Mahmout v. Gotch To-Night. The Turk, who recently performed in Toronto, is expected by those who are in the know to be easy picking for Frank Gotch at Chicago to-night, tho the press agent has it that in Yussiff Mahmout, H whom he will encounter for the world's title at the Dexter Park pavilion, on Wed-nesday, Gotch will meet a man of unusu-al physical build. Not only is the Turk's meck so developed that it is practically at continuation of the back of his head, mak-ing a head hold almost impossible, but his feet are unusually short, 'muscular and heavy-a fact on which he counts to resist Götch's toe grip. Not a single wrestler who has opposed Mahmout here has been able to secure, a neck or head hold on him. He always wrestles in bare feet, and his manage, Antohe Pierl, W thinks this will be an advantage, as he does not believe Gotck' can use the toe grip without the leverage afforded by a shoe. PARIS, April 13 .- M. Santos Dumont, who has been "lying low" for some. time so far as aeronautics are concerned, during the last eight days has attracted considerable attention by the experiments he is making with his diminutive monoplane flying machine at Saint Cyr.

This monoplane, which is named "Mademoiselle," protably to indicate its slight build, can easily be carried on an automobile. The apparatus is less than 20 feet long and 15 feet broad. Its total weight, when M. Santos Dumont is on board, is only 330 lbs. A 24-h.-p. motor with which it is fitted is sufficient to give a speed of 70 kilometres

an hour. Mademoiselle is built of canvas and bamboo. For starting purposes it runs along the ground on three blcycle wheels. All Saints will hold a meeting to-night

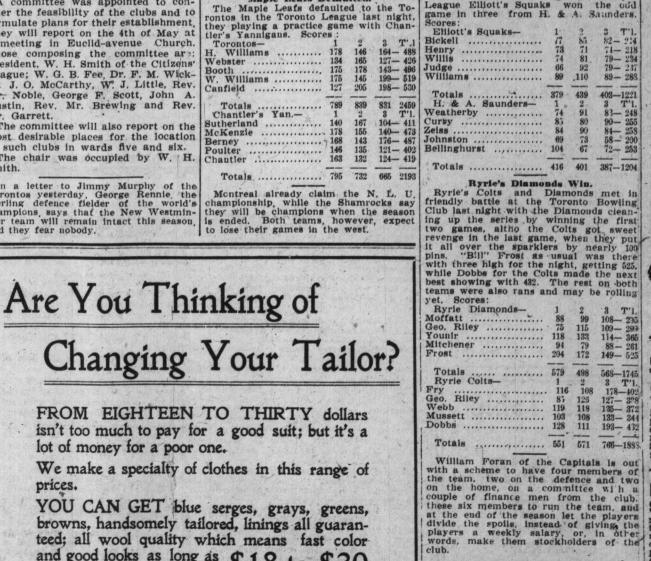

Belmont also employed him. Other well-known horse owners in this country for whom Hayward rode or trained were Luclen Appleby, A. J. Cassatt, Senator George Hearst, John Hunter, D. D. POPULAR GRAND OPERA.

Editor World: I do not know upon whom devolves the choice of operas selected for representation when opera panies come to Toronto. But if it lies in the choice of the people, I do not think it reflects with credit on Toronto think it reflects with credit on Toronto as a musical city. It would seem as tho Toronto, with her magnificent Men-delssohn Choir, is a one-sided city as far as its musical appreciation is con-

The reason I say this is that a few months ago the operas selected were Aida, Lucia, Trovatore and Carmen. A year ago Rigoletto was promised; Trovatore was substituted. This week's Trovatore was substituted. This week's operas were Trovatore, Carmen, Lucia and Fedora-Fedora being the only new opera promised. However, Fedora is withdrawn and Rigoletto substituted. It is nice to hear Rigoletto, but as Trovatore has been given every time a company has been here, at least Tro-vatore might have been scratched and Rigoletto substituted so that opera lov-ers would have a chance of hearing both Rigoletto and Fedora, which are ers would have a chance of hearing both Rigoletto and Fedora, which are more modern than Trovatore.

HOSPITAL ASSOCIATION

H. E. Webster of Montreal Elected President_Concluding Addresses.

Before the Canadian Hospital Association yesterday Miss Louise A. Brent, superintendent of the Hospital for Sick teachers information respecting their Children, gave an instructive talk on the usefulness of the visiting nurse. Edwin F. Stevens of Boston spoke on "Hospital Architecture," stating that cheek on that side of my face. As the in nearly every hospital from Maine to California, Canadian nurses were in the majority. He believed that nurses' homes should be separate from the hospital building, and private patients should be substituted for the present should be treated in a building sepa-rate from public patients. Dr. H. A. Boyce of Kingston General

Hospital read a paper, "The Evolution of Surgical Technique During the Last Half Century," in which there were three distinct discoveries in surgery. One was the substitution of the ligature for the red-hot knife and cautery; second, the use of anaesthetics, and, third, the introduction of the antiseptic principle by Pasteur.

Miss M. Miller of Lindsay urged that small hospitals be permitted to give a

complete training course. Dr. D. C. Meyers, Deer Park, read a paper on "Neuropathic Wards in a General Hospital," and submitted a patient who had been treated for three months, and an absolute cure had apparently been effected.

Miss A. I. Robinson, Galt Hospital, spoke on "What a Woman's Aid So-clety Can Do," in which she pointed out that it was essentially a woman's affair to attend to such things as linen, bedding; etc., in a hospital, without in-terfering with the 'management, The following were elected: Presi-dent, H. Company Has Sufficient Treasury to Continue Development Two Years.

Hargrave main workings are now down about two-thirds of the distance to the objective point and will reach it in the near future. The objective point is 307 feet from the collar of the main shaft, at which depth a level will be run in to reach the bonanza bed of ore known to lie in the Kerr Lake's sixth level of its No. 3 or "Jacob's" vein, and which is known to continue up to the Hargrave line and into the Hargrave property.

 The fact that active work is to be started to develop the Lawson, which adjoins Hargrave on the west, is of great importance to the Hargrave, as development there is likely to be as important as on Kerr Lake, which adjoins Hargrave on the north and east.
 The fact that the Jacobs' vein has been proved rich and strong to the shore, expecting they would follow.

Not since the farmers of New Ontario were offered Temiskaming & Hudson Bay stock at \$1 a share has there been such an investment opportunity in a mining stock as we are now presenting for subscription. Temiskaming & Hudson Bay shares are now wanted at \$300 a share and cannot be had.

We do not predict such a marvelous advance for Montreal River Consolidated, Limited, but we do look for a big appreciation when the company's ten claims are fully developed.

Our advertisement of a block of this stock has met with a success which we scarcely anticipated. The offering, however, has undoubtedly appealed to investors who are looking for a square deal in Ontario mines promotion.

The total capitalization of this company is only \$500,000, in 500,000 shares, \$1.00 par value. Of this amount there is left in the treasury the large number of 300,000 shares, with which to undertake a thorough development of all the company's claims. Although the capitalization is so modest it really becomes insignificant when it is considered that the company has ten properties of forty acres each, all well situated in the Montreal River district, in the townships of Willett and James.

Each one of these properties has been proven, and on no less than seven has native silver been taken from the surface. On M.R. 700, which is in close proximity to the Lucky Godfrey and the Devlin and Enright mines, a calcite vein has been uncovered nearly three feet in width, and trenching is now being gone on with on this wonderful showing. The eight claims in Willett are all immediately

adjoining one another, while the two in James are also immediately adjacent. It will, therefore, be seen that the development of the properties can be economically undertaken. It may be that when the properties have been developed that it will be properties have been developed that it will be thought advisable to increase the capital of this company to at least \$3,000,000, thereby giving pre-sent shareholders six shares for one, and, if the claims come up to the expectations of the present shareholders, and the reports which have been made on the properties, the capitalization will then be only of a conservative character.

As these properties have been paid for in full, and the company isfree from debt, it is in a position to devote the sale of its treasury stock to development purposes.

We hold 60,000 shares of the stock of this company, for which we are prepared to furnish certifi-cates immediately, and which we are offering for sale at 50 cents per share.

These are the directors of the company, and their names stand out as a guarantee of honest administration of the company's affairs;

POOR PAPER SPOILS BOOKS

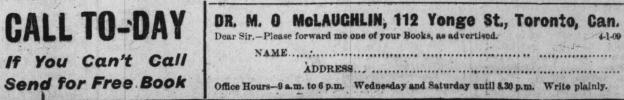

Binder Complains of the Pulpwood Product.

"It does not matter how well a book is bound, if the paper in it is rotten" said Cedric Chivers of Bath. England, at the closing session of the Ontario Library Association yesterday morning. "Bookbinders have had their troubles increased since the invention of making pener from pulpwood. The new process produces a paper which is very difficult to stitch together into a book." He emphasized the point that the most expensive binding was

the cheapest in the long run. Miss Macdonald explained the system used in Ottawa for keeping track of overdue books and Miss Dwight of the Ontario Agricultural College-Guelph, spoke on the card and index system of the library of congress.

The people who, after repeated disappointments, are seeking a remedy for their aliments hesitate to adopt any untried treatment for fear it will fail, like the others they have tried. To such we say, ask your neighbors what Dr. McLaughlin's Electric Belt has done for them; or, if you don't want to advertise your troubles too freely, write to us, and we will send you a list of persons cured by this grand electrical appliance, and you can write to them about it. May be we can refer you to someone you know in your own neighborhood, because there is hardly a village, city or township in which cannot be found persons cured by this wonderful Belt who are glad to make known its merits. known its merits. PAY WHEN YOU ARE CURED

This is my offer to any man who has not confidence in my Belt to ac-complish what I claim for it, if he will give security for it while he uses it. If you had been cured of Rheumatism. Weakness or Nervousness, or given renewed vitality by our Beit, you would glady tell others. So those who have been cured by it will gladly answer your questions. That will be much more satisfactory to you than relying on what we tell you, although we tell the truth when we say it has made the Weak strong, Nervous People rugged. Rheumatics sound as before they were afflicted, cured Lame Backs. Stomach Trouble, Constipation and Liver and Kidney Troubles. If you are suffering from any of these aliments, don't delay a day, but find out what Dr. McLaughlin's Electric Belt can do for you. It will cost you only a postal card or two-cent stamp to find out all about it, and may save you many dollars and discomfort.

Dr. McLaughlin: Dear Sir, --I am glad to stronger than I ever was before. I have gained over fourteen pounds since I started to use your Belt that it will bring them to their natural health and strength again. I remain, yours for health, A. S. PARTRIDGE. Dr. McLaughlin: Dr. McLaughlin: Dear Sir, --I am well pleased with the results I received from using your Belt. I believe I can say I am now cured, as I have not found my old complaint returning. Xour Belt has done its work, and done it well. At the present time I am feeling well, and if anything ever happens again I will ask your advice. Sincerely yours, EDWARD A. WOLFE.

writer, "is the object of the struggle of to-day." People don't want to be lost in the crowd; they want to stand out distinctive, to be personalities of themselves, to be individual. And nowhere does this trait show itself in plainer view than in dress. No woman of ambition and mentality wants to appear in the same guise as her neighbor, her friend, or it may be her social rival. No modern woman wants to be merely conventional.

So far as Toronto goes, this store has been the leader in the advocacy of Individualism in Dress. We have been striving all along to bring Individualism within the reach of the woman of taste, but of moderate dress allowance. With the aid of our new store and the vastly greater facilities it affords, we are now in a position to give our customers distinction as never possible before in this city. Practically everything is different. In numberless cases we show but one-two-three of a style. In cut, color, cloth, finish or trimming -there is a difference somewhere. You should take this fact into consideration when you are marveling at the moderation of our prices. It increases the marvel double-fold.

Here are high-grade examples of what we mean :-

TAILORED COSTUMES-THE INDIVIDUAL GARMENT.

Distinctive; every suit a character of its own. Different; different in weave, in style, in cut, and in shape; different in color, in tone of color, different in type. These are some of the features in our individual tailored suits, at \$35.00, \$40.00, \$50.00, \$60.00 and \$70.00. These are a few of the prices these suits are marked. The suits are some of the finest styles made in New York this season, and every suit is cut by a New York master hand; an expert for the coat and another for the skirt. The result is a perfect suit. In all new weaves and tones of colors. The new greys, taupes and peacocks, ashes of roses, and other new shades.
