What is the Red Cross Doing?

- The Red Cross in Ontario has:
- Continued its war work in military hospitals.
 - Contributed to the relief of disease-stricken sufferers and undernourished children in Europe.
 - Co-operated with the Soldier Settlement Board in helping soldier settlers in emergencies due to sickness in the family.
 - Provided funds for three years for a course in public health nursing in the University of Toronto. The first class of fifty graduates in May.
 - Provided eight nurses for child hygiene demonstrations under the Provincial Board of Health.
 - Distributed to civil hospitals equipment and supplies left over from the war.

ONTARIO ENROLLMENT, MAY 22-28
 We have seen a Canada organized for war; now let us have a Canada organized for good health.

Enroll in the Red Cross and help create public opinion in favor of sound health measures. Enroll with your local Red Cross Branch or Enrollment Committee, or, if there is none in your community, with the Ontario Provincial Division, 410 SHERBOURNE STREET, TORONTO.

 A. P. McDOUGALL, Township Clerk.

The Louisville Courier-Journal suggests a "Go-back-to-the-Bible" movement.
 Complete in itself, Mother Graves' Worm Extractor does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

DISTRICT AND GENERAL
 Alvinston ratepayers are voting June 6th on the necessary by-laws to obtain hydro-electric power.

Morris Handy, drilling on the farm of Robert McKinley at Morpeth, has struck a flow of natural gas.
 Bricklayers in London have refused to accept a cut of ten cents an hour on their present wage of \$1 per hour.
 West Lorne driving club will open their new race track on May 24th, when the club will put up \$1,000 in purses.

Archibald Livingston of Coldstream has purchased the farm of F. Plank on the Ekfrid-Metcalf township, Mosa, under auspices of the Women's Institute of S. S. No. 9. Four valuable quilts donated by the Women's Institute will be competed for. Proceeds in aid of Sick Children's Hospital.

G. G. Bramhill, who has been in the fax business in Alvinston for the past three years, has been appointed district representative of the Department of Agriculture for the county of Norfolk.
 As Warren Green was plowing on his farm in Howard one of his horses slipped down an old well, dragging the other horse with him. Assistance was quickly procured but both horses were dead when extricated.

Mrs. Duncan McDougall, a well-known pioneer resident of the township of Caradoc, died a few days ago in her 86th year. Mrs. McDougall came from Argyle-hire, Scotland, in 1847 with her parents, who settled at that time in Caradoc.

While watching an airplane George W. Pitt fell from a third-storey window of Victoria Hospital, London, and was instantly killed. He was a veteran of the American civil war and for many years conducted a jewelry business in London.

Peter D. McAlpine, eldest son of Mr. and Mrs. Daniel McAlpine of Dutton, died at Calgary on April 27th, from typhoid fever. Deceased was 29 years of age, and after completing his education in the Dutton high school, went to Calgary, where he completed a course in law. He leaves a wife and two children.

Contractors have arrived with equipment to make an immediate commencement on paving the Wharncliffe Road between London and Lambton as a link in the provincial highway. Beyond the city limits the hard surface is to be 20 feet wide, and it is expected that the work can be completed within one hundred working days.

METCALFE COUNCIL
 Meeting of Metcalfe council held May 2. Members all present. Minutes read, approved and signed.
 Moved by Hawken and Blain that Mrs. R. Leaning be paid \$250, part of township grant S. S. No. 8; Transcript, \$3.80, advertising; Municipal World, \$1.11, dog tags; R. Denning, \$28.60, 44 hours grading; con. 1, 2, div. 1; D. Galbraith \$21, two sheep killed by dogs; H. Watson, \$9.75, 15 hours grading; con. 1, 2, div. 1; W. Johnston, \$6.18, 9 1/2 hours grading; con. 1, 2, div. 1; C. Osier, \$75.55, to pay parties grading sideroad 20 and con. 12, 13, div. 5; J. Patterson, \$9, 30 hours putting in culvert opposite lot 4 and 5, con. 13, div. 4; H. Nevin, \$3.75, 12 1/2 hours repairing sidewalk; div. 2; E. Quick, \$1.36, 17 lbs. spikes; sidewalk, div. 2; J. A. Dood, \$55, 74 hours, men and teams grading; con. 5, 6, div. 2; N. Munroe, \$29, 40 hours, men and teams grading; and man 10 hours operating grader; div. 3; H. Thompson, \$5, postage.

W. L. Toonill, Ed. de Gex and Arnes McLean waited on the council asking for the usual grant to Strathroy fair. It was moved by Hawken and Blain that the usual grant of \$50 be given. A motion by A. Taylor that no grant be given was declared lost.

Moved by Hawken and Blain that A. Taylor have breakwater at St. Mary's cemetery repaired.

Harry Reid, \$6.50, 10 hours grading towline Brooke and Metcalfe, half to Brooke, div. 2; T. Foster, \$1, rep. culvert towline Metcalfe and Warwick, half to Warwick, div. 1.

Moved by Taylor and Blain that the petition of E. Moore and others to change the Moore-Munroe award drain to a by-law drain be granted and the engineer be asked to act on same.

E. Moore, \$41.60, 64 hours grading from 12 to 20 sideroad, div. 5; A. Clothier, \$6, putting in culvert opposite lot 2, con. 4, div. 2; J. Hughes, \$3, filling without opposite lot 3, con. 5, 6, div. 2; M. McIntyre, \$12.35, 19 hrs. scraping 20 sideroad, div. 5; W. T. May, \$45.76, 375 four-inch tile and 410 five-inch tile, sideroad 4, con. 13, div. 4; E. Giles, \$9, laying tile township part Henry award drain; Ed. Merrick, \$8, lowering culvert sideroad 4, con. 14, div. 5; W. Heatherington, \$7.80, 12 hours grading; con. 13-14, div. 5; J. Heatherington, \$7.70, 10 hours grading and 4 hours operating grader; con. 13-14, div. 4; S. L. Herd, \$21.57, plank, Sifton bridge, div. 4; Ed. Howe, \$33.50, 42 1/2 hours grading; con. 13-14, and repairing Sifton bridge, div. 4; C. Henry, \$41.30, 53 1/2 hours grading towline Metcalfe and Ekfrid, and 15 hours operating grader, half to Ekfrid, div. 4; A. Clothier, \$8.45, 13 hours grading towline Brooke and Metcalfe, half to Brooke, div. 2.

Council adjourned to May 30 at 10 a. m.
 Harry Thompson, Clerk.

It may soon be necessary to offer to keep the tax and let the Government have the income.
 "Say it With Flowers." Send her a bushel of dandelion blossoms, for instance and a couple of yeast cakes.

EXCITEMENT AT WALKERS
 Evidence that robbers intended to Make Raid on Home Bank

Wednesday afternoon of last week Glencoe received a hurry-up call from Walkers for police assistance. It was stated that an attempt was being made to rob the Home Bank at that place. Supplying themselves with revolvers and handcuffs, Townsman John Henry and Constable Weaver engaged in automobile and hurried to the scene.

It appears that early in the morning two men were seen prowling about a woods, near the village, one of whom was described as wearing a grey coat. Later in the day it was found that the telephone wires leading to the bank had been cut. It was on the strength of these suspicions that the call was sent for police assistance. When the Glencoe constables arrived at Walkers they found a man dressed in grey, answering the description of one of those seen in the woods, loitering about the station. The constables questioned him and he gave a good account of his movements, stating that he was a sailor out of work and making his way to Buffalo, intending to get on the next train eastbound if possible and ride as far as he could. He was not detained. No trace, however, could be obtained of the two men who were seen early in the day.

It is thought that the strangers cut the wires not to prepare for the commission of a crime on that day, but that they would wait until the bank messenger from Melbourne made his semi-weekly visit, and that even if they did not take him by surprise he would not have an opportunity of calling for assistance when they entered.

Rumor had it that the Murrell brothers and Williams, who are awaiting trial for the murder of Russell Campbell at Melbourne on April 11, planned to capture this same messenger when he rode to Walkers on a hand-car, but that on that day the messenger took the train and, although disappointed in this venture, the Londoners attempted the Melbourne bank robbery.

Reeve Henry of Metcalfe is now in communication with the county authorities seeking pay for the expenses of the Glencoe constables. The constables, it appears, can only get pay for their services when an arrest is made. In this case there was only an investigation, but it is thought the county should reimburse them for their trouble and expense.

ODD FELLOWS' SERVICE
 Big Turnout of the Fraternity to Observe Anniversary

Old Fellows of Glencoe Lodge, No. 133, observed the 102nd anniversary of their Order on Sunday last by attending special divine service held in the Presbyterian church in the afternoon. About 90 of the Order were in the parade ground from the church, a number of visitors being present from the surrounding lodges of Kerwood, Newbury, Rodney and West Lorne.

The service was very impressive. Rev. D. G. Paton, B. D., pastor of the church, delivered the sermon, extolling the virtues and benefits of brotherhood. The Scripture reading was given by Rev. D. Robertson of Kilmartin. An anthem was given by the choir and Stanley Humphries sang as a solo "Jesus, Lover of My Soul." All joined heartily in the singing of the Odd Fellows' and hymns, thanksgiving and parting hymns.

ORGANIZES BASEBALL TEAM
 On Friday noon the Fletcher Manufacturing Co. organized a baseball team for 1921, with the following officers:—President, Fred Aldred; vice-president, Alfred Aldred; manager, Ed. Hamilton; captain, Chester Bechler; secretary-treasurer, Erv. Smith; trainer, John McCracken. They are ready to meet all comers, mostly "Davenport" stars.

The death occurred in Metcalfe township a few days ago of Maria Smith, widow of the late George Lightfoot, in her 73rd year.

CHURCH RE-OPENING
 Special Services in connection with the Re-opening of TAIT'S CORNERS PRESBYTERIAN CHURCH will be held on SUNDAY, MAY 15th, 1921 at 2.30 and 7.30 p.m. conducted by Rev. D. G. Paton, B.D., of Glencoe SPECIAL MUSIC BY THE CHOIR

On the following Monday evening, May 16; there will be An Old-fashioned Tea Meeting with supper served from 6 to 8 o'clock.

Afterwards a First-class Programme will be given, including Selections by the ELGAR-LADIES' QUARTETTE, of London; Readings by MISS MINNIE DOBBYN, Elocutionist, of London, and MISS ALICE WATTERWORTH, of St. Thomas; Songs by D. H. McRAE and J. D. McALPINE; Addresses by Revs. STUART, STALKER, PATON and McKILLOP.

CHAIRMAN, J. G. LETHBRIDGE, M. P. P.
 Admission - Adults, 50c; Children, 25c

DEATH OF MALCOLM C. MUNROE
 Well-known Mosa Pioneer Passes Away on Sunday

Malcolm C. Munroe, one of the early pioneers of Mosa township, passed away on Sunday afternoon, following a break-down from the effects of the flu contracted about a year ago. Mr. Munroe was in his 87th year and was born on the farm near Kilmartin on which he died. He is survived by his wife, now in her 83rd year, and Mr. Munroe lived until the 6th of June, the venerable couple would have celebrated their 66th wedding anniversary. Their family consists of three sons and four daughters—Peter Munroe of Margaret, Man.; John Munroe of Tucson, Ariz.; Dan, N. Munroe on the homestead; Mrs. John Secord of Mosa; Mrs. John H. McFarlane of Detroit; Mrs. James Walker of Walkers, and Mrs. D. A. Dewar of St. Thomas.

The late Mr. Munroe was one of the typical Scotch pioneers known so well for their integrity and simplicity of daily life. Both he and his wife experienced all the vicissitudes of the early pioneers, and could tell many interesting tales of the early settlement and clearing of what is now one of the hamlet townships of the province. Mr. Munroe was an active member of Burns' Presbyterian church practically all his life and was an elder for many years. The funeral took place on Tuesday afternoon from his late residence to Kilmartin cemetery.

AN OLD LANDMARK GONE
 Peter and John Smith, painters, have bought the old Smith residence on Main street, opposite the post office, from the Daughters of the Empire, and have taken the building down and will rebuild it on their property on the Appin road. This was one of the oldest buildings in Glencoe, and was originally occupied by George Tait as a harness shop about 50 years ago. Mr. Tait moved to Alvinston from Glencoe. Captain Symes, on retiring from the lakes, bought the property and converted it into a dwelling house which he occupied up to the time of his death. The shop adjoining was built and occupied by the late Mr. Symes as a book store, and it was in the back part of this building that The Transcript was born 50 years ago. The Daughters of the Empire recently bought the north half of the premises in order to extend their grounds for a memorial tablet and rest room which they propose erecting as soon as sufficient funds are in hand. They have already received several substantial contributions and are promised a carload of building material from Brigadier-General McRae of British Columbia, to be shipped in from that province.

SUMMER SPORTS OPENING
 Glencoe Girls Win Championships at West Lorne

The G. H. S. girls again distinguished themselves in the line of sports when the athletes of the school, under the direction of Mr. Yorke and Miss M. Gilles, visited West Lorne on their field day last Saturday. Though handicapped by the absence of some of their best juniors the girls tied with West Lorne in the total number of points. In the twelve events they captured eight firsts, three seconds and six thirds. Mary Beatrice won the senior championship with thirteen points, closely followed by Jessie Currie with eleven. In the junior events Marion Campbell tied with Jean Campbell of West Lorne for the championship.

As Cameron McPherson was not allowed to compete the boys were handicapped by the small number of contestants. Those who took part, E. D. and Alex. McDonald and W. McKellar, won two firsts, five seconds and six thirds.

Boston's latest is a mail order department of health. Do you feel out of sorts this morning, with a bad mouth taste, or pain somewhere, or the like? Then call up the Municipal Health Information Bureau. It will answer queries and give advice by return post. The only cost will be a self-addressed and stamped envelope.

The Secret of the Old Chateau

By DAVID WHITELEW.

(Copyrighted)

Synopsis of Previous Chapters. Vivian Renton and Eddie Haverton, modern soldiers of fortune, have been gambling with Hubert Baxenter, a prosperous attorney, in his London apartments. After their departure late at night Renton returns to the house, murders Baxenter and hides the body on the roof. While waiting for night to come again in order to make his escape, he finds in a desk a curious old yellowed document telling of a mysterious chest left in the care of one of Baxenter's ancestors by a French nobleman, the Marquis de Dardigny, of the chateau wine mill. The chest has been handed down from one generation of Baxenters to another and carefully guarded in the hope that some day its rightful owner will be found. Renton discovers the chest as the missing heir and claim the chest. He goes to France to make some useful inquiries about the Dardigny family. The story of the mysterious chest goes back to the troubled days of the French Revolution and the escape of the Marquis and little grand daughter to England, where the chest and document were given to the Baxenters for safe keeping. Now, more than one hundred years later, Hubert Baxenter's body is found, but the police find no clue. Meanwhile, Renton changes his name to Baptiste Dardigny, grows a beard and passes himself off as a Frenchman. He visits the old chateau.

CHAPTER VII.—(Cont'd.)

A stone bridge spanned the half-frozen surface of the stream and led to the main entrance of the chateau, a massive gateway flanked by little white flowers. Above it, on a block of stone, were the remains of a carved escutcheon, battered and defaced almost out of all recognition. The caretaker, who had been nodding over his fire in the little gate room, welcomed the landlord of the "Three Lilies" and his guest effusively. To show a stranger over the great house of which he held the keys was to him a source of never-ending delight.

As he led them through the courtyard his tongue was busy recounting snatches of the romantic history of the Dardignys. The old fellow seemed to live in the glories of the past. Here, from the doorway, the Marquis and a Monsieur Peranquet took their departure, disgraced as the merchant and his clerk. Yes, they reached England; but the nobleman returned, and he was not seen again after the death of his son. Ah! it was a sad time, that of the Revolution!

The old caretaker shook his head as he recounted the history. "No, monsieur, there are no Dardignys left now. There was one who appeared as a claimant in the early part of 1800. He was an emigre, monsieur, and he had no money and could not fight his claim. He disappeared at last, monsieur, and went with two or three other ruined nobles to Ottawa to begin life again."

The chateau, the visitor learned, had been attacked by a mob of patriots led by a friend of Carrier, the infamous butcher of Nantes. This gentleman, with an eye, no doubt, to personal plunder, restrained the mob of the attackers, who, after demolishing the chapel and the carving and armorial bearings over the gates and fireplaces and finding no living being on which to gratify their blood-lust, passed on to more exciting game. The castle ultimately fell into the possession of a prominent Jacobin, who, shortly after the fall of Robespierre, followed his illustrious leader to the scaffold.

The estate after that had fallen into a state bordering on decay, until, in 1860, it was restored by a Monsieur de Barron, a financier, in whose possession it now remained. The building had changed but little in style since the days of the last marquis, and the new owner had so far respected the history that he had left the battered escutcheons and restored only what was quite necessary to comfort.

The traveler from Blois was a good listener, and on his return to the "Three Lilies" he was able to fill two pages of his notebook with interesting data pertaining to the ancient family of the Dardignys. The gentleman who had gone to Canada particularly interested him, and reference to the notes which he had accumulated in Paris easily located him as the only child of a certain Yvette, sister of the Marquis. This lady, Vivian noted with satisfaction, ascended the scaffold in the Carrousel quite early in the days of the Terror.

He told himself that it was through this emigrant to the New World that his path lay to the chest reposing in the strong-room of the firm of Baxenter. For a few days he lingered in the neighborhood of the chateau, then returned to Paris.

On the 20th of February the good ship *Touraine* left Havre for Montreal. On its passenger list figured the name of Baptiste Dardign.

CHAPTER VIII.

The Claimant.

The sun of mid-June beat fiercely down on a brazen sky, and striking

Used Autos

BREAKERS' SHOPS sell used cars of all types; all cars sold subject to delivery up to 10 miles or less from any city or town. If you wish in good order as purchased, or purchase price refunded.

BRING mechanics of your own choice to look over, or ask us to take any car to city representative for inspection. Very large stock always on hand.

Breakers' Used Car Market
425 Yonge Street, Toronto

a sporting chance, on some vague tradition. The 17th, why, that's tomorrow. We'll know more then. I'm going to put it out of my mind till tomorrow. Now, we'll look into that matter of the Marston settlement. The Mackinnon affair is postponed until Mrs. Mackinnon returns from Scotland."

It was a well set-up man of some thirty years of age who entered the offices punctually at eleven o'clock the next morning. He was dressed in a well-fitting suit of light gray tweed and he carried himself athletically. His beard was neatly trimmed to a short point, and his bronzed skin and the low cut of his collar give him the unmistakable look of a Colonial. In one hand he held a soft felt hat, the other he stretched out to the solicitor.

He greeted Mr. Baxenter with a smile that had something of nervousness in it and that lent a twinkle to his rather grave eyes. In his speech was a suggestion of a Canadian accent. At the solicitor's invitation he took a chair beside the desk, and beneath the seat he placed his gloves and the soft felt hat.

"Well, Mr. Baxenter, here I am—a mighty hunter of my profession," he said, "I see you, like Ali Baba, and I say, 'Cheerchez avec l'epée'—presto!" "Meaning—?" said the solicitor, with a smile.

"Well, I think it means 'Seek with the sword.' Yet I come to you unarmed. What it conveys beyond that I cannot guess. Nothing, eh?"

Woman's Interests

Getting an Education at Home. There are, unfortunately, a number of women who have a sense of inferiority because they lack an education. They would like to take part in the social life and the club work of the community, but are afraid to do so for fear of making mistakes. Their ideas may be just as good as the ideas of the women who "do things," but they do not know how to express them.

Such women can not enter into a discussion nor prepare a club paper, and they have not the courage necessary for taking part in a program. They are forced to acknowledge their inability by their inactivity, and so must sit by, feeling that they are "out of it all." I know the feeling, for I once belonged to that class; and I want to tell how I overcame my inadequacy and thus possibly help others to overcome their difficulties.

My education, in so far as schooling is concerned, ended before I had finished the seventh grade. I married and for several years was so busy with my work and with the "bringing up" of a good-sized family that I took little part in neighborhood affairs. Later, however, I had more time.

I attended the Parent-Teachers meetings; but aside from "honoring the meetings with my presence" and paying my dues, I might as well have stayed at home for all the good I was able to do.

Finally, I became so sensitive concerning my mental lameness that I determined to do something about it. I had two eyes and a mind, and there were books. With such a combination, why remain ignorant?

There was not much time for study; but the housewife performs a number of duties that do not require constant application of thought, and I could at least use the time given to those duties for thinking to some purpose.

I wrote on paper the particular thing I wished to learn, and kept it before me when washing dishes, doing other kitchen work, and when ironing. When on the move, I carried my "lesson" around in my apron pocket, glancing at it when I could.

I began to study my old school dictionary to find the meaning of words I was using but could not define. I studied words alone and in their relation to other things, tried to form ideas on chosen subjects, and sought the proper words to express the ideas.

When I read I endeavored to get the meaning of each sentence or paragraph before going on to the next. By doing this I was able to fix in my mind what I had read and to remember it. I had my children bring their language and rhetoric books home so that I could study them at night.

I kept, and still do keep, a paper and pencil at hand, and any original thought is welcomed as a fortune would be and is quickly written down. Many times I have taken my hands out of dish-water to do this; I have even jumped out of bed to write down a thought which I feared would be gone by morning.

The more I thought and studied, the better became my understanding; the more I used my mind, the more useful it became. I do not think I possess greater intelligence than the average woman, but I can say without any intention of boasting that the result has been truly amazing. "My mind" has come to life and grows constantly more lively, for I have acquired a hearty appetite for learning, and I find the means of nourishment everywhere.

Pitfalls For Foreigners

Sir Ian Hamilton tells a good story of when he was the only foreigner with the Japanese General Staff in the Russo-Japanese War. A geisha, whose name in English would have been Miss Sparrow, sang to the company, and he proceeded to compliment her on her skill.

Proud of the little Japanese he knew, he tried to say to her in the florid Eastern style that he would like to keep her always with him in a cage that she might sing to him. He told her so—or thought he did—and she went away quite crestfallen.

What he had really said to the girl was: "My good sparrow, I wish you would shut yourself up in a box!" During the war the following advertisement appeared in the "Times":

"Jack F. C.—If you are not in khaki by the 20th I shall cut you dead—Ehbel M."

The Berlin correspondent of the "Cologne Gazette" was so greatly struck by this terrible threat coming from an English maiden that he telegraphed it to his paper as an example of the brutal method of English recruiting. But he managed to translate it into: "If you are not in khaki by the 20th I shall back you to death!"

That is the result of trying to translate the peculiar idiom of one language into another, and it is not the only instance. There is the old story of the Frenchman who said he had "a cow in his boy," when he meant a cough on his chest.

During the war a well-known French general, who was trying to pay a well-deserved compliment to the British Army, made just as bad a blunder. He compared the Army with a vast machine. He said the privates were the wheels, and that the officers were the cogs who put the wheels in motion as long as they were "well oiled." He

The Rust Record. The greatest wrecker in the whole world is rust. It costs Britain alone \$160,000,000 yearly.

When the oxygen of most air combines with the sensitive surface of a metal it produces an oxide. This is rust, and nothing else.

Aluminum is the only metal that will not rust. Gold is generally taken to be a rustless metal, and it is true that it will not combine with oxygen of itself without air, that is, oxygen the aid, it will rust.

Ornamental steel—that with a purplish or lilac color—is the worst rust, because the color tinge has been produced by part-oxidation, and the process begun artificially is continued naturally.

Dry air will cause rust, but the metal has to be at a high temperature. A boiler which has been made red-hot will rust when it cools. Grease-hats do the same. The flakes that come from red-hot iron when it is hammered are but rust.

The best preventive of rust is fat oil varnish (one part) mixed with rectified spirits of turpentine (five parts), and applied with a sponge. The highest steel polish on mathematical instruments remains absolutely unaffected if this solution is applied.

Tinware is rendered practically immune from the rust itself if, when new, the ware is smeared with pure lard and baked in a hot oven.

Expected Too Much. Citizen—"Unless I am mistaken you are the party I gave ten cents yesterday."

Beggars—"I am, sir. Did you think a dime would make a new man of me?"

The Power of Music. Music is frequently employed to restore lost power of speech at a moment of crisis. It has been found by experiment that the neurotic and paralyzed are often able to sing, while they cannot speak.

Minard's Liniment for Burns, etc.

Holding On.

"If you can force your heart and nerve and sinew To serve your turn long after they are gone, And so hold on when there is nothing in you Except the Will which says to them 'Hold on!'"

The man who keeps his will has kept his fortune. He has kept something that none alive can take from him. All other things fall away, but he is not poor while the will abides.

At times there isn't much that one can do except hold on. To wait, and labor while we wait, and hope and carry a stout heart to each new day is a man's part in life. If we do this, there is no adversity that can stand before a quiet, inflexible determination.

Some of us expect to storm the heights in a quick, fierce rush. We are not willing to take the ascent step by step. Breathless—with our souls deflated as well as our lungs—we slink in our tracks forlorn, dispirited, calling on the mountain to cover us.

Doubt and despondency are surest to assail us when the physical vitality is at the lowest ebb. What you laugh off in the sunlight is an incubus on a dark day. The soul, like the body, shakes off all mean and malignant microbes when it is in prime condition.

The strong natures—those that are locked to for comfort and inspiration—are those that stand firm whatever comes and goes around them. "Come on, come on, this rock shall fly from its firm base as soon as I!" The little timorous folk meanwhile are running about in circles crying that the end of the world has come.

The leaders of men are like those who in shipwreck essay the fears of the other passengers.

Our faith is weak. We take counsel of our appetites and our anxieties. We pamper our senses and cherish our symptoms and ask ourselves if we are not tired, instead of inquiring what work is yet to do.

We humans are a pretty poor lot, as seen from the skies, and yet we have been given a beautiful world for a home and an eternal life to live. Why do we live in the first so selfishly and lay claim of the second so feebly?

Our wills were given us for our self-control and not for our self-indulgence. They were meant to supply a motive power to keep us going and doing to the end of our days. It is no harder for us to live than it is for millions of others; and we have only to walk a few hundred feet in any direction to find that we are blissfully fortunate compared with others that we see.

"Glad You're Alive?" Many would have to do a bit of thinking before they replied to the question at the head of this paragraph. Yet the answer can be easily found. It depends on whether you are a "fit" or a "misfit" in life.

Each of us has certain gifts and qualities which were intended to fit us into the scheme of life, so that we might live happily, contentedly, and profitably, and by justifying our existence be glad that we were born. But if we have misread our niche, been pushed into the wrong one, or persist in putting ourselves into the wrong one, then we can't be really glad that we were born.

The misfit in life might as well have misread life. The misfit is one who doesn't know what his gift is, or how to use it. Many, too, persist in trying to live fitfully on a half or quarter gift. Instead of using their talents to the full.

A real-life example of that is provided by a man whose full natural gift is that of teaching. But he has a third of a gift for painting and he persists in struggling with that third. Struggle, literally, to make a living. He will never be more than a third-class painter, and he could be, if he would, a super-first-class teacher. So he's a misfit, and wishes he had never been born!

You have a gift for something—a talent that should settle your place in life. A freakish Providence may have given you suburbs. Don't, like the painter, choose the minor instead of the major!

Be glad you're alive, by using your "gift." For sure you have one! How shall you find out what it is? Well, just as a sunflower is pulled by the sun, so your gift will pull you. A famous artist was once a clerk. His gift pulled his pen—to sketch on the firm's paper. He followed the "pull." Now he is rich and famous, and very glad that he was born.

Find your gift, make full use of it, and you will be glad too.

Natural Conclusion. Harkins, who had taken his children to a country place during the holidays, was proceeding across the fields with Louis, the youngest, when the latter saw a cow for the first time.

"What is that?" asked the child. "That's a cow, my son." "And what are those things on her head?" "Horns." "And the two then moved on. Presently the cow moved, whereat Louis was surprised. "Which horn did she blow, father?" he asked.

Taking the Joy Out of Life. Polite Boy Scout (to old lady)—"May I accompany you across the street, ma'am?" Old Lady—"Certainly, sonny! How long have you been waiting here for somebody to take you across?"

SUPREME COUNCIL SENDS FINAL ULTIMATUM TO GERMANY

Alternative of Accepting Allied Terms or Being Subject to Invasion—Thought That Germany Will Accept Plan When New Government is Formed.

A despatch from London says:—The final meeting of the Supreme Council was held at 9.45 o'clock Thursday morning at 10 Downing street, when the members affixed their signatures to the ultimatum to Germany and the protocol of the reparations plan. Each document was written in English and French, Lloyd George signing first and Briand second and the English text, and M. Jaspert, the Belgian member, first, Briand second and Lloyd George third the French text. Immediately the signing was over the French delegation took the train for Paris.

Lloyd George then summoned Dr. Shamer, the German Ambassador in London, by telephone, and at 11 a.m. formally handed him both documents. Both of the documents follow closely the outlines already cabled from day to day. The ultimatum expires on May 12, on which date, failing German compliance, the French will occupy the Ruhr and the British navy will demonstrate at German ports.

The outstanding points of the reparations demand, which was signed by the Reparations Commission, are: (1) Bonds—Series (a), for twelve billion gold marks, must be delivered by July 1. (2) Series (b), thirty-eight billions, must be delivered by November 1. (3) Series (c), eighty-two billions,

by November 1, but will be issued only as the Reparations Commission decides Germany's capacity to furnish funds for service.

All the bonds shall be free from all German taxes and charges. Germany must also pay within 25 days one billion marks gold for the first two quarterly installments of interest and sinking fund.

It is thought certain Germany will accept the plan, and the new Government, as soon as it is constitutional, will take immediate steps to prevent the occupation of the Ruhr.

Dr. Shamer declined to discuss the situation until his Government had acted. The correspondent is informed that the Supreme Council has invited the United States immediately to send a representative to the Supreme Council, the Ambassadors' Conference and the Reparations Commission, but this was not announced officially.

It is reported here that the United States has officially signified its willingness to participate on these matters, provided its view of the mandates is accepted and the whole question opened for revision.

The British are quite willing to follow this course and the French will be glad to get rid of some of their, but the Japs are holding out. It is likely, however, that they will yield to "persuasion" by their allies.

CAMPAIGN STARTED IN TREE PLANTING

Nursery Centres to be Opened in Ontario This Season.

A despatch from Toronto says:—Active efforts along Provincial forestry lines are to be carried on this summer by the Ontario Government department of which Dr. E. J. Zavitz is the head. During war years comparatively small advantage had been taken by Ontario municipalities of Government encouragement along that line, but this year it is hoped that real progress will be made.

Seven million seedlings, mostly pine and spruce, with some hard woods, will be set out in the Forestry Department's Norfolk county reservation from which it is expected to get a 50 per cent. yield. Counties and municipalities will again have brought to their attention legislation of the last two sessions, by which the Government will assist in putting to good use waste lands. It is also contemplated to open two new nursery centres in Eastern Ontario.

Simcoe county, with its many miles of waste land, is said to be one of the sections of the Province upon which the department has forestry

designs. Simcoe is already among those counties which have taken up the Government's forestry proposition.

First Move Toward World Disarmament

A despatch from Washington says:—The United States will make the first move toward world disarmament at the sessions of the Supreme Allied Council in London. This was definitely established on Friday, the information being coincident with the announcement by President Harding that this country will be represented on the council.

The Harding administration may be said to be solidly in favor of the idea, but opposed to the United States doing anything until it has an agreement from the other powers that they, too, will lay down their arms.

It's a wise child that remembers its rich relations.

MOST HOPEFUL SIGN OF PEACE IN IRELAND IN 750 YEARS

Conference Between Sir James Craig and De Valera is Full of Promise for Unhappy Isle, Says Sir Hamar Greenwood.

Dublin, May 8.—Sir Hamar Greenwood, Chief Secretary for Ireland, speaking yesterday of the recent conference of Sir James Craig, Premier-designate of Ulster, and Eamonn De Valera, the Irish Republican Leader, declared the meeting was the most hopeful sign of peace in Ireland in 750 years.

"It is not only the best thing that has happened in modern Irish history," Sir Hamar said, "but the most hopeful thing in 750 years. No Englishman, Welshman or Scotsman wants to run Ireland. Ireland must settle her problem herself."

"Therefore, the meeting of Sir James and Mr. De Valera is an extremely significant sign, and in connection with it I must praise the courage of Sir James, who consented to accompany strangers whom he knew to be enemies in a motor car from my lodge to the meeting-place. He went alone and unattended."

Asked whether Sir James had been blindfolded, as was the correspondent

when he recently interviewed Mr. De Valera, Sir Hamar said: "Not at all; he went with his eyes wide open."

The Chief Secretary pointed out and emphasized that this was the first time on record that the representatives of Northern and Southern Ireland had consented to meet for a friendly discussion of the different points of view. He declared himself extremely optimistic over the outlook for a settlement.

When asked if there was any possibility of an Irish settlement before the Parliamentary elections, Sir Hamar said:

"The present British Government has one virtue, its consistency, which will be followed first, last and all the time. There is no question as to the Government going on with the elections. The Irish question must be settled through the Home Rule Act. After the elections the atmosphere will be cleared, and we shall all be in a better position to discuss matters than now."

Appointed by the Government to consider all questions relative to the handling of wheat. Left to right—Lincoln Goldie, Guelph, Ont.; W. G. Staples, Winnipeg; Judge Hyndman, Calgary; J. H. Haslem, Regina.

UNITED STATES TO PARTICIPATE IN COUNCILS OF THE ALLIES

Invitation Conveyed by Lloyd George Accepted by President Harding—Representatives of the Republic Will Sit on Board for Regulation of European Affairs.

A despatch from Washington says:—President Harding accepted on Friday the invitation of the allies to deputate representatives of the United States to participate in the Supreme Council, the Reparations Commission and the Conference of Ambassadors.

This resumption of participation in the councils of the allies the President aims to carry out without entangling the United States in purely European affairs. The American representatives will participate in the deliberations, but not in the actual decisions of the several conferences.

They will have no power to bind the United States to participation in or support of any specific course of action. The United States will commit itself only by legislation or treaty in dealing with foreign questions in which there is a direct or indirect American interest.

George Harvey, American Ambassador to Great Britain, will represent the President officially in the Supreme Council, which, however, is an unofficial body composed of the heads of

States for conference on general policies.

Roland W. Boyden, a Boston lawyer, will be an unofficial American representative without a vote in the Reparations Commission, a body created by the Versailles Treaty to assess the German indemnities.

Hugh C. Wallace, American Ambassador to France, and eventually his successor, Myron Herrick, will be an unofficial American observer without a vote in the Conference of Ambassadors, a formally constituted body which works out in detail policies adopted or proposed by the Supreme Council.

President Harding announced the decision of the Administration following the Cabinet meeting at which it was discussed and approved. Shortly afterward Secretary of State Hughes made public the invitation received from the allied Governments and the favorable reply thereto by the United States.

The invitation was conveyed in a message from Mr. Lloyd George, the British Prime Minister, which was received several days ago.

GERMANY STILL WITHOUT GOVERNMENT

No Decision on Reparations But Acceptance is Probable.

Berlin, May 8.—Germany to-day is still without a Government, and still undecided whether to accept or reject the allied demands. After three days of futile conferences and only four days of grace remaining before the further march of allied troops into the country, nothing but the utmost confusion prevails in all political parties.

Ambassador Mayer who was recalled from Paris so that President Ebert might tender him the offer of the chancellorship, has definitely declined the task of forming a cabinet. Dr. Gustav Stresemann, who is regarded as the representative of big industries, has forged to the foreground again, but the inability of Parliamentary parties to agree upon a course presents his forming a cabinet.

Party leaders, completely worn out by the day and night conferences of the past week are resting to-day. The endless string of meetings and conferences in the Reichstag failed to bring the leaders nearer to a decision regarding what action to take on the allied ultimatum. There was strong sentiment last night for rejection, but the opinion prevails that a decision to accept will be made at the eleventh hour.

Japan Will Return Shantung to China

Tientsin, May 8.—The correspondent is informed on high authority that Japan has decided to return the Province of Shantung to China immediately and unconditionally. This decision is due to a change in the Chinese policy.

Patent Meat Cooker

For cooking meats in large quantities an inventor has patented an oven in which an electric motor revolves a platform holding them alternately under and away from a gas burner.

LONDON ENTERTAINS JAPANESE PRINCE

Elaborate Entertainments to Mark Stay of Royal Guest.

London, May 8.—Elaborate entertainments in honor of Crown Prince Hirohito of Japan, who arrived at Spithead Saturday, and will remain in England until the end of the month, was held to-day aboard the Queen Elizabeth. All the ships of the British fleet were dressed for the occasion with the Japanese flag at its mast-head.

The battleship Katori, on which the Prince is traveling, will enter Portsmouth harbor to-morrow morning accompanied by her escort, the Kassima, and the Prince will be escorted ashore by the Prince of Wales to the accompaniment of a royal salute from the land and sea forces.

Visits will be paid by the Crown Prince to Windsor, Oxford and Cambridge and military, naval and air force centres.

Great interest is being taken in England in the visit for it is the first time the Crown Prince of Japan has left his own country.

Crown Prince Hirohito will be the guest for the first few days of the King at Buckingham Palace, but later will take up his residence in Chesterfield House, which has been placed at his disposal during the visit.

Mesopotamia a Series of Arab States

A despatch from London says:—The Daily Sketch on Friday morning says that Winston Churchill, the Colonial Minister, has decided to make Mesopotamia into a series of Arab states. This will secure new overland and aerial routes to India under British protection. Mesopotamia is also to become a great depot and training ground for the military and aviation service of the British Empire.

NEW PROBLEM IN POLISH FRONTIER

Three Allied Commissioners Struggle With Fresh Difficulty.

Paris, May 8.—No sooner has an accord been reached among the allies in London in the difficult matter of dealing with Germany than a new source of difference develops in Upper Silesia. Of the three allied high commissioners appointed to draw up the new frontier according to the results of the March 20 plebiscite, the French representative, Gen. Le Rond, supports the Polish contention that the whole industrial region should fall into the hands of the Poles, while the British Commissioner, Col. Percival, and the Italian General, De Marinis, report in favor of limiting the Polish portion to a much smaller and less valuable area. The Quai d'Orsay officially professes the hope that the result of the Council of Ambassadors instructions to the high commissioners to conduct a new examination of the boundary line will be the establishment of an accord.

London, May 8.—The Polish insurgents in Upper Silesia are fortifying their positions and organizing bridge-heads along the River Oder front, according to a despatch from Warsaw to the London Daily Express. After violent fighting and heavy losses on both sides the insurgents captured a strong German position at Kedzieszyn on the west bank of the Oder. On the upper Silesian front the insurgents are also using airplanes.

Disastrous Fire at St. Boniface

A despatch from St. Boniface, Que., says:—The picturesque little village of St. Boniface, St. Maurice County, is a scene of desolation as a result of a conflagration on Thursday afternoon, which all but wiped out the entire settlement.

The parish church, the Gerbeault Hotel, the Dugre Bakery, the Boucher store and four private residences were destroyed by the flames. The lighting and telephone systems were put out of commission, and the hamlet is in darkness, except for the smouldering ruins. The loss will exceed \$100,000. The presumption is that the fire, which originated in the church, was caused by one of the lighted tapers igniting the draperies at the altar.

Two Prominent Sinn Feiners Shot

A despatch from Dublin says:—Patrick Moloney, alleged to have been a prominent official in the "Republican Army," and Sean Duffy, a leading Sinn Feiner in Dublin, are reported officially to have been shot and killed in an affray with the police, nineteen of whom were sent to surround a suspected farm at Guthrum, Tipperary.

When approaching the farm the police were fired upon. They returned the fire and then pursued the fugitives half a mile, killing two of them. The police suffered no casualties.

Weekly Market Report

Toronto.
Manitoba wheat—No. 1 Northern, \$1.79½; No. 2 Northern, \$1.75½; No. 3 Northern, \$1.68½; No. 4 wheat, \$1.57½.
Manitoba oats—No. 2 CW, 41½; No. 3 CW, 37½; extra No. 1 feed, 37½; No. 1 feed, 35½; No. 2 feed, 33½.

Hay—No. 1, per ton, \$21 to \$23.
Straw—Car lots, per ton, \$12.
Cheese—New, large, 27 to 28c; twins, 28 to 29c; triplets, 29 to 30c; old, large, 33 to 34c; do, twins, 33½ to 34½; triplets, 34½ to 35c; New Still-ton, 32c.
Butter—Fresh dairy, choice, 33 to 35c; creamery prints, fresh, No. 1, 44 to 45c; cooking, 28c.
Churning cream—35c per lb., butter fat.
Margarine—27 to 29c.
Eggs—New laid, 33 to 34c; new laid, in cartons, 36 to 37c.
Beans—Canadian, hand-picked, bus., \$2.90 to \$3; primes, \$2.40 to \$2.50; Lima, Madagascar, 7 to 8c; California Lima, 10 to 12c.
Maple products—Syrup, per imp.

UPPER SILESIA IN HANDS OF POLES

Insurrection on Large Scale and Well Organized, Says Col. Cockrell.

A despatch from Oppeln, Silesia, says:—Eastern Upper Silesia is in the hands of the Polish insurgents, according to Col. Peppys Cockrell, the British commander from Beuthen, who has arrived here to take command of reinforcements that the inter-allied plebiscite commission is expected to finish.

Col. Cockrell informed the correspondent that the forces now at his command are entirely inadequate to handle the situation.

"The insurrection is on a large scale," he said, "and is well organized. It is not merely a peasant uprising. Many of the insurgents are evidently soldiers in civilian dress. They are well supplied with machine guns and military rifles."

Here in Oppeln, where the population is distinctly German, there has been no disturbance, all the trouble occurring in the district eastward where the uprising is beyond the control of the allied troops. The inter-allied commission knows only by hearsay of conditions in the eastern and southern districts, as many of the towns in those districts are surrounded by insurgents and means of communication are cut off. Railroad communication was maintained after a fashion until Wednesday night, when the main line was cut between this place and Beuthen. In order to reach Beuthen now one must go afoot part of the way, as the bridge at the west of the town has been blown up.

Adult Education.

Never in the history of this country has there been, on the part of adults, so great a desire for general education as at the present time, and this desire manifests itself in a very marked way among industrial workers. Of these there are, of course, many who seek technical and utilitarian training; but there are others who prefer education of the cultural type.

In England those workers whose preference is for education in the "humanities" organized themselves some years ago into the Workers' Educational Association and, with the co-operation of the Universities, have conducted evening classes in many varied subjects. In Toronto a similar W.E.A. has been in operation for three years in conjunction with the University of Toronto and seven classes (of which the largest was that in English literature) have been carried on during the past winter. Last November a W.E.A. was organized in Hamilton under the auspices of the Provincial University and another is in process of organization under the same auspices in Ottawa. So far as its finances and the size of its staff will permit, the Provincial University is anxious to promote this important and democratic branch of service.

The University of Toronto is the greatest asset the people of Ontario possess. It is rearing out to serve all classes of the community who may desire to make use of the advantage it offers.

AVOID DANGER IN CONVEYING RADIUM

Gift to Madame Curie to be Sealed in Special Room.

A despatch from Paris says:—Mme. Curie left Paris Wednesday morning for America, where she will receive a gramme of radium from her admirers. The famous scientist is accompanied by her daughters Eve and Irene, and Mrs. William Brown Meloney, editor of the Delineator. At Cherbourg Mme. Curie will take the Olympic for New York.

Owing to the danger of the radium losing its power, great care will be taken in getting the gramme given to Mme. Curie to Europe. The radium will be dissolved in a solution of bromide and water. The solution will be placed in twelve glass tubes, in turn placed in a box of platinum and lead, while this box will be deposited in a special room, into which no one will be allowed to penetrate. Mrs. Meloney, who accompanies Mme. Curie to America, is head of the committee of women which organized the movement to present the scientist with the precious substance.

C.P.R. to Use Former German Vessels

A despatch from Montreal says:—The Kaiserine Augusta Victoria will be renamed the Empress of Scotland and will be employed on the run between Quebec and Liverpool. The Prinz Freiderich Wilhelm will be rechristened the Empress of China and will be sent to the Pacific to augment the company's service between Vancouver, Yokohama and Hong Kong. G. M. Bosworth, chairman of the C.P.R. ocean service said on Thursday night that negotiations with the British Government, to whom the ex-German vessels were awarded by the reparations commission after the armistice had been in progress little more than a week. The reason for the purchase was the company's inability to obtain delivery of four new liners ordered in British yards in July, 1919.

SPORT SKIRTS

For Outdoor Season

à la Grâce

Corsets
and new Ready-to-Wear Lines a specialty.

Great as last year's Summer Skirt business was, the forthcoming season will witness an even greater demand. The variety of Sport Waists requires separate skirts to complete the costume. All Wool Plaids in blue, brown and tan combinations; in pleated or plain style. Specially priced, \$8.75 to \$11.75; \$3 less than city prices for exactly same things.

WONDERFUL SILK VALUES AT \$2.00 AND \$2.35

In most desirable qualities and rich new colorings. Prices all down easily 50 per cent. with quality greatly improved.

NEW JERSEY SILKS AT \$2.65
—For Dresses, Sport Waists or Skirts.

MORE STRAP SLIPPERS, \$4.50 TO \$6.90; JUST OPENED THIS WEEK

New toe, new heel; splendid quality; in black or nigger brown. All marked \$1.00 under value.

WHY TAKE CHANCES WHEN YOU CAN GET HOLEPROOF AND RADIUM HOSIERY of superior quality at same prices.

Fine chain stitch pure silk at \$2.35. Very special values in silk hose, rib top, at \$1.75, \$2.00 and \$2.25. Splendid values at \$1.00 and \$1.25.

THE MAN LOOKING FOR REAL VALUES AND NOT PAYING FOR FRILLS WILL APPRECIATE OUR CLOTHING VALUES

The good All-wool again, made up in serviceable way, smartly tailored. Regular \$45 and \$50 values at new lower prices, \$35 and \$37. Other good values at \$25 to \$35.

Wednesday Half-Holiday
Commencing Wednesday, May 18

J. N. CURRIE & CO.

McLaughlin

The new McLaughlin Master Six is the undisputed leader in the touring class. The new radiator and hood and the unique body design of this model give it a racy appearance that is extremely pleasing. The smart, graceful lines, the speed, power and quick acceleration make it the favorite family car.

Ladies who drive favor the touring model of Canada's Standard Car because of its beauty, ease of control, its comfort, dependability and extreme roominess. The driver of this McLaughlin is the discriminating motorist whose choice of a car is influenced by beauty and utility.

B.—Mae Blacklock, Jean Brand, Mildred Carson, Abe Haggith, Glen Waterworth, Kenneth Davidson, Doris Love.

The Transcript office sells blank counter check books. Handy for those not using large quantity.

APPIN

The annual meeting of the Ladies' Aid Society of the Appin Methodist church was held on Wednesday afternoon, May 4th, in the basement of the church. The different reports were most encouraging and showed the society to be in a very flourishing condition. The receipts for last year amounted to \$265. The following officers were re-elected: President, Mrs. John Macfie; vice-president, Mrs. Dan McDonald; secretary, Mrs. Wilfrid Laughton; chaplain, Mrs. Frank Pole; treasurer, Mrs. Dan Gairbairn; financial secretary, Mrs. Frank Nichols; pianist, Miss Helen Macfie. An interesting feature of the meeting was the presentation of certificates to Mrs. James Macfie, Mrs. Devlin, Mrs. Taylor and Mrs. Woolcocks, making them honorary members of the society for their years of faithful service. At the close of the meeting, tea was served by the officers.

Mr. and Mrs. McCulloch are away on a three months' vacation. Miss Florence Glasgow was in London recently for a surgical operation. Among the visitors to London last week were Mrs. Strode, Mrs. Richmond, Mrs. McCulloch, Nic, and Chas. Black. Miss Jeanette Lotan, nurse in training at Victoria Hospital, London, is spending her holidays at her home here.

MELBOURNE

The change from rainy days to the dry, bright, sunny days was welcomed by not only the farmers but many villagers. Seeding could not be continued owing to the wet weather, but the farmers are now busy on the land. Some are through seeding, while others are waiting for the fine weather will continue a few days longer. Some of the farmers in this district have found the land in which they intended putting the spring crop necessary a condition that it will be necessary to turn it into summer fallow. Many gardens that were ready for planting will have to be cultivated again before planting can be done, owing to the long wet spell. Some small planted seeds and early potatoes. The rains, however, helped the pasture, and crops are now looking fine. Since the weather has become warmer spring cleaning in the house, in the yard and on the street is the order of the day in this village. The painter and paper-hanger is kept so busy that some of the housewives felt they could not put it off any longer and decided to try the hand at painting, paper-hanging and graining. Front lawns have been cut, back yards cleaned up and rubbish burned. The streets have been improved by the road scraper, and those leading to the station have been repaired. Some fences have been removed entirely, and in other places new fences have been put up. Alex. Williamson has improved his property by enlarging his house, while George Lee has given the contract for a new house to be built on the lot he purchased during the winter. Robert Campbell has bought the house now occupied by Wilson Richards and the implement joining it from the 103rd Lodge here. Mr. Richards will move to Strathroy in the near future, where he has bought a house. Houses and even building lots seem to be very scarce in this village, although it is reported that there is a home here at the present time that money will buy.

Mothers' Day was observed here on Sunday last in the Sunday schools, the classes being taught by mothers, a mother presiding as superintendent, at the piano and in every department, making a very interesting and impressive service. The Empress Dramatic Club of London motored to this village last Wednesday evening and gave a splendid entertainment under the auspices of the Epworth League of the Methodist church. The play was entitled "An Obedient Mother," or "A Parable of a Mother's Love." Miss Metcalfe, reader, and A. Rossiter, bartone, and the Empress orchestra assisted and pleased the audience. After the concert the Melbourne Epworth League served supper to the London visitors.

The official board of the Methodist church met in the parsonage Monday evening to close the business of the past year and arrange for the coming year. Among the arrangements made was the question of better lighting. A committee was appointed to look after this matter. As the organist had handed in her resignation at the end of the year, arrangements had to be made to fill the position. The board refused to accept the resignation and appointed a representative to urge the organist to return for the next year. The pastor, Rev. Dr. Brown, was invited to return another year. At the close of the business meeting the officials went to the church where the members of the congregation from Sutherland appointment were having a social time with the congregation of Melbourne church. The ladies had tables well loaded with good things. A banquet followed, W. G. Robinson presiding as toastmaster. He proposed a toast to the King all responding by singing the national anthem.

Dr. Brown proposed a toast to the official board, speaking in the very highest terms of the members. This was responded to by the treasurer, Earl Beattie, his report showing that nearly \$1,600 had been raised for the general fund and the minister's salary. All expenses were paid, leaving a snug sum in the treasury. Arthur Staples also responded, as did Frank Sutherland, treasurer at Sutherland's. Miss Snell proposed a toast to the W. M. S. Mission Band and Circle, which was responded to by Mrs. E. Richards, Mrs. Hutton and Mrs. Theaker. The report showed that the Melbourne W. M. S. had raised \$252 during the year and the church gave over \$350 to missions. Miss Pate referred to the splendid work done by the Young People's Bible Class—the money raised, flowers presented to the sick, and the adoption of a little girl in a neighboring city whom they are clothing and providing for. A toast to the choir was proposed by E. Richards and responded to by Miss Mather and Mr.

Hardy; to the Ladies' Aid by Mr. Wilcox, Mrs. A. Carruthers and Mrs. Harrison replying. Wm. Lewis sang a solo, "Is He Yours," which was very appropriate and well rendered. The gathering closed by the singing of the Doxology and prayer by the pastor.

SHETLAND

Mrs. Alex. McIntyre of Wardsville spent a week at Fred Jeffrey's. Mr. and Mrs. Robert Gray spent a few days in Oshawa. Miss Jean Archer spent Sunday at her home in Shelburne. Miss Ila Bolton and Charlie spent Sunday in Petrolia. Mr. and Mrs. Douglas Dobbyn spent Sunday with Mrs. Dobbyn's parents. Mr. and Mrs. Henry Showers spent Sunday in Wyoming.

PARKDALE

Mrs. A. Bramer is visiting her son, P. C. Roy Bramer, London. Mr. and Mrs. Fred Haggitt and children motored to Inwood and spent Sunday with her parents, Mr. and Mrs. Kelly. Mr. and Mrs. Thompson and Miss Edith motored to Strathroy on Tuesday of last week to see the former's sister, who is seriously ill. Mr. and Mrs. C. Blain and Mr. and Mrs. Fisher and children spent Sunday at Kelley. Mrs. D. Patterson went to Strathroy last week to attend the funeral of her niece. Mr. and Mrs. John Robinson spent Sunday with their daughter, Mrs. Thomas Haggitt.

Blacksmithing!

I am stocking and equipping my shop as fast as possible to handle all kinds of

REPAIRING
Wagon, Carriages, Farm Implements, Harness, or anything of iron. Specialize on welding Mower-Knives.

NOTICE TO CREDITORS

IN THE MATTER of the Estate of Sarah McCullum, Late of the Village of Glencoe, in the County of Middlesex, Widow, Deceased.

Notice is hereby given, pursuant to "The Revised Statutes of Ontario, 1914, Chapter 121, Section 56," that all creditors and others having claims against the estate of the said Sarah McCullum, who died on or about the twenty-eighth day of March, A. D. 1921, are required to send by post prepaid or to deliver to the undersigned, solicitors for Duncan Patterson McPhail and Irene Davey, executors of the last will and testament of the said Sarah McCullum, deceased, their names and addresses and full particulars in writing of their claims and statements of their accounts and the nature of the securities, if any, held by them. And take notice that after the 9th day of June, A. D. 1921, the said Duncan Patterson McPhail and Irene Davey will proceed to distribute the assets of the said deceased among the persons entitled thereto, having regard only to the claims of which they shall then have had notice, and that the said Duncan Patterson McPhail and Irene Davey will not be liable for the said assets or any part thereof to any person of whose claim they shall not then have received notice.

ELLIOTT & MOSS,

Solicitors for the said Executors. Dated at Glencoe this 10th day of May, A. D. 1921.

A REAL ART SPECIAL!

Soldiers of Fortune

BY RICHARD HARDING DAVIS

Something Different—Red-blooded Adventure!
 A Thrilling Book—A Gripping Picture!

If you want to forget home cares and business worries, come to see "Soldiers of Fortune" at this theatre. Thrills? Nothing but—Love interest? Say! Fearless riders and dauntless miners! American engineers and Central American brigands! Revolutionary chiefs! Beautiful maidens—in distress! Rescues, raids and love-making! Something moving all the time exactly as Richard Harding Davis imagined it, and as the screen alone can PICTURE it.

Note—Owing to the size of production the feature will be shown once only, starting at 8.30.

Special Prices. Adults 35c, Children 25c

SIX ROOF COSTS

WHEN you require a roof, the measurement will be in squares (100 square feet). A basis for analysis of the costs of Brantford Asphalt Slates is given below:

- INITIAL COSTS OF MATERIALS—Brantford Asphalt Slates are sometimes higher in initial cost for the material.
- NAILS REQUIRED—Brantford Asphalt Slates require ONLY 484 nails to lay a square. Brantford Asphalt Slab Slates require ONLY 450 nails.
- COST OF LAYING—Brantford Asphalt Slab Slates are four on one strip—require only one operation in handling, one operation in spacing—individual slates are 8 x 12 1/2 inches—cut easily, fit easily, fit on angles and bend over round surfaces. You save 30 to 50 per cent. in laying.
- NO PAINT OR STAIN REQUIRED—The surface of Brantford Asphalt Slates is in nature's permanent colors, green and red, unchangeable, always attractive, requiring no stain to produce artistic effects, no liquid costs to make them fire-resistant.
- SAVING OF INSURANCE—Brantford Asphalt Slates are classed as non-combustible by fire insurance companies—a direct saving of from 10 to 20 per cent. on premiums is effected. In certain localities fire regulations demand asbestos paper under some roof materials, but Brantford Asphalt Slates are fire-resistant and are immune from special regulations.
- COST OF REPAIRS—From the day they are laid Brantford Asphalt Slates show almost 100 per cent. of the original roof untouched. Brantford Asphalt Slates do not curl, split, crack or rot. Complete protection and permanent protection are built into Brantford Asphalt Slate Roofs.

Compare these roof costs with those of any other roofing material; it is your money you are spending and you want value for it—then buy

Brantford Asphalt Slates

KNAPPALE

Something is going its rounds in this district—call it coryza, rhinitis or just old-fashioned cold. During the past week we have witnessed the return of a number of our feathered visitors. Swallows, wrens, bob-links, canaries and orioles are with us again.

A few from here attended the anniversary services held in the Presbyterian church, Alvinston, on Sunday.

Sorry to report Jacob Handy ill at present.

Mrs. Chas. Oiler of Walkers visited at Wm. June's last week.

Fred Johnson and family spent Sunday at Mrs. Allan McLean's.

Dan McNaughton and family visited at Richard Coad's, Pat's Corners,

on Sunday last. The school children were quite busy last week soliciting subscriptions towards the Canadian Farm. One or more subscriptions meant a pencil-box to the lucky canvasser, while eight subscriptions brought a picture of the Prince of Wales to the school.

Operations for oil have been commenced on the farm of Ward Lettich by the West Williams Oil & Gas Co. John Best has the contract for putting down the hole.

Reliable druggists from coast to coast sell Templeton's Rheumatic Capsules and RAZ-MAH for Asthma. If troubled, H. I. Johnston, your home town druggist, will supply you.

See you saw it in The Transcript.

Born
 McGEACHIE—An Ridgebottom, Ont. Monday, May 9, 1921, to Mr. and Mrs. Mac. McGeachie, a daughter—Alice Mae.

TOWN AND VICINITY

Glencoe's silent policemen are on the job again.

U. S. S. No. 17, Mosa, has been successful in winning the Strathcona prize for physical exercises.

Glencoe stores will observe the Wednesday half-holiday as usual during the summer months, commencing on the 15th inst.

At the commencement exercises of Ingersoll Collegiate Institute Earl McDonald of Glencoe secured the first prize of \$10 for oratory.

Hugh Cameron Bayne, son of John G. Bayne, Newbury, passed the recent examinations in the senior year at the Royal College of Dental Surgeons at Toronto.

The many friends of Thomas Ma-whinney, Ekfrid, who has been undergoing treatment at the hospital in London, will be glad to know that his condition is improving.

A. J. Wright is representing St. John's church as delegate at the Synod of Huron in London this week. Rev. Mr. Charlton, rector, and Messrs. Moss and Hagerty, wardens, are also in attendance.

Isaac Watersworth was in London last week attending a meeting of live stock breeders, shippers and salesmen, called for the purpose of making an effort to secure better railway service and freight rates.

Lorne Lodge No. 282, A. F. & A. M. will attend divine service in St. John's church, Glencoe, on Sunday afternoon, May 22nd, at 3 o'clock. The service will be conducted by Rev. T. J. Charlton. Members of the Order will meet at the lodge room at 2.30 and march to the church. The public is cordially invited to attend this special service.

Believing that the London Presbytery has become too unwieldy to do effective work several members in Elgin county have proposed to divide the Presbytery into two sections, one of which would have St. Thomas as its headquarters. It is understood that this suggestion will be considered at the May meeting, which is to be held next Tuesday.

Sunday last was observed as Mothers' Day in the Presbyterian and Methodist churches here with appropriate services. In the Presbyterian church the singing in the morning was led by a ladies' choir. In the Methodist church the choir was composed entirely of young men, and a solo was given by Lee Diggon. Mothers' Day was also observed in the Methodist Sunday school.

The young ladies of the town have organized a basketball team and are after the scalp of the high school team. The first game was played on Tuesday evening and the H. S. girls still have their tresses. The town team will have to work much harder than they did if they want to win the next game. The following are the names of those who took part: Town—Lorna Luckham, Muriel Precious, Jean McLachlan, Nellie Farrell, Florence Westcott, Mayne Grant, Elizabeth Grant, High school—Heleen McCutcheon, Mary Beattie, Catharine Stuart, Kathleen McNabb, Jessie Currie, Jean McEachern, Louise Garbutt.

The Presbyterian Y.P.G. held its last meeting for the season on Monday evening, when the social committee had charge. The following program was rendered: Piano duet, Misses Marion Copeland and Frances Sutherland; violin trio, Hazel McAlpine, Eleanor Sutherland and Cecil McAlpine; solo, Margaret Dickson; violin solo, George Grant; solo, Mac McAlpine; piano solo, Irene Reith; solo, Stanley Humphries. The meetings held by the Guild have been very successful and interesting, as well as instructive. It is hoped when the Guild commences again that the young people will take as much interest as shown in the past.

A meeting of the Gore Farmers' Club will be held in the school-house, S. S. No. 5, Ekfrid, on Monday evening, May 16, at which all presidents and secretaries of the different clubs of Mosa and Ekfrid will be present on special business in connection with the U. F. O.

RHEUMATISM FOR OVER 16 YEARS

No Return Of The Trouble Since Taking "Fruit-a-lives"

103 CHURCH ST., MONTREAL.
 "I was a great sufferer from Rheumatism for over 16 years. I consulted specialists; took medicine; used lotions; but nothing did me good. Then I began to use 'Fruit-a-lives', and in 15 days the pain was easier and the Rheumatism much better. Gradually, 'Fruit-a-lives' overcame my Rheumatism; and now, for five years, I have had no return of the trouble. I cordially recommend this fruit medicine to all sufferers."
 P. H. Mc HUGG.
 500 a box, \$ for \$2.50, trial size 25c.
 At all dealers or sent postpaid by Fruit-a-lives Limited, Ottawa.

For sale—house and lot, with barn, corner King and McKellar streets; plenty of hard and soft water; immediate possession.—Mrs. Mary Small.

Service that Lengthens Battery Life

PREST-O-LITE Storage Battery Service is founded on know when, know why, know how. It was developed to its present standard of helpful efficiency out of the oldest service to motorists in America.

As a pioneer and leader, Prest-O-Lite Service has maintained leadership through daring innovations. Instance the Initial Test for new cars.

If you have just received your new car, drive it to any Prest-O-Lite Service Station. They will test your battery and, if necessary, replace the "pep" lost while the car was in transit or in the showroom.

Prest-O-Lite Service Stations render an advanced service which, if taken advantage of, will greatly lengthen any battery's life. Make it a habit to call twice monthly this summer for testing and distilled water—a service we render willingly. If your battery needs repairs or recharging, both our work and prices will prove satisfactory.

Prest-O-Lite Storage Battery

If your battery needs replacement, there is a powerful, long-lived Prest-O-Lite of just the correct type and capacity for your car

MARTIN-SENOUR 100% PURE PAINT & VARNISHES

MARBLE-ITE

The Hard-Drying, Long-Wearing Floor Finish

"100% PURE" PAINT
 The paint for wear and weather.

SENOUR'S FLOOR PAINT
 It wears and wears and wears.

"VARNOLEUM"
 beautifies and preserves Oil Cloth and Linoleum.

"WOOD-LAC" STAIN
 Improves the new—renews the old.

"NEU-TONE"
 The sanitary, washable Flat Oil Paint for Interior Decoration.

Nothing adds so much to the beauty of a home as floors that are properly cared for; on the other hand, floors that are not protected are unpleasant to look at, are hard to keep clean, and become injured through wear. Don't neglect your floors, beautify them and save them. Save the surface and you save all.

MARBLE-ITE Floor Finish is the perfect treatment for floors of all kinds. It is the one floor finish that has a money-back guarantee attached to every can.

In 24 hours MARBLE-ITE dries hard with a beautiful finish that will not show heel marks. It has a high gloss, yet is tough enough to stand any amount of wear without injury. It can be washed with soap and water and it will not mar nor scratch white.

We invite you to call and discuss this method of beautifying and protecting your floors. We can give you full details regarding this or any other painting or varnishing problem. We have a complete stock of MARTIN-SENOUR Paints and Varnishes. For every purpose—For every surface.

CASHMERE

Mr. and Mrs. Bert Webster and children and Mr. and Mrs. Asa Webster of Dutton spent Sunday with the former's parents, Mr. and Mrs. Robert Webster.

John Reid is visiting with Mr. and Mrs. W. Marcus of Orford.

We are sorry to learn that Mrs. Arthur Tunks is confined to bed and under the doctor's care.

Mr. and Mrs. Allen Sittler of Bothwell spent Sunday with their daughter, Mrs. Earle Tunks.

Mrs. B. F. Jeffery of Newbury spent Sunday with her daughter, Mrs. Calvin Sittler.

The Willing Workers' Mission Circle met at the home of Mrs. Earle Tunks on Saturday last. They sang election of officers for the coming year and some new members joined.

Lunch was served and a short time spent socially. Tickets are out for the quilt that the girls have made and will be drawn at the lawn social at Wed. Darke's on June 15th.

The W. M. S. and Ladies' Aid will meet at the church on Tuesday at 2.30 p. m.

Arthur Day was observed at this school on Friday, May 6. The school yard was nicely cleaned up and the children spent the afternoon hunting flowers.

Sunday last was Mothers' Day and the pastor, Rev. Dr. Husser, gave an interesting sermon on "Honor thy mother." The choir was composed of mothers and rendered some fine anthems. Mrs. Earle Tunks sang very sweetly. "That's what God made mothers for."

It Testifies for itself.—Dr. Thomas' Electric Oil needs no testimonial of its powers other than itself. Whoever tries it for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, will know that the medicine proves itself and needs no guarantee. This shows why this Oil is in general use.

The White Grub in Eastern Canada—Methods of Control.

The Dominion Entomologist reports that from information gathered, particularly by Mr. H. P. Hudson of the Entomological Laboratory, Stratford, Ont., it is expected that injury by the white grub will be effected this year in Eastern Canada. This important insect has been receiving much attention during recent years. The complete life cycle of the insect requires from three to four years. In association with studies on the life-history of the common kinds of white grubs, these observations have been made on the crop rotations followed on farms where the grubs have been decidedly injurious, and also on farms where little or no injury has occurred. As the insect spends the greater part of its life in the soil, where it is not possible to treat the pest, it has been found that almost complete control can be obtained by following a short crop rotation in which small root crops or a mixture of the same shall not occupy the land for more than two years, and preferably not more than one. In infested fields where grubs are present measuring from one-half to one inch in length the following crop rotation has been found to give almost complete control:—

First year: plant the infested field to oats and seed to clover.

Second year: clover hay crop. Plow under the clover sod in the spring of the third year, and plant the land to corn or potatoes.

Fourth year: plant the land to oats and re-seed to clover.

From the above rotation it is seen that the hay crop only occupies the land the year and that with every four years two crops of clover are grown. This plan, besides giving practical control, will maintain the land in a high state of fertility. Similar procedure should be followed in breaking up an old pasture, except that the sod should be fall plowed and worked as frequently as possible.

If grubs are allowed a free run of badly infested pasture land, they will root out many of the grubs and materially help to control the pest. Domestic poultry feed readily on white grubs, and should be encouraged to follow the plow as much as possible. Black birds, crows and other birds, as well as skunks, also feed on the grubs.

Best Feeding Rations for Young Chickens.

As a preliminary step in the study of the nutrition of poultry the Central Experimental Farm at Ottawa made a test with twelve pens of forty-two young chicks last year. These birds were fed for a five-week period, during which time the weekly gain in weight was carefully noted. The annual report of the Farms for that year states that the basal ration in this experiment consisted of finely ground corn, wheat and oats and finely ground bran, shorts and cornmeal. Pen No. 1 received the basal ration only, the rations in the other pens being supplemented by one or more feeds, e.g., greens, eggs, meat, and milk. Pen No. 1, the poorest, lost 31 birds and the survivors made an average gain of only 1.67 ounces. Pen No. 9, fed meat, eggs and greens in addition to the basal ration, suffered the lowest mortality, namely, 4 birds, or 10 per cent., and gained 5.26 ounces per bird; while in Pen No. 11, which had a ration similar to No. 9 but had milk to drink, the mortality was 7 birds, but the gain of 5.87 per cent. was the highest per average. The relative value of these four feeds can be well shown by a comparison of the results when they were fed singly in addition to the basal ration. Pens 2, 3, 4, and

fore installing the milker are now giving more milk than they did when I milked them by hand.

It used to take an hour and a half to milk ten cows, whereas I now milk fourteen in about one hour. I have not had a case of teat or udder trouble since putting in the milker. The milker is easy to clean and keep sanitary. Its upkeep has been nothing, with the exception of a few rubber teat-cup liners, which expense is not worth mentioning. I follow the operating instructions to the letter and find that it pays.

Nine months' experience with mechanical milking has made me such a saving that I believe I am safe in saying that a good milking machine will actually pay for itself in a year. And if I had to go back to the old method of hand milking, I feel pretty sure that dairying would soon lose its attractiveness to me.

To forget wrong is the best revenge.

Look out for squalls when the clothesline breaks.

The calendar should contain a month of Will as well as a month of May.

There was once a man who had to drive down a stake to tell where he left off weeding the onion row. However, after he got a farm of his own, that sort of thing came to an end.

Here's Father's Chance to Do Mother a Mighty Good Turn

By F. W. Ives

It was raining. The mud was deep and the roads badly cut up. So, when the top of the ridge was reached, the radiator of my car had boiled dry. A dim light through the misty dusk showed a farmhouse. I walked up to the door, where my knock was answered by a bent old woman who gave me two pails and said: "You will find the path to the spring around in back."

Now, that path wound down into a ravine about 80 feet below the house. The spring was fully 100 yards from the back door. When the top was reached, I was in about the same condition as the car—wet, muddy and hot. I was also filled with wonder as to why it was necessary to carry so much water up hill when so much was falling on the roofs of the buildings.

The old woman said she had lived there fifty years, that she had made at least three trips to the spring each day, that she always took two buckets, and that on washdays more trips were made.

The spring offered opportunity for a hydraulic ram and a plentiful supply of water. Likewise, there was the barn with a driveway on a knoll, a little higher than the ceiling of the house. What a fine place for a cistern! Plenty of water from the roof to more than supply all the needs with no pumping.

When I reached home that evening, some calculations showed the following facts: In carrying the water from the spring, this woman had walked a distance equal to that from Montreal to Vancouver and return, or one-fourth the distance around the world. In doing this, she had ascended and descended a mountain 150 times as high as the highest in the world. She had carried 1,100 tons of water all this distance.

All this vast amount of work was useless. A small expenditure of money would have put water in the house with work on the part of the housewife. With average rainfall, 93 tons of water could have been stored in a cistern from the roof of the barn, in the course of a year, or four times as much as the woman had carried up the hill. The spring was large enough for a water ram to force over 400 tons of water to the kitchen in one year. At the time this incident occurred, a ram, complete with fittings, and a kitchen sink, might have been installed at a cost of \$61 for materials. A cistern might have been constructed in the approach to the barn, and connected with a sink, for a total cost, including labor, of less than \$200.

Of course, \$200 is quite an expense. But does a farmer hesitate to purchase a binder costing \$200? The average farm uses a binder about six working days each year. The average binder lasts about six or seven seasons with our careless ways. This cistern, if built right, would last fifty years. The water will be used 365 days every year.

You say, "The binder is necessary in order to save labor." Very well, I say, "Why should not the housewife save labor as well?" When a young man is courting, he seldom asks "her" if she is willing to carry 1,100 tons of water to a mountain 150 miles high for him.

There are many ways of getting water into the kitchen that do not cost \$200. Some cost more.

A Sink is Necessary. In all the methods given in the following discussion, a kitchen sink is included. A kitchen sink must have a drain to take away waste where it will not contaminate the surroundings or water supply. The sink with a drain just long enough to stick through the side of the house and not a hole in the bottom that drains into an ancient candy pail a sink. It is just as bad to have to carry water out as to have to carry it in. All of the methods given have been in use on various farms long enough to tell their good and bad points. Most of them may be seen in any community.

The cheapest and simplest method of securing a kitchen water supply is that of placing a rain-water barrel on brackets under the eaves at a height that will allow the water to flow from a tap into the sink. The total cost of such an installation need not exceed \$5. A kerosene barrel, a short length of one-half-inch pipe fitted to the barrel with lock nuts and gaskets, an ordinary bibb or faucet, and a few pieces of scantling may constitute the materials.

To double the capacity, use two barrels, connecting them with a piece of pipe at the bottom. A screen over the top will exclude dirt and leaves, and prevent the breeding of mosquitoes. The objection to this scheme is that it works only when the rains come at fairly regular intervals. It is also useless in winter. But it is good while it works, and is far better than carrying all the water.

The pitcher pump at one end of the sink has the virtue of getting water into the house without carrying, although it does take a little effort to work the handle.

The pitcher pump is of the suction type, hence water may be drawn vertically, only about 22 feet or less. Neither will it work satisfactorily if the cistern or well is located more than 50 feet horizontally from the pump. The above limitations are due

to the force of gravity and the friction of the water passing through the pipe. The cost of installing a pitcher pump complete should not exceed \$15 in addition to the cost of the sink.

The Gravity Tank. Another successful scheme is to mount a tank just above the sink. This tank, with a capacity of from 30 to 50 gallons, is pumped full by the men in the morning, and will hold enough for ordinary household purposes for one day. A force pump is usually necessary for this sort of work. On one farm the pumping is done by a windmill each morning as the stock tank is being filled, there being a three-way valve installed at the pump. When turned in one direction, the water fills the house tank, and when turned the other direction the water goes to the stock tank. This is merely a modification of the gravity tank as sometimes placed in the attic. Its good feature is that of being inexpensive. It has the disadvantage of taking up valuable space in a small kitchen; also, if the water is used for drinking, it will get quite warm before the day is over. An insulating jacket will help to keep the water cool.

The gravity tank has many applications. It may be located on a tower, in the attic or upper storey of the house or an outbuilding, on a hill, in the bank approach to the barn, or on any other convenient elevation within a reasonable distance of both the supply and the house. The gravity tank may be filled in numerous ways, depending on local conditions. I have seen these tanks filled by force pump, by hydraulic ram, from a spring located on a hill above the tank, from the roof of the barn or house, and from a flowing well. The possibility of a gravity system should be carefully considered before installing an expensive mechanical water-supply outfit.

Where it is possible, the gravity system may not be the cheapest in first cost, but if the water is obtained by gravity or by hydraulic ram the cost of operation is very small.

Nor must the windmill be overlooked. Because the wind does not blow every day, many have abandoned the wind power in favor of gasoline or kerosene. With the prices of these fuels constantly rising higher, the cheap wind power must be seriously considered. The secret of a satisfactory water supply from wind-driven pumps lies in the gravity tank of a capacity large enough to tide over the calm days. Improved windmills, with ball or roller bearings, large oil reservoirs, and scientifically designed vanes and blades take advantage of the lightest breezes.

Gravity tanks of all kinds are susceptible to trouble. Freezing in winter is likely to burst the tank, especially if the water is not very ornamental, and a tank in a building or built into a bank is likely to be more satisfactory. The attic tank should always be set in a metal pan provided with a drain. Leaks, condensation, or breaks from freezing will then be taken care of automatically. All tanks should be provided with an overflow a size larger than the inlet pipe.

The amount of water that may be collected from a roof will depend upon the annual rainfall, the size of the roof, and the ability of the spouting and gutters to handle the maximum fall.

Calculating Cistern's Capacity. The mean annual rainfall in Ontario, for example, is very close to 35 inches. Of this, it is reasonable to expect that 25 inches may be conducted into a cistern. The loss of 10 inches comes through small show-ers, the bare water is obtained from moisture absorbed by the roofing material, from evaporation, snow blown from the roof, and overflow of gutters in heavy showers.

To find the amount of water that may be collected from a given roof in Ontario, we would first measure the ground area of the structure. This area multiplied by the total rainfall will give the volume of water. Thus, a building 30x40 feet has an area of 1,200 square feet. Multiply this by the equivalent of 25 inches, or 2 feet, and we find a volume of 2,400 cubic feet, or 20,000 gallons. Now, if we are using water constantly, it will not be necessary to make the cistern to hold the full amount. An 8,000-gallon cistern will hold the water from one season to another. Ontario.

The easier water is obtained, the more it will be used, and that is exactly what we wish to lead to. In the average family where the water is carried, the daily consumption may be as low as two gallons for each person. With an unlimited supply, this quantity will be as high as 60 to 80 gallons. This water will be used for more frequent bathing, for better nursery work, cooking, washing, and toilet purposes. It will be safe to compute the size of cistern or daily water supply, as the case may be, on a basis of 40 gallons each day for

The Welfare of the Home

The Favorite Child—By Frances A. Gray

It was the one unmarried member of our little group who quite innocently started the discussion. Something had been said about Bertense and her children and Grace remarked, "Isn't little Jack, Bertense's favorite child?"

The Sentimental Mother was shocked. "My dear," she exclaimed reproachfully, "no mother worthy of the name loves one child more than another! It's impossible for a mother to have a favorite among her children."

But the Practical Mother, as usual, brushed aside mere superficialities. "Nonsense!" she retorted, "it is impossible that any woman who has more than one or two children should not have a favorite, even if she never admits the fact to herself. Within one family the children will often differ very widely in natural disposition, temperament and every possible trait. If a mother has several children it is almost certain that there will be one among them who is naturally more congenial to her than the others." She paused, and then added with her surprising frankness, for she is one who openly admits what other people are apt to conceal and deny even to themselves, "Now my little girl is too much like me for us to get along harmoniously. She is quick and high-strung, too, and frankly, she often gets on my nerves. But little Frank is exactly like his father—very calm and placid and easy-going, and I'm really much more fond of him."

There is something undeniably true in the point of view of the Practical Mother. It is possible that in one of her children a mother may find a more congenial and responsive nature than in any of the others. But the question is not whether it is natural for her to feel such a preference, but whether she is justified in letting it affect her attitude toward her children so that the fact becomes noticeable to other people and even to the children themselves.

In large families, we frequently see each grown person or two children in the family. Where the roofs are not large enough to supply the needs of the family, the following scheme has been used: A basin about 40 feet square was made in the top of a rise above the level of the tank. The basin was paved with concrete reinforced with fencing, and sloped to a central drain provided with a trap to prevent entrance of trash. The water was conducted through a filter to the tank located farther down the slope, and from there was piped to the house. This supply nets about 30,000 gallons each year. The land upon which it was built was practically valueless for any other purpose.

The hydraulic ram is a possibility where there is a flow of three gallons or more per minute. A watch with a second hand, a vessel of known capacity, and a small dam to flow the water into the vessel are all that are needed to determine the flow. There must also be an opportunity to get a fall of three feet or more below the spring for the operation of the ram. Roughly speaking, the ram will elevate the water about ten times as high as the available working head or fall, and will pump about one-seventh of the water furnished it. The hydraulic ram is not a perpetual-motion machine, but it is a faithful servant. I have known a ram that operated for ten years without stopping, except when the spring failed in an extremely dry season.

Of the mechanically driven water supply systems there are many. A great degree of perfection has been reached by a considerable number of these systems.

A Special School for Farm Boys and Girls. The Agricultural School at Kennebec, Ontario, which concluded in April the first term of the regular course, is the outcome of an effort of the provincial department of agriculture to provide suitable educational equipment for young farmers in the eastern part of the province. The cost of the undertaking is being defrayed entirely from the Dominion grant to the province under the Agricultural Instruction Act. The regular two-year course has been planned along practical lines, and is calculated to make better farmers of those who take advantage of it. Twenty-five farm boys constituted the first student class.

In addition to the regular course, an extensive course of three weeks was put on during the winter months, which was attended by seventy-three boys. It is the intention another year to add courses for girls in domestic science.

The school has ample land for farming purposes attached to it, and the farm is not only proving to be a valuable object lesson, but is being made a centre from which good seed and good live stock is being distributed.

parents who give a certain prestige and power to the eldest, permitting him to dictate to the whole family. Even more frequently we see parents, but especially mothers, who favor the youngest child, granting him greater consideration though expecting less from him than from the others; in short, putting him all through her lifetime. "Middle children" are seldom the recipients of extra favors unless in the case of an only girl or an only boy in a family of the opposite sex. I recall one little incident of a stepfather of one girl and five boys which I thought quite touching. He had a beautiful book which they all wanted very much but which they refused to own together. Naturally, he was uncertain to whom he should give the book, but finally, handing it to the third boy, he said, "I'm sorry I haven't a book for each one of you, but I think I'll give this to you, Harry. You aren't the oldest and you aren't the youngest and you aren't the only girl, so you don't get many extras." Then, patting him on the shoulder, he added with a smile, "Besides, I was a middle child myself."

Parents should watch very carefully to avoid partiality, for if they do not, the moment is sure to come when the children will discover it. As soon as any such partiality becomes evident, the favored child is apt to become "spoiled," and the seeds of that ugly quality of jealousy are sown in his sisters and brothers.

A child's nature should be allowed to unfold in the sunny atmosphere of love and trust. By studying his needs, parents can help to bring out the best in him, thus forestalling that selfishness and lack of sympathy which we regret to see between parents and those adult children whose attitude toward life is embittered because, when they were young and affectionate, they were subjected to the chilling effect of the consciousness that a little sister or brother always stood first in their parent's affections.

It is believed that from this centre was distributed, during the past year, more pure seed than from any other government institution in Canada. During the year the school held two sales of purebred stock, a plowing match, and several field days for junior farmers. Furthermore, the institution is developing as a real community centre. These activities taken together indicate that the school's influence will do much to benefit farming in Eastern Ontario.

Teaching a Calf to Drink. A calf that is weaned from its mother should be kept without food for at least twelve hours, at the end of which time it will be hungry and will usually drink milk from a pail much more readily than when not hungry. Warm, fresh milk from the mother should be put into a clean pail and held near the floor, in front of the calf, which will generally start to nose about the pail.

Place one or two fingers in the calf's mouth, and draw the hand down to suck the milk. The calf will then get a taste of the milk and often starts to drink without further trouble. If not, the process must be repeated.

But sometimes the calf refuses, and force must be resorted to. The feeder, facing the same direction as the calf, straddles its neck and backs the calf into a corner. The pail of milk should be held in one hand and the nose of the calf should be grasped with the other. Place two fingers in the calf's mouth. The calf's nose is then forced into the milk.

At sixty-two. Just sixty-two? Then trim thy light And get thy Jewels all reset, 'Tis past meridian, but still bright, And lacks some hours of sunset yet. At sixty-two Be strong and true, Scour off thy rust and shine anew.

'Tis yet high day, thy staff resume, And fight fresh battles for the truth; For who is age but youth's full bloom, A ripper more transcendent youth. A wedge of gold Is never old; Streams broader grow as downward rolled.

At sixty-two life is begun, At seventy-three begin to care more; Fly swiftly as you near the sun, And brighter shine at eighty-one. At ninety-five Wait on your arive, Still wait on God, and work and thrive.

Keep thy locks wet with morning dew, And freely let thy graces flow; For life well spent is ever new, And years anciently younger grow. So work away, Be young for aye, From sunset breaking unto day.

Things Divine. These are the things I hold divine, A trusting child's hand laid in mine, Rich brown earth and wind-tossed trees, The taste of grapes and the drone of bees, Lilacs blooming, a drowsy noon, The flight of geese and an autumn moon, The dappled fawn in the forest bush, Simple words and the song of a thrush, A waiting fire when the twilight ends, A gallant heart and the voice of friends.

The cock of the walk is finally cooked in the pot, He alone is rich who makes a proper use of his riches, A good joke must have a good point, but it should never be aimed at any one in particular, Writing poetry is a good means of live hood, if you have something else to keep alive on.

Promises of the New Generation

"Mrs. Scott promised to furnish sandwiches for the Parish tea this afternoon. It's time to commence serving and she hasn't sent them; they say she's gone motoring with friends—what shall we do?"

I hurried across the street to make sandwiches of what available material I could find in the house, and I reflected upon Matilda Scott and her kind. What, after all, was the reason that not only she but many other women could not be depended upon to keep promises and carry their legitimate share of responsibility? As I looked out of the window the answer came.

Sally Brown was passing with her mother. Her shrill entreaty reached my ears.

"Mamma, let me have another candy!"

"No, Sally, you promised you'd not ask for another when I let you have the last one."

"Just one more, please, Mamma!"

"No."

"Just one more, I'll not ask for another one, I promise."

"Well—just one more, then."

"Goody! One—or two."

How easily Sally slid out of that promise!

It seemed a trivial thing, perhaps, and yet such small promises and their keeping form the foundation for conscientious girlhood and boyhood, womanhood and manhood. If children are to possess a sense of responsibility they must be capable of responding to obligations, they must be trustworthy; and there is but one beginning offered for the development of these qualities, namely, the everyday occurrences in the life of the little child. It is a matter for eternal vigilance.

My mind slipped back to a call upon a young neighbor. It had not been a satisfactory call, due to the constant and unnecessary interruptions of the little daughter of the family.

"Sarah," her distressed mother pleaded, "you promised not to interrupt when Mother had friends."

"Yes, but Mother, just get it for me this time."

"No, I must not be disturbed."

Sarah swung on her mother's chair, buzzed in her ear.

"Sarah!"

"Mother, just this time!"

"Very well, just this time. Excuse me a moment, Mrs. — while I get it for her."

Then I recall a supper party where the hostess excused herself at least six times during the meal to ascend to the nursery in answer to the demands of her small son; explaining, "He promised he wouldn't call, but I think he must want something."

Wearily I spread the last sandwich and prepared to go back to the Parish tea. Matilda Scott was probably spinning along country roads and saying complacently, "I promised to furnish sandwiches for the Parish tea this afternoon, but when this delightful invitation came I never gave it another thought." And twelve to one her friend nodded without a shade of disapproval.

Perfect galvanizing. Big wires. Full size rolls. A mechanically hinged joint. Backed by 21 years of quality fence building.

The Dairy

Dairymen buy milking machines for one of three reasons, or for all three reasons. First, because they realize a milker will save them labor if they do the milking themselves, or labor hire if they have many hands. Second, the milking machine saves time. Third, a first-class milking machine milks the same way every day, and the treatment which the cows receive is not dependent upon the whim or humor of a hired man. The three motives, in short, are time saved, labor saved, and the good effect on cows, or increased milk production.

In my particular case, all three of these items were duly considered, and I made up my mind that it would be economy for me to buy a milking machine that would accomplish for me those three things. At that time I was milking only ten cows, but with the intention of increasing my herd, which I have since done.

I bought one of the best milkers and do not hesitate in saying it is everything the manufacturers said it would be. I have been using it twice a day now for the past nine months, and it has always given me complete satisfaction. The cows really seem to like it, and while I have not kept records, and have added new cows to my herd from time to time, I am firmly convinced that the cows I had be-

fore installing the milker are now giving more milk than they did when I milked them by hand.

BEAUTIFYING THE HOME GROUNDS

Considering the cost of seeds and shrubs, there is no investment that pays better dividends than a small purchase for home improvement. Too many farm homes are lacking in this respect, and it is a good business proposition to improve the home surroundings.

The first step should consist of dividing the grounds around the house from the commercial end of the farm by a hedge of shrubs. Japanese Barberry, Privet, English or Bush Honey-suckle are ideal in forming a division between the home grounds and the remainder of the farm.

Shrubs are used to advantage to take away the effect of the square corners of the house and soften its outlines. In selecting shrubs choose those which have some landscape value at all seasons of the year. Such shrubs as the Spring and the many varieties of Spiraea are splendid for home planting.

The lawn is a very important feature of home improvement. Good lawn seed should be used abundantly before a rain in the early spring, and even if the lawn appears fairly thrifty, it will be improved by a small purchase of seed. A little fresh seed applied annually to an old lawn will do a great deal toward keeping it in good condition.

Mowing should begin as soon as the grass is high enough for one inch clippings. A lawn should not be raked after mowing, as the fine clippings falling around the roots of the grass form a fine mulch which keeps out the hot sun and conserves moisture. When the grass is allowed to grow too long, raking is necessary, and this means extra work and also an injury to the grass.

A nice lawn is not improved by being broken up by flower beds, regardless of the beauty of the flowers they contain. Flowers should not be planted in the middle of the lawn, but in the corners or to one side. Flowers in the corners of the yard brighten up the darker background of the shrubs. The old-fashioned flowers, the kinds found in "grandmother's garden," have a beauty all their own. Purchase seeds only from a reliable seedsmen, and select well-known varieties rather than experiment with novelties.

When making plans for improving the grounds, draw a good-sized sketch of the house with outlines of the yard. Then the shrubs and flower beds can be placed in the desired location on the sketch and seeds and plants ordered in the necessary quantities.

Often the soil around the house is packed down hard; before planting the shrubs, some of this soil should be removed and replaced with rich mellow garden soil and manure, which will insure the plant a supply of nourishment until the roots are sufficiently developed to seek their own food. Old shrubs need a good manuring every year to enable them to do their best, but they are hardy, and it is surprising how much they will stand after becoming thoroughly established.

A Call of Spring.
The frolicsome waves caress the golden sand;
The gentle zephyr whispers to the tree;
The brilliant sunshine smiles upon the land—
What mean these wondrous signs to you and me?
From robin's throat a note of silver drip;
The filmy cloudlets nirt with sea and sky.
The dew begetles the larkspur's lovely lips—
All Nature heeds the spring's most gladsome cry.

Each little bud that opens upon the bush;
Each blade of grass which peeps from out the sod;
All things a prey to springtime's onward rush
Reveal the goodness and the love of God.
Whence come these gifts, these beauties many, rare?
The Hand that fashions them is ready ever
To show the way that blossoms bright and fair—
Where spring in happy hearts may reign forever.

She Was.
Mistress (indignantly)—Jane, what did you mean by wearing my new evening dress at the dance last night? Really, you ought to have been ashamed of yourself!
Jane (meekly)—"I was, ma'am; you never heard—such remarks as they made."
Talk is cheap—unless a lawyer is handing it out.

Thibet, Nepal, Abyssinia, parts of Arabia, and Afghanistan are still closed to the British and Foreign Bible Society.
Would that some charitable soul after losing a great deal of time among the false books and slighting upon a few true ones, which made him happy and wise, would name those which have been bridges or ships to carry him safely over dark morasses and barren oceans, into the heart of sacred cities, into palaces and temples—Emerson.

A SPRING TONIC FOR WEAK PEOPLE

Dr. Williams' Pink Pills Act On the Blood and Nerves.

Food is as important to the sick person as medicine, more so in many cases. A badly chosen diet may retard recovery. In health the natural appetite is the best guide to follow; in sickness the appetite is often fickle and depraved.
Proper food and a good tonic will keep most people in good health. Dr. Williams' Pink Pills are a fine tonic medicine, harmless and certain in their action, which is to build up the blood and restore vitality to the run-down system. For growing girls who are thin and pale, for pale, tired women, and for old people who fall in strength, Dr. Williams' Pink Pills are an ideal tonic. Thousands have testified to the benefit derived from the use of this medicine. Among them is Mrs. William Gallie, Hantsport, N.S., who says: "Before I began the use of Dr. Williams' Pink Pills I was so weak and run down that I could hardly do my own work. I often suffered from headaches and was very nervous. I then began the use of Dr. Williams' Pink Pills and I can truthfully say I have found them the best medicine I have ever taken. You may depend upon it I will advise other sufferers to take these pills."
You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Trophies of 1870 Returned to France.

As a balm to French patriotism Germany has finally decided to turn over a train load of military trophies captured from France in the war of 1870, says a Paris despatch. Included among them are numerous cannon and rifles and even the first machine gun models. The train bearing these trophies has arrived at Mayence. They will be displayed for the troops of occupation there and then brought to Paris for an exposition at the Invalides.
The French Ministry of War has not yet been informed whether the French campaign banners which the Germans are compelled under the terms of the Treaty of Versailles to surrender, but some of which were reported to have been destroyed at the outbreak of the war and the remainder in the anti-French demonstrations in Berlin last year, are in the shipment.

Minard's Liniment for Dandruff.

Surnames and Their Origin

HAWKINS
Variations—Hawkes, Hawkinson, Hawes, Hawson.
Racial Origin—English.
Source—A given name.

They don't look much like Henry, those family names; but that is the given name from which they have grown.
The only variation of the given name of Henry which is frequently found today is "Harry." In the Middle Ages there were many prominent among which were "Hal" and "Haw." This last seems to have been due to a peculiar twist of the Norman tongue, which tended to substitute a "u" or a "w" for an "l." It was the same tendency which changed the word "healme" into "heume" and gave us the family name of "Homer," though later the English speech reverted to the "h" and brought the word back to "helm" again. It is the same tendency which changed the whole character of the French language a few centuries ago.
From this variation "Haw" of Henry, there developed in turn a diminutive form of the name "Hawkin." This "kin" ending is an Anglo-Saxon element, which has its counterpart in the modern German diminutive ending "chen."
Then came "Hawkinson," at first a purely descriptive addition to the names of many sons whose fathers were named "Hawkin," but later to become hereditary and a true family name. Hawkins and Hawkes are further shortened forms, and Hawes comes from Hawson.

A STOREHOUSE OF ENGLISH WORDS

66 YEARS TO COMPILE A DICTIONARY.

Monumental Work of Philological Society Contained in Ten Huge Volumes.

As long ago as 1857 the Philological Society (philology is the science of language) decided to begin the work of compiling a great dictionary which should contain every word in any language, says an English newspaper.
A week or two ago the last word of the New English Dictionary was written. Nine huge volumes have already been published; the tenth and last will be on sale in 1923.
Sixty-six years will have passed between the first approval of the giant scheme and its completion. And what has been done in this time? More than twelve thousand pages, each of which measures about twelve inches by nine, densely covered with small print—these are the results of the labors of those who worked upon the dictionary.

Half a million words are catalogued and explained in it; and the ways in which they are used are shown by means of two million quotations from English writers of all ages.
A Murderer's Valuable Help.
The idea originated with Archbishop Trench, a writer of popular books on the fascinating study of words. As soon as the Philological Society had decided to adopt it, a committee was formed to begin the gigantic collection.
Voluntary helpers in all parts of the world were asked to assist; and from them came in a ceaseless stream of words and illustrative quotations. One of the most valuable of these voluntary helpers was Dr. Minor, the murderer, who for twenty-five years was an inmate of Broadmoor Criminal Lunatic Asylum.
In 1875 the compilers possessed no fewer than three and a half million slips of paper, each containing a passage to show how one particular word was used.
Think for a moment of the labor involved in sorting these slips and in selecting the quotations. If one man had been employed upon the work his task would have occupied him for more than twenty years, working eight hours a day. It took ten years to get the first volume ready for the press.
When Dr. Johnson's Dictionary, which is still in use, appeared in 1773,

it was regarded as a phenomenal work. But the New English Dictionary contains more than ten times as many pages as his, and there are a great many more words on each of its pages.
Take words beginning with A and B. Dr. Johnson disposed of them in 127 pages; the late Sir James Murray, the first editor of the New English Dictionary, required 1,240 pages to deal with them—not an excessive allowance, considering that he collected 31,254 of them!

The Last Word—Zyxt.
Sir James Murray gave up his whole life to the work; for thirty-seven years he labored on his task. Unhappily he did not live to see it completed for he died six years ago.
And what a task it was! Think of the problems that had to be decided. There were several spellings of this word. Which was the correct one? There were two or even three ways of pronouncing the next; the right way was to be decided upon. Was the word one slang, or could it be called good English?
Every word had to be examined carefully; its derivation must be found, and if it had changed its meaning, a history of it must be written illustrated by quotations from many writers.

The story of the compiling of the New English Dictionary is one of the most romantic in the history of writing. The last word—"zyxt," old Kentish for "thou seest"—has just been added to its vast collection; but the compilers cannot lay down their pens. They must begin at once upon the supplement. In the years that have elapsed since the first volume appeared, hundreds of new words beginning with A and B have come into the language, and all must be recorded and explained. When the supplement is finished another must be begun.

AUTO REPAIR PARTS
For most makes and models of cars. Your old broken or worn-out parts replaced. Write or write us describing what you want. We carry the largest and most complete stock in Canada of slightly used or new parts and automobile equipment. We ship anywhere in Canada. Write to: Shaw's Auto Salvage Parts Supply, 222-231 Dundas St. Toronto, Ont.

Beating the Potato Bug.
The Potato Magazine, published in the United States, calls attention to the fact that certain regions of the upper peninsula of Michigan have been virtually freed of that notorious pest, the potato bug, by the operations of a tiny parasitic fly which lays its eggs upon the striped beetle. Grubs hatched from these eggs bore into the potato bug's body and eat out his inside works.
If it were not for parasites that prey upon the potato bug, it would scarce be possible to grow any potatoes in this country, despite all the farmer could do to poison the insect with paris green.
That destructive beetle was originally native to mountain districts of Colorado, where it fed on a wild variety of potato plant called the "sand bur." It is supposed to have been carried into Missouri by the cattle traffic, and in 1864 it crossed the Mississippi River. In the early seventies it had crossed the Detroit River and Lake Erie was literally alive with potato bugs, passengers on ships or whatever long parasitic enemies of the beetle multiplied in such numbers as to make possible its control.
The above-mentioned fly, which has done such good work in Michigan, will be colonized in other parts of the country, and may solve the potato bug problem for good and all.

Unemployment in Great Britain.
Unemployment in the British Isles is rapidly reaching the 2,000,000 mark, according to Government figures published for the week ending April 22. The report shows a total of 1,774,000 on the unemployment registers, which is an increase of 750,000 since the present industrial crisis began. During the coal strike the figures have been rising weekly to an alarming extent. London and the southeastern district lead with a total of 316,000, which is an increase of 14,000 in two weeks. The northwestern district comes next with 265,000, while in the West Midlands there are 239,000 unemployed. In Scotland there are 179,000, Ireland 117,000 and Wales 100,000.
In the London County Council area there are 192,000 unemployed registered, exclusive of short time workers. The figures include 53,000 women.

Wonderful Timekeepers.
As far back as 300 B.C. the Egyptians used a clock which was worked by water. The passing of water through various pipes moved a cog-wheel with a hand attached, and this hand indicated the different hours of the day while the wheel performed its revolutions.
Hour glasses, or sand glasses, were invented about 330 A.D. They were made of two bulbs of glass with an intervening neck. Dry sand placed in the upper bulb ran through the neck into the lower bulb in exactly one hour.
Clocks worked by weights were in use in 1125, but watches were not invented until 1500.

Changed His Mind.
Jack—"Then you didn't ask for her hand?"
Tom—"No, when I went to interview her father he was busy with the furnace. He called out to me to come down, and after watching his struggles for half an hour and hearing what he said about coal, I decided not to get married."

Storms of the Film.
Maybe when you have seen on the screen the deck of a ship during a storm at sea you have wondered just how it is done.
Anyone who stops to think has realized, of course, that it is not possible to take such a scene on a real ship during a genuine storm, for reasons of light amongst other things.
Concluding, therefore, that it is all done in the studio, you probably imagine a ship's deck built on huge rockers with the players staggering all over the place while the whole set pitches and tosses.
But it doesn't. Only as much as necessary is built. It is kept wet with a hosepipe. The waves dashing over the sides come out of buckets, and the rocking takes place only in the camera.
With an attachment between the camera and the tripod, the motion of a ship at sea can be imparted to a stationary "set" merely by the cameraman's assistant turning a handle.
Never shrink from doing anything which your business calls you to do. The man who is above his business may one day find his business above him.—Drew.

Inventors of Trifles Have Won Fortunes
There may be more money in a trifling invention than in a big one. All about us are new ideas just waiting to be grabbed, if we could only see them.
Consider the familiar mousetrap. It is a simple yet ingenious device, familiar to every household. Mr. Mouse pokes his head through a round hole to get at a scrap of cheese that smells inviting; his first nibble releases a trigger, and he is garroted. That little contrivance was the invention of a New England Yankee, Anthony G. Davis, of Watertown, Conn., who patented it in 1859. He made a large fortune by it.
Grandall, of "building block" fame, was engaged in the manufacture of croquet sets. It was half a century ago, when croquet was a popular outdoor sport. He hit upon the notion of economizing cost by putting the boxes together with wooden teeth that would fit into corresponding openings along each opposite edge. Thus their parts could be assembled easily, without nails or glue.
It so chanced that at this very time Crandall's small daughter was sick with measles. To amuse her he showed her some pieces of his croquet boxes, and she found such delight in putting them together that he was persuaded to adopt the idea for a new kind of building blocks.
Crandall was a born inventor. It was he who originated the "pigs in clover" puzzle, which became so great a rage. Unfortunately, he was so far

NOT A HOOT.
"No, your honor, he didn't give a hoot whether I saw him coming or not."
"How do you know he didn't give a hoot?"
"Well, he didn't blow his horn."
Saying Grace.
The minister had said grace, and the four-year-old daughter of the hostess look up and said:
"That's not the kind of grace my papa says."
"No?" asked the minister, sweetly.
"And what kind of grace does your papa say?"
"Why," said the child, "he came home last night, and when he sat down at the table he just said 'Good heavens! What a supper!'"
Spilling the Beans.
Tommy—"May I stay up a little longer?"
Ethel—"What do you want to stay up for?"
Tommy—"I want to see you and Mr. Green playing cards."
Mr. Green—"But we are not going to play cards, sonny."
Tommy—"Oh, yes, you are; for I heard mamma saying to Ethel that everything depended on the way in which she played her cards to-night."
From Personal Experience.
Little Freddy was using his fists on little Helen.
"Freddy, stop!" commanded his mother. "Don't you know that gentlemen never strikes a lady?"
Instantly Helen stopped crying. "They do, too," she contradicted.
"Why, Helen," said mother, "when did you ever see a gentleman strike a lady?"
With an air of convincing proof the little maid quickly replied: "Daddy spansks me."
Shut Him Up.
Scottish humor—recently remarked Sir Harry Lauder—is generally dry and crisp, but I as told a story over in the United States which I think will beat many Scottish ones. A stranger arrived at a far West village, and during his first walk up the one street he encountered a young man leaning against the door of a saloon, lazily chewing gum.
"Pretty quiet place this," said the stranger.
"There's a quieter over there," replied the villager, still busy with his gum and jerking his thumb in the direction of the cemetery.
"Have you lived here all your life?" asked the visitor, hoping to carry on the conversation.
"Not yet," came the dry reply.
After that the stranger gave up.

His Hearing Restored.
The invisible ear drum invented by A. O. Leonard, which is a miniature magaphone, fitting inside the ear entirely out of sight, is restoring the hearing of hundreds of people in New York City. Mr. Leonard invented this drum to relieve himself of deafness and head noises, and it does this so successfully that no one could tell he is a deaf man. It is effective when deafness is caused by catarrh or by perforated, or wholly destroyed natural drums. A request for information to A. O. Leonard, Suite 437, 70 Fifth Avenue, New York City, will be given a prompt reply. advt

MOTOR CYCLES.
SPLENDID COLLECTION OF USED
Motor Cycles, mostly Indian. Prices from \$125.00 upwards. State where you expect to invest and we will mail list. H. M. Kipp Co. Limited, 447 Yonge St., Toronto.

Typewriters for the Blind.
An ingenious typewriter for the use of the blind has been invented by Natalo Rovedo, a young Milanese artisan. Its method is modelled on the ordinary but obsolete German portable printer Mignon, only a zinc plate is introduced containing forty-two spaces within each of which is set in relief one of the characters of the Braille alphabet.
The operator places the index finger of the left hand in the finger guide, which moves over this zinc plate, and, having found the required sign, strikes the stamping lever with his right hand. The chief merits claimed for the machine are its economy and ease. After two days' practice the inventor's sightless comrades learned to write sixty-five letters a minute.

MONEY ORDERS.
When ordering goods by mail send a Dominion Express Money Order.
Prince Henry to Enter Army.
Prince Henry, the third son of the King and Queen, who attained his majority on March 31, is destined for a military career. Although trust somewhat in the background by his older brothers, the Prince of Wales and the Duke of York, Prince Henry is immensely popular with the public.
In stature he excels his brothers and is fond of sports and outdoor life. In pursuance of his inclination to be a soldier, he went through the army class at Eton and afterward studied at Sandhurst, the English West Point. Last August the Prince was gazetted a second lieutenant of the King's Royal Rifles and at present is attached to the Thirteenth Hussars at Aldershot.

A broken heart is a physiological possibility; excess of emotion, especially joy, may rupture that organ.

WARDSVILLE

Mrs. Jim Thomas and son Earl motored to Strathroy on Thursday. F. A. Gourley, Mrs. Thomas' brother-in-law, returned with them and spent a few days with friends and relatives in the village, returning Saturday to his home in Adrian, Mich.

Mrs. Wm. Blott had the misfortune to slip and fall on the floor of a shoe store in Glencoe and fracture one of her hips. She was taken to St. Joseph's Hospital, London, where an x-ray examination showed that the bone was broken in the socket. She has returned home and is doing very nicely.

Mr. and Mrs. Jim Thomas and son Earl and Jim Brown motored to London Tuesday.

A social evening under the auspices of the Women's Missionary Society was held Friday evening in the Methodist church. A short program was rendered, consisting of a solo by Dr. Husser and a talk by Mrs. Leonard of Glencoe, who is a returned missionary. Lunch was served and a pleasant time enjoyed.

A concert will be held in the town hall on Wednesday, May 11th, under the auspices of the Women's Institute, by Mrs. Howell.

The Newbury A. Y. P. A. were entertained at the rectory, Wardsville, by Rev. Mr. and Mrs. Murphy on Friday. A large number were present and enjoyed a most pleasant evening. Music was furnished by Joseph Creighton on the violin, accompanied by Miss Maud Murphy at the piano, and a boys' chorus. A conundrum supper brought to a close a most enjoyable evening.

Jim Brown motored to London on Saturday.

Mr. and Mrs. Lawrence Harvey and family have moved to the farm recently owned and occupied by Wm. Holloway. James McIntyre and family will occupy Mr. Harvey's residence.

Wardsville is improving its appearance. New sidewalks have been laid in front of the residence of Geo. Faulds and from the garage past the feed store of Thos. Weer. Others are to be laid as soon as possible. Bert Miller is constructing a new garage on the lot next to the town hall. Bob Yates' store is also nearing completion.

Ford Murphy expects to open his ice cream parlor some time this week.

At the annual meeting of the Ladies' Aid, held in the Methodist church, the election of officers resulted as follows:—President, Mrs. Wilson Turk; vice-president, Mrs. Linden; recording secretary, Mrs. J. V. Faulds; treasurer, Mrs. G. Cornelle; auditors, Mrs. King and Mrs. Faulds.

The Friend of All Sufferers.—Dr. Thomas' Electric Oil is a valuable remedy to all those who suffer pain. It holds out hope to everyone and realizes it by stilling suffering everywhere. It is a liniment that has the blessing of half a continent. It is on sale everywhere and can be found wherever enquired for.

NEWBURY

J. J. Whittaker and wife and Miss Donna Stephenson of Windsor were in town Saturday.

Mrs. Porter, who spent the winter in Highgate, is visiting her sister, Mrs. R. J. Patch.

Robert J. Stocking motored from Chatham Sunday, bringing friends with him.

Mrs. James Brown is visiting Toronto friends.

E. C. Squires spent the week-end at his home in Wyoming.

The Church of England are making plans for their annual garden party to be held June 22nd.

Mrs. McIntyre has returned home after spending some weeks with Mrs. Thomas Hall, Shields.

Miss Jessie Gray of Detroit and Andrew Gray of London spent the week-end at their home here.

O. Prangley, wife and daughter Myrtle motored to London Saturday.

While returning Sunday evening from spending the day at Cootsworth Mr. and Mrs. Elmer Connelly and son Percy met with what might have been a very serious accident. They were meeting a car burning strong lights which made it hard to see a narrow culvert, and the big car holding the road caused Elmer's car to turn over in the ditch. It was necessary to lift the car to free Mrs. Connelly's arm which was pinned under the car. Percy's knee and face were hurt and Elmer's hand was cut. Fortunately no bones were broken and although badly shaken up they were able to come home.

Dragged Down by Asthma. The man or woman who is continually subject to asthma is unfitted for his or her life's work. Strength departs and energy is taken away until life becomes a dreary existence. And yet this is needless. Dr. J. D. Kellogg's Asthma Remedy has brought a great change to many sufferers. It relieves the restricted air tubes and guards against future trouble. Try it.

WOODGREEN

Mrs. James Moore and baby Jean spent a few days with relatives in Glencoe.

Mrs. Ferris of Nebraska and Mrs. Carr of Vernon, B. C., are spending a few days with Mrs. Andrew Clannahan.

Miss Margaret Waterworth is ill with chickenpox.

A number from here attended the address given by Mrs. Leonard in the Wardsville Methodist church Friday night.

School was closed a few days this week as there are several cases of pink-eye.

A large number attended Sunday school on Mothers' Day. As Mrs. Murphy was unable to come, Rev. Mr. Murphy came and gave an address. A number of the boys sang "Stand Up for Jesus." At the close Mr. Murphy was presented with a vase of flowers by Misses Ethel Harvey and Helen Eddie.

SERIES 21 SPECIAL SIX
Five-Door, 50-horsepower, 119-inch wheelbase
\$2450 f. o. b. Walkerville

THE SERIES 21 SPECIAL-SIX is the most wonderful car on the market today. Its tremendous popularity is due to its performance in owners' hands — and the unequalled value which it represents. "Buy it because it's a Studebaker."

"Built-in-Canada."

WM. McCALLUM
Dealer - Glencoe

NORTH EKFRID

The U. F. O. social in the school house last Friday night was a grand success. After the program lunch and coffee were served and the remainder of the evening was spent in dancing. Music was furnished by the Laughton-Walker orchestra.

The Ladies' Missionary Society will meet at Mrs. Will Down's Thursday afternoon of this week.

The roads here are in excellent condition owing to the scraping and work put on them.

Mr. and Mrs. John Davis motored to London last Friday.

Oliver Down is somewhat better.

Mr. Plank's sale was well attended and good prices were realized all around.

We are glad to learn that George Chisholm is steadily improving after a long illness.

Mrs. Ben Patterson has gone to Windsor to visit her sister.

Mrs. F. Graham spent the week-end in Drumbo.

Gathering morrels is the rage here at present.

Sunday was observed here in the Presbyterian church as "Mothers' Day." Rev. Mr. Carry gave a splendid address. The choir was composed of married ladies, one of whom was over 70 years of age. There was a large congregation.

Paring a corn is both risky and ineffective. It is much better to use Holloway's Corn Remover and eradicate them entirely.

CAIRO

Mrs. Mary Smith of Aberfeldy visited at the home of D. M. Smith on Sunday.

Mrs. D. M. Smith is visiting her son, M. D. of Aberfeldy, in the absence of Mrs. M. D. Smith, who is in Bothwell waiting upon her father, who is seriously ill.

David Gage of Newbury is visiting his son, Osborne Gage, at Rextford, Annet of St. Thomas spent Sunday at his home.

Mr. and Mrs. Fred Burr, accompanied by Richard Burr, visited Chatham on Friday.

The large congregation which assembled to hear Rev. J. M. Bell on Sunday were delighted with his discourse. It being a "Mothers' Day" sermon he selected his text from Prov. 31, verse 25. Another pleasing feature of the service was a solo entitled "Mother's Prayer," which was sung very sweetly by Mrs. Bell. The choir sang appropriate selections and Mrs. Kribbs of Bothwell presided at the organ.
