A ROUSING MEETING IN HARWICH TOWNSHIP

P. H. Bowyer M. P. P. and H. S. Clements M. P. Address
A Meeting of Farmers at Bridge End—They give
Accounts of their Stewardships.

Last night, true to an election promise, H. S. Clements, M. P., and Phil. H. Bowyer, M. P. P., met the electors in the vicinity of Bridge End, to give them a short account of their stewardship in their respective positions of trust. To judge by the enthusiasm displayed, the confidence of the electors in these two clever and honest young members is stronger than ever. The meeting was advertised as a "heart to heart talk," and was held in the Patrons' Hall at Bridge End. There was a large attendance, considering that this is a very busy time of the year with the farmers. The hall was nicely filled.

James McCormick, who was moved to the chair, first introduced Mr. Bowyer, who was enthusiastically received.

Mr. Bowyer said that it gave him

a great deal of pleasure to accept this invitation to come and give an account of his stewardship before the electors, who had done so nobly by him at the election, and he took occasion to thank them for their support. In his opening remarks, Mr. Bowyer referred to the old Patrons of Industry platform, which he said he had always supported. There were ten planks in this platform, and it was a significant fact that seven of these planks had been adopted by the governments of the country since the time when the Patrons were an organized body in this country. The people are now a reading and a thinking electorate, said the speaker, and they keep closely in touch with the doings of the parliament. Partyism, with all its resulting evils, is fast dying out in the land, and the electors are now watching for and supporting the men who will give the common people a fair show, not for political purposes.

KEPT HIS ENGAGEMENT

Dr. Battisby enjoyed A
"Stroll" from Cedar
Springs to Blenheim.

His Train Broke Down but
He made His way to
Chatham.

(From Our Own Correspondent.)
Erieau, Aug. 31.—The sturdy and indomitable characteristics of the Scot were admirably exemplified yesterday by Rev. Dr. Battisby. The esteemed pastor of St. Andrew's Church had spent the previous evening at the summer residence of his honor, Judge Bell at Erie Beach. In the morning the minister was called upon to return to the city, and the judge drove him to the Cedar Springs railway station.

Dr. Battisby waited for some time for his train, but it failed to make its appearance. Finally, enquiry disclosed the fact that the overdue locomotive had met with an accident and was unable to proceed. His informant stated that it was probable the train would not make its scheduled trip for some hours. The minister was needed in Chatham and the circumstances which seemed to prohibit progress did not daunt him. Despite the fact that it was an exceptionally hot day, and that he was called upon to carry a heavy grip and an overcoat, Dr. Battisby promptly set off along the dusty road on the five-mile tramp to Blenheim. He struck out at a steady, swinging gait, and kept it up undauntedly for the whole distance, arriving in Blenheim within an hour and a half. From Blenheim the sturdy Scot took train for Chatham and arrived on scheduled time.

Asked concerning his walk at its conclusion, Dr. Battisby told The Planet correspondent that he felt quite fresh and even ready for another stroll. "The fact that I had the grip and overcoat to carry," he added in his quiet way, "was the only thing that hampered me. Otherwise I should have enjoyed the walk immensely."

There are few who could duplicate the energy and achievement of the veteran pastor of St. Andrew's.

FALSE IMPRESSIONS RE. SUCCESSION DUTY ACT

Ambitious Liberal workers said to be Misrepresenting
the Act to the Electors—Premier Whitney's
Beneficial Amendments.

It has been asserted by some of our Reform friends that in the case of estates where the aggregate value of the property exceeds \$10,000, and is less than \$50,000, the Conservatives since they came into power at Toronto have increased the duty on devices or legacies going to near relatives from five per cent. to ten per cent. This, however, is clearly an error, as will be seen by reference to the Succession Duty Act, which is now Ontario Statute, 7 Edward VII, Chapter 10. The section dealing with the matter in question is section 5, sub-section 5, which reads as follows: "Where the aggregate value of the property exceeds \$10,000, so much thereof as passes to or for the benefit of any lineal ancestor of the deceased, except the grandfather, grandmother, father and mother, or to any brother or sister of the deceased or to any descendant of such brother or sister, or to a brother or sister of the father or mother of the de-

ceased, or to any descendant of any such last mentioned brother or sister, shall be subject to a duty of five per cent." The former section, passed under the Ross Administration, was as follows: "Where the aggregate value of the property of the deceased exceeds \$10,000, so much thereof as passes to or for the benefit of the grandfather or grandmother or any other lineal ancestor of the deceased, except the father and mother, or to any brother or sister of the deceased, or to any descendant of any such brother or sister, or to any brother or sister of the father or mother of the deceased or to any descendant of such last mentioned brother or sister shall be subject to a duty of \$5.00 for every \$100 of the value."

By a glance at the two sections it will be seen that the first mentioned section, passed while the Conservatives have been in power, so far from increasing the duty has entire-

Continued on Page Two.

A HOT TIME IS WAITING FOR LOCAL DOG POISONER

The Dog Fanciers of this City will Unite for Action,
and will not Rest Until Culpit is
Caught and Severely Punished

During the past few days a craze for dog-poisoning has made its appearance in this city, and as a result several valued and valuable canines have fallen victims to the criminal work of some fiendish person who has developed a mania for distributing poison in public places contrary to the by-laws of the city, and contrary to the moral laws against inhuman conduct.

A man who would poison a dog, or one dog fancier pointed out to The Planet yesterday, would poison a child if he thought he would get away with it. The duty of the authorities then is clear. The person who is conducting this outrageous campaign against inoffensive and helpless dumb animals is a menace to public life, and it is a source of danger to the community to have such a treacherous specimen of humanity at large. What if some infant, playing on the streets, should happen across the poison intended, probably, for the canine pet of the household? Does it need such a serious ending to the dog-poisoning craze, to cause the police authorities to inaugurate a thorough and systematic campaign in search of the culprit who has already accomplished a sufficient amount of his dastardly work, to warrant his imprisonment?

No amount of labor, time or expense should be spared in an effort to locate the person or persons engaged in the present abominable and heinous crime of dog poisoning. What if every citizen of Chatham no one is yet in a position to estimate. If the present malefactor escapes punishment, there are others who will be encouraged into activity, and so the epidemic will spread until no one will be able to tell where it will end. Every man who owns a dog is interested, and judging from the strongly expressed sentiments on the street there is more than one already actively aroused and indignant. There is talk of a subscription list to raise enough money to land the person who started all of this trouble, and already many dog fanciers—their influence in the community—have signified their willingness to go down on the list for almost unlimited amounts, so that if the present effort which is being made to solve the mystery is unsuccessful, it will not end there. There

are enough men banded together already to insure the capture of the offender, and they are firm in their determination to fight to the bitter end. A special detective will be brought to the city if necessary to probe the matter to the bottom, so that this inhuman poisoner of dogs will find out ere long what a serious business he has got mixed up in.

There will be no use in collecting all of this evidence, however, if it is not possible to secure a conviction. As one man pointed out last evening, it is up to the police authorities to perform their duty to the very letter, and when the offender is landed, the strong public sentiment which at present exists, will warrant the infliction of a sentence bordering upon the limits of the law. It is not the recovery of the value of the dogs that is the chief aim of the prosecution, but rather an example which will serve to protect the lives of animals in the future against the culpable conduct of irresponsible persons. There is no doubt, however, that if the evidence is strong enough to convict that, in the passing of the sentence, the good of the public will be considered before the personal feelings of the individual who, under the circumstances, deserves little mercy. There is no need of further warnings. These have been given in the past, and the person who is at present guilty, has had sufficient opportunity to profit by advice given in times gone by.

The law is quite distinct on such cases as these. It is clearly stipulated that no person shall leave poison of any kind, exposed in any public place where it is possible for an animal to secure it—either on private or public grounds. The man who purchases the poison assumes this risk, and he alone is responsible, whether he be morally guilty or innocent.

In this case there would seem to be no chance for the offender being morally innocent. It has every appearance of a deliberate attempt to poison indiscriminately every canine in the neighborhood, and on this account the crime is all the more reprehensible. Several lawyers have freely offered their services towards the campaign which is contemplated, and it is expected that interesting developments will follow in a few days.

TWO STAR CRICKETERS

Claude Brundage and J. W. Aitken, of this city, were in Detroit yesterday, playing cricket with the Detroit team against Pittsburgh. The Pittsburgh team won by a score of 76 to 54, in the first innings, and the second innings was not finished, thus they were awarded the game. Brundage, for Detroit, made 28 of the 54 runs scored by his side. During his innings he made a hit for 6 runs, the first long drive that has been made on the Detroit field in years.

In the second innings Aitken, who arrived late on the field, was put in to bowl. He secured 6 wickets for 46 runs, and, if the innings had been completed, it is quite likely that Detroit would have won.

Detroit will play against Youngstown on Monday, Aitken and Brundage will again appear on the field for Detroit.

LaGrange ideas of spirituality cannot take the place of definite ideas of right.

MAY BE PROSECUTED

Complaint has been made to Humane Officer McGregor about people who leave horses standing in the sun, sometimes for almost a day at a time, without food or water, on the vacant lot to the rear of McCorvie's grocery store.

Officer McGregor will notify all persons leaving horses there next Saturday that the practice must cease, as the leaving of horses in the sun for such a length of time comes under the head of cruelty to animals.

NO PLANET MONDAY

Monday being Labor Day, and a statutory holiday, there will be no issue of The Planet.

The man who kills time may be starving the family with the same stone.

TOO MUCH SPEEDING

Mayor Stone has Issued
Orders for Police to look
Out for Autoists

Strict Watch will be kept
and Favors will be
Shown to no One.

"Fast and reckless automobile driving in Chatham must cease," such is the edict of Mayor Stone, the city's first magistrate.

"I have given instructions to the police to keep a strict watch on the autos," the Mayor told The Planet this morning, "and every endeavor will be made to convict those guilty of violating the law in this respect."

The reason for being strict with the automobiles is that there is altogether too much speeding in Chatham, and there have been a number of very narrow escapes from serious accidents.

"The authorities have, perhaps, been a little lenient with the autoists in the past, but the thing must now, cease."

ELECTRIC SIGNBOARD

One has Recently Been
Erected by the Chatham
Gas Company.

It will be ready for use on
Monday—A Novel
Idea.

P. S. Coate, manager of the Chatham Gas & Electric Light Company, has recently erected an electric bulletin on the side of the smokestack of the plant.

The sign is the only one of its kind in the city and is a decided feature to the residents in the west end of the city. The sign, reading from top to bottom, is "The Maple City." The letters are each three feet six inches by two feet six inches, and are lighted with five candle power lights. In all the letters combined there are 200 lights. At present the lights will burn continuously during the night, but it is the intention of Mr. Coate to make it a flash light. It is at present an advertisement for the Maple City, but in the course of a few weeks the letters will be changed and the sign will read to advertise some of the utilities of electricity and gas. The letters may easily be changed. They are arranged between a ladder, which has a grooved track. A tackle is attached to each letter and they can be lowered and taken out at any time. Other letters can be put in and the sign may easily be made to read differently. It is a method of advertising that cannot be generally adopted, and the residents of the Maple City should feel grateful to the managers of the electric plant for such a unique and clever way of advertising the city. The lights will be turned on on Monday night.

Time is money.

NOTES FROM ERIEAU

Erieau, Aug. 30.—Mrs. Frank Wilton, of Detroit, is visiting Erieau friends.

Mrs. Will. Hall is spending the day in Blenheim.

Mr. W. R. Fellows and "Ike" are busy giving Mr. Piggett's cottage a fresh coat of paint.

Mrs. (Dr.) T. L. McRitchie and daughter Gladys leave for the city tomorrow, after a pleasant stay on the bar.

Miss Alice Samson returned to the Eau last night, after an absence of a few days.

Mrs. Will. Anderson, Grant St., is the guest of her brother, Mr. J. G. Kerr.

Judge Houson and family left for their town home to-day. Miss Jessie Houston leaves for Strathroy on Monday.

Mrs. Morgan and Miss Clara Morgan, of Lyndoch Cottage, leave shortly for a protracted stay in Los Angeles and other southern points.

Mrs. W. H. Lugsdia was a Benheim visitor yesterday.

Yesterday Mr. A. D. Westman had a birthday, and his many friends have been speculating as to whether he is now of age.

Owing to the inclemency of the weather the corn roast, which had been planned to take place on the lake shore, was postponed, and the celebration was held indoors. A very jolly time was reported by those who were among the guests.

Dr. McRitchie and Pen Reid are guests at Sandy Knowe.

Miss Hortense Matias, of Hamilton, who has been the guest of her cousin, Miss Etta English, for the past three weeks, returned to her home last evening.

Mr. and Mrs. Roy Tobey, who have occupied Glenn's double cottage, at Centreville, during the month of August, returned to their home in town yesterday.

Miss Etta English and her aunt, Mrs. F. Wilson, went up to the lake yesterday, in a launch, as far as Morpeth.

Mr. Harry Shillington, of Chatham, is a guest at Drumtealty Lodge.

For the past few evenings, as previously recorded by The Planet, the Erieau cottagers have contributed to the brilliancy of the nights with bonfires and fireworks. Last night the residents at Government Park retaliated. From over the placid waters of the bay gleamed a picturesque series of brilliant bonfires, a considerable portion of the shores of the great Provincial reserve being lit up with a connecting link of fires. Not to be entirely outdone the campers at Squaw Camp, southwest of the Shrewsbury Dock, contributed their quota to the illuminations of the evening.

The whole effect, on the still and cloudy night, was quite spectacular and striking.

An intrepid cottager is reported to have undertaken on the strength of a handsome reward, to traverse the decrepit north sidewalk from end to end. He has, however, stipulated certain conditions. He is to be endowed with an accident insurance policy for \$1,000, made out in favor of his good wife, and to be permitted to carry at least one large lifebuoy in travelling over the western end of the sidewalk over the marshy land. The daring pedestrian will make his promised trip, starting at daybreak on Monday. It is even betting whether, if he gets through unharmed, he will be able to complete his task in time to catch the last train.

For the past two seasons Mr. Hundredmark of the cottage which bears his name, has come over from his home in Cleveland and taken a foremost place among the ranks of the Erieau fishermen. Of late, however, he has been resting on his laurels and doing but little with rod and line. However, the last few days have brought into prominence the thrilling tales of rival fishermen, and this fact, it is said, fired the ardor of the energetic Clevelander. As a result, without a word to anyone—Mr. Hundredmark gathered together his paraphernalia and departed for the fish fields alone knows. In an amazing brief time he returned and his rivals were silenced. He brought with him one of the finest and largest black bass seen in the Bar this summer.

A steady breeze blew off the Lake last evening, and the Eau sailors, realizing the shortness of the time that remained for them to enjoy their sport, went out in force with their various craft, and kept it up till after sundown. Commodore Archie Park had an enthusiastic crowd out on the Baden-Powell, and the trim vessel whisked over the waves to the accompaniment of cheerful song. Skipper J. G. Kerr, with his cuprous Ulla Lou, gave the bigger boat a day break just off the channel. The Victoria had Miss Jessie Houston at the tiller, and made a pleasant spin towards Government Park. The Argo, Eric B. Awa, Emerald, Chariot, and others

also participated in the evening's sport. The weather was mild and delightful.

The first Erieau resident to declare his intention of availing himself of the first day of the duck-shooting season is Mr. J. B. Stringer, who purposes, with a party of chosen friends, to set forth at daybreak on Monday in quest of the elusive birds. Mr. Stringer during past seasons has established a reputation for invariably returning at nightfall with a substantial bag. For this reason the wily amateurs are besieging him and his friends for hints as to the course he purposes taking, and when he will locate his "hide." But the Nimrod is not giving out information along these lines these days, and enshrouds his plans in deep and aggravating mystery.

ANAEMIA CURED

Dr. Williams' Pink Pills Bring Back the Glow of Health by Making New Blood.

To bud into perfect womanhood the growing girl must carefully guard her health. Unless the blood is kept rich and pure, headaches, backaches and frequent dizzy spells will trouble her. She will always be ailing and may slip into deadly decline. Dr. Williams' Pink Pills are a never failing remedy in building up the blood. Just a short time ago the reporter of L'Avenir du Nord had the following cases brought to his notice: In the town of St. Jerome, Que., there is an orphan asylum under the care of those zealous workers—the Grey Nuns. In this home Dr. Williams' Pink Pills are constantly used. For some months two of the young girls in the home were afflicted with anaemia. The symptoms in both cases were very much alike. They were both pale, lost all energy and were subject to headaches and dizziness. Dr. Williams' Pink Pills were taken and soon there was an improvement in their condition. The color returned to their cheeks, their appetite improved, headaches ceased, and soon good health took the place of despondency. What Dr. Williams' Pink Pills have done for those two orphans—Marie Lavoie and Dolina Brooks—they will do for others.

The secret of Dr. Williams' Pink Pills in curing anaemia, lies in their power to make new, rich red blood. That is why they strike straight at the root of all common ailments like headaches, dizziness and backaches, rheumatism, neuralgia, indigestion, anaemia, St. Vitus' dance, partial paralysis and the special ailments that afflict almost every woman and growing girl. Dr. Williams' Pink Pills are sold by all medicine dealers or may be had by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville.

Drowning at Kingston.
 Kingston, Aug. 30.—Archie McManan of Ottawa, a sailor on the steamer Alexandria, fell into the water between the drydock and an elevator and was drowned.

A young man named Nelson, employed by Lemmon & Sons, fell late yesterday afternoon, from the roof of the Kingston Milling Co., where he was at work, and broke his arm, and probably received internal injuries.

Scrupulous Honesty.
 Chicago, Aug. 30.—John D. Rockefeller's bill for witness fees and mileage for his trip to Chicago last July makes a new record for scrupulous honesty in the office of the United States marshal in Chicago.

He could have collected \$35.00 for his trip from Pittsfield, Mass., and return, but as he stopped off at Cleveland, he deducted the difference.

Killed at Crossing.
 Alliance, O., Aug. 30.—Mrs. Byron Kendrick, her six-year-old grandchild, Hazel Lowther, and Arthur Ogster, a driver of their carriage, were killed here when a Pittsburg, Fort Wayne & Chicago passenger train crashed into their carriage at the crossing just outside the city Wednesday.

Brakeman Hurt.
 Brockville, Aug. 30.—A G. T. R. brakeman named Theodore Shipman, stepping from a car at Cardinal, slipped and his foot went under the wheels.

Cases Adjudged.
 Cobalt, Aug. 30.—The cases against Roadhouse, et al., for inciting miners to strike, were adjudged until Wednesday next.

NOT A TANK.
 Isn't Lord Flimflam a tank? No! from the number of handles to his name I should call him a loving cup.

OIL NOTES

The gas line is expected to reach the Romney field, when operations will be resumed after a complete shut-down during the past month. No. 5 on the H. Marshall lease for Chas. Swanson was completed last week by C. W. Miller, and is good for 100 to 150 barrels per day—as good as any in that promising section of the field.

Roth, Argue and Maire have commenced drilling on the south 50 acres of A. Gossnell's farm, Tilbury East. This is Canada Co. land.

No. 2 has been started on the south 12 1-2 acres of the Crosby lease, Tilbury East.

J. Partridge, for the Federal Oil Co., made a location on the Coffey farm, lot 9, concession 12, Glenwood district.

In common with practically all other fields, mid-winter inactivity marks the Tilbury oil field. True, there are a number of wells being drilled, but it cannot be denied that at the beginning of the year it was the general belief that the summer would see a great reawakening of development work, a development, however, that has failed to materialize. In its stead the drilling has jogged along at a rather rustic pace, which, for one thing, has thoroughly proved that the boom period of the field is entirely a thing of the past, and that in its stead there is a general routine that will continue indefinitely.

Roth, Argue and Maire Bros. this week started No. 2 on the Mike Gleason farm, lot 1, concession 7, Tilbury East. This is something in the nature of a test, as No. 1 on this farm has only produced a little oil, and at present is not being pumped. It is expected that should No. 2 prove better both will be pumped together.

As noted during the past few weeks, some of the biggest wells of the field came in during this time. The number of new completions has not been very many, but the size of some of the wells is really something extraordinary, and they have it can be safely added, attracted considerable attention.—Tilbury Times.

Succession Duty Act False Impressions Re

Continued from Page One.

ly struck off the duty (where the aggregate value of the property is as mentioned in the section) in the case of a grandfather or a grandmother, while under the section of the Act dealing with the matter passed by the Ross Administration, the grandfather and grandmother receiving portions of the estate had to pay a duty of five per cent. We trust this information will enable the electors to effectually dispose of the contention raised by some members of the Reform party, who have sought to convey the idea for the purpose of influencing votes, that the Conservatives had increased the amount of duty on estates of over \$10,000 and under \$50,000.

We might point to several other sections of the Act where the Conservatives so far from increasing the duty payable to the Government have made or increased exemptions. By reference to the Act 7 Edward VII, Chapter 10, section 5, sub-section 5, it will be seen that where the whole value of the property passing to any one person does not exceed \$300, the same shall be exempt from the payment of duty imposed by this Act. This increases the amount of the exemption by \$100, because under the Ross Administration the amount exempted was only \$200. Likewise, by reference to the Act 7 Edward VII, Chapter 10, section 5, sub-section 2, it will be seen that no duty is leviable on the amount of any unpaid subscription for a religious, charitable or educational purpose to be carried out in Ontario made by any person in his lifetime to any corporation or person mentioned in this sub-section for which his estate is liable. The section of the Act passed under the Ross Administration only exempted property devoted or bequeathed for religious, charitable or educational purposes to be carried out by a corporation or person domiciled within the Province of Ontario, and made no reference whatever to unpaid subscriptions for like purposes which might have been made by the deceased in his lifetime.

First-Class rooming accommodation, central location, on car line. Every convenience. E. ROBLIN

50 College Street, Toronto

It's Always Going up in Value

There's no investment so sound and stable as good.

HOUSE PROPERTY
 The value will soar, but the property itself is firmly anchored, solid and substantial. Put your money in something real and tangible.

NOTHING BETTER THAN REAL ESTATE

FOUR GOOD FARMS FOR SALE

150 acres in Dover 100 acres in Harwich

We also have several good bargains in town property which we would be pleased to have you look over.

SMITH & SMITH, REAL ESTATE AGENTS

Executors' Notice to Creditors

In the Matter of the Estate of Henry Allenor, late of the City of Chatham, in the County of Kent, Dairyman, deceased.

Notice is Hereby Given, Pursuant to the Act in that behalf made, and amending acts, that all persons having claims against the estate of the said Henry Allenor, who died on or about the 19th day of March, 1907, are requested to send pre-paid or deliver to Geo. A. Sayer, Solicitor for the Executors of the last will of the said deceased, of or before the 21st day of September, 1907, their names and addresses and descriptions, and a full statement of the particulars of their claims and the nature of their security, if any, held by them.

And further, take notice that, after the date last aforesaid, the said Executors will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which they shall then have received notice.

And the said executors will not be liable for said assets, or any part thereof, to any person or persons of whose claim or claims they have not received notice at the time of said distribution.

Dated this 23rd day of August, A.D., 1907.

GEO. A. SAYER,

Ebert's Block, Chatham, Ont., Solicitor for the Executors

THE NORTHWAY CO., Limited

Launch Trip To Tashmoo

First Church Male Quartet with Percy Piggott and Frank Mount Enjoy a Pleasant Outing in the "Defiance"—A Few Holiday Notes

From Chatham to the Lighthouse, to Detroit, to Tashmoo and the St. Clair river, to Algona, to Port Lambton, to Wallaceburg, to Mitchell's Bay and back to Chatham in a 33 foot launch was the delightful trip taken this week by six Maple City young men—Frank Mount, Percy Piggott, and the First Church Male Quartet, composed of Wilfrid Smith, R. W. Angus, John R. Smith and J. W. Wilson.

The trip was one of the most enjoyable ones imaginable, as any young man of the party will tell, and the "Defiance" crew, as they were everywhere termed, came back it is true, but also supremely happy and refreshed. The whole route was covered in four days, and considering "nausea-vomiting" and "sea-sickness" on land, it will be seen that the launch lost no time on the water. The boys swear by the "Defiance," the beautiful and speedy craft, through which the outing was made possible. Throughout the whole cruise, the boat acted splendidly. Although this is the second season for her in the water, she is still the pride of all local lovers of aquatic pleasures. It was a great surprise to even the members of the party, to observe the accuracy with which every part of her machinery behaved during the four days away. Never once did she even miss an explosion. It is the general impression of a gasoline launch trip that the most of the time is taken up in cranking the engine and adjusting the spark, but there is none of this with the "Defiance." Skipper Mount, who is the Secretary-Treasurer of the Defiance Iron Works, the company which manufactures these engines, was engineer, wheelman and general master of ceremonies, except when he was relieved from these onerous responsibilities by his able lieutenant and mate, Percy Piggott. Messrs. Piggott and Mount make a valuable combination for such a trip. What one does not know, the other pretends to know, and between them there is little left to be desired in the line of general information.

The start was made from Chatham last Saturday, and the lighthouse was made in one hour and thirty minutes. When the party left the city there was a stiff breeze blowing, and this freshened up considerably before the lighthouse was reached. It was the intention to cross the lake to Mitchell's Bay Saturday evening, but when they reached the lighthouse and had a look at the high breakers dashing up on the shore, and even extending into the river, some one timidly suggested a wait, and as it was the convivial understanding that there should be no discord among the members of the party, no objection was raised to this suggestion. In the meantime the appetites of the party had commenced to assert themselves, with no uncertain feeling, and guided by Billy Wilson the group of "fair weather" sailors sought the Jeannette's Creek grocery. Adjournment was made to the dining room, where the obliging proprietress had consented to prepare a supper notwithstanding the fact that it was "after hours." Billy said confidentially to his fellow tourists that he had chosen this store because he saw olives, salmon, lobsters, sardines, and pickles piled up on the shelves behind the counters. Knowing the basso profundo's keen appreciation of dainty morsels, the rest of the party prepared for something extra. The salmon, olives, etc.,

it was getting dark and the waves were becoming larger and stronger, the lighthouse at the entrance to the St. Clair river was sighted by his brother John, who was getting just a little nervous. The course was changed about ten points, and the launch was soon gliding peacefully down the channel leading to the Flats.

Then another anxious moment came. Away down at the other end of the channel a large steamer was seen approaching. Skipper pro tem Smith called out merrily from the bow, "Here comes the 'Tashmoo'!"

At this Captain Mount turned pale. "Boys," said he, "if we have to meet the Tashmoo in this channel, its swells will swamp us." At this Billy Wilson immediately commenced to take off his coat, with as much courage as he could muster on such short notice. Percy Piggott followed, and John Smith openly regretted that he hadn't learned to swim, too, when he was a youngster. As the steamer came on, the suspense became awful until some one with good eyesight discovered that the Tashmoo was in the north channel while the Defiance was in the one to the south. The cheers given to the people on the steamer as she passed, were not lacking in enthusiasm. It was one more exciting experience and the Defiance was moored safely at "Marshland." The nerves of the crew were just nicely restored to their normal condition. A song had just commenced when—"Bang!" The launch stopped suddenly. With a swift motion Skipper Mount shut off his engine—and soon the launch was directly ahead, not three feet away, looming up in the darkness like a huge mountain, was the bow of a big lake freighter! An awful silence ensued. It was broken finally by a weak hollow voice which only seemed to come from a member of the party. "Boys, we're run down!" But even though the "Defiance" was now standing still, the big dangerous looking bow did not seem to be getting any nearer. The search light was turned on and—Oh! What a happy relief! The bow belonged to a wrecked steamer which had caught fire in the river last fall, and had been run ashore and abandoned. The party proceeded quietly to Marshland, one of the most popular resorts on the Flats, where they were soon safely and comfortably "bunked" for the night.

The following day and the next morning were spent at Tashmoo Park. Music was the chief feature, and after the first song, the quartet found plenty of people who were anxious to be entertained. The American people are famous for their hospitality, and the most hospitable of them must have been out on the Flats during the visit of the quartet.

Tashmoo Park is noted for the pretty American girls who are to be seen there enjoying the dancing, and the fresh bracing breezes from the river. It must be admitted that some of them were very beautiful and exceptionally graceful dancers, at least so said —, but then it would not do to be personal in speaking of any special young man in the Chatham party. It is the unanimous opinion of everyone of the Canadian visitors, however, that in one stroll down King street a person will meet more pretty maidens than there are to be seen in Tashmoo in a whole season.

During the two days stay at Tashmoo, the "Defiance" was the pride of the Flats. At every wharf where this pretty launch was moored, a crowd of admiring spectators soon congregated, and everywhere were heard words of admiration. An amusing incident happened when the Canadian crew were approaching Tashmoo on Monday morning. A very handsomely appointed gasoline launch caught up from the rear, and appeared to be a fast craft. A party of men and girls were on board, and they amused themselves by passing and then dropping back of the "Defiance" again. This went on for awhile until the merry "hal ha" from the river excursionists began to work on the nerves of Skipper Mount. A few adjustments in the engine, and the "Defiance" jumped forward. The man at the other wheel took the hint, but there was nothing to the race. The "Defiance" arrived at the dock fully 100 yards ahead of the laughing party, who were now silent and thoughtful. Six young men welcomed their American friends when they finally landed, but they didn't seem to relish their reception. It was afterwards found out that the before-mentioned American launch had the reputation of being the fastest on the St. Clair Flats.

One interesting and truly thrilling feature of the trip was the respect shown to the Canadian flag which floated gracefully from the stern of the "Defiance." Only one of the huge freighters which passed down the river failed to salute it.

After touching at Algona and Port Lambton, the launch was headed for Wallaceburg. The trip up the Sydney was particularly enjoyable. One could not help but notice, however, that this stream lacks the artistic and attractive scenery which stamps our own Thames as the most beautiful river in the province. As soon as the sextet arrived in the "Burg," the launch was headed for Wallaceburg. The trip up the Sydney was particularly enjoyable. One could not help but notice, however, that this stream lacks the artistic and attractive scenery which stamps our own Thames as the most beautiful river in the province.

FIFTEEN YEARS OF ECZEMA

Affected Hands, Arms and Legs—Endured Terrible Itching and was Unable to Sleep—Would Tear the Bandages to Scratch the Skin—In less than One Week

CURED BY THE CUTICURA REMEDIES

"I had eczema nearly fifteen years. The affected parts were my hands, arms and legs. They were the worst in the winter time and were always itchy, and I could not keep from scratching them. I had to keep both hands bandaged all the time, and at night I would lie awake and scratch through the bandages as the itching was so severe, and at times I would have to tear everything off my hands and scratch the skin. I could not rest or sleep. I had several physicians treat me but they could not give me a permanent cure, nor even could they stop the itching. After using the Cuticura Soap, one box Cuticura Ointment and two bottles Cuticura Resolvent for about six days the itching had ceased, and now the sores have disappeared, and I never felt better in my life than I do now. Edward Worell, Band 30th, U. S. Infantry, Fort Crook, Nebraska."

The most torturing and disgusting humors, eczemas, rashes, itching, irritations, and inflammations of the skin, scalp, and blood, with loss of hair of infants, children, and adults, are instantly relieved and speedily cured by the Cuticura Remedies, when all else fails. Complete External and Internal Treatment for Every Humor of Infants, Children, and Adults consists of Cuticura Soap, Cuticura Ointment, and Cuticura Resolvent for the Blood. Sold throughout the world. Cuticura Soap and Ointment, Sole Free, Boston, Mass. Book on All Skin Humors.

and were afterwards induced to entertain, from the balcony, a street full of people who had been attracted by the music.

The return trip from Wallaceburg to Mitchell's Bay and back to Chatham was made with the success of the earlier part of the journey. The lake presented a perfectly smooth surface for the homeward run, and the party arrived back in this city at noon on Wednesday.

The trip provided a thorough test for the Defiance engines, which are manufactured in this city. No engine could have stood it better. There was never one anxious moment as far as the machinery was concerned, and this one circumstance added volumes to the pleasure of the outing. The beauty points of these engines are that they are simple in their construction, easy to run, and almost noiseless in operation.

DOCTORS MISTAKES

Are said often to be buried six feet under ground. But many times women call on their family physicians, suffering, as they imagine, one from dyspepsia, another from heart disease, another from liver or kidney disease, another from nervous prostration, another with pain here and there, and in this way they present a list of ailments which they are really suffering from. The physician, ignorant of the cause of suffering, keeps up his treatment until large bills are made. The suffering patient gets no better in reason of the wrong treatment, but probably worse. Proper medicine lies in Dr. Pierce's Favorite Prescription. It is a scientific medicine carefully devised by an experienced and skillful physician, and adapted to woman's delicate system. It is made of native American medicinal roots and is perfectly harmless in its effects in any condition of the female system.

As a powerful invigorating tonic "Favorite Prescription" imparts strength to the whole system and to the organs distinctly feminine in particular. For overworked, worn-out, or run-down delicate, tired teachers, milliners, dressmakers, seamstresses, "shop-girls," house-keepers, nursing mothers, and feeble women generally Dr. Pierce's Favorite Prescription is the greatest earthly boon, being unequalled as an appetizing cordial and restorative tonic.

As a soothing and strengthening nerve "Favorite Prescription" is unequalled and is invaluable in allaying and subduing nervous excitability, irritability, nervous exhaustion, nervous prostration, neuralgia, hysteria, spasms, St. Vitus's dance, and other distressing nervous symptoms commonly attendant upon functional and organic disease of the uterus. It induces refreshing sleep and relieves mental anxiety and despondency. Dr. Pierce's Pleasant Prescription invigorates the stomach, liver and bowels. One to three doses. Easy to take as candy.

Hurt in Elevator. London, Aug. 30.—Charles Martin, a shipper in the Sidwell Manufacturing Co., was working the freight elevator when the cable broke at the 6th floor, plunging him to the cellar. Martin received serious injuries to his spine.

At 96, Killed by Train. Brampton, Aug. 30.—Robert Lowes, for 96 years a resident here, was killed by a C.P.R. train. The railway passes through his farm. He suffered from deafness.

Windstorm Hits Fair. Des Moines, Iowa, Aug. 30.—A windstorm struck the Iowa State fair grounds early yesterday causing damage estimated at \$100,000.

IN VOGUE.

A New Jumper Blouse to Slip Over Shirt Waist.

The newest jumper blouse is attached to the skirt by a belt and the whole garment slipped over a shirt waist or guimpe and all fastened down the back. This is the most convenient and delightful costume of the season. It has quite taken the place of the conventional jacket and skirt suit. These are made of the same materials as the coat suits, such as shantung, rajah and other pongees, light tweed, striped and plain serge, English moiré and the heaviest linen.

For cool days a serge or light cheviot jumper suit slipped on over a small guimpe and sleeve below elbow of white muslin is quite as comfortable as a coat suit worn over a thin shirt waist. Probably the prettiest jumper is the Japanese one, so called because of its sleeves and its V shaped back and front at the neck. It is cut rather high, with a triple and very wide box plait from each shoulder to waist back and front.

The V shaped opening is finished with a band of silk oriental embroidery, which you can now get in so many of the shops or make at home, using two or three colors of floss that will harmonize with the color of the jumper. The sleeves take a good deal of material, are put into a wide armhole and would hang nearly to wrist if they were not closed, laid in fold after fold going around the arm and tacked into place with a row of stitches of floss the exact color of the material.

At the edge is a one or two inch turnover cuff or a bias band of another material trimmed in any way wished or left plain.

The Awkward Girl. The round shouldered girl is always awkward. Round shoulders and grace of form and of carriage can never go hand in hand. Stopping and round-

HOW TO CURE ROUND SHOULDERS.

ness of shoulders are among the easiest physical defects to cure. No apparatus is needed, and will power alone is called into use.

The girl who works all day over desk or typewriter is prone to lose that squareness of shoulder and fullness of chest that play so prominent a part in the charm of woman. Let her force herself to keep the shoulders square, the chest out, the head erect and the back flat. It may be hard to bear this in mind at first, but soon correct carriage, if persisted in, will become second nature. Take deep breaths all ways; get all the outdoor exercise you can. In your room or whenever alone practice standing and walking with the hands clasped behind you and with the whole upper part of the body in the same pose as the girl in the picture. Not only will straight carriage improve your looks, but your health as well.

My Lady's Dainty Desk.

The newest smart writing papers are stone gray, dove gray, gray blue, lapis lazuli and pale tan.

Narrow lines of a contrasting color or of a deeper tone of the same color outline the sheets. These lines are placed about half an inch from the edges of the sheet.

Large monograms are in favor. Some are three inches deep and an inch wide. Square letters or square monograms are also used.

Gold, silver, white and very striking colors are the favorites. Gold letters on a bright colored disk are much in demand.

Scarlet and ultramarine papers are seen, but are only used by the women who revel in creating sensations.

Thin envelopes crisscrossed with fine lines and lined with dark color are used for foreign letters.

A fad of the moment is mourning paper with a narrow black edge and a monogram in silver.

Half mourning paper is of pale purple with a silver monogram or of gray with a purple monogram.

Pumpkin yellow paper is seen. Burnt umber and bright red sealing wax is used with it.

The Newest China.

White china has become a perfect fad among society people. Complete white china breakfast sets have been in fashion for some months, and a recent bride has among her presents a most attractive white coffee set.

The dozen cups are of the thinnest quality of china, and the coffeepot, cream jug and sugar bowl are all of fine French china with the monogram in gold. Toilet sets in white china are also among the latest novelties.

This is the box that has the biscuits that are always fresh, crisp and good—that are made in the best bakery in Canada by the best bakers.

If these are the Biscuits you want, always insist on your grocer sending

Mooney's

DISTRICT

JEANNETTE'S CREEK.

Rural Dean Dobson, of Tilbury, called on his parishioners here on Monday.

Mrs. A. A. Wilson and Miss Dorothy, of Tilbury, were the guests of Mrs. Kontze last week.

Misses Florence and Georgia Kontze are spending this week at Tilbury and Tilbury-on-the-Lake, the guests of Mrs. A. A. Wilson.

The ice cream social on the S. S. grounds on Tuesday evening was well attended.

Miss Fern Smith returns on Saturday after spending her vacation at Hamilton.

Mr. Graham, of Victoria avenue Methodist church, Chatham; Mr. Morris, of the Anglican church, Martineau; and Mr. Grant, of the Methodist church, Jeannette's Creek, are camping at Tilbury-on-the-Lake this week.

Mr. Peck and Miss Maude Peck spent Monday in Detroit. Mr. John Shaw, of Caledonia, was

the guest of Mr. and Mrs. Shaw, Sr., last week. Mr. and Mrs. W. Shaw, Sr., left on Monday evening on a trip to Winnipeg and Edmonton.

Mr. James Hamilton has put a gasoline engine in his large fishing boat.

TURNERVILLE.

Rev. Mr. Knight, of Dawn Mills, preached an eloquent and interesting sermon to a large congregation at the Lindsay Road Church on Sunday night.

Mrs. John Clyde and Mrs. Arthur Campbell left on Wednesday for North Dakota.

Mrs. Wm. Nolly, of Detroit, is visiting friends in this neighborhood. Mr. and Mrs. James Rieborough, of Kent Bridge, were the guests of Thomas Buckingham on Sunday.

James Gilbert is entertaining his nephew, Mr. Fannan, of Detroit. Miss Pearl, the eldest daughter of Mr. and Mrs. Henry Morgan, was united in marriage to Russell Brown, of Thorncliffe, on Wednesday.

PANDORA RANGE

Just a Minute or Two to Remove Grates

When the Pandora grates require removing don't send for the plumber. His kit of tools are not needed to take the stove to pieces in order to get out the grates, as was the case with your former ranges.

The Pandora is not constructed in the usual manner. The removal of a button with a hammer (many just use their fingers) allows the Pandora grates to be easily drawn out, as shown. Just a minute or two to do

the trick.

No plumber's mess to clean up. No bill to pay.

Notice, too, that the Pandora grates are stronger, will last longer, and are much heavier, triple, and are much heavier, longer than the ordinary double pay out for renewals.

Spaces between the Pandora triple grates are narrower than between ordinary double grates, which prevents good fuel slipping down with the ashes. Sifting Pandora ashes is wasted effort.

And that simple gearing arrangement on the Pandora makes the "rocking down" of the ashes just play compared to the heavy "shaking" necessary with ordinary ranges.

If your local dealer does not sell the Pandora write direct to us for free booklet.

triple, and are much heavier, longer than the ordinary double pay out for renewals.

SUCCESSION DUTY.

On page one of to-day's issue will be found an article based upon the Succession Duty Act which has been amended in the interests of the people of this province since the Whitney Administration came into power.

The object of the publication of this article is to correct a few misleading impressions which have been sent broadcast through the country in reference to this act. It has been alleged that the Conservatives since they came into power have in the case of all estates where the aggregate value of the property exceeds \$10,000, and is less than \$50,000, increased the duty on legacies going to near relatives, from five to ten per cent. Instead of this increase, however, the terms have been made more favorable than they were under the former administration, as explained in the article.

Why such a bold and clearly false statement should be made is a mystery to all who have taken the trouble to look up the amendments made by the Government at Toronto. Why any man would make such a statement when he surely knows that its utter falsity could be proven by merely referring to the printed act, is still a greater mystery. It is indeed regrettable that such tactics should be resorted to in an effort to cast reflection on a blameless record, such as the one established by Prime Minister Whitney and his colleagues. It is surely a sign of weakness in the case of the man seeking support when he is unable to intelligently criticize the acts which have been put through by his political opponents.

It is said that these erroneous impressions have, to a great extent, been caused through certain statements made by Mr. A. B. McCoig, M. P. P. Such a statement could only be made, either through ignorance as to the real facts, or through a direct intention to mislead. We do not wish to accuse Mr. McCoig of making any statement which he knows to be untrue, but even the other only possible excuse for him, if he did make such a statement, places him in a very awkward light.

Mr. McCoig was elected by a majority of the people of Kent to represent them in the Legislature. That he should be ignorant of the legislation passed by the body of which he is a member, is a direct insult to the people who elected him. If this is the extent of Mr. McCoig's knowledge of public affairs, he should at once discontinue discussing them altogether, and stick to his favorite dodge, the smile and the hand-shake, in his efforts to secure votes.

We presume, if Mr. McCoig was really in ignorance of the character of the legislation passed in reference to Succession Duty, that he will, now that the Act has been explained to him, proceed to make amends honorable, by doing his part towards correcting the false impressions which have been instilled into the minds of some of the electors of this county through the before-mentioned misrepresentation.

BOATING IN CHATHAM.

To a person who has had the privilege of accepting the splendid facilities which the Thames offers for boating, it is a matter of considerable wonder that the people of Chatham do not go in more for this sort of pleasure during the summer months. It is the general opinion among those who are enthusiastic over aquatic sports, that the people of this city do not half appreciate the Thames. We have, going right through the centre of the Maple City, a stream of water which, for beauty and artistic scenery, cannot be equalled in the province, and yet there are many citizens who have never interested themselves sufficiently to be able to describe this wonderful advantage to their friends, let alone to enjoy it themselves.

The fault, no doubt, lies in the fact that the majority of the people do not really know of the wonders of the Thames. There are many cities that are not blessed with a stream of any kind, let alone a navigable river, that would consider it a matter for the highest congratulation to have such perfect facilities for boating within such easy access.

The establishment of the Defence Iron Works in Chatham has done much to interest people in the river. The launches turned out by this firm compare favorably with any in the Dominion, and many of them can be seen every day plying

along the river. Canoeing has also taken a boost in popularity during the past few years, so that there are some who are not totally blind to the splendid opportunities at their very doors. No doubt when the season opens next year there will be a material increase in the numbers who already appreciate and enjoy the pleasant, health-giving river boating on the Thames. The city fathers should make some effort to advertise Chatham's superiority in this respect. Chatham is naturally a summer resort city, and there are, no doubt, many outsiders who would prefer spending a short portion of the summer here rather than in some less convenient and much less suitable place.

INDEPENDENT VIEW.

That excellent and really independent journal, the Bobcaygeon Independent, thus sizes up Mr. Borden's platform:

"Mr. Borden, as leader of the Opposition at Ottawa, is making no mistake in formulating his policy, and placing it fairly before the public, in view of the general election that is expected early next year. His views appear in another column of this issue, and they establish what has so often been stated by this great journal, that the names Liberal and Conservative as applied to the two political parties of this country, are entirely misnomers and misleading. The policy as laid down by Mr. Borden, if it had to be classified, would certainly be placed under the head of Liberal rather than Tory. The weight of the policy is found in paragraphs seven to eleven inclusive, and those could not possibly be classified as Conservative. The whole program is good."

NEWSPAPER CHANGE.

By mutual agreement the partnership between Messrs. H. A. Colville and G. L. Myland no longer exists. The business in the future will be carried on by H. A. Colville, who speaks a continuance of the public favor. Being aware that the "Herald-Record" has not as yet been improved according to our ambition, owing to unforeseen circumstances, yet we are proud to say the prospects for the future are very bright, which will enable us to make the "Herald-Record" a welcome and looked-for visitor to the thousand homes it is mailed weekly. No effort will be spared to obtain all the news in the neighborhood, and without making any such promises, just watch us grow. Our job department is very complete and promptness guaranteed in all work entrusted to our care.—Wallaceburg Herald-Record.

The Herald-Record is one of the brightest county weeklies on the Planet's exchange list, and the new proprietor, Mr. Colville, who is an old Chatham boy, has the very best wishes of this Great Home Journal for his future prosperity.

You know how good Witch-Hazel heals cuts and scratches—soothes chafing and skin irritation?

"Royal Crown" Witch-Hazel Toilet Soap

Is just Witch-Hazel and pure VEGETABLE oils.

Both a toilet soap and medicated soap—for the price of one. Only 50c a cake, 3 for 95c. At druggists and dealers everywhere.

AULD LANG SYNE

FROM PLANET FILES OF HALF A CENTURY AGO

From The Planet files from May 7, 1868, to May 21, 1868.

Mr. H. H. Borden was killed in a runaway accident last Thursday night. He never regained consciousness.

Messrs. Bixter and Reid have dissolved partnership as dry good merchants. Mr. Bixter will continue the business in the old store on King street.

Henry Ward Beecher's income is reported this year at \$32,518, which includes his profits on "Norwood," outside of his ministerial work.

A married lady residing in Brooklyn is reported to be now entirely helpless from paralysis, occasioned by tight lacing.

An interesting youth in attendance at Miami University has been expelled for kissing his sweetheart, a student in Oxford female seminary, and the lady has been expelled for receiving the kiss. The gravity of the offense was increased by committing it in the presence of the governor or somebody instead of on the sly. She wasn't to be aggravated in that manner without her revenge and she had it.

A disastrous case of accidental poisoning occurred in Montreal on Thursday. Some boys returning from school ate a plant called wild parsnip, growing by the road side, and were immediately taken very ill. Two died that night and a third the following day.

Fresh tomatoes are retailing in Detroit at \$1.00 per dozen.

Ten policemen have been detailed as a sanitary force to look after the cleanliness of the city of Detroit.

MONEY SYSTEMS.

The World's Coinage Muddle and the Range of Units of Value.

Twenty-six different monetary units are used by the forty-eight principal countries of the world. Thus Great Britain uses the sovereign or pound sterling, France and six other countries use a unit called franc, Germany, France, and Canada and the United States use the dollar. In value these different units range from 4.4 to 494.33 cents of money of the United States. They are represented in their turn by coins the values of which are either multiples or fractional parts of the value of their own chief units, and there are no doubt at least 200 such sufficient coins not one of which seems to have a value equal to that of any commonly known unit of weight, as the gram, for example, or the ounce of gold, although forty millions of these forty-eight countries have accepted gold as their standard measure of value.

This lack of logical relation of coins to any widely used unit of weight of the precious metals may be due to the fact that money systems seem to have grown up haphazard, under diverse conditions of life, in different parts of the world.

Such diversity in moneys may have been of little moment when millions of people spent their lives knowing nothing of the existence of other millions, and there was little traffic. But these differences in monetary units are of importance now that international commerce includes millions of tons of products of the toll of all lands and billions of dollars each year to settle its bills, for such differences put upon trade a wholly unnecessary tax. No account is made here of the burden laid on domestic trade by like variation in the value of such units at home, as of the tael of China, which has sixteen different values within that empire.

"Old Hundred" Scores Birds.
It is a strange but well authenticated fact that the wild creatures of the woods dislike the sound of that solemn hymn "Old Hundred." Mr. M., the naturalist, proved the truth of this by starting it in the woods of the Sierras to the birds and squirrels, which were very tame from never having been frightened by the report of a gun or other alarming sound. They would come and sit near him upon the branches of trees and listen to any lively tune he might sing, blinking their bright eyes as though they liked it, but at the first sound of "Old Hundred" they would beat a quick retreat to their holes or nests and never appear again until he changed the tune. This experiment was made in different places on various occasions with exactly the same result.

When it rains in India.

While Jupiter Pluvius reigns in India nothing can be done out of doors. The rain at times is simply a white liquid sheet dropping straight down from the heavens, so that no very great stretch of imagination is required to convince one that a deluge is not an impossible event.—Wide World Magazine.

In Prospect.

"Have you lived here all your life, friend?"
"No, but I don't get money enough to move I reckon I'll have to."

It is not reasonable that are wanted now, for there are books stuffed with eternal reasonings.—Epitaph.

The town of St. Catharines pays 50 cents for every tree planted and boxed on its streets.

Among the ashes on the Erie railroad wreck was found a body, and on it an accident insurance card for \$3,000, around which the fire had burned everything away, but leaving this card thus identifying the charred remains.

The death of A. D. McLean, Esq., Crown Attorney and Clerk of the Peace for the County of Kent, and the oldest practicing lawyer of the County of Kent, occurred yesterday. He was 48 years of age and came to Chatham in 1841.

A farmer in Wisconsin plants a row of trees along the road he is exempt from working on the road, and who ever burns one of the trees is fined \$5, and the State Horticultural Society offer a premium of \$100 for the best ten acres of forest trees and \$50 for the second best.

Eighteen persons were poisoned by arsenic, administered in their food at a boarding house at New Orleans on Saturday.

A young Rhode Islander, known as Professor Sweet, on Wednesday completed a walk of 100 miles in 23 1/4 hours at the Pawtucket Hotel, near Providence, Rhode Island.

Two surgeons of Clinton, Mass., gave David Maynard chloroform the other day to cut off a diseased finger without pain. On recovering his wits he was pained to find a healthy finger lying on the table and the offending member still in good standing. It all had to be done over again.

TALE OF A SEA-GOING MONKEY.

Captain of Steamship Reports a Sighting Due to Wounded Pride.

The British freighter Errol recently arrived at the Bush Stores after a 12,000 mile trip from the far East. On board the freighter were a number of Chinamen, members of the ship's crew; a few Chinese chow dogs, Japanese, and a lot of monkeys. Capt. Lockhart is the sponsor for this story:

When the good ship was two days out from Singapore a large monkey, one of five aboard ship, escaped from its cage and bolted through the hawse pipe, to the outer rim of which it clung, defying every mother's son of the crew to catch him. The monkey was a most affable or tractable during the trip and had made friends with only one person, Li Tam, the Chinese steward. Li finally coaxed the simian aboard ship, when one of the officers commenced to belabor it with a stout piece of rope. When the officer had concluded the beating he threw the rope on the deck and as it fell it curled up in the form of a noose—a hangman's noose. The officer noticed it and exclaimed in a shocked key: "That's what we ought to give you!"

The monkey was put back in his cage with the bit of rope which he had gathered up. The officers thought he wanted to play with it and when he had finished with it and when the Keeper of the animals made the rounds, he noticed that the self-same monkey that had escaped on the previous day had escaped again. A search was at once instituted, but no monkey could be found and all hope of finding him was given up. But later in the day, when Li happened to glance up at the rigging, he discovered his simian friend dangling at the end of the rope, just as if a hangman had passed the noose over his head.

"Of course it was done by design," exclaimed the captain to one of the incredulous who were listening. "It was not an accident. The monkey was overcome with humiliation because of the beating and had decided to take the officer who made the remark about the hangman's noose at his word."

HOW FOG AFFECTS THEM.

Birds Become Entirely Confused During Heavy Fogs.

Nothing has such a bewildering effect as fog. Only animals which find their way by scent can get about in it with any certainty says Chum.

Birds are entirely confused by it. Tame pigeons remain all day motionless and half asleep, huddled up, either in or just outside their pigeon houses.

Chickens remain motionless for hours during heavy fogs. No bird sings or utters a call, perhaps because it fears to betray its whereabouts to an unseen foe.

During one very thick fog a blind man was found wandering about a certain district in London.

This man was in the habit of coming up every day from the suburb, carrying notes and parcels, and had scarcely ever lost his way before.

Asked why he had gone astray (for he was quite blind, and it was supposed that weather would have made no difference), he said that in a fog the ground "sounded quite different."

Henry Elliott, Esq., of Sherbrooke, N. B., Inspector and Supt. of Bridge Construction for Nova Scotia, says: "A bottle of MINARD'S LINIMENT cured me of a very severe sprain of my leg, caused by a fall while building a bridge at Doherty Creek, Cumberland Co."

Some of the best places are good to be in but bad to stay in.

WILSON'S FLY PADS

Every packet will kill more flies than 500 sheets of sticky paper.

SOLD BY DRUGGISTS, GROCERS AND GENERAL STORES 10c. per packet, or 5 packets for 50c. will last a whole season.

MIKEL, NEW PRESIDENT.

Ontario Municipalities Close Convention—Ottawa Wins Meeting.

Toronto, Aug. 30.—The convention of Ontario Municipalities came to a close yesterday afternoon, after a successful session. A vote of thanks was tendered to the mayor and council for their hospitality and all of the delegates were loud in their praises of Toronto. Mayor D'Arcy Scott of Ottawa, however, thought that the convention next summer should come to the Federal capital. The matter will be discussed by the executive. The same body will decide as to whether the convention will send delegates to the Canadian Union. It was objected that to send five delegates next summer to Medicine Hat would cost \$1,000.

The following officers were elected for the ensuing term: President, W. Q. Mikel, city solicitor, Belleville; vice-president, Ald. Cooper, London; Mayor Scott, Ottawa; Reeve Locks, Yarmouth; Mayor Kennedy, Owen Sound.

Work for Legislature.

Among the resolutions recommended for consideration by the Legislature are the following:

To permit municipal elections to be held on the first Monday of December.

To repeal the Concessions Act and to authorize municipalities to expropriate gas light and power plants.

To exempt municipalities from liability for defective highways.

To permit streets to be extended on local assessment basis against protest vote of the council.

To allow municipalities, at their option, to permit Sunday street cars.

To permit a board of controllers in cities of a population of between 45,000 and 100,000 (Hamilton and Ottawa).

To permit cities to regulate electric wiring.

BE A STRONG MAN.

Increase your vitality and nerve energy, restore vim and vigor to your overworked body. Ferronox will do this for you as it did for Mr. Walter Wood, of Bensport, N. B., who says, "I can say Ferronox has given me a new lease of life. A year ago I suffered so from nervous exhaustion I was scarcely able to drag myself around. My appetite was gone, I had no color or ambition and felt used up. One box of Ferronox started me back to health. I took a number of boxes and my health was completely restored." For men who are tired, pale, nervous and thin-blooded nothing compares with Ferronox. Fifty cents per box at all dealers.

GOVERNOR APOLOGIZES.

For Invasion of Venezuelan Territory by Capt. Calder.

Georgetown, British Guiana, Aug. 30.—The governor of the colony has sent an apology and expressions of regret to President Castro of Venezuela for the invasion of Venezuelan territory reported Aug. 17 by Capt. Calder, in command of a small frontier force from British Guiana, and the seizure of a quantity of balata gum, which, it was alleged, had been collected on British territory.

London, Aug. 30.—The Standard yesterday says it understands that Capt. Calder, who led the detachment into Venezuelan territory, has been removed from his present post. It has been learned, the paper says, that the captain was unarmed when the affair occurred.

\$100 REWARD \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address J. T. CHENEY & CO., Toledo, O.

Sold by all Druggists, 75c.

Take Hall's Family Pills for constipation.

MADE SURE OF IT.

Junior, he asked, have you ever in all your life felt that you had all the buckwheat cakes you could get away with?

Yes, sir, replied Junior, lots of times I've felt that I had enough. How do you know when you've got enough?

Oh, I just keep on eating till I get a pain, and then I eat one more to make sure.

The world is full of men whose intentions are good.

BABY BOOTS.

Pretty Little Knitted Affairs For Their Majesties.

Materials required, half ounce of white and half ounce of pink Andalusian wool, steel needles No. 15. The little shoe part is knitted first with the pink wool. Cast on forty stitches and knit thirty plain rows. Cast off thirty stitches and knit twenty plain rows on the ten stitches remaining. Cast on thirty stitches and knit thirty plain rows, and cast off.

Take the white wool and knit up ten stitches from the toe, and work twelve rows, alternately purl and plain. This forms the top of the foot. Break off the wool and begin at the heel part of

OF PINK WOOL.

shoe and knit up twenty of the stitches. Cast on, knit ten of the needles and twenty from the second side of foot (beginning on the eleventh stitch), making forty-eight stitches on the needle altogether; work one row of purl and begin the openwork pattern for the leg thus:

First Row—Knit one, * wool forward, knit two together, repeat from * until only one stitch remains on the needle, which is knitted.

Second Row—Purl.

Repeat these two rows eleven times, finish the top of shoe by working ten rows, in ribs of two plain, two purl.

To make up the shoe join down the back of leg and on either side of top of foot run a thread of wool into every row of toe part and draw tightly together to bring it into shape. Join at the bottom of foot and slightly contract the heel, says Woman's Life.

With pink wool work a strap a sufficient length to go around the instep in six stitches, always slipping the first stitch in every row; make a loop at one end for buttonhole, and sew a small pearl button on the other end, join to the back of heel and button round the instep.

Warning to the Washwoman.

Warning to incompetent washwomen was conveyed by the laundry exhibition recently held in London. Women who have been worried by badly laundered clothes now have the comforting assurance that "it will all come out in the wash." Many inventions were shown to prove that this is not an age to be stamped by a mere servant problem. "The laundry maid who is not blessed with the artistic temperament is of little value in the world of wash-tubs," said one commentator. "The education of the laundress has been slow but art has found its way into the kitchen and, further, into the region of set tubs. To be a 'good washwoman' in other days it was only necessary to wash clothes well. A far different state of affairs exists today. The old trade has developed into a new profession. There is a vast gulf between the words 'laundry' and 'wash.' Lots of ideas were wrung out at that laundry show. The modern laundress has only half finished her task when her spotless linen emerges from the washing, drying and ironing rooms." It was said.

"She must pack it in nests of rosy paper and sprinkle it with the latest perfumed powder." When such delightful suggestions are put forth it seems a pity that a show should end as quickly as this particular one did.

A Collar Box.

The fad for fancy collars and turnovers has caused a necessity for two new articles on the dressing table—in fact, three if studs and collar buttons are worn—a long, flat receptacle for the turnovers, a box to hold collars and the dressing table is a most elastic piece of furniture. Like the bookcase, it is always full and yet can be made to hold a little more. Its small drawers are a boon to the woman who lacks bureau accommodations; for, on the whole, a long, narrow compartment or drawer is a much more satisfactory place for gloves than a glove box, which takes up too much space on top, just as wells are much more conveniently and safely preserved folded up and laid away than when left on the bureau twisted about a roll. Too many objects on top of a bureau or dressing table is a mistake both against good taste and comfort. They are in the way when dressing and only too often are not kept as immaculate as they should be. On this account celluloid, china or ivory utensils are better than silver ones, although the latter are more attractive when they are brightly polished. If silver is used, a piece of cotton flannel should be kept near at hand so that they may be rubbed off every morning, while once a week they should be cleaned with silver polish.

Skirts of the Season.

Many of the skirts are long, not trained by any means, but just the drabby length, which means that the skirt touches all the way around. This is a most inconvenient length, but it is graceful, and if a woman is not careful of herself upon the shoe question, if she is not equal to wearing smart shoes all the time, there is no length that is as good as the just touching length.

Debutantes and young women out a season are wearing the very short skirts with the very handsome boots of summer, and the matrons are imitating them with very nice results. It must be confessed.

CARTER'S LITTLE LIVER PILLS

CURE SICK HEAD

Sick Headache and relieve all the troubles incident to a bilious state of the system, such as Dizziness, Nausea, Headaches, Distress after eating, Pain in the Side, &c. While their most remarkable success has been shown in curing

Headache, yet Carter's Little Liver Pills are equally valuable in constipation, curing and preventing this annoying complaint, while they also correct all disorders of the stomach, stimulate the liver and regulate the bowels. Even if they only cured

ACHIE

As they would be almost priceless to those who suffer from this distressing complaint; but fortunately their goodness does not end here, and those who once try them will find these little pills valuable in so many ways that they will not be willing to do without them. But after all sick head

Is the name of so many lives that here is where we make our great boast. Our pills cure it while others do not.

Carter's Little Liver Pills are very small and easy to take. One or two pills, taken after meals, are strictly vegetable and do not grip or purge, but by their gentle action please all who use them.

Maple City's Veteran Poet

At 93 Years of Age Capt. Geo. Stringer Writes a Poem for The Planet—An Aged Man with a Remarkable Intellect

The following lines are from the pen of Capt. Geo. Stringer, a pioneer of Kent County, and a man who played a very prominent part in the building up of this district. Capt. Stringer is 93 years of age, and the verses quoted below were written for The Planet a few days ago. It is indeed a wonderful thing to see a man of Mr. Stringer's years still possessed of such a clear intellect. It is safe to say that there are not many men living today who at 93 years of age can equal this verse.

Mr. Stringer is a former sailor, and sailed the Great Lakes when he was a younger man, and at a time when this city was but a village. During his life he has written some really clever verse. He has an acute memory for a man of his years, and tells many interesting incidents which happened in the early days of this country. He has always been of a literary turn of mind and can still recite for hours at a time the sketches from the classics which, when a boy, he learned by heart. Although he is becoming feeble, the Captain is still able to get around to see his friends occasionally, and he is always a welcome caller at The Planet editorial rooms.

ADDRESS TO THE CITY OF CHATHAM.

the Legislative floor,
the Legislative floor,

Will be held in memory for evermore.
Thy Sovereign, wishing to honor thy good name
Sent it west o'er sea, o'er mountain and plain,
And on the wings of the wind it went, until
It anchored in the Garden of Kent.
City of Chatham, I knew thee in thy prime,
Before thou hadst the time to shine,
When laboring bullocks, drawing the wooden sled,
McGregor's Mill, to grind corn for bread.

Often the like might be seen at the mill door,
All the way from the western part of Lake Erie's shore.
Now, in my wane years, weak and weary,
I am wishing for faith to make me cheery.
But if I flee to the city, what waits me there?
But to see profusion that I must not share!
There is a haven I wish to enter,
Where the King of Kings rules in the centre.

I am steering there, through storm and squall
To be there forever, with good St. Paul.
—CAPT. GEO. STRINGER.

Not a drop of Alcohol

Doctors prescribe very little, if any, alcohol these days. They prefer strong tonics and alteratives. This is all in keeping with modern medical science. It explains why Ayer's Sarsaparilla is now made entirely free from alcohol. Ask your doctor. We have no secret. We publish J. C. Ayer & Co., Lowell, Mass.

CUPID'S COURT.

An Adverse Decision, an Appeal and an Oral Argument.

The judge's daughter was perturbed. "Papa," she said, knitting her pretty brow, "I am in doubt as to whether I have kept to the proper form of procedure. In law one can err in so many little technicalities that I am ever fearful. Now, last evening George—"

The judge looked at her so sharply over his glasses that she involuntarily paused.

"I thought you had sent him about his business," he said.

"I did hand down an adverse decision," she answered, "and he declared that he would appeal. However, I convinced him that I was the court of last resort in a case like that and that no appeal would lie from my decision."

"Possibly the court was assuming a little more power than rightfully belongs to it," said the judge thoughtfully, "but let that pass. What did he do then?"

"He filed a petition for a rehearing," "the usual course," said the judge, "but it is usually nothing but a mere formality."

"So I thought," returned the girl, "and I was prepared to deny it without argument, but the facts set forth in his petition were sufficient to make me hesitate and wonder whether his case had really been properly presented at the first trial."

"Upon what grounds did he make the application?" asked the judge, scowling.

"Well," she replied, blushing a little, "you see, he proposed by letter, and his contention was that the case was of that peculiar character that cannot be properly presented by briefs, but demands oral arguments. The fact that he had been omitted, he held, should be held an error, and the point as such a novel one that I consented to let him argue it. Then his argument was so forceful that I granted his petition and consented to hear the whole case again. Do you think?"

"I think," said the judge, "that the court favors the plaintiff."

With Care.

The village Sunday school treat was full swing, and, after a rollicking one, the youngsters were now engaged on a heavy tea.

Little Johnny, though unaccustomed to very rich fare, had been tender to his inner Johnny until he did not accommodate another until, and he was consequently left slightly uncomfortable. Shall I lift you down, my little boy?" was the gentle inquiry of a helper who had noticed the youth gelling about on his seat.

"Yes please, m," assented Johnny, as disesteemed anatomy made him himself as stiff as a poker. "You lift me down, but"—and here his ailing look was truly pathetic—"don't bend me!"

FOR THE BUSY WOMAN.

The Art of Painting Your Own Lingerie Hat.

This is something that will appeal to the—I was going to say lazy, but I mean very busy, woman or to the girl who doesn't want to tire her eyes making innumerable perfectly unnecessary stitches. The painted lingerie hat was thought out and made by the artistic mother of a little girl, and as the mother is not in the least lazy, but, on the contrary, most painstaking and dainty in the way she dresses her family, any substitute that she would suggest would be worth noting.

As it turned out, the hat was extremely pretty and very inexpensive.

the only real item worth considering being a bow of red ribbon tied around the crown.

A wire hat frame and the stamped linen pattern for a child's lingerie hat were bought, with a paint brush and red water color paint. Then, instead of embroidering the design, she painted it, filling up the spaces with red paint which does not spread and colors evenly. The scalloped edge was treated in the same way, and in about half an hour a unique little hat was ready, the material of which, excepting the ribbon, cost about 40 cents.

When it came time to launder the hat, the artistic mother tells me that she simply washed out the paint, which disappeared almost entirely, leaving, however, just enough for the markings of the next application, which follows when the linen is dried and ironed.

As a lingerie hat has always been a somewhat perishable headgear, hardly worth the time spent in embroidering it, a painted hat of this sort is a saver of both time and money, and the effect is really charming. Of course, instead of red paint, blue or any favorite color may be used with a corresponding ribbon.

Among the other novelties seen in children's hats are the chains of flowers on velvet ribbon. This is an effect recently sent over from Paris and can easily be copied by the home milliner. The model hats are usually the turned up wide brimmed affairs on the sailor order. A black velvet ribbon about two inches wide or more, according to the size of the flower, is used for background, and flowers, daisies, small roses or pansies are sewed on at regular intervals, the stems having been completely cut away and the flowers applied almost flat on the ribbon. This ribbon is then used to trim the hat with, and two streamers float down the back—Good Housekeeping.

ODD WAY TO USE DAIKERS.

can easily be copied by the home milliner. The model hats are usually the turned up wide brimmed affairs on the sailor order. A black velvet ribbon about two inches wide or more, according to the size of the flower, is used for background, and flowers, daisies, small roses or pansies are sewed on at regular intervals, the stems having been completely cut away and the flowers applied almost flat on the ribbon. This ribbon is then used to trim the hat with, and two streamers float down the back—Good Housekeeping.

The Reader Who Skips.
A good work of fiction, whether in prose or in verse—we are here speaking only of good works—is a work of art and can be rightly enjoyed only by entering into sympathy with the artist's mind and accepting his work according to his intention. In a perfect poem the place of every word, in a perfect novel the place, if not of every word, of every episode and of every paragraph, is important, and the reader who skips throws away the pleasure he has meant to derive from the harmony of composition, in which very possibly the beauty of the whole may chiefly consist, and despises the best part of the artist's labor. He might as well go to see a good play and then willfully miss every alternate scene—Exchange.

Atmospheric Temperature.
The temperature of the atmosphere cools on an average about 1 degree for every 300 feet that we ascend or warm at the same rate as we descend. The mean temperature at the north pole is 0 and at the equator between 80 and 90 degrees. We can, therefore, get into a temperature 1 degree colder for every seventy or eighty miles that we travel north and in a temperature 1 degree warmer for every seventy or eighty miles that we travel south.

Sound judgment doesn't always make the most noise.

Tragedy in a Country Kitchen.
Full many a gem which should have been raised serene
Burns to a crisp behind the oven door,
And many a sack of flour is born to burst
Unseen
And waste its whiteness on the pantry floor.

CHURCHES

HOURS OF SERVICE

The services in all the churches in the city are held at 11 a. m. and 7 p. m., except the following:—
Seventh Day Adventists—8 and 7.
Campbell A. M. E.—11 and 7.30.
St. Joseph's R. C.—7.30, 9.00, 10.30 a. m., and 7.30 p. m.
First Baptist—11 and 7.30.
Union A. M. E.—11 and 7.30.

NOTICE TO PASTORS.

Pastors and others who contribute news items to this department of Saturday's Planet will confer a favor by seeing to it that their "copy" reaches this office not later than Friday at 4 p. m. Matter received later than that hour cannot be guaranteed insertion.

INTERNATIONAL S. S. LESSON FOR TO-MORROW.

The Two Reports of the Spies.—Num. 13, 17-20, 22-33. Read Num. 13, 14.

Golden Text—"The Lord is with us; fear them not."

Evidently the hosts of Israel were not ready for the Lord's battles, or they would not have sent spies out when God had told them the character of the land had had promised His guidance step by step. Faith goes at God's command and walks not by sight. This was their lesson and is a lesson that we must all learn to-day. The 12 spies spent 40 days to find out if God's words were true. Only 2 of the 12 were "right with God," the other 10 were wrong on faith and could not believe God or help their comrades by their report; they saw the situation through eyes of unbelief, while Caleb and Joshua saw with an eye of faith, whose cry was, "on to victory, we know their God and the people that do know their God shall be strong and do exploits."—Dan. 9, 33.

The majority report caused the unbelieving multitude to cry and weep day and night; they murmured against Moses, Aaron and God for leading them out of Egypt to slay them, and purpose to elect a captain to lead them back again. Then Moses and Aaron fell on their faces before the rebels and Caleb and Joshua rent their clothes and pleaded with them on God's behalf, but the host of cowards would have stoned God's witnesses had not the glory of Jehovah interposed. Thousands of hearts are ready to believe reports of higher critics, skeptics and a lot of unbelieving spies, and to reckon God and His promises and judgments as of no account; whose motto is, "Let us eat and drink for to-morrow we die."

Faith and unbelief, courage and cowardice, debate and conflict were amongst the people of God, but Moses interceded, Jehovah is gracious, and instead of instantly cutting off disobedient, rebelling Israel, He turns them into the desert 40 years to train the rising generation to walk by faith.

When all the old grumblers die out, Caleb and Joshua head this victorious Salvation Army and take possession of the promised land. During those 40 years the Canaanites had a respite, a suspended sentence, and a God-given object lesson in Israel's walk and warfare, with plenty of time for repentance, God would, but they would not; just as men are to-day.

CHURCH NOTES

FIRST PRESBYTERIAN.

Rev. A. H. MacGillivray, pastor. The pastor will conduct the services on both occasions to-morrow, Mr. John Smith will preside at the organ.

Sunday School and Bible Class at 9 p. m.
Regular weekly prayer meeting on Wednesday evening at 8.

CHRIST CHURCH.

Fourteenth Sunday after Trinity. Rev. Robert McCosh, pastor. The pastor will conduct the services and preach both morning and evening to-morrow.

The Holy Communion will be administered at the 11 o'clock service to-morrow.

Sunday School will be held to-morrow afternoon at 3.
The Holy Communion is administered the first Sunday of every month at the 11 o'clock service, and the third Sunday of every month at 8.30 a. m.

ST. ANDREW'S.

Rev. Dr. J. R. Battibay, pastor. The pastor will preach on both occasions to-morrow.

Sunday School and Bible Class at 3 p. m.
Regular weekly prayer meeting on Wednesday evening at 8.

HOLY TRINITY.

Fourteenth Sunday after Trinity. Rev. W. H. Colles will preach on both occasions to-morrow.

There will be short services during July and August.

The Holy Communion will be administered to-morrow morning at the 11 o'clock service.

Sunday School and Bible Class at 3 p. m.
No meetings of church societies until further notice.

Holy Communion on the first Sunday in the month at 11 o'clock and on the third Sunday at 8 o'clock a. m.

Baptism any Sunday at 4 p. m. when previous notice has been given.

PATERSON'S
COUGH DROPS
Coughs and colds cure for complete relief. See how these drops cure the most stubborn cases of coughs and colds. Ask for the three-colored kind in the medicine bottle.

PARK ST. METHODIST.

Rev. Dr. Daniel, pastor. The pastor will preach on both occasions to-morrow.

Sunday School and Bible Class at 3 p. m.
Regular weekly prayer service on Wednesday evening at 8.

THE CENTRAL BAPTISTS.

Rev. W. A. Gannon, pastor. Gospel services in I. O. O. F. Auditorium at 11 a. m. and 7 p. m. Rev. W. A. Gannon will preach at both services.

Sunday School at 3 p. m.
Regular weekly prayer meeting on Wednesday evening at 8.

WILLIAM ST. BAPTIST.

W. E. Matthews, B. A., B. Th., pastor.

The pastor will conduct both services, preaching in the morning on "A Challenge to Unsuccessful Fishermen," and in the evening on "The Folly of Frivolity."

The Sacrament of the Lord's Supper will be administered in connection with the morning service.

Sunday School and Bible Class at 3 p. m.
Regular weekly prayer meeting on Wednesday evening at 8.

VICTORIA AVE. METHODIST.

Rev. W. H. Graham, pastor. The pastor will conduct the services both morning and evening to-morrow.

Classes meet to-morrow morning at 10 o'clock and 12 noon.
Sunday School and Bible Class at 3 p. m.

Regular weekly prayer meeting on Wednesday evening at 8.

LATTER DAY SAINTS.

Services will be conducted to-morrow as usual.

Religio Society every Friday evening at 8 o'clock.

Sunday School to-morrow afternoon at 2 o'clock.

Regular weekly prayer service on Wednesday evening at eight. Question box at the door.

CHRISTIAN SCIENCE.

There will be service to-morrow morning at 11 o'clock, second floor of the Oddfellows' Block.

SALVATION ARMY.

Salvation Army, Union Depot—Knee drill at 7 a. m., meeting for promotion of holiness at 11 a. m., Christian fellowship meeting at 3 p. m., soul-winning service at 7.30 p. m. All services for citizens and soldiers.

CAMPBELL A. M. E.

Rev. B. Roberts, pastor. Services will be held as usual to-morrow.

Class meeting at 12 noon.
Sunday School and Bible Class at 3 p. m.

FIRST BAPTIST.

Rev. J. H. Fenwick, pastor. The pastor will conduct the services and preach on both occasions to-morrow.

Sabbath School at 12.30.
Regular weekly prayer meeting on Wednesday evening at 8.

B. M. E.

Rev. C. M. Walker, pastor. The pastor will preach on both occasions to-morrow.

Regular weekly prayer meeting on Tuesday evening at 8.

UNION A. M. E.

Services will be held as usual to-morrow.

Regular weekly prayer meeting on Wednesday evening at 8.
Sunday School at 2.30 p. m.

MT. ZION BAPTIST.

Services will be conducted to-morrow as usual.

Sunday School at 2.30.

Every Buttonhole

of the

Shirt

Any 3/4" Shirt fits better than any ordinary shirt.

One reason is the accurate, careful spacing of the buttonholes. Unless they meet each other perfectly—if one were even a little higher or lower than its mate—the bosom would pucker—pull—bind.

Buttonholes on 3/4" shirts are placed right, are made right, and stay right, even after many trips to the washbasin.

Get the style you like, in any fabric, or pattern, and get more money's worth when you

TABLECLOTHS.

The "Doubblers" and the "Bubbles" of Olden Times.

In the twelfth century the tablecloths were very large and were always laid on the table double. For a long time they were called "doubblers" for that reason. The cloth was first placed so as to touch the floor on the side of the table at which the guests sat. Then all the cloth that remained was folded so that it just covered the table.

Charles V. had sixty-seven tablecloths which were from fifteen to twenty yards long and two yards wide. He had one cloth which was thirty-two yards long, and that had the arms of France embroidered on it in silk. All of these were fringed.

In the sixteenth century "doubblers," or double cloths, were replaced by two tablecloths, one of which was small and was laid just as we lay ours to-day.

The other, which was put on over it, was large and of beautifully figured linen. It was skilfully folded in such a way that, as a book of that time says, "it resembled a winding river, gently ruffled by a little breeze, for among very many little folds were here and there great bubbles."

It must have required much art and care to make dishes, plates, salt-larves, sauce dishes and glasses stand steadily in the midst of this undulating sea and among those "bubbles" and puffy folds.

However, the fashion had only a short existence, as is apt to be the case with impractical fashions, and toward the latter part of the century a single cloth, laid flat and spreading the floor on all sides of the table, came into general use.

Royalty and Simple Life.

Every now and then our industrious newspaper scribes raise a little of the curtain on the private lives of European royalty and allow themselves some exclamations of surprise at finding how simple it all is. Royalty is popularly supposed to live in a perfect carnival of luxury, and to spend its time in devising new ways and means for the spectacular spending of money. Of course, nothing is further from the truth. There is a lot of human nature even about royalty, and it is pretty commonly true that we do not very much want what we have, and that we yearn for things that we cannot get. Most of the pleasures in life come from the pursuit of something, and not from its capture. The fun is over when the fox is caught, and when we glance into the real privacy of the millionaire we are likely to find him eating steak and onions and apple pie like the rest of us, and looking with a measureless disdain upon the dainties that we had thought most surely would be his exclusive diet.

The latest story of the simple life concerns Queen Wilhelmina of Holland. She is very wealthy, but she has small inclination for the things that wealth can buy. Indeed, she would willingly give the whole of her fortune, and her crown as well, for the luxury of motherhood, which can not be bought from nature by either money or rank. The queen rises early and takes a first breakfast at about 7 o'clock. At 9 o'clock she conducts prayers for the household and then attends to her correspondence. Then she is ready for a walk or a drive before luncheon, which is served at about noon. The afternoon is devoted to audiences. Statesmen and ministers attend at the palace and make their reports, and this is no perfunctory duty, for the young Queen wants to know the why and wherefore of everything. Dinner is at 7 o'clock, and it is just such a meal as one can buy at a middle-class restaurant. Then the evening is passed quietly with books or music, and bedtime comes at 10.30.

Queens are not always happy. Perhaps it might be said that they are never happy. Queen Wilhelmina would be an ideal mother, and in addition to her natural craving for a child, she is haunted by the fear that Germany will make some claim of succession to the Dutch throne. She has told her Ministers that she fears no child will ever come, and has urged them to make provision in good time, but she is still young and the people are hopeful, so that nothing has yet been done.

The Minutest of Shells.

Among the minute existences upon the face of the globe that have been elevated by means of the microscope into an honored position of independence are the foraminifera, mostly marine animals inhabiting many chambered cells. At one time they were considered molluscs, at another they were ranked among the infusoria and eventually they were settled comfortably in the sub-kingdom protozoa. The calcareous shells have in the past formed vast deposits of chalk. They are often to-day congregated as realms of sand. These animals are not always minute, but generally they are subjects imperatively demanding the lens. An ounce of sand has been known to contain 6,000 of their shells, and in the West Indies the figure ran into millions. Your object under the naked eye seems to be merely a pinch of brown sand; under the microscope you have a great variety of the loveliest lilliputian shells, representing every variety of form known to the conchologist.

Drink Taxation in Britain.

According to a recent statement of the Chancellor of the Exchequer, the average taxation per head in Great Britain for alcoholic drink and licenses is approximately 15s. 7d. on an estimated population of 43,643,000. The alcoholic strength of beer and wine varies considerably and there are no statistics, at present, of the quantities at each degree of strength which would admit of the number of gallons of proof spirit being given with accuracy.

Congregationalism's Strength.

The statistics of the strength of Congregationalism throughout the world have just been compiled. The total number of churches, chapels and mission stations is now 12,833, with 1,333,331 church members and 1,602,886 Sunday school scholars. More than half of these are in America.

From Weak Eyes To Strong Eyes

From discomfort to pleasure—is the work that glasses do—when the proper glasses are properly fitted.

Before you can procure the proper glasses, you must have the defect of your eyes examined by an Optician—with those delicate mechanical appliances which determine with unfailing accuracy the extent of the error.

Then the lenses for your glasses must be so made that they will correct the defect.

We will do all this for you and charge only for the Glasses.

WHO RUNS THE CITY?

Everyone Stands from under Re-tearing up of Sidewalk

There is Considerable Complaint in Reference to the Matter

In view of a great deal of complaint which has been made regarding the tearing up of the sidewalk crossing at the Tassman corner on Thames Street, which was mentioned in yesterday's issue, The Planet this morning made inquiry about the matter.

Mayor Stone, who was first approached, said that he was not contented with the matter, and the first he knew about the tearing up of the sidewalk was when it was brought to his attention by Mr. P. D. McKellar yesterday afternoon.

"I don't see what necessity there was for tearing it up," said the Mayor, "but it looks to me as though the contractors were trying to make all the city out of the job. I have had several ratpayers come to me and make complaint about it, and I think that they are quite justified, as the work was a costly piece of work in the first place."

"It was over half torn up before I knew anything about it," was the answer from Ald. Chas. Austin when approached by The Planet.

"I think it was nothing short of a wanton waste to tear up such a substantial piece of work, and I shall certainly make an inquiry about it at the next session of the Council. I have not heard any good reason advanced so far to show the necessity of tearing it up."

"It certainly was not right to tear the sidewalk up," said Ald. William Potter, "There was no necessity for tearing it up, and I certainly can't approve of such extravagance. It just means that much extra expense to the city, and I would like to hear who gave authority for so doing."

An endeavour was made to interview Ald. Benson, chairman of the Board of Works, but he could not be found before to-day's noon-day edition of The Planet went to press.

AUTO MISBEHAVED

Automobile No. 3027 is registered at Police Court as misbehaving it—last night. An information will be laid against it for speeding on the city streets.

Numbers of all autos going faster than the regulation rate will be taken from now on by the police, and an endeavour will be made to convict all parties breaking the law in this respect.

OUR LAWNS

A citizen remarked that the threat to enforce a meter charge for water used on the lawn is already having effect, because never in years have the lawns in Chatham presented so parched and neglected an appearance.

A strong contrast to the beautiful fresh green of the past—when a free use of water was encouraged by the charge of a flat rate according to size of lawn, whether you used the water or not. And the flat rate brought a better revenue to the city.

A FLORAL PARADE

The managers of the West Kent Agricultural Society are sending out letters to all automobile and carriage owners of the city with a view of holding a "Floral Parade" on Fair Day.

All motorists in the city and all single and double carriage owners are requested to take part in this new and unique idea. The cars and vehicles are to be decorated with flowers and bunting. As an inducement for all to take part the directors are giving a silver cup as a first prize for the best decorated auto, and a similar cup for the best decorated single or double carriage.

This parade should be a great feature at the Fair, and it should be the duty of all automobile and carriage owners to take part in it and make it a decided success.

THE LATE MR. BROWN

The funeral of the late Stephen Brown, whose sudden death from a vicious horse was recorded in yesterday's Planet, will take place Sunday afternoon at 1:30 from the deceased's late residence on the seventh concession, Raleigh, to Maple Leaf Cemetery. Rev. Mr. Armstrong, pastor of the Wesley Methodist Church, will officiate.

The late Mr. Brown's son Roy, who was in the city yesterday making arrangements for the funeral, told a Planet reporter that his father was attempting to take the horses off the horse when he received the fatal kick.

A widow and the following children are left to mourn his loss: Mrs. Riley Pardo, of Munroville, Ohio; Mrs. J. T. Toole, of Cleveland; Mrs. Wesley Williston, of Louisville, Ont.; Miss Mabel Brown, at home; Charles, Walter and Arthur Brown, of Chicago, and Roy Brown at home. The deceased is survived by his aged mother, who lives at his late home, as well as the following brothers and sisters: James, of Dresden; Joseph and William, near Ridgeway; Levi, of St. Thomas; Mrs. Hodge, of Chicago; Mrs. Vanrant, of Detroit, and Mrs. Harwood, of the eighth concession, Raleigh.

DISTRICT

DRESDEN

Dresden, August 29.—Mrs. J. McE. Murray has invited a number of little children to a picnic in Jeff's woods on Friday afternoon.

Mrs. John McEvan and children returned from Lake Onon on Thursday. Mrs. Pat Burns, of Lyons, N. Y., is visiting her aunt, Mrs. Thomas E. Knott, concession 3, Dawn.

Mrs. I. Forshaw returned on Thursday from a two months visit with friends in Hamilton.

Miss Grace Laird, has issued invitations to an afternoon tea on Saturday afternoon.

The bowlers visited the Thamesville and Bothwell rinks on Thursday. A number of ladies were bowling on Wednesday afternoon and enjoyed it so well that they intend to keep it up.

THAMES ST. PAVEMENT

John Fallahes, local representative for the Warren Bituminous Co., is in Toronto, making an inquiry about the curious order issued by General Manager McKendrie yesterday to the effect that paving operations should cease on Thames street.

The Mayor endeavored all day yesterday to get into telephone connection with Mr. McKendrie, but was unsuccessful. He says, however, that he believes the stopping of the work has been through some error, and he hopes to see it resumed on Tuesday without further hitch.

A POPULAR VOCALIST

Word has been received in this city from Sam. I. Slade, Detroit's favorite basso, to the effect that he will be in Chatham to resume his classes in voice culture on Monday, September 9. Mr. Slade has just returned from a splendid vacation, and says he is feeling in excellent condition.

Mr. Slade has been coming to Chatham for some time. He has a very large class, every pupil in which is making splendid progress. Mr. Slade is a teacher of more than ordinary ability, and this city should feel fortunate that she receives a visit from this talented musician twice each week.

Mr. Slade is very popular, not only in musical circles, but also among the men of the city, and they, as well as his pupils, will be pleased to learn that he is soon to resume his visits to the Maple City.

CRUEL MISREPRESENTATION

A poor old man, named John Carpenter, an inmate of the House of Refuge, who accidentally fell in the river yesterday afternoon, and was drowned, was the victim of one of the Banner's yellow tactics last evening. The paper made a frantic effort to make out the man had suicided, and wrote this poor old gentleman's obituary in highly colored style, in an endeavor to create sensational copy from the aged and friendless old man's unfortunate ending. The deceased's gray hairs should entitle him to greater respect even from the Banner.

The truth of the matter is that the late Mr. Carpenter, who was 70 years of age, accidentally fell in the river and was drowned. His body was afterwards found by some children bathing. He had been an inmate of the House of Refuge for the past two years, and was brought here from Ridgeway. He has no known relatives.

The funeral will take place this afternoon at three.

CARD OF THANKS

The Sisters in charge of St. Joseph's Hospital, Chatham, acknowledge with many thanks the receipt of twenty-five dollars, so generously donated to their institution by S. Somers, Esq., Warden of the County of Kent.

IT IS AWFUL

It pays in this world to keep right at one thing.
But it's awful to be the one thing.

MARKETS

Plums formed the new commodity on the local market this morning. They were selling at 25 cents per basket. Quite a number of persons were complaining about the high price of apples on the outside market. A man with a few bags of scrumptiously looking apples for the fruit, while those who were wise enough to pay a visit to the inside market as well, found a lady offering a much better class of apples at 25 cents per peck. Butter, eggs and poultry remained at old prices. Some were asking 16 cents for eggs, others 17 cents.

The prices were as follows:

DAIRY PRODUCE

Butter, per pound, 25c.
Cheese, per cake, 25c.
Chickens, each, 20 to 25c.
Chickens, live, 40c. per pair.
Eggs, per dozen, 16c to 17c.

FRUIT AND VEGETABLES

Apples, per peck, 25c.
Beets, two bunches for 5c.
Beans, three quarts for 10c.
Black currants, per box, 16c.
Blackberries, per box, 20c.
Carrots, two bunches for 5c.
Celery, per bunch, 10c.
Cauliflower, per head, 5c to 10c.
Cabbage, per head, 5c.
Corn, per dozen, 7c.
Cucumbers, four for 5c.
Green onions, 2 bunches for 5c.
Green peas, per quart, 15c.
Lettuce, three heads for 5c.
New potatoes, per peck, 25c.
Thyme, per bunch, 5c.
Raspberries, two bunches for 5c.
Rhubarb, 3 bunches for 10c.
Raspberries, per box, 20c.
Sage, two bunches for 5c.
Tobacco, per bale, \$2.
Tobacco, per bunch, 5c.
Thyme, per bunch, 5c.
Tomatoes, per box, 5c; peck, 40c.
Tobacco, 5c a hand, or per lb. 10c.

Honey per pint, 30c.
Lard, per pound, 15c.
Mixed pickles, per bottle, 15c.

FLOWERS

Asters, per dozen, 15c.
Geraniums, 5c. to 15c.

HAY

Hay, per ton, \$7 to \$9.

FISH

Pickrel, per pound, 10c.
Perch, per pound, 10c.
Trout, per pound, 12 to 15c.
White fish, per pound, 12 to 15c.

Mrs. John Earl, Detroit, and her nieces, Misses Bessie and Gladys Berry, of Lima, Ohio, have returned to Detroit after spending a few days with Mrs. Earl's mother, Mrs. M. Douglas, Dufferin Ave.

Save your dollars by calling at W. E. Rispin's ticket office, 115 King street, if contemplating a trip; if not thinking of going away come and see us anyway, perhaps you will.

The ladies of the Hospital Society will take the management of Wonderland on Tuesday, Wednesday and Thursday afternoons and evenings, Sept. 3rd, 4th and 5th. New attractions have been procured and the ladies hope for a large attendance.

A full line of ready made clothing and gents' furnishings will be opened up by AM Stone in Miles' Block, opposite the Market, on Tuesday next. The store will be known as the "Cash and One Price Store," and great bargains will be given purchasers. The goods in this store will be sold at the lowest possible advance on cost.

A gentleman buying a bottle of Veteran's Sure Cure, said: "This is a small bottle for 50c." I replied, make a calculation. A 12 oz. bottle of other medicine costs \$1; the dose is 1 tablespoonful 3 times a day, equal to 11.2 oz.; the 12 oz. lasts 8 days. That 50c. V. S. C. bottle contains about 150 days' medicine; 18.2 times as much as the large bottle, saving of \$18.00. In the one you pay for water and glass. V. S. C. is concentrated medicine without water. It is the medicine for all classes, 50c. and \$1 bottles. At druggists. Mailed anywhere by The V. S. C. Co., Chatham, Ont.

Come early and avoid the rush. Labor Day single fare Saturday, Sunday, Monday, return Tuesday; W. E. Rispin sells 'em, 115 King street.

The Daily Planet's market report was cut short yesterday. They forgot about The New York Clock Store and its bankrupt sale figures.

Parties having accommodations for boarders, ladies or gentlemen, should leave their names and addresses at the Business College.

Send your children to Parrott's next Tuesday, for School Books and they will be carefully looked after.

Cheap rates to western points will be on sale by the G. T. R. from Sept. 1st to Oct. 31st. For rates and further information call at the C. P. R. ticket office, corner of King and Fifth streets.

Rev. A. J. Brown has invited Bro. Warren Martin to visit to-morrow his churches at Tyrone, Wabash, and Dutton, where he will demonstrate on canvas the life, warfare and religious rites of Israel in the Wilderness.

All School Books bought at Parrott's next week, may be changed if they are not the correct ones.

Rev. R. McCosh will preach in Christ Church on both occasions to-morrow. The Holy Communion will be administered at the 11 o'clock service. Sunday School will be held for the future in the afternoon at 3 o'clock, instead of the morning.

It was Mrs. (Dr.) Butterfield, of Ottawa, Ill., who was injured in the accident on Saturday last, and not Mrs. B. Rothwell, her mother, as previously announced. Mrs. Butterfield is spending a few days with her parents and with her sister, Miss Louise, from Chicago.

A. F. Stephens, Master of the L. O. L. No. 1041, treated the members of the Erie and Drum Band to a launch ride down the river, and, on their return, treated the boys to refreshments at his residence, on Adelaide Street, after which they adjourned to the parlor, where singing, games, etc., were participated in until midnight, when the boys dispersed for their homes, after voting general Fred a jolly good fellow.

The Michigan Central Railroad has issued special instructions in regard to the handling of explosives. Every trainman has been supplied with printed orders as to the care he must exercise in the handling of dynamite, nitro-glycerine, and commodities of the kind. The document is voluminous. Men are kicking because it states that any slip in the orders will mean instant dismissal from the service.

The Harwich annual picnic will be held on Thursday, September 5, in Breen's bush, concession 4, Centre Side Road, and a cordial invitation is extended to all to attend. Orr's orchestra has been engaged for the occasion and refreshments will be served on the grounds. There will be dancing in the afternoon and evening, and speeches will be delivered by H. S. Clements, M. P., Arch. McCoig, M. P. P., and others, and Mayor Stone, of Chatham, will act as chairman. Bring your baskets.

The far lands of Athabasca, according to Dr. Robert Bell, extend over an area of 1,350 square miles, with an average depth of 150 feet, and containing about eleven million tons of tar substance. It is proposed to manufacture oil from these sands and to use them for fuel and roofing. Similarly, the sands along the shore of Lake Erie contain enormous stores of the best iron, which one day may be recovered to industry.

ERIEAU

Erieau, Aug. 31.—Mrs. Sengle and her son, who have spent the last three weeks at Unedea Rest Cottage, returned to their home yesterday.

Mrs. (Dr.) Norman McLean and little daughter Mary, of Boston, who have been spending the summer here, have returned to town.

Mr. and Mrs. Jas. Glenn have closed up Killarney.

K. Merrifield came out last night to assist his family in the post-season fitting back to town.

Ex-Warden John Vester, of Harwich, returned from a visit to Toronto Fair last evening, and proceeded on the train to the Eau. He says that the Fair is a magnificent exhibition, and the attendance is greater than ever. Mr. Vester also says he saw the attempt to demonstrate the new flying-boat, and declares it to be a failure.

Master Morris Smith entertained a number of his friends on the beach to celebrate his tenth birthday. A very enjoyable time was spent by all present, and the little lad voted a right royal good fellow.

Miss Olive Richards, who has been a guest at The Mushroom, returned to town last night.

Miss Grace Gardiner, of Rondeau, came down from Blenheim last night.

The launch "Fearnot" brought a party of thirty-three over from the park last night. Some of those on board were Dr. Del Marr and Mrs. Marr, of Ridgeway, and Miss Ethel Gilles, of Chatham, who are summering at Terrace Beach; Misses Genevieve Locke, and Muriel Dauphin, of Rondeau, Jenny and Mary McKinley, of Ridgeway; Mr. and Mrs. Albert McArthur, and Messrs. Ralph Adams and Jan Eastlake.

Onesque Cottage, which has been the scene of many merry gatherings this summer, is closed for the season, and the jolly party of friends have dispersed to their homes.

The last Band Concert and hop of the season, which took place last evening, was much enjoyed by the large crowd. The Rosemarie threw her powerful searchlight on the crowd and made the scene look very gay indeed. Mr. Fellows brought a number over from Shrewsbury in the "Togo," one of those present were the Messrs. Massey, Campbell, Merritt, Scipione, and Taylor, of Chatham; Wm. Smith, J. W. Wilson, H. Williamson, C. Gilles, and R. Briscoe.

Mrs. Thos. Brundage and son Fred are picnicking on the bar.

Mr. W. R. Phillimore, Miss Phillimore and Miss Laura Phillimore are spending the day with friends here.

Miss Erva Thompson is the charming guest of Miss Helene Pilkey at Miss Thomas' cottage.

Mrs. John Clark, of Blenheim, is spending the day with friends here. The "Flickering" of The "Flickering" is one of Erieau's most pleasing hostesses.

Mr. Barnett, of Cleveland, has closed his summer house for the season and left for "Roosevelt Land."

Mr. and Mrs. Chris. Smith and little daughter are Erieau visitors to-day.

Mrs. Piggott was successful in catching a large pike yesterday, after being out only a short time.

Miss Hattie Stephens, of King St. West, spent Friday at the Burdell.

J. C. Kerr is at the Eau to-day preparing to move his family to town.

Mr. Thos. Piggott, of Cleveland, joined his family here yesterday, where they will remain until Sept. 10.

Mrs. Andrew Thomson, Stanley Ave., spent yesterday with Mrs. A. Park at Beverly Lodge.

Mrs. Chas. Kallier, William St., is the guest of Mrs. M. D. Smith at Minnewaska.

Mr. John Park examined at the Eau to-day and is busy putting away his boats for the winter.

Mrs. Wilfred McKenzie, of Glendale, took her little daughter, Elizabeth, into Blenheim yesterday. The little girl is suffering from fever, and her mother was anxious to consult a physician.

Mr. and Mrs. E. B. Jones came out to their cottage last evening to spend the week-end.

P. K. Perry, of Toronto, is registered at the Bangslow.

Mrs. (Dr.) Langford and son, of Blenheim, and nephew, Mr. Arnold, of Bracebridge, spent the day fishing down near the lighthouse.

Mrs. W. R. Fellows and children returned this evening from Blenheim, where they have been spending the last few days.

Mr. Joe Moore, of Ridgeway, Miss Winnifred Stalker, of Toronto, and Misses Lily and Bertha Ochrane, of Ridgeway, came down to Blenheim last evening in an auto. From there they took the train to the Eau to attend the band concert.

Miss McKinley, of Ridgeway, was the guest of Mrs. W. D. Samson on Thursday.

As the summer draws to a close, more strenuous are the efforts put forth to secure fish. Roy Park has been more than encouraged on various occasions, and yesterday he was successful in landing a string, comprising a blue pickerel, a fine bass and three splendid pike.

The Eau and these days, not because the long cold evenings are here, not because the cottagers are packing their household goods and hieing themselves to town, but because a wee, small boy has deserted the blue waters and his familiar form is seen no more bounding along merrily before the wind.

This little lad is the possessor of a large rowboat, at least it is large for him, and of a pair of oars, a dark blue awning, a white duck hat and a few feet of weathered canvas.

FALL DRESS FABRICS

Our reputation for carrying the most complete lines of Dress Goods has been established for many years past and it is due to our past success and continuous effort that

MONEY TO LOAN

Tom Groves In England

He Pays a Visit of Inspection to several Big Gun Boats and Gives a Few Impressions—A Delightful Picnic

Halifax, Eng., Aug. 16, 1907.
 To the Editor of The Planet:
 I am having a whirlwind of a time. I am doing the heavy, and the pace is swift. At the present time I am not envying Rockefeller or Carnegie. I have nothing to do but to study out my own pleasure, and you can depend upon it that I am flying high with money in my pocket, all I want to eat and drink, and am living among the most hospitable people, to my fancy, to be found anywhere. I think the North of England people hold the Blue Ribbon. I spent a week in Newcastle-on-Tyne, and of all the towns that I have visited, it is the most interesting in the matter of the character of its people, and their free and easy style of living. I was there on a Saturday night, and for blocks the streets and sidewalks were jammed with people. The pit men and their wives come in from the surrounding districts—and you talk about the hotels doing business! It's a depression all the time. I never saw the equal.

Well, Mr. Editor, I got a treat in Newcastle which very few men can get unless they are in with the local push. I had the honor of inspecting the latest type of battleship, now under construction at Harbottle-on-Tyne. It is called the *Lord Nelson*. Now, Mr. Editor, when I tell you I was the guest on the battleship of none other than the head inspector of the guns, you will have some idea of the importance of a Canadian in England. The inspector I speak of is responsible for the guns from start to finish. He is in the employ of the Government, and all of the guns have to be accepted by him. Perhaps you may wonder how I got on the good side of my influential friend. This gentleman and his family are very great friends of my sister, Mrs. Hill.

I have not the time at my disposal to give an account of my two hours' visit, but you will have that waiting in another installment. I may say that the guns in position and finished at the time of my visit were the two big fellows fore and aft. The guns on one side were also finished. I also had the pleasure of being introduced to the head inspector of the submerged torpedo department. King Edward himself could not have been more courteous or obliging in the matter of explanations. The one thought which was ringing in my ears during my visit to this battleship was, that this country was perfectly safe upon this point. I am prouder of the Royal Navy to-day than I have ever been in my life, and the thought brings vividly to my mind the famous words of Lord Blandford, "We've got the ships, we've got the men, and we've got the money, too."

Another surprise was in store for me from the same gentleman of the battleship. We went to Harbottle-on-Tyne, and inspected the torpedo boat destroyer *Ghoulra*. She is almost ready for her trial. You have no doubt read in the press lately of H. M. Torpedo Boat Destroyer *Cossack*, making forty miles an hour. The *Ghoulra* is the same type of boat, only built by a different contractor.

But I must pass on. Newcastle is a pretty place, and there seems to be lots of work for its inhabitants.

I saw the big Atlantic liner the *Mauritania* of the Cunard line, one of the biggest ships in the world, getting her finishing touches put on. I have seen very little drunkenness, but they tell me it is a great place to get a jug, and many ways and means of getting liquor during prohibited hours. Any man who can show a railway ticket which has been used that day can get his drop. Another land office business is situated three miles out of Newcastle—Gosforth Park. You talk about hitlers, autos and cars, and men walking out, it was a surprise to me. There are no questions asked, and you can get all you can pay for in the drinking line.

I went from Newcastle to Hartlepool for a short visit and then pushed on to Darlington. I landed in the latter place on a Saturday, and met a man who served his apprenticeship with me. So Saturday night I was an invited guest to take a trip on Sunday to Whitley Bay, on the sea coast. There were thirty-five in the party, and such a bunch! It was their annual outing. When we arrived at the station Sunday morning, a saloon carriage was ready with four tables in the centre. We had just got nicely started on the run, when two men started to unpack some boxes. There was any kind of liquor you might desire, whiskey, gin, bottled beer, and stout. Also cigars. I asked how they got this stuff on board. They said that it was delivered Saturday night at the station. Well, we had an hour and a half of that style. Of course we had seltzer, but I am not saying this to make you think I am drinking seltzer, but I did go after the choice cigars, and commenced to wonder what would come next.

We arrived at Tynemouth all O.K. The program was, to walk a mile and a half with three stopping places. I am mentioning this to show you how the travellers get their beer. The first hotel we came to we found two policemen standing outside. We went to the door and knocked, and a man answered, asking us where we were from. If we had a railway ticket, and if we were travellers. You go in and get all you want at these places. They are crowded with hundreds of men travelling on bicycles and other wheels. Well, we landed at our destination, and a beautiful dinner, well served, was waiting for us. We were a jolly crowd when we got home that night, after the experiences of our splendid outing.

At present I am at Halifax, and Sourby Bridge, which are famous for their carpet factories and other manufacturing concerns. It is a grand sight to see the mill girls leaving work.

They turn out of the factories walking two together. I must have seen about eighty walking arm in arm. They all wear a neat eel and a little shawl over their shoulders. They are a jolly crowd, but you ought to see them in the evenings. Some of them are pretty as pictures.

I left for Blackpool in the morning. Trusting that you are well, and with best wishes for good old Chatham, I am,

Yours sincerely,
 TOM GROVES.

Behind the Choir Curtain

By VIRGINIA BLAIR.

Copyright, 1907, by P. C. Eastment.

There had been an immense amount of irreverence in the choir before the new soprano came. The tenor and the alto and the bass and the old soprano had flirted from the opening anthem to the benediction, and as they were hidden from the congregation by a green baize curtain there had been no scandal, although certain members of the session had complained of weird sounds that had seemed to echo from the organ loft and die in the steeple.

With the advent of the new soprano, however, came a different state of affairs. Both the tenor and the alto fell in love with her at sight, and the alto, being forty and fat and fair, submitted comfortably to the new singer's conquest and smiled on her in a way unprecedented in choir history, where the green baize monster is supposed to rage rampant.

The new soprano was not irreverent, and hence it came about that romance was succeeded by religion, and the tenor and the alto paid strict attention to the responses and to the sermon and bent their heads during prayers, although so earnest were the soprano's meditations that the bass was constrained now and then to glance at her and after intercepting the tenor's ardent observation would again seem wrapped in his devotions.

At the time of the opening prayer the sun came through the rose window. A white dove spread his wings against the stained glass background, and as the soprano stood up for her solo he seemed to hover over her head, and her shining hair made a golden halo.

"Oh, she's too good to be true," the bass told the tenor as they went home together one Sunday in May.

"She is perfect," the tenor declared fervently. "We are a lot of sinners, and she has come among us like a little saint to make us ashamed of ourselves."

It was discovered after three weeks that the bass had given up smoking.

THEY HAD TEA AND MUFFINS.

In five weeks the tenor signed the pledge, and in six the alto stopped bleaching her hair and came to choir practice with her head tied up in a veil to hide the inevitable discrepancies as to color.

"She's a dear little thing," she confided to the bass. "She's poor and takes care of her mother."

"I'll take care of them both," the bass declared ardently. "If she will let me."

The tenor having made the same statement, the alto carried the news to the soprano.

"They are both in love with you, my dear," she whispered one Sunday morning when the green curtain had been drawn and the congregation had settled down comfortably to hear the sermon.

"I'd rather not talk about such things in church if you don't mind," the soprano said gently, and the alto agreed hastily and gave her earnest attention to the preacher.

"But tell me one thing," the tenor said to the alto confidentially at choir practice, "how are we going to ask her? Her mother walks home with her after all the services, and she hasn't asked us to call, and she won't talk about secular things in church and there you are?"

"Is love a secular thing?" the alto questioned sentimentally.

"She says it is," the tenor stated, "but I think it is divine."

"Things came to something of a climax when the soprano's mother was taken sick."

"Now is your chance," said the alto, all in a flutter, as she leaned toward the tenor.

But the bass was already begging the privilege.

"I had hoped you might let me," the tenor said as he stumbled over two chairs to get to her.

"Why not both of you?" said the soprano. "It's on your way home, and you will be company for each other the rest of the way."

"Oh, the aggravation of her!"

grained the tenor as he went to get his hat, and the bass said things to himself in a dark corner.

The soprano invited them in, and they found her mother sitting up in a big chair, and they had tea and muffins served by the music hands of the soprano, who seemed more desirable than ever in this setting of domesticity.

"We might as well meet it like men," the bass told the tenor as they went home afterward. "We both love her, and if we are ever going to get a chance to ask her one of us will have to stay away next Sunday night, and the other one can take her home."

"Well," the tenor agreed, "but how shall we decide who will take her?"

"I'll toss a nickel," said the bass. "Heads I win." And he forthwith flipped one, and it turned up tails.

"Just my luck," said the bass gloomily. "But if you have the good looks I have the brains, and I shall know how to plead my case when the time comes."

The tenor was jubilant.

"I shall have first chance," he said. "When he talked to the alto on Sunday morning the bass was not sanguine. 'The tenor is young and handsome, and I won't be it.'"

The alto comforted him.

"If I had the choosing I should pick you out," she said, and something in her voice made the bass turn and look at her. She had on her new summer hat, and her hair was prettily brown where it had grown out, and there was about her an effect of youth and freshness that belied her forty years, and that made the bass, with his weight of forty-five, feel old.

"You are always my good friend," he said and squeezed her hand ever so slightly as he rose to sing a duet with the tenor.

In the solo part the tenor's voice rang out with such a note of triumph that the soprano caught her breath as she heard it. It was as if he sang, "I love, love, love!" and yet the words were sacred. Within the breast of the little soprano something new stirred, something that was touched with the breath of divinity, so that it seemed no sacrifice for her to think of it in church.

"How beautifully he sings!" she said to the alto, and the alto agreed, "Yes, indeed, but her eyes were on the bass, who now took up the strain."

When the tenor sat down, the soprano whispered in the shelter of the curtain, "How beautifully you sang!"

And the tenor said, "I sang to you," and between them flashed a glance that made the bass groan, and he murmured to the alto: "The game is up. I have lost. They are talking love in church."

"It's as good a place as any," said the alto. "There's nothing hot so sweet in life as love's young dream. She wiped her eyes as she said it, and the bass found himself asking,

"Do you really think that young love is as steadfast as the love of old friends?"

"Have you just found that out, Billy?" the alto questioned.

"You have helped me to find it out," said the bass and squeezed her hand under the hymn book.

And under the hymn book of the soprano the hands of the two young lovers met.

"The beautiful part is that you told me in church," said the soprano, with her blue eyes lighted with divine fire.

"Yes, that is the beautiful part," said the tenor as, regardless of the alto and the bass, he kissed her beneath the green baize curtain.

A Plea For Enlisting.

No man who will look carefully into the work of the army or of the navy can fail to realize that a career in either branch of our military service is one to which any man may give himself with the fullest devotion and with the highest ideals. Americans, as a rule, know little about the actual work of either of these services, and few realize that when a man enters the service of the army or of the navy, whether as officer or enlisted man, he enters a great school, a school in which is taught not only the discipline of self-restraint, of cleanliness, of devotion to duty, but in which are taught also the elements of an education. An enlisted man who enters a regiment of the army, barely able to read and write, comes out, if he be a man of ambition and industry, at the end of three years in possession of the fundamentals of an English education. His officer stands to him not only in the relation of a teacher and a friend. There is no career open to an American boy, unless it be that of a teacher, which offers a larger opportunity than that of the army or navy officer to minister to the service of men.—President H. S. Pritchett in Atlantic.

The Size of the Sea Horse.

The popular mistaken idea as to the size of the sea horse is a constant source of amusement to the guards at the aquarium. According to them, visitors, after looking at the big sea cow and peering into the tank where the turtles lead a placid life, next begin to hunt around among the inhabitants of the big floor tanks to find the sea horse. They crowd all the placards of the big tanks; then, failing to discover any immense fish which closely resembles a horse, they turn to a guard as a last resort. When they are directed to one of the smaller tanks upstairs and when they learn that this supposed monster of the deep never attains a size of more than ten inches they are amazed enough. The specimens of the sea horse at the aquarium are much below the maximum size, and when seen clinging by their tails to the sides of the tanks, the objects in the tank look more like little chessmen than anything else.—New York Sun.

SUPPORT NEW SULTAN

Mulai Hafiz Would Satisfy French Demands.

Tangier May Be Imperilled — Withdrawal of Troops Would Leave Raisuli Unopposed—Cruiser and Torpedo Boat Sent to Morocco—Will Place France in Delicate Position—Protect Europeans.

Paris, Aug. 30.—A despatch to The Matin from Casablanca confirms the report that Mulai Hafiz, the newly proclaimed Sultan of Morocco, had issued a proclamation at Masagan, pointing out that the policy of Sultan Abdul Aziz had been ruinous to Morocco, and stating that he proposed to satisfy the French demands and enter into good relations with France and the other powers. The proclamation is regarded as being of the greatest importance, as it implies that Mulai Hafiz has the support of all the principal tribes of the southern part of Morocco.

The Tangier correspondent of The Matin telegraphs that special couriers have arrived at Tangier from Fez, bearing orders from Sultan Abdul Aziz to the Moroccan War Minister, Cabas, to immediately send two cadets, with troops, to join Gen. El Merani and go with them to Fez. If the order is carried out, the correspondent adds, Tangier will be depleted of troops, and be at the mercy of Raisuli, who is described as being much encouraged by his victory over Gen. El Merani.

The French Government yesterday ordered the armored cruiser *Dessix* to proceed to Tangier from Toulon, with instructions to protect the European population of that port.

The torpedo-boat destroyer *Dart* has also been ordered to sail for Morocco. The Temps raised the point that if Mulai Hafiz proves to be friendly, France enters on a most delicate situation, as by the terms of the Algerian conference she is bound to respect and maintain the authority of the legal Sultan, who, for the most, is Abdul Aziz. The Temps remarks:

"What will come to pass if it is to his rival that we shall owe the pacification of Morocco? The utmost tact is essential in handling the problem."

The Temps adds that the Moroccan question has been singularly simplified since the German army, which has placed difficulties in the way of France, which has no intention of menacing either the integrity of the country or the commercial liberty of the powers, has said that the change which has occurred in German opinion is surprising in its rapidity. The paper then suggests that "negotiations ought to be opened in order that certain problems interesting to Germany shall receive solutions satisfactory to that country."

Bookmakers Fined.

Fort Erie, Aug. 30.—Eight bookmakers from Buffalo, accused of violating section 228 of the Criminal Code, by keeping a common gambling house at the Fort Erie track, were convicted by Magistrate Rathbun of Fort Erie yesterday morning. They were fined \$100 each, without costs, or three months in jail.

Chief of Police Kays gave evidence as to having bet \$2 and Magistrate Rathbun declared that the arrangements made the location of the stool a "place," as spoken of in the law.

An appeal will likely be taken.

War on White Slave Traffic.

Washington, Aug. 30.—A systematic effort is to be made by the bureau of immigration to put an end to what is popularly known as "the white slave traffic," which has been conducted especially in cities on the Atlantic seaboard for a long time.

The method with which this is accomplished is so well devised that the victims of the importers practically invariably avoid detection by reason of the thorough coaching they receive prior to embarking.

Rossland Miners Protest.

Vancouver, B. C., Aug. 30.—Rossland Miners' Union has sent a strong deputation to Premier McBride to take action against the Crow's Nest Coal Co. for alleged violation of its charter requiring sufficient and continuous supply of coke for smelters and mines in Yale and Kootenay districts.

The present shortage is due to the shipment this year of twenty-seven thousand five hundred tons of coke to United States smelters.

Two Boys Suicide at Sea.

New York, Aug. 30.—Two suicides, both boys, occurred from the steamer *Patricia*, which arrived yesterday from Hamburg, Boulogne and Plymouth. Baruch Jaffo, a teenage passenger, aged 18, jumped overboard on Aug. 18, and Heinrich Henke, aged 18, a member of the crew, jumped into the sea two days ago. Neither body was recovered.

Kills Sister.

Pottsville, Pa., Aug. 30.—Thos. Lavelle, a prominent hotelkeeper of Girard, Ill., shot and instantly killed his sister, Mary White, while sleeping, early yesterday, and then fatally wounded himself. He is probably insane.

To Prevent Accidents.

Cobalt, Aug. 30.—At the inquest into the death of Alex. Groulx, killed by a stone during a blasting, the jury recommended the local authorities to take steps to minimize the possibility of accidents in the use of explosives.

Lynched Negro.

Columbus, Miss., Aug. 30.—A mob lynched John Lipsey, a negro, who, it was said, criminally assaulted Mrs. Ed. Windham at her home near Pickensville, Ala. Mrs. Windham is in a critical condition.

Settlement For British Columbia.

London, Aug. 30.—The Salvation Army have arranged with the British Columbia Government for the selection of a settlement for 1,000 persons in 1908.

Cough Caution

Never, positively never poison your lungs. For cough—ever from a cold or whooping cough—always heal, soothe, and ease the irritated throat tubes. Don't blindly suppress it with a suppressing poison. It's strange how soon this finally comes about. For twenty years Dr. Shoop has constantly warned people not to take cold cures or suppressions containing Opium, Chloroform, or similar poisons. And now a little late though—Congress says "Put on the label, if poisons are in your Cough Mixture." Good! Very good! Hereafter for this very reason, mothers, and others, should insist on having Dr. Shoop's Cough Cure. No poison marks on Dr. Shoop's labels—and none in the medicine, else it must have been on the label. And if it's not only safe, but is said to be by those that know it best, a truly remarkable cough remedy. Take no chance but particularly with your children. Insist on having Dr. Shoop's Cough Cure. Compare carefully the labels with others and note the difference. No poison marks there! You can always be on the safe side by demanding

Dr. Shoop's Cough Cure

Land of Beautiful Scenery

A. H. Skirving Cannot Understand Why People Go to Europe—He Gives a Few Impressions Gained From a Trip to British Columbia

To the Editor of The Planet:

Dear Sir,—When I last Chatham you asked me to drop you a few lines as to my impressions of the West.

To be candid, I don't wish

To fan the air

Around your chair,

But I can safely say, "There is no

strip in the world like this."

Why should I want to rush off to

Europe, I fail to realize, when such

a panorama of grandeur can be

comfortably unfolded in a few days

easy travel. I presume the "fad-

ists" initiated the craze, and, of

course, everyone has to follow suit.

There is nothing of importance to

be between Chatham and Sud-

bury, but this place is going to be

a surprise. It will be the Pittsburg

of Canada; everything betokens

prosperity and improvement. A

very ordinary house rents for \$25

per month, and everyone appears to

be in business of some kind.

The same old rocks and barren

country are "still on the map" be-

cause North Bay and Port Arthur,

although I note that since my last

trip Nature has asserted herself and

reclaimed the barren stretches with

a lovely verdure. What was form-

erly about 1,000 miles of desolation

is now a very picturesque region

with frequent lakes and bold scen-

ery.

Port Arthur and Fort William do

not, in my estimation, deserve the

salutem which has been lavished

upon them. They certainly do

not "show up" much better than

they did ten years ago. This is the

result of a good thing, and the

two places. What they want is to

be together, settle differences and

make something of themselves.

The C. N. R., Canadian Pacific and

Grand Trunk Pacific all hug one

another close after leaving Port

William. Hundreds of men are em-

ployed along the routes, as the C.

P. R. is double tracking from Win-

ning to Port William, and I can

safely say the job is a most substan-

tial one. Reaching Winnipeg we met

a large party from Minneapolis

St. Paul going to Calgary to spy

out the land. This party filled the

train and formed a prosperous

looking bunch. I might here re-

mark that an excursion leaves St.

Paul every Tuesday for Calgary;

rate \$12.50 return; and it is well

patronized. Our American friends

don't know the place, and they

are getting their piece.

The grain from Winnipeg west-

ward is still quite green, and many

were the expressions as to this con-

dition, and a fervent wish was ex-

pressed that frost would not in any

way damage it. Around Indian Head,

Wolsley and elsewhere there are

some magnificent crops.

A peculiar state of affairs is evi-

dent around Calgary, and among the

foothills this year. Generally at this

season the grass is burned and quite

brown, but just now the hills are

perfectly green, as green as in car-

ly summer. Needless to say, the em-

erald appearance was quite refresh-

ing, after the long stretches of sun-

baked prairie further east.

scenery imaginable; and so on all

the way to Vancouver.

A stranger could not help notice-

ing the large camps of Japanese

along the C. P. R. There are thou-

sands of the little brown men en-

gaged in cutting brush and doing

other railroad work. A few Hin-

doos and "Chinks" are sprinkled in

among them, but the Japanese pre-

dominate. They form the nucleus of

an army. They are omnipresent on

the Coast, and a power to be reck-

oned with; they know every hole

and corner, and in the twinkling of

an eye could sever "the tie that

binds" the East and the West.

What would the great military high-

way amount to them? These little

fellows have even gone so far as

to make application for a post-of-

fice of their own at Vancouver. It

would be a nice thing if the rep-

resentatives of every nationality de-

manded a post office of their own.

All along the Gulf of Georgia they

own their fishing outfits and can-

neries, and ship the products to the

Orient. (What the future has in

store is somewhat problematical, but

I am now picturing to myself the

return of the Mongol, as I have al-

ways believed that the North Amer-

ican Indian is of Mongol strain. There

is little difference between the

features of an Alaskan Indian and

a Japanese. I would certainly say

to the powers that be, ponder care-

fully, give this matter your serious

consideration; there are enough

white men in the world to overstock

British Columbia.

Excuse my digression, but I had

to take the lid off.

Vancouver is a busy, bustling city

and destined to be one of the prin-

cipal ports on the Pacific. It is

building up rapidly, and there will

be no stay in its progress for years

to come. Across an arm of the sea

is North Vancouver, which appears

to be flourishing. A ferry runs to

the latter suburb. From Vancouver

to Victoria is a lovely sail. We

passed through a school of hun-

dreds of whales. One would think

there was an endless chain of foun-

tains, judging by the jets of wa-

ter that were continually being shot

upwards. These leviathans were

shortly after their ranks thinned, as

a whaling station is being estab-

lished three or four miles north of

Nanaimo.

Talk of fishing! It would do you

good to experience a walton thrill

out here. Old Isaac never caught

fish on the Coast, or he would have

been more enthusiastic. He has

been more successful, and the latter

is the gamiest fish there is. When

you hook him on your spoon you

know it in a flash. The race for

life begins; you have the "Silver

King" alongside the boat; then up

he goes in the air; down in the sea;

under the boat; away again, you

repeat this until he is short of

breath, then fix him with a gaff

or jerk him into the boat. What

a beauty! The first day I was out

on the gulf I hooked two. Down

at Eriau we thought a five or six

pound bass put up a fight, but tell

me, Mr. McKay and Mr. Heyward

want to get hold of a 12 pound or

15 pound salmon.

The climate here is ideal, perpen-

dicular sunshine and not too hot; at

night we sleep with a quilt on the

bed. Everyone is employed; the

corner loafers are a thing of the

past. The old song, "Everyone Works

but Father," does not apply here. Dad

is just as busy as the boys. Prices

are good, wages are good, employ-

ment good. Why shouldn't the peo-

ple wear contented expressions and

talk hopefully of the future? There

are many openings here for

eastern capital, with no possible

chance of shrinkage, and the time

is bound to come when this will be

the fairest part of the Dominion. I

have often heard so, but now I

believe it. The prices paid here

would astonish eastern folks.

Butter, 50c. per lb.

Eggs, 5c. per dozen.

Potatoes, \$5.00 a sack—and were

\$100.00 a ton in the spring, and they

could not be got at that price.

Beef steak, 18c. per lb.

Mutton, 20c. per lb.

Pork, 18c. per lb.

Bacon, 25c. per lb.

Ham, 27c. per lb.

Cheese, 25c. per lb.

Tomatoes (now) 20c. per lb.

Cabbage, 5c. per lb.

Cucumbers, 30c. per lb.

Everything is by the pound and

it almost takes a "pound" to buy

it. Yet everyone is happy and mak-

ing money, and there is no talk of

anyone going back east.

I fear I am occupying too much

valuable space, but before closing I

must say a word in praise of the

C. P. R. appointment system. All

the route nothing is left to be de-

sired. Everyone is courteous and

obliging, and I think the porter on

our sleeper, Mr. J. Shaw, of Mont-

real, cannot be beaten.

I hope to give you a few more

pointers later. Believe me, with

apologies,

Yours very truly,

A. H. SKIRVING.

Victoria, British Columbia, Aug.

19th, 1907.

Worth the Difference.

A big jobber sent an aspiring young

man on the road to open up a new ter-

ritory where a new railroad was going

through. All the towns being new,

there were no hotels.

Not a secret or "patent medicine"

because ingredients are printed on

label; contains no alcohol, is purely

vegetable.

"Look here, Charlie; I see you have

charged us 50 cents per meal on your

trip, and I am reliably informed that

it is impossible to get a meal for more

than 25 cents in your entire territory.

How about it?"

"Well," said the salesman, "you are

right. It did cost me but 25 cents per

meal, but I tell you, sir, it's worth the

other 25 to eat those meals."

A man who cannot mind his own

business is not to be trusted with

that of the king.

Adopt British Proposal.

The Hague, Aug. 30.—After three hours' debate yesterday the British proposition regarding obligatory arbitration was approved by the examining committee, which had the subject in charge.

During the course of the debate the head of the Austrian-Hungarian delegation, Privy Councillor Mery von Kapos-Mere, caused momentary excitement by accusing the head of the French delegation, M. Bourgeois, president of the committee on arbitration, of intentionally delaying the publication of the Austrian arbitration proposals.

DON'T USE GREASY LINIMENTS.

A century ago they were popular. To-day people want something easy to apply, certain in results, and, above all, a clean liniment. When Nerviline is applied aches and pains disappear as the pores absorb its soothing, healing properties. Nerviline penetrates to the core of the pain, eases instantly, and leaves no bad smelling memory behind. Good to take in, capital to rub on, and five times more powerful in destroying pain than any oily liniment. Don't fail to get a large 25c. bottle.

Big Farm Burned.

Woodstock, Aug. 30.—A disastrous fire occurred yesterday morning at the farm of Geo. Patterson east of Zorra, when a large new barn was completely destroyed, together with the greater portion of the season's crops.

Mr. Patterson went out to the barn early, carrying a lantern. When in the basement of the barn the lantern suddenly exploded and the building took fire. Efforts to stop the progress of the fire were vain, and attention was directed to saving the animals and implements in the barn.

All the animals were taken out, including a fine team of horses valued at from \$375 to \$400. The barn was only recently built, and was one of the finest in the neighborhood. It is partly insured.

THE CAUSE OF HAY FEVER.

It's a microbe that floats in the air, gets into the throat and lungs, develops rapidly, and causes inflammation. The cause is as simple as a thistle in the finger. Extract the thistle, away goes the pain. Destroy the Hay Fever germ—you get well. That's why Catarrhose acts so marvelously in Hay Fever. Its fragrant vapor to you brings cure, but to the microbe death. Catarrhose is as quick to act on these microscopic organisms as lightning. Prevents as well as cures, and is always successful. Druggists, 25c. and \$1.00, or P. & Co., Kingston, Ont.

Sold Liquor to Indians.

Toronto, Aug. 30.—The license branch of the Provincial Secretary's Department has laid information against W. H. Darcy of Burleigh Falls, Peterborough County, for supplying liquor to Indians, this being the second offence. Darcy was recently convicted of a fine of \$50 and costs, although the liquor was supplied by his bartender.

The Indians created a scene on a Stony Lake excursion steamer, throwing the women and children into a panic, and were subdued by the white passengers and crew.

CHINA MAKES PROTEST.

Objects to Recent Covenant Between France and Japan.

Pekin, Aug. 30.—China made protest against the recent agreement between France and Japan, providing for international cooperation in the Far East.

The protest has resulted in a remarkable suppression by the authorities of public matters. It is claimed that China has been beaten from her rights, owing to the overbearing of the present Chinese Government, the cowering policy of the throne, and its overreaction to the protest which is being made by Japan.

The protest which is being made by Japan, for the purpose of not giving offence, modified, to a mild character, is to the effect that the agreement of China is a protest against the "not to be considered" opponents.

The protest has aroused the indignation of the Japanese, who have ignored it, leaving the French here to persuade the board to drop it.

While China's resentment against the Japanese, which is assuming a position of protector, is in the position of a new movement, headed by Chang Chin Tung, has been started among the Chinese to promote native enterprises in Peking, for the purpose of offsetting the efforts of the Japanese to obtain a foothold in that province.

AIRSHIP STRUCK SCHOOL-TOWER

Aeronaut at Toronto Exhibition Had Narrow Escape.

Toronto, Aug. 30.—The inglorious ending of a trip made by the Knabenshue airship yesterday, which decided the management to cancel the contract. The ascent was made in good style, and the craft headed city hallwards, but at Crawford street schoolhouse there was a mishap, the machine becoming unmanageable, striking the spire, and setting on fire the roof, the wooden frame being smashed. Aeronaut Gail Robinson asserts that the wind was too strong, and that he made the trip only under compulsion. The airship was carried back to the grounds in the afternoon. It is not badly wrecked, but further trips are off, as the exhibition management have issued the following statement:

"The directors of the Exhibition yesterday decided to request that the Knabenshue airship be removed from the grounds. They did this, not because the gentlemen in charge of the airship manifested any disinclination to make the ascent as promised, but because they were satisfied that the apparatus in use is not able to perform what is expected of it, and, therefore, that it is impossible to place the ship to be manoeuvred in such a way as to fulfil the terms of the contract."

"Yesterday morning an attempt was made, seemingly, to fulfil that part of the agreement calling for a trip around the City Hall tower, and back to the Exhibition grounds, but the engine acted so badly that the feat was entirely out of the question. Mr. Johnston, the man in charge, subsequently stated that it would take at least until Saturday to repair the damage done."

"In view of that fact, it was apparent to the directors that the fulfilment of the specified terms of the contract was an utter impossibility."

OFFICER GOES TO TRIAL

Chinese Raid Aftermath—The Case Against Police Goes Over.

Regina, Aug. 30.—Corpl. Hogg of the R. N. W. M. P. was yesterday committed for trial on a charge of having assaulted and unlawfully arrested four Chinamen in the police raid last Friday night. Bail was accepted.

Three other cases against Chief Harwood, Constable Gleadow and Constable Hogarth, all of a similar nature, were adjourned until Wednesday.

J. F. Frame, who appeared for the police, objected to the magistrate sitting on the case, as his son had the case for the Chinamen, and he thought the magistrate was biased.

Mr. McCausland, however, declined to ask another magistrate to take the case, and Mr. Frame said he would take steps to have him deposed.

CHARGED WITH MURDER.

Toronto Woman Alleged to Have Performed Illegal Operation.

Toronto, Aug. 30.—Mrs. Minnie Turner, a young widow, who has been conducting a maternity home at 223 Poplar Plains Road, was arrested shortly after midnight on a charge of murder. Her alleged victim, Miss Rose Winters, an orphan girl, died last Sunday night of septic poisoning, resulting from a criminal operation, which the prisoner is accused of performing.

She was brought before the magistrate yesterday and remanded for one week.

Mackenzie In Wreck.

Halifax, N.S., Aug. 30.—While returning from a tour of inspection of the Halifax & Southwestern Railway, the special train conveying William Mackenzie, head of the Mackenzie & Mann railway system, and C. W. Spencer, general manager of the Canadian Northern's eastern lines, was wrecked at Ingonishport.

They escaped serious injury, but were badly shaken up.

Killed by Kick.

Chatham, Aug. 30.—Steven Brown, a Raleigh Township farmer, was kicked in the chin by a horse in his barn shortly after 7 o'clock last evening and died almost instantly. Brown had just finished his day's work and was putting the team away.

The Power Of Character

Its Far-reaching Influence Cannot be Estimated
— Men Strangely Swayed by It — The
Weekly Talmage Sermon

Entered according to Act of Parliament of Canada, in the year 1907, by Frederick Dyer, Toronto, as the Author of "The Power of Character."

Los Angeles, Cal., Aug. 25.—In this sermon the preacher shows the uplifting power and influence of a strong upright character upon the lives and conduct of those with whom he may be associated. The text is Acts xxvii, 38. "Then they were all of good cheer."

The prejudice against ministerial passengers formerly held by sailors aboard ship was very bitter. Yet today in the scene of my text we see Paul, the gospel missionary, overcoming the prejudice of the crew. Amid the Mediterranean euroclydon we see him winning their confidence to such an extent that he becomes practically the captain instead of the captive. After weeks of tossing about upon a treacherous sea, with all bearings lost, the 275 souls aboard turn to this little Jew and beg his advice as to what they should do. They say, "We will obey your orders; we will eat when you tell us to eat and cast off our anchor cables when you tell us to cast them off."

Now, why did these sailors upon the Mediterranean corn ship have such faith in this evangelist? In the first place because they realized that there was a supernatural power about this strange man of God. They could not tell theologically from whence it came. But they felt its power just the same, as we can feel the thrill of the electric current as soon as we place our fingers upon the handles of an electric battery. And the man of the world does not have to mutilate at a theological seminary in order to learn the power of one who has faith with God. As soon as such a man comes in contact with a spirit filled life he realizes the supernatural influence. The more worldly the man the more that spiritual influence will be made manifest to him. I was never more impressed with this fact than when I read an incident in the life of the great French surgeon Dupuytren.

Dr. Dupuytren was the greatest Parisian surgeon of his time, but he was an ungodly man. He hated the church with an intense hatred. Besides that, he was one of those brusque, cruel, unfeeling men who have no sympathy with pain. The knife in his hand was the remedy for all ills. As long as his knife could cure he cared not whether the patient suffered mental or physical anguish. Surgery was to him a business. The spiritual development of his soul seemed to be entirely lacking. But one day there came into his office an old, gray-haired, gentle, beautiful faced priest. "What do you want?" gruffly asked Dupuytren. He answered the good priest began to take off a big woolen cravat and showed the surgeon a hideous tumor upon his neck. Dupuytren looked at it a moment. He pressed it roughly with his finger and then brutally said: "You'll have to die with that. This tumor can never be cured." "Thank you," said the priest. Then he began to replace the woolen cravat as he replied, "I now know that I must prepare myself for giving up my life's work and also prepare my poor parishioners who love me much for my leaving them. The great surgeon turned his cold gray eyes upon the priest a minute, and those eyes bored straight down into the patient's heart. Then he said, with gentle voice: "Come to my hospital to-morrow and we will see what we can do. There is one chance in a thousand to save you."

The priest came to the hospital the next day. With a submissive prayer he laid himself down upon the operating table. In a month he was discharged a well man. As he was leaving he took out his pocket thirty pieces of silver and with trembling hand offered them to the surgeon, saying: "Doctor, this is all the money I have. I walked all the way from my house to pay you this." But Dupuytren said, "Keep them, man; keep them. I have no money. I am a money drawer and took out a handful of gold and poured the napoleons into the priest's lap and said: "Here is some money for the poor. May God bless you, his servant, to labor for my many years among your people." A few years later that great surgeon died, a believing, trusting Christian, in the arms of that humble priest.

Did you ever read a story more beautiful? And yet the power of the gospel is being preached in many lives as this humble priest by his serenity and faith preached to Dupuytren. A man does not have to stand in a pulpit to be an evangelist of Jesus Christ. The spirit filled life radiates a supernatural influence everywhere. No sooner does those sailors learn that this Alexandrian corn ship was a vessel of God, than they felt into touch with Paul that they felt there was a supernatural power about him which they lacked. What is the spiritual influence of your life, O man? What is the spiritual influence of your life, O woman? In order that your friends and neighbors may be sure that you are Christians, do they have to go to the church books and find your name enrolled among its members? Or by your looks, by your gentle words, by your simple, trustful face, do they perceive that you are walking with God, even as Enoch walked in the early ages of the world's history? I do not ask you if you are

Children have more need of models than of critics.

preaching Christ from a pulpit, but I ask whether your light is shining, so that men seeing your daily life realize that God is in you of a truth? Is it a spirit filled life which preaches the gentleness of Jesus Christ wherever you go? The sailors of that Alexandrian corn ship believed in Paul, because Paul's face, like Moses' face, after he had been upon Mount Sinai, was shining and radiating with the supernatural love of the Divine Teacher.

But there was still another reason why Paul exerted this marvelous influence over the sailors of the Alexandrian corn ship. He had a spirit filled life. Oh, yes! Every one who came in touch with him realized that. But he was also one who was faithful in pointing out a man's past mistakes. When the ship was tossing and tumbling about in the Mediterranean euroclydon he practically said: "I am a servant of the Lord Jesus Christ. I am a messenger of the Lord God Almighty. Men, last night one of God's angels came to me and said: 'Fear not, Paul. Thou must be brought before Caesar, and I, God hath given thee all them that sail with thee. Yes, we are all going to be saved, every one of us.' But stop. How did Paul introduce this statement which had come from God? He turned and pointed his finger at those trembling sailors and said: "Men, the reason you are in your present plight is because you would not heed my advice in the morning. I told you not to loose from Crete. I told you we would get into difficulty if you did. But you wanted to hasten on and get to Phenice and spend the winter there in sin and carousal. You made one mistake after another. Now, you make another. And, my friends, you and I can never preach Jesus Christ aright unless we are first brave enough to point out to men the errors of their past life. We cannot teach men to come to Christ unless we, like Paul, are first faithful in warning men against the sinful acts of their bygone years."

It does not take very much grace to go and compliment a man on his virtues and praise him when he is doing right. But it takes lots of grit to put your finger upon the weaknesses of a man's life and tell him when he is doing wrong. It takes lots of grit for a Nathan to stand up and say to King David, "Thou art a libertine and a murderer." It takes lots of grit for the members of a privy council of King Solomon to say to the young prince Rehoboam: "Thou art wrong. Comply with the requests of the people, and they will serve thee."

And when they said it they knew that their advice would cost them their official positions. It takes lots of grit for a young preacher like Henry Ward Beecher to be the head of a church in Indianapolis, where the members are antagonistic to the abolitionist movement, and stand up and defy a whole community and say, "The slave ought to be free." It takes lots of grit for a young clerk, when he is asked to do something dishonest, to say to his employer, "No, it will not do it, because it is wrong." It takes lots of grit for a young girl who loves a young man devotedly to say to that young man: "Harry, I love you. I love you with all my heart, soul and strength. But I cannot turn my back upon your evil associates. I must turn my back upon you." In other words, it takes lots of grit to come to your friends and neighbors and place your finger upon their weak spots, and say, "Here, you must change. In order to do right for the future you must rectify this wrong of the past." Are you willing as a friend to point out to your friends the weaknesses of their lives, as Paul warned the sailors of the Alexandrian corn ship?

For my own part I can think of no greater joy than that which would come to us if we were to go to those we love to warn them of their sins and weaknesses, which are threatening to destroy them. There is a beautiful story told of a great old man, Edward Livingston. Perhaps he was the greatest of all the great men who have borne that family name. But few men have been greater from a worldly standpoint than he. He was representative in Congress, mayor of New York city, United States senator from Louisiana, Secretary of State and Minister to France. One day in his old age a friend said to him, "Senator, what was the supreme moment of your life?" Without a moment's hesitation he replied: "Some years ago that supreme moment came when I was delivering an address at the dedication of the Masonic temple at New Orleans. I was speaking upon the duty of man loving man. Among other things I said: 'My brethren, have you searched your hearts? Do you find any lurking animosity against a brother? Have you the felicity never to have cherished or are you so happy as to have banished all envy at his prosperity, all malicious joy at his misfortunes? If you find this is the result of your serenity, enter with confidence the sanctuary of union. But if the examination discovers either ranking jealousy or hatred long concealed, or even unkindness or offensive pride, I entreat you, defile not the altar of friendship with your unallotted offering, but in the language of Scripture, "First be reconciled to thy brother and then come and offer thy gift." As a result of that plea, two brothers whom we all knew, who had been estranged from each other for years, arose and rushed to ward each other and with mutual sobbing flung themselves into the another's arms."

But there was still another reason why Paul captured the minds and the

hearts of the sailors of this Alexandrian corn ship. Paul was a man of gospel visions, but he was more than that. He was a man of fine Christian common sense. He knew that the religion which was no fitted for a practical, everyday, commonplace life was no religion at all. He believed in a gospel to live by. He believed in that practical gospel so firmly that he tried to get the men to care for their physical bodies and to look after their physical strength.

Here, for instance, is a mother. She has four or five children. Scarlet fever, one of the most dreaded of all nursery diseases, enters her home.

First one child comes down, then another and another and another. This mother is not strong at all, but she is so devoted to those children that she never sleeps outside of the sickroom. She never undresses except to take her bath. For weeks or even months she is up night and day. Her hand must give the medicine. She must nurse the children, she must bathe them, she must see her breaking down. They say: "Mother, you must stop. You must take your rest. Other nurses can sit up during the night. You will break down." "No, no," she answers. "No nurse can nurse my children but myself. After while she pulls her last baby through. Then she falls in a dead faint. They undress her and put her to bed, but it is too late. The poor weak pulse flutters and stops. The mother is dead. "She is a martyr. Is she a martyr?" No, my friends. Is she a martyr? No, she is not. She died because she did not have any common sense. Other nurses could have taken her place while she rested. Other nurses could have taken her place while she ate. Now that she is dead no one else can take that mother's place. Women, beware! Paul is bidding you look after your health. Better join Paul for a little while in the cabin of that Alexandrian corn ship and eat your bread and look after your physical strength. Your children need you in the morning. Come even more than they need you now."

But there was another reason why Paul gripped the sailors of the Alexandrian corn ship. He did not deceive those sailors in reference to their own bodies. "No, no," he said, "men, just follow me, and trust in me, and all will go well. I will give you plenty to eat and a smooth sea and a quiet voyage." Nay, that was not Paul's way. He said, "Men, put your trust in Christ. You are to have a smooth sea, but more so, the seas are rough now, but they are going to be far rougher. They are going to batter us about until we become a helpless derelict. Then they will fling us upon the rocks, and this great ship is to be knocked into kindling wood. But out in the struggle and the storm God is going to bring us all safely to land. Now, men, if you trust God you must be prepared to meet this struggle." Thus Paul spoke. And thus all gospel evangelists should speak when they are pleading with men and women to accept Jesus Christ.

You cannot make a good Christian unless you are willing to battle with storm for Christ and struggle against almost insurmountable difficulties. The life of Christian ease is always the life of failure. The life of self-interest is always the life of defeat. The life of spiritual success, we must sacrifice. We must give up for Jesus, or else Jesus cannot save us and bring us to the higher Christian life. But there is one more lesson I want to draw from the Mediterranean corn ship wreck in reference to the Christian life, and then I am done. Paul did not say to those tossing, trembling seamen, "One-half of this crew shall be saved if ye abide by the ship." He did not say, "Three-fourths of this crew shall be saved if ye abide by the ship." Ah, no! Some of the men and women would have grumbled had he said that. They would have answered: "Why are some of us saved and not others? What is the difference between me and that man? The angelic messenger said to me, 'The God hath given thee all them that sail with thee.' So I come to you today and say: 'Men and women and children, in the name of Jesus Christ you can all be saved through his blood if you will only cling to the cross of Jesus Christ and live. Will you accept that invitation? Will you be saved by that cross? All! Yes, all! Will you believe God and accept him now?"

And, oh, if you will only believe this and accept Christ, what a glorious time it will be when we are landed upon the other shore! I suppose when that great Alexandrian corn ship went to pieces upon the island of Malta the inhabitants of that island were down there upon the beach to help the struggling sailors and women to land. Cannot you see them plunging into the surf to drag the poor fellows out? When the time of our landing upon the celestial shore comes, cannot you see our dear ones rushing into the river of glory to drag us out? Oh, yes; they will come so near when the surges of death are rolling over us that methinks their celestial hands will almost touch our dying pillows. Aye, can you not see those hands reaching out now? Can you not see them beckoning? Will you not accept this invitation for this heavenly reunion awaiting us all? Yes, for all who will be saved through the atoning blood of Jesus Christ! Listen. Let me read: "And so it came to pass that they escaped all safe to land." Father, brother, sister, son, child, is that to be the record of your family's celestial advent?

Wolf Hunt In Essex.

Windsor, Aug. 29.—A wolf hunt has been in progress in Sandwich East Township, near here, since Tuesday. While cultivating corn, David Lemme came across seven wolves and is convinced they are young wolves. Wolves have not been seen in this section for several years.

Indian Girls Sold at Auction.

Vancouver, B.C., Aug. 29.—The selling of two pretty Indian girls, neither of whom was 14 years of age, to the highest bidder in open market was the chief feature of the Indian police last week at Alert Bay.

QUEEN BEE SWARMS.

One Chose a Man's Beard—Another the Beekeeper's Hands.

Perhaps the strangest settling place ever chosen by swarming bees was a man's beard. Among several interesting photographs of bee swarms shown in the Strand one of a bald headed man with a beard of bees reaching to the middle of his breast is the most extraordinary.

The next in interest, at least to the bee man himself, shows that individual's hands covered with what looks like great thick rough mittens. As these gloves were composed of hundreds of live bees, they could at least be counted upon as warm.

Often when in dealing with the hive the beekeeper takes the queen into his hands the other bees, attracted by the queen odor, settle on the man's hands or arms, unless they find the queen herself.

This peculiarity was responsible for the predicament in which a clerical beekeeper found himself. His swarm had settled on an apple tree, but from the behavior of the bees it was clear the queen was not with them. After looking for her she was found some little distance away with a few other bees around her.

On raising her from the ground the bees that had been with her clustered round the beekeeper and were quickly joined by the swarm, which was now breaking up. The swarm consisted of between 20,000 and 25,000 bees.

They not only covered the outside of his coat, but crawled up under his long skirts, which they amply lined with their bodies. They also completely covered one trouser leg from the knees to the waist, so that the worthy clergyman presented a most extraordinary appearance. The swarm, it may be added, was successfully hived.

When bees are about to swarm they fill their honey bags with a large quantity of honey and then take their flight. Whither are they bound? None of them can tell exactly. They swarm up into the sky, forming a great cloud, and then settled down to rest wherever their fancy takes them, for the swarms rarely decide to make a home at the spot where they first journey, and in the meantime they send out emissaries in search of a new domicile, which is usually selected in some cavity, such as a hollow tree trunk, a hole in a wall, or a chimney.

The swarms which settle thus often assume the most unexpected and grotesque shapes. The shape of a swarm forming a pendant to a branch of a tree is well known, but more eccentric alignments are not uncommon. There is an old custom, still followed by some people, of making a fearful noise by striking against old pots and pans or by firing off guns in order to induce the swarms to settle and thereby prevent them from going far. But this is a proved long ago that this noise did not trouble the bees in the least or make them settle where they did not want to go. It has also been alleged that all this noise carried with it a sort of proprietorship in the swarm. This explanation may have some truth in it.

As regards the swarms, the only thing that can force them to settle is a jet of water from a syringe or pump or a spray of sand or fine dust. Some say that the bees can be brought to settle by the use of a small amount of alcohol, collecting the rays of the sun, which are then concentrated on the bees, imparting to them a continuous motion. This may be efficacious, but no matter how much noise is made the bees are not troubled by it.

NERO'S SWEET VOICE.

Cruel Emperor Took Great Care of Vocal Organs.

In an interesting paper Mr. Moore and Mr. Beaver relate the extraordinary care which the Emperor Nero took of his voice. At night Nero lay on his back with a thin plate of lead on his stomach. He purged himself with emetics and cathartics. He abstained from food and drink, and he would not let his voice. In order not to damage the purity of its sound he ceased haranguing the soldiers and the Senate. He attached to his service an officer specially deputed to take care of his voice. He only talked in the presence of this singular officer. He warned him when he spoke too loudly or forced his voice, and the Emperor, carried away by some sudden fit of passion, did not listen to his remonstrances, it was his duty to stop his mouth with a napkin.

The Caterpillar—and After.

Among the many strange growths, apparently freaks of nature, which are to be found in New Zealand, what is known as "the vegetable caterpillar" ranks readily among the foremost. This caterpillar is several inches in length, hairless, and does not differ essentially in appearance from some of the caterpillars of our own land. Its claim to distinction lies in the fact that when it is ready to die it digs a hole for itself in the earth and completely buries itself. Later, a slender green shoot springs up from the spot. This grows to several inches in height, and bears two or more leaves near its top. Upon investigation it is found that the green shoot springs from the head of the dead caterpillar, and further investigation develops the fact that the body of the caterpillar is filled with roots. The deduction is that a plant-seed, undeveloped of vitality, has been engorged by the caterpillar before its demise.

A Duke and His Fact.

Mr. W. P. Frith, the famous artist, tells an amusing story concerning the picture which he was commissioned to paint of the ceremony when King Edward married Queen Alexandra. Among those present was a noble duke celebrated for being the possessor of a very broad-brimmed hat and a very ordinary—not to say ugly—face. Frith wrote to the Duke for the favor of a sitting as a model to include him in the scene. The nobleman replied: "Dear Sir, I have no time to sit for a picture. If my form must appear in your work, allow me to suggest that, in respect of my face, you might bury it in my hat, in the manner of people when they go to church."

Value of Example.

To have your child truthful, be truthful. To have him kind to others, be yourself kind to others. To have him honest, present to him in yourself a living example of honesty. The chief part of a child's knowledge comes through observation. Acts mean more to him than speech. To have him temperate, be temperate in all things. Prove to him by your life that a good name is to be chosen before great riches. Teach him that riches are not to be despised, but should never be got by doing harm to others; that when acquired should be treated as a trust, not as a hoard.

THE MODERN WOMAN.

Must Be a Stimulating Companion For the Up-to-Date Man.

"It is rather difficult being a modern woman," remarked a matron the other day. "We are expected to be clever, active, well informed and interested in the world we live in. If we fall in these things men consider us stupid and indolent and 'no fun to talk to.' But when a woman does possess the qualities that make her a stimulating companion for the up to date man immediately croakers arise and call her a 'new woman,' with a disparaging accent, and sigh dolefully about the way their grandmothers kept house."

"Yet with all the tendency there is to make jokes about the modern woman or condemn her as too studious, too athletic, too independent, there is no doubt that she is fast mounting the pedestal which the other type of woman has so long occupied alone, or, if not a pedestal, she is taking a position which is on the whole more secure and more desirable. There has always been a theory that the ideal mother is the one who sticks to her own fireside and mends her children's stockings. This theory still lingers in spite of the fact that so many college girls and girls who have not been to college, but are nevertheless bright, keen and well informed, are marrying and proving that a mother may have outside interests and be a better mother because of them. But it is merely a theory and does nobody any harm."

"In Frank Stockton's 'Squirrel Inn' there is a scientific nurse-girl. When it is hinted that her college studies may have kept her from learning as much about babies as a nurse-girl ought to know she exclaims: 'Not know about babies? Why, I know all about babies! I have dissected one!' While this degree of education will never, perhaps, be demanded of the modern mother, the world is beginning to see that the better informed a mother is, the larger in her views, the broader in her interests, the better mother will she be."

WEDDING FEAST SALAD.

An Old Family Recipe For This Indispensable Relish.

Chicken salad is the most dependable relish to serve at the wedding feast. It never holds the possibilities of ptomaine poisoning, as fish may, and it does not wilt, as a green salad would, if the reception runs for some length. Here is an old family recipe: This quantity should make very nearly two quarts of salad, sufficient for twenty people, if served with sandwiches and ices. Select two plump fowls not too old; simmer in boiling water until tender. Do not cut them up before cooking, and do not cook in cold water, as this draws out the juice. When tender remove from the liquor, cool and cut into dice. Add one pint of celery cut in dice, mixed lightly, sprinkled with a little salt. If you do not like oil, use this dressing: Beat the yolks of seven eggs, seven pinches of mustard and seven teaspoonfuls of sugar; place in a porcelain stewpan; add slowly seven tablespoonfuls of boiling vinegar; cook slowly until thick, mix with the chicken, add one cupful of good sweet cream whipped with salt and pepper to taste. If you like oil, try the mayonnaise dressing. Into the well beaten yolk of one egg add drop by drop one pint of olive oil. Boil two eggs hard, rub into the yolks a dash of cayenne pepper, one-half spoonful of salt. Add this to the yolks and oil. Now add finely chopped whites of the eggs and juice of half a lemon, mix well, then add the well beaten white of the uncooked egg, and the dressing is ready for use.

HOUSEWIFE HINTS.

When making mashed potatoes into cakes rub the hands with flour to prevent potato sticking to them. Grass stains may be removed by dipping them in molasses and then washing this out with clean water. If the fat in the dripping pan catches on fire, pour in at once a little milk, and the flame will be instantly quenched. A wooden spoon should be dipped in boiling water immediately before using. This will prevent discoloration and absorbing of flavors. When you have occasion to use plaster of paris wet it with vinegar instead of water; then it will be like putty and can be smoothed better, as it will not set for half an hour, while plaster wet with water hardens at once. An odd but palatable dish is made by frying onions a nice brown, then adding a can of tomatoes; season with pepper and salt and one teaspoonful of allspice; cook all together a few minutes. Serve plain or on toast, as desired. If ink is spilled on a carpet, run for the salt bag and put on salt, renewing it as fast as the ink is absorbed by it. Where this is done promptly and plenty of fresh salt used it is frequently so effective that no ink spot whatever remains.

Clarified and Bottled Milk.

To clarify and bottle milk is the only sanitary and up-to-date way to handle such an important product of the dairy as milk, for while it is one of the best and most necessary foods we have if properly cared for, it is certainly one of the most dangerous, if neglected, or carelessly handled, and should never be exposed to street dust, as is done in the ordinary way of peddling milk from large cans with open measures. The Steam Turbine Machine used to clarify all the milk sold from the

Maple City Creamery.

will certainly take all the impurities out of the milk, thereby removing the danger of many cases of sickness, especially among children, that can be traced directly to the milk supply. Don't take such chances this hot dry weather when you can get—

LITERARY

The seventh article in a series of papers which are appearing in the Journal of Modern Construction, appears in the August number. Cornice is the subject dealt with, and it will be found interesting and instructive both by architects and those who are building.

Tiled Fire Clay as a Building Material is another paper of much interest, as the public are commencing to realize their use is not only decorative but sanitary. A competition of designs for concrete suburban dwellings has just closed in Philadelphia, and in this issue we are given the plans of three, and the others are to be published in succeeding numbers of the magazine. This will be of inestimable value to builders.

In this there are several plans, elevations and detailed bills of cost, for small, convenient, modern houses.

The Journal of Modern Construction is published by Max L. Keith, Minneapolis, at \$2.00 per annum.

The first attraction of the Woman's Home Companion for September is the cover, by Earl Stetson Crawford, who won the prize of \$1,500 which was offered by the Companion.

Dr. Edward Everett Hale's monthly talk is on Letter Writing. Anna Richardson's article is an excellent one on The Influence of Business Life on Women.

Anthony Hope continues his novel. There is a story by the noted writer, Julia Magruder, whose death occurred at Richmond, Va., on June 9th of this year. In addition there are several short stories.

The fashion editor has special patterns for school dresses.

All the other departments are full of helpful suggestions.

Price 10c. a copy or \$1.00 per annum.

JACK WAS ALL RIGHT.

Jack Hanson stole a kiss from me last night, said Tess.

The ideal exclaimed Jess. What did you do about it?

Nothing, I didn't have time. He made restitution immediately.

NOT IN HIS FAMILY.

Teacher—Now, children, remember the text—Eat, drink and be merry, for to-morrow you die.

Pupil—Please, teacher, in our family we don't. We all take a dose of castor oil the next day.

When an unpleasant condition is accepted without murmur the mind falls into normal balance.

A ROUSING MEETING IN HARWICH TOWNSHIP

Continued from Page 1.

Chairs or party tools. The member for East Kent said that he did not run merely as a supporter of Mr. Whitney, and though he heartily believed in the platform outlined by the leader, he had stated in public before his election that he would hold Mr. Whitney to his promises. He had also a platform of his own, and he had promised to urge certain reforms. He believed that there should be more meetings of this kind, where the members could meet with their constituents, receive suggestions, and talk over the live questions of the day. However, nowadays the farmers were a widely scattered class, who kept themselves closely in touch with political doings through the press.

We are now on the eve of a gigantic struggle against the great corporations of this country, continued Mr. Bowyer. This is the fight which was waged years ago in the States, and the people over there find that it is only now nicely begun. A few years ago we had practically no trusts in this country. No wily have their tentacles stretched in every direction, and are sucking up the wealth of the land. The moneyed men of this country have just used the people through the medium of hostile parliament to gain their own selfish ends. This was one of the reasons why Mr. Bowyer thought that parliament should be wiped aside in order that the electorate might vote for men, not party, and the common people would thus be assured protection.

Through the terrible fall of the Ross Government a lesson had been taught politicians that no good can come through trying to keep in power against the will of the majority of the voters.

It was interesting and pleasing to know that since the Whitney Government had come into power, seven bye-elections had been held in Ontario, and in not one of them was violation of the sanctity of the ballot box ever attempted, and there was not a whisper about corruption. This was owing to the strict election laws passed and enforced by the new Government. Another policy of the party which had gained great favor with the masses was the determination which the Whitney Government had made to show impartiality to any constituency no matter how it went at election time.

The next matter which Mr. Bowyer touched upon was that of the recent education reforms, and the lowering of the price of school text books. The Whitney Government were making an honest effort to strengthen things up in this department. Under the old system, there were far too many text books, and the result of the cramming, was that the pupil only got what might be termed a veneer education. The idea was to cut off the fads. In the first place the Government was faced with the problem of the copyright, which had not yet expired, but these were being as rapidly wiped out as possible. In some instances they had to be purchased. The speaker personally advocated the adoption of a uniform set of text books before his election, and he was glad to say that this was what will be the final outcome of the movement. He had also personally advocated this in seconding the speech from the throne.

Mr. Bowyer here gave a brief history of the iniquitous school book system which flourished during the reign of Ross and his followers, and he touched on the "inquiries" and "reports" which that Government alleged to have made on the matter. He also gave a summary of the change of prices for text books. The school book ring had a monopoly, and were waxing rich from the coffers of the common people. Under the old system, there were several text books on the same subjects. This made things most confusing when a pupil moved from one constituency to another. Oftentimes they found that they had to purchase an entire new set of books. Mr. Bowyer in his pre-election platform had advocated a uniform set of text books, and he firmly believed that this would ultimately come about.

Another matter was that of teachers. It was shocking to know that under the Ross regime there were one thousand teachers in Ontario, who were teaching without even a third class certificate. The better teachers were leaving this section of the country for the west, because the salaries here were so very low. It was in this matter that the Whitney Government made its first mistake—a mistake which was overlooked by politicians, statesmen, and even the newspapers of the country. But the people were not long in drawing attention to it. The Government saw its mistake, and started about remedying it by removing the clause, and increasing the grant to rural schools to \$280,000. The Government now pays forty per cent. on all salaries to teachers, whereas formerly they were granted to corporations and had never brought any good to the country. The railway tax had been doubled by the present Government. It was Mr. Bowyer's belief that the railways should pay a tax equal to that paid by the farmers through whose land their trucks run.

In conclusion, he said that it was up to the farmers to forget petty bickerings of party and select men who would stand by the common people, and not by the corporations. Mr. Clements got a rousing reception when he arose to speak. He made an excellent address and, owing to the importance of the speech and the limited space to-day, a full account of what he said will appear in the Planet on Tuesday.
