Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

Morisset Library
University of Ottawa

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shell contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque Morisset
Université d'Ottawa

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaître sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

NOTE
TO
THE FOURTEENTH EDITION.

To this edition of the "BIOGRAPHICAL TREASURY" is added a copious and carefully-prepared Supplement of 123 pages, comprising about five hundred additional memoirs and notices of eminent persons whose deaths have taken place since the publication of the thirteenth edition. The Supplement brings the work down as close as possible to the time of going to press.

W. L. R. C.

LONDON, MAY 1873.

PREFACE

TO

THE THIRTEENTH EDITION.

TWENTY-EIGHT years have now elapsed since the first publication of the "BIOGRAPHICAL TREASURY." That it met a general want, and established itself and has held its ground as a popular favourite, is sufficiently shown by the fact that during that period it has passed through twelve editions, the last appearing in 1862. It has been subjected to several successive revisions, and fresh notices of eminent persons have been added from time to time; the more recent of which formed in the 12th edition two Supplements extending to 100 pages.

Another edition being required, the opportunity has been taken to subject the whole work to a more searching revision than any previous one. This was especially desirable on account of the advance of historical knowledge and criticism. Many new facts have been discovered, many long-standing mistakes have been corrected, and many familiar facts have been set in a new and truer light. More particularly a revolution of thought has taken place with respect to the earliest periods of the history of both ancient and modern nations. For the first time a clear distinction has been critically established between history and legend, and the value of oral tradition as contrasted with the evidence of contemporary written documents; and this necessitates a new treatment of many names in a biographical dictionary.

So numerous and important are the alterations made in this thirteenth edition of the "BIOGRAPHICAL TREASURY," that it is virtually a new work. In justice both to the publishers and to myself, it is incumbent on me to state particularly what these changes are.

And first, many comparatively unimportant names, such as were on careful consideration judged unlikely to be asked for, except perhaps by half-a-dozen persons in half-a-dozen years, have been omitted.

The space thus gained is more usefully occupied, partly by re-written and fuller notices of names more generally interesting, and partly by entirely new memoirs. Among those re-written—about 900 in number—will be found the names of many English and foreign sovereigns, and some of the highest names of all ages in literature, philosophy, theology, politics, science, and art: ex. gr.—Homer, Herodotus, Socrates, Plato, Pericles, and Sophocles; Dante, Petrarch, Shakespeare, and Milton; Giotto, Leonardo da Vinci, Michael Angelo, and Raphael; Mohammed, St Dunstan, St Bernard, Wickliffe, Savonarola, Calvin, and Bernard

Preface.

Palissy; Tycho Brahe and Kepler; Montaigne, Leibnitz, Fichte, and Coleridge; Saladin, Bayard, Marlborough, and Washington, &c., &c. And among the new notices—more than 1000—will be found not a few names of historical importance which are not given in some books of higher pretension; and memoirs, as full as space allowed, of the many distinguished men whose deaths have been recorded since the preparation of the last edition. Of these may be particularized—Leopold, king of the Belgians, President Lincoln, Lord Palmerston, Cardinal Wiseman, the Marquis of Lansdowne, Lord Lyndhurst, Lord Canning, Lord Clyde, Lord Seaton, the Earl of Aberdeen, Sir G. C. Lewis, Richard Cobden, Archbishop Whately, Dr Whewell, Father Mathew, Father Lacordaire, Dr Robinson, Isaac Taylor, F. W. Robertson, Horace Vernet, Delacroix, Delaroche, Ary Scheffer, Mulready, Dyce, John Leech, Sir John Franklin, Admiral Fitzroy, Sir J. Richardson, Dr Lindley, Admiral W. H. Smyth, Sir W. J. Hooker, Sir W. R. Hamilton, Sir B. C. Brodie, "Stonewall" Jackson, W. M. Thackeray, W. S. Landor, Mrs Gaskell, A. A. Procter, Varnhagen von Ense, Uhland, and Robert Schumann. The memoirs contained in the two Supplements of the previous edition are of course inserted in their proper places in the course of the work.

The dates throughout have been carefully verified, and many additional inserted; cross-references, it is hoped, are made fairly complete; and great pains have been taken to secure accuracy in foreign names (many of which were previously given in an English form), in the titles of books, and the works of artists. Mention is made in many cases of those works of great painters which are in the National Gallery, of portraits in the National Portrait Gallery, of statues and monuments, and, occasionally, of recent biographical memoirs.

As a general rule, mythical names are excluded. But it is not possible to lay down any rule rigidly applicable to all cases. A few such names therefore still appear, but are carefully noted as mythical or unhistorical; and, as it is impossible to admit discussion, readers who desire fuller information in such cases are referred, for Greek and Roman names, to Grote's "History of Greece," and Sir G. C. Lewis's "Credibility of Early Roman History."

In the task of reconstruction I have endeavoured to give equal attention to distinguished men of all classes, to introduce or approximate to a just proportion in the relative length of the notices, and to treat all subjects in a catholic and liberal spirit, avoiding all political and ecclesiastical partisanship. With this view I have expunged many expressions and epithets which belong to a bygone age and mode of thought.

The small bulk of this volume is not unlikely to mislead many as to the quantity of matter it contains. It may be a surprise to some to hear that the quantity of letter-press on a page very nearly equals that on each page of the one-volume edition of Dr W. Smith's Classical Dictionary; and it contains 297 more pages than that work. The present edition of the "BIOGRAPHICAL TREASURY" exceeds the last in bulk by 167 pages. The type, though small, is sharp, clear, and readable with ease. It is surprising, too, into how small a space the salient facts of a life may be packed, if disquisition, controversy, and, above all, fine writing are resolutely ex-

Preface.

cluded. The notices, while clear and accurate, are written with all possible brevity.

The process of revision and reconstruction has occupied most of my time during the last three years; and my confident hope is, that having made a new selection of names, having carefully drawn the material from the best sources, and solidified statements of fact with a sufficient number of accurate dates—so far as accuracy is attainable—the "BIOGRAPHICAL TREASURY" in its new shape will be found far more complete and trustworthy than ever, as a popular hand-book of biographical information.

It can scarcely be expected that a work containing so many names, facts, and dates should be exempt from errors. The difficulty of ensuring thorough accuracy in a work such as the present can be appreciated, perhaps, only by those who have undertaken similar tasks. In many instances the inquirer who resorts to several original sources of information finds that he has only multiplied the number of inconsistent or contradictory statements; and he is thus not unfrequently compelled at last to speak according to the best of his own judgment, and select or make a compromise between conflicting testimonies.

The work is made as nearly as possible complete to the present time, many notices having been added while it has been passing through the press. A Chronological Index of the most important classes of names is added to this edition, which it is hoped may increase its usefulness. The new frontispiece was designed by Mr James Doyle.

A

NEW DICTIONARY

OF

UNIVERSAL BIOGRAPHY.

AA, PETER VAN DER, an eminent book-seller of Leyden, who, early in the 18th century, compiled and published several extensive collections of voyages and travels, among which was his "Galerie du Monde," an illustrated Atlas, in 66 vols. He also published the great collection of Gronovius on Greek, and of Grævius on Roman, antiquities. Died, 1730.

AARSEN, FRANS VAN, Dutch diplomatist, was born in 1572. Brought up in the household of the Prince of Orange, he was appointed resident of the United Provinces at the French court in 1598, and subsequently ambassador. After temporary disgrace he was recalled to Holland in 1615, when by his support of Maurice of Nassau and his hostility to the noble Barneveldt, in whose prosecution he took a leading part, he rendered himself very unpopular. When Maurice became supreme Aarsen was employed in various missions, and was twice sent to England, in 1626 and 1640. Died, 1641.

AARTGEN, a painter, of very considerable merit, but of low and dissolute habits. He was born at Leyden, in 1498; and is said to have met his death by being drowned in a drunken frolic, in 1564.

ABASSA, or **ABEASSA**, sister of the caliph Haroun al Raschid, who gave her in marriage to his vizier Giafar, on condition that their marriage should never be consummated; but having broken the contract, the caliph put Giafar to death, and banished his wife from the palace, giving orders that none should afford her relief. The romantic incidents arising from this strange marriage have furnished themes for many an sentimental tale.

ABATE, ANDREA, a Neapolitan artist, who, as a painter of fruit and objects of still life, acquired great celebrity. He was employed, together with Luca Giordano, in forming the Escorial for Charles II. of Spain. Died, 1732.

ABATI, NICOLO, more frequently, but erroneously, called Deli' Abate, a renowned painter in fresco. Born at Modena, 1512; died at Paris, 1571. Several of his relations distinguished themselves as painters.

HAUZIT, FIRMIN, a French author of great merit, and whose modesty was equal to his erudition. His father died in his infancy; and his mother, in order to secure education in the Protestant faith, sent him, at two years of age, to Geneva. After finishing his studies he went to Holland,

and from thence to England, where he formed an intimacy with Sir Isaac Newton, by whom he was much admired and esteemed. He was also highly panegyrised by Voltaire and Rousseau. In short, though he published little, he had acquired among literary men a character for profound learning, and his correct judgment was universally acknowledged by them. Born at Uzès, 1679; died at Geneva, 1767.

ABBADIE, JACQUES, an eminent Protestant divine, who accompanied Marshal Schomberg to England in 1688, and was present when that great commander fell at the battle of the Boyne. On his return to London he was appointed minister of the French church in the Savoy, and was subsequently made dean of Killaloe. He wrote many works, chiefly theological and in the French language; the most esteemed of which are "Art de se connaître soi-même," and "Traité de la Vérité de la Religion Chrétienne." Born at Nay, in Béarn, in 1658; died in London, 1727.

ABBAS, the uncle of Mahomet, of whom, though opposed to him at first, he became a disciple, and served in his army as a general. He died in the 32nd year of the Hegira—A.D. 633.

ABBAS, SHAH, the Great, King of Persia, succeeded to the throne in 1586. He made war on the Usbeks, and conquered Khoivasan. He put an end to the war with the Turks, by ceding to them Armenia and other provinces, first transporting the Armenians into Persia. In 1590 he made Ispahan the seat of government, and greatly improved and adorned it. With the help of the English he drove the Portuguese from Bender-Abassi and the Isle of Ormuz, and by other conquests enlarged his dominions. Abbas had some qualities which justified his title "Great," but these were mixed with other and vicious qualities. While he was brave, a patron of commerce and the arts, and an efficient ruler, he was also cruel, suspicious, jealous of those who served him well, a merciless tax-gatherer, and unscrupulous in putting to death the objects of his suspicion. Died, 1628.

ABBIATI, FILIPPO, an historical painter, of considerable eminence. Born at Milan in 1640; died in 1715.

ABBOT, GEORGE, archbishop of Canterbury in the reigns of James I. and Charles I., and one of the most active political characters of that period. He was born, in 1562,

at Guildford in Surrey, where his father was a weaver and clothworker. After receiving his education at the grammar school in that town, he was sent to Balliol college, Oxford; and became successively master of University college, dean of Winchester, vice-chancellor of Oxford, bishop of Lichfield and Coventry, then of London, and lastly, in 1610, primate of all England. Archbishop Abbot was throughout his life the bitter political and ecclesiastical rival and enemy of Laud. Although he at first distinguished himself by a rigorous maintenance of the doctrines of divine right and passive obedience, he became, after the accession of Charles I., whom he crowned at Westminster, a steady and resolute opponent of the despotic measures of the king. In 1622 an event occurred, which for a time caused his suspension from the archiepiscopal office, being at the seat of Lord Zouch in Hampshire, while on a hunting party he accidentally shot one of his lordship's keepers. He was the author of several theological works; and was one of the eight divines, who, in 1604, by the order of James I., made the translation of the Bible now in use. He died at Croydon in 1633, and was buried in his native town, where he had founded and liberally endowed a hospital.

ABBOT, ROBERT, bishop of Salisbury, and elder brother of the above. He was an eminent divine, and famous for his skill in conducting polemical discussions and vindicating the supremacy of kings. Born, 1560; died, 1617. Dr Fuller, speaking of the two brothers, says, "George was the more plausible preacher, Robert the greatest scholar; George the abler statesman, Robert the deeper divine; gravity did frown in George, and smile in Robert."

ABBOTT, CHARLES. [TENTERDEN, Lord.]

ABBOT, THOMAS, a German writer, was born at Ulm, in Suabia, in 1738. After filling the chair of philosophy at Frankfort on the Oder, and of mathematics at Rinteln in Westphalia, he was fortunate enough to attract the notice of the prince of Schaumburg-Lippe, by whom he was held in high estimation and effectually patronised. His treatises on "Merit," and on the "Duty of Dying for our Country," are full of talent and promise; but the latter he was not destined to fulfil, as he died at the early age of 28, in 1766.

ABDALLA, the father of Mahomet. Though originally only a camel-driver, it appears that he was held in high estimation by his tribe: indeed, so extravagant is the praise bestowed upon him, that, among other absurdities which are related, it is said that on his wedding a hundred girls died of grief and disappointment, for having lost the honour of being his bride.

ABDOLLATIPH, a Persian historian, born at Bagdad in 1161. He is said to have been a man of great learning and a voluminous writer; but the only one of his works known in Europe is an abridged history of Egypt, entitled "Al-kital Alsager," or the little book, which was published from a MS. in the Bodleian Library, by Professor White, in 1800.

ABDUL MEDJID, sultan of Turkey, son

of Mahmoud II., was born in 1823. He succeeded his father in 1839, while Mehemet Ali was carrying on war against him. A few months after his accession he published an edict, establishing certain civil reforms. By the intervention of the chief European powers, Mehemet Ali was reduced to submission and a permanent arrangement of the quarrel effected in 1840. Much opposition was made to the Sultan's projects of reform, especially to his concession of privileges to his Christian subjects, and his position was one of very great difficulty. He obtained great popularity in Western Europe by his courageous and generous protection of the Hungarian refugees, in 1849. The great event of his reign was the Crimean war, in which France and England allied themselves with Turkey against the encroachments of Russia, and which was terminated by the fall of Sebastopol after a long siege, in 1856. Died, 1861.

A BECKETT, GILBERT ABBOT, a distinguished humourist and satirical writer, was born in London in 1811, and educated at Westminster. While engaged in prosecuting his legal studies, he wrote numerous pieces for the stage which were more or less successful, established various journals of a humorous and satirical character, and contributed to some of the most distinguished literary and political journals of the day. In 1841, he was admitted to the bar; but he still continued his literary pursuits, and besides being one of the chief contributors to Punch, produced in succession his comic "Blackstone," and Comic Histories of "England" and "Rome," all of which achieved great success. In 1849, he was appointed one of the police magistrates of the metropolis, an office for which the knowledge of life and law which he possessed, rendered him eminently fitted. Died at Boulogne in 1856.

ABEL, DR CLARKE, was the historian of Lord Amherst's embassy to China, which he accompanied as chief medical officer and naturalist. He was a deep and philosophic thinker, a close observer of the mysteries of nature, and a man of a benevolent mind. Died, 1826.

ABEL, JOSEPH, a distinguished German painter of the present century, born near Linz on the Danube, 1780. Many of his historical pictures are to be seen at Vienna, where he died, 1818.

ABEL, NIELS HENRIK, mathematician, born in Norway, 1802. He studied at the University of Christiania, and in 1825 visited the principal countries of Europe. He contributed to "Crelle's Journal" of Mathematical Science from its establishment. He was an original thinker, and his discoveries on the theory of elliptic functions were eagerly adopted by Legendre. His promising career was cut short by consumption, in 1828. The works of Abel were published in French, by the government of Sweden, about 10 years after his death.

ABELA, JOHN FRANCIS, commander of the order of St John of Jerusalem; author of a valuable and interesting work entitled "Malta Illustrated," which was printed in that island, in 1647. Died, 1655.

ABELARD, OR ABAILARD, PIERRE, cele-

ARD, PIERRE, calc-

brated for his learning and his misfortunes,
 the latter arising partly from his love of the
 equally celebrated Heloise, was born at the
 village of Palais, near Nantes, in Brittany,
 1079. Having made extraordinary progress
 at the university of Paris, and surpassed all
 his masters, he opened a school of theology,
 philosophy, and rhetoric, which was thronged
 with pupils, among whom were some of the
 most distinguished characters of the day.
 While he was in the zenith of his popularity,
 he became so violently enamoured with the
 beautiful and accomplished niece of Fulbert,
 canon of Paris, as to forget his duty, his
 duties, and his fame. Under the pretext
 of teaching her philosophy, he obtained the
 uncle's permission to visit her, and at length
 to reside in the house. Though Abelard was
 at that time in his 40th year, and Heloise
 only in her 18th, a mutual passion, fatal to
 the happiness of both, was encouraged. Ful-
 bert suspecting this, separated the lovers;
 but the imprudent intercourse had gone too
 far for concealment; and Abelard, who had
 retired to his sister's house in Brittany, was
 followed there by Heloise, who gave birth to
 a son. He then resolved to marry her se-
 cretly; but although the uncle's consent was
 obtained, Heloise chose rather to be con-
 sidered Abelard's mistress than his wife, and
 he at last very reluctantly complied. Still she
 would not own her marriage, and this so
 deeply incensed her uncle, that he treated
 her with great severity; and Abelard in con-
 sequence determined on releasing her. He
 accordingly carried her away, and placed her
 in the convent of Argenteuil, where she put
 on the religious habit, but did not take the
 veil. Irritated at Abelard, the canon hired
 some ruffians, who broke into his chamber,
 and subjected him to an ignominious mu-
 tilation. Filled with shame and sorrow,
 Abelard now became a monk in the abbey of
 St Denis, and Heloise took the veil. Just
 after severe retribution, for the atrocious
 crime, overtook the canon, his valet, and one
 of his assistant ruffians. After time had
 somewhat moderated his grief, Abelard re-
 sumed his lectures, but the violence of his
 enemies increased; he was charged with
 heresy, and his works condemned by the
 Council of Soissons, in 1121, no defence being
 permitted him. He fled from St Denis and
 erected an oratory in the diocese of Troyes,
 called the Paraclete, but persecution still
 followed him; the great St Bernard still
 his accuser, and succeeded in getting him
 condemned by the Council of Sens, and after-
 wards by the Pope. Abelard did not long
 survive his sentence; but, after a life of ex-
 traordinary vicissitudes, died in the priory of
 Marcol, near Chailons-sur-Saone, in 1142.
 The corpse being sent to Heloise, she de-
 posited it in the Paraclete, of which she was
 at that time the abbess. The remains of the
 ble-minded Heloise, who survived him
 many years, were laid in his tomb. In 1800
 the ashes of both were taken to the museum
 of French monuments at Paris; and on the
 museum being destroyed, in 1817, they were
 moved to the cemetery of Père la Chaise.
 Abelard obtained, in his own day, the most
 extraordinary reputation by the splendour
 of his abilities as philosopher, theologian,

logician, orator, and poet. His influence
 was, probably second only to that of St
 Bernard himself. And as the first who ap-
 plied philosophical criticism to theology, his
 name is one of the most important in the
 history of the development of modern
 thought. It is worth while to add that
 through the kindly offices of Peter the Vener-
 able, abbot of Cluny, a reconciliation was
 effected between Abelard and St Bernard.

ABELLI, LOUIS, bishop of Rhodes, and
 author of "Medulla," and other theological
 works. Born, 1604; died, 1691.

ABENDANA, JACOB, a Spanish Jew; au-
 thor of a Hebrew Commentary on some por-
 tions of the Scripture. Died, 1685.

ABERCROMBIE, JOHN, M.D., an emi-
 nent Scotch physician and author, was born
 at Aberdeen, Nov. 11, 1781. Having taken
 his degree at Edinburgh in 1803, he perma-
 nently fixed his residence in the Scotch me-
 tropolis, where he soon gained the first rank
 as a practising and consulting physician.
 But the writings of Dr Abercrombie con-
 tributed no less to the maintenance of his
 fame, than his skill as a physician. His
 purely professional works procured for him
 a high place among the modern cultivators
 of science; but the most permanent monu-
 ment to his memory are his "Inquiries con-
 cerning the Intellectual Powers, &c.," pub-
 lished 1830, and the "Philosophy of the
 Moral Feelings," published 1833. In these
 works he has brought all the medical facts
 accumulated in the course of his extensive
 experience and research, to bear on the
 various moral and metaphysical systems in
 vogue, and constructed out of the whole a
 view of human nature in which he believed
 that the facts of science and the revelations
 of religion are blended in harmony. To his
 wide range of acquirements he added a piety
 as genuine as it was unassuming, and he will
 long be remembered for his large but unob-
 trusive benevolence. Died, Nov. 14, 1844.

ABERCROMBIE, JOHN, a horticulturist;
 author of a "Universal Dictionary of Gard-
 ening and Botany," and a "Gardener's
 Calendar," published under the name of
 Mawe. Died, 1806, aged 80.

ABERCROMBY, Sir RALPH, a distin-
 guished British general, born in the county
 of Clackmannan, Scotland, in 1734. He was
 educated at Rugby, and at the University of
 Edinburgh, studying afterwards at Leipzig,
 and he entered the army in 1756. After a
 short service in Germany, he served in Ire-
 land for above 20 years, and from 1783 to
 1793 lived in retirement. He then took part
 in the disastrous campaign in Holland, un-
 der the duke of York, and distinguished him-
 self by his very skillful conduct of the retreat.
 After two years service as commander-in-
 chief, in the West Indies, he was appointed
 to the chief command in Ireland, in 1798,
 but finding it impossible to carry out the re-
 forms he saw to be essential to the efficiency
 of the army, he resigned this post in a few
 months. He rendered important service on
 occasion of the second expedition to Holland,
 in 1799. But his most splendid achievement
 was the successful conduct of the expedition
 to Egypt, in 1801. The landing was effected
 in the bay of Aboukir, under a terrible fire

from the enemy's batteries, and in the severe engagements which followed the French were repulsed at all points. Sir Ralph, however, received a wound of which he died in a few days, thus closing a long career of duty faithfully done, and showing to the last that tender care for the comfort of his men, for which he was always distinguished. Sir Ralph Abercromby had been a Knight of the Bath since 1795. His widow was created a baroness, and a monument was erected to his memory in St Paul's Cathedral.

ABERDEEN, GEORGE HAMILTON-GORDON, Earl of, prime minister of England, was born at Edinburgh in 1784. He was educated at Harrow and Cambridge, succeeded to the earldom about 1802, travelled in Greece, Turkey, and Russia, and was chosen in 1806 one of the representative peers of Scotland. He was sent ambassador to Vienna in 1813, and in the following year signed the Treaty of Paris. Raised to the English peerage as Viscount Gordon in 1815, he took no part in public affairs from that time till 1828, when he became secretary of state for foreign affairs under the Duke of Wellington. He was in office till 1830, and again held the same post under Sir Robert Peel from 1841 till 1846. On the resignation of the Earl of Derby in 1852, Lord Aberdeen became prime minister, at the head of a coalition ministry. The great event of his administration was the Crimean War, into which he "drifted" contrary to his anticipations, perhaps by reason of his horror of war, his old friendship with the Czar, and his too rigid adherence to the doctrine of non-intervention. General dissatisfaction with the conduct of the war led to his resignation in January, 1855, and he lived thenceforth in retirement. He was made a Knight of the Garter, and was honoured by a visit of the Queen in 1857. He was a man of high culture, generally reserved and consequently misunderstood, and though a Tory, liberal enough to vote for the repeal of the Test and Corporation Acts, for Catholic Emancipation, and for the repeal of the Corn Laws. He was long President of the Society of Antiquaries. Died at London, 14 December, 1860.

ABERLI, JOHANN LUDWIG, an eminent Swiss landscape painter. Born at Winterthur, 1723; died at Berne, 1786.

ABERNETHY, JOHN, F.R.S., an eminent surgeon, born in 1764. It is uncertain whether he was a native of Scotland or Ireland, but he went early to London, was apprenticed to Sir Charles Blenk, attended the lectures of John Hunter, and became surgeon to St Bartholomew's Hospital. He was passionately devoted to the study of physiology, and very successful as a lecturer, inspiring his pupils with an interest like his own. He rendered important service to medical science by his work entitled, "The Constitutional Origin and Treatment of Local Diseases." In his intercourse with his patients there was at times an eccentricity and even coarseness of manner, which was strangely in contrast with the gentleness that made him beloved in his home. Died, 1831. He was author of several tracts on medical subjects besides the work above named.

ABGARUS, a king of Edessa, in Mesopotamia, contemporary with Our Saviour, to whom he is said to have written a letter and received an answer to it. Both letter and answer are pronounced by the best critics to be mere forgeries.

ABINGER, LORD, JAMES SCARLETT, was the second son of Robert Scarlett, of Jamaica, where the future lord was born in 1769. He was early sent to England for education, entered at Trinity college, Cambridge, in 1786, and took his B. A. degree in 1790. In 1791 he was called to the bar, and may be said to have become eminent from his very first appearance in the courts. A fine figure, a singularly familiar and unpretending style of elocution, and an almost unrivalled tact in managing a jury, caused him to have immense business. In 1818, after having twice been defeated in contested elections, he obtained a seat in parliament through the patronage of Earl Fitzwilliam. For very many years Mr Scarlett was considered a Whig, and voted as well as spoke in favour of the various measures proposed by Romilly and Mackintosh for the amelioration of the criminal code. On the formation of a mixed ministry under Canning, in 1827, he became attorney-general and received the honour of knighthood. In 1834, on the formation of the Peel cabinet, he was raised to the bench as chief baron, with the title of Lord Abinger. In his judicial capacity, he gave the highest satisfaction; nothing could be sounder than his law, or purer than his impartiality. Died, April, 1844, aged 75.

ABISBAL, HENRY O'DONNELL, Count of, a celebrated Spanish general, born in Andalusia, 1770. Having entered the royal guards at the age of fifteen, he served in the war against the French republic; and on Napoleon's invasion of Spain, the part he took in the relief of Gerona in 1809, led to his promotion to the command of Catalonia, where he displayed great energy, and reaped much success. Though defeated in the plains of Vich by General Souham, he a month afterwards forced Augereau to abandon Lower Catalonia; and, at the village of Abisbal, he compelled the surrender of a whole French column under General Schwartz. From this action he took his title. Towards the close of the war he commanded with brilliant success at the capture of Pancorvo. In 1819 he suppressed a mutiny of the troops in the isle of Leon; but he fell into disgrace on suspicion of treachery, and it was not till 1823, on the invasion of Spain by the French under the Duke d'Angoulême, that he recovered his position and his fame. After the restoration of Ferdinand, he retired to France, where he resided, almost entirely forgotten, till his death in 1834.

ABNEY, SIR THOMAS, an eminent magistrate of London, lord mayor in 1700, and M.P. for the city. When the king of France had proclaimed the Pretender king of Great Britain, he proposed an address to King William, and the measure having been followed by other corporations, proved of great service to the king, who was thereby encouraged to dissolve the parliament, and take the sense of the people, which was almost universally in favour of the Protest-

ACHMET III., son of Mohammed IV., was placed on the throne in 1703 by the Janissaries who had deposed his brother, Mustapha II. It was in the reign of this sultan that Charles XII. of Sweden was defeated by the Czar at Pultawa, and took refuge at Bender. Achmet was engaged in wars with the Russians, the Persians, the Venetians, and the Austrians. He was afterwards deposed, and his nephew, Mohammed V., raised to the throne. Died in prison, 1736.

ACKERMANN, RUDOLPH, an ingenious and enterprising tradesman, was born at Stolberg, Saxony, in 1764, and came to England previous to the French Revolution. After following for a time the occupation of a carriage draughtsman, he settled in the Strand as a printseller, where he established a flourishing and extensive concern, furnishing employment to numerous artists, and judiciously catering for the public taste in elegant and ornamental works of art. His "Forget me Not" was the first of that class of "Annuaire" which appeared in this country; and to him also are we indebted for the introduction and much of the success of the lithographic art; while the good taste and spirit he evinced in producing the "Histories" of Westminster, Oxford, &c., and other handsomely embellished works, entitle him to the respect of all who know how to appreciate them. Died, 1834.

ACKMAN, WILLIAM. [AIKMAN.]

ACOSTA, CHRISTOPHER, a Portuguese surgeon and naturalist of the 16th century; author of "A Treatise on the Drugs and Medicinal Plants of the East Indies," and other works.

ACOSTA, JOSE DE, a Spanish Jesuit and historian, was born at Medina del Campo about 1539. He held the chair of theology at Ocaña, passed in 1571, as a missionary, to South America, and was made provincial of his order at Peru. Returning to Europe after 17 years' service, he became rector of the University of Salamanca. His chief work, which is esteemed and has been translated into Latin, French, English, German, and other languages, is the "Historia natural y moral de las Indias." Died, 1600.

ACTON, JOSEPH, son of a physician, born at Besançon, in 1737. He entered into the French navy, and afterwards into that of the Grand Duke of Tuscany. His rescuing 4000 Spaniards from the Barbary corsairs, made him known at the court of Naples; and through the patronage of the queen, he became minister of the marine, and afterwards of the finances. He was dismissed from the ministry in 1803, and retired into Sielby, where he died in 1808.

ACUNA, CHRISTOPHER, born at Burgos, Spain, 1597, became a Jesuit in 1612, and subsequently a missionary in America. On his return to Spain, he published a "Description of the Great River of the Amazons."

ADAIR, SIR ROBERT, G. C. B., a distinguished diplomatist, was born in 1763. He was educated at Westminster and Göttingen with a view to the diplomatic service; and at the breaking out of the French Revolution, he made a lengthened sojourn in Berlin, Vienna, and Petersburg, to observe the results of that great event on the continental

powers. In 1802, he sat as M.P. for Appleby, and voted with the Whig party; and when Mr Fox was placed virtually, though not nominally, at the head of affairs in 1806, he appointed Mr Adair minister to the Court of Vienna. While in this position, he was frequently the butt of Mr Canning's wit; but when the latter became minister for foreign affairs in 1806, he selected Mr Adair as the fittest person to unravel the tangled web of our diplomatic relations with the Ottoman court; and at the termination of his successful mission in 1809, he was nominated G. C. B. and appointed ambassador at Constantinople, which office he held till 1811. For twenty years the exclusion of Sir Robert Adair's party from power left him unemployed; but in 1831 he was sent by Earl Grey on special missions to Brussels and Berlin, which occupied him till 1835, when he returned to England, and for his diplomatic services was rewarded with an annual pension of £2000. Besides being the author of numerous pamphlets on international questions, he published late in life "An Historical Memoir of a Mission to the Court of Vienna in 1806," and "A Memoir of the Negotiations for the Peace of the Dardanelles in 1808-9." Died, 1855.

ADALBERON, a celebrated archbishop of Rheims, and chancellor of France; who distinguished himself under Lothaire, Louis V., and Hugh Capet. Died, 988.

ADALBERT, archbishop of Prague, in the 10th century. He was one of the first founders of the Christian religion in Hungary; and also preached the gospel in Prussia, and in Lithuania, where he was murdered by Sego, a pagan priest. Boleslaus, prince of Poland, is said to have ransomed his body with an equal weight of gold.

ADALBERT, an ambitious, eloquent, and designing prelate, created archbishop of Bremen and Hamburg, 1043. During the minority of Henry IV. of Germany, he acted as regent, but his despotic conduct rendered him obnoxious to the people. Died, 1072.

ADAM, ALEXANDER, LL.D., well known to the literary and scholastic world by his "Latin Lexicon," "Roman Antiquities," &c.; raised himself to great eminence by almost unprecedented efforts, and became rector of the High School of Edinburgh, an office which he held till his death. Born, 1741; died, 1809.

ADAM, LAMBERT SIGISBERT, an eminent French sculptor, many of whose works were executed for the decoration of Versailles and St Cloud. Born, 1700; died, 1759.

ADAM, NICOLAS SEBASTIEN, brother of the above, and eminent in the same profession. He executed the admired statue of "Prometheus Chained." Born, 1705; died, 1778.

ADAM of Bremen, canon of the cathedral of Bremen about the close of the 11th century; author of an ecclesiastical history, and numerous other works; and indefatigable as a Christian missionary.

ADAM, MELCHIOR, a German divine and biographical author of the 17th century, to whose voluminous writings subsequent biographers have been greatly indebted. Died, 1622.

ADAM, ROBERT, F.R.S. and F.S.A.; a

as M.P. for Appleby, 'g party; and when truly, though not of affairs in 1806, he later to the Court of position, he was fre- Canning's wit; but minister for foreign Mr Adair as the tangled web of with the Ottoman nation of his succe- nominated G.C.R. or at Constantinople, 1811. S. and F.S.A.; a

celebrated architect, much employed upon the public buildings and noblemen's mansions of London. One of his works, executed in conjunction with his brother, is the range of buildings called the "Adelphi," the name being the Greek word for "Brothers." He at one time represented the county of Kinross in Parliament. Born at Kirkcaldy, Fifeshire, 1728; died, 1792. His brother James, the coadjutor in most of his labours, died, 1784.

ADAMNANUS, St, Abbot of Iona, was born about 625, became a monk, and was chosen abbot about 679. He wrote a Life of St Columba, and a work on the Holy Land, from accounts given him by Arculfus, a Gallic bishop. This book was esteemed an authority till the time of the Crusades. Adamnanus died about 704.

ADAMS, DR FRANCIS, was born in 1797, of humble parents; but his friends supported him at King's College, Aberdeen, where he took the degree of M.A., and adopted medicine as his profession. In the midst of a laborious practice he found time for a zealous study of Greek medical writers, and, being anxious to bring them before his profession by translations, he fixed on Pavius Aegineta, a physician of the sixth or seventh century, as giving the best idea of ancient medicine. This work was published by the Sydenham Society, together with a very learned commentary by Dr Adams. For the same Society he translated Hippocrates and Aretaeus, the original text being also given with the latter. Died February 26, 1861, aged 64.

ADAMS, JOHN, second president of the United States of America, and a political writer of considerable reputation. Before the Revolution, Mr Adams attained great eminence as a lawyer, and published an essay "On Common and Feudal Law." On the breach with the mother country, he espoused the colonial cause, and employed his pen with great activity. He was one of the principal promoters of the memorable resolution passed July 4, 1776, declaring the American States free, sovereign, and independent. Mr Adams subsequently proceeded with Dr Franklin to the court of France, in order to negotiate a treaty of peace and alliance with that country. He was afterwards nominated plenipotentiary to Holland, and materially contributed to hasten a rupture between the United Provinces and Great Britain. Lastly, he was employed in negotiating a general peace at Paris; and was the first ambassador received by this country from America after it was effected. This distinguished man also took a great share, in conjunction with Washington, Hamilton, and other federal leaders, in forming the present constitution of the United States, in 1787, when General Washington was elected president, and Mr Adams vice-president. On the retirement of Washington, Mr Adams was elected his successor; and, on the conclusion of his presidency, retired from public life, with the character of an able, active, independent, and upright statesman, even among those whose party views were opposed to his opinions. Born, 1735; died, 1826.

ADAMS, JOHN QUINCY, the sixth 'presid-

ent of the United States, son of John Adams, the second president; was born at Boston in 1767. His father having been appointed commissioner to France in 1778, embraced the opportunity of securing for his son all the advantages of an European education. When only fourteen years of age he went to Petersburg as private secretary to the American minister, and on his return to his native country he entered Harvard University, where he graduated with honour in 1787, and subsequently commenced the practice of the law at Boston. In 1794 he was appointed by Washington minister of the United States at the Hague; and in 1796 he went in the same capacity to Berlin, which office, however, he resigned on the defeat of his father, and Mr Jefferson's accession to the presidency, in 1801. Here too he wrote his famous "Letters from Silesia," which were favourably noticed in the Edinburgh Review. After representing Massachusetts in the United States Senate for six years, he went as ambassador to St Petersburg in 1809, and to the influence which his character and abilities procured for him at that court is mainly to be attributed the intervention of Russia which terminated in the treaty of peace between the United States and Great Britain. After the peace he was appointed ambassador to the court of St James's; and he subsequently acted as secretary of state during the administration of Mr Monroe. In 1825 he was himself elected president of the United States. His administration was a perfect illustration of the principles of the constitution, and of a republic purely and faithfully governed. On the expiry of his term of office, he retired into private life; but he was soon elected by his district as representative in Congress, and though he never afterwards held office, he long continued to benefit his country by his speeches and his pen. Manly, straightforward, and independent, he never swerved from what he believed to be the path of duty,—no easy matter in the United States, where party feeling runs so high; and he has left behind him a reputation for purity and disinterestedness of motives, second only to that of Washington. Died, 1848.

ADAMS, JOHN, "the patriarch of Pitcairn's Island," is famous for the share he took in the mutiny of the Bounty, in 1789, and in the subsequent establishment of the colony of the mutineers at Pitcairn's Island. His real name was Alexander Smith. Died, 1829.

ADAMS, SAMUEL, an active member of the first American congress, and one of the most powerful advocates of the political separation of that country from England. Born, 1722; died, 1803.

ADAMS, WILLIAM, an English divine of the 18th century, author of an answer to Hume on the Miracles. Died, 1789.

ADAMSON, PATRICK, archbishop of St Andrew's, in Scotland, and ambassador from James VI. to Queen Elizabeth; but chiefly remembered for his disputes with the presbytery, by which he was involved in ruin. Born, 1543; died, 1591.

ADAMSON, MICHEL, a celebrated French botanist, was born in Provence in 1747. His

family was of Scottish origin. He was educated at Paris under Réaumur and H. de Jussieu, and early showed a passionate fondness for the study of nature. He spent five years in Senegal, where he made large collections of natural objects, and accumulated a vast mass of observations. Dissatisfied with existing classifications in botany he proposed a new one, in which he to some extent anticipated the system of Jussieu. He projected an immense work on Natural History, for which he made collections, and to which he devoted himself for the rest of his life; but in the shock of the Revolution he lost his fortune and his places, saw his garden destroyed, and had his health ruined by want and calamity. The Directory gave him a pension, which Napoleon doubled. He was a member of the Institute and of the Academy of Sciences, to which he contributed numerous memoirs. He wrote "Voyage au Sénégal," and "Les Familles des Plantes," Died, 1804.

ADDISON, LANCELOT, an English divine, was born at Crosby Ravensworth, Westmoreland, in 1632. He early distinguished himself by his attachment to the Stuart family, and appears to have supported a consistent and upright character. He held the living of Milston, Wilts, with a prebend in the cathedral of Salisbury, and was eventually made dean of Lichfield. He died in 1703.

ADDISON, JOSEPH, the celebrated essayist and miscellaneous writer, was the son of Dr Lancelot Addison. He was born May 1, 1672, at Milston, in Wiltshire, and after receiving the rudiments of education at Salisbury and Lichfield, was sent to the Charterhouse, where he contracted his first intimacy with Mr. afterwards Sir Richard, Steele. At the age of 15 he was entered at Queen's college, Oxford, where he soon became distinguished for his skill in Latin poetry. At 22, he addressed some English verses to the veteran poet, Dryden; and shortly afterwards published a translation of part of Virgil's fourth Georgic. In 1695 he addressed a complimentary poem, on one of the campaigns of King William, to the Lord Keeper Somers, who procured him a pension from the Crown of £300 per annum, to enable him to travel. On his return home, in 1702, he found his old friends out of place; but, in 1704, he was introduced by Lord Halifax to Lord Godolphin, as a fit person to celebrate the victory of Blenheim, on which occasion he produced his poem entitled "The Campaign," for which he was appointed commissioner of appeals. After this he accompanied the Marquis of Wharton to Ireland, as secretary. While there, Steele commenced the "Tatler," to which Addison liberally contributed. This was followed by the "Spectator," which was also enriched by the contributions of Addison, whose papers are distinguished by one of the letters of the word *Clio*. This publication was succeeded by the "Gardener," a similar work, in which Addison also bore a considerable share. In 1713, his tragedy of Cato was brought upon the stage, and performed without interruption for 35 nights. In 1716, Addison married the Countess Dowager of Warwick; but the union is said to

have been far from happy. The following year he became secretary of state, which place he soon resigned, on a pension of £1500 a-year. In his retirement he wrote "A Defence of the Christian Religion," and also laid the plan of an English Dictionary, upon the model of the Italian *Della Crusca*. He closed his life in a manner suitable to his character. When given over by his physicians, Addison sent for his step-son, the young earl of Warwick, whom he was anxious to reclaim from irregular habits and erroneous opinions, and grasping his hand, exclaimed impressively, "See in what peace a Christian can die!" but whether this affecting interview had any effect upon the young earl is not known, as his own death happened shortly after. Addison died at Holland House, June 17, 1719, leaving an only daughter, who died, unmarried, in 1797. The poetical works of Addison, on which perhaps his fame at first chiefly rested, are now little read. They are without the deep thought and glowing passion which charm us in the poems of our own age, and are little more than the elegant exercises of an accomplished moralist. But his prose works have a lasting worth, and charm us by their gracefulness, delicate fancy, pure morality, and original humour, probably as much as they did the men and women of the generation for which they were written. As the first and best examples of a new style they hold a high place in the history of English literature.

ADELAIDE, MADAME, aunt to Louis XVI. of France. This princess, in order to avoid the sanguinary fury of the revolutionists, quitted Paris, accompanied by her sister, Mad. Victoire, on the 19th of February, 1791. After seeking protection in Rome, Naples, and other places, they found a temporary asylum in Corfu, from whence they were conveyed to Trieste by the Russian general Outschacoff, and there fixed their residence. Victoire died the 8th of June, 1799; and Adelaide survived her sister only nine months.

ADELAIDE, EUGENE LOUISE, princess of Orleans, and sister to Louis Philippe, ex-king of the French, was born 1777. Educated with the greatest care by Madame de Genlis, the princess passed her childhood in peaceful retirement, till the outbreak of the French Revolution compelled her with her governess to take refuge successively in the Netherlands, Switzerland, and Spain, where she resided with her mother till 1808. She then joined her brother Louis Philippe at Portsmouth, and participated in all the subsequent vicissitudes of his career. After the restoration, she contributed in no small degree to rally round her brother all the leading men to whose wishes for improvement the government of Louis XVIII. made no response; and during the "three glorious days" in 1830, it was mainly owing to her influence that her brother was induced to accept the crown, then offered—since retracted—by the people. She subsequently shared and aided the king's high fortune, by her judicious counsels and reflective courage; and it is not perhaps going too far to say, that had she lived to witness the 23rd of

February, 1848, Louis Philippe might not have persevered in a course which ultimately cost him and his family a crown. Madame Adelaide was privately married to Gen. Athalin, a peer of France. Died, Dec. 31st, 1847.

ADELAIDE, queen, dowager of Great Britain and Ireland, was born August 13, 1792. She was the eldest child of George, Duke of Saxe-Coburg Meiningen, and Louisa, daughter of Christian Albert, prince of Hohenlohe Langenburg. Her father died when she was only eleven years of age, leaving herself and a younger brother and sister under the guardianship of their mother. The early years of the Princess Adelaide were passed in great retirement. On the death of the Princess Charlotte, which took place November 6, 1817, and left the British empire without an heir to the crown in the third generation, negotiations were set on foot for the union of the Duke of Clarence with the Princess Adelaide, and the marriage took place on the 11th July, 1818. Few events of so much importance marked the domestic life of the Duke and Duchess of Clarence for many years after their marriage. In March, 1819, a daughter was born, but lived only a few hours; and a second daughter, the Princess Georgiana Adelaide, who was born on the 25th of December, 1820, expired on March 25, in the succeeding year. On the 26th of March, 1830, by the death of George IV., the Princess of Clarence passed from the retirement of Bushy Park to the throne. Twelve years had passed since there had been a queen consort to preside over the hospitalities and ceremonials of the court. In reforming the personnel as well as the morale of the court circle, Queen Adelaide undertook a task which was in many instances as painful and invidious as it was necessary, and which was accomplished with all gentleness and kindness. After a reign of seven years, Queen Adelaide passed once again into retirement, on the death of William IV., whom she had aided with unwearied care during the tedious illness which closed his life. The Queen Dowager, to whom Marlborough House had been assigned as a residence, with an income of £30,000 a year, thenceforward lived in privacy, avoiding even the honours which might be considered due to her rank and position. Her winters for several years were spent in the climate less ungenial than that of England, and the islands of Malta and Madeira were successively honoured with her Majesty's residence. But she never fully recovered, and towards the close of 1849, her debility assumed an alarming form, and, after lingering a few weeks, she died December 2, sincerely regretted by the people, to whom she endeared herself by her numberless acts of public and private benevolence, as well as by her constant practice of all the Christian virtues.

ADELER, CURTIUS SIVERTSEN, an eminent naval commander, born in Norway, 1822. He went to Venice, where he was made admiral; and, after performing many gallant exploits against the Turks, retired to Constantinople, where he ended his days in honour and tranquillity, being made admiral-in-chief of the Danish fleet, and created a baron. He died in 1875.

ADELUNG, JOHANN CHRISTOPH, a German philologist of great merit; chiefly celebrated for his "Grammatical and Critical Dictionary," 5 vols. 4to. Bonn, 1732; died, 1806.

ADEMAR, or AIMAR, a French monk of the 10th century, who wrote a Chronicle of France, published by Labbe.

ADLER, PHILIP, a German engraver of the 16th century, whose style of etching appears to have founded a school which gave rise to the Iopfers and Hollar. He died about 1530.

ADLERFELDT, GUSTAVUS, a Swedish historian in the time of Charles XII., whom he accompanied throughout his campaigns, of which he wrote an esteemed account; and it is not a little singular that his history is continued up to the very day when a cannon ball deprived him of life, at the battle of Pultawa, in 1709.

ADOLPHUS, JOHN, for many years well known as a barrister at the criminal courts of the metropolis, was born in London, in 1766. He was admitted an attorney and solicitor in 1790. Naturally fluent, ready, and acute, he was called to the bar in 1807, where his abilities attracted no decided attention until the year 1820, when his ingenious and elaborate defence of Arthur Thistlewood and the other "Cato Street" conspirators brought him prominently forward. As an historical writer also he obtained considerable reputation. His principal works are "The History of George the Third," 7 vols.; "Biographical Memoirs of the French Revolution," 2 vols.; "Memoirs of John Bannister, Comedian," 2 vols. &c. Died July 16, 1845, aged 79.

ADRETS, FRANÇOIS DE BEAUMONT, Baron des, a Huguenot leader, of a cruel, fiery, and enterprising spirit. It is said that resentment to the Duke of Guise led him to side with the Huguenot party in 1602; and he signalled himself by many daring exploits, the skill and bravery of which, however, were sullied with the most detestable cruelty. He afterwards went over to the Catholic side, and died universally hated, in 1587. It must, however, be admitted, that many of the aspersions with which historians have branded his memory, rest on very doubtful evidence.

ADRIAM, MARIE, a French girl, who, at the age of 16, fought valiantly during the whole time that her native town, Lyons, was besieged, in 1793. After the engagement she was arrested, and being asked how she had dared to use arms? she replied, "I used them to serve my country, and deliver it from its oppressors." She was instantly condemned and executed.

ADRIAN. [HADRIAN]
ADRIAN. There were several popes of this name. The first who bore it was a noble Roman, raised to the Papal chair in 772. Rome being threatened by the Lombards, Adrian obtained the aid of Charlemagne, who in 774 defeated Desiderius, and put an end to the Lombard kingdom. Charlemagne then paid a visit to Adrian at Rome, and a second in 787. Adrian embellished St. Peter's church, and expended vast sums in re-building the walls, and restoring the

ancient aqueducts of the city. He died in 795.

ADRIAN II. succeeded to the pontificate in 867. During the five years in which he filled it, his ambitious and intriguing disposition did much towards the subjection of the European sovereigns to the see of Rome. His arrogance received a sharp check from Charles the Bald, king of France, who refused to send Archbishop Hincmar to Rome, as the pope had required. The most important event of his pontificate, perhaps, was the separation of Photius, patriarch of Constantinople, from the Catholic church, the beginning of the separation of the Greek and Roman churches. Adrian died in 872.

ADRIAN III. was elected in 884, and died the following year, while on a journey to Worms, whither he was proceeding to hold a diet.

ADRIAN IV., the only Englishman who has attained the Papal dignity, was born towards the close of the 11th century, at Langley, near St Alban's. His name was Nicholas Breakspear; and, in his childhood, he was dependent for his daily subsistence on the charity of the monastery, to which his father was a servitor. Unable through poverty to attend the schools, he was refused admission into the monastery for deficiency in learning; and went to France, where he became a clerk in the monastery of St Rufus, near Avignon, of which he was afterwards chosen abbot. Eugenius III. made him a cardinal in 1146; and, two years afterwards, sent him legate to Denmark and Norway, where he made many converts. In Dec., 1154, he was chosen pope, and assumed the name of Adrian, on which Henry II. of England sent the abbot of St Alban's with three bishops to congratulate him. The pope treated the abbot with great courtesy, and granted the abbey extraordinary privileges; he also issued in favour of Henry the celebrated bull which sanctioned the conquest of Ireland. In 1155 he excommunicated the Romans, and laid an interdict on the city until they banished the famous reformer, Arnold of Brescia [see Arnold], and put an end to the republic which he had established. He also excommunicated the king of Sicily for ravaging the territories of the church; and, about the same time, the Emperor Frederic Barbarossa having entered Italy with a powerful army, and meeting Adrian near Sutrium, concluded a peace with him. At this interview Frederic, after two days' hesitation and debate, held the pope's stirrup while he mounted on horseback, and received from him the kiss of peace; after which the former was conducted to St Peter's church, and his holiness consecrated him king of the Romans. Adrian retired to Orvieto, was recalled to Rome, and again withdrew to Anagni, where he died in 1159.

ADRIAN V. was a Genoese, and was raised to the pontificate in 1276, but survived his elevation little more than a month.

ADRIAN VI., who succeeded Leo X., in January, 1522, was a native of Utrecht, of mean parentage, and born in 1459. He received his education at Louvain, and suc-

cessively became canon of St Peter, professor of divinity, dean of the cathedral, and vice-chancellor of the university, where he founded a college. Ferdinand, king of Spain, gave him the bishopric of Tortosa; and, in 1517, he was made cardinal. He was also appointed regent during the minority of Charles V., who procured him his election to the Papal chair. Died, 1523.

ADRIAN, DE CASTELLO, an Italian of great learning and ability, was born at Cornetto in Tuscany. By his talents he rose to several employments under Innocent VIII.; and came to England in the reign of Henry VII., who made him his agent at Rome, and gave him first the bishopric of Hereford, and afterwards that of Bath and Wells. Adrian farmed out the latter bishopric to Wolsey, living himself at Rome, where he built a superb palace, which he left to the king of England and his successors; and in 1503 he was made cardinal by Alexander VI. A vague prophecy had gone abroad that Leo X. should be succeeded by an Adrian; and Castello was so far the slave of superstition as to allow this absurd prediction to influence him in organising a conspiracy, the object of which was the dethronement of that pontiff, and his own elevation to the vacant chair. Before the plot was matured, the vigilance of Leo detected his designs, and a fine of 12,500 ducats was imposed upon him, with a peremptory command not to quit the Roman territories. He fled, however, from that city in 1518, and was excommunicated; and it is uncertain what became of him afterwards, though it is supposed he died in Asia.

AGIDIUS, DE COLUMNA, a Roman monk of the Augustine order, was a distinguished disciple of Thomas Aquinas, and obtained the appellation of the most profound doctor. He was preceptor to the sons of Philip III. of France, and taught philosophy and theology with high reputation at Paris. He died in 1316.

AGINETA, PAULUS, a celebrated Greek physician, who probably lived in the 7th century. He appears to have studied at Alexandria, and to have travelled through Greece and other countries, but little more is known of his life. He was an original thinker and observer, and was especially skilled in surgery. His works have been translated into many languages, and have been frequently republished. An English translation with commentaries appeared in 1844.

AGINHARD. [AGINHARDT.]

ÆLFERIC, son of an earl of Kent, and archbishop of Canterbury at the close of the 10th century, was one of the most learned men of the age in which he lived. He became a monk of the Benedictine order at Abingdon, under abbot Athelwold, who, on his promotion to the see of Winchester, took Ælferic with him to instruct youth in his cathedral. Here he drew up his "Latia and Saxon Vocabulary," which was published at Oxford in 1659. He also translated from the Latin into the Saxon language most of the historical books of the Old Testament, and wrote "Canons for the Regulation of the Clergy," which are inserted in

on of St Peter, pro-
of the cathedral, and

ppelman's Councils. He subsequently be-
ame abbot of St Alban's, and composed a
liturgy for the service of his abbey, which
was used in Leland's time. In 989, he was
eated bishop of Wilton; and, in 994, was
ranslated to the see of Canterbury, where
e exerted himself with spirit and prudence
in the defence of his see against the incur-
ous of the Danes. This active and able
elate died in 1005.

ELIANUS, CLAUDIUS, historian and rhe-
rician, was born in Italy, about 160. All
e works are in Greek, which he wrote with
e greatest purity. He was surnamed
oneytongue, on account of the sweetness
his style. The two works of Elian still
tant are a "Miscellaneous History," and a
ok on the Nature of Animals. They are
eily valuable for the passages taken from
her authors which they have preserved
us.

ELST, EVERHARD-VAN, a Dutch painter,
en at Delft in 1602, and died in 1655. He
as famous for his skill in painting fruit
ces and dead game. His nephew, Wil-
am VAN ELST, also distinguished himself
a painter, and studied in France and
ly, where he received flattering marks of
our. He died in 1679.

EMILIANI, ST JEROME, a Venetian
seman, who, being taken prisoner in his
ath, made a vow that, on his release, he
uld devote his life to the care of orphans.
pursuance of this pledge, he laid the
ndation of a hospital and religious order,
e object of which was to instruct young
ons, and particularly orphans, in reli-
on. To this and other pious works he
rified his whole income. Died, 1637. He
as canonized by Benedict XIV.

EMILIUS PAULUS, surnamed MACE-
ONICUS, a distinguished Roman noble
d general, son of Emilius Paulus, the
suli, who fell at the battle of Cannæ, was
n about B. C. 230. He served as praetor
Further Spain, and was chosen consul in
n, and again in 168. Sent to conduct the
r in Macedonia, he defeated Perseus at
na, assisted as proconsul in establishing
Roman government in the new province,
n on his return had a very splendid tri-
ph. His public glory had a bitter set-off
private sorrow, for he lost at the same
e two of his young sons. He held the
ce of censor in 164, and died four years
r. He was a man of singularly noble
d blameless character.

EMILIUS, PAULUS, an historian of great
brity, born at Verona. Thirty years of
life were employed in writing the history
France, from Pharamond down to Charles
II. Died, 1529.

ENEAS, or FENGUS, an Irish abbot or
op of the 8th century, who compiled a
ious account of Irish saints in five books,
e also wrote the history of the Old Testa-
nt in verse. Died probably between 819—

EPINUS, JOHN, a Franciscan friar, who
ame a zealous and able follower of Luther,
was appointed pastor of the church of
Peter, at Hamburg. Born, 1499; died,

ESCHINES, a celebrated Athenian orator,

born B. C. 390. He had tried his fortune in
various ways before he gained distinction as
an orator. He was twice sent on embassies
to Philip of Macedonia, and his conduct on
the second occasion exposed him to accusa-
tions of treachery; first, by Timarchus, over
whom he triumphed, and next, by his great
rival Demosthenes. His prosecution of Cle-
siphon in 330 gave occasion to the famous
oration "On the Crown" by Demosthenes.
Eschines then left Athens and settled at
Rhodes, where he founded a school. Died,
314.

ESCHYLUS, the great Athenian tragic
poet, was born at Eleusis, B. C. 525. He
distinguished himself at the great battles of
Marathon, Salamis, and Plataea, and his first
fame was that of a heroic and patriotic sol-
dier. He made poetry, however, his choice,
and devoted himself to it as his serious busi-
ness in life. He gained his first prize in 484.
He is said to have written seventy tragedies
besides satyric dramas, but we possess only
seven of them. These are "The Persians,"
acted in 472; the "Seven against Thebes;"
the "Suppliants," one part of a trilogy of
which the other parts are lost; the "Pro-
metheus Bound," the only part preserved
of another trilogy, and one of his sublimest
works; and the complete trilogy of the
Orestea, comprising the "Agamemnon,"
the "Choephoroi," and the "Eumenides."
Æschylus was the inventor of the trilogy,
i. e. the first who made the three plays re-
presented parts of a grand whole, each at the
same time being complete in itself. About
471 he went to Sicily, and spent some time
at the court of Hieron. After his return to
Athens he had a poetic contest with Sopho-
cles, who won the prize. Soon after the
exhibition of his last work, the Orestea, he
again retired to Sicily, where he died, B. C.
456. The political principles of Æschylus
were conservative, and placed him in oppo-
sition to the restless, innovating, and ambi-
tious democracy. Aristides was his ideal
statesman. His last grand trilogy was ex-
hibited for the purpose of saving the Areo-
pagus, then threatened by Pericles and the
popular party. In all his tragedies he re-
cognizes, with a noble faith, a divine power
guiding the course of events to the best issue
through all darkness and distress.

ÆSOP, the renowned Greek fabulist, lived
in the 6th century B. C. He was a Phrygian
by birth, was sold into slavery, but obtained
his freedom and went to the court of Croesus,
king of Lydia, where his wit and practical
wisdom made him a favourite. He after-
wards travelled in Greece, reciting his ap-
ologues, and teaching rulers and subjects his
home-truths. Sent by Croesus to Delphi, he
in some way offended the citizens, and they
killed him by throwing him down a precipice.
He did not write his fables, but they
were easily remembered, became universally
popular, and were passed on from mouth to
mouth, and from generation to generation.
How much of the original Æsopian fables
is preserved in our present collections it is
impossible to tell. Æsop was a contemporary
of the Seven Sages, and his statue was
set up with theirs at Athens 200 years after
his death. [BABRIUS.]

ÆSOPUS, CLODIUS, a Roman actor, contemporary and rival of Roscius, and like him the friend of Cicero, to whom he gave lessons on oratorical action. His excellence was in tragedy; and he entered so thoroughly into his part, as occasionally to lose all recollection of his own identity. Plutarch asserts, that once, when performing the character of Atræus, he was so transported with fury, as to strike a servant with his sceptre, which killed him on the spot. Æsopus was greatly addicted to luxury; yet, notwithstanding, so well was he rewarded, that he left a fortune equal to £160,000.

ÆTIUS, a famous Roman general, who lived under the third Valentinian, and nobly defended the declining fortunes of the empire, thrice vanquishing the Burgundians and Franks, and driving the ferocious Attila beyond the Rhine; but having excited the jealousy of the dastardly emperor, he was stabbed by him, in 454.

ÆFER, DOMITIUS, an ancient orator, born at Nîmes. During the reigns of Tiberius, Calligula, Claudius, and Nero, he made himself formidable as an informer, and contemptible as a flatterer. Under Calligula he was made consul. Died, A. D. 59.

AFFRY, LOUIS AUGUSTINE PHILIP, Count, a Swiss statesman, appointed chief magistrate of Switzerland after Buonaparte had proclaimed himself protector of the Helvetic confederacy, was born at Freyburg, in 1743. From the commencement of the French revolution, when he commanded the army on the Upper Rhine, till his death, he bore a prominent part in the affairs of his country; but, finding the power of the French irresistible, he endeavoured to promote the views of Buonaparte, by assisting in the formation of the government; while he displayed the skill of an experienced statesman in endeavouring to benefit the interests of his countrymen, and to shield them from the perils of war. Died, 1810.

ÆFRANIUS, a Latin dramatist, who lived about 100 years B. C., and wrote several comedies in imitation of Menander.

ÆFRICANUS, JULIUS, an eminent Christian historian of the 3rd century; principally known by a chronological work in five books, which contains a series of events from the beginning of the world to the year of Christ, 221.

ÆGARD, ARTHUR, an English antiquary of great learning and research, one of the original founders of the Antiquarian Society, was born in Derbyshire, 1540, and died, 1615.

ÆGASIAS, a sculptor of Ephesus, celebrated for his admirable statue called the Gladiator, which was found with the Apollo Belvedere at Nettuno, the ancient Antium.

ÆGATHARCHUS, a Greek painter, born at Samos. Vitruvius speaks of him as the first who painted scenes for the theatres. He flourished probably about B. C. 480.

ÆGATHOCLES, the tyrant of Syracuse, was the son of a potter, and was born at Thermæ about B. C. 361. He was remarkable for strength and beauty, and early obtained military distinction and command. By marrying the widow of his patron Damas he acquired wealth and influence, but being suspected of ambitious designs, was twice

banished from Syracuse. He collected forces, defeated the armies of Syracuse and Carthage, and got himself made first protector, and then sovereign of Syracuse, B. C. 317. It is said to have put to death 4000 Syracusans, and to have banished 6000 more. He conquered great part of Sicily, was defeated by the Carthaginians at Himera, and then carried on war with them in Africa. He afterwards suppressed a revolt in Sicily, and made an expedition to Italy. Died, by poison, according to some authorities, B. C. 289.

ÆGELADAS, an admired Greek sculptor, who lived about B. C. 500. Myron, Phidias, and Polyctetus were his pupils.

ÆGELNOTH, an Anglo-Saxon prelate, promoted to the see of Canterbury in 1020. He distinguished himself by great religious zeal, and still more by the firm manner in which he refused, on the death of Canute, to crown Harold, who had seized the throne in the absence of his brother, Hardicanute. Died, 1038.

ÆGESANDER, a Rhodian sculptor, supposed to have lived in the 1st century. He is celebrated for having, in conjunction with Polydorus and Athenodorus, executed that admirable monument of Grecian art, the Laocoon, which was discovered in the 16th century near the baths of Titus.

ÆGESILAUS II., king of Sparta, succeeded his brother Agis II. He acquired great renown by his exploits against the Persians, and by the successful maintenance of the war against the Thebans and Athenians, whom he defeated at Coronea. The supremacy which he well-nigh recovered for Sparta was finally lost at the battle of Leuctra. Agisilaus afterwards went to assist Tachos, in his attempt to take the throne of Egypt, but was bribed to espouse the part of Nectanabis, his antagonist. On his return, he died in Africa, 360 B. C., after a reign of 38 years.

ÆGAS, RALPH, a surveyor and engraver of the 16th century, who first drew a plan of London, which, although referred to the time of Henry VIII. and Edward VI., appears not to have been made on wood until about 1560. It was re-published in 1618, and re-engraved by Vertue in 1748. He also drew plans of Oxford, Cambridge, and Dunwich, in Suffolk. Died, 1573.

ÆGILULF, king of the Lombards, crowned at Milan in 591. Soon after his accession, he quitted the Arian communion for the Catholic, in which he was followed by numbers of his subjects, many of whom had hitherto been Pagans. In the third year of his reign, he had to sustain a war against some of his own rebellious dukes, whom in the end he forced to submit; and having secured and augmented his dominions, and employed himself in rebuilding and endowing churches, he died in 619.

ÆGIS III., king of Sparta, succeeded his father, Archidamus III., B. C. 338. He was a prince of great magnanimity; and, though he detested the Macedonian domination, he would not expose his country to ruin by resisting it, until Alexander was deeply engaged in his Persian expedition; when he raised an army of 20,000 men, which was defeated by Antipater, governor of Macedonia, and Agis himself slain. Being carried

He collected forces, Syracuse and Carthage first protector, Syracuse, B. C. 317- to death 4000 Syracuse 6000 more. He Sicily, was defeated Himera, and then them in Africa. He revolt in Sicily, and Italy. Died, by authorities, B. C. 289. Greek sculptor, O. Myron, Phidias, pupils. severely wounded from the field, the soldiers who bore him were on the point of being surrounded by the enemy; on which, commanding them to set him down, and preserve their own lives for the service of their country, he fought alone on his knees, and killed several of the assailants, till he was struck through the body with a dart, B. C. 330.

AGIS IV., king of Sparta, was the son and successor of Eudamidas. His first attempt was to renew the original law for the equal division of land, which was opposed by a party at the head of which was his colleague, Leonidas. The latter was deposed, and the joint sovereignty devolved to his son Cleombrotus, who entered into the views of Agis. Previously, however, to a partition of the lands, Agesilaus, uncle to Agis, who was deeply in debt, proposed the abolition of all debts, which would render the former measure more palatable. This accomplished, the influential and wily Spartan found means to postpone the other change, until Agis was absent on an expedition sent to the aid of the Achæans. During his absence a conspiracy was formed to restore the deposed king, Leonidas, which succeeding, Agis and his colleague, Cleombrotus, took sanctuary in a temple. The latter was immediately dragged forth and banished, but Agis remained a considerable time in safety, until his friends were bribed to betray him, and he was thrown into prison. He suffered death with great magnanimity, B. C. 240.

AGLIONBY, JOHN, a learned divine, born in Cumberland. He was made chaplain to queen Elizabeth, assisted in the authorized translation of the New Testament, and died at Islip, of which he was rector, in 1610.

AGNES of Méranie, queen of France, was daughter of Berchtold, duke of Méranie, and was married, in 1196, to Philip Augustus, king of France, who had three years previously married and repudiated the princess Engelburga of Denmark. The marriage of Agnes being declared void by the pope, and an interdict being laid on France, in 1200, on account of it, Philip separated himself from Agnes, who soon after died broken-hearted at Poissy, 1201.

AGNESI, MARIA GAETANA, an Italian lady of extraordinary talents, born at Milan, 1691. So profound were her mathematical attainments, that when, in 1750, her father, who was a professor in the university of Bologna, was unable to continue his lectures on consequence of ill health, she obtained permission from the pope to fill his chair. In the early age of 19, she had supported 91 cases, which were published in 1738 under the title of "Propositiones Philosophicæ." She was also acquainted with the Latin, Greek, Hebrew, French, German, and Spanish languages. Agnesi retired to the monastery of Blue Nuns, at Milan, where she died in advanced age, in the year 1799.

AGNOLO, BACCIO, a Florentine sculptor, architect of great reputation. He was distinguished for his carvings in wood; while he lived at Rome, Michael Angelo, Raffelle, and other great artists, were among visitors to his studio. Born, 1460; died,

AGORACRITUS, a Greek statuary in the

5th century B. C. He was a pupil of Phidias, and one of the most skilful artists of his time.

AGRICOLA, CNEIUS JULIUS, an eminent Roman commander, born A. D. 37, in the reign of Caligula. His first military service was under Suetonius Paulinus in Britain; and, on his return to Rome, he was made questor in Asia, and became tribune of the people, and prætor under Nero. By Vespa- sian, whose cause he espoused, he was made a patrician and governor of Aquitania; the dignity of consul followed; and, in the same year, 77, he married his daughter to Tacitus the historian, who has so admirably written his life. Next year he was appointed go- vernor of Britain; extended his conquests into Scotland; and built a chain of forts from the Clyde to the Frith of Forth, to prevent the incursions of the inhabitants of the North. He defeated Galgacus on the Gram- pian Hills, and there made peace with the Caledonians. On the accession of Domitian, Agricola had a triumph decreed him, but was recalled, and, retiring into private life, died, A. D. 93; aged 54.

AGRICOLA, GEORG, the most celebrated metallurgist of his time; born at Glauchen, Misnia, in 1494, and died, 1555.

AGRICOLA, GEORG ANDREAS, a German physician, author of a curious work on the multiplication of trees and plants, of which a French translation appeared at Amsterdam in 1720. He was born at Ratisbon, 1672, and died, 1738.

AGRICOLA, JOHANN, a polemical writer of celebrity, born at Eisleben, Saxony, 1492, and died at Berlin, 1566. From being the friend and scholar, he became the antagonist of Martin Luther, against whom, as well as Melancthon, he maintained a spirited con- troversy, advocating the doctrine of faith in opposition to the works of the law, whence the sect of which he became leader received the name of Antinomians.

AGRICOLA, RODOLPHUS, one of the most learned men of the 15th century, spoken of by Erasmus with great respect, was born in Friesland, 1442, studied at Louvain and Paris, and then went to Italy and attended the lectures of Theodoro Gaza on the Greek language, at Ferrara. He became a professor at the university of Heidelberg in 1482, and died there in 1485. He was known as a poet, painter, and musician. His most important work is his "Dialectics," in which he appears as one of the earliest opponents of the prevailing scholastic system, and which was ordered by Henry VIII. to be used at Cambridge.

AGRIPPA, CAMILLO, a celebrated archi- tect of Milan in the 16th century, who, under the pontificate of Gregory XIII., accom- plished the removal of a vast obelisk to St Peter's Square; an account of which labour he published at Rome, 1583.

AGRIPPA, HENRY CORNELIUS. This highly-gifted but eccentric man was born in 1486, at Cologne, of a noble family. He became secretary to the Emperor Maximilian, by whom he was knighted for his bravery in the Italian wars. He next travelled through various parts of Europe, and, while in Eng- land, wrote a commentary on St Paul's Epistles. In 1618 he settled at Metz, which

place, however, he was obliged to quit, at the instigation of the monks, and went to Cologne, and thence to Geneva. He next travelled to Antwerp, in 1528, and was taken into the service of Margaret of Austria, governess of the Low Countries. In 1530 he published his treatise of the "Vanity of the Sciences," and soon afterwards his "Occult Philosophy." In 1535 he was at Lyons, where he was imprisoned for defaming the king's mother, but soon obtained his discharge, and died the same year at Grenoble. All his works were collected and printed at Leyden, 1550, in 3 vols.

AGRIPPA I., HEROD, grandson of Herod the Great. He gave great offence to Tiberius, who threw him into prison; but, on Caligula's succession, was not only released, but received from that emperor a golden chain equal in weight to the iron one he had worn in his confinement, as also the kingdom of Judea. He commenced a persecution of the Christians, in which the apostle St James perished; and after a reign of seven years died at Casarea, as related in the Acts of the Apostles, A.D. 43.

AGRIPPA II., HEROD, son and successor of the preceding, was the seventh and last of the Jewish monarchs of the family of Herod the Great. It was before this prince that St Paul pleaded his cause with so much eloquence that Agrippa acknowledged he had almost persuaded him to be a Christian. He died at Rome about the year 94.

AGRIPPA, MARCUS VIPSANIUS, a distinguished Roman commander, and the associate and friend of the Emperor Augustus, was born B.C. 63. He took a leading part in the civil wars, which followed the death of Julius Cæsar; became consul in 37; obtained a naval victory over Sextus Pompeius in the following year, and chiefly contributed to the victory of Augustus (then Octavius) at Actium, in 31. He was once ædile, consul again in 28 and 27, and three times tribune. He spent large sums on public works, and in his third consulship built the Pantheon. He seemed to be marked out as the successor of Augustus, whose daughter Julia he married on the death of Marcellus. Julia was his third wife. Vipsania, his daughter, by his first wife, was married to Tiberius; and Agrippina, one of his daughters, by Julia, became the wife of Germanicus. Agrippa was twice made governor of Syria, and distinguished himself by his wise and just administration. Died, B.C. 12.

AGRIPPINA, the elder, daughter of Marcus Vipsanius Agrippa, was married in the first instance to Tiberius, who divorced her, and she became the wife of Germanicus Cæsar, whom she accompanied in his military expeditions. On the death of the latter at Antioch, A.D. 17, she returned to Rome with his remains, and took advantage of the public grief for the death of her husband to accuse Piso, who was suspected of having hastened it. The latter was shortly afterwards found dead in his bed; and Tiberius, jealous of the affection of the people for Agrippina, banished her to a small island, where she died of hunger, in 38.

AGRIPPINA, the younger, daughter of Germanicus and the elder Agrippina, and

mother of Nero, was at once cruel and licentious. After losing two husbands, she married her uncle, the Emperor Claudius, whom she poisoned in 54, to make way for the elevation of her son Nero. She ruled in his name, but after a few years he caused her to be assassinated, and exhibited to the senate a list of all the crimes of which she had been guilty.

AGUESSEAU, MARQUIS D'. [D'Aguesseau.]

AGUILAR, GRACE, a pleasing moral writer of the Jewish persuasion, was born at Hackney, 1816. Her first work was the "Magic Wreath;" but this was far exceeded in merit by her "Home Influence" and her "Vale of Cedars," &c., published posthumously. The promising career of this authoress was cut short at Frankfort, July, 1847.

AHMED PASHA. [Jezzar.]

AHRENDT, or ARENTS, MARTIN FREDERICK, antiquary and paleographer, was a native of Holstein. He spent forty years in travelling on foot through Norway, Sweden, Denmark, France, Spain, Italy, and other parts of Europe, in search of Scandinavian antiquities and Runic monuments, and carried on an extensive correspondence with his learned contemporaries relative to the objects of his investigation. He died at a small village near Vienna, in 1824.

AIDAN, St, bishop of Lindisfarne, and the "Apostle of Northumbria," was at first a monk of Iona. When Oswald succeeded to the kingdom of Northumbria, and desired to recover his people from the apostasy into which they had fallen, he sent to the Cui-dees (monks of Iona), among whom he had been brought up, for religious teachers. Aidan answered to his call, and devoted himself with zeal, patience, and wisdom to the great task. In 635 he settled on the island of Lindisfarne, and there founded a monastery, which flourished about 200 years, and was at last destroyed by the Danes. The see of Lindisfarne was ultimately transferred to Durham. Aidan died, 31 August, 651.

AIKIN, JOHN, M.D., born Jan. 15, 1747, at Kibworth, Leicestershire, was the only son of Dr T. Aikin, a dissenting minister and schoolmaster. In 1764 he became a student in the university of Edinburgh. On his return he went to Yarmouth, Norfolk, where, with little interruption, he continued till 1792, when he removed to London, and devoted himself chiefly to literature, in which he was eminently successful. In 1796 he became the editor of the Monthly Magazine, which he superintended from its commencement till 1806. He published, in conjunction with Dr Enfield, the first volume of a General Biographical Dictionary, in 4to, which, however, was not completed till 1815. Dr Aikin was also the author of the well-known and favourite "Evenings at Home," and of a "Natural History of the Year," which has served as a model for subsequent works of the same class. Died, 1822, aged 75.

AIKMAN, WILLIAM, a Scotch painter, born at Cairney, in 1682. He was the friend of Allan Ramsay, the poet Thomson, Pope, &c. Died, 1781.

ance cruel and licentious husbands, she married Claudius, whom she loved. She ruled in his stead. She caused her husband to be banished to the senate which she had been

AGUES, D. [D'Agues-

was a pleasing moral philosopher, was born in 1610. His first work was the "De la Vérité," which was far exceeded in influence." and her published posthumous work of this author's effort, July, 1647.

AGUIRRE, MARTIN FRA-
nco-Spanish geographer, was spent forty years in the North, Sweden, Italy, and other parts of Scandinavia. He was a correspondent with the king relative to the war. He died at a young age, in 1624.

AGUIRRE, MARTIN FRA-
nco-Spanish geographer, was born in 1610. He succeeded to the office of apostasy into the Catholicism, and was sent to the Council of Trent, where he had religious teachers.

AGUIRRE, MARTIN FRA-
nco-Spanish geographer, was born in 1610. He succeeded to the office of apostasy into the Catholicism, and was sent to the Council of Trent, where he had religious teachers.

AILLY, PIERRE D' (Petrus de Alliaco), celebrated French cardinal, born at Combray in 1350. He early entered the college of Navarre, Paris, and distinguished himself by his attainments in theology and philosophy. In 1380 he was appointed Grand Master of his college, and contributed greatly to its increased renown. Nine years later he became chancellor of the university of Paris, and confessor to the King Charles VI. In 1396 he was made bishop of Cambrai, and in 1411 cardinal. He took a distinguished part at the council of Pisa, and was president of the Council of Constance, when John Huss was condemned. He was learned, eloquent, and earnest; he advocated a reform of the church, but stoutly opposed the doctrines of Huss. He acquired the title of the "Hammer of Heretics." Among his numerous works are "Libellus de emendatione Ecclesie," and "Meditationes circa Septem Psalmi Penitentiales." The French translation of the latter was one of the earliest books printed. Died, 1420 or 1425.

ALMOIN, of Aquitaine, author of a legendary history of France, is supposed to have lived in the 9th century. The history brought down to 1165 by another hand; it is in the third volume of the Collection Duchesne.

ALNSWORTH, HENRY, an eminent biblical commentator and divine among the English nonconformists, flourished at the latter end of the 16th century. His writings exhibited much learning and acuteness, and attracted the attention of Hall, bishop of Exeter, who entered the lists against him. He subsequently went to Amsterdam, where he died in 1622.

ALNSWORTH, ROBERT, a distinguished geographer. His most important work is well-known Latin Dictionary. He was native of Woodvale, in Lancashire, and was born in 1660. He died in London in 1738. His Dictionary was first published in 1708, and has passed through many editions, and has long been superseded.

ALTON, WILLIAM, an excellent botanist, was born in Lanarkshire. He was a pupil of Philip Miller of the Chelsea Physic-Garden, and became a great favourite with George III., who appointed him head-gardener at St. James's in 1759. In this situation he formed one of the best collections of rare exotic plants in the world, a catalogue of which he published in 1789, under the title of "Hortus Altoniensis," an elaborate work in 3 vols. It is numbered among his friends the great naturalist Sir Joseph Banks, and the painters Gainsborough and Zoffany. Died, 1733.

ALTMAN, LEO, an historian of Friesland, was born in 1600, and died, 1669. He was author of the History of the United Provinces, from 1568-1668, in 15 vols.; an extremely valuable work, especially for the number and importance of original documents, memoirs, &c., which it contains.

ALTKER, sultan of the Moguls, was born in 1642, and succeeded his father Humayun in his fourteenth year. The supreme power was for a time vested in Behram Khan, a distinguished commander; but in 1660 Akber took the government into his own hands. His empire was then in a weak, distracted,

and disorganised state, and the young sovereign at once applied himself with many energy to the task of its restoration. His aim was to become the head of the whole Indian nation. Revolts of officers in various provinces had to be suppressed, and then the numerous provinces which had been lost had to be reconquered. Thus he was involved in a long course of wars, the result of which was the extension of his empire from the narrow limits of the Punjab and the country round Delhi, till it comprehended fifteen provinces. But Akber is yet more famed for the wisdom and impartiality of his internal policy than for his conquests. He showed a singular spirit of toleration in religion, and would fain have established a new religion, which should be common to all his subjects. He made great reforms in the revenue system and in the army, and provided carefully for the local government of provinces, for the administration of justice, and the regulation of the police. He promoted commerce, and science, and literature, took part in religious and philosophical discussions, and had for his chief personal friend the great scholar Feizi, and his brother, the statesman Abul Fazl. His last years were saddened by the misconduct of his three sons. Died, after a reign of 50 years, in 1605.

AKENSIDE, MARK, poet and physician, was born in 1721 at Newcastle-upon-Tyne. He finished his studies at the universities of Edinburgh and Leyden, in the latter of which he took his degree as a doctor of medicine in 1744. In the same year appeared his principal poem, "On the Pleasures of the Imagination," which immediately attained immense popularity, and long retained it. This was followed by the "Epistle to Curio," a satire; and, in 1745, he published ten odes on various subjects. He continued, from time to time, to send forth his poetical compositions, most of which appeared in Dodsley's Collection. Dr Akenside also wrote a number of medical works. He died in 1770, aged 49. The "Pleasures of Imagination" is scarcely readable now. It is more a rhetorical exercise and a tiresome display of fine writing than a poem.

AKERBLAD, JOHN DAVID, a learned Swede, who accompanied the Swedish embassy to Constantinople, and distinguished himself as an oriental linguist and antiquary. Died, 1819.

ALAMANNI, LODOVICO, a Florentine poet and statesman, was born in 1495. Involved in a plot against the Cardinal Giulio de Medici, he fled to France, and was sent ambassador from Francis I. to the emperor. His works are "La Coltivazione," "Opere Toscane," "Girone il Cortese," &c. Died, 1556.

ALAN, ALLEYN, or ALLEN, WILLIAM, an Englishman of good family, was born at Rossal, Lancashire, in 1531. Educated at Oxford by a tutor warmly attached to popery, he entered upon the world under a strong prepossession in favour of the Catholic faith; and, while very young, became principal of St Mary's College, and proctor of the university. On the accession of Elizabeth, he went to Louvain, and was appointed head of

the English College. He now strenuously exerted himself, both by his writings and example, to advance the papal cause; and by his suggestions Phillip II. was induced to undertake the invasion of England; to facilitate which, Alan published a defence of the pope's bull against Elizabeth, with an exhortation to her subjects to rise in favour of the Spaniards. For these services he was made cardinal and archbishop of Mechlin. It is said, that towards the close of his life he repented of the measures he had recommended against his country; and, on his death-bed, wished to address the English students at Rome, but was prevented by the ascendant Jesuit. He died in 1594, not without suspicion that he was poisoned.

ALAND, Sir **JOHN FORTESCUE** (Lord Fortescue), a baron of the Exchequer, and a pious judge of the courts of King's Bench and Common Pleas, in the reigns of George I. and II., was descended from the famous Sir John Fortescue, lord chief justice and lord high chancellor of England in the reign of Henry VI. He was born in 1670, and received his education at Oxford; was an able lawyer, an impartial judge, and well versed in Anglo-Saxon literature. Died, 1746.

ALARCON Y MENDOZA, JUAN RUIZ DE, one of the greatest Spanish dramatists, was born in Mexico. He was of a noble family of the town of Alarcon in Spain, and it is presumed that he came to Europe about the latter end of the 16th century. Almost nothing is known of the events of his life. In 1628 he held the lucrative office of Prolocutor of the Royal Council for the Indies, and the same year published a volume of plays. He published a second volume in 1634. Alarcon was a humpback, enormously concealed, and very unpopular among his countrymen. Though he wrote at least twenty dramas, his name was forgotten and his works neglected for nearly two hundred years; but his fame has now revived, his works have been newly edited, some of them are translated into French, and he is now admitted to rank next to Cervantes and Lope de Vega; and even in one respect to rival them—the delineation of character. The moral tone of his dramas is, for his age, very high, and in his *dramatis personis* we have specimens of the best Spaniards, both men and women, of his time. One of his best plays is "La Verdad Sospechosa," or Suspected Truth, of which Corneille made a very clever translation and adaptation in "Le Menteur." This was re-translated into Spanish, and became very popular, no one suspecting its origin. Among Alarcon's other plays are "Change for the better," "How to gain friends," and "The Weaver of Segovia." Died, 1639.

ALARIC I., king of the Visigoths, and conqueror of Rome, was descended from a noble Gothic family, and for some years served in the Roman armies; but on the death of Theodosius he put himself at the head of his countrymen, who threw off the Roman yoke, and led them into Greece. In the following year, 555, Stilicho was sent against him, and he was driven out of Greece. In the year 400, being then the acknowledged sovereign of the Visigoths, he invaded Italy. In 402,

he made a second irruption, but was defeated by Stilicho at Pollentia, in 403, and compelled to make peace. After this, he was employed in the service of the Emperor Honorius, but in 408 he again entered the Roman territory, and laid siege to the capital. His terms were complied with, and he retired into Tuscany; but, being joined by his brother, Ataulphus, he returned and besieged Rome a second time in 409, only retiring on his own terms. He renewed the siege a third time in the following year, when the city was taken, and given up to pillage for six days. After ravaging Southern Italy he was preparing to pass into Africa, when he fell suddenly ill and died at Cosenza, in the autumn of 410. His followers deposited the remains of their beloved leader in a grave dug in the bed of the river Bucento, its course being turned awhile for the purpose.

ALARIC II., king of the Visigoths, succeeded his father Euric in 485, and reigned over all the country between the Rhone and the Garonne. He adapted to his states the Theodosian collection of laws, and published an abridgment of it as the law of the Visigoths, since known by the title of the code of Alaric. He was slain in battle by Clovis, king of the Franks, 507.

ALASCO, JOHN, uncle to Sigismund, king of Poland, was born in 1499. He was in great esteem with most of the learned men of his day, and enjoyed the friendship of many of them, particularly Erasmus and Zuinglius, through which he became a convert to the Protestant faith; to which he was so zealously devoted as to obtain the title of the Reformer of Poland. He died at Frankfurt, in 1560.

ALBA, Duke of. [ALVA.]

ALBAN, ST, said to be the first Christian martyr in Britain, lived at Verulam, and having given shelter to a priest was arrested, and refusing to save himself by denying the faith, was beheaded. The abbey of St Alban's was built on the scene of his martyrdom. Died, 304.

ALBANI, ALESSANDRO, an eminent virtuoso, born at Urbino, 1692, raised to the rank of cardinal by Innocent XIII., and died, 1779, aged 87, very highly esteemed. In 1762, his collection of drawings and engravings, consisting of 300 volumes, was purchased by George III. for 14,000 crowns.

ALBANI, GIOVANNI FRANCESCO, nephew of the above, was born at Rome, 1720, and in 1747 was made a cardinal. He opposed the suppression of the Jesuits, as a measure fraught with danger to the church; but, in all other respects, was a most enlightened prelate. He imitated his uncle in his encouragement of letters and learned men; but when the French entered Rome they plundered his palace, confiscated his estates, and reduced him, then in his 77th year, to poverty: his valuable collection was sent off to Paris, and even the plants of his garden were rooted up and sold. Amidst this devastation the cardinal took refuge in a convent, whence he removed to Naples; and returned to Rome, in 1800, where he lived till his death in 1803.

ALBANI, or ALBANY, Countess of, was the Princess Louisa Maria Caroline, who

tion, but was defeated in 403, and compelled his, he was employed as Emperor Honorius, but the Roman territory, &c. His terms were retired into Tuscany; brother, Ataulphus, in Rome a second time his own terms. He died time in the following was taken, and given says. After ravaging preparing to pass into suddenly ill and died at of 410. His followers of their beloved the bed of the river g turned a while for

Y, Countess of, was Maria Caroline, who

married Charles Stuart, "The Pretender." He was cousin of the last reigning prince of Stolberg-Gedern; was born in 1753; married in 1772, when she took the title of Countess of Albany; but to escape from the barbarity of her husband, who lived in a continual state of intoxication, she retired, in 1780, to closter. At his death, in 1788, the French court allowed her an annuity of 60,000 livres. She soon after secretly married the poet Al-ri, and settled at Florence. Widow a second time in 1803, she survived the house of Stuart, which became extinct at the death of her brother-in-law, the Cardinal of York, in 1807, and died at Florence, in 1824.

ALBANI, FRANCESCO, a very celebrated painter, born at Bologna, 1778, and died, 1810. Albani studied with Guido under the name of Albani, and attained great excellence in delineating feminine and infantine beauty.

ALBANI, GIOVANNI BATTISTA, a younger brother of the above, was also a painter, and excelled in landscape.

ALBATEGNI, a distinguished Arabian astronomer, was born in Mesopotamia, and flourished in the ninth and tenth centuries. His astronomical observations, continued for nearly 60 years, and the important improvements he made in the method and instruments of observation, obtained for him the name of the Ptolemy of the Arabs. He lived at Bagdad, and died in 929.

ALBERONI, GIULIO, cardinal and first minister of Spain, was born in the Duchy of Parma in 1684. He entered the church, and afterwards became secretary to the duke of Modena, then commanding the French army in Italy. He accompanied Vendôme to France and to Spain, was named agent of the duke of Parma at Madrid, ingratiated himself with the king, Phillip V., and got himself made cardinal and first minister. He immediately formed, and began to execute, schemes for the extension of the power of France, invading Sardinia and Sicily, and trying on intrigues in France, England, and Turkey; but the alliance of France and England against him defeated his projects, led to his dismissal and exile. He went to Rome, was subsequently legate to the Pope, where he indulged his passion for pleasure, spent his last years in retirement, and died in 1752.

ALBERT, FRANCIS AUGUSTUS CHARLES MANUEL, Prince Consort of England, the second son of H. R. H. Ernest, Duke of Saxe-Coburg Saal-feld, was born at Ehrenburg, August 26, 1819. He was educated at the castle under his father's supervision, and was selected from the College of Coburg, in May, 1837, he, with his elder brother, the present Duke Ernest, entered the University of Bonn, as a student in law. Here he remained till September, 1838, having acquired a high reputation for his attainments in science and art, together with the esteem and love of the whole people of Bonn for his blameless life and his unbounded charity to the poor. Besides his studies in jurisprudence and history, which were most diligently prosecuted, his leisure hours were devoted to music and painting, in both of which he had great proficiency. His "Saxony Minstrel Boy," painted during his

student life, now one of the most prized pictures in the Queen's collection, may be mentioned as a proof of his great ability in the latter art. At Bonn his greatest friends were Count Bucci and Professor Welcker; he was also most highly esteemed by Schlegel, who, professing to detest "princelings," readily extended his friendship to Prince Albert. In 1838 he visited England with his father for the coronation of the Queen, and remained in Windsor and London longer than the guests of higher rank. In 1839 the visit was repeated; and after it the Queen announced to the Privy Council her intention to ally herself in marriage with Prince Albert of Saxe-Coburg Gotha. When the marriage was notified to Parliament in the Queen's Speech of January 16, 1840, the Duke of Wellington proposed, as an amendment to the address, the insertion of the word "Protestant" before "Prince," as a guarantee for the religious securities of the English people. Thus, in his twenty-first year, Prince Albert, having been naturalized by Act of Parliament, became the second person in the English realm, and entered on a position of unusual difficulty. Precluded from all open interference in the conduct of government, he was yet the nearest adviser of the Crown, surrounded by dangers and temptations which it required the rarest judgment to avoid and surmount. From the first it may be said that he saw the path which he ought to follow, with a sagacity wonderful for one so young; but his whole conduct showed that his choice was prompted not so much by wisdom as by a strict and unswerving conscientiousness. He came amongst a people jealous of all foreign interference, and where, from time to time (as on the occasion of the death of the Duke of Wellington, and during the Crimean war), faction was ready to impute to him a desire to secure to himself the office of Commander-in-Chief, and inaugurate a military despotism. The charge that he interfered in advising the Crown was met in Parliament by the open avowal of its correctness; and the admission that the Prince really took part in discussions with ministers, and that he would persevere in what was at once his duty and his constitutional right, silenced once and for all these unjust insinuations, and went far towards winning for him the general confidence of the nation. But his true glory lies in the disinterested zeal with which he promoted every design which had for its purpose the moral, social, and physical improvement of the people. For the first time it was seen that the life of a family might be as simple and unaffected in a palace as in any private home; for the first time the nation saw her princes trained by their father to value higher things than selfish and idle pleasures. The example thus set by the first household in the land has produced results which can only be appreciated at their true value by contrasting English society now with what it was thirty years ago. Prince Albert availed himself of every opportunity for improving the condition of the poor, as well as for furthering the advancement of art and learning generally. Thus, although in 1847 he accepted from the University of Cambridge

—when ratified by an election—the office of Chancellor, which he had at first declined, he was probably more pleased when in 1859 he was selected as President of the British Association. His interest in agriculture was shown not merely by his masterly speeches at the Royal Agricultural Society's meeting in York (1848) and elsewhere, but by the care with which he superintended his model farm at Windsor. The condition of the labouring classes was the subject of his first important speech in public, in the same year (1848); and this subject lay unquestionably at the bottom of that wise design which was carried out in the Great Exhibition of 1851. The work of 1851 did not fail in its purpose; and the same good energy promoted a second Great Exhibition for the year 1862, at the opening of which his well-known form was missed, and his voice was not heard. On the 26th of June, 1857, he was styled by Royal warrant "Prince Consort," to give him precedence in foreign courts, having received the baton of a Field Marshal, together with the title of "Royal Highness," in 1840. Thus he passed away more than twenty years in a career of uninterrupted usefulness. But just when he had begun to acquire that universal popularity which he had long deserved, he was struck down by a sudden and unforeseen illness. Early in December, 1861, symptoms of indisposition showed themselves in a feverish cold, from which, however, no apprehensions were entertained until the third or fourth day preceding his death; nor was any really serious anxiety felt by his medical attendants till the day before that on which he died. On Saturday, December 14, after an apparent improvement, the announcement of which was eagerly welcomed by the public, he died without suffering, to the profound grief of his family, and the deep and general sorrow of the whole nation. Scidom has a life of greater usefulness been cut short with greater suddenness, and at a time when his sound judgment and his experienced wisdom seemed more than ever needed. And never perhaps in the annals of princes has there been seen a career of more genuine and unselfish devotion to the true interests of his family, and of the nation to which that family belonged. When the English people mourned at the death of the Princess Charlotte, they mourned simply for a promise which had never been realised; at the death of Prince Albert they mourned for the loss of one who fulfilled all the duties of his station with a rare conscientiousness, and whom they justly revere as one of the most generous and self-devoted of men. He died in the 43rd year of his age, and was buried at Windsor, December 23, 1861.

ALBERT, marquis of Brandenburg-Culmbach, surnamed the German Alcibiades, born in 1522, was a principal actor in the troubles of Germany during the reign of Charles V., against whom he made a league and declared war in 1552. After capturing many towns and fortresses, and devastating various parts of Germany, he was defeated in August, 1553, by Maurice, elector of Saxony, and put under the ban of the empire. He fled to France, but was allowed to return, and died at Pforzheim, 1588.

ALBERT, CHARLES D', duke of Luynes, born in 1578. Henry IV. of France, who was his godfather, placed him as a page about his son, afterwards Louis XIII., over whom, by his artful manner, he gained such an ascendancy, that he obtained the highest honours in the state, and was made constable of France: but his ambition and tyranny rendered him odious to the people. Died, 1621.

ALBERT, LOUIS JOSEPH D', son of Louis Charles, duke de Luynes, born in 1673, and died 1758. He distinguished himself in several battles, for which he was appointed field-marshal by the Emperor Charles VII., who sent him ambassador to France, and created him prince of Grünberghen.

ALBERT I., duke of Austria and emperor, was the son of Rudolph of Hapsburg, and was born in 1248. He arrogantly claimed the empire on the death of his father in 1292, but the electors chose Adolphus of Nassau. The latter being deposed in 1298, and soon after defeated and slain by Albert, Albert was elected and crowned the same year. He first joined with France against the pope, and then with the pope against France. He made war on the Netherlands, on Hungary and Bohemia; and by his despotic measures in Switzerland provoked the revolution which led to the formation of the Swiss Confederation. An act of private injustice to his nephew, Don John, occasioned a conspiracy against him, and he was murdered in Switzerland, 1st May, 1308.

ALBERT II., emperor (and V. duke of Austria), was the son of Duke Albert IV., and was born at Vienna in 1387. At seven years of age he succeeded to the dukedom, but did not assume the government till 1411. He took part in the war against the Hussites with the Emperor Sigismund, whose daughter he married in 1421. He succeeded to the throne of Bohemia at the close of 1437, again carried on war with the Hussites, was chosen king of Hungary, and finally emperor. His first measures promised well for the empire; but having set out to repel a Turkish invasion of Hungary he fell ill and died there in October, 1439. He had not been crowned emperor.

ALBERT, archduke of Austria, and governor of the Netherlands, was sixth son of the Emperor Maximilian II., and was born in 1559. At a very early age he was made cardinal archbishop of Toledo. In 1683 he was appointed viceroy of Portugal, and in 1596 governor of the Low Countries, where he married the daughter of Philip II., and carried on the war against the revolted Dutch. He was defeated at Nicuport, took Ostend after a siege of three years, and at last was glad to conclude a truce with his brave foes. His government was therefore just and mild. Died, 1621.

ALBERT, king of Sweden, was elected to the throne on the deposition of Magnus II. in 1363. The latter, supported by Denmark and Norway, endeavoured to recover his crown, but was defeated by Albert, and taken prisoner. The nobles, however, became dissatisfied with his rule, and applied for aid to Margaret, queen of Denmark and Norway, by whom he was defeated in a bloody battle,

D', duke of Luyne, IV. of France, who placed him as a page under Louis XIII., over whom he gained such obtained the highest and was made conscious of his ambition and tyndous to the people.

ALBERT D', son of Louis XIV., born in 1672, and distinguished himself in such he was appointed emperor Charles VII., and was made governor of the Netherlands, and was made governor of the Netherlands.

ALBERTUS, born in 1672, and distinguished himself in such he was appointed emperor Charles VII., and was made governor of the Netherlands, and was made governor of the Netherlands.

ALBERTUS, born in 1672, and distinguished himself in such he was appointed emperor Charles VII., and was made governor of the Netherlands, and was made governor of the Netherlands.

ALBERTUS, born in 1672, and distinguished himself in such he was appointed emperor Charles VII., and was made governor of the Netherlands, and was made governor of the Netherlands.

ALBERTUS, born in 1672, and distinguished himself in such he was appointed emperor Charles VII., and was made governor of the Netherlands, and was made governor of the Netherlands.

ALBERTUS, born in 1672, and distinguished himself in such he was appointed emperor Charles VII., and was made governor of the Netherlands, and was made governor of the Netherlands.

ALBERTI, LEO BATTISTA, an eminent architect, painter, sculptor, and scholar, born in Genoa in the beginning of the 15th century. He was employed in many architectural works at Rome, Florence, Mantua, and other cities of Italy, among which is especially admired the church of San Francesco at Rimini. Besides the important treatise on architecture, entitled, "De re architectura," which was published after his death, he wrote works on painting and sculpture. The invention of the camera obscura has been attributed to him. Died, 1485.

ALBERTI DI VILLANOVA, FRANCIS, eminent Italian lexicographer of the 16th century. Born, 1737; died, 1803.

ALBERTINELLI, MARIOTTO, a distinguished Florentine painter, born about 1475. He studied under Cosimo Roselli, became assistant to Fra Bartolomeo, whose style he imitated, and some of whose works he copied, and after a dissipated life died about 1520.

ALBERTUS MAGNUS, one of the greatest of the scholastic philosophers and theologians of the middle ages, was born at Lauingen in Swabia, in 1193 or 1205. He studied in Padua, entered the Dominican order, and became teacher of philosophy at Cologne. He acquired great renown, and was called "Doctor Universalis" in the university of Paris. In 1260 he was named archbishop of Ratisbon, but soon resigned that dignity. He took part in the council of Lyons in 1274, and died at Cologne in 1280. He was, perhaps, the most distinguished man of his age, and was accused as a magician of magical art. The famous Thomas Aquinas was a scholar of Albertus. His works are in 21 vols. folio.

ALBINUS, BERNARD SIEGFRIED, one of the ablest anatomists of modern times, was born at Frankfurt in 1698. He was a pupil of the celebrated Boerhaave, and became professor of anatomy, and subsequently professor of therapeutics, in the university of Groningen, which situations he filled for half a century, during which time he published various professional works. Died, 1770.

ALBOIN, king of the Lombards in the 6th century. He succeeded his father, Audoin, and conquered and slew Cunimund, king of the Gepidae, whose daughter, Rosamunda, he afterwards married. He invaded Italy in 568, and reached Rome without encountering resistance. He took Pavia after the siege of three years, and made it the seat of government. His valour as a soldier was rewarded by his justice and moderation as a king. But at a festival at Verona he received the just resentment of his wife, by giving her wine in a cup wrought from the skull of her own father, and forcing her to drink from it, she had him assassinated, 573.

ALBON, JACQUES, marquis de Fronsac, marshal de St André, a French general, acquired great reputation about the middle of the 16th century. Quesnoy, St Martin, Renti, &c., were the chief scenes

of his exploits. He was deputed to carry the collar of the order of St Andrew to Henry VIII. of England, who made him a knight of the Garter. At the death of Henry II. he was chosen member of the regency, and fell at the battle of Dreux, 1562.

ALBRECHTSBERGER, JOHANN GEORG, a German musician, and one of the most learned of modern contrapuntists, was born at Kloster Neuburg in 1736; became court organist and a member of the academy at Vienna; was the instructor of Beethoven; and died in 1809.

ALBRET, JEANNE D'. [D'ALBRET.] ALBUQUERQUE, ALFONSO D', Portuguese Viceroy of the Indies, was born in 1492. He made his first expedition to the Indies in 1503, and established a fort at Cochim. Three years later he took part in another expedition under Da Cunha and unsuccessfully attacked Ormuz. In 1508 he succeeded Almeida as governor of the Indies, and soon afterwards took Goa, which he held only a few months. A second attack was successful, and made him master of the place. In 1511 he took Malacca, and by his wise and just government did much to establish the power of the Portuguese there. He returned to Goa and defeated the former governor, who in his absence had endeavoured to recover possession. After a fruitless attempt on Aden, he succeeded in taking Ormuz without fighting. The tidings of his recall to Europe reached him when in ill-health, and he died at Goa shortly after, in 1515. The Indians long remembered his just and humane rule, and used to go to his tomb to pray for help against the injustice of his successors.

ALCÆUS, a Greek lyric poet, was born at Mitylene in the isle of Lesbos, and flourished about B. C. 600. He took an active part in the civil strife of his townsmen, and as an aristocrat was banished. It was for the purpose of preventing the return of Alcæus and other noble exiles that the sage Pittacus was made sovereign of Mitylene in B. C. 589. The odes of Alcæus were greatly praised, but only a few fragments are extant. Alcæus is said to have been a lover of Sappho.

ALCÆMENES, a Greek statuary, who was the disciple and rival of Phidias.

ALCIBIADES, the celebrated Athenian general and statesman, the son of Clinias, was born B. C. 450. He was handsome, rich, clever, and dissolute. He early became the disciple of Socrates, who took great pains to form his mind to the love of virtue, and he accompanied that philosopher on several military expeditions. At the siege of Potidea Socrates saved the life of his pupil, and at the battle of Delium Alcibiades saved the life of his master. In the Peloponnesian war, he was appointed to command with Nicias, in an expedition against Syracuse; but before setting out, a charge was preferred against him of impiety. One night all the Hermæ, or half statues of Mercury, in Athens, were defaced and mutilated; and information was given that this sacrilege was the work of Alcibiades and his dissolute companions, in one of their frequent moments of revelry and intemperance. For

this he was ordered home; but, fearful of the consequences, he withdrew to Sparta, and stirred up the Lacedæmonians to declare war against Athens. He afterwards went over to the king of Persia, by whose interest he obtained his pardon and recall. He then commanded with success against the Lacedæmonians; and having compelled them to sue for peace, was received at Athens in triumph. The defeat of the Athenian fleet, by Lysander, which took place in his absence, was unjustly attributed to Alcibiades, and he was deprived of his command. On this he retired into Thrace, and afterwards to a small town in Phrygia, where the house in which he resided was set fire to in the night, and when he attempted to escape, he was slain by arrows, B. C. 404.

ALCMAN, a Greek lyric poet, was a native of Sardis, and lived in the 7th century, B. C. He became a citizen of Sparta, wrote songs and choruses, especially love-songs of a too licentious character, and died of the same foul disease as Sula, the fruit of his corrupt life. Some fragments of his poems are preserved.

ALCOCK, JOHN, successively bishop of Rochester, Worcester, and Ely, founder of Jesus college, Cambridge, and of the grammar school at Kingston-upon-Hull, was a prelate distinguished for his love of learning and of learned men. His temporal honours kept pace with his ecclesiastical dignities; Edward IV. conferring on him the presidency of Wales, and the chancellorship of England. Died, 1500.

ALCUIN, or FLACCUS ALBINUS ALCUINUS, a very celebrated scholar of the 8th century, and the friend of the Emperor Charlemagne, was born, probably at York, about 735. Early distinguished for his piety and learning, he was sent on a mission to Rome, and being introduced to Charlemagne while in Italy, settled on his invitation in France. He earnestly supported the plans of his great master for the restoration of learning, and founded schools at several of the principal cities. In 796 he was made abbot of Tours, quitted the court, and devoted himself to theology alone. His works, including a large number of highly interesting letters, were published by Froben, in 1777, in 2 vols. folio. Died, 804.

ALDEGRÆF, a Westphalian, born in 1502, was both a painter and an engraver. His principal work is a large picture of the Nativity.

ALDINI, A., nephew of Galvani; born at Bologna in 1755; author of "Essai Théorique sur la Galvanisme;" and "Account of late Improvements in Galvanism," published in London.

ALDOBRANDINI, CLEMENT. [CLEMENT VII.]

ALDRED, archbishop of York in the 11th century, was bishop of Worcester in the reign of Edward the Confessor, and was employed in important negotiations. In 1054 he was sent on an embassy to the Emperor Henry III.; four years later he made the pilgrimage to Jerusalem with great pomp; was made Archbishop of York soon after his return; crowned Harold II.; made

his submission to William the Conqueror at Berkhamstead; and the same year, 1066, crowned him at Westminster. Died, 1069.

ALDRICH, HENRY, born at Westminster, 1647, and educated by Dr Busby. From Westminster School he went to Christ Church, Oxford, and was elected student and afterwards canon and dean. He designed, it is said, the elegant chapel to Trinity College, and the beautiful church of All Saints. He had also great skill in music, and composed many services for the Church. Dean Aldrich wrote a System of Logic which was used in the university, and died 1710.

ALDRICH, ROBERT, bishop of Carlisle, was a native of Buckinghamshire, and was educated at Eton, of which college he subsequently became master and provost. In 1537, he was made bishop of Carlisle; a station for which his learning and piety, which are extolled by Leland, well fitted him. Died, 1555.

ALDROVANDUS, ULYSSES, an Italian naturalist, was born at Bologna in 1522. He became professor of Natural History at the university in 1560, and devoted his life and his fortune to the preparation of an immense work on his chosen study. He travelled, made large collections, and employed able artists to draw and engrave illustrations to his work, of which four volumes, folio, were published in his lifetime. He was generously aided in his labours by the senate of Bologna, who also provided for the publication of the posthumous volumes. This great work is invaluable as a treasury of facts. Died, 1607.

ALDUS MANUTIUS, or ALDO MANUZIO, a celebrated Italian printer and author of the 15th and 16th centuries, was born at Bassano, in 1447; became tutor to Alberto Pio, prince of Carpi; and in 1488 established a printing-office at Venice. He printed numerous valuable editions of Greek and Latin completed Greek and Latin dictionaries, grammars; and claimed to be the inventor of the Italic character, hence called *Aldine* for the exclusive use of which, for a term of years, he obtained a patent. The real honour of this invention more probably belongs to the great painter Francia, sometimes called Francesco da Bologna, who certainly cut the types for Aldus, and was unjustly prohibited from cutting them for other printers. Died, 1515.—PAOLO MANUZIO, son of the preceding, distinguished as a classical scholar, no less than as a printer, was born at Venice in 1512, and died in 1574.—ALDO MANUZIO the younger, was a son of Paolo, and equally celebrated with his father and grandfather. He was born in 1547, and died in 1597; and with him expired the glory of the Aldine press.

ALEANDER, JEROME, cardinal, born in 1480, distinguished himself in the 16th century as a violent opposer of Luther and the reformation. He died 1542. His great nephew, of the same name, inherited the ability of his ancestor, and was eminent as a scholar and an antiquary.

ALEMBERT. [D'ALEMBERT.]

long in established use in all the public schools of Europe.

ALESIO, METTEO PEREZ D', a painter and engraver at Rome, whose figure of St Christopher, in fresco, in the great church of Seville, is much admired. Died, 1600.

ALESSI, GALEAZZO, architect, born at Perugia in 1500, whose works are spread over Germany and the south of Europe; his fame principally rests on the monas- try and church of the Escorial. Died, 1572.

ALEXANDER THE GREAT, king of Macedonia, was the son of Phillip, by Olympias, daughter of Neoptolemus, king of Epirus, and was born B. C. 356; the same year in which the temple of Diana at Ephesus was destroyed. Alexander received his education from Lysimachus and Aristotle, and gave several proofs of manly skill and courage while very young; one of which, the breaking in of his fiery steed, Bucephalus, is men- tioned by all his historians as an incident which convinced his father of his unconquerable spirit. Alexander was much at- tached to his mother, and sided with her in disputes which led to her divorce from Philip. While the latter was making prepa- rations for his grand expedition into Persia, he was assassinated by Pausanias; Alexander succeeded to the throne in the same year. His youth at first excited an emulation in several of the states of Greece to throw off the yoke of the Macedonian domination; but the hero soon quelled the rebellion, and was acknowledged general of Greece. He then marched into Thrace, and made several conquests. During his absence the Macedonians revolted; and when Alexander re- turned, he took that city by storm, made a dreadful carnage of the inhabitants, and destroyed all the buildings except the house of Pindar the poet. This severe example had its effect on the other states; and even Athens distinguished itself by a servile submission to the conqueror. Alexander then turned his arms against Darius, king of Persia; and, in 334, crossed the Hellespont with the head of 53,000 men. With this force he defeated the Persians at the Granicus, and made himself master of numerous towns. At Gordium, where he assembled his army, he said to have cut the famous knot on which the fate of Asia depended. Shortly after this, he again defeated the king of Persia near Issus, and took immense treas- ure, and many prisoners; among whom were the mother, wife, and children of Darius. This victory was followed by the conquest of Phoenicia. Alexander next be- sieged Tyre, which resisted him successfully seven months, and, in revenge, he com- mitted horrible cruelties on the inhabitants. Then went, it is said, to Jerusalem, and into Egypt, subdued it, and founded the city of Alexandria. Darius now collect- ed another army, Alexander rapidly march- ed to meet him, and the great contest took place at Gaugamela. Darius was defeated, Alexander pursuing him as far as Babylon, distant 50 miles from the field of battle. This great battle was followed by the capture of Susa and Persepolis; the destruction of Persepolis Alexander is said to have destroyed at the instigation of his mis-

trous. After pursuing Darius into the de- serts of Parthia, marching into Bactria against Bessus, whom he put to death, and completing the conquest of Sogdiana, he prepared for an expedition to India; and after a perilous march reached the Indus, B. C. 327, which he crossed probably at the point where the city of Attock now stands. Alexander received the submission of several of the petty princes of the country, but was opposed by Porus, who valiantly withstood him; and, although conquered and made prisoner, he was restored to his dominions. The conqueror next entered the fertile plains now called the Punjab, took the city of Sangala, penetrated as far as the Hypha- sis, and was desirous of advancing still fur- ther; from which object, however, he was diverted by the rainy season, and the disaffection of his own troops. He accordingly erected twelve altars of an extraordinary size to mark the limits of his progress, re- mains of which are said to be still in exist- ence. Alexander, therefore, retraced his steps to the Hydaspes, on the banks of which he had built two cities, Nisaea and Bucephala; and embarked with his light troops on board a fleet he had constructed, leaving the main army to march by land. After a severe contest with the Mallis, in which he was wounded and his whole army nearly lost, he proceeded down the river to Patana; and having entered the Indian Ocean, and performed some rites in honour of Neptune, he left his fleet; giving orders to Nearchus, who had the command, to sail to the Persian Gulf, and thence up the Tigris to Mesopotamia. Alexander then prepared to march to Babylon, towards which capital he proceeded in triumphal progress. At Susa he gave his army rest, and carried out one part of his great scheme for the permanent union of the conquerors and the conquered by intermarriage. The nuptial festival lasted five days, and the example set by Alexander in marrying Sta- tira, the daughter of Darius, was followed by about 80 of his generals, and 10,000 of his soldiers, who also took Asiatic wives. At Susa too took place the burning of the Indian philosopher Calanus on the funeral pile. Having quelled a mutiny in his army, and dismissed 10,000 veterans who wished to return home, Alexander continued his march. At length he reached Babylon, where he began to make preparations for future un- dertakings of great magnitude; when he was seized with an illness, the effect of which was probably aggravated by depres- sion of spirits, and by intemperance, and died in the 13th year of his eventful reign, and the 33rd of his life, B. C. 323. When re- quired to name his successor, he is said to have replied, "to the most worthy." Im- mediately before he died he gave his ring to Perdicas. Pursuant to his own direction, his body was embalmed and conveyed to Alexandria.

ALEXANDER SEVERUS, Roman emper- or, was born at Aree, in Phoenicia, in 205. He was made Cæsar in 221, and suc- ceeded Elagabalus in the following year. The principal public event of his reign was the war with Artaxerxes, king of Persia,

over whom he gained a great victory in person, and on his return to Rome was honoured with a triumph. He next marched against the Germans, who had invaded Gaul; and, while there, a sedition broke out in his army, headed by Maximin, and the emperor and his mother were murdered, A. D. 235.

ALEXANDER III., Pope, succeeded Adrian IV. in 1159; was a pontiff of great ability, and deservedly popular with his subjects. A rival pope was chosen, who took the title of Victor IV., and Alexander retired into France. Three other anti-popes were elected in succession under the sanction of the Emperor Frederick Barbarossa; but Alexander was at last reconciled with Frederick, and acknowledged sole pope. Becket was supported by this pontiff, and was canonized by him. It was Alexander III. who also canonized St Bernard. Died at Rome, 1181.

ALEXANDER VI. BORGIA, Pope, was a Spaniard by birth, was created cardinal in 1485, at the age of 25, and in 1492 obtained by bribery his election to the papal chair, as successor to Innocent VIII. He was then living in adultery with Vanozza, a Roman lady, by whom he had several children, among them the too celebrated Lucretia, and the infamous Cesar Borgia. He assumed to divide the Indies between the kings of Spain and Portugal; played a selfish and perfidious part in the wars of Italy and France, as well as in the government of his own states; and after a career marked by all kinds of excesses and crimes, died, not without suspicion of poison, in 1503.

ALEXANDER I., king of Scotland, son of Malcolm III., and Margaret, sister of Edgar Atheling, ascended the throne in 1107; and merited by the vigour and impetuosity of his character, the appellation of *The Fierce*. He vigorously suppressed several insurrections which broke out in his kingdom, and successfully withstood the attempts of the English Archbishops to exercise jurisdiction in Scotland. He married one of the illegitimate daughters of Henry I. of England. Died, 1124.

ALEXANDER II., son and successor of William the Lion, was raised to the throne of Scotland, 1214, being then in his 16th year. He aided the English barons against King John, but made peace with Henry III., whose sister Joan he married in 1221. He has the reputation of a singularly just and wise ruler. Died, 1249.

ALEXANDER III., son of the preceding, succeeded him 1249, when only eight years of age. He married Margaret, daughter of Henry III. of England, and lived upon terms of close friendship with his father-in-law, whom, in his wars with the barons, he assisted with 5000 men. In his reign Scotland was invaded by Haeco, king of Norway, but the invaders were defeated, peace was made, and Alexander gave his daughter in marriage to Eric the successor of Haeco. The rest of his reign was peaceful, and he carried on the plans of his father for the good administration of the laws. Alexander was accidentally killed in 1285.

ALEXANDER, of Paris, a Norman poet

of the 12th century, who wrote a metrical poem called "Alexander the Great," in verses of twelve syllables, which measure has ever since been called, "Alexanderine."

ALEXANDER I., NEWSKY, grand duke of Russia, born 1218. The most noted action of his life was the great victory obtained over the Swedes, the Danes, and the Teutonic Knights, on the banks of the Neva. He also freed Russia from the tribute imposed by the Mongol sovereigns. Alexander Newsky is one of the saints of the Russian Church, and an order of knighthood was founded in his name by Peter the Great. Died, 1264.

ALEXANDER, SOLOMON, bishop of Jerusalem, was born of Jewish parents in the grand duchy of Posen, 1799. Very little is known of his youth and education; but from his Hebraic and Talmudic acquirements he exercised the functions of Rabbi at a very early age. He was baptized in 1826, and his ordination by Dr Whately, and induction to a curacy in Ireland, shortly followed. He subsequently became a home missionary of the Society for the Propagation of Christianity among the Jews, and professor of Hebrew in King's College; and after the mission of Chevallier Bunsen to London for the establishment of a Protestant bishopric at Jerusalem, he was consecrated the first Protestant bishop of Jerusalem in 1841. Bishop Alexander was suddenly cut off during a journey to Cairo, on a mission of sympathy and good-will to the Egyptian Christians. Died, Nov. 23, 1845.

ALEXANDER, SIR WILLIAM, earl of Stirling, a Scottish poet of the 17th century. He was author of four plays, which he named "Monarchicke Tragedies," and several poems; pompous, heavy, and now unreadable productions, which nevertheless brought him much praise, and "solid pudding" too. For he became a favourite of James I. and Charles I., received a grant of Nova Scotia to colonize; was made secretary of state for Scotland, and extraordinary lord of session; and obtained various other offices and privileges. Died, 1640.

ALEXANDER, WILLIAM, an ingenious artist, born at Maldstone, 1767. He came to London, and studied the fine arts with so much success, that he was selected to accompany the embassy of Lord Macartney to China. On his return, he published a splendid work on the costumes of China; and, on the formation of the Royal Military College at Marlow, he was appointed drawing-master. At the time of his death, in 1816, he was assistant keeper of the antiquities at the British Museum.

ALEXANDER I., emperor of Russia and king of Poland, eldest son of Paul I., was born Dec. 22, 1777; succeeded, March, 1801; and was crowned at Moscow, September following; when a ukase was published for diminishing taxes, liberating debtors, prohibiting prosecutions for the recovery of fines, discontinuing the mode of recruiting the army, and granting a free pardon to all deserters. In 1803, Alexander offered his mediation to effect a reconciliation between England and France; and in 1805, a con-

 and in 1805, a con-

ention was entered into between Russia,
 ngland, Austria, and Sweden, for the
 purpose of resisting the encroachments of
 the French on the territories of independent
 states. On the 2nd of December the battle
 of Austerlitz took place, at which Alexander
 appeared at the head of 50,000 men, but was
 defeated, and compelled to retreat to his
 dominions. Ere long, however, he again ap-
 peared in the theatre of war, but the scene
 was changed to Poland. On December
 1806, was fought the battle of Pultusk;
 and on the 7th and 8th of February, 1807,
 that of Eylau, neither of which engagements
 was decisive; but on the 14th of June the
 Russians were completely defeated at Fried-
 land by Napoleon. The result of this victory
 was an interview between the two emperors,
 which led to the treaty of Tilsit. The
 capture of the Danish fleet by the English
 occasioned a declaration of war from Russia
 against this country; but hostilities only
 extended to the cessation of trade between
 the two nations. A second meeting of the
 French and Russian sovereigns took place
 Erfurt, Sept. 27, 1808; Buonaparte being
 anxious to secure the friendship of Alexander
 in view of his meditated subjugation of
 Spain. While the former was engaged in
 this undertaking, the latter made himself
 master of the Swedish province of Finland,
 in 1809. The interruption of commerce with
 England now began to be severely felt by
 Russia, and Alexander determined to throw
 off the French yoke. On the 23rd March,
 1812, an Imperial ukase was issued, ordering
 the levy of two men out of every 500 through-
 out the Russian empire, and all matters of
 consequence with Great Britain were pacifically
 arranged. The invasion of Russia which
 followed, though the most important event
 of the reign of Alexander, is not one in
 which he was so far personally concerned as
 to require a detailed relation here. On join-
 ing his army in Poland, February, 1813,
 Alexander published the famous manifesto,
 which served as the basis of the coalition
 of the other European powers against the
 French emperor. Germany, and then France,
 became the scene of hostilities; and the cap-
 ture of Paris, April 30, 1814, was followed by
 the abdication of Buonaparte, and the res-
 toration of the Bourbons. After the con-
 clusion of peace, Alexander visited England,
 in company with the king of Prussia; and
 his return to his own dominions, he em-
 ployed himself in ameliorating the internal
 condition of his empire. He obtained the
 city of Warsaw, and was recognized as
 the king of Poland by the congress of Vienna.
 In November, 1816, he visited Warsaw, and
 he published a constitution for the new
 kingdom annexed to his empire. His death
 took place at Taganrog, in the Crimea, Dec.
 1825; and he was succeeded by his second
 son, Nicholas, the eldest brother, Con-
 stantine, resigning to him the right of suc-
 cession. Alexander was a sincere lover of
 peace; vigilant, brave, and active in war;
 devout in his religious principles; mild and
 amiable in private life, yet strict in the ad-
 ministration of public justice; a patron of
 literature and the arts; and though as a
 monarch, ambitious of power, yet recog-

nizing the spirit of the age, and frequently
 acting in accordance with liberal prin-
 ciples.

ALEXIS MICHAELOVITSCH, czar of Rus-
 sia, born in 1630; succeeded his father Mi-
 chael in 1646; died, 1677. He was the father
 of Peter the Great, and the first Russian
 monarch who acted on the policy of a more
 intimate connexion with the other European
 states.

ALEXIS PETROVITSCH, only son of Peter
 the Great, born 1695. This unhappy prince
 opposed the new policy of his father, and
 expressed an unalterable attachment to the
 ancient barbarous usages and customs of
 his country; for which the czar resolved to
 disinherit him. Alexis fled to his brother-
 in-law, the emperor of Germany, and lay
 concealed for some time at Vienna, until his
 retreat was discovered by his father, before
 whom he was conducted as a criminal, and
 compelled formally to renounce the suc-
 cession; after this he was tried by secret judges,
 and condemned to death, 1718. He was found
 dead in the prison.

ALEXIUS I., COMNENUS, emperor of the
 East, was the son of John Comnenus, and
 was born in 1048. Ho early distinguished
 himself as a soldier, and when his services
 to his predecessor, Botoniates, excited jeal-
 ously, he revolted and got himself proclaimed
 emperor in 1081. He took Constantinople
 and gave it up to pillage. Ho carried on
 war with the Turks, and with the famous
 Robert Guiscard with various fortune. In
 1096 the Crusaders passed through his do-
 minions, and the disorders which they caused
 made them enemies as formidable as the
 Turks, from whom Alexius had hoped they
 would deliver him. He made a treaty with
 them and hastened their advance into Asia;
 but misunderstanding and mutual dissatis-
 faction prevailed. Alexis died, 1118. His
 life was written by his daughter, Anna
 Comnena.

ALEXIUS II., COMNENUS, succeeded his
 father Michael on the throne of Constanti-
 nople, in 1180, when only twelve years of
 age; and, with his mother, was murdered
 two years afterwards by Andronicus, who
 usurped the crown.

ALEXIUS III., ANGELUS, emperor of the
 East, 1195, gained that station by the basest
 perfidy towards his brother, Isaac Angelus,
 whom he confined in prison, and caused his
 eyes to be put out. His effeminate reign
 rendered him despicable, and his capital was
 besieged and taken, 1203, by an army of
 Venetian and French crusaders, headed by
 his nephew, Alexius, son of Isaac. The
 usurper received the same punishment he
 had inflicted on his brother, and died a few
 years afterwards in a monastery at Nicee;
 and the conqueror placed his blind father
 on the throne, with whom he reigned as
 Alexius IV.; but his elevation was suc-
 ceeded by a rebellion, and he was deposed,
 imprisoned, and put to death, 1204.

ALEXIUS V., DUCAS, surnamed MUR-
 ZUFFLE, from his black sraggy eyebrows,
 raised himself to the throne of the East,
 after the murder of Alexius IV. and his
 father, Isaac Angelus, but was deposed by
 the crusaders, who attacked and took his

capital, and he was put to an ignominious death.

ALFIERI, VITTORIO, the Italian dramatist, was born at Asti, in Piedmont, in 1749. He was placed in the college of Nobles at Turin, but appears to have made little progress in learning there. Leaving the college at 16 he led for some years a restless and dissipated life, travelling in Italy, France, England, Holland, and then through the countries of Northern Europe. A new epoch opened in his life in 1775, when he published his first drama, "Cleopatra," which was successful. Thenceforth he was a laborious student and dramatic author, composed fourteen tragedies in seven years, studied Latin, and even at the age of 48 made himself master of Greek. At Florence he met the countess of Albany, wife of Prince Charles Edward, on whose death he married her. Alfieri was at Paris when the revolution broke out, but after the 10th August, 1792, returned to Florence. He worked hard to the last, and died in 1803. His remains were interred in the church of Santa Croce, and a monument by Canova was erected to him. Among his tragedies are "Saul," "Philip II.," "Antigone," "Virginia," "Agamemnon," "Mary Stuart," &c. He wrote also several poems and prose treatises.

ALFORD, MICHAEL, an English Jesuit, born in London, 1582. He died at St Omer's, 1632, leaving behind him two celebrated works, "Britannia Illustrata" and "Annales Ecclesiastici et Civiles Britannorum."

ALFRED THE GREAT. This monarch was the youngest son of Ethelwolf, king of the West Saxons, and was born at Wantage, Berks, in 849. He was sent to Rome when five years old, and three years later went again with his father and stayed a year. On the death of his brother Ethelred, Alfred succeeded to the throne of England, 871, in his 22nd year, at a time when his kingdom was a prey to domestic dissensions, and to the invasions of the Danes, whom he engaged at Wilton and in several other battles during the first year of his reign, but was forced to conclude a treaty on disadvantageous terms. The Danes, however, continued to overrun the country, and conquered Mercia and Northumbria. Alfred defeated them at sea, in 875, again made peace with them in the following year, and in 877 recovered Exeter from them. Soon afterwards he retired to the island of Athelney, and there received information that one of his chiefs had obtained a great victory over the Danes, and taken their magical standard. Alfred is said to have disguised himself as a harper, entered the Danish camp, and gained a knowledge of the state of the enemy. Quitting his retreat he besieged the Danes at Ethenandune (Edington) and completely defeated them. Yet the terms of peace included the cession to them of a large part of the kingdom, and prepared the way for the enterprise of Canute. The king Guthrun and his followers professed themselves Christians, and were baptized. Alfred now put his kingdom into a state of defence, increased his navy, and brought London into a flourishing state; but, after a rest of some years, an immense number of Northmen, under the

leadership of Hasting, landed in Kent, and fortified themselves at Appledore and Milton; they were, however, defeated by Alfred, at Farnham, Hemsted, and Hattington. Thus he secured the peace of his dominions, and struck terror into his enemies, after 56 battles by sea and land, in all of which he was personally engaged. But the warlike exploits of Alfred formed, perhaps, the least of the services he rendered his country. He was so exact in his government, that robbery was unheard of. His great council, consisting of bishops, earls, aldermen, and thanes, was called together twice a year in London, Oxford, or Gloucester, for the better government of the realm. The state of learning in his time was so low, that, from the Thames to the Humber, scarcely a man could be found who understood the service of the church, or could translate a sentence of Latin into English. To remedy this evil, he invited men of learning from all quarters, and placed them at the head of schools in various parts of his kingdom. The laws published by Alfred were chiefly selections from those previously existing, those of Ethelbert, Ina, and Offa. Alfred himself wrote several works, and translated others from the Latin, particularly the General History of Orosius and Boethius's "Consolations of Philosophy." He divided the twenty-four hours into three equal parts, one devoted to the service of God, another to public affairs, and the third to rest and refreshment; his revenue, also, was divided into two equal moieties, one dedicated to sacred, the other to civil uses. To Alfred, England is indebted for the foundation of her fleet. To crown his great public character, Alfred is described as one of the most amiable men in private life; of a temper serene and cheerful, affable, kind, and not averse to society or to innocent recreation; he was also personally well-favoured, possessing a handsome and vigorous form, and a dignified and engaging aspect. Died, October, 901, and was buried at Winchester. We conclude our notice of this great man in the words of Sir James Mackintosh. "Although it be an infirmity of every nation to ascribe their institutions to the contrivance of a man rather than to the slow action of time and circumstances, yet the selection of Alfred by the English people, as the founder of all that was dear to them, is surely the strongest proof of the deep impression left on the minds of all of his transcendent wisdom and virtue."

ALGARDI, ALESSANDRO, a Bolognese sculptor of the 17th century. He studied painting at first under the Caracci, but abandoned it for sculpture. The first work by which he distinguished himself was his monument to San Filippo Neri. The most famous of his works are his Attila and St Leo, the largest alto-relievo existing, his monument of Leo XI., and his group of the beheading of St Paul. The former two are in St Peter's at Rome, the latter at Bologna. Died, 1654.

ALGAROTTI, FRANCISCO, an eminent Italian writer, born at Venice, 1712. He was introduced at an early age to Frederick, crown prince of Prussia, afterwards Frederick the

g, landed in Kent, and at Appledore and Milver, defeated by Alfred, fleet, and Buttington. Peace of his dominions, to his enemies, after 56 and, in all of which he aged. But the warlike med, perhaps, the least ndered his country. He government, that rob- f. His great council, e, earls, aldermen, and gether twice a year in Gloucester, for the bet- e realm. ISCO, an eminent Ita- lee, 1712. He was la- to Frederick, crown wards Frederick the

Great, who delighted in his society, and maintained friendly relations with him till his death. Algarotti wrote "Newtonianism for Ladies," "Letters on Russia," "Letters on Painting," and many other works on a great variety of subjects; but they are now forgotten. Died, 1764.

ALHAZEN, an Arabian mathematician, who was the first that showed the importance of refraction in astronomy. He died at Cairo, in 1038.

ALI, cousin, son-in-law, and vizier of Mohammed, and one of the main pillars of the new faith. He obtained the name of *Lion of God, always Victorious*; but was opposed in his succession to the caliphate by Omar and Othman, and retired into Arabia, and made a collection of the sayings of the prophet. There he laid the foundation of a new sect, and, after the death of Othman, he was declared caliph; but was murdered four years afterwards in the mosque.

ALI, vizier, nabob of Oude, was the adoptive son of the former nabob of Oude, Yusuf Anwari, who declared him successor. The British government, however, deposed him in favour of the brother of Yusuf, but settled on him a pension of £25,000. While engaged with the agents of the East India Company, he had been sent to meet him at Benares for the purpose of making arrangements for his future residence, he gave a signal, on which his armed followers rushed in, and treacherously murdered the Company's officers. For a time he made his escape, but rendered on condition that his life should be spared. Died in prison, 1817, aged only 36.

ALI BEG, a man of extraordinary learning and attainments, born in Poland, of Christian parents, but was kidnapped in his infancy by a horde of Tartars, who sold him to the Turks, in whose language and religion he was educated. His skill in languages secured him the post of chief interpreter to the grand signior; while his leisure hours were employed in translating the Bible and catechism of the Church of England into Turkish language. The work by which he is principally known to Europeans is an account of the religious ceremonies, &c., of the Turks. Died, 1675.

ALI BEY. [BADIA, DOMINGO.]

ALI BEY, a Greek, son of a Notolan merchant, born, 1728. He fell when a child into the hands of robbers, who carried him to Constantinople, and sold him to Ibrahim, lieutenant of the Janissaries, who reared and adopted him. All soon rose to the rank of sangiak, a member of the council; and when his father was assassinated by Ibrahim the Circassian, he avenged his death, and slew the murderer with his own hand. This action secured him numerous enemies, and he was obliged to fly to Jerusalem, and thence to Constantinople; but in time he was recalled by the emperor, and, being placed at the head of the government, Egypt began to recover its former splendour. In a battle fought against the troops of a rebellious Mameluke Ali was slain, after defending himself with desperate valour, and died of his wounds eight days afterwards, 1773.

ALI PACHA (or, more correctly, ALI,

pacha of Jannina), a bold, intelligent, and crafty Albanian, was born at Tepelini, in 1744. His father, an Albanian chief, died of grief, in consequence of being stripped of his territories; but his mother, who was remarkable for energy of character, spirited up her son to assume the conduct of a predatory troop of his countrymen. With this band he committed so many depredations, that the adjacent tribes took up arms in their own defence, and carried off his mother and sister, whom they treated with great cruelty. This roused the naturally implacable temper of Ali, and he vowed the extermination of the whole race. He raised a body of 2000 men, assumed great authority, and wreaked his vengeance upon the Sultans, whom he treated with the most horrible barbarity. During fifty years of constant warfare he brought under his sway a wide extent of territory, which the Porte sanctioned his holding, with the title of pacha. He received agents from foreign powers, and ultimately intrigued with England, France, and Russia. But the jealousy of the Porte was at length excited, and Hassan Pacha was sent to demand his head. On declaring his errand, Ali replied, "My head is not to be delivered up so easily;" accompanying the words with a pistol-ball, which broke his opponent's thigh. He shot two more dead upon the spot, but fell the same moment. His head was severed from his body, and sent to Constantinople, 1822.

ALISON, ARCHIBALD, miscellaneous writer, was born 1787. Educated at Glasgow and Oxford, he entered into holy orders, and obtained successively livings in Durham and at Edinburgh, his native town, where he continued to officiate till 1831, when a severe illness compelled him to relinquish all public duties. Mr Alison was one of the first members of the Royal Society of Edinburgh; and he was intimately associated with most of the men of genius and learning of the present century. His "Essay on the Nature and Principles of Taste" passed through numerous editions, but having no solid worth its popularity was very short-lived. Died, 1839.

ALKMER, HENRIK VAN, the reputed author of the first German version of the world-renowned apologue of "Reynard the Fox." It is written in Low German, and was printed at Lubeck in 1498. Its title is "Reineke do Vos." For a full account of this work, and of the controversy respecting its authorship, see Carlyle's *Essay on Early German Literature, Essays*, vol. ii. p. 298, *seq.*

ALLAN, DAVID, a Scottish portrait and historical painter, born at Alloa, 1744. He studied at Rome, and painted there several pictures, which gained him some reputation. He drew and engraved illustrations to Hamson's poem the "Gentle Shepherd," which became popular. He has been called, very unreasonably, the Scottish Hogarth. There are several engravings from his pictures. Died, 1796.

ALLAN, GEORGE, F. A. S., son of the above, M. P. for the city of Durham, and a principal contributor to Nichol's *Literary Anecdotes*. Born, 1768; died, 1828.

ALLAN, SIR WILLIAM, an eminent historical painter, was born in Edinburgh in 1782. Of humble parentage, he at an early age showed a decided predilection for art; and, when still a young man, he pursued his favourite study with equal enterprise and ability, visiting Morocco, Greece, and Spain, and penetrating the remote and semi-barbarous territories of Russia and Turkey, that he might familiarize himself with the rude and picturesque aspects of human life there presented. "The Polish Captives," "The Slave Market at Constantinople," and various kindred subjects, testify to his skill in this department of art; but he did much also to illustrate the history of his own land, as his vivid representation of Mary and Rizzio, the Murder of Archbishop Sharpe, and the Battle of Waterloo, amply testify. He was an old and attached friend of Sir Walter Scott; and his amiable, unassuming manners, and his vast fund of anecdote, procured him general love and esteem. He was elected R.A. in 1835. In 1841 he succeeded Sir D. Wilkie as president of the Royal Scottish Academy, and was soon afterwards knighted. Died, 1850.

ALLARD, JEAN FRANCOIS, a French general officer, much distinguished during the Empire. On the final downfall of Napoleon, he entered, successively, the Egyptian and the Persian services, and at length became the confidential adviser of Runjeet-Singh, whose troops he disciplined in the European manner. Born, 1785; died, 1839.

ALLATIUS, LEO, a Greek physician and man of letters, librarian of the Vatican at Rome, and professor in the Greek college there. Died, 1669, aged 83.

ALLEGRAIN, CHRISTOPHER GABRIEL, an eminent French sculptor. Died, 1795.

ALLEIN, JOSEPH, nonconformist minister, known chiefly as the author of "An Alarm to Unconverted Sinners," which has gone through numerous editions. Born in 1623, at Devises; died at Bath, 1688.

ALLEN, JOHN, M. D., a distinguished writer on historical subjects, was born at Redford, his father's estate, near Edinburgh, in 1771. He studied at Edinburgh, and took his degree in medicine in 1792. But his predilection for politics soon withdrew him from his medical pursuits; and he early connected himself with the movements for Parliamentary Reform, which commenced in Scotland at the outbreak of the French Revolution. In 1802, having been recommended to Lord Holland as a medical friend and companion, he accompanied the noble lord and his family on successive tours through France, Italy, and Spain; and the similarity of their tastes and opinions led to a lasting friendship between them, which death alone interrupted. On his return from the continent, he devoted himself to literary pursuits. The extent and variety of his attainments are shown in his numerous contributions to the Edinburgh Review, chiefly on subjects connected with the British constitution, and with French and Spanish history. But the most lasting monument to his literary fame is his valuable work called an "Inquiry into the Rise and Growth of the Royal Prerogative," of

which a second edition was published after his death. In 1811 he became warden, and in 1820 master, of Dulwich College; but he continued to reside chiefly at Holland House, where the manliness, sincerity, and independence of his character, his kindly nature and extensive information, gained him; the esteem of all who were admitted to that "Temple of Wit" and hospitality. Died, April 10, 1843.

ALLEN, THOMAS, an eminent scholar in the reign of Elizabeth, considered the first mathematician of his day. Born, 1542; died, 1632.

ALLEYNE, EDWARD, a celebrated actor in the reigns of Elizabeth and James, and founder of Dulwich College, was born in London, 1566. He was the first master of his own college, and, dying in 1626, was buried in its chapel.

ALLIX, PETER, a learned divine, born at Alençon in France, 1631, was minister of the Reformed Church at Rouen and Charenton. On the repeal of the Edict of Nantes, he came to England, was created D.D. at Oxford, and made treasurer of the church at Salisbury. Died in London, 1717.

ALLORI, ALESSANDRO, Florentine painter, born, 1635. He was the nephew and pupil of Angelo Bronzino, and distinguished himself as one of the anatomical imitators of Michael Angelo. He died in 1697.

ALLORI, CRISTOFORO, called also BRONZINO, the son of the above, was also an eminent painter, chiefly distinguished for his portraits and landscapes. Died, 1621.

ALLSTON, WASHINGTON, an American painter, born in 1779. At the age of 22 he visited England, and studied for several years at the Royal Academy. After a short visit to Paris he studied at Rome, and did not return to America till 1809. He gained the friendship of many eminent men in England and France, among others, S. T. Coleridge, Leslie the painter, Lord Morpeth, and M. de Tocqueville. He was chosen A.R.A. in 1819. He was author of "Hints to Young Practitioners on the Study of Landscape Painting." Died, 1843.

ALMAGRO, DIEGO D', a Spaniard of low origin, who accompanied Pizarro in the expedition against Peru, in which his valour, proficacy, and cruelty were equally displayed. In 1525, he took Cuzco, the capital of Chili, by storm, and put Atahuatpa, the last of the Incas, to a most cruel death; but quarrelling with the brothers of Pizarro about the division of their spoil, a schism ensued, and Almagro was eventually taken prisoner and strangled, 1538.

ALMAMUN, or ABDALLAH, caliph of Baghdad, son of Haroun al Raschid, born, 786, succeeded his brother Al Amin, 814, and died, 833. The reign of this caliph forms a very brilliant epoch in the history of the Saracens. Its glory was less of arms than of letters and arts. Almamun, who has been compared to Augustus, Leo X., and Louis XIV., promoted literature and science by founding universities and colleges, collecting learned men at his court, procuring the works of Greek philosophers and poets, and having translations made of them, and directing the compilation of valuable Astro-

sion for learning as to go to war with the
Emperor Theophilus for refusing to allow
the learned Leo, archbishop of Thessalonica,
to go to Baghdad.

ALMANSUR, ABU GIAFAR, second caliph
of the dynasty of the Abbasides, succeeded
his brother Abul Abbas in A. D. 754. He
made war on his uncle Abdallah, who
claimed the caliphate, but was defeated by
Abu Moslem, general of Almansur. The
victorious general, who was enormously
rich and haughty, was soon after murdered
in order of his sovereign. In 762 Almansur,
having destroyed the cities of Otesiphon and
Mecucia on the Tigris, founded Baghdad and
made it the seat of the caliphate. Two years
after he got Abdallah treacherously into his
power, and had him murdered. Died near
Mecca, 775. Abu Giafar was the first caliph
who promoted literature, and thus led the
way to the glorious reigns of Harun Al-
Rahid and Al-mamun.

ALMANSUR, ABU MOHAMMED, regent of
the kingdom of Cordova, and one of the most
valorous captains of his age, was born in An-
dalus about A. D. 939. He was educated
at Cordova, and soon distinguished himself
as a brave soldier, acquiring thus his sur-
name Almansur, the Victorious. His talents
led him to the dignity of grand chamber-
lain to Al Hakem II., on whose death, 976,
he was appointed guardian to the infant
Caliph, and regent of the kingdom of Cor-
dova. He was virtually absolute sovereign

for 23 years, was continually engaged in
war, and though he undertook above 50
expeditions against the Christian princes of
Spain, was only once defeated. He defeated
Alfonsus, king of Leon, and took Simancas;
a victory over Borci, count of Barce-
lona, and burnt his capital; took Sepulveda
& Zamora; completed the conquest of
Spain by a great victory over Count Garcia,
that of Leon by the storming of the
city after a long siege; invaded Portugal
and took Coimbra, Braga, and other cities;
invaded Galicia, took Compostella, and pil-
laged the famous church of Sant-Iago, and
was crowned on the point of becoming master of
Spain, when the kings of Leon and Na-
vare, and the count of Castille combined
against him, and totally defeated him at the
battle of Calatanazor, A. D. 998. The
defeat in which he experienced at this his
personal defeat is said to have caused his
death soon after. Almansur was dis-
tinguished as the patron of letters, arts, and
sciences.

ALMANSUR II., JACOB, caliph of the
Abbasides, and the greatest prince of that
dynasty, succeeded his father Joseph on the
throne of North Africa and Mohammedan
Spain in 1184. He led back the army from
Spain into Africa, and was for several
years occupied in suppressing revolts among
the Moors. In 1194 he led his army back
into Spain, and gained in the following year
the memorable victory of Alarcos over Al-
phonso III., king of Castille. He took several
cities and erected some fine monuments at
Cordova and other places. On his return to
Spain he tarnished his reputation by an act
of violence towards the governor of Morocco,

and soon after retired from the government
and died in obscurity in 1199.

ALMEIDA, FRANCISCO, appointed, in
1505, the first Portuguese viceroy of India.
His government of the colonies was firm and
wise, and he successfully opposed the sultan
of Egypt and other enemies of the Portuguese
power in India. When Albuquerque was
sent out to supersede him, Almeida resisted
and imprisoned him; but after a few months
released him, resigned his vicereignty, and
embarked for Portugal. He was killed on
his return in a quarrel with the natives at
the Cape, in 1509.

ALMEIDA, LORENZO, son of Francisco,
was also an enterprising commander and
navigator, and distinguished himself by
many expeditions in the Indian seas. Ceylon
was by him made tributary to Portugal.
Lorenzo lost his life in an engagement with
the Egyptian fleet in the bay of Cambaya.

ALOMPRA, the founder of the Burman
empire, a man of obscure birth, but who
raised himself to independence and sovereign
power, and established a new dynasty about
the middle of the 18th century.

ALOYSIUS GONZAGA, ST, Jesuit, born
at Castiglione in 1568, was taken by his
father to the court of Spain, but quitted it,
and entered the Society of Jesus. He died
of the pestilence which desolated Rome in
1631. Thirty years after his death he was
beatified by Gregory XV., and was canonized
by Benedict XIII. in 1726.

ALP-ARSILAN, sultan of the Seljukide
Turks, was born about 1030, became govern-
or of Khorassan, and succeeded his uncle,
Togrul Beg, in 1063. He had for his grand
vizier Nizam-al-Mulk, who by his wise ad-
ministration did so much for the interior
improvement of the empire. Alp-Arsilan
distinguished himself as a conqueror, and
after great successes, made war on the em-
peror of the East. After being several times
defeated by Romanus, he at last took him
prisoner in 1071. In the following year he
invaded Turkestan, but was assassinated by
the governor of the fort of Berzcm, which
he had just taken. Died, 1072.

ALPHONSO I., HENRIQUEZ, first king
of Portugal, succeeded his father, Henry of
Burgundy, as count of Portugal in 1112, his
mother Theresa for some years sharing the
sovereignty. He carried on war with the
king of Castille, and next with the Moors,
and in 1139 he obtained a great victory over
five Moorish kings. Soon after this victory
he was proclaimed king by the army, a title
which was confirmed by the states, who at
the same time settled the law of succession.
War being renewed with the Moors, Al-
phonso took Lisbon from them, with the aid
of a body of crusaders, about 1148, and made
it the capital of his kingdom. He was un-
successful in his attempts on Leon and Es-
tremadura. In 1184 he took part with
Sancho, his son, in the relief of Santarem,
then besieged by the Moors, from whom he
had taken it about 40 years before. Died,
1185.

ALPHONSO III., the Great, king of
Oviedo, succeeded his father Ordono at the
age of 13, in 866. He was engaged in almost
constant warfare with the Moors, and gained

a great many victories over them. He acquired part of Portugal and of Old Castille, suppressed the frequent revolts of his own subjects, especially one headed by Garcia, his eldest son, and in 910 abdicated the crown. He afterwards made war on the Moors, whom he defeated, and died at Zamora, 912.

ALPHONSO IV., surnamed the Brave, king of Portugal, was the son of King Denis, the Liberal, whom he succeeded, 1325. He was an able sovereign and a brave soldier. He distinguished himself in the wars against the Moors, especially at the great battle of Salado, fought in 1340. His memory is stained by his unjust treatment of his natural brother, and his cruel murder of Inez de Castro, whom his son Pedro had married against his father's will. Alphonso reigned 32 years, and died, 1357.

ALPHONSO V., surnamed the Magnanimous, king of Arragon, born, 1384; succeeded his father, Ferdinand the Just, 1416, as king of Arragon and Sicily, and subsequently, on the death of Joanna, queen of Naples, obtained the crown of Naples. His claim was however resisted for several years by René of Anjou. Alphonso died at Naples, 1458, leaving his Neapolitan dominions to his natural son Ferdinand, and those of Spain, Sardinia, and Sicily to his brother Juan, king of Navarre. This monarch was accounted the most accomplished prince of his time: he gave shelter to the Greek literati expelled from Constantinople, and was in other respects a great patron of learning.

ALPHONSO X., surnamed the Wise and the Astronomer, king of Castille and Leon, was born in 1221, and succeeded his father, Ferdinand III., in 1252. He gained many victories over the Moors, was a competitor in 1257 with Richard, earl of Cornwall, for the imperial dignity, and, though unsuccessful, assumed the title of emperor, which he was compelled to renounce in 1274, in favour of Rudolph of Hapsburg; entertained Edward, Prince of Wales, and gave him in marriage his half-sister Eleanor in 1254; distinguished himself by his love of science, and had the famous Alphonsine Tables prepared; published the collection of Laws called "Las Siete Partidas;" ordered the use of the vulgar tongue in public acts; and had a translation of the Bible published. These services he rendered to his country, notwithstanding that so large a part of his reign was troubled by wars with the Moors, revolts of his subjects, and civil wars respecting the succession. Died, 1284.

ALPINI, PROSPERO, a Venetian physician, born, 1552, and died, 1617. He was the greatest botanist of his day, the first who explained the generation of plants by the sexual system, and is the author of many valuable works on his favourite pursuit.

ALSTON, CHARLES, an eminent Scotch physician and botanist; author of "Tirocinium Botanicum Edinburgense," &c.; and public lecturer at Edinburgh. Born, 1683; died, 1760.

ALSTROEMER, JONAS, a distinguished Swede, born of poor parents in West Gothland, in 1685. After struggling with poverty for a long time, he visited London, and pay-

ing particular attention to the commercial and manufacturing sources of British prosperity, he returned to Sweden in 1723, resolving to carry the plans he had formed into execution. Having obtained a license to establish manufactures in the town in which he was born, it soon became the seat of industry and activity, which afforded an example to the whole kingdom. He established a sugar house at Gottenburg, and traded to the Indies and the Levant; improved rural economy; cultivated plants proper for dyeing; and improved the wool trade by importing sheep from Spain and England, and the goat from Angora. For these important benefits Alstroemer received a patent of nobility, was made Knight of the Polar Star, and honoured with the title of Chancellor of Commerce; the Academy of Sciences chose him a member, and the national states decreed him a statue, to be erected to his memory on the exchange of Stockholm. Died, 1761.

ALTDORFER, or **ALTORF, ALBERT**, Bavarian painter and engraver. He was a native of Altdorf, but settled in early life at Ratisbon (Regensburg). One of the most remarkable of his paintings is the Battle of Arhela, now in the Picture Gallery at Munich. As an engraver on wood Altdorf almost rivals Albert Dürer. He executed also many engravings on metal. Born, 1488; died, 1538.

ALTEN, General **CHARLES**, count, a brave and experienced officer, was born at Wilkenburg, at Hanover, in 1764, and in 1781 received his commission as ensign in the foot-guards of the electorate. After taking part in the operations of 1793, against the revolutionary troops of France, he was made colonel of the king's German legion in 1803, and from that time till the end of the war he was almost constantly on service. He was at the taking of Copenhagen, and afterwards served under Sir John Moore as a brigadier-general in the fatiguing and arduous duties of the disastrous campaign which ended in the battle of Corunna. At Walcheren also, and at the siege of Flushing, he distinguished himself; and on his return to England, in 1810, he was promoted to the rank of major-general, and placed in command of the south-west district. From this station, however, he was speedily removed, his brigade being destined for the operations of the Peninsula, where he served under Marshal Beresford at the first siege of Badajoz, and at Albuera. In 1812, Wellington placed him at the head of the light division, which he commanded in the general actions of Salamanca, Vittoria, Pyrenees, Nivelle, Nive, Orthes, and Toulouse. Like that of many of his brave compeers, his active duty closed with the battle of Waterloo; and his services at the head of the third division, during the memorable 16th, 17th, and 18th of June, will ever be classed among the most devoted and glorious on military record. He was now created a count; and when recovered from the dangerous wounds he had received, he took the command of the Hanoverian troops forming part of the army of occupation in France. In 1831, Count Alten was nominated one of the ministers of state,

ALURED, an ancient English historian,
who flourished in the beginning of the 12th
century. His annals comprise the history of
the Britons, Saxons, and Normans, down to
his own time, 1129.

ALVA, or ALBA, FERDINAND ALVAREZ DE
TOLEDO, duke of, the greatest general of his
age and the cruel governor of the Netherlands
under Phillip II. of Spain, was born in 1508.
He was present at the battle of Pavia, at the
siege of Tunis, and at the attack on Algiers.
He defeated and made prisoner the elector
of Saxony at the battle of Mühlberg, in 1547,
and assisted at the siege of Metz. In 1555 he
was sent, with the title of vicar-general of
the dominions of Austria in Italy, to oppose
the French there, and to invade the states of
the Church. But he was compelled to make
peace and beg the Pope's pardon. The duke
Alva took part in the conference of Bay-
ona between the queen of Spain and Charles
IX. of France, and Catherine de Medicis, re-
specting the destruction of the Huguenots
in France. He is, however, chiefly notorious
for the merciless rigour with which he exer-
cised his dictatorial power in the Nether-
lands, where he was sent, in 1567, to carry
out the plans of Phillip II. Alarm drove many
thousands out of the country, the prince of
Orange became head of the patriots, and
civil war broke out. Counts Egmont and
Horn were beheaded, a "Council of the Tu-
berculents" was established, cities were fortified,
and prisons crammed with victims. Alva's
immense pride was shown in the erection of
a statue of himself in the citadel of Antwerp,
with nobles and people at his feet, and a
long, insulting inscription to his praise.
His fortune changed, and by his own wish he
was recalled in 1573. Under his rule 18,000
persons had been sent to the scaffold, and a
revolt was provoked which only ended, after
nearly 40 years of war, in the independence
of the United Provinces. After a temporary
grace and exile, Alva was called to com-
mand in Portugal, and rapidly conquered it.
He said that in 60 years of warfare he has
never beaten nor surprised. Died at Lisbon,

ALVARADO, PEDRO, one of the Spanish
conquerors of Mexico. He was born at
Alajoz; accompanied Grijalva to Central
America in 1518, and in the following year
took part in the expedition of Cortez. He
was present at all the battles of the cam-
paign, and greatly contributed to its success.
He enjoyed the confidence of Cortez, and
was charged with the command of the city
of Mexico and the care of Montezuma during
his absence of his chief. A severe conflict
arose on that occasion between the Span-
ish and the citizens, but it is uncertain
on which side was at fault. Alvarado was rest-
less and enterprising, subdued Guatemala
and other provinces, was made governor of
Guatemala, and afterwards of Honduras, led
an expedition across the Andes to Quito, and
was killed by Almagro, the general of Pizarro, at Rio-
ba, where instead of fighting, they made
peace, and Alvarado returned. He explored

California, and was killed soon after his re-
turn in an expedition against the Indians of
Xalisco, in 1541.

ALVARADO, ALPHONSO D', a Spanish
adventurer, who accompanied Pizarro in his
expedition to Peru; and who was equally
distinguished for his bravery and his cruelty.
Died, 1553.

ALVAREZ DE LUNA, a Spanish states-
man, the favourite and first minister of John
II. king of Castille. He was born about 1388,
held the office of chamberlain more than 40
years, was named constable in 1423, and exer-
cised a complete ascendancy over the mind
of the king. Jealousy of his power led to
the formation of plots against him, and on
two occasions he was exiled, but was soon
recalled. The king at last, instigated by his
young queen, consented to the arrest and
trial of his minister, who was convicted and
beheaded at Valladolid in 1453.

ALVAREZ, FRANCISCO, a Portuguese div-
ine, born at Coimbra towards the end of the
15th century, and died, probably 1540, leaving
behind him in Portuguese an account of his
embassy to David, king of Abyssinia, and a
description of Ethiopian manners and cus-
toms, which had the merit of being the first,
but not that of being an accurate account of
Abyssinia, by a European.

ALVAREZ, MANOEL, a Spanish sculptor,
born in 1727. He studied at Salamanca, his
native place, and afterwards at Madrid, exe-
cuted many works in those cities, at Toledo,
Saragossa, &c., became director of the Aca-
demy and sculptor to the king, and died in
1797.

ALVAREZ, DON JOSÉ, one of the most
eminent sculptors of the 19th century, was
born near Cordova, in Spain, 1768. Patronised
by Charles IV., he proceeded to Paris in
1799, with a view of prosecuting his studies;
and he soon gained himself a name in the
French metropolis. Napoleon presented
him with a gold medal; but his subsequent
conduct towards Spain inspired the artist
with such aversion for him, that he would
never model his bust; and he afterwards was
imprisoned for refusing to take the oath of
allegiance to Joseph Buonaparte, when pro-
claimed king of Spain. Many of his best
works are at Madrid. Died, 1827.

ALVENSLEBEN, PHILIP KARL, count
of, son of a counsellor of war at Hanover, was
a distinguished diplomatist, in the service of
Frederic the Great and his successor. After
being employed for many years as diplomatic
agent between the court of Prussia and the
electoral court of Bavaria, he was sent am-
bassador to France, to Holland, and, in 1789,
to England. The following year he was re-
called to Berlin, and was placed at the head
of the department for foreign affairs. The
count wrote an account of the war from the
Peace of Munster to that of Hubertsbourg.
Born, 1745; died, 1802.

ALVIANO, BARTOLOMEO, an eminent
Venetian general, whose exertions against
the emperor Maximilian, in 1508, caused the
republic to decree him triumphal honours.
In the siege of Padua by the emperor, and
at the battles of La Motte and Marignano,
Alviano displayed the most heroic qualities.
His death was occasioned by excessive fa-

tigue while laying siege to Brescia. Born, 1455; died, 1515.

ALYPIUS, bishop of Tagasta, Africa, and the friend of St Augustine, with whom he was baptized at Milan, in 388. He opposed the Donatists and Pelagians with great zeal; and died after 430.

AMADEUS V., count of Savoy, succeeded to the sovereignty of that state, 1285, to the exclusion of his nephew Philip, the lawful heir. He carried on wars with several of the neighbouring states successfully, but when Philip reclaimed the sovereignty he was compelled to treat with him. Through the mediation of Edward I., of England, a division of the duchy was made between the two claimants. Amadeus afterwards took part in most of the wars and negotiations of France. He acquired the surname of Great from his wisdom and success, and, after a reign of 38 years, died at Avignon, 1323.

AMADEUS VIII., the Peaceful, count and first duke of Savoy, was born in 1383, succeeded his father, Amadeus VII., in 1391, extended his dominions, and received the title of Duke from the emperor Sigismund in 1417. He lost his duchess in 1428, and six years later he retired to the priory of Ripaille, which he had founded, resigned the sovereignty, and led an easy, and some say a voluptuous, life, in company with several of his friends. On the deposition of Pope Eugenius IV., Amadeus was chosen to succeed him, and took the name of Felix V. The schism thus caused lasted ten years, and ended with the second retirement of Amadeus in 1440. Died at Geneva, 1451.

AMADEUS IX., the Blessed, duke of Savoy, was born in 1435, and succeeded his father Louis in 1465. He was feeble in health and in mind, and the regency was intrusted to his duchess Yolande, daughter of Charles VII. of France. A civil war took place, and the duchess was imprisoned, but she was restored to the government. Amadeus was famed for his benevolence and care for the poor. Died, 1472.

AMALASONTHA, regent and queen of Italy, was the daughter of Theodorie the Great, and the niece of Clovis. She was distinguished for her beauty, energy of character, and accomplishments. On the death of Theodorie she became regent and guardian of her son Athalaric, whose education she carefully conducted. Impatient of restraint, he broke away from her, and indulging in sensual pleasures, died at sixteen. She then shared the crown with her cousin Theodatus, and was murdered by him in 535.

AMARA-SINGHA, a Hindoo author of a dictionary or vocabulary, in verse, of the Sanscrit language. An entire manuscript copy is in the royal library at Paris. An edition of this work was published, with notes, by Colebrooke, in 1803. The age in which the author lived is quite unknown.

AMATI, ANDREA and NICCOLO, brothers, were celebrated violin-makers, and lived at Cremona, about 1550. They were employed by Charles IX. of France. Several others of the same family distinguished themselves in the same way.

AMATUS, a Portuguese Jew, born, 1511, at Castel Bianco. He studied medicine with

success at the university of Salamanca, and afterwards gave lectures at Ferrara, Ancona, and other places. For many years he concealed his religion, but at length falling under the suspicion of the Inquisition, he escaped to Thessalonica, and there avowed himself a Jew. He attended Pope Julius III. on several occasions. He published two medical treatises, which were long held in great estimation.

AMAURY I., king of Jerusalem, succeeded his brother, Baldwin III., in 1162. He was chiefly engaged in wars with the Saracens, from whom he endeavoured to take Egypt. In 1168, in violation of a treaty with the caliph, he invaded Egypt, took Belbeis, and threatened Cairo; but the destruction of the fleet, sent to his aid by the emperor of the East, compelled him to return. He soon after renewed the invasion, and unsuccessfully besieged Damietta. Saladin in his turn invaded the kingdom of Jerusalem, and took Gaza. Died, 1173.

AMBERGER, CHRISTOPH, a painter of Nürnberg in the 16th century, was a disciple of Hans Holbein. His principal work is the history of Joseph, in twelve pictures. Amberger was called to Augsburg in 1530 by Charles V., who highly esteemed him, and there it is supposed that he died, between 1560—1570.

AMBOISE, GEORGE D', a French cardinal and minister of state, born of a noble family, 1460. He became successively bishop of Montauban, archbishop of Narbonne, and of Rouen. Louis XII. made him prime minister, and he soon acquired great popularity by taking off the taxes which had been usually levied on the people at the accession of every new monarch. The king, by his advice, undertook the conquest of the Milanese, in which he succeeded. Soon after this, he was appointed the pope's legate in France, with the dignity of cardinal, and in that capacity effected a great reform among the religious orders. He died in 1510.

AMBOISE, AMERY D', a famous French admiral, and brother of the above, who gained a splendid victory over the sultan of Egypt, in 1510.

AMBROGIO, TESEO, one of the most celebrated among the early Italian orientalist, was born at Pavia, in 1469, and died, 1540. Leo X. appointed him professor of Syriac and Chaldee at Bologna.

AMBROSE, ST., bishop of Milan, was born about 340, in Gallia Narbonensis, of which province his father was prætorian prefect. While yet a youth he pleaded causes with so much eloquence, that Probus, prefect of Italy, chose him one of his council, and afterwards nominated him governor of Liguria, which office he held five years. In 374, Auxentius, bishop of Milan, died; and so fierce was the contest in the election of a successor to the vacant see, that the governor was called upon to quell the tumult. This he attempted by persuasion in the great church; and at the conclusion of his address, a voice in the crowd exclaimed, "Ambrose is bishop." This circumstance was considered as a divine direction, and Ambrose was declared to be the object not only of the popular choice but of

 "bishop." This cir-
 id as a divine direc-
 declared to be the
 opular choice but of

divine selection. His first efforts were directed to the extermination of Arianism, which was then making great progress. He also successfully resisted the Pagans, who were attempting to restore their ancient worship. When Maximinus invaded Italy, and actually entered Milan, Ambrose remained at his post, to assuage the calamities produced by the invading army. When, in consequence of a tumult at Thessalonica, Theodosius sent an order for a general massacre, Ambrose went to the emperor, re-monstrated with him on his barbarity, and prevailed on him to promise that the command should be revoked. The mandate was, however, carried into execution, and 100 persons were slaughtered in cold blood. Shortly afterwards, when Theodosius was about to enter the great church of Milan, Ambrose met him at the porch, and sternly rebade him to appear in the holy place. The emperor pleaded the example of David: "You have imitated David in his crime, to state him in his repentance," was the reply; and Theodosius was excluded from the services of the church for eight months, and was compelled, not only to perform penance, but to sign an edict, which ordained that an interval of thirty days should elapse before any sentence of death or of condemnation should be executed. The works of Ambrose are numerous, and fill 2 vols.

He died at Milan, in 337.
 MBROSIOUS AURELIANUS, king of the Saxons. He came from Armorica to assist expelling the Saxons, who had been in- vaded over by Vortigern; and on the death of that monarch the sovereignty was vested in him. Died, at Winchester, in 608.

MELLON, HUBERT PASCAL, a learned schman, born, 1730; author of "His- toire du Bas Empire," of a celebrated work on the Commerce of the Egyptians, and of researches into the Mechanical Arts of Antients." Died, 1811.

MELIA, duchess dowager of Saxe-Wei- mar. [SAXE-WEIMAR.]

MELOT DE LA HOUSSAYE, NICOLAS, French historian of the 17th century. He lived for some time at Venice, as secretary of the French embassy, and wrote a his- tory of its government. He also translated "Prince" (by Machiavel) and other works into French. Died, 1706.

MERBACH, JOHANN, a celebrated print- er, Basel, in the 16th century; the first who the Roman type instead of Gothic and French. He was a man of learning, piety, wealth, and spared no labour or expense in the production of his edition, the first of the complete works of St Augustine. He had previously published the works of St Ambrose, and afterwards took the preparation of those of St Jerome; which appeared after his death in the care of his sons. Died, 1515.

MERBACH, BONIFACE, son of the above, of Basle; he was an intimate friend of Erasmus, and was for 20 years professor of jurisprudence at Basle, and died, 1562.

MERIGO VESPUCCI, an eminent navi- gator, was born at Florence in 1481. After taking a liberal education he was sent by his father to Spain for the purpose of con-

ducting his commercial affairs; and, being at Seville when Columbus was making pre- parations for his second voyage, he resolved to quit mercantile pursuits, and enter on the career of discovery. His first expedition to the new continent was in 1499, under the command of Ojeda, a year after the dis- covery and examination of that part of the coast by Columbus. After this he entered the service of King Emanuel of Portugal, and made two voyages in Portuguese ships; the first in 1501, the second in 1503. The object of this last voyage was to find a westerly passage to Malacca. He arrived at Brazil, and discovered the Bay of All Saints. In 1505 he again entered the service of the king of Spain, but made no more voyages, as appears from memoranda, showing that he was at Seville till 1508, at which time he was appointed principal pilot. His duties were to prepare charts, and prescribe routes for vessels in their voyages to the new world, which soon received his name. This honour certainly belonged to Columbus rather than to Amerigo, for the prior discovery of the continent by the former is not to be ques- tioned. He died at Seville in 1512.

AMES, JOSEPH, the celebrated historian of British typography, was born at Yar- mouth, 1689, and died, 1759. His father ap- prenticed him to a plane-maker in London; and, after serving out his time, he became a ship-chandler at Wapping, which business, notwithstanding his antiquarian pursuits, he carried on until his death. He early dis- covered a taste for English history and anti- quities; and brought out, in 1749, after the labour of many years, "Typographical An- tiquities; being an historical account of printing in England, with some memoirs of our ancient printers, and a register of the books printed by them from 1471 to 1600; with an appendix concerning printing in Scotland and Ireland to the same time." It was a laborious compilation, but deficient in point of learning. By the labours of subsequent editors the work, at first pub- lished in one vol. 4to, has been improved and extended to 4 vols. 4to. Amcs wrote several other works, among which is "Pa- rentalia; or Memoirs of the Family of Wren." He was F. R. S. and F. S. A., and for many years filled the office of secretary to the Society of Antiquaries.

AMHERST, JEFFERY, Lord, a distin- guished British officer, was descended from an ancient Kentish family, near Sevenoaks, where he was born, 1717. He entered into the army in 1731, and became aide-de-camp to Lord Ligonier, with whom he served at the battles of Kocoux, Dettingen, and Fon- tenoy. In 1758 he was sent to America, where he captured [Louisbourg, and all its dependencies in the Gulf of St Lawrence. This was followed by the reduction of Fort du Quesne, Niagara, and Ticonderoga, which paved the way for the entire conquest of Canada. For these services General Am- herst received the thanks of parliament, and the order of the Bath. In 1763 he was made governor of Virginia; and, in 1776, created Baron Amherst. In 1795 he resigned the commandership-in-chief to the Duke of York, and the following year received

the rank of field-marshal. He died in 1797.

AMHURST, NICHOLAS, an English political and miscellaneous writer, born at Marden, Kent, and died 1742. He was author of the "Terre Filius," a satirical work on the university of Oxford; and published, with the assistance of Puteney and Lord Bolingbroke, the work by which he is most known, entitled "The Craftsman."

AMIGONI, GIACOMO, a Venetian historical and portrait painter, who visited England in 1729. He afterwards went to Spain, was appointed portrait painter to the king, and died there, 1752.

AMIOT, Father, one of the most learned of the French missionaries, born at Coulon, 1718, and died at Peking, aged 77. This zealous Jesuit, who resided at Macao in 1760, was invited to Peking in 1761, by the emperor of China, and remained in that capital 43 years. By continued application he became acquainted with the Chinese and Tartar languages; and, from time to time, remitted to France the result of his labours, which afterwards appeared in several publications.

AMMAN. There were three noted physicians of this name. The first, **JOHN CONRAD**, a native of Schaßhausen, was born, 1669, and died, 1724, at Marmund, in the Netherlands. He was chiefly distinguished by his success in teaching persons born deaf and dumb to speak.—His son, **JOHN**, was a fellow of the Royal Society of London, and a member of the Academy of Sciences of Petersburg, where he lectured on botany, and acquired great reputation; he died, 1740.—The third, **PAUL**, was a native of Breslau, who settled in 1674 at Leipzig, where he gave lectures on physiology, natural history, and botany; he died, 1691.

AMMAN, JOSE, a famous engraver and painter at Zurich, in the 16th century. He painted with great brilliancy on glass, but excelled chiefly in engraving, both on wood and copper. Died, 1691.

AMMANATI, BARTOLOMEO, a Florentine architect and sculptor of the 16th century. After studying under Baccio Bandinelli and Sansavino, he became an imitator of Michael Angelo. He built the fine Ponte della Trinita at Florence, completed the Pitti Palace, and executed several works at Rome, Venice, and Padua. Born, 1511; died, 1592.

AMMIANUS MARCELLINUS, a Roman historian of the 4th century, born at Antioch. He wrote the Roman history from the reign of Nerva to the death of Valens, in 31 books, of which only 18 are extant; served long in the army, and took part in the Persian war under Julian; then retired to Rome, and died about 390. His history is esteemed impartial and trustworthy, but his style is faulty.

AMMIRATO, SCIPIONE, an esteemed Neapolitan writer, born in 1531; author of a "History of Florence," which he wrote at the instance of the grand-duke Cosmo, and of numerous tracts, political and historical. Died, 1601.

AMMONTO, ANDREA, a Latin poet, born at Lucca, in Italy, of whose genius Erasmus made frequent mention. He was sent to

England in an official character, by Pope Leo X., and was appointed Latin secretary to Henry VIII. He subsequently became prebendary of Salisbury, having previously received some valuable church preferment, and was made papal nuncio in England. Died at London, 1517.

AMMONIUS, surnamed **SACCAS**, or **THE PORTER**, a philosopher of the 3rd century, was born at Alexandria, probably of Christian parents, and became the founder of a new school of philosophy, which sought to effect a reconciliation of the Platonic and Aristotelian systems. The great critic Longinus, the mystic Plotinus, and the great church teacher Origen, were disciples of Ammonius. He died about 243.

AMONTONS, GUILLAUME, French natural philosopher, born at Paris, 1663, and died, 1735. He constructed a new thermometer, hygroscope, and other philosophical instruments, and is said to have been the inventor of telegraphs.

AMORETTI, CARLO, mineralogist, born at Oneglia, in the Milanese, 1740, and died, 1816. He became one of the keepers of the Ambrosian library at Milan, and published, in Italian, "A Tour from Milan to the Three Lakes of Como, Lugano, and Maggiore." He composed also a great number of memoirs and tracts, for which he was rewarded with the decoration of the order of the Iron Crown.

AMORY, THOMAS, a singular character, was son of Counsellor Amory, appointed by William III. secretary for the forfeited estates in Ireland. He led a very reclusive life in his house in Orchard Street, Westminster, carefully shunning company, and never stirring out by daylight. He was a zealous Unitarian, and the author of "John Bunce," "Memoirs," and other eccentric books. Died, 1789, aged 97.

AMPÈRE, ANDRÉ MARIE, whose name is imperishably connected with the great discoveries in electro-magnetism, was born at Lyons, 1775. In 1804 he was nominated professor in the Polytechnic School of Paris, and here in connection with Oersted, Faraday, and other distinguished men of science, with whom he was in constant correspondence, he paved the way for those brilliant discoveries that have already issued in the electric telegraph, and promise an illimitable extension of the boundaries of science. Died, 1836.

AMPÈRE, JEAN JACQUES, a distinguished French historian and littérateur, was born at Lyons in 1800. He was the son of the eminent electrician André Marie Ampère, and was educated at Paris, where he was a pupil of Cousin. In 1833 he became a professor at the College of France, was received at the Academy of Inscriptions in 1842, and at the French Academy in 1847. He visited Egypt and Nubia in 1844, and contributed some interesting articles on those countries to the "Revue des deux Mondes." Among his principal works are, "De la littérature Française dans ses rapports avec les littératures étrangères au moyen âge," "Histoire littéraire de la France avant le douzième siècle," "Sur la formation de la langue Française," and "Histoire Romaine."

official character, by Pope appointed Latin secretary. He subsequently became ambassador to Salisbury, having previously obtained a noble church preferment, and was papal nuncio in England, 1517.

ARMANDO SACCAS, or **THEOPHILUS**, philosopher of the 3rd century, native of Alexandria, probably of Christian descent, is named the founder of a new philosophy, which sought to effect a union of the Platonic and Aristotelian systems. The great critic Longinus, Lucian, and the great church fathers were disciples of Ammonius.

JEAN-BAPTISTE WILLAUME, French naturalist, born at Paris, 1663, and died, 1742. He collected a new theory of meteorology, and was a philosophical instructor to have been the inventor of the thermometer.

GIULIO ARNALDO, mineralogist, born at Milan, 1740, and died, 1800. He was one of the keepers of the cabinet of minerals at Milan, and published a treatise on the Three Kingdoms of Nature, Lugano, and Maggiore, 1783, in which a great number of minerals are described, and for which he was rewarded with the order of the Iron

JEAN-BAPTISTE AMORY, a singular character, born at Amory, appointed by the king secretary for the forfeited estates. He led a very reclusive life at 17, Strand Street, Westminster, and never formed a company, and never received a visit. He was a zealous collector of books, and the author of "John Bunce," and other eccentric books. Died, 1780.

MARIE ANNE LÉ MARIE, whose name is connected with the great discovery of galvanism, was born at Paris, and was nominated professor of the École Normale, and of the École Polytechnic School of Paris; and was connected with Oersted, Faraday, and other distinguished men of science. She was in constant correspondence with Laplace, and was the way for those brilliant discoveries already issued in the world, and promised an illimitable future to the boundaries of science.

CHARLES-JACQUES, a distinguished French literary character, was born at Paris, where he was a professor of French, and in 1833 he became a member of the Académie Française, and was received into the Académie des Inscriptions in 1842, and died in 1847. He visited Italy in 1844, and contributed articles to those countries, and was the author of "Aux Mœurs du Monde." Among his works are, "De la littérature française depuis les littéraires de l'âge," "Histoire de la langue française avant le douzième siècle," "L'Étude de la langue française," and "Histoire Romaine."

"*De la République*," his last work. It is a book of real value, of discriminating criticism, and of great liveliness and directness. Amory was the friend of Héranget and Doqueville. Died in March, 1864.

MURATH II., one of the most illustrious of the Ottoman emperors, succeeded his father Mahomet I. in 1421, at the age of 18. His empire was disputed with him unsuccessfully by his uncle Mustapha, who was slain and hung; and by his brother Mustapha, who also was taken and strangled. In 1430 he took Thessalonica from the Venetians, in 1435 subdued the despot of Servia, and in 1442 captured Belgrade, which was successfully defended by John Huniades; defeated the Hungarians at Varna in 1444, and slew their king Ladislaus; abdicated in favour of his son in the following year, and retired to Magnesia, but had soon to resume the government, in consequence of the disorders which ensued. In 1447 he made war on Scanderbeg, and was repulsed. Died, 1451.

MURATH III., Ottoman emperor, succeeded his father Selim II. in 1574. His first act was the murder of his five brothers, the eldest of whom was eight years old. He reigned on war with Persia for eleven years, and acquired several provinces. In 1581 the Hungarians revolted, and a great fire broke out in Constantinople. In 1592 Amurath took Raab. He was hated for his aversion to his sensual excesses made him early

MURATH IV., Ottoman emperor, succeeded his uncle Mustapha in 1623. The empire was then in a very troubled state. He besieged Bagdad unsuccessfully: in seven years afterwards, with the result: in 1636 took Erivan: and at the age of 16, in 1638, succeeded in taking Bagdad. He ordered the massacre of 30,000 prisoners. He had many good qualities as a soldier, but his debaucheries ruined him to a premature end. Died, 1640.

YVES YTOT, JACQUES, bishop of Auxerre, and almoner of France, born at Melun, of noble parents, 1514, and died, 1583. He was a member of the university of Paris at the age of 23, and was recommended to the duchess of Burgundy by whose means he became professor of Greek and Latin at Bourges. He was afterwards appointed preceptor to the sons of Henry II., and while thus engaged he translated the Lives of Plutarch. Charles IX. gave him the abbey of Cornetius de Combray, and conferred on him the high offices mentioned.

CHARSIS, a Scythian philosopher, died about 600 years B.C. He travelled in Persia, where he was much esteemed by the king, and was the only stranger the Athenians admitted to the honour of citizenship. On his return to Scythia he attempted to induce some of the Institutions and customs of Greece; but while in the act of performing a rite to Cybele, he was killed by lightning.

BOANA, queen of Xiragua, in the island of St Domingo, at the beginning of the 17th century, and one of the victims of Spanish avarice and cruelty. Ovando, the go-

vernor of St Domingo, invited her to a feast, where, at an appointed signal, her native attendants were shot, and she herself was seized, carried off, and executed, about 1606.

ANACREON, the Greek lyric poet, was a native of Teos, in Ionia, which town he is said to have quitted when it was taken by the Persians in B.C. 640. He lived many years at Samos, under the patronage of the tyrant Polycrates, and afterwards at Athens. He died at the age of 85. The poems of Anacreon set forth chiefly the praises of love and wine, to the enjoyment of which his life also appears to have been dedicated. He is said to have been a lover of Sappho, but the story is rejected as too improbable. Many fragments of his songs are preserved, and a number of odes long passed under his name which are now held to be spurious.

ANASTASIUS I., emperor of the East, born in Illyrium, 430, and died, 518. He was elevated to the throne on the murder of Zeno in 491. Anastasius was excommunicated by Pope Symmachus for his severities towards the Catholics. This was the first instance of the excommunication of a sovereign by the Pope.

ANASTASIUS II., raised to the throne of Constantinople on the deposition of Bardanes, whose secretary he had been, 713, was a man of learning, and a zealous Catholic, yet he did not neglect the defence of the empire, then threatened by the Saracens. On the breaking out of an insurrection in 716 he was compelled to retire to a monastery. When he attempted afterwards to regain his throne, he was seized and put to death by Leo, who had usurped the crown.

ANAXAGORAS, of Clazomena, a celebrated philosopher, born B.C. 500. He inherited a considerable estate in his own country, which he relinquished to indulge his thirst for knowledge and to devote himself to the study of poetry and eloquence, and taught philosophy, having among his pupils Euripides, the tragic poet, and Pericles, the great statesman. His reputation, however, created him enemies, and he was condemned to death on a charge of atheism, but the sentence was commuted into banishment. Anaxagoras then withdrew to Lampsacus, where he taught philosophy undisturbed until his death, which happened in his 72nd year, B.C. 428. Anaxagoras is celebrated as the first of the Greek philosophers who taught the existence of a Superior Mind, distinct from, yet pervading and governing, the universe.

ANAXANDRIDES, a Greek comic poet, of the 4th century B.C., said to have been the first who introduced love adventures on the stage. He was a native of Rhodes, and was starved to death at Athens for libelling the government.

ANAXARCHUS, a Greek philosopher of the atomic school of Leucippus and Democritus. He was the friend of Alexander the Great, whom he accompanied on his Asiatic expedition, and who admitted him to great freedom. He was punished to death in a mortar by the tyrant of Cyprus, B.C. 323.

ANAXIMANDER, the friend and disciple of Thales, of Miletus, born B.C. 610. He had a considerable knowledge of astronomy and

geography, and was the first who noticed the obliquity of the ecliptic; he also taught that the moon receives her light from the sun, and that the earth is globular; and to him is ascribed the invention of the sphere and geographical charts.

ANAXIMENES, the pupil and successor of Anaximander. He maintained that air is the first principle of all things; and Pliny attributes to him the invention of the sundial.

ANAXIMENES, of Lampsacus, a Greek historian and philosopher, son of Aristocles. He was one of the preceptors of Alexander the Great, whom he accompanied in most of his campaigns, and afterwards wrote the history of his reign, and that of his father Philip.

ANCHIETA, JOS., a Portuguese Jesuit, surnamed the Apostle of the New World; born at Teneriffe, 1538, and died, 1597. At the age of 20 he went to Brazil, where he founded the first college for the conversion of the savage natives.

ANCILLON, DAVID, a learned French divine, born at Metz, 1617, and died, 1692. On the revocation of the edict of Nantes, he retired from Metz, of which he had been for some time the pastor, to Frankfort, and thence to Hanau, where he attained to great celebrity by his theological writings and discoveries; and he afterwards accepted a situation in the French church at Berlin. His eldest son, Charles Ancillon, obtained through his influence the office of historiographer to the king of Prussia, and was afterwards made inspector of the French courts of justice. He was a man of much general reading, wrote several treatises, &c., and died, 1715.

ANCILLON, JOHANN PETER FRIEDRICH, a Prussian statesman and miscellaneous writer, was born at Berlin, in 1766. He early obtained reputation as a preacher and writer, was made councillor of state, minister of education, and finally minister of foreign affairs. Among his works are "Mélanges de littérature et de philosophie," "Essais philosophiques," and "Tableau des révolutions du système politique de l'Europe," the last being his best work. Ancillon was a member of the Berlin Academy of Sciences, and of the French Institute. Died, 1837.

ANKARSTROEM, or ANKARSTROM, JOHN JAMES, a Swedish military officer, who assassinated King Gustavus III. at a masked ball; for which crime he was scourged on three successive days, had his right hand cut off, and was then decapitated. Born, 1758; executed, 1792.

ANCRE, MARSHAL D'. [CONCINO CONCINI.]

ANOUS MARTIUS, fourth (mythical) king of Rome, elected on the death of Tullius Hostilius. During his reign Rome was enlarged by taking in the Aventine Hill, and occupying the hill Janiculum, beyond the Tiber. He also built the bridge called Sublicus, erected a public prison in the forum, extended the territories of Rome to the sea, and built the town and port of Ostia, at the mouth of the Tiber. Anous died after a prosperous reign of 24 years.

ANDERSON, ADAM, a native of Scotland,

was for many years a managing clerk in the South-Sea House, a trustee for the settlements in Georgia, and a member of the court of the Scotch Corporation of London. He wrote a work on the Historical and Chronological Deduction of Trade and Commerce; and died, 1765, aged 75.

ANDERSON, SIR EDMUND, lord chief justice of the Common Pleas under Queen Elizabeth, to which office he was promoted in 1582. He sat on the trials of Mary, queen of Scots, and of Davidson, the secretary, for issuing the warrant under which she was executed. Anderson's Reports, folio 1644, is still a book of authority. He was a native of Lincolnshire, and died, 1605.

ANDERSON, GEORGE, a young man of extraordinary talents, born at Weston, Buckinghamshire, in 1760, and died, 1796. His parents were peasants, and he worked as a day-labourer in the fields; his genius, however, overcame every difficulty, and he attained so great a knowledge of the mathematics, as procured him a clerk's place at the Board of Control, and afterwards the situation of Accountant-General. Mr Anderson published a "General View of the Affairs of the East India Company, since the conclusion of the War in 1784;" and translated from the Greek of Archimedes, the treatise entitled "Arenarius."

ANDERSON, JAMES, an advocate at the Scottish bar, eminent for his learning and antiquarian research, born at Edinburgh, 1662, and died, 1728, through an apoplectic stroke. His first work, "An Essay, proving the Independence of the Crown of Scotland," published 1705, procured him the thanks of the Scottish parliament, under whose auspices he subsequently produced a series of the Charters and Seals of the Scottish Monarchs from the earliest Antiquity down to the Union with England, a book which gained him the greatest reputation, and is entitled "Selectus Diplomatum et Numismatum Scotiæ Thesaurus."

ANDERSON, JAMES, a Scottish miscellaneous writer, born at Hermiston, near Edinburgh, 1739, and died 1808. He published a series of "Essays on Planting," which procured him much reputation as an agriculturist; and, in 1780, the university of Aberdeen conferred on him the degree of LL.D. In 1783, he removed to Edinburgh, and projected the establishment of the North British Fisheries; for which purpose he was employed by government to survey the coast of Scotland, and received great commendation for his services. Dr Anderson was the author of a number of publications chiefly on agricultural affairs; he also wrote for the Encyclopædia Britannica, and the Monthly Review.

ANDERSON, JOHN, F.R.S., professor of natural philosophy in the university of Glasgow, and founder of the useful institution in that city bearing his name, was born in 1726, at Roseneath, in Dumbartonshire. His great characteristic was an ardent desire for the instruction of his fellow-men, and he was indefatigable in studying and exemplifying the application of science to mechanical practice, for which purpose, in addition to his academical labours, he taught his am-

ANDERSON, a class, as he called it (formed of artisans
in their week-day dress), twice every week,
during the session to the end of his life.
Anderson wrote a work entitled "Institutes
of Natural Philosophy," which passed through several
editions. He was F. R. S. L. and E. He
died in 1796, directing by his will that the
whole of his property should be devoted to
the establishment of an educational institu-
tion in Glasgow, to be denominated Ander-
son's University, for the use of the un-
der-classes; which may justly be
considered as the parent of the Mechanics'
Institutions which afterwards sprang up
throughout the country.

ANDERSON, JOHN, son of a merchant
of Hamburg, of which city he himself be-
came principal magistrate in 1725. He was
employed in various negotiations with
European courts; and during his
travels abroad he cultivated an acquaint-
ance with all whom he found distinguished
in their literary attainments, and kept up
correspondence with them after his re-
turn. He died, 1713, aged 79. His principal
works are, "The Natural History of Greenland,
the Straits, and the Countries situated
in the Arctic Circle."

ANDERSON, LAWRENCE, one of the
promoters of the reformation of religion
in Sweden. He was chancellor to Gus-
tavus Vasa; but having engaged in a con-
spiracy, he passed the years of life left to
him in the king's clemency, in retirement.
1552.

ANDERSON, ROBERT, M. D., a native
of Glasgow, in Lanarkshire; author of
several works, critical and biographical.
The most highly valued are the follow-
ing: "Lives of the British Poets," in 14
volumes, published in 1795; "Works and Life
of Tobias Smollett;" and the "Life of
John Johnson." He was the friend and
patron of genius wherever it appeared; and
Campbell dedicated his "Pleasures of
Poetry" as it was chiefly owing to him that
the poem was brought before the world.
1830.

ANDROCIDES, an Athenian orator, was
born B. C. 467. He played a prominent part
in the political contests of the Greek states,
and led to the oligarchical party at Athens,
and was four times exiled: the first time
for opposing the Eleusinian mysteries, and
the second, it was said, with Alcibiades,
for his opposition to the mutilation of the
Hermæ. He is
said to have died in exile soon after
his return.

ANDRÉ, JOHN, a major in the British
Army in the American war; who, being
unable to perform his services to negotiate between
General Arnold and General Sir
Clinton, the former proposing to
the fortress of West Point to the
British, was taken prisoner by the Ameri-
cans, and held in their lines; and, owing to his
firmness and the nature of his mission, was
detained as a spy, Oct. 2, 1780.
He was the piece of execution his for-
eign captivities excited the admiration and melted
the hearts of the spectators. When asked
for anything to say, he replied, "No-
thing; but to request that you will witness
that I die like a brave man."

A monument is erected to him in West-
minster Abbey.

ANDREA DEL SARTO. [SARTO.]
ANDREOSSO, FRANÇOIS, an eminent
French engineer and mathematician, was
born at Paris in 1633. He assisted Riquet
in forming the canal of Languedoc, the sole
merit of which stupendous work has been
unjustly claimed for him. Died, 1688.

ANDREOSSO, ANTOINE FRANÇOIS, Count,
a distinguished French military officer
and engineer, and eminent also as a diplo-
matist, was descended from the subject of the
preceding article, and born in Languedoc,
1761. He was a lieutenant of artillery at
twenty; served with distinction in Italy and
Egypt; and had reached the rank of In-
spector-general of the artillery when Napo-
leon ascended the throne. He was successively
ambassador to London, Vienna, and
Constantinople; and received many marks of
the imperial favour. On the restoration of
Louis XVIII., in 1814, Andreossi was recalled
from his embassy to the Porte, and pre-
sented with the cross of St Louis; but on
the return of Napoleon from Elba, he again
attached himself to his old master; and
was one of the commissioners chosen to
treat with the allies by the provisional
government. He wrote a "Histoire Géné-
rale du Canal du Midi;" the "Campaign of
the Gallo-Batavian Army on the Maine and
Rednitz," &c. Died, 1828.

ANDREOZZI, GAETANO, a celebrated
musical composer, born at Naples, 1763;
died at Paris, 1826.

ANDREWS, HENRY, a self-taught ma-
thematician, born of poor parents at Fries-
ton, near Grantham, 1744, and died, January
26, 1820. Having, while in a menial em-
ployment, occupied his leisure moments in
the study of astronomical science, he at-
tained therein great proficiency, and for
more than 40 years was computer of the
Nautical Ephemeris, and the calculator of
Moore's Almanack.

ANDREWS, LANCELOT, bishop of Win-
chester, and one of the most learned prelates
of the 17th century, was born in London in
1565. He was educated at Cambridge, early
distinguished himself as a preacher, was
made chaplain to Queen Elizabeth and dean
of Westminster. James I. made him in 1605
bishop of Winchester and lord almoner. He
also employed him to answer the work in
which Cardinal Bellarmine (Matthew Tortus)
had attacked James's "Defence of the Rights
of Kings." The answer was entitled "Tor-
tura Torti." Andrews was made bishop of
Ely and privy-councillor in 1609, and was
translated to Winchester in 1618. He be-
longed to what is now called the High
Church party, but was not wanting in pru-
dence and moderation. His learning was
extolled by some of the greatest European
scholars, his oratory was irresistibly fasci-
nating, and his moral character was worthy
of his fame and office. Among his works
are a "Manual of Private Devotions," Ser-
mons, Lectures, &c. He took part in the
authorized translation of the Bible. Died,
1626.

ANDRIEU, BERTRAND, a medallic en-
graver, born at Bordeaux, 1761, and died at

Paris, 1822; considered as the restorer of the art of engraving medals, which had declined after the reign of Louis XIV.

ANDRIEUX, F. G. J. S., a clever and voluminous French author, dramatist, poet, and politician, born in 1750. He was member of the Council of Five Hundred in 1798; was afterwards librarian to Joseph Buonaparte, Professor of Belles Lettres at the Polytechnic School, and Professor of Literature at the College of France, filling the last chair nearly 20 years. He was also named perpetual Secretary of the French Academy. Opposed to arbitrary power, he advocated warmly the liberty of the press and the system of "Ecoles Primaires." He was one of the projectors and chief contributors of the "Decade Philosophique," and was an active member of the Institute. Among his dramatic pieces are "Anaximander," "Les Etourdis," "Le Vieux Fat," and "Le Jeune Homme à l'Epreuve," &c. &c.

ANDRISCIUS, a man of mean extraction, who, pretending to be the son of Perseus, the last king of Macedonia, took the name of Phillip, and was called Pseudo-Phillipus. Having obtained a signal victory over Juventius, the Roman pretor, he assumed the kingly power; but in the end was conquered, and served to grace the triumph of Metellus, before whom he walked in chains.

ANDRONICUS CYRREHSTES, a Greek architect, who built the famous octagonal tower, known as the temple of the winds, at Athens, which has been used as a mosque by the Turks. He is also said to be the inventor of the weathercock.

ANDRONICUS, LIVIUS, the oldest dramatic author in the Latin language, who flourished about 240 years B. C. Nearly all his works are lost.

ANDRONICUS, of Rhodes, a follower of Aristotle, to whom we are indebted for restoring and publishing the works of that philosopher, about B. C. 60.

ANDRONICUS I., COMNENUS, emperor of the East, was the son of Isaac, and grandson of Alexius Comnenus. He was of an active martial mind, and eloquent; but was profligate, passionate, and cruel. On the death of his cousin, the emperor Manuel, in 1183, he was chosen partner in the government with Alexis II., who, being a mere youth, soon fell a sacrifice to his coadjutor's thirst of power, and Andronicus became sole emperor. The revolt excited by Isaac Comnenus, and supported by the king of Sicily, led to numerous proscriptions on the part of the emperor; but the people, exasperated at his various cruelties, proclaimed Isaac Angelus emperor, and Andronicus, now 75 years of age, after being subjected for several days to the most horrible outrages and tortures, was at last hung by the feet, and then run through with a sword, 1185.

ANDRONICUS II., PALÆOLOGUS, surnamed the Elder, succeeded Michael VIII., in 1283, having been joint emperor with him since 1273. His long reign was troubled by ecclesiastical discussions, the first act of his reign being the revocation of the act of union of the Greek and Latin churches effected by Michael. By the inroads of the Turks, and the revolt of his grandson, who

having been crowned emperor, took Constantinople in 1328, the aged Andronicus, deprived of all but the imperial adornments, and confined to one room in the palace, was glad to find refuge in a cloister, where he died about four years afterwards, 1332.

ANDROUET DU CERCEAU, JACQUES, an eminent French architect of the 16th century, who designed the Pont Neuf, and commenced the building of it in 1578. He was also employed, in 1596, to continue the gallery of the Louvre; but was obliged to quit France during the persecution of the Protestants, and no further account of him is on record.

ANEURIN, a British poet and chieftain of the sixth century, supposed by some authors to be the same with Gildas, the historian. He took part in the battle of Cattraeth, which he made the subject of a poem; this, and a few poetical fragments, form the whole of his known works. The poem entitled "Odes of the Months," formerly attributed to Aneurin, is now considered spurious. Aneurin was one of the noblest poets of the Kymry.

ANGELICO, FRA GIOVANNI DA FIESOLE, IL BEATO, a very celebrated Italian painter, was born at Mugello, in 1387. He entered the order of Predicants at Fiesole in 1407, and is supposed by some writers to have early practised the art of illuminating books. He painted at Cortona, Fiesole, Florence, Rome, &c. Among his finest works are the frescoes in the convent of St Mark, Florence, and those in the chapel of Nicholas V. in the Vatican. He was a man of earnest piety and profound humility, worked always by the aid of divine inspiration, which he sought before commencing, and would never, it is said, alter a picture. His subjects are all religious, his execution most delicate and elaborate, frequently resembling illuminations, and his own character is impressed on all his works. He spent the last eight years of his life at Rome, where he died in 1455. The National Gallery possesses two examples of this master.

ANGELUS, CHRISTOPHER, a Greek, who, being driven from his own country by the Turks, found an asylum in England in 1608; and, under the patronage of the bishop of Norwich, he was placed in Trinity College, Cambridge, whence he removed to Balliol College, Oxford, where he was of great service to the junior students, and where he died, 1638. He published several works in Greek, English, and Latin.

ANGERSTEIN, JOHN JULIUS, a distinguished patron of the fine arts, born at St Petersburg, 1735; died at Blackheath, Jan. 22, 1822. He came over to England under the patronage of Andrew Thompson, Esq., with whom he lived in partnership upwards of 50 years. Mr Angerstein exhibited much public spirit on several occasions, and was the first who proposed a reward of £2000 from the fund at Lloyd's to the inventor of the life-boats. His celebrated collection of paintings, esteemed inferior to none of the same extent in Europe, was purchased by the English government for £50,000, and formed the nucleus of the National Gallery.

ANGIOLELLO, GIOVANNI MARIO, a Ve-

rowned emperor, took Constantine, the aged Andronicus, and the imperial adornments, to the room in the palace, where he was in a cloister, where he was afterwards, 1332.

DU CERCEAU, JACQUES, an architect of the 16th century, designed the Pont Neuf, and the building of it in 1578. He died, in 1596, to continue the work; but was obliged to stop the persecution of the king no further account of him.

A British poet and chieftain, supposed by some authors to be the same as Gildas, the historian in the battle of Cattraeth, the subject of a poem; this, and other fragments, form the *Welsh works*. The poem *the Months*, formerly attributed to him, is now considered as one of the noblest poems.

A GIOVANNI DA FIESOLE, celebrated Italian painter, died in 1387. He entered the ranks of the knights of St. Mark in 1407, and was afterwards distinguished by some writers to have been the author of some of the most beautiful and most valuable works of art in the world. He painted the *St. Mark*, Florence, and the *St. Nicholas V.* in the church of St. Mark, Florence. He was a man of earnest piety, and his works are full of simplicity, worked always as if by inspiration, which he never loses, and would never be surpassed. His subjects are executed most delicately, and with a purity resembling illumination. His character is impressed on his works, and he spent the last eight years of his life in the study of the art, where he died in 1438. He possesses two examples.

ANTHONY, a Greek, who was his own country by birth, and spent his youth in England in 1608. He was the son of the bishop of Bath, and was placed in Trinity College, where he was removed to Balliol College, where he was of great service to the students, and where he published several works in Latin.

JOHN JULIUS, a distinguished fine arts, born at Blackheath, Jan. 17, 1732. He came over to England under the name of Andrew Thompson, Esq., and in partnership with Johann Heinrich Fischer exhibited much success on several occasions, and was rewarded with a reward of £2000 by the king for the invention of a celebrated collection of medals, which is inferior to none of the world, and was purchased by the king for £80,000, and is now in the possession of the National Gallery.

A GIOVANNI MARIO, a Venetian

historian of the 15th century. In his youth he was taken captive by the Turks, and made slave to Mustapha. He was redeemed by Mohammed II., and attended him on an expedition to Persia, 1473. Angiolo wrote the history of Mohammed II., in the Turkish and Italian languages; also the history of Ussun Cassan. He died probably about 1530.

ANGLESEY, HENRY WILLIAM PAGET, G. C. B., &c. &c., marquis of, the eldest son of the first earl of Uxbridge, was born in 1768, and was educated at Westminster School, Christchurch, Oxford, which University he left in 1790. Three years afterwards he succeeded to his father's estates in Staffordshire, a body of volunteers, numbering 1000, which were embodied in the 80th regiment of foot, or Staffordshire Volunteers. Of this regiment Lord Paget was once made Lieutenant-Colonel, and served in Flanders in 1794, one of the most brilliant spots of that unfortunate campaign was the gallantry he displayed, particularly in the retreat, in which he held the rear command of Lord Cathcart's brigade.

In 1795 Lord Paget was transferred to a branch of the service upon which his name was shed such lustre, and which has since raised to a degree of efficiency not known before. In 1797 he obtained the command of the seventh Light Dragoons, and in 1800 accompanied the Duke of York on an expedition to Holland, where his dashing conduct at the head of the cavalry rendered him the admiration of the service. For some time afterwards, he devoted himself entirely to the discharge of his regimental duties; he was promoted to Major-General in 1802, and Lieutenant-General in 1808. In that year he proceeded to the Peninsula in command of two brigades of cavalry, and although his stay there was short, he did not leave behind him the *souvenirs* of a man, Major-General, and Benevante. In 1809 he returned to England, where he remained some time, taking no part in the subsequent Peninsular campaign; but attending to his duties in the House of Commons, as a member of the Milbourne Port, till, on the death of the Duke of Devonshire, in 1812, he was removed to the rank of Lord as Earl of Uxbridge. In 1815 he proceeded to Belgium in command of the

To narrate Lord Uxbridge's deeds are simply to revive some of the most remarkable reminiscences of that short but eventful campaign. It is unadmitted that, next to the great victory of the host, the victory of Waterloo was indebted to the Earl of Uxbridge more than any other of the warriors of that day. Towards the close of the campaign, on the 18th of June, he received a severe wound in the leg, which it was necessary to amputate the limb. For his services he was created Marquis of Anglesey, and received many other marks of distinction from his country. In 1827 he was appointed Master-General of the Ordnance, and in 1828 proceeded to Ireland as Viceroy, where his capacity he gained the warm affection of the Irish people. But his advocacy of Catholic Emancipation led to his resignation, which he resigned within a few months after his ap-

pointment; and in 1830 he was again nominated to the same office, which he retained till 1833, when Lord Grey's cabinet broke up. In 1846 he was advanced to the rank of Field-Marshal, and the same year once more became Master-General of the Ordnance, which office he held till 1852. Seidom were his bravery, gentleness, and generosity combined in such noble proportions as in the Marquis of Anglesey. In his character, says a contemporary, there was not a fold; it was all open as day. His politics were thoroughly liberal; he generally was in advance of public opinion; and all measures of reform, in Church and State, had in him a strenuous and a steady champion. Had his eloquence been equal to his mental powers, he would have achieved as great a name in Parliament as in the camp; for he had a sound, shrewd understanding, a judgment rarely at fault, and accompanied with a moral courage no inferior to his brilliant physical bravery in the field of battle. The Marquis was twice married, in 1795 to a daughter of the fourth Earl of Jersey, but this marriage was dissolved in 1810, and her Ladyship married the Duke of Argyll. In 1810 Lord Anglesey married Lady Charlotte Cadogan, whose marriage with the late Lord Cowley had been previously dissolved. Died April 20, 1854.

ANGOULEME, CHARLES DE VALOIS, duke of, natural son of Charles IX.; born in 1575; and died, 1650. Catherine de Medici bequeathed to him her estates, but the will was set aside in favour of Margaret de Valois. Charles, however, retained the title of count d'Auvergne, and in 1619 was made duke of Angoulême. He gained great reputation as a military commander, taking part on the side of Henry IV. at the battles of Arques and Ivry; but was twice charged with treason, and the second time condemned to death, which sentence was changed into perpetual imprisonment. He was, however, once more pardoned, and distinguished himself at the sieges of Soissons and Rochelle, and in the campaigns in Germany, Languedoc, and Flanders. His memoirs, written by himself, were published soon after his death.

ANGUIER, FRANÇOIS and MICHEL, sculptors, natives of Eu, Normandy. François, the eldest, was keeper of the royal cabinet of antiquities, and executed several great works, particularly the mausoleum of the Duke of Montmorency. Michel was a member of the Academy, and among his works are the group of the Nativity at the church of Val de Grace, and the bas-reliefs of the gate of St. Denis. The former died, 1669; the latter, 1686.

ANGUILLARA, GIOVANNI ANDREA, an Italian poet, was born about 1517. At first employed in a printing-office, he gained some reputation by his translations of Ovid's *Metamorphoses* and other works, and went to Rome; but in consequence of his misconduct, died in misery, 1565.

ANGUISCIOLA, SOFONISBA, an Italian painter, was born of a noble family of Cremona in 1533. She excelled in portraits; went to Madrid on the invitation of Philip II.; was twice married; became blind, and died at Genoa, about 1620. A comparison of

dates throws doubt on the story of Vandeyck's visit to this artist at Genoa; his journey to Italy not commencing till 1623.

ANNALT-DESSAU, LEOPOLD, prince of, Prussian field-marshal, was born in 1676. He entered the army at an early age, and served in the war of the Spanish Succession. He commanded the Prussian forces sent into Italy, where he greatly distinguished himself, and was wounded at the battle of Cassano. He next served in the war with Charles XII., whom he defeated at the island of Rugen. The re-organization of the army occupied his attention during a long residence at Berlin. In 1745 he won a great victory over the Saxons and Austrians at Kesseldorf, and assisted at the capture of Dresden. Died, 1747. A marble statue by Schadow was erected to him at Berlin.

ANICHINI, LODOVICO, a celebrated Italian medalist of the 18th century. He executed a medal representing the interview of Alexander the Great and the High Priest at Jerusalem, which Michael Angelo pronounced to be the perfection of the art.

ANJOU, FRANCIS, duke of, who bore at first the title of duke of Alençon, was the son of Henry II. of France and Catherine de Medici, and was born in 1554. A strong dislike existed between his mother and him; he associated himself with the leading Huguenots, and openly condemned the massacre of St Bartholomew. In 1573 he took part in the siege of La Rochelle. A plot to raise him to the throne on the death of Charles IX. failed, and he was imprisoned with the king of Navarre. Retiring afterwards from the court, he joined the Protestants, but soon forsook them, and received from the king Berri, Touraine, and Anjou, the latter being then made a duchy for him. In 1576 he was head of the Catholic party, and in the next year he assisted the Flemings against the Spaniards. In 1581 he was chosen sovereign of the Netherlands. The same year he visited England with a view to negotiate a marriage with Queen Elizabeth, but after a stay of some months he returned unsuccessful to the Netherlands. His despotic interference with the rights of the people produced a revolt, and he was expelled the country. He retired to France, and died in 1581.

ANNA COMNENA was the daughter of the emperor Alexius Comnenus I., at whose death she conspired to place the crown on the head of her husband, Nicophorus Briennius, but without success. She then turned her attention to literary pursuits, and wrote the "Alexiad," a history of her father's reign. Died, 1148.

ANNA IVANOWNA, empress of all the Russias, daughter of the Czar Ivan Alexlovitch; born, 1693; married to the Duke of Courland in 1710; succeeded to the crown on the death of Peter II., 1730; and died, 1740. Her favourite Biren soon attained supreme power, and governed the empire with intolerable tyranny. It is said that ten thousand lives were sacrificed to his violence, and that twice that number of persons were driven into exile. During this reign, Russia was on a peaceable footing with her neighbours, the only hostilities in which she was

engaged being a war to establish Augustus III. on the throne of Poland, and a war with the Ottoman Porte in 1736, which was terminated by the peace of Belgrade, in 1739.

ANNE, of Austria, queen of France, eldest daughter of Philip II. of Spain; born, 1604; married to Louis XIII. of France, 1615, at whose death, 1643, she was declared sole regent during the minority of her son, Louis XIV.; she chose for her chief minister Cardinal Mazarin. Attempts to treat despotically the magistrates, who opposed the measures of the court, gave rise to the famous wars of the Fronde, in which the queen ultimately triumphed over the nobles and the people. Her son Louis assumed the reins of government, 1661. Anne then retired, passing the remainder of her life in pious exercises, and died in 1666.

ANNE, of Cleves, daughter of John, third duke of Cleves, became in 1540, at the age of 25, the wife of Henry VIII. of England, who fell in love with Holbein's portrait of her, but was disenchanted at first sight, and in a few months divorced her. She was of a dull apathetic nature, contented herself with a pension, and died in England, 1557.

ANNE, queen of Great Britain, second daughter of James II., by his first wife, Anne Hyde, was born in 1664; married to Prince George of Denmark, 1683; succeeded to the crown on the death of William III., 1702; and died, 1714, aged 50. Her reign is marked by the great war of the Spanish Succession and the achievements of Marlborough, the accomplishment of the legislative union of Scotland with England, and the dashing exploits of Lord Peterborough in Spain. Anne was of a kind and yielding disposition, and was long entirely controlled, first, by the imperious duchess of Marlborough, to whom she became warmly attached in childhood, and afterwards by her attendant, Mrs Masham. Prince George died in 1708, and their six children died young. The contention of parties during the reign of Anne was extremely violent, in consequence of the hopes entertained by the Jacobites that she would be induced by natural feelings to favour the succession of her brother, the Pretender. Her reign was also distinguished for the number of eminent writers who then flourished, several of whom rose to high stations.

ANNESLEY, ARTHUR, earl of Anglesea, and lord privy seal in the reign of Charles II.; born at Dublin, 1614; and died, 1680. At the commencement of the civil wars he joined the royal party, and sat in the parliament at Oxford, 1643; but having made peace with the republicans, he was sent commissioner to Ulster, 1645. He, however, took an active part in the restoration of the king, for which he was created earl of Anglesea, made treasurer of the navy, and, shortly afterwards, lord privy seal.

ANQUETIL, LOUIS PIERRE, a celebrated historian, born at Paris, 1723; died, 1803. Having distinguished himself as an able teacher of theology and general literature, he was appointed prior of the abbey de Roc, in Anjou, director of the college de Senlis, and prior of Chateau Renard. During the height of the revolution he was thrown into prison, where he began his "Précis

"l'Histoire Universelle," which was afterwards published in nine volumes. At the formation of the French Institute, Anquetil became one of the members. Among his works are, "L'Esprit de la Ligne," "Louis XIV. sa cour et le régime," and "L'Histoire de Franco."

ANQUÉTIU DU PERRON, ABRAHAM HYACINTHE, brother of the preceding, was born at Paris, 1731; and died, 1805. In order to gratify his taste for oriental literature, he joined the expedition fitting out for India, in 1751, as a private soldier; and employed every moment of his leisure in the study of the Sanscrit. On the taking of Pondicherry by the English, he returned to Europe, visited London and Oxford, and conveyed the various MSS. he had obtained to Paris. He was then appointed oriental interpreter in the king's library, with a pension, and devoted himself to the publication of his researches. The principal fruit of his labours was the translation of the Zend-Avesta, which appeared in 1771.

ANSCIAIR, ST. or ANSCARIUS, bishop of Hamburg and Bremen, born in France, 801; died, 861. He preached the gospel to the Danes and Swedes, founded several hospitals, and a library in the abbey of Corvey, and was canonized by Pope Nicholas I.

ANSELM, ST. archbishop of Canterbury in the reigns of William Rufus and Henry I.; born at Aosta, Piedmont, 1033. He was originally a monk, and afterwards superior of the abbey of Bec, Normandy. Visiting England several times during his life, he was called, in 1093, to attend William Rufus in a fit of sickness at Gloucester, and received his appointment to the primacy the same year. But differences arising between the king and the prelate, respecting the temporalities of his see, which the king withheld from him, Anselm left the kingdom. On the accession of Henry I. he was recalled to England, and was well received; but a new rupture arising, in 1103, in consequence of the archbishop's refusing to be re-invested by the king, the dispute was referred to the pope, who decided in favour of Anselm. This was resisted; and at length the pope made a concession, by allowing the English bishops and abbots to do homage to the king for their temporalities. The king visited Anselm, then living at Bec, and their quarrel being terminated Anselm once more returned to England. He died at Canterbury in 1109, and was canonized in the reign of Henry VII. He was a man of great piety and powerful understanding, and is distinguished as the first of the long series of scholastic metaphysicians. In his works, many of which are extant and have been frequently reprinted, we see that he felt the want of a religious philosophy, and endeavoured, though unsuccessfully, to lay the bases of such a system.

ANSON, GEORGE, Lord, a celebrated naval commander, was born at his father's seat in the parish of Colwich, Staffordshire, 1697, and died at Moor Park, Hertfordshire, 1762. He entered early into the navy, and was made post-captain in 1724. Being ordered to the South Carolina station, he purchased land, and built a town there, called after his

name. In 1739 he was appointed commodore of an expedition against the Spanish settlements in the Pacific Ocean; and sailed from Portsmouth the following year with five men-of-war, a sloop, and two victualers; doubled Capo Horn in March, 1741, after losing two of his ships; and in June following arrived off Juan Fernandez, with only two ships and two tenders. This place he left in September, took some prizes, burnt Païta, and continued on the American coast, in expectation of falling in with the annual Acapulco ship, till May, 1742; when, having only his ship, the Centurion, left, he crossed the southern ocean for China, where he stayed several months, and returned in quest of the galleon, which he fell in with, and captured after a smart action. Having sold his prize in China, he sailed for England, and arrived at Spithead, June 15, 1744, passing in a fog through the midst of a French fleet, then cruising in the Channel. In 1747 he commanded the Channel fleet, and captured six French men-of-war, which were conveying a large fleet bound to the East and West Indies. Two of these prizes were the Invincible and the Glory, which induced the captain of the former to say to the admiral, on giving up his sword, "Sir, you have conquered the Invincible, and Glory follows you." For these and other services, he was created a peer, and afterwards made vice-admiral of England. In 1751 he was appointed first lord of the Admiralty, which post he held, except for a short interval, until his death. In 1758, he again commanded the Channel fleet, and was appointed admiral, and commander-in-chief of his Majesty's fleets, for the purpose of conveying her Majesty, Queen Charlotte, from Cuxhaven to England.

ANSPACH, ELIZABETH, margravine of, was the youngest daughter of Augustus, earl of Berkeley. To a good and highly cultivated understanding, this lady joined the most prepossessing manners, and a large portion of feminine beauty. When little more than sixteen, lady Elizabeth married Mr (afterwards earl of) Craven, by whom she had seven children; but after living together thirteen years, they separated from mutual feelings of dissatisfaction. Lady Craven made a tour, and took up her residence in the court of Anspach, where she established a theatre, wrote plays, directed the performance, and became a principal personage with the margrave: the margravine was generally confined to her chamber by ill health, and shortly after died. Lady Craven remained a visitor at Anspach, and accompanied the margrave in his excursion to other courts. Six weeks after the death of Lord Craven, his widow married the margrave, and both came to England. The margrave disposed of his principality to the king of Prussia, and having purchased Brandenburg House, Hammersmith, it became the scene of fashionable dissipation; the queen, however, refused to receive the margravine at her drawing-room, and no other influence could obtain her admission to the British court. In 1806 the margrave died, and after that event the margravine resided generally abroad. At Naples the king gave her two acres of ground,

on which she erected a handsome villa, and there continued to reside until her death, which took place in 1828.

ANSTEY, CHRISTOPHER, poet, was born in 1724; studied at Eton and Cambridge; and on succeeding to his father's property, resided principally at Bath. He wrote the satirical poem, "The New Bath Guide," which obtained a rapid popularity. It is a clever and amusing sketch of an odd phase of English social life, largely mixed with ridicule of the "Methodists," as all earnestly religious people were then called, and of physicians. It abounds in passages grossly indecent and unfit to be republished. Strange to say, the author of this trivial and impure book has a monument in Westminster Abbey. Died, 1805.

ANSTIS, JOHN, antiquary, and the author of various works on heraldry, was born at St Neots, Cornwall, in 1669, and educated at Oxford. He was member for St Germans, and in 1718 appointed garter king at arms. Died, 1744.

ANTAR, an Arabian chief and distinguished poet, who lived in the 6th century. His works, which form a portion of the famous *Moallakat*, are devoted to the description of his warlike deeds, and his love for the fair *Abia*. The celebrated Arabian romance, entitled "Antar," by *Asmai*, affords a perfect idea of the manners, opinions, and superstitions of the early Arabians; and of this there is an English version, entitled "Antar, a Bedouene Romance, translated from the Arabic by Terrick Hamilton," in 4 vols. 12mo.

ANTHEMIUS, eminent as an architect, sculptor, and mathematician. He was a native of Tralles in Lydia, and was employed by the emperor Justinian. He is remembered chiefly as the architect of the famous church of Saint Sophia, at Constantinople. It was completed according to his design by Isidorus of Miletus. Anthemius died in 534.

ANTHONY, ST, THE GREAT, the founder of monastic institutions, was born A. D. 251, at Coma, near Heraeala, a town of Upper Egypt. In 305, having sold all his property and given the proceeds to the poor, he withdrew into the desert, whither a number of disciples were attracted by his reputation for sanctity; and thus was formed the first community of monks. He afterwards went to Alexandria, to seek the honour of martyrdom amid the persecutions then raging against the Christians; but as his life was spared he again returned to the desert, and died at the great age of 105.

ANTHONY, ST, OF PADUA, a learned Franciscan monk, was born at Lisbon, 1195: entered the order when thirty years of age, and went to preach to the Moors of Africa; he was afterwards sent by St Francis, whom he met in Sicily, to teach theology at Bologna, Montpellier, Padua, &c. He offended the general of his order by his severity, and his fearless denunciation of all abuses, and to save him from threatened confinement Gregory IX. called him to Rome. He died at Padua, 1231; and was canonized the following year. His works, consisting chiefly of his sermons and a Moral Concordance

of the Bible, have been frequently republished.

ANTIGONUS, surnamed the One-eyed, was one of the greatest generals of Alexander the Great, on whose death, B. C. 323, he became governor of Phrygia, Lyca, and Pamphylia. After the death of Antipater he made war on Eumenes, and having defeated and put him to death, he carried on war with the other generals who shared the empire, and obtained the sovereignty of Asia in B. C. 311. Five years later he took the title of king; invaded Egypt, and failed, excited the jealousy of his rivals, who combined against him, and was defeated and slain at the battle of Ipsus, in 301.

ANTIGONUS, GONATAS, king of Macedonia, was the son of Demetrius Polloreetes, and obtained the crown in B. C. 277, six years after his father's death. He was twice deprived of his kingdom, first by Pyrrhus, king of Epirus, and afterwards by Alexander, son of Pyrrhus. His ambitious attempts in the Peloponnesus brought him into conflict with the Achaean League. Died, B. C. 239.

ANTINES, MAUR FRANÇOIS, D', a very learned French Benedictine of the congregation of St Maur. He was born in 1688, and after distinguishing himself by the publication of several important works, projected the great work on chronology, *L'Art de Vérifier les Dates*, the first part of which appeared in 1750. Died, 1746. (See CLEMENCET.)

ANTIOCHUS III., the Great, king of Syria, was the son of Seleucus Callinicus, and was born about B. C. 238. He succeeded his brother in 223, and after suppressing several revolts, made war on the king of Egypt, but was defeated at Raphia in Palestine, in 217. After a long war in the East, in which he made extensive conquests, he again made war on Egypt, and gained the provinces he coveted, Coele-Syria and Palestine. He was afterwards involved in war with the Romans, gave shelter to Hannibal, unsuccessfully invaded Greece, and was compelled at last to give up to the Romans all his provinces east of the Taurus, and pay an enormous sum of money. He was killed by the citizens of Elymais while pillaging their temple of Jupiter, B. C. 187.

ANTIOCHUS IV., EPIPHANES, king of Syria, was the son of the preceding, and after being many years in captivity at Rome, succeeded his brother Seleucus Philopator in B. C. 175. The chief events of his reign were the war with Egypt for the possession of Palestine and Coele-syria, which occupied him several years; and his cruel persecution of the Jews, which provoked the insurrection in which the Maccabees distinguished themselves. His cruelty and evils gained him the title of "Epimanes," or "the Madman." Died, B. C. 166.

ANTIPATER, the Macedonian, was the friend and minister of Philip, and his son Alexander the Great. When the latter set out to the conquest of Asia he appointed Antipater regent of Macedonia and Greece. Dissension between the regent and the queen-mother Olympias led to the appointment of Craterus in his place; but he

was soon reinstated. A war with the allied Greeks followed, and in B. C. 322 they were defeated at Crannon. Antipater next made war on Perdicas, who was soon after slain in Egypt. Died, B. C. 319.

ANTIPHON, the Rhamnusiian, an Athenian orator, born, B. C. 489. He opened a school of rhetoric at Athens, and is said to have had Thucydides among his pupils, and he was the first who laid down rules of oratory. Having assisted in establishing the tyranny of the four hundred, he was put to death on the restoration of the popular government, B. C. 411.

ANTISTHENES, a Greek philosopher, founder of the Cynic school. He was a native of Athens, and after following the sophist Gorgias for a time, became a disciple of Socrates, to whom he faithfully adhered. Antisthenes opposed speculative inquiries, and limited his teaching to practical morals. He held that goodness was the one thing needful, and that mere human comforts and luxuries were to be despised. He wrote many dialogues with great vigour and elegance of style. Died at Athens.

ANTONELLO DA MESSINA, born, 1414; died about, 1495. He is said to have been the first artist who introduced oil painting into Italy. Seeing one of the works of John van Eyck at Naples, he went to Flanders to learn the new method, and spent several years there. He then returned to Italy, and taught it, at first privately, and afterwards publicly.

ANTONINUS, a geographical author, the writer of a valuable Itinerarium, whose life is unknown. Burton published an excellent commentary on it, as far as relates to Britain.

ANTONIUS, MARCUS, a brave and eloquent Roman consul, who had been governor of Cilicia, and subsequently became censor. He was one of the greatest orators among the Romans; and, according to Cicero, it was owing to him that Rome became a rival in eloquence to Greece. He was slain during the civil war between Marius and Sulla, B. C. 87.

ANTONIUS, MARCUS, the triumvir, was the grandson of the preceding, and was born about B. C. 85. He was early a profligate, after gaining distinction as a soldier in Syria and Egypt, he joined Julius Cæsar in Gaul, and remained his warm partisan. He made quæstor, augur, and tribune; contributed to the victory of Pharsalia; became consul with Cæsar in B. C. 44, and offered him the kingly title. After the murder of Cæsar, Antony was opposed by Octavius Cæsar, who defeated him at Mutina. After the two rivals came to terms, and Lepidus, formed the first triumvirate. The proscription which followed Cicero sacrificed to the long-standing hatred of Antony. The republican army led by Brutus and Cassius was defeated at Philippi, and the leaders fell. Passing into Greece, and thence into Asia, Antony met the famous Cleopatra, queen of Egypt, whose charms seduced him long from Italy. On the death of his wife Fulvia in 40, he married Octavia, the daughter of Augustus, whom in a few years shamefully divorced for the sake of Cleo-

patra. The triumvirate was renewed in 37. After invading Parthia and Armenia Antony assumed the airs of a despot, and provoked the war which ended with his total defeat at Actium and the triumph of Augustus, B. C. 31. Killed himself in Egypt, B. C. 30.

ANVARI, a Persian poet, born in Chorasana. He was well versed in astrology, and composed several books on that science; but having failed in his predictions, he retired from the court of the sultan Sanjar, and died at Balkh, in 1200.

APEL, or APPELLES, JOHN, a German lawyer, and one of the earliest preachers of the Reformation; born at Nuremberg, 1486, and died there, 1536.

APELLES, one of the greatest of the Greek painters. His birthplace is unknown, as are also the dates of his birth and death. He flourished B. C. 340—323, and was the friend of Alexander the Great, who, it is said, was especially distinguished for his representations of female grace and beauty. His masterpiece was the "Venus rising from the sea," which was taken to Rome by Augustus. His pictures of Alexander and Antigonus were very celebrated. He wrote a work on his art, but it is lost.

APELLICON, a peripatetic philosopher, to whom the world is indebted for the preservation of the works of Aristotle, which he collected and bought at a vast expense, about 90 years B. C. They were afterwards seized by the dictator Sylla, and carried by him to Rome.

APIAN, PETER, German mathematician and astronomer, born in Misnia, 1495; died, 1589. Apian was the first who discovered that the tails of comets are always projected in a direction from the sun, and records his observations upon five, which appeared in the years 1531, 1532, 1533, 1538, and 1539.

APICIUS, a noted glutton in the reigns of Augustus and Tiberius. It is recorded of him that he spent £2,500,000 sterling in providing the luxuries of his table; and finding himself reduced to £250,000 he poisoned two other epicures of the same name; one who lived in the time of Sulla; and the other, whose extravagance and gluttonous propensities were ices enormous, contemporary with Trajan.

APION, a learned grammarian and historian, born at Oasis, Egypt, in the first century. He studied at Alexandria, and was a professor of rhetoric at Rome in the reign of Tiberius. Apion was head of the embassy sent by the Greek citizens of Alexandria to Rome to plead against the privileges enjoyed by their Jewish fellow-citizens, on which occasion he was opposed by Philo. In his "Antiquities of Egypt," he attacked the Jews, and was answered by Josephus.

APOLLINARIS, CAIUS SOLLIUS SIDONIVS, an early Christian poet, was born at Lyons about 430. He was carefully educated, and having married the daughter of Avitus, who became emperor in 456, followed him to Rome, where he rose to honour and some of the highest offices of state, under Avitus, Majorian, and Anthemius. He wrote panegyrics in verse on each of these sovereigns.

In 472, although a layman, he was appointed bishop of Clermont in Auvergne, and renounced all his civil dignities and estates to devote himself to his spiritual duties. His extant works consist of poems and letters, which are valued for the historical facts recorded in them, and have been frequently reprinted. Died between 480 and 490.

APOLLINARIUS, CLAUDIUS, bishop of Hierapolis, Phrygia, about 177, who wrote an apology for the Christian religion, addressed to Marcus Aurelius.

APOLLINARIUS, a presbyter of Alexandria in the 4th century, who wrote a history of the Hebrews in Greek heroic verse. He died about 382. He had a son who became bishop of Laodicea, and wrote a treatise against paganism, which he sent to Julian.

APOLLIDORUS, a famous painter at Athens, B. C. 408. Pliny mentions two pictures by him, one of a priest of Apollo at the altar, and the other of the shipwreck of Ajax.

APOLLIDORUS, a celebrated architect, was born at Damascus, and lived under Trajan and Adrian. He was employed by the former in building the great stone bridge over the Danube, and other structures; but, falling into disgrace with Adrian, he lost his life through that emperor's caprice.

APOLLONIUS, of Perga, a mathematician of Alexandria, about 240 years B. C. He composed several curious geometrical works, of which his book on conic sections alone exists.

APOLLONIUS, RHODIUS, Greek poet, born in Egypt, but long resident at Rhodes, where he presided over a school of rhetoric. He afterwards became keeper of the celebrated library of Alexandria, B. C. 149, in which situation he remained until his death. The only one of his works now extant is the poem entitled "Argonautica," which is a narrative founded on the legends relating to the Argonautic expedition.

APOLLONIUS, of Tyana, a Pythagorean philosopher, was born about the commencement of the Christian era. He applied himself to the study of philosophy, and adopted the system of Pythagoras; travelled in the East beyond the limits of the empire; professed himself to be endowed with miraculous powers, and was by some set up as a rival to the founder of the Christian religion. His ascetic life, his reputed miracles and prophecies, and his wise discourses, attracted great numbers, and statues and temples were built to him. Died probably at Ephesus about A. D. 97. The life of this sage was written by Philostratus.

APPIANUS, an ancient historian, born at Alexandria, whence he went to Rome, in the reign of Trajan, and became an eminent pleader. He wrote the history of Rome in Greek.

APPIANI, ANDREA, a celebrated Milanese painter, born about 1750. He early showed enthusiasm for art, and attained great excellence as a fresco-painter. When the French conquered Lombardy, Appiani was much courted and flattered by them, and was sent to Paris to assist at the coronation of Napoleon. He became correspondent of the Institute, first painter to Napoleon, and

member of most of the academies of Europe. His chief work is the series of frescoes painted by order of Napoleon in the royal palace of Milan. Died, 1818.

APULIUS, LUCIUS, a Platonic philosopher who lived in the 2nd century, born at Madaura, Africa. After being educated at Carthage and Athens, he undertook extensive travels, and then settled in Africa and married a rich widow. The most celebrated of his works is the romance, entitled "Metamorphoses; or, The Golden Ass," which has been translated into almost all the modern European languages. It appears to be a satire on the crimes, frauds, and follies of priests and magicians, and on the prevalent immorality of the age. Some, however, have found or fancied a moral in the tale; and have believed it was designed to uphold paganism against Christianity. The beautiful story of Psyche forms one of the most fascinating portions of this singular work.

AQUINAS, ST THOMAS, one of the greatest of the scholastic philosophers, surnamed the "Angelical Doctor," and the "Angel of the Schools," was born in 1227, either at Aquino, or the Chateau of Rocca Secca, near Monte-Cassino. After studying at the University of Naples, he entered the Dominican order in 1243, notwithstanding the most bitter opposition of his parents. He then studied under Albert the Great at Cologne, and went with him to Paris. In 1253 he pleaded successfully the cause of the monks before Pope Alexander IV., and was soon after made doctor in theology at Paris. He refused all dignities, and gave himself to preaching and teaching with all modesty. In 1272 he was called to teach at Naples, and two years later was invited to assist at the council of Lyons, but he fell sick on the way, and died in a monastery, 1274. He was canonized by John XXII. in 1323, and declared a doctor of the church by Pius V. in 1567. St Thomas Aquinas was a man of philosophical genius, of great learning, of fervent piety, and just and moderate in controversy. The great aim of his teaching was to show the accord between reason and the doctrines of Christianity. His chief work is the "Summa Theologie," one of the grandest monuments of human thought in the middle ages. One of the leading doctrines of Aquinas, and of his followers, the Thomists, is that of grace and predestination, and this was controverted by Duns Scotus, and his followers, the Scotists. The completest edition of the works of Aquinas is that of Rome, 1570, in 17 vols. folio.

ARABELLA STUART, commonly called the Lady Arabella, was the only child of Charles Stuart, earl of Lennox, the brother of Henry lord Darnley, father to James VI. of Scotland, by Elizabeth, daughter of Sir William Cavendish. This innocent victim of jealousy and state policy, while an infant, lost her father, and thus became heiress to a large estate. Several matches were projected for her at home and abroad; and her cousin, king James, was inclined to marry her to Lord Esme Stuart, and whom, before his marriage, he considered as his heir; but this union was prevented by Queen Elizabeth,

who held the Lady Arabella under restraint, and regarded her with a jealous eye. On the death of that queen, an abortive conspiracy was formed for setting up Arabella Stuart in opposition to her cousin James. In 1610 she was privately married to Mr William Seymour, grandson of the earl of Hertford; by which union she fell under the royal displeasure, was placed in confinement at Lambeth, and her husband sent to the Tower. Shortly afterwards they separately made their escape; Mr Seymour got safe to the Continent, but the Lady Arabella was overtaken, shut up in the Tower, and passed the remainder of her life in close and melancholy confinement, which finally deprived her of her reason; and she died September 27, 1615, aged 38.

ARAGO, FRANÇOIS JEAN DOMINIQUE, one of the greatest scientific geniuses of the age, was born at Estagel, in the south of France, in 1786. At an early age he was placed at a public school at Toulouse, from which he removed to the Polytechnic School of Paris. Having passed the required examination with honour, he entered upon his studies in 1804, and rapidly rose to distinction. He left the Polytechnic to join the staff of the Observatory at Paris, and shortly after this appointment he proceeded with M. Biot to Spain, there to measure an arc of the meridian. While engaged in this difficult undertaking, war broke out between France and Spain, and, under pretence that tops as signals to his associates, were intended to enlighten the march of the French troops, he was seized and put into prison; but escaping after a brief confinement, he reached the port of Algiers, and after enduring many hardships, and encountering many dangers both by sea and land, he was safely landed in France, in 1809. On reaching Paris, as a reward for his zeal he was elected, at the early age of 23, a member of the Academy of Sciences. In the place of the illustrious Lalande. He was appointed about the same time a Professor of the Ecole Polytechnique; and now commenced that eminent scientific career which he pursued with undiminished vigour to within a few days of his death. We cannot here enumerate the brilliant achievements by which Arago subsequently built up his world-wide reputation. His determination of the diameters of the planets, afterwards adopted by Laplace, the discovery of coloured polarization, and that of magnetism by rotation, which gained him the Copley medal of the Royal Society, are only specimens of his contributions to scientific literature; but the subjects in which he gained the highest distinction are Magnetic and Rotatory Polarization, Magnetism by the action of Currents, and Magnetism by Rotation; and to him we owe the invention of the Polaroscope. In 1830 he was nominated Director of the Observatory of the Bureau des Longitudes; and he succeeded Fourier, whose *éloge* he pronounced as perpetual Secretary of the Academy of Sciences. The "Annuaire des Longitudes" was under his direction; and he founded, in conjunction with Gay-Lussac, the "Recueil des Annales de Physique et de Chimie." As

a politician, often occupying a conspicuous position, Arago was earnest, simple-minded, and consistent. When a youth, he avowed his republican principles by refusing to subscribe to the constitution of the empire. After the revolution of 1830, which placed Louis Philippe on the throne, he occupied a distinguished place in the Chamber of Deputies. In 1848, on the downfall of the monarchy, he was named a member of the Provisional Government, and as Minister of War and Marine he succeeded in obtaining the adhesion of the whole of that important service to the republic; but after the social outbreak of June, 1848, which ended in the temporary dictatorship of General Cavaignac, he finished his political career. To his honour it must be stated that he was ready to renounce his hardly earned position at the Observatory rather than take the new oath to Louis Napoleon Buonaparte, after the *coup d'état* of December, 1851; and to the credit of the Government, we must add that it consented to forego the exaction. "In the History of Philosophy," says a contemporary writer, "the name of M. Arago will have enduring fame, not from the discoveries which he made, but from the aid which he gave to science in all its departments by his prompt and unflinching penetration. A member of nearly all the scientific Societies of Europe, he was the point uniting them in a common bond. In every part of the civilized world his name was regarded with reverence, and all scientific communities felt that they had lost a friend when they heard of the death of the Astronomer of France." Died, 1853.

ARAM, EUGENE, was the son of a gardener, and a native of Yorkshire, 1704. Though destitute of the advantages of early education, he made considerable progress in the mathematics; then applied to the Latin tongue; and afterwards studied Greek. In 1734 he became usher in a school at Knaresborough, where he married. In 1744 he taught Latin and writing in London; and in 1757, he assisted in the free-school at Lynn. During this period he studied history, antiquity, came proficient in the Hebrew, Arabic, and Chaldaic languages. In the following year of Daniel Clarke, a shoemaker, of Knaresborough, which took place thirteen years before, and for which he was tried at York, Aug. 3, 1769. He made a most skilful defence, but was found guilty. The next morning he confessed his crime, attributing it to his suspicion of Clarke's having a criminal intercourse with his wife. Having ineffectually endeavoured to commit suicide in the night, he was conveyed in a state of stupor to the gallows, and afterwards hung in chains in Knaresborough Forest. The singular discovery of Clarke's mysterious murder, and its commission by a man of Aram's otherwise irreproachable character, learned acquirements, and scholastic habits, together with his remarkable defence, excited a high degree of interest, and the melancholy tale has served as a basis for the enchanting fictions of a novelist and the exquisite pathos of a poet.

ARATUS, Greek poet and astronomer, born in Cilicia, about 300 B.C. He is known as the author of two elegant poems on astronomical subjects, entitled "Phænomena" and "Diosemia," which became very popular, and were the subjects of many commentaries and translations. The former was translated by Cleero into Latin; and St Paul is supposed to quote a passage from it in his preaching at Athens.

ARATUS, of Sicily, general of the Achæan League, was born B.C. 271. He was brought up at Argos, and first distinguished himself by the surprise of his native city in 251, and its deliverance from the tyranny of Nicocles. The union of Sicily with the Achæan League followed. The return of numerous exiles occasioned some serious difficulties, in the settlement of which Aratus acted a wise and useful part. In 245 he first became General of the League, and soon after he made himself master of Corinth and expelled the Macedonians. Several other cities then joined the League. War with the Ætolians and with the Spartans, under Cleomenes, occupied him next, and Aratus sought the aid of Antigonus, king of Macedonia, who defeated Cleomenes at Sellasia, in 222. Disputes arose between Aratus and Philip, the successor of Antigonus, and Aratus was poisoned by order of Philip, B.C. 213. He was buried at Sicily, and a religious festival was annually celebrated in his honour.

ARAUJO D'AZEVEDO, ANTONIO, Count of Barca, a Portuguese statesman, was born in 1752. After receiving a good education at Oporto and Coimbra, he was introduced at court, and was sent ambassador to the Hague, in 1789. On his way he visited London and Paris, and became acquainted with many eminent men in both capitals. In 1797 he negotiated a treaty of peace between France and Portugal, which, however, was cancelled by the Directory, and Araujo was for a short time imprisoned in the Temple. He afterwards visited Germany, and became minister of Portugal at St Petersburg. In 1803 he was recalled, and became secretary of state, and soon after minister of foreign affairs and of war. His incapacity for such offices soon appeared; for although he adopted many wise measures for the internal improvement of his country, he appeared totally blind to the projects of Napoleon with respect to the Peninsula. Great indignation was excited against him, and he accompanied the royal family to Brazil, where he retained the favour of the prince, and rendered important services to commerce and manufactures. Died, 1817.

ARBOGAST, LOUIS FR. ANT., a French geometrician, professor of mathematics at Strasburg, associate of the Institute, deputy to the National Convention, and member of many learned societies. Died, 1803.

ARBOGASTES, a Gaul by birth, and a soldier of fortune, who raised himself by his merit to the title of count, under the emperor Gratian, after whose death he entered into the service of Valentinian the Younger and Theodosius: by the latter of whom he was sent into Gaul to oppose Victor, son of Maximus, whom he defeated and killed. Arbogastes then ingratiated himself with

the army, who raised him to the post of general, without consulting the court; but, after the departure of Theodosius Jr. Constantinople, he filled every post with his creatures, and reduced Valentinian to dependence upon his will. The young emperor was shortly afterwards found dead; and Arbogastes, not choosing to assume the purple himself, set up the rhetorician Eugenius, whom he had raised to the rank of master of the offices. Theodosius immediately prepared for war against the usurper, whom he totally defeated. Arbogastes escaped to the mountains, where he wandered for some time, and at length put an end to his life, about 395.

ARBORIO DE GATTINARA. [GATTINARA.]

ARBUTHNOT, ALEXANDER, Scottish jurist, was born in 1538, and died in 1583. He became Principal of King's College, Aberdeen, edited Buchanan's History of Scotland, and was a strenuous champion of the Reformation.

ARBUTHNOT, JOHN, physician and miscellaneous writer, was born in Scotland, in 1675. After obtaining his degree at Aberdeen he settled in London, and in 1709 was named physician to Queen Anne, an office which he held till her death. He was noted as a wit, and was the associate of Pope and Swift. He contributed to the "Memoirs of Martinus Scriberus," wrote a witty political pamphlet, entitled "The History of John Bull," several medical works, and a useful account of Ancient Measures, Weights, and Coins, and died in 1735.

ARC, JOAN OF. [JOAN OF ARC.]

ARCESILAUS, a Greek philosopher, the founder of the second or middle academy, was born at Pitane, in Zolia. He became head of the academy at Athens, about B.C. 241. He maintained that truth is unattainable by man, and rejected as false and delusive the testimony of the senses.

ARCHELAUS, king of Macedonia, natural son of Perdiccas II., whom he succeeded, after murdering his brother Alcetas. He liberally encouraged literature and the arts, and entertained and patronized Euripides and Zeuxis. He died about B.C. 398.

ARCHELAUS, a Greek philosopher, was the disciple and successor of Anaxagoras at Lampsacus, but removed afterwards to Athens, where he is said by some to have had Socrates for a pupil.

ARCHENHOLZ, JOHANN WILHELM VON, a very voluminous German author; born, 1743; died, 1812. His two most important works are "Annals of British History," 20 vols., and a "History of the Seven Years' War."

ARCHILOCHUS, a celebrated lyric poet of Greece, was born in the island of Paros, and though the son of a slave, was descended from a noble family. He chiefly distinguished himself by the vehemence of his satire, and is said to have been the inventor of Iambic verse. He settled with a colony in Thasos, where he disgraced himself by running a way in a battle with the Thracians, and justified it. He flourished about B.C. 710—670. Fragments only of his poems remain.

ARCHIMEDES, the most celebrated ma-
thematician among the ancients, was a
native of Syracuse, and related to king Hieron.
He was equally skilled in the sciences of as-
tronomy, geometry, mechanics, hydrostatics,
and optics; his aptness in solving problems
had become proverbial in Cicero's days, and
his singular ingenuity in the invention and
construction of warlike engines, is much
dwelt upon by Livy. The combination of
pulleys for raising immense weights, the
endless screw, a sphere to represent the mo-
tions of the heavenly bodies, &c., were in-
vented by him; but his genius for invention
was never more signally displayed than in
the defence of Syracuse, when it was be-
sieged by Marcellus; although the wonder-
ful and well-known story that among other
astonishing novelties, he produced a burning
glass, composed of reflecting mirrors, by
which he fired the enemy's fleet, is most
likely a fiction of later times: no mention of
such a circumstance occurring earlier than
the twelfth century. At length, however,
the city was taken by storm, and Archim-
edes, then in his 74th year, was among the
slain, B.C. 212. The neglected burial-place
of this great mathematician was discovered
by Cicero. Of the numerous works of Ar-
chimedes nine have come down to us. They
have been translated into French and Eng-
lish.

ARCHYTAS, a Pythagorean philosopher
and mathematician of Tarentum, flourished
about 400 B.C. He was one of the first who
applied the theory of mathematics to prac-
tical purposes.

ARCO, NICHOLAS, a Latin poet,
born at Arco, in the Tyrol, 1479; died, 1546.

ARCON, IRAN CLAUDE ELONORE LE-
NICEAUD D', a French officer, born at Pont-
ler, 1733; died, 1800. He distinguished
himself at the siege of Cassel, became general
division, Inspector of fortifications, member
of the Institute, and sea-ator; and was
the inventor of the famous floating batteries
used at the siege of Gibraltar in 1782.

ARENDT, MARTIN FREDERIC, a ce-
lebrated traveller, whose object was the cul-
tivation of science, was born at Altona, in
1693. He commenced his travels in 1798,
visiting the northern parts of Europe, and
making researches into the antiquities of
the countries through which he passed. He
afterwards travelled through Spain, Italy,
and Hungary; and it was his practice to
carry all his papers with him, live on the
authority of others, and sleep in the open air,
1824.

ARISTEUS, a Greek physician in the
reign of Vespasian; his works are held in
great esteem.

ARJEN, JOHANN CHRISTOPH FRIED-
RICH, Baron von, born in 1773; a laborious
man bibliographer, curator of the Royal
library at Munich, and member of the most
distinguished German academies. Among his
works are, a "History of the Jews of Bava-
ria," "On the most ancient monuments of
Germany," and treatises on mnemonics,
&c. He edited the "Aurora," the divining
rod, &c. He published the "Nouvel Indicateur Lit-
téraire," at Tübingen, in 1808. Died, 1824.

ARETINO, GUIDO, or GUIDO D'AREZZO,
was born about 995. He was brought up in
a monastery of the Benedictine order, where
he applied himself to the study of music, and
being dissatisfied with the system of notation
then in use devised a new one. He had the
honour of explaining his invention to the
Pope, John XIX. He introduced the use of
the lines and spaces, and of the syllables ut,
re, mi, sol, &c., and left several works on his
art.

ARETINO, LEONARDO, or LEONARDO
BRUNI, an Italian historian, born at Arezzo,
1370; died, 1443. He was secretary to several
popes, was present at the Council of Con-
stance, and afterwards became chancellor to
the republic of Florence. He was a prolific
writer, but many of his works were mere
compilations and are forgotten. He made
translations from many Greek authors, wrote
Lives of the poets Dante and Petrarca, and
a History of Florence. The last is his most
important work.

ARETINO, an Italian satirical writer of
great celebrity, was born at Arezzo, in Tus-
cany, in 1492; and who, though occasionally
as just as he was severe, was a thoroughly
profligate and selfish man, an unprincipled
and obscene writer, and one of the most
reckless libellers that ever lived. He ob-
tained a high reputation, was patronized by
sovereigns, and enjoyed the friendship of
artists and poets, Michael Angelo, Titian,
and Tasso. He even wrote several religious
treatises, and a Paraphrase of seven Psalms.
His bitter satire on the scandalous lives of
the nuns, married women, and mistresses of
the cardinals, &c. was everywhere read with
disgusting avidity. A multitude of satires
on all the European sovereigns, earned him
the title of "Scourge of Princes." By some
he was bribed to silence; by others, punished.
At Venice, where he lived from 1527 till the
time of his death, he once received a sound
beating at the hands of the English am-
bassador, whom he had offended by a false
charge. He died in 1557.

ARGAND, AIME, the inventor of the Ar-
gand lamp, was born at Geneva. His first
lamp was however made in England, in 1782.
He was involved in several irritating con-
tests to maintain his claim as inventor,
against two Frenchmen, each of whom made
some modification of form in the lamp. Died
in England, 1803.

ARGELLATI, FILIPPO, a very learned
Italian printer, born at Bologna in 1685.
From Bologna he removed to Milan, to su-
perintend the printing of Muratori's great
collection entitled "Scriptores Italicarum
Rerum," in the preparation and editing of
which he took a large and important part.
The work was published under the auspices
of the Emperor Charles VI., who granted
Argellati a pension, and made him one of his
secretaries. Many other valuable works is-
sued from his press. Died at Milan, 1755.

ARGELLATI, FRANCISCO, son of the
above, a distinguished litterateur and author
of a work entitled "Decamerone," written
in imitation of Boccaccio. Died in 1754.

ARGENS, JEAN BAPTISTE DE BOYER,
Marquis of, French miscellaneous writer,
born, at Aix, in 1704. He at first chose the

profession of arms, and was wounded at the sieges of Kehl and Philippsburg, but afterwards turned his attention to literary pursuits; went to Holland, and while there wrote his voluminous "Lettres Juives," "Lettres Chinoises," and "Lettres Caballistiques." He was invited by Frederic II. the Great, king of Prussia, to his court, and made one of his chamberlains, and director of the Academy. Died, 1771.

ARGYROXYLUS, JOHN, one of the learned men who, in the 15th century, under the patronage of the Medici, contributed to the revival of Greek learning. In addition to his exertions as a teacher and lecturer, he published translations from Aristotle, and a commentary on the Ethics of that philosopher.

ARIALDUS, ST. deacon of Milan, who, in 1056, took a leading part in the agitations which arose there respecting the licentious lives of the clergy and the obligation of celibacy. He was excommunicated with his associate Landulfus by a provincial synod, but the pope annulled the sentence and encouraged them to persevere. Embassies and letters were sent by Stephen X., Nicholas II., and Alexander II. to Milan, and serious tumults occurred on several occasions. At length Arialdus procured a bull of excommunication against the archbishop of Milan, who roused the popular indignation by announcing it in the cathedral, and laid an interdict on the diocese. Arialdus fled, but was arrested and murdered on a lonely island of the Lago Maggiore, in June, 1066.

ARIAS MONTANUS. [MONTANUS.]
ARION, an early Greek poet and musician, who flourished in the 7th century B. C. He was a native of Lesbos, lived long at the court of Periander at Corinth, and invented, it is said, the dithyrambic verse. It is of Arion that the graceful story is told of an escape from murder by sailors, by charming the dolphins with his music and riding over the waves on the back of one which bore him safe home.

ARIOSTI, ATTILIO, an Italian musical composer, was born at Bologna about 1660. In 1699 he went to Berlin, where he met Handel, whose friend and rival he became. He visited England in 1716, and again four years later, when he was employed with Handel and Bononcini, at the Italian Opera. He left England in 1728, and nothing further is known of him.

ARIOSTO, LUDOVICO, one of the greatest poets of Italy, was born in 1474, at Reggio, near Modena, of which town his father was governor. He was set to study law, but abandoned it in disgust and gave himself up to literature. After a short residence at Rome, where he composed some comedies, he settled at Ferrara, and entered the service of Cardinal Ippolito of Este, who employed him in political negotiations. It was amidst the constant pressure of official duties that he wrote his great epic, the "Orlando Furioso," which occupied his leisure for eleven years, and was published in 1516. The poet was charged, in 1522, with the suppression of brigandage in some mountain districts, and succeeded well. His next task was the direction of a theatre at Ferrara.

Died, 1533. The "Orlando," which celebrates the semi-mythical achievements of the Paladins of Charlemagne, in the wars between the Christians and the Moors, became immediately popular, and has since been translated into all European languages, and passed through innumerable editions. There are several English versions, of which Mr Rose's is most esteemed for fidelity and elegance. Ariosto wrote also some vigorous satires, several comedies, and other poems.

ARISTARCHUS, Greek critic and grammarian, was a native of Samothrace, and flourished about a century and a half B. C. Having settled at Alexandria, he was made tutor to the son of Ptolemy Philometor. He succeeded his master, Aristophanes of Byzantium, as head of the grammatical school of Alexandria. The chief labour of his life was his revision of the text of the Iliad and the Odyssey. He divided these poems into separate books, and wrote commentaries on them. His critical judgments were very severe, and his principles of criticism were stoutly opposed by many eminent men. He died at Cyprus in his 72nd year; and, as some assert, by voluntary starvation.

ARISTARCHUS, the Samian, a Greek astronomer, who flourished about 280 B. C. He is said to be the first who knew of the earth's motion on its own axis; and a work of his, of which an edition in Greek and Latin was published by Dr Wallis, in 1688 treats of the magnitudes and distances of the sun and moon.

ARISTEAS, a Jew, in the employment of Ptolemy Philadelphus. He is said to have assisted in the Septuagint translation of the Bible; and a history of it is attributed to him, but on no satisfactory grounds.

ARISTIDES, an Athenian patriot, whose unbending integrity procured him the name of "The Just." He was a great admirer of the laws of Lycurgus, and opposed to the democratic party headed by Themistocles. At the battle of Marathon he was next in command to Miltiades, and bore himself with great intrepidity. This caused him to be made archon in the following year; but his rigid integrity in this office led to so strong an opposition by the popular party, that he was ostracised. He was recalled from banishment to oppose the Persians under Xerxes, and, both at Salamis and Platæa, exerted himself to the utmost to serve and save his country. A still higher proof was given of his love of justice by his efforts, though ineffectual, to save his rival, Themistocles, from banishment; and by the fact, that though he had borne all the highest offices of the state, he was very poor at his death, which took place in 467 B. C.

ARISTIDES, ÆLIUS, a native of Adrian, in Mysia; an orator of great ability during the reigns of Antoninus, Aurelius, and Commodus. An edition of his works was published in two 4to volumes, Oxford, 1722.

ARISTIDES, a Christian philosopher, of Athens, in the 2nd century. Jerome praises his "Apology for the Christ. Faith," which was presented to the Emperor Hadrian in the year 125; but none of his writings are known to be extant.

ARISTIDES, a painter of Thebes in the 4th century B. C., famous for his power of representing the passions.

ARISTIPPUS, founder of the Cyrenaic school of philosophers, was born at Cyrene about four centuries B. C. He became a pupil of Socrates, but his mode of life was luxurious and effeminate, and opposing both the theory and example of his master, he made pleasure the chief good. At Corinth he was the companion of the courtesan Lais; and, at Syracuse, he was favoured by the tyrant, Dionysius, to whom, in common with many other philosophers, he paid his court. It does not, however, appear that he became mere slave to his passions. He established a school of philosophy at Cyrene, which con- tinued for about a century, when it was merged in or superseded by the school of Epicurus.

ARISTOGITON, an Athenian, the friend of Harmodius, with whom he conspired, B. C. 494, against the tyrants Hippias and Hipparchus. This conspiracy, prompted by the ambition of revenge for a personal offence, was only partly successful, Hipparchus being slain, and Harmodius immediately killed by the soldiers. Aristogiton was afterwards captured, tortured, and put to death by Hippias. After the expulsion of the latter the people, by a change of feeling and perversion of feeling, made the murderers into martyrs of liberty, made songs and set up statues to their honour, and conferred political privileges on their descendants.

ARISTOMENES, the Messenian legendary hero, a descendant of the royal family of Messenia, who roused his countrymen, in conjunction with the Arcadians and Argives, to commence the second Messenian war, B. C. 724, in order to shake off the yoke of Sparta. He defeated after several years' brave fighting retired to Ira, and there held his ground 11 years. At last he was taken by the Spartans, but miraculously escaped, and died the island of Rhodes.

ARISTON, of Chios, a stoic philosopher, B. C. 260, who held logic to be useless, the science of nature unattainable, and morals the only study worthy the pursuit of the human mind.

ARISTON, an Aristotelean philosopher, of Chios, B. C. 230.

ARISTOPHANES, the Greek comic poet, born at Athens about B. C. 450. Nothing is known of his life except that he went to a colony to Ægina, and had estates there. He was the contemporary of Socrates, Demosthenes, and Euripides. He is said to have written 64 plays, but of these only eleven have come down to us. With utmost boldness and licence he directed his terrible satire not only against the chief political and social evils of the time—especially the warlike propensities of the people, the fondness for lawsuits, and the teaching of the sophists—but against the leading men of the day, especially Cleon the popular favorite, and the philosopher Socrates, whom he boozed to ridicule as one of the sophists. His works, therefore, present a vivid, if exaggerated, picture of Athenian life and manners. For purity and elegance of style

he is unsurpassed. The titles of his works are "The Acharnians;" "The Knights" (against Cleon, and the most angry and bitter of his works); "The Clouds" (against Socrates); "The Wasps;" "The Birds;" "The Frogs" (literary criticism); "Plutus;" &c.

ARISTOTLE, the great founder of the peripatetic school of philosophers, was born at Stagira, in Macedonia, B. C. 384. At the age of 17, he became a pupil of Plato, who called him the "mind" of his school. The fame of his abilities having reached Philip of Macedonia, that prince made him tutor to his son, Alexander the Great; and he so carefully attended the young prince, that Philip rebuilt the town of Stagira, which he had razed, and restored the expelled inhabitants to their town and privileges. When Alexander set out on his expedition to Asia, Aristotle returned to Athens, and obtained leave to occupy the Lyceum as a school of philosophy, over which he presided for 13 years, and which was called, probably from his habit of walking as he lectured, the *peripatetic*. Suspected of political sympathy with Macedonia, he was accused of impiety, and retired to Chalcis, remarking, in allusion to the death of Socrates, that he did not wish to see the Athenians a second time guilty of crime against philosophy. He remained at Chalcis till his death, in the 63rd year of his age, B. C. 322. Small and slender in person, and latterly of feeble health, Aristotle accomplished in his day the task of a giant. His genius embraced all the sciences of his time, and invented new ones. His extant works include treatises on physics, metaphysics, logic (of which he justly claims to be the inventor), rhetoric, politics, ethics, and the natural history of animals. The last-named is one of his most valuable works. His great pupil, Alexander, aided him in his researches by supplying him with funds, and by having collections of foreign animals made and sent to him for study. The philosophy of Aristotle attained immense influence, and was supreme in Europe during the middle ages. His word was another Bible, and to question his authority was heresy. After the revival of literature, and the Reformation, the magic of his name was lost. And now, after that natural reaction and a period of neglect, he is again studied and praised as one of the greatest intellects that has appeared in the world.

ARISTOXENUS, philosopher and musician, pupil of Aristotle. His works are said to have been very numerous, but none have come down to us except his *Harmonice Elementa*, which is considered to be the oldest musical treatise existing.

ARIUS, the celebrated theologian, was a presbyter of Alexandria in the 4th century. Having maintained that the Son and the Father were essentially distinct, and that the Son was created out of nothing by the will of the Father, Alexander, the bishop, in opposition to whose preaching he taught this doctrine, assembled a synod in 321, in which the doctrine was condemned, and Arius, and those who sided with him, excommunicated. Arius then travelled in Asia, and went on preaching. Eusebius, bishop of Nicomedia, was friendly to him,

and convoked a synod in his favour. But in 325 the great council of Nice was held, at which the Emperor Constantine was present, and the great Athanasius took a prominent part. Arius and his doctrine was again condemned, and it was made a capital crime to possess his works. He was, after three years' recalled from banishment by Constantine, presented several confessions of faith, apparently in accordance with the Nicene creed, but Athanasius, now bishop of Alexandria, persisted in refusing him readmission to the church. In 336, however, he was just about to be received again into the pale of the church, when he died suddenly. His friends said that he was poisoned, his enemies, that it was the judgment of God. The controversies growing out of the teaching of Arius, though touching a matter lying wholly beyond the limits of human reason, agitated the church for a century. Arius wrote a book entitled "Thalia," and a collection of songs, by which he hoped to spread his views among the common people, but only a few fragments of his writings now remain.

ARKWRIGHT, SIR RICHARD, the inventor of machinery by which our cotton manufactures have been increased to an almost incredible extent, was born at Preston, Lancashire, in 1732; and his first employment was that of a barber. Notwithstanding the obstacles thrown in his way at first by poverty, and want of mechanical skill to reduce his inventions to practice, and afterwards by the unprincipled invasion of his rights by rival manufacturers, he realized a very large fortune; and his machines, but little improved upon, have been the means of almost innumerable fortunes made by others. Mr Arkwright was not knighted, as many suppose, on account of his inventions, but on the occasion of presenting an address as high sheriff of the county of Derby, congratulating George III. on the failure of the attempt made on his life by Margaret Nicholson. Died, 1792.

ARLAUD, JACQUES ANTOINE, miniature painter, a native of Geneva. After distinguishing himself at Paris, where he taught the duke of Orleans, he came to London, made a fortune by his art, gained the friendship of Sir Isaac Newton, and returned in 1729 to Geneva, where he died. His last work was the "Leda," which he copied from a sculpture of Michael Angelo, and afterwards destroyed by cutting it to pieces. A copy of it was sold in the artist's lifetime for 600 guineas. Born, 1668; died, 1743.

ARMFELDT, GUSTAVUS MAURICE, Count, a Swedish statesman of some note. He held several important offices in Russia. Died, 1814.

ARMINIUS, or HERMANN, who by his intrepidity and success acquired the title of "the Deliverer of Germany," was the son of Sigimer, a chief of the Cherusci. Having been sent to Rome as a hostage, he was there educated, served in the Roman army, and for his valour was raised to citizenship, and admitted to the class of equites. But his attachment to his native country induced him to revolt, and he became one of the most powerful leaders of the discontented German tribes.

He drew Varus, the Roman commander on the Rhine, into t. at ambuscade in which he and nearly all his troops were slain, and for some time baffled Germanicus; but he was twice defeated, and his wife was captured by the Romans. After having for years withstood the vast power of Rome, Arminius was assassinated by one of his own countrymen, in the 37th year of his age, A.D. 19.

ARMINIUS, or HARMENSEN, JACOB, theologian, from whom the sect of the Arminians took its name, was born in Holland in 1580. He was sent at the age of 15 to Leyden, and studied at the university six years, after which he went to Geneva, where Beza then taught theology. After visiting Basel and Rome he became pastor at Amsterdam in 1588. A change soon began to take place in his theological opinions, suspicions of his unsoundness arose, and at length, after being named Professor of Theology at Leyden, he propounded the doctrines distinctive of his sect, and was involved in harassing controversies, especially with his fellow-professor Gomar. He was supported by several eminent men, but his health failed, and he died in 1609. The system of Arminius was a protest against the rigid Calvinistic doctrine of grace and predestination.

ARMSTRONG, JOHN, poet and physician, was born at Castleton, in Roxburghshire, in 1709. In 1760 he was appointed physician to the army in Germany; in 1771 he made the tour of Italy, with Fuseli the painter; and died in 1779. His chief work is the poem on "The Art of Preserving Health," which was once very popular. His medical works and short poems had but limited success even in his own time. He lived on terms of intimacy with the wits and poets of the day, and contributed to Thomson's Castle of Indolence the stanzas descriptive of the diseases resulting from indolence.

ARMSTRONG, JOHN, physician and medical writer, celebrated for his researches concerning the causes and phenomena of febrile diseases, was born at Bishopwearmouth, Durham, in 1784. He took his degree of M.D. at Edinburgh, in 1807, and was chosen physician to the Sutherland Dispensary in 1811; but finding that his professional works had made him a name in the metropolis, he resigned his situation in 1818, and commenced practice in London. In 1821 he engaged with Mr E. Grainger in the formation of a medical school in Webb Street, Borough; where he delivered lectures on the practice of physic. In 1826 he joined Dr Boott and Mr E. Bennett in establishing a new school of medicine in Dean Street, Soho, but shortly after relinquished his connection with it. He died in 1829, of phthisis pulmonalis. Few men were ever more anxiously devoted to the duties of their profession than Dr Armstrong, and few have been so successful in their elucidation of medical science. His works are numerous, and highly valuable.

A New Universal Biography.

try the scattered survivors of the Vaudois, who had been driven away by the persecutions of the duke of Savoy. The enterprise was undertaken in 1689, and notwithstanding the co-operation of a large French force with the army of the duke, was conducted to a successful termination, after nearly a year's struggle. At the last moment a breach occurred between France and Savoy. Eighteen battles were fought, yet with incredibly small loss to the Vaudois. Arnaud distinguished himself in this daring enterprise not less by his earnest piety than by heroic courage and great practical sagacity. He afterwards did good service under Marlborough in the war of the Succession. When the Vaudois were again exiled he accompanied them, and discharged the duties of pastor at Schönberg till his death. He wrote a narrative of his great enterprise. Died, 1721.

ARNAULD, ANTOINE, a French theologian, was born at Paris in 1612. Doctor of the Sorbonne in 1641, he early distinguished himself as an opponent of the Jesuits and a supporter of Jansenius. He was expelled from the Sorbonne and retired to Port-Royal, his sister Angélique being then abbess. He sought his retreat in 1668 and was presented to Louis XIV.; but his renewed attacks on the Jesuits brought fresh persecution on him, and he was exiled. He settled at Brussels. He kept up his controversial warfare to the end. He was distinguished for his piety, his life, and the purity and simplicity of his writings, and enjoyed the friendship of Pascal, Molière, Malebranche, &c. Among his numerous works, filling at first 100 volumes, are "De la Perpétuité de la Foi," "Morale des Jésuites," "Traité des vraies et fausses Idées," and several of the most Royal educational treatises. Died at Brussels, 1694.

ARNAULD, ANGÉLIQUE, or ANGÉLIQUE ST JEAN, abbess of Port-Royal, was born 1621. She was educated at Port-Royal, and became one of the nuns at the age of twenty. She was one of the chosen victims of the long persecution carried on under the auspices of the Jesuits against the Port-Royalists. In 1669 she was appointed prioress, and nine years later abbess, an office which she held till her death. She was the author of "Mémoires pour servir à l'histoire de Port-Royal," and other works. Died,

ARNDT, ERNST MORITZ, a distinguished German patriot, poet, and miscellaneous writer, was born in 1769. He was a native of Rugen, was educated at Greifswald and Jena, and was one of the first to urge his countrymen to shake off the yoke of Napoleon. His patriotic songs and many pamphlets appeared in rapid succession, and contributed powerfully to the liberation of Germany. In 1818 he became professor of Modern History at Bonn, but was prohibited from lecturing, and was restored to his post in 1840. He assisted in the meeting of the National Assembly at Erfurt in 1848. Among his numerous works are the "Geist der Zeit," which appeared in 1807, a History of Scotland, History of Sweden under Gustavus III. and IV., "Mädchen und Jugenderinnerungen," and

"Erinnerungen aus dem Kuszern Lebon." One of his best-known songs is, "Was ist des Deutschen Vaterland?" Died, 1860.

ARNDT, or ARND, JOHANN, a German theologian, born in the duchy of Anhalt, 1555. He was pastor at Quedlinburg, Brunswick, and finally at Zell, and superintendent of the churches of the duchy of Lüneburg. He made himself known by a work "On True Christianity," a protest against provalling laxity in morals, which was translated into Latin, French, and most modern languages. Died, 1621.

ARNE, Dr THOMAS AUGUSTINE, a celebrated musical composer. At the early age of 18, he produced an opera entitled "Rosamond," and shortly afterwards composed the music for a masque, entitled "Alfred," written by Thompson and Maliet. On the masque of Comus being adapted to the stage, Arne's music for it obtained him a high reputation. The most celebrated of his compositions is the opera of "Artaxerxes." He wrote some exquisite songs and glees, and the world-famous chorus "Rule Britannia." His sister was the celebrated Mrs Cibber. Born, 1710; died, 1778.

ARNIM, LUDWIG ACHIN VON, German poet and novelist, was born at Berlin, studied at Göttingen, and passed his life in literary leisure and independence at Heidelberg, Berlin, and his country seat. His chief works are "Ariel's Offenbarungen," "Der Knabe Wunderhorn," "Der Wintergarten," "Gräfin Dolores," "Die Kronen-Wächter," "Die Gleichen." Died, 1831. His wife, Bettina Brentano, still more celebrated than himself, is the subject of the following notice.

ARNIM, BETTINA (ELIZABETH) VON, a celebrated German litterateur, was born at Frankfurt on the Main, in 1785. She was the sister of the poet Clemens Brentano, and from her earliest years displayed a singular fervour of poetic feeling and eccentricity of imagination. The suicide of her earliest friend, in consequence of a love-cross, affected her very painfully. She read the works of Goethe with infinite delight, and fell in love with the poet, then sixty years of age. She told her love to his mother, and began a correspondence with him in 1807. Part of this appeared subsequently under the title of "Goethe's Briefwechsel mit einem Kinde," and was translated into English by Bettina. She married the poet and novelist Ludwig von Arnim, and was left a widow in 1831. Her correspondence with her early friend, Madame von Gunderode, appeared in 1840. Her other works are, "Dies Buch gehört dem Könige," and "Ilius Panphilius und die Ambrosia." Bettina died in January, 1859.

ARNOBIUS, an African rhetorician at Sicea, in the 3rd century. He embraced the Christian religion, and published a defence of it, under the title of "Disputations against the Heathen," which has been frequently reprinted.

ARNOLD D'AMAURI, Abbot of Cîteaux, was appointed, in 1203, one of the legates of Pope Innocent III., with Peter of Castelnau and Raoul, for the conversion of the Waldenses and other "heretics" of Languedoc. He distinguished himself in his mission by

his pride, bigotry, and implacable cruelty: travelled at first in the utmost pomp, till admonished by (St) Dominic: and after the murder of Peter of Castelnau had the highest confidence of the pope. When the crusade was begun, Arnold was captain-general of the army, and his cry was "Slay all, God will know his own." He was the main instrument of carrying out the pope's policy of deceiving the count of Toulouse by feigned reconciliation, and so leading him on more surely to ruin. In 1211 he was rewarded with the archbishopric of Narbonne, and four years later took a leading part in the Fourth Lateran Council, which deposed Count Raymond and awarded his dominions to Simon de Montfort.

ARNOLD of Bresela, an Italian monk of the twelfth century, who attracted the confidence of the people and the bitter hatred of the priesthood by his earnest preaching against the temporal power and possessions and the corruptions of the church. After an exile from Italy, during which he preached in France and Switzerland, he took the lead in a revolt of the Roman people, and for ten years held his ground as master of the city. At last, terrified by the interdict laid on Rome by Adrian IV., the people banished their chosen elifer, and shortly after, 1155, they saw him burnt and his ashes thrown into the Tiber. Arnold had been a disciple of the famous Abelard, looked, however, at the practical rather than the intellectual side of things, and was fiercely opposed, as Abelard had been, by St Bernard, to whose power he fell a victim. He was one of the most distinguished early martyrs of political and religious freedom.

ARNOLD, BENEDICT, an American general, who during the early part of his career devoted his best energies to promote the cause he had espoused, and who afterwards disgraced himself by treacherously betraying it, was bred a surgeon; but on the commencement of hostilities between Great Britain and the colonies, he entered into the service of the latter, and was chosen captain of a company of volunteers at Newhaven. He soon rose to the rank of colonel, and commanded an expedition to Canada. He afterwards distinguished himself by his bravery, when commanding a flotilla on Lake Champlain, and on other occasions, and was promoted to the rank of general. He subsequently entered into negotiations with General Clinton, to whom he proposed to surrender a post of great consequence, with which Washington had entrusted him. But the capture of the officer [see ANDRÉ] sent by General Clinton, caused the plot to be discovered, and Arnold hastily escaped to the royalist quarters. He was employed under General Clinton against his former comrades, and had the rank of brigadier-general, when he retired to England, where he died, in 1801.

ARNOLD, CHRISTOPHER, a German peasant, whose energy and natural genius enabled him to become one of the most accomplished astronomers of his age. Born, 1646; died, 1697.

ARNOLD, JOHN, watchmaker, was born at Bodmin, in 1742. He made great im-

provements in the construction of chronometers, and was assisted in his labours by grants from the Board of Longitude. The detached escapement and the compensation-balance are among the improvements he introduced. Died, 1799.

ARNOLD, SAMUEL, musical composer, was born in 1740. He studied under Dr Nares, became doctor in music, Oxford, organist to the king, and in 1793 organist of Westminster Abbey. He wrote several oratorios, operas, songs, &c., edited the works of Handel, and published a collection of sacred music. Among his works are "The Prodigal Son," an oratorio, and "The Maid of the Mill," an opera. Died, 1802.

ARNOLD, THOMAS, head-master of Rugby School, and Professor of Modern History in the university of Oxford, was born in 1785. He was a native of Cowes, in the Isle of Wight, and was educated at Winchester and Oxford. He was early distinguished by that earnestness of conviction and intellectual courage which characterized him through life. He became fellow of Oriel in 1815, was ordained priest in 1828, and the same year settled at Rugby. For some years previously he had lived at Laleham, in Middlesex, where his time was devoted to the training of pupils for the universities and to literary labours. By his force of moral character and his singular faculty of governing, he effected an immense reform in Rugby School. The political and religious movements of his day engaged his warmest interest. He sought zealously to promote the social improvement of the working classes, opposed the Tractarian movement, and took a leading part in the discussions to which the foundation of London University gave rise. In 1841 he was named Regius Professor of Modern History, Oxford, but only lived to deliver one course of lectures. He left a "History of Rome," a noble work, but unfinished, an edition of Thucydides with notes and dissertations, several volumes of sermons, and a collection of Miscellaneous Works. Died, 1842.

ARNOLFO DI CAMBIO, a celebrated Italian sculptor and architect, formerly called ARNOLFO DI LAPO, and erroneously supposed to be the son of the architect Lapo, was born in 1232. He became a pupil of Nicola Pisano, and worked under him at Sienna in 1267. Ten years later he was architect to Charles of Anjou, at Naples. But his greatest works are at Florence, where, about 1295, he commenced building the church of Santa Croce and the Duomo, or cathedral, called Santa Maria del Fiore. During the progress of these churches he undertook also the erection of the Palazzo Vecchio. The church of Or San Michele was built by Arnolfo for a loggia or open grain-market, and was converted into a church by Andrea Orcagna. The tomb of Cardinal de Braye, at Orvieto, is one of Arnolfo's most beautiful sculptural works. Died, 1310, without seeing any of his great buildings completed.

ARNULPH, or ERNULPHUS, bishop of Rochester in the reign of Henry I.; to whom some have assigned the authorship of the manuscript, entitled "Textus Roffensis," &c.

count of the charters, &c., of his cathedral.
but it is attributed by others to Bishop
acelin, and also to Humphrey, a proctor of
the cathedral, in the twelfth century.
Died, 1124.

ARRIA, a Roman lady, who, when her
usband, Crecina Patus, was ordered to put
himself to death, for rebellion against the
Emperor Claudius, perceiving him hesitate,
thrust a dagger into her bosom, exclaim-
ing, "My Patus! it is not painful."

ARRIANUS, Greek historian, a native of
Carmeda, who took up his residence at
Alexandria in the 2nd century. He studied phi-
losophy under Epictetus, became a citizen
of Cappadocia by the Emperor Hadrian.
He was subsequently made consul, and
died in old age. The younger Pliny ad-
dressed to him seven of his epistles. The
most of them only remain entire, viz. seven
on the expedition of Alexander, a work
highly esteemed for its accuracy, impartial-
and elegant style; and a book on the
geography of India; the latter being a sequel to
the former. He published the discourses of
the master Epictetus, and also a sketch of
philosophy, entitled a "Manual of Epicte-
tus," which became celebrated and is still
valued; a "Periplus of the Euxine," and
several other works. There are some his-
torical fragments of Arrian in Photius.

ARROWSMITH, AARON, an eminent geo-
grapher and hydrographer. His maps and
plans are very numerous, and held in high
reputation; and his tract, entitled "A Com-
pendium to the Map of the World," contains
many valuable information. Born, 1750;
Died, 1823.

ARSES I., the founder of the Parthian
dynasty, and of the dynasty of the *Arse-*
ids, flourished in the 3rd century B. C. In
revenge for an insult offered to his brother
who was governor of a province, he raised the
Parthians to revolt in Parthia against Seleu-
cus, and having succeeded in emancipating
his countrymen, they elected him their king.
He reigned prosperously for 33 years.

ARTAXERXES I. surnamed Longimanus,
the son of Xerxes, king of Persia. He
was his elder brother Darius on suspicion
of being guilty of the murder of his
brother. Artaxerxes then ascended the throne
in 465, and in his time peace was restored
between Persia and Athens, after a war of
several years. He died B. C. 424.

ARTAXERXES II., MNEMON, king of
Persia, succeeded his father Darius II., B. C.
405. His reign is marked by the revolt of
his younger brother, who was as-
sisted by the Ten Thousand Greeks, and was
defeated at Cunaxa in 401. Wars with the
Greeks, terminated by the Peace of Antalcid-
as with Evagoras of Cyprus, with
defeated satraps, and with Egypt, filled up
his reign. The misconduct of his son Ochus
ruined his last days. Died, B. C. 359.

ARTAXERXES III. or OCHUS, succeed-
ed his father, Artaxerxes II., B. C. 359. He
succeeded two of his brothers, and afterwards
the death all the remaining branches of
the family. In Egypt he slew the sacred
Apis, and gave the flesh to his soldiers;

for which his eunuch, Bagoas, an Egyptian,
caused him to be poisoned, and after giving
the carcass to the cats, made knife handles
of his bones. This happened B. C. 338.

ARTAXERXES BEHEGAN (in Persian
ARDSHIR), king of Persia, founder of the
dynasty of the Sassanids, was the son of
Babek and grandson of Sasan. He defeated
his predecessor, Artaban, last of the Ara-
cids, and had himself proclaimed King of
Kings, A. D. 223. He restored the old religion
of the Magi, made new laws, provided for
their good administration, and for the edu-
cation of the people, and then undertook to
extend his dominions. A war with the Ro-
mans followed, A. D. 232, Alexander Severus
leading an expedition into Persia. But after
a contest of five years peace was made with-
out gain to either side. Died, A. D. 238.

ARTEAGA, STEPHEN, a Spanish Jesuit
of the 18th century; author of a treatise on
the Beau Ideal; a history of Italian thea-
trical music, &c. Died, 1799.

ARTEDI, PETER, a Swedish naturalist,
was born in 1705. He was sent to study
theology at the University of Upsal, but
gave himself up to Medicine and Natural
History. He was the fellow-student of Lin-
naeus, whom he assisted in his "Systema
Naturae," and who named a genus of plants
after him, "Arteria." Artedi visited Eng-
land in 1734, and in the following year at-
tended, with Linnaeus, the lectures of Boer-
haave, at Leyden. He undertook to assist
Albert Seba, an old naturalist and collector
of fishes, but he was accidentally drowned in
September, 1735. Artedi's great work, the
"Ichthyologia," was edited by Linnaeus, and
published in 1738.

ARTEMISIA, queen of Halicarnassus, in
Caria, and one of the allies of Xerxes at the
famous battle of Salamis, B. C. 480.

ARTEMISIA, another queen of Halicar-
nassus, wife and successor of Mausolus, B. C.
352. She is noted for her love to him, the
extraordinary grief with which she mourned
his loss, and the magnificent monument
which she built to his memory. This monu-
ment, called the Mausoleum, was adorned
with fine Greek sculptures, portions of which
were discovered in 1837, and are now in the
British Museum. The monument is described
in a splendid work by Mr. T. C. Newton.
Died, 350 B. C.

ARTEVELDE, JACOB VAN, the celebrated
brewer of Ghent, who became governor of
Flanders, was born about 1300. On occasion
of a revolt against Count Louis, in 1338, he
was chosen chief of the insurgents. He
afterwards joined with Edward III. against
the king of France, and assisted at the siege
of Tournai, in 1340. In the truce which fol-
lowed he stipulated the independence of
Flanders, and became its governor. He ap-
plied himself to his difficult task with great
energy and sagacity, but after several years
he thought it best to erect Flanders into a
kingdom, and offered the crown to the
Prince of Wales. But he was massacred in
a popular tumult at Ghent, in 1345.

ARTEVELDE, PHILIP VAN, son of the
preceding, was chosen captain by the Ghent-
ese, on occasion of a revolt against Count

Louis II., in 1382. He defeated Louis, near Bruges, took that city, and assumed the state of a sovereign. But Louis having obtained the assistance of France, a French army entered Flanders, led by the brave Constable de Clisson, and in the decisive battle of Roosebeck the Flemings were defeated and their leader slain, 1382.

ARTIGAS, FERNANDO JOSE, born at Monto Video, in 1760; first entered the Spanish service; quitted it, and was foremost among those who fought for independence. He subsequently, however, became an object of suspicion to the government of Buenos Ayres; and, being declared a traitor, took up arms, and possessed himself for some years of the territory called the Banda Oriental; but having sustained a defeat he was compelled to seek refuge in Paraguay, where he died in 1826.

ARUNDEL, THOMAS, archbishop of Canterbury, was born in 1353. He was son of the earl of Arundel, was made bishop of Ely at the age of twenty-two, lord chancellor about ten years later, archbishop of York in 1386, and in 1396 archbishop of Canterbury. In the following year he was impeached of high treason on various grounds, and was banished. He promoted the elevation of Henry IV., and on his accession was restored to his see. He distinguished himself by his persecution of the followers of Wickliffe, prohibited the translation and reading of the Bible, and had a chief hand in procuring the statute "Do heretico comburendo." He employed his wealth magnificently in the service of the Church. Died, 1411.

ARUNDEL. See **HOWARD, THOMAS**.

ASCHAM, ROGER, who had the honour of directing the studies of Queen Elizabeth, was born in 1515 near North Allerton, in Yorkshire. At an early age he was adopted by Sir Anthony Wingfield, who educated him with his own sons, and in 1530 sent him to St John's College, Cambridge, to complete his studies. Though brought up in the doctrines of the Church of Rome, he became a Protestant; was nominated Professor of Greek and public orator at Cambridge, and after fulfilling various other offices both in the University and the Church, became attached to the court of Queen Elizabeth as Latin secretary, and tutor to her Majesty in the learned languages. He was a man of rare accomplishments. Of his writings, the most valuable is his treatise, entitled "The Schoolmaster." It is a discourse upon education, abounding in good sense and learning, full of interest, and written in a pithy and vigorous style. A new edition of this work, carefully edited and annotated by Mr Mayor of St John's College, Cambridge, was published in 1863. Ascham wrote also a treatise on Archery, entitled "Toxophilus," for which Henry VIII. gave him a pension. Died, 1568.

ASCHAM, ANTHONY, a member of the Long Parliament, who was sent by Cromwell, in 1650, as envoy to Spain, where he and his interpreter were assassinated by some royalist exiles. He was author of a "Discourse on the Revolutions and Confusions of Governments."

ASCLEPIADES, a Greek physician; one

of many bearing the same name. He was born at Prusa, in Bithynia, and settled at Rome, probably in the early part of the first century B. C. He had a great reputation and was very successful, preferring to cure by regulation of the diet and mode of life, rather than by the administration of drugs.

ASELLI, CASPARE, an Italian anatomist of the 17th century. He was Professor of Anatomy at Pavia, and first discovered the system of vessels called lacteals. Died at Milan, 1626.

ASGILL, JOHN, miscellaneous writer, was brought up to the law, was called to the bar, and went to Ireland, where he obtained a lucrative practice, and was chosen member of the Irish parliament, in 1703. He was almost immediately expelled, on account of a pamphlet, in which he maintained that man may pass into eternal life without dying. The book was burnt by the hangman. Asgill afterwards became member of the English parliament, but was on the same ground expelled, and his book was again ordered to be burnt. He spent the last 30 years of his life in prison for debt, published numerous political and other pieces, and died in 1738.

ASH, JOHN, LL.D., a dissenting divine at Pershore, in Worcestershire, remembered as the author of a Dictionary of the English Language, on a more extensive plan than any previous one, and which is still of considerable value for the large number of provincial and obsolete words contained in it. Dr Ash was author of several other useful works. Born, 1724; died, 1770.

ASHBURNHAM, JOHN, the attendant of Charles I., was born about 1603, was early introduced at court and made groom of the bedchamber. He was a member of the Long Parliament, assisted at the treaty of Uxbridge and in other negotiations, distinguishing himself by his craft and insolence, accompanied the king from Oxford to the Scots army, and assisted his escape from Hampton Court to the Isle of Wight. During the Commonwealth he was several times banished and imprisoned, and at the Restoration entered the service of Charles II. Died, 1671.

ASHBURTON, ALEXANDER BARING, Lord, the second son of Sir Francis Baring, Bart., and for many years the head of the great mercantile house, Baring Brothers and Co., was born in 1774. After due initiation into business in London, he proceeded to the United States to conduct the Transatlantic business of the house. His political life commenced in 1812, when he entered parliament, as member for Taunton, which he continued to represent till 1820; after which he sat for Callington in successive parliaments till 1831, and in 1832 he was returned for North Essex. Lord Ashburton commenced life as a Whig. In the House of Commons he spoke frequently on all subjects connected with commerce. On the formation of the Peel ministry in 1834, he became president of the Board of Trade, and in 1835 he was raised to the peerage. In 1842 he was appointed by Sir Robert Peel as a special commissioner to settle disputes, with the United States, about the

Maine territory, which then threatened to involve this country in a war with America; and the success of his mission was eminently owing to his personal influence. Lord Ashburton continued to support the policy of Sir Robert Peel, until the final measure of free trade in corn was proposed in 1816. To this he was strenuously opposed. During a long and busy life he found leisure to cultivate the fine arts, of which he was a most liberal patron; and his collection of ancient pictures was unsurpassed by any private one in the empire. Lord Ashburton married, in 1808, the daughter of William Bingham, Esq., of Philadelphia, and by that lady, who survived him, he left a numerous family. Died, July 13, 1818.

ASHMOLE, ELIAS, a celebrated English alchemist of the 17th century. He dabbled in his time in alchemy; but fortunately for his fame and fortune he abandoned that pernicious pursuit, and applied himself to the study of Antiquities, and began to collect materials for the "History of the Order of the Garter," which he afterwards published. The collections of Tradescant, the valuer, he presented to him, and subsequently his books and MSS., to the university of Oxford; and thus laid the foundation of the valuable Ashmolean Museum. Ashmole's claim to the Tradescant Museum was contested by Mrs Tradescant, but the Court of Chancery established it. After his death she wrote published his "Antiquities of Wiltshire," and his "Memoirs." Born, 1617; died, 1692.

SHWELL, GEORGE, an English divine of the 17th century; author of several religious works. Born, 1612; died, 1693.

SKREW, ANNE, one of the victims of the terrible persecutions in the time of Henry VIII. She was arrested for denying the doctrine of transubstantiation, and was put at the stake in Smithfield, having previously undergone the torture of the rack, July, 1546.

SKREW, ANTHONY, a physician and medical scholar of the 18th century; he studied at Cambridge, and became a Fellow of the Royal Society. He was the friend of many of the eminent men of his time, and a lover of rare and curious books, of which he formed a large collection. Born, London, 1722; died, 1774.

ASPASIA, one of the most celebrated women of the ancient world. She was a native of Miletus, and settled at Athens, where she resided in the time of Pericles. She was one of the so-called "hetærae," but a woman of so remarkable a character, so richly cultivated a mind, that she not only attracted but retained the love of the statesman till his death. The law of prohibited marriage of the citizens of foreign women, but Pericles, after consulting with his wife by mutual consent, allowed her to live in a relation with Aspasia, though without the usual legal formalities. The best and highest society of Athens surrounded at her house, and among her admirers, attracted less by her beauty than by her talents, her accomplishments, and the

charm of her conversation, was sometimes seen the wise and good Socrates himself. Pericles had a son by her, who was named after his father, and was declared legitimate by a decree of the people. The dates of the birth and death of Aspasia are not known. Pericles died B. C. 429.

ASSAROTTI, OTTAVIO GIOVANNI BATTISTA, an Italian philanthropist, born at Genoa, in 1733. At an early age he joined a society whose special object was the education of children. The case of deaf-mutes excited his sympathy, and the example of the abbé de l'Épée encouraged him to undertake the task of their instruction. He was the first to open a school for their benefit in Italy. After labouring for some years he obtained from Napoleon an endowment for the school. He devoted his fortune as well as his time to his chosen task, and died at Genoa, in 1829.

ASSCIE, HENRY VAN, a Dutch painter, born at Brussels, in 1775. He distinguished himself greatly in landscape, and became a member of the Society of Fine Arts of Brussels in 1816, and a member of the Academy of Amsterdam seven years later. In 1836 he was made a knight of the order of Leopold. Died, 1841.

ASSELYN, JOHN, a Dutch painter, who excelled in battle-pieces and historical paintings. Born, 1610; died, 1650.

ASSEMANI, GIUSEPPE SIMONE, a very learned Syrian Maronite, born about 1687. He went at an early age to Rome, and became archbishop of Tyre, and librarian of the Vatican. After visiting the East and obtaining many precious manuscripts, he published an account of the Syrian writers, entitled "Bibliotheca Orientalis Clementina Vaticana," in 4 vols. folio. He wrote several other voluminous works, and edited the works of Ephraem Syrus. Died at Rome, 1768.

ASSEMANI, SIMONE, a celebrated Orientalist, born in Syria, in 1752. He was educated at Rome, and in 1807 became Professor of Oriental Languages at the university of Padua, a post which he filled till his death. He was author of several works on Oriental Literature. Died, 1821.

ASSEMANI, STEFANO, nephew of Giuseppe Assemani, was born, 1707; became keeper of the Vatican library, and compiled the "Acta Sanctorum Martyrum."

ASSEI, a rabbi of the 5th century; one of the compilers of the Babylonian Talmud. Died, 427.

ASSER, or ASSERIUS MENEVENSIS, a learned ecclesiastic of the ninth century, a monk of St David's, and, probably, afterwards abbot or bishop, was the tutor, friend, and biographer of Alfred the Great. It is not known whether he was the same person as the Asser, bishop of Sherburne, mentioned in the Saxon Chronicle. His "Annals," have been raised respecting them, are still believed to contain an authentic account of the life of his sovereign and friend. Died, 910.

ASTELL, MARY, the daughter of a merchant at Newcastle, and a woman of very considerable talent as a polemical disputant.

She obtained great popularity among the high church party as one of the most strenuous impugners of the principles of Locke. Born, 1668; died, 1731.

ASTLE, THOMAS, an English antiquary, was born in 1734. He settled in London, obtained employment in government offices, and became Keeper of the Public Records in the Tower. His principal work is the "Origin and Progress of Writing," which appeared in 1784. He was F.R.S. and F.S.A., and a Trustee of the British Museum. Died, 1803.

ASTON, Sir ARTHUR, a brave commander of the royalist troops in the reign of Charles I., who greatly distinguished himself at the battle of Edge hill, &c. He was governor of Drogheda in 1649, when it was taken by Cromwell, and is said to have had his brains beaten out with his own wooden leg.

ASTRUC, JEAN, an eminent French physician of the 18th century. He was professor at Montpellier for thirteen years, and in 1728 went to Paris, visited Poland, and finally settled at Paris as physician to the king and professor at the Royal College. He acquired great reputation by his work "De morbis Venericis," which was immediately translated into English. He wrote also "Memoirs on the Natural History of Languedoc," and "Memoirs of the Faculty of Medicine of Montpellier," &c. Born, 1684; died, 1766.

ATAHUALPA, or ATABALIPA, twelfth and last Inca of Peru, was made sovereign of Quito by his father, on whose death, in 1523, he contended with his brother Huascar for the throne of Peru. He defeated Huascar and imprisoned him. He is also said to have put to death more than 200 of the royal family. When Pizarro landed in Peru both the brothers sought his friendship. Atahualpa agreed to meet the Spaniards on a friendly visit near Caxamarca, and Pizarro with the foulest perfidy attacked the defenceless multitude, made a horrible massacre, and captured the Inca and imprisoned him. He was soon after tried before Pizarro and Almagro on a false accusation and sentenced to be burnt. As he consented to receive baptism his sentence was softened to strangling. Died, 1533.

ATHANASIUS, St. bishop of Alexandria, and one of the most celebrated doctors of the church, was born at Alexandria about 296. He was educated by his predecessor Alexander, spent some time with St. Anthony in the desert, took a leading part at the council of Nice, defending the orthodox dogma (the *Homoeousion*), and combating Arius with great zeal and acuteness, and was chosen bishop in the following year, 326. For nearly half a century he sustained, with unshaken fidelity through all changes of outward fortune, the part he had chosen of champion of the catholic doctrine. Condemned by councils, thrice exiled, alternately supported and persecuted by the emperors, a wanderer at Rome, at Milan, in Gaul, and in the Egyptian desert, he remained true to himself, exercised an almost unparalleled influence, spent the last ten years of his life at Alexandria, and there died, 373. His works fill three vols. folio. There is no ground for attribut-

ing the Athanasian Creed to this eminent bishop.

ATHELSTAN, king of England, was the eldest son of Edward the Elder, on whose death in 925 he succeeded to the throne. In the following year, on the death of Sihtric, king of Northumbria, he seized his kingdom, and the other kings in the island made peace with him. The great event of his reign was the battle of Brunanburg, at which he won a complete victory over Anlaf, son of Sihtric, and the Anglo-Danes with their allies the Northmen, the Scots, and the Welsh. This battle was fought in 937. Athelstan acquired great influence abroad, and his alliance was sought by several European sovereigns. He ruled wisely, added to the laws left by his grandfather Alfred, and favoured trade, education, and religion. Died, unmarried, 940.

ATHENÆUS, a learned grammarian, born at Naucratis, in Egypt, in the third century. The only work of his now extant is entitled "The Deipnosophists," and is a kind of commonplace-book, containing a huge collection of facts, anecdotes, and extracts on all sorts of subjects, and from a great variety of sources. Nothing is known of the life of Athenæus, except that he lived at Alexandria and then at Rome.

ATHENAGORAS, an Athenian philosopher of the second century. He became a convert to Christianity, and Clement of Alexandria was among his pupils. He wrote an "Apology for the Christians," and a treatise "On the Resurrection of the Dead."

ATHENAIS. See EUDOCIA.

ATHIAS, JOSEPH, a Jewish printer of Amsterdam in the 17th century; and editor of the Bible in Hebrew, English, Spanish, and German.

ATHLONE, GODART DE REEDE DE GINKELL, earl of, an able and brave Dutch officer, who accompanied the Prince of Orange in his expedition to England, was born at Utrecht in 1640. Some time after William's accession, he was sent to suppress the revolt of some Scotch regiments at Ipswich. He subsequently took a leading part in William's campaigns in Ireland; was at the battle of the Boyne, and after taking Athlone, gaining the battle of Aughrim, and forcing Limerick to capitulate, was rewarded with the title of Earl of Athlone. He afterwards served under William and under Marlborough in the great campaigns on the continent. Died, 1703.

ATHOL, JOHN MURRAY, duke of, is chiefly remarkable for the events which arose out of his hereditary connection with the Isle of Man. In 1781 he petitioned parliament, complaining of his father's transfer of the sovereignty of that island to the English crown in 1765, for the sum of £70,000 and an annuity of £2000, and praying for a bill to amend it. The question was lost in consequence of a counter-petition from the island; but the duke was named captain-general and governor-in-chief of the Isle of Man, from Feb. 4, 1793; and subsequently a grant of one-fourth of the customs was made to him, in hereditary succession, with an increase of the annuity. He died in 1856, aged 75.

BERT, a distinguished

lawyer and patriot, who aided in the defence of Lord William Russell, and conducted that of Sir W. Williams, speaker of the House of Commons, when prosecuted for signing the orders to print Dangerfield's narrative of the Popish Plot. He also distinguished himself by his opposition to the arbitrary measures of James II., and at the Revolution was made chief baron of the Exchequer. He subsequently was made speaker of the House of Lords, which office he held till 1693. Born, 1621; died, 1709.

ATKYNs, SIR ROBERT, son of the above, author of "The ancient and present State of Gloucester." Born, 1646; died, 1711.

ATTALUS I., king of Pergamus, succeeded his cousin Eumenes I. in B. C. 241. He greatly extended the limits of his kingdom, resisted the Etoiians against Philip of Macedonia, and afterwards joined the Romans in their war with the same sovereign. He distinguished himself also by his patronage of literature, and founded a library at Pergamus. Died, B. C. 197.

ATTERBURY, FRANCIS, an English prelate, and a preacher of consummate abilities, was born in 1662, at Milton Keynes, near Newport Pagnell, and was educated at Christ Church, Oxford. In 1691 he took holy orders, and in 1693 was made chaplain in ordinary to the king, and lecturer at St Bride's. In these situations, and as preacher in private, he attracted much notice by the eloquence of his discourses; but his instant advocacy of high church principles exposed him to the attacks of Hoadley, and ten of others of less repute. In 1700 he began a controversy on the powers and rights of convocations, in which he acquitted himself so much to the satisfaction of the party which he sided, that he received the grace of D. D., and the thanks of the lower house of convocation. On the accession of Queen Anne, he was made her chaplain in ordinary, and shortly afterwards he received the deanery of Carlisle. His rise hence-

was rapid: he was successively made teacher at the Rolls Chapel, a canon of Peter, dean of Christ Church, bishop of Exeter, and dean of Westminster, which preferment he owed to the recommendation of Lord Oxford. Hitherto his course had been invariably prosperous; but the death of Queen Anne altered the whole complexion of his circumstances. His high church principles were sufficiently well known; and it is asserted that he was impatient enough to boast, that if a sufficient card could be obtained, he would proclaim Pretender, and that too in full canonical. Be this true or false, it is certain that on several occasions to render himself obnoxious to George I., and was sufficiently active in correspondence with the friends of Pretender to involve himself in a "Bill of Pains and Penalties." He died an exile, in Paris, in 1731.

ATTICUS, HERODES, son of Julius Atticus, acquired so much reputation as a teacher of eloquence at Athens, that he was invited by Senatus Pius to superintend the education of his adopted sons Marcus Aurelius and Verus. He subsequently became

consul, prefect of the free cities of Asia, &c. He employed his great wealth in public works; but at the close of his life he retired to Marathon, his native place, where he died, A. D. 180.

ATTICUS, TITUS POMPONIUS, an illustrious Roman of the equestrian order, especially remembered as the friend of Cicero, was born at Rome, B. C. 109. He was a man of great wealth and also of high intellectual cultivation, and was on terms of friendship with the most eminent men of his time. An Epicurean in philosophy, he maintained a strict neutrality throughout the civil wars of Sulla and Marius, Cæsar and Pompey, Antony and Augustus, and generously gave his aid to the victims of proscription. He spent about 20 years at Athens, returning to Rome, B. C. 65. About nine years later he married and had one daughter, Pomponia, who became the wife of M. Vipsanius Agrippa. None of the writings of Atticus are now extant, but the correspondence of Cicero with him, which was carried on for many years, forms a very valuable record of the time. Died, B. C. 32.

ATTILA, king of the Huns, and one of the most celebrated leaders of the barbarian hosts which overran the Roman empire in its decline. His name and the enormous army at his command inspired such terror that he was named the "Scourge of God." After invading the Eastern empire and extorting a humiliating treaty from Theodosius II., he led his forces into Germany and Gaul, and was defeated in a great battle near Châlons-sur-Marne, in 451, by the combined armies of the Romans under Aëtius, and the Goths under their King Theodoric who fell there. He soon after passed the Alps and made himself master of northern Italy, destroying many of the principal cities. Attila died in his own country in 453. He was acknowledged sovereign of all the tribes between Gaul and the borders of China.

ATTIRET, JEAN DENIS, a French Jesuit and painter. Being appointed missionary to Peking, he acquired great favour with the emperor Kien Long, of whose gardens he wrote a very amusing account. Born, 1702; died, 1768.

ATWOOD, GEORGE, F. R. S., an eminent mathematician; author of a "Dissertation on the Construction and Properties of Archæ," and many other valuable works on mechanical and mathematical science. Born, 1745; died, 1807.

ATWOOD, THOMAS, an eminent Musician and composer, born in London, in 1707; commenced his musical education under Dr Nares, in the choir of the Chapel Royal, where he early attracted the notice and gained the patronage of the royal family. In 1783 he set out for Naples, and after studying there for a time, he proceeded to Vienna, where he reaped great advantages from the instructions of Mozart. In 1798 he was appointed organist of St Paul's cathedral, and composer to the Chapel Royal; he also held the situation of organist at the chapel of the Pavilion, Brighton. His compositions consist of dramatic pieces, numerous services and anthems, songs, glee, sonatas, and other pieces for the pianoforte.

He died March 24, 1838, and was buried in St Paul's.

AUBIGNE, THEODORE AGRIPPA D'. [D'AUBIGNE.]

AUBREY, JOHN, an eminent English topographer and antiquary of the 17th century. He was a native of Easton Piers in Wiltshire, was educated at Oxford, and became a fellow of the Royal Society. He left a vast number of MSS., but only published one work, entitled "Miscellanies," a collection of popular superstitions. Some years after his death his "Perambulation of the County of Surrey" appeared, edited by Dr R. Rawlinson. Many of his MSS. are in the Ashmolean Museum at Oxford. Died, about 1700.

AUBRIET, CLAUDE, a French painter of natural history subjects. Died, 1740.

AUBRIOT, HUGHES, an eminent Frenchman, born at Dijon, who was raised to the office of director of the finances under Charles V. He was provost of the merchants of Paris in 1367, when he projected and executed many important public works for the improvement and defence of the city. In 1369 he built the famous Bastille as a fortress against the English. Subsequently he was charged with heresy and imprisoned in the Bastille, but being rescued at the time of the insurrection of the "Mallotins," he retired to Dijon and died there, 1382.

AUBRY, F., one of the French Committee of Public Safety in 1794, who aimed at counter-revolution. He deprived Buonaparte, after the siege of Toulon, of military employments, and reduced him to great distress; the latter revenged himself afterwards, by preventing his return into France, after his deportation to Cayenne.

AUBRY DE GOUGES, MARIE-OLYMPIE, a French republican, celebrated for her beauty and talents, born in 1755. She founded the popular female societies, called Tricoteuses, and was a perfect enthusiast in her political opinions. At length she was put to death by the revolutionary tribunal, in consequence of having denounced them in a pamphlet called "Les Trois Urnes." She died with heroic spirit. She is the author of the "Mémoires of Madame de Valmont," and of several dramatic pieces.

AUBUSSON, PIERRE D'. [D'AUBUSSON.]

AUCHMUTY, Sir SAMUEL, a distinguished English general. He served with great zeal and ability in North and South America, and when commanding in India, reduced to the dominion of Great Britain the rich settlements of Java and Batavia. On his return to Europe, he was appointed to the command in Ireland, where he died in 1822.

AUCKLAND, WILLIAM EDEN, Lord, an able diplomatist, was the third son of Sir Robert Eden, Bart., of West Auckland, Durham. He was appointed under-secretary of state in 1772; went to Ireland in 1780 with Lord Carlisle, as chief secretary; in 1788 was ambassador to Spain; and in the year following was ambassador to Holland. He wrote "The Principles of Penal Law," "The History of New Holland," and other works. Born, 1744; died, 1814.

AUDEBERT, JEAN BAPTISTE, a cele-

brated French painter, engraver, and naturalist, born in 1759. He studied at Paris, travelled in England and Holland, and afterwards devoted himself wholly to the delineation of objects of natural history. His "Histoire naturelle des singes," and "Histoire naturelle générale des colibris, &c." are among the most magnificent works on Natural History ever published. The plates were coloured after a method invented by the author, and in a few copies the text was printed in gold. After his death another work entitled "Oiseaux dorés," was published from materials which he had collected. Died, 1800.

AUDIFREDI, GIOVANNI BATTISTA, a learned Italian bibliographer, born, 1714. He relinquished the pursuit of astronomy on being appointed keeper of the Casanata Library, at Rome, and published several valuable catalogues. Died, 1784.

AUDLEY, Sir THOMAS, Lord AUDLEY, Lord Chancellor of England, was probably a native of Essex. He became Speaker of the House of Commons about 1529, and after holding several other offices, succeeded Sir Thomas More as lord-keeper in 1532, and was soon after named Lord Chancellor. He was a selfish and unscrupulous man, whose highest ambition seems to have been, to do the will of his master, Henry VIII., and get what he could by it. And in this he succeeded. After the dissolution of the monasteries he received many a rich gift, especially the abbey of Walden, on the site of which his grandson built the mansion of Audley End. He was raised to the peerage, made a Knight of the Garter, and died in 1544. Lord Audley augmented the endowments of Magdalen College, Cambridge.

AUDOIN, JEAN VICTOR, a French entomologist, was born at Paris in 1797. He early obtained the friendship of Cuvier and other men of science, and in 1826 he was named Professor of Entomology at the Museum of the Jardin des Plantes. His writings consist chiefly of papers contributed to learned societies. Died, 1841.

AUDRAN, the name of a family of French artists, of whom the following are the most eminent—**CHARLES AUDRAN**, the elder, engraver, was born at Paris, in 1594; and died in 1673.—**CLAUDE**, a nephew of the preceding, was born at Lyons, in 1639, and studied under his uncle. He was assistant to Le Brun in painting the celebrated series of the Battles of Alexander at Versailles, and became professor of painting in the royal academy of Paris, where he died in 1684.—**GIRARD**, brother of the last-mentioned, and the most celebrated of the family, was born at Lyons, in 1640; studied under Le Brun at Paris, and afterwards at Rome. He was admitted to the Academy of Painting, and named one of its councillors in 1681. He engraved his master's Battles of Alexander, and a multitude of other works, with great skill, preserving in his engraving the peculiar style of each painter. Girard Audran was one of the greatest of historical engravers, and one of the most amiable and kindly of men. He died in 1703.—**CLAUDE**, nephew of Girard, was born at Lyons, in 1685. signs; appointed king's painter; and died in 1734.—JEAN, brother of Claude, was born in 1667; studied engraving under his uncle; and died, at Paris, in 1756.

AUDUBON, JOHN JAMES, a distinguished naturalist, was born of French parents, on a plantation in Louisiana, near New Orleans, and from his earliest years he was taught by them to study nature. After spending his boyhood in Louisiana, young Audubon was taken to France, where he received his education, and attained considerable proficiency as a painter under the mastership of the celebrated David. At the age of 17 he returned from France (then in the midst of its revolution) to the woods of the New World, with fresh ardour, and began a collection of drawings under the title of the "Birds of America." This collection having multiplied upon his hands, after many years of devoted toil, he was persuaded to undertake the publication of his great work, and with the view of obtaining subscribers he visited Europe in 1824. Everywhere was he well received. On the Continent, Herschel, Cuvier, and Humboldt, whom he had encountered in America, gave him a hearty reception. In the "Cosmos," distinguished mention is made of his talents. The publication of his great work was commenced, and completed at the end of 14 years. Sir David Brewster, Sir Walter Scott, Lord Jeffrey, and Wilson were warm supporters of this magnificent undertaking, which even exceeded all expectations. The leading scientific societies of Europe honoured the author by enrolling him as a member. In 1839 Audubon returned to America, and established himself on the banks of the Hudson in peaceful retirement. There he laboured with Dr Bachman in preparing "The Quadrupeds of America," a work published in 1850. He was assisted in some of his labours by his two sons. Most of his birds, however, were painted by himself in the forest while their plumage was fresh, and he seems never to have been satisfied with the brilliancy of his colouring, since it did not represent life itself. Died, 1881.

AUENBRUGGER, or AVENBRUGGER, FERDINAND, physician, was born at Gratz, in Styria, in 1722, and became ordinary physician to the hospitals of Vienna. He is celebrated as the inventor of the method of percussion in investigating diseases of the chest. He published his method in 1761, but nearly half a century elapsed before it was generally adopted. Died, 1809.

AUGER, ATHANASE, a learned abbé, and professor of rhetoric at the college of Muen, was born at Paris, in 1734. He published several political works, but chiefly distinguished himself by his translations of the works of Demosthenes, Æschines, and other Greek orators, and of Cicero, the last appearing after his death. One of his principal works is the "Constitution de Rome." Died, 1792.

AUGEREAU, PIERRE FRANÇOIS CHAS., duke of Castiglione, and marshal of France, was born at Paris, in 1757. Having entered the army early in life, he distinguished himself, and rose to the rank of brigadier-general in 1794. At the battles of Castiglione

and Arcoia, in 1796, his personal bravery was eminently conspicuous; and, in short, through all the campaigns of Napoleon from Russia in 1813, he displayed great skill, and filled the most important stations; receiving as a reward for his services the baton of marshal and a dukedom. On the abdication of the emperor, he was among the first to offer his allegiance to the Bourbons, for which he was amply rewarded; yet, it is said, he was equally ready on Napoleon's return from Elba to serve his old master, who, however, rejected his services, and declared him a traitor. He died in 1816.

AUGUSTI, CHRISTIAN JOHANN WILHELM, a German theologian, was born near Gotha, in 1771. He studied at the university of Jena, where, in 1803, he was named Professor of Oriental Literature, and subsequently of Theology. In 1811 he removed to Breslau, and eight years later to Bonn. His works are very numerous, and are mostly historical or antiquarian. The best is, perhaps, his "Denkwürdigkeiten aus der Christlichen Archæologie." Died at Bonn, in 1841.

AUGUSTIN, ST, bishop of Hippo, the greatest of the Latin Fathers of the Church, was born in 354. He was a native of Tagaste, in North Africa. At the age of 16 he was sent to study at Carthage, where he fell into immoral habits, notwithstanding the Christian instruction which he had received from his mother, the pious Monica. He became a Manichean, and soon distinguished himself as a rhetorician. In 384 he was at Rome, whence he was called to Milan, and there, by the influence of St Ambrose, he was led to embrace Christianity. He was baptized in 387, spent some time in retirement at Tagaste, and in 395 was made coadjutor to Valerius, bishop of Hippo, who died in the following year. He laboured incessantly as a pastor and a writer till his death, which took place during the siege of Hippo by the Vandals, in 430. His remains, respected by the barbarians, were removed to Sardinia, and afterwards to Pavia. In 1842 some relics of the saint, alleged to have been discovered in 1695, were reconveyed to Hippo. Augustin took an active part in the church controversies of his age, especially opposing the Manicheans, the Donatists, and the Pelagians. His influence over the western church was immense and lasting; he completed, it has been said, what Athanasius began, and by his earnestness and logical clearness determined the form of the catholic doctrine. His works are very numerous, but the best known are his "Confessions," and the "City of God." The writings of this father were the special study both of John Wickliffe and Martin Luther.

AUGUSTIN, or AUSTIN, ST, styled the Apostle of the English, was sent by Pope Gregory I, with a few monks to preach the gospel in England. He landed in 597; and so rapid was his success, that the pope made him archbishop of Canterbury, Kent being the first scene of his labours. Elated by the success of his mission, he endeavoured to bring the Welsh bishops, who were descendants of the British converts of the second

century, under the jurisdiction of the Church of Rome, to which they had never submitted; but they asserted their independence, and 1200 (or 200, according to the Saxon Chronicle) monks of Bangor were soon after put to the sword by Ethelfrid, king of Northumberland, at the instigation, it was said, of the offended prelate. He died, however, in 605, two years before this massacre took place.

AUGUSTULUS, ROMULUS, the last Roman emperor of the West, was raised to the throne by his father, the patrician Orestes, who deposed Julius Nepos, in 476; but his reign was little more than nominal, and of very short duration; being soon after conquered and dethroned by Odoacer, king of the Heruli, who spared his life, and allowed him a pension.

AUGUSTUS, the first Roman emperor, at first named **CAIUS OCTAVIUS**, was born B.C. 63. He was grand-nephew to C. Julius Cæsar, who named him his heir, and on whose murder he went to Rome to claim his property and avenge his death: aiming secretly at the chief power. He first joined the republican party, assisted in the defeat of Antony, at Mutina, and got himself chosen consul in 43. Soon after, the first triumvirate was formed between Octavius, Antony, and Lepidus, and a frightful proscription followed. Next year Octavius and Antony overthrew the republican army under Brutus and Cassius in the two battles of Philippi. He was next occupied with the wars excited by Fulvia, the wife of Antony, and Sextus Pompeius. Lepidus was deprived of power in 36, and five years later Antony and Cleopatra were defeated at Actium, and Octavius was master of the Roman world. Gradually all the highest offices of state were united in his hands, and the senate gave him the title "Augustus," B.C. 27. He studiously velle his supremacy under the old republican forms, kept the people amused, carried on wars only to defend the existing frontiers, promoted agriculture, literature, and the arts, and made immense improvements in the city of Rome. Augustus was thrice married, and as his nephew Marcellus and the two sons of his friend Agrippa were dead, he named as his successor, Tiberius, the son of his third wife, Livia. Died at Nola, in August, A. D. 14.

AUGUSTUS II. of Saxony. [FREDERICK AUGUSTUS I.]

AULUS GELLIUS. [GELLIUS,] **AUNGERVILLE, RICHARD**, or **RICHARD DE BURY**, bishop of Durham, and chancellor of England, was born in 1287. He studied at Oxford, and was appointed tutor to Edward III., who afterwards conferred on him many offices, both of church and state. He was twice sent ambassador to the pope, became bishop of Durham in 1333, and chancellor in the following year, and was several times sent to the court of France. He was a very great lover of learning and books, made a large collection of them, and was the correspondent of many eminent men. He left a curious and interesting work, entitled "Philobiblion." Died, 1345.

AUNOY, MARIE CATHERINE, countess of, French novelist, born about 1650. She is

remembered as authoress of several volumes of "Fairy Tales," many of which have been frequently reprinted and translated into many languages. There is an English translation by Mr J. R. Planché. Died, 1705.

AURELIANUS, LUCIUS DOMITIUS, Roman emperor, was the son of a peasant, and was born in Pannonia, about the year 212. Having throughout an active life greatly distinguished himself as a skilful, valiant, and successful general, he was chosen emperor on the death of Claudius II. in 270. He drove the barbarians from Italy, vanquished the celebrated Zenobia, queen of Palmyra, and carried her prisoner to Rome, conquered Tetricus, who had assumed the purple in Gaul; but while on his march towards Persia, in 275, he was assassinated by his mutinous troops. Besides the brilliant military achievements by which Aurelianus restored for a time the prestige of the Roman name, he undertook many great public works, the principal of which was the building of new walls for the defence of the city.

AURELIUS ANTONINUS, MARCUS, Roman emperor, was born at Rome, in 121. He succeeded Antoninus Pius in 181, having been early adopted by him and married to his daughter Faustina. Lucius Verus was at once associated with him in the empire. Great part of his reign was occupied with wars, the sad necessity of the times. Verus conducted successfully a war with the Parthians; both emperors encountered the barbarians on the Danube, until the death of Verus in 169, and then Aurelius carried on the war, and by his success obtained the surname of Germanicus. It was in the course of this war that the remarkable defeat of the Quadi took place, 174, which was attributed to miracle, and respecting which so much debate has been held. After an expedition to the East to suppress the revolt of his lieutenant there, he had to renew the war in Germany; but worn out with incessant exertions he died in Pannonia, 180. Marcus Aurelius was not only one of the wisest and best of the Roman emperors, but one of the noblest and most complete characters of the ancient world. In boyhood he was called "Verissimus" (most true), and this chief of virtues distinguished him through life. He was educated by teachers of the Stoic School, and became himself one of the most eminent members of that school. He acquired the title of "the Philosopher," and has left us in his "Meditations" a most precious record of his moral and religious sentiments and opinions, the rules by which he wished to regulate his conduct, &c., set down in detached notes from time to time, as affairs of state gave him leisure. A new English translation of this book was lately published by Mr George Long. The persecution of Christians in this reign has been urged as a reproach against Aurelius; but it is not known that he ordered it. And it is noteworthy that no persecution took place in Rome or Italy.

AURUNGZEBE, the Mogul emperor of Hindostan, was the third son of Shah Jehan. His early life was marked by gravity and seeming devotion, but these were merely the disguise of an ambitious and crafty spirit.

Several volumes which have been translated into English trans-Died, 1705.

A New Universal Biography.

He deposed his father, put to death two of his brothers, and the son of the elder of them, and assumed the sovereign authority in 1659. He, however, as he obtained his power, he used it with skill and courage. He subdued Golconda, the Carnatic, Bijapur, and Bengal, and routed the pirates who had infested the mouth of the Ganges. His achievements obtained him the respect of Europe as well as Asiatic powers. But the close of his life was embittered by the rebellious conduct of his sons, who aimed at deposing him, as he had deposed his father. Born, 1618; died, 1707. After the death of Aurungzebe, the might and splendour of the Mogul empire rapidly declined.

AUSONIUS, DECIMUS MAGNUS, a Roman poet of the 4th century; son of Julius Ausonius, a physician of Bordeaux. He early gave proof of genius, and was appointed tutor to Gratian, son of the emperor Valentinian; and when his pupil came to the throne, he made him pretorian prefect of Gaul, and subsequently raised him to the consulship. His poems are various both as to subject and merit; but though they contain much that is beautiful, they are but too frequently deformed by licentiousness.

AUSTEN, JANE, an English novelist, was born in 1775. She was the daughter of a clergyman in Hampshire, and received a good education. Her first novel, "Sense and Sensibility," was published in 1811, and became at once popular. Among her other works are "Pride and Prejudice," "Persuasion," &c. They are all carefully finished definitions of familiar life in England, charming for their healthful simplicity, truth to nature, and freedom from exaggeration. They hold their ground in the face of all "sensation" competitors, and are likely to do so. Died at Winchester, 1817.

AUSTEN, WILLIAM, a distinguished metal-founder, a citizen of London, who flourished in the 15th century. The work by which he is known is the very fine brass tomb of Richard de Beauchamp, earl of Warwick, in St Mary's church, Warwick. He was assisted by other artists whose names are also preserved. The design and workmanship are said to be not inferior to contemporary sculptures of great Italian artists.

AUSTIN, JOHN, a distinguished English jurist, was born about 1790. In his youth he served five years in the army, which he quitted for the study of law, and was called to the bar in 1818. Physically and mentally disqualified for the rough dashing work of the profession, he gave up practice after seven years' struggle. On the foundation of London University in 1826 he was chosen to fill the chair of Jurisprudence, and to fit himself for it went to study in Germany. He enjoyed at Bonn the society of Niebuhr, Brandis, Schlegel, and other eminent men, mastered the German language, and read the most important works on Law. The first success of his career as Professor was soon followed by a mournful failure; such proud exposition of the science of law as he gave not being attractive to those who only wanted to make money by their profession. In 1832 he resigned his chair. It was a heavy blow and a bitter disappointment to

him. He was afterwards a member of the Commission on Criminal Law, and for a short time lecturer at the Inner Temple. In 1837 he was sent with Sir George Lewis as royal commissioner to Malta, and by his love of justice, sagacity, and humanity rendered great service to the island. His health, always frail, grew worse after his return from Malta, and he spent the succeeding years in Germany and France, and finally settled at Weybridge in 1848, and there passed quietly and happily the last years of his life. Died, 1859. His able work, "The Province of Jurisprudence determined," was first published in 1832. A second edition, with two additional volumes of his Lectures and a touching memoir by his wife, was published in 1861.

AVALOS, FERDINAND FRANCESCO D', marquis of Pescara, a distinguished Neapolitan captain, was born about 1493. He early married the celebrated Vittoria Colonna; entered the army in 1512; defeated Alviano near Vicenza in the following year; took Milan and many other towns; distinguished himself at the battle of Pavia, and was wounded there; and died at Milan, hated for his arrogance, 1525.

AVALOS, ALPHONSO D', marquis del Vasto, nephew of the preceding, was born at Naples, in 1502, and obtained the command of the imperial army at his uncle's death, for the brilliant valour he displayed at the siege of Pavia. He followed Charles V. in all his expeditions, and was made governor of the Milanese, and was made governor and oppressive government made him detested by the people. Died, 1546.

AVENZOAR, or EBN ZOAR, an Arabian physician of the 12th century, born at Seville; author of a medical compendium, entitled "Al Theiser."

AVERRROES, or IBN ROSHD, an Arabian philosopher and physician of the 12th century. He diligently studied philosophy, jurisprudence, and medicine, under the greatest teachers of his time, and was the first who translated the works of Aristotle. He also wrote commentaries on them and on the "Republic" of Plato. Of his medical treatises the most celebrated is that entitled "Collyget," or "Kulligat," i. e. the "Total." Averroes was made chief judge of Morocco by the caliph, Jacob Aimanzor, but being accused of heresy by the Mahometan priests, he was imprisoned. Again, however, he acquired both the royal favour and the popular confidence, and died at Morocco, in 1198, in possession of the highest honours.

AVICENNA, the celebrated Arabian physician and philosopher, was born near Bokhara in 980. He applied himself earnestly to the study of mathematical science, logic, medicine, and theology, held the office of physician to various princes, and died at Hamadan, 1037. He wrote a great number of treatises on philosophy and medicine, the most important of which were his commentaries on the "Metaphysics" of Aristotle, and his famous "Canon," the sovereign authority in medical science for centuries.

AVILA, JUAN D', a Spanish priest, who for the space of 40 years journeyed through the Andalusian mountains and forests, en-

foreing by his precepts and exemplo the doctrines of the gospel; on which account he acquired the appellation of the Apostle of Andalusia. Died, 1569.

AVILA Y ZUNIGA, LUIS D', a distinguished diplomatist, warrior, and historian, under Charles V. He was envoy from the emperor to Popes Paul IV. and Plus IV., and attended Charles in his war with the Protestant Princes. He wrote "Commentaries" on this war, which gave him high rank as a historian, and have been translated into various languages. Born, about 1500.

AVISON, CHARLES, a composer and musician; author of "Essays on Musical Expression," &c. Died, 1770

AYALA, PEDRO LOPEZ D', a learned, brave, and eloquent Spanish statesman, was born in Murcia, in 1332. He was captured by the English at the battle of Nakura (or Najera) when Henry of Trastamere was defeated by Pedro the Cruel, assisted by the Black Prince. He was afterwards released on payment of a heavy ransom, and Henry having triumphed was made his counsellor. Ayala was again taken prisoner at the battle of Aljubarota. He became under John I. chancellor of Castille. After serving under four Castilian monarchs, both in the council and the field, and distinguishing himself also as a man of erudition, he died in 1407. Besides translations of Livy and Boethius, he wrote a valuable "Chronicle of the kings of Castille," first published in 1495, and several other works.

AYESHA, daughter of Abubeker, and second wife of Mohammed, to whom she was married soon after the death of his first wife, Khadjjah, and his flight to Medina. Ayesha, only nine years old at her marriage, was exceedingly beautiful, and the favourite of her husband. On his death she resorted to arms to oppose the succession of Ali; but though conquered by him she was dismissed in safety, and died in retirement at Mecca, in 677. The Mussulmans venerate her memory, and designate her *the prophetess*.

AYLIFFE, JOHN, a learned English jurist of the 18th century. He appears to have been a member of the university of Oxford. His most important work is the "Pandect of the Roman Civil Law," one of the best English works on that subject.

AYLOFFE, Sir JOSEPH, an able antiquary of the 18th century. He was educated at Oxford, became keeper of the state papers, and compiled a work entitled "Calendar of the Ancient Charters, &c." He was F. R. S. and F. S. A. Born, 1708; died, 1781.

AYMAR, JACQUES, a peasant of Dauphiny, who in the 17th century excited a great sensation in France by his pretensions to di-

vination. By his divining-rod he professed himself able to discover mines, springs, lost treasures, and criminals escaping from justice. At last the Prince of Condé, by various simple tests, compelled Aymar to acknowledge himself an impostor.

AYRTON, EDMUND, a composer of cathedral music, and one of the directors of the Commemoration of Handel. Born, 1734; died, 1808.

AYSCOUGH, SAMUEL, an industrious literary character of the last century. He contributed largely to the British Critic and other periodicals; and compiled a variety of laborious indexes, of which his index to Shakspeare is the principal. He obtained the appointment of assistant-librarian at the British Museum, and afterwards took orders and became curate of St Giles's, and lecturer at Shoreditch. Born, 1745; died, 1804.

AYSCUE, Sir GEORGE, a distinguished admiral in the time of Cromwell, and one of the coadjutors of Blake in his famous action with the Dutch admiral, Van Tromp. At the restoration he was made rear-admiral of the Blue; and being captured in Albemarle's action off Dunkirk, remained many years a prisoner.

AYTON, Sir ROBERT, a native of Fifeshire, in Scotland, a poet of considerable merit, was born in 1570. He wrote in Greek, Latin, and French, as well as English. Died, 1638.

AZARA, DON JOSE NICOLAS D', a Spanish grandee, born in Arragon, 1731; ambassador, first to Rome, where he remained 20 years, and was associated with the most eminent artists and scholars of the time, and next to France; a good writer in Spanish, Italian, and French; a ripe antiquarian, and a great patron of the fine arts. He wrote the Life of the painter Mengs, and translated into Spanish Middleton's "Life of Cleero," "Seneca," and "Horace." He died suddenly, by his fireside, in 1804.

AZARA, FELIX D', a Spanish naturalist and traveller of the 18th century; author of a valuable "Natural History of Paraguay," and other works. Born, 1746; died in Arragon, 1811.

AZUNI, DOMENICO ALBERTO, an Italian jurist, was born in 1749. He was a native of Sardinia, was made a senator, and after the annexation of Nice to France went to Paris, and was employed by the government. In 1807 he was named president of the Court of Appeal at Genoa, an office which he held till the fall of Napoleon. He was chiefly known as author of the "Droit Maritime de l'Europe," which he first published in Italian in 1785, and ten years later in French. Died at Cagliari, 1827.

BABER, ZAHIR-EDDIN-MOHAMMED, founder of the Mogul empire in Hindustan, was a descendant of Tamerlane, and was born in 1483. The greater part of his life was spent in war. He took Cabul in 1504, Candahar two years later, several times invaded Hindustan, and in 1525 finally defeated substantially the Afghans, and became substantially master of Hindustan. He showed soldier, made many improvements, social and political, in his empire, and died, 1530. Baber was also a good writer, and left a valuable autobiography.

BABINGTON, ANTHONY, a gentleman of good family and fortune in Derbyshire, who was detected in a conspiracy to assassinate Queen Elizabeth, for which he was executed in 1586.

BABINGTON, GERVASE, bishop of Worcester, at the end of the 16th and beginning of the 17th centuries. He was a learned and pious man, and a considerable benefactor to the library of Worcester cathedral. He successively held the bishoprics of Llandaff, Exeter, and Worcester.

BABINGTON, DR WILLIAM, an eminent physician, and lecturer on medicine and chemistry at Guy's Hospital, was born in 1737. He commenced practice in London in 1797, and distinguished himself by his zeal in the promotion of science, especially the science of geology. He took a chief part in founding the Geological Society, and was selected president in 1822. He was also F.R.S. After a long life of usefulness in his profession, of which he was a distinguished ornament, he died in April, 1833, aged 76. He was the author of "A New System of Mineralogy," besides some other scientific treatises.

BABEUF, FRANÇOIS NOEL, a violent partisan of the French Revolution. He conducted a journal called "The Tribune of the People," in which he styled himself Caius Gracchus, and the object of which was to overthrow society as at present constituted, and to establish a social equality. He organized a conspiracy against the government of the Directory, and was condemned to be guillotined, 1797.

BARRIUS, a Greek poet, who lived probably about the commencement of the Christian era. He is known by a collection of fables, which he turned into verse, and which were no doubt the basis of all the collections that passed under the name of Esop. A manuscript containing 123 of these fables was discovered in 1842 in a convent of Mount Athos, mere fragments being previously known. Sir G. C. Lewis published a valuable edition of them in 1847.

BACCALAR Y SANNA, VINCENT, marquis of St Philip, an able commander and statesman under Charles II. and Philip V. of Spain; author of "Memoirs of Philip V.," &c. Died, 1728.

BACCHYLIDES, a Greek lyric poet, who flourished about 450 years B. C. He was the

nephew of the celebrated poet Simonides, and the contemporary and rival of Pindar. His poetry, like that of Horace, is chiefly devoted to the pleasures of social life, love, and wine.

BACCIO DELLA PORTA, OR FRA BARNABE, most distinguished Italian painter, was born at Savignano in 1469. He was a pupil of Cosimo Roselli, but was greatly influenced by the works of Leonardo da Vinci and Raphael. He was a friend of Savonarola, who prevailed on him to cease painting nude figures, and to destroy many of his sketches at the carnival bonfire. The seizure of his revered friend in the convent and his martyrdom was so heavy a blow to him, that he became a monk and for several years did not paint. He subsequently visited Rome, and again worked at his art with Alberti. He was distinguished for excellence in composition, colouring, and delicacy of execution, rivaling Raphael in some of his works. His "Last Judgment," in fresco, "Presentation in the Temple," "Madonna della Misericordia," "St Mark," and "St Sebastian," were among his greatest works. Died, 1517.

BACELLAR, ANTONIO BARBOSA, a Portuguese poet, historian, and civilian, who is chiefly remembered for a work in defence of the house of Braganza, which paved his way to fortune, and established him as a favourite at the court. Born at Lisbon, 1610; died, 1683.

BACH, JOHANN SEBASTIAN, one of the greatest musical composers, was born at Eisenach in Saxony in 1685. His family had been noted for musical genius for more than a century, and in him it reached its highest development. Early left fatherless, he earned his living for some time as a chorister at Lüneburg, became court organist at Weimar, master to Prince Leopold of Anhalt-Cöthen, and finally director of music at the school of St Thomas, Leipzig. The works of Sebastian Bach are thoroughly original, profoundly scientific, and most difficult of execution. There is a grandeur and power in them not to be appreciated, or even relished perhaps, except by the highly cultivated ear. "Fassionsmusik" is one of his sublimest productions. Bach was almost unrivalled as an organist. He was twice married and left a large family. Died, 1750.

BACHELIER, NICOLAS, a French sculptor, pupil of Michael Angelo. Several of his productions are in the cathedral of Toulouse, his native city. Died, after 1655.

BACHELIER, JEAN JACQUES, French painter, born in 1724, was director of the royal porcelain manufactory of Sèvres, and the discoverer of an encaustic composition for the preservation of marble statues. He established a school for gratuitously teaching the art of drawing. Died, 1805.

BACIOCCHI, MARIE ANNE ELISA BUONAPARTE, Madame, eldest sister of Napoleon I. was born at Ajaccio in 1777. She married

M. Baciocchi in 1797, and the next year settled at Paris, where she became the centre of a distinguished circle of literary men, artists, &c. In 1805 Napoleon gave her and her husband the principality of Piombino, and soon after that of Lucca. Three years afterwards she was charged with the government of Tuscany, as grand-duchess. After the fall of Napoleon she led a changeful life, and died at Bologna, in 1820.

BACKER, JACOB, a Dutch historical painter of great ability. Born at Antwerp, in 1530; died, 1560.

BACKER, JACOB, a portrait and historical painter. Born at Harlingen, 1609; died at Amsterdam, 1651.

BACKHUYSEN, RUDOLPH, or LUDOLPH, an eminent painter, whose sea-pieces are worthy of the highest praise. He studied nature attentively in all her forms, and gave to every subject such transparency and lustre, as placed him above all the artists of his time, except the younger Vanderveide. Indeed, it is said to have been his frequent custom, whenever he could procure resolute mariners, to go to sea in a storm, in order to store his mind with images of the angry elements, and to work incessantly on his return, while they were vividly impressed on his memory. Born at Embden, 1631; died, 1709.

BACLER D'ALBE, BARON AUBERT LOUIS, an eminent French military geographer and engineer; author of a "Chart of the Theatre of War in the first Campaigns of Buonaparte in Italy," &c. Born at St Pol, 1761; died at Paris, 1824.

BACON, ROBERT, an English friar; divinity lecturer at Oxford; author of "The Life of St Edmund, Archbishop of Canterbury," &c. Died, 1248.

BACON, ROGER, a celebrated English philosopher, was born near Ilchester, about 1214. After studying at Oxford he went to the university of Paris, where he graduated in divinity. On his return to England he entered the Franciscan order, and taught in the study of languages, and taught in the university. He enjoyed the friendship of Robert Grossetete, bishop of Lincoln, and soon acquired very great reputation for his scientific acquirements. He was bent on the discovery of truth, and was fearless in his inquiries and his teachings. Suspicion soon became persecution; the charge of magic was brought against him, and the superiors of his order prohibited his lectures as the publication of his opinions. About 1292 Bacon sent his "Opus Majus" with the "Opus Minus" and "Opus Tertium" to Pope Clement IV., who had desired to see his writings. The Pope died soon after. In 1278 Bacon was cited, it is said, to Paris by the general of his order, and being condemned was imprisoned. He did not regain his freedom till after the death of Pope Nicholas IV. In 1292, when he is said to have returned to Oxford and died the same year. But there is no contemporary evidence of this imprisonment, nor is it known how long he lived after 1292. Roger Bacon suggested the reformation of the calendar, imagined, though he does not appear to have constructed, a telescope; knew the composition of gunpowder, and gives an account of spectacles.

His principal work is the "Opus Majus," of which he wrote an abridgement, entitled "Opus Minus." The "Opus Tertium" was intended as a preamble to those two works. The three were completed within fifteen months. The "Opus Majus," for its wide views of the reform of philosophy, and the mass of solid knowledge it contains, may be considered, says Dr Whewell, "the *Encyclopaedia* and the *Novum Organum* of the 13th century." The "Opus Minus," "Opus Tertium," and "Compendium Philosophiae" of Roger Bacon were first printed in 1859, edited by Professor Brewer under the direction of the Master of the Rolls. Among his other printed works are "De Mirabili Potestate Artis et Naturae," "Perspectiva," "Speculum Mathematica," "Speculum Alchemicum," &c.

BACON, SIR NICOLAS, lord keeper of the great seal, was born in Kent in 1510. He studied at Cambridge and Paris, and was called to the bar. Henry VIII. gave him several lucrative offices, and after living in retirement during the reign of Queen Mary, he was appointed lord keeper for life by Queen Elizabeth in 1558. He was in disgrace at court for a short time, but regained the queen's favour, and was visited by her at Gorhambury. Bacon was the intimate friend of Cecil, Lord Burleigh, and took a leading part in the settlement of the difficult ecclesiastical affairs of the time. Died, 1579.

BACON, FRANCIS, BARON VERULAM, the great English philosopher, was born at London in 1561. He was the youngest son of Sir Nicolas Bacon, was educated at Cambridge, travelled in France, and was called to the bar at the age of 21. Though successful in his profession, his advancement was hindered by the enmity of the Cecil family. The earl of Essex was his warm friend and gave him a beautiful estate; but estrangement took place soon after, Bacon condemning his friend's course and appearing against him on his trial. Bacon entered parliament in 1593, was knighted in 1603, and two years later was named Solicitor-General. He had a formidable rival in Sir Edward Coke, but he continued to advance in reputation, and in 1613 became attorney-general and privy-councillor. The office of lord-keeper was given him in 1617, and soon afterwards he was made lord chancellor, Baron Verulam, and Viscount St Albans. But from this time dates the beginning of his miserable fall. Complaints were made of his venality as a judge, which on inquiry by a parliamentary committee were verified; he made full confession, was deprived, fined, and imprisoned during the king's pleasure. He was pardoned, but continued to live in retirement, devoting himself to his favourite studies. The great aim of this extraordinary man was to reform the method of philosophy; he recalls men from blindly following authority to the observation and examination of nature. His great works are the "*Novum Organum*" and the "*De Augmentis Scientiarum*." The former was projected in his youth, was prepared by a series of sketches, revised and rewritten again and again, and finally published in 1620. The latter appeared in 1603, and the English edition

"Opus Majus," of judgment, entitled *Opus Te. sum.* was the two works. It was written within fifteen years for its wide philosophy, and the text contains, as well as the *Encyclopaedia* of the 13th century, "Opus Terminologicum," "Opus Philosophicum" of 1359, edited by the direction of Among his other *Mirabili Potestate* "Succula Alchemicum,"

lord keeper of the seal in 1510. He died Paris, and was buried in 1518. He gave him and after living in the reign of Queen Mary, keeper for life by He was in disgrace but regained the favour visited by her at the intimate friend and took a leading part in the difficult ecclesiastical. Died, 1579.

BARON VERULAM, the first was born at London the youngest son of an educated at Cambridge, and was called

Through successful advancement was the Cecil family. He was a warm friend and supporter; but estranged, Bacon condemned appearing against the parliament interea parliament 1603, and two years later General. He had Edward Coke, but in reputation, and as general and privy lord-keeper was on afterwards he

Baron Verulam, but from this time his miserable fall. His venality as a parliamentary he made full confession, and imprisoned. He was paroled in retirement, favourite studies. An extraordinary man of philosophy; he showing authority in examination of nature the "Novum Organum" projected in his series of sketches, and again, and The latter an English edition

("Advancement of Learning") in 1605. The celebrated "Essays" were first published in 1607, but large additions were subsequently made. Among his other works are the "Wisdom of the Ancients," "History of Henry VII.," "Felicities of Queen Elizabeth," "Of the State of Europe," &c. Died, at Highgate, 1626. The last and best edition of Bacon's Works is by Messrs Ellis, Spedding, and Heath, in 7 vols. 8vo. Some additional volumes will contain his letters and life, with all his occasional works, edited by Mr Spedding.

BACON, ANTHONY, elder brother of the chancellor, a skilful politician, and a friend of the earl of Essex. As he spent the greater portion of his time abroad, and was much devoted to learned pursuits, he became personally acquainted with most of the foreign literati, and was also honoured with the friendship of Henry IV. of France.

BACON, SIR NATHANIEL, half brother of the chancellor. He possessed great ability as a landscape painter. Died, 1615.

BACON, JOHN, an eminent English sculptor, and the inventor of an improved method of copying the clay models in stone. His chief works are a bust of George III., in the hall of Christchurch, Oxford, Lord Chatham's monuments in Guildhall and Westminster Abbey, and those of Dr Johnson and John Howard in St Paul's. Born, 1740; died, 1799.

BACON, or BACONTHORPE, JOHN, called the resolute doctor, an English monk; author of a "Compendium of the Law of Christ," &c. Died, 1346.

BADALOCCHIO, SISTO, or SISTO ROSA, Italian painter and engraver, born at Parma, 1611. He was the pupil and friend of Annibale Caracci, and assisted Lanfranco in executing the etchings from the Bible of Raphael. He painted some fine frescoes in the Vatican Palace at Rome. Died, 1647.

BADENS, FRANS, portrait and historical painter, born at Antwerp, 1571; died, 1603.

BADIA, DOMINGO, a Spanish traveller, was born in 1766. Being well skilled in Arabic, he determined on travelling in the East; and having submitted to a well-known Mussulman rite, he was personally qualified for the task, and assumed the name of Ali Bey. Under this disguise he visited Tripoli, Egypt, Mecca, and Syria, undiscovered, and was everywhere received with favour, as a true believer. It is now known that he was employed as a political agent by the Prince of Peace, at the instigation of Buonaparte; and on his return to his native country he opposed the French cause there. After the battle of Victoria, he took refuge in France, and died in Syria, in 1818.

BAFFIN, WILLIAM, an English navigator of the 17th century, famous for his discoveries in the Arctic regions, was born in 1614. He visited West Greenland in 1612, and in 1615, and made a voyage to Spitzbergen in 1616. In 1616 he ascertained the existence of that vast inlet of the sea, since distinguished by the appellation of Baffin's Bay. He was killed at the siege of Omuuz,

BAGGENSEN, EMANUEL (JENS), Danish poet. He usually wrote in the German language; and his chief productions are a pastoral epic, entitled "Parthenais, oder die Alpenreise," and a mock epic, called "Adam and Eve," but his songs and short poems are very numerous and popular. Born, 1764; died, 1826.

BAGLIONE, GIOVANNI, an Italian painter of the 17th century, distinguished for his works in fresco; many of which adorn the walls and ceilings of the churches at Rome. He was head of the Academy of St Luke, at Rome, in 1618, and wrote the "Lives of the Painters, Sculptors, Architects," &c. of his own time. Born, 1573; died, after 1641.

BAGLIONI, GIOVANNI PAOLO, an Italian soldier of fortune in the 16th century, who made himself master of Perugia. He was put to death by Leo X., in 1520.

BAGLIVI, GIORGIO, an illustrious Italian physician, born at Ragusa, and elected professor of anatomy at Rome; was author of a valuable treatise, "De Fibra Motrice," and other medical works. Baglivi was an acute and careful observer, and an independent thinker, bold enough to differ even with Hippocrates himself. He became a fellow of the Royal Society of London. Born, 1687; died, 1706.

BAGOAS, a eunuch, at first the favourite, and afterwards the murderer of Artaxerxes Oehus, king of Persia. He was put to death by Darius Codomanus, B.C. 356.

BAGRATION, PRINCE PETER, Russian general and councillor, who especially distinguished himself in the campaigns in Italy under Suwarrow, was at the battles of Austerlitz, Eylau, and Friedland, and was mortally wounded at the battle of Moscow in 1812.

BAHRAM, or VARANES, a celebrated Persian general of the 6th century. He was descended from an ancient and princely family, distinguished himself under Chosroes the Great at the siege of Dara, and was made governor of Media. When the Turks invaded Persia, in the reign of Hormisdas, or Hormouz III., Bahram won a decisive victory over them with inferior forces. But his success, and popularity excited jealousy among the courtiers, the tyrant insulted him before his troops, and in 590 he revolted, deposed and imprisoned Hormouz, and seized the chief power. Chosroes, and the son of Hormaid Bahram was defeated, and by their raised to the throne. Bahram fled to the Turks, and is said to have died by poison.

BAIER, JOHANN JACOB, German physician, and director of the botanical garden at Altdorf; author of several works on medicine, natural history of fossils, &c. Born, 1677; died, 1735.

BAILEY, NATHAN, an English lexicographer, was a schoolmaster at Stepney. Besides several school books, he was the author of "Dictionarium Domesticum;" but his principal work was his *Etymological English Dictionary*, of which the second edition appeared in 1724, and which may be regarded as the basis of Dr Johnson's unrivalled work. Died, 1742.

BAILLIE, JOANNA, dramatist, the sister of Dr Matthew Baillie, and the niece of the celebrated anatomists, John and William

Hunter, was born at the Manse of Bothwell in 1762. Even in her earliest years her inventive faculties were strongly displayed; and as she grew up, she manifested a strong predilection for literary pursuits. In 1783 she came to London to reside with her brother, and prepared herself by hard study of the best writers for the career in which she was destined to reach such eminence. Her first dramatic efforts, entitled "Plays on the Passions," each passion being the subject of a tragedy and a comedy, were published in 1798. A second series was published in 1802, and a third in 1812. But during the interval, she gave to the world a volume of miscellaneous dramas, one of which, the "Family Legend," was brought out in 1809, at the Theatre Royal, Edinburgh, under the auspices of Sir Walter (then Mr) Scott, and played with great success. "De Montfort," one of her "Plays on the Passions," was brought out by John Kemble, in London, and had a run of eleven nights, but has not kept permanent possession of the stage. In 1830 she published three more volumes of plays, which, like her previous productions, are full of the true spirit of poetry, but are essentially undramatic. During the greater part of her life she lived at Hampstead with her sister Agnes—also a poetess, and though she seldom mingled in society, she was visited by men of genius from all parts of the world; and the readers of Loekhart's Life of Sir Walter Scott will remember that many of the great novelist's letters are addressed to Miss Baillie. Her works have been published in one large volume, with a memoir of her life. Died, 1851.

BAILLIE, ROBERT, a Scotch divine, born at Glasgow in 1599. He was one of the deputation sent to London to exhibit charges against Archbishop Laud; and also one of the commissioners sent from the General Assembly of Scotland to Charles II., at the Hague. His letters, and a journal of his transactions in England, were published in 1775. Died, 1662.

BAILLIE, MATTHEW, M.D., a celebrated anatomist and physician. He succeeded Dr Hunter as lecturer on anatomy, in conjunction with Mr Cruickshank, at St George's Hospital; he was also one of the physicians in ordinary to their Majesties George III. and IV., and was held in high esteem among his professional brethren. He was the author of several highly esteemed works, as well as of many important papers in the Philosophical Transactions, &c.; and he presented to the College of Physicians a valuable museum of anatomical specimens. Died, 1823.

BAILLY, JEAN SYLVAIN, a French astronomer, mayor of Paris at the commencement of the revolution, was born at Paris in 1736. He early applied himself to science, distinguished himself by his astronomical calculations and observations, and was admitted to the Academy of Sciences, the French Academy, and the Academy of Inscriptions. His peaceful and honoured career was rudely changed by the revolution. In 1789 he was chosen deputy for Paris to the States-General, was first president of the Assembly, administered the oath at the famous Session of the Tennis-Court, in June,

and was made soon after mayor of Paris. He lost his popularity from the day (17th July) that he ordered a turbulent assemblage in the Champ-de-Mars to disperse, and fired on them. In November he retired from his office and from Paris, devoting himself again to his studies. On the triumph of the Jacobins, in 1793, he was arrested at Melun and taken to Paris. He was examined as a witness on the trial of Marie Antoinette, and soon after, under circumstances of aggravated cruelty, was executed, 10th November, 1793. Bailly was author of a History of Astronomy, which had for a time a great reputation; and several other scientific works. He wrote also "Mémoires d'un témoin de la Révolution."

BAILLY, FRANCIS, famous in the annals of astronomical science, was the son of a banker at Newbury, and for many years well known on the Stock Exchange, in which busy arena he realized an ample fortune. The Astronomical Society was organized by him, and throughout life he was the most considerable contributor to its memoirs. Systematic order and steady perseverance were the secrets of his success. Died, Aug. 30, 1844, aged 70.

RAINBRIDGE, CHRISTOPHER. [RAMBRIDGE.]

RAINBRIDGE, Dr JOHN, an eminent physician and astronomer, born in 1582. He gained considerable reputation by his work entitled a "Description of the late Comet in 1628," and was appointed professor of astronomy at Oxford. Died, 1643.

BAINES, EDWARD, who has secured for himself an honourable place among the friends of civil and religious liberty in the 19th century, was born at Walton-le-Dale, in Lancashire, 1774. At the age of fourteen he was apprenticed to a printer at Preston; but before his term of apprenticeship expired he removed to Leeds, where he found employment on the Leeds Mercury, of which he subsequently became the proprietor. The zeal and ability with which for many years he conducted this paper marked him out as a fit representative of Leeds; and in 1833, on Mr Macaulay's resignation of his seat for the borough, he was elected, and held that position till the close of Lord Melbourne's administration in 1840, when his impaired health induced him to retire. Both in parliament and the press, Mr Baines never ceased to advocate the cause of freedom, good government, charity, and religion. Though decided in his opinions, he was most catholic in his disposition; and he was most ready to co-operate with men of all parties and sects for the objects of which he approved. Besides fulfilling the duties of a journalist, he found time to devote himself to literature; and his "History of the Reign of George III.," and "The County Palatine of Lancaster" are monuments of his patience and research. Died, 1848.

BAIRD, Sir DAVID, a distinguished English general, was of Scottish descent, and entered the army as an ensign in the 2nd foot in 1742. He served in the East Indies for many years; and among other brilliant achievements in which he was engaged, was the taking of Seringapatam, and the siege of Pondicherry. In 1801 he was sent, with a

1476. He was the friend of Albert Dürer, whom in some points he almost equalled. "The Crucifixion," at Freiburg, is one of his greatest works. He was living in 1534.

BALDWIN, archbishop of Canterbury in the 12th century, was a native of Exeter, and became abbot of the Clisterlan house at Ford in Devonshire. He held the see of Worcester four years, and in 1184 was appointed archbishop of Canterbury. He crowned Richard I., and accompanied him on the crusade, but died at Acre, in November, 1191. He left numerous writings, some of which were published in a collection of writers of his order in 1602.

BALDWIN I., first Latin emperor of the East, was born about 1170. He was son of Baldwin, Count of Hainault, and Margaret, Countess of Flanders, and succeeded the latter in 1194, the former in the following year. In 1200 he joined the crusade, went to Venice, took part in the siege of Zara, led the van in the attack on Constantinople for the restoration of the young Alexius, led the assault on the second siege, and was chosen and crowned emperor in May, 1204. But he was defeated and captured by Joannice, king of the Bulgarians, in 1205. Nothing is certainly known of his fate.

BALDWIN II., succeeded his brother Robert as emperor of the East in 1228. He was only 11 years old, and the government was in the hands of John of Brienne till his death in 1237, when Baldwin succeeded alone. He spent years in visiting Italy and France in hope of getting aid in his endeavour to save and strengthen the failing empire. On the taking of Constantinople in 1261, by Michael Palæologus, Baldwin escaped to Italy, where he died, 1273. He was the last of the Latin emperors of the East.

BALDWIN I., king of Jerusalem, was the younger brother of Godfrey of Bouillon, and having distinguished himself in the first crusade, was made Count of Edessa. Baldwin succeeded his brother as king of Jerusalem in 1100, reigned 18 years, and was constantly engaged in war, and obtained many victories over the Turks, Persians, and Saracens. He made himself master of the principal towns on the coast of Syria. Died, 1118.

BALDWIN II., king of Jerusalem, succeeded the above in 1118; Eustace, brother of Baldwin I., having renounced his claim to the throne. Baldwin II. was taken prisoner by the Saracens in 1124, and gave them the city of Tyro as his ransom. Died, 1131.

BALDWIN III., son of Fulk of Anjou, to whom Baldwin II. had resigned the kingdom of Jerusalem, succeeded to the throne, on his father's death, in 1142. He took part in the disastrous second crusade led by Louis VII. and the emperor Conrad. Died, 1163.

BALDWIN IV., the son of Amaury, succeeded his father on the throne of Jerusalem in 1174. He subsequently resigned in favour of his nephew. Died, 1185.

BALE, JOHN, a Carmelite of Norwich, who embraced the Protestant faith, and became a zealous writer against Popery. In the reign of Edward VI., he was made bishop

of Ossory, in Ireland, and endangered his life by his zealous efforts to reform his diocese. During the reign of Mary, he found safety in Switzerland, and on his return to England, at the accession of Elizabeth, he obtained a prebend of Canterbury. Of his numerous works, the most important is a Latin account of eminent British writers. Born, 1495; died, 1563.

BALECHOU, NICOLAS, French engraver, whose works are held in high estimation. The principal are the portrait of Augustus III. of Poland, after Itigaud, and three subjects after Joseph Vernet. Born at Arles, 1715; died, 1765.

BALEN, HENDRIK VAN, Dutch painter, was a native of Antwerp, and a pupil of Adam van Oort. He studied in Italy, and had Vandeyck and Snyders among his pupils. Among the best of his works are the "Judgment of Paris" and "St John in the Desert."—**JOHN VAN BALEN**, his son, was a distinguished historical and landscape painter. Born, 1660; died, 1632.

BALESTRA, ANTONIO, Veronese painter. He was a pupil of Carlo Maratti, and attained great eminence in his art. He was known also as an engraver. Born, 1666; died, 1740.

BALFOUR, SIR ANDREW, an eminent botanist and physician, and one to whom medical science in Scotland owes a lasting debt of gratitude for the botanic garden and museum at Edinburgh, which he took part in establishing. He was born in 1630, at Denmilno, Fife, and died in 1694.

BALFOUR, SIR JAMES, Lord President of the Court of Session in Scotland in the 16th century, was brought up to the church, advocated the reformation, and was exiled with Knox in 1547. On his return he became a Catholic and a persecutor of the reformers; shifted from side to side through the civil war, always contriving to be with the strongest; held the offices of judge of the commissaries court, privy councillor, and lord of session; was implicated in the murder of Darnley; became lord president of the court of session; and assisted in the pacification of Perth; and continued his treacherous, intriguing, and infamous practices to the end of his life. Died, 1583.

BALGUY, JOHN, an eminent divine of the Church of England, was born at Sheffield in 1686, and in 1727 became a prebendary of Salisbury. He engaged deeply in the Bangorian controversy; and among his works may be noticed "An Essay on Redemption," a "Letter to a Deist on the Beauty and Excellence of Moral Virtue," &c. Died, 1748.

BALGUY, THOMAS, son of the above, prebendary and archdeacon of Winchester, author of "Divine Benevolence, asserted and vindicated," a sermon on church government, &c. Born, 1716; died, 1795.

BALJOL, Sir JOHN DE, a native of Durham, who, on the marriage of the daughter of Henry III. to Alexander III. of Scotland, in 1251, was made one of the guardians of the royal pair. He founded Baljol College, Oxford; and having sided with Henry III. against his revolted barons, the latter seized upon his lands. Died, 1269.

[BAL]

A New Universal Biography.

[BAL]

BALLOL, JOHN DE, son of the preceding, laid claim to the crown of Scotland on the death of queen Margaret in 1290. His claim was disputed by several competitors, one of whom was the famous Robert Bruce. But Edward I., to whom the matter was referred, decided in favour of Balliol, who immediately did homage for his kingdom to Edward. Balliol, however, irritated by the proofs of mastery assumed over him, made an alliance with the French king, and renounced homage to Edward. War followed, and the Scots being defeated in a battle near Dunbar, Balliol was sent, with his son, to the tower of London. The intercession of the pope having procured his release, he retired to France, where he died in 1314.

BALLOL, EDWARD, son of the preceding, was imprisoned with his father in the tower of London in 1290, and was permitted to retire to France with him. In 1332 he joined with some English confederates, and invaded Scotland; defeated the Scots, and himself crowned king of Scotland at Perth in September. Before the end of the year he was defeated, and driven from his kingdom. By the intervention of Edward III., and the victory of Halidon-Hill, he was restored, but in 1334 he hopelessly defended his countrymen by giving up the north of Scotland to the English. He was long maintained on his throne by the frequent interference of Edward. In 1356 he renounced his title and throne for an annuity, and retired to England. Died, 1363.

BALLANTYNE, JAMES, a printer of considerable note in Edinburgh, and at whose press the whole of the works of Sir Walter Scott were printed, was a native of Kelso. Here he first opened an office for the removal of "Edinburgh," of which he was the editor. Engaged in various important works, the principal of which were those of the great novelist; and many years he also conducted the "Edinburgh Weekly Journal." He survived his friend and patron but a few months, dying January, 1833.

BALLANTYNE, JOHN, brother of the preceding, acted during the early career of the mysterious "author of Waverley" as his assistant, and managed all the business of communication of his works to the public. He is also remembered by his contemporaries as "a fellow of infinite humour," whose anecdotes were as inexhaustible as the mode of telling them was unrivalled. Died, 1821; aged 45.

BALLIN, CLAUDE, a skillful French goldsmith. He executed some very fine works in antique vases, &c., for Louis XIV. and Cardinal Richelieu, and was made director of the mint for casts and medals. Born, 1615; died, 1678.

BALMEZ, JAMES LUCIAN, a Spanish ecclesiastic, whose political, theological, and philosophic writings have acquired for him a high reputation both at home and abroad. Born at Vich, in Catalonia, in 1810. In his earliest years he was destined for the priesthood, and having in his 16th year entered the university of Cervera, he soon attracted notice by his amiable demeanour, and fertility of his mind, and the universality

of his acquisitions. Quitting the university in 1833, laden with honours and matured in learning, he retired to his native town, and in 1837 was there nominated to the chair of mathematics, which he filled with equal zeal and ability. In 1840 he published a *brochure* on the property of the clergy, which made a great sensation at Madrid; and from this time forward his labours in behalf of the cause to which he had devoted himself were indefatigable. He published papers on the condition of Spain, wrote in periodicals, conducted a review at Barcelona, and finally edited at Madrid the ablest journal in Spain, entitled "El Pensamiento de la Nacion," wherein his object was to restore the Roman Catholic Church to her former dignity and influence; to reconcile and unite all the friends of monarchy, whether belonging to the Carlist or Christina parties; and to found the institutions of the country on an enlarged and permanent basis. But valuable to his country as were all these and other emanations from his pen, they are far eclipsed by his "Protestantism and Catholicism compared in their Effects on the Civilization of Europe," which has been translated into French, German, and English, and may be safely pronounced to be one of the most elaborate works of modern theological literature. Died at Vich, 1848.

BALNAVIS, HENRY, secretary of state under Mary, queen of Scotland, was a native of Fifeshire. He became a lord of session in 1538, and a member of the Scottish parliament of state, but was soon deprived. He was a zealous promoter of the reformation, and took part in several important negotiations with the English government. He was one of the prisoners taken in the Castle of St Andrews and exiled to France, in 1547, afterwards engaged in obtaining the establishment of the reformed faith, in revising the Book of Discipline, and other affairs of church and state. Died probably before 1580.

BALSHAM, or BELESALE, HUGH DE, bishop of Ely, and founder of Peterhouse College at Cambridge. Died, 1288.

BALTIMORE, LORD. [CALVERT.]
BALUE, JEAN, a native of France, made a cardinal by Pope Paul II., and imprisoned for 11 years in an iron cage by Louis XI. for having engaged in treasonable correspondence with the Duke of Burgundy. Died, 1491.

BALUZE, ÉTIENNE, French historian and miscellaneous writer; born 1631. He was librarian to M. de Colbert for more than 30 years, and was appointed Professor of Canon Law at the College Royal in 1670. Having offended Louis XIV. by a passage in his History of the House of Auvergne; he was deprived of his post and exiled. His chief works are "Regum Francorum Capitularia," "Conciliorum nova Collectio," and "Vies des Papes d'Avignon." He died 1718.
BALZAC, JEAN LOUIS GUEZ DE, a French miscellaneous writer of great reputation, which he chiefly owed to the elegance of his style; he was esteemed the reformer of the French language in his own day, and wrote

a great number of works, most of which are now neglected. The most esteemed are his "Familiar Letters," "Le Prince," "Le Socrate Chrétien," and "Aristippe." Born, 1594; died, 1655.

BALZAC, HONORÉ DE, one of the most distinguished as well as prolific novel writers of modern times, was born at Tours, 1799. Having completed his studies at Vendôme, he published, between 1821 and 1829, twenty or thirty volumes under various pseudonyms, with very equivocal success; but after this trying apprenticeship, he put forth all his powers under his own name, with what result those who have read "La Peau de Chagrin," "Les Chouans," "La Physiologie de Mariage," "Le Père Goriot," "La Femme de Trente Ans," &c., can best testify. After that period his productions succeeded one another with wonderful rapidity; and his literary strength grew with his years, for his "Médecin de Campagne," and his "Parens Pauvres," his last work, bear the impress of genius in every page. In addition to his romances, Balzac wrote some plays, and for some time edited and contributed to the *Revue Parisienne*; but it is only his romances that exhibit unquestionable evidence of his great genius. His design was to make all his productions form one grand work, under the title of the "Comédie Humaine," the whole being a minute dissection of the different classes of society; and for this task he was eminently qualified, possessing, as he did, the secret of probing the human heart to its profoundest depths, and of laying bare with a masterly hand all its mysteries and all its passions. After the revolution of 1848, Balzac was engaged in visiting the battle-fields of Germany and Russia, and in collecting materials for a series of volumes, to be entitled "Scènes de la Vie Militaire." Next to his celebrity as an author, the most remarkable feature in his career was the deep passion which he formed for a Russian princess, who finally compensated him for long years of untiring devotion by the gift of her hand in 1848. Died, Aug. 19, 1850.

BAMBAIA, IL. [BUSTI, AGOSTINO.]

BAMBRIDGE, CHRISTOPHER, made archbishop of York in 1508; was sent ambassador from Henry VIII. to Pope Julius II., who made him a cardinal. Died of poison administered by his servant, 1514.

BANCROFT, RICHARD, archbishop of Canterbury, was a native of Lancashire. He was born in 1544, educated at Cambridge, and after holding various preferments in the church, was named bishop of London in 1597. He had early shown himself a determined enemy of the Puritans, and this he remained throughout his life. He took part, with much arrogance and passion, in the celebrated conference at Hampton Court, and in the following year was raised to the primacy of England. He was charged with the supervision of the new translation of the Bible. Died in 1610.

BANCROFT, JOHN, nephew of the above, bishop of Oxford, and builder of the palace of Cuddesden for the bishops of that see. Died, 1640.

BANDELLI, MATTEO, a Dominican monk of Milan. He wrote tales in the manner of

Boccaccio, and proceeding to France, obtained the bishopric of Agen. Died, 1561.

BANDINELLI, BACCIO, a Florentine sculptor. He was a pupil of Michelangelo and the rival and enemy of Michael Angelo and Cellini. Among his numerous works at Florence, Rome, and other Italian cities, were the colossal group of "Hercules and Cacus," some fine bas-reliefs in the cathedral of Florence, and statues of Leo X. and Clement VII. His copy of the Laocoon is highly esteemed. Born, 1487; died, 1569.

BANKS, Sir JOSEPH, naturalist and traveller, was born at London, in 1743. His passion for botany and natural history showed itself very early, and after leaving Oxford university he went, in 1766, to Newfoundland. He accompanied Captain Cook on his first voyage, as naturalist, in conjunction with his friend Dr Solander. In 1772, with the same friend, he visited Iceland. He was chosen President of the Royal Society in 1777, of which he had been a fellow above ten years. Honours fell thick upon him; he was made a baronet, Knight of the Bath, and privy councillor. He was a trustee of the British Museum, and a member of the French Institute, and was an active promoter of the interests of science. He formed a very large and valuable library of works on Natural History, of which a catalogue was published in 5 vols. 8vo. Died at London, 1820.

BANKS, THOMAS, one of the most eminent English sculptors, was born at London in 1735. He studied at the Royal Academy, obtained the gold prize, and in 1772 was sent to study at Rome. He afterwards went to St Petersburg, and was employed by the Empress Catherine, but he soon returned to England. Among his finest works are the bas-relief of "Caractacus before Claudius," executed at Rome, the "Mourning Achilles," "Psyche," the monument to Miss Boothby at Ashbourne, and "Thetis with the Nymphs consoling Achilles." Died, 1805.

BANNIER, JOHN, a Swedish general. He served under Gustavus Adolphus; and at the death of that prince became commander-in-chief. Born, 1601; died, 1641.

BANNISTER, JOHN, an admirable comic actor, the son of Charles Bannister, well known as a singer and a wit, was born in London, in 1760. Having been favourably noticed by Garrick, he made his debut at Drury Lane Theatre, when twelve years of age; he then quitted the boards for a time, but obtained a permanent engagement in 1779. At first he aspired to tragedy, and gave it a decided preference; but his talents so clearly lay in the opposite direction, that on the death of Edwin he at once supplied his place, giving proofs of first-rate powers, and establishing himself as a public favourite. To name all the parts in which he excelled his contemporaries, would occupy too much of our space; but we have a vivid recollection of him in Sylvester Daggerwood, Lingo, Trudge, the Three Singies, Bobadil, Dr Pangloss, Job Thornberry, Colonel Feignwell, Waiter in "The Children in the Wood," and many others. Being afflicted with the gout, he retired from the stage in 1815, having had the good

fortune to earn a competent pension, and the prudence to Nov. 8, 1836, aged 76, resp. by all who knew him. much for Bannister, physically; his face, figure, excellent; his spirits ex. open manly countenance w. to the heart of "Gentleman."

BARBAULD, ANNA LETITIA, daughter of the Rev. John Aikin, the best and most popular female poet of her age; authoress of Hymns, and

fortune to earn a competence by his profession, and the prudence to keep it. He died Nov. 3, 1836, aged 78, respected and beloved by all who knew him. Nature had done much for Bannister, physically as well as mentally: his face, figure, and voice were excellent; his spirits exuberant; and an open manly countenance was a faithful index to the heart of "Gentleman Jack."

BAPTISTE, JEAN. [MONNOYER.]

BAPTISTE, JOHN CASPAR, born at Antwerp, was the pupil of Boschart; he assisted Sir Peter Lely and Kneller in painting the draperies of their portraits. Died, 1691.

BARATIER, JEAN PHILIPPE, celebrated for his precocity, was born at Schwabach in 1721. He spoke Latin, French, and German at four years of age; could translate Greek into Latin at six; then studied Hebrew, and at nine compiled a Dictionary of the most difficult words in that language; made a French translation of the work of Benjamin of Tudela at eleven; applied himself to theology and ecclesiastical history; was presented to the king of Prussia and admitted to the Academy of Sciences, Berlin, at fourteen. He afterwards studied law, and undertook several literary works, and died in 1740, in his 20th year.

BARBAROSSA. [FREDERICK I., Emperor.]

BARBAROSSA, HORUSH, corsair and sovereign of Algiers, was a native of Mitylene. He was born about 1475, became a Mohammedan, distinguished himself first in the Turkish naval service, and then as a corsair. His success attracted many adventurers to his service, and he acquired immense riches. After numerous exploits and a few failures he was invited, in 1516, to assist Selim, sheik of Algiers, against the Spaniards; but he usurped the chief authority, and put Selim to death. He made conquests and extended his dominion over neighboring principalities, till the Spaniards took Oran, and an expedition was sent by Charles under the marquis de Gomarez, governor of Oran, who twice defeated Barbarossa. The second battle the great corsair fell.

BARBAROSSA, HADHER, surnamed SAIR-EDDIN, sovereign of Algiers, was brother of the preceding, and succeeded him in 1518. To secure himself against a threatened revolt he ceded the sovereignty of the Porte, and accepted the title of vice-

He captured the fort built by the Spaniards near Algiers, and had a mole constructed by Christian slaves to form a port. Selman II. named him admiral of all his fleets, and opposed him to the Genoese admiral Doria. Barbarossa then ravaged the coasts of Italy, and returning took Biserta and Tunis. In Tunis he was besieged by Charles V., and had to abandon the city. When he attacked the coast towns of Italy, he took Fondi and Castel-Nuovo. He conquered Yemen, again appeared in the Mediterranean, aided the French against Charles VIII. and died in 1546.

BARBAULD, ANNA LETITIA, was the daughter of the Rev. John Aikin, and one of the best and most popular female writers of the age; authoress of Hymns, and Early

Lessons for Children. She also edited some standard novels, &c.; and appended to them some clever notices, biographical and critical. Born, 1743; died, 1825.

BARBAZAN, ARNAULD GUILHEM, was a brave and noble French general, whose valour, probity, and disinterestedness during a long and successful career under the reigns of Charles VI. and VII. gained for him the glorious appellation of "the Irreproachable Knight." Died, 1432.

BARBEYRAC, CHARLES, a distinguished French physician, whom Locke compared to our own Sydenham; author of "Questions Medicæ Duodecim," &c. Born, 1629; died, 1699.

BARBEYRAC, JEAN, nephew of the above; professor of law at Berne, and subsequently at Lausanne and Groningen. To add the performance of his duty as professor, he added most laborious exertions as an author. He translated the most valuable works of Grotius, Puffendorf, and other able civilians into French, and wrote the "Histoire des Anciens Traités," and the "Traité du Jeu," one of his earliest works. Born, 1674; died, 1744.

BARBIERI, GIOVANNI FRANCESCO. [See GUERCINO.]

BARBOU, the name of a family of French printers in the 16th, 17th, and 18th centuries.

JEAN JOSEPH was the first who settled at Paris; died, 1752.—**JOSEPH,** his brother, was printer there in 1723; died, 1737.—**JOSEPH GERARD** was nephew of these two brothers, and bought the business of the widow of Joseph in 1750. He distinguished himself by the publication of an elegant series of the classes, which are named after him.

BARBOUR, JOHN, Scotch poet and divine, chaplain to David Bruce, and archdeacon of Aberdeen in 1356. His only known work is the poem on the Life and Achievements of Robert Bruce, which is of much historical value, and has been frequently republished. Died, probably about 1395.

BARCLAY, ALEXANDER, a writer of the 16th century. It is not known whether he was a native of England or Scotland. He wrote "The Mirror of Good Manners," "The Ship of Fools," the latter partly a translation of Sebastian Brandt's "Navis Stultifera," and other works, chiefly translations. Died, 1532.

BARCLAY, ROBERT, the apologist of Quakerism, was born in Morayshire in 1648. Sent to study at Paris, he embraced the Roman Catholic faith, but after his return to Scotland joined the Society of Friends. Continuing his studies, he soon found occasion to apply his faculties and acquirements to the defence of his sect and the vindication of their doctrine. His works are, "A Catechism and Confession of Faith;" "Theses Theologicæ," the basis and outline of his most important work, the well-known "Apology for the true Christian Divinity;" and a "Treatise on Christian Discipline." The "Apology" was written in Latin; and by its intellectual character, logical form, and lucid style, attracted great attention. Its propositions excited much controversy, and most of all its assertion of the necessity

of immediate revelation. Barclay was received as a friend both by Charles II. and James II. He was named governor of East Jersey, but sent a substitute. Died, 1690.

BARCLAY, WILLIAM, a native of Scotland, who emigrated to France, and became professor of law at Angers, where he was considered one of the most eminent civilians of his time. He was the author of various treatises on the rights of popes and kings, Died, 1605.

BARCLAY, JOHN, son of the preceding and an eminent writer, was born in France in 1582; but came to England at the age of nineteen. He was educated by the Jesuits, and remained a Roman Catholic through life. In 1615 he went to Rome, and there spent the rest of his days. His principal work is the "Argenis," a Latin romance of great liveliness and elegance. It attained widespread popularity, and was translated into the principal languages of Europe. Several English translations have appeared. Among his other writings are a satire entitled "Euphormio," a narrative of Gunpowder Plot, and an edition of his father's book "De Potestate Papæ." Died at Rome, 1621.

BARCLAY, JOHN, an eccentric divine of the Church of Scotland, was born at Turriff, in the county of Aberdeen, in 1645. He completed his education at King's College, Aberdeen, and was appointed minister of the parish of Cruden, in Aberdeenshire, in 1675. He was the author of a rare and curious work in verse, now very scarce, called "A Description of the Roman Catholic Church." Died at Cruden, in 1710.

BARCLAY, JOHN, leader of the sect of Bereans, was a native of Perthshire, was born in 1734, became a popular preacher, but being suspected of unsoundness in doctrine, had to leave the Church of Scotland, and take an independent course. He preached for a time in London, and wrote several books. Died, 1798.

BARCLAY DE TOLLY, a Russian general, who, in the German and Polish campaigns of 1806 and 1807, bore a distinguished share, and was made a field-marshal. He succeeded Kutusof as commander-in-chief, headed the Russians at the battle of Leipzig, and led them into France in 1815. He was at one time minister of war, and ultimately was honoured with the title of prince. Died, 1818.

BARCOCHAR, or BARCOCHERAS, a Jewish impostor, who, under the pretence of being the Messiah, obtained many followers, overrunning Judea, and putting many Romans to the sword; but he was at length defeated and slain by Julius Severus in 134.

BARERE, BERTRAND, one of the most notorious actors in the first French revolution, was born in 1755 at Tarbes in Gaseony, where his father possessed the small estate of Vicuzac. He was educated for the bar at Toulouse, practised as an advocate with considerable success, and besides occupying himself with literary pursuits of a trivial character, wrote a dissertation which procured him a seat in the Toulouse Academy of Sciences. In 1785 he married a young lady of good fortune. Three years later he paid

his first visit to Paris; and the states-general having just then been summoned, he went back to his own province, and was there elected one of the representatives of the third estate. Among the crowd of legislators which at this conjuncture poured from all the provinces of France into Paris, Barère made no contemptible figure. His opinions, though popular, were not extreme; and his learning, his manners, his conversation, and his powers of eloquence were all calculated to gain him favour and esteem. But as the monarchical party became weaker and weaker, he gradually estranged himself more and more from it, and drew closer and closer to the Republicans. On the termination of the labours of the national assembly, he became a member of the high court of appeal; and when, in 1792, the legislative assembly invited the nation to elect an extraordinary convention, Barère was chosen one of its members by his own department. He voted for the death of the king, "sans appel et sans sursis," in words that have been often repeated, "L'arbre de la liberté ne croit qu'arrosé par le sang des tyrans." After the fall of the monarchy, he acted with the Girondists, to whom he made himself useful by the ease and fluency with which he could draw up reports. But ready to side with the strongest on all occasions, he soon made common cause with the Mountain, whose bloodthirsty designs he remorselessly carried out; and he bore a large share in the infamous schemes subsequently planned during the "Reign of Terror," earning for the levity with which he discharged his disgusting office the nicknames of the Witting of Terror and the Anacreon of the Guillotine. He fawned on Robespierre up to the 8th of Thermidor, and on the 9th he moved that Robespierre should be beheaded without a trial. On the fall of the convention he was sent a prisoner to the Isle of Oléron; but he made his escape to Bordeaux, where he remained four years in obscurity; and on the establishment of Napoleon's government he enlisted in its service, and for some years officiated in the double capacity of a hireling writer and a spy. On the fall of Napoleon, in 1814, he again became a royalist. During the hundred days he was chosen by his native district a member of the chamber of representatives; but on the final return of the Bourbons, in 1815, he was compelled to retire into Belgium, where he resided till 1830. The revolution which then called Louis Philippe to the throne enabled him to return to France; but he was reduced to extreme indigence, and a small pension from the king and the government alone saved him from the necessity of begging his bread. Died, 1841. [Those who wish to see an instance of the literary tomahawk skillfully applied will find it in an article devoted to Barère's life and character in the Edinburgh Review, vol. lxxix.]

BARRETTI, JOSEPH, lexicographer and miscellaneous writer, was a native of Turin. He resided many years in this country, and wrote the English language with ease and purity. Dr. Johnson procured him the situation of Italian teacher in Mr Thrale's family.

He became secretary to the king, and retained that office till his death. His works are very numerous, and his style is able in his Italian and English. His other publications were "L'Art de la Guerre," an account of his travels in Europe; an "Account of the Customs of Italy," &c. Born, 1780.

BARHAM, RICHARD, known by his literary name of John Buncle (goldsbury), was a native of the county of which city he received his education, and completed it at Brasenose College, Oxford. Although he adopted the law for a profession, and performed the duties of a sacred calling with strict propriety, he by nature a humourist, and was desirous to restrain the flow of wit and humour, which his mind was surcharged with. He was a minor canon of St Paul's, and was afterwards attached to the canonry of St Dunstons, Sydney Smith, with whom he was connected by the most cordial friendship. In many respects he much resembled the Rev. Mr. Church preferment was refused him by the Rev. Mr. Augustine and St Faith, and he in author he contributed much to the public mind, many years, to several popular magazines, the Edinburgh Review, Blackwood's Magazine, and the Literary Gazette. He was a member, but his most popular works were given to Bentley's Miscellany, and the title of 'The Ingoldsby Legends,' collected and published in 2 volumes, a popular novel, 'My Cousin Remond,' which was published in 3 vols. Of his works it is not too much to say that they are a gem of originality of design and diction, and a gem of illustration and musical verse, and were first published in the English language in 1845, and 56, June 17, 1845.

BARKER, EDMUND HENRY, an eminent classical scholar, and one of the most distinguished and serious of modern writers. He was a strong supporter of the Classical Education, and a British Critic, and Monthly Reviewer. His articles, chiefly on recollections of antiquities, were published in the "Delicæ," with which he availed of his more serious labours. He was the author of "Thesaurus Lingue Græcæ," a performance. Besides his works, he wrote Prolegomena to the study of Greek, and other works. Died, 1788; died, 1839.

BARKER, GEORGE, F.R.S., a gentleman of Birmingham, whose memory is entitled to respect and gratitude, for the success of his excellent institutions which he founded in his native town, and from his own personal exertions in the promotion of the arts, manufactures, and sciences. "He was mainly instrumental in the acts for making what was then called 'that gigantic absurdity the Birmingham Railroad,' and its confederates, Liverpool, Manchester, and Leeds, &c. He was the bosom friend of the late Mr. Boulton, and their confidential agent in the vast projects which have benefited the world in honour and wealth to this country." He died Dec. 1869.

He became secretary to the Royal Academy, and retained that office till his death. His works are very numerous, but the most valuable is his Italian and English Dictionary. His other publications were "Lettere famigliari," an account of his travels in the south of Europe; an "Account of the Manners and Customs of Italy," &c. Born, 1716; died, 1789.

BARHAM, RICHARD HARRIS (better known by his literary name of Thomas Ingoldsby), was a native of Canterbury, in which city he received his early education, and completed it at Brazenose College, Oxford. Although he adopted the clerical profession, and performed the duties of his sacred calling with strict propriety, he was by nature a humourist, and attempted not to restrain the flow of wit and fancy with which his mind was surcharged. He was a minor canon of St Paul's, and occupied the house attached to the canonry of the Rev. Sydney Smith, with whom he was on terms of the most cordial friendship, and whom in many respects he much resembled. His other church preferment was the rectory of St Augustine and St Faith, London. "As an author he contributed much, and during many years, to several popular periodicals, the Edinburgh Review, Blackwood's Magazine, and the Literary Gazette among the number, but his most popular series of papers were given to Bentley's Miscellany, under the title of 'The Ingoldsby Legends,' since collected and published in 2 vols. 8vo. His popular novel, 'My Cousin Nicholas,' was published in 3 vols. Of his poetical pieces it is not too much to say, that for originality of design and diction, for quaint illustration and musical verse, they are not surpassed in the English language." Died, aged 56, June 17, 1845.

BARKER, EDMUND HENRY, an eminent medical scholar, and one of the most industrious of modern writers. He was a leading supporter of the Classical Journal, British Critic, and Monthly Magazine; and his articles, chiefly on recondite points of philology and antiquities, were his mere *delicæ*, with which he amused the intervals of his more serious labour of editing Stephens's "Thesaurus Lingue Græcæ," a gigantic performance. Besides his greater work, he wrote Prolegomena to Homer, and Lemprière, and other school books. Born, 1788; died, 1839.

BARKER, GEORGE, F. R. S., of Birmingham, a gentleman of the legal profession, whose memory is entitled to respect and gratitude, for the success of many excellent institutions which do honour to his native town, and from his zeal in the promotion of the arts, manufactures, and sciences. "He was mainly instrumental in carrying acts for making what was then called 'that gigantic absurdity, the Birmingham Railroad,' and its confederate line, Liverpool, Manchester, and Birmingham. He was the bosom friend of Watt Boulton, and their confidential adviser in the vast projects which have been so productive of honour and wealth to themselves and to this country." He died Dec. 6, 1845, aged 69.

BARKER, MATTHEW HENRY (better known to the public under his assumed name of The Old Sailor), was the author of several naval novels and sketches; among which are "Tough Yarns," "Jem Hunt," "The Victory," "Land and Sea Tales," &c., besides "The Life of Nelson," and numberless communications in prose and verse, to various periodicals. He went to sea at the age of 16, but never arrived at higher promotion than the command of a hired armed schooner; and finding himself unemployed at the end of the war, he tried his hand at authorship. His delineation of nautical scenes is allowed to be replete with humour and characteristic truth. Died, June, 1846, aged 56.

BARKER, ROBERT, known as inventor of the panorama, was born at Kells, in Ireland, 1740. While viewing the scenery round Edinburgh, whither he had removed as a portrait painter, he was struck with the idea of representing similar views in a circular painting, in which he ultimately succeeded, and thereby realized a considerable fortune. Died, 1806.

BARLOW, FRANCIS, an English artist; an excellent painter of animals. Died, 1702.

BARLOW, JOEL, American diplomatist, political and miscellaneous writer, was a native of Connecticut, and was brought up to the law. He gained some reputation by a poem entitled, "The Vision of Columbus," and came to England in 1788 as agent of the Ohio Company. In the following year he was one of the deputies sent by the Constitutional Society to address the French Convention. He was also, in 1811, appointed ambassador to Napoleon; and being invited to a conference with the emperor at Wilna, he proceeded thither, but the privations he was compelled to endure on his journey, and the fatigue of travelling night and day, caused his death. Barlow published several political treatises and pamphlets, which had much temporary popularity, and won him the eulogy of Fox in the House of Commons. Born, 1755; died, 1812.

BARLOW, PETER, Professor of Mathematics at the Royal Military Academy, Woolwich, for 40 years, was born at Norwich in 1776. He was a fellow of the Royal and Astronomical Societies, and a member of several government commissions. Among his works are "New Mathematical Tables," "New Mathematical and Philosophical Dictionary," "Essay on Magnetic Attractions," &c. He retired from his professorship in 1847. Died, 1862.

BARLOW, THOMAS, bishop of Lincoln in the reign of Charles II., James II., and William III. He was a man of the most versatile and accommodating principles. Under the first-named king he wrote against popery; under the second he wrote in favour of the royal power to dispense with the penal laws against it; and under the third he was among the most active in punishing non-juring clergymen. He wrote "Cases of Conscience," &c. Born, 1607; died, 1691.

BARLOWE, WILLIAM, son of William Barlowe, bishop of Bath and Wells in the reign of Queen Mary, and of Chichester in the reign of Elizabeth, was himself archdeacon of Salisbury; he was well-skilled in

natural philosophy, and was the first English writer on the properties of the loadstone. Died, 1625.

BARNARD, Sir JOHN, lord mayor of London, and one of its representatives in parliament for 40 years. He was an able speaker, and a remarkably conscientious and religious man; and so greatly was he respected by his fellow-citizens, that they erected a statue to his memory in the Royal Exchange. Born at Reading, 1685; died, 1764.

BARNAVE, ANTOINE PIERRE JOSEPH, an eloquent and popular member of the French national assembly. He was born at Grenoble in 1761, was trained for the bar, and was deputy to the States General in 1789. He distinguished himself as the opponent of the privileged classes, and sometimes rivalled Mirabeau in eloquence. He was elected president of the Constituent Assembly in 1790, and when the royal family, after their flight from Paris, were arrested at Varennes, Barnave was one of the three sent to accompany them back to Paris. His manly delicacy on this occasion won him the liking and the confidence of the queen, and led to a correspondence between them. Barnave from that time was a defender of the monarchy, and lost his popularity. Though he retired to private life, he was arrested by the Robespierre party in 1792, and guillotined in 1794.

BARNES, JOSHUA, a learned divine, educated at Christ's Hospital, London, and Emanuel College, Cambridge; author of the "Life of Edward III.," and a poem "On the History of Esther," and editor of the works of Euripides, Anacreon, and Homer. Born, 1654; died, 1712.

BARNES, THOMAS, editor of "The Times," which owed much of its celebrity and influence to the political leaders that came from his pen, as well as to his rare skill and discrimination in its general management. Notwithstanding the share he took in the strife of politics, he retained the friendship of all who had once intimately known him, how much soever they might differ on questions of public interest. Mr Barnes was educated at Christ's Hospital and Pembroke College, Cambridge, where he took his B. A. and M. A. degrees. Died, 1841, aged 55.

BARNEVELDT, JOHAN VAN OLDEN, grand pensionary of Holland, was born in 1549. He was of an ancient and illustrious family, studied law at the Hague, and at several foreign universities, and commenced practice as an advocate at the Hague in 1570. He served as a volunteer at the siege of Haerlem, but did not continue in the army. He was chosen pensionary of Rotterdam in 1576. The Spanish arms being everywhere victorious in the United Provinces, an embassy was sent, with Barneveldt at its head, to offer the sovereignty of the Netherlands to Queen Elizabeth. She declined it, but agreed to send auxiliary forces, and gave the command to the Earl of Leicester. Barneveldt was again ambassador to England in 1590, and to France in 1598. He presided at the congress at the Hague in 1607, obtained from the Spaniards the recognition of the independence of Holland, and after a severe

contest with the Stadtholder Maurice and his party, concluded a truce with Spain. Barneveldt courageously opposed the ambition of Maurice, who aimed at the supreme power: he also supported Arminius against Gomar and the Calvinists, the party to which Maurice belonged; and in February, 1618, he was arrested, with his friends Grotius and Hoogerbeets. He was tried by a special commission, and condemned to death. The sentence, both illegal and unjust, was sanctioned by the synod of Dort, and the venerable statesman and patriot, 71 years of age, was executed in May, 1619. The noble and pathetic letter of farewell to his wife is still preserved.

BARNEY, JOSHUA, a distinguished naval commander, was born at Baltimore, in 1756. When a boy he made several voyages to Europe; and in 1776, when not 17, he was presented with a lieutenant's commission on account of his bravery. During the struggle for American independence Barney took several vessels, and performed numerous acts of gallantry; and after various adventures arrived at Philadelphia in 1782, when he again entered on active duty, and continued a successful career till the end of the war. In 1795 he received the commission of captain in the French service, and commanded a French squadron, but resigned his command in 1800, and returned to America. In 1813 he was appointed to command the flotilla for defence of the Chesapeake. During the summer of 1814 he kept up an active warfare with the British; but he was made prisoner. Died, at Pittsburg, 1818.

BAROCCIO, FEDERIGO, an Italian painter, and an imitator of the style of Correggio. Born at Urbino, 1528; died, 1612.

BARONIUS, CESAR, Cardinal and Librarian of the Vatican, was born at Sora, in Naples, in 1538. He joined the congregation of the Oratory, and succeeded St Philip de Neri as superior. He was made cardinal in 1596, and soon after librarian of the Vatican. His great work is the "Annales Ecclesiastice," in 12 vols. folio: a work of immense research, which occupied him for thirty years, and has passed through many editions. Died at Rome, 1607.

BAROZZI, JACOPO. [VIGNOLA.]

BARRAS, PAUL FRANÇOIS JEAN NICOLAS, Count of, one of the first members of the French Directory, was born in Provence, in 1755. He entered the army, and served for a time in India; was at Paris in 1789; witnessed the fall of the Bastille; joined the Jacobin club, and in 1792 was chosen deputy to the National Convention, of which he afterwards became president. He took part in the siege of Toulon, and in the subsequent proscription and massacre there. He had a leading part in the revolution of the 9th Thermidor (fall of Robespierre, July, 1794); displayed great energy when the Convention was attacked by the people of the faubourgs; was named general-in-chief to oppose the sections on the 13th Vendémiaire (5 October, 1795), and employed Napoleon to command the artillery; and was named one of the five directors. His influence was very great, and he retained his post till the fall of the Directory, and the assumption of supreme

power by Napoleon as First Consul, in November, 1799. He then retired to private life, lived at Brussels till the charge of conspiracy, he was executed in Paris.

BARRET, GEORGE, an English painter, was born in Dublin, but passed the greater part of his life in England, and was one of the Royal Academy, 1784.

BARRETT, WILLIAM, a painter and engraver; author of a "History of the French Revolution." Died, 1789.

BARRINGTON, DAINES, an English naturalist, and antiquary, and son of the first Viscount Barrington, was born at London in 1717. He was called to the bar, but he was appointed to Greenwich Hospital. He was President of the Society of Antiquaries, and published "Observations on the Progress of the Reform of the Criminal Law, and the Codification of the Criminal Process of Execution." His works consist of essays on Natural History, and on the antiquarian subjects contributed to the "Philosophical Transactions." He was a correspondent of Gilbert White of Selborne.

BARRINGTON, SHUTE, an English statesman, was the sixth son of the first Viscount Barrington, and born in 1734. He was a controversial disputant between the Calvinists and Romanists; but he was a liberal benefactor of the French, and a refugee in England during the Revolution. Died, 1826.

BARKOS, JOAS DE, one of the most distinguished Portuguese historians, was born in 1710. He was made page to the king, and settled on the coast of Brazil, where he was appointed general for the colony. His work is entitled "Asia Portuguesa," and treats the discoveries and the progress of the Portuguese in the Indies. It was originally published, and is highly valued for its matter and its style.

BARROW, ISAAC, theologian and mathematician, was born at London in 1630. He was educated at Cambridge, and became Fellow of Trinity College. He spent several years in foreign travel, and returned Professor of Greek at Cambridge, and soon after Gresham Professor of Divinity. He was subsequently Professor and Master of Trinity College, and distinguished by his great courage, energy, and integrity. He was interested in the cause of the dissenters, and his repeated relinquishment of his office for conscience' sake. His works are an edition of Euclid, "Lectures on the Elements of Geometry," "Lectures on the Elements of Algebra," "Addresses," and a collection of "Sermons." His original thoughts, were carefully collected, and were afterwards rewritten, and are still esteemed. Died, 1677.

BARROW, Sir JOHN, Bart., an English statesman, was secretary to the Admiralty, and a voluminous writer of travels, biographies, &c.; was born in Lancashire, June 17, 1674. In early age he displayed a d

power by Napoleon as First Consul in November, 1799. He then retired from public life, lived at Brussels till 1813, when, on a charge of conspiracy, he was exiled to Rome. In 1815 he settled at Paris, and died, 1829.

BARRET, GEORGE, landscape painter, was born in Dublin, but passed most of his life in England, and was one of the founders of the Royal Academy. Born, 1730; died, 1784.

BARRETT, WILLIAM, an English topographer; author of a "History of Bristol." Died, 1788.

BARRINGTON, DAINES, an eminent jurist, naturalist, and antiquary, was the fourth son of the first Viscount Barrington, and was born at London in 1727. After being called to the bar he was appointed Secretary to Greenwich Hospital. He became a fellow of the Society of Antiquaries, and was made President of the Royal Society. In his important "Observations on the Statutes" he projected the reform of the statute law by repeal and codification, which is still only in process of execution. His "Miscellanies" consist of essays on Natural History and antiquarian subjects contributed to periodical publications. He was a correspondent of Gilbert White of Selborne. Died, 1800.

BARRINGTON, SHUTE, bishop of Durham, was the sixth son of the first Viscount Barrington, and born in 1734. He engaged in some controversial disputes both with the Calvinists and Romanists; but though hostile to the doctrines of the latter, he was a liberal benefactor of the French clergy who took refuge in England during the Revolution. Died, 1826.

BARROS, JOAS DE, one of the best Portuguese historians, was born about 1495. He was made page to the king, governor of settlement on the coast of Guiana, and sent-general for the colonies. His great work is entitled "Asla Portuguesa," and narrates the discoveries and conquests of the Portuguese in the Indies. It has been frequently republished, and is highly esteemed, both for its matter and its style. Died, 1570.

BARROW, ISAAC, theologian and mathematician, was born at London in 1630. He was educated at Cambridge, and became a fellow of Trinity College. After several years spent in foreign travel, he was appointed Professor of Greek at Cambridge, in 1661, and soon after Gresham Professor of Geometry. He was subsequently Lucasian Professor and Master of Trinity. He was a man of great courage, energy, industry, and interest; the latter quality shown in his repeated relinquishment of lucrative offices for conscience' sake. His works consist of an edition of Euclid, "Lectures on Arithmetica," "Lectures on Geometria," "Lectures on Algebra," and a collection of his Sermons, Addresses, &c. His sermons are full of original thought, were carefully written and rewritten, and are still esteemed and read. Died, 1677.

BARROW, Sir JOHN, Bart., F.R.S., for many years secretary to the Admiralty, a great traveller, and a voluminous writer of letters, biographies, &c.; was born near Stratton, in Lancashire, June 19th, 1764. In an early age he displayed a decided in-

clination for mathematical pursuits, and after passing some years as superintending clerk of an iron foundry in Liverpool, he became mathematical teacher at an academy in Greenwich, whence he was appointed, through the interest of Sir George Staunton, secretary to the embassy to China, under Lord Macartney, in 1792. In this capacity his talents and acquirements were duly appreciated; and when Lord Macartney was, in 1797, appointed to the government of the Cape of Good Hope, he secured Mr Barrow's services as private secretary, and subsequently appointed him auditor-general of public accounts, an office which he held till the Cape was evacuated by the English in 1803. In 1804 he was appointed, by Lord Melville, secretary to the Admiralty; and with the exception of a few months, during the Whig administration, in 1806-7, he continued to fill this office down to his retirement, in 1845. He was created a baronet during the short administration of Sir Robert Peel, in 1835. Besides contributing numerous articles on miscellaneous subjects to the Quarterly Review and the Encyclopaedia Britannica, he published the Lives of Lord Macartney, Lord Anson, Lord Howe, and Peter the Great; Travels in China, Voyage to Cochin China, the Mutiny in China, Voyage to the North Pole, &c. The general aim of his writings was to convey information, to promote the arts and sciences, and to stimulate research and inquiry; and he had the great privilege to live to see the most beneficial effects produced by his honest and faithful labours. We should not omit to state that Sir John was the constant and successful advocate of the Admiralty of those voyages of discovery which have enlarged the bounds of science, and conferred so much honour on the British name and nation. Died, Nov. 23, 1848.

BARRY, GIRALDUS, see GIRALDUS CAMBRENSIS.

BARRY, JAMES, painter, was born at Cork, in 1741. He obtained the patronage of Edmund Burke, and was sent to study at Rome. He became Professor of Painting at the Royal Academy, but in consequence of disputes with the members he was expelled, after holding the professorship 15 years. His principal work is the series of pictures painted for the Society of Arts, to illustrate the progress of civilization. They represent Orpheus subduing the Thracians; a Greek harvest-home; Victors at Olympia; Triumph of the Thames; the Society distributing their prizes; and Final Retribution. Died, in poverty and distress, 1806.

BARRY, MARIE JEANNE, COUNTESS DU, mistress of Louis XV. of France, was born in 1748. She was a native of Vaucouleurs, and went young to Paris. She entered on a dissipated course, and was presented to the king in 1769, who had her married for form's sake to Count Du Barry. She became the centre of opposing political intrigues, and her favour was courted by all. The duke de Choiseul was dismissed from office because he dared reproach the king for his choice. She used the public treasury as her own. After the death of Louis she was placed in a convent, and being allowed to leave it, she

lived a decent life. She was condemned on ridiculous charges by the revolutionary tribunal and executed, in 1793.

BARRY, MARTIN, an English physiologist, was born in 1802. He graduated in medicine at the University of Edinburgh, but did not practise as a physician. He particularly distinguished himself by his investigations into animal development, and the fruits of his researches appeared in the "Philosophical Transactions." He was a fellow of the Royal Societies of London and Edinburgh, and received the royal medal of the former for his important discoveries. Died, 1855.

BARRY, SIR CHARLES, R.A., was born in May, 1795, and at an early age was articled to an architectural firm at Lambeth. He afterwards travelled in Italy, Greece, and other countries, studying carefully the architecture of each, and returned to England with an evident bias in favour of Italian, in which style he built St Peter's Church at Brighton, the first work which made him generally known. In his subsequent works he employed sometimes Grecian and Italian forms, but gradually acquired a preference for Gothic, which led him to express his strong dissatisfaction with his early work at Brighton. Among the numerous buildings of which he was the architect, the new Palace of Westminster is that by which his name will be most widely known. When the old Houses of Parliament were burned down in 1834, Mr Barry's design was selected, and the result is that magnificent pile which forms the chief adornment of the banks of the Thames. This building has excited much controversy and much hostile criticism. But whatever differences of opinion may exist as to its want of originality, or monotony of design, the great beauty of the work is unquestionable; and in any judgment formed of it careful account should be taken of the many difficulties with which the architect had to contend. When it is remembered that the design was made almost at the commencement of the revival of our national Gothic architecture, the impression will be one of admiration for the architectural genius which conceived such a work, and the conviction will remain that by it Sir Charles Barry has done incalculable service to the progress of English art and the maintenance of its true principles.

BARRY, SPRANGER, a celebrated actor; and, for a time, the rival of Garrick, who, however, in the higher walks of the drama, greatly excelled him. Born, 1719; died, 1777.

BART, JEAN, a distinguished French seaman, born at Dunkirk, in 1651. He served in the Dutch navy under De Ruyter, and at 20 years of age entered the French service. His daring, his intelligence, and his numerous successes obtained him great reputation. He was presented to Louis XIV. in 1691. His most brilliant achievement was the defeat of the Dutch Admiral Vries, and capture of a large fleet of vessels laden with corn, in 1694, for which letters of nobility were granted to him. Died at Dunkirk, in 1702.

BARTHELEMY, JEAN JACQUES, French historian and antiquary, was born in Provence, 1716. He was educated by the Je-

suits, became keeper of the king's cabinet of medals, which he enriched by collections made in Italy; obtained at Rome the friendship of many learned and distinguished men, among others the duke of Choiseul, who, when first minister, gave him several lucrative offices; and was admitted to the French Academy, and the Academy of Inscriptions. At the Revolution he lost his offices and was imprisoned, but was released through Danton's influence. He wrote several learned archaeological works, but won his greatest reputation by his "Voyage du Jeune Anacharsis en Grèce," which was long used as an authority on the history, manners, and customs of the Greeks. Died at Paris, 1795.

BARTHEZ, PAUL JOSEPH, an eminent French physician, was born at Montpellier, in 1734, where he founded a medical school, which acquired great reputation throughout Europe. For many years he practised in Paris, and was consulted upon the most important cases: he also wrote in the *Journal des Savans*, the *Encyclopédie*, &c.; and was a member of almost every learned society. During the Revolution he suffered greatly in his fortune; but Napoleon, who knew his great merits, restored him, in his old age, to wealth and honours. Died, 1805.

BARTHOLDY, JACOB SOLOMON, a Prussian diplomatist, born a Jew, but after travelling in Greece he abjured Judaism, and became a Protestant. In 1607 he served against the French as an officer in the landwehr of Vienna, and wrote a tract called "The War of the Tyrol," which produced a great sensation. Died, 1826.

BARTHOLINE, THOMAS, a Danish anatomist, was born at Copenhagen, in 1619. He studied at the principal universities in Europe, and was appointed Professor of Anatomy at Copenhagen, in 1648. He made many discoveries, among them that of the lymphatic vessels; his claim to which, however, is disputed. His works are very numerous. Among them are his "Anatomia," "Historiarum anatomicarum et medicarum centuriæ VI." &c. Died, 1680.

BARTOLI, DANIELE, a learned Italian Jesuit, was born at Ferrara in 1608. He distinguished himself as a preacher in the chief cities of Italy, and was author of numerous works, the most important of which is the "istoria della Compagnia di Gesù." Among the others are "Vita di S. Ignazio," "L'Uomo di Lettere difeso ed emendato," and works on natural philosophy and grammar. Died, rector of the Roman College, 1685.

BARTOLI, PIETRO SANTO, an Italian painter and engraver, was born in 1635. He was a native of Perugia, studied under Nicolas Poussin, and engraved a great number of ancient works of art, chiefly those remaining in Rome. His works are mostly etchings. Died, 1700.

BARTOLOMEO, FRA. [BACCIO DELLA PORTA.]

BARTOLOZZI, FRANCISCO, an engraver of first-rate merit, was born at Florence in 1725 or 1730; came to England in 1764; was admitted a member of the Royal Academy in 1769; went to Lisbon, at the invitation of the prince-regent of Portugal, in 1802; and

there died in 1815. Among his productions of his gravestones after Annibale Caracci after Michael Angelo, the "after Carlo Dolci, the "after Copley, &c.

BARTON, BERNARD, was born near London, came a clerk in Alexander's bridge, where he served his death. His first work published in 1811, and numerous others, most homely subjects, but all by the purest feeling and accuracy. But it was not a poet that Bernard Barton held in remembrance. His labour and vast stores of him a welcome guest of the native sincerity which was apparent in every line, was enhanced by a benign charity, in entire accordance with his faith. Died, 1811.

BARTON, ELIZABETH (née of Kent), was a poor girl, who first attracted public notice in the year 1525. She lived in great poverty, and was reduced by long illness to a state of great nervous debility, which she never recovered from, and which she never seemed beyond the reach of cure, and which old Archdeacon, whom the puzzled parish sought for guidance, pronounced "dead." The tale spread rapidly, and the poor girl, who had been kept up her common sense, became a tool in the hands of the monks. They made her accounts of the saints, and the controversy then going on between the monks and the reformers, and the miracles wrought at sacred places, part in a performance of the Chapel of the parish, which was published as a new work, and entered a convent at a young age, and her station still grew, and her best rank had recourse to her counsels and protection against the divorce given, then under discussion, by Cranmer and Wolsey, even the pope. Step by step she became involved in the king's affairs, and she, a large and powerful woman, rejoiced at the message she part in an insurrection, and these were Fisher, Bishop, and Sir Thomas More. She was her monkish pomp and conviction in the Star Chamber, and her public confessions of the Cross, and a bill of attainder, passed, Elizabeth, the five monks were executed in April, 1534. In a few days, spoken to the people by the king, confessed the justice of the king, and how the "learned" p

there died in 1815. Among the most esteemed productions of his graver are the "Clytie" after Annibale Caracci, the "Prometheus" after Michael Angelo, the "Virgin and Child" after Carlo Dolci, the "Death of Chatham" after Copley, &c.

BARTON, BERNARD, the "Quaker poet," was born near London, 1784. In 1810 he became a clerk in Alexanders' bank, at Woodbridge, where he served almost to the day of his death. His first volume of poetry was published in 1811, and this was succeeded by numerous others, most of them devoted to homely subjects, but all of them animated by the purest feeling and the most glowing fancy. But it was not only for his merits as a poet that Bernard Barton deserves to be held in remembrance. His genial good humour and vast stores of information made him a welcome guest wherever he appeared; and the native sincerity of his character, which was apparent in every act of his life, was enhanced by a benignity, liberality, and charity, in entire accordance with the precepts of his faith. Died, Feb. 19, 1849.

BARTON, ELIZABETH, "the Maid (or nun) of Kent," was a poor country servant-girl, who first attracted public attention in the year 1525. She lived at Aldington, in Kent. Reduced by long illness to a state of great nervous debility, she became subject to trances, in which she uttered things that seemed beyond the reach of her own knowledge, and which old Archbishop Warham, whom the puzzled parish priest referred for guidance, pronounced to be "come of God." The tale spread and wonder grew rapidly, and the poor girl, though the trances ceased, kept up her communications, and soon became a tool in the hands of knavish monks. They made her acquainted with the legends of the saints, and the elements of controversy then going on between the church and the reformers, and the stories of miracles wrought at sacred shrines. She took part in a performance got up in the parish Chapel of the parish, which was at the time published as a new miracle, and soon entered a convent at Canterbury. Her reputation still grew, and people of the highest rank had recourse to her, and paid for her counsels and prayers. She was induced to pronounce an audacious sentence against the divorce of Catharine of Aragon, then under discussion; perplexing every Cranmer and Wolsey, and threatening even the pope. Step by step she went till she became involved in the guilt of treason. A large and powerful party existed, rejoiced at the message and were ready to take part in an insurrection for the queen. These were Fisher, bishop of Roches-ter, and Sir Thomas More. At last the poor and her monkish prompters were tried and convicted in the Star Chamber. They made public confessions of their guilt at the Cross, and a bill of attainder having passed, Elizabeth, the parish priest, and five monks were executed at Tyburn, on April, 1534. In a few pathetic sentences, spoken to the people before her death, she confessed the justice of her sentence, and how the "learned" priests had im-

posed upon her ignorance, and prayed God for mercy on herself and them.

BARTRAM, JOHN, an eminent American botanist, was born in Chester county, Pennsylvania, in 1701. He formed a botanic garden near Philadelphia, said to have been the first establishment of the kind in America; and so intimate an acquaintance had he with the vegetable kingdom, that Linnaeus pronounced him "the greatest natural botanist in the world." Died, 1777.

BARTRAM, WILLIAM, a son of the preceding, was also a distinguished naturalist. At the request of Dr Fothergill, he travelled through the Floridas, Carolina, and Georgia, for the purposes of making researches in natural history, and transmitted to his employer in London the valuable collections and drawings which he had made. His "American Ornithology" may be considered the precursor of Wilson's invaluable work. Died, 1823.

BASAITI, MARCO, an early Venetian painter, who flourished in the 15th and 16th centuries. He was a good colourist, and in some respects was the rival of Giovanni Bellini. His "Christ in the Garden," and "Calling of St Peter and St Andrew," are his finest pictures; both of them now in the Academy of Fine Arts, Venice. There are two small works of Basaiti in the National Gallery.

BASEVI, GEORGE, a distinguished architect, was born, 1795. Among the edifices built or restored by him are the churches in the early English style at Twickenham and Brompton, the Norman church at Hove, near Brighton, and St Mary's Hall, at Brighton, in the Elizabethan style. Belgrave Square, in the metropolis, was erected from his designs; and he was joint architect with Mr Smirke of the Conservative Club, in St James's Street. His best work, however, is the Fitzwilliam Museum at Cambridge. Having gone to inspect the West Bell Tower of Ely Cathedral, then under repair, he accidentally fell through an aperture, and was killed on the spot, Oct. 16, 1845.

BASIL, ST, surnamed the Great, bishop of Caesarea, in Cappadocia, where he was born, about 326. He was studying at Athens in 350, and there became the friend of Gregory, afterwards bishop of Nazianzus. After extensive travels Basil retired to the desert of Pontus, and there founded an order of monks. He succeeded Eusebius in the see of Caesarea, in 370, and by his opposition to Arian doctrines greatly offended the Emperor Valens. The attempts which Basil made to reunite the two hostile churches of the East and West were unsuccessful. Died, 380.

BASILIIUS I., the Macedonian, emperor of the East, was of low origin, but got employment at the court of the Emperor Michael III., became his chamberlain, murdered his rival, Bardas, was associated in the empire, then murdered Michael, and succeeded him in 867. Though he had risen by a series of crimes he governed wisely, made many reforms in the administration and in the army, and compiled a body of laws, called the *Basilica*, which, augmented by his son and successor, Leo the Philosopher, were in force till the fall of the empire. Basiliius

deprived Photius of the see of Constantinople, and restored Ignatius; but on the death of the latter he recalled Photius. He carried on war successfully with the Saracens. Died, 886.

BASILIIUS II., emperor of the East; was son of Romanus II., and with his brother, Constantine, was first associated in the empire by John Zimisces, and succeeded him in 976. His long reign was a series of wars with his rivals, Bardas Sclerus and Phocas, with the Saracens, and with the Bulgarians. In 1014, after a great victory over the latter, having 15,000 prisoners, he had ninety-nine out of every hundred deprived of their eyes, and thus sent home. This horrible cruelty caused the death of Samuel, king of the Bulgarians. The war ended in 1019, by the complete conquest of Bulgaria. Died, 1025.

BASKERVILLE, JOHN, a celebrated letter-founder and printer; and one to whom the typographical art is much indebted. By his improvement in the form of the types, and in the various processes of printing, he raised the art to a higher state than it had before reached, but his labours appear to have been but faintly appreciated. It has been remarked, too, that his books are more elegantly than correctly printed. Baskerville's portrait was painted by Gainsborough. He was buried by his own desire in a tomb in his own garden. Born at Wolverley, in Worcestershire, in 1706; died, 1775.

BASNAGE, BENJAMIN, a French Protestant divine; pastor of the reformed church at Carentan more than 50 years. He was a zealous supporter of Protestantism, and took part in several important synods. He wrote a "Traité de l'Eglise." Born, 1680; died, 1652.

BASNAGE, ANTOINE, son of the above; imprisoned at Havre de Grace on account of his religion. Born, 1610; died, 1691.

BASNAGE, DE BEAUVAL, JACQUES, grandson of Benjamin, was a distinguished theologian and historian. He was born at Rouen in 1653, studied first at Saumur under Tannegui Le Fevre, then at Geneva and Sedan, and became pastor at Rouen in 1676. On the revocation of the Edict of Nantes he took refuge in Holland, became pastor at Rotterdam, and afterwards at the Hague, enjoyed the friendship of the grand pensionary Heinsius, and was employed in several political negotiations. The most esteemed of his numerous works are, "La Communion Sainte," "Histoire de la Religion des Eglises réformées," "Histoire de l'Eglise depuis Jésus Christ jusqu'à présent," "Histoire des Juifs depuis Jésus Christ jusqu'à présent," and "Antiquités Judaïques" Died, 1723.

BASSANO, JACOPO, or JACOPO DA PONTE, an Italian painter, was born at Bassano in 1510. He was first taught by his father, and then went to Venice and studied the great works of Parmigiano, Titian, and Bonifazio. He spent the rest of his life at his native place. His first productions had much grandeur of conception and excellence of colour, but he afterwards painted in a coarser and lower style. He treated even sacred subjects with a vulgar familiarity.

He worked rapidly, and his pictures are very numerous. There are three of them in the National Gallery. Bassano had four sons, who were also painters. Died, 1592.

BASSANO, HUGUES BERNARD MARET, Duke of, a celebrated French political writer and statesman, was the son of a physician at Dijon. On the first outburst of the French Revolution he enthusiastically embraced its principles, published the *Bulletin de l'Assemblée*, and soon after was appointed editor of the *Moniteur*. He became acquainted with Buonaparte, and was made by him *chef de division* in the foreign office. In 1792 he was sent to England, ostensibly to secure the neutrality of the British government, but in reality to hoodwink that government until the moment should arrive at which it could be securely, as well as efficiently, assailed. But the English minister of that day was too clear-sighted even for French diplomacy. Both Maret and the French ambassador, Chauvlin, were peremptorily ordered out of England; and the former, soon after his return home, was sent as ambassador to Naples, but was captured on his way thither by the Austrians, and detained as a prisoner until 1795. Maret took a bold and active part in the intrigues which were set on foot for the overthrow of the directory and the introduction of the consulate; and when the establishment of the latter crowned the success of those intrigues, he was made secretary to the council of state. Subsequently he was for some time private secretary to Buonaparte, to whose clemency, it is said, not a few of his articles in the *Moniteur* were actually written. In 1811 he was made *Duc de Bassano* and minister of foreign affairs; and in 1812 he conducted and signed the treaties between France, Austria, and Prussia, preparatory to the fatal expedition to Russia. When the emperor was sent to Elba, in 1814, the Duc de Bassano retired from public life, but immediately after the return of the emperor, he joined him, and was very near being taken prisoner at Waterloo. On the utter ruin of Napoleon, the duke was banished from France, but at the revolution of July, 1830, he was recalled, and restored to all his honours. In 1838 he was made minister of the Interior, and president of the council, but the ministry, of which he formed a part, survived only three days. Born, 1763; died, 1839.

BASSI, LAURA MARIA CATARINA, a learned Italian lady, whose singular accomplishments procured her the professor's chair at Bologna, and the title of doctor of pallophony. Born, 1711; died, 1773.

BASSOMPIERRE, FRANÇOIS DE, marshal of France, distinguished both as a soldier and a statesman, and remarkable for his personal attractions and his numerous gallantries, who, after being patronized by Henry IV. and Louis XIII., became an object of suspicion to Cardinal Richelieu, then first minister and master of France, and on account of his connection with the house of Lorraine, and various intrigues against the government, was imprisoned in the Bastille, 1631. He was not liberated till the death of Richelieu in 1643. He wrote

his own memoirs and embassies. Born, 1379;

BASTIAT, M. FRÉDÉRIC, a European reputation political economy, was born 1803. Without being a truther, he possessed the pouncing with clearness grounds and the effects of laws already developed philosophy. The work known in England as "Economicques," which was English by Mr Porter Trade. M. Bastiat was national assembly. His character as an able, upright servant of his constituent and did his utmost to see countrymen that new a philosophy of trade of effects in this country. The "Harmonies Economiques" publication. Died at

BASTWICK, JOHN, physician, was born in 1711. He studied at Cambridge, Europe, and settled as a physician in Chester. In 1637 he was chosen Chamber for his country, "Elenchus Papiami, Satany;" and was, like Prynne, his fellow-prisoners, sentenced to be set in the pillory, but off, his cheeks and forehead, and imprisoned for life. He died in the House of Commons, and kept there till the dissolution of Parliament. He was at the time of his death in residence. **BATE, GEORGE**, physician, was the first members of the Royal Society, and the author of a Latin work on the smallpox, and some medical works; died, 1669.

BATES, WILLIAM, a nonconformist; author of "Lives of the Apostles;" &c. Born, 1625; died, 1700.

BATH, WILLIAM PULTENEY, an English statesman.

BATHURST, (STEPHEN B.) an English statesman, was the father of the measures of Sir Robert Walpole, the intimate friend of Sir Robert, Addison, and the other great ministers of his time. Born, 1684; died, 1744.

BATHURST, HENRY, Earl of Bathurst, was made lord chancellor of Great Britain; author of the "Theory of Money;" Born, 1714; died, 1794.

BATHURST, HENRY, bishop of Bathurst, was born at Brackley, in Northamptonshire, 1744; and educated at Winchester College, Oxford. He was secretary of Witchingham, in 1780; subsequently became dean of Exeter, and died in 1805.

In the House of Lords, he was a strenuous supporter of the rights of the people. He died, April 5, 1837. — His son, Dr HENRY BATHURST, was born at Norwich, and rector of St. Andrew's, Norfolk, and of Holles

his own memoirs and an account of his embassies. Born, 1379; died, 1646.

BASTIAT, M. FRÉDÉRIC, who has gained a European reputation by his writings on political economy, was born at Paris in 1803. Without being a discoverer of new truths, he possessed the rare faculty of expounding with clearness and vigour the grounds and the effects of complex natural laws already developed by the processes of philosophy. The work by which he is best known in England is the "Sophismes Economiques," which was translated into English by Mr Porter of the Board of Trade. M. Bastiat was a member of the national assembly. He bore the highest character as an able, upright, and zealous servant of his constituents and his country; and did his utmost to spread among his countrymen that new and more liberal philosophy of trade of which he saw the effects in this country. His chief work is the "Harmonies Economiques," a posthumous publication. Died at Rome, 1850.

BASTWICK, JOHN, physician and political writer, was born in Essex about 1593. He studied at Cambridge, travelled over Europe, and settled as a physician at Colchester. In 1637 he was condemned by the Star Chamber for his books against prebendary, "Elenchus Papiasii," and "A New Treatise of the Rights of the People," and was, like Fynde and Burton his fellow-prisoners, sentenced to a heavy fine, to be set in the pillory, have his ears cut off, his cheeks and forehead branded, and be imprisoned for life. He was sent to the Tower, and kept there till released by the Long Parliament. He was living in 1648, at the time of his death is not known.

BATE, GEORGE, physician to Charles I., Oliver Cromwell, and Charles II., and one of the first members of the Royal Society. He was the author of a Latin history of the civil wars, and some medical works. Born, 1613; died, 1669.

BATES, WILLIAM, a nonconformist divine; author of "Lives of Learned and Pious Men," &c. Born, 1625; died, 1699.

BATH, WILLIAM PULTENEY, Earl of ULSTENEY.

BATHORI. [STEPHEN BATHORI].

BATHURST, ALLEN, Earl, a zealous opponent of the measures of Sir Robert Walpole, the intimate friend of Bolingbroke, Swift, Addison, and the other eminent writers of his time. Born, 1684; died, 1775.

BATHURST, HENRY, Earl, son of the above, and made lord chancellor of England; author of the "Theory of Evidence," &c. Born, 1714; died, 1794.

BATHURST, HENRY, bishop of Norwich, born at Brackley, in Northamptonshire, 1744; and educated at Winchester, and Balliol College, Oxford. He was presented to the rectory of Witchingham, in Norfolk, in 1763; subsequently became dean of Durham; and in 1805, was consecrated bishop of Norwich. In the House of Lords, Dr Bathurst was a strenuous supporter of the Catholic cause. He died, April 5, 1837.—The bishop's son, Dr **HENRY BATHURST**, archdeacon of Norwich, and rector of North Walsham, Norfolk, and of Holfesley, Suffolk,

was the author of "Memoirs" of his right reverend father; a work overflowing with spirit and expressions of disappointment, that one so faithful to his old friends, the Whigs, should have never been preferred to a richer diocese. Died, Sept. 1844.

BATHURST, RALPH, dean of Wells; author of some elegant Latin poems, and one of the founders of the Royal Society. Born, 1620; died, 1704.

BATONI, POMPEO GIROLAMO, an eminent Italian painter, esteemed as the restorer of the Roman school. One of his most admired works is the "Fall of Simon Magus," at Rome. Born at Lucca, 1708; died at Rome, 1787.

BATOU KHAN, grandson of Zenghis Khan, and his successor in the northern part of his vast empire. He died, after a long reign and numerous conquests, in 1255.

BATTHYANI, Count LOUIS, a scion of one of the noblest and most ancient Hungarian families, was born in 1809. For many years he was the leader of the Liberal Opposition in the upper house of the Hungarian parliament; and had long been distinguished for his devotion to the cause of Hungary, which he longed to see reinstated in its ancient administrative independence. Summoned in March, 1848, by the emperor-king Ferdinand, to form the first independent and responsible cabinet of Hungary, he strictly adhered, while in office, to the constitution of the country; repeatedly repairing to the emperor-king's court at Innspruck, to negotiate between the sovereign and the people, and labouring to heal the ruptures that daily threatened to plunge the nation into civil war. Animated by the same views, he left Pesth for Vienna, in September of the same year; but when he saw that all his efforts were likely to be fruitless, he resigned his office, and retired to his estates in Eisenberg. On the invasion of Hungary by Jellaich, the ban of Croatia, Batthyani entered the ranks of the National Guard; but a fall from his horse compelled him to give up all thought of aiding the cause of Hungary in the field. In December he returned to Pesth, and took part in the proceedings of the parliament, labouring as before, despite of calumny and intrigue, to negotiate between the king and the country, and to impress all parties with his own moderate and practicable views. Meanwhile the revolutionary party in the Hungarian parliament having proposed to transfer the seat of government from Pesth to Debreezin, Batthyani strenuously opposed this measure on the ground of its illegality; and all that he could effect was, that a deputation, of which he formed one, should be sent to Prince Windisehgrätz, once more to attempt a compromise between the king and the people. But the deputation failed in its object. This was Batthyani's last public act. On the 8th of January, he was arrested in the drawing-room of his sister-in-law, at Laybach, and Pesth, and, after nine months' imprisonment, was tried by court-martial, declared guilty of high-treason, and sentenced to die on the gallows, Oct. 6, 1849. He heard the sentence with tranquillity and composure. Having taken leave of his wife, he

de, named, the "*Chevalier sans peur et sans reproche*," was born at the Chateau of Bayard, near Grenoble, 1476. He was the descendant of a line of distinguished soldiers, and was early devoted to arms. At first page to the duke of Savoy, he passed into the service of Charles VIII. of France, and followed him in his invasion of Naples, and followed him in his invasion of Naples, and following a brilliant part in the battle of Fornova. He followed Louis XII. in his conquest of the Milanese, was captured by Sforza, and given up by him without ransom. One of Bayard's most celebrated actions was his defence, single-handed, of the bridge over the Garigliano against a large body of Spaniards. In the war following the unrighteous League of Cambray, Bayard served again, and by a daring rapid movement decided the victory of Agnadello. He was severely wounded at the attack of Brescia, and being carefully nursed by a lady and her two daughters, he in return protected them from harm to life or honour. Bayard distinguished himself at the "Battle of the Spurs," and finding defeat inevitable, he took prisoner an English knight, and then surrendered himself prisoner to him. The emperor and Henry VIII. received him with the highest honour, and liberated both knights. On the accession of Francis I. the war in Italy was renewed, and at the great battle of Marignano Bayard surpassed himself, decided the victory, and had the honour of knighting the sovereign on the field. The successful defence of Mezières against Charles V. was his next achievement. Two years later, 1544, he served under Admiral Bonnivet in Italy, against the Imperialists under the constable de Bourbon, and at the passage of the Sesia received his mortal wound. He refused to be carried off the field, saying he would not then for the first time turn his back on the enemy. Set at the foot of a tree, still urges on his comrades, kisses the point of his sword, and confesses himself to his squire. The Constable coming up was struck almost to the death, and Bayard, in almost his latest breath is said to have rebuked the Constable, "It is not me you should rebuke for, but yourself, fighting against your king and your country." So he died. Bayard, more perhaps than in any other instance, we may see the "realized ideal" of the chivalry; the combination of perfect courage with entire unselfishness, the utmost honesty, and a purity of life wonderful at age, perhaps in any age. Although never rose to be general, nor held any independent command, by the power of his character and the lustre of his actions he has a place in the world's esteem far higher than more glorious than titles could ever secure. His life was written by his "loyal squire" or secretary, and has passed through many editions.

BAYER, JOHAN, a German astronomer of the 17th century; author of "*Uranometria*," a celestial atlas.

BAYER, GOTTLIEB SIEGFRIED, German geologist, who became Professor of Greek and Roman Antiquities at St Petersburg, was author of a very curious and able entitled "*Museum Sinicum*." Born, 1738, died, 1798.

BAYLE, PIERRE, a French critic and miscellaneous writer, was born at Carlat in 1647. He was educated at the universities of Puylaurens and Toulouse, and for a short time professed the Catholic faith. In 1674 he settled at Paris, and was soon after chosen professor of philosophy at Sedan, and six years later removed to Rotterdam, where he filled the same chair. Deprived of his post in 1693, he devoted himself to the preparation of his great work, the "*Dictionnaire Critique et Historique*," which at first appeared in 2 vols. folio in 1695-6. Fresh controversies were excited by this work, which engaged him till his death. Bayle was an indefatigable student, and is said to have worked 14 hours a day for 40 years. He wrote a powerful treatise against the persecution of the Protestants, and founded a periodical work, entitled "*Nouvelles de la république des Lettres*." His "*Dictionary*," much enlarged, has passed through many editions. Died, 1706.

BAYLEY, SIR JOHN, a learned and upright judge, was called to the bar in 1792, and appointed a serjeant-at-law in 1799. In 1808 he was made one of the justices of the King's Bench, and received the honour of knighthood. He was a man of liberal education and enlarged notions; to a most benevolent heart he added the dignified manners of the gentleman, and a degree of professional erudition that placed him in the first rank among his judicial compeers. His work "*on the Law of Bills of Exchange*" has long been a standard book in the profession, and its value in the commercial world is universally acknowledged. On his retirement from the bench, in 1834, he was sworn a member of the Privy Council, and created a baronet. Died, 1841, aged 78.

BAYLEY, RICHARD, an eminent American physician, was born in Connecticut, in 1745. After studying at home, he completed his professional education in London, and settled at New York. In 1792 he was appointed professor of anatomy in the college of Columbia, where he acquired great celebrity. In 1799 he published his work on yellow fever, wherein he proved it to be a local malady. Died, 1801.

BAYLY, THOMAS HAYNES, a lyrical poet of some merit, and the author of several dramatic pieces, and one or two novels. Though very popular in his own day, he was far too light and merely amusing a writer to have a hold upon posterity; and the majority of his writings are already rapidly passing into oblivion. Born, 1797; died, 1839.

BEATON, DAVID, Cardinal, archbishop of St Andrews, was born in 1494. He became abbot of Arbroath in 1525, lord privy seal three years later, was sent on several embassies to France, made a cardinal in 1538, and in the following year became primate. On the death of James V. he by craft and determination secured to himself the chief power in church and state, being named lord high chancellor and papal legate. He opposed an alliance with England, and especially distinguished himself as a persecutor of the reformers. The trial and burning of George Wishart for heresy took place under his direction, and a short time after he was

assassinated at St Andrews, May, 1546. With his death church tyranny came to an end in Scotland.

BEATTIE, JAMES, a Scottish poet and miscellaneous writer, was born at Laurencekirk in 1735. He was educated at the Marischal College, Aberdeen, where in 1760 he was called to the chair of moral philosophy and logic. With considerable reputation as poet and metaphysician, he visited London in 1771, and in several subsequent years; received a pension, and gained the friendship of Johnson, Sir Joshua Reynolds, and other eminent men. His most admired poem is "The Minstrel," and his principal prose works are, the "Essay on Truth," an attempt to refute the doctrines of Hume; "Elements of Moral Science," and "Dissertations Moral and Critical." His last years were embittered by the loss of his only two sons, and after successive attacks of paralysis, he died in 1803.

BEAUCHAMP, RICHARD, an English prelate, admirably skilled in architecture. He was made bishop of Salisbury in 1450, was employed in various important negotiations, and became chancellor of the order of the Garter. He was subsequently appointed surveyor of the works at Windsor, and superintended the building of St George's Chapel. The great hall in the episcopal palace of Salisbury, and the sepulchral chapel in the cathedral, are also monuments of his taste and science. Died, 1481.

BEAUFORT, HENRY, Cardinal, bishop of Winchester, was the third son of John of Gaunt, by Catherine Swynford, and thus half-brother to Henry IV. He entered the church, was made bishop of Lincoln in 1397, and bishop of Winchester in 1404. He was learned in the canon law, and held the office of chancellor several times. The quarrel between him and his nephew Humphrey, duke of Gloucester, began in 1422, when both were members of the Council of Regency, and only ended with the suspicious death of Gloucester in 1447. Beaufort was created cardinal and papal legate in 1425, and died soon after Gloucester, in 1447. He had acquired immense wealth, lent large sums to Henry V. and Henry VI., founded the Hospital of St Cross at Winchester, and left his riches to various charitable uses.

BEAUFORT, MARGARET, countess of Richmond and Derby, mother of Henry VII. She founded St John's College and Christ's College, Cambridge, and distinguished herself likewise as an author. Born, 1441; died, 1509.

BEAUFORT, FRANÇOIS DE VENDOME, Duke of, son of Cæsar, duke of Vendome, was imprisoned by Cardinal Mazarin. On his escape, he took a leading part in the war of the Fronde, and after the conclusion of peace, was appointed admiral of France. He distinguished himself in 1665 by two victories over the Algerine pirates, and passing afterwards into the service of Venice, was killed at the siege of Candia, 1669.

BEAUHARNAIS, ALEXANDRE DE, a French nobleman, born in 1760. He took part in the Revolution, and after having been at one time president of the national assembly, and served in the armies of France with

distinction, was put to death by the revolutionary tribunal just previous to the fall of Robespierre, in 1794. His widow, Josephine, was afterwards wife of Buonaparte.

BEAUHARNAIS, FRANÇOIS, Marquis de, elder brother of Alexander, was born in 1766. He was appointed major-general in the army of the Prince of Condé, in 1792; protested against the unlawful treatment of the king, in a letter to the president of the national assembly; and when Buonaparte became first consul, he exhorted him to restore the sceptre to the house of Bourbon. He was afterwards appointed ambassador to the court of Spain, but fell into disgrace with Napoleon, and was banished. He returned to Paris after the restoration, and died in 1819.

BEAUHARNAIS, EUGÈNE DE, viceroxy of Italy and prince of the French Empire, was the son of Alexandre de Beauharnais and Josephine, afterwards wife of Napoleon. He was born at Paris in 1781, and became aide-de-camp to Napoleon in 1796. He accompanied him to Egypt, was wounded at Acre, contributed to the victory of Marengo, was made prince of the Empire in 1804, and afterwards grand officer of the Legion of Honour, and viceroxy of Italy. In 1806 he was named governor of the Venetian states, and was adopted by Napoleon. He served in the campaign of 1809, defeated the Austrians at Raab, and distinguished himself at Wagram. He took part also in the expedition to Russia, and in the campaigns of 1810 and 1814. After the fall of Napoleon he retired to Munich. He had married in 1806 Augusta Amelia, daughter of the king of Bavaria, and left two sons and three daughters. Died, 1824.

BEAUHARNAIS, HORTENSE EUGENIE, ex-queen of Holland, and duchess of St Len, was born at Paris, in 1783, being the daughter of Viscount Beauharnais (who perished by the guillotine in 1794) by his wife Josephine, afterwards the consort of Napoleon. Hortense was married to Louis Buonaparte in 1802, but it was an ill-starred union, and they separated in 1807, after she had given birth to three sons; the eldest of whom died in childhood; the second was killed in an insurrection at Romagna, in 1832; the youngest (Louis Napoleon) became the first president of the French republic, established in 1848; and in 1852 emperor of the French, with the title of Napoleon III. Died, 1837.

BEAULIEU, SEBASTIEN DE PONTAISE, DE, a celebrated French engineer and field-marshal under Louis XIV.; author of "Views and Plans of the Batties and Sieges of Louis XIV." Died, 1674.

BEAUMARCHAIS, PIERRE AUGUSTIN CARON DE, a man of singular versatility of talent, politician, artist, merchant, and dramatist. He was author of the comedies of "The Barber of Seville," "The Marriage of Figaro," &c.; but it was to a lawsuit that he was first indebted for his popularity as an author; the memorials and pleadings which he drew up being so full of wit, satire, and sound reasoning, as to attract public attention in an extraordinary degree. Born, 1732; died, 1799.

BEAUMONT, FRANCIS, the celebrated

English dramatic poet, was the son of Sir John Beaumont, a common Pleas in the 17th century. He was in conjunction with his father the author of a number of excellent comedies, which were both admirable in their nature, and their content. His dramas even to those whom they made their friends. These twin poets contained a world of poetry, but also a world of indecency and obscenity, they are not easily presented to the reader. Born, 1635; died, 1705. **BEAUMONT, SIR GEORGE**, an English amateur painter, a distinguished artist and artist, was born in 1635; died, 1827. **BEAUMONT, JOHN THOMAS**, an active part in the establishment of the National Gallery, and the collector of pictures. **BEAUMONT, JOHN THOMAS**, well known as the founder, and managing director, of the Commercial Union, was born in London, his original name being Barber. He manifested a strong desire to become a painter. He afterwards became an author, and published a "Treatise on the Art of Painting," which contains several tracts upon the subject of the population, so as to relieve the threatened famine. He had a great length put in practice, and strenuously recommended the organization of a matchless rifle corps, the name of the "Duke of Devonshire's Sharpshooters," of which he was appointed, in 1804, captain commandant. He established the Froyland, which gave rise to the "Froyland's banks," throughout the kingdom. In May, 1841, having been the owner of his property to his children, he left a sum of £10,000 to establish a national institution in Beaumont.

BEAUSOBRE, ISAAC, a French Protestant, was born at Niort in 1659. He was of a Protestant family, was educated at the University of Caen, and became pastor at Châtillon. On the revocation of the Edict of Nantes his church was closed, and he was obliged to break the royal seals of his church. He took refuge in Holland, and settled at Berlin, where he became pastor and chaplain to the king. He was highly esteemed for his learning, and projected a voluminous History of France, which he left incomplete. His celebrated work is the "Histoire du Manichéisme." He was also the author of the "Version of the New Testament," and "Remarques, critiques, et observations sur le Nouveau Testament."

BEAUVILLIER, FRANÇOIS, a French nobleman, soldier, courtier, and diplomatist, was born in 1607. **BEAUVILLIER, PAUL DE**, an eminent French statesman, was the son of Louis XIV. He entered the service of France at the age of 18, and in 1685 was n-

A New Universal Biography.

[BEA]

[BEC]

English dramatic poet, was a younger brother of Sir John Beaumont, judge of the Common Pleas in the 17th century; and, in conjunction with his friend Fletcher, the author of a number of excellent plays. They were both admirable delineators of human nature, and their contemporaries preferred their dramas even to those of Shakespeare, whom they made their model. The works of these twin poets contain much of the fine old poetry, but also very much of the alloy of indecency and obscurity; so that they are not easily presentable to modern readers. Born, 1685; died, 1815.

BEAUMONT, Sir GEORGE, bart., a distinguished amateur painter, and a great patron of art and artists, was born at Dunmow, Essex, in 1753; died, 1827. Sir George took an active part in the establishment of the National Gallery, and contributed to it his own collection of pictures.

BEAUMONT, JOHN THOMAS BARBER, well known as the founder, and many years managing director, of the County Fire Office, was born in London, in 1774, his paternal name being Barber. In his youth he manifested a strong desire to obtain eminence as a painter. He afterwards became an author, and published a "Tour in Wales," which contains several tracts upon the best mode of saving the population, so as most effectually to repel the threatened French invasion; and he at length put in practice what he had strenuously recommended to others, by organizing a matchless rifle corps, known by the name of the "Duke of Cumberland's sharpshooters," of which corps he was appointed, in 1804, captain commandant. In 1806 he established the Provident Institution, which gave rise to the various similar establishments, now better known as "savings banks," throughout the kingdom. He died in May, 1841, having bequeathed the bulk of his property to his children, except a sum of £10,000 to establish a philosophical Institution in Beaumont Square, Mile-

BEAUSOBRE, ISAAC, a French theologian, was born at Niort in 1659. He was of a Protestant family, was educated at Saumur, and became pastor at Châtillon-sur-Indre. On the revocation of the Edict of Nantes his church was closed, but he made an attempt to break the royal seals on the gates of his church. He took refuge in Holland, and in 1694 settled at Berlin, where he became pastor and chaplain to the king, and was highly esteemed for his learning and piety. He projected a voluminous History of the Reformation, which he left incomplete. His celebrated work is the "Histoire Critique du Manichéisme." He assisted in a new version of the New Testament, and published "Remarques, critiques, et philologiques sur le Nouveau Testament." Died,

BEAUVILLIER, FRANÇOIS DE, duke of Angouleme, soldier, courtier, and poet, in the reign of Louis XIV. Born, 1607; died, 1687.

BEAUVILLIER, PAUL DE, duke of St. Aignan, an eminent French statesman, and grandfather to the sons of Louis XIV., was born in 1658. He entered the service of the king at the age of 18, and in 1685 was named pre-

sident of the council of finance. He accompanied the Dauphin on his first campaign, and in 1689 was appointed governor to the duke of Burgundy. The dukes of Anjou and Berry were also placed under his charge. It was by his influence that Fenelon was chosen to be tutor to the duke of Burgundy, and he remained the firm friend of the noble and proscribed prelate to the end. In 1691 he was named minister of state, and by his wise foresight, sound judgment, and regard for the interests of the people, rendered valuable services on several critical occasions. On the accession of the duke of Anjou to the throne of Spain, as Philip V., Beauvillier was made a grandee of Spain. He reached his highest position when the duke of Burgundy became Dauphin, and was associated with his father in the government. He was the constant adviser and friend of the Dauphin, and shared with him all the toils of state. And when in 1712 the Dauphin died, the blow was terrible to Beauvillier, as it was to Fenelon. In failing health he lingered on, and died in 1714.

BEAUVOIS. [PALISSOT DE BEAUVOIS.]

BECCADELLI, ANTONIO, also named **PANORMITA**, an Italian litterateur, was born at Palermo in 1394. He entered the service of the duke of Milan, was named Professor of Belles Lettres at Pavia, and received the poetic crown from the Emperor Sigismund in 1432. He then entered the service of Alfonso, king of Arragon, who sent him on various embassies. He was employed also by Ferdinand, son and successor of Alfonso. He left a History of Alfonso, and other works. Died, 1471.

BECCAFUMI, DOMENICO, whose real name was **MECHERINO**, was one of the best painters of the Sieneze school. His style was formed on that of Perugino, but was modified subsequently by the study of other artists. He executed some statues and bas-reliefs in bronze, and completed the mosaic of the pavement in the cathedral of Sienna. Born, 1484; died, about 1550.

BECCARIA, GIOVANNI BATTISTA, an ingenious practical philosopher, whose whole life was devoted to the study of physics. He was professor of philosophy at Palermo and Rome, and published several works of great merit, particularly on the nature of the electric fluid. Born, 1716; died, 1781.

BECCARIA, CESARE BONESANA, Marquis of Milan in 1735. He is chiefly known as author of the celebrated "Treatise on Crimes and Punishments," which first appeared in 1764, and advocated great reforms in criminal legislation. It passed through six editions in Italy in the first two years, and was soon read all over Europe. It brought, however, a storm of persecution on the author, who was protected by the Austrian governor of Lombardy, and made Professor of Political Philosophy. Beccaria was one of the principal writers in the journal called "Il Caffè," published at Milan, in imitation of the English "Spectator." Died, 1793.

BECCERRA, GASPARO, a Spanish painter and sculptor, pupil of Michael Angelo. Died, at Madrid, 1670.

BECHSTEIN, JOHANN MATTHIAS, a German naturalist, was born in 1767. He studied theology at Jena, but abandoned the church for his favourite study. He entered the service of the Duke of Saxe-Meiningen in 1800, as director of a "Forest Academy." Bechstein's "Natural History of Cage Birds" has been translated into English. Among his other works are "True Delineations of Natural History," "Handbook of Forest Science," "Forest Insectology," &c. Died, 1822.

BECK, ANTHONY. [BEK.]

BECKET, ST THOMAS A, archbishop of Canterbury, was the son of a London merchant, his mother being a convert from Mohammedanism. He was born in 1119, and was sent by Theobald, archbishop of Canterbury, to study at Oxford and Bologna. He entered the church, and was much forward by Theobald. In 1158 the king made Becket chancellor. In the following year he accompanied the king to France, with a large and splendid retinue. He was elected archbishop of Canterbury, by command of Henry II., in 1162; and soon after he resigned the office of chancellor, thereby giving great offence to the king. Becket now laid aside all pomp and luxury, and led a life of monastic austerity. In the controversy which immediately arose respecting the limits of civil and ecclesiastical authority, Becket asserted against the king the independence of the church, and refused to sign the "Constitutions of Clarendon." By a council or parliament at Northampton Becket was condemned, and suspended from his office. He escaped in disguise to France, and had the protection of the king. In response to his excommunication of the clergy who signed the "Constitutions," and some of the king's officers, the king banished all the relations of Becket, and forbade all communication with him. War with France followed. In 1170 a meeting took place between the king and the archbishop, at Fretville, where they were professedly reconciled, and Becket returned to Canterbury. He at once published the pope's sentence of suspension against the archbishop of York, and other prelates, who had crowned Prince Henry. The king's angry expression on hearing this induced four of his barons to go immediately to Canterbury, and after unsuccessfully remonstrating with Becket, they followed him into the cathedral and murdered him on the steps of the altar, 31 December, 1170. The king denied all share in the murder, and was absolved; but in 1174 he did penance at Becket's tomb. Becket was canonized by Alexander III. in 1173. His remains were translated in 1220 to a splendid shrine, which attracted crowds of pilgrims, and was loaded with rich offerings. The immense treasure was seized by Henry VIII., and the shrine destroyed in 1538.

BECKFORD, WILLIAM, one of the most remarkable men of modern times, was the son of Alderman Beckford, of London, who bequeathed him property, said to amount to upwards of £100,000 per annum. He had a strong passion for building, and in erecting the much-talked-of Fonthill Abbey, spent in a very few years the enormous sum of

£273,000! An excellent scholar, and possessed of a fine taste in almost every branch of art, he collected in the fantastic but costly "Abbey" one of the finest and most extensive libraries in England, and his pictures and curiosities were almost unequalled. His vast expenses, and the loss of a large portion of his West Indian property, rendered it necessary for him to sell the abbey, and, with a few exceptions, all his rich and rare contents, in 1822. When the sale was announced, public curiosity was so generally excited, that 7200 catalogues were sold at one guinea each! But his claim to remembrance rests chiefly upon his wild and singular tale of "Vathek," which is so splendid in description, so true to eastern costume, that Lord Byron said, "Even Rasselas must bow before it; the Happy Valley will not bear a comparison with the Hall of Eblis." In addition to "Vathek," Beckford wrote a satirical work, entitled "Memoirs of Extraordinary Painters;" "Italy, with Sketches of Portugal and Spain;" and "Recollections of an excursion to the Monasteries of Alcobaca and Batalha." Died, May, 1844, aged 84.

BECKMANN, JOHANN ANTON, a native of Hanover, and a professor at Göttingen, where he lectured for many years on subjects connected with rural and political economy, &c. He was the author of several works, of which his "History of Discoveries and Inventions" is the best known. Born, 1739; died, 1811.

BEDDOES, THOMAS LOVELL, dramatic poet, was born at Clifton in 1803. His father was a physician, and the early patron of Sir Humphrey Davy, and his mother was a younger sister of Maria Edgeworth. Early left an orphan, he was educated at the Charterhouse and at Oxford, where his impetuous, sarcastic, and rebellious disposition involved him in frequent conflicts with the authorities. He left the university, after taking his degrees, wearied and dissatisfied, in 1824. He then went to study medicine at Göttingen, became an enthusiastic student of science, graduated M. D. at Würzburg, lived afterwards at Strassburg and Zurich, and was several times banished by Prussian, Hanoverian, and Bavarian governments as a democrat, and died at Basel early in 1849. His principal poem, the only completed work of his mature years, is that entitled "Death's Jest-Book, or The Fool's Tragedy." He first made himself known by the "Bride's Tragedy," published in his second college year, and which won him the warm friendship of "Barry Cornwall" and George Darley. After his death a volume of his "Poems," chiefly early ones and mere fragments, with some striking letters, was published, with a memoir by his friend Mr. Kelsall. Beddoes was a passionate admirer of the great dramatists of the 16th century, and he showed himself a genius of the same order. "The few poems he has left," says a friendly critic, "are magnificent in diction, terse and concise in expression, various and beautiful in modulation, displaying imaginative thoughts of the highest reach, and sweeping the chords of passion with a strong and fearless hand. Plenty of defects may be noted, but never a want of sincerity, never a borrowed wish.

er a gaudy irrelevance, common-place."

BEDA, or BEDA, surname of an English monk and historian, was born in the bishopric of Hexham about 673. He was for two years in the monastery of Wear, and then succeeded Bede as abbot of Jarrow. He was a devoted student of the Holy Scriptures, and a wide reputation as a scholar. His whole life was devoted to study. His most important work is his "History of England," which is highly esteemed as a trustworthy source of early English history. It was written in Latin, and translated into Saxon by Alfred the Great. A second edition appeared in 1790. His other works, among others, are "The Creation to A. D. 725," and "A Saxon translation of the day he died. His end was Christian, as his life had been. He died, 735. His remains, at Jarrow, were afterwards translated to Durham cathedral.

BEDFORD, WILLIAM, bishop of Exeter, was born in Essex in 1570. He studied at Cambridge and entered the church in 1592. He spent eight years at Venice as ambassador, and then returned to Henry Wotton, and then to the bishopric of Paul Serp, the Council of Trent. After the death of the Countess of Arundel, he was appointed to the bishopric of Exeter, and next at Hornsea, and then at Exeter. He was a zealous provost of Trinity College, Cambridge, and two years later he was appointed to the bishopric of Kilmorc and Ardagh. He was a learned man, and both at the college and in the bishopric he introduced reforms he introduced. He was seized with his father's illness, and imprisoned. Died in 1640. Bishop Bedford caused the translation of the Irish Bible into English.

BEDFORD, JOHN, Duke of Bedford, was the third son of Henry IV. He was knighted on his father's death, and was made constable of England. He was duke of Bedford in 1411. He was a great favourite of Edward III. He desired that Bedford should be made duke of Bedford, and the duke of Bedford, during the reign of Edward III., but by act of parliament he was appointed protector of the kingdom. He was the substitute in 1412. In 1422 Charles VI. of France was crowned king of the kingdom, and Bedford secured the peace of Burgundy and the series of military successes which followed. He died at the siege of Orleans in 1435. He had previously abandoned the dukedom of Burgundy, and the death of Bedford, in 1435, followed immediately. He died in London, September, 1435.

BEDFORD, JOHN RUSSELL, 6th Duke of Bedford, distinguished for his princely

A New Universal Biography.

[BEE

er a gaudy irrelevance, never a superfluous common-place."

BEDA, or **BEDA**, surnamed "the Venerable," an English monk and ecclesiastical historian, was born in the bishopric of Durham, about 673. He was for twelve years a student in the monastery of Wearmouth, while Bedict Biscop was abbot. He also received instruction from John of Beverley. He was ordained priest about 703, and had already gained a wide reputation for learning and piety. His whole life was spent quietly in a monastery, devoted to study and writing. His most important work is the "Ecclesiastical History of England," published about 731, and highly esteemed as one of the most valuable sources of early English history. It was written in Latin, and was translated into Saxon by Alfred the Great. The earliest edition appeared in 1474. Bede wrote several works, among others a "Chronicle" of the Creation to A. D. 725. And he composed a Saxon translation of St John's Gospel the day he died. His end was peaceful and Christian, as his life had been. He died about 733. His remains, at first deposited in a monastery, were afterwards removed to Durham cathedral.

BEDFORD, **WILLIAM**, bishop of Kilmore, born in Essex in 1570. He studied at Cambridge and entered the church. He spent eight years at Venice as chaplain to Henry Wotton, and there enjoyed the friendship of Paul Sarpi, the great historian of the Council of Trent. After discharging the duties of parish priest first at Bury St Edmunds, and next at Horningsheath, he was chosen provost of Trinity college, Dublin, in 1627, and two years later was made bishop of Kilmore and Ardagh. He did good both at the college and in his see, by reforms he introduced. At 70 years of age he was seized with his family by the plague and imprisoned. Died soon after, in 1637. Bishop Bedell caused the Old Testament to be translated into Irish.

BEDFORD, **JOHN**, Duke of, regent of France, was third son of Henry IV. and his wife Mary de Bohun, and was born in 1402. He was knighted on his father's coronation, named constable of England in 1403, and duke of Bedford in 1415, and was sent to succour Harfleur the following year. In 1417 he desired that Bedford should be regent of France, and the duke of Gloucester of England, during the minority of Henry V. but by act of parliament Bedford was appointed protector of the kingdom, and his successor his substitute in case of absence. In 1422 Charles VI. of France died, and seven years of war followed between the claimants of the kingdom, Charles VII. and Henry VI. Bedford secured the alliance of the dukes of Burgundy and Brittany, and by a series of military successes. The duke of Burgundy, who had previously abandoned the duke of Burgundy did the same, and the death of Bedford, hastened the appointment, followed immediately in Rouen, September, 1435.

BEDFORD, **JOHN RUSSELL**, 6th Duke of, distinguished for his princely patron-

age of the fine arts, and every branch of social industry. A member of several learned societies, versed in science and fond of literature, he was no less attached to agriculture, to the improvement of which he devoted many years and large sums of money. He expended upwards of £40,000 in rebuilding Covent Garden Market, in such a style as to render it one of the ornaments of that part of the metropolis. In politics his Grace was a Whig; but his whole course and character were such as to procure him the esteem of men of all parties, and to obtain for him emphatically the title of "a good old English gentleman." Born, 1766; died, 1839.

BEDLOE, **WILLIAM**, Captain, an infamous informer, noted for his perjuries, and rewarded with £600 for pretended information respecting a popish plot, and the death of Sir Edmundbury Godfrey. Died, 1680.

BEDMAR, **ALFONSO DE LA CUEVA**, Marquis of cardinal, bishop of Oviedo, Spanish diplomatist, was born in 1572. He was sent ambassador to the republic of Venice by Philip III. in 1607, and in 1618 he took part with Don Pedro of Toledo, governor of Milan, and the duke of Ossuna, then viceroy of Naples, in a conspiracy to overthrow the reigning republic of Venice, by firing the arsenal, pillaging the mint and the treasury of St Mark, and massacring the doge and the senators. The plot failed, and many Frenchmen and Spaniards were arrested and hung or drowned as accomplices. Bedmar was allowed to retire. He was created cardinal in 1622, was made himself detested by the Flemings, and retired to Rome. Died, 1635.

BEECHER, **REAR-ADMIRAL FREDERICK WILLIAM**, the son of the distinguished painter, Sir William Beecher, was born in London in 1796, entered the navy in his tenth year, and after a great variety of services in all parts of the globe, became a lieutenant in 1815. In 1818 and 1819 he took part in the great arctic expeditions under Sir John Franklin and Sir Edward Parry; in 1821 he was engaged in the survey of the coast of Northern Africa under Captain (afterwards Admiral) Smyth; and in 1825, having attained the rank of commander, he was appointed to the Blossom to take part in another polar expedition, and the results of this voyage, which lasted three years, were published under the title of a "Narrative of a Voyage to the Pacific and Behring Straits to cooperate with the Polar Expedition in 1825-1828," and contributed largely to the progress of geographical enterprise and physical science. From 1837 to 1847 Captain Beecher was engaged in the survey of the Bristol and Irish Channels; and he was afterwards appointed to constitute and superintend the Marine Department of the Board of Trade, a service in which he was employed till the day of his death. In 1834 he was promoted to the rank of rear-admiral, and the following year was elected President of the Royal Geographical Society. Died, 1856.

BEECHER, **SIR WILLIAM**, R.A., an eminent English portrait-painter, born in Oxfordshire in 1753. He became a student at the Royal Academy at the age of 19, and in 1797 was elected R.A. and knighted. Ho

painted a few historical compositions of some merit. His chief excellence, however, lay in portrait-painting, to which, indeed, he chiefly confined himself, and in which he surpassed most of his contemporary artists. Died, aged 86 years, in 1839.

BEETHOVEN, LUDWIG VON, one of the greatest musical composers, was born at Bonn in 1770. His genius very early showed itself, and his musical education was begun by his father at the age of five, and continued by the court organist, who introduced him to the works of Sebastian Bach and Handel. He soon attempted composition, and showed wonderful facility in improvisation. About 1774 he was sent to Vienna to study under Haydn, but as Haydn left Vienna soon after, he studied under Albrechtsberger. About 1790 he finally quitted his native town and settled at Vienna, where Mozart quickly recognized his marvellous power. When about 40 years of age, he was attacked with deafness, which became total, and lasted through life. He became more and more the victim of morbid irritability, causeless suspicions, and hopeless melancholy, ending in confirmed hypochondria, and at last dropsy and delirium. He continued to compose, however, long after he ceased to hear himself play, and received homage and all kinds of honours from all parts of Europe. His works are very numerous and in every variety of style: orchestral, chamber-music, pianoforte, and vocal music. Among the most celebrated are the opera of "Fidelio," at first named "Leonora," the oratorio of the "Mount of Olives," the cantata "Adelaide," "Sinfonia Heroica," "Sinfonia Pastorale," "Concerto in C Minor," "Sonata Pathétique," and "Sonata with Funeral March." Vast power, intense passion, and infinite tenderness, are manifest in all his compositions, which abound no less in sweetest melodies than in grand and complicated harmonies. Beethoven was never married. He died in March, 1827.

BEGA, CORNELIUS, Dutch painter, chiefly of cattle and landscapes. He was one of the most eminent pupils of Adrian van Ostade. Born, 1620; died, 1664.

BEGEYN, ABRAHAM, Dutch landscape painter; some fine pictures by him are at the Hague. Born, 1650.

BEHAIM, or BEHEM, MARTIN, a celebrated geographer, was born at Nürnberg about 1430. He made several trading voyages, studied mathematics and navigation, and in 1480 went to Portugal. He accompanied Diego Can on an expedition of discovery along the coast of Africa, and rendered valuable services. In 1492 he revisited his native city, and there constructed his famous terrestrial globe. He then returned to Portugal, and soon after to the isle of Fayal, where he died, 1506. Attempts have been made to prove that Behem was the discoverer of America, but without success.

BEHN, APHRA, a miscellaneous writer in the reign of Charles II., whose works were remarkable for their disregard of decency and morals: they consist chiefly of poems, novels, and plays. She was employed by the government in a secret mission to Holland in 1666, and discovered the intention of

the Dutch admirals to burn the shipping in the Thames. Died, 1689.

BEHNES, WILLIAM, a distinguished sculptor, was of German origin, but was born in England about 1700. The bankruptcy of his father and the death of his mother involved him in difficult and trying circumstances, against which he for a time bravely struggled. Working at his father's trade by day, he studied in the evening at the Royal Academy, in 1816 and several subsequent years. He attained great skill as a portrait sculptor, and executed a large number of busts of eminent men, statues of Gresham at the Royal Exchange, Sir William Follett in St Paul's, Dr Babington, &c.; and also several admired ideal statues, "Lady Godiva," "The Startled Nymph," and "Europa." Pecuniary embarrassments, dissipated habits, comparative neglect on the part of the public, and death in the Middlesex Hospital, whither poverty drove him at last,—such are the sad elements of Behnes's story. Died, January, 1864.

BEHRING, VITUS, a captain in the Russian navy, and a celebrated navigator of the northern seas, who, being cast on a desolate island, perished there, in 1741. This is now called Behring's Island, and the straits between Asia and America have also received his name.

BEK, or BECK, ANTHONY DE, bishop of Durham, a bold and spirited prelate, who united the skill and courage of a soldier to the austerity of a divine. He led the van of the English army under Edward I. in an expedition against the Scots in 1296; commanded one division of the cavalry at the battle of Falkirk, two years later; besieged Barnard Castle and other fortresses, besides the manor-house of Eltham; received from the Pope the title of Patriarch of Jerusalem; was excommunicated by the Archbishop of York, and died in 1311. Beck was at the time of his death the richest subject in Europe, and he was the first bishop of Durham buried in the cathedral.

BELIDOR, BERNARD FOREST DE, an eminent French engineer and mathematician; author of "Dictionnaire portatif de l'Ingénieur," &c. Born, 1695; died, 1761.

BELISARIUS, the great general of Justinian, was a native of Illyria. He commanded an expedition against the king of Persia about 530; suppressed an insurrection at Constantinople; conquered Gelimor, king of the Vandals, and put an end to their dominion in Africa; was recalled and honoured with a triumph. In 535 he was sent to Italy to carry on war with the Goths, and took Rome in 537. He was there unsuccessfully besieged by Vitiges, whom he soon after besieged and captured at Ravenna. He was recalled through jealousy before he had completed the conquest of Italy. In 541 he commanded in Persia, and returned to Italy with inadequate forces in 541. He recovered Rome from Totilas in 547, and was recalled the next year. He was afterwards employed against the Huns. He was charged in 554 with conspiracy against Justinian, but was acquitted. That he was deprived of sight and reduced to beggary, appears to be a tradition of late invention. Died, 565.

BELL, ANDREW, D.D., a pious, industrious, and able divine, the projector of National Schools; author of "Lectures on Education at the Madras System," &c. He acquired considerable property in India, and had some estates in this country; and by all that he possessed he advanced the education of the poor. Part of his bequests were for the foundation and endowment of a school at St Andrew's. Born, Scotland, 1753; died, 1827.

BELL, Sir CHARLES, an eminent surgeon and professor of surgery in the University of Edinburgh, where he resided.

In 1806 he came to London, distinguished as a popular lecturer on anatomy and surgery, at the academy of the celebrated Hunterian Society, where, as subsequent events proved, he acted as professor at the Royal College of Surgeons, the benches were crowded with attentive auditors. He was the author of several professional works of high merit, and his surgical operations were justly esteemed for his discovery of the connection between the nervous system and the eye, which gained for him an European reputation, and an accession of William IV. to the honour of knighthood. As a surgeon, his career Sir Charles was distinguished by some rare talents, so in private life he was distinguished for the simplicity of his manners. Died, 1842.

BELL, HENRY, the first who introduced steam to the purposes of navigation. He was born in Linlithgow, Scotland. After serving an apprenticeship to a millwright in London, and was in the employment of the celebrated engineer, James Watt, in the year 1812 that he began to calculate to establish the principle of steam navigation. Mr. Bell, an engineer, had launched a steam engine the same principle five years before, but had performed long voyages on the Clyde river, but Bell must be considered the first in the praise of having introduced steam into a country, what all others had been doing. He died, at Helensburgh, 1830.

BELL, JAMES, an eminent geologist, was born at Jedburgh, in Scotland. He was brought up as a weaver, and afterwards became a manufacturer of cotton goods at Glasgow. In that business, and, being a student, became a teacher of the young men preparing for the law. He was the author of "The Geology of the East of Scotland," and the "Geographical and Scientific Gazetteer of England and Scotland," 1833.

BELL, JOHN, of Antermoney, was born about 1690. He was a pious man, and spent a large part of his life in travelling. He went to St Petersburg, where he was employed in the Russian embassy to Peter the Great. He died in 1718; accompanied an expedition to the North in the following year, and died at Moscow in 1722. He next

A New Universal Biography.

[BEL

BELL, ANDREW, D.D. and L.L.D., an English divine, the projector and founder of National Schools; author of "An Experiment in Education at the Male Asylum, Madras," "Instructions for conducting Schools in the Madras System," &c. &c. Dr Bell acquired considerable property in the Indies, and had some lucrative preferences in this country; and he bequeathed all that he possessed to institutions for the advancement of education and literature.

Part of his bequests was applied to the foundation and endowment of the Madras College at St Andrew's. Born, at St Andrew's, Scotland, 1753; died, 1832.

BELL, SIR CHARLES, an eminent anatomist and professor of surgery in the university of Edinburgh, where he was born in 1763.

In 1806 he came to London, and was distinguished as a popular lecturer on anatomy and surgery, at the academy founded by the celebrated Hunters in Windmill Street, where, as subsequently, when appointed a professor at the Royal College of Surgeons, the benches were crowded with attentive auditors. He was the author of several professional works of high repute, on anatomy and surgical operations; but he is chiefly esteemed for his discoveries in connection with the nervous system, which he gained for him an European name.

On the accession of William IV. he received the honour of knighthood. As in his professional career Sir Charles was respected for his great talents, so in private life was he valued for the simplicity of his manners. Born, 1763; died, 1842.

BELL, HENRY, the first who successfully introduced steam to the purposes of navigation, was born in Linnithgowshire, in 1769.

After serving an apprenticeship to a miller, who was a millwright, he went to London, and was in the employ of Mr. James Watt, the celebrated engineer; but it was not until the year 1812 that he produced a plan calculated to establish the practical application of steam navigation. Mr. Fulton, an American engineer, had launched a boat on the same principle five years before, and had performed long voyages upon the Hudson river, but Bell must be at least partly the praiser of having done, in his country, what all other men had been doing. He died, at Helensburgh, 1815.

BELL, JAMES, an eminent geographical writer, was born at Jedburgh, in 1769. He was brought up as a weaver, and became a manufacturer of cotton goods at Glasgow; that business, and, being an independent student, became a teacher of the art to young men preparing for the university.

He was the author of "A System of Geography and Scientific Geography," in 6 vols. A Gazetteer of England and Wales," &c. &c. Born, 1769; died, 1833.

JOHN, of Antermony, was born in 1769. He was a physician, and spent a large part of his life in travelling. He went to St Petersburg, accompanied the Russian embassy to Persia, returned in 1718; accompanied an embassy to Moscow in the following year, and arrived in 1722. He next accom-

panied Peter the Great on an expedition to Derbent, and in 1737 he was sent on an embassy to Constantinople. Ten years later, he returned to his native land, where, after many years of peaceful and prosperous life, he died in 1780. His "Travels in Asia" abounds in interesting and curious information.

BELL, JOHN, an eminent Scotch surgeon, born at Edinburgh in 1763. He established a school there in which he taught surgery and anatomy, and was at one time assisted by his brother Charles (Sir Charles Bell). After an unsuccessful endeavour to introduce some reforms in the College of Surgeons and the Infirmary, he discontinued teaching. His works are a treatise on "Anatomy," "Discourses on the Nature and Cure of Wounds," and "Principles of Surgery."

Died at Rome, 1820.

BELLA, STEPHANO DELLA, a Florentine engraver, whose works are highly esteemed. Born, 1610; died, 1664.

BELLAMY, JACOB, a Dutch poet, whose patriotic songs and other lyrics are highly and deservedly esteemed. Born, 1752; died, 1821.

BELLARMIN, ROBERT, Cardinal, a learned Jesuit, born in Tuscan in 1542. At the age of 18 he entered the order of Jesuits, and held for seven years the chair of Theology at Louvain. In 1576 he returned to Italy and professed theology at Rome: was created cardinal by Clement VIII. in 1599; archbishop of Capua in 1601; and in 1606 librarian of the Vatican. He was an able and upright man, and is especially celebrated for his controversial writings, which form a complete arsenal for Catholic theologians. He maintains the extreme opinions known as Ultramontane. His works fill several folio volumes. Died, 1621.

BELLAY, JOACHIM DU, often called the French Ovid and Catullus; author of Latin and French poems. Born, 1524; died, 1560.

BELLAY, JEAN DU, Cardinal, archbishop of Bordeaux, was born in 1492. By his great abilities he attracted the notice of Francis I., who made him his adviser and employed him on important affairs of state. Du Bellay was twice sent ambassador to Henry VIII., and took part at Rome in the negotiations respecting Henry's divorce. He was appointed bishop of Paris in 1532, and created cardinal in 1535. In the following year he was left at Paris with the title of lieutenant-general during the absence of Francis I., and for the services he rendered was made successively bishop of Limoges, archbishop of Bordeaux, and bishop of Mans. Through the influence of the cardinal of Lorraine, Du Bellay lost his rank after the death of Francis, and spent the rest of his life at Rome. He was a promoter of learning, contributed to the foundation of the College Royal, and left some Latin poems and a defence of Francis I. Died, 1560.

BELLE-ISLE, CHARLES LOUIS AUGUSTE FOUQUET, Count of, marshal of France, was born in 1684. He distinguished himself in the war of the Spanish Succession, became lieutenant-general in 1732, took part in the siege of Philipsburg, procured the cessation of

BELZONI, GIOVANNI BATTISTA, an en-
rprising traveller, whose researches in
gypt have been of great service to those
ngaged in the study of its antiquities, was
urn at Padua. He came to England in
1803; and becoming involved in pecuniary
difficulties while residing in London, he
obtained a livelihood by the display of feats
of strength and activity at Astley's Am-
phitheatre; for which his colossal stature
and extraordinary muscular powers emi-
nently qualified him. At length he left
his country, and entered on his travel-
through Egypt, in 1815. In 1816 he sent
the busts of Jupiter, Memnon, &c., to the
British Museum; published a narrative of
his operations in 1820; and in the following
year exhibited a model of a splendid tomb
which he had discovered near Thebes. But,
while making preparations for passing from
Suez to Housa and Timbuctoo, he was
struck with dysentery, and died at Gato,
1823.

BEM, JOSEPH, a Polish general, was born
1785. His first service was in the French
expedition against Russia in 1812. He was
afterwards professor in the school of artill-
ry at Warsaw, took part in the insurrec-
tion of 1830, and in 1848 joined the Hun-
dian army. He obtained several successes
against the Austrians and Russians in the
following year, but after the defeat at
Kossowar, retired into Turkey, and was
killed at a pacha. Died, 1830.

BEMBO, PIETRO, a noble Venetian poet,
miscellaneous writer; secretary to Leo
and promoted to be bishop of Bergamo
cardinal by Paul III.; author of a his-
tory of Venice, an important and esteemed
work on the Italian language, &c. Born,
1547; died, 1547.

BENBOW, JOHN, a brave English admiral,
born at Shrewsbury, in 1650. His skill
and valour in an action with a Barbary
sloop of superior force, gained him the con-
fidence of the nation, and he was soon en-
gaged with a fleet. In 1702, during an en-
gagement with the French admiral, Du
Roi, in the West Indies, he had his leg
cut away by a chain shot; and at this
instant several of his captains having
signed a paper declaring that "nothing was
to be done," the enemy effected his escape.
Benbow brought the delinquents to a court-
martial, and two were shot; but the effects
of his wound, and the vexation he suffered,
shortened his death.

BENEDICT, ST, the founder of the first
monastic order in the West, was born in
Italy, in 480; and, retiring to a cavern
only 14 years of age, his fame for
austerities brought him numerous fol-
lowers: the monastery of Monte Cassino,
Naples, was founded by him; and the
order of St. Benedict thenceforward estab-
lished. Died, about 543 or 547.

BENEDICT XIII., Pope (PIETRO FRAN-
CESCO ORSINI), was born in 1649. He
was a member of the Dominican order, was created
cardinal in 1671, and archbishop of Bene-
vento in 1685. He succeeded Innocent XIII.
in 1699, and displayed throughout his pon-
tificate the same excellencies of character,
simplicity, modesty, benevolence, which

had distinguished him in a private station.
He had for his chief minister Cardinal Coscia,
a selfish and unworthy man, who was
ultimately imprisoned. Benedict endeavoured,
by the aid of his friend Cardinal de
Noailles, to quiet the agitation in France
respecting the bull *Unigenitus*. He held a
council on discipline at Rome in 1725. Died,
1730.

BENEDICT XIV., Pope (PROSPERO LAM-
BERTINI), the successor of Pope Clement
XII., 1740, was a great patron of the arts and
sciences, an enactor of good laws, and one
who strove to maintain purity of doctrine
and of manners by setting a worthy example
in his own person. Born, at Bologna, in
1675; died, 1758.

BENEDICT BISCOP, abbot of Wear-
mouth, who flourished in the 7th century,
was born of a noble family of Northumbria.
He was the founder of the monasteries of
Wearmouth and Jarrow, for the building of
which he procured foreign workmen. He
long presided over these houses, and in-
troduced in them the Roman method of
chanting. He was educated at Wear-
mouth during the abbacy of Benedict Biscop.
Died, 699.

BENGEI, JOHANN ALBRECHT, a Ger-
man theologian and philologist, was born in
1687. He studied at Stuttgart and Tübingen,
and became pastor and head of a school
at Denkendorf. He especially applied him-
self to the critical study of the Greek Testa-
ment, of which he published an edition in
1723. Among his other works are, "Apparatus
Criticus Novi Testamenti," "Gnomon
Novi Testamenti," which has been several
times reprinted, &c. Died, 1752.

BENGER, ELIZABETH OGILVY, miscel-
laneous writer, born at Wells, 1778. She
wrote memoirs of Anne Boleyn, Mary,
Queen of Scots, and Elizabeth, Queen of
Bohemia. Died, 1827.

BENJAMIN OF TUDELA, one of the ear-
liest travellers of the middle ages who visited
the central regions of Asia; author of a
Hebrew work of travels, which, though in-
teresting and romantic, is remarkable chiefly
for its misrepresentations. Died, 1173.

BENNINGSSEN, LEVIN AUGUSTUS, Baron,
an eminent Russian general, was born in
Hanover, in 1745; entered the service of
Catherine II., and distinguished himself by
great gallantry in the war against Poland.
He was commander-in-chief at the mur-
derous battle of Eylau. In 1813, he led a
Russian army into Saxony, took part in the
battle of Lelpsic, and blockaded Hamburg.
Died in 1826.

BENSERADE, ISAAC DE, an ingenious
French versifier, born in 1612, and patron-
ized by Richelieu, Mazarin, and the king,
Louis XIV. His madrigals, sonnets, and
songs, as well as his wit and general con-
versational powers, rendered him a great
favourite; and he was called, by way of
eminence, "le poète de la cour." Died,
1691.

BENTHAM, JAMES, an English divine
and antiquary, author of the "History and
Antiquities of the Church of Ely." Died,
1794.

BENTHAM, JEREMY, an eminent jurist

and political philosopher, was born at London in 1748. He was educated at Westminster School and Oxford University, where he graduated M.A. at the age of 20, and was called to the bar. He visited France several times, and between 1784-1791 travelled to Constantinople, and over great part of Europe. Visiting Paris in 1802 he was received at the Institute, and remarkable honour was shown him there on occasion of his visit in 1825. Bentham lived very much in retirement, and the events of his studious life are his numerous works. In philosophy he is the great teacher of "Utilitarianism;" as a jurist he set himself in earnest to discover and disclose the defects and faults of the then existing system and language of jurisprudence; and to establish something truer and better in their place. Some of his writings were first published in French, under the care of his friend Dumont, then librarian to the marquis of Lansdowne. Some of the most important are the "Fragment on Government," his first work; "Introduction to the Principles of Morals and Legislation," "Treatise on Civil and Penal Legislation," "Theory of Rewards and Punishments," "Panopticon," which treats of prison discipline, "Rationale of Judicial Evidence," and "Plan of a Judicial Establishment." Died at London, 1832.

BENTINCK, WILLIAM, first earl of Portland, a distinguished statesman, and the favourite of William III., was born in Holland, 1648. At an early age he became page to the prince of Orange, served him with the utmost devotion throughout his life, and attended him affectionately on his death-bed. He negotiated with Charles II. the marriage of the Princess Mary to the prince of Orange; was twice sent with offers of aid to the duke of Monmouth; took the leading part in the preparations for the descent of his master on England in 1688, and accompanied him thither; and was made privy-councillor and member of the house of peers as earl of Portland. Bentinck was soldier as well as statesman, and contributed by his good generalship to the victory of the Boyne. He also served in the wars preceding the peace of Ryswick, and negotiated that peace. Much popular ill-will was excited against him by the king's grant to him of large part of a Welsh county, and the grant had to be revoked. He was made K.G., and sent at the beginning of 1698 ambassador to France. He then took a prominent part in the secret treaties for the partition of the Spanish monarchy, and was in consequence impeached of high treason by the House of Commons, but was acquitted. William III. died in the arms of his faithful minister, who then retired to his native country. He returned to England, however, and died there in 1709.

BENTINCK, WILLIAM HENRY CAVENDISH, third duke of Portland, was born in 1738. During the American war he acted with the Opposition, and was appointed lord-lieutenant of Ireland in 1782, but continued in that office only three months, owing to the breaking up of the administra-

tion by the death of the marquis of Rockingham. In 1792 he was appointed chancellor of the university of Oxford, and soon after joined Mr Pitt's party. He held the office of home secretary from 1794 to 1801, and succeeded Lord Grenville as first lord of the Treasury in 1807, but shortly after resigned office, and died in 1808.

BENTINCK, LORD GEORGE, a statesman of great ability and still greater promise, was the second son of the fourth duke of Portland, and was born on the 27th of Feb., 1802. He was for some time at Eton, and completed his education at Christchurch, Oxford. After leaving the University, he obtained a commission in the Guards, and in this corps he rose to the rank of captain, retiring from the army with the rank of major. In 1828 he was elected for King's Lynn; and continued to represent that constituency for 20 years. He had previously acted as private secretary to his uncle by marriage, George Canning, when prime minister. Lord George took great interest in field sports, and for a long time was one of the principal patrons of the turf in the kingdom. On first entering parliament he was one of the moderate Whig school; but after the passing of the Reform Bill, he joined the Conservative party, voting with them on important questions, but seldom addressing the House. In 1846, when Sir Robert Peel gave in his adhesion to free trade, and the Protectionist party was deprived of its head, the earnestness, perseverance, and unflinching courage, which Lord George suddenly displayed, obtained for him the leadership of his party, which under his guidance once more started into life. From that period he abandoned his sporting pursuits, and sold off his stud, devoting himself entirely to politics. His dislike of Sir Robert Peel was decided and undisguised; but his hostility was principally shown in his opposition to the free-trade policy. On other questions Lord George pursued an independent course. He supported the Jewish Relief Bill, his vote on which was followed by his withdrawal from the nominal leadership of the Protectionist party; and he was favourable to the payment of the Roman Catholic clergy by the landowners in Ireland. Few public events occasioned more general surprise than the short period of time in which Lord George Bentinck built up his parliamentary character. The industry, straight-forwardness, and intelligence which he displayed during the brief period of his leadership, warrant the belief that, had his life been spared, he would have gained a distinguished place among the highest of England's statesmen. Died suddenly of disease of the heart, Sept. 21, 1848.

BENTIVOGLIO, GUIDO, a celebrated cardinal, and legate at the court of France. He was an able politician and historian. Among other works he wrote "A History of the Civil Wars of Flanders," "Memoirs," &c. Guido Bentivoglio was one of the seven cardinals who, as Inquisitors-General, signed the condemnation of Galileo. He had been a disciple of the great philosopher. Born, 1576; died, 1641.

matist, was born at Bologna, in 1606, and died in 1673. He was patronized by the princes of Este, who intrusted him with various embassies.

BENTLEY, RICHARD, an eminent philologist, was born in Yorkshire in 1662. He studied at Cambridge, entered the church, and was appointed first Boyle lecturer. He early distinguished himself by his classical learning, and in 1693 was named librarian to the king. Soon after broke out his quarrel with Boyle, the main result of which was Bentley's famous "Dissertations on the Epistles of Phalaris." In 1700 he was named Master of Trinity College, Cambridge, and soon after archdeacon of Ely. Working hard as a scholar, and effecting improvements in his college, he nevertheless, by his arrogance, selfishness and offensive measures, involved himself in miserable quarrels and litigation with the college seniors; and after obtaining the Regius Professorship of Divinity, he was degraded and deprived by the senate. This sentence, after years of litigation, was annulled. His writings are very numerous, but we can only name his editions of Horace, Omer, and Terence, his "Remarks on the Discourse of Freethinking," and his extraordinary edition of "Paradise Lost." Died, 1734.

BENYOWSKY, MAURICE AUGUSTUS, a native of Hungary, who, after serving in the imperial armies, joined the Polish nobility, and fought against Russia for the independence of Poland, but was taken prisoner and exiled to Kamtschatka. From that remote region, however, he escaped; and after various fortunes, he was sent out by the French to Madagascar, the sovereignty of which island he afterwards attempted to assume. He was slain in action with the French, 1786.

BERANGER, JEAN PIERRE DE, the greatest lyric poet that France has produced, was born at Paris in 1780. To his grandfather, who was a tailor living in the Rue Montorgueil, and an aunt by the father's side, he was indebted for his early nurture and education. When he was ten years of age he went to reside at Peronne in Picardy with his aunt, and here he led for some time indolent and unsettled life, trying several occupations, including that of a pot-boy, and settling in none, till he was at last appointed to a printer in the town, and from this period gave himself up to literary pursuits. In 1795 his father took him to Paris, where he wanted his assistance in certain banking operations in which he was engaged; but in 1798 the bank failed, and his manager bade adieu to financial operations ever. During the period that followed produced his best songs, but embittered by disappointment and hopeless of success, collected all the poems he had written and sent them to Lucien Bonaparte, the brother of the First Consul, who was known as a liberal patron of literature, and in consequence of the assistance thus rendered Beranger found employment for his pen. In 1806 he assisted in editing Landon's "Annuaire des Musées," and in 1809 he was attached to the University with a small salary

of 1200 francs, which, however, sufficed for all his wants. Meanwhile he went on cultivating the Muses, and delighting all who knew him with the songs, chiefly amatory, which he then composed. In 1815 he first came before the world as an author, though many of the poems then printed had been circulated in manuscript, and the sensation produced by this first publication was immense. France hailed in Beranger a poet who was not only able to sing of love and wine, but who gave the noblest and most heart-stirring expression to that sense of blighted glory and humbled pride which then smouldered in the breast of the whole people. His second series of songs, published in 1821, cost him his peace and three months' imprisonment in St. Pelagie; and for his third series, published in 1828, he was condemned to nine months' imprisonment in La Force, and a fine of 10,000 francs. But the fine was paid by the poet's admirers; while from behind his prison-bars Beranger kept up so deadly a fire on the government that he contributed more effectually to destroy it than all the blows of the heroes of the "Three Glorious Days." After the election of Louis Philippe to the throne, he declined to accept of any reward for his services, and retired first to Passy, next to Fontainebleau, and finally to Tours, where he completed what he called his "Mémolres Chantants," by the publication of his fourth series of songs. Speaking of these masterpieces of poetic skill, Goethe says, "Beranger was never at school, and never studied at a University. But his songs are, nevertheless, so full of mature cultivation, of grace, wit, and subtlest irony, they are so artistically finished, and their language is so masterly, that he is admired not only by France but by the whole of civilized Europe. His songs have shed joy into millions of hearts;—they are familiar even to the working classes, and at the same time they are so high above the level of common-place, that the intercourse with these graceful spirits accustoms and compels the people to have better and more generous thoughts." At the revolution of February, 1848, Beranger was elected to the Constituent Assembly; but after one or two sittings, he sent in his resignation, and finally retired from the storm and turbulence of political life. His last years were solaced by the kindness of numerous friends who admired in him the straightforward honourable man as well as the national poet. Though a republican at heart, Beranger looked upon Napoleon, in his rise from a simple artillery officer to be the Emperor of the French, as an incarnation of the national spirit; and he did so much to perpetuate the superstitious reverence of the people for his name as to pave the way for the advent of his nephew and successor on the imperial throne. Died, 1857. In his Autobiography,—a posthumous publication,—Beranger has given a most interesting account of his struggles with fortune, his private adventures, the development of his mind, the origin of his works, the manner of their success, the friendships and the persecutions they brought him, and the reasons of his retirement from public life.

BERCHEM. (**BERGHEM.**)
BERCHTOLD, LEOPOLD, Count, a distinguished philanthropist, was born in 1758. He spent 15 years of his life in travelling through Europe, and four in travelling through Asia and Africa, for the express purpose of assuaging human misery in its direst forms, and leaving no method unattempted that humanity or patriotism could suggest. He at length fell a victim to a contagious fever, at his palace of Buchlowitz, in Moravia, which he had fitted up as an hospital for the reception of the sick and wounded Austrian soldiers. Died, 1809.

BERENGER, or **BERENGARIUS,** of Tours, a distinguished theologian of the 11th century. He was born at Tours, long held an ecclesiastical office there, and was afterwards archdeacon of Angers. He was thoroughly versed in the philosophy of the age, and did not hesitate to apply reason to the interpretation of the Bible. He denied the dogma of transubstantiation, and no less than seven councils were held respecting him, at three of which he was condemned, and at four he was prevailed on to make retraction more or less fully. Though falling thus in courage in the presence of his persecutors, he continued to teach what he believed. Died near Tours, 1088.

BERENGER, JACOPO, a celebrated anatomist and physician of the 16th century, born at Carpi, in Italy, and died at Ferrara, 1550. He made several important anatomical discoveries, and is said to be the first who used mercury in syphilitic diseases.

BERENICE, daughter of Herod Agrippa, king of Judæa, and wife of her father's brother, Herod, who was made king of Chalcis by the Emperor Claudius. Becoming a widow, A. D. 49, she gave her hand to Ptolemy, king of Cilicia, but she soon deserted him, and became the mistress of Titus, afterwards Roman emperor, who would probably have made her his wife but for the murmur of his subjects.

BERESFORD, General Viscount, G. C. B., &c., a distinguished British officer, was the eldest of two natural sons of the first marquis of Waterford, and was born in 1770. After receiving the rudiments of his military education at Strasburg, he was appointed an ensign in the 6th Foot in 1785. His first services gave early promise of his future fame. From the time when, as captain of the 60th, he took possession of Toulon, in 1793, to the battle of Toulouse, in 1814, in which he added fresh laurels to his wreath, his military life was an almost unbroken series of successes. In 1799, when lieutenant-colonel of the 88th, he sailed for the East Indies, and from thence by the Red Sea to Egypt, across the desert, in command of a brigade of Sir David Baird's army. He remained in Egypt till its evacuation, as commandant of Alexandria. After some energetic services against the Irish rebels, Colonel Beresford, in 1805, proceeded to the Cape, and shared in the conquest of that colony. From thence he was sent in command of a small force, to seize Buenos Ayres. In 1807, as brigadier-general, he, in conjunction with Admiral Hood, seized upon Madeira, which was thenceforward held by the British in trust for the royal house of

Braganza. In 1808 he joined the British army in Portugal with the rank of major-general. He fought at Corunna, and was most active and efficient in assisting the embarkation of our troops. In 1809 he again proceeded to Portugal, to take the chief command of the Portuguese troops with the rank of marshal. From that time Marshal Beresford's achievements are part of the history of the period, the greatest of them being his victory over Soult at Albuera, one of the most bloody and most glorious of the names inscribed on the list of Peninsular successes. The thanks of Parliament were voted on the 7th of June to "Sir William Beresford and to the army under his command, who fought at Albuera on the 16th of May, 1811;" and in 1814 he was raised to the peerage, with a grant of £2000 per annum to himself and the two next inheritors of his title. In Spain he became duke of Elvas and marquis of Campo-Major, and in Portugal Conde dl Francisco. At home the prince regent conferred upon him a cross with seven clasps, and intrusted him with the governorship of Jersey. He sat for the county of Waterford in 1811, and for the borough in 1812, but as he was absent with our armies in the Peninsula, he never either spoke or voted in the House. In 1822 he was raised to the rank of viscount, and received the appointment of lieutenant-general of the Ordnance, and in 1828 became master-general of the Ordnance under the duke of Wellington as premier. Died, 1854.

BERESFORD, LORD JOHN GEORGE, archbishop of Armagh, primate of all Ireland, was born in 1778. He was educated at Eton and Oxford, became bishop of Cork in 1805, archbishop of Dublin in 1820, and archbishop of Armagh in 1822. In 1851, he was chosen chancellor of the university of Dublin, of which he had been vice-chancellor 22 years. He did not distinguish himself in literature or science, but in munificence he had few equals. The chief monument of his liberality is the cathedral of Armagh, which he restored at the cost of nearly thirty thousand pounds. He did much also for the Observatory, the Public Library, and the Royal School. Died at Auburn, Down, in 1862.

BERGHEM, NICHOLAS, an excellent and indefatigable Dutch landscape painter. Born, 1624; died, 1683.

BERGMAN, TORBERN OLOF, an eminent Swedish chemist, was born in 1735. He studied at Upsal University, applied himself to the study of various branches of physical science, became assistant professor of mathematics and physics, and in 1767 professor of chemistry. His discoveries and services to science were very numerous. He proved the acid properties of carbonic acid, discovered oxalic acid, and was one of the first to make chemical analysis of mineral bodies. He made experiments in electricity, and published an "Essay on Elective Attractions." It was Bergman who recognized first the talent of Scheele, then a boy, and did much to forward him. His works form six vols. 8vo. Died, 1784.

BERINGTON, JOSEPH, historian, was a native of Shropshire, was educated at the

college of St Omer discharging the duties of that country for 30 years, where he died in 1784. He is well known by his "Middle Ages," a useful history of the Middle Ages, and by his "Heloise," and a "History of Henry II."

BERKELEY, GEORGE, an illustrious philosopher and theologian, was born in 1684. He was educated at King's College, Dublin; visited several years in France, and spent several years in the West Indies. He became bishop of Cloyne in 1734. In 1728 he went, with three friends, to Rhode Island, for the purpose of founding there a school for the benefit of the Indians. The scheme failing, he returned to England, and made bishop of Cloyne in 1734. Berkeley is an idealist, and his philosophy is the natural reaction against the materialism of his age. His works are the "Principles of Knowledge," the "Dialogues between Philonous and Minute Philonous," "Minute Philonous," and "Theory of Vision and the Properties of Taste." He is also the author of "Further Thoughts on the Truth of the Christian Religion." Died at Oxford, 1753.

BERKENHOEF, JOHANNES, a learned theologian and scholar, was born in 1684. He was educated at the University of Göttingen, and became professor of divinity in 1713; author of the "Holländ," "Fœnem," &c. Died, 1812.

BERKLEY, SIR WILLIAM, a British statesman, author of the "Laws of Virginia," &c.

BERLICHINGEN, GOTTFRID, a brave man noble, lived in the 13th century. He was almost always put under the banner of Maximilian, and was killed at a fortress in which his story was dramatized.

BERNADOTTE-CHAMPAGNE, a Swedish statesman, was born in 1746. He studied at Upsal University, applied himself to the study of various branches of physical science, became assistant professor of mathematics and physics, and in 1767 professor of chemistry. His discoveries and services to science were very numerous. He proved the acid properties of carbonic acid, discovered oxalic acid, and was one of the first to make chemical analysis of mineral bodies. He made experiments in electricity, and published an "Essay on Elective Attractions." It was Bergman who recognized first the talent of Scheele, then a boy, and did much to forward him. His works form six vols. 8vo. Died, 1784.

BERINGTON, JOSEPH, historian, was a native of Shropshire, was educated at the

colleges of St Omer, in France, and after discharging the duties of a Romish priest in that country for 20 years, returned to England, where he died in 1827. He made himself known by his "Literary History of the Middle Ages," a useful work, but superseded by Hallam's on the same subject. Herington was also author of the "Lives of Abelard and Heloise," and a "History of the Reign of Henry II."

BERKELEY, GEORGE, bishop of Cloyne, an illustrious philosopher, was born in Ireland in 1684. He was educated at Trinity College, Dublin; visited London in 1713, and spent several years in travelling on the continent. He became chaplain to the duke of Grafton, and soon after dean of Derry. In 1728 he went, accompanied by two or three friends, to Rhode Island, in the hope of founding there a missionary institution for the benefit of the Red Indians. His scheme failing, he returned, and in 1734 was made bishop of Cloyne. In philosophy Berkeley is an Idealist, and his doctrines are the natural reaction against the prevailing materialism of his age. His most important works are the "Principles of Human Knowledge," the "Dialogues of Hylas and Philonous," "Minute Philosopher," "Analyst," and "Theory of Vision." His two works on the properties of Tar-water, "Sirla" and "Further Thoughts," attracted much attention. Died at Oxford, 1753.

BERKENHOUT, JOHN, an English physician and miscellaneous writer; author of "Biographia Literaria," "Outlines of the Natural History of Great Britain, and Ireland," &c. Born, 1731; died, 1791.

BERKHEY, JOHN LE FRANÇOIS VAN, Dutch physician, naturalist, and poet; named professor at the university of Leyden, in 1773; author of the "Natural History of Holland," "Poems," &c. Born, 1729; died, 1812.

BERKLEY, SIR WILLIAM, governor of Virginia; author of "The Description and Laws of Virginia," &c. Died, 1677.

BERLICHINGEN, GOETZ VON, surnamed "Iron-Hand," a brave and turbulent German noble, lived in the 15th and 16th centuries. He was almost constantly at war, was put under the ban of the empire by Maximilian, and was killed during the siege of a fortress in which he had taken refuge. His story was dramatized by Goethe.

BERNADOTTE—CHARLES JOHN XIV., king of Sweden and Norway, whose original name was **JEAN BAPTISTE JULE BERNADOTTE**, was the son of a lawyer at Pau in Bearne, and was born in 1764. He received a good education, and was designed for the bar; but he suddenly abandoned his studies, and enlisted as a private in the marines. For nine years from his enlistment, that is, up to the year 1799, the utmost rank that Bernadotte had attained was that of sergeant; but the French revolution, by sweeping away the arbitrary barrier which till then had rendered plebeian merit of little avail in the French service, gave Bernadotte an advantage which he improved so well, that in 1792 he was a colonel in the army of Austria. In 1793 he distinguished himself under the command of Kleber, as to be

raised to the rank of general of brigade, and, shortly afterwards, of division. On the Rhine and in Italy he more and more distinguished himself; and he showed that his talents were not those of a mere soldier, by his conduct in a somewhat difficult embassy to Austria. Between him and Napoleon there seems to have been a constant distrust; if not actual hatred; nevertheless, Bernadotte had a marshal's staff on the establishment of the consulate, and was created prince of Ponte Corvo in 1806. In all his campaigns Bernadotte was distinguished from the great majority of the French commanders, by the clemency and generosity of his conduct from the moment that the battle was at an end; and it was this conduct, even more than his brilliant reputation as a soldier, that caused him to be put in nomination as a successor of Charles XIII. of Sweden. Napoleon, then emperor, could but with difficulty be induced to consent to Bernadotte becoming crown-prince and heir to the throne. "What!" said Bernadotte, "will you make me greater than yourself by making me refuse a crown?" The sarcasm told, and Napoleon merely replied, "Go! our fates must be accomplished!" From the instant that he became crown-prince of Sweden, the fortunate soldier showed a determination to give all his energies to his adopted country: he formed a secret alliance with Russia in 1812, and in '13 he took command of the combined armies of Northern Germany against France. Never during half a century before his accession had Sweden known the peace or the prosperity in which he left her in the hands of his son Oscar. Died, 1844, aged 79.

BERNARD, ST, abbot of Clairvaux, was born of a noble family in Burgundy in 1091. He was carefully trained by pious parents, and sent to study at the university of Paris. At the age of 23 he entered the then recently founded monastery of Cîteaux, accompanied by his brothers and above twenty of his companions. He observed the strictest rules of the order, and so distinguished himself by his ability and acquirements that he was chosen to lead the colony to Clairvaux, and was made abbot of the new house; an office which he filled till his death. His fame attracted a great number of novices, many of whom became eminent men. Among them were Pope Eugenius III., six cardinals, and many bishops. In 1128 he prepared the statutes for the order of Knights Templars. Popes and princes desired his support, and submitted their differences to his arbitration. His influence Innocent II. was recognized as lawful pope: he had a public debate with Abelard on some doctrines of his philosophy, and procured his condemnation; courageously opposed the doctrine of the immaculate Conception of the Virgin and the festival instituted in its honour; was founder of 160 monasteries; and was the chief promoter of the second crusade. At the council of Vezel, in 1146, he spoke as if inspired before the king and the nobles of France, and with his own hand gave them their crosses. He then preached the crusade in Germany, persuaded the Emperor Conrad to join it, and refused the command which was offered

h. a. His prediction of success was falsified. St Bernard was the vehement adversary of Arnold of Brescia, and procured his banishment from Rome, and from Zürich. He successfully attacked the doctrines of several so-called heretics. He steadily refused the offers of several archbishoprics and other dignities, preferring to remain abbot only. His character and his writings have earned him the title of Last of the Fathers. The power and tenderness and simplicity that characterize his sermons and other works have secured the admiration of Protestants and Catholics alike. Dante introduces him in the last cantos of the "Paradise" with profound reverence and admiring love; and Luther studied his writings with the same feelings. St Bernard died at Clairvaux in 1153, and was canonized in 1174.

BERNARD, EDWARD, an English philologist and critic; educated at Oxford, where he became Savilian professor of astronomy, and assisted in the republication of the works of the ancient mathematicians. He was author of a learned and valuable "Treatise on Ancient Weights and Measures," &c. Born, 1638; died, 1697.

BERNARD, of MENTHON, an ecclesiastic of the 10th century; founder of the well-known monasteries of the Great and Little St Bernard, in the passage of the Alps. Died, 1008.

BERNARD, PIERRE JOSEPH, a French amatory poet, styled by Voltaire, *le gentil Bernard*, an epithet by which he is still distinguished. Born at Grenoble, 1710; died, 1775.

BERNARD, of THURINGIA, an enthusiast of the 10th century, who predicted that the end of the world was at hand, and caused much terror to his ignorant and superstitious believers.

BERNHARD, duke of Saxe-Weimar, one of the greatest generals of his age, was born in 1600. He entered the army, and early distinguished himself. After being engaged in several affairs of minor importance, he joined the army of Gustavus Adolphus in 1631, in the war against the house of Austria. He took part in the siege of Würzburg, assisted at the passage of Oppenheim, took Manheim, and drove the enemy from the Palatinate. He commenced the conquest of Bavaria, completed the victory of Lützen after the fall of Gustavus, and drove the Austrians from Saxony. He afterwards had a command subordinate to Marshal Horn, and was harassed by intrigues. He took Ratisbon, which was soon lost, and with Horn was defeated at Nordlingen, in September, 1634. Soon after he accepted a subsidy from the king of France and concerted operations with Richelieu. In 1638, he won the battle of Rheinfeld and took Alt Erisach. Died, 1639.

BERNARD, SIMON, general of engineers of France, was born at Dôle in 1779. The kindness of the parish priest supplied him with sufficient learning to allow his entering the Polytechnic School at fifteen years of age. La Place, Hûy, and other great men were then at the head of the Polytechnic School, and so well did Bernard avail himself of their lessons, that he not only

became one of the most distinguished engineer officers and aides-de-camp of Napoleon, but, subsequently to the emperor's fall, executed works in the United States, which are undoubtedly unequalled elsewhere; the most distant places being united by canals, actual navigable rivers, and upwards of four thousand five hundred miles of frontier rendered secure against invasion by forts and works. After July, 1830, he returned to France, and was for some time minister of war. Died, 1839.

BERNARDEZ, DIEGO, called by his countrymen the Portuguese Theocritus, was not more eminent as a pastoral poet than as a brave warrior. After numerous deeds of heroism, he was taken prisoner by the Moors at the battle of Alcazarquivir. Died, 1466.

BERNARDIN, DE ST PIERRE. [ST PIERRE.]

BERNARDINE, ST, of Siena; born at Massa-Carrara, in Italy, 1380. He retired in 1404, joined the order of Observantines, of which he became vicar-general, refused offers of several bishoprics, and established above 300 monasteries. Died, 1444, and was canonized six years after his death by Nicholas V. The works of St Bernardine fill five folio volumes.

BERNERS, Lord. [BOURCHIER.]

BERNI, FRANCESCO, an eminent Italian poet of the 16th century. He remodelled Esjardo's Orlando Innamorato, and was the author of "Rime Burlesche," and various Latin poems. The gracefulness and purity of his diction have been seldom equalled; his humour, though broad, is not low; and though his themes or allusions are often licentious, his works display many traits of moral feeling, which would do no discredit to a better age. Died, 1536.

BERNIER, FRANÇOIS, a celebrated French traveller, who, after taking his degree as doctor of medicine at the university of Montpellier, went to Palestine and Egypt, thence to India, and resided at the court of Aurungzebe for twelve years as his physician. He accompanied the great Mogul emperor on his expedition to Cashmere, and afterwards returned to his own country. In 1685, Bernier visited England. His "Travels," which first appeared in 1670, became immediately popular, and have been frequently republished and translated into various languages. Died, 1688.

BERNINI, GIOVANNI LORENZO, called *Il cavaliere Bernini*, was born in Naples, 1598, and obtained among his contemporaries the reputation of being the modern Michael Angelo, on account of his success as painter, statuary, and architect. At the age of 18 he produced the Apollo and Daphne, in marble, a masterpiece of grace and execution. He was a protégé of Cardinal Maffeo Barberini, who, as soon as he became pope (Urban VIII.), appointed him his architect. Bernini executed many works in St Peter's, built the Palace Barberini, and the Campanile of St Peter's, executed a statue of Charles I. of England from portraits painted by Vanoyck, visited Paris in 1665, his journey being a triumphal procession, at 70 erected the monument to Alexander VII., and ten years later sculptured the figure of

Christ in bas-relief continuing in the his art, as sculptor period of his death.

BERNIS, FRANÇOIS, Cardinal, DE, a by Madame de Pom for him a pension; important offices in ambassador to Rome, at the dignity of carol volution deprived him reduced him to poverty which he was relieved the Spanish court. E

During the A cted the armed neutra

Christ in bas-relief for Queen Christina, continuing in the indefatigable pursuit of his art, as sculptor and architect, till the period of his death, in 1680.

BERNIS, FRANÇOIS JOACHIM DE PIERRES, Cardinal, DE, a French poet, patronized by Madame de Pompadour, who obtained for him a pension; he subsequently filled important offices in the state, was sent as ambassador to Rome, and at length arrived at the dignity of cardinal. The French revolution deprived him of his fortune, and reduced him to poverty in his old age, from which he was relieved by a pension from the Spanish court. Born, 1715; died, 1794.

BERNOULLI, JAMES, a distinguished mathematician, one of a family of great mathematicians, was born at Basel in 1654. He indulged his passion for geometry against the will of his father, who wished him to enter the church. He seized quickly on the first suggestions of Leibnitz respecting the Differential Calculus, and zealously pursued the study of it. In 1687 he was chosen professor of mathematics at Basel, and was one of the first foreign associates of the French Academy of Sciences. A painful altercation was carried on between him and his brother John respecting some scientific problems: John displaying much ill-temper, unfairness, and jealousy of his brother's evident superiority. Died, 1705.

BERNOULLI, JOHN, brother of the above, and like him an eminent mathematician. He succeeded his brother as professor of mathematics at Basel in 1705, having previously held the same office at Groningen for ten years. He was fellow of the Royal Society of London, member of the Academies of Paris and Berlin, and was in science the worthy rival of Newton and Leibnitz. Born, 1667; died, 1748.

BERNOULLI, DANIEL, son of the last named; professor of natural philosophy at Basel; and, like his father and uncle, highly skilled in the mathematics. He published several mathematical works, among which are to be noted the "Traité de Hydrodynamique," the first treatise on that subject. He was member of the Academies of Paris, Berlin, and St Petersburg, and F.R.S., London. Born, 1700; died, 1782. [Several other members of this family were also distinguished for their mathematical attainments, and it is stated that the list of foreign associates of the French Academy of Sciences constantly included the name of Bernoulli from 1699 to 1790.]

BERNSTORFF, JOHANN HARTWIG, Count, a celebrated statesman in the service of the king of Denmark. He was employed on various embassies, and afterwards held the office of foreign minister of Frederick V. for about 20 years, resigning in 1770. He negotiated the treaty with Russia respecting Holstein. Count Bernstorff was the founder of the Danish Society of Language and the Fine Arts, and the Economical and Agricultural Society. Born at Hanover, 1712; died, 1772.

BERNSTORFF, ANDREAS PETER, Count, nephew of the above, and also Danish minister of state. During the American war he effected the armed neutrality of Russia,

Prussia, Denmark, and Sweden, for the protection of the trade of those powers against the belligerents; and it was chiefly owing to his skilful policy that Denmark was prevented from being drawn into collision with either Sweden or Russia, when the war broke out between those powers in 1788. Born, 1735; died, 1797.

BEROALDO, FILIPPO, an Italian littérateur, who long held the chair of Belles Lettres at the University of Bologna, and was for some years secretary of the republic. He published editions of Pliny the younger and other classical authors. Born, 1453; died, 1605.

BEROALDO, FILIPPO, nephew of the above, Italian poet; librarian of the Vatican under Pope Leo X. He published a valuable edition of Tacitus. Died, 1518.

BEROSUS, priest of the temple of Belus, at Babylon, about B.C. 260. He wrote a history of Chaldee, some fragments of which are preserved by Josephus and Eusebius.

BERQUIN, ARNAULD, an elegant French writer; chiefly known as the author of "L'Ami des Enfants," and other interesting works for children. He imitated the works of the German Christian Felix Weiser, giving them however fresh attractions by his love of his style, and the sincerity of his love for children. Born, 1749; died, 1791.

BERRETTINI, PIETRO. [CORTONA.]

BON, CHARLES FERDINAND DE BOURBON, Duke de, second son of the Count d'Artois, afterwards Charles X. of France; assassinated by one Louvel, who attacked him just as he had left the opera-house, and was on the point of stepping into his carriage, Feb. 13, 1820. He shared in common with the Bourbons all the reverses they were doomed to suffer; but he deserved a better fate, if it were only for the benevolence of his character. His son Henri, born posthumously, commonly called the Duc de Bordeaux, or the Comte de Chambord, is the legitimate heir to the throne of France.

BERTHELIER, PHILIBERT, statesman, born at Geneva, about 1470. He distinguished himself by his bold opposition to the ambitious attempts of the duke of Savoy to make himself master of the republic, and to the cruel tyranny of the duke of Savoy, whom the pope had made prince-bishop of Geneva. Berthelier was at the time member of the Supreme Council. Compelled to fly to Friburg, he negotiated an alliance by which the Genevese and Friburgers became fellow-citizens. The duke in vain attempted to corrupt this noble patriot. When the prince-bishop returned with an army to Geneva, Berthelier refused to fly, and he was arrested, imprisoned, and beheaded, in the autumn of 1519.

BERTHIER, ALEXANDER, prince of Neuchâtel and Wagram, marshal and vice-constable of France, was born at Versailles, in 1753, and served with Lafayette in the American war of independence. At the commencement of the French revolution he was made a general officer, fought gallantly in La Vendée, and was at the head of Buonaparte's staff in Italy, Egypt, and Germany. He was, in fact, the companion of Napoleon.

In all his expeditions, dining with him and travelling in the same carriage; and his skill in drawing up despatches, joined to his unwearied application and methodical habits, proved of incalculable value to the emperor in the vast pressure of his affairs. On the restoration of Louis XVIII., however, in 1814, he recognized his authority, and was created a peer; but when his former master returned from Elba, he retired to his family at Bamberg, where, as soon as the music of the Russian troops, on their march to the French borders, was heard at the gates of the city, he put an end to his life in a fit of frenzy or remorse, by throwing himself from a window of his palace, June 1, 1815.

BERTHOLLET, CLAUDE LOUIS, Count, one of the most eminent chemists of his age, was born at Talloire, Savoy, in 1748, and studied medicine at Turin. He afterwards settled in Paris, where he became intimate with Lavoisier, was admitted a member of the Academy of Sciences, and made professor of the normal school. He accompanied Buonaparte to Egypt; and, during the emperor's reign, was made a senator and an officer of the Legion of Honour; but he was one of the first to desert his patron when his fortunes were on the decline; for which he received the title of count from Louis XVIII. His principal work is "Essai de Statique Chimique;" but he wrote many other valuable essays, and had also a large share in the reformation of chemical nomenclature. Died, 1822.

BERTHOUD, FERDINAND, a skilful Swiss clock and chronometer maker; author of "Traité des Horloges Marines," &c. Born at Neuchâtel, 1727; died, 1807. His nephew, **LOUIS**, inherited his talents, and was not less celebrated than his uncle. The accuracy of their chronometers is proverbial.

BERTIN, ANTOINE, a French military officer and an elegant poet; author of "Elegies" and other poems, which were greatly esteemed. Born in the Isle of Bourbon, 1752; died at St Domingo, 1790.

BERTRAND DU GUESCLIN, [DUGUESCLIN.]

BERTRAND, HENRI, Count, a distinguished French general, and the companion in exile of Napoleon Buonaparte, would have earned a bright name on the page of history merely by his military achievements during the wars of the empire, were not those achievements cast, comparatively, into the shade by the steadfast fidelity with which he clung to Napoleon. Aiding that great soldier to gain some of his most splendid victories; covering him when in retreat and peril, as after the murderous affair of Hanau; following him to his *free* exile to Elba; returning with him to share all the perils of "blood-stained Waterloo;" he, the brave and steadfast Bertrand, feared not the imprisonment of St Helena, but voluntarily abode there until he had seen the *first* obsequies of his sincerely worshipped human idol. Honour to fidelity! Born, 1770; died, 1844.

BERTRANDI, GIOVANNI AMBROGIO MARIA, an eminent surgeon and anatomist of Turin; author of a treatise on surgical operations, and other professional works. Born, 1723; died, 1765.

BERULLE, PIERREDE, Cardinal, founder of the French congregation of the Oratory. He was employed in many affairs of state in France; and accompanied Henrietta Maria, wife of Charles I., to England as her confessor. Died, 1629.

BERVIC, JEAN GUILLAUME BALVAY, a French engraver, was born at Paris, in 1756. He was received at the Academy of Painting in 1784, was afterwards a member of the Institute and of the Legion of Honour, and died, 1822.

BERWICK, JAMES FITZJAMES, Duke of, was a natural son of James II. and Arabella Churchill, sister of the duke of Marlborough, and was born in 1670. His first military service was under Charles, duke of Lorraine, in Hungary, and he was present at the siege of Buda, and the battle of Mohacz. He was created duke of Berwick in 1687. He accompanied James II. to France at the revolution, served under him in Ireland, and was at the battle of the Boyne. He became lieutenant-general in the French army, and was naturalized in France. He afterwards commanded in Spain, and by the victory of Almanza, secured Valencia to Philip V. He especially distinguished himself by the defence of Provence and Dauphiny in 1709. He was killed at the siege of Philippsburg in 1734. He left memoirs of his own life.

BERZELIUS, Baron, one of the greatest chemists of modern times, was born in 1779, in Ostgothland, a province of Sweden, where his father kept a village school. After graduating at Upsala in 1804, he repaired to Stockholm, where he became an assistant to Sparrmann, who had accompanied Captain Cook in one of his voyages round the world; and at his death, in 1806, he succeeded him in the chair of chemistry, which he continued to fill for forty-two years. It would be impossible within our limits to give even a summary of his labours during this period; suffice it to say, that in a century which has produced a greater number of distinguished chemists than perhaps of any other class of men of science, Berzelius stood out as a star of the first magnitude. His patient labours, and ingenious investigations, have done more to lay the foundations of organic chemistry, than those of any other chemist. To him pre-eminently belongs the honour of applying the great principles which had been established by Dalton, Davy, Gay-Lussac, and himself, in inorganic chemistry, to the study of the laws which regulate the combinations forming the structures of the animal and vegetable kingdoms; and of thus opening the way for the discoveries of Mulder, Liebig, Dumas, and others. To him chemistry is indebted for the discovery of several new elementary bodies, more especially selenium, morium, and cerium; and to his skill as a manipulator may be traced many of the analytical processes at present in use. Under these circumstances it is not surprising that all the scientific societies of the world contended for the honour of enrolling his name among their members; and the various minor honours which he received from his own sovereign from time to time, were finally crowned by his being made a Knight Grand Cross of the Order of Vas

In 1829, and his elevation to the rank of baron in 1835. Died, 1848.

BESSARION, JOHN, the most eminent restorer of the 15th century, and founder of the library of St Mark, a native of Trebizond, and a monk of St Basil. He was distinguished in the Peloponnese, where he passed twenty years, under the emperor John Palaeologus, and was afterwards of Ferrara, at which time he translated the Greek and Latin churches published. For the zeno Bessarion rendered on made a cardinal by Pope afterwards the title of constantinople given him by the last thirty years of voting himself to the cure, and discharging several. Disciple of G became early an admirer wrote a work in defence philosophy in answer to second. He also translated of Aristotle and Xenophon. Died, 1472.

BESSEL, FRIEDRICH, the most eminent German astronomer at Minda in 1784. He was a mathematician and extraordinary astronomer. His astronomical calculations were still clerk in a mathematics. In 1806 he was an astronomer Schroeter four years later he was chief of astronomy and mathematics, and was named at the time of the new observations of the new observations, and his reputation, and was the principal scientific work among others, of the Royal Societies of London. His memorable achievements were the parallax of a fixed star, attained a singular name in astronomy, improving methods of detecting and avoiding calculation. His great work "Astronomia," on the subject of his time for ten years Bradley's observations, which is a marvel of patience. His other works are "Astronomia," "Astronomia," and numerous others. His son in 1841 weighed the earth, and he died in 1846.

BESSIERES, JEAN BAPTISTE, a French general, was born in 1768. He first distinguished himself in the Revolutionary war, and was afterwards in the Imperial guard of Louis XVIII. He was killed in 1796, especially at Rovereto. He became from that time a general in the army of Egypt, contributed to the capture of the island of Malta, and was created marshal of France after grand eagle of the Legion of Honour, and duke of Istria. He was killed in the Russian Imperial guard, and took part in the battle of

in 1829, and his elevation to the rank of a baron in 1835. Died, 1848.

BESSARION, JOHN, Cardinal, one of the most eminent restorers of learning in the 15th century, and founder of the noble library of St Mark, at Venice. He was a native of Trebizond, and a monk of the order of St Basil. He was drawn from his monastery in the Peloponnesus, where he had passed twenty years, to accompany the emperor John Palaeologus to the great council of Ferrara, at which the union of the Greek and Latin churches was formally accomplished. For the zealous service which Bessarion rendered on this occasion he was made a cardinal by Pope Eugenius, and had afterwards the title of patriarch of Constantinople given him by Pius II. He spent the last thirty years of his life at Rome, devoting himself to the promotion of literature, and discharging several important embassies. Disciple of Gemistus Pletho, he became early an admirer of Plato, and he wrote a work in defence of the Platonic philosophy in answer to George of Trebizond. He also translated parts of the works of Aristotle and Xenophon. Born, 1395; died, 1472.

BESSÉL, FRIEDRICH WILHELM, one of the most eminent German astronomers, was born at Minden in 1784. His taste for mathematics and extraordinary expertness in astronomical calculations were shown while he was still clerk in a merchant's office at Bremen. In 1806 he was chosen assistant to the astronomer Schroeter at Lilienthal; and four years later he was called to the chair of astronomy and mathematics at Königsberg, and was named at the same time director of the new observatory. By his unceasing and fruitful labours he obtained the highest reputation, and was chosen member of the principal scientific bodies of Europe; among others, of the Royal and Astronomical Societies of London. One of his most memorable achievements was his discovery of the parallax of a fixed star (61 Cygni), and attained a singular mastery of practical astronomy, improving methods of observation, detecting and avoiding sources of error in calculation. His great work is the "Fundamenta Astronomiæ," on which he spent much of his time for ten years. It is founded on Bradley's observations, the reduction of which is a marvel of patient toil and accuracy. His other works are "Tabulæ Reumontane," "Astronomische Untersuchungen," and numerous memoirs. The loss of his son in 1841 weighed heavily on his mind, and he died in 1846.

BESSIÈRES, JEAN BAPTISTE, marshal of France, and duke of Istria, was born in Languedoc in 1768. He first served in the constitutional guard of Louis XVI.; distinguished himself in the Italian campaign of 1796, especially at Roveredo and Rivoli, and became from that time the intimate friend of Napoleon. He accompanied him to Egypt, contributed to the victory of Aboukir, was created marshal in 1804, and after grand eagle of the Legion of Honour, and duke of Istria. He overthrew the Russian Imperial guards at Austerlitz, took part in the battles of Jena and

Eylau. He served in Spain, in the campaign of Wagram, and in the expedition to Russia. He was killed by a shot while making a reconnaissance of the field of Lützen, the day before the battle, May, 1813.

BETHAM, SIR WILLIAM, an English antiquary, was a native of Suffolk. He was born in 1778, went to Dublin in 1805, where he became Deputy Keeper of Records, and member and foreign secretary of the Irish Academy. He was also F.S.A., London. He was author of "The Gael and Cimbri," "Etruria Celtica," "Origin and History of the Constitution of England," &c. Died, 1853.

BETHENCOURT, JEAN DE, a Norman baron, and a military adventurer, who conquered the Canary Islands, and afterwards held them as a fief of the crown of Castile. Died, 1425.

BETHLEM-GABOR, prince of Transylvania, was born of a noble Hungarian family, and by the aid of the Turks got himself proclaimed Prince in 1613. He afterwards made conquests in Austria, and was elected king of Hungary, but had soon after to make terms with the emperor and renounce that title. He was a zealous Protestant, did good service on the Protestant side in the Thirty Years' War, and raised his country to a new importance. Died, 1629.

BETHUNE, MAXIMILIAN DE. [SULLY, Duke of.]

BETTERTON, THOMAS, a very celebrated actor, was born at London in 1635. He was first a bookseller's apprentice, but became a member of Sir W. Davenant's company soon after the Restoration, and earned so high a reputation that the king sent him to France to gather suggestions for the improvement of theatrical representations. He opened a theatre of his own in 1695, but retired in a few years. He acted on several occasions subsequently, the last time in April, 1710, when suffering from gout; and he died a few days after. He was loved and honoured as a man no less than he was admired as an actor.

BETTINELLI, SAVERIO, a Jesuit of Mantua, and a celebrated littérateur. He was an elegant and accomplished writer, epistolary, dramatic, and poetical; his principal work is the "Risorgimento d'Italia," a sketch of the progress of literature, science, and art in Italy. His "Lettere dieci di Virgilio agli Arcadi" attracted much attention, but did him little honour. Born, 1718; died, 1808.

BEURNONVILLE, PIERRE RIEL, Count of, French marshal; minister of war in 1793; ambassador at Berlin and Madrid during the consulate, and under the empire grand officer of the Legion of Honour. He voted for the deposition of Napoleon, and attached himself to Louis XVIII., by whom he was rewarded with the title of marshal. Died, 1821.

BEVERIDGE, WILLIAM, bishop of St Asaph, was a native of Leicestershire, and was born in 1638. He was educated at Cambridge, and after holding several parochial charges, in which he distinguished himself by his simple piety and earnest labours, he was made prebendary of St Paul's, arch-

archologist and astronomer, born at Verona in 1662. He settled at Rome at the age of 22, where his acquirements soon made him the friend of the most eminent men. He made laborious explorations and drawings of many ancient monuments and remains; made astronomical observations, and undertook to draw a meridian line through Italy, which however after years of toil he had to leave incomplete. He was patronized by Pope Alexander VIII. and his two successors, was admitted to the French Academy of Sciences, visited Paris and Oxford, and died at Rome in 1729. He edited the "Lives of the Roman Pontiffs" by Anastasius, and wrote the first part of a "Universal History founded on the Monuments of Antiquity;" an account of the Palace of the Cæsars, &c. **BIAS**, one of the seven sages of Greece, and a native of Priene, in Ionia; celebrated for his practical knowledge and strict regard to Justice. He flourished about 550 B.C., and died at a very advanced age.

BICHAT, MARIE FRANÇOIS XAVIER, an eminent French physiologist, was born in 1771. He went to Paris in 1793, and studied under Desault, who soon made him his friend and associate. He was an indefatigable student and observer, made very numerous experiments and discoveries in anatomy, worked hard both as teacher in his school of medicine and as author, and died in 1802. His great work is the "Anatomie générale appliquée à la physiologie et à la médecine." He also wrote "Recherches physiologiques sur la vie et la mort," "Traité des membranes," and "Anatomie descriptive."

BICKERSTAFF, ISAAC, a dramatic writer of the 18th century; author of "Love in a Cage," "Lionel and Clarissa," &c.

BICKERSTETH, EDWARD, a church of England divine, and a prolific writer on religious topics, was born in 1786. His original destination was the law; but after residing for some years as an attorney at Norwich, he desired to enter the ministry, and obtained ordination from Bishop Bathurst in 1815. Soon afterwards he was appointed secretary to the Church Missionary Society in London, and at the same time became assistant minister to an episcopal church in Spitalfields. In 1830 he was presented to the living of Wotton, in Hertfordshire, where he laboured with great zeal and efficiency down to the period of his death, 28th February, 1850. Mr Bickersteth's work was his "Help to the Study of the Scriptures;" and this was followed by many useful works on divinity; and on all occasions he exhibited himself as a most promising opponent to Popery and Unitarianism.

BIDDLE, JOHN, a Socialian writer of considerable note in the time of Charles I. and the Commonwealth, and now regarded as the founder of English Unitarianism; author of a "Confession of Faith concerning the Holy Trinity," and other works in defence of his principles. He was frequently detested and imprisoned, and died of a fever brought on in gaol in 1622.

BLOO, GODFREY, a Dutch anatomist; after holding a professorship at the University of Leyden, he was appointed physician to William

III. of England, and became a few years later professor of anatomy at Leyden university. He published a fine collection of anatomical plates under the title of "Anatomia Corporis Humani," &c. Born, 1649; died, 1723.

BIGLAND, JOHN, a voluminous miscellaneous writer, whose first publication did not appear till he was fifty years of age; author of "A System of Geography and History," "Histories of Spain and England," "Letters on English and French History," &c. Died, 1832, aged 82.

BIGNON, JEROME, a learned French writer, born at Paris, 1589. The fame of his attainments led to his appointment as companion to the Dauphin, afterwards Louis XIII. In 1614 he visited Italy, and spent some time with Father Paul at Venice. He was afterwards keeper of the king's library, and was sometimes employed in political affairs. He published a "Discours de la ville de Rome," a "Traité de l'élection du pape," "Traité de l'excellence des rois et du royaume de France," &c. Died, 1656.

BIGNON, L. P. EDOUARD, was born at Meilleraye, of a respectable family, and early entered on the diplomatic career as secretary of legation in Switzerland, and subsequently in Savoy and Prussia, and was made intendant of Berlin after the battle of Jena. Ambassador in Poland, both before and after the retreat from Moscow, he rendered the most important services to the French army. He subsequently held many important offices, was a member of the chamber of deputies under the restoration, and was made peer of France in 1839. He wrote, at the express desire of Napoleon, a "History of French Diplomacy." Born, 1771; died, 1840.

BILDERDYK, WILLEM, a modern Dutch poet, born at Amsterdam in 1756; he was educated at Leyden and practised as an advocate, but was driven from his country by the civil war, and lived abroad for twenty years. Part of the time he spent in England. He returned in 1806, and was made president of the Dutch Institute. Bilderdyk, though ranking among the chief poets of Holland, has little originality or imagination. Many of his works are translations or imitations. Among these are two of the plays of Sophocles, and the "Fingal" of Ossian. Of his own works the principal are the "Love of Fatherland," "Rural Life," and his last work, the "Destruction of the First World." Died, 1831. Bilderdyk's second wife, **CATHARINA WILHELMINA**, was an intellectual and accomplished woman, author of two tragedies, some poems, and a translation of Southey's "Roderic." She died, 1830.

BILLAUD-VARENNE, JACQUES NICOLAS, the son of a French advocate at Rochelle, was educated at the same college as Fouché, and proved himself one of the most violent and sanguinary characters of the French revolution. He bore a principal part in the murders and massacres which followed the destruction of the Bastille; voted immediate death to Louis XVI.; and officiated as president of the Convention on the 18th of Oct., 1793. He was afterwards deported to Cayenne, and subsisted on a

small pension allowed him by Pethion. Died at St Domingo, in 1819.

BILLINGSLEY, SIR HENRY, was a native of Canterbury, who, as a London tradesman, acquired great wealth, and became lord mayor in 1597. He was educated at Oxford, and was assisted in mathematics by an ex-friar of the Augustine order, to whom he had generously given shelter and support, and he was the first who published Euclid's Elements in English. Sir H. Billingsley was one of the first members of the Society of Antiquaries. Died, 1616.

BILLINGTON, ELIZABETH, the most celebrated English female singer of her time. She was of German extraction, though born in England. Her popularity was equally great in England and on the continent, and remained undiminished to the close of her public career in 1809. Died, 1817.

BILSON, THOMAS, bishop of Winchester, in the reigns of Queen Elizabeth and James I.; author of several theological treatises, and one of the translators of the Bible. He was made bishop of Worcester in 1596, and transferred the next year to the see of Winchester. Bilson took a prominent part in the celebrated conference at Hampton Court in January, 1604. Born, 1536; died, 1618.

BINGHAM, JOSEPH, a learned divine of the church of England, was born at Wako-field in 1668. He was educated at Oxford, became fellow of University College, and graduated M.A. in 1691. Four years later he became rector of Headbourne-Worthy near Winchester, and in 1712 rector of Havant near Portsmouth. His great work is entitled "Origines Ecclesiasticæ, or the Antiquities of the Christian Church." It appeared in 10 vols. 8vo, between 1708—1722. He wrote several minor works, and died in 1723.

BINGHAM, SIR GEORGE RIDOUT, major-general in the British army, was born in 1777. He entered the service in 1793, as an ensign in the 69th foot; and progressively advanced in different regiments, till he became lieutenant-colonel of the 53rd, being present at the most important transactions in the Peninsula, for which services he was rewarded by knighthood. He afterwards had the charge of Buonaparte from England to St Helena, where he remained several years, and was promoted to the rank of major-general and colonel-commandant of the second rifle brigade. Died, January, 1833.

BINGLEY, WILLIAM, miscellaneous writer, was born in Yorkshire and educated at Cambridge. He was chiefly known as the author of "Animal Biography," "Memoirs of British Quadrupeds," &c. Died, at London, 1823.

BION, a Greek pastoral poet: his poems, published with those of his friend and disciple, Moschus, are remarkable for simplicity and sweetness. He lived about 280 B.C.

BIOT, JEAN BAPTISTE, a very eminent French mathematician, born at Paris in 1774. After a brilliant course of study he was called to the chair of mathematics at the Central School at Beauvais, whence he removed in 1800 to the College of France, to hold the professorship of natural philosophy.

He was chosen by the Board of Longitudes to make observations along the English arc of the meridian, and for that purpose visited Great Britain in 1817. It was during this visit that Humboldt, Arago, and Biot met at Greenwich Observatory. Biot had previously assisted in measuring the arc of the meridian extended through Spain. He was a member of the French Academy of Sciences, of the Institute, of the Legion of Honour, a foreign member of the Royal Societies of London and Edlaburgh, and of many other scientific societies. He is especially celebrated as the discoverer of the circular polarization of light. Besides numerous memoirs contributed to the Academy and to scientific journals, Biot wrote, "Traité élémentaire d'Astronomie Physique," "Traité de Physique expérimentale et mathématique," "Recueil d'Observations géodésiques," &c. &c. Died, 1862.

BIRAGUE, CLEMENT, an engraver on gems, said to have been the first discoverer of the art of engraving on diamonds. He was born at Milan, and flourished about the middle of the 16th century.

BIRAGUE, RENÉ DE, a Milanese of noble family, who sought shelter in France from the vengeance of Lodovico Sforza, and became a cardinal and chancellor of France. He is infamously memorable as one of the authors of the massacre of St Bartholomew. Born, 1509; died, 1563.

BIRCH, THOMAS, originally a Quaker, but subsequently a divine of the Church of England. He was an industrious historian and biographer; took part in the English translation of Bayle's great Critical and Historical Dictionary, and wrote, among many other works, a "History of the Royal Society," to which he was admitted in 1734, and of which he subsequently became secretary; "Memoirs of the Reign of Queen Elizabeth," &c. Born, 1705; died, 1768.

BIRD, EDWARD (R.A.), an English painter, chiefly of familiar and domestic subjects, was a native of Wolverhampton, and settled early at Bristol. He was made, in 1813, historical painter to the Princess Charlotte. Among his works are "Good News," "the Blacksmith's Shop," "the Field of Chevy Chase," and the "Surrender of Calais." In later life he attempted subjects of a higher class, but not successfully. Born, 1772; died, 1818.

BIRD, JOHN, an eminent mathematical instrument maker; author of "The Method of constructing Mural Quadrants," &c. Died, 1766.

BIRDE, WILLIAM, an eminent musician in the reign of Elizabeth. He composed much sacred music; and to him the fine composition "Non nobis Domine" is attributed. He was made organist to Queen Elizabeth in 1573. Born, 1543; died, 1623.

BIREN, JOHN ERNEST DE, duke of Courland, who, though the son of a peasant, by his handsome person and address, obtained such influence over Anne, daughter of Peter I. and duchess of Courland, that when she ascended the throne of Russia, she committed the reigns of government to Biren, made him duke of Courland, and at her death, in 1716, left him regent of the empire. His administration was marked by extreme tyranny and

ty. He is said to have
000 persons, and to have
many to exile. He was
ed to Siberia, was recall

belly. He is said to have put to death 1000 persons, and to have sentenced twice as many to exile. He was subsequently banished to Siberia, was recalled by Peter III., and had his duchy restored to him by Catharine, in 1763, but six years afterwards he was banished in favour of his eldest son. He died, 1772.

BIRKBECK, GEORGE, M.D., president of the London Mechanics' Institute, was the son of a merchant and banker at Settle, in Yorkshire, where he was born in 1776. In boyhood he displayed a strong inclination to those mechanical pursuits to which he afterwards became so devoted; but his parents having determined that he should embrace the medical profession, he first studied for this object at Leeds, then resided in London to become a pupil of Dr. Keble, and subsequently went to Edinburgh to complete his education. At the age of twenty-one he was appointed professor of natural history in the Andersonian Institution of Glasgow; and having while there successfully established a mechanics' class, was induced, in 1822, to found the London Mechanics' Institution in Chancery Lane; which society he generously lent £3000 to erect a museum, lecture-room, &c. In this institution Dr Birkbeck was elected president; and from it nearly all the various scientific institutions throughout Great Britain have been established. As a physician, he enjoyed a considerable share of reputation, and was the promoter of mechanic arts, and the friend of the industrious artisan, no one would possibly be more generally or more justly esteemed. He also numbered among his friends the most eminent scientific and literary men of the day. Died, Dec. 21, 1841.

BIRKENHEAD, Sir JOHN, a political leader of the 17th century; several times banished during the Commonwealth for being in favour of the exiled king. Born, 1619. Died, 1679.

BIRON, ARMAND DE GONTAUT, Baron de Sancerre, of France, was born about 1524. He was raised to the rank of duke of Navarre, and was admitted to the service of the king of France. He took a prominent part in the wars of Huguenot and Catholic, and was killed at the battles of Dreux, St Denis, and Ivry. He negotiated the peace of Amboise, and narrowly escaped at the siege of St Bartholomew. He recovered the province of Languedoc from the Protestants in the Netherlands against the emperor, and was one of the first to be crowned as king. He distinguished himself at the battle of Arques, the battle of Paris, and the battle of Ivry, and died at the siege of Epernay in 1592.

BIRON, CHARLES DE GONTAUT, Duke de Sancerre, of France, was son of the preceding, and born about 1562. He entered the army, and served at Arques, Ivry, and the battle of Paris; was made admiral of France and marshal in 1594. He cared not for Catholicism, nor Protestant, and in 1600 he was banished to the Spanish court and the duke of Savoy against Henry IV. The king forgave him, but he continued to intrigue against the king, and at last was arrested and sent to the

Bastille, and was there tried and beheaded, in 1602.

BIRON, ARMAUD LOUIS GONTAUT, Duke de Sancerre, at first known as the duke de Lauzun, was born about 1760; one of the most celebrated men of the French revolution, remarkable at once for his amours, his attachment to liberty, and his military exploits. He served with La Fayette in America, and attached himself to the party of the duke of Orleans, on his return. In 1792 he was joined with Talleyrand in a mission to this country; on his return, served under Rochambeau, in Flanders; and perished by the guillotine at the end of 1793, on a charge of counter-revolution. He died stoically, ordering oysters, and drinking wine with the executioner.

BISHOP, SIR HENRY ROWLEY, an eminent modern English composer, was born in London in 1786, and pursued his musical studies under the direction of Bianchi. In 1806 some pieces which he wrote for the ballet of "Tamerlane and Bajazet," brought him into favourable notice; but his first original composition of note was the "Circassian Bride," which was received with great enthusiasm on its first appearance at Drury-lane in 1809, though the whole of the music perished in the great conflagration that destroyed that theatre the very day after its performance. His reputation obtained for him the office of composer and director of the music of Covent Garden Theatre in 1810; and during the fourteen years that he held it, he produced nearly sixty pieces of greater or less importance; many of which, such as "The Vintagers," "Guy Mannering," "The Miller and his Men," still keep possession of the stage. In 1828, after the success of Weber's "Oberon" at Covent Garden, he wrote "Aladdin" for the rival house, but this composition was received with such coldness by the public that he thenceforward withdrew from the theatre; but, during the next thirty years, he gave to the world numerous songs, glees, and other vocal pieces, many of which enjoyed even greater popularity than his larger and more ambitious performances. He also contributed to several valuable publications, especially the "Melodies of Various Nations," the later volumes of Moore's "Irish Songs," and the "Scottish Melodies," published by Mr George Thomson, the friend of Burns. He long held the office of director of the Concerts of Ancient Music, and for a short period was professor of music in the university of Edinburgh. Soon after Queen Victoria's accession he received the honour of knighthood, and at the time of his death he held the chair of music in the university of Oxford. His last days were clouded with disease, both mental and bodily, as well as pecuniary difficulties, which, however, were alleviated, if not removed, by the kindness of private friends and the generosity of the public. Died, 1855.

BISSET, JAMES, an ingenious artist and amusing writer, was born at Perth, in 1762, but settled early in life at Birmingham, where he established a museum and shop for curiosities, which he afterwards removed to Leamington. He had a remarkable facility in writing rhymes; and being anxious to make his muse subservient to the cause of

loyalty, or aid the progress of art, his works present a motley appearance, and are often droll and epigrammatic. His "Guides," "Poetic Surveys," "Patriotic Clarions," and "Critical Essays," were indebted for their notoriety to the jingle of rhymes. Died, 1832.

BIVAR, RODRIGO DIAS DE. [CID].
BLACK, JOSEPH, a celebrated chemist, was born in France, in 1728. He was educated at the universities of Glasgow and Edinburgh, attending at the former the chemical lectures of Dr Cullen. He graduated in medicine, and in 1756, was named professor of anatomy, and lecturer on chemistry at Glasgow. Here he acquired the friendship of Adam Smith. It was during his residence at Glasgow that he made and established his discovery of latent heat. In 1766 he became professor of chemistry at Edinburgh, a post which he filled with great ability and success till his death. Black wrote but little. The most important of his papers is "Experiments upon Magnesia, Albs, Quicklime, and other Alkaline Substances." Died, unmarried, in 1799.

BLACKLOCK, THOMAS, a Scotch divine, poet, and miscellaneous writer; author of "The Graham," an heroic poem; "Remarks on Civil Liberty," &c. Born, 1721; died, 1781.

BLACKMORE, SIR RICHARD, physician and poet, and the author of many works both in prose and verse, the principal of which is his poem entitled "Creation." He made the legends of Prince Arthur the subject of his first poem, and it became sufficiently popular to pass quickly through three editions. Living in the time of Dryden, Pope, and other wits and satirists, to whom he was opposed in politics, he met with unmerciful ridicule; yet he was by no means destitute of talent, and he sustained the reputation of a pious and conscientious man. The willing neglect of posterity, however, goes far to justify the ridicule of his contemporaries. Died, 1729.

BLACKSTONE, SIR WILLIAM, author of the well-known "Commentaries on the Laws of England," was born in London, 1723; educated at the Charterhouse, and at Oxford, where he instituted a course of lectures on the English constitution and laws, and in 1758 was named first Vinerian professor; and after gaining great distinction as a lecturer on law, was made Solicitor-General, and was subsequently raised to the bench. He sat as judge in the Court of Common Pleas from 1770 till his death. Died, 1780.

BLACKWELL, ALEXANDER and ELIZABETH, husband and wife: the latter, in order to procure subsistence for her husband while in prison for debt, published a "Herbal" in two volumes, folio, with 500 plates, drawn, engraved, and coloured by herself, all in the space of four years. The work succeeded, and her husband was liberated; but he seemed doomed to be the sport of fortune; for after having been invited to Stockholm, and pensioned by the king of Sweden, in consequence of his being the author of a work on agriculture which attracted the notice of that monarch, he was charged with being concerned in a plot with Count Tessin for overturning the monarchy, tried, and beheaded, in 1747.

BLACKWOOD, SIR HENRY, British ad-

miral, was the sixth son of Sir John Blackwood, bart., and was born in 1770. Having entered the naval service at the age of 11 years, he was present at the action off the Dogger Bank; and on the commencement of hostilities with the French, in 1793, he became first lieutenant of the invincible man-of-war, in which capacity he acted on the "glorious 1st of June," 1794, with distinguished bravery, and was in consequence promoted to the rank of commander. In 1798, when captain of the Brilliant, of 28 guns, he gallantly maintained a most unequal combat, off the island of Teneriffe, with two large French frigates, each of which was nearly double his own force, and beat them off. After this he was engaged in various services, as captain of the Penelope, of 36 guns, under Lords Keith and Nelson, Sir Sydney Smith, and other eminent men; and it was owing chiefly to his skill and bravery that the Guillaume Tell, of 80 guns, which escaped from Lord Nelson at Aboukir, was captured. The next scene of his naval glory was the ever-memorable battle of Trafalgar, where he performed the most essential service, as captain of the Euryalus, and witnessed the death of his friend and heroic commander, whose last words to him were, "God bless you, Blackwood—I shall never see you more." In 1806 he was appointed to the command of the Ajax, of 60 guns, and joined Lord Collingwood's fleet on the anniversary of the battle of Trafalgar. This, however, was a melancholy event, as the sequel proved; for, during the night of the 14th of February, 1807, the Ajax was found to be on fire, and in a short time was down with half her crew; Sir Henry, like many others, being saved with the greatest difficulty. After this he commanded the Warspite, and was present at the blockades of Brest and Rochfort, and engaged in various enterprises. In 1814, his Royal Highness the duke of Clarence made him captain of the fleet, and he was appointed to bring over the crowned heads from France to this country: on which occasion he was created a baronet, and promoted to the rank of rear-admiral. In 1819, Sir Henry was appointed commander-in-chief of the naval forces in the East Indies, from which station he speedily returned; and in 1827 the lord high admiral raised him to the command at Chatham. He died in December, 1832; leaving behind him the character of a brave, skillful officer, and an amiable man.

BLAINVILLE, HENRI MARIE DUCROTAY DE, a very distinguished French anatomist and zoologist, was born at Arques in 1781. After leading a dissolute life till 1804, his career was then decided by his interest in Cuvier's lectures, and he applied himself to the study of medicine. He assisted Cuvier both in his experiments and lectures, was chosen professor of zoology and physiology in 1812, and in 1832 succeeded his master as professor of comparative anatomy at the Jardin des Plantes. He visited England in 1816, was a member of the Academy of Sciences of Paris, of the Royal and Geographical Societies of London, and of many other scientific bodies. He contributed largely to scientific journals, and wrote a large number

separate works; among them, "Manuel de Géographie," "Manuel de Principes d'Anatomie Comparaée," "Physiologie," &c. Died, 1841.
BLAIR, HUGH, an eminent author of a "Dissertation on the Character of the Poet," "Lectures on Rhetoric," and "Sermons," &c. He was long greatly esteemed in Edinburgh, 1718; died, 1800.
BLAIR, JOHN, L.L.D., author of the well-known "Chronological Tables on the Canon of the Old Testament," a prebendary of Westminster, and of the Royal Society and of the Royal Academy, and teacher of mathematics in York. His chronological tables were published in 1754. Died, 1782.
BLAIR, ROBERT, a Scotch poet, and author of the well-known and beautiful "Grave." He was parliamentarian during the last years of the life of George II. Born, 1700; died, 1747.
BLAKE, ROBERT, the great English painter, was born at Bridgewater, in 1700, and educated at Oxford, and lived in London till 1640, when he became a member of parliament. He raised an army in the civil war, took part in the battle of Marston, and was made a knight of the Bath. His naval services in the pursuit of Prince Rupert's fleet, which he ultimately captured, recovering Guernsey and made councillor of state. His political views were, however, unpopular, the Dutch, which broke out in 1654. He served in the army of Van Tromp, was once captured, and dispersed the commerce of the Dutch. He afterwards commanded the success in the Mediterranean, he captured a Spanish galleon off the island of Teneriffe. The throne was voted to him on several former occasions. He was distinguished for his upright, honest, and free from selfishness and vanity, and served his country well. He died, on his voyage to the East Indies, 1687. He had a public school at Westminster Abbey, but his body was buried in the Restoration.
BLAKE, WILLIAM, poet, painter, and engraver, was born at London in 1757. He was a visionary even in childhood, and was employed as an engraver, and was engaged in drawing from old monuments in Westminster Abbey and other places. He afterwards studied at the Royal Academy, and in 1789 he published his "Songs of Innocence and of Experience," written, printed, and published by himself with the assistance of William Blake, the associate of Priestley, and of the Rev. Wollstonecraft, and of other great thinkers of the day. He was a poet, and a painter, and he did in practice what he did in theory. He was a man of truth and beauty, but no one could be more perplexed. About 1790 he was at Felpham in Sussex, when he met the poet Hayley. After a few

separate works: among which are his "Biographie," "Manuel de Malacologie," "Principes d'Anatomie Comparée," "Cours de Physiologie," &c. Died, 1850.

BLAIR, HUGH, an eminent Scotch divine; author of a "Dissertation on the Poems of Man," "Lectures on Rhetoric and Belles Lettres," and "Sermons," in five volumes, which were long greatly esteemed. Born at Edinburgh, 1718; died, 1800.

BLAIR, JOHN, L.L.D., author of the well-known Chronological Tables and of "Lectures on the Canon of the Old Testament;" was a prebendary of Westminster, fellow of Royal Society and of the Society of Antiquaries, and teacher of mathematics to the king of York. His chronology first appeared in 1754. Died, 1782.

BLAIR, ROBERT, a Scotch divine; author of the well-known and admired poem "The Grave." He was parish minister of St. Andrew during the last 15 years of his life. Born, 1700; died, 1746.

BLAKE, ROBERT, the great English admiral, was born at Bridgewater in 1698. He was educated at Oxford, and lived in retirement till 1640, when he became a member of parliament. He raised and commanded a fleet in the civil war, took Taunton for parliament, and was made governor of Devon. His naval service began in 1649 in the pursuit of Prince Rupert and the Dutch fleet, which he ultimately destroyed. In recovering Guernsey and Jersey, he made councillor of state. His greatest achievements were, however, in the war with the Dutch, which broke out in 1652, and lasted till 1654. He several times defeated Van Tromp, was once defeated by the Dutch, and dispersed the herring fleet in the North Sea. He afterwards commanded with distinguished success in the Mediterranean, where he captured a Spanish plate-fleet at the head of Teneriffe. The thanks of parliament were voted to him on this as on his former occasions. He was a man of great uprightiness, honesty, and courage, free from selfishness and worldly ambition, and served his country with a pure heart. Died, on his voyage to England in 1697. He had a public funeral at Westminster Abbey, but his body was re-interred at the Restoration.

BLAKE, WILLIAM, poet, painter, and engraver, was born at London in 1757. Dreamy and visionary even in childhood, he was applied to an engraver, and was employed in making drawings from old monuments in Westminster Abbey and other churches. He afterwards studied at the Royal Academy, and in 1789 he published his "Songs of Innocence," written, printed, and illustrated by himself with the assistance of his wife, and the associate of Priestley, Goddard, Woolstoncraft, and other celebrated thinkers of the day, and went on to publish many strange poems, not without truth and beauty, but mostly wild, and perplexing. About 1800 he retired to Felpham in Sussex, where he had a house at Hangle. After a few years he

returned to London, continued to see visions and produce poems and designs, began to study Dante at the age of 68, and died in August, 1827. Among his works are "Songs of Experience," considered, with the "Songs of Innocence," some of his best productions; "The Gates of Paradise," "Jerusalem," "Inventions to the Book of Job," and designs to Danto's Vision. The "Life of W. Blake, with Selections from his Poems and other Writings," by Glichrist, with Illustrations from his Works and a Catalogue of his Drawings, by Mr Rossetti, was published in 1863.

BLANCHARD, FRANÇOIS, a celebrated French aeronaut, born in 1738, was distinguished from his youth by his mechanical inventions. After making his first acrostatic voyage in 1784, he crossed the Channel from Dover to Calais, 1785; for which exploit he was rewarded by the king of France with 12,000 francs, and a pension of 1200 fr. He first made use of a parachute in London, in 1785; went through various countries on the Continent, exhibiting his aeronautic skill; visited America with the same object; and, returning in 1798, ascended at Rouen with 16 persons in a large balloon, and descended at a place 15 miles distant. He died in 1809.—His wife, MADAME BLANCHARD, continued to make aerial voyages; but in June, 1819, having ascended from Tivoli, in Paris, her balloon took fire, at a considerable height, owing to some fireworks which she carried with her, the car fell, and the hapless aeronaut was dashed to pieces.

BLANCHARD, JACQUES, an eminent and indefatigable French painter. He spent several years at Rome and Venice, studying particularly the works of Titian. Born, 1600; died, 1638.

BLANCHARD, LAMAN, a graceful periodical writer, was born at Great Yarmouth in 1803. His father having removed to London when he was five years of age, he received his education at St. Olave's School, Lambeth; and here was laid the groundwork of those literary tastes and habits which distinguished him through life. His first occupation was that of reader at Cox and Baylis' printing office in Great Queen Street; in 1827 he became secretary to the Zoological Society; and in 1831 editor of the Monthly Magazine. He subsequently became connected with the True Sun, the Constitutional, the Courier, the Court Journal, and the Examiner; and was a constant contributor to the lighter periodicals of the day. Never was there a writer with a reader pen; but though radiant with wit, it was never dipped in gall; and though his political opinions were strongly marked and maintained through good and evil report, his entire freedom from party bigotry and prejudice gained him the respect even of his most decided opponents. But a series of domestic calamities crushed his buoyant spirit to the earth, and in a fit of temporary insanity he committed suicide, Feb. 15, 1845. A collected edition of his writings, with a memoir of the author by Sir Bulwer Lytton, was published in 1846.

BLANCHE, of CASTILLE, queen of Louis

VIII. of France, was daughter of Alfonso IX., king of Castille, and was born about 1186. She was married to Louis in 1200, was crowned with him in 1223, and on his death three years later became regent during the minority of her son Louis IX., displaying great energy and address as a ruler. She opposed the departure of Louis for the crusade, but accompanied him to Cluni, and carried on the government in his stead. His long absence and the rumour of his intention to settle in the Holy Land caused her great sorrow, and she died in 1252.

BLANE, Sir GILBERT, bart., M.D. was born in Ayrshire in 1749, and, after rendering important services while attending Lord Rodney on the West India station, became successively physician to the fleet, to the Prince of Wales, and to St Thomas's Hospital, and president of the Navy Medical Board. He was a fellow of the Royal Society, member of the French Institute, and was, in 1812, created a baronet. His principal work is his "Elements of Medical Logic." He died in June, 1834.

BLANTYRE, Lord, was born in Edinburgh in 1773, and entered the army in his 19th year. He served in the Peninsular war, at the conclusion of which he received public thanks for his services, and afterwards became lord-lieutenant of Renfrewshire. He was residing with his family at Brussels during the struggle of the Belgians for a separate government; when looking out from a window, to see the Dutch troops who were advancing into the park, he was struck in the neck by a musket-ball, and the effusion of blood was so great that he died a few moments after, Sept. 1830.

BLAYNEY, Dr BENJAMIN, an English divine and biblical critic; royal professor of Hebrew, at Oxford, and author of a "Dissertation on the Seventy Weeks of Daniel," &c. Died, 1801.

BLESSINGTON, MARGARET POWER, Countess of, celebrated for her beauty, accomplishments, and literary productions, was born in the county of Waterford in 1789. At the early age of 15 she contracted an ill-fated marriage with Captain Farmer, and soon after his death the earl of Blessington sought and obtained her hand in 1818. After her marriage she passed several years abroad, and formed an acquaintance with Lord Byron, which ripened into intimacy, and enabled her to publish one of her most interesting works, her "Conversations with Lord Byron." Soon after her husband's death in 1829, she fixed her residence in London. Her house became the centre-point of every variety of talent; and there were few literary celebrities, native or foreign, who did not share in the "feast of reason and the flow of soul," for which Gore House will be long remembered. Lady Blessington's contributions to literature were at once numerous and diversified. Besides the "Conversations" above mentioned, she published many novels, besides several works full of personal anecdote, epigram, sentiment, and description, such as "The Idler in Italy," "The Idler in France," &c. For many years she edited the far-famed annuals, "The Book

of Beauty," and the "Keepsake." Died at Paris, Aug. 1849.

BILGH, WILLIAM, commander of the ship "Bounty," was born in Kent in 1733. He accompanied Captain Cook in his third voyage, and in 1787 was appointed to the command of the "Bounty" and sent to convey bread-fruit and other plants from the South Seas to the West Indies. Having taken this cargo on board at Tahiti, he sailed again in April, 1789. In a few days the mutiny broke out, caused probably by Bilgh's harshness and tyranny, and he with 18 companions were cast adrift in an open boat. After an extraordinary voyage they reached England. Bilgh was afterwards made governor of New South Wales, but in less than two years his rigorous and arbitrary conduct made it necessary to deprive him. Died at London, 1817.

BLIZARD, Sir WILLIAM, a surgeon and anatomist of considerable eminence, was born in During a long life of professional activity and experience he maintained a high reputation; and was for many years professor of anatomy to the Royal College of Surgeons, and a fellow of the Royal and Antiquarian Societies. He was also the author of several works, viz., "Suggestions for the Improvements of Hospitals," "Reflections on Police," &c. Died, at the great age of 92, in Sept., 1835.

BLOCH, MARCUS ELIEZER, an ingenious naturalist and physician, and a Jew by birth, was born at Anspach, of mean parentage, but entering into the service of a physician, he studied medicine, anatomy, and natural history with great success, and became particularly eminent in the last-named science. His "Ichthyology," produced at Berlin in 1785, at the expense of the wealthiest prince of Germany, is a magnificent national work. Born, 1723; died, 1799.

BLOCK, JOANNA, a Dutch-woman whose singular talents in cutting landscapes, flowers, portraits, &c., out of paper, entitle her to rank as an artist of no mean skill, so true were her works to nature. Born, 1680; died, 1715.

BLOEMART, ABRAHAM, a Dutch historical and landscape painter, whose brilliant colouring and inventive powers hardly compensate for his mannerism. Born, 1680; died, 1647.

BLOEMART, CORNELIUS, son of the preceding, who became eminent as an engraver, and may be regarded as the founder of a new school, remarkable for the purity and softness of the burin. Born, 1603; died, 1680.

BLOMFIELD, FRANCIS, topographical historian, was a native of Norfolk. He was born in 1705, educated at Cambridge, entered the church, and became in 1729 rector of Fressfield, his native place. His great work is the "Topographical History of the County of Norfolk," in five vols. folio; the last two being by another hand. The author was also printer and publisher of his own book, and the first part appeared in 1739. Died, 1761.

BLOMFIELD, CHARLES JAMES, Bishop of London, was born, in 1786, at Bury St Edmunds, where his father was a resident

OD, THOMAS, Colon
ate Irishman, original

After attending the grammar-school of his native town for eight years, he removed to Cambridge, and earned great distinction in the field of classical literature. After being admitted to priest's orders he was presented to the rectory of Quarrington in 1810, and the same year he published his edition of the "Prometheus" of Aeschylus, which at once marked him as a scholar of the first rank. This was followed by various editions of the classic authors, and led to his being appointed successively rector of Chesterford, rector of Botolph's, Bishopsgate, the richest living in the diocese of London, bishop of Chester in 1824, and bishop of London in 1828. From that period till his retirement, in 1856, he was the most conspicuous member of the English prelacy. In all the questions affecting the status of the clergy and the doctrines of the church he took a most active part; and, perhaps, he will be best remembered for the zeal with which he devoted himself to provide church accommodation for the thousands of neglected persons who swarmed in the large parishes of his diocese. Under his auspices more than two hundred additional churches were built, to most of which schools and savings-banks are attached. In the bishop's health had become so infirm that he could no longer attend to his duties, and in compliance with his own requisition an Act of Parliament was passed enabling him to resign his see, and to have an allowance of £5000 a-year, together with the use of Fulham Palace for life. Died, 1857.

BLOOMFIELD, EDWARD VALENTINE, a distinguished classical scholar, was the brother of Dr Blomfield, bishop of London, and born in 1788. He received his education at Jesus College, Cambridge, where, besides prizes, he gained, in 1809, a medal for his beautiful ode, "In Desiderium Porsoni." In 1812 a fellowship in Emanuel College was conferred on him. In the following year he crossed Germany, and acquired an intimate knowledge of the German language. On his return to England he published in the Museum Criticum, or Cambridge Classical Archives, "remarks on German literature. translated Matthiæ's Greek Grammar, began a translation of Schneider's Greek Grammar Lexicon. Died, 1816.

BLOM, JACQUES CHRISTOPHE LE, a French miniature painter, and author of a treatise entitled "Il Colorito," on a method of engraving in colours. Born, 1670; died,

BONDEL, the minstrel and favourite of the Count of Lion; whom he is said to have discovered in his German dungeon, by being beneath its walls the first part of a song of their joint composition.

BONDUS, FLAVIUS, or FLAVIO BIONDO, an Italian archaeologist, was born at Forlì in 1471. He was secretary to Pope Eugenius and three of his successors, and applied himself chiefly to the study of the topography and monuments of ancient Rome, and the government of the republic. His principal works are "Roma Instaurata," "Roma tripartita," and "Italiæ Illustratæ libri tres." Died, Rome, 1493.

BOND, THOMAS, Colonel, a bold and valiant Irishman, originally an officer in

Cromwell's army, and notorious in English history for his daring attempt on the life of the duke of Ormond, and for his theft of the crown and regalia from the Tower. For some reason, never yet explained, this desperado was not only pardoned, this desecration was not only pardoned by Charles II., but received from him a pension of £500 per annum. Died, 1680.

BLOOMFIELD, ROBERT, an English poet, was the son of a poor tailor at Honington, Suffolk, and was himself a shoemaker. His principal work is a poem, entitled "The Farmer's Boy," which pleasingly depicts the scenes the author had witnessed while in that humble station, and displays considerable genius; his subsequent publications, mostly short descriptive poems or lyrics, not rising above the level of rural and familiar life, still charm by their sincerity and simplicity. The "Farmer's Boy" obtained very great popularity, and was translated into French and Italian, and even, by an English scholar, into Latin. Although brought forward and patronized by Capel Loft and the duke of Grafton, the modest poet had a large share of the ill which flesh is heir to, and his latter years were embittered by want, ill-health, and consequent dejection. Born, 1708; died, 1823.

BLOUNT, SIR HENRY, a traveller through Turkey, Syria, and Egypt; author of a "Voyage to the Levant." He was knighted by Charles I., whose cause he supported through the civil war, and was afterwards employed by Cromwell on some important affairs, and was rewarded with a commission of the trade. Born, 1602; died, 1682.

BLOUNT, SIR THOMAS POPE, bart., eldest son of the above; member of several parliaments, and appointed commissioner of accounts at the revolution; author of "Censura celeberrimorum Auctorum," &c. Born, 1649; died, 1697.

BLOUNT, CHARLES, youngest brother of the preceding, was born in 1634. He attained great notoriety by a series of attacks on revealed religion and popular beliefs. His most celebrated work was "The two first books of Philostratus concerning the Life of Apollonius of Tyana," which appeared in 1680. He wrote an excellent treatise on the Liberty of the Press, "Anima Mundi," "Grotus Diana of the Ephesians," &c. Maddened by the refusal of his deceased wife's sister to marry him, he shot himself, 1693.

BLOW, JOHN (Mus. D.), an English musician and composer of great ability; author of anthems, services, &c. and of some secular compositions, which are published collectively under the title of "Amphion Anglieus." Died, 1708.

BLUCHER, Field-marshal **LEBRECHT VON**, a distinguished Prussian general, whose impetuous intrepidity and eagerness to attack the enemy gained him the familiar appellation of "Marshal Forward." He entered the Swedish service when quite a youth, and in the first campaign was made prisoner by the Prussians, whom he afterwards joined, and rose to the rank of captain; but being discontented with the promotion of other officers over his head, he obtained his discharge from the Great Fre-

der'ck who dismissed him with the pithy remark, that "he might go to the devil if he pleased," and he afterwards lived many years in retirement. Being recalled by his successor, King Frederick William, he was made major-general after the battle of Ley-stadt, in 1794; and commanded the cavalry at the battle of Jena, which decided for a time the fate of the Prussian monarchy. When Prussia entered into the coalition against Napoleon, in 1813, our hero, then 70 years old, was made general of the centre of the allied army; distinguished himself at Lützen and Leipsic, pursued the flying French across the Rhine, and, after a year of obstinate conflict in France, headed the right wing of the allied army under the walls of Paris, at the time of Napoleon's abdication in 1814. In England, which he visited with the allied sovereigns, he was received with enthusiasm. Being re-invested with the command of the Prussian army during the Hundred Days, he was defeated by Napoleon at Ligny, on June 16, 1815; on which occasion he was unhorsed, and charged over by both the French and Prussian cavalry. Marshal Grouchy was commissioned by Napoleon to push Blucher's retreat, and check his junction with the British army, which Wellington required. But having deceived Grouchy, by leaving a body of his troops to mask the operation, he retrograded unmolested, by a skilful and dangerous flank movement; and his advanced division, under Bulow, arrived at Waterloo at five o'clock, just as the whole reserved *élite* of the French army was advancing in dense column to make their last desperate effort to break through the British squares. This fresh flank attack on the advancing column contributed greatly to decide the victory, and Blucher arrived in time to participate in the pursuit. Blucher's conduct afterwards was generally pronounced by the liberals at Paris, especially as regarded the bridge of Jena and the spoliation of the Museum, vindictive and illiberal; but it could not be expected that he should have had any regard for the glories of the French capital. He was a rough and fearless soldier; brave, honest, and free; beloved by his comrades, and a sworn foe to the enemies of his country. Born at Rostock, 1742; died, at his estate in Silesia, 1819, aged 77.

BLUM, ROBERT, German politician, member of the parliament of Frankfort, was born at Cologne in 1807. His thirst for knowledge showed itself from his earliest years, and notwithstanding the pressure of difficulties and hardships, he made considerable attainments, and in 1832 became conductor of several journals at Leipsic. He distinguished himself as an earnest opponent of the superstition displayed in connection with the Holy Coat of Treves, in 1844. But it was not till 1848 that he became known as a politician. In March of that year he was elected member of the parliament of Frankfort, in which he was leader of the party of the Left. On the breaking out of the insurrection at Vienna in October he hastened thither to support the movement by his eloquence. He was, however, ever after arrested by the Austrian government, tried by

court martial, and shot. His death caused a profound sensation not only in Germany, but throughout Europe.

BLUMAUER, ALOYS, a German satirical poet; author of a "Travesty of the *Aeneid*," &c. Born, 1755; died, 1798.

BLUMENTIACH, JOHANN FRIEDRICH, a distinguished German physiologist and comparative anatomist, was born at Gotha in 1752. He became professor of medicine, librarian and keeper of the museum, at the university of Göttingen, in 1778. He made two visits to England, and was admitted to the French Academy of Sciences. His principal works are "Institutiones Physiologicae," which was translated into English by Dr Elliotson; "Handbuch der vergleichenden Anatomie," an essay on the Varieties of the Human Race; and works on Embryology and the Bones of the Human Body. He also published a description of the large collection he had formed of skulls of different races. Died, 1840.

BOANDIL, or ABOUABOULA, the last Moorish king of Granada; he was expelled for the last time from Granada by Ferdinand of Castile and Aragon, in 1491; and afterwards lived in Africa, where he was killed in battle in the service of the king of Fez.

BOADEN, JAMES, dramatic author and critic. His plays are numerous, but we believe there is not one of them that now keeps possession of the stage. Far more important are his dramatic memoirs. In them he has left, probably, the best record that the world can now hope to have of John Kemble, Mrs Siddons, Mrs Jordan, and Mrs Inchbald. His "Inquiry into the Authenticity of the various Pictures and Prints of Shakspeare," and a tract on "the Sonnets of Shakspeare," are also valuable works. Born, 1762; died, 1839.

BOADICEA, or BOUDICEA, a British heroine, the widow of Prasutagus, and queen of the Iceni. Having been ignominiously treated by the Romans, she headed an insurrection against them, attacked their settlements, and reduced London to ashes; but being at length utterly defeated by Suetonius Paulinus, she is said by Tacitus to have put an end to her life by poison, A.D. 61.

BOCCACCIO, GIOVANNI, the celebrated Italian novelist, was the son of a Florentine merchant, but was born at Paris, in 1813. His passion for literature led him to abandon first commerce and next the study of law. He spent some years at Naples, and while there, in 1841, fell in love with a beautiful girl, a natural daughter of the king of Naples, for whom he wrote several of his works, and whom he named "Flammetta." He was afterwards patronized by Queen Joannn, and for her as much as for his "Flammetta" is said to have written his chief work, the "Decamerone." On his father's death he returned to Florence, where he was greatly honoured, and sent on several public embassies. Amongst others, he was sent to Padua to communicate to Petrarch the tidings of his recall to Florence. He gained the friendship of the illustrious poet, and enjoyed it through life. Boccaccio,

like Petrarch, contributed to the revival of the study of Greek manuscripts, and was the first to bring the *Odyssey* from Greece to Italy from Greece copied about 1361, deeply and led to a remarkable manner of life. He was a Florentine to occupy the office of *podestà* in 1373, for the "Divina Commedia." In 1374 he had to mourn the loss of his friend Petrarch; and after broken health, he died a member, 1375. The "Decamerone" is a collection of tales, full of liveliness and ingenious and indecent. It was published about 1352, and was condemned by the Council of Trent, and made to improve and purify. Boccaccio wrote imitated by Chaucer, and romances, &c.

BOCCAGE, MARIA ANNA, French poetess; author of several pieces, she was much praised by her country, and her works are imitations. Born, 1710; died, 1780. **BOCCALINI, TRAJANO**, an author of the "Political History of the Spanish government," &c. His writings gave much offence, but there is no ground to be said it caused him to be banished at Venice, 1613.

BOCCHERINI, LUIGI, a celebrated Italian composer, pensioner of the king of Prussia, and of the king of Spain. Born, 1761. **BOCCOLI, JOHN (LEY)**, an English poet, a French theologian, was born at Sedan and Leyden, and died at Caen. He obtained his public conference in 1629. He visited France in 1632, on the invitation of the king of Spain, and died at Caen several learned works, "De Paradiso Terrestri," and "Hierozolicon."

BODE, CHRISTOPH AUGUST, a German linguist and critic, was born at Helmstedt, New Testament in English, &c. Born, 1723. **BODE, JOHANN ELERT**, a German poet, was born at Hamburg. In his early age he became assistant in 1772 was called to Berlin. One of his best works is the "Kennntnis des gestirnten Himmels," which appeared in 1768, and is more than twenty times reprinted. He published also a Celestial Atlas, &c., and was a member of several scientific societies of the "law of the planets" called "Bode's law."

like Petrarch, contributed greatly to the revival of the study of classical literature, spent much time and money in collecting manuscripts, and was the first to bring into Italy from Greece copies of the *Iliad* and the *Odyssey*. A solemn message from a lying monk, about 1361, deeply impressed Boccaccio, and led to a remarkable reformation in his manner of life. He was chosen by the Florentines to occupy the chair which was established in 1373, for the exposition of the "Divina Commedia." In the following year he had to mourn the loss of his master and friend Petrarch; and after some months of broken health, he died at Certaldo, in December, 1375. The "Decamerone," on which his fame rests, is a collection of a hundred tales, full of liveliness and humour, but often licentious and indecent. The book was published about 1352, and after two centuries was condemned by two popes and by the Council of Trent, and attempts were made to improve and purify it, but unsuccessfully. Boccaccio wrote "La Teseide," imitated by Chaucer, and several other poems and romances, besides many works in Latin.

Boccage, Maria Anne Du Perdu, a French poetess; author of "Paradis," &c. She was much praised by her contemporaries, but she was little more than a clever versistress, and her works are imitations or translations. Born, 1710; died, 1802.

Boccacini, Trajano, an Italian satirist; author of the "Political Touchstone," a satire on the Spanish government, &c. His writings gave much offence to the Spanish court, but there is no ground for the story that it caused him to be murdered. He died at Venice, 1813.

Bocchierini, Luigi, a celebrated Italian musical composer, pensioned for his merit by the king of Prussia, and patronized by the king of Spain. Born, 1740; died, 1805.

Boccolod, John. (LEYDEN, JOHN of.)
Bocchart, Samuel, a French Protestant theologian, was born at Rouen in 1539, died at Sedan and Leyden, and became pastor at Caen. He obtained much reputation by his public conference with the Jesuit at Caen in 1629. He visited Stockholm with Queen Christina in 1632, on the invitation of Queen Christina, and died at Caen in 1661. He wrote several learned works, among which are "De Paradiso Terrestri," "Geographia Sacra," and "Hierozolcon."

Bode, Christoph August, a learned German linguist and critic; who edited the New Testament in Ethiopic, all the Evangelists in Persian, St Matthew in Arabic, &c. Born, 1723; died, 1796.

Bode, Johann Elert, a German astronomer, was born at Hamburg in 1747. At an early age he became assistant to Busech, and in 1772 was called to Berlin by Frederick the Great. One of his best works is the "Anleitung zum Kenntniss des gestirnten Himmels," which appeared in 1768, and has passed through more than twenty editions. He published also a Celestial Atlas, Astronomical Tables, &c., and was a member of the principal scientific societies of Europe. The "law of the planetary distances," which is called "Bode's law," was first sug-

gested by Professor Titius, of Wittenberg. Died, 1826.

Bode, Johann Joachim Christoph, a German miscellaneous writer and translator, born at Brunswick, 1730. He was originally a musician in a Hanoverian regiment; he then became a bookseller, and finally rose to be privy councillor to the Landgrave of Hesse Darmstadt. He translated into German, Sterne's "Tristram Shandy" and "Sentimental Journey," Fielding's "Tom Jones," Goldsmith's "Vicar of Wakefield," Montaigne's "Essays," &c., with considerable taste and judgment. Died, 1793.

Bodley, Sir Thomas, a native of Exeter, and educated partly at Geneva and partly at Oxford. He was on several occasions employed on embassies by Queen Elizabeth, and was ambassador at the Hague about nine years; but he is chiefly remembered for having rebuilt the University Library of Oxford, and bequeathed his fortune to its support and augmentation; whence it is called the Bodleian Library. He was knighted by James I. Horn, 1544; died, 1612.

Bodmer, Johann Jacob, critic and historian, was born at Zürich in 1698. He is distinguished for the part he took in conjunction with his friend Breitinger, in exposing the artificial and lifeless state of German literature in his time. The controversy which he thus gave rise to, in which Gottsched, then held as the patriarch of German literature, obstinately opposed him, led the way to a thorough reformation, and the rise of a real living, national literature. He was appointed professor of history at Zürich in 1725, and held the chair for 50 years. He published two collections of the "Minnesinger," translated Homer and Milton into German, and wrote a poem entitled the "Noahlide." Died, 1783.

Bodoni, Giovanni Battista, the celebrated Italian printer, was born at Salsuzza in 1740. At the age of 18 he went to Rome, and got employment in the printing-office of the Propaganda. He mastered several oriental languages, and acquitted himself well of the tasks entrusted to him. Sorrow for the loss of his friend Euggler, the head of the office, who committed suicide, drove him from Rome. In 1768 he settled at Parma, and gained wide reputation by the beautiful works that issued from his press. In 1789 he was invited to Rome, but the duke of Parma, to detain him, allowed him to set up his press in the palace. From that dual printing-office were sent forth the magnificent editions of Horace, Virgil, Tacitus, Tasso, and last of all, Homer, on which his fame chiefly rests. He presented, in 1810, a copy of the Homer, printed on vellum, to Napoleon at St Cloud. He refused all invitations to quit Parma, and died there in 1813.

Boece, Hector, or **Boethius**, a Scottish historian, born at Dundee about 1465. He was educated at Aberdeen and the university of Paris, held the chair of philosophy at the latter, and was afterwards principal of King's College, Aberdeen. He was a correspondent of Erasmus. He wrote a "History of Scotland" in Latin, which

but the exact date of his death is uncertain.

BOIARDO, MATTEO MARIA, count of Scandiano and governor of Reggio; author of "Orlando Innamorato," one of the most celebrated poems in Italian literature, the first of a new class, the romantic epic, and the model of Ariosto's greater sequel, "Orlando Furioso." The poem was recast by Berni. Boiardo was author of several other poems in Italian and Latin, and made some translations from the Greek and Latin classics. Born, 1434; died, 1494.

BOICHOT, GUILLAUME, a distinguished French sculptor; born in 1738, died in 1814. The Colossal Group of Saint Michael and the "Seated Hercules" are among his best works. The bas-reliefs on the Triumphal Arch of the Carrousel are his.

BOIELDIEU, ADRIEN, a celebrated French musical composer, born in 1775; author of numerous well-known operas; "Le Calife de Bagdad," "Jean de Paris," &c. "Télémaque" is thought his *chef-d'œuvre*. His style is characterized by a sweet and natural melody, much imaginative gaiety, and simple but pleasing accompaniments. Boieldieu was a member of the Institute. Died, 1834.

BOIGNE, Count de, a French soldier of fortune, was born at Chambéry, in 1751. When 17 years old, he entered the French army, which he quitted for the Russian service in about five years, and was taken prisoner at the siege of Tenedos. After being released he left Russia, and in 1778 passed into the service of the East India Company; but fancying himself neglected, he offered himself to the notice of Mahajee Scindiah, the celebrated prince of the Mahrattas, to whom he was of the greatest service during his campaigns, and who loaded him with honours and riches. Having remitted his vast fortune to England, and wishing to return to Europe for the sake of his health, he left India in 1793, and settled at Chambéry, where he did much good, applying his money to benevolent and patriotic purposes. Died in 1830.

BOILEAU, NICOLAS, sieur Despréaux, the celebrated French poet and critic, was born in 1636. He was brought up to the law, but devoted it for literature. He vigorously attacked the bad taste of the age, and his verses had immense success. A pension was given him, and he was associated with Racine as historiographer to Louis XIV. He spent the last few years of his life in retirement, displaying great fortitude under illness and the infirmities of age, and died in 1711. His poems consist of "Satires," "Epistles," the "Art of Poetry," &c. Pope was much indebted to Boileau in some of his poems.

BOISROBERT, FRANÇOIS LE METEL DE, French abbot, celebrated for his wit, and honored by Richelieu. His poems, plays, &c., are numerous. Died, 1662.

BOISSY D'ANGLAS, FRANÇOIS ANNE, Count de, a distinguished French orator and literary character, and a man throughout the revolutionary frenzy constantly displayed great firmness and a disinterested love of liberty. He was deputy to the States-General in 1789, member of the

National Convention, of the Committee of Public Safety, and the Council of Five Hundred. His courage and presence of mind were particularly displayed on occasion of the irruption of the mob into the hall of the Convention in May, 1795. He took his place in the president's chair after it had been twice vacated, and calmly kept it, undisturbed by the sight of muskets levelled at him, and of the bleeding head of his murdered colleague Féraud. Boissy d'Anglas was chosen president of the tribunate in 1803. By Napoleon he was made a senator and commander of the Legion of Honour; and in 1814 Louis XVIII. created him a peer; but he was, for a time only, deprived of his title, in consequence of his recognition of the emperor on his return from Elba. His writings are on various subjects; among them are "The Literary and Political Studies of an Old Man," an "Essay on the Life of Mulesherbes," &c. Born, 1756; died, 1826.

BOISTE, P. C. V., a French lexicographer, born in 1763; author of several valuable dictionaries. The name Buonaparte following the article "Spollateur," in his "Dictionnaire Universel de la langue française," he was compelled by the police to substitute for it the name of Frederick the Great.

BOIZOT, LOUIS SIMON, born in 1743; a French painter and sculptor, but more distinguished as the latter. The "Victory of the Fountain of the Place du Chatelet" is his *chef-d'œuvre*.

BOL, FERDINAND, a Dutch historical and portrait painter, pupil of Rembrandt. Born, 1611; died, 1681.

BOLESLAUS I., became duke of Poland in 992 or 999; had his dukedom raised to a kingdom by the emperor Otho III., and made Moravia tributary to his kingdom. Died, 1025.

BOLESLAUS II., king of Poland, son and successor of Casimir I. In consequence of the severity with which he treated his subjects during a revolt, chiefly caused by his long absence in Russia, and the consequent infidelity of the wives of his soldiers, he was driven away by his subjects, and died in Hungary, 1083.

BOLEYN, or BULLEN, ANNE, queen of Henry VIII., was daughter of Sir Thomas Bullen (afterwards earl of Wiltshire), and was born in 1507. After a residence of some years at the French court, she became maid of honour to Katherine, queen of Henry VIII., and soon attracted the admiration of the king. In 1532 she was made marchioness of Pembroke, and in the following year married to Henry and crowned queen. In 1536 charges of conjugal infidelity were brought against her, on which she was tried and beheaded, May 19, 1536. Anne Boleyn was a promoter of the reformation, and the king's determination to marry her was the occasion of the final separation of England from the Catholic church. She was the mother of Queen Elizabeth.

BOLINGBROKE, HENRY ST JOHN, Viscount, a distinguished statesman and political writer, was born at Battersea, in 1672, and completed his studies at Oxford. He entered parliament in 1700, became secre-

tary at war in 1704; resigned his office in 1708; again formed part of the ministry in 1710, and concluded the peace of Utrecht. In 1712 he was created Viscount Bolingbroke; but, dissatisfied that he had not been raised to an earldom, he quarrelled with his colleagues, effected the dismissal of Harley, and got himself appointed prime minister. The death of Queen Anne, however, took place a few days afterwards. The Whigs having gained the ascendancy on the accession of George I., preparations were made for the impeachment of Bolingbroke, who had fled to France, and being invited to Lorraine by James Edward, the Pretender, he became his secretary of state. For this he was impeached and attainted; and it was not till 1723 that he was allowed to return to England. His estates were restored to him in 1725, but his seat in the House of Lords was still denied him: this raised his indignation; and he exerted all his talents against the ministry, till at length the overthrow of Sir Robert Walpole was effected. In 1735 he again withdrew to France, where he remained till the death of his father; after which event he settled at Battersden, and died, in 1751, after a long and painful disease, in his 80th year. He was the intimate friend of Pope, Swift, and other eminent authors of the time, and his own writings rank among the most eloquent and polished in style in the English language. A collected edition of them was published by David Mallet three years after the death of the author. As a man Bolingbroke was selfish, proud, and profligate; as a politician, merely ambitious and unprincipled; and as a writer, showy, superficial, and untrustworthy. The shallow and impotent attacks on Christianity made by such a man have little interest or importance in the presence of the earnest controversies on matters pertaining to religion, in the midst of which we are living. A new Life of Bolingbroke has been recently published by Mr Mac-knight.

BOLIVAR, SIMON, the celebrated Liberator of South America, was born of noble parents at Caracas, in 1783. Having acquired the elements of a liberal education at home, he was sent to Madrid to complete his studies; and afterwards visited Paris, where he formed an acquaintance with several distinguished men. He made the tour of Southern Europe, again visited the Spanish capital, and married the daughter of the Marquis de Ustariz del Cro; but soon after his return to his native land his youthful bride fell a victim to the yellow fever; and, as a relief to his sorrow, he once more visited Europe. On returning to South America, in 1810, he pledged himself to the cause of independence, and commenced his military career at Venezuela, as a colonel in the service of the newly founded republic. In 1811 he served under Miranda, and had the command of Puerto Cabello; but the Spanish prisoners having risen and seized the fort, he was obliged to quit the town. At length Miranda was compelled to submit to Monteverde, the Royalist general; and Bolivar, entering the service of the patriots of New Grenada, soon had another opportunity of

assisting his old friends the Venezuelans. For a while he was successful, but reverses followed; and when, in 1815, the Spanish forces under Morillo arrived, he threw himself into Carthagenia, and subsequently retreated to St Domingo. The spirit of resistance was, however, not extinguished; and after many desperate conflicts the independence of Columbia was sealed, and Bolivar was chosen president of the republic, in 1821. Every act of his government showed how zealously alive he was to the improvement of the national institutions and the moral elevation of the people. In 1823 he went to the assistance of the Peruvians, succeeded in establishing their independence, and was proclaimed Liberator of Peru, and invested with supreme authority. In 1825 he visited Upper Peru, which detached itself from the government of Buenos Ayres, and was formed into a new republic, named *Bolivia*, in honour of the Liberator; but domestic factions sprung up, the purity of his motives was called in question, and he was charged with aiming at a perpetual dictatorship; he accordingly declared his determination to resign his power, and to retire to his paternal estate. The vice-president, Santander, urged him to resume his station as constitutional president; and though he was beset by rival factions, he continued to exercise the chief authority in Columbia till May, 1830. The people ere long became sensible of their injustice, and were soliciting him to resume the government, when his death took place, in December, 1830. In person he was thin, and somewhat below the middle size, but capable of great endurance; his complexion sallow, and his eyes dark and penetrating. His intellect was of the highest order, and his general character of that ardent, lofty cast, which is so well calculated to take the lead among a people escaping from the yoke of tyranny.

BOLLANDUS, JOHN, Jesuit, was born in Belgium in 1596. He is celebrated as the first in the long series of compilers of the voluminous "Acta Sanctorum." The work was projected by Father Rosweida, on whose death, in 1629, it was undertaken by Bollandus. He was afterwards assisted by Henschen and Papebroch. The first five volumes appeared in the life-time of Bollandus, and include the lives of the saints of the months of January and February. The work was continued with some interruptions till 1794, and consists of 52 vols. folio. The contributors are named the Bollandists. A new edition of this immense work is now (1865) in course of publication in France.

BOLOGNA, JOHN OF, one of the most celebrated sculptors of his age, was born at Douai, probably in 1530, or a little later. He went young to Rome, became acquainted with Michael Angelo, and was employed by the Cardinal de Medicis. He afterwards lived chiefly at Florence. Among his masterpieces are reckoned the "Neptune" of the fountain at Bologna, "Mercury" and the "Rape of the Sabinas." He was the intimate friend of Vasari, and one of the first members of the Academy of Florence. Died there, 1608. A group of "Samson killing a

Philistine," executed at Hovlingha.
BOLOGNESE, ILDESCO.

BOLSWERT, SCOT, the 17th century, a who passed most of his life in distinguishing himself for his gravings after Rubens.

BOMBELLI, RAFFAEL, gebrat of the 16th century, who invented a uniform equations.

BOMBELLI, SEBASTIANO, Bolognese historical painter, Born, 1635; died, about 1700.

BOMBERG, DANIEL, of the 16th century, was settled early at Venedice, where he published a Hebrew Bible, a Hebrew Concordance, Talmud, all greatly esteemed, and a beautiful encreux and the beautiful. Died, 1640.

BONASONI, GIULIO, and engraver of the latter capacity he engraved many of Michael Angelo, Raffaello, and great beauty.

BONAVENTURA, S. DENZA, surnamed "the Seraphic," was born in Tuscan, entered the Franciscan order, and after some disputes in which Aquinas also was concerned, doctor in theology, and in 1256 of his order, and both re-established discipline in the order, and raised to the papal see by Gregory X. wrote commentaries on the Sentences, and married. Dissatisfied with spectacles, he became at last a monk, and was highly esteemed while attending the Council of Lyons.

BONCERF, PIERRE, author of the famous "L'Esprit des Loix," while he was secretary of the Council, it became fundamental decrees of the Council of 1789. Having

of Equality, he narrowly escaped by one vote, and died from the effects of the plague.

BONCHAMP, ARTHUR, general of the Vendean army, served with distinction in the American war. In him was conspicuous than in any other his life amply testified to the preference that 5000 prisoners were executed by the Vendean general on instant death. He was killed in the battle of Chollet.

BONE, HENRY, an eminent engraver for his skill in engraving medals at Truro, in 1755. C. B. he was for many years employed in engraving medals, and subsequently attained the

Phlistine," executed by this master, is still extant at Hovingham Hall, York.

BOLOGNESE, IL. (GRIMALDI, FRANCESCO.)

BOLSWERT, SCHELDT, an engraver of the 17th century, a native of Friesland, but who passed most of his life in Antwerp; distinguished for the excellence of his engravings after Rubens and Vandyck.

BOMBELLI, RAPHAEL, a celebrated algebraist of the 16th century, and the first who invented a uniform method of working equations.

BOMBELLI, SEBASTIANO, an eminent Bolognese historical and portrait painter. Born, 1639; died, about 1716.

BOMBERG, DANIEL, a celebrated printer of the 16th century, was a native of Antwerp, but settled early at Venice. He there published a Hebrew Bible in four volumes folio, a Hebrew Concordance, and the Babylonian Talmud, all greatly esteemed for their accuracy and the beauty of the typography. Died, 1649.

BONASONI, GIULIO, a Bolognese painter and engraver of the 16th century. In the latter capacity he especially excelled; and he engraved many of the chef-d'œuvres of Michael Angelo, Raffaele, &c., in a style of great beauty.

BONAVENTURA, St. or GIOVANNI FIDENZA, surnamed "DOCTOR SERAPHICUS," was born in Tuscany in 1221. He entered the Franciscan order, studied at Paris, and after some disputes with the university, in which Aquinas also took part, was made doctor in theology, and lecturer in philosophy and theology. In 1256 he was chosen general of his order, and both by word and example re-established discipline in it. He was created cardinal by Gregory X., who had been raised to the papal see by his influence. He wrote commentaries on Lombard, master of the Sentences, and many devotional works. Dissatisfied with speculation and philosophy, he became at last a mystic. His writings were highly esteemed by Luther. Died, while attending the Council of Lyons, 1274.

BONCERF, PIERRE FRANÇOIS, born in 1745; author of the famous pamphlet, "Les dévotieux des Droits Feodaux," written while he was secretary to Turgot. Condemned to be burnt, it became the basis of the fundamental decrees of the constituent assembly of 1789. Having been in the service of Egalité, he narrowly escaped the guillotine by one vote, and died from the shock he then sustained.

BONCHAMP, ARTHUR DE, a celebrated general of the Vendean royalists, who had served with distinction as an officer in the American war. In him humanity was not so conspicuous than valour, as the last act of his life amply testified; for it was by his interference that 5000 prisoners, whom the separated royalists had taken, were saved from instant death. He was mortally wounded in the battle of Chollet, 1793.

BONE, HENRY, an eminent artist, celebrated for his skill in enamel painting, was born at Truro, in 1755. On coming to London, he was for many years engaged in painting devices in enamel for jewellery; but he subsequently attained the highest excellence

as a miniature portrait painter on ivory and in enamel. Continuing to rise in public estimation, Bone carried his art to the utmost perfection, increasing the size of his plates beyond anything which had before been attempted, and executing in enamel several copies of pictures by the first masters; one of which, Titian's "Bacchus and Ariadne," he painted on a plate 18 inches by 16, and sold it for 2200 guineas. Among his most munificent patrons was the duke of Bedford, for whom he executed a series of portraits of the Russell family from the reign of Henry VIII. to the present time. He closed a long life of persevering industry and integrity in December, 1834.

BONER, ULRICH, the most ancient German fabulist, was a Dominican friar of Berne, in the 14th century. He published his fables under the title of "Der Edelstein (The Gem)."

BONET, or BONNET, THÉOPHILE, a French physician, was born at Geneva in 1620. He shares with Morgagni the honour of founding the science of pathological anatomy. His best works are the "Pharos Medicorum," several times reprinted with a changed title, and "Sepulchretum, seu Anatomica Practica," in two vols. folio. Died, 1689.

BONIFACE, St., the Apostle of Germany, was born in England about 680. He became a monk, but under the sanction of Pope Gregory II. he went about 716 to Germany, and there devoted himself for the rest of his life to the task of Christianizing the uncivilized tribes; not without great success. He founded churches, schools, and monasteries, and reclaimed vast tracts of waste, and brought them into cultivation. He was massacred with a band of his converts by the barbarians in 755.

BONIFACE VIII., Pope, **BENEDETTO GAETANO**, was born at Anagni, was made cardinal in 1261, and became pope on the abdication of Celestine V. in 1294. His pontificate was a very troubled one, owing to his determined assertion of papal supremacy over all princes and his interference in political affairs. By his famous bull "Clericis laicis," against taxation of the clergy without consent of the pope, he excited great agitation in France. He quarrelled with the noble family of Colonna, excommunicated and proclaimed a crusade against them and their partisans. He mediated successfully between Philip the Fair of France and Edward I. of England; but soon after, by a bull of excessive pretensions, provoked the famous quarrel with Philip, who burnt the bull. The French demanded a Council, and the pope published other bulls: till at last Philip had him arrested at Anagni by William of Nogaret at the head of a body of troops. [NOGARET, WILLIAM OF.] The citizens of Anagni rescued him a few days after, and he set out for Rome, but died on the way, 1303. It was Boniface VIII. who, in 1300, established the Jubilee.

BONIVARD, FRANÇOIS DE, was born in France in 1496. He became prior of St Victor near Geneva, and acted a prominent part in the support of the republic of Geneva against the tyranny of the Prince-bishop,

a wilderness. He was subsequently taken prisoner by the Indians, but escaped; and, being joined by other adventurers, was enabled to repulse them on several occasions, though neither art nor treachery were left unemployed to take him. At length, in 1798, he removed to Upper Louisiana, where he received a grant from the Spanish authorities of 2000 acres of land for himself, and 800 acres for each of his children, friends, and followers. He then settled with them on the Missouri river, at Charette, some distance beyond the inhabited parts of the country, where he followed his usual course of life—hunting and trapping for bears—until Sept. 1822, when he died, aged 64.

BOOTH, BARTON, an eminent actor, was born in 1681. He was educated at Westminster school and the university of Cambridge, but ran away from the latter to join a company of players. After winning a name at Dublin he was engaged by Betterton at Drury Lane Theatre, where he was very successful. Died, 1733, having lost his reason several years before.

BOOTH, SIR FELIX, bart., an eminent London merchant, who, for his munificent donation of £20,000 for promoting the arctic expedition under Sir John Ross, was raised to a baronetcy, and had his name affixed to the country called Boothia Felix. Died, 1850.

BOOTH, HENRY, earl of Warrington, son of George Booth, Baron Delamere, a zealous Whig during the civil war. Having been among those who voted for the exclusion of the duke of York, he was committed to the Tower when the duke became king, and was tried for high treason, but acquitted, in spite of the efforts of the infamous Jeffreys. On the accession of William III., he was made a privy councillor and chancellor of the exchequer. His efforts to limit the prerogative, however, caused him to fall into disgrace; but he was allowed to retire from office with a pension, and the title of earl of Warrington. Died, 1694.

BORDA, JEAN CHARLES, a French mathematician, born at Dax, in 1733. He served in the army as engineer, and afterwards in the navy, and was captured by the British in 1782, but soon set free. He was the inventor of the "circle of reflexion" and the "principle of repetition," by which errors of graduation and observation in astronomy are reduced to a minimum. He was engaged some years in the measurement of an arc of the meridian, in conjunction with Méchain and Delambre. Among his works are, "Description et usage du cercle de reflexion," and "Tables trigonométriques." Died, 1799.

BORDE, ANDREW, an English physician; author of "The Merry Tales of the Madman of Gotham," and several other quaint works. He was at first a Carthusian, but after giving medicine at Montpellier, and afterwards to London and became first physician to Henry VIII. Died, 1549.

BORDE, JEAN BENJAMIN DE LA, a French miscellaneous writer, born at Paris in 1734. He entered the service of Louis XV., and became a favourite; devoted much of his time to music, which he had studied under

Rameau, and on the death of his master became one of the "farmers-general." He was discovered in his retreat in Normandy by revolutionary agents, and guillotined at Paris in July, 1794. Among his numerous writings are, "Essai sur la musique ancienne et moderne," in four vols. 4to., "Description générale et particulière de la France," "Tableaux topographiques, &c., de la Suisse," &c.

BORDONE, PARIS, a celebrated Italian painter, was a native of Treviso. He was born in 1500, became a pupil of Titian, and then an imitator of Giorgione, spent some time at the court of Francis I., and painted the king and many of the ladies of the court, and died at Venice, 1571. His chef-d'œuvre is the picture of "The Fisherman presenting the Ring of St Mark to the Doge." Bordone excelled in portraits. There are two of his works in the National Gallery.

BORELLI, GIOVANNI ALFONSO, an Italian physician and mathematician, was born at Naples, in 1608. He taught mathematics at Messina, and afterwards at Pisa, and enjoyed the patronage of the Grand Duke Ferdinand. Suspected of taking part in the insurrection against the Spaniards at Messina, to which city he had returned, he fled to Rome and lived there under the patronage of Queen Christina of Sweden. He is considered head of the school of "l'atro-mathématiciens," or those who endeavoured to apply mathematics to the phenomena of living bodies. His principal work, which appeared soon after his death, is the treatise "De Motu Animalium." Died, 1679.

BORGHESE, MARIA PAULINE, Princess, the beautiful sister of Napoleon Buonaparte, was born at Ajaccio, in 1780. Her first husband was General Leclerc, with whom she went to St Domingo, but who died in 1802; she became, in the following year, the wife of the Prince Camillo Borghese. Napoleon was much attached to her; and that her love for him was equally sincere, was manifest on many striking occasions, though she frequently disputed with him, and refused to follow the caprices of his policy. When Napoleon resigned his crown in 1814, and retired to Elba, Pauline left her palace in Rome, and followed him to his place of exile. She lived afterwards, separated from her husband, at Rome, and her house was the centre of a most brilliant circle. When she heard of her brother's illness at St Helena, she repeatedly requested permission to go to him; at length her request was granted, and she was just about to depart, when the news of his death reached her. Died, 1825.

BORGIA, CESARE, son of Pope Alexander VI., was made a cardinal immediately after the election of his father to the papal chair. When Charles VIII. invaded Italy, Cesare was given to him as a hostage by his father, but he escaped, and took part against the French. In 1498 he resigned his dignity of cardinal to become a soldier, and the same year was sent to France with the bull of divorce for Louis XII., who gave him the title of Duke of Valentinois, and promised to aid him in his projected conquests in Italy. He then, at the head of a body of mercenarles,

[BOR]

[BOB]

ishop of Milan, was born of a noble family in the Milanese, in 1538. He was nephew to Pope Pius IV., and was made cardinal by him in 1561. After the close of the Council of Trent he was charged, with several prelates, to draw up the epitome of catholic doctrine entitled "Catechismus Tridentinus." On settling in his diocese he applied himself to reform the gross abuses, superstitions, and scandalous practices which had established themselves. A monk of the order of "Umiliati" attempted to assassinate him, and the pope suppressed that order. The beneficence and integrity of the archbishop were especially shown on occasion of the terrible plague of Milan, in 1576. Died, 1581. He was canonized by Paul V. in 1610.

BORRONEO, FEDERICO, cardinal, archbishop of Milan, was cousin of the preceding, and was born in 1564. He was created cardinal at the age of 23, and was appointed archbishop of Milan, in 1596. He was distinguished for his learning, and founded the celebrated Ambrosian Library, and various schools and charities. He was no less distinguished for the energy and fidelity with which he laboured in his ecclesiastical office, and especially for his noble services during the famine, and the subsequent plague at Milan. He left several works, and died in 1631.

BORROMINI, FRANCESCO, an Italian architect; the pupil of Maderno, whom he assisted as architect of St Peter's at Rome. His best work is the college of the Propaganda. Died, by his own hand, 1667.

BORY DE SAINT-VINCENT, JEAN BAPTISTE GEORGE MARIE, French naturalist, was born in 1780. At the age of 19 he went to the Mauritius, and made a survey of several neighbouring islands. On his return France he served for a time in the army, and was on the staff successively of Marshals Mouton, Ney, and Soult. He subsequently conducted scientific expeditions to Greece and some of the adjacent islands, during which he devoted himself to botanical researches; and in 1839 to Algiers. Among his works are "Voyage dans les quatre principales Iles des mers d'Afrique," "Expédition scientifique de Morée," &c. Died, 1846.

BOS, LAMBERT, professor of Greek at Leuven; author of the well-known and valuable work on the Greek ellipses, an excellent edition of the Septuagint, with prolegomena and various readings, &c. Born, 1604; died, 1717.

BOSC, LOUIS AUGUSTE GUILLAUME, French naturalist, born at Paris in 1750. He held a government situation for some years, and was a friend of the minister Roland. In 1793 he lost his place and his property, but had the courage to accompany the same Roland to the scaffold. She inclined to his care her own memoirs. He was a member of various scientific bodies, and wrote numerous memoirs on natural history. He also co-operated in the preparation of several dictionaries, and in the *Histoire Naturelle des coquilles*. Died at Paris, in 1828.

BOSCAN-ALMOGAVER, JUAN, a Spanish poet who first introduced into Spanish the use of Italian poetry. He lived some time

at the court of Charles V., and was the friend of Garcilaso de la Vega. His works are published with those of Garcilaso. Died, 1544.

BOSCAWEN, EDWARD, British admiral, was born in 1711. He early distinguished himself in the navy, and especially at the siege of Carthage, and at the battle with the French fleet off Cape Finisterre, in 1747. He was sent to India as commander-in-chief the same year; received the thanks of parliament for his capture of two French ships of war, in 1755; commanded the expedition to North America, in 1758, and took Louisbourg; and the next year won a great victory over the French fleet in the bay of Lagos, for which he again received the thanks of parliament and a pension, and was made a privy councillor. Died, 1761.

BOSCH, JEROME, a famous Dutch bibliomane; born in 1740, died in 1811. His library catalogue was remarkable for the number of *princeps* editions it contained.

BOSCOVICH, ROGER JOSEPH, mathematician, was born at Ragusa in 1701 or 1711, entered the order of Jesuits, and taught at the Roman College. He afterwards became professor at Pavia, and in 1773 went to Paris, where he held a post under the government. He wrote various mathematical and scientific works; among others "Philosophiæ naturalis theoria," "Opera pertinentia ad opticam et astronomiam," and a poem "De solis ac lune defectibus," without much poetry in it. He assisted in the measurement of a meridian in Lombardy, and died in 1787.

BOSIO, FRANÇOIS JOSEPH, sculptor, was an Italian by birth, but was brought up and constantly lived in France. He was born in 1769, was a favourite with Napoleon I., Louis XVIII., and the succeeding kings of France, who employed him in many public works. He was admitted to the Institute, and made a Baron. Died, 1845.

BOSSI, GIUSEPPE CARLO AURELIO, Baron de, an eminent Italian poet, born at Piedmont in 1758. He favoured the French interest on the invasion of Italy, and was rewarded by office and honours in France by Napoleon. He is chiefly known by his exertions in this country in favour of the Vaudois. Died, 1823.

BOSSU, RENÉ LE, an eminent French critic of the 17th century; author of a "Treatise on Epic Poetry," "Parallel of the Philosophy of Descartes and of Aristotle," &c. Born, 1631; died, 1680.

BOSSUET, JACQUES BENIGNE, bishop of Meaux, and one of the ablest defenders of the doctrines of the church of Rome, was born at Dijon in 1627. After studying in the Jesuits' College there he was sent to Paris, and entered the college of Navarre. He soon gained extraordinary reputation for purity, acquirements, and eloquence; numbered among his friends the great Condé, St Vincent de Paul, and Marshal Schomberg, but continued modest, and faithfully devoted himself to the study of the Bible and the works of St Augustin. Ordained priest in 1652, he retired to Metz, where he held a canonry. The great occupation of his life was controversy with the Protestants, and

he was often successful in his attempts to convert them. The great Turenne was among his converts. In 1669 he was appointed bishop of Condom, but resigned the see on being appointed in the following year preceptor to the Dauphin. He was soon after received at the French Academy, and in 1681 he was raised to the see of Meaux. He took the leading part in the assembly of the clergy, in 1682, respecting the limits of the papal and kingly authority in France, and drew up the famous propositions which thenceforth became a law of the state. The pope had them burnt. Bossuet was engaged for some years in discussing with Leibnitz the possible union of the Lutheran with the Roman church, but without result. In his old age he opposed "Quietism," and prosecuted Madame Guyon; and when Fénelon, his old friend, defended her, he grew angry, exiled Fénelon, and after much controversy got the pope to condemn his book entitled "Maximes des Saints." The writings of Bossuet are very numerous. The most celebrated are his "Exposition de la doctrine catholique," which excited the greatest interest, and was soon translated into the principal languages of Europe; "Histoire des variations des Eglises Protestantes;" "Traité de la connaissance de Dieu et de soi-même;" "Discours sur l'histoire universelle," the first great attempt to view history as a whole, and to trace one divine purpose pervading it; and "La Politique tirée de l'Ecriture Sainte," a vindication of the purest absolutism. The three last-named works were written for the instruction of the Dauphin, and present in a very impressive manner a complete theory of life in antagonism to all modern thought and science. Bossuet was a great master of style, and one of the most powerful of modern writers. Died at Paris, April 12, 1704.

BOSSUT, a celebrated French mathematician, the friend and associate of Condorcet, D'Alembert, Bally, and Lavoisier. He was admitted to the Academy in 1752, and to the Institute at the time of its foundation. His principal works are the "Cours complet de mathématiques," in seven vols. "Histoire générale des mathématiques," and a volume of "Mémoires de mathématiques." Born, 1730; died, 1814.

BOSWELL, JAMES, the biographer of Dr Johnson, was born at Edinburgh in 1740. After studying law at the Scottish universities he travelled on the continent, indulging as frequently as possible his haughtiness after personal introduction to eminent men. He accompanied Dr Johnson, to whom he had been introduced on his visit to London in 1763, on a tour to the Hebrides in 1773. About ten years later he settled in London, and was called to the English bar. His celebrated "Life of Johnson" appeared in 1790, five years after his friend's death. It had immense success, has been republished again and again, and still remains for its excellence as a biography incomparable. Boswell had previously published a "Journal of the Tour to the Hebrides." He was also author of various political and professional pamphlets, and "An Account of Cor-

sica, with Memoirs of General Paoli." Died, 1795.

BOSWELL, SIR ALEXANDER, eldest son of the preceding, was born in 1773, and succeeded his father in the possession of the family estate. He was a literary antiquary of no inconsiderable erudition, and the author of many popular songs and poetical *jeux d'esprit*. He inherited all the Tory spirit of his father; and some attacks on the character of James Stuart, Esq., having appeared in the Beacon and Sentinel newspapers, which were traced to Sir Alexander, a duel took place between these gentlemen, when the latter fell, mortally wounded in the neck, March 26, 1822. Mr Stuart was tried for this offence, but honourably acquitted.

ROTH, JOHN AND ANDREW, brothers, Flemish painters, born at Utrecht about 1610. John chose landscape painting, and took for his model Claude Lorraine, while Andrew studied and painted the human figure; they frequently worked on the same canvases, and their labours harmonized so well, that their pictures could not be suspected of being joint productions. Andrew was drowned at Venice in 1650; John died at Utrecht, 1656.

BOTHWELL, JAMES HENRY, Earl of, was born about 1525, and succeeded his father in his title and estates in 1556. He took an active part under the queen-regent against the party of Knox, but changed sides on her death, and was one of the envoys sent to France to escort Queen Mary home. In 1562 he fled from Scotland to escape prosecution for conspiracy against the queen, but returned in 1563, and was restored to his place in the privy council. His interference obtained pardon for the murderers of Rizzio, and he was in great favour with the queen. He was generally believed to be the murderer of Darnley, and was tried for it; he appeared with his friends in arms and was acquitted. He soon after seized the queen and carried her off to Dunbar castle, not without her consent, it was said. She pardoned him, made him duke of Orkney, and married him at Holyrood. The people took up arms, the queen was defeated at Corberry Hill, and Bothwell fled, escaping first to the Orkneys, and thence to Denmark, where he was seized as a pirate and imprisoned. After ten years of wretched life, deprived of all things but the memory of his crimes, he died mad, 1577.

BOTTA, CARLO GIUSEPPE, one of the most celebrated Italian historians, was born in Piedmont in 1766. He graduated in medicine at Turin, and after suffering imprisonment as a partisan of the French, he emigrated and served as physician in the army of the Alps and in the army of Italy through the campaign of 1796. Named, in 1800, a member of the "Consulta" of Piedmont, elected four years later deputy to the French Legislative Body, he settled in Paris, and after the restoration of the Bourbons he applied himself to the composition of his historical works. These are "Storia della Guerra dell'Indipendenza d'America;" "Storia d'Italia dal 1789 al 1814," and "Storia d'Italia in continuazione

Guicciardini, also a story of Italy made his name, and has taken its place." Died at Paris, 1837. **BOTTARI, GIOVANNI**, an Italian philologist and man of letters, born at Florence in 1669, and died in the university. He was distinguished in recasting the celebrated Academy Della Crusca, and in the grand duke of Tuscany's printing-office, and in 1730 he held various offices. He became librarian of the Grand Duke, and was author of a learned treatise on the writings and sculptures of the tombs of Reno; also "Stollman," an account of four vols. folio; and "L'Opera di Vasari's Lives of the Artists," 1775.

BOTTICELLI, FILIPEPO, an Italian painter, distinguished himself in sculpture. Driven with his family to Epirus by Ali, pasha, he subsequently joined the Turkish army, and soon took part with him against the Greeks. He especially distinguished himself in the defence of Missolonghi, and was killed with a body of Albanians in August, 1823.

BUCHARDON, EDMOND, French philosopher, born in 1698. He obtained the chair of Logic in the Academy, studied at Leyden, and returned to the Academy of Pope Clement XII. in 1752. He was a friend of Voltaire and Robespierre. Died, 1770. **BUCHER, JONATHAN**, an English philosopher and philologist, was born in 1737. When about twenty years of age he went to America, and was afterwards a parish minister in the State of Independence. He was distinguished for his loyalty to the British cause in the country. He subsequently became vicar of Epsom, and there spent the remainder of his life. He made large collections for the British Museum, and was not living to complete the work only his name was also author of a "History of the Causes and Consequences of the American Revolution." Died, 1804.

BUCICAUT, JEAN LE MARQUIS, one of the bravest and most distinguished soldiers, was born at Turin in 1710. He led his first campaign at the battle of Mollath, and soon distinguished himself by his great strength, agility, and courage. He served against the Turks at the battle of Roshach; then in the army of the Teutonic knights; and in 1738, under the count of Maffei, he was ordered to force sent to aid Sigismund, against the Turks under the command of the captured at the battle of Roshach, and returned to his country. He was appointed governor of a post which he held in 1740. He was taken prisoner at the battle of Agli

Guicciardini, sino al 1789." Hotta's history of Italy made him a great reputation, and has taken its place as a standard work. Died at Paris, 1837.

GOTTARDI, GIOVANNI, a distinguished Italian philologist and archaeologist, was born at Florence in 1689, and was educated at the university. He was engaged several years in revising the celebrated Dictionary of the Academy della Crusca, was made by grand duke of Tuscany director of his printing-office, and in 1730 settled at Rome, where he held various offices under Clement XIII. he became librarian of the Vatican. He was author of a learned work on the writings and sculptures discovered in the tombs of Rome; also of "Museum Stolæum," an account of illustrious men, four vols. folio; and published a new edition of Vasari's Lives of the Painters. 1775.

OTTICELLI. [FILIFEPI, SANDRO.]

OTZARIS, MARCOS, a brave Soulloto, distinguished himself in the Greek Revolution. Driven with his countrymen to Epirus by Ali, pasha of Janina, he frequently joined the Turks against Ali; soon took part with him against the Greeks. He especially distinguished himself in the defence of Missolonghi, and fell in a battle with a body of Albanians sent to it in August, 1823.

UCKARDON, EDMÉ, French sculptor, born in 1698. He obtained the grand prize of the Academy, studied at Rome, and was admitted to the Academy. He executed the bust of Pope Clement XII. and of Cardinals de Noailles and Rohan. Died, 1762.

UCHER, JONATHAN, an English diplomatist and philologist, was born in Cumberland in 1737. When about twenty years of age he went to America, and there became secretary and a parish minister. After the declaration of Independence he was commissioned, for his loyalty to the English crown, to leave the country. He subsequently became vicar of Epsom, and there spent the remainder of his life. He projected a large collection for a dictionary of the English provincial and antiquated terms, but did not live to complete it. A small number of the work only has been printed. He was also author of a "View of the Language and Consequences of the Revolution." Died, 1804.

UCAUT, JEAN LE MAINGRE,

one of the bravest and noblest of French soldiers, was born at Tours in 1570. He served his first campaign at twelve years of age, and soon distinguished himself by his great strength, agility, and hardihood. He served against the Flemings at the battle of Rosbach; then in Prussia, in the service of the Teutonic knights; in Guicenne in the English; and in 1396 he commanded a force sent to aid Sigismund, king of Hungary, against the Turks under Bajazet. He was captured at the battle of Nicopolis, ransomed, and returned to France. He was appointed governor of a frontier post which he held nearly ten years. He was taken prisoner by the English at the battle of Agincourt in

1415, and brought to England, where he died in 1421.

BOUFFLERS, LOUIS FRANÇOIS, Duke de, marshal of France, was born in 1644. He entered the army in 1662, served under Turenne and Luxembourg, in Flanders, was wounded in several battles, and contributed in 1690 to the victory of Fleurus. Created marshal three years later, he defended Namur against William III. of England, but capitulated after several months and was kept prisoner for a very short time. He again served in Flanders in the war of the Spanish Succession, and distinguished himself by his obstinate defence of Lille against Prince Eugene. He capitulated by express order of Louis XIV., who then made him duke and peer of France. His last service was at the bloody battle of Malplquet, when he conducted the retreat of the right wing. Died at Fontainebleau, 1711.

BOUFFLERS, STANISLAUS, Chovaller de, son of the marchioness of Boufflers, mistress of Stanislaus, king of Poland, was born in 1737, and was distinguished for the elegance of his manners and conversation. He was destined for the church, but declared that his love of pleasure would interfere with the duties of this profession, and therefore entered the military service. He emigrated from France in 1792, to Prussia. His works consist of poems, discourses, "Eloges," tales, &c., and have been several times republished. His character has been thus summed up; "A libertine abbé; a military philosopher; a song-making diplomatist; an emigrant republican." Died, 1815.

BOUGAINVILLE, JEAN PIERRE DE, a French miscellaneous writer; author of several works no longer possessing any importance; and editor of Freret's great work on Chronology. He was secretary to the Academy of Inscriptions, and member of the French Academy. Born, 1722; died, 1763.

BOUGAINVILLE, LOUIS ANTOINE DE, a French officer, distinguished both in the military and naval service. When serving in Canada, under Montcalm, he displayed so much bravery that he obtained the rank of colonel, and subsequently became a general. Under the empire he was made senator, and a member of the Institute. Bougainville circumnavigated the world, and enriched the science of geography by a number of new discoveries. His voyage round the world was undertaken in 1766, and the account of himself appeared in 1771. Born, 1729; died, 1811.

BOUGUER, PIERRE, French mathematician, was born in Brittany in 1698. He carried off several prizes of the Academy for scientific memoirs, and having won a great reputation, was sent with Lacondamine to Peru, to measure a degree of the meridian; a very difficult task, made more difficult by the ignorance and absurd suspicions of the natives. He afterwards took part with other mathematicians in verifying a similar measurement in France. Bouguer was a member of the Academy of Sciences of Paris and of the Royal Society of London. His chief works are "Traité de la graduation de la lumière," "Traité du navire," "La figure de la terre déterminée par les

observations," &c. Bouguer was also the inventor of the double object-glass micrometer. Died, 1758.

BOUQUERS, DOMINIQUE, a French Jesuit and orator; author of "Les Entretiens d'Ariste et d'Eugène," "Manière de bien Penser dans les Ouvrages de l'Esprit," &c. Born, 1628; died, 1702.

BOUILLARD, JACQUES, a celebrated French engraver; born in 1744, died in 1800.

BOUILLAND, [BULLIALDUS.]

BOUILLE, FRANÇOIS CLAUDE AMOUR, Marquis de, born in 1759; a distinguished French general, celebrated for his exploits up to the era of the French revolution. He sat on liberal principles in the first Assembly of Notables, and after making excellent, though abortive, preparations to assist the unfortunate Louis XVI. in pursuing his journey from Varennes after his flight from Paris, he quitted France and served under the allies. He died in London in 1800. His "Memoirs of the French Revolution" rank deservedly high.

BOUILLON. [GODFREY OF BOULLON.]

BOULAINVILLIERS, HENRI DE, Count de St Saire; author of a "History of Mahomet," a "History of the Arabians," a "History of the Peerage of France," &c. Born, 1668; died, 1722.

BOULAY DE LA MEURTHE, A. J. C., born in 1701; one of the most distinguished orators of the French revolution, and author of several works on political science. He was president of the civil tribunal at Nancy, in 1793, and had great share in confirming the expatriation of the emigrants in 1793, when a member of the council of the Five Hundred. He was subsequently faithful to Buonaparte through all his changes of fortune; and on that account was proscribed, and banished to Frankfort, by the Bourbons, on their second restoration in 1815.

BOUTER, HUGH, archbishop of Armagh, eminent for his benevolent exertions to alleviate the distress of the Irish during the scarcity of 1740, and for the part he took in establishing schools for the instruction of the Irish children. Died, 1742.

BOULTON, MATTHEW, an eminent engineer, whose spirit and talent improved innumerable mechanical processes, and whose name, with that of his partner, Watt, is inseparably connected with that of the wonderful power of which they made such skillful use, the steam engine, was born at Birmingham, in 1728. Among the many great undertakings in which Boulton and Watt were engaged, one of the most useful and important was the improvement of the coinage, the coins struck at the "Soho" manufactory being rarely surpassed in beauty or accuracy. From some interesting discoveries made at Soho in 1863, it appears probable that Boulton succeeded in taking photographs upon metal plates, and perhaps also on paper. But his discovery excited alarm among interested parties, and the secret of it was lost. Boulton was a fellow of the Royal Society. After a long life uninterruptedly devoted to the advancement of the useful arts, and the promotion of the commercial interests of his country, he died in 1809.

BOURBON, CHARLES DE, the celebrated Constable de Bourbon, was born in 1480. By his marriage with Suzanne de Bourbon he acquired immense wealth, and he displayed it in the maintenance of almost royal state. He accompanied Louis XII. in his invasion of Italy, and diligently studied military affairs. At the age of 26 he was named constable of France by Francis I., whom he accompanied in the campaign of Italy, contributing to the victory of Marignano. He was soon after appointed governor of the Milanese. An act of flagrant injustice, sanctioned by Francis, led to a breach between him and the constable; a claim being set up by the queen-mother to the estates of Bourbon, and decided in her favour. He then entered the service of the emperor Charles V., who gave him the chief command in Italy. At the great battle of Pavia he completely defeated the French army and took Francis I. prisoner. Finding that he was distrusted by the emperor, and being left with means of paying the troops in Italy, he resolved on independent action, and in 1527 led his army to the siege of Rome. Rome was taken and suffered the horrors of a sack, but the constable had fallen early in the assault.

BOURBON, LOUIS HENRI JOSEPH, Duke de, and Prince de Condé, is supposed to have put an end to his existence, Aug. 27, 1830. He fought nobly in the royalist army in the first years of the revolutionary war, and after the campaign in 1800 accompanied his father to England, and was residing with him at Waustead House in 1804, when his son, the Duke d'Enghien, was murdered. The duke's death is attributed to the excitement of his mind respecting the revolution of July, 1830. His property he left by will to the Duke d'Aumale, third son of Louis Philippe, with the exception of a la. a bequest to Sophia Dawes, baroness de Feucheret, an Englishwoman, with whom he lived.

HOURLBOTTE, PIERRE, a French Jacobin, remarkable for his ferocity and military courage; born about 1765. Being a member of the convention in 1794, and aiming at the dictatorship, on the 1st Prairial he and his colleagues were crushed by Legendre; and after regarding himself before the revolutionary tribunal, but ineffectually, he was guillotined.

BOURCHIER, JOHN, Lord Berners, a military commander of great repute in the reigns of Henry VII. and VIII., by the latter of whom he was made governor of Calcutta. He assisted in the suppression of the insurrection under Lord Audley in Cornwall, became chancellor of the exchequer, and accompanied the Princess Mary to France. Lord Berners was author of the first English translation of "Froissart." Died, 1532.

BOURCHIER, THOMAS, cardinal, and archbishop of Canterbury. He studied at Oxford, and, after holding the sees of Worcester and Ely, was made archbishop of Canterbury in 1454. He was also for a short time lord chancellor. He crowned three of our kings, viz. Edward IV., Richard III., and Henry VII. Archbishop Bouchier took

leading part in the introduction of this country. Died, 1480.

BOURDALOUE, LOUIS, a one of the most eloquent preachers. His sermons even inspired as they are of the eloquent action, and the sufficient evidence of his prizes that have been given. Born, 1632; died, 1704.

BURDON, SEBASTIEN, a French engraver; his *chef d'oeuvre* is "The Vision of St Peter," which he executed in the church of Notre Dame, Paris, 1671.

BURGEON, SIR FRANCIS, an English statesman, but of Swiss family; born in 1680, and subsequently ambassador of England. His lands were once highly esteemed, and he collected to Dulwich 600 pictures for building a gallery, which he died in 1792. Born, 1759; died, 1830.

BURGOING, JEAN FRANÇOIS, born in 1748; ambassador to Switzerland of the French republic, and afterwards ambassador to Napoleon, who subsequently visited him, and in 1807 to Saxony. He has left several approved works, which are his "Tableau de la France," "Mémoires de Ploern," &c. Born, 1811.

BURIGNON, ANTOINETTE, a Flemish fanatic. He consisted in direct impulse and union with the Deity, she wrote numerous tracts, and was a public chiefly for their absurdly excessive and unvaried and unvaried. Died, 1680.

BURMONT, LOUIS AUGUSTE V., a distinguished French general, was born in 1773. In the early part of the French revolution, while second lieutenant, he emigrated from France. He served in the ranks of the Bourbon princes on the frontiers of the royal cause in Brittany, and Maine, and was distinguished by his courage and talent. During the course of the revolution he was arrested on account of his connection with the plot of the king, but after suffering imprisonment, he made his escape to England, where he returned to France in 1815, and was appointed to various high commands in the military and naval service, and served with distinction in the Italian and Russian campaigns. On Napoleon's return from exile he was appointed to the command of a division of the corps of observation, and on the commencement of the campaign he was appointed to the command of the grand army; but on the battle of Waterloo he abandoned the army, and repaired to Louis XVIII. at Ghent. This extraordinary man—famous or infamous according to different parties—won the favour of the restored Bourbons after the battle of Waterloo, and was appointed to the command of the frontier, and shortly afterwards to the command of the gallant Ney, to whose

A New Universal Biography.

[BOW

leading part in the introduction of printing
to his country. Died, 1486.

MOURDALOUE, LOUIS, a French Jesuit,
one of the most eloquent preachers in
France. His sermons even in the perusal,
aroused as they are of the eloquent, the
powerful action, and the melodious voice,
are sufficient evidence of his genius to justify
praises that have been bestowed upon
him. Born, 1633; died, 1704.

MOURDON, SEBASTIEN, a French painter
and engraver; his *chef d'oeuvre* is "The Cru-
cifixion of St Peter," which he executed for
the church of Notre Dame. Born, 1618;
died, 1671.

MOURGEOIS, SIR FRANCIS, a native of
Switzerland, but of Swiss family; painter to the
king of Poland, and subsequently to George
of England. His landscapes and sea
scapes were once highly esteemed. He left
a collection to Dulwich College, with
£1000 for building a gallery, and keeping
pictures in preservation. He became
blind in 1792. Born, 1750; died, 1811.

MURGOING, JEAN FRANÇOIS, Baron de,
born in 1748; ambassador to Spain on the
part of the French republic, and afterwards
to Napoleon, who subsequently sent him to
Weimar, and in 1807 to Saxony. He died
in 1811. He has left several approved works,
of which are his "Tableau de l'Espagne
de 1808," "Mémoires de Pie VI.," &c.
1811.

MURIGNON, ANTOINETTE DE LA
TOURNAI, a Flemish fanatic. Holding reli-
gion to consist in direct impulses from and
union with the Deity, she made many
visions, and wrote numerous books, re-
markable chiefly for their absurdity. She
was successively avaricious and penurious.
Born, 1616; died, 1689.

MURMONT, LOUIS AUGUSTE VICTOR DE
LA MOUILLONNE, Marshal de France, distinguished French
officer, was born in 1773. In the early periods
of the French revolution, while second lieutenant of
artillery, he emigrated from France, joined
the Bourbon princes on the frontiers, and
served the royal cause in Lorraine,
Brittany, and Maine with great
valour and talent. During the consulate
he was arrested on a charge of
conspiracy, but after suffering imprisonment
in the Temple, and at Dijon and
Versailles, he made his escape to Lisbon,
where he returned to France, and
was appointed to various high commands in
military service, and served with great
distinction in the Italian and Russian cam-
paigns. On Napoleon's return from Elbn, he
was appointed to a division of the corps of Ney,
and was appointed to the command of a
division of the grand army; but on the eve
of the battle of Waterloo he abandoned his
post, and repaired to Louis XVIII., who
was at Ghent. This extraordinary
conduct—famous or infamous as it is
regarded by different parties—won for him
the favour of the restored Bourbons.

After the battle of Waterloo he en-
joyed the title of commander of the
frontier, and shortly after the
death of the gallant Ney, to whose con-

domnation his evidence mainly contributed,
was appointed to the command of one of
the divisions of the royal guards. In 1823
he took part in the Spanish campaign under
the Duke d'Angoulême, on whose return to
France he obtained the chief command of
the army of occupation. In 1829 Charles X.
organised the expedition which finally re-
sulted in the capture of Algiers, for which
he was honoured with the baton of a mar-
shal of France. After the revolution of 1830,
which placed Louis Philippe on the throne,
he was proscribed. He then devoted his
services to the cause of absolutism in differ-
ent countries, especially in Portugal; but he
was subsequently permitted to re-enter
France, where he continued to live in ob-
scurity till his death, which took place
Nov. 9, 1846.

MOURNE, VINCENT, sub-master of West-
minster School; he was a man of original
genius, and was educated at Cambridge. He
made himself known by some Latin poems
of singular elegance and purity. Died, 1747.

**BOURRIENNE, LOUIS ANTOINE PAUVRE-
LET DE**, private secretary and biographer of
Napoleon I., was born at Sens in 1769. He
was a fellow-student with Napoleon at the
military school of Brienne, and there their
friendship began. Bourrienne studied at
Lolpse, and held several diplomatic posts;
he was present with Napoleon at the attack on
the Tuilleries in June, 1792; and after vari-
ous changes of fortune was chosen, in 1797,
by his old friend to be his private secretary.
This post he held five years, and was dis-
missed on account of his connection with
some disgraceful money transactions. Charges
of a like kind led to his dismissal from a di-
plomatic post at Hamburg. He followed
Louis XVIII. to Ghent; was made councillor
of state and deputy to the Chamber of Re-
presentatives; fled to Belgium to escape his
creditors, and died in a lunatic asylum at
Caen, in 1831. His "Mémoires sur Napo-
leon" appeared in 8 vols. in 1829-30.

BOUTERWEK, FRIEDRICH, professor of
philosophy at Göttingen, was born in 1766,
and died in 1828. He was the author of
many valuable works, of which his "History
of Modern Poetry and Eloquence" is the
most important.

BOWDITCH, THOMAS EDWARD, agent of
the English African Company, was a native
of Bristol, born in 1793. He was selected to
conduct a mission to the king of Ashantee,
of which mission he published a very in-
teresting account. He again set out to ex-
plore the interior of Africa, and had already
reached the river Gambia, and had already
produced chiefly by anxiety, terminated his
life in 1821. He was an excellent linguist
and a pleasing writer; and besides the work
already mentioned, the public are indebted
to him for a translation of Mollieu's Travels
to the Sources of the Senegal and Gambia;
and other works.

BOWDITCH, DR NATHANIEL, F.R.S.,
president of the American Academy of Arts
and Sciences, was a native of Boston, and
though self-educated, attained great distinc-
tion as a natural philosopher and mathema-
tician. When 23 years of age he published

his "Practical Navigator," a work of great merit; but his admirable translation of the "Mécanique Céleste" of La Place, with an elaborate commentary, is the production that is most likely to perpetuate his name. Died, 1838.

BOWDLER, THOMAS, an English physician; author of "Letters from Holland," and editor of the "Family Shakspeare," &c. Born, 1754; died, 1825.

BOWDOIN, JAMES, an American statesman and man of letters, born at Boston, 1727. He was one of the most determined opponents of the right of colonial taxation, insisted on by England, and was one of the first deputies to Congress. He became governor of Massachusetts, and president of the Philadelphia Academy of Sciences; and died in 1790. His "Discourse on the New Constitution of the United States" is deservedly admired.

BOWLES, WILLIAM LISLE, poet, was born at King's Sutton, in Northamptonshire, a parish of which his father was vicar, in 1762. He was educated at Winchester and at Trinity College, Oxford, where he took his degree in 1782. On leaving the university he was appointed to a curacy in Wiltshire; from which he was preferred to a living in Gloucestershire, and in 1803 to a canonry in Salisbury cathedral. His next step was to the rectory of Iremhill in Wiltshire, to which he was presented by Archbishop Moseley. Here he remained till his death, unremitting in his professional duties, zealous in the education of the poor, and an exemplary instance of the union of Christian graces with the polish of taste and the amenities of literature. His sonnets were published in 1789, and may be reckoned among the first fruits of a new era in poetry. In these sonnets were observed a grace of expression, a musical versification, and especially an air of melancholy tenderness, so congenial to the poetical temperament, which still preserve for their author a highly respectable position among our poets. The chief of his subsequent poems were "Hope, an allegorical Sketch," "St Michael's Mount," "Coombe Ellen," and "Grave of Howard." His "Spirit of Discovery by Sea," the longest of his productions, was published in 1804. Mr Bowles published also an edition of Pope, which involved him in controversy with Lord Byron, as well as a great variety of tracts, literary, antiquarian, and theological. He was very playful in his habits and conversation, and many anecdotes are told of his Parson-Adams-like forgetfulness. Died, 1850.

BOWLES, CAROLINE. [SOUTHEY, CAROLINE.]

BOWYER, WILLIAM, one of the most learned English printers, was born at London in 1699. He was the son of an eminent printer, and after studying at Cambridge, became partner in his father's business about 1721. He soon attained a very high reputation, both for accuracy as corrector of the press, and for classical and antiquarian scholarship; and an immense number of learned and sumptuous works issued from his press. To many of them he added notes, prefaces, and commentaries, which were

afterwards published in a separate form as "Miscellaneous Tracts." He obtained various lucrative appointments; among them those of printer of the votes of the House of Commons, printer to the Society of Antiquaries, and to the Royal Society, &c. He numbered among his friends many of the most distinguished literary men of the day, and was as much esteemed for his integrity, simplicity, and kind-heartedness, as he was honoured for his learning and skill. His "Critical Conjectures and Observations on the New Testament" were highly commended, and passed through several editions. Died, 1777.

BOYCE, WILLIAM, an eminent musical composer, born at London in 1710. At the age of 26 he became composer to the Chapel Royal, and about twenty years later, organist. He received the degree of Mus. D. from the university of Cambridge. His works consist chiefly of Anthems, which entitle him to a high rank as composer of church music. He also published a magnificent collection of "Cathedral Music of the English Masters," in 3 vols. Folio. Died, 1779. He was buried in St Paul's cathedral.

BOYD, ZACHARY, an eminent Scottish divine of the 17th century. After studying at the college of Glasgow he went in 1661 to Saumur, where he became regent of the university. Persecution drove him home in 1671, and he was soon after chosen minister of the Barony parish, Glasgow, an office which he held till his death. He made a Latin speech before Charles I. at Holywell Palace in 1633, and preached before Cromwell after the battle of Dunbar in 1650. His principal work is entitled "The Battell of the Soule in Death." He also wrote "Zion's Flowers," two volumes of curious poems on Scripture subjects, known as "Zachary Boyd's Bible." He left an immense number of volumes in manuscript. This remarkable man was wealthy, and left a splendid legacy to Glasgow College; not dependent, as is commonly said, on the publication of any of his works. Died, 1653.

BOYDELL, JOHN, an English engraver and liberal patron of art, was born in 1733. He established himself in London as a publisher, and by his enterprising spirit and the liberal engagements which he offered to artists, contributed powerfully to the formation of a school of English engravers. His famous "Shakspeare Gallery" was a collection of paintings executed at his expense by the best artists of the day in illustration of the works of Shakspeare. The pictures were also engraved, and the "Gallery" reproduced by photography in 1864. Boydell's name is also associated with the most famous edition of Shakspeare in 9 vols. 8vo. and with several valuable collections of engravings. Died, 1804.

BOYER, ABEL, a French lexicographer. He quitted his native country after the revocation of the Edict of Nantes, and went to England, where he remained till his death. He was author of a French and English Dictionary and Grammar, which had a very extensive circulation; and

in a separate form as
treatments; among them
votes of the House of

e country after the
ation of Nantes, and
he remained till
or of a French and
Grammar, which
ve circulation; but

several literary and political publications of
merit. Born, 1684; died, 1739.

HOYLE, RICHARD, earl of Cork, an emi-
nent statesman in the reign of James I., and
member of a family greatly distinguished in
the arts, sciences, and literature. He was
educated at Cambridge, filled several govern-
ment offices in Ireland, and was made in
1699 one of the lords justices of Ireland.
He was soon after promoted to the office of
high treasurer. Born at Canterbury,
1664; died, 1643.

HOYLE, ROGER, earl of Orrery, fifth son
of the above. When only seven years old
he was created Baron Breghill; and, from
an early age, was conspicuous for his zeal
in the king's service. But after the king
was put to death, the baron transferred his
services to Cromwell, by whom he was
privately trusted. At the death of Cromwell
he aided in bringing back Charles II., and
was created earl of Orrery for his services
at that occasion. Born in Ireland, 1621;
died, 1679. He was the author of several
sermons and plays.

BOYLE, ROBERT, the distinguished natu-
ral philosopher, was a younger brother of
the preceding, and was born at Lismore in
1626. He was educated at Eton, travelled
over the continent, and studied several years
in Geneva. He afterwards visited Italy,
and returned to England in 1644. His life
was thenceforth devoted to science and
philosophy. He was one of the first mem-
bers of the association which was incorpo-
rated as the "Royal Society," and was chosen
president; an honour which on consensu-
ous grounds he declined. He contributed
greatly by his numerous experiments and
valuable discoveries to the progress of phys-
ical science. He was no less zealous in the
 defence and propagation of the Christian
 faith; bore the expense of translating the
 historical books of the New Testament into
 Latin, and of the work of Grotius on the
 Law of the Christian Religion into Arabic;
 and founded by his will the endowment for
 the "Boyle Lectures." He enjoyed the
 friendship of Charles II., James II., and
 William III., but free from ambition refused
 the honour of a peerage. His collected
 works were published in 5 vols. folio in
 1704. Died at London, December, 1691.

BOYLE, CHARLES, Lord Boyle, second
 son of Roger, earl of Orrery, is chiefly re-
 membered in connection with the great con-
 troversy between Bentley and the Oxford
 Divines respecting an edition of the "Epi-
 stles of Phalaris," published by Boyle, or in
 his name, while a student at Christchurch.
 Though his name was used it does not
 appear that he took any part in the con-
 troversy. He entered parliament in 1700,
 and afterwards made privy councillor, and
 employed on a mission to the states of Hol-
 land. He was author of some slight literary
 works and poems. Born, 1676; died, 1731.

BOYLE, JOHN, earl of Cork and Orrery,
 second son of the last named; author of a
 translation, with notes, of the "Epistles of
 St. John the Younger," "Remarks on the Life
 and Writings of Swift," papers in the Con-
 querour and the World, &c. Born, 1707;
 died, 1762.

HOYLE, RICHARD, third earl of Burling-
 ton, and fourth earl of Cork, another mem-
 ber of the same distinguished family. He
 was an enthusiastic admirer of architecture,
 and a very generous friend to men of letters.
 In him Bishop Berkeley found his earliest
 and most eminent patron; and Pope did him
 the honour to address to him his fourth
 epistle. Born, 1695; died, 1766.

HOZE, CLAUDE GROS DE, a French numis-
 matist and archæologist; he became secre-
 tary to the Academy of Inscriptions, mem-
 ber of the French Academy, and keeper of
 the king's cabinet of medals; and was
 author of the *Medallio History of Louis
 XIV.*, &c. Born, 1680; died, 1764.

BRACCINI, NICCOLO. [TRIBOLO.]
BRACCIO FORTEBRACCI, or BRACCIO
DA MONTONE, a celebrated Italian Condot-
 tiere, who played a prominent part in the
 civil wars of Italy in the 14th century, was
 born at Perugia in 1368. He belonged to
 the party of the nobles, and with his family
 was exiled in 1393. After distinguishing
 himself as a commander in the service of
 various sovereigns, he assisted Ladislaus,
 king of Naples, in his war with the pope
 and the Florentines. Forbidden to enter
 Perugia when it submitted to Ladislaus, he
 aided the Florentines and the pope. In 1416
 he successfully attacked Perugia, and was
 declared lord. His government was wise
 and temperate, he introduced a reform of
 manners, erected noble buildings, and im-
 proved the irrigation of the country. In
 1417 he took Rome, but did not hold it long;
 the war which followed was ended by a
 peace in 1420. He was soon after created,
 by the queen of Naples, prince of Capua
 and constable of the kingdom. He under-
 took the siege of Aquila, and was wounded
 in a battle with the papal army sent to raise
 the siege. He refused all food and remedies,
 and died, June, 1424.

BRACCIOLINI. [POGGIO.]
BRACOTON, HENRY DE, an English law
 writer of the 13th century; author of the
 well-known and esteemed treatise "De
 Legibus et Consuetudinibus Angliæ."

BRADDOCK, EDWARD, Major-general.
 He was commander-in-chief of the British
 forces in America, during the war with
 France in the 18th century; and was slain
 when on the point of investing Fort Du-
 quesne, in 1755.

BRADLEY, JAMES, a distinguished as-
 tronomer, born about 1693, at Sherbourn, in
 Gloucestershire. He studied at the univer-
 sity of Oxford, and entered the church. He
 was early known as an astronomical ob-
 server, and was admitted fellow of the Royal
 Society in 1718. Three years later he was
 named Savilian professor of astronomy at
 Oxford. In 1742 he was appointed astron-
 omer royal. He died in 1762, having enjoyed
 during the last ten years of his laborious
 life a pension of £260. The fame of Bradley
 as one of the most eminent of astronomers
 rests upon his discoveries of the phenomena
 called *aberration of light*, and *nutation*, and
 upon the immense mass of accurate obser-
 vations made by him at the Observatory at
 Greenwich. The first of these discoveries
 is assigned to the year 1728, the latter to the

year 1747. The *Observations* of Bradley form the basis of the great work of the German astronomer Bessel, entitled *Fundamenta Astronomica*.

BRADSHAW, JOHN, president of the high court of justice for the trial of Charles I., was born in Cheshire in 1586. He was called to the bar, and was employed by the parliament in several important prosecutions. He was made chief justice of Chester, and in 1648 attained the rank of serjeant-at-law. He was a thorough republican; conducted himself with great firmness as president on the great trial; received a large pension; and several lucrative appointments for his services; took part in some of the plots against the protector; was subsequently president of the council of state, and a commissioner of the great seal, and died in 1659. His body was one of those buried in Westminster Abbey, and was one of those brutally exhumed and hung in chains at the restoration. Bradshaw was a cousin of Milton, who has written his eulogy in an eloquent passage of the "Second Defence of the People of England."

BRADWARDIN, THOMAS, archbishop of Canterbury; author of a treatise "De Causa Dei," directed against Pelagianism; some mathematical tracts, &c. Died, 1349.

BRADY, NICHOLAS, an English divine; translator, in conjunction with Tate, of the Psalms. He studied at Oxford and Dublin, took an active part on the side of the prince of Orange, and became afterwards chaplain to the king. He had influence enough to save, on three occasions, his native town from the destruction ordered by James II. Born at Bandon, Ireland, 1659; died, 1726.

BRABHAM, JOHN, one of the most celebrated singers of the age, was born in London in 1774. His parents, who were Jews, died when he was still a child, but he was confided to the care of Leoni, an Italian singer of celebrity, and made his *début* as a public singer before he had attained his eleventh year, when, from the quality and compass of his voice, he was enabled to sing several *bravura* songs that had been written for Madame Mara. In 1794 he appeared at Bath at some concerts that took place under the direction of M. Rauzzini, who, appreciating his talent, gave him musical instruction for three years. In 1796 he was engaged for Drury Lane Theatre, and his *début* (which was in an opera called "Mahmoud") was so successful that in the year following he was engaged for the Italian Opera House. Hoping, however, to achieve a reputation more permanent than could be obtained by any other course, he resolved to visit Italy and there to complete his musical education. On his return to England he appeared at Covent Garden in 1801. This is the point from which may be dated that triumphant career during which he created a constant *furore*. Mr Brabham was also renowned as a composer. Not only did he write several of the most popular songs, but he composed a tolerably long list of entire operas, as they were called in their time, though, according to present notions, they were merely dramas interspersed with occasional songs. The only vocation which

Mr Brabham tried without success was that of manager of the St James's Theatre, which he built as an opera house, and which was first opened in 1836. In private life Mr Brabham was generally respected, and among his acquaintance his fame as a man of extensive information and as a humorous retailer of anecdote was scarcely inferior to his reputation as a vocalist among the general public. Died, 1856.

BRAHE, TYCHO, the great astronomer, was a native of Denmark. He was born in 1546, of a noble family of Swedish origin. The passion for astronomy showed itself in him very early, and after studying at the universities of Copenhagen and Leipzig, he visited the principal observatories of Germany, returning home in 1571. His observations on the new star in Cassiopeia, in 1572, attracted great attention, and after travelling again for a short time, he settled in the small island of Hven, which the king gave him, and there had a splendid observatory built, which he named *Uraniborg*. Here he laboured for about 20 years, but when the king died the jealousy of the nobles had him deprived of his appointments and his observatory. He soon after left Denmark, and on the invitation of the emperor, settled in Bohemia. Kepler joined him there, and they worked together till Tycho's death. Tycho is especially celebrated as an observer in astronomy. He made very great improvements in the instruments of observation, and devised additional safeguards against error. He opposed the Copernican system as then understood, discovered the variation of the moon's longitude, showed that comets could not be mere atmospheric bodies, and in short prepared by his accurate and numerous observations the grand discovery of Kepler's laws. Among his works, not numerous, are, "Astronomia Instaurata mechanica," "Progymnasmatia," "Epitolarum astronomicarum libri," and "Historie Coelestis libri XX." Died in October, 1601.

BRAIDWOOD, JAMES, director of the London Fire Brigade, was born in Edinburgh in 1799, and educated in the high school of that city under the well-known Dr Adam. He was appointed, in 1823, inspector of the Edinburgh Fire Brigade; and he at once exhibited, in this office, those high qualities of courage, judgment, and energy which will cause his name to be honourably and gratefully remembered. Soon after his appointment occurred in Edinburgh the great fire of 1824, at which time only the insurance offices possessed fire-engines in that city. The difficulties thus caused in the extinction of fires led him to organize the present fire brigade of Edinburgh. On occasion of a fire in a shop in Hunter's Square, where two kegs of gunpowder were stored in the cellar, Braidwood forced an entrance, with some wet blankets, into the vaults, and returned with the kegs under his arms. As director of the Fire Brigade of London, his services won for him the esteem and gratitude of all, and a life of eminent usefulness and vigour was cut short on the 22nd of June, 1861, by an accident which occurred during the greatest fire that has been known in Lon-

don during the present year. He was buried in the street nearest to London Street, where he was posted his men where the best command of the explosion took place; he made his escape, he was the ruins of a warehouse hurled into the road. The day following, cruel effects of fire. At no future that of the Duke of Wellington, sense of public loss of Mr Braidwood.

BRAINERD, DAVID, an missionary, who succeeded his successful endeavors among the Indians on the Susquehanna. Died, aged 30, 1747. BRAITHWAITE, JOHN, a mechanic, constructor of a machine with which he explored a bank off Spithead; the Lamsan, off one of the Channel, and the Abergavenny, on the Isle of Portland. He succeeded in raising a screw; but from the same brought up property to a value of 1818.

BRAMAH, JOSEPH, an inventor distinguished for the ingenuity of his mechanical inventions among these were his iron safe, his safety lock, various improvements in the steam-engine, in the loom, in the construction of iron-bridges, and in the construction of steam-carriages, the latter in 1749; died, 1814.

BRAMANTE D'URBINO, an Italian architect, a celebrated Italian architect in 1444. He first studied architecture in Rome by Pope Adrian VI., and especially by Julius II., for whom he, and partly executed, the plan of the Belvedere and subsequently designed the plan of the Vatican. Peter. This however was not the completion of Michael Angelo, who completed the plan. Bramante first appeared at the court of Rome in 1494. BRAMHALL, JOHN, an English architect, was born in Yorkshire in the 16th century, was educated at Cambridge, and after obtaining a degree, went to Ireland, and was appointed Bishop of Londonderry in 1704. He was afterwards Bishop of Strafford, then of Exeter. He distinguished himself for the advancement in wealth and power, and was a member of the privy council, and a member of the civil war, and was imprisoned, and after the restoration was raised to the Irish peerage, and is remembered as the author of a discussion on father and son, 1663.

BANCALONE DANDINI, an Italian statesman, who was chosen senator in 1233. By his courage he delivered the city from the hands of the constant confeder-

don during the present century, and which ranged on the waterside portion of Tooley Street nearest to London Bridge. He had posted his men where they could have the best command of the fire, when a terrible explosion took place; and before he could make his escape, he was buried under the ruins of a warehouse wall which fell outwards into the road. His body was found the day following, crushed, but showing no effects of fire. At no funeral, perhaps, since that of the Duke of Wellington, has so great a sense of public loss been shown as at that of Mr Braidwood.

BRAINERD, DAVID, a celebrated American missionary, who signalized himself by his successful endeavours to convert the Indians on the Susquehannah, Delaware, &c. Died, aged 30, 1747.

BRAITHWAITE, JOHN, an ingenious mechanic, constructor of a diving machine, with which he explored the Royal George, sunk off Spithead; the Hartwell, East Indiaman, off one of the Cape de Verd Islands; and the Abergavenny, East Indiaman, off the Isle of Portland. From the first he only succeeded in raising some guns and an anchor; but from the second and third he brought up property to a very large amount. Died, 1818.

BRAMAH, JOSEPH, an English engineer, distinguished for the number, value, and genuineness of his mechanical inventions. Among these were his invaluable hydraulic press, his safety lock, various improvements in the steam-engine, in the process of making paper, in the construction of main-pipes, steel-carriages, the beer-machine, &c. Born, 1749; died, 1814.

BRAMANTE D'URBINO, FRANCESCO BAZZARI, a celebrated Italian architect, was born in 1444. He first studied painting, but abandoned it for architecture. He was employed at Rome by Pope Alexander VI., but especially by Julius II., for whom he planned, and partly executed, the buildings connecting the Belvedere and the Vatican, and subsequently designed the great church of St. Peter. This however he merely commenced, and the completion was intrusted to Michael Angelo, who entirely changed the plan. Bramante first introduced Raphael at the court of Rome. Died, 1514.

BRAMHALL, JOHN, archbishop of Armagh, was born in Yorkshire at the close of the 16th century, was educated at Cambridge, and after obtaining the degree of D.D., went to Ireland, and was soon appointed bishop of Londonderry. He was the friend of Strafford, then lord deputy, and distinguished himself for the advancement of the cause of the civil war. At the commencement of the civil war he was impeached and imprisoned, went abroad a few years, and after the restoration returned, and was raised to the Irish primacy. His name is remembered as the antagonist of Cromwell in a discussion on fate and free-will. Died, 1683.

BRANCALONE DANDOLO, a noble of Venice, who was chosen "senator" of the republic in 1233. By his courage and energy he delivered the city from the distractions caused by the constant conflicts of the rival

nobles, many of whom he summarily executed, and destroyed their fortified houses. He compelled Pope Innocent IV. to return from Assisi to Rome; was deprived for a time of his office, but soon recalled; and died, both hated and beloved, in 1258.

BRANCAS LAURAGUAIS, Duke dc, a French nobleman, distinguished for his scientific attainments; discoverer of the composition of the diamond, and a great improver of the manufacture of porcelain. Born, 1735; died, 1824.

BRAND, JOHN, an English divine and antiquary; author of the "History and Antiquities of the Town of Newcastle," "Observations on Popular Antiquities," &c. Born, 1743; died, 1806.

BRANDT, a German chemist of the 17th century; who is said to have discovered phosphorus while attempting to find a solvent by which to convert silver into gold.

BRANTOME, or PIERRE DE BOURDEILLES, a celebrated French chronicler. He was a favoured attendant upon Charles IX., Henry III., and the duke of Alençon; and his memoirs, though somewhat too free in their details, are highly valuable as graphic and faithful illustrations of an interesting period of French history. Died, 1614.

BRASIDAS, a Spartan general, who distinguished himself by his skill and courage in the Peloponnesian war. He was wounded and lost his shield at the attack on Pylos; led an army very skillfully and rapidly through Thessaly to Macedonia; took several cities from the Athenians, and especially, in B. C. 422, Amphipolis on the Strymon. He defended the city when besieged by Cleon, and defeated Cleon in a battle outside the walls, but was himself mortally wounded. Sacrifices and games were instituted in his honour.

BRAY, SIR REGINALD, an English statesman, and favourite of Henry VII. He is chiefly memorable for having superintended the erection of the chapel of Henry VII. at Westminster, and for having finished that of St George at Windsor. Died, 1503.

BRAY, WILLIAM, F.S.A., an industrious antiquary; editor of Evelyn's "Diary" and "Memoirs," and a contributor to the *Archæologia*, &c. Died, 1832, aged 97.

BRAYBROOKE, RICHARD CORNWALLIS NEVILLE, Lord, F.S.A., born March 17, 1820, is well known for his contributions to archaeological literature. In 1850 he became one of the vice-presidents of the Archaeological Institute, and contributed many valuable papers on the antiquities of England. Died February 22, 1861, aged 41.

BREUTE, FULK DE, a leader of mercenaries in the service of King John. He was bailiff of Glamorgan in 1208, and took a prominent part in the barons' war, which followed the king's revocation of Magna Charta, in 1215. He accompanied John on his expedition to the northern counties, ravaging, burning, and oppressing. In the following year he was in the Isle of Ely, and desecrated the minster. Under Henry III. he was in possession of the castle of Bedford, and took part in many plundering expeditions. He imprisoned one of the king's justices, but was at last besieged by the

BRIDGEWATER, FRANCIS HENRY EGERTON, eighth Earl of, is remembered for his bequest of £8000 to provide for the publication of a work on natural theology. Eight distinct works were written to carry out his wishes, and these are the well-known "Bridgewater Treatises." The earl was born in 1758; was educated at Oxford; entered the church; and died at Paris in 1829.

BRIDPORT, ALEXANDER HOOD, Admiral Lord, a gallant naval officer, and the youngest brother of Admiral Hood. He bore a part in Lord Howe's celebrated victory, June 1, 1794; in the following year he defeated a French squadron, capturing three sail of the line; and nobly distinguished himself on many other occasions during the war. Died, 1814.

BRIENNE, JOHN, of king of Jerusalem, was son of Erard II., count of Brienne, and was chosen, by Philip Augustus, king of France, to marry Mary, daughter of Conrad and Isabella, and heiress of the kingdom of Jerusalem. The marriage was celebrated, and John of Brienne was crowned at Acre, in 1210. He was at once engaged in war with the Saracens, and in 1219 he joined the fifth crusade, invaded Egypt, and took Damietta; which, however, was soon lost. His daughter, Yolande, was married to the Emperor Frederick II., who then took the title of king of Jerusalem. John of Brienne afterwards joined with the pope in his war against the emperor. In 1229 he was made emperor of the East during the minority of Baldwin II. Incredible accounts are preserved of his double victory over the Greeks and the Bulgarians, who besieged Constantinople. Died, in the dress of a Franciscan, 1237.

BRIGGS, HENRY, an eminent English mathematician and first Savilian professor of geometry, at Oxford; author of "Arithmetica Logarithmica;" "Tables for the Improvement of Navigation;" "Animadversiones Geometricæ;" &c. Born, 1638; died, 1639.

BRIGGS, WILLIAM, an eminent physician and oculist; author of "Ophthalmographia," an anatomical description of the eye and a new theory of vision. Died, 1704.

BRILL, MATTHEW, an eminent landscape painter, employed by Pope Gregory XIII. in decorating the Vatican. Died, 1584.

BRILL, PAUL, brother of the last-named, and also eminent as a landscape painter. Pope Clement VIII. employed him to paint a landscape sixty-eight feet wide for the Sala Clementina; it was a representation of the martyrdom of St. Clement. Died, 1626.

BRILLAT-SAVARIN, ANTHELME, a French writer, known chiefly for his work entitled "The Physiology of Taste." Born 1755; died, 1826.

BRINDLEY, JAMES, an eminent English mechanic and engineer, to whose great skill and abilities we owe some of the most important of our navigable canals. So highly, indeed, did he estimate their importance to commercial nation, that, being jocularly asked, while under examination before a committee of the House, for what purpose supposed rivers to have been created, he said to have quite seriously replied, "To

feed navigable canals." His first great work was the canal from Worsley to Manchester, which he executed for the duke of Bridgewater. He afterwards completed the Grand Trunk, Birmingham, Chesterfield, and others. Born, 1716; died, 1772.

BRINKLEY, Dr JOHN, bishop of Cloyne, an able divine, but still more eminent for his scientific acquirements, was born in 1760. While a graduate of Oxford he was elected to the professorship of astronomy in Dublin University, an honour to which his previous writings and discoveries in science fully entitled him. Died, September, 1835.

BRINVILLIERS, MARGUERITE D'AUBRAI, Marchioness of, horribly notorious for having poisoned her father, brother, and two sisters. She had formed a criminal attachment for a Gascon officer, named Gaudin St Croix, and her family caused him to be sent to the Bastille. There he learned from a fellow-prisoner the art of compounding subtle poisons, of which he and his mistress made use to avenge themselves on her family. His mask slipping from his face while he was distilling poison, he died suddenly; and her anxiety to obtain a casket that had belonged to him, led to inquiries which terminated in her detection. She was beheaded, and her body burnt, 1676.

BRISHANE, Admiral Sir CHARLES. He entered the navy, on board the Alcide, in 1779; received a severe wound in Rodney's fleet on the 12th of April, 1782; and was promoted to the rank of lieutenant in 1790. He shared the active services of Lord Hood off Toulon, and of Lord Nelson during the siege of Bastia, where he nearly lost an eye; was made captain in 1795; and the following year received the thanks of the Admiralty for his conduct at the capture of some Dutch ships in Saldanha Bay. The firmness with which Sir Charles acted quelled the disposition to mutiny which then appeared through the fleet at the Cape. In 1805 he was appointed commander of the Arethusa; and in 1807 achieved the capture of the island of Curaçoa, when he received the honour of knighthood. The following year he was made governor of St Vincent's, in which station he remained till his death; being raised to the rank of rear-admiral in 1805, and to that of vice-admiral in 1820. Died, 1829.

BRISSON, or BRISSONIUS, BARNABAS, an eminent French lawyer and philologist; author of a treatise "De Regio Pesarum Principatu;" &c. During the siege of Paris by Henry III., in 1589, he remained in the city, and was compelled by the partisans of the League to act as first president of the parliament; and his conduct as a magistrate was made the pretext for putting him to death, in 1591.

BRISSON, MATHURIN JACQUES, a French chemist and naturalist; he was in his youth assistant to Réaumur and afterwards professor of physics at the college of Navarre. He was also a member of the Institute. His principal works are the "Ornithologie," a treatise in 6 vols. 4to; "Pesantur spécifique des corps;" and a "Dictionnaire raisonné de physique." He also translated into French Priestley's History of Electricity. Born, 1723; died, 1806.

and was born in 1718. He served in Italy, in Bohemia, in Bavaria, and in 1740 passed into Flanders, and took part in the battles of Raucoux and Lawfeldt and the siege of Maestricht. In 1758 he contributed to the victory of Lutzelberg, and in the following year he was created prince of the empire, commander-in-chief of the army of Germany, and marshal of France. He was afterwards exiled, but soon recalled. He was minister of war a short time in 1780, and took part in the invasion of Champagne in 1792. Died, 1804.

BROKE, Rear-admiral Sir **PHILIP BOWES VERRÉ**, a gallant English officer, the eldest son of Philip B. Broke, Esq., of Nacton, Suffolk, was born in 1776, and commenced his naval career as a midshipman in 1792. After the usual initiation, during which he was present in several general engagements, he obtained the rank of commander in 1799, and post-captain in 1801. The various services he subsequently performed in different parts of the globe, though they were neither new nor unimportant, we shall not enter upon; but he is chiefly celebrated for the famous action between his ship, the *Shannon*, of 38 guns, and the American frigate, *Chesapeake*, mounting 49, in June, 1813. The news of a victory so nobly gained against such fearful odds—at a time when an opinion was gaining ground that our frigates were not a match for the large vessels (misnamed frigates) of the Americans—was hailed in England with every demonstration of national pride, and besides the complimentary congratulations that attended the gallant author of it, he was, for his distinguished valour, courage, and intrepidity, raised to the dignity of a baronet of Great Britain. Died, Jan. 2, 1841, at his seat, Broke Hall, Suffolk.

BROMÉ, **ALEXANDER**, an attorney and satirical poet, whose writings consist of satirical songs and satirical compositions directed against the Puritans. In addition to writing satirical songs, he translated from Terentius and Horace, and wrote a comedy, called "The Cunning Lovers." Born, 1620; died, 1666.

BROME, **RICHARD**, an English dramatist, contemporary with Ben Jonson, to whom he was originally servant. His comedies were formerly very popular, but they are not now performed. Died, 1632.

BROMLEY, **WILLIAM**, an English engraver, was born at Carlsbrook in 1769. He resided in London, and was the friend of several eminent artists. He became an associate engraver of the Royal Academy, and was employed to engrave the Elgin marbles the trustees of the British Museum. Died, 1842. His son, **JOHN BROMLEY**, was an engraver; he died in 1839.

BONDSTED, **PETER OLAF**, a distinguished Danish philologist and antiquary, born in 1780, entered the university of Copenhagen in 1796, and took the degree of doctor in philosophy in 1806. In company with his friend Dr Koes he made a scientific expedition to Greece, and in excavating the ruins of Egina, &c., many fine monuments of ancient Greek art were discovered. On returning to Denmark he was assisted with pecuniary means by the government, and

appointed diplomatic agent to the Papal court in 1818. He afterwards travelled through the Ionian Isles, Malta, and Sicily, for the purpose of making additional investigations; he subsequently made Paris his principal residence, coming occasionally to England; and in 1827 he visited his native country, where he received the title of privy councillor of legation, and other marks of distinction. The first part of his principal work, entitled "Travels and Researches in Greece," appeared in 1826, at Paris, simultaneously in the French and German languages; the second part in 1830. Died at his house, June 26, 1842, aged 61.

BRONGNIART, **ALEXANDRE**, the distinguished French mineralogist, chemist, and zoologist, was born at Paris in 1770. His father, an eminent architect, had him well educated and sent him to the school of mines and the school of medicine. At the Derbyshire. After various other employments he obtained the post of director of the porcelain works of Sèvres, which he carried out many improvements and processes of manufacture. He wrote a memoir on enamelling, and did much to revive the art of painting on glass. He made scientific journeys in Auvergne, Switzerland, Italy, and Sweden, assisted Cuvier in his studies of fossils, and introduced a new classification of reptiles. Brongniart was author of a "Traité élémentaire de Minéralogie," "Essai sur la Géographie minéralogique des Environs de Paris," "Traité des Arts céramiques," (jointly with Cuvier); "Mémoire sur les corps organisés fossiles nommés Trilobites," &c. He also contributed numerous papers to scientific journals and to the Academy of Sciences, to which he was admitted in 1815. He was a foreign member of the Royal and Geological Societies of London. Died, 1847.

BRONTE, **CHARLOTTE**, the eldest of three sisters, whose *noms de plume* "Currer, Ellis, and Acton Bell," have become familiar as household words in every English mouth, was born at Thornton, in Yorkshire, of which village her father, the Rev. Patrick Bronte, was rector, in 1816. When she was about four years of age her father removed to Haworth, in the same county, and here, with the exception of a few short intervals, she spent the remainder of her life. At school she was an indefatigable student; constantly reading and learning, picking up every scrap of information concerning painting, sculpture, poetry, and music, as if it were gold. In 1835, when she was little more than nineteen years old, she went as teacher to a Miss W——'s, her younger sister, Emily, accompanying her as a pupil; but she became literally ill from home-sickness, and could not settle to anything; and, after the lapse of three months, she returned home. But she again entered upon this career, though with no greater success. After two years spent in a *pensionnat*, in Brussels, as half-teacher and half-pupil, she returned to Haworth in 1844, and soon afterwards, in conjunction with her sisters Emily, Jane, and

however, are very much defaced by the crudest and most dogmatical materialism. He is esteemed the founder of the physiological system of medicine in France, and first published his views in his "Histoire des pléguemas chroniques," in 1808, and afterwards in the "Examen de la doctrine médicale," in 1816. Born, 1772; died, 1838.

DROUSSONET, PIERRE-MARIE AUGUSTE, an eminent French naturalist; author of "Ichthyologia," &c. He was a member of the Academy of Sciences. Born, 1761; died, 1807.

BROWN, CHARLES BROCKDEN, an eminent American writer, chiefly known in this country by his powerful novels, "Wieland" and "Edgar Hunter." Died, 1810.

BROWN, Sir GEORGE, British general, was born of an ancient family at Linkwood, near Elgin, in 1790. He entered the army as ensign in 1805, served the same year in the expedition to Sicily, served as lieutenant at the siege and capture of Copenhagen in 1807, and next went to the Peninsula, where he fought till 1811, and again from July 1813 to May 1814. He was at the battle of Vimiera, the passage of Douro, and the capture of Oporto; was severely wounded at Talavera, engaged to hand one of the staff-officers of Massena at Busaco, was one of the first to hope the storming of Badajoz, and took part in the various actions during the retreat of the French from Spain and Portugal, at O'ron, Salamanca, Nive, Nivelles, and Orthes. In 1814 he accompanied Sir Ross on the American expedition, and was present at the battle of Bladensburg and the capture of Washington.

The same year he became major and lieutenant-colonel, but his career in the field was ended by the outbreak of the Crimean war in 1854. In 1841 he was promoted to the rank of major-general, and in the following year appointed deputy adjutant-general. He succeeded Sir John Macdonald as adjutant-general in 1850; was made lieutenant-general in 1851; and was called on to command the light division in 1854. He led the advance of the army from Malta to the Crimea. He displayed impetuousness at the battle of the Alma, and had a horse shot under him; was one of the first to engage the Russians at Inkermann, and he was so severely wounded that he returned to England to recruit himself; returned to Sebastopol, and led the charge at the unsuccessful attack on the Redan, and commanded the expedition to the Caucasus and Yenikale. After this service he was rewarded with the first class of the Medjidie, the dignity of G.C.B., and cross of the Legion of Honour, and the Order of Savoy. He was made lieutenant-general in 1855, held the command of the 1st Division in Ireland from March 1860 to the end of 1863, and after some months of ill health, died in the house in which he was born, 27th August, 1865. Sir George was latterly distinguished for his strictness in pipeclay. Divisional drill in the army, the leather stock, the pipeclay, and the close shaving, he rigidly enforced.

His 40 years of merely formal military business had led him to lay exaggerated stress on merely mechanic perfection, and he was almost inaccessible to new ideas. But he was a good-hearted man, though he wore a rough cloak, and it was often his own fault that unjust impressions of his character were created.

BROWN, JOHN, D.D., an eminent clergyman and indefatigable writer. He was born, in 1715, at Rothbury, Northumberland, educated at St John's College, Cambridge; and after various church preferments, became chaplain to the king. The chief of his numerous works are "Essays on the Characteristics of the Earl of Shaftesbury," "Barbarossa," a tragedy; an "Estimate of the Manners and Principles of the Times;" a "History of the Rise and Progress of Poetry," &c. He fell into a state of dejection, and killed himself, in 1768.

BROWN, JOHN, a Scotch painter and author, favourably known in the former character by his painting of the bust of Homer from the Townley marbles, and by his portrait of Pope. As an author he is even more distinguished by his "Letters on the Poetry and Music of the Italian Opera," which he addressed to his friend, Lord Monboddo. Born, 1752; died, 1787.

BROWN, JOHN, a very learned, though self-educated, Scotch divine; author of the "Self-interpreting Bible," "Dictionary of the Bible," and numerous other religious works. Born, 1722; died, 1787.

BROWN, JOHN, M.D., an eminent Scotch physician, and the founder of a new system of medicine, named after him the Brunonian. He divided all diseases into two great classes,—the one including those resulting from deficient excitement, and the other those caused by its redundancy; and though his opinions have not been unconditionally received, they materially influenced the practice of his professional successors. Dr Brown's principal works are "Elements of Medicine" and "Observations on the Old Systems of Physic." Born, 1735; died, 1788.

BROWN, JOHN, an eminent English engraver; his best works are engravings from Salvator Rosa. Died, 1801.

BROWN, LANCELOT, an eminent landscape gardener, whose great merit consisted in imitating nature, and abandoning the stiff and clipped formality once so prevalent in the pleasure-grounds of our nobility. From his constant use of the phrase, "this spot has great capabilities," he was called Capability Brown. Born, 1715; died, 1782.

BROWN, ROBERT, head of the sect of Brownists, was born about 1540. He was a kinsman of Cecil, Lord Burleigh, and was educated at Cambridge. He soon distinguished himself by his vehement preaching in various places against the established church, its discipline and its ceremonies. In 1590 he was arrested at Norwich, but was soon set free. His "Treatise of Reformation" years later; he was again arrested, and two persons were hung for circulating his books. He subsequently formed a separate congregation, and went to Holland; but his scheme did not succeed, and he came back to Eng-

land, and was appointed rector of Achurch in Northamptonshire. He did not preach, led an idle life it is said, and after suffering imprisonment above thirty times, was finally imprisoned at Northampton for assaulting a constable, and there died, 1830. His principles were substantially the same as those held by the Independents.

BROWN, ROBERT, the most distinguished botanist of the age, was born at Montrose in 1773. He was educated at Aberdeen and at Edinburgh, where he completed his medical studies in 1795, and the same year joined a fencible regiment in the double capacity of surgeon and ensign. In 1801, on the recommendation of Sir Joseph Banks, he was attached as naturalist to H. M. S. "Investigator," destined for a survey of the coast of Australia; and after nearly four years spent in traversing these regions, he returned to England with nearly 4000 species of plants, a large portion of which were entirely new to science. Having become librarian to the Linnæan Society, he devoted some years to the study and the classification of the treasures he had collected; and the first fruits of his researches appeared in 1810, in a volume entitled "Prodromus Floræ Novæ Hollandiæ" (a supplement to which appeared in 1830). This and his "Plantæ Javanicæ Valiores" are the only two great works which he gave to the world; but from time to time he wrote papers on an infinite variety of botanical subjects, and contributed largely to narratives of scientific or explanatory expeditions, such as Salt's "Travels in Abyssinia," Clapperton's "Expedition to Central Africa," Strutt's "Expedition to Central Australia," and many other similar undertakings. He was admitted to the Royal Society in 1811, was at a later period a member of the council, and received the Copley medal in 1830. He was a foreign associate of the Academy of Sciences, Paris, and a member of several other scientific bodies. At the time of his death he was president of the Linnæan Society. Died, 1858.

BROWN, THOMAS, the Scottish philosopher, was born in 1778. He finished his education at the university of Edinburgh, where he was a pupil of Dugald Stewart. He was one of the members of the "Academy of Physics," formed in 1797, and one of the early contributors to the Edinburgh Review. He obtained his degree of doctor in medicine in 1803, and soon after entered into partnership with Dr Gregory. In 1810 he became assistant professor of moral philosophy, and held that post till his death. His first work, "Observations on the Zoonomia of Dr Darwin," appeared in 1798. He wrote an "Examination of the Theory of Hume on Cause and Effect," and several poetical works. But his most important work is his "Lectures on the Philosophy of the Human Mind." It did not appear till after his death, became very popular, and has been frequently reprinted. Its florid style gave a novel attractiveness to its difficult theme. Died at London, 1820.

BROWNE, GEORGE, Count de, an Irish officer in the Russian service, who so nobly distinguished himself on many great occa-

sions, that he was rewarded with the government of Livonia; from which, when he had held it 30 years, he wished to retire, but Catherine II. would not accept his resignation, replying, "Death alone shall part us." Born, 1698; died, 1792.

BROWNE, ISAAC HAWKINS, an English lawyer and poet. His best English works are a poem addressed to Highmore, the painter, "On Design and Beauty;" and a shorter one, called "The Pipe of Tobacco," in which he very skillfully imitated the tone of thought and expression of Cibber, Phillips, Thomson, Young, Swift, and Pope. The work, however, on which his reputation chiefly depends, is a Latin poem, on the Immortality of the Soul. Born, 1708; died, 1760.

BROWNE, PATRICK, M.D., an eminent naturalist; author of "The Civil and Natural History of Jamaica," catalogues of the birds and fish of Ireland, and of the plants of the Sugar Islands. Born in Ireland, 1720; died, 1790.

BROWNE, SIMON, born in Somersetshire in 1680, was a dissenting minister of considerable ability, but chiefly remarkable for an unhappy hallucination. He imagined that "God had annihilated in him the thinking substance, and utterly divested him of consciousness." This delusion perpetually haunted him, and yet he furnished the completest refutation to it by composing several argumentative tracts, and by some very laborious compilations. Died, 1738.

BROWNE, SIR THOMAS, the eminent antiquary and physician, was born at London in 1605. He studied at Oxford, where he was incorporated M.D., having previously taken the same degree at the university of Leyden. He settled at Norwich in 1636, and resided there nearly half a century. He was knighted by Charles II. in 1671. His principal works are the "Religio Medici;" "Inquiries into Vulgar Errors" (both of which have passed through many editions, and been translated into the principal languages of Europe), and "Hydrotaphia or Urn-burial." Many miscellaneous tracts are included in the complete edition of his works. His writings are very original in matter and style, full of curious, especially antiquarian, learning not without genuine humour. Died at Norwich, 1682.

BROWNE, ULYSSES MAXIMILIAN, the son of an expatriated Irish officer, entered the Austrian service, and by his great skill and bravery, when employed against the Turks, rose to the rank of field-marshal. He afterwards greatly distinguished himself at Placentia and other places in Italy, and at length died of wounds received at the battle of Prague. Born, 1705; died, 1770.

BROWNE, SIR WILLIAM, an able and eccentric physician of the 18th century. He was the author of numerous optical and other essays; and, at his death, bequeathed a sum of money for the provision of the medals, of the value of five guineas each, for Greek and Latin odes and epigrams by undergraduates of Cambridge. Born, 1690; died, 1774.

BROWNE, WILLIAM GEORGE, an enterprising English traveller; author of "Travels

els in Africa, Egypt, and the regions south of the Nile, and the life of the banditti, in 1814.

BROWNING, ELIZABETH, one of the most illustrious of English poets, was born in the year 1809. She was educated at her father's country house in the county of Herefordshire, near the Malvern Hills. As a child she was precocious, writing much at an early age, and becoming a contributor to the "Edinburgh Review" when under twenty. A number of her poems were published in 1826. In 1833 she published an "Essay on Mind, and its Powers," in which she wrote that "ethical poetry is the highest poetry, as the highest truth." Her health was so weak, that the bursting of a blood vessel in 1836, while she was engaged in her studies, which embraced the study of metaphysics, with the ancients and modern philosophers, with the fathers of the Christian Church, and the fathers of the Christian Church, recommended change of climate, and she was taken to Florence, when she had been there nearly a year. Her brother was drowned in a boat in her sight, and this terrible calamity, which she could be removed by her family and home in London, continued, in the words of her friend, to read "almost every day, giving herself, heart and soul, to the study of which she seemed to be a genius." Her health gradually improved, and she subsequently married Mr. Barrett, who accompanied her to Pisa, and then moved to Florence. A collection of her poems was published in 1841, under the title of "Dramas of Exile," "Lady Hamblin," &c.—In the preface she speaks of her work as a poem, and she gives the completest account of her being. These words account for the defects of her poetry. She herself to us the language of thoughts of ordinary men, both touching and full of life, and she withdraws herself to compare and analyze her own work, and she is generally obscure and unintelligible. As a natural poet, she persuaded herself that she had a special message to give, and that, to discover it, she surveyed the workings of her mind. Hence resulted an amount of language, which exhibits extraordinary conceits, and a notion that all poets were such as this excitement, and in the midst of this excitement, and in the midst of their own dreams. Among her larger works are "Aurora Leigh," full of her own exhibiting great beauty of language whenever she rises to the level of ordinary human life, and her lesser lyrics, which are very touching and beautiful. Her first departure with her husband to England only at rare intervals.

els in Africa, Egypt, and Assyria." He was murdered while on his way to explore the regions south of the Caspian, by a Persian banditti, in 1814.

BROWNING, ELIZABETH BARRETT, one of the most illustrious of English poetesses, was born in the year 1809. Her early years were spent at her father's country residence, in the county of Herefordshire, near the Malvern Hills. As a child she was very precocious, writing much at ten years of age, and becoming a contributor to periodicals when under twenty. A small volume, entitled an "Essay on Mind, and other Poems," was published in 1828. In it she seeks to prove that "ethical poetry is the highest of poetry, as the highest of all objects is moral truth." Her health was much shaken by the bursting of a blood-vessel on the 15th of August, 1836, while she was yet pursuing her studies, which embraced the Greek poets and philosophers, with the early patristic fathers of the Christian Church. Her physician recommended change to a milder climate, and she was taken to Torquay. When she had been there nearly a year, her favorite brother was drowned by the upsetting of a boat in her sight, close to the shore. This terrible calamity nearly killed her; and it was not until the following year that she could be removed by easy journeys to her family and home in London, where she continued, in the words of her friend, Mr Mitford, to read "almost every book with reading in almost every language, giving herself, heart and soul, to that study of which she seemed born to be the possessor." Her health gradually improved, and she subsequently married Mr Browning, who accompanied him to Pisa, whence they moved to Florence. A collected edition of her poems was published in 1844, containing "Dramas of Exile," "Lady Geraldine's Courtship," &c.—in the preface to which she speaks of her work as a poetess, as an effort to give the completest expression to her own being. These words account at once for the defects of her poetry. When she attempts herself to use the language and express the thoughts of ordinary men, her poems are both touching and full of meaning; when she withdraws herself to contemplate her own being and analyze her own sensations, she is generally obscure and frequently intelligible. As a natural consequence, she was persuaded herself that she was "sent with a special message from "the gods," and that, to discover it, she had to survey the workings of her own consciousness. Hence resulted an undue extent of language, which exhibited the extraordinary conceits, and a settled conviction that all poets were such only by the force of this excitement, and in the degree to which they dwelt on their own personal sensations. Among her larger works is the "Aurora Leigh," full of her worst specimens of language whenever she places herself on the level of ordinary humanity. Her lesser lyrics, which belong to the class, are very touching and beautiful. Her first departure with her husband, to Italy, was to England only at rare intervals.

During her long residence in Florence and Rome, she took a vehement interest in Italian politics, of which the poem of "Casa Guidi Windows," written in 1851, is the impassioned expression. In her "Poems before Congress," published in 1861, she startled even her admirers by the intensity of her eulogium of the French emperor, and by her maledictions on the American States. But no estimate of Mrs Browning would be fair which left out of sight the peculiar conditions of her life. Suffering under long and painful illness, she was necessarily withdrawn to a great extent from the world around her, and thrown back on the examination of her own sensations. So regarded, the effects on herself and her poetry are perfectly intelligible; nor can they weaken the impression that she was a woman of rare powers both of imagination and expression. She had a deep and passionate sympathy with all that was poor and suffering; and her faults were those of her time, heightened in some instances by the peculiar circumstances of her life. Much of what she wrote cannot have more than a passing popularity; yet she has not passed away without achieving for herself a permanent reputation, or without causing a deep regret that her life was closed by a premature decline. She died at Florence, June 29, 1861.

BROWNRIGG, WILLIAM, an ingenious physician and natural philosopher; author of "A Treatise on the Art of making common Salt," treatises on platinum and carbonic acid, &c. Died, 1800.

BRUCE, ROBERT, a descendant of David, earl of Huntingdon, and competitor with John Balliol for the crown of Scotland, at the death of Alexander III. in 1286.

BRUCE, ROBERT, king of Scotland, was grandson of the above, and was born about 1274. He submitted for a time to Edward I., but joined the patriots after the victory at Stirling. In 1299 a regency was appointed, Bruce and his rival Comyn being at the head of it. For several years Bruce kept up the appearance of loyalty to Edward; but in 1306 he murdered Comyn, and soon after was crowned king at Scone. He was defeated by an English army and fled to the Isles, his queen and family being captured and imprisoned. The war was renewed in the following year, but Edward's death delayed the decision of the struggle. Bruce twice invaded England, took almost all the fortresses in Scotland, except Stirling, and in 1314 totally defeated Edward II. at Bannockburn. Peace was made with England in 1328, and a few months later Bruce died.

BRUCE, JAMES, one of the most celebrated of modern travellers. For a short time he held the post of British consul at Algiers, but resigned it in order to gratify his passion for travelling. After traversing the greater portion of Asia Minor, he set out on a journey to ascertain the source of the Nile. An account of this journey he subsequently published; and some of his statements, particularly those which referred to the manners and customs of Abyssinia, were received with mingled incredulity and ridicule. Though greatly annoyed by the disgraceful illiberality with which he had been treated,

he bore the taunts and sneers of his shallow critics with a taciturn pride, not deigning to satisfy disbelievers, or to disarm ridicule, but trusting the day would ere long arrive when the truth of what he had written would be confrmed by others; and it is now clearly proved, from the statements of many subsequent travellers, that he was every way undeserving of the censure bestowed on him. He was born at Kinnaird House, Stirlingshire, in 1730; and died there in consequence of an injury sustained by falling down-stairs, in 1794.

BRUCE, MICHAEL, a Scotch poet. His parents being of the poorest class, his early life was one of considerable privation. This and his ardent attachment to poetry, probably aggravated a constitutional predisposition to consumption, and he died in the 21st year of his age, in 1767. His poems are few in number, but singularly plaintive and elegant.

BRUCKER, JOHANN JACOB, a German Lutheran clergyman; author of the well-known "Historia Critica Philosophiæ," an immense and very learned compilation, of which Enfield's History of Philosophy is an abridged translation. Born, 1696; died, 1770.

BRUEYS, DAVID AUGUSTIN, a French dramatic writer; in early life a Protestant, but afterwards a zealous adherent of the Catholic faith. Born, 1640; died, 1723.

BRUEYS, FRANÇOIS PAUL, a gallant French admiral, commanding the fleet which conveyed the army of Buonaparte to Egypt, and killed at the battle of the Nile, 1798.

BRUGNATELLI, LUIGI, an Italian physician and chemist, long teacher of chemistry at the university of Pavia. His reputation rests on his "Pharmacopœia" and "Human Lithology." He was chief editor of the "Biblioteca Fisica d'Europa," and other scientific periodicals. Born, 1761; died, 1818.

BRUGUIÈRES, JEAN GUILLAUME, a French naturalist and physician; author of many essays on subjects of natural history, the best of which is the "Natural History of Worms" in the Encyclopédie Méthodique. Died, 1799.

BRUHL, HEINRICH, Count of, minister of Augustus III. king of Poland; one of the most artful and expensive courtiers that ever governed a weak and credulous prince. He kept 200 domestics, paying them better than the king his own, and furnishing a more sumptuous table; but, as was natural, he plunged the country into debt and disgrace. The war with Frederick the Great was occasioned by the measures of this worthless dandy, who had in his wardrobe 365 suits of clothes! And the whole army of Saxony was captured at Pirna by the Prussian king, and Dresden itself occupied. Born, 1700; died, 1763.—Various members of this family have attained distinction. **FRIEDRICH,** a son of the preceding, besides being remarkable for his skill in the fine arts, wrote several good plays. Died, 1793. **HANS MORITZ,** his nephew, gained some reputation as an astronomer and political economist, and died while Saxon ambassador in London, 1809.

BRULLIOT, FRANZ, born in 1780 at Düsseldorf, became keeper of the prints to the king of Bavaria in 1808, and made himself known by a laborious compilation entitled "Dictionnaire des Monogrammes, Marques Figurées, Lettres Initiales, &c., avec lequels les Peintres, Dessinateurs, Graveurs et Sculpteurs ont désigné leurs noms." Died, at Munich, 1836.

BRUMOY, PIERRE, a learned French Jesuit; author of the "Théâtre des Grecs," a continuation of the "Histoire de l'Église Gallicane," &c. Born, 1688; died, 1742.

BRUN, CHARLES LE. [LEBRUN.]

BRUNCK, RICHARD FRANÇOIS PHILIPPE, a profound classical scholar and critic, was born at Strasburg, but educated by the Jesuits at Paris. For some time he was employed in state affairs, but at length devoted himself wholly to study, and produced an edition of the "Greek Anthology," besides valuable editions of Aristophanes, Sophocles, Virgil, &c. When the revolution broke out, he took part in it, and was imprisoned at Brisaçon by Kobespierre, whose death, however, released him. Born, 1728; died, 1803.

BRUNE, GUILLAUME MARIE ANTOINE, French marshal, born in 1763. Law and literature occupied his attention till the outbreak of the French revolution, when he embraced the military profession, and served as adjutant under Dumouriez, in the campaign of 1792. He afterwards served under Buonaparte, in Italy, gaining rapid promotion; and in 1799 he was commander-in-chief of the French and Dutch forces in North Holland, which successfully opposed the English under the duke of York. In 1803 he was sent as ambassador to Constantinople, and during his absence was made marshal. On his return he was appointed governor of the Hansatic cities, in which station he gave offence to Napoleon, and their cordiality ceased. He submitted to the Bourbons in 1814; but on his old master's return from Elba he joined him, and took the command of a division of the army in the south of France; and, on the emperor's second abdication, he was put to death by the royalist party at Avignon, August 2, 1815.

BRUNEAU, MATHURIN, an adventurer, who in 1818 assumed the title of Charles Franco, was the son of a clog-maker. After numerous efforts to pass for some person of importance, he was incarcerated; and from his confinement addressed a letter, signed Dauphin Bourbon, to the governor of the Isle of Guernsey, requesting him to inform his Britannic Majesty of the captivity of Louis XVII. This letter being intercepted by the local authorities, Bruneau was transferred to the prison at Rouen; here he engaged a person named Branon as his secretary, who found means so far to ingratiate himself with the Duchess d'Angoulême, as to obtain her interest; and at length a party in his favour procured him abundant supplies. This encouraged the enterprise, until the principal, his secretary, and many others were brought before the bar of justice, where Bruneau was declared an impostor and a vagabond, and condemned to seven years' imprisonment. Finding, however, that the fraud was still maintained by

powerful party, he was removed to Caen in 1821, and was permitted to end his days in the convent of St. Michael.

BRUNEL, SIR ISAMBARD, the Thames Tunnel, Weymouth, and the Great Western, were all designed for the church; but he was strong a predilection for sciences, and so great a genius for mechanics, that he entered the service of the East India Company, and returned home in 1792.

When the French revolution he emigrated to the United States, where necessity, compelled him to adopt the profession of an engineer. There he was employed in great works; but, detested the English government, he offered his services to the French government; and, after consulting with his plans for making ships, he was employed in Portsmouth dockyard.

When Mr. Perceval, in the administration, he selected Henry Pakenham to assist in the execution of the plan; and thus was laid the foundation of one of the most extensive engineering establishments in the kingdom.

The machinery was finished in 1825, and continued ever since in full operation, supplying our fleet with blockading ships, and those prepared to take up on the termination of the war. On the visit of the Emperor Napoleon to this country, after the peace, he invited him a plan for a tunnel under the Neva; where the Emperor, of ice, and the suddenness of the work, made up on the termination of the war, the erection of a bridge over the river, which was a difficult task. This was the origin of the tunnel under the Thames, which was twice before attempted with failure.

That great work crowned a career which was wholly devoted to the invention and construction of works of great public utility. He received the honour of knighthood in 1831, and Lord Melbourne's administration he was vice-president of the Royal Institution, and vice-president of the Institution of Civil Engineers, and chevalier of the Order of Honour. Died, 1849.

BRUNEL, ISAMBARD KINGDOM, an eminent engineer of the day, was born in 1806, while his father, the late Sir Isambard Brunel, was engaged in erecting the great suspension bridge in Portsmouth dockyard. He was a man of great age he showed not merely his practical and scientific ability with industry and devotion to his profession, but also an art which is exhibited in his works.

Various as these are, they have a common characteristic of size and grandeur. Having taken an interest in his father in the construction of the Thames Tunnel, he was engaged in the design of that work, in building the suspension bridge at Bristol. At the same time he was engaged in the design of the suspension bridge over the river Maidenhead, which was never finished; he was also an engineer of the line of railway from London to the Great Western. On this

powerful party, he was removed to the prison at Caen in 1821, and was afterwards sent to end his days in the castle of Mont Saint-Michel.

BRUNEL, Sir ISAMBARD, the engineer of the Thames Tunnel, was born at Squawville in Normandy, 1769. He was educated for the church; but he soon evinced a strong predilection for the physical sciences, and so great a genius for mathematics, that he entered the royal navy, made several voyages to the West Indies, and returned home in 1792. During the French revolution he emigrated to the United States, where necessity, fortunately, impelled him to adopt the profession of a civil engineer. There he was engaged in many great works; but, determined upon returning England, he offered his services to the British government; and, after much opposition to his plans for making ship-blocks by machinery, he was employed to execute them in Portsmouth dockyard. With true discrimination, he selected Henry Maudslayi to assist in the execution of the work; and thus was laid the foundation of one of the most extensive engineering establishments in the kingdom. The machinery was finished in 1806; and continued ever since in full operation, supplying our fleet with blocks of very superior description to those previously in use, and at a large annual saving to the State. On the visit of the Emperor Alexander to this country, after the peace, Brunel presented to him a plan for making a canal under the Neva; where the accumulation of ice, and the suddenness with which it breaks up on the termination of winter, rendered the erection of a bridge a work of great difficulty. This was the origin of his plan for a tunnel under the Thames, which had been twice before attempted without success. That great work crowned a long life wholly devoted to the invention and execution of works of great public utility. He received the honour of knighthood from Lord Melbourne's administration. He was vice-president of the Royal Society, a corresponding member of the Institution of Civil Engineers, and chevalier of the Order of Honour. Died, 1849.

BRUNEL, ISAMBARD KINGDOM, one of the most eminent engineers of the day, was born in 1806, while his father, the well-known constructor of the Thames Tunnel, was engaged in erecting the great blocks in Portsmouth dockyard. From the age he showed not merely high mechanical and scientific ability with unwearied industry and devotion to his profession, but an art which is exhibited in all his works. Various as these are, they have all a common characteristic of size and grand design. Having taken an active part with his father in the construction of the Thames Tunnel, he was engaged, after the completion of that work, in building docks at Liverpool and Bristol. At the latter place he designed the suspension bridge over the river, which was never finished; he was employed as engineer of the line of railroad from London to the Great Western. On this line,

following out his ruling idea, he introduced what is called the broad gauge, which has been made the subject of vehement controversy. As an effort of engineering, however, the Great Western railway was remarkable for the magnificence of its works as well as for the speed and security of its locomotion. The South Devon and Cornish railways are not less conspicuous specimens of his wonderful mechanical powers; and the failure of the atmospheric principle as applied to the South Devon railway never shook his belief that it would be hereafter employed with success. Communication with America, as directly connected with the Great Western railroad, suggested the idea of the Great Steamship Great Western, to which he gave double the power and tonnage of any vessel then in existence. His next work, the Great Britain, was more than double the size of the Great Western, and showed conclusively, on the rocks of Dundrum Bay, that ships of very large size can with safety be built only of iron. To him also is owing the introduction and general adoption of the screw, as a method of propulsion, in place of the paddle-wheel. Having carried out this principle with success, he proceeded to work out the idea which found its magnificent realization in the Great Eastern. This idea was that long voyages could only be made economically and speedily by steamers capable of carrying coal for the whole outward voyage, and also for the return voyage, in cases where a supply could not easily be obtained at the outpost. This splendid ship was the last triumph of his life. Long and intense exertion had for many years impaired his strength, which failed altogether under his last efforts for the completion of the Great Eastern; and the life of this great engineer, who was not less estimable for his private worth than eminent for his scientific powers, was closed prematurely at the age of 53. He died September 14, 1859.

BRUNELLESCHI, FILIPPO, a very distinguished Italian architect, was born at Florence in 1377. After receiving a good education he learnt the goldsmith's art, practised sculpture for a short time, and finally adopted architecture as his sole pursuit. His enthusiasm for art was intensified by a visit to Rome with his friend Donatello. About 1407 he was chosen to undertake the great task of completing the Duomo of his native city; its noble cupola is his principal title to fame. He built also the Pitti palace and the church of St. Lorenzo at Florence. He was a competitor with Ghiberti for the execution of the gates of the baptistery. He was long a member of the supreme council of Florence. Died, 1444.

BRUNI, LEONARDO. [ARETINO.]
BRUNO, St. founder of the Carthusian order of monks, the first house of which he established in the desert of Chartreuse. Born at Cologne, 1030; died in Calabria, 1101.

BRUNO, GIORDANO, an Italian philosopher, one of the boldest and most original thinkers of his age, was born at Nola, about 1550. He became a Dominican monk, but his religious doubts and his censures of the

monastic orders compelled him to quit his monastery and Italy. He embraced the doctrines of Calvin at Geneva, but doubt and free discussion not being in favour there, he went after two years' stay to Paris. He gave lectures on philosophy there, and by his avowed opposition to the scholastic system made himself many bitter enemies. He spent next two years in England, and became the friend of Sir Philip Sidney. In 1588 he went again to Paris and renewed his public lectures. After visiting and teaching in various towns in Germany, he returned in 1592 to Padua, and went afterwards to Venice, where he was, in 1598, arrested by the Inquisition and sent to Rome. He lay in prison two years, and on the 17th February, 1600, he was burnt as a heretic. Bruno was a man of powerful understanding, vigorous and fertile imagination, and rich and diversified learning. His theory of the world was pantheistic. He was well versed in astronomy, and adopted the views of Copernicus. But he was also a believer in astrology. His works in Latin and Italian are numerous, and abound in bold and noble thought and rich eloquence. Spinoza was indebted to Bruno for some of his theories. Among the works of Bruno are the following: "Della Causa, Principio ed Uno," "Dell' Infinito Universo e Mondi," "La Cena delle ceneri," "Spaccio della bestia trionfante," &c.

BRUNSWICK, FERDINAND, Duke of, one of the most distinguished generals in the seven years' war in Germany. He entered the service of Frederick the Great, who gave him liberal praises and large estates, and appointed him commander of the English and Hanoverian forces in the Seven Years' War. He obtained victories over the French at Crevelt and Minden, but he did not resume his service after the peace. Born, 1721; died, 1792.

BRUNSWICK WOLFENBUTTEL, MAXIMILIAN JULIUS LEOPOLD, a prince whose name is revered for his disinterested benevolence and humanity, of which the last action of his life is a striking example:—During a terrible inundation of the Oder, which spread destruction in the neighbourhood of Frankfort, where the prince commanded a regiment in the garrison, his zeal to save the lives of a family surrounded by the waters, induced him to put off in a boat to their assistance, when he was swept away by the torrent, and perished in the humane attempt. Born, 1752; died, 1785.

BRUNSWICK LUNENBURGH, CHARLES WILLIAM FERDINAND, Duke of, Prussian general. He studied the art of war under his uncle, and highly distinguished himself in the service of Frederick of Prussia. At the commencement of the French revolution he took the command of the Prussian and Austrian forces intended for the liberation of Louis XVI.; but the violent manifesto he published served only to exasperate the republican army under Dumouriez, and he was compelled to retreat. The ill-success of this expedition caused him to resign the command, and occupy himself with the domestic affairs of his new province. In 1806 he was again appointed

leader of the Prussian army, and was fatally wounded at the battle of Austerlitz that year.

BRUNSWICK, FREDERICK WILLIAM, Duke of, youngest son of Charles William Ferdinand of Brunswick, and brother of the persecuted Queen Caroline of England, was born in 1771. He entered the Prussian army, and took an active part in the war against revolutionary France. In 1809 he raised a body of volunteers in the militia; but finding no chance of making an effectual stand against the power of France, he embarked his troops for England, where they were taken into the British service, and employed in the Peninsula. Foreseeing that great changes were likely to take place on the Continent, he hastened to his paternal dominions in 1813, raised a large body of troops, and was among the foremost to meet the French army in 1815, when, two days before the decisive battle of Waterloo, he fell at Ligny, gallantly fighting at the head of his "brave Brunswickers."

BRUNTON, MARY, the daughter of Colonel Balfour, was born in one of the Orkney Isles; married a minister of the Scotch church; and is known as the authoress of the novels, "Discipline," "Self-Contradiction," and other works. Born, 1778; died, 1814.

BRUTUS, LUCIUS JUNIUS, one of the most celebrated characters of early Roman history, but whose story is half-mythical, was the son of Marcus Junius, a wealthy patrician of Rome. The father and brother of Lucius Junius were assassinated by order of their relative, Tarquinius the Proud. Lucius Junius owed the preservation of his life to an assumed idiotism. It was Seneca Tarquinius who, by his criminal outrage on Lucretia, the wife of Collatinus, afforded him an opportunity to accuse the people against the king and his sons. Throwing off his pretended stupidity, he joined with Collatinus; assembled the senate, and caused a decree to be made for banishing the king and establishing a republic. This change took place, and Brutus and Collatinus were appointed chief magistrates with the title of consuls. The change in the form of government gave offence to many of the patricians; and the two sons of Brutus and three nephews of Collatinus conspired, with others, to murder the consuls and restore the monarchy. The plot was disclosed by a slave; and the conspirators were brought before the consuls for judgment. Brutus, disregarding the entreaties of the multitude and his own feelings as a parent, sentenced his sons to death. Collatinus endeavoured in vain to save his nephews, and retired from the consulship. The cause of the Tarquinius was espoused, according to the legend, by some of the neighbouring cities, and Brutus fell in combat with Aruns, one of the sons of the deposed king. The conflict ending in the victory of the Romans, the body of Brutus was interred with great solemnity, and a statue was erected to his memory.

BRUTUS, MARCUS JUNIUS, an illustrious Roman, one of the murderers of Julius Cæsar. His mother was the sister of Cato. He at first sided with Pompey, but, being treated with great lenity after the battle of

Pharsalia, he attached himself to Cæsar, who was greatly esteemed and loved by the stern republican spirit. It was considered impossible for all Cæsar's enemies to reconcile him to Cæsar; and he at length conspired with others, and slew him on the 15th March, B.C. 44. Antony succeeded in the popular indignation against Cæsar's murderers, who fled from Rome, and were driven to the army of Brutus and Cassius, of which Brutus and Cassius were the commanders; but being totally defeated at the battles of Philippi, where they were the army of Antony and Octavian.

Brutus escaped with only a few followers the night in a cave, and was afterwards irretrievably ruined, as one of his confidants told him, a long time his friend, &c. &c. presenting the sword as he lay on the ground, the noble Roman fell on it, B.C. 42, in the 43rd year of his age.

BRUYÈRE, JEAN DE LA, an French writer, of whose life few particulars are known. He passed the greater part of his life in peaceful literary retirement, and was admitted to the French Academy in 1725, years before his death. His most celebrated work is the "Caractères et moeurs," a lively and clever satire on the characters and the manners of the French.

His work Voltaire said, "Its rustic style struck the public at a moment of allusions to living persons, and passed through its pages, complete as it was." La Bruyère also published a number of the work of Theophrastus, a philosopher, entitled "Characters."

He wrote "Dialogues on Quietude," which he opposed Fénelon, but which he published till several years after his death. Born, 1644; died, 1711.

BRUNY, CORNELISZ, a Dutch painter, born at the Hague, and studying his art at Rome he travelled in Asia Minor, Egypt, and the East, making numerous sketches of scenes and objects. After his return of study at Venice he travelled in Russia, Persia, India, and the East, and his first travels appear in the form of his second four years' travels are illustrated with engravings of his own sketches, abound in the most interesting and valuable information, and are on the whole most worthy. The time of his death is not known.

BRUNY, MICHAEL, a connoisseur in painting, whose judgment was highly valued, though he lost large sums of money in his purchases. He was the author of the "Biographical and Critical Dictionary of Painters and Engravers." Born, 1721; died, 1821.

BRUNY, or BRIANT, Sir FRANCIS, an English soldier, statesman, and diplomatist, served with great credit against the French in the earl of Surrey's expedition in 1757. He subsequently became chief justice of the Common Pleas. He is chiefly remembered, however, for his works being printed by his friends Wyatt and others. Born, 1700.

BRUNY, JACOB, a distinguished painter, born in 1700.

avella, he attached himself to Caesar, by whom he was greatly esteemed and trusted. From the stern republican spirit of Brutus it seemed impossible for all Caesar's kindness to him to reconcile him to Caesar's ambition; and he at length conspired with others, and slew him on the ides of March, B.C. 44. Antony succeeded in exciting the popular indignation against the murderers, who fled from Rome, and raised an army, of which Brutus and Cassius took command; but being totally defeated at the battles of Philippi, where they encountered the army of Antony and Octavianus, they escaped with only a few friends, and the night in a cave, and, as he saw himself irretrievably ruined, requested one of his confidants to kill him. A long time his friend refused; but at length presenting the sword as he turned away, the noble Roman fell on it and expired, B.C. 42, in the 43rd year of his age.

BUYÈRE, JEAN DE LA, an eminent French writer, of whose life few particulars are known. He passed the greater part of his life in peaceful retirement, and was admitted to the French Academy about 17 years before his death. His most celebrated work is the "Caractères de Théophraste," a lively and clever satire on various characters and the manners of his time. La Bruyère said, "Its rapid and easy style struck the public at once; and allusions to living persons, which were made through its pages, completed its success." La Bruyère also published a translation of the work of Theophrastus, the philosopher, entitled "Characters," in which he wrote "Dialogues on Quietism," in which he opposed Fénelon, but which were published till several years after the author's death. Born, 1644; died, 1696.

BUNY, CORNELIUS, a Dutch painter and engraver, born at the Hague in 1652. Studying his art at Rome he travelled through Asia Minor, Egypt, and the Archipelago, making numerous sketches of notable scenes and objects. After a short period of study at Venice he travelled again, visiting Russia, Persia, India, and Ceylon. A narrative of his first travels appeared in 1700, and that of his second four years later. His works are illustrated with engravings of his own sketches, abound in curious details, and are on the whole faithful and most worthy. The time of his death is unknown.

BUNYAN, MICHAEL, a connoisseur of paintings, whose judgment was highly valued, though he lost large sums by his purchases. He was the author of a "Biographical and Critical Dictionary of Painters and Engravers." Born, 1620; died, 1821.

BUNYAN, or BRIANT, Sir FRANCIS, a distinguished soldier, statesman, and poet. He rose with great credit against the king in the earl of Surrey's expedition, and subsequently became chief justice of the Common Pleas. He is chiefly remembered, however, for his works being printed with the name of his friends Wyatt and Surrey.

BUNYAN, JACOB, a distinguished anti-

quarian and philologist; author of an able, though singular, "Analysis of Ancient Mythology," published in 3 vols. 4to; a treatise on the Truth of Christianity, a work in denial of the existence of Troy, and various other publications of great erudition and ingenuity. Born, 1715; died, 1804.

BRIDGES, Sir SAMUEL EGERTON, bart., a man of versatile talents and eccentric character, was born in 1782, at Wootton Court, in Kent, and was educated at Queen's College, Cambridge. In 1790, after the death of the last duke of Chandos, he induced his elder brother, the Rev. E. T. Bridges, to prefer a claim to the barony of Chandos, the consideration of which was long procrastinated; but at length, in 1803, the House of Lords decided against its validity. On the death of his brother, in 1807, Sir Egerton adhered to his favourite notion, of obtaining a coronet; and he regularly added to the signature of his name—"per legem terræ, B. C. of S."—meaning Baron Chandos of Sudely. He was (1812) returned M. P. for Maidstone, which borough he continued to represent about six years. In 1814 he was created a baronet; and in 1818, upon the loss of his seat in the House of Commons, he visited the Continent. In 1826 he returned to England, but his affairs becoming embarrassed, he removed to Geneva, where he remained in great seclusion until his death. His literary labours were multifarious. His abilities as a genealogist, topographer, and bibliographer, are attested by his "Censura Literaria Restituta," 10 vols.; "Theatrum Poetarum;" "Stemmata Illustrata;" "British Bibliography," &c. Besides these, he published the novels of "Mary de Clifford," "Arthur Fitz-Albini," and "The Hall of Hellingsey;" "Imaginary Biography," 3 vols.; "Recollections of Foreign Travels," 2 vols.; "The Autobiography, Times, Opinions, and Contemporaries of Sir Egerton Bridges," 2 vols.; and numerous other works; independent of numerous contributions to periodicals. Died, September, 1837.

BRYDONE, PATRICK, a Scotch gentleman; author of "Travels into Sicily and Malta," &c. Born, 1741; died, 1819.

BUCER, MARTIN, one of the most eminent of the reformers, was born near Strasburg in 1491. He entered the Dominican order, but became a convert to the reformed faith in 1521. He settled at Strasburg, which owed to his labours as pastor and professor of theology for twenty years the establishment of the reformation there. He took part in the conferences of Marburg, hoping to reconcile Luther and Zwinglius; but refused at the diet of Augsburg to subscribe the famous "Interim" of Charles V. In 1548 he was called by Cranmer, with Fagius, to England, and for two years was professor of divinity at Cambridge. He was most highly esteemed for his piety, learning, discretion, and especially his knowledge of the Scriptures. His writings are very numerous. He died at Cambridge in 1551, and was honoured with a sumptuous burial. In the reign of Queen Mary Cardinal Pole had his body, with that of Fagius, exhumed, and publicly burnt with their books. But

owers were far above mediocrity, yet he was an object of deserved contempt, and died, unregretted, at Kirby Moorside, Berkshire, in 1688.

BUCKINGHAM, JAMES SILK, traveller and miscellaneous writer, was born near Plymouth, in 1784. In his tenth year he became a sailor, and after numerous adventures was appointed to the command of a vessel when barely twenty-one, and performed several voyages to the West Indies and America in the double capacity of captain and supercargo. After various abortive efforts to trade to India without the assistance of the East India Company, he at last succeeded; but he soon abandoned mercantile pursuits for literature, and established the *Calcutta Journal*, which brought him a large income and great popularity. At the independence of his opinions and the views he inculcated proved obnoxious to the Company, and after suffering a great deal of persecution, he was ordered to quit Calcutta, and his journal was suppressed. On his return to England, his cause was warmly taken up by parliament, the press, and the public; but his claims for compensation were repudiated by the Company, and his wrongs left unredressed. Finding his return to India impossible, he established the *Oriental Herald*, in 1824; and in this paper, and in a series of lectures which he delivered in almost every large town in England and Scotland, paved the way for the abolition of the East India Company's charter, and a revision of the laws and institutions under the Company's rule. From 1837 he represented Sheffield in parliament. In 1837 he visited America, where he was received with great enthusiasm. On his return to England he took an active part in the discussion of all public questions, his latter years were solaced by a pension from the East India Company. Mr Buckingham published his travels in various countries of the East; and his last publication was his "Autobiography." Died, 1855.

BUCKINGHAMSHIRE, JOHN SHEFFIELD, Duke of, son of the earl of Mulgrave, was born in 1649; served under Marlborough, and took a part in the battle of Blenheim in 1704. He also distinguished himself as a poet. Buckingham House, in Whitehall, since converted into a palace, was originally built for him in 1720.

BUCKINK, ARNOLD, an artist of the 17th century, and the first who engraved on copper. He illustrated an edition of the *Alphabeticum*, which was printed at Rome, by the press of the Vatican, one of the earliest printers in

BUCKLAND, WILLIAM, D.D., a distinguished geologist, was born at Axminster in Devonshire, and received his early education at Winchester, and entered Corpus Christi College, Oxford, in 1801. From an early age he had a great predilection for natural history, and on his being appointed to the professorship of mineralogy and geology in the University of Oxford, his profound knowledge of the subject, joined to his powers of explanation, awakened an interest for the pursuit of science, in contradistinction to

those of literature, to which Oxford had hitherto been a stranger. His first work was the "Vindiciae Geologicae, or the Connection of Geology with Religion explained," published in 1820; and the year following he made the discovery of the remains of animals in the caves at Kirkdale, which formed the basis of his work entitled "Requies Diluviana, or Observations on Organic Remains attesting the Action of an Universal Deluge." From this period his pen was unceasingly occupied with geological subjects; and his disquisitions not only displayed great powers of observation and unwearied industry, but many of the general conclusions at which he arrived became part of the recognized laws of geological science. His "Geology and Mineralogy considered with reference to Natural Theology," which formed one of the Bridgewater treatises, has become a standard work. He was chosen F.R.S. in 1818, and about ten years later became a member of the council; was twice president of the Geological Society, and from 1847 a trustee of the British Museum. In 1825 he was appointed to the living of Stoke St Charity, in Hampshire, and also became a canon of Christ Church; and twenty years later he was nominated dean of Westminster by the late Sir Robert Peel. But his zeal for science suffered no abatement; he continued to take an interest in all questions involving social amelioration; but in 1850 his intellect gave way, and from that period till his death, in 1856, he remained in a state of mental weakness.

BUCKLE, HENRY THOMAS, political and historical philosopher, was born in 1822. He was the son of a wealthy merchant at Lee, and in consequence of his delicate health was educated at home. He gained at an early age the friendly esteem of Hallam and Bunsen, and devoted his short life exclusively to study and writing. In 1858 appeared the first volume of his projected "History of Civilization in Europe," which created an extraordinary sensation by its daring speculations and vast learning. A second volume appeared in 1861, which only completed the introduction to the *History*. In the autumn of 1861, in the hope of improving his health, he visited the East, but was seized with typhus fever, and died at Damascus, May 29, 1862.

BUDDÆUS, JOHANN FRANZ, a Lutheran divine, was born in Pomerania, 1667, became professor of theology at Jena, and wrote "Historia Juris Naturæ;" "Historia Ecclesiastica Veteris Testamenti," &c. Died, 1729.

BUDDHA, GAUTAMA, also named **SAKYA MUNI**, the founder of Buddhism, lived probably in the 6th century, B. C. His father was king of Behar, and his mother's name was Maya. Early distinguished both for his personal beauty and superior intellect, he is said to have been deeply affected by the observation of the sins and miseries of the world, and to have retired into solitude for some years. He then appeared as a religious teacher, and went through various provinces of India propagating his doctrines, a kind of reformed Brahmanism. He is said to have lived till his 80th year, and the date usually

given for his death is 543 B. C. But his appearance is by some placed as early as the 14th, and by others as late as the 4th century, B. C. It is certain that his religion was triumphant in Hindostan in the middle of the 3rd century, B. C.

BUDE, GUILLAUME, in Latin **BUDEUS**, an eminent classical scholar, was born at Paris in 1467. After attending the universities of Paris and Orleans he applied himself to serious study, embracing a wide range of subjects, but especially the Greek language and literature. He obtained the appointment of secretary to Louis XII., and that of librarian to Francis I. The city of Paris gave him the office of provost of the merchants, and he was sent on several missions to the papal court. Budeus grudged every hour that was taken from his chosen studies, and was fretted because on his wedding day he had only six hours for study! Among his works, which fill four folio volumes, are commentaries (in Latin) on the Greek tongue, a learned treatise, "De Asse," frequently republished, "Annotations on the Pandects," &c. Died at Paris, 1540.

BUDGE, EUSTACE, a distinguished writer, honoured with the friendship of Addison, and other eminent men of his time, was born at Exeter, in 1685. He studied at Oxford and at the Temple, London, and through his family connection with Addison, became a contributor to the "Spectator." He obtained a valuable government appointment in Ireland, but soon after lost his property in the South Sea scheme. His character did not stand the test of poverty, and in despair he threw himself into the Thames, 1736. Budge was also author of memoirs of the "Boyles," and numerous papers in the Guardian, and other periodicals.

BUFFON, GEORGES LOUIS LECLERC, Count de, the great French naturalist, was born in Burgundy in 1707. He studied mathematics and natural philosophy, and constructed a large mirror with which he made experiments on the power of burning glasses. On his appointment as intendant of the Jardin du Roi, he projected the great work on which his fame rests, and devoted himself for the rest of his life to its preparation. He was assisted by Daubenton in the purely anatomical portions. The "Histoire Naturelle" appeared in successive volumes between 1749 and 1783, and an extensive supplement was added after Buffon's death. Its reputation was immense, it was translated into the principal languages of Europe, and has been very frequently reprinted. Buffon was admitted to the Academy of Sciences in 1733. Died, at Paris, in 1788. In the Reign of Terror his remains were exhumed, and his monument destroyed. His son, too, perished by the guillotine.

BUGAUD DE LA PICONNERIE, THOMAS ROBERT, duke of Isly, and marshal of France, was born at Limoges in 1754. By the maternal side he was descended from an old Irish family. At an early age he showed a decided predilection for the army; but his family thwarted his

views, and he only succeeded by running away from home, and becoming a private soldier. He was promoted to the rank of corporal on the field of Austerlitz; and rose through all the grades of his profession, till he reached the rank of general in 1832. His attachment to the cause of Louis Philippe led, in 1833, to his appointment as commandant of Blaye, a fortress in which the duc de Herri was imprisoned; and his conduct in that capacity having been called in question by Dulong, a member of the opposition, a duel ensued, in which the latter fell. His subsequent exploits in Algeria, whether he was first sent in 1837, and where he conquered Abd-el-Kader, gained for him the baton of field-marshal, and the title of duke from the scene of his victory over the Moors in 1844. He had been named governor of Algeria in 1840. Died of cholera at Paris, 1849.

BULL, JOHN, doctor of music, Oxford, was chamber musician to James I. His compositions were very numerous, and the national anthem "God save the King" has been attributed to him, but without any proof. The time of his death is uncertain, but he was alive in 1622.

BULL, GEORGE, bishop of St David's, a learned prelate, and a very industrious and able theological writer; author of "Hæmonia Apostolica," "Defensio Fidei Nicæne," &c. Born, 1634; died, 1709.

BULLANT, JEAN, a French architect, who flourished about 1540-1598. On his return from Italy he built, with Goujon, the Chateau d'Ecouen for the Montmorency family; a palace for Catherine de Medici; held the office of Superintendent of the Royal Buildings under several successive sovereigns; and was employed at the Tuilleries and the Louvre. He wrote "Regle générale d'architecture des cinq manières," first published in 1564, and "Recueil d'horlogeographie."

BULLER, the Right Honourable CHARLES, a politician of rare promise, was the only son of Charles Buller, Esq., of the East India Civil Service, and born at Calcutta in 1806. He received his education at Harrow, Edinburgh, and Cambridge, and from an early age gave promise of more than ordinary abilities. In his 24th year he entered parliament, on the eve of the passing of the Reform Bill, for the borough of West Looe, which belonged to his family. But family interest was to him as nothing compared with that of the public. He voted for the bill; and the borough of West Looe was consigned to schedule A; but he was subsequently returned for Liskeard, a seat which he retained till his death. In all questions that came before parliament he took an active part; and on many occasions his opinions were far in advance of the Whig party, with whom he subsequently took office. In 1838 he accompanied Lord Durham to Canada as his private secretary; and in this capacity drew up the masterly report upon the affairs of that colony, which is considered as one of the most effective state papers of the age. In 1841 he was appointed secretary to the Board of Control, an office however, which he relinquished in 1842 on the formation of the Peel ministry. From

that time forward his attention was directed to the state of the colonies, and to emigration; and in 1844 he gained the ear of the House of Commons, which had perceived in him the desire to achieve some great and noble triumph of a party;

his manner had become more dignified, the ornament of his political career, the attachment universally to him had ripened into confidence and courage of the statesman, the formation of the Whig party, appointed judge advocate; the same year he was nominated member, sworn of the privy council, and in November elected chief judge advocate for the chief commissioner of the police which he held till his death, discharging faithfully his duties and leisure for literary pursuits, and articles in the Globe and Review emanated from his pen, his companion and friend in the society was more enjoyable than shades of politics. His temper never offended. With a love of patriotism, and little party, he lived in singleness of heart for the public good; and though, from his age, he has left no conspicuous public labours, few men in the world have more universal respect for public virtue and science. Died, November 28, 1849.

BULLETT, PIERRE, an architect of the 17th century, architect of St Thomas Aquinas, and several splendid edifices in France, good architectural work.

BULLIALDUS, ISMAEL, a philosopher and mathematician; author of a Dissertation on the World, "Astronomia Philosophica," &c. Born, 1694.

BULLIARD, PIERRE, a French philosopher, author of "Dictionnaire Élémentaire," "Herbier de la France," &c. Born, 1742; died, 1793.

BULLINGER, HENRY, a Swiss Reformed Church, and a student of Zuinglius, whom he succeeded as pastor of Zurich. His works are numerous, but being in great part, they are now little known. Died, 1575.

BULLMER, WILLIAM, a celebrated printer, was born at Newcastle in 1750. In his youth he enjoyed the patronage of Thomas Bewick, the engraver in London, and gained a reputation as a printer that he was in 1788, head of the printing projected by Nicol for the magnificent edition of Shakespeare in 1819, and died in 1805. His "Bewick's" appeared in 9 volumes between 1781-1805. From his

that time forward his attention was specially directed to the state of the British colonies and to emigration; and in the mean time he had gained the ear of the House of Commons, which had perceived in the young statesman a desire to achieve something beyond the mere triumph of a party: the playfulness of his manner had become not the mask but the ornament of his political talents, and he attached universally felt for the man who ripened into confidence in the judgment and courage of the statesman. In 1846, on the formation of the Whig Cabinet, he was appointed judge advocate; in November of the same year he was nominated a queen's counsel, sworn of the privy council in July, 1846, and in November exchanged the easy office of judge advocate for the onerous duties of chief commissioner of the poor laws, an office which he held till his death. Besides discharging faithfully his official duties, he found leisure for literary pursuits, and many able articles in the Globe and the Edinburgh Review emanated from his versatile pen. As companion and friend in private life no man's society was more enjoyed by persons of all shades of politics. His wit always told, but never offended. With nothing of the affect of patriotism, and little of the creed of duty, he lived in singleness of devotion to the public good; and though, from his untimeity, he has left no conspicuous monument of public labours, few men have descended the grave more universally beloved and respected for public virtue and private excellence. Died, November 28, 1848.

BULLET, PIERRE, an eminent French architect of the 17th century. He built the church of St Thomas Aquinas, and many other splendid edifices in Paris, and wrote the good architectural works.

BULLIALDUS, ISMAEL, a French astronomer and mathematician; author of "Philosophia—a Dissertation on the True System of the World," "Astronomia Philoiaica," in which he propounds a system compounded of the Ptolemaic and Copernican systems, and opposes the theories ("laws") of Kepler, "Tabula Philoiaica," &c. Born, 1605; died, 1694.

BULLIARD, PIERRE, a French botanist; author of "Dictionnaire Élémentaire Botanique," "Herbier de la France," &c. He engraved and engraved his own plates. Born, 1742; died, 1793.

BULLINGER, HENRY, a Swiss pastor of the Reformed Church, and the intimate friend of Zuinglius, whom he succeeded in the pastorate of Zurich. His writings were numerous, but being in great part controversial, they are now little known. Born, died, 1575.

BUMER, WILLIAM, a celebrated English engraver, was born at Newcastle-on-Tyne in 1731. In his youth he enjoyed the friendship of Thomas Bewick, the engraver. He resided in London, and gained so great reputation as a printer that he was named, in 1788, head of the printing establishment projected by Nicol for the preparation of a magnificent edition of Shakespeare's works in 1819, and died in 1830. The "Shakespeare" appeared in 9 vols. folio, between 1791—1805. From his press issued

also splendid editions of Milton's Poetical Works, Goldsmith's and Parnell's Poems, the "Bibliographical Decameron," and the "Museum Worlesyanum."

BULOW, FRIEDRICH WILHELM, count von Dennewitz, a gallant Prussian general, whose services were most essential to his country on many perilous occasions. He was actively engaged against the French at the earliest periods of the revolutionary war; and, in 1808, was made general of brigade. His memorable victories, in 1813, at Mookern, Luckau, Grosbeeren, and Dennewitz, were rewarded by promotion and a title. He afterwards distinguished himself in Westphalia, Holland, Belgium, &c.; and, as commander of the fourth division of the Prussian army, he contributed to the victorious close of the battle of Waterloo. Born, 1756; died, 1816.

BULOW, Baron HEINRICH VON, distinguished in the annals of diplomacy, was born in 1790, at Mecklenburgh Schwerin, where his father filled a high office. While a student at Heidelberg, in 1813, he was summoned home to take part in the defence of his country against the French, and after obtaining great distinction in various engagements under Count Waimoden, he once more returned to Heidelberg to finish his studies, whence he passed into the diplomatic service of Prussia through the influence of Prince Hardenberg and Baron W. von Humboldt, whose daughter he subsequently married. In 1826 he was appointed ambassador of Prussia at the court of St James's; and to his talents were due several of the most important treaties which allayed the warlike spirit of the times. Here he remained till 1841, when he was nominated minister of foreign affairs at Berlin; but the crisis of affairs in Prussia proved too much for his exhausted energies, and the overstraining of his intellect produced a mental alienation, under which he succumbed in 1846.

BUNSEN, CHRISTIAN CHARLES JOSIAS, was born August 25, 1791, at Korbach, in the principality of Waldeck, and was educated at Marburg, and afterwards at Göttingen, where, in 1811, he was admitted into the Gymnasium, and, in 1813, published an essay "De Jure Atheniensium Hereditario," which attracted great attention. In 1815 he became acquainted with Niebuhr at Berlin; and, after a stay in Paris, where he studied Oriental languages under Silvestre de Sacy, he went to Rome, where Niebuhr, then Prussian minister, procured for him the post of Secretary of Embassy. On Niebuhr's retirement, in 1824, he was appointed chargé d'affaires, and afterwards minister, by Frederick III., to whom he had recommended himself by his great theological learning. After a sojourn of twelve years in Rome, he was sent as Prussian minister, first to Switzerland, and then to England. In his official capacity he won the esteem of all, and with this country especially he was connected by many ties. He enjoyed the friendship of Dr Arnold, and one of his sons was educated under him at Rugby, and is now in the orders of the English Church. But his eminence as a scholar and writer will put out of sight

his' political character and services. His writings are numerous and elaborate, but they have met with much hostile criticism, and his views have failed to secure any general acceptance in England. He laboured with unwearied diligence in theology, history, and archaeological research. Among his chief works are the "Church of the Future," "Hippolytus and his Age," "Christianity and Mankind, their Beginnings and Prospects," and "The Place of Egypt in the History of the World." On some of these, and other works, he was constantly engaged at Heidelberg, where he chiefly resided from the year 1854 until his death, which took place at Bonn, November 28, 1860, in his 69th year.

BUNYAN, JOHN, author of the "Pilgrim's Progress," was born at Elstow, near Bedford, in 1628. His father was a tinker, but gave his son such education as could be had at the village school, and brought him up to his own trade. The force of his imagination and the influence of the religious excitement of the age early appeared in fits of agitation and religious terror. He had a propensity to profane swearing, but lived a decent and moral life. In 1645 he served a short time in the parliamentary army, and soon after he became the subject of most painful mental conflicts, agonizing doubts and fears, and a strange propensity to speak blasphemy. Time and the friendly counsels and help of religious neighbours brought healing and calm, and he joined the Baptists at Bedford, and soon began preaching. In 1660 he shared the persecution then carried on against Dissenters, and was thrown into Bedford gaol. All attempts to coax or terrify him into promising to preach no more failed, and there he lay twelve years. He preached to the prisoners, made tagged laces for sale, read the Bible and the Book of Martyrs, and at last began to write. He wrote various controversial tracts, and had even to dispute with his own party in defence of "open communion." He was liberated in 1672. His name was then widely known, and his influence great; so that he was called "Bishop of the Baptists." He took cold on a benevolent excursion, fever followed, and he died at London in August, 1688, and was buried in Bunhill Fields. The "Pilgrim's Progress" was partly written in Bedford gaol. It circulated at first among the poor, was soon widely known and greedily devoured. The tenth edition appeared in 1685. No book but the Bible and the "Imitation of Jesus Christ" has been translated into so many languages. And it has long been no less the delight of the educated and refined than it was at first of the poor and ignorant. Bunyan's "Holy War," as an allegory, is only surpassed by the "Pilgrim." His other works are very numerous, the most known being the "Grace Abounding," and "Jerusalem Sinner saved."

BUONACCORSI. (VAGA, PERINO DEL.)
BUONAPARTE, NAPOLEON, emperor of the French, king of Italy, &c., was born at Ajaccio, in the island of Corsica, August 15, 1769. His father, Charles Buonaparte, was an advocate of considerable reputation, and his mother, whose maiden name was Maria

Letitia Ramoline, was well descended, remarkable for beauty, strong-minded, and accomplished. Napoleon was their second child; Joseph, afterwards king of Spain, being his senior. He was educated at the military school of Brienne, and entered the army as a second lieutenant of artillery, in 1785. At the age of 20, the French revolution opened a field to the exertions of Napoleon; and during his correspondence with the Corsican general, Paoli, who had vainly endeavoured to enlist him on his side, the germs of future ambition began to be developed. In 1793, during the Reign of Terror, he was actively employed at the siege of Toulon, on which occasion the convention gave him the command of the artillery; and by his courage and exertions the city was recovered from the English and royalists. Subsequently to this he displayed great talents in the army employed against Piedmont; and, in October, 1795, we find him at Paris, commanding the conventional troops which defeated those of the sections, and quelled the revolt. In March, 1796, he married Josephine, widow of Viscount de Beaumont, who suffered under Robespierre; he was now appointed to the command of the army of Italy, and on the 10th of May following he gained the battle of Lodi. The subjugation of the various Italian states, and his repeated successes over the Austrians, ended in a peace, when he was within 30 miles of Vienna. Thus disengaged, a new theatre for the display of his genius presented itself. With a large fleet, and 40,000 troops on board the transports, he set sail for the intended conquest of Egypt, in May, 1798. On his way thither he took Malta, and on the 22nd of September we find him celebrating the battle of the Pyramids at Grand Cairo, but his progress was checked by the heroism of Sir Sidney Smith and his handful of British troops at St John d'Acre, and the various reverses which the French army continued to meet with, coupled with the fact that his presence seemed necessary at home, induced Buonaparte to embark secretly for France, accompanied by a few officers wholly devoted to him, and to leave his brave but shattered army to the care of General Kieber. He landed at Frejus, in October, 1799; hastened to Paris; overthrew the directorial government; and was raised to the supreme power by the title of First Consul. He now led a powerful army over the Alps; fought the celebrated battle of Marengo, in June, 1800; and once more became master of the whole of Italy. A peace with Austria followed these successes, and soon after, a brief and hollow peace with England. On the 20th of May, 1804, he was raised to the imperial dignity; and in December was crowned, with his empress Josephine, by Pope Pius VIII. Here, brief as our space is, we must notice an incident too striking to be overlooked.—As soon as the pontiff had blessed the crown, the emperor, without waiting for the remainder of the ceremony, eagerly seized it, and putting it first upon his own head, afterwards placed it on the head of Josephine. He now seriously meditated the invasion of England, assembling a numerous

and collecting 200,000 troops encamped in the neighbourhood of Calais for that purpose; Russia appearing in arms at the battle of Trafalgar having defeated the French navy, he desisted, and marched his troops to the Danube. On the 11th of 1806, the French army entered the memorable battle of Austerlitz on the 2nd of December, and the treaty of Presburg followed. 1806 may be regarded as the making of new dynasties, we him, and princes promoted according to his imperial will of Naples he bestowed on his that of Holland on Louis, and on Jerome; while the Confederation of the Rhine was called into existence by his extended dominion; again declared war; but the disaster of Jena annihilated her hopes, and Russia were glad to make the French emperor in 1807. He turned his eye on Spain; but the abdication of Charles IV. forced the resignation of Ferdinand VII. he sent 80,000 men into that country to take all the strong places, and obtain possession of the capital; but this was the end of his life, and one of the main causes of his downfall. In 1809, when he was again occupied in the Peninsula, he again ventured to try her strength against France. Napoleon thereupon led the head of his troops once more to the Austrian capital, gained the victory of Wagram, and soon made peace; one of the secret conditions of which was, that he should have his marriage with Josephine dissolved, and united to the daughter of the emperor, and his former marriage was accordingly dissolved; Josephine, with the title of Duchess, retired to Malmaison, a few miles from Paris; and he espoused the archduchess Maria Louisa in April, 1810. This union was a son, born to him, who was named Napoleon Charles Joseph, and styled king of Rome. Satisfied with the conduct of Napoleon now put himself at the head of an invading army, prodigious in number, and admirably appointed, and with his numerous allies, to invade the frontiers, gained several victories; at length reached Moscow, but he hoped to establish his winter quarters, which he found in flames. The winter was unavoidable; and now was the eye a succession of the most interesting scenes recorded in modern history, brave and devoted army encountered the horrors of famine in a climate so portably cold that their frozen feet were the cold, while an enormous number of Cossacks hung upon the main army, hewing down wherever they met the enfeebled and wretched army, and fled to Paris, partially disarmed, and called upon the emperor's army of 350,000 men; which was agreed to, and he marched

and collecting 200,000 troops, which were encamped in the neighbourhood of Boulogne, ostensibly for that purpose; but Austria and Russia appearing in arms against him, and the battle of Trafalgar having nearly annihilated the French navy, he abandoned the design, and marched his troops to the banks of the Danube. On the 11th of November, 1805, the French army entered Vienna; the memorable battle of Austerlitz took place on the 2nd of December, and the humiliating treaty of Presburg followed. The year 1806 may be regarded as the era of king-making. New dynasties were created by him, and princes promoted or transferred according to his imperial will: the crown of Naples he bestowed on his brother Joseph, that of Holland on Louis, and Westphalia on Jerome; while the Confederation of the Rhine was called into existence to give stability to his extended dominion. Prussia again declared war; but the disastrous battle of Jena annihilated her hopes, and both she and Russia were glad to make peace with the French emperor in 1807. Napoleon now turned his eye on Spain; treacherously causing the abdication of Charles IV., and the forced resignation of Ferdinand, while he sent 80,000 men into that country, seized all the strong places, and obtained possession of the capital; but this was the great error of his life, and one of the main causes which led to his downfall. In 1809, while his armies were occupied in the Peninsula, Austria again ventured to try her strength with France. Napoleon thereupon left Paris, and at the head of his troops once more entered the Austrian capital, gained the decisive victory of Wagram, and soon concluded a peace; one of the secret conditions of which was, that he should have his marriage with Josephine dissolved, and unite himself to the daughter of the emperor, Francis II. His former marriage was accordingly annulled; Josephine, with the title of ex-empress, retired to Malmaison, a seat about 30 miles from Paris; and he espoused the Archduchess Maria Louisa in April, 1810. The fruit of this union was a son, born March 23, 1811, who was named Napoleon Francis Charles Joseph, and styled king of Rome. Dissatisfied with the conduct of Russia, Napoleon now put himself at the head of an invading army, prodigious in number, and admirably appointed, and marched, with his numerous allies, towards the enemy's frontiers, gained several battles, at length reached Moscow, where he hoped to establish his winter quarters, which he found in flames. A retreat was unavoidable; and now was presented the eye a succession of the most appalling scenes recorded in modern history—dying and devoted army encountering all the horrors of famine in a climate so inopportably cold that their freezing hodies cumbered the roads, while an exasperated band of Cossacks hung upon the rear of the main army, hewing down without remorse the enfeebled and wretched fugitives. Napoleon fled to Paris, partially disclosed his losses, and called upon the senate for an army of 300,000 men; which was unconditionally agreed to, and he marched to meet

the combined Russian and Prussian forces. Victory still for a time hovered over his banners; but Austria having joined the coalition, the great battle of Leipzig, in which he lost half of his army, was decisive as to the war in Germany. Napoleon, however, again returned to Paris, and demanded another levy of 300,000 men. The levy was granted, and the new campaign, 1814, was attended with various success; till the overwhelming number of his enemies, who entered the French frontiers at different points, at length compelled him to abdicate, and accept the sovereignty of the Isle of Elba, with the title of ex-emperor, and a pension of 2,000,000 livres. From this place he found means to escape, secretly embarking on the night of the 25th of February, 1815, in some hired feluccas, accompanied by about 1200 men; he landed at Frejus on the 1st of March, speedily reached Paris, and expelled Louis XVIII. from the kingdom. But the confederated armies were now in motion; and though he marched against them with a large army and an immense supply of stores and ammunition, the ever-memorable battle of Waterloo put an end to his career. He withdrew from the army, and proceeded to the coast, with the intention of embarking for America; but fearful of being captured by the British cruisers, he resigned himself, on the 15th of July, into the hands of Captain Maitland, and went on board the Bellerophon. By the joint determination of the allies he was sent to the Isle of St Helena, where, accompanied by several of his old friends and domestics, he arrived on the 13th of October, 1816, as a state prisoner. During his exile he was subject to much annoyance, real or imaginary, and died on the 5th of May, 1821, of cancer in the stomach: a disease which was evidently hereditary, his father having, at about the same age, died of a similar malady. In 1840, in accordance with the request of the French government, the remains of the exile were brought over to France, and with great ceremony laid in the Hôtel des Invalides. The story of Napoleon Buonaparte presents probably the most memorable example in the world of the action of great intellect and resolute will unrestrained by conscience; and shows both the possible success which may reward for a time the most unscrupulous selfishness, and also, happily, its certain ultimate failure and overthrow.

BUONAPARTE, NAPOLEON FRANÇOIS CHARLES JOSEPH, duke of Reichstadt, only son of the Emperor Napoleon by his second wife, Maria Louisa of Austria. After his father's downfall, he was wholly under the care of his grandfather, the emperor of Austria. He was from infancy of a weakly constitution, and a rapid decline terminated his life in 1832, at the early age of 21. It would appear, from a work by M. de Montbel, entitled "Le Duc de Reichstadt," that the young Napoleon possessed many amiable qualities, and was greatly beloved by those who knew him; while he had all the enthusiasm and passion of youth in extreme force, alternating with a distrust, a caution, and a rapidity in fathoming the characters of the persons with whom he was necessarily

brought into contact, which are the usual qualities of age; and that he took the deepest interest in everything connected with his father's former greatness, or relating to military affairs.

BUONAPARTE, JEROME, the youngest son of Carlo Buonaparte, the Corsican advocate, was born at Ajaccio, December 15, 1784, one year before the second son, Napoleon, was appointed sub-lieutenant of artillery in the army of the French Republic. In 1801 he was appointed by his brother, then First Consul, to command the corvette "L'Espervier," in the expedition to St Domingo. Putting into New York he visited Philadelphia, where he married Elizabeth Patterson, the daughter of a merchant of Baltimore. This marriage gave great offence to his brother, who, after his proclamation as emperor in 1804, made it a part of his policy to promote alliances between his own family and the sovereigns of Europe. After some resistance Jerome yielded to his brother's wishes, and abandoning his first marriage, which had been declared null and void by a decree of the Council of State, he married Frederica Caroline, daughter of the king of Wurtemberg, and was proclaimed king of Westphalia. During the Hundred Days, in 1815, he was present at the ceremony of the Champ de Mai, and was wounded at Hougoumont. From Waterloo he returned with Napoleon to Paris, which he left on the 27th of June. For the next thirty years he resided at Vienna, Trieste, and Florence, and, in 1847, was permitted to return to Paris by the government of Louis Philippe. After the revolution of 1848 he was made governor-general of the Invalides, by his nephew, then president of the Republic, and raised to the rank of a marshal of France. After the coup d'état, in 1851, he was made president of the Senate. He died June 24, 1860, aged 75, and was at his own wish buried in the chapel of the Invalides beside the body of his brother.

BUONAPARTE, JOSEPH, an elder brother of Napoleon, was born in Corsica, in 1768. Educated for the law at the college of Autun in France, he became a member of the new administration of Corsica under Paoli; but soon afterwards emigrated to Marseilles, where he married the daughter of a banker named Clari. In 1796 he was appointed commissary of the army in Italy then commanded by his brother Napoleon; and in 1797, having been elected deputy to the Council of Five Hundred by his native department, he repaired to Paris, whence he was shortly afterwards sent by the executive directory as ambassador to the pope. During the revolution which broke out at Rome under Duphot, he displayed considerable energy; and on his return to Paris he was made councillor of state, and was subsequently employed by Napoleon to negotiate the treaties of Luneville with the German emperor, and of Amiens with England. When Napoleon attained the imperial crown, Joseph was recognized as an imperial prince, and in this capacity he headed the expedition against Naples in 1806, which resulted in his being proclaimed king of Naples and Sicily. Here he reigned till 1808, effecting beneficial changes in the administration of

the law and the institutions of the country. In 1808 he was appointed king of Spain, Murat having succeeded him as king of Naples. But in Spain he encountered much greater difficulties than at Naples; and during the five years of his reign he was thrice obliged by the successes of the allied armies to quit his capital; the last time, in 1813, after the battle of Vittoria, to return no more. He now retired to France. In January of the following year, when Napoleon set out for the army, he was appointed lieutenant-general of the empire and head of the council of regency to assist the empress-regent; but in this capacity he displayed little firmness, and concurred in the capitulation of Paris, which resulted in the abdication of Napoleon and his banishment to Elba. He then retired to Switzerland; but he rejoined Napoleon on his return to Paris in March, 1815, and after the defeat at Waterloo he embarked for the United States, where he purchased a large property, and continued for many years to reside there under the name of the Count de Survilliers. Died at Florence, 1844.

BUONAPARTE, LUCIEN, prince of Canino, the next brother after Napoleon in birth, and after him, too, the ablest of the family. He was born at Ajaccio in 1775; and having quitted Corsica, with his family, in 1793, he became a commissary of the army in 1795, and soon afterwards was elected deputy from the department of Liamone to the Council of Five Hundred. It was here that he first distinguished himself by the energy of his manner, the fluency of his language, the soundness of his arguments, and his apparent devotion to the existing government. During Napoleon's absence in Egypt, he maintained a constant correspondence with him; and, on his return, Lucien was the chief instrument of the revolution which followed. When the sentence of outlawry his brother, he opposed it with all the force of his eloquence; and when he perceived that remonstrances were of no avail, he threw down the ensigns of his dignity as president, mounted a horse, harangued the troops, and induced them to clear the hall of its members. By his successful energy, coolness, and decision, he led the way to Napoleon's election as first consul, and was himself made minister of the Interior, in the room of Laplace. But, great as were the services which Lucien had performed for his brother, the latter became jealous of his abilities, and feared his popularity. A coolness between them took place; and, with that cunning which marked so many of his actions, Napoleon took care to remove Lucien from the immediate scene of action, by sending him ambassador to Madrid. In the spring of 1802 he returned to Paris, was outwardly reconciled with the first consul, and entered a second time upon the tribuneship. He had married, at an early age, the daughter of a wealthy innkeeper, and, his wife having been now some time dead, he united himself to one Madame Joubertou, the widow of a stock-broker, a woman distinguished for her gallantry. This gave great offence to Napoleon, and

was a severe blow to the system contemplated of forming royal houses for his relatives. He therefore used all his power to induce Lucien to a dissolution of the marriage, an honour he recorded, he could all the proposals that were made to his wife. For several years his residence in Rome, was a welcome visitor, having merited the approbation of the pope by the seal of had given the Concordat; in 1807, he found that the emperor rendered his stay in that safe, he retired to an estate purchased at Canino, and when he was raised into a principality, not long, however, before he was banished by the emissaries of Napoleon when he fled to his retreat, and he fled to Veclia, from which place he escaped in August, 1810, with the intention of going to the United States. A man on the coast of Cagliari; of Sardinia refused him permission was accordingly forced to be captured by two English ships, and was conveyed first to Malta, and afterwards (Dec. 18) to England. He was permitted to purchase a small estate near Ludlow, in Shropshire, where he spent three calm and peaceful years, during that period, which he had long meditated, the peace of 1814 having opened the Continent, he returned to his friend and protector, Pius VI. The battle of Waterloo he urged that he make a desperate stand for the cause was hopeless; and Lucien retired to Italy, devoted the remainder of his days to literature and the study of the ancients. He died at Viterbo, June 29, 1840.

BUONAPARTE, LOUIS, a younger brother of Napoleon and ex-king of Rome, was born at Ajaccio, in Corsica, in 1778. He entered the army, accompanied his brother Napoleon, and on Napoleon's success he was appointed councillor of state and division, and received the title of Franch and colonel-general. After having been appointed governor of Piedmont, he took the command of the North in Holland; and the Austrian republic having been conquered by Napoleon, Louis was king at the request of the people. In this capacity he was well with equal skill and humanity was the affection with which he acted had inspired him, that without hesitation the crown of France offered him by the emperor, having long resisted the demands to enforce the continuance which would, as he believed, be essential to his people's interests in favour of his son; but the rejected by Napoleon, who

was a severe blow to the system he had long contemplated of forming royal alliances for his relatives. He therefore used every means in his power to induce Lucien to consent to a dissolution of the marriage; but, to his honour be it recorded, he constantly spurned all the proposals that were made to him to sacrifice his wife. For several years he took up his residence in Rome, where he was a welcome visitor, having merited the gratitude of the pope by the zealous support he had given the Concordat; and when, in 1807, he found that the enmity of his brother rendered his stay in that city no longer safe, he retired to an estate which he had purchased at Canino, and which his Holiness had raised into a principality. It was not long, however, before he found that the emissaries of Napoleon were hovering round his retreat, and he fled secretly to Civita Vecchia, from which place he embarked in August, 1810, with the intention of proceeding to the United States. A storm threw him on the coast of Cagliari; but the king of Sardinia refused him permission to land; he was accordingly forced to put out to sea; and being captured by two English frigates, he was conveyed first to Malta and afterwards (Dec. 13) to England. After a time he was permitted to purchase a beautiful estate near Ludlow, in Shropshire, where he spent three calm and peaceful years, composing, during that period, a poem upon which he had long meditated, entitled *Charlemagne, or the Church Delivered*. The peace of 1814 having opened his way to the Continent, he returned to his old friend and protector, Pius VII. After the battle of Waterloo he urged the emperor to take a desperate stand for the throne; but his cause was hopeless; and Lucien, having retired to Italy, devoted the remainder of his days to literature and the fine arts. He died at Viterbo, June 29, 1840.

BUONAPARTE, LOUIS, a younger brother of Napoleon and ex-king of Holland, was born at Ajaccio, in Corsica, September 1778. He entered the army at an early age, accompanied his brother to Italy and Egypt, and on Napoleon's successive elections to the consulship and the empire he was to be a councillor of state and a general division, and received the titles of comte de France and colonel-general of carabiniers. After having been successively appointed governor of Piedmont, and governor *ad interim* of the capital, in place of Napoleon, he took the command of the army in the North in Holland; and in 1806 the Dutch republic having been changed into a kingdom by Napoleon, Louis was nominated king at the request of the States of Holland. In this capacity he conducted himself with equal skill and humanity, and was the affection with which his Dutch subjects had inspired him, that he refused without hesitation the crown of Spain which was offered him by the emperor. In 1810, however, having long resisted the emperor's demands to enforce the continental blockade which would, as he believed, have proved fatal to his people's interests, he abdicated in favour of his son; but the abdication was rejected by Napoleon, who thereupon

united Holland to the French empire; and the ex-king leaving Holland secretly, repaired to Gratz in Styria, where he resided several years under the title of Count de Saint Leu. After the fall of Napoleon, he finally retired to the Papal States with some members of his family, where he devoted himself chiefly to literary pursuits down to the period of his death. His only surviving son, Louis Napoleon Buonaparte, the offspring of his marriage with Hortense Eugénie de Beauharnois (which see), daughter of the empress Josephine, was elected president of the French republic in 1849, and is now emperor of the French. Died, 1846.

BUONAPARTE, MARIA LETITIA, the mother of Napoleon. From the widow of a poor Corsican officer she saw herself elevated to the dignity of being the mother of monarchs; and she lived to witness their removal from the thrones they had respectively usurped. Died, Feb. 3, 1836.

[The most authentic genealogical documents ascribe a Florentine origin to the Buonaparte family, and trace them back to the year 1120, when one of them was exiled from Florence as a Ghibelline; and in 1332 we find that Giovanni Buonaparte was *pudenda* of that city. In 1404, his descendant and namesake, who was plenipotentiary to Gabriel Visconti, duke of Milan, married the niece of Pope Nicholas V. His son (Nicolo Buonaparte) was ambassador from the same pontiff to several courts, and viceroy of the holy see at Ascoli. In 1567 Gabriel Buonaparte established himself at Ajaccio, and for several generations his descendants were successively heads of the elders of that city. But Napoleon Buonaparte ridiculed the pride of ancestry, and was ready on all occasions to declare, that the exalted station he had attained was due to his own merits alone.]

BUONAROTTI, [MICHAEL ANGELO.]

BUONO, a Venetian architect of the 12th century, who erected the well-known tower of St Mark at Venice, a campanile or bell-tower at Arezzo, and several other grand edifices. He is deservedly reckoned among the earliest improvers of modern architecture.

BUONONCINI, GIOVANNI BAPTISTA, a celebrated Italian composer, and one of Handel's most powerful rivals in England. Besides operas, he composed various cantatas and sonatas, and the grand funeral anthem for the duke of Marlborough. He is supposed to have died at Venice about the middle of the 18th century.

BUPALUS, a famous sculptor of the Isle of Chios in the 6th century, B.C. He is said to have hanged himself in vexation at a satire written upon him by Hipponax, a poet, whom he had caricatured in a statue.

BURBAGE, RICHARD, a celebrated English tragedian, was the son of an actor, James Burbage, by whom the Blackfriars theatre was built. Richard was the friend and associate of Shakespeare, and was especially in repute for his performance of Hamlet, Lear, Richard III., and other tragical characters in the plays of his friend. Died, at London, 1619.

BURCARD, or BROCARDUS, bishop of

Worms, in the 11th century. Assisted by the abbot Albert, he compiled the famous collection of Canons, in 20 books, entitled "Magnum Decretorum seu Canonum Volumen." Died, 1026.

BURCKHARDT, JOHN LEWIS, a celebrated traveller, was born at Lausanne about 1784. He was educated at Leipzig and Göttingen, and in 1806 came to England. He soon after undertook for the African Association a journey of exploration to the interior of Africa, and prepared himself by a diligent course of study of Arabic and physical science. He set out early in 1809, spent some time in Syria, thence visited Egypt and Nubia; spent several months at Mecca, in the guise of a pilgrim; visited Medina, where he had a long illness; and after a short stay in Egypt, and a visit to Sinaï, died at Cairo, just as he was preparing for his African exploration, October 1817. After his death appeared his interesting narratives of Travels in Nubia, in Syria and the Holy Land, and in Arabia. Burckhardt's account of Mecca and Medina was the fullest we possessed till the publication of Burton's Narrative.

BURCKHARDT, JOHANN KARL, a learned German astronomer, was a native of Leipzig, and early devoted himself to the study of astronomy. At the age of 24 he went to France, and became assistant to Lalande, whose works he had well studied. He was soon after naturalized in France, and spent the rest of his life at Paris. He was made a member of the Institute, and honorary member of the Board of Longitudes. Among his works are "Tables de la Lune," and a German translation of La Place's "Mécanique Céleste." Born, 1773; died, 1825.

BURDER, GEORGE, an eminent dissenting minister; author of "Evangelical Truth defended," &c., and one of the editors of the Evangelical Magazine. Died, 1832.

BURDETT, SIR FRANCIS, bart., an aristocrat by birth and fortune, but for a long series of years one of the most popular members of the British parliament, was born in 1770, and received his education at Westminster School and Oxford University. On returning from a continental tour, during which he had ample opportunities of witnessing the progress of the French revolution, he was imbued with some portion of its spirit, which was in no small degree fostered by his friend and instructor, the celebrated John Horne Tooke, the well-known author of the Diversions of Purley. In 1793 he married the youngest daughter of Thomas Coxe, Esq., the wealthy banker, with whom he received a large fortune; and four years afterwards, on the death of his grandfather, succeeded to the baronetcy. In 1798, Sir Francis was returned to parliament, by the interest of the duke of Newcastle, as member for Boroughbridge, his colleague being Mr Scott, afterwards Lord Eldon; and he soon distinguished himself by his resolute hostility to the measures of government, which he denounced as inimical to the liberties of the people. In 1802 he offered himself as a candidate for Middlesex in opposition to Mr Mainwaring, and was returned; but, on a new election in 1804, he was defeated by

Mr Mainwaring, jun., by a majority of 870, 3928 to 3233. At the next general election (1804) he again became a candidate for the county, but was defeated by Mr M'Callish by more than 2000 votes. At this time Sir Francis was a man of great influence in the city of Westminster; and a vacancy in its representation occurring through the death of Mr Fox, Sir Francis was returned by a vast majority, at the head of the poll, his colleague being Lord Cochrane. His opposition to ministers was now unceasing, and so indiscreet, that an opportunity soon presented itself of making his conduct the subject of legal proceedings. In 1810, having addressed a letter to his constituents, in which he declared that the House of Commons had exercised their power illegally by committing John Gale Jones to prison, the publication of this letter was deemed a breach of privilege, and the speaker was directed to issue his warrant for the apprehension and commitment of Sir Francis Burdett to the Tower. He refused to surrender, and barricaded his house; whereupon, after a lapse of two days, the sergeant-at-arms, accompanied by police officers and a military force, succeeded in breaking in, and conveyed him to the Tower. On the return of the military the infuriated mob attacked them, and in their defence they shot one man and wounded several others. The prorogation of parliament put an end to his imprisonment; and recollecting the excitement which prevailed at the time of his committal, he wisely proceeded privately by water to his home, rather than jeopardize the lives of his "friends and supporters," by indulging them, as they wished, with a public procession through the streets of the metropolis. He afterwards brought an action against the speaker, &c., but was, of course, unsuccessful. Through we mention some of the most important events of his life, we cannot follow him through his parliamentary career—his opposition to the suspension of the habeas corpus act, his reiterated speeches in favour of parliamentary reform, his advocacy of Catholic emancipation, &c.; but pass on to the year 1819, when he was prosecuted by the attorney-general for addressing a letter to his constituents, strongly condemning the proceedings of the magistrates and yeomanry at the memorable meeting of the people at Manchester. The letter was pronounced a libel, and he was sentenced to three months' imprisonment in the King's Bench, and to pay a fine of £100. Sir Francis Burdett had ever been a zealous advocate for parliamentary reform, yet he never desired to see the prerogatives of the monarch, or the privileges of the House of Peers, in the slightest degree invaded. But the turbulence of his earlier years seemed to spring from a restless vanity, while his departure, at a very advanced period of life, from the party of which he had for nearly two-score years been the avowed champion, savoured less of true and high conservative feeling, than it did of petulance. He died, January 23, 1844, aged 74.—**LADY BURDETT**, who had for many years suffered greatly in her health, died the same month.

BURDON, WILLIAM, an able English

writer; author of "Materials of which Colton largely availed himself; his Lecon; "Thoughts on Poetry and Literature," "Life and Buonsaparte," &c. Died, 1811.

BURGER, GOTTFRIED, a celebrated German poet; well known by his ballad poem "Kuntzman's Chase" and "Leu" which have been translated, and become highly popular.

Died, 1794.

BURGESS, THOMAS, bishop of Exeter, was born in 1756, at Odiham, where his father carried on a grocer. He was educated at Exeter, obtained a scholarship at Balliol College, Oxford, in 1775; and, with diligence, in a short period became reader and tutor of the college. His time distinguished himself by a very considerable pretension to the publication of several able works, and a patron in Dr Shute Barrington, in 1787, to the Bishop of Exeter, and afterwards preferred a stall at Durham. His next took place under the name of Mr Addington (who had been resident at Winchester and Oxford), conferred on him, in 1803, the title of David's. From the moment he was promoted to the episcopal bench, he devoted and exemplary concerns of his diocese; he founded a society for the foundation of a school; for the instruction of the Welsh Church; and the establishment at Lampeter station of his activity and the death of Dr Fisher, he succeeded to the bishopric of Salisbury, throughout the twelve years of his episcopate in that diocese, he zealously promoted the interests of his charge. Among his works are editions of "Burton's Miscellanea Critica" and "Dawes's Miscellanea Critica" on the Study of Antiquities; "The Principles of Christian Knowledge on the Controversial Points of Priestley;" "Emendations in the Greek et alios Lexicographia;" "The Bible, and Notes on the Religion of the Church;" with many others, moral and political. Bishop Burgess was instrumental in founding the "Journal of Literature, of which he became the first president. On account of his loss of sight and infirmities, he resigned the see of Lord Dover. Died,

BURKHAIR, HANS, an engraver and engraver, was born in 1474. He worked some time with his friend Albert Dürer; painted in fresco and had his chief reputation by his wood, several series of which he engraved, and his genealogy and achievements.

writer; author of "Materials for Thinking," of which Colton largely availed himself in his *Lacon*; "Thoughts on Politics, Morality, and Literature," "Life and Character of Buonaparte," &c. Died, 1818.

BURGER, GOTTFRIED AUGUST, a celebrated German poet; well known in this country by his ballad poems of the "Wild Huntsman's Chase" and "Leonora," both of which have been translated into English, and become highly popular. Born, 1746; died, 1794.

BURGESS, THOMAS, bishop of Salisbury, was born in 1706, at Odiham, in Hampshire, where his father carried on business as a grocer. He was educated at Winchester; obtained a scholarship at Corpus Christi College, Oxford, in 1776; and, by his talents and diligence, in a short period became logic teacher and tutor of the college. He had by this time distinguished himself as a scholar, very considerable pretensions, by the publication of several able works; and he was a patron in Dr Shute Barrington, who invited him, in 1787, to the prebend of Hilsford and Woodford, in Salisbury cathedral, and afterwards preferred him to a prebendal stall at Durham. His next advancement took place under the administration of Mr Addington (who had been his fellow-student at Winchester and Oxford), and who conferred on him, in 1803, the vacant see of David's. From the moment of his elevation to the episcopal bench, he displayed the most devoted and exemplary attention to the concerns of his diocese; he planned and formed a society for the foundation of a provincial college for the instruction of ministers of the Welsh Church; and the establishment at Lampeter stands as a noble monument of his activity and benevolence. The death of Dr Elmer, in 1805, he was appointed to the bishopric of Salisbury; and throughout the twelve years of his episcopate in that diocese, he zealously contrived to promote the interests of those committed to his charge. Among his numerous works are editions of "Burton's Pentateuchia," "Dawes's Miscellanea Critica," "Constitutions on the Abolition of Slavery," an Essay on the Study of Antiquities," "First Principles of Christian Knowledge," "Reasons on the Controversial Writings of Westley," "Emendationes in Suidam et Archim et alios Lexicographos Græcos," &c.; "The Bible, and Nothing but the Bible," the Religion of the Church of England, and political. Bishop Burgess was very instrumental in founding the Royal Society of Literature, of which, in 1821, he became the first president; but in consequence of his loss of sight, and infirmities, he resigned the office of Bishop of Lord Dover. Died, Feb. 19,

BURKMAIR, HANS, an early German painter and engraver, was born at Augsburg in 1474. He worked some time in conjunction with his friend Albert Dürer at Nuremberg; painted in fresco and in oil, but his chief reputation by his engravings in wood, several series of which celebrate the genealogy and achievements of

the Emperor Maximilian I. He was living in 1525.

BURGOYNE, JOHN, an English general. During the American war he led the army which was to penetrate from Canada into the revolted provinces. But he encountered difficulties too great for its successful issue, and he was compelled to surrender at Saratoga with all his forces to General Gates in 1777. He was author of "The Maid of the Oaks," "The Lord of the Manor," and some other dramatic works. Died, 1792.

HURIDAN, JOHN, a philosopher of the 14th century. Being expelled from Paris through the influence of his philosophical opponents, he sought shelter in Germany, and was instrumental in founding the university of Vienna. He wrote commentaries on the logic, ethics, and metaphysics of Aristotle, and is said to have been the inventor of the well-known dilemma of the ass between two bundles of hay, by which he used to illustrate the doctrine of free-will. This illustration, however, is not found in any of his works. Died, 1358.

HURIGNY, JEAN LEVEQUE DE, a learned French historian and biographer, was born at Rheims in 1692. He went to Paris in 1713, and pursued his studies in concert with his two brothers for several years. He then went to Holland, and co-operated with St Hyacinthe in the journal entitled "L'Europe Savante." In 1756 he was received at the Academy of Inscriptions, and after a long life of literary labour, which he loved for its own sake, a pension was given him of 2000 francs. His principal works are a "Traité de l'autorité du pape," in which he fearlessly discusses the knotty questions connected with his subject; "Histoire de la philosophie païenne;" "Histoire générale de Sicile;" "Vie de Grotius;" and "Vie d'Erasmus." Died at Paris, 1785.

BURKE, EDMUND, the great statesman, orator, and political writer, was born at Dublin about 1730. He completed his education at Trinity College, having previously studied at the Academy of the Society of Friends at Ballitore. He settled at London about 1750, and soon began to employ himself in literary work. He projected the "Annual Register," and for some years wrote the whole of it. He became private secretary to the marquis of Rockingham, made prime minister in 1765, and the same year entered parliament. There he took a leading part in debate, and especially distinguished himself by his speeches on the great American question, on Catholic emancipation, and economical reform. In 1782 he was appointed paymaster of the forces and privy councillor. The affairs of India, the prosecution of Warren Hastings, and the events of the French revolution were the great subjects which engaged his attention during the following years. His speeches on the opening and conclusion of the impeachment, the first occupying four, and the last nine days, were among the grandest efforts of his oratory. His views on the French revolution occasioned the painful rupture with his old friend Fox, who warmly supported the revolution. He retired from parliament in 1794, and soon after lost his son,

a blow which was too heavy for him. He died at his seat at Beaconsfield in 1797. His principal works are the "Inquiry into the Origin of our Ideas of the Sublime and Beautiful," published in 1756; "Reflections on the French Revolution," in 1790, which had an immense circulation immediately; "Letter to a Noble Lord;" and his "Speeches in the House of Commons." "A History of 'The Life and Times of Edmund Burke,'" in 3 vols., was recently published by Thomas Mac-knight.

BURKITT, WILLIAM, an English divine; author of a "Practical Exposition of the New Testament." Born, 1650; died, 1703.

BURLEIGH, WILLIAM CECIL, Baron, secretary of state and lord high treasurer of England, was born in Lincolnshire in 1620. He was educated at Cambridge, and afterwards studied law; but being introduced at the court of Henry VIII., his course was changed. On the accession of Edward VI., the protector Somerset gave him a responsible office, and took him with him on the expedition to Scotland. He was soon after made secretary of state, and did much to promote the freedom of trade. He held no public office during the reign of Mary, and by extraordinary cautiousness escaped persecution. Elizabeth made him secretary of state and privy councillor on her accession, and he remained first minister till his death. In 1572 he became lord high treasurer, having previously been raised to the peerage. Through all the grave religious, political, and international difficulties of his long administration he displayed consummate ability, integrity, sagacity, and moderation; and the Protestant system was firmly established by the measures which he adopted. Died, 1598.

BURMAN, PIETER, a celebrated Dutch critic and scholar; professor of history, rhetoric, and Greek at the university of Leyden. He wrote a variety of dissertations and epistles, philological and critical, and published editions of various Latin classics with notes. Born, 1668; died, 1741.

BURMAN, PIETER, nephew of the above, professor of history and rhetoric at Amsterdam; editor of the works of Claudian, Aristophanes, &c. Born, 1714; died, 1778.

BURMAN, JOHAN, brother of the preceding, and eminent equally as a physician and a botanist; author of "Thesaurus Zeylandicus," &c. Born, 1707; died, 1779.

BURN, RICHARD, LL.D., an English clergyman; author of a "History of the Poor Laws," joint author with Mr Nicholson of a "History of Westmoreland and Cumberland," and compiler of the well-known works "Burn's Justice," and "Burn's Ecclesiastical Law." Died, 1789.

BURNES, Sir ALEXANDER, a lieutenant-colonel in the Indian army, and political resident at the court of the Soojah at Cabool, was born at Montrose, in 1805. Having obtained the appointment of cadet, he arrived at Bombay in 1821; and on account of his proficiency in the Persian and Hindostanee languages, was at first employed as an interpreter and translator. His regiment, the 21st native infantry, having been ordered to Bhoof in 1825, Lieut. Burnes joined it, and

during the disturbances in Cutch was appointed quarter-master of brigade, though at the time he was under 20 years of age. His superior talents and zeal soon attracted the attention of the authorities, and he was appointed Persian interpreter to a force of 8000 men, assembled for the invasion of Scinde, under the command of Colonel M. Napier of the 6th foot. In Sept. 1829, he was appointed assistant to the political agent at Cutch, and was engaged in surveying the north-west frontier. Early in 1830 a present of horses having arrived at Bombay from the king of England, he was sent to the Maharajah Buncjeet Singh, Lieut. Burnes was selected to proceed with them to Lahore, the capital of the Punjab. He was also intrusted with presents to the Amcers of Scinde; but though this was the ostensible object of his mission, the chief motive was to obtain full and complete information in reference to everything pertaining to the geography of the Indus. This extraordinary journey was performed amid delays, obstructions, and difficulties, but with admirable tact and perseverance; and the work recording these travels, which was published some little time after his return to England in 1833, possesses the highest interest. Soon after his return to India in 1835, Lieut. Burnes, in acknowledgment of his diplomatic and other services, was knighted and advanced to the brevet rank of lieutenant-colonel; and on the final restoration of the Shah Soojah, in Sept. 1839, he was appointed political resident at Cabool, with a salary of £3000. But he was not long destined to fill the post which his merits had gained; for, at the very outset of the invasion in Cabool, it was the melancholy fate of this enterprising and deserving officer — then only in his 37th year — to be assassinated, together with his brother, Lieut. Charles Burnes, and several others. Died, Nov. 2, 1841.

BURNET, THOMAS, an English divine and philosopher, born in Yorkshire, 1634. He studied at Cambridge, became fellow of Christ's College, and subsequently master of the Charterhouse, an office which he held for 30 years. He is distinguished for the bold resistance he made to James II., who wished to make a Roman Catholic a pensioner of that establishment. His first work, and that by which he is chiefly known, was the "Sacred Theory of the Earth," a merely fanciful and ingenious speculation, without any pretension to scientific truth. He afterwards published "Archæologia; Philosophice," and some heterodox opinions which he plainly expressed in it lost him his post of clerk of the closet to William III. Died, 1715.

BURNET, GILBERT, bishop of Salisbury, historian of the Reformation, was born at Edinburgh in 1643. He studied at Aberdeen, entered the church, and became in 1690 professor of divinity at Glasgow. Five years later he settled in London, and was made preacher at the Rolls Chapel. He made a bishopric fail to win him to the offer of a bishopric failed to win him to the support of arbitrary power. He was a friend of Lord William Russell, and accompanied him to the scaffold: for which he

was deprived of his preachingship and went abroad, was well received by the prince of Orange, took an active part in promoting his election to the throne of England, and came with him as his next year he was made bishop of Salisbury. His great works are the "Reformation in England," 1699; and the "History of his own Times," 10 vols. folio. He wrote also a "Life and Death of the Earl of Shaftesbury," "Exposition of the Thirty-nine Articles of the Church of England," and the "Life of Sir Matthew Hale and his Successors." Burnet's histories are full of thorough partisan; and bear the marks of his prejudices, vanity, carelessness, and inaccuracy, yet they contain much valuable information, and throw light on otherwise dark matters. A new edition of "History of the Reformation," fully revised and the records corrected, by the originals, by the Rev. N. Burnet, has recently been printed at London. Died at London, 1726.

BURNETT, JAMES, Lord MONMOUTH, distinguished Scotch judge; author of a dissertation "on the Origin of Language," "Ancient Metaphysics." Thoughtful and acute, he exposed his opponents to ridicule by asserting the existence of gods and satyrs, and particularizing relations on a supposed affinity between the human race and the monkey. He was far more startling in his day than he which have been long familiarly heard and speculations of the great Darwin, and discuss every branch of "Species." Born, 1714.

BURNETT, GILBERT THOMAS, D.D., the lineal descendant of the late Bishop Burnet, was born at Salisbury, having received a classical and mathematical education, studied with success under several anatomical professors; and became professor of medical anatomy at King's College, London. Died in 1811.

BURNEY, CHARLES, the well-known author of the "History of Music," which is still more celebrated as the work of the D'Arbly, authoress of "Eurydice," was born at Shrewsbury in 1732. He showed a taste for music, and acquired considerable knowledge of it from Dr Arne, he settled in London in 1760 in prospect of success. But his success was not long continued. He had accepted the place of organist at Norwich, where he resided till 1760, when he returned to London, and was restored, and he at once obtained a pension which enabled him to support himself in comfort and independence. His personal merit obtained for him, in 1760, the office of doctor of music from the University of Oxford; and his attainments in the science of his temper, and the simplicity of his manners, not only gained for him the first literary circles, but he was elected to St Martin's Street, London, which was long the resort of all the distinguished for talent, rank, or fashion. He obtained a pension of £300 per annum. Besides his History of Music

was deprived of his preach-
ership. He after-
wards went abroad, was well received by
the prince of Orange, took an active part in
promoting his election to the throne of
England, and came with him as his chaplain.
The next year he was made bishop of Salis-
bury. His great works are the "History of
the Reformation in England," in 3 vols.
1705; and the "History of his own Time,"
10 vols. folio. He wrote also an account
of the Life and Death of the Earl of Roches-
ter, "Exposition of the Thirty-nine Arti-
cles of the Church of England;" and the
History of Sir Matthew Hale and Bishop
Ussher. Burnet's histories are the works
most thorough partisan; and bear the marks
of his prejudices, vanity, carelessness, and
inaccuracy, yet they contain much impor-
tant information, and throw light on many
otherwise dark matters. A new edition of
his "History of the Reformation," in 7 vols.,
thoroughly revised and the records collated
with the originals, by the Rev. N. Pocock,
1762, has recently been printed at the Clon-
don Press. Died at London, 1715.

BURNET, JAMES, Lord MONBODDO, a
distinguished Scotch judge; author of a
"Dissertation on the Origin of Language,"
"Ancient Metaphysics." Though both
serious and acute, he exposed himself to
ridicule by asserting the existence of
goblins and satyrs, and particularly by his
speculations on a supposed affinity between
human race and the monkey tribe, a
theory far more startling in his days than in
ours, which have been long familiar with
the kindred speculations of the grave and
Darwin, and discuss every day his
"Origin of Species." Born, 1714; died,

BURNET, GILBERT THOMAS, botanist
&c., the lineal descendant of the
celebrated Bishop Burnet, was born in 1830,
having received a classical and scientific
education, studied with success under medi-
cal anatomical professors; and ultimately
became professor of medical botany
at St. George's College, London. Died in 1836.

BURNET, CHARLES, the well-known
author of the "History of Music," and per-
haps still more celebrated as the father of
the D'Arbly, authoress of "Evelina,"
was born at Shrewsbury in 1728. He
showed a taste for music, and having
obtained considerable knowledge of the art
from Dr. Arne, he settled in London with
a prospect of success. But his health
was such that he accepted the place of organist
at St. Dunstons, in Norfolk, where he resided nine
years. In 1760 he returned to London with
his health restored, and he at once obtained as
organist a situation which enabled him to support his
family in comfort and independence. His
musical merit obtained for him, in 1769,
the degree of doctor of music from the uni-
versity of Oxford; and his attainments, the
gentleness of his temper, and the simplicity of
his manners, not only gained for him admis-
sion into the first literary circles, but his own
residence in St. Martin's Street, Leicester
Square was long the resort of all that was
distinguished for talent, rank, or fashion. In
1780 he obtained a pension of £300 per
annum. Besides his History of Music, Dr.

Burney published "The Life of Metastasio,"
a "Musical Tour through France and Italy,"
and contributed nearly all the musical arti-
cles to Rees's Cyclopaedia, for which he
obtained £1000. Died, 1814.

BURNEY, CHARLES, second son of the
above, was a classical scholar and critic of
high reputation. Dr Burney's classical
acquirements were first displayed in the
Monthly Review, and there were few Greek
scholars who could compete with him.
Among his works are an Appendix to Scap-
ula's Greek Lexicon, an edition of the
choral odes of Pindarus, &c. His valuable
library was purchased by parliament for
the British Museum. Born, 1737; died, 1817.

BURNEY, FRANCIS, [D'ARBLAY.]
BURNEY, Rear-Admiral JAMES, eldest
son of Charles Burney, the historian of
music, entered the navy at an early age,
and accompanied Captain Cook on his last
two voyages. After long and arduous ser-
vices, he attained the rank of rear-admiral.
He was an able geographer; and his "His-
tory of Voyages of Discovery" and other
writings show him to have been an accurate
and industrious student and writer. Born,
1760; died, 1821.

BURNS, ROBERT, the national poet of
Scotland, was born in Ayrshire in 1759. His
father was a gardener and very poor, so that
his children had only the scantiest education,
with hard labour and hard living. Robert
worked on a farm taken by himself and his
brother, and maintained himself on the
slenderest income. He was early noted
among his neighbours for his verses and his
social qualities. In 1786 he published his
poems, and was prepared to quit his native
land, when an invitation to Edinburgh
changed his course of life. He was wel-
comed and flattered by the highest society
of the capital, published a second edition of
his poems, for which he received a large
sum, and returned to cultivate a farm in
Dumfriesshire. He was afterwards ap-
pointed exciseman, and gave up his farm.
But he could no longer content himself
without indulgence in sensual and exciting
pleasures, which were naturally followed by
embarrassments, depression, and broken
health. He died at Dumfries in July 1796.
The poems and songs of Burns won im-
mediate and enthusiastic admiration from
all classes of society. His themes are such
as all can comprehend, and his speech simple
and true; and there is no fear of his fame
diminishing. In his poetry, as in his life,
alas, there is much that is impure, the utter-
ance of sensual passion; nothing mean and
ignoble; and some most pathetic penitential
breathings, that may well soften hard
thoughts, and abate the severity of censure.
The centenary of his birth was celebrated in
England by a poetic competition at the
Crystal Palace, when the prize was won by
Miss Isa Craig.

**BURRUS. [BORRI, GIUSEPPE FRAN-
CISCO.]**

BURTON, ROBERT, an English divine;
author of "The Anatomy of Melancholy;"
was a native of Lindley in Leicestershire,
studied at Oxford University, and became
rector of Segrave. He was a good mathe-

matician and classical scholar, an omnivorous reader, and a merry companion. His book, written, he says, by way of alleviation to his own melancholy, is an immense compilation of quotations on all manner of topics from an infinite variety of sources, familiar and out of the common track. It is described by Archbishop Herring as "the pleasantest, the most learned, and the most full of sterling sense." The archbishop adds, that the wits of the reigns of Anne and the first George were deeply indebted to Burton; and we may venture to say, that the "wits" of the succeeding reigns have been no less so. It was a great favourite of Dr Johnson, who would turn out of bed earlier than usual to read it. Born, 1676; died, 1640.

BURY, RICHARD DE. [AUNGVILLE.] **BUSBEQUIUS:** the Latin name of **AUGER GHISLAIN DE BUSBEQ,** a celebrated diplomatist, who was born in Flanders in 1522. He studied at the principal universities of Europe; visited England in 1554; and in the following year was sent ambassador from Ferdinand, king of the Romans, to the Sultan. He made the long journey on horseback, and succeeded in the object of his mission. Sent to Constantinople a second time, he stayed there seven years, and negotiated a satisfactory treaty. He afterwards became tutor to the sons of Maximilian II., escorted the archduchess Elizabeth to Paris, remained there after her departure as ambassador of Rudolph II., and in 1597 set out for his native country. Attacked by a band of "Leaguers" near Rouen, he fell sick of a fever, and died in a few days. He left an admirable account of the Ottoman empire in his well-known work entitled, "Legationis Turcicæ Epistolicæ Quatuor," which has been always highly esteemed, and has been translated into all the European languages.

BUSBY, Dr RICHARD, the venerable master of Westminster School—celebrated for his abilities as a classical teacher and as an unflinching disciplinarian—was born at Luton, in Northamptonshire, 'n 1606. He held the situation of head-master from 1640 to the time of his decease, in 1695—a period of 55 years. Dr Busby was a prebendary of Westminster, and is buried in the Abbey.

BUSCHETTO DA DULICHIO, a Greek architect of the 11th century. He erected the cathedral church of Pisa, the first specimen of the Lombard ecclesiastical style of building.

BUSCHING, ANTON FRIEDRICH, a German geographer and littérateur, born in 1724. He was appointed professor of philosophy at Göttingen in 1754; was several years a pastor at St Petersburg; and in 1766 director of a gymnasium at Berlin. His chief work was the "Neue Erdbeschreibung," of which however he only completed the volumes relating to Europe. It was translated into English, French, and other languages. Büsching wrote also many elementary works for schools, a "Character of Frederick II.," &c. He is frequently cited by Carlyle, in his "History of Frederick the Great," with great respect, as a shrewd observer and veracious reporter. Died at Berlin, 1798.

BUSSY, ROGER DE. [RABUTIN.]

BUSTI, AGOSTINO, usually called **IL BAMBALIA,** a distinguished Italian sculptor, who flourished at Milan in the first half of the sixteenth century. Little is known of his life, and few of his works are extant. His masterpiece was never completed, and is now only known from a preliminary drawing recently discovered, and numerous vases, reliefs, and trophies which were in form parts of it. This masterpiece was the monument to Gaston de Foix, commenced about 1515, and, after years of labour, abandoned in consequence of a turn in the tide of war. The fragments of it were seen by Vasari about fifty years later, and excited in him the profoundest admiration and regret. They were carried off, and are now scattered in the galleries of Italy. Five portions have been acquired for the South Kensington Museum. Bambalia was especially noted for the elaborate minute finish of his sculptures, though he wrought in the hardest marble. Died probably about 1540.

BUTE, JOHN STUART, Earl of, British statesman, descended from an ancient Scotch family, was born early in the 16th century. In 1738 he was appointed one of the lords of the bedchamber to Frederic, prince of Wales, the father of George III. Soon after the young king's accession, over whom he possessed unbounded influence, he was made secretary of state, and, quickly after, Sept. 1762, first lord of the treasury. Under his ministry, a peace, which disappointed the hopes of the people, was concluded with France and Spain; and what added greatly to his unpopularity, was the marked favoritism he showed for his countrymen, filling the most lucrative offices in the state with Scotchmen. It was against the government of Lord Bute that Wilkes directed his violent attacks in the famous "North Briton" newspaper. He resigned his office in April, 1769, and retired into private life, which he adorned by his benevolent disposition and his love of science. Botany was his favorite study, and he expended vast sums in its pursuit. Died, 1792.

BUTLER, ALBAN, the celebrated biographer, was born in Northamptonshire, in 1710, and was early sent to the college of Douai. He was for some time chaplain to the duke of Norfolk, but at length became president of the college of St Omer. The chief of his works is the "Lives of our Fathers, Martyrs, and other principal Saints." Died, 1773.

BUTLER, CHARLES, an English barrister and a most indefatigable and accomplished scholar. He was born at London, and educated at Douai. His numerous works, of the exception of his "Notes to Coke's Littleton" and his "Reminiscences," are a religious or political character; and, indeed, it is as the able advocate of his religious community, that he is principally to be regarded. Neither the fire of youth, nor the interruption of business, the variety of his employments, nor the bustle of study could ever moderate his ardour for study. He was the author of an "Historical Account of the Laws against the Roman Catholics," a book which greatly served the cause of Catholic Emancipation, "Book of

Catholic Church," "Horn Bible," &c. passed through several editions. His biographies, chiefly of eminent theologians, &c. Born, 1750.

BUTLER, JAMES. [ORMOND.] **BUTLER, JOSEPH,** bishop, was born at Wantage in 1692, was a Presbyterian, and sent to the dissenting Academy at Gloucester, and conformed to the Church of England at Oxford, and, in 1720, was preacher at the Rolls. In 1722, he was appointed rector of Stanhope, and afterwards settled there, renouncing his dissenting preaching. Through the influence of Bishop Seeker, his fellow-student, he became chaplain to the Duke of Marlborough, and clerk of the cloister at Bath. In 1738 he was raised to the see of Bristol, soon after made dean of Exeter, and in 1750 was translated to Durham, which soon failed him, and he died in the two years. Butler's great work is an analogy of Religion, Natural and Revealed, to the Constitution and Contract of Government. It was published in 1726.

A considerable argument had been forestalled in a volume of "Sermons," published in 1720. Died at Bath, 1752.

BUTLER, SAMUEL, author of "The Pilgrim's Progress," was a native of Worcester, and was born about 1612. He had an early education in his youth, but afterwards devoted his mind by study and reading to the office of secretary to several persons in succession, and was distinguished with the wits and writers of the age. His witty poem was intended for a satire on the Presbyterians and Independents. It appeared in three parts, in 1683, the second soon after in 1678. A subsequent edition appeared in 1728-7, was rendered active by 18 illustrations corrected by Hogarth. Though sparkling with wit, it is not so hard to read, and is not so deep through. It is also distinguished by indecent and filthy passages.

At London, very poor it is said, he died. **BUTLER, Dr SAMUEL,** bishop of Exeter, a learned and most exemplary man. He was born at Kenilworth, in Warwickshire, and received his education at the school to which he was a benefactor. In 1792 he removed thence to Trinity College, Cambridge, where his talents and brilliant, nearly, if not quite parallel, his prizes and distinctions, exceeded in number those obtained by his contemporaries. In 1798 he was promoted to the mastership of Shrewsbury, and, about the same time, he was appointed for the arduous task of preparing a new edition of Æschylus for the university. His learning and his indefatigable industry soon produced for several years a high rank and reputation among the scholars. After receiving several honours, he was, in 1836, promoted to the see of Lichfield. Though a pious man, he was a very liberal in his views on ill health, he was a very liberal author. His "Sketch of Ancient Geography" and his "Ancient and Modern Atlases" long held their ground.

Catholic Church," "Horn's Bible," which passed through several editions, numerous biographies, chiefly of eminent Roman Catholic divines, &c. Born, 1750; died, 1832.

BUTLER, JAMES. [ORMOND, Earl of.]

BUTLER, JOSEPH, bishop of Durham, was born at Wantage in 1692. His father was a Presbyterian, and sent him to the dissenting Academy at Gloucester. But he soon conformed to the Church of England, studied at Oxford, and, in 1718, became preacher at the Rolls. In 1724 he was appointed rector of Stanhope, and two years afterwards settled there, renouncing his episcopal preacherhip. Through the influence of Bishop Secker, his fellow-student and friend, he became chaplain to Lord Chancellor Talbot, and clerk of the closet to Queen Caroline. In 1738 he was raised to the see of Bristol, soon after made dean of St Paul's, and in 1750 was translated to Durham. His health soon failed him, and he only held his see two years. Butler's great work is the "Analogy of Religion, Natural and Revealed, to the Constitution and Course of Nature." It was published in 1736. Its admirable argument had been foreshadowed in a volume of "Sermons," published ten years earlier. Died at Bath, 1752.

BUTLER, SAMUEL, author of "Hudibras," was a native of Worcestershire, and born about 1612. He had only a scanty education in his youth, but afterwards cultivated his mind by study and reading. He held the office of secretary to several eminent persons in succession, and was acquainted with the wits and writers of the age.

His witty poem was intended to throw ridicule on the Presbyterian and Independent parties. It appeared in three parts, the first in 1663, the second soon after, and the third in 1678. A subsequent edition, published in 1726-7, was rendered additionally attractive by 18 illustrations contributed by Hogarth. Though sparkling with wit, the poem is hard to read, and is probably never read through. It is also defaced by indecent and filthy passages. Butler died at London, very poor it is said, in 1680.

BUTLER, Dr SAMUEL, bishop of Lichfield, learned and most exemplary English prelate.

He was born at Kenilworth, in Warwickshire, and received his education at Rugby School, to which he was admitted in 1671. In 1792 he removed thence to St John's College, Cambridge, where his course was rapid and brilliant, nearly, if not quite, parallel, his prizes and distinctions exceeding in number those obtained by his contemporaries. In 1798 he was elected to the mastership of Shrewsbury School, and, about the same time, he was appointed for the arduous task of preparing a translation of Æschylus for the university.

His learning and his indefatigable industry soon produced for Shrewsbury a high rank and reputation among our schools. After receiving several minor honours, he was, in 1836, promoted to the see of Lichfield. Though a perfect scholar, he was a very voluminous author. His "Sketch of Ancient and Modern Geography" and his "Ancient and Modern Atlases" long held their ground

as the best works of their kind. Born, 1774; died, 1840.

BUTTMANN, PHILIPP CARL, an eminent German philologist, was born at Frankfort-on-the-Maine, in 1764. He was educated at the university of Göttingen, became assistant librarian to the king of Prussia, in 1788, afterwards professor of philology and member of the Academy of Sciences, Berlin, and finally chief librarian to the king, and health failed after the loss of a favourite daughter in 1820, and he died in 1829. Buttman edited several classical authors, but he is chiefly known for his Greek Grammatica, the "Schulgrammatik," "Griechische Grammatik," and "Ausführliche Griechische Sprachlehre." He published a collection of his essays on history and mythology.

BUTNER, CHRISTIAN WILHELM, a German naturalist and philologist, whose zeal in pursuit of his favourite studies was such that, in order to buy books, he restricted himself to what was barely necessary to sustain life, never making more than one frugal meal a day. He was born at Wolfenbüttel, studied at Oxford, and under Boerhaave at Leyden, where he gained the friendship of Linnæus. He was especially devoted to the study of comparative grammar, and although he wrote little, his labours opened and smoothed the way for those who came after him. He was long professor at the university of Göttingen, and titular professor at Jena. Born, 1716; died, 1801.

BUXHOWDEN, FREDERIC WILLIAM, Count of, a general in the Russian army.

He entered on a military life at an early age, and was engaged in the war against the Turks in 1769; till, rising by degrees, he, in 1794, obtained the command of Warsaw and the administration of Poland. In 1805 he commanded the left wing of the army at the battle of Austerlitz, which advanced while the centre and right wing were beaten; but, after the battle of Pultusk, he was unjustly superseded by Benningsen. He was, however, again made commander-in-chief, and, in 1808, conquered Finland. Died, 1811.

BUXTON, JEDEDIAH, a singularly gifted man, whose powers of calculation have probably never been equalled. It is said that he was asked this question—"In a body whose three sides are, respectively, 23,148,789 yards, 5,642,732 yards, and 54,968 yards, how many cubical eighths of an inch are there?" and that, amid all the distractions of the labours of a hundred men, he gave the exact answer in little more than five hours! But it was only in calculating that he had any intellectual superiority; in other respects, his mind was rather below than above the average. He had energy enough to accomplish a journey to London on foot, to gratify his wish to see the king. He was himself an object of curiosity to some of the distinguished men of the time. At the theatre he amused himself with counting the words and steps of the actors and actresses. London excited no ambition in his dull soul, and he went back to vegetate and count and do at Elmton, his native village. Born, about 1705; died, before 1780.

BUXTON, Sir THOMAS FOWELL, bart. This distinguished philanthropist was born

stry, wishing to their unsuccessful of the admiral's court by which as tried, recom- suffered the un- into execution. March 14, 1771; iranness of a her- ristian.

ELIZ VAN, an born in 1673, was of Franeker, and he practised as a lawyer in 1720 Court. He was and wrote many pieces are "Observations sur les questions Juris Privati," and other anonymous writings "Opera Minora."

eminent English very numerous, excellence of their 805.

ous prose writer of a system of a contributor to the "Journal de Trévoux," 1763.

an eminent na- navigator, whose in the Wager, and the "Narrative" of an Admiral, and com- during the Amer- 1786.

ON BYRON, Lord, born Jan. 22nd, 1788, was the son of a gentleman from his father, who received the grant from King George III. for a monopoly of the printing of the "Licensing Act."

Byron, who had inherited her fortune from England; and she was a widow and was on having per- son her native city.

live within the e, she placed her school of the death of her father, he became possessor of the estate, and the guardianship of Lord Harrow. His education was pro- position, and they were to control. He, and they were for his education of discipline. He took up his residence on after published. Although mar- ally, this volume of poetic genius canure from the ancients; thus con- tained in the

ated satire of "English Bards and Scotch reviewers." About that period he experienced a great disappointment in seeing Miss Chaworth, who had been the early object of his love, married to another. His course of life was now marked by extravagance and dissipation, impairing both his health and fortune; and it was probably to at- tribute himself from the Circcean snares by which he was surrounded, that he resolved on an excursion to the Continent. He was accompanied by his friend and fellow-colleague, John Cam Hobhouse, Esq.; and after a stay of two years he returned, and gave to the world the first two cantos of "Childe Harold's Pilgrimage." This was quickly succeeded by "The Giaour," "The Bride of Abydos," "Lara," "The Corsair," &c.; and in the noble hand became the poetical idol of the day. In January, 1815, he married Annaabella, only daughter of Sir Ralph Mil- lake Noel; but the union was not pro- ductive of happiness, and they separated after the birth of a daughter. This failure gave rise to many rumours re- garding little to Lord Byron's credit, and he again went to the Continent, with a determination not to return to his native country. He often changed his residence; during his various travels in the south of Europe, his admirers in England were amused with the productions of his powerful and versatile muse; sometimes soaring to the pure regions of taste, breathing no- sentiments and chivalric feelings; at times descending to voluptuousness,

or groveling in vulgarity. Among the poems written during his last stay in Italy are—"Manfred," "Beppo," "Mazeppa," "Cain, a Mystery," the third and fourth cantos of "Childe Harold," several tragedies, and "Don Juan," admitted to be his greatest work, though from its subject, treatment, and tendency unfit for idle readers. In 1823 the state of the Greeks awoke his sympathy; and, with disinterested generosity, he resolved to devote his fortune, his pen, and his sword to their cause. His energies, however, were no sooner called into action, than he was assailed by disease; and he expired, of a fever, at Missolonghi, on the 19th of April, 1824, in the 37th year of his age, to the inexpressible sorrow of the Greeks, by whom he was venerated for his personal exertions and liberal pecuniary aid. Few instances have occurred in which inconsistency appeared so glaring as in the various characteristics of this highly gifted man. With powers of reasoning beyond those of most men, he was capricious and unfixed; and with his fine poetic taste was sometimes mixed a reckless profligacy and sensuality. In proportion as we admire the commanding talents and poetic eloquence of Byron, so are we compelled to deprecate the unholy purposes to which they were too often made subservient. "Prostituted genius is but splendid guilt." His only daughter, Ada, a lady of great accomplish- ments and rare scientific attainments, was married to Lord King (afterwards Earl Lovelace), and died in 1854.

C.

[KAAB.]

ANIS, PIERRE JEAN GEORGE, a physician of considerable eminence. He was born at Conac, showed himself intelligent at school, and was sent to Paris at the age of 14, to make his way in the world. He at once began a course of earnest study of classical literature, and then medicine. He became the friend of Mirabeau, who attended him in his last illness, and wrote an account of it. He was intimate with Turgot, Condorcet, Diderot, and other distinguished men, and was elected a member of the Institute and of the Council of the Hundred; and under the government of Napoleon he was named senator. His talents are chiefly medical; but in addition he published an interesting and readable work entitled "Rapports du physique et du moral de l'homme," to which he owes his fame. Born, 1757; died,

ERMUS, FRANÇOIS, Count, a Frenchman who having settled in Spain in a com- mercial character, rendered that country

considerable service in establishing a paper currency, when cut off from her resources in America. He was afterwards the Spanish minister of finance; to which office he was appointed by Joseph Buonaparte. Born, 1772; died, 1810.

CABESTAN, or CABESTAING, GUIL- LAUME DE, a Provençal poet of the 13th century, celebrated alike for his talents and misfortunes. Having excited the jealousy of Raymond de Seillans by verses in praise of the Lady Margaret, Raymond's wife, to whose service he was attached, the story is that Raymond had him put to death; and his heart was dressed and served up to the lady, who, on learning the horrible nature of her repast, died of grief.

CABOT, SEBASTIAN, an English navigator of great eminence, was the son of a skillful Venetian pilot, who resided at Bristol, where Sebastian was born, in 1477. He made several voyages with his father (who had obtained from Henry VII. letters patent, empowering him and his three sons to discover unknown lands and conquer them), and

they, in 1497, saw the mainland of America, being the first Europeans who had done so. He was among the first to notice the variations of the needle. Not receiving in England such consideration as he felt due, Cabot went, in 1512, to Spain on the invitation of Ferdinand, but after a few years came back to England. After conducting another voyage of discovery he returned to Spain, and in 1526 conducted an expedition to the river La Plata. About 1548 he was in England again, and received a pension from Edward VI.; and he was consulted on all questions relating to trade and navigation. Cabot then took an important part in establishing the trade with Russia. We know neither the year of the death nor the place of burial of this great discoverer, nor is anything known of what became of his valuable maps and manuscripts. He was living in 1557.

CABRAL, PEDRO ALVAREZ, a Portuguese maritime discoverer, who commanded a fleet sent by Emmanuel, king of Portugal, to the Indies, in 1500, and discovered the coast of Brazil in April of that year. He then continued his course to India, and after making some conquests and treaties returned to Portugal in 1501.

CACCIA, GUGLIELMO, surnamed, from his place of residence, IL MONCALVO, a very excellent fresco painter. He executed some fine altar-pieces, and many of his works exist still in the cities of North Italy. One of his finest productions is the "Deposition from the Cross," at Novara. Caccia had three daughters, who were skilled in painting, and assisted him. Died, 1625.

CADAMOSTO, LUIGI, a Venetian navigator, patronized and employed by the king of Portugal. He discovered Cape Verd Islands. An account of his voyages and discoveries was published after his death, which took place in 1464. The narrative of which Cadamosto appeared in 1507, and was the earliest account of modern voyages.

CADE, JOHN, better known as JACK CADE, was an Irish adventurer, who headed the insurrection in Kent in the reign of Henry VI. He took the name of Mortimer, and encamped with a large body of his followers on Blackheath, 1st of June, 1450. Memorials of the hardships complained of, and the remedies desired, were sent to the king. He defeated Sir Humphrey Stafford and the royal troops at Sevenoaks, and on the 1st of July entered London. He kept his followers from plunder for a day or two; had Lord Say and Sele beheaded; was driven out of London and his followers dispersed; and he was taken and killed soon after in Sussex.

CADET DE GASSICOURT, CHARLES LOUIS. [GASSICOURT.]

CADOGAN, WILLIAM, first earl of Cadogan, a distinguished English general and diplomatist, was born in the latter part of the 17th century, and entered the army at an early age. As brigadier-general he distinguished himself, in 1704, at the battle of Hochstedt. In the following year he entered parliament; took part the same year in the forcing of the French lines, near Tirmont; served at the battle of Ramilles, and, in 1707, was appointed minister plenipoten-

tiary in the government of the Spanish Netherlands. In 1709 he served as lieutenant-general at the siege of Mons, but resigned his employment when Marlborough was disgraced. Various offices were conferred on him. After the accession of George I., he was raised to the peerage, and several times sent ambassador to Holland. In 1722 he succeeded Marlborough as commander-in-chief and master-general of the ordnance. Died, 1728, and was buried in Westminster Abbey.

CADOUDAL, GEORGES, a famous Chouan chief, born in 1769. After the ill success of his efforts for the restoration of the Bourbons, he came to terms with General Brunet, in 1800, dispersed his troops, and proceeded to London. While there, he was accused by the French government of planning the fatal machine, Georges having avowed a personal hostility to the First Consul. He afterwards, on receiving the *ordonnance* from Monsieur (Charles X.), and lieutenant-general's commission, embarked with Pichegru in a secret expedition, and landed at Falaise. It has been said that the object was to assassinate Buonaparte, as well as to excite a counter-revolution; and Pitt was accused of sanctioning the enterprise. Reports there is every reason to believe, that Cadoudal was, however, traced by the Parisian police, and put under arrest; and, after a summary judicial process, was executed on the 6th of June, 1804. He died with great courage. The two brothers Polignac were also involved in the same process, and condemned to death, but escaped through the humane exertions of Murat.

CADMON, the most ancient English poet. He flourished in the 7th century, and lived at the monastery of Whitby, though some ignorant in what relation he stood to Cadmonka. A fragment of a hymn, by Cadmon, is preserved in King Alfred's translation of Bede; and is the oldest specimen extant of English poetry. A Scripture passage in verse is extant, which is supposed to be substantially the production of Cadmon, though altered by subsequent hands.

CASALPINUS, ANDREA, an Italian physician and natural philosopher. This enlightened man in some degree anticipated the grand discoveries of Harvey and Linnæus; his "Questiones Peripateticæ," containing some hints on the circulation of blood; and his treatise "De Placitis," the first example of a system of botanical arrangement, based on similarity of structure. Died, 1683.

CESAR, CAIUS JULIUS, dictator of Rome, was born B.C. 100. At the early age of 13 he lost his father, who was praetor; and shortly after that event he married Cornelia, the daughter of Lucius Cinnus, the friend of Marius. This connection gave great credit to Sulla, who, having vainly endeavored to bring about a divorce, caused Cesar to be proscribed. Cesar, however, escaped. Sulla was at length induced to exempt Cesar from prosecution, though unwillingly, through those who interceded with him.

could see in Caesar the germ of many Mariuses. Having distinguished himself as an orator in the impeachment of Cornelius Dolabella, he speedily grew a public favourite, and became successively military tribune, quaestor, and edile. The profusion with which he lavished his liberality while in these offices, involved him very deeply in debt; but having obtained the government of Spain, he contrived to amass money sufficient for their discharge, though they are said to have exceeded a million and a half sterling; a fact which, as he held the government only a year, says but little for his scrupulousness as to the means he used for self-aggrandisement. Having united with Pompey and Crassus in the memorable coalition, called the first triumvirate, he became consul, and then obtained the government of Gaul, with the command of four legions. And it was that his genius had ample scope in his military career was rapid and brilliant. Germans, Helvetians, and Nervians succumbed to him; the German tribes were subdued, and Gaul was wholly subjected to Roman power. These transactions and invasions of Britain, are graphically related in his Commentaries. His successes, and the effect of exciting the jealousy of Pompey, who had influence enough in the senate to cause Caesar to be recalled from the government of Gaul. He refused to obey this order, and marched with his army into Italy, Pompey retiring into Greece. Having seized the public treasury, and commissioned Mark Antony to watch over his interests in Rome, he proceeded to Spain, where a large army remained in Pompey's front, which he defeated, and on his return to Rome was declared dictator. He followed Pompey into Greece, and defeated him in the memorable battle of Pharsalus, from which Pompey escaped only to be assassinated in Egypt. Having crushed every attempt at resistance on the part of Pompey and friends of Pompey, and having been honoured with four several triumphs, he declared perpetual dictator, a title which some of his friends wished to alter to that of king. And as the great body of the Roman people, dazzled by his military genius, and gratified by the liberality of his measures, were insensible of, or indifferent to, his insatiable thirst for domination, it is than probable that he would have become an absolute king, but that Brutus and Cassius repulcians penetrated his designs, and sternly resolved to make his life the price to the freedom of his country. Notwithstanding dark hints had been given to him of his danger, he attended a meeting of the senate without taking any measures for the safety of his person, and fell beneath the daggers of the conspirators on the Ides of March, in the year 43 B.C., and in the 56th of his age. One of the best English accounts of the death of Caesar is to be found in Merivale's "History of the Romans under the Empire," vol. ii. A "Vie de César," by the Marquis de Lafayette, (1865) appeared. It is in reality an eulogy for Napoleon's abolitionist.

AM, Sir JULIUS, an eminent English statesman, who filled various important offices

in the reigns of Queen Elizabeth and Kings James I. and Charles I. His last office was that of master of the rolls, which he held above 20 years. Born, 1667; died, 1836.

CAFFA, MELCHIORRE, an able sculptor, many of whose works adorned the churches of Rome. Died, 1687.

CAFFARELLI, GAETANO MAJORANO, a celebrated Italian singer. He studied under Porpora, who made him practise the elements of singing from a single sheet of music paper for five years. He was so well rewarded for his talent, that he purchased the dukedom of Santo Dorato. Died, 1783.

CAGLIARI, or CALIARI, PAOLO, better known as PAUL VERONESE, a celebrated Italian painter, was born at Verona in 1528 or 1532. After acquiring some reputation in his native district he went to Venice, where his style was much influenced by the study of Titian's works, whom he in some respects rivalled. He visited Rome, and was invited to Madrid, but declined to go. "The Marriage at Cana," now in the Louvre, is one of his most magnificent works. The National Gallery possesses four of his pictures; among them the "Adoration of the Magi," and "The Family of Darius at the feet of Alexander," both very celebrated, and of large size. Died, 1688.

CAGLIOSTRO, ALESSANDRO, Count of, the assumed title of the great impostor, whose real name was Joseph Balsamo. He was born at Palermo, and having lost his father at an early age, he was placed under the protection of the friars of Mercy, whose order he entered as a novice. Here he acquired the elements of chemistry and physic; but he speedily made his escape, and committed so many frauds in Palermo, that he was obliged to abscond. After visiting various parts, he at length reached Naples, where he married a woman of abandoned character, with whom he travelled to Spain, Portugal, and England, pretending to supernatural powers, and wringing considerable sums from those who became his dupes. In England this exemplary couple established an order of what they called Egyptian Masonry, and as their dupes were of the higher order, they easily obtained from them the loan of valuable jewels, on pretext of some intended ceremonials. With these they went off to Paris, and lived there in the utmost extravagance. The count, however, was thrown into the Bastille, on a charge of being concerned in the fraud of the celebrated diamond necklace of Marie Antoinette; and when he obtained his liberty, he was compelled to quit France. He then went to England again, and soon after to Italy, where his wife divulged some of his crimes to the Inquisition, and he was confined in the dungeons of the Castle of St Angelo, and died there in 1795.

CAGNOLA, LUIGI, Marquis of, Italian architect, was born of an illustrious family, at Milan, in 1762. He was educated at Rome and the university of Pavia, and renounced the profession of the law for which he was intended to follow the strong bent of his genius for architecture. He was a member of the state council, and was much engaged in political affairs. His most celebrated

works as architect are the Arco della Pace, commenced in 1807, and the Forta Ticinente at Milan, the campanile at Urgnano, completed in 1829, the church of Ghisalba, and a mausoleum for the Metterlich family. Cagnola was president of the Institution of Sciences and Arts at Milan, and a knight of the Iron Crown. Died, 1833.

CAILLE, NICOLAS LOUIS DE LA, an eminent French mathematician and astronomer, was born at Rumigny, and became assistant to Cassini at the Observatory of Paris, and afterwards professor of mathematics at the Collège Mazarin. In 1750 he visited the Cape of Good Hope for the purpose of studying the stars of the southern hemisphere, and he determined the position of 9000 previously unknown. The table of eclipses for 1800 years, inserted in the "Art de Vérifier les Dates," was calculated by La Caille. His principal works are, "Astronomiæ Fundamenta," "Cours de Mathématiques pures," "Cœlum Australe stellarum," &c. Born, 1713; died, 1762.

CAIUS, or GAIUS, an eminent Roman lawyer; author of a valuable body of legal institutes, which formed the basis of the more celebrated Institutes of Justinian. The work of Caius was long lost, but a mutilated manuscript copy was discovered in 1816 by Niebuhr, and by the patient labour of several German scholars the difficult task of deciphering it was accomplished, and the work was published in 1820. Caius is supposed to have lived in the latter half of the second century.

CALAME, ALEXANDRE, an eminent Swiss landscape-painter, was born at Neuchâtel, but settled early at Geneva, where he was a pupil of François Diday. Though of weak constitution, he was an indefatigable worker, and applied himself to the study of the magnificent scenery amidst which he lived, and the various and striking aspects of which he has so successfully represented in his paintings. Montblanc, the Jungfrau, Monte Rosa, Morning and Evening, Solitude, Pæstum, and a series of four pictures representing the four seasons of the year, are among his most admired works. Died in the prime of life at Mentone, 1864.

CALAMY, EDMUND, a presbyterian divine. He was educated at Cambridge, and obtained a living; but he resigned it and joined the Nonconformists, rather than comply with the order for reading the Book of Sports. He entered warmly into the religious disputes of the time, and was one of the writers of the treatise against episcopacy, entitled, from the initials of its authors, "Smectymnus." This was replied to by Bishop Hall in his "Defence of the Remonstrance," and the latter brought Milton into the field with "Animadversions upon the Remonstrant's Defence." A "Modest Confutation" by an anonymous writer gave occasion to Milton's vigorous "Apology for Smectymnus." Though Calamy preached before the House of Commons, and was one of the assembly of divines at Westminster, he opposed both the execution of Charles I. and the subsequent rule of Cromwell. At the death of the latter he actively aided in the restoration, and became chaplain to Charles II.

The Act of Uniformity caused him again to secede, and he died in retirement in 1666.

CALAMY, EDMUND, grandson of the above, and a dissenting minister of great note. He was a very voluminous writer. Besides numerous sermons and controversial tracts against Bechar, Hoadley, and others, he published an abridgment of "Baxter's History of his Life and Times," with numerous supplementary articles. Died, 1732.

CALANUS, an Indian philosopher, much esteemed by Alexander the Great. At the age of 73, being afflicted with a painful illness at Pasardaga, he caused a funeral pile to be erected, which he ascended with a composed countenance, and expired in the flames, saying, that having lost his health and seen Alexander, life had no more charms for him. B. C. 323.

CALAS, JEAN, a merchant of Toulouse, memorable as the victim of judicial murder. His eldest son committed suicide; and as he was known to be attached to the Roman Catholic faith, a rabble cry arose that he had on that account been murdered by his father. It was in vain that the unhappy parent pointed out the fact that he had a Roman Catholic servant who was uninjured. He was condemned literally without the shadow of a proof of his guilt, and put to death by being broken on the wheel. Voltaire generously pleaded the cause of the unhappy family, the process was revised, and the widow procured a pension. The unjust and ignominious death of Calas took place in 1762.

CALDARA, POLIDORO, or, as he is sometimes called, POLIDORO DA CARAVAGGIO, Italian painter, of the Lombard school, was born at Caravaggio in the Milanese, about 1495. Employed as a labourer in the Vatican, while Raphael was engaged there, his genius for painting showed itself, and attracted the attention of the great master. He worked afterwards at Naples and Messina, and was on the point of returning to Rome, when he was murdered by his servant, in 1543. One of his best works was a "Christ bearing his cross."

CALDAS, FRANCISCO JOSÉ, a distinguished Spanish naturalist. He was employed by the Congress of New Granada to complete the Flora of Bogota, when the disturbed state of public affairs interrupted the work; and this unfortunate gentleman, and his colleague, Don Lozano, having sided with the patriot party, were put to death by the Spanish general Murillo, in 1816.

CALDERON DE LA BARCA, PEDRO, a very distinguished Spanish dramatist, was born in 1600. He studied at the university of Salamanca, and after a residence at the court, he entered the army and served in Italy and Flanders. In 1640 he settled at Madrid, was made a knight of St James, and director of the court theatre. About 1645 he took holy orders, and was made a canon of Toledo. Calderon was a most prolific writer, beginning at the age of 14, and writing his last *auto* at 80. After he entered the church he wrote only sacred pieces, and became indifferent to his comedies and other secular works. He had a marvellously fertile imagination, crowds his plays with incidents

and action, clothes his thought with the richest and most glowing imagery, glorifies the chivalric and, above all, is animated with a religious fervour. But it is the religion of his country, of the Romish Church, as Sismondi pithily says, "the poet of the Inquisition." An admirer of his dramas are "Death," "The Secret in Word," "The Dawn in Blood," "The Dawn in Purgatory of St Patrick," &c. most celebrated of his "Auto pieces" is the "Devotion of the Cross" between 1680—1690.

CALDERWOOD, DAVID, a Scottish divine, born, 1575. His episcopacy caused him to be banished to Holland, where he went to reside in Holland, and he is celebrated "Altare D'Amsterdam" a detailed critical examination of the church of England. He returned to Scotland, and by his personal exertions greatly advanced the establishment of presbyterianism. He published a "History of the Church of Scotland," for which he collected a vast mass of materials, still kept in the library, Edinburgh. Died, 1655.

CALEPINO, AMBROGIO, an Italian lexicographer and philologist; author of a valuable polygot dictionary, revised and useful works. Died 1597.

CALETTI, GIUSEPPE, surname CALETTI, an admirable Italian painter. His principal picture is "St Mark preaching to the Church," in the church of Benedetto at Ferrara. In his works he so closely imitated Titian, that connoisseurs can scarcely distinguish them.

CALHOUN, JOHN CALDWELL, an American statesman, was born in Virginia, in 1782. After pursuing his studies at Yale College and Litchfield, he was elected to the bar of his native State, and to the legislature the next year. In 1811 was sent to Congress, where he attained great eminence as a speaker. He was made secretary of the State of Louisiana in 1825 he was elected president of the United States in 1844, and in 1843 secretary of state, and again a senator. In all these positions that arose during this time he was "the great statesman of the active part," generally on the conservative side; "and the character which he attained for him a high rank as a thinker and an orator. Died 1858.

CALDASA, one of the greatest poets of whose life we know almost nothing, uncertain whether he lived or 180 A. D. His principal work, "The Fall of Man," a drama, first made known by the translation published by Juan Joaze in 1789. It at once attracted the admiration, and was translated into the principal European languages. A manuscript of the original in the same form was discovered by a scholar in 1835, of which several editions have since appeared. A translation by Prof. Monier was published in 1855. Among the

and action, clothes his thought and sentiment in the richest and most exuberant language, glorifies the chivalric sense of honour, and, above all, is animated and inspired by religion. But it is the religion of his age, of his country, of the Romish church. He was, as Sismondi pithily says, "the true poet of the Inquisition." Among the most admired of his dramas are, "Love after Death," "The Secret in Words," "The Constant Prince," "The Dawn in Copacavana," "Purgatory of St Patrick," &c. One of the most celebrated of his "Autos" or sacred pieces is the "Devotion of the Cross." Died between 1680—1690.

CALDERWOOD, DAVID, a Scotch presbyterian divine, born, 1376. His opposition to episcopacy caused him to be banished, and he went to reside in Holland, where he published his celebrated "Altare Damascenum," a detailed critical examination of the system of the church of England. He subsequently returned to Scotland, and by his writings and personal exertions greatly aided in the establishment of presbyterianism. He published a "History of the Church of Scotland," for which he collected an immense mass of materials, still kept in the Advocates' Library, Edinburgh. Died, 1651.

CALEPINO, AMBROGIO, an Italian grammarian and philologist; author of a very valuable polyglot dictionary, and other learned and useful works. Died, 1510.

CALETTI, GIUSEPPE, surnamed IL CREMONENSE, an admirable Italian painter. His principal picture is "St Mark with the doctors of the Church," in the church of St Benedetto at Ferrara. In some of his works he so closely imitated Titian, that connoisseurs can scarcely distinguish them. Died, 1660.

CALHOUN, JOHN CALDWELL, an eminent American statesman, was born in South Carolina, in 1782. After pursuing his studies at Yale College and Litchfield, he was admitted to the bar of his native State in 1807, and elected to the legislature the next year, and in 1811 was sent to Congress, where he soon gained great eminence as a speaker. In 1812 he was made secretary of war under President Monroe: in 1825 he was elected president of the United States, in 1831 senator, in 1843 secretary of state, and in 1845 again a senator. In all the political questions that arose during this time he took the active part, "generally on the side of extreme statesrights;" and the character of his speeches attained for him a high reputation as a thinker and an orator. Died, 1850.

CALPURNIA, one of the greatest poets of antiquity, of whose life we know almost nothing. It is uncertain whether he lived about 55 or 160 A. D. His principal poem is "Mantilla," a drama, first made known in Europe by the translation published by Sir John Jones in 1789. It at once excited general admiration, and was translated into the principal European languages. An imperfect manuscript of the original text in the same form was discovered by Brookfield in 1835, of which several editions and translations have since appeared. An English translation by Prof. Monier Williams was published in 1855. Among the other

works of this poet are the "Meghaduta," or "Messenger of Clouds," and the "Vikramurvasi." The poems of Calidasa contain charming descriptions of nature, and his "tenderness of feeling and richness of creative fancy entitle him," says Alexander von Humboldt, "to a high place in the ranks of the poets of all nations."

CALIGULA, CAIUS CÆSAR AUGUSTUS GERMANICUS, Roman emperor, began his reign, A. D. 37, with every promising appearance of becoming the real father and friend of his people; but at the end of eight months he was seized with a fever, which appears to have permanently deranged his intellect, for his disposition totally changed, and he committed the most atrocious acts of impiety, cruelty, and folly. He caused sacrifices to be offered to himself, his wife, and his favourite horse; indulged in the most frightful immoralities; murdered many of his subjects with his own hands; had others put to the rack while he was enjoying his meals, or beheld in his presence. One of his hugest follies was the erection of a bridge of boats across the sea between Baia and Puteoli.

Its completion was celebrated by a great banquet, at the close of which he had a number of the guests, friends, and enemies, flung into the sea. He projected expeditions to Gaul, Germany, and Britain, and having reached the sea he bid his soldiers gather shells for spoils, and then led them back to Rome. But in the midst of his enormities he was assassinated by a tribune of the people, as he came out of the theatre, A. D. 41, in the 29th year of his age.

CALIPPUS, a Greek mathematician of the 4th century B. C., famous for having corrected the cycle of 19 years, invented by Meton, to show the correspondence of time in the revolutions of the sun and moon.

CALCOTT, JOHN WALL, an eminent English composer. He was born at Kensington, and was intended for the medical profession, but soon abandoned it for music. The Nobleman's Catch-club having proposed a prize, he sent in a hundred compositions! It was then ruled that no one should send more than three compositions of a sort; and Calcott accordingly, in 1789, sent twelve, four of which gained the four medals! For many years he carried off at least one annual prize, until 1793, when the prizes ceased to be given. In 1790 he was made Mus. D. of Oxford, and the same year became a pupil of Haydn, who was then in England. The last fifteen years of his life, with a brief interval, were clouded by insanity. He wrote, besides glees, catches, and other compositions, a "Musical Grammar," and made some progress with a "Musical Dictionary." Born, 1766; died, 1821.

CALCOTT, Sir AUGUSTUS WALL, R. A., an eminent English landscape painter, was born at Kensington in 1779, his eldest brother being Dr Calcott, the celebrated musical composer. Originally a chorister in Westminster Abbey, he was induced to try his hand at portrait painting; and such was his success that he immediately followed the new pursuit to which his inclination pointed. Year after year his reputation increased; and from 1799, when he first submitted a

ing Don Carlos to succeed his brother, he hastened, while Ferdinand lay on his death-bed, to court his favour. But his scheme failing, through the energetic conduct of the Princess Louisa of Naples, he was arrested on his flight to France. By bribing the soldiers he escaped, and spent the rest of his life in France. Died at Toulouse, 1842.

CALONNE, CHARLES ALEXANDRE DE, an eminent French statesman, who succeeded Necker as comptroller-general of the finances in 1783; but after four years of incessant endeavours at financial reform, he would do nothing but advise an assembly of the notables, which accordingly met in February, 1787. The alarming financial statement which he then made led to his dismissal, and he was obliged to retire to England. He wrote "Observations sur les finances," "Tableau de l'Europe en Novembre," &c. Born, 1734; died, 1802.

CALPURNIUS, or **CALPURNIUS**, a Sicilian Latin poet of the 3rd century. Seven of his eclogues are to be found in the "Poeta Latini Minores," published at Leyden in 1731, and are clever imitations of the eclogues of Virgil.

CALVART, DENIS, an eminent Dutch painter, who had the honour of giving the earliest instructions to Guido, Albano, and Caracciolo. His *chef-d'œuvre* is the picture of St Michael, in the church of St Peter Bologna. Died, 1619.

CALVERT, GEORGE, first Lord Baltimore, English statesman, founder of the State Maryland. He was for some time secretary of state to James I., but was obliged to resign this office on becoming a Roman Catholic. He did not lose the favour of the king, however; but obtained a grant of a valuable tract of country in North America. He died before the charter was completed, and it was granted to his son Cecil. Died,

CALVERT, CECIL, second Lord Baltimore, of the preceding, was invested, by royal charter, on the death of his father, with full power over the colony of Maryland. The settlement took place two years later, in 1634, and though Lord Baltimore did not himself join the colonists, he carried out his father's plans and wishes; established freedom of worship and representative government; and died in 1676.

CALVI, LAZZARO, an able Italian painter, studied under Perino del Vaga. He was of so jealous a disposition, that he pointed an artist who rivalled him; and, on seeing Luca Cambiaso's portion of the decoration of a church preferred to his own, abandoned his profession, and did not return to it for 20 years. He is said to have died to be 105 years old. Died, 1608.

CALVIN (CAUVIN), JEAN, the great reformer, founder and head of the Genevese theology, was born at Noyon, in 1509. He was called for the church and sent to study at Bourges, and there he became first acquainted with the doctrines of the reformation. He studied law at the universities of Orleans and Bourges, and in 1532 returned to Geneva, a decided convert to the reformed religion. Compelled to fly from Paris in 1533, at various wanderings he found a pro-

sector in Margaret, queen of Navarre. In the following year he went to Basel, and there completed and published his great work, the "Institutes of the Christian Religion." After a short stay at Ferrara he went in 1538 to Geneva, where reform had just been established, and there, on the pressing entreaties of Farel and his friends, he remained. In 1538 Calvin and Farel were expelled from Geneva, in consequence of some changes introduced by them, and Calvin went first to Berne and then to Strasburg. He was however recalled three years later, and soon proposed and got established his system of church government. He sought to regulate manners, as well as faith, and rigorously censured and punished all who resisted his authority. He applied himself also to reform the civil government; established an academy; fostered literature and science, and made Geneva "the metropolis of the reformed faith." His personal character was spotless, but austere; his labours as pastor, lecturer on theology, councillor, author, and correspondent were immense and incessant. The terrible rigour of his ecclesiastical rule was most strikingly shown in his treatment of Servetus, who for his theological opinions was burnt at Geneva in 1553. Calvin was not present at the famous conference of Poissy, but instructed Beza and other reformers who took part in it. It was after that conference that the differences between the views of Luther and Calvin became manifest, and that the term *Calvinist* began to be used. The great distinguishing features of Calvinism are the doctrines of absolute predestination, of the spiritual presence only in the eucharist, and the independence of the church. John Knox was the friend of Calvin, and introduced his system in Scotland. Besides the "Institutes" Calvin published commentaries on the Bible, sermons, and various tracts. There is also a valuable collection of his letters. The "Institutes," written in Latin, were translated into French and almost all European languages, and have left such wide and deep impress on society as few books beside have done. Calvin died at Geneva, May 27, 1564. Among recent works illustrating the life of this great theologian are Dyer's "Life of Calvin," Bungener's "Life, Labours, and Writings of Calvin," a new edition of his "Letters" with notes by Bonnet, translated by Constable, and Merle D'Aubigne's "History of the Reformation in Europe in the time of Calvin," in 3 vols. 8vo.

CALVISIUS, SETHUS, a German chronologist and writer on music, born 1556. He became professor of mathematics at Wittenberg, and was author of "Opus Chronologicum," a work much praised by Scaliger and other learned men; a treatise on music; a work against the Gregorian calendar, &c. He also composed several psalms and other pieces of church music. Died, 1615.

CAMBACERÈS, JEAN JACQUES REGIS DE, duke of Parma, &c., raised to distinction by the French revolution, was born at Montpellier in 1753, brought up to the legal profession, and by his talents soon attracted the

received his early education at Christ's Hospital, and subsequently studied at Oxford, where he took his B.A. degree. After filling the situations of second and chief master of Westminster School, his proficiency in antiquarian lore procured him the honourable and lucrative office of Clarendon King-at-arms. In addition to his great and well-known work, the "Britannia," he published "Annals of Queen Elizabeth," a Greek grammar, &c. Camden's "Britannia" was written in Latin, and at first appeared in one volume of moderate size. By the labours of translators and editors it was subsequently enlarged to four volumes folio. Camden was buried in Westminster Abbey, where a monument was erected to him. Born, 1551; died, 1623.

CAMERARIUS, JOACHIM, friend and biographer of Melancthon, and one of the greatest scholars of his age, was born at Hamburg in 1500. He took an active part in the great affairs of the reformation, and long held the office of rector of the university of Leipsic. His most important work is the "Vita Philippi Melancthonis." Died at Leipsic, in 1574.

CAMERON, RICHARD, a Scottish preacher and martyr of the seventeenth century, was born in Fife, and after being schoolmaster in his native parish, became a very zealous preacher among the persecuted Presbyterians. He retired about 1677 to Holland, but returned in 1680, and resumed his preaching in defiance of the law and the persecutors. In June of that year he set himself at the head of a little band, bare and armed, and declared war on the king. A price was set on his head and on the heads of his followers, and in a month they were defeated and captured at Airdsmea. Cameron was slain, but his head and hands were taken and fixed up on a public gibbet at Edinburgh. A monument marks the spot where he fell at Airdsmea.

CAMILLUS, MARCUS FURIUS, an early Roman hero, whose story is semi-mythical, lived in the 4th century B. C. He was sometimes appointed military tribune, and sometimes dictator. Among the exploits attributed to him are the capture of Veii after a long siege, victories over the Faliscians, the Fidenates, and the Volscians, and the deliverance of Rome from the Gauls under Brennus. After the capture of Veii, he was charged with peculation, and banished, but was soon recalled. He was the measure of the patrician order, and opposed the measures of Licinius Stolo. Died by the violence, B. C. 365.

CAMOENS, LUIS DE, the celebrated Portuguese poet, was born at Lisbon in 1517. He was educated at the university of Coimbra, and after an exile to Santarem, returned by his falling in love with a lady of higher rank than his own, he joined the king and fought against the Moors. Indignant at receiving no recompense on his return, he went to India, and there took part in several military expeditions, enjoying the opportunities thus afforded of acquiring acquaintance with nature. He got into prison several times, and was banished to Mozambique; and in 1569 he returned to

Portugal. After ten years of neglect and want, he died in a hospital at Lisbon, in 1579. His great poem is the "Lusiad," in which he celebrates the principal persons and events of Portuguese History. His other works are very numerous and in various styles: sonnets, elegies, odes, &c. The Lusiad has been translated into English by Mickle and others.

CAMPAN, Madame DE, distinguished no less for her amiaolity than her acquirements, was born at Paris, 1752. Attached to the court in the capacity of companion to the French princesses, she was particularly distinguished by Marie Antoinette, whose good and evil fortune she shared with affecting fidelity and devotion. After the revolution she established a school at St Germain; she was subsequently appointed by Napoleon head of the school for the daughters of officers whom he had enrolled in the Legion of Honour: but after the restoration of the Bourbons, this establishment was dissolved, and Madame de Campan's relationship to Marshal Ney involved her in various unpleasant investigations which embittered her life. She died in 1822, leaving behind her many educational works (of which her "Education des Filles" deserves particular notice), and memoirs, rich in sketches of the private life of her former mistress and friend.

CAMPANELLA, TOMASO, an Italian philosopher, was born at Stilo in Calabria, in 1568. He entered the Dominican order, studied philosophy, and became an opponent of the scholastic system. Persecution drove him from place to place, and in 1599, on a charge of conspiracy against the Spanish government of Naples, he was imprisoned, and was kept in confinement, more or less rigid, till 1626. After a short residence at Rome, he went to Paris, where he was protected by Cardinal Richelieu, and died there in 1639. Campanella was the contemporary of Lord Bacon, and aimed like him at a reform of philosophy; asserting the necessity of fresh study of nature. His chief works are "Prodromus Philosophiæ Instaurandæ," "De Sensu Rerum et Magia," "Atheismus triumphatus," "Monarchia Messias Jeal," and "Civitas Soli," the last being a sketch of an ideal society in the kingdom of God; "De Monarchia Hispanica Discursus," &c.

CAMPBELL, ARCHIBALD, marquis of Argyll, a zealous partisan of the Covenanters, and the opponent of Montrose. He was born in 1598, was made a lord of session in 1634, and succeeded to his father's title four years later. Called to London with other Scotch nobles the same year, 1638, he had plainly counselled the abolition of episcopacy in Scotland. Charles I. gave him the title of marquis in 1641. Argyll was unsuccessful in his military measures in the civil war, and gave up his command. He acquiesced in the Protectorate of Cromwell, and for this, at the restoration of Charles II., he was committed to the Tower. After remaining a prisoner about five months, he was sent to Scotland, tried for high treason, and beheaded in 1661.

CAMPBELL, ARCHIBALD, earl of Argyll, son of the above, and a most zealous and gallant adherent of the royal cause; so much

so, indeed, that he was exempted from the general pardon issued by Cromwell, in 1654. After the restoration he became one of the lords of council, and unsuccessfully opposed the passing of the Test Act. Condemned to death for treason, he escaped to Holland, but on his return at the head of a body of troops he was captured, conveyed to Edinburgh, and beheaded in 1685.

CAMPBELL, JOHN, duke of Argyll and of Greenwich, was the grandson of the preceding, and was distinguished equally as a soldier and a statesman. He succeeded his father Archibald in the dukedom of Argyll in 1703, and the same year was appointed a lord of session. He distinguished himself in the campaigns of Marlborough, was brigadier-general at the battle of Ramillies, and commanded with brilliant effect at Oudenarde and Malplaquet. In 1711 he was sent to command the English forces in Spain, filling at the same time the office of ambassador. To these services he added that of beating the Earl of Mar at Sheriffmuir in 1715, and compelling the Pretender to quit the kingdom. These actions, and his exertions in bringing about the union, were rewarded with the Garter and the English dukedom of Greenwich. He also held several offices, of which Sir R. Walpole deprived him, but which he regained on that minister's removal. Born, 1678; died, 1743.

CAMPBELL, GEORGE, D.D., a Scotch divine, principal of Marischal College, Aberdeen, and professor of divinity there; author of the "Philosophy of Rhetoric," once a standard work,—a "Dissertation on Miracles," in reply to Hume, "Lectures on Ecclesiastical History," &c. Born, 1709; died, 1796.

CAMPBELL, JOHN, a clever and industrious Scotch writer; author of the "Military History of Prince Eugene and the Duke of Marlborough," a "Political Survey of Britain," the "Lives of the Admirals," which had a great run and was translated into German; he had a large share also in the preparation of the "Biographia Britannica." Died, 1775.

CAMPBELL, THOMAS, LL.D., the eminent poet, was the son of a Scotch merchant, who gave him an excellent education at Glasgow, where he greatly distinguished himself. A translation of his from Aristophanes was pronounced to be the finest college exercise his judges had ever seen; and, when little more than thirteen, he won a bursary in his college from a competitor nearly double his age! Leaving Glasgow at an early age, he settled in Edinburgh as a private tutor; and here, when only in his twenty-second year, he published "The Pleasures of Hope"—one of the most elegant poems in our language. The success of this work was such as to allow of his making a tour on the Continent, whence he gave the world those splendid lyrics, "Ye Mariners of England," "The Exile of Erin," and "Hohenlinden." At the battle of Hohenlinden he was so near, that he could see the returning conquerors wiping their blood-stained sabres upon their horses' manes; a circumstance to which, in after years, he was often heard to allude. His poem, however, is by no means a true

picture of the battle it celebrates. Soon after his return from the Continent, Campbell married and settled in London, employing himself not only in occasional composition of poetry, but also in the hard literary drudgery of mere compilation. To such works he could not judiciously put his name, but from 1803 to 1809 his labours in this way were as intense and extensive as they were creditable to his love of independence. He now published "Geotrude of Wyoming," "The Battle of the Baltic," "Lord Ullin's Daughter," and "O'Connor's Child;" and he was engaged by Mr Murray to write the well-known "Critical Essays and Specimens." Subsequently he edited the New Monthly and the Metropolitan Magazines; and published "Theodorie," a poem, besides editing some reprints and compilations. Early in his career he was relieved from absolute want by the kindness of Charles James Fox, who put him on the pension list for £200 per annum. His health had for some years been but feeble, and in 1843 he retired to Boulogne, where he died: but his remains were conveyed to England and interred in Westminster Abbey. Died, June 15, 1844, aged 67.

CAMPBELL, JOHN, Lord, lord chief justice and lord chancellor of England, was born near Cupar, in 1779. He studied at the university of St Andrews, and in 1800 came to London to study law at Lincoln's inn. He also obtained employment as reporter and theatrical critic for the *Morning Chronicle*. He was called to the bar in 1806, and with little scrupulousness from delicacy pushed his way into a good practice, both on the Oxford circuit and in London. In 1830 he entered parliament, was made solicitor-general in 1832, and attorney-general two years later. At the same time he was returned to parliament for Edinburgh. He introduced several measures of law-reform, and was engaged in the important cases of Rex v. Lord Cardigan, Hansard v. Stockdale, and Norton v. Lord Melbourne. In 1841 he was raised to the peerage and to the chancellorship of Ireland, but only remained in office a few months. He held the chancellorship of the duchy of Lancaster from 1846 to 1850, when he was made lord chief justice of the Queen's Bench. Three years afterwards he was appointed lord chancellor. Lord Campbell was admitted to be a sound lawyer, an effective advocate, and an able judge. He was ambitious of literary distinction, but his works in that field have received a less favourable verdict. His "Lives of the Chancellors" and "Lives of the Chief Justices" gained the popularity at which their author aimed, but by qualities which drew down on him severe criticism: superficial knowledge, inaccuracies, plagiarisms, bad taste, unmanly levity—these are the characteristics which have been charged on Lord Campbell as a biographer. Died suddenly at Kenington, June, 1861.

CAMPEGGIO, LORENZO, born 1474, was originally a professor of civil law at Bologna, but on the death of his wife he entered the church, became a bishop, and at length a cardinal. In 1519 he was sent as legate

England, and while here was bishop of Salisbury. After being some time in Germany as legate, and opposing Lutheranism, he returned to England to decide on the great divorce between Henry VIII. and of Aragon, on which occasion Henry without being any more the queen. He appears to have had considerable learning and natural talents, and he reckoned Erasmus and other scholars among his friends. DIED. CAMPER, PETER, a Dutch naturalist, born at Leyden in 1731, studied at the university, travelled in the principal countries of Europe, and in London in 1748, attained great reputation, and became professor of philosophy and medicine at the universities of Amsterdam, and Groningen. Several important discoveries in natural history were made by him as a foreign associate of the Royal Society of Sciences, and a member of the Royal Society of London. He was engaged in affairs of state as member of the council of state, and of the assembly of Friesland. A collected edition of his works appeared in 1803. DIED. CAMPHUYSEN, DYRE, a Dutch landscape painter of the 17th century, celebrated for the excellence of his pictures.

CAMPI, BERNARDINO, an Italian painter, born at Cremona, 1522. He was called Campi, studied the works of Raphael, and wrote a treatise on the principles of painting. Died, 1592.—GIULIO CAMPI, an Italian painter, also a native of Cremona, born about 1500. Taught by his father and afterwards by Giulio Campi, he became a distinguished master of the Venetian school of painters of his name are distinguished in the annals of Italian art.

CAMPLAN, EDMUND, an English painter, was educated at Christ's Hospital, and was educated at Oxford; but on a visit to France he was induced to turn Papist, and went to Douay. He wrote "The Universal," and a dramatic piece, "The Ambrosia." Being called to Rome in 1711, to come to England, he was discovered, and executed in 1681.

CAMPOMANES, PEDRO RODRIGUEZ, a celebrated Spanish statesman, and profound views in political economy. He was appointed minister of the council of Castile in 1765, and afterwards made minister of the treasury and many useful works, and died in 1780. CUCINI, VICENZO, an Italian painter, was born at Rome in 1675. At first he made himself known as a copyist, but afterwards obtained many honours as a historical painter in the classical style. He was elected to the Academy of St Luke, and his art-collections of the Vatican.

CANALI, or CANAL, ANTONIO, an Italian painter, whose excellence in architectural views. His works gained him a great reputation, and he is said to have been the

England, and while here was nominated bishop of Salisbury. After being for some time in Germany as legation, and employed in opposing Lutheranism, he again came to England to decide on the great affair of the divorce between Henry VIII. and Catherine of Aragon, on which occasion he offended Henry without being of any real service to the queen. He appears to have been a man of considerable learning and natural ability; and he reckoned Erasmus and other eminent scholars among his friends. Died, 1539.

CAMPER, PETER, a Dutch physician and naturalist, born at Leyden in 1722. He studied at the university, travelled through the principal countries of Europe, visiting London in 1748, attained great reputation, and became professor of philosophy, anatomy, and medicine at the universities of Franeker, Amsterdam, and Groningen. He made several important discoveries in anatomy; was a foreign associate of the French Academy of Sciences, and a member of the Royal Society of London. He also took part in affairs of state as member of the council of state, and of the assembly of the states of Friesland. A collected edition of his works appeared in 1803. Died, 1789.

CANFRUYSSEN, DYRK, a Dutch landscape painter of the 17th century; distinguished for the excellence of his moonlight scenes.

CANPI, BERNARDINO, an Italian painter, born at Cremona, 1522. He was a pupil of Giulio Campi, studied the works of Raphael, and wrote a treatise on the principles of his art. Died, 1592.—**GIULIO CAMPI**, another Italian painter, also a native of Cremona, born about 1500. Taught at first by his father and afterwards by Giulio Romano, became a distinguished master.—Several other painters of this name are distinguished in the annals of Italian art.

CAMPAN, EDMUND, an English Jesuit. He was educated at Christ's Hospital, and resided at Oxford; but on a visit to Ireland was induced to turn Papist, and entered the Jesuit at Douay. He wrote "Chronologia Universalis," and a drama, called "The Star and Ambrosia." Being chosen by Charles VIII. to come to England as a secretary, he was discovered, tried for treason, and executed in 1581.

CAMONES, PEDRO RODRIGUEZ, a celebrated Spanish statesman, who held profound views in political economy, and was, in 1768, the appointment of advocate to the council of Castile. He afterwards made minister of state; and published many useful works, and died in 1802.

CANUCCINI, VICENZO, an eminent Italian painter, was born at Rome about 1650. At first he made himself known as a copyist, but afterwards obtained great reputation and many honours as a historical painter in the classical style. He was long secretary of the Academy of St Luke, and keeper of the art-collections of the Vatican. Died, 1730.

CANALI, or CANAL, ANTONIO, a Venetian painter, whose excellence was particularly in architectural views. His views on the Grand Canal gained him a great reputation. He is said to have been the first to

make the camera obscura useful in painting. Born, 1697; died, 1768.

CANCELLIERI, FRANCESCO, an Italian archaeologist, was born at Rome in 1751, and educated by the Jesuits. After publishing several learned works he became secretary to the Cardinal Leo Antonelli, and in 1802 director of the printing-press of the Propaganda. He was present with Cardinal Antonelli at the coronation of Napoleon in 1804, and became acquainted with many eminent literary men of Paris. His works are very numerous, and treat entirely of antiquarian subjects. Died at Rome, 1826.

CANDOLLE, AUGUSTIN P. DE, whose knowledge of botany has placed him in the same rank with Linnæus, was born at Geneva, 1748. Having finished his studies at Paris, he soon attracted the notice of Cuvier and Lamarck, whom he aided in various scientific researches; and in 1808 he was appointed to the chair of botany in Montpellier. Obligated to quit France for having taken office under Napoleon during the Hundred Days, he found refuge in his native city, where a chair of natural history was expressly instituted for him, and where he continued, for many years, to extend the boundaries of his favourite science by his lectures and publications. His chief works are a "Théorie Élémentaire de Botanique," "Regni Vegetabilis Systema Naturale," "L'Organographie et la Physiologie Végétales," &c.; in all of which he adopts what is called the natural arrangement. Died, 1841.

CANGE, CHARLES DU FRESNE DU. (DU-CANGE.)

CANNING, GEORGE, a highly gifted orator and distinguished politician, was born in London, April 11, 1770. His father, who was an Irishman, was a man of considerable literary abilities; but he died, broken-hearted, on the very day that his infant son was one year old. His widow married an actor; he also died, and she then became the wife of a linen-draper of Exeter. But she had the happiness to live to see the success of her son, and to receive from him at all times the tenderest marks of filial affection. George was first placed at Hyde Abbey School, Winchester, and afterwards at Eton, where he greatly distinguished himself as a scholar, and formed many connections which were of great service to him in his after-life. While at Eton, he contributed to the "Microcosm," a periodical work conducted by the senior scholars. At Oxford he also distinguished himself, and proceeded thence to Lincoln's Inn. Being introduced to the House of Commons by Mr Pitt, he abandoned the bar, and devoted himself wholly to politics. His strenuous and able support of the minister was rewarded in 1796 with an under-secretaryship of state; and in the year 1800 he was placed in affluence by his marriage with Miss Joanna Scott, the daughter of General Scott, with a fortune of £100,000. He made an expert use of his talents as a poet and political writer in the articles he contributed to the "Anti-Jacobin," in which the Whigs were wittily, unmercifully, and in some cases unjustifiably, held up to popular

waited to Germany in 1798, to France in 1802 and 1809, and again as papal ambassador in 1815 for the restoration to Italy of the ancient works of art which had been carried off by the French, on which last occasion he also visited England to see the Elgin Marbles, his life is marked by no external vicissitudes. He was admitted to the French Institute, but refused the invitations of Napoleon to settle at Paris. The title of marquis of Ischia was conferred on him, but he did not assume it. Canova acquired an immense fortune by his works, and made the most generous use of it. He died at Venice in 1822. A Pealant Magdalene, Hebe, the Graces, Eadymlon, statues of Napoleon and his mother Letizia, and the great monument to Maria Christina, archduchess of Austria, at Vienna, are among his most highly admired works.

CANSTEIN, CARL HILDEBRAND VON, a German nobleman, distinguished himself by an improvement in printing, a analogous stereotyping. He used Bibles and Testaments to be printed from outline pages, the ornaments being sold as low as fourpence each. How the baren's pages were formed does not clearly appear. Died, 1719.

CANTACUZENE, Prince, a Greek patriot, descended from the famous Eastern Emperor, John, and one of the first to join the Sultan in 1821, when declaring for the liberty of Greece, afterwards re-established.

CANTACUZENE, JOANNES, emperor of the East. He was an able and vigilant statesman, and having rendered important services to the "grand domestic" to Andronicus III., he succeeded in 1341, on the death of Andronicus, the late of emperor, acting as the colleague of the young Paleologus, or as regent during his minority. Five years later he had him crowned and made war on the young emperor. He became master of Constantinople, peace was made, and he endeavoured to heal the wounds which five years of civil war had inflicted on the state; but the jealousy of Paleologus, the rebellion of his own and other vassals, induced him to resign the crown and retire to a monastery on Mount Athos, where he employed himself in literary labours. He died in 1411, being more than 100 years old.

CANTARINI, SIMONE, surnamed IL PENNINO, an Italian painter, born, 1612. His father was a painter, to whom he became a formidable rival. He lived at Rome, Genoa, and Mantua in succession, and died there, probably by poison. Cantarini was a good colourist, and especially excellent in his portraits. He was also a good poet. But he was enormously vain and quarrelsome, and quarrelled with everybody.

CANTEMIR, DEMETRIUS, a Moldavian prince; author of "The System of the Moldavian Religion," a "History of the Rise and Fall of the Ottoman Empire," &c. Died, 1714.

CANTERBURY, CHARLES MANNERS, Viscount,—eldest son of the archbishop of Canterbury,—was born in 1780; received his education at Eton and Trinity College, Cambridge; and, being destined for the law, was called to the bar in

1805. He entered parliament in 1807 as member for Knaresborough, which borough he represented till 1832, when he was elected for the university of Cambridge. In 1809 he was appointed to the office of judge advocate (Colchester) and on Mr Abbot (afterwards Lord Colchester) retiring from the speakership of the House of Commons in 1817, Mr Manners Sutton was chosen to succeed him. To a commanding presence he added urbanity of manners, particularly when addressing his political opponents; and he conscientiously discharged the important duties of his office. Having taken part in the formation of the Peel ministry in 1834, the adherents of Lord Melbourne put Mr Abercrombie in nomination for the speakership, and he was chosen (Feb. 19th, 1835) by a majority of 10. Mr Manners Sutton was shortly after called to the upper house by the titles of Viscount Canterbury and Baron Bottesford. He died July 21, 1845, aged 65.

CANTON, JOHN, M.A., an ingenious English mechanic and experimentalist. The chief of his discoveries was that of the means of making artificial magnets, for which the Royal Society gave him its gold medal, and elected him a member. He contributed some valuable papers to the Transactions of the Royal Society, but published no separate work. Born, 1718; died, 1772.

CANUTE, the Dane, king of England, was the son and successor of Sweyn, king of Denmark, with whom he invaded England in 1013. The next year, on the death of Sweyn, he was chosen king by the fleet. He contested the kingdom with Edmund Ironside, and on his death became sole king, and to strengthen his title, married Emma, widow of Ethelred II. His rule, at first severe, was afterwards mild and just. He several times visited Denmark; made a pilgrimage to Rome in 1027, founded or restored religious houses; and established just laws. Died, 1035.

CAPEL, ARTHUR, Lord, a distinguished royalist, who, in 1648, in conjunction with the earl of Norwich, Sir Charles Lucas, and others, gallantly defended Colchester against the parliamentary troops. They at length surrendered, when two of the leaders, Lucas and Lisic, were shot by sentence of court-martial, and Lord Capel was reserved with the earl of Norwich for trial. The trial took place early in the following year, and Lord Capel was beheaded at London in March 1649. He was author of a moral work, entitled "Daily Meditations."

CAPEL, ARTHUR, earl of Essex, son of the above. His own merit and the memory of his father procured him the honourable employments of ambassador to Denmark and lord-lieutenant of Ireland. He subsequently, for a short time, held the office of first lord of the treasury; but lost his favour at court by voting for the exclusion of the duke of York. Being accused of participation in the Rye-house plot, he was committed to the Tower, where he cut his throat, or, as was suspected, was murdered, in 1683.

CAPELL, EDWARD, a dramatic critic; editor of a volume of ancient poetry, entitled "Prousions," &c.; but chiefly known for his edition of Shakespeare, a task which is said

CARADOC, was king of the ancient British tribe inhabiting South Wales, called the *Sikors*. He gallantly resisted the Romans for a considerable time, but was at length defeated by Ostorius, A. D. 60. When taken prisoner and carried before the Emperor Claudius, his dignified behaviour and noble speech procured him his liberty; but what afterwards became of him is not recorded.

CARADOC, a British historian; reputed author of "Brut y Tywysogion, or Chronicle of the Princes of Wales." Several MS. copies of it remain; and one of them has been continued as far as 1280. This Chronicle is included in the "Monumenta Historica Britannica," vol. i. Died about 1166.

CARAGLIO, GIANGIACOMO, a celebrated Italian engraver, was born at Verona about 1500, and studied under Marcantonio Rome. He distinguished himself as an engraver of medals and gems, as well as copper-plate, and was called to the court of Sigismund, king of Poland. His prints after the works of Michael Angelo, Raphael, Titian, and other great masters. Died Parma, 1570.

CARASUSIUS, a native of Gaul, who had the command of a Roman fleet against the Franks and Saxons in 286, and who the same year, suspected of treachery, crossed over to Britain, and assumed the title of emperor. He defeated Maximian, and was acknowledged associate in the empire. He held his command in Britain till 294, when he was murdered by Allectus.

CARAVAGGIO, MICHELANGELO DA, an Italian painter, was born in 1569. He followed through great difficulties his natural bent for art, and attained distinction as a portraitist and a close copyist of nature. In his temper and habits he was coarse and violent, and was continually getting into trouble through his quarrelsome propensities.

He was head of the school of so-called *Caravaggisti*. Among his best works are the "Composition of Christ," at Rome, the "Cardinals," and "Christ and the two Disciples in Emmaus." The last is in the National Gallery. Died in want and misery, 1609.

CARAVAGGIO, POLIDORO DA. [CAL-

CARDAN, JEROME, Italian physician and mathematician, was born and educated at Pavia. He held successively the chairs of Mathematics or medicine at Pavia, Milan, Bologna, and in 1571 settled at Rome, where he received a pension from the pope. He had extraordinary reputation as a physician, and was called to Scotland to attend the Archbishop of St Andrews. He made important discoveries in algebra; astrology, and pretended to a gift of prophecy, and wrote an immense number of books.

Among them are an account of himself, "De Vita propria;" "Ars Magna," his treatise on algebra; "De Rerum Varietate;" "De Rerum Subtilitate," &c. An interesting account of this singular man was published in London a few years ago. Died about

CARDI DA CIGOLI, LODOVICO, an eminent Italian painter, and a reformer who had the imitators of Michael Angelo. His style was to a great extent formed

after the style of Correggio and that of the Carracci. The masterpiece of his pencil, St Peter Healing the Cripple, painted for St Peter's at Rome, was unfortunately destroyed by the damp. Cigoli painted many fine altar-pieces. He wrote a treatise on Perspective. Died, 1613.

CARDON, ANTOINE, an eminent Belgian engraver, born in 1739; died, 1822.

CARDON, ANTOINE, son of the preceding, was also an engraver of very considerable talent, many of whose works are well known and esteemed. Born at Brussels, in 1772; died in London, 1813.

CARDUCCIO, or CARDUCHO, BARTOLOMEO, a celebrated painter, was born at Florence in 1560. He was a pupil of Zuccheri, with whom he went in 1585 to Spain, and was employed in the Escorial under Philip II. and Philip III. He painted in fresco and in oil. His chef-d'œuvre is the "Descent from the Cross," in the church of St Philip, Madrid. Died in Spain, 1610.

CARDUCCIO, or CARDUCHO, VINCENZO, painter, brother of the preceding, was born at Florence in 1568. He accompanied his brother to Madrid, became painter to Philip III. and Philip IV., executed numerous works at Madrid, Toledo, and other cities of Spain, and completed the series begun by his brother at the chateau of Pardo, and died in 1636. He was author of "Dialogos sobre la Pintura."

CARDWELL, EDWARD, D.D., a learned divine and ecclesiastical historian, was born at Blackburn in Lancashire in 1787. He studied at Oxford university, became a fellow of Brasenose College in 1809, and five years later one of the university examiners. He was appointed Camden professor of history in 1826, and succeeded Dr Whately as principal of St Alban's Hall in 1831. His good business habits acquired for him great influence in the government of the university, in which he filled several responsible offices. He was also private secretary to three successive chancellors. Among his numerous and important works are, an edition of the "Coinage of the Greeks and Romans;" a students edition of the Greek Testament; a critical edition of the "History of the Jewish War," by Josephus; and a series of learned works on the history of the church of England, forming parts of a great projected work based on Wilkins' "Concilia Magnæ Britannicæ." The works published include the "History of Conferences and other Proceedings connected with the Revision of the Book of Common Prayer from 1558 to 1690;" the "Documentary Annals of the Reformed Church of England, from 1546 to 1716;" "Synodalia," and the "Reformatio Legum Ecclesiasticarum," &c. Dr Cardwell was the personal friend of Sir Robert Peel and Mr Gladstone and a member of the Society of Antiquaries. Died at Oxford, in May, 1863.

CAREW, THOMAS, an English poet. His masque, "Cælium Britannicum," was performed before the court at Whitehall in 1633, and greatly admired. Died, 1639.

CAREW, RICHARD, an English writer, chiefly on topography; author of "A Survey of Cornwall," &c. Died, 1620.]

CAREW, Sir GEORGE, brother of the above. He was much employed by Queen Elizabeth, who knighted him. He wrote an account of France and the court of Henry IV., which was not published till above a century after his death. Died, 1614.

CAREY, HENRY, earl of Monmouth, an English nobleman, distinguished for his scholarship, and especially for his acquaintance with modern languages. He translated numerous works from the French and the Italian, of which the most important are Biondi's "History of the Civil Wars of England," and Paul Paruta's "History of Venice." Died, 1661.

CAREY, HENRY, an English musician and poet. He chiefly excelled in ballads, one of which, "Sally in our Alley," was praised by Addison for its words, and by the celebrated Geminiani for its music. He was the author of several burlesque and other dramatic pieces highly popular in their day. Died, by his own hand, 1748.

CAREY, GEORGE SAVILE, son of the above. He inherited much of his father's peculiar talent; and, though intended for the business of a printer, he speedily abandoned it for the stage. His songs, chiefly patriotic ones, were inferior to his father's both in poetry and music. Besides these and some farces, he wrote "A Rural Ramble," "Balnea," being sketches of the English watering-places, &c. Died, 1807.

CAREY, WILLIAM, a celebrated Baptist missionary, was born at Paulerspury, Northamptonshire, in 1761. His father kept a small school in the village, and apprenticed his son to a shoemaker at Hackleton, where his earnest inquiries upon religious subjects attracted the notice, and soon obtained him the friendship of the Rev. Thomas Scott, of Ravenstone. He joined a congregation of Baptists, and in his 20th year began to preach, which he continued for two years, when he was publicly baptized in the river Nen. In 1787 he was intrusted with the charge of a congregation at Leicester, where, persevering in his benevolent object of converting the heathen (respecting which he had before published his opinions), he induced other ministers to join him; and, in 1792, they formed themselves into a Baptist Missionary Society at Kettering. William Carey was nominated to go upon their first mission, and India was selected as the most desirable field for the commencement of the work. He arrived in Bengal in 1794, but had the ill fortune to lose all his money and effects by the sinking of a boat in the river Hooghly. After patiently enduring severe toils and privations for three years (during which period he acquired the Bengalee), Mr Carey preached publicly; but as the East India Company were opposed to his object of forming an establishment inland, in 1799 he proceeded to the Danish settlement of Serampore. This little missionary settlement, consisting of seven preachers only, with their wives and families, rapidly increased; a school was opened, and type being sent from England, a translation of the Scriptures was printed in the Bengalee language. Mr Carey, having made himself a complete master of the native languages,

was, in 1801, appointed by the governor professor of Sanscrit and other Oriental languages at the college of Fort William, Calcutta. He had many difficulties to contend with, both from the prejudices of the natives, and the political views of influential men at home. But he persevered, and, in 1805, a diploma of D.D. was transmitted to him from one of the American universities. He never relaxed in the work he had begun, but translated the Scriptures into several of the Indian languages, and lived to witness the success of his ardent exertions for their dissemination among the native tribes. Died, 1834.

CAREZ, JOSEPH, a French printer, who made some important improvements in the art of stereotyping. Died, 1801.

CARLETON, Sir DUDLEY, Lord Dechester, an English statesman during the reigns of James I. and Charles I. He was a man of great ability; but, like Laud and other statesmen of that time, he had a notorious fondness for arbitrary government. As an author he is chiefly known by his work entitled, "Letters to and from Sir Dudley Carleton during his embassy to England, from January, 1616, to December, 1628." These letters, which were edited by Lord Hardwicke, contain much valuable information, though they also display much prejudice. Died, 1632.

CARLETON, Sir GUY, Lord Dorchester, a military officer of great courage and skill. Having passed through the subaltern ranks, he, in 1762, became a colonel, and distinguished himself very greatly at the siege of the Havannah. In 1772 he was raised to the rank of major-general, and intrusted with the important office of governor of Quebec; in which situation he defended Canada against Generals Amherst and Montgomery, whose army he routed. The last-named general being slain, this General Carleton was knighted, and promoted to the rank of lieutenant-general. He next succeeded General Clinton as commander-in-chief in America; and, at the conclusion of the war there, was raised to the peerage, and made governor of Quebec, New Brunswick, and Nova Scotia. Died, 1808.

CARLI, GIAN RINALDO, an Italian archaeologist, numismatist, and economist, was born at Capo d'Istria in 1720. He held for several years a professorship of astronomy and navigation at Padua, and afterwards became president of the council of commerce at Milan. In 1771 he was placed at the head of the council of finance. He rendered important services to his country in commerce, navigation, and finance; and induced the Emperor Joseph to abolish the Inquisition at Milan. His principal works are "Delle Monete e della Instituzioni della Zecche d'Italia," in 7 vols. 4to, and "Anche chità Italiane," 5 vols. 4to. He wrote many other works, and died in 1795.

CARLISLE, GEORGE WILLIAM FREDERICK HOWARD, Earl of, lord-lieutenant of Ireland, was born at London in 1802. He was educated at Eton and Oxford, and returned to parliament for the family seat at Morpeth, was afterwards member for York-

ire, and supported Earl Grey in the Reform Bill, ending with the Reform Bill. Morpeth (the courtesy title by which he was first known) represented the county of Northumberland from 1833 to 1841, and again from 1841 to 1844, and succeeded to the peerage in 1844. He was chief secretary for Ireland from 1835 to 1841; afterwards for a short time chancellor of the duchy of Cornwall, and in 1835 lord-lieutenant of Ireland. He held that office for three years, and was called to it on the fall of Lord Melbourne's ministry. His fascinating manner and interest in all philanthropic projects rendered him very popular. His health failed, and he retired in August, 1864, and died at Howarth in the following December. **CARLISLE, Sir ANTHONY**, a distinguished anatomist and physiologist, was born at Stillington, Durham, in 1791. He commenced his professional studies at the University of Edinburgh, and was under the care of an uncle, at whose house he was transferred to Mr Green, fourth surgeon in the city of Durham, where he proceeded to London, and became a pupil of Mr H. Watson, a surgeon at St. Bartholomew's Hospital, and one of the examiners of Surgeons' Hall, where he first ranked in his profession. In 1797 he was employed in a hospital, and succeeded in curing a man dying, Mr Carlisle succeeded in curing a patient in a hospital, and speedily distinguished himself, as much by his invariable success, as by his suffering poor as by his surgical skill. He was appointed in his principality, and in the avowal of his opinion, he was a senior surgeon to the West-India Hospital, one of the council and members of the Royal College of Surgeons, &c. Sir Anthony contributed to the Transactions of various learned societies, and also published several works on professional subjects. Died, Nov. 2, 1840.

CARLISLE, NICHOLAS, an eminent philosopher, brother of the preceding, was born at Carlisle in 1771. After receiving what he considered a "humble education," he entered the civil service of the East India Company, and gradually amassed a considerable fortune, which enabled him to be of great assistance to his brother, the eminent surgeon, during the latter part of his career. In 1807 he was appointed secretary to the Society of Antiquaries, and his competitor being the late Sir John Lubbock, and in this capacity he found leisure to perform many laborious and useful works. He was appointed assistant librarian to the British Museum in 1828, and was a member of the gentlemen of the peerage; and in testimony of the esteem in which he was held, he received the honor of knighthood from Austria, in 1828, and from Hanover, and from Oxford, in 1835. He was also a degree of D.C.L., in 1835. D.

CARLISLE, JOHN, son of Peplin the Sheriff of the Franks, and younger brother of the Great Charlemagne, was born in 754, and was crowned with his brother at St Denis in 768. He succeeded his father Stephen II. in 754, and made peace with the King of Austria, and his father's kingdom of Suabia, in 768. He was crowned a second time in the same year. Suspicion a

ire, and supported Earl Grey in the contest ending with the Reform Act. Lord Erpeth (the courtesy title by which the Earl was first known) represented the West Riding from 1833 to 1841, and again in 1846. He succeeded to the peerage two years later. He was chief secretary for Ireland from 1835 to 1841; afterwards for several years chancellor of the duchy of Lancaster, and in 1855 lord-leutenant of Ireland. He held that office for three years, and was called to it on the fall of Lord Derby's ministry. His fascinating manners and his interest in all philanthropic projects made him very popular. Ill health compelled him to retire in August, 1864, and he died at Castle Howard in the following December.

CARLISLE, Sir **ANTHONY**, a distinguished anatomist and physiologist, was born at Stillington, Durham, in 1768, and commenced his professional studies at York, under the care of an uncle, at whose death he was transferred to Mr Green, founder of the hospital in the city of Durham. He then proceeded to London, and became a frequent pupil of Mr H. Watson, a surgeon of Westminster Hospital, and one of the court examiners of Surgeons' Hall, a man of first rank in his profession. In 1793, that year his uncle dying, Mr Carlisle succeeded him in the hospital, and speedily distinguished himself, as much by his invariable humanity as by his suffering poor as by his surgical skill. He was soon brought up in his principles, and was held in the avowal of his opinions. He was senior surgeon to the Westminster Hospital, one of the council and court examiners of the Royal College of Surgeons, &c. Sir Anthony contributed many papers to the Transactions of various learned societies, and also published several interesting works on professional subjects. Died, Nov. 2, 1840.

CARLISLE, **NICHOLAS**, an eminent anti-quearian brother of the preceding, was born in 1771. After receiving what he himself called a "humble education," he entered the civil service of the East India Company, and gradually amassed a considerable sum, which enabled him to be of great assistance to his brother, the eminent surgeon, at the close of his career. In 1807 he was secretary to the Society of Antiquaries, and in this capacity he found leisure to do many laborious and useful works. He was appointed assistant librarian of the Ashmolean House; in 1828 he was nominated one of the gentlemen of the privy chamber; and in testimony of the estimation in which he was held, he received the knight-hood from Austria, Denmark, Hanover, and from Oxford the honorary degree of D.C.L., in 1835. Died,

CARLISLE, **MAN**, son of Pepin the Short, of the Franks, and younger brother of the Great Charlemagne, was born and reared with his brother at St Denis near Paris. He succeeded his father in the kingdom of Austrasia, Sunbia, and was crowned a second time in the same year. Suspicion and

discord prevailed between him and Charles throughout his short reign. Died, 771. His widow took refuge, with her sons, at the court of Desiderius, king of the Lombards.

CARLOMAN, king of France, was son of Louis the Stammerer, and with his brother Louis III. succeeded his father in 879. Early in the following year a partition of the monarchy was agreed to, and Carloman had for his share Burgundy, Aquitaine, and the marquisate of Toulouse. The brothers however remained united in action, fought together against Boson, who had usurped Provence, took part in the siege of Vienna held by Ermengarde, wife of Boson, and afterwards encountered the Northmen. Died, 884.

CARLOS, **DON**, son of Philip II. of Spain, was born at Valladolid in 1645. He was hereditary presumptive to the throne, but early showed a very haughty and violent temper, and was an object of aversion to his father, and of rigorous treatment to which he was subject, in the government, he was suspected of heretical leanings and of an intention to join the revolted Flemings. Philip, with Count Lerma and other courtiers, seized the prince in his bed, took possession of his papers, and had him imprisoned. He died, whether a natural death, or by violence, or by poison, is not known, about six months after, in July, 1668. Two months later died the Queen Elizabeth, married to his father after being betrothed to Don Carlos. There appears to be no basis of fact for the romances that have been written on the fate of this prince.

CARLOS, **DON**, Pretender to the crown of Spain, was the second son of Charles IV. and brother of Ferdinand VII. He was compelled to join with Ferdinand in renouncing all claims to the throne in favour of Napoleon, and was held prisoner in France from 1808 till 1813. An insurrection in favour of Don Carlos broke out in 1825, but was soon suppressed. On the death of Ferdinand VII., in 1833, a civil war began between the Carlists and the supporters of the Queen Isabella; whose legal title depended on the question whether the Salic law was in force in Spain or not. The war was carried on with great cruelty, and only ended in 1839, with the defeat of the Carlists, to which a British auxiliary force contributed, and the flight of Don Carlos to France. He kept up the pretence of kingship for a time, then renounced his claim in favour of his son, the Count of Montemolin, and died at Trieste, in 1855.

CARLYLE, **ALEXANDER**, an eminent Scotch Presbyterian minister of the 18th century, was born in 1722, was educated at Glasgow, Edinburgh, and Leyden, and became minister of Inveresk in 1747. He had witnessed the Porteous riots, served as a volunteer in the rebellion of 1745, and was present at the battle of Prestonpans; of which parish his father was minister. He led an active social life, enjoying intercourse with the most eminent Scotchmen of his day, and with some eminent Englishmen. He was the friend of David Hume, Adam Smith, Home, author of "Douglas," Blair,

author of the Lectures on Rhetoric, and other literary men. He got into trouble with the Presbytery for assisting at the first private rehearsal of "Douglas," and published two sarcastic pamphlets on the matter. From his noble head and countenance he acquired the name of JUPITER CARLYLE, and sat as model for Jupiter, to Gavin Hamilton. In his old age he wrote an "Autobiography," which remained unpublished till 1860. It is a racy volume, full of most vivid pictures of Scottish life, character, and manners, with notices of many remarkable persons, English as well as Scotch. Died, 1803.

CARLYLE, JOSEPH DACRE, an English divine and linguist. He accompanied Lord Elgin on his embassy to Constantinople, and took that opportunity to explore various parts of Asia Minor, Egypt, &c. His specimens of Arabic poetry, and a learned summary of the affairs of Egypt, from the year 971 to the year 1453, were published during his lifetime, and procured him considerable celebrity. After his death a volume appeared of his "Poems suggested by Scenes in Asia Minor, Syria, and Greece." Died, 1804.

CARMARVON, HENRY JOHN GEORGE HERBERT, third Earl of, eminent as an author, a traveller, and a politician, was born in 1800. After finishing his school education at Eton, he repaired to Christchurch, Oxford, and when his university career terminated, he entered upon a well-devised plan of travel, extending over Italy, the Peninsula, parts of Africa, and Greece; and the results of which he from time to time gave to the world in works abounding in animated and picturesque descriptions. His most popular work was his "Portugal and Gallicia;" but his "Moor," a poem, and "Don Pedro," a tragedy, evince poetic powers of no mean order. In 1830 Lord Carmarvon, who down to this period had borne the title of Lord Porehester, was returned to the House of Commons, where he made a distinguished *début*; but his father's death, which took place in 1833, led to his removal to the House of Lords. He took an active part in all the proceedings of the upper house, making occasional trips to the Continent in pursuit of health. Died, Nov. 10, 1849.

CARNE, JOHN, miscellaneous writer, was born in Cornwall, 1789. On the completion of his studies he travelled in the East, and we have the fruits of his travels in the volume, entitled "Letters from the East," which originally appeared in the New Monthly Magazine. Subsequently he published "Recollections of the East," "Letters from Switzerland and Italy," "Lives of the most Eminent Missionaries," &c. Died, April, 1844, aged 55.

CARNEADES, an eminent Greek philosopher. He was a pupil of Diogenes the Stoic, and, subsequently, of Egesinus. He was the founder of the New Academy or School of Philosophy at Athens, and opposed the doctrine of the Stoics. The Romans having imposed a fine on Athens, Carneades, with Diogenes and Critolaus, was sent to plead against it. He did so successfully, and so great a sensation did his eloquence make, that Cato feared its effect on the Roman

youth, and urged the senate to expel him from the city. Died, 129, B. C.

CARNOT, LAZARE NICOLAS MARQUE DE, a French mathematician, and minister under Napoleon, was born in Bruggundy, in 1753, entered the corps of engineers, and received promotion from the prince of Condé; yet at the commencement of the revolution he became a decided partisan of the republic, and, as a member of the Convention, voted for the death of the king. During the Reign of Terror he took an active part in public affairs; and on the establishment of the Executive Directory he became one of its five members. In this office he remained till 1797, when, with Barthélemy and others, he was accused as a royalist, and exiled. Buonaparte, on becoming first consul, recalled Carnot, and made him minister of war. He so steadily opposed the establishment of the consulate for life, that he was at length compelled to resign. He subsequently was a member of the tribunate, and on its suppression retired to private life. In 1807 he received a pension of 10,000 francs. Onco more, in 1814, he accepted service, and was appointed governor of Antwerp. In the following year, during the Hundred Days, he was minister of the Interior; and after the fall of Napoleon, he retired, first to Warsaw, then to Berlin, and finally settled at Magdeburg. There, in the pursuit of science, he passed his last years. As a writer, Carnot is very favourably known by his "Réflexions sur la Méthode de Calcul Infinitesimal," "La Géométrie Position," and other scientific treatises. Died, 1823.

CARO, ANNBALAE, an Italian poet. His parents were very poor, but in early life had the good fortune to be patronized by Pietro Ludovico Farnese. Subsequently he became secretary to the cardinal Alessandro Farnese, who literally heaped preferment upon him. His original works, both prose and verse, are of a high order; but his merit is in his translations from the Greek and Latin. Among these, he obtained the highest reputation by his translation of *Æneid*. Born, 1507; died, 1566.

CAROLINE, AMELIA ELIZABETH, wife of George IV., king of Great Britain and Hanover, second daughter of Duke Charles William Ferdinand of Brunswick (who was fatally wounded in the battle of Asserott) of the Princess Augusta of England, sister of George III. She was born May 17th, 1744, married the Prince of Wales in 1758, and gave birth to the Princess Charlotte the year following; but was scarcely recovered from her confinement, when her husband abandoned her without assigning any reason. The princess retired to a mansion at Blackheath, where she devoted herself to the arts and sciences, and dispensed on a considerable part of her income in acts of benevolence. Meanwhile, the friends of the prince accused her of illicit connections, and even asserted that she was the mother of a boy whom she had adopted, and that her father was Sir Sidney Smith. This led to a "delicate investigation," and on the evidence being submitted to George III., he declared himself satisfied of her innocence

and received her with marks of favour. In 1813 the quarrel with France, and in July, 1814, the princess's permission to go to Brunswick, and to make the tour of Italy and quitting England, she assumed the Countess of Wolfenbuttel; and William, took into her service a man named Bartolomeo Bergami, and his sister one of her maids of honour, who resided at Como; but visited Tunis, Malta, Athens, Constantinople, and lastly Jerusalem.

She exhibited extraordinary munificence to the conventual fathers at Rome; and took upon herself to reform the order of knighthood, entitled the St. Caroline, of which she made Bergami grand master. Her industry in elevating Bergami became a general conversation; and consequently she secretly sent out to make inquiries, and furnish evidence on which to proceed. While absent from England, she deprived her of her friends, and the duke of Kent; of her daughter, Princess Charlotte; and her brother-in-law, the duke of Brunswick, who fell at the battle of Waterloo, previous to the battle of Waterloo, on the prince of Wales ascending the throne, January 29, 1820, the minister gave her an income of £50,000 sterling. The queen of England, and all the courtiers, were appertaining thereto, and all should continue to reside abroad. Her proposal she rejected, accused him of a conspiracy against her, and returned to England, cheered by the enthusiasm of nine-tenths of the people.

She was publicly accused by the minister, Perceval, of adultery; and, after a trial, on which the queen was acquitted, Mr. (afterwards Lord) Brougham, by a series of pains and penalties was made to read a third reading by a trifling majority. The government thought it prudent to draw it. After this outrage, the queen's sequestration, preparations were made for her coronation. The queen demurred with him; and this time she requested to be present at the coronation, but was repeatedly turned away from the Westminister Abbey and the procession. The spirit of Caroline was exhausted by her last effort; and scarcely had she elapsed when she was taken sick, and died on the 7th of August, 1817. She expressed a wish that she should be buried in England, her remains were carried to Brunswick, and her funeral passed through London, a great part took place between the life and death were conducting it, and the people were so much affected, that the queen was guilty, the evidence being most convincing and satisfactory; but seldom has a more many pleas to urge in extenuation of crime, if really guilty.

SPENCER, Dr. LANT, an eminent medical writer, was born at Kildern, Ireland. After finishing his education under the care of Mr. Pearsall, a relation of his, whose zeal in behalf of the Doctor was well known, he was sent in 1797

and received her with marks of his especial favour. In 1813 the quarrel was renewed, and in July, 1814, the princess obtained permission to go to Brunswick, and, afterwards, to make the tour of Italy and Greece. On quitting England, she assumed the title of Countess of Wolfenbuttel; and, while at Milan, took into her service an Italian, named Bartolomeo Bergami, and appointed his sister one of her maids of honour. For a time she resided at Como; but afterwards visited Tunis, Malta, Athens, Constantinople, Naples, and lastly Jerusalem. While there she exhibited extraordinary munificence in gifts to the conventual fathers as well as to the poor; and took upon herself to found a new order of knighthood, entitled the order of St Caroline, of which she constituted Bergami grand master. Her indiscretion in thus elevating Bergami became a theme of general conversation; and commissioners were secretly sent out to make inquiries and furnish evidence on which to obtain a divorce. While absent from England, death deprived her of her friends, George III. and the duke of Kent; of her daughter, the princess Charlotte; and her brother, the duke of Brunswick, who fell at Ligny, two days previous to the battle of Waterloo. On the prince of Wales ascending the throne, January 29, 1820, the ministry offered her an income of £50,000 sterling, the gift of queen of England, and all the dignities appertaining thereto, on condition that she should continue to reside abroad. This proposal she rejected, accused her enemies of conspiracy against her, and returned to England, cheered by the enthusiastic welcome of nine-tenths of the people. She was publicly accused by the minister, Lord Liverpool, of adultery; and, after a protracted trial, on which the queen was defended by Mr (afterwards Lord) Brougham, the verdict of pains and penalties was passed on her at the third reading by a trifling majority; the government thought it prudent to withdraw it. After this outrage on public decency, preparations were made for the queen's coronation. The queen demanded to be crowned with him; and this being refused, she requested to be present at the ceremony, but was repeatedly turned from the doors of Westminster Abbey and refused admission. The spirit of Caroline sunk under this last effort; and scarcely had a fortnight elapsed when she was taken suddenly ill, and died on the 7th of August, 1821. She expressed a wish that she should be buried in England, her remains were conveyed to Brunswick. On the funeral procession passing through London, a violent contest took place between the life-guards, who were conducting it, and the populace. To such extent the queen was guilty no one can say, the evidence being most conflicting and unsatisfactory; but seldom has a woman so many pleas to urge in extenuation of her crime, if really guilty.

CARPENTER, Dr LANE, an eminent theological writer, was born at Kiddersminster. After finishing his education under the care of Mr Pearsall, a relation of his father, whose zeal in behalf of the Dissenters was well known, he was sent in 1797 to the

academy of Northampton, with a view to the ministry, and on finishing his studies at Glasgow university, he became assistant in a school at Birmingham, subsequently one of the librarians of the Athæneum at Liverpool, where he formed an intimacy with Roscoe, Dr Currie, and other eminent men, and in 1805 one of the ministers of the Unitarian congregation at Exeter. In 1817 he undertook the care of the Unitarian church at Bristol; and here he laboured till 1826, when his health began to decline, and he endeavoured to regain it by travelling in England and on the Continent. He returned to Bristol in 1829, and continued assiduously to promote every good and useful work; but in 1839 his health once more gave way, and while sailing from Naples to Leghorn, whither he had gone for recreation, he fell overboard and was drowned, 5th April, 1840. His body was found near the site of the ancient Antium, and was interred there. Dr Carpenter was a most industrious writer. Besides publishing numerous sermons and polemical pamphlets, he contributed largely to Rees's Cyclopædia and many periodicals; and his substantial works, published both during his life and since his death, are masterpieces of style and argument. His "Apostolic Harmony of the Gospels" is referred to as an authority even by his theological opponents.

CARPENTER, RICHARD, an English divine of the 17th century. He was originally educated for the established church, but seceded from it, and became a Romish priest. He recanted, and obtained a vicarage in Sussex; but at the outbreak of the civil war he quitted England, and again professed himself a Catholic. The restoration caused him to return to England, and turn Protestant. He changed once more, and died a Catholic. The writings of this unprincipled man are, "Experience, History, and Divinity;" and "The Pragmatical Jesuit," &c.

CARPI, UGO DA, an Italian painter and wood engraver of the 16th century, to whom is generally attributed the invention of the kind of engraving called by the Italians "chiaroscuro." The facts and dates of his life are unknown, and his engravings, chiefly after Raphael and Parmegiano, are few in number and difficult to identify.

CARPI, GIROLAMO DA, an Italian painter of the 16th century, and a very successful imitator of Correggio. Died at Ferrara, 1556.

CARPINI, JOHANNES DE PLANO, a Dominican friar of the 13th century, and one of the embassy from Pope Innocent IV. to the descendants of Zenghis Khan, sent to prevent them from invading Europe, and to induce them rather to turn their arms against the Saracens and Turks.

CARPOCRATES, a Gnostic teacher of the 2nd century, who denied the divine nature of Christ, and made light of morality. His followers were accused of lewd and immoral practices, but Dr Lardner thinks the accusation to have arisen rather from enmity than fact.

CARPZOV, the name of a German family, many of whose members distinguished themselves as jurists, theologians, &c., in the 17th and 18th centuries. Among them were,

JOHANN BENEDICT, born at Leipzig in 1639, who became professor of theology and Hebrew at the university of his native town, and died in 1699. He left various treatises on sacred philology.—**JOHANN GOTTLEB**, nephew of the preceding, born at Dresden in 1679. He was author of "Critica Sacra," introductory to the historical books of the Old Testament, and to the New Testament, &c. Died, 1767.—**JOHANN BENEDICT**, philologist, born at Leipzig in 1720. He was professor of philosophy at Leipzig, and afterwards of ancient literature at Helmstadt. He wrote many works and published several translations of Greek authors. Died, 1803.

CARR, WILLIAM HOLWELL, an English clergyman, and a distinguished patron of the fine arts. He spent large sums in pictures, which he bequeathed to the National Gallery. Died, 1830.

CARRANZA, BARTOLOMEO DE, a Spanish Dominican. He distinguished himself at the council of Trent, and had the honour to accompany Philip II. of Spain to England, where he laboured so zealously to establish Popery, that the king made him archbishop of Toledo. Here, however, his success ended; for being accused of heresy, he was imprisoned at Rome for ten years, and subsequently sent to a monastery for the remainder of his life. His chief works are, "Summa Concllorum" and a "Treatise on the Residence of Bishops." Died, 1576.

CARREL, ARMAND, chief editor of the "National," and a distinguished political writer. He was born at Rouen, in 1801, and served for some years in the army. At the age of 24 he settled at Paris, and applied himself to literature, at first in the service of the historian Thierry, and afterwards as miscellaneous writer and journalist. He became one of the founders and joint editor of the "National" in 1830. Died, of a wound he received in a duel with M. Girardin a few days previous, July 24, 1836.

CARENNO DE MIRANDA, DON JUAN, an eminent Spanish painter, patronized by Philip IV. In colouring and tenderness of feeling he surpasses all his countrymen, with the exception of Murillo. Died, 1685.

CARRERAS, JOSE MIGUEL, JUAN, and LUIS; three brothers, distinguished in the revolution of Chilli; pre-eminent for patriotism, talents, and purity of character; yet, by adverse fortune, they all perished at Mendoza, under the merciless rule of O'Higgins and San Martin. The latter sent their aged father an account of the expenses of the execution of Juan and Luis, who suffered in 1818; with an order for its immediate payment. He paid it, and, two days afterwards, expired of a broken heart. Don Jose Miguel met his unhappy fate in 1822, when endeavouring to take advantage of a popular movement in his favour, he was surrounded, made prisoner, and executed.

CARRIER, JEAN BAPTISTE, one of the most bloodthirsty actors in the French revolution, was born near Aurillac in 1756. He was sent on a mission to La Vendée, where he caused thousands of victims, men, women, and children, to be drowned, beheaded, or shot, the ordinary mode of execution being too tardy for him. Fifteen thousand per-

sons perished in this way; the banks of the Loire were strewn with the dead bodies, and the water was so polluted, that it was prohibited to drink it. On the fall of the party called the Mountain, he was tried before the revolutionary tribunal, and condemned to the guillotine, in 1794.

CARSTARES, WILLIAM, a Scotch divine, but of more influence as a politician, was born at Cathcart, in 1649. In order to remove him from the danger of being led into politics, his friends sent him from Edinburgh, where he had commenced his studies, to Utrecht. Becoming known to the prince of Orange he soon obtained his confidence, and was much employed by him in forwarding his intentions upon England. Being privy to the Rye-house plot he was apprehended, and put to the torture, which he bore with much fortitude, but at length was induced to make a statement, which was afterwards used against his friend, Mr. Baillie. On his liberation he returned to Holland, where the prince received him very cordially, and made him his chaplain. He accompanied William to England, and though nominally only his chaplain, was in fact one of the most influential and able of his state advisers. Under Queen Anne he had no political power, but she caused him to be made principal of the university of Edinburgh, in which important post he gave satisfaction equally to her Majesty and to the Scottish public. By the house of Hanover he was equally patronized, and he continued a favourite till his death, which took place, in his 66th year, in 1715.

CARSTENS, ASMUS JACOB, a Danish painter of very considerable merit. His subjects, nearly all taken from the classic authors, exhibit gracefulness of attitude with vigorous expression. One of his best works is the "Fall of the Angels," which contains above 200 figures. Born, 1734; died, 1798.

CARTE, SAMUEL, an English divine and antiquary; author of a valuable and elaborate work, entitled "Tabula Chronologica archiepiscopatum et episcopatum in Anglia et Wallia," &c. Died, 1740.

CARTE, THOMAS, son of the above, and like him an antiquary, historian, and divine. On the accession of George I., feeling that he could not conscientiously take the required oaths, he abandoned his profession of a clergyman; and during the rebellion of 1715 he was so strongly suspected, that a warrant was issued against him, but he was safely concealed in the house of a clergyman in Warwickshire. He was subsequently involved in political strife, but he escaped by timely flight. As an author he is chiefly known by his "History of England." Born, 1686; died, 1754.

CARTER, ELIZABETH, an eminent classical scholar, translator, and miscellaneous writer, the daughter of a clergyman residing at Deal, in Kent. Under the instruction of her father she became an admirable Greek and Latin scholar, and was well skilled in German, French, Spanish, Italian, Portuguese, Hebrew, and Arabic. She translated Crousaz's critique on Pope's Essay on Man, and Algarotti's Explanation of Newton's Philo-

sophy, and Epictetus. These works were during her life; and, after her death, six volumes of her correspondence were published, which are calculated to give a higher opinion of her intellect than any more learned and masculine person. This accomplished woman was the daughter of John, Bishop Butler the "Analogy," Sir Joshua Reynolds, and other distinguished men. Born, 1686; aged 89.

CARTEL, THOMAS, an eminent musician and composer of vocal music. His compositions are the songs, "O! 'till thou gang wi' me!" and "Four guns, my hearts of oak." Died, 1780.

CARTERET, JOHN, earl of Granville, an eminent English statesman, was born in 1680. Immediately on attaining majority, he took his seat in the House of Commons. Warmly supporting the Hanoverian succession, he was noticed by George II. employed by him in various posts until he succeeded Craggs as secretary of state. In 1724 he was appointed lord of the Treasury, and though he had some notable natives some offence by proposing the printer of the Drapier's (Swift's) works on the whole a popular vice-regent of George II. He again held a distinguished post, and with even more success than before. On his retirement he became a strong opponent of the Hanoverian succession, and when he had succeeded in that statesman, and procuring of himself, he supported measures which he had formerly condemned. He was employed as secretary of state, and as principal of the council, in which office he was marked by much vacillation, and retained court favour to the last.

CARTERET, PHILIP, a distinguished officer of the 18th century. In command of the South Seas, in 1769, he discovered the islands, some of which were named by Hawkesworth, in the introduction of a narrative of Cook's voyage.

CARTIER, JACQUES, a French navigator of the 16th century, who made several voyages of discovery on the coasts of North America. He was the first Frenchman to set foot on the soil of Canada, and planted the French flag there. The accounts of his voyages. In 1534-35-36, have just been published at Paris (1865).

CARTWRIGHT, JOHN, an English statesman, distinguished for his zealous exertions in political reform. Early in life he entered the navy, but subsequently became a member of the Nottingham militia; in consequence he was generally known as Cartwright, though he had resided for many years previous to his political career. As an amateur politician he was in the public for many years, both in England and in favour of American independence, and by his public addresses in favour of a radical reform of the government he displayed great firmness and courage. He was on all occasions when assembled to advocate and petition for civil rights. He died in 1824, aged 70.

ophy, and Epictetus. These works appeared during her life; and, after her decease, six volumes of her correspondence were published, which are calculated to give even a higher opinion of her intellect than her more learned and masculine performances. This accomplished woman was the friend of Dr Johnson, Bishop Butler the author of the "Analogy," Sir Joshua Reynolds, and other distinguished men. Born, 1717; died, 1786; aged 69.

CARTEER, THOMAS, an eminent Irish musician and composer of vocal music. Among his compositions are the songs, "Oh, Nannie, wilt thou gang wi' me!" and "Stand to our guns, my hearts of oak." Died, 1804.

CARTERET, JOHN, earl of Granville, an eminent English statesman, was born in 1680. Immediately on attaining his majority, he took his seat in the House of Lords. Warmly supporting the Hanoverian succession, he was noticed by George I., and employed by him in various posts until 1721, when he succeeded Craggs as secretary of state. In 1724 he was appointed lord-lieutenant of Ireland; and though he gave the stable natives some offence by prosecuting a printer of the Drapier's (Swift's) letters, was on the whole a popular viceroi. In the reign of George II. he again held that distinguished post, and with even more success than before. On his return to England he became a strong opponent of Walpole; and when he had succeeded in removing that statesman, and procuring office for himself, he supported measures similar to those he had formerly condemn'd. But though as secretary of state, and as president of the council, in which office he died, his conduct was marked by much vacillation, and obtained court favour to the last. Died,

CARTERET, PHILIP, a distinguished navigator of the 18th century. In conjunction with Captain Wallis he commanded an expedition to the South Seas, in 1768. Of his discoveries they made, some account is given by Hawkesworth, in the introduction to his narrative of Cook's voyage.

CARTIER, JACQUES, a French navigator of the 16th century, who made several voyages of discovery on the coasts of North America. He was the first Frenchman who set foot on the soil of Canada, and planted the French flag there. The accounts of his voyages, in 1534-35-36, have just been published at Paris (1866).

CARTWRIGHT, JOHN, an English gentleman, distinguished for his zealous attachment to political reform. Early in life he was in the navy, but subsequently became a member in the Nottingham militia; from that circumstance he was generally known as Major Cartwright, though he had been in the army for many years previous to his being made public for many years, both by his exertions in favour of American independence, and by his public addresses in furtherance of a radical reform of the government. He displayed great firmness and distinction on all occasions when multitudes assembled to advocate and petition for their rights. He died in 1824, aged 84.

CARTWRIGHT, Dr EDMUND, brother of the preceding, and a clergyman of the established church. In 1770 he published a pleasing poem, called "Armina and Elvira;" but he is chiefly known by his valuable invention of the power-loom, first introduced in 1786, and which, though for some time violently opposed by ignorant and prejudiced men, was at length universally adopted. He received in 1809 a grant of £10,000 from parliament as the reward of his services. Died, 1823.

CARTWRIGHT, THOMAS, an eminent Puritan divine of the reigns of Elizabeth and James I.; professor of divinity at Cambridge university, but expelled for his opinions, and driven to take refuge in Holland. After 12 years absence he returned, and held the post of master of a hospital at Warwick. He was imprisoned by the High Commission Court in 1590 for three years. Cartwright was author of some Commentaries on the New Testament, of which a beautiful edition was published by the Elzevirs after his death. He was also author of "Commentaria Practica in totam Historiam Evnggelicam," a "Body of Divinity," "Commentaria Suedicæ et Diiueldæ in Proverbia Solomonis," &c. Died, 1602, aged 68.

CARTWRIGHT, WILLIAM, an English divine and poet. Both as a preacher and as a member of the council of war at Oxford, he zealously and ably served the cause of the unfortunate Charles I.; and his exertions caused him to be for a short time imprisoned by the parliament. His literary talents must have been great, for Bishop Fell said that he was "all that man could arrive at;" and Ben Jonson, in his familiar way, said, "my son, Cartwright, writes all like a man." But the remains of Cartwright are very disproportionate to these high praises, consisting only of four plays and a few poems. He died, at the early age of 33, in 1643, having been shortly before appointed professor of metaphysics at Oxford.

CARY, LUCIUS. [FAULKLAND.]

CARY, HENRY FRANCIS, the well-known translator of Dante, was born at Gibraltar in 1772. His father was a captain in the army; but soon after the birth of his son he settled in Staffordshire, and sent him when eight years old to Uxbridge School, and afterwards successively to Rugby and Birmingham. In 1790 he was admitted as a commoner of Christchurch, Oxford, and after finishing his college studies he was presented successively with the livings of Abbot's Bromley in Staffordshire and Kingsbury in Warwickshire. The delicacy of his health obliging him to have recourse to the best medical advice, he came to London in 1808, and after holding various cures in the metropolis and the vicinity, in 1825 he became assistant keeper of printed books in the British Museum, an office, however, which he resigned in 1837, when his application for the chief librarianship was rejected. Mr Cary contributed largely to the Gentleman's and the London Magazines, produced translations of the "Birds" of Aristophanes and the Odes of Pindar, and wrote a series of Lives of the English Poets, in continuation of Dr Johnson's; besides editing the works

are very numerous, and display immense industry and erudition. Born, 1539; died, 1614.

CASAUBON, MERIC, D.D., son of the above. He was born at Geneva, came with his father to England, and was educated at Oxford, where he obtained the degree of M.A. His "Pietas contra Maledicos," written against the Catholics and in vindication of his father, introduced him to the notice of King Charles I., by whom he was presented to some valuable church preferments. During the commonwealth he was persecuted and imprisoned, but remained unshaken in fidelity. At the restoration he recovered his livings. Among his writings is a treatise concerning Credulity and Incredulity. Died, 1671.

CASIMIR III., the Great, king of Poland, born in 1309, was son of Vladislas Loketek, and distinguished himself early in the wars carried on, especially with the Teutonic knights, by his father. He was elected to the throne in 1333. His chief military exploits were the conquest of Silesia, made after he had ceded it to the king of Bohemia; two victories over the latter; a great victory over the Tatars on the Vistula; and the conquest of part of Lithuania. He gave a code of laws to Poland, which limited the royal authority, and also secured the peasants against the oppression of the nobles. He promoted learning and founded the university of Cracow. Casimir had many noble qualities, and was beloved by his subjects. His great failing was excessive sensuality. He was thrice married, and had many mistresses, a beautiful Jewess being among the latter; for whose sake he gave many privileges to the Jews. Died, 1370. He was the last king of the Piast dynasty.

CASLON, WILLIAM, an English letter-founder, to whom we are indebted for much of the superiority of our printing type. Born, 1692; died, 1766.

CASSANDER, king of Macedonia, was the son of Antipater, on whose death, in B. C. 319, he was excluded from the succession by the appointment of Polyperchon. Assisted by Antigonus, he made himself master of Athens, and soon after most of the Greek cities submitted to him. He invaded Macedonia, and besieged the queen-mother Ptolema in Pnyon, and had her put to death. His ambition was unchecked by any restraints; and by marriage-alliance, by wars, and by murders of rival claimants, he secured himself on the throne of Macedonia. He took the title of king at the same time with the other generals and successors of Alexander, B. C. 306. Died, 296.

CASSIANUS, JOANNES, a monk of the 4th and 5th centuries, distinguished as the teacher or one of the chief promoters of the Pelagianism in Gaul. His youth was spent in monasteries of the East, whence he fled to Constantinople, and became the pupil of Chrysostom, for whom he ever retained the profoundest love. He was sent on a mission to Rome about A. D. 404, and afterwards settled at Marseilles, where he founded two monasteries, one for each sex, and introduced the most austere discipline. He wrote the Monastic Institutes, and

showed himself in that work the opponent of the extreme views of Augustine. He is said to have lived to a great age, and died A. D. 448.

CASSINI, JEAN DOMINIQUE, an eminent astronomer, was born at Perinaldo, near Nice, and studied at Genoa with the Jesuits. His fame reaching France, he was invited to pay a visit to that country, where the kindness shown to him by Louis XIV., and his great minister, Colbert, caused him to remain for the rest of his life. He was the first director of the royal observatory at Paris, and he continued to fill that office for upwards of 40 years. During that time his services to science were such as to do high honour to himself, as well as to the monarch by whom he was patronized. He demonstrated the diurnal motion of Jupiter on his axis, ascertained the periods of rotation of Jupiter, Mars, and Venus, and discovered four satellites of Saturn, in addition to that which Huygens had discovered. Cassini was the first to investigate the zodiacal light, and determine its relations in space. He died in 1712, having previously been for some years deprived of sight.

CASSINI, JACQUES, son of the preceding, and, like him, an eminent astronomer; author of "A Treatise on the Figure and Magnitude of the Earth," "The Elements of Astronomy," &c. Born at Paris, 1677; died, 1756.

CASSINI DE THURY, CÉSAR FRANÇOIS, son of the last named, and his successor in the royal observatory. Like his father and grandfather, he did much to advance science; and, having better instruments than theirs, he was enabled to improve upon their labours. Born, 1714; died, 1784.—The last member of this illustrious family, JEAN DOMINIQUE, whose name is also associated with theirs in the pursuit of science, died in 1845.

CASSIODORUS, MAGNUS AURELIUS, a Roman statesman and historian. He was born in south Italy, about 468, of a noble family, and held some of the highest offices of state, including that of consul. He was in fact first minister to Theodoric the Great and his successors in the Ostrogothic kingdom. He founded a monastery at Viviers, and when 70 years of age he retired to it, and there lived thirty years. His writings are valuable, especially his twelve books of epistles, or rather state papers, on account of the light they throw upon the manners of his time; but his style is condemned by Gibbon as being quaint and declamatory. Died about 570.

CASSIUS LONGINUS, CAIUS, a Roman of the last age of the republic, and the associate of Brutus in the assassination of Julius Cæsar. He first distinguished himself in the expedition of Crassus against the Parthians, in the year B. C. 53. In the civil war he first joined the party of Pompey, but after the battle of Pharsalia he went over to Cæsar, without however ceasing to dread his ambition and supremacy. It was Cassius who devised the plot against the dictator, and induced Brutus to join in it. That his patriotism was sincere may be inferred from his reply to Antony, who, on the

day after the assassination of Cæsar, tauntingly asked him if he had another dagger. "Yes," was the reply, "if you become a tyrant." Cæsar tried to get possession of Syria, but failed, and then joined Brutus in Greece. At the battle of Philippi he commanded the left wing, and on its repulse he retired to a tent with his freedman, whom he ordered to kill him. Brutus, in lamenting him, called him "ultimus Romanorum." Died, n. c. 49.

CASSIUS, SPURIUS, a celebrated Roman, who was thrice chosen consul, in n. c. 502, 493, and 486. He rendered great services to the republic both as general and statesman. In his first consulship he conquered the Sabines, and took Pametia; in his second he concluded a league with the Latins on very advantageous terms, which lasted for a hundred years, and was only broken by the irruption of the Gauls; and in his third made a league with the Iberians. His most memorable achievement, however, was the carrying of the first agrarian law at Rome, for the division of part of the public lands among the plebeians. The hatred of the patricians expressed itself in his impeachment the following year, and he was put to death on the charge of aiming at sovereign power.

CASSIVELLAUNUS, a British prince, who, in n. c. 54, was appointed commander-in-chief of the Britons, and unsuccessfully disputed with Julius Cæsar the passage of the Thames. His capital, near St Albans, was taken by Cæsar, and he was soon after defeated, and surrendered to the conqueror.

CASTAGNO, ANDREA DEL, a celebrated Italian painter, was born in Tuscany in 1390. He was early left an orphan, and was employed as shepherd-boy by a cousin, but his talent for drawing procured him the patronage of Bernardetto de' Medici, who had him apprenticed. It is not known who was his master. He distinguished himself by a daring realism and energy which often becomes coarseness. Among his works were two Crucifixions; a series of frescoes of heroes and sibyls at Legnana; frescoes in the hospital and church of Santa Maria Nuova at Florence; and a fine equestrian portrait of Niccolò di Tolentino. He was a man of violent temper, and has for centuries lain under the charge of having murdered a rival, Domenico Veneziano. Of this crime he is now cleared, and is shown to have died in 1457, four years before the death of Domenico.

CASTALION, SEBASTIAN, one of the earliest friends and fellow-labourers of Calvin, born 1515. He became teacher of Latin at Geneva. Unfortunately for Castalion's worldly condition, he differed from the great reformer on some theological questions. He was in consequence deprived of his office of teacher, and repaired to Basel, where he was named professor of Greek, and also occupied himself with preparing Latin and French versions of the Bible. Calvin, unmoved by the indulgence to which he had reduced his conscientious and candid opponent, used all his influence to degrade him and thwart his exertions. He had even

the meanness to bring against him a ridiculous accusation of theft. Died, 1563.

CASTANOR, FRANCISCO NAVENIO, a Spanish general, was born about 1736. He entered the army at an early age, and spent some time at Berlin, to study the art of war under one of its greatest masters, Frederick the Great. General Castanor was chiefly celebrated for the victory he obtained over the French under Dupont at Baylen in 1808, which was followed by the expulsion of Joseph Buonaparte, and the temporary restoration of Ferdinand VII. The brave Swiss leader, Aloys Reding, contributed to this victory. Castanor took part in many of the great battles of the peninsular war, but did not greatly distinguish himself. He was created duke of Baylen, and died at the age of 90, in 1822.

CASTELL, EDMUND, an English divine and lexicographer, was a native of Hatley, Cambridgeshire. He spent a handsome fortune and occupied 17 years in the composition of his "Lexicon Heptaglotton," a dictionary in seven languages; but nearly all the copies remained unsold, and but for some preferment in the church, and the Arabic professorship at Cambridge, his zeal, learning, and diligence would have been unrewarded. Born, 1606; died, 1685.

CASTELNAU, [DUCHEATRE.]
CASTELNAU, JACQUES DE, Marquis of Castelnaud, marshal of France, was son of Michel de Castelnaud, and was born about 1620. He entered the army, and early distinguished himself in the Imperialist wars. He contributed to the defeat of the Imperialists at Nordlingen in 1645, had two horses killed under him, and received several wounds. He served at many sieges, and was frequently wounded; commanded in Flanders, in the absence of Turenne, in 1656, and took part in the sieges of Valenciennes and Dunkirk; contributed to the victory over the Spaniards at the battle of the Dunes; was created marshal of France in June, 1658, and was killed by a musket-shot at Dunkirk about a month later.

CASTELNAU, MICHEL DE, Lord of Mervissière, an eminent French statesman and soldier in the reigns of Charles IX. and Henry III. He was five times in England in the character of ambassador. While there resident here he acted with great kindness towards Mary, queen of Scots. He left memoirs of his negotiations, of which there is an English translation by his daughter. Died, 1592.

CASTI, GIANBATTISTA, an Italian poet and miscellaneous writer, was born in 1721. He travelled much, and lived successively at Vienna, St Petersburg, Florence, and Paris. He succeeded Metastasio as court-poet at Vienna. His most admired poem is entitled "Gli Animali parlanti," an allegory and ingenious satire on courts and society. Some of his other works are noted for their indecency. Died at Paris, 1804.

CASTIGLIONE, BALDASSARE, an Italian statesman and writer, a native of the duchy of Mantua. Having attached himself to the court of Urbino, he was sent by the duke ambassador to Henry VIII., who made him a knight of the Garter. He was afterwards

ambassador to Leo X., who of a cardinal's hat, and to Clement VII., who charged him with an embassy to the emperor, Charles V., on which occasion he played great talent and dexterity. The sack of Rome by the Constable in 1527, Castiglione lived in his death. His poems, both Latin and Italian, were much admired, as are his letters, which throw much light on the affairs of the court. His chief work is "Il Cortigiano." This work is a classic, and has been frequently republished, the most admired by the Italians, the "The Golden Book." Born, 1520.

CASTIGLIONE, GIOVANNI DE, Genoese painter, born, 1610. He painted IL GROSCHETTO. His landscapes and animals, but his "The Nativity" shows that he was the highest walk of art. He was a remarkable engraver. Died, 1670.
CASTILLO, BEENAL DIAZ DEL, a peer of the 16th century, one of the sons of Fernando Cortez in his expedition to South America. He wrote a high style, but full of valuable information, entitled "Historia Verdadera de los Reynos de Nueva Espagna." Written, about 1560.

CASTLERAGH, Lord. [See CASTLERAGH, Marquis of.]

CASTRACANI, CASTRUCCIO, a general of great skill and courage. He died about 1303, and served Edward I. He next was in France, and after ten years' absence returned to Italy. He belonged to the Guelphs, and in 1316 was chosen he noble of Lucca. He rendered great service to the emperor, Louis V. of Hungary, and was rewarded him with the title of count. He was excommunicated by the pope, and died soon after the siege of Lucca, which he took from the Florentines. His name is among the minor Italian names. Died, 1328.

CASTREN, MATTHIAS ALEXANDER, a Swedish philologist, was born in 1732. He was educated at the university of Uppsala, and became an eminent scholar of the language of his native country. He visited Lapland; travelled in Russian Lapland; and went to Hasslan Lapland, and the Samoyedeas. All these journeys he made for the purpose of acquiring the native languages. He was named professor of the ancient northern languages in 1755. He published a translation of the old Finnish "Kalevala," an account of his travels in Lapland, and several other philological works. His life ended after his death. Died, 1802.
CALANI, ANGELO, one of the most distinguished popes of modern times, was born in the year 1785. His years were spent in the convent, and so perfect were her vocal talents, that the sweetness of her voice itself was violated by the appearance of her clerical performances called

ambassador to Leo X., who offered him a cardinal's hat, and to Clement VII., who charged him with an embassy to the emperor, Charles V., on which occasion he displayed great talent and docility. After the sack of Rome by the Constable Bourbon in 1527, Castiglione lived in Spain till his death. His poems, both Latin and Italian, are much admired, as are his letters, which throw much light on the affairs of his time. But his chief work is "Il Cortegiano," the *Book of the Courtier*. This work is a classic in Italy, and has been frequently republished, and is so much admired by the Italians, that they call it "The Golden Book." Born, 1478; died, 1529.

CASTIGLIONE, GIOVANNI BENEDETTO, Genoese painter, born, 1610. He is surnamed **IL GRECHETTO**. He excelled in landscapes and animals, but his picture of *The Nativity* shows that he had power to the highest walk of art. He was also an admirable engraver. Died, 1670.

CASTILLO, FERNAN DIAZ DEL, a Spanish peer of the 16th century, one of the companions of Fernando Cortez in his expedition to South America. He wrote a work, though faulty, full of valuable information, entitled "Historia Verdadera de la Conquista de Nueva España." Died in Mexico, about 1560.

CASTLEBRAGH, Lord. [LONDON-MARKET, Marquis of.]

CASTRACANI, CAMBRUCCIO, an Italian general of great skill and courage. He came to England about 1393, and served in the army of Edward I. He next served in France, and after ten years' absence returned to Italy. He belonged to the Ghibelline party, and in 1316 was chosen head of the noble of Lucca. He rendered great service to the emperor, Louis V. of Bavaria, &c. He was rewarded with the title of duke of Pisa, and died soon after the siege of Pisa, which he took from the Florentines. His name is among the minor Italian poets. Born, 1283; died, 1328.

CASTRÉN, MATTHIAS ALEXANDER, an eminent Finnish philologist, was born in 1768.

He was educated at the university of Uppsala, and became an enthusiastic student of the language of his native country. In 1808 he visited Lapland; travelled afterwards in Russian Lapland; and in 1845 went to Russian Lapland, and the country of the Samoyedes. All these journeys were made for the purpose of acquainting himself with the native languages and dialects. He was named professor of the history of ancient northern languages at Uppsala in 1831. Castrén published a valuable translation of the old Finnish poem "Kalevala," a account of his travels, and several philological works. His lectures were discontinued after his death. Died, 1852.

CATALANI, ANGELO, one of the most distinguished singers of modern times, was born in Palermo, in the papal states, 1782. Her years were spent in the convent of Santa Caterina, and so perfect were her vocal organs in her infancy, that the sanctity of the convent itself was violated by the applause of her choral performances called forth.

Soon after quitting the convent, she made her debut in the theatre *Argentina* at Rome, in 1802; and the immense success which she achieved on this stage, procured her immediate engagements in all the theatres of Italy. At Lisbon, Madrid, and Paris new triumphs awaited her; but even those were far outshone, in 1806, by the enthusiasm of her reception in England, where she remained eight years, delighting the metropolis at the Italian Opera and reaping large harvests both of fame and wealth in her provincial tours. After the restoration of the Bourbons, she returned to Paris, where she undertook the management of the Opera Buffa; but this speculation was unfortunate, and Madame Catalani, to repair her shattered fortunes, made a professional tour through all the capitals of continental Europe, and at length returned to England in 1822, when the enthusiasm of her reception suffered no abatement. Here she remained three years. In 1825 she again visited Paris, and after once more going the round of Europe, she retired to Italy in 1830, when she purchased a villa near Florence, and spent the remainder of her life in the bosom of her family. She had been long married to a French captain, named Valabrégue. To an agreeable person and a lively style of acting, Madame Catalani added a voice of extraordinary brilliancy and power; and in this lay its chief merit, for we do not find that she possessed the faculty of calling forth the tenderest and deepest emotions of our nature. Died of cholera, at Paris, 1840.

CATESBY, MAURICE, an eminent English naturalist, patronized by Sir Hans Sloane and other wealthy lovers of science. He spent many years in America, for the purpose of collecting and describing the most curious natural productions of that country. He fixed his residence in Carolina, whence he made excursions into Florida, Georgia, and the Bahama Islands. The result of his labours was "The Natural History of Carolina, Florida, and the Bahama Islands;" a very splendid work in two folio volumes, illustrated by upwards of 200 plates. Born, 1680; died, 1749.

CATHARINE, ST., of Sienna, was born at Sienna in 1347, and when she was twenty years of age became a sister of the order of St. Dominic. Having considerable ability and a very lively imagination, she became celebrated as a seer of visions. So great an influence did her pretended visions and revelations obtain her, that she was able to prevail on Gregory XI. to be reconciled to the Florentines, and to remove the papal seat to Rome from Avignon, after it had for 70 years been fixed at the latter place. She wrote various ascetic treatises, and some devotional letters and poems. She died in 1380, and was canonized by Pope Pius II. in 1461.

CATHARINE OF FRANCE, daughter of Charles VI. of France, and the wife of Henry V. of England, who, on his marriage to her, was declared successor to the French crown. Their son, afterwards Henry VI., was crowned in both countries while still an infant. Being left a widow, she privately espoused Owen Tudor, a Welsh gentleman, by whom

she had two sons, the elder of whom, Edmund, earl of Richmond, was father of Henry VII. Born, 1401; died, 1438.

CATHARINE OF ARAGON, daughter of Ferdinand and Isabella of Castile, was born in 1483. In her 18th year she was married to Arthur, prince of Wales, eldest son of Henry VII. The young prince dying in a few months after his marriage, Henry's mercenary dread of losing the rich dowry of Catharine, induced him to marry her to her brother-in-law, afterwards Henry VIII. The vast religious changes to which this marriage gave occasion belong rather to history than to biography. Suffice it, therefore, to say, that after years of anxiety and spirited resistance, she was divorced. But though she was no longer called queen at court, her attendants at Kimbolton Castle, where she took up her residence, were never allowed to address her otherwise than as a queen, as she protested to the last that the divorce was unjust and illegal. Just before her death she wrote so pathetic a letter to Henry in favour of Mary, their daughter, that, stern as the tyrant was, he is said to have shed tears as he perused it. She possessed considerable literary ability, but some devotional pieces, which are sometimes attributed to her pen, were in fact the production of Queen Catharine Parr. Died, 1536.

CATHARINE PARR, eldest daughter of Sir Thomas Parr, of Kendal, in Westmoreland. She was married early in life to Edward Burghes; and, surviving him, she was next married to John Neville, Lord Latimer. Her second husband, too, she survived; and, in 1543, was raised to the throne by King Henry VIII., being his sixth and last wife. If we feel surprise at her venturing to share a throne which had been so fatal to most of those previously raised to it, we cannot deny that she conducted herself with admirable tact and judgment. One proof of this will suffice. Her attachment to the reformed religion gave deep offence to the still powerful popish faction. Gardner, Wriothesley, and others, determined to remove her if possible from court. Taking advantage of the state of irritability to which continual pain had brought the king, they accused her to him of heresy and treason, and so far wrought upon him, that he signed a warrant for her committal to the Tower. Being informed of this fact, she repaired at once to the king's presence. Henry turned the conversation upon theological topics, and endeavoured to draw her into argument. But she replied with so much tact and good sense that she did away at once with the king's suspicions and anger; and when Wriothesley, attended by some guards, called to convey her to the Tower, he found her in high favour, and instead of making her a prisoner, was sent from the presence of the king with knife, fool, beast, and the like gentle terms. Catharine retained her ascendancy over the king, and at his death he left her £4000 in addition to her jointure, "for her great love, obedience, chasteness of life, and wisdom." She afterwards married Sir Thomas Seymour, uncle of Edward VI., but they lived by no means happily together; and when she died, though

in childbed, it was currently reported that she was poisoned. She was attached to the cause of the reformation; and her letters, some of which have been printed, as well as some devotional treatises, show that she had considerable literary talent. Died, 1546.

CATHARINE DE MEDICI, the wife of Henry II., king of France, was the daughter of Lorenzo de Medici, duke of Urbino, and was born in 1519. In 1533, being then only in her 14th year, she was married to Henry, duke of Orleans, son and successor to Francis I. of France. Her beauty and accomplishments made her the ornament of the French court; and, young as she was, she had so much tact and cunning enough to make herself acceptable to all parties. For ten years she brought her husband no children, but she subsequently had seven, of whom three successively were kings of France. With profound policy she secured the affection and confidence of her children, and she deservedly trained her sons in effeminacy and dissolute living, reserving thus to herself that influence which she desired to exercise over their maturer age. On the death of her husband, and the accession of Francis II., the Guises had the chief political power; and it is probable that it was in order to avoid collision with them that she joined in their persecution of the Huguenots. During the reign of Francis was very brief; and when Charles IX., then only in his 13th year, succeeded him, Catharine had all the authority of regent, though not the title. The death of the duke of Guise still further increased her power, and she joined heart and soul with the Catholics in persecuting the Huguenots. To characterize her political conduct at this time, we need only name the horrible massacre of St Bartholomew, an atrocity which just and humane men of every creed, country, and age join in reprobating. That Charles IX. was urged to it by the persuasions of Catharine most historians admit; and in less than two years after the massacre he died, went out in mind and body by the stings of remorse. At the death of Charles, Catharine was declared regent until the arrival of her son Henry from Poland. During her regency she governed rigorously but sagaciously, and delivered up the kingdom to Henry III. on his arrival, in such order as with only common prudence and foresight would have insured him a peaceable reign. But the new king's weakness soon relaxed the bands which his mother had so firmly drawn around faction, and civil disturbances ensued, by which Catharine's later years were much embittered. Admitted by all to be a sagacious, crafty, and courageous woman, but detested by every party in the state, she died, aged 70, in 1589.

CATHARINE OF BRAGANZA, daughter of John IV. of Portugal, and queen of Charles II. of England, whom she married in 1661. The dissolute conduct of her husband, and the shameful openness of his intrigues, gave her much pain. But though neglected by him, she steadily preserved her own honour, and his so far as it depended on her. After his death she returned to Portugal, and when, in 1704, her brother, the

edro, was compelled to retire, she sold this office but her conduct, both as a measure and the considerable political influence she possessed in the 67th year of her life, she was called CATHARINE I., and no illegitimate daughter. After some years she was a clergyman, she was a woman, who shortly a petition and never sed as servant, or perhaps in general, Bauer, became enamoured of his mistress. Peter by his notice, and a dress and afterwards a lifetime she showed, and at his death successor. But her indulgence in late years had induced a disease of which she died in the 83rd year of 33.

CATHARINE II., empress of Russia, daughter of the prince of Anhalt, was born in 1729, and was married to Peter III. the duke of Holstein-Gottorp, afterwards the Emperor Peter III. She was addicted to low sensuality and dissolute excesses; and her youth, was by no means distinguished by her talents. With the usual delicacy of her husband's brutality, she was only indecorous in her behaviour, and indulged in low pleasures to such a length became so attached to Catharine and her mistresses, the Countess of Salm, determined to divorce her, and make the emperor conform to his designs, she committed herself, caused her husband to be executed, and sent him as far as about 20 miles from Moscow, where Prince Alexis Orlov, a favourite of the empress, and the countess, in 1762, and in the same year she was solemnly crowned as Catharine II. of the Russians. Ill as she was, she used it with great wisdom, and with the footstep of Peter III. she endeavoured to enrich and civilize her subjects, and to draw out of the people of equal magnificence, and finished her reign with a number of criminals which had been executed, and her disgusting amours, which she had concealed her as a woman, and which took place in a palace upon her escutcheon, and all the distractions of her son she found time to attend to.

Indeed, she was herself a poet, and translated into German several dramatic pieces, and the use of children! D

pedro, was compelled by his increasing infirmities to retire, she was made regent. She held this office but for a brief space; but her conduct, both as regards her internal measures and the war with Spain, showed considerable political ability. She died, in the 67th year of her age, 1705.

CATHARINE I., empress of Russia, was so illegitimate daughter of a Livonian peasant. After some years spent in the service of a clergyman, she married a Swedish dragoon, who shortly afterwards went on an expedition and never returned. She then lived as servant, or paramour, with the Russian general, Baur, when Prince Menzikoff became enamoured of her charms, and made her his mistress. Peter I. now distinguished her by his notice, and she became at first his mistress and afterwards his wife. During her lifetime she showed great devotion to him, and at his death she was proclaimed successor. But her reign was short; for indulgence in intoxicating liquors produced a disease of which she died in 1727, at the age of 33.

CATHARINE II., empress of Russia, was daughter of the prince of Anhalt-Zerbat, was born in 1729, and in 1745 became the wife of the duke of Holstein-Gottorp, afterwards the Emperor Peter III. This prince was addicted to low society and to the most dissipated excesses; and Catharine, even in her youth, was by no means remarkable for her purity. With the usual inconsistency, each reproached the other; Catharine, stung by her husband's brutality, became still more intemperately indecorous in her conduct, and Peter indulged in low pleasures without restraint. At length became so infatuated by his dissipation for Catharine and his passion for one of his mistresses, the Countess Woronzoff, that he determined to divorce and imprison the empress, and make the latter his empress. Oppressed by his designs, Catharine promptly avenged herself, caused her husband to be deposed, and sent him as a prisoner to a small island about 20 miles from St Petersburg, where Prince Alexis Orloff put him to death, and the empress, if not at the positive command, of the empress. This occurred in July, 1762, and in the next month Catharine was solemnly crowned empress of the Russias. Ill as her power was obtained, she used it, with some very grave exceptions, wisely and well. She trod firmly the footsteps of Peter the Great, aiming to enrich and civilize her dominions. Schools and towns were founded, public works of equal magnificence and utility were executed and finished, and the horrible punishments which had been inflicted on Russian criminals were almost totally abolished. Her disgusting amours in the mean time succeeded her as a woman, and her tyrannous march towards Poland, the three partitions which took place in her reign, is a foul blot upon her escutcheon as a sovereign. All the distractions of business and dissipation she found time to encourage literature. Indeed, she was herself the author of regulations for a code of laws, which she translated into German; and she wrote dramatic pieces, and some moral tales on the use of children! Died, aged 67, 1796.

CATHCART, Lieutenant-general the Honourable Sir **GEORGE**, K.C.B., a distinguished soldier, a younger son of Earl Cathcart, was born in London in 1794, and was educated at Eton and Edinburgh University. In 1810 he commenced his military career in the 2nd Life Guards; in 1812 he accompanied his father as aide-de-camp to St Petersburg, and the following year, having exchanged into the 6th Dragoons, he joined the Imperial head-quarters in Germany, and was present at the battles of Lützen, Bautzen, Dresden, Culm, and Leipzig, and subsequently Brienne and numerous other engagements, and finally at the taking of Paris. Having accompanied his father to the congress of Vienna in 1814, he was appointed extra aide-de-camp to the duke of Wellington, was present at Quatre Bras and Waterloo, and subsequently accompanied the duke to the congress of Aix-la-Chapelle and Verona in the same capacity, meanwhile doing regimental duty with the 7th Hussars, which he had entered in 1815. In 1828 he was appointed Lieutenant-colonel of the 57th Foot, and served in Nova Scotia, Bermuda, and Jamaica till 1834, when he retired on half-pay. In 1837, an outbreak having taken place in Canada, he emerged from his retirement, and being placed in command of the troops called out on that occasion, was greatly instrumental in restoring tranquility to the country, both as a soldier and a civilian. In 1844 he returned to England, and again retired on half-pay; but in 1852, at a crisis of great difficulty, he was appointed governor of the Cape of Good Hope, whither he at once proceeded, and where he brought the protracted Kaffir war to a speedy and honourable conclusion. On his return to England in 1854, he again sought the tented field, being appointed to the command of the 4th Division of the British army, serving in the Crimea, and fell in the memorable battle of Inkermann, November 5, personally animating by his example the soldiers whom he led in their career of noble daring. His "Commentaries" on the campaign of 1813-14 (published in 1850), showed that he was endowed with a practical knowledge of his profession as rare as it valuable;—and among the various heavy losses which the British army has sustained in the war with Russia, none was more severely felt by the nation than the loss of General Cathcart.

CATILINE, **LUCIUS SERGIUS CATILINA**, a Roman, of a noble family and great talents, but of most depraved habits and evil ambition. He was high in favour with Sulla, and succeeded, notwithstanding the foul crimes of which he was commonly accused, in attaining to the questorship and other offices of honour and profit. After being tried for oppression in his province of Africa, and being disappointed in his hope of the consulship, Catiline conspired, with other dissolute nobles and their followers, to murder the consuls, but the plot failed. He then formed a more audacious scheme, in which he obtained the co-operation of impoverished and ambitious nobles, greedy restless soldiers, and the whole vulgar mob. It was to upset the government and possess himself of supreme power. Fortunately for

dro, was compelled by his increasing infirmities to retire, she was made regent. She held this office but for a brief space; but her conduct, both as regards her internal measures and the war with Spain, showed considerable political ability. She died, in the 67th year of her age, 1705.

His "Commentaries" on the campaign of 1813-14 (published in 1850), showed that he was endowed with a practical knowledge of his profession as rare as it valuable:—and among the various heavy losses which the British army has sustained in the war with Russia, none was more severely felt by the nation than the loss of General Cathcart.

CATILINE, **LUCIUS SERGIUS CATILINA**, a Roman, of a noble family and great talents, but of most depraved habits and evil ambition. He was high in favour with Sulla, and succeeded, notwithstanding the foul crimes of which he was commonly accused, in attaining to the quaestorship and other offices of honour and profit. After being tried for oppression in his province of Africa, and being disappointed in his hope of the consulship, Catiline conspired, with other dissolute nobles and their followers, to murder the consuls, but the plot failed. He then formed a more audacious scheme, in which he obtained the co-operation of impoverished and ambitious nobles, greedy restless soldiers, and the whole vulgar mob. It was to upset the government and possess himself of supreme power. Fortunately for

Rome, Cicero was one of the consuls; and he, on being made aware of Catiline's designs, assailed him in the first of those famous orations which alone would suffice to give him the first rank among orators, ancient or modern. Catiline quailed before the indignant eloquence of the consul. He left Rome and went to the camp of Manlius, his confederate in the mean time endeavouring to corrupt the ambassadors of the Allobroges. In this they were defeated by the vigilance and promptitude of Cicero; and Catiline being stopped in his march by the proconsul, Q. Metellus Celer, and at the same time attacked by Antonius, who was sent after him, an engagement ensued, in which Catiline, at the head of his associates, fighting with the most desperate courage, was slain, B. C. 62.

CATINAT, NICOLAS, 'an illustrious French general, as eminent for his virtues as for his military talents. He was educated for the law, but abandoned the bar for the army, and rose to the highest military honours by his skill and courage. He defeated the duke of Savoy very signally in 1688, and in 1697 he took the fortress of Ath, in Flanders, after experiencing a desperate resistance. In 1701 he was appointed to the chief command of the army in Italy; but either his skill was inferior to that of Prince Eugene, to whom he was opposed, or age had somewhat weakened his high qualities, for he was decidedly worsted and compelled to retreat. Died, 1712.

CATO, MARCUS PORCIUS, surnamed the Censor, an illustrious Roman. He was born at Tusculum, and at the early age of 17 he commenced his career as a soldier, and distinguished himself equally by his courage and by his temperance. After some years passed in rural retirement, he was made military tribune in Sicily, and then quaestor in Africa, under Scipio. In 195 he served as praetor in Sardinia. In these situations his conduct was marked by a rigid and honourable economy of the public money; and, in his 40th year, he arrived at the high dignity of the consulship. He obtained important military successes in Spain and Greece, and in 184 had the office of censor. He strongly opposed the luxury of the Romans, and incessantly endeavoured to animate their hatred of the Carthaginians, by speeches in the senate, usually concluding with "Delenda est Carthago;" "Carthage must fall." He composed many works; but the treatise "De Re Rustica," and some fragments of Roman history, are all that we know of his writings. He was twice married, and had a son by each of his wives. Born, B. C. 234; died, 149.

CATO, MARCUS PORCIUS, surnamed, from his birthplace, "Uticensis," was great-grandson of the last named. Being early left an orphan, he was taken into the family of his uncle, Livius Drusus. He served for some time in the army, and obtained the commission of tribune of the soldiers in the army sent against Macedonia. He then became quaestor, and exerted himself for the reformation of abuses. His conduct in this respect, and the unwavering gravity of his demeanour, rendered him almost proverbial

for integrity; and Cicero, to whose consular exertions he gave his support, called him "the father of his country." Perceiving the designs of Caesar, he had the honesty and courage to oppose him; and considering Caesar more dangerous than Pompey, he ranged himself under the banners of the latter. The fatal battle of Pharsalia compelled him to fly to his native Utica; and when Caesar arrived before that place, Cato calmly retired to his chamber, read Plato's *Phaedo*, the Dialogue on the Immortality of the Soul, and ended his life by falling upon his sword, B. C. 46.

CATS, JACOB, an eminent Dutch poet and statesman, was born in Zealand in 1577. He studied law at Leyden and Orleans, and after some years of retirement, settled at the Hague. He was twice sent ambassador to England, and in 1636 was appointed grand pensionary of Holland, an office which he filled about fifteen years. He spent the rest of his life in retirement and literary labours. His "Emblems," "Country Life," and other poems, are chiefly didactic, and are characterized by singular simplicity, facility, and good-humour. They had a very great popularity, and the general admiration of the author is shown in the term "Father Cats," still applied to him. Died, 1660.

CATULLUS, CAIUS VALERIUS, a Roman poet, was born at or near Verona, B. C. 87. He was a man of wealth and pleasure, and the friend of Cicero, Cinna, and other eminent men. His poems are in various styles, lyric, ode, elegy, and epic; some imitated from the Greek; most of them characterized by ease and simplicity of style, genuine playfulness, and as genuine pathos. Some of them are spoiled by indecency. Died probably B. C. 47. There are several English translations of Catullus.

CAULAINCOURT, ARMAND AUGUSTIN LOUIS DE, duko of Vlenza, a descendant of a noble and ancient family of Picardy. In the early days of the French revolution he was imprisoned as a suspected royalist, but was liberated on entering the republican army. There he rose from rank to rank until he became aide-de-camp to Buonaparte, whom he attended in the campaigns of 1805-6-7. Subsequently he was employed in confidential missions, and in the post of foreign minister. After the restoration he lived in retirement. Born, 1773; died, 1827.

CAVAIGNAC, LOUIS-EUGÈNE, a distinguished French general, was born at Paris in 1802. His father was a member of the Convention, and his brother G. deffroy was one of the most popular members of the republican party in the reign of Louis Philippe. Destined for the army at an early age, he made his preliminary studies at the college of St Basile, entered the Polytechnic School in 1820, and in due time was made lieutenant of engineers. He went through the campaign of the Morea in 1828, as captain; and on the breaking out of the French revolution of 1830, he was the first officer of his regiment to declare for the new régime; but the year following he was placed on half-pay for signing the project of the national association, and soon afterwards, on being restored to the army, was sent, as to an honourable

banishment, with his Here, under Marshal C. numerous proofs of boundless resources on and his name became as of Lamoricière, Changa other distinguished sold army in Algiers. For during the siege of Ch was made lieut.-colonel great distinction at Isly geaud, and for his large ad perils that ensued of Abd-el-Kader, was rewa moted to the rank of gen of the province of Oran. tia of Feb. 1848 broke ou nac was appointed gover gerta; but on being elect Constituca Assembly he and was appointed minist members of the executive from time to time misund up between the executive at war, which increased i approach of the fatal day outbreak of the 22nd, Gen not regard it as a mere in the commencement of a c decisive measures to sup general terror which prev commission resigned thei was declared in a state of si Assembly appointed Cavaig unlimited powers; and aft gle, durlag which he dispic est qualities both of a cold society was saved, to use a sion, though at a cost of l which Paris had never wri the first revolution. A pacified the capital, true principles, he laid down hi the National Assembly, i of his services, nominated the council, with power t ministry. In this office he tact and moderation both and foreign politics. Tow the year he became a candi sidency of the republic; b tered about one million and while his opponent, Louis N parte, received nearly six r the 20th of December he r functions and took his place Assembly among the moder During the three years that f his votes and speeches, he m adhesion to the republic; he Napoleon perpetrated his Dec. 2, 1851, one of his pre arrest General Cavaignac, to most distinguished members and transfer him to the fo On his liberation he was "Corps Legislatif," but he o the oath to the new governm period he lived in retirement, when he was chosen one of t the Seine, in opposition to the didate; but a few weeks afte suddenly, regretted by all clas munity, and leaving behind

banishment, with his regiment to Algeria. Here, under Marshal Clausel, he gave innumerable proofs of great courage and boundless resources on occasions of peril; and his name became associated with those of Lamoricière, Changarnier, Bugeaud, and other distinguished soldiers of the French army in Algiers. For his gallant conduct during the siege of Cherchell, in 1840, he was made lieutenant-colonel; in 1844 he gained great distinction at Isly under Marshal Bugeaud, and for his large share in the battles and perils that ensued on the enterprises of Abd-el-Kader, was rewarded by being promoted to the rank of general and governor of the province of Oran. When the revolution of Feb. 1848 broke out, General Cavaignac was appointed governor-general of Algeria; but on being elected a member of the Constituent Assembly he returned to Paris, and was appointed minister at war by the members of the executive commission. But from time to time misunderstandings sprang up between the executive and the minister at war, which increased in intensity on the approach of the fatal days of June. On the outbreak of the 22nd, General Cavaignac did not regard it as a mere insurrection, but as the commencement of a civil war, and took decisive measures to suppress it. In the general terror which prevailed, the executive commission resigned their functions, Paris was declared in a state of siege; the National Assembly appointed Cavaignac dictator with unlimited powers; and after a terrific struggle, during which he displayed all the highest qualities both of a soldier and a patriot, society was saved, to use a familiar expression, though at a cost of life and bloodshed which Paris had never witnessed even during the first revolution. As soon as he had pacified the capital, true to his republican principles, he laid down his dictatorship; but the National Assembly, in acknowledgment of his services, nominated him president of the council, with power to select his own ministry. In this office he displayed equal tact and moderation both as regards home and foreign politics. Towards the close of the year he became a candidate for the presidency of the republic; but he only mustered about one million and a half of votes, while his opponent, Louis Napoleon Buonaparte, received nearly six millions, and on the 20th of December he resigned his high functions and took his place in the National Assembly among the moderate republicans. During the three years that followed, both by his votes and speeches, he maintained a firm adhesion to the republic; hence when Louis Napoleon perpetrated his coup d'état on Dec. 2, 1851, one of his precautions was to arrest General Cavaignac, together with the most distinguished members of the assembly, and transfer him to the fortress of Ham. On his liberation he was elected to the "Corps Legislatif," but he refused to take the oath to the new government. From that period he lived in retirement, till June, 1857, when he was chosen one of the deputies for the Seine, in opposition to the Imperial candidate; but a few weeks afterwards he died suddenly, regretted by all classes of the community, and leaving behind him a name

second only to that of Washington for moderation and true patriotism. Died, 1857.

CAVALCANTI, GUIDO, a Florentine philosopher and poet of the 13th century, was a friend of Dante, and, like him, an active Ghibelline. His poems, which are chiefly amorous, are among the most elegant in style of that early age, and were thought worthy of illustration by voluminous commentaries. Died, 1300.

CAVALIER, JEAN, leader of the Camisards in the time of Louis XIV., was the son of a French peasant, and was born in 1679. He became leader of the Camisards, or Protestants of Languedoc, when they revolted against the tyranny of the king; and, led by him, they forced Marshal Villars to a treaty with them. Cavalier then became colonel in the king's service, but fearing some treachery, he transferred his skill and courage to England, and died governor of Jersey, in 1740.

CAVALIERI, BONAVENTURA, an Italian friar, who became a disciple of Galileo. He was professor of mathematics at Bologna, and wrote some treatises on geometry, conic sections, &c. Died, 1647.

CAVALLINI, PIETRO, one of the earliest of the modern Roman painters. He was the contemporary of Giotto, whom he assisted in the famous mosaic in St Peter's. His masterpiece is the fresco of the crucifixion at Assisi. Cavallini was also an architect, and it has been conjectured that he erected the shrine of Edward the Confessor in Westminster Abbey, which bears the inscription "Petrus Romanus Civis." Died, 1344.

CAVALLO, TIBERIO, an ingenious natural philosopher, born at Naples in 1749, who, on coming to England for commercial objects, was so struck with the recent discoveries in physical science, that he abandoned his pursuits, settled in London, and devoted his future life to the advancement of science. He was elected a fellow of the Royal Society, and was author of many treatises on electricity, aerostation, magnetism, &c., and contributed largely to the Philosophical Transactions. Died, 1809.

CAVANILLES, ANTONIO JOSE, a Spanish divine and botanist. After accompanying the duke of Infantado's children into France as their preceptor, and remaining there 12 years, engaged in the study of various sciences, he was appointed director of the royal garden at Madrid, where he died, in 1804. His principal work in botany is an account of the plants of Spain, both wild and cultivated, and is in 6 vols. folio, with 800 plates, designed and engraved by himself.

CAVE, EDWARD, an enterprising bookseller, was born at Newton, Warwickshire, in 1691, and educated at Rugby School. Having been deprived of a clerkship in the post-office, he took a shop by St John's Gate, Clerkenwell, and commenced, in 1731, the "Gentleman's Magazine." The work was highly successful; and among the contributors to it was the subsequently famous Dr Johnson, of whom Cave was one of the earliest friends and employers. Died, 1754.

CAVE, Dr WILLIAM, a learned English divine; he was a native of Leicestershire, and was educated at Cambridge. He be-

came chaplain to the king, obtained the degree of D.D. both at Cambridge and Oxford, and in 1684 was made canon of Windsor. He was author of "Primitive Christianity," "Antiquitates Apostolicæ," or Lives of the Apostles; "Apostolici," "Ecclesiastici,"—these two works containing the Lives of the Apostolic and later fathers of the Church, and several other works. Born, 1637; died, 1713.

CAVEDONE, GIACOMO, an eminent Italian painter. He was a disciple of the Carracci; and some of his works are said to be equal to those of his masters. He died in absolute destitution, in 1660.

CAVENDISH, THOMAS, an English navigator in the reign of Elizabeth, was a native of Suffolk, where he inherited a good estate; but having injured his fortune by early extravagances, he fitted out three vessels to cruise against the Spaniards; and sailing for the coast of South America, succeeded in taking several valuable prizes. After circumnavigating the globe, he returned to England with a large fortune. This he soon dissipated, and again went to sea; but meeting with no success, died of chagrin while off the coast of Brazil, in 1592.

CAVENDISH, Sir WILLIAM, a native of Suffolk, was born in 1505. He obtained the office of usher to Cardinal Wolsey; and the fidelity he displayed on the fall of his patron endeared him to Henry VIII., who took him into his service, and knighted him. In the succeeding reigns he was equally favoured, and his son became earl of Devonshire. He wrote the Life of his early friend and patron, Cardinal Wolsey. Died, 1557.

CAVENDISH, WILLIAM, duke of Newcastle, son of Sir Charles Cavendish, the youngest son of the last named. By James I. he was made a knight of the Bath, Baron Ogle, and Viscount Mansfield. Charles I. appointed him governor to the Prince of Wales, and made him earl of Newcastle. The earl proved himself worthy of the favour shown to him; for, when Charles I. resolved on an expedition against the Scots, he contributed £10,000—a very large sum at that time—besides raising a troop of horse. During the civil war he behaved with great gallantry; and when the royal cause became hopeless, he joined Charles II. in his exile. At the restoration, he was created duke of Newcastle. He was the author of several poems and plays, but is now chiefly remembered as an author for his treatise on horsemanship. Born, 1592; died, 1676.

CAVENDISH, WILLIAM, first duke of Devonshire, was the son of William, third earl of Devonshire. He was born in 1640, and attended James, duke of York, as a volunteer against the Dutch; but he soon made himself obnoxious at court by his opposition in parliament. He gave evidence in favour of Lord William Russell, and even offered to exchange clothes with that unfortunate nobleman to enable him to escape. In 1684 he succeeded to the title of earl of Devonshire, and was shortly afterwards imprisoned, and fined £30,000 for striking Colonel Culpepper in the presence chamber. For the payment of this large sum he gave bond, but before it became due, the arrival of the prince of

Orange had put an end for ever to the tyranny of James. The earl now became a favourite at court, and in 1694 his earldom was raised to a dukedom. Died, 1707.

CAVENDISH, HENRY, a member of the Devonshire family, and one of the most eminent natural philosophers of modern times, was son of Lord Charles Cavendish, and was born at Nice. He studied at Cambridge, and afterwards devoted himself exclusively to scientific pursuits, acquiring a distinguished rank among those who have most contributed to the progress of chemistry. By his discoveries relating to hydrogen, carbonic acid, and the formation of water, he laid the foundations of pneumatic chemistry. He wrote but little, but the finished character and accuracy of what he did write is marvellous, and perhaps unparalleled. By the death of an uncle, in 1773, he received a large addition to his fortune; and, being extremely regular and simple in his manner of living, he left at his death the enormous sum of £1,200,000 to his relations. Cavendish was never married, and avoided with singular shyness the society of women. It has been truly said of him, that he was "the richest among the learned, and the most learned among the rich men of his time." Born, 1731; died, 1810.

CAVOUR, Count CAMILLO RENZO DI, born at Turin, August 10, 1810, was the younger son of a noble house long settled in the neighbouring town of Chiavari. His mother was a native of Geneva; and from her he inherited that industry and solid good sense which have always characterized the citizens of that republic. He was born to the enjoyment of wealth and of the highest rank in one of the most exclusive societies of Europe, whose conventional restraints he had to throw off before he could enter with any hope of success in his great task of reforming the Italian nation. Regarded by his kinsmen and fellow-nobles as a renegade to his order, he devoted himself to advancing the real interests of the whole body of his countrymen. Owing to the suspicions thus caused, he was arrested, and for some time confined in the fort of Bard. In consequence of this he threw up his military commission, and spent several years abroad, chiefly in France and in England. With the English constitution, especially, he made himself most intimately acquainted, and always retained the highest sense of the principles on which it is founded. His sojourn in England occurred while the influence of Daniel O'Connell, in Ireland, was at its height; but the keen penetration of Count Cavour enabled himself at once to discern the factitious nature of the cry for Reform, and he embodied his opinions in a pamphlet which was the most remarkable of the many publications of foreign politicians on the subject. Returning to Turin in 1842, he established a political daily newspaper, called "Il Risorgimento," which became the most influential organ of the middle classes. After the battle of Novara had for the time destroyed the hope of Italian union, Cavour adopted a policy of compromise; and entering the Chambers, in 1849, as member for the first electoral college in Turin, he threw all his

influence on the side of party. In 1850 he became cabinet. At that time doubtfully the most dangerous Italian vices in its laws and With incredible labour, intermission, he reduced nagement of the country called forth its resources tary. Count a short illness, at Turin, J ed 50. Though deficient in the ence, his oratory has perhaps passed in the force of simple l invincible strength of logic

influence on the side of the constitutional party. In 1830 he became a member of the cabinet. At that time Piedmont was undoubtedly the most backward of all the Italian states in its laws and its organization. With incredible labour, sustained without intermission, he reduced the internal management of the country into order, and called forth its resources both civil and military. Fatigue, he said, he never felt, except when at leisure. Rising at five in the morning, he gave audiences from six to eight; after breakfast he went to his offices, where he transacted business without interruption until the evening, except when the Chambers sat. After dinner and, generally, a visit to the theatre, he returned to his office, where he frequently remained until midnight. In 1832 he again visited England, where he opened up his views to English statesmen. On his return a ministerial crisis occurred, and the king intrusted him with the direction of the government. Thus far Piedmont existed almost by itself; it was the object of Cavour to secure to it an entrance into the number of the great European powers. The war of France and England with Russia furnished the opportunity. Strong in the conviction that his country might thus recover all the prestige lost at Novara, he concluded an alliance with France and England; a Sardinian contingent served with success and distinction in the Crimea, and he thus obtained admittance into the Congress at Paris, where he secured the recognition of the existence of an Italian question. After the conclusion of the war he accompanied King Victor Emmanuel to Paris and London, where his power and genius were cordially acknowledged. In 1858 the alliance of Piedmont with France was further cemented by the marriage of Prince Napoleon with a Sardinian princess; and the expenditure of more than 800,000 francs being decreed for fortifying Alessandria, was regarded by the Austrian government as a menace. An ultimatum was presented at Turin, and rejected by Cavour. This was followed by the campaign of 70 days, during which were fought the battles of Magenta and Solferino. The peace of Villafranca was a terrible blow to Count Cavour; and even after the treaty of Zurich, which enabled him to put a different interpretation on the terms of the peace, he could never look back to that time without the deepest emotion. But his work was not carried on by a soldier in another quarter. The landing of Garibaldi in Sicily was followed by the deliverance of that island from the Bourbon rule, and by the expulsion of that dynasty from Naples. The Sardinian army then marched southwards; and the defeat of the Papal troops under General Lamarmora, and the reduction of Gaeta, were followed by the proclamation of Victor Emmanuel as king of Italy. Much yet remained to be done; but his work was practically accomplished, when, in the height of his vigour and his glory, Count Cavour died, after a short illness, at Turin, June 6, 1861, aged 80. Though deficient in the arts of eloquence, his oratory has perhaps never been surpassed in the force of simple language and the invincible strength of logic, which en-

abled him to sway an assembly abounding more than all others in Europe, in rhetorical talent. The publication of papers relative to some passages in his political life, for which he has been censured, will vindicate his name from unjust aspersions, and show the unwearied devotion of his whole life to the cause of his country.

CAXTON, WILLIAM, the earliest English printer, was a native of Kent, and was apprenticed, in 1438, to a mercer in London. Having served his time as a mercer, he went abroad in 1441, and settled in the Low Countries, probably at Bruges. He became governor of the Society of Merchant Adventurers, and afterwards was taken into the suite of Margaret of York, wife of the duke of Burgundy. While residing in Flanders, he acquired a knowledge of the art of printing, probably from Colard Mansion, the first printer of Bruges, and translated and printed in that country the Recuyell of the Histories of Troyes. Returning to England, in 1476, he set up a press in Westminster Abbey; and in 1477 issued the "Dictes and Snynges," the first book printed in England. In the practice of the new art Caxton enjoyed the patronage of the new art Caxton enjoyed the patronage of the kings Edward IV., Richard III., and Henry VII., and other royal and noble persons. Of the rest of his life we know little more than the titles of the books he wrote and printed, which are too numerous to name here. Died, 1491. A very learned and valuable work on "The Life and Typography of William Caxton," in 2 vols. 4to, by W. Blades, appeared in 1861-63.

CAYLUS, ANNE CLAUDE PHILIPPE DE, Count of, a French writer of great accomplishments and enthusiasm for art; author of the "Description of the Gems in the Royal Cabinet," a truly splendid work; "Dissertations on the Arts," &c.; and founder of a prize for drawing in the Academy of Painting. Born, 1692; died, 1765.

CAZES, PIERRE JACQUES, a French painter, pupil of Bon Boullongne. His principal works are in the cathedral of Notre Dame and other churches of Paris. Born, 1676; died, 1754.

CAZOTTE, JACQUES, a French litterateur, born at Dijon. He held a situation in the naval service, from which he retired and settled at Paris, in 1768. At the revolution, which he opposed with all his power, he was thrown into the prisons of the Abbaye, with his daughter Elizabeth; and when the massacre of the prisoners took place, his daughter threw herself between him and the murderers, thereby preventing the execution of their purpose; but he was again condemned to death, and perished by the guillotine, Sept. 25, 1792, at the age of 72. From the scaffold he cried with a firm voice to the multitude, "I die, as I have lived, faithful to God and to my king." Cazotte was author of "Le Diable Amoureux," "Olivier," and other poems, chiefly of the humorous kind.

CEAN-BERMUDEZ, JUAN AUGUSTIN, Spanish writer on art, was born in 1749. He began to apply himself to the study of art when about thirty years of age, and through the influence of his friend Jovellanos ob-

tained an office, and afterwards a pension. His principal work is a Biographical Dictionary of the principal artists of Spain, in 6 vols. He wrote also a history of the Seville school of painting, a Description of the Cathedral of Seville, a Life of Jovelanos, &c. He also edited and extended Laguno's Notices of the Architects and Architecture of Spain. Died, 1834.

CECCO DE ASCOLI, whose proper name was **FRANCESCO DROLI STABILI**, an Italian physician, mechanician, and poet; author of "L'Acerva," a poem, &c. In 1322, he obtained the appointment of professor of philosophy and astrology at Bologna, and subsequently that of physician and astrologer to the duke of Calabria; but being accused of magic, he was condemned by the Inquisition, and burnt to death in 1327.

CECIL, WILLIAM. [BURLEIGH.]

CECIL, ROBERT, earl of Salisbury, was the second son of Lord Burleigh, the great minister of Queen Elizabeth. He was educated at St John's College, Cambridge, and was early knighted. Trained to business under his father, he became first the assistant and then the successor of Secretary Walsingham. On the death of his father, in 1598, he became first minister. Towards the close of Elizabeth's reign he sedulously cultivated the friendship of James VI. of Scotland. The event justified his foresight, for he was continued in his office, and created earl of Salisbury soon after James's accession to the English crown. He held the office of lord high treasurer during the last four years of his life. He was an extremely able, and, generally speaking, upright minister; but he shrank from nothing which was likely to promote his personal success, and the share he had in causing the deaths of Essex and Raleigh disgraced him in the estimation of posterity. Born, about 1565; died, 1612.

CELAKOWSKY, FRANTISEK LADISLAV, poet and philologist, was born in Bohemia in 1799. He studied with great enthusiasm the Slavonic languages, and obtained a professorship at the university of Prague. Of that post he was deprived in 1831, for writing a severe newspaper article on Russian tyranny in Poland. He was subsequently professor of Slavonic literature at Breslau, and again at Prague in 1859. Besides his original poems he published collections of Slavonic and of Russian National Songs, the latter translated into Bohemian, and of Slavonic proverbs. He was engaged in preparing a Supplement to Jungmann's Bohemian Dictionary at the time of his death in 1852.

CELESTI, ANDREA, a Venetian painter. He executed some beautiful landscapes and some fine altar-pieces. Died, 1706.

CELESTINE I., pope; successor of Boniface I. He became pope in 422, condemned the doctrine of Nestorius in 430, and died in 432, with a high reputation for piety and wisdom.

CELESTINE III., pope, succeeded Clement III. in 1191. He claimed the kingdoms of Naples and Sicily, and conferred the latter on Frederick, son of the emperor Henry VI., on condition that he should be tributary to the holy see. Died, 1198.

CELESTINE V., pope. He was a Benedictine monk, and founder of the order of the Celestines, which was suppressed in France. He led a life of great seclusion, and the fame of his austerity caused him to be elected pope in 1294. Cardinal Cajetan persuaded him to resign, and then, having caused himself to be elected by the title of Boniface VIII., imprisoned Celestine, who died in confinement in 1296. In 1313 he was canonized by Clement V.

CELLARIUS, CHRISTOPHER, a learned German writer, professor of history at Halle; author of "Notitia Orbis Antiquæ," "Atlas Cœlestis," &c., and editor of several Greek and Latin authors. Died, 1707.

CELLIER, RENE, a learned French Benedictine; author of an "Apology for the Morality of the Fathers," written against Harboyrac, and compiler of a "General History of Sacred and Ecclesiastical Authors." Died, 1761.

CELLINI, BENVENUTO, a celebrated Italian sculptor and goldsmith, was born at Florence in 1600. His father wished to make him a musician, but he had music, and apprenticed himself to a goldsmith. The vicious propensities and quarrelsome temper which made his whole life troublesome and drove him frequently from place to place, early showed themselves. About 1518 he went to Rome, and lived there chiefly for more than 20 years, finding full employment in making costly and exquisite articles of goldsmith's work for Pope Clement VII., the cardinals and nobles of Rome. At the sack of Rome by the Constable de Bourbon, in 1527, Cellini commanded the castle of San Angelo and boasted that he killed the Constable. His services on that occasion was rewarded by the pope with his pardon for all homicides he had committed or might commit for the good of the church. In 1538 he was imprisoned at Rome on a charge of theft, and made professions of penitence, which came to nothing. Two years later he went to France, visiting his friend the Cardinal Ippolito d'Este, at Ferrara, on his way. Francis I. greatly admired him as an artist, and kept him in his service five years, rewarding him with rich gifts, a large salary, an ancient "Hotel," and the title of seigneur. Of the house he had to make himself master by violence, and thereby incurred the enmity of the royal mistress, Madame d'Etampes. Among the works executed for Francis I. were a bronze Nymph for Fontainebleau, a silver statuette of Jupiter, and a gold salt-cellar. Cellini returned to Florence in 1545, and there executed for Duke Cosimo his celebrated figure of Perseus, which occupied him four years. He then visited Rome for a short time, and there made the bronze bust of his host Blendo Altoviti, which was warmly praised by Michael Angelo. Cellini wrote treatises on the goldsmith's art, and on sculpture, and an Autobiography full of vivid and varied interest, not only personal but historical, and well known through an English translation. One of his finest later works was a marble crucifix, afterwards given by the grand duke to Philip II. of Spain, and now in the Escorial. Died at Florence in

1571, and was buried in Annunziata.

CELSIUS, OLAVUS, a learned early patron of Linnæus, a promoter of the science of Sweden. He published and other works, particularly "Herobotanicon," an action mentioned in the Bible. 1766.

CELSUS, AURELIUS CORDELIANUS, physician, probably of the author of treatises on agriculture and military affairs, and of medicine. All except the but that is used in the every nation in Europe.

CELSUS, an Epicurean, 2nd century. He wrote a Christian religion. It is we may judge from Origenes was a keen disputant disadvantage of assailing the error.

CELINI, GIOVANNI DOMENICO, Italian painter, chiefly of his Born, 1609; died, 1681.

CELINI, GIUSEPPE, an Italian dramatist. Born, 1738; died, 1800.

CERINTHUS, a heresiarch of the 1st century. He was by birth a Jew, and the speculations of Judæism were a compound of Judaism, and the speculations of

CERVANTES SAAVEDRA, the celebrated Spanish novelist. He gave early promise, and received a career studying at the universities of Salamanca, and perhaps, at Madrid. He soon became to the Cardinal Giulio

Rome. He then entered the service to serve in it during the years 1571 and 1575. He was wounded part in the famous battle where he was thrice wounded, and lost his left arm. After the troops at Naples, in the Spanish king; but in 1575 he was taken prisoner by a corsair, and carried to Algiers five years.

length ransomed, he again served as a soldier for several years, and was wounded, removed to Seville, and published in the course of about thirty dramas; but, though a great genius, he was not so successful as Lope de Vega, and he was obliged to undergo various hard shifts to earn a living. He eventually abandoned dramatic prose romance, and in 1605 he wrote that extraordinary work immortalized his name—"Don Quixote."

The second part appeared in 1615, and in view, by this work, to state and opinions of his countrymen, and to ridicule the silly romances popular in Spain, poor, unimproved imitations of the early chivalry, and which were exercised influence. The work, coldly received, but it so please, several editions were published within the first year after its

1571, and was buried in the church of the Annunciate.

CELSIUS, OLAUS, a learned Swede; the early patron of Linnaeus, and the first promoter of the science of natural history in Sweden. He published various theological and other works, particularly one entitled "Hierobotanicon," an account of the plants mentioned in the Bible. Born, 1670; died, 1756.

CELSUS, AURELIUS CORNELIUS, a Roman physician, probably of the time of Tiberius; author of treatises on agriculture, rhetoric, and military affairs, and of eight books on medicine. All except the last work are lost, but that is used in the medical schools of every nation in Europe.

CELSUS, an Epicurean philosopher of the 2nd century. He wrote a book against the Christian religion. It is not extant, but if we may judge from Origen's reply to it, Celso was a keen disputant, even with the disadvantage of assailing truth and defending error.

CERINI, GIOVANNI DOMENICO, an Italian painter, chiefly of historical subjects. Born, 1609; died, 1681.

CERINI, GIUSEPPE, an Italian poet and dramatist. Born, 1738; died, 1770.

CERINTHUS, a heresiarch of the 1st century. He was by birth a Jew, and his doctrine was a compound of Judaism, Christianity, and the speculations of the Gnostics.

CERVANTES SAAVEDRA, MIGUEL DE, the celebrated Spanish novelist, was born in 1547. He gave early promise of literary talent, and received a careful education, studying at the universities of Alcala, his native place, and Salamanca, and afterwards, perhaps, at Madrid. He soon became chamberlain to the Cardinal Giulio Aquaviva, at Rome. He then entered the army, and continued to serve in it during the four years between 1571 and 1576. He took a distinguished part in the famous battle of Lepanto, where he was thrice wounded, and lost the use of his left arm. After this, he joined the troops at Naples, in the service of the Spanish king; but in 1575 he was taken prisoner by a corsair, and remained in slavery at Algiers five years. When he was at length ransomed, he again served as a soldier for several years, and then settled at Madrid, married, removed to Seville in 1588, and published in the course of ten years about thirty dramas; but, though he shewed great genius, he was not so successful as his rival Lope de Vega, and he was driven to various hard shifts to earn a livelihood. Ultimately he abandoned dramatic composition for prose romance, and in 1605 appeared the best part of that extraordinary work, which immortalized his name—"Don Quixote." The second part appeared in 1615. Cervantes is viewed, by this work, as reforming the taste and opinions of his countrymen. He is looked upon as the author of the most popular romances in Spain, poor, unnatural, exaggerated imitations of the earlier romances of chivalry, and which were exerting a very pernicious influence. The work was, at first, coldly received, but it soon met with applause, several editions were called for within the first year after its appearance,

and it may now safely be said to be one of the most popular works that was ever written. In its moral purpose "Don Quixote" achieved a complete success, for it formed an insuperable barrier against the further advance of the deluge of romance. It was speedily translated, and became a classic in most European languages. Eight English translations appeared between 1620, the date of the first, and 1755. Still its extraordinary good fortune did not extend to the author, who struggled on for many years with nothing to console him in his poverty but his genius, and the just consciousness of it. Nearly all the plays of Cervantes are lost. Of his other works the most noteworthy are his "Novelas Exemplares," and his "Viaje al Parnaso," the latter a satire on the inferior poets of the age. It is usually remarked that Cervantes and Shakespeare died on the same day, the 23rd April, 1616; but Carlyle has pointed out that as Spain had previously adopted the new style while the old was retained in England much later, there would be a difference of ten days between the reckoning in the two countries. A magnificent French edition of Don Quixote, with illustrations by Gustave Doré, appeared in 1863, in 2 vols. folio. These illustrations have been since reproduced in an English edition.

CESARI, GIUSEPPE, Italian painter, was born at Rome about 1568. He obtained employment in the Vatican, and became a great popular favourite. He had the patronage of several popes, and for many years held his ground against all rivals, including Annibale Caracci and Caravaggio. His principal work is the series of frescoes in the Conservatorio in the Capitol, illustrative of events in Roman history. His drawing was spirited, rapid, and inaccurate; executed with great facility and without any regard to the truth of nature. He had many imitators, who were named "Idealists," in contradistinction to the partisans of Caravaggio, the "Naturalists." Died, 1640.

CESARINI, GILIANO, Cardinal. He was born about 1398, and having been raised to the cardinalate in 1426, was sent to preach in Germany against the innovators in religion. He distinguished himself as president of the council of Bassi against the Hussites. Being sent by the pope to Hungary, he persuaded Ladislaus to break truce with the Turks. The battle of Varna ensued, Nov. 1444, and the cardinal disappeared, but it is not known what became of him.

CESAROTTI, MELCHIORRE, an Italian poet, and professor of Greek and Hebrew in the university of Padua; author of "Essays on the Italian Language," and translator into Italian of "Ossian's Poems." His translation of the "Iliad" is a ridiculous caricature. Cesarotti was sent on a political mission to Napoleon, who knighted and pensioned him, in return for which the poet became a servile flatterer of the despot. Born, 1730; died, 1808.

CEPEDES, PAOLO DE, an eminent Spanish painter. He was a native of Cordova, and studied the fine arts at Rome, whence he returned to Cordova in 1577. He acquired the name of the Spanish Raphael. His prin-

etpal work is "The Last Supper," an admirable picture in the cathedral of Cordova. He was author of a learned treatise on ancient and modern painting, and of several other works. He was a learned orientalist, and the friend of the great scholars and artists of his age. Died, 1608.

CHABERT, JOSEPH BERNARD, Marquis of, a distinguished navigator, astronomer, and geographer, born at Toulon, in 1734. He entered the navy at an early age, performed several distant voyages, and formed the project of a chart of the Mediterranean. But the American war interrupted the work, and called Chabert to his post, where he distinguished himself so highly, that, in 1781, he was made commander of a squadron. The revolution drove him to England, and he was received by Dr Maskelyne with great kindness. In 1800 he lost his sight, in consequence of his intense application to study; and, in 1803, he returned to Paris, where Buonaparte assigned him a pension. Died, 1805.

CHABRIAS, an Athenian general, who distinguished himself in various expeditions between B. C. 392—357. He assisted Evagoras of Cyprus against the Persians, and the Thebans against the Spartans, defeated the latter at Naxos, and while commanding the fleet at Chlor, was killed, B. C. 357. A statue was erected to him at Athens.

CHAISE, FRANÇOIS DE LA, a French Jesuit, confessor to Louis XIV., over whom he acquired a vast influence. Died, 1700. The site of his house and grounds at Paris is now occupied by the beautiful cemetery which bears his name.

CHALCONDYLES, DEMETRIUS, a learned Greek, who, on the taking of Constantinople in 1453, established himself as a teacher of Greek in Italy. He wrote a Greek grammar, and edited the lexicon of Suidas. Died, 1513.

CHALCONDYLAS, NICHOLAS, of LAONICUS, one of the Byzantine historians, flourished in the latter part of the 13th century. He was a native of Athens, and wrote a History of the Turks, and of the Fall of the Greek Empire, from 1298 to 1463.

CHALMERS, ALEXANDER, M.A., F.S.A., was born in 1759, at Aberdeen, where his father carried on business as a printer. When he was eighteen years of age, an appointment of assistant surgeon in the West Indies was procured for him; but instead of sailing for Jamaica he proceeded to London, where he connected himself with the press. He became editor of the Public Ledger and London Packet newspapers, during the period of the American war. Party politics were then running high, and Mr Chalmers obtained much credit as a political writer to other journals under the signature of *Senex*. He was for a long time a contributor to the Morning Chronicle, and afterwards editor of the Morning Herald; he also entered into engagements with several publishers, to edit their books, and published many works in his own name. In 1812 the first portion of the work appeared, which, of all his productions, has the most largely contributed to his fame, namely, "The General Biographical Dictionary," which was completed in

1817; and he continued to occupy himself in literary pursuits till ill-health compelled him to abandon them. Died, 1834.

CHALMERS, GEORGE, a Scotch writer of considerable ability and industry; author of "Caledonia," "An Estimate of the comparative Strength of Great Britain," &c. His statistical ability procured him the situation of chief clerk of the Board of Trade, which he enjoyed for many years. Born, 1742; died, 1825.

CHALMERS, Rev. Dr THOMAS, was born at Anstruther, in Fifeshire, on the 17th of March, 1780, and was early sent to study at St Andrew's University. His college career was distinguished by some of his subsequent peculiarities—energy, good humour, companionableness, and ascendancy over others; and it was then that his passion for the physical sciences was first developed. Besides theology, he studied mathematics, chemistry, and some branches of natural history, with more than youthful enthusiasm, and with such success that, besides assisting his own professor, he made a narrow escape from the mathematical chair in Edinburgh. On the completion of his theological studies he officiated for about two years as assistant in the parish of Cavers, and in 1803 he obtained a presentation to the parish of Kilmany in Fifeshire. Here he remained for some years, in the quiet discharge of his clerical duties, when he was suddenly awakened to a knowledge of "vital Christianity," while engaged in writing the article "Christianity" for Brewster's Edinburgh Encyclopedia; and from this moment his quickened and concentrated faculties were intent on reviving the old "evangelium of the Puritans and the Reformers."

In 1815 the town council of Glasgow invited him to be the minister of the Tron church. Thither he repaired, and in that city he laboured for eight years. In 1817 he visited London. Here his popularity was not less overwhelming. The churches in which he was to preach were crowded long before the service commenced; and amongst his auditors were a number of the distinguished clergy, peers, members of parliament, and literary characters of all classes and denominations. "All the world," writes Wilberforce in his diary, "was about Dr Chalmers. Canning, Huskisson, Lords Elgin, Harrowby, &c., present. I was surprised to see how greatly Canning was affected; at times he was quite melted into tears." After continuing about four years minister of the Tron church, he was removed to the new church of St John's. In this new sphere he tried to give practical direction to the theories he had propounded relative to the support and the suppression of pauperism. But the work he had undertaken deprived him of that solitude required for pulpit preparations, especially for such pulpit exhibitions as he was wont to give; and he was fain to seek relief in an academic retreat. In 1821 he accepted the chair of moral philosophy at St Andrew's; in 1828, he was removed to the chair of theology in the university of Edinburgh; and here he prosecuted his "utilitarian" labours, lecturing, preaching, publishing, organizing schemes for the welfare of the church, and taking an active

management in her court of the Church of Scotland joined the Free Church, mainly contributed to principal and professor succeeding body. In the paired to London to give the sites' committee of mons. "He preached all fully, and on the last again at home. That even have remarked to a friend his public work complete all that met the grand of forum—in stately repose or who beheld it said, 'a mould of the sons of men. outline of the life of Dr not alluded to the man, which from time to time, His works published time, in 25 vols., embrace facts, chiefly relating to the economy; among these are all Discourses,' first published they formed a new era in pit oratory. Besides these humorous works, consisting (ture Readings," "Institu &c., have been published by Dr Hanna, to whose interest Dr Chalmers we must refer the fullest information concerning the works of this illustrious analysis of his mind, the meets us in his brilliant mastered not what the success and all he invented without of imagination and diction, as at once captivate But those very powers soon into seeming inconsistency the discussion of his present apt to forget those which engaged his mind, and how previously advanced bore illustration. Hence a casual Dr Chalmers at the bar of consistency, and object to in some public movements did but an acquittal would be ground, that he never pleased unless convinced at the time the spiritual and temporal fellow-men. But such of character are like motives Considered in every view, the philosopher, the philanthropist, great by intellectual power, of life, one on whose life soon look again. Died, May CHALONER, Sir THOMAS statesman. He obtained his gallantry at the battle of and was afterwards sent by Q ambassador to Spain, and translated Erasmus's "Encom or Praise of Folly, and wrote Anglorum Instauranda," &c. CHALONER, Sir THOMAS above, was distinguished as a natural philosopher. He discovered the alum mines of Y

management in her courts, till the disruption of the Church of Scotland in 1843, when he joined the Free Church, which he had mainly contributed to found, and became principal and professor of theology to the seceding body. In the spring of 1847 he repaired to London to give his evidence before the sites' committee of the House of Commons. "He practiced all the sublimities of his solemn language in England, willingly and powerfully, and on the last Sabbath of May he was again at home. That evening he is said to have remarked to a friend, that he thought his public work completed. Next morning all that met the gaze of love was the lifeless form—in stately repose on the pillow, as one who beheld it said, 'a brow not cast in the mould of the sons of men.'" In this meagre outline of the life of Dr Chalmers, we have not alluded to the many valuable works which from time to time he gave to the world. His works published during his lifetime, in 25 vols., embrace a variety of subjects, chiefly relating to theology and political economy: among these are his "Astronomical Discourses," first published in 1817, when they formed a new era in the history of popular oratory. Besides these, 9 vols. of posthumous works, consisting of "Daily Scripture Readings," "Institutes of Theology," &c., have been published by his son-in-law, Dr Hanna, to whose interesting memoirs of Dr Chalmers we must refer the reader for the fullest information concerning the life and works of this illustrious man. In an analysis of his mind, the first power that meets us is his brilliant imagination. It mattered not what the subject might be, each and all he invested with such a splendour of imagination and magnificence of diction, as at once captivated and entranced. But those very powers sometimes led him into seeming inconsistencies. Altho' only to the discussion of his present theme, he was apt to forget those which had previously engaged his mind, and how the arguments previously advanced bore upon his present illustration. Hence a casuist might arraign Dr Chalmers at the bar of strict political consistency, and object to the part he took in some public movements during his career; but an acquittal would be given, on the ground, that he never pleaded any cause, unless convinced at the time that it was for the spiritual and temporal welfare of his fellow-men. But such defects in such a character are like notes in a symphony. Considered in every view,—the preacher, the philosopher, the philanthropist,—we see one great by intellectual power, great by holiness of life, one on whose like Scotland will not soon look again. Died, May 31, 1847.

CHALONER, Sir THOMAS, an English statesman. He obtained his knighthood by his gallantry at the battle of Musselburgh, and was afterwards sent by Queen Elizabeth ambassador to Spain and Germany. He translated Erasmus's "Encomium Morum," or Praise of Folly, and wrote "De Republica Anglorum Instauranda," &c. Died, 1665.

CHALONER, Sir THOMAS, son of the above, was distinguished as a chemist and natural philosopher. He discovered or first worked the alum mines of Yorkshire, and

was author of a tract on the virtues of nitre. Died, 1615.

CHALONER, EDWARD, an English divine, son of the above, chaplain to James I., and one of the most celebrated preachers of his time. He died of the plague, in 1625.

CHALONER, JAMES, brother of the preceding, a member of parliament, and one of the judges of Charles I. His zeal in the parliamentary cause obtained him the governorship of Peel Castle, in the Isle of Man. At the restoration in 1660, messengers were sent to apprehend him, when he committed suicide.

CHAMBERLAYNE, EDWARD, LL.D., publicist, was born in Gloucestershire in 1618. He was author of several works, the most important of which is one on the ancient and modern state of England, entitled "Angliæ Notitia." It ran through nearly 40 editions. This author is a remarkable example of vanity, and the follies to which it leads men. It is related of him that he directed that some of his works, wrapped in cere-cloth, should be buried with him, as (so the monument records) they might be of use to a future age! Died at London, 1703.

CHAMBERS, EPHRAIM, originator and editor of the Cyclopædia which bears his name, was a native of Kendal, but was apprenticed in Landou. The first edition of his Cyclopædia appeared in 1728, and procured him admission to the Royal Society. It passed through six editions in little more than twenty years, and formed the basis of the greater work of Dr Rees, and the model of many others. Died at London, and was buried in Westminster Abbey, 1740.

CHAMBERS, GEORGE, an English marine painter, was a native of Whitby in Yorkshire, and spent his boyhood in a seafaring life. After acquiring some skill as a painter of sea-pieces he went to London, had employment as a scene-painter, and was appointed marine painter to the king and queen. Among his works are the "Bombardment of Algiers," the "Capture of Portobello," and the "Victory over the French Fleet at La Hogue," all in Greenwich Hospital. Died, 1840.

CHAMBERS, Sir WILLIAM, an English architect, born at Stockholm in 1726. He was educated in England, and settled early at London. He was employed by George III. to plan the gardens at Kew, and was afterwards appointed architect of Somerset House, which is his principal work. In his youth he visited China, and acquired a singular taste for the Chinese style of building, which he adopted at Kew, and recommended in his work on "Oriental Gardening." He wrote a "Treatise on Civil Architecture," was made knight of the Polar Star, and died in 1796.

CHAMISSO, ADOLBERT VON, son of Louis, Viscount d'Ormont, was born at Roncourt in Champagne in 1781. Driven with his parents from their home by the French revolution, he was educated at Berlin, where he became one of the royal pages, served in the Prussian army till the peace of Tilsit, and then returned to France, where he remained till 1812, as professor at Napoleonville. But his strong inclination for his favourite study,

natural history, and the attachment he had imbibed for the land of his education, once more drew him to Berlin, where he seized the opportunity of accompanying Katschub in his voyage round the world in 1815; and on his return, in 1818, he was appointed superintendent of the botanic garden of Berlin, an office which he held till his death. Chamisso's works range over various departments of literature. "His Views and Observations during a Voyage of Discovery" is a very interesting and trustworthy narrative; his poems take rank among his countrymen with those of Uhland; and, as the author of "Peter Schlemml," he has obtained a European fame. Died, 1836.

CHAMPAGNE, PHILIP, an eminent Flemish painter, was born at Brussels in 1602; went to Paris, where he studied under Poussin, and became painter to the Queen Maria de Medici, who gave him the direction of the paintings in the Luxembourg; and he was also made director of the Academy of Fine Arts. His paintings, which are very fine, adorn the dome of the Sorbonne, the Museum of Paris, &c. Died, 1674.

CHAMPEAUX, GUILLAUME DE, French philosopher and theologian of the eleventh and twelfth centuries. He was long a distinguished teacher of rhetoric, dialectic, and theology in the school of Paris. The celebrated Abelard was his disciple, and he became his rival and formidable opponent. After years of stormy controversy Champeaux was made bishop of Châlons-sur-Marne, devoted himself to the duties of his office, entered the Cistercian order, and died, 1121.

CHAMPIER, SYMPHONIE, a French physician. He wrote several learned works, and founded the Royal College at Lyons. He also served in Italy under the duke of Lorraine, by whom he was knighted for his courage. He compiled several works, of which the most valuable is "Les Grans Chroniqueurs des Princes de Savoie." Died, 1540.

CHAMPLAIN, SAMUEL DE, a French naval officer. He was governor-general of Canada, and founded the city of Quebec; and there is a lake in Canada which bears his name. His "Travels in Canada" contain much curious information. Died, 1634.

CHAMPOLLION, JEAN FRANÇOIS, the younger, a French Egyptologist, was born at Figeac in 1791. His ruling passion was awakened by the sight of some Egyptian figures when he was only twelve years old, and in 1807 he went to Paris to study Arabic and Coptic. He was soon after named professor of history at Grenoble, but his thought constantly turned to Egypt, and he worked at his "Egypt under the Pharaohs." In 1824 he went to Italy, and four years later conducted the scientific expedition to Egypt, returning in 1830 laden with precious fruits of his researches. Champollion devised a phonetic alphabet for the decipherment of the hieroglyphic inscriptions, in which however he had been to some extent anticipated by Dr Young. The "Précis du Système hiéroglyphique" appeared in 1824. His theory was sharply criticised by Klaproth. Champollion also

published "Pantheon Egyptien," 2 vols. 4to.; and in conjunction with his fellow-traveller, Rosellini, the "Monuments de l'Egypte et du Nubie." Died, 1832.

CHANCELLOTT, RICHARD, an English navigator, and founder of the English Russia Company. By this company he was sent to Russia a second time, and, while on his return with the Russian ambassador and suite, he perished off the coast of Norway, in 1686.

CHANDLER, RICHARD, divine and antiquary. He was born in Hampshire in 1736, and was educated at Oxford university. He travelled, in 1764, through Asia Minor and Greece, at the expense of the Dilettanti Society; and wrote, in conjunction with his fellow-travellers, Levet and Pars, the "Ionian Antiquities." He afterwards published his "Travels in Asia Minor," and "Travels in Greece." Before setting out on his travels Dr Chandler had published a new and magnificent edition of the "Marmorum Oxoniensium." (Died, rector of Thurst, 1810.)

CHANDLER, SAMUEL, an eminent dissenting divine; he was born in Berkshire, and was minister of a congregation in the Old Jewry, London, for forty years. He was author of a "Vindication of the Christian Religion," a "Vindication of the History of the Old Testament," "History of the Life of David," &c. The latter was his most important work, and was occasioned by the publication of a vulgar pamphlet on the same subject, in which the character of David was ridiculously misrepresented. Born, 1693; died, 1760.

CHANDOS, JOHN, an English general of great celebrity, in the 14th century; distinguished not more for his bravery than for his generosity and moderation. He was present at the battle of Crecy, became governor of the provinces of France ceded to England by the treaty of Bretigny; defeated and took prisoner Duguesclin at Auray; served under the Black Prince in Castile; was made constable of Aquitaine (Gulenne); and was killed at the bridge of Leusac, near Poitiers, in 1369.

CHANNING, WILLIAM ELLERY, D.D., Unitarian divine and miscellaneous writer, was born at Newport, Rhode Island, U. S., in 1780. His maternal grandfather, William Ellery, was one of those who signed the Declaration of Independence, and his father was a partner in the mercantile firm of Gibbs and Channing, at Newport. Educated at Harvard College, he was early induced to abandon the profession of medicine, for which his father intended him, and to prepare himself for the Unitarian ministry; and in 1803 he commenced his career by taking charge of the congregation in Federal Street, Boston. His eloquence rendered him from that time forth one of the most conspicuous men in America. To assert that his discourses display great genius would be absurd; they are, indeed, striking specimens of pulpit eloquence; but they are the discourses of a mere oratorical moralist rather than those of a Christian preacher. To the honour of Dr Channing it must be said, that he was ever the advocate of peace, and that though he could not but be

aware that his opposition must needs diminish his influence in season and out of season, he never announced it. A volume "Discourses, &c." was published, Oct. 3, 1842, aged 62.

CHANTREY, SIR FRANK P.S.A., &c., sculptor, was born near Sheffield, in 1791. He discovered considerable talent for modelling, and during his apprenticeship with Mr Ramsay, a Sheffield engraver, the whole of whose time he was devoted to the study of his favourite pursuits. He went to London, where he attended the Royal Academy, he returned to his career of fame and began until 1809, when he was employed by Mr Alexander, the proprietor of a colossal bust of Howe, St Helena, and Nelson, at the Trinity, the Greenwich Naval Asylum, &c. He was an unrelaxing period he was unremittingly and continually successful, and the success of his chief, the Duke of Wellington, in 1817, that exquisite group of "Children" (the daughters of Robinson) in Lichfield cathedral, which he acknowledged as "his beauty and innocent and unadorned" Orders crowded in upon him, and he was able to execute more than he could notice his busts of Lord Water Scott, the poets W. G. Southey, Mr Canning, John IV., William IV., Queen Victoria, Sir Robert Peel, &c. of Wellington; and his busts of West, Sir Cyril Jackson, Grant, Sir Joseph Banks, &c. Canning, Sir John Malcolm, Roscoe, General Gillespie, Russel (when a child), Fisher, Ryder, &c. To this list we add his principal statues: George IV., at Brighton and Pitt in Hanover Square and the equestrian statues of Munro, at Madras, and the Duke of Wellington for the city of London, 25, 1841.

CHAPMAN, GEORGE, dramatist of Homer, was born in London, and is said to have studied at Oxford. He enjoyed the friendship of contemporaries Spenser and the patronage of several men, and died, honoured at 1694. His dramas and other numerous, but his reputation chiefly on his "Huds of Huds," never before truly translated, appeared, complete, in 1693. He was the author of a ballad more admired for its vigour, factness of expression, and originality, than for its carelessness and negligence. He also translated the Odyssey of the works of Hesiod and Callimachus. CHAFONE, HESTER, writer, was born in Northampton, 1726. She is principally known for her "Letters on the Improvement

aware that his opposition to the slave system must needs diminish his popularity, he was instant in season and out of season in denouncing it. A volume of his "Reviews, Discourses, &c.," was published in 1830. Died, Oct. 3, 1842, aged 63.

CHANTREY, SIR FRANCIS, R.A., F.R.S., F.S.A., &c., sculptor, was born at Norton, near Sheffield, in 1781. When a mere child he discovered considerable talent in drawing and modelling; and during his apprenticeship with Mr Ramsay, a carver and gilder at Sheffield, the whole of his leisure hours were devoted to the study and practice of his favourite pursuits. After a short visit to London, where he attended the school of the Royal Academy, he returned to Sheffield; but his career of fame and fortune was not begun until 1800, when he received an order from Mr Alexander, the architect, for four colossal busts of Howe, St Vincent, Duncan, and Nelson, for the Trinity House, and for the Greenwich Naval Asylum. From this period he was unremitting in his efforts, and continually successful; and, among the productions of his chisel, there appeared, in 1817, that exquisite group of "The Sleeping Children" (the daughters of the Rev. W. Robinson) in Lichfield cathedral; universally acknowledged as "images of artless beauty and innocent and unaffected grace." Orders crowded in upon him in number beyond his ability to execute. Among them were noticed his busts of Lord Castlereagh, Sir Walter Scott, the poets Wordsworth and Southey, Mr Canliff, John Keble, George IV., William IV., Queen Victoria, Lord Melbourne, Sir Robert Peel, and the Duke of Wellington; and his statues of James Watt, Dr Cyril Jackson, Grattan, Washington, Sir Joseph Banks, Spencer Perceval, Canals, Sir John Malcolm, Dr Dalton, Rocece, General Gillespie, Lady Louisa Russell (with a child), Bishops Bathurst and Ryder, &c. To this list we ought perhaps to add his principal statues in bronze, viz. George IV. at Brighton and in Edinburgh, Pitt in Hanover Square and Edinburgh, and the equestrian statues of Sir Thomas Munro, at Madras, and the duke of Wellington for the city of London. Died, Nov. 23, 1841.

CHAPMAN, GEORGE, dramatic poet and translator of Homer, was born in 1657. He is said to have studied at Oxford, settled at London, enjoyed the friendship of his great contemporaries Spenser and Shakespeare, and the patronage of several eminent statesmen, and died, honoured and beloved, in 1684. His dramas and other works are numerous, but his reputation now rests chiefly on his "Hinds of Homer, Prince of Poets, never before truly translated," which appeared, complete, in 1693. It is written in the old English ballad metre, and is still admired for its vigour, facility, and happiness of expression, although frequently discoloured by carelessness and unfaithfulness. He also translated the *Odyssey*, and portions of the works of *Hesiod* and *Ovid*.

CHAPONE, HESTER, miscellaneous writer, was born in Northamptonshire in 1726. She is principally known by her "Letters on the Improvement of the Mind,"

addressed to a young lady, and published in 1773. Died, 1801, aged 74.

CHAPPE, CLAUDE, nephew of the astronomer, JEAN CHAPPE D'AUTEROUCHE, was born in 1763. He introduced the use of telegraphs into France; and the first public event communicated by the new method was the capture of Condé, recovered from the Austrians in 1793. The honour of the discovery being claimed by others, his mind was so much affected that he committed suicide, in 1805.

CHAPTAL, JEAN ANTOINE CLAUDE, count of Chanteloupe, a French chemist and statesman, born at Nogaret in 1756. He was destined for the profession of medicine, and had completed his studies when he was induced to accept the professorship of chemistry at Montpellier. His lectures procured him great reputation, and on the breaking out of the revolution he took an active part in it, and was selected by the new government to superintend the manufacture of gunpowder at Grenelle. He became member of the Institute, and professor of chemistry at the Polytechnic School. In 1799 the first consul made him councillor of state; and, in the following year, minister of the Interior. He held this post four years, and by his zeal and energy rendered very great services to the arts and manufactures of his country. Chaptal lost for some reason the favour of Napoleon, and retired into private life. Yet still honours were accumulated upon him, and he was made grand officer of the Legion of Honour, senator, peer of France, member of the Academy of Sciences, &c. He took a distinguished part in the discussions of the Chamber of Peers, and died in 1832. Among his numerous works are, "Éléments de Chimie," "Traité théorique et pratique de la Culture de la Vigne," &c.; "La Chimie appliquée aux Arts," &c.

CHARDIN, SIR JOHN, a celebrated French traveller, born at Paris in 1643. He went to the East in 1664, spent several years at Ispahan, was well received by the court of Persia, visited India, saw Persepolis, and returned in 1670. He made a second journey to the same countries in the following year, and was absent ten years. In 1681 he came to London, was knighted, married, admitted to the Royal Society, and employed on some diplomatic missions. His "Travels" appeared in 1686—1711, and have been frequently republished. Died, near London, in 1713.

CHARES, an Athenian general, who lived B. C. 370—333. He was joint commander of the Athenian fleet in 356, and soon after assisted the satrap Artabazus in his revolt against Artaxerxes, king of Persia. He served in the Olynthian war, and was one of the commanders at the battle of Chæronea, B. C. 338.

CHARLEMAGNE, or CHARLES THE GREAT, king of the Franks, and emperor of the West, was the eldest son of Pepin the Short, and grandson of Charles Martel, and was born at Saizburg in 742. He succeeded his father, with his brother Carloman, in 768, and on the death of Carloman three years later became sole monarch. He had previously married and repudiated the

Poitiers; destroying their army and slaying their king Aberahman. In 735 he made himself master of Aquitaine and Gascony. He took Avignon from the Saracens, gained another great victory over them near Narbonne, and with the aid of Liutprand, king of the Lombards, besieged them in that town. Charles had never taken the title of king, but only that of mayor of the palace, but at his death he divided his dominions like a king between his sons Carloman and Pepin. Shortly before his death he received two nuncios from Pope Gregory III., the first that were sent to France. Charles acquired the surname **MARTEL** (Hammer) from his victory over the Saracens near Tours. Died, 741. He was interred in the church of St Denis.

CHARLES II., or, more properly, **I.**, surnamed **THE BALD**, king of France. He was crowned king in 840, and elected emperor by the Romans in 875. *Med.*, it was supposed by poison, in 877.

CHARLES III., king of France, surnamed **THE SIMPLE**. He ascended the throne in 893. His whole reign was one struggle against the Normans and his turbulent barons, who at length caused Robert, a prince of the blood royal, to be crowned. In the battle fought between the two sovereigns, Robert was slain; but his son, Hugh the Great, pressed Charles so hard, that he sought shelter in the castle of the Count of Vermandois, where he died, in 929.

CHARLES IV., son of Philip the Fair, succeeded to the crown of France in 1322. His reign lasted only six years, and in that brief time he was deprived by England of the province of Guienne. Died, 1328.

CHARLES V., **THE WISE**, king of France, was born in 1337. He was eldestson of John II., and the first dauphin of France. He was present with his father at the battle of Poitiers, and was recognized as regent during his father's captivity. He succeeded to the throne in 1364. One of his earliest acts was to get rid of the *Grand Compagnes*, which occasioned so many disorders and miseries in France, and to send them under Duguesclin to fight against Peter the Cruel in Spain. He recovered several provinces from the English, and concluded another treaty with them in 1373. John of Gaunt, however, the same year marched unopposed through France from Calais to Bordeaux. Charles V. was a friend of literature, founded the royal library of France, and had the Bible and St Augustin's "City of God" translated into French. The great fortress of the Bastille was founded by him in 1370. Died, 1380.

CHARLES VI., **THE WELL-BELOVED**, king of France, was born in 1368. He was son of Charles V., and succeeded him in 1380. The regency was disputed by his uncles, and the young king was therefore declared of age, and ruled by a council. The oppressions of the government caused insurrections in various parts of France, which were severely repressed. In 1382 the young king marched against the Flemings, then in revolt under Philip van Artevelde, and the Constable de Clisson defeated them at Rosbach. The next year he marched again against the Ghentese,

who were assisted by the English under Spenser, the "fighting bishop" of Norwich, and defeated them. In 1385 he had immense preparations made for an invasion of England, but they came to nothing. In 1392 Charles became insane, and with occasional intervals remained so till his death. The jealousies and strifes of his uncles were renewed, and led to the civil wars of the Burgundians and Armagnacs; in the midst of which Henry V. of England invaded France, took Harflour, and won the great victory of Agincourt, October, 1415. Three years later Henry overran Normandy and took Rouen; married the princess Katharine, and was recognized heir to the crown of France. Charles VI. died in 1422, a few weeks after Henry V.

CHARLES VII., **THE VICTORIOUS**, king of France, was born in 1403. He was the only surviving son of Charles VI., became dauphin in 1416, and succeeded his father in 1422. Henry VI. of England was also proclaimed king, and the great duke of Bedford was regent of France. War with the English continued, and in 1428 they besieged Orleans, which was saved by the extraordinary intervention of Joan of Arc. After triumphing over the English she conducted the king to Rheims, and there had him crowned. The cause of the English declined until they had lost all they held in France except the town of Calais. The miseries brought on the country by the long-continued wars, and by the disorders and lawlessness of the mercenary bands of troops, were relieved by the reform which Charles effected in the army. He also set a limit to the papal authority in France by the establishment of the so-called "Pragmatic Sanction," published in 1438. The celebrated Agnes Sorel was mistress to Charles VII. Charles died in 1461.

CHARLES VIII., king of France, was born in 1470. He was son of Louis XI., and succeeded him in 1483, under the regency of his sister, Anne of France. The first years of his reign were troubled by the turbulence and revolts of the nobles; and in 1491, in consequence of Charles refusing to marry the daughter of the emperor Maximilian, the latter allied himself with Henry VII. of England against France, and was broke out. Peace was, however, soon restored. The great event of this reign was the invasion of Italy in 1494: when Charles entered Florence, Rome, and Naples, almost unresisted. An alliance was formed against him, and he defeated the allies on his return at Fornovo. Died, 1498.

CHARLES IX., king of France, was born in 1550. He was son of Henry II. and Catharine de Medicis, and succeeded his brother Francis II. in 1560, under the regency of his mother. The civil wars of the Huguenots and Catholics fill up the history of his reign. Intrigues between the nobles and leaders, treaties of peace, partial concessions of religious liberty, assassinations, battles, and above all, the atrocious massacre of St Bartholomew, form the staple of the sad story. The colloquy of Poissy took place in 1561; the edict of St Germain was published in the following year; and soon after the

massacre of a Protestant congregation at Vassy was perpetrated. The defeat of the Huguenots at Dreux by the duke of Guise; the assassination of the duke; the memorable conference of the queen-mother and Charles with the queen of Spain and the duke of Alva at Bayonne; the battle of St Denis; the defeat of the Huguenots at Jarnac; the assassination of the prince of Condé immediately afterwards; the defeat of the Huguenots at Moncontour; and the treaty of St Germain;—these are the leading events that mark the course of the great struggle and lead up to its awful crisis. In 1570 Charles married Elizabeth, daughter of the emperor Maximilian II., and some of the Protestant leaders took part in the celebration of it. In August, 1572, the young king of Navarre was married at Paris to Margaret, sister of Charles, and the leading men of the Protestant party were invited to attend. The assassination of the great admiral de Coligny took place on the 23rd August, and on the 24th the great massacre began. From that time Charles was the victim of the most terrible remorse. Continually haunted by visions of the horrible scenes of those days, he died broken down in mind and body in May, 1574.

CHARLES X., king of France, or CHARLES PHILIPPE DE BOURBON (known as Count d'Artois until the accession of his brother Louis XVIII., and afterwards as Monsieur), was the fifth and youngest son of the dauphin Louis, son of Louis XV., and was born in 1757. In early life he had acquired a character for dissipation, extravagance, and hauteur, which bore a still more unfavourable appearance when contrasted with the conduct of his elder brothers; and such indeed was his unpopularity, that at the very outset of the revolution he found it necessary for his personal safety to quit his native land. In 1773 he had married the princess Maria Theresa, daughter of Victor Amadeus III., king of Sardinia, to whose court he now fled for refuge. He subsequently visited other parts of Europe, and eventually found an asylum with his brother, Louis XVIII., first at Holywood House, Edinburgh, and afterwards at Hartwell, in Buckinghamshire. On his succeeding to the throne of France in 1824, it was seen that he adhered too much to the exploded dogmas of the old régime to acquire the same degree of popularity that, by good tact and a more complying disposition, his predecessor had enjoyed. On the 25th of July, 1830, in consequence of the result of a general election, Charles X. issued his two fatal ordinances, one abolishing the freedom of the press, and the other changing the mode of election. A popular insurrection, of three days' continuance, which has since been dignified with the title of "the glorious revolution of 1830," took place in Paris, and paved the way for Louis Philippe. The king retreated from St Cloud to Rambouillet, where he offered to abdicate in favour of his grandson, the duke of Berdeaux, and requested from the provisional government a safe-conduct to a sea-port. Embarking at Cherbourg, he sailed for England, and for a time took up his residence at

Lulworth Castle, and then removed to Holywood House, the scene of his former exile. There he remained about a twelvemonth; afterwards retired to the Austrian dominions; and died, in his 80th year, at Goritz, in Illyria, Nov. 4, 1837. The latter years of this monarch were passed in acts of superstitious devotion; he constantly wore hair-cloth next his skin, he fasted much, and frequently imposed upon himself, as a penance for some hasty expression, an absolute silence for several hours. The Dukes d'Angoulême and de Berry were his sons.

CHARLES THE BOLD, or THE RASH, last duke of Burgundy, was son of Philip the Good and Isabella of Portugal. He was born at Dijon, bore at first the title of count of Charolais, under which he distinguished himself on several occasions, and especially at the battle of Montlithéri in 1465. He succeeded his father in 1467, and was immediately at war with the people of Liège, whom he subdued and treated with savage cruelty. In the next year he received an immense bribe from Louis XI. not to invade France, and soon afterwards had a memorable interview with him at Peronne. A fresh rising took place in Liège during the conference, at the instigation of Louis, whom Charles, disposed to the most violent course, shut up for several days, and then compelled to accompany and aid him in suppressing the insurrection. Liège was taken and sacked, not even the churches being spared. In 1470 Charles received Edward IV. of England, whose sister, Margaret of York, he had married two years before, and aided him with money and ships to return to England. The same year he renewed the war with Louis XI. In 1473 he went to meet the emperor Frederick III. at Treves, hoping to get from him the titles of king and vicar-general of the empire, but the terms could not be settled. He afterwards allied himself with Edward IV. against the king of France, but more pressing affairs prevented his fulfilment of the bargain. He conquered Lorraine and took Nancy in 1475, and then marched against the Swiss, who won two memorable victories over him at Granson and Morat. Chagrined and hopeless melancholy he seized and, for a time, paralyzed him. He was roused by the tidings of the loss of Nancy, and set out to retake it. During the siege one of his officers deserted with his troops to the enemy, and in the battle which was fought on the following day, 5th January, 1477, Charles was defeated and killed. His body was found two days after in a ditch, and was only recognizable by the long beard and nails, never cut after the defeat at Morat. His remains, at first buried at Nancy, were removed by Charles V. to Bruges. A new "History of Charles the Bold," by J. F. Kirk, has lately been published.

CHARLES I., king of Naples and Sicily, was born in 1220. He was son of Louis VIII. of France, and was made count of Anjou. By marriage with the daughter of Raymond Berenger, count of Provence, he became heir to his dominions. He accompanied his brother St Louis on the crusade, and was taken prisoner at Damietta. He was crowned king of Sicily at Rome, in

1566, and soon after deposed Benevento. His tyranny at the head of which was Manfred, who was immediately beheaded. Charles more cruel and oppressive disaffection and hatred of length, when he was master of the eastern empire of his subjects took place. French in Sicily were event is known as the Sicilian fight for his throne. for died in 1285.

CHARLES XII., king successor of Charles XI. of age when he ascended and his youth encouraged and Poland to unite against powers, however, found the task of humbling them subdued, he attacked Russian battle of Narva, in have slain 30,000, making 20,000 prisoners, force was short of 10,000 his power; he dethroned made Stanislaus king in his whole course had been seeking utterly to crush he sustained a terrible defeat of Pultowa, and was wounded, that he was removed on a litter, and compelled Turkey. Here his conduct that the grand signior was siege his residence. After Charles was overpowered months he was kept a prisoner sooner he was allowed to return millions than he commenced Norway, and in besieging was killed by a cannon-shot of clear, precise, and graphic line-engraving on a reduced size of that Swede, and CHARLES XIV., king of NADOTTE.]

CHARLES ALBERT, son of Carlo Emanuele, prince was born 2nd Oct. 1798. A but little chance of ever succeeding for there were seven male of Savoy, through whom have descended. His early frequently passed in comparison and his name was but a Europe until the revolution broke out in support of the Constitution of 1812, compelled Emanuele to abdicate in her, and led to Charles Albert as regent of the kingdom. who had all along been in conspirators, took measures designs; but the duke of G favour King Vittorio had refusing refused to sanction of the new government, Charles Albert fled to Novara and betrayed the party who co-operated. Renouncing

1566, and soon after defeated Manfred at Benevento. His tyranny provoked a revolt, at the head of which was Conradin, nephew of Manfred, who was defeated and immediately beheaded. Charles became more and more cruel and oppressive in his rule, and disaffection and hatred increased; till at length, when he was meditating the conquest of the eastern empire, a general revolt of his subjects took place in 1281, and the French in Sicily were massacred. This event is known as the *Sicilian Vespers*. He fought for his throne for several years, and died in 1285.

CHARLES XII., king of Sweden, son and successor of Charles XI., was only 15 years of age when he ascended the throne in 1697, and his youth encouraged Russia, Denmark, and Poland to unite against him. Those powers, however, found him fully equal to the task of humbling them. Denmark being subdued, he attacked Russia; and in the famous battle of Narva, in 1700, he is said to have slain 30,000 of the enemy, besides making 20,000 prisoners, though his own force was short of 10,000. Poland next felt his power; he dethroned Augustus, and made Stanislaus king in his stead. Thus far his whole course had been prosperous; but in seeking utterly to crush Peter the Great, he sustained a terrible defeat at the battle of Pultowa, and was himself so severely wounded, that he was removed from the field on a litter, and compelled to seek shelter in Turkey. Here his conduct was so violent that the grand signior was compelled to besiege his residence. After desperate resistance Charles was overpowered, and for ten months he was kept a prisoner. He no sooner was allowed to return to his own dominions than he commenced an attack on Norway, and in besieging Frederickshall was killed by a cannon-shot, in 1718. Voltaire's "Histoire de Charles XII." is a model of clear, precise, and graphic narration: "a line-engraving on a reduced scale," says Carlyle, "of that Swede, and his mad life."

CHARLES XIV., king of Sweden. [BERNADOTTE.]

CHARLES ALBERT, king of Sardinia, son of Carlo Emanuele, prince of Carignano, was born 2nd Oct., 1798. At his birth he had but little chance of ever swaying the sceptre, for there were seven male heirs of the house of Savoy, through whom the crown might have descended. His early life was consequently passed in comparative insignificance, and his name was but slightly known to Europe until the revolution of 1821, which broke out in support of the so-called Spanish Constitution of 1812, compelled King Vittorio Emanuele to abdicate in favour of his brother, and led to Charles Albert's nomination as regent of the kingdom. Charles Albert, who had all along been in the secrets of the conspirators, took measures to carry out their designs; but the duke of Genevois, in whose favour King Vittorio had resigned the crown, having refused to sanction the proceedings of the new government, and having taken instant measures to put down the insurgents, Charles Albert fled to Novara, and deserted and betrayed the party with whom he had co-operated. Renouncing the opinions he

had adopted, he acted as a volunteer in 1823, in Spain, under the duke d'Angoulême, and there lent his aid to crush the constitution, the principles of which he had so lately attempted to establish in Sardinia. On his return to Turin he remained in retirement until the death of Carlo Felice led to his accession to the throne, 27th April, 1831. During the first 17 years of his reign few events occurred to give a clear insight into the natural bent of his mind; but in March, 1848, after the Milanese had driven out the Austrians from Northern Italy, he a second time unfurled the revolutionary banner, and in a proclamation to the "people of Lombardy and Venice," espoused the cause of Italian regeneration against Austria. His arms were at first crowned with success; but the Austrian field-marshal Radetzky having regained step by step the positions he had lost, at length compelled the Sardinian forces to evacuate Milan in August of the same year, and in September, an armistice was signed by the contending parties. In March, 1849, Charles Albert was forced, by the clamours of his subjects, to renew the war with Austria. But the Sardinian army was defeated at all points by Marshal Radetzky in the shortest campaign on record, four days; and immediately afterwards, on the 24th of March, Charles Albert abdicated the throne in favour of his eldest son, Victor Emmanuel II., now king of Italy, and precipitately leaving Turin, took up his residence at Oporto, where he died, as it is alleged, of a broken heart, July 18th, 1849.

CHARLES, LOUIS DE LORRAINE, arch-duke of Austria, a distinguished military commander, son of the emperor Leopold II., and younger brother of Francis II., was born 1771. He first entered on the career of arms under Prince Coburg in 1793; and his great abilities, not less than his exalted rank, rapidly procured his elevation in command. After the battle of Nerwinden, which restored that rich province to the imperial power, he was appointed governor of the Low Countries, and was soon after created a field-marshal. In 1796 he was promoted to the command of the imperial armies on the Rhine, gained some advantages over the republican generals Jourdan and Moreau, whom he compelled to retire across the Rhine; took Kehl in 1797; subsequently commanded in Italy against Buonaparte and Massena; long disputed victory at Caldiero, Eckmühl, and Essling; but lost the decisive battle of Wagram, where he was wounded. After this event he lived in retirement, during which he wrote a luminous and impartial narrative of his campaigns, and enriched military science with the profound views set forth in his "Principles of Strategy." Died, 1847.

CHARLES I., king of England, was born at Dunfermline, in Scotland, in the year 1600. He was the third son of James VI. of Scotland and I. of England, by Anne, daughter of the king of Denmark; and upon the death of Prince Henry, his elder brother, in 1612, was created prince of Wales. A negotiation having been long carried on for the marriage of Charles with the Infanta of Spain, he went in 1623,

attended by the profligate minister Buckingham, to conclude it in person. But the affair came to an end. On the death of his father, in 1625, he ascended the throne, his kingdom being engaged in war with Spain, and the people much embittered against his friend and minister, Buckingham. Immediately after his accession Charles married the Princess Henrietta Maria of France, whose character and influence undoubtedly augmented the troubles and evils of the time. It unfortunately happened for Charles I. that he had as high and exacting a notion of the royal prerogative as either his father or Elizabeth, while he had to deal with an entirely different state of public opinion. From the very first, therefore, he found himself in sharp collision with his subjects; his aim being to rule as an absolute monarch, to hold the purse and the army, and do as he liked with them, and their aim being to prevent all that. Want of supplies on his part, calling of parliaments to grant them, refusal of supplies, and demand of redress of grievances, and more just administration, dissolution of parliaments, government without them, and all kinds of illegal and tyrannous measures, no man's life or property being secure,—such are the main elements of the conflict which filled up the years preceding the outbreak of actual war. The parliament impeached Buckingham, and the king supported him; war with France was declared, against the popular wish, because Buckingham so willed it; and while the parliament was firm in its resistance, the king was obstinate and impolitic in his enforcement and extension of his prerogative. The third parliament, called in 1629, passed the famous Petition of Right, to which the king most reluctantly and indeed insincerely gave his assent. After the murder of Buckingham the chief advisers and willing instruments of the king were Laud, then bishop of London, and Sir Thomas Wentworth, afterwards earl of Strafford. Ship money was levied, and the legality of it contested by Hampden. The Star Chamber was active, unwearied in its merciless prosecutions, edicts, and atrocious sentences. In Nov. 1640 the memorable Long Parliament met, and at once secured itself against dissolution except by its own consent. The struggle went on, and at length war was proclaimed by the king, setting up his standard at Nottingham in August, 1642. The first battle between the king's forces and the parliamentary army was at Edgehill, in which neither party had much to boast of. For some time, however, the royalists were generally successful; but the battles of Marston Moor, Newbury, and Naseby were all signally unfavourable to the royal cause. Indeed, after the defeat at Naseby, the king was so powerless, that he took the resolution of throwing himself upon the good feeling of the Scottish army, then lying before Newark; and by that army he was basely sold, and delivered into the hands of the parliament. All attempts to treat between the king and the parliament failed, chiefly from the evident insincerity of the king. It was impossible to rely on his word. For a time he was treated with much outward

respect, but he found means to make his escape from Hampton Court. On arriving on the coast, with the intention of quitting the kingdom, he could not obtain a vessel to go abroad, but crossed over to the Isle of Wight, where the governor, Hammond, confined him in Carisbrook Castle. While there, negotiations were again carried on between him and the parliament, but unsuccessfully. In Dec. 1648 the House of Commons was "purged" by Colonel Pride, the members left forming the "Rump." It was then resolved by the Commons that the king should be tried as guilty of treason in making war on his parliament, and a special high court of justice was constituted for the occasion. The trial took place in Westminster Hall in January, 1649. The king was condemned to death, and on the 30th of January beheaded at Whitehall; his last word to Bishop Juxon being a charge to him to admonish Prince Charles to forgive his father's murderers.

CHARLES II., king of England, son of Charles I., was born in 1630. He was living as a refugee at the Hague when the sentence on his father was carried into execution. He, nevertheless, assumed the regal title, and finding that the Scots had proclaimed him, he left the Hague for Scotland, and was crowned at Scone. Cromwell marched towards Scotland to give him battle, and Charles took the spirited course of passing by forced marches into England. Cromwell, however, whose force was superior, discovering the manoeuvre, retrograded in pursuit; and the royal army was overtaken at Worcester, and utterly routed. After difficulties and escapes which have rather the air of romance than of stern matter of fact, Charles escaped to France, where he resided for some years, keeping up the military of a court, but frequently reduced to extreme distress. The death of Cromwell, the general discontent of the people with the narrow-minded bigotry which had thrown a gloom over the whole land, and the dexterous policy of General Monk, restored Charles to his crown and kingdom in 1660; and he reigned with a power far greater than that for which his father had been put to death. Untaught by adversity, he was luxurious, selfish, and indolent. The English Nonconformists were treated with jealous rigour, and the Scottish Covenanters were shot and sabred without compunction. And, perhaps, Charles's reply to some complaints made to him of Lauderdale's cruelty in Scotland, will give quite as full a clue to his kingly character as can be required:—"I perceive," said Charles, "that Lauderdale has been guilty of many bad things against the people of Scotland; but I cannot find that he has acted against my interest." Died, 1685. During this monarch's reign, the capital was visited by heavy calamities; the plague in 1665, and the fire of London in the following year; while pretended plots and conspiracies were made pretences for bringing some eminent persons, who were obnoxious to the court, to an ignominious death. As to the character of Charles II., he was, in the fullest acceptance of the terms, a sensualist and voluptuary; encouraging, by his example, a

taste for dissolute living, the moral health of society preserved a degree of pro multitudine, from the agr manners, yet he was total ble sentiments.

CHARLES EDWARD the Young Pretender, the II., was born at Rome, in landed in Scotland, and festo exhibiting the claim the English throne. He sons of the Highlanders, Edinburgh, he caused his claimed; on which Gener towards the capital, but w Pretender at Preston Pa Instead of making a par torary, by advancing into returned to Edinburgh, w an idle parade of royalty, being joined by Lords Kilm Balmerino, and other disc he marched as far as Dier that the king was about to returned to Scotland, where English forces, under Haw in the mean time the duke advanced to Edinburgh, and Aberdeen, the Pretender re him. At last the two armie on April 27, 1746, when a conduct, in which the H played prodigious courage, was signally defeated, and Charles, after wandering abe agulues, chiefly among the E his escape to France. E ence in 1788.

CHARLETON, WALTER, a cian, born in Somersetshire, appointed physician to Char broad with Charles II., and him at the restoration. He B.S., and elected president of Physicians. His writings, on phy, medicine, theology, and ophy, are very numerous, especially his "Onomasticon Chorea Gigantum;" the form arrangement of animals, the l Stonehengs. Died, 1707.

CHARLEVOIX, PIERRE F ER, a French Jesuit, and for sionary in America. On h became conductor of the Jou ux. In addition to his nu bulations to that work, he wr générale de Paraguay, "Hist la Nouvelle France," &c. D CHARLOTTE AUGUSTA, george, prince of Wales, and the nces Caroline (afterwards Ge een Caroline) was born Jan arrived to Prince Leopold of O king of Belgium), May 2, earliest years she gave stron nobleness of mind and grea as she grew up, a feeling of ent attachment for her on ple was universally displeas merely accomplished accor mon acceptance of the ter E acquainted with history, sta

taste for dissolute living, and thus poisoning the moral health of society; and though he preserved a degree of popularity with the multitude, from the agreeableness of his manners, yet he was totally destitute of noble sentiments.

CHARLES EDWARD STUART, called the *Young Pretender*, the grandson of James II., was born at Rome, in 1721. In 1745 he landed in Scotland, and published a manifesto exhibiting the claims of his father to the English throne. He was joined by some of the Highlanders, and on entering Edinburgh, he caused his father to be proclaimed; on which General Cope hastened towards the capital, but was attacked by the Pretender at Preston Pans, and defeated. Instead of making a proper use of this victory, by advancing into England, Charles returned to Edinburgh, wasting his time in an idle parade of royalty. Afterwards, on being joined by Lords Kilmarnock, Cromarty, Balmerino, and other discontented chiefs, he marched as far as Derby; but hearing that the king was about to take the field, he returned to Scotland, where he defeated the English forces, under Hawley, at Falkirk. In the mean time the duke of Cumberland advanced to Edinburgh, and from thence to Aberdeen, the Pretender retreating before him. At last the two armies met at Culloden, April 27, 1746, when, after an obstinate conflict, in which the Highlanders displayed prodigious courage, the rebel army was signally defeated, and entirely dispersed. Charles, after wandering about in different disguises, chiefly among the Hebrides, effected his escape to France. He died at Florence in 1788.

CHARLETON, WALTER, an English physician, born in Somersetshire, 1619. He was appointed physician to Charles I., resided abroad with Charles II., and returned with him at the restoration. He was admitted B.S., and elected president of the College of Physicians. His writings, in natural history, medicine, theology, and natural philosophy, are very numerous and learned, especially his "Onomasticon Zoicon" and "Chorea Gigantum;" the former a classified arrangement of animals, the latter an essay on Stonehenge. Died, 1707.

CHARLEVOIX, PIERRE FRANÇOIS XAVIER, a French Jesuit, and for some time a missionary in America. On his return, he became conductor of the *Journal de Tréoux*. In addition to his numerous contributions to that work, he wrote "*Histoire Générale de Paraguay*," "*Histoire Générale de la Nouvelle France*," &c. Died, 1761.

CHARLOTTE AUGUSTA, daughter of George, prince of Wales, and the unfortunate princess Caroline (afterwards George IV. and married to Prince Leopold of Coburg (afterwards king of Belgium), May 2, 1816. From her earliest years she gave strong indications of nobleness of mind and great docility; as she grew up, a feeling of sympathy and attachment for her on the part of the people was universally displayed. She was merely accomplished according to the common acceptation of the term, but was acquainted with history, statistics, and

other more abstruse branches of knowledge; spoke several modern languages, and excelled in music, painting, &c.; while her active benevolence and solicitude for the poor rendered her an object of their especial regard. Her marriage with Prince Leopold was the result of mutual esteem. But the hopes of the nation, and the anxious wishes of the husband, were suddenly blighted: on the 5th of Nov. 1817, the princess was delivered of a still-born child; and, in a few hours after, she was seized with convulsions and expired. Never before, perhaps, was national and individual sorrow so strikingly or so sincerely expressed, and never, perhaps, was it more deservedly bestowed. The unhappy dissensions of her royal parents, and the vicious blandishments of courtly parasites, were strikingly contrasted at Claremont with conjugal affection and the pure pleasures of a virtuous life. No wonder, then, that the people should have looked forward to her reign with delight; nor can it be a matter of surprise that their grief should have been intense when thus bereft of "England's hope."

CHARNOCK, JOHN, an English naval officer and miscellaneous writer; author of a "*History of Marine Architecture*," "*Biographia Navalis*," a "*Supplement to Campbell's Lives of the Admirals*," &c. Died, 1807.

CHARNOCK, STEPHEN, a Nonconformist divine. He was a very eloquent and popular preacher, and advocated Calvinistical doctrines with great force and originality. His "*Discourse on Providence*" is considered the best of his writings. Died, 1880.

CHARONDAS, an early Greek legislator, who probably flourished in the 6th century B. C. He was a native of Catania, and gave laws to his fellow-countrymen there and in other cities of Sicily and south Italy. It is supposed that his laws were in verse. Charondas is related to have killed himself for having broken one of his own laws, which forbade any one to enter the popular assembly in arms.

CHARON, PIERRE, a French divine, and a friend of Montaigne, who, by will, left him the privilege of bearing his arms; a strong proof, considering the pride of a Gascon, of his personal consideration. His chief works are "*Traité des trois Verités*," an argument in behalf of religion, Christianity, and the Catholic Church; and "*Traité de la Sagesse*," which has been frequently reprinted. Born, 1541; died, 1603.

CHASSE, DAVID HENRY, Baron, a brave Dutch general, was born in 1765. After serving a few years in the army he entered the service of France, distinguished himself in the Prussian campaign of 1806, and in many campaigns of the Peninsular war. His most celebrated achievement however was his defence of Antwerp against the French in 1832. He had been governor of the city from 1815. Died, 1849.

CHASSENEUX, BARTHELEMI DE, an eminent French lawyer; author of "*Catologus Gloriae Mundi*," "*Consilia, or Consultations on Points of Law*," &c. It is greatly to his honour that he used all his power as president of the parliament of Provence to

his glowing imagination, lose much of their interest from the overweening vanity which peers through every page, and which has converted that which might have been a grand "pièce justificatif" of a life, as remarkable for political changes as the era in which it was passed, into a theme for the regret of the thoughtful, and the satire of the scornful. Died, July 4, 1848.

CHATEL, FRANCIS DU, a Flemish painter of the 17th century. His chief work, which is in the town-hall of Ghent, represents the king of Spain receiving the oath of fidelity from the states of Flanders and Hrabant.

CHATEL, PIERRE DU. [DUCHATEL.]

CHATEL, TANNEGUY DU, an able French general. He was in the famous battle of Agincourt; and when the Burgundians surprised Paris, he was fortunate enough to save the dauphin, between whom and the duke of Burgundy he afterwards brought about a reconciliation. Died, 1449.

CHIATHAM, WILLIAM PITT, Earl of, one of the most illustrious British statesmen, was the son of Robert Pitt, Esq., of Hocknock, in Cornwall, where he was born in 1708.

After studying at Eton and Oxford, he entered the army, but was returned to parliament in 1734 as member for Old Sarum. His talents as an orator were soon displayed in opposition to Sir Robert Walpole, and had so great an effect, that the duchess of Marlborough, who had a deadly hatred to that minister, bequeathed to Mr Pitt a legacy of £10,000. On the change of administration in 1749, he was made joint vice-treasurer of Ireland, and soon afterwards paymaster-general of the army, which place he resigned in 1755; but the year following he was appointed secretary of state. In a few months he was again dismissed from office; but an efficient administration being essential, and the nation being enthusiastically attached to him, he returned, in June, 1757, to his former situation as secretary of state and virtual prime minister. His great mind now revealed its full force, and his ascendancy was complete over parliament no less than in the ministry. He roused the English nation to new activity, and, in the space of a few years, we recovered our superiority over France, annihilating her navy, and stripping her of her colonies. France was beaten in the four quarters of the world. In 1760, he advised the declaration of war against Spain, while she was prepared for resistance, as he foresaw that she would assist France. The elevation of England on the ruins of the house of Bourbon was the great object of his policy. But his plans were suddenly interrupted by the death of George II., whose successor was adjudged against Pitt by his adversary, the earl of Bute, a statesman of limited views. Pitt, therefore, resigned his post in 1762, only retaining his seat in the House of Commons. Foreseeing the separation of the American colonies from the mother country, if the arbitrary measures then adopted should be continued, he advocated, especially in 1765, a conciliatory policy, and the repeal of the stamp act. In the same year he was appointed to assist in forming a new ministry, which he took the office of privy seal,

and was created Viscount Borton, Baron Pynsent, and earl of Chatham; but in 1768 he resigned, partly because of a serious illness, and partly because he found himself inadequately seconded by his colleagues. In the House of Lords he continued to recommend the abandonment of the coercive measures employed against America, particularly in 1771; but his warning was rejected, and, in 1776, the colonies declared themselves independent. He still, however, laboured in the cause, and used all his efforts to induce the government to effect a reconciliation with the American states; and, as he was speaking with his accustomed energy on the subject in the House of Lords, April 7, 1778, he fell down in a convulsive fit. He died on the 11th of the following month, and his body, after lying in state, was solemnly interred in Westminster Abbey, where a superb monument was erected to his memory at the national expense. The fine picture of the "Death of Chatham," painted by Copley in 1779-80, was presented to the National Gallery in 1828.

CHIATHAM, JOHN, Earl of, &c., eldest son of the celebrated statesman whose life we have just given, and brother of William Pitt. He was born in 1756, and succeeded to the peerage on the death of his father, in 1778. In the following year he was appointed captain of the 86th regiment of foot, and served in the American war. He was afterwards appointed by his brother (then prime minister) first lord of the admiralty; was sworn a privy-councillor, and elected a knight of the Garter. His promotions, both civil and military, were rapid and numerous under his brother's administration, and he continued to hold office for many years after, under his successors. As lieutenant-general, he commanded the unfortunate expedition to Walcheren, in 1809, and was, three years afterwards, raised to the full rank of general. On the death of the duke of Kent he was appointed governor of Gibraltar, which he held, with other offices, to the time of his death, in 1835. He was the last peer of the Pitt family, whose title has now become extinct, and with it the annual pension of £4000, besides another pension of £3000 per annum, granted to his father for three lives, in 1761. The last earl was married, in 1783, to a daughter of Viscount Sydney, but they had no children.

CHATTERTON, THOMAS, an English poet, whose precocious genius and melancholy fate have gained him much celebrity, was born at Bristol, in 1752. He was educated at Colston's charity school, and then articled to a lawyer; but his taste for literature and distaste for law rapidly grew, and he was set free after serving about half his time. His father was sexton of Redcliff church, Bristol; and young Chatterton professed to have received from him several ancient manuscripts. These he palmed upon the world as the poems of Rowley, a priest of Bristol in the 15th century; and so admirably was his forgery executed, that it is even now rather assumed than proved, though there can be little moral doubt of it, that he did forge and not find the MSS. In 1769, he went to London, trusting to literature for a live-

hood. Having vainly endeavoured to persuade Horace Waipole and other scholars of the genuineness of the MSS., Chatterton, though still a mere boy, became a party writer; but this resource failed him, and in a state of deep despondency, produced by absolute want, he destroyed himself by poison, in 1770, at the age of 18.

CHAUCELL, GEOFREY, the great early English poet, was born at London, in 1328. He was educated at the universities of Oxford and Cambridge, studied law for a short time, and became one of the pages of Edward III. He gained the favour of the king, and of his son, John of Gunt, duke of Lancaster, was employed on various affairs of state, and sent ambassador to Genoa, Milan, and France. He served in the expedition to France, in 1359, and was made prisoner. He afterwards fell into disgrace, probably as a friend of John of Gaunt and of Wicliffe, and for some time he was in great poverty. He had a pension from the crown, which was doubled by Henry IV., and he spent the last years of his life in rural retirement. Chaucer is called the "Father of English poetry," and not undeservedly so. But his rare charms and excellencies as a poet are obscured to modern readers who will not be at the pains to master the difficulty of an antiquated form of our language. His principal poem is the "Canterbury Tales," supposed to be told by a party of Canterbury pilgrims on their way. Among his other works are "Troilus and Cresside," "Legend of Good Women," "The Flower and the Leaf," "The Court of Love," &c. Died, at London, 1400. Chaucer's only daughter, Alice, married William de la Pole, duke of Suffolk, and his eldest son, Thomas, was knighted, and held important offices in the state under Henry IV. and Henry V.

CHAUDET, ANTOINE DENIS, an eminent French sculptor and painter. He was born at Paris, 1763, and having obtained the grand prize, studied at Rome. He became professor at the Academies of Painting and Sculpture, and a member of the Institute. Among his works are a colossal "Minerva pointing to the Crown of Immortality," statues of Cædipus, Cincinnatus, Napoleon, &c., and a painting of "Æneas and Anchises amid the conflagration of Troy." Died, 1810.

CHAULIEU, GUILLAUME AMPRYE DE, French lyric poet. His poems, which, with those of the Marquis de la Fare, have been frequently reprinted, are a mixture of Anacreontic sensualism, and the good-humoured philosophy of Horace. Born, 1639; died, 1720.

CHAULNES, ALBERT, Duke de, a French nobleman and man of science. He was well skilled in chemistry, and contributed many valuable papers to the Memoirs of the Royal Academy of Sciences. Died, 1769.

CHAUMETTE, PIERRE GASPARD, one of the most violent and vulgar of the French revolutionists. He was of low origin, and after serving some time on board ship, became clerk to an attorney. At the breaking out of the revolution he became one of the street orators, and was so conspicuous by his violence, that, in 1793, he was made first a member of the municipality of Paris,

and then procurer, or attorney. When the Mountain party, in 1793, wished to overthrow the more moderate Girondists, Chaumette was one of the chief instruments of doing so, and was in consequence extremely popular. During the confinement of the unfortunate Louis XVI. in the Temple, Chaumette and Hébert heaped every indignity upon him; and with them, it is said, originated the most horrible of all the charges made against the queen. He at length met his reward. Robespierre, himself already on the very verge of ruin, threw him into the prison of the Luxembourg, and he was guillotined in 1794.

CHAUNCEY, SIR HENRY, an English lawyer and antiquary. He was knighted by Charles II. in 1681, and in 1688 was made a Welsh judge. Just before his death he published the "Historical Antiquities of Hertfordshire," one of the most valuable of our county histories. Died, 1700.

CHAUNSE, MICHEL MARIE DE LA, a French archeological writer; author of a learned work entitled, "Museum Romanum," "Pittura antiche delle grotte di Roma," &c. Died, 1710.

CHEKE, SIR JOHN, an eminent English statesman and scholar. Becoming regius professor of Greek at Cambridge, he strenuously laboured to improve the prevailing pronunciation of that language; and the opposition he met with from Gardiner, bishop of Winchester, produced a literary correspondence between them, which was afterwards published at Basle. Having taken part in the education of Edward VI., that king, on his accession, granted him some landed estates. He also made him a privy councillor and secretary of state, and conferred the honour of knighthood upon him. Unfortunately for him he engaged, on the death of Edward VI., in the cause of Lady Jane Grey, and was consequently sent to the Tower on the accession of Mary. His life was spared, and he was allowed to leave England; but while he was abroad he gave some new offence to the queen, and his estates were confiscated. Visiting Brussels he was seized by order of Philip II. and sent to England, where, under fear of being put to death, he renounced Protestantism. Having done this, the queen, though she did not restore his estates, gave him some equivalent for them; but she embittered them by compelling him to sit on the bench at the trial of Protestants whose attachment to their faith was stronger than their fears of death. Besides his correspondence with Gardiner, he wrote and translated several treatises. He also left in MS. an English translation of St Matthew, in which no word was admitted of other than Saxon origin. Born, 1514; died, 1557.

CHEMNITZ, MARTIN, a distinguished German theologian, was born in Brandeburg, in 1522. He became a disciple of Meiburg, at Wittenberg, and was for a few years librarian to Duke Albert of Prussia. He settled as pastor at Brunswick, in 1554, and was afterwards made superintendent of the churches of that diocese. He took a leading part in procuring the adoption of the "Formula of Concord" in Saxony and

Suabian. Chemnitz was among the princes of Germany, learning, and church works are the "Examen ni," in 4 vols. folio, est and dispassionate refutat doctrines, "Loci Theolog Evangelica," and "The præcipua capita," &c. D

Saabia. Chemnitz was in great honour among the princes of Germany for his abilities, learning, and character. His principal works are the "Examen Concilii Tridentini," in 4 vols. folio, esteemed as a solid and dispassionate refutation of the Catholic doctrines, "Locci Theologicæ," "Harmonia Evangelica," and "Theologia Jesuitarum præcipua capita," &c. Died, 1586.

CHEMNIZER, IVAN IVANOVICH, a Russian soldier and poet. He served several campaigns in the Imperial guards, and afterwards entered the corps of engineers. When he at length retired he published various tales and fables, which the Russian critics compare to those of La Fontaine. Born, 1744; died, 1784.

CHENEVIX, RICHARD, an Irish gentleman of great and versatile ability as a writer; author of "Remarks on Chemical Nomenclature according to the System of the French Neologists," "Observations on Mineralogical Systems," &c. Died, 1830.

CHENIER, MARIE JOSEPH, a French poet and miscellaneous writer; author of "Charles IX.," "The Death of Calas," "Timoleon," and some other dramas; of several patriotic songs, which were very popular during the revolution, and of "An Historical Sketch of the State and Progress of French Literature." He was member of the Convention, Legislative Assembly, and Council of Five Hundred, and survived all the horrors of the "Reign of Terror," retaining his popularity under the directorial, consular, and the Imperial governments. He died in 1811.—His elder brother, ANTOINE MARIE, born 1762, perished by the guillotine, July 25, 1794, for his staunch adherence to Louis XVI. Twenty-five years after his death a volume of odes, Idyls, and elegies from his pen was published, which placed him high in the list of French poets.

CHERUBINI, MARIA LUIGI CARLO ZECCHI SALVADOR, a distinguished musical composer, was born at Florence in 1760. His precocious skill in music attracted the attention of the grand duke of Tuscany, who gave him a pension, and this enabled him to complete his studies under Sartori. In 1784 he repaired to London, where he produced the "Flinta Principessa," and "Giulio Sabino." In 1786 he settled in Paris, which thenceforward became his adopted country; and the scene of his greatest triumphs. His operas of "Iphigenia," "Iodice," "All Baba" would alone have secured to the extent and variety of his talents; but his fame chiefly rests upon his sacred music, of which his "Requiem," composed for his own obsequies, deserves particular notice. He was director of the Conservatoire at Paris, where he died, full of honours, 1842.

CHESELDEN, WILLIAM, an eminent English surgeon and anatomist; author of treatise on "The Anatomy of the Human Eye," which passed through many editions, and "On the High Operation for the Stone," &c. He was an admirable oculist; though his system of lithotomy involved in much controversy, it is undoubtedly

that he very greatly improved the means of relieving one of the most terrible complaints to which we are subject. Cheselden was elected F.R.S. in 1713. He was born in 1688, and died, 1752.

CHESTERFIELD, PHILIP DORMER STANHOPE, Earl of, was born in 1694, and educated at Trinity College, Cambridge. He went the grand tour, and acquired the taste and habits of a gambler; first sat in parliament as a member for Lostwithiel; and in 1728, on his father's death, succeeded to the earldom of Chesterfield. He was a particular favourite of George II., on whose accession he was sworn a privy councillor; was appointed, in 1728, ambassador extraordinary to Holland; made a Knight of the Garter in 1730, and was appointed steward of the household. The latter office he soon after resigned, and he continued for several years the strenuous opponent of Sir R. Walpole, distinguishing himself by his writings in the "Craftsman," as well as by his powerful eloquence in the House. In 1745 the government once more availed itself of his talents, but to remove him from court, where he had lost favour, he was sent to Ireland as lord-lieutenant, where he continued a year, exercising his power in a manner calculated to gain the approbation of the people. He was afterwards secretary of state, but deafness and declining health induced him to relinquish office in 1748. Lord Chesterfield was a man of brilliant accomplishments, but thoroughly vain, ambitious, and intriguing. He wrote some papers in the "World," and several poetical pieces, but he is principally known as the author of "Letters to his Son," which are more to be commended for their good sense, knowledge of the world, and pleasant style, than for their morality. Chesterfield's haughty assumption of the part of great patron towards Dr Johnson provoked the famous letter prefixed to the first edition of the Dictionary, "The Blast of Doom, proclaiming that Patronage should be no more." Died, 1773.

CHETHAM, HUMPHREY, a wealthy merchant of Manchester, born 1580, to whose munificence that town owes a college and library. He left funds to purchase the collegiate church, which, being suppressed at the Reformation, had become the property of the Derby family. Mr Chetham's trustees having purchased the college buildings in 1634, the year after his death, removed the scholars into them in 1656, and nine years afterwards they obtained from Charles II. a charter of incorporation. The college was originally founded for the maintenance and education of 40 poor boys; their number however has from time to time been increased, and is now 100. A separate bequest was made for the founding of the library, and provision for its yearly increase. It contains now above 20,000 volumes. Any one resident in Manchester, or merely a visitor, has free access, by merely writing his name and address in a book for that purpose. Another bequest by Chetham's will was for the purchase of "Godly English Books" to be chained upon reading desks in the churches of Manchester, Bolton, and three other townships. Died, 1653.

CHEVALER, ANTOINE ROBOURIE DE, French orientalist and tutor to Princess, afterwards Queen, Elizabeth of England. At the death of Edward VI. he went to Germany, and subsequently to his native country, France; was professor of Hebrew at Strasburg and Geneva; but on the breaking out of the civil war in France, again sought England, where he was well received by his former pupil, the queen. When the war seemed to be terminated, he again went to France; but on the occasion of the massacre of St Bartholomew, he left France, intending again to seek shelter in England, but died at Turin. He was a good scholar, and published an edition of the "Thesaurus Linguae Sanctae" of Pagnini, &c. He had commenced a Bible in four languages, but did not live to finish it. Died, 1572.

CHEYNE, GEORGE, an eminent physician and medical writer. He was born in Scotland, and was intended for the church, but preferring the profession of medicine, he pursued the necessary studies under Dr Pitcairn, and having taken his doctor's degree, settled in London. His first work was the "Theory of Fevers," his next publication was a mathematical treatise, entitled "Fluxionum Methodus Inversa," which procured him considerable reputation, and admission to the Royal Society. Too free an indulgence in the pleasures of the table having rendered him enormously corpulent as well as asthmatic, he resolved on strictly adhering to a milk and vegetable diet; and he experienced so much benefit from this course, that all his principal treatises urge it upon others. His chief works are "The English Malady, a Treatise on Nervous Disorders," "A Treatise on Gout," and an "Essay on Health and long Life." Died, 1743, aged 72.

CHIABRERA, GABRIELLO, a celebrated lyric poet, sometimes called the Italian Plutarch, was born at Savona, in 1532. His life was passed chiefly in studious retirement, and the composition of his voluminous works, among which are mentioned three epic poems, innumerable musical dramas,—the earliest specimens of the opera,—and three volumes of lyrical poems. On the latter his fame rests. He aimed at, and to a great extent succeeded in, catching the spirit of the odes of Pindar and Anacreon. Died, 1637.

CHIARI, PIETRO, an Italian ecclesiastic and poet of the 18th century. He was a rival of Goldoni, and his comedies attained considerable popularity. Those of Chiari were, however, much inferior to those of his rival. Died, 1788.

CHICHELEY, HENRY, archbishop of Canterbury, an able and accomplished scholar and statesman, was born at Highnam Ferrers, about 1302. He was educated at Winchester and Oxford, devoting his attention especially to the civil and canon law. He rapidly rose to high place both in church and state. He was sent ambassador to the pope and to the court of France; was bishop of St David's in 1408; took a prominent part in the discussion; at the famous

council of Pisa in 1410; was again ambassador to France the same year, and a third time on the accession of Henry V. in 1417. On his return he was made archbishop of Canterbury. The parliament having advised the king to appropriate some of the revenues of the church, the archbishop lost his influence to engage the young king in a war with France, and accompanied him through the memorable campaign of Agincourt. On the accession of the infant king, Henry VI., Chicheley became first privy councillor, and he wisely directed all his attention to church affairs, striving at once to check the progress of Wickliffism, and to moderate the claims of the papal court. In the expenditure of his revenue he was very liberal; he founded and endowed All Souls College, Oxford, made many important improvements in Lambeth Palace, and built the south-western tower of Canterbury Cathedral at his own expense. Died, 1435.

CHICHESTER, EARL OF (PELIHAM, THOMAS)

CHILD, SIR JONATHAN, bart., an eminent London merchant of the 17th century, and author of several works on subjects connected with political economy, among which may be noticed his "Discourse on Trade," &c. Born, 1630; died, 1699.

CHILD, WILLIAM, an English musical composer. He was for many years organist of St George's Chapel, Windsor, and of the Chapel Royal at Whitehall. The simple style of his compositions caused these to be neglected in his own time, but they are now much admired. Died, 1697.

CHILLENWORTH, WILLIAM, an English divine and controversial writer, born at Oxford, 1692. He studied at the university, and early showed the propensity to disputation which characterized him through life. Lord Chrenvion says of him, "he had contracted such irreligion, and such a habit of doubting, that at length he was confident of nothing." In this state of mind a Jesuit convinced him of the truth of the tenets of Romanism, and he went to the Jesuits' college at Douay. While there he meditated the publication of a vindication of his conversion to the Church of Rome, but Laud, then bishop of London, dissuaded him from his purpose. He subsequently returned to England, and not only became a Protestant again, but also wrote and published the celebrated treatise, entitled "The Religion of Protestants, a safe Way to Salvation." Some temptation about signing the 39 Articles prevented him from obtaining preferment in the church; but he at length consented to sign, and became chancellor of Salisbury, &c. At the breaking out of the civil war, he warmly espoused the royal cause, and published a treatise on the "Unlawfulness of Resisting the Lawful Prince, although most Tyrannous, Impious, and Idolatrous." He accompanied Charles I. to the siege of Gloucester, and invented a machine, or rather imitated one described by ancient authors, for the attack of fortified places. He was taken prisoner at Arundel Castle, which surrendered to the parliamentarians under Sir William Waller, and at his own request was sent to Chiche-

ter, where he died, at the age of 60, in 1644.

CHILADNI, ERNST, Prussian German natural philosopher, Wittenberg in 1766. He is the inventor of the important experiments on metallic and glass plates, and invented two machines which he named *Kupphon* and *Indor*. He exhibited these in the academies of Europe, and gave many discoveries. In 1802 appeared his "Acoustics," which was translated into French by order of Napoleon. Chiladni was presented in 1806 with the order of St Anna, on which he published a treatise in 1794. He was the first to give a scientific character to these experiments, and to connect them with the theory of sound. Died at Breslau, 1827.

CHOISEUL, ETIENNE FRANCOIS, first minister to Louis XV. in 1716. He entered the diplomatic service, and having attained a high rank, was appointed ambassador in Rome, and honoured with a peerage. He was minister of foreign affairs, and his administration he raised through the influence of Madame de Pompadour. In 1756, he became also minister of the navy, after exchanging the portfolio for that of the war. His many judicious reforms and his services to the French army, increased his reputation. On the death of Maria Theresa, the duke of Choiseul was appointed minister of the royal favour, finding a detestation in the eyes of the royal mistress, Madame de Pompadour, he was dismissed from office. He was one of his relatives. Though he was a minister of Louis XVI., he did not again appear in office. Died, 1785.

CHOPIN, FRENCH, a great French pianoforte player, was born at Paris, 1810. Compelled to leave France on account of the consequence of political opinions, he fled to Vienna, where he was soon afterwards repulsed, and he continued to exercise his talents in London. He returned to Paris in 1849; but he was soon afterwards expelled, which had never been the case for the rude changes of the revolution, and he died in the antechamber behind him a reputation as a composer, which was not less than that of a pianist. Every note of his music is full of melody, and his compositions, operas, concertos or sonatas, or his operas, polkas, preludes, and dances, are all imbued with a noble and noble nationality; and his music is full of sweetness, expression, and elegance. He was a distinguished pianist in London, was distinguished in the fine arts, and his knowledge. Though his profession, he found time to devote to the world some ingenious and valuable works, viz., an "Essay on the Ancient Invention of Palamedes," "Sketches of the game of chess; a "Dissertation on Etruscan Vases;" and an "Ess-

ler, where he died, at the episcopal palace, in 1644.

CHLADNI, ERNST FLORENT FRIEDRICH, German natural philosopher, was born at Wittenberg in 1701. He applied himself to the investigation of the laws of sound, made important experiments on the vibration of metallic and glass plates of various forms, and invented two musical instruments, which he named *Kuphonia* and *Clavicylinder*. He exhibited these in the principal cities of Europe, and gave lectures on his discoveries. In 1832 appeared his "Treatise on Acoustics," which was translated into French by order of Napoleon, to whom Chladni was presented in 1808. Chladni also occupied himself long with the study of acoustics, on which he published a treatise in 1794. He was the first to recognize the samical character of these bodies, and the connection between them and the balla. Died at Breslau, 1827.

CHOISEUL, ETIENNE FRANÇOIS DE, Duke of Brabant, minister to Louis XV. of France, was born in 1710. He entered the army early, and having attained a high rank, was appointed ambassador to Rome and Vienna, and honoured with a peerage. He then became minister of foreign affairs, to which station he was raised through the influence of Madame de Pompadour. Four years later, he became also minister of war, and soon after exchanged the portfolio of foreign affairs for that of the marine. He made many judicious reforms and alterations in the French army, increased the navy, and sought about the celebrated family compact. On the death of Madame de Pompadour, the duke of Choiseul gradually lost the royal favour, finding a determined enemy in the new mistress, Madame Du Barry. In 1763 he was dismissed from office, and exiled one of his estates. Though recalled by Louis XVI., he did not again hold office, died, 1783.

CHOPIN, FREDERIC, a great modern composer and pianoforte player, was born near Warsaw, 1810. Compelled to leave Poland in consequence of political convulsions, he resided in public at Vienna and Munich in 1818, and soon afterwards repaired to Paris, where he continued to exercise his art till the revolution of 1848 drove him to England. He returned to Paris in 1849; but his constitution, which had never been robust, sank under the rude changes of the preceding year, and he died in the autumn of 1849, leaving behind him a reputation, both as a composer and a performer, which will not soon decay. Every note of his music, whether in concertos or sonatas, or his scherzos, walses, polonaises, preludes, breathes an indubitable originality; and is marked by sweetness, expression, and elegance.

CHRISTIE, JAMES, the son of an eminent lawyer in London, was distinguished for critical taste in the fine arts, and his extensive knowledge. Though he followed his father's profession, he found time to give the world some ingenious and valuable works, viz., an "Essay on the Ancient Greek Game of Chess;" a "Disquisition on the Etruscan Vases;" an "Essay on the

Earliest Species of Idolatry," &c. Died, 1881.

CILISTINA, queen of Sweden. She was the only child of the famous Gustavus Adolphus, whom she succeeded in 1632, being then only six years old. During her minority the kingdom was wisely governed by the chancellor Oxenstierna; and when she was crowned, in 1650, she formally declared her cousin, the count palatine Charles Gustavus, her successor. For four years she governed the kingdom with an evident desire to encourage learning and science; and at the end of that time, weary either of the task of governing, or of the personal restraint which royalty imposed on her, she abdicated in favour of her cousin, and proceeded to Rome, where she surrounded herself with learned men, and busied herself with learned pursuits. She also embraced Romanism, though it would seem that her moral conduct was such as to evince no great respect for religion of any kind. (On this point it will suffice to say, that while at Paris, on one of the various occasions of her visiting that city, she had her equerry, an Italian, named Monaldeschi, murdered in her own residence, and almost in her own presence; a crime which seems to have had no other cause than the unfortunate equerry's indifference to the blandishments of his mistress. In 1660, the death of the king, her cousin, caused her to go once more to Sweden; but her change of religion, and the reports which had reached that country of her conduct elsewhere, had so disgusted her former subjects, that they resolutely refused to reinstate her in the sovereignty. Being threatened with the loss of her revenues as well as her crown, she consented to preserve the former by finally renouncing the latter; and she retired to Rome, where she died in 1689. Her Life was written by Arehenholz and by Lacombe; and a new Memoir, by Henry Woodhead, has lately appeared (1864).

CILISTOPHIE, HENRY, a negro, one of the leaders of the insurgent slaves of St Domingo. He possessed considerable ability, but his courage was carried to ferocity. He successfully opposed the French, whose precipitous seizure of the negro chief, Toussaint Louverture, he amply revenged, and assumed the title of Henry I., king of Hayti; but he acted so despotically, that a conspiracy was formed against him; and Boyer, the successor of Petion, who had established a republic in the south of Domingo, was invited to take part with the discontented subjects of Christophe, and demanded his deposition. At length, finding that even his body-guard was no longer to be depended on, he shot himself through the heart, October 8th, 1820.

CHRYSIPPUS, a Stoic philosopher, was a native of Cilicia, and became a disciple of Cleanthes at Athens. He was a acute thinker and a voluminous writer, but was undidiscouraged by the prevalence of paradoxes, with which his writing was undidiscouraged. His aim, like that of Zeno, was to check the prevalent scepticism, and to show, in opposition to the doctrine of the Academy, that it is possible to know. Born, about 280, and died, 207, B.C.

CHRYSOLORAS, MANUEL, a learned Greek of Constantinople, who in the last

the old Royal Exchange, the sculptures on the Monument, and the two figures of Madness, Hating and Melancholy, at the Bethlehen Hospital. He was also employed in decorating the mansion at Chatsworth. He was father of Colley Cibber, the celebrated actor. Died, 1700.

CIBBER, COLLEY, the actor and dramatist, was the son of Gabriel Cibber, the sculptor, and was born in London, in 1671. He was educated at Grantham Free-school, and being disappointed of a scholarship at Cambridge, he entered the army. The military profession did not suit his taste; and when only about 18 years old he quitted it for the stage. For some time he had but little success; but his performance of Fondwife, in the "Old Bachelor," made him very popular, and obtained him the monopoly of parts of that kind at Drury-lane. His first dramatic effort, "Love's Last Shift," appeared in 1695; and it was followed by "Woman's Wit" and "the Careless Husband." His next production as a dramatist was an adaptation of Molière's Tartuffe, under the title of the "Nonjuror," of which the "Hypocrite" of the more modern stage is a new version. The piece was wonderfully popular, and, in addition to the large profits Cibber derived from its performance, it procured him the situation of poet laureate. This appointment drew upon him the rancour of contemporary wits and poets, and of Pope among the number; but Cibber had the good sense to think solid profit more important than the censure of the envious was injurious; and he wore the bays, and performed in his own pieces till he was nearly 74 years of age. Besides tragedies and comedies, to the number of twenty-five, some of which still continue to be played as stock pieces, Cibber wrote an "Apology" for his own life, an "Essay on the Character and Conduct of Cicero," and two expository epistles to his assailant Pope. Died, 1757.

CIBBER, THEOPHILUS, son of the above, an actor and dramatist, but very inferior in both capacities to his father. He was of very extravagant habits, and his life was consequently spent in much distress. He was drowned in his passage to Ireland, 1757.

CIBBER, SUSANNA MARIA, wife of the last named, was sister to Dr Arne, the celebrated musical composer, and was an actress of the highest class. Her union with Theophilus Cibber was productive of both discomfort and disgrace, and she was separated from him for many years. She was as much respected in private life as she was admired on the stage. Her style of acting was well adapted to that of Garrick, with whom she frequently performed. Died, 1766.

CICERO, MARCUS TULLIUS, the prince of Roman orators, was born at Arpinum, B. C. 106. He was the son of noble parents, and at an early age gave such decided indications of his ability, that after having served in a single campaign under Pompeius Strabo, he devoted himself, by the advice of his friends, to the bar. For this purpose he studied under Molo of Rhodes, an eminent lawyer, and Philo the Athenian, then resident at Rome; and, at the age of

26, he commenced practice as a pleader; his first important cause being the defence of Sextus Roscius Amerinus, who was accused of parricide by one Chrysogonus, a freedman of the dictator Sulla. He saved his client, but was obliged to withdraw to Athens from fear of resentment of the dictator. As long as Sulla lived Cicero remained in exile, turning even his exile into a benefit by diligently studying under Antiochus and other philosophers. When he returned to Rome he rapidly rose in his profession, and the quaestorship in Sicily was bestowed upon him. In this office he made himself very popular; and henceforth his course was all prosperous, until he attained the great object of his ambition—the consulship. The conspiracies of Catiline made Cicero's consular duty as difficult and dangerous as his performance of it was able and honourable; and he scarcely, if at all, exaggerated his services to Rome when he said that to his conduct "alone was owing the salvation of both the city and the commonwealth." But his popularity declined very soon after the expiration of his consulship, and it was chiefly as an advocate and author that he for some time afterwards exerted his splendid talents. At length the task of averting ruin from his own head tasked even his powers to the utmost. Publius Clodius, who had now become tribune of the people, raised such a storm against him, that he was a second time obliged to go into exile. This time he sought shelter with his friend Piancus, in Thessalonica, until the repentant Romans recalled him, making him magnificent recompense for the depredation and devastation by which he had been impoverished. In the struggle between Cæsar and Pompey, Cicero espoused the cause of the latter; but after the fatal battle of Pharsalia, he made his peace with the former, with whom he continued to all appearance friendly, until Cæsar fell under the dangers of Brutus and his friends. Cicero now took part with Octavius, and pronounced the philippics against Antony, which at once shortened his life, and added to his fame. Antony, stung to the quick, insisted upon the death of Cicero, and Octavius basely consented to the sacrifice. In endeavouring to escape from Tusculum, where he was living when the news of his proscription arrived, he was overtaken and murdered by a party of soldiers, headed by Popilius Lænas, whose life he had formerly saved by his eloquence; and his head and hands were publicly exhibited upon the rostrum at Rome. Cicero perished in his 64th year, B. C. 43. He was a perfect model of eloquence; and, as Augustus truly said, "he loved his country sincerely." Of his works, consisting of orations, philosophical, rhetorical, and moral treatises and familiar letters, all written in the purest and most perfect Latin, all well known and far too numerous to be even named here, there have been almost innumerable editions. Middleton's celebrated "History of the Life of M. Tullius Cicero," appeared in 1741. A new English Life of Cicero, by William Forayth, published in 1864, has received high praise for scholarship and fairness. More recent is the French work, entitled "Ciceron et ses

Amis," an interesting study on Roman society, by Gaston Hebsieser.

CICOGNARA, LEOPOLD, Count of, Italian writer on art, was born at Ferrara in 1707. He was educated at the university of Pavia, and after studying the works of art at Rome and other great cities of Italy, he settled at Modena. After the French invasion he took part, for some time, in public affairs, but in 1805 he settled at Venice as president of the Academy of Fine Arts. He travelled through Europe, and formed a valuable collection of works of art, which afterwards became the property of the pope. His chief work is the "History of Sculpture from the revival of the Fine Arts in Italy," in 3 vols. folio. He also published a description of the principal buildings of Venice, a Catalogue of his Library, and an account of the chef-d'œuvre of his friend Canova. Cicognara was a correspondent of the French Institute, and a member of the principal academies of Europe. Died at Venice, 1834.

CID, TIT, whose real name was DON RODRIGO DIAZ DE RIVAR, the national hero of Spain, was born at Burgos about 1040. The facts of his career have been wrapped by his admiring countrymen in such a haze of glorifying myths that it is scarcely possible to detect them. His life, however, appears to have been entirely spent in fierce warfare with the Moors, then masters of a great part of Spain. His exploits are set forth in a special chronicle, and in a poem of considerable interest, written not long after his death. The story of his love for Ximena is the subject of Corneille's masterpiece, "Le Cid." His last achievement was the capture of Valencia, where he died in 1093.

CIGNANI, CARLO, an eminent Italian painter, born at Bologna, 1628. He was the pupil of Albani, and perfected himself by the study of the works of Correggio, the Caracci, and Raphael. His works, in fresco and in oil, were very numerous, and the subjects of them very various. His principal work is the "Assumption of the Virgin," in the cathedral of Forlì. Died, 1719.

CIGNAROLI, GIAMBETTINO, Italian painter, was born near Verona, in 1706. He worked chiefly at Verona, had many scholars, and obtained a very high reputation. In 1769 he was visited by the emperor Joseph II., who spoke of him afterwards as the first painter of Europe. Cignaroli's style was like that of Carlo Maratti, but inferior in colouring. Died, 1770.

CIGOLI, LODOVICO CARDI DA, Italian painter, born 1559. He was trained by Sauto di Titi, studied the works of Correggio, Barocci, and the Caracci, and became a distinguished reformer of the art, especially as an opponent of the imitators of Michael Angelo. One of his greatest works was "St Peter healing the Lame Man," which has, unfortunately, perished. He painted several altar-pieces, and wrote a treatise on Perspective. Died, 1613.

CIMABUE, GIOVANNI, or GIOVANNI GUALTIERI, a very distinguished Florentine painter, born in 1240. Very little is certainly known of his life, but he is said to have been a disciple of Giunta of Pisa, and he was one

of the earliest painters who left off copying the hard unimpaired drawing of the Byzantine school, studied nature for himself, and contributed powerfully to the revival of art. The colossal Madonna, which he painted for the tinclial chapel, in the church of Santa Maria Novella, Florence, is said to have excited extraordinary enthusiasm, and to have been carried in procession to the church, where it still remains. A Madonna of this master, formerly in the church of Santa Croce, Florence, is now in the National Gallery. It was Cimabue who first discovered the genius of Giotto. Died, probably, in 1302.

CIMAROSA, DOMENICO, a Neapolitan musical composer. When the army of revolutionized France took possession of Italy, Cimarosa so openly sympathized with revolutionary principles, that when the French withdrew, he was thrown into prison, and treated with a rigour which is supposed to have materially shortened his life. Of twenty-six operas which he composed, and most of which are comic, "Il Matrimonio Segreto" is the most admired. Born, 1734; died, 1801.

CIMON, a celebrated Athenian general. He was the son of Miltiades, and first distinguished himself at the battle of Salamis, B. C. 480. Aristides the Just thought so highly of him, that he initiated him into public business. After having repeatedly beaten the Persians, especially in 469, when he won two victories over them the same day, one by sea, the other on the banks of the Erymmedon, and having enriched his country by the spoils he wrested from the enemy, the party of Pericles caused him to be ostracized. At the end of five years, which was only half the term for which he had been banished, he was recalled, and again led the Athenians to victory over their Persian foe. While besieging Citium in Cyprus, he died, B. C. 449, having served Athens, not only by his gallantry and prowess in the field, but also by his wisdom and liberality in promoting public improvements.

CINCINNATUS, LUCIUS QUINTUS, one of the most illustrious characters of ancient Rome. He was made consul B. C. 460, when the senate and the people were striving for the ascendancy; and, being much incensed against the latter for having banished his son, he sternly resisted their demands. He was named consul a second time, but refused the office and retired to his farm, whence he did not again emerge until he was elected dictator, 458, and entreated to lend his aid against the Æqui, who had closely invested the army of the consul Minucius. Stepping at once from the petty details of a farm to the momentous duties of a general and a statesman, Cincinnatus defeated the Æqui and made them pass under the yoke. Having caused his son to be reconciled from exile, after the chief witness against him had been convicted of perjury, he laid down his authority and returned to his farm. He was, again, though 80 years of age, made dictator, when Minucius was accused of conspiring against the republic.

CINNA, LUCIUS CORNELIUS, the friend, partisan, and fellow-consul of Marius. He

It was who drove Sulla from his camp, called Marius from his exile, and participated in the name of Marius followed the return of Marius from his third consulship, and for his hostility with Sulla B. C. 84.

CINO DA PISTOIA, an Italian poet, born at Pistoia. His proper name was Guittone, and he was eminent as a lawyer, and of Rome, and professor of various universities. In elegant poetry, by which he wrote a "Comментарio" on Dante. Died, 1336.

CING-MARS, HENRY, Count of, was son of the Marquis of France. He was introduced to the notice of Louis XIV. by the notice of Louis XIV. was for some time a most favourite of that monarch. He was to the earl and to the duke of Orleans, to rebellion. They had promised their treasonable designs on Louis XIV. with Spain, engaged to assist them. But the night before he discovered their plans, was apprehended, and he was executed. Cing-Mars is the hero of a novel by Alfred de Vigny.

CIPRIANI, GIOVANNI, an eminent painter, born at Pisa in 1753. He accompanied Sir John J. in London, and was one of the members of the Royal Academy, who were greatly admired, and who were made from them by H. 1783.

CIBULLO, DOMENICO, an

born in the kingdom of Naples.

accompanied Lady Walpole to

England, studied under Win-

ston, and was elected F.R.S. He

was president of the academy at

Padua, and professor of medicine in the

university. When the French entered

Italy, he took an active part in

the restoration, and when the legisla-

ture was restored, he was executed

in 1799. Among the works

of Cibullo are "Fundamenta Botanica,"

It was who drove Sulla from Rome, and recalled Marius from his African exile. He participated in the numerous murders which followed the return of Marius; and when in his third consulship, and while preparing for hostilities with Sulla, was assassinated, B. C. 81.

CINO DA PISTOIA, an Italian juriscounsel and poet, born at Pistoia, in 1270, whose proper name was Guittono. He was very eminent as a lawyer, and became a senator of Rome, and professor successively at various universities. In addition to some elegant poetry, by which he is chiefly known, he wrote a "Commentary on the Digest." Died, 1330.

CINQ-MARS, HENRY COIFFIER, Marquis of, was son of the Marquis d'Efflat, marshal of France. He was introduced by Cardinal Richelieu to the notice of Louis XIII., and was for some time a most distinguished favourite of that monarch. Ungrateful equally to the cardinal and to the king, he instigated Gaston, duke of Orleans, the king's brother, to rebellion. They had proceeded so far in their treasonable designs as to set on foot a treaty with Spain, engaging that power to assist them. But the vigilance of the cardinal discovered their plans, and the marquis was apprehended, and beheaded in 1642. Cinq-Mars is the hero of a splendid historical novel by Alfred de Vigny.

CIPRIANI, GIOVANNI BATTISTA, an eminent painter, born at Pistoia, in Tuscany. In 1755 he accompanied Sir W. Chambers to London, and was one of the original members of the Royal Academy. His drawings were greatly admired, and many engravings were made from them by Bartolozzi. Died, 1785.

CIRILLO, DOMENICO, an Italian botanist, born in the kingdom of Naples, 1734. He accompanied Lady Walpole to France and England, studied under William Hunter, and was elected F.R.S. He afterwards became president of the academy at Naples, and professor of medicine in the university of that city. When the French entered Naples, Cirillo took an active part against his sovereign; and when the legitimate government was restored, he was executed as a traitor in 1799. Among the works of Cirillo are, "Fundamenta Botanica," "Phnaxiarum rariorum regni Neapolitani fasciculus," &c.

CISNEROS, FRANCISCO XIMENES DE. [XIMENES.]

CLAIRAUT, ALEXIS CLAUDE, an eminent French mathematician and astronomer, was born at Paris in 1713. He studied the higher mathematics at ten years of age, at thirteen presented a memoir on curves to the Academy of Sciences, and at sixteen wrote one of his most remarkable works, the "Recherches sur les courbes à double courbure." This was published in 1729, and the same year he was received at the Academy, although under age. He took part in the measurement of a degree of the meridian in Lapland, made laborious investigations on the movement of Halley's comet, and predicted the time of its reappearance, made important discoveries respecting the lunar motion and the motions of comets, and died at Paris in 1765. Among his principal works are "Traité de la figure

de la Terre," "Éléments d'Algèbre," "Théorie de la Lune," "Théorie du mouvement des Comètes," &c.

CLAIRIE, MARTIN, a French Jesuit, was born at St Valéry la 1612. He gained great distinction as a preacher; but he is now chiefly remembered for his Latin hymns, written in a pure, clear, and elegant style. Died, 1693.

CLAIRFAIT, Comte de. [CLERFAIT.]

CLAPPERTON, Captain HUGH, the celebrated African traveller, was born in Annan, Dumfriesshire, in 1788, and at the age of 15 was apprenticed to the sea-service. Having during his apprenticeship inadvertently violated the excise laws, he consented (rather than undergo a trial) to go on board the Clorinda Frigate, commanded by Capt. Briggs. Through the interest of friends he was soon promoted to be a midshipman, and in 1811 was raised to the rank of lieutenant, and appointed to the command of a schooner, on Lake Erie. In 1822 he was chosen to accompany Dr Oudney and Major Dunham on an expedition to Central Africa, and on his return to England he received the rank of commander. In six months afterwards he was despatched on a second mission for exploring the country from Tripoli to Bernou, but was not allowed to enter the place. It was during the period of his detention that he was attacked with dysentery, which proved fatal, at Sackatoo, on the 13th of April, 1827. His journals, which were all saved, give an interesting account of the central part of Northern Africa, and the manners and customs of its inhabitants.

CLARE, Earl of. [FITZJOHN, JOHN.]

CLARE, JOHN, the peasant-poet of Northamptonshire, was born near Peterborough in 1793. He published in 1820 a volume of "Poems descriptive of Rural Life and Scenery," which attracted much attention. A friendly attempt was made to place him in a better position in life, but it ended in failure, and the pressure of care and want at last deranged his intellect. Additional poems appeared from his pen entitled the "Shepherds' Calendar and other Poems," and the "Rural Muse." The unhappy poet died in a lunatic asylum in 1864. The story of his life is touchingly told in a Memoir by Frederick Martin, published in the following year.

CLARENDON, EDWARD HYDE, Earl of, lord high chancellor of England, was born at Dinton, in Wiltshire, in 1609. He was educated at Oxford, and studied law under his uncle, Nicholas Hyde, chief justice of the King's Bench. During the civil wars he zealously attached himself to the royal cause, being first returned to parliament in 1649. He was made Chancellor of the Exchequer and privy councillor three years later, and was the chief adviser of the king. After the failure of the royalist arms he took refuge in Jersey, and then joined Prince Charles in Holland. Clarendon contributed to the restoration, accompanied Charles to London, and was made lord chancellor. In his judicial capacity his conduct was irreproachable; and as long as he held office, no one could be more decidedly the supporter of the privileges of royalty, or the defender of his country's freedom against the abuses of the royal

power. But he at length became unpopular, was removed from his high employments, and was banished by act of parliament. He died at Rouen, in 1764. His "History of the Rebellion," long regarded as a first-rate historical authority, has been proved to be not only a partial, but a very inaccurate and untrustworthy narrative. His daughter Anne was married to the duke of York, afterwards James II.; and two daughters, Anne and Mary, the fruit of this marriage, both ascended the English throne.

CLARENDON, HENRY HYDE, Earl of, son of the foregoing, was born in 1633. He was for a short time lord-lieutenant of Ireland, in the reign of James II., and wrote a "History of the Irish Rebellion," &c. Died, 1709.

CLARKE, ADAM, LL.D., theologian and orientalist. He was born in Ireland, and received the rudiments of learning from his father, who was a schoolmaster; but subsequently studied at the school founded by John Wesley, at Kingswood, near Bristol. At the early age of 18, he became a travelling preacher in the Wesleyan Methodist connection, and for 20 years continued to be so. But though he was very popular as a preacher, it is chiefly as a writer that he demands notice here. He published a very useful Bibliographical Dictionary; a supplement to that work; a most laborious Commentary on the Bible; a Narrative of the last Illness and Death of Richard Porson; and Memoirs of the Wesley Family; and edited Baxter's Christian Directory, and several other religious works. His Commentary on the Bible occupied him above fifteen years. But such were his energy and perseverance, that besides the above works and numerous sermons, he wrote four elaborate reports on the State of the Public Records, and edited the first volume of a new edition of Rymer's *Fœdera*. Born, 1762; died, of cholera, 1832.

CLARKE, EDWARD DAN'EL, LL.D., a celebrated modern traveller, and professor of mineralogy at Cambridge, was born in 1769. He accompanied Lord Berwick to Italy in 1794; and in 1799 he commenced a tour through Denmark, Sweden, Lapland, Finland, Russia, Tartary, Circassia, Asia Minor, Syria, Palestine, Egypt, Greece, and Turkey, returning, in 1802, through Germany and France. By his exertions the library of Cambridge was enriched with nearly a hundred volumes of manuscripts, and the colossal statue of the Eleusinian Ceres. He also brought to this country the sarcophagus commonly known as that of Alexander, and a splendid collection of mineralogical specimens, which he turned to the best advantage in his subsequent popular lectures on mineralogy, when he was appointed to the professor's chair in 1808. He died in 1821, and a complete edition of his works, in 11 vols., was afterwards published.

CLARKE, JEREMIAH, Mus. D., organist to St Paul's cathedral, and joint organist, with Blow, to the king. His compositions are not numerous, but they are remarkable for pathetic melody. An imprudent and hopeless passion for a lady of high rank so much disordered the mind of this amiable and

gifted man, that he committed suicide, in 1707.

CLARKE, SAMUEL, D.D., a celebrated English theologian and natural philosopher, was born in 1675. He was a native of Norwich, of which city his father was an alderman; and was educated at Caius College, Cambridge. While at college, he made an improved Latin translation of Rolauir's treatise on Physics, adding valuable notes in order to familiarize students with the reasonings of the Newtonian philosophy. When he took orders, he became chaplain to the bishop of Norwich, and in 1699 published "Three practical Essays on Baptism, Confirmation, and Repentance." By this work he established his reputation as a pious and able writer; and he now entered the lists as a controversialist, by publishing "Reflections" on a hook by Toland, entitled "Amyrator." In 1704-5 he was appointed Boyle Lecturer, and took for the subjects of his sixteen sermons, "The Being and Attributes of God" and "The Evidences of Natural and Revealed Religion." In 1712 he published a valuable edition of "Cæsar's Commentaries," and a work entitled "The Scripture Doctrine of the Trinity." This work involved him in a controversy, in which his principal opponent was Dr Waterland; and the heterodoxy of Dr Clarke was made the subject of a complaint in the lower house of convocation. Subsequently he had a controversy with Leibnitz on the principles of religion and natural philosophy; and gave considerable offence by altering the psalms at St James's while chaplain to Queen Anne. Although his alleged heterodoxy had deprived him of all chance of rising in the church, he had so just a sense of what was due to his profession, that when offered the mastership of the Mint, on the death of Sir Isaac Newton, he declined it as incompatible with the clerical office and character. The latter part of his life was distinguished by his letter to Hoadley, "On the Proportion of Velocity and Force in Bodies in Motion," and his edition of "Homer's Iliad" with a Latin version. After his death, his sermons, in 10 vols., were published by his son. Died, 1729.

CLARKE. [FELTRE, Duke of.]

CLARKSON, THOMAS, a man whose whole life may almost be said to have passed in labouring to effect the extinction of the slave-trade, was born at Wisbeach in Cambridgeshire, in 1760. He was first brought into notice as the friend and champion of the negro, by a Latin prize essay upon slavery, which was afterwards published in English, and became immensely popular. Associations were formed, and the question was agitated and discussed throughout the country; at length Mr Clarkson having become acquainted with Mr Wilberforce, whose connections and influence were justly regarded as of the highest value, it was agreed that the latter should bring the subject under the notice of parliament. This was in 1787, and it there met with various success until 1807, when the memorable law abolishing the slave-trade obtained the sanction of the legislature. But though Mr Wilberforce, by virtue of his position, was enabled to take a lead in this great measure,

the original promoter fatigable; and, outside ment, he continued to be lished zeal. Clarkson's though principally exer enslaved African, was b even to that wide spher 1846, aged 85.

CLAUDE, JEAN, an o testant divine. He co work of the Port-Royal and was involved, in co troversy with the Cathol he displayed immense c No better proof, indee the formidable light in to his opponents, than fact, that at the revoca Nantes he was perempto France in 24 hours, tho testant ministers were al learning, eloquence, a made him a powerful and his polemical writin qualified he was to be 1687.

CLAUDE LORRAINE, scape painter, born in L real name was CLAUDE G the son of poor parents, prentice to a pastry-cook however, prevailed over in which he was placee elved some instruction i brother, who was a wood- to Rome, and was empl colour-grinder by the p whom he received instruc mental principles of his a won his way upward to fame, and by 1630 was landscape-painter. Sand mate companion, and fir from nature. In the st was unweari'd, passing c fields, noting every chang nature from sunrise to su of this patient observati cially in his admirable tre perspective. Claude also e of etchings. His "Liber Italian, "Libro di Verità," his sketches and designs fo is now in the collection Devonshire. It was engrav d London in 1777. Died cial galleries in Europe his masterly productions, finest are in the National these are a "Seaport at Su with the Embarkation o Sheba," another with the E Ursula, and several landsc CLAUDIANUS, CLAUDI whose birthplace is suppo Alexandria. He flourished under the reigns of Theo and Honorius; was patron and a statue was erecte the forum of Trajan. His some of their value from them being court panegyric poems he displayed a brill much polished elegance.

the original promoter of it was still indefatigable; and, outside the walls of parliament, he continued to labour with undiminished zeal. Clarkson's active benevolence, though principally exerted in favour of the enslaved African, was by no means confined even to that wide sphere. He died Sept. 26, 1846, aged 85.

CLAUDE, JEAN, an eminent French Protestant divine. He composed a reply to a work of the Port-Royalists on the eucharist, and was involved, in consequence, in a controversy with the Catholic writers, in which he displayed immense controversial power. No better proof, indeed, can be desired of the formidable light in which he appeared to his opponents, than is afforded by the fact, that at the revocation of the edict of Nantes he was peremptorily ordered to quit France in 24 hours, though the other Protestant ministers were allowed 15 days. His learning, eloquence, and strict morality made him a powerful advocate of truth, and his polemical writings show how well qualified he was to be its defender. Died, 1687.

CLAUDE LORRAINE, the great landscape painter, born in Lorraine, 1600. His real name was **CLAUDE GELÉE**, and he was the son of poor parents, who put him apprentice to a pastry-cook. The love of art, however, prevailed over the circumstances in which he was placed; and having received some instruction in drawing from his brother, who was a wood-engraver, he went to Rome, and was employed as cook and colour-grinder by the painter Tassi, from whom he received instructions in the fundamental principles of his art. He gradually won his way upward to independence and fame, and by 1630 was known as a good landscape-painter. Sandrart was his intimate companion, and first led him to paint from nature. In the study of nature he was unwearied, passing entire days in the fields, noting every change in the aspect of nature from sunrise to sunset. The fruits of this patient observation are seen, especially in his admirable treatment of aerial perspective. Claude also executed a number of etchings. His "Liber Veritatis," or in Italian, "Libro di Verità," is a collection of his sketches and designs for his pictures, and is now in the collection of the duke of Devonshire. It was engraved and published at London in 1777. Died, 1682. The principal galleries in Europe are adorned with his masterly productions, and some of the finest are in the National Gallery. Among these are a "Seaport at Sunset," "Seaport, with the Embarkation of the Queen of Sheba," another with the Embarkation of St Ursula, and several landscapes with figures.

CLAUDIANUS, CLAUDIUS, a Latin poet, whose birthplace is supposed to have been Alexandria. He flourished about A. D. 400, under the reigns of Theodosius, Arcadius, and Honorius; was patronized by Stilicho, and a statue was erected to his honour in the forum of Trajan. His larger poems lose some of their value from the subjects of them being court panegyric; but in all his poems he displayed a brilliant fancy, and much polished elegance.

CLAUDIUS, TIBERIUS DRUSUS, Roman emperor, was born B. C. 9, at Lyons, and was originally called Germanicus. After spending 60 years of his life in a private station, unhonoured, and but little known, he was on the murder of Caligula, his nephew, A. D. 41, proclaimed emperor by the soldiers, and confirmed in the sovereignty by the senate. At first he performed some praiseworthy acts, but he soon became contemptible for his debauchery and voluptuousness; and he died of poison administered by his second wife, Agrippina, A. D. 54. Claudius came to Britain two years after his accession, and made it a Roman province. He built the port of Ostia, the Claudian aqueduct, and executed other great works.

CLAUDIUS II., MARCUS AURELIUS FLAVIUS, surnamed **GOTHICUS**, Roman emperor, born A. D. 214, was raised to the throne on the death of Gallienus, in 268; and by his virtues, as well as by his splendid victories over the Goths, he proved himself worthy of his exalted station. Died, 270.

CLAUSEL, HERTRAND, a distinguished French soldier, was born at Mircepoix, 1772. He had already gained distinction in the army of the Pyrenees, at St Domingo, in Italy, and Dalmatia, when he was sent to Spain in 1810, under Junot and Massena. He besieged Ciudad Rodrigo, was wounded at Salamanca, and having saved during a retreat, memorable in military annals, the army of Portugal, and led it into Spain, was appointed commander-in-chief in the north of Spain in 1813. He was one of the last to lay down arms in 1814; and among the first to declare himself in favour of Buonaparte during the Hundred Days, when he took the command of Bordeaux, and established the imperial government without striking a blow. Banished on the return of the Bourbons in 1815, he retired to the United States, where he remained some years. Immediately after the revolution of 1830 he was appointed commander-in-chief of the forces in Algeria; but in consequence of some misunderstanding with the home government, he returned to France in 1831, received the marshal's baton, and in 1835 returned to Algeria as governor-general of the colony; but the check he sustained at Constantine, in 1836, led to his resignation, and the rest of his days were passed in retirement. Died, 1842.

CLAVIGERO, FRANCESCO SAVERIO, a native of Vera Cruz, in Mexico. Having been employed nearly forty years as a Jesuit missionary in Mexico, and made himself acquainted with the traditions and antiquities of the people, he wrote a very valuable work, entitled "Storia antica del Messico," being a very full account of the geography, natural history, manners and customs, arts, literature, and religion of Mexico, and of its conquest by the Spaniards. It was translated into the German and Spanish languages, and an English translation was published in 1787. Born, about 1718; died, at Cosena, 1793.

CLAVIJO Y FAXARDO, JOSÉ, a Spanish litterateur, born in one of the Canary Islands, about 1726. At the age of 23 he went to Madrid, where he got an appointment in

a government office. The publication of a periodical paper, entitled "El Pensador," after the manner of the English "Spectator," was the beginning of his literary reputation. His name has been most widely known in connection with his dishonourable conduct towards Madlle Curon, sister of Beaumarchais, and the spirited intervention of the latter in behalf of his sister. Ten years afterwards, in 1771, Beaumarchais, in self-defence, published the full story, which excited intense interest, and furnished Goethe with the subject for a tragedy. Clavijo was disgraced and deprived of his office, but was soon restored. He continued his literary labours, translated Buffon's Natural History, and was named secretary to the Museum of Natural History. Died, 1806.

CLAVIUS, CHRISTOPHER, a German Jesuit and mathematician. By order of Pope Gregory XIII. he corrected the calendar; and he nobly defended himself against the animadversions on his labour of the elder Scaliger and others. He also published many mathematical works, among which was an edition of Euclid, with annotations; a treatise on dialling, and an explanation of the method of reformation of the calendar. Died, 1612.

CLAY, HENRY, a distinguished American statesman, was the son of a clergyman of Hanover county, Virginia, where he was born on the 12th April, 1777. In 1793 he commenced the study of the law, was licensed as an attorney in 1797, and removed to Lexington, Kentucky, where he soon took a high position at the bar, and was at once recognized as one of the most promising men of his country and time. Mr Clay was elected to fill an unexpired term in the United States Senate in December, 1806. In 1809 he was elected to the Kentucky legislature, and in 1810 he was again chosen to fill a vacancy in the United States Senate. In 1811 he was sent to the House of Representatives, and was chosen speaker. He was a warm advocate of the war with Great Britain, and throughout that crisis sustained Mr Madison's war measures with great zeal. In 1814 he was sent to Ghent as one of the commissioners to negotiate the treaty of peace with Great Britain. Returning home, he was again sent to congress in 1815, and was elected speaker during two consecutive congresses. He remained in the House of Representatives till 1821. During the year 1818 he achieved great distinction by his advocacy of the claims of the South American republics to the recognition of their independence by the United States. In 1823, Mr Clay was again elected at congress, and again chosen speaker by a large majority. He distinguished himself in this congress as the advocate of protection to American industry, as well as several other measures. In 1824, Mr Clay was a candidate for the presidency, and, Mr Adams being chosen president, tendered the office of secretary of state, which he accepted, and retained to the close of Mr Adams's administration. In 1831 he was sent to the United States Senate, and in 1832 was a candidate for the presidency, but defeated by General Jackson. During the session of 1833, when the tariff

question was agitating the whole nation to an alarming extent, he brought forward his celebrated compromise bill, which passed both Houses, and restored quiet to the country. Mr Clay remained in the United States Senate until 1842, when, on the 31st of March, he resigned his seat. In 1844 he was the Whig nominee for the presidency, being defeated by Mr Polk. In December 1849, he again took his seat in the Senate, where he remained until 1851, when the encroachments of disease obliged him to tender his resignation. His last service in the Senate was in 1850, when he originated the series of measures known as the Compromise, which rescued the Union from one of its greatest dangers. A long career of 46 years identified him with much of the history of the American nation, and though he was never president, few presidents could hope for greater dignity, or a more enduring fame. Died, 1852.

CLAYTON, ROBERT, bishop of Clogher; author of an "Introduction to the History of the Jews," "The Chronology of the Hebrew Bible Vindicated," "A Vindication of the Histories of the Old and New Testament," written against Holingbroke and others. The heterodoxy of some portions of his writings gave so much offence, that measures were contemplated for depriving him of his preferment; but he died before his condemnation could be pronounced. Born, 1695; died, 1758.

CLEANTHES, a Stoic philosopher of the 3rd century B.C. He was a native of Assus, in Lydia; but, visiting Athens, he became a zealous disciple of Zeno; and to enable him to attend on that master in the day, he was accustomed to labour by night. His mental and bodily strength was immense, and despite all obstacles, he studied so successfully as to become, B. C. 263, Zeno's successor. Of his writings only some fragments remain, among which is his noble Hymn to Zeus; but his reputation was so great, that, after his death, the senate of Rome decreed him a statue in his native place.

CLEMENCET, CHARLES, a learned French Benedictine, born 1703. He was charged with the completion of the first edition of the great chronological work, "Art de vérifier les Dates," projected and left unfinished by Maur d'Antine. He took part also in several other important historical works, among which were the "Décrétales des Papes," and the "Histoire littéraire de France." He was warmly attached to the Port-Royalists, and wrote the "Histoire Générative de Port-Royal." He also wrote some controversial works against the Jesuits, in which, notwithstanding his natural tenderness and kind-heartedness, he perhaps showed the influence of the *odium theologicum*. He was a man of fervent piety, and cared for the truth above all things. Died, 1778.

CLEMENCIN, DIEGO, a Spanish statesman and littérateur, was born at Murcia in 1765. He became tutor to the sons of the duke of Osuna, and went with him to Paris. At the outbreak of the Peninsular War he sympathized with the insurgents, and narrowly escaped death at the hands of the

French. The successive counter-revolutions of his very changeful life, and affairs of state, and driven to the queen. His literary work is his voluminous "Eloge on Don Quixote, published with valuable dissertations on the Cid, and other works." 1834.

CLEMENS ROMANUS in the first century. It is he may be the Clement whose Epistle to the Church of the most precious relics of the church, is to be found in the *Acti of Le Clere*. Clemens of Rome, at the end of the first century.

CLEMENS, TITUS FLAVIUS, Clement of Alexandria, one of the fathers of the church. Of his life little is known that it is doubtful if he ever resided at Alexandria or at Rome. He succeeded the catechetical school of the city, and taught there until 202, when Severus compelled him to retire. In 210 he was in Cappadocia afterwards in Antioch, but his chief work was his *Instruction to the Pagans*, "Pagan Instructor," and "Stromata," of which is a very valuable work, containing facts and opinions not met with in no other writings.

CLEMENT VIII., Pope, reigned from 1592 to 1604. He was created cardinal by Sixtus V. in 1587. Innocent IX. in 1592. He was elected Pope in 1592. He was the first to crown him at the cathedral of St. Peter. He published the edition of the Vulgate published by the duchy of Ferrara for the Church. It was under his pontificate that the famous congregations *De Auxiliis* for the settlement of the controversy between the Dominicans respecting grace and free will, and conferences began in 1598, and continued at intervals for nearly 100 years.

CLEMENT XI., Pope (GIANNEBBATTISTA ALBANI), born in 1649, was elected Pope in 1700, and succeeded Innocent XIII. His pontificate of 20 years was one of the most peaceful of the age. His measures involv'd disputes with the emperor of France and Spain, and with the king of Savoy. He published two bulls against the doctrines of the Jansenists, the first, "Vineam Domini," and the second, "Unigenitus," which caused great excitement in France. The Jesuits in China were expelled by a bull "Ex illa die," against the Chinese practices sanctioned by the emperor. He protected and assisted the Jesuits in 1715, and after the failure of the expedition, he gave him Urbino for his reward. This pope was a warm friend

French. The successive revolutions and counter-revolutions of his country made him a very changeful life, alternately active in affairs of state, and driven into rural retirement. In 1833 he was made a peer and librarian to the queen. His most important literary work is his voluminous Commentary on Don Quixote, published in 1833-39. He wrote an Eloge on the great Queen Isabella, with valuable dissertations; a discourse on the Cid, and other works. Died, at Madrid, 1834.

CLEMENS ROMANUS, bishop of Rome in the first century. It is conjectured that he may be the Clement named by St Paul. His Epistle to the Church of Corinth, one of the most precious relics of the primitive church, is to be found in the *Patres Apostolici* of Le Clerc. Clemens is said to have died at Rome, at the end of the 1st century.

CLEMENS, TITUS FLAVIUS, known as Clement of Alexandria, one of the fathers of the church. Of his early career so little is known that it is doubtful whether he was born at Alexandria or at Athens; but about the year 189 he succeeded Pantaenus in the catechetical school of the former city, and taught there until 202, when the edict of Severus compelled him to seek a new abode. In 210 he was in Cappadocia, and he was afterwards in Antioch, but where he died is unknown. His chief works are an "Exhortation to the Pagans," "Pedagogus," or the Instructor, and "Stromata;" the last-named of which is a very valuable miscellaneous work, containing facts and quotations to be met with in no other writer. Died, about 220.

CLEMENT VIII., Pope, whose name was IPPOLITO ALDOBRANDINI, was made cardinal by Sixtus V. in 1585, and succeeded Innocent IX. in 1592. He received the abjuration of Henry IV. of France, and gave him absolution; honoured Tasso by proposing to crown him at the capitol; had a new edition of the Vulgate published; and seized the duchy of Ferrara for the States of the Church. It was under this pope that the famous congregations *De Auxiliis* were held, for the settlement of the controversy then raging between the Dominicans and the Jesuits respecting grace and free-will. These conferences began in 1598, and were continued at intervals for nine years. Died, 1605.

CLEMENT XI., Pope (GIAN FRANCESCO ALBANI), born in 1649, was created cardinal in 1690, and succeeded Innocent XII. in 1700. His pontificate of 20 years was a troubled one, his measures involving him in grave disputes with the emperor, with the kings of France and Spain, and with the house of Savoy. He published two famous bulls, both against the doctrines of the Jansenists; the first, "Vineam Domini," and the second, "Unigenitus," which caused extraordinary excitement in France. The proceedings of the Jesuits in China were condemned by the bull "Ex Illa die;" against certain superstitious practices sanctioned by them. Clement protected and assisted the English Pretender in 1715, and after the failure of his projects gave him Urbino for his residence. This pope was a warm friend of literature

and art, and his private character was excellent. Died, 1721.

CLEMENT XIV., Pope, whose real name was GANGANELLI, was a native of St Angelo, near Rimini. In 1759 he was raised to the cardinalate by Pope Clement XIII., and on the death of that pontiff, in 1769, he was elected his successor. He was at first apparently disinclined to the suppression of the powerful but mischievous order of the Jesuits, but he at length became convinced of the necessity of such suppression, and he signed the brief for it in 1773. Shortly after he had signed this important document he was seized with a disorder, supposed to have been the effect of poison; and, after languishing in agonies, which reduced him to a mere skeleton, he died in 1775. Clement was one of the most enlightened and benevolent characters that ever wore the tiara. His manners were lowly and unassuming, his appearance plain and simple; and when he was told that the papal dignity required a more sumptuous table, he answered that "neither St Peter nor St Francis had taught him to dine splendidly." This pontiff was the founder of the Clementine Museum in the Vatican. His monument at Rome is one of the finest works of Canova.

CLEMENT, FRANÇOIS, a learned French Benedictine of Saint-Maur, was born at Bèze near Dijon in 1714. He was educated at the Jesuits' College at Dijon, and entered the congregation of Benedictines in 1731. His incessant application to study injured his health, and he was compelled to relinquish intellectual labour for about 20 years. He then settled at Paris, and was employed first to continue the "*Histoire Littéraire de la France*;" then, the "*Recueil des Historiens de France*;" and finally to prepare a second edition of the "*Art de Vérifier les Dates*." It appeared in 1770. He then devoted himself to the preparation of a third edition, enlarged and extended, making it, as it has been called, "le plus beau monument d'érudition du dix-huitième siècle." It was published between 1783 and 1792. Dom Clément was admitted to the Academy of Inscriptions in 1785. At the revolution he was driven from his cloister, but continued his peaceful toils in the house of a relative, and had nearly completed "*L'Art de Vérifier les Dates avant Jésus-Christ*," when he died of apoplexy, March 1793, not long after the execution of Louis XVI. who had taken much interest in his labours.

CLEMENTI, MUZIO, an eminent composer and pianist; the father of pianoforte music, and a genius whose fancy was as unbounded as his science; was born at Rome, in 1752. He early evinced a taste for music, and made such progress in the science, that in his ninth year he passed his examination as an organist, and in his 12th he wrote a mass for four voices. Under the patronage of the highly-gifted Mr Beckford he came to England, lived with him at his seat in Dorsetshire, where he learnt the English language, studied, composed, and gradually arrived at the head of his profession. In the year 1800 he was induced to engage, as the head of a firm, in the music trade; in which he continued, but without any interruption of

his duties as a composer, till his death, in 1832. He was buried in Westminster Abbey.

CLEOHULUS, one of the seven wise men of Greece, was a native of the Isle of Rhodes, and lived in the 6th century B. C.

CLEON, the celebrated Athenian popular leader, was the son of Cleænetus, and was by trade a tanner. He was the opponent of the measures of Pericles, on whose death he became the popular favourite. His character and designs have been represented in the most contradictory colours; and the controversy whether he is to be regarded as an earnest defender of popular rights, or a vulgar, factious mob-leader, is still unsettled. He is severely treated by Thucydides, and is the object of the most merciless satire of Aristophanes. The massacre of the Mitylenian prisoners at Athens, in B. C. 427, was chiefly owing to his influence. Two years afterwards he gained great distinction by his capture of the Spartans in the island of Sphacteria, opposite to the fort of Pylos. In 422 he commanded an expedition against Brasidas in Thrace, and was defeated and killed in the battle before Amphipolis.

CLEOPATRA, queen of Egypt. She was the daughter of Ptolemy Auletes, who, at his death, left his crown to her and her younger brother, Ptolemy; but being minors, they were placed under the guardianship of Pothinus and Achilles, who deprived Cleopatra of her share of the government. Cæsar, however, who had met her at Alexandria, being struck with her youthful charms,—she was then about 17,—took up her cause and proclaimed her queen of Egypt; and for some time Cleopatra made the conqueror the bond-slave of her beauty. She followed him to Rome, and was there at the time of his murder. After Cæsar's death she captivated the triumvir, Mark Antony; who, after marrying Octavia, left her for the sake of Cleopatra. The latter was with Antony at the fatal battle of Actium, and failing to fascinate Augustus, and determined not to be his prisoner, she put an end to her existence by applying an asp to her arm, the bite of which caused her immediate death, B. C. 30, aged 39. Cleopatra had a son by Cæsar and several children by Antony.

CLEOSTRATUS, an eminent Greek astronomer and mathematician, a native of Tenedos. He first arranged the signs of the zodiac, and corrected the error in the length of the Grecian year, by introducing the period termed Octæters. He flourished in the 6th century B. C.

CLERC. [LECLERC.]

CLERFAYT, FRANÇOIS SEBASTIEN CHARLES JOSEPH DE CROIX, Count de, an Austrian general, who served with great distinction in the seven years' war, particularly at the battles of Prague, Lissa, &c. From the conclusion of that war till 1788, when he took the field against the Turks, he lived in retirement; but in the war which arose out of the French revolution, he commanded the Austrian army with great credit to himself, in 1793 and 1794, though overborne by numbers, and often defeated in consequence. In 1795 he was made field-marshal, and general-in-chief on

the Rhine, and closed his military career by totally foiling the plans of the French. He then resigned his command to the Archduke Charles, became a member of the aulic council of war, and died in 1798, at Vienna, where a splendid monument is erected to his memory.

CLERMONT-TONNÈRE, ANTOINE JULES DE, cardinal, and dean of the French bishops, was bishop of Chalons in 1782, and was an active member of the states-general. He is chiefly remembered, however, as author of the interesting "Journal of what occurred at the Temple during the Captivity of Louis XVI." Born, 1749; died, 1830.

CLERMONT-TONNÈRE, STANISLAS, Count de, was one of the first among the nobility to side with the popular party in the opening scenes of the French revolution. Having at length given umbrage to his party, he was put to death in 1792.

CLEVELAND, JOHN, a political writer of the time of Charles I. He strenuously supported the cause of that monarch, and when the civil war broke out he joined the royal army, and was made judge advocate to the troops which garrisoned Newark. When that town was surrendered to the parliamentarians, Cleveland made his escape, but was apprehended, in 1655, at Norwich. After a detention of some months he gained his liberty by a temperate but manly letter addressed to Cromwell, in which he justified his opposition to him, on the ground that it was the result, not of any factious or personal motive, but of sincere principle. Of his satires several editions were printed, but they have shared the fate of most works of their class, and are now known to but few. Died, 1659.

CLIFFORD, GEORGE, earl of Cumberland, an eminent naval commander and scholar of the time of Queen Elizabeth. He was present at the trial of Mary, queen of Scots, and in the same year sailed for the coast of South America, where he made himself very formidable to the Portuguese. He was captain of one of the ships engaged against the memorable "Armada" of Spain, and subsequently commanded several expeditions to the Spanish main and the Western Islands; in one of which expeditions he had the good fortune to capture a galleon, valued at £150,000. He was a great favourite with Queen Elizabeth, who conferred on him the insignia of the order of the Garter. It seems, however, that fame and court favour were the chief rewards of his great talent and industry, as he is said to have died poor. Born, 1558; died, 1605.

CLIFFORD, ANNE, daughter of the preceding, was born in 1589. She was married first to Richard, Lord Buckhurst, afterwards earl of Dorset, and second son to Philip, earl of Pembroke. She possessed considerable literary ability, and wrote memoirs of herself and of some of her ancestors. But she was chiefly distinguished by her generosity and high spirit. She built two hospitals, repaired several churches, and erected monuments to the memory of Spenser and Daniel, the latter of whom had been her tutor. She displayed her spirit when Wil-

Hamson, secretary of state, wished to nominate a ment for her borough have been bullied by a reply, "and I have been court; but I will not be subject. Your man shall 1676.

CLINTON, GEORGE, a and statesman. He first Amherst against the conquest of Canada, the study of the law, member of the colonial ing made brigadier-general though he had a very inventing Sir Henry Clinton General Burgoyne. Clinton of New York State from was also made vice-president. Born, 1739; died.

CLINTON, Sir HENRY general. He succeeded Sir commander-in-chief in ill success in 1781 and 1781, unadvised upon, that necessary to exculpate him medium of the press. After America, he was for son of Limerick, and had judged governor of Gibraltar 1795.

CLINTON, HENRY F. distinguished chronologist, author of "Hellenici," and the "Fasti Hellenici;" and the "Fasti Romanorum." Born in Nottinghamshire, he was educated at Westminster, passed thence to Christ Church, where he was admitted a Here his diligence and ab notice of Cyril Jackson, him to a studentship. He 1803, M.A. 1805. His fame name of Fynes; for it was April, 1821, that the royal tained to assume the ancient Clinton. In 1806 he entered for 20 years represented Aldborough. He did not, however, in the debates. His mind directed to historical and researches by the appearance of "History of Greece." Exhausted cares by the possession of fortune, Clinton devoted intense earnestness and perseverance to his chosen task. The extent of his classical readings were the fruits of his faithful labours; the works above mentioned become authorities through "Fasti Hellenici" (Chronographia) was published between 1803 and 1805. "Fasti Romani" (Chronographia) was published between 1845-50. Useful these works were after Clinton was twice married, second wife, a son, and died, 24th Oct. 1852. A "Voluntary Remains" appeared in 1853. Clinton was a distinguished general, who saved the life of the king at the battle of Marston, having expostulated with

Hamson, secretary of state to Charles II., wished to nominate a member of parliament for her borough of Appleby. "I have been bullied by a usurper," was her reply, "and I have been neglected by a court; but I will not be dictated to by a subject. Your man shall not stand." Died, 1676.

CLINTON, GEORGE, an American general and statesman. He first served under General Amherst against the French, and, after the conquest of Canada, devoted himself to the study of the law. In 1773 he was a member of the colonial assembly; and, being made brigadier-general, he succeeded, though he had a very inferior force, in preventing Sir Henry Clinton from aiding General Burgoyne. Clinton was governor of New York State from 1777 till 1810, and was also made vice-president of the United States. Born, 1739; died, 1812.

CLINTON, Sir HENRY, an English general. He succeeded Sir William Howe as commander-in-chief in America; and his ill success in 1781 and 1782 was so severely animadverted upon, that he thought it necessary to exculpate himself through the medium of the press. After his return from America, he was for some time governor of Limerick, and had just been appointed governor of Gibraltar when he died, 1795.

CLINTON, HENRY FYNES, the distinguished chronologist, author of the "Fasti Hellenici," and the "Fasti Romani," was born in Nottinghamshire, the 14th Jan. 1781; was educated at Westminster School, and passed thence to Christ Church, Oxford, where he was admitted commoner in 1799. Here his diligence and ability attracted the notice of Cyril Jackson, who nominated him to a studentship. He graduated B.A. 1803, M.A. 1805. His family then used the name of Fynes; for it was not till the 26th April, 1821, that the royal licence was obtained to assume the ancient family name of Clinton. In 1806 he entered parliament, and for 20 years represented the borough of Aldborough. He did not, however, take part in the debates. His mind was originally directed to historical and chronological researches by the appearance of Mitford's "History of Greece." Exempted from the lowest cares by the possession of a large fortune, Clinton devoted himself with intense earnestness and perseverance to his chosen task. The extent and quantity of his classical readings were prodigious, and the fruits of his faithful labour appear in the works above mentioned, which have become authorities throughout Europe. The "Fasti Hellenici" (Chronology of Greece) was published between 1824-34, and the "Fasti Romani" (Chronology of Rome) between 1845-50. Useful "Epitomes" of these works were afterwards published. Clinton was twice married, and left, by his second wife, a son and eight daughters. Died, 24th Oct. 1852. A volume of his "Literary Remains" appeared in 1854.

CLITUS, a distinguished Macedonian general, who saved the life of Alexander the Great at the battle of the Granicus, but who, having expostulated with his imperial

master when the latter was in a fit of intoxication, was slain by him, B. C. 328.

CLIVE, ROBERT, Lord CLIVE and Baron PLASSEY, was born in 1725, and in his 19th year went to India as a writer, but soon quitted that employment for the army. Being intrusted with the attack of Devicottah, a fort of the rajah of Tanjore, he performed this important duty so well, that he was shortly afterwards made commissary. The French having artfully obtained considerable territory in the Carnatic, Clive advised that an attack should be made on the city of Arcot, which being intrusted to him, a complete victory was obtained. This unexpected victory drew off the French from Trichinopoly, which they were then besieging, to retake Arcot, which Clive defended in such a manner that they were compelled to raise the siege. This was followed by a series of victories; and in 1753 he embarked for England, where he received a valuable present from the East India Company, and was raised to the rank of lieutenant-colonel in the king's service. After a short stay in England for the benefit of his health, he returned to India, and was shortly called upon to march to Calcutta, of which the nabob Surajah Dowlah had taken possession. He was again successful, and perceiving that there could be no permanent peace obtained until the nabob was dethroned, he made the necessary arrangements, and in the famous battle of Plassey, put the nabob completely to the rout, and established the power of the English more firmly than it had ever before been. As governor of Calcutta, Lord Clive performed great services, both civil and military; and when he returned to England he was raised to the peerage by the titles which stand at the head of this article. He once more visited India, but was called upon only for civil measures, which he took with his usual sagacity. In 1767 he returned to England, having done more to extend the English territory and consolidate the English power in India, than any other commander. But the large wealth he had acquired during his long and arduous services exposed him to an accusation in the House of Commons of having abused his power. The charge fell to the ground, but it hurt his mind so deeply that he committed suicide in 1774.

CLODIUS, whose full name is **PUBLIUS CLODIUS** (or **CLAUDIUS**) **PULCHER**, a profligate Roman patrician, especially known as the enemy of Cicero. He served as a soldier in Asia for some years, and being at Rome in B.C. 65, prosecuted Catiline and took a bribe to drop the proceedings. He became most notorious by his daring entrance, dressed as a woman, into the house of Cæsar during the celebration of the mysteries of the Bona Dea, in B.C. 62. On his trial the evidence of Cicero was decisive against him, and thenceforth his aim was revenge on Cicero. He got himself made plebeian and tribune, and procured the banishment of his great enemy, who was however soon recalled. He afterwards went about the city with a band of gladiators, and had frequent combats with

Milo and his band. He was at last killed in one of these combats, early in 52.

CLOOTZ, JEAN BAPTISTE DE, a Prussian baron, better known as **ANACHARSIS CLOOTZ**, one of the wildest and most violent actors in the early scenes of the French revolution. He was born at Cleves in 1753, and very early dissipated the greater portion of his fortune. In 1790, being at Paris, he presented himself at the bar of the National Assembly, attended by a number of men dressed to represent various foreign nations; and, describing himself as the "omnitor of the human race," he demanded the right of confederation. After making himself conspicuous by a variety of foolish projects set forth in no less foolish speeches, he was in 1792 sent to the National Convention as deputy from the department of the Oise. As might be expected from his previous conduct, he was among those who voted for the death of the unfortunate Louis XVI. His course, however, was now well nigh run, for, becoming an object of suspicion to Robespierre, he was arrested, and guillotined in 1794.

CLOSTERMAN, JOHANN, a German portrait painter. He was employed in Spain, Italy, and England; and in this country there are many of his works; among them the great picture of Queen Anne, in Guildhall, London. It is said that when painting the duke and duchess of Marlborough and their children, the disputes between her Grace and the painter were so frequent and so obstinate, that the duke protested he had as much trouble in mediating between them as in winning a battle. Died, 1713.

CLOVIS, king of the Franks, usually called the founder of the French monarchy, was born in 467. He was the son of Childeric I., and succeeded him in 481. During his reign he recovered from the Romans all their possessions in Gaul. He defeated Sigarius, near Soissons, in 486, compelled Alaric, king of the Visigoths, to surrender him, and had him put to death. Clovis married Clotilda, niece of Gundebald, king of the Burgundians, and through her influence was gradually led to renounce paganism, and profess Christianity. His final decision was made after his great victory over the Alamanni, at Tolbiac, in 496; and he was baptized by St Remi, with three thousand of his subjects. In the following year the Armoricans united themselves with the Franks. Clovis pursued a crafty policy with the king of the Burgundians and his brother, on the principle "divide and conquer." In 507 he made war on Alaric II., king of the Visigoths, and totally defeated him at the battle of Vouglé, killing him with his own hand. Clovis thus added the whole south-west part of Gaul to his dominions. At Tours he soon after received ambassadors from Anastasius, emperor of the East, who gave him the titles of patrician and consul. Clovis, about that time, settled at Paris, and made it the capital city. He disgraced himself by the unjust and cruel measures he took to get rid of several of his kindred, possible competitors for the crown. Died, at Paris, in 511, after dividing his kingdom between his four sons.

CLOWES, JOHN, an English divine, rector of the church of St John at Manchester. Embracing the doctrines of Swedenborg, he published translations of a large portion of his theological writings, and wrote several works in exposition and defence of them. Born, 1743; died, 1831.

CLUSIUS (CHARLES DE L'ÉCLUSE), a celebrated physician and botanist, born at Antwerp, in 1526. He first studied law, but abandoned it for medicine and botany. He went to many of the principal universities of Europe, among them that of Wittenberg, where he attended the lectures of Melancthon. He then travelled extensively in Europe in pursuit of his favourite science, and by over-exertion and numerous grave accidents, he ruined his health and became a cripple. He visited England several times. He became keeper of the Botanical Gardens at Vienna, and in 1593 accepted the chair of Botany at Leyden. His principal works are "Karlorum Plantarum Historia," "Exoticorum libri X.," and "Histoire des Plantes," a translation from Dodœens. Died, at Leyden, 1609.

CLUTTERBUCK, ROBERT, an English antiquary and topographer. He was a native of Hertfordshire, and having an independent fortune, he devoted his time to scientific and literary pursuits. Having collected materials for a new edition of Chauncy's History of Hertfordshire, he changed his plan, and produced a new work instead of re-editing the old one. His work consists of three folio volumes, and is well illustrated. Died, 1831.

CLUVIER, PHILIP (CLUVERIUS), a learned geographer, born at Dantzig, 1580. He travelled through the principal countries of Europe, visiting England also, and published the fruits of his researches in his "Germania Antiqua," "Sicilie Antiquæ libri II.," "Italia Antiqua," &c. He is said to have spoken with fluency nine languages. Died, at Leyden, 1627.

CLYDE, COLIN CAMPBELL, Lord, field-marshal, commander-in-chief in India, was born at Glasgow, in 1792. He entered the army in 1808, and first served in the peninsula at the battles of Vimiera and Talavera. In the following year he took part in the Walcheren expedition, and from the fever which struck him there he suffered to the end of thirty years. In 1810 he returned to the peninsula, and served at the battle of Barossa, the defence of Tarifa, and the great battle of Vittoria. He greatly distinguished himself at the first and unsuccessful assault on St Sebastian, in July, 1813, where he received two wounds, and narrowly escaped with his life. He was again wounded at the passage of the Bidasoa. He became a captain by brevet soon after, and obtained no further promotion for twelve years. In 1814 he served in the American war in the West Indies, and was subsequently employed in Ireland on the unwelcome service of enforcing the collection of tithes. Lieutenant-colonel in 1833, he was sent to China in 1842, whence on the outbreak of the second Sikh war he passed to India. He served with great distinction at the battles of Chillianwallah and Goojerat, and in 1851-2

he commanded against the Indus, showing himself in the field, but mercifully reprieved in 1854, on the declaration of Sir Colin Campbell was command of the Highlanders the Crimea, rendered difficult at the battle of the Alma, horse killed under him, thanks of Lord Raglan, &c. He was intrusted with the lava, and with his regiment streak topped with a line repulsed a body of Russian battle of the 25th October made lieutenant-general was soon after created Duke of the outbreak of the Indian following year, he was sent commander-in-chief, where he skillfully applied his vast energy and decisiveness in quelling with Havelock, Outram, and other noble men, the rebellion. He directed the retreat and its subsequent siege at Lucknow, then, after fifty years of service for the honours and rewards he earned, he was raised to the rank of Baron Clyde of Clydesdale, and in 1862 field-marshal, knight of the Star of India, and officer of the Legion of Honour. He served in the Crimea, and was loved by them. He loved his profession, his country, and was loved by them. He was a disciplinarian, but a kind and liberal ward pomp. Though too old to be kept in the back of the army, his ability, knowledge, good sense, and faithfulness, reaped at the expense of judgment and reward. In 1863, and was buried in Westminster Abbey.

COBBETT, WILLIAM, a miscellaneous writer, was born at Farnham, Surrey, in 1762, from his earliest years on his father's estate. An accident—the mere sign of a coach on its journey to London—was going to Guildford for his father, suddenly to quit his father's pursuits, in order to seek a wider sphere. His first employment was of a copying-clerk in the office of which he eloquently depicts. After nine months of gery he enlisted as a soldier, and went to the depot at Chatham, where, about a year, attending closely but applying every leisure moment to the improvement of his mind, to the study of grammar. His length sailed for Nova Scotia, ordered to St John's, New Brunswick, he soon attracted the notice by his industry, regularity, temperance; and was appointed major of the regiment. After service the regiment returned, and Sergeant-major Cobbett received his discharge. He went to France, in order, chiefly, to improve in the language; but seeing that England was inevitable, he

he commanded against the hill-tribes beyond the Indus, showing himself not only brave in the field, but merciful after victory. In 1854, on the declaration of war with Russia, Sir Colin Campbell was appointed to the command of the Highland brigade sent to the Crimea, rendered distinguished service at the battle of the Alma, where he had his horse killed under him, and received the thanks of Lord Raglan, commander-in-chief. He was intrusted with the defence of Balaklava, and with his regiment, the "chin red streak topped with a line of steel," gallantly repulsed a body of Russian cavalry at the battle of the 25th October. Sir Colin was made lieutenant-general in June, 1856, and was soon after created D.C.L., Oxford. On the outbreak of the Indian mutiny in the following year, he was sent to India as commander-in-chief, where he heroically and skillfully applied his vast experience, energy, and decisiveness in quelling, in co-operation with Haavelock, Outram, the Lawrences, and other noble men, the formidable rebellion. He directed the relief of Lucknow, and its subsequent siege and capture. And then, after fifty years of service, waiting for the honours and rewards he had so well earned, he was raised to the peerage as Baron Clyde of Clydesdale, made full general, and in 1862 field-marshal. He was also a knight of the Star of India, and a grand officer of the Legion of Honour. Like Wellington, duty was with him the first thing. He loved his profession, loved his soldiers, and was loved by them. He was a strict disciplinarian, but cared little about outward pomp. Though too long neglected and kept in the background, his great ability, knowledge, good sense, modesty, and faithfulness, reaped at last full acknowledgment and reward. Died, in August, 1863, and was buried in Westminster Abbey.

COBBETT, WILLIAM, political and miscellaneous writer, was born in the parish of Farnham, Surrey, in 1762, and brought up from his earliest years on his father's farm. An accident—the mere sight of the stage-coach on its journey to London while he was going to Guildford fair—led him, in 1783, suddenly to quit his home and rustic pursuits, in order to seek his fortune in a wider sphere. His first employment was that of a copying-clerk in Gray's Inn, the details of which he eloquently and wittily depicts. After nine months' toilsome drudgery he enlisted as a soldier, and was sent to the depot at Chatham, where he remained about a year, attending closely to his duty, but applying every leisure moment to the improvement of his mind, and particularly to the study of grammar. The regiment at length sailed for Nova Scotia, and was then ordered to St John's, New Brunswick, where he soon attracted the notice of his superiors by his industry, regularity, and habitual temperance; and was appointed serjeant-major of the regiment. After seven years' service the regiment returned to England; and Serjeant-major Cobbett solicited and received his discharge. He next went to France, in order, chiefly, to perfect himself in the language; but seeing that a war with England was inevitable, he embarked for

America; where under the sobriquet of Peter Porcupine, he began to publish his "Observations," and other political pamphlets, all calculated to uphold the dignity of his native country, and oppose the prevalence of French principles. But he found it necessary to quit America; and, on his return to this country, he commenced a daily paper called the *Porcupine*, and afterwards the *Weekly Register*, in which at first he strenuously supported the government. But various articles appeared which were denominated libels, and he was arrested, fined, and imprisoned. From this period a gradual change may be discovered in the tone of Cobbett's political disquisitions, and ere long he was looked upon as the leader of the radical reformers. In 1809 he published a libel relating to the flogging of some men in the local militia, at Ely, in Cambridge-shire; he was found guilty, sentenced to two years' imprisonment in Newgate, to pay a fine of £1000 to the king, and at the expiration of the two years to give security for his good behaviour for seven years, himself in £300, and two securities in £100 each. This severe sentence Cobbett never forgot or forgave. No sooner was he liberated than he reduced the price of his "Register" to 2d., whereby its sale was immensely increased. At length the arbitrary "Six Acts" were passed; and as he firmly believed they were passed for the express purpose of silencing him (particularly the Power of Imprisonment Act), he went to America, and settled in Long Island; from which spot his future "Registers" were dated, till his return to England, in 1816, after that act was repealed. Cobbett brought with him the bones of the celebrated republican, Tom Paine—the man whom above all others he had formerly decried as a regicide and an infidel; and called upon his countrymen to honour them by a magnificent public funeral, and the erection of a splendid monument! In 1820 Mr Cobbett was induced to become a candidate for the representation of Coventry, but met with a signal defeat; and in 1826 he made a similar unsuccessful attempt at Preston. In 1829 and the two following years, the events in Europe gave a more impassioned tone to his writings than they had for some time exhibited. He had the revolutions abroad—the reform bill at home—and the fearful spirit of incendiarism through the agricultural districts, to write about all at once. In consequence of an article which appeared in the "Weekly Political Register" on the 11th of December, 1830, he was, on the 7th of July following, tried before Lord Tenterden and a special jury for the publication of "a libel, with intent to raise discontent in the minds of the labourers in husbandry, and to incite them to acts of violence, and to destroy corn stacks, machinery, and other property." Sir Thomas Denman, then attorney-general, was the leading counsel for the crown; while Mr Cobbett conducted his defence in person; and a more lucid, vigorous, or powerful answer to charges brought by a public prosecution has rarely, if ever, been delivered. The jury deliberated from six o'clock at night till nine the next morning,

and then, stating to the judge that there were six of them of one opinion, and six of another, solicited the court to grant their discharge, and they were discharged accordingly. Thus ended this memorable trial. From that hour till the day of his death he never ceased to hold up those to scorn who had made this last desperate, but impotent, effort to crush him. From the time of his trial, in 1831, up to the passing of the reform bill, in 1832, Cobbett's time was almost equally divided between the three several occupations of writing, travelling, and lecturing; and as his fame was evidently again on the increase, he looked forward to a seat in parliament at the approaching elections. When the proper period arrived (Dec. 1832) he was put in nomination both for Manchester and Oldham; and though defeated at the former place, he gained his election at the latter by an immense majority. In 1833 William Cobbett was a British senator—the long-sought object of his ambition. But it was an element unsuited to his habits; late hours and confinement in a heated atmosphere were never intended for him, who "usually went to bed at nine o'clock and rose at four." During a debate on the malt tax, on the 25th of May, he was suddenly attacked with a disease of the throat, from which he never recovered, and on the 17th of June, 1835, he expired. As an author, independent of his long-continued political pamphlets and periodical works before referred to, he was exceedingly industrious; and in those which relate to rural life he was decidedly the most useful writer of the age, as his "Cottage Economy," "Advice to Young Men," "Rural Hides," &c., abundantly prove. He also wrote Grammars of the English and French languages, which had an extensive circulation; also, "A Year's Residence in America," 20 volumes of "Parliamentary Debates," &c.; but his last work, "The History of the Reformation," is distorted by party views, and does Cobbett more discredit than the coarse invectives and political tergiversations that are to be met with elsewhere in his voluminous writings.

COBDEN, RICHARD, the distinguished advocate and promoter of Free Trade, was born at Dunford, near Midhurst, in Sussex, in 1804. After serving an apprenticeship in a London warehouse, and acting a short time as commercial traveller, he became, in 1830, partner in a firm in the cotton trade at Manchester. Taking a deep interest in the political activity of the time—the discussions on and the passing of the Reform Bill,—he set out in 1834 on a tour through Egypt, Greece, Turkey, and the United States. On his return he commenced his career as political economist by the publication of pamphlets, entitled "England, Ireland, and America," and "Russia." About the same time he took an active part in founding the Manchester "Athenæum," and in procuring the incorporation of the borough. In 1838 the Anti-Corn Law League was formed, and to the furtherance of its object Cobden devoted himself with intense earnestness and unintermitting labour. In 1841 he entered parliament as member for Stockport, for

which he had unsuccessfully stood four years earlier. His mastery of his chosen theme, his full knowledge, logical precision, good sense, and entire sincerity made him at once a man of weight in parliament, and in 1846 he saw the grand struggle ended by the conversion of Sir Robert Peel, and the repeal of the corn laws. He then made a Continental tour, and was received in the chief cities with high honours. His countrymen made acknowledgment of his services by a national subscription, and during his absence he was elected M.P. for the West Riding of Yorkshire, 1847. As a member of the Peace Society he attended congresses at Paris, Frankfurt, and London, and steadily advocated the doctrine of non-intervention. His course in reference to the Crimean war, and the war with China, was opposed to the sentiments of the majority of his countrymen, and on the dissolution of parliament in 1857 he was not re-elected. He again visited America, and while absent was elected for Rochester. In 1859 he was offered by Lord Palmerston the presidentship of the Board of Trade, which he courteously and conscientiously declined. The latest and not the least service he rendered his country was the successful negotiation of the Treaty of Commerce with France. The offer of a baronetcy and a seat in the privy council was made to him, and declined; as was also the offer, made a few months before his death, of the chairmanship of the Board of Audit. His health had been broken for several years, and he died in London, the 2nd April, 1862. The intelligence of his death was received with sincere regret, not only in his own country, but on the Continent.

COBENTZEL, CARL, Count von, an eminent Austrian statesman. He was a native of Laybach, and at an early age commenced his public career. During the troubles in the reign of the empress Maria Theresa, his services gave so much satisfaction, that in 1763 he was placed at the head of affairs in the Austrian Netherlands. In this important situation he showed great respect for literature and the arts, and several useful reforms were carried into effect by him. Among his other services was that of founding the Academy of Sciences at Brussels. Died, 1770.

COBENTZEL, LUDWIG, Count von, son of the above, and, like him, a diplomatist. At the early age of 27 he was intrusted with a mission to Catharine II. of Russia, and his gallantry and compliance with her taste for theatricals made him a great favourite with her. From 1795 he was concerned in many of the important negotiations between Austria and other powers, until the treaty of Luneville, in 1801. That treaty restoring peace between Austria and France, he was shortly afterwards made minister of state for foreign affairs at Vienna. In 1805 he was dismissed from this office, and he died in 1808.

COBHAM, Lord. [OLDCASTLE, Sir JOHN.]

COBURG, FRIEDRICH JOSIAS, duke of Saxe-Coburg, an Austrian field-marshal, was born in 1737. In 1789 he commanded the imperial army on the Danube, and, in

connection with the latter war, defeated the Turkish Buclarost. In 1793 he was at Neerwinden, expelled the Netherlands, and invaded Valenciennes, Cambray, &c. but when the English duke of York, separated and gained several defeats, Rhine, and resigned his office, in 1815.

COCCERUS, JOHN, a 17th century professor of divinity. He taught that the Creation was merely a type of the New Revelation, being a prefiguration, he warmly assented to the Millennium. His rather numerous sect, besides 10 folio volumes, he published during his life, but not printed till many years after his death, entitled "Opera, Anecd. Philologica." Born, 1603.

COCCERUS, SAMUEL, count, baron of the empire, and successor to his title, chancellor of Prussia under Great, and was a chief author of the Prussian code. He also published an edition of Grotius' "De J. D." Died, 1755.

COCHIN, CHARLES NICOLAS, French engraver and writer; member and afterwards of the Academy of Painting, drawings of the royal cabinet engravings, which are published as "Lectures sur les culneaux." "Voyage d'Italie." Paris, 1715; died, 1790.

COCHLEUS, JOHANN, opponent of Luther, Calvinist, but more especially named, whom he censured severely in his work, "De Lutheri." He published, in a very curious "History of" and he maintained a friendship with Dr. Morrison, an English subject of the marriage and Anne Boleyn. Died, 1570.

COCHRAN, WILLIAM, a considerable reputation. At Rome, he settled at Glasgow, and a fortune. Of his "Edymton" and "Dental" high estimation. Born, 1730. **COCHRANE, ARCHIBALD**, [SALD, Earl of.]

COCHRANE, Lord. [DUNDEE, Earl of.]

COCHRANE, JOHN DUNDEE, Archibald Cochran, earl of Dundee, an English naval officer. He served in the naval service, he travelled through France, Spain, and then through the Russian empire. Of this latter journey an account in two volumes much curious information. He travelled on foot across South America, he died at Valentia, in Colorado. **COCKBURN, Admiral Sir**

connection with the Russian general, Suwaroff, defeated the Turks, and conquered Bucharest. In 1793 he defeated the French at Neerwinden, expelled them from the Netherlands, and invaded France, taking Valenciennes, Cambray, and other places; but when the English army, under the duke of York, separated from him, he sustained several defeats, retreated across the Rhine, and resigned his command. Died, 1815.

COCCZEIUS, JOHN, a Dutch scholar of the 17th century, professor of theology at Leyden. He taught that the Old Testament was merely a type of the New; and the book of Revelation being a principal object of his attention, he warmly asserted the doctrine of the Millennium. His followers formed a rather numerous sect, called Cocceians. Besides 10 folio volumes on divinity, which he published during his life, he left a work, not printed till many years after his death, entitled "Opera Anecdota Theologica et Philologica." Born, 1603; died, 1689.

COCCZEIUS, SAMUEL, son of Henry Cocceius, baron of the empire, who died in 1719, and successor to his title. He became grand chancellor of Prussia under Frederick the Great, and was a chief author of the Frederician code. He also published a valuable edition of Grotius' "De Jure Belli et Pacis." Died, 1755.

COCHIN, CHARLES NICHOLAS, an eminent French engraver and writer of the 18th century; member and afterwards secretary of the Academy of Painting, and keeper of the drawings of the royal cabinet. Besides his engravings, which are very numerous, he published "Lectures sur les Peintures d'Ierusalem," "Voyage d'Italie," &c. Born at Paris, 1716; died, 1790.

COCHLEIUS, JOHANN, an able but bitter opponent of Luther, Calvin, and other reformers, but more especially of the first-named, whom he censured with great asperity in his work, "De Actis et Scriptis Lutheri." He published, besides this work, a very curious "History of the Hussites," and he maintained a fierce controversy with Dr. Morrison, an English clergyman, on the subject of the marriage of Henry VIII. and Anne Boloyne. Died, 1552.

COCHRAN, WILLIAM, a Scotch artist of considerable reputation. After studying at Rome, he settled at Glasgow, where he realized a fortune. Of his historical pieces, "Endymion" and "Dædalus" were held in high estimation. Born, 1738; died, 1785.

COCHRANE, ARCHIBALD. [DUNDONALD, Earl of.]

COCHRANE, Lord. [DUNDONALD, Earl of.]

COCHRANE, JOHN DUNDAS, nephew of Archibald Cochrane, earl of Dundonald, was an English naval officer. On retiring from the naval service, he travelled on foot through France, Spain, and Portugal; and then through the Russian empire to Kamtschatka. Of this latter journey he published an account in two volumes, which contain much curious information. He was about to travel on foot across South America, when he died at Valencia, in Colombia, in 1825.

COCKBURN, Admiral Sir GEORGE, G.C.B.,

a distinguished naval officer, was born in London in 1771, entered the navy in 1783, received his commission as lieutenant in 1793, and as captain of a frigate in 1794. Appointed to the "Moleag," then cruising on the Italian coast, he distinguished himself on several occasions; shared as commander of the Minerva in the great engagement off Cape St Vincent, and in 1809, being then commodore, received the thanks of parliament for the reduction of Martinique, and was appointed governor of St Pierre. He subsequently took an active part in the expedition to the Scheldt, co-operated in the defence of Cadix against the French, and, after cruising on the Spanish coast for ten years, he was associated with Sir John Warren, he was in command in the expedition against the United States, where his operations in Chesapeake Bay and against Washington were no less gallant than successful. On his return to Europe in May, 1815, he hoisted his flag on the Northumberland; and on the surrender of Napoleon Buonaparte, he was selected to convey the ex-emperor to St Helena, whence he returned the following year. He now turned his attention to politics; in 1818 he was returned M.P. for Portsmouth, and appointed a lord of the Admiralty, in 1820 he sat for Weobly, and in 1826 for Portsmouth. In 1828 he became a second time a lord of the Admiralty. From 1832 to 1836 he held the command of the West Indian and North American naval stations. In 1841 he was returned M.P. for Ripon; and was appointed senior lord of the Admiralty, an office which he held till the resignation of Sir L. Peel's administration, in 1846. Died, 1853, leaving behind him a high reputation for gallantry as a sailor, and efficiency as an administrator.

COCKBURN, HENRY THOMAS, Lord, an eminent Scotch judge, was born in 1779. He was called to the bar in 1800, and soon attained distinction as an advocate. He was the friend of Jeffrey, and one of the first writers for the Edinburgh Review. In 1830 he was appointed solicitor-general for Scotland, and four years later was made a lord of session. He published the Life of Lord Jeffrey, and died in 1854. After his death appeared an interesting volume, entitled "Memorials of his Time, by Lord Cockburn."

COCKER, EDWARD, arithmetician, was born about 1632. He was known as a clever "practitioner in the arts of writing, arithmetic, and engraving," and published several books of writing exercises and other school books. His most popular work, "Cocker's Arithmetic," was published by Hawkins in 1677, after the author's death. It became not only the universal text-book in its time, but long served as the model for others. So that "according to Cocker" became a proverb. Died, about 1674.

CODRINGTON, Sir EDWARD, British admiral, born in 1770. He entered the navy at the age of 13, and was present at the victory of Howe over the French fleet near Brest in 1794. He took part in the battle of Trafalgar, in the Walcheren expedition, and in the Peninsular war. In 1814 he served in North America, and assisted in the unsuccessful attack on New Orleans. The

less brilliant minister than some of his predecessors, he certainly conferred more substantial benefits upon his country than most of them. Colbert was a man of resolute will and of manners not likely to win men's liking. The rise of his rival Louvois into the king's favour was an occasion of bitter vexation to him in his latter years, and so strong was the popular feeling against him, that his remains narrowly escaped violence by a night funeral. He died immensely rich, in 1683.

COLBY, THOMAS, superintendent of the Ordnance Survey, was born in 1784. He was a native of Recheater, was educated at the Royal Military Academy at Woolwich, and entered the army. But early in 1802 he was appointed assistant in the Ordnance Survey, and to the discharge of his duties in that field he faithfully devoted himself for the rest of his life. He rose through the successive grades of captain, major, &c. to be major-general, in 1816. He was remarkable for energy, perseverance, patient and cheerful endurance of hardship and privation, and great kind-heartedness. He succeeded General Kidge as director of the Survey in 1820; was a fellow of the Royal Society, and of many other scientific bodies, and assisted in founding the Astronomical Society. Died at Liverpool, 1852.

COLCHESTER, CHARLES ABBOT, Lord, was born at Abingdon, Berks, in 1757; and having received the rudiments of his education at Westminster School, was entered of Christchurch, Oxford, in 1775. While there he was greatly distinguished for his attainments; and a Latin poem on the Czar Peter gained him not only the prize, but also a gold medal from the empress of Russia. After spending some time abroad, he was called to the bar, and practised with every prospect of becoming a popular advocate. His forensic pursuits, however, were but of short continuance, for on entering parliament for Helston he was speedily noticed for his talent and business-like habits, and on the formation of the Addington ministry he was appointed secretary for Ireland, and keeper of the privy seal. He now commenced some useful reforms in Ireland, but before he could complete them he was elected speaker of the House of Commons. In this situation he displayed not only the talent but the tact and address necessary for the duties of his office; and so far was he from being bigoted to his party, that on the division, in 1805, concerning Lord Melville, the numbers for and against that nobleman being equal, he gave the casting vote against him. In 1817 an attack of erysipelas obliged him to resign the office of speaker; on which occasion he was called to the Upper House by the title of Baron Colchester, with a pension of £4000 per annum. Much of the remainder of his life was passed abroad and in Scotland; and he died in May, 1829, leaving two sons. He was chiefly remarkable for his knowledge of the forms of the House, though he was also a fluent and elegant speaker.

COLDEN, CADWALLADER, a Scotch physician and miscellaneous writer. He emigrated to America, and having become a prosperous landowner in New York, he was

in 1761 made lieutenant-governor of that province. In this office, which he held for fourteen years, he displayed great talent. Colden was a voluminous writer, and on a variety of subjects. Among his works are "An Account of the Diseases prevalent in America," a "History of the five Indian Nations," a "Treatise on Gravitation," &c. Linnæus, to whom he sent many American plants, gave the name of Coldenia to a new genus. Died, 1776.

COLE, HENRY, dean of St Paul's, and judge of the arches' court. In the reign of Henry VIII. he held numerous valuable appointments, all of which he resigned on the accession of Edward VI. The reign of Mary restored his prosperity; and it was he who preached the sermon when the venerable Cranmer was burnt. On the accession of Elizabeth, this fact was doubtless remembered to his prejudice; for he was not only stripped of all his preferments, but kept in prison till his death, in 1579. He was the author of some controversial tracts and sermons; and a disputation between him and Cranmer and Ridley is also in print.

COLEBROOKE, HENRY THOMAS, F.R.S., an eminent Orientalist, and director of the Royal Asiatic Society, was the third son of Sir George Colebrooke, bart., a director of the East India Company. He was born in 1763, and in 1782 was appointed to a writership in India. Being sent as one of a deputation to investigate the resources of a part of the country, it led to his publishing "Remarks on the Husbandry and Commerce of Bengal," in which treatise he advocated a free trade between Great Britain and her eastern possessions. Soon after this he began the study of the Sanscrit language, in which he subsequently became so eminent. The translation of the great "Digest of Hindû Law," which had been compiled under the direction of Sir W. Jones, but left unfinished at his death, was confided to Mr Colebrooke; and while engaged in this work, he was appointed to a judicial situation at Mirzapore, where he completed it in 1798. His other works consist of a "Dictionary of the Sanscrit Language," the "Algebra of the Hindoos," and various treatises on their laws, philosophy, and arithmetic; besides numerous communications to the society of which he was director. He died in March, 1837.

COLERIDGE, SAMUEL TAYLOR, poet, philosopher and theologian, was the youngest child of John Coleridge, vicar of Ottery St Mary, in Devonshire, where he was born in 1772. He was educated at Christ's Hospital and at Jesus College, Cambridge, early distinguishing himself by his classical acquirements, and an extraordinary passion for metaphysical studies. Quitting Cambridge in 1792, he settled soon after at Bristol, projected with Southey and other friends a model colony, "Pantisocracy," on the banks of the Susquehanna, but stayed in England and devoted himself to a literary life. In 1795 he married and removed to Nether Stowey, where he lived three years, and enjoyed the society of Wordsworth. He visited Germany to acquaint himself more fully with the German language and literature, and then settled in

the Lake District. He visited Malta in 1804, and was for more than a year secretary to the governor, Sir Alexander Ball, of whom he gave an interesting account in "The Friend." In 1810 he left his family at Keswick and went to London, and soon after entered the house of his friend Gillman, at Highgate, where he spent the rest of his life. The literary life of Coleridge began with the publication of his poems, in 1794. His first volume was soon followed by others. "Zemorse," a tragedy, "The Ancient Mariner," and "Christabel," are among the best known of his poems. He published also a very admirable translation of Schiller's "Piccolomini," and "Death of Wallenstein." He projected a periodical entitled "The Watchman," which did not succeed; preached occasionally, gave popular lectures, and contributed political and literary articles to some of the newspapers. The "Friend" began to appear as a periodical in 1809, and after his settlement in London appeared the completed work, the "Biographia Literaria," "Lay Sermons," "Aids to Reflection," &c. Other works remained unpublished till after his death: these are the "Confessions of an Inquiring Spirit," "Literary Remains," and "Table Talk," edited by his nephew and son-in-law, Henry Nelson Coleridge; and "Essays on his own Times," and "Notes on Shakespeare and the Dramatists," edited by his daughter, Sara Coleridge. As philosopher and theologian the influence of Coleridge has been very great, and probably is so still, notwithstanding the apparent predominance of a less spiritual philosophy than his. Although he did not live to complete the grand system of religious philosophy which he appears to have projected, the "massive fragments" he has left us suffice to show more than the outlines of the vast whole. His writings are pervaded by a spirit not of this world, and for every earnest student they are rich in treasures of truth, wisdom, and faith. Not a few have found in them the special help, guidance, and defence which the critical doubts and discussions of the age make so needful. Churchman and conservative, he was yet a bold speculator on the highest themes, and a genuine liberal in sentiment towards the good and great of all parties. For long years his life was saddened by ill health and pecuniary difficulties. He suffered much, too, from the habit of taking opium, which grew up from an innocent beginning, and became unconquerable. Pure love of truth, rare simplicity of nature, warm affections, love of social intercourse, and a most extraordinary power of eloquent talking without premeditation, were some of his most striking characteristics. He died at Highgate, 25th July, 1834, and was buried in the old churchyard there.

COLERIDGE, HARTLEY, poet and miscellaneous writer, was the eldest son of Samuel Taylor Coleridge, and was born at Clevedon, in 1796. His father soon after settled in the Lake District, and Hartley's mind and heart were cultivated in the constant society of Wordsworth, Southey, Wilson, and other eminent men, and in the midst of the fairest scenes of nature. Imagination was predom-

inant in him, and he displayed it when a boy in the composition of long and extraordinary romances. He entered Oxford University in 1815, and became fellow of Oriel. Unhappily, he soon lost his fellowship, chiefly through a habit of intemperance, and his fortunes were blighted. After a brief stay in London he went back to the north, tried his hand at the task of schoolmaster, and failed, and spent his remaining years in literary labours. His poems, many of which are of rare excellence, and his "Worthies of Yorkshire and Lancashire," with two volumes of "Essays and Marginalia," are the only written remains of his sad life. Died at Rydal, 1849.

COLERIDGE, SARA, sister of Hartley, and only daughter of Samuel Taylor Coleridge, was born at Keswick in 1803. She was brought up in the family of her father's friend, the poet Southey; married Hercusian, Henry Nelson Coleridge, in 1829; became a widow in 1843, and died in 1852. At the age of 19 she published a translation of Dobrzhoff's "Account of the Adipones, an Equestrian People of Paraguay." She wrote an exquisite fairy tale, entitled "Phantasmia," assisted her husband in editing the works of her father, and, on her husband's death, continued the task unaided. Her admirable dissertations and commentaries on those works display a singular mastery of some of the most difficult themes of philosophy and theology, considerable learning, and great logical power. The works edited by her alone are the "Aids to Reflection," "Notes on Shakespeare," and "Essays on his own Times."

COLERIDGE, HENRY NELSON, nephew of Samuel Taylor Coleridge, and editor of several of his works, was born about 1800. He studied at Cambridge and became fellow of King's College. After a visit to the West Indies for the benefit of his health, he was called to the bar and practised in the court of Chancery. In 1829 he married his cousin, Sara Coleridge. He had the profoundest admiration and love for his uncle, S. T. Coleridge, and was very much in his society, made notes of his opinions and sentiments, and after his death published specimens of his Table-Talk. He also edited "The Friend," "Confessions of an Inquiring Spirit," and the "Literary Remains" of his uncle; and was author of an "Introduction to the Study of the Greek Classic Poets." Died, 1843.

COLET, JOHN, dean of St Paul's, and founder of St Paul's School, was born at London in 1466. He was educated at Oxford, and then spent several years in completing his studies in France and Italy. He was ordained priest in 1498, and after various preferments in the church, became prebendary and dean of St Paul's in 1503. He had just previously obtained his degree of Doctor of Divinity. Dean Colet was a friend of Erasmus and of many other eminent men of his day; and by his freedom of thought and speech, and his promotion of a spirit of inquiry, he exposed himself to the persecution of the clergy. He founded and endowed St Paul's School in 1512; died in 1519, and was buried in St Paul's Cathedral. He

left several works, theoretical and practical.

COLIGNI, GASPARD DE, French general, and leader of the Huguenot war, was born in 1617. He was named Gaspard, was married to a woman named Marie, and took part in the invasion of the Low Countries in 1678, and in the conquest of the city of Valenciennes by Louis XII. and France was a Montmorenci. He was at an early age, distinguished by his battle of Cerisoles, at the battle of Marston, and at the battle of Renty. He was admiral of France in 1652, and was killed at the siege of St Quentin by the Spaniards. On the 11th he retired to his estate, and converted to the reformed faith. He was broken out put himself Protestant, with the Protestants. They were defeated by the Duke of St Denis followed, and were defeated at Jarnac in 1570, after the treaty of Amboise. Coligni was flatteringly called the 'Rino de Medici,' and a few assassins were attempted the duke of Guise. In 1572, he visited him and professed the signal being given by St Bartholomew, 24th August. The duke of Guise with a party went to the house of the duke, he was stabbed, and thrown out of the window. The baseness to kick the body of the corpse was exposed to the mob, and then hung. It was buried by night in a vault. He was in 1780 transferred to the marquis of Montesquiou-Fénelon, a monument which he erected in the city of Paris, and was placed in the monuments.

COLIN, ALEXANDER, a Scottish poet, born in 1526, is chiefly known for his beautiful anti-religious and magnificent monument of James VI. and I. Innsprück, executed in 1567. The Emperor Ferdinand I. appointed sculptor and to his son, the Archduke, died, 1612.

COLLIER, JEREMY, an English divine and learned writer, born in 1625. He received his education at Ampton, in Suffolk; was chosen lecturer at the revolution he refused the oath, and was imprisoned. He was writing in favour of James II. Sir John Friend and Sir V. were executed when they were executed in a plot. Two non-jurors who accompanied him on the 1st taken up, but Collier escaped until the affair had blown again made his appearance in "Essays on Miscellaneous Subjects," in 3 volumes, obtained a high reputation; and his was a spirited attack upon the

left several works, theological and grammatical.

COLIGNI, GASPARD DE, admiral of France and leader of the Huguenots in the civil war, was born in 1517. His father, also named Gaspard, was marshal of France, and took part in the invasion of Italy by Charles VIII., and in the conquest of the Milanese by Louis XII. and Francis I. His mother was a Montmorenci. He entered the army at an early age, distinguished himself at the battle of Cerisoles, at the taking of Carignan, and at the battle of Renti. He was made admiral of France in 1552 by Henry II. At the siege of St Quentin he was taken prisoner by the Spaniards. On the death of Henry II. he retired to his estates, became a convert to the reformed faith, and when the war broke out put himself at the head of the Protestants, with the prince of Condé. They were defeated by the duke of Guise at the battle of Dreux; the indecisive battle of St Denis followed; and the Protestants were defeated at Jarnac and Monecontour. In 1570, after the treaty of St Germain, Coligni was flatteringly received by Catherine de Medici, and a few days later his assassination was attempted by an emissary of the duke of Guise. The king, Charles IX., visited him and professed his regret. On the signal being given for the massacre of St Bartholomew, 24 August, 1572, the duke of Guise with a party of murderers went to the house of the admiral; by these he was stabbed, and thrown out of a window at the feet of the duke of Guise, who had the baseness to kick the still living body. The corpse was exposed for three days to the mob, and then hung, head downwards. It was buried by night in the family tomb, was in 1780 transferred to the estate of the marquis of Montesquiou-Fezensac, and the monument which he erected was subsequently placed in the museum of French monuments.

COLIN, ALEXANDER, a sculptor of Mechlin, born in 1326, is chiefly known by the beautiful anti-relievi on the sides of the magnificent monument of Maximilian I. at Innsprück, executed in 1563-66 by order of the Emperor Ferdinand I. He was afterwards appointed sculptor to the emperor and to his son, the Archduke Ferdinand. Died, 1612.

COLLIER, JEREMY, an English nonjuring divine and learned writer, was born in 1650. He received his education at Cambridge, and was presented with the rectory of Ampton, in Suffolk; which he resigned on being chosen lecturer at Gray's Inn. At the revolution he refused to take the oaths, and was imprisoned in Newgate for writing in favour of James II. He attended Sir John Friend and Sir William Perkins when they were executed for the "assassination plot." Two nonjuring clergymen who accompanied him on this occasion were taken up, but Collier escaped, and lay hidden until the affair had blown over, when he again made his appearance, and published "Essays on Miscellaneous Subjects." This work, in 3 volumes, obtained him considerable reputation; and his next publication was a spirited attack upon the licentiousness

of the stage. He was, as a matter of course, replied to by many of the dramatic writers of the time; but he had truth on his side, and his works had good effect. He next translated and continued Moreri's Dictionary; and his reputation had now so much increased, that Queen Anne's government offered him valuable church preferment, which, with a rare consistency, he steadily declined. His remaining works were, an "Ecclesiastical History," brought down to the death of Charles II., some sermons, pamphlets, and a translation of the "Meditations" of the Emperor Marcus Aurelius. Died, 1726.

COLLINGWOOD, CUTHBERT, Lord, a celebrated English admiral, was born at Newcastle-upon-Tyne, in 1748. He entered the navy when only 13 years of age, and his services were long, arduous, and valuable. In the action of June 1, 1794, he was flag-captain to Admiral Bowyer on board the Prince; and at the battle of Cape St Vincent, in 1797, he commanded the Excellent. Having attained the rank of vice-admiral of the blue, and being second in command at the battle of Trafalgar, where the hero of England's navy fell, the command of the fleet devolved upon Admiral Collingwood, whose gallant conduct at the onset had called forth an exclamation of delight from Nelson, and to whose admirable skill and judgment, after the battle, the preservation of the captured vessels was chiefly attributable. For this and his other important services he was promoted to the rank of vice-admiral of the red, and elevated to the peerage. He was brave, indefatigable, just, and kind; strictly preserving discipline, while he gained the love of his compatriots, and merited all that a grateful country could bestow on him. His letters, published after his death, which took place while cruising off Minorca, in 1810, show him to have possessed considerable literary ability.

COLLINGWOOD, FRANCIS EDWARD, a captain in the English navy, was a midshipman on board the Victory, at the battle of Trafalgar; and to him is ascribed the honour of being the avenger of Nelson's death, having shot the Frenchman in the maintop of the Redoubtable, who was seen to take deliberate aim at the English hero the moment before he fell. Died, 1835.

COLLINS, ANTHONY, the noted freethinker, was born at Heston in Middlesex, in 1678. He studied at Cambridge and afterwards at the Temple, became a justice of the peace and treasurer of the county of Essex. He was however chiefly occupied in controversial writing on matters of philosophy and theology. He was the intimate friend of Locke, who very highly esteemed him; he had a long controversy with Dr Samuel Clarke; and provoked by some of his writings innumerable replies. His principal works are "Priestcraft in Perfection;" "Essay on the Thirty-nine Articles;" "Discourse on Freethinking," which was savagely attacked by Bentley; "Philosophical Inquiry concerning Liberty and Necessity;" and "Grounds and Reasons of the Christian Religion." Died at London, 1729.

COLLINS, ARTHUR, a celebrated English

genealogist; author of the 'English "Peerage" and "Baronetage;" and Lives of Cecil, Lord Burleigh, and Edward the Black Prince, &c. He was rescued from poverty by a pension of £400 per annum, granted to him by George II. Born, 1682; died, 1760.

COLLINS, JOHN, an able English mathematician and accountant. He was for some time in the naval service of Venice against the Turks; but at the restoration he was appointed to the office of accountant to the Excise Office, the court of Chancery, &c. He found time to contribute largely to the Transactions of the Royal Society; corresponded with Barrow, Newton, and other eminent mathematicians; and wrote various mathematical works. Born, 1624; died, 1683.

COLLINS, WILLIAM, a highly-gifted but ill-fated English poet; author of odes, eclogues, &c. He was born, in 1720, at Chichester, and received his education at Winchester and Oxford. In 1744, he settled in London, but leading a dissipated life, suffered from poverty even beyond the common lot of poets. The death of his uncle, Colonel Martin, who bequeathed him a legacy of £2000, raised him from this abject condition; but his health and spirits were broken, and after lingering for some time in a state of mental imbecility, soothed at last by a sister's love, he died at Chichester, in 1756. His odes, which when published were utterly disregarded, are unquestionably among the finest of English lyrical poems. One of the most celebrated is the "Ode to the Passions." A monument, executed by Flaxman, was erected to his memory by public subscription, and his life was written by Dr Johnson, who loved him, and speaks of him with great tenderness.

COLLINS, WILLIAM, an English painter of distinguished merit, was born in London, 1787. He inherited an enthusiastic admiration for the beauties of nature from both his parents. His father, one of the first picture-dealers of his time, was a man of considerable literary attainments; and his friendship with Morland the painter early led to his son's initiation into the mysteries of the pencil. In 1807 he became a student of the Royal Academy, and having prosecuted his studies with great zeal and success, he was chosen an associate in 1814, and elected an academicien in 1820. From this period he continued to produce those coast and cottage scenes which gained for him his early reputation, and marked him out as one of the most thorough English artists of his time. With a view of studying the works of the old masters and of observing nature in new forms, he visited Italy in 1836, and spent two years there. Down to the year 1846 he contributed regularly to every exhibition, attempting occasionally historical painting, but winning fresh laurels chiefly by frequent revivals of those more domestic subjects by which he had won his early fame. True to his "first love," his last production, "Early Morning," was an English sea-piece. Among his favourite works are the "Shrimpers," "Frost Scene," "Cromer Sands," and "Prawn Catchers," the last of which is in the National Gallery. Mr Collins was im-

bued with earnest but unaffected piety; and his death, though not unexpected, caused deep regret to a large circle of attached friends and admirers. Died, 1847.

COLLINSON, PETER, an English botanist, to whom we are indebted for the introduction of many ornamental shrubs and plants into our gardens, was born in 1694. He was intimate with Franklin and Linnæus, the latter of whom gave the name Collinsonia to a genus of plants. Died, 1768.

COLLOREDO, RUDOLPH, count of Waldsee, imperial field-marshal, was born in 1686. He distinguished himself greatly, and was seven times wounded at the battle of Lutzen in 1632. His greatest achievement perhaps was the successful defence of Prague against the Swedes in 1648. He was named governor of the city, and died there in 1697.

COLLOREDO-WENZEL, JOHANN NEPUCENE FRANZ, Count of imperial field-marshal, was born in 1738. He served in the Seven Years' War, became chamberlain to the emperor Joseph II., and was made a knight of the Teutonic order. He served with Marshal Laudon against the Turks in 1789, and distinguished himself at the siege of Belgrade. In 1793 he joined the prince of Coburg in the Netherlands, and took a distinguished part in the battle of Neerwinden. He became afterwards president of the Aulic Council and field-marshal. Died, 1822.

COLLOREDO-MANSFIELD, JEROME, Count of Austrian general, was born in 1775. He entered the army in 1793, and served in the expedition under the duke of Brunswick against France. Two years later he was taken prisoner by the French, but made his escape. He was severely wounded in the attack on Bregentz in 1798; at Verona in 1809, when he gallantly held his ground against the French, and secured the retreat of the Austrian army; at the battle of Leipzig in 1813, when he had succeeded to the command after the fall of the prince of Hesse-Homburg and the capture of General Merveidt; and at the combat near the bridge of Barce in the campaign of 1814. Died, 1822.

COLLOT D'HERBOIS, JEAN MARIE, one of the most sanguinary leaders in the French revolution, was born at Paris in 1750. Before the revolution he was a clever strolling player. He joined the club of the Jacobins, and soon gained a great ascendancy; won the prize for his "Almanach du Père Gerard;" and became a member of the Convention, and of the Committee of Public Safety. He was charged with several provincial missions, and made himself a name of infamy by his execution of them. In 1793 he went to Lyons, where he had more than 16,000 persons put to death, and made it a capital crime to look sad or pitiful. An attempt was made to assassinate him, which only made him more popular, and he contributed powerfully to the fall of Robespierre. He was soon after denounced, arrested, and in March, 1795, transported to Cayenne, where he died, January, 1796.

COLLYER, JOSEPH, senior associate engraver of the Royal Academy, was born at London, 1748, of parents who were known

in the literary world by from Gesner and Bodmer, Antony and William, W superior talent in the surviving; his portraits engraved. Among them IV, and the Princess Charlotte. **COLMAN, GEORGE**, an and accomplished scholar. He was born at where his father at that British envoy, and his m the countess of Bath. in the literary world by their translations from Gesner and Bodmer. He was a pupil of Antony and William Walker, and showed superior talent in the stippled style of engraving; his portraits in that line stand unrivalled. Among them are those of George IV. and the Princess Charlotte. Died, 1827.

COLMAN, GEORGE, a dramatic writer and accomplished scholar of the 18th century. He was born at Florence, in 1733, where his father at that time resided as the British envoy, and his mother was sister to the countess of Bath. Having received his education at Westminster School and at Christchurch, Oxford, he turned his attention to the law as a profession; but his writings in *The Connaisseur* having met with success, gave him a bias towards polite literature, and he accordingly abandoned the graver pursuits of legal science. His first dramatic attempt was "Polly Honeycombe," which was performed at Drury Lane with great, though only temporary, success. In the following year, 1761, he produced his comedy of the "Jealous Wife," which at once became popular and has ever since kept the stage. "The Clerical Marriago," "The English Morelian," &c., added to his fame; and he wrote a number of other pieces, which, though inferior to these, were by no means deficient in merit. Lord Bath and General Pulteney, at their deaths, left him considerable legacies, which enabled him to purchase a share in Covent Garden Theatre. Disputes arising between himself and the other proprietors, he very soon disposed of this property, and purchased the little theatre in the Haymarket, which he conducted until an attack of paralysis reduced him to a state of mental imbecility. In addition to his writings mentioned above, he translated the comedies of Terence, and *Horace De Arte Poetica*. Died, 1794. His portrait, painted by Gainsborough, is in the National Portrait Gallery.

COLMAN, GEORGE THE YOUNGER, an eminent dramatist and wit, son of the above, was born in 1762, and received his education at Westminster School, Christchurch College, Oxford, and King's College, Aberdeen. On his return from college he was entered a student of Lincoln's Inn. Circumstances, however, as well as inclination, led him to abandon the profession of the law. In 1784 his first acknowledged play, called "Two to One," was acted. The success of this exceeded his most sanguine expectations. In 1787 his celebrated opera of "Inkle and Yarico" appeared, and at once stamped his fame. Shortly after this the elder Colman was attacked with paralysis, which terminating in mental imbecility, his son presided over the Haymarket Theatre, and subsequently became its proprietor. The prolific pen of "George Colman the younger" seemed never idle; and yet, perhaps, there was scarcely a man in London who spent more hours in convivial measures, or whose brilliant flashes of wit often "set the table in a roar." His principal works, chronologically arranged, were "The Mountaineers," "The Iron Chest," "The Heir at Law," "Blue Beard," "The Revier, or Wags of Windsor," "The

Poor Gentleman," "Love laughs at Locksmiths," "John Bull," &c. Among his other compositions are "Hundred Records," "My Nightgown and Slippers," "Broad Grins," &c. George IV. appointed him to the situation of licenser and examiner of plays, an office for which he was admirably qualified. Died, 1836.

COLOCOTRONIS, THEOD., one of the heroes of modern Greece, was born in Messenia, 1770; distinguished himself in numerous engagements with the Turkish oppressors of his country, and contributed, by his heroic conduct during the insurrection, to the final triumph of the Greek cause in 1828. After the death of Capo d'Istria, he became a member of the provisional government; but having conspired against the regency established till the majority of King Otho in 1834, he was condemned to death, and owed his escape to the clemency of the king. Died, 1843.

COLONNA, FRANCESCO, a Dominican monk, born at Venice about 1430; known only as author of a strange book with the strange title of "Poliphili Hyperotomachin," which appeared in 1499, and respecting which the greatest diversity of opinion has existed. A lady is celebrated in it with whom the author was in love, and whose death led him to become a monk. It contains some passages of architectural descriptions, for which some have commended it to students of architecture. It has been several times translated into French. Fra Francesco died in 1527.

COLONNA, PABIO, or in Latin, **PABIVS COLUMNA**, Italian botanist, born at Naples in 1567, wrote many botanical and scientific works, was the correspondent of the most eminent naturalists of his time, and died in 1650.

COLONNA, FRANCISCO MARIA POMPEO, born in Italy about 1640, was a student of the sciences and a follower of the alchemists. He wrote "Secrets of the Philosophy of the Ancients," "Abridgment of the Doctrine of Paracelsus," &c. He was burnt to death in his house, at Paris, in 1726.

COLONNA, PROSPERO, son of Antonio Colonna, prince of Salerno, was a distinguished military officer. He assisted Charles VIII. of France to conquer Naples, but subsequently aided in retaking it for the house of Arragon. He served under the great Gonsalvo, and was charged by him to conduct Cesar Borgia prisoner to Spain. In 1513 Prospero defeated the Venetians near Vicenza, was captured by the French two years later, but won several victories over them in 1521 and the following years. Died, 1523.

COLONNA, POMPEO, nephew of the above, a restless and intriguing Roman cardinal, who quarrelled in succession with the popes Julius II., Leo X., and Clement VII., and had part in all the troubles of the court of Rome. When Clement VII. was the prisoner of Constable de Bourbon, Pompeo exerted his influence for his liberation. He at length became viceroys of Naples. Died, 1532.

COLONNA, VITTORIA, marchioness of Pescara, a celebrated Italian poetess. She married at the age of 17, and was a widow

at 35, when, inconsolable for her loss, she retired and passed the remaining years of her life in solitude. Her poems, "Rime Spirituale," are tender and elegant expressions of sorrow and of religious consolation, and have been frequently reprinted. Born, 1490; died, 1547.

COLOTES, or COLOTES, a Greek sculptor, contemporary with Phidias, whom he is said to have assisted in the statue of the Olympian Zeus. Several of his works are spoken of in very high terms, especially an ivory figure of *Esculapius*. Lived, about 440 B. C.

COLQUHOUN, PATRICK, LL.D., a writer on statistics and criminal jurisprudence. He was a native of Dumbarton, in Scotland, born in 1745, and early in life went to America. On his return from that country he settled at Glasgow as a merchant, and became lord provost of the city, and president of its chamber of commerce. Subsequently he removed to London, and in 1792 he was made a police magistrate, in which situation he was distinguished by great ability and untiring assiduity. He published several valuable works, including a "Treatise on the Police of the Metropolis," a tract on the "Education of the Labouring Classes," "A Treatise on the Population, Wealth, Power, and Resources of the British Empire," &c. Died, 1820, aged 75.

COLSTON, EDWARD, an English merchant, memorable for his munificence and philanthropy. During his lifetime he expended upwards of £70,000 in aiding various public charities, and he is supposed to have privately given away an equal amount. Notwithstanding his public and private benevolence, however, he left £100,000 among his relatives and dependants. In addition to his other good works, he founded and endowed St Augustine's School, Bristol, for the education of 100 boys, besides almshouses in other places. His statue, executed by Rysbrack, stands in the church of All Saints, Bristol. Born, 1638; died, 1721.

COLT, SAMUEL, inventor of the revolver, was born at Hartford, Connecticut, in 1814. He obtained the patent for his invention in 1835, a model of the pistol having been made, it is said, in 1829. His first attempt to establish a factory was not successful, but he ultimately formed a company and carried on a prosperous business at Hartford. Died there, 1862.

COLTON, CALEB C., a writer of considerable talent, but of eccentric and discreditable habits, was educated at Eton and King's College, Cambridge, where he graduated and obtained a fellowship. He first attracted notice by the publication of a pamphlet, entitled "A plain and authentic Narrative of the Sampford Ghost," in which he attempted to prove that certain occurrences which took place in a house at Sampford Peverell, near Tiverton, originated in supernatural agency. He also wrote a satirical poem, entitled "Hypocriasy," and another on "Napoleon;" but he obtained his chief reputation from "Lacon, or Many Things in Few Words," which he published in 1820. Though a benighted clergyman, holding the vicarage of Kew with Petersham, in Surrey,

he was a well-known frequenter of the gaming-table; and having absconded, to avoid his creditors, in 1828, a successor was appointed to his living. He then went to America; but subsequently lived in Paris, a professed gamester; and it is said that he gained by this vicious course of life, in two years only, the sum of £25,000. He blew out his brains while on a visit to a friend at Fontainebleau, in 1832. We copy from his own "Lacon" the following apophthegm:—"The gamester, if he do a martyr to his profession, is doubly ruined. He adds his soul to every other loss, and, by the act of suicide, renounces oath to forfeit heaven!"

COLUMBA, ST, an early preacher of Christianity in Scotland, usually called the Apostle of the Highlanders. He was born in Ireland, and is known as the founder of the Culdees, and of the famous monastery of Iona. He lived in the sixth century, and is said to have died about its close. Very little can be certainly ascertained of his history.

COLUMBUS, CHRISTOPHER, the discoverer of America, was born at Gonoa, of an illustrious family originally of Piacenza, about 1445. He was sent to study at the university of Pavia, where he showed a strong passion for geographical knowledge, together with an irresistible inclination for the sea. He went to sea about 1469, and passed about thirty years of his life in visiting the various parts of the then known world. His voyages extended northward to Iceland and indeed considerably beyond it, and southward to the coast of Guinea. His imagination was kindled by the geographical discoveries of the Portuguese. He read the Geography of Ptolemy, and the Travels of Marco Polo, pored over the globe of Martin Behaim and the charts of Andrea Bianco, and firmly believed he could reach the half-mythical Cipangu and Cathay by sailing westward from Europe. The use of the astrolabe was proposed by Behaim, and contributed very greatly to the success of such an enterprise as Columbus was beginning to meditate. After many years spent in the active duties of a maritime life, with his mind bent on the acquisition of geographical and nautical science, he was settled, born, where an elder brother of his was settled; married the orphan daughter of Palestrolo, an Italian navigator; and studied all the maps and charts he could procure, making occasional voyages; in which alternation of theoretical and practical improvement he spent several years. His own reflections, corroborated by facts of which he was informed by various seamen, led him at length to the conclusion, that there were unknown lands separated from Europe by the Atlantic. After vainly seeking aid from Genoa, Portugal, and England, he at length obtained an introduction first to King Ferdinand, and afterwards to his Queen Isabella, and, not without several disappointments, induced them to equip and man three vessels for a voyage of discovery; it being stipulated that Columbus should have a tenth of all profits, and be viceroy of the land he expected to discover. He set sail from Palor, on his grand adventure, on the 2nd of August, 1492; and, after sailing for two

month, was in imminent danger of the reward of all his sufferings, when the variation of the needle alarmed his crews, that the point of breaking into open sea was obliged to promise that he produced no discovery, he his homeward voyage. They hove in sight of one Guanahani or San Salvador; discoverer had the sweetest faith and enthusiasm, the for his disappointments and bent his knees in worship, on the promised new land.

October, 1492. He then sailed other lands, and discovered mingo or Hispaniola, and West India Islands. Having succeeded, he built a fort at some of his men there, and his return to Europe, where with almost royal honour other valuables which he king and queen in token of the spirit of adventure, sovereigns and their subjects second voyage he had no following followers. It was no voyage, made in 1498, that land of America, which reached before him, and A in 1499; and though there dispute as to the actual pour of giving a name to the mains with the latter. His command of the settlement various complaints were by his enemies, and Columbus merely displaced, but the governor, who had been de by the court of Spain, even country in chains. Columbus outrage with noble equanimity return, having obtained an sovereigns, was partially dignities; but full justice was him. Yet, notwithstanding treatment, he made another which he encountered every sector from storms and shipwreck years after his return, his under the load of injustice, poverty. He died at Valladolid.

COLUMBUS, BARTHOLOMEW, Christopher, was a skillful navigator, and celebrated for his globes and sent by his brother to lay his discovery before Henry V. Meanwhile the court of Spain taken the enterprise. Bartolomeo the honours done to his brother nobled in 1493, and in the accompanied Christopher where he remained as governor; however, several expeditions and died, in St Domingo, in 1498. COLUMELLA, TUCIUS JULIUS, a native of Gades, in Spain, at Rome in the reign of the Augustus; and, besides other voluminous and interesting "De Re Rustica," which embraced farming, but many connected

months, was in imminent danger of losing the reward of all his study and toil, the variation of the needle having so much alarmed his crews, that they were on the point of breaking into open mutiny, and he was obliged to promise that if three days produced no discovery, he would commence his homeward voyage. On the third day they were in sight of one of the Bahamas, Guanahani or San Salvador; and the noble discoverer had the sweetest reward of his faith and enthusiasm, the best compensation for his disappointments and trials, when he bent his knees in worship, not without tears, on the promised new land. It was the 12th October, 1492. He then sailed in search of other lands, and discovered Cuba, St Domingo or Hispaniola, and some other of the West India Islands. Having thus far succeeded, he built a fort at Hispaniola, left some of his men there, and then set out on his return to Europe, where he was received with almost royal honours. The gold and other valuables which he presented to the king and queen in token of his success, excited the spirit of adventure in both the sovereigns and their subjects, and in his second voyage he had no difficulty in obtaining followers. It was not until his third voyage, made in 1498, that he saw the mainland of America, which Sebastian Cabot reached before him, and Amerigo Vesputi in 1499; and though there has been much dispute as to the actual priority, the honour of giving a name to the new world remains with the latter. Having assumed the command of the settlement at Hispaniola, various complaints were made against him by his enemies, and Columbus was not merely displaced, but Bobadilla, a new governor, who had been despatched thither by the court of Spain, even sent him to that country in chains. Columbus endured this outrage with noble equanimity; and on his return, having obtained an audience of his sovereigns, was partially restored to his dignities; but full justice was never awarded him. Yet, notwithstanding this shameful treatment, he made another voyage, in which he encountered every imaginable disaster from storms and shipwreck; and two years after his return, his noble mind sunk under the load of injustice, oppression, and poverty. He died at Valladolid, in 1506.

COLUMBUS, BARTHOLOMEW, brother of Christopher, was a skilful cosmographer, and celebrated for his globes and maps. He was sent by his brother to lay his vast project of discovery before Henry VII. of England. Meanwhile the court of Spain had undertaken the enterprise. Bartholomew shared the honours done to his brother, was employed in 1493, and in the following year accompanied Christopher to St Domingo, where he remained as governor. He made, however, several expeditions of discovery, and died, in St Domingo, in 1514.

COLUMELLA, LUCIUS JUNIUS MODERATUS, a native of Gades, in Spain. He resided at Rome in the reign of the Emperor Claudius; and, besides other works, wrote a voluminous and interesting treatise entitled "De Re Rustica," which embraces not only farming, but many connected subjects, gar-

dening being treated in one book which is written in verse. The works of Columella have been frequently republished.

COMBE, Dr ANDREW, one of the most eminent medical practitioners and writers of our time, was born at Edinburgh, 1797. After studying at the High School, and at the college, he was apprenticed in 1812 to a general medical practitioner. Attracted and interested by the lectures of Dr Spurzheim in Edinburgh, in 1815, he sought his acquaintance, and having in 1817 obtained his diploma from the College of Surgeons, he proceeded to Paris to prosecute his studies in the hospitals of that capital under the advice of Dr Spurzheim. Here he remained for two years; and after a short tour in Switzerland and Italy he returned to Edinburgh in 1819. Soon after he reached home he was seized with symptoms of pulmonary consumption; and from this time, 1820, to the day of his death, he was, though with many intervals of comparative health, a confirmed invalid. Immediately upon his seizure he determined to go to the south of France, but had not got farther than London when he found himself too unwell to travel, and returned home; there he temporarily recovered, helped to found the Phrenological Society, and in the ensuing August set off again to the Mediterranean, on whose shores he spent two years. He then determined to begin practice in Edinburgh, where his high standing among his professional brethren, and general character for good sense, talent, and strict conscientiousness, did not leave him long unemployed. During the next few years he attained great repute from his able papers in reply to the opponents of phrenology, and also rose high in his profession. In 1825 he took the degree of M.D., and two years later was elected president of the Phrenological Society. During these and several following years, he contributed many interesting papers to the Phrenological Journal, and published a work on mental derangement; and in the course of an extensive practice addressed those invaluable letters to his patients, which, combining so happily the earnest and benevolent friend with the able physician and philosopher, must have strengthened his influence as well as greatly added to his usefulness. In 1831 his health again gave way, and he was obliged to pass the winter in Italy, and for some years altogether to abandon the practice of his profession. In 1836 he was appointed physician to the king of the Belgians, but after a short trial he was obliged to resign the resident appointment, finding his strength inadequate to the due performance of his duties. Between the years 1834-39 he published the three great works for which he had been long and carefully collecting and arranging the materials, "The Principles of Physiology applied to the Preservation of Health and to Education," "The Physiology of Digestion," and "The Moral and Physical Management of Infancy." In 1838 he was appointed one of the physicians extraordinary to the queen in Scotland. In the autumn of 1844 his health at last gave way so threateningly, as to oblige him to give up all work, and

to try the climate of Madeira. There he passed two successive winters. After this he only left home once again, and that was to make a voyage to America, in the summer preceding his death. Surrounded by attached friends, and tended with faithful and most loving care, his life of usefulness was peacefully closed in the autumn of 1847.

COMBE, GEORGE, the eminent phrenologist, was born at Edinburgh, in 1789. He was the brother of Dr Andrew Combe, with whom he was associated through life in various schemes of moral and social amelioration. After pursuing his studies at the High School and university of his native city, he was articled to a lawyer, and passed as writer to the Signet in 1812. In 1816 he became a convert to the views of Dr Spurzheim, who was then on a visit to Edinburgh, and in the course of three years had so familiarized himself with the subject that he published "Essays on Phrenology," which he afterwards expanded into his "System of Phrenology," and in 1824 founded the "Phrenological Journal," as the means of promulgating his views. In 1828 he gave to the world his ablest work, the "Constitution of Man;" this work excited the liveliest controversy at the time of its appearance, but the validity of the main principles on which it was based has now been generally recognized. During all this period, and for some time afterwards, Mr Combe had followed his professional pursuits: but in 1837 he addicted himself exclusively to literature; visited the United States and Germany, and though himself in delicate health, devoted his whole time to the promulgation of his moral, social, and philosophical views by means of lectures and the press. Resides publishing his "Notes on America," in 1841, his "Notes on the Reformation of Germany," in 1846, "the Life" of his brother, Dr Andrew Combe, and various other works, Mr Combe was one of the clearest expositors of monetary science, and his contributions to the "Scotsman" on this and kindred subjects gave him as high rank as a political economist, as he had before enjoyed as a phrenologist and philosopher. Died, 1858.

COMBER, Dr THOMAS, dean of Carlisle. On the breaking out of the civil war he was deprived of his preferments and thrown into prison; but he lived to witness the restoration of Charles II. Died, 1663.

COMBER, Dr THOMAS, dean of Durham; author of "A Companion to the Temple," "A Companion to the Altar," "An Account of the Roman Forgeries in the Councils during the first Four Centuries," &c. Died, 1699.

COMBERMERE, STAPLETON COTTON, Viscount and Baron, field-marshal, was born at Llewenny Hall, in Denbighshire, in 1769. He was educated at Westminster School, entered the army in 1790, and three years later served under the duke of York in Flanders, in the first campaigns of the long wars of the French revolution. In 1795 he took part in the conquest of the Cape of Good Hope, and went thence to India, where he shared in the final conflict with Tippoo Saib, taking part in the battle of Mallavelly, and the siege of Seringapatam.

In 1808 he was sent to Spain in command of a brigade of cavalry; distinguished himself at Talavera; obtained the local rank of lieutenant-general, and in 1810 was appointed commander of the allied cavalry under Wellington. In that capacity he served with distinction through the remaining campaigns of the war, rendering important services at Busaco, Fuentes d'Onor, Salamanca, where he was severely wounded, El Bodon, Orthez, and Toulouse. He twice received the thanks of both Houses of Parliament, and was raised to the peerage as Baron Combermere, in 1814. Three years later he was named governor of Barbadoes, and in 1822 commander-in-chief in India, where he won fresh honour by the capture of Bhurtpore, in 1825. In the following year he was created Viscount. He held for nearly 40 years the colonelcy of the 1st Life Guards, and was made field-marshal in 1855. Lord Combermere was also G.C.B., G.C.H., knight of the Star of India, and constable of the Tower of London. "For more than 40 years," says the *Times*, "his brilliant sword was sheathed, but the nation did not prove careless of the old soldier's presence." His manly figure was one of the sights of Rotten Row, and to the last was seen and welcomed in all state pageants and court ceremonies. Viscount Combermere married, in 1801, the eldest daughter of the third duke of Newcastle; who dying in 1807, he married a second time in 1814; and a third time in 1838. He died, at Clifton, February 21, 1865. The Memoirs and Correspondence of Lord Combermere are announced as in the press (November, 1865).

COMENIUS, JOHN AMOS, a Moravia minister. He for some time officiated as pastor to a congregation at Pulne, in Moravia, but was driven thence by the invasion of the Spaniards, and settled in Poland, where he published a work, entitled "Janua Linguarum," which obtained him so great a celebrity that he was invited to England; but the breaking out of the civil war rendered his stay both brief and unprofitable, and after visiting Sweden, Prussia, and Poland, where he was engaged in explaining his proposed reform in teaching languages, he settled for the remainder of his life at Amsterdam. Among the other works of Comenius are "Orbis sensualium pictus," "Novissima Linguarum Methodus," &c. Born, 1592; died, 1671.

COMES, NATALIS, the Latinized name of NATALE CONTI, an Italian poet and miscellaneous writer, was a native of Milan, but settled early at Venice. Besides his poems he wrote a work on mythology, commentaries on the Turkish war in Malta, and a history of his own time. Born, about 1520.

COMINES, PHILIPPE DE, Lord of Argenton, a great French historian, was born in Flanders in 1447. He entered the service of Charles the Bold, duke of Burgundy, and was present at the battle of Monthéry. In 1472 he was sent by Charles to the French court, entered the service of Louis XI., and remained in it till the king's death in 1483. Litigation then arose respecting some estates given him by Louis, and he was imprisoned. On his release he was made a councillor by

Charles VIII., and followed the king's invasion of Italy. He retired to France, and died, 1511. His "Mémoires" are vivid and authentic portraits of Louis XI., and of the events and general character of the reign which he lived.

COMMANDINO, FEDERICO, mathematician, born at Ugento, made himself a great reputation by his learned and careful translations of Archimedes, Apollonius, and other mathematicians. Died, 1571.

COMMELIN, JEROME, a printer, he established himself in Geneva, and subsequently published several of the works of Latin authors, with notes. Died, 1598.

COMMELIN, ISAAC, Dutch astronomer, born at Amsterdam, in 1592, engaged in preparing a history of the city of Amsterdam, which he did not live to publish, which was published by Caspar, in 1694. The printer Isaac Commelin are, "Livres de William I. and Frederick Henry," and a collection of the Government of Holland.

COMMELIN, JOHN, Dutch astronomer, the eldest son of the preceding, born at Amsterdam, in 1629. He was first director of the fine arts in that city. Among his works are, "Iconi Mediorum Plantarum Descripti," &c. Died, 1692.

COMMELIN, CASPAR, a Dutch astronomer and botanist, was nephew of Isaac, and was born at Amsterdam, became professor of botany at the University of Utrecht, and published "Horti Medici Amstelodamensis exoticæ," as a continuation of the work of Caspar, in 1751.

COMMERSON, PHILIPPE, a French physician and botanist. In 1692 he evinced great zeal in his collection was made the friend and correspondent of Haller, and Lalande, and was instrumental with the expedition under Bougainville. He resided on the island of France, and died there in 1760. He worked on lethology, two of his works on the Martyrology of the count of those who had lost their lives in the most botanically pursuits. Born, 1700.

COMMODOUS, LUCIUS AULIUS SEVERUS, emperor, was the son of the emperor Marcus Aurelius, and was born in 161. He was most carefully accompanied his father on several expeditions. He succeeded after a short period of order, he dismissed his wisest counsellors, and himself up to the lowest and most shameless habits. The emperor was in the hands of a series of extraordinary occurrences of the most extraordinary occurrences of the emperor, who far in defiance of decency, he was the circus like a gladiator, and himself out for a god, and wor-

Charles VIII., and followed him in his invasion of Italy. He retired in 1498, and died, 1511. His "Mémoires" present a very vivid and authentic portraiture of the court of Louis XI., and of the principal events and general character of the age in which he lived.

COMMANDINO, FEDERICO, an Italian mathematician, born at Urbino, 1509. He made himself a great reputation by his learned and careful translations and editions of Archimedes, Apollonius, and other ancient mathematicians. Died, 1575.

COMMELIN, JEROME, a learned French printer. He established his press first at Geneva, and subsequently at Heidelberg; and published several of the Greek and Latin authors, with notes from his own pen. Died, 1598.

COMMELIN, ISAAC, Dutch historian, was born at Amsterdam, in 1598. He was long engaged in preparing a History of Amsterdam, which he did not live to complete, but which was published by his younger son, Caspar, in 1694. The principal works of Isaac Commelin are, "Lives of the Stadtholders William I. and Maurice;" "Life of Frederik Henry," and a collection of Acts of the Government of Holland. Died, 1670.

COMMELIN, JOHN, Dutch botanist, was eldest son of the preceding, and was born at Amsterdam, in 1629. He founded, and was first director of, the fine Botanical Garden of that city. Among his works, the most esteemed is, "Horti Medici Amstelodami rariorum Plantarum Descriptio et Icones." Died, 1692.

COMMELIN, CASPAR, Dutch physician and botanist, was nephew of the preceding, and was born at Amsterdam, in 1667. He became professor of botany there; published "Horti Medici Amstelodami Plantarum rariorum exotice," as a continuation of his uncle's work; "Flora Malabarica," &c. Died, 1751.

COMMERSON, PHILIBERT, a French physician and botanist. In the latter character he evinced great zeal and industry, and his collection was immense. He was the friend and correspondent of Linnæus, Haller, and Lalande, and was sent as naturalist with the expedition of discovery under Bougainville. He remained in the Isle of France, and died there. He wrote a work on Ichthyology, two quarto volumes; and the "Martyrology of Botany," an account of those who had lost their lives in botanical pursuits. Born, 1721; died, 1773.

COMMODUS, LUCIUS AURELIUS, Roman emperor, was the son of the wise and virtuous Marcus Aurelius, and was born A. D. 161. He was most carefully educated, and accompanied his father on several military expeditions. He succeeded him in 180, and after a short period of orderly government he dismissed his wisest counsellors, and gave himself up to the lowest society, and the most shameless habits. The administration was in the hands of a series of his favourites, and confiscations and murders were the ordinary occurrences of the day. He went so far in defiance of decency as to fight in the circus like a gladiator, and then gave himself out for a god, and would be worship-

ped as Hercules. He was at last poisoned by a concubine, whom he intended to put to death; and then strangled by an athlete, A. D. 192. The vices and misgovernment of Commodus contributed powerfully to hasten the fall of the empire.

COMNENA. [ANNA COMNENA.]
COMNENUS. [ALEXISIUS COMNENUS, ANDRONICUS I., and MANUEL.]

COMNENUS, DEMETRIUS STEPHANOPOLI CONSTANTINE, the supposed descendant of the celebrated family of the Comneni, which long sat upon the throne of the eastern empire, was born in 1749, in the island of Corsica. Having been driven from their possessions in the East by the Turks, they at length emigrated in the 17th century, and, with a colony of Greeks, settled in Corsica, where their leader inherited the title and dignity of *capitano*, until Corsica became united to France. After studying at Rome, with the intention of becoming an ecclesiastic, Demetrius entered into the service of France, and obtained a captaincy in a regiment of dragoons in 1778. At the beginning of the revolution he fought under the banners of Condé, and went into exile with other royalists; but he returned to France in 1802, and lived on a pension of 4000 francs, assigned to him by Napoleon. Louis XVIII. confirmed this stipend, and made him *maréchal de camp*, and knight of St Louis. He died in 1821.

COMPTON, HENRY, son of Spencer Compton, earl of Northampton, one of the bravest adherents of Charles I. At the restoration he obtained a cornetcy of dragoons. He soon, however, quitted the army for the church; and, after various preferments, was, in 1675, promoted to the bishopric of London. He opposed the spirit of Popery during the reign of James II., and was one of the most zealous friends of the prince of Orange. When Archbishop Sancroft refused to crown William and Mary, Compton performed that ceremony. Besides many sermons and letters, he wrote a treatise on the Communion, and translated from the Italian the Life of Donna Olympia Maidachini. Died, 1713.

COMTE, AUGUSTE, the founder of the system of philosophy called the "Positive," was born at Montpellier in 1795, and educated at Paris in the Polytechnic School, where he distinguished himself by his love of speculation, and his profound dissatisfaction with the existing philosophic schools and actual social condition of his country. On leaving college he became acquainted with the celebrated Saint-Simon, and being attracted by his personal character, and charmed by the originality of his views, he joined the band of brilliant disciples which the genius and ambition of that distinguished social reformer gathered around him. On the death of its founder in 1825, Comte deserted the Saint-Simonian school, to found one of his own, and during the next twenty years devoted himself to the elaboration of an original system of scientific thought—since known as the "Positive Philosophy." The great text-book of his system, entitled "Cours de Philosophie Positive," extending to six thick volumes, gradually appeared at intervals

between the years 1830 and 1812. During this time he led a quiet, scientific life, as professor of mathematics in the Ecole Polytechnique; and almost immediately after the conclusion of his great work published two popular treatises connected with the subject of his chair, one on Analytical Geometry, the other on Astronomy, both of which were very successful. In 1844 he issued an outline and defence of his system in a single volume, entitled "Discours sur l'Ensemble du Positivisme." Whatever may be thought of the Positive Philosophy, either as to the perfection of the parts or as to its completeness as a whole—and it is undoubtedly open to criticism in both respects—it cannot be denied that to Comte belongs the honour of being the first who grasped the true principle for the co-ordination of the sciences; that in an age of vast speculative and scientific activity he first rose from the empirical classification of facts to a genuine science of principles. Even his enemies allow that he possessed great general force of intellect, rare speculative power, and that he reaches the happiest generalizations in every branch of science he undertakes to expound. The serious defect of his system on the moral side, its omission to recognize and provide for the religious element in man, was felt at last by Comte himself. In his last years he made a desperate effort to remedy it by projecting a new worship. His "Culte Systematique de l'Humanité" is an elaborate attempt to actualize the vague idea of hero-worship. He expounded his views on this worship of man by man still further in the "Catechisme Positiviste," and the "Traité de Sociologie," and gave himself out to be chief priest of the new religion. This strange attempt, though of course a miserable failure, is significant enough as a confession of a solemn truth, denied, or at least unrecognized, by Positivism. The "Positive Philosophy" was first introduced to English students in a series of papers by Mr Lewes, which appeared in the "Leader," and have since been collected and published as a separate volume in "Bohn's Scientific Library." A condensed translation of M. Comte's great work has also been published by Miss Martineau. An important work entitled "Auguste Comte and Positivism," by John Stuart Mill, has recently appeared (1866). Died, 1857.

CONCINO CONCINI (more celebrated and better known by his title of Marshal d'Ancre) was by birth a Florentine, and accompanied Mary de Medicis, the wife of Henry IV., to France. He rapidly obtained preferment, and after the death of Henry IV. so much abused the influence he had over the queen regent, that when her son, Louis XIII., became old enough to act for himself, he consented to the assassination of the marquiss, which accordingly took place in 1617; and in the same year his wife was burned to death as a sorceress. The judges, who tried her on this absurd charge, demanded of her by what arts she had gained her ascendancy over the queen; when she made the memorable reply, "My only sorcery has been the influence of a strong mind over a weak one."

CONDAMINE, CHARLES MARIE DE LA, French mathematician, was born at Paris in

1701. He served for a short time in the army, and then entered the Academy of Sciences as assistant-chemist. After a visit to the coasts of the Mediterranean, and a stay of several months at Constantinople, he went in 1735 to Peru, where he took part with Bouguer and Godin in the measurement of an arc of the meridian. Painful jealousies and discussions arose between the leaders of this expedition, which only returned to Europe in 1743. La Condamine afterwards visited Italy and England, and was admitted to the Royal Society. He was remarkable for his gaiety, courage, and kindheartedness. His principal works are a Narrative of his Travels in South America, "La Figure de la Terre," "Histoire des Pyramides de Quito," &c. He was a member of the French Academy, and of the Academies of Science of Paris, Berlin, and St Petersburg. Died, 1774.

CONDÉ, LOUIS I. DE BOURBON, Prince of, son of Charles, duko of Vendôme, was born in 1630. He married the grand-niece of the Constable Montmorenci. He served his first campaigns in Piedmont, but first distinguished himself at the defence of Metz, besieged by Charles V. in 1652. Affronted at court, and hated by the Guises, he joined his brother, king of Navarre, at Né. . . and became a Protestant. In 1660 he was arrested and sentenced to death, but was discharged after the death of Francis I. He soon after appeared as head of the Protestants, and was defeated and captured at the battle of Dreux. He was again wronged and insulted by the refusal of the office of lieutenant-general of the kingdom, to which he was entitled. In 1667 he fought the battle of St Denis without decisive result. Two years later the Protestants were defeated, and Condé was slain at Jarnac.

CONDÉ, HENRI, Prince of, who at the request of Henry IV. became a Catholic, was born in 1588. In 1616 he was sent to the Bastille, where he remained for three years. After the death of Louis XIII. the prince was liberated, and was made minister of state to the regent. Died, 1646.

CONDÉ, LOUIS II. DE BOURBON, Prince of, called THE GREAT, was son of the preceding, and was born at Paris in 1621. He married a niece of Cardinal Richelieu, and was at first known as the Duke d'Enghien. His first great achievement was the victory over the Spanish army at Rocroi, in 1643. The capture of Thionville soon followed. The following year is marked by the battle of Freiburg, which lasted three days, and the great victory over the Imperialists at Nordlingen. After taking Dunkirk in 1646 Condé was, through envy, sent into Catalonia, where with inferior troops success forsook him. It was necessary soon to recall him to Flanders, where he won the victory of Lens over the Archduke Leopold in 1648. Having offended the first minister, Cardinal Mazarin, he was imprisoned for more than a year, and after his liberation he led the army of the Fronde, . . . at the siege of Paris, and encountered Turenne and the royalists in the Faubourg St Antoine. Soon after he entered the service of Spain, and contended with varying success against his countrymen in

Fla ders. After the B he returned to Paris, the conquest of France with Holland, in 1672, the passage of the Rhine received a wound. He was the victory over Orange (William III.) Martyr to the gout, he died in the following year to his charming, enjoying there the society of some eminent men of letters, Raeline, Holbein, and Fontainebleau in 1686. high-flown panegyrics, Bourdaloue and Bossuet of the Great Condé" by

CONDÉ, LOUIS JOSEPH, Paris in 1736, was brought the count of Charoais, master of the king's household Burgundy. He served in War, and distinguished himself of Hatzembeck, Minden, &c. He became the associate occupied himself with literary pursuits, and in the period of the revolution advocated moderate reforms. After the Bastille he emigrated, with opportunity for assisting the monarchy. Having published announcing his intention XVI., he was declared a traitor, and his estates were sequestrated. The Prince organized a body was incorporated with the army and was afterwards subdued. In 1801 the prince of Condé fled. The murder of his brother the Duke d'Enghien, by Napoleon, hurt him profoundly. At the restoration with Louis XVIII. he again at Chantilly, and died in 1818. He was author of an "Essai sur le Grand Condé."

CONDÉ, JOSE ANTONIO, a Spanish poet, was born about 1765 at the university of Alcala, and entered in the Royal Library at Madrid, where he zealously pursued the study of literature. During the French invasion he held the post of librarian at the court, and in 1813 retired to his country estate, whence he was allowed to return afterwards. He was librarian of the library of the Spanish Academy. His principal work is the "History of the Dominions of Spain," which has been translated into English. Died, 1821.

CONDOR, JOSIAH, a distinguished American writer, was born in London in 1753, the son of Mr Thomas Condor, and grandson of Dr John Condor of the Old College, Homerton, where he manifested the literary talents which distinguished him through his numerous medical contributions to the "Medical Repository" (Dr Aikin's) and other publications, attracted favourable notice, he published a small volume entitled "The Principles of the Arts and Manufactures," the joint production of himself and Condor. Having succeeded

Fla ders. After the Peace of the Pyrenees he returned to Paris, and was employed in the conquest of Franche-Comté. In the war with Holland, in 1778, in the war of the passage of the Rhine, he was wounded at received a wound. His last great exploit was the victory over William, prince of Orange (William III.), at Senef, in 1774. Martyr to the gout, he retired in the following year to his charming seat at Chantilly, enjoying there the society of some of the most eminent men of letters, among them Fontainebleau, and Mollère. He died at Fontainebleau in 1800. Funeral orations, Bourdaloue and Bossuet, were delivered by the Duke of Condé. There is a "Life of the Great Condé" by Lord Mahon.

CONDÉ, LOUIS JOSEPH, Prince of, born at Paris in 1736, was brought up by his uncle, master of the king's house, and governor of Burgundy. He served in the Seven Years' War, and distinguished himself at the battles of Hastenbeck, Minden, and Johannsberg. He became the associate of the Dauphin, occupied himself with literary and scientific pursuits, and in the perplexities which preceded the revolution advocated the necessity of moderate reforms. After the fall of the Bastille he emigrated, watching every opportunity for assisting the partisans of the monarchy. Having published a manifesto, announcing his intention of rescuing Louis XVI., he was declared a traitor, and his estates were sequestrated by the Assembly. The Prince organized a body of troops which was incorporated with the Austrian army, and was afterwards subsidized by England. In 1801 the prince of Condé settled in England. The murder of his young grandson, the Duke d'Enghien, by Napoleon, affected him profoundly. At the restoration he returned with Louis XVIII. to France, lived again at Chantilly, and died at Paris, 1818. He was author of an "Essai sur la Vie du grand Condé."

CONDÉ, JOSE ANTONIO, Spanish orientalist, was born about 1765. He studied at the university of Alcalá, and became assistant in the Royal Library at Madrid, where he zealously pursued the study of Arabic literature. During the French occupation he held the post of librarian to Joseph Buonaparte, and in 1813 retired into France, whence he was allowed to return five years afterwards. He was librarian to the Academy of History, and a member of the Spanish Academy. His principal work is the "History of the Dominion of the Arabs in Spain," which has been translated into English. Died, 1821.

CONDOR, JOSIAH, a distinguished man of letters, was born in London in 1789. He was the son of Mr Thomas Conder, bookseller, and grandson of Dr John Conder, president of the Old College, Homerton. At an early age he manifested the literary taste which distinguished him through life. His juvenile poetical contributions to the "Athenæum" (Dr Aikin's) and other publications having attracted favourable notice, he published, in 1810, a small volume entitled "The Associate Artists," the joint production of several friends. Having succeeded to his father's

business, as a bookseller and publisher, in 1814 he became proprietor of the "Eclectic Review." In 1819 he disposed of his business, and from this period till 1837, devoted himself to the management of the "Eclectic Review," besides publishing several original works, both prose and poetical, and editing the "Modern Traveller," which consisted of 25 vols., and had a large circulation. In 1832 he became the editor of the "Patriot," an office which he held for three-and-twenty years. For many years he took an active part in the public movements of the Protestant Dissenters of the metropolis, without, however, renouncing his attachment to literature. Died, 1856. Memoirs of Josiah Conder, by Eustace Conder, have since appeared.

CONDILLAC, ETIENNE BONNOT DE, French philosopher, was born at Grenoble in 1715. He was early attracted to metaphysical studies, and adopted the system of Locke, carrying however the doctrines of the Sensational School further than his master did. He was of very grave manners, and lived mostly in studious retirement. Rousseau and Diderot were among his friends. He was named tutor to the young duke of Parma, grandson of Louis XV., and was admitted to the French Academy. His principal works are, "Essai sur l'Origine des Connaissances Humaines," "Traité des Sensations," and "Cours d'Etude du Prince de Parme." Died, 1780. A French work, entitled "Condillac: ou l'Empirisme et le Rationalisme," by F. Réthoré," has been published this year (1865).

CONDORCET, MARIE JEAN ANTOINE NICOLAS CARITAT, Marquis of, a French mathematician and philosopher, was born at Ribemont, in Picardy, in 1743, and educated at the college of Navarre. When only 22 years of age he distinguished himself among mathematicians by the publication of his work "Du Calcul Intégral." Two years afterwards he published the treatise "Du Problème des Trois Corps," and in the following year his "Essai d'Analyse." In 1789 he was chosen member of the Academy, and in 1773 became its secretary, in which situation he distinguished himself by the elegance of his eulogies. In 1791 he became a member of the National Assembly and of the Jacobin Club; and he soon became as noted for his political violence as he had already been eminent for his scientific genius. When proscribed by Robespierre, he voluntarily left the house of the friend who had received him, and wandered about for some time in the country. He was at last recognized, arrested, and thrown into prison, where, on the third morning, 28th March, 1794, he was found dead in his bed, having taken poison which he carried about him. As a philosopher and social reformer Condorcet was a devoted follower of Voltaire. He expounded his own views in the brilliant "Esquisse historique de l'Esprit Humain."

CONFUCIUS, the Latin form of the name of KONG-FU-TZEE, the celebrated Chinese sage, who flourished probably about B.C. 550. He was the son of a mandarin of the state of Loo, one of the petty kingdoms into which China was then divided. He travelled for

some time through these states, promoting as far as he could the instruction of the people and the improvement of the governments. When past middle age he was appointed chief minister in Loo, but fell into disfavour and went into exile. He died in an advanced age; his fame grew, and his doctrines were recognized and handed down as the highest wisdom. They are of a purely practical character, and do not include any doctrine of religion. His descendants were ennobled, and are still found in his native district. Temples and ceremonies to his honour abound throughout the empire.

CONGLETON, HENRY BROOKE PARNELL, Lord, was the second son of Sir John Parnell, bart., chancellor of the Irish Exchequer, and was born July 3rd, 1776. His elder brother was born dumb, and a cripple, and, by a somewhat unusual stretch of authority, parliament set aside the entail upon the family estates, so that the younger son succeeded to the estates on the death of his father in 1801, and to the title on the death of his brother in 1812. He entered parliament in 1802, but ceased to be a member at the close of the same year. He was again returned in 1806, and retained his seat, in spite of all opposition, until 1832, when he voluntarily retired. From 1833 to 1837 he sat for Dundee; and in 1841 he was raised to the peerage. During his whole parliamentary career he was an extremely useful, though by no means brilliant, member. Finance in all its various branches he was very familiar with, and upon such subjects he very early became a sort of authority to both sides of the House. Died June 8, 1842, aged 65.

CONGREVE, WILLIAM, an eminent English dramatist, was born near Leeds, in 1670, and educated at Trinity College, Dublin. He entered himself as a student at the Middle Temple, but, like many more before and since, abandoned the law for literature. His first piece, written at the age of 17, was a romance, entitled "Incognita, or Love and Duty Reconciled." In 1693, being then only 21 years old, he wrote his first comedy, "The Old Bachelor." This produced him not only great reputation, but also the substantial benefit of a commissionership in the hackney-coach office, which was given to him by the earl of Halifax, who afterwards still further patronized and favoured him. He wrote also "Love for Love," "The Double Dealer," "The Mourning Bride," "The Way of the World," an opera; and some poems. Died, 1729. Witty and spirited as Congreve's plays are, they are too licentious to keep possession of the stage at the present day; and in his own time they received severe castigation from the celebrated Jeremy Collier. A portrait of Congreve, by Sir Godfrey Kneller, is in the National Portrait Gallery.

CONGREVE, Sir WILLIAM, the son of a lieutenant-general, and the inventor of the Congreve rockets, was born in 1772, and entered the military service early, in which he obtained the rank of lieutenant-colonel. He possessed much inventive talent, which he applied to the mechanic arts; and for several years the rocket which bears his name, and

which was first used in the attack of Boulogne in 1806, was considered a grand auxiliary in warlike operations, although it has now fallen into comparative disrepute. Sir William was a fellow of the Royal Society, and represented Plymouth in parliament. Died, 1828.

CONON, an Athenian general, was the son of Timotheus. Having been defeated in a naval engagement at Argosotimus by Ixander, he for a time went into exile; but being aided by Artaxerxes, king of Persia, he returned and defeated the Spartans near Cnidus. He then began to rebuild the fortifications of Athens, and restored it to liberty and security; but being sent on a political mission to Tiribazus, a Persian satrap, he was imprisoned, and it is not known what became of him.

CONRAD I., count of Franconia. In 911 he was elected king of Germany, but Arnulf, duke of Bavaria, and Henry, duke of Saxony, disputed his title, and engaged the Huns to overrun Germany. Conrad is said to have received a mortal wound in combat with those revolted chiefs. Died, 918.

CONRAD II., son of Henry, duke of Franconia, was elected king of Germany in 1024. Attempts were made to displace him, but without success, and in 1027 he was crowned emperor at Rome, in the presence of Canute, king of England, and Rudolph, king of Burgundy. As heir to Itudolph, who died in 1035, Conrad became king of Burgundy. Died, 1039.

CONRAD III., duke of Franconia, of the house of Hohenstufen, and elected emperor, 1138. His title was disputed by Henry the Proud, duke of Saxony, and the rivalry of these two princes was the germ of the factions afterwards so famous under the names of Guelphs and Ghibellines. In 1146, at the diet held at Spire, Conrad was persuaded by the eloquence of St. Bernard to undertake a crusade, on which he set out the following year. It was fruitless and disastrous, and Conrad returned with the wreck of his army in 1149. He died, in his own dominions, 1152.

CONRAD IV., duke of Sualbn, chosen king of the Romans in 1238, was son of the great Emperor Frederick II., and like him was excommunicated by the pope, Innocent IV., who set up a rival emperor in William, count of Holland. On the death of his father, in 1250, Conrad marched into Italy to recover the towns which had declared against him. He took Naples, but could not get the investiture of the kingdom of Sicily from the pope. Died suddenly in Italy, 1254.

CONRADINO, son of the last named, who left him the kingdom of Naples. Pope Urban IV. gave that kingdom to Charles of Anjou, who defeated Conradino, then only 16 years old, at the battle of Tagliacozzo, and caused him to be beheaded in 1268.

CONSALVI, ERCOLE, cardinal and chief minister of Pope Pius VII., was born at Rome, in 1757. As he had opposed the French party in Rome to the utmost of his power, he was banished when the French took possession of the city. When, however, the papal affairs were in a better condition he returned; and, as secretary of

state, he concluded the peace with Napoleon, continuing the head of the political and moral of the Roman state till the death of his friend and minister. of Consalvi was marked by improvements in the institution of torture, monopolies, asylums, and the promulgation of new codes. Died, 1824.

CONSTABLE, ARCHIBALD, a surprising bookseller that was born at Kellie. After serving his apprenticeship at Edinburgh, he corresponded with Messrs. Galignani for himself in 1793; and afterwards, general intelligence and activity gained him the name of "the Librarian of the North." He came in contact with him as a publisher's date from 1800, and finished the first number of the "Review;" and in 1805 he was in conjunction with Messrs. J. and J. Galt, in the publication of "The Lay of the Last Minstrel," that long series of original publications in poetry and prose which immortalized the name.

His tact in appreciating the value of liberalities in rewarding talent, he displayed in placing them in a manner before the public, and for the unrepaired literary projects; but in 1811 he was overwhelmed by the disasters of the war, and speculation that followed year, and the fruitfulness of industry, and exerted himself in the prevailing war of credit. The well-known "The Librarian" bears his name as his last work after its commencement with dropsy, and died in 1815.

CONSTABLE, JOHN, the most eminent landscape painter of the time, was born at East Bergholt, in 1776. Having early displayed his talents, he visited London in 1795, for ascertaining what might be his success as a painter. Encouraged by the flattering commendations of himself a landscape painter, and of "Antiquity" Smith, he returned to the mechanical profession, and in 1802 sent his first exhibition to the Royal Academy. In this period he was a regular painter, and to the year of his death he was a painter of more merit and excellence, have distinguished place among the painters not only of England, but of the world. In 1829 he was elected a member of the Royal Academy. Died, 1837. "Memoirs of Mr. Constable were published by his friend and brother artist, Mr. James Martin, and showing that he was a man of no less ability than the most eminent of his countrymen. CONSTANS I., FLAVIUS, emperor, the successor of Constantine the Great, and Western Illyricum. His reign was a constant endeavour to dis-

state, he concluded the famous concordat with Napoleon, continuing, in fact, at the head of the political and ecclesiastical affairs of the Roman state till the death of the pope, his friend and master. The administration of Consalvi was marked by many important improvements in the law, such as the abolition of torture, monopolies, and the right of asylum, and the promulgation of several new codes. Died, 1824.

CONSTABLE, ARCHIBALD, the most enterprising bookseller that Scotland has produced, was born at Kellico in Fifeshire, 1775. After serving his apprenticeship to Peter Hill of Edinburgh, the friend and correspondent of Burns, he commenced business for himself in 1795; and his obliging manners, general intelligence, and indefatigable activity gained him the esteem of all who came in contact with him. His reputation as a publisher dates from 1802, when he published the first number of the Edinburgh Review; and in 1805 he published, in conjunction with Messrs Longman and Co., "The Lay of the Last Minstrel," the first of that long series of original and romantic publications in poetry and prose which has immortalized the name of Walter Scott. His tact in appreciating literary merit, his liberality in rewarding it, and the sagacity he displayed in placing it in the most favourable manner before the public, were amply rewarded by the unparalleled success of his literary projects; but in 1826 he was overwhelmed by the disasters consequent on the preceding year, and the fruits of a life of activity, industry, and exertion were all sacrificed in the prevailing wreck of commercial credit. The well-known "Miscellany" that bears his name was his last project; soon after its commencement he was attacked with dropsy, and died in 1827.

CONSTABLE, JOHN, R.A., one of the most eminent landscape painters of our time, was born at East Bergholt, in Suffolk, 1776. Having early displayed a love of art, he visited London in 1795, for the purpose of ascertaining what might be his chance of success as a painter. Encouraged by the flattering commendations of Farrington, himself a landscape painter of some note, and of "Antiquity" Smith, he laboured hard at the mechanical part of his profession, and in 1802 sent his first picture to the exhibition of the Royal Academy. From that period he was a regular contributor to it, and to the year of his death. Few pencils, indeed, have been more prolific; and the number and excellence, have earned for him a distinguished place among the landscape painters not only of England but of the world. In 1829 he was elected an academician. Died, 1837. "Memoirs of the Life" of Mr Constable were published by his friend and brother artist, Mr Leslie, full of interest, and showing that both artists could wield the pen no less ably than the pencil.

CONSTANS I., FLAVIUS JULIUS, one of the sons of Constantine the Great, and his successor in the sovereignty of Africa, Italy, and Western Illyricum. His brother Constantine endeavoured to dispossess him of

it; but being defeated and slain in the attempt, Constantine became master of the whole empire. His conduct was, however, so offensive to the people, that the standard of revolt was hoisted, and Constantine was put to death, A.D. 330.

CONSTANT DE REBECQUE, HENJAMIN DE, a distinguished orator and author, attached to the liberal or constitutional party in France. He was born at Lausanne in 1707, and, after studying at Edinburgh and Erlangen, at the commencement of the French revolution went to reside at Paris, where he soon distinguished himself, both by his political writings and his eloquent speeches in the senate; and when, under the government of the Directory, he was elected to the office of tribune, he zealously endeavoured to maintain the equality of citizens, the freedom of the press, and the regular administration of justice. His conduct, however, rendered him obnoxious to the first consul, and he was dismissed from his office in 1802. After retiring to Germany, where in 1813 he published his celebrated brochure "De l'esprit de Conquête et de l'Usurpation," he again appeared at Paris in 1814, and publicly advocated the cause of the Bourbons; yet we soon after find him assisting in forming the constitution of the Champ de Mai, embodied in the famous "Additional Act." Though, like many others, he had sufficient cause to retire from France on the second restoration of Louis XVIII., he was allowed to return, and in 1819 was elected a member of the Chamber of Deputies, where he long remained as a distinguished leader of the opposition, particularly in all the discussions relating to the censorship of the press and the rights of the people. He wrote "De la Religion considérée dans sa Source, ses Formes et ses Développemens," "Du Polythéisme Romain," and various political brochures, was one of the editors of *La Minerve*, and a contributor to the *Biographie Universelle*. As an orator he was eloquent and profound; and as a writer lively, imaginative, and acute. Died, 1830.

CONSTANTINE, FLAVIUS VALERIUS, surnamed THE GREAT, Roman emperor, was the son of Constantius Chlorus, by Helena, and was born A. D. 272. On the death of his father, at York, in 306, Constantine, who had accompanied him to Britain, was proclaimed emperor by the troops. After defeating the Franks, he married Fausta, the daughter of Maximian, but he was soon involved in a war with his father-in-law, who assumed the title of emperor. The usurper's reign was brief; and on his being taken prisoner, Constantine caused him to be strangled. This involved him in a war with Maxentius, son of Maximian, in which the latter was defeated and drowned in the Tiber. It was during this war that the emperor, as alleged by Eusebius, saw a luminous cross in the heavens with the inscription, "In hoc signo vinces." (Under this sign thou shalt conquer.) He accordingly caused a new standard to be made, surmounted by the monogram of the name of Christ; marched to Rome in triumph; and was declared by the senate Augustus and *pontifex maximus*.

In the following year the edict to stay the persecution of the Christians was published at Nicomedia. Constantine had married his sister to Licinius; but the latter, jealous of his fame, took up arms against him, and they met in Pannonia, A. D. 314. Constantine was victorious, and a peace was granted to Licinius; but in 323 he renewed hostilities, was again defeated, and finally, contrary to the engagement of Constantine, was put to death. Thus Constantine became, in 325, sole head of the Eastern and Western empires; and his first care was the establishment of peace and order. He displayed great courage and love of justice, and professed an ardent zeal for the Christian religion. He made Byzantium the seat of empire, naming it now after himself, Constantinople. But though his actions on the whole entitled him to the surname of "The Great," many acts of cruelty, and, above all, the murder of his son Crispus, have left a stain upon his character alike as a man, a Christian, and a sovereign. Constantine died at Nicomedia, in May, 337, having been baptized only a few days before. His empire was divided between his three sons, Constantine, Constantius, and Constans.

CONSTANTINE, FLAVIUS JULIUS, a private soldier, who was raised by the army in Britain to the imperial dignity in 407, on which he crossed over to Gaul, and conquered that country and Spain. He fixed his court at Arles, where he was besieged by Constantius, the general of the emperor Honorius, to whom he surrendered on the promise that his life should be spared; but it was basely violated, and both Constantine and his son were put to death, A. D. 411.

CONSTANTINE III., emperor of the East, surnamed Pogonatus, or the Bearded, was son of Constans II., whom he succeeded in 668. His two brothers, Tiberius and Heraclius, shared the title of Augustus, but had little or no share in the government, and towards the close of his reign Constantine, under the influence of suspicion, had them mutilated and put to death. Constantinople was unsuccessfully attacked by the Mussulmans in 672 and the six following years; and it was during these wars that the famous "Greek fire" was invented. Constantine convoked and took part in the sixth general council held at Constantinople, at which the doctrine of the Monothelites was condemned. Died, 685.

CONSTANTINE V., emperor of the East, was son of Leo IV., whom he succeeded in 780. Being only 10 years old when his father died, his mother Irene was his guardian and regent of the empire. On arriving at a mature age he wished to assume the government himself; but Irene, made cruel by ambition, had him imprisoned. He escaped in 790, exiled his mother, recalled her, and finally, ruined by his licentious living, and despised by his subjects, a conspiracy was formed against him, Irene taking the lead in it, and being imprisoned, his eyes were put out by her orders. The blind prince languished some time in obscurity, and died in 797.

CONSTANTINE, surnamed **PORPHYRO-GENITUS**, emperor of the East, succeeded

Leo the Wise in 911. He was destitute of energy, and devoted himself chiefly to study. He admitted colleagues to the throne, so that at last five emperors were reigning together. Constantine left a treatise on state affairs, a geography of the empire, and the "Life of the Emperor Isaacius the Macedonian." Died, 959.

CONSTANTINE, DRACOKA or **PALANOGUS**, the last of the Greek emperors, succeeded to the throne in 1449. He was killed in bravely defending Constantinople against Mahomet II., who, in 1453, besieged the city with 300,000 men. The heroic valour displayed by Constantine in this unequal contest demands our admiration; but his valour was of no avail, the city was taken by storm, and thus ended the Greek empire.

CONSTANTINE, CHERASIMOVICH PAULOVITZ, grand-prince of Russia, second son of the emperor Paul, and brother of Alexander, was born in 1779. He attended his brother in all his campaigns, and distinguished himself greatly at the battle of Austerlitz. In 1815 he was made generalissimo or virtual governor of Poland, where he showed that he possessed only the characteristics of a half-civilized ruler, being cruel and tyrannical in his government. He formally renounced his right of succession to the empire in favour of his younger brother, the emperor Nicholas, and was present at his coronation. Constantine married in 1796 a princess of the house of Saxe-Coburg, aunt of Queen Victoria, but soon separated from her, and was afterwards divorced. Died, 1831.

CONSTANTIUS I., surnamed **CHLOEUS**, or **THE PALE**, Roman emperor, was the son of Eutropius and Claudia, niece of Claudius II. He distinguished himself as a soldier under the emperors Aurelian and Probus. In 292 he was made Cæsar and governor of the Gauls, Spain, and Britain. He reconquered Britain, long in revolt under Carausius and Allectus; won a great victory over the Alamanii in 300; became Augustus in 305; and died at York in the following year. His Helena, his first wife, Constantius was father of Constantine the Great. Constantius ruled his provinces with great justice and prudence, and won the esteem of all classes of his subjects.

CONSTANTIUS, FLAVIUS JULIUS, Roman emperor, son of Constantine the Great, was born in 317, made Cæsar in 323, and elected emperor in 337. The soldiers, to secure the throne to the three sons of Constantine, massacred the uncles and cousins of those princes, with the exception of Julian, "the Apostate," and his brother Gallus. After this the sons of Constantine divided the empire, Constantius taking the east for his share. Magnentius, governor of Rhætia, murdered Constans, who had reigned over Italy 13 years; on which Constantius marched against the murderer, whom he defeated, and his elder brother being also dead, he became sole emperor. He died on his march against Julian, who had assumed the purple in 361.

CONTE, NICOLAS JACQUES, a French painter, but more distinguished for the ingenuity of his mechanical contrivances. He

accompanied the expedition of the East, his services were of the greatest value. He invented the machines and instruments for having fallen into the hands of the enemy, he constructed corn and flour mills, manufactured swords, canons, mortars, telescopes, and, in general, every thing necessary for a military expedition. Born, 1755; died, 1829.

CONTUCCI, ANDREA, a celebrated Italian sculptor and architect. He was employed as a shepherd boy, of his skill in drawing was where he became a pupil of the famous Gaspari. About 1470 he went to Florence, and returned in ten years to Florence. He was employed by Pope Julius II. and Leo X. to execute the monuments of two churches of Santa Maria del Fiore, and the binelli chapel in San Spirit at Rome, 1529.

CONYBEARE, JOHN J., an English divine, critic, and poet. He was educated at Oxford, in 1807, he was appointed to the professorship of Anglo-Saxon, and some other professor of poetry. He was a man of admirable talents, and of admirable sermons, and of admirable lectures; and of his Hampton Lectures, and of his lectures on Saxon literature, on the Censura Literaria, and the history of the English language. He also contributed papers, on chemistry and mineralogy, to the Annals of Philosophy and to the Annals of the Geological Society.

COOK, HENRY, an Englishman, who studied in Italy under Salvator Rosa for many years after his return to England. He lived in obscurity and died in length employed by Walpole as a painter of the cartoons of Raphael. He was a man of great talents, from which time he had been comparatively prosperous. Walpole mentions several instances in which were either wholly or in part formed by him. Died, 1700.

COOK, Captain JAMES, an English navigator. He was born in York-shire, in 1728; and his father, in his early education in the navy, writing, and common sense. He commenced his naval career in 1751, then entered on board the ship of-war, and after four years service was made master of the ship. This vessel formed part of the expedition against Quebec; and he performed the difficult task of taking a party of the French, in the very face of the enemy's campment, and of making a landing at Lawrence below Quebec. He performed arduous services he was promoted to the rank of lieutenant; and he succeeded that series of voyages in the world, the details of which are the most popular and delightful in our language. Captain Cook embarked on his last voyage as commander of the ship "Rattlesnake," in August, 1780,

accompanied the expedition to Egypt, where his services were of the greatest value; for, the machines and instruments of the army having fallen into the hands of the Arabs, he contrived corn and gunpowder mills, manufactured swords, engineering instruments, telescopes, and, in short, everything necessary for a military and scientific expedition. Born, 1753; died, 1805.

CONTUCCI, ANDREA, named MANRAVINO, a celebrated Italian sculptor, was born at Moate San Savino in 1460. He was employed as a shepherd boy, but in consequence of his skill in drawing was sent to Florence, where he became a pupil of Pollajuolo, and studied in the famous gardens of St Mark. About 1490 he went to Portugal, became sculptor and architect to the king, and after ten years returned to Florence. He went to Rome about 1500, and was employed by Popes Julius II. and Leo X. His best works are the monuments of two cardinals in the church of Santa Maria del Popolo, some bas-reliefs at Loretto, and the altar in the Corbinelli chapel in San Spirito, Florence. Died at Rome, 1520.

CONYBEARE, JOHN JOSIAS, a learned English divine, critic, and antiquary; born, 1779. He was educated at Oxford University, where, in 1807, he was appointed professor of Anglo-Saxon, and some years later professor of poetry. He was author of a volume of admirable sermons, preached at the Hampton Lecture; and of various articles on Saxon literature, contributed to the *Censura Litteraria*, and the *British Bibliographer*. He also contributed some valuable papers, on chemistry and mineralogy, to the *Annals of Philosophy* and the *Transactions of the Geological Society*. Died, 1824.

COOK, HENRY, an English painter. He studied in Italy under Salvator Rosa; but for many years after his return to England he lived in obscurity and distress. He was at length employed by William III. to repair the cartoons of Raphael at Hampton Court, from which time he seems to have been comparatively prosperous, as Horace Walpole mentions several public works which were either wholly or in part performed by him. Died, 1700.

COOK, Captain JAMES, the celebrated English navigator. He was born at Marton, in Yorkshire, in 1728; and his parents being poor, his early education included only reading, writing, and common arithmetic. He commenced his naval career in the merchant service, then entered on board the *Eagle* on-of-war, and after four years' meritorious service was made master of the *Mercury*. This vessel formed part of the squadron sent against Quebec; and Cook performed the difficult task of taking soundings in the St Lawrence, in the very face of the French encampment, and of making a chart of the St Lawrence below Quebec. After various and arduous services he was at length raised to the rank of lieutenant; and then commenced that series of voyages round the world, the details of which form one of the most popular and delightful books in our language. Captain Cook embarked on his first voyage as commander of the "Endeavour," in August, 1768, reached New

Holland (Australia) in 1770, and arrived in England in June, 1771. His second voyage, in which he commanded the "Resolution," and was accompanied by the "Adventure," commenced in July, 1772. He visited New Zealand, passed Cape Horn, and returned home in July, 1774. He set out on the third voyage, commander of the "Resolution," again, and accompanied by the "Discovery," in July 1779, discovered the Sandwich Islands, explored the western coast of North America, and then made further discoveries in the Pacific. Unhappily, while touching at Owhyhee, Captain Cook, in spite of the utmost prudence and humanity, was involved in a dispute with the natives, and while endeavouring to reach his boat was savagely murdered, on St Valentine's Day, 1779. Captain Cook was fitted for the post he filled by a rare combination of intellectual and moral qualities. Naturally quick-sighted, energetic, decided, yet kindly and considerate, he could rule men well and gain their confidence and love. He was also highly accomplished in the science of navigation; and to his persevering endeavours and watchful care it was due that the health of his crews was always so remarkably good. During the interval between his second and third voyages Captain Cook was elected F.R.S. — His wife, ELIZABETH COOK, survived him 86 years; having died at her residence at Clapham, in 1835, aged 93. But she had to mourn the loss of her three sons in a few years after the unhappy fate of her husband. NATHANIEL, their second son, was lost in the *Thunderer*, which foundered at sea, in 1780; HUGH, a student at Cambridge, died in 1793; and JAMES, the eldest son, was lost, with his boat's crew, while commander of the *Spitfire* sloop-of-war, off the Isle of Wight, in 1794.

COOKE, Sir ANTHONY, an eminent English scholar. He was one of the tutors of Edward VI., who highly esteemed him. On the accession of Queen Mary he was exiled, and only returned after her death. Of his four daughters, all remarkable for their character and acquirements, one became the wife of Lord Burleigh, and another the wife of Sir Nicholas Bacon. Born, 1508; died, 1570.

COOKE, BENJAMIN, Mus. D., Cambridge, an able musician and composer; born, 1739. He became organist of Westminster Abbey, and was author of "How sleep the Brave," "Hark, the Lark," and many other beautiful and popular pieces. Died, 1793.

COOKE, GEORGE FREDERICK, an eminent English actor, was born in 1756. In early life he was apprenticed to a printer, but his attention to theatricals so completely absorbed his mind, that his master soon had his indentures cancelled. He then tried the navy with no better success, his inclination for the stage being unconquerable. After the usual probation among itinerant companies, he became a star at the larger provincial theatres, as York, Manchester, and Liverpool, and was at length engaged at Dublin for three years. Thence his fame travelled to London; and in October, 1800, he made his appearance at Covent Garden in the character of Richard III. His perform-

ance of this character gave him at once a place among the very first actors of the day, and he soon became popular in Macbeth, Iago, Sir Pertinax, Mac Sycophant, Shylock, &c. He afterwards accepted an engagement in America, where he performed with similar success, but his indulgence in riotous and debauched habits completely broke up his vigorous constitution, and he died in 1812.

COOKE, THOMAS, whose versatility of musical talent has had few equals in our time, was born at Dublin, 1781. He evinced even in his infancy a genius for music; and so assiduously did he cultivate his talents, that at the age of 18 he became leader of the band at the Theatre Royal of his native city. His first appearance as a singer was in the character of Seraskier, in the "Slew of Rielgrade;" and so well did he fill the part, that he at once took rank as a first-class vocalist. In 1813 he appeared on the boards of the English Opera House, now the Lyceum, in London, where he at once became a public favourite; and having soon afterwards joined Drury Lane, he filled to the entire satisfaction of all parties, private, dramatic, and public, the various situations of vocalist, director of the musical department, composer, and leader of the orchestra. On his retirement from the stage, he became successively connected with the Philharmonic Society, the Catch Club, and other musical associations, reaping fresh laurels every year by his glees, duets, and ballads, and gaining golden opinions by his agreeable manners, ready wit, and kindly disposition. Besides being the leader of the Philharmonic Concerts for many years, and a conductor on many occasions, he was appointed, in 1846, leader of the Concerts of Ancient Music, and was repeatedly engaged in the same capacity for the great musical festivals throughout the country. Died, 1848.

COOMBE, WILLIAM, an industrious and clever writer; author of "The Diabolical," a satire; "The Devil upon Two Sticks in England;" "Tour of Dr Syntax in search of the Picturesque;" "History of Johnny Que Genus;" "English Dance of Death," &c. Died, 1823.

COOPER, ANTHONY ASHLEY, first earl of Shaftesbury, an eminent statesman, born in 1621. He studied for a short time in Lincoln's Inn, but at the early age of 19 he was elected member of parliament for Tewkesbury. From this time his whole life was spent in business or political intrigue. At the breaking out of the civil war he at first sided with the king, but afterwards went over to the parliament, raised troops, and stormed Wareham, in Dorsetshire. After serving in the Convention, which succeeded the long parliament, and being also one of Cromwell's privy councillors, he became one of Monk's colleagues in bringing about the restoration of Charles II. For this important service he was raised to the peerage by the title of Baron Ashley, and made a lord of the treasury and chancellor of the exchequer. As a member of the notorious Cabal ministry, great odium has been thrown upon him by some writers, while others

affirm that he opposed some of its worst measures. At all events, his conduct was satisfactory to the king, who, in 1672, created him earl of Shaftesbury, and raised him to the post of lord high chancellor. This office, however, he held only a year; and on the seals being taken from him he became one of the opposition. In this capacity he was so violent, that he was at length sent to the Tower, where he remained more than a year, and only obtained his release at last by making a full submission. When he again got into power, he had the merit of bringing forward, and causing to be passed, the invaluable law called the *Habeas Corpus* act. His unremitting efforts to exclude the duke of York from the succession, roused that prince to such strenuous exertions, that in four months the ministry was turned out, and shortly afterwards the earl was sent to the Tower on a charge of high treason. On this perilous charge he was acquitted, to the great joy of the people at large; but his triumph was somewhat damped by the withering satire with which his character was depicted in Dryden's *Absalom and Achitophel*. Worned with incessant toils, much worn in health, and, probably, apprehensive of a time arriving when corruption might render his acquittal on charges, however false, by no means certain, he retired to Holland, where he died in 1683.

COOPER, ANTHONY ASHLEY, third earl of Shaftesbury, and grandson of the last named, was a very eminent English writer, born in 1671. In 1693, after the usual course of education and foreign travels, he was elected member of parliament for Poole, in Dorsetshire; and his parliamentary conduct was marked by an honourable and earnest support of every measure tending to increase the prosperity and maintain the freedom of his fellow-subjects. But his public career was stopped by the delicacy of his health; and from the year 1698 he chiefly resided abroad, devoting himself to study, and corresponding with Bayle, La Clerc, and other eminent literati. He was the author of various works, the principal of which is entitled "Characteristics of Men, Manners, Opinions, and Times;" but though lively and elegant, they are all tinged with indecorous levity. As a man, however, both in his public and private life, he was beloved and respected by all parties. Died, 1713.

COOPER, SIR ASTLEY PASTON, bart., a distinguished surgeon, was born at Brooke, in Norfolk, in 1768. He was placed with a medical gentleman at Yarmouth, in 1782, but was soon removed to London, in order to attend the hospitals, and was articled to his uncle, W. Cooper, then surgeon to Guy's Hospital. With him, however, he remained but a few months, being transferred to Mr Cline, in which situation his extraordinary aptitude for his profession quickly developed itself. In his twelfth year he visited Edinburgh, and soon after became assistant to Mr Cline in his anatomical lectures at St Thomas's Hospital. In this prominent position he outshone all who had preceded him as a popular teacher. His class of students increased from 50 to 400, which was the largest ever known in London. "He was,"

says Mr Pettigrew, "the school; the pupils followed listening with almost breathless attention to the observations he made upon the several cases he viewed. But on the days when the weather was so disagreeable, the sight was altogether different; the large theatre of the ceiling—the profusion of light upon his only—that posture so truly imposing, and the effect upon the occasion given by any of his pupils, Desault and Chopart; and took up his residence in Jeffrey Square, and after Street. His practice had increased; and, long before New Street, Spring Gardens, &c. were decidedly affluent; while the years realized from £18,000 to £20,000 annum. Sir Astley Cooper, after his death retired to the country, where he found that a life of quietude would not suit him; he returned to London, and his professional avocations, and the numerous operations, and the time he devoted to anatomical and physiological studies, found time to publish several works; but his firm rest and accurate anatomical knowledge, as an operator. The society was conferred on him by George IV., to which he was appointed surgeon. Died, aged 72.

COOPER, JAMES FENIMORE, an English-American novelist, was born at Burlington, New Jersey, in 1795, or September, 1790. His father was a large landholder in the State, residing alternately at Burlington, New Jersey, and Cooperstown, New York. He had been the residence of an English author. He received a classical education under the instruction of a private tutor at Burlington, and in 1802. A native of New York, and an unconquerable lover of his country, he was in 1805, as a midshipman, sent to sea for six years; and during this period of his life he published several works. In 1810, he was appointed to the post in the navy, and in 1812, he was at Westchester, in New York, he removed to Cooperstown, and pursued in earnest his career as a novelist. He had previously published several novels, of which the most successful were "The Two Admirals," "The Pilot," "Lionel Lincoln," "The Last of the Mohicans," &c. He was also the author of several original and powerful novels, the most successful appearance of "The Last of the Mohicans," in 1826, Mr Cooper still resided at Cooperstown, where he remained for several

says Mr Pettigrew, "the idol of the thorough school; the pupils followed him in troops, listening with almost breathless anxiety to catch the observations which fell from his lips upon the several cases presented to his view. But on the days of operation, this feeling was wound up to the highest pitch—the sight was altogether deeply interesting; the large theatre of Guy's crowded to the ceiling—the profound silence obtained upon his entry—that person so manly and truly imposing, and the awful feeling connected with the occasion, can never be forgotten by any of his pupils." In 1792 he visited Paris, and attended the lectures of Desault and Chopart; and on his return he took up his residence in the city, first in Jeffrey Square, and afterwards in Broad Street. His practice had now become immense; and, long before he removed to New Street, Spring Gardens, he was decidedly affluent: while there he for many years realized from £18,000 to £20,000 per annum. Sir Astley Cooper some years before his death retired to the country; but he found that a life of quietude and retirement would not suit his active mind, and he returned to London, once more to resume his professional avocations. Notwithstanding the immense number of his surgical operations, and the time he devoted to anatomical and physiological inquiries, he found time to publish several works of great utility; but his fame rests mainly upon his accurate anatomical knowledge, and his skill as an operator. The honour of a baronetcy was conferred on him at the coronation of George IV., to whom he had been appointed surgeon. Died Feb. 12, 1841, aged 72.

COOPER, JAMES FENIMORE, the distinguished American novelist, was born at Burlington, New Jersey, on the 15th of September, 1789. His father, Judge Cooper, was a large landholder in Otsego county, that State, residing alternately at Burlington and Cooperstown, and giving his name to the latter township, which has since been the residence of the world-renowned author. He received the rudiments of a classical education under a private instructor at Burlington, and entered Yale College in 1802. A native passion for the sea, and an unconquerable love of adventure, drew him, among other causes, to enter the navy in 1805, as a midshipman. He remained in it for six years; and the influence of this period of his life is indelibly stamped upon his works. In 1810, Cooper resigned his post in the navy, and after a short residence at Westchester, in the vicinity of New York, he removed to Cooperstown, and thence to the city of New York. He pursued in earnest his career as a writer of fiction. He had previously published his maiden novel entitled "Precaution," in 1809, which was not very successively produced. "The Spy," "The Pilot," "The Pilot," "Lionel Lincoln," and "The Last of the Mohicans," triumphantly asserting his claim to the character of an original and powerful novelist. Soon after the appearance of "The Last of the Mohicans," in 1826, Mr Cooper sailed for Europe, where he remained for several years. Dur-

ing this time he wrote several of his most successful works, including "The Bravo," "The Red Rover," and "The Prairie," and soon established a reputation which, with the robust qualities of his personal character and the dignified frankness of his manner, made him a welcome visitant in the most distinguished European circles. His most valuable productions after his return to the United States are "The Pathfinder," "The Destroyer," "The Two Admirals," and "Wing and Wing," all of which display his admirable power of invention, his bold conceptions of character, and his rare mastery of graphic and impressive portraiture. His more recent performances, in which he endeavours to use the novel as a vehicle for political declamation, are unworthy of his fame, and will only leave a blot on the memory of his genius. Died, 1861.

COOPER, SAMUEL, an eminent English painter, whose excellence in miniature painting gained him the name of the Miniature Vandyke. One of his best works is his portrait of Oliver Cromwell. Died, 1672.

COOTE, Sir EYRE, a distinguished military officer. He was born in Ireland, in 1726, and as early as the rebellion of 1746 bore arms in the king's service. His regiment being ordered to the East Indies in 1761, he greatly distinguished himself at the sieges of Maughley, Chandernagore, and Pondicherry, and at the battle of Plassey, &c. In 1760, Hyder Ally having invaded the Carnatic, Sir Eyre Coote, with a vastly inferior force, arrested his progress, and in various encounters signally defeated him. He died at Madras, in 1785.

COPERNICUS, NICHOLAS, the celebrated mathematician and founder of the modern system of astronomy. He was a native of Thorn, in Prussia, and received his education at the university of Cracow. He then travelled into Italy, for the purpose of becoming acquainted with the great astronomer Regiomontanus, and became a professor of mathematics at Rome. On his return, after several years, to his native country, his uncle, the bishop of Warmia, gave him a canonry; and being thus at ease as to fortune, he diligently laboured to improve the science of astronomy. He studied the various systems of the ancient astronomers, compared them with each other, and astonished and dissatisfied with the complexity and improbability which he found in them, applied himself to the construction of a system at once more simple and more symmetrical. The fruits of his researches appeared in his Latin treatise "On the Revolutions of the Celestial Orbs," in which he represented the sun as occupying a centre round which the earth and the other planets revolve. Aware that his theory would assail him, he says, in his prefatory address to the pope—"If there be any who, though ignorant of mathematics, shall presume to judge concerning them, and dare to condemn this treatise because they fancy it is inconsistent with some passages of Scripture, the sense of which they have miserably perverted, I regard them not, but despite their rash censure." In fact his great work re-

mailed in MS. for 13 years after he had completed it, so diffident was he as to the reception it might meet with; and it was only a few hours before his death that a printed copy was presented to him, giving him assurance that his opinions would see the light, though he would be beyond the reach of censure and persecution. Horn, 1473; died, 1543.

COPELSTON, EDWARD, bishop of Llandaff and dean of St Paul's, was born at Offwell in Devonshire, of which parish his father was at once the patron and incumbent, 1776. His early education was conducted under the paternal roof. When he was 15 years old, he was elected to a scholarship at Corpus Christi College, Oxford. In 1793 he gained the chancellor's prize for a Latin poem; and in 1795 he was elected fellow of Oriel under the most honourable circumstances, became college tutor two years later, and after filling various high offices connected with the university, he exchanged his professional career for the honours of the church, being in 1826 appointed dean of Chester, and in 1827 bishop of Llandaff and dean of St Paul's. At an early period of his life, Dr Copleston gained great distinction by his polemical pamphlets in favour of the university; and besides contributing various articles to the Quarterly Review, gave to the world numerous sermons and charges, all of them distinguished by vigour, clearness, and precision of thought. Died, 1849. *Memoirs and Remains of Bishop Copleston* have appeared since his death.

COPELEY, JOHN SINGLETON, an eminent painter, was born at Boston, in the United States, in 1738; visited Italy in 1774; and in 1775 came to England, and was chosen a member of the Royal Academy. As an artist he was self-educated, and had executed many works of merit before he left America; but his "Death of Lord Chatham," now in the National Gallery, established his fame in this country. Many other fine historical subjects were subsequently produced by him, among which were "The Siege of Gibraltar," "Death of Major Plessen," recently purchased for the National Gallery, "Charles I. in the House of Commons," &c. He died in 1815. Mr Copley was the father of Lord Lyndhurst, lord chancellor of England.

CORAM, THOMAS, philanthropist, born about 1668, a man who deserves the gratitude of his country for devoting a long life to the relief of human suffering. After great sacrifices, and persevering exertions for years, he established and obtained a charter for the Foundling Hospital, which, added to other benevolent undertakings, so impaired his fortune, that in his old age it became necessary to relieve his necessities by a public subscription. Coram was the friend of Hogarth, who painted an admirable portrait of him, now in the Foundling Hospital. Died, 1751.

CORBET, RICHARD, D.D., an English divine and poet; author of a spirited "Narrative of a Journey to France," and of various other poems, published under the title of "Poetica Stromata." He was remarkable for wit, and no less so for an eccentricity and

mirthful jocularity, which did not very well accord with the character of his profession. It did not, however, prevent him from being raised, successively, to the bishoprics of Oxford and Norwich. Horn, 1592; died, 1638.

CORDAY D'ARMAH, MARIE ANNE CHARLOTTE, a young Frenchwoman of great beauty and courage, who became the murderer of the revolutionist Marat. She was born at St Sarnurin, near Rées, in Normandy, 1768, was the grand-daughter of the poet Cornelle, and was gifted with superior understanding and a warm heart, glowing with the passion for liberty. The books she read and the conversation of the Girondists, roused in her the irresistible desire to save, if possible, her country, at whatever cost to herself. Marat appeared to her the master-spirit of the atrocities perpetrated or threatened, and she determined to rid the country of him. That she was actuated by a sense of duty, and felt that she was about to perform an act of patriotic heroism, there is not the slightest doubt; and as the circumstances attending it possess more than ordinary interest, we give the following detailed account. Charlotte Corday left her home, and on arriving at Paris (July 12, 1793), she went to Marat's house, but was not admitted. On the same evening she wrote to him as follows:—"Citizen, I have just now come from Caen. Your love for your country no doubt makes you desirous of being informed of the unhappy transactions in that part of the republic. Grant me an interview for a moment. I have important discoveries to make to you." The following day came, and with a dagger in her bosom, she proceeded to the house of Marat, who, just on the point of coming out of his bath, immediately gave orders that she should be admitted. The assemblies at Caivados were the first subjects of conversation, and Marat heard with eagerness the names of those who were present at them. "All these," he exclaimed, "shall be guillotined." At these words Charlotte plunged her dagger into his bosom, and he instantly expired, uttering the words, "To me, my friend!" Meanwhile the maid remained calm and tranquil as the priestess before the altar, in the midst of the tumult and confusion. She was afterwards conducted as a prisoner to the Abbaye. A young man, who begged to die in her place, was also condemned to death. Her first care was to implore the forgiveness of her father for disposing of her life without his knowledge. She then wrote to Barbaroux as follows: "To-morrow, at five o'clock, my trial begins, and on the same day I hope to meet with Brutus and the other patriots in clysium." She appeared before the revolutionary tribunal with a dignified air, and her replies were firm and noble. (She spoke of her deed as a duty which she owed her country. "To stop the anarchy of France," she said she did it. "I have slain one man to save a hundred thousand—a wretch to preserve the innocent. I was a republican before the revolution, and I have never failed in energy." She was condemned, and led to the scaffold;

retaining her calmness to the last, though with yells and she suffered by the guillotining of a young man from Charlotte on her was so enthusiastically, bravery, and an Apology for her deed her sake.

CORDINER, CHAS. and topographical work head in 1746. He at King's College, after admitted to the Dr Traill, bishop of was afterwards appointed Andrew's Episcopal dner was the first ordination who united Episcopal Church a the severe penal law George II., and abolition of George III. taste for drawing cultivated afterwards his leisure hours; and at Hanff, he designed windows of the manse for the Earl of Eflo. to the study of antiqu those of the north. He was introduced to on his tour through suggestion he was in Picturesque Scenery of North of Scotland, a series of letters to notice of such places as by that gentleman in The engravings which are from designs by M at Hanff, 19th Novemb

CORELLI, ARCANGE composer, was born in celebrated for his skill when he visited Germany with the greatest sovereigns and people. patronage of Cardinal especially the Twelve highly esteemed for the musical composition.

CORENZIO, HELIS. painter of Greek origin He studied at Venice, five years, and about 1565 self at Naples. He chief worked with extraordinary gained great reputation with Caracciolo and S tempted by all means to umvirate a monopoly of persecuting all danger his largest works is the Five Thousand," which than six weeks. Died a

CORIATE, or COR English traveller and considerable time he held household of Prince Hier and was so remarkable centricity, that, as Anthony he was the whetstone

retaining her calmness and presence of mind to the last, though purred by the crowd with yells and shouts of execration. She suffered by the guillotine, July 17, 1793. A young man from Mentz, Adam Lux, saw Charlotte on her way to the scaffold, and was so enthusiastically excited by her beauty, bravery, and fate, that he published an Apology for her deed, and joyfully died for her sake.

CORDINER, CHARLES, an antiquarian and topographical writer, was born at Peterhead in 1746. He completed his education at King's College, Aberdeen, and was soon after admitted to the order of priesthood by Dr Traill, bishop of Down and Connor. He was afterwards appointed to the charge of St Andrew's Episcopal Chapel, Banff. Mr Cordiner was the first of the clergy of English ordination who united with the Scottish Episcopal Church after the abrogation of the severe penal laws passed in the reign of George II., and abolished under the government of George III. He early displayed a taste for drawing and painting, which he cultivated afterwards as an amusement for his leisure hours; and, during his residence at Banff, he designed the paintings of the windows of the mausoleum of Duff House for the Earl of Fife. He was also attached to the study of antiquities, more especially those of the northern parts of Scotland. He was introduced to Mr Pennant, when on his tour through Scotland, and at his suggestion he was induced to write "The Picturesque Scenery and Antiquities of the North of Scotland," 1780, 1 vol. 4to, in a series of letters to Mr Pennant, being a notice of such places as had not been visited by that gentleman in the course of his tour. The engravings which accompany this work are from designs by Mr Cordiner. He died at Banff, 19th November, 1794, aged 48.

CORELLI, ARCANGELO, Italian musical composer, was born in 1653. He was very celebrated for his skill as a violinist, and when he visited Germany, in 1680, was received with the greatest honours, both from sovereigns and people. He had latterly the patronage of Cardinal Ottoboni. His works, especially the Twelve Concertos, are very highly esteemed for the highest qualities of musical composition. Died at Rome, 1713.

CORENZIO, HELISARIO, a celebrated painter of Greek origin, born about 1658. He studied at Venice, under Tintoretto, for five years, and about 1690 established himself at Naples. He chiefly painted in fresco, worked with extraordinary rapidity, and gained great reputation. He allied himself with Caracciolo and Spagnoletto, and attempted by all means to secure to this triumvirate a monopoly of painting; expelling or persecuting all dangerous rivals. One of his largest works is the "Feeding of the Five Thousand," which he executed in less than six weeks. Died at Naples, 1643.

CORIATE, or CORYAT, THOMAS, an English traveller and writer. For a considerable time he held a situation in the household of Prince Henry, son of James I., and was so remarkable for oddity and eccentricity, that, as Anthony Wood remarks, "he was the whetstone for all the wits of

the age." In 1608 he commenced a pedestrian tour of Europe; and having walked 800 miles with one pair of shoes, he hung them up, on his return, in the parish church of his native place, Odcombe, in Somersetshire. This eccentric traveller, who is said to have introduced into England the use of table forks, published "Cruities hastily gobbled up in Five Months' Travel in France, Savoy, Italy, Rhetia, Helvetia, Germany, and the Netherlands;" "Coriate's Crambo, or his Colewort twice Sodden," "Traveller for the English Wits," and "A Letter from the Court of the Great Mogul." He died while travelling in the East Indies, in 1617.

CORINNA, a celebrated poetess, to whom the Greeks gave the appellation of the Lyric Muse. She composed a great number of poems, of which only a few fragments have come down to us; and five times obtained the poetic wreath from her great competitor, Pindar. She flourished in the 5th century B.C., and a tomb was erected to her memory in her native city, Tanagra, in Bœotia.

CORIOLANO, BARTOLOMEO, an Italian engraver, born at Bologna, probably about 1590, is supposed to have been the son of Cristoforo Coriolano, also an engraver, who died about 1600. He engraved on wood and executed many prints after Guido, the Caracci, and other painters. The pope made him Cavallero di Loreto. His prints date from 1627 to 1647. Died, 1654.

CORIOLANUS, CAIUS MARCIUS, a celebrated legendary hero of Rome. The story respecting him is that in a war with the Volscians, the Romans besieging Corioli, the capital of the Volscians, were driven back to their lines, Marcius rallied his countrymen, pursued the enemy, and possessed himself of Corioli; for which he was rewarded with a large share of the spoil, and with the surname of Coriolanus. Subsequently, in disputes which took place between the patricians and plebeians, Coriolanus made himself so obnoxious to the latter, that he was banished. Stung by the ingratitude of his countrymen, he joined the Volscians, and, jointly with Tullius Aufidius, led a numerous army against Rome. He had encamped within five miles of the city, and its ruin seemed inevitable, when, at the urgent entreaties of his mother, Volturna, he withdrew his army. The traditions differ as to his end; according to some he was assassinated, according to others he went into exile and lived long among the Volscians.

CORNARO, LUDOVICO, a Venetian noble, whose precepts derive great force from the good result of his own practice of them. Having greatly injured his health by too free indulgence in the pleasures of the table, he had the resolution entirely to abandon that indulgence, and to restrict himself to 12 ounces of food and 14 ounces of wine in the 24 hours. Having by this regimen restored himself to health, he wrote various treatises recommendatory of the system from which he had derived so much benefit. Besides these, which are collected under the title of "Discorsi della Vita Sobria," he wrote "Trattato delle Acque." He commenced his dietary rule when he was 40,

and died, it is said, at the great age of 104, in 1566.

CORNEILLE, PIERRE, the greatest of French dramatic poets. He was born at Rouen in 1606, and for some time practised in that city as an advocate. His first dramatic piece was "Mélite," a comedy, which met with such distinguished success, that he was encouraged to devote his rare powers to the drama. The tragedies of "Medea," "The Cid," "The Horatii," and "Cinna," followed, and established for their author a pre-eminent station among French dramatists. Besides the foregoing, he wrote many other tragedies; and translated in verse Thomas à Kempis, "On the Imitation of Jesus Christ." He again turned to the drama, but his last works were unworthy of his name. Corneille was admitted to the French Academy in 1647, and was dean at the time of his death. It is melancholy to reflect that the great Corneille, who had achieved fame equally for himself and his country's literature, ended his days in poverty and distress. Died, 1684. Charlotte Corday was the granddaughter of Corneille.

CORNEILLE, THOMAS, brother of the preceding, and also a fertile dramatist, was born in 1625. Several of his tragedies were very popular; in fact, there seems to be a good deal of truth in Voltaire's assertion, that Thomas Corneille would have had a great reputation, if he had not had a great brother. Besides dramatic works, he wrote a "Dictionary of Arts and Sciences," a "Geographical and Historical Dictionary," and a translation of the Metamorphoses of Ovid. Died, 1708.

CORNELIA, an illustrious Roman lady. She was a daughter of Scipio Africanus, wife of Tiberius Sempronius Gracchus, and mother of the two famous tribunes. She was of a grave and dignified deportment, and possessed so great a control over her feelings, that when a friend condoled with her on the death of her sons, she replied, "The woman who had the Gracchi for sons cannot be considered unfortunate." Her literary talents must have been considerable, as Cicero very highly commends some of her epistles. She lived in the second century B. C., and after her death the Romans erected a statue to her memory, bearing the inscription, "To Cornelia, the mother of the Gracchi."

CORNELIUS, LUCAS, a Dutch painter, who came to England, and was appointed portrait-painter to Henry VIII. Died, 1552.

CORNWALL, RICHARD. Earl of [RICHARD].

CORNWALLIS, CHARLES, Marquis of, son of the first Earl Cornwallis, was born in 1739, and entered the army as soon as he had completed his education at Cambridge. In the American war he acted a conspicuous part, and greatly distinguished himself at the battle of the Brandywine, and at the siege of Charlestown. After gaining the important battles of Camden and Guilford, he determined to invade Virginia; but his plans failing, owing, as he affirmed, to the inefficient conduct of Sir Henry Clinton, upon whom he had relied for support, he and his army were made pri-

soners at York-town. In 1786 he was made governor-general and commander-in-chief in India. The government of Bengal found it necessary to uphold the rajah of Travancore against the sultan of the Mysore, and the first campaign being unsuccessful, in 1791 he invaded the Mysore, besieged Seringapatam, and compelled Tipoo Sahib to submit on humiliating terms. Having performed this important service, Lord Cornwallis returned to England, was raised to the rank of marquis, and made master-general of the Ordnance. In 1798 he was sent to Ireland as lord-lieutenant; and in the trying and terrible scenes of the rebellion so conducted himself as to gain the good opinion of the public, while vigorously upholding and vindicating the laws. In 1801 his lord-lieutenancy expired, and he was sent on a mission to France, where, in 1802, he signed the peace of Amiens. In 1804, he was a second time appointed governor-general of India; but his arduous services had now completely worn out his frame, and he died, soon after his arrival in India, at Ghazepore, in the province of Benares, in 1805.

CORB, ERIN, an eminent Belgian engraver, was born at Brussels in 1803. He was the son of an Irishman who took part in the rebellion of 1798, and was ex-patriated. He attained a very high reputation, and became a member of the Royal Academy of Belgium and director of the School of Engraving of the Royal Academy of Fine Arts of Antwerp. His last work was an engraving on copper-plate of the "Descent from the Cross," by Rubens, on which he spent ten years of labour. Among his other principal works are the "Saviour," after Leonard da Vinci; "Christ on the Cross," after Vandek; the "Queen of Heaven," after Scheffer, &c. Died at Paris, 1862.

CORREGGIO, ANTONIO ALLEGRI DA, an Italian painter of transcendent ability, was born about 1494, at Correggio, in the duchy of Modena. He is the founder of the Lombard School, and unrivalled by all competitors for the grace and loveliness of his figures, and the exquisite harmony of his colouring. An absurd story, since disproved, was long current illustrative of his poverty, and the ill usage he met with from the ecclesiastics of Parma, for the cathedral of which city he painted in fresco the "Assumption of the Virgin." For the church of San Giovanni in the same city he painted the "Ascension." Correggio painted many oil pictures, among which are the "Notte," the "Magdalen Reading," "St George," and "St Sebastian," in the Dresden Gallery, and the "Ecce Homo," "Mercury instructing Cupid," and several others in the National Gallery. Died, 1534.

CORT, CORNELIUS, a Dutch engraver, born at Hoorn in 1536. He went to Venice, and lived with Titian for a time, engraving some of his works. He afterwards settled at Rome, and practised and taught there. His prints are numerous, and are after the works of Raphael, Michael Angelo, Correggio, Titian, and other eminent masters. Cort was the first to engrave Raphael's "Transfiguration." His works were much studied

by Agostino Caracci to have been his pupil.

CORTESE, JACOPO CORTEZ, or **CORTES**, conqueror of Mexico. Medelin, in Estremadura, the law, quitted his profession. In 1511 he sailed to Cuba; and the colony determined upon the command of the expedition with 700 men in 1519, at Tabasco he captured, in order that he might have no other resource than himself. Having conquered the Aztecs, he reduced them to become vassals towards Mexico, where he received; but having seen the riches of Mexico, he had the title of marquis; but he was found that the court of Spain, jealous of his power, neglected him. Died, 1551.

CORTONA, PIETRO DI BERRETTINI, an Italian native of Cortona, in early age was placed under Baccio Ciampi at Rome, and the new works of many of the churches operated by him; and at Florence the Pitti palace for the grand II. In addition to painting, he was almost an architect. Died, 1669.

CORVISART, JEAN, a French physician. He was intended for the law, but in the direction for medical studies he changed his profession, and became chief physician to Napoleon, a baron, and an officer of the Legion of Honour. Nor was his great services by the Bourbons, the king member of the Royal Academy, being conferred on him as a reward to his death, which happened in 1804. He was the author of some books, and translated others.

COSIMO, PIERO DE, Italian born at Florence in 1460. He was the son of Cosimo Rosselli and the del Sarto. He had very early indulged them both in literature. Died, 1521.

COSIN, JOHN, a learned and able prelate, was born at Cambridge and educated at Cambridge, and made dean of Peterborough. He was deprived of his

by Agostino Caracci, who is sometimes said to have been his pupil. Died at Rome, 1578.

CORTESE, JACOPO. [BORGOGNONE.]

CORTEZ, or CORTES, FERNANDO, the conqueror of Mexico, was born, in 1485, at Medellin, in Estremadura, and, after studying the law, quitted it for the military profession. In 1511 he went with Velasquez to Cuba; and the conquest of Mexico being determined upon, Cortez obtained the command of the expedition. In 1518 he set sail with 700 men in 10 vessels; and on landing at Tabasco he caused his vessels to be burned, in order that his soldiers might have no other resource than their own valour. Having conquered the Tlascalans, and induced them to become his allies, he marched towards Mexico, where he was amicably received; but having seized upon their monarch, Montezuma, and treated the people with the utmost insolence, the Mexicans first murmured, and then resisted. Cortez besieged the city of Mexico; and in the desperate struggle which ensued, it is said that upwards of 100,000 of the faithful and unfortunate Mexicans were killed or perished by famine. Having reduced the devoted city, Cortez completely overran the Mexican territories; in doing which he committed atrocities which would be incredible if not related on irrefragable testimonies. In reward for the addition he had made to the wealth of Spain, he had a grant of land and the title of marquis; but on returning he found that the court of Madrid were become jealous of his power, and treated him with neglect. Died, 1564.

CORTONA, PIETRO DA, properly **PIETRO BERRETTINI,** an Italian painter. He was a native of Cortona, in Tuscany, and at an early age was placed under the tuition of Baccio Ciampi at Rome. The Barberini palace, the new works at the Vatican, and many of the churches of Rome, were decorated by him; and at Florence he adorned the Pitti palace for the Grand-duke Ferdinand II. In addition to being an eminent painter, he was almost equally eminent as an architect. Died, 1669.

CORVISART, JEAN NICOLAS, an eminent French physician, was born in 1755. He was intended for the law, but his predilection for medical science induced his friends to change his destination. He was chief physician to Napoleon, who made him a baron, and an officer of the Legion of Honour. Nor was his great merit overlooked by the Bourbons, the place of honorary member of the Royal Academy of Medicine being conferred on him a short time previous to his death, which happened in 1821. He was the author of some valuable medical books, and translated others.

COSIMO, PIETRO DE, Italian painter, was born at Florence in 1460. He was a pupil of Cosimo Rosselli and the master of Andrea del Sarto. He had very eccentric tastes, and indulged them both in life and in art. Died, 1521.

COSIN, JOHN, a learned, pious, and charitable prelate, was born at Norwich, in 1594, and educated at Cambridge. In 1640 he was made dean of Peterborough; but the Puritans deprived him of his preferments, and

even went the length of impeaching him on a charge of being inclined to Popery. On this he retired to France, where he remained until the restoration of Charles II., who raised him to the see of Durham. Among his writings are "A History of Transubstantiation," and "A Scholastical History of the Canon of the Holy Scriptures." Died, 1672.

COSMAS, surnamed **INDICOPLEUSTES,** a celebrated merchant of Alexandria, living in the 6th century; who, after making a voyage to India, and writing several books on cosmography, quitted commerce and became a monk.

COSMO I., grand-duke of Tuscany, born in 1519, was the son of Giovanni de Medici; and on the assassination of Alessandro, chief of the house of Medici, was elected head of the republic of Florence, though strenuously opposed by a party who favoured the Florentine exiles. Cosmo made himself absolute master of Florence, liberty was wholly lost, and terror was inspired by a system of espionage, by torture, and even by secret assassination. While he kept his subjects in subjection, he made the state free from foreign interference, and enlarged it by fresh acquisitions, till Tuscany was for the first time united under one ruler. Several attempts were made to shake the power of Cosmo, but he succeeded in defeating them; and it was probably in order to secure himself able and zealous defenders in case of open revolt, that he instituted the military order of the Knights of St Stephen. He restored the university of Pisa, and held out the most liberal encouragement to men of scientific and literary eminence to settle there as professors. He also founded the Academy of Florence, established its gallery of paintings, and performed many other wise and honourable actions; thus procuring himself a celebrity and influence which probably he would in vain have sought by the more dazzling achievements of the warrior. After a prosperous reign of 34 years, he died in 1574.

COSTA, HIPPOLYTO JOSE, FURTADO DE MENDOCA, DA, a Portuguese gentleman of scientific and literary attainments, who, being charged with freemasonry, was thrown into the prison of the Inquisition at Lisbon. Here he was repeatedly examined, and his answers not being satisfactory to his persecutors, he was remanded to his dungeon, with little prospect that his sufferings would terminate otherwise than in death. By one of those fortunate accidents which sometimes make "truth stranger than fiction," his cell was left open, and he was enabled to possess himself of a bunch of keys which opened every lock that was between him and liberty. Having taken these keys, and a book which lay beside them, he made his escape; and after lying hidden several weeks in the immediate neighbourhood of his late dungeon, he found means to embark for England. The book which he brought from his prison contained, *inter alia*, notes of his examinations before the inquisitors; and soon after his arrival he published a narrative of the persecutions he had undergone, the account of his ex-

aminations being taken from the official document of which he had thus oddly become possessed. His talents, and the interest excited by his adventures, obtained him considerable notice, and he became foreign secretary to the duke of Sussex, and chargé d'affaires in this country for the Brazilian government. Died, 1824.

COSTANZA, ANGELO DI, a Neapolitan poet and historian of noble birth; author of "Istoria del Regno di Napoli," containing the history of Naples from 1250 to 1489. The preparation of this work occupied him 40 years. Died, 1581.

COSTER, or KOSTER, LAURENCE JANSEN, a native of Haerlem, in Holland, to whom his countrymen ascribed the invention of the art of printing, in the year 1430. His claim rests on the unsupported testimony of Hadrian Junius, and is now generally considered groundless. The fame of Gutenberg, therefore, who, according to Junius, had derived the knowledge of printing from Coster, remains undiminished, as the inventor of the art. Born, 1370; died, 1439.

COSWAY, RICHARD, an eminent English artist. He painted miniatures admirably, and was almost equally great as an oil painter. He was much admired and employed as an artist, and highly esteemed as a man. He was one of the oldest members of the Royal Academy, and died at the age of 80, in 1821. His wife, Maria, was a good painter and musical performer; and her parties were attended by the prince of Wales and all the leaders of London society.

COTES, FRANCIS, an English artist of great eminence as a portrait painter, as well as in crayons. He was one of the first members of the Royal Academy. Died, 1770.

COTES, ROGER, mathematician, was born in Leicestershire in 1682. He studied at Cambridge, became fellow of Trinity College, and in 1708 Plumian professor of astronomy. His early death disappointed the high hopes which his great acquirements had excited, and the only written fruits of his studies are the papers collected in the volume entitled "Harmonia Mensurarum." These, however, exercised great influence on the progress of mathematical science. Died, 1718.

COTMAN, JOHN SELL, architectural engraver, was a native of Norwich, and was born about 1780. His most admired work is the "Architectural Antiquities of Normandy," in 2 vols. folio, published in 1820. He had previously published similar works in illustration of the Architectural Antiquities of Yorkshire and Norfolk, and a volume on the Sepulchral Brasses of the latter county. He spent the latter part of his life in London, and died in 1843.

COTTA, J. G., Baron, an eminent German bookseller, and the proprietor of the Allgemeine Zeitung, a political daily paper, as well as of several others devoted to literature and the arts, was born at Stuttgart, in 1764; for many years carried on an extensive and flourishing concern; became vice-president of the second chamber of the States of Wurtemberg in 1824, and died in 1832. Cotta was the personal friend of the most distinguished German authors of his

day; Goethe, Schiller, Jean Paul, Wilhelm and Alexander von Humboldt, &c.

COTTIN, SOPHIE, an accomplished French novelist; authoress of "Mathilde," "Claire d'Albe," the well-known "Ellaabeth, ou les Exilés de Sibirie," &c. Born, 1773; died, 1807.

COTTLE, JOSEPH, publisher and miscellaneous writer, was born in 1770, carried on business at Bristol, where he became the friend of Coleridge, Wordsworth, and Southey, and published the first poems of Coleridge in 1796. He was author of several poetical and other works, now forgotten, and of "Recollections of Coleridge." Died, 1853.—His brother, **AMOS COTTLE**, who was also a poet, and published a translation of the Edda, died in 1800. They were both laughed at by Byron in his "English Bards and Scotch Reviewers."

COTTON, CHARLES, an English poet of the 17th century; author of "Scarronides, or Virgil Travestied;" a supplement to his friend Isaac Walton's "Compiete Angler;" and a volume of original poems, &c. He also translated Corneille's tragedy of the Horatii and Montaigne's Essays. Born, 1630; died, 1687.

COTTON, NATHANIEL, an English physician and poet; author of "Visions in Verse for the Instruction of Younger Minds." He for some years kept a lunatic asylum at St Alban's, and the poet Cowper was for a time one of its inmates. Born, 1707; died, 1788.

COTTON, Sir ROBERT BRUCE, baronet, a distinguished antiquary, founder of the Cottonian Library, was born at Denton, in Huntingdonshire, in 1670. After graduating B. A. at Cambridge, he settled at London, employed himself in forming a collection of ancient charters, and obtained so high a reputation for antiquarian learning that he was frequently consulted on difficult questions of state. He was a friend of Camden, and gave him some aid in the preparation of his great work. He was knighted, and afterwards created a baronet, by James I. He suffered on several occasions from unjust imputations, and at length, in 1629, on a false charge of having written or circulated a pamphlet hostile to popular liberties, his library was taken from him. The loss occasioned an illness, which terminated in his death, in 1631. His valuable library was kept together in the possession of his family, was afterwards bought for the crown, and was transferred to the British Museum at the time of its foundation.

COUDRETTE, CHRISTOPHE, a French priest, and a very able opponent of the Jesuits; author of "A General History of the Jesuits," "Memoirs relative to the Formulary," &c. His bold and liberal tone of thought caused him to be twice imprisoned; at Vincennes, in 1735, and at Paris, in the Bastille, in 1738. Died, 1774.

COULOMB, CHARLES AUGUSTIN DE, a French natural philosopher and officer of engineers, to whose scientific labours many discoveries in electricity and magnetism are owing. He was born at Angoulême in 1736, and died in 1806.

COURAYER, PIERRE FRANÇOIS LE, a

Norman ecclesiastic. Although of the C zealously and ably ations of the Church work was formally of French cardinal Courayer consequ land. Here he was university of Oxfo of L.L.D. upon him translations of Fra Council of Trent, at the Reformation.

COURTNEY, WILL Canterbury, born 1311 son of Hugh Courtney and Margaret, grandd In 1376, then being bish tinguished himself by to the king's demand f Bishop Courtney who sp ear before the conv in February, 1377; w took place between the reformer and the bi

Norman ecclesiastic, was born in 1681. Although of the Catholic Church, he wrote zealously and ably in defence of the ordinations of the Church of England, which work was formally censured by an assembly of French cardinals and archbishops; and Courayer consequently left France for England. Here he was well received, and the University of Oxford conferred the degree of L.L.D. upon him. Courayer made French translations of Fra Paolo's History of the Council of Trent, and of Sleidan's History of the Reformation. Died, 1776.

COURIER, PAUL LOUIS, a witty and able French writer, was born in 1774. He served for some time as an officer in the army; but his republican principles prevented his advancement under Buonaparte; and, after the battle of Wagram, he threw up his commission, and resided for some time in Italy. On his return to France his name became notorious as the author of several admirable political pamphlets, but his career was cut short by assassination, in 1825.

COURT DE GEBELIN, ANTOINE, a learned Frenchman, born at Nismes in 1725. His father was minister of the reformed church at Lausanne, and he himself held a similar post for a short time. He afterwards settled at Paris, and there published the work entitled "Le Monde Primitif analysé et comparé avec le Monde Moderne." It is in 9 vols. quarto, and its vast plan embraces dissertations on mythology, grammar, origin of language, history profane and sacred, &c. The author was appointed censor royal, and twice received the prize of 1200 livres annually given by the French Academy. Died, 1784.

COURTENAY, PETER OF, third of the Latin emperors of the East, was cousin to Philip Augustus, king of France; married, in 1184, Agnes, heiress of the countess of Nevers and Auxerre, and, after her death, in 1192, the princess Yoland, sister of the emperor Baldwin and Henry. On the death of the latter emperor, in 1216, and the refusal of the crown by Andrew, king of Hungary, who had married a daughter of Yoland, Peter of Courtenay was elected by the barons to succeed. He set out at the head of a small army; with some difficulty got himself crowned by Pope Honorius III., outside the walls of Rome; embarked on Venetian vessels, unsuccessfully besieged Durazzo, and on his difficult land journey thence towards Constantinople, was treacherously delayed and made prisoner by Theodore, one of the Comneni, and after two years' confinement, was put to death. Yoland, who with her children had reached Constantinople, carried on the government till her death, in 1219.

COURTNEY, WILLIAM, archbishop of Canterbury, born 1311. He was the fourth son of Hugh Courtney, earl of Devonshire, and Margaret, granddaughter of Edward I. In 1376, then being bishop of London, he distinguished himself by a violent opposition to the king's demand for a subsidy. It was Bishop Courtney who cited Wycliffe to appear before the convocation at St Paul's, in February, 1377; when a war of words took place between the noble supporters of the reformer and the bishop, and the meet-

ing became a tumult and did nothing. In 1381 he became archbishop of Canterbury and lord high chancellor, in which office he showed a rancorous spirit of persecution against the Wickliffites. His character was resolute and arrogant; and though he professed a desire to support the king and the people against the encroachments of the pope, his actions invariably showed that he was in, hoart a domineering prelate, thoroughly devoted to Rome, and caring little for the dignity of the crown, or the weal of the people. Died, 1396.

COURTOIS, JACQUES [BORGOGNONE]
COURTOIS, GUILLAUME, brother of Jacques Courtois, and also an eminent painter. He excelled in historical pieces, and assisted his brother in some of his works. Died, 1679.

COUSIN, JEAN, generally regarded as the earliest French historical painter, was born in Champagne, 1530. He chiefly painted on glass, but his "Last Judgment," painted on canvas for the convent of the Minims at Vincennes, is esteemed an excellent work. He was also an excellent sculptor, and author of "Livre de Perspective," and some other treatises connected with the art. Died, 1590.

COUSTOU, NICOLAS, French sculptor, born at Lyons, in 1658. He studied at Paris under Antoine Coysevox, his uncle; won the grand prize, and went to Rome, where he chiefly studied the works of Michael Angelo and Algardi. On his return he was received at the Academy, and was charged with many important works at Paris and Lyons. Among the principal are, "Le Vœu de Louis XIII.," in the cathedral of Notre-Dame; the group of "The Seine and the Marne;" and a group of "Tritons," at Versailles. Died, 1733.

COUSTOU, GUILLAUME, French sculptor, younger brother of the preceding, was born in 1678. He also studied under Coysevox, went to Rome, and was admitted to the Academy on his return. He assisted Nicolas in some of his works; executed various decorative works for the gardens of Versailles and Marly; a bronze figure of the Rhone; the statues for the pediment of the Chateau d'Eau, &c.; and was made director of the Academy. Died, 1746.

COUTHON, GEORGE, a French advocate and president of the court of justice at Clermont. Becoming a member of the Legislative Assembly and of the National Convention, he voted for the trial and death of Louis XVI.; and after hesitating awhile as to the party with which he should act, gave in his adhesion to that of Robespierre. When troops were sent against Lyons, he was commissioner from the Convention, and gave with his own hand the signal for the destruction of the noble buildings of that devoted city. Sharing the power and participating in the atrocities of Robespierre, he was also involved in his ruin. Guillotined, 1794.

COUTO, DIEGO DE, a Portuguese historian, born about 1542. He spent much time in the Indies, and became historiographer of India to Philip II. and Philip III. He was author of a continuation of Barros' "Asia Portuguesa." Died at Goa, 1616.

COUTTS, THOMAS, a London banker, eminent for his wealth and connections. Ho

came from Scotland at an early age; and from being a junior partner in a mercantile house in the city, rose to be one of the most considerable bankers in England. He was twice married; first to Susan Starkie, by whom he had three daughters; Susan, married, in 1796, to the earl of Guildford; Frances, married, in 1800, to the marquis of Bute; and Sophia, married, in 1793, to Sir Francis Burdett. In 1815 his first wife died; and, three months afterwards, he married Harriet Melion, an actress of some celebrity, to whom he bequeathed the whole of his immense property, consisting of £600,000 in personalty, besides real estates in lands and houses, to a great amount. He died in 1821, aged 86; and his widow in due time bestowed her hand and fortune on the youthful duke of St Alban's.

COVENTRY, JOHN, a skillful, self-taught, English mechanician. He invented an hygrometer, which met with the approbation of the Royal Society, and was presented to the king. Subsequently he employed himself in drawing micrometers on ivory and glass; and to such a perfection did he bring them, that his squares were only the millionth part of an inch superficial. He also made two chamber organs, telescopes of extraordinary power, and balances for the assaying of gold, of such nicety that they would weigh to the thousandth part of a grain. Died, 1812.

COVENTRY, THOMAS, lord keeper of the great seal in the reign of Charles I., was the son of Thomas Coventry, a justice of the court of Common Pleas. He was born in 1578; educated at Balliol College, Oxford; studied the law in the Inner Temple; and having successively become solicitor-general, attorney-general, and lord keeper, in 1628 he was raised to the peerage; and, according to the character given of him by Clarendon, he was well worthy of his great and uninterrupted success. Died at London, 1640.

COVENTRY, WILLIAM, son of the above. He was knighted in 1666, and made a commissioner of the treasury in 1667; but having offended the duke of Buckingham, he was forbidden to appear at court. On this he retired to his seat in Oxfordshire, and passed the remainder of his life in privacy. He was author of several works of a political character, but not now worth enumerating. Died, 1689.

COVERDALE, MILES, bishop of Exeter, reformer and translator of the Bible, was born in Yorkshire in 1497. He studied at Cambridge, entered the Augustinian order, and was ordained priest in 1514. He afterwards zealously embraced the reformed faith, associated with other eminent men for conference on the Scriptures, aided Tyndale in his translation of the Bible, and by permission of Henry VIII., published his own translation in 1535. It was the first printed English Bible. Three years later, while assisting at Paris in the publication of another edition, he was cited before the Inquisition and the copies printed were condemned to be burnt. He returned to England, was made almoner to Queen Catherine Parr, and, in 1551, bishop of Exeter. He was deprived and imprisoned by Queen Mary, went abroad,

and after many wanderings, reached Geneva, still devoting himself to his chosen task, and contributing his aid to the "Geneva Bible." He returned after Mary's death, and held for a short time a rectory in London. Died there, 1568. The publication of his Bible was commemorated in England in October, 1835, its third centenary.

COWARD, WILLIAM, an English physician, and author of "Thoughts on the Human Soul; demonstrating the Notion of the Human Soul united to the Human Body to be an Invention of the Heathens, and not consonant to the Principles of Philosophy or Reason." This work excited considerable indignation among the more zealous divines, who procured an order to have it burned by the common hangman. He died about the year 1722.

COWELL, JOHN, an English lawyer and antiquary; author of "The Interpreter," a law dictionary, which was burned by the common hangman on account of some unconstitutional doctrines on the king's prerogative, and "The Institutes of the Laws of England." Died, 1811.

COWLEY, ABRAHAM, an eminent English poet, born in London, 1618. Educated as a king's scholar at Westminster, he very early evinced a taste and aptitude for poetry; and, while only in his 15th year, published a volume entitled "Poetical Blossoms," which procured him considerable reputation. In 1636 he was elected a scholar of Trinity College, Cambridge; where he produced a pastoral comedy, entitled "Love's Riddle," and "Naufragium Jociulare," a Latin comedy, which was performed by the members of his college. He resided at the university until 1643, when he was ejected by the Puritan visitors, and became an active partisan of the royal cause. He was much esteemed by Lord Falkland, and accompanied the king in several journeys. When the queen left the country he accompanied her Majesty, and remained abroad for some years; during which time he was a chief agent in managing the correspondence between the king and queen. In 1656 he returned to England, and soon after published a volume containing most of the poems printed in the final collection of his works. Being suspected by the party in power, he was thrown into prison, but released on the bail of Dr Scarborough. He again went abroad, and was again employed in aiding the royal cause. On the restoration taking place he was for some time neglected; but at length, by the interest of the duke of Buckingham, he obtained the lease of a farm at Chertsey, which produced him about £300 a year. Died, 1667.

COWLEY, HANNAH, an accomplished English dramatic writer; authoress of "The Runaway," "The Belle's Stratagem," "More Ways than One," &c., besides some poems and farces. The sprightliness of dialogue, and the variety of characters and incidents, which this lady introduced in her dramatic works, evince much versatility of genius. Garrick, it is said, could hardly be persuaded that her first piece was the production of a mere boarding-school girl. Died, 1809.

COWLEY, HENRY, distinguished diplomatist, the first earl of the marquis of Wellington, was born in 1750, and was made Foreign Office; he was created Earl of Malmaison in 1797, and accompanied the king to India, in 1804. In 1807 he was secretary of the Treasury, and in 1811 he was secretary of the Treasury. He was a great figure in the embassy at Madrid, and amid difficulties of thirteen years, to his credit, and the well-known fact that he remained till 1823 he went as ambassador to the United States, and displayed there, on his service, he was raised to the title of Baron Canning, and the title of Viscount of the West Indies. He was appointed a peer in 1811. This office he held till 1812. Robert Peel's minister before this event, he made his retirement not survive it above 1847.

COWPER, WILLIAM, English lawyer, who, after various gradations of the peerage in the reign of the title of Viscount of the West Indies, lord high chancellor in 1710, but accepted in 1717 he was created a peer, and in 1718 wholly retired from public life. In latter years of his life he exerted himself in favour of the poor, and particularly in throwing out, by which he has been subject to 1723.

COWPER, WILLIAM, English poet, was born in Hertfordshire, in 1731, and was a clergyman of good standing in the early age removed from that of Westminster. He had a timid temper and sensitive boys rendered complete torture to him from the tone of his quitting school, he was sent to the Middle Temple. He was with whom he spent several years, and then entered the Middle Temple. He has been by nature a path of life; for though his family had procured him an honourable place of clerk to the Lords, his nervousness was such, that he was unable to perform his duty. He now fell into a

COWLEY, HENRY WELLESLEY, Lord, a distinguished diplomatist, the youngest son of the first earl of Morington, and brother of the marquis of Wellesley and the duke of Wellington, was born 1773. His public début was made as a précis writer in the Foreign Office; he then joined the embassy of Lord Malmesbury to Lille, where he became initiated in diplomatic affairs, and in 1797 he accompanied his brother Lord Wellesley to India, in the capacity of private secretary. Here he was employed in various offices of great delicacy and responsibility; but Europe had more attractions for him than the East, and he returned to England in 1804. In 1807 he was returned to parliament for Eye, and became one of the secretaries of the Treasury; but he did not make any great figure in parliament, and in 1809 he exchanged his parliamentary duties for the embassy at Madrid; a mission which, amid difficulties of all kinds, he fulfilled for thirteen years, to his own increasing reputation, and the welfare of his country. In 1823 he went as ambassador to Vienna; here he remained till 1831; and for the ability he displayed there, coupled with his length of service, he was raised to the peerage with the title of Baron Cowley—the original patronymic of the Wellesley family. In 1841 he was appointed ambassador to the Tulleries. This office he held till the fall of Sir Robert Peel's ministry in 1846; but, long before this event, his declining health had made his retirement advisable, and he did not survive it above a twelvemonth. Died, 1847.

COWPER, WILLIAM, Earl, an eminent English lawyer, who, after passing through various gradations of office, was raised to the peerage in the reign of Queen Anne, by the title of Viscount Fordwick, and made lord high chancellor. This office he resigned in 1710, but accepted it again in 1714. In 1717 he was created Earl Cowper, and in 1718 wholly retired from office. During the latter years of his public life, he very ably exerted himself in favour of religious liberty; and particularly in causing a bill to be thrown out, by which Unitarians would have been subject to severe penalties. Died, 1723.

COWPER, WILLIAM, the distinguished English poet, was born at Berkhamstead, Hertfordshire, in 1731. He was the son of a clergyman of good family, and was at an early age removed from a country school to that of Westminster. Being naturally of a timid temper and sensitive frame, the rough usage he met with from stronger and less sensitive boys rendered school a place of complete torture to him, as may be seen from the tone of his "Tirocinium." On quitting school, he was articled to an attorney, with whom he remained for three years, and then entered himself of the Middle Temple. He seems, however, to have been by nature unfit for the rough paths of life; for though the interest of his family had procured him the valuable and honourable place of clerk to the House of Lords, his nervousness and *mauvaise humeur* were such, that he was obliged to resign it. He now fell into so terrible a state of

nervous debility, that he was for some time placed in the lunatic asylum of Dr Cotton. The skill and humanity of that gentleman restored him, and he retired to Huntingdon. Here he became acquainted with the family of the Unwins; and after Mr Unwin's death he removed, with Mrs Unwin, to Olney, Bucks, where he contracted a close friendship with the curate of Olney, John Newton, and subsequently with Lady Austen. His natural melancholy coloured his religious views and feelings, and he fell often into the most painful despondency. While this was the case, the influence of Lady Austen, more than that of his other friends, tended to rouse and cheer him. But although his mind was so frequently bent down by despondency, he was a very voluminous writer. In addition to translating Homer, which he did with more accuracy than Pope, if with less polish, he wrote "The Task,"—the best of all his poems,—"Tirocinium," and a host of smaller poems; translated some of Madame Guyon's spiritual songs; and his correspondences, which exhibits him as one of the most elegant of English letter-writers, was extremely voluminous. Towards the close of his life his gloom deepened into absolute despair, from which he never wholly emerged, and he died, at East Dereham, in Norfolk, 25 April, 1800. His beloved friend, Mary Unwin, had died in December, 1796. Among the numerous editions of Cowper's works we may mention two,—the one by Dr Southey, the other by the Rev. T. Grimshawe, both published in 1836. Portraits of Cowper were painted by Abbott, Romney, and Lawrence.

COX, RICHARD, bishop of Ely, was born at Whaddon, Bucks, in 1500. While at New College, he embraced the opinions of the Reformers, and was consequently thrown into gaol, but obtained his release through the influence of Crammer. He was then made master of Eton School, and subsequently became tutor to Edward VI., in whose reign he was made a privy councillor, almoner to the king, dean of Westminster, and chancellor of Oxford. During the reign of Mary he resided abroad; but returned to England on the accession of Elizabeth, and was made bishop of Ely. He contributed the Gospels, the Acts, and the Epistle to the Romans to the "Bishops' Bible," besides writing various controversial tracts. Died, 1581.

COXCIE, MICHAEL, a celebrated Flemish painter, born at Meehin in 1497. He was a pupil of Bernard van Orley, and had with him the direction of the manufacture of the tapestries of the Sistine Chapel after the cartoons of Raphael. He studied the works of Raphael, and returned to Flanders, where he acquired both fame and fortune. He executed for Phillip II. of Spain an admirable copy of the grand altarpiece by the Van Eycks at Ghent, which occupied him two years. His pictures are now rare. A set of illustrations to the story of Cupid and Psyche have been attributed to this master, but on unsatisfactory evidence. Died at Antwerp, 1592.

COXE, WILLIAM, historian and traveller, was born in 1747. After receiving an uni-

versity education, he successively accompanied several young noblemen to the Continent in the capacity of tutor; and on his return obtained various preferments in the church till he became a canon residentiary of Salisbury and archdeacon of Wilts. He was the author of "Travels in Switzerland;" "Travels in Poland, Russia, Sweden, and Denmark;" a "History of the House of Austria," his best work, painstaking, and not very lively reading, but well supported by references to his authorities; "Historical Memoirs of the Kings of Spain;" "Memoirs of Sir Robert Walpole;" and other works equally interesting, and valuable for their research and adherence to truth. Died, 1828.

COYPEL, the name of several eminent French painters. NOEL COYPEL was born in 1628, and died in 1707. He adorned the old Louvre and the Tuilleries, painted some fine pictures for the council-hall of Versailles, and executed several scriptural pieces of great merit. His son, ANTOINE, born at Paris, 1661, was the most distinguished of his family as painter and engraver. He studied under his father and at Rome, and became director of the Academy at Paris, and first painter to the king. He painted in the Palais Royal a series of 15 scenes from the mannerism of the French school. Died, 1721. NOEL NICHOLAS, usually called *Coytel the uncle*, despised the false glitter of this school, and aimed only at truth and nature. He died in 1735. CHARLES ANTOINE, the son of Antoine, was a decided copyist of his father's manner, and accommodated himself to the prevailing taste of the times for gaudy colouring. Born, 1694; died, 1752.

COYSEVOX, ANTOINE, a celebrated French sculptor, was born at Lyons, in 1640, and died at Paris, in 1720. Among his best works are the monument of Cardinal Mazarin; an equestrian statue of Louis XIV.; the monument of Colbert; Fame and Mercury on winged horses, &c. Coysevox was received at the Academy in 1690, and became professor and chancellor. On account of the beauty and animation of his portrait busts, he was called the *Vandyke of sculpture*.

CRABBE, GEORGE, an English poet, was born at Aldborough in Suffolk in 1754. He was brought up to the medical profession, but from his strong propensity to verse-making he abandoned it, and in 1780 began to try his fortune as *littérateur* in London. He obtained the friendship and assistance of Burke, published one of his poems, and soon after entered the church. He was for several years chaplain to the duke of Rutland, had the curacy of Strathern and other livings, and in 1813, that of Trowbridge, where he spent the rest of his life. His principal poems are "The Library," "The Village," "The Parish Register," "The Borough," and "Tales of the Hall;" all characterized by homely truthfulness, simplicity, and pathos. His poems are like Dutch paintings in their minute and accurate delineation of persons and scenes of the homeliest, and even of a repulsive, sort. And, like Dutch paintings, they are likely to keep their power to

charm. Died, 1832. An elegant edition of his works, with a Life and Notes, by his son, was published in 1834.

CRAIG, JOHN, a Scotch mathematician of the 17th century; famous for a work entitled "Theologice Christianae Principia Mathematica." The object of this curious tract is to apply mathematical calculation to the credibility of the gospel history; upon which principle he maintains that the Christian religion must end, according to the doctrine of chances, in the year 3150, when our Saviour will make his second appearance!

CRAIG, SIR THOMAS, an eminent Scotch lawyer; author of a treatise on feudal law, which has often been reprinted. Died, 1608.

CRAKANTHORPE, RICHARD, a learned English divine, and the author of some able works in support of Protestantism. Died, 1624.

CRAMER, FRANCIS, an eminent musician, was born at Mannheim, 1773. Under the direction of his father, formerly leader of the opera band in London, he prosecuted the study of music, for which he had shown an early predilection. In 1799 he succeeded his father as leader of the Ancient Concerts; for many years he was alternate leader of the Philharmonic Concerts with Loder, T. Cooke, Welchels, &c.; and for upwards of 40 years held the chief place at the great provincial festivals. Died, 1848.

CRAMER, GABRIEL, an eminent geometrician; editor of the works of Wolf and the Bernoullis, and author of several mathematical and algebraic works. Born, 1704; died, 1752.

CRAMER, JOHN ANTHONY, D.D., dean of Carlisle, a well-known writer on subjects of classical antiquity, was born in Switzerland, 1793. He received his education in England, and in 1811 was admitted a student of Christchurch, Oxford; where he greatly distinguished himself, and gradually rose through all the university honours, till, in 1831, he was appointed principal of New Hall Inn. During this period he was actively engaged in literary pursuits; and his descriptions of Ancient Italy, Asia Minor, and Ancient Greece are enduring monuments of his accuracy and research. In 1842 he succeeded Dr Arnold as regius professor of modern history; and in 1844 he was nominated to the deanery of Carlisle. Died, 1848.

CRANACH, LUCAS. [KRANACH.]
CRANMER, THOMAS, archbishop of Canterbury, memorable for the part he took in the Reformation, was born at Aslacton, Nottinghamshire, in 1489, and educated at Jesus College, Cambridge. The opinion which he gave on the question of Henry VIIIth's divorce from his first wife, Catharine of Arragon, recommended him to that monarch, who employed him to vindicate the measure, and sent him, in 1530, with other envoys, to maintain his view before the pope. He took with him the opinions which had been obtained from the foreign universities in favour of the same view. His mission was fruitless. On his way home Cranmer visited Germany, and at Nürnberg married a niece of Oslander. After his return he was raised by papal bull to the arch-

bishopric of Canterburie, zealously promoted reformation. Through his exertions was translated and greatly aided in such institutions. A few ment he pronounced stable, the sentence and confirmed the Arne Boleyn. In 1537 was destined to lose life, Cranmer meanly sentence of divorce.

CRANZ, or KRANZ, J preacher, born 1723, a years as a missionary which country he wrote also "A History of the 1777.

CRASHAW, RICHARD don, and educated at C a friend of the poet Co embraced the Roman C appointed to a canonry poems have considerabl supposed to have furnish turned to good account b Pope. Died, 1650.

bishopric of Canterbury, in which office he zealously promoted the cause of the Reformation. Through his means the Bible was translated and read in churches; and he greatly aided in suppressing the monastic institutions. A few weeks after his appointment he pronounced, in a court held at Dunstable, the sentence of divorce of Catharine, and confirmed the king's marriage with Anne Boleyn. In 1536, when Anne Boleyn was destined to lose her reputation and her life, Cranmer meekly stooped to promote the sentence of divorce. This and other compliances with the monarch's will insured him the gratitude of Henry, who upheld him in all his contests with Bishop Gardiner and others who accused him of heresy and faction. By Henry's will he was appointed one of the council of regency to Edward VI.; and as the young king was brought up chiefly under the archbishop's care, it enabled him to further the objects of the Reformation in a regular and consistent manner, by framing the liturgy, the homilies, articles of religion, &c. When Edward was prevailed on to alter the succession in favour of Lady Jane Grey, the archbishop opposed it for a considerable time, but at length consented. On the accession of Mary he was tried on charges of blasphemy, perjury, incontinence, and heresy, and sentenced to be deprived of office. Tempted, however, by the promise of pardon, he signed a recantation of his principles. This was the great object of his enemies. But when Cranmer, who had been sent to Oxford, was brought into St Mary's church to read his recantation in public, he besought the forgiveness of God for his apostasy, and exhorted the people against the errors of the church of Rome, declaring that nothing could afford him consolation but the prospect of extenuating his guilt by encountering the fiery torments which awaited him. This greatly enraged his adversaries, who, after vilifying him as a hypocrite and heretic, dragged him to the stake opposite Balliol College, which he approached with a cheerful countenance, and met his death with the utmost fortitude, exclaiming, as he held out his right hand for the flames to consume it, "This unworthy hand! this unworthy hand!" Whatever may be said with regard to his submission to the will of a despotic sovereign, or his occasional unsteadiness of principles, it is certain that no man contributed so much as Cranmer to the establishment and independence of the English church. Died, March 21, 1556.

CRANZ, or KRANZ, DAVID, a Moravian preacher, born 1723, and resided several years as a missionary in Greenland; of which country he wrote a valuable history; also "A History of the Moravians." Died, 1777.

CRASHAW, RICHARD, poet, born in London, and educated at Cambridge. He was a friend of the poet Cowley; and having embraced the Roman Catholic faith, was appointed to a canonry at Loretto. His poems have considerable merit, and are supposed to have furnished hints afterwards turned to good account both by Milton and Pope. Died, 1630.

CRASSUS, MARCUS LICINIUS, the celebrated Roman consul and triumvir, enormously rich and passionately fond of money, took part with Sulla in the civil war. As prætor, in B. C. 71, he was sent against the insurgent gladiators under Spartacus, and totally defeated them near Rhegium. The next year he was consul with Pompey, and made an extraordinary display of his wealth and hospitality. Pompey and Crassus were, however, personal enemies, and it needed the powerful influence of Cæsar to effect a formal reconciliation between them, which took place in B. C. 60, the first triumvirate being then formed. Consul again five years later, Crassus had Syria for his province, and made war on the Parthians. He was defeated by them with immense slaughter, and was put to death, B. C. 53. It is said that Orodes, king of Parthia, had melted gold poured into the dead mouth, with the taunt "Have your fill now of what you loved best."

CRATINUS, an Athenian poet, to whom the invention of satirical comedy is attributed. His powers of sarcasm are said to have been unrivalled. He was a very intemperate man, and an exception to the rule that intemperance leads to an early grave, having attained the age of 97. Died, B. C. 422.

CRAYER, CASPAR DE, Dutch painter, was born at Antwerp about 1582. He was a pupil of Raphael Coxle, and soon obtained a great reputation. He painted a large number of altar-pieces for Ghent, Brussels, and other cities of the Netherlands, and received high encomiums from Rubens. He lived simply and temperately, preserved his health and faculty to a great age, and painted the "Martyrdom of St Blaise," when 86 years old. Died at Ghent, 1669.

CREBILLON, PROSPER JOLYOT DE, French dramatic poet, was born at Dijon, in 1674. He was intended for the legal profession, but devoted himself to the tragic muse, and produced "Idomeneus," which met with success. This was followed by "Atreus," "Electra," and "Khadamistus," which were still more successful. He then led a secluded life for many years, but again resumed his dramatic labours, and produced the tragedies of "Catinne" and "The Triumvirate." Died, 1762.

CREBILLON, CLAUDE PROSPER JOLYOT DE, son of the preceding, was born at Paris, in 1707. He was for a time in high repute for his wit and gaiety, which made him a pleasant companion, and for his clever but licentious novels, which are best forgotten. Died, 1777.

CREDI, LORENZO DI, Italian painter, was born at Florence about 1453. He learnt the art of the goldsmith and then studied painting under Verrocchio, and had Leonardo da Vinci for his fellow-pupil and friend. His works resemble in style those of Leonardo. Holy Families, Madonnas, and similar sacred subjects chiefly engaged his pencil. He was living in 1536.

CREECH, THOMAS, an English poet, was born at Blandford, Dorsetshire, in 1659; and after receiving the rudiments of a classical education at Sherborne free-school, finished

his studies at Wadham College, Oxford. He translated into English *versus Lucretius*, *Horace*, *Theocritus*, &c. Died by his own hand, 1700.

CRELLIUS, JOHANN, a German Unitarian divine, was born in 1590, and was one of the ablest advocates of that sect, which he defended against Grotius. Died, 1633.

CILEMONESE, IL. CALETTI, GIUSEPPE.

CRESCENTIUS, patrician of Rome, who in the year 987 placed himself at the head of the citizens and attempted to shake off the yoke of the emperor and establish a republic. He expelled the pope John XVI. and assumed the government of Rome. Anticipating the intervention of Otho III., he renounced the pope the same year. He renewed his attempt in 997, expelling Pope Gregory V., and setting up a rival, John XVII., who was soon after arrested, imprisoned, and disgracefully treated. Crescentius was besieged in the castle of St Angelo by the emperor, induced to capitulate by a promise of safety, and then hung and beheaded. It is said that his widow, Stophania, avenged this treachery by first accepting Otho as her lover and then administering poison to him.

CRESCENZI, PIETRO, the restorer of the scientific study of agriculture in Europe, was born at Bologna in 1230. He spent a long life in acquiring and disseminating agricultural knowledge; and his "*Opus Ruralium Commodorum*" is a masterly production, founded on simple principles, and free from many errors that continued to prevail even for centuries after. The earliest printed edition is of 1471. The work was at once translated into Italian, and in 1486 into French. It has been often republished.

CRESCIMBENI, GIOVANNI MARIA, Italian poet and miscellaneous writer, was born in 1663. He was educated by the Jesuits, and settled at Rome, where he took part in founding the Arendian Academy, of which he held the office of Custos for nearly 40 years. He was patronized by Pope Clement XI. and Benedict XIII. His "*Rime*" appeared in 1695. His other works are "*Istoria della volgar Poesia*," "*Io Vite degli Arcadi illustri*," &c. Died, 1728.

CRESPI, GIUSEPPE MARIA (LO SPAGNUOLO), Italian painter, was born at Bologna in 1665. He was a pupil of Canuti and Carlo Cignani, and afterwards studied and copied the works of Correggio, the Caracci, and other masters. He painted rapidly, with much caprice and carelessness. Among his works are the "*Seven Sacraments*," an "*Ecce Homo*," a "*Supper*," &c. Crespi was also an engraver. Died, 1747.

CRESWELL, Sir CRESWELL, first judge of the Divorce Court, was born in 1794. After studying at the Charter-house and at Cambridge, he was called to the bar in 1819. He entered parliament as member for Liverpool in 1837. Five years later he was appointed a justice of the Common Pleas, and filled that office sixteen years, distinguishing himself by his acuteness, and the ease with which he unravelled difficult and complicated cases. On the establishment of the Divorce Court in 1858, he was named first

judge. The practice was new, the cases very numerous, and the labour immense; but Sir Creswell achieved a great success. He adjudicated upon more than a thousand cases, and only in one instance was any decision of his reversed. In private as in public life he was very highly esteemed. Died suddenly in July, 1863.

CREWE, NATHANIEL, bishop of Durham. He arrived at his episcopal dignity partly through the influence of James II., then duke of York, and partly through his consenting to be guilty of simony, paying a large sum to one of the king's mistresses. During the reign of James this prelate aided and counselled him in all his most obnoxious measures, and was among the earliest of those who abandoned him, and voted that the throne was abdicated. But his base and time-serving conduct would not have prevented him from losing his bishopric, on the accession of King William and Queen Mary, but that he was spared from degradation at the intercession of Tillotson. Died, 1721.

CRICHTON, JAMES, named **THE ADMIRABLE**, was born in Scotland in 1560. His father was a lord of session, and through his mother he was of royal descent. He was educated at the university of St Andrews, and graduated M.A. in 1575. He was one of the young men selected to be fellow-students of the young King James VI. under the direction of George Buchanan. He then went to France, where he continued his studies, and also, as he held fast to the Romish church, took part in the war carried on by Henry III. against the Huguenots. The beauty of his person, the strength and agility he displayed, joined to his multifarious accomplishments and surprising capacity of eloquent talk, made him the admiration of all. About 1680 he went to Italy, visiting probably Genoa and Rome, and then Venice, where he was warmly received by the great printer Aldus. He was introduced to the Doge and Senate, created astonishment at Venice and Padua, by his brilliant off-hand discourses on philosophy, theology, and other high themes, and his challenge to disputation in any of several languages, and on either side of any controversy. He next went to Mantua, and was appointed tutor to the son of the duke. He was attacked in the streets one night by a party of men armed and masked; overcame them by superior skill, and recognized his pupil, to whom he at once presented his sword. The young prince immediately ran him through with it, 3rd July, 1682. He has left no literary remains of importance.

CRILLON, LOUIS DE BALBE DE BERTON DE, a distinguished French general, was born in Provence in 1541. He distinguished himself during five reigns, Henry II., Francis II., Charles IX., Henry III., and Henry IV., and received from Henry IV. the title of "*le brave des braves*." In 1557 he became aide-de-camp to the duke of Guise, and distinguished himself greatly at the siege of Calais, where he was the first to mount the breach, as he was at many subsequent sieges. He was wounded at the battles of St Denis and Jarnac, at the siege

of Poitiers, at Moncon d'Angely. Throughout faithful to the monarch, privy to the massacre of Henry III. He took a prominent part in the siege of Rochelle in 1573, and of Anjou to Poland, and thence to the throne. He distinguished himself in the war of the League, and under Mepnon in Flanders, and under Henry III. He was taken by Guise he firmly refused by such an act of intrepidity in the battle of Ivry and the battle of Marston. He followed Henry IV. to the Low Countries, and was wounded in Savoy; and his estates. The assassin of master threw him from which he died in 1615.

CRIILLON-MAHON, DES HALDES DE QUIER, general, was born in the Italian campaign in 1744. He was taken prisoner, and a tenor. He was at the battles of Rocourt and Lutzelburg, soon after the service of Spain. In 1794 he received the title of Count of Madrid, 1796.

CRITIAS, one of the philosophers of the Athenians. He was a public political conductor, and was held in high esteem by him by no means a creditor. He is said to have self even among the Thracians. When Thrasylus took arms Critias was slain in a Piræus, in the year 404 B.C.

CRÆSUS, the fifth king of Lydia. He succeeded his father in the year 557 B.C., and was the richest monarch that ever lived. His common story respecting the most part merely fabulous. Vain of his wealth, he consulted the philosopher Solon what good fortune: "I pronounce that you will be fortunate until his death," was his answer. Subsequently the wealthy monarch was made prisoner of Persia. When bound about to be burnt to death, he begged Solon, and the name. Cyrus demanded the name of Cræsus, and Cyrus gave it; and Cyrus his life, but also took his wealth and protection. At the recommendation of Cræsus to the king of Persia, who treated him with respect, and ordered him to be put to death at the time and place of his own choosing, nothing is known.

CROFT, WILLIAM, Musgrave, English musician and composer, was born at Warwickshire, and was the organist of the Chapel Royal. He was the following year organist of the Abbey. His best anthems and funeral services, were public

of Poitiers, at Monecontour, and at St Jean d'Angely. Throughout the civil war he was faithful to the monarchy; but was not made privy to the massacre of St Bartholomew. He took a prominent part at the siege of Rochelle in 1573, and accompanied the duke of Anjou to Poind, on his election to the throne. He distinguished himself in the war of the League, and in 1586 commanded under Epemon in Provence. When solicited by Henry III. to assassinate the duke of Guise he firmly refused to stain his name by such an act of infamy. He was at the battle of Ivry and the siege of Paris; followed Henry IV. to Rouen; in 1600 commanded in Savoy; and soon after retired to his estates. The assassination of his beloved master threw him into a melancholy, from which he did not recover. Died, 1615.

GRILLON-MAHON, LOUIS DE BERTON DES BALLES DE QUIERS, Duke de, French general, was born in 1718. He served in the Italian campaign of 1733, in the German campaign of 1742, in which he was taken prisoner, and at the battle of Fontenoy. He was at the taking of Namur, at the battles of Rocoux, Raabach, and Lutzelburg, soon after which he entered the service of Spain. In 1782 he took Minorca, and received the title of duke of Mahon. Died at Madrid, 1796.

CRITIAS, one of the Thirty Tyrants of Athens. He was a pupil of Socrates, but his political conduct was such as to render him by no means a credit to his great master. He is said to have distinguished himself even among the Thirty for cruelty and avarice. When Thrasybulus and his patriotic friends took arms against the Thirty, Critias was slain in an attack made on the Piræus, in the year 404 B. C.

CRÆSUS, the fifth and last king of Lydia. He succeeded his father Alyattes in the year 557 B. C., and was so successful in all his enterprises, that he soon became one of the richest monarchs of that time. The common story respecting him, which is for the most part merely legendary, is as follows. Vain of his wealth, he asked the philosopher Solon what he thought of his good fortune: "I pronounce no man fortunate until his death," was the sage's reply. Subsequently the wealthy and powerful monarch was made prisoner by Cyrus, king of Persia. When bound to the stake and about to be burnt to death, he recalled the words of Solon, and three repeated his name. Cyrus demanded an explanation. Cræsus gave it; and Cyrus not only spared his life, but also took him into his favour and protection. At the death of Cyrus he recommended Cræsus to the favour of Cambyses, who treated him with great cruelty, and ordered him to be put to death; but of the time and place of the death of Cræsus nothing is known.

CROFT, WILLIAM, Mus. D., an excellent English musician and composer. He was a native of Warwickshire, and was made organist of the Chapel Royal in 1707, and in the following year organist of Westminster Abbey. His best anthems, and a sublime burial service, were published in 1724 in two

folio volumes, under the title of "Musica Sacra." Born, 1677; died, 1727. He was buried in Westminster Abbey.

CROKER, JOHN WILSON, the Right Hon., who earned great distinction in the fields of literature and party politics, was born in Galway in 1780. He was educated at Trinity College, Dublin, called to the bar in 1807, and sat in the House of Commons from 1808 to 1832, having during that period represented in succession Downpatrick, Athlone, Yarmouth, Bodmin, and the University of Dublin, and gained the reputation of being one of the most eloquent and accomplished debaters in the House. During all this period he held the office of secretary to the Admiralty. But it was more as a political writer than a debater that Mr Croker owed his wide-spread fame. He was one of the founders of, and most frequent contributors to, the Quarterly Review; and the powers of sarcasm which he wielded at a time when party feeling ran high, coupled with the high position which he held among the chiefs of the Tory party, procured for his writings a degree of interest out of all proportion to their intrinsic merits. It would far exceed our limits to mention the various papers and pamphlets that emanated from his fertile brain. The works which are most likely to perpetuate his name are his editions of "Boswell's Life of Johnson," and Lord Hervey's "Memoirs of the Reign of George II., and his "Stories from the History of England," which Sir Walter Scott took as his model for his "Tales of a Grandfather." At the time of his death he was engaged in preparing an edition of the works of Alexander Pope. Mr Croker's long and faithful services to his party were rewarded by his being made a privy-counsellor in 1828, and by a pension of £1500 a year, and apartments in Kensington Palace. Died, 1857.

CROKER, THOMAS CROFTON, F.S.A., a distinguished writer and antiquary, was born at Cork, in 1798. When fifteen years of age, he was apprenticed to a mercantile firm; and during his leisure hours he devoted himself to making sketches in pen and ink, in which he afterwards excelled, and in cultivating that taste for antiquities which never left him while he lived. In 1819, through the influence of his namesake, Mr Wilson Croker, the secretary of the Admiralty, he obtained a clerkship in that department; and soon rose to the most confidential employments in the office to which he was attached. But his official duties in no way damped his literary aspirations. Shortly after settling in London he contributed several papers to the "Talisman" on the local antiquities of Ireland. In 1824 he published his "Researches in the South of Ireland," with magnificent illustrations. This was followed next year by "The Fairy Legends and Traditions of the South of Ireland," a work which has frequently been reprinted and translated, and which, among other marks of favour, brought him the personal acquaintance of Sir W. Scott, who was delighted with its style and spirit. Besides contributing largely to the "Annals," once so fashionable, in 1827 he became the editor of the "Christmas Box," which, however, only

lived two years; and in 1829 he published the "Legends of the Lakes," with illustrations by Maclise, which afterwards appeared under the title of a "Guide to the Lakes." It would occupy more space than we can spare to enumerate the various other works, and papers in journals, literary and antiquarian, which Mr Croker contributed. The reader who is interested in the matter may refer to the "Gentleman's Magazine" for October 1854. Suffice it here to say that they were very voluminous; and that, as a collector of antiquarian and literary curiosities, particularly with reference to Ireland, his reputation is not likely soon to be surpassed. Died, 1854.

CROLY, GEORGE, L.L.D., was born in Dublin, August, 1780, and was educated at Trinity College. He was ordained to an Irish curacy, but, not obtaining any higher preferment, he turned his mind wholly to literature, and contributed very largely to the periodical press, especially "Blackwood's Magazine," and the "Literary Gazette," the "Standard," and the "Universal Review." He was presented, in 1835, to the rectory of St Stephen's, Walbrook, where he discharged the duties of his office with zeal, and attained high reputation as a preacher, while with unabated diligence he continued his literary labours. Among his many works may be mentioned "The Three Cycles of Revelation," "Life of George IV.," "Life of Burke," essays on "The Character of William Pitt and Napoleon I.," the "Angel of the World," and other poems. "Salathiel," "Tales of St Bernard," &c. He died, November 24, 1860, aged 80. "Recollections of Dr Croly," by Richard Herring, have since appeared.

CROMWELL, THOMAS, Earl of Essex, chief minister to Henry VIII., was born near London, about 1490. He was the son of a blacksmith, had but a middling education, and got a clerkship in an English factory at Antwerp, whence he was sent to Italy. He appears to have served in the wars there for a time, and on his return to England entered the service of Cardinal Wolsey, won his esteem, and was faithful to him in his disgrace. He then entered the king's service, and obtained, with his favour, many of the highest offices of state. He was privy-councillor, principal secretary of state, and, about 1536, vicar-general, and viceroy, in all matters of religion. Cromwell was the friend of Cranmer, and contributed by various measures to the establishment of the reformed doctrines and worship. In 1539 he was created earl of Essex, but he soon lost the favour of the king, and then all was lost. For his elevation, honour, and administration had made him a host of enemies. In 1540 he was imprisoned, attainted on charges of treason, heresy, and extortion, was not allowed to make any defence, and was executed on Tower Hill, July 28, 1540. He did not fall like a brave man, but made the most abject entreaties to the king for his mercy. His character and measures are painted in most unlike colours by writers of different parties.

CROMWELL, OLIVER, Lord Protector of the Commonwealth of England, and one of the

most extraordinary characters in history, was the grandson of Sir Henry Cromwell, and the son of Robert Cromwell, a man of good property, and a brewer at Huntingdon, where Oliver was born, April 25, 1599. Having been educated at the free-school of that city, and at Sidney Sussex College, Cambridge, he became a law student at Lincoln's Inn. Here, however, he did not remain long; as in his 21st year he married Elizabeth, the daughter of Sir James Bouchier, and settled at Huntingdon. In his youth he is said, by royalist writers, to have indulged in profligate habits, which he soon however laid aside; and that his character and manner of life was such as to obtain the esteem and confidence of his neighbours, is evident from the fact that he was elected member of parliament for Huntingdon in 1628. His first appearance in parliament was in February, 1629. In 1640 he represented Cambridge. In his parliamentary career he was remarkable rather for his business-like habits and energy of character, than for elegance of language or gracefulness of delivery. His appearance and dress, too, were plain and unprepossessing. He notwithstanding acquired considerable influence even in parliament; and in 1642, when it was resolved to levy forces to oppose the king, Cromwell received a commission from the earl of Essex, and raised a troop of horse at Cambridge, of which he, of course, had the command. He soon distinguished himself by his courage and military skill, especially at the battle of Marston Moor, in 1644; he was excepted from the self-denying ordinance, and soon after won the decisive victory of Naseby. In 1648 he defeated the Scots at Preston, and soon after invaded Scotland and took Berwick. He was a member of the High Court of Justice for the trial of Charles I., and signed the warrant for his execution. In August, 1649, he was named lord-lieutenant and commander-in-chief in Ireland, stormed Drogheda, and put to death the whole garrison; and soon after Wexford. Other great towns submitted without resistance, and Ireland was subdued. In consequence of the expected return of Prince Charles to Scotland, Cromwell was recalled, leaving Ireton as deputy. He was appointed lord-general, and set out for Scotland. On the 3rd September, 1650, the great battle of Dunbar was fought, and the Scots were totally defeated. Edinburgh surrendered, and Perth was taken some months later. Charles having marched into England, Cromwell followed him, and on the 3rd September, 1651, won the decisive battle of Worcester. Cromwell took up his residence at Hampton Court in the following month. In 1653, while the Dutch war was going on, he dissolved the Long Parliament, formed a council of state, and had a new parliament called, which soon resigned its power to Cromwell, and by the "Instrument of Government" he was created "Lord Protector." He showed himself equal to the hard task he had undertaken, by sharp decisive means keeping down plotting royalists, jealous presbyterians, and intractable levelers; and by a magnanimous foreign policy making England greater and more

honoured than ever. protection of the Yelly persecuted by had a large sum He did not succeed, and had to rule most last care, anxiety, and wore him out; he became pious; was over the death of his favourite Lady Claypole; fell six month after her, Sep- versary of his two vic- Worcester. He was h of Henry VII. at W body was torn from its restoration, exposed at of Bradshaw and Ireton and the remains buried Cromwell had appoint Richard, to succeed his government were not t virtuous and incompetent, compelled by the officer- lliament, he abdicated, ended his days in tranqu hunt, in Hertfordshire, ther Henry, whose upris as viceroy of Ireland, h friends, also retired to p in 1674. The most imp to the history of this gre the "Letters and Speec well," by Thomas Caryl has brought about a revol way of thinking about it ed in 1845, and has pass editions. Other vniuible Lives of Oliver and Rich the Life of Oliver, by Jo are portraits of Cromwell Cooper, and Bernard Le the British Museum, and private collections; Coo session of the duke of Leno's in the collection of land. The National Por sesses a terra-cotta bust, by Pierce.

CROMWELL, OLIVER, Henry, second son of t was for several years a so and held the appointment Thomas's Hospital. He chiefly on account of his tion, entitled "Memoirs Cromwell, and his sons R illustrated by Original L Family Papers." He succed estate of Theobalds, which through the children of R above named, and died at Herts, in 1821, aged 79.

CROTCH, WILLIAM, m and writer on music, was very early age, and he professor of music at Oxfo compositions, both vocal are numerous, and he wa ments of musical Compositio Bass," and "Specimens o Ages." He became head of demy of Music, and died at

honoured than ever. He interfered for the protection of the Vaudois Protestants, cruelly persecuted by the duke of Savoy, and had a large sum raised for their relief. He did not succeed with his parliaments, and had to rule mostly without them. At last care, anxiety, and growing perplexities, wore him out; he became gloomy and suspicious; was overwhelmed by sorrow at the death of his favourite daughter, Elizabeth, Lady Claypole; fell sick, and died about a month after her, September 3, 1658, anniversary of his two victories of Dunbar and Worcester. He was interred in the chapel of Henry VII. at Westminster; but the body was torn from its resting-place at the restoration, exposed at Tyburn, with those of Bradshaw and Ireton, the head cut off, and the remains buried under the gallows. Cromwell had appointed his eldest son, Richard, to succeed him; but the reins of government were not to be held by one so virtuous and incompetent; and having been compelled by the officers to dissolve the parliament, he abdicated, April 22, 1659, and ended his days in tranquil seclusion at Cheshunt, in Hertfordshire, in 1712. His brother Henry, whose upright administration, as viceroy of Ireland, had gained him many friends, also retired to private life, and died in 1674. The most important contribution to the history of this great man yet made is the "Letters and Speeches of Oliver Cromwell," by Thomas Carlyle: a work which has brought about a revolution in the general way of thinking about its hero. It appeared in 1845, and has passed through several editions. Other valuable works are Guizot's "Lives of Oliver and Richard Cromwell," and the "Life of Oliver," by John Forster. There are portraits of Cromwell by Walker, Samuel Cooper, and Bernard Lens. Walker's is in the British Museum, and duplicates in some private collections; Cooper's is in the possession of the duke of Devonshire; and Lens' in the collection of the duke of Portland. The National Portrait Gallery possesses a terra-cotta bust, modelled from life by Perce.

CROMWELL, OLIVER, great grandson of Henry, second son of the Protector. He was for several years a solicitor in London, and held the appointment of clerk to St Thomas's Hospital. He is noticed here chiefly on account of his valuable publication, entitled "Memoirs of the Protector Cromwell, and his sons Richard and Henry; illustrated by Original Letters and other Family Papers." He succeeded to the family estate of Theobalds, which descended to him through the children of Richard Cromwell, whose name, and died at Cheshunt Park, Herts, in 1821, aged 79.

CROTCH, WILLIAM, musical composer and writer on music, was born at Norwich in 1775. His musical genius appeared at a very early age, and he became doctor and professor of music at Oxford, in 1797. His compositions, both vocal and instrumental, are numerous, and he was author of "Elements of Music: Composition and Thorough-Bass," and "Specimens of Music of all Ages." He became head of the Royal Academy of Music, and died at Taunton in 1847.

CROWNE, JOHN, a poet and dramatist of the 17th century, and the contemporary of Dryden. He was a native of Nova Scotia, but passed the greater part of his life in England. At the command of Charles II. he wrote the "Masque of Callisto," and subsequently he ridiculed the Whig party, in his comedy of "The City Politicks." He lived in comparative retirement for some time; but having written his comedy, "Sir Courty Nice," the king had promised to give him a place; but his Majesty died on the very day on which the piece had its final rehearsal. Died, about 1704.

CROZE, MATHURIN VETSIÈRE DE LA, French oriental scholar; born at Nantea, 1681. Author of "Histoire du Christianisme des Indes," "Lexicon Ægyptiaco-latinum," and other works. He was for some time ecclesiastic of the Benedictine congregation of St Maur; but in 1696 he quitted the cloister and embraced Protestantism at Basel. He went afterwards to Berlin, and became royal librarian and professor of philosophy at the French College. Died, 1739.

CRUDEN, ALEXANDER, known during his life by his assumed title of "Alexander the Corrector," was a native of Aberdeen, born in 1701, and educated with a view to becoming a minister of the kirk of Scotland. But he exhibited such an unteachability of intellect, that he was not considered fit for the ministry; and, proceeding to London, he for some time maintained himself by giving private lessons in the classics; but in 1732 he commenced business as a bookseller. While thus employed, he devoted his leisure to compiling his useful "Concordance of the Old and New Testaments," which he dedicated to Queen Caroline. Soon afterwards he became lunatic, and was placed in a mad-house. He contrived to make his escape, and brought an action for false imprisonment, but was nonsuited. He subsequently resumed his old employment of correcting the press, but again exhibited marks of a deranged intellect. As a literary man, however, he was extremely industrious; and his "Concordance" holds a high place in the estimation of biblical students. Died, 1770, aged 69.

CRUIKSHANK, WILLIAM, an eminent English surgeon, anatomist, and medical writer; author of "The Anatomy of the Absorbent Vessels of the Human Body," "Experiments on the Insensible Perpiration of the Human Body," &c. Died, 1800.

CSOMA (DE) KOROS, ALEXANDER, a Transylvanian traveller and philologist, born about 1790. He was in early life seized by the desire to investigate the origin of the Magyar race, and after a course of study at Göttingen, he went, in 1820, to the East. He visited Egypt and Persia, and spent several years in a Buddhist monastery in Tibet, diligently studying the Tibetan language and literature; imagining he recognized resemblances between the Tibetan and Magyar. He next lived some years at Calcutta, where he compiled his "Dictionary of Tibetan and English," and a grammar of Tibetan; catalogued the Tibetan works in the library of the Asiatic Society; and

necessary cruelty. He afterwards served again on the continent, but only to be defeated. His service ended with the capture of Closter-Noyen, which was disavowed by the government. Died, 1768.

CUNNINGHAM, ALEXANDER, a Scotch historical writer of the 18th century; author of a "History of Great Britain, from the Revolution to the Accession of George I." This was elegantly written in Latin, but a translation of it was published by Dr Thompson in 1787. Cunningham also held some government employments, among which was that of resident at Venice. Died, 1737.

CUNNINGHAM, ALLAN, an eminent poet, novelist, and miscellaneous writer, was born at Blackwood, in Dumfriesshire, in 1785. His parents were in very humble circumstances, and he was taken from school when only 11 years of age, and apprenticed to a stone-mason. These disadvantageous circumstances did not prevent him from acquiring, by great though desultory reading, much information; and in 1810 he went to London, where he at first earned a maintenance by contributing to periodicals, and reporting for the press. At a later period he obtained employment in the studio of the sculptor Chantrey, as principal assistant, which enabled him to prosecute his literary tastes without hazard, and he so well improved his advantages, that he not merely distinguished himself as a critic and historian, poet and novelist, but also as a man of numerous works are "Sir Marmaduke Maxwell," a drama; "Paul Jones," and "Sir Michael Scott," novels; the Lives of Burns, Burns, and lyrics; besides many poems, work, and that by which he is best known south of the Tweed, is "The Lives of British Painters, Sculptors, and Architects." Died, 1812.

CURTON, WILLIAM, an eminent orientalist, was born at Westbury in Shropshire in 1808. He studied at Oxford and entered the church. Having applied himself specially to the study of Arabic and other Oriental languages, he was appointed sub-librarian of the Bodleian in 1834, and three years later assistant-keeper of the manuscripts in the British Museum, a post which he held till 1850. He prepared a classed catalogue of the Arabic manuscripts, and in 1841 applied himself to the study and collation of the important collection of Syriac manuscripts, discovered in a monastery in the desert of Nitria, among which were the Epistles of Ignatius, the publication of which in 1845 gave rise to a warm controversy, in which Dr Curton and German scholars took part. In 1847 Dr Curton was appointed chaplain to the queen, and two years later canon of Westminster. He edited many other learned works, and in 1858 published, from a manuscript of the 5th century, the remains of an ancient recension of the Syriac Gospels. He was a corresponding member, and afterwards foreign associate of the Institute of France, fellow of the Royal Society, and crown trustee of the British Museum. Died in June, 1864, from the effects of a railway accident in the preceding year.

CURRIE, EDMUND, a bookseller, whose name is handed down, like many others, by the satirical wit of Pope, kept a shop in the purlieu of Covent Garden, and had his ears cut off in the pillory as a just reward for publishing obscene books. Died, 1748.

CURRIAN, JOHN PHILIP, a celebrated Irish barrister, of humble origin, was born near Cork in 1780; received his education at Trinity College, Dublin; and, coming to London, studied the law in the Temple. In course of time he was called to the bar; and though at first he had to struggle with great difficulties, his brilliant talents, exerted in defence of various persons charged with political offences, overcame all obstacles, and he quickly rose to forensic eminence. He became a member of the Irish House of Commons in 1784, and was a powerful member of the opposition until the Whigs came into office, in 1806, when he was made minister of the rolls in Ireland. This office he held till 1814, and received a pension of £3000 on retiring, after which period he generally resided in London. His oratorical powers were of the most splendid kind, his wit, pathos, and withering sarcasm being alike irresistible; and though men in personal appearance, and not always using his intellectual weapons with good taste, they enabled him to support the character of a popular advocate and an effective debater. Died, 1817.

CURRIE, JAMES, physician and litterateur, born, 1756. He was a native of Scotland, but settled as a medical man at Liverpool, where he enjoyed an extensive practice. This did not, however, prevent him from devoting considerable time to literature; and he is favourably known as a professional writer by a paper "On Tetanus and Convulsive Disorders," and "Medical Reports," &c. But his literary celebrity rests less upon his professional treatises than upon his excellent edition of the works of Robert Burns, published in 1800, to which he prefixed a short biography, and which obtained him great and well-merited applause. Dr Currie was a fellow of the Royal Society. Died, 1808.

CURTIS, WILLIAM, an eminent English botanist. He was a native of Alton, in Hampshire, and was apprenticed to an apothecary in that place. But his love of botanical pursuits induced him to relinquish his profession to establish a botanical garden, and exhibit as a botanical lecturer. Besides his lectures, which were published with expensive and handsome illustrative plates, he wrote "Practical Observations on the British Grasses," "Flora Londinensis," an accurate and beautiful work; a Botanical Magazine, &c. Died, 1799.

CURTIVS RUFUS, QUINTUS, a Roman historian, who wrote the History of Alexander the Great in ten books, the first two of which are lost. The exact period in which he flourished is not known; for though his style would indicate that he lived in one of the best periods of the Latin language, no writer of any earlier date than the 12th century has made any mention of his work.

CUSA, NICOLAS DE, an eminent cardinal, who took his name from the village of Cusa,

In the diocese of Treves, where he was born. After some minor preferments in the church, he was sent by Pope Eugene IV. as legate to Constantinople, to endeavour to bring about a union between the Greek and Latin churches. He was made a cardinal by Pope Nicholas V., who also gave him the see of Brisen, in the Tyrol. Besides metaphysical, theological, mathematical, and other treatises, which form three volumes folio, he wrote a very learned and powerful refutation of the Koran. Died, 1464.

CUSSAY, M., the governor of Angers at the time Charles IX. ordered the massacre of St. Bartholomew in 1572. He deserves a niche in every biographical work, for having refused to obey the king's inhuman orders. In these memorable words:—"I will not stain 30 years of a spotless life by the most cowardly of assassinations."

CUSTINE, ADAM PHILIPPE, Count de, was born at Metz, in 1740; and having entered the army early in life, attracted the notice of Frederic of Prussia, under whom he served in the Seven Years' War. He afterwards accepted a commission in one of the French regiments serving in the American war against the English; and on returning to France was made governor of Toulon. In 1792 he had the command of the army of the Rhine; but being suddenly summoned to Paris, the tyrants of the hour sent him to the guillotine, August, 1793, there to expiate the crime of non-success.

CUTHBERT, ST., bishop of Lindisfarne, was born in Scotland. After becoming a monk and spending many years in a solitary island, he was appointed bishop of Lindisfarne in the year 685. But he very soon retired, and died in his island on the coast of Northumbria, 687. His remains lie in Durham cathedral, where he is commemorated by a sculptured figure of himself, holding the head of St. Oswald in his right hand. Miracles were ascribed to him, and it was long customary to fight under his banner.

CUVIER, GEORGE LÉOPOLD CHRÉTIEN FRÉDÉRIC DAGOBERT, Baron, the great zoologist and comparative anatomist, was born at Montbéliard in 1769. He was carefully educated by his mother; studied a short time at Tübingen and then at the Military School of Stuttgart; diligently pursued meanwhile his favourite study of natural history; and, in 1793, settled at Paris, where he enjoyed the friendship of Geoffroy St. Hilaire, and was named professor at the central schools. His lectures, by their novelty of ideas and their brilliancy of expression, excited great interest and enthusiasm. He became assistant director of the Jardin des Plantes, and there began his lectures on comparative anatomy. In 1800 he succeeded Daubenton in the chair of natural history at the college of France; was afterwards made perpetual secretary to the Academy of Sciences, and one of the inspectors-general of public schools. Napoleon charged him with the new organization of the universities in Italy, and made him councillor of state. Cuvier visited England in 1818 and 1830, and travelled also in Germany, Italy, and Holland. He was a member of the French Academy, and an officer of the Legion

of Honour. Louis Philippe made him a peer of France. The loss of his daughter, his only surviving child, on the eve of her marriage, in 1827, was a blow from which he did not wholly recover. He opened his last course of lectures on the 8th May, 1832; spoke in a singularly impressive manner to a very numerous audience; and in five days was dead. Among his principal works are: "Recherches sur les Ossements Fossiles des Quadrupèdes," the introduction to which was separately published as, "Discours sur les Révolutions de la Surface du Globe;" "Leçons d'Anatomie Comparée;" "La Nègre Animal;" "Histoire Naturelle des Poissons;" "Éloges historiques des Membres de l'Académie des Sciences," &c. He was a contributor to the "Biographie Universelle;" "Dictionnaire des Sciences Naturelles," and various scientific journals.

CYPRIAN, ST., THASCIUS CÆCILIUS, bishop of Carthage and one of the fathers of the church. He was probably a native of Carthage, taught rhetoric there, and about 246, when nearly fifty years of age, was converted to the Christian faith. He was soon after chosen presbyter, adopted a rigidly ascetic manner of life, and was appointed bishop of Carthage in 248. When the persecution under Decius fell upon the churches, Cyprian ran away and concealed himself nearly two years. He was then received as bishop again, but during the next persecution, under Valerianus, he was arrested and banished. After a year he was recalled, but as he refused to make the required sacrifice to the gods, he was put to death, 258. Cyprian is distinguished for his exaggerated notion of the rights of bishops, and for his severe treatment of the "inspired." His appointment was the occasion of a schism in the church of Carthage, in which his rival was Felicissimus, and which was terminated by the aid of Cornelius, bishop of Rome. Cyprian also opposed the extravagant honours paid to martyrs and confessors. His works, consisting of letters and sermons, are of great importance for the insight they give into the beliefs, modes of thought, and practices of the early churches. They are written in a rhetorical style, resembling that of Tertullian, whom Cyprian studied and revered, and was accustomed to speak of as "the minister."

CYRIL, ST., Patriarch of Alexandria, succeeded Theophilus in 412. He was a man of boundless ambition, arrogant, and headstrong, and displayed these qualities in the persecution of the Novatians; in the expulsion of the Jews from Alexandria; in his quarrel with Orestes, governor of the city; his persecution of the accomplished Hypatia, head of the Platonic school of Alexandria, followed by her brutal seizure and murder; and in his long controversy with Nestorius. He got Nestorius condemned by Pope Celestine and at the Council of Ephesus, in 431, was himself condemned at the Council of Antioch, and with his rival was imprisoned by the emperor Theodosius. His writings, mostly controversial, occupy 7 vols. folio. Died, 444.

CYRIL, ST., "Apostle of the Slaves," was born of a family of senatorial rank at The-

salonica. His first and he acquired the *Isoprophet*. He was a Chrysostom, and conveyed whole tribes. He is the Bulgarian, found and invented the Slav works are attributed 892.

CYRUS, surnamed of the Persian monarchs, a Persian noble daughter of Astyages story is more than impossible to separate principal exploits attribute of a revolt consequent defeat of Medes, when he became conquest of Lydia and the siege and capture and the invasion of B. defeated and slain by Magesmetis, 529. He was gardian, and his triumph under the Great Xenon is an ideal picture of a not an actual history of

CYRUS, surnamed son of Darius II., king's satra. In u. c. 467 he was the western provinces was of ambitious temper to death for plotting Artaxerxes on his accession but was pardoned. His king himself, he raised a large body of Greek mercenaries, marched down at Cunaxa encountered there, when he was defeated. Xenophon, who had been among the Greeks, retreated, and wrote an account.

CZACKI, THADDEUS, and writer, was born in one of the ministers of Augustus in 1788, and by and practical sagacity various services to his prominent part in the and on the partition of were confiscated. They him by the emperor Paul came head of a new school which rapidly grew in Italy. His most important one on the laws of Poland, 1813.

CZARTORYSKI, Prin

salonica. His first name was Constantine, and he acquired the designation of the *Protospathar*. He was sent to preach to the Chuzava, and converted the Khan and the whole tribe. He afterwards preached to the Bulgarians, founded a school at Buda, and invented the Slavonic alphabet. Several works are attributed to him. Died at Rome, 882.

CYRUS, surnamed **THE ELDER**, founder of the Persian monarchy, was son of Cambyses, a Persian noble, and of Mandane, daughter of Astyages, king of Media. His story is more than half mythical, and it is impossible to separate fact from legend. The principal exploits attributed to him are the excitement of a revolt of the Persians and consequent defeat of Astyages and the Medes, when he became king, B. C. 559; the conquest of Lydia and capture of Croesus; the siege and capture of Babylon, in 538; and the invasion of Scythia, when he was defeated and slain by Tomyris, queen of the Massagetae, 529. He was interred at Pasargard, and his tomb was visited by Alexander the Great. Xenophon's "Cyropaedia" is an ideal picture of a good and wise ruler, not an actual history of Cyrus.

CYRUS, surnamed **THE YOUNGER**, was son of Darius II., king of Persia, and Parysatis. In B. C. 407 he was made governor of the western provinces of Asia Minor. He was of ambitious temper, and was sentenced to death for plotting against his brother Artaxerxes on his accession to the throne, but was pardoned. Still determined to be king himself, he raised an army, including a large body of Greek mercenaries, crossed the Taurus, marched down the Euphrates, and at Cunaxa encountered the army of his brother, when he was defeated and slain, B. C. 401. Xenophon, who had served as a volunteer among the Greeks, conducted their retreat, and wrote an account of the expedition.

CZACKI, THEODORE, Polish statesman and writer, was born in 1765. He became one of the ministers of King Stanislaus Augustus in 1788, and by his vast knowledge and practical assiduity rendered great and various services to his country. He took a prominent part in the Constitutional Diet, and on the partition of Poland his estates were confiscated. They were restored to him by the emperor Paul. In 1805 he became head of a new school at Krzemionka, which rapidly grew in importance and popularity. His most important work is a treatise on the laws of Poland and Lithuania. Died, 1813.

CZARTORYSKI, Prince ADAM, Polish

statesman and member of one of the most distinguished families of Poland, was born at Dantzig in 1734. He was cousin of Stanislaus Poniatowski, and contributed to his election to the throne. He took part in the Constitutional Diet, which met in 1796; was employed in several missions; suffered much from the insurrection of 1794; was twice visited by the emperor Alexander; and was marshal of the Diet convoked to establish the confederation of 1812. Died, 1823.

CZARTORYSKI, Prince ADAM, a very prominent actor in the Polish revolution of 1830, was born at Warsaw in 1770. He passed several of his early years in England, and studied at the university of Edinburgh. Returning to Poland, in 1793, he joined the forces of Kosciusko against the Russians, and after his failure was sent as a hostage into Russia. In 1805 he subscribed, in the name of Russia, the treaty with Great Britain, in his capacity of minister for foreign affairs. When the revolution of 1830 broke out, he devoted all his energies to the service of his country. As president of the provisional government, he summoned the Diet to meet in December, 1830, and in the following month was placed at the head of the national government. He resigned his post after the terrible days of August 15 and 16, and served as a common soldier during the last fruitless struggle. He was excluded from the amnesty of 1831, and his estates in Poland confiscated. His latter years were spent in Paris, where he died, July 15, 1861, aged 90.

CZERNI-GEORGE, whose real name was **HENRI-GEORGE**, was long supposed to be a native of Servia, but is now known to have been a Frenchman. He was born at Nueil, served in the army, passed over to the Austrian army during the revolutionary wars, then became a leader of banditti in Servia, and at last raised himself to the rank of hospodar by the force of his natural talents, and a courage rarely equalled. With an ardent desire to liberate Servia from the Turks, he first raised a small troop, was successful in various encounters, and in 1800 made himself master of Belgrade. A long and arduous struggle followed; and though for a time Czerni-George was the acknowledged prince of Servia, his despotism became intolerable, the nobles hated him as much as the Turks, and he was eventually compelled to retire to Russia, where he was received with distinction, and created a Russian prince. But he was still bent on repossessing Servia; and having entered that territory, in 1817, he was taken prisoner and beheaded.

D.

DACIER, ANDRÉ, a French critic and classical commentator of some eminence, born, in 1651, at Castres, in Upper Languedoc. He was made perpetual secretary of the French Academy, and had the care of the cabinet of the Louvre intrusted to him. He translated Horace, Plato, Plutarch, Epictetus, &c., into French. Died, 1722.

DACIER, ANNE LEFEVRE, wife of the preceding, was born, in 1651, at Saumur, at the university of which place Tannequi Lefevre, her father, was a professor. Her love of classical literature was displayed at an early age; and her proficiency was so great, that at the age of 22 she published an admirable edition of "Callimachus," which was followed by various other editions of the classics. She subsequently translated Homer, Anacreon, Sappho, Terence, with some of the plays of Aristophanes, Plautus, &c. In 1683 she married M. Dacier, and soon after they both renounced the Protestant religion. Though her life was spent in constant literary labour, she was far from being ostentatious of her eminent abilities. Died, 1720.

DAGUERRE, M., whose name is associated with one of the most refined applications of Science to the Arts, was born in 1790. From an early period he had been engaged in making chemical researches; but the Daguerreotype process, with which his name is identified, was first made known in the autumn of 1839. The whole of Europe was astonished at the beauty and novelty of the pictures produced by his process; and the French Government granted him a pension of 6000 francs for his discovery. Daguerre was celebrated as a dioramic painter, and by ingenious contrivances he had succeeded in producing many very extraordinary effects in his pictures. His system of opaque and transparent painting was published by the French Government along with the processes of the Daguerreotype. Died, 1852.

D'AGUESSEAU, HENRI FRANÇOIS, chancellor of France, illustrious for his talent, scholarship, and integrity, was born at Limoges in 1668. He was received advocate in 1690; held the office of advocate-general to the parliament of Paris, for six years; rendered great services to his country during the embarrassments caused by war and famine in 1709; risked disgrace with Louis XIV. by his steady opposition to the famous bull *Unigenitus*; and was named chancellor in 1717. He opposed the foolish schemes of Law, for which the regent deprived and exiled him; but he was reinstated in 1720. Through the influence of Cardinal Dubois he was again exiled, and though recalled after five years, the seals were not restored to him till 1737. At the age of 82 he retired from office with a pension of 100,000 francs. Died, 1751. His works, consisting of his speeches and pleadings, fill 13 vols. 4to.

DAILLE, JEAN, a distinguished French

Protestant divine, born in 1694. He was tutor to the sons of Duplessis-Mcarnay, and with them visited Italy, where he made the acquaintance of Paul Sarpi. After his return to France, he held the office of pastor of the church of Charenton above 40 years. He wrote several important works, among which are the "Traité de l'Emploi des SS. Pères," "Apologie des Eglises réformées," both which were translated into Latin and English; "La Foi fondée sur les Saintes Ecritures," &c. As a controversialist he was singularly impartial, and is esteemed even by Roman Catholics. Born, 1694; died, 1670.

DALBERG, CARL THEODOR ANTON MARIA, baron of the German empire, prince-primate of the confederation of the Rhine, grand-duke of Frankfurt, and, finally, archbishop of Ratisbon, was born near Worms, in 1744. He always espoused the new ideas to which the French revolution gave impulse; and though he opposed the invasion of Germany by the French in 1797, he assisted at the coronation of the emperor Napoleon in 1804. Throughout life he was distinguished for industry in the discharge of his official duties, and for an incorruptible love of justice; he was also the encourager of learning and science, and himself the author of several ingenious treatises, legal, scientific, and philosophical. In 1813 he resigned all his possessions as a sovereign prince, and retired to private life, retaining only his ecclesiastical dignity. Died, 1817.

D'ALBRET, CHARLOTTE, sister of Jean d'Albret, king of Navarre, and wife of Cesar Borgia. She was a poetess of no mean powers, and as remarkable for virtue as her husband was for vice. Died, 1514.

D'ALBRET, CHARLES, constable of France in the reign of Charles VI., to whom he was related by blood. He commanded in the French army at the famous battle of Agincourt, in which he lost his life, 1415.

D'ALBRET, JEANNE, queen of Navarre, was born in 1528. She was the daughter of Henri d'Albret, married Antoine de Bourbon, duke of Vendôme, and became, in 1553, mother of Henry IV. She succeeded her father in 1555, and soon after became a Protestant. Being invited to Paris to treat of the marriage of her son with Margaret, sister of Charles IX., she went there, and the treaty was signed, but she died suddenly, June, 1572, two months before the massacre of St Bartholomew.

DALE, RICHARD, an American naval officer, was born, in Virginia, in 1756; was sent to sea at 12 years of age, and at 19 had the command of a merchant-vessel. While serving as a midshipman on board of the American brig of war Lexington, he was taken by a British cutter; but, after being confined a twelvemonth in Mill prison, he effected his escape into France, where he joined the celebrated Paul Jones, then commanding the American ship Bon Homme

Richard, and was on the English frigate captured. In 1801 he was on board the American squadron on board the Pres. honourable, and in the most romantic and adventurous of his adventures were the joyment of a compephs, where he died.

DALE, DAVID, a originator of the was born, in 1739, at From being a jour came a cotton manensive scale, first R. Arkwright, and given to thousands, he leave the latter instruction, but prov

D'ALEMBERT, J brated French math teur, was born, at P found exposed on the St Jean le Rond, was of a glazier, and was son of Madame de Te beauty, and of an o studied at the Collège self with enthusiasm was admitted to the in 1741. With D'ic famous "Encyclopédic inary Discourse, and cal portion of the wor of Frederick II. of Pr fully endeavoured to Catherine of Russia p take the education of He loved privacy and shunned society, and money and honours.

works are: "Traité des Fluides; différens Points impos Monde;" Recherches Equinoxes;" Mémoires des Jésuites;" "Mén Reine de Suède" &c.

DALHOUSIE, JAM RAMSAY, tenth Earl s born April 22, 1812, w East Lothian in 1837, t year, on the death of place in the House of was appointed vice-pr of Trade, and presiden Having accepted the general of India, he ar January, 1848. His pol six years of his rule is in the well-known min up in 1856. His health increasing exertions, and Journ in India was occ mentous questions invo son of the king of Oude and settlement of his ki boule's policy in this severely criticised by son was founded on long pe

Richard, and was the first man that boarded the English frigate *Serapis*, which was captured. In 1801 he had the command of an American squadron, and hoisted his pendant on board the President. He was a brave, honourable, and intelligent seaman. The adventures of his early days were of the most romantic and perilous kind; but his latter years were passed in the peaceful enjoyment of a competent estate at Philadelphia, where he died, in 1828.

DALE, DAVID, a skilful mechanic, and the originator of the well-known Lanark Mills, was born, in 1739, at Stewarton, in Ayrshire. From being a journeyman weaver he became a cotton manufacturer on a most extensive scale, first in conjunction with Sir R. Arkwright, and afterwards on his own account. By his means employment was given to thousands, old and young; nor did he leave the latter without the means of instruction, but provided teachers and established schools at all his works. Died, 1806.

D'ALEMBERT, JEAN LE ROND, a celebrated French mathematician and littérateur, was born, at Paris, in 1717. He was found exposed on the steps of the church of St Jean le Rond, was brought up by the wife of a glazier, and was discovered to be the son of Madame de Tencin, a noted wit and beauty, and of an officer of artillery. He studied at the Collège Mazarin, devoted himself with enthusiasm to mathematics, and was admitted to the Academy of Sciences in 1741. With Diderot he established the famous "Encyclopédie," wrote the Preliminary Discourse, and edited the mathematical portion of the work. He was the friend of Frederick II. of Prussia, who unsuccessfully endeavoured to fix him at Berlin. Catherine of Russia pressed him to undertake the education of her son, but in vain. He loved privacy and independence, rather shunned society, and was indifferent to money and honours. Among his principal works are: "Traité de Dynamique;" "Traité des Fluides;" "Recherches sur différents Points importants du Système du Monde;" "Recherches sur la Précession des Equinoxes;" "Mémoire sur la Suppression des Jésuites;" "Mémoires de Christine, Reine de Suède," &c. Died, 1783.

DALHOUSIE, JAMES ANDREW BROWN RAMSAY, tenth Earl and first Marquis of, born April 22, 1812, was elected M.P. for East Lothian in 1837, but in the following year, on the death of his father, took his place in the House of Lords. In 1843 he was appointed vice-president of the Board of Trade, and president in February, 1845. Having accepted the office of governor-general of India, he arrived at Calcutta in January, 1848. His policy during the first six years of his rule is minutely explained in the well-known minute which he drew up in 1856. His health gave way under his incessant exertions, and the close of his journey in India was occupied with the momentous questions involved in the deposition of the king of Oude and the occupation and settlement of his kingdom. Lord Dalhousie's policy in this matter has been severely criticised by some whose judgment was founded on long personal experience,

and he returned to England not long before his successor had to encounter the great Indian mutiny, which has by some been attributed to the system of his predecessor. Lord Dalhousie never entirely recovered his strength, and died at the age of 48, December 19, 1860.

DALIN, OLAUS VON, called the father of modern Swedish poetry, was the author of many spirited satires, songs, epigrams, and fables. He also wrote "The Argus," a work on the plan of the Spectator; "A General History of Sweden;" "Brunilda," a tragedy, &c. He was born in 1708, and died, chancellor of the university of Sweden, in 1783. Queen Louisa Ulrica erected a mausoleum to his memory.

DALLAS, SIR GEORGE, lord chief justice of the Common Pleas, was born in London, 1758, educated principally at Geneva, and at the age of 18 he went to India as writer, where his talents soon raised him to high civil offices. He warmly espoused the cause of Warren Hastings when impeached, and in 1789 he wrote a pamphlet, in which he attributed to him the British supremacy in India. In 1793 he published his "Thoughts upon our present Situation, with Remarks upon the Policy of a War with France," which created considerable sensation, and especially excited the admiration of Mr Pitt. He was also the author of various other political works, relating more particularly to the state of Ireland; besides some elaborate treatises on the subject of the East India trade and policy; and, lastly, a "Biographical Memoir of his son-in-law, Captain Sir Peter Parker." The works of Sir George Dallas display a thorough knowledge of the subjects on which he treated. Died, Jan. 1833.

DALLAWAY, JAMES, writer on art and antiquary, was a native of Bristol. He was born in 1763, studied at Oxford, and entered the church. In 1795 he visited Constantinople as chaplain to the embassy, and on his return became secretary to the earl marshal, the duke of Norfolk. Among his works are a "History of Western Sussex;" "Constantinople, Ancient and Modern;" "Anecdotes of the Arts in England," &c. He also edited the Letters of Lady Mary Wortley Montague, Walpole's "Anecdotes of Paintings," and other works. He was a fellow of the Society of Antiquaries. Died, 1834.

DALRYMPLE, ALEXANDER, hydrographer to the Admiralty and the East India Company, was born at New Hailes, near Edinburgh, in 1737, and spent the early part of his life in India, as a writer to the Company. He made a voyage in the Eastern Archipelago for the purpose of studying its geography and opening the way for extended trade. On his return to England he prepared some charts and wrote numerous works, among which are "The Oriental Repertory," Collections of Voyages, &c. He was named hydrographer to the East India Company in 1779, and to the Admiralty in 1795. He was also a fellow of the Royal Society. Died, 1808.

DALRYMPLE, SIR DAVID, a Scotch judge and antiquary, was born at Eton and Utrecht. On

his becoming a Judge of the court of session, in 1766, he took the title of Lord Hailes. His principal works are "Annals of Scotland," which Dr Johnson assisted in revising, "Memoirs relating to the History of Great Britain," "Remains of Christian Antiquity," &c. Died, 1792.

DALRYMPLE, JAMES and JOHN. (STAIR, Viscounts and Earls.)

DALRYMPLE, Sir JOHN, for many years a baron of exchequer in Scotland, and the author of "Memoirs of Great Britain and Ireland," in 3 vols. Died, aged 84, in 1810.

DALTON, JOHN, D.C.L., F.R.S., mathematician and natural philosopher, was born at Eaglesfield, near Cocker-mouth, in 1766, and gave early indications of his future scientific celebrity. We find him teaching a school as a boy in his native village, and at a subsequent period similarly engaged at Kendal; and in 1793, when in his 23rd year, he became professor of mathematics and natural philosophy in the new college in Mosely Street, Manchester, with which he remained connected until the removal of that establishment to York. He made his first appearance as an author in a volume of "Meteorological Observations and Essays," in 1793. In 1808 he published "A New System of Chemical Philosophy," and a second and third part in 1810. He also frequently contributed to Nicholson's Journal, the Annals of Philosophy, and the Memoirs of the Literary and Philosophical Society of Manchester, of which for half a century he was an active member, and latterly the president. In 1826 he was presented with a gold medal by the Royal Society for his scientific discoveries; and in 1833 the sum of £2000 was raised by his friends and townsmen for the erection of a statue (by Chantrey) to perpetuate his remembrance. His "atomic theory" must ever render his name memorable. Contemporaneously with Gay-Lussac, with whose researches many of his own run parallel, he discovered the general law of the expansion of gases; and his contributions to meteorology were also of the most important kind. A severe attack of paralysis in 1837 considerably impaired his powers, and he died in August, 1844. Dalton was a man of thorough independence of mind, thorough truthfulness, and almost childlike simplicity of life. He was a member of the Society of Friends, and a constant attendant at their meetings. His fellow-townsmen showed their sense of his worth by giving him a magnificent funeral attended by an immense number of persons.

DAMASUS I., Pope, succeeded Liberius in 366. A rival was also elected, and disgraceful disorders followed, the hostile parties going the length of fighting and killing each other in the city, and even in the churches of Rome. Damasus was a man of considerable learning, and his judgment was sought on many important matters then in dispute. On one occasion the eastern churches referred a question to him. St Jerome was at Rome during the last years of the pontificate of Damasus. Died, 384.

DAMIANI, PIETRO, Cardinal, bishop of Ostia, born at Ravenna about 988. Left an orphan, he was brought up by one of his bro-

thers and sent to study at Faenza and Parma. He made rapid progress, and became a teacher himself, but his strong religious feeling led him to retire to a monastic life, and in 1041 he became abbot of Pont-Ave-Manna. He rendered important service to several popes, and was created cardinal, against his will, in 1057. His influence was very powerful, and he induced Benedict X., who was irregularly elected pope, to resign in favour of Nicholas II. He was sent as legate to Milan to condemn the simoniacal practices then causing much agitation; supported Alexander II. against the emperor; and then retired, resigning his dignities. He was, however, several times drawn from his cell and sent on important missions to France, to Germany, and finally to Ravenna, to re-establish order after the excommunication of the archbishop. The fatigue of this mission was too much for his diminished strength, and he died at Faenza soon after his return, in 1072. His works consist of Biographies of Saints, Sermons, and Letters.

DAMIENS, ROBERT FRANÇOIS, who, owing to his vicious inclinations, obtained the appellation of *Robert-le-diable*, was born in 1715, at Tienloy, a village of Artois. While at Paris, in a menial employment, he was accused of having poisoned one of his masters and robbed another; and having evaded the law by flight, he in course of time returned, to practise new enormities. His mind was impressed and irritated by the disputes then going on between the church and the parliament of Paris. With some vague notion that a change for the better might be effected by attacking the king, in January, 1757, he stabbed Louis XV. in the midst of his guards, as he was getting into his carriage. The wound was not mortal, and Damiens was instantly seized; but the most cruel tortures which he was doomed to suffer could not induce him to confess that he had any accomplices; and the horrid sentence, which condemned him, like Ravalliac, to be torn in pieces by horses, was executed, March 28, 1757.

DAMOCLES, a sycophant at the court of Dionysius of Syracuse in the 4th century B. C. When he was one day extolling the happy condition of princes, the tyrant invited him to a sumptuous entertainment, but caused a naked sword to be suspended over his head by a single hair; a sufficiently significant symbol of the fear in which tyrants may live.

DAMON, a Pythagorean philosopher, member for his friendship with Pythias. Dionysius of Syracuse having condemned the latter to death, he obtained leave of absence to go home and settle his affairs. Damon pledging himself to endure the punishment in his stead if he did not return at the appointed time. Damon was punctual; and this instance of friendship so pleased the king, that he pardoned Damon, and begged, but in vain, to be admitted to their friendship.

DAMPIER, WILLIAM, an English navigator, was born at East Coker, Somersetshire, in 1652, and became a mariner at an early age. During many years of active service in privateers and trading vessels, he

several times visited the results of his to the public in round the World, interest, as well ledge, possesses died, as is supposed time is not known.

DANBY, FRANCIS, was a native of in 1793, and after at Dublin, he settled. He was elected A. works are mostly treated, and often sunset. Their gathered from the after a storm," "Ship on Fire—car "The Minute-Gun best works are "M delivery of Israel out adon of Cleopatra in Devonshire, 1861.

DANBY, THOMAS duke of Leeds, lord. He was born about zealous royalist, and at an early age. He II., created Viscount the following year v surer, and created his advice that Char conformists. He was and an impeachment William Russell, but in 1678 he was impe and though pardoned mitted to the Tower, in 1684. He joined I prince of Orange, in sident of the Council and was created mar ir 1695 duke of Leeds.

DANCE, GEORGE, architect of the 18th post of architect to t chief work is the Man built about 1740. Di **DANCE, GEORGE,** was the son of the pr in 1740. In 1768 he s of city architect, and menced his first an meritorious work, tho son. He was profes the Royal Academy, Dance built St Luke British Institution i 1825.

DANCER, DANIEL, born in 1716, near H in 1738 he succeeded and led the life of a h century. His only de arose from the sale of seldom seen, except wh ing logs of wood from he was frequently robb door, and by means of drew up after him, got l the upper window. Thi of humanity continues when he died, bequea

several times visited the South Seas; and the results of his observations were given to the public in a work entitled "Voyage round the World," which for accuracy and interest, as well as for professional knowledge, possesses considerable merit. He died, as is supposed, in 1712, but the exact time is not known.

DANBY, FRANCIS, a distinguished painter, was a native of Wexford. He was born in 1723, and after attaining some reputation at Dublin, he settled in England about 1820. He was elected A.R.A. five years later. His works are mostly landscapes, imaginatively treated, and often invested with the hues of sunset. Their general character may be gathered from their titles: "Sunset at Sea, after a Storm," "Last Moment of Sunset," "Ship on Fire—cain moonlight—far at Sea," "The Minute-Gun at Sea," &c. Among his best works are "Morning at Rhodes," "Delivery of Israel out of Egypt," and "Embarkation of Cleopatra on the Cydnus." Died, in Devonshire, 1861.

DANBY, THOMAS OSBORNE, Earl of, and duke of Leeds, lord-treasurer under Charles II., was born about 1631. His father was a zealous royalist, and introduced him at court at an early age. He was knighted by Charles II., created Viscount Latimer in 1673, and in the following year was appointed lord-treasurer and created earl of Danby. It was by his advice that Charles persecuted the Non-conformists. He was suspected of bribery, and an impeachment was proposed by Lord William Russell, but was not carried out. In 1678 he was impeached by the Commons, and though pardoned by the king, was committed to the Tower, and was only released in 1684. He joined in the invitation to the prince of Orange, in 1688, was named president of the Council in the following year, and was created marquis of Carmarthen, and in 1693 duke of Leeds. Died, 1712.

DANCE, GEORGE, the elder, an English architect of the 18th century, who held the post of architect to the city of London. His chief work is the Mansion House, which was built about 1740. Died, 1768.

DANCE, GEORGE, the younger, architect, was the son of the preceding, and was born in 1740. In 1768 he succeeded to the office of city architect, and two years later commenced his first and probably his most meritorious work, the famous Newgate prison. He was professor of architecture at the Royal Academy, but did not lecture. Dance built St Luke's Hospital, and the British Institution in Pall Mall. Died, 1825.

DANCER, DANIEL, a noted miser, was born in 1716, near Harrow, in Middlesex. In 1738 he succeeded to his family estate, and led the life of a hermit for above half a century. His only dealings with mankind arose from the sale of his hay; and he was seldom seen, except when he was out gathering logs of wood from the common, &c. As he was frequently robbed, he nailed up his door, and by means of a ladder, which he drew up after him, got into his house through the upper window. This miserable specimen of humanity continued to exist till 1794, when he died, bequeathing his estates to

Lady Tempest, for the charitable attentions she had bestowed upon him.

DANCKERTS, the name of a family of Dutch artists, of whom **CORNELIUS**, born in 1561, appears to have been the first of any note. He excelled as a portrait and historical engraver.—**PETER**, of Cornelius, was born at Amsterdam, in 1600. He was also a good engraver, and his prints after Berghem and Wouwermans are esteemed. His sons, **HENRY** and **JOHN**, practised the same art, and the latter came to England and worked with Mollat.

DANCOURT, FLORENT CARTON, a French actor and dramatic poet, was born in 1661, at Fontainbleau, and was originally a barrister, but quitted the law for the stage. He produced an immense number of plays, and was particularly successful in introducing actual occurrences, which gave to his comic pieces great piquancy. Died, 1720.

DANDOLO, HENRICO, a celebrated doge of Venice, to which high office he was chosen in 1192, when in his 84th year. He carried on the war with the Pisans, and closed it by an advantageous peace. In 1201 the crusaders applied to him for assistance, and on their promise to reduce the town of Zara which had revolted, he agreed to help them. He accordingly undertook with them, in 1203, the siege of Constantinople, at which he greatly distinguished himself, and was the first who leaped on shore. It is said that Dandolo had the offer of the imperial crown and refused it. He was created despot of Romania, and died in 1205, aged 97.

DANDOLO VINCENZO, a Venetian chemist, descended from the famous doge and captor of Constantinople, was born in 1708. At all times zealous for the independence of Italy, he became a member of the council of the Cisalpine republic, after the treaty of Campo Formio. He died in 1818. Among his works are "Fondamenti della Scienza Fisico-Chemica," &c.

D'ANGHIERA, PIETRO MARTIRE.

[MARTYR, PETER.]

D'ANGOULEME, MARIE THERESE CHARLOTTE, Duchess, the unfortunate daughter of Louis XVI. and Marie Antoinette, was born at Versailles, in 1778. She shared the imprisonment of her kindred in the Temple; but three years after the murder of her parents, and after she had heard of the cruel death of her brother, she was released from prison, in exchange for some members of the Convention who had been prisoners in Austria. Immediately upon her release, she proceeded to Vienna; but there, where the name of Frenchman was hated, she encountered persecution again; and she quitted the emperor's court to take shelter with the exiled Count de Provence, who had found a temporary home at Mittau. Here she married her cousin, the duke of Angoulême, to whom she had been betrothed early in life, and for whose sake she had refused a promising alliance at the Austrian court. Mittau, however, proved no resting-place. The emperor of Russia, influenced by Napoleon, ordered the wanderers forth. At Königsberg they received permission from the king of Prussia to take up their abode

in Warsaw under painful conditions. But Warsaw soon repented of its meagre hospitality, and the outcasts were soon travelling again towards Mittau. Meanwhile Alexander, by the peace of Tilsit, having become an ally of Napoleon, the word was once more given to go forth. In August, 1808, the travellers touched the English shore, and remained under protection until the banishment of Buonaparte in Elba opened the road to France and to the throne. The first care of the duchess on her return was to recover the remains of her parents thrown into a dishonoured grave; but the burial was scarcely over before Buonaparte escaped from Elba. The duchess, being at Bordenax at the time, rallied the troops there, and heroically undertook to lead them against Napoleon, who, remembering her heroism when she defied the artillery of Clauzel, was wont to call her "the only man of the family." Eleven months the devoted woman had been in France when she quitted it sorrowfully again; but the Hundred Days over and Waterloo accomplished, the second restoration took place, and she at once returned. But even in prosperity, calamity qualified her lot. Her brother-in-law, the Duc de Berri, was murdered at the Opera, on the 13th of February, 1820, and in 1824 she lost her fellow-exile, Louis XVIII. Six years afterwards the folly of Charles X. transferred the throne to his cousin Louis Philippe; and during the storm that preceded the change the duchess was forced to travel disguised through the streets in a public vehicle, whose merciful and generous owner contrived to save her from discovery and its too probable consequences. Quitting France with Charles X., she set sail for England, visited Scotland, and for a time sojourned in the palace of Holyrood. Soon afterwards she accompanied her uncle to Prague. In 1838 they established themselves at Goritz, where Charles X. found his tranquil resting-place, and where, shortly afterwards, the remains of her faithful husband were deposited. When residing with her nephew at Frohsdorf she heard of the new French revolution of 1848, which deprived Louis Philippe of his crown. On the 13th of October, 1851, whilst present at the celebration of mass, between nine and ten o'clock in the morning, the duchess fainted away. On the following day she became worse; on the 16th, the anniversary of her mother's execution, she uttered a feeble farewell to the duke of Bordenax, and never again spoke. Her will had been previously made. She prayed to God, in that document, to shower down his blessings upon France; she pardoned with her entire soul, and without exception, all who had injured and offended her; and she desired to be laid in the grave between her husband and his father, without ceremony or solemn service. Died, 1851. Her Memoirs have been published by Mrs Romer, under the expressive title of "Elisa Dolores."

DANICIAN, ANDRE. [PHILIDOR.]

DANIEL, GABRIEL, a French Jesuit; author of a "History of France," and a "Voyage to the World of Descartes," a

severe satire on the system of that philosopher. Born, 1649; died, 1728.

DANIEL, SAMUEL, an English poet and historian, born in Somersetshire, in 1592. He appears to have studied at Oxford, became tutor to Lady Anne Clifford, and was afterwards in the service of Anne, queen of James I. It is uncertain whether he succeeded Spenser as poet-laureate. He wrote a poem on the Wars of the Roses; "Cleopatra," a tragedy; "Musophilus;" "The Complaint of Rosamond;" and other shorter poems, and also a History of England, down to the death of Edward III. His works are little read, but deserve to be well known. Coleridge calls him "the admirable Daniel," and commends the purity and manliness of his style and language. Many passages of great sweetness and tenderness occur in his poems. Died in his native county in 1619.

DANIELI, FRANCISCO, an Italian savant and antiquary, born in 1741. In the Neapolitan revolution of 1799, he joined the French republican party; and on the restoration of the king of Naples suffered the loss of his post in the Academy, and the confiscation of his property. Joseph Buonaparte made him perpetual secretary of the Academy of Antiquities at Naples, and in this post he was continued by Murat. He died in 1812. Among his works are "Le Forche Candino Illustrato," "Monete Antiche di Capua," "I Regali Sepolcri del Duomo di Palermo," &c.

DANIELL, JOHN FREDERICK, D.C.L., professor of chemistry in King's College, London, and foreign secretary to the Royal Society; author of "Meteorological Essays," an "Introduction to Chemical Philosophy," &c., besides numerous papers in the Quarterly Journal of Science and Art, and the Philosophical Transactions, was born in London, in 1790. As a proof of the estimation in which his scientific attainments were held, it is only necessary to state that he obtained all the three medals in the gift of the Royal Society, an honour never before conferred on any one. While attending a meeting of the council of the R. S., March 14, 1845, he was seized with apoplexy, and immediately expired. In his official capacity he was zealous and indefatigable; in his private character, irrepachable.

DANIELL, SAMUEL, an artist, who travelled into the Interior of Africa, made numerous drawings there, and on his return published a work entitled "African Scenery and Animals." He also spent six years in the island of Ceylon, where he died in 1811. He left an extensive collection of drawings, chiefly illustrative of the natural history of the island; and a volume was published, entitled "The Scenery, Animals, and Native Inhabitants of Ceylon."

DANIELL, WILLIAM, R.A., an eminent draughtsman, born 1769, accompanied his uncle to India, when he was only 14, for the purpose of assisting in depicting the scenery, costume, &c., of that country. Immediately on their return, the large work, entitled "Oriental Scenery," in six folio volumes, was commenced, and continued with the most persevering ardour, until its completion in 1808. He also pub-

lished "A Pictorial work entitled 'variously of separate he commenced t Britain.'" Two summer were de ings and notes, an 1825. In 1832 M Mr Farris, exec Madras;" and ho others, without "City of Luckn Hunting wild Bi was particularly the ocean; and hi of Eastern scener splendid "Orienta

DANTE ALIGHIERI, Italy, was born at Florence, of a noble family, party of the Guelphs, a strong passion for have studied at the and Padua. It is c visited Paris, and p about ten years of a house of her father Beatrice whose beau him with a passion became one of the mo inner life, and the so finest and sweetest poem. Beatrice died became to him a gl and purity. A year ried Gemma de' Donn the party of the Ghib his life a burden b Dante served in the B battle of Campaldino, war with the Pisans. first prior, or chief m and from that period and wanderings. Th spill into two factions, and the Neri; and D favouring the Bianchi exile, and his estates was then at Rome, ar take refuge at various the Ghibelline party, 1304, he made, with successful attempt to force of arms. After found an asylum at Novelle da Polenta, a

lished "A Picturesque Voyage to India," a work entitled "Zoography," and a great variety of separate views, &c. In 1814, he commenced the "Voyage round Great Britain." Two or three months in each summer were devoted to collecting drawings and notes, and the work was finished in 1825. In 1832 Mr Daniell, and his friend Mr Parria, executed the "Panorama of Madras;" and he subsequently painted two others, without assistance, namely, the "City of Lucknow," and the "Mode of Hunting wild Elephants in Ceylon." He was particularly successful in depicting the ocean; and his glowing representations of Eastern scenery are well known by his splendid "Oriental Annual." Died, 1837.

DANNECKER, JOHANN HEINRICH, one of the greatest of modern sculptors, was born at Stuttgart, in 1758. His early gave indications of a talent for art; and after passing some years in the school of design at Ludwigburg, he set out for Paris in 1783, where he studied under Pajou, and subsequently spent five years at Rome, in the study of the masterpieces of art that adorn that city. The rest of his life was spent chiefly at Stuttgart. Among his finest works are the "Christ," "Faith," "Ariadne on the Leopard," &c. His female figures have rarely been surpassed; and his busts of Schiller, Lavater, Gluck, and many of the members of the royal family of Wurtemberg, are models of artistic skill. Died, professor of sculpture at Stuttgart, 1841.

DANTE ALIGHIERI, the great poet of Italy, was born at Florence in May, 1265. He was of a noble family then attached to the party of the Guelphs, showed at an early age a strong passion for learning, and is said to have studied at the universities of Bologna and Padua. It is conjectured also that he visited Paris, and possibly Oxford. When about ten years of age he first saw, in the house of her father, Folco Portinari, the Beatrice whose beauty and goodness inspired him with a passion of admiring love which became one of the most potent elements of his inner life, and the source of some of the sublimest and sweetest conceptions of his great poem. Beatrice died in 1290; and she then became to him a glorified ideal of wisdom and purity. A year after her death he married Gemma de' Donati, whose family was of the party of the Ghibellines, and who made his life a burden by her savage temper. Dante served in the Florentine army at the battle of Campaldino, and soon after in the war with the Pisans. In 1300 he was chosen first prior, or chief magistrate of Florence, and from that period began his misfortunes and wanderings. The Guelphs were then split into two factions, known as the Bianchi and the Neri; and Dante, on suspicion of favouring the Bianchi, was sentenced to exile, and his estates were confiscated. He was then at Rome, and thenceforth had to take refuge at various courts that favoured the Ghibelline party, which he joined. In 1304 he made, with other exiles, an unsuccessful attempt to enter Florence by force of arms. After many wanderings he found an asylum at Ravenna, with Guido Novello da Polenta, and there he died, in

1321. Florence and all Italy then knew and mourned their loss. A splendid monument was erected to him at Ravenna, copies of his works were multiplied, professorships instituted for expounding them, and voluminous commentaries written. The Florentines tried to get the remains of their banished poet restored to them, but in vain. His bones were removed by Father Antonio Santi, chancellor of the Franciscans, in 1677, on the repair of his monument by Cardinal Corsi. The coffin was rediscovered in 1865. Dante's great poem is entitled the "Divine Comedy," and in the form of a vision sets forth the mysteries of the invisible world, of Hell, Purgatory, and Paradise. It is the first great work of modern European literature, and stands alone as a creation of genius; "a mystic unfathomable song;" "greatest always to the greatest. It has passed through innumerable editions, and been translated over and over again into all European languages. Of English translations Cary's, in blank verse, and Dr Carlyle's, in prose, are much esteemed. But several new translations in various metres have appeared in the last few years. Among them are Wright's, Rossetti's, and Mrs Ramsay's. In 1861 appeared at Paris a magnificent edition of the "Inferno," Italian text and French translation, with illustrations by Gustave Doré, 2 vols. folio. The illustrations have been since reproduced in an English edition, 1 vol. folio. Dante's other works are the "Vita Nuova," lately translated by Theodore Martin; the "Convito," or Banquet; treatises in Latin, "de Monarchia," and "de Vulgari Eloquentia," and many smaller poems, or "Rime." Dante was the friend of most of the eminent men his contemporaries; among them, Giotto, whose portrait of him was discovered in 1840. Aquinas, Roger Bacon, Marco Polo, Cimabue, and Duns Scotus died, and Petrarch and Boccaccio were born, in Dante's lifetime. The Sixcentenary of Dante's birth was celebrated at Florence and other Italian cities with much ceremony.

DANTON, GEORGE JACQUES, born in 1759, was an advocate by profession, but became one of the most active among the demagogues of the French revolution. After the imprisonment of Louis XVI. at Varennes, he took the lead in the meeting of the Champ de Mars, which paved the way to the dethronement of the king, and ended in those scenes of blood and cruelty that have forever rendered execrable the name of Jacobin. Well qualified for the position he assumed, by his colossal figure, stentorian voice, and fierce demeanour, he became one of the executive council, and prepared measures for the defence of the capital when it was threatened by the Prussian invaders under the duke of Brunswick. He was afterwards a member of the Convention and of the Committee of Public Safety, and was a chief promoter of all the sanguinary acts of that terrible period. At length a struggle for supremacy took place between him and Robespierre, in which the latter succeeded, and Danton was sent to the guillotine, in 1794.

D'ANVILLE, JEAN BAPTISTE BOURQUIGNON, first geographer to the king of

France, member of the Academy of Inscriptions and Belles Lettres, of the Antiquarian Society of London, and adjoint-geographer to the Parisian Academy of Sciences; born at Paris, 1697; died, 1782. D'Anville devoted his whole life to geographical studies, and the numerous valuable maps and works he published left him without a rival. Among the best of his works are the "Analyse Géographique de l'Italie," "Notice de l'Antienne Gaul," "Mémoire sur l'Égypte Antienne et Moderne," "Traité des Mesures Itinéraires Anciennes et Modernes," "Orbis Veteribus Notus," and "Orbis Romanus." He published 75 treatises and 211 maps, all of which are distinguished for their accuracy and perspicuity.

D'ARBLAY, Madame (FRANCES BURNBY), was the daughter of Dr Burney, the celebrated historian of music, and may be reckoned among the most distinguished novelists of the last century; her first work, "Evelina," having created a great sensation among the literati of her time. Her other chief works were "Cecilia, or the Memoirs of an Heiress," "Camilla, or a Picture of Youth," "The Wanderer, or Female Difficulties," and "Memoirs of Dr Burney." In 1793 she was married to M. d'Arblay, a French emigrant artillery officer; and having quitted England for a short residence at Paris during the peace of 1802, their detention by Napoleon was the consequence. Her husband afterwards resumed his rank in the army of his native country; and they continued to remain in France till the peace of 1814, when they came to England, and took up their residence at Bath. In that city M. d'Arblay (then a general) died, in 1818. There also died Madame d'Arblay, Jan. 6, 1840. Her "Diary and Letters," published shortly after her death, attained considerable popularity, and is still interesting for its detailed and curious pictures of such phases of English life as the author was familiar with.

DARCOET, JEAN, a French chemist and physician, who contributed much to the progress of chemical science, was born, in 1725, at Douazit, in Guienne. He made several improvements in the manufacture of porcelain, tried the effect of fire on various minerals, and demonstrated the combustibility of the diamond. During the Reign of Terror his name was in Robespierre's list; but the interest of his friend Fourcroy saved him; and he died in 1801, a member of the Institute and of the Conversative Senate.—His son, JEAN PIERRE JOSEPH, also an ingenious practical chemist, greatly contributed to the improvement of science by a number of valuable discoveries.

DARCY, PATRICK, Count, an eminent engineer, was born at Galway, in Ireland, in 1725, and educated at Paris. He entered the French army, and rose to the rank of major-general. He distinguished himself by his mathematical works, viz., "An Essay on Artillery," "A Memoir on the Duration of the Sensation of Sight," &c. Died, 1779.

D'ARGENSOLA, LUPERCIO LEONARDO, a Spanish poet, born at Balbastro, Arragon, in 1666, was secretary of war at Naples, under the viceroy there. He was the author

of three tragedies and various poems. Died, 1618.

D'ARGENSOLA, BARTOLOMEO, brother of the preceding, was chaplain to the empress Maria of Austria, and the writer of some historical works of merit, viz., a "History of the Conquest of the Molucca Islands," "Annals of the Kingdom of Arragon," &c. Died, 1631.

D'ARGENSON, MARC RINÉ LE VOYER, Marquis, a distinguished statesman in the reign of Louis XIV. born at Venice, 1652; died, 1731. He was lieutenant-general of the police in Paris, and the first who introduced lettres-de-cachet; he was subsequently chancero; but finally retired under some disgrace to a monastery, in which he died.

D'ARGENVILLE, ANTOINE JOSEPH DEZALLIER, French naturalist and littérateur, was born in 1680, at Paris, in which city his father was a bookseller. He was one of the members of the French Academy, engaged in the compilation of the Encyclopédie, and was a corresponding associate of most of the European literary societies. He was author of treatises on "Oryctology" and "Conchology," and of an "Abrégé des Vie des plus Fameux Peintres." He died, 1766.

DARIUS I., king of Persia, was the son of Hystaspes. He entered into a conspiracy, with six others, against the usurper Smerdis, and having slain him, they agreed that he should have the crown whose horse should neigh first in the morning. By a well-concerted plan of his groom, the horse of Darius neighed immediately he came to the spot where they were to meet, in consequence of which he was saluted king. He took Babylon after a siege of twenty months, gave permission for the rebuilding of the temple of Jerusalem, and sent the captive Jews to their own country. The revolt of the Greek cities in Ionia was the occasion of the famous Persian war. The army of Darius, under the command of Mardonius, invaded Greece, but accomplished nothing. A second invasion was undertaken, and the Persians were defeated by the Greeks at Marathon; on which he resolved to carry on the war in person, but died in the midst of his preparation, B. C. 485.

DARIUS III., CODOMANNUS, last king of Persia, was raised to the throne by the eunuch Bagoas after the murder of Arses, B. C. 336. Two years later his dominions were invaded by Alexander the Great, who defeated the Persian army at the Granicus; in the following year won a great victory over Darius himself at Issus, and took his family prisoners; and finally defeated him at the battle of Arbela (Gaugamela) in 331. Darius fled through Media into the Parthian wilds, where he was seized and murdered by Besus, satrap of Bactria. His remains were treated with all honour by Alexander, and buried with his predecessors at Persepolis.

DARNLEY, HENRY, Earl of, the husband of Mary, queen of Scots, whose hand he obtained in 1565, and perished about two years afterwards, owing to the house in which he resided being blown up with gunpowder. Whether Mary was privy to this horrid

crime, or not, has but there is little illicit passion for the death of her impel her if not to accomplice in the

crime, or not, has not been clearly proved; but there is little reason to doubt that her illicit passion for Bothwell, or resentment for the death of her favourite, Rizzio, might impel her if not to instigate, at least to be an accomplice in the crime.

DARU, PIERRE ANTOINE NOEL BRUNO, peer of France, eminent as a statesman, poet, and historian, was born at Montpellier, in 1767. At the age of sixteen he entered the army, and at the breaking out of the revolution adopted its principles; but though engaged in active service, he devoted much of his time to literary pursuits. He first published a translation of the works of Horace, which, with his "Cléopâtre," or Theory of Literary Reputations, established his reputation as a poet. It was not long before Napoleon discovered his abilities, and rewarded him by various official appointments of trust, in which Daru conducted himself with zeal and ability; and at the time of the first restoration of the Bourbons he held the portfolio of the war department. Though his estate at Meulan was sequestered by Blücher, the allied monarchs soon restored it, and he was called to the Chamber of Peers by Louis XVIII. He afterwards wrote the "Vie de Sully" and the "Histoire de la République de Venise," the latter being one of the Count Daru was a member of the Institute, of the French Academy, the Academy of Sciences, and the Berlin Academy. Died, 1826.

DARWIN, ERASMUS, a poet and physician, was born at Elton, near Newark, in 1731. He was educated at Cambridge, took his doctor's degree at Edinburgh, and settled at Lichfield as a physician till 1781, when he removed to Derby, where he died in 1802. He was a man of great talent, but of remarkably eccentric opinions, as his works abundantly prove. His poetical fame rests upon his "Botanic Garden," the versification of which is highly polished but mechanical, and his work entitled "Zoonomia, or the Laws of Organic Life," which, though ingenious, is built upon the most absurd hypothesis. He also wrote "Phytologia, or the Philosophy of Agriculture and Gardening," several papers in the Philosophical Transactions, &c.

DASHKOW, EKATERINA ROMANOWA, a Russian princess, lady of honour to Catherine II., was born in 1744. She took a leading part in the revolution of 1762, by which Peter III. was deposed and Catherine placed on the throne. Some years later, on the death of her husband, to whom she had been married about 1769, she travelled through the principal countries of Europe, and gained the friendship of many distinguished men. On her return to Russia, in 1782, she was appointed president of the Academy of Arts and Sciences at St Petersburg. She suggested the founding of the Russian Academy, projected and assisted in compiling a Russian Dictionary, and employed herself in other literary pursuits in conjunction with the empress. She was deprived of her offices by the Emperor Paul, and spent the rest of her life in retirement. Died, 1810.

DASSIER, JEAN, a French medallist, who engraved a great number of medals of eminent men of the age of Louis XIV. Died, 1763.

DASSIER, JACOB ANTOINE, son of the preceding, was also a medallist, and engraved numerous medals of illustrious men, in a very superior style of workmanship, preservation. He was for some time actively employed in the mint of England, but went to St Petersburg, and died at Copenhagen, while on his return to London, in 1789.

DAUHENTON, LOUIS JEAN MARIE, a French naturalist and anatomist, was born at Montbar, Burgundy, in 1716. He was the friend and coadjutor of Buffon in his Natural History of Quadrupeds, the anatomical articles of which were prepared by him with great clearness and accuracy. He held for 50 years the office of keeper of the Cabinet of Natural History at Paris, and was for some time professor of mineralogy at the Museum of Natural History. He was author of "Instructions to Shepherds," "A Methodical View of Minerals," and other works; and at the time of his death, in 1800, was a member of the Senate and the Institute. His wife was the author of a popular novel called "Zelle dans le Désert." She died in 1824.

D'AUBIGNÉ, THEODORE AGRIPPA, French historian, was born at St Maury in Saintonge, in 1550. He was well educated, and displayed extraordinary capacity of learning at an early age. His father was a zealous Huguenot, and the son remained incorruptibly faithful to the Huguenot cause. He took part in the civil war, and entered the service of the king of Navarre (Henry IV.), but his independence and freedom of speech led to his expulsion from court; and though recalled, he was a second time exiled. In retirement at Mallezeais, of which he was made governor, in 1588, he wrote his "Histoire de son Temps," a valuable, vivid, and truthful record, which "had the honour to" be burnt by the parliament of Paris. He spent the last 10 years of his life at Geneva, and wrote many other works, both in verse and prose. Died, 1630. D'Aubigné was grandfather to Madame de Maintenon.

D'AUBUSSON, PIERRE, grand-master of the order of St John of Jerusalem, was born in 1423. He was of French origin, served in the armies of the Emperor Sigismund against the Turks, went to Rhodes, and became a knight of St John, and in 1478 was chosen grand-master. He is celebrated for his heroic and successful defence of Rhodes against the Turks, in 1480. He afterwards protected Zizim, one of the sons of Jahomet II., but was compelled to give him up to the Pope Innocent VIII. The grand-master was then made a cardinal. Grief at the failure of his projected crusade against the Turks hastened his end. Died, 1503. D'Aubusson was surnamed "buckler of the church."

DAUDIN, FRANÇOIS MARIE, French naturalist, was born at Paris, in 1774. Lameness from natural infirmity and narrow means made his life a painful struggle. He

found solace in his chosen studies and labours, in which he had the sympathy and aid of his wife. His best work is the "Histoire Naturelle des Reptiles," at the time of its appearance the most complete work on that subject. He contributed memoirs to various scientific journals. Died, in 1804, having lost his wife a few days before.

DAUJ, LEOPOLD JOSEPH MARIA, Count von, Austrian field-marshal, was born at Vienna, in 1705. He first served against the Turks under Sockendorf, became chamberlain to the Emperor Charles VI., took part under Archduke Charles in the invasion of Alsace, and at the peace was made field-marshal and privy councillor. In 1757 he gained the victory of Kolin over Frederick the Great, soon after took Breslau, and in October, 1758, defeated Frederick again at Hochkirch, for which rich gifts and flattering words were sent him from the Empress Maria Theresa, the pope, the empress of Russia, and the states of Austria. But he was out-generalled at last, and thoroughly defeated by Frederick, and wounded, at the battle of Forgan, in November, 1759. Daun was afterwards president of the Aulic Council, and died in 1766. His excessive caution in military movements procured him the designation of the new *Fabius Cunctator*.

DAUNOU, PIERRE CLAUDE FRANÇOIS, French statesman and littérateur, was born at Boulogne, in 1761. In 1789 he was professor of theology at Montmorency. He was a deputy to the National Convention, a member of the Committee of Public Safety, and of the Council of Five Hundred. He opposed the measures of the first consul, and removed from the tribunate. In 1804 he was made keeper-general of the archives, a post which he filled till 1816. He subsequently held the chair of history at the College of France, and was a member of the Chamber of Deputies. In 1839 he was raised to the peerage. Among his numerous works are: "Eloge de Bolleau," "Essai Historique sur la Puissance Temporelle des Papes," "Cours d'histoire fait au Collège de France," &c. Died, 1840.

DAVENANT, SIR WILLIAM, an English poet, was born at Oxford, in 1605, and there educated. After having been in the service of the duchess of Richmond and Lord Brooke, he began to write for the stage; and upon the death of Ben Jonson, he was created poet-laureate. During the civil wars he fought for the king, was made a lieutenant-general, and received the honour of knighthood. On the decline of the royal cause he went to France, and formed a design for carrying over a number of artificers to Virginia; but his ship was taken by a vessel belonging to the parliament, and brought to England, where an ignominious death would have awaited him, had it not been for the intercession of Milton; an act of kindness which he afterwards returned. On the restoration of Charles II., he obtained a patent for a theatre in Lincoln's Inn Fields. He died in 1668, and was interred in Westminster Abbey. His works consist of plays and poems, which are now forgotten. It was Sir William Davenant who took part with

Dryden in making an *improved* (1) version of Shakspeare's "Tempest" for the stage, which version was adopted and held its ground till our own time. It is worth while to add that John Davenant, the father of Sir William, was host of the Crown Inn, Oxford, and that Shakspeare used to lodge there on his journeys between Stratford and London.

DAVID I., king of Scotland, succeeded his brother, Alexander the Fierce, in 1124. He married Maud, grand-niece of William the Conqueror; and was earl of Northumberland and Huntingdon when called to the Scottish throne. On the death of Henry I., king of England, he maintained the claim of his daughter Maud against King Stephen, and seized Carlisle, but was defeated at the battle of Northallerton in 1138. A negotiation was entered into the following year, by which Carlisle was suffered to remain in the possession of David. He died there in 1153.

DAVID II. (Bruce), king of Scotland, was the son and successor of Robert Bruce, at whose death, in 1328, he was only five years old. On the invasion of Scotland by Ballol, David was sent to France; but his party prevailed, after a bloody contest, and he returned home in 1342. He made several inroads on England, but was taken prisoner at the battle of Nevill's Cross, 1346, conveyed to the Tower, and did not recover his liberty till 1357, on paying a heavy ransom. Died, 1371.

DAVID, FRANÇOIS ANNE, an eminent French engraver, who published many illustrated works, among them "Histoire de France," "Histoire de France, sous le Règne de Napoléon le Grand," "Monumens inédits de l'Antiquité," "Antiquités d'Herculanum," &c. Died, 1824.

DAVID, JACQUES LOUIS, a celebrated French painter, was born at Paris in 1748, and was a pupil of Vien. In 1775 he went to Rome, where his talent for historical painting was quickly developed. On his return to Paris he was received at the Academy, and in 1783 was appointed painter to the king. At the outbreak of the revolution in 1789, David was carried away with the general excitement, and went the greatest lengths with the extreme parties. He joined the Jacobin Club, was deputy to the Convention, sat with the Mountain; and appears to have fancied a similarity between Colot d'Herbois and Marius—between Phocion and Robespierre. He presented paintings of republican heroism to the National Assembly; he depleted, in a funeral oration, the patriotic death of Marat; avowed his destiny as for ever joined with Robespierre; voted for the death of Louis XVI. and for the civic festival in honour of the goddess of Liberty, for some of the details of which he supplied designs. In the sudden changes, however, which at that time took place, he was committed to the Luxembourg, and only escaped the guillotine from the celebrity he had gained as an artist. David exercised considerable influence over the measures adopted under the empire for the cultivation of the fine arts. On the restoration of the Bourbons he was banished from France, and died at Brussels in 1825. His

best paintings are, the Oath of the Horatii, Napoleon presenting Eagles to the Troop Venus and the Graces of Napoleon. David formed on a fastidious classic models of Greek statue-like tenuity and elegance of form, taste and design, but vitality which forms English school. The painter in his own day but it has not proved

DAVID (of Angers), a French sculptor, born in 1759. From his early predilection for art; many studies were made, where he found favour the great painter, who, at the Tuilleries, and his studies were regulated, "The Death of him the first prize School of Arts, and, also to finish his artistic education, he became member professor at the School went to Welmar, where the bust, which, executed a place, since 1831 Library at Welmar. In second tour through Germany, at Munich, Seitz—and at Berlin, in 1837 he was busy with the Pantheon, the great works monuments of the great almost innumerable. ber of the Constituent Assembly author he is to be named "Memoirs of Barrère."

DAVIDSON, JOHN, a native of Dublin, apprenticed to Messrs chemists, and became a painter but his inclination for trade quit the business in 1810 period up to the time of almost constantly engaged in regions. He visited America, India, Egypt, Greece, Italy, France, enriching his mind with imparting it to the public the last expedition was to Africa. Whilst attending the far-famed city of Timbuctoo 25 days' journey from it confines of the district robbed and murdered by a of El Harib, Dec. 18, 1836

DAVIES, SIR JOHN, an English judge, born in 1570, was shire, and studied at Queen's College, Oxford; from whence he received the Temple, and was called to the bar. He was the accession of James I. a knight and appointed attorney-general for Ireland made chief justice of the court died during the same year

best paintings are, the Rape of the Sabines, the Oath of the Horatii, the Death of Socrates, Napoleon presenting the Imperial Eagles to the Troops, Mars disarmed by Venus and the Graces, and the Coronation of Napoleon. David's style of painting, formed on a fastidious imitation of the classic models of Greece, has a cold and statue-like tameness in the midst of striking elegance of form, and accuracy of costume and design, being deficient in that vitality which forms the *beau idéal* of the English school. The reputation of this painter in his own day was extraordinary, but it has not proved permanent.

DAVID (of Angers), JEAN PIERRE, a celebrated French sculptor, was born at Angers in 1789. From his earliest years he showed a predilection for art; and, after his preliminary studies were finished, he came to Paris, where he found favour with his namesake, the great painter, who was then all-powerful at the Tuilleries, and by whose counsels his studies were regulated. In 1811 his relief, "The Death of Epaminondas," won him the first prize for sculpture in the School of Arts, and, along with it, a pension to finish his artistic education in Italy. In 1826 he became member of the Institute and professor at the School of Arts; in 1828 he went to Weimar, where he modelled Goethe's bust, which, executed in marble, has found a place, since 1831, in the Grand-Ducal Library at Weimar. In 1834 he made his second tour through Germany, modelling on his way, at Munich, Schelling—at Dresden, Tieck—and at Berlin, Rauch. From 1835 to 1837 he was busy with his sculptures for the Pantheon, the great work of his life. His monuments of the great men of France are almost innumerable. In 1848 he was member of the Constituent Assembly; and as an author he is to be named as co-editor of the "Mémoires de Barrère." Died, 1856.

DAVIDSON, JOHN, a celebrated traveller, was a native of Dublin. In 1814 he was apprenticed to Messrs Savory and Moore, chemists, and became a partner in that firm; but his inclination for travel induced him to quit the business in 1826; and from that period up to the time of his death, he was almost constantly engaged in exploring distant regions. He visited North and South America, India, Egypt, Syria, Palestine, Greece, Italy, France, and Germany; enriching his mind with information, and imparting it to the public in his lectures. His last expedition was to Africa, and it proved a fatal one. Whilst attempting to reach the far-famed city of Timbuctoo, and when about 25 days' journey from it (near the southern confines of the district of Egueda), he was robbed and murdered by a party of the tribe of El Harib, Dec. 18, 1836.

DAVIES, Sir JOHN, an English poet and judge, born in 1570, was a native of Wiltshire, and studied at Queen's College, Oxford; from whence he removed to the Middle Temple, and was called to the bar. On the accession of James I. he was created a knight and appointed to the office of attorney-general for Ireland. In 1626 he was made chief justice of the King's Bench, but died during the same year. His principal

poem, entitled "Noseo Tolpsum," has considerable merit, and his work on the state of Ireland contains many sound political arguments and reflections.

DAVIES, Dr JOHN, a learned Welsh divine; author of a grammar of the Welsh language, and a dictionary, Welsh and Latin. Died, 1644.

DAVIES, ROBERT, a modern bard of Wales, and one whose knowledge and love of Cambrian literature were never exceeded, died at Nantglyn, near Denbigh, on New-year's Day, 1836, aged 66. He gained numerous medals and premiums, at the different Eisteddfodau, for his Welsh effusions on popular and patriotic subjects; and was also the author of an excellent "Welsh Grammar," &c. Among the admirers of the ancient British language, Mr Davies was known by the bardic appellation of *Bard Nantglyn*.

DAVIES, WALTER, vicar of Llan-rhadr, one of the Cambrian parishes, to whom the principally was indebted for a new development of old British literature, and at the same time, of the national life and spirit of the Welsh people; was born at Wern, in the parish of Llan-y-Meehaln, in 1761. Though born of poor parents, he could trace his origin through a long line of illustrious ancestors. At the age of 11, he was teacher in a rural school; and afterwards matriculated at All Saints, Oxford. Among his countrymen, he ranks with their most distinguished bards, ancient or modern; and besides innumerable minor prose contributions to various Welsh journals, illustrative of the history, topography, and language of his native country, he wrote "A General View of the Agriculture and Domestic Economy of North Wales and South Wales," published by order of the Board of Agriculture, four volumes, 1810—1818; a work full of shrewd observation, lively description, and excellent practical advice; and published an edition of *Haw Morus* and of *Lewis Glyn Cothl*, a historical poet of the 16th century. Died, 1849.

DAVILA, HENRICO CATERINO, an eminent historian, was born in the territory of Pnduu, in 1576; and being brought up in France, served with reputation in the French army. On his return to his native country, he held several high offices under the Venetian government; but in 1631, while on his journey to take the command of the garrison at Crema, he was assassinated. He wrote "The History of the Civil Wars of France," a work which still ranks among the best Italian productions.

DAVIS, JOHN, an eminent navigator, was born near Dartmouth in Devonshire, and went to sea at an early age. In 1585 he was sent out with two vessels to find a north-west passage, when he discovered the straits which still bear his name. He afterwards explored the coasts of Greenland and Iceland, proceeding as far as latitude 73° N. In 1591 he went, as second in command, with Cavendish, in his unfortunate voyage to the South Seas. After this he made five voyages to the East Indies, in the last of which he was killed in an engagement with some Japanese pirates off the coast of Malacca,

tured the Macedonian, English frigate, a vessel of inferior class to his own, after an engagement of an hour and a half. In 1815 he endeavoured to elude the vigilance of the British squadron blockading New York, but was captured after a running fight of two hours and a half. He lost his life in a duel with Commodore Barron, in 1820.

DECEBALUS, king of the Dacians, who fought against the Romans in the reign of Domitian. He entered the province of Mœsia, defeated and slew Oppius Sabinus, the Roman commander, and took a number of places. Afterwards he was defeated himself, but still resisted till Domitian agreed to pay him a yearly tribute, which was continued by Nerva, but refused by Trajan, who subdued Dacia, on which Decebalus killed himself, A. D. 105.

DECIUS MUS, P., a valiant Roman, who served as military tribune under the consul Cornelius Cossus, B. C. 343, and when the army was in danger of being cut off by the Samnites, he volunteered his services with his party, and completely routed them. Two years afterwards he was chosen consul with Manlius Torquatus, at which time the Romans were at war with the Latins. On this occasion it was agreed between the two consuls, that he whose army first receded from the enemy should devote himself for the good of his country. The division under Decius being hard pressed, gave way, on which he stripped himself of his military habit, and, rushing into the midst of the enemy, was slain. The army under Manlius then gained a terrible victory, and the body of Decius was buried with military honours.

DECIUS MUS, P., the son of the above, was consul four times, and also censor. Being engaged, in his last consulship, B. C. 295, against the Gauls, and victory dubious, he imitated his father by devoting himself, and was slain, after which the Romans defeated the enemy with great slaughter.

DECIUS, Roman emperor, was born in Pannonia, and succeeded Philippus, whom he defeated, in 249. He distinguished himself by an expedition against the Goths, and by persecuting the Christians. In his march against the Goths he entered a morass, where he and his army perished by the attack of the enemy, in 251.

DECKER, THOMAS, an English dramatist of the 17th century. He was contemporary with Ben Jonson, who satirized him in his *Poetaster*, under the name of Crispinus, but Decker retorted in his *Satyromastix*. He wrote several plays, and contributed portions to many works of other dramatists. Decker was also author of a curious work entitled, "Gull's Hornbook."

DEE, JOHN, mathematician and astrologer, was born at London in 1527, and educated at St John's College, Cambridge. In the reign of Mary he was imprisoned on a suspicion of devoting himself to the "black art;" but was in great favour with Queen Elizabeth, who is said to have paid him a salary, to have employed him on secret political missions, and to have visited him at Mortlake, where he had collected a library. In 1581 he and Edward Kelly com-

menced their magical operations, which lasted two years, and in which they were joined by a Polish nobleman called Laski, who persuaded them to go to Poland, where they remained some time. The two worthies at length quarrelled, and their adventures abroad made so much noise, that Dec thought it prudent to return to England. In 1596 he was made warden of Manchester College, and died in 1608. He published several mathematical works in Latin and English, and wrote many more which were never printed.

DEFFAND, MARIE DE VICHY CHAMROUD, Marquise du, who for many years was a conspicuous character among the French literati of the age of Louis XV., was born in 1697. She married early the Marquis du Defand, a man much older than herself, but was soon separated from him, and gave herself up to a life of levity and immorality. Few women possessed more natural talent, and her abode was regarded as the rendezvous of wit and genius; but the laxity of her morals formed a sad contrast to the superiority of her intellectual powers. Among the correspondents of Madame du Defand were Voltaire, D'Alembert, Montesquieu, Horace Walpole, &c. Her correspondence throws much light on the times she lived in, and has been several times republished. She lost her sight in her old age, without losing her liveliness. Died, 1780.

DEFOE, DANIEL, a celebrated political and miscellaneous writer, author of "Robinson Crusoe," was born at London in 1663. He took an eager interest in politics, and began his career as author at the age of nineteen. His attempts in business were unsuccessful, and he gave himself up entirely to authorship. As a zealous Whig and Dissenter he was frequently in trouble on account of his writings; and for his clever piece of irony, entitled "The Shortest Way with the Dissenters," the drift of which was mistaken by both Churchmen and Dissenters, he was arrested, set in the pillory, and imprisoned. The book was ordered by the House of Commons to be burnt. It was during his imprisonment that he wrote his "Hymn to the Pillory." Released in 1704, he began the publication of "The Review," which he continued for nine years. He was sent by the government in 1706 to Scotland, to prepare the way for the union. After his return he suffered a second imprisonment on account of some of his political pamphlets. His health being seriously injured by harassing political warfare and persecutions, he found it necessary to choose a less exciting employment for his pen, and during the latter years of his life he published the works of fiction by which he is now best known. "Robinson Crusoe" appeared in 1719, and obtained immediately the popularity which it has never lost. He added a second and a third part to the story. This famous book had been preceded by the "Family Instructor," and "Religious Courtship," and was followed by the "Adventures of Captain Singleton," "Fortunes of Moll Flanders," "History of the Plague," and a host of other works. Defoe took part

time, but applied himself afterwards to historical painting under Baron Gros. His first picture was exhibited in 1822, the same year in which Delacroix made his debut. He held from the first a middle place between the classical and the romantic schools, and was called the "Grondin" of art. Among his early works were his "Joan of Arc," and "St Vincent de Paul." Some of his noblest works are taken from scenes in English history among them are "Cromwell contemplating the dead body of Charles I.," the "Children of Edward IV.," "Stratford on his way to Execution," and the "Death of Lady Jane Grey." In these are dominant sadness, his fine sense of dignity, and his marvelous technical skill. His "Death of the President Durnant," "Cardinal Richelieu with Clug-Mars and De Thou," "Assassination of the Duke of Guise," "St Cecilia," "Napoleon at Fontenoy," "Marie Antoinette after her Execution," and "The Glorindus," are esteemed masterpieces. In 1837 he was intrusted with the execution of "Les Beaux-Arts," which was completed in 1841. In 1845 he suffered bitterly and profoundly from the loss of his wife, Louise, daughter of Horace Veruet, whom he had married at Rome ten years previously. Her exquisite beauty is portrayed in his "Head of an Angel." In his latest years he chiefly devoted himself to religious painting, and among the last of his works are "Christ at Gethsemane," "Christ on the Cross," "The Young Martyr," and a series of small pictures on the Passion. After a life of most faithful study and incessant work, much sorrow and victorious faith, this great artist died at Paris in November, 1856. He was a member of the Institute, and of the Legion of Honour.

DELAUNEY, EMMANUEL LOUIS HENRI, Count d'ANTRAIGUES, a distinguished political agent during the revolutionary era of France. He set out as an enthusiast for reform, and published in 1788 a Memoir on the States-General, which excited great attention. Elected deputy the following year, he became an opponent of reform, and a supporter of the royal prerogatives. In 1790 he emigrated, and in 1797 he was employed in the service of Russia. While thus engaged at Vealce, he was arrested by the agents of France, and thrown into prison, from which he made his escape by the help of Madame de Hebert, a celebrated actress, whom he afterwards married. In 1806 he was sent on a mission to England by the emperor of Russia, and he was often in communication with the English government. He resided at Baras, Surrey, and was there assassinated by his Italian servant, Lorenzo in the following manner:— he was about to step into his carriage to go to London with his wife, on the 3rd of July, 1812, Lorenzo fired a pistol at the count, which slightly grazed his hair; but perceiving he had missed his aim, the fellow rushed into the house, and returned with a pistol in one hand and a dagger in the other, with which he stabbed the count and his wife, who expired almost instantaneously. He then ran into

the house again, and blew his own brains out. It appears that the Count d'Antraignes carried on secret communications with the Bourbons, and that his servant had betrayed some of them to emissaries of Napoleon. It is conjectured that dread of the discovery of his treachery may have turned his brain, and driven him to the murder.

DELAVIGNE, JEAN FRANÇOIS CASIMIR, French poet and dramatist, born at Havre in 1794. He held a subordinate government office till the restoration of the Bourbons, when he lost it, but he was appointed librarian of the Chancery, a sinecure post. He was received at the French Academy in 1825, and after the revolution of July, 1830, was named librarian to Louis Philippe. His principal works are the poems entitled "Messénienes;" the "Vèpres Siciliennes," a tragedy; "Les Comédiens," a comedy; "Louis XI.," a tragedy; and "L'École des Vieillardes." He wrote a song at the revolution of July, "Le Parleuse," which was immensely popular for the time. Died at Lyons, 1843.

DELECLUSE, [CLUSIUS.]

DELFICO, MELCHIORRE, Neapolitan statesman and miscellaneous writer, was born in 1744. He contributed to various commercial and administrative reforms in his country; was councillor of state during the reign of Joseph Buonaparte, and afterwards president of the Commission of the Archives. Among his works are a "History of the Republic of San Marino;" "Researches on the true Character of Roman Jurisprudence;" "Essay on Marriage;" "On the Ancient Coins of Atrium Picenum," &c. Died at Teramo, his native town, in 1835.

DEILLE, JACQUES, a French poet, was born at Alençon, in 1738. His translation of Virgil's Georgics, in 1769, established his fame, and obtained him admission to the French Academy; and though a royalist, his poetical genius insured him the respect even of Robespierre. He was professor of Latin poetry at the college of France, and of the belles lettres at the university of Paris; but in 1794 he withdrew from France, though he returned again in 1801, and was chosen a member of the Institute. He again, however, emigrated; and it was in London that he translated the "Paradise Lost" of our own divine poet. After his final return to his own country he wrote his admired poem, "La Conversation," became blind, and died in 1813. Besides the poems already mentioned, the most prominent of his productions are "L'Homme des Champs," "Les Trois Règnes," and "La Pitié." Without possessing exquisite genius, he was excelled by none in exquisite versification, purity of moral sentiment, or true pathos.

DELSLE, CLAUDE, a French historian, was born at Vaucouleurs, in 1644, and died in 1720. His works are, "Relation Historique du Royaume de Siam;" "Abridgement of the Universal History," 7 vols.; and a "Genealogical and Historical Atlas."—**GUILLAUME,** son of the preceding, was born at Paris, in 1675. After publishing some admirable maps and globes, he was admitted to the Academy of Sciences, and soon after was appointed geographer to the king, to

whom he had the honour of giving lessons in that science. Died, 1726.—**LOUIS**, brother of the preceding, an able astronomer and geographer, made several journeys on the coast of the frozen ocean, to determine the situation of various places in the countries lying nearest to the north pole; after which he traversed Siberia, and in 1741 went alone to Kamtschatka, with the same object, but died the same year.—**JOSEPH NICHOLAS**, the youngest and most celebrated of the three brothers, was born at Paris, in 1688; visited England, where he formed an acquaintance with Newton and Halley; and in 1728 was appointed astronomer-royal at Petersburg, where he resided twenty-one years, during which he published "Memoirs illustrative of the History of Astronomy," 2 vols. 4to, and an atlas of Russia. On his return to Paris, in 1747, he was appointed professor of mathematics in the Royal College. Died, 1768.

DELSILE DE SALES, whose real name was **JEAN BAPTISTE ISOARD**, a French miscellaneous writer, was born at Lyons in 1718. He was the author of "La Philosophie de la Nature," which being denounced as immoral and irreligious, he was tried and imprisoned, thereby acquiring a temporary celebrity. He afterwards wrote romances, histories, and other works; was imprisoned during the Reign of Terror; subsequently became a member of the Institute, and died in 1816.

DELOLME, JEAN LOUIS, a native of Geneva, was born in 1740, and bred to the practice of the law; but, taking an active part in the political events of his country, he was obliged to go to England, where he became known by his once celebrated but superficial work on the "Constitution of England." He also wrote a "History of the Flagellants;" and, returning to Switzerland in 1775, died there in 1806.

DELOIRME, PHILIBERT, French architect, was born at Lyon, about 1518. He studied three years at Rome, and after acquiring some reputation by works in his native city, was called to Paris through the influence of Cardinal Du Bellay, and made a manner to the king. Various works were intrusted to him, and in 1564 he was appointed by Catherine de Medici one of the architects of the Tuileries. He was assisted in some of his undertakings by his brother, Jean Delorme. He left several treatises on architecture. Died, 1577.

DELUC, JEAN ANDRÉ, geologist and natural philosopher, was born at Geneva in 1727. He was early attracted to the study of geology, and made scientific visits to the Alps and Apennines in company with his brother. About 1771 he settled in England, and was appointed reader to Queen Charlotte. He spent several years subsequently in travels on the continent, made some valuable discoveries in science, improved the barometer, and was admitted to the Royal Society of London and the Institute of France. His works are numerous. The most important are: "Recherches sur les Modifications de l'Atmosphère," "Lettres physiques et morales sur l'Histoire de la Terre et de l'Homme," and "Geological Tra-

vels in the North of Europe and in England." He wrote a Précis of the philosophy of Bacon, and a great number of separate memoirs and dissertations. Died at Windsor, 1817.

DEMARATUS, king of Sparta, who accused Cleomenes before the ephori as the disturber of Greece, for which Cleomenes retorted upon Demaratus the charge of illegitimacy, and having bribed the priests of Delphi, the oracle, when consulted, confirmed the charge. Demaratus then resigned the crown, B. C. 491, entered into the Persian service, and was entertained by Darius and Xerxes.

DEMETRIUS, surnamed **POLIORCTES**, king of Macedoia, was the son of Antigonus. At the age of twenty-two his father intrusted him with an army against Ptolemy, by whom he was defeated near Gaza. But he soon repaired the loss, and with a fleet of 250 ships sailed to Athens, which he delivered from Demetrius Phalereus. He next took part in the war against Ptolemy, whose fleet he destroyed. In B. C. 305 Demetrius undertook the siege of Rhodes, constructed huge machines for the assault, but after persevering for a year was compelled to relinquish the attempt. He afterwards defeated Cassander at Thermopylæ; but was called to aid Antigonus against Seleucus and Lysimachus, in Asia. The two armies met at Ipsus, B. C. 301; and after an obstinate battle, the army of Demetrius was defeated, and his father slain, but he himself fled to Ephesus. He, however, mustered a new army, and in B. C. 295 relieved Athens from the tyranny under which it groaned. He then slew Alexander, the son of Cassander, and seated himself on the throne of Macedoia. At the end of seven years, during which he was constantly at war, he was obliged to quit his dominions and retire into Asia, where he was reduced to great distress, on which he went to the court of Seleucus, his son-in-law; but a difference breaking out between them, war ensued, and Demetrius was defeated. Deserted by his soldiers, he surrendered himself at length to his son-in-law, who exiled him to Pella, in Syria, where he died, B. C. 233.

DEMETRIUS I., king of Syria, surnamed **SOTER**, was the son of Seleucus Philopator. He was sent hostage to Rome by his father, on whose death Antiochus Epiphanes, and after him his son, Antiochus Eupator, the one the uncle, and the other the cousin of Demetrius, usurped the throne of Syria. He applied to the Roman senate for assistance to recover his rights, but in vain. The Syrians, however, recognized him for their lawful prince, and at last he obtained the throne, B. C. 162. He then declared war against the Jews, and in this war Judas Maccabæus lost his life, bravely fighting for the liberties of his country. A confederacy of the neighbouring kings was formed against Demetrius, who was slain B. C. 150.

DEMETRIUS II., called **Nicator** (conqueror), was the son of the preceding. Ptolemy Philometor, king of Egypt, placed him on the throne of his father, after expelling the usurper, Alexander Balas, B. C. 146. He married Cleopatra, the wife of the same Alexander, and daughter of Ptolemy. He

was subsequently taken prisoner by Parthia, who gave him in marriage, which so soon after he who married Antiochus in-law. Sidetes, however, Demetrius recovered, but did not retain it long, for he was expelled by Alexander, the son of the governor of Tarsus. **DEMETRIUS PHALEREUS**, a Greek orator and statesman. He favoured the Macedonian office of government under Alexander for ten years, and so charmed with his excellent administration to his honour. His government in B. C. 307, when he restored the democratical representation of Ptolemy Lagus, king of Egypt, his son banished him from Athens. Demetrius is said to have been born, about 283 B. C. His works, which are lost, and which are much to be regretted, were found in Andria.

DEMETRIUS, czar of Russia, called the *false* DEMETRIUS, to most historians, a name which he and a novice in a monastic order, tutored by a monk to son of the Czar John, had been murdered by Boris, learned his tale he was embraced the Roman Catholicism, married the daughter of the czar. In 1604 Demetrius, the head of a small army, a number of Russians, and defeated an army sent by the death of Boris, the people, and placed Demetrius on the throne, his partiality to the Greek religion, occasioned, and he was assassinated about 11 months after.

DEMOCEDES, a Greek, with his family became a citizen of Athens, B. C. 622, and where he worked with his hands, happening to cure Darius, he was rewarded, and admitted to the citizenship. He returned to his own country, and married the daughter of the king.

DEMOCRITUS, one of the Greek philosophers, was born at Abdera, B. C. 460. Xerxes was his father's house, and he was several magi there to the death of his father, a citizen, Democritus of Chalcidæ, and other countries, enlarging his stores when he returned to his native place, at first slighted, his intellect gained the highest respect. He had spent his inheritance but instead of seeking wealth and honours, he retired to his native place, and devoted himself wholly to philosophy. His system he developed in his system he developed the atomical theory of his time, and applied it not only

was subsequently taken prisoner by the king of Parthia, who gave him his daughter in marriage, which so incensed Cleopatra, that she married Antiochus Sidetes, her brother-in-law. Sidetes, however, fell in battle, and Demetrius recovered his throne; but he did not retain it long, for he was once more expelled by Alexander Zehina, and was killed by the governor of Tyre, B. C. 125.

DEMETRIUS PHALEREUS, a celebrated Greek orator and statesman, born B. C. 345. He favoured the Macedonian party, and held the office of governor of Athens under Cassander for ten years. The Athenians were so charmed with his eloquence and his excellent administration, as to erect 380 statues to his honour. His government terminated in B. C. 307, when Demetrius Poliorcetes restored the democratic form, and the Macedonian representative retired to the court of Ptolemy Lagus, king of Egypt, whose son banished him from his dominions. Demetrius is said to have died by the bite of an asp, about 283 B. C. He wrote many works which are lost, and is said to have done much towards founding the library of Alexandria.

DEMETRIUS, czar of Russia, commonly called the *false* DEMETRIUS, was, according to most historians, a native of Jaroslaw, and a novice in a monastery, where he was tutored by a monk to personate Demetrius, son of the Czar John Basolowitz, who had been murdered by Boris Gudenow. Having learnt his tale he went into Lithuania, embraced the Roman Catholic religion, and married the daughter of the palatino Sendomir. In 1604 Demetrius entered Russia at the head of a small army, was joined by a number of Russians and Cossacks, and defeated an army sent against him. On the death of Boris, the people strangled his son, and placed Demetrius on the throne; but his partiality to the Poles, and contempt of the Greek religion, occasioned an insurrection, and he was assassinated in 1606, after reigning about 11 months.

DEMOCEDES, a Greek physician, who with his family became captives to the Persians, B. C. 522, and were carried to Susa, where he worked with the slaves. But happening to cure Darius, he was liberally rewarded, and admitted to the royal table. He returned to his own country, and married the daughter of the wrestler Milo.

DEMOCRITUS, one of the most celebrated Greek philosophers, was born at Abdera, B. C. 460. Xerxes was once entertained in his father's house, and is said to have left several magicians to be his teachers. On the death of his father, who was a wealthy citizen, Democritus travelled to Egypt, Chaldea, and other countries, for the sake of enlarging his stores of knowledge; and when he returned to his native city, though at first slighted, his intellectual acquisitions gained the highest respect of his countrymen. He had spent his inheritance in his travels, but instead of seeking public employment and honours, he retired to solitude, devoting himself wholly to philosophical studies. In his system he developed still further the atomical theory of his master Leucippus, and applied it not only to the formation of

the universe, but to the soul of man, the senses, the elements, &c. He was also a practical philosopher and a moralist, his grand axiom being, that the greatest good consists in a tranquil mind. He has been called the "laughing philosopher" (in contrast to the weeping Hieronitus), which epithet probably originated in his practice of humorously exposing the absurdities of his countrymen, whose stupidity was proverbial. He wrote numerous works, but none of them are extant, and he lived to the great age of 105.

DEMOIVRE, ABRAHAM, born at Vitry, in Champagne, in 1677, was driven from his native country by the revocation of the edict of Nantes, and settled in England, where he obtained a livelihood by his skill in teaching the mathematics. He was undoubtedly one of the first calculators that ever existed; and published "The Doctrine of Chances," "Miscellanea Analytica," &c. Died, 1754.

DEMOSTHENES, the greatest orator of antiquity, was the son of an opulent sword-blade manufacturer at Athens, and was born about 385 B. C. Having lost his father when a mere child, his education was neglected; but at the age of 17 he determined to study eloquence, though his lungs were weak, his pronunciation inarticulate, and his gestures awkward. These impediments he conquered by perseverance, till by degrees he surpassed all other orators in the power and grace of eloquence. When the encroachments of Philip of Macedonia alarmed the Greek states, he depicted his ambitious design with so much effect, that similar orations are to this day called *Philippics*. When that monarch was about to invade Attica, Demosthenes was sent as ambassador to prevail on the Boeotians to assist them, in which mission he succeeded. He was also at the battle of Cheronæa, but his conduct there showed that he was as deficient in personal courage as he was inimitable in the senate. The influence of Demosthenes being on the decline, Aeschines took advantage of it to bring an accusation against him on the subject of his conduct at Cheronæa, and his having had a crown of gold awarded him; but the orator so well defended himself in his celebrated oration *De Corona*, that he was honourably acquitted, and his adversary sent into exile. Shortly after, however, Demosthenes was convicted of receiving a golden cup and 20 talents from Harpalus, one of Alexander's generals, who had retired to Athens with a quantity of plunder, which he had gathered in Asia. To avoid punishment, he fled to Aegina, where he remained till the death of Alexander, when he was recalled by his countrymen, and brought home in triumph. But this change of fortune was of short duration. The victory of Antipater was followed by an order to the Athenians to deliver up Demosthenes, who fled to the temple of Neptune, at Calauria, where he poisoned himself, B. C. 322. The speeches of Demosthenes were natural, concise, vigorous, and logical: he was by turns calm, vehement, or elevated, as the case required; in energy and power of persuasion, in beauty and

vigour of expression, and language at once strong and melodious, he surpassed all his predecessors.

DEMOSTHENES, an Athenian general, who commanded several expeditions during the Peloponnesian war. His most famous exploit was the fortification and defence of Pylos, B. C. 425. He assisted Cleon in the attack on the Spartans in Sphacteria. In 413 he commanded the reinforcements sent to Nicias in Sicily; planned the night attack on Epipolæ; but was defeated and afterwards put to death by the Syracusans.

DEMOUSTIER, CHARLES ALBERT, a French dramatist, descended by the father's side from Racine, and by the mother's from La Fontaine. He was born in 1760, and died in 1801. Among his works are "Le Siège de Cythère," a poem, and many successful comedies.

DEMPSTER, THOMAS, a learned Scotch writer, was born in 1679, and studied at Cambridge, from whence he removed to Paris. He led a very restless life, teaching in succession at Paris, Toulouse, Nismes, and Pisa, and died at Bologna in 1625. He wrote several works, the most important of which are his "Etruria Regalis," not published till 1723; and his "Historia Ecclesiastica Gentis Scotorum." The latter was republished in 1826.

DENHAM, Lieut.-col. DIXON, an enterprising traveller and intrepid soldier, was born in 1786, and entered the army as a volunteer in 1811, serving with honour in the Peninsular war, where he obtained a lieutenancy. In 1821 he was chosen to proceed to Central Africa, in company with Captain Clapperton and Dr Oudney, for the purpose of exploring those regions; his courage, perseverance, address, and conciliatory manners peculiarly fitting him for such an undertaking. On his return to England, in 1821, he published a "Narrative" of his travels. In 1826 he was sent to Sierra Leone as superintendent of the liberated Africans, and in 1828 was appointed lieutenant-governor of the colony; soon after which he was seized with a fever, which quickly proved fatal.

DENHAM, Sir JOHN, an English poet, was born in 1615, at Dublin, where his father was chief baron of the exchequer, but afterwards became a judge in England. In 1641 appeared his tragedy of "The Sophy," and soon after he was made governor of Feham Castle for the king. In 1643 he published his "Cooper's Hill." He attended Charles II. in his exile, and was sent by him ambassador to Poland. At the restoration he was knighted and appointed surveyor-general of the royal buildings. Died, 1668.

DENINA, CARLO GIOVANNI MARIA, an Italian historian, was born in 1731, at Revello, in Piedmont. For many years he was professor of rhetoric at Turin, and ultimately became librarian to Napoleon. His principal works are "History of the Revolutions of Italy," "The Revolutions of Germany," "The Progress of Literature," &c. He died at Paris, in 1813.

DENMAN, THOMAS, Right Hon. Lord, the son of Dr Thomas Denman, a physician of some eminence in the metropolis, was born in London in 1779. At an early age he was

sent to Paigrove School, near Diss, in Norfolk, which was then under the management of Mr and Mrs Barbauld. He completed his education at St John's College, Cambridge, where he obtained the degree of M.A. In 1806 he was called to the bar at Lincoln's Inn, and engaged in the active pursuit of the law. He entered parliament for the borough of Wareham at the general election of 1818, and at once took his seat with the Whig opposition. In the following year he was elected for Nottingham, for which place he continued to sit, until his promotion to the bench in 1832. His first speech in parliament was in favour of certain reforms in the law, but it was not until 1820 that the extraordinary occasion of the queen's trial called forth all his energy, and placed him in a more conspicuous position before the country. When Queen Caroline formed the determination of coming to this country upon the accession of her husband to the throne, Mr Brougham at once accepted the office of her Majesty's attorney-general, while that of solicitor-general was filled by Mr Denman. The part taken by Mr Denman in that memorable trial gave the public a high idea of his courage and uprightness, and contributed in no slight degree to its successful result. Mr Denman was appointed to the office of common sergeant by the corporation of London in 1822, probably as a mark of their sympathy for the legal defenders of the queen, in whose affairs Alderman Wood had taken so active a part. It was not until 1828, when Lord Lyndhurst first held the great seal, that the king was induced to grant the patent of precedence to which Mr Denman had long been entitled. In 1830, upon the formation of Lord Grey's government, Sir Thomas Denman was raised to the post of attorney-general, which he held during the debates on the Reform Bill. In 1832, however, upon the death of Lord Tentenden, he was appointed to the chief-justiceship of the court of Queen's Bench, which he held till 1850, having been raised to the peerage in 1834. While not reckoned very eminent in the technical scholarship of his profession, and possessed perhaps of too much fervour of temperament for strictly judicial functions, his abilities, industry, and conscientiousness made him respected, while the dignity and grace which so remarkably adorned both mind and demeanour made him beloved. As a politician, his life from his youth upwards was beyond impeachment, and almost beyond parallel, for purity, courage, and consistency. Died, 1854.

DENMAN, Dr THOMAS, an eminent physician and medical writer, was born at Baxwell, Derbyshire, in 1733. He first served in the navy as a surgeon, and having obtained much experience, on quitting it he commenced practice in London, where he attained great professional celebrity. In 1770 he commenced giving lectures on the obstetric art, and was appointed licentiate in midwifery of the College of Physicians in 1783. He wrote an "Essay on Puerperal Fever," an "Introduction to the Practice of Midwifery," and "Aphorisms" for the use of junior practitioners. His son was the

distinguished chief of Queen's Bench. I

DENNIS, JOHN, born in London, a bridge, and devoted Throughout life he in broils with one age; and Pope, in sions, gave him a Duciad. He orig fortune; but havin of Marlborough ob of land-waiter at t he mortgaged, and in poverty, aggravated 1734.

DENON, DOMIN was born, in 1747, Burgundy. Though the law, he was a "gentilhomme ordina Louis XV. He after years in Italy, as seen which period he ap to the study of the ar as to pass through th out incurring the d meral rulers; and h tice of Buonaparte, l Egypt in 1798, altern the pencil, and the s Paris he was appoin the museums, and h of the medallic min executed in honour o After the abdication tained his office, but 1816, in consequence on his return from E great and varied taler entitled "Travels in U during the Campaign parte," has gained fame. His "Monume sign," left unfinished lished in 1829. Died

DEON, the Cheva MONT, CHARLES GE GUSTE D', was born and known until 1777 He was equerry to Lou tor of law, parliament officer, ambassador, r occupying, in short, dur the most varied static skill, and involving h ter in unparalleled my on a difficult mission t his insinuating manne vour of the Empress E years he was the med rrespondence between France. In consequence was made captain of dr a pension of 2400 livr France in 1758, and g nished himself in t After the conclusion o London as secretary of duke of Nivernois, and of some important pap of the duke, he remain afterwards as minister was finally dismissed fr

distinguished chief justice of the court of Queen's Bench. Died, 1815.

DENNIS, JOHN, dramatist and critic, was born in London, in 1657, studied at Cambridge, and devoted himself to literature. Throughout life he was almost perpetually in broils with one or other of the wits of the age; and Pope, in return for his animadversions, gave him a conspicuous place in the *Dunciad*. He originally had a considerable fortune; but having dissipated it, the duke of Marlborough obtained for him the place of land-walter at the Custom House; this he mortgaged, and his latter days were spent in poverty, aggravated by blindness. Died, 1734.

DENON, DOMINIQUE VIVANT, Baron, was born, in 1747, at Châlons-sur-Saône, in Burgundy. Though originally destined for the law, he was appointed to the office of "*gentilhomme ordinaire*" about the person of Louis XV. He afterwards resided several years in Italy, as secretary of embassy, during which period he applied himself sedulously to the study of the arts. He was so fortunate as to pass through the Reign of Terror without incurring the displeasure of the ephemeral rulers; and having attracted the notice of Buonaparte, he accompanied him to Egypt in 1798, alternately wielding the pen, the pencil, and the sword. On returning to Paris he was appointed director-general of the museums, and had the superintendance of the medallic mint, and all works of art executed in honour of the French victories. After the abdication of the emperor he retained his office, but was deprived of it in 1815, in consequence of having joined him on his return from Elba. He was a man of great and varied talents; and his able work, entitled "*Travels in Upper and Lower Egypt during the Campaign of General Buonaparte*," has gained him an imperishable fame. His "*Monuments of the Arts of Desiga*," left unfinished at his death, was published in 1829. Died at Paris, 1825.

D'EON, the Chevalier. EON DE BEAUMONT, CHARLES GENEVIÈVE LOUISE AUGUSTE D', was born at Tonneville, in 1728, and known until 1777 as the *Chevalier D'Eon*. He was equerry to Louis XV., chevalier, doctor of law, parliamentary advocate, military officer, ambassador, royal censor, &c.; occupying, in short, during his eventful life, the most varied stations with consummate skill, and involving his sex and real character in unparalleled mystery. Sent as envoy on a difficult mission to the Russian court, his insinuating manners gained him the favour of the Empress Elizabeth, and for five years he was the medium of a secret correspondence between her and the king of France. In consequence of these services, he was made captain of dragoons, and received a pension of 2400 livres. He returned to France in 1758, and subsequently distinguished himself in the military service. After the conclusion of peace, he went to London as secretary of legation, under the duke of Nivernois, and obtained possession of some important papers. On the return of the duke, he remained as resident, and afterwards as minister plenipotentiary, but was finally dismissed from his employment,

and lived 14 years at London in a kind of exile. During this period, suspicions arose as to his sex, which led to several extraordinary wagers. In July, 1777, a curious trial took place before Lord Chief-Justice Mansfield, on an action brought against Mr Jaques, a broker, who had received several premiums of 15 guineas, to return 100, whenever it should be proved that the chevalier was a woman. By the evidence of Louis Legoux and M. de Morando this fact was supposed to be so well established, that Hayes, the plaintiff, obtained a verdict, but it was afterwards set aside on the ground of the illegality of the wager. D'Eon after this put on female attire, and returned to France; but on the commencement of the revolution, which deprived him of his pension, he returned to England. Being reduced to poverty, he supported himself for some time by giving lessons in fencing, and by publicly exhibiting his skill in that art in the principal towns in the kingdom. When age had enfeebled him, and the notoriety of his character had abated, he depended in a great measure for sustenance on the aid of his friends. Among these was Elisée, first surgeon of Louis XVIII., who kindly assisted him till his death, in London, in 1810, and attended the dissection of his body. The account of this witness, with other undeniable evidence, leaves it beyond doubt that D'Eon was of the male sex. What the reasons were that could induce the chevalier, who was undoubtedly a brave soldier and an able diplomatist, to assume female attire, and to join in the deception when there was no apparent reason for it, remain undiscovered; but they were probably of a political nature, and might have been suggested by the policy of the French court to attain some particular object. That D'Eon was a man of talent is sufficiently evident by his works, which appeared under the title of "*Loisirs du Chevalier D'Eon*," in 13 vols, 8vo.

DEPPING, GEORGE BERNARD, historical and miscellaneous writer, was born at Manchester, in 1784. About the age of 20, he settled at Paris, and spent his life in the pursuit of literature. Among his works are "*Histoire de la Normandie*," "*Histoire du Commerce entre le Levant et l'Europe*," "*Les Juifs dans le Moyen Age*," &c. Died, 1853.

DE QUINCEY, THOMAS, born in 1735, was educated at the Manchester Grammar School and the University of Oxford. In early youth he became an opium-eater, and by this habit ruined his fortune and impaired an intellect which would, in all probability, have secured for him a more solid and enviable reputation than that which he has achieved by desultory contributions to periodical literature. He became the friend of Coleridge, Wordsworth, and Southey, and after leaving Oxford lived for many years at the Lakes. From straitened circumstances he began, when about forty years of age, to contribute to the "*London Magazine*" his "*Confessions of an Opium-eater*," a work remarkable for exuberant although ill-regulated imagination, and still more so for an excessive self-contemplation and minute analysis of his own mental condition and feelings,—characteristics clearly trace-

able to the habit in which he indulged. He continued thenceforth to work at a great variety of subjects; and although his peculiar habits of thought may deprive them of any wide and general interest, to those who can relish his original thought, his genuine wit, and his musically wild discourse, his remains will seem a real addition to the permanent treasures of our literature. In 1832 he went to Scotland, and there lived, not only admired but esteemed by the few who were admitted to his society, till his death, which took place at Edinburgh, December 8, 1839. There is a new complete edition of his works in 15 vols. 8vo.

DERBY, JAMES STANLEY, Earl of, a gallant English nobleman, who in the action at Wigan, in Lancashire, with 600 horse bravely withstood a body of 3000 horse and foot, commanded by Colonel Lilburne. He was taken prisoner at the battle of Worcester, and beheaded, in violation of a promise of quarter which had been given him, in 1651.

DERHAM, WILLIAM, divine and natural philosopher, was born in Worcestershire, in 1657. He studied at Oxford, and became rector of Uppminster, in Essex. He was appointed Boyle lecturer in 1711 and 1712, was subsequently canon of Windsor, and F.R.S. His principal works are entitled "Physico-Theology" and "Astro-Theology," and are attempts to prove the existence, power, and wisdom of God from his works. Derham also wrote "The Artificial Clockmaker," and a great number of memoirs contributed to the "Philosophical Transactions." Died, 1735.

DERMODY, THOMAS, poet, was the son of a schoolmaster, and born at Ennis, Ireland, in 1778. He obtained through Earl Moira a commission in the army; but so confirmed were his habits of intemperance, that he died, a victim to disease, in 1802. His poems, which were written under the pressure of necessity, and often in great haste, possess considerable merit.

DERRICK, SAMUEL, a native of Ireland, who, on the death of Beau Nash, was appointed master of the ceremonies at Bath and Tunbridge Wells. On coming to London he attempted the stage; but being unsuccessful as an actor, he had recourse to his pen. He wrote several books of little value. Born, 1724; died, 1769.

DERSCHAWIN, or DERZHAVINE, GABRIEL ROMANOVICH, a Russian poet and statesman, was born at Casan, in 1743. In 1760 he entered the army as a common soldier, but soon distinguished himself; and, after a military service of 24 years, entered the civil service, in which he arrived at the important situations of treasurer of the empire and minister of justice. He holds a high place among the poets of his country. Died, 1819.

DERYCK, or DERICK, PETER CORNELIUS, a painter of Delft, born in 1568, and died in 1630. He excelled in landscape and portrait painting.

DESAGULIERS, JEAN THÉOPHILE, an ingenious natural philosopher, was born in 1683 at Rochelle, and educated at Oxford, where he succeeded Dr Keil as a lecturer in

experimental philosophy. He published a "Course of Experimental Philosophy," &c. He was a useful member of the Royal Society, and contributed several papers to their Transactions. Died, 1749.

DESATX DE VOUGOUX, LOUIS CHARLES ANTOINE, a French general, was born in 1768. In the early part of the revolution he became aide-de-camp to General Victor de Broglie; and aided greatly, by his talents, the famous retreat of Moreau. In the battle of Rastadt he commanded the left wing, and forced the Archduke Charles to retire. He afterwards defended the fort of Kehl for 6 months with great bravery, and was wounded. He accompanied Buonaparte to Egypt in 1798, was appointed governor of the upper part of the country, and signed the treaty of El-Arish, with the Turks and English. He was killed at the battle of Marengo, to which victory he greatly contributed, June 14, 1800.

DESCARTES, RENÉ, a celebrated French philosopher, was born at La Haye, in Touraine, in 1596, and received his education at the Jesuits College at La Flèche. On leaving that seminary he removed to Paris, and applied to the study of mathematics. In 1618 he entered into the army of the prince of Orange; and, while serving in the garrison at Breda, solved a difficult mathematical problem which had been posted in the public streets. This introduced him to the acquaintance of the learned Beckmann, the principal of the college of Dort. While at Breda, he wrote, in Latin, a treatise on music, and projected some other works. He next served in the army of the duke of Bavaria, but soon after quitted the military life that he might give himself wholly up to science and philosophy. He visited the principal courts of Europe, and in 1629 settled at Amstordam; removing, however, to other towns of Holland in succession, the better to insure privacy. During the twenty years thus spent he published his various works, obtaining immense reputation as a philosopher, and at the same time encountering violent opposition, especially from the side of theology. Rome and Geneva were at one in persecuting the new thinker. His works were condemned, he was prohibited from public teaching, and his life was scarcely safe. At the invitation of Christina, queen of Sweden, he went to Stockholm, where he died in 1650. His principal works are "Principia Philosophiæ," "Discours de la Méthode pour bien conduire la Raison et chercher la Vérité dans les Sciences," &c. The philosophy of Descartes forms one of the great landmarks in the history of free thought. It gave the death-blow to scholasticism, raised a stout opposition to the merely experimental method, and infused a new life and vigour into the sphere of thought and speculative research. Descartes, starting from doubt, finds the first certainty in self-consciousness: *Cogito*. On this he attempts to found and build up a system capable of demonstration. His system, as vehemently opposed by some as it has been eagerly embraced by others, has formed the starting-point for most of the systems that have subsequently appeared.

DESCHAMPS, DOM, a French philosopher

of the 18th century. He was born on 10 January, 1716. His first education, in the fine order, became of Montreuil-Bellay there, 19th April, 1731, and other philosopher wrote an Essay on "Nature" of Buroniers on the Spirit of London, in 1769. He was in the oblivion, and only in the 19th century has been in connection with a station. It is now ascertaining the name of the author of "La Vérité" which remained in manuscript of Poitiers since the time he acquired from the keeper of the library. In this treatise is contained a philosophy in almost a system of Hegel's leading ideas and distinctions upon which was developed by Hegel this remarkable work under the title of "L'Anisme dans la Philosophie" Professor Henricus

DESEZE, RAYMOND of Bourdeaux, and a parliament of that name. He afterwards practiced acknowledged talents named one of the unfortunates Louis XVI. ably defended, after a dangerous task. He time, but escaped the guillotine by fleeing his liberty, he served the Directory, Imperial Government, Bourbons he received of the three selected, the grateful notice of his devotedness to his predecessor. He held offices; was a peer of the order of Malta, a Academy, and president. Died, 1828.

DESGODETS, ANTOINE, was born in Paris, and came to Rome, in 1674. He spent some time in Algier, and kept on being exchanged where he composed an "Ancient Edifices" on his return to Paris, he wrote the royal buildings, king. Died, 1728.

DESHOULIERES, ANNE, a handsome, well-educated French woman, who was born at Paris, and was a gentleman of family, a friend of Louis XI, attracted much attention of friendship with the age. She produced several operas, few of which her "Idyls" are still

of the 18th century, was born at Rennes, 10 January, 1716. He entered the Benedictine order, became purveyor of the convent of Montreuil-Bellay, near Saumur, and died there, 19th April, 1774. He was the correspondent of Voltaire, Rousseau, D'Alembert, and other philosophers of his time, and wrote an Essay against the "Système de la Nature" of Baron d'Holbach, and some Letters on the Spirit of the Age, published at London, in 1769. But his name soon fell into oblivion, and only after three-quarters of a century has been brought to light, in connection with a startling literary discovery. It is now ascertained (1863) that Dom Deschamps was the author of a treatise entitled "La Vérité, ou le Vrai Système," which has remained in manuscript in the public library of Poitiers since the year 1817, when it was acquired from the heirs of Dom Mazet, first keeper of the library after the revolution. In this treatise is contained a system of philosophy in almost all respects identical with the system of Hegel, anticipating all the leading ideas and principles and deductions and distinctions supposed to have been first developed by Hegel. A short analysis of this remarkable work has just been published under the title of "Antécédents de l'Hégélianisme dans la Philosophie Française," by Professor Heussière of Poitiers.

DESEZE, RAYMOND, or ROMAIN, a native of Bourdeaux, and an able counsellor of the parliament of that city, was born in 1750. He afterwards practised at Paris, and his acknowledged talents caused him to be named one of the counsel for the unfortunate Louis XVI., whose cause he most ably defended, after Target had declined the dangerous task. He was imprisoned for a time, but escaped the scaffold, and on recovering his liberty, he was never induced to serve the Directory, the Consulate, or the Imperial Government. On the return of the Bourbons he received, as the only survivor of the three selected by Louis for his counsel, the grateful notice of Louis XVIII. for his devotedness to his royal and unfortunate predecessor. He held several distinguished offices; was a peer of France, a knight of the order of Malta, a member of the French Academy, and president of the Court of Appeal. Died, 1828.

DESGODETS, ANTOINE, a French architect, was born in Paris, in 1653. On his passage to Rome, in 1674, he was taken by the Algerines, and kept in slavery 16 months. On being exchanged he repaired to Rome, where he composed a work, entitled "The Ancient Edifices of Rome," and, on his return to Paris, he was made comptroller of the royal buildings, and architect to the king. Died, 1728.

DESHOULIERES, ANTOINETTE DU LIGON, a handsome, witty, and accomplished French woman, and a writer of much versatility, was born at Paris, in 1634; married a gentleman of family, and was introduced at the court of Louis XIV. in 1657, where she attracted much attention, and lived on terms of friendship with the principal literati of the age. She produced numerous plays and operas, few of which were successful; but her "Idyls" are still admired. She died,

after 12 years of suffering, of a cancer in her breast, in 1694.

DESIDERIUS, or DIDIER, the last king of Lombardy, was duke of Iatria, and succeeded Astolphus in 756. His daughters were married to the two sons of Pepin, king of France, Carloman and Charlemagne. The latter soon repudiated his wife, and, at the request of Pope Adrian, invaded Italy in 773, dethroned Desiderius, and sent him to end his days in the monastery of Corbie.

DESMOULINS, CAMILLE, one of the leaders in the French revolution, was born at Guise, in Picardy, in 1762. He was a fellow-student with Robespierre at the college of Louis le Grand, became an advocate at Paris, and distinguished himself as an enthusiastic political reformer. He had a stutter in his speech, which, however, sometimes disappeared in his passionate addresses to the people. On the 12th July, 1789, he made a very exciting harangue on the dismissal of Necker, and bade the people arm. This was the beginning of the revolt, which in two days became "Siege of the Bastille." Camille assumed the grotesque title of "attorney-general of the lamp-iron," and published, among other things, "Les Révolutions de France et de Brabant." He took part in the attack on the Tuileries, on the 10th August, 1792. As deputy to the Convention, he co-operated with his school-friend, Robespierre, and promoted the fall of the Girondists. He would fain have checked the excesses of the revolution, and made the attempt with Danton and others. For the same purpose he published his "Vieux Cordelier;" but Robespierre gave him "7" to the revolutionary tribunal, and they sent him to the Conclergerie, and thence to the guillotine, 5th April, 1794. His young and noble wife, Luëlle, hovered about the prison, made vain attempts to save him, and in a few days followed him to the scaffold.

DESPARD, EDWARD MARCUS, an officer in the British army, was a native of Queen's County, in Ireland. At the close of the American war he served in the West Indies, where he distinguished himself by an expedition on the Spanish main. For his services there he was made lieutenant-colonel, and in 1784 appointed superintendent of the English affairs at Honduras; but his conduct giving offence to the settlers, complaints were sent home against him, and he was suspended. He applied to government for an investigation of his conduct, which was rejected, as were also his claims. This naturally irritated him; and conceiving that he was at least entitled to a fair hearing, he became a violent democrat, and for his inflammatory conduct was imprisoned. Nothing being proved against him, he was liberated. In 1802 he headed a conspiracy to murder the king; and it was determined to make the attack when his Majesty went to the parliament house. The plot being discovered, the colonel and several others were taken up, and brought to trial by a special commission, Feb. 5, 1803; when the charge being proved, Despard and seven others were found guilty, and executed.

DESSALINES, JACQUES, originally a slave in St Domingo, but having an oppor-

tunity of showing great courage and talents during the disturbances in that colony, became second in command to Toussaint Louverture; on whose imprisonment he was chosen emperor of Hayti, under the title of Jacques I. This was in 1804; but he retained his imperial dignity only two years, having perished the victim of a conspiracy, provoked by his intolerable cruelties, in 1806.

DESTOUCHES, PHILIPPE NÉRICAULT, an eminent French dramatic writer, was born at Tours in 1680. Being sent to London, in 1717, to assist in the political negotiations then carrying on, he continued there seven years, and married. On his return to France he retired into the country, where he devoted himself to agriculture and the belles lettres. His principal pieces are "Le Philosophe Marié" and "Le Glorieux." Died, 1754.

D'ESTRÉES, GABRIELLE. [GABRIELLE D'ESTRÉES.]

DEVEREUX, ROBERT. [ESSEX, Earl of.]
DEVONSHIRE, Duke of. [CAVENDISH, WILLIAM.]

DEVONSHIRE, GEORGINA CAVENDISH, Duchess of, remarkable for personal graces and mental accomplishments, was the eldest daughter of Earl Spencer; born in 1757, and married to the duke of Devonshire in her 17th year. Her "Passage of Mount St Gothard" bears the impress of a highly cultivated mind. She also had some skill in musical composition, and a taste for the fine arts. Died, 1806.

D'EWES, Sir SIMONDS, antiquary, was born in 1602, and educated at Cambridge, entered parliament in 1640, and was created a baronet in 1641; but on the breaking out of the civil war he espoused the Puritan cause, and died in 1650. He was the author of "The Journals of all the Parliaments during the Reign of Queen Elizabeth." His "Autobiography and Correspondence," first published in 1845, is a curious and interesting record.

DE WINT, PETER, a distinguished artist, whose numerous drawings formed for forty years an attractive feature in the exhibitions of the Old Society of Painters in Water Colours, was born at Stone, in Staffordshire, where his father practised as a physician, 1783. English landscape scenery formed the chief theme for his fertile pencil; and his free and masterly handling of his subjects was only equalled by their truthfulness to nature. Died, 1849.

DE WITT, JOHN, a distinguished Dutch statesman, was born in 1625, at Dort, in Holland. At the age of 23 he published a mathematical work, entitled "The Elements of Curved Lines." In 1650 he was chosen pensionary of his native city; and, after distinguishing himself in public affairs, was elected pensionary of Holland. In that capacity he concluded a peace with Cromwell, one article of which excluded the House of Orange from the stadtholdership. In 1665 war broke out between the Dutch and English, in which the French afterwards joined the former, and in 1667 De Witt sent the fleet under De Ruyter which sailed up the Thames. The peace of Breda was concluded the same year. De Witt

about the same time procured the passing of the perpetual edict for abolishing the office of stadtholder, for which he received public thanks. However, in 1672, when Holland was invaded by the French, and civil dissension overspread the country, both John de Witt and his brother Cornelius were barbarously murdered by the populace, and the stadtholdership was re-established. William, Prince of Orange (afterwards William III. of England), was then called to that post.

DIANA of POITIERS was born in 1499, and married Louis de Brezé, Count of Maulevrier, at the age of 13. She lost her husband in 1531, and subsequently became mistress to Henry, duke of Orleans, afterwards Henry II. At court she was the rival of the duchess of Étampes, and the hatred of the two for each other gave rise to disgraceful scenes. On the accession of Henry to the throne her influence became paramount, and the great changes then made in the court, and in the ministry, the cruel persecutions of the Huguenots, and the train of ills that marked the whole reign, are by some attributed to her influence. In 1648 the king gave her the duchy of Valentinois, and she took the title of duchess. She retained her beauty and her power over the king till his death, retired then to the château of Anet, and died there in 1666.

DIAZ, BARTOLOMEO, a Portuguese navigator, who, in 1486, with two small vessels, discovered the Cape of Good Hope, which he named the Cape of Tempests. The king, however, changed it to its present name. In 1497 Diaz accompanied Vasco de Gama on his expedition of discovery, and subsequently set out with Cabral for the Indies. He perished by shipwreck in May, 1500.

DIAZ, JUAN, was a native of Cuenca, in Spain. He studied at Paris, where he read the works of Luther, and became a Protestant. He then quitted France, and visited Calvin at Geneva; afterwards he went to Strasburg, and lastly to Neuberg, whither he was followed by his brother Alfonso, a zealous Catholic. Alfonso finding his exhortations could not reclaim him, pretended to close his visit and take his departure, but secretly returned at break of day, with a companion, and murdered him with an axe. The assassins were pursued and taken; but as they were about to be brought to trial, Charles V. took the affair into his own hands, and left the murderer unpunished. This horrid deed was perpetrated in 1546. The miserable fratricide afterwards hanged himself.

DIBDIN, CHARLES, dramatist, poet, and actor, but mostly celebrated as a writer of songs and a musical composer, was born at Southampton, in 1745. He was intended for the church, and received his early education at Winchester; but, seduced by his love of music, and relinquishing all thoughts of the clerical profession, he first became a candidate for the situation of organist at a village church in Hampshire, and then took up his abode in London. He made his first appearance as a performer, in 1762, at the Richmond theatre, and two years afterwards appeared on the London boards, as *Ralph*,

in the *Maid of* as an actor. monodramatic music, songs, and was the sole author of songs are still published a very superior Dibdin enjoyed from government the ministry; a been, that in the would have sufficient not an annuity public subscription about 1400 songs, sides which he, Stage," his "Fro Tour," three nov

DIBDIN, THOMAS, a song writer, was whose "naval song" editing at the time Garrick for his good only four years on stage as Cupid, in to the *Venus of M* apprenticed to an bred to "the prof he quitted the sho on the boards of p that time until 17 formed in every d and written more wards obtained at Garden Theatre; operas, farces, and were produced by ing half a century. may select "The Fleet," "Mother more than £20,000 Covent Garden Theat Racer" (a clear ga Astley's of £13,000). "Past Ten o'Clock" days of his long a cheered by the result. Died, Sept. 1841.

DIBDIN, THOMAS, nephew of the celebrated himself the most zealous one of the most volum time, was born at Covent receiving his education at Reading, and as a commoner of St Andrews, his taste for literature commenced. The law became a pupil of Mr. he subsequently commenced after waiting some time was ordained a clergy early preferments as preacherships or lectures, he was enabled to devote his favourite studies with attention; and for nearly may be said to have been that emanated from his pen. A bare list of the twenty crowd our collection make room for the " was published in 1805, and blished the author's family

in the Maid of the Mill; but he never shone as an actor. He invented a new kind of monodramatic entertainment, consisting of music, songs, and recitations, of which he was the sole author and performer. His sea songs are still popular; some, indeed, are of a very superior character. For a while Dibdin enjoyed a pension of £200 a-year from government, but lost it by a change of the ministry; and so improvident had he been, that in the closing years of his life he would have suffered extreme indigence, had not an annuity been purchased for him by public subscription. Altogether he produced about 1400 songs and 30 dramatic pieces; besides which he wrote "A History of the Stage," his "Professional Life," "A Musical Tour," three novels, &c. He died in 1814.

DIBDIN, THOMAS, dramatic author and song writer, was the eldest son of the above, whose "naval songs" he was engaged in editing at the time of his death. He had Garrick for his godfather; and in 1775, when only four years of age, he appeared on the stage as Cupid, in Shakespeare's "Jubilee," to the Venus of Mrs Siddons. At 16 he was apprenticed to an upholsterer; but born and bred to "the profession," after a few years he quitted the shop, and sought his fortune on the boards of provincial theatres. From that time until 1795 he is said to have performed in every department of the drama, and written more than 1000 songs. He afterwards obtained an engagement at Covent Garden Theatre; and numerous were the operas, farces, and entertainments which were produced by his inventive genius, during half a century. From among them we may select "The Cabinet," "The English Fleet," "Mother Goose" (which yielded more than £20,000 profit to the managers of Covent Garden Theatre), "The High-mettled Racer" (a clear gain to the proprietors of Astley's of £13,000), "The Jew and Doctor," "Past Ten o'Clock," &c. But the latter days of his long and active life were uncheered by the result of his previous labours. Died, Sept. 1841.

DIBDIN, THOMAS FROGNALL, D.D., nephew of the celebrated Charles Dibdin, and himself the most zealous bibliographer, and one of the most voluminous writers of his time, was born at Calcutta, 1775, and after receiving his education under the care of an uncle at Reading, matriculated at Oxford, as a commoner of St John's College, where his taste for literature and history commenced. The law being his destination, he became a pupil of Mr Basil Montagu; but he subsequently changed his views, and after waiting some time for a degree, he was ordained a clergyman in 1804. His early preferments consisting chiefly of preacherhips or lectureships in the metropolis, he was enabled to prosecute his favourite studies with equal zeal and satisfaction; and for nearly thirty years the press may be said to have teemed with the works that emanated from his fertile and versatile pen. A bare list of these would inconveniently crowd our columns; but we must make room for the "Bibliomania," which was published in 1809, and at once established the author's fame in this peculiar de-

partment; the "Bibliographical Decameron," published in 1817; a "Bibliographical, Antiquarian, and Picturesque Tour," the result of a continental sojourn, in 1818; "Reminiscences of a Literary Life," in 1836; a "Northern Tour," in 1838, besides various sermons and innumerable other works on literary, bibliographical, and kindred topics. Dr Dibdin was one of the founders of the Roxburghe Club, founded in 1812. In 1823 he obtained, through Earl Spencer, whose friendship he enjoyed through life, and in whose magnificent library he could at ease pursue his favourite studies, the vicarage of Exning, near Newmarket; and in 1824 he was presented to the rectory of St Mary's, Bryanstone Square, which he held till his death, Nov. 18, 1847.

DICK, Major-general Sir ROBERT HENRY, was the son of Dr Dick, of Tullimet in Perthshire. He entered the army as an ensign in the 75th foot, in 1800; and in 1804 obtained a company in the 78th. He accompanied the expedition to Sicily, and was wounded at the battle of Malta; and was afterwards wounded at the battle of Alexandria, and was severely wounded at Rosetta. In 1808 he was appointed to the 42nd Highlanders; accompanied the 2nd battalion to the Peninsula, and commanded a light battalion at Busaco and Ciudad Rodrigo, and the 1st battalion of the 42nd at the storming of Fort St Michael, and during the siege of Burgos, &c. He served in the campaign of 1815, and was severely wounded at Quatre Bras while commanding the 42nd. On the restoration of peace he retired to his paternal estate at Tullimet; but his wife dying in 1830, retirement had no longer any charms for him, and he again sought the tented field. He obtained an honourable command in India, and fell in the memorable victory over the Sikhs at Sobraon, Feb. 10, 1846, while (as the commander-in-chief expressed it) "personally animating, by his dauntless example, the soldiers of her Majesty's 80th regiment in their career of noble daring."

DICK, THOMAS, a Scottish theologian and miscellaneous writer, was born in 1772. He was at one time a minister in the Secession church, but is chiefly known as the writer of several pleasing and popular works on astronomy, with large theological admixture. They are, "Celestial Scenery," "The Sidereal Heavens," "The Practical Astronomer," and a "Treatise on the Solar System." His other works bear the high-sounding titles of "The Christian Philosopher," "The Philosophy of Religion," &c. Dr Dick received a small pension from the government a short time before his death. Died, 1857.

DICKONS, Mrs (whose maiden name was Poole), was a celebrated singer, who, though not equal to Mrs Billington, many years sustained the same cast of characters at the opera, and was regularly engaged as a principal vocalist at the oratorios. She was the pupil of Rauzzini, who also taught Braham; commenced her professional career at Covent Garden, in 1793; and retired from public life, in consequence of long-continued illness, in 1818. Died, 1833.

sent Abel Tasman on a voyage to the South, the consequence of which was the discovery of that part of New Holland called Van Diemen's Land. He died in 1645.

DIEFENBECK, ABRAHAM VAN, Dutch painter, was born at Bois-le-Duc about 1607. He studied under Rubens at Antwerp, and was one of his most eminent pupils. He visited Italy and England, was made director of the Academy of Antwerp in 1641, excelled as a painter on glass, and designed numerous illustrations for books. Died, 1675.

DIETRICH, JOHANN WILHELM ERNST, an excellent German painter, was born in 1712 at Weimar, where his father was painter to the court, and celebrated for his portraits and battle pieces. After studying under his father, he went to Dresden, and was instructed in landscape painting by Alexander Thiele. He visited Italy in 1743, and in 1768 became professor in the Academy of Dresden, and director of the School of Painting at Meissen. He died in 1774. For versatility and general excellence few have surpassed him.

DIEZ, JUAN MARTIN, better known as the *Empeinado* of modern Spanish guerilla warfare, was the son of a peasant of Valladolid, and born in 1775. He first served in the regular army as a dragoon, but in 1808, with a chosen band of about 60 brave fellows, he commenced that harassing guerilla system, which so much contributed to the disasters of the enemy in the Peninsula; and the value of his services being properly appreciated, he was at length made a brigadier-general of cavalry. When the duke of Wellington entered Madrid in triumph, Diez attended him, and received his commands to join the army at Tortosa, at the head of 5000 men. On the re-establishment of Ferdinand's government, the *Empeinado* became obnoxious to the ruling powers, who, regardless of his former great services, had him seized on a charge of conspiracy, tried, and executed, in 1825.

DIGBY, SIR EVERARD, an English gentleman, who was born of a Roman Catholic family, 1581: was knighted at the accession of James I., and became a party to the Gunpowder Plot, for which he was executed in 1605.

DIGBY, SIR KENELM, son of the preceding, was born at Gouthurst, in Buckinghamshire, in 1603, and educated at Gloucester Hall, Oxford: He was knighted by James I., and by Charles I. he was appointed to several offices. On one occasion, when some difference existed between England and the Venetians, he was sent with a fleet into the Mediterranean, where he attacked the fleet of the republic in the bay of Scanderoon. About 1636 he quitted the church of England for that of Rome. At the commencement of the civil war he was imprisoned by the parliament in Winchester House, but in 1643 he regained his liberty, and went to France. When Cromwell assumed the government, he ventured to visit his native country, and paid great court to the Protector. He wrote a "Treatise on the Nature of Bodies," "On the Operations and Nature of Man's Soul," and "Peripatetic Institutions." His "Pri-

vate Memoirs," edited by Sir Harris Nicolas, first appeared in 1827. Died, 1685.

DIGBY, JOHN, earl of Bristol, born in 1580, was gentleman of the bedchamber to James I., who sent him to Spain to negotiate a marriage between Prince Charles and the Infanta, and the same year he was created earl of Bristol. When the civil war broke out he emigrated, and died at Paris in 1653.

DIGBY, GEORGE, earl of Bristol, son of the above, was born at Madrid in 1612. He received his education at Oxford, and became a member of the long parliament, wherein he at first opposed the court, but afterwards joined the royal party, and exerted himself in the service of Charles I. He went afterwards to France, whence he was banished for the part he took in the Fronde. He appeared again in England after the restoration, making himself remarkable by eccentric courses. Died, 1676.

DIGGES, THOMAS, an astronomer and mathematician; author of "Algebra Mathematica," "Perfect Descriptions of the Celestial Orbs," "An Arithmetical Warlike Treatise, named Stratiticoes," &c. Died, 1595.

DIGGES, SIR DUDELEY, son of the preceding, was born in 1583, and educated at Oxford. He was knighted by James I., who sent him ambassador to Russia; in the parliament of 1621 he sided with the popular party, and so continued to do till 1636, when he was brought over by the grant of the mastership of the rolls. Sir Dudley was one of the members appointed to support the impeachment of Buckingham, for which he, with Sir John Eliot, was committed to the tower. He died in 1639. He wrote "A Defence of Trade," "A Discourse concerning the Rights and Privileges of the Subject," &c. The "Complete Ambassador," containing documents respecting the proposed marriage of Queen Elizabeth to the duke of Anjou, appeared after his death. His son Dudley, who died in 1643, was a loyal and learned man, and wrote some tracts against rebellion.

DILLENIIUS, JOHN JAMES, an eminent botanist, was born at Darmstadt, in 1687, and educated at the university of Giessen. In 1721, he accompanied Dr Sherard to England, where he spent the remainder of his days. Soon after his arrival he undertook a new edition of Ray's Synopsis; and was appointed the first botanical professor at Oxford on Sherard's foundation. He wrote "Hortus Elthamensis" and a "History of Mosses." Died, 1747.

DILLON, WENTWORTH, earl of Roscommon, was born in Ireland about 1633, and educated at Caen in Normandy, by the famous Hochart. After dissipating his property by gaming, he was made master of the horse to the duchess of York. He then married a daughter of the earl of Burlington, and applied to poetry. Died, 1684.

DIMSDALE, THOMAS, a physician, who became celebrated by his successful mode of inoculating for the small-pox. In 1768 he went to Russia, and inoculated the Empress Catharine II., and Grand-duke Paul, for which Mr Dimsdale was created a baron of the empire, physician to her Majesty, and

counsellor of state. A gratuity of £12,000 was given him for his journey, and a pension of £500 a year. In 1781 the baron again visited Russia, to inoculate the two sons of the grand-duke. In the year preceding he was elected into parliament for Hertford, and again in 1784, on which he quitted practice. He wrote several tracts on inoculation, in which is an account of his first journey to Russia. Died, 1800.

DINEZ DA CRUZ, ANTONIO, an eminent Portuguese poet, was born in 1730, and died in 1798. As a writer of odes, sonnets, and lyrical pieces, he holds the first rank among his countrymen.

DINOCRATES, a Macedonian architect, who was employed by Alexander in building the city of Alexandria. He also rebuilt the temple of Ephesus, and proposed to cut Mount Athos into a statue of the Macedonian hero. He died in Egypt, under the reign of Ptolemy Philadelphus.

DIOCLETIANUS, CAIUS VALERIUS, Roman emperor, born in Dalmatia, 245. He entered the Roman army, distinguished himself under several emperors, and was elected emperor by the soldiers on the death of Numerian, 284. Two years later, to strengthen himself against the numerous enemies threatening the empire both in the east and the west, he made Maximian his associate, assigning to him the charge of the west. A further division was afterwards made by the creation of two new Cæsars, Constantius Chlorus and Galerius, four emperors thus reigning at one time. War was almost continually going on, but Diocletian seldom took any personal share in it. In the latter part of his reign he was induced to sanction a cruel persecution of the Christians, whom he had long protected. In 305 Diocletian abdicated the imperial dignity, and retired to his native country, where he died in 313.

DIODATI, JEAN, an eminent Protestant theologian, descended from an Italian family, but born at Geneva, 1578. He became professor of Hebrew there in 1597, and professor of theology in 1609, holding the latter post till 1645. He was a friend of the celebrated Father Paul, and translated into French his great "History of the Council of Trent." He made also French and Italian translations of the Bible, not without encountering opposition. Diodati attended the Synod of Dort in 1618, and took part in drawing up the deliberations of the synod. He published various theological works, among which are his Annotations on the Bible, which were translated into English. Died, 1649.

DIODORUS SICULUS, a native of Agrigium, in Sicily, who wrote a Universal History, in 40 books, of which only 15 books and a few fragments remain. It is a laborious but uncritical compilation of most heterogeneous materials, and occupied him 30 years. It is still valued for the portions which it has preserved to us of many lost works. He flourished about B. C. 50.

DIOPENES, surnamed **THE CYNIC**, was born at Sinope, a city of Pontus, B. C. 412. He accompanied his father to Athens, where he applied to the study of philosophy under Antisthenes, the founder of the cynic school.

He distinguished himself by the excessive austerity and eccentricity of his manners, with which was blended a great knowledge of human nature, and a zeal for the practical good of men, on which account Plato called him the "mad Socrates." Being on a voyage to Ægina, the vessel was taken by pirates, who sold Diogenes to a rich Corinthian citizen named Xenias, who intrusted to him the care of his sons. His famous interview with Alexander took place at Corinth, where, at the age of 90, he died.

DIOPENES LAERTIUS, a Greek historian, was born in Cilicia. He wrote the "Lives of the Philosophers," in 10 books, an immethodical and uncritical work, valuable, as such books often are, for the fragments they contain of earlier writings which have perished. He is supposed to have lived in the second century.

DION, a celebrated patriot of Syracuse, was the disciple and friend of Plato when that philosopher was at the court of Dionysius the elder, whose daughter Arete Dion married. Being accused of treason, he was banished by Dionysius the younger, and went to Athens, where he acquired considerable popularity; which so provoked the tyrant, that he confiscated his estate, and compelled his wife to marry another man. Dion, irritated at this treatment, resolved to attempt the deliverance of his country; and with a small force he landed in Sicily during the absence of Dionysius, and entered Syracuse in triumph. After various successes he perished, the victim of a conspiracy, headed by one Calippus, an Athenian, B. C. 353.

DION CASSIUS, an historian of the third century, born in Bithynia, went to Rome about 180; was appointed in succession to many high offices; was twice consul; and wrote, in Greek, the History of Rome, from the arrival of Æneas in Italy, to A. D. 229. The small portions extant of Dion's work are highly valued.

DION CHRYSOSTOMUS THE GOLDEN-MOUTHED, a celebrated Greek rhetorician, flourished in the first century of the Christian era. He was a native of Prusa, in Bithynia, but lived mostly at Rome. Suspected of conspiracy by Domitian, he took refuge in the country of the Getæ, returning to Rome on the accession of Nerva. He enjoyed the favour both of Nerva and Trajan, and lived to an advanced age. He left about 80 orations or discourses on morals and politics, which are admired for their elegance of style. Died, A. D. 117.

DIONYSIUS I., the elder, tyrant of Syracuse, was born B. C. 430. He served in the war with the Carthaginians, got himself appointed general, and, in 405, sole general and head of the republic. He formed a powerful body-guard, conquered other cities of Sicily, carried on war with the Carthaginians, and after making peace with them in 392, invaded Italy and subdued several of the Greek cities of the south. He was afterwards again at war with Carthage. Dionysius, like some other tyrants, was a patron of literary men and artists; aspired to literary fame, and contended for the prize at the Olympic games. He erected many fine tem-

ples and palaces, at rock near Syracuse. Laetitia, spoken "Ear of Dionysius."

DIONYSIUS II., Syracuse, was son, succeeded him, B. C. he was for a time r by the influence of other distinguished lived at his court. ment of Dion and h overthrow in 356. obtained the chief p ten year's returned at Syracuse. A fin tyranny by the nobl and he spent the reat Corinth, wallowing and vice.

DIONYSIUS, an a was called **PERIEGES** "Periegesis," or Sun lived probably at th century.

ples and palaces, and also constructed in the rock near Syracuse the famous prison called *Lautumis*, spoken of in later times as the "Ear of Dionysius." Died, B. C. 367.

DIONYSIUS II., the younger, tyrant of Syracuse, was son of the preceding, and succeeded him, B. C. 367. Idly brought up, he was for a time restrained from excesses by the influence of Dion and Plato. Many other distinguished men visited him or lived at his court. His subsequent treatment of Dion and his family led to his own overthrow in 356. He went to Italy and obtained the chief power at Locri, and after ten years returned and regained his throne at Syracuse. A final end was put to his tyranny by the noble Greek Timoleon, 343, and he spent the rest of his life in exile at Corinth, wallowing in the mire of sensuality and vice.

DIONYSIUS, an ancient geographer, who was called *PERIEGETES*, from his poem of "Periegesis," or Survey of the World. He lived probably at the beginning of the 4th century.

DIONYSIUS of Halicarnassus, a Greek rhetorician and historian, who settled at Rome about B. C. 29, that he might study the Latin language, and collect materials for the history which he afterwards wrote. Dionysius wrote many rhetorical and critical works, which are of great value, but his principal work, and that by which he is most generally known, is the "Roman Archaeology." It was in 22 books, of which about 11 are extant. In these he dwells at great length on the early history of Rome, but his want of accurate knowledge, the bias under which he wrote, and the rhetorical character of his style, render his history untrustworthy. Died at Rome, B. C. 7.

DIOPHANTUS, a mathematician of Alexandria, to whom is attributed the invention of algebra. It is uncertain at what period he lived.

DIOSCORIDES, PEDANIUS, or PEDACIUS, physician, was born at Anazarba in Cilicia, in the 1st century of the Christian era; and distinguished himself as the author of a work on *Materia Medica*, in which all the vegetable substances then used as medicines are described or catalogued. This work held its ground as first and sole authority on the subject of which it treats for sixteen hundred years. Its infallibility and completeness being almost as hard to shake and disprove as that of Aristotle or the pope. It was printed by Aldus in 1499.

DIPPEL, JOHANN CONRAD, a German physician and celebrated alchemist, was born at Frankenstein, in Hesse, in 1672. He led a wandering life, made himself obnoxious to various governments, and was often imprisoned. He pretended to have discovered the philosopher's stone, and prophesied that he would not die till 1808. He, however, falsified his prediction, by suddenly departing this life in 1734; and instead of finding the philosopher's stone, he discovered Prussian blue, and the animal oil which bears his name.

DISRAELI, ISAAC, the illustrious author of the "Curiosities of Literature," the "Quarrels" and "Calamities of Authors,"

and "Illustrations of the Literary Character," was born at Enfield, 1767. He was the only child of Benjamin Disraeli, a Venetian merchant; and was originally destined for his father's occupation; but having shown a premature inclination for literature, he was sent first to Amsterdam, and afterwards to Bordeaux, to be initiated into the mysteries of a mercantile life. But all in vain. Rousseau and Voltaire had superseded the ledger in his estimation; and he returned to England with such an antipathy to commerce, that he at length abandoned it altogether; and he thenceforward devoted his long life to literary pursuits. Besides the works above mentioned, he published "Commentaries on the Life and Reign of Charles I.," the "Amenities of Literature," and was for many years a contributor to the Quarterly Review and the Gentleman's Magazine. Mr. Disraeli was smitten with blindness in 1839. Few writers have been so much devoted to literature from a pure love of it for its own sake; and many a mind has been excited to literary effort by his graceful and entertaining works. Died, 1848.

DISSEN, GEORGE LUDOLF, German philologist, was born near Göttingen in 1784. He studied at the university of Göttingen, where, after a short residence at Marburg as extraordinary professor of classical philology, he became professor of classical literature. He was a zealous hard-working student and lecturer, but has not written much. He published editions of Pindar, Tibullus, and the oration of Demosthenes "De Corona." A collection of his minor writings was published after his death. Died, 1837.

DITTON, HUMPHRY, a learned mathematician, was born at Salisbury in 1675; became mathematical master of Christ's Hospital, and died in 1716. He wrote several papers in the Philosophical Transactions; but he is best known by a treatise entitled "The Institution of Fluxions." He also wrote a treatise on Perspective, and "General Laws of Nature and Motion."

DÖBRENTÉI, GABRIEL, Hungarian archaeologist and miscellaneous writer, was born in 1798. After studying at the university of Leipsic, and residing for some time in Transylvania, as private tutor, he settled, in 1820, at Pesth, where his time was divided between literature and the duties of various offices which he held under the government. During the last 30 years of his life he was principally occupied in the preparation of his great work on the "Ancient Monuments of the Magyar Language," the first volume of which appeared in 1825, and which is a standard authority. Döbrentei was for several years secretary to the Hungarian Academy; he contributed papers to various periodicals, and carried on an extensive correspondence. Died, 1851.

DOBRIZHOFFER, MARTIN, Jesuit missionary, was a native of Styria. He was born in 1717, entered the order at the age of 19, and went to Paraguay in 1749. He laboured there nearly twenty years, and then returned and settled at Vienna. In his old age he wrote a Latin curious and prolix account of the Abipones, one of the native nations or tribes of Paraguay. It is

prosperous career, he retired from business, and died in 1764.

DODSWORTH, ROGER, an English topographer, was born in Yorkshire, in 1686, and died in 1654. He collected a large mass of materials for an account of the antiquities of his native country. They form 163 folio volumes, which are now in the Bodleian library, Oxford.

DODWELL, HENRY, a learned critic and theologian, was born at Dublin, in 1641, and educated at Trinity College. In 1688 he was appointed Camden professor of history at Oxford, but lost his office soon after the revolution. He wrote several books on Chronology, a volume of Dissertations, "De Veteribus Græcorum Romanorumque Cyclus," his most important work; and a discourse on the Natural Mortality of the Soul, which occasioned a good deal of offence, on account of a ridiculous speculation on the power of the bishops to confer immortality. Died, 1711.—His sons, **HENRY** and **WILLIAM**, were also both distinguished by their writings; the former, who was bred to the law, by his scepticism; the latter, who was a prebendary of Salisbury, by his orthodoxy.

DODWELL, EDWARD, classical antiquary and topographer, born about 1737. He studied at Cambridge, and spent the greater part of his life in travels and researches in Greece and Italy. The fruits of his labours appeared in the following works: "A Classical and Topographical Tour through Greece;" "Views in Greece," and "Views and Descriptions of Cyclopiæ or Pelasgic Remains in Greece and Italy." These views are from original drawings and sketches by himself. Died at Rome, 1832.

DOERFLEIN, JOHANN CHRISTOPH, a learned Lutheran divine, professor of theology in the university of Jena. He was the author of several works illustrative of the sacred writings, and enjoyed a high reputation for biblical knowledge. Died, 1792.

DOES, JACOB VAN DER, a Dutch painter, born in 1623, and died in 1673; he studied at Rome, and adopted the style of Bamboccio.—His sons, **JACOB** and **SIMON**, were both good artists; the former, celebrated for his historical pieces, died in 1691; the latter, who excelled in landscapes and cattle, died in 1717.

DOES, JAN VANDER. [DOUSA.]

DOGGETT, THOMAS, an actor and dramatic poet, was a distinguished comic performer at Drury Lane, of which house he was joint-manager. He is now remembered for the legacy he left to provide a "coat and badge," which is rowed for annually on the 1st of August, from London Bridge to Chelsea, by six watermen. Died, 1721.

DOLABELLA, PUBLIUS CORNELIUS, a profligate Roman of a patrician family, and son-in-law of Cicero, whose daughter Tullia he married, B. C. 51. He joined the party of Cæsar, served under him at the battle of Pharsalia and on other occasions, and was made consul, 44. After the death of Cæsar he had Syria for his province, took Smyrna by stratagem, and put to death the proconsul Trebonius. On the motion of Cicero he was declared a public enemy, and being be-

sieged in Laodicea by Cassius, killed himself, B. C. 43.

DOLCE, LUIGI, a Venetian miscellaneous writer, was born in 1606. He translated into Italian great portions of Horace, Ovid, Seneca, Euripides, &c. He also wrote a Life of Charles V. Died, 1668.

DOLCI, CARLO, a celebrated painter, born at Florence, in 1616. He was a pupil of Jacopo Vignoli, and being of a very religious turn, he limited himself in painting to sacred subjects. He had no strength of character, but was excessively timid and satisfied to be priest-ridden. For grace, tenderness, and English, his heads of Madonnas, Magdalens, and saints are inimitable. Died, 1668.

DOLCINO (DULCINUS), of Novara, a celebrated heresiarch and martyr of the 14th century. Born near Novara, he became the disciple and successor of Gerhard Sagarelle, as head of the Apostolic Brethren. With the courage of a soldier and the earnestness of a prophet he preached and taught, and attracted numerous followers. In 1304 they appear as a regular community in Piedmont. They were orthodox in doctrine, but severely denounced the hierarchy of the church. The Inquisition assailed them, and the little society became an army. A papal bull was published, and a mighty league formed against them. Dolcino occupied a strong but desolate position on Monte Calvo, and, after many deadly combats, on Mount Zerbai. Famine joined its awful forces to those of their enemies, and after two years of heroic endurance they were conquered and most of them massacred. Dolcino and Margarita, the sister whom he had chosen according to the custom of the sect, were burnt with horrid deliberate tortures at Vercelli, in 1307. There is a recent account of Fra Dolcino and his times, by L. Mariotti.

DOLGORUCKI, JOHN MICHAELOVICH, a Russian noble, who greatly distinguished himself in several campaigns against the Turks and Swedes, was born in 1764, and died in 1824. Latterly he held several high offices, and he was also known as a poet.

DOLGORUCKI, VASSILI VLADIMIROVICH, Russian diplomatist and field-marshal, was born in 1667. He entered the army, and was employed by Peter the Great on diplomatic missions to Poland, France, Germany, and Holland, but in 1718 he was disgraced and imprisoned. Recalled by Catherine I., he conducted an expedition against Persia, was made field-marshal and member of the council of war by Peter II., suffered a second imprisonment, was again restored by Elizabeth in 1741, and made president of the council of war. Died, 1746.

DOLLOND, GEORGE, F.R.S., &c., the celebrated mathematical-instrument maker, was born in London, 1774. Having lost his father when very young, his education devolved upon his maternal uncle, Peter Dollond, then carrying on the business in St Paul's Churchyard, to which the nephew ultimately succeeded (on which he took the name of Dollond, his father's name being Huggins). In 1787 he was sent to the manufactory of Mr Fairbone, to learn the trade of a mathematical-instrument maker, and in March, 1788, commenced an apprenticeship to the

esteemed. He also edited Fra Paolo's History of the Council of Trent.

DOMITIANUS, TITUS FLAVIUS, the second son of Vespasian, and the last of the 12 Cæsars, was born A. D. 51, and succeeded his brother Titus in 81. He was voluptuous, cruel, and malignant; and though at his accession he made some show of justice, and even of kindness, to the citizens, yet the cruelty of his disposition was too deep-rooted for concealment, and he was both feared and hated for his tyranny. Wars were carried on in his reign in Britain, in Germany, and in Dacia, but, except in Britain, unsuccessfully. Agricola, who achieved the conquest of our island in this reign, excited the jealousy of Domitian, and was recalled to Rome. He was in continual dread of conspirators, and at length fell by the hands of an assassin, in the 45th year of his age, A. D. 96.

DON, DAVID, a Scottish botanist, born at Forfar, in 1800. At the age of nineteen he settled at London and became librarian to the Linnean Society, and in 1836 professor of botany at King's College, London. He was author of numerous botanical memoirs contributed to the Transactions of the Linnean Society, to the Wernerian Society, Edinburgh, and the Edinburgh New Philosophical Journal. He also published a work on the Flora of Nepal. Died, 1840.

DONALD VII., king of Scotland, commonly called Donald Bane, usurped the throne in 1093. He was expelled from the throne by Duncan in 1094, but regained it again by the murder of that prince. He did not, however, long enjoy it, for he was finally dethroned by Edgar Atheling in 1098.

DONALDSON, JOHN WILLIAM, D.D., born in 1812, was educated at the London University, and afterwards graduated at Cambridge, where he was placed second in the classical Tripos, and his great powers attracted the special notice of one of the examiners,—the present bishop of St David's. Within five years after taking his degree he published his "New Cratylus," the first of a series of works which raised him to high eminence in the science of philology. After holding for a short time a Fellowship at Trinity College, he became master of King Edward's School, in the town of Bury St Edmund's. Several years later he resigned this post, and devoted himself altogether to scholarship and biblical criticism, in both of which he exhibited the highest powers, while his peculiar views were much controverted. As a grammarian and linguist his reputation is unquestioned; his theological works, especially "Jashar," written in Latin, incurred severe condemnation from many who appreciated his great learning. Worn out with long and incessant labour, Dr Donaldson fell pre-eminently the victim of a hard working age. In spite of constant warnings from friends who saw that his strength was falling, he relaxed not in his toil of compiling a Greek lexicon, as well as in preparing new editions of his classical works, when he was prematurely cut off at the age of 48, February 10, 1861.

DONATELLO, or DONATO, one of the greatest Italian sculptors, was born at Florence, in 1386. He studied painting at

first, but gave it up from his preference for sculpture. He enjoyed the patronage of the Grand-duke Cosmo I., executed many fine works at Florence and other cities of Italy, and carried the art to a degree of excellence which it had not previously reached in modern times. Among his best works are the statues of St Mark, David, St John, and St George, the group of Judith and Holofernes, the monuments of Pope John XXIII. and Cardinal Brancacci, a Pietà, and an Annunciation. The South Kensington Museum possesses his fine bas-relief, "Virgin and Child," the Pietà, and the celebrated bronze pattern, formerly in the Martelli collection. "The mark of his chisel," says the Baron H. de Triqueti, "is like the footprint of the lion, which can be mistaken for that of no other creature. His innate power and energy are irresistible. He is master of every chord of feeling, and makes them vibrate at his touch." Died at Florence, 1466.

DONATI, VITALIANO, an Italian naturalist, born at Padua, in 1717; author of a "Natural History of the Adriatic." He travelled to the East for scientific purposes, and died at Massorah, in 1763.

DONIZETTI, GAETANO, a distinguished musical composer, was born at Bergamo in 1798. He was educated under Mayer and Mattel, and before he had completed his 20th year, he had produced "Enrico di Borgogna," an opera in which Madame Catalani sustained the principal character. This was rapidly succeeded by others; and his fertility of invention may be gathered from the fact that, besides other musical compositions, he produced in all 63 operas, many of which, such as "Anna Bolena," "Elisir d'Amore," "Lucia di Lammermoor," "La Figlia del Reggimento," and "Don Pasquale," have taken permanent possession of the stage. His mind gave way in 1844; and after four years' residence in a maison de santé near Paris, he was removed to Bergamo, where he died in 1848.

DONNE, JOHN, an English poet and divine, was born in London, in 1573. He was brought up in the Catholic faith; but after completing his studies at Oxford, he embraced Protestantism, and became secretary to the lord chancellor Ellesmere. After having lost his office, and even been imprisoned for clandestinely marrying the chancellor's niece, he took orders, was made one of King James's chaplains, and became preacher of the Lincoln's Inn and dean of St Paul's. Donne was termed by Dr Johnson the founder of the metaphysical school of poetry. His works comprise letters, sermons, theological essays, &c. His prose works show deep thinking and strong powers of reasoning, and many of his poems are rich in original thought, highly imaginative, and full of melody. The Life of Donne is one of those well-known volumes. Died, 1631.

DONOVAN, EDWARD, an English naturalist, author of various extensive works, which were both useful and popular in their time. Among them are "A Natural History of British Insects," "Natural History of British Birds," "An Epltoime of the Insects of Asia," &c. He also published a periodical

work entitled "The Naturalist's Repository." Died, 1837.

DOPPELMAYER, JOHANN GABRIEL, German mathematician and natural philosopher, was born at Nürnberg in 1671. He was educated at the university of Halle, visited England and other countries of Europe, and held the professorship of mathematics at Nürnberg for nearly 60 years. He distinguished himself by his numerous and interesting electrical experiments as well as by his skill in grinding object-glasses, and polishing mirrors for telescopes. He wrote a curious work on the Newly-discovered Phenomena of Electricity, Notices of the Mathematicians and Artists of Nürnberg, &c.; and published a Celestial Atlas. Doppeimayer was a member of the Royal Society of London, and of the Academies of Vienna, Berlin, and St Petersburg. Died, 1760.

DORAT, or DAURAT, JEAN, French poet, born in 1807, was professor of Greek at the Royal College, and poet-laureate to Charles IX. He has the reputation of greatly contributing to the revival of classical literature in France, and of having written a host of Greek and Latin verses, besides some French poems. Died, 1888.

DORAT, CLAUDE JOSEPH, French poet, born in 1734. His works are voluminous, and embrace poetry of every class, with dramas and romances. Though popular at the time, they are now generally neglected. Died, 1780.

DORIA, ANDREA, a Genoese naval commander of great renown, was born of a noble family at Oneglia, in 1466. Having distinguished himself in the service of different Italian states, and successfully contended against the African pirates and other enemies of his native country, he entered the French service, in the hope of counteracting the revolution that had broken out in Genoa by putting that city in possession of the French; but failing in his design, he joined with the Imperialists in endeavouring to expel them. This object being effected, he refused to make himself sovereign, as he might easily have done, re-organized the republic, giving it the form which it retained till overthrown during the French Revolution, 1798. The Genoese Senate gave him the title of "the Father and Defender of his Country," erected a statue to his honour, and built a palace for him. His whole life was a series of great exploits and brilliant successes; and he died, at the great age of 92, in 1860.

DORIGNY, MICHEL, a French painter and engraver in aqua-fortis, was born in 1617, and died in 1666.

DORIGNY, NICOLAS, son of the foregoing, born in 1657, spent nearly 30 years in Italy, and while there engraved many great pictures, especially the "Descent from the Cross," after Daniele de Volterra, and the "Transfiguration" by Raphael. In 1711 he came to England, and at once commenced his prints of the celebrated cartoons of Raphael at Hampton Court, for which he received the honour of knighthood from George I. The task occupied him about eight years. Dorigny was a member of the

French Academy of Painting. He died at Paris, in 1746, aged 90.

D'ORSAY, Count ALFRED, who will be long remembered as a man of fashion and of public notoriety, from his alliance with the Blessington family, was the son of General D'Orsay, and was born at Paris in 1798. He entered the army at an early age, and was quartered at Valence in 1822, when he became acquainted with Lord and Lady Blessington, and renounced his military career for the pleasure of their society. In 1827 he married Lord Blessington's only daughter by a first marriage, but a separation followed at no distant period; and Lord Blessington having died at Paris in 1829, Count D'Orsay returned to England with Lady Blessington, where they became the centre of a circle highly distinguished for art, rank, literature, and accomplishments. In the later period of his life he displayed considerable artistic talent and taste, both as a painter and sculptor. Having shown kindness and hospitality to Louis Napoleon when an exile in London, the Prince President was not ungrateful to his former friend, and in 1862, soon after the *coup d'état*, he was nominated Directeur des Beaux Arts, with a handsome salary; but he did not live to enjoy it. Died, 1862.

DORSCH, EVERHARD, a celebrated engraver on gems, was born at Nürnberg in 1649, and died in 1712.

DORSCH, CHRISTOPH, engraver on gems, and brother of the preceding, born at Nürnberg in 1676, and died there in 1732. He was the pupil of Everhard, and obtained a higher reputation than his master.

DORSET THOMAS SACKVILLE, Earl of, the son of Sir Richard Sackville, was born in 1636, and educated at Oxford and Cambridge. He was distinguished both as a statesman and an author; having been ambassador to Holland, chancellor of Oxford University, and lord treasurer. He was first created Lord Buckhurst, and subsequently invested with the order of the Garter, and made earl of Dorset. He wrote the "Induction to the Mirror for Magistrates," and the "Complaint of Henry, Duke of Buckingham," &c. Died, 1608.

DORSET, CHARLES SACKVILLE, Earl of, was born in 1637. He was one of the distinguished wits and revellers at the court of Charles II.; but he was fond of soldiering, and while serving as a volunteer, under the duke of York, in the Dutch war, he wrote on the eve of a battle the song, "To all you ladies now on land." At the revolution he was made lord chamberlain of the household. His poems possess considerable point and liveliness. Died, 1706.

DOSSI, DOSSO, a painter of Ferrara. He was a pupil of Lorenzo Costa, and afterwards studied at Venice and Rome. He was employed by the duke of Ferrara, and enjoyed the friendship of the poet Ariosto, whose portrait he painted. His brother, Giambattista, was also a painter, and his fellow-student and worker. Born, about 1490; died, 1560.

DOUCE, FRANCIS, antiquary, well known to the literary world by his "Illustrations of Shakespeare and of Ancient Manners."

He also contributed to Archæologia, the &c.; and shortly before a beautiful volume, of Death," by dissecting Holbein and Macabre years a member of of rics, and formerly kept the British Museum.

DOUGLAS, GAVIN, poet of some eminence Archibald, 5th earl of Brechin in 1474. After education he entered provost of St Giles's, and the abbacy of Aberbric of Dunkeld. Politic him to seek refuge was liberally treated he fell a victim to the 1522. He wrote "The and other works; but is translation of Virgil into English. It was not published till 1653.

DOUGLAS, JAMES, was born in Scotland, London, and was patroned John Hunter; and the author of a "History of Operation," a valuable graphy of Anatomical medical science.

DOUGLAS, Sir JAMES, prior, one of the associates. He took a distinguished part of Bannockburn, and banneret. On the day commissioned to carry the holy sepulchro at Jerrand he sailed in Jur off Sluys, in Flanders, and companions in his that Alphonso XI, the and Castle, was engaged Oman the Moor; and hits against the focus Moors were defeated; way to his impetuous too eagerly, and throw casket which contained sovereign, cried out, "thou wert wont, Douglas Christian knight, who lowers perished while a of Sir Walter St Clair o

DOUGLAS, ARCHIBALD, preceding, was appointed land for King David B battle of Halidon Hill,

DOUGLAS, WILLIAM, was a warrior of considerable 14th century, but whose by an act of baseness an brave Alexander Ramsay castle of Roxburgh for rewarded with the custody the shrievalty of the adj while holding his court suddenly entered with a lowers, slew several of R and having bound him

He also contributed various papers to the *Archæologia*, the *Gentleman's Magazine*, &c.; and shortly before his death published a beautiful volume, illustrating the "Dance of Death," by dissertations on the claims of Hoibela and Macaber. He was for many years a member of the Society of Antiquaries, and formerly keeper of manuscripts in the British Museum. Died, 1834.

DOUGLAS, GAWIN, a Scotch divine, and poet of some eminence, was the son of Archibald, 5th earl of Angus, and born at Brechin in 1474. After receiving a liberal education he entered the church, was made provost of St Giles's, and eventually obtained the abbacy of Aberbrothok and the bishopric of Dunkeld. Political dissensions induced him to seek refuge in England, where he was liberally treated by Henry VIII., but he fell a victim to the plague of London, in 1522. He wrote "The Palace of Honour," and other works; but his chief performance is a translation of Virgil's *Æneid*, noteworthy as the first translation of a Roman classic into English. It was completed in 1513, but not published till 1553.

DOUGLAS, JAMES, an eminent anatomist, was born in Scotland in 1675; settled in London, and was patronized by the celebrated John Hunter; and died in 1742. He is the author of a "History of the Lateral Operation," a valuable work on the *Bibliography of Anatomy*, and other works on medical science.

DOUGLAS, Sir JAMES, a renowned warrior, one of the associates of Robert Bruce: He took a distinguished part in the battle of Bannockburn, and was made a knight-banneret. On the death of Bruce, he was commissioned to carry the king's heart to the holy sepulchre at Jerusalem, upon which errand he sailed in June, 1330. On arriving off Sluys, in Flanders, where he expected to find companions in his pilgrimage, he learned that Alphonso XI., the young king of Leon and Castile, was engaged in a war with Osman the Moor; and Douglas entered the lists against the foes of Christendom. The Moors were defeated; but Douglas, giving way to his impetuous valour, pursued them too eagerly, and throwing among them the casket which contained the heart of his sovereign, cried out, "Now pass onward as thou wert wont, Douglas will follow thee or die." The fugitives rallied, surrounded the Christian knight, who with a few of his followers perished while attempting the rescue of Sir Walter St Clair of Roslin.

DOUGLAS, ARCHIBALD, brother of the preceding, was appointed regent for Scotland for King David Bruce, and fell at the battle of Halidon Hill, July 22, 1333.

DOUGLAS, WILLIAM, lord of Liddisdale, was a warrior of considerable renown in the 14th century, but whose fame was tarnished by an act of baseness and inhumanity. The brave Alexander Ramsay having taken the castle of Roxburgh from the English, was rewarded with the custody of the castle and the shrievalty of the adjoining district; and while holding his court at Hawick, Douglas suddenly entered with a band of armed followers, slew several of Ramsay's attendants, and having bound him with fetters, threw

him into a dungeon of Hermitage Castle, and left him there to perish. Enormous as this crime was, the king pardoned him; but he was killed by the earl of Douglas, in 1353, while hunting in Ettrick Forest.

DOUGLAS, WILLIAM, first earl of Douglas, was taken prisoner with David Bruce at the battle of Durham, but soon ransomed. He recovered Douglasdale and other districts from the English; afterwards went to France, fought at the battle of Poitiers, and died in 1384.

DOUGLAS, JAMES, second earl of that name, after performing many valorous exploits, was killed at the battle of Otterburn, in 1388.

DOUGLAS, WILLIAM, lord of Nithsdale, called "The Black Douglas," whose very name was said to be a terror to the English, married Egedia, daughter of Robert II.; and after a life of bold and successful warfare, was murdered by the earl of Clifford, in 1390.

DOUGLAS, ARCHIBALD, the fourth earl of Douglas, succeeded his father Archibald in his title and estates, and married Margaret, daughter of Robert II. When Henry IV. of England laid siege to the castle of Edinburgh, in 1400, Douglas successfully defended it; but he lost an eye, and was taken prisoner at the battle of Homildon. He afterwards joined Percy in his rebellion against the king, was taken prisoner at the battle of Shrewsbury, but recovered his liberty and went to France, where he was slain at the battle of Verneuil, in 1421.

DOUGLAS, ARCHIBALD, the fifth earl of Douglas, was the ambassador to England for the release of James I. of Scotland. Died, 1438.

DOUGLAS, WILLIAM, the sixth earl of Douglas, is remembered on account of the tragical fate which awaited him, almost as soon as he came to his family titles and estates. Under the specious pretext that the young earl's presence was necessary at the meeting of parliament, which was about to be held at Edinburgh, after the reconciliation of Livingston and Creighton, he and his brother accepted an invitation to a royal feast at the castle. The entertainment was prolonged with unusual pomp, and every delicacy spread on the table; till at length a bull's head was suddenly placed before the two noble guests, which they know to be the herald of death. They then hastily sprung from their seats, and made some vain efforts to escape; but a body of armed men, at a given signal, rushed in, bound their hands, and led them to instant execution. This happened in 1437.

DOUGLAS, WILLIAM, the eighth earl of Douglas, was a haughty and ambitious noble, wielding at times an uncontrolled influence over the king, and at others openly bearing his authority. He raised the power and grandeur of the house of Douglas to its loftest height; and, not content with the sway he exercised at home, caused himself to be received at Rome and in France with those honours which are only due to sovereign princes. Among other despotic acts which he committed, was his beheading Macallan of Bombic, for having refused to join

he earl in his attack on Crichton, between whom and Douglas there was a deadly feud. But the indignation of King James II. of Scotland at this and similar actions, determined him at length to get rid of the opposition of a subject so daring and powerful. The earl was therefore invited to attend his sovereign in parliament at Stirling, which he accepted; and while vainly remonstrating with him on the impropriety of his conduct, the king drew a dagger and plunged it into the heart of Douglas, Feb. 13, 1452.

DOUGLAS, JAMES, brother of the foregoing, and ninth and last earl of Douglas, took up arms to revenge his brother's death, and, assembling all the members of the league, brought a large army into the field. The king, however, being active, and well provided with forces, laid siege to the castle of Abercorn, the best fortified seat of the earl, and the two armies lay encamped within a short distance of each other; but without coming to an engagement, Douglas fled to Annandale, with his brothers, the earls of Ormond and Moray. Thither they were pursued by the king's forces, under the command of the earl of Angus, Moray slain, Ormond made prisoner, and Douglas himself driven to provide for his safety in England. Several years after, Douglas returned with Percy, earl of Northumberland, upon an expedition against his country, in which Douglas was taken prisoner; and James contented himself with sending his rebel captive to the abbey of Lindores, where he died, in 1489.

DOUGLAS, GEORGE, fifth earl of Angus, was commander of the forces that defeated the earls of Douglas and Northumberland, when Douglas was taken prisoner, and his estates forfeited. Died, 1462.

DOUGLAS, ARCHIBALD, sixth earl of Angus, commanded the right wing of the royal army at the battle of Torwood, where James III. lost his life; and at the fatal battle of Flodden Field he endeavoured, though unsuccessfully, to dissuade James IV. from that engagement. His eldest son, George, was there slain; and the earl died in the year following.

DOUGLAS, JAMES, earl of Morton. [MORTON.]

DOUGLAS, JAMES, earl of Morton and Aberdeen, was born at Edinburgh, in 1707. He established the Edinburgh Philosophical Society, and in 1733 was elected president of the Royal Society of London. Died, 1768.

DOUGLAS, JOHN, a learned divine and critic, born at Pittenweem, Fifeshire, in 1721; was educated at Oxford, and became travelling tutor to Lord Pulteney; obtained the deanery of Windsor; was raised to the see of Carlisle in 1787; transferred to that of Salisbury in 1792; and died in 1807. Dr Douglas was a distinguished writer, and the friend of Dr Johnson and most of the eminent literary characters of his day. He vindicated Milton from the charge of plagiarism brought against him by Lauder; entered the lists against David Hume, by publishing "The Criterion, or a Discourse on Miracles," and prepared for the press Captain Cook's second and third voyages. He was vice-president of the Society of Antiquaries,

and one of the trustees of the British Museum.

DOUGLAS, Sir HOWARD, an English general and writer on military science, was born at Gosport, in Hampshire, in 1776. He was son of Admiral Sir Charles Douglas, was educated at the Royal Military College, Woolwich, and entered the army at an early age. He served in the Peninsular war, in 1808-9, and was present at Corunna, took part in the Walcheren expedition, and again served in the Peninsula. At the close of the war he was created K.C.B., and promoted to the grade of G.C.B. in 1841. He was governor of New Brunswick from 1823 till 1829, and lord high commissioner of the Ionian Islands from 1835 till 1840. In 1842 he succeeded, after two unsuccessful contests, in obtaining a seat in parliament for Liverpool, which he kept till 1846. He obtained the rank of general in 1851. His principal work is the "Treatise on Naval Gunnery," first published in 1819, which has passed through four editions. He was also author of an "Essay on the Principles and Construction of Military Bridges," and other scientific treatises. Died at Tunbridge Wells, in November, 1861. A contemporary critic remarks that "the value of this distinguished officer's labours lies in his having always grafted new discoveries on old experience," and in his being at once a conservative and an improver.

DOUSA, JAN, whose real name was VANDER DOES, was born at Noordwick, Holland, in 1645. He was left an orphan at five years old, but through the kindness of his relatives received a first-rate education, studying successively at Delft under Henry Junius, at Louvain, Douai, and finally at Paris. He there became acquainted with several of the most eminent men of the time. On his return to Holland he married. He became eminent both as a soldier and a scholar. After being sent as ambassador to England, in 1672, he was made governor of Leyden in 1674, and heroically and successfully defended it against the Spaniards, who were besieging it; he was also the first curator of the university of that city, and died there, of the plague, in 1694. As an author, Dousa distinguished himself by his "Annals of Holland," as well as by various Latin poems and criticisms. The "Annals" were published in Latin verse, but were immediately turned into prose, and are highly esteemed. Dousa's son, JAN, who died in his 26th year, assisted his father in the Annals, and was an eminent classical scholar and mathematician. He had also three other sons, of great classical attainments.

DOUW, or DOW, GERARD, an eminent Dutch painter, and the pupil of Rembrandt, was born at Leyden in 1613, and died there in 1675, or, as some say, in 1680. For the excellence of his colouring, delicacy of finish, and attention to the minutiae of his art, this master's compositions are unrivalled; and the prices which some of his paintings have obtained are almost without parallel. His portrait, painted by himself, is in the National Gallery. Metzuz and Mieris were his pupils.

DOVER, GEORGE JAMES WELBORE

AGAR ELLIS, Lord, born in 1797, and complete church, Oxford. He was member for Hereford in parliament; he sat for Oakhampton; pointed chief commissioner of the arts, and as a promoter of the Lord Dover will be acquainted with the character of his talents as an author. In 1828 he published "Enquiries respecting the Claims of the Duke of Clarence," and appeared the "Ellis's History of the Duke of Great," and his last work was editing the "Lettres de Sir Horace Mann." A principal contributor to the Edinburgh Review was elected president of the Society of Literature. Died in 1861.

DOYEN, CABRIE, a French painter, born in 1750, pupil of Vanloo. The "Death of St. Louis" and "Death of St. Louis" works. He afterwards died there in 1810.

DRACO, an Athenian lawgiver, whose laws had rendered Athens a more humane and civilized state. Durling, a ship, about B. C. 623, code, in which some punishments with death or sacrifice. Hence ten in blood." The written laws of Athens superseded by the Draco is said to have been in a theatre in Egina.

DRAKE, Sir FRANCIS, an English sailor and commander of the Devonshire, in the royal navy under Hawkins; and distinguished valour in the unfortunate expedition against the Spaniards, in the year 1570. He went to sea against the Spaniards, and was repeatedly successful in receiving the command of the Spanish American, two of their cities, and booty. On his return to England, three frigates at which he served as a captain of Essex, and distinguished by his bravery. Hatton introduced him to Drake, who disclosed to him the riches of the Spanish settlements, explored the coast as far as 48° N. latitude. He then went to Plymouth, and returned to Plymouth

AGAR ELLIS, Lord, was born in the year 1797, and completed his education at Christchurch, Oxford. In 1818 he was returned as member for Heytesbury; in succeeding parliaments he sat for Seaford, Ludgershall, and Ockhampton; and in 1830 he was appointed chief commissioner of woods and forests. But it is as a patron of the fine arts, and as a promoter of literature, that Lord Dover will be chiefly remembered; his acquaintance with the former entitling him to the character of a connoisseur, and his talents as an author being highly respectable. In 1828 he published "Historical Inquiries respecting the Character of Edward Hyde, Earl of Clarendon;" after which appeared the "Ellis Correspondence," which was followed by his "Life of Frederick the Great;" and his last literary task was that of editing the "Letters of Horace Walpole to Sir Horace Mann." He was also an occasional contributor to the Quarterly and Edinburgh Reviews, &c. and in 1832 he was elected president of the Royal Society of Literature. Died, 1833.

DOYEN, GABRIEL FRANÇOIS, an eminent French painter, born at Paris, 1726, was the pupil of Vanloo. The "Death of Virginia," and "Death of St. Louis," were among his best works. He afterwards settled in Russia, and died there in 1806.

DRACO, an Athenian legislator, the extraordinary and indiscriminate severity of whose laws has rendered his name odious to humanity. During the period of his archonship, about B. C. 623, he enacted a criminal code, in which some slight offences were punished with death, no less than murder or sacrilege. Hence it was said to be "written in blood." The laws of Draco, the first written laws of Athens, were for the most part superseded by the legislation of Solon. Draco is said to have been accidentally killed in a theatre in Egina.

DRAKE, Sir FRANCIS, an eminent navigator and commander, was born at Tavistock, Devonshire, in 1545. He first served in the royal navy under his relative, Sir John Hawkins; and distinguished himself by his valour in the unfortunate expedition against the Spaniards, in the harbour of Vera Cruz. In 1570 he went to the West Indies, on a cruise against the Spaniards, which he soon repeated with success; and in 1572, having received the command of two vessels, for the purpose of attacking the commercial ports of Spanish America, he took possession of two of their cities, and returned laden with booty. On his return he equipped, in Ireland, three frigates at his own expense, with which he served as a volunteer, under the earl of Essex, and distinguished himself so much by his bravery, that Sir Christopher Hatton introduced him to Queen Elizabeth. Drake disclosed to her his plan, and being furnished with five ships, he sailed, in 1577, to attack the Spaniards in the South Seas. In this expedition he ravaged the Spanish settlements, explored the North American coast as far as 48° N. lat., and gave the name of New Albion to the country he had discovered. He then went to the East Indies, and having doubled the Cape of Good Hope, returned to Plymouth in 1580. The queen

dined on board his ship at Deptford, and knighted him. In 1585 he again sailed to the West Indies, and succeeded in taking several places and ships. In 1587 he commanded a fleet of 30 sail, with which he entered the harbour of Cadiz and other Spanish ports, and destroyed an immense number of ships which were preparing for the great attack on England; and, in the following year, he commanded, as vice-admiral under Lord Howard, and had his share in the destruction of the Spanish armada. He died off Nombre de Dios, in 1596. Sir Francis represented Plymouth in parliament; and to him that town is indebted for a supply of water, which he caused to be conveyed to it from springs at several miles distance. His victories have been equalled, nay, surpassed, by modern admirals; but his generosity has never been rivaled; for he divided, in just proportional shares, among his seamen, the booty he took from the enemy. Sir John Barrow published "The Life, Voyages, and Exploits of Admiral Sir Francis Drake."

DRAKE, FRANCIS, an eminent antiquary and surgeon at York; author of "Eboracum," or the history and antiquities of that city. Died, 1770.

DRAKENBERG, CHRISTIAN JACOBSEN, a Norwegian sailor, who is said to have lived to the age of 145 years. Born in 1626, he went early to sea, was captured by Algerine pirates, and kept in slavery about fifteen years, quitted a sea-faring life in 1717, and died at Aarhus in 1772. It is said that, hearing his great age questioned, in 1732, he took a long journey on foot from Copenhagen, where he was then in the service of a robleman, to procure the register of his baptism.

DRAKENBORCH, ARNOLD, Dutch philologist, born at Utrecht, in 1684. He studied at the universities of Utrecht and Leyden, and became professor of history and eloquence at the former. He was author of several learned dissertations on subjects of ancient history, especially "De Præfectis Urbis," several times republished. He also published editions of Livy and Silius Italicus. Died at Utrecht, 1747.

DRAPER, Sir WILLIAM, a military officer, well known also as a controversial writer, was born at Bristol in 1721. He received his education at Eton and Cambridge. Having entered the army, he distinguished himself in the East Indies, was raised to the rank of a colonel in 1760, and in 1763 he commanded the troops at the capture of Manilla, for which he received the honour of knighthood. In 1779 he was appointed lieutenant-governor of Minorca; and when that place surrendered to the enemy he preferred charges against General Murray, the governor, but which he failed to substantiate, and was commanded by the court to make an apology to him. He owes his literary celebrity to the circumstance of his having undertaken the defence of his friend the marquis of Grnby against the attacks of Junfus. He died in 1787.

DRAUGHTON, MICHAEL, an English poet, was born at Atherstone, Warwickshire, in 1563, and educated at Oxford. He was in-

debted for a great part of his education to Sir Henry Goodere, and afterwards lived for a long time in the family of the earl of Dorset, as it would seem, in a state of dependence. He wrote "The Shepherd's Garland," "Barons' Wars," "England's Heroical Epistles," "Polyolbion," a description of England, "Nymphidia," &c. Of these the "Polyolbion" is the most important. It is remarkable for its combination of great poetical excellence with authentic and minute information. The "Nymphidia" is a singularly pleasing fairy-tale in verse. Drayton held the office of poet-laureate. Died, 1631.

DREBBEL, CORNELIUS VAN, a Dutch chemist and natural philosopher, was born at Alkmaar in 1672. With a considerable share of charlatanism, he combined real talent, and made several useful discoveries; such as the invention of a thermometer, the method of dyeing scarlet, and the improvement of telescopes and microscopes. He died at London in 1634.

DREINCOURT, CHARLES, a French Protestant divine, was born at Sedan in 1696, and died at Paris in 1669. He was the author of several religious books, but the only one by which he is now remembered is that entitled "Consolations against the Fears of Death."

DREW, SAMUEL, M.A., metaphysician and divine, was the son of poor parents at St Austell, Cornwall, and was born in 1765. At ten years of age he was apprenticed to a shoemaker. Though he was almost destitute of education, as he grew up he became a shrewd and subtle disputant among his shopmates; while his jocose manner and vivacious disposition led him, in early life, not only to slight the truths of religion, but to ridicule those of his acquaintance who embraced them. He was at length, however, aroused to a sense of their importance by the preaching of Dr Adam Clarke; and, joining the Methodist society, he determined to abandon his former practices, and devote every moment he could spare to the acquirement of religious knowledge. Indefatigable in its pursuit, he soon appeared as a local preacher, while he still carried on his business; not venturing before the world as an author till 1799, when he published his "Remarks on Paine's Age of Reason." This was very favourably received; but it was to his next production, entitled "An Essay on the Immateriality and Immortality of the Soul," that Drew was chiefly indebted for his reputation.—Quitting trade, he wrote several other works, among which was his "Treatise on the Being and Attributes of God;" and from the year 1819 to his death he edited the Imperial Magazine with singular ability; the careful and dispassionate view he took of every subject under his review eminently qualifying him for the office of critic. He died in March, 1833.

DROUET, JEAN BAPTISTE, was born in 1763. He was postmaster of Menchould when Louis XVI. and his family, in 1791, passed through that town in their endeavour to escape from France; and it was owing to Drouet that they were conducted back to

Paris. For this important service the National Assembly offered him 30,000 francs, which he refused. In 1792 he was nominated deputy to the Convention, in which he distinguished himself by his support of the most violent measures. He was afterwards sent as commissioner to the army of the north, and being taken prisoner by the Austrians, was exchanged in 1795, with others of his party, for the daughter of the unfortunate Louis. He became a member of the council of Five Hundred; and, under the consulate, sub-prefect of St Menchould. In 1815 he was chosen deputy to the Chamber of Representatives; but, being excepted from the amnesty at the beginning of the following year, and condemned to exile, he returned to Macon, where he died in 1824.

DROUET, JEAN BAPTISTE, Count D'ERLON, marshal of France and governor of Algeria, was born at Reunnes, 1765. He served in the army throughout the wars of the revolution, distinguishing himself at Hohenlinden, Jena, Dantzic, and Friedland; was severely wounded at the last-named battle, and was named grand officer of the Legion of Honour; served next in the Tyrol and in the Peninsular war, and became aide-de-camp to Marshal Soult. He was appointed governor-general of Algeria about 1834; and in 1843 marshal of France. Died, 1844.

DROUOT, General Count, the well-known commander of the artillery of the guard under Napoleon, was born, as he himself says, "of poor parents, who earned by the sweat of their brow the bread of a numerous family," at Nancy, 1774. Scarcely had he finished his education when the wars of the revolution broke out in 1792. The following year he was admitted into the school of artillery as sub-lieutenant, and gradually rose through the different ranks to that of general of division, which he attained in 1813. It would occupy more space than we can afford to give even an outline of the achievements of this remarkable man. In abilities as an officer of artillery, in bravery and steadiness, and above all in single-minded honesty, staunch fidelity, and unimpeachable virtue, he had no superior and but few equals in all that band of heroes who raised the emperor to his throne. Nor must his fervent piety be overlooked. He always had a small Bible with him; to read this constituted his chief delight, and he did not scruple to avow the fact. His modesty was equal to his skill, and his fidelity to his courage; and he gave a striking proof of the latter by accompanying Napoleon to Elba amid the general defection that disgraced the emperor's protégés. After the defeat at Waterloo, General Drouot was included in the ordinance of proscription; but he immediately surrendered to take his trial, and having been found "not guilty," he returned to his native town, where he "gave himself up to the charms of a quiet private life." The return of the ashes of the emperor in 1840 filled him with great joy; all his last hopes and wishes were fulfilled by this event; and it should seem that from this period he longed for the moment to arrive when he should be admitted "to that everlasting dwelling, where those who have

well loved and well met their reward.

DROZ, PIERRE chancian, was a native born in 1721. Amore he made a writing of those fingers, & with those of nature.

DROZ, HENRI the foregoing, born his father, by whom construction of mechanics of 22 he went to products of his ingenuity an automaton, representing on the harpsichord notes in the music head, and having fingers and made an obelisk died at Naples, in 1773.

DROZ, FRANÇOIS French littérateur, 1773. After holding for some years he devoted himself and became a member of and professor of moral at the Institute. du Règne de Louis la Philosophie Morale works. Died, 1850.

DRUMMOND, GEORGE, a patriot and 1837. When the standard of rebellion was the first to appear and, raising a company joined the duke of the battle of Sheriffmoot he repeated, upon rebels in 1745, and of Preston. He held excise and customs for in 1737 he was made excise, an officer during the remainder also six times lord and to his patriotic zeal for many improvements aged 80.

DRUMMOND, THOMAS and natural philosopher Drummond or lime limeburgh in 1797. He was burgh, and at the Mellick, and entered the 1819 he became assistant in the trigonometrical survey and Ireland. The limeburgh about 1825, in the of Ireland. About the dated his invention of Drummond became secretary to Lord Spencer, oblation, and in 1835 secretary for Ireland. In attention to his various duties, and enjoy parties. Died, 1840.

DRUMMOND, WILLIAM was the son of Sir John thorneden, and born at educated at the university studied civil law at Boc

well loved and well served their country will meet their recompense." Died, 1847.

DROZ, PIERRE JACQUET, a skilful mechanic, was a native of Switzerland, and born in 1721. Among other curious things he made a writing automaton, the motions of whose fingers, &c., corresponded exactly with those of nature. Died, 1790.

DROZ, HENRI LOUIS JACQUET, son of the foregoing, born in 1759, excelled even his father, by whom he was taught, in the construction of mechanical figures. At the age of 22 he went to Paris with some of the products of his ingenuity; among which was an automaton, representing a woman playing on the harpsichord, which followed the notes in the music book with the eyes and head, and having finished playing, got up and made an obeisance to the company. He died at Naples, in 1791.

DROZ, FRANÇOIS XAVIER JOSEPH, French littérateur, was born at Besançon, in 1773. After holding a professorship there for some years he settled at Paris in 1802, and devoted himself to literary work. He became a member of the French Academy, and professor of moral and political science at the Institute. He wrote a "Histoire du Règne de Louis XVI.," a treatise "De la Philosophie Morale," and several other works. Died, 1850.

DRUMMOND, GEORGE, an active, enterprising, and patriotic Scotchman, was born in 1687. When the earl of Mar reared the standard of rebellion in 1715, Drummond was the first to apprise the ministry of it; and, raising a company of volunteers, he joined the duke of Argyle, and assisted at the battle of Sheriffmuir. This loyal conduct he repeated, upon the approach of the rebels in 1745, and was present at the battle of Preston. He held various offices in the excise and customs from an early age; and in 1737 he was made one of the commissioners of excise, an office which he retained during the remainder of his life. He was also six times lord provost of Edinburgh, and to his patriotic zeal the city is indebted for many improvements. He died in 1766, aged 80.

DRUMMOND, THOMAS, mathematician and natural philosopher, inventor of the Drummond or lime light, was born at Edinburgh in 1797. He was educated at Edinburgh, and at the Military College, Woolwich, and entered the army as engineer. In 1819 he became assistant to Colonel Coiby in the trigonometrical survey of Great Britain and Ireland. The lime light was first used by him about 1825, in the course of the survey of Ireland. About the same time may be dated his invention of a heliostat. Captain Drummond became subsequently secretary to Lord Spencer, obtained a government pension, and in 1835 was appointed under-secretary for Ireland. He was indefatigable in attention to his various and often arduous duties, and enjoyed the esteem of all parties. Died, 1840.

DRUMMOND, WILLIAM, a Scotch poet, was the son of Sir John Drummond of Hawthornden, and born there in 1585. He was educated at the university of Edinburgh, and studied civil law at Bourges; but poetry had

more charms for him than law, and, on coming to the family estate, he devoted himself, amidst the romantic beauties of Hawthornden, to poetry and polite literature. His poems are replete with tenderness and delicacy. He died in 1649; and his death is said to have been accelerated by grief for the death of Charles I. The most recent edition of his poems is that by Cunningham, published in 1859.

DRUMMOND, Sir WILLIAM, F.R.S., a learned antiquary, statesman, and the author of several works, classical and historical. He was a privy councillor, and at one period filled the office of envoy extraordinary and minister plenipotentiary from Great Britain to the king of the Two Sicilies; and at another (1801), went on an embassy to Constantinople, when he was invested with the Turkish order of the Crescent. His principal works are "A Review of the Government of Sparta and Athens," "Herculanensis," "Odm," a poem; and "Origines, or Remarks on the Origin of several Empires, States, and Cities." He died at Rome, in 1828.

DRUSUS, CLAUDIUS NERO, a distinguished Roman general, was the son of Tiberius Claudius Nero and Livia, and was born B.C. 38. He was much esteemed by Augustus as well as by the people, and early distinguished himself in war. With Tiberius, his elder brother, he defeated and drove out of Italy the Rhæti and Vindelici. He commanded in four campaigns in Germany with great success, penetrating beyond the Weser to the Elbe; united the Rhine to the Yssel by a canal; was consul B.C. 9; and died in Germany the same year. His body was taken to Rome by Tiberius, who had hastened to see him, and arrived just before he died. Drusus married the daughter of Marcus Antonius and Octavia, and was by her the father of Germanicus and Claudius.

DRYANDER, JONAS, naturalist, was by birth a Swede, but came to England, and was patronized by Sir Joseph Banks. He became librarian to the Royal Society, and vice-president of the Linnæan. Born, 1748; Died, 1810.

DRYDEN, JOHN, one of the most celebrated English poets, was born at Aldwinkle, Northamptonshire, in 1631, and received his education at Westminster School and Trinity College, Cambridge. In 1657 he came to London, and acted as secretary to his relation, Sir Gilbert Pickering, who was one of Cromwell's council; and on the death of the Protector, he wrote his well-known stanzas on that event. At the restoration, however, he greeted Charles II. with a poem, entitled "Astræa Redux," which was quickly followed by a panegyric on the coronation; and from that time his love for the royal house of Stuart appears to have known no decay. In 1661 he produced his first play, "The Duke of Guise," but the first that was performed was "the Wild Gallant," which appeared in the year following. In 1667 he published his "Annus Mirabilis;" and his reputation, both as a poet and a royalist, being now established, he was appointed poet-laureate and historiographer royal, with a salary of £200 per annum. He now

became professionally a writer for the stage, and produced many pieces, some of which have been strongly censured for their licentiousness and want of good taste. In 1681 he commenced his career of political satire; and at the express desire of Charles II. composed his famous poem of "Absalom and Achitophel," which he followed up by "The Medal" and "A Satire on Sedition." His next satire was "Mac Flecknoe;" after which appeared "Religio Laici," a compendious view of the arguments in favour of revelation. At the accession of James II., Dryden became a Roman Catholic, and, like most converts, endeavoured to defend his new faith at the expense of the old one, in a poem called "The Hind and Panther," which was admirably answered by Prior and Montague, in "The Country Mouse and City Mouse." The abdication of James deprived Dryden of all his official emoluments; and during the 10 concluding years of his life, when he actually wrote for bread, he produced some of the finest pieces of which our language can boast. His translation of Virgil, which alone would be sufficient to immortalize his memory, appeared in 1697; and, soon after, that master-piece of lyric poetry, "Alexander's Feast," his "Fables," &c. The freedom, grace, strength, and melody of his versification have never been surpassed; and in satire he stands unrivalled; but as a dramatic writer, though he has many striking beauties, he does not generally excel. His prose essays afford a fine specimen of composition, and are replete with critical ability. He died in 1700, and was buried in Westminster Abbey. There is a good Life of Dryden by Robert Bell, who has also edited his poetical works.

DUBOIS, EDWARD, who gained a high reputation in the lighter literature of the day, was born 1775. Educated at Christ's Hospital, he was called to the bar at the Inner Temple in 1809, but he took little interest in his profession, though it subsequently enabled him to fill with advantage the only two public offices he ever held, the deputy judgeship of the court of requests, and the secretaryship to the commissioners in lunacy. He commenced his literary career as the editor of the Monthly Mirror, while Thomas Hill was its proprietor, and Theodore Hook was a contributor. He at the same time filled the lighter departments of the Morning Chronicle, under Mr Perry; and he maintained his connection with the press to his latest years. In 1808 appeared "My Pocket Book, or Hints for a rhytme merrye and conceitede Tour in Quarto," written in ridicule of the books of travels manufactured by Sir John Carr. This little work, which was anonymous, ran through numerous editions. The only works published with his name were the "Wreath," "Old Nick," a satirical story, 3 vols., the "Decameron of Boccaccio, with Remarks on his Life and Writings," 2 vols., and an edition of Francis's Horace. We ought also to add, that among his anonymous writings was a work attributing the authorship of "Jun. us" to Sir P. Francis, with whom he was, it is said, in some way connected. Mr. Du Bois' powers of conversation were great,

and his good-humoured pleasantry and knowledge of the world made him the idol of a large circle of friends. Died, 1850.

DUBOIS, GUILLAUME, a French cardinal and statesman, notorious for his ambition and his vices, was the son of an apothecary, and born at Brive la Gaillard, in the Limousin, in 1656. Having obtained the situation of preceptor to the duke of Orleans, he pandered to the passions of his pupil, and secured his attachment; till at length he became his privy councillor, and overseer of the household; and when the duke became regent, he was appointed to the situation of minister of foreign affairs. The archbishopric of Cambray having become vacant, Dubois, though not even a priest, had the boldness to request it, and succeeded in getting it; and by his consummate address he afterwards obtained a cardinal's hat, and was made prime minister. He had now reached the summit of his ambition, and at the same time its limit. His lust of power, his hungry avarice, his foul debaucheries, his capacity of shamelessly lying, and his ridiculous vanity, remained unaltered to the end. But that end was near. After frightful suffering, the result of his foul life, he died just 12 months after being named first minister, August, 1723.

DUBOS, JEAN BAPTISTE, French littérateur and secretary to the French Academy, was born at Beauvois in 1670, and distinguished himself both as an historian and a critic. He was received at the Academy in 1720. Among his works are a "Histoire de la Ligue de Cambray," "Histoire critique de l'établissement de la Monarchie Française," and "Réflexions critiques sur la Poésie et sur la Peinture." Died, 1742.

DUBY, PETER ANCHERTHOYSEN, a celebrated Swiss medallist and antiquary, was born in 1721, and died in 1782. He was interpreter to the royal library at Paris, and the author of an able and extensive work on medals.

DUCANGE, CHARLES DUFRESNE, Seigneur, French historian, philologist, and archaeologist, was born at Amiens in 1610. He was educated by the Jesuits, studied law at Orleans, and became advocate to the parliament of Paris in 1631. He quitted the bar, however, and devoted himself, at his native town, to literary labours. In 1668 he settled at Paris, and there spent the rest of his life. He is now best known as author of the voluminous and useful "Glossarium ad Scriptores mediæ et infamæ Latinitatis," subsequently enlarged by Carpenter. He compiled a similar Glossary of mediæval Greek. Of his other works may be named, "Histoire de l'Empire de Constantinople sous les Empereurs Français," "Historia Byzantina Illustrata," and editions of De Joinville's Life of Louis IX., and of the Annals of Zozaræus. He left a large number of works in manuscript. Died, 1688.

DUCAREL, ANDREW COLTET, an eminent antiquary and civilian, was born at Caen, in Normandy, in 1713. After receiving his education at Eton and Oxford, he became a fellow of the Royal and Antiquarian Societies, and held a situation in the state paper office. His principal works are "Anglo-

Norman Antiquities," a Beth Palace and of St. Died, 1785.

DUCCIO DI BUON brated early Italian painter of the Sienese school. His work is known, but he flourished like Cimabue, he set the study and imitation of the hard Byzantine style is the altar-piece of the still preserved. It was 1310, and was carried great public rejoicings, house to the cathedral. credit of designing the pavement of the same were executed a century. One of his finest works, a Child, &c., is in the Prince Consort, and was Manchester Art Treasure. National Gallery contain master. He was living in

DUCHANGÉ, GASPARD, engraver, and counsellor Palting. Born, 1662; d

DUCHATEL, PIERRE, LANUS, bishop of Orleans of France, was born about at the college of Dijon, Basel, where he gained Erasmus and assisted his works. After visiting the sented to Francis I. by C and was made bishop of Mâcon five years later, g 1547, and bishop of Orleans tingulshed himself by his of the rights of the Gallic the claims of the papacy, age of literature. Died, 1

DUCHESNE, ANDRÉ, historiographer to the king born in 1584, and died in very learned, and most pr has been named the father He published a series of or the history of France in 5 toire des Rois, Ducs, et gogne," &c., and he left in 100 folio volumes.

DUCHESNOIS, JOSEPH celebrated French actress. at the Théâtre Français from Born, 1777; died, 1835.

DUCIS, JEAN FRANÇOIS machist, was born at Versail took Shakspeare for his majority of his plays are fr the English poet; though s so altered to suit the taste men, that the genius of Sh dimly discoverable. He wa French Academy on the d. In 1778. He died in 1816, ag

DUCLOS, CHARLES FIN novelist and biographer, was in Brittany, in 1705; became the French Academy, and on of Voltaire was appointed historiographer of France. was lively and satirical, desc women, and intrigue; the

Norman Antiquities," and Histories of Lambeth Palace and of St Catherine's Church. Died, 1785.

DUCCIO DI BUONINSEGNA, a celebrated early Italian painter, head of the Siennese school. His date of birth is not known, but he flourished from 1285 to 1320. Like Cimabue, he set the example of a free study and imitation of nature, abandoning the hard Byzantine style. His chef-d'œuvre is the altar-piece of the cathedral of Siena, still preserved. It was completed in June, 1310, and was carried in procession, with great public rejoicings, from the painter's house to the cathedral. Duccio had long the credit of designing the decorations of the pavement of the same cathedral, but these were executed a century after his death. One of his finest works, a Crucifixion, Virgin and Child, &c., is in the collection of the late Prince Consort, and was exhibited at the Manchester Art Treasures Exhibition. The National Gallery contains a triptych by this master. He was living in 1320.

DUCHANGE, GASPARD, a clever French engraver, and counsellor of the Academy of Painting. Born, 1682; died, 1756.

DUCHATEL, PIERRE, in Latin CASTELANUS, bishop of Orleans and grand almoner of France, was born about 1495. He studied at the college of Dijon, and then went to Basel, where he gained the friendship of Erasmus and assisted him in some of his works. After visiting the East he was presented to Francis I. by Cardinal du Bellay, and was made bishop of Tulle in 1539, of Mâcon five years later, grand almoner in 1547, and bishop of Orleans in 1551. He distinguished himself by his energetic defence of the rights of the Gallican church against the claims of the papacy, and by his patronage of literature. Died, 1552.

DUCHESNE, ANDRÉ, geographer and historiographer to the king of France, was born in 1584, and died in 1640. He was a very learned and most prolific writer, and has been named the father of French history. He published a series of original writers on the history of France in 5 vols. folio: "Histoire des Rois, Ducs, et Comtes de Bourgogne," &c., and he left in MS. more than 100 folio volumes.

DUCHESNOIS, JOSEPHINE RUFIN, a celebrated French actress. She performed at the Théâtre Français from 1802 until 1830. Born, 1777; died, 1835.

DUCIS, JEAN FRANÇOIS, a French dramatist, was born at Versailles in 1733. He took Shakspeare for his model, and the majority of his plays are free imitations of the English poet; though some of them are so altered to suit the taste of his countrymen, that the genius of Shakspeare is but dimly discoverable. He was received at the French Academy on the death of Voltaire in 1778. He died in 1816, aged 84.

DUCLOS, CHARLES PINEAU, a French novelist and biographer, was born at Dinant, in Brittany, in 1705; became secretary of the French Academy, and on the resignation of Voltaire was appointed to the office of historiographer of France. All his writings are lively and satirical, descriptive of love, women, and intrigue; the principal are

"Considerations sur le Mœurs du XVIII^eme Siècle," "Confessions du Comte de * * * * *"
Died, 1772.

DUDLEY, Sir EDMUND, a lawyer of the 15th century, who acquired notoriety as one of the agents of Henry VII. in extorting money by the revival of obsolete statutes and other unjust measures. He studied at Oxford, early entered the king's service, and accompanied him to France in 1492. On his return he applied himself, in conjunction with Empson, to his odious task, and with too great success. In 1504 he was speaker of the House of Commons, but on the accession of Henry VIII., the public voice compelled the king to bring him to trial; he was found guilty of high treason, and executed with Empson, at London, in 1510. The repetition of such proceedings as those of Dudley and Empson was prevented by a special Act of Parliament.

DUDLEY, JOHN, duke of Northumberland, was a son of the preceding, and born in 1502. He was first created Viscount Lisle, then earl of Warwick, and after being appointed lord high admiral, reached his dukedom in 1551. He effected a marriage between his son, Lord Guildford Dudley, and Lady Jane Grey, daughter of the duke of Suffolk. He afterwards prevailed on the young king, Edward, to set aside his sisters, Mary and Elizabeth, from the succession in favour of Lady Jane, whom he caused to be proclaimed at the king's death. But on insurrection being raised in favour of Mary, she was proclaimed in London, and the duke executed as a traitor, in 1553.

DUDLEY, ROBERT, earl of Leicester, a son of the preceding, was born in 1532. Queen Elizabeth proposed him as a husband for Mary queen of Scots, but she rejected him with disdain; and in 1572 he married privately, Lady Douglas, but never acknowledged her as his wife. He afterwards married the Countess Dowager of Essex, and finding Lady Douglas intractable to his proposals for a separation, is charged with having poisoned her. For a short time he held the situation of governor of the Protestant Low Countries; but returning to England by command of the queen, he was made lieutenant-general of the army assembled at Tilbury in 1588, and died during the same year.

DUDLEY, Sir ROBERT, the son of the earl of Leicester by the Lady Douglas, was born in 1573. Having commenced a suit to prove his legitimacy, the Countess Dowager of Leicester filed an information against him for a conspiracy, on which he went to Florence, and was appointed chamberlain to the grand duchess, sister to the Emperor Ferdinand II., who, creating him a duke of the Roman empire, he assumed the title of the duke of Northumberland. He drained the morass between Pisa and the sea, by which Leghorn became one of the finest ports in the world. He was the author of "Del Arcano del Mare," and other works. Died, 1630.

DUDLEY, the Right Hon. JOHN WILLIAM WARD, Earl of, a statesman of great talents, but remarkable for his absence of mind and the habit of "thinking aloud," of

which many ludicrous anecdotes are told. The following is recorded as a *fact*. When he was secretary for foreign affairs, in Mr Canning's administration, he directed a letter intended for the French to the Russian ambassador, shortly before the affair of Navarino; and, strange as it may appear, it gained him the highest honour. Prince Lloven set it down as one of the cleverest *trucs* ever attempted to be played off, and gave himself immense credit for not falling into the trap laid for him by the sinister ingenuity of the English secretary. He returned the letter with a most polite note, in which he vowed, of course, that he had not read a line of it, after he had ascertained that it was intended for Prince Polignac; but could not help telling Lord Dudley, at an evening party, that he was "*trop fin*," but that diplomatists of his standing were not so easily caught." His lordship was born in 1781, and entered parliament first for Downton in 1802; he afterwards successively represented Worcestershire, Wareham, and Bossiney. In 1823 he succeeded to the peerage; was appointed secretary of state for foreign affairs, and sworn a member of the privy council in 1827; raised to the rank of an earl in the same year; and died in 1833.

DUFAU, FORTUNE, French painter, was a native of St Domingo, who studied under David, and became professor at the school of St Cyr. His "Count Ugolino in Prison," "Gustavus Vasa," and "St Vincent de Paul," are some of his best productions. Died, 1821.

DUFRESNE. [DUCANGE.]

DUFRESNOY, CHARLES ALPHONSE, a French painter and poet, was born in 1611. He was intended by his father for the legal profession; but the sister arts of poetry and painting were more attractive than the law, and he devoted his undivided attention to them. In 1634 he went to Italy, where he completed his Latin poem, "De Arte Graphica;" though it did not appear till after his death, when his friend De Piles published it, with annotations. It has been three times translated into English, by Dryden, Graham, and Mason. Sir Joshua Reynolds wrote the annotations to Dryden's translation. Died, 1665.

DUGDALE, Sir WILLIAM, an eminent and most industrious antiquary and herald, was born near Colleshill, Warwickshire, in 1605, and educated at Coventry Free School, and afterwards by his father. He was made Chester herald in 1644; accompanied Charles I. throughout the civil war; and after the restoration, on being appointed Garter king-at-arms, received the honour of knighthood. His chief work is the "Monasticon Anglicanum;" but he also wrote "The Barons of England," 3 vols., "The History of St Paul's Cathedral," "Origines Juridicales," and several other works of merit. The "Monasticon" was the joint work of Dugdale and Roger Dodsworth, and appeared in 3 vols. folio; the first vol. in 1655, the third in 1673. A new and considerably extended edition was projected in 1812, and completed in 6 vols. folio, in 1830. Died, 1686.

DUGOMMIER, General, was a native of Guadaloupe, born 1736. He early entered

the army, and after honourable service for which he received the cross of St Louis, he retired to Martinique, where he possessed a large estate provisionally to the French revolution. He espoused the republican cause, and being nominated colonel of the national guards of the island, he defended it against a body of royalist troops sent from France. He afterwards went to France, and being made commander-in-chief of the army in Italy, he gained many important advantages over the Austro-Sardinian army. He took Toulon, after a sanguinary contest, in 1793. He next commanded the army of the Eastern Pyrenees, and, in 1794, gained the battle of Alberdes, and seized the post of Montesquieu, taking 200 pieces of cannon and 2000 prisoners. He continued his career of victory till he fell in an engagement at St Sebastian, on Nov. 17, 1794.

DUGUAY TROUIN, HENRI, one of the most celebrated naval officers of France, was born at St Malo in 1673. His love for a maritime life soon showed itself, and at the age of 18 he was the commander of a privateer. At 20, he maintained an action with a 40-gun ship, which he commanded, against six English vessels, but was captured. After a series of gallant exploits, by which he essentially served his country, and raised its naval reputation, he died in 1758.

DUGUESCLIN, BERTRAND, a renowned French warrior and statesman, constable of France in the 14th century, was born about 1314. Though deformed in person, and of a fierce and untractable disposition in his youth, he persevered in his endeavours to eclipse these defects by the brilliancy of his actions; and mainly to him must be attributed the expulsion of the English from Normandy, Guenae, and Poitou. Duguesclin was captured by the brave English commander, John Chandos, at the battle of Auray in 1364, and was ransomed for 100,000 francs. Sent to subdue the roving companies of soldiery then wasting France, he placed himself at their head, and led them to foreign wars. While serving in Spain against Peter the Cruel, he was again made prisoner by the English under the Black Prince, but was soon liberated. He was soon after made constable of France. Suspicion unjustly falling upon him, he promptly resigned, and determined to retire to Spain. Before setting out he went to assist in the siege of the castle of Randan, and there died, 1380. So highly, indeed, was he esteemed even by his enemies, that the governor insisted on placing the keys of the fortress on the coffin of the hero. There are several French Lives of this hero, and a new History of his Life and Times, by D. F. Jamison, was published in 1864.

DUHALDE, JEAN BAPTISTE, a French Jesuit, was the author of "A Geographical and Historical Description of China," which he compiled from the records of successive missionaries, and furnished the best account up to that time published of that immense empire. Born, 1674; died, 1743.

DUHAMEL, JEAN BAPTISTE, a French ecclesiastic and philosopher, was born at Vire, in Lower Normandy, in 1624. He studied at Caen and Paris; became a mem-

ber of the Coagregation when the Royal Academy established, he was in 1678 appeared his "Nova." In 1697 he received the Academy, to devote his chief works, besides above, are "Regia Historia," &c, and a gate, with notes and and geographical. He

DUHAMEL DU LOUIS, an eminent French culture, born at Paris, life was dedicated to the science; and besides being to the transaction societies, of which the following are among them: "Traité de la Culture," "Traité des Arbres Fruitiers," which a new edition, folio, appeared in 1607, treatises on various arts. Duhamel was admitted Sciences in 1728. Died, 1740. **DUJARDIN, CH. J.** Dutch painter, a pupil of Amsterdam, in 1640; in 1678.

DULON, LOUIS, a French player and musical composer, born at Orleansburg, near Berlin, his sight at a very early age, decided taste for music, the first performer, a singular eminence in prepared an autobiography, "The Life and Opinions of," which was edited 1836.

DULONG, PIERRE French chemist, was one of the Polytechnic School. Honour. To him we owe the chloride of nitrogen, which dangerous substance a finger. He was academy of Sciences in 1802, died, 1838.

DUMARESQ, Lieut.-col. at the time of his death, son of the Australian South Wales, entered the 9th foot, at 17, served in 8 campaigns, on the Peninsula, one in Canada of Waterloo. He was 3 battles for which medals at several sieges; at lieutenant-colonel after was employed on the sea; and was twice damaged at the battle of Waterloo. Chief of General Sir John not through the lungs a being at the time charged by the duke of Wellington, by the resolution of the duke, delivered up to the duke, Sir Walter was, as Sir Walter was, dropped from his horse,

ber of the Congregation of the Oratory; and when the Royal Academy of Sciences was established, he was appointed secretary. In 1678 appeared his "Philosophia Vetus et Nova." In 1697 he resigned his situation in the Academy, to devote himself to theology. His chief works, besides the one mentioned above, are "Regiæ Scientiarum Academiæ Illustriæ," 4to, and an edition of the *Vulgate*, with notes and tables, chronological and geographical. He died, 1706.

DUHAMEL DU MONCEAU, HENRI LOUIS, an eminent French writer on agriculture, born at Paris, in 1700. His whole life was dedicated to the cultivation of useful science; and besides largely contributing to the transactions of different learned societies, of which he was a member, the following are among his separate works:—"Traité de la Culture des Terres," 6 vols., "Traité des Arbres et Arbustes qui se cultivent en France en pleine Terre," 2 vols. 4to, "Traité des Arbres Fruitières," 2 vols. 4to, of which a new edition, extended to 6 vols. folio, appeared in 1807; besides many other treatises on various arts and manufactures. Duhamel was admitted to the Academy of Sciences in 1728. Died, 1782.

DUJARDIN, CHARLES, an eminent Dutch painter, a pupil of Berghem, was born at Amsterdam, in 1640; and died at Venice, in 1678.

DULON, LOUIS, a distinguished flute-player and musical composer, was born at Oranienburg, near Berlin, in 1769. He lost his sight at a very early age, but evincing a decided taste for music, he was put under the first performers, and soon arrived at singular eminence in his profession. He prepared an autobiographical work, entitled "The Life and Opinions of the Blind Flutist," which was edited by Wieland. Died, 1836.

DULONG, PIERRE LOUIS, a celebrated French chemist, was one of the many pupils of the Polytechnic School, who have done it honour. To him we owe the discovery of the chloride of nitrogen, by an explosion of which dangerous substance he lost an eye and a finger. He was admitted to the Academy of Sciences in 1823. Born, 1785; died, 1838.

DUMARESQ, Lieut.-colonel HENRY, who at the time of his death was chief commissioner of the Australian company in New South Wales, entered the army as a lieutenant in the 9th foot, at the age of 16; and served in 8 campaigns, of which 6 were in the Peninsula, one in Canada, and the last at Waterloo. He was present in the 3 battles for which medals were bestowed, and at several sieges; attained the rank of lieutenant-colonel after 9 years' service; was employed on the staff upwards of 18 years; and was twice dangerously wounded. At the battle of Waterloo he was on the staff of General Sir John Byng, and was shot through the lung at Hougomont; but being at the time charged with a message to the duke of Wellington, he, as if supported by the resolution to do his duty, rode up to the duke, delivered his message, and then, as Sir Walter Scott describes it, "dropped from his horse, to all appearance

a dying man. The ball, which was never extracted, is supposed to have eventually induced paralysis, and caused his death, March, 1838.

DUMESNIL, MARIE FRANÇOISE, a celebrated French actress, who rose to the highest eminence as a tragical performer, was born in 1713, first appeared on the stage in 1737, retired from it in 1775, and died in 1803. Like our Siddons, she surpassed all her contemporaries in parts requiring queenly dignity, deep pathos, or the vehement display of the fiercer passions.

DUMONT, JEAN, an eminent publicist, was a native of France, but settling in Austria, became historiographer to the emperor, by whom he was created baron of Carlsroon. He published a voluminous work, entitled "Corps Universel Diplomatique du Droit des Gens," besides "Voyages," &c. Died, 1726.

DUMONT D'URVILLE, JULES SEBASTIEN CÉSAR, one of the most skillful and intrepid navigators that modern France, rich as she undoubtedly is in naval skill and intrepidity, can boast of. He was not merely a good sea-captain; he was a good botanist, entomologist, draughtsman, and writer, as may be seen from his interesting account of the French expedition of 1819-20 to the shores of the Archipelago and the Black Sea. As second in command to M. Duperré, in *La Coquille*, he visited Peru, China, Oceania, &c., and he brought home immense stores of both knowledge and specimens of natural history. In 1828 he was intrusted with a mission to discover, if possible, some traces of the unfortunate *La Perouse*. On his return he published a most interesting account, in which he pretty clearly proved that the shipwreck occurred off an island to the south of Santa Cruz. Being subsequently sent to approach as nearly as possible to the south pole, he acquitted himself with his usual skill. We have from his pen, besides the narrative already mentioned, "A Picturesque Journey round the World." This skillful and brave man was killed, with his wife and child, by the fatal Versailles railway accident, May 8, 1842, aged 52.

DUMONT, PIERRE ETIENNE LOUIS, the friend of Jeremy Bentham and editor of some of his works, was a native of Geneva. He was born in 1759, and became pastor there; went to Russia in 1783, and soon afterwards became tutor to the sons of Lord Shelburne. Visiting Paris during the first years of the revolution, he gained the friendship of Mirabeau, of whom he wrote some interesting "Recollections." On his return he became the friend and assistant of Bentham in the preparation of his works on Legislation for the press. He returned to Geneva in 1814, and became a senator. Died, 1829.

DUMOURIEZ, CHARLES FRANÇOIS, an eminent French general, was born at Cambrai, in 1739. He entered the army early in life, and at 24 years of age had received 22 wounds, and was made a knight of St Louis. In 1772, Louis XV. sent him with communications to Sweden, but he was arrested, and for a long time confined in the Bastille. However, in 1789, we find him a

principal director of the Jacobin Club, which was composed of all who aspired to be accounted the friends of liberty. He afterwards became a minister of Louis XVI., and he strongly advised the monarch to yield the direction of the interior affairs of the kingdom to the council of the assembly then sitting, and to declare war against the foreign foes of France. The advice was disregarded, and Dumouriez was dismissed. Still determined to devote himself to the service of the army, he proceeded to Valenciennes, where he soon gained immortal fame by his valour and his firmness, displayed at the head of the French soldiers, having succeeded La Fayette in the command of the army of the North. He rendered very important service to his country by the stand he so skillfully made against the Prussian invaders in the forest of Argonne, in September, 1792, the famous "Cannonade of Valmy" taking place on the 20th. of the same month. His rapid conquest of Belgium followed. Notwithstanding his success, the Directory entertained suspicions regarding his designs, because it was known that he was desirous of sparing the life of the king, and held that a constitutional monarchy was essential to save France from anarchy. When commissioners were sent to arrest him, he arrested them and sent them to the Austrians, with whom he had been negotiating. He soon had to go over to them himself. Finding that a reward of 300,000 francs was offered for his head, he went to Hambug, where he lived on a small pension from the landgrave of Hesse-Cassel until 1804, when he accepted an asylum in England, wrote his own memoirs, and employed himself in other literary pursuits, at Turville Park, near Henley-upon-Thames. He was honoured with the friendship of the duke of Kent, with whom he kept up a correspondence. Died, 1823.

DUNBAR, WILLIAM, an early Scottish poet, who flourished about 1480-1520. He graduated M.A. at the university of St Andrews, entered the Franciscan order, and was frequently employed in some subordinate capacity on public embassies. Destined for the church, he was always hoping and trying to get a benefice, but he seems to have failed. The king, James IV., however, gave him a pension, and several times increased it. Dunbar's principal poem is "The Thistle and the Rose," written in commemoration of the king's marriage. Others are "Golden Terge," "Dance of the Deadly Sins in Hell," &c. After lying neglected for 300 years, his writings have for the first time been collected in the present century, and he is now ranked among the best Scottish poets.

DUNCAN, ADAM, Viscount DUNCAN, of Camperdown, &c., a gallant and distinguished naval officer, was a native of Dundee, and born in 1731. He went to sea when young, rose to the rank of post-captain in 1751, and steadily advanced till he became admiral of the Blue, and commander of the North Sea fleet in 1795. He was with Lord Keppel at the taking of the Havannah, and had a full share in Rodney's victory over the Spaniards, the relief of Gibraltar, &c. While in command of the North Sea fleet, he had for

two years the tedious duty of watching the movements of the Dutch squadron, and was at length forced to quit the station, in consequence of a mutiny breaking out among his men, during which the enemy put to sea. The gallant admiral, however, after displaying the most undaunted resolution during the mutiny, came up with the Dutch fleet off Camperdown, totally defeated them, and captured 8 sail of the line, June 11, 1797. Upon this he was created a viscount, with a pension of £3000 per annum to himself and the two next heirs of the peerage. Died, 1804.

DUNDAS, Sir DAVID, general in the English army, and a member of the privy council, was born at Edinburgh in 1736, and entered the military service in 1758. He became colonel of the first regiment of dragoon guards, and had the reputation of being a most able tactician. On the temporary resignation of the duke of York, he was made commander-in-chief. His "Principles of Military Movements" and "Regulations for the Cavalry" are both acknowledged as standard works in the army. Died, 1820.

DUNDONALD, ARCHIBALD COCHRANE, Earl of, born, 1749. He became a cornet of dragoons, but exchanged from the army to the navy, and had risen to the rank of lieutenant when he succeeded to the earldom. He now devoted himself entirely to scientific pursuits, with the intent of making improvements in the commerce and manufactures of the kingdom. Among the numerous works published by him in the prosecution of this patriotic intention, were "The Principles of Chemistry applied to the Improvements of Agriculture," "An Account of the Qualities and Uses of Coal Tar and Coal Varnish," &c. He made many useful discoveries, for some of which he obtained patents; but unfortunately, though he did good service to his country, he was so far from enriching himself, that he was at one time obliged to receive aid from the Literary Fund. Died, 1831.

DUNDONALD, THOMAS COCHRANE, tenth earl of that name, was born December 14, 1775, and has left behind a name memorable for the splendour of his exploits, and for an obloquy such as seldom falls to the lot of man, and is yet more rarely silenced before the sufferer sinks into his grave. This good fortune was in his case permitted to gild the closing days of a life long darkened by deep sorrow and suffering. His father had much impaired, by scientific experiments, a property not great when he inherited it; and his son had to commence life, in his own words, "as heir to a peerage without other expectations than those arising from my own exertions." Intended by his father for the army, he succeeded, not without difficulty, in carrying out his own wishes, which led him strongly to the navy. In his 18th year he joined the Hind frigate. His first voyage was to Norway; and he became a lieutenant in 1796. Two years later he was made master and commander, and with the Speedy, a sloop of war of fourteen guns and fifty-four men, which he describes as "the least efficient craft on the station" (the

Mediterranean), he was taking thirty-three prizes, the Spanish frigate, two galleons, taken on the 20th of August 8th, 1801. On the same year the Speedy by the French fleet, but so great had been his valour in rendering his sword into him by Dessaix. He afterwards by Sir J. returned to England, and it was only by dint of that, on the breaking of the war at length expired. In 1805, while in the prizes; and for the distinguished himself by cutting out vessels, and signal-houses, and his designs for destruction. When once more M.P., first for H. minister; and by his abuses of naval administration obnoxious to the reputation was such consulted on the subject, which, long blockaded Brest, had escaped into White to Lord Gambler, to involve too much risk, hence undertook to destroy. With these, on the night he actually destroyed a manic so overwhelming operation would, as he believed, to destroy the whole neglect Lord Gambler martial and acquitted; although made a K.C.B. "marked man," and ended. At Malta he boarded the Prize Court, constant charges exacted of prizes more than the vessels. Possessing him official table of fees, why because they sanctioned, he was committed to court, but succeeded in this subject, as well as the dangers of war, and other brought before the House, thus rendered the government persistent in refusing to destroy the French fleet. In 1814 he was valent speculations on the charge being that he the funds by a false Napoleon, and then amount. He was found fine of £1000, to undergo, and to stand in the part of the sentence was deprived of the Order of the navy, and his sea common. But the election returning him as a knight from prison and to, however, recaptured

Mediterranean), he succeeded in ten months in taking thirty-three vessels, for one of which, the Spanish frigate, *El Gamo*, thirty-two guns, taken off Barcelona, he received the commission of post captain, dated August 8th, 1801. On the 3rd of July of the same year, the *Speedy* was herself taken by the French fleet, under Admiral Lincolns; but so great had been his courage that on tendering his sword it was at once returned to him by Desaix. Being exchanged soon afterwards by Sir James Saumarez, he returned to England, and went upon half pay. It was only by dint of constant requests that, on the breaking out of the war again, he was at length appointed to the *Arab*. In 1805, while in the *Pallas*, he took many prizes; and for the next four years he distinguished himself by brilliant exploits, in cutting out vessels, storming batteries, burning signal-houses, and for that combination of skill and courage which prompted his designs for destroying whole fleets at once. When once more in England he became M.P., first for Honiton, then for Westminster; and by his vigorous attacks on the abuses of naval administration made himself obnoxious to the Admiralty. Still his reputation was such that, in 1809, he was consulted on the subject of the French fleet, which, long blockaded by Lord Gambler at Brest, had escaped into the Basque Roads. While to Lord Gambler the attack seemed to involve too much risk, Lord Cochrane at once undertook to destroy them by fireships. With these, on the night of the 11th of April, he actually destroyed several, and caused a panic so overwhelming that a vigorous co-operation would, as he believed, have enabled him to destroy the whole. For this alleged neglect Lord Gambler was tried by court-martial and acquitted; and Lord Cochrane, although made a K.C.B., became henceforth a "marked man," and was at length superceded. At Malta he boldly denounced the abuses of the Prize Court, which by exorbitant charges exacted for the condemnation of prizes more than the actual worth of the vessels. Possessing himself by force of the official table of fees, which had been hidden away because they sanctioned no such extortion, he was committed to prison by the court, but succeeded in making his escape. This subject, as well as the treatment of prisoners of war, and other naval topics, he brought before the House of Commons, and thus rendered the government still more persistent in refusing to listen to his plan for destroying the French fleet in the scheldt. In 1814 he was tried for fraudulent speculations on the Stock Exchange, the charge being that he had caused a rise in the funds by a false rumour of the fall of Napoleon, and then sold out to a large amount. He was found guilty, sentenced to a fine of £1000, to undergo a year's imprisonment, and to stand in the pillory. This last part of the sentence was remitted; but he was deprived of the Order of the Bath, of his rank in the navy, and his seat in the House of Commons. But the electors of Westminster again returning him as their member, he broke from prison and took his seat. He was, however, recaptured and kept in prison

until the expiration of his sentence. In 1818 he went abroad and served in foreign navies, and powerfully aided to establish the republic of Chili and the empire of Brazil. In 1830 the Whig party, to which he had always belonged, restored him to his naval rank, as the opinion was generally gaining ground that he had been unjustly condemned to suit the political purposes of his opponents. In the following year he succeeded his father in the earldom of Dundonald, and became vice-admiral of the Blue in 1841. In 1847 the Order of which he had been deprived was restored to him, and he was made a G.C.H. The remainder of his life was spent chiefly in drawing up his own *Life under the title of the "Autobiography of a Scaman,"* which has triumphantly vindicated his good fame. His daring schemes and brilliant courage left the impression of foolhardiness on minds habituated to the caution of official routine; but there aro times when a readiness to encounter the greatest risks is really the highest wisdom, and when the most daring schemes aro grounded on the soundest prudence and calculation. The fortunes of Lord Dundonald at once suggest the parallel with Themistocles; but Lord Dundonald has emerged more successfully than the great man whom he so strikingly resembled from the obloquy which for a time overshrouded his name. He suffered much, but he had the consciousness that he was suffering unjustly; and before his eyes were closed in death, he knew that his knowledge of his integrity was shared by all his countrymen. He died October 30, 1860, retaining his full powers of mind, in the 84th year of his age.

DUNN, SAMUEL, a mathematician, who having acquired considerable property in the exercise of his profession, bequeathed it at his death towards the foundation of a mathematical school at his native town of Crediton, in Devonshire. He published an atlas, treatises on bookkeeping, navigation, &c.; and died in 1792.

DUNNING, JOHN, Lord ASHBURTON, a celebrated lawyer, was born at Ashburton, Devon, in 1731. After serving his clerkship in his father's office, he studied for the bar; and rapidly attaining an eminence in the profession, he became counsel for Wilkes, whose cause he conducted in such a manner as to establish his fame as a sound lawyer and adroit pleader. He became attorney-general in 1767, chancellor of the duchy of Lancaster in 1782, and was raised to the peerage, but died in the following year.

DUNOIS, JEAN, count of Orleans and Longueville, an illegitimate son of the duke of Orleans, was born in 1402. So successful was he in his military career, particularly in the share he bore in the expulsion of the English from France, that Charles VII. honoured him with the title of "Restorer of his Country." Died, 1468.

DUNS SCOTUS, JOHN, one of the most celebrated scholastic philosophers, was born probably about 1275. Whether he was a native of England, Scotland, or Ireland, is uncertain. He appears to have studied at Oxford, became a fellow of Merton College, and in 1301 professor of theology. He had also entered the Franciscan Order. He

afterwards taught at Paris, and acquired the title of "Doctor Subtilis." He obtained extraordinary reputation by his defence of the dogma of the Immaculate Conception of the Virgin. In philosophy he was the opponent of Thomas Aquinas, and the founder of a school named the *Scottists*; the followers of Aquinas being called *Thomists*. The former were Realists, the latter Nominalists. The works of Duns Scotus form 12 vols. folio. Died soon after his arrival at Cologne, 1308. "Duns," as a term of reproach used by the Thomists, has become, with a modified meaning, the familiar "Dunce."

DUNSTAN, ST, archbishop of Canterbury, and one of the greatest of ecclesiastical statesmen, was born at Glastonbury, of a noble family, and was educated at its monastery, then famed as a seat of learning. His studies and accomplishments were very varied, mechanical, scientific, literary, and artistic. Brain-fever resulted from his over-application to study, and left behind it the belief that he had personal conflicts with the devil. He became a favourite at the court of Athelstan, especially with the ladies, but falling under suspicion of magical arts, was subjected to the ordeal of water and banished. A severe struggle ensued between affection and ambition; he was in love with a lady of the court, and he was urged to become a monk. He resolved to enter the Benedictine order, and became an anchorite at Glastonbury. In 943 he was named abbot, and at once introduced the rule of St Benedict, richly endowed the monastery, and made it at once a house of monks and of scholars. He was soon called to be one of the councillors of King Edmund, and in co-operation with the great Chancellor Thurketil and Archbishop Odo, set himself to carry out his principles of reform in church and state. He was the friend, as well as the minister, of Edred, and his power constantly increased. On the coronation of Edwy he disgraced himself by his violent conduct when sent by Odo to recall the young king to the banquet. He forced the crown on Edwy's head, and dragged him from his wife's bowler to the hall. And the subsequent horrible mutilation of the young queen was the work of his agents. A reaction in the popular mind led to his retirement, and not being able to account for monies which had come into his hands as treasurer of Edred, he was banished. Recalled in 957, he was made bishop of Worcester and of London, and in the following year, after two disappointments, archbishop of Canterbury. In the reign of the licentious Edgar, Dunstan was virtually sovereign, and by his wise policy procured for Edgar the title of the Pacific. Many important measures of social as well as ecclesiastical reform were carried out under his direction. But he was not very scrupulous about the means he used; and there seems little doubt that he escaped a defeat in the council of Winchester, on the question of the married clergy, by a trick of ventriloquism, and again at Caine, by a mechanical trick, by which that part of the floor on which his adversaries stood was made to give way, injuring many and killing some. After the accession of Ethelred

Dunstan retired to Canterbury, and devoted himself to his spiritual duties. He left several literary works. Died at Canterbury, and was buried in the cathedral, in 988.

DUNTON, JOHN, a noted London bookseller, was born at Grafton, Huntingdonshire, in 1659. He projected and carried on "The Athenian Mercury," a selection from which, under the title of "The Athenian Oracle," in 4 vols., was reprinted. He was also the author of "Athenianism," consisting of numerous treatises in prose and verse; and a curious work, entitled "Dunton's Life and Errors." Died, 1733.

DUPATY, CHARLES, French sculptor, born at Bordeaux, 1771, his father being president of the parliament of Bordeaux. He studied seven years at Rome, and afterwards executed many beautiful works. Died, 1825.

DUPONT, JACOB DAVY, Cardinal, was a native of Switzerland. He was sent to study at Paris, and there renounced Calvinism, and attached himself to the service of Henry III., who was not slow to reward him. He served the Cardinal de Bourbon a short time, and then went over to Henry IV., who charged him with several embassies. Duperron at length obtained the archbishopric of Sens, and was created a cardinal. He assisted at the States-General of 1614. He was a great admirer of Montaigne and Rabelais, and was himself also author of various works, political, controversial, &c., which fill 8 vols. folio. Born, 1556; died, 1618.

DUPIN, ANDRÉ MARIE JEAN JACQUES, the distinguished French jurist and statesman, was born at Varzy, in the department of the Nièvre, in 1783. He was the son of an eminent lawyer who was a member of the Legislative Assembly of 1791-92, and narrowly escaped the guillotine in the Reign of Terror. He was familiarly known as "Dupin l'aîné," being the eldest of three brothers, all of whom obtained distinction; and of whose mother it is related that she desired no other epitaph than this—"mother of the three Dupins." André was brought up to the law, studied at the Académie de Législation at Paris, and was called to the bar in 1802. Very early in his career he excited the suspicion and anger of the First Consul by a passage in one of his elementary works on law, and the book was suppressed. He rose to high reputation in his profession, and in 1811 was named member of the commission appointed for the classification of the laws of the empire. In May, 1815, he was elected deputy to the Chamber of Representatives, and with great firmness and independence resisted the last efforts of Napoleon and his adherents to save the empire. He supported the restoration, but was soon driven by the follies and tyranny of the government to become its stout and persistent opponent. His greatest reputation as advocate was won in those days when he was the zealous and powerful defender of the freedom of the press, and of the adherents of the fallen dynasty who were subjected to prosecution. He took part with the two Berryers in the defence of Marshal Ney; defended Wilson and his

associates who aided the escape of Lavalette, and amongst others General Savary, the Pradt, and the popular poet Béranger. One of his most celebrated efforts was the successful defence of the *Journal des Débats*, 1829. He remained a popular leader throughout the reign of Charles X.; was the vigorous opponent of the Polignac ministry, and distinctly declared the illegality of the famous ordinances of July, 1830, the immediate occasion of the revolution. In these measures for the elevation of Louis Philippe, duke of Orleans, to the throne, he took an influential part; and the king, whose consulting lawyer he had been since 1820, rewarded him with the appointment of Procureur-Général to the Court of Cassation, which he held for twenty-two years. He was a firm supporter of the government, and made himself unpopular by condemning judicial excesses. In 1832 he was elected president of the Chamber of Deputies, and was annually re-elected till 1840. Dupla was generally the opponent of the war party, but he advocated intervention in the East. At the revolution of February, 1848, it was Dupin who presented the young Comte de Paris to the Chamber of Deputies, and proposed his election as regent under the regency of the duchess of Orleans. He was an active member of the constituent, and afterwards of the Legislative Assembly; and was president of the latter. He remained passive at the Coup d'Etat of 2nd December, 1851, but in the following month, immediately on the cancellation of the property of the Orleans family, he resigned his post of Procureur-Général and retired from public life. To the surprise of his friends he resumed it, and became a senator in 1857; thus lending the weight of his name and character to the system of Napoleonic imperialism. He justified his position by saying that he had never belonged to France, but never to any political parties. In 1864 he made a masterly speech against active intervention in behalf of the Poles; and more recently his earnest brochure against the prevalent extravagance in the dress of women attracted much attention. M. Dupin was Grand Cross of the Legion of Honour since 1837, member of the French Academy since 1832, and member of the Institute. Among his numerous works on law may be named the "Principes de Juris Civilis," "Manuel du droit ecclésiastique Français," and the collection of his Pleadings and Memoirs, in 20 vols., &c. Died at Paris, in his 83rd year, 10th November, 1866.

DUPIN, LOUIS ELLIES, an eminent French historian and ecclesiastic, was born in Normandy, in 1657. He became professor of divinity in the Royal College, but lost the professorship in consequence of his religious moderation. He was the author of an extensive and valuable work, entitled "Bibliothèque Universelle des Auteurs Ecclésiastiques," in 58 vols.; and for the freedom and tolerance of his opinions therein he was exposed to much persecution. He was also the author of various other works on church government and practical divinity. He died in 1719.

DUPLEIX, JOSEPH, was a celebrated French merchant, who, as the head of the factory at Chandernagore, had raised it to such a pitch of prosperity, that, in 1742, he was appointed governor of Pondicherry, and director-general of the French factories in India. In 1748 he successfully defended it against the English, for which he was raised to the rank of marquis; and during his whole administration he displayed first-rate talents, both civil and military. But his valuable services did not shield him from the shafts of envy: he was recalled; and the man who had been surrounded by all the splendour of an eastern court, was left languish in poverty, vainly soliciting justice from an ungrateful government. He died, the victim of anxiety, in 1783, 9 years after his recall.

DUPLEIX, SCIPION, historiographer of France, was born in 1669. He wrote a "Histoire Générale de France," in 5 vols. folio, and other works, but they have been long forgotten. It is asserted, that, having written a work on the liberties of the Gallican Church, which he took to the chancellor Segulier to be licensed, that magistrate threw it into the fire; which so preyed upon his mind that it caused his death, in 1661.

DUPLESSIS-MORNAY. [MORNAY.]
DUPONT DE NEMOURS, PIERRE SAMUEL, a French political economist, was born at Paris, in 1739. Though he twice sat as president of the Constitutional Assembly, and held other high official situations under the revolutionary government, he invariably opposed the anarchists, and narrowly escaped becoming their victim, in 1797, by his timely retreat to America. From that country he returned in 1805, and became president of the Chamber of Commerce; and in 1814 he was appointed secretary to the provisional government. In the following year he finally retired to America, where he died in 1817. Dupont was the author of various treatises on different branches of political economy; he also wrote "Philosophie de l'Univers," and other works of merit.

DUPPA, BRIAN, an English prelate, and the faithful friend of Charles I., was born at Lewisham, Kent, in 1589, and educated at Christchurch, Oxford, of which he was afterwards dean. He attended the king in the Isle of Wight, and is said to have assisted him in the *Icon Basilike*. He was successively bishop of Chichester, Salisbury, and Winchester. Died, 1662.

DUPPA, RICHARD, barrister and litterateur, was educated at Trinity College, Oxford, and took the degree of LL.B. at Cambridge, in 1814. He wrote many works, among which are "The Life and Literary Works of Michael Angelo Buonarroti," "The Life of Raffaele," "Travels in Italy," &c. Died, 1831.

DUPRAT, ANTOINE, cardinal-legate, and chancellor of France, was born in Auvergne, in 1463. He became an advocate, and in 1507 was named first president of the parliament of Paris. On the accession of Francis I., to whom, and to whose mother, Louise of Savoy, Duprat had warmly attached himself, he was appointed chancellor. He followed the king in his Italian campaign,

1818, and took a leading part in the famous conferences with Leo X. at Bologna, and in the establishment of the concordat which followed. He managed the unsuccessful negotiations with Cardinal Wolsey in 1520 and 1521, and during the king's absence in the war with Charles V. he was the chief adviser of the regent Louisa. He conducted the suit which deprived the Constable de Bourbon of his estates, and drove him from the service of his country. Duprat had become constantly more odious and mistrusted by the people, but he was supported and saved from their wrath by the king. In 1527 he was created cardinal, and three years later legate à l'ars. He was also archbishop of Sens, and held many rich benefices. He showed himself in his last years a rigorous opponent and persecutor of the Protestants, devising not only severities, but refinements of cruelty, against them. Died, 1535.

DUPUIS, CHARLES FRANÇOIS, a modern French philosopher, was born at Trié-le-Château, near Ghors, in 1742, and educated at Harcourt College. He became at an early age professor of rhetoric at the College of Lisieux, and afterwards applied himself to mathematica and astronomy under Lalande. In 1787 he was made professor of Latin at the College of France, and soon after was received at the Academy of Inscriptions. During the revolutionary era he was a distinguished politician, became deputy to the Convention, member of the Council of Five Hundred, president of the Legislative Body, and was also a member of the Institute and of the Legion of Honour. In 1778 Dupuis constructed a telegraph after a plan suggested by his friend Amontons. He was early struck with the connection between mythology and astronomy, and hoped to find an explanation of the former. He first published his views in a "Mémoire sur l'Origine des Constellations," and afterwards very fully in his celebrated work entitled "Origine de tous les Cultes, ou la Religion universelle." So much weight was attached to the opinions which Dupuis very earnestly maintained in that work respecting Egypt, that an expedition was undertaken by command of Napoleon to explore that country; which expedition was the occasion of some of the most important discoveries of this century. Died, 1809.

DUPUYTREN, Baron GUILLAUME, one of the most renowned surgeons of modern times, was born of poor parents in the department of Haute Vienne in France, 1777. At the age of 3 years he was stolen from his home by a lady of rank, who wished to adopt him; but he was subsequently returned to his parents, and he owed his future elevation to the accidental circumstance of an officer seeing him in his native village, who being struck with his address, made proposals that he should go with him to Paris. Placed by this officer in the Collège de la Marche, he soon evinced a great aptitude for medical science; in 1803 he took his degree of M.D., and after passing with distinction through various grades of the profession, he obtained in 1816 the chair of clinical surgery in the Hotel Dieu, the important duties of which he discharged with equal ability

and success for 20 years. Dupuytren was equally distinguished as a physiologist and as a surgeon; and many of the most enlightened practitioners of France acknowledged him as their master. Died in 1835.

DUQUESNE, ABRAHAM, a brave and skillful naval officer in the French service, was born at Dieppe, in 1610. He distinguished himself by numerous acts of intrepidity during a long career, and added much to the maritime character of his country. Died, 1688.

DURAND, DAVID, a French Protestant minister, who, after some perilous escapes from death and the Inquisition, came to England, and was preacher at the Savoy chapel, London. He was admitted to the Royal Society, and was author of a "Life of Vanini," a "History of the Sixteenth Century," and a Continuation of Rapin's History of England. Born, 1681; died, 1763.

DURAND, GUILLAUME, a learned French prelate, surnamed LE SPÉCULATEUR, was born about 1232. Having acquired much reputation by his public teaching at Bologna and Modena, he was appointed chaplain to Pope Clement IV. and auditor of the Rota. He took part in the Council of Lyons, in 1274, and assisted in drawing up its acts. He was afterwards governor of the patrimony of St Peter, returned to France, and in 1287 became bishop of Mende; was sent by the pope on a mission to Cyprus, and died in 1296. His principal works are "Repertorium Aureum Juris," "Speculum Judiciale," and a Commentary on the Council of Lyons.

DURANTE, FRANCESCO, a celebrated musical composer, was born at Naples, in 1693, where he died in 1756. He is principally known as the composer of vocal church music. Among his pupils were the composers Pergolesi, Sacchini, &c.

DÜRER, ALBRECHT or ALBERT, the greatest of the early German painters and engravers, was born at Nürnberg, in 1471. His father, a goldsmith, brought him up to follow the same art, but he preferred painting, and became the pupil of Michael Wohlgemuth. He then spent several years in travelling, and soon after his return married Agnes, the pretty daughter of a Nürnberg musician, who did not make life sweet to him. In 1506 he visited Venice, saw Giovanni Bellini, and painted several pictures there. He declined an invitation to settle at Venice, though supported by the offer of a liberal grant from the Signory. Thence to Bologna, where he was introduced to Raphael. Soon after he was appointed painter to the Emperor Maximilian I., an office which he also held under Charles V. In 1520 he visited the Netherlands with his wife, and wrote a full account of his journey. Dürer was very celebrated as an engraver both on wood and metal; he also invented, or far surpassed others in etching. Among his best paintings are "Christian Martyrs in Persia," "Adoration of the Holy Trinity," both at Vienna; "St John and St Peter," "St Paul and St Mark," at Munich, and several portraits. His woodcuts of the "Grosse Passion," "Kleine Passion," "Apocalypse," &c., are admirable. The National Gallery con-

ains but one painting of a Senator." A friend of Melancthon, reformed faith. He was works on fortification, and proportion, &c. Died a 1528. The sorrowful term the subject of a pathetic tale, "The life."

ains but one painting of Dürer, a "Portrait of a Senator." Albert Dürer was a friend of Meianethon, and embraced the reformed faith. He was author of several works on fortification, mathematics, human proportion, &c. Died at Nürnberg, April 1528. The sorrows of his married life form the subject of Schefer's charming and pathetic tale, "The Artist's Married Life."

DURFEEY, THOMAS, a facetious poet, once highly popular, but now forgotten, was the son of a French refugee, and born at Water in 1628. He abandoned the study of the law for the life of a dramatist, and was author of about 30 comedies, all of which were justly become obsolete from their licentiousness. He was also a writer of songs and satirical lyrics, which were printed in 6 volumes, under the title of "Fills to purge Melancholy;" and being the boon companion of Charles II, his society was courted by the petty and profligate frequenters of his court, &c. Died, 1723.

DURHAM, JOHN GEORGE LAMBTON, Earl of, was the eldest son of W. H. Lambton, Esq., of Lambton Castle, M.P. for the County of Durham, by Lady Anne Villiers, daughter of the earl of Jersey. He was educated at Eton, served in the 10th Hussars, and at the age of 20 married Miss Harriet Colmondeley, by whom he had three daughters, all now deceased. In 1815 this lady died; and in the following year he contracted a matrimonial alliance with Lady Louisa Elizabeth, the second daughter of Earl Grey. During the whole of his parliamentary career he denounced Tory influence, and steadily adhered to the doctrine of reform as originally propounded by his father-in-law; but in 1827 we find him a supporter of Mr Canning's ministry, and on the dissolution of Lord Goderich's Ministry, in 1828, he was raised to the peerage by the title of Baron Durham. On the formation of Earl Grey's government in 1830, he became a member of the cabinet, and privy seal; and to him is mainly attributed the great extent and liberality of the reform bill, and its eventual triumph. He was now hailed as the great leader of the movement, and became a popular figure; his presence was eagerly solicited at the great radical meetings, and his aduresses were on tip-toe in the expectation that he would be raised to the head of public affairs. In 1833 his lordship went to Russia as ambassador, and remained there till the summer of 1837, when he returned to England; and in the following year he went out Governor-general to Canada, intrusted with extraordinary powers; but finding himself not supported as he expected by the Ministry, he returned home the same year. Opposite have been the sentiments with respect to Lord Durham's general policy and qualifications as a statesman, that to a man disposed to be impartial it is difficult to form a correct opinion of them; but we are of the opinion that we may safely reiterate the following encomium on him:—"From his first entrance on the field of politics to the last, an ever thought of even doubting his course and determined adherence to his

conscientious convictions." Born, April 13, 1792; died, July 28, 1840.

DURHAM, Admiral Sir PHILIP CHARLES CALDERWOOD, was born at Largo, in Fife-shire, in 1763, and entered the navy in 1777, as a midshipman on board the Edgar, of 74 guns. He was afterwards acting lieutenant in the Viceroy, 104, flag-ship of Admiral Kempenfelt, whom he followed on his removing to the Royal George. When that noble ship "went down" at Spithead, August 28, 1782, the subject of this memoir was officer of the watch; and his miraculous escape on that fatal day is so extraordinary and interesting, that we shall briefly relate the circumstances. Finding the ship was sinking, Lieut. Durham threw off his coat and plunged into the water, where he was seized by a drowning marine, by whom he was twice carried down; on rising the second time, he succeeded in extricating himself from the dying man's grasp by tearing off his waistcoat, and he, with one of the seamen, was eventually saved by seizing the haliards from the mizen-topmast-head, by which they reached the mast-head, from whence they were taken with great difficulty by a boat. The poor marine's body was washed on shore a fortnight afterwards, with the waistcoat by which he had caught hold of Lieut. Durham so firmly twisted round his arm, that a pencil-case, bearing the lieutenant's initials, was found in the pocket, and restored to the owner. When Lieut. Durham had reached a place of temporary security, he observed the captain (Waghorn) holding by the weather mizen-topmast-yard-arm, and sent a boat to his aid; and these two were the only officers saved. Soon after this event he was appointed acting lieutenant of the Union, 98, at the relief of Gibraltar, by Lord Howe; and after various promotions, to which his services well entitled him, he commanded the Defence, of 74 guns, at the battle of Trafalgar, Oct. 21, 1805; but, in fact, he was almost continuously employed from 1780 to 1816, when the last Buonapartean flag that waved in the West Indies struck to him. He was made vice-admiral in 1819, and full admiral in 1820. His last service was that of commander-in-chief at Portsmouth, which post he resigned in 1839. Sir Philip was M.P. for Queenborough in 1830, and for Devizes in 1835. Died, April 2, 1845.

DUROC, MICHEL, duke of Friuli and marshal of France, was born in 1772, and entered the army in 1792. Being subsequently appointed aide-de-camp to Buonaparte, he accompanied him to Egypt, where he eminently distinguished himself, and was severely wounded by the bursting of a howitzer. On the formation of the imperial court in 1805, he was created grand-marshal of the palace; and was afterwards employed in diplomatic missions, though he still took his full share of peril and glory in the wars of France, till the time of his death, which happened at the battle of Wurtzchen, in 1813. Napoleon, who was firmly attached to Duroc, wept over him on his death-bed; and perhaps he never had to lament the loss of a more faithful friend or a braver soldier.

DUBART, CORNELIUS, a Dutch painter,

who excelled in tavern scenes, revelry, &c., was the disciple of Adrian Ostade. Born, 1663; died, 1704.

DUSSEK, JOHANN LUDWIG, an eminent musical composer, was born at Czaslau, in Bohemia, in 1762, and studied at Hamburg, under the famous Emanuel Bach. From the north of Europe he went to France, but being compelled to leave that country during the revolution, he came to London in 1796, and, in conjunction with Corri, opened a musical establishment. In 1799 he returned to the continent, and died in 1812.

DUTENS, LOUIS, miscellaneous writer, was born at Tours in 1730. He became secretary and chaplain to the British minister at Turin, who left him there, on his return to England, as chargé-d'affaires. He afterwards obtained the living of Elkton, in Northumberland, became F.R.S., and died in London, 1812. His principal works are, "Recherches sur l'Origine des Découvertes attribuées aux Modernes," "Des Pierres Précieuses et des Pierres Fines," "Mémoires du Voyageur qui se Repose," and a good edition of the works of Leibnitz.

DUTENS, JOSEPH MICHEL, French engineer and political economist, was born at Tours in 1765. He visited England on a government mission in 1818, to investigate the canal system and other public works, and published soon after "Memoirs on the Public Works of England." His most important work is the "Philosophie de l'Economie Politique," which appeared in 1835. He wrote several other treatises, was admitted to the Academy of Sciences, and died, 1848.

DUTROCHET, RENÉ JOACHIM HENRI, French physician and natural philosopher, was born in 1778. He studied at Paris, and became physician to Joseph Buonaparte on his accession to the throne of Spain. He soon, however, returned to France and devoted himself to physiological and kindred studies. His most celebrated researches are those on the passage of fluids through a membrane. He published "Nouvelles Recherches sur l'Endosmose et l'Exosmose," and "Mémoires pour servir à l'Histoire Anatomique et Physiologique des Végétaux et des Animaux." Died at Paris, 1847.

DUVAL, whose real name was VALENTINE JAMERAL, the son of a peasant, was born at Artonay, in Champagne, in 1695. Being left an orphan at the age of 10, he was employed as a shepherd's boy, and underwent great privations; but at 18, he became keeper of the cattle belonging to the hermits of St Anne, near Luneville, and by one of that fraternity he was taught to read. Thenceforth he displayed an earnest desire for acquiring knowledge; and being discovered by two noblemen while he was studying geography under a tree, with his maps stretched out before him, they were so pleased with his conversation, that they introduced him to the duke of Lorraine, who sent him to college, afterwards made him his librarian, and eventually procured him the situation of keeper of the books and medals of the imperial cabinet of Vienna. He published several learned works on coins, and died in 1775.

DUVERNEY, JOSEPH GUICHARD, a celebrated French anatomist, was born at Feurs in 1648; appointed professor of anatomy in the Jardin du Roi in 1679, and died in 1717. He was the author of a celebrated "Traité de l'Organe de l'Ouïe," which was frequently reprinted and translated into several languages. He wrote also other works illustrative of the science he professed.

DWIGHT, TIMOTHY, an American divine of great reputation both as a pulpit orator and a writer, was born in Massachusetts, in 1732; became president of Yale College in 1795; and died in 1817. His "System of Theology," once regarded as a work of great merit, has been frequently reprinted.

DYCE, WILLIAM, the distinguished historical painter, was born at Aberdeen in 1806. He studied at Marischal College, and thence passed to the schools of the Royal Scottish Academy. He at first painted portraits, but after twice visiting Italy, he applied himself to the higher forms of art, and showed the fruits of his study and admiration of both German and French historical painters. He was named superintendent of the new Schools of Design, and held that office three years. He contributed greatly both as painter and teacher to foster an intelligent interest in fresco-painting, and he was employed to paint some frescoes in Buckingham Palace, and at Osborne. His most important works are the series of frescoes from the Life of Christ in All Saints Church, Margaret Street, and the unfinished series in the Palace at Westminster. His "Baptism of Ethelbert," in the House of Lords, is considered one of his best works. Dyce was admitted A.R.A. in 1845, and R.A. three years later. He subsequently painted in the manner of the school known as Pre-Raphaelite, and among his pieces in that style are the scenes from the Lives of Titus and George Herbert, and several subjects from sacred history. Among his cabinet and gallery pictures are a "Madonna and Child," the "Meeting of Jacob and Rachel," "Joah shooting the arrow of deliverance," "King Lear and the Fool," &c. Mr Dyce was especially an educated painter, but he was also a very learned ecclesiastical and theological scholar, an accomplished musician, and an able writer. Died in February, 1864.

DYER, SIR EDWARD, a poet of the Elizabethan age, was born about 1540, and educated at Oxford. He received many proofs of the royal favour after he had returned from his travels, being employed in various embassies by the queen, who conferred on him the chancellorship of the Garter in 1604. His poetical pieces consist chiefly of pastorals, odes and madrigals.

DYER, GEORGE, a classical scholar and miscellaneous writer, whose long life of literary toil may be depicted by quoting from the Gentleman's Magazine the following mournful record: "The greatest labour of his life was the share he had in the production of Valfry's edition of the classics in 141 volumes, being a combination of the Delphin, Hipoint, and Variorum editions. With the exception of the preface Dyer contributed all that was original in the

east work, upon which the year 1819 to 1820 completed this work, and shortly afterwards. The writer of the space which the pie), "The memory ever cherished by passed through the contracted one ble, guileless simplicity to his friend Charles, indeed, indulge his sense of one whom nerable Innocency, that, in doing so, it familiar to the public integrity and single been accustomed to patterns of his speech in 1755; received his Hospital and Emanuel and died in 1841, aged varied and numerous classical, and political "History of the University of Cambridge," 2 vols. lages of the University vols. are the most in

DYER, SIR JAMES Common Pleas, and Commons, was born in Dyer's "Reports" at the profession.

DYER, JOHN, a poet, was born in Wiltshire, in 1717.

EADMER, a learned historian who lived in the 12th century. He was archbishop of Canterbury to the see of St Andrew, consequence of the See to recognize pre-eminent archbishop of Canterbury. The most immortal is his "Historia of England between the He wrote also Lives of St Wilfred, &c.

EARLE, JOHN, an English-born at York, and entered Oxford, in 1620. He was tutor to Charles, prince of Wales, and was referred much in the civil war he was made dean of Worcester, and translated to Salisbury, was the author of an interesting "Microcosmography; or discovered, in Essays a

most work, upon which he was engaged from the year 1819 to 1830! He had scarcely completed this work when his eyesight gave way, and shortly afterwards left him in total blindness." The writer adds (and let us not grudge the space which the unaffected tribute occupies): "The memory of George Dyer will be ever cherished by his friends as of one who passed through the world without having contracted one blemish of worldliness; his guileless simplicity endeared him especially to his friend Charles Lamb, who would often, indeed, indulge his humorous vein at the expense of one whom he knew to be of invulnerable innocence, but who has also declared that, in doing so, it was his ambition to make familiar to the public a character which, for integrity and single-heartedness, he has long been accustomed to rank among the best patterns of his species." Mr Dyer was born in 1753; received his education at Christ's Hospital and Emanuel College, Cambridge; and died in 1841, aged 88. His writings are varied and numerous; historical, poetical, classical, and political; amongst them his "History of the University and Colleges of Cambridge," 2 vols., and the "The Privileges of the University of Cambridge," &c., 2 vols., are the most important.

DYER, SIR JAMES, chief justice of the Common Pleas, and speaker of the House of Commons, was born in 1512, and died in 1581. Dyer's "Reports" are still highly valued by the profession.

DYER, JOHN, a poet of considerable reputation, was born at Aberglasney, Caermarthenshire, in 1700, and educated at

Westminster School. He was intended for the law, which he abandoned for painting, but not arriving at excellence as an artist, he took orders, and obtained some respectable church preferment. In 1727 he published his poem of "Grongar Hill," which met with deserved success. He then made the tour of Italy, where, besides the usual study, he often spent whole days sketching in the country about Rome and Florence, and thence derived the hints for the beautiful landscapes depicted in his two subsequent poems. These are entitled "The Ruins of Rome" and "The Fleec." His poetry displays a lively imagination, and combines great originality, and the warmest sentiments of benevolence and virtue. He died in 1758.

DYMOND, JONATHAN, an English moralist, was born at Exeter in 1796. He was a member of the Society of Friends, and carried on the business of a draper. He wrote an "Essay on the Principles of Morality, and on the Private and Political Rights and Obligations of Mankind," in which he reasons with much good sense and earnestness against utility and expediency as bases of morality, and maintains that its real foundation is the will of God as made known through the Bible. This Essay appeared in 2 vols. 8vo. in 1829, and has passed through many editions both in England and America. It was reviewed by Southey in the Quarterly Review, No. LXXXVII. Dymond was also author of an "Inquiry into the Accordancy of War with the Principles of Christianity." Died, 1828.

E.

EADMER, a learned British monk and historian who lived in the 11th and 12th centuries. He was the friend of Anselm, archbishop of Canterbury, and was chosen to the see of St Andrews, but refused it in consequence of the Scottish king's objection to recognize pre-eminence on the part of the archbishop of Canterbury over the Scottish bishop. The most important work of Eadmer is his "Historia Novorum," a history of England between the years 1066 and 1122. He wrote also Lives of St Anselm, St Dunstan, St Wilfred, &c.

EARLE, JOHN, an English prelate, was born at York, and entered of Merton College, Oxford, in 1620. He became chaplain and tutor to Charles, prince of Wales, and suffered much in the civil war. At the restoration he was made dean of Westminster and bishop of Worcester, from which see he was translated to Salisbury in 1663. Dr Earle was the author of an ingenious work, entitled "Microcosmography; or, a Piece of the World discovered, in Essays and Characters." He

also translated the Icon Basilike into Latin. Died, 1665.

EARLON, RICHARD, a mezzotinto engraver, who lived in the latter half of the 18th and the beginning of the 19th century. His taste for design is said to have been excited by inspecting the ornaments on the lord mayor's coach, which had been painted by Cipriani. He was employed by Boydell to make drawings from the celebrated collection of pictures at Houghton, which he afterwards engraved in mezzotinto—an art in which he was his own instructor. He also engraved and published two volumes of plates from Claude's Liber Veritatis; several fine flower-pieces from Van Huysum; a tiger hunt, and other subjects, from Zoffany, &c.

EHELING, CHRISTOPH DANIEL, a distinguished geographer, was born in 1741; died, 1817. He long held the post of professor of history at Hamburg, as well as that of city librarian. He made himself known by an extensive work on the history and geography of the United States.

EBERHARD, JOHANN AUGUST, German philosopher, born at Halberstadt in 1739. He studied at Halle, and entered the church, but his advance was hindered by suspicions of his orthodoxy. The influence of Frederick the Great procured him the post of preacher at Charlottenburg. He afterwards became professor at Halle, and for some time distinguished himself by his opposition to the philosophy of Kant. Eberhard was a follower of Leibnitz. His philosophical works were a "Neue Apologie des Sokrates," "Theorie des Denkens und Empfindens," "Sittenlehre der Vernunft," "Theorie der schönen Künste und Wissenschaften," &c. He was also author of a valuable dictionary of synonyms, "Versuch einer Allgemeinen Deutschen Synonymik," and contributed numerous papers to periodical literature. He was a privy councillor of the king of Prussia, and a member of the Academy of Berlin. Died, 1809.

ECHARD, LAURENCE, an English divine and historian, was born about 1670; received his education at Cambridge; became archdeacon of Stowe, and obtained some valuable livings in his native county, Suffolk. He was a very voluminous writer; "The Roman History," "A General Ecclesiastical History," and a "History of England," were the most prominent of his works. They are now forgotten. Died, 1730.

ECKHARD, JOHANN FRIEDRICH, a learned and voluminous writer on philology and bibliography, was director and librarian of the college of Eisenach; born in Saxony in 1723, and died in 1794.

ECKHARD, JOHANN GEORG, antiquary and historian, was born in the duchy of Brunswick, in 1674, and brought up a Protestant, but abjuring his religion, he was made historiographer and keeper of the archives at Würzburg. His principal works are, "Corpus Histor. Medii Aevi," "Origines Habsburgo-Austrince," "Commentarii de rebus Francie Orientalis," &c. Died, 1730.

ECKHEL, JOSEPH HILARY, one of the most distinguished numismatists of modern times, was born in Austria, 1737. He entered the order of Jesuits at an early age, and after visiting Italy he obtained the post of director of the Imperial Cabinet of Medals, Vienna. His fame rests chiefly on his great work entitled "Doctrina Numorum Veterum," which appeared, in 8 vols., between 1792 and 1798. Its fullness of information, excellence of plan and of style, gave it at once a very high place amongst works of its class. Eckhel wrote many other works on his favourite subject, among which are "Numi Veteres Aneadoti ex Musaeis," his first work; a catalogue of ancient coins in the Imperial Museum, Vienna; "Choix de Pierres Gravees du Cabinet Impérial des Antiques," &c. Died, 1798.

ECLUSE. [CLUSIUS.]

EDELINCK, GERARD, an eminent engraver, born at Antwerp, in 1649, was patronized by Louis XIV. of France, and executed many great works from historical subjects, as well as the portraits of distinguished characters. Died, 1707.

EDGAR, king of England, was the younger of the two sons of Edmund I. During the reign of his brother Edwy he was chosen

king of Mercia and Northumbria, and succeeded Edwy in 958. He recalled Dunstan, made him bishop of Worcester, of London, and, on the death of Odo, archbishop of Canterbury, and gave himself up to his direction. The reign of Edgar was peaceful, the Northmen making no descents on England, perhaps in consequence of the large fleet kept up by the king. Monasteries were restored, and many new ones built; the married clergy expelled, and church power raised to a higher point than before, which made Edgar a favourite and got him a good name with monkish historians. His character was nevertheless feeble, selfish, and sensual. Edgar was not crowned till 973, and the same year took place the stately ceremonial on the Dee, when six or eight subject kings attended him. Edgar is said to have imposed on the Welsh an annual tribute of 300 wolves' heads, instead of a money tax. Died, 975. He left two sons, Edward and Ethelred, who both succeeded to the crown.

EDGAR ATHELING, or Prince EDGAR, son of Edward Atheling, also called EDWARD THE OUTLAW, and grandson of Edmund Ironside, was probably born in Hungary, whither his father and uncle, then children, had been sent after the accession of Canute. He came to England with his father in 1057, but though he was rightful heir to the throne on the death of Edward the Confessor, his claims were passed over. After the fall of Harold at the battle of Hastings, he was actually proclaimed king at London, and appears to have been recognized for some time as such; but he was of a feeble temper, and was one of the first to profess submission to the Conqueror, whom in the next year he followed into Normandy. In 1068 he was in Scotland, and his sister Margaret was married not long after to King Malcolm. He took part in the invasion of England and the storming of York Castle in 1069, and was induced on several occasions subsequently to make rash attempts of a similar kind, followed by formal reconciliation with William. In 1086 he went to Italy, and is said to have joined the Norman bands there. In 1098 his nephew Edgar, with his aid, was raised to the Scottish throne. In the civil war between Henry I. and his brother Robert, duke of Normandy, Edgar joined the latter, and was captured by Henry at the battle of Tinchebrai in 1106. The year of his death is unknown.

EDGEWORTH, RICHARD LOVELL, of Edgeworthstown, Ireland, was born at Bath, in 1744, and completed his studies at Oxford. Being possessed of a good fortune, he devoted much of his time to agricultural improvements, as well as to the amelioration of the existing modes of education, by writing, in conjunction with his highly gifted daughter, many useful works. He also wrote his own "Memoirs;" and among his various mechanical inventions was a telegraph. Died, 1817.

EDGEWORTH, MARIA, the celebrated Irish novelist, whose works have had great influence in promoting the cause of education, was born in Berkshire, in 1765. She was the daughter of Richard Lovell Edgeworth above-noticed, and was 12 years

celebrated e had great e of educa- 1766. She vello Edge- 12 years

old before she was taken to her paternal home. She commenced her career as an authoress about 1800: and in her early literary efforts she was greatly assisted by her father. The famous "Essay on Irish Bulls," the joint production of herself and her father, was published in 1801. Her "Castle Rackrent" abounds in admirable sketches of Irish life and manners, for which most of her tales and novels are distinguished. In 1804 she published her "Popular Tales," 3 vols.; and two years afterwards, "Leonora," a novel in 2 vols. In 1809 she issued 3 vols. of "Tales of Fashionable Life," of a more powerful and varied cast than any of her previous productions. Three other vols. of "Fashionable Tales" appeared in 1812, and fully sustained the high reputation which she had attained. In 1814 her novel of "Patronage," in 4 vols. was published. Its object is to show the miseries resulting from a dependence on the great, and she paints the manners and characters of high life with her usual vigour and fidelity. In 1817 appeared two tales, named "Harrington" and "Ormond;" the intention of the first of these being the removal of the prejudices enter- tained by many against the Jews; the other is an Irish story. In 1822, Miss Edgeworth published a work of a different kind, namely, "Rosamond," a sequel to "Early Lessons," which had been previously published, being tales for the young. In 1825 she issued 4 vols. of similar tales, under the title of "Harriet and Lucy," being a continuation of that course of moral instruction for youthful readers on which she had so successfully entered, and in which she had so few equals. Miss Edgeworth's last work of fiction, a novel entitled "Helen," in 3 vols., appeared in 1834. It is not inferior to any of her other works. Besides those already mentioned, she also wrote "The Modern Griselda," "Frank," "Garry Owen," "Laurent le Parresseux," "Little Plays for Young People," "Moral Tales," "Parent's Assistant," "Patronage and Comic Dramas," &c. Originality and fertility of invention, and a power of depicting Irish manners, unequalled among modern authors, are her chief characteristics as a novelist. Sir Walter Scott, with whom she lived in the closest friendship, has acknowledged that to her descriptions of Irish character and manners he are indebted, in a great measure, for the "Waverley Novels." "The rich humour, pathetic tenderness, and admirable tact" of her Irish delineations, he declared, led him first to think that something might be attempted for his own country of the same kind. In private life, Miss Edgeworth was highly beloved and respected by all who knew her; and, in her intercourse with society, she was most unaffected and agreeable. But she had long ceased to take an active part in life, or in the world of literature of which she was once so bright an ornament, her last years being passed in tranquillity at the family seat at Edgeworthstown. Died, 1849.

EDGEWORTH DE FIRMONT, HENRY ESSEX, confessor to Louis XVI., was born at Edgeworthstown, Ireland, in 1745. His father, who was a Protestant clergyman, became a Catholic, and went with his family to

France, where Henry was educated. Being devoted to the cause of royalty, he offered personally to attend the king to the place of execution, ascended the scaffold with him, and exclaimed, as the axe fell, "Son of Saint Louis, ascend to heaven!" He succeeded in escaping to this country, in 1796, when Mr Pitt, in the name of the king, offered him a pension, which he declined. He followed Louis XVIII. to Blankenburg, in Brunswick, and thence to Mittau, where he died in 1807.

EDMUND, 1ST, king of the East Angles from 855 to 870. He is said to have been distinguished for justice and piety. In 870 he was defeated and taken prisoner by the Danes, who caused him to be fastened to a tree, and to be shot to death with arrows. His head was cut off, and his remains were interred at the place named after him, Bury St Edmunds.

EDMUND I., king of England, son of Edward the Elder, succeeded his brother Athelstan in 941. He subdued Northumbria and Gumbria, and was almost constantly engaged in war with the Danes settled in England. He was killed in 946, while at a banquet, by an outlaw named Liöfa, who entered among the guests, and provoked the king to a personal attack upon him.

EDMUND II., surnamed IRONSIDE, on account of his strength, or perhaps from the armour he wore, was the son of Etheired, whom he succeeded in 1016; but being opposed by Canute, he agreed to share the crown with him. London was twice besieged by the Danes in his reign, and many battles were fought, Edmund being finally defeated at Assandun. After a reign of nine months only, he is said to have been treacherously murdered, in 1017.

EDMUND RICH, ST, archbishop of Canterbury, was born at Abingdon about the close of the 12th century. His mother, Mabel, was remarkable for her ascetic piety—her fasts, vigils, hair chemise, and stays of iron: and she so ordered her house that her husband preferred a monastery. Edmund was sent to school at Oxford, and while there made a vow of celibacy and wedded the Virgin Mary. He next studied at Paris, whence he was called to his mother's death-bed at Abingdon: and after a period of retirement, became a teacher at Oxford. He was one of the illustrious men who aimed to restore the university to prosperity and honour, and is said to have had Grossteste and Robert Bacon among his pupils. About 1222 he was named treasurer of Salisbury Cathedral, where he gained esteem by his earnestness as a preacher, his hospitality and almsdeeds. In 1227 he took part in preaching the crusade; and in 1233, while rector of Calne, he was appointed archbishop of Canterbury. It was then a position of great difficulty, and Edmund attached himself and consistently adhered to the popular party, as distinguished from the parties of the court and the pope. He presided at two councils in 1234, which by solemn remonstrance and threat of excommunication compelled the king, Henry III., to dismiss his foreign ministers and favourites: and he soon after negotiated a peace with Llewellyn, prince of Wales. The archbishop continued his ascetic habits,

yet indulged in the pleasure of female society, even allowing himself a "platonic affection" for a nun, who was his ward. In January, 1236, he was visited by the king, whose marriage with Eleanor of Provence, and the coronation of the latter, he celebrated the same month. The authority of Edmund being soon after virtually superseded by that of the new legate, Cardinal Otho, and not succeeding in his attempt at reform of the monasteries, he visited Rome in 1232, but came back disappointed, having received only insult and neglect from the papal court. Two years later he retired to France, the queen, mother of St Louis, bringing her sons to meet him to receive his blessing. He took up his abode at the abbey of Pontigny, whence he removed for his health's sake to the priory of Solissy, and there died, 1240. He was canonized, after much reluctance, by Innocent IV., in 1246, and his shrine was resorted to till it was destroyed during the French revolution.

EDRED, king of England, was son of Edward I., named the Elder, and succeeded his brother Edmund in 946. He suppressed a revolt of the Northumbrians, received from them oaths of fidelity which they immediately broke, and again subdued them. Edred was of feeble health, and inclined to an ascetic life. He had for chief adviser during the latter part of his reign the celebrated Dunstan. Died, 955.

EDRIDGE, HENRY, an eminent landscape and miniature painter, was born at Paddington, in 1768. His earlier portraits are principally drawn on paper, with black lead and Indian ink: but in later years he produced an immense number of elaborately finished pictures, in which were combined the depth and richness of oil-paintings with the freedom of water-colour drawings. Died, 1821.

EDRISI, ABU ABDALLAH MOHAMMED BEN MOHAMMED, a descendant of the African princes of the race of Edris, was born in Spain in 1099, and settled at the court of Roger, king of Sicily; for whom he made, about 1150, an immense terrestrial globe of silver, and wrote in Arabic a geographical work to explain it.

EDWARD THE ELDER, son of Alfred the Great, succeeded his father in 901. His succession was disputed by his cousin, Ethelwald the Atheling, who obtained the help of the Danes. The conflict ended with the death of Ethelwald in battle in 905. But Edward still carried on war with the Danes, and Mercia, Northumbria, and East Angles were subdued by him; and he extended his dominions by conquests in Scotland and Wales. Died, 925.

EDWARD THE MARTYR, son of Edgar, king of England, was born in 962, and crowned in 975. He was murdered by order of his stepmother Elfrida, at Corfe Castle, after a reign of three years.

EDWARD THE CONFESSOR, king of England, was the son of Ethelred, and succeeded Hardicanute in 1042. He had been brought up in Normandy, and there lived till he was called to the throne. Throughout his reign the chief power was in the hands of the great Earl Godwin, whose daughter Edgitha he married. He restored

Malcolm to the throne of Scotland, which had been usurped by Macbeth. He caused the Saxon laws to be revised, amended, formed into one body, and translated into Latin; hence they were called his laws. He consulted William of Normandy about the choice of a successor, which furnished that prince with a plea for invading the kingdom after the death of Edward, which happened in Jan., 1066.

EDWARD I. (LONGSHANKS), king of England, eldest son of Henry III. and his queen, Eleanor of Provence, was born in 1239. At ten years of age he was named governor of Gascony, and married in 1254 the Princess Eleanor of Castile. He took a prominent part in state affairs during the latter part of his father's reign, and showed that ability, quick energy, and decision of character which distinguished him throughout his reign. In the barons' war, which began in 1261, he had generally the conduct of the royal forces; was defeated and taken prisoner by De Montfort, at Lewes, in 1264; escaped the next year, and defeated De Montfort at Evesham, thus securing the liberty of his father, and ended the war by the reduction of the Isle of Ely in 1267. He soon after took the cross, and set out to join St Louis in the crusade, but did not arrive in the Holy Land till 1271. After various successes, and a narrow escape from assassination—his wife, it is said, sucking the poison from his arm—he set out on his return, arriving in England in August, 1274. He had been proclaimed king on the death of his father nearly two years previously, and was crowned with his queen soon after his arrival. War filled up the greater part of his reign. The principal events are the conquest of Wales and the wars with Scotland. Llewellyn, prince of Wales, refusing to attend the English parliament and do homage, was defeated by Edward in 1277; and having again revolted, was again defeated, and at last slain, in 1282. Edward built many castles in Wales, and settled the government by the statute of Rhuddlan. He treated the Jews with great cruelty and injustice, hung hundreds of them on a charge of clipping the coin, and in 1290 banished them. In 1291 the numerous competitors for the crown of Scotland submitted their claims to Edward's decision, which was in favour of John Balliol. Balliol did homage to Edward, and was made to feel his dependence too keenly; so that war soon broke out between the two kingdoms. Then came the terrible devastation of Scotland, temporary submission, insurrection of Wallace, his victory of Stirling, his defeat at Falkirk, numerous invasions and truces, capture and execution of the great patriot leader, fresh revolt and coronation of Robert Bruce in 1306, and a final expedition against the Scots in the following year, which was cut short by the death of Edward at Burgh-onthesands near Carlisle, 7th July, 1307. Very great and important legislative changes took place in this reign. Edward left, by his first wife, four sons and nine daughters; and by his second, Margaret of France, two sons and one daughter.

[EDW]

A New Universal Biography.

[EDW]

son of the preceding, and born at Caernarvon. He succeeded his father in 1307, and was governed by his favourites, Gaveston and the Spencers, which occasioned the barons to rise against him. After resigning his crown, he was confined in Berkeley Castle, Gloucestershire, where he was traitorously murdered by the contrivance of his queen, Isabella, and her favourite, Roger Mortimer, earl of March, in 1328. His deposition took place in 1327.

EDWARD III., king of England, eldest son of Edward II. and Isabella of France, was born at Windsor in 1312, and succeeded to the throne, on the deposition of his father, in 1327. Although a regency was appointed, the chief power was held by the queen and her paramour, Roger Mortimer, earl of March. In 1328 Edward was married to Philippa, daughter of William III., count of Holland and Hainaut, and two years later he assumed the government, had Mortimer seized and hanged, and imprisoned Queen Isabella. In 1333 Edward invaded Scotland, which had been nominally subjected to England by Edward Balliol; besieged Berwick, and defeated the Regent at Halidon Hill. The greater war with France soon withdrew his attention from Scotland. He assumed the title of king of France, invaded the country from Flanders, but without any successful result, renewed the invasion in 1340, when he defeated the French fleet at Sluys, besieged Tournay, and concluded a truce. The war was renewed and another truce made in 1343, to be broken the following year. In 1346 he won the great victory of Crecy, took Calais in 1347, and concluded another truce. During Edward's absence in France the Scots invaded England, and were defeated at Nevill's Cross, David II. being taken prisoner. Edward aimed at the acquisition of Flanders, hoped to get his son Edward, the Black Prince, made earl of Flanders by the aid of Philip van Artevelde and the free towns; but Philip was murdered in an insurrection at Ghent. In 1356 Edward, the Black Prince, invaded France, and gained the victory of Poitiers, taking the French king and his son prisoners. The king was released after four years on the conclusion of the peace of Bretigny. David of Scotland was released for a heavy ransom in 1357. War broke out again with France in 1369, and in 1373 John of Gaunt marched without resistance from Calais to Bordeaux. The long wars of Edward III., though almost fruitless of practical result, appear to have been popular; and his numerous parliaments granted liberal supplies for carrying them on, gaining in return confirmations of the Great and other charters, and many valuable concessions. His victories raised the spirit and also the fame of his country, and with the evident military power of England grew also her commerce and manufactures. In this reign Wickliffe began his assault on the church of Rome; the order of the Garter was instituted; cannon began to be used in war; and the first English gold coin was struck. Edward died at Rhene, now Richmond, 21st June, 1377. By his queen, Philipps, he had six sons and five daughters.

EDWARD, prince of Wales, surnamed

the Black Prince, son of Edward III., was born in 1350; and, accompanying his father to France in 1346, took a leading part in gaining the glorious victory of Crecy in the year following. During his stay in France he performed many other acts of heroism, till at length, in 1356, he won the great battle of Poitiers, when he took King John and his son prisoners, and distinguished himself as much by his courtesy and true chivalry to his captives, as he had in the field by his unrivalled valour. In 1361 he married a daughter of the earl of Kent, and soon after was created prince of Aquitaine by his father. Bordeaux then became the seat of his government. In 1367 he went to the assistance of Pedro the Cruel, king of Castile, who had been dethroned by his brother, Henry of Trastamare. The latter was defeated, and Pedro re-established, but only for a short time. Prince Edward was soon after involved in disputes with his subjects, which occasioned the renewal of war between France and England. He died in 1376, aged 45.

EDWARD IV., son of Richard, duke of York, succeeded Henry VI. in 1461. Edward came to the throne in the midst of the fierce struggle between the Yorkists and Lancastrians, in which he greatly distinguished himself by his courage and military skill. He won a great victory over the Lancastrians, at Northampton, in July, 1460, and a second at Mortimer's Cross, in February, 1461; after which he marched on London, and was proclaimed. A few weeks after his accession he defeated them a third time at Towton, in Yorkshire. The war continued with varying fortunes till 1464. In the same year he married Lady Elizabeth Grey, which so disgusted the earl of Warwick, commonly called the king-maker, that he joined the Lancastrian party, and the civil war was recommenced. Warwick defeated Edward's forces near Banbury in 1469. Soon afterwards Warwick fled to France, from whence he returned with a supply of troops, and proclaimed Henry. Edward escaped beyond sea, and Warwick released Henry from the Tower, and set him on the throne; but Edward returned with succours, and marched to London, where he took Henry prisoner. He shortly after won the battle of Barnet, in which Warwick fell. Another victory at Tewkesbury secured to him the quiet possession of the throne. Preparations were made for war with France, and an expedition sent, which was, however, fruitless. War broke out also with Scotland, but nothing of importance occurred. In 1478 Edward had his brother, the duke of Clarence, condemned and put to death as a traitor. Clarence had married Isabel, daughter of the earl of Warwick, and had taken part with him against the king. Edward died in 1483, aged 41.

EDWARD V., son of the preceding, whom he succeeded at the age of 12 years. Richard, duke of Gloucester, his uncle, took the guardianship of him and his brother into his own hands, and placed them in the Tower, where they were smothered in their beds, in 1483.

EDWARD VI., king of England, the only

son of Henry VIII., by his queen, Jane Seymour, was born at Hampton, Court in 1537. His mother died soon after his birth. He was carefully educated, and had for tutors Sir Anthony Cooke and Sir John Cheke. He succeeded his father in 1547, but by reason of his tender age and early death, had little to do with the important measures that mark his reign. His uncle, the earl of Hertford, was named protector, and created duke of Somerset; but in 1549 his place was taken by Dudley, earl of Warwick, created duke of Northumberland; and Somerset, two years later, was charged with treason and felony, and beheaded. Both of these, however, carried on the work of the reformation. Somerset made an expedition into Scotland, and gained the victory of Musselburgh or Pinkie in 1547; Warwick defeated the insurgents under Ket, the Norfolk tanner, in 1549; a very severe law was passed against vagabonds, but had to be soon repealed. The act of Six Articles was repealed, and the use of the Book of Common Prayer established. By the intrigues of Northumberland, Edward was induced in his last illness to name Lady Jane Grey his successor. He died at Greenwich in July, 1553. Edward VI. was the founder of Bridewell and St Thomas's Hospitals, and of numerous grammar schools.

EDWARD PLANTAGENET, earl of Warwick, the only surviving male descendant of the house of York, was kept a prisoner in the Tower several years, through jealousy, and at last beheaded in 1499, on a pretext that he entered into a conspiracy with Perkin Warbeck against Henry VII.

EDWARDS, BRYAN, historian, was born in 1743, at Westbury, in Wiltshire, and, on the death of his father, was taken under the care of an uncle in Jamaica. He afterwards settled in England, and was returned member of parliament for Grampound in Cornwall. Mr Edwards wrote "The History, Civil and Commercial, of the British Colonies in the West Indies," 2 vols. 4to; and "An Historical Survey of the French Colony in the Island of St Domingo," 8vo. He died in 1800.

EDWARDS, GEORGE, naturalist, was born in 1693, at Stratford, in Essex. He was bred to trade, but on the expiration of his apprenticeship he went abroad, and for some years applied himself to the study of natural history, for which he had always shown a predilection. On his return to England he was appointed librarian of the college of physicians; and while holding that situation he published a "History of Birds," in 7 vols. 4to; "Gleanings of Natural History," in 3 vols. 4to; and a volume of Essays. He was a fellow of the Royal Society and of the Society of Antiquaries. Died, 1773.

EDWARDS, JONATHAN, an American theologian and metaphysician, was born at Windsor, in Connecticut, in 1703. In 1722 he became a preacher at New York to a presbyterian congregation, and in 1724 was chosen tutor of Yale College. In 1726 he resigned that station, and became assistant to his grandfather, who was a minister at Northampton. Here he continued till 1750,

when he was dismissed for refusing to administer the sacrament to those who could not give proofs of their being converted. The year following he went as missionary among the Indians, and in 1757 was chosen president of the college of New Jersey, where he died in 1768. He wrote a "Treatise concerning Religious Affections;" the "Life of David Brainerd, the Missionary;" an "Inquiry into the modern prevailing Notion of that Freedom of Will, which is supposed to be essential to Moral Agency," &c. The last-named work is that on which his fame rests, and is one of the most powerful expositions and defences of the views known as Calvinistic.

EDWARDS, THOMAS, an English divine, was educated at Cambridge, where he took his degree of M.A. in 1609. He was a furious Presbyterian, and wrote with equal zeal against the Episcopalians and Independents. When the latter party gained the ascendancy, he withdrew to Holland, where he died in 1647. His "Gangrene" exhibits a curious picture of the religious divisions of that period.

EDWIN, king of Northumbria, was son of Ella, the Bretwalda, and being an infant at his father's death in 588, the kingdom was seized by Ethelrith of Bernicia. The story of Edwin is overlaid with myths, but it is probable that, by the aid of Redwald, king of East Anglia, with whom he had taken refuge, he was placed on the throne in 617. He is said to have made himself master of all Britain except Kent. He married Ethelburga, daughter of Ethelbert of Kent, the patron of the monk Augustine; and by her influence, and that of Bishop Paulinus, he was led to profess the Christian faith and to make it the religion of his people. He was baptized at York in 627, and there built the first church of wood. A war with the Mercians broke out soon after, and Edwin was defeated and slain by Penda, at Hatfield, in Yorkshire, 633. Edwin was afterwards canonized.

EDWY, king of England, son of Edmund I., succeeded his uncle Edred in 955. He opposed the temporal power of St Dunstan, called him to account for his share in the administration of the preceding reign, and banished him. A revolt broke out soon after in Mercia and Northumbria, promoted probably by the influence of Dunstan and his party, and Edgar was chosen king of those provinces. Edwy, by his marriage with Elgiva, who was related to him, deeply offended the clerical party, and Archbishop Odo, with the approval and support of Dunstan, separated them, not without acts of terrible cruelty. Elgiva was put to death, and Edwy, not 19 years of age, died soon after, 958.

ECKHOUT, ANTHONY VANDER, a Dutch fruit and flower painter, born in 1656. He worked for some time in conjunction with Lewis Deyster, his brother-in-law, and their paintings were highly esteemed. Eckhout went to Lisbon about 1693, and soon after his marriage, two years later, to a noble and wealthy lady, he was murdered by rivals in art or in love, who were jealous of his success.

ECKHOUT, Dutch portrait artist, born at Amsterdam, 1656. He was a prominent disciple of Rembrandt, and very successfully employed in vigour to his general failure in careless of costume, less dark than Rembrandt.

EFFEN, JUSTUS, a Dutch litterateur, was born at Leyden, and at a tutor to the son of a Dutchman after the appearance of England, Van Effen on a similar plan. "Le Misanthrope," French, as almost all the world knows. He had two opponents himself with English sent to London after he made good translations of Swift's "Tale of a Crusoe." He was a

pal writer in the published at the Hague before his death he wrote in Dutch: he died at Bois-le-Duc.

EGBERT, king of the ant of Cerdic, the founder of the Wessex. While young he was after a short stay fled to France, and Charlemagne. He died in 803, when he began tribes occupying the England. Ten years course of conquest him, in 827, king of received the ancient Bretwalda, which he the sovereigns of Northumbria were, he ed, but became tributary after years of his several descents upon defeated by him in 900. He died in 937, and was Ethelwolf.

EGEDE, HANS, for mission in Greenland way, and was born in a parish priest, in Christiania, was ordained. It was not long before turned towards Greenland and promising field. His plan was at first of his wife and of later, 1717, he resumed a trading company with king of Denmark, and some others, in difficulties and hardships, but faith and courage. In 1733 the small-pox and in a Danish ship, terrible. The first M arrived at the same faithful helpmate at

ECKHOUT, GERBRANT VANDER, a Dutch portrait and historical painter, born at Amsterdam, 1621. He was the most eminent disciple of Rembrandt, whose style he very successfully imitated. He was inferior in vigour to his great master, and, like him, generally failed in correct drawing, and was careless of costumes. His backgrounds are less dark than Rembrandt's. Died, 1674.

EFFEN, JUSTUS VAN, a celebrated Dutch littérateur, was born at Utrecht, 1684. He studied at the universities of Utrecht and Leyden, and at a very early age became tutor to the son of a Dutch nobleman. Soon after the appearance of the "Spectator" in England, Van Effen began to publish essays on a similar plan. His work was entitled "Le Misanthrope," and was written in French, as almost all his other works were. He had two opportunities of acquainting himself with English society, being twice sent to London as secretary of embassy. He made good translations into French of Swift's "Tale of a Tub," and of "Robinson Crusoe." He was for some time the principal writer in the "Journal Littéraire," published at the Hague. A few years before his death he began publishing "De Hollandsche Spectator," the only work he wrote in Dutch: his last work and his best. Died at Bois-le-Duc, 1735.

EGBERT, king of Wessex, was a descendant of Cerdic, the founder of that kingdom. While young he was banished by Brihtric, and after a short stay at the court of Offa, fled to France, and lived at the court of Charlemagne. He succeeded Brihtric in 800, and appears to have reigned in peace till 809, when he began to make war on the tribes occupying the south-west quarter of England. Ten years later he began the course of conquest which ended in making him, in 827, king of all England. He then received the ancient honourable title of Bretwalda, which had long been disused. The sovereigns of Mercia, East Anglia, and Northumbria were, however, not dispossessed, but became tributary to Egbert. In the latter years of his reign the Northmen made several descents upon England, and were defeated by him in Cornwall in 835. Egbert died in 837, and was succeeded by his son Ethelwolf.

EGEDE, HANS, founder of the Danish mission in Greenland, was a native of Norway, and was born in 1686. His father was a parish priest, and Hans, after studying at Christiania, was ordained priest himself. It was not long before his thoughts were turned towards Greenland, as an interesting and promising field for missionary work. His plan was at first crossed by the opposition of his wife and others, but a few years later, 1717, he resumed his project, founded a trading company with the sanction of the king of Denmark, and went with his family and some others, in 1721, to Greenland. Difficulties and hardships were great and lasting, but faith and courage were superior. In 1733 the small-pox was brought to Greenland in a Danish ship, and its ravages were terrible. The first Moravian missionaries arrived at the same time. Egedo lost his faithful helpmate at the end of 1735, and

soon after he returned to Denmark, leaving his son to carry on the work of the mission. Egedo was then for seven years head of a training-school for young missionaries. He left an account of the mission, and also a description of Greenland, the latter of which was translated into English in the author's lifetime. Died, Nov. 1758.

EGEDE, PAUL, son of the preceding, was his assistant in the mission to Greenland, and imitated his example. He composed a dictionary and grammar of the language; translated into it a part of the Bible; and published a valuable and interesting history of the mission in Greenland, from 1721 to 1788. Died, 1789.

EGERTON, THOMAS, lord chancellor of England in the reign of James I., was the natural son of Sir Richard Egerton, and was born in Cheshire in 1540. He was educated at Oxford, and was made attorney-general in 1592; soon after, master of the rolls; and then lord-keeper. In 1603 he was appointed lord-chancellor, with the title of Baron Ellesmere; and in 1616 he was created Viscount Brackley, but died the year following. He wrote a work, entitled "The Privileges and Prerogatives of the High Court of Chancery."

EGERTON, FRANCIS. [BRIDGEWATER, Earl of.]

EGG, AUGUSTUS LEOPOLD, an eminent English painter, was born at London in 1816. He exhibited his first pictures at the Society of British Artists, and the British Institution, in 1836, and the same year became a student at the Royal Academy, where he first exhibited two years later. He was chosen A.R.A. in 1848, and R.A. in 1860. A large number of his pictures are illustrations of humorous passages in Shakespeare, Le Sage, and other authors. Among his most important works are, "Peter the Great sees Katherine, his future Empress, for the first time," "Pepys's Introduction to Nell Gwynne," and "The Life and Death of Buckingham." Died at Algiers, whither he had gone for the benefit of his health, in March, 1865.

EGINHARDT, a celebrated historian of the ninth century. He was a pupil of Alcuin, and entered the service of Charlemagne as secretary or chancellor. He was also made superintendent of the emperor's buildings, and continued to hold his offices under Louis le Débonnaire. About 816 he retired to a monastery, and some years later converted his own house into an abbey. He died probably between 840—850. Eginhardt left an important and very valuable historical work, the "Life of the most glorious Emperor, Charles the Great" (Charlemagne). We have also his "Annals of the Kings of the Franks from 741-829," and a collection of Letters of great interest and value.

EGINTON, FRANCIS, an artist celebrated for his paintings on glass, and to whom we are indebted for the restoration of that art, was born in 1737, and died at Handsworth, in Shropshire, in 1805.

EGLINTON, ARCHIBALD WILLIAM MONTGOMERIE, thirteenth Earl of, lieutenant of Ireland, was born at Palermo, where his father, Archibald Lord Montgom-

erie, held a diplomatic post, in 1812. He succeeded to the family titles and estates on the death of his grandfather in 1819, and was sent to Eton to be educated. After obtaining a reputation as a patron of the turf, he distinguished himself by a splendid tournament held in 1839, at which Prince Louis Napoleon, now emperor of the French, was one of the knights. In 1852 he was appointed, on the formation of the Derby ministry, lord-lieutenant of Ireland; retired at the close of the year, and was again appointed to the same office in February, 1858, finally retiring in June, 1859. His social qualities and princely hospitality made him very popular as viceroy. He was raised to the English peerage as earl of Whitton, in 1859. Died suddenly, near St Andrews, in October, 1861. A statue of the earl, by Noble, has just been set up at Ayr (1865).

EGMONT, LAMORAL, Count, a celebrated Flemish noble, was born in 1522. He early distinguished himself as a brave soldier, followed Charles V. in his expedition against Algiers, in 1541, was made knight of the Golden Fleece five years later, at the same time with the duke of Alva, and commanded with great distinction at the battles of St Quentin and Gravelines. He was no less beloved by his countrymen for his private virtues than admired for his military honours. He took part with Count Horn and the prince of Orange in a protest against the administration of Cardinal Granvella, and withdrew with them from the council of state on finding their effort fruitless. Egmont was then sent for to Madrid, but got nothing better than promises. Then was formed the famous confederation of the nobles, the "Compromise" was signed, and great disorders and destruction of churches and monasteries in Flanders followed. Alva was sent to Brussels in 1567. With profound dissimulation, he set himself to accomplish his infamous mission by inviting the nobles to meet him at his hotel for consultation. Egmont and Horn were then arrested, sent to Ghent, and after nine months removed to Brussels. In June, 1568, notwithstanding the earnest intercession of the emperor, the States of Brabant, the knights of the Golden Fleece, the electors, and even the duchess of Parma herself, then governess of the Netherlands; and notwithstanding the pathetic pleading of Sabina, duchess of Bavaria, wife of Egmont, and Mary of Montgomery, sister of Horn, Alva, as supreme judge, sentenced the two nobles to death. They were both beheaded in a public square at Brussels, meeting death with great courage and calmness. This tragic triumph of relentless despotism was the prelude to the revolt of the Netherlands, and their ultimate independence. It forms the theme of Goethe's fine tragedy, "Egmont." A monument, executed by the sculptor Fraiken, has been erected at Brussels to the memory of Egmont and Horn, this year (1865).

EGREMONT, GEORGE O'BRIEN WYNDHAM, Earl of, was born in 1751, and succeeded to the peerage when he was only 12 years old. This illustrious nobleman displayed throughout the whole course of his long and useful life a liberal spirit and a

patrician magnificence. Though he never took a very prominent part in the discussions of the legislature, he enjoyed much political consideration; and in times of pressure and peril, his purse, his example, and his exertions were nobly devoted to his country's cause. His mansion at Petworth contained the noblest productions of genius, including one of the best libraries in the kingdom; and his patronage of British artists was unbounded. When the earl succeeded to the title and estates, the yearly rental amounted to not quite £45,000 per annum, which at the time of his decease had been increased to £81,000; and in the last 60 years he had distributed in acts of charity and liberality the immense sum of £1,300,000, or about £20,000 per annum! Died, 1837, aged 85.

EICHHORN, JOHANN GOTTFRIED, a distinguished German orientalist and biblical critic of the Rationalist school, was born in 1752. At the age of 23 he became professor of oriental languages at the university of Jena, and after 18 years returned to Göttingen, where he filled the same chair for the rest of his life. He became director of the Royal Academy of Sciences of Göttingen, and privy councillor of justice of Hanover. His works on oriental literature, biblical criticism, and archaeology, and general history, are very numerous. Among them are the "Kritische Schriften" which include his Introductions to the Old and New Testaments and the Apocrypha; "Repertorium für biblische und morgenländische Literatur," in 10 vols.; "Die Hebräischen Propheten;" "Allgemeine Geschichte der Cultur und Literatur des neuern Europa;" and "Weltgeschichte." He was editor of the "Literary Gazette" of Göttingen during the last fourteen years of his life. Died, 1827.

EICHHORN, KARL FRIEDRICH, German jurist, was son of the preceding, and was born in 1781. He held the professorship of German law successively at Frankfort on the Oder, Berlin, and Göttingen, became Prussian councillor of state, and member of the Commission on Legislation. His most important work is the "Deutsche Staats und Rechts-geschichte," which has been frequently republished. He was joint-editor with Savigny of a periodical work devoted to the history of the science of law. Died, 1854.

ELAGABALUS, M. AURELIUS ANTONINUS, Roman emperor, was the son of Varius Marcellus, and derived his name from having been a priest of the sun in Phoenicia. He was raised to the throne by the soldiery in 218, when he was under 15 years of age, and though he began his reign with professions of moderation and virtue, he soon abandoned himself to every species of vice, and Rome displayed a scene of unparalleled folly, cruelty, and debauchery. He raised his horse to the honours of the consulship, and obliged his subjects to pay adoration to a large black stone, which he called Elagabalus, raising temples to its honour, &c. At length his licentiousness and rapacity drew upon him the vengeance of the people; and before he had reigned 4 years, he was put to death by the Prætorian guards, his body thrown into the Tiber, and his memory de-

clared infamous. To which this youth it is enough to state covered with carpets and his mats made of the soft feathers of partridges! He was Severus.

ELDON, JOHN Esq. distinguished lawyer and years filled the office of England, was the Scott, coal-ster, of and a younger brother was born on the 5th day of his friend and and, after receiving education at the grammar school, was admitted to the bar at the city College, Oxford. In 1767; gained the e the Advantages and reign Travel." In 1771 prospect of his obtaining had he remained single contracted a marriage with a young lady of New making the law his p end he studied law in was admitted a member; but he resided at ford, till he was called Years of laborious study little encouragement seriously resolved to t taw as a provincial l town; but his know had not been unobsc brightest ornaments o persuaded him to rem success was certain; a proved the correctness for he shortly after bec northern circuit. In into parliament for the and attached himself Pitt, who was his; pers gross towards the high appeared certain: he general in 1788, recee knighthood, and becam 1793. In 1798 Sir John for Boroughbridge, as Francis Burdett; succe as lord chief justice of and in July, 1799, was as Baron Eldon, of Eld Durham. In 1801 he chancery of England, was elected high stewar of Oxford, when the d conferred on him. In F signed the great seal, b in April, 1807, from whi until April 30, 1827, bei 25 years. At the coronat the lord chancellor w dignities of Viscount E Eldon. His whole life unremitting diligence i of all professions; and will dispute the charact that able and upright a Romilly, who in the Ho

clared infamous. To show the kind of luxury in which this youthful monster indulged, it is enough to state, that his halls were covered with carpets of gold and silver tissue, and his mats made of the down of herons, and the soft feathers found under the wings of partridges! He was succeeded by Alexander Beverus.

ELDON, JOHN SCOTT, Earl of, a distinguished lawyer and statesman, who for 25 years filled the office of lord high chancellor of England, was the third son of William Scott, coal-fitter, of Newcastle-upon-Tyne, and a younger brother of Lord Stowell. He was born on the 4th of June, 1751 (the birthday of his friend and inaster, George III.) and, after receiving the rudiments of his education at the grammar school of Newcastle, was admitted a commoner of University College, Oxford. He was elected fellow in 1767; gained the chancellor's prize, "On the Advantages and Disadvantages of Foreign Travel," in 1771; and there was every prospect of his obtaining college preferment, had he remained single. Having, however, contracted a marriage with Miss Surtees, a young lady of Newcastle, he resolved on making the law his profession, and to that end he studied late and early. In 1773 he was admitted a member of the Middle Temple; but he resided chiefly in or near Oxford, till he was called to the bar in 1778. Years of laborious study passed away, with little encouragement to him, and he had seriously resolved to quit London, to practise as a provincial counsel in his native town; but his knowledge and application had not been unobserved by some of the brightest ornaments of the profession, who persuaded him to remain, assuring him his success was certain; and the result quickly proved the correctness of their predictions, for he shortly after became the leader on the northern circuit. In 1783, Mr Scott came into parliament for the borough of Weobly, and attached himself to the party of Mr Pitt, who was his personal friend. His progress towards the highest legal honour now appeared certain: he was made solicitor-general in 1788, received the degree of knighthood, and became attorney-general in 1792. In 1796 Sir John Scott was for Boroughbridge, as the colleague of Francis Burdett; succeeded Sir James as lord chief justice of the Common Law, and in July, 1799, was raised to the peerage as Baron Eldon, of Eldon, in the county of Durham. In 1801 he became lord high chancellor of England, and in the same year was elected high steward of the university of Oxford, when the degree of D.O.L. was conferred on him. In February, 1806, he resigned the great seal, but was re-appointed in April, 1807, from which period he held it until April 30, 1827, being, altogether nearly 25 years. At the coronation of George IV. the lord chancellor was promoted to the dignities of Viscount Encombe and earl of Eldon. His whole life was an example of unremitting diligence in the most arduous of all professions; and there are few who will dispute the character given of him by that able and upright advocate Sir Samuel Romilly, who in the House of Commons de-

clared, "there never was a man in the court of Chancery who more endeared himself to the bar, or exhibited more humane attention to the suitors; there never presided in that court a man of more deep and various learning in his profession; and in anxiety to do justice, that court had never seen, he would not say the superior, but the equal of the lord chancellor. If he had a fault, it was an over-anxiety to do justice." His politics will yet be viewed through the various lights and shades of party-feeling; but no one, with due reflection, will attribute to Lord Eldon a want of integrity, or a departure from any principle which he conscientiously beloved would tend to the good of his country. He died at his house in Hamilton Place, London, Jan. 13, 1838, being in his 87th year. (Lady Eldon died in 1831.)

ELEANOR, duchess of Guenne, succeeded her father William IX. in 1137, at the age of 15, and the same year married Louis VII., king of France, whom she accompanied to the Holy Land. A separation ensued between her and Louis, and in 1153 she married the duke of Normandy, afterwards Henry II., king of England, which occasioned a succession of wars between the two kingdoms. Her jealousy of Henry, and her conduct to Fair Rosamond, have afforded a copious subject to poets and romance-writers. She excited her sons to rebel against their father, for which she was imprisoned 16 years. On the accession of Richard I. she was released, and in his absence to the Holy Land she was made regent. Died, 1204.

ELEANOR, queen of Edward I. of England, was daughter of Ferdinand III., the Saint, of Castile, and sister of Alfonso X., the Wise. She was born about 1241, betrothed to Edward, then prince of Wales, at the age of ten, accompanied him on the crusade, in 1269, and is said to have saved his life by sucking the poison from a wound inflicted by a Saracen with a poisoned dagger. She arrived in England, and was crowned with Edward, in 1274, and died at Grantham, in 1290. She was buried at Westminster, and elegant crosses were erected to mark the places at which the procession halted on its way, the last being at Charing Cross.

ELEANOR of Provence, queen of Henry III. of England, was daughter of Raymond count of Provence. She was married to Henry in 1236, accompanied him to France in 1254, became unpopular on account of the favouritism shown to her relations, and was insulted, and her life put in danger, by the citizens of London, when she was on her way to Windsor, in 1263, the castle being then held by Prince Edward with a foreign garrison. In the following year she collected a foreign fleet for the invasion of England, but could not even get it to sea. In 1286 she entered the nunnery at Amesbury, and there died, in 1291.

ELGIN and **KINCARDINE**, **THOMAS BRUCE**, Earl of, was born in 1771, succeeded to the peerage in his childhood, and received his education at Harrow and Westminster Schools, and at the university of St Andrews. On many occasions the earl of Elgin was honoured with diplomatic missions, the last of which was as ambassador extraor-

inary to the Sublime Porte, in 1789, where he continued till the French were finally driven out of Egypt. Being desirous of rescuing the remains of Greek art from destruction and oblivion, he availed himself of the opportunities of his station, and succeeded in forming a vast collection of sculptures, medals, and other antiquities, which were eventually purchased by government for £35,000, and deposited, in 1816, in the British Museum. These sculptures are now known as the *Elgin Marbles*. Much censure has been lavished by Lord Byron and others on the earl of Elgin for removing these antiquities from Athens; but if it be true, as is asserted, that the cost, including interest of money, amounted to £74,000, the "mercantile spirit" with which he has been charged is altogether disproved, inasmuch as he lost more than one half of that sum in endeavouring to secure these invaluable treasures. Died, 1841, aged 75.

ELGIN, JAMES BRUCE, eighth Earl of, and twelfth earl of Kincardine, was born at London, in 1811. He studied at Eton and Oxford, where he had Lord Dalhousie, Lord Canning, Lord Herbert of Lea, and Mr Gladstone, for fellow-collegians. He became a fellow of Merton College; entered parliament in 1841, and the same year succeeded to the earldom. In 1842 he was appointed governor-general of Jamaica, whence four years later he was transferred to Canada, and there very successfully grappled with the serious difficulties of the time, and carried out a conciliatory policy. In 1849 he was raised to the English peerage with the title of Baron Elgin of Elgin. After administering the affairs of Canada for eight years he returned to England, and was sent as special ambassador to China, in 1857. Informed on his way of the outbreak of the Indian mutiny, he resolved to leave at Calcutta the troops intended for China. Success attended his Chinese mission, and he signed the important treaty of Tientsin. After holding the office of postmaster-general a short time, Lord Elgin was again sent to China, in 1860, in consequence of a violation of the treaty by the Chinese government. The disaster of the *Pelwo* was retrieved, Lord Elgin entered Peking in state, and the observance of the treaty was enforced. Immediately after this success, he was appointed governor-general of India on the retirement of Lord Canning. While making a tour of inspection in the north of India he fell ill from over-exertion, and died at the secluded hamlet of Dhurumsala, in the valley of Cashmere, 20th November, 1863. His remains were interred, by his own direction, at Dhurumsala.

ELIOT, JOHN, the apostle to the Indians, was born in 1604; went to New England in 1631; and there learned the language of the Indians, that he might devote himself to their conversion. In this he met with great success, and obtained a considerable influence over the various tribes. He translated the Bible into their language, and wrote several pieces of practical divinity. Died, 1689.

ELIOT, Sir JOHN, one of the greatest statesmen of the commonwealth, was born

at Port Eliot, in Cornwall, in 1590. At the age of 15 he entered Oxford University, where he studied three years, but left without taking a degree. After studying a short time at one of the Inns of Court, he travelled on the continent, and had for companion George Villiers, afterwards duke of Buckingham, and his bitterest enemy. He married soon after his return to England, and in 1614 was elected member of parliament. The next five years he lived in or near London, and though he did not take any prominent part in the proceedings of parliament, he was gaining knowledge and experience of the highest value. He appears to have been present at the execution of Sir Walter Raleigh, and must have watched, with many reflections, the trial of Somerset for the murder of Overbury and Somerset's divorce. About 1618, Eliot was appointed vice-admiral for Devon, an office of great difficulty and responsibility, and involving varied and arduous duties: when pirates thronged the channel, and Turks and renegades plundered the coast villages, and carried off the inhabitants by thousands. In this office he had Villiers, then marquis of Buckingham, for his chief, as lord high admiral. Eliot succeeded in apprehending the notorious pirate and ruffian Nutt; who, however, through court favour escaped, and Eliot himself was imprisoned. He was liberated in 1620. He made his first speech in parliament, and a great one, in February, 1623-4, in vindication of the privileges of the House. He opposed the Spanish marriage project, and spoke against monopolies. In 1624 he returned to the country and resumed his duties as vice-admiral. After the accession of Charles I. Eliot made an earnest attempt to dissuade Buckingham from his resolution to break with the parliament; and falling, their personal intercourse ceased. Eliot sat in the first, second, and third parliaments of Charles I., and was the recognized leader of the "opposition." It was in the impeachment of Buckingham, in the opposition to forced loans, and in the procuring of the petition of right, that this great patriot especially distinguished himself, and won at last the crown of a martyr of freedom. He was sent to the Tower for speaking too vehemently against the chief minister in the second parliament, but was released because the House firmly refused to do anything till he was free. He was again imprisoned for refusing to pay the forced loan. And finally, for his part in the memorable scene in March, 1629, when the speaker was held down in his chair, while all persons were voted enemies to their country who should join in the measures of the court. He lay in the Tower till his death. All endeavours to abate the unjust persecution, and to loosen the grasp of the tyrant on his noble victim, were useless. When, a few weeks before his death, Eliot wrote to the king simply requesting a change for his health's sake, it was refused. And so in November, 1632, he died in the Tower. His son requested leave to bury him at Port Eliot, and with the meanest cruelty this was refused. He was buried in the Tower. Mr Forster's recent "Life of Sir John Eliot" is

one of the most important made to the history of the age which preceded the large extent based on Eliot first discovered Eliot.

ELIOT, or ELYOT, a English writer in the reign was a native of Suffolk at Cambridge. Henry and sent him on into pope and the emperor and English dictionary "Health," and other translations from Greek 1546.

[ELI]

one of the most important contributions yet made to the history of the momentous struggle which preceded the civil war. It is to a large extent based upon original papers of Eliot first discovered by Mr Forster at Port Eliot.

ELIOT, or ELYOT, Sir THOMAS, an English writer in the reign of Henry VIII. He was a native of Suffolk, but resided chiefly at Cambridge. Henry VIII. knighted him and sent him on important embassies to the pope and the emperor. He compiled a Latin and English dictionary, wrote the "Castle of Health," and other original works, made translations from Greek authors, and died in 1546.

ELLIOTT, or ELLIOT, GEORGE AUGUSTUS, Lord Heathfield, was the son of Sir Gilbert Elliott, of Stobbs, Roxburghshire, and born about 1718. After receiving his education at Leyden, he in 1735 attached himself to the engineer corps; from which he removed, and obtained an adjutancy in the 2d troop of horse grenadiers, with which he went to Germany, and was wounded at the battle of Dettingen. In 1759 he was appointed to raise the 1st regiment of light horse, with which he served on the continent with great reputation; and on his recall from Germany he was sent to the Havannah, in the reduction of which he had an eminent share. In 1775, General Elliott was appointed commander-in-chief in Ireland; from whence he returned soon after, and was made governor of Gibraltar, which fortress he defended with consummate skill and courage, when besieged by the French and Spaniards. The siege began in 1779, was carried on both by land and sea, and did not terminate till February, 1783. General Elliott was very abstemious, his constant food being vegetables, and his drink water. He never allowed himself but four hours' sleep at a time; and was so accustomed to hardness that it was become habitual. On his return to England he was raised to the peerage by the title of Lord Heathfield, Baron Gibraltar; and died in 1790. The fine portrait of this distinguished soldier, painted by Sir Joshua Reynolds, is in the National Gallery.

ELIZABETH, Queen of England, was daughter of Henry VIII. by his queen, Anne Boleyn, and was born at Greenwich, 9th September, 1533. When three years of age she lost her mother, who was beheaded, and was herself immediately bastardized by Act of Parliament. By a later Act, however, the succession to the throne was conditionally secured to her. Elizabeth was carefully educated, attaining, under the direction of Roger Ascham, considerable proficiency in Latin, French, and Italian, and some knowledge of Greek. She was brought up in the Protestant faith. Marriage projects were early set on foot for her, and she entertained with more or less of sincerity numerous successive suitors; but she never married. She accompanied her sister Mary to London on her accession to the throne; and in the following year, immediately after the suppression of Wyatt's insurrection, she was arrested and sent to the Tower. She was kept in, more or less, close confinement during Mary's reign; and was removed from

the Tower to Woodstock, and thence to Hatfield House. At the age of 25 she succeeded Mary, and was received at London with immense joy, the bishops meeting her at Highgate, and the people in crowds escorting her through the city. The re-establishment of the Protestant faith and worship; conflicts in various forms with the adherents of the Romish system, who were also the enemies of Elizabeth as a Protestant sovereign; conflicts on the other hand with the Puritan party, ever growing stronger; these were the staple of home transactions during this reign. Foreign affairs also were almost entirely acts of the same drama, the great struggle between the two religions. Pope Paul IV. refused to acknowledge Elizabeth's title; Pius V. and Sixtus V. published bulls of excommunication against her, and absolved her subjects from their allegiance; the king of France supported the claim of Mary, queen of Scots, to the crown of England, and Elizabeth assisted the Protestants in Scotland, in France, and the Netherlands; and above all, the struggle took outward shape and formidable dimensions in the threatened Spanish invasion and the "Invincible Armada." Elizabeth on her accession retained the principal advisers of her sister Mary, but added several eminent men to their number; among whom were Cecil, Lord Burleigh, who remained her first minister till his death, Sir Nicholas Bacon, and at a later period Sir Francis Walsingham. The imprisonment and execution of Mary, queen of Scots, has been a fruitful occasion of reproach against Queen Elizabeth; yet none can doubt that Mary sanctioned and took part in the plots and schemes which had for object the dethroning of Elizabeth, and the elevation of Mary to the throne. The personal character of Elizabeth has naturally been depicted in very different colours by Romanists and Protestants; exaggeration made on both sides, and the truth probably lying between the two extremes. Recent inquiries have resulted in a less favourable view than has been usual in England. Vanity in excess, selfishness, unwomanly hardness, love of expense and display, indulgence in bursts of passion, indelicate speech and manners, and fondness for worthless favourites (especially the earls of Leicester and Essex), are too obvious features of her character. Energy, and good sense, and a certain courage she had too; for though the prosperity and progress that marked her reign must be attributed to the wisdom and measures of her ministers, these ministers were her choice and had her support. Her reign was one of the greatest periods in our literary history; the age of Shakespeare and Spenser, of Bacon and Raleigh and Hooker. It was an age too of great enterprises and discoveries; of Drake, Frobisher, and other maritime heroes. Elizabeth died at Richmond, March 24, 1603; her health and spirits having never recovered the shock they received by the execution of Essex, two years previously. She was buried in Henry VII.'s chapel at Westminster.

ELIZABETH STUART, queen of Bohemia, daughter of James I. (James VI. of Scotland at the time of her birth), was born in

1566. She was married to the Elector Palatine Frederick V. In 1613; prevailed on him to accept the crown of Bohemia in 1619, reckoning on her father's aid to maintain them in the new kingdom; but at the battle of Prague, in the following year, the Imperialists were victorious, and Frederick lost not only Bohemia, but his hereditary states. Elizabeth bravely followed her husband and shared his hardships, finding refuge at last in Holland. She was left a widow in 1632, saw her son reinstated in part of his father's dominions, came to England with Charles II. in 1660, and died at London two years later. Elizabeth was the mother of 13 children, among whom were the Princes Rupert and Maurice, and Princess Sophia, mother of George I.

ELIZABETH PETROWI, A daughter of Peter the Great, was born in 1709. In 1741 she usurped the imperial throne, by dethroning the infant Iven, which revolution was effected without the shedding of blood. At her accession she made a vow that no capital punishments should take place in her reign. But her humanity was equivocal, as is instanced in the shocking punishment which she inflicted upon the Countess Bestuchef and Madame Lapookin, who were publicly knouted, and had their tongues cut out, for betraying some secrets relating to the amours of the empress. She died in 1781.

ELIZABETH, PHILIPPINE MARIE HÉLÈNE, sister of Louis XVI., was born at Versailles, in 1764, and perished by the guillotine, in 1794. When Louis fled from Paris, she accompanied him, and was brought back with him from Varennes. With the royal family she was carried into the Temple, but removed from it, May 9th, 1794, to the Conciergerie, because it had been discovered that she corresponded with the princes, her brothers. The next morning, when carried before the revolutionary tribunal, and asked before her name and rank, she replied with dignity, "I am Elizabeth of France, and the aunt of your king." Though she was compelled to submit to the horrible necessity of witnessing the execution of 24 victims who were sentenced with her, she met her fate with heroic calmness, and breathed not a word against her merciless judges.

ELLENBOROUGH, EDWARD LAW, Lord, lord chief justice of the King's Bench, was the son of the bishop of Carlisle, and born in 1748 at Great Salkfield, Cumberland. On the trial of Warren Hastings, in 1785, Erskine having refused to undertake the defence, Law served as leading counsel, and obtained the victory, although his opponents were Fox, Burke, and Sheridan. In 1801 he was made attorney-general, and next year, on the death of Lord Kenyon, became lord chief justice of the King's Bench, and was created a peer. During a period of great difficulty, Lord Ellenborough filled the arduous office with great acuteness, and profound legal knowledge. It is said, that the result of the trials of Hone, who was prosecuted for impious parodies and libels (the jury having found verdicts contrary to his lordship's charges), had a great effect on his declining state of health; and though he continued to appear in court,

and performed his functions with his usual energy of mind, his frame was fast sinking. Died, 1818.

ELLESMERE, FRANCIS EGERTON, Earl of, was born on the 1st day of January, 1800. His father was George Granville, marquis of Stafford, who was afterwards raised to the highest rank in the British peerage, as duke of Sutherland. He received his early education at Eton, whence he was in due time transferred to Christ Church, Oxford, where he graduated B. A. in 1822. In the following year Lord Francis Leveson Gower, as he was then styled, was returned to parliament as member for the pocket borough of Bletchingley, and commenced his public career in the Commons as a liberal conservative, and a warm supporter of Mr Canaling and his party. He had, however, at an earlier date displayed a taste for literature and the fine arts; and long before he had risked publication he had some poems printed for private circulation. He then published a translation of "Faust," accompanied by free and spirited versions of popular lyrics selected from the works of Goethe, Schiller, Bürger, Salla, and Körner, which passed through several editions before he resolved to withdraw it from further circulation. In 1828 he was sworn a member of his Majesty's privy council, and not long afterwards accompanied the marquis of Anglesey to Ireland as chief secretary. From July to November, 1830, he held the office of secretary at war under the duke of Wellington. From 1826 to the dissolution in 1834 he sat for the county of Sutherland. In December of the latter year he was chosen for the southern division of Lancashire, which he continued to represent down to his elevation to the peerage in 1846. On most important questions he carefully abstained from identifying himself with any faction or party; but 20 years before Sir Robert Peel adopted the policy of free trade, that measure had been strenuously advocated by Lord Francis Egerton in his place in parliament. In 1839 he proceeded in his own yacht to the Mediterranean and the Holy Land; and the results of his observations he afterwards gave to the world in the form of notes to his poem entitled the "Pilgrimage," in which, having adopted the staff and sandals of a palmer, he gave a highly poetical picture of the various scenes and places which he visited in the course of his tour. In the few years previous and subsequent to this date, Lord Ellesmere published his "Mediterranean Sketches," and printed for private circulation several poems, among which the best known are "Donna Charlotte," "Blue Beard, a Parody;" the "Siege of Vienna," and the "Parla;" together with "The Mill," and a "Monody on the Death of the Duke of Wellington." Lord Ellesmere inherited the magnificent pictures collected by the duke of Bridgewater, and set a brilliant example to the possessors of similar collections, by erecting a noble gallery at his town residence in Cleveland Gardens, to which the public have found ready admission. Died, 1897.

ELLEY, Lieutenant-general Sir JOHN, a distinguished English officer, whose services

are the most worthy of a peerage, were of a high order, and of a high order of merit, he rose to the rank of a lieutenant-general, and was promoted to the rank of a major-general in 1800. He was afterwards promoted to the rank of a lieutenant-general in 1808, and in 1810 he served as a general in the cavalry. He was present at all the battles of the war, and was subsequently promoted to the rank of a lieutenant-general, and was at the battle of Waterloo, where he was severely as an officer, but was not a successful trooper; for we read in Scott's "Peter's Letters from France," that several of Napoleon's generals were killed, and that the only one who was not killed was Sir John. He was K. C. B., K. C. H., and G. C. S. Died, 1839.

ELLICE, EDWARD, an Englishman, was born at Montreal, in 1800. His father, a Scotchman, was a managing director of the Bank of Montreal, and he sent him to Winchester School and to the college, Aberdeen. In 1808 he entered the mercantile life; married, in 1810, a daughter of a merchant, and in 1818 entered the navy, and was appointed a member for Coventry; for which he continued to sit, with one exception, till his life. He held the office of treasurer in 1831-2, and was a member of the treasury of war from April, 1834. During the latter part of his life he contributed to the establishment of the Anti-Slavery Club, of which he was a member, though he did not again appear in public. He was constantly surrounded by a large number of liberal-minded friends, and was the friend of many of the most distinguished names of the day. Died at Ardoch, Glasgow, in 1863.

ELLIOTT, EBENEZER, a distinguished Englishman, was born at Macclesfield, in 1781, where he was a commercial clerk in the early years of his life. His early years were not marked by any special success or ability for which he was distinguished; but his love of literature, and his first publication, "The Mill," in the "Edinburgh Review," showed to what extent the talents of this country had impressed themselves on his mind. From this period he succeeded each other without intermission. He contributed to the New Monthly Magazine, and the Edinburgh Review; and in originality, power, and originality, his writings may vie with the most celebrated of any contemporary writer. The greater part of his life was the abolition of the slave trade; and it is not too much to say that his "Lays" were a great aid to the abolition of the slave trade.

A New Universal Biography.

[ELL.]

are the most worthy of record, because, by sheer merit, he rose to almost the highest military rank, from the very humble situation of a private in the Royal Horse Guards Blue. After passing through the inferior grades, and serving with great credit as a quarter-master, he, in 1791, obtained a cornetcy in the Blues. He served in the campaigns of the Low Countries in 1793 and two following years, and was present at nearly every action, including the siege of Valenciennes. By the year 1806 he had fought his way up to a lieutenant-colonelcy; in 1808 and 1809 he served as assistant adjutant-general to the cavalry in Spain, and was present at all the battles of the Peninsular war. He subsequently served in the Netherlands, and was at the final shock of battle, Waterloo, where he was serviceable not merely as an officer, but even as an individual trooper; for we read in Sir Walter Scott's "Peter's Letters to his Kinsfolk," that several of Napoleon's cuirassiers were "ground stiff to the very chins by Elley's stalwart arms." In addition to his high military rank, Sir John was K. C. B., K. C. H., and governor of Galway. Died, 1839.

ELLICE, EDWARD, an English statesman, was born at Montreal, in Canada, in 1781. His father, a Scotchman, was then the managing director of the Hudson's Bay Company, and he sent his son to be educated at Winchester School and the Marischal College, Aberdeen. In 1800 he entered upon a mercantile life; married a sister of Earl Grey, and in 1818 entered parliament as member for Coventry; for which city he continued to sit, with one short interval, till his life. He held the post of secretary to the treasury in 1831-2, and that of secretary of war from April, 1833, to December, 1834. During the latter period he mainly contributed to the establishment of the Reform Club, of which he was first chairman, though he did not again hold office, his counsel was constantly sought by the leading members of the liberal ministries, and he was the friend of many eminent foreigners. Died at Ardochy, Glengarry, in September, 1863.

ELLIOTT, EBENEZER, "The Corn-Law Rhymist," was born at Masborough, near Lutterham, in 1781, where his father was a commercial clerk in the iron works. His early years were not marked by the shrewdness or ability for which he was afterwards distinguished; but his love of nature was intense, and his first publication, "The Forest Walk," written in his 17th year, showed to what extent the scenery of his native country had impressed itself on his mind. From this period poem after poem succeeded each other without interruption; he contributed to the New Monthly Magazine, Tait's Magazine, and other periodicals; and in originality, power, and beauty, his writings may vie with those of any contemporary writer. The great object of his political life was the abolition of the corn laws; and it is not too much to say that the "Corn-Law Rhymes" were as instrumental, especially in the manufacturing districts, in bringing the excitement which ultimately led to the abolition of the corn laws, as the

eloquence of any member of the Anti-Corn-Law League. But while Ebenezer Elliott courted the muses, he did not neglect the practical business of life; and though at first unsuccessful in the iron trade, his energy and perseverance were ultimately crowned with success. The last edition of his poems appeared in one volume in 1840. Died, 1849. Some posthumous poems have also been published, besides a not very felicitous account of his life.

ELLIS, GEORGE, a miscellaneous writer of considerable talent, was born in London in 1745, and died in 1815. He commenced his literary career as the author of various political satires and essays; and he subsequently produced "Specimens of early English Poets," "Specimens of early English Metrical Romances," &c.

ELLIS, SIR HENRY, an English diplomatist. He accompanied the earl of Amherst to China, and wrote a narrative of the embassy. He was clerk of the pella from 1825 till that office was abolished, when he was compensated by a pension. In 1835 he was sent ambassador to Persia, and in 1842 as special envoy to Brazil. He was nominated K.C.B. in 1848, and the following year attended the conference at Brussels, on the affairs of Italy. Died at Brighton in 1855.

ELLIS, JOHN, naturalist, was born in London in 1710, and died in 1776. His principal works are "An Essay towards a Natural History of British Corallines," and "A Natural History of uncommon Zoophytes."

ELLISTON, ROBERT WILLIAM, an eminent comedian, was born in London in 1774. He was educated at St Paul's School, and intended for the church; but at the age of 16 he quitted school, without the knowledge of his friends, went to Bath, and there first gratified his ambition for scenic celebrity. With the Bath company he remained one season; he then joined that of York, under Late Wilkinson, but returned to his former quarters in 1793, where for about four years he continued to play a variety of characters in tragedy, comedy, opera, or pantomime; for such was his versatility and tact, that he appeared advantageously in all. His first bow to a London audience was made at the Haymarket Theatre, June the 24th, 1796; but though engaged occasionally for Covent Garden, it was not till 1804 that he became fixed at either of the winter houses. This occurred on Kembic's retirement from Drury Lane; and till the destruction, by fire, of that edifice in 1809, he continued to be one of its most active and efficient supporters. He then took the Circus, and having given it the name of the Surrey Theatre, he commenced performing the plays of Shakspeare, &c., under new titles, and with such ingenious alterations as brought them within the licence granted to the minor theatres. His speculation, however, turned out by no means successful: he relinquished it, and returned to Drury Lane, where for several years he maintained his ground as a public favourite; but becoming the lessee of that theatre in 1819, at an annual rent of £10,200, it ended in his bankruptcy in 1826. After this he was concerned in the Olympic

Theatre; and, lastly, he a second time undertook the superintendence of the Surrey, which appeared to be in a prosperous state at the time of his death, which took place in 1831. No man who ever trod the stage was more at home on it; and while he excelled in a varied range of first-rate characters belonging to genteel comedy, he was more than merely respectable in tragedy; but comedy was his forte, and nature had given him a large share of those main requisites for it—buoyant spirits, mirthfulness, humour, and fervid gallantry.

ELLWOOD, THOMAS, was born at Crowell, in Oxfordshire, in 1639. He was bred in the tenets of the Church of England, but was induced to join the Quakers, through which he lost the favour of his father. He became reader to Milton, and turned to good account the opportunity thus afforded him of making up for the deficiencies of his early education. Ellwood suffered imprisonment for his religion, and wrote a number of books in its defence. He also edited George Fox's Journal, and published a History of the Old and New Testaments; a sacred poem on the life of David, &c. Died, 1713.

ELMES, HARVEY LONSDALE, an eminent English architect, was born in Surrey about 1814. He was trained to his profession under his father, James Elmes, known not only as architect but as a writer on art, and became partner with him. His fame rests upon one great work, St George's Hall, Liverpool, for which he furnished the design in 1841, and in which he has with rare success worked out the problem of adapting Greek models in architecture to modern requirements. In 1847 the failure of his health compelled him to relinquish the direction of the work and go to a warmer climate. He died in Jamaica, November, 1847. The completion of St George's Hall was superintended by Mr Cockerell.

ELMSLEY, PETER, D.D., an eminent philologist and classical scholar, was born in 1773, and received his education at Westminster and Oxford. In pursuit of his philological studies he visited the principal libraries on the continent; and in 1819, in conjunction with Sir Humphrey Davy, he accepted a commission from government for the deciphering of the Hieroglyphic papyrus, but their labours proved abortive. On his return he settled at Oxford, where he obtained the Camden professorship of ancient history, and was elected principal of St Alban's Hall. He published editions of various classics, and contributed to the early numbers of the Edinburgh Review, and at a subsequent period, to the Quarterly. Died, 1825.

ELPHINSTON, ARTHUR, Lord BALMERINO, was born in 1688. He had the command of a company of foot in Lord Shannon's regiment in the reign of Queen Anne; but at the accession of George I. resigned that commission, and joined the earl of Mar, under whom he served at the battle of Sheriffmuir. After that engagement, the Stuarts' affairs being in a desperate situation, Elphinston found means to escape out of Scotland, and to enter into the French service, in which he continued till the death

of his brother Alexander in 1733, when he returned home. When the young chevalier arrived in Scotland in 1744, Elphinston was one of the first that repaired to his standard, and was appointed colonel and captain of the second troop of Life-guards. At the decisive battle of Culloden, Lord Balmerino (for he had succeeded to the title a few weeks preceding) was taken prisoner by the duke of Cumberland. Being conducted to London, he was committed to the Tower, and brought to trial in Westminster Hall, 29th July, 1746, along with the earls of Kilmarnock and Cromarty, both of whom pleaded guilty. The earl of Cromarty obtained a pardon, but the other two suffered decapitation on Tower Hill, 18th August, 1746.

ELPHINSTONE, GEORGE KEITH, Viscount KEITH, born in 1747, was a distinguished naval officer. He entered the service early in life, and arrived at the rank of post-captain in 1775. During the American war he served with great credit at the attack on Mud Island, at Charleston, &c.; he also captured L'Aigle of 40 guns and 600 men; and when the war broke out with France he was among the first who so nobly sustained the credit of the British navy. In 1793 he assisted at the reduction of Toulon; and in 1795 he commanded the fleet destined for the capture of the Cape of Good Hope, in which he not only succeeded, but compelled the Dutch, who advanced to the relief of the colony, to surrender at discretion. His services on numerous other occasions were highly valuable; and at length, after his exertions in the Foudroyant on the coast of Egypt, he was elevated to the peerage. Died, 1823.

ELPHINSTONE, Major-general GEORGE WILLIAM KEITH, C.B., was born, 1782. Early in life this distinguished, but eventually unfortunate, officer entered the service as ensign in the 24th infantry. After serving with much distinction in various parts of the globe, he was made lieutenant-colonel of the 33rd foot in 1813; and being present with that regiment at Waterloo, his services were rewarded with the distinction of C.B. He was made major-general in 1837, and was commander-in-chief of the Bengal army, when our arms received so serious and disgraceful a check in Afghanistan. He was at this period enfeebled by long service and by the climate of India, and was, moreover, almost helpless from the effects of gout, yet he was assailed by calumny, and was to have been tried by court-martial, had not death occurred while proceedings were pending, and thus proved, alas! too fatally, at once the reality of the suffering that he had endured, and the malice of his slanderers. Died, April 23, 1842, aged 60.

ELPHINSTON, MOUNTSTUART, fourth son of John, eleventh Lord Elphinstone, born in 1778, was distinguished alike as a scholar and a statesman. Arriving in India in 1796, he remained there till 1827; and during the whole of that period (in the words of his friend Sir John Malcolm) he performed a distinguished part in every great political event that had come to pass. While an attaché to the presidency at Poona, he was

appointed interpreter whom he accompanied in which the military victor of Waterloo was and who said of him that he have mistaken you to have been a soldier at the courts of Her Majesty. He left Delhi in 1808 as the king of Caubul was created by the dethronement, on his return to the Kingdom of Caubul, the condition was called for when, owing to the country became a subject to Englishmen. He was filled the office of consummate ability for the noble Maharrata chiefs to date a war with the Emperor of the residence of the king of this design, at Poona, until flight became necessary, Bajee Row, a chief of treachery; and he was appointed to rule over the country. He had been the subject of an attempt to overthrowing. In this post, which has fallen to the hands of the British, and the affection of the British government appointed governor of the Kingdom of the Peishwa's dominions, and travelling to the Kingdom of Mysore, and Greece, and other parts of the world. High and respected to him; but a sojourn in an exhausting tropical climate was necessary to decline then, and he was spent in a way that he will never forget in memory when his country possibly he forgot to publish his "History of the Kingdom of Mysore" which research and valuable information will ultimately be published. He died on the 20th of November, 1839, at the age of 67. ELPHINSTONE, WILLIAM, was born at Aberdeen, was born at Aberdeen, and was studying at the university of Aberdeen, and entering the church, and became professor of divinity, and returned to Scotland he held several church offices, and was employed as a councillor, and employed as a councillor, and in 1844 was appointed as a councillor. He was again appointed as a councillor on several occasions, and was named lord privy seal of Scotland, and had the bridge over the river Forth. He paid much attention to canon law, and wrote several biographical works. ELPHINSTON, DR THOMAS, was born in Aberdeen and Ferns. In 1791 he was a fellow of Dublin University, and was the first Donnellan to be appointed professor of divinity; and in 1820 was called to the bar by the name of Elphinston; from which he was called in 1822, to the see of Leighlin.

appointed interpreter to General Wellesley, whom he accompanied through a campaign in which the military powers of the future victor of Waterloo were shown to the world, and who said of him emphatically, "You have mistaken your profession; you ought to have been a soldier." After a residence at the courts of Bern and of Scindiah, he left Delhi in 1808 as the first British envoy to the king of Caubul. His mission was frustrated by the dethronement of that king, but he published, on his return, an "Account of the Kingdom of Caubul," of which a third edition was called for thirty years afterwards, when, owing to the disasters of 1841, that country became a subject of painful interest to Englishmen. Returning to Poona in 1810, he filled the office of political resident with consummate ability for eight years, when the noble Mahrattin chieftain determined to initiate a war with the English by the assassination of the resident. Though fully conscious of this design, he remained calmly at Poona, until flight became a necessity. The Peishwa, Bajee Row, was dethroned for this act of treachery; and Elphinstone was appointed to rule over the people whose government he had been the chief instrument in overturning. In this position he had the good fortune, which has fallen to the lot of few, perhaps of none, to acquire at once the respect and the affection of all who were subjected to his government. In 1819 he was appointed governor of Bombay, the chief part of the Peishwa's dominions having been attached to that presidency. In 1827 he quitted India, and, travelling through Upper Egypt, Turkey, and Greece, finally reached England. High and responsible posts were offered to him; but a sojourn of thirty years an exhausting tropical climate made it necessary to decline them; and his remaining years were spent in a way which will keep up memory when his career as a statesman may possibly be forgotten. In 1841 he published his "History of India," a work of great research and value, on which his reputation will ultimately rest. He died Nov. 20, 1859, at the age of 81.

ELPHINSTONE, WILLIAM, bishop of Aberdeen, was born at Glasgow in 1437. After studying at the university of his native town, and entering the church, he went to Paris and became professor of law. On his return to Scotland he held successively several church offices, was made privy councillor, and employed in an embassy to France, and in 1484 was appointed bishop of Aberdeen. He was again employed as ambassador on several occasions, and at last named lord privy seal. Bishop Elphinstone was founder of King's College, Aberdeen, and had the bridge over the Dee there built. He paid much attention to the civil canon law, and wrote some historical and biographical works. Died, 1514.

ELINGTON, Dr THOMAS, bishop of Arundel and Ferns. In 1781 he was elected fellow of Dublin University, and in 1794 became the first Donnellan lecturer. In 1795 he was appointed provost of Trinity College; and in 1820 was consecrated bishop of Cloyne; from which he was translated, in 1822, to the see of Leighlin and Ferns.

He distinguished himself by various polemical writings, and published excellent editions of Euclid and Juvenal, which of themselves are sufficient to hand down his name as a scholar of first-rate merit. Died at Liverpool, July, 1835.

ELLSHEIMER, or ELZHEIMER, ADAM, German painter, was born at Frankfort in 1574. After acquiring the rudiments of his art there, he went to Rome to study the works of the great masters. He soon acquired a high reputation, especially for his skill in the treatment of light and shade, and the delicacy and finish of his pictures. High prices were given for them, but he worked slowly, and the wants of a large family involved him in debt and melancholy, and he died prematurely. The year of his death is not known.

ELSTOB, WILLIAM, a learned divine, was born at Newcastle-upon-Tyne in 1673, and died in 1714. He was skilled in the Saxon language and antiquities, and published a Latin translation of the Saxon Homily of Lupus; and the Homily on St Gregory's Day, in Saxon and Latin.

ELWES, JOHN, an extraordinary miser. His family name was Meggot, which he altered in pursuance of the will of Sir Harvey Elwes, his uncle, who left him at least £250,000, and he was possessed of nearly as much of his own. At this time he attended the most noted gaming-houses, and after sitting up a whole night at play for thousands, he would proceed to Smithfield to meet his cattle, where he would stand disputing with a cattle-butcher for a shilling. He would sit in wet clothes to save the expense of a fire; eat his provisions in the last stage of putrefaction; and, in short, subject himself to any privation, or be guilty of any beggarly conduct, by which a sixpence might be saved; yet, if by his personal exertions he could assist another, provided it cost him nothing but his labour, he was active and ready. In 1774 he was chosen member for Berkshire, and his conduct in parliament was perfectly independent. He died in 1789, aged about 77, leaving a fortune of £500,000, besides entailed estates.

ELYOT, Sir THOMAS. [ELIOT]. ELZEVIUS. The name of a celebrated family of printers, residing at Amsterdam and Leyden, whose beautiful editions of the Greek and Roman classics, Greek Testament, &c., were chiefly published between the years 1694 and 1680.—LOUIS, the first of them, began to be known at Leyden in 1595, and was the first who made the distinction between the v as a consonant and the u as a vowel. He took for his device an eagle holding seven arrows, with the motto, "Concordia res parvæ crescunt." This he afterwards exchanged for that of a man standing, with the motto "Non solus;" and this was adopted by his successors. Their names were JOHN, DANIEL, MATTHEW, ISAAC, BUONAVENTURA, and ABRAHAM. The two latter prepared the smaller editions of the classics, in 12mo and 16mo, which are still valued for their beauty and correctness. Although the Elzevirs were surpassed in learning, and in their editions of Greek and Hebrew works, by the Stephenses of Paris,

they were unequalled in their choice of works, and in the elegance of their typography.

EMANUEL the Great, king of Portugal, succeeded John II. in 1495. He restored the nobility to their privileges, and encouraged maritime adventures, by which means a new passage to India was discovered by Gama, and in 1601 to Brazil by Cabral. Emanuel also sent an expedition to Africa, and established a commercial intercourse with the kingdom of Congo. Soon after his accession he published an edict for the expulsion of the Jews from his kingdom. Impressed by the corrupt state of the clergy, he joined with Ferdinand of Spain in sending an embassy to the pope, Alexander VI., in 1499, to demand reformation. The pope gave him fair promises. In the last year of his reign, grieved by the agitation caused in Germany by the preaching of Luther, Emanuel wrote to the elector of Saxony, Frederick the Wise, exhorting him to get rid of that great heresiarch. Emanuel married in succession three wives: the first, Isabella, daughter of Ferdinand and Isabella; the second, Mary, her sister; and the third, Eleanor of Austria, sister of Charles V., who survived him and married Francis I. of France. Emanuel died in 1521.

EMMA, queen of Ethelred II., king of England, was daughter of Richard, duke of Normandy, and was married to Ethelred in 1002. She was sent in 1013 with her two sons to Normandy, to save her from the Northmen, then masters of England. She was left a widow three years later, and married Canute soon after his accession to the throne. Harold I. deprived her of her property and subsequently banished her; when she found refuge with Baldwin, count of Flanders. She returned to England, and was despoiled again of her treasures by her son, Edward the Confessor, in 1043. Died, 1052, and was buried at Winchester. This queen was sometimes called Elfgiva.

EMMETT, ROBERT, the son of a physician at Cork, was educated for the legal profession; but, on the breaking out of the Irish rebellion, he was drawn into its vortex, became secretary to the secret directory of United Irishmen, and in 1803 suffered the death of a traitor. His youthful ardour, eloquence, and intrepidity have been greatly extolled.

EMMETT, THOMAS ADDIS, elder brother of the preceding, was also bred to the profession of the law, but becoming involved in the Irish rebellion, he fled his country, and settled in the United States of America, where he practised as an advocate. He died at New York, in 1827.

EMPECINADO, EL. [DIEZ.]

EMPEDOCLES, a Greek philosopher, whose doctrines were in some points allied to those of Pythagoras, was born about B. C. 460, at Agrigentum, in Sicily. The sovereignty was offered him by his fellow-citizens; but being a friend to pure democracy, he refused it, and established a popular government. He was skilled in philosophy, poetry, and medicine. Some fragments of his writings, all in verse, are still extant. Lucretius studied, admired, and imitated, in

his own great poem, the works of Empedocles. Empedocles is said to have been the first philosopher who taught the doctrine of the "four elements." The time and manner of his death are uncertain; and the story of his having thrown himself into the crater of Mount Etna being, in all probability, a fiction.

EMPYRICUS, SEXTUS. [SEXTUS EMPYRICUS.]

EMPSON, WILLIAM, professor of civil law at Halleybury, and editor of the Edinburgh Review, was educated first at Winchester, and afterwards at Trinity College, Cambridge. In 1847 he succeeded Prof. Napier in the editorship of the Edinburgh Review, and held it till his death in 1852. He was married to the only daughter of Lord Jeffrey, so long his able predecessor in the editorship of the Review, to which Mr. Empson is said to have contributed about sixty articles, on law, negro slavery, domestic politics, and the condition of the poorer classes—varied by biography, general history, and poetry.

ENFANTIN, BARTHÉLEMY PROSPER, better known as PÈRE ENFANTIN, head of the Saint Simonians, was born at Paris in 1796. He was cashier in a Paris mercantile house when, in 1825, he became a disciple of Saint Simon, and on his death, the same year, joined with others in the propagation of his doctrines. He became editor of the journal entitled "Le Producteur," held "conferences," and having resigned his commercial post, visited and lectured in the chief provincial towns of France. He was solemnly proclaimed father of the new society, which grew rapidly in numbers and influence, many of its members being among the men since most eminent in France. Discord arose among the leaders, the association was broken up by the police, and though it was again organized and a "model community" established on Enfantin's family estate of Menilmontant, the same results followed, discord, outrage of public morals, and a government prosecution. Enfantin was sentenced to a year's imprisonment. He went to Egypt with some of his associates, and after several years' absence returned to France, and occupied himself with practical affairs, management of railways, scientific commissions, &c. He was a man of noble aspect, fascinating manners, quiet and graceful speech, and entire sincerity. He adhered to his opinions to the last, and defended them with tongue and pen when occasion offered. Died at Paris, 1st September, 1864.

ENFIELD, Dr WILLIAM, a dissenting minister, and miscellaneous writer, was born at Sudbury, in 1741; and after filling the situation of resident tutor and lecturer on the belles lettres at Warrington Academy till the dissolution of that establishment, he died in 1797. He was one of the principal contributors to Dr Alkin's Biographical Dictionary; and was author or compiler of several useful works, of which it is not needful to name more than the "Speaker," one of the earliest and most popular selections from our best writers, and the "History of Philosophy," an abridged translation

of the ponderous Brucker.

ENGELBRECHT fanatic, was born He travelled for seven years, fasting at times, and not untrances, during which he received divine revelations, proselytizing mankind.

ENGHIEN, LOUIS BOURBON, Duke of Bourbon, and a de Condé, was born at Condé, and served with credit to the French republic in 1804, where he was taken prisoner, and his execution was regarded with a jealousy which might become a dangerous precedent. His numerous designs of Napoleon were not issued, and an order of arrest was issued. The situation had been ascertained, it was on the night of March 17, 1804, that he and his wife, his children, and his attendants, wished to defend himself, but he was too great to be opposed by several friends and doctors, and carried prisoner to the Bastille on the 18th, the same day. He was confined in a cell, and on the 19th, the duke for Paris; but he was taken to the gates of the capital, to conduct their prisoners, where he arrived exhausted with fatigue, and just as he was about to undergo his trial, he was awakened, and marched to Vincennes, where he was commanded by Savary, marshal, consisting of a president, together with several captains. The young duke having taken part in the life of the first conspiracy, was proved against him, and sentenced to death, and was executed in the castle, where he had been confined. This atrocious assassination was the plea of state necessity, and was notwithstanding found guilty of those who, with freedom on their lips, homage to the memory of the fallen.

ENNIUS, QUINTUS, poet of the earlier times, was born in Calabria, and became acquainted with the emperor Nero, and brought him to Rome. He gained the friendship of the most distinguished men, and was of high rank in Greek. Of his works, only a few are extant, but a few of the greatest works was a poem on the Punic Wars. Died B. C. 169.

ENTICK, JOHN, an English historian, published a History of London, which ended in 1771. He was also the author of a well-known "Latin and English Dictionary," &c.

ENZIO, king of Sardinia, was the son of the emperor Frederick II., and was born in 1224. He was his

of the ponderous work of the German Brucker.

ENGELBRECHT, JOHANN, a religious fanatic, was born at Brunswick, in 1599. He travelled for several years through Germany, fasting at times for a fortnight together, and not infrequently falling into trances, during which he pretended to receive divine revelations and missions for proselytizing mankind. Died, 1642.

ENGHIEN, LOUIS ANTOINE HENRI DE BOURBON, Duke of, son of the duke of Bourbon, and a descendant of the great Condé, was born at Chantilly, in 1772. Having served with credit in the armies opposed to the French republic, he went to Baden, in 1804, where he lived in comparative seclusion from the world. He was, however, regarded with a jealous eye, as one who might become a dangerous foe to the ambitious designs of Napoleon, then first consul; and an order to arrest him was accordingly issued. The situation of his house having been ascertained, it was surrounded on the night of March 17, 1804, with a body of soldiers and gendarmes. The duke at first wished to defend himself, but the force was too great to be opposed; and thus, with several friends and domestics, he was seized and carried prisoner to Strasburg. Early upon the 18th, the escort set off with the duke for Paris; but upon arriving at the gates of the capital, they received an order to conduct their prisoner to Vincennes, where he arrived exhausted by hunger and fatigue, and, just as he had dropped asleep, he was awakened, at 11 o'clock at night, to undergo his trial. The troops, which were marched to Vincennes on this occasion, were commanded by Savary, who formed a court-martial, consisting of General Hullin, the president, together with five colonels, and a captain. The young duke was accused of having taken part in conspiracies against the life of the first consul; and though nothing was proved against him, he received sentence of death, and was led into the fosse of the castle, where he heroically submitted to it. This atrocious assassination, without even the plea of state necessity to justify it, has notwithstanding found its defenders in some of those who, with the sacred name of freedom on their lips, have done servile homage to the memory of the arch-assassin.

ENNIUS, QUINTUS, a celebrated Latin poet of the earlier times of the republic, was born in Calabria, B. C. 239. Cato the censor became acquainted with him in Sardinia, and brought him to Rome, where he soon gained the friendship of the most distinguished men, and instructed young men of rank in Greek. Of all his writings, nothing is extant but a few fragments. His greatest work was a poem on the history of Rome. Died B. C. 169.

ENTICK, JOHN, an English divine, died in 1780. He published a "History of the War which ended in 1763," 6 vols. 8vo; a "History of London," 4 vols. 8vo; a once well-known "Latin and English Dictionary," &c.

ENZIO, king of Sardinia, was the natural son of the emperor Frederick II., and was born in 1224. He was his father's best-be-

loved son, beautiful, brave, and accomplished; was named at the age of 14 vicar imperial in the north of Italy, and intrusted with the command of the German and Saracen troops in the Imperial army. In 1240 Frederick married him to Adcinia, heiress of the native judge of Gallura and Tura in Sardinia, and gave him the title of king of Sardinia. In the following year Enzo, in command of a powerful fleet, obtained a great victory over the sect of the Genoese, capturing three cardinals, four archbishops, numerous bishops, abbots, and delegates on their way to a council convoked by the pope, all of whom were kept in confinement for some time. In the same year, with Conrad, his half-brother, he defeated the Mongols on a branch of the Danube, and thus delivered Europe from their presence. He continued to serve with distinction in the wars with the Gueifs; unsuccessfully besieged Parma in 1247, and at last, in a battle before Bologna in 1249, was wounded and taken prisoner. No entreaties nor promises of his heart-broken father could induce the Bolognese to liberate him, and he was left to pine away three-and-twenty years of life remaining to him. It is said that once, by the aid of a beautiful girl who was in love with him, he nearly made his escape; but was recognized by his bright hair.

EPAMINONDAS, the Theban statesman and general, one of the greatest men of ancient Greece, was born of a good family, but was reared and lived in poverty. He was an earnest student of philosophy, and at an early age became the close friend of the noble and wealthy Pelopidas, with whom he served in the Spartan invasion of Mantinea, B. C. 385. He saved the life of Pelopidas on the battle-field in that campaign at the risk of his own. He became the foremost man in Thebes after the expulsion of the Spartans in B. C. 379. His policy and military skill raised his country to be the head of Greece. His principal achievements were the great victory at Leuctra, in 371, by which he destroyed the military prestige of Sparta; the foundation of Messene and the establishment there of the scattered descendants of the Messenians; the rescue of Pelopidas from Alexander of Pheræ; and his final victory, on occasion of his fourth invasion of Peloponnesus, over the Spartans at Mantinea, B. C. 362. In this battle he fell, his army was paralyzed by the loss, and Thebes soon after sank to her former secondary position.

EPÉE, CHARLES MICHEL DE L', a French abbé, founder of the institution in Paris for the deaf and dumb, was born at Versailles in 1712, and deserves grateful remembrance for the philanthropic occupation in which the greater part of his life was spent. He entered into holy orders, and became a priest; but his great object being to impart instruction to the deaf and dumb, he spent his whole income, besides what was contributed by benevolent patrons, in the education and maintenance of his pupils, for whose wants he provided with such disinterested devotion, that he often deprived himself of the necessaries of life, restricting himself to the plainest food, and clothing

the 4th century, and educated among the Gnostics in Egypt; after which he returned to Palestine and became the disciple of the monk Hilarion. He was chosen bishop of Salamis, in the Isle of Cyprus, 367, and died in 403. Epiphanius was a man of some learning but little judgment, and he was a vehement opponent of Origen. He wrote a book entitled "Panarium" against all heresies.

EPISCOPIUS, SIMON, a learned divine, born at Amsterdam, in 1583. In 1612 he was chosen divinity professor at Leyden; was the principal of the Remonstrants, or Arminians, at the Synod of Dort, which arbitrary assembly deposed him and the other deputies from their ministerial functions, and banished them the republic. He then went to France, but in 1626 he returned to Holland, and became minister to the Remonstrants at Rotterdam, where he died, in 1643.

ERASMUS, DESIDERIUS, one of the most eminent scholars of the age in which he lived, was born at Rotterdam, in 1467. He was the illegitimate son of one Gerard, by the daughter of a physician; but his father and mother dying when he was only 14 years old, he was left to the care of guardians, who determined on bringing him up to a religious life that they might enjoy his patrimony; for which purpose they removed him from one convent to another, till at last, in 1486, he took the habit among the canons-regular at Stein, near Torgau. The monastic life being disagreeable to him, he accepted an invitation from the archbishop of Cambray to reside with him. During his abode with this prelate he was ordained priest; but in 1496 he went to Paris, and supported himself by giving private lectures. In 1497 he visited England, and met with a liberal reception from the most eminent scholars. On his return he spent 12 years in France, Italy, and the Netherlands; and during that time he published several works of great merit. In 1508 he took his doctor's degree at Turin, and went to Bologna, where he continued some time; thence he removed to Venice, and resided with the famous Aldus Manutius. From Venice he went to Padua and Rome, where many offers were made him to settle; but having received an invitation from Henry VIII. he came to England again in 1510; wrote his "Praise of Folly," while residing with Sir Thomas More; and was appointed Margaret professor of divinity, and Greek lecturer, at Cambridge. In 1514 he once more returned to the continent, and lived chiefly at Basel, where he vigorously continued his literary labours, and prepared his edition of the New Testament, with a Latin translation; his "Ciceronianus," and his celebrated "Colloquies," which latter gave such offence to the monks, that they used to say, "Erasmus laid the egg which Luther hatched." With Luther, however, whom he had provoked by his treatise on Free Will, he was in open hostility. In 1528 appeared his learned work, "De recta Latini Græcique Sermonis Pronunciatione," and his last publication, which was printed the year before his death, was entitled "Ecclesiastes, or the Manner of Preaching." He died at Basel, in 1536. Erasmus was a

man of great learning, a great wit, and an able critic; but he was a coward. He loved ease and his good name more than he cared for truth and the reformation; and so, while he saw clearly the need of the work which Luther had set himself to do, and how well he was doing it, he not only held back from taking part openly in it, but shunned and cruelly insulted, in some instances, his personal friends on account of their connection with Luther. His treatment of Ulrich von Hutten was unpardonable.

ERATOSTHENES, a native of Cyrene, in Africa, B. C. 275, was keeper of the famous library of Alexandria, under Ptolemy Euergetes, and improved the science of mathematical geography, which he corrected, enlarged, and reduced to system. He was also a philosopher, poet, and grammarian; while he rendered much service to the sciences of astronomy and geography, by first observing the obliquity of the ecliptic, and by discovering the method of measuring the circumference of the globe. Died, B. C. 195.

ERICILLA Y ZUNIGA, ALONZO, a Spanish poet and soldier, was born in the province of Biscay about 1520. He was brought up at the court of Charles V., and joined an expedition which was sent out to Chili against a tribe called the Araucanians. Hence the origin of his admirable epic of "La Araucana," which describes the perils and exploits of that fierce and dangerous contest; this he wrote on scraps of paper, and on bits of leather when paper could not be had, during those brief intervals which could be snatched from active duty. Died, 1595.

ERIC XIII., king of Sweden, Denmark, and Norway, succeeded Queen Margaret in 1412. He had two years previously married Philippa, the daughter of Henry IV. of England. He made a pilgrimage to the Holy Land, but was taken prisoner in Syria, and paid a large ransom for his liberty. Soon after his return the Swedes revolted, and were followed by the Danes, on which he withdrew to the Isle of Gothland. In 1439 he was formally deposed. He afterwards settled in Pomerania, where he died in 1459. He compiled a "History of Denmark to the year 1288."

ERIC XIV., son and successor of Gustavus I., king of Sweden. He came to the throne in 1560, and soon after sought the hand of the Princess Elizabeth, afterwards queen of England, but being refused, he married the daughter of a peasant. This alienated from him the hearts of his subjects, and, together with his cruelties, occasioned a revolt. Eric was compelled to renounce his throne in 1568. He died in prison, in 1578.

ERIGENA, JOHANNES SCOTUS, a scholastic philosopher of the 9th century, was born in Ireland. He resided many years at the court of Charles the Bald, king of France. At the request of his patron he translated the pretended works of Dionysius, the Areopagite, into Latin; but his independent thought and enlightened views exposed him to the displeasure of the church, and he went to England, where he was courteously received by Alfred the Great, and placed

ERSKINE, Sir JAMES. [ROSSLYN, Earl of.]

ERSKINE, JOHN, an eminent Scottish jurist, was born in 1695. He was admitted advocate, but spent his time chiefly in studious retirement. He filled the chair of Scots Law in the university of Edinburgh for twenty-three years, retiring in 1760. His great work is the "Institute of the Law of Scotland," first published after his death, and which holds the highest rank as an authority. It had been preceded by a shorter work entitled "Principles of the Law of Scotland," highly esteemed, and several times republished. This able writer was cousin to Lord Chancellor Erskine. Died, 1765.

ERSKINE, Dr JOHN, son of the preceding, was born at Cardross, in 1721, and destined for the bar; but his inclination leading him to the study of theology, he was, in 1742, licensed to preach by the presbytery of Dumblane; and in July, 1769, he and Dr Robertson were admitted collegiate ministers of the Old Grey-Friars church there. His "Theological Dissertations" appeared in 1769; but his "Sketches and Hints of Church History and Theological Controversy" were not published till many years after. These, with a volume of sermons, are his principal works. Died, 1803.

ERSKINE, THOMAS, Lord, third son of David Henry Erskine, earl of Buchan, was born about 1760. He received his education at Edinburgh High School and St Andrew's University; and then went to sea as a midshipman; but he quitted the service after four years, and entered into the Royals, or 1st regiment of foot, with whom he embarked for Minorca in 1770. At the age of 26, he entered Trinity College, Cambridge, merely to obtain a degree, to which he was entitled as the son of a nobleman; and, at the same time, became a student of Lincoln's Inn. He also placed himself as a pupil in the office of Mr (afterwards Judge) Buller, then an eminent special pleader, and subsequently in that of Mr (afterwards Baron) Wood. He was called to the bar in 1778, and obtained immediate success. In May, 1783, he received a silk gown, and, the same year, was elected member of parliament for Portsmouth, and unanimously rechosen for the same borough on every succeeding election until raised to the peerage. In 1792, being employed to defend Thomas Paine, when prosecuted for the second part of his Rights of Man, he deemed it right, as an English advocate, to obey the call; and thereby he lost his office of attorney-general to the Prince of Wales. In the trials of Hardy, Tooke, and others, for high treason, in 1794, which lasted for several weeks, the ability displayed by Mr Erskine was admired and acknowledged by all parties. He was a strenuous opposer of the war with France; and wrote a pamphlet, entitled "A View of the Causes and Consequences of the War with France;" which ran through 48 editions. In 1802, the Prince of Wales not only restored him to his office of attorney-general, but made him keeper of the seals for the duchy of Cornwall. On the death of Mr Pitt, in 1806, when Lord Grenville received

the commands of George III. to form a new administration, Mr Erskine was created a peer, and raised to the dignity of lord high chancellor of Great Britain; but the dissolution of the administration of which he formed a part happening during the following year, he retired with the usual pension. During the latter years of his life Lord Erskine laboured under considerable pecuniary difficulties; while numerous follies and eccentricities (to use no harsher epithets) obscured the brilliancy of his former fame. He was the author of a political romance, in 2 vols., entitled "Armata," and some pamphlets on the Greek cause. But it was at the bar that he chiefly shone. There the resources of his mind were made apparent in bursts of eloquence, combining logical and rhetorical skill, and legal precision; while he triumphed over the passions and prejudices of his hearers, and moulded them to his will. He died in 1823.

ESCOBAR Y MENDOZA, ANTONIO, a celebrated Spanish Jesuit, born at Valladolid, in 1689, and died in 1669. He was a popular preacher, and a voluminous author. His most noted works are his "Moral Theology," and his "Cases of Conscience." His doctrines were vigorously opposed by Pascal in the celebrated "Lettres Provinciales."

ESPER, naturalist and astronomer, was born at Drossenfeld, in Bayreuth, in 1732. He published "A Method of Determining the Orbits of Comets, and other Celestial Bodies, without Astronomical Instruments, or Mathematical Calculations;" and was the first who examined and described the curious fossil remains in the caverns of Bayreuth. Died, 1781.

ESPREMENIL, JACQUES DUVAL D', a counsellor of the parliament of Paris, and deputy to the states-general in 1789. He had from his youth entertained the project of restoring to France the states-general; and for the violence of his speeches on that subject he was seized and banished to the isle of St Margaret; but being recalled to Paris in 1789, he defended the monarchy against innovators with as much warmth as he had before opposed the despotism of the ministry. He was ultimately condemned by the revolutionary tribunal, and perished on the scaffold in 1793.

ESPRONCEDA, JOSE DE, a Spanish poet, was born in 1810. He was imprisoned while yet a mere boy as a conspirator, and afterwards sent to England, where he lived for several years, and studied our language and the works of our great poets. He was at Paris in 1830, and took part in the street-fighting at the revolution of July. He returned to Spain, led a loose life, and was several times in trouble for his political sentiments, but got in 1841 the appointment of secretary of the Spanish embassy at the Hague; and soon after was chosen member of the Cortes. Much of his poetry is in the manner of Byron, whose works he admired. Espronceda wrote, besides his poems, "Sancho Saldana," a historical novel. Died, 1842.

ESSEX, WALTER DEVEREUX, first Earl of, was born at Caermarthen Castle about 1540. As Viscount Hereford he took a distinguished part in suppressing the insurrec-

tion under the earls of Northumberland and Westmoreland in favour of the Catholic faith, and in 1572 was made knight of the Garter and earl of Essex. In the following year he made an unsuccessful attempt to conquer and colonize part of the province of Ulster, and soon after returned to England. He was again sent to Ireland with the title of earl-marshal, but died, broken down in health and in mind, 1578. His widow was married to the earl of Leicester.

ESSEX, ROBERT DEVEREUX, Earl of, born in 1567, accompanied the earl of Leicester to Holland, where he behaved with much bravery at the battle of Zutphen, and on his return to England was made master of the horse. In 1591 he commanded the forces sent to the assistance of Henry IV. of France; and in 1596 he was appointed joint-commander with Lord Howard in an expedition against Spain, where he contributed to the capture of Cadiz. In 1597 he was made earl-marshal of England, and, on the death of Lord Burleigh, chancellor of the university of Cambridge. About this time he incurred Queen Elizabeth's displeasure in a remarkable manner: at a private council held respecting the appointment of a proper person to govern Ireland, he had the imprudence to oppose her Majesty with rudeness, on which she gave him a box on the ear. The earl instantly laid his hand on his sword, and swore he would not have taken such treatment even from her father. He then withdrew, and instead of making his submission, continued to complain of the treatment he had received. At length a reconciliation was effected; and on the breaking out of the rebellion of Tyrone, Essex was appointed to the government of Ireland; but being unsuccessful there the queen became displeased, and sharp letters passed between them. He, therefore, returned to England, and waited on the queen, who gave him a better reception than could have been expected. However, he soon fell into disgrace, and was imprisoned. In 1600 he regained his liberty, but instead of conducting himself with caution, he gave vent to his indignation in coarse and virulent terms. His enemies having intelligence of his actions and speeches, sent for him to attend the council, which he refused, and began to arm in his own defence. Some blood was shed before he surrendered, on which he was made close prisoner, tried, and beheaded, in 1601. Lord Bacon, his former personal friend, appeared against him on his trial. Essex was rash, bold, and presumptuous, but at the same time generous and affectionate; he was also the friend and patron of literature.

ESSEX, ROBERT DEVEREUX, Earl of, son of the preceding, was born in 1582, and was restored to his family honours by James I. In 1620 Essex served under Sir Horatio Vere in the Palatinate, and afterwards under Prince Maurice in Holland. On his return to England he appeared as a member of the popular party; and on the breaking out of the civil war had the command of the parliamentary army. He gained the battle of Edgehill, after which he took Reading, raised the siege of Gloucester, and fought the first battle of Newbury. By the self-

denying ordinance in 1645 he was deprived of his command, and died the year following.

ESSEX, JAMES, architect and antiquary, was born at Cambridge in 1723. His course of study and life was determined by his early familiarity with the wonderful chapel of King's College, in his native town. He drew the illustrations for Bentham's History of Ely Cathedral; was employed in that cathedral, in the cathedral of Lincoln, at King's College chapel, and other places; became a fellow of the Society of Antiquaries; and died in 1784.

ESTAING, CHARLES HENRI, Count, a French commander; was born of a noble family in Auvergne; and commenced his career in the East Indies, under Lally, when he was taken prisoner by the English. In the American war he was employed as vice-admiral and general of the French armies on that station, where he took the island of Grenada. In 1787 he became a member of the Assembly of Notables, and commandant of the national guards at Versailles at the commencement of the revolution; but, like many others who had promoted the revolution, he was accused of counter-revolutionary projects, and suffered, in 1793, by the guillotine.

ESTE, one of the most ancient and illustrious families of Italy, which traces its origin to those petty princes who governed Tuscany in the time of the Carolingians. In later times, they received from the emperor several districts and counties, to be held as fiefs of the empire, with the title of marquises. In the 11th century the house of Este became connected by marriage with the German Welfs or Guclphs, one of whom, Welf IV., was created duke of Bavaria, and was lineal ancestor of the house of Brunswick. The sovereigns (marquises and dukes) of Ferrara and Modena were of the house of Este.

ESTIENNE. [STEPHENS.]

ESTRÉES, GABRIELLE D'. [GABRIELLE.]

ETHELBERT, king of Kent, succeeded to the throne A. D. 560. About five years later he married Bertha, daughter of Charibert, king of Paris, a Christian princess, who came to Britain accompanied by a Gallic bishop. Ethelbert was acknowledged Bretwalda on the fall of Ceawlin, king of Wessex, about 590. The mission of St Augustine took place in 597, Ethelbert was baptized, and Augustin was made archbishop of Canterbury. Christianity was soon after established among the East Saxons and in Northumbria. The code of laws which Ethelbert published in English, about 600, is the first of our written laws, and the earliest in any modern language. Ethelbert died in 616, and was afterwards canonized.

ETHELBERT, king of England, the second son of Ethelwolf, whose kingdom he shared with his brother Ethelbald in 856, and succeeded to the whole on Ethelbald's death in 860. He was a virtuous prince, and beloved by his subjects. Died, 866.

ETHELRED I., king of England, son of Ethelwolf, succeeded his brother Ethelbert in 866. The Danes became so formidable

in his reign, as to take the whole kingdom. Alfred, Ethelred's son, of Mercia, withstood them, but the Mercians rose against him, and he was obliged to flee alone, his hereditary possessions, the invaders' successes, the invading numbers, and the consequence of a wound received, in 871.

ETHELRED II., king of England, succeeded his father, Edgar, in 975, and was a martyr, in 979, and, in 984, and had capacity, was successful. He paid a tribute to the Danes, called *Danegeld*, to free himself from their attacks. He caused all the Danes who had cheerously massacred Sweyn, king of Denmark, and compelled him to return, but Sweyn dying soon after, Ethelred returned and resumed the throne in 1010, while Canute was on a great expedition.

ETHELWOLF, king of England, succeeded his father, Egbert, in 838, and was the son, Athelstan, the second king of Kent, and Sussex. Canute invaded the kingdom in 1016, and threatened London; but he was repulsed; and Athelstan and others, who were his quarters in Thanet, a town in Kent, and Canterbury and London. Ethelwolf, the youngest son, made a treaty with Canute, where he remained a prisoner. He found Athelstan, his next son, Ethelred, who had entered into a conspiracy with Canute to vent his father from the throne. To avoid a civil war, he fled up the western division of the island, his son, and soon after the council of the kingdom of the land to the effect of this grant, and effect of this grant, and still remained, formed the foundation of the monarchy, as once maintained, is 857.

ETHEREDGE, Sir, dramatist, and one of the best poets of Charles II., was born in 1662, and returned from his studies in 1680. He was one of the inns of court, and distinguished legal science. He was the author of a course of dissipation in the era in which he lived, he devoted himself to light literature, and wrote several plays, lampoons, and dramas; and was distinguished with licentiousness, ease, and spirit. His comedy, "The Comical Revenge," "She Would if She Could," "The Mode." Having injured his health by his fortune, he sought a cure in a foreign widow, who made him a knight of honour of knighthood, and was accepted. This, on the 11th, he attained, and was

In his reign, as to threaten the conquest of the whole kingdom. Assisted by his brother Alfred, Ethelred drove them from the centre of Merca, whither they had penetrated; but the Mercians refusing to act with him, he was obliged to trust to the West Saxons alone, his hereditary subjects. After various successes, the invaders continually increasing in numbers, Ethelred died, in consequence of a wound received in an action with them, in 871.

ETHELRED II., king of England, the son of Edgar, succeeded his brother, Edward the Martyr, in 879, and, for his want of vigour and capacity, was surnamed **THE UNREADY**. He paid a tribute to the Danes, raised by a tax called *Danegelt*, levied on his subjects. To free himself from this oppression, he caused all the Danes in England to be treacherously massacred in one day. On this, Sweyn, king of Denmark, entered his kingdom, and compelled him to fly to Normandy, but Sweyn dying soon after, Ethelred returned and resumed the government. He died in 1016, while Canute was preparing his great expedition.

ETHELWOLF, king of England, succeeded his father, Egbert, in 837, and gave to his son, Athelstan, the sovereignty over Essex, Kent, and Sussex. In the year 851 the Danes invaded the kingdom in excessive numbers, and threatened its total subjugation; for, though vigorously opposed by Athelstan and others, they fixed their winter quarters in Thanet, and the same year took Canterbury and London. During these troubles, Ethelwolf, accompanied by Alfred, his youngest son, made a pilgrimage to Rome, where he remained a year, and, on his return, found Athelstan dead, and succeeded by his next son, Ethelbald, who had entered into a conspiracy with some nobles to prevent his father from again ascending the throne. To avoid a civil war, the king gave up the western division of the kingdom to his son, and soon after, summoning the great council of the kingdom, gave a tenth part of the land to the church. The meaning and effect of this grant has been much discussed, and still remains doubtful. That it formed the foundation of the claim of tithes, as once maintained, is no longer held. Died, 857.

ETHEREDGE, Sir **GEORGE**, an English dramatist, and one of the wits of the court of Charles II., was born about 1636. After he returned from his travels he studied at one of the inns of court, but soon relinquished legal science for that fashionable course of dissipation which characterized the era in which he lived. Notwithstanding this, he devoted considerable attention to light literature, and wrote songs, panegyrics, lampoons, and dramas; which, though tinged with licentiousness, possess humour, ease, and spirit. His comedies are entitled, "The Comical Revenge, or Love in a Tub," "She Would if She Could," and "The Man of Mode." Having injured his constitution and fortune, he sought to marry a rich elderly widow, who made his acquirement of the honour of knighthood the condition of her acceptance. This, on the accession of James II., he attained, and was appointed envoy to

Russia, where he is said to have lost his life in 1689, by falling down-stairs when in a state of intoxication.

ETOILE, PIERRE DE L', a French writer, born in 1640, whose diary of events furnished the matter for the "Journal of Henry III.," in 5 vols.; and the "Journal of Henry IV.," in 4 vols. Died, 1611.

ETTY, WILLIAM, R.A., a distinguished painter, was born at York, 1787. At a very early age he evinced a talent for drawing and colours; and having served his apprenticeship as a printer, he abandoned that vocation for one in which he ultimately attained so eminent a position. On his arrival in London in 1805, he attracted the attention of Ople, Fusell, and Sir Thomas Lawrence; he studied in the life school of the Royal Academy; worked hard, and offered numerous pictures for exhibition, but had only a disheartening series of failures. In 1822 the death of an uncle, who bequeathed him a considerable fortune, having enabled him to prosecute his studies as he pleased, he proceeded on a tour to Italy, the home of art, where he applied himself with zeal and perseverance to his profession, and imbibed that taste for Venetian art which he subsequently displayed in the numerous works that proceeded from his pencil. He was elected A.R.A. in 1824, and R.A. four years later. Many of his works were of colossal magnitude. A year before his death, a collection of them was exhibited in the rooms of the Society of Arts, under his own superintendence; and their dazzling brilliancy surpassed the expectations of even his most cordial admirers. His "Judith," and "Joan of Arc," each a series of three large pictures, may rank with the best compositions of modern times. Died at York, 1850. The "Life of William Etty" has been written by Alex. Gilchrist.

EUCLID, an eminent Greek philosopher, who flourished about four centuries before the Christian era, and was the founder of the Megaric school. Euclid was a disciple of Socrates, but in his own teaching he only partly adopted the doctrines of his great master, and combined them with those of the Eleatic school. His chief attention was given to the cultivation of logic.

EUCLID, the celebrated mathematician, flourished at Alexandria, B. C. 300. He immortalized his name by his books on geometry, in which he digested all the propositions of the eminent geometers who preceded him, as Thales, Pythagoras, and others. Ptolemy became his pupil, and his school was so famous, that Alexandria continued for ages the great resort for mathematicians. His "Elements" have been translated into the languages of England, France, Germany, Spain, Italy, Holland, Sweden, Denmark, Russia, Egypt, Turkey, Arabia, Persia, and China. They have held their ground for 2000 years as the basis of geometrical instruction wherever the light of science has reached.

EUDOCIA, whose original name was Athenais, was the daughter of Leontius the philosopher. In 421 she was married to the emperor Theodosius, who afterwards divorced her in a fit of jealousy. She then went

to Jerusalem, where she built churches, and died a life of great devotion. She died in 460. This empress wrote several Greek poems, and paraphrases on some of the prophets.

EUDOXUS, of Cnidus, a distinguished Greek mathematician and astronomer, who probably lived from 408 to 350 B.C. He became a disciple of Plato and Archytas, is reported to have visited Egypt and received astronomical instruction from the priests, and to have also visited Mausolus, king of Caria, for whom the celebrated mausoleum was built, and Dionysius the Younger, of Syracuse. He chiefly lived at Cyzicus. Plato referred the Delians to Eudoxus for a solution of a difficult mathematical problem, as more competent than himself. Eudoxus had an observatory at Cnidus, and was an enthusiastic student of the heavens, of which he wrote a comprehensive description in his two works now lost, the "Mirror" and the "Phenomena." The latter was versified by Aratus, whose poem, translated into Latin verse, was in use till the 8th century of our era. Eudoxus was the first Greek astronomer who attempted to form a theory of the planetary motions, and his theory was substantially identical with the Ptolemaic system. (For fuller details on the life and theories of this eminent astronomer, see Sir G. C. Lewis's "Astronomy of the Ancients," chap. iii. s. 2.)

EUGENE, FRANÇOIS, of Savoy, known as Prince Eugene, a distinguished military commander, and a grandson of the duke of Savoy, was born at Paris, in 1663. He was intended for the church; but his predilection for a military life was so strong, that on being refused a regiment in the French army, he entered the service of the emperor, as a volunteer against the Turks; where his bravery attracting notice, he was soon appointed to the command of a regiment of dragoons. He was afterwards placed at the head of the army of Hungary; and so highly did Louis XIV. think of his abilities, that he offered him a marshal's staff, a pension, and the government of Champagne; but these he indignantly refused. He was the companion in arms of the great duke of Marlborough, and participated in the victories of Blenheim, Oudenarde, &c. He likewise saved Turin, expelled the French from Italy, reduced Lisle, and, in short, raised his name to the very pinnacle of military renown by repeated demonstrations of skill and bravery. He routed the Turks at Peterwaradin, in 1716, and compelled Belgrade to surrender, after inflicting on them another ruinous defeat. After the peace in 1718 he retired to private life, and spent his time in cultivating and patronizing the arts, till he was again, in 1733, called into the field as commander on the Rhine: this service, however, was unproductive of any remarkable action. He died, aged 72, in 1736; and, independently of his military renown, he left behind him a character in private life worthy of imitation.

EUGENIUS IV. Pope, was a Venetian by birth, became cardinal-bishop of Sienna, and succeeded Martin V. in 1431. He owed his election to the Orsini family, and im-

mediately espoused their cause in the quarrel with the Colonna family. He had proceedings commenced against the latter on the charge of misappropriation of monies on the papal treasury; arms were resorted to, and the Colonna were defeated. He is said to have put to death above a hundred of their adherents. Eugenius had serious contentions with the duke of Milan, the king of Aragon, and Count Sforza. But the principal events of his pontificate are those arising from his dispute with the council of Basel, summoned by his predecessor. He attempted in vain to dissolve it; was summoned to attend it and refused; convoked another council at Ferrara, and was deposed and declared contumacious by the fathers of Basel, who at once elected a new pope, Amadeus of Savoy, by the title of Felix V. The French refused to recognize Felix, but still adhered to the council of Basel. Meanwhile, at Ferrara, the emperor of the East, John Palaeologus, and many Eastern bishops were present, and agreed to a decree for the union of the two churches of the East and the West; which was, however, fruitless. One of the worst acts of this pope was his order to Ladislaus, King of Poland and Hungary, to break the peace which he had sworn with the Turks, on the pretext that it was void without the pope's confirmation. Eugenius died in 1447, leaving the schism between himself and Felix still unhealed.

EULER, LEONARD, a celebrated mathematician, born at Basel, in 1707, and was a pupil of Jean Bernouilli. He was one of the literati invited to St Petersburg by Catherine I., and for a time sustained the whole weight of the mathematical department in the new university with great talent and industry. In 1741 he accepted an invitation from Frederick the Great, and remained at Berlin till 1766, when he returned to the Russian capital, where he died in 1783. Though he had been blind for many years before his death, he still continued his literary labours; and in that state he produced his "Elements of Algebra," and his "Theory of the Moon." His writings, which are numerous, are able and original, both in metaphysics and philosophy; and he may justly be regarded as one of the greatest mathematicians of the age.
