### SPURNED GIRL **CAUSES SCENE** ON A N. Y. DOCK.

Comes From Germany ror Recreant Swain to Find Him Just Wed, and Stops Bridal Trip.

NEW YORK, April 3.-The Delayed Bridal Tour, or Spurned Girl's Revenge, was the title of a three-act thriller which had its opening scene sailing of the Kroonland this morn-ing. There was enough action, knocking down dragging out, punching, countering, upper cuts, fainting women, torn hearts, level ared facilings and emotions to hold a gallery of Bowery gods in a spell, and bring down the house with hisses for the villain, and hands and feet for the plucky heroine. The drematic personae were: Alfred Reiss, 27 years old, heavy villain; Emma Berendson, a pretty typewritist, the innocent bride; Theo. Berendson, years old, father of the innocent bride, one of the punchers; George Beckold, uncle of the star, 72 years old, second puncher; Miss Lucia Tulthoff of Hanover. His firm had ordered him to Europe on business, and this opportunity afforded bridegroom and bride a chance for a combination honeymoon and business tour. Theo. Berendson, the father of the bride, came down to the pier to see the happy pair sail.

On the same day that Reiss was married there arrived here from Germany Miss Lucia Tulthoff, superintendent of the telephone exchange at Hanover, Germany. She said she and Relss in the old country had been devoted to each other, and that Reiss had promised faithfully to marry her. Borden at 4.10 congratulated Laurier on breaking his silence, and suggested that if he had as good a case for ignoring Sifton in framing the autono my bill as he put up today on this matter, he could have told the whole story weeks ago. But the premier might have made his explanation days ago, and set at rest for the good of the country the disquieting rumors that had been affoat, among them the threat that "until Manitoba alters its school policy it cannot expect to have its boundaries enlarged."

That threat was repeated in the newspapers claiming to voice the views of the premier, and in newspapers alleged to be owned and controlled by cabinet ministers. AUTONOMY BILL DEBATE.

The debate on the autonomy bill was resumed at 9 by Wilson, conservative, of Lennox, who made a calm and argumentative address. He was followed by Beland, liberal, of Beauce, the demand for religious education in stood for conciliation and compromise, so as to make for harmony between the different elements in Canada. Bergeron asked, if the member stood for conciliation, how could he

explain the government's turning down Manitoba, as stated by Mr. Rogers? Beland replied that the conserva tives of Manitoba were standing for party capital rather than for provincial rights. Passing on, Beland said Quebec had changed its opinion of the leader of the opposition, who had abandoned his previous proclamation of love for the French and in his amendment now showed his true colors. At 12.35, Leighton McCarthy moved the adjournment of the debate, and the house rose.

Dr. Pugsley moved as an amendment that the bill be passed, but not to be proclaimed law by the governor in council until the new city council to be elected on April 18th by a twothirds vote sanctioned the change. Sir William Mulock's post office work can accomplish a remedy, should effect a great saving to the country. It takes about as long for a maritime province mail to reach Ottawa from Montreal as it does to send it up from the briny ocean to the chief of the autonomy bill no man on either city of all Quebec. As it is the fast service that is costly, it may be presumed that the postmaster general is working the slowest possible service from Montreal Junction with the shreds and patches of confederation. While Toronto is to be supplied with preumatic tubes to fire letters with almost lightning-like rapidity all over the city, is is a plain, simple matter of fact that passengers from St. John, Fredericton, St. Stephen and points in P. E. Island actually reach Ottawa from 3 to 18 hours in advance of the delivery and distribution of the mails which started on the trains they started on. Yesterday's C. P. R. express from St. John was three hours late in reaching Ottawa, having practically not lost a minute on the way, as it was held in St. John to catch the Digby steamer's large fish cargo for the upper provinces. It was about 3 p. m. when the train got in yesterday, but up to noon today there was no trace on Par-Hament Will of the contents of the mail bags. And this is merely a sample of the way in which the mail service of Canada is being conducted along of Canada is being conducted along the trunk lines of railway under the management of the present minister.

All mail matter originating in Canada, addressed to senamoners and the officials connected with the administration of the upper and lower houses of parliament is exempt from postage. All matter mailed from the commons post office franked by members goes free. The franking privilege is in itself a justiflable one, as there is no reason why the taxpayer should put his hand into his breeches pocket to pay a little bill by, the common school education of the to St. John, whence they sail on Satand later be required to deposit in the opposite pocket exactly the same amount of cash. The postmaster general wants to make a big revenue showing, and he, or officials on his behalf, want the franking privilege abolished. There is some ground for Sir William Mulock's position. The franking privilege has been grossly abused for partizan purposes by both political parties, and tons upon tons of liberal campaign literature weeks before the last general election. THE MANITOBA INTRIGUE.

Sir Wilfrid Laurier has on various occasions shown himself capable of prevarication, but the statement that he schools and the extension of the bounds bishops who held the promises of lib accept the declaration of the premier gates. There was no reason why he effaced by her neighbors, gave the preshould be told of it, since the proposition was not accepted. But if the tempting proposition suggested by the most of it by opening negotiations Apostolic Delegate had been favorably received, Sir Wilfrid would not have been long in ignorance of the negotiations.

Mgr. Sparretti had no power to on the boundaries of Manitoba. That could only be done by parliament, and as a matter of practice in this country would only be done on the initiative toba ministers. Mgr. Sbarretti seems to have felt certain that this influence waste the time of the Manitoba ministers by holding out inducements which were altogether imaginary.

Had the Roblin government yielded tated. to this temptation it would probably have been found that the Laurier goverament was quite close to the Delegate, whose office at Ottawa was established at Sir Wilfrid Laurier's re- Mr. Choquette had bought Le Soleil, quest. Sir Wilfrid Laurier, his colleagues and his political supporters, pleaded for the appointment on purely political grounds. The first delegate was named in answer to that plea and the office has continued. The first duty of the first delegate was to smooth out the course for the government on the Manitobs school question. The first two representatives of the Vatican had to negotiate between a Laurier government at Ottawa and a Greenway government at Winnipeg. That was a more simple proposition than the one in which the present delegate has apparently allowed himself to be involv

Mr. Bouraesa and some of his friends appear to think that it is a sign of bigotry and intolerance to condemn the sort of interference which Mr. Rogers charges upon Mgr. Sbarretti. We do not see that such criticism of the delegate is an attack on the churc which he belongs, or upon the head of that church. The proposition made by Mr. Rogers did not come from Rome but from Ottawa. It bears the marks of political rather than ecclesiastical origin. Mgr. Sbarretti is more like ly to suffer from the coward-ice and want of candor of the politicians who had enlisted his sympathy than by any reflections which the con servatives make upon his course and conduct. It is not unlikely that his career in this country will be brought government wheat policy. He told the

In 1896 Sir Wilfrid Laurier and his friends complained of the political action of certain bishops in Quebec who pishops did advise their people to vote separate schools. In their earlier days these prelates lived among the people as pastors and so have learned their wants and their disposition and have acquired a sympathy with views and aspirations. These bishops have relatives in political, professional and mercantile circles, and are themselves interested in the material and intellectual progress of the country. It is surely more fit-ting that these citizens and electors of Canada should of their own motion than that a special delegate of the Vatican, sent here at the request of the politicians, should secretly engage in such political negotiations as those

Sir Wilfrid Laurier has done the country a poor service by summoning from Rome these dignitaries to take the authority hitherto exercised to some extent by fathers in the Roman Catholic church who were our own countrymen. Canada at the present time is enjoying a period of exceptional prosperity. But is this the prosperity of a young, healthy nation, eager for expansion and endeavoring to gain a footing in the world's markets, or merely the false prosperity of the boom? Observation

tends towards the latter theory. Agriculture experiencing a few years of good crops, with plenty of cheap harvesting labor to be had, is mainly responsible for deluding the Canadian people into the belief that their manufactures are progressing at the same rapid rate, but this is not so; thus, when agriculture experiences the lean years which are sure to come the result will be disastrous.

Canadians are making the mistake of developing their manufactures by the bonusing system, and money which should be expended in developing the country's natural resources goes

It is interesting to an inquisitive person to converse with some of these rustics. The writer, on asking one of them (who was training to become a street composed of such vegetable extracts car conductor) his particular reason for leaving the farm, was astounded to receive the following reply, given in all sincerity: "Because he liked the street car conductor's uniform." asked: "Who is going to take your place on the farm if you work in the city?" Send us more emigrants for they allow their own offspring to leave the farm to better themselves in the is the standard. city! This migration is a question which unfortunately legislation is unable to deal with, though a question of the utmost importance to the well-being of the country. Emigration up to now has been suc-

cessful in counteracting the effect of this depopulation in the rural districts. but if ever the emigration tide ceases to flow there will be innumerable disconsolate farmers in Canada.

THE IMMIGRANTS.

Touching upon the emigration ques-

tion, one hardly likes to venture an opinion on the merits of Canada as the emigrant's Mecca. Some emigrants do well, and therefore better their condition in life; others never do any good and therefore blame the country; though perhaps there are faults on both sides. Every emigrant, either artisan or unskilled laborer, coming to Canada, thinks, if he cannot procure suitable employment in the cities or towns, he will turn farmer, and this "tiler-of-the-soil" idea is usually his

undoing. Ignorant of the conditions under which he will have to work on farm, he will go and engage with the first farmer who offers to take him

often for very little remuneration. Two or three days on the farm are sufficient to dispel any illusion he may have as to the desirability of a farm-er's life, so back to the city he returns, thoroughly disgusted with Canada in

general. In the city, again, he may be lucky and get work; if not, he usually drifts into what we term here the "floating population." This "floating population" is a Canadian creation. It consists of young emigrants and natives (who could not be classed as tramps), who wander from town to town, wherever they can get work, and settling nowhere, thus becoming a detriment to the country. Emigrants coming to Canada should not expect a life of "sparkle, wit and pleasure," but should understand that the conditions in Canada are much the same, comparatively, as those prevalent in the Old Country

At the home of her son, Dr. Charles Lovell, 21 No. Common street, Mrs. Ellen Lovell, widow of the late Henry C. Lovell, of Kittery, Me., passed away Monday night at the advanced age of 82 years. She had been in feeble health for a number of years, being troubled with rheumatism and indigestion. After the death of Dr. Lovell's wife, a little over a week ago, she began to fail, and that with her advanced age made improvement impossible. Mrs. Lovell was born in Dorchester, N. B., Sept. 29, 1822, later removing to Portland. Me., and then to Kittery. Me. Of late years it has been her custom to spend the winter months with her son in Lynn. She was married to Henry C. Lovell 43 years ago. She is survived by one son, Dr. Lovell of Lynn, and one stepdaughter. Miss Eleanor L. Lovell, who is employed in the post office at Kittery, Me. The funeral will be held at her son's residence. Thursday, at 10 a. m., and the burial will be in Kittery, Me. The sympathy of a large circle of friends, both business and social, is with Dr. Lovell in this, his second family bereavement in so short a time. -Lynn Paper.

IN THE SUPREME COURT CHAM-BERS.

A rule for certiorari was granted by Judge McLeod yesterday afternoon on application of H. MacMonagle, actng for Owen A. Batson of Campobello. Batson was convicted before Geo. M. Byron in the Campobello civil court for a second offense against the Canada Temperance Act and fined \$100. The grounds of application are that the indictment did not set out the place where the liquer was sold or that Batson had been convicted of a first offense. The rule is returnable at the next sitting of the supreme court when counsel for the liquor inspectors and Mr. MacMonagle will be heard before the full court.

MORE TROUBLE AT SPRINGHILL.

HALJEAX. April 6.-Trouble has broken out again between the men and the management of the collieries at Springhill. When Manager Cowans a week ago practically withdrew his order of a 13 per cent, cut in wages the men say that they believed he also withdrew his order cutting the yardage rate on pillered coal from \$1 to 50 cents. Cowans says he did not withdraw this, and the men are now threatening a strike unless he takes that order back as well as the other. The question has been relegated to the subcouncil of the P. W. A., who will see Cowans. A Land Sec. of 111 22

31 WARSHIPS SOLD FOR \$690,600 CASH.

LONDON, April 5.—An unusual sale occurred at Chatham dockyard yesterday, when thirty-one obsolete British war vessels were sold to the highest bidder. The total realized was \$690,-000. The lot included twelve cruisers, among them being the warships Warspite, Northampton, Galatea and Australia, two torpedo boats and the training ship Exmouth. The terms of sale provide that none of the vessels could be sold to a foreign power. All of them must be broken up within twelve months. The ships sold represented an original outlay of \$15,000,000.

#### THE PUPPET CZAR,

(April McClure's.) With a clatter of hoofs the party dashed down the way and into the great gates of the palace, but as they passed there was to be seen a man who eat in the carriage, the man for whom all the splendor of arms and panoply was called into being. It was but the briefest glance, a mere peg on which to hang a first impression, but it told on me with an effect of dismay. Framed and overshadowed in the black hood of his carriage, I saw, bolt upright and motionless, a little figure im-maculately neat, with a face of dead dressed to a point failed to withdraw from it a quality of dollishness; an utter vacancy, the emptiness of soulweariness and futility, governed it altogether. Against its dark background it stood forth as blank and white as, paper, a thing awful in its corpse-like mpassivity, yet pitiable, sorrow stir-

WOODSTOCK, N. B., April 4.—The question of moving the court house down to Woodstock is not'by any means dead, as was very plainly shown during their recent session of the county court. One proposition is that the building could be cut in two and moved down in halves, though objection is taken to this, and it is replied that there would be no great impediment to its being moved entire.

The building, while old, has been kept in a very good state of repair, and would by no means be an unsightly addition to the town. Moreover, with some comparatively small improvements, at very small expense, it could ments, at very small expense, it could be fitted up to do good service as a sult in a complete restoration to health. court house for many years to come. The proposition to move down the building is pronounced quite practicable, and would probably meet with very little opposition. WHEAT POLICY

Discussed by Agricultural Committee at Yesterday's Meeting.

FREDERICTON, April 5.-The agricultural committee held an important meeting this morning, at which mat-

Hon. Mr. Labillois thought that

ing poultry. On the North Shore comparatively little is raised, with the result that dealers have to send to P. E. Island and the upper provinces to get a supply of poultry for the holiday season. The prices obtained are such as should induce our farmers to go extensively into poultry raising. A few years ago on the North Shore farmers could get only 30 to 40 cents each for geese, and now 75 cents and upwards is the ruling price, and at these prices there is a good profit for the farmers. If we wish seed to yield increases of 30 to 40 per cent. we must help the farmers get good seed. He was also opposed to the present policy of giving small grants to the agricul tural societies throughout the province to enable them to have small shows. Mr. Purdy urged that purchasers of seed grain should pay cash for it, the department supplying it at the actual cost price. Mr. Labillois agreed with this, and thought that grain could be

placed in the hands of some responsible merchant in each locality, the merchant to be held responsible for it. Dr. Ruddick said that wheat cannot successfully grown in St. John county, and thought that it should be left to the judgment of the individual societies as to whether they should use the government grant for a local show

(Hamilton Spectator.) Whenever and wherever Hon. George E. Foster makes a speech it is a good speech of yesterday on the autonomy bills was as good as-perhaps better any he had previously made. He did not shirk the question of his action in 1896. He made no attempt to escape from the full consequences of his action then. He simply said that he had acted in accordance with the

dictates of his conscience, and for what he thought to be the best. But Mr. Foster's action in 1896 is not now the question. The question before the people of Canada, now, is: Shall the new provinces be coerced in the matter of education laws? And Mr. Foster has answered the question with a clear, ringing "No," which at once puts him on the side of the constitution-on the side of British fair play, equal rights, modern progress and pro-

Incidentally, Mr. Foster gave Bourassa a dressing down, and his speech clear, decisive and most satisfactory.

## STOP! WOMEN

AND CONSIDER THE **ALL-IMPORTANT** FACT That in addressing Mrs. Pinkham you are confiding your private ills to a woman — a woman whose experience with woman's diseases covers a great many years. You can talk freely to a woman when it is revolting to relate your private troubles to a man—besides a man does not understand-simply because he is a man. Many women suffer in silence and drift along from bad to worse, knowing full well that they ought to have immediate assistance, but a natural modesty impels them to shrink from exposing themselves to the questions and probably examinations of even their family physician. It is unnecessary. Without money or price you can consult a woman whose knowledge from actual experience is great.

Mrs. Pinkham's Standing Invitation: Women suffering from any form of female weak ness are invited to promptly communicate with Mrs. Pinkham at Lynn, Mass. All letters are received, opened, read and answered by women only. A woman can freely talk of her private illness to a woman; thus has been established the eternal confidence between Mrs. Pinkham and the women of America which has never been broken. Out of the vast volume of experience which she has to draw from, it is more than possible has to draw from, it is more than possible that she has gained the very knowledge that will help your case. She asks nothing in return except your good-will, and her advice has relieved thousands. Surely any woman, rich or poor, is very foolish if she does not take advantage of this generous offer of assistance. — Lydia E. Pinkham Medicine Co., Lynn, Mass.

general assembly. Judge Stevens and Revs. McLean and Glover were appointed a committee to mittees. This committee will report at the next meeting in July.

A petition from St. Paul's church and congregation, Waterford, was present ed, asking for a grant of \$300 to aid in repairing the manse. On motion the amount was granted.

The clerk referred to the fact that Rev. J. B. McKay, who worked in this Presbytery during the greater part of his life, will celebrate his jubilee in June next, and thought that the Presbytery should take some action in the matter. It was suggested that as the reverend gentleman was ordained at Parrsboro, possibly the Presbytery of Truro was the proper body to act. On motion of Judge Stevens, segonded by Mr. Whittaker, it was resolved to communicate with the Presbytery of Truro, to see what steps they propose taking in the matter, and that in the event of a celebration being held by the Truro Presbytery, the moderator, Rev. Mr. Robertson, attend as the representative

WINNIPEG, April 4.-Hon. Mr. by our letter, strange to say that up to this very hour we have had no reply to ours of February 23. What more natural conclusion can be arrived at than that Sir Wilfrid is simply killing time and making protests in order that the polite instructions of his excellency Monsignor Sbarretti could be acted upon by Manitoba.

"In this way, of course, Sir Wilfrid thinks he can secure political advant-age for his friends in this province. This is a palpable political trick which he is quite capable of understanding with a view to force the local govern ment to do something which would be resented by the people, and by this means he hopes to reinstate his liberal friends in power here. "I for one, promise to take no chances

in allowing Sir Wilfrid or any person else to take advantage of us by any underhand schemes of this sort. "All I ask is that every citizen of the expressing his opinion by his vote as a protest against the continued delay.

DENIES THEIR RIGHT.

"I deny the right of Sir Wilfrid Lau rier and Mgr. Sbarretti to undertake t mix up the matter of separate schools with that of the extension of our boundaries, and I am sure that in so doing they do not reflect the wishes of either the Roman Catholic or Protestants in the province. It ill becomes the Globe to make this charge against the government of Manitoba, when the only persons effected are Sir Wilfrid Lauier and his excellency Mgr. Sbarretti.

MGR. MERRY DEL VAL

"We have no desire in Manitoba for double dealing about this or any other question. This, however, appears to be the favorite course of Sir Wilfrid. For example, in 1896, he signed an official statement declaring himself to be entitled to the credit for the final settlement of the Manitoba school question, while immediately following we find from correspondence brought down in the parliament of Canada the following extract from a letter to Cardinal Rampolla, which he has never denied :

"'It is desirable, if not necessary, that the mission of Mgr. Merry del Val should be renewed or rather continued, and that he should be present in the midst of us for a more or less prolonged time as the accredited representative of the holy see.'

"It will be remembered that Mgr. Merry del Val was appointed papals delegate by his holiness the pope on the petition of Sir Wilfrid Laurier and forty odd members of the parliament of Canada. The petition was presented to his holiness by Mr. Fitzpatrick, and further urged by the Canadian legal representative in London, Chas. Russell, who was afterwards instructed to go to Rome as Sir Wilfrid's readdressed the following to his excel- house.

"Now this to my mind is conclusive that Sir Wilfrid in combination with of study and general information re-Mgr. Sbarretti had hoped by their present course to carry out the promise given their Canadian representative Chas. Russell, in this underhand way. "In view of the foregoing, I am sure that Sir Wilfrid Laurier owes it to the people of this province to at once give a reason why we are not entitled to immediate consideration and action, other than the flimsy excuse which he has already created in his invitation to Mr. Whitney to advance a claim to some portion of Keewatin, which did not form any part of old Canada.

"It is certainly idle for any person to assume that Mgr. Sbarretti, occupying the position he does, would presume to make the suggestion of the terms and conditions which he did without the full knowledge and consent of Sir Wilfrid Laurier and his colleagues. And, on the other hand, Sir Wilfrid's attitude carries with it evience of full knowledge of the arangement, as is evident by his creaion of excuses of delay, as well as his allure to give a reason or cause for the same, and further, by his unfairness in bringing down one side of the case and attempting to secure pre their having Manitaha's reply to his minute of council of March 21, which was received by this government on March 28th and replied to March 31st." The divorce evil, if not arrested, will gradually undermine our proud civi-lization, and when the testing time comes what appeared to be so attractive will prove to be only a hollow

In the discussion of marriage and divorce I would call your attention to a divine law, a social disease and a

fatal danger. First - A divine law. Centuries ago the cunning Pharisees attempted to entrap the divine Teacher by asking Him the question: "Is it lawful for a man to put away his wife for every cause?" In that day there existed two opposing schools. At the head of one Shammai, who insisted that diwas Shammai, who insisted that divorces were granted, making an average of adultery; at the head of the case of adultery; at the head of the case of adultery; at the head of the case of population was 60 per cent, during other was Hillel, who maintained that a man might put away his wife for any cause at all. The tempters of the same period.

In 1867 Ohio granted 901 divorces, and in 1800 the same state granted 3,217 Christ thought that the trap was well divorces—one to every 11 marriages set, for if He failed to hold strict views and divorces—one to every 11 marriages after residence of only three or six on the marriage question they would report Him to the followers of Shammai, and if He held the opposite opinion they would turn upon Him the enmity of the followers of Hillel, one of whose strong adherents was Herod, who had just beheaded John the Baptist. In the words of another: "Brushing aside their quibbling, Jesus goes back to foundation principles and gives ried to the ninth victim. Michigan in His message to the church of all the 1867 granted 449 divorces, and in 1900 ages concerning marriage and divorce." It is a fivefold message: The marriage of one man and one woman is a divine husband and wife in a relation closer and more binding than the relation of and more binding than the relation of parent to child; it so unifies husband issued by Columbia University, gives nd wife that they cease to be two and the following interesting fact: Canada,

And records these words of Jesus: self-governing countries have ever soever putteth away his wife and tried." It was published in a recent Mark records these words of Jesus: against her. And if a woman shall put away her husband and be married another, she committeth adultery." And in Luke we have set forth the same law of Christ. From His recording conclusions: That Jesus allowed divorce on one and only one ground, adultery, and that He seems

Jesus is today the Head of His church, and it is being purified by Him and made without spot or wrinkle. Moreover, in Romans vii:1-6 Paul argues that the Christian is set free from the bondage of the law, as the woman can have a new husband only on the death of the former hushand But in I Corinthians vil:12-16 Paul speaks of the problem in family ife presented where the husband is Christian and wife a heathen and vice versa. He has two things to say about his new problem that had no risen when Jesus spoke on the subject His first word is that the Christian must not force a separation. If the heathen husband or wife is willing to continue the union, the Christian must willing to do so. The marriage legitimate and the children are legitimate. But the other word is this: Suppose the heathen husband or wife is not willing to keep up the marriage relation and insists on separation, then what? Well, let the unbelieving hushand or wife go, says Paul. He use the word "depart" here not the ter

Third-A fatal danger. The attack upon the integrity of the family is an unmitigated evil and a crime against social order, which can only result in the destruction of all that is purest, noblest and best in the world. Here we find the secret cause of the decline and fall of the Roman Empire. The It would seem that this is a case of laws as to family life were loose; divorce became epidemic, and the emdivorce. If this be true, there could, pire went down in ruin and disgrace xix:4-6: "And He answered and said of course, be no remarriage in such The Reign of Terror in France follow-unto them: Have ye not read that he cases, for the marriage had never been ed the establishment of a law that legally annulled. This alternative is marriage could be dissolved merely by not even raised by Paul in this connecepplication; 20,000 divorces were granted in Paris in one year, and during that Paul did not advocate divorce for the same period 48,000 outcast children anything save adultery, though he does were carried into fondling hospitals not even indicate this exception save and nearly 10,000 new-born babies were taken out of the sewers of the city and This divine law is set forth in no unfrom the secret places by the police certain sound on the pages of God's Word; and the disobedience of it must times is is impossible to picture, and who will say that directly or indirectly the violation of the sanctity of the mar iage state and the purity of the family riage state and the purity of the family life did not contribute largely toward those days of terror? Today in that country it is allowable to obtain separation for five years, and the end of that time to apply for the conversion of the separation into absolute divorce if the parties have

the mouth of France, and lessons writ-

ten in blood have never been forgot

The practical results of the imperia diverce law in Germany have been gratifying. It gives four grounds for divorce-namely, adultery, attempt of either husband or wife on the life of the other; malicious, wilful desertion and continued violation of the marriage vows. Both in France and Germany attempts are being made to escape threatening dangers by the enforcing of stricter laws on marriage and In Engand and Wales there were

176 divorces in 1870; 336 in 1880; 364 in 1890, and 727 in 1899; and the growing evil is at last attracting the attention of the lawmakers. We do not recognize the family at all in our national constitution. It appears in our state laws only as an object of some care, but not as an element of political and it is understood the legislature is power. Mr. Gladstone declared that thus putting the city council to the his fear for our future centred very test. largely upon our abilities to protect the family, for weakness here means disaster everywhere.

Realizing the perilous position in which we are placed by the increasing social evils resulting from divorces, a number of public spirited men initiated a corrective movement in 1878; and what is now known as the National League for the Protection of the Family, founded upon a broad basis, was organized in 1881. The results from this and kindred organization have been marked and encouraging solemnized in the state. Indiana months are no longer permitted, as they granted, in 1867, 1,096 divorces. and in formerly were, in North Dakota, South 1900, 4,599—one divorce to every six Dakota, Georgia, California and sevmarriages solemnized in the state. eral territories. All causes for divorce Only a short time ago the papers were but one have been stricken from the teling of a woman in Indiana who had laws by the District of Columbia, and eight living husbands, and from whom she was then divorced, and this same operation of the states now exist in no less than thirty-four states and terri-

> The question of a constitutional mendment and admission of a national law on the matter under discus sion have been agitated; but as long as twelve states can be rallied in de fense of the maintenance of state rights, it is a waste of time to attempt the amendments on marriage or divorce. But the agitation against this evil goes on as never before. The pulpit, the press, the platform, the schools colleges and universities are awaken ing to a sense of the moral and social danger that threatens us, and the outspoken discussion of the marriage relation and the divorce laws must result in great good.

> Thirty years ago none of our higher educational institutions gave any attention to the study of the family, but now the theological seminaries, law schools and the universities are giving special care to this most important subject. We may be assured that our boasted civilization, our proud commercial greatness, our high educaional attainments and our material developments will only hasten the day of our disaster unless we protect the family and honor the God of the home, who is the Father of us all
