the title of Monsieur; and after the death of his nephew, in 1793, from which time he reckoned his reign, he took the name and title of Louis XVIII., king of France and Navarre. As a boy he is said to have manifested a disposition tinged with much timidity and reserve, but to have exhibited a far more decided turn for literary pursuits than either his elder or his younger brother (Charles X.), with whom he was educated; and he early acquired the character of a good classical scholar. When Louis XVI. attempted to escape to the frontiers of the kingdom, and took the road to Montmedy, and was arrested at Varennes, Monsieur took that of Mons, and reached Brussels in safety; and, in 1794, he and the Count d'Artois joined the Prussian army, at the head of 6000 cavalry. The progress of the republican arms, however, compelled them to make a retreat, first to Turin, and afterwards to Verona, where he assumed the name of the Count de Lille, a title which he retained till his accession to the French throne. He now led a wandering life, supported by foreign courts, especially the British, and by some friends of the house of Bourbon. In 1796 he joined the army of the prince of Condé, on the Rhine. After this he went to Blankenburg, where he lived under the protection of the duke of Brunswick, and carried on a correspondence with his friends in France, especially with Fichteberg. Being invited to Russia by the Emperor Paul, he took up his residence for a while in the ducal castle of Mittau, in Courland. The versatility of his new ally, however, soon put an end to his continuance there, and he received peremptory orders to quit Russia in a week. The Russian government then allowed him to reside at Warsaw; and while there, in 1803, Buonaparte, at that time first consul, attempted to induce him to renounce his claims to the throne. To which he replied, "I do not confound M. Buonaparte with his predecessors; I esteem his valour and his military talents, and thank him for all the good he has done my people. But faithful to the rank in which I was born, I shall never give up any rights. Though in chains,

I shall still esteem myself the descendant of St Louis. As successor of Francis the First, I will at least say like him—'We have lost all except our honour.'" In 1805, Louis, with the consent of the Emperor Alexander, returned to Mittau; but the peace of Tilsit obliged him to leave the continent, and, as a last resource, he took refuge in England. Here he was hospitably received; and Hartwell, in Buckinghamshire, a seat belonging to the marquis of Buckingham, was assigned as his residence, where he remained till the fall of Napoleon, in 1814, drew him from his retreat to reascend the throne of his ancestors. On the 3rd of May he made his entry into Paris; on the 30th he caused a constitution to be drawn up; on the 4th of June it was formally accepted; and the Chamber of Deputies, which was established by this instrument, requested the king to take the surname of "The Desired," *Louis le Desiré*. But the disgrace which the French arms had received was too deeply felt by the soldiers who had fought under Napoleon to make them satisfied with the Bonbons, and the prevalence of ultra-liberal opinions rendered a great portion of the people disaffected to the monarchy; and when Napoleon made his appearance in France, March 1, 1815, his presence roused every latent feeling, and inspired his former followers with tenfold courage and enthusiasm. Louis was compelled to flee from Paris on the 20th, and seek refuge in Belgium. The duke and duchess of Orleans, the old prince of Condé, the count d'Artois, and the duke de Berry, also hastily left Paris; and proceeding to La Vendée and the south of France, they endeavoured to awaken popular sympathy in favour of the royal cause. The ministers, together with several officers of distinction, followed the king; and Talleyrand, in particular, was actively engaged in his cause at Vienna. Great events now followed in rapid succession. The battle of Waterloo, fought on the 18th of June, broke the power of Napoleon, and dissolved the charm of his supposed invincibility; Wellington and Blücher marched to Paris; and Fouché, who had already induced the emperor to leave France, put a stop to the shedding of blood by the capitulation of Paris, July 3. Thus was Louis once more restored to the throne of France. On the 7th of July the British and Prussians occupied Paris; on the 9th the king entered the capital, under the protection of the duke of Wellington; and he immediately appointed his new ministry, at the head of which was Talleyrand, and in which Fouché was minister of police. Among the most decided measures by which the king sought to support his throne, was the ordinance of July 16, disbanding the army according to the wishes of the allies; and another, dated July 24, excluding from the general amnesty those who were there denominated "rebels," and whose punishment for the most part consisted in exile, or degradation from the peerage. All the relations of Napoleon were, under pain of death, banished from France; as were also those who had voted for the death of Louis XVI., and those who had in 1815 received offices or honours from the "usurper."

During the last few years of his reign Louis was much enfeebled by disease; a dry erysipelas in his legs had deprived him of the power of walking; while his attachment to the pleasures of the table increased his natural tendency to corpulence, and a paralysis of the lower limbs taking place, he died, Sept. 16, 1824, having survived his second restoration nine years.

LOUIS PHILIPPE, ex-king of the French, the eldest son of the duke of Orleans, better known in the revolutionary times as Philippe Egalité, and of Marie, only daughter of the duke of Penthièvre, was born in Paris, October 6, 1773. His education, which was intrusted to the celebrated Madame de Genlis, was directed equally to the development of his physical, moral, and intellectual nature. Without neglecting the ancient and modern languages, and the usual branches of learning and science, Louis Philippe and his brothers were inured to bodily fatigue; and gardening, turnery, basket-making, and carpentry ranked among the number of their accomplishments. At the age of 17, his father introduced him to the Jacobin Club; in 1791, having received the command of a regiment of dragoons, he set out to join it at Valenciennes, and war being declared against Austria, he made his first campaign in 1792, fighting at Valmy at the head of the troops confided to him by Kellermann, Sept. 20th, and afterwards, Nov. 6th, gaining great distinction at Jemappes under Dumourier. Meanwhile the revolution was hastening to its crisis. In 1793, Louis XVI. afterwards when the duke of Orleans, notwithstanding his connection with the revolutionary cause, shared the same fate, Louis Philippe, duke of Chartres, had all his worst apprehensions of a reign of terror realized, by a summons to himself to appear before the Committee of Public Safety. He instantly fled to the French frontier, escaped into the Austrian territories, and refusing an invitation to enter into that service, proceeded as a traveller towards Switzerland, where he met with his sister Adelaide and Madame de Genlis, who had also fled thither for safety. The wanderings of Louis Philippe in Switzerland, Hungary, Denmark, Norway, Sweden, and America have been often narrated and will be long remembered. While he remained in Europe, Louis Philippe refused several invitations to take up arms against France; and, on the 24th of Sept., 1796, he sailed from the Elbe for the United States, where he arrived in safety, and was soon after joined by his brothers, Montpensier and Beaujolais. His residence and travels in America continued until 1800, in the beginning of which year he arrived at Falmouth, and took up his abode on the banks of the Thames at Twickenham. His brother, the duke of Montpensier, died in England in 1807, and on returning in the following year from the burial of his other brother, the Count Beaujolais, in Malta, Louis Philippe received an invitation from the king of Naples to visit the royal family at Palermo. During his residence at the Neapolitan court, he gained

the affections of the Princess Amelia, the second daughter of the king, to whom he was married in Nov. 1809, his mother, the duchess of Orleans, who had been released from her confinement in Spain, being present at the nuptials. Palermo now became the residence of Louis Philippe, and the scene of a domestic tranquillity to which he had long been a stranger. The abdication of Napoleon in 1814 introduced a new change in his fortunes, and he returned to Paris after an absence of 21 years. The return of Napoleon from Elba scattered the Bourbons once more, and Louis Philippe returned to England, till the expiry of the Hundred Days, when he repaired to France, and entered into all the honours due to his rank. A coldness which arose between him and the administration led to his temporary retirement to England; but in 1817 he took up his permanent abode in France, and, while abstaining from politics, devoted himself to the education of his family and the patronage of literature and the arts, until the revolution of July, 1830, and the deposition of Charles X., placed him on the throne. The events of that period and his subsequent reign belong more to history than biography. Suffice it here to say, the first few years after his accession were spent in repressing the republican spirit that still lingered among the descendants of the first French revolutionists, and in consolidating the throne upon a purely constitutional basis. The various conspiracies that were entered into for overthrowing his government were detected and suppressed; repeated attempts to assassinate the king himself had proved abortive; and the speculator on probabilities might have justly anticipated that Louis Philippe would have spent the remainder of his days in peace, and have bequeathed his kingdom to his family. But this was not to be. The close of 1847 and the beginning of 1848 had been signalized in France by strenuous efforts, on the part of the opposition, to wrest from the government a measure of "electoral reform." But the Guizot administration turned a deaf ear to their appeals, and went so far as to interdict a banquet, which had been fixed to be held in Paris, in honour of this movement, on Feb. 21, 1848. A slight riot, which took place on that day, soon swelled into a formidable insurrection. In vain the king now offered to change his ministry, and to yield to the popular demands. Even his abdication in favour of his grandson, on February 23rd, came too late; he saw himself compelled to flight. Hastily quitting Paris with the queen, who had shared with him so many dangers, he made his way to the sea-shore, whence he escaped, in disguise, for England, and landed at Newhaven, in Sussex, March 3, 1848. He then took up his residence at Claremont, with an occasional sojourn at Richmond or St Leonard's, and for a time appeared to bear up manfully under the disasters which had befallen him. But, in the spring of 1850, a change suddenly came over him; his naturally strong constitution gradually gave way; and, after lingering a few months in great physical debility, he expired at Claremont, August 26th. His

remains were deposited in the vault of a chapel at Weybridge, which he had been in the habit of attending; there to repose, until, according to the inscription on his tomb, "in patriam avitos inter cineres Deo adjuvante transferantur."

LOUISA OF SAVOY, duchess of Angoulême, was daughter of Philip, count of Bresse, and was born in 1476. At the age of 12, she married Charles of Orleans, count of Angoulême; became, in 1494, mother of Francis I., king of France; and being left a widow two years later, retired to the château of Cognac till the accession of Louis XII. Her ambition, avarice, and revengeful spirit, were the occasion of many evils to France. In 1523, she caused a large sum of money, which was sent to General Lautrec for carrying on the war in the Milanese, to be seized and brought back; and then allowed the superintendent of finance to be condemned, and hung for peculation. The Milanese was lost. The same year a greater victim fell by her persecution, the constable de Bourbon. In revenge for his refusal of her hand in marriage, she had a lawsuit instituted against him by which he lost almost the whole of his property and estates; and which drove him from the service of France. After the battle of Pavia, at which Francis I. was taken prisoner by the Imperialists, the duchess of Angoulême was declared regent. In 1529, she negotiated with Margaret of Austria the peace of Cambrai, thence called "la paix de dames." Louisa of Savoy died, after a long illness, in September, 1531, mourned greatly by her son, little by the public.

LOUISA, AUGUSTA WILHELMINA AMELIA, queen of Prussia, daughter of Charles, duke of Mecklenburg Strélitz, was born at Hanover, in 1776, and was married to the crown-prince of Prussia, afterwards king, Dec. 24, 1793. In 1797 the prince ascended the throne as Frederick William III., and his consort became the model of a wife, a mother, and a queen, alleviating misery wherever she could, and rewarding merit. When Napoleon was in the zenith of his power, and Prussia lay prostrate before him, her popularity rose in proportion to her sufferings; while her pure and benevolent heart, and the fortitude with which she endured the indignities of the French emperor, rendered her an object almost of adoration. She died in 1810.

LOUIHIÉRO, JOHN DE, a Portuguese botanist, and ecclesiastic, visited Cochiu China as a missionary. To his religious duties he joined the practice of medicine; and not being sufficiently provided with European remedies, he was induced to collect and examine the plants of China, Malabar, and other parts, whence he procured a large and valuable store. On his return to Portugal, after 36 years' absence, he published the result of his botanical researches in a work, entitled "Flora Cochinchinensis," two vols. Born, 1715; died, 1796.

LOUTHERBOURG, PHILIP JAMES, an eminent landscape painter, was born at Strasburg, in 1740; studied under Tischbein and Casanova; and displayed great talent in his delineation of battles, hunting pieces,

&c. He came to London in 1771, and while there contrived an exhibition, called the Eidophusikon, somewhat on the plan of the Diorama. He was a member of the Academy of Painting at Paris and a royal academician of England. Among his best pictures are "Lord Howe's Victory, 1st June, 1794," "Storming of Valenciennes," and the "Destruction of the Spanish Armada." Died, 1812.

LOUVEL, PIERRE LOUIS, the assassin of the Duc de Berri, was born at Versailles, in 1783. He was by trade a saddler, and worked in the stables of the Emperor Napoleon and the French king, Louis XVIII. His disposition was gloomy, and he appeared to dwell intently on what he had heard respecting the causes of the French revolution, until he felt a rooted hatred towards the Bourbons. During six years he ruminated in silence on their destruction, and began with the youngest, as he afterwards acknowledged, from a wish to exterminate their race; having resolved to omit no opportunity of killing the others. Louvel perpetrated the fatal deed on the 13th February, 1820. He conducted himself with firmness during his long examination, and appeared calm throughout, even in his last moments, positively declaring that he had no accomplice.

LOUVOIS, FRANÇOIS MICHEL LETELIER, Marquis of, minister of war to Louis XIV., was born at Paris, in 1641. After 1666, he had the whole management of the ministry of war, and soon exercised a despotic control over the king and the army. His extensive knowledge, his decision, activity, industry, and talents, rendered him an able minister; but he was regardless of the rights of human nature, lavish of the blood and treasure of France, and too much of a despot, to deserve the appellation of a great statesman. On the death of Colbert, in 1683, of whom he had been the enemy, his influence became still greater, and one of its most fatal effects was the revocation of the Edicts of Nantes, in 1685, and the consequent flight of so many peaceful and industrious Calvinists. His atrocious cruelties to the Protestants, and, above all, the two devastations of the Palatinate under his orders, have branded his name with infamy. Died, 1691.

LOVAT, SIMON FRASER, Lord, was born near Inverness, in 1667. He was educated at Aberdeen, served a short time in the army, and afterwards went to France, and there embraced the Catholic faith. He was sent in 1702, by Prince James Edward, the Pretender, to excite a rising in his favour in Scotland, but he betrayed the scheme to the English government, and on his return to France suffered an imprisonment in the Bastille for his treachery. He obtained his release on condition of becoming a priest. He opposed the Pretender in the war of 1715. He captured Inverness, for which he received the title of Lord Lovat, and a grant of the forfeited estates. He was subsequently named governor of Inverness. He favoured the cause of the young Pretender, in the rebellion of 1745, but did not serve personally. He was, however, arrested and

imprisoned in the Tower, and in 1747 tried, convicted, and beheaded.

LOVE, CHRISTOPHER, an eminent Presbyterian divine, was born at Cardiff, in 1618. He studied at Oxford, and entered into orders; but refusing to subscribe to the canons enjoined by Archbishop Laud, he was expelled the congregation of masters, and repaired to London. He was one of the commissioners for the parliament at the treaty of Uxbridge; he was also one of the assembly of divines, and chosen minister of St Lawrence Jewry; yet he signed the declaration against the murder of the king. After this he was concerned in a plot against Cromwell and the Independents, for which he was tried and beheaded, Aug. 22, 1651. Ashe, Calamy, and Manton, three eminent Nonconformist divines, accompanied him to the scaffold, and he was deemed a martyr by the whole of the Presbyterian party.

LOVELACE, RICHARD, an English poet of the 17th century, was a son of Sir William Lovelace, of Woolwich, and born in 1618. He was educated at the Charter House, and at Gloucester Hall, Oxford; became a colonel in the army of Charles I., and spent the whole of his fortune in support of the royal cause; was imprisoned by the parliament, and died in indigence in 1658. His poems, published under the title of "Lucaasta," are light and elegant; he also wrote two plays, "The Scholar," a comedy, and "The Soldier," a tragedy. For spirit and gallantry, Colonel Lovelace has sometimes been compared to Sir Philip Sidney.

LOWE, Lieut.-gen. Sir HUDSON, K.C.B., &c., entered the army at a very early age, and served with much credit in various parts of the world; but he will be principally remembered in history as having been governor of St Helena, while that island was the place of detention of the Emperor Napoleon. For his conduct in this truly difficult and delicate trust, Sir Hudson Lowe has been much abused by French writers, and we are sorry to say that their abuse has been echoed in England by men who ought to have known better. That Sir Hudson's task was both difficult and delicate must be admitted; and when to the stern sense of duty of a veteran soldier we add the vast additional sense of responsibility that must needs arise from the fact of the peace of Europe—nay, of the whole civilized world—being dependent upon the safe custody of Napoleon, it is scarce drivelling, to say no worse, to contend against the strictest fulfilment of the governor's sworn duty. It has always appeared to us that most of Napoleon's complaints were unworthy puerile, and that the rest were such as Sir Hudson Lowe might have prevented—but only by perjury as a man, and breach of faith as a soldier—by conniving at the escape of that restless and selfish genius, over whom he had the unpleasant task of being guard. Died, Jan. 1814, aged 78.

History of the Captivity of Napoleon at St Helena, from the Letters and Journals of Sir H. Lowe, appeared in 3 vols. in 1853.

LOWENDAL, ULRICH FRIEDRICH WOLDEMARE, Count of, a celebrated military officer and engineer, was born at Hamburg, in 1700. He began his military career in Poland, in

1713; but entered the Danish service during the war with Sweden. He afterwards served in Hungary with great *éclat*, and next took part in the wars of Naples and Sicily. He returned to Poland in 1721, and was made colonel of infantry and commander of the royal horse-guards. During the peace he studied gunnery and engineering, and was made field-marshal and inspector-general of the Saxon Infantry in the service of Augustus, king of Poland. In 1734 and 1735 he was in the Austrian service; and he subsequently entered into that of Russia. He accepted the commission of lieutenant-general in the French army in 1743, and distinguished himself at the sieges of Menin, Ypres, Friburg, &c., and also at the battle of Fontenoy. In 1747 he took Bergen-op-Zoom by storm, which, till then, had been deemed impregnable; for which and his other services he was created a marshal of France. His knowledge of engineering and military tactics in general was of the first-rate order; he spoke all the European languages with fluency; and with these accomplishments he combined modesty and amiable manners. Died, 1755.

LOWRY, WILSON, F.R.S., an eminent English engraver, was born in 1762, at Whitehaven, where his father, Mr Strickland Lowry, was a portrait painter. He was the inventor of a ruling machine, possessing the property of ruling successive lines, either equidistant or in just gradations, from the greatest required width to the nearest possible approximation; also of one capable of drawing lines to a point, and of forming concentric circles; he likewise introduced the use of diamond points for etching, and many other useful improvements in the art; and was the first who succeeded in what is technically termed "biting in" well upon steel. For 30 years before his death he was engaged by eminent publishers on their most extensively illustrated works; and having attained to the highest rank in his peculiar branch of the art, his services were thoroughly appreciated. Died, 1820.

LOWTH, WILLIAM, an eminent divine, was born in London, in 1661, and was educated at Oxford. Being recommended by his worth and learning, he became chaplain to Dr Mew, bishop of Winchester, and was provided with a prebendal stall in his cathedral and the living of Buriton. He was an excellent classical scholar and critic, and the author of several theological works of merit. Died, 1732.

LOWTH, ROBERT, son of the preceding, and a distinguished English prelate, was born at Buriton, in 1710; received his education at Winchester, and at New College, Oxford; in which university he was elected professor of poetry, in 1741. He accompanied Mr Legge on an embassy to Berlin, and was subsequently travelling tutor to the sons of the duke of Devonshire. In 1733 he published his "De Sacra Poesi Hebræorum Prælectiones Academicæ;" in 1758, the "Life of William of Wykeham;" in 1762, a "Short Introduction to English Grammar;" and, in 1765, he replied, in a masterly and unanswerable style, to some acrimonious remarks of Warburton, who thought Dr

Lowth had aimed at his Divine Legation of Moses in the "Prælectiones." After having enjoyed some valuable preferments, he was raised to the see of St David's in 1766; was translated to Oxford in the same year; and, in 1777, removed to the diocese of London. In 1778 he published his "Translation of Isaiah." The archbishopric of Canterbury was offered him, on the death of Dr Cornwallis, but he declined the primacy, and died in 1787, aged 77.

LOYOLA, IGNATIUS, founder of the Society of Jesuits, was born in 1491, eight years after the birth of Luther, of a noble family, in the Spanish province of Guipuscoa. He was at first in the army, and served with distinguished bravery; but having been severely wounded at the siege of Pampeluna, he beguiled his time with books, and on reading the Lives of the Saints, his imagination became highly excited, and he determined to devote himself from that time to works of piety. He began by making a pilgrimage to Jerusalem; not from a mere wish to see those places, which had been hallowed by the presence of our Lord, but in the hope of converting the infidels, who were masters of the Holy Land, or of gaining the palm of martyrdom in the attempt. Having accomplished this painful and perilous journey, he returned to Spain, more unprovided even than he had left it. In 1526 he went to the university of Alcalá, where he found some adherents; but the inquisition imprisoned him for his conduct, which appeared strange, and rendered him suspected of witchcraft. He was not delivered from the prison of the holy office until 1528, when he went to Paris to continue his studies. Here he became acquainted with several Spaniards and Frenchmen, who were afterwards noted as his followers. They were Pierre Favre, Francis Xavier, Lainez, Salmeron, Bobadilla, and Rodriguez. They conceived the plan of an order for the conversion of heathens and sinners, and, on Ascension Day, in 1534, they solemnly pledged themselves to this great work in the subterranean chapel of the abbey of Montmartre. They met again in 1536, at Venice, whence they proceeded to Rome, and received the confirmation of their fraternity from Pope Paul III., as "Clerks of the Society of Jesus." In 1541 Ignatius was chosen general of the society; invested with absolute authority, and subject only to the pope; continued his abstinence and penances during life; and died in 1566. Loyola was in person of a middle stature, of an olive complexion, with a bald head, eyes full of fire, and an aquiline nose. His fanaticism was certainly dignified by sincerity, and he doubtless believed, as he taught, that the Society of Jesus was the result of an immediate inspiration from heaven. He was canonized, in 1622, by Gregory XV. A "Life of Ignatius Loyola" was among the later works of Mr Isaac Taylor.

LUBBOCK, Sir JOHN WILLIAM, bart., an eminent mathematician and astronomer, vice-president of the Royal Society, was born at London, in 1803. He was educated at Cambridge, where he graduated M.A. in 1825. He was chosen F.R.S. in 1829, and the same year became treasurer and vice-

president, an office which he filled for many years. He contributed many valuable mathematical papers to the "Philosophical Transactions," besides some separate works. Among the latter are his "Classification of the different branches of Human Knowledge," published in 1838; "On the Theory of the Moon and on the Perturbations of the Planets," 1833; "Elementary Treatise on the Tides;" and "On the Heat of Vapours and on Astronomical Refractions." Died at his seat in Kent, 20th June, 1865.

LUBIENIETSKI, STANISLAUS, a celebrated Socinian minister, was born at Cracow, in Poland, in 1623. On the banishment of his sect, he went to Hamburg, where he was poisoned with his two daughters, in 1675. His principal work is entitled "Theatrum Cometicum," a curious work, containing letters from many eminent scientific men respecting certain comets, a history of all the comets which had up to that time appeared, and a theory as to the prophetic significance of these bodies; but, at the time of his decease, he was engaged in writing an account of the rise and progress of the Reformation in Poland.

LUCANUS, MARCUS ANNEUS, a celebrated Roman poet, was born at Corduba, in Spain, A. D. 37. He was a nephew of Seneca; and being taken early to Rome, he studied there under the best masters. Before he was of the legal age he was made a questor; and he was also admitted into the college of augurs. He excited the anger of Nero for having had the effrontery to recite one of his compositions, in a public assembly, in competition with the emperor, and was ordered never more to recite in public. This induced Lucan to join Piso and others in a conspiracy against the tyrant, for which he suffered death, A. D. 65. His "Pharsalia," a poem in ten books on the civil war between Cæsar and Pompey, contains passages of great beauty, but also much that is strained and artificial. There are several English translations of the "Pharsalia."

LUCAS, PAUL, a French traveller, was born at Rouen, in Normandy, in 1664. He made trading voyages to the Levant, Greece, Asia Minor, and Africa; and having brought home medals and other curiosities for the king's cabinet, he was made one of the royal antiquaries. During one of his voyages he entered into the Venetian army, and served at the siege of Negropont. His travels, which abound in romantic and improbable stories, form 7 vols. He died in 1737.

LUCCHESINI, GIROLAMO, Marquis of was born at Lucca, of a noble family, in 1752, and became Prussian minister of state. He was the literary friend of Frederick II., and first received a diplomatic appointment under his successor, being sent to the council of state at Warsaw, in 1788, and ultimately brought about an alliance between Prussia and Poland. From that time he was ambassador on all great occasions, at Vienna, at Paris, and Milan. He accompanied the king to the battle of Jena, then signed an armistice with Napoleon at Charlottenburg, of which, however, the king did not approve; in consequence of which, as he believed himself to have lost the favour of the king,

governor to the young princes. Among his works are, "A History of Ethiopia," and various lexicons and grammars of the Ethiopian dialects. Died, 1704.

LUINI, or LOVINI, BERNARDINO, a celebrated Italian painter, the greatest of the scholars or imitators of Leonardo da Vinci, was born at Luino about 1460. He painted both in fresco and in oil, and so closely followed in the track of Leonardo that his works have, in some cases, passed for those of his master. Some of his later paintings resemble in style those of Raphael. Among the best works of Luini are the "Magdalene" and "St John," in the Ambrosian library, the "Madonna Enthroned," the "Drunkenness of Noah," and others in the Brera, Milan; frescoes in the monastery of Saint Maurice, in the church of Saronno, and in the convent of Lugano; and others in the galleries of Vienna, Berlin, and Florence. He excelled in painting women, and showed great mastery of colouring, and of light and shade; and his pictures are exquisitely finished. Luini was still living in 1530.

LULLI, or LULLY, JEAN BAPTISTE, a musical composer, was born of obscure parents, at Florence, in 1634. Having discovered a passionate fondness for music when quite a child, he was sent to Paris in his 12th or 14th year, to be page to Middle Montpensier. He rose rapidly, till he obtained the appointment of musician to the court; and, in 1670, was made joint director of the French opera, which situation he filled till his decease. Lully contributed much to the improvement of French music, composed 19 operas, and was much admired by his contemporaries. Died, 1687.

LULLY, RAYMOND, a distinguished philosopher and scholar of the 13th century, born at Palma, in Majorca. In his youth he had been a soldier; but he became a religious ascetic, and travelled into Africa and the East, for the purpose of converting the Mahometans to Christianity. He suffered tortures and imprisonment at Tunis; but was released by some Genoese merchants, and died on his voyage home, in 1315. He wrote on divinity, medicine, chemistry, metaphysics, &c.; was styled "Doctor Illuminatus;" and his method, which prevailed in Europe during the 14th, 15th, and 16th centuries, was dignified by the title of "Ars Lulliana."

LUMSDEN, MATTHEW, LL.D., professor of Persian and Arabic in the college of Fort William, Calcutta; author of grammars of those languages. In 1725 he resigned the service of the East India Company, came to England, and died in 1835, aged 58.

LUTHER, MARTIN, the great reformer, was born in 1483, at Eisleben, in Lower Saxony. His father, Hans Luther, was a poor miner, and soon after his son Martin's birth settled with his pious and industrious wife, Margaret, at Mansfeld. At the age of 14 he was sent to the school of Magdeburg, from which he removed to Eisenach, and thence to the university of Erfurt, where, in 1503, he received his first degree, and, two years later, having obtained the degree of doctor of philosophy, he delivered lectures

on the physics and ethics of Aristotle. He was destined by his father for the legal profession; but the impression produced on him by the fate of his friend Alexis, who was struck dead by lightning while walking by his side on their road from Mansfeld to Erfurt, uniting with the effect of his early religious education, induced him to devote himself to the monastic life, and he entered the monastery of the Augustines, in 1505, submitting patiently to all the penances and humiliations which the superior of the order imposed upon novices. During his residence in the monastery he studied with great enthusiasm the writings of St Augustine, and passed through severe mental conflicts, seeking vainly guidance or consolation. In 1507 he was ordained priest, and in 1508 he was made professor of philosophy in the new university of Wittenberg. In this sphere of action his powerful mind soon showed itself; he threw off the fetters of the scholastic philosophy, asserted the rights of reason, and attracted a large number of disciples. He was called by the Senate to preach, and it was with very great reluctance and timidity that he made his first attempts in the pulpit. But it was not long before the conviction began to be uttered that he was the man to reform the church. In 1510 he visited the court of Pope Leo X., at Rome; a journey which revealed to him the irreligion and corruption of the clergy, and destroyed his reverence for the sanctity of the pope. After his return, in 1512, he was made doctor in theology. His profound learning, his intimate acquaintance with the Bible, together with the fame of his eloquence, soon made Luther known to the principal scholars, and esteemed as a powerful advocate of the new light which was breaking upon the world. Great, therefore, was the attention excited by his 95 propositions, affixed to the church of Wittenberg castle, Oct. 31, 1517, and intended to put an end to the sale of indulgences by the Dominican Tetzel. They were condemned as heretical and burnt; but neither menaces nor persuasions could induce him to recant, and he maintained the invalidity of indulgences, and denied the papal supremacy. In 1518 Luther had a controversy with Doctor Eck, and the same year met the cardinal-legate Cajetan at Augsburg. In 1520 Luther and his friends were excommunicated, and his writings burnt at Rome, Cologne, and Louvain. Indignation at this open act of hostility, Luther burned the bull of excommunication and the papal decretals. Being called upon by many of the German nobility to defend the new doctrine, he presented himself at the diet of Worms, April, 1521, before the emperor, and a vast assemblage of the princes and prelates of Germany. He there made an elaborate defence, and concluded it with these words: "Let me then be refuted and convinced by the testimony of the Scriptures, or by the clearest arguments, otherwise I cannot and will not recant; for it is neither safe nor expedient to act against conscience. Here I take my stand; I can do no otherwise, so help me God! Amen." He left Worms, in fact, a conqueror; but it was so manifest

Here I o no otherwise, so He left Worms, in it was so manifest

that his enemies were determined upon his destruction, that the elector of Saxony conveyed him to the castle of Wartburg, to save his life. In this *Patmos*, as he called it, Luther remained ten months, spending his days in laborious studies, and in carrying on the fight of faith by numerous writings, and then returned to Wittenberg, where he published a sharp reply to Henry VIII., who had written a book against him, on the seven sacraments. Luther also printed, in 1522, a translation of the New Testament, which greatly alarmed the Romanists, and severe edicts were issued against the reading of it by the princes of that communion. In 1525 he married Catherine de Bora, who had been a nun, and by whom he had three sons. In 1529 the emperor assembled another diet at Spire, to check the progress of the new opinions; and here it was that the name of *Protestants* first arose, protest being made on the part of the electoral princes, who were for the Reformation, against the rigorous impositions brought forward in this assembly. After this, the protesting princes determined to have a common confession of faith drawn up; which was accordingly prepared by Melancthon, and being presented at the diet of Augsburg, in 1530, was called "The Confession of Augsburg." In 1534, Luther's translation of the whole Bible was published; and the same year he printed a book against the service of the mass. At length, worn out, more by labour than by age, this brave man died at his native place, Feb. 18, 1546; having lived to see that his doctrines had taken such deep root, that no earthly power could eradicate them. Luther's works are very numerous. From his well-known "Table-Talk," Michelet extracted the substance of his very interesting "Life of Luther." It has been recently (1865) determined to erect a monument to Luther at Worms.

LUTTI, BENEDETTO, an eminent Italian painter, on whom the emperor conferred the honour of knighthood, was born at Florence, in 1666. He resided at Rome, where he was president of the Academy of St Luke. His paintings are rare and valuable. Died, 1724.

LUTTRELL, HENRY, a great conversational wit, and known as the friend and companion of Jekyll, Mackintosh, Jeffrey, Alvanley, Sydney Smith, Rogers, Moore, and others of that brilliant school. An ardent admirer of Horace, he had caught much of the raciness and classicity of his favourite poet's manner. He charmed especially by the playfulness and elegance of his wit, appropriateness and felicity of illustration, the shrewdness of his remarks, and the epigrammatic point of his conversation. Liveliness of fancy was tempered in him with good breeding and great kindness of disposition; and he could amuse and delight by the keenest of playful, yet pungent sallies, without wounding the feelings of any one by the indulgence of bitterness and ill-nature. The "Memoirs of Thomas Moore," edited by Earl Russell, exhibit numberless instances of his wit. Died, 1851.

LUXEMBOURG, FRANÇOIS HENRI DE

MONTMORENCI, Duke of, a famous general and marshal of France, born in 1628, was the posthumous son of the Count de Bouteville, who was beheaded in the reign of Louis XIII. for fighting a duel. He served when young under the prince of Condé: was made a duke and peer of France, in 1682; was a lieutenant-general at the taking of Franche-Comté, in 1668; commanded during the invasion of Holland, in 1672; and having gained the battle of Senef, in 1674, was created a marshal. He subsequently distinguished himself at the battles of Fleurus, Leuze, Steenkirk, &c.; and died in 1695.

LUYNES, CHARLES D'ALBERT, Duke de, constable of France and first minister to Louis XIII., was born in 1578. Introduced at the court of Henry IV., he was attached to the person of the dauphin, Louis, became his favourite, and on the accession of Louis to the throne was named first gentleman of his chamber. He procured the exile of the Queen, Mary of Medici, and roused a revolt by his counsel to besiege her in the château to which she had retired. In 1621 he was named Constable, but his arrogance and avarice made his administration at length intolerable even to the king. Died, 1621.

LYCOPHRON, a Greek poet, was born at Chalcis, in Eubœa. He flourished in the age of Ptolemy Philadelphus, and was one of the seven poets included in the so-called *Pleiad*. He wrote tragedies, a satirical drama, and other works; but his only extant production is a poem relating to the predictions of Cassandra, daughter of Priam, king of Troy.

LYCURGUS, the celebrated Spartan legislator, whose existence, however, like that of Homer, is doubted by some modern critics, and whose story must be read as mythical or semi-mythical, is usually said to be the son of Eunomus, king of Sparta, and to have lived in the 9th century B. C. His elder brother, Polydectes, who succeeded to the throne on the death of his father, soon after died, and left the kingdom to him; but Lycurgus forbore to assume the sceptre; and fulfilled the office of guardian to the posthumous child of his brother. He travelled for the purpose of investigating the institutions of other lands, returned to his own country, and established those laws by which Sparta was so long governed. Having bound the king, senate, and people, by a solemn oath, not to alter any of the laws he had made until his return, he left Sparta with the avowed intention of visiting the oracle of Delphi, but he secretly determined never to see it again. Plutarch affirms, that he put himself voluntarily to death by starvation, while Lucian asserts that he died naturally, at the age of 85. The legislation of Lycurgus was intended to make public principle predominate over private interests and affections. Children were not to be the property of their parents, but of the state; which directed their education, and even determined on their life or death. The severest penalties were imposed on debauchery and intemperance; and it was enjoined that the people should take their meals in public. They were allowed to possess nei-

ther gold nor silver; iron was used for money; the theatres were abolished; and nothing but the most indispensable knowledge was allowed to be acquired; in short, all that tended to soften and humanize mankind was prohibited, while everything that could promote a hardy life and personal bravery was encouraged. The Spartans, under the laws of Lycurgus, consequently became a nation of warriors, who, for ages, proved the bulwark of their friends, and the dread of their foes.

LYCURGUS, an Athenian orator, of a noble family, was born about B. C. 395. He is said to have been instructed by Plato and Isocrates. He took a prominent part in the opposition headed by Demosthenes to the ambitious schemes of Philip of Macedonia, and had the honour of being one of the statesmen subsequently demanded to be given up to Alexander the Great. His ability, especially as a financier, and his rare integrity gained him the unbounded confidence of his countrymen, and he was three times appointed treasurer of the public revenue. Lycurgus procured a decree for the erection of bronze statues to Æschylus, Sophocles, and Euripides, and for the public preservation of their works. Only one of his orations is now extant. Died, B. C. 323. A statue was erected to him some years after his death.

LYDGATE, JOHN, one of the oldest English poets, was a Benedictine monk of Bury St Edmund's. He was educated at Oxford, travelled in France and Italy, opened a school on his return for the tuition of the young nobility, and died about 1460. His "Siege of Troy" is very scarce.

LYDIADAS, sovereign of Megalopolis. He rose from the lower ranks of the citizens to be their chief by his superior ability, and after ruling for ten years resigned his power, B. C. 234. After Megalopolis had been admitted to the Achaean League, Lydiadas was several times chosen prator or general of the League. He took part in the Cleomeneic war, and fell in the field, B. C. 226.

LYDIAT, THOMAS, a chronological and mathematical writer, was born in 1572, at Okerton, in Oxfordshire; received his education at Winchester School, and New College, Oxford; and became rector of his native place. He was reduced to poverty by being security for a friend, and afterwards suffered greatly for his loyalty to Charles I. This industrious and able scholar died in indigence and obscurity, in 1649.

LYE, EDWARD, a learned antiquary, was born at Totness, in Devonshire, in 1704; and he died, rector of Yardley, in Northamptonshire, in 1767. He was well versed in the Anglo-Saxon language and history; and was the author of an "Anglo-Saxon and Gothic Dictionary," 2 vols., with a grammar of the two languages. He was also the editor of Junius's *Etymologicum Angliæ*.

LYELL, CHARLES, well known in the scientific and literary world, was born in Fifeshire, 1797. Educated partly at St Andrew's, and partly at Cambridge, he returned to his paternal estate of Kinnordy, where he passed his whole time in those pursuits

which have gained him a distinguished place among men of science. He was the discoverer of many British plants previously unknown; and his translation of the lyrical poems of Dante, with his illustrative notes, shows a profound knowledge of mediæval Italian history and literature. Sir Charles Lyell, the distinguished geologist, is his son. Died, 1849.

LYLY, JOHN. [LILLY.]

LYNACER, THOMAS. [LINACRE.]

LYNDHURST, JOHN SINGLETON COPLEY, Baron, lord chancellor of England, was born at Boston, U. S., May 21, 1772. He was the son of the painter, John Singleton Copley, whose father had emigrated from Ireland; and when only two years of age he was brought by his father to England. He was at first destined for a painter, and he attended the lectures of Reynolds and Barry. In 1791 he entered the university of Cambridge, where he graduated B. A. in 1794 and M. A. in 1797. In the period between these two dates he visited the United States, in company with the traveller Volney, and spent a week with Washington at Mount Vernon. Mr Copley distinguished himself early as a mathematical scholar, and as a most ardent student of physical science; and the fruits of this intellectual discipline were apparent throughout his long career. He became a fellow of Trinity College, and was called to the bar at Lincoln's Inn in 1804, having previously been a pupil of the special pleader, Tidd. In 1817 he was appointed chief justice of Chester, and in the following year he entered parliament as member for Yarmouth; in the Isle of Wight, which he soon exchanged for Ashburton. He was named solicitor-general in 1819, and received the honour of knight-hood. In the following year he gained higher distinction by his conduct of the prosecution of Thistlewood and others for the Cato-Street conspiracy, and still more by his masterly yet delicate treatment of the case of Queen Caroline before the House of Lords. In 1823 he succeeded to the post of attorney-general, and three years later became Master of the Rolls, being elected about the same time to represent, with Lord Palmerston, the university of Cambridge. Sir John Copley excited some surprise by his great speech against Catholic Emancipation, delivered in March, 1827, and which could not have been anticipated from his earlier liberal opinions. In April following he was appointed to succeed Lord Eldon as chancellor, and raised to the peerage as Baron Lyndhurst of Lyndhurst. He distinguished himself greatly in his new position, and became the close ally of the duke of Wellington. During the ministry of Earl Grey (1830-34) Lord Lyndhurst held the office of chief baron of the Exchequer, and gave proof of his rare judicial qualities in the great judgment which he delivered in the case of Small v. Atwood. He was a fearless and formidable opponent of the Reform Bill, and a trusted counsellor of the king. In 1834 he was a second time made chancellor, but retired from office with the Peel ministry in the following year; diverging thenceforth in politics more and more from Peel. He zealously opposed the Muni-

elpal Corporations Bill, and by his energy and ability in the struggle became virtually leader of the Tory party in the House of Lords. On the return of Peel to power in September, 1841, Lord Lyndhurst was for the third time raised to the woolsack, and only retired in 1846. He was not a member of the first cabinet of Lord Derby in 1852, but he gave him his warm support. During his latter years he held a peculiar and very high place in parliament; "a more than judicial eminence," a character more stately than the mere partisan. And the growing infirmities of age left his powerful understanding unaffected and his noblest sympathies unchilled. Some of his latest speeches are amongst his best, and among the greatest specimens of true eloquence. Clearness, simplicity, singular accuracy of expression, distinctness and melody of voice, and the most consummate ease, these were the striking characteristics of his oratory. Lord Lyndhurst was twice married; first in 1819, and the second time in 1837, and had children by both marriages. He died at London, October 12, 1863, in the ninety-second year of his age.

LYNDSAY. [LINDSAY.]

LYNEDOCH, THOMAS GRAHAM, Lord, an illustrious British general, was born at Balgowan, in Perthshire, in 1750, but did not enter the army until he was in his 45th year. The loss of a beloved wife imparted almost a romantic character to the tenor of his life. To alleviate his grief and restore his health, he was recommended to travel; and it was during his sojourn at Gibraltar that he fell into the society of the officers of the garrison, and thenceforth determined on devoting himself to the profession of arms. He first served as a volunteer at the siege of Toulon, under Lord Mulgrave, and on his return he raised from among his countrymen a battalion of the 90th regiment, of which he was appointed colonel-commandant. He then accompanied his regiment to Gibraltar; but soon growing tired of the idleness inseparable from garrison duty, he obtained permission to join the Austrian army, where he was enabled to take advantage of his position in sending to the British government intelligence of the military operations and diplomatic measures adopted by the commanders and sovereigns of the continent. In 1797 he returned to England, and having joined his regiment, he was appointed to act with Sir Charles Stuart in the reduction of the island of Minorca, after which he was employed two years in the blockade of Malta. In 1808 he proceeded with Sir John Moore to Sweden, and afterwards served in Spain with that gallant officer during the fatal Peninsular campaign, which ended in the debarkation at Corunna. Next year, General Graham commanded a division at the siege of Flushing; in 1810 he commanded the British troops at Cadiz; and in 1811 he fought and won the memorable battle of Barossa. After this he joined Lord Wellington, and was present at the siege of Ciudad Rodrigo; but ill-health rendered it necessary for him to revisit England for a short period. Early in 1813, however, he returned to the Peninsula, led the left wing

at the battle of Vittoria, reduced the town and etadel of St Sebastian, crossed the Bidassoa, and, after a severe contest, established the British army on the territory of France. On the 3rd of May, 1814, General Sir Thomas Graham was created a peer of the empire, by the title of Baron Lynedoch, of Balgowan, on which occasion he nobly refused a grant of £2000 per annum, to himself and heirs, which was intended to accompany his elevation. In 1826 he was appointed to the governorship of Dumbarton Castle. "Never," said Mr Sheridan, "was there seated a loftier spirit in a braver heart." This gallant officer and excellent man died Dec. 16, 1843, at the advanced age of 93.

LYON, GEORGE FRANCIS, an enterprising traveller, and a captain in the British navy, was born at Chichester in 1795, and entered the service in 1809; from which period up to the battle of Algiers, where he was present, he was continually engaged in the active duties of his profession. In 1818 he was employed, under Mr Ritchie, on a mission to the interior of Africa. Of this expedition Mr Lyon published his journal, under the title of "A Narrative of Travels in Northern Africa, accompanied by Geographical Notices of Soudan, and of the Course of the Niger." A more disastrous undertaking has been seldom known; the travellers suffered every kind of privation, were attacked with the most alarming disorders, and Mr Ritchie fell a martyr to extreme suffering and disappointment while at Mourzouk, the capital of Fezzan, from which place Mr Lyon returned. In 1821 he was appointed to the command of the Hecla, one of the ships belonging to Captain Parry's expedition to the Polar Seas; of which he also published "A Private Journal." In 1823 he was raised to the rank of post-captain, and appointed to the command of the Griper gun-brig, then fitting out for another voyage of discovery in the icy regions. Here he and his gallant crew encountered frightful perils, but returned to England, though without effecting their object. He afterwards went to Mexico as one of the commissioners of the Real del Monte Mining Company, and was wrecked on his return, near Holyhead, in 1827. He again visited South America, but died on his passage home, October, 1832, aged 37; thus terminating a life of adventures and misfortunes not often paralleled.

LYONNET, PETER, an eminent naturalist, was born at Maestricht, in 1707. Being bred to the law, he became one of the secretaries to the states of Holland, and their translator from Latin and French. In his latter years he applied to the study of natural history, particularly insects; on which subject he wrote several esteemed books, the most important of which is, "Traité Anatomique de la Chenille qui rongé le Bois de Saule." Died, 1789.

LYONS, EDMUND, Lord, a distinguished naval officer, was the son of Mr John Lyons, who possessed property in Antigua, and was born at Burton, near Christchurch, in 1790. At the age of eleven he went to sea on board the "Royal Charlotte" yacht; and after cruising some time in the Mediterranean, he took part in the daring enterprise of Admiral

Duckworth against Constantinople in the Straits of the Dardanelles, and the demolition of a redoubt situated near Cape Pasquill. Towards the close of 1807 he was sent to the naval station in India, and the following year was appointed first lieutenant of the brig "Barracouta." In these waters he distinguished himself by his intrepidity in being one of the foremost in the escalade of Fort Belgica, which protected the Dutch colony of Banda-Nelra, and he repeated this gallant feat of arms on the coast of Java, where, in the night of the 30th July, 1811, he took possession with thirty-five men of the fort of Marrack, which was defended by 300 men and fifty-four pieces of ordnance. In the operations which followed he had the command of a flotilla of gun-boats, and took the fort of Cornelis by assault. Worn out by fatigue, he was obliged to return home, and received commander's rank in 1812; but in April, 1813, with his indomitable zeal, he applied for employment, and was appointed to the "Rinaldo," on the Downs station, where he served under H.R.H. the duke of Clarence, who with his squadron escorted Louis XVIII. to France, and the sovereigns of Russia and Prussia to England. For the next fourteen years he continued on shore, but in 1828, he became captain of the "Blonde," and was appointed to co-operate in the movement of the allied fleet against the Turks. In 1829, after having for some time blockaded the port of Navarino in conjunction with the French fleet, he proceeded to the attack of the Morea, and took a brilliant part in the operations which preceded the capitulation of the last stronghold of Turkey in Greece. As a reward for his gallantry on this occasion he received the orders of knighthood of St Louis and the Redeemer. At a later period he was present at the bombardment of St Jean d'Acro by Ibrahim Pasha, and when peace was definitively concluded, he conveyed King Otho and the Bavarian regency from Trieste to Athens, in 1833. Created K. C. H. in 1835, Sir Edmund Lyons abandoned his naval career for that of diplomacy, and for twenty years his services were accepted by the various governments which succeeded each other in England. For fourteen years he filled the office of ambassador at the court of Greece, with great prudence and skill. From February, 1849, to January, 1851, he presided over the mission at Berne, and from that period till October, 1853, he resided as minister at Stockholm. In 1853, when hostilities appeared imminent in the East, he was recalled to active service, and was sent as second in command to the Black Sea, took an active part in the conveyance of the army to the Crimea, and conducted all the operations of the landing, and the subsequent events of the war; and among others he planned the expedition which destroyed all the Russian establishments in the Sea of Azoff. In June, 1855, he was appointed to the chief command, and after the fall of Sebastopol, he continued to cruise in the Black Sea, and occupied the Isle of Serpents, which he refused to quit until the frontiers between Turkey and Russia had been definitively fixed. For all these distinguished services he was created Baron Lyons of Christchurch in

1856, and various other well-merited honours were conferred on him. Died, 1858. A statue of Lord Lyons, by Noble, has been set up in St Paul's.

LYONS, ISRAEL, an astronomer, botanist, and mathematician, born in 1739, was the son of a Polish Jew, who was a Hebrew teacher at Cambridge. He was Sir Joseph Banks's instructor in botany, and accompanied Captain Philipps, afterwards Lord Muirgrave, as astronomer, in his voyage towards the North Pole. He was one of the calculators of the "Nautical Almanack," wrote a "Treatise on Fluxions," and other works, and lectured on botany. Died, 1778.

LYRA, NICHOLAS DE, a converted Jew of the 14th century, was born at Lyre, in Normandy. He assumed the tonsure, and was remarkable for his zeal in defence of the religion he had embraced. He professed theology in a convent of the Cordeliers at Paris, and published an edition of the Bible, with notes and interpretations, in 6 vols. folio, which has been many times republished. Died, 1340.

LYSANDER, a celebrated Spartan naval and military commander, lived in the 4th century B. C. He had the command, B. C. 407, of the Spartan fleet off the coast of Asia Minor, where he defeated the Athenians under Antiochus, and gained great influence both among the Greeks and the Persians. His great exploits were the victory of Argos-Potami, in 405, which virtually closed the Peloponnesian war; the capture of Athens in the following year, and the establishment there of the government of the Thirty Tyrants; and securing the succession of Agesilaus to the Spartan kingdom, in 397. The new king, however, slighted him, and crossed his plans. Lysander fell at the battle of Mallartus, 395.

LYSIAS, a celebrated Greek orator, was the son of a Syracusan, and was born at Athens, B. C. 458. He was one of the Athenian colonists sent to Thurium in south Italy, in 443, and he did not return to Athens till 411. He was banished and his property was confiscated by the Thirty Tyrants, and he assisted Thrasybulus and his fellow-exiles in their patriotic enterprise. The citizenship of Athens was granted him, but on the pretext of an informality was withdrawn. He spent the rest of his life at Athens, and died, 373. He wrote, it is said, 230 orations, but of these we possess only 35. The style of Lysias is admired for its clearness and elegance, and his language for its purity.

LYSIMACHUS, one of the generals and successors of Alexander the Great, was a Macedonian of low origin, early remarkable for physical strength and courage. On the death of Alexander, B. C. 323, Thrace and the neighbouring countries became the share of Lysimachus, but it cost him many years of hard fighting to secure his possession. He nominally joined with Ptolemy, Seleucus, and Cassander against Antigonus, but did not actively co-operate with them till 302, when he invaded Asia, and captured several towns. In conjunction with Ipus over he gained in 301 the victory of the battle, and Antigonus, who was killed in the battle, and of whose dominions he then received a por-

tion. After unsuccessfully invading the country of the Getæ, he joined the league against Demetrius, son of Antigonus, and became king of Macedonia in 286. The murder of his son Agathocles, a great favourite of the people, at the instigation of his wife Aranoë, provoked a revolt in Asia; Seleucus took up the cause of the widow Lysandra, and Lysimachus was killed in the battle which ensued, B. C. 281. Lysimachus had assumed the title of king in 306. He was founder of a city on the Hellespont named after him *Lysimachia*.

LYSIPPUS, a celebrated Grecian sculptor, who worked with such extraordinary diligence, that he is said to have left behind him fifteen hundred pieces, every one of which evinced marks of superior genius. He received from Alexander the Great the singular privilege of exclusively making his effigy in cast metal; and he accordingly executed a series of figures of that prince, from childhood to maturity. He greatly improved the art of statuary, and gave to the human figure a degree of symmetry and beauty unattained by his predecessors.

LYSONS, DANIEL, topographical writer, was born at Rodmarton, in Gloucestershire, probably about 1760. He studied at Oxford, and entered the church, succeeding to the family living of Rodmarton, in 1804. He was author of "The Environs of London," and the "Magna Britannia." The former appeared between 1792—1800, the latter was commenced in 1806, carried on in conjunction with his brother (noticed below), and completed in 1822. His manuscript collections were given to the British Museum. Died, 1834.

LYSONS, SAMUEL, brother of the preceding, an eminent antiquary and topographer, was born in 1763, at Rodmarton, in Gloucestershire; studied at the Middle Temple, and

was called to the bar; was appointed keeper of the records in the Tower of London, and died in 1819. He shared with his brother in the compilation of the "Magna Britannia," and wrote several other works relating principally to Roman antiquities in Britain. — LYTE, HENRY, an English botanist of the 16th century, was a native of Somersetshire. After he left Oxford, he travelled in foreign countries; and having collected a number of rare plants, on his return, he formed one of the first botanical gardens in England. He is known as the translator of the History of Plants by Dodonæus. Born, 1629; died, 1607.

LYTTLETON, GEORGE, Lord, poet and historian, was born at Hagley, in Worcestershire, in 1709; was educated at Eton, and Christchurch, Oxford; and, on entering parliament, became an active member of the opposition while Walpole was minister. When Frederick, prince of Wales, formed a separate court, he was appointed his secretary; and, on the resignation of Walpole, he was made one of the lords of the treasury; he was subsequently chancellor of the exchequer, but resigned in 1737, and was raised to the peerage, after which he withdrew from public affairs. Though in early life Lord Lyttleton had imbibed sceptical opinions, his works show how sincere a believer he afterwards was in the truths of Christianity. He was the author of "Observations on the Conversion of St Paul," "Dialogues of the Dead," a "History of Henry II.," and "Poems." The latter are correct in versification and replete with delicate sentiments; nor are his miscellanies in prose devoid of good taste and refinement. Died, 1773. A portrait of George, Lord Lyttleton, has been presented to the National Portrait Gallery.

M.

MAAS, or MAES, NICOLAS, a distinguished Dutch painter, born at Dort in 1632. He was a pupil of Rembrandt, and in his first style. In 1678 he settled at Amsterdam, and chiefly devoted himself to portrait-painting. There are three of his small domestic pieces in the National Gallery. Died, 1693.

MABILLON, JEAN, a learned French Benedictine, famous as a writer on ecclesiastical antiquities and the science of diplomatics, was born in 1632, at Pierre Mont, in Champagne, and studied at the college of Rheims. He assisted D'Achéri in his *Splægium*, and published several laborious works, among

which are, "De Re Diplomatica," the "Museum Italicum," 2 vols. and *Annals of the Order of St Benedict*. Died, 1707.

MARLY, GABRIEL BONNET DE, a French abbé, eminent as a political and historical writer, was the brother of Condillac, and born at Grenoble, in 1709. He was educated by the Jesuits at Lyons, but soon abandoned theological studies for Thucydides, Plutarch, and Livy. His works include "Parallèle des Romains et des François," "Le Droit public de l'Europe," "Observations sur les Grecs," "Observations sur les Romains," "Observations sur l'Histoire de la France," "Sur les Constitutions des Etats Unis de l'Amérique,"

&c. forming altogether 15 vols. He died in 1785.

MABUSE, or **MAUBEUZE**, whose real name was **JAN GOSSAERT**, an eminent painter, was born at Maubeuze, in Hainault, in 1499. Very little is certainly known of his life, except that he indulged in the grossest vices. It is said that he visited Italy, and after his return to Holland lived first at Utrecht and then at Middelburg. Having obtained considerable reputation, he visited England, and resided some time at the court of Henry VIII. He painted the portraits of the royal family, as well as of many of the nobility. His masterpiece was probably the altarpiece at Middelburg, representing the descent from the cross, which has unfortunately perished. Several works of Mabuse were exhibited at the Manchester Art Treasures Exhibition, and among them the fine "Offering of the Wise Men," belonging to the earl of Carlisle. As an example of his marvellous skill and finish we may mention, that having once received a piece of brocade for a dress, to appear before the Emperor Charles V., he sold the stuff at a tavern, and painted a paper dress so like it, that the difference could not be distinguished. Died, 1562.

MACADAM, **JOHN LOUDON**, known as the introducer of the system of road-making, which bears his name, was descended from an ancient and respectable family in Kirkcudbright, Scotland, where he was born in 1756. He was a man of science generally, and in the course of his active services as a magistrate and trustee of roads, his attention was first attracted to the want of scientific principles in the construction of roads. At that time he was in his 60th year, and the subject continued to occupy his leisure till he finally effected what may fairly be termed a national good. Government, appreciating the vast utility of his plans, rewarded him by two grants, amounting together to £10,000, and he was offered the honour of knighthood, which, however, he declined, in consequence of his advanced age, and it was conferred on his son, Sir James Nicol MacAdam. He died in November, 1836, aged 80.

MACARIUS, **ST** (the elder), a celebrated anchorite of the 4th century, who passed 60 years in a monastery on Mount Seta, in Egypt, and died, 387.—**ST MACARIUS** (the younger), and a contemporary of the preceding, was a monk of Alexandria, who being persecuted by the Arians, and banished to an island, converted its inhabitants to Christianity. Died, 395.

MACARTNEY, **GEORGE**, Earl of, was born near Belfast, in 1737; was educated at Trinity College, Dublin; and afterwards travelled on the continent. In 1769 he was appointed chief secretary for Ireland, and after holding several other offices in succession, was made governor of Granada in 1775. He was governor of Madras about five years, returning to England in 1786. Six years later he was employed as ambassador to the emperor of China, with a view to extend our commerce there. He conducted himself with great address on that occasion; and an account of the mission was published by

Sir George Staunton, who acted as his secretary. The embassy returned in 1794, and the earl was next sent to Louis XVIII, then Monsieur, at Verona; after that, he was appointed governor of the Cape of Good Hope, which post he was compelled, from ill health, to resign. During his retirement in Surrey, he wrote "The State of Russia in 1767," and "The State of Ireland in 1773." As a writer he is candid and modest; the Life of Earl Macartney has been published in 2 vols. Died, 1806.

MACAULAY, **CATHARINE**, historian, was born in Kent in 1730. Her maiden name was Sawbridge. In 1760 she married Dr George Macaulay, a physician in London; and after his death she married, in 1778, Mr Graham, a clergyman, and brother to the noted empiric of that name. In 1785 she went to America, for the purpose of visiting General Washington, with whom she maintained a correspondence during her life. She died in 1791. Her chief work is, "The History of England from James I. to the Accession of the House of Hanover," afterwards continued from the Revolution to her own time. The spirit in which it is written is almost purely republican. The History had a short run of popularity, but is now neglected.

MACAULAY, **ZACHARY**, F.R.S., a zealous co-operator with Mr Wilberforce and other distinguished philanthropists in the abolition of slavery in the British colonies; to which end he devoted his eminent talents and best energies for upwards of forty years. He was the father of the distinguished historian, T. Babington Macaulay, noticed below. Died, May 13, 1838, aged 70.

MACAULAY, **THOMAS BABINGTON** (Lord **MACAULAY**), one of the most eminent of English historians and critics, was born at Rothley Temple, in Leicestershire, October 25, 1800. He was the son of Zachary Macaulay, whose name is associated with those of Wilberforce and Clarkson in their labours for the abolition of the slave trade. He graduated at Cambridge with great distinction, was elected to the Craven Scholarship in 1821, and became fellow of Trinity College in 1822. Two years later he was called to the bar at Lincoln's Inn. In the same year, with the insertion of his article on Milton, he commenced that career as an essayist in which he is perhaps unrivalled, and certainly has never been surpassed. Not long afterwards he was appointed Commissioner of Bankruptcy, and in 1830 returned to parliament as member for Calne. He was subsequently made secretary to the Board of Control, and zealously defended the policy of the Grey ministry in the debates on the Reform Bill. In 1834 an important legislative appointment in India caused him to resign his seat for the borough of Leeds, to which he had been elected shortly after its enfranchisement. His mission to India as member and legal adviser of the Supreme Council was to draw up a new code of Indian law, which, containing some twenty-six chapters, and divided into nearly 500 clauses, was published after his return to England in 1838. To this Indian sojourn are to be attributed his arti-

To this attributed his arti-

cles contributed to the "Edinburgh Review" on Lord Clive and Warren Hastings, —two of his most famous essays. Nothing less than a personal residence could have given him so intimate a knowledge of English policy in India; and certainly nothing less could have enabled him to exhibit with such marvellous power the characteristics of Indian society, life, and thought. In 1839 he was made secretary of war, and was elected M.P. for Edinburgh in 1840. Two years afterwards he published his "Lays of Ancient Rome," which were soon followed by a collected edition of his essays. These had been for some time reprinted in America. His second article on Lord Chatham closed, in 1844, the most brilliant series of articles which have been contributed by a single writer to any review. In 1846 he was appointed paymaster to the forces, with a seat in the cabinet, but lost his seat for Edinburgh in 1847, for his opinions on the subject of the grant to Maynooth. But his constituents showed their regret for his loss by returning him free of expense in 1852, and he continued their member until he was raised to the peerage in 1857, under the title of Baron Macaulay of Rothley. The state of his health, however, forbade the excitement of speaking, and he was not permitted to employ in the House of Lords those powers which had won for him so great a name as an orator in the House of Commons. Henceforth his time was mainly devoted to the great work on which he had been already labouring for many years, and which he hoped to be able to complete. Four volumes of his "History of England" appeared during his life; a fifth, which had not received the full benefit of his final revision, has been published since his death, which took place in his 60th year, Dec. 28, 1859. But a sketch of his life (brief as this must necessarily be) would be incomplete without some remarks on the writings of a man to whom English literature owes a debt the greatness of which can hardly be exaggerated. Much has been said of the decay of the English language, and of our present lack of great writers. Such fears have, probably, no good foundation; but although the poverty so complained of is imaginary, there is no doubt that the present condition of English writing is not one of unmingled encouragement. The pretence of knowledge without the reality is enabled to clothe itself with a fatal facility in forms of expression which threaten to destroy the genuine character of the language, and furnish a disguise for weakness or want of thought under an ambiguous or unintelligible style. Against this spurious literature of the present century Lord Macaulay's writings, whether as an essayist or an historian, are a standing protest. It may be safely said that he has not written a single sentence which is not as clear as it can possibly be, that he has never employed a stilted or unmeaning phrase, that he has never clothed his meaning in words which can convey to the reader any other sense than that which he desired that they should bear. His sentences are never complicated; his language exhibits a purity which has been guarded by an instinctive

jealousy. Foreign idioms, or even foreign words, which come naturally to the pens of other writers, are by him most carefully eschewed; not a phrase which is not thoroughly English can be found throughout his volumes. Yet with these self-imposed limits, which others would feel as trammels, he has displayed a vigour of thought and brilliance of imagination which never fails or flags. Life-like images of men and things are embodied in the simplest and the shortest words. A machinery, which others might reject as inadequate, is employed to convey a depth of thought and force of feeling which gives to his writings a constant and peculiar charm. We see everywhere the result of consummate art worked out with unwearied care; but that care was to him no effort and the art was perhaps exercised unconsciously. He had made up his mind what English ought to be, and all that he wrote enabled him to realize more fully the ideal of his earlier years. A letter has been published, written by Lord Brougham to his father, Zachary Macaulay, when his son was commencing his career at Cambridge. In that letter, with much valuable advice on his education, he suggests special models for the formation of his English style, foremost among these being the great orator of the Roman republic. It is quite certain that Macaulay studied the subject of style with untiring diligence; but it is no matter for regret that he made no efforts to form that style on the long and sounding periods of Cicero. His words are as clear as his thoughts and conclusions are definite. Never halting between two opinions, he realized with a singularly graphic power every historical period or character with which he had to deal. The men of other ages and other lands were for him no abstractions. To him they were as real as if they had been his contemporaries; and he is as earnest in their favour or dispraise as if they still lived and moved before him. The power of vivid description, which was the result of this, has subjected him to charges of partiality, and even of unfairness; but it may well be questioned whether real historical truth is better attained by the cold statements of general propositions than by the instinct which invests with life the smallest, or, as it might seem, the most insignificant, details. It is to this power, which none ever possessed in a greater degree, that we owe a series of portraits matchless in their life-like vigour, while they are not less truthful or more partial than the less animated narratives of other historians. Never disavowing his own sympathies, or qualifying his own political creed, he realized conditions of thought and feeling the most opposite and distant to each other and to his own. He has done equal justice to the Papist and to the Puritan; but his stern condemnation is reserved for wilful oppression and misrule, for studied violation of truth, for the debasement (as in Lord Bacon) of the loftiest intellect to the meanest political and selfish purposes. And if we cannot expect always to find in him that absolute impartiality which is the special characteristic of Henry Hallam, yet his vivid descriptions carry with them, in the very

abundance and force of their details, the evidence from which may be drawn conclusions different from his own. His death has left unfinished a "History of England," as generally faithful as it is throughout brilliant; its completion would have secured to us, perhaps, the greatest work in our language, but with the greatness which he has already attained, it could scarcely have added to the splendour of his name. A "Memoir of Lord Macaulay" has been written by Dean Milman, and a work entitled "The Public Life of Lord Macaulay," by Rev. F. Arnold. A uniform edition of his Complete Works, edited by his sister, Lady Trevelyan, has just appeared (Feb. 1866).

MACBRIDE, DAVID, a celebrated physician, was born at Ballymony, in the county of Antrim, in 1727. He was a surgeon in the navy until 1749, when he settled in Dublin, where his industry and genius were directed to medical researches, and were productive of discoveries which will transmit his name with honour to posterity. He published his "Experimental Essays" in 1764, which work immediately attracted the attention of the faculty, and procured for the author a doctor's degree from the university of Glasgow; but his most extensive publication was a "Methodical Introduction to the Theory and Practice of Medicine," a valuable work which afforded a concise and connected view of the principles and practices of the healing art, as best established by sound reason, and confirmed by accurate observation. This work, which was highly appreciated by Dr Cullen, was translated into Latin, and published at Utrecht. He died in 1778.

MAC CRIE, THOMAS, D.D., was a native of Scotland, and received his education at the university of Edinburgh. In 1806 he separated from the General Associate Synod, and became one of the founders of the Constitutional Associate Presbytery. He was the author of the Lives of "Knox," "Melville," &c.; and a "History of the Progress and Suppression of the Reformation in Italy, in the 16th Century." Died, aged 63, in 1835.

MAC CULLOCH, JOHN, M.D., was born in 1773, at Guernsey, and evinced great precocity of intellect. He was first placed at the grammar school of Lostwithiel, in Cornwall; from thence, in 1790, he was sent to Edinburgh to study medicine; and, at the very early age of 18, he received the diploma of a physician, being the youngest student who had ever passed the required examination. He, however, thought himself too young to succeed as a private practitioner; and, after remaining at Edinburgh five years, he entered into the artillery as assistant-surgeon, and became chemist to the Board of Ordnance in 1803. He was afterwards engaged by government in the surveys of Scotland; and his mineralogical and geological survey of that portion of the kingdom is deemed his most important public work. In 1832 his able map of it was completed, and he received from government the sum of £7000. He also wrote many scientific works. His studies, or pursuits, were innumerable; and he is said to have excelled in all, how-

ever dissimilar. He held the situation of lecturer on chemistry, &c., in the East India Company's establishment at Addiscombe. In 1835, when in the 62nd year of his age, he married; and while on a visit to some of his old friends in Cornwall, he had the misfortune to be thrown out of a chaise, by which he so much injured one of his legs as to render amputation indispensable. He bore the operation with firmness, and even deliberately gave directions to the surgeon while performing it; but all attempts to save him proved abortive. Among his numerous works we may name the "Highlands and Western Isles of Scotland," his valuable essays on "Malaria," and on "Remittent and Intermittent Diseases," and a "System of Geology." He died, August, 1835.

MACCULLOCHI, JOHN RAMSAY, political economist and statistician, was born in Wiltshire in 1789. He became, in 1817, a contributor to the "Scotsman," and was for two years editor. In 1828 he was appointed professor of political economy in London University, but he filled that chair only a short time. In 1838 he was made comptroller of H.M.'s Stationery Office, and remained in that post till his death. His principal works are, the "Statistical Account of the British Empire," first published in 1837, since enlarged and several times republished; the "Dictionary of Commerce and Commercial Navigation," annually reprinted; the "Geographical Dictionary," his "Principles of Political Economy," and a work on "Succession to Property vacant by Death." He contributed to the "Encyclopaedia Britannica," and to various periodical works, and published a work on the bibliography of political economy. He was a member of the Institute of France. Died at London, November, 1864.

MACDIARMID, JOHN, a miscellaneous writer, was born in 1779, at Weem, in Perthshire; studied at Edinburgh, and, on coming to London, became editor of the St James's Chronicle. He published "An Inquiry into the System of Military Defence," 2 vols.; "An Inquiry into the Nature of Civil and Military Subordination," and "Lives of British Statesmen." Died, 1808.

MACDONALD, ETIENNE JACQUES JOSEPH ALEXANDRE, duke of Tarentum, and a distinguished marshal of France, was born at Sedan, or Sancerre, in France, 1763. Descended from a Scotch family, which had taken refuge in France after the suppression of the rebellion in Scotland in 1745, he entered the French army in 1784, and embraced the revolutionary cause, served on the staff of Dumouriez at Jemmapes, and greatly distinguished himself in the campaign in the Low Countries under General Pichegru. In 1796, as general of division, he took the command of the army of the Rhine; he then joined the army of Italy, where he became governor of Rome, and having soon afterwards been sent against Naples, his skillful retreat saved the French army from the utter ruin with which it was menaced by Suwarrow. During the 18th Brumaire, he commanded at Versailles. In 1800 he was appointed to the command of the army in

Switzerland; military at the Spilug; French an hagen; an leon mark premons; to his treat him from took part the glories and Wagra earning fo emperor's or of Grata "golden op In 1810 he and appoi where, con great inhu in the Russi himself in zen; but m bach, when Marshai B force. Switzerland, and immortalized his name in
 military annals by his celebrated passage of
 the Splügen. In 1802 he was appointed
 French ambassador at the court of Copen-
 hagen; and on his return to Paris, Napo-
 leon marked his displeasure at some ex-
 pressions he had made use of in reference
 to his treatment of Morcau, by withdrawing
 him from active service. But in 1809 he
 took part in the Italian campaign, shared
 the glories of the victories at Laybach, Raab,
 and Wagram, his gallant conduct in the last
 earning for him a marshal's baton at the
 emperor's hands, and was appointed govern-
 or of Gratz, where his humanity gained him
 "golden opinions from all ranks of people."
 In 1810 he was created duke of Tarentum,
 and appointed to command in Catalonia,
 where, contrary to his wont, he displayed
 great inhumanity. He subsequently shared
 in the Russian campaign, and distinguished
 himself in the battles of Bautzen and Lüt-
 zen; but met with a severe reverse at Katz-
 bach, where he had imprudently engaged
 Marshal Blücher with a greatly inferior
 force. After the fall of Napoleon, he was
 called to the Chamber of Peers, and made
 chancellor of the Legion of Honour; but he
 took little or no part in politics, and his last
 years were spent in domestic quiet. Died,
 1840.

MACDONALD, FLORA, the courageous
 young Scotch-woman, who, after the defeat
 of the young pretender, Prince Charles Ed-
 ward, at Culloden, in April, 1746, risked her
 own life that she might aid his escape from
 his pursuers. She had the prince dressed as
 a woman, and giving him out as her maid-
 servant, succeeded in conveying him safely
 to the Isle of Skye, whence, after many
 wanderings, perils, and hardships, he ulti-
 mately escaped to France. Flora was after-
 wards imprisoned for a short time in the
 Tower. She died in 1790.

MACDONALD, JOHN, F.R.S., only son of
 the celebrated Flora Macdonald, was born in
 1759. He passed many years in the service
 of the East India Company, and, on his re-
 turn home, was appointed lieutenant-colonel
 of the royal Clanairne regiment, and com-
 mandant of the royal Edinburgh artillery.
 But it is as a writer on military tactics, and
 as a man of science, that Colonel Macdonald
 is especially entitled to our notice. His pro-
 ductions are chiefly translations from the
 French, but he produced, in 1808, a "Treatise
 on Telegraphic Communication, Naval,
 Military, and Political;" and, in 1816,
 a "Telegraphic Dictionary," extending to
 150,000 words, phrases, and sentences. Dur-
 ing the latter part of his life he resided at
 Exeter, where he died, aged 72, in 1831.

MACEDO, JOSE AGOSTINHO DE, a Portu-
 guese poet and journalist, was a native of
 Evora. He became a monk of the Augus-
 tine order, but soon quitted it. He was
 afterwards very popular as a preacher, wrote
 several pamphlets, and edited in succession
 several journals—the "Official Gazette,"
 "Universal Gazette," and another with the
 portentous title of "Trumpet of the Last
 Judgment." His best poem is entitled
 "Meditation." His bold criticism of the
 Lusiad, and his attempt to rival Camoens

in the poem entitled "Gama" (afterwards
 "The East"), offended many of his country-
 men. Macedo wrote also a poem in praise
 of Newton, a translation of Horace, and a
 volume of lyrics. Died at Lisbon, 1831.

MACGILLIVRAY, Dr WILLIAM, the well-
 known author of the "History of British
 Birds," and various other works on natural
 history, was professor of natural history
 in Marischal College, Aberdeen, from which
 university he received the honorary degree
 of LL.D., after having been for some time
 Curator of the Royal College of Surgeons at
 Edinburgh. Rarely has any naturalist so
 combined the love of nature with close study
 of books. His constitution was naturally
 delicate, and for a long time his health had
 been declining; but he lived to complete his
 "History of British Birds," the last page of
 which contains a touching allusion to his
 own approaching end. Three volumes of
 this work were published in 1840, the re-
 maining two just previously to his death, in
 1852.

MACHIAVELLI, NICCOLO, the celebrated
 Florentine statesman and historian, was
 born of an ancient family in 1469. As se-
 cretary of the council named "The Ten,"
 a post which he held for fourteen years,
 1498—1512, he was one of the most prominent
 actors in the foreign and diplomatic affairs
 of the republic during that period. The
 great capacity for business and diplomacy
 which he showed led to his being employed
 on a great number of political missions, the
 most important of which were those to the
 king of France, to whom he was sent on
 four occasions; to the Popes Pius III. and
 Julius II.; to Cæsar Borgia, in whose camp
 he passed three months; and to the Em-
 peror Maximilian. On the restoration of
 the Medici, in 1512, Machiavelli was banish-
 ed, and in the following year he was arrested
 and subjected to the torture on the charge
 of conspiracy against the Medici, but was
 soon pardoned and liberated. The next
 eight years he spent in retirement and
 literary labours, was then again employed
 as ambassador, and died at Florence, 2nd
 June, 1527. The principal works of Ma-
 chiavelli are, "Del Principe," the famous
 treatise in which are expounded the ob-
 noxious principles and system of policy
 ever since designated "Machiavellian;" and
 which was probably written to gratify the
 Medici; it was published in 1532; "Storie
 Fiorentine," "Discourses on the first decade
 of Titus Livius," "Seven books on the Art
 of War," and valuable Reports of his nego-
 tiations. Letters, Comedies, and other writ-
 ings complete the 6 vols. 4to of his works,
 which, both in point of matter and of style,
 stand in the highest rank of Italian litera-
 ture.

MACHIN, JOHN, an English astronomer
 of the 18th century; author of a treatise on
 the "Laws of the Moon's Motions," pub-
 lished with Newton's Principia, and other
 works. He was professor of astronomy at
 Gresham College, and secretary to the
 Royal Society.

MACK, CHARLES, Baron von, an Aus-
 trian general, notorious for his ill-concerted
 military operations, was born in 1762, at

Neusingen, in Franconia. He entered the army as a private in a regiment of dragoons, but gradually rose till he became aide-de-camp to General Laudohn, who strongly recommended him to the emperor. As quarter-master general of the army of the prince of Coburg, he directed the operations of the campaign of 1794, and was afterwards employed in negotiating with Dumourier. At that time the plans and proposals of Mack were so much extolled, that he was sent to London to concert measures with the English ministers. George III. gave him a sword ornamented with diamonds; and Mr Pitt so wholly approved of his propositions, that he hastened his return, in order that the allied army might benefit by his plans. In 1798 he commanded the Neapolitan troops, but was so out-generalled, that he resigned the command, and surrendered himself a prisoner of war. Buonaparte, then consul, allowed him to reside at Paris, on his parole; upon which Mack requested permission to go to Vienna, that he might prevail upon the emperor to exchange him for Generals Perignon and Grouchy; a request which the court of Vienna refused. Mack then secretly formed a plan of escape, which he effected, and took with him as companion of his flight from Paris, in April, 1800, Mdlle Louise, a courtesan of some celebrity. Arrived in Austria, he persuaded his countrymen that his ill success had arisen solely from the cowardice and disorderly conduct of the Neapolitans. The Emperor Francis believed his assertion, and confided to him, in 1804, the command of his troops in the Tyrol, Dalmatia, and Italy, and in the following year made him president of the council of war. In September, 1805, Marshal Soult defeated Mack at Memmingen; he quailed before Napoleon, who forced him to retreat beyond the Danube; and in October he surrendered at Ulm, and 28,000 of the Austrians became prisoners. Mack once more presented himself at Vienna, but he was subjected to a court-martial, and was sentenced to death, which the emperor commuted to perpetual imprisonment, and even from that he was released at the end of one year. Died in 1829.

MACKENZIE, GEORGE, author of "The Lives and Characters of the most Eminent Writers of the Scottish Nation," &c., a work of considerable research and authority. He practised as a physician at Edinburgh, in the 17th century.

MACKENZIE, SIR GEORGE, an ingenious Scotch lawyer and writer, was born at Dundee, in 1636, became an eminent advocate, and gained from the Covenanters the appellation of "blood-thirsty." When James II. came to the throne, he resigned, but was afterwards restored by that prince. Not approving [the measures of the Prince of Orange, he again retired and went to Oxford, where he died in 1691. He wrote several works of merit on the laws of Scotland, "Religio Laici," "Essays on Moral Subjects," and some poetical pieces.

MACKENZIE, CHARLES FREDERICK (Bishop **MACKENZIE**), was born at Portmore, in Peeblesshire, in 1825. At the age of 19 he entered the university of Cam-

bridge, where he especially distinguished himself in mathematics, and became fellow of Calus College. Ardently desirous of a more active and laborious life, he accompanied, in 1855, the bishop of Natal, Dr Colenso, to South Africa as his archdeacon, and laboured there four years. In 1859 he returned to England, and was at once selected to take the lead in the proposed Universities Mission to Southern Central Africa, and, in October, 1860, he sailed from Plymouth. On his arrival he was consecrated bishop, and setting out with Dr Livingstone, took up his abode at Magonera. In January, 1862, a short half-year after his settlement there, he died of the African fever on a river-island, whither he had gone to meet Dr Livingstone. An interesting memoir of this devoted missionary was published by Dean Goodwin in 1864.

MACKENZIE, HENRY, essayist and novelist, was the son of an eminent physician at Edinburgh, and born in 1745. He received a liberal education; and, in 1761, became an attorney in the Scottish court of exchequer. His first production was "The Man of Feeling," which acquired unbounded popularity: this was followed by "The Man of the World," and "Julia de Rouvigné." He next, in conjunction with other writers, published a series of Essays, under the title of "The Mirror," and afterwards "The Lounger." He contributed many excellent papers to the Transactions of the Royal Society of Edinburgh and of the Highland Society, of both of which he was a member. His dramatic works consist of two tragedies, "The Prince of Tunis" and "The Shipwreck," and of two comedies, "The Force of Fashion" and "The White Hypocrite." He was author of a political tract, entitled "An Account of the Proceedings of the Parliament of 1784;" and at the commencement of the French revolution he published several others, with the view of counteracting the prevalence of democratic principles at home, which introduced him to the notice of Mr Pitt, and some years after he was appointed comptroller of the taxes for Scotland, an office which he held till his death. For highly-wrought scenes of pathos, and for the graces of style, Mackenzie has but few rivals: his novels, tales, and essays can never fail to please; but his dramatic writings are deficient in force. In his earliest youth he had become acquainted with Hume, Smith, Robertson, Blair, and others, who then formed the literary galaxy of Edinburgh; and his days being protracted to a healthy old age, his reminiscences of the great men whom he had so long survived were highly interesting. He died in 1831, aged 85.

MACKINNON, DANIEL, Colonel, a gallant British soldier, and nephew to General Mackinnon, who was killed at the storming of Ciudad Rodrigo. He entered the army at the early age of fourteen, and was immediately sent to the siege of Copenhagen, then to Bremen, and the next year to the Peninsula, where he was present in nearly all the great battles: his cool daring, extraordinary activity, and amiable disposition rendering him an especial favourite.

He was also where he en He wrote th Guards," a w ing informat MACKINNON, British states in Inverness Mackintosh, profession, an lent educatio degree of M. continent. study of law the death of t tively to stu revolution, w gave a new in and legislatio fects of his at other' partisa several work especially his fence of the strictures and in 1799 he w coln's Inn, w lectures on th he exhibited h censor of the the "Vindicta Mackintosh w the emigrant Buonaparte in eloquence, an law contribu penalty impo after this, in order of Bom there rendere sially his abli native and Br lished a Litera his president. was eleted Naia; and, with the popu posed the gre rred with rducing the r chorp against Alben Hill, an measures gene that celebrate criminal lawa administration of nference with ere a short tim lon; and, on nistry in 18 succeeded it, as besides the " Mackintosh pu son."
