GREECE'S SURRENDER TO ALLIES CLEARS SKY IN THE BALKANS European Influence May Avert U.S. War With Mexico

De Facto President of Mexico Reported Yielding to European Influences.

CARRIZAL "INCIDENT"

Clash Not Regarded as Indication That War is Inevitable.

WASHINGTON, June 22-One fact stood out tonight at the close of a day of many developments in the Mexican crisis. Apparently both the U. S. Government and the de facto authorities of Mexico hope to treat the clash at Carrizal vesterday as an incident aggravating gravely strained relations, but not of itself likely to precipitate general hostilities.

So far as the Washington administration is concerned, no final decision can be reached until President Wilson has received a report on the fight from American army officers. A despatch from Gen. Funston late tody said Gen. Pershing had heard of the

Still Hope For Peace.

Preparations by the war department for possible war with the Mexican Government went forward here today without, interruption. At the same time there came hints that Carranza, had been almost persuaded by European influences not to persist in a course likely to bring on a conflict. Many officials here have not abandoned hope of a peaceful outcome basing (Gentinued on Page 7, Column 5).

Waiting for sufficient time to accumulate a head of heavy shell, the ermans opened a violent bombardment of the French positions east and est of the Meuse, especially around Le Mort Homme and Hill 304 and in the region of Fort Vaux, including the Thiaumont fortified work, yesterday. The French beat off a heavy attack launched against their trenches between Hill 304 and the Bethincourt brook and they regained by a counter-attack the greater part of the trenches where the Germans gained a footing, between Fumin wood and Chenois, the previous night. It thus appears with the employment of heavy shells again in a bombardment of unprecedented violence that the Germans have decided to make another

throw for Verdun. It appears that the German high command deems it essential for the morale of the German army and of the German people that In retaliation for murderous aerial attacks by the Germans on French open towns, French air squadrons bombarded yesterday and the preceding night the German towns of Karlsruhe, Treves and Mulheim, east of the A big fire was seen to break out in Treves, and German military

establishments at Mulheim received fifty shells on their roofs. In aerial encounter French pilots brought down a number of German machines. The British front was marked by a lively encounter near Givenchy, north of La Bassee Canal. It was started by the exploding of an exceptionally large mine by the Germans and the following up of this operation by the bombarding of the British trenches. Under cover of this fire German troops entered the British position on a narrow front, but they were immediately ejected by a gallant attack of the Royal Welsh Fusiliers. The British exploded a mine near the Hohenzollern redoubt and occupied the lip of the crater. German guns which were shelling points behind the British lines were silenced by British batteries southeast of Armentieres. In the air, British machines, in co-operation with the artillery, carried out a great deal of successful air work. A marked decrease was noted in the air work of the enemy.

In Poiret Twill. Fine Wool Poplin, or the Splendidly · serviceable, Always Fashionable Covert Coating

S A TOP-COAT which will gracefully adapt itself to any occasion A that may crop up and demand the wearing of a wrap, let us commend one of these models in tan cloth.

They are plain-tailored and yet not severe. They are warm and yet not heavy. They are modish in line and finish, and yet of that conserva-

tive type which permits of much wearing without wearying of either style or color. They are well suited to general street use and serve admirably for motoring or traveling. Moreover, in the present display of such coats, many special values are being featured. For instance:

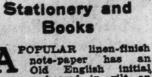

At \$19.75, collection of three-quarter length coats in Poiret twill, fine wool poplin and covert cloth, in various shades of fawn and tanclever reproductions of highpriced Paris and New York designs, beautifully tailored the majority lined throughout with satin. Many are individual models, while a wide selection is afforded of semifitting and loose-flaring styles, belts and the fashionable saddle-bag pocket being well represented.

At \$13.50, a splendid array of smart coats in light and dark tones of all-wool covert cloth—wide-swirling ragian effects, loosely-belted styles with military or convertible collars, semifiting designs with the panel fronts and backs especially well-suited to stout figures, and many pleated and fancy coats, including a few Printsess

pleated and lancy coals, models.

At \$11.50, a particularly nice-looking coat in all-wool covert cloth in a dark khaki tint—plain tailored, with sectional belt, mannish, notched collar and smoked pearl buttons. Also at the same price in tan covert cloth, loose ragian, and belted models with flaring skirts.

#### GANG OF MEN ENGAGED ON THE NEW HIGHWAY

IS DEAD IN TORONTO New Toronto Reeve Took Initiative and Ordered Work to Proceed.

Reeve Ironsides of New Toronto yesterday undertook a drastic step when he forced the issue between the Toronto - Hamilton highway commmission and the York County good roads over the ownership of the Lake Shore road by putting a gang of men to work on it and precipitating what may be a big lawsuit. Appeals to the commission have hod no effect and the reeve of New Toronto authorized the carrying out of the work on his own initiative.

York County council yesterday did not favor of the idea of the county commissioners that a \$25,000 bridge ought to be built over the Humber River at Bloor street, where the big freshet of March swept out the old structure. If built at all they think the city ought to pay a good share of the cost.

They appointed three arbitrators to act in the school trouble in section No. 12, Vaughan Township, over the selection of a school site near Elgin Mills.

#### RELIEF PROBLEM IN FRANCE COMPLEXED

Great Demand for Blankets, Sox and Women's and Children's Underwear.

Advice from an expert relief worker

has been received by the Secours National regarding the situation in France, and he states that the relief problem in that country is more complex than in Belgium, In enumerating the articles which are most badly needed, he states that soc are as much in demand as ever and requests that if persons in Canada have not the time to knit sox hemselves they can send the yarn as that article cannot be bought in France at the present time. The demand for blankets and bed linen is far greater than the supply, he says, and in advising in this regard suggests that sheets and pillow cases should be of unbleached cotton, the stronger the

better. He points out that all Europe economizing in surgical gauze, and asks that as much absorbent cotton and gauze as possible be sent. Among the other things that are needed ar bed quilts, clothing, shoes and women's and children's underwear.

There are two ways by which people who suffer from indigestion, dyspepsia sour stomach, flatulence, etc., can overwho suffer from indigestion, dyspepsia, sour stomach, flatulence, etc., can overcome the trouble. First, as practically all cases of the above are directly or indirectly traceable to acidity and fermentation, they can eliminate from their diet all foods which ferment and form acid, such as all starches and sugar and foods containing them, thus prohibiting bread, potatoes, fruits and most meats. About the only safe foods are gluten breads, spinach and small quantities of diet is almost a starvation one, but it is sometimes quite effective. The second who like to eat hearty meals of good foods, is to eat whatever is reasonably digestible, neutralize the acid and stop fermentation by the use of a good antacid such as bisurated magnesia, a teaspoonful of which in a little water mimediately after eating or whenever pain is felt, instantly neutralizes the acid, stops the fermentation and permits, the stomach to do its work without pain or hindrance. Owing to its simplicity, convenience and effectiveness this latter plan is now being adopted, instead of the old fashloned, expensive, weakening starvation process. In this connection it is interesting to note that since the widespread use of bisurated magnesis as arranged to supply it in 5 gr. tablets, or 3 of which are equivalent to a tearspoonful of the powder form and are much more convenient to carry.

Gather Vast Quantities of Munitions and Store Them for Drive.

NEW YORK, June 22.—An offensive movement on a greater magnitude than anything heretofore attempted is under preparation by the British and French along the entire western front, according to Dr. John S. O'Mally and Dr. F. C. Jacobs, of Chicago, recently

Dr. F. C. Jacobs, of Chicago, recently connected with an American hospital corps in France, who arrived here today on the steamship Noordam from Falmouth.

According to the physicians, this offensive wes planned to begin in April, but was forestalled by the unsuspected efforts of the Germans before Verdun. Evidence that the offensive movement is yet to take place, they said is the vast quantities of munitions that are being gathered and stored in convenient localities and the establishment cg numerous hospital bases, fully equipped, back of the lines.

"The boys in the trenches were stunned by the news of Kitchener's death." Dr. O'Mally said. "Later, however, the feeling became one of gratitude that K. of K. had been spared to finish his work—the organizing of the vast army offered to the allied cause.

### DESCRIBED BY CAPTAIN MECCA, HOLY CITY, TAKEN FROM TURKS

Success of Rebels Deals Hard Blow to Turkish Prestige.

#### ALLIES' CAUSE HELPED

Turks' Home Troubles Will Keep Them From Other Operations.

LONDON, June 22.—Reports have been received here that a serious uprising against the Turks is in progress in Arabia, and that the rebels have captured the Holy City of Mecca. The London newspapers declare that the rebellion is certain to have an important bearing on the way especially or tant bearing on the war, especially as regards the participation of Turkey.

regards the participation of Turkey. The l'ost says:

"The uprising is due to recent wholesale executions of the Mohammedan and Syrian notables and well-known religious leaders, and also to the spread in Arabia of a feeling that the Turks have abdicated their position as the protectors of the Mohammedans and have become the vassals of Germany."

The Graphic says: "The revolt is a smashing blow at Turkey, and the capture of Mecca is an event which will shake Turkish prestige to its foundations."

A Reuter despatch from Cairo says

A Reuter despatch from Cairo says the rebels, in addition to taking Mcc-ca, have captured Jiddah, the chief seaport of Arabia, and Taif, 65 miles southeast of Mecca, and have proclaimed independence of the Arabs from Ottomer rule

claimed independence of the Arabs from Ottoman rule.

Sweeping Successes.

According to this despatch, the grand sheriff of Mecca, the chief magistrate of the Holy City, proclaimed his independence, and was supported by the Arab tribes of the west and central parts of the country. He began operations about June 9 and won signal success. It is said the garrisons of Mecca, Jiddah and Taif swrendered, with the exception of two small forts at Taif, which are still resisting. At Jiddah, 45 officers, 1400 men and six guns were captured. Medina, 249 miles northwest of Mohammed, is closely besieged, and all communications to Hejaz are in the hands of the grand sheriff.

It was stated in London that the rising at Mecca was preceded by a similar insurrection at Kerkela, about 55 miles southwest of Bagdad in Mesopotamia, which is a sacred city besopotamia, which is a sacred city because it coatains the tomb of Hussein, a grandson of Mohammed. All the Turks were driven out of Kerbela.

Pan-Arab Movement.

The revolt is the outcome of the socalled pan-Arab movement, which has been gaining impetus since 1913. It aims at the abolition of alleged Turkish misrule, oppression and maltaxation, at the ejection of the Turks from the withle of the Arabian peninsula

### ALLEGED DUE SALESMAN RAILWAY ALLOWED TO CONNECT LINES

Suburban Company Can Link Up Dundas and Guelph Tracks.

#### CITY TURNED DOWN

Railway Board Sees No Rea. son to Withhold Permission Sought.

The City of Toronto was turned lown flat by the Ontario Railway Board in an important judgment hand. Board in an important judgment handed down yesterday with regard to the application of the Toronto Suburban Railway Company for the approval of the board of its deviation of Dundas street line to link up with its trunk line to Brampton and Guelph. The city opposed this on the ground that "the radial or interurban cars of the company would be operated over its street surface tracks which are now within the City of Toronto, and that the intermingling of the company's local and thru traffic would unduly interfere with the local service and would introduce conditions of danger that could not be tolerated."

The board replied that the company

troduce conditions of danger that could not be tolerated."

The board replied that the company had the right to do so, and the board had no power to deprive them of that right. And, further, that the board had observed that in Buffalo, Detroit and Cleveland a condition similar to that opposed by the city was in operation with success.

No Reason to Refuse.

The judgment declares that "the board sees no valid reason upon which it can withhold the approval sought! Referring to the powers granted to the company in the act, the board says: "No language could be plainer than this, that one purpose of the company's act in 1904 was to enable it to construct branch lines. Against such enabling provisions, what can it avail to urge, as it has been urged, that the applicant's railway was originally and now is a local street railway and therefore cannot be connected with the later western extension, which is in the nature of a trunk railway destined to transport, not local, but thru traffic?

"If the legislature has chosen by this enactment to authorize the linking together of the applicant's project as originally designed and constructed—a purely local street railway—with a more ambitious enterprise subsequently launched of a trunk or interurban railway, it does not rest with this board to say it nay."

After reviewing the provisions of the act by which the opposition of a nunicipality can be overridden by the board, the judgment says plainly "It will not suffer the undertaxing to be frustrated by the opposition of purely local interests, and has vested in the board power to order a deviation in the event of any municipality proving recusant."

The bourd therefore orders the sufficience.

event of any municipality proving re-cusant."

The board therefore orders the con-struction of the deviation.

Shocker and Birmingham Kicked Themselves Out of the Contest.

Special to The Toronto World.

PROVIDENCE, R.I., June 22.—In eleven innings of sizzling baseball, cran/med to the muzzle with all kinds of work, good, bad and indifferent, ranging in one minute from the sublime to the ridiculous in the next, with pitchers batted off the mound, men banished from the game, umpire baiting and general monkeyshines the Grays this afternoon defeated the Maple Leafs by a score of 7 to 6. From a spectators' standpoint the contest was the most interesting of the season here, for everything but a triple play was included in the hodge-podge served up. Pitcher Shocker and Manager Birmingham, especially the latter, with Lena Blackburne pelping out a bit on the side, did all in their power to have Umpire Keenan forfeit the game, and gave about as those an exhibition of real rowdyism as has ever been seen at Melrose Park.

Shocker began his kicking tactics with the first man up and continued to abuse the umpire until he was banished from the game in the fourth. Birmingham kicked at every decision. Keenan warned him several times and finally put him but of the park. He refused to go and it was not until Keenan drew his watch that the Toronto manager started for the club house. Then instead of going sirect he walked in the opposite direction, making a circuit of the outfield and held the game up fully five minutes. While he was on his way the Toronto nifield, with the exception of Hogan, any on the grass face downward, while Fhompson did likewise in left. Murray, Hogan and McTigue were the only mon to keep their feet and abstain from the childish business. With the disturbers gone the game proceeded smoothly to the end.

Shocker began operations in a master-ty manner and for the first three innings

gone the game proceeded smoothly to the end.

Shocker began operations in a masterly manner and for the first three innings had the Grays handcuffed, but he was given a bad pounding in the fourth, and this was the culminating point of his abuse of Keeran, and when he went to the mound in the fifth he was forbidden to start. Herbert took his place and got away in the fifth, was lambasted in the sixth and batted off the mound in the seventh/ when Tincup hit a tremendous drive that nearly broke Murray's hand in deep left centre and tearing thru rolled to the fence for an easy home run. Ben being on the bench when the ball was returned. He was followed by Rehg, who hit in the opposite direction and almost as hard, but stopped at third when he might have made it a home run just as well. Outcome, out went Herbert and in went Manning and the second man to face him hit for two bases and he was walloped hard to the finish.

In the meantime Tincup had been

dered as batted from the box, and chultz took his place. He was wild, ut unhittable and he was in no wise to lame for the run that tied the score, lackburn's weird heave being responble. Manning got the first two Grays ut easily in the eleventh. Rehg on a yo to Thompson and Powell on a pop to rahau. Then he blew up. Shean ingled to left and Onslow to centre utweller smashed the first ball pitch of ar over Thompson's head, good for pree bases had Shean been on first, and to winning run went over. The teams ill play a double-header on Sattrday. Providence— A.B. R. H. O. A. E.

### Central Athletes Win All Three Events at Varsity Twilight Meet

Both Central and West End were well but the handicaps were a little too represented in the twilight meet held at much. Varsity Stadium last night, when three

events were run off.

The 220-yard dash was run in two heats and a final, each one being very close. The first heat saw Cross on scratch. Newell four yards and Potter and Wardrop 10 yards out. It looked as if Cross would get the field the way he started, but Potter and Wardrop hit up.

#### BEAVERS' ROUTE MARCH THRU THE EAST END

One of the interesting military events planned by the 204th Beaver Battalion for the benefit of citizens in the east end will be a combined route march and outing for the battalion and their relatives on Tuesday next. There are two objects behind the event, one being to show the east enders just what they have done for the unit, and the second is to give the friends and relatives of the men an opportunity to see them and take lunch with them in a military marner before they go to camp.

#### EYE LETS TYPEWRITER COPY AUTOMATICALLY

A self-operating eye, which, when attached to a typewriter, enables that machine to copy any printed matter properly set before it, is the invention of a Brooklyn electrical engineer. The eye consists of a large sphere having a lens on its front side and a field corresponding to a retina on which are situated a large number of selenium cells connected with a source of electric current. The eye is mounted on and moves with the carriage of the typewriter, and is so focused that the image of but one letter is reflected in it at a time.

To understand clearly the arrangement of the selenium cells it is necessary to explain that if all the letters of the alphabet are superimposed on each other,

of the selenium cells it is necessary to explain that if all the letters of the alphabet are superimposed on each other, over a blank field, it will be found that certain portions of each letter cover sections of the field that are not covered by any other letter. It is on these isolated spots, each of which is distinctive of a certain letter, that the selenium cells in the retina are placed. That each letter may be so reflected that its image will overlap as little as possible the field covered by the reflection of other letters, a special screen is provided, which narrows the lines of each letter's reflection. When the letter "R," for example, is thrown on the retina, a portion of the image of that letter will fall on a certain selenium cell which no other letter would cover; and, since the R cell is in partial shadow because of this image resting on it, the electric current passing thru it by means of its wire connections is decreased. This allows a relay armature to move, and so closes a local circuit, and also actuates an electro-magnet, which in turn operates the R type bar of the typewriter, and prints the character on the paper. When this is done the carriage automatically moves ahead one space, and the printed letter next to the R is reflected on the retina, producing a similar set of motions.

The typewriter is fitted with devices

R is reflected on the retina, producing a similar set of motions.

The typewriter is fitted with devices which move the carriage a space when a blank space is brought in line with the eye, and which do line spacing at the proper time. The machine has not been perfected for commercial purposes, but it is proposed to make it suitable for copying letters, instead of using carbon paper, and for many other kinds of office work.

PIPE ORGAN HIDDEN IN UNIQUE MANNER

A pipe organ has been concealed in a large California home in a novel way. Near two large windows in the room in which the console is located are two cabinets having sides ornamented with grill work. Adjoining the cabinets and the windows are long window seats similarly ornamented with grills. It is thru these that the sounds from the organ enter the room. The pipes are located beneath the seats and cabinets in the basement. The organ is electrically operated, and the console can be moved about the room as desired. This portable part of the instrument is finished to match the rest of the woodwork.

NEW FREIGHT CAR UNLOADS DISCHARGES

To facilitate the unloading of bulk cargoes, such as coal, gravel and sand, from freight cars, a California inventor has designed a combination bucket and belt-conveyor apparatus to discharge material into waiting wagons. The mechanism is mounted on standard railway trucks so that it can be brought alongside the cars to be unloaded. A vertical bucket conveyor is mounted to travel along the arms of the steel framework which supports it, and clear a carfrom one end to the other. The hoisting apparatus discharges the material thru a hopper onto a belt conveyor that carries it to an adjustable chute at the opposite side, thru which it drops into wagons. The device is operated by a motor.

STRAWBERRIES SCARCE

Very Light Shipments of "Made in Canada" Brand on the Market.

**NEW CARROTS ARRIVE** 

Home Grown Tomatoes Becoming Plentiful-Asparagus is Decreasing.

Strawberries were scarce. None of the imported came in, and only very light shipments of the "made in Canada" variety, and as the demand was keen, being much too great for the supply, they brought slightly higher prices, selling at 11c to 16c per box. Wm. Wallace Armstrong of St. Catharines, and Geo Gadsby, Queenston, shipped in some of the best on the market to McWilliam & Everist.

the best on the market to McWilliam & Everist.

The first Canadian new carrots for this season arrived yesterday from Chas. G. Syer of Bartonville to Belknap & Son, for which they were asking 50c to 60c per dozen bunches. They had not sold/any, however, and the carrots were so small it did not look as if they would receive even those prices.

Gooseberries were shipped in in slightly larger quantities and there were some Gooseberries were shipped in in slightly larger quantities and there were some of better quality, ranging in price from 40c to 60c per 11-quart basket. Geo. Pepper of Lorne Park shipped in some of the best on sale yesterday to H. Peters and H. C. Davis of Freeman, some fairly good ones to White & Co. H. Peters and the Wentworth Orchard Co.

H. Peters and the Wentworth Orchard Co.

Asparagus is gradually decreasing in quantity and the bulk of it is becoming rather seedy—and has declined slightly in price, the most of it selling at \$1 to \$1.50 per 11-quart basket; some really choice bringing \$1.75.

Home grown hothouse tomatoes are beginning to come in very freely, and the prospects are that the shipments will be exceptionally heavy from next week on. Testerday the bulk of the choice No. 1's brought 17½c to 18c per lb.: a few extra choice selling at 20c per lb. while some rather overripe ones sold as low as 18c per lb.; the No. 2's bringing 10c.

Cauadian hothouse cukes are hard to sell, as most of them do not begin to compare with the imported hothouse, and even the best quality are not quite so good. Yesterday they brought from 75c to \$1.50 per 11-quart basket, the imported ones going at \$1.75 to \$2 per basket of 24 to 30.

Watermelons are coming in freely, three cars arriving yesterday and selling at 60c to 75c each; a car of late Valencia oranges at \$4.25 to \$4.50 per case; a car of Mississippi tomatoes at \$1.25 to \$1.35 per 4-basket crate; a car of Georgia cukes at \$2.25 to \$2.50 per hamper; a car of mixed vegetables in crates; carrots at \$4.50; beets at \$3.50 (about 100 bunches); cauliflower at \$4.50 to \$5 (about 2½ dozen).

**DEMAND BY HUNS** FOR SWISS GOODS Embargo on Exportation of Coal

and Iron is Threatened. BERNE, June 22.—Councillor Schultness announced in parliament today that Germany had made a demend that the Swiss Government permit the exportation of cotton and foodstuffs collected in this country by German agents. If the demand is not complied with Germany will prohibit the ex-portation to Switzerland of coal, iron and other materials, which would mean that Swiss industries would be brought to a standstill.

The Swiss federal authorities have asked for time to reply and are sending a delegation to Paris to con-fer with representatives of the en-

NEW YORK. June 22.—Quoted values experienced further irregular impairment today, heavy selling of the preceding radays being renewed in consequence of the more acute status of the Mexican situation. The movement was consistent in that it had its inception at the opening of the day's operations and except for fiftul rallies continued to the end. Mexicans were less affected as a group than other well known specialties, Petroleum losing only 1% at its worst, with 1% for Greene-Cananea, while American meiting lost little or nothin, and Texas to made an actual gain.

Metals were again the weakest features, Butte and Superior losing 3% and American Zinc 2, making a total of 8 for the latter issue in the two sessions. Coppers followed the trend of allied stocks, regardless of the increased divisional declared on Inspiration, which appeared to have been discounted by the trading element.

U. S. Industrial Alcohol, was the objective of a severe drive in the last hour, recording an extreme loss of 7½ on rumors that it had been decided to postpone a prospective "melon" or extra dividend. Other stocks of the same volatile description as well as munitions, were lower by 2 to 3 points. Shipping shares and some of the leading motors yielded their early gains, most of them showing net declines.

Rock Island was again the most active issue in the railway division, but fell under realizing saies, losing the greater part of the preceding day's 3-point advance. The debentures suffered to a like extent, but the refunding bonds heid their ground. Unjon Pacific was almost the sole important railway stock to make actual headway, the falling back at the feverish close. Total sales amounted to 585,000 shares.

Both the Benk of England and the Bank of France reported slight gains in gold heldings over the previous week, and Canada's dally contribution to this centre was increased by \$4,600,000, bringing the total from across the northern border on the present movement up to above \$71,000,000.

Bonds were irregular, with further slight co

in Few Issues.

The Toronto stock market was erratically weak yesterday. Sentiment appeared to be governed by Wall street, which in turn was dependent on the Mexican outlook. Sane sentiment here saw no reason for the connection, but it was a disturbance which could not be ignored and transactions were made accordingly. With lower prices there was more activity, and liquidation was prominent in the Steels, Cement, Smelters, Steamships, no action was taken at New Glasgow on Wednesday by the Nova Scotia Steel directors in the matter of dividend for the common stock, disappointment was shown by lower prices for the shares, but with some weak holdings out of the way the price rallied over two points. Dominion Steel also recovered a portion of its early loss. The other issues held weak up to the close and the buying demand was slim. The feeling of uncertainty carried over into the curb issues, but here prices weakened.

NEW DOMINION WAR LOAN.

Arrangements are under way for the notation of a new domestic loan in Canada by the Dominion Government, probably for \$100,000,000, half of which will be used to pay for munitions, the balance for war purposes. It is under-stood the bankers have all been corsuited and the details of it may be expected any day. Local financiers are not at all perturbed over the new loan and feel that the Canadian money market will experience little if any difficulty during the financing.

News of Great Supply British Empire Brings Down Chicago Market.

CANADIAN CROP BIG?

Liverpool Sent Out Bear Information Concerning Outlook.

CHICAGO, June 22.—Assertions that Canada, Australia, India and Argentina have now on hand more than sufficient wheat to supply British demands for 12 months had a depressing influence to-day on prices here. The market closed nervous at the same as yesterday's fin-ish to 1/4c lower, with July \$1.02% and September at \$1.051/2. Corn declined a shade to ½c net, the outcome in oats varied from %c off to %c up, and in provisions there were losses of 71/20 to

From start to finish bear news from Liverpool tended to prevent any important development is strength in wheat. In this connection particular stress was laid on an estimate that at least 280,000,000 bushels was at present available in Canada, Australia, Indian and Argentine, and that a sharp decline in ocean freights from the southern hemisphere was not at all unlikely. It was contended that wholly exclusive of the United States, such an abnormally large total would leave a considerable surplus for importing countries other than Great Britain, while new crops were gradually coming nearey. Good progress reported in the domestic harvest region southwest acted through the day as a further handicap on the bulls. Complaints of too much rain northwest and of lateness of the spring wheat crop led to several upturns in values, but to none that proved to be of a lasting sort. Denials were made that the Hudson Bay Company had purchased 5,000,000 bushels within a week. Instead, it was authoritatively announced that the amount was only 1,000,000 bushels, and that during the interval receipts at Winnipeg alone were more than 6,000,000 bushels.

Corn finally sagged with wheat. At first, however, traders were afraid of unsettled weather and were not pressing sales. For the most part oats were not governed by the action of corn. Crop reports, which have been almost unformly favorably of late, had a somewhat less encouraging aspect today, mention being made of rust in southwestrn Iowa and in the district around Peoria.

Provisions lacked support. One of the reasons was the heavy delivery of lard on June contracts. It was said the deliveries aggregated 2,000,000 pounds. Liverpool tended to prevent any im-

Mining Notes

The Crown Reserve have made the most important strike in Cobalt this year. A vein running from 8 to 12 inches in width, located on the 700-foot level, shows indications of developing into a high grade body. The vein shows smaltite in the calcite, and considerable native silver made its appearance boday. Silver is also splashed thru the diabase wall of the contact with the Keewatin, and the signs point to the find being one of the best in Cobalt to date.

The discovery was made 200 feet below other workings after the vein had been drifted on 100 feet. The new discovery promises to again change geological ideas of Cobalt and lengthen the life of the camp.

Kirkland Lake.

It is likely that the electric power line from Cobalt to supply the Kirkland Lake. Boston Creek and other districts will be completed by September. Construction has been started, and it is understood that contracts are being signed for power delivery to start Sept. 6.

With ample power Kirkland Lake should come up to the front. The Teck-Hughes is practically held up, except for two drills running by steam power. The mill is ready for operation. The Tough Oakes is producing about \$75,000 in gold a month, and the Lake Shore and Kirkland Lake mines are steadily blocking out ore.
