Ottawa asking him whether this wholesale hiring of foreign labor for Canadian Government contracts was a breach of the fair wage clause in the contracts and was informed that it was, and a request for more details was made by the government officer Mr. Clark immediately wired all information to the department of labor, and received a reply Saturday stating tee, is arranging the conference, and that the immigration department were states that a date convenient to all is moving is the matter. This/lettertelegram was signed by the minister of

Four Hundred Landed.

The local labor men declare that 400 Spaniards landed in New York Saturday and were held up, pending advice from Ottawa. The men were hired thru The J. Enoch Thompson Co., and were part of a large demand made by the English contractors who were awarded Section No. 2 of the Welland Canal contracts. The name given in The Labor Journal is Baldry, Yerburg and Hutchinson, with head offices at Westminster, London, Eng. The government states that this work must be done by native labor as far as possible. The story that there is not enough labor of the character required is denied by the labor men. who have sent Organizer J. Marsh to Niagara in order that any attempt to land the Spaniards at that point might be checked. It is stated that the Spaniards are more than 50 per cent

carpenters and will be employed as con . crete form makers, tho many of them are just ordinary laborers, who are willing to work for much lower wages than the Canadian laborers.

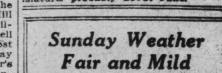

Consul Gets Advice. J. Enoch Thompson, the Spanish consul, received a telegram from Hon Mr. Crothers Saturday, saying that the bringing in of the men would conflict with contractors' agreements with their government, Mr. Thompson is writing to Spain of the government's attitude. It is said that many hundreds more were to be brought from Spain.

There are at present 3000 Spaniards In Canada. They are employed chiefly n railway construction.

Provided the '400 men who left New York for Welland Saturday can comply with the regular immigration reuirements, they will not be kept out of Canada, was the opinion of Mr. Thempson,

MAY GO TO, COUNTRY.

TRURO, March 14 .- There is a well grounded belief in Halifax that the Murray government will dissolve the house and go to the country at the end of the present session of the leg-islature, probably about June.

OR THE SYSTEM?

THE TORONTO SUNDAY WORLD.

Dancing has been in vogue since the days of long ago, practiced in different forms, only in a more or less moderate degree, but this old staple pastime has suddenly shot out in popularity really astonishing. Old and young, rich and poor, of all nations of the world are tangoing. "Dance mad" are the words which best explain the conditions." What's the Reason?

which best explain the conditions. What's the Reason? What is the basic principle? What is the reason, and where did the danc-ing craze first start? Are people begin-ning to learn the value and necessity of exercising, or are they turning to forms of amusement where they are actually the actors? The reasons above have probably helped to make dancing popular, but dancing masters and pro-fessional people claim that the inten-sity of the craze at the present time is due to two causes, the tango and the system.

systen The System Popular. The two-step, the one-step and the waltzes are all danced now with more or less of the tango movements, which

have to a marked degree increased the have to a marked degree increased the gracefulness of these old-style dances. The dancers themselves are conscious of the fact that they are performing gracefully, and while this is pleasing and exhibitanting, right here is where the new system steps in prominently in the success of the peatime, as it af-In the success of the pastine, as it ar-fords accommodation for the specta-tors in large numbers. Mother, father and other friends are there watching daughter gliding over a smooth surface all smiles and with an artistic grace-

ulness.

Just Like a Church. There is no doubt that the advent of the third party lent much greater interest to the contest, and provided an element of uncertainty which made things much liveller. Withal, however the election staged by the arts men was churchilke in its decorum when the methods of the science students are considered. Outside of a futile attempt on the part of the Progressives to shave the mustache off the nether lip of a prominent Liberal worker, there was nothing to clash with the student's idea of a prayer meeting. When some weird dancing was indulged in in the sym one frown on the part of the more sober-minded politicians was enough to quash all the tangoing which the more irreverent thought of indulg-ing in. S. P. S. Rep. Sustained

to quash all the tangoing which the more irreverent thought of indulg-ing in. S. P. S. Rep. Sustained. What the science men did in the draughting room behind convocation hall was much more strenuous than the proceedings carried on by the arts

E Couldn't make you a more timely offering than this special sale of Draperies and Curtains, which is for Monday and Tuesday, coming as it does right at the beginning of the housecleaning season. Most everything included in the two days' selling is new spring lines embracing some of the short lengths from patterns that have been. bought up quickly and many sample pairs of dainty lace curtains. All are pretty and will be on sale at these little prices:

MARQUISETTE LACE CURTAINS, 88.20 PAIR.

Thomas is the proceedings carried of by the arts men, who hold forth on the north side of the campus. In the first place, it is a rash proceeding to come forth for the blue. It is the aristocratic and the rich that the system like a shot from the blue. It is the aristocratic and the rich that the system caters to, and the to be parted with by the candidate dispensed extremely decorative feathers, which were used with artistic effect as hat decorations. Another would-be president invested in several hundreds of lead pencils, on which were printed ditions That Will Startle City Council Montreal Mail Out With Big Advance Ad - Man Who Sprung Legislature Sensat ion is Thought to Be Preparing Revelations That Will Startle City Council

MONTREAL, March 14.-The following advertisement, page size, appeared in The Mail this morning. It is believed to forecast Montreal city council revelations

blotters made on which were printed di-rections as to how the electorate should mark their ballots. The "school" was days before the actual voting came off. with the posters of the aspirants for office forming the mural decorations. Election cigarets and cigars were items which amounted up to a considerable

figure, helping to swell the grand aggregate. Chariot races, wrestling and boxing as well as general merriment were in dulged in by the denizens of "school after the results of the polling had been

announced. announced. The methods of the two faculties in-regard to the conducting of elections are indeed widely divergent, but in the final scramble for academic honors, in which all are alike engaged, shows that

Detroit's Four Hundred are also danc-ing on the European plan at five cents a dance, in an exceedingly large aca-demy, away out on Woodward avenue. In the swell residential district. It is common to see two or three thousand people a night at this place, and it takes two policemen to regulate the electric and limousine traffic around 12 colock o'clock

Yes, the strongest point of the European dancing system is in the strict manner of operation. It is really sur-prising how beautifully these places are

prising now beautimity these places are conducted, and while they are not full-dress affairs, style and prosperity are strongly indicated. About 40 different one-steps, two-steps and waltzes are offered to you from 8 o'clock to 12. Dance when you like or you

from S o'clock to 12. Dance when you like, or as often as you like, or you need not dance at all, is another point of the system. Conditions are ideal, the large crowd is composed of nice people, and the music is tantalizing Everybody has a good time, but, re-member, the system only accepts ladies and gentlemen with manners and char-acters strictly above reproach. No wonder mother likes the Euro-pean dancing system. The tall, stern floor manager continually strolling back and forth over the dancing sur-face in such a commanding way regu-iates and handles the crowd surpris-ingly well. well

LLOYD GEORGE TO BE

SOCIALIST LEADER

Rumor Has it He is to Form

Coalition With Parliament-

ary Labor Heads

MONTREAL, March 14 .-- A London

cable to The Daily Mail says: The Daily Express (Conservative) prints an article hinting at a political intrigue which aims at the establish-

ment of a working alliance between Mr. Lloyd George, the chancellor of the

exchequer, and Mr. J. Ramsay Mac-donald, the leader of the parliamentary

labor party. It is based upon Mr. Lloyd George's eagerness to secure a

compromise on home rule and Mr. Macdonald's hint in the debate on

Monday last that the government should drop the time limit feature of

ts offer to Ulster. The Express says that both leaders are eager to get home rule out of the way, and it is already anticipated that

after the next general election they will act together in the formation of

radical-socialist coalition which will

e in active opposition to the imperialist Liberals, represented by Sir Edward Grey and Winston Churchill. The Express adds: "The scheme is

ess fantastic than might be supposed.

Lloyd George's place in politics will soon become dubious. He cannot hope to lead Liberalism—he has too many

nemies-but as the acknowledged

leader of a socialist intrigue he would be splendidly in his element."

MONTREAL March 14-A London

"There was another conference yes-terday at No. 11 Downing street be-tween Mr. Lloyd George and Mr. Bir-rell. Irish secretary, and Messrs. John

BY MRS EDM

BRYN MAWR DANCE.

The Bryn Mawr dance was held on Tuesday evening in the Masonic Hall. College street, The patronesses re-ceiving were Mrs. H. H. Wallace, wearing a gown of wisteria satin and shadow lace; Mrs. A. C. McKinney in blue brocade and lace and beauty roses; Mrs. F. J. Randolph looked well in black satin with lace and pearl ernaments; Mr. A. C. McKinney and

Mr. H. H. Wallace accompanied them. Others noticed dancing were: Miss Verna Grant, Miss Beatrice Smith. Miss M. Joedicke, Miss C. V. Carson, :-: WEDDINGS :-: WALLER-MACDONALD.

THE TORONTO SUNDAY WORLD

At the home of Mr. and Mrs. R. Nu gent, 14 Thompson street, by the Rev. J T. Hall. Morningside Presbyterian Church, Mr. William C. Waller, Ham-Church, Mr. William C. Waller, Ham-ilton, was married to Williamina Mac-donald, Buckingham, Scotland. The bride was gowned in Alice blue satin, and was unattended. The wedding march was played by Miss Bessi Ke-hoe. After a short honeymoon Mr. and Mrs. Waller will take residence in Penetanguishene, Ontarlo.

SMITH-HALL.

A wedding was solemnized on Wed-nesday, March 4, at seven o'clock, in St Anne's Church, when Miss Reta Hall, only daughter of Mr. and Mrs. W. J. Hall, was married to Mr. West-wood Smith, Regina, son of Mr. and Mrs. L. Westwood Smith, Willcocks street, Toronto, the Rev. Lawrence

Skey officiating. To the strains of the Mendelssohn Wedding March, the bride entered the church on the arm of her father and looked beautiful in white satin, and shadow lace, heavily embroidered with pearls. Orange blossoms crowned her Brussels lace vell and her bouquet was a shower of lily-of-the-valley and white orchids. She was attended by Miss Tessie Smith and Miss Florence

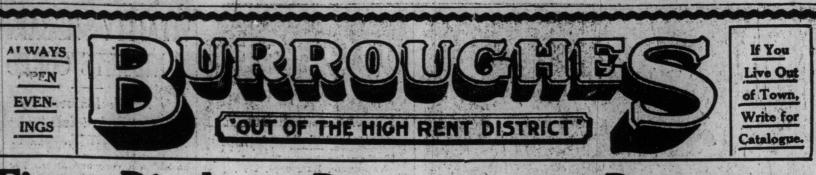

Jackson, who wore gowns of pale blue satin and with lace paniers, gold lace, Juliet caps, and carried bouquets of Killarney Toses. The groom was assisted by Mr. Will

Hall, and the ushers were: Mr. Al-fred Boddan and Mr. Robert Inch. A reception was afterwards held at the bride's house, 113½ Lansdowne avenue, Mrs. Hall wearing a lovely purple gown with gold and carrying purple gown with goin and carrying pink roses. The groom's mother wore a handsome white satin gown with black lace overdress and a corsage bouquet of orchids and lily-of-the-

The bride's going-away costume was of golden brown with a smart black hat, and a Persian lamb coat, the gift of the groom. Mr. and Mrs. Smith left on a trip to

no soreness.

The Children's Aid Society are looking for Fred Wm. Hale, a carpenter, there was no necessity for any ac-knowledgment. It was my wife's wish, as well as my own." The pioneer of the "no wedding presents" movement was Mr. Arthur

formerly living at 206 Van Horn street, who has disappeared, leaving ; homeless boy to be cared for at the M. Samuel, ex-lord mayor of Norwich. expense of the city. Redvers Hale, admitted to the society Friday night,

tated that his father had sent him to buy one pound of cheese about 8 o'clock Friday morning. When the boy got home the house was absolutely empty, even of furniture, and the father had disappeared. He did not even have the cheese, for the father had wisely ordered him to send it C. O.D. to the deserted house. The boy's mother is thought to be in Bristol, having gone to England last April The Children's Aid will take charge of the deserted boy, who is 18 years old, and friendless.

MARQUIS OF BRISTOL DON'T LIKE LIBERALS

Would Like to See Them All Dead and Buried and Socialist Hung, Drawn and Quartered.

Do you know that nearly half the corns in LONDON, March 14. - The Maruis of Bristol the other day said e "hoped to see every Liberal minthe country are now ister dead and buried, and every Soister dead and buried, and every So-cialist hung, drawn and quartered, and Mr. Lloyd George in a much warmer place than in the Riviera, where he generally took his holidays." Lord Bristol, who succeeded his uncle in 1907, is a great landowner in Suffolk, where his estates total up to about 0.000 acres. Lowworth Park in Blue-jay takes out a million corns a month. It frees from corns legions of people daily. Since its invention it has ended about 40,000 acres. Ickworth Park, in which his mansion stands, is an immense place, 11 miles. in circumfer-ence, and covering 1800 acres. The The way is quick and easy, pain-less and efficient. Apply Blue-jay house is a curious design, for Fred-erick Augustus, Earl of Bristol, inat night. From that time on you tended it as at once a family man-sion and a temple of art. But he lost his collection of paintings and sculp-tures, and the design had to be modified. Then Blue-jay gently undermines the corn. In 48 hours the loosened corn comes out. There is no pain,

The Balance.

The late Barton Willing of Phila-delphia used to lament that the trust kings, with their untold millions, had crowded out the fine old aristocracy of

"Money governs everything nowa-days." Mr. Willing once said at the Philadelphia Club. "It even governs society. When we weigh a man nowa-days in the social scale we always use a cash balance."

The Noisy Noyes Again. Ezra Pound, the Philadelphia poet, whose work has thrilled London, said the other day of Alfred Noyes, his British rival:

"Noyes declares that my torch of diluted Browningism, after a feeble splutter, has gone out. Now. in re-

venge, let me tell you a story about Noyes bawled the whole thirty stanzas into his poor deaf ear. Then, at the end, he said, with a complacent Noyes and Swinburne. "Some time after Rossetti's death

Noyes wrote a long memorial poem. He was so proud of this poem that he waylaid Swinburne one morning on Putney common and insisted on read-ing it to him. Some time after Rossett's death smile: "There, sir, is my poem on Ros-setti. What do you think of it?" "It would be better.' Swinburne an-swered, 'if you had died and Ros-"Swinburne tried to escape, but setti had written the poem.

That the people of Toronto were waiting for a reliable optician to begin business in this city whose charges would be moderate and whose service would be scientifically perfect is evident in the steady growth of this business Would be scientifically perfect is evident in the steady growth of this business. We have been here only a few months, yet our business today would be creditable to any firm of opticians who have been located in Toronto for ten years. It has steadily grown, and already we find ourselves cramped for room in a store which we believed would be ample for our purposes for several years. The recommendation of one satisfied customer to another is chiefly re-sponsible for this. We have among our patrons some of the begt-known men and women in the city who have not hesitated to do us the favor of a hearty recommendation to their friends.

MOSCOW, March 14.—Empress Alexandra Foedorovna, Moscow's governor, Count L. N. Mouravieff, and many other mighty persons are deep in discussion — The terrible slaughter MOSCOW, March 14.-Empress | figures further

in discussion. The terrible slaughter of bables that goes on in Moscow's Foundling Hospital. Since this charitable institution was

founded it has put nearly a million babies to death, and despite "science" and "civilization," and "the progress of medicine," it is more fatal to be put into it today than it was in the bar-barous age of its founder, Catherine the Great. For tho in the first years of foundation sixty per cent. of the foundlings died before one year of life was finished, that is nothing to what happens now. Of the 119,470 found-lings brought into the "dom" during the decade ending 1911, 90,859 were dead within a year.

Lethal Chamber.

Last summer a member of the Mosw municipal assembly called the "great lethal "Vospitatelni Dom" a amber; but somewhat expensive, said, "If they must all be killed why not kill them at once." This remark was called forth by a newspaper report that of 207 children brought into the hospital during Easter week, 135 were dead before the end of July . Peter the Great's widow, Catherine

the First, and his daughter, Elizabeth, built several foundling hospitals; and Catherine the Great built this vast Moscow hospital. She issued a decree saying that the "dom" was "for the good education of innocent children, and to prevent the innumerable murders by unhappy mothers." The "dom' "The conditions in the hospital," says Dunaisky, "are such that the figure of Mercy, which stands on one of the gate pillars, ought to be labelled 'Death.' That is, unless 'mercy' is was to take children born out of wed. lock, whose mothers were poor. It was to be a model institution, save many thousands of lives." "t. The male foundlings, when they attained manhood, were to marry serf girls, nocent children out of a sinful, sor who by virtue of the marriage were at once to be set free. This pious in-tention was frustrrated by the fact that more than half the babes, male and female. died before they were the feeding, clothing and ventilation are splendidly arranged for the causwho by virtue of the marriage were and female, died before they were ing of speedy death." twelve months' old; that not one in twelve months' old; that not one in ten reached the age of ten; and that not one in twenty reached ar old a few infants. It picks these out on not one in twenty reached an old not one in twenty reached an old enough age to marry, and liberate a serf girl serf girl. foster-mothers, and puts in relative-

Charity Lacking.

no subsidy. They declared that it must be maintained out of "good men's charity." children taken in. 1073 died. To remedy this a tax was put on playing cards for the "dom's" benefit, and it was allowed to run a pawnship. These resources brought it in \$2,000 a year, or about \$2 a year per child. In those days the "dom" took and slaughtered about 1,000 children a year; now its sphere of beneficence is enormously enlarged, for it takes and slaughters about 10,000. The last attempt at reform was the inclusion of the "dom" in the class of charities known as "The Institutions of the Empress Marie." in the street, and also all children de-Toronto, Feb. 8, '14. cess was greater. For these figures show the total number of children taken in, but of the deaths they show taken in, but of the deaths they show only that portion which took place within the hospital walls. The real mortality was double. That is, since the hospital had the ingenious notion of sending the children out to nurse in the villages near Moscow. At first the village women were given a lump sum of \$1.50 for each child, and for this they were expected to bring up the child for a whole year. They took the money and let the infant die. This system is still in force, with the difference that the village people are DULUTH, Minn., March 14 .- A

a little better paid. But the massacre for deportation,

a little better paid. But the massacre in the villages goes on. How many die is not exactly known. But in four Moscow districts, which took children in 1909 and 1910, 5,800 child-ren died out of 7,000. The final esti-mate of Dr. Dunaisky, a recognized authority, is that of the 1,088,000 bables brought into the hospital dur-ing 150 years, at least 900,000 perished either there or in the villages within one year of birth. The cause of the massacre of in-nocents is more or less intentional reglect, starration and lack of air. "The conditions in the hospital," says

A Terse Talk About Canadian Opportunities

F WE could only go back and foresee the opportunities in Real Estate, Mines, or in fact any Canadian investments of the past five years, would we not secure a goodly portion of these good things, knowing as we know now the results of such investments? Yet I will wager that a great many people, even with this knowledge of the outcome of their opportunity, would hesitate, not because they really do not know the ultimate success of their investment, but because a great majority of people hold on to their hard earnings and are satisfied with the 3 per cent. the banks allow.

If you invest in that which people must always use, then you have made an investment really worth while. For instance, today in Canada you have the same opportunities that Childs' Restaurants had in the United States twenty years ago. What will Canada be twenty years hence? I doubt if anyone has imagination enough to foresee the changes at that time. Remember, the good things have been pretty well taken up by the wise men in the States today, and naturally the multitudes of people from the States and Europe are looking to new fields for new opportunities. If you who are here do not take advantage of your heritage and grand opportunities, and do not use them for your material benefit during the next twenty years, or even during the next ten years, you will know that you have failed in the face of such good chances and opportunities that seldom are bestowed on a race of people in the course of a lifetime. Remember, anyone can get 3 per cent. to 6 per cent. on their money with apparently perfect safety, but the man with from fifty to a thousand dollars must speculate wisely, taking as little chance as possible on the outcome. Again, it is not the 10 per cent., 20 per cent. or 40 per cent. that your dividend might amount to, but what your stock is worth, providing it pays those dividends.

Did it ever occur to you that the greatest and most powerful races of the world today are of the Northern Countries?

Do you realize that the twentieth century belongs to Canada, and that the influx of people and money has only just started?

Some of the most successful financiers in the United States today are the men who, years ago, invested their money in commodities, foodstuffs, or restaurants, realizing that people must cat-with the result that every chance of failure was thereby eliminated.

After all, it is only the wise speculator who really makes the fortunes, and he can doubtless show you as many poor investments as good ones that he has made during his lifetime. Money makes money; a dollar saved is a dollar made, so long as it is working for you.

Can you not learn something of real value to yourself and your future through this little chat by an optimist? This are a string of

HOLMES RESTAURANTS Limited

offer remainder of balance of 10,000 shares announced in previous advertisements. Par value of shares is \$10 each. Authorized capital, \$250,000. Smallest subscription accepted is for five shares.

For the Small Investor :-\$50 Secures Five Shares

Every man has the same opportunity to make a handsome investment for himself.

If you have only a little to invest, you may take as low as five shares, with the same future benefits, in ratio, as the largest subscriber.

A Logical Investment

Bowles', Childs', Liggett's, Loew's-They had foresight-they KNEW Toronto must grow, so they planted their seed early, and today are reaping a golden harvest.

Ask the man on the street what profits are being made in the restaurant business.

Every good restaurant in . Toronto is overcrowded, and every day and week makes the situation more acute. Use a little gumption! Think it over carefully. ' We are next, with the most up-to-date restaurant in the Empire,

Two Holmes Restaurants in Toronto. One in Hamilton, London and Ottawa

The present parent Company, with authorized capital of \$250,000, to cover Ontario, proposes to establish a Holmes Restaurant at each of the above-named points, with two in Toronto, ultimately forming subsidiary Companies in each of the Provinces.

Erection of the First Holmes Restaurant Started Friday, March 13

Building operations have commenced and will be rushed to early completion. The contract has been let by our Architects-Messrs. Hand, Harris and Merritt, of Toronto-and the, preliminary work of wrecking and excavating, which was started last Friday, is progressing rapidly. The directors will spare no effort in making our first restaurant the finest that money and ingenuity can produce.

Thomson, K.C. instance is that of united co-operation and the counsel for Sir William Macof municipalities in establishing a prokenzie, are in conference over the com pleting of the agreement of purchase for the clean-up of the franchises. All | are in accord in the preparation of an agreement which will confirm the city in securing as great a bargain as ever was offered an city in the world in the way of municipalizing public serlices vices.

As the negotlations are now tending. there is the possibility that the Pro- about the end of May. vincial Hydro-Electric Commission

LAND ACT WILL DRIVE will be given an opportunity to cooperate with the city for the general

interests of the provincial hydro system. Only very recently the provincial commission requested the city to buy out the Interurban Electric Company's

interests within the gity, so that the company's interests outside the city could be acquired by the provincial commission. To grant the request would cost the city over \$200,000, but it would clean up all the franchises. In turn, the provincial commission may be invited to reciprocate by assisting in the completion of the agreement by which the provincial hydro-electric system will have in Toronto a field entirely free from competition.

A policy of co-operation between municipalities and the provincial government in financing such activities as to undertake unassisted, is now being steadily developed. One instance is that of the citv's co-operation in establishing a detention home and psy-

SCOTS TO CANADA

Tardy Performance of Provisions of Act Discouraging Land Applicants

MONTREAL, March 14 .-- A London cable to The Gazette says: That the tardy process of securing small holdings in Scotland would have the result of driving many Scottish settlers to Canada or elsewhere, was declared by Mr. MacKinnon Wood, secretary of state for Scotland, in the House of com mons vesterday.

The house at some length discussed the amending bill to the Scottish small landholders act of 1911, the mover of the second reading. Mr. James Hegge, are most desirable, and for which the had been accepted as suitable. This government has not sufficient revenues was ascribed to the fact that the board This of agriculture was obliged to negoti ate with landowners to arbitrate as to their compensation. Under the amendment the number of members of the

American citizens are being arrested whatever as to the result. The Equal in Mexico and forced to join the army of President Huerta was revealed today by Jean Joandec, who had just been released after being held captive for several months. His statement to member for Edinburgh, pointing out this effect was confirmed by United that out of \$000 applications only 300 States Charge d'Affaires O'Shaughnesthis effect was confirmed by United sy, who said he knew of at least twen? ty-five cases of this nature. In no case, however, added Mr. O'Shaughnessy, had the Mexican Government refused to free the United States citizens

when demand for such action was Joandec was arrested at Mexicali, just across the border from Calexico, Cal., on Sept. 16 last. He had strolled across the line to visit Mexicali. Suddenly he was seized by two soldiers f the Mexican army, Major Cerantes of the infantry battalion giving the order for his arrest. He was ing the order for his arrest. He was told that he would have to join the Mexican army, and altho he protested that he was an American citizen, he was bound and started for Esenada.

PRESI DENT EDERAL LEAGUE GOP

LONDON. March 14.—Interesting / Lewis won as to his being an infant estimony has just been given in court and not liable on the contract.

English Sporting Letter

testimony has just been given in court here in an action for damages brought Baseball has taken quite a hold on the English public, and you hear the game discussed everywhere. It is claimed by the English sport writers that the American game of baseball is by Samuel Shears, against "Kid" Lewis (Geshon Mendeloff), who is well known in American fisticuff cir-The defense was that "Kid" cles. Lewis was an infant, that he was entitled to repudiate a contract, and that he had done so. There was a counter claim for an account of the in many respects a glorified edition of the old English game of rounders. Rounders is one of the leading games among children in the north of Eng-land. The side going in first to bat line up one behind the other in the sums received by plaintiff on behalf of "Kid" Lewis. Lord Tiverton, for Mr. Shears, said that in June 1912, the plaintiff entered into a contract to act as the manager of "Kid" Lewis for den or home base, and the pitcher, generally the captain of the other team, throws a rubber ball to the fore-most player in the den, who strikes it three years. He arranged contests for him, and within eighteen months of won £750. After his Longsdale belt victory in October, 1913. Lewis at the ting the first two balls delivered, but he must strike on the third and run instigation of Mr. H. Morris, a rival of the plaintiff, put an end to his con-tract with Mr. Shears. Under the confor the first base. The ball is return-ed to the pitcher and the innings contract plaintiff was to have 25 per cent. tinues as long as there are any play-ers in the den. commission on all purses to which "Kid" Lewis was entitled.

If the pitcher, after having the ball returned to him by a fielder, hits or After Pedlar Palmer and other boxreturned to him by a heider, hits of touches one of the opposing side with the ball while running between two bases the runner is out. If a striker hits the ball so far that he can run ers had given evidence in support of plaintiff's case, "Kid" Lewis told the court how he started boxing, first at

court now he started boxing, first at a small club, and then went to the ring in Blackfriars road. He had been boxing professionally for about fifteen months before the agreement with Mr. Shears was entered into. and had regularly appeared at Premier Land. It was there that he had met Mr. Shears Subsequently there was hits the ball so far that he can run around to the home base without stopping he scores a rounder, which may be used to put back in the den a player already out. The whole side is put out if the opposing captain can bounce the ball three times in the den while empty, or if a catch is taken by a fielder.

The vicar of St. Mary's, Watford, America. When he went with the others to the solicitor to sign the agreement, he had to borrow a sovthe Rev. R. Lee James, who has held the incumbency for sixty years, recalls the time when prize fights used to take place among the navvies who ereign to pay for drawing it up. Shears paid none of his training or incident-al expenses, added the witness. He obtake place among the navvies who were cutting the Watford railway tun-nel. They agreed with the authorities to prevent disorder elsewhere in the town if they were allowed to hold prize fights in the market place, and the Watford prize fights became fam-ous. Mr. James, who is 86, and his predecessor, have held the living since the eighteenth century. tained a week's contract for sparring at Islington Empire at 25 pounds, but he was eight pounds out of pocket and had to go to his mother and ask her to give him a shilling. "He slung my

credit to

a pair of the world's most noted pug-ilistic impressarios in the persons of Reginald L. (Snowy) Baker of Sid-ney, Melbourne, and a few other Aus-tralian cities, and James (Sunny Jim) match. Unless the Garden people persuade him to change his mind Billy Gibson Coffroth, the premier promoter of box-ing contests in these here United States of America. is thru with boxing on a big scale in this city. While he will probably re-tain his interest in the Fairmount A. States of America. "Snowy" Baker dropped in on us about ten days ago'on his way around the world in search of boxing talent for shipment to the Antipodes. While not successful in persuading all our stars that the trip would pay them "Snowy" has done fairly well and if the boxers who have promised to make the trip to that far-off country under his auspices do not back down son would not stage a bout that did not promise some good sport. Of course, he has made mistakes of judgunder his auspices do not back down between now and salling time the blond-haired successor to Hugh Mc-Intosh will have quite a bunch of Am-erican talent to exhibit to Australian ment occasionally; that is bound to happen to every promoter. But with all the rumors of fakes and frame-ups that have been circulated from time to time—and probably always will be—it must be said to Bill's credit that his news have have a way been remet fight fans this coming summer. "Snowy" paid me the compliment of calling on me at one of the local vau-deville houses where I have been playing, and we had quite a lengthy chat on matters "touchin' on and ap-pertainin' to" boxing. Barring another distinguished visitor, Jim Coffroth, I his name has never even been remotely connected with scandal of any sort. If he has really retired—and he says If he has really retired—and he says so—the Garden A. C. officials will have no easy time finding a man who will fill the bill so acceptably in every way as the genial William. Off hand, I can't think of any local manager with sufficient knowledge and experience necessary to successfully handle such a proposition as the Garden. Bad or do not hesitate to say that Baker is the livest wire the game knows today. He is a hustler with a capital H, and the marvelous success his efforts have met with in Australia is ample testiof his progressiveness. Fight Game at Low Ebb. Fight Game at Low Ebb. That's what boxing needs around these "diggings"—progressiveness. If given the opportunity. But I doubt it.

exercises. "I have always been fond of sport," she said today, "and I don't see why boxing should be forbidden to my sex. So long as

see why a few rounds with the gloves occasionally shouldn't be beneficial to any young woman. I-know it does me good. It is apt, of course, to spoil a wo-man's beauty, but bruises do not last forever. Before I took les-sons in boxing I was very ner-vous and irritable and timid. I would not have ventured into a crowd alone for anything. Now I'm not afraid to go anywhere." Her first serious match will be with Miss Grace Cleveland, of Geneva, who has signed up for a ten round contest.

I have left out Tom O'Rourke's name —and I believe O'Rourke one of the best we have in the east in the match-making line—because I doubt if Tom would be considered at all. O'Rourke's methods have made him unpopular with certain newspaper men, and as publicity is required to successfully promote any sport, Tom's chances for landing the job looks rather dubious. At that. I doubt if he would accept if the position was tendered him. He now ducts the National Sporting Club, and might not care to give that up for the greater worry and cares of the larger institution

Cofforth Smart Matchmaker.

If only Jim Cofforth, who is at present among us, could be persuaded to locate here. What a grand matchmaker he would make for a club with an arena the size of the Garden, and the population of Greater New York to draw support from. The Garden officials would surely make a "ten strike" if they landed Coffroth, and the future success of the club would be assured. There is no other man in this country or elsewhere better qualified than the sorrel-topped promoter from Cakfornia. But his interests in the west are great, and I do not think he could

be induced to give them up-even if offered an extremely liberal salary and percentage of the receipts. Coffroth has many friends in this city who would be tickled to death if he were to locate here, and loubly so if he would come in the capacity of promoter and matchmaker. Jim would make one howling success of the big club-if such a thing can be done.

The New York Boxing Commission ers have made "Snowy" Baker an honorary referee for the State of New York. This was a neat compliment to pay the visitor from Australia, as "Snowy" was Hugh McIntosh's official referee for many years before purchasing his former employer's inter-ests, and has been the third man in the ring at many of the greatest boxing contests held in Australia. Mr. Baker refereed the Johnson-Burns match, and all the bouts in which the present champion, Sam Langford, Sam Mc-Vey and other prominent American boxers have appeared in that country. Baker has fixed ideas regarding the duties of a referee at a boxing match, and was not backward about making them public during his stay here. As he acted in that capacity for many years his opinion should carry con-siderable weight. While I have not siderable weight. While I have not the space at my command to quote him at length on the subject it will interest my readers to know that "Snowy" is decidedly in favor of al-lowing the arbiter to have full and absolute control of the contestants, and is furthermore a firm believer in the old-fashioned system of rendering decisions in bouts. Mr. Baker says that only a man inside the ring can properly judge a contest on its merits and that he alone is capable of rendering a just verdict.

Baker Has Right/Idea. ayone who has had experience in ring as principal or referee knows

IN ACTION AGAIN Oldest Bowling Organization Has Six Clubs - Business Men's and Fivepin Leagues

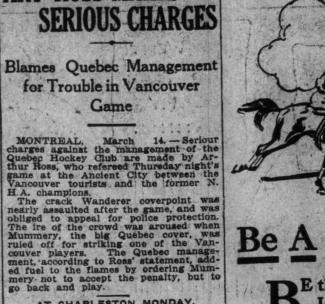

PRINTERS' LEAGUE

SPORTING

A four-team Printers' League, com-posed of The Wordl, Acton Press, T. H. Best Co., and Hadden's Colts, has been added to the roster of Toronto Bowling Club leagues rolling this sea-son at the College alleys, and will open a short season, commencing Saturday night. Games will be rolled on Wed-nesday and Saturday nights, and, with the teams meeting one another twice, a six-week schedule will be run off. Altho starting late, the promoters thought it wise to get a start now and be in good shape for placing a big league in the field next season, when their old quarters, the Toronto Bowling Club, will again be down-town. With the old league again resur-rected, the printers can well lay the claim now of having the oldest and continuous ten-pin organization in To-continuous ten-pin organization in To-

rected, the printers can well ky the continuous ten-pin organization in To-ronto. In the Business Men's League, dur-ing the past week, R. S. Williams again forged to the front by winning all three games from Scotland Woolen Mills. The "Scots," however, made it a battle all along the line, with a couple of the games being lost by only small margins. R. G. McLean, in second place, and only one game down, fought the real duel of the week, with J. Curry Co., the bank-ers and brokers losing only after the hardest kind of rolling, in two out of three games. Manager Curry was up against it in having two of his regulars off the team, one by right of leave, while the other took the French route, and is likely to keep on traveling, so far as the manager is concerned. The surprise of the week was the dropping of two out of three games by Maybee & Co. to MacLean Publishing Co. The latter, who have been rolling in great form since the middle of the last series, are still showing improvement, and should be right up amongst the front runners at the finnish. The last battle of the week brought together Lang. Mack Co., I. A. Steamfitters, with the latter winning all three games, and as a result tie up with R. G. McLean for second place. This league presents a race for its final series that would be hard to improve upon, and, with at least five contenders who are all going strong, should furnish a climax that will eclipse all former seasons in the history of the league. In the T. B. C. Five-pin League the race is of the real tight wav va-riety, and furnishes no equal since the league was organized, with a roster of 12 teams. Six are practically in the running for first place, with two others still having a chance, and this fact alone speaks volumes for any league, or the game if represents. Stanieys in the lead, one and a half games up, on Senators and Million-aires, who are tied for second place, were partly held in check by dropping one out of their three games to Torontos. Senators were aliso stopped in an apparent clean

leagues the coming season, if he still retains the phenomenal strength he displayed here when he was a raw recruit with the Marion Diggers in the Ohio State league club. Hutchinson could lift one end of a street car without much effort, apparently. He also could lift the hind quarters of a horse with the case that a blacksmith picks up an animal's hoof to shoe it. Edward C. Staiger, a director in the old local Ohio State lengte club, says he has seen Hutchinson perform both of these feats of strength. "If Rube Hutchinson could

ever learn to control his de-livery he could be the world's greatest pitcher." Staiger de-clared, "Jack 'Taylor's protege stands six feet and one inch. He's a blacksmith by trade and strong as an ox. When he played with Marion he was greener than parisgreen, but mighty proud of his strength. The boys used to kid him about it and get him to lifting. That's how he happened to lift one end of a street car standing out on a siding at the ball park one day. I saw him take a horse at the fire department and lift it clear up so it almost stood on his

head. "Rube Hutchinson has a world of speed and curves with it. If he ever gets control he'll burn up the American league."

Recognition Comes Slowly. The late Alfred Russel Wallace the co-discoverer with Darwin of evolution, had a hard row to hoe at first, said a Baltimore physiolo-

gist. "Poor Dr. Wallace had, in such a very hard row to hoe that he couldn't afford to marry till he was 63, when, to balance matters, he married a young girl of 18, by whom he had a son and a daugh-

"I commiserated in London last summer with Dr. Wallace. "'It was too bad!' I said. 'A

man of genius like you cramped with poverty till past middle life! It was too bad!' "'My friend,' Dr. Wallace replied,

'always you will find that the fire of genius takes a long, long time to make the pot boil.'"

season bethe Western

circumstances, be looked as extraordinary, but, altho Bishop Isaac O. Stringer has for years been advertised as a bishop with that peculiar faculty, developed almost to a habit he is one of the most respected men in the Anglican Church. Bishop Stringer is head of the church diocese of Selkirk, the largest diocese in the world, stretching under the Arctic Circle for almost a thousand miles, and the year round almost enveloped in snow and ice. But of foremost interest to people here is the fact that this Bishop Stringer is one of our own product. Born in Kingarf, Ont. developed in Kincardine, and finished in Toronto, Bishop Stringer is first and last an Ontarian. In 1862 Isaac Stringer started life, and a few years later commenced his education in Kin-, cardine, where, after going thru 'the high school he entered Toronto University, graduating in 1891, after which he spent a year at Wycliffe College, preparing for the ministry, into which he had early decided to enter. * * *

I IS CAREER almost immediately started in the north for soon after starting his ministerial duties he took up a post at Peel River. Since that time he has shifted but only to go farther north, and further away from civilization at every move. The bishop has been in London,

England, endeavoring, with success, to increase the endowment of his diocese. Both King George and Queen Mary were greatly impressed with the story of hardship given in Bishop Stringer's diary, and their majesties signified their pleasure to meet him and his wife at dinner at Lambeth Palace, when the Archbishop of Canterbury was host.

The story of a journey which nearly ended tragically for Bishop Stringer and Mr. C. F. Johnson is told by the Venerable Archdeacon Perry, M.A., and extracts from the bishop's journal are published for the first time. Reading these one immediately thinks of Capt. Scott's diary, written under almost parallel circumstances.

66 THE WRITER," says Archdeacon Perry, "has been able to ex-

tract from Bishop Stringer his journal, parts of which will reveal what might have been but another of those sad stories which tell of the selfsacrifice and heroism of men who seek not for gold or fame, but simply for the wandering and wayfaring children of our Father.

"In May, the bishop started out for the purpose of visiting the Eskimo along the Arctic coast. After having successfully accomplished this difficult work, he hoped to cross the Great . Divide, over the Rocky Mountains, and thus reach Dawson City in the Yukon. Four months after his start he wrote:

* * * 66 TUESDAY, Oct. 5.-Arose at 6.30, and hurriedly started off as too cold to stop. Ate a little

grape nuts after we got warmed up. Went southeast, and then down the mountain to a ravine which looked close, but it must have been 1500 feet down at least, and very precipitous. -It was risky, but by God's mercy we reached the bottom and found ourselves in a ravine. Camped at 5 p.m. Willows were poor, but with difficulty we started a fire, and thus had our first hot drink for a day and a half. Retired 9 p.m., tired and discouraged.

"Wednesday, Oct. 6 .-- Arose 5.30 . Came to the river which we went up two days ago, that is, on Monday. We have made a circle.

66 HURSDAY, Oct. 7 .- Mr. Johnson shot a squirrel. We set first a net for ptarmigan.

Worked hard all day. Had a teaspoonful of grapenuts for lunch and a cup of tea. For evening meal had squirrel stew Tired out. No. ptarmigan in net." Mr. Johnson set snare for 'Whiskey Jack.'

"Friday, Oct. 8 .- Two squirrels came around the camp today chirping in the trees, and we felt that God had sent them for our needs. . . . No ptarmigan in net. Squirrel stew for supper, leaving the other half for breakfast. Nothing to eat from 7.30 a.m. to 8.30 p.m. Very weak. "Saturday, Oct. 9 .- Still making snowshoes.

"Sunday, Oct. 10 .- Arose 6.30. Prepared to go on Sabbath day's journey. We felt if the Lord wished us to remain here over Sunday, He would have provided us with food. We probably could eat all we have now in a day or less. Fixed up things and started after having prayers. . . .

66 UESDAY, Oct. 12 .- Foggy, but kept on and crossed some

divide, which we think is the right one. A little perplexed. Camped for night half-way down the valley. Spread our ground sheet and blanket and lay down and ate a little cereal and chocolate under the blanket. "Wednesday, Oct. 13 .- Ate breakfast of a teaspoonful of. grape-nuts

and three squares of chocolate. Oh, so small, and we so hungry, but everything almost exhausted . . . Everything finished today, but about two pounds of flour and bacon, and small handful of rice. Get weaker every day, but must not use up what we have. Still hope to shoot something. Looks very discouraging at times. Our packs feel so heavy now, but we need everything we have. "Saturday, Oct. 16 .- Ate last of our chocolates, about one small square. Trudged or staggered on until we

came to some spruce. Only two rifle cartridges left. "Sunday, Oct. 17.—Traveled seven hcurs "oday.' Went at least 15 miles. Tried toasted seal-skin boots (called mucklunks) for supper. Palatable. Feel encouraged.

. . .

66 M ONDAY, Oct. 18.—Started out soon after 9 a.m. Ate pieces toasted for supper. I cut up one of my boots. Used sole first.

"Tuesday, Oct. 19.—Breakfast of seal-skin boots and a tiny bit of flour soup with pinch of dried fruit in it. boot sole. Fine, but not enough. Also

a tiny leg of ptarmigan each. "Wednesday, Oct. 20.—Breakfast from top of seal-skin boot. Not as good as the soles. . . Came to marten trap, batted with piece of rabbit. Feel like taking the bait for supper, but refrained. Got a few red currants. Saw sied track. Feel grateful to have seen the signs of a human being-the first for over a month.

. . .

66 HURSDAY, Oct. 21.-Break-66 THURSDAY, Oct. 21.-Break-fast off seal-skin boot soles and tops. Boiled and toasted scies. Soup of small scraps of bacon and spoonful of flour. The last we had. Tired. Hands sore. Took 'a long time to pack up. Tied up Mr. Johnson's fingers. Concluded we were in Beal Pirer. Heard children's in Peel River. . . . Heard children's voices in the distance, and then saw houses on left hand about a mile ahead. We stopped and thanked God for bringing us in sight of human babitation."

THE RIGHT REV. P.T ROWE P.P. LL.D BISHOP OF ALASKA To Keep Out the Cold and the Polar Bears, the Bishop Of Alaska, Born Near Toronto, and Educated Here, Builds His Own Igloos-Goes on 2,500 Mile Journeys

By Dog Sleigh.

BISHOP who builds his own house-an igloo-a church dignitary who revels in a temperature as low as 78 degrees, below the zero

mark, who prefers an existence full of hardships amid semicivilization, to the cathedral life of a metropolis, and would rather administer to the wants of the Indian and the Eskimo than be a church leader among the cultured of the higher civilization, has been found. Such a man is the Canadian bishop of Alaska, educated in Toronto, the head of the American Episcopal Church in the northwest corner of the

When Peter Trimble Rowe was born in Meadowville, Ont., 22 miles from. Toronto, 58 years ago; his pa-

rents, in duly recording the fact in the family :Bible wondered at the significance of the event having occurred on a Sunday, and finally came to the conclusion that it meant he was destined for the ministry. Had the occasion been on any other day of the week, it is probable that a farmer, and no doubt a successful one. but nevertheles a farmer, would be found behind the broad, kindly smile which distinguishes the man who has so well fulfilled the other destiny.

* * *

S 0 IT WAS that the youth came from the settlement to enter, and in 1878 to graduate with honors, from Trinity College, Toronto, of which he holds the D.D. and LL.D. degrees. Born to the outdoor life, it was to work in the open that he began his career in the ministry. On being created a deacon he left Toronto to take up work as a missionary among the Ojibway Indians, two years later being made a priest. He remained with the Ojibways for a period of four years. The next 14 years of his life were spent in the Sault Ste. Marie district of Michigan. where he had under his charge during that time 11 missions. These were the years which laid the foundation for a task which only a man who had passed thru them could have fulfilled in the way it has been.

* * *

T WAS IN 1895, before the days of the rush to the Klondike, that, as the Rt. Rev. P. T. Rowe, D. D., LL.D., he entered upon his duties as "Bishop of the Arctic Circle," and in a territory in which a twenty-five thousand mile dog train journey is necessary to cover the round of travel required in carrying on the work. 'To quote the bishop himself, it is only

the Arctic Ocean and the continent of Asia that keep him from going beyond even these bounds. But such has not done so, and he admits that on more than one occasion he has taken a boat across the short span of sea that separates the two continents, and has ventured forth upon the Asiatic shore.

. . . N HIS JOURNEYS of thousands of miles across ice and snow, a good

portion of which he travels by himself, many nights must be spent in the open, miles from the nearest human being, and with the temperature far bolow the zero mark. This would appear a trying enough experience for the hardlest of men. but to it could be added the danger of a possible night encounter with a polar bear! Most difficulties can be overcome, however, and those from the extreme cold and the polar bear have their solution. The bishop carries with him on these journeys an Eskimo knife, with which he cuts blocks of the wind-hardened snow, and with them builds his "sleeping quarters." When warmed by the heat of the interior, the snow blocks cement together, making a solid ice house. "Why not carry a tent with the dog sleigh, and save all, this trouble?" the bishop states is sometimes asked him by the innocent easterner, when told of the difficulties of travel in the far north land. His reply is that a polar bear would go thru a tent like a ghost thru a stone wall, but an ice house has not been known to have been penetrated by either

A FTER a score of years apent in the land of the "furthest north bishop," as the best informed man on Alaska, makes the long trip to Washington to confer with President Wilson and ministers of the United States cabinet in the interests of the people of the most northern diocese of the church and the future development of that country. The expenditure of forty millions on a government-owned Alaskan railway, and the route it should follow, formed much of the long talks which Bishop Rowe had

more or less foundation in science. To his thought the creases in the palm are correlated with the acquisition of power for complex hand movements, if not the direct result of such movements. .

He notes that the orang, for instance, has only one line across the palm, a fact which he ascribes to a restricted ability to use the fingers. He also calls attention to similar markings in the hands of some imbeciles, and among persons characterized by several sorts of mental defects.

Inasmuch as the movements of the fingers have their origin in the brain, he argues that palm markings are therefore, very good indices of character. The thought is accentuated by the fact that the lines in the right hand are usually much deeper and more distinct than those in the left hand. This is because the right hand is more fully under brain control than the left, and, therefore, a better indicator of brain calibre.

Street Railways in the Principal Cities-Which Must Pay For Protection-Power Plants and Railways

The the lla. 241 feet cation with the outside world was cut off by the constitutionalists, and the great power house below the dam was also practically finished. The dam was constructed to frm a great reservoir, nearly 30 miles long, and it was estimated, when the enterprise was started, that it would require three years for this basin to be filled with water. Now that the revolution has caused building operations to be suspended, there is some satisfaction to the directors in the fact that the reservoir is steadily filling up with water. Nature is not deterred in her work by bandit armies. Should communication be restored in the near future, so that materials can be obtained, the dam will soon be completed, and, with the basin nearly filled with water, the company would soon be in a position to supply electric power to the great mines at Parral and other neighboring districts. In the meantime, however, operations are at a standstill. The large sums already expended are steadily drawing interest, without bringing any return, and as far as present prospects go, this condition of affairs may continue indefinitely. A year ago there was a settlement of no less than 5000 people at the scene of the company's operations. Now the engineering force has been dispersed, the peons, or laborers, have scattered to join the revolutionists, and when peace is restored, it will require months to reassemble the staff. All this will mean a loss to the company in time and money of no small proportions.

To Buy Protection

The Mexico Tramways Company, which operates the street railway system of the capital, has suffered less, perhaps, than any of the others, yet the directors, in their last published report, (for 1912) say that "in order to insure proper protection of the company's properties and the continuous operation of its service during the recent disturbance in Mexico, the management was obliged to incur a considerable

Company, a sister concern of the

Tramways Company, also explains the condition of the republic had in its 1912 report that it was necessary to make some extraordinary been normal." The condition of the expenditures in order to protect its so-called republic has been even

- 1-1-I TT

THE GREAT DAM OF THE MEXICO NORTHERN POWER CO. THE WAR PREVENTED ITS COM-PLETION; IN THE MEANTIME IT IS FILLIN G UP, A THREE-YEAR TASK OF NATURE. THE

ture." This was in 1912. What happened last year, when cannonading went on in the streets of the capital for several days, can be imagined. The company has not seen fit to publish a report covering that period. Whether or not the property suffered serious physical damage, it is certain that the earnings have decreased, and there has not been the natural development of the property which might be expected under normal conditions. London and on the continent of The Mexican Light and Power

less normal since this statement was issued. 1 Dr. F. S. Pearson Started

Some of the Companies The Mexico Tramways Company

and the Mexican Light and Power Company are known as "Pearson concerns," because they were originated by Dr. F. S. Pearson, a noted American engineer. He is no relative of the London Pearson who became Lord Cowdray. Among the Toronto directors of the two companies are Z. A. Lash, K.C., Miller

SAN JUAN DE LATRAN, A BUSY CORNER AT THE PRIN-

THE MEXICO TRAMWAYS CIPAL TERMINUS OF COMPANY IN MEXICO.

so great as it should have been if Lash, Robert C. Brown, E. R. Wood, Walter Gow and J. S. Lovell. The National Trust Company is tranfer agent for both, and Blake, Lash, Anglin and Cassels are the solicitors. The Monterey Light & Power

Co., of which Sir William Mackenzie is president, operates the street railway system in the city of Monterey, which was captured by the constitutionalists some months ago, after a severe skirmish with the federal garrison. This concern has published no report since that for 1912, but even then the directors apologized for the poor showing made, which, they explained, was due to the unsettled political condi-. tions, and the general commercial depression. They were hopeful, however. "that with a return of normal commercial conditions thruout the republic, a general expansion of the company's business would result, with a corresponding increase of earnings." In 1913 conditions be-7 came rapidly worse, instead of better, and, while no figures are available as to the company's earnings in that year, it is safe to say that the - profits. if any, were small.

Power Plant Has Probably Suffered Least

The Mexican Northern Power Co., since its plant was not complete when the fighting began in northern Mexico, has perhaps suffered less than the concerns which were in operation during the present revolution. D. E. Thompson, K. C., is president; A. E. Ames, vice-president; and Strachan Johnson, S. J. Moore, and John A. Tory. all well-known Toronto men, are on the directorate. Even if the company were prepared to furnish power, there would be litle or no demand for it because the mines which it

Tunnel Blown Up On Toronto-Owned Railway

But the losses of all the companies mentioned above are small when compared to the misfortunes of the Mexico Northwestern Railway. This line has suffered tremendous damage at the hands of both the federals and the constitutionalists, as well as thru the depredations of bandits belonging to neither side. The management has struggled bravely to keep up communication between Chihuahua and

the north, but no sooner are the rails laid down. after some raid. than they are torn up again by one side or the other. The rival armies have no grudge against the English and Canadians who own the road. as they are always careful to explain, but when they are in retreat their own safety lies in destroying the line as they go, else their enemies might easily overtake them

Only a few weeks ago some of Villa's followers blew up a tunnel on the road, killing several men who were in it at the time. This will probably prove

given up in disgust, and will make small further effort to do business. While Villa is at Chihuahua, and the federals are threatening to attack him, it would be folly to attempt to rebuild the property. Better to wait they say, until one party or the other is definitely in control. Walter Gow and Miller Lash, of Toronto, are vice-presidents, while E. R. Wood, R. C. Brown, J. S. Lovell. Robert Gowans and R. M. Coates, of Toronto, and Sir Wm. Van Horne, and directors.

In addition to the large companies mentioned above, there are. many smaller amounts of Canadian capital invested in Mexico. There is the Mexican Mahogany and Rubber Co. for instance, which has expended several hundred thousand dollars in developing plantations. This property will still be there when the troube is over, but in the meantime there is no return on the money in-vested. and the interest goes on. day and night.

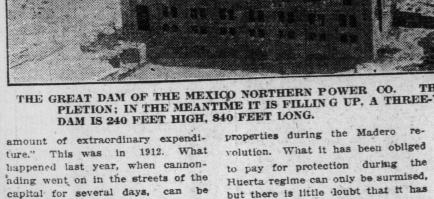

Toronto Interested In Mexican Mines

Then there are many mines in which Canadian capital is interested. These are now idle for the most part, but the ore is still in the ground (if it ever was there), and the revolutionists are not likely to disturb it. Mining is hard work and the Mexican soldiers are not fond of that sort of exercise. But here, again, the capital invested is bringing no return, and the machinery and equipment generally in steadily deteriorating. The Mexican Northern Power Co has spent more than a million dollars on buildings for its staff and equipment, and all these are of no use with condition

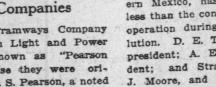

these are of no use with conductive as they are at present. Who is to pay for all the millions that have been lost to Canadian in-vestors during these troublesome months in Mexico? This is a queetion not easily answered. It is t be supposed that a stable government will some time be established in the republic, and that when that time comes claims for damages will be considered and sent for arbitration. thorities in London, of course, will look after Canadian claims. The Mexican Government does not re-cognize Canadian investments as such. In its statistics it groups Great Britain and all her possessions under one head, and the claims for damages, if they are ever present-ed, will pass thru London.

Stocks Have Gone Down

The shares of the companies meptioned above have been generally inactive of late on the stock exchanges, probably because there is no market whatever for most of them. Mexican whatever for most of them. Mexican Light and Power Company, which sold as high as 103½ in 1912. was quoted at 44 not long ago. Mexico Tramways, which brought 126, even while the Madero revolution was in progress, will not bring par now. Monterey Railway, for which there is apparently no bid at present sold at 79 in 1912, and as low as 60 m 1913. The Mexico North Western Railway has had to report a deflot every year since its organization Railway has had to report a denote every year since its organization, and, naturally, the loss on opera-tion in 1913 was the largest in its history. In consequence, there is practically no market for its shares and debentures.

paid its share toward the expenses of the dictator's government. Should Carranza be successful in establishing his army in the vicinity of the capital, further "extraordinary expenditures" will be necessary if the company hopes to continue in operation at all. Even in 1912 the optimistic directors stated that "the increase in the sale of power was not

Dreamy and tender in treatment are several fine pictures in the study of a very by ten other men. The collection

The surroundings of an artist when that artist is a lover of all that is beautiful, are, of necessity, full of charm, and especially is this notice-able in the delightful studio of Mrs. J. S. Dignam in her apartments on St. George street. At a first glimpse, without the actual sight of the sket-ches about the room the effect is creased by a solitary figure. Miss L O. Adams has several charmingly col-ored sketches of trees and hillside, well lighted, while Miss Mabel May has a very colorful sketch entitled "Autumn in the Luxembourg." Mr. C when the actual sight of the sket-ches about the room, the effect is charming and the atmosphere particu-larly attractive. But when one be-gins to analyze, it is realized how much a lover of the beautiful, both indoors and out, Mrs. Dignam is. In her ex-tensive travale the her beau suick to M. Manly, whose delicate harmonies of tone have won him deserved popularity is exhibiting among others a very at-tractive canyas entitled "The Far in control of light and shade on valley and hill top. Mr. Brigden. In two large can-yasses, has portrayed delightfully "A Morning in the Valley," and "Northern Solitudes." The former is a pastoral sciene in odd, yet beautiful tones, the atmosphere misty, with tender green of iush grass in the foreground, and delicate background, the latter a wasto of bare rocks, hill-tops, quiet water, and pale-tinted sky. Mr. Suzor Cotte is a nother favorite, with his character-istic lower Canadian scienery. He is a wonderful colorist, and a true depict-or of late sunsets in the wintry wea-ther, of icebound rivers and snow-clad hills. Mr. McGillivray Knowles is ex-hibting a number of strong canvases mandled with vigor and fine feeling Mrs. McGillivray Knowles is well repre-sented by several beautiful larger pic-tures, as well as a collection of ex-quisite miniature pictures. Mr. Fred-eric Challener has a number of sketchtractive canyas entitled "The Far Laurentians," showing a splendid effect

"They are doing most excellent work and accomplishing a great deal of gcod where it was much needed," he was generous enough to say. "I saw long ago that there would be nothing to be gained by fighting—that the largest results could be obtained by working together." The bishop can put up a convincing argument and he avidently made them see matters in evidently made them see matters in the same light, for he added: "And we do not overlap in the work, each of us

spent some time with Stefansson and his party. The leader of the expedi-tion he referred to as "A clean-cut man and a gentleman." He asked Stefan-sson why he objected to civilization being extended to the Eskimo and the for some time in Alaska, and by Pro-testants not aware of the facts as they really exist, might be considered as a rival. But it is not. Right from the answer had been that it would lead to the introduction of measles among the race. This had been the only rea son which the explorer had offered "It is obvious that you cannot uplift a people without imposing certain chances upon them, their survival of which is a proof of their worth," was the bishop's comment.

MISEDYTHE PARKER Toronto's Pioneer Teacher of "THE MODERN DANCE" wishes you to note that she is teaching now at her beautiful and charming studios, 572 Jarvis St., exclusively. Phone N. 3628.

A PORTRAIT OF E. WYLY GRIER, R.C.A., PAINTED BY MR. GRIER FOR THE CANADIAN NATIONAL GALLERY, OTTAWA. beautiful canvases, of wood scenes, es poetical in character and treatment, "The Green Lane, Spring," is a poetic a delight to the eye, while one of Mr. conception of a lovely subject, and is Owen Staples' attractive misty picsympathetically treated. Two light-flooded atmospheric pictures of the woods in autumn, are entitled, "Au-Estelle Kerr has an attractive sketch tumn Fires," and "Morning In Oc-tober," the former of misty autumn tints, hazy with smoke, which travels its way skywards thru the branches. One of Mrs. Reid's lovely flower paint-ings, a bunch of pink roses in an east-ern jar of irridescent tints against a background of softest gray-green, is a noteworthy sketch. Mr. Gagen's pictures are some of the outstanding tumn Fires," and "Morning In Oc. of a girl against a pretty background, ably strong, broad and vigorous in treatment, these vistas of sky and water, surf and rock and spray, fill one with the grandeur of the sea3, and boun.

ges," half submerged rocks over which the waves rush boisterously. In watercolors Mr. Gagen has two particularly fine pictures in strong harmonious colorings. "The Red Rocks of Glou-cester" and the "Foot of the Cliff." A beneath a long bridge is from the clever brush of Miss Clara Hagarty, while Mr. T. C. Greene has a fine bit of trees with the sky showing between wonderful harmony of light and share. of tender, dreamy atmosphere is Mr. Wm. Brymner's beautiful "Nightfall," one of the noteworthy pictures in the exhibition. Quiet evening is here perfective expressed, from the delicate re-flections of the shaddwy hills to the last

glow of the sunset still lingering on the horizon. Two very fine paintings of masterly handling, are from the brush of Mr. Wm. Cutts, "A Weish

of masterly handling, are from the trush of Mr. Wm. Cutts, "A Weish Mooreland," a lovely panorama of sky, hill and valley with splendid distance and dainty pastel col-orings. Strongly, yet delicately with a charming effect of mist across Mooreland," a lovely panorama of sky, hill and valley with splendid distance and dainty pastel col-crings. Strongly, yet delicately ly handled the whole effect is most pleasing. Mrs. Gertrude Spurr Cutts is delightfully represented by "A Dartmoor Farm." an attractive subject. Hilly colored sketch by Miss

Sec. de .:

Going from the new world to the old, one is entranced by a glimpse of Lu-cerne. Mount Pilatus stands behind like a sentinel on guard with soft clouds floating over its rugged face. Picturesque Lauren is sketched in many happy moods, a bit of the sand dunes, happy moods, a bit of the sand dunes, for instance, the pale browns and tans, and the contrasting sky and trees, deli-cately treated. There is a lovely old grinding mill of Lauren which is the centre of another delightful sketch, po-etically tinted with gray greens and dull tans, the roadway winding up to the mill being an amber cream. The sky is a glory of fleecy clouds with which the breeze has been playing, and one can almost feel the air blow freshly on the check as one notices a freshly on the cheek as one notices a tiny kite flying skywards. The quaint tiny kite hying skywards. The quaint old Dutch mills, which the centuries have passed by, have a unique fas-cination in their coloring and odd de-sign. Another of them is the pictures-que subject of one of Mrs. Dignam's atmospheric sketches of old world Dordrecht. It is recting the shifts of the state of the stat of old world Dordrecht. It is poetically delicate in construct tion and treatment, the whole land-scape vaporous and tender, there a glimpse of the palest green, here the dull red of the old mill in the fore-ground, and above the warm gray of the drifting clouds. Also of Dorground, and above the warm gray of the drifting clouds. Also of Dor-drecht are two sketches, both full of the same atmospheric charm, of the famous willows, one with the trees dimly outlined against the sky, with the glow on the horizon of a light which has burst out in a sudden glory after a quick shower in the early even-ing. The other is a melody of soft grays, the willows in a graceful group to the left, while to the right in the distance lies the city across the river. to the left, while to the right in the distance lies the city across the river. Of quite a different atmosphere but equally pleasing is a pastel of the wood near The Hague, the majestic trees delicately mossed in green. The art-ist has several sunny Venetian ple-tures, painted with fine feeling. One of the Saluta is noteworthy for fis-charm of, coloring, while a sketch of one of the smaller canals with Santa Barnaba in the distance, is full of the

Barnaba in the distance, is full of the poetry and dreamy imagination which one is fond of connecting with this land of sunshine. There are also fine interiors of the peasant houses of Hol-land, showing both the character of the people, busy at their various oc-cupations as flax-spinners, etc., and the out-or-doors, which is splendidly glimpsed thru the wide open doors and casement windows. A fine sketch of Katwijk—the haunt of the artists— with Leyden in the distance, is another with Leyden in the distance, is another example of harmony of colors. But a sketch of Mrs. Dignam's work would admired, while "Towards Sunset," is a general favorite. There is good at-mospheric effect in "June Clouds." by J. E. Macdonald, and the charm of winter about the sketch of "Centre Street." by Lauren Harris. The "Old Bruges' Market" is the subject of a sunny picture by John Cotton. and "A Cloudy Morning" is a pretty sketch by A. M. Wickson. Miss Beatrice Hagarty has two admirable little pic-tures one a memory of Pavlowa, the other a glory of color-nasturtiums in a low brass bowl. "A Spring Wood." by F. W. Mitchell. shows fine work-manship and attractive coloring, and "On the Seine," a glimpse out from beneath a long bridge is from the clever brush of Miss Chart to a state of the form of the most delightful as an artist con-ception! ception! . . .

British Sculpture was the subject of of trees with the sky showing between the branches entitled "Springtime." A strong and vigorous canvas. "The Road Thru the Bush," is from the brush of Mr. Arthur Lismer, and a quaint con-ception, "Loye Laughs At Locksmiths." ception, "Loye Laughs At Locksmiths." by Thresa Wilde, is a fancy sketch in-full of artistic interest.

as £100 per annum, this means that 375,500 people obtain their employ-ment, and that something like 1,000,-000 of the population are supported by the industry of motoring. Vehicles in Use £55,000,000. "Then there is, the very important item of depreciation, which, altho not an item of direct out-of-pocket ex-penditure, is an expenditure, never-theless, representing loss of capital and should, correctly speaking, be in-cluded. It this were done, it would add another £11,000,000 to the total, as 26 per cent on current value is usually estimated for this item in taking out a balance-sheet, and it has been shown balance-sheet, and it has been shown that the aggregate current value of the vehicles in use approximates £55,000. 000. So that if these three items are considered, it is certain that, at the considered, it is certain that, at the present rate of increase, the gross expenditure upon all branches of motor-ing, will, before the present year is out, reach the enormous annual figure of $\pounds_1^{100,000,000}$.

CANADA'S FIRST GASOLENE CAR

To Mr. John Moodie, of Hamilton, Ont., is attributed the great honor of having been the first owner of a real gasolene automobile in Canada.

This particular car was a Winton, which Mr. Moodie afterwards sold to Dr. P. E. Doolittle, of Toronto, who is credited with having been the first owner of a gasolene car in the city of Toronto; and many are the people who, in the olden days, used to smile at the doctor pushing this car home with the assistance of a few sympathizers.

Mr. Moodie is probably the best posted autoist in Canada. He has owned and driven many cars since he purchased his first car, and is now the proud possessor of two magnificent Daimlers, a splendid limousine, and a large touring car, and owns, as well, a powerful roadster of another make. Mr. Moodie has toured all over

America and thruout the British Isles and the continent several times: running over there almost every spring or summer for an enjoyable auto trip. Mr. Moodie sails from Halifax for Europe, en route for his annual auto trip, on the great new Allan liner SS. Alsatian, on March 28.

After an exhaustive research at the Toronto Motor Show, and elsewhere, Mr. Moodie has chosen a "Keeton" new model 4-35 touring car, as the most appropriate car in which to make a quick, classy, luxurious and thoroly enjoyable motor trip, with his family in the British Isles. He is taking a "Keeton" 4-35 with him in preference to all other Can-adian, American, and English cars, which he has thoroly investigated; and this decision, in the light of his experi-ence as an owner and operator of many and all kinds of motor cars,

covering many years, must of neces-sity prove intensely interesting to all owners and operators of automobiles. "I have been converted to a 'See America First' enthusiast since riding a motorcycle," says H. E. Jameson who has been enjoying the sights around Spokane, Washington, awheel.

immemorial it has been the custom ondition of spectators, they say, to sit until the last straggler has breasted the wire, W. B. the way in the ton. Top envelope. Folding wind-shield. Speedometer. Robe rail. Extra wire wheel or demountable rim with carriers and complete set of tools. WHEELS-Option of either wire or wood de-mountable. PRICES-\$1,175, f.o.b. Brantford, magneto ignition, gas and oil lights. \$1,295, f.o.b. Brantford. mountable. PRICES-\$1,170, 1.0.0. ignition, gas and oil lights. \$1,23

It would scarcely be fair to judge the Keeton by its price, as the price is by no means a fair indication of its value. Even in appearance, the KEETON looks to be worth more. Everything used in the car represents tried and proven quality. The Northway Motor has a reputation better than any recommendation; the Delco Starter has the approval of the leading motor-car builders, while the full floating rear axle is found on cars costing far more than the KEETON. Other features there are which testify to its exceptional value. The Keeton is the only car under \$3000 making a feature of WIRE WHEELS as part of its regular equipment. The Keeton has a longer wheel-base than most cars at the price-114 inches. The Keeton has more room in the tonneau than most cars-room for two extra folding seats.

But all the arguments we set forth here won't convince you half so much as an actual demonstration of the car itself. We want you to see the Keeton. We want you to ride in it, test it, examine it. For we are confident that we can give you better value than any other car sold in Canada, and save you \$300 into the bargain. Make an appointment by mail or phone. Or, if you prefer, simply come in and let us go over the Keeton features with you. Telephone North 5968.

Next Wednesday evening a member of the trade has consented to give a talk on tuning up engines. This talk will be a non-technical talk and there will be a discussion after, when any questions may be asked. This will be specially interesting at this time as so many of the boys are fixing up their engines now so as to be ready in the spring. Engines in common use only vill be talked on.

Ed Mason turned up at the social evening Wednesday, and said that the scap he won some time ago was still orking.

Among the more important features of the Haynes cars on display at the Auto Show are the electric gear shift, the motor-driven tire air-pump, gasolene pressure feed, and the start-ing and lighting system, all of which are standard equipment this season.

A New Idea Roadster

Here is a new member of the HUDSON family. A Roadster and Coupe combined. An improvement on the old Landaulet type.

This luxurious winter and summer car is completely enclosed when desired for use as a Coupe. Yet you change the car-in two minutes-into a standard Roadster by merely folding back the leather top and dropping the side windows into recesses in the doors. This type of convertible Coupe is immensely popular in Europe. There long has been a demand for it in America.

The Cabriolet is built on the regular HUDSON Six-40 chassis. This undoubtedly is the leading new car of the year. This is the light Six that was so prominent at the Shows—the Six with the small bore, long stroke motor. The Six that has amazed all with its low fuel consumption, reduced the expense, freedom from vibration and hence from need of repairs. The Six which costs less than same-class Fours. Costs less to buy and less

equals it in attractiveness Only a few of these Cabriolets are being built. Come now and see us if you want one.

NATIONAL MOVEVEMENT IS FORESHADOWED IN PLANS FOR UNIVERSITY THEATRE

Auditorium Under New Hart Building for Development of ONE OF SEASON'S BIG Local Dramatic Taste Along the Lines of Advanced Thought-English Actor Managers to Give Advice As to Equipment

BY E. Y. WATSON

Just now Toronto is on the verge of a new theatre movement which promises development of the greatest significance regarding the future of the drama in Canada along lines of advanced thought. The new factor which, it is anticipated, will unite local forces of opinion in a way which will form the nucleus of a national theatre movement, will find its origin at the University of Toronto, where the new University Theatre, part of the new Hart building, is rapidly nearing completion. The illustration on this page shows the rough interior, on which the work of completion is proceeding. When finished, it will be the largest and most spacious theatre auditorium anywhere in the city. At present, the architects, Sproatt and Rolph, together with the university authorities, who have the destiny of the new edifice under their control, are considering the matter of a stage and its installation. In order to arrive at a definite decision as to the kind of a stage which it will be best to put in, they have consulted several of the English actor-managers, who have recently visited Toronto, including Cyril Maude and Martin Harvey.

Martin Harvey's Advice Asked.

In view of Mr. Harvey's connection with the new movement to produce Shaksperean plays after the Reinhardt fashion, as exemplified in "Oedipus Rex," was dealt with in The Sunday World of two weeks ago, the suggestions which he made are receiving the most careful consideration, and the probability is that, when he returns to Toronto with his company late next month, he may be asked for further advice. During his stay in Toronto, Mr. Harvey made an address at the Arts and Letters Club, which has a direct bearing on the future of such an undertaking, if it is to be carried forward on the basis of ideas approved by Gordon Craig, Prof. Max Reinhardt, Granville Barker, and others. Mr. Harvey disapproves of the idea of putting in what is called an "apron," or extension, stage. He is in favor of arranging it in the manner used for his productions of "The Taming of the Shrew" in the old country, whereby the proscenium arch, the curtain, the ordinary scenery, and footlights are abolished altogether.

Strong Sentiment at Varsity.

But, to get back to the objects for which the new University Theatre is being established --- there has always been at the University of Toronto a strong sentiment for the encouragement of dramatic talent. Dating from fifteen years ago, when the "Antogone" of Sophocles was produced by a cast of students, the feeling has grown with succeeding years, and has given being to one or two productions each season. This year the University Players' Club have put on Ibsen's "An Enemy of the People," with a student cast, under the Williams, with the cooperation of Prof Greaves, of Victoria College. The Women's Dramatic Club of the University of Toronto has also staged a production of "As You Like It." For one of these a large room in Burwash Hall had to be utilized, while for the other Convocation Hall was used. The necessity for an auditorium to be devoted solely to the purposes of dramatic productions and lectures on dramatic subjects makes itself plainer with the growth of the feeling, and the completion of the new University Theatre, not later than next autumn, is counted upon to concentrate and solidify the interest in a tangible way.

SHOWS COMING SOON

Joseph Santley and Seventy Players in "When Dreams Come True" Here Next Week.

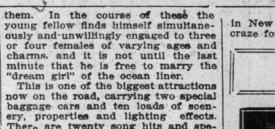

One of the biggest musical-comedy events of the local season will be the appearance of Joseph Santley and a company of seventy players and dancers, presenting Philip Batholome's wonderful successful romance of youth. "When Dreams Come True," at the Alexandra Theatre week of March 23. The score of "When Dreams Come True" is by Silvio Hein. There are three acts and five scenes. The first of these represents the decks of an ocean liner at sea; the scond is the wharf alongside which the liner is whart alongside which the liner is tied up, with the Statue of Liberty in the distance; the third is a large reception hall in the mansion of the Hedges in New York, and the last is an elaborate ball-room in the same house. There are nearly a full score of dancing numbers in the piece, most-ly invented and worked out upon or-iginal and novel lines.

vauc

in New York, where there is a big "Classmates," "The Billionaire," and "Strongheart," will follow in order. craze for feature film productions.

Bring Productions Here.

It is the hope of those who have the objects of the movement at heart that it will embrace a much larger scope than productions by the students themselves. It will be the endeavor to arrange for the presentation by foreign professional talent of important plays dealing with sociologic subjects. They will try to secure such organizations as Miss Horniman's stock company, which appeared in repertoire at His Majesty's, in Montreal, last season. Martin Harvey's proposal to bring out his tremendous production of "Oedipus Rex" to Canada, would be a possibility, and the presentation of modern French and German plays with competent casts is contemplated, as well as tableaux from the Greek classics.

Gift of Private Interests.

The new Hart building, in the basement of which the theatre is being built, is the gift of private interests to whom the city of Toronto. in general owes a great deal, in the way of beneficence. It will cost a million dollars, and occupies the site of the old gymnasium. In both construction and design, it conforms to carefully studied ideals, decided upon after lengthy research. The illustration gives an idea of the size and weight to the cement pillars which form the roof of the theatre itself. It is said that they represent the largest pieces of like construction which has ever been installed in any Toronto building.

New Spirit Reflected.

The address at Convocation Hall this week of Laurence Irving, the eminent English actor-manager, reflected unconsciously the spirit which is actuating the present movement. Mr. Irving pointed out, to quote from a local paper, that many streams of pollution defiled the drama of today, and just in Dryden's day, when the low theatrical taste was blamed for the grossnes of some of his plays, so some theatrical producers blamed their audiences for certain degraded productions. But that Dryden's excuse had little justice was proved by the fact that his time had produced a "Pilgrim's Progress." Mr. Irving predicted a brilliant future, when the stage would be a thing of wholesome relaxation and lofty education. Again he prophesied a glorious renaissance of comedys, which would come with the forward movement.

THOMAS V. EMORY, A FAVORITE WITH TORONTO THEATREGOERS, WHO WILL BE SEEN IN GEORGE M. COHAN'S FAMOUS COMEDY three parts. Marcus Loew, hru his AT THE GRAND OPERA HOUSE ALL THIS WEEK.

Name of Grouch Moreover, the train dispatcher is al-

vays being worried by impatient con-However in both systems the govern-ing principles are the same. Directly in front of the train dispatcher is a kind of box with the names of all the ductors who want to know what they are to do, where is such and such a train that should have met them in he took and walked away to the rear, such and such a place, and how long stations in his division (each station having a number), written below the they are to stay where they are before proceeding to their destination. Is it to b_e wondered at that at such times the train dispatcher is occasionally brief to the point of extreme ionally brief to the point of extreme curtness? This has earned him the unmerited reputation of being a ha-bitual "grouch" among those "on the road." whereas he is a man of equable temperament, and above all, cool in anyious moments.

anxious moments. The telephone train dispatcher wears the receivers on his ears during the whole of his shift. On the table in front of him is a small switch, and supposing he is talking to someone in the room when he is "rung up" he on-ly has to put up the switch so that those telephoning him cannot hear what the speakers in the room are

saying. The dispatcher knows pretty well all the men in his division, and when rung up a conversation of this nature ensues: "Hullo, is that you Bill? The S.30? She left London on time. Been waiting ten minutes? Well, there's nothing wrong with her, and you'll other trains on the line, or be met according as the train in question is of have to go on waiting. Bring down those twelve empty flats from Port McNicol first thing tomorrow morn-

ing." How the Telephone

passenger trains, and freight. Those going south and east are said to be traveling in the superior direction, and those going north and west in the Works in a Wreck.

The conductor of a train, having come to his "meet." and the other train being overdue, has grown impatient, and has called up the train dispatchinferior direction. First-class trains are headed on the chart in red ink, and the others in black. Supposing that a first-class train going northwards meets a first-class train southbound, er to know if there is anything wrong. Away at the side of the dispatcher's the latter has the right of way. But if a first-class train going north meets a table is a small button. It is pressed second-class train coming south, none the less the first-class train has the and at once there is a loud buzz. This second-class the first-class train has the right of way, as it is a train in the first-class, and therefore something of a law unto itself. In the same way a third-class train is always inferior to a second-class, no matter what direc-tion it may be going in. The arrangements of the different creasingly difficult to find men who are willing to undertake the duties of train dispatching, for, altho the sal-ary attached to the position is high— no man would be found to undertake the task if it were not—the perpetual nerve strain is far too great for the average individual. That the work itself is sufficiently complicated the following brief de-scription will show: There are two kinds of train dis-tack if it work itself be sufficiently the strain dispatcher when the skill of the train signatcher when the track, with the aid of his long pole, and two minutes after the accident he is in direct telephonic communication with the train dispatcher. Should the surd be needed elsewhere after he the public never hear much about, but the suffic unless the train dispatcher sets or anything handy, and all the train

"Such A Bonehead." After our arrival in Toronto we decided to visit some friends living north of Bathurst. Not knowing the custom of the cars we walked and on leaving in the evening, we were escorted to the car by mine host with directions as to our destination. Our first experience was for the conductor to come and put the usual fare box to us and say "Fare." I tendered him a quarter, which

How Trains Are Run There is also a large chart which the dispatcher has to make up as his eight-

one says, "Oh. yes, that's the fellow that sends out the trains," and there the matter drops. If an hour or two could be spent in that small room where, for eight hours at a stretch the train dispatcher controls, guides, and governs every smallest movement of the traffic in his division, it might prove an "eye-opener" to most peo-ple; they would thank heaven that re-sponsibilities such as those of the train dispatcher were not theirs, and would, doubtless, conceive a hearty re-spect for the man with the brain, and above all, the iron nerve to do the task. He knows that thousands of lives are daily held in the hollow of his hand, and that one false move may mean an appalling catastrophe, let alone the fact that he will have to appear before a judge and twelve of his fellowmen to answer for that mistake, for, nowadays, a train dispatcher who is guilty of a blunder, is looked on as criminally guilty until he can prove his innocence in a court of law.

The married man is the driven slave of the twin tyrants, the wife and the clock.

. . . Unto Him Who Had.

In police court one morning, I watched a magistrate. He was washed, fed and comfortable, surrounded by an obsequious constabulary. drink-shaken wreck stood before him and was given 30 days in jail. I felt that there was something wrong with the system which placed this creature, sick in body and soul, in a prison instead of a hospital. The piece of human driftwood must have felt it also, for, as he turned away, he heaped abuse upon the court, the visible manifestation of the machinery of society. He called the magistrate by names with which I did not at the moment agree. The contrast in the two men appeared so great and the language was so extreme that the incident would have been ridiculous had it not been pathetic. It was but the turning of the worm under the heel that crushed it. I thought the poor bum was wrong. Then I heard the clean and comfortable magistrate call back the tortured atom. With the tone of a peeved and pettish child he doubled the sentence. Then I knew that the bum had been right.

. . . Truth.

Life's "lost ones" need our tears and prayers A darn site less than we need theirs. . . .

They interviewed the city fathers, by whom their idea was most hospitably received, and they were promised that for every dollar that suggested their erection,

The Need of Our City Is a Larger Number of Safe, Comfortable Boarding-Houses

The home has always been considered the special province of women. That she has gone outside of this in a broader view of life, does not mean that her special province has fallen from her charge. If it means anything in this connection, it is that the home takes on the complexion of the bigger and better things of life and profit thereby.

Reading Dr. Hastings' report for February, in which he emphasizes the Reading Dr. Hastings' report for February, in which he emphasizes the standing have the inductional vote in necessity for improved boarding-house conditions, one is almost tempted to the conclusion that the necessities of home life are being gradually blotted from the general outlook, and that a bare existence is the allottment of far of women suffrage has been consider-the many of our people. too many of our people.

The medical health officer quotes from Dr. Russill, of Glasgow, when, in strong, pertinent language, he epitomizes congested conditions in city life.

passions, your bodily necessities and functions, your feelings of modesty and your sense of propriety, your births, your sickness, deaths, your children, in short, your lives, in the whole round of your relationship with the seen and the unseen, suddenly shrivelled and shrunk into such conditions of space-I might ask you, I do ask you to consider and honestly confess-what would as rapidly as may be deemed feasible, be the result to you?"

Words could searcely make the appalling situation of crowded city granted immediately. conditions plainer. They act like an electric battery, wakening the sluggish, selfish comfort, in which we of more fortunate environment wrap ourselves; and, if possible, we should like to believe that all the direful suggestions the words convey could not be true.

Unfortunately, Dr. Hastings clenches his quotations with local statistics: There is not one modern lodging-house in the city, he declares, altho there are at present 714 so-called "lodging-houses," of which number 516 were found to be overcrowded. The report concludes with the statement that "overcrowding in our apartments and dwellings among the poor is not only sanitary, but demoralizing."

If a committee were appointed from every woman's society in Toronto thruout the city. to meet and cooperate with representatives from every other society, something-a good deal-might be done to remove the evil. Houses in good localities might be induced to rent part of their space to girls and women, who would in this way feel something of the elevating influences of refined and healthy surroundings. Lists of such houses might be kept and occupants found for them. Systematic action thruout the better residential districts would almost certainly bring many comfortable available rooms to light.

Other suggestions would soon present themselves to those realizing the necessity for interest in the matter. Of all objects uppermost at the moment, the value of good, safe homes for women and girls is paramount. Safe, sanitary housing means ninety-nine per cent. of physical, mental and moral make-up.

Plenty of homes means a lessening of the need for havens, reformatorand jails. Sufficient homes of the right sort would mean the wiping out of the greater number of our institutions of philanthropy and charity.

ceive his name, altho for a time it seemed as if even his request would not be strong enough to influence pub-lic sentiment on the matter. Mr. How-ard also requested that the parts he **During Past Ten Years** In Many Parts of World

there are more than a thousand suf-frage organizations. There is a Na-tional Men's League for woman suf-frage. The legislatures of twenty-eight states last year considered fran-chise measures. While each of the states has the power to enfranchise its own women, and ten states have already done so, the National Associaion is concentrating its effort on havng a woman suffrage amendment to the constitution of the United States

passed by the present congress. Women have the municipal vote in Rangoon, the capital of Burma; in Belize, the capital of British Honduras; in the cities of Baroda and Bombay in British India; and also in certain rovinces of Austria-Hungary, and inder the recently granted constitu-ion, they have the municipal vote in

seventeen countries. The revolut ary governments in China stands vince. In France, a special commis sion, appointed to investigate the question, has recommended that the and that the municipal franchise be

SUFFRAGE CAUSE GAINING DAILY IN U.S.

The Chicago branch of the Illinois Woman's Democratio League has gained 3300 members during the last two weeks by the affiliation of independent woman's democratic clubs

"Since the primaries, women who were working for some particular candidate in different wards of the city have laid aside their factional interests and adopted the league's broader policy of working for the in-

terest of the democratic party as a whole." says Mrs. Joanna Downes, state president of the league.

state president of the league. "Women who were not successful in nominating their candidates are vying with those who triumphed at the polls in finding ways to make their organizations useful to the league."

Dr. Virginia Johnson, president of the Fifteenth Ward Woman's Demo-cratic Club, brought her organization with its 700 members, into the league

Home Rule In Politics

SUNDAY

MORNING

Much of the difficulty attending the grant of home rule for Ireland has arisen from the acute political con troversy in England over the progressive policies of the Asquith Gov-

ernment. Its determined attack on class privileges, particularly those attending land ownership, has evoked bitter antagonism and even the great boon of national insurance against sickness, accidents and unemployment has met with opposition from among the ranks of those upon whom it has been conferred. The government is attacked from many sides and has lost ground; not only thru the opportunities afforded for sectional appeal, but also from the desire of the labor party to bring pressure to bear on the cabinet; not because it has been too progressive, but because it has not advanced far enough or fast enough. Six seats have been lost in consequence of the appearance of a Labor candidate whose platform on all the main policies of the administration was identical with that of the Liberal standard-bearer. Unfortunately for his own prestige, Mr. Bonar Law, the Unionist leader in the house of commons, has openly allied himself with the extremists who are far more anxious to force a dissolution than to solve the Irish problem. Sir Edward Carson has, indeed, shown himself to be far more of a statesman.

The World Window

In promoting a bill in the legislature to reserve all radium-yielding ores for public purposes, the provincial government has taken a stand that will be generally approved. Although the properties of radium as a curative

Reserving Radium Ores

agent in the treatment of diseases, hitherto untractable, are as yet not fully known or tested, the results already achieved reveal vast possibilities of good, and it is greatly to be desired that the rare deposits from which it is gained should be conserved, and not permitted to be exploited for private profit. There is something repulsive in the effort to corner a product which may prove of incalculable value to suffering humanity merely to make a few more multi-millionaires. In following the lead already given by the United States congress, the provincial government has shown that it fully appreciates the situation and the offer of so substantial an offer, as \$25,000 is, to the first discoverer of radium ores in the province ought to encourage prospectors with the requisite knowledge and skill to do some pioneer work in the field. Instruments have already been devised which give immediate indication of the presence of radium, even in minute quantities.

Governor Glynn of New York State.

Farm Work For the Workless

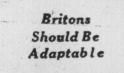

along with the state commissioner of agriculture, has prepared a plan to relieve unemployment, which might, with advantage, be adopted in other centres than New York City. It

contemplates the transportation of such of the unemployed as honestly want work to country districts where they can find work on the farms. For a year or more the state department of agriculture has maintained a labor agency in New York City, which has secured employment for 4,000 men and women, and its office will be used in carrying out the new scheme. In the meantime, farmers will not be expected to advance the cost of transportation and if the plan proves successful at least two cars filled with men will be sent weekly from the city. Many applications have been received from farmers and opportunities will be given married men to take their wives, as women are also wanted for house work. Farmers who complain of lack of help could do not a little to relieve the situation by providing proper accommodation for men with families, and constant employment all the year round. Seasonal engagements will never solve the problem and only add to the number of the workless that every winter pongregates in the city.

Of late Canadians have been served up with a succession of money scandals involving serious charges against de-partments and officials responsible for. the construction and conduct of pubtic works. They concern both political

Scan lals Ana More Scandals

parties and if true only in part disclose a condition anything but creditable to the country. For there has been far too much popular indifference to the maintenance of a sufficient standard of political morality. Indeed, it appears as if the public were convinced that graft is inseparable from state. service, and that where one party was as bad as the other, it was more a matter of jest than of serious condemnation. Individually, opinion is admirably correct. No publie man but will, on the platform or from his place in parliament or the legislature, express the loftiest sentiments with an eloquence worthy of the theme. But there the matter rests until the next occasion comes. If parties and party leaders were less concerned with exposing the deficiencies of their opponents and explaining away their own and more anxious to unite in a common effort to purify public life and secure departmental and official efficiency, they would do better service to the dominion and its provinces.

In a recent issue of The Ayrshire Post of Scotland, a lady correspondent, with, large personal experience in different parts of the world, expresses her opinion of the relative fitness of Britonsmale and female-as compared with

other peoples and their ability, or otherwise, to adapt themselves to life in the Dominions. When in Egypt she noticed that the vast majority of the laborers on the great Assouan dam across the Nile, were Italians. The reason for that, she was informed, was that the Italian was sober and thrifty. could attend to his own needs and requirements. Every month he could send the greater part of his wages home. whereas the British laborer had practically nothing left over. This lady herself sent a young man of eighteen to Canada. who returned to Scotland at twenty-nine, with a variegated experience that at once got him permanent and profitable work

Mexico in Its Death Throes

In the days of Roman decadence, the people of the imperial metropolis were given over to dissipation and amusement regardless of the encroaching barbarians who were rending the empire limb from limb. Over in Mexico City, in the centre of the richest districts of the country, Gen. Huerta, nominal president and virtual dictator, is emulating the example of Nero, who fiddled while Rome was given to the flames. If the account published in The New York Evening Mail, by James Creelman, is to be believed. Mexico City is in much the same condition as Rome. Its population is living in an orgy of questionable gaiety, while the northern provinces are left to anarchy and the personal rule of bandit soldiers, little, if any, better in their respect for the canons of an advanced civilization.

Huerta is said to be a Jalisco Indian, but no less a man of power and a born leader. Steeped in brandy from morning to night, he yet sends commands to the supreme court, orders the taxes, controls the treasury, dictates to the servile congress and directs the conduct of the war. There must be something exceptional in this man who moves freely about the capital and winds up his carousals in a disreputable resort, owned by one of his close friends. Huerta must owe immunity simply because he permits all kinds of license to a people who are without any common sentiment of patriotism and devoid of public spirit. If Mr. Creelman is to be believed, Mexico is not a Latin nation, not a white nation, but an Indian nation, Indian to its heart's core, and politically incapable.

If this picture of Mexican conditions is accurate, the prospect holds no hope for relief. One dictator will succeed another, gaining power by equally reprehensible means and using it for equally objectionable purposes. Mexico has an admirable constitution, on paper, all that, in theory, is needed to produce a model constitutional government. But all human experience has shown that the best of constitutions is no better than the worst, when the people are incapable of putting it to proper advantage. What Mexico needs is a strong man who will place the general good of the country above his own necessities and who has both the will and the power to compel in order that the people may learn why and how to govern themselves. No other way of salvation seems possible for a country which has the form, but not the spirit of democratic government.

Preventive Medicine

Among the triumphs of modern medical research none has brought with it greater or more world-wide benefit than the tracing of yellow fever and malaria to infection carried by certain varieties of mosquito. This discovery means that districts, such as those in Central and South America, and the Gold Coast of Africa, will no longer rank as white men's cemeteries, but can be made as healthy in all respects as regions in the temperate zones. As is usual with researches into the causes of disease, the experiments were not carried on without the sacrifice of human life. In not a few cases, voluntary exposure to infection was followed by death, but the heroes who suffered, that their fellow men might live, won the martyr's crown. They being dead, yet speak to the honor of their profession.

In February, 1901, Surgeon-Major William Crawford Gorgas, of the United States army, then chief sanitary officer of Havana, was directed to eliminate yellow fever from human experience in that city. The work was done in a year, although for a period of a century and a half Havana had never been free from that plague. At a later date he accomplished equal immunity in Panama, while other expert officers have banished yellow fever from New Orleans, Vera Cruz and Rio de Janeiro. Panama now rivals Palm Beach as a health resort. Not only has Yellow Jack been banished since 1906. but the death rate from all other diseases is lower than in northern cities and districts.

Canadian Fruit in England

According to the current weekly report. issued by the Dominion Department of Trade and Commerce: the feature of last autumn's fruit market in London, England, was the record supplies of Canadian pears. Owing to the practical failure of the English and French crops, extremely high prices were realized for the first arrivals, which arrived in good, hard, green condition. Had shipments of this kind been continued prices would have been maintained for the whole of the season. But, later, consignments arrived over-ripe and so continued. The London handlers of Canadian pears advise that expense should not be spared in order to get the fruit to England in hard, green condition, and that if this is accomplished the reward will be found in greatly increased prices.

Scotland Produces Another Burna.

SUNDAY MORNING

:-: New Books :-:

Scotland Produces Another Burha. OVE of one's country is scarcely ever stronger than when one is away from it, and we can understand that the Scot, Charles Mur-ray, on the South African Rand, may have his mind filed with the sights and sounds, and memories of the "auld wife," Scotland, the "milher." At any rate Mr. Murray begah writing his poems of Scotland in the Scottish dialect, and publishing them from time to time in various journais. I understand that some few years ago a privately printed and circulated among friends. Mr. Murray's vorse was privately printed and circulated among inends. Mr. Murray's vorse was privately printed and circulated among hubication, and so we have the publication, and so we have the publication, and so the scotties the lively music of his verse. Had he written nothing else but "The Whistle" we would be compelled to mark him down as one of nature's real poets, Even if you don't "ken" the dialect you cannot help feeling the true poetry of the lines. He is describing the making of a whistle by the dittle Scotth herd laddie (even a Canadian country schoolooy may know something of the puble o' Pan.) He cut a sappy sucker from the

He cut a sappy sucker from the muckle roddon tree. He trimmed it, an' he wet it, an' he thumped it on his knee:

thumped it on his knee; He never heard the tenchat when the harrow broke her eggs, He missed the cragit heron nabbin' puddocks in the seggs, He forgot to hound the collie at the cattle when they strayed, But you should hae seen the whistle that the wee herd made.

that the wee herd made.
He wheepled on't at mornin' an' he he tweetled on't at nicht.
He puffed his freckled cheeks till his nose sank oot o' sicht;
The kye were late for milkin' when he piped them up the closs.
The kit in's got his supper syne, an' he was beddit boss;
But he cared na dooit or docken what they did or thocht or said;
There was comfort in the whistle that the wee herd made.

There are several stanzas more that will bring joy to the heart of any one who retains his boyhood and his Scot-tish blood (I can vouch for the tingle even with two generations betixt 'auld'' Scotland and her descendant.) - I have read several novels of Scottish character which are essentially em-boddied in the short, narrative ballad "The Packman"---and in this ballad is The Fackman — and in this ballad is compounded most cleverly the humor and characterization, as well as the natural narative that you find in several hundred pages of novel read-ing. Just to "gie ye a taste of" here's the opening stanza: There was a couthy Packman, I kent

el aneuch The simmer he was quartered within the Howe o' Tough: He sleepit in the barn end amo' the

sea and spends her time swimming in its green waters, or hunting crabs with Cinders along its rocky shore. There is a cavern in the eliffs that overlook the sea which Chris would love to explore, but fears to. It is called "The Magic Cave," and omin-ous, it is whispered, is the spell that binds anyone who would venture binds anyone who would venture into it

The cave can only be approached at low tide, and one day, after her swim, Chris determines to explore it. As she approaches the mouth of the cave she is so surprised to see a white clad figure emerging from it that she takes an unheeding step and slips among the rocks. Needless to say, the white-clad figure leaped forward to the rescue, and it is easy to surmise that he and Chris and Cinders soon become fast friends. Then Chris tells him of her de-

arrange to explore it together. Things might have been different and Chris' life less troubled if Cinders had not accompanied them on that exploration, for he lost his way in the dark passages, and Bertrand meets with a mishap in searching for him. When at last Bertrand gets back to Chris the tide has risen and they are imprisoned in the cave for the night

* * *

HRIS is young-not yet seven-teen-and so inexperienced C marriage, and it is not surprising that she does not realize the that these attempts, all have been seriousness of the situation. Bert-rand tells her of his invention which failures, for Hardy, like Barrie, is he is perfecting in the safe seclusion of the cave. It is a gun, which is destined to make the French artil-"uninterviewable." Only quite racently I heard the pathetic story of the (then) latest attempt to make lery the greatest in the world. Was it the working of the spell, or only a coincidence that this very gun was instrumental in bringing untold woe into Bertrand's life?—for the invention was found to be sold before completion to a foreign government, and in indignant wrath France tried for treason and condemned to prison its brilliant inventor, Bertrand de Montville

The villain who worked all the mischlef and who had previously goaded Bertrand to a duel because of an insulting insinuation regard-ing Chris and the cave episode is Cantain Bodolphe He turns in Captain Rodolphe. He turns up years later when Chris is married to a man of strictest honor-whom she fears because of his honor, for it renders him incapable of understanding her irresponsible Wynd-ham nature. Bertrand turns up too. to complicate matters, and dark days loom up for Chris. She has never mentioned the cave escapade to her husband, and now she is in mortal terror that he shall find it out. The stor has all the ingredients for cal. are being quoted, rather un-kindly. The new Mrs. Hardy is thrills, but they lose themselves omenow in the telling. The book however, is diverting and light enough to recommend itself for pastime reading. ("The Rocks of Val-pre" by Ethel M. Dell: William Briggs, publisher.)-K. Q'N.

Canadian Literature Club

How Some Young Canadians Studied Their National Literature--History, Folklore, Exploration, and Other Subjects Taken Up.

HERE are, no doubt, many literary and reading clubs, thruout the Dominion, but it is occasionally that we hear of we have anything in Canadian lit-erature deserving of study. Too many Canadians are content to grow up ignorant of the romance of their country's past. It is, therefore, with interest that we note in The Western Home Monthly an account of the very successful work done by one club organized for the express purpose of becoming acquainted with our native literature. The writer, Marion Dallas, says:

"This club was organized to meet a two-fold purpose: to acquire a wider knowledge of Canadian litera-turs and to develop the social life of the community. It proved a pro-hounced success in both departments. "One evening was given to the study of Canadian songs and national anthems, This field afforded an abundant fund of material for a musical evening.

"A subject which was also most interesting and full of possibilities was 'Wolfe in Canadian Literature.' One talk was given on 'Wolfe in Fic-tion.' Reference was made to Thackeray's 'Virginians' and Henty's 'With Wolfe in Canada' Special attention was given to Sir Gilbert Parker's 'The Seats of the Mighty.' 'Wolfe in Poetry' was supported by selections from Dr. Jackeway's poems. A clos-ing tribute was found in the magni-cent words of Charles Sangster to Wolfe and Montcalm.

"'The St. Lawrence and the Saguenay' was another subject, the historic and the romantic being strangely blended. 'Canadian Dog Stories' brought to light selections from Marshall Saunder's 'Beautiful Joe,' and Edgerton Young's 'Hector' and the history-simple and pathetic --of 'Rab' by Dr. Brown. "This club met fortnightly in the

homes of the members, and refresh-ments were served each evening and a social hour spent. . . .

THE STUDY of the early na-tions and tribes of Canada is well worth a winter's study. The origin and traditions of these peoples are fully treated in Mac-

EDITED BY DONALD G.FRENCH With the Canadian Poets **INSPIRATION** By Lily Alice Lefeure

(Mrs. Lily Alice Lefevre was born at Stratford, Ontario; her youth-ful home was at Brockville; she was educated at Ville Marie Convent, Montreal; published, "The Lion's Gate and Other Verses" in 1995. Resided latterly in Vancouver.)

> A lark sprang up to greet the dawn Close to a rose one day, The tears upon her glowing check "His light wing brushed away; Her fragrant beauty fresh and fair He kissed in passing by, And wove her name into his song Of rapture in the sky.

The lonely rose sighed, "Ah, my love, I cannot follow thee: Far, far above in golden light Thou hast forgotten me. Yet am I blest for evermore, Though but an instant dear-Thou singest now a sweeter song For all the world to hear!"

2 2 2

the Empire of the North." is devoted to the romance of Canadian history. Probably the best survey from the time of the conquest to the war of 1812 is contained in "The History of Canada." by Lucas. A work by the same author, "Canadian War of 1812," is the most reliable history of the war from the British side. Bradley's "Canada. In the 20th Cen-tury." and Morgan's "Canadian Life in Town and Country," describes Canada today. Canada today.

. . .

THE CHARACTER, legends and folk lore of the people of Que-bec are sympathetically treat-ed in Nicholson's "The French Can-adian," and Frechette's "Christmas in French Canada," and Greenough's "Canadian Folk Life and Folk Lore." "Canadian Folk Life and Folk Lore." The story of Murray Bay and the Seigneurs associated with that vi-cinity is told by Prof. G. M. Wrong in his "Canadian Manor," Lisgar, in his "In the Days of the Canada Company" describes the settlement of Upper Canada. Dawson's "The Saint Lawrence" is an avalent

Saint Lawrence." is an exploration of Eastern Canada: Burpee's "Search for the Western Sea," explores the west. . . .

TT HE DRAMATIC story of the

Science Jottings Wireless in Canada. C ANADA has now the longest stretch of wireless telegraph

stations in the world, running all the way from Cape Sable, N.S., to Port Arthur, Ont. There are now 22 stations on the Atlantic and St. Lawrence coasts, and a string of land stations running as far inland as Post Arthur. On the Pacific coast are ten wireless stations operated by the naval service department.

* * * Bananas as Food in India. The banana, or plantain, is a staple cuitivated grop in all parts of India except in the extreme northwest. It is even grown at altitudes of 5000 to 6000 feet above sea level. In some cases large gardens are planted exclusively with the fruit but in general it grows in small patches around homesteads for home, consumption. The natives of the country setdom use the name "ban-ana." All fruits of this kind are indiscriminately called "plantains" and those eaten raw as dessert are known as "table plantains." as "table plantains." Next to mangges, plantains are the commonest and most highly prized of all the fruits in India. There are numerous varieties. The coarser-kinds form a staple article of diet in many parts of India and the Malay peninsula. where usually they are cooked before being eaten. It has been demonstrated that a given area devoted to growing plantains will devoted to growing plantains will support a much larger population than a similar area devoted to any. other known grop, and the fruit may be preserved for an indefinite period by drying it in the sun. The dried product is used for mak-ing a sort of meal: this is done by stripping off the husk and slicing the core, which is to be dried in the sunreduced to a powder and sifted. The fresh core of the fruit, it is calcu-lated, will yield 40 per cent, of meal so that the total yield per acre will more than, a ton of meal. The plant furnishes other food in ddition to its fruit. The flower heads of many species are cooked and eat-en and the inner portion of the stem. which is called "thoro," is allso edi-Shoots and tops of young plants are frequently caten as a vegetable and are also used as fodder for cattle and sheep. Various other parts of the plant are used as food for elents and other animals. The natives have long used the fibre of the Indian plantain for making cordage, mats and coarse paper. This fibre resembles Manila hemp in appearance but it is not nearly so strong as the latter. 'The stems of the common plantain are available in vast numbers for the extraction of fibre for industrial purposes. As the supplies of other fibre materials of the world become exhausted more and more attention to the develop. ment of these plants and their fibrous stems will, undoubtedly, be given.

But lang before the milkers he was up at skreek of day.
An' furth upon the cheese stape set his reekin' brose to quee!
While 'n the caller strype he gied his barkit face a swee!

barkit face a sweet: Syne wi' the ell-wan' in his nieve to hand the tykes awa' He humpit roon' the country-side to clachan craft an' ha'.

In the prefatory poem from which the volume takes its title-"Hame--with"--the author says:

Fain he'd be turnin' in his prim Hamewith-the road that's never dreary, Back where the heart is a' the time.

And with one of two excepts scenes. poems deal with Scotish scenes. thoughts and characters - "The Miller." "Jeames." "The Antiquary." "Skeely Kirsty." "The Hint o'Hairst," etc., will Kirsty." at the Desyllock." etc., will And with one or two exceptions, his Kirsty." "The Hint o'Hairst," etc., will Deel and the Devilock," etc., will give some idea of the ramblings of his Pegasus. Nor are the evidences of his classical training of any less note—His "Virgil in Scots" and "Horace in Scots," will help any Lowlander to a better insight into the minds of the ancient Latin poets. Let me close by advising every lover of poetry to make the acquaintance of this little volume— if you are a Scot and enjoy the dialect poems of Burns, you will miss a rare treat if you don't get to know Charles Murray. Should you not belong to any of the Lowland clans, that need not keep you from enjoying the not keep you from enjoying the genuine poetry of this volume for there is in this book a very complete glos-sary of the words which are pecularly the dialectic-and "broad Scotch" is large-ly English after all. Erither Scots dinna forgit "Hamewith" (McClelland, Goodchild and Stewart, publishers. Toronto.)

* * * THE SUBSTANCE OF HIS HOUSE

Another Case of the Eternal Triangle. DERHAPS some novelists take their work seriously, and per-

their work seriously, and per-haps most of them write mere-to make stories. If Ruth Holt Bouci-cault in "The Substance of his House", (Copp Clark Co., publishers) is attempt-ing more than the mere making of a story, then she seemingly is trying to show that a married woman may hon. orably fall in love with another man than her busband and that she may continue loving him, and yet do no than her husband and that she may continue loving him, and yet do no wrong. Rather dangerous doctrine-doctrine of a kind that has much to do with divorce courts. What we need these days is some giants in fiction, to show that the law, "What God hath joined let no man put asunder," is the true, inevitable law—the law which cannot be broken except by the wreck-ing of a soul. Mgrely as a story this is well enough told, interest well suscannot be broken except by the wiech ing of a soul. Marely as a story this is well enough told, interest well sus-tained, language dignified: chaste and restrained and all that, but, one cannot help feeling that the talents of these novelfsts might better be employed in building up the most important institu-tion of ecclety rather than insidents. don of society, rather than insidiously sapping its foundations. The story is designated "the story of love triumph-ant," but why the necessity of disand, but why the necessary of an honoring several lives in order to port-ray love triumphant? Is the inference to be that "love triumphant" is built only upon the wreckage of other lives and souls? Is it necessary to welter in the slough of sin in order to know what nority is and to live clean sweet what purity is, and to live clean sweet lives?Sermonizing, ch.-well blame the modern fiction writer.

THE ROCKS OF VALPRE.

Romance Concerned With Caves and Secret Inventions.

T is the old, old story of a young girl's indiscretion bringing trouble and tragedy into her after life. The tale opens into her after life. The tale opens at Valpre, where Chris Wyndham and her brothers are staying. As luck would have it, her brother he-came UI, and Chris is left to her own devices, with none but Cinders, an erratic little dog, to help her thru. the tedique hours. Chris loves the

GAY MORNING

Tale of Love and Changing Fortunes. 66 G AY Morning," by J. E. Buck-rose, (McClelland, Good-

child & Stewart) is a story well and truly named. It paints a sweet and pretty picture of a young girl in the gay morning of her life before she faces the sterner duties of her day. The scene is laid in England. Emma Basset, the herolne of the story, lives at "The Laurels, Stanley Newton, who was her play-mate, then her sweetheart, is her affianced husband, and a partner in her father's small business.

The story begins at the time when her father has unexpectedly received an immense fortune. Her parents are a kind and happy couple and all their plans now point toward establishing their daughter in a good social circle before her marriage. Emma has plenty of common sense and a very practical way of her own which makes her confident, and sure of herself, but that is the way of many maids, and the author very cleverly leads her gradually away from her "practical friendship" with Stanley until she finds herself trembling before a great and wonderful love which slowly but surely weaves her life with Sir Mathew Ford, one of her new friends, and a fine fellow

Like the true little girl she is she fights against it until Stanley quite unexpectedly confesses his love for her cousin Sybil-who, alas! only encouraged him to satiate a moodof-the-moment.

Mathew and Emma are then left free to drain the happiness which sweetens all their gay morn-ing, until the dial of time points toward their splendid day. Before losing their money Mr. and Mrs. Basset also learned one of nature's great laws--we yearn most for the unattainable-for even the poundcake lost part of its flavor they found themselves rich: and "The Laurels" seemed so homelike and inviting when they became poor again .- L. K. H.

Hardworked Editors. D'ye know, ' said Mr. Dooley, "I'd ke to be an iditor." Would ye, now? It must be a har-i job," said Mr. Hennessey. "Ye. "D'ye rud job.

herself an authoress, having lished several volumes of children's stories, and yesterday a London journal recalled the following dic-tum by Hardy: "That a young wo-man has taken to writing is not by any means the best thing to hear about her." However, it was only one of the author's characters that said this: so, perhaps, ho doesn't really think so! * * *

MAT ONSIGNEUR R. H. BENSON. the clerical one of the iamous three literary brothers, gave a mightily interesting lecture at Westminster Cathedral last Saturday, in which he expressed his views regarding British novelists of the past and present. Which reminds one, in passing, that somebody recently footed up the books which R. H., E. F., and Arthur C. Benson have published, and found that they aggregated exactly fifty, which is going some for three comparatively young men. Speaking of Thomas Hardy, Fa-

ther Benson described him as "Very unsatisfactory about the external elements of life." Of H. G. Wells he said: "He is the almost perfect example of the balanced novelist; and my enthusiasm for him has no bounds. He is a novelist, I firmly believe, who is a genius. He began by being an ag-nostic and a democrat, and I think he will end as a Catholic and a feudalist. Of course, I am speak-ing only of his books." . . .

NTHONY HOPE according to A Benson, is the high priest of modern society. "It is in his psychological novels," said the iecturer, "that Mr. Anthony Hope best carries on the tradition of the mod. ern school. You feel when anything happens in his books that it is more or less an interruption to the story. Mary Cholmondeley, who wrote "Red Pottage" and "Prisoners." came in for high praise from the cieric and novelist. "I don't know whether her books will live ulti-mately," he said, "but I am perfectly sure they will live a very long time. She stands out among contemporary women writers as one of the most sane, wholesome, and clean

writers we have." Thackeray, Father Benson de-scribes as "the most perfect expon-ent of the early Victorian novel." Scott he said, he could not read, the he had tried and perservered again and again. Of R. L. Stevensonsaid. "It is perfectly certain that he is one of the immortals"

Literary Competitions

Original Poom Contest .-- Begin bing March 1, we will have a week ly "original poem competition." con tinuing for five weeks. A cash prize of \$1 will be given each week for the poem selected. Contributions should be sent as early as possible, at least ten days in advance of publication date. Poems must not exceed 6-lines in length. Should no contribu-64 tion of sufficient merit be received during any week of the competi an extension of the contest will be made until five original poems have been published.

Best New Book Contest .-- Prize winning answer will be published next week.

Special Contributions. - Articles. ecseys, etc., on topics suitable for this page, always welcome. Hand-some book will be given for each contribution used.

NOTHER marked advantage A in the Canadian climate that it acts as a tenic to the

Already, according to the story nervous system. Aberration of often told, the Rocky mountain bear temper, sleeplessness, procrastinawho dipped his rheumatic paw into tion, loss of the power of concenthe Hot Springs, has been the pioneer of a long line of people who tration, unreadiness to accept rehave come there for the virtue pezsponsibility-this is a train of signs S IR HAVELOCK Charles in a recent lecture before the and symptoms not uncommon in India and popularly known as "Pun-jab Head," "Bengal Head" and so on. In this sense, we have no "Canadian Head." Great activity of mind and body and pretty good working power, as a rule, are charworking power, as a rule, are actoristic of our people. Sir Have-lock Charles quotes Bacon's saying-"The fit man and the right man is he who has constancy of mind, so that he enjoys the good without dis-dain, and endures the bad without impatience." In other words, the Anglo-Indian who has been on duty too long without furlough, unlike Bacon's "fit man," becomes the vic-tim of neurasthema, with all its wces. Canadians, with their splendid climate, fine ancestry and habit of eutdeer sports should be able to make a nation where neurasthema cught to be infrequent. of the great Englishman, John Law-

> MANY THINGS can be re-medied and improved, such as the prevaience of tropical diseases, but the climate and its ef-fect on Europeans remains the same and must be allowed for, even tho the manner of living in India is now much more sensible and healthy than it was once. Less meat eaten and less alcohol drunk, while sports and outdoor life are favored.

"Tis the hard gruy weather

Breeds hard Englishmen." And the same is true of Canada. Those pioneers who made the provinces of Canada came as a rule from the Highlands and islands, from the remoter parts of Ireland, from York and Cornwall and other wonderful parts of the British Isles, and not, as most of our twentleth century immigration comes, from among the street-bred dwellers in the towns and cities. A steek or race evolved and prepared to live and become the dominant factor northerly temperate elimate is, and generally remains, different from a stock which fourishes for an indefinite period in a tropical or subtropical land.

. . .

THE BRITISH-Canadian flourishes best in his own country. The smell of the snow helps to prepare us for the work of winter, whether in the woods or in the university or in the home. A change is very well. Fravel is highly bene-Residence abroad for business or pleasure is desirable in many ways. But to live in a warm country is not to be desired by the Canadian in comparison to our own country, where what industry and wit we have has taught us like the national emblem. the beaver, to adapt ourselves to our surroundings and make ourselves safe and comfortable. Lord Dufferin used to say in his wise and witty way, when, as Viceroy of India, he wrapped him-self in his Canadian fur coat en dis-tant hill expeditions, that he had never been really warm since he left Canada.

and Hygiene has devoted some attention to that deterioration of health which occurs to anyone from England or other temperate regions who resides for long in India. AS The Lancet reminds us, the Emperor Baler, who invaded India from the rorth early in the 16th century noticed that his followers were los-ing that energy and power of initia-

which departs when the loss of vigorous health occurs, and he there. fore sent them all off to the hills in the north to recuperate, just as the English in India go to Simila today. He himself remained in the plains, an exception to the general rule, perhaps, reminding one of the story

peoples in his own unique manner.

THE TORONTO SUNDAY WORLD

MARCH 15 1914

Five

Babies

By Elbert Hubbard

Column A Weekly Letter Of Comment And Opinion

Kit's

ORONTO is acting up to her title "The Good." as the gay-persons who saw bitter old 1913 go out know to their chagrin. We would have liked to have turkeytrotted that fateful year out our-selves, for he was no friend to us. but such gaiety did not come in our way. It is odd, isn't it-but very human too- how delighted some peo-ple are at the discomfiture of others. At least half a dozen non-society denizens of virtuous Toronto spoke to us happily about the McConkey affair. They even told names, and gloated over the "disgrace of go-called society." They wouldn't be scalled society." They wouldn't be seen in the company of such per-sons. They thanked God earnest-ly that they were not as such. They were glad they had never gone in-coor souls! they had been half their lives climbing) for society, if THAT was society. Those un-fortunate folks at the restaurant had committed the unpardonable had committed the unpardonable sin; they had broken the eleventh commandment. "Be watchful lest thou be FOUND OUT." You know you may break most of the commandments if you but keep that one. The so-called "society scandal" was aired in the police court, and justly frowned upon by a virtuous magis-trate. And-who says that chivalry is no more! Not one of the names of the women concerned was aired in the press. The men were there, pictured by the harassed being, the newspaper artist, and to his credit be it said no one who ever knew them would recognize them. That was the artist's master stroke, his tour de ferce. But will this pro-tection exist for long? Woman will expect it of course-but in view of her present attitude towards the male of the species will she get it? Suppose man retaliated on this question of equality of the sexes or whatever the latest feminist name for it is-and gave the lady away -Heavens! let us not think of it! * * *

Souls and Faces. ENT is the time when women retire to make over their souls and their faces. The beauty and their faces. The beauty parlors of Gotham are now exploit-ing to the chosen rich their "secrets of beauty." Weird things are done in the little back-room studios on Fifth avenue which are devoted to making mothers look like their daughters. Foolish old women are having their faces peeled, filled and enamelled (whatever that may mean) in order that the bizarre Easter bonnet may not assume that shocked appearance when they set it on their noddle. If hats had a sense of humor how they would laugh- Granted the gift and the power to use it, we'd love to be a hat. If we were a very young hat, we would—urged by the artless milliner find the oldest face we could to make a joke of. We once had a hat do this to us, but we paid it out when we save it to the cook who much when we gave it to the cook who was given to the same sort of weakness as that which affected the ladies at McConkey's on New Year's night, and when next we saw it it was bobbing between two Bobbies on its way to court. But, to return to our Easter Now is the time when adlambs. vertisements of 'new fads' and fakes pour into the women's journals. In one we read yesterday of six differ-ent "treatments," each "warranted to be the only thing, lady," that will deprive you of your character lines and make you' look like Adelina Patti. Lilian Russell is out on her own with a beauty box containing Il those things which made her, and keep har a radiant beauty, but do not think, poor dear, that any lotion or unguent can make you look like that lovely person. Lillian got that fairy gift at birth, and all she has done s to retain it--which is much.

D IDING on a train a few weeks ago, from Buffalo to Chicago, I saw a sight so trivial that it seems unworthy of mention. And yet I have remembered it for three weeks, and so I'll now relate ft, in order to get rid of it.

And possibly! these little incidents of life are the items that make or mar existence.

But here is what I saw on that railroad train: Five children, the oldest a girl of ten, and the youngest a baby boy of three. They were traveling alone and had come from Germany, duly tagged, ticketed and certified. They were going to their grandmother at Waukegan, Illinois. The children spoke not a word of English, but there is a universal language of the heart that speaks and is understood. So the trainman and the children were on very chummy terms.

I saw the conductor take the three smallest little passengers to the washroom at the end of the car, roll up their sleeves, turn their collars in, and duly wash their hands and faces. Then he combed their hair. They accepted the situation as if they belonged to the conductor's family, as of course they did for the. time being. It was a domestic scene that caused the whole car to smile, and made everybody else. A touch of nature makes a whole coach kin

* * *

HE children had a bushel basket full of eatables, but that conductor took the whole

brood into the dining-car for supper, and I saw two fat men scrap as to who should have the privilege of paying for the kiddles' suppers.

The children munched and smiled and said little things to each other in Teutonic whispers.

After the conductor had taken up his tickets, he came back, turned over two seats and placed the cushions lengthwise. One of the trainmen borrowed a couple of blankets from the sleeping cars, and will help of three volunteered overcoats. the babies were all put to bed, and duly tucked in. * * * WENT back to my Pullman and went to bed. And as I dozed off I kept wondering whether the grandmother would be there in the morning to meet the little travelers. What sort of disaster had deprived them of parents, I did not know, nor did I care to ask. The children were alone, but among friends. They were strong and well, but they kept very close together and looked to the cldest girl as a mother.

* * * Fakers and Faked.

UT-according to the fakers, B there is nothing you cannot be if you put your hand in your pocket and shell out your good money. One specialist treats you internally-the gods and herself only you know with what stomach-destroying drugs--for either fatness or leanness Another guarantees you the looks of sixteen if you will only use her lo-tion for ten days. Ten little short days, lady, and you will be the first rose of summer. One specialist tells blandly, and with an artless innocence that moves us to tears, of how when traveling in the East she got from a garrulous old gentleman who was shuffling about in "the deserts of Arabia" (for what dark and sinister purpose she does not say), an L nguent made of oriental herbs not procurable here-not by no means at all-as Bailey might say-which will all-as Baney hight say-which which which which change you from a cold Canadian caterpillar into a "Light of the Harem." Why, if all these people did but the millionth part of all they but the minimum part of an they promise there would be no plain or elderly women in the world. And what would Baby do, I ask you, without that old lady friend of

his who is looking forward to the when he and herself-the

crowded with beauties. And yet, Mr. Cynic, there than in the unspoiled youth of womanhood? is something rather pretty about the notion, if you don't mind.

The bon-bon box means sweetness-you'll admit frown so frequently. But what WOULD you have Welcome sweetness where you find it, and see that that. Then ask yourself, Where shall you look for the her do with this droll world? If she brings it the YOU do nothing to turn it sour.

young and the old child-will spend hours and hours in Toyland those .glorious before-Christmas days?

. . . Lave Him His Shnakes.

S'AINT Patrick's Day is nearing us, and more betoken we had a message from him in a dream the other night-

"Lave me be, this year," he says. "'Tis for long enough ye have been dhrawin' me down before th' public --me an' me bag av shnake-tricks an' the rest av it," says he. "I'm dom tired av it," he says. "They're taken the ginger out av th' Home Rule Bill," he says. "an' the divit a further intherest I take in it," he says. "As for the shamrock," he says. "As for the shannock, "the says, "'tis clover ye're buying' fr it, in Canada," says he. "'Twould make a saint laff," he says, "to see Canadyans carryin' little pots av green weeds," says he. "an' callin" him the shamrocks av ould Ireland," he says-"'tis 'sham rogues th' arre right enough th' lot of thim." says he. "Lave me be, thin." says he. he. "Lave me be, thin, says an' "wid me little baskit av shnakes an' sirpints," he says. "an' lave the chained Joint be comfortable in his Lake," he says, "an' don't be makin' a fool av yerself, woman," he says, "tellin' a pack o' lies about sheogs an' the like to the dacint Canadyan people," says he. "Siperate schools an' divelthries av that kind is more in their minds," he says, "an' more betoken three-quarthers av thim arre fr Ulsther," he says. "Besides an' foreright which," says he, "they have me split in sundher wid callin' Scotch, an' French, an' Welsh, until I don't know at all what place I came from meself," says he.

My opinion is that Saint Patrick is spoiling for a fight, and the home government won't let him have it. * * *

The Sensual Skirt.

N ENGLISH writer, dis-A coursing on the daring fashions in woman's dress. as outlined for the coming sea-

The second s

If you want to get through washday easily buy an Eddy Fibreware Tub and an Eddy Washboard. The Tub is the best on the market, as it is made all in one solid piece and cannot fall apart. It also retains the heat of the water much longer than the old wooden Tub. The Washboards are specially crimped. Will not tear the clothes or hurt the hands.

son, says that it is a question that must be tackled seriously and quickly. Dress is closely bound up with questions of morals and manners and maternity. Never has Dame Fashion approached the indecent so closely as today. Woman's dress at present is frankly sensual. It is created in Paris, exploited by the women of the half-world in Paris, and introduced everywhere by the actress. The suggestive skirt, and the bare backed bodice is seen now on the woman who cails herself by the fine name of gentlewoman. The limit has been reached! It is useless to say that people have become so used to the undress of the moment that no man will look twice at it. Whether he looks or not, is hardly the question. We are not finding fault nov with the narrow street gown -- for you can hardly wear anything else without looking a guy - but the transparent lingerics, the disgustngly suggestive skirt, and the extreme decolletage, have over-step ped the limits of decency. Thi This cannot but destroy the modesty of women - that most alluring of all her gentle charms. Queen Mary has done her best to stop the march towards Garden of Eden apparel, but her influence is not as great as one would expect. Some more rigorous method is needed, and is very likely coming, for the Queen was so an-noyed lately by the offensive dress of a lady who was presented to her, that she appealed to the King. What he will, or can, do no one is prepared to say, but it is thought some influential society leader will give a definite lead, and the indecent dress will be relegated to where

belongs -- that sad underworld in which some women live. \$ \$. \$

"Oh: Those Men!" RENCH bachelors thus an-swered the query: "Why are you thusly?" propounded in

a Paris paper:

A City Man: "Love-making takes too much time. There's more real happiness in making money." A Lawyer: "I am very fond of traveling, and want to be able to pack my bag and clear off when I like. A wife would be in the way. A Commercial Agent: "I don't want to be asked where I've spent the evening, or what I've done with my money. My time and cash are my own. A Bond Man: "My mother spoil-

ed me. I should never get the same attention from any other woman." A Journalist: "Haven't the price.

Making a few inquiries within our own circle of bachelors, our query was severally answered thus: A Doctor; "I don't want to be asked about every pretty woman who visits me, or about every nurse in the hospital.' Man-About-Town: "Life is too

short.' Clergyman: "My dear madam, I greatly fear the suffragette? Canadian Newspaper Man: "No, thanks! I'd never have a cent 1 could call my own."

VES. WE all do it - the bookwho buttonhole some one wherever keeper talks of "balances and due bills," and the saleswo-man of "stock" and "sales," the the teacher of "methods." and backward >If you allow your mind to dwell on

"Tommies" or refractory "Annies." And it is the most natural thing the world to talk over a subject common interest when you are with some one doing the same kind of work. You can often gain help by exchanging ideas. You feel encouraged when you find that some-one else is going thru the same difficulties and struggling with the same problems. You are at times really inspired by one who not only struggles but overcomes and rises above them, and gives you a glimpse of her attitude. This is "shop talk" which does you good, and in ks right place. Out of this idea have grown al lthe unions and clubs and institutes, while are simply great opportunities for large numbers of people of the same craft to meet and

fashion, and laughing at the world over which you

talk over their affairs. But let your "shop talk" serve your purpose and end there. When you cover up your typewriter, or close your desk, make a deliberate effort to leave the annoyances and worries of the day right there. I'll promise you that they will not escape over night - they'll wait right there to greet you in the morning. If you start for home with your mind engrossed on that mistake you made, or the unkind thing that some one said, you will forget to be glad that you are out in the fresh, sweet air again. You will go along with your head down and miss that glimpse of glowing sunset or the glimmer of the evening star against the sky.

WHEN YOU get in the car your thought will and over the day's events, like the car wheels turning round and round on their axles. When you reach home, into the ear of the first interested relative who asks what is troubling you, or how the day passed, you will pour your woes. The more sympathetic your listener is the greater is your danger of becoming a bore. It is our longsuffering and patient relatives who encourage us in a spirit of taken sympathy to dwell on things

in which they unselfishly feign in terest. They are responsible for Club Man: "Should hate to have

my breath smelled. Business Man: "Sh-wish-shshe-wis-sh-ye know - sh-wis -wis-stenog - wish ish - nice -lil-girls - she - wis-wish -

savvey?"

TALKING SHOP

they go with their tiresome tales. They are tiresome because they are of interest mainly to the teller. your daily occupation to the ex-clusion of other interests, you will naturally talk of the thing that occupies your mind most.

Remember that your family are interested in your affairs -- not because they care for those affairs but because they care for you. But you can't expect your friends and acquaintances, and strangers that you meet to be so unselfish, and they will not be. They will be polite as long as they must, but the next time they will avoid you if they see you first.

S O MAKE A resolve that they will not talk shop one will not talk shop any more than is necessary; never when among their friends socially, and seldom at home. Cultivate an interest in other things and other people. Make your mind a blank when away from your work that you may fill it with new and interesting ideas and information, with pictures of beauty and memories of sweet sounds.

And there is another reason why "shop talk" should be kept in its proper place; and that is, that if you discuss the affairs of your place of business, you are likely let some business "cat out of the bag" that your employer does not want at large. The world is a very small place, and you never know how far an impression, a word, a thought will travel after it leaves

In relating some experience of your own, you may, without even being conscious of it, convey the impression that your firm is in finan-cial straits, or that their trade is falling off. Your hearer, or even a listener

whom you do not notice, may carry others, when she realizes the necesaway and repeat this thought, until sity of such conquests.

music of happy nature, the gentle gayeties of confident Much given, you will say, to the fripperies of cheerfulness, is not the world so much to the good?

Find your bon-bon box-that's the game for you.

quite a little wave of suspicion and distrust is created against your firm. Small things like this can really affect business in critical times and have done so.

Of course, that is only a possible, not a probable, result, but the fact not a probable, result, but that it is possible to do real harm that it is possible to do real harm by discussing your employer's af-fairs should be a good reason for silence on that score.

Another important reason is that f you are known to be discreet about your employers' affairs you have gone far toward gaining their confidence and high regard. Such a virtue in a woman will win her promotion and approval, where brighter women, lacking this quality, will fail.

* * *

ND THERE is so little real A satisfaction in "shop talk" to outsiders. There is a certain atmosphere, a certain descriptive language and understanding of conditions which are necessary to the hearer, before he can clearly grasp the point of your story. It is almost impossible to present these to an outsider, in a casual conversation, and the consequence

is that whatever you meant to con vey is nearly always misrepresent. ed on that account. On the whole, there are so many ways in which this custom can harm you, and there is so little satisfaction to be gained by its practice, that it might seem as if no thoughtful woman

would indulge in it. But. alas, every woman knows that "shop talk" is a besetting fault of her sex, whether she be a housewife, and talks only of her fam-ily and household problems, or a suffragist who cannot forget the "cause."

So, instead of this suggestion be ing an appeal to reason, it is simply a warning that women, for their own good, will have to fight, tooth and nail, an ingrained trait of their nature. I might say, another in-grained trait, for it seems that wo-man's natural proclivities are so often at variance with the require-ments of the business world. But But she will achieve this, as she has

I do not know his name but the sight of the man, carrying a child in each arm, their arms encircling his neck in perfect faith, their long journey done, and he turning them over in safety to their grandmother. was something to renew one's faith in humanity.

Even a great railway system has .

If you answer that corporations have no souls, I'll say, "Friend, you were never more mistaken in your life. The business that has no soul soon ceases to exist: and the suc-cess of a company or corporation turns on a kind of soul it possesses. Soul is necessary to service. Cour-tesy, kindness, honesty and effi-elency are tangible soul-assets; and all good railroad men know 414

But to be alone in Chicago would be terrible: Would she come:

And so I slept. In the morning there was another conductor in charge, a man I had not before seen, I went into the day coach, thinking that the man might not know about the babies, and that I might possibly help the little emigrants. But, my services were not needed. The tenyear-old "little other mother" had freshened up her family, and the conductor was assuring them, in awfully bad German. that their grandmother would be there—altho. them, in that their course, he didn't know anything about it.

WW HEN the train pulled into the conductor took the baby boy in one arm and a little girl in the other. A porter carried a big lunch basket and the little mother led a toddler on each side, dodging

the hurrying passengers. Evidently I was the only spectator to the play. "Will she be there-will she be there?" I asked myself nervously. She was there, all **right**. there at the gate. The conductor was seemingly gratified as I. He turned his charges over to the old woman, who was weeping for joy, and hugging the children between bursts of lavish, loving Deutsch.

I climbed a hotel bus; as I sat there while they were packing the grips on top, the conductor passed by carrying a tin box in one hand and his train cap in the other. I called to him: "I saw you help

the babies-good boy," He looked at me in doubt, "Those German 'children," I said, "Tm glad you were so kind to them:" "Oh," he answered. smiling, "yes, I had forgotten why, of course; that is a railroad man's business, you know-to help everybody who needs

help.' He waved his hand and disappeared up the stairway that led to the offices.

* * *

ND it came to me that he had A horizonta the incident so soon. simply because to help had become the habit of his life. There he was-big, bold, bluff and bronzed, his hair just touched with the frost of years, and beneath his brass buttons a heart beating with a desire to bless and benefit.

L.

32-

HE world judges so much by appearance that clothes play a considerable part in business efficiency. Therefore, the dress problem of the business woman is of peculiar mportance.

To be well and appropriately dressed six days in the week 52 weeks in the year, without waste of mergy or money, is the question with confronted. It is comparatively easy for the soclety woman always to be well dressed. She has time and money to help her carry out whatever ideas she may possess. She can afford to experiment. She can spend days in working out some gown scheme, and if it isn't altogether a success she seldom feels the loss of either the time or money involved. It is not a bit more important for her to look her best than for the woman of business. The society woman's position does not depend upon her appearance. The business Woman's does. The woman in business is expected to look always neat, attractive and more or less smart. Above all, if she is clever, she wants to look efficient. Also she wants to be so exactly and harmoniously dressed for the work she has to do that she seems to melt into the background as part of a perfect picture, giving the impression of being part of the machinery of the place without being conspicuous.

Double Utility in Dress.

She has to have clothes that will be smart for street wear and simple and workmanlike for the office. She has not the opportunity of running home to change her frock for an emergency. Yet she has social occasions in her every-day life for which she must be properly attired. She may wish to go to one or two semi-formai dinners each week, at the homes of friends or some restaurant, where she must go "just as she comes from work." Perhaps there is the Saturday half-holiday, when she wants to hurry from the office to the matines The sown which she wears must combine simplicity and thoroughness to make it suitable for work and smartness and daintiness to make it fit the social occasion.

Any good business woman realizes that her best efforts really belong to the individual or company which pays her wage. So do most of the daylight hours. She cannot spend

. . .

chise, votes for every mortal thing on earth! Yet they will pay for "al-terations." Where is the movement HAD occasion recently to have alterations in a coat made in an old-established retail store to stop this wrong? and availed myself of the opportun-ity of seeking information on my uppermost topic. The fitter or upprvisor, both of whom knew me

The fitter, a young man of pleas-ing manners and superior intell-cence had been in the retail tallor-

rence, had been in the retail tailor-ing business for himself and was familiar with all its details. "Could he tell me" I asked, "Why a woman's suit, of the same mater-ials and as simply made, cost more than a man's." "He could not. unless it were that

women were willing to yay more," and he smiled. Was there difference in the pay-

ment of the operators?" "Yes, even here, in custom work,

at least, operators make distinctions.

the 'outter.' The 'trimmers' next receive the garment in evolution and lay on the linings and pass it on with a farewell sigh to the 'bas-ters' and 'markers.' These make all ready for the 'machinist.' with his electric needle. Even button holes are made by machinery and are neater than by hand. (He showed me those in his own coat). The 'finisher' receives the garment from the 'machinist' and lastly the 'presser' presses all the good will of his exclusive irons upon the pro-duct." and chambrays used for men's shirts? Now and then you come across a hideous black and white striped thing; but men have the best of it in shirts." "Let me tell you an experience."

he said. "I put in a stock chambrays several years ago for women's colored waists. I have it yet. There is no demand for woman's colored waists. In New York they were retailing at \$8.50 cach.

Perhaps that was the reason.

. . . ET US get down to rock bot-

It is incessant change of style that makes all women's garments more costly than men's.

First, there is the tremendous cost of the designer to be reckoned: next, the cost of new fabrics; third, the price of caution in the manufacture; fourth, the prudence of the retail buyer!

Consider the manufacture of men's shirts: they are made on one set of block patterns in quantities of from twelve to one hundred dozen. Operators are paid about the same on men's and women's whitewear. but more work can be got out of operators on men's shirts, because of the larger quantities cut at one time. This reduces the cost

time. "Now," said my thoughtful host, "let us look at the more complex side of manufacture. We know that so many million men will require so many million shirts, year in and year out, with little change of style or of material. Men's shirts are a staple and do not depreciate in value." "But what of woman's wear? We dare not venture too steeply in any one season. This uncertainty increases the cost of women's cloth-ing. Again, there is the great factor

> . . . WE GUESS right, we gain; if we guess wrong-there's a

of the anticipation of wants.

sale of manufacturer's samples at half price-we lose! "It's as exciting a gamble as the stock market!

"I design my own garments, my travellers leave the first of March, going east and west for the fail trade. The samples they carry were or-dered last December. We must figure nine months ahead on styles or quantities for each season. Yes, it demands good judgment for suc-cess. My lace and embroldery designs are sent to Europe for manufacture. W_{Θ} figure on a month at least of post and freight. Six weeks, fully, must be allowed for manufacture-the linen embroideries in Ire-

They charge \$8.50 for making and finishing a woman's plain tailored goat, whereas for a man's sack coat operators charge from \$6.50 to \$7.50. For a woman's plain tailored skirt operators charge for making from to \$2.50, while custom tailors yually cut ordered trousers and send 2 to \$2.50. them to a factory to be made and finished for \$1.50 to \$1.75 a pair."

"Then, this difference in cost of manufacture is not a matter of sex n the operator?"

Oh. no. Men are almost always, both in custom work and the whole-sale trade, employed on coats. Women are not skilled on coats, tho: I knew one German girl the equal of any man on men's sack coats. Wo-men work best on vests and trous-

ers So. Trousers ordered of a custon tailor are made in the factories and by team work. Am I on the trail of the elusive secret? Yet, there is but a fraction of the difference in price.

* * *

7 HAT is "team work" in the ready-to-wear men's clothing industry? And how

does it affect prices? I stepped into one of the best-known semi-finished clothing stores on Yonge street and asked these questions. It was near the closing hour and the staff were standing about preparing to leave, but the popular chief, once in the custom trade himself, placed me in a chair and was at much pains to give me the information I sought. Behind glass, in the handsome cases, row on row, in endless variety, hung semifinished coats, vests, trousers, overcoats. He showed me some per-

"All wearing, apparel is cheaper than it was years ago." he declared. "The 'team system' has reduced the cost of clothing. In the first place you find the 'head designer' with his patterns. He devotes himself to designing. Next are the operators cutting out these patterns in cloth the hundred dozen. Machinery by the hundred dozen. Machinery is employed. No longer do the adissors wade thru cloth in the fac-tories. We have the electric knife, ggided by the skilled, firm hand of

What they demand is supplied. They demand constant change of styles, and they get it. It is geed for com-merce; tho not designed for that 'Millions of operators are employ

ed to gratify the whimsles of the fair sex; and depend for their bread and butter on the wheel of fashion.' "Do you want concrete evidence?"

"Go, see the goods reduced, a half price, on the shop counters-0. or selling for a song - all styles of last season!"

* * *

66 VOU WILL BE wearing one of these waists soon, how-

test," he bantered, and took from case on its hanger a pattern waist in transparent voile.

It was inset with medalions, em-broidered with floral designs, edged with fluted lace. At every point un-fitted to its end as a garment, perishable, not to be washed, hence at

any price expensive. These waists are 'all the style,'" "Ladies love transparenhe said. cles, apparently. They retail from \$1.50 to \$3.75 each."

"But they won't wash." I urged. "All the better for commerce," he laughed. "We will sell more to clean peo-

"But, why don't you manufacture something substantial — like men's shirts? They wear well, they laun-dry, and they cost nalf the price." ion? "No demand," he sighed. "Wo-men don't want them. We do still make the tailored waist. Here are some samples. We retail this plain, good cambric at \$2. It will last a lifetime, and more! No demand for it, however. We specialize in this finely-embroidered tailored shirt walst at \$2.98. There is a small and steady market for such staples. But we manufacturers would be bank-rupt if we depended on that."

. . . WAS WEARING a man's fine

chambray shirt, purchased at \$1.50, and altered to a waist for 50c. I displayed it.

"Why can I not buy a woman's shirt waist in the pretty cambrics

land, the laces in Switzerland When these trimmings are in hand we make the garments. But what of our market? That's the dubious factor, "Anticipation of wants, in a mar ket of incessant changing styles, keeps up the price of women's cloth-ing, and makes it, out of all proportions to durability, twice as costly as men's."

. . . IS IT desirable to stop the wheel of fashion?

This manufacturer of women's waists, gifted with broad vision, thought it was not desirable. "You would upset the world of

commerce which speculates on change in women's clothes." Glance over the sheets of the daily newspaper. Read the advertise-ments. For example this: "Ever tireless in the pursuit

of things new this season fashion has outdone herself in the preparation of pleasing sur-prises, and has displayed an unwonted degree of inventive-ness in the creation of the new suitings which are spread out in such enticing array in the dress goods department. What chance has the mind of the

average woman to contend against the force of such an announcement iarge type of scarlet coloringor last year's forty dollar suit of weird weave and more weird fash

Her husband sends his last summer's suit to the cleaner, and steps forth airily in it on a May day, with the price of a new one in his pocket. While she broods for hours over a fashion sheet, and stands for more hours at the modiste's mirror and wastes her energies in going to and fro. Still, thank heaven, she is up-to-date in slits, and bands, and but-

tons, and draperies, and the wheels of commerce still so round! . . . MINHERE'S a clever serial of a

man's adventures in matrimony running thru the columms of The Daily World.

Exasperated at his bride's absorpon in fashions, he demands: "I can't for the life of me see why tion in women don't buy their clothes, set-tle the portentous problem of their making and wear them without all this perpetual fevered discussion and dress dialog. . . ." It is distinctly plain to us why Mr.

Man, with the world of commerce, which must not be upset, leagued against them. I took a look around the retail

stores one afternoon lately and saw men's cambric shirts (not warrant-ed fast color), at 59c. Colored shirts. wartanted, were \$1.25, and the best white shirts were \$1.00. Women's waists were offered from \$1.50 to \$3.50.

The stalls of women's whitewear make one despair for the race-thin cotton, over colored tissue paper, everywhere! Rotten laces, ribbons. a thing fit for the wash tub! Pretentions show the first or only aim; usefulness not considered." Why not combine good cotton with d trimming. leave out the ribbon. and sell for a reasonable price? Oh, those wheels of commerce! It gives work to millions to put in the

ribhons! Then, why not make a stand against charge for "alterations"? The men will support us there!

sured me that their "aitera-

after day, in order to keep the wolf from the door? Do you feel that You might do something else, if you had the opportunity?

Then go after opportunity! That old idea that opportunity knocks on your door once, and if you don't hear him you have forever lost your chance, is an exploded theory. Nowadays, you must not sit back and wait for the good things of life to come and rouse you out of your dreams - there are too many energetic people pursuing those prizes

. . .

D UT THERE is one other world D old idea that has come down thru the ages in myth, folklore and religion, and which will abide as long as humanity does --because it is founded on a human truth. It is the belief that every human being at birth is endowed with some particular gift peculiar to his own nature and ability.

These gifts are as varied as the needs of humanity, for the essence of every gift is service. Which are the gifts at holiday time that mean the most to you? Not the useless knick-knacks which finally hide in the darkness of an attic trunk: not the ill-chosen things that have place in your daily life, but rather the every day, homely presents that add to your comfort or convenience, and the beautiful ornament or trinket which gives the needed touch of beauty to your home or dress. And that is the real virtue and meaning of those gifts of nature, They are given to us to be used. to be cultivated, to be developed to the greatest possible perfection.

. . .

YOU MUST accept the gift that belongs to you, the. If you If beings to you, inc. in you have a taste for cooking and just enjoy yourself in a Topsy ap-ron in the kitchen, don't scorn that work. A well-cooked and tastefully served meal is one of the funda-mental needs of all humanity, and domestic science and service are coming into their own dignity as a profession — if not an art. You would far better serve a perfect meal than write mediocre verse. Any work gains its value and dignity from the quality of its performance. ad the personality of the worker. There is one meat market I -know. where the proprietor seems to radiate a spirit I never connected with

butchering. His cheerful, efficient personally gives well-deserved con-fidence in his meats. But it is a revelation to see him carve off a steak or roast. He performs this seemingly commonplace task with a deft grace , and carefulness ; that suggests more the workmanship of a skilled artizan than a butcher. That is his gift to the world, and by making it express his ideals of business sincerity and perfection he ennobles it. But, sometimes, the difficulty lies not in developing your gift, but in discovering what it realy is. Some time ago I was associated with a young girl, who had entered the work as a novice. She apparently had every qualification for her

position, she was well educated and bright, but she soon became the despair of those in authority over 2 2 2

I I EE INATTENTION and carelessness in the details of the work caused a great deal of. trouble, and she was again and again reprimanded. Reprimands turned to reasoning, and reasoning to appeals, but all to no avail. While the girl was apparently in a constant state of contrition for her offenses and resolved not to repeat them, her work did not improve, and she finally admitted that the work did not interest her, and she could not do any better because her heart was not in it, and she gave it up I lost all knowledge of her, and some years later I came across her unexpectedly in an entirely different line of work. In fact, she was in-

line of work. In fact, she was in-troduced as a very successful mem-ber of one of the highest pro-fessions that women have entered. She had lost the dreamy, discontented expression that marred her attractive face in other days, and was alert and animated with the keen satisfaction of a power put to its rightful /use.

By her manner and appearance she justified the words of , Van Dyke, when he wrote: This is my work - my blessing, not my doom;

Of al who live, I am the one by whom This work can best be done, in my own way."

THE NEW SKIRTS.

A most decided change has taken. place in the style of separate skirts. Tunics and tier models-two or three, even four and five tiers, being seen. Where there is a tunic it slopes

downwards in back, and is edged by a slightly gathered piece of the material, giving a sort of bell shape over the hips. One extreme model is five tiers, each tier being edged with this, gathered ruffle of material. This effect is best on tall women.

On one little island in Gatun Lake, in the Panama Canal zone, formerly known as Lion Hill, there are more species of birds than in any other one locality in the western hemisphere, it is declared. E. A. Goldman, of the blological survey, department of agriculture, has procured about 300 species in only two short trips to the zone, and there are many others still. In the neighborhood of Gatun alone, at the Atlantic entrance of the canal zone, no less than 200 species cansi zone, no less than 209 species have been found.

Play You Mids! All Out-of-Doors Resounds Because Festive Marble

Is Here.

By John Clarkson. OR a week past the Toronte schoolbay has been scruti-nizing the reluctant patches

of drenched ground about the school yards and lanes, often down on hands and knees, to see if the earth would "pack"; it being required, about a given cup-like centre, and at the distance fancied, to describe a circle with te toe of a boot. "When it's apple-blossom 'time in

Normandy" may appeal to the brother, Tom, who is in a big King street office-especially at the piano when one or two of sister's evening friends hover in-but the song that is really voted "some peach" by the younger hopeful is "I Dreamt I Dwelt in Marble Halls." Boys can never understand the home tyr-anny which denies them the use of the house. "just for practice, ma." It IS hapd hapd practice, ma." It IS hapd on a chap-this standing and mop-ing for out-of doors to dry out and a chap's pockets fairly bulging with dozens of the best, shiny, tiny, clay spheroids that the corner grocer temptingly sets in his window be-tween the hockey-delights and the all'day-suckers. Sure hard luck: "Now, if parwas only ma-naw, sheld not low us other market be

not low us, either-wonder'f he's ever a kid 'sself?" But, thanks to Oid Sol, the bogsy. soggy yards have been yielding up their superabundant moisture, and most of this surreptitious storage of shop marbles, and of the marble kind, has given over to the delights of real warfare. Some of the boy whose parents have telephones in their homes keep their "mills" in cotton bags, with real drawstrings to them. It is not believed that these dinky receptacles have anything to do with a fellow's skill. The urchin who wears dad's cut-down garments and can "berry a starter" is just as likely to win out as the other; also, if he plays "for keeps," to emerge from the fray with even his hip-pocket bay-windowed with agates, glass alleys, milkies, doggies, bloods, snappers-reverything, down to weeny peewees, nor yet forgetting hundles, smashers, and bull shooters. Scorned of literature-high or low: Scotned of literature-high or low: or whatnot-one wonders how fae marble jargon is perpetuated. You expect any day to hear, how the archaeologists have disinterred Sy-rian tablets depicting the game, and how the identical schoolboys argot of today is, there writ in Hittle cunefform text: "Fan placings," "Fan every's," and all the volumin-ous else. Who was the original wouth ous else. Who was the original youth of antiquity that disconcerted his of anisquity that disconcerted his elders by noisily dropping a marble when he essayed to reach his col-lection at some sacrificial morning service? Who was the first to leave a particularly hard sample in the centre of a parent's dressing apart-ment for a bare foot to descend approximately where the tendo-Achilles of the latter, so to speak, would most explored Actines of the latter, so to speak, would most exuberantly respond? That day, too, likely owned its inno-cent, be-curled "somebody's darling" who was not allowed to play marples, but who turned up with a box.

ingeniously lidded and auger-holed. boly profits of a coy "eye-drop 'eye-drop' game beneath his scented pillow,

POOR COPY

Some one has said that "genius is the capacity for 'taking infinite pains," and one reason that genius is so rare is not that so few péo-ple are endowed with talents, but that so few are endowed with the capacity for painstaking labor. And another reason is, that many peo-

ple fail to realize their partie gift until youth has passed and they have accepted responsibilities and engaged in other occupations. Then it seems easier to follow the line of the least resistance and continue along he way they have started. And these are the discontented people - the cynics - the misunderstood - the unappreciated, who

blame others for their failure. We say of a man who, as the phrase goes, "has mistaken his calling"—"It's a pity, for he would have made a good doctor, or law-yer, or something else."

... T HE supervisor named alove as-

flob mooth" cost them \$6990 a

And, in that case, the mistake is not so much in choosing the wrong profession, but in continuing in it after the mistake has been discov-ered.

it's you feel that you are in a at it's you are doing? Has it become simply mechanical

drudgery that you must so thru day

ES, you have a gift. Excuse my contradicting you, but I insist that you have "But," you protest, "I'm just an ordinary person — not specially gift-ed in any one thing — every one can't be a 'Gadski," or an 'Ella

Wheeler Wilcox,' or an 'Agnes Rep-No. I admit that there are varying degrees of ability and achievement and that some reach the top -but they didn't begin there! The reason they are there is this: When each one discovered what one thing she could do better than an-

other other, she determined to sing, or to paint, or to write — as well as she possibly could. Probably her beginnings were very faulty, but she persevered — not because it was easy to do, for she soon found that it was very difficult, and she had do it over and over again, and often, became, discouraged. Her best efforts were far from perfect, and there was much hard, drudging study and practice to be performed before she could actually accom-plish anything worth while. But if they liad not cultivated their gifts. we should not know their names

MORE SUGGESTIONS CONCERNING NULLO IN AUCTION BRIDGE

and His Partner Be Allowed to Change Hands?

A New Decision Interpreting the Laws and Discussion of Slam Values.

AUCTION ARTICLE NO. 5 By Milton C. Work.

In the previous articles of this series, consideration has been given to the questions which are apt to trouble a player who contemplates an original Nullo declaration. We We an original Nullo declaration. We have not, however, as yet taken up the serious proposition of when a Nullo bid by the partner should be advanced. This demands even more conservatism than an original de-claration, because it is the hand of the advancing player which becomes exposed, and as soon as it is placed on the table any cards in it which may possibly take a trick become cuous targets at which both

conspicuous targets at which both the adversaries may shoot any los-ing cards they possess. Of course, the player who ad-vances his partner's Nullo is not troubled by the consideration that he may be faced by a holding pro-hibitory for a declaration to lose and consequently that the Nulle will and consequently that the Nullo will-have to be taken, out; but he must remember that a high Nullo call is always dangerous and apt to pro-duce large penaltics for the adversaries

The composition of hands varies so materially and the question of whether a partner's Nullo should be such different conditions that it is very difficult if not impossible, to lay down any general rule which will prove a safe guide. The de-clarer who is struggling with this proposition should realize that even if the advance be only as high as two, that means that to fulfill the contract not more than five tricks can be taken. The partner, by his original declaration, has stated that his hand will not win more than three, and the assisting declarer is therefore probably sofe in raising the bid to two if his holding be such that he can be protocolly assured that he can be practically assured that his cards exposed in all their nakedness will not take more than three; for, while it is true that three and three make six, which would be a loss of one, the probability always exists that winners of the original declarer and the assister can played together on the same trick, decreasing the total number. It goes without saying that this is not assured, as, for example, the original declarer may have two sure

Should the Original Declarer the Nullo it had the tendency to make it the final declaration in too many instances; and that it could not become popular, because players have become accustomed to handle the open hand whenever they are the final declarer, they enjoy this privilege and are not anxious to originate a declaration which will transfer to the partner the right to play the hand.

For these more or less powerful reasons, many believe that the idea had been abandoned. I have been surprised, however, to find that guite still urging it most stremuously. Some of them realize that it has been tried and has not found favor, but believe that this is merely because it has not been thoroly tested. Others, not knowing that it has been the subject of experimentation, sug-gest it thinking that they are origin-ating a new and valuable idea. The plan does, beyond question, present attractive possibilities; that is, of course, providing the play of the Nullo be a good thing for Auction. If, due to the slowness incident to Nullo play or to its intricery and laboratory to its intricacy and laboriousness it should be discouraged (the bid being included in the game merely because it is useful for the purpose of forcing up an adverse declaration) of forcing up an adverse declaration) then, of course, this proposition is most disadvantageous. It certain-ly seems that the idea deserves con-sideration and that it is another Nullo problem which, if the declara-tion to lose be included in the game, should be the subject of future determination

An Exchange of Hands Proposed. In this connection, I wish to call atention to an important amendment to this idea suggested by a corres-pondent who writes from Easton Pa., and who reviews the whole Nullo proposition in a masterly manner.

The plan which he advocates enables the dangerous hand to be con cealed and also allows the original declarer to play the combined hands. It is that whenever a Nullo declaration becomes final, the or-iginal declarer and his partner exchange hands, the cards of the original declarer thereby becoming ex-posed. This scheme unquestion-This scheme unquestion ably has merit, and I recommend it to Nullo enthusiasts as well worthy of their careful attention.

Next Sunday the play of the Nullo will be the subject which we will ex-Nullo propositions will be announc-ed in the near future. The Value of Slam.

During the earlier articles of this series we have considered some of the alterations in the laws of the game which have been introduced by the code adopted about the end of last year. Today we will give a lit-tle attention to a change which was proposed and ardently advocated by certain influential players, but which was not made, as the Whist Club of New York, the metropolitan organi-zation which adopted the code, de-

termined that it would not be for the best interests of the game. This proposed change was an in-crease in the values of slam and little slam. In certain English clubs and on the Hearts; but even should this prove to be the case, it would only mean a loss of one, and it pays to low Clubs-Knave, 8, 5, 2, No 2. In certain English clubs and on the continent, these values today are generally 50 and 100 respectively, instead of 20 and 40. They have been raised abroad because foreign players consider that the retention of the Bridge values for the slams is a mistake, inasmuch as in Auc-tion the entire Bridge basis of valuation has been raised, a notable ex-ample of this being the increase of the bonus allowed for winning a rub-ber from 100 to 250. Foreign players argue, with considerable force, that the reward for a declarer who by skilful play, has won twelve or thirteen tricks should be far greater than the insignificant sum which the American laws allow. The law making body of this coun-try did not, however, have merely the question of an advance of 150 the question of an advance of 150 per cent. in slam values to consider A new feature proposed was that if the declarer contract to make a slam; that is, if he bld to take twelve or thirteen tricks, and succeed, he should receive an additional bonus. The schedule suggested in addition to the advance to 100 and 50 was, if a grand slam be declared and made, it should count 250; a little slam declared and grand slam made, 200; a little slam declared and made, 150 This very liberal increase in slam values was advocated in many who believe that the bold bidder and brilliant player who has the courage and ability to declare six or seven tricks and to successfully fulfill so dangerous a contract, is entitled to a far greater reward than the present meagre slam allowance. It was argued that a player who bids seven and takes thirteen tricks deserves far greater recognition than the player who bids but one and yet makes a grand slam, as the risk is so much more pronounced. It was therefore, urged that slam values be made as follows: For grand slam. 250, if seven be bid; 200 if six he bid; 100 if less than six be bid: for little slam, 150 if six be bid, and 50 if less than six be bid.

The dealer bids two. No trumps; second hand, three Clubs; third hand, pass; fourth hand, two No Trumps. It is, of course, evident that the sec-ond hand made an insufficient de-claration, viz, three Clubs, 18, over two No Trumps, 20, which could have been penalized by the adversaries but which the third hand, by pass-ing, accepted. The question is whe-ther, under such circumstances, the fourth hand, being the partner of the offending player, can make the same offending player, can make the same call (two No Trumps) originally declared by an adversary and there-fore to a certain extent benefit by a breach of the law committed by his own partner. The decision is that the third

hand, having accepted a declaration of 18, any subsequent declarer may overbid that declaration; and there-fore that a call of two No Trumps by the fourth hand is entirely per-missible. It is pointed out that the insufficient declaration afforded an opoprtunity to the adversaries to in-flict a severe penalty had they so desired. They had the right to de-mand that the bid be made sufficient (that is, increased to four Clubs) and to prevent the partner of the declarer from making any further bid unless one of his adver-saries subsequently bids or doubles. When, however, the third hand passed the insufficient declaration, he ac-cepted it, and therefore if the dealer have any cause for complaint with the situation it is occasioned by the action of his own partner rather than by the insufficient bld of the adversary.

Some Questions of Declaration. In each of the four preceding arti-cles of this series a deal has been given which contains some interesting question or questions of de-claration. These four deals are all reproduced today and one more is added making five in all.

In all questions of declaration it should be remembered that the score is supposed to be love all and that Nullos are not to be declared.

The question is how each player should declare in an actual game without any intimation except that given by the bidding concerning the position of the thirty-nihe cards not in his own hand

hand. The best way to determine, the proper bidding is to place the cards in hands and take up each one in turn without looking at the others. The five deals follow:--No 1. DEALER (SOUTH). Spades-Ace, King, 6, 5. Hearts-Ace, King, 8, 6, 3. Diamonds-7, 2. Clubs-4, 3.

The men came just then to move the piano, and by the time we had taken it and the furniture up-stairs, the water was over the kitchen floor, and creeping forward into the hall.

I had never seen the river come up so fast. By noon the yard was full of floating ice, and at three that afternoon the police skiff was on the front street, and I was wading around in rubber boots, taking the pictures off the walls. I was too busy to see who

the Ladleys' visitor was, and he had gone when I remembered him I was a girl in seventy-seven, duragain

ing the railroad riots, and I recall cur driving in the family carriage over to one of the Allegheny hills, The Ladleys took the second-story front, which was empty, and Mr. Reynolds, who was in the sllk deand seeing the yards burning, and a great noise of shooting from partment in a store across the river. had the room just behind. across the river. It was the next I put up a coal stove in a back room next the bath-room, and man-aged to cook the dinner there. I year that I ran away from school to marry Mr. Pitman, and I have not known my family since. We

were never reconciled, altho I came back to Pittsburgh after twenty years of wandering. Mr. Pitman was was washing up the dishes when Mr. Reynolds came in. As it was Sunday, he was n his slippers, and had the coldead; the old city called me, and I came. I had a hundred dollars or so, and I took a house in lower

ored supplement of a morning paper "What's the matter with the Ladleys?" he asked. "I can't read for their quarreling."

doing when you came in? I was looking after his boat, and hoping it had a hole in it." "You won't feel that way to-

morrow, Mrs. Ladley," I protested, shocked, "You're just nervous and put out. Most men have their ugly times. Many a time I wished Mr. Pitman was gone — until he went. Then I'd have given a good bit to have him back again. She was standing in front of the dresser, fixing her hair over her cars. She turned and looked at me over

her shoulder. "Probably Mr. Pitman was a man," she said. "My husband is a flend, a dovil."

Well, a good many women have said that to me at different times. But just let me say such a thing to them, or repeat their own words to them the next day, and they would fly at me in a fury. So I said nothing, and put the cream into her tea. I never saw her again.

CHAPTER II.

There is not much sleep-ig done in the flood district during a spring flood. The gas was shut off, and I gave Mr. Reynolds and the Ladleys each a lamp. I sat in the back room that lamp. I sat in the back room that I had made into a temporary kit-chen, with a candle, and with bed-quilt around my shoulders. The water rose fast in the lower hall, but hy midnight at the seventh step, it by midnight, at the seventh step, it stopped rising and stood still. I al-ways have a skiff during the flood scason, and as the water rose, i tied it to one spindle of the staircase after another.

I made myself a cup of tea, and at one o'clock I stretched out on a sofa for a few hours' sleep. I think I had been sleeping only an hour or so, when some one touched me so, when some one touched me on the shoulder and I started up. It was Mr. Reynolds, partly dressed. "Some one has been in the house, Mrs. Pitman," he said. "They went away just now in the boat."

"Perhaps it was Peter," I sug-gested. "That dog is always wan-dering around at night."

"Not unless Peter can row a boat," said Mr. Revnolds dryly. I got up, being already fully dressed, and taking the candle, we went to the staircase. I noticed that it was a minute or so after two o'clock as we left the room. The boat was gone not untied, but cut lose. The end of the rope was still fastened to the stair-rail. I sat down on the sairs and looked at Mr. Reynolds.

"It's gone!" I said. "If the house catches fire, we'll have to drown." "It's rather curious, when you consider it." We both spoke softly, not to disturb the Ladleys. "I've been

awake, and I heard no boat come in. And yet, if no one came in a boat, and came-from the street. they would have had to swim in."

I felt queer and creepy. The street door was open, of course, and the lights going beyond. It gave me a strange feeling to sit there in the darkness on the stairs, with the arch of the front door like the entrance to a cavern, and see now and then a chunk of ice slide into view, turn around in the eddy, and pass on. It was bitter cold, too, and the wind was rising. "Til go thru the house." said Mr. Reynolds. "There's likely nothing worse the matter than some drunken mill-hand on a vacation while the mills are under water. But I'd better look" He left me, and I sat there alone in the darkness. I had a presenti-menn of something wrong, but I tried to think it was only discomfort and the cold. The water, driven in by the wind, swirled at my feet. And something dark floated in and lodged on the size below. I reached down on the step below. I reached down and touched it. It was a dead kit-ten. I had never known a dead cat to bring me anything but bad luck. and here was one washed in at my

of the third-floor rooms," he said. "Did you put him there?"

I had not, and said so; but as the dog went everywhere, and the door might have blown shut, we did not attach much importance to that at the time.

Well, the skiff was gone, and well, the skill was gone, and there was no use worrying about it (urtil morning. I went hack to the sofa to keep warm, but I left my candle lighted and my door open. I did not sleep: the dead cat was on my mind, and, as if it were not bad enough to have it washed in at my my mind, and, as if it were not bad enough to have it washed in at my feet, about four in the morning Peter, prowling uneasily, discovered it and brought it in and put it on my couch, wet and stiff, poor little thing!

I loked at the clock. It was quarter after four, and except for the occasional crunch of one icg-cake hitting another in the yard, everything was quiet. And then T heard the stealthy sound of oars in the lower hall the lower hall.

I am not a brave woman. I la there, hoping Mr. Reynolds would hear and open his door. But he was sleeping soundly. Peter snarled and ran out into the hall and the next moment I heard Mr. Ladley speak-"Down, Peter," he said. "Down. ing. Go and lie down?

Go and lie down? I took my candle and went out into the hall. Mr. Ladley was stooping over the boat, trying to the it to the staircase. The rope was short, having been cut, and he was having trouble: Perhaps it was the candie-light, but he looked ghostwhite and haggard.

"I borrowed your boat, Mrs. Pit-man," he said, civilly enough. "Mrs. Ladley was not well, and I-I went to the drug store."

"You've been more than two hours going to the drug store," I said. going to the drug store," I said. He muttered something about not finding any open at first, and went, into his room. He closed and locked the door behind him, and altho Peter whined and scratched, he did not let him in.

He locked so agitated that I thought I had been harsh, and that perhaps she was really ill. I knock-ed at the door, and asked if I could do anything. But he only called "No." curtly thru the door, and asked me to take that infernal dog away I went back to bed and tried sleep, for the water had dropped a inch or so on the stairs, and I knew the danger was over. Peter came, shivering, at dawn, and got on to the sofa with me. I put an end ef the quilt over him, and he stopped shivering after a time and went to

The dog was company. I lay there, wide awake, thinking about Mr. Pitman's death, and how I had come by degrees, to be keeping a chean boarding-house in the flood district and to having to take impudence from everybody who chose to rent a

other flood five years ago, when the water reached more than half-way to the second story, and brought with it, to some, mystery and sudden death, and to me the worst case of "shingles" I have ever seen. My name is Pitman-in this narrative. It is not really Pitman, but that does well enough. I belong to an old Pittsburgh family. I was born on Penn avenue, when that was the best part of the town, and I lived, until I was fifteen, very close to what is now the Pittsburgh Club. It was a dwelling then; I have for-

gotten who lived there.

ing.

The three points for the assist-ing Nullo declarer to consider, when placed in a doubtful position, are:---First. Whether he can be sure that his partner's original declaration has been made upon 'conservative

Second. Whether he can depend upon his partner to play the combined hands to best advantage.

Third. Whether his own cards are really of the character that makes it reasonable for him to estimate that even tho they are known to the adversaries, three tricks will prove to be the maximum number they can be forced to win.

When doubt exists concerning any one of these propositions, it is much safer not to risk the dangerous Nullo declaration. If the partner be a player of the class that bids a Nullo without a holding that justifies it, assisting his declaration with a hand that contains two or three tricks almost certainly spells disaster. The same is true when the partner is not of the caliber to play Nullo to the best advantage, as it is very easy for a player who is unable to master the intricacles of Nullo play to go down to the extent of four or five hundred with cards with which an expert would without difficulty fulfill his contract.

It is also very easy for a player anxious to help his partner and to force the adversaries to a declara. tion which they cannot fulfill to underestimate the number of tricks which may be taken by an open hand.

The assisting Nullo player should, therefore, be ultra-conservative in determining whether all three of the conditions above named exist, and consequently whether he is justified in advancing the declaration Which Hand Should Be Exposed.

The discussion of under what circumstances the original Nullo de-ciaration should be advanced by the partner and the realization of the danger incident to exposing to the merciless attacks of the adversaries a hand which contains a number of possible tricks suggests a Nullo idea which some months ago, was given more or less consideration by Nullo advocates, but which now seems to have been generally abandoned. It is that, inasmuch as the Nullo is a radical innovation in the game of Auction, it should introduce another novelty, namely, that the combined hands be played by the partner of the original declarer. The object of this is that it makes the hand which first bids the Nullo the dummy.

It would, therefore, necessitate little more caution on the part of the original declarer, but would permit much greater freedom in assisting the partner's Nullo declaration and would unquestionably produce more successful Nullo contracts.

As I have stated aboye, this was discussed at some length by Nullo writers a short time since and did not seem to find much favor. The objections to it were that it introduced another change and that the Nullo in itself was a sufficiently radical alteration in the game: that by facilitating the successful play of Neither this idea as a whole nor any part of it was adopted, because the law making body feared it would have the tendency not only to encourage rash declarations, but that it would materially increase the size of the game and unduly favor the holders of big hands, who, with the present laws in force, and able to reap a large reward by reason of the favor of the fickle goddess.

It was also contended that the expert has a sufficient advantage ove the moderate or inferior player with the laws of the game as they stand at present, and that any increase in slam valuations would to an undue

extent add to that advantage. As far (); our laws go, therefore-until there be a new code adopted, and it will doubtless be a considerable time before that happens, slan values will remain as they are at present. viz., 20 and 40. It is a matter upon which much can be said upon both sides, and while there are many who may wish that the de-cision had been in favor of an increase, from what I hear I am in-clined to believe that the majority of players approve the conservative action that has been taken in the premises

A New Decision.

A rather interesting question has been recently decided by the Card Committee of the Whist Club of New York, which is really the Auction court of last resort. The situation called to the attention of the committee, and upon which a ruling was asked, is somewhat novel.

desk, and it kept me busy with

so, and I took a nouse in the are Allegheny, where, because they are partly inundated every spring, rents are cheap, and I kept boarders. My house was always orderly and clean, and altho the neighborhood had a bad name, a good many theatrical people stopped with me. Five minutes across the bridge, and they Spades-Ace, King, Queen, 9, 8, 6, 2. were in the theatre district. Alle-gheny at that time, I believe, was still an independent city. But since then it has allied itself with Pitts-burgh; it is now the North Side. I was glad to get back. I worked hard, but I made my rent and my living, and a little over. Now and then on summer evenings I went to one of the parks, and sitting on a bench, watched the children play-ing around, and looked at my sister's house, closed for the summer. It is a very large house: her butler once had his wife boarding with me

-a nice little woman. It is curious to recall that, at that time, five years ago, I had never seen my niece, Lida Harvey, and then to think that only the day before vesterday she came in her automobile as far as she dared, and then sat there, waving to me, while the police patrol brought across in a skiff a basket of provisions she had sent me.

I wender what she would have thought had she known that the elderly woman in a calico wrapper with an old overcoat over it, and a pair of rubber boots, was her full aunt!

The flood and the sight of Lida hoth brought back the case of Jennie Brice. For even then, Lida and Mr. Howell were interested in each other. This is April. The flood of 1907

was earlier, in March. It had been a long hard winter, with ice gorges in all the upper valley. Then, in early March, there came a thaw. The gorges broke up and began to come down, filling the rivers with crushing grinding ice. There are three rivers at Pitts-burgh, the Allegheny and the Monongahela uniting there at the Point to form the Ohio. And all three were covered with broken ice, logs, and all sorts of debris from

the upper valleys. A warning was sent out from the weather bureau, and I got my carpets ready to lift that morning. That was on the fourth of March, a Sun-day. Mr. Ladley and his wife, Jen-nie Erice, had the parlor bedroom and the room behind it. Mrs. Ladley, or Miss Brice, as she -referred to be known, had a small part at a local theatre that kept a permanent company. Her husband was in that business, too, but he had nothing to do. It was the wife who paid the bills, and a lot of quarreling they-did about it.

I knocked at the door at ten o'clock, and Mr. Ladley opened it. He was a short man, rather stout and getting bald, and he always had a cigaret. Even yet, the parlor car-pet smells of them. "What do yeu want?" he asked sharply, helding the door open

about an inch.

"The water's coming up very fast, Mr. Ladley," I seid. "It's up to the swinging-shelf in the cellar now. I'd like to take up the carpet and move the piano." "Come back in an hour or so,"

he snapped, and tried to close the door. But I had got my too in the crack "I'll have to have the plano moved,

Mr. Ladley," I suid. "You'd better put off what you are doing." I thought he was probably writ ing. He spent most of the day writing, using the washstand as a

"Booze, probably," I said. "When you've lived in the flood district as long as I have, Mr. Reynolds, you will know that the rising of the river is a signal for every man in the "lcinity to stop work and get full. The fuller the river, the fuller the male population." "Then this flood will likely make

'em drink themselves to death!" he said. "It's a lulu."

"It's the neighborhood's annual debauch. The women are, busy keeping the bables from getting drowned in the cellars, or they'd get full, too. I hope, since it's come this far, it will come farther, so the landlord will have to paper the parlor."

That was at 3 o'clock. At 4 Mr. Ladley went down the stairs, and I heard him getting into a skiff in the lower hall. There were boats going back and forth all the time, carrying crowds of curious people. and taking the flood sufferers to the and taking the hood sufferers to the corner grocery, where they were lowering groceries in a basket on a rope from an upper window. I had been making tea when I heard Mr. Ladley go out.

I fixed a tray with a cup of and some crackers, and took their door. I had never liked Mrs. Ladley, but it was chilly in the house with the gas shut off, and the lower floor full of ice water.

And it is hard enough to boarders in the flood district. keep She did not answer to my knock, so I opened the door and went in. She was at the window, looking after him, and the brown valise that figured in the case later, was

opened on the floor. Over the foot of the bed was the black and white dress, with the

red collar. When I spoke to her. she turned around quickly. She was a tall woman, about 28, with very white teeth and vellow hair, which she parted a little to one side and drew down over her ears. She had a sul-len face and large well-shaped hands, with her nails long and very pointed.

"The 'she-devil' has brought you 'some tea," I said. "Where shall she put it?"

"She-devil'!" she repeated, rais-ing her eyebrows. "It's a very thoughtful she-devil. Who called you that?"

But, with the sight of the valise and the fear that they might be leaving, I thought it best not to quarrel. She had left the window. and going to her dressing table. had picked up her nail file

"Never mind!" I said. "I hope you are not going away. These floods don't last, and they're a ben-efit. Plen'y of the people around here rely on 'em every year to wash out their cellars."

"No. I'm not moing away," she replied lawly. "I'm taking that dross to Miss Hope at the theatre. She is going to wear it in "Char-lie's Aunt" next week. She harn't half enough of a wardrohe to play leads in stock. Look at this thumbnail, broken to the quick!" If I had only looked to see which thumh it was!

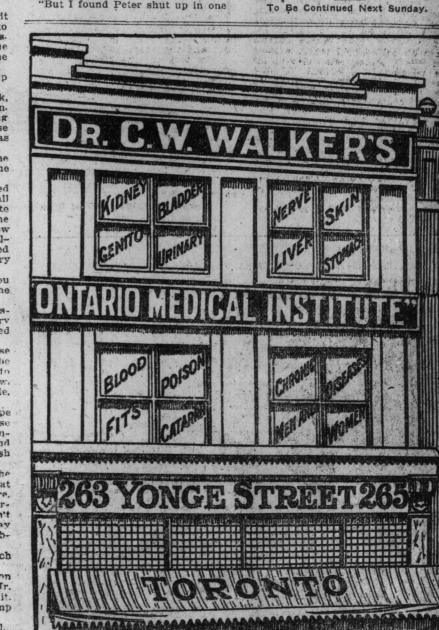

But J was putting the tea-tray on the wash-stand, and moving Mr. Lodlev's meners to find room for it. Peter, the moniel, hegged for a lump "Where is Mr. Ladley?" I ssked.

"Gone out to see the river." "I hope he'll be careful. There's a drowning or two every year in these floods." "Then I hope he won't," she said, calmiy..."Do yeu know what I was

very feet. Mr. Reynolds came back soon, and reported the house quiet and in order. "But I found Peter shut up in one

room from me, and to being called a she-devil. From that I got to thinking again about the Ladleys and how she had said he was a fiend, and to doubting about his having gone out for medicine for her. I dozed off again at daylight At seven o'clock Mr. Reynolds came to the door, dressed for the store. He was a tall man of about fifty, neat and orderly in his habit had seen better days, and treated me

as a lady. "Never mind about breakfast for me this morning, Mrs. Pitman," he said. "I'll get a cup of coffee at the other end of the bridge. I'll take the boat and send it back with Terry.' He turned and went along the hall and down to the boat. I heard him push off from the stairs with an car and row out into the street. Peter followed him to the stairs. At a quarter after seven Mr. Liac ley came out and called to me: "Just bring in a cup of coffee and some toast," he said. "Enough for

SUNDAY MORNING

A colored woman was arguing and arguing with her husband, and when she had finished he said, "Dinah, yo' talk don' affect me no mo' than a fica bite." "Well," she answored, "I'se gawna keep yo' scratchin'."

Unintertional. "I think the baby has your hair, ma'am," said the nurse girl, look-"Gracious!" exclaimed the lady, glancing up from her novel. "Run into the nursery and take it away from him. What will that child do next?"

That's What He Meant. "Dear me, I wish I had never learned to play cards!" exclaimed a man who had been unfortunate in his play. "You mean you wish you had learned, don't you?" was his wife's sarcastic reply.

How Father Spent Sunday.

The new parson was making pas-toral calls in his parish and stopped converse with a small boy at the garden gate.

"And where does your father go on Sundays, my little man?" "Well, on fine Sundays he goes

be a doctor, an' Josh is good-na-turedly hangin' around an' lettin' us fight it out among ourselves."

A Reminder. When the landlady brings my chicken

Then Shakspere I recall; For wasn't Bill the guy who said "Th' unkindest cut of all?"

How She Got Him. "I couldn't get out of marrying r," Henpeck explained. "When her." she proposed sho said, 'Will you marry me? Have you any objection?' You see, no matter whether I said 'Yes' or 'No,' she had me." "Why didn't you just keep silent, en?" inquired his friend. "That's what I did, and she said, then?" Silence gives consent,' and that ended it."

An Alibi.

An artist was one day showing a young woman over his studio. After she had critically examined all the pictures, she remarked, "I notice several sunsets among

your works, but not a single sunrise. How's that?"

The artist, who was rather holed or his Bohemian habits, blushed a little at the question and then stammered.

"You see, it's this way. To tell the truth, the reason I'vo not painted sunrise is because I'm never up at hat time."

A Sympathetic Drummer. "You don't make very good music with that instrument," said a bytander to the man with the bass rum, as the band ceased to play. "No," admitted the pounder of the rum, "I know I don't; but I drown heap of bad music."

Impassioned Youth: "Thou art ty love, my life, my heart, the very yes of me!" Now York Girl: "What is your icome?"

A PERFECT GENTLEMAN.

Landlady: "If you do not pay your bills, Mr. Maltravers how am I pay mine?" to Lodger: "Madam will at least admit that I have some delicacy. I

do not urge her to pay hers."

ENCOURAGEMENT. "Cheer up. mister! Reckon it'll furn to snow again fore mornin ."

only cook this egg once!" One day in the British Museum a guide was recounting to a little knot of visitors the glories of a battered centaur, when a Smithfield meat

salesman broke the reverent hush "Excuse me, sir. but what would they feed a bloke like that on-ham and eggs or hay?"

A Nonconformist minister wrote to ask leave of a Lancashire vicar to take a funeral service in the church-The courteous vicar wrote yard. back by return of post: "Dear Mr. Smith, please under-stand that I shall be delighted to see

you in our churchyard at any time."

The maid-of-all-work in the service of a provincial family, the mem-bers whereof are not on the most amicable of terms, recently tendered her resignation, much to the distress

of the lady of the house. "So you are going to leave us?" asked the mistress, sadly. "What's the matter, Mary? Haven't we al-ways treated you like one of the family

"Yis, mum," said Mary; "an' I've sthood it as long as I'm goin' to!"

Mr. Justice Darling was once trying a case in which the question arose whether the defendant, a vocalist, was competent to fulfil his contract. One of the witnesses said, in reply to Mr. Duke, K. C., "Well, he could not sing like the Archangel Gabriel."

"I have never heard the Archangel Gabriel," was the comment: Mr. Justice Darling replied bland-, with a gentle scarcasm, "That Mr. Duke, is a pleasure to come."

questions.

At the close of his talk before a Sunday-school the bishop invited A tiny boy, with white eager face. at once held up his hand.

"Please, sir," said he, "why was Adam never a baby?". The bishop coughed in doubt as to what answer to give, but a little gir! the eldest of several brothers and sisters, came promptly to his ald. "Please, sir," she unswered, smart-ly, "there was notody to nuss him."

"How are you today?" said a Scot-tish landlord to one of his tenants on meeting him on the road. "Vera weel, sir, vera weel," answered John, in his usual way, "gin it wisna for the rheumatism, in my richt leg."

"Ah, well, John, be thankful; for there is no mistake, you are getting old like the rest of us, and old age dwes not come alone."

does not come alone." "Auld age, sir!" rapiled John. "I won'er to hear ye. Auld age has naething to so wi't. Here's my ither leg jist as suld, an' it is guile sound and soople vet."

Not Crazy.

Friend: "Well Aunt Alice, how is your old man getting along?" Aunt Alice (whose husband is an inmate of the coldiers' home); "Po'ly. chile, po'ly. The only way they can keep him in the hospittle is by put-tin' a Mother Hubbard on him? He-

Mother Hubbard on him! jist wants to wander an' wander Friend: "Why, he is not crazy, is

he. Aunt Alice?" Aunt Alice: "No, chile, he is not crazy; he's jist done gone an' lost his min'. -

Real Humility.

Calvin: "Lhave my opinion of your rector. The idea of his preach-ing on humility! Why, he never gies to church excepting is an auto-Martin: "I know he doesn't; but he uses a 1910 machine."

ONE THING EXPLAINED. Younghub (who has borrowed iceman's scales to weigh new arrival) -Gee whiz! forty-one pounds!

children,"

at that price."

The lady gave him a glass of whiskey. After Sandy finished his glass, Kind Lady (to applicant): "I am he exclaimed: sure you would learn to love my

"Aweel, my lady, there was never sic a thing in my young days." "What." said the lady, in astonish-"Plenty whiskey?" "Plenty whiskey," but never sic a wee glass," replied Sandy.

The ear-guards worn by some play-

ers in Rugby football greatly puzzled two young ladies who saw them for the first aime.

"Whatever is that man wearing those funny flaps over his ears for?" one of them asked.

The other had not a ghost of an idea, but as she desired to convey the impression that she knew all about the game she replied at once: "Oh, that's so that he sha'n't hear what the others say when he kicks them!"

A lawsuit was recently in full swing, and during its progress a witness was cross-examined as to the habits and characters of the defendant

"Has Mr. M .--- a reputation for being abnormally lazy?" asked coun-sel. briskly.

"Well, sir, it's this way-"Will you kindly answer the ques-tion asked?" struck in the irascible

lawyer. Well, sir, I was going to say it's this way. I don't want to do the gentleman in question any injustice, and I won't go so far as to say, sir, that he's lazy exactly; but if it requ'red any voluntary work on his part to digest his food-why, he'd die from lack of nourishment, sir."

Mr. Charles Pond, who has just returned from Paris, where he has been filming his "Glimpses of Life," has tells a story of the "dog days" on the stock exchange.

A broker, brooding over the heavy expenses of maintaining his office. thought he would save money by having a cheap lunch. He wandered into a little restau-

rant off Cheapside and ordered a frugal meal costing a few pence. Looking up, he recognized in the waiter an old stock broker. "Halloa, Harry, have you come down to this?" he asked. "Oh, I'm all right. I only wait; I don't dine here!" was the reply.

A Fellow Feeling.

Wirst Burgley: "President Wilson wahits fo enfer the White Horse as simply and quietly as bossible." Second Burglar: "I" sympathize. with him." printing press Father Christmas Mrs. Chatterton (resignedly): "Yes. he has discovered he can get dirtier playing with it than with any present be ever had."

A Killing Anticipation. "Ere, Bill. wot's the matter? You're lookin' worrid." "Work---pothing but work from morning till night."

"'Ow long 'ave you been at it?" "I begin tomorrow."

Hark Luck. "Wasn't Jael' a suitor for Miss Richleigh's hand?" "Yes, but he didn't." "Didn't what?" "Suit her."

No Talk Lost "So Kate and Alice are not on speaking terms." "No; but they more than make u) for it by what they say about each other."

What Did She Mean? Teacher (to, pupil, who has been pulling another child's hair): "You are not fit to sit with decent prople. Come up here and sit with me."

And Modish. Too. Grace: "I'hear that the daintiest muslins are made from the fibres of the banana tree." Lulu: "Then they ought to be easy to slp on."

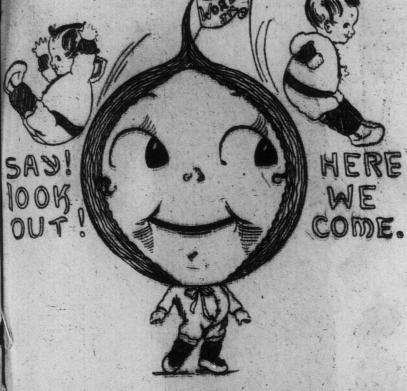

trawker: One peany the dying duck. The dying duck one penny HEBRY each. east Lady Purchaser: How much are they?

Hawker: Tuppence cach, lydy. Deaf Lady Purchaser: I 'eard yer the first time.

ADVENTURES OF THE TWINS AND GOOD KIND DOG MUTT. THE TWINS ENTER IN A RACE AND WHAT HAPPENS.

When the twins were visiting the really truly funny family, 'way down in Nova Scotia, there was a big race on the ice, a big race on skates, on the ice in the rink (a round rink), all for KIDS.

Well! just think! they were such fine skaters that they beat all the other youngsters, so the judges said, "All we can do now is to put these S.F.C. kids on the ice together and see what happens. Just read the rest of this:

The boys got on and off they went, Oh! my! to see them go! That they should beat the other kids,

Was odd, but it was so. ' Around they fly with lightning speed, The crowd begins to cheer;

But, my! they yelled too soon --- for look! What happens now? dear! dear!

Why! Johnnie strikes a snag, you see, And oh! right down he goes; First skins his shins, and barks his knees, Then BIFF! BANG! BUMP! his nose. Though suns he sees, and moons, and stars, Right up he gets once more, First SMILES all 'round, then off again, While all the people roar.

(Please excuse slang, but John was "some kid.")

But my! dear! dear! what happens next! John's mixed as mixed can be! Instead of going as before, He's skating back you see.

His brother skating on full tilt, And John not following on;

Then BIFF! BANG! BUMP! right into Mutt, The boys crash, oh! oh! oh! No wind was left in MUTT at all; 'Twas sad, but it was so.

John's turned right 'round and soon they'll

And then BIFF! BANG! they're gone. Poor Pa stands at the side, ah! me! He tears his hair and cries, "Will no one save my boys?""he yells, "They're here before your eyes."

Now Mutt, good dog, was there, of course, And great was his distress; He showed more brain than Pa or all, I really must confess.

For when he sees their awful plight, Upon the ice he jumps. And though he bangs his toes and nose, MUTT does not mind the bumps. Then right between the boys he stands, To see him stand so still, While John and Tom come flying on, Would give you quite a chill.

No wind was left in MUTT at all,

John was not hurt the slightest bit.

Twas sad, but it was so.

Then BIFF! BANG! BUMP! right into Mutt, The boys crash, on! on! on!

QUESTION MARK TELLS TURVEY WHY OLD PIGHAS SUCH A FUNNY FLAT NOSE AND KINKY TAIL.

Peterboro, Ont. Dalton Reid, Macleod, Alta.

And while You smile

And miles

Of smiles: And life's

SMILE.

Who is ever any better for crying? The forest was green around him. NOBODY; so why should we cry? If mother or father asks you to do a thing, why pout? You only feel bad-ly afterward. Do it with a SMILING The sky all over his head; His nest was in a hollow limb. And his children snug in bed. face; then everyone is happy. If you smile, why! mother SMILES, father SMILES, baby SMILES; and

He was doing a problem o'er and o'er, Busily thinking was he; How many nuts for his winter's store Could he hide in the hollow tree?

He sat so still on the swaying bough, You might have thought him asleep Oh, no; he was trying to reckon now The nuts the babies could eat.

Then suddenly he frisked about. And down the tree he ran; "The best way to do, without a doubt, Is to gather all I can."

-Annie Douglas Bell

I have here an original poem. I am

A dusty kitchen-

And dirty dishes

The cook at ease;

That never please.

Josephine Kaiser,

18 Dundonald street, Toronto,

sending in this little poem for the Smiling Face Club Page:

CROSS TOMMY.

The crossest child that ever was born

Is little Tommy Tiling; At night er noon, or early morn. He's never seen a-SMILING,

The Bessle tries so hard to please, And calls him "little darling": He acts as the she tried to tease-

His face is always snarling.

Now Bessie is the kindest maid That ever lived in Dapping.

Or, I'm very much afraid He'd get a good sound slapping.

the S. F. C. are like Cross Tommy.

Then home they went, and now they say He's really feeling fine.

and it is done this way: C. A. Macphie. If you are out in a boat or P.S.---Dear kind good Mutt is very fond of canoe with someone, and invalids' port wine----just INVALIDS'--- no this someone begins to jump other.

> her elbows on the table, and never passed anything. Fred Bad Manners always made a terrible noise with his lips, just exactly like a baby animal of some kind. And his bites! You would wonder how he ever succeeded in getting so much inside a rather small mouth. Bob Bad Manners always talked with food in his mouth, and the table. cloth near his plate looked more as if a baby had been eating there than a ten-year-old boy. Then Charlie Bad Manners always ate as if he had never before had enough to eat. He shovelled the food 'into his mouth with his knife just as fast as ever he could. Cordelia May never cared to ask for things. She was a very independent miss, so she just took her fork and speared for her potatoes or buns, and as she always left her

ing, because he was there first. He always wore his cap at the table, and wipe his mouth and hands on. Poor little Blanch was the young one feels very sad to see such ex-amples as she had set her. She mixed up her food and played in it and screamed for the things she

wished. The whole family picked their teeth after dessert and left the table one by one, without excusing them. selves

selves. Now, when Father Bad Manners took this family, or any one of them, out to a picnic or to a restaurant for a meal, they received such surprised glances from people. They were so used to their own manners, however, that they did not understand why people looked of them and why they people looked at them, and why they did not seem to be welcome any-where. They found fault with everything and blamed everyone but

nseives. I am glad my father and mother corrected my manners when they were not good, aren't you? Are you not glad you do not belong to that family circle?

LISTENING). You see in these days there are loads and loads and loads of hightrickalorums, but, you cannot tell them at first sight, as you did in those days, for this reason-their ears and

Don't You think I was no I think that I was.

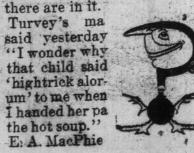

"No! No! what a silly thing you are!" howled hightrickalorum, and out he threw the third and last bag of sand, then guess what happened? (Now guess hard). Why !-- up the balloon shot just like a rocket and

first thing they knew they we're hanging right over the moon's big black mouth. "What have you done now ?" squealed poor old pig. "Oh! why did I go out with a high-

trickalorum?" "We can get back just as easy as wink." said hightrickalorum, tho his voice shivered like an aspen leaf (whatever

that is). "Now just watch me." And then guess what he did? (Now guess hard). Why! he pulled a big jack knife out of his pocket, cut a slit in the balloon bag as big as your head, and then guess what happened. (now guess hard). Why! OVER THE THING TURNED, out went hightrickalorum and old pig; down they fell over and over, and over, and over, and over till they hit the ground, or the ground hit them, either one.

Of course hightrickalorum was not hurt (hightrickalorums never are) but poor old pig's nice long nose was broken right off, leaving it flat, as it is today, and as for his tail, part of it was lost in the fall and you can see for yourself the awful twists and turns

Stories and Poems By Our anything for mother to pick up?" "Only my books, my hat and coat, and my dolls," said Mary. "Suppose someone put those things away for mother," said the little Little Readers With this Mary set to work and tidied up the whole house. She even As she saw the friend of her youth set the table. You can imagine Mrs. Well's joy when she found her house so nice "To play with the great big boys." Harold Percival Marmaduke Smith. and neat.

Up to the field marched he; ut his eye was blacked, and his head was whacked, And his ball no more did he see.

And the boys called him "Baby" be-Did Teddy and Willic and Jim; And they chased him away when he threatened to tell, And said they'd "no use for him."

Gwendolen Jones came down to the fence,

And her face was a joyful smile When Harold Percival Marmaduke He'd play with her "once in a while" -Martha Wiggins, age 12 years.

70-Gwynne Ave., Toronto, Can. Dear Sir: Will you please put this piece of poetry in the Children's Hour:

MARY'S LITTLE COLD. Mary had a little cold That started in her head. And everywhere that Mary went I hope that none of the members of

That cold was sure to spread. It followed her to school one day-There wasn't any rule; It made the children cough and

sneeze To have that cold in school. The teacher tried to drive it out; She tried hard, but-kerchool-It didn't do a bit of good.

For the teacher caught it, too. Sent in by Gladys Walker; 70 Gwynne avenue. Age 9 years.

A SURPRISE FOR MOTHER.

Once upon a time there lived a little girl named Mary. Now Mary was a girl that did not like to work. One day Mary's mother went out and Mary watched her going down the street. "Mother is tired and

By Gertrude M. Neil. There was Father Bad Manners,

Mother Bad Manners, and seven children. They were rather a lovely lot that is, they had to live much to themselves, for no one invited them out, on account of their ill man-

ners. Oh, it was really said to see, the manners of this family at the table. For one thing there were always some of them late. and the dinner grew cold, and then there was a scold about it. Little Mary Bad Manners always slumped in her chair or put

self "That fellow is a hightrickalorum." and find ice all over the doorstep when you get there, you "That fellow is a hightricka-

lorum." ing along with a green eyed,

his face, like our S.F.C. butspoon in her cup her collee was con-stantly getting upset. I think perhaps Donald Bad Man-ners, the eldest boy, was the worst. You see he had been longer in trainton, you may just say to yourself. "That fellow is a hightrickalorum." always wore his cap at the table, and if he was in a hurry he drank his soup, and when the next course came he scraped and scraped his plate so noisily. He could load his fork right to the handle. If his table napkin was not handy he just open and perhaps you may be able to tell a hightrickalorum at Second sight; but to get used the edge of the tablecloth to back to my story. est of the family, and the one does not expect as much from a little girl,

I have a little sister, they call her Peep, Peep; She wades in the water, deep, deep, She climbs up the mountain, high, high, high; My poor little sister has but one eye.

of this fashion page wears a charming and stylish suit that can be made for the reasonable

sum of twenty-two dollars, if fashioned of French brocaded crepe. This particular crepe is fifty-four inches wide. The suit requires about four and one-half yards at four dollars a yard, two yards of figured crepe de chine, for lining, at one dollar and a half a yard, and one-eighth of a yard of silk broadcloth, at four dollars a yard, for the collar.

The odd shaped hat worn with this costume is of black hemp, a large aigrette placed at an angle balances the brim, which is lifted on the right side.

The suit on figure number two is one well adapted for the young girl. If made at home of English corded eponge, it can be duplicated for about fourteen dollars. This material is forty-two inches wide, and sells for two dollars a yard. The suit requires five yards of the eponge. Crepe de chine at a dollar and a half a yard, thirty-six inches wide, will make a splendid lining. Two yards of this silk will line the suit. The collar is made of white crepe de chine at two dollars a yard, requiring but an eighth of a yard.

The charming little hat worn with this suit is of white straw, the crown is covered with yellow roses.³⁷ It is turned up at the back, a yellow rose, holding, the black velvet ribbon in place at each side; this ribbon 'forms a chin strap.

The parasol is a shirred affair, with a puffed flounce of chiffon satin.

3

~1

4

Figure three wears a most up todate suit, one which will be most correct for Spring wear. This suit made at home can be had for sixteen dollars, if shioned of English brocaded pique, two dollars a yard; it will take but four and a half yards, as it is fifty-two inches wide. Two yards of brocade lining at-two dollars a yard and one-half a yard of silk broadcloth at four dollars a yard will be needed for the collar and vest. The revers and collar of the coat are made of a yard of white pique at two dollars a yard.

2

The hat is one of the small shapes, high on one side, trimmed with a black aigrette and a band of black satin ribbon is used around the crown, tied in a small tailored bow at the side. The parasol is a very attractive one, made of white taffeta silk, in bands alternating with bands of black and pompadour ribbons.

Figure four. The hat on this figure is made of yellow straw, with a pleated edge of tulle. This hat extends high on one side, with a spray of roses, adding more height, and holding ribbon in place.

The suit can be duplicated for about twenty-six dollars. It requires five yards of forty-inch pure silk broadcloth at four dollars a yard, two yards of brocaded lining at two dollars a yard, one-half yard of creps de chine at two dollars a yard, for the tie and collar, one-eighth of a yard of creps de chine at two dollars a yard for the outer collar, and with the small findings it will amount to the cost mentioned.

5

Figure five. The hat worn by this figure is of green straw with black satin wings placed on the raised side. The suit can be made for about twelve dollars. Four yards of fortysix-inch French honeycomb ratine at one dollar and a half a yard, two yards of figured crepe de chine lining at one dollar and a half a yard, onehalf yard of brocaded silk at three dollars a yard for the vest, one-quarter of a yard of silk broadcloth at four dollars a yard for the collar, will be the materials required.
