HARTFORD.

Fund and Accu \$400,000.

INSURANCE COMPANY is established upon the purely mutual system, with a Tasiff of Premiams as lew as is justifiable with the permanence and security of an Institution of this character. Every person taking out a Policy is a member, and entitled to vote at the Annual Meetings. The Dividends are declared ensually on the slast January. All persons insuring previous to that day, participate in the profits of that year, which are passed to his credit upon the control of the insured, in the order of rotation, from the excess of a capital of profits of \$200,000. The stipulated capital of profits abaving been obtained, the Directors will be authorized to pay the first year? Dividends at the close of the present fiscal year; afterwards, each year? Dividends, in regular order, will be redeemed, as the funds of the institution exceed the above two bundred thousand dollars. It is supposed that each person will be required to pay three annual Premiums before his Dividends will be redeemed. This feature in the conditions of this Company, over those who do not redeem or pay the Dividends will assist in the payment of the Annual Premiums, after a few of the first years have elapsed, or take up notes given for Premiums.

The assured, on surrender of his Policy, at any time after three years, will receive its equitable value. All Premiums amounting to fifty dollars, or more, on Policies running five years of longer, may be paid one half by Note; to remain a debt on the Policy becomes a claim.

This Company was organized in December, 1846, and its prosperity has hitherto been unparalleled. It is now in the third fiscal year of its existence; and numbers (October, 1849) nearly seven thousand members; with a constantly increasing accession. Its losses have been small; compared with the numbers which might have been expected, according to the Tables of Mortality upon which Life Insurance is predicated. By unparalleled success in business, and a strict economy in the administration of its affairs, larger Dividends have been made to Po THE CONNECTICUT MUTUAL LIFE

JOHN M'COY. October 26, 1849.

When the Ameration Manifesto made its ap-carance in Montreal, notwithstanding the very

weight of influence possessed by its projectors, and the unquestionable facts which it spread beembellishments, shuddered at the thought of a transition from Coronets, Knighterrantry, and stars, to the Republican simplicity of more substantial appendages, and darkly frowned on the umiliating proposition. Those who in public stations were "sitting at the secoupt of custom," could not quietly submit to any change that would abridge their comforts, and return them back to

that subsistence obtained by laborious industry,

Annexation was any thing but a welco visiter to such a class. A species of loyalty (not animates and ennobles the minds of its possessors) ancied, in its daily researches among the savoury omforts of Mr. John Bull's larder, that it sm Treason, and at once determined that the monster Annexation must, at all hazards, be put down. And then there was the Ministry-the illustrious body-politic of Responsible Government -" wh appetite had grown by what it (had already) fed on," determined to avenge the insulted dignity of its Administration, by the overthrow and complete discomfiture of the traitors. In short, this noble effort of manly principle, sound sto, was regarded by many as a public delusion gotten up, like the famous "South Sea Bubble," people at large were to be the sufferers. It seemto wear the hideous features of that fabulor fested the Lake of Lerna, and which required the skill and courage of Hercules to destroy. It is its valor, that even the redoubtable Ministry, (that Hercules among its enemies,) with its ponderous nachinery, and its weight of power, failed to ar rest its progress and diminish its claims to public confidence. It might be considered a matter of profound astonishment, that in the midst of so nany contending opinions, and opposed from so many different sources, Annexation should thus far have survived the assaults of its enenies; nay, that its vitality is still untouchedthat it lives, and is still steadily flourishing in the atmosphere of that public opinion which is daily contributing to the maturity of its principles, and

the success of its labors. stitutional and salutary measures it recommended, and the temperate and dignified tone of its language, how could it have been otherwise? So of our journals, it is true, with a zeal worthy better cause, waxed warm in opposing the alarm the people by the wolf-cry of Treason and, in their hasty denunciations, even ventured o anticipate the interference and immediate intersition of the Home Government. They accused ome of the most prominent supporters of Annexation with "leading an agitation to overturn the rights of their Sovereign," and, in their hostile rray,

That these attempts to gull the people, and mere "sounds full of fury, signifying nothing," ample evidence is afforded by the manner in which the subject of Annexation has been nals favourable to the present Ministry have not discovered in the desired change any attempt to office in the history of legislation. He has the appointment of all the Committees in the House, lignity and moderation they temperately discuss the measure proposed, and in this discussion they seek to do justice to the people of Canada, while they are not unmindful of the honour and the true interests of the Mother Country. There is no pettylogging system of Cockneyism employed to place the condition of national advantages upon the pitiful circumstances of birth, education, o rank. They employ no sickly and effeminate cant about long-cherished affections, generous votions, and childish reminiscences. The degraded Hindoos, and the sanguinary followers of Juggernaut, could be appealed to under the same rcumstances, and exhorted never to relinquish their generous devotions and sworn fealty to their idole and their abominations. While these journals regard such considerations with that respectfully entitled, they look to the accomplishs of higher purposes, and greater interests, likely to grow out of a peaceful alliance with a great and prosperous people. They really and honestly be-lieve that Canada is at present labouring under any political evils—that her resources are being daily diminished, and her Revenue on the wane. The proof of this is to be found in the present dereased trade between the Colony and the Mother country-in the refusal of the Banking Establishnents and Monied Institutions of England to adance funds even upon Government Security, and a the unparalleled depreciation of all kinds of property. Some of our contemporaries declare that Canada possesses every facility within her own borders to overcome her present difficulties, and arrive at greatness and prosperity. We believe so, but cannot felicitate ourselves with the hope that it can ever do so, trammelled as it is with the unsatisfactory souths of Responsible Government, and the destructive policy pursued by the present Ministry,—Why are not those facilities, to which some of our contemporaries refer, employed under a wise, energetic, and prudent legislation, to improve the present condition of the Province? Why are not wholesome and effectual remedies forthwith not wholesome and effectual remedies forthwith and the present condition of the province? Why are not wholesome and effectual remedies forthwith and the fresher of the Region are in securious final in the Treasury of the Department. Mr. Collimor shored that the number of Press, some and mance daming the number of Press, and that of princed, (Resected and Pal. Docs.) the aggregate was A.Ellages. We answer, because the present Cabinet are too busily engaged in devising means to promote their own selfish ends. That portion of the Government machinery is only in operation that is forced to sustain their necuniary demands, and which requilates those official appointments that are to proceed the operation of the contract their necessary demands, and which requilates those official appointments that are to proceed their necessary and the contract that are to proceed their necessary and the contract that are to proceed their necessary and the contract that are to proceed their necessary and the contract that are to proceed their necessary and the contract that are to proceed their necessary and the contract that the contract that the contract their necessary are the contract that the contract that the contract that the contract that the contract the contract that the contract the contract that the c

movements at the present Seat of Gov plainly indicate a desire, on the part of the Mini try, to sacrifice some of their most cher iples, with a view to emil principles, with a view to uniously, mately defeat the great objects of the Annexation ists. The Decemviri have become seriously alarm ed at the progress which the con in our political relations in making. Unable them selves to destroy the prospects which Annexation holds out to a distressed and suffering peopleties would seek, by an unholy alliance, to bring to their aid that influence which, were it desirable, would to-morrow hurl them to the lowest depths of political degradation. What a humiliating spectacle to witness men, who aspire to public norm and who boast of their patriotism, stoop-

ng to the petty arts of mercenary traffic

The position of the present Ministry, and the game they are now attemping to play, are, we think, clearly understood by the people, and they will be prepared at a proper time to act with that decision and firmness which their present emergencies demand. Responsible Government, as inistered in Canada, we trust is in the seventh series of Shakspere's Ages. As the last of the Capulets, it must soon descend to the tomb, and give place to a more healthy and vigorous administration of public affairs. We do not profess to belong to the order of that Priesthood which with Apollo ministered at Delphi, or with Jupiter Ammon in Thebes;—nevertheless, we venture to predict, from the signs of the times, that Amexaion will work out the entire accomplishment of its great and meritorious objects, and that these objects will be consummated by pacific negocia-

one and constitutional measures.

We further predict, (and we desire that this rediction should be remembered,) that some of the individuals, who compose the present Ministry, will, under the change contemplated, become pressing and prominent candidates for office and When forced to yield to the requirements of that public opinion which speaks through the "Ballet Box," and when the boon, desired by Annegationists, shall have been granted, these ery men will be among the first to come forward and declare their hearty and entire concurrence in the measure. Let the people of Canada, mark, and beware of them. Like the Chameleon they bear about them, not only a variety of colors, but the enviable facility of speedily changing them. THE BOSTON TRAGEDY .- The following is the only additional information which we have received, by the last American Mail, with respect to this frightful occurrence. The inquest continues to sit in secret, and, with the exception of the two or three particulars mentioned in the following paragraph, no additional light has been, publicly at least, thrown on the matter.

(Prom the Boston Berald, December 8.)

Among the noise forms, a Professor Webster's house, was one for \$100, dated in 1365, which was just due, and and been cancelled and filed away; it was not endorsed, but laid apparently been paid, though not marked so.

The noise for \$5,451, due in 1382, and endorsed, is believed to have been secured by a increase on the Professor's mineralogical cabinet, which cabinet has been sold within a year, for \$62,500, is an amoneisting of gentle-men, who presented it to the Harrand University; and the note is believed to have been paid on the nate of the cabinet alluded to 1 the possession of all these agrees may be thus fixing accounted for. In regard to our Turisf of Imports, we should have as much to say in settling that, as the other States of the Union; we should participate in the legislation of Con-Turisf of Imports, we should have as much to say in settling that, as the other States of the Union; we should participate in the legislation of Cougress, and that is more than can be said with reference to our relations with the Imperial Parliament. But suppose we were to take off all the duties on American manufactures, and put 37 per cent. upon British goods, would the British Government pretend, with the writer in the Times, that we have exclusive control of our Import Tariff.

POTASH KETTLES.

POTASH KETTLES.

THE Subscribers, Agents of the ST. MAURICE IRON WORKS, will receive largequantities of the above during the Season of sleighing, and have a few on hand at present, assorted,
31, 5, 71, and 11 cwt. Owing to the increased
demand for this make of the article, arrangements
have been made at the Works which will enable
them to execute orders to the extent of 50 per
week, if required. They beg to remark that the
KETTLES latterly and now Manufactured at
the above Establishment, are quite superior in
quality and much lighter in weight than those
formerly made, it having been the practice here
tofore to cast from a Cupalo Farmace, a considerable portion of Scotch Fig. Iron was necessarily
used with Coke as fuel; at present they are cast
from the Blast Farmace and solely and directly
from the St. Maurice Ore, smelted exclusively
with Charcoal, thereby producing a durability in
the article that cannot be approached in any other
Kettles that can be offered in this market. The
weights have been made to compare with the
lightest imported ones by keeping the edges and
upper part thin, retaining the original thickness of
bottom, and great care in taken to produce a perfectly sound casting in every Kettle. Not withstanding the extra quality of the article and the
circumstance of their being warranted, the Agenta
have instructions to sell them at a very small advance upon the price of other makes.

They have also on hand a Large Assortment of
POTASH COOLERS of all sizes, including the
Flat Bottomed article of the most approved dimensions, with a Full Assortment of all the WARES
assually made at the Works.

All ST. MAURICE POTASH KETTLES,
COOLERS, SUGAR KETTLES and BOILERS,
as well us STOVES, will be known by the letters "F. Sr. M.," being cast spen them.

THE great and decided success, which has
attended this Institution has induced, the
Directors to REDUCE the RATES originally
required in British North America to the ordinary
European Rates. The result of such Reduction
is to enable parties to avail themselves of the important benefits of Life Assurance at much lower
Rates of Premium than those of any other Assurance Company transacting business in Canada.

The Directors have also resolved to extend to
British North America the advantages afforded rance Company transacting business in Canada.

The Directors have also resolved to extend to British North America the advantages afforded by the HALF CREDIT RATES of PREMIUM which have been so highly approved and are so generally adopted by Policy Holders in the United Kingdom. The most liberal conditions are likewise offered to 'he Assured an the limits to which they may proceed by sea or land, to other parts of North America without affecting their interest in their respective Policies.
