CANADA'S BILATERAL RELATIONS - SOME KEY STATISTICS

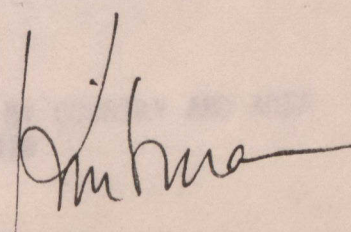

Attached you will find a selection of statistics covering certain of Canada's bilateral relations. These statistics, which were assembled with the assistance of the Library, are intended to serve as a handy reference guide. They are updated annually. It is our intention that this handbook be supplemented by a further volume containing a series of "country reports" which groups this same data on a country basis.

Policy Planning Secretariat

RELATIONS BILATERALES CANADIENNES:
QUELQUES CHIFFRES IMPORTANTS

Vous trouverez ci-joint quelques statistiques propres à illustrer les relations que nous entretenons avec certain pays. Ces données, rassemblées avec le concours de la bibliothèque et présentées sous forme d'un cahier de référence qui se veut pratique, sont révisées annuellement.

Nous avons l'intention de préparer un second cahier, complémentaire, lequel rassemblera les mêmes données mais les présentera sur une base de dossiers nationaux.

THE NATIONAL BUREAU OF STATISTICS

It should be noted that a selection of statistics covering the period of Canada's first federal election, those statistics which were available at the time of the election, are included in this report as a ready reference guide. They are placed separately in an annex to this report in order to be available in a separate volume containing a series of "country notes" which groups this basic data on a country basis.

Chief, Statistical Section

RELATIONS BETWEEN CANADA AND THE UNITED STATES

When you are at the time of writing this report, the relations between Canada and the United States are in a state of transition. The relations between the two countries have been characterized by a period of relative stability and cooperation, but in recent years there has been a marked increase in the number of disputes and conflicts between the two nations. This is due to a number of factors, including the increasing dependence of Canada on the United States for raw materials and a growing awareness of the need for a more balanced trade relationship.

It is the purpose of this report to provide a comprehensive survey of the relations between Canada and the United States, with particular emphasis on the economic and political aspects. The report is divided into two main parts: the first part deals with the general relations between the two countries, and the second part deals with the specific relations in the various fields of activity.

- 1 Value at the frontier of the exporting country.
 2 Value at the frontier of the importing country.
 3 Imports f.o.b. Including exports of foreign aid.
 4 Excluding shipments of merchandise between the United States and its possessions.
 5 Systems of trade. Imports: under the general system (G), both goods entering directly for domestic consumption and goods entered into customs storage are recorded, at the time of their first arrival, as imports; under the special trade system (S), goods are recorded as imports when declared for domestic consumption whether at time of entry or on withdrawal from customs storage. Exports: outward moving goods consist of; (a) national goods, i.e. those wholly or partly produced in the country; (b) foreign goods, neither transformed nor declared for domestic consumption in the country, which move outward from customs storage; (c) nationalized

goods, i.e. foreign goods, declared for domestic consumption, which move outward without having been transformed. General exports (G) comprise all three categories and in the general trade system, the sum of (b) and (c) may be tabulated as re-exports. Special exports (S) comprise categories (a) and (c). Semi-special exports (Si) are defined to equal national exports, i.e. category (a). Direct transit trade, consisting of goods entering or leaving for transport purposes only, is excluded from both imports and export statistics.

6 S for imports

Direct investment covers investment in branches, subsidiaries and controlled companies. Direct investment is defined as long-term capital provided by or accruing to residents of the foreign country of control for use in Canada by direct investment enterprises. It covers long-term debt (bonds, debentures, loans, advances, etc.) and equity (common and preferred shares, and retained earnings).

1 Valeur à la frontière du pays exportateur.

2 Valeur à la frontière du pays importateur.

3 Importations f.o.b.

4 Non compris les échanges de marchandises entre les États-Unis et leurs possessions. Y compris les exportations au titre de l'aide à l'étranger.

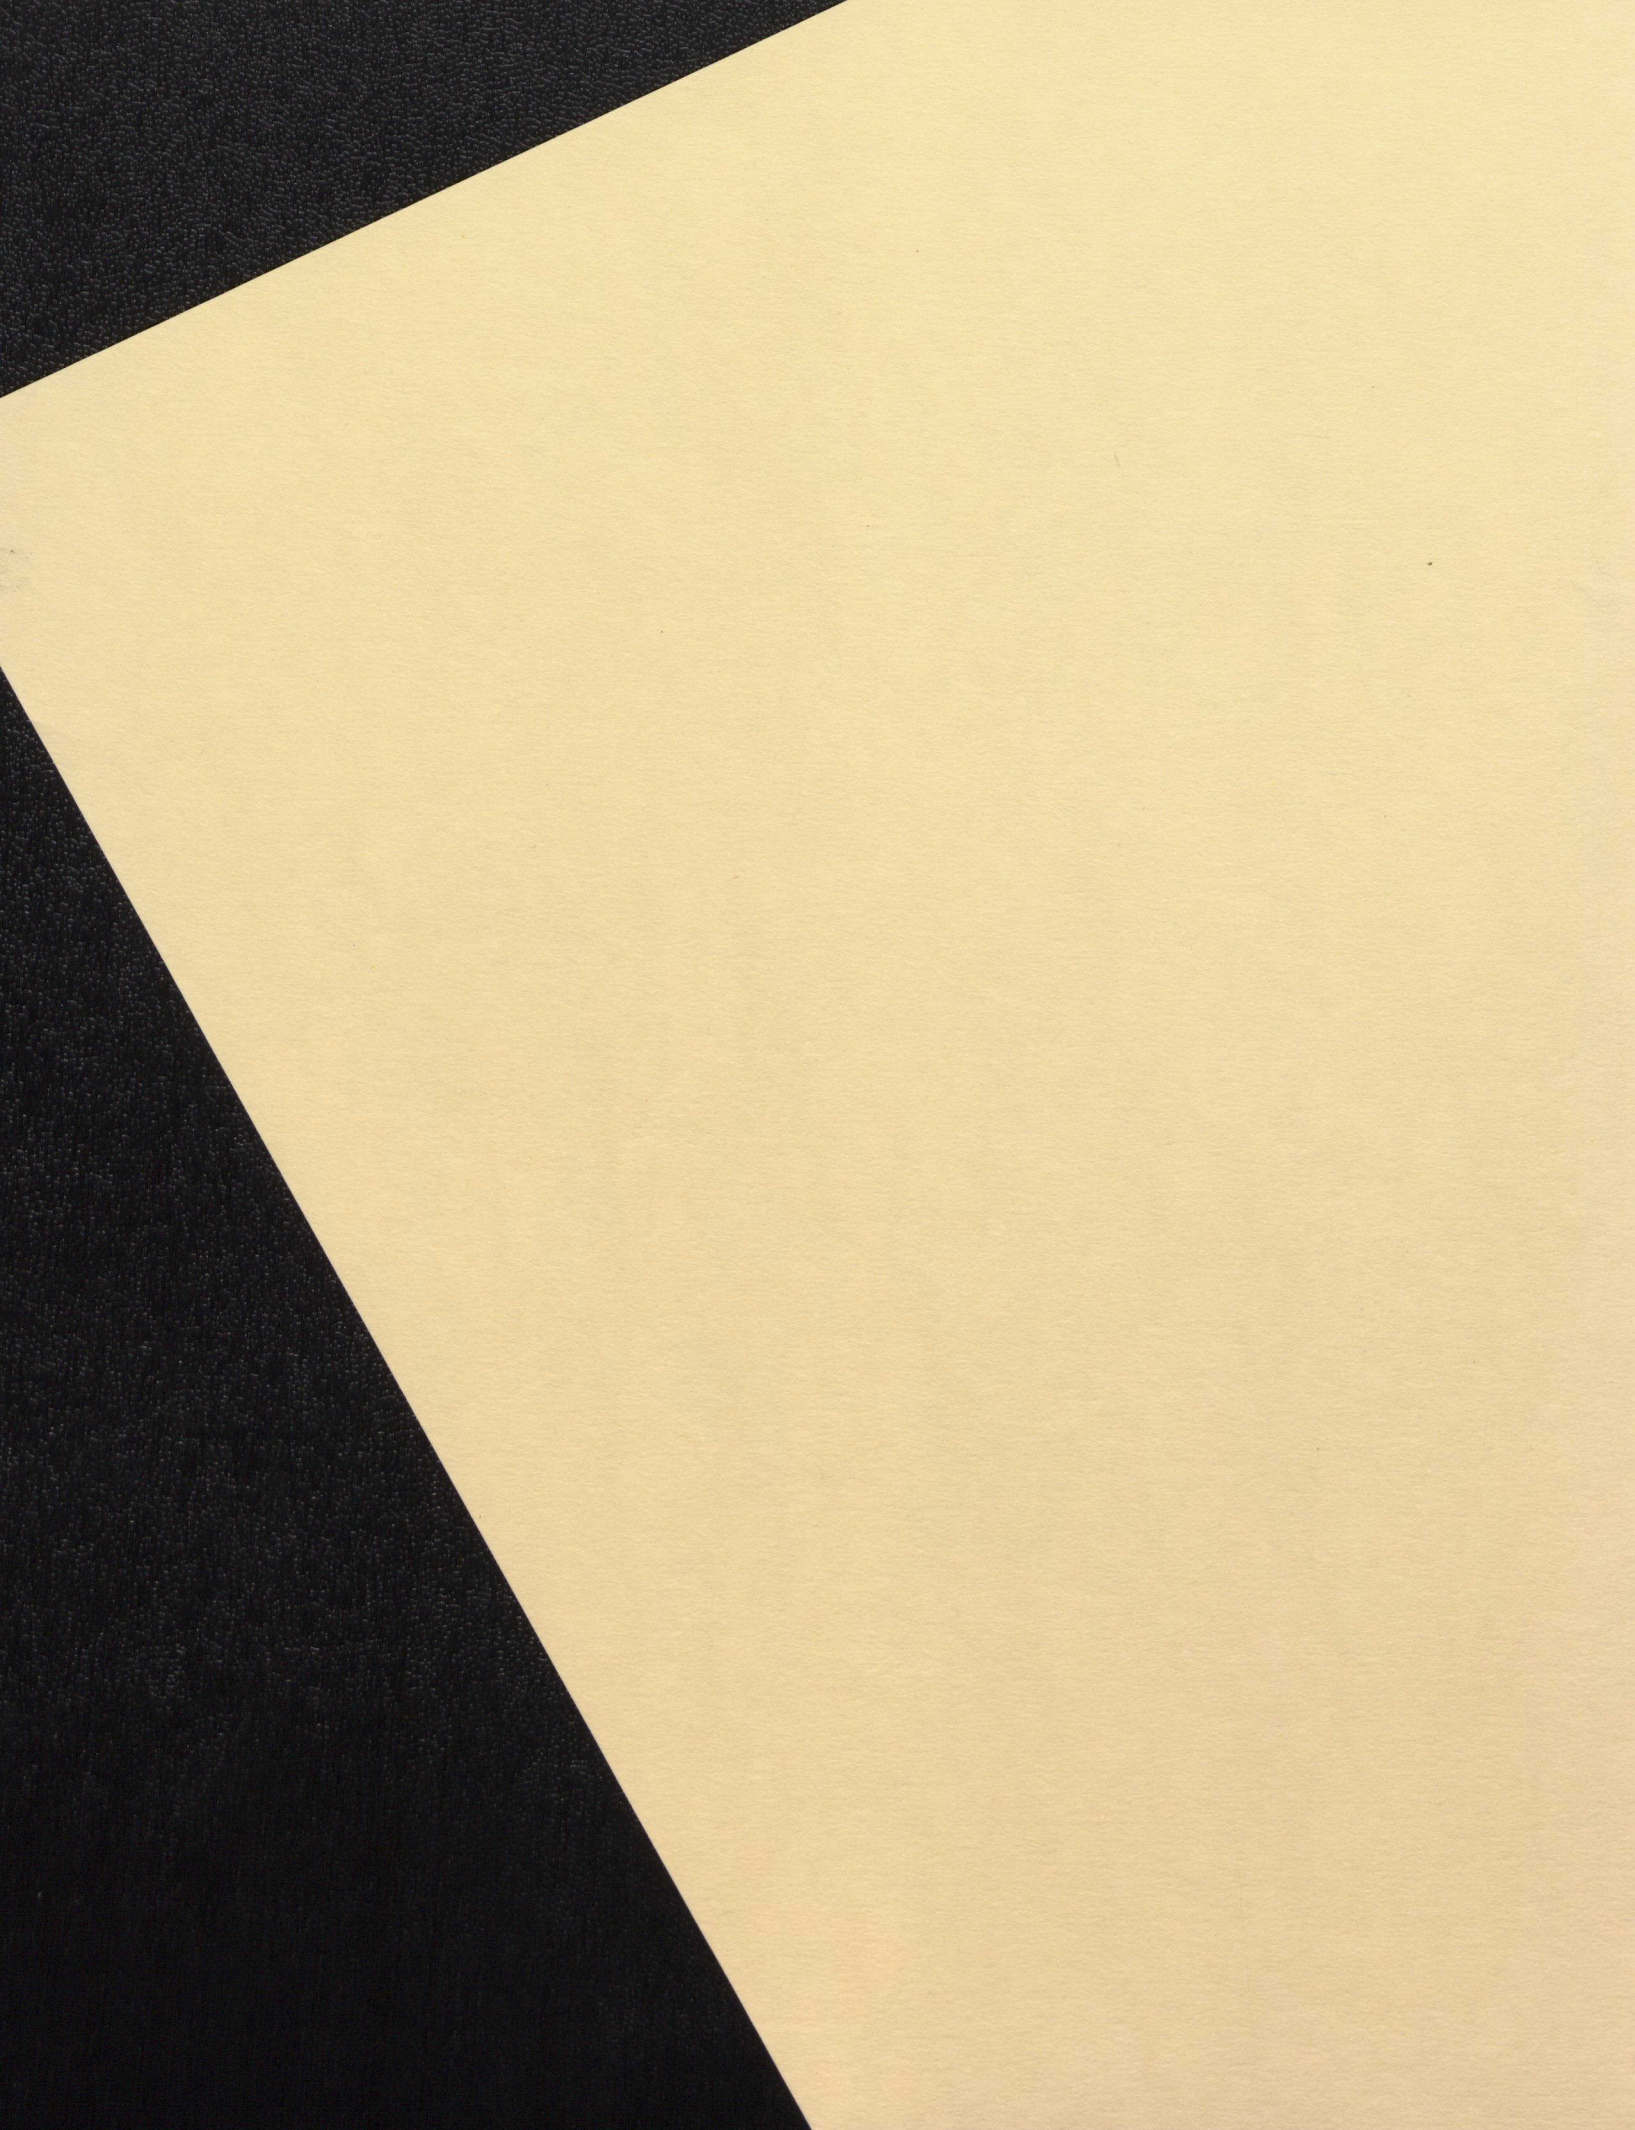

5 Système du commerce. Importations: dans le système du commerce général (G), à la fois les marchandises entrant directement pour la consommation nationale et les marchandises entrées dans les entrepôts des douanes sont enregistrées comme importations, au moment de leur première arrivée; dans le système du commerce spécial (S), les marchandises sont enregistrées comme importations lorsqu'elles sont déclarées pour la consommation nationale, soit

au moment de leur entrée, soit lorsqu'elles sont retirées des entrepôts des douanes. Exportations: les marchandises sortantes consistent (a) en marchandises nationales, c'est-à-dire entièrement ou partiellement produites dans le pays; (b) en marchandises étrangères, ni transformées, ni déclarées pour la consommation nationale dans le pays, qui sortent des entrepôts des douanes; (c) en marchandises nationalisées, c'est-à-dire marchandises étrangères, déclarées pour la consommation nationale, qui sont exportées sans avoir été transformées. Les exportations générales comprennent les 3 catégories et, dans le système du commerce général, le total de (b) et (c) peut être enregistré comme réexportations. Les exportations spéciales comprennent les catégories (a) et (c). Les exportations mi-spéciales (Si) représentent les exportations nationales, c'est-à-dire la catégorie (a). Le commerce de transit direct, consistant en marchandises entrées ou sorties pour des seuls buts de transport, n'est pas compris dans les statistiques d'importations et d'exportations.

6 S pour importations

Les investissements directs comprennent les investissements dans les succursales, les filiales et les compagnies contrôlées. Les investissements directs sont définis comme les capitaux à long terme qui sont fournis par des résidents du pays étranger de contrôle ou qui leur sont dus, et qui sont destinés à être utilisés au Canada par les entreprises bénéficiaires des investissements directs; ils comprennent les dettes à long terme (sous forme d'obligations, de débentures, de prêts, d'avances, etc) et les capitaux propres (actions ordinaires et privilégiées et bénéfices réinvestis).

Tiré de Le Quotidien de Statistique Canada. Le mercredi 8 octobre 1980.
