Were the clerks to furnish The World with any proof they have of managers and officials speculating and jobbing in stocks—and there must be be plenty of it—what would the managers say? The chief offender in the business has continued his operations in a desultory manner and he puts on an air of bravado, makes light of the matter and professes to despise public opinion.

They lived together as man and wife for some twelve years, until the parish priest, hearing of the fact that Burgess had been godfather to Mrs. Gagnon's child, took upon himself to declare that there was "spiritual affinity," and that, under the rule of the council of Trent, the marriage was null and void. The parties were, therefore, ordered to live apart, and Burgess then declared that if he was not married he had no idea of marrying Mrs. Gagnon, but would take unto himself a younger wife.

The clergy have done what they can to set the marriage and professes to despise public opinion. and professes to despise public opinion. It is chiefly due to certain managers and officials, and very few of these gentlemen have clean hands. In the face of this it would be but common propriety and honesty for most of them to commence a reformation by dismissing themselves; but what do they do? They have been taking those under them to task for speculating, whether suspected of it or not, and giving them to understand that if they don't sell out, or if they go into the business they will be dismissed and, as you say, the officials of one hash them to make an example of one or more of the limits, he asked the committee to recommend to council the assumption of the same, allowing of course a fair compensation. Sometime ago he was insured for \$15,000, but he gradually increased the amount up to \$50,000, divided among several companies. He left a will. It gave a small amount to his mother, the balance to his wife, and several bequests to servants, and \$1000 to the Church of the Ascension for an organ. A codocil, however, provided that instead of his wife getting the bulk of the money it settled for the main part of it going equally between his wife and his mother.

The insurance men cannot understand it, though they have investigated the circumstances of Mr. Freeman's death and the manner of finding his body, and with perhaps one exception they have decided to pay over the claims, as they say there is no evidence of suicide.

Lord Carlingford adhered to his former opinion that such inquiries do no good, but did not oppose it. night-workers was directed to a phenomeon that appeared in the heavens at about 4.15. A streak of blood red, and well defined, became visible at that hour in the northern heavens, being situated about 45 degrees above the horizon and a few throughout the whole length. When first seen it stood stark still and then suddenly shot across to the eastward, where it made a sudden halt. Standing still again for a few minutes it made another bolt and disappeared from view beyond the eastern horizon. At first it was very luminous, the light resembling somewhat the red calcum light used for theatrical effect, but afterwards it became less so, and finally its brilliancy diminished till it presented the appearance of a comet. It was visible altogether about 20 minutes. Those who witnessed the spectacle say they never saw anything like it before, and it was curiously watched during all the time it could be seen. Policeman Wismer claims to have seen it first, and he continued to view the wonder with such attention that it seemed as if he would only be too delighted if some such thing would make its appearance every night to relieve the monotous of nocturnal gendarmery. Report says that Wiggins has already connected the phenomenon with his great storm of the 9th inst., of which it is the precursor and terrible forewarner.

The storeme court at Ottawa is at present cagaged in hearing the argument in the case of Reed v. The Attorney General for the province of Quebec, in which the celebrated ten cent stamp tax on all documents filed in court is in question. Mr. McLaren, Q.C., contends that the tax imposed by the local statute 44 and 44 Vic., cap. 9, is illegal, while Mr. Lacoste, Q. C., for the crown, appears in support of the

WEDNESDAY MORNING, MARCH 7, 1883.

In the next few days, if for no longer, may expect to be deluged with distribes on annexation. Our big grit contemporary has dared to say if certain things happen odious comparisons may be drawn between the liberty enjoyed by the neighbouring states and our own provinces. If confedera tion is not strong enough to stand a little the smothering of our genuine thoughts and impressions, if it requires the strong, stern hand of a despot to hold it together, the soener it goes the better.

But confederation is strong enough to last if meddling political fools will give it a show. There is no discontent of a grievous nature at present. Yet what the Globe says is true. If Sir John does continue in his endeavours to centralise control at Ottawa, there will be trouble in the different provinces. If, on the other hand, he really wishes to play the part of a patriot and not that of a seeker after place and power for himself and friends, instead of assuming the matters he will define the strict powers of do the same, our library will be very cheap the local governments, cause to be amended ly furnished. It seems to us Mr. Hallam the British America act where it needs amending, and extend to all the provinces the greatest liberty in matters of self-con

WAO PAYS THE DUTY?

There are some practical men in England who give an answer to this question very different from the one given by free traders. The New York Tribune is now publishing a series of letters on "Industrial England, written by Mr. Robert P. Porter, a member one of his letters describing Bradford, the principal seat of the worsted manufacture, he thus quotes Mr. S. C. Lister, a great silk spool manufacturer :

"Ah," said he, "it is the foreign tariff that have played the mischief with us here. It is well enough to attribute it to this, that, and the other, you know, but the foreign tariffs are at the bottom of it. We English have been guilty of great mistakes. We tariffs are at the bottom of it. We English have been guilty of great mistakes. We didn't know when we had a good thing. In 1852, at the great exhibition, we played the part of the crow in Esop's fables to you Yankee foxes. What a beautiful bird, you exclaimed, and the oily tongued Frenchman echoed it. What would we not give to hear you sing, for a bird with such plumage must have an exquisite voice! And thus flattered we began to sing and out dropped the meat. Then the Yankee and the Frenchman ran off with our machinery and our man ran off with our machinery and our ideas, clapped on a tariff, and soon settled our business."

Another Bradford manufacturer, whose name Mr. Porter does not give, but who, he says, is of equal eminence with Mr.

Lister, said:

The truth is, the higher the foreign tariff the lower we must make our goods and the less we can afford to pay labor. The least possible reduction in the United States tariff will be a grand thing for Bradford, but how it will affect your industries I can hardly say. We are obliged to sell our goods in France for the same price as we did before they enacted their higher tariff, and the Bradford manufacturer is paying that duty, not the French consumers of the goods. I know from practical experience what I am talking about, and I often tell my friends, the professors, if they would only come here to Bradford and stay for twelve months and look into the practical working of their pet theories, they might working of their pet theories, they might modify them somewhat. England can no longer control the markets of the world, nor can she convert the world to free trade. Some still cling to the hope that this will be done, but the sooner they get rid of these false notions the better, in my opinion.

Trade problems can only be adjusted in a shealth a sovereignt a constant of patriotism, take into account the circumstance that the Canadian provinces lie alongside of American states which possess absolute sovereignts are also like the convergence of the conve sense, practical way.

On this point practical men and the professors of political economy are at variance. We back the former against the latter for knowing best who pays the duty. The truth of the matter appears to be that the duty is sometimes paid by the consumer, sometimes by the producer, and sometimes in part by both. Were we to put a duty on tea, or coffee, or raw cotton, articles which we cannot produce, we would undoubtedly pay every cent of it ourselves. It is different, however, with articles which we manufacture largely ourselves, and which, at the same time, are partly supplied to us from the United States. In order to sell organs, pianes, forks, hoes, spades, and many other articles to Canadian customers. American makers are now compelled to sell to us at lower prices than those charged in or, in other words, to meet corruption with their own home market. And this they actually do, as every Canadian importer buying from them knows. It is something to following sentences in its leading editorial with the objection that it is vain to endeave sions as those chronicled by Mr. Porter.

Just who is inspiring the propo-ed legislation at Ottawa affecting the private bunks it is hard to say, but it is hinted that the it. Ex-Senator Ecclesene, of New York, is bloodthirsty. He declares the only way to liberate Ireland is by creating a war between England and the United States. To bring a conflict about he suggests that Irishmen be put into all the high places in the republic. He also proposes to make troubles in Canada the casus belli. The Rev. Dr. Gallaher is scarcely a whit behind the exsenator. He says the only way to free Ireland is by the sword. These gentleme evidently forget the three thousand miles of sea between them and their object, The United States might after a hard fight gobit would then be as far off its objective point as when it started

It was very unkind of the police magis trate to say, as he is reported to have done n adjourning a lottery trial, that he had no objection to postponing the case even for a month if it were necessary, so that Mr. Fenton might by that time really be able to prove that there was such a newspaper as the Mail, and that it was published in Toronto by the Mail Printing company.

that at five polls the Hon, J. L. Beaudry received respectively 1, 2, 3, 4, and 4 votes English speaking electors in the whole city who did not vote. It appears the battle is not over yet, but is to be fought to the bitter end in the courts. Mr. Beaudry is alleged to have taken a returning officer away in his sleigh from his duty in one booth, and repeaters and bogus votes are said to have been extraordinarily numerous

This is really kind. Sir John Macdonald has promised to furnish the Toronto free library with sessional papers, statutes, etc. If every one of our numerous governments, both provincial and municipal, will kindly went to Ottawa to ask fer bread and has got something like a stone.

It was to be expected that in prosec ting the lottery cases Mr. Fenton would meet with considerable opposition, but he had no reason to expect such obstacles would be placed in his way as have been, He has undertaken a disagreeable and onerous task, but, as it is in the inter ests of law, order, and the social well-being of the community, he deserves the encour-

mined not to be caught over-importing.

The Pennsylvania senate has determined to do its best to prevent the further extension of the telegraph monopoly. It has unanimously passed a bill escheating to the state the property of any telegraph company which shall consolidate with competing lines. We commend the idea to the Dominion parliament, with the additional proposition that it be made to include the property of railway companies.

Treason! Whose the traitor? The Globe. It dared to say: "The Dominion government would, if it were actuated by a spark of patriotism, take into account the circumabsolute sovereignty over local affairs. To lessen in the smallest particular the provincial sovereignty is to invite undesirable other day over at old man Jones' and we comparisons with the American states." Perhaps somelsody can see treason in such sentences, but we cannot. When, however, we notice nine whole headlines devoted to them, we are disposed to think there must be some dark and sinister meaning between the words that cannot be fathomed by the ordinary mind. Comprising only eight and a half lines in themselves, we wonder how many reams of paper and bottles of ink they will take, on the one side, to explain away, and, on the other, in inditing the most grievous charges, tak-

corruption. If that is not the case perhaps their organ will explain the meaning of the motive in civil enactments, we may be met get from English free traders such admis- yesterday: "The grits are in a defiant and or to make people religious by law, to which is the duty of our friends in several constituencies—we need not be too particular—bled worshippers from interruption

rounds on which enlargements are granted in the police court. A most glaring case occurred yesterday and one that called for decided rebuke. It was that of a defendant in one of the lottery cases. "I am going to Ottawa," pleaded he, "and shall not be bacy for a week." Because this august personage is going to Ottawa, forfor him. It is bad enough that he should figure at all in such a case, but it is too much that such a flimsy plea for an enlargement should prevail. It was an insult to

GAGE'S NEW GEOGRAPHY. "Gage's Map Geography" is the title of a little work just published by W. J. Gage & Co., of this city. The publication is designed to contain all the reading matter that is necessary for candidates for entrance to high schools, and for candidates for the intermediate examinations, without at the same time being burdened with a great deal same time being burdened with a great deal more than is necessary for such purposes. It appears that the geographies, which this work is designed in some respects to supersede, contain a great deal of matter which the students are told to pass over, this superfluity making it necessary for the master to mark the passages to be learnt, or to have the scholars take from his dictation what they are to commit to tion what they are to commit to memory. It is claimed by the memory. It is claimed by the publishers that the new primer contains just the required amount, and that a scholar will pay less for the geography than he now expends in dictation books. Special attention is paid to the geography of Canada, and principally that of Ontario, with its railway systems. Fourteen maps accompany the work, all recently made, and those relating to Canada and the provinces show the resu The city wants a new court house. Why couldn't a grand amalgamation take place and a building worthy of Toronto and York be erected? The free library might even find a home in one of the wings.

Report has it that the celebrated streams bill is to receive its quietus at last. A cablegram has been received from Mr. Caldwell's counsel, who is now in London, stating that leave has been granted to take the matter before the Privy Council. One bone of contention has been disposed of, and the probabilities are that, after all, the other big bone—the boundary award—will have to be settled in the same way.

The customs returns for Toronto show a falling off of \$67,000 for February compared with last year. This is a matter of congratulation, for our merchants are determined not to be caught over-importing.

(EXTRACT FROM THE LAST ANNUAL REPORT.)

The Directors have great satisfaction in reporting to the Policy-holders and Guarantors that, during to past financial year, the progress of the Company has more than met their most sanguine expectation and the results justify a strong confidence in the still further success and usefulness of the Company. The Directors point with much satisfaction to the large reduction of over 17 per cent. In the ratio expenses to revenue for the year. This large reduction in expenses affords the strongest proof of the earned conomy with which the Company's affairs are conducted.

The Company issues all ordinary forms of policies, but its special Tontine splans have continued prove acceptable to many of our most wealthy and successful business and professional men, who have n been slow to discover that this system of investment enables them satisfactorily to accomplish many object which they are altogether unable to effect under the ordinary plans. The Directors of this Association beg to return thanks to the Insuring public for their patronage during the past year which enables them to close the books with a large increase in the volume of new business over that for the year 1881.

And in soliciting a continuance of their patronage attention is asked to the following features of the Association:

It affords all the benefits of stock security and management with the profits of mutuality.

It affords security to its policyholders unsurpassed by any Company doing business

The rates of premiums will bear favorable comparison with any Company.

Life and Endowment Policies are non-forfeitable after Two Years.

All policies are indisputable after Three Years.

Its profit results are unsurpassed. J. K. MACDONALD. Managing Director C. L. A.

This could not be tolerated by the christian proprietors however, and still another reduction is on the tapis. There is a power on their track which may yet teach them to "do unto others as they would be done unto." The attention of the trades council will, no doubt, be drawn to this matter, and then steps may be taken to place the whole subject before the public in such a light as to cause it to wonder how so many of our honest, though hard-worked, young women manage to reach maturity under the severe strain put upon their physical system.

Order at once and you'll not regret having your shirts made by White, 65 King street west; 6 for \$7.50, 6 for \$0, 6 for \$0, 6 for \$150. The best value, the beet workmanship, and the best fit to be had only at WHITE'S. boom at the two great centres of the dominion.

Coney Island was the only race course that bid for Mr. P. Lorillard's 3-year-old stallion race, besides Louisville. The bid was \$6000. The stake will undoubtedly be the richest of the year. There is \$10.575 to come from the Louisville people, whose bid secured the race; then there is \$9600 to come from the subscribers, and probably \$2500 from ten starters. This will make a grand total of \$22,075. The second horse will receive \$2000 out of the subscribtions, and the owner of the winner will get \$8.787,50, the same amount going to the stallion who got the winner. "Pa," said a little boy at the theatre the other night, "I wish I would hurry up and get bald-headed." "Why, my son?" "Be-sause then I could always sit in the front row of chairs."

A woman recently applied for state aid, and the blank was produced and the usual questions asked. She answered them freely until it came to "Your age?" "Have I got to tell that?" she asked. "The blank requires it, ma'am," was the reply. "Well, then," she said, "I don't want any state aid." And she flounced out of the office in high dudgeon—Boston Transcript.

One of the most interesting billiard matches that has ever occurred in the United States (and one has ever taken place on this continent) occurred on Saturday night at O'Brien's parlours, on Twenty-cighth street, New York, between Davy Johnson, the well-known turman, and Charles L. Davis, the well-known turman, and Charles L. Davis, the well-known turman, and Charles L. Davis, each man put up \$1000 as a stake. Al. Smith put up \$15,000 on Johnson, and Johnson bet over \$5000 beside the stake on his chances of winning. The game was a hotly-contested one. Johnson the put up as 10, and his average 1.3-7. Davis highest run was 10, and his average 1.5-141. The game lasted three hours and two minutes. Outside bets made up the difference. This is the heaviest game for money that ever was played in the world, if the report is correct.

The stables of Mr. John Dyment, at Orkney, in this county, will, for the season of 1883, be under the management of Mr. Bradt, who is spoken of as a careful and catable trainer. The list will include the b. s. Inspector, '4 years old, by Berlin, damilcottle B; Director, b. g., 3 years, by Disturbance, dam Htie; Aunt Alice, b. g., 3 years, by Terror, dam Ada; Lucy Lightfoot, ch. g., 2 years, by Big Sandy, dam Nettie; Sorrel Ned, ch. g., 3 years, by Disturbance, dam Silvertai; Black Maria, blk. g., 2 years, full sister to Sorrel Ned. The above lot are being exercised daily, and the best of them will be raced the coming season. In addition to the runners, Mr. Dyment is jogging Lady Almont, 5 years, by Benedick, dam Lady Ryadyk's Hambletonian; also Queen Victoria, 4 years, a full sister to Lady Almont. The latter is a rasper, and has so improved that her owner and trainer pay great homage to her majesty.—Hamilton Spectator.

The international match on June 11th will, no doubt, be of great interest, as it will be between the Canadian team and a picked team from Great Britain and Iroland. The other matches will be between the Canadians and Indians, and cha lenges from local clubs. The teams will finish in Iroland at the end of July, Belfast being fixed for the 27th and 28th. The teams will sall from Portland on the 3rd of May by the new steamer "Sarnia" of the Dominion line. The "Sarnia" has its saloon and staterooms amidships, and being a specially fine vessel has been chosen for the purpose. It does not carry cattle and it has every modern comfort and convenience, and is in all respects a first-class ship—Arrangements upon the Cook's ex ursion plan, but with features which can only be associated with this visit, have been made for a Canadian excursion, to leave with the team, returning at piecaure. It will have privileges and pleasure that no ordinary teurist party could secure. In 1876 all Canadians accessible were invited to witness the private match before the Queen, and were entertained by her at luncheon. The team offers the choice of two conditions of membership; the gates will be soon pub ish d. Both include a first diass return teket to Liverpool from Portland, with the payment of all customary "tips" going, and free admission to all matches. Catarrh-A New Treatment. From the Weekly (Toronto) Mail, Aug. 24. Perbaps the most extraordinary success that ha nousand patients treated during the past months fully ninety per cent have been cured this stubborn malady. This is none the less start-ling when it is remembered that not five per cent of ing when it is remembered that not not percenting when it is remembered that not not percentified presenting themselves to the regular practitioner are benefited, while the patent medicines and other advertised cures never record a cure at all. Starting with the claim now generally believed by the most scientific men that the disease is due to the presence of living parasites in the tissue, Mr. Dixon at once adapted his cure to their extermination—this accomplished, he claims the catarrh is practically cured and the permanency is unquestioned, as cures effected by his at wo years ago are cures still. No one else has ever attempted to cure catarrh in this manner, and no other treatment has ever cured catarrh. The application of the remedy is simple and can be done at home, and the present season of the yea, is the most favorable for a speedy and permanent cure, the majority of cases being cured at one treatment. Sufferers should correspond with Mr. A. H. Dixon, 305 and 307 King street west, Toronto, Canada, and enclose stamp for hi treatise on "atarrh"

WHAT A BOW BAYFILLE EDITOR HAS TO SAY REGARDING DIXON'S CATARRH REMEDY.

BOWNANVILLE, Canada, Jan. 2, 1883.

BOWRASTIR, Company To the Editor of the Statesman.

DEAR SIR,—Perhaps some of your readers are afflicted with that dreadful disease—Catarrh. If so, is ake permission to say through the Statesman that I have been a subject of Catarrh for the last twenty years, and for the last eight years no one can tell the pains I have endured. At tim s I had a dull, heavy headache, discharge falling into the throat of a thick tenacious mucus. My eyes were weak and watery, ringing in the ears, deafness, hacking and coughing to clear the throat, and at times I was almost s.f. focated. I consulted s. me of the best physicians of the day, but to no effect. I have tried eyery kind of patent medicines, washes and snuffs, that I could hear of, but did not receive the least henefit until I tried Dixon's Catarrii Remedy. On the 5th August last I procured the remedy and started its use immediately, and by the use of only three treatments I consider myself permanently cured. Its beneficial action was immediate and the cure speedy. Judging from the effects of this treatment on myself, I am satisfied that Dixon's is the only known treatment for Catarrh which will effect a permanent cure. To all who are suffering grom Catarrh I must conscientiously say: Give Dixon & Son's Catarrh Remedy a fair trial; it is "worth its weight in gold."

Sincerely yours, To the Editor of the Statesman

Note by the Publisher.—The Publisher of the Statesman has had an intimate acquaintance with Mr. Oke for about thirty years, and e.n., with scores of others, which for the correctness of the above statement. We have never known so bad a case of Catarrh as Mr. Oke's was, and the use of Dixon's Catarrh Remedy has effected a perfect cure, so that no symptoms whatever of the disease remain. We gladly give space to Mr. Oke's letter in the hope that it may be of benefit to some victim of Catarrh. I Messrs. A. H. Dixon & Son will send a treatise or Catarrh free on receipt of stamp. THE INTERNATIONAL THROAT AND LUNG Institute is gaining an enviable reputation of account of the many remarkable cures of Catarrin

nected with the staff. We have lately engaged the services of five more eminent specialists, to enable us to attend to our daily increasing number of patients all over Canada and the United States. Our great success is owing to the fact that our united and undivided attention is paid to the above diseases, and that we use cold inhalations, conveved through the Spirometer, the wonderful invention of M. Souveille, of Paris, Ex-side 'Surgeon of the French Army, with proper constitutional treatment. Consultations and a trial of the Spirometer free. Those unable to come to the Institute, or see our surgeons, who visit all the principal towns and cities of Canada, can be successfully treated by writing, enclosing a stamp for a copy of our International News, published monthly, which will give you full particulars and references, which are genuine.

Address 173 Church Street, Toronto, or 13 Phillips' Square, Montreal.
