

Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers / Couverture de couleur
- Covers damaged / Couverture endommagée
- Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- Cover title missing / Le titre de couverture manque
- Coloured maps / Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- Bound with other material / Relié avec d'autres documents
- Only edition available / Seule édition disponible
- Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.

Additional comments / Commentaires supplémentaires:

Various pagings.
Page 195 is incorrectly numbered page 19.
In Appendix No. 11 pagination is as follows: [1]-12, 61-70 p.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- Pages detached / Pages détachées
- Showthrough / Transparence
- Quality of print varies / Qualité inégale de l'impression
- Includes supplementary material / Comprend du matériel supplémentaire
- Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleure image possible.

JOURNAL
OF THE
PROCEEDINGS OF THE LEGISLATIVE COUNCIL
OF THE
PROVINCE OF NOVA SCOTIA.

THIRD SESSION OF THE TWENTY-THIRD GENERAL ASSEMBLY.

ANNO VICESIMO NONO VICTORIÆ REGINÆ.

AT HALIFAX, IN THE PROVINCE OF NOVA SCOTIA,
LEGISLATIVE COUNCIL CHAMBER.

Thursday, 22nd February, 1866.

THE General Assembly having been by Proclamation prorogued to this day,
the Council met.

PRESENT:

The Honorable EDWARD KENNY, President.

The Honorable

“ ROBERT M. CUTLER,
“ STAYLEY BROWN,
“ ALEXANDER KEITH,
“ HENRY G. PINO,
“ JAMES McNAB, Rec. Gen.
“ JONATHAN McCULLY,
“ RICHARD A. McHEFFEY.

The Honorable

“ JOHN HOLMES,
“ JOHN CREIGHTON,
“ JOHN H. ANDERSON,
“ WILLIAM C. WHITMAN,
“ FREEMAN TUPPER,
“ ARCHIBALD PATTERSON,
“ JOHN W. RITCHIE, Sol. Gen.

At two of the clock, P. M., His Excellency Sir WILLIAM FENWICK WILLIAMS, H. E. comes to Council Chamber.
of Kars, Baronet, Lieutenant-General in Her Majesty's Army, Knight, Com-
mander of the Most Honorable Order of the Bath, Grand Officer Legion
d'Honneur, First Class of the Turkish Order of Medjidee, &c., &c.; Lieutenant-
Governor and Commander-in-Chief in and over Her Majesty's Province of
Nova Scotia and its Dependencies, &c., &c., &c., came to the Council Chamber,
attended as usual, and being seated, the Gentleman Usher of the Black Rod
received His Excellency's command, to let the House of Assembly know,
“It is His Excellency's will and pleasure they attend him immediately in
this House,” who being come with their Speaker, His Excellency was pleased H. A. attend.
to open the Session with the following

SPEECH:

Mr. President, and Honorable Gentlemen of the Legislative Council:

Mr. Speaker, and Gentlemen of the House of Assembly:

1°. It affords me unfeigned satisfaction, in meeting, for the first time, the Speech.
Legislature of this my native Province, to be able to congratulate you upon a
condition of prosperity never before equalled in the history of the Colony.

2°. While we have enjoyed the blessings of peace and immunity from pestilence, the labors of the Husbandman and the Fisherman have been crowned with success; and the sale of Crown Lands, the development of our Coal and Gold Mines, the receipts from our Railways, and the Trade and Revenue of our Province, are greatly in excess of any preceding year.

3°. A soldier myself, and intimately connected with the organization of the Volunteer movement both in Great Britain and in this Province, you can well understand the deep gratification it has afforded me to find the spirited manner in which my countrymen have responded, by the organization of a Militia Force so efficient, to the call to prepare for any emergency which may at any time demand stout hearts and trained arms for the defence of the inestimable privileges we enjoy as subjects of the Crown of Britain.

Mr. Speaker, and Gentlemen of the House of Assembly:

4°. The Public Accounts will shortly be placed before you. The Estimates for the year will be prepared with as much regard to economy as due consideration for the interests of the country will permit.

Mr. President, and Honorable Gentlemen of the Legislative Council:

Mr. Speaker, and Gentlemen of the House of Assembly:

5°. You will learn with regret that, notwithstanding the united efforts of the British North American Colonies, the Government of the United States have adhered to their determination to abrogate the arrangements for Reciprocal Trade which have for the past eleven years contributed so largely to the harmony and commercial prosperity of both the neighboring Republic and these Colonies; but I am sanguine that by mutual aid and coöperation among the Provinces, and under the fostering care of the Mother Country, the trade of British North America may be so directed into new channels, and our valuable fisheries so protected, as to meet the emergency thus forced upon us and avoid any material commercial inconvenience. The correspondence upon this subject will be submitted to you.

6°. You will be gratified to be informed that the efforts to represent the products of this Province at the Dublin Exhibition resulted very favorably—a large number of medals having been awarded to our exhibitors; and from the necessity which now exists to make known as widely as possible the great natural resources of these Provinces, you will, I doubt not, make suitable provision for the due representation of Nova Scotia at the great International Exhibition to take place in Paris in 1867.

7°. Contracts, based upon the legislation of last Session, have been entered into during the recess of Parliament for the extension of the Railways from Truro to the border of New Brunswick, and from Windsor to Annapolis. These documents, and the papers connected therewith, will be laid before you at an early day.

8°. In accordance with instructions received from Her Majesty's Government, circulars were transmitted to the persons in charge of all the Prisons in the Province, making enquiries as to their condition. These documents, with the answers to the enquiries made, will be submitted for your consideration; and I will be glad if some means should be devised for the due inspection of all places of imprisonment, in order to promote an improvement in the system and uniformity of discipline.

9°. Your attention will also be invited to the important question of Immigration, in the hope that a larger number of those seeking a new home may be made acquainted with the great advantages which are here offered to industry, capital, or skill.

10°. I confidently hope that, deeply impressed with the gratitude due to a beneficent Providence for the blessings so liberally bestowed during the past year, your united deliberations will result in promoting the continued prosperity of this highly favored land.

The House of Assembly then withdrew, and His Excellency was pleased to retire soon after.

The Solicitor General presented a Bill to amend Chapter 154 of the Revised Statutes, "Of the Limitation of Actions,"—which was read a first time. Bill pro forma read.

Ordered, That the said Bill be read a second time at a future day.

The President reported His Excellency's Speech, and the same being read by the Clerk, Speech reported.

Mr. Holmes moved, that an Address be presented to His Excellency in answer to his Speech, which he read in his place, and afterwards delivered it to the Clerk, who read the same as follows:— Address in answer moved.

To His Excellency

SIR WILLIAM FENWICK WILLIAMS,

Of Kars, Baronet, Lieutenant General in Her Majesty's Army; Knight, Commander of the Most Honorable Order of the Bath; Grand Officer Legion d'Honneur; First Class of the Turkish Order of Medijee, &c., &c.; Lieutenant Governor and Commander-in-Chief in and over Her Majesty's Province of Nova Scotia, and its Dependencies, &c., &c., &c.

THE ADDRESS OF THE LEGISLATIVE COUNCIL.

MAY IT PLEASE YOUR EXCELLENCY:

1. The Legislative Council thank Your Excellency for the Speech with which you have opened the present Session, and is gratified that the commencement of your administration of the Government of your native Province should be marked by great prosperity. Address.

2. The Legislative Council learns with satisfaction, that while the country has enjoyed the blessings of peace and immunity from pestilence, success has attended the labors of the Husbandman and Fisherman, and that the sale of Crown Lands, the development of the Coal and Gold Mines, the receipts from the Railways and the Trade and Revenue, are in excess of preceding years.

3. Connected as Your Excellency has been with the Volunteer movement both in Great Britain and this Province, and so well qualified as you are to form an opinion on the subject, the Legislative Council is pleased to learn the expression of your gratification at the manner in which your countrymen have responded to the call to prepare for any emergency which may call them forth in defence of their country, and of those inestimable privileges which they enjoy as subjects of Her Majesty.

4. The Legislative Council learns with regret that the Government of the United States have adhered to their determination to abrogate the arrangements for Reciprocal Trade between that Country and the British North American Provinces, but concur with Your Excellency in the belief, that by coöperation among the Provinces, and under the fostering care of the Mother Country, the Trade of British America will be diverted into new channels, and our valuable Fisheries will be so protected that any serious commercial inconvenience will be avoided.

5. The information afforded by Your Excellency that the efforts to represent the products of the Province at the Dublin Exhibition, have resulted favorably, is gratifying to the Council; and any measures calculated to make known abroad the natural resources of the Province, shall meet with its favorable consideration.

6. The Legislative Council is pleased to hear that contracts, based on the legislation of the last Session, have been entered into for the extension of the Railways from Truro to the border of New Brunswick, and from Windsor to Annapolis.

7. The documents connected with the inquiries made into the state of our Prisons, when laid before the Council, and any measure which may be calculated to promote the improvement of the system of discipline in these Institutions, will receive due consideration.

8. As soon as the subject of Immigration is brought before the Legislative Council, it will receive the attention which its importance demands.

9. The Legislative Council joins Your Excellency in expressing gratitude to God for the blessings so liberally bestowed during the past year; and Your Excellency may be assured that no exertion will be spared to promote by all means in its power the welfare of this highly favored land.

Ordered, That the said Address be read a second time, at a future day.

Com. on Reporting.

Ordered, That Mr. McCully, Mr. Brown, and the Solicitor General, be a Committee to consider and report to the House the arrangements for Reporting and Publishing the Debates of this House for the present Session.

Adjourn.

On motion, made and seconded, the House adjourned until to-morrow, at half-past two o'clock.

Friday, 23rd February.

The House met pursuant to adjournment.

PRESENT :

The Honorable EDWARD KENNY, President.

The Honorable

" ROBERT M. CUTLER,
 " STAYLEY BROWN,
 " ALEXANDER KEITH,
 " HENRY G. PINEO,
 " JAMES McNAB, Rec. Gen.
 " JONATHAN McCULLY,
 " RICHARD A. McHEFFEY,

The Honorable

" JOHN HOLMES,
 " JOHN CREIGHTON,
 " JOHN H. ANDERSON,
 " WILLIAM C. WHITMAN,
 " FREFMAN TUPPER,
 " ARCHIBALD PATTERSON,
 " JOHN W. RITCHIE, Sol. Gen.

PRAYERS.

The Minutes of yesterday were read.

Address read 2nd time.

The Address to His Excellency the Lieutenant Governor, in answer to his Speech, was read a second time.

Committed.

Ordered, That the said Address be committed to a Committee of the whole House presently.

Report.

On motion, the House was adjourned during pleasure, and put into a Committee on the said Address. After some time the House was resumed, and Mr. Cutler reported that the Committee had gone through the said Address, and had agreed to the same without any amendment.

Motion to re-commit.

Whereupon, Mr. Anderson moved that the said Address be recommitted to a Committee of the whole House for the purpose of amending the same, by leaving out the sixth clause, and inserting instead the following clause :

" So soon as the contracts, based upon the Railway legislation of last Session, and the papers connected therewith, are submitted to the Legislative Council, they shall receive the consideration their importance demands."

Which being seconded,—and the question being put by the President :

Whether this motion be agreed to ?

There appeared for the motion, five ; against the motion, nine.

For the motion.

Mr. Anderson,
 " McCully,
 " McHefey,
 " Patterson,
 " Tupper.

Against the motion.

The Receiver General,
 Mr. Pineo,
 " Brown,
 " Creighton,
 " Whitman,
 " Holmes,
 The Solicitor General,
 Mr. Keith,
 " Cutler.

So it passed in the negative.

Negatived.

Ordered, That the said Address be read a third time presently.

The said Address was read a third time, and the question was put by the President? Address read 3rd time.

Whether this Address be agreed to?
 It was resolved in the affirmative.

Agreed to.

Ordered, That the said Address be presented to His Excellency by the whole House. To be presented by House.

Ordered, That the Solicitor General be a Committee to wait upon His Excellency and ascertain when he will be pleased to receive this House with their Address. Com. to wait on H.E.

The Solicitor General reported that he had waited upon His Excellency, and that His Excellency had been pleased to name the hour of Twelve o'clock, at noon, to-morrow, for receiving this House with their Address. Report.

On motion, made and seconded, the House adjourned until to-morrow, at eleven o'clock. Adjourn.

Saturday, 24th February.

The House met pursuant to adjournment.

PRESENT:

The Honorable EDWARD KENNY, President.

The Honorable

" ROBERT M. CUTLER,
 " STAYLEY BROWN,
 " ALEXANDER KEITH,
 " HENRY G. PINEO,
 " RICHARD A. MCHEFFEY,
 " JOHN HOLMES.

The Honorable

" JOHN CREIGHTON,
 " JOHN H. ANDERSON,
 " WILLIAM C. WHITMAN,
 " FREEMAN TUPPER,
 " ARCHIBALD PATTERSON,
 " JOHN W. RITCHIE, Sol. Gen.

PRAYERS:

The Minutes of yesterday were read.

At Twelve o'clock, at noon, the House proceeded to the Government House with their Address to His Excellency the Lieutenant-Governor in answer to his Speech at the opening of the Session, and being returned to the Council Chamber, the President reported, that His Excellency had been pleased to receive the said Address, and to make the following Reply thereto: House wait on H.E. with Address.

Mr. President, and Honorable Gentlemen of the Legislative Council:

Reply. I thank you most sincerely for your loyal Address, and assure you that it will be my pleasure, and my object, to afford every aid towards your important duties in the Legislature of this Province.

W. F. WILLIAMS.

Adjourn. On motion, made and seconded, the House adjourned until Tuesday, at half-past two o'clock.

Tuesday, 27th February.

The House met pursuant to adjournment.

PRESENT:

The Honorable EDWARD KENNY, President.

The Honorable

" ROBERT M. CUTLER,
 " STAYLEY BROWN,
 " ALEXANDER KEITH,
 " HENRY G. PINEO,
 " JAMES McNAB, Rec. Gen.
 " JONATHAN McCULLY,
 " RICHARD A. McHEFFEY.

The Honorable

" JOHN HOLMES,
 " JOHN CREIGHTON,
 " JOHN H. ANDERSON,
 " WILLIAM C. WHITMAN,
 " FREEMAN TUPPER,
 " ARCHIBALD PATTERSON,
 " JOHN W. RITCHIE, Sol. Gen.

PRAYERS.

The Minutes of Saturday were read.

Message from H. E.
 with

PRAYERS.

The Minutes of Wednesday were read.

The Solicitor General, by the command of His Excellency the Lieutenant-Governor, laid before the House—

The following Despatch and Papers relative to Colonial Naval Defence:
Despatch (Circular), dated 19th May, 1865, from the Secretary of State for the Colonies;

Copy of Act, 29 Victoria, Chapter 14, entitled, "An Act to make better provision for the Naval Defence of the Colonies";

Letter, dated 10th May, 1865, from Mr. Romaine to Sir Frederick Rogers.

(*Appendix — Colonial Naval Defence.*)

Also, the following Despatches relative to Naval Cadets:

Despatch (Circular), dated 22nd December, 1865, from the Secretary of State for the Colonies;

Despatch (Circular), dated 28th October, 1865, from the Secretary of State for the Colonies;

(*Appendix — Naval Cadets.*)

Also, the following Despatch and Treaty between Her Majesty and the Zollverein Treaty. Zollverein of Germany:

Despatch (Circular), dated 31st July, 1865, from the Secretary of State for the Colonies; with

Copy of Treaty with the Zollverein.

(*Appendix — Zollverein Treaty.*)

Also, a Despatch, dated 26th December, 1865, from the Secretary of State for the Colonies, as to the mode of verifying legal documents for use in Foreign Countries passing through the Colonial Department.

(*Appendix — Verifying Documents at Colonial Office.*)

Also, the Accounts of the Halifax Poores' Asylum.

Which were read, and ordered to lie on the table.

A message was brought from the House of Assembly, by Mr. Twining, with the following Resolution:

Resolved, That Mr. Jost, Mr. E. L. Brown, Mr. John Campbell, Mr. McLelan, and Mr. McDonald, be a Committee to join a Committee of the Legislative Council to examine the Public Accounts.

The Messenger also brought up the following Bill:

A Bill, entitled, An Act to incorporate the Windsor and Annapolis Railway Company.

To which Bill they desired the concurrence of this House.

The said Bill was read a first time.

Ordered, That the said Bill be referred to a Select Committee to examine and report upon.

Ordered, That Mr. Dickey, the Solicitor General, and Mr. Whitman be a Committee for that purpose.

On motion, *resolved*, That Mr. Brown, Mr. Patterson, and Mr. Holmes be a Committee of this House to join a Committee of the House of Assembly to examine the Public Accounts, and that the Clerk do acquaint the House of Assembly therewith.

The President informed the House, that he had received a letter from the Hon. Mr. Comeau, stating that continued indisposition prevented his attendance in his seat in this House, but that, if it was absolutely necessary he should be present, he would, if possible, attend.

On motion, made and seconded, the House adjourned until Monday, at half-past two o'clock.

 " ARCHIBALD PATTERSON,
 " JOHN W. RITCHIE, Sol. Gen.

PRAYERS.

The Minutes of yesterday were read.

Chap. 154: Limitation
 Actions Bill, read
 2nd time.
 Referred.

A Bill, entitled, An Act to amend Chapter 154 of the Revised Statutes, "Of the Limitation of Actions," was read a second time.

Ordered, That the said Bill be referred to a Select Committee to examine and report upon.

Committee.

Ordered, That Mr. Dickey, Mr. McCully, and Mr. Creighton be a Committee for that purpose.

Com. on Bills.

On motion, the House was adjourned during pleasure, and put into a Committee on Bills. After some time the House was resumed, and Mr. McHeffey reported that the Committee had made some progress.

Report Windsor and
 Annapolis Railway
 Co. Bill without am.

The Chairman also reported that the Committee had gone through a Bill, entitled, An Act to incorporate the Windsor and Annapolis Railway Company, and had agreed to the same without any amendment.

Motion to defer Bill.

Whereupon, Mr. McCully moved the following Resolution :

Whereas, This Province owes a debt of Four Millions of Dollars for Railway Construction, exclusive of the Contracts entered into for finishing the Pictou Branch, amounting to Two Millions One Hundred and Sixteen Thousand Dollars, imposing an annual burden upon this Country of Three Hundred and Sixty-six Thousand Nine Hundred and Sixty Dollars: And, *whereas,* the Bill, entitled, An Act to incorporate the Windsor and Annapolis Railway Company, creates a further liability of Eighty-one Thousand and Six Hundred Dollars for a period of twenty years, in all Four Hundred and Ninety-eight Thousand Five Hundred and Sixty Dollars, or nearly one half of the entire revenue of the Province: And, *whereas,* the Reciprocity Treaty between the British North American Provinces and the United States of America expires on the Seventeenth day of March instant, and will probably for some time derange trade, and tend materially to decrease the current revenues of the Province: *Resolved,* in the opinion of this House, that it is unwise and inopportune at the present time so largely to increase the public burdens of the Province, and that the further consideration of this Bill be deferred for three months.

Which being seconded, and the question being put by the President, there appeared for the Resolution, five; against the Resolution, ten:

For the Resolution:

Mr. Anderson,
 McCully,
 Patterson,
 McHeffey,
 Tupper.

Against the Resolution:

The Receiver General,
 Mr. Dickey,
 Pineo,
 Brown,
 Whitman,
 Mr. Holmes,
 The Solicitor General,
 Mr. Keith,
 Cutler,
 The President.

Negatived.

So it passed in the negative.

Ordered, That the said Report be received, and the said Bill be read a third time, at a future day. Report received.

A message was brought from the House of Assembly, by Mr. Twining, with the following Resolution :

IN THE HOUSE OF ASSEMBLY,
5th March, 1866.

Resolved, That the Hon. the Provincial Secretary, Mr. Archibald, and the Hon. the Attorney General be a Committee to join a Committee of the Legislative Council to prepare the Address to Her Majesty on the subject of the protection of the Shore Fisheries. Com. of H.A. prepare Address on Shore Fisheries.

HENRY C. D. TWINING,
Clerk of Assembly.

A message was brought from the House of Assembly, by Mr. Tobin, with the following Bills :

1. A Bill, entitled, An Act to incorporate the New York and Cape Breton Coal Company; New York and Cape Breton Coal Co.
2. A Bill, entitled, An Act to amend the Act to incorporate the International Coal and Railway Company, and the Acts in amendment thereof; International Coal and Railway Co.
3. A Bill, entitled, An Act to incorporate the Collins Coal Company; Collins Coal Co.
4. A Bill, entitled, An Act to amend the Act to incorporate the Boston and Bridgeport Coal Mining Company; Boston and Bridgeport Coal Co. and
5. A Bill, entitled, An Act to incorporate the Acadia Lodge of Freemasons, Pugwash. Acadia Lodge Freemasons, Pugwash, Bills,

To which bills they desired the concurrence of this House.

The said Bills were read a first time. Read 1st time.

Ordered, That the four first Bills be referred to a Select Committee to examine and report upon. Coal Bills referred.

Ordered, That Mr. Brown, Mr. Dickie, and Mr. Archibald be a Committee for that purpose. Committee.

Ordered, That the fifth Bill be read a second time, at a future day.

The Solicitor General, the Chairman of the Committee of this House appointed to join a Committee of the House of Assembly in preparing an Address to Her Majesty for the protection of the Shore Fisheries, reported the draft of an Address, which he read in his place, and afterwards delivered it to the Clerk, who read the same as follows: Address to H. M. on Protection of Shore Fisheries reported.

To the Queen's Most Excellent Majesty,

THE HUMBLE ADDRESS OF THE LEGISLATIVE COUNCIL AND HOUSE OF ASSEMBLY OF NOVA SCOTIA.

MAY IT PLEASE YOUR MAJESTY—

We, Your Majesty's dutiful and loving subjects, the Legislative Council and House of Assembly of Nova Scotia, in Provincial Parliament assembled, would respectfully beg Your Majesty's gracious consideration of the important subject of the efficient protection of our Fisheries, which will be rendered necessary by the abrogation of the Reciprocity Treaty with the United States on the seventeenth day of March instant. Address.

Under the provisions of that Treaty subjects of the United States are allowed to prosecute the in-shore Fisheries along our Coasts, in common with our own people; and a very large number of vessels, owned and manned by United States citizens, have been engaged, since the ratification of that Treaty, in this branch of industry.

With the termination of the Treaty, their right to participate in these Fisheries will expire; but we have reason to fear, that a pursuit, which has engaged so much capital and given employment to so many men, will not be abandoned when the right to prosecute it ceases.

While this Province is ready to contribute to the utmost of its ability to the protection of these Fisheries, we would respectfully submit to Your Majesty that the means in its possession are obviously inadequate for the purpose, and that the rights of Your Majesty's loyal subjects can only be effectually protected and upheld by the assistance of an Imperial naval force.

We would, therefore, humbly pray, that Your Majesty would be pleased to direct such measures may be taken as will effectually prevent the encroachment of Foreigners upon our fishing grounds, and will fully protect those rights which we consider to be of the most vital importance to the prosperity of our Country.

Trusting that Your Majesty will be pleased to give to the subject of this Address your grave and gracious consideration, the Legislative Council and House of Assembly, as in duty bound, will ever pray, &c.

Ordered, That the said Address be received and adopted.

Ordered, That an Address be presented to His Excellency the Lieutenant-Governor, requesting His Excellency to forward the foregoing Address to Her Majesty to Her Majesty's Principal Secretary of State for the Colonies, to be laid at the foot of the Throne, with His Excellency's recommendation of the prayer thereof.

Ordered, That the Committee of this House who prepared the Address to Her Majesty be a Committee to join a Committee of the House of Assembly in preparing the Address to His Excellency the Lieutenant-Governor.

On motion, made and seconded, the House adjourned until to-morrow, at half-past two o'clock.

Friday, 9th March.

The House met pursuant to adjournment.

PRESENT:

The Honorable EDWARD KENNY, President.

S. O. S.

Resolved, unanimously, That the Standing Order of this House, number 72, relative to Bills not being read or proceeded with twice in the same day, be suspended as respects the said Bills.

Bills read 3rd time.

The said Bills were read a third time; and the question was put by the President, on each Bill:

Whether this Bill shall pass?

It was resolved in the affirmative.

Agreed to,

And sent to H. A.

A message was sent to the House of Assembly, by the Clerk,—

To return the said Bills, and acquaint them that this House has agreed to the same, without any amendment.

Rep. New York and
C. B. Coal Co. Bill,
with amds.

The Chairman also reported that the Committee had gone through a Bill, entitled, An Act to incorporate the New York and Cape Breton Coal Company, and had made several amendments thereto.

Amds. read,

The said amendments were read by the Clerk, as follows:

THIRD CLAUSE—2nd line.—After the word, "stock," insert the words, "to an amount not exceeding in all one million of dollars."

EIGHTEENTH CLAUSE—9th line.—After the word, "Company," leave out the remainder of the clause.

At the end of the Bill, add the following clauses:

"The books and accounts of the Company shall, at all times, be open to the examination of such persons as the Governor in Council shall appoint to inspect the same.

"This Act shall cease and determine if effective works shall not be commenced and continued under it within two years from its passing."

And agreed to.

And the said amendments being read a second time, were agreed to by the House.

Ordered, That the said Bill be read a third time, at a future time.

Report Collins Coal
Co. Bill, with amds.

The Chairman also reported that the Committee had gone through a Bill, entitled, An Act to incorporate the Collins Coal Company, and had made several amendments thereto.

Amds. read,

The said amendments were read by the Clerk, as follows:

THIRD CLAUSE—3rd line.—After the word "shares," insert the words, "to an amount not exceeding in all five hundred thousand dollars."

SEVENTH CLAUSE—7th line.—After the word "Company," leave out all the words to the word "nor," in the twelfth line.

At the end of the Bill, add the following clauses:

"The books and accounts of the Company shall, at all times, be open to the examination of such persons as the Governor in Council shall appoint to inspect the same.

"This Act shall cease and determine if effective works shall not be commenced and continued under it within two years from its passing."

And agreed to.

And the said amendments being read a second time, were agreed to by the House.

Ordered, That the said Bill be read a third time, at a future time.

Resolved, unanimously, That the Standing Order of this House, number 72, s. o. s. relative to Bills not being read or proceeded with twice in the same day, be suspended as respects the two last mentioned Bills.

The said Bills were read a third time; and the question was put by the President, on each Bill: Bills read 3rd time.

Whether this Bill, with the amendments, shall pass?

It was resolved in the affirmative.

Agreed to with am.

A message was sent to the House of Assembly, by the Clerk,—

And sent to H. A.

To return the said Bills, and acquaint them that this House has agreed to the same, with amendments, to which amendments their concurrence is desired.

The Solicitor General, the Chairman of the Committee of this House appointed to join a Committee of the House of Assembly to prepare an Address to His Excellency the Lieutenant-Governor, requesting His Excellency to forward the joint Address of this House and the House of Assembly to Her Majesty, soliciting Imperial aid in the protection of the Fisheries, reported the draft of an Address, which he read in his place, and afterwards delivered it to the Clerk, who read the same as follows:

Com. report Address to H. E. relative to Fisheries.

TO HIS EXCELLENCY

SIR WILLIAM FENWICK WILLIAMS,

Of Kars, Baronet, Lieutenant General in Her Majesty's Army; Knight, Commander of the Most Honorable Order of the Bath; Grand Officer Legion d'Honneur; First Class of the Turkish Order of Medjidee, &c., &c.; Lieutenant Governor and Commander-in-Chief in and over Her Majesty's Province of Nova Scotia, and its Dependencies, &c., &c., &c.

MAY IT PLEASE YOUR EXCELLENCY—

The Legislative Council and House of Assembly have passed the accompanying Address to Her Majesty the Queen, soliciting Imperial aid in the protection of the Fisheries on the Coasts of British North America, and they respectfully request Your Excellency to forward the Address to Her Majesty, with Your Excellency's most favorable recommendation. Address.

Ordered, That the said Address be received and adopted.

Ordered, That the Committee of this House who prepared the said Address be a Committee to join the Committee of the House of Assembly to present the said Addresses to His Excellency the Lieutenant-Governor. Com. to present.

The Minutes of Monday were read.

II. A. agree to some
 and not other am. to
 Collins Coal, and
 New York and Cape
 Breton Coal Co.
 Bills.

A message was brought from the House of Assembly, by Mr. Tobin, with
 A Bill, entitled, An Act to incorporate the Collins Coal Company; also,
 A Bill, entitled, An Act to incorporate the New York and Cape Breton Coal
 Company;

And to inform the House that the House of Assembly agreed to the first,
 third, and fourth amendments to the said Bills, and did not agree to the second
 amendment proposed thereto.

2nd amdt. to Collins
 Coal Co. Bill con-
 sidered.

On motion, the House proceeded to the consideration of the second amend-
 ment proposed to a Bill, entitled, An Act to incorporate the Collins Coal Com-
 pany, which has not been agreed to by the House of Assembly.

Amdt. read,

The said amendment was read by the Clerk, as follows:

SEVENTH CLAUSE—9th line.—After the word "Company," leave out all the
 words to the word "nor," in the 17th line.

Which words are as follows:

"But no stockholder, who may have transferred his interest in the stock of
 the Company, shall cease to be liable for any contracts of the Company entered
 into before the date of such transfer, unless he shall have paid up in full for
 his stock, so as any action in respect of such liability shall be brought within
 six months after such transfer."

And not adhered to.
 Message to II. A.

On motion, *resolved*, That the said amendment be not adhered to.

A message was sent to the House of Assembly, by the Clerk,—

To return the said Bill, and acquaint them that this House does not adhere
 to the second amendment proposed to the said Bill, but agrees to the same as
 otherwise amended.

2nd am. to New York
 and C. Breton Coal
 Co. Bill considered.

On motion, the House proceeded to the consideration of the second amend-
 ment proposed to a Bill, entitled, An Act to incorporate the New York and
 Cape Breton Coal Company, which amendment has not been agreed to by the
 House of Assembly.

Amdt. read,

The said amendment was read by the Clerk, as follows:

EIGHTEENTH CLAUSE—9th line.—After the word "Company," leave out the
 remainder of the clause.

The words proposed to be left out being as follows:

"But no stockholder, who may have transferred his interest in the stock of
 the Company, shall cease to be liable for any contracts of the Company entered
 into before the date of such transfer, unless he shall have paid up in full for
 his stock, so as any action in respect of such liabilities shall be brought within
 six months after such transfer."

On motion, *resolved*, That the said amendment be not adhered to.
 A message was sent to the House of Assembly, by the Clerk,—
 To return the said Bill, and acquaint them that this House does not adhere to the second amendment proposed to the said Bill, but agrees to the same as otherwise amended.

And not adhered to.
 Message to H.A.

The Solicitor General, by the command of His Excellency the Lieutenant-Governor, laid before the House—
 The Report of the Registration of Marriages, Births, and Deaths for the year ended 30th September, 1865.

Message from H. E. with
 Report Marriages, Births, and Deaths.

(*Appendix — Marriages, Births, and Deaths.*)

Also, the Report on Immigration, dated 17th February, 1866.

Immigration.

(*Appendix — Immigration.*)

The said Reports were read, and ordered to lie on the table.

PRAYERS.

The Minutes of Wednesday were read.

Report of Com. to
present Address to
H. E. on Fisheries.

The Solicitor General, the Chairman of the Committee of this House appointed to join a Committee of the House of Assembly to present to His Excellency the Lieutenant-Governor the joint Address of the Legislative Council and House of Assembly to Her Majesty soliciting Imperial aid for the protection of the Fisheries, and also the joint Address to His Excellency requesting him to forward the Address to Her Majesty to Her Majesty's Principal Secretary of State for the Colonies, to be laid at the foot of the Throne, with his favorable recommendation, reported that the joint Committee had performed that duty, and that His Excellency had been pleased to state he would forward the Address by the earliest opportunity.

Com. on Reporting
report.

Mr. McCully, the Chairman of the Committee of this House appointed to consider and report to the House the arrangements for Reporting and Publishing the Debates of this House for the present Session, made his report, which he read in his place, and afterwards delivered it to the Clerk, who read the same as follows:

Report.

The Committee appointed to report on the subject of the Reporting and Publishing the Debates of the Legislative Council, have attended to that duty, and recommend that the arrangements of the last Session be continued, and the same parties employed, and at the same rates.

All which is respectfully submitted.

J. McCULLY,
Chairman.

Committee Room, 16th March, 1866.

Adopted.

Ordered, That the said Report be received and adopted.

Church of England
Ministers Bill
read 1st time.

The Solicitor General presented a Bill to authorize the exercise of Clerical Functions within this Province by persons ordained by Bishops consecrated under the Act of the Imperial Parliament, 26 George III. Chapter 84, for empowering the Consecration to the office of Bishops of persons being citizens of Foreign Countries,—which was read a first time.

Referred.

Ordered, That the said Bill be referred to a Select Committee to examine and report upon.

Committee.

Ordered, That the Solicitor General, Mr. Dickey, and Mr. McCully be a Committee for that purpose.

Trusts Hfx. Grammar
School read 1st time.

Mr. McCully presented a Bill to declare the Trusts upon which the property known as the Halifax Grammar School shall be held, which was read a first time.

Ordered, That the said Bill be read a second time, at a future day.

Adjourn.

On motion, made and seconded, the House adjourned until Monday, at half-past two o'clock.

Monday, 19th March.

The House met pursuant to adjournment.

PRAYERS.

The Minutes of Friday were read.

The Solicitor General, by the Command of His Excellency the Lieutenant-Governor, laid before the House the following Proclamation, issued by His Excellency, calling out the Militia :

Message from H. E. with Proclamation calling out Militia.

PROCLAMATION!

BY HIS EXCELLENCY

SIR WILLIAM FENWICK WILLIAMS,

Of Kars, Baronet, Lieutenant General in Her Majesty's Army; Knight, Commander of the Most Honorable Order of the Bath; Grand Officer Legion d'Honneur; First Class of the Turkish Order of Medjidee, &c., &c.; Lieutenant Governor and Commander-in-Chief in and over Her Majesty's Province of Nova Scotia, and its Dependencies, &c., &c., &c.

[L.S.]

W. F. WILLIAMS.

WHEREAS, a Hostile Invasion of the Provinces of Nova Scotia and New Brunswick is threatened, by which the lives and property of Her Majesty's subjects therein may be put in jeopardy, and preparations are necessary to repel such Invasion, if made.

And, Whereas, in such an emergency I am by Law authorized and required to call out the Militia Force of Nova Scotia in aid of Her Majesty's Regular Forces for its defence :

I do hereby command and require all Officers, Non-commissioned Officers, and Privates of the Militia Force of Nova Scotia, and all persons liable to perform Militia Duty in said Province, to turn out for actual service as in time of war, according to Law, and subject, in failure so to do, to the pains, penalties, and forfeitures thereby imposed and provided.

Of which all persons interested will take notice and govern themselves accordingly.

Given under my Hand and Seal, at Halifax, this Seventeenth day of March, in the year of our Lord One Thousand Eight Hundred and Sixty-six, and in the Twenty-ninth year of Her Majesty's Reign.

By command of His Excellency the Lieutenant Governor and Commander-in-Chief.

CHARLES TUPPER.

GOD SAVE THE QUEEN.

The same was read, and ordered to lie on the table.

Com on International
Coal and Railway
Co. Bill report.

Mr. Brown, the Chairman of the Committee to whom a Bill, entitled, An Act to amend the Act to incorporate the International Coal and Railway Company, and the Acts in amendment thereof, was referred, reported that the Committee had examined the said Bill, and recommended it to the favorable consideration of the House.

Bill read 2nd time.

The said Bill was read a second time.

And ordered to Com.

Ordered, That the said Bill be committed to a Committee of the whole House at a future day.

Resolut'n approving
calling out Militia.

The Solicitor General moved the following Resolution:

Resolved, That this House approves of His Excellency the Lieutenant-Governor having called out the Militia for the defence of the Province, and will cheerfully concur with the House of Assembly in making provision for any expenditure required for that purpose.

Agreed to unani-
mously.

Which being seconded, and the question being put by the President, was agreed to unanimously.

To be presented to
His Excellency by
whole House.

Resolved, That the foregoing Resolution be presented to His Excellency the Lieutenant-Governor by the whole House.

Com. to ascertain
when His Excel-
lency will receive.

Resolved, That the Solicitor General be a Committee to wait upon His Excellency and ascertain when His Excellency will be pleased to receive this House with the foregoing Resolution.

Report of Com.

The Solicitor General reported that he had waited upon His Excellency to ascertain when His Excellency would be pleased to receive this House with the said Resolution, and that His Excellency had been pleased to state he would receive this House immediately.

Resolution presented
and report.

The House proceeded to the Government House; and being returned to the Council Chamber, the President reported that His Excellency had been pleased to receive the said Resolution, and to express the great pleasure with which he received it, and his thanks to the Council for waiting upon him, and that he would have much pride and pleasure in forwarding the Resolution to be laid at the foot of the Throne.

Adjourn.

On motion, made and seconded, the House adjourned until Wednesday, at half-past two o'clock.

Wednesday, 21st March.

The House met pursuant to adjournment.

PRESENT:

The Honorable EDWARD KENNY, President.

The Honorable

" ROBERT M. CUTLER,
" STAYLEY BROWN,
" ALEXANDER KEITH,
" HENRY G. PINEO,

" JOHN W. RITCHIE, Sol. Gen.

PRAYERS.

The Minutes of Monday were read.

A message was brought from the House of Assembly, by Mr. Tobin, with the following Bills:

Ophir Mining Co.

A Bill, entitled, An Act to incorporate the Ophir Mining Company;

A Bill, entitled, An Act to incorporate the Merigomish Coal Mining Company; Merigomish Coal Co. and

A Bill, entitled, An Act to incorporate the Washington Pier and Harbor Company. Washington Pier Co. Bills,

To which Bills they desired the concurrence of this House.

The same were read a first time.

Read 1st time.

Ordered, That the said Bills be referred to a select Committee to examine and report upon. And referred.

Ordered, That Mr. Brown, Mr. Archibald, and Mr. Dickey be a Committee for that purpose. Committee.

Mr. Archibald presented the petition of William A. Irish and others, praying for a law separating the sale of Spiritous Liquors from the sale of other Merchandize,—which was ordered to lie on the table. Petition W. A. Irish and others.

The Solicitor General, by the command of His Excellency the Lieutenant-Governor, laid before the House the following Proclamation relative to the Fisheries: Message from H. E. with Proclamation rel. to Fisheries.

PROCLAMATION!

BY HIS EXCELLENCY

SIR WILLIAM FENWICK WILLIAMS,

Of Kars, Baronet, Lieutenant General in Her Majesty's Army; Knight, Commander of the Most Honorable Order of the Bath; Grand Officer Legion d'Honneur; First Class of the Turkish Order of Medijee, &c., &c.; Lieutenant Governor and Commander-in-Chief in and over Her Majesty's Province of Nova Scotia, and its Dependencies, &c., &c., &c.

[L.S.]
W. F. WILLIAMS.

WHEREAS the citizens of the United States, under a Treaty between Her Majesty the Queen and the President of that Country, signed at Washington, on the Fifth day of June, A. D. 1854, have since that time, in common with the subjects of Her Britannic Majesty, enjoyed the liberty to take fish of every kind, except shell-fish, on the Sea Coasts and Shores, and in the Bays, Harbors, and Creeks of Canada, New Brunswick, Nova Scotia, Prince Edward Island, and of the several Islands thereto adjacent, without being restricted to any distance from the shore. Proclamation.

And, Whereas, by virtue of a notice for that purpose given by the President of the United States, the said Treaty expired on the Seventeenth day of March, instant, and the rights and privileges of citizens of the United States thereunder have ceased and determined:

I do hereby proclaim and make known, That hereafter all vessels and boats belonging to any Foreign Country pursuing the Fisheries within the Territorial jurisdiction of Her Majesty, in the Province of Nova Scotia, are by Law subject to forfeiture, and the parties engaged therein to penalties, and that the law will be rigorously applied to all cases of trespass on the fishing grounds of Nova Scotia.

Of which all parties will take notice and govern themselves accordingly.

Given under my Hand and Seal at Arms, at Halifax, this Nineteenth day of March, in the year of our Lord One Thousand Eight Hundred and Sixty-six, and in the Twenty-ninth year of Her Majesty's Reign.

By His Excellency's Command.

CHARLES TUPPER.

GOD SAVE THE QUEEN.

The same was read, and ordered to lie on the table.

Petition of Avon
Bridge Company.

The Solicitor General presented the petition of the President and Directors of the Avon Bridge Company against passing An Act to authorize the building of another Bridge across the Avon River without making provision for the indemnity of the Stockholders of the Avon Bridge Company; which was ordered to lie on the table.

Motion for 2nd reading Interest Bill.

Mr. McCully moved that a Bill, entitled, An Act respecting Interest, be read a second time.

Debate adjourned.

Which being seconded, after some time spent in debate, the debate was adjourned until to-morrow.

Com. on Church of
England Bill report.

The Solicitor General, the Chairman of the Committee to whom a Bill, entitled, An Act to authorize the exercise of Clerical Functions within this Province by persons ordained by Bishops consecrated under the Act of the Imperial Parliament, 26 George III. Chapter 84, empowering the consecration to the office of Bishops of persons being citizens of Foreign Countries, was referred, reported that the Committee had examined the said Bill and recommended it to the favorable consideration of the House.

Bill read 2nd time,

The said Bill was read a second time.

And ordered to Com.

Ordered, That the said Bill be committed to a Committee of the whole House at a future day.

Adjourn.

On motion, made and seconded, the House adjourned until to-morrow, at half-past two o'clock.

Thursday, 22nd March.

The House met pursuant to adjournment.

PRAYERS.

The Minutes of yesterday were read.

Ministers Church of
England Bill read
3rd time.

A Bill, entitled, An Act to authorize the exercise of Clerical Functions within this Province by persons ordained by Bishops consecrated under the Act of the Imperial Parliament, 26 George III. Chapter 84, empowering the Consecration to the office of Bishops of persons being citizens of Foreign Countries, was read a third time; and the question was put by the President:

Whether this Bill shall pass?

Agreed to,

It was resolved in the affirmative.

And sent to H. A.

A message was sent to the House of Assembly, by the Clerk,—
To carry down the said Bill, and desire their concurrence thereto.

Ophir Mining Co.
Bill read 3rd time.

A Bill, entitled, An Act to incorporate the Ophir Mining Company, was read a third time; and the question was put by the President:

Whether this Bill shall pass?

Agreed to,

It was resolved in the affirmative.

And sent to H. A.

A message was sent to the House of Assembly, by the Clerk,—

To return the said Bill, and acquaint them that this House has agreed to the same, without any amendment.

Committee on Bills.

On motion, the House was adjourned during pleasure, and put into a Committee on Bills. After some time the House was resumed, and Mr. Cutler reported that the Committee had made some progress.

Report Merigomish
Mining Co. Bill
with amds.

The Chairman also reported that the Committee had gone through a Bill, entitled, An Act to incorporate the Merigomish Coal Mining Company, and had made several amendments thereto.

Amdts. read,

The said amendments were read by the Clerk, as follows:

FOURTH CLAUSE—4th line.—After the word “Company,” insert the words, “to a greater amount.”

4th and 5th lines.—Leave out the words, “actual amount paid by him for.”

5th line.—After the word “stock,” insert the words, “held by him.”

At the end of the Bill, add the following clause—

“The Company may proceed, either alone or with any other Company, to render navigable any portion of Merigomish Harbor that is not at present navigable, by deepening, widening, or extending the channels, or by opening a new channel or channels. They may erect piers, breakwaters, and shipping places for coal, upon any lands owned by the Company, or acquired as herein provided, or upon any lands of the Crown, in respect of which permission shall be granted by the Governor in Council, in and about the shores of such Harbor; the portions of such Harbor thus rendered navigable shall be open and free for

the use of all ships, vessels, and boats, and to all persons desirous of using the same for trading purposes, subject to such tolls and regulations at such rates as shall be fixed by the Company and approved by the Sessions of the County."

And the said amendments being read a second time, were agreed to by the House. And agreed to.

Ordered, That the said Bill be read a third time, at a future time.

The Chairman also reported that the Committee had gone through a Bill, entitled, An Act to incorporate the Washington Pier and Harbor Company, and had made several amendments thereto. Report Washington Pier and Harbour Co. Bill with amds

The said amendments were read by the Clerk, as follows:

SIXTH CLAUSE—6th line.—Before the word "stock," insert the word "capital." Amendments read,

Same line.—After the word "stock," leave out the word "taken."

At the end of the Bill, add the following clause,—

"Nothing in this Act shall affect, or be construed to affect, the rights granted to the General Mining Association under their lease from the Crown, bearing date the first day of January, A. D. 1858, and confirmed to them by the Act passed in the twenty-first year of Her present Majesty's Reign, and as modified by the Act passed in the twenty-sixth year of Her present Majesty's Reign."

And the said amendments being read a second time, were agreed to by the House. And agreed to.

Ordered, That the said Bill be read a third time, at a future time.

Resolved, unanimously, That the Standing Order of this House, number 72, s. o. s. relative to Bills not being read or proceeded with twice in the same day, be suspended as respects the two last mentioned Bills.

The said Bills were read a third time; and the question was put by the President, on each Bill: Bills read 3rd time.

Whether this Bill, with the amendments, shall pass?

It was resolved in the affirmative. Agreed to with amds

A message was sent to the House of Assembly, by the Clerk,—

To return the said Bills, and acquaint them that this House has agreed to the same with amendments, to which amendments their concurrence is desired. And sent to H. A.

A Bill, entitled, An Act for the Protection of Married Women in certain cases, was read a second time. Protection Married Women Bill read 2nd time,

Ordered, That the said Bill be committed to a Committee of the whole House, at a future day. And ordered to Com.

The Solicitor General, by the command of His Excellency the Lieutenant-Governor, laid before the House— Message from H. E.

PRAYERS.

The Minutes of Wednesday were read.

On motion, *ordered*, That Mr. Creighton have leave to attend before a Committee of the House of Assembly if he see fit.

Leave to Mr. Creighton to attend Com. H. A.

On motion of Mr. Dickey, the House resumed the Debate on the Resolution for the Union of the Colonies.

Debate on Union of Colonies resumed.

After debate, Mr. Brown moved the following amendment to the Resolution :

Amdt. moved.

Whereas, the Resolution before the House proposes to change, by the act of the present Legislature, the Constitution and Government of this Province; and, with the other Maritime Provinces and Canada, to establish a new and untried form of Government. And, *whereas*, a measure of this magnitude, involving the dearest rights and interests of the people, should not be passed till after the gravest consideration and the constitutional expression of their opinion: Therefore,

Resolved, That the Resolution before the House be deferred until the first meeting of the next General Assembly.

After some time, the debate was adjourned until Monday next.

A message was brought from the House of Assembly, by Mr. Tobin, with the following Bills:

1. A Bill, entitled, An Act to postpone the Spring Sittings of the Supreme Court at Halifax; Spring Sittings Sup. Court, Halifax,
2. A Bill, entitled, An Act to authorize the sale of the old Baptist Meeting House at Caledonia, Queen's County; Baptist Meeting House, Caledonia,

PRAYERS.

The Minutes of yesterday were read.

Com. on East River Coal Co.	Mr. Brown, the Chairman of the Committee to whom a Bill, entitled, An Act to incorporate the East River Coal Mining Company; also,
Aconi Coal Co. and Nav. Cow Bay, Bills.	A Bill, entitled, An Act to incorporate the Aconi Coal Company; also, A Bill, entitled, An Act to protect the Navigation of Cow Bay, in Cape Breton;
Report.	Were referred, reported that the Committee had examined the said Bills, and recommended them to the favorable consideration of the House.
Bills read 2nd time.	The said Bills were read a second time.
And ord. to Com.	<i>Ordered</i> , That the said Bills be committed to a Committee of the whole House, at a future time.
S. O. S.	<i>Resolved</i> , unanimously, That the Standing Order of this House, number 72, relative to Bills not being read or proceeded with twice in the same day, be suspended as respects the Bills before a Committee of the whole House.

On motion, the House was adjourned during pleasure, and put into a Committee on Bills. After some time the House was resumed, and Mr. Cutler reported that the Committee had made some progress.

The Chairman also reported, that the Committee had gone through a Bill, entitled, An Act to authorize the sale of the old Baptist Meeting House at Caledonia, Queen's County; also,

A Bill, entitled, An Act relating to Assessments in the County of Halifax; also,

A Bill, entitled, An Act to authorize the appointment of an additional Health Officer for the Port of Halifax; also,

A Bill, entitled, An Act to amend Chapter 40 of the Revised Statutes, Second Series, "Of Sheriffs"; also,

A Bill, entitled, An Act to authorize the sale of the Mount Zion Chapel at Milton, Queen's County;

And had agreed to the same, without any amendment.

Ordered, That the said Bills be read a third time, at a future time.

Resolved, unanimously, That the Standing Order of this House, number 72, relative to Bills not being read or proceeded with twice in the same day, be suspended as respects the said Bills.

The said Bills were read a third time; and the question was put by the President, on each Bill:

Whether this Bill shall pass?

It was resolved in the affirmative.

A message was sent to the House of Assembly, by the Clerk,—

To return the said Bills, and acquaint them that this House has agreed to the same, without any amendment.

The Chairman also reported that the Committee had gone through a Bill, entitled, An Act to incorporate the East River Coal Mining Company, and had made an amendment thereto.

The said amendment was read by the Clerk, as follows:

SECOND CLAUSE.—10th line—After the word "Stockholders," insert the following words, "to an amount not exceeding in all Three Hundred Thousand Dollars."

And the said amendment being read a second time, was agreed to by the House.

Ordered, That the said Bills be read a third time, at a future time.

The Chairman also reported that the Committee had gone through a Bill, entitled, An Act to incorporate the Aconi Coal Company, and had made an amendment thereto.

The said amendment was read by the Clerk, as follows:

At the end of the Bill add the following Clause—

13. Nothing in this Act shall affect, or be construed to affect, the rights granted to the General Mining Association under their lease from the Crown, bearing date the 1st day of January, A. D. 1858, and confirmed to them by the Act passed in the Twenty-first year of Her present Majesty's reign, and as modified by the Act passed in the Twenty-sixth year of Her present Majesty's reign."

And the said amendment being read a second time, was agreed to by the House.

Ordered, That the said Bill be read a third time, at a future day.

The Chairman also reported that the Committee had gone through a Bill, entitled, An Act to protect the Navigation of Cow Bay in Cape Breton, and had made an amendment thereto.

The said amendment was read by the Clerk, as follows:

SECOND CLAUSE.—At the end of the Clause, add the following words—

"But in any case where vessels cannot safely and conveniently discharge their ballast at the said breakwater, and not otherwise, the same may be

discharged at any point on the south side of the Bay, near the shore, as may be directed for that purpose by the Harbor Master."

And agreed to.

And the said amendment being read a second time, was agreed to by the House.

Ordered, That the said Bill be read a third time, at a future time.

S. O. S.

Resolved, unanimously, That the Standing Order of this House, number 72, relative to Bills not being read or proceeded with twice in the same day, be suspended as respects the said three Bills.

Bills read 3rd time.

The said Bills were read a third time; and the question was put by the President, on each Bill:

Whether this Bill, with the amendment, shall pass?

Agreed to with am.

It was resolved in the affirmative.

And sent to H. A.

A message was sent to the House of Assembly, by the Clerk,—

To return the said Bills, and acquaint them that this House has agreed to the same with an amendment to each Bill, to which amendments their concurrence is desired.

Report Com. of Public Accounts.

Mr. Brown, the Chairman of the Committee of this House appointed to join a Committee of the House of Assembly to examine the Public Accounts, made his report, which he read in his place.

(Appendix — Public Accounts.)

Ordered, That the said Report do lie on the table.

Message to H. A. agreeing to N. Scotia Slate Co.

A message was sent to the House of Assembly, by the Clerk,—
To return a Bill, entitled, An Act to incorporate the Nova Scotia Slate Company; also,

Sessions, Halifax, and

A Bill, entitled, An Act relating to the Sessions of the County of Halifax; also,

International Coal and Rail. Co. Bills,

A Bill, entitled, An Act to amend the Act to incorporate the International Coal and Railway Company, and the Acts in amendment thereof;

As amended.

And inform them that this House has agreed to the said Bills, as amended.

Adjourn.

On motion, made and seconded, the House adjourned until to-morrow, at half-past two o'clock.

Wednesday, 18th April.

The House met pursuant to adjournment.

- Rep. Point Pleasant Park Bill without amendment. The Chairman also reported that the Committee had gone through a Bill, entitled, An Act to incorporate the Directors of the Point Pleasant Park at Halifax, Nova Scotia; and had agreed to the same, without any amendment.
Ordered, That the said Bill be engrossed, and read a third time, at a future time.
- S. O. S. *Resolved*, unanimously, That the Standing Order of this House, number 72, relative to Bills not being read or proceeded with twice in the same day, be suspended as respects the said Bill.
- Bill read 3rd time. The said Bill was read a third time; and the question was put by the President:
Whether this Bill shall pass?
It was resolved in the affirmative.
- Passed, And sent to H. A. A message was sent to the House of Assembly, by the Clerk,—
To carry down the said Bill, and desire their concurrence thereto.
- S. O. S. *Resolved*, unanimously, That the Standing Order of this House, number 72, relative to Bills not being read or proceeded with twice in the same day, be suspended as respects the Bills before a Committee of the whole House.
- Com. on Bills. On motion the House was adjourned during pleasure, and put into a Committee on Bills. After some time the House was resumed, and Mr. Cutler reported that the Committee had made some progress.
- Rep. Summary Possess. Crown Lands Bill without amdt. The Chairman also reported that the Committee had gone through a Bill, entitled, An Act to provide a summary mode to recover possession of Crown Lands; and had agreed to the same, without any amendment.
Ordered, That the said Bill be read a third time, at a future time.

Resolved, unanimously, That the Standing Order of this House, number 72, s. o. s. relative to Bills not being read or proceeded with twice in the same day, be suspended as respects the said Bill.

The said Bill was read a third time; and the question was put by the President: Bill read 3rd time.

Whether this Bill shall pass?

It was resolved in the affirmative. Agreed to,

A message was sent to the House of Assembly, by the Clerk,— And sent to H. A.

To return the said Bill, and acquaint them that this House has agreed to the same, without any amendment.

The Chairman also reported that the Committee had gone through a Bill, entitled, An Act to regulate the Poores' Asylum and Hospital in the City of Halifax; and had made several amendments thereto. Rep. Poores' Asylum and Hospital, Hx. Bill with amds.

The said amendments were read by the Clerk, as follows: Amds. read,

FIRST CLAUSE—2nd line—Leave out the word "six," and insert, instead, the word "eight."

4th line—Leave out the word "six," and insert, instead, the word "three."

Same line—After the word "who," insert the words, "with the Mayor of the City of Halifax for the time being."

At the end of the clause add the following words, "and may annually elect their own Chairman."

SIXTH CLAUSE—1st line—Before the word "The," insert the words, "a majority of."

4th line—After the word "and," insert the words, "the Chairman."

5th line—After the word "Deeds," insert the words, "under the Corporate Seal."

At the end of the Bill, add the following clauses:

"The Commissioners shall enjoy, and may exercise within the City of Halifax, all the powers of Overseers of Poor within their respective Districts."

"The assets of the present Commissioners of the Poores' Asylum shall vest in the Commissioners under this Act, and their liabilities shall be assumed by them."

And the said amendments being read a second time, were agreed to by the House. And agreed to.

Ordered, That the said Bill be read a third time, at a future time.

The Chairman also reported that the Committee had gone through a Bill, entitled, An Act to amend Chapter 15 of the Revised Statutes, "Of the Exportation of Goods and of Drawbacks"; and had made an amendment thereto. Report Exportation and Drawbacks Bill with amdt.

The said amendment was read by the Clerk, as follows: Amdt. read,

THIRD CLAUSE—3rd line—Leave out the words, "upon which duty is levied."

And the said amendment being read a second time, was agreed to by the House. And agreed to.

Ordered, That the said Bill be read a third time, at a future time.

Resolved, unanimously, That the Standing Order of this House, number 72, s. o. s. relative to Bills not being read or proceeded with twice in the same day, be suspended as respects the said two Bills.

The said Bills were then read a third time; and the question was put by the President, on each Bill: Bills read 3rd time,

Whether this Bill, with the amendments, shall pass?

It was resolved in the affirmative. Agreed to with am.

A message was sent to the House of Assembly, by the Clerk,— And sent to H. A.

To return the said Bills, and acquaint them that this House has agreed to the same with amendments, to which amendments their concurrence is desired.

Speech.

After which His Excellency was pleased to close the Session with the following

SPEECH:

Mr. President, and Honorable Members of the Legislative Council:

Mr. Speaker, and Gentlemen of the House of Assembly:

I congratulate you upon the close of an arduous Session, during which measures have been passed which will, I confidently believe, materially promote the prosperity and advancement of the Province.

The amendment of the law relating to Education will, I trust, impart increased efficiency to the Common School system, and result in the more general diffusion of knowledge among all classes of the people.

The measure providing for the extension of Mining Leases will, I doubt not, attract, in an increased degree, capital from abroad to still further develop the remarkable mineral wealth with which this country abounds.

The provision made for the due representation of Nova Scotia at the Paris Exhibition, will diffuse more widely a knowledge of your great industrial resources.

The enactments intended to place the treatment of Pauperism and Disease among the destitute on a more enlightened and humane footing, and to protect our shores from the ravages of infectious diseases, cannot fail to be productive of general good.

The gallant manner in which all sections of the country responded to the call to arms, and the increased provision made for the Defence of the Country, prove conclusively how highly British institutions are valued, and the sacrifices you are prepared to make to sustain your connection with the Parent State.

The liberal provision made by you for the protection of the Fisheries will be an additional incentive to the Imperial Government to secure that valuable heritage from the encroachments of foreigners.

Mr. Speaker, and Gentlemen of the House of Assembly:

I thank you for the liberal appropriation made for the Public Service.

Mr. President, and Honorable Members of the Legislative Council:

Mr. Speaker, and Gentlemen of the House of Assembly:

Permit me, in conclusion, to express the deep gratification your action upon the great question of a Union of British North America has afforded me, not only as the Representative of Her Gracious Majesty, but as one of yourselves. It will afford the greatest satisfaction to the Imperial Government, as the means of imparting additional security to this portion of the Empire; and I recognize in the patriotic course you have adopted, the most efficient guarantee not only for the increased prosperity of this Province in common with our sister Colonies, but also for the permanent connection of them all with the British Crown.

The President of the Legislative Council, by His Excellency's command, then said:

"GENTLEMEN,—

Prorogation.

"It is the pleasure of His Excellency the Lieutenant-Governor that this General Assembly be prorogued to TUESDAY, the Fifth day of June next; and this General Assembly is accordingly prorogued to TUESDAY, the Fifth day of June next, to be then here held."

The House of Assembly then withdrew, and His Excellency was pleased to retire soon after.

JOHN C. HALLIBURTON,

Clerk of the Legislative Council.

APPENDIX No. I.

APPENDIX No. 3.

MINES REPORT.

DEPARTMENT OF MINES,

Chief Commissioner's Office,

Halifax, December 1st, 1865.

SIR,—

I beg leave to submit, for the information of his Excellency the Lieutenant Governor, the following Report upon the Mines of Nova Scotia, for the financial year ending the 30th September last.

I may say at the outset, that, unless I needlessly extend this Report, it must almost of necessity be very brief. Beyond the bald statistics of mining operations for the year, I have had little to record except a gradual and successful development of the mineral resources of the country. I am aware of no startling events having occurred during the year, calculated to create a great, sudden excitement, in any of the mining districts, or to attract towards them any unwonted degree of public attention; but operations throughout those districts have been characterized, during that period, by a steadily continuous and cumulative prosperity. In submitting the facts which I have to report, I shall observe the same division of the subject which I have adopted in former Reports of this character.

PART I.

GOLD MINES.

Gold mining operations, still more than those in Coal or other mines, have, during the year, been characterized by an unwonted absence of popular excitement on the part both of those immediately interested and of the public at large; whilst, as will be shown in detail hereafter, the prosperity of those Gold Mines has nevertheless materially increased. Men engaged in such operations have come to expect large, or, at all events, profitable, returns of Gold, almost as a matter of course; and they are very rarely disappointed. Consequently, success produces little excitement,—little talk, on their part. I observe that this fact seems to have led a portion of the community, even within this Province, to entertain, to some extent, an impression that the Gold Mines were not improving in productiveness, if they were even as productive as during the preceding year. The following observations, with the tabular statements appended, will show that this impression is really groundless. As heretofore, I will briefly refer specially to the several proclaimed Gold Districts in succession.

THE OVENS.

I am sorry to say that I can report no material improvement in affairs at The Ovens during the past year. The same causes which, in my last Annual Report, I mentioned as accounting for the depression in the mining interests of that District, continued to make themselves felt until late in 1865, and, in a great degree,

even to the present time. Consequently, the mining operations in this District, and the product of them, have, during the year, been merely nominal. Nevertheless, I still (owing to reasons expressed in former Reports) believe, that this hitherto unfortunate District will eventually prove a productive one,—not, perhaps, a formidable competitor with some other Districts, but yet one wherein mining, judiciously managed, will yield a handsome profit. I observe recent symptoms of mining being resumed at The Ovens, with vigor.

RENFREW.

The returns from Renfrew exhibit a slight falling-off in every respect from those of the previous year. Yet, in truth, this is more apparent than real. It happens that the extraordinary and almost unprecedented drought which prevailed in this Province during the latter part of Summer, very materially affected the product of the Renfrew Mines. During the whole of the three months ending the fiscal year, no quartz was crushed at Renfrew, the mills being unable to work for want of water. Nevertheless, here, as in all other Districts, the weather which was unfavorable for keeping mills in operation, was very favorable for mining. Consequently, the returns of the current quarter will, I have reason to believe, fully account for the falling-off in the yield of the preceding three months. I may here mention, without specially recurring to the fact in the case of every other Gold District to be hereafter mentioned, that this same drought has very materially lessened what under ordinary circumstances would have been the product of every one of the Gold Districts during the quarter ending September 30th, 1865.

OLDHAM.

In Oldham, likewise, as will be seen on reference to the tabular Statement in the Appendix, marked B, there has been an apparent general falling-off in mining operations during the year, as compared with those of the last previous year; and this has been owing in a great degree to the cause just mentioned as having materially affected the Returns from Renfrew. Yet the prospects of this District continue good; and the results of mining for the past year, as compared with those of 1864, show a large increase in the product of Gold per man engaged in mining. A continuation of the Oldham road across the District to the Guysborough road, so called, has been laid out since the date of my last Report, and a part of the construction of the same has been effected with a view, as I understand, to its early completion. The Legislative appropriation for this object cannot fail to promote very materially the development of the unquestionably great mineral resources of the Oldham Gold District.

WAVERLEY.

The great success which attended Gold Mining enterprises in the Waverley District during 1864, has been still more marked during the year to which this Report refers. With no increase in the aggregate number of men employed, the product of the gold mines of Waverley, for the fiscal year ending 30th September last, has been more than three times that of the corresponding period ending with September, 1864. In fact, more than half of all the Gold produced by the Nova Scotian mines during the past year must be credited to Waverley, where the returns show, an average of no less than \$805.87 per year for every man engaged about the mines. These somewhat striking facts, taken alone, would naturally lead one to suppose that Waverley was, amongst those of Nova Scotia, a peculiarly rich Gold field. However natural such a conclusion, I have no hesitation in saying that it would be an erroneous one. The great productiveness of this District for

the past year is due less to any exceptional richness in the auriferous quartz-lodes than to the enterprise and energy with which mining operations have been carried on. Any one having an intimate personal knowledge of the several Gold Districts of this Province,—any one who will take the trouble to analyze the tabular statements that have been issued by this Department during the past four years, must arrive at the conclusion that, in most of the other Gold Districts a like display of enterprise and judiciously directed energy would have led to even more, certainly no less, favorable results than we have just seen produced at Waverley.

MONTAGU.

Montagu shows a considerable improvement, in almost every respect, over previous years; and the prospects of the District are very promising. The completion of a steam-crusher within the limits of the District itself since the date of my last Report has given an *impetus* to the mining operations of the place, and necessarily added to their profits, all Montagu quartz having previously been taken to Waverley to be crushed. I have mentioned, in former Reports, the remarkably even distribution of Gold throughout the quartz in this District, the maximum and minimum of richness not varying much from the average. This appears to be still a rather marked characteristic of Montagu.

TANGIER.

The returns from Tangier, likewise, exhibit a very marked improvement in every respect, upon those of previous years. Yet this District is still suffering to some extent from those causes which I mentioned in my last Annual Report as having retarded its progress. A company possessing an extensive and valuable property there, but which had virtually suspended operations in 1864, owing to monetary difficulties in the United States, where the stockholders belonged, has never resumed work. Thus a large and rich tract, in the very heart of the mining district, has, owing to causes beyond my certain knowledge, been kept unproductive during the whole year. This property has, however, recently passed into other hands, and mining operations upon it will, I understand, soon be recommenced with vigor. Alluvial washing was here commenced, during the year, and with the most cheering prospects of success, although the dryness of the season prevented the work being prosecuted for any length of time. Besides fine Gold, many beautiful nuggets were thus obtained, both at Tangier proper and Old Tangier. One found at the former locality, and sent to the Dublin Exhibition, weighed over twenty-seven ounces, being the largest nugget yet found in Nova Scotia.

That part of this District known as Old Tangier, still continues in a somewhat languishing condition, owing to the want of facilities of communication with the outer world. In 1864 a small appropriation was made for opening a road from the head of Pope's Harbor to Old Tangier, to be speedily continued, as was pretty generally believed, beyond the latter point, to Musquodoboit. The amount so appropriated was only sufficient to partially clear out the first section of the line and render it possibly available as a Winter road. I find that no additional appropriation was made for this work last year. This is to be regretted; because, unless the road is completed, the money already expended upon it will be so much utterly lost, whilst a large tract of rich Gold deposits will be virtually kept locked up in a state of unproductiveness. From all I can learn, the projected line of road from Tangier to Musquodoboit crosses the greatest width of a *productive* auriferous band that has yet been actually found in Nova Scotia. Consequently, its construction would be a piece of good policy, regarded in a merely commercial point of view. The revenue from the mines which would be thus opened would very soon pay the cost of the road.

SHERBROOKE.

Sherbrooke has more than maintained its previously established reputation as a productive Gold District. At least its returns of material mined and crushed, aggregate Gold product, and yield of Gold per man, exceed those of 1864. In the total produce of its mines, as will be seen on reference to the General Abstract, (Appendix B,) Sherbrooke ranks next to Waverley. Some new mines have been opened, of late, in this District, upon newly discovered quartz lodes, which have thus far proved to be of exceeding richness. As an indication of the very superficial way (in every sense of the expression) in which "prospecting" was carried on in the earlier stages of the history of our Gold Mines, I may observe that the range upon which these same rich lodes have lately been discovered, was, years ago, explored thoroughly, as was then supposed, and most of the areas upon it were abandoned as valueless.

WINE HARBOR.

In Wine Harbor there has been, during the year, a falling off in the total product of Gold, as compared with the preceding year. This, however, would seem by the official returns to be owing more to the fact of a smaller number of men engaged in mining than formerly, than to any falling off in the productiveness of the Mines themselves. The yield of Gold per man engaged in mining in this District during the year reaches the extraordinary amount of \$946.80. This is the highest average that has ever yet been attained in any whole District in Nova Scotia. I am unable at present to account for a falling off in the number of men engaged in mining where such results are attainable.

STORMONT.

Mining has gone on steadily and prosperously at Isaac's Harbor during the year, unaffected by any specially noteworthy incidents. The average results of the operations throughout the District are about the same as those of the previous year. Isaac's Harbor still produces a larger average yield of Gold per ton of quartz than any other Gold field. It is now three years that this District has occupied the head of the list in this particular. Doubtless gold mining will here be carried on steadily and successfully for a long period to come.

WAGAMATKOOK.

A literal repetition of what was said in my last Annual Report about Wagamatkook, would be equally applicable to the case of that District now. The operations there during the year, whether in mining or alluvial washing, have been nearly nominal. This is owing to the absence of roads and consequent comparative inaccessibility of the District. Whether, or not, it would prove a very prosperous Gold district, if it were opened up by good roads, I have no sufficient means of knowing; but certainly very little can ever be done in such a country until roads are made.

DISCOVERIES.

As was briefly mentioned in my last Annual Report, just about the close of the fiscal year of 1864, a Gold discovery, believed to be of importance, was made a few miles to the rear and southward of Upper Musquodoboit. The auriferous quartz brought from this locality was very rich; and, from all I could learn, the

prospects of the place as a mining district promising. I sent a Surveyor to the spot, and had a number of areas laid off and a plan made. Within a short time afterwards, some seventy-one areas of Class Number One were taken up for leases by various parties; and, in addition, about seventy-three acres were also covered by Prospecting Licenses. Nothing further has, however, been done at this place, owing solely, I believe, to its being so difficult of access in the absence of any kind of a road. Where the mining areas just mentioned were surveyed is upon, or about, the line of the projected road from Musquodoboit to Tangier, referred to in an earlier part of this Report; and the parties who applied for them did so under the impression that at least that section of the road extending from Musquodoboit to their mining claims would be opened up immediately. This not having been done, mining operations on this part were, of course, impracticable. I cannot but think it very desirable that this section of the projected road should be constructed during the incoming year.

Discoveries of auriferous quartz have been made during the year at Uniacke, Stewincke, Dartmouth, Chezzetcook, Head of Margaret's Bay, and several other places. In most of those, mining claims have been secured and mining commenced, with good prospects of success. These discoveries are now of such frequent occurrence that they have, long since, ceased to produce any popular excitement, and indeed are seldom heard much of by the public.

Before concluding this part of my Report relating exclusively to Gold Mines, there is one amendment to the existing law which I would respectfully urge. It is one which could doubtless be effected without much difficulty now, and by which no existing, vested interests, could be deteriorated; and yet is one which, if passed during the next Legislative session, would obviate troublesome complications and clashings of interest which, I think, may otherwise present themselves hereafter. It would here be a needless discussion for me to enter into an explanation of the reasons for saying, what I nevertheless do say, that Silver will probably be found, in sufficient quantity to remunerate the miner, in the same geological formation in which we are now getting Gold. It will, I suspect, be found in some of the auriferous quartz lodes now being worked. Indeed, I believe I may safely say, that I have myself found it in such lodes. As the law now is, the Gold mining lessee has no right to extract a particle of Silver from his own leasehold premises. Nor can any one else obtain a lease to mine Silver upon the Gold lessee's ground without the probability—nay, almost the certainty, of being brought into hostile collision with the Gold lessee. The mere mention of these facts will at once suggest to anybody the troublesome complications which must ensue should there issue a License to Search for, or a Lease to mine, Silver in any of the auriferous districts. To obviate any such difficulties, I would respectfully recommend that a brief enactment be passed, in the nature of an *ex post facto*, as well as a prospective law, providing that all holders of Gold Leases heretofore passed be empowered to mine Silver, as well as Gold, on the ground held by them, they paying the royalty on Silver now required by law; and that hereafter, all such leases expressly authorize the lessee to mine Gold and Silver, and require him to make his sworn returns and pay royalty accordingly. Such an anticipatory measure can do no harm, and may affect much good.

PART II.

MINES OTHER THAN GOLD.

I fear that this part of my Report must be almost unsatisfactorily brief. I had hoped that the Inspector of Mines to be appointed by His Excellency would have been enabled to enter upon his duties and make a tour of inspection and furnish a Report, to be appended to this, relative to the condition especially of the various Coal Mines of the Province. But unfortunately Mr. Rutherford, the gentleman appointed to be Inspector, was unable to reach this country before the close of the fiscal year; and although he entered upon the discharge of his duties immediately upon his arrival here, and has prosecuted the same with alacrity ever since, some months must necessarily elapse before he can be prepared to furnish anything like a full and satisfactory Report. I have myself been enabled to take only a cursory and very hasty view of a few of the more important of these Mines during the year, and shall therefore not attempt anything like a detailed description of the works, either above or below ground, in any one of them.

Leaving such descriptions out of the question for the present, I cannot do better than to refer to the carefully prepared table hereto appended, (Appendix C,) exhibiting in detail the quantities of coal of all kinds raised and sold at all of the Mines now open in the Province, and make a few remarks in elucidation of the same.

CAPE BRETON.

Of the fourteen Mines now opened and being worked in this County, there is one only which does not appear in the table (Appendix G,) appended to my Report of last year. That one is the Colliery of the "Caledonia Company," at Glace Bay; but this Company has scarcely got into fair operation yet, and appears by the returns to have sold no Coal yet, although 1200 tons were raised during the last quarter of the year.

The returns from every one of the other Collieries, with one sole exception, show a product of Coal largely in excess of that for the last preceding twelve months. Several of them have doubled the quantity, whilst some of the newer mines have even trebled it. From the Block House Colliery, at Cow Bay, more Coal has been raised and sold during the year than from any other in the Province, except the Albion Mine, at Pictou, and operations in all the others are characterized by great activity and rapid progress.

Nothing has yet been done in the way of actual construction of the railway to connect the greater number of the Mines of this County with the harbors of Sydney and Louisburgh, although the line is located throughout, and I believe it is intended to proceed with the work with all possible despatch. The construction of this railway cannot fail to give an immense *impetus* to the mining operations and Coal trade of Cape Breton.

VICTORIA.

The only Colliery yet in full operation in this County is the New Campbellton, at Great Bras d'Or, which seems to be in good order and in a prosperous condition. Several Licenses to Work have, however, been issued to other parties, who are commencing to open mines with good prospects of eventual success.

INVERNESS.

The only mine in this County from which I have yet had any return of Coal is that of the "Cape Breton Coal Company," at Port Hood. This new mine is being gradually got into good working order, and has put into the market during

the year 1200 tons of Coal, being just ten times the quantity sold from it last year. Several other Collieries are being opened in this County, and with good prospects.

RICHMOND.

Of the only two mines yet in operation in this County, the "Richmond Mine," at Little River, has during the year, produced considerably more than double the product of the preceding twelve months. The "Sea Coal Bay" Colliery is still being worked on only a very limited scale, but the product of it is much in excess of that of the preceding year.

PICTOU.

Last year I could furnish returns from only one Colliery in this County—that of the Albion Mines, being in fact the only one which was actually in operation at the date to which my Report was made up. Now it will be seen that there are five others, although most of them have been too recently opened to have yet put any considerable quantity of coal into the market. The Albion Mine itself shows an increase in the annual yield over that of the preceding year, notwithstanding that the falling in of a portion of the mine must have materially lessened what would otherwise have been the product of the last twelvemonth.

In addition to what was previously so occupied, a very large extent of country has, during the year, been taken up in Pictou, under Exploration Licenses. Searches have been prosecuted, too, with vigor, and several valuable seams of Coal have been discovered in localities where not previously known to exist. Undoubtedly several new Collieries will be opened in this County within the incoming year, and present indications favor the conclusion that within a very short period the whole of the Pictou Coal Bason must have become thoroughly explored.

CUMBERLAND.

With the exception of the Victoria Mine, at River Hebert, all the Collieries of this County exhibit a falling off in their product, compared with that of the preceding year. The "Macan" Mine appears to have produced no coal at all. I understand that, in fact, the lessees of this Colliery have suspended operations upon the seam which they have heretofore been working, and have been exploring, with a view to commencing works anew on another part of the premises occupied by them, and where they expect to carry on mining operations more profitably. On the other hand, the "Chiegnecto" and "St. George" Companies have opened very promising seams of good coal at the East side of the Macan River; and although they have raised but little coal as yet, they have been making large outlays in the construction of substantial works, preparatory to a vigorous prosecution of mining operations in the future.

In that large tract of country of which Spring Hill may be taken as the centre, and which has long been known to contain exceedingly rich beds of Coal, explorations have been carried on with much spirit, by different Companies, throughout the past year,—and, so far as I have learned, with cheering results. Under ordinary conditions, mines could not be opened and successfully worked in this inland district without a large preparatory expenditure on the part of those immediately interested. But if, as is anticipated, the projected Intercolonial Railway should pass through or skirt this Coal Bason, the commencement of its construction will, beyond question, be simultaneous with the opening of a number of rich Coal mines in the vicinity of Spring Hill.

COPPER MINES.

The works of the *Cheticamp Copper Mining and Smelting Company*, in Inverness County, and those of the *Annapolis Copper Company*, at Wilmot,—both of which were mentioned in my last Annual Report,—have been carried on in a

small way during the year; but in neither place have they yet proved productive, although their proprietors are sanguine of eventual success. Licenses have been obtained to search for Copper ores in several other localities, but I am not aware of the result in all cases. Several of these Licenses cover ground about the confines of Antigonish and Guysborough Counties, in the vicinity of Polson's Lake. About this district good indications are visible, but I have not heard that any good, workable lode of Copper ore has yet been discovered.

IRON MINES.

The only place in Nova Scotia where Iron is now being mined and smelted is at the Mines of the "Acadian Charcoal Iron Company," at Londonderry, in Colchester County. These Mines are upon land on which there is no reservation of royalty to the Crown, and they are consequently in no way subject to the control of the Mines Department; but the Manager of the works has obligingly furnished me with the following information, which I think it well to embody in this Report:—During the year there has been a daily average of 250 men and boys, and 25 horses, employed at these Mines. The product of their labor has been 1600 tons of Bar Iron, of which 1500 tons has been shipped to England, and the remainder to the United States. On additional works there has been expended, during the same period, in Adits and Levels, \$2400; Machinery, \$2000; Houses, \$1200. The property of this Company is extensive and exceedingly valuable, and admits of a large extension of operations.

Licenses have been procured to search for Iron in several other localities, in the vicinity of which the ore is already known to exist in quantity.

PART III.

GENERAL RESULTS AND PROSPECTS.

The General Results of the past year's mining operations may be summed up in very few words, and certainly appear satisfactory, whether we regard them as those of one isolated year, or in relation to the past or the probable future. On recurring again to the Statement of the results of Gold Mining, (Appendix B), and comparing it with what has been shown in previous Reports, it will be seen that the aggregate amount of Gold upon which royalty has been paid during the fiscal year exceeds that of the preceding twelve months by about thirty-three per cent. The quantities are, in fact, for the year ending 30th September, 1864, 18,744 oz. 5 dwt. 12 gr.; year ending 30th September, 1865, 24,867 oz. 5 dwt. 22 gr.; increase, 6123 oz. 0 dwt. 10 gr. The average yield of Gold per ton of quartz for the year just closed also shows an increase over the preceding year of about five per cent., a fact which tends to confirm the prevalent impression that the deeper mining is carried on the richer will be the quartz; but when we apply to the operations of last year the most reliable of all tests—I mean the yield of Gold per man engaged in mining—the result is still more satisfactory. The yield per man has steadily increased every year since Gold mining commenced in this country, until we find that, for the year just closed, it amounts to the sum of \$664.80. This is equivalent to \$2.13 per day for every man engaged in and about mining. In 1864, the average was about \$1.39; and in 1863, \$0.95. It must be remembered that in these calculations the Gold is rated at \$18.50 per ounce, which is below its market value. Everything in connection with this matter indicates a large increase and wider extension of profitable Gold mining operations in future years. As explorations are extended, it becomes more obvious that

the possibility of carrying on such operations is not confined to the isolated localities which constitute the heretofore proclaimed Gold Districts. On the contrary, it seems to be all but certain that, at least throughout the larger portion of it, the great band of metamorphic rock which extends along the Atlantic coast the whole length of the Province, is auriferous, and to such a degree that Gold Mining, with judicious management, can there be carried on with handsome profits. Having been led by facts coming within my own knowledge to sincerely entertain this opinion, I feel myself constrained to urge that, if possible, a liberal provision be made out of the Provincial Treasury towards opening up this great auriferous tract to mining enterprise. Being for the most part a rugged country, little adapted to agricultural purposes, it is more sparsely intersected with roads than any other part of the Province. It so happens that, thus far, those who have engaged in Gold Mining enterprises in this country have not been so amply furnished with capital that they could afford any outlay beyond that requisite for the mere opening and working of their mines; and even this they have, in many instances, been compelled to do on too small a scale. Where the site of their intended works has been distant from any established thoroughfare, they have been put to great loss and inconvenience, and, in some cases, compelled to abandon mining altogether, from this cause alone. I would respectfully observe that if a sum even considerably in excess of the whole amount paid into the Treasury from the Gold Fields, to be expended annually for years to come in opening up means of easy communication through this auriferous country, it would ensure, even during such period, the receipt of a larger amount of indirect revenue from the Mines than could otherwise be obtained, either direct or indirect; whilst it now seems absolutely certain that such a procedure would ensure those Mines becoming a source of much larger direct revenue in future years.

The General Results of Coal Mining during the year have been no less satisfactory than those of Gold Mining. A reference to the Statement (marked C) in the Appendix, will show that there are now thirty collieries in operation in Nova Scotia. Some of them are, it is true, only just barely opened, and have, as yet, made but small returns; but, with one or two exceptions, works are being vigorously prosecuted in all of them, and with good prospects of a great and profitable extension of them at an early day. The total quantity of Round and Slack Coal sold from the Mines during the year ending 30th September last was 652,854 tons. In making a comparative statement, I cannot give with perfect accuracy the yield of coal for the whole twelve months ending with September, 1864; but the returns for the year just past show an increase of not less than thirty per cent. upon those of the one last preceding. In addition to the territory of the General Mining Association, there are now thirty-one square miles of country under Coal Mining leases. The aggregate extent of areas under licenses amounts to about 1920 square miles. The spirit and activity exhibited in carrying on explorations upon the greater number of these areas under License, and the success which, in many instances, attend such explorations, indicate an early and important increase in the number of Collieries in Nova Scotia. I need scarcely observe that while the product of our Coal Mines is thus rapidly increasing, and promises to do so for a long time to come, the demand for that product in the market seems to increase in a still more rapid ratio.

The state of the Financial Affairs of the Department is fully exhibited by the Tables in the Appendix, (marked D, E, F, and G.) I presume that little need be said in explanation of these Tables. In comparing them with the corresponding statements appended to my last Annual Report, it will be perceived that the expenses of the Department for the whole year have been less than those for the nine months of 1864 to which the last Report referred. The gross receipts from Coal are in excess of those of the preceding year; whilst, on the other hand, those from Gold are less. This last fact is owing solely to a falling off in the amount received for rents of Gold mining areas. A less number of Gold Leases have issued, and, of course, all of those applied for have been under the law which reduced the rents—or rather the *advance payments*, which is still designated

“Rents” in the books of the Department—to two dollars per area; whilst a large proportion of the ground taken up in 1864 was paid for at the former and higher rate of ten dollars per area. The whole balance to the credit of the Mines of all classes is \$61468.79. It must be remembered that the royalty upon Coal raised during the year ending with September last remains to be paid during the current year.

I respectfully submit this Report and the appended statistical tables and accounts in the belief that they prove the mining affairs of this Province to be now in a prosperous condition; whilst they afford a reliable promise of those Mines becoming a source of largely and rapidly increased revenue in future years.

I have the honor to be,

Your obedient servant,

P. S. HAMILTON.

The Honorable PROVINCIAL SECRETARY.

(APPENDIX A.)

Tables showing the number of Gold Mines being worked, the number of Men engaged in Mining, the quantities of Quartz raised and crushed, with average yield per ton, and the total yield of Gold, &c., &c., in the various Gold Districts, for Twelve months ending September 30th, 1865, as per Statistical Returns of the Deputy Commissioners.

APPENDIX No. 4.

DELEGATION TO ENGLAND CORRESPONDENCE.

EXTRACT FROM THE MINUTES OF THE EXECUTIVE COUNCIL OF THE PROVINCE
OF NOVA SCOTIA.

20th June, 1865.

Resolved,—That His Excellency be advised to nominate the Hon. Dr. Tupper, Provincial Secretary, and the Hon. W. A. Henry, Attorney General, to proceed to England as Delegates representing the Government of this Province, and charged with the following duties:—

First,—To confer with the Imperial Government upon the question of the Reciprocity Treaty, and the exactions levied by the Government of Newfoundland upon the fishermen of this Province on the coast of Labrador. On both of these subjects the Delegates are to act in accordance with the Reports of the Committees on Trade and Manufactures and on the Fisheries, adopted by the Assembly during the past session, and in the spirit of the previous Minutes of Council and correspondence of this Government upon these matters.

Second,—The Delegates are also hereby specially authorized to contract, on the part of the Government of Nova Scotia, with any competent parties, for the construction of the lines of Railway from Truro to New Brunswick, and from Windsor to Annapolis, or either of them, in accordance with the act passed at the last session, providing for those works. The Delegates are specially charged to secure, if possible, the construction of both those lines of Railway upon the best terms in their power within the terms of that enactment. Also, to negotiate, upon the most favorable terms, the sale of Provincial Debentures for a sum not exceeding £400,000 stg., to provide for the completion of the line of Railway to Pictou, and the amount of stock to be taken by the Province on the proposed Railway to New Brunswick.

Third,—Also to investigate the amount of Coupons taken up by the Messrs. Baring for accrued interest on the public debt under their management.

Fourth,—Also to obtain the services of a duly qualified person for the office of Inspector of Mines.

Fifth,—Also to promote, as far as they are able, the Immigration of able-bodied laborers and other useful settlers to this Province.

[A correct copy.]

JAS. H. THORNE,
C. E. C.

REPORT.

MAY IT PLEASE YOUR EXCELLENCY:

The undersigned Delegates appointed to proceed to England, and charged with the duties enumerated in the Minute of Council dated 20th June, 1865, have the honor to present the following Report of their mission:—

We arrived in London on the 3rd day of July, and having duly reported ourselves at the Colonial Office, were invited to meet the Right Honorable E. Cardwell, M. P., Secretary of State for the Colonies, on the 8th day of July.

At that interview we stated the deep interest the people of Nova Scotia felt in the renewal of the Reciprocity Treaty, called the attention of Mr. Cardwell to the fact that, notwithstanding the representations made by this Government upon the right to be consulted in relation to any treaty which would deal so largely with the territorial interests of this Province, we observed with surprise

and regret that in the paper recently laid before Parliament, and which we had seen for the first time after our arrival in England, it was stated that Sir Frederick Bruce, the British Minister at Washington, had only been instructed to confer with the Government of Canada upon that subject. Mr. Cardwell replied that the action taken by Her Majesty's Government had been at the instance of a deputation from the Canadian Government, and that they would now be prepared to give the fullest consideration to any representations which we had to offer on the part of the Government of Nova Scotia. We urged the rights which all the Provinces interested had to be consulted in regard to a Reciprocity Treaty affecting the whole, and the increased weight which their joint and coöperative action would give to any proposals which might be submitted, and the greater security which would be afforded that any treaty concurred in by representatives from the different Governments of all the Colonies would be accepted by the various Legislatures by which such treaty would require to be adopted. We also referred to the desirability of an early understanding between the Governments of the different Colonies as to the best means of meeting the altered circumstances in their trade, in case the Reciprocity Treaty were not renewed. At a subsequent interview, Mr. Cardwell did us the honor to submit the draft of a despatch to His Excellency the Governor-General, authorizing His Lordship to summon a Confederate Council upon commercial treaties, to be composed of representatives from the Governments of Canada, Nova Scotia, New Brunswick, Newfoundland, and Prince Edward Island, with which we expressed our cordial satisfaction.

We discussed at length the question of the exactions levied by the Government of Newfoundland upon the salt and other fishing supplies of Nova Scotian fishermen upon the coast of Labrador, and beg to refer your Excellency to the subjoined correspondence upon that subject for the particulars relating thereto, and which, although not yet finally concluded, will, we trust, be brought to a satisfactory issue.

Mr. Cardwell invited our attention to the question of the proposed Union of the British North American Colonies, and fully discussed the same with us, as well as the question of the proposed Union of the Lower Provinces. We explained frankly the present condition of the former question in the same spirit as previously detailed in the correspondence of your Excellency with the Colonial Office, and zealously urged the advantage to be derived from the Legislative Union of the Lower Provinces, and that the larger Union would not be prejudiced, but promoted, by adopting that policy. After much discussion on several occasions, Mr. Cardwell finally informed us that Her Majesty's Government, while entirely approving of the Legislative Union of the Lower Provinces, regarded the early Union of the whole of the British North American Provinces as of such vital importance to the prosperity and security of British North America, that they could not consent to revert to the policy of a Legislative Union of the Maritime Provinces, unless it were taken up as a part of, and ancillary to, the scheme for the consolidation of the whole.

Our attention having been drawn, while in England, to the importance of having graving docks at Halifax capable of taking up the largest ships which visit this port, we applied to the Secretary of State for the Colonies to know whether the act which recently passed the Imperial Parliament, authorizing Her Majesty's Government to aid such works by a loan of money, could be made available here, if desired. We were referred to the Lords Commissioners of the Admiralty, and subsequently had an interview with His Grace the Duke of Somerset, the first Lord of the Admiralty, and Lord Clarence Paget, the Secretary, who readily assented to our proposition, and assured us that parties at Halifax complying with the terms of that act (a copy of which is hereto attached) could rely upon a loan for twenty years, from the Imperial Treasury, at four per cent., to the extent of £20,000 stg.

After two months of continuous and unremitting exertion, in conjunction with the Hon. A. J. Smith, and the Hon. J. C. Allan, the Representatives of the Government of New Brunswick, who cordially coöperated with us, a contract

was made with the International Contract Company, of which a copy is hereto annexed, providing for the construction of a railway from Truro to the border of New Brunswick, upon the route already adopted by the Government upon the recommendation of the Chief Engineer.

A contract was simultaneously entered into between the Representatives of the New Brunswick Government and the same company, for the extension of the line from the border of New Brunswick to Moncton.

Having satisfied ourselves, by careful enquiry, of the ability of the International Contract Company to fulfil their engagements, we were extremely anxious to embrace the line to Annapolis, as well as that to New Brunswick, within the contract; but the obstacle interposed by the clause in our act providing for the construction of those lines, which authorizes the Government at any time forever to assume the ownership of the line, was so great that we were defeated in that object, and but for the combination of interests between the International Contract Company and a company in course of organization, with a large capital, for the purpose of opening the Spring Hill Coal Mines upon an extensive scale, we could not have effected a contract even for the Trunk line; and in the course of those negotiations we found it necessary, for the purpose of promoting the construction of the Railway, and opening the mines, to assure the Hon. Mr. Dickey and J. Levisay, Esq., who represented some ten mining rights of search at Spring Hill, that the Government would give to the holders of those areas the fullest privileges consistent with the law and regulations relating to mines.

As the copy of the contract speaks for itself, we will not refer to it at length, but merely draw the attention of your Excellency to the fact that we have relinquished the right on the part of this Government to capitalize the subvention, unless by mutual consent, and that this Province has been relieved from the obligation to take £80,000 stg. of stock, authorized by the act,—six per cent. interest on that amount for twenty years being accepted as an equivalent therefor. The contract requires the road from Truro to Moncton to be completed within four years from June next.

The subjoined correspondence with Messrs. Baring will show the success which attended our efforts to secure the funds required to construct the Railway to Pictou. The agreement upon the part of that eminent firm to furnish money as required, in advance of sales, and at a rate which will be equivalent to the sale of bonds at par, must, in the present state of the money market, we conceive, be considered highly satisfactory.

We carefully examined the coupons taken up by the Messrs. Baring, and the annexed account will shew but a very small sum remaining in their hands, which will probably be soon called for.

We were enabled to secure the services of a gentleman as Inspector of Mines, whom, after the most careful inquiry, we believe to be well qualified for the performance of that important work. He possesses the strongest recommendations from Thomas E. Foster, Esq., who stands at the head of the mining department in England.

After making all the investigation in our power in regard to the subject of Immigration, we arrived at the conclusion that to effect any considerable results it would be necessary to have an agent or agents to act in London and other places for the Province, and that some means of cheap and direct transportation from emigrant ports to this Province must be provided.

Finding an opportunity of obtaining on favorable terms some very superior stud horses and brood mares of the best thorough-bred stock, and some superior Leicester sheep, we assumed the responsibility of acting for the Provincial Board of Agriculture in that matter, and we are gratified to find that our selections have met with their sanction, and are approved by many of the best judges of stock in the Province.

All of which is respectfully submitted.

CHARLES TUPPER,
W. A. HENRY.

LABRADOR FISHERIES.

(COPY.)

*London, 14th June, 1864,
8 Broad Street Buildings.*

Sir,—

Our friends in Newfoundland have sent us a newspaper with copies of correspondence between the Government of that Island and Nova Scotia respecting duties attempted to be levied by Newfoundland on fishing necessaries, &c., on the Labrador coast. We, in common with all the English merchants engaged in the Labrador trade and fisheries, consider such duties unjustifiable, if not illegal, and a memorial on this subject was presented to the Colonial office last year. The reply by the office was, that legally Newfoundland had the right to levy such duties, but the memorialists are by no means satisfied that this is the case, and they think that a remonstrance by the various colonies interested, say Nova Scotia, New Brunswick, Canada, and Prince Edward Island, together with the English merchants, will produce the desired effect. If this be the opinion of your Government we shall be happy to cooperate with it. We find on enquiry that the Nova Scotia Government have no agent in London. We shall, however, if wished, be happy to transmit a copy of the correspondence between the English merchants and the Colonial office, as well as of a case which has been submitted to Sir Hugh Cairns on the question of legality, and his opinion, which we are expecting to obtain daily.

We are Respectfully,

Your most obedient servants,

(Signed)

HUNT & HENLEY.

HIS EXCELLENCY the Governor of Nova Scotia,
Halifax, N. S.

*9 Charles Street, St. James,
17th July, 1865.*

SIR,—

The Minute of Council, a copy of which we had the honor of handing you at the first interview with which you favored us, and the accompanying papers, will have informed you that the collection by the Government of Newfoundland of duties on salt and other necessary supplies belonging to Nova Scotia fishermen, at the coast of Labrador, is viewed by the Legislature and Government of Nova Scotia as unjustifiable, and that we are charged to bring the subject to the notice of Her Majesty's Government. We consider that the practice adopted by the Government of Newfoundland in 1863, and continued since, is illegal and impolitic, and respectfully request your consideration of the objections taken by the Attorney-General of Nova Scotia in his report, a copy of which we beg herewith to hand you; and, in the event of the objections taken by him on abstract constitutional grounds not being sustained, we would most earnestly urge your consideration of the impolicy of levying duties in the manner complained of, and thereby forcing the inhabitants of one Colony to contribute to the maintenance of the Government of another by the means in the present case objected to by the people and Government of Nova Scotia.

We have, &c.,

CHARLES TUPPER,
W. A. HENRY.

The Right Honorable E. CARDWELL, Downing Street.

(COPY.)

*Attorney General's Office,
Halifax, 5th March, 1865.*

Having been directed by His Excellency, the Lieutenant Governor, to consider certain correspondence and documents touching the collection by the Government of Newfoundland of duties on salt and other necessary supplies of Provincial and American fishing vessels at the coast of Labrador, I beg leave to report as follows:—

I have no doubt of the power and right of the Legislature of Newfoundland to impose and collect duties on articles entering into consumption at Labrador. That, however, it appears to me, is not the question at issue; but it refers more particularly to the right of that Colony to collect duties on articles not entering into consumption or intended so to do.

I question the right of that Colony to collect a revenue from articles not landed or consumed, or intended so to be, and being only fishing supplies, in any part of the country under its territorial jurisdiction.

Duties are imposed principally, and in the case in question wholly, for revenue; and the levy of them creates an indirect tax upon the consumption of the country imposing them, for the support of the Government and for the benefit of its people.

It appears to me, however, that on no constitutional or fair principle should the inhabitants of Nova Scotia be taxed to sustain the Government of Newfoundland otherwise than upon articles entering into consumption in the latter Colony.

If, indeed, salt, the article which has been taxed, had been landed at Labrador, or consumed otherwise than for the legitimate purpose of curing of fish, no objection could be raised; but from the report of Mr. Winter, the Collector, I learn the fact that he levied the duty upon the whole quantity of salt found on board each vessel, without reference to any question of consumption at Labrador. I here refer to clauses five and nine of his report to the Newfoundland Government, dated 12th November, 1863.

From that report it may be fairly assumed—

1st, That there was no impression on the part of Mr. Winter or the authorities of Newfoundland that the salt on board Nova Scotia fishing vessels would, in fact, enter into consumption at Labrador, and thus the mere entry of a harbour at Labrador of a Nova Scotia fishing vessel, solely for shelter, has been and now is held sufficient to incur the liability of her owner to pay duty for salt and all other dutiable supplies on board.

2nd, That Mr. Winter finding a number of Nova Scotia fishing vessels at Blanc Sablon and other places where they were using the harbors solely for the purpose of refuge and curing fish,—their right to do which freely cannot under existing circumstances be disputed,—ordered the masters of vessels on board the ship "Volant," to pay duty for the whole quantity of salt on board their vessels; and, that the masters, after much objection and the exercise of a sound discretion, in the presence of an armed vessel, acceded to the demands of Mr. Winter by paying the duties; and thus was initiated the practice since pursued of taxing Nova Scotia fishermen for the salt on board their vessels, and thus they are made to pay duties on salt, portions of which at least they use at sea, and, in many instances, other portions of which not wet are taken back to Nova Scotia.

The question involved is, on principle, a wide one, capable, if sustained, of extensive application.

If Newfoundland can, constitutionally, in this way tax salt on board British fishing vessels of other colonies when using the harbors of Labrador solely for shelter or curing fish on board, Nova Scotia may impose even heavier duties, and could thereby levy contributions on all vessels passing through the Gut of Canso, or entering, for any purpose, the harbors of Nova Scotia, where may

be seen congregated, at some seasons of the year, over three hundred sail of United States fishing vessels, in addition to a large number of Nova Scotia and other Colonial fishermen.

This, it appears, would be resisted by the United States Government (see correspondence between Mr. Seward and Mr. Burnley in January and February last, and accompanying documents), and the same principle being involved between Nova Scotia and Newfoundland, I trust that by a proper representation to the Imperial Government steps may be taken to induce the Government of Newfoundland to discontinue a course from which that Colony derives comparatively little advantage, but is nevertheless one highly calculated to create unpleasant rivalries and feelings, and lead to unwise and irritating complications. Although I would not deny to the Legislature of Newfoundland the right generally to regulate, by enactment, the conduct of the fisheries at Labrador, I think it has not the right by a mere revenue law to tax the fishermen of other countries in the manner complained of.

(Signed)

W. A. HENRY,
Attorney General.

Copy of Mr. Winter's Report forwarded to Nova Scotia along with his printed Report laid before the House of Assembly.

*Custom House, St. John's.
5th May, 1861.*

SIR,—

In reply to the Report of the Committee of the House of Assembly of Nova Scotia relative to my charging duty on salt, &c., I have the honor to state for the information of His Excellency the Governor, that salt was the only article on which any of the Nova Scotia fishing vessels paid duty, and that only on the actual quantity *then on board* and intended for consumption on the Labrador. In doing so I only acted in conformity with the Act 26 Vict., Chap. 1, which says, that salt imported into Newfoundland and its dependencies shall be subject to sixpence per ton, duty. In exacting this duty from the Nova Scotia vessels I considered I was placing them on the same footing with the fisherman of the Labrador and Newfoundland, all of whom had to pay duty.

I have, &c.,

(Signed)

J. WINTER.

The Honorable the RECEIVER GENERAL, &c., St. John's.

(COPY.)

Washington, February 1, 1865.

SIR,—

I have the honour to transmit to your Excellency, copies of a note and of its enclosures which I have received from the Secretary of State of the United States with reference to a tax alleged to be imposed upon American fishermen in Newfoundland.

I have the honor to be, Sir,

Your Excellency's most obedient, humble servant,

(Signed)

T. HUME BURNLEY.

His Excellency Sir RICHARD McDONNELL, K. C. B., &c., &c., &c.

(COPY.)

Dep. State, Washington.

SIR,—

I have the honor to enclose a copy of a communication of the 26th ultimo, addressed to me by Isaac Boardman, Esq., of Newburyport, Mass., complaining of certain exactions of the Revenue officers of Newfoundland upon American fishermen. If, upon examination, the tax complained of is found to have been improperly imposed, it is not doubted that due redress will be afforded.

I have, &c.,

(Signed)

W. H. SEWARD.

T. HUME BURNLEY, Esq.

(COPY.)

Washington, Dec. 26, 1864.

DEAR SIR,

In behalf of citizens of this city engaged in the fisheries, I beg leave to lay before you a statement in regard to duties levied upon our trade by the authorities of Newfoundland and Nova Scotia, in our opinion contrary to the spirit and terms of the two countries.

For the past two years, upon the Labrador Coast a cutter has been sent by the Newfoundland Government, with a Collector who has demanded and received duties on all our salt, barrels, boats, and seines, carried only and solely for our own use on board our vessels, with a force sufficient to enforce their claims. We have submitted in some cases; where the masters have refused to pay, the articles, or sufficient to pay the duties, have been forcibly taken by the Collector. A statement is always given by the Collector there, that upon a Consular Certificate being returned showing that the articles upon which duties were levied had been reloaded in the United States, the duties would be refunded. Accordingly this year our vessels having paid from forty five to sixty-five dollars each, we procured a British Consular Agent's Certificate and forwarded to our agents at St. John's Newfoundland, demanding a drawback, but are refused, as the accompanying documents will show.

In the case of Nova Scotia, a duty is levied and payment by force compelled on empty barrels and other articles sent by us for the use of our mackerel vessels in the Gulf of St. Lawrence, our vessels usually landing their mackerel at the Strait of Canso and returning to the Gulf for other forces.

The fisheries, both cod and mackerel, are important branches of industry in this community, and, as by the Reciprocity Treaty our Provincial neighbors are allowed to bring their products into this country free of duty, we see no good reason why our vessels must be compelled to pay tribute to the Colonies. If, by existing stipulations, we are obliged to pay, of course we must submit; but otherwise we hope to be protected from such petty exactions, although, in the aggregate, they amount yearly to quite a large sum.

With respect, &c.,

(Signed)

ISAAC H. BOARDMAN.

(COPY.)

St. John's, Newfoundland, Dec. 17, 1864.

DEAR SIR,—

Your esteemed favor of the 6th inst., we are duly in receipt of, and we have placed before the Custom Department here the Consular Certificates you had sent us, and claimed thereon drawback or return duty on the articles men-

tioned. To this application there has been sent us in reply, the statement which is now attached to the Consular papers referred to, by which you will see that no return duty will be made. We were advised in due course of Captain Pyn's draft on you having been duly honored, for which we are obliged.

We shall be most happy to be of service to you here at any time, and hope when you come to renew your business arrangements for any operations connected with the fisheries next season, that it may prove more satisfactory than the present year has been.

We remain, &c.,

(Signed)

JOB BROTHERS & CO.

ISAAC H. BOARDMAN, Esq., &c.

(COPY.)

Newburyport, Nov. 8, 1864.

To the Collector of the Port of Lance a Loup, N. F., or whom it may concern :

This is to certify that there has been landed at this port of Newburyport, from brig "Northern Belle" and schooner "Emma V," merchandize as follows, viz:—

From brig "Northern Belle,"
25 tons salt,
400 empty herring barrels,
2 boats.

From schooner "Emma V."
25 tons salt,
175 empty herring barrels,
2 boats.

(Signed)

BENJ. DAVIS, JR.,

H. B. M. Consular Agent,

For the port of Newburyport.

Custom House, St John's, 17th Dec., 1864.

A drawback is claimed for the above articles, on which duty has been paid at the Labrador, and beg to state that by the Customs Management Act, 27th Victoria, chap. 2nd, sec. 62, no drawback can be allowed on herring barrels or boats, because the duty on them is 11 per cent. *ad valorem*; the act only provides that drawback shall be allowed on articles paying duty by tale, guage, weight, or measure. The duty on salt is 6d. per ton; the duty on fifty tons would be 25s. The act only allows drawback where the duty on this article amounts to twelve dollars, hence no drawback can be allowed on the above articles, under the existing laws of this Colony.

(Signed)

T. WINTER,
Collector, Labrador.

ESSEX, SS.

Then personally appeared Wm. Sanborn, master of brig "Northern Belle," and made oath that the above described merchandize was the identical merchandize named in certificates of clearance granted the above named brig "Northern Belle" and schooner "Emma V," at the port of Lance a Loup, N. F., on the 29th day of July, in the year 1864.

Dated at Newburyport, this 28th day of November, in the year 1864.

BENJ. DAVIS, JUNR.,
Justice of the Peace.

Downing Street, 9th August, 1865.

GENTLEMEN,—

I am directed by Mr. Secretary Cardwell to acknowledge the receipt of your letter of the 17th ultimo, bringing under his notice the question of the duties levied by the Government of Newfoundland on salt and other articles used by the fishermen of Nova Scotia in the prosecution of their fisheries on the coast of Labrador.

Mr. Cardwell gathers from your letter, and from the report of the Attorney General which you enclose, that you are prepared to admit the right of the Newfoundland Government to impose duties on goods intended for consumption in Labrador, but that you deny the right in law or in policy of the Newfoundland Legislature to impose duties on goods brought into Newfoundland waters but not intended for consumption, and that you infer from a Report of the Collector of Customs at St. John's, dated 12th of November, 1863, that the tax in question was in fact levied on goods not so intended.

In reply I am to observe to you that it appears unnecessary to discuss the principles laid down by the Attorney General, as it will be observed that the Collector of Customs in a Report dated the 5th of May, 1864, and published in the Newfoundland Gazette of the 17th of May, 1864, that at that time "salt was the only article on which any of the Nova Scotia fishing-vessels paid duty, and that only on the actual quantity *then on board* and intended for consumption on the Labrador."

I enclose a copy of this Report, which appears to have been communicated to the officer administering the Government of Nova Scotia in Sir A. Bannerman's Despatch of 7th May, 1864.

I am gentleman,

Your obedient servant,

FREDERICK ROGERS.

*9 Charles Street, St. James,
10th August, 1865.*

SIR,—

We have the honour to acknowledge the receipt of your letter of the ninth inst., in reply to our communication addressed to the Right Honorable the Principal Secretary of State for the Colonies, on the 17th of last month, touching the duties levied by the Government of Newfoundland on salt and other articles on board of Nova Scotia fishermen on the coast of Labrador.

As we are unable to learn clearly from your letter whether it is the opinion of her Majesty's Government, that duty can be properly collected upon salt on board fishing-vessels of other countries using the waters and harbours of Nova Scotia for the purpose of shelter in the prosecution of their voyages, and not landed or intended to be landed on the shores of that Colony, or enter into consumption, we would feel obliged by a more particular statement upon that point; because, if it be decided that salt on board fishing vessels, intended to be used on board for the purpose of curing fish, and which is not intended to be landed in the Colony or enter into consumption, is liable, while on board, to the imposition of duty, Nova Scotia may collect a large revenue, from United States and other vessels, by merely a change of tariff by which salt will become liable to pay duty.

If salt can be taxed in the way referred to, all other fishing supplies may be also, and the fishermen of Nova Scotia will be free from taxation only by the moderation of the authorities of Newfoundland in the collection of customs duties, the table of which includes or may include seines, nets, and other supplies, duty upon which may be levied by a mere order from the Government of Newfoundland to their officers at Labrador, and which course may also be applied to Newfoundland.

We feel that such immunity from taxation of the fishermen of Nova Scotia should not rest upon a basis so uncertain and equivocal, and therefore deem it our duty respectfully to urge a consideration of the objections heretofore presented to the exaction of the duty in question. Feeling that the subject involves consideration which may and probably will lead to embarrassments and disputes that may now be prevented,

We have the honor to be,

Your most obedient servants,

(Signed)

C. TUPPER,
W. A. HENRY.

Downing Street, 25th August, 1865.

GENTLEMEN,—

I am directed by Mr. Secretary Cardwell to acknowledge the receipt of your letter dated the 10th instant, but which was not received at this Department until the 16th instant.

In order to enable Mr. Cardwell to give the representations which you have made to him, due consideration, more precise information on one or two points is requisite.

I am therefore to request that you will be so good as to state what is the actual practice on the part of the Newfoundland authorities of which you complain; that is, whether you intend to controvert the statement of the Collector of Customs quoted in Sir F. Rogers' letter of the 9th instant, viz., that the duty in question is only levied on salt to be consumed in Labrador. If it should not be your intention to controvert the statement that the claim of the Newfoundland Government is thus limited, Mr. Cardwell would, in that case, wish to be informed whether he is to understand your letter and statement on your part, that, in practice, this claim is exceeded, or, that the claim thus made is illegal in itself.

I am, gentlemen.

Your obedient servant,

(Signed)

FREDERICK ELLIOT.

Honorable CHARLES TUPPER,
Honorable W. A. HENRY.

Halifax, N. S., 22nd November, 1865.

SIR,—

We have to acknowledge the receipt of Mr. Elliot's letter of the 25th of August last to us, by your directions, on the subject of the duties levied at the coast of Labrador, and requesting more precise information on one or two points. We regret that owing to our having been separated before that communication was written we could not consider and reply to it before leaving England, and, that, owing to a similar cause since our return, the reply has been still further delayed. We now, however, take occasion to say, that we, having frankly admitted the right of the Government of Newfoundland to levy and collect duty on salt and other fishing supplies landed for or entered for consumption, at the same time contested the right to collect duty on articles not landed or entered for consumption or intended so to be.

If vessels enter the ports of the Labrador having dutiable fishing supplies, and land or sell them on board without entering, paying duties, and obtaining a permit to land, we would at once say they would be liable to seizure for smuggling. That is not, however, the case presented in the report of the Col-

lector of Customs quoted by Sir F. Rogers. In that report, we respectfully submit that the position originally taken by us is admitted, which was, that duties had been collected on salt not landed or sold on board or intended so to be. "I have the honor to state, for the information of His Excellency the Lieutenant-Governor, that salt was the only article on which any of the Nova Scotia fishing-vessels paid duty, and that only on the actual quantity *then on board* and intended for consumption on the Labrador." This statement of the Collector we admit to be correct, for it is hard to imagine how, by any possibility more could, under any circumstances, be exacted. "Only the quantity *then on board*." This language is calculated highly to mislead. It might, if applied to a vessel intending to land or sell salt, be perfectly right that duty should be paid on the quantity *then on board*, but the charge we make is simply this, that duty was collected and forced from Nova Scotia fishermen, indiscriminately, without inquiry, or any reason to believe it was to enter into consumption, further than the mere wetting it on board in curing fish, the latter not intended to be landed at all in any part of Labrador or Newfoundland. And, on comparing the Collector's report of November 1863 with that of 1864, no doubt need be entertained of the fact that duty was so collected. The Collector admits he collected duty for the whole "quantity *then on board*;" but he, as we claim, disingenuously adds, "and intended for consumption." We deny that in the cases complained of there was any, the slightest intention, that the salt for which duty was exacted should enter into consumption, directly or indirectly, at Labrador, and can confidently state that Mr. Winter had no reason to suppose either that the salt or the fish cured by it would either be landed or go into consumption at the Labrador, as suggested. We would direct attention to the concluding clause of the last report: "In exacting this duty from the Nova Scotia vessels I considered I was placing them on the same footing with the fishermen of Labrador and Newfoundland, all of whom had to pay duty." Because, therefore, the Labrador and Newfoundland fishermen paid duty on salt regularly imported, landed, and sold, and the fish cured therewith landed and subsequently exported from those places, Mr. Winter assumes the right of sending officers on board all Nova Scotia fishing-vessels entering the harbours of the Labrador solely for shelter, and prosecuting their fishing voyages, and levying duty on salt never to go into consumption there, so as to put "Nova Scotia vessels on a footing with the fishermen of Labrador and Newfoundland, because the former got their salt in Nova Scotia, duty free." The Revenue officers at Labrador have the right and means to ascertain from the master of every vessel entering their port, whether any of his supplies are intended to be landed or sold. If not, but solely for his legitimate voyage as a Nova Scotia fisherman, the whole fruits of which are to be brought back to this Province without either salt or fish touching land at Labrador or Newfoundland, or going into consumption at either place, then we respectfully submit that it is both illegal and unjust to tax his salt. If, however, smuggling or attempt at evasion of duty is found, we wish not to interpose any obstacles to the adoption of measures necessary to prevent such, but you will fail to discover in either report the slightest suggestion that the measures adopted were caused by any attempt at smuggling on the part of Nova Scotia vessels.

We have every reason to believe that our previous and present statements and positions taken as to the exactions at Labrador will not be attempted to be denied. If they are, abundant proof can be afforded that they are correct.

Respectfully asking your consideration of the foregoing statements,

We remain,

Your most obedient servants,

C. TUPPER,
W. A. HENRY.

The Right Honorable E. CARDWELL, Colonial Secretary, &c., &c.
Downing Street, London.

CAP. CVI.—*An Act to authorize Loans in aid of the Construction of Docks in British Possessions.*

5th July, 1865.

Whereas, with a view to secure accommodation for vessels of the Royal Navy in British possessions abroad, it is expedient to authorize loans in aid of the formation there of docks of dimensions greater than would be requisite for commercial or other private purposes only:—

Be it therefore enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords, spiritual and temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

1. This act may be cited as *The Colonial Docks Loans Act, 1865.*
2. In this act the term "the Admiralty" means the Lord High Admiral of the United Kingdom, or the Commissioners for executing the office of Lord High Admiral:

The term "Dock" includes Basin or other work for the reception of vessels:

The term "Colony" includes any plantation, Island, or other possession within Her Majesty's Dominions, exclusive of the United Kingdom and its immediate dependencies, and exclusive of India, as defined by the act of Parliament of 1858 "for the better Government of India."

The term "Person" includes any authority, and any body, corporate or unincorporate.

3. For the purposes of loans under this act, the Commissioners of Her Majesty's treasury may from time to time, by warrant under the hands of any two or more of them, cause to be issued out of the consolidated fund of the United Kingdom or the growing produce thereof, to the account of the Admiralty, any sums of money not exceeding in the whole the sum of three hundred thousand pounds.

4. The Governor and Company of the Bank of England shall open in their books an account with the Admiralty, under the title of "The Lord High Admiral or Commissioners of the Admiralty for the time being on account of Colonial Docks."

5. All money from time to time issued under this act out of the consolidated fund shall be carried to the credit of the said account.

6. Out of the money for the time being standing to the credit of the said account, the Admiralty may from time to time, if and as it seems fit, with the previous approval in each instance of the Commissioners of Her Majesty's Treasury, lend such sums of money as may be required to any person forming or enlarging any dock in any Colony, and being willing to make the same of dimensions sufficient to meet the requirements of Her Majesty's Naval Service, on such terms and conditions as may be agreed on between the Admiralty and the borrower, subject nevertheless and according to the following provisions:

(1.) The money lent shall not exceed the sum of twenty thousand pounds, nor shall it exceed the estimated cost of increasing the dimensions of the dock beyond those required for commercial or other private purposes.

(2.) The amount agreed to be lent shall be made payable by instalments as the works connected with the formation or enlargement of the dock progress.

(3.) The money lent shall bear interest at not less than four pounds per centum per annum.

(4.) All and every part of the money lent shall be made repayable by instalments within a period not exceeding twenty-one years from the respective dates of the payments on account of the loan.

(5.) The borrower shall give security to the satisfaction of the Admiralty and of the Commissioners of Her Majesty's Treasury, by mortgage of the dock where practicable, or otherwise, for payment of interest and repayment of principal.

7. By virtue of this act, any loan may be made, and any security may be given, by way of mortgage or otherwise, on any dues, rates, tolls, revenues, or property of the borrower, notwithstanding the absence of any power in the

borrower so to borrow or give security, except by virtue of this act, and notwithstanding any limitation of the amount authorized to be raised under any borrowing power.

8. Every mortgage or other security in respect of a loan under this act shall have priority to all other securities and charges whatever on or affecting the dues, rates, tolls, revenues, or property comprised in such mortgage or other security, except to a security or charge of prior date and execution, securing money actually lent before the date of the agreement for the loan under this act.

9. In any agreement, deed, or instrument made or executed under this act, the Admiralty may be styled "The Lord High Admiral of the United Kingdom, or the Commissioners for executing the office of Lord High Admiral," without any name being expressed.

10. Any such agreement, deed, or instrument signed or executed by two of the Commissioners of the Admiralty shall be as valid and effectual as if signed or executed by the Commissioners for the time being.

11. All the estate, interest, rights, and powers of the Admiralty under any mortgage or other security in respect of a loan under this act, shall, by virtue of this act, go to and vest in the Lord High Admiral or Commissioners of the Admiralty for the time being in succession.

12. All interest from time to time payable, and all principal money from time to time repayable, in respect of any loan under this act, shall be paid, under the direction of the Admiralty, to the Cashiers of the Governor and Company of the Bank of England, and when so paid shall be carried to the credit of the account kept by them with Her Majesty's Exchequer.

13. Any money for the time being standing to the credit of the account opened with the Admiralty may from time to time, under the direction of the Commissioners of Her Majesty's Treasury, be transferred by the Governor and Company of the Bank of England to the account kept by them with Her Majesty's Exchequer, and when so transferred shall be carried to and made part of the consolidated fund of the United Kingdom.

14. Every agreement for a loan under this act shall be laid before both Houses of Parliament within thirty days after the making thereof, if Parliament is then sitting, and if not then within thirty days after the next meeting of Parliament.

15. Any agreement made before the passing of this act by the Admiralty, and approved by the Commissioners of Her Majesty's Treasury, for a loan for such a purpose as aforesaid, is hereby confirmed; and any money may be lent, and all interest agreed for shall be paid, and all instalments of principal money agreed for shall be repaid, as nearly as may be in all respects as if the agreement were made under this act.

(COPY.)

Memorandum of Agreement made and entered into this Fifteenth day of August, One Thousand Eight Hundred and Sixty-five, between the Chief Commissioner of Railways of the Province of Nova Scotia, by direction and authority of the Governor and Council, acting by the undersigned Charles Tupper, Provincial Secretary, and William Alexander Henry, Attorney General of the said Province of Nova Scotia, hereinafter called "the Representatives," of the one part, and the International Contract Company, limited, of 85 Cannon street, West, in the city of London, hereinafter called "the said Company," of the other part:

Whereas, an act of the Provincial Legislature of Nova Scotia was passed on or about the second day of May, 1865, intituled, "An Act to provide for the construction of two other sections of the Provincial Railways," and by such act provisions were made for the construction of a certain Railway from Truro to the boundary line of New Brunswick, and from Windsor to Annapolis. And whereas, in pursuance of the provisions of the said act, a negociation has been

entered into between the said Representatives and the said Company, having for its object an arrangement by which the said Company shall undertake the construction of the section of the said Railway from Truro to the boundary line of New Brunswick, under the provisions of the said act, and subject to the terms and conditions hereinafter mentioned:—

Now this agreement witnesseth, and it is agreed by and between the said parties hereto, as follows:

1. The before recited act shall be the basis of this agreement, so far as it relates hereto, except as the same may by this agreement be agreed to be modified.

2. The said Company, in consideration of the premises and of the agreement on the part of the said Representatives hereinafter contained, hereby agrees to construct the said Railroad under the provisions of the said act, and subject to the terms and conditions hereinafter mentioned, on the central route which has been recommended by the Government Engineer, and approved by the Governor in Council, and the said Company shall commence the surveying not later than the month of November next, and prosecute the same until completion, and shall commence the works *bona fide* at a period not later than the month of June, 1866, and shall complete and open the line for traffic within four years from the first day of November next. And further, that in respect to section 19 of the said act, no steeper gradient or curve of a smaller radius shall be admitted on the said Railroad than on the present Railway line from Halifax to Truro, and the said Railroad shall in all other respects be equal in point of construction and efficiency to the said Railroad from Halifax to Truro. The rails to weigh sixty pounds to the yard, and to be joined together with fish plates; and it is also understood and agreed that, by mutual consent, alterations may be made in the provisions of the said 19th section, and of this clause.

3. The said Company shall be bound to provide such conveyance for the officers and soldiers of Her Majesty's forces, ordnance corps, marines, militia, or police forces, at such time or times (whether the same shall be the usual hours for starting trains or not) as shall be required or appointed by any officer duly authorized by the Governor for that purpose, and with the whole resources of such Company or body corporate at fares not exceeding two cents per mile for each officer, soldier, marine, or private of such forces, respectively, and also for each wife, widow, or child above twelve years of age, of a soldier entitled by act of Parliament or other competent authority, to be sent to their destination at the public expense,—children under three years of age so entitled to be taken free of charge, and children of three years and upwards, but under twelve years, so entitled, being taken at half price of an adult, provided that every officer conveyed shall be entitled to take with him one hundred weight of personal luggage without extra charge, and every soldier, marine, private, wife, or widow shall be entitled to take with him or her half a hundred weight of personal luggage without extra charge,—all the excess of the above weights of personal luggage being paid for at the rate of not more than eighty cents per 100 weight per 100 miles, and all public luggage, stores, arms, ammunitions, and other necessary things (except gunpowder and other combustible matters) shall be conveyed at charges not exceeding four cents per ton per mile, the assistance of the military or others being given in loading or unloading such goods.

4. The said Company shall be bound to convey Her Majesty's mails at the same rate of charge as now paid for the same service to the Railway Department in Nova Scotia.

5. And the said Representatives for and on behalf of the said Province of Nova Scotia, under the authority hereinbefore mentioned, in consideration of the premises, hereby agree to and with the said Company, as follows:—

6. That the amount of the subvention mentioned in section 2 of the said act shall be reckoned on 70 miles, or £22,400 stg. per annum.

7. That in consideration of the Provincial Government taking no stock in the said Railway, as provided in section 2 of the said act, the said Representatives agree to increase the annual subvention to the sum of £2400 stg.

8. That after the first payment of the subvention, as mentioned in section 4 of the said act, all future payments shall be made half yearly, in the city of London.

9. That in case the subvention shall not be capitalized as provided in section 4 of the said act, or in clause 16 of this agreement, the subvention shall only be paid in proportion to the progress of the works, and in the event of less than one quarter of the entire works being completed during the first year, or of one one-eighth during any subsequent half-year, the Provincial Government shall be entitled to retain a proportionate deduction from such subvention until such proportionate part is completed, and on the completion of the same the whole of the said amount so retained shall be paid to the Company.

10. That the powers comprised in section 5 of the said act shall not be put in force without the consent in writing under the common seal of the Company.

11. That all lands required for the Railway track and appurtenances shall be provided gratis to the said Company, with the right of entering on all ungranted lands belonging to the Government and taking free of cost all materials required for the Railway, as under the provisions of section 11, chapter 70, referred to in the said act.

12. That the said Company shall be entitled to make and enforce a tariff of charges for fares and freights equal to, but not exceeding (except by mutual arrangement) the tariff now in force on the Government lines, copies of which are this day signed by the said Representatives,—such limitation not to apply to the charges for conveyance of horses and waggons, which shall be determined by mutual agreement.

13. That the provisions of section 9 of the said act, as far as regards the possession and ownership of the Railway by Government shall only be put in force subject to the prior payment or tender to the Company of the value thereof, as mentioned in section 7 of the said act, such value to be ascertained by arbitration, either under the provisions of section 8 of the said act or of this agreement.

14. That should the said Provincial Government exercise the powers given them under the provisions of section 7 of the said act prior to the opening of the said Railway for traffic, the amount to be paid to the said Company as the value of the said Railway, shall not be less than the capital expended, including the subvention and all liabilities *bona fide* incurred, with six per cent. per annum interest thereon, exclusive of the subvention; and should the said Government exercise such powers after the opening of the said Railway for traffic, the amount to be paid to the said Company as the value of the Railway shall not be less than the capital expended, including subvention and all liabilities *bona fide* incurred, together with an amount which with the nett earnings of the said Railway, shall be equal to six per cent. per annum interest on the amount expended, exclusive of the subvention.

15. That if Provincial Debentures be paid in pursuance of the provisions of section 7 of the said act, the same shall be reckoned at a price which shall make them equivalent to cash, and in case any difference of opinion shall arise as to the value of the Debentures to be paid, the same shall be determined by arbitration, either under the provision of section 8 of the said act or of this agreement.

16. That in case the said Company shall determine to capitalize for itself the said subvention, or any part thereof, the Provincial Government shall render every assistance in their power to accomplish this object, and shall, if necessary, enter into a direct obligation with all proper parties for the payment for the future of the said subvention to such parties direct, instead of to the said Company. Provided that all monies raised under the provisions of this clause shall be deposited in the joint names of the parties hereto, or such other names as both shall agree upon, in the National Bank, or some other Bank in London, to be approved of by the parties, and to be drawn out by both parties, and applied only for the construction of the Railway pro rata with the progress of the works until the said Railway shall be fully completed and opened for traffic, after which the balance, if any, shall be paid to the Company.

17. That the said Company shall, for the purpose of carrying out this agreement, have the power to form a joint stock Company, under the provisions of the English Companies Act, 1862, with such amount of capital and with borrowing powers and such articles of association as the said Company may think proper, and when such Company is formed and capital placed to the satisfaction of the parties hereto of the first part, the said intended Company so to be formed shall be accepted in lieu of the said Company for the purposes of this agreement.

18. That an Act of Incorporation for such intended Railway Company shall be submitted to the Legislature of Nova Scotia, and upon such incorporation being made, the Government for the time being shall have the power of nominating two Directors to the Board of such Company.

19. That all materials and stores required for the construction and working of the Railway shall be entitled to a drawback of the amount of import duties paid thereon by the said Company, and that the Provincial Government shall grant the free use of the landing stage and Railway Stations at Halifax, Bedford, and Truro, and transit over the Government Railways,—the said Company paying all expenses incurred in landing and for haulage and handling of such materials and stores, and also the cost transit thereof.

20. That should any Legislative alterations be required for the purpose of carrying the terms of this agreement into effect, the said parties of the first part hereby undertake and agree to use all proper means in their power to obtain the same.

21. And it is further mutually agreed that prior to the opening of the Railroad a traffic arrangement shall be made between the said Company and the Provincial Government for the mutual use and employment of their respective lines of Railway, or for the joint operation thereof on equitable terms.

22. That the third arbitrator proposed to be appointed under section 8 of the said act by the Principal Secretary of State for the Colonies, shall act only as Umpire in the event of disagreement between the other two arbitrators therein named.

23. That by mutual consent the appointment of an arbitrator under the provisions of section 8 of the said act, by the Principal Secretary of State for the Colonies, may be dispensed with, and the same may be appointed in such manner as the parties hereto may agree upon.

24. That in every arbitration required under this agreement or under the said act, in case the Government or the said Company shall fail to appoint an arbitrator and to notify such appointment to the other party within three calendar months after request in writing, the Principal Secretary of State for the Colonies shall nominate and appoint the arbitrator for the party so refusing, and such arbitrator shall have the same power and authority as if he had been nominated and appointed by the said Government or the said Company respectively. In witness whereof, the said Representatives have hereto set their hands, and the said Company their seal, the day and year first above written.

9 Charles Street, St. James,
July 11th, 1865.

GENTLEMEN,—

Referring to the conversation we had with you on Tuesday last, we have the honor to inform you that the Government of Nova Scotia will require to sell Bonds in England, for the purpose of Railway Extension, to the extent of from £300,000 to £400,000 stg. No part of this money will be required before the commencement of next year, as we shall be enabled to sell within the Province all that will be needed up to that time. The whole sum required is not expected to exceed £500,000 stg. You are already aware, from the papers placed in your hands, of the very satisfactory financial condition of the Province, whose rapidly developing resources and increasing commerce have enabled us for years, with the low tariff of 10 per cent., not only to meet all charges upon the revenue, but also to expend a large and annually increasing surplus upon the general improvement of the country.

Under these circumstances, we beg to inquire upon what terms you will negotiate the sale of whatever amount we may require of Debentures of the same character as those sold hitherto by you for our Government, and whether and upon what terms you would be disposed to take £150,000 of such Bonds on your own account, to be placed to our credit in sums of £50,000 each, at three, six, and nine months, from the 1st day of January, 1866.

We have, &c.,

(Signed)
(Signed)

C. TUPPER,
W. A. HENRY.

To MESSRS. BARING BROS. & Co.

London, 19th July, 1865.

GENTLEMEN,—

We have the honor to acknowledge the receipt of your letter of 14th instant, in which you repeat what was already mentioned in conversation, that it is the intention of the Government of Nova Scotia, for Railway wants, to sell to the extent here of £300,000 to £400,000 Bonds of the Province similar to those already negotiated, and desire to know the terms on which we would take charge of such sales.

It would be necessary, of course, to deposit a certified copy of the Act of Parliament, the Order in Council, and of the authority to negotiate this operation; but supposing, as would no doubt be the case, that these preliminaries were satisfactorily arranged, our terms would be as heretofore—one quarter of one per cent. brokerage, and one per cent. commission when we are not in cash advance, and two per cent. commission after advances. There would likewise be the cost of stamps actually paid for to be charged.

For cash advances we should charge interest at the Bank of England rate, but never under five per cent. per annum, and we should allow interest at the rate of four per cent. on funds in our hands.

When we are acquainted with your views as to the price for sale, it will be matter of consideration whether we should attempt the sale by a subscription for the whole amount, or sell gradually as opportunities offered. We regret to say that there is at present so little demand for these Bonds that unless they are offered at a considerable reduction from the actual quotations, we fear that sales will be very slow and difficult, and on that account we do not believe, even if it suited us, that it would be for the interest of the Province to sell us bonds for £150,000 at the price which we could afford to give; but we are willing, if sales to that extent are not made before the beginning of next year, to advance to the Government of Nova Scotia, on the above-mentioned terms, £50,000 on 1st

January 1866, £50,000 on 1st April following, and £50,000 on 1st July next, against deposit with us of Bonds to cover our advances, and with authority to realize the same for that purpose.

We trust that these observations will be satisfactory to you, and that you will perceive in them another proof of our constant desire to meet the views and to promote the welfare of the Government of Nova Scotia.

We have, &c.,

BARING BROTHERS & CO.

HON. CHARLES TUPPER, Provincial Secretary,
HON. W. A. HENRY, Attorney General,
London.

August 4th, 1865.

GENTLEMEN,—

We regret to find by your letter of the 19th July, that you are not disposed to take, as before, £150,000 of our bonds at par,—the lowest price at which we would feel at liberty to sell. We are much obliged by your offer to place that amount to the credit of the Province as advance of sales, should it be desired; but in order that the Government may know the precise sum required to be provided annually, for interest, we would much prefer to have the rate fixed on any advances which may be made, as also upon any money which may at any time be to our credit. You will also oblige us by stating how long you would be willing to hold any bonds, placed as security in your hands, if we are indisposed to sell at the rates which could be realized. Fully sensible of the anxiety you have ever evinced to promote the interests of our Province,

(Signed.)
(Signed.)

C. TUPPER,
W. A. HENRY.

Messrs. Baring Bros. & Co.

London, 10th Aug., 1865.

GENTLEMEN,—

We have the honor to acknowledge receipt of your letter of 4th inst., and, in conformity with its contents as well as with the conversation with which you have favored us, we will shortly recapitulate the conditions upon which we are agreed to negotiate the further issue of the bonds of the Province of Nova Scotia, with those alterations in the terms of our letter of 19th July as to which we are agreed.

It is therefore understood that we will exert ourselves, as heretofore, to realize the new bonds to the amount of £300,000 to £400,000, on the most advantageous rates for the Province, and according to the limits which will be given to us, either by subscription or by sales in the market, for which the Provincial Government will pay one quarter of one per cent. brokerage, the stamp duty, with other incidental charges incurred, and one per cent. commission, which we beg to repeat is a lower charge than Governments are in the habit of paying for the negotiation of a loan. In case we are unable to attain the limits given by the Government, and thus to effect prompt sales in time for the Provincial wants, we consent to advance, if wanted, on deposit of these bonds, £50,000 on 1st January, 1866, £50,000 on 1st April, and £50,000 on 1st July of the same year, with the charge of an additional one per cent. commission. The interest

we shall charge on such advances will be at the rate of five per cent. per annum, whilst we shall allow interest at the rate of four per cent. on any money which the Province may have in our possession. These advances will be for the period of one year from the periods above named, subject to any agreement which may be subsequently and mutually made for the continuance of the loans if required, and it will thus be obvious to you that the Province will only pay six per cent. per annum for these loans, or the equivalent of the interest which the bonds bear. The Commission for the payment of dividends and for the redemption of the bonds will, as in former cases, be one per cent.

We should recommend that the new bonds should be similar to those already known in this country, should be all dated on the same day, with thirty years to run before redemption; and that the dividend warrants should all be payable at our office on 1st January and 1st July of each year, as any difference in dates, term of years to run, and payment of interest, are difficulties in the way of a satisfactory sale. We should also advise that the new issue should be in bonds of £500 and of £100 each in equal proportions.

In reference to your verbal expression of surprise that now, when the credit of the Province of Nova Scotia is well established, we should be unwilling to purchase at once £150,000 of these bonds for our own account at par, and that the market-price of such bonds should be lower than it was when the first bonds were issued, we may venture to observe that the present quotations will sufficiently explain our reluctance in the first respect, and that various circumstances have tended to check the demand for the Provincial bonds. The occurrences on the Continent of America during the last four years could hardly fail to inspire in the public mind some anxiety as to the future position and expenditure of the British Possessions in the neighborhood of the United States, and thus to throw some doubt (whether justified or not), as to the eligibility of the Provincial debt, as a security for investment, whilst the most casual glance at any stock-list will convince you of the fall in prices which has occurred in most of the funds since the last ten years, as well as of the variations in popular taste, and the desire of the public to obtain high interest in new loans, shares and schemes, without perhaps a due regard to the security offered. Against such changes of taste and fashion it is impossible to guard; but although we do not entertain at present the expectation of obtaining the par price for Nova-Scotia bonds, we hope that the increasing resources of the Province, its constant financial regularity, and the maintenance of peace, will ere long recommend them to the favorable notice of those who wish to unite solid security with ample interest.

We remain, &c.,

BARING BROTHERS & CO.

The Honorable CHARLES TUPPER,
The Honorable W. A. HENRY,
9 Charles Street, St. James.

9 Charles Street, St. James,
August 11th, 1865.

GENTLEMEN,—

We have the honor to acknowledge the receipt of your letter of yesterday, and to accept the terms upon which you state your willingness to negotiate the further sale of bonds for the Government of Nova Scotia, and to advance £150,000 on those bonds if required. We beg to thank you for the information given as to the present condition of the money market here, as also for the valuable advice tendered touching the best form of bonds to be issued. The act of

the Legislature passed in 1864, authorizing this further issue of bonds, which we have the honor to place in your hands, fixes the time of redemption at twenty years, the same as those previously issued; but if you think that any extension of the time of repayment to thirty years would enable us to realize a larger price for them, the Legislature would no doubt amend the Act in that way at the ensuing session. With many thanks for your uniform kindness to ourselves, and consideration for the interests of the Province,

We remain, &c.,

(Signed,
(Signed,)

C. TUPPER,
W. A. HENRY.

Messrs. BARING BROS. & Co.

London, 17th August, 1865.

GENTLEMEN,—

We have the honor to acknowledge the receipt of your letter of the 11th inst., by which we observe that the Act authorizing the further issue of Provincial debentures fixes a period of twenty years for their redemption, but that the Legislature would probably extend the term to thirty years, if it were advantageous to do so.

The advantage of the longer period depends upon the market value of the debentures when sales are made: whilst the price is below par, a term of twenty years is more favorable for purchasers; but if you think it probable that the price will rise above par, then the longer period of thirty years will be more advantageous, as the premium, which is an eventual loss to the investor, is divided over a longer term; and, in this case, debentures having thirty years to run would be preferred in the market to those reimbursable in twenty years.

From these observations you will be able to judge of the expediency of asking the Legislature to fix the redemption of the debentures at thirty instead of twenty years.

We have, &c.,

(Signed,)

BARING BROS. & CO.

The Honorable CHARLES TUPPER,
The Honorable W. A. HENRY.

APPENDIX No. 5.

CROWN LANDS.

Crown Land Office, 1st October, 1865.

SIR,—

In my Report of last year, with reference to the business of the Crown Land Department, I noticed the increased demand throughout the Province, as compared with former years, and attributed it to the general prosperity and the growing industry and enterprise of the people. I have again the satisfaction to report, for the information of the Lieutenant-Governor, that the demand for Crown Lands has been steadily advancing, and, in addition to those portions required for settlement and cultivation, the necessity for meeting the large demand for sawed lumber and timber for ship-building has occasioned numerous applications in connection with the manufacturing interests of the Province.

In accordance with my instructions I have been extremely careful to check any tendency to speculation in the purchasing of Crown Lands, an evil that prevailed to some extent a few years since,—and I believe that I may confidently affirm, that, in most cases, the Grants issued will encourage the further employment of capital and industry, and add to the value of our exports. Extensive saw mills have already been erected, and others are in progress east and west of the Capital.

According to the usual practice, I annex hereto a comparative statement of receipts for the financial years 1864 and 1865. In the former the receipts amounted to \$32,482.67, and in the latter to \$44,302.61, showing an increase for 1865 of \$11,168.40. The number of acres applied for in 1865 were 105,756, besides water-lots, being considerably in advance of the year 1864.

To the above I have added a further abstract which exhibits the relative proportions applied for in the different Counties throughout the Province. From this statement it will appear that applications have increased both in number and quantity of acres, from those Counties, where the wood is more abundant and suitable for manufactory, and where a greater number of the inhabitants are employed in those branches of industry, than in other Counties. It will be found, however, that lands for tillage as well as pasturage have been largely in demand.

In meeting these various applications and answering enquiries, both in the office and by letter from all parts of the Province, much time has been consumed, and labor increased. As the area of ungranted lands diminishes, the necessity for testing ancient lines and bounds of former Grants involves the supply of tracings from the general plans as well as other information to the Deputy Surveyors. In performing this duty the difficulty is much increased by the imperfection of the earlier surveys and plans, owing to the carelessness of those employed at that period in the service of the Department. Notwithstanding these difficulties I may appeal with some confidence to the very few causes of complaint brought to the notice of the Government, and as an evidence of the earnest desire which influences the Department to deal fairly and impartially with all parties and all controversies, to quiet titles, and prevent future litigation. Amongst the great number who appeal to the office in matters of dispute, there are sometimes individuals who give a great deal of trouble,

and resist every effort to promote an equitable adjustment of their complaints, disregarding the rules prescribed for the general benefit, and consulting exclusively their own interests. It is a satisfaction to reflect that every report made by me is subject to the control of the Executive, and that no decision is pronounced without the fullest consideration.

The extension of the railway from Truro to Pictou has awakened the attention of many of the inhabitants to the valuable tracts of land still ungranted in Colchester and Pictou Counties. A number of applications for portions of these lands have already been made, and, under the direction of the Government, the surveyor for Colchester County has been for some time past engaged in making an exploration of the lands within the limits of his office, in running out certain lands for roads, and subdividing the district into lots for future disposal. This work the surveyor has nearly completed, and it is likely to open up a very valuable tract for settlement. The lands referred to in Pictou County are not yet surveyed, but it is expected that the work will be completed before the Spring. The large tract of country between Musquodoboit and Tangier, set apart for immigrants, and such of the inhabitants as are disposed to avail themselves of the favorable terms which the law affords them in acquiring lots for settlement, is now open for application; very few have yet applied, but the Immigrant Commissioner has taken steps to circulate the information afforded him, and to invite applicants, and there is little doubt that the lots will ere long be sought for, as I have a very favorable report of the quality of the soil and the beauty of the surrounding country.

I have not much to add to my last Report on the subject of the lands in Cape Breton. Operations under the Act of 1859 are prosecuted with all possible dispatch. A large number of lots have been surveyed to the quiet and satisfaction of the settlers, and the Grants are delayed only on account of the purchase-moneys in arrear. The abstract will show the amounts remitted this year from the respective Counties: these are made up from the current sale of lands as well as from the balances due on securities. I repeat my former recommendation as to those arrears, that payments should be enforced as soon as the present extension of credit has expired. The interests of the settlers as well as their families are deeply involved in the early completion of their titles. There is no limit to the confusion and embarrassment which the delay in issuing these Grants is occasioning.

There is one branch of the duty imposed upon the Commissioner and Deputy Surveyors very difficult to perform, owing to the terms of the Act relating to it. I allude to the protection of the Crown Lands from trespassers. The formalities required by the law lead to expense, and the time occupied in enforcing them swells the charges of the surveyors, whose compensation generally depends upon the proceeds of the seizures. In addition to other difficulties is the absence of all competition at the sales of condemned property. I perceive by the Act in New Brunswick a very summary remedy is adopted in similar cases, and I think the present law might be amended so as to render it more efficient and less expensive.

I have also daily experience of the necessity of a more summary process to remove parties who have entered upon and hold unlawful possession of Crown Lands, refusing either to surrender or pay for them. This class of persons, with those who have applied, but not paid in full for their lands, have had a long indulgence. To pursue the remedy under the present law would, in many cases, occasion an expense beyond the value of the land. There seems to be no other alternative but to abandon the cases altogether, or to deal with such persons by some more simple and less expensive remedy, to be sanctioned by the Legislature. I am aware that these points might be submitted for the consideration of the Crown Officers; but I notice them in this Report in order that the cause may be explained which apparently allows such an advantage to one class of the inhabitants over others who honestly and promptly pay for their Grants.

With the exception of the above references to the present unsatisfactory

state of the law upon two important points, I have no occasion to urge upon the Executive any further changes for facilitating the work of the Department. The work in hand is progressing, as rapidly as the assistance afforded me will permit; and although the labor has largely increased from the additional demand for Crown Land, and other causes to which I have alluded, I have the fullest confidence that ere long every application will be disposed of that is not arrested by controversies beyond the control of the Department.

I have the honor to be, Sir,

Your obedient servant,

SAMUEL P. FAIRBANKS,
Commissioner of Crown Lands.

The Hon. Provincial Secretary.

APPENDIX No. 6.

PICTOU EXTENSION.

*Railway Office, Engineering Department,
Halifax, N. S., October 26, 1865.*

SIR,—

In accordance with your request that I should furnish a statement showing the progress of works on the Pictou Extension Railway, and that I should also state when, in my opinion, the line may be expected to be completed and ready for traffic,—I beg to report as follows:—

All the contracts for sections, numbers one and ten excepted, are dated December 31st, 1864, and the various works required to complete the bridging and grading are contracted to be finished on these eight sections (Nos. 2 to 9 inclusive), by July 1st, 1866. On the first of this month, therefore, one half of the contract-terms for eight of the sections had expired. The term within which the works on the other two sections (Nos. 1 and 10) had to be completed, expired,—the one on the 1st of June, the other (No. 10) on the 1st of July last.

Allowing that all the Contractor's had clear eighteen months to do what they undertook, they have had nine of the best working-months out of that period, embracing a season unusually favorable for out-door operations. The following statement, prepared from returns recently received from the Division Engineers, will show the proportion of work done on the whole line, and what prospect there is of the contracts being completed by the time agreed or within a reasonable time thereafter:

		Total quantities.	Executed at 1st October, 1865.	Yet to be executed.
Clearing.....	Acres.....	561	352	209
Close-cutting.....	".....	22	5	17
Grubbing.....	".....	45	19	26
Rock excavation.....	Cubic yards	400450	150038	250412
Loose rock.....	".....	59900	11213	47687
Earth excavation.....	".....	1382230	494815	887415
Total excavation.....	".....	1842580	646066	1196514
Haul of material.....	Lineal feet..	13714500	2216361	11498514
Drains.....	".....	309400	13490	295910
Excavation in foundations.....	Cubic yards	26700	7807	18893
Concrete.....	".....	450	450
Masonry of various classes.....	".....	35540	2714	32826
Paving.....	".....	5200	306	4894

Miscellaneous works in proportion similar to the above.

Taking the heaviest description of works, it appears from the above that about one-twelfth ($\frac{1}{12}$) only of the masonry is finished, about one-third ($\frac{1}{3}$) of the excavation, and about one-sixth ($\frac{1}{6}$) of the total haul of material in excavations. It is evident, therefore, that if future progress is no greater than the past, the works of bridging and grading on the whole line will not be completed for two years to come.

In addition to bridging and grading, other important operations require to be done before the line can be opened for traffic. Besides many miscellaneous services, rails and sleepers have to be furnished for the whole line; the road-

way has to be ballasted, and the rails have to be laid; and, as some of these services cannot be done until the bridging and grading is completed, it is perfectly clear that, without some very material improvement in the progress of the works, it will not be possible to open the line for traffic for at least two years to come, probably not until the year 1868.

I have the honor to be,

Your humble servant,

SANDFORD FLEMING,
Chief Engineer.

To the Honorable the Provincial Secretary.

*Provincial Secretary's Office,
Halifax, 28th October, 1865.*

SIR,—

I beg to acknowledge the receipt of your letter of yesterday, and I am charged by his Excellency, the Administrator of the Government, to inquire whether you can suggest any means by which the Railway to Pictou can be so far completed as to be opened for traffic by the first day of May 1867; and, if so, to request you to detail fully the means you would propose to accomplish that object.

I have, &c.,

C. TUPPER.

S. FLEMING, Esq., Chief Engineer.

*Railway Office, Engineering Department,
Halifax, October 30, 1865.*

SIR,—

I have given the subject of your letter of the 28th inst. my best attention, and, while I consider it *now* utterly impossible, under the present contracts, to complete the line by the Spring of 1867, I have arrived at the conclusion that it is still practicable, by an entire change in the system of operations,—by vigorous exertions, judicious management, and moderate good fortune with respect to weather, to accomplish the object desired by the Government, if not by the 1st of May 1867, at all events by the end of that month. Provided, nevertheless, that not a day be now lost in making proper arrangements for the prosecution of the works hereafter.

I have also looked with a good deal of care into the question of cost, as it seems to be believed in many quarters, and frequently stated, publicly, that the Pictou Railway will require an expenditure far exceeding my original estimate. Moreover it is well known that to push works to completion under disadvantages and within a limited period, has the effect of enhancing the cost materially. In addition, the new Railway-extensions now in contemplation, and actually under contract, will enormously increase the demand for that class of labor so much required between Truro and Pictou; and, in consequence, the price of labor will be seriously affected. Notwithstanding these circumstances and important elements of expenditure, I have satisfied myself, on a careful consideration of the question, that, with proper management, the Railway may *yet* be completed within the estimate which I submitted to the Government last year. I may observe, however, that, in order to secure the labor needed, a proper system of immigration will require to be initiated without delay by the Government.

With regard to the means by which the objects desired by the Government can be attained, I would respectfully submit that, should none better be devised, I am willing to assume the responsibility of accomplishing the ends in view by a plan of operations of which an outline will now be submitted. Being fully alive, however, to the heavy responsibility which would rest upon me, I would stipulate as an *indispensable condition* that I should have full authority to act from beginning to end in the prosecution of these works upon my own judgment; that I should, in fact, be at perfect liberty and have full power to employ whatever men and means I might from time to time deem necessary to accomplish the main objects desired, and that I should be responsible to the Government only for the opening of the line for traffic by the time required, and for the satisfactory completion of all the works between Pictou and Truro, in accordance with and for an amount within my *original estimate*.

On these conditions I am prepared, should the Government wish it, to undertake as follows:—

1st. To have the line ready for use from Fisher's Grant to New Glasgow and the Mines by the end of September next.

2d. To open the line from Truro to West River Station in December next year.

3d. To have the works sufficiently advanced by the end of May 1867, to allow the line to be partially opened for traffic throughout its whole length from Truro to Pictou.

I am not prepared to say that every portion of the work will be finished by these respective dates; but I intend that the rails shall be laid and used; what remained to be done would be completed within a reasonable time thereafter.

The following is a general outline of the plan of operations which I would adopt in the event of the Government placing the matter wholly in my hands, subject to such modification as may from time to time seem expedient.

1. I would forthwith close arrangements with all contractors. Those who clearly cannot complete the works agreed to be done by them, in sufficient time, in a satisfactory manner to me, or without loss to themselves, I would at once pay in full for all they have done, at their contract rates, including the 15 per cent. withheld. I would finally adjust and close accounts with all such, terminate their contracts, and release their sureties. And, in the event of any of them standing in the way of an immediate, amicable, and final settlement, I would deal with such under the powers reserved in the contract (clauses 52 and 54); but I anticipate no great difficulty in coming to a final settlement at once. With those contractors who are capable of completing their work satisfactorily I would either renew existing agreements or make such modifications as appeared to me reasonable or expedient; but with every person and party engaged in any way on or in connection with the works, I would at once have a clear and if possible a satisfactory understanding. Simultaneously with the foregoing I would adopt measures to carry out the following:

2. Erect or provide a sufficient number of comfortable shanties and boarding-houses for workmen.

3. Procure at least one *steam excavator*, together with sufficient plant for removing material, &c. The excavator to be employed continuously, night and day, (Sundays excepted.)

4. Open new quarries and employ a sufficient number of teams to convey stone to the different points along the line of Railway during Winter.

5. Erect a telegraph along the line of works,—at all events to the heavy works at New Larig for the purpose of conveying information and directions with dispatch.

6. Roof over and enclose some of the principal structures, so that the masonry which is so much behind may be carried on during Winter.

7. Employ every mason and stone-cutter that can be had, and who can work to advantage in preparing material during Winter.

8. Make private contracts at fair paying prices, with thoroughly practical men, to execute such portions of the work as it may seem expedient to me to carry on in this way.

9. Carry on ballasting and track-laying simultaneously with other works whenever and wherever practicable.

10. Substitute tunnels for culverts and bridges, wherever it can be done to advantage, as in two cases on section 4.

11. Where I found it impossible to complete the masonry of structures in time for opening the Railway by the dates required, I would erect timber staging of ample strength to carry the rail-track over streams, and afterwards complete the masonry and embankments underneath and around the temporary staging.

12. Adopt such other measures as from time to time appeared expedient to accomplish the main objects in view.

With the foregoing plan of operations I have the utmost confidence in being able to meet the wishes of the Government satisfactorily; but should the Government consider it inexpedient to make any material change in the present system of operations, I shall, in that event, be equally happy to exert myself in every possible way to have the work finished as soon as practicable under the circumstances.

I have the honor to be, Sir,

Your obedient servant,

SANDFORD FLEMING.

The Hon. CHARLES TUPPER, Provincial Secretary.

*Provincial Secretary's Office,
Halifax, October 31, 1865.*

SIR,—

I have it in command from His Excellency, the Administrator of the Government to acknowledge the receipt of your letter of the 30th October, in reply to mine of the 28th inst., and to inform you that His Excellency in Council has decided to adopt the suggestions offered by you to secure the prompt completion of the Railway to Pictou within the terms of your estimate. You are therefore at liberty to proceed with that work in the manner proposed, having due regard of course to the legality of all your proceedings.

I remain, sir,

Yours faithfully,

C. TUPPER.

S. FLEMING, Esq., Chief Railway Engineer.

Railway Office, Halifax, 10th November, 1865.

SIR,—

I had the honor to receive, on the 31st October last, your communication of that date, respecting the Pictou Railway extension, and intimating to me that His Excellency the Administrator of the Government in Council, had decided to adopt the proposal submitted by me the day previous for the prompt completion of the Railway to Pictou, according to the terms of my estimate.

Since the receipt of your communication I have been actively engaged putting in execution such measures as seemed to me to be at once necessary in view of the object to be accomplished. I have now the honor to inform you, that, in

accordance with the decision of His Excellency in Council, I have undertaken to complete the Railway as aforesaid, and have assumed the responsibility of opening it for traffic by the dates named in my letter of the 30th ultimo.

I have the honor to be, Sir,

Your obedient servant,

SANDFORD FLEMING.

The Hon. CHARLES TUPPER, Provincial Secretary.

*Provincial Secretary's Office,
Halifax, Dec. 27, 1865.*

SIR,—

As some difficulties are found to exist in the mode of making payments under the arrangement made with you, dated October 31st, for the completion of the Railway from Truro to Pictou, I am directed by His Excellency the Lieutenant Governor, to inquire whether you would be willing to enter into a contract with the Government for the execution of that work, and to request you to state the lowest amount for which you would be willing to contract to finish the line in accordance with the specification of works upon which the previous contracts were taken, and the character of the work already executed under those contracts.

An early answer will much oblige.

Yours faithfully,

CHARLES TUPPER.

S. FLEMING, Esq., Chief Railway Engineer.

Railway Office, Halifax, N. S., December 27, 1865.

SIR,—

I have the honor to acknowledge the receipt of your communication of this date in reference to the Railway now constructing from Truro to Pictou Harbor, in reply to which I beg to state:

In order to meet the difficulties which have arisen in carrying into execution the arrangement made with the Government for the speedy completion of the various works on this line, I have no objection to enter into a contract for the performance of the whole works in accordance with the terms of the letters to which you refer, the specifications upon which previous contracts were taken, and the character of the work already executed or in progress.

The lowest amount for which I am prepared to contract to execute the whole, inclusive of the portion already done, is \$2,116,500.

I have the honor to be, Sir,

Your obedient servant,

SANDFORD FLEMING.

The Hon. CHARES TUPPER, Provincial Secretary.

*Provincial Secretary's Office,
Halifax, December 28, 1865.*

SIR,—

I have it in command from His Excellency the Lieutenant Governor, to place in your hands the accompanying correspondence relating to the construction of the Railway from Truro to Pictou Harbor, and to request you to examine, with as little delay as is possible, the present condition of that work, in order that you may be able to report whether, in your opinion, it would be for the public interest that the Government should accept Mr. Fleming's offer to complete that work according to the specifications originally made with former

contractors, and according to the sample of work performed under those contracts, for the sum of \$2,116,500, inclusive of the outlay already made. You will also be good enough to report what additional provisions, not embraced in the specification referred to will require to be embraced in a contract with Mr. Fleming, to secure the construction of such a line of Railway as has been contemplated.

The Railway Department and Chief Engineer will be instructed to afford you every facility in the discharge of this duty.

Yours faithfully,

CHARLES TUPPER.

ALEXANDER McNAB, Esq., C. E.

Halifax, 2d January, 1866.

SIR,—

I have the honor to acknowledge the receipt of your communication of the 28th ultimo, directing me to report, for the information of His Excellency the Lieutenant Governor, whether, in my opinion, it would be for the public interest that the Government should accept the proposal made by Mr. Fleming to complete the Railway from Truro to Pictou Harbor for the bulk sum of \$2,116,500 which amount would be inclusive of the outlay already made.

The estimate of the expenditure required to complete the whole of the engineering works connected with the Pictou extension, submitted by Mr. Fleming on the 24th November 1864, was \$2,216,500. As the right of way and fences are to be provided by County assessment, the same are not included in the foregoing estimate, or in Mr. Fleming's offer.

From the proposal made, it will be seen that a reduction of \$100,000 will be effected in the anticipated cost of the Railway.

The work, as far as it has advanced, is of the most permanent nature, and has been carried out in strict accordance with the specification prepared for former contractors, and upon which Mr. Fleming proposes to base his contract.

It seldom happens that a work of such magnitude as the one under consideration is completed for the sum originally specified, unless good prices are allowed in the estimate as well as a large margin for contingencies.

These remarks apply to the difficulty sometimes experienced in obtaining secure foundations for masonry, &c., where quicksand occurs, as in the case of the Culvert at New Larig, at which place a steam pile-driver has been kept steadily at work for several months at a very great outlay, the abutments of East River Bridge, &c.—and to heavy slides in earth-work, besides many other casual expenses, which, until they actually appear, cannot by any possible chance be anticipated.

When, however, a contract is required to be executed for a specified sum, no claim for such contingencies can be made; whereas, if it be based upon a schedule of prices, it matters not to the Contractor how much extra work he is called upon to perform.

Taking all these things into consideration, and a desirable opportunity now presenting itself for the early completion of the Railway for a sum less by \$100,000 than the original estimate, it therefore becomes my duty to recommend the offer of Mr. Fleming to the favorable consideration of the Government.

The responsibility proposed to be assumed by Mr. Fleming, is, I consider, exceedingly great, and I am fully convinced that it will only be by the most vigorous exertions and extraordinary care in the management of his contract that it can prove in the least degree profitable to him.

In order that the above assertion may be substantiated by facts, I beg to submit the following estimate, which will be found to exceed the estimate of Mr. Fleming by the sum of \$69,232, and his offer by \$169,232.

I would here state that the amount affixed to the various services enumerated in the estimate have been arrived at only after the closest calculation, and by allowing prices no higher than some of those upon which contracts have been let and forfeited; but there is this great difference, and a well established fact it is, that a thorough knowledge of the manner of conducting such works, aided by judicious management, will carry successfully to completion a contract which otherwise must prove not only ruinous to the Contractor but embarrassing to the Government.

I would also observe, that where works of unusual magnitude are carried out by one who has the disbursement of an unlimited supply of money, it is more than probable that those works will require a larger expenditure than if they were conducted by the same party acting in the position of a Contractor.

ESTIMATE.

ROADWAY AND WORKS—Comprising Clearing and Grubbing, Earth and Rock Excavation, Draining Works, Piling and all Foundation Works, Masonry, Iron-Girder Bridges, &c., &c.....	\$1,574,736
SUPERSTRUCTURE—Comprising Iron Rails, carriage and distribution of same, improved Splice Joints, Switch Plates and Frogs, Spike, Ties, Ballast, Track-laying, with an allowance of 5 per cent. additional on the whole length of road for Sidings.....	570,996
FERRY SERVICE—Including Steam Ferry-boat and Wharves at Pictou and Fisher's Grant.....	30,000
STATION ACCOMMODATION—Embracing Way and Terminal Stations, Engine House, Turn-table, &c.....	40,000
ENGINEERING—Comprising cost of explorations, preliminary and location surveys and superintendence of works.....	70,000
Total.....	\$2,285,732
Being \$169,232 in excess of the proposal made by Mr. Fleming.	

I am fully aware that it was Mr. Fleming's great aim and desire to bring the total expenditure within, at all events not greatly exceeding, the proposed appropriation of \$2,000,000 by making some alterations in the specifications, in the Grades and Curvature; at the same time I cannot overlook the fact that his original estimate of \$2,216,500 was based on the tenders previously accepted, and that those very tenders contained prices which have since proved far too low for the execution of the various works.

In addition to this, it is well known that where extensive works are required to be completed within a limited period, and that period, as in the present instance, a very short one, and extending over the worst season of the year, the cost of construction must necessarily be materially enhanced.

The whole of the Rails, Chairs, and Iron Girders for bridges, are already ordered, and are being manufactured under the immediate supervision of James Livesey, Esq., Mechanical Engineer, London, who has received instructions to accept only the best quality of material and the most superior workmanship.

As there can be no deviation from the above order, I would state that the Permanent Way secured by the Government in the proposed contract, will greatly excel that of the existing Provincial Railway.

The rail intended to be used is of the T pattern, and will weigh 56 lbs. per lineal yard. A quantity, sufficient to lay fifty-four miles of single track, has been ordered, one half of which is expected to reach Halifax on the arrival of the first Spring ships.

The rails will be connected by a steel chair, or what is known as the "scab-bard joint," which will be twenty inches in length, and which cannot fail to prove far superior to the ordinary wrought or cast-iron chair invariably used on this Continent.

Should the Government decide to accept the proposal, I would recommend that Mr. Fleming be required to enter into a written contract, whereby he shall be held bound to execute the works in accordance with the specification prepared for former Contractors; in fact, that the engineering character of the line should be such as was contemplated to be built by him, as Chief Engineer, under his own specification.

In case of a contract being concluded, the following items in connection with the Permanent Way should be inserted:

1st. Sidings equal to five per cent. of entire length of road.

2d. Ballast, 3000 cubic yards per mile.

The following statement will show the total expenditure on account of the various services, up to the 1st October last:

Roadway and works connected therewith	\$219,140
Engineering	36,254
Sundry Services	10,966
Commissioner's Department.....	3698
Station Accommodation.....	527
Permanent Way.....	24

\$270,609

To which sum must be added per centage retained from monthly estimates, and work done but not paid for at that date.. 40,000

Total amount certified..... \$310,609

I deem it proper to state, that in the estimate herewith submitted I have increased the quantities received from the Railway Department by 5 per cent. only (they being net quantities), instead of, as is usual, allowing a margin of 10 per cent., which would have enlarged my estimate by the sum of \$75,542.

I have the honor to be, Sir,

Your obedient servant,

ALEX. MACNAB, *Civil Engineer.*

To the Honorable Provincial Secretary.

ARTICLES OF AGREEMENT

Made and concluded at Halifax, in the Province of Nova Scotia, this tenth day of January, in the year of our Lord one thousand eight hundred and sixty-six, between AVARD LONGLEY, of Halifax, aforesaid, Esquire, Chief Commissioner of Railways, for said Province, acting for, and on behalf of, the Government of said Province, of the one part,—and SANDFORD FLEMING, of the same place, Civil Engineer, of the other part.

Whereas, The grading, bridging, and other works on the line of Railway between Truro and the waters of Pictou Harbor, were put under contract on the 31st day of December, A. D. 1864;

And Whereas, many of the Contractors have failed to carry on the works with such a degree of progress as would admit of the line being opened for traffic at the time originally contemplated therefor by such contracts, or within any reasonable time thereafter;

And Whereas, With a view to obviate the public inconvenience which must arise in consequence of the failure, on the part of the said Contractors, to expedite the works on the terms of their engagements, certain correspondence, a copy of which is hereto annexed, took place between the Provincial Government and the said Sandford Fleming, then Chief Railway Engineer for the said Province, which resulted in the acceptance, by the Provincial Government

of a proposal made by the said Sandford Fleming to complete the said line of Railway upon the terms and conditions specified and contained in his letters of 30th October, 10th November, and 27th December last, copies of which are annexed hereto, and form part of such correspondence and of this agreement.

And Whereas, the said Sandford Fleming has resigned the office of Chief Railway Engineer, and consented to enter into a contract to complete the said line of Railway on the terms and conditions above referred to.

Now, therefore, these Presents Witness, and it is hereby covenanted, declared, and agreed by and between the said Commissioner and the said Sandford Fleming, as follows—that is to say: That he, the said Sandford Fleming, in consideration of the premises and of the covenants and provisoes hereinafter contained, on the part of the said Commissioner, to be performed and observed, Doth hereby, for himself, his heirs, executors, and administrators, covenant, declare, and agree to and with the said Commissioner, to take into his own hands all the works commenced or in process of construction on the line of Railway, as located between the Station at Truro and the Ferry Wharf at Fisher's Grant, on the waters of Pictou Harbour, and to construct and finish the same, together with all such other Engineering works as are and were contemplated and necessary to render the line complete and ready for traffic, between the town of Pictou and the existing Provincial Railway at Truro, and as set forth in the original Estimate submitted to the Government on the Twenty-fourth November, One Thousand Eight Hundred and Sixty-four.

It is further agreed, that the said Sandford Fleming shall well and faithfully perform and complete all the said works, in accordance with the terms of his proposal contained in his letter of 30th October last, a copy of which is hereto annexed, and of the original specification, a copy of which is also hereto annexed, upon which the original contracts were taken, in so far as the said specifications are not inconsistent with the terms of this Agreement, and that such works shall be equal in character to the works already executed or in progress.

And it is further agreed, that the said Sandford Fleming shall have that portion of the line from Fisher's Grant to New Glasgow and the Mines ready for use by the 30th day of September, one thousand eight hundred and sixty-six; that part of the line from Truro to West River Station ready for use in the month of December, one thousand eight hundred and sixty-six; and to have the line partially opened for traffic throughout its whole length, from Truro to Pictou, by the end of May, one thousand eight hundred and sixty-seven. The whole works in the original specification, as also those not originally specified, and hereinafter contained, to be executed and completed to the satisfaction of the Chief Engineer of the Province of Nova Scotia.

And it is further covenanted and agreed, that in carrying out the said works, the following clauses and stipulations shall be complied with by the said Sandford Fleming—that is to say:

That on the completion of the excavations on the line of Railway, the road-bed shall be thoroughly under-drained in the manner specified—such under-drain to be constructed in all wet, springy ground, or in such other place as may be deemed necessary by the Chief Engineer of the Province, aforesaid, to insure a dry and firm foundation for the Permanent Way.

That the Permanent Way shall consist of Ballast Ties or Sleepers, Rails and Rail Fastenings—the Ballast to be of the best materials usually employed for this purpose that can be had along the line of Railway; the quantity of Ballast to be equal to three thousand cubic yards per lineal mile of Railway. The Ties are to be nine feet long, sawn or square butted at the ends; they are to be flattened on two opposite sides to a thickness of six inches,—these two sides must be neatly hewn to straight and parallel faces, each face to be not less than eight inches broad at the smallest end, the other two sides of the Tie to be left in their natural rounded condition. They are to be made out of Hemlock or Black Spruce, and must be made out of straight, sound, thrifty trees, of a suitable size for each cut to make a single Tie. Large, shaky timber, or otherwise defective, will not be accepted; and as second growth timber is found to have a

very large proportion of sapwood, all the trees out of which Ties are to be made must be cut in the *original* forest.

The Rails to be of the T pattern, not less than four inches in height, and weighing fifty-six pounds to the lineal yard. They are to be manufactured out of the best iron usually employed, and made under inspection at the works in England. The Rail Fastenings to be of the best description used; the joints of the Rails to be thoroughly secured by a steel scabbard, or the best description of fish plates; the spike to be of the ordinary description, of suitable size and quality.

That Sidings at *all* the stations and branch tracks at the Termini shall be provided, as may hereafter be determined by the Chief Engineer. The total length of iron to be furnished by the said Sandford Fleming for such purpose shall be equal to two and a half miles of track. The ordinary wrought iron chair to be used at the joints of rails on that portions of the Sidings outside the main track; the improved splice, or fish-joint, to be used throughout on the main track.

That Station and Terminal accommodation, including Engine house and Turntable, Tank-houses, Water Service, Wood or Coal Sheds, at the necessary Stations at points already determined by His Excellency the Lieutenant Governor in Council, to be completed by the time the line is opened for traffic, or within a reasonable period thereafter, shall be provided, suitable for the traffic of the country, according to plans to be prepared hereafter, and approved by the Chief Engineer aforesaid; the works to be subject to his approval, and that the expenditure on these services shall be equal to Forty Thousand Dollars, and that this appropriation shall not embrace the cost of Sidings, which are to be furnished in addition thereto, but shall include all other expenses connected with this service.

That a Steam Ferry and a Landing Wharf at the Town of Pictou, and another at the present Ferry Wharf at the place known as Fisher's Grant, shall be made and furnished by the said Sandford Fleming, in accordance with plans hereafter to be prepared and approved by the Chief Engineer, aforesaid; and that the expenditure on these services shall be equal to the sum of Thirty Thousand Dollars; and that this service shall be ready for use by the Spring of 1867.

That at least two of the Engines not in use by the Railway Department, and a sufficient number of Platform Cars, shall be furnished to the said Sandford Fleming, for Ballasting the road-bed, and for hauling materials for construction purposes. That the said Sandford Fleming will pay all wages, fuel, oil, and for all current ordinary repairs required for the use of the said Engines and Cars; but he shall not be required to pay any compensation for the hire and use thereof.

That all materials required to be taken over the existing Provincial Railway to Truro, for the purpose of construction, shall be carried as it may be required, but without inconveniencing the ordinary traffic; and the said Sandford Fleming shall only be required to pay all actual outlay on the handling and transit of such material.

That all men in the employment of the said Sandford Fleming, and moving in the actual performance of duty, or travelling to the works, shall be carried free of charge over the existing Railway, subject, however, and at all times, to all such regulations as the Commissioner may deem necessary.

That all materials imported for construction purposes shall be admitted duty free, and that the use of the loading wharf and station at Richmond shall be given to the said Sandford Fleming.

That the said Sandford Fleming shall not be required to find the land required for the purpose of this Railway, nor to pay for the fencing of the same.

That the various works now contracted to be executed shall be divided into the five following divisions, that is to say:

FIRST. *Engineering*—Which comprises all expenses which have been incurred up to this date in exploring, surveying, and locating, the salaries of Engineer's Staff, the wages of men engaged in surveys, the pay of Inspectors,

purchase and repair of surveying instruments, board of surveying parties, camp outfit, travelling and telegraphing expenses, printing, stationery, drawing materials, rent, and other expenses of the several Engineering officers. It also includes all expenses of a similar kind in connection with the Engineering Staff and establishment of the said Sandford Fleming, which hereafter requires to be met.

SECOND. Roadway and Works—Comprising all expenditure up to this date on clearing, close-cutting, grubbing, rock and earth excavations, hauling, under-drains, upper-drains, piling, excavating, and concrete works in foundations, masonry in culverts and bridges, all pipes furnished, all tunnels formed or forming, the excavating of road-bed and sidings, Breakwaters on Salmon and Black Rivers, and other works of protection to embankments. It includes also the purchase and erection of iron bridges, the superstruction of open bridges, and generally the cost of completing all the various services connected with this division of the work.

THIRD. Permanent Way—Which comprises the ballasting of the road-bed and sidings, the purchase of rails, rail fastenings, spikes, ties or sleepers, track-laying, distribution of material along the line, the forming of sidings at all way stations with switches and furnishings.

FOURTH. Station Accommodation—Which includes the erection of way stations and terminal buildings for freight and passengers, the construction of platforms, the cost of engine house and turntable, the cost of tank-houses and water service, the erection of wood or coal sheds, and all other expenses at stations or termini.

FIFTH. Pictou Ferry Service includes the furnishing of a suitable steam ferry boat, and the construction of proper landing wharves at the Town of Pictou and at Fisher's Grant, opposite.

And these Presents further witness, that the said Railway Commissioner, in consideration of the covenants and agreements hereinbefore contained, by and on the part and behalf of the said Sandford Fleming, to be observed, performed, and kept, doth, as such Railway Commissioner, for and on the part and behalf aforesaid, covenant, promise, and agree to and with the said Sandford Fleming, his executors and administrators, in manner following—that is to say: That he, the said Commissioner, shall, and will pay to the said Sandford Fleming, his executors and administrators, such a sum of money as, together with the cost of all the works to the day of the date hereof, will amount, in all, to the sum of *Two Millions One Hundred and Sixteen Thousand Five Hundred Dollars*, of current money of Nova Scotia, for the faithful execution and completion of all the Engineering and other works hereby contracted to be performed,—which total amount is understood and declared to embrace and cover all the cost of all the works done up to the day of the date hereof. And it is further agreed, that payment is to be made by the said Commissioner, monthly, as the work proceeds, on the certificate of the Chief Railway Engineer; and, for the due protection of the public, it is further agreed that ten per centum of the value of the work hereinafter to be done under this Contract shall be retained by such Commissioner, for such periods as, in the opinion of the Chief Engineer, shall appear necessary to secure a due and faithful performance of this Contract; it being understood and declared that such reservation of 10 per centum shall only be deemed necessary on such sections or portions of the work as are actually in process of execution, and shall not be withheld on such portions or sections of the work as shall be executed and completed.

In witness whereof, the parties to these Presents have hereunto subscribed their hands, and affixed their seals, the day and year first above mentioned.

AVARD LONGLEY,
SANDFORD FLEMING.

Signed, sealed, and delivered in presence of (the words)
"copies of" being first interlined, 2nd page, top line)
JAMES H. THORNE.

Copy of Original Specification on which Tenders were received, (with the alteration in the widths and slopes,) and the original Contracts for Sections were subsequently made.

NOVA SCOTIA RAILWAY—PICTOU EXTENSION. SPECIFICATION FOR THE CLEARING, GRUBBING, GRADING, AND MASONRY.

CLEARING AND GRUBBING.

The land to be set apart for the purposes of the Railway, where it passes through "bush," must generally be cleared to the width of fifty feet on each side of the centre line, or to such greater or less widths as the Chief Railway Engineer of the Province of Nova Scotia, or his assistants, may from time to time direct. The clearing is to be done so that all the brush, logs, and other loose material, within its limits, will be burned. A sufficient quantity of fencing stuff only will be reserved, and it must be trimmed and cut into equal lengths, and piled as may be directed. In no case will any of the brush or logs be cast back upon the adjacent timber land; they must invariably be made into log piles, near the centre of the space to be cleared, and there entirely consumed. The land, when cleared, will be left in as clean a condition as is usual when intended for cultivation.

Where embankments are to be formed less than four feet, and more than two feet, in height, all the standing timber will be chopped close to the ground within the limits of the embankment, and burned.

Where excavations will not exceed three feet in depth, or embankments two feet in height, all stumps must be grubbed out, and, if possible, burnt; those that will not burn must be carried beyond the limits of the cuttings and embankments, where directed, and there piled. Directions will be given at the proper time, as to the extent of ground required to be cleared, close cut, and grubbed. Close cutting and grubbing (except in fields where no clearing is necessary) will be measured in addition to the clearing, over the same ground, and the three classes of work will be paid for by the acre.

GRADING.

The grading will not be commenced until all the clearing, close cutting, and grubbing required, be completed to the satisfaction of the Engineer; and generally through cultivated land, the grading will be deferred until the crops are removed from the ground, or provision made for fencing the land appropriated for the Railway.

Except when otherwise directed, the road bed at sub-grade or formation level, will be 18 feet wide in embankments, 20 feet in side cuttings, and 22 feet in through cuttings. The slopes of earth work will generally be made horizontal to one perpendicular. In rock cuts the slopes will be, as near as possible, one horizontal to four perpendicular. These widths and slopes may be varied by the Engineer at any time to suit circumstances.

The material composing the embankments must be approved by the Engineer; and in places where the natural surface of the ground upon which an embankment is to rest, is covered with vegetable matter, which cannot be burned off in clearing, and which would, in the opinion of the Engineer, impair the work, the same must be removed to his entire satisfaction, and paid for as ordinary earth excavation.

The cuttings will be formed and then ditched longitudinally and transversely, as the Engineer may direct, for thorough drainage,* (*see drains) besides which, other ditches and excavations will be required for turning, making, or changing

water-courses, and roads, or in stripping gravel banks, all of which must be executed as may from time to time be directed. All such excavations in the formation of open ditches, water-channels, and roads, and in gravel pits, or borrowing pits, and in depot grounds, turnouts, or branches, and so much of foundation pits for masonry as are not under water, shall be considered as a necessary part of the excavation for the formation of the road way, and must be executed and the material deposited according to the directions of the Engineer, and will be paid for at the same rate per yard, for excavation and haul; as the other excavation, according to its denomination.

Excavation will be classed under three heads, viz.,—*solid rock*, *loose rock*, and *earth*, and will be estimated according to the following definitions:—

1st. All stones and boulders measuring more than 40 cubic feet; and all solid quarry rock that cannot be removed without blasting, shall be termed *solid rock excavation*.

2nd. All stones and boulders measuring more than 14 cubic feet, and less than 40 cubic feet; and also all rock in place that may be removed without blasting, shall be termed *loose rock excavation*.

3rd. All other excavations, of whatever kind, shall be termed *earth excavation*.

All materials found in excavations, whether in road-bed cuttings, ditches, water channels, road crossings, borrowing pits, or elsewhere, must be deposited in such places as the Engineer may direct. In cases where the road-bed excavations are insufficient to form the contiguous embankments, or where the haul appears to the Engineer too great, the deficiency shall, with his approval, be supplied by widening the cuts, or from the sides of the road where directed, or from borrowing pits; but no material shall be so supplied without his express directions. All borrowing pits shall, if required by the Engineer, be dressed to a good shape, and properly drained, and they shall be excavated only to such a depth as he may direct.

Where the excavation in a cut exceeds what may be required to make the adjoining embankments, or where economy would result (owing to the cost of haul) to waste and borrow, the Engineer, should he judge it expedient, may order a portion of the material to be wasted; but in every case where either borrowing or wasting is resorted to, the materials must be taken and deposited as he may regulate.

All stone fit, that may be required for masonry or for protecting embankments, that may be found in the excavations, to be considered the property of the Province, and they must be removed and deposited in some convenient and accessible place, when directed by the Engineer, where they can be obtained and used for the purposes designed. For taking out and removing such stone the Contractor will be paid for excavation and haul at the stipulated prices, and when used in other work by the Contractor, with the consent of the Engineer, their value will be a charge against the Contractor, and which will not be less than the cost of excavation and haul at the prices referred to.

The road-way and the works connected therewith being made from the materials and in the manner specified, the prices stipulated for excavation of the several denominations, shall be the total price for excavating, loading, removing, and depositing; all the material: provided the same is not removed beyond one hundred feet; when moved more than one hundred feet, a further price per yard per hundred feet for hauling will be allowed, the reckoning for haul to commence after the first hundred feet.

The rates and prices stipulated in the contract must be understood to cover every contingency, the furnishing of all labor, power, and plant, (which must be found by the Contractor,) and the cost of finishing up cuts and embankments, the dressing and draining of borrowing pits when required, the dressing of slopes to the required angle, and the completing of everything connected

with the grading of road-bed in a creditable and workmanlike manner, in accordance with the directions and to the satisfaction of the Engineer.

The measurement of quantities will, whenever practicable, be made in the cuttings or in the pits from which the materials may be taken, but in cases where this cannot be done without great difficulty and inconvenience, quantities may be determined by measurement in embankment; but in all such cases it is desirable that the quantities be ascertained and approved by the Contractor, jointly with the Engineer, before the embankment is commenced. In the event, however, of the Contractor's approval not being had, the Engineer shall determine the quantities after making all proper allowances, of which he shall be the judge.

After the grading is done or sufficiently far advanced, under-drains will be formed wherever directed by the Engineer, for the thorough-draining of the road-bed and works. These drains will be constructed in a similar way to that in which ordinary land drains are sometimes made: a ditch will first be dug to a depth of four feet on an average, and barely wide enough for a man to stand; a tile pipe, or other contrivance for conveying the water, will then be laid by hand, on top of which from four to six inches of brush, then two feet of small stones or coarse gravel, from two to four inches diameter, will be placed, and afterwards the ditch will be filled up to the surface of the ground with good gravel, or such other material, convenient to the place, as the Engineer may approve of. The Contractor will not be required to furnish the tile pipe referred to; but he will lay it or any substitute provided for the purpose; he will find all the stone and gravel, and do all the work described, at such prices as may be stipulated per 100 lineal feet. There will be two classes of drains: the one will be 12 inches wide at bottom, and the other will be 6 inches wide at bottom—the width at top in either class is immaterial; both classes will be formed with a proper longitudinal fall, but they will average in depth four feet.

Roads constructed to and from any point on the line of Railway for the convenience of the Contractors, for the conveyance of material or otherwise, must be at their own risk, cost, and charges; but the Contractor will not be required to purchase land for the Railway track for branches or for borrowing pits.

Wherever the line of Railway is intersected by public or private roads, the Contractors will keep open, at their own cost, convenient passing places, and they shall be held responsible for keeping all crossings, during the progress of the works, in such a condition as will enable the public to use them with perfect safety, and such as to give rise to no just ground of complaint. Contractors will be held liable for any damages resulting from negligence on their part or that of their men.

FOUNDATIONS.

Foundation pits will be sunk to such depth as the Engineer may deem proper for the safety and permanency of the structure to be erected; they will generally be sunk to depths beyond the reach of frost, which in Nova Scotia is said to reach over 3 and 4 feet from the surface of the ground; the material excavated therefrom will be deposited in embankment, unless the Engineer direct otherwise. Wherever timber or other artificial foundations may be found expedient, the pits will be made of sufficient dimensions to admit the materials.

No work shall be commenced in any foundation pits before they have been inspected and approved by the Engineer, and they must be kept free from water during the progress of the work until the masonry is brought above the level of the surface.

The excavation of foundation pits above the ordinary level of the surface of the stream, will be considered ordinary excavation, as in grading, and will be measured and paid for as such. Excavation below the ordinary level of the water, will be considered a separate item, and will be measured and paid for at such special rate as may be stipulated in the contract.

The price to be paid for excavation in foundations must be considered to include the cost of all dams or constructions to exclude water, and all bailing, pumping, or draining, which may be required not only for making the excavations, but for putting in timber, concrete, or other artificial foundations, and for setting the masonry.

Foundation timbers, when required, will be of such dimensions and of such kinds as the Engineer may direct, and the contract price shall be in full for furnishing and laying the same in a proper manner agreeably to instructions. The timber employed will be Haematac, Hemlock, or Beech, in plank from 3 to 6 inches thick, or timber flatted on two sides, only, and ranging from 6 inches to 12 inches thick. The faces of the flatted timber will at least measure as much as its thickness, and the bark will be removed from the sides not flatted. Other kinds and dimensions of timber than those mentioned, will if used, be paid for at proportionate rates, unless special agreement be made in such cases.

All spikes, bolts, straps, or other iron work found necessary to be used in timber foundations, must be of the best quality of iron usually employed for similar purposes.

Wherever concrete is employed it will be composed of hydraulic lime, clean, sharp sand, and good gravel, of approved quality and proportions. The proportion of sand and lime will be about the same as in mortar, and in making the concrete, a sufficient quantity will be used with the gravel to fill up every interstice, and render the mass when set, perfectly solid and compact.

MASONRY.

All the masonry must be of a substantial and permanent character, made out of durable and suitable materials, and in every respect equal to the best description of masonry in similar railway works.

The masonry shall not be started at any point before the foundation has been properly prepared, nor until it has been examined and approved by the Engineer, nor until the Contractor has provided a sufficient quantity of proper materials and plant to enable the work to be proceeded with regularly and systematically.

Hydraulic lime mortar will be used, unless otherwise directed, in building all masonry, from the foundations up to a line two feet above the ordinary level of the stream. It will be used also in turning arches, in laying girder beds, coping, covering of walls generally, and in pointing. The hydraulic lime or cement must be fresh ground, of the best brand that can be had, and it must be delivered on the ground and kept till used in good order. Before being used, satisfactory proof must be afforded the Engineer of its hydraulic properties, as no inferior cement will be allowed.

Lime mortar must be made of the best common lime used in the province; it will be employed in all masonry (except dry) where cement is not directed to be used.

Both cement and lime must be thoroughly incorporated with approved proportions of clean, large grained, sharp sand. The general proportions may be one part of lime to two parts of sand, but this will be varied according to the quality of the lime or cement. Mortar will only be made as required, and it must be prepared and used, under the immediate direction of an inspector, by the Contractor's men; failing which, the inspector may employ other men to prepare the mortar, and any expense incurred thereby shall be borne by the Contractor.

The stone used in all masonry on the line of Railway must be of a durable character, large, well proportioned, and well adapted for the construction of substantial and permanent structures. Parties tendering must satisfy themselves as to where fitting material for the masonry can be most conveniently procured.

The masonry will be classified as follows :

- 1st class masonry *in cement.*
- Ditto, *in common lime.*
- 2nd class masonry *in cement.*
- Ditto, *dry.*

First class masonry will be built in regular courses, of large, well shaped stone, laid in mortar on their natural beds; the beds and vertical joints will be hammer-dressed, so as to form quarter-inch joints. The vertical joints will be dressed back square 9 inches; the beds will be dressed perfectly parallel throughout. The work will be left with the "quarry face," except the outside arrises, strings and coping, which will be chissel dressed.

The courses of first class masonry will not be less than twelve inches, and they will be arranged in preparing the plans to suit the nature of the quarries; courses may range up to 20 inches, and the thinnest courses must invariably be placed towards the top of the work.

Headers will be built in every course not farther apart than 6 feet; they will have a length in line of wall of not less than 20 inches; and they must run back at least $2\frac{1}{2}$ times their height, unless when the wall will not allow this proportion, in which case they will pass through from front to back. Stretchers will have a minimum length in line of wall of 30 inches, and their breadth of bed will at least be $1\frac{1}{2}$ times their height. The vertical joints in each course must be arranged so as to overlap those in the course below 9 inches at least.

The backing will consist of flat-bedded stone, well shaped, having an area of bed equal to about 4 superficial feet. Only two thickness of backing stone will be allowed in each course, and their joint depth must not exceed that of the face work; the beds must if necessary be scabbled off, so as to give a good solid bearing,—no pinning will be admitted. Between the backing and face stones there will be a good square joint, not exceeding one inch in width, and the face stones must be scabbled off to allow this. In walls over three feet in thickness, headers will be built in front and back alternately, and great care must be taken in the arrangement of the joints, so as to give perfect bond.

Every stone will be set in a full bed of mortar, and beaten solid, and the vertical joints will be grouted throughout each course.

Second class masonry will be built in irregular courses of good, sound, large, flat bedded stones, laid in horizontal beds. Very little hammer-dressing will be necessary beyond what is required to give half inch joints. The stone employed in this class of masonry will generally be not less in area of bed than three superficial feet, nor less than nine inches in thickness, although in small structures they may occasionally be admitted as thin as 6 inches. All stones must invariably be laid on their natural beds.

Headers must not be less in length than 24 inches, and in stones over 10 inches thick, the length must be at least $2\frac{1}{2}$ times their thickness. One header will be used in from every four to six feet, according to the size of stones employed. The stretchers must have their beds at least $1\frac{1}{2}$ times their thickness, and the minimum bed allowed will be twelve inches. Headers will be built in from back as well as front, except where they run through, and every attention must be paid to produce perfect bond, and to give the whole a neat and workmanlike finish.

Wing walls will generally be finished with steps, formed of sound, durable stone, not less than from 10 to 12 inches thick, and five feet superficial area; other walls will be covered with coping of a similar thickness, and of about seven feet superficial area. Those coverings will be neatly dressed, when required, and as may hereafter be directed. The walls of box culverts will be finished with stones the full thickness of wall, and the covers will be from 10 to 15 inches thick, according to the span; they must have a bearing of at least

twelve inches on each wall, and they must be fitted sufficiently close together to prevent the earth from falling through.

In second class masonry, each stone, except when *dry work* is intended, will be laid in full mortar, and each course regularly and thoroughly grouted.

ARCHES.

A distinction will be made between arches of ten feet span and upwards, and those of eight feet span and under,—the former will be classed with first class masonry, and although they may be constructed on walls of second class work, they will be measured separately, and paid for at first class masonry prices. Arches of eight feet span and under, will be classed with second class masonry, and paid for at the same rate. Arches of each class will generally be semi-circular.

First class Arches will be constructed of stones, cut so that when laid, their beds will radiate truly from the centre of the circle; the depth of stones will of course vary with the span, but will never exceed 30 inches; they must not be less in length than 27 inches, and they must break joint ten inches—their thickness on the soffit must at least be 9 inches, and it will be dressed to the circle. All the stones must be dressed to the full depth of bed, so as to give truly radiated joints from $\frac{3}{8}$ to $\frac{1}{2}$ inch. They must be set without pinning of any kind, and the end joints must be properly squared. Each stone to be full bedded in cement, and each course afterwards thoroughly grouted. The outer ring stones to be neatly worked with a chisel draft around their edges.

Second class Arches will be constructed of suitable stones ranging from 16 to 24 inches deep, according to the span, and each stone must be from 18 to 24 inches in length, over 6 inches in thickness on the soffit, and they must invariably extend through the entire thickness of the arch. Each stone to be well and closely fitted, and to break joint with its fellow 9 inches. The whole must be laid in thin mortar, and each course must be well grouted immediately after being laid. The outer arch stones to be as nearly uniform in thickness as possible, of large size, and neatly incorporated with the rest of the masonry. The key stones to be 10 or 12 inches on the soffit, to have a chisel draft around their edges, and to project beyond the face of the wall 2 or 3 inches.

Centers of all arches must be well framed, of sufficient strength, and securely placed in position. Centering and scaffolding of all kinds will be provided by the Contractor, and the cost must be covered by the price for the masonry.

All masonry must be neatly and skilfully pointed, but if done out of season, the Contractor will be required to make good, at his own cost, any injuries that may result.

As a general rule, all masonry must be suspended after the 1st of November in each year, and not resumed until the spring fairly opens. Work left unfinished in the Autumn, must be properly protected during the winter.

After the masonry of a structure has been completed for a period of four or five weeks, the formation of the embankment around it may be proceeded with. The earth must be carefully punned in thin layers around the walls, and in this manner the filling must be carried up simultaneously on both sides. The Contractor must be extremely careful in forming the embankments around culverts and bridges, as he will be held liable for any damages to the structures that may arise through his negligence. The punning must be carefully attended to, and the whole filling must invariably be done in uniform courses from the bottom to the top of the embankment, without loading one side of the masonry more than another. The cost of punning must be covered by the price of other work.

The bottoms of culverts and the slopes of embankments where required along the river, will be paved with stones set on edge to a moderately even face. The paving will be not less than 10 inches nor more than two feet in depth, and it will be measured and paid for at a price per cubic yard.

At any time before or after the commencement of any portion of the work, the Engineer will be at perfect liberty to make any changes or alterations which he may deem expedient, in the grades, the line of location, the width of cuttings or fillings, the dimensions or character of structures, or in any other thing connected with the works, whether or not such changes increase or diminish the quantities of work to be done. The Contractor will always be paid for the work actually executed by him, under the Engineer's directions and to his satisfaction, at the prices stipulated in his contract; but he will not be entitled to any additional allowance by reason of any such change as that referred to.

Payments will be made monthly, on the certificates of the Engineer, equal to 85 per cent. of the value of the work done, as made up from returns of progress measurements, and computed at the prices stipulated in the contract. On the completion of the work to the satisfaction of the Engineer, the quantities will be carefully made up from exact final measurements, and a certificate will be given thereon; but a final and closing certificate, including the drawback of 15 per cent., will not be granted for a period of two months thereafter.

It is intended that every allowance will be embraced in the Engineer's certificates, to which the Contractor is fairly entitled; but should the Contractor, at any time, have claims of any description which are not included in the monthly certificates, it will be necessary for him to present such claims in writing, to the Engineer, within fourteen days after the date of each certificate in which such claims have been omitted. The Contractor in presenting claims of the kind referred to, must accompany them with satisfactory evidence of their accuracy, and the reasons why he thinks they should be allowed him. Unless claims are thus made during the progress of the work, immediately after they arise, it must be clearly understood, before contracts are entered into, that they will be forever shut out.

The Contractor will be held responsible for all damages which may be done to property or persons through the blasting of rocks or other operations carried on by him, and he must assume all risks and contingences that may arise during the progress of the works, and he must make good, at his own cost, all defects and failures, whether from negligence on the part of himself or workmen, or from bad workmanship, or from the use of improper materials.

So soon as the surveys now in progress are completed, the line of Railway will be located in sections, and the cuttings and embankments staked out; and tenders will be received for the work on each separate section, agreeably to the form prepared. Test pits will be sunk to enable the contractors to judge of the character of earth cuttings before tendering. The sections will be numbered consecutively from Truro to Pictou.

Working plans will be prepared and furnished contractors from time to time as required, and in the case of important structures, full explanations will be afforded, and additional specifications will be made out when such appears necessary.

All the works herein specified, together with all other works required to be done, must be executed in a faithful, substantial, and workmanlike manner, in strict accordance with the plans, specifications, and instructions, from time to time to be given by the Chief Engineer, under the direction and subject to the constant supervision of such Division and Assistant Engineers and Inspectors as may be appointed. All the works are to be executed to the Engineer's entire satisfaction,—he is to be the sole judge of the work, both quantity and quality,—his decision on all questions in dispute with regard to the works, or as to the meaning of the specifications, or the plans, or points not provided for in the specifications, is to be considered final and binding on all parties.

It is not intended that the works should be executed in a hurried manner, so that their cost would be enhanced thereby, while their stability and efficiency

would not be increased. The object is rather to have all the works on each section executed at a minimum expenditure and with thorough permanency. Contractors will, therefore, be guided by these considerations in making up their prices, as ample time will be allowed for the completion of each contract, such time to be specified in the tender.

The work on Section _____ to be completed
before the _____ day of _____ A. D.

Chief Engineer.

NOVA SCOTIA RAILWAY,
Engineer's Office, June 25th, 1864. }

Approved.

Railway Commissioner.

Railway Office, Halifax, January 3d, 1866.

SIR,—

Having learned that the Government intends entering into a contract with me for the execution of the works of construction on the Railway between Truro and Pictou, in accordance with the terms of my letters of the 30th October and the 27th December last; and, as the course will necessarily involve my resignation as Chief Railway Engineer, I beg leave to place it in your hands.

I have the honor to be, Sir,

Your obedient servant,

SANDFORD FLEMING.

The Honorable Dr. TUPPER, Provincial Secretary.

WINDSOR AND ANNAPOLIS RAILWAY.

An Act to incorporate the Windsor and Annapolis Railway Company.

Whereas, under and by virtue of an Act of the General Assembly, passed in the 28th year of the reign of Her Majesty Queen Victoria, Chapter 13, entitled, "An Act to provide for the construction of two other sections of Provincial Railways," provision is made for the construction of a section of the Provincial Railway from Windsor to Annapolis, and authority given the Chief Commissioner of Railways to contract with any responsible party or parties for the construction of the same. *And Whereas*, the Chief Commissioner of Railways for Nova Scotia did, under and by virtue of the powers and authority of the said act, on or about the 26th day of October 1865, enter into a contract with George Knight & Co., of London, to construct the said Railway:

Be it enacted, by the Governor, Council, and Assembly, as follows:—

1. George Knight, David Ward Chapman, Sir John C. Dalrymple Hay, Bart., James Lister O'Beirne, M. P., Francis F. Jeyes, and such other persons as shall become shareholders in the Company hereby created, their successors and assigns, are hereby constituted a body politic by the name of the Windsor and Annapolis Railway Company, for the purpose of constructing, under the authority, powers, and provisions of the said Act, and also of the Act Chap. 70 of the Revised Statutes, 3rd Series, so far as the same shall be applicable, and also of the said contract, a Railway from Windsor to Annapolis, for the conveyance and transportation of Her Majesty's or her successor's mails and passengers, freight, and generally the transaction of all business connected therewith, or necessarily or usually performed on or by Railways, and for constructing such wharves, docks, bridges, or piers as may be necessary for the same.

2. The capital of the Company shall consist of six hundred and eighty thousand pounds sterling, one half of which, or three hundred and forty thousand pounds sterling, shall be divided into 17,000 shares, of £20 sterling, or one hundred dollars Nova Scotia currency, each, and the other moiety shall be issued in six per cent. Debenture Bonds, bearing six per cent. interest, issued in such amounts as the Directors may determine.

3. The Company, as soon as the same shall have been organized, and the sum of ten per cent. on the share capital of the stock paid in, may proceed to construct a Railway from the town of Windsor, aforesaid, to Annapolis. They may construct such Railroad, erect stations, buildings, wharves, bridges, and piers, upon any land owned by the Company, or acquired under or by virtue of this or any Act of the Assembly passed or to be passed.

4. No member of the corporation shall be liable in his person or separate estate for the liabilities of the corporation to a greater amount in the whole than the amount of the stock held by him, deducting therefrom the amount actually paid to the Company on account of such stock, unless he shall have rendered himself liable for a greater amount by becoming surety for the debts of the Company.

5. The first meeting of the Corporation shall be held at such time and place in this Province or in Great Britain as any two-thirds of the coporators shall determine, of which public notice shall be given in two of the newspapers published in Halifax, in this Province, at least thirty days before such meeting, at which, or at any subsequent meeting, the Corporation may be organized by the election of a board of directors of not less than three nor more than seven, as shall be agreed on by the shareholders then present. All subsequent meetings of the Board of Directors may be held at such time and place as the Board of Directors, in their bye-laws, shall direct; and they may, in their bye-laws, provide the time and manner of choosing the officers of the said Corporation.

6. The Company, through their directors, or otherwise, shall appoint a recognized Solicitor, resident in this Province, service on whom of all process notices and other documents shall be held to be sufficient service on the Company, and the name and address of such Solicitor shall be filed with the Registrar of Deeds for each County where the works of the Company are situated; in default of such appointment, or in case of the absence or death of such Solicitor, process, notices and documents may be served on any of the Directors or managers of the Company.

7. The lands required for the Railway track and appurtenances shall be provided gratis to the said Company, with the right of entering on all ungranted lands belonging to the Government and taking, free of cost, all materials required for the said Railway, as under the provisions of Sect. 11 Chap. 70 of the Third Series Revised Statutes,—the lands so acquired to be the property of the Company, who are thereby authorized to exercise all the powers necessary for locating and completing the said Railway, to purchase and hold within or without the Province lands, houses, materials, engines, cars, and all the appurtenances of a Railway, to make such connection as they think proper with other Railway or Steamboat Companies within or without the Province, either by leasing their road to other Corporation or Corporations on such terms and for such length of time as may be agreed upon, or by consolidating the stock of their road with that of other Railroad Companies or Company upon such terms as may be agreed upon, to make, execute, and deliver good and sufficient mortgage deed or deeds of their road and all its branches to such private persons or Corporation within or without this Province as they may think the interest of the stockholders in their Company requires.

8. The Company shall own the said Railroad, and generally shall do all acts and make all rules and regulations in respect thereof and in the construction and management thereof as may be necessary and expedient; and the Company shall have power to appoint, remove, and fix the salaries of all officers, servants and others to be by them employed in and about the construction and management of the Railroad, and shall have power to make, ordain, and establish all necessary bye-laws and regulations, consistent with the laws in force in this Province, for their own government, the due and orderly conducting of affairs, the levying of tolls, and the general management of their property.

9. It shall be lawful for the Company to make or construct a Railway over and across any roads in the line of the projected Railroad, and over and across any Railroad or tram-road, and over any Rivers, Brooks, or Stream,—subject, nevertheless, in such cases, to regulations to be made by the Court of Sessions to ensure the safety of the inhabitants and their property.

10. That the several conditions, agreements, provisos, and terms contained and mentioned in the said Contract or agreement entered into by the Chief Commissioner of Railways, and George Knight & Co., dated the 26th day of October 1865, and the ratification of the said agreement on the 1st day of February, A. D. 1866, and the said Act of the 28th Victoria, Chap. 13, so far as the same is not altered or modified by this Act, shall be, and each and every of them shall be incorporated into and made part and parcel of this Act, so soon as the assignment of the said agreement by the said George Knight to the said Company hereby incorporated is fully completed and effected; and this Act shall not go into operation, nor shall the said Company hereby incorporated be entitled to the advantages, benefits, and privileges thereof, until the said assignment of the said Contract or Agreement from the said George Knight to the said Company shall be fully completed and effected.

11. This Act shall cease and determine if the Railroad herein contemplated and mentioned shall not be effectually commenced and vigorously prosecuted within six months from the passing hereof, but nothing in this Act shall abridge, lessen, or affect the liability of the Contractor, the said George Knight, or his assigns, to commence the said Railroad on the 1st day of May, in this present year.

Memorandum of Agreement made and entered into this 26th day of October, 1865, between Avar Longley, of Halifax, Esquire, the Chief Commissioner of Railways for the Province of Nova Scotia, by direction and authority of the Governor and Council of said Province, of the one part, and Edward Harris and Thomas T. V. Smith, both of London, England, Esquires, acting for and on behalf of George Knight and Company, of Great George Street, Westminster, London, England, of the other part.

Whereas, an Act of the Legislature of Nova Scotia was passed on or about the Second day of May, 1865, entitled "An Act to provide for the construction of two other sections of the Provincial Railway," and by such Act provisions were made for the construction of a certain Railway from Truro to the boundary line of New Brunswick, and of a certain other Railway from Windsor to Annapolis;

And Whereas, in pursuance of the provisions of the said Act, a negotiation has been entered into between the said parties, having for its object an arrangement by which the said Company shall undertake the construction and working of the said section of the said Railway from Windsor to Annapolis, under the provisions of the said Act, and subject to the terms and conditions hereinafter mentioned.

Now this Agreement witnesseth, and it is agreed by and between the parties hereto as follows: The before recited Act shall be the basis of this Agreement, so far as it relates hereto, except so far as the same may by this Agreement be modified.

The said Edward Harris and Thomas T. V. Smith, on the part and behalf aforesaid, in consideration of the premises and of the agreement on the part of the said Chief Commissioner of Railways, on the part and behalf aforesaid hereinafter contained, hereby agree to construct the said Railroad from a point to connect with the Railway at or near the present station at Windsor, either to Annapolis, aforesaid, or to Troop's Point, the length to be assumed at 85 miles, under the provisions of the said Act, and subject to the terms and conditions hereinafter mentioned on the general route surveyed by James Sykes in 1852, as the same, and the location thereof may be approved of by the Governor in Council; the said works to be commenced at a period not later than the first day of May next, to be diligently prosecuted, and fully completed and ready for traffic on or before the first day of May, which will be in the year of our Lord 1868. The rails to be of good quality, and to be either 42 pounds weight per yard, on the T pattern, to be laid on longitudinal rectangular bearings, properly fastened with spikes, and fished at the joints, or with sleepers and an arris-cut longitudinal stringer, with a proportionably smaller pattern saddle-rail, as introduced on the Great Western Railway, in England. The breadth of roadway, depth of ballast, and general description of road to be of such quality as to ensure permanency and economy of maintenance; the stations and depots to be not less than ten in number, and equal to the requirements from time to time of traffic; and the said Company to efficiently manage and operate the said Railway when completed, at the proper expenses, and for the benefit of the said George Knight and Company, or their assigns, for and during the period for which the annual subvention hereinafter mentioned is provided to be paid, under the terms of the said Act.

The said Company shall be bound to provide such conveyance for the officers and soldiers of Her Majesty's forces, ordnance corps, marines, militia, or police forces, at such time or times (whether the same shall be the usual hours for starting trains or not) as shall be required or appointed by any officer duly authorized by the Governor for that purpose, and with the whole resources of such Company or body corporate, at fares not exceeding two cents per mile for each officer, soldier, marine, or private of such forces, respectively; and also for each wife, widow, or child above 12 years of age, of a soldier, entitled, by

Act of Parliament or other competent authority, to be sent to their destination at the public expense; children under three years of age, so entitled, to be taken free of charge, and children of three years and upwards, but under 12 years, so entitled, being taken at half price for an adult,—provided that every officer conveyed shall be entitled to take with him one hundred weight of personal luggage without extra charge, and every soldier, marine, private, wife, or widow shall be entitled to take with him or her half a hundred weight of personal luggage without extra charge, all the excess of the above weights of personal luggage being paid for at the rate of not more than 80 cents per hundred weight per 100 miles, and all public luggage, stores, arms, ammunitions, and other necessary things (except gunpowder and other combustibles) shall be conveyed at charges not exceeding four cents per ton per mile, the assistance of the military or others being given in loading or unloading such goods.

The said Company shall be bound to convey Her Majesty's mails at the same rate of charges as now paid for the same service to the Railway Department in Nova Scotia.

And the said Edward Harris and Thomas T. V. Smith, on the part and behalf aforesaid, in consideration of the premises and of the further agreement on the part of the said Chief Commissioner of Railways hereinafter contained, on the part and behalf aforesaid, further agree to erect and build over the River Avon, near Windsor, on the said line of Railway, and to form part thereof, a good and sufficient bridge, viaduct, aboiteau, or other suitable erection for the purposes of the said Railway, and in addition to the necessary railway track or tracks across the same, to have a good and sufficient roadway for horses and carriages to pass and re-pass, separate and independent of the said Railway track or tracks, the same to be open and free to the public, or to be under such tolls and charges as the Governor in Council may, for the use of the Province, from time to time enforce.

And the said Chief Commissioner of Railways, for and on the part and behalf of the Province of Nova Scotia, under the authority hereinbefore mentioned, in consideration of the premises, hereby agrees with the said Edward Harris and Thomas T. V. Smith, acting on the part and behalf aforesaid, as follows:—

That the amount of the subvention to be paid hereunder shall be reckoned on 85 miles, or £16,320, sterling, per annum, to be paid half-yearly in London: the first payment thereof to fall due six months after the commencement of the work and the due prosecution thereof for that period.

That all lands required for the Railway track and appurtenances shall be provided gratis to the said Company, with the right of entering on all ungranted lands belonging to the Government and taking, free of cost, all materials required for the Railway, as under the provisions of section 11 chapter 70 referred to in the said Act.

That the said Company shall be entitled to make and enforce a tariff of charges for fares and freights equal to but not exceeding (except by mutual arrangement) the tariff now in force on the Government lines, copies of which are this day signed by the said Representatives; such limitation not to apply to the charges for conveyance of horses and waggons, which shall be determined by mutual agreement.

That all materials and stores required for the construction and working of the Railway shall be entitled to a drawback of the amount of import duties paid thereon by the said Company; and during construction of said Railway, that the Provincial Government shall grant the free use of the landing stages and railway stations at Halifax, Bedford, and Windsor, and transit over the Government Railways, subject to traffic regulations—the said Company paying all expenses incurred in landing, and for haulage and handling of such materials and stores, and also the cost transit thereof.

That should any Legislative alterations be required for the purpose of carrying the terms of this agreement into effect, the party of the first part hereby undertakes and agrees to use all proper means in his power to obtain the same.

And it is hereby mutually agreed, that prior to the opening of the Railroad, a traffic arrangement shall be made between the said Company and the Provincial Government for the mutual use and employment of their respective lines of Railways between Halifax and Windsor and Windsor and Annapolis, including running powers, or for the joint operation thereof on equitable terms.

And the said Chief Commissioner of Railways, in consideration of the premises, doth, for and on the part and behalf aforesaid, hereby promise and agree to and with the said Edward Harris and Thomas T. V. Smith, for and on the part and behalf aforesaid, that the Government of the said Province shall and will well and truly pay, or cause to be paid, to the said George Knight and Company, or their assigns, for the building and sustenance of the said bridge, viaduct, aboiteau, or other suitable erection across the said River "Avon," the sum of £32,000 sterling, in monthly payments, as the work of building proceeds, and the balance, if any, when the same shall be fully completed and the Railway opened up for traffic.

And it is further mutually agreed between the said parties, that the said line of Railway, including the said bridge, viaduct, aboiteau, or other erection across the said River "Avon," with all and singular the appurtenances, when built, shall be the property of the said George Knight and Company, or their assigns, and shall be operated, managed, and upheld by them at their own proper costs and charges.

And it is further mutually agreed, that should the said George Knight and Company hereafter desire to capitalize the said annual subvention by the issue of Government Bonds therefor, the said Chief Commissioner of Railways will hereafter enter into mutual satisfactory arrangements with them for that purpose, and for securing the fulfilment of the contract herein contained, on the part and behalf of the said George Knight and Company, for the efficient building and operating of the said Railway.

And it is further mutually agreed, that the said George Knight and Company shall, on or before the first day of February next, enter into an agreement directly with the said Chief Commissioner of Railways, for the building and operating of the said Railway from Windsor to Annapolis, according to the terms, true intent and meaning of this agreement, and to the satisfaction of the Governor in Council, otherwise the said Commissioner may determine this agreement as void and at an end.

In witness whereof, the parties to these presents have hereunto subscribed their hands and set their seals, the day and year first above written.

AVARD LONGLEY. (L.S)
EDWARD HARRIS. (L.S)
THOMAS T. V. SMITH. (L.S)

Signed, sealed, and delivered, in presence of }
JAMES H. THORNE. }
JAMES G. TOBIN. }

To all to whom these presents shall come :

I, Benjamin Samuel Phillips, Lord Mayor of the City of London, Do hereby certify, that on the day of the date hereof, personally came and appeared before me, James Dorrington, the Declarant named in the Declaration hereunto annexed, and by solemn declaration which the said Declarant then made before me in due form of law, did solemnly and sincerely declare to be true the several matters and things mentioned and contained in the said annexed Declaration.

In faith and testimony whereof, I the said Lord Mayor have hereunto signed my name and caused the seal of the office of Mayoralty of the said City of London to be hereunto put and affixed, and the paper writing or Power of Attorney marked A, mentioned and referred to in

(L.S.)

and by the said Declaration, to be also hereunto annexed. Dated in London, the 18th day of January, in the year of our Lord 1866.

(Signed)

B. S. PHILLIPS, Mayor.

RICHARD J. PAULEY, Deputy Registrar.

London, to wit :

I, James Dorrington, of Number 28 Parliament street, in the City of Westminster, Clerk to Francis Ferdinand Joyes, of the same place, Gentleman, do solemnly and sincerely declare that I, this declarant, was present at the execution of the paper writing, or power of Attorney hereunto annexed, and marked with the letter A, and bearing date the 17th day of January, 1866, by George Knight, therein named and described, and did see the said George Knight sign and seal, and as his act and deed, in due form of law, deliver the same, and that the name or signature "George Knight" set and subscribed to the said paper, writing, or power of Attorney, as the name or signature of the party executing the same is of the proper hand-writing of the said George Knight, and that the names or signatures "H. Skynner" and "Jas. Dorrington" appearing on the said paper writing, or power of Attorney, as the names or signatures of the witnesses to the execution of the said paper writing, or power of Attorney by the said George Knight, are of the respective proper hand-writing of Henry Skynner, of Number 25 Coleman street, in the City of London, Solicitor of the High Court of Chancery in England, and a Commissioner to Administer Oaths in Chancery and in Common Law, and of me, this declarant; and I make this solemn declaration conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the sixth year of the reign of His late Majesty King William the Fourth, intituled, "An Act to repeal an Act of the present session of Parliament, entitled An Act for the more effectual abolition of oaths and affirmations taken and made in various Departments of the State, and to substitute Declaration in lieu thereof, and for the more entire suppression of voluntary and extra-judicial oaths and affidavits, and to make other provisions for the abolition of unnecessary oaths."

(Signed)

JAMES DORRINGTON.

Declared at the Mansion House, in the City of London, }
 this 18th day of January, 1866, before me, }
 B. S. PHILLIPS, Lord Mayor.

(A.)

To all to whom these presents shall come, George Knight, of No. 1 Great George street, in the City of Westminster, in England, Contractor, and being the person described in the agreement hereinafter referred to as "George Knight & Co.," sends greeting:

Whereas, By an Agreement bearing date the 26th day of October, 1865, and made between Avarad Longley, Chief Commissioner of Railways of the Province of Nova Scotia, of the one part, and Edward Harris and Thomas Timmis Vernon Smith, acting for and on behalf of the said George Knight & Co., of the other part, the said Edward Harris and Thomas Timmis Vernon Smith agreed, on behalf of the said George Knight & Co., for the considerations thereinafter expressed, to construct a Railway in Nova Scotia from a point to connect with the Railway at or near the present station at Windsor either to Annapolis or to Troop's Point, the length to be assumed at 85 miles, for the construction of which Railway an Act of the Legislature of Nova Scotia was

passed on or about the second day of May, 1865. *And Whereas*, It was provided and agreed by the said Agreement that the said George Knight & Co. should, on or before the First day of February, which would be in the year 1866, enter into an agreement directly with the said Chief Commissioner of Railways for the building and operating of the said Railway from Windsor to Annapolis, according to the terms, true intent, and meaning of the said Agreement, to the satisfaction of the Governor in Council, otherwise the said Commissioner might determine the said Agreement of the 26th October, 1865, as void and at an end. Now these Presents witness, That the said George Knight doth hereby nominate, constitute, and appoint Edward Harris, of Chippenham, in the County of Wilts, Civil Engineer, and Thomas Timmis Vernon Smith, of 4 Corbett Court, Gracechurch street, in the City of London, Engineer, jointly, the true and lawful Attorneys of him, the said George Knight, in the name of the said George Knight, or in the names or name of George Knight & Co., or any or either of them, or of their or either of their executors and administrators, to enter into any contract or contracts, agreement, or agreements with the Government of the Province of Nova Scotia, or with the Chief Commissioner of Railways, for the building and operating to Annapolis, and to do all other acts necessary to obtain a confirmation or ratification of the before recited Agreement of the 26th day of October, 1865, and, if necessary or expedient, to enter into any new or other agreement, either in substitution of or in addition to the said Agreement of the 26th of October, 1865, and also to agree to any alteration or deviation of the said line, or works thereon, or connected therewith, or any prolongation of time for making and carrying out the said works, and also to refer to arbitration or otherwise, to compromise or settle all disputes with reference to the construction of the said Agreement, or of any clause, matter or thing therein contained, and all claims and demands of every kind and description which shall or may arise under or by virtue of the said Agreement; and generally to do and execute all such acts, deeds, matters, and things with relation to the premises as the said George Knight could or might have done had the said George Knight been personally present,—the said George Knight hereby agreeing to ratify and confirm all and whatsoever his said Attorneys or Attorney shall lawfully do or cause to be done in the premises, or in anywise relating thereto.

In witness whereof, the said George Knight hath herunto set his hand and seal the 17th day of January, 1866.

(Signed) GEORGE KNIGHT. (L.S.)

Signed, sealed, and delivered by the above-named }
George Knight, in the presence of }

H. SKYNNER,

(Signed) JAMES DORRINGTON,
Clerk to F. F. Jeyes,
28 Parliament Street, Westminster.

This is the paper writing or Power of Attorney, marked A, referred to in the Declaration of James Dorrington, taken before me this 18th day of January, 1866.

(Signed) B. S. PHILLIPS, Lord Mayor.

Memorandum of Agreement made and entered into this first day of February, in the year of our Lord 1866: Between Avar Longley, of Halifax, Esquire, the Chief Commissioner of Railways of the Province of Nova Scotia, by direction and authority of the Governor and Council of the said Province, of the one part; and George Knight, of number one Great George Street, Westminster, London, England, Contractor, of the other part:

Whereas an Act of the Legislature of Nova Scotia was passed on or about the 2nd day of May 1865, entitled "An Act to provide for the construction of

two other sections of the Provincial Railway," and by such Act provisions were made for the construction of a certain Railway from Truro to the boundary line of New Brunswick and of a certain other Railway from Windsor to Annapolis;

And whereas by an agreement entered into between Edward Harris and Thomas T. V. Smith, on behalf of the said George Knight, under the name of George Knight and Company, with the said Avaré Longley, the Chief Commissioner of Railways as aforesaid, for the construction and working of the said section of the said Railway from Windsor to Annapolis, under the provisions of the said Act, on the terms and conditions hereinafter mentioned; which said agreement contained a provision that the said George Knight should enter into an agreement directly with the said Chief Commissioner of Railways, according to the terms, true intent and meaning of this agreement and to the satisfaction of the Governor in Council.

Now this Agreement witnesseth, and it is agreed by and between the said Avaré Longley, Chief Commissioner of Railways as aforesaid, and the said George Knight, as follows: The before recited Act shall be the basis of this Agreement, so far as it relates hereto, except so far as the same may by this Agreement be modified.

The said George Knight, in consideration of the premises and of the Agreement on the part of the said Chief Commissioner of Railways, on the part and behalf aforesaid hereinafter contained, hereby agrees to construct the said Railroad from a point to connect with the Railway at or near the present station at Windsor, either to Annapolis, aforesaid, or to Troop's Point, the length to be assumed at 85 miles, under the provisions of the said Act, and subject to the terms and conditions hereinafter mentioned, on the general route surveyed by James Sykes in 1852, as the same, and the location thereof may be approved of by the Governor in Council; the said works to be commenced at a period not later than the first day of May next, to be diligently prosecuted, and fully completed and ready for traffic on or before the first day of May which will be in the year of our Lord 1868. The rails to be of good quality, and to be either 42 pounds weight per yard, on the T pattern, to be laid on longitudinal rectangular bearings, properly fastened with spikes, and fished at the joints, or with sleepers and an arris-cut longitudinal stringer, with a proportionably smaller pattern saddle-rail, as introduced on the Great Western Railway, in England. The breadth of roadway, depth of ballast, and general description of road to be of such quality as to ensure permanency and economy of maintenance; the stations and depots to be not less than ten in number, and equal to the requirements from time to time of traffic; and the said George Knight to efficiently manage and operate the said Railway when completed, at the proper expenses, and for the benefit of the said George Knight, or his assigns, for and during the period for which the annual subvention hereinafter mentioned is provided to be paid, under the terms of the said Act.

The said George Knight shall be bound to provide such conveyance for the officers and soldiers of Her Majesty's forces, ordnance corps, marines, militia, or police forces, at such time or times (whether the same shall be the usual hours for starting trains or not) as shall be required or appointed by any officer duly authorized by the Governor for that purpose, and with the whole resources of the said George Knight, at fares not exceeding two cents per mile for each officer, soldier, marine, or private of such forces, respectively; and also for each wife, widow, or child above 12 years of age, of a soldier, entitled, by Act of Parliament or other competent authority, to be sent to their destination at the public expense; children under three years of age, so entitled, to be taken free of charge, and children of three years and upwards, but under 12 years, so entitled, being taken at half price for an adult,—provided that every officer conveyed shall be entitled to take with him one hundred weight of personal luggage without extra charge, and every soldier, marine, private, wife, or widow shall be entitled to take with him or her half a hundred weight of personal luggage without extra charge, all the excess of the above weights of personal luggage being paid for at the rate of not more than 80 cents per hundred weight

per 100 miles, and all public luggage, stores, arms, ammunitions, and other necessary things (except gunpowder and other combustible matters) shall be conveyed at charges not exceeding four cents per ton per mile, the assistance of the military or others being given in loading or unloading such goods.

The said George Knight shall be bound to convey Her Majesty's mails at the same rate of charges as now paid for the same service to the Railway Department in Nova Scotia.

And the said George Knight, in consideration of the premises and of the further agreement on the part of the said Chief Commissioner of Railways hereinafter contained, on the part and behalf aforesaid, further agrees to erect and build over the River Avon, near Windsor, on the said line of Railway, and to form part thereof, a good and sufficient bridge, viaduct, aboiteau, or other suitable erection for the purposes of the said Railway, and in addition to the necessary railway track or tracks across the same, to have a good and sufficient roadway for horses and carriages to pass and re-pass, separate and independent of the said Railway track or tracks, the same to be open and free to the public, or to be under such tolls and charges as the Governor in Council may, for the use of the Province, from time to time enforce.

And the said Avard Longley, Chief Commissioner of Railways, as aforesaid, for and on the part and behalf of the Province of Nova Scotia, under the authority hereinbefore mentioned, in consideration of the premises, hereby agrees with the said George Knight, as follows:—

That the amount of the subvention to be paid hereunder shall be reckoned on 85 miles, or £16,320, sterling, per annum, to be paid half-yearly in London: the first payment thereof to fall due six months after the commencement of the work and the due prosecution thereof for that period.

That all lands required for the Railway track and appurtenances shall be provided gratis to the said George Knight, with the right of entering on all ungranted lands belonging to the Government and taking, free of cost, all materials required for the Railway, as under the provisions of section 11 chapter 70 referred to in the said Act.

That the said George Knight shall be entitled to make and enforce a tariff of charges for fares and freights equal to but not exceeding (except by mutual arrangement) the tariff now in force on the Government lines, copies of which are this day signed by the parties to these Presents; such limitation not to apply to the charges for conveyance of horses and waggons, which shall be determined by mutual agreement.

That all materials and stores required for the construction and working of the Railway shall be entitled to a drawback of the amount of import duties paid thereon by the said George Knight; and during construction of said Railway, that the Provincial Government shall grant the free use of the landing stages and railway stations at Halifax, Bedford, Windsor, and transit over the Government Railways, subject to traffic regulations—the said George Knight paying all expenses incurred in landing and haulage and handling of such materials and stores, and also the cost transit thereof.

That should any Legislative alterations be required for the purpose of carrying the terms of this agreement into effect, the party of the first part hereby undertakes and agrees to use all proper means in his power to obtain the same.

And it is hereby mutually agreed, that prior to the opening of the Railroad, a traffic arrangement shall be made between the said George Knight and the Provincial Government for the mutual use and employment of their respective lines of Railway between Halifax and Windsor and Windsor and Annapolis, including running powers, or for the joint operations thereof on equitable terms.

And the said Avard Longley, Chief Commissioner of Railways, as aforesaid, in consideration of the premises, doth, for and on the part and behalf aforesaid, hereby promise and agree to and with the said George Knight that the Government of the said Province shall and will well and truly pay, or cause to be paid, to the said George Knight, or his assigns, for the building and sustenance of the said bridge, viaduct, aboiteau, or other suitable erection across the said River "Avon," the sum of £32,000 sterling, in monthly payments, as the work

of building proceeds, and the balance, if any, when the same shall be fully completed and the Railway opened up for traffic.

And it is further mutually agreed between the said parties, that the said line of Railway, including the said bridge, viaduct, aboiteau, or other erection across the said River "Avon," with all and singular the appurtenances, when built, shall be the property of the said George Knight, or his assigns, and shall be operated, managed and upheld by him at his own proper costs and charges.

And it is further mutually agreed, that should the said George Knight, or his assigns, hereafter desire to capitalize the said annual subvention, by the issue of Government Bonds therefor, the said Chief Commissioner of Railways will hereafter enter into mutual satisfactory arrangements with him for that purpose and for securing the fulfilment of the contract herein contained, on the part and behalf of the said George Knight, for the efficient building and operating of the said Railway.

And it is further mutually agreed by and between the said parties hereto, that, for the purposes of carrying out this Agreement, the said George Knight, or his assigns, shall have power to form a Joint Stock Company, to be incorporated by Act of the Parliament of Nova Scotia, as contemplated by and in accordance with the Act hereinbefore referred to; and when and so soon as such Company is formed, and capital placed to the satisfaction of the said Chief Commissioner of Railways of the Province of Nova Scotia, the said intended Company so to be formed shall be accepted in lieu of the said George Knight for the purposes of this Agreement.

In witness whereof, the parties to these Presents have herunto subscribed their hands and set their seals the day and year first above written.

AVARD LONGLEY, Esq.,

Chief Commissioner of Railways for the Province of Nova Scotia

SIR,—

We are prepared and willing to take up the capital for the Windsor and Annapolis Railway, as soon as an act can be obtained on the terms of a subvention, as provided by the Act of Council of May 1865, and a payment of £32,000 sterling for building the bridge over the River "Avon," and all other conditions similar and equal to those provided in the Agreement between Messrs. Knight & Co. and A. Longley, Chief Commissioner of Railways, dated 26th Oct., 1865.

Your obedient servants,

COMMISSIONER'S REPORT.

NOVA SCOTIA RAILWAY,

Commissioner's Office, Halifax, October, 1865.

TO THE HONORABLE PROVINCIAL SECRETARY:

SIR,—

I beg to submit, for the information of His Excellency the Lieutenant Governor, and the Legislature, the following Report upon the operations of the Nova Scotia Railway, for the financial year ending the 30th September, 1865.

Before proceeding, however, to institute any comparisons between the operations of the road during the past year and any former period, or making any comments in reference thereto, it may be proper to remark that the financial year closed in 1864 on the 30th of September instead of the 31st of December, as in years: this leaves but nine months to be accounted for in that year; this arrangement is not found very convenient for present purposes of comparison, especially so far as relates to operations for an entire year,—for instance: in order to make comparisons for a whole year, the last quarter of 1863 must be added to the nine months following, terminating the 30th September 1864, inasmuch as the present financial year is made up of the last quarter of 1864 and three first quarters of 1865.

It may be more satisfactory, therefore, first, to compare the nine months of 1864 with the corresponding period of 1865, and afterward show the result of the whole twelve months' operations respectively.

The earnings of the road for the nine months terminating the 30th September, 1865, were.....	\$133,697.44
Receipts from other sources.....	3,214.37
Total Receipts.....	\$136,911.81
The earnings of the road for the corresponding period of 1864, were.....	\$119,602.72
Receipts from other sources.....	2,151.73
Total Receipts.....	\$121,754.45
Making the increase for the nine months of 1865, over the corresponding period of 1864.....	\$15,157.36
The increase of the nine months of 1864, over the same period of 1863, as shown by the report of that year, was.....	16,438.22
Exceeding that of the nine months of the present year over the corresponding period of 1864, by the sum of.....	\$1,280.86

These figures indicate a very close approximation in the ratio of increase for the periods named, and also a highly satisfactory growth of the business of the road; there is, however, one drawback, if such it may be called, found in the fact that, while the receipts for the nine months of 1865 show an increase of \$15,157.36 over the corresponding period of 1864, the working expenses of the former period

have so far exceeded those of the latter as to make the nett revenue, for the nine months of 1865, less by the sum of \$9,773.86 than that exhibited in the same period of 1864.

It will, nevertheless, be somewhat reassuring to find, when we come to review the transactions of the entire year, and contrast the results with those of 1864, that the difference in amount of nett revenue is reduced to the sum of \$5,217.27. The nett revenue of these respective years standing as follows:—

Nett revenue for twelve months of 1864.....	\$30,102.21
Do. do. 1865.....	24,884.94
	\$5,217.27

Moreover, it will be found, by reference to the Report of 1863, that while the gross receipts of that year exceeded those of 1862 by the sum of \$10,567.71, the expenses for the same period (including supplementary account) were increased \$20,037.35, making the nett revenue less by \$15,469.64, than for the year 1862. This exhibits a disparity between 1862 and 1863 against the latter, as regards expenses and nett revenue, much greater than that shown between 1864 and 1865; and yet the results of 1863 were regarded as quite satisfactory and successful, and, beyond dispute, were so in reality, as was conclusively shown by the results of the succeeding nine and twelve months of 1864,—the former period exhibiting a nett revenue of \$23,511.55, and the latter a nett revenue of \$30,102.21.

The inferences fairly deducible from these facts and figures are these: that it is always sound policy to keep the road up to a safe and creditable standard, and that any large excess of expenditure made in this way, in any one year, is pretty likely to lead to a corresponding reduction in the next, as any neglect is almost sure to entail heavy additional outlays at some future period.

The foregoing remarks may not apply in every case; but, as a general rule, will, I apprehend, be found correct.

Subjoined is a comparative statement of the receipts of the road for the nine months of 1864 and 1865, showing the sources from whence derived.

Nine months ending September 30th.	Passengers.	Horses and Wagons.	Freights.	Total.
1865	\$62235 39	\$10775 32	\$60686 73	\$133697 44
1864	55878 47	9872 36	53851 89	119602 72
Increase	6356 92	902 96	6834 84	14094 72

Showing an increase in Passengers of.....	\$6356.92
Horses and Wagons.....	902.96
Freight	6834.84

Increase in earnings of the road.....	\$14094.72
Add to this receipts from other sources.....	1062.64

Total increase for the period named.....	\$15157.36
--	------------

The increase in the working expenses, including supplementary account, for the same period, was \$24,931.22; thus showing a decrease in amount of nett revenue, as before stated, of \$9,773.86.

The gross receipts for nine months ending the 30th September, 1865, as compared with the corresponding period of 1864, exhibit an increase of 12.44 per cent., and an increase in working expenses (including supplementary account) of 25.37 per cent.

The following table will show the increase and decrease on the several services for the nine months of 1864 and 1865 respectively :

Particulars.	Increase.	Decrease.
Locomotive Power.....	\$12060 44	
Merchandise and Passenger Cars	5634 70	
Maintenance Way and Buildings	8570 49	
General charges.....	\$209 16
	26265 63	
	209 16	
Supplementary account.....	26056 47	
	1125 25	1125 25
	\$24931 22	

It will be perceived when the whole twelve months come to be compared, that the working expenses were proportionably higher during the nine than the twelve months of 1865, as compared with the same period of 1864.

Having, for the sake of fuller detail and comparison, commented thus far upon the transactions of the nine months of 1864 and 1865, respectively; an examination of the operations of the whole twelve months of each year will now come appropriately under review; and here will be found more ample means of comparison than the nine months supply.

I need not here comment upon the management of the road since 1863, as contradistinguished from any previous period of its history, in regard to the *economic* principle; but merely revert to the fact, that, upon an examination of the state and condition of the road, in 1863, a very large outlay was deemed essential in order to bring the road up to a safe and proper standard; as reference to the Report of that year will fully disclose; since that period the sum of \$21,305.86, has been charged to "Extra Maintenance," and distributed over succeeding years as follows:

1863.	1864.	1865.	Total.
\$2261.32.	\$10811.81.	\$8232.73.	\$21,305.86.

It will thus be seen that the sum spent upon "Extra Maintenance" in 1865, was less by \$2579.08 than in 1864.

Waiving for the time being any discussion relative to the circumstances which led to the opening of this account, I think it but proper to say, that I regard its further continuance as of doubtful expediency. However necessary it might have been in the first place, the time has now come, I believe, when it may be disposed of; indeed, since the 30th of June last, nothing has been charged to this account, and even previous to this time several sums, first classified by the Road Inspector to this account, were subsequently charged to ordinary maintenance.

I adopted this course, not that I doubted that the road had been neglected in some former years; but because I felt that it was impossible to discriminate between what ought and what ought not to be set down to this particular service; beside, the account was a troublesome one, and only served to encumber the books. The fact that so small a sum has been expended during a period of between two and three years, affords substantial proof that the power which the existence of this account gave has never been abused. These remarks are not intended to imply any doubt relative to the correctness or ability of Mr. Perley's Report, which led to this account being opened,—far from it,—for doubtless the sum named in that Report as requisite to put the road in good condition is not an exaggeration; but I incline to the belief that a part at least,

of that estimate might fairly have been put down to imperfect construction in the first place,—for there is no disguising the fact that the road was very imperfectly built, and even now work is being done and charged to revenue which might not inappropriately be charged to construction.

The tables attached to the Report of the Superintendent of Traffic show the earnings of the road, for the twelve months terminating the 30th September, 1865, to be.....\$180,739.45

To which is added:

Members of Legislative Council and House of Assembly, and Officers,	\$312.41
Volunteers and Militia attending drill instruction and Militia training, with their horses and wagons, &c.....	2878.90
And Teachers attending Conference.....	247.96

Making a total of.....\$184178.72

The sum of \$3439.27, of the above sum total, relating to carrying members of the Legislature, Volunteers and Militia, Teachers, &c., is entirely fictitious, so far as relates to anything received; still, as these services were performed, it is but right that they should be shewn—and paid for, too,—when it is absolutely necessary they should be done, upon some modified terms, as it is unfair thus to throw upon the Railway the performance of work belonging to other services and interests, without affording some remuneration. But this is far from including *all* the work done by the Railway for which nothing is paid, as more or less is done for every department of the public service, and one cannot but feel that such a course is unfair, and ought to be changed, charging each department with what properly belongs to it.

The following table will shew the receipts from the earnings of the road for 1864 and 1865, respectively, and the sources from whence derived:

Years.	Passengers.	Horses and Wagons.	Freight.	Total.
1865	\$82073 21	\$18244 24	\$80422 00	\$180739 45
1864	73998 81	16123 89	70966 86	161089 56
	8074 40	2120 35	9455 14	19649 89

It will thus be seen that there has been an increase in the earnings of the road in 1865 over 1864 of \$19649.89, and distributed as follows:

Passengers.....	\$8074.40
Horses and Wagons.....	2120.35
Freight.....	9455.14
	<u>\$19649.89</u>

According to the returns made, the number of regular passengers for the year were.....	120972
Add to these Members of Legislature.....	220
Militia and Volunteers.....	5582
Teachers.....	134
And holders of Season Tickets.....	2982

Making a total..... 129890

Or an increase of passengers over 1864 of 16876; besides 11818 Teamsters carried free.

As there is an obvious discrepancy between the amount of revenue for the year, as shewn by the tables attached to the Reports of the Accountant and Superintendent of Traffic, respectively, it is proper that I should show how this occurs. The direct earnings of the road for 1864 and 1865, as previously shewn, stand thus:

1865\$180739.45
 1864 161089.56

Difference in earnings of the road\$19649.89

But there are other receipts which affect the *net revenue*, and those, of course, vary in amount from year to year—for instance:

The receipts from other sources in 1864 were in excess of those of 1865, by the sum of..... \$497.06

Which, deducted from the above, shows actual increase of \$19152.83

Or, to make it plainer, it may be stated thus:

1865—Earnings of the road.....\$180739.45
 “ Receipts from other sources 3214.37
 Total receipts.....\$183953.82

1864—Earnings of the road\$161089.56
 “ Receipts from other sources 3711.43
 Total receipts.....\$164800.99

Which, deduct from above, gives actual increase of \$19152.83

It may not be amiss further to remark, that, while the indirect receipts, comparing the nine months of 1864 and 1865, are somewhat larger for the latter than the former period, the reverse is the case when the whole twelve months are compared.

The increase of per centage upon the various sources of traffic for the year is as follows:

Passenger traffic10.91 per cent.
 * Horses and Wagons.....13.15 “
 Freight.....13.32 “

Making an average of 12.20 per cent.; this, as previously remarked, is slightly less than the per centage of increase upon the gross receipts.

For the sake of showing the vast improvement that has taken place in connection with the earnings of the road, more especially during three or four years past, I subjoin a comparative statement showing the receipts of each year since 1859:

1859. 1860. 1861. 1862. 1863. Nine months. 1864. 1865.
 \$102877.57 112470.92 116028.19 182699.38 144651.84 119602.72 180739.45

Thus showing an increase during the period covered by these several years of \$77861.88, or an advance in receipts of 75.68 per cent.

Subjoined is a comparative statement of the working expenses of the road for 1864 and 1865:

PARTICULARS.	Whole year. 1864.	Whole year. 1865.	Increase.	Decrease.
Locomotive Power	\$36473 38	\$47803 55	11330 17	
Merchandise and Passenger Cars...	27420 63	33446 30	6025 67	
Maintenance Way and Buildings...	58080 47	66247 96	8167 49	
General charges	11524 30	11496 32	\$27 98
			25523 33	
			27 98	
			25495 35	
Supplementary account	133498 78	158994 13	25495 35	
	1200 00	74 75	1125 25	1125 25
	\$134698 78	\$159068 88	24370 10	

It is thus shown that the working expenses of 1865 amounted to \$159068.88, against \$134698.78 for 1864, exhibiting an increase of expenditure in 1865, of \$24370.10.

The total receipts for 1865, as previously shown, amounted to\$183953.82
The total working expenses, to..... 159068.88

Leaving nett revenue of..... \$24884.94

There has been an increase upon working expenses, as compared with 1864, of 18.09 per cent., and an increase upon the gross receipts of the road for the same period of 11.62 per cent. The per centage of working expenses upon the gross receipts for the year, has been 86.47, against 81.73 for 1864.

It will be seen by reference to the Accountant's Report, Appendix A, page 4, that the cost of maintenance of way, per mile, for the nine months ending 30th September, 1865, was\$545.28
Ditto Ditto Ditto 1864, was..... 452.88

Increase per mile in 1865 \$92.40

1865—The cost for twelve months terminating as above, was.....\$714.26
1864— Ditto Ditto Ditto Ditto 626.20

Increase 1865..... \$88.06

The tables attached to the Accountant's Report, Appendix A, will readily show the receipts and disbursements on the several services of Revenue, Construction, and Extension of Railway from Truro to Pictou.

As stated in the Accountant's Report, a large proportion of Construction Funds for the year were expended in the erection of a Blacksmith's Shop, at Richmond, and the payment of a claim (under award) of Messrs. Lithgow and Smith, in connection with the old brick Engine House. This claim was a vexed one, and of long standing, and the Government felt that it was very desirable to have it disposed of; hence the submission to arbitration.

PERMANENT WAY.

According to the Road Inspector's Report, 37,267 new sleepers have been put into the road during the year; five thousand two hundred and ninety-one joint, and six thousand four hundred and fifty-eight intermediate chairs have been used in repairing the road during the year. The disproportionate number of joint chairs used arose from the fact that intermediates were substituted in the first place, on some portions of the road, and in the repairs of the year proper joint chairs have been supplied.

The number of chairs used in 1865 was 11,749, against 5,883 in 1864. For those used in 1865, \$35.00 per ton was paid, against \$28.00 per ton in 1864; so, besides using double the quantity in 1865, we paid a higher rate by \$7.00 per ton, getting \$2.00 per ton more for old material. As a good deal of new material is used in the manufacture of these chairs, the probable difference has been about \$6.00 per ton. The large number of chairs used in 1865, as before intimated, was in consequence of what may be regarded as imperfect construction in the first place, and, therefore, a considerable part of the extra cost of this service is justly chargeable to Construction Account, which would reduce the legitimate cost in this case by somewhere about the sum of three thousand dollars.

During the year *seventy-seven and three-quarter miles* of fence has been taken down and rebuilt or built anew on the Main Line and Windsor Branch,—that is to say: forty-three miles taken down and rebuilt, and five miles of new fence put up on the Main Line, and twenty-four miles taken down and rebuilt and five and a quarter miles of new fence put up on the Windsor Branch; or what may be regarded as nearly equivalent to fencing, on one side of the line, for the entire extent of the road.

The Contract system, for some time applied to the maintenance of the Permanent Way, (in which fencing, of course, was included,) renders it exceedingly difficult to arrive at anything like the accurate cost of this service for several years; but a pretty clear indication is given of the small amount spent upon this service for some years by the fact that the entire cost of maintenance of Permanent Way in 1861 was only \$22,381.78. Coming down to 1863, however, we have some criterion of previous expenditures upon this service when we find that the total cost during nine months of 1863 was only \$403.55, and for the twelve months of that year only \$1,399.65.

It is quite clear that fencing, for several years, was a mere nominal affair; and what with fires, decay of material, and other deteriorating causes, the fencing had come to be in a most delapidated condition by the year 1863.

During 1864 the sum of \$6180.98 was expended in building and repairing fences, and in 1865 \$12,190.31; exceeding the expenditure of 1864, large as that was, by \$6,009.33.

In the face of these facts and figures, it will need no argument to prove that this service was sadly neglected in former years.

Satisfied as I was of the risk to life and property attendant upon neglect of this kind, I lost no time in putting different sections of the fencing under contract, which have since been completed under the close supervision of the Road Inspector, whose special duty it was made to see that the work was well done. A reasonable outlay another year will put the fences in good repair, making the cost of this service light for several succeeding years.

The Road Inspector reports that the ditches have been thoroughly cleaned out, and the material thus obtained used in widening embankments; the embankment at Pier's Cove, injured in October last by the action of the surf during a high easterly wind, has been secured by widening and strengthening the embankment with rocks.

The western Pier of the Stewiacke Bridge has settled considerably, and is in rather an unsatisfactory condition. The masonry is perfect, but the Pier seems to be gradually sliding towards the bed of the river. The Chief Engineer examined it during the past season, but has made no report.

Hall's Bridge, near Enfield, and Culvert, near Truro, have been repaired during the season; and several of the Pile Bridges and other wooden structures along the Line have received considerable repairs during the year; many more of these wooden structures begin to show signs of decay.

New platforms have been erected during the season at Windsor Junction, Ellershouse and Oakfield, and extensive repairs made upon those at Richmond, Windsor Junction, Shubenacadie, Stewiacke, Truro and Windsor.

A number of Sidings, to meet the growing traffic of the road, have been put in during the year. The Stone Tank House and Wood Shed at Windsor Junction, begun in 1864, have been finished, and found of great service.

The road is reported in good repair, and I am satisfied will compare favorably with any previous period.

Reference is made in the Road Inspector's report to the covered drain near Lilly Lake; and I am apprehensive that a very considerable outlay will be demanded at this place during the ensuing season. This drain runs along under the track for the space of nearly two thousand feet, and is merely covered with three-inch hemlock plank, and the planking is now giving way to such an extent as to very soon endanger the safety of the trains. It has been proposed to re-cover this drain with stone flagging obtained at the Beaver Bank Quarries; but I think it may be found better to drain the water into some new channel, or change the road bed itself, and make of the present merely an open drain. A large outlay will have to be made in either case; but the latter would probably prove more satisfactory.

MERCHANDIZE AND PASSENGER CARS.

It will be seen by reference to tables attached to the Accountant's Report, Appendix A, that there has been an increase of expenditure in this Department,

during the year, of \$6,025.67; of this amount, \$3,386.68 has been spent in the construction of twelve new Platform Cars; and as this is the first instance of addition to the Rolling Stock being charged to *Revenue Account*, in fair comparison, this sum should be deducted; this would reduce the excess to \$2638.99. The total cost of this Department, as the Accountant's tables will shew, has been \$33,446.30.

In the Locomotive Superintendent's Report will be found a detailed account of the state and condition of the Rolling Stock; the number of the different classes of cars; the renewals and repairs, &c., which have taken place during the year, by which it will be seen that considerable additions and improvements have been effected.

During the year two Box and three Platform Cars were purchased in New Brunswick, upon terms highly advantageous to the Department. These Cars have all iron instead of wooden trucks, and are consequently worth more than the same class of cars built here, although they have cost considerably less.

These Cars, for the present, have been charged to Suspense Account, and will be used either on the Picton Extension, or for revenue service, as may hereafter seem best, and charged accordingly.

Those who are at all curious to know why the nett revenue for 1865 has been less by \$5,217.27 than that of 1864, notwithstanding the large increase of receipts, amounting to \$19,152.83, will find, in view of the explanation made, a satisfactory reply.

The fact is, that, taking out the cost of the twelve Platform Cars—for the first time charged to revenue account—	\$3386 68
Extra cost of Chairs to meet defective construction, say	3000 00
And the excess of fencing, not only over last year, but any other year whatever	6009 33
	<hr/>
Making	\$12306 01
all of which may be regarded as "Extra Expenses," and, instead of a decrease of	5217 27
there would be an actual increase nett revenue of	7178 74

enormous as have been the expenses connected with the Locomotive and other services during the year.

LOCOMOTIVE DEPARTMENT.

It has already been stated in this report that the working expenses have exceeded those of 1864 by the large sum of \$24,370.10; of this excess \$11,330.17 belongs to this Department. This difference of expense has been occasioned not only by the extensive repairs to Engines, but by the enhanced price of all stock and material used in running and repairing of Locomotives, as well as by the increased number of miles run and increased weight of freight carried. As an illustration of the increased cost of stock, it may be stated that Oil has advanced 31 cents per gallon, Wood 24 cents per cord, and Waste 6½ cents per lb.; these are heavy items of expense in this Department, and, of themselves, make considerable difference in the expense. I am sorry to add that the Oil, the most important article mentioned, has been of a very poor quality.

In the report of the Locomotive Superintendent will be found a comparative statement of the number of miles run, of Locomotives, for the year ending the 30th September, 1864 and 1865; by which it appears that the total number of miles run in 1865 was 179,261, against 171,181 for 1864, shewing an increase in the former year of 8,080. There will also be found in the table attached to this report, a comparative statement of cost of running and repairing for each of these years.

The running expenses of 1865 were 13½ cents per mile, as compared with 11½ for 1864, and the cost of repairing for 1865 8½ cents per mile, as compared with 5½ for 1864,—making the cost of running and repairing for 1865 21½ cents per mile, as compared with 17½ for 1864. The total cost of running and

repairing for 1865 was.....	\$39,023 35
against	29,488 29
for 1864, making a difference of.....	\$9,535 06

During the year 90 new chilled wheels have been put under the cars, and 78 repaired. In 1864 four of Vleker and Naylor's cast steel tyres were imported and put under one of the engines, and have since run 27,000 miles, shewing but little signs of wear. In accordance with Mr. Johnston's recommendation, eight more of these tyres have been ordered, and will be put on as soon as they come to hand.

A good deal of difficulty having been experienced in getting up the heavy grades and moving out of sidings when the rails were wet, eight new Sand-boxes, of enlarged size, have been obtained from Portland, and most of the engines are now supplied with these necessary appendages.

In 1864 the large sum of \$3,960.35 for repairs of engines, was charged to Construction Account. This was done, I understand, because certain of the Engines had been damaged on construction service; and having done little or nothing for revenue up to that time, this was considered a fair charge upon construction funds. In 1865, only \$553.24 was charged to that service. During the year a Blacksmith's Shop has been erected at Richmond, the value and convenience of which has been found to be very great. In this building there are nine forges, and ample space for the accommodation of the workmen employed.

62,503 tons of freight, including horses and wagons, have been carried over the lines during the year; the average receipts per ton moved being \$1.58, and the receipts per ton per mile 5½ cents. The total weight of goods carried in 1863 was 56,471 tons, against 42,135 tons for 1862, giving an increase in favor of 1863 of 14,336 tons. The number of tons of freight carried in the nine months of 1864 was 42,406. It will thus be seen that while the year 1863, as compared with 1862, shows an increase in number of tons carried of 14,336 tons, and the nine months of 1864 an amount exceeding the whole twelve months of 1862, the year 1865, compared with the whole twelve months of 1864, shows an increase of only 6,032 tons.

MAIL SERVICE.

The Superintendent of Traffic reports that he has credited the road with "extra mail service" performed as in 1864, which amounts to the sum of \$160; making a total for the two years of \$380. The sum of \$220 charged in 1864, the Government decided to remit to the Post Office Department; but the charge of the \$160 for 1865 is still left for adjustment.

The attention of the Government and Legislature is particularly called to this subject, as it is quite time that this matter was set at rest, by a more equitable arrangement being entered into.

The Department does not now get what would be obtained were the mails carried as *second class freight*; besides, until a recent period, the Conductors have been acting in the distribution of letters and papers along the line without compensation.

Below will be found a copy of a letter addressed to me in May last, by the Superintendent of Traffic, which presents this question in an aspect which I think must excite attention:

"NOVA SCOTIA RAILWAY,
"Richmond, May 26, 1865.

"SIR,—

"I beg to invite your attention to the agreement between the Post Office and Railway Department for the transport of mails. In 1858, shortly after the line was opened for traffic, an agreement was made by the Hon. James McNab, Chairman, to convey the mails by regular trains between Halifax, Windsor, and Truro, and intermediate stations, for the sum of two thousand four hundred dollars (\$2400) per annum; this agreement is still in operation. At the time this agreement was made we carried through mails from Halifax to

Windsor and Truro, and vice versa, twice daily, and to intermediate stations once. The Way Offices along both lines have been increased from time to time, until the service has nearly doubled,—for example, in 1858:

Through Mail Stations.....	3
Intermediate ditto.....	6
	—
	9
	—
In 1865—Through Mail Stations.....	3
Intermediate ditto.....	12
	—
	15

“You will observe that all the Way Offices have been added since this agreement came in force, without any corresponding financial consideration, and in addition the entire service and responsibility of collection and delivery are performed by our conductors; for which they receive no remuneration, besides, all extra trains connecting with steamers carried mails free, until last year, when I deemed it justice to the Department to make a small charge of ten dollars (\$10) per train, between Halifax and Windsor, amounting to two hundred and twenty dollars (\$220), which still remains unsettled.

“It may not be out of place to state how this service is paid for in the adjoining Province of New Brunswick. The Railway Department there carry one mail each way daily, for which they receive three thousand two hundred and forty dollars (\$3240) per annum; besides, the Post Office Department employ an officer who accompanies the Train, I understand, at a salary of four hundred dollars (\$400) per annum; and all express or extra mail service is paid for in addition, at the rate of sixty-seven (67) cents per mile. The charge which I made last year was twenty-two and a quarter (22½) cents per mile, or one-third of what is paid in New Brunswick.

“I am of the opinion that the charge for transport of mails by regular trains should be increased to three thousand six hundred dollars (\$3600) per annum, and for all mails carried by express trains, run in connection with steamers from St. John, to be charged at the rate of twenty-five (25) cents per mile, and all trains run specially with mails should be charged at fifty cents per mile.

“I do not presume to dictate in such matters, but consider it my duty in justice to the Department to bring this subject to your notice.

“I am, Sir, your obedient servant,

GEORGE TAYLOR.

“AVARD LONGLEY, Esq.
Chief Commissioner.”

SPECIAL TRAINS.

Special Trains have been run in connection with the steamer between Windsor and St. John, whenever it was necessary to the accommodation of the public; and the connection has thus been preserved, almost without interruption, during the season.

But while this arrangement has given general satisfaction, and indeed left no room for complaint, so far as relates to the passengers between Halifax and Windsor, in connection with the steamer, much complaint has been made by the public, at the time ordinarily consumed in making the journey between Halifax and Windsor, and it must be confessed that the delays connected with the taking of cars out of sidings, loading and unloading of freight at the different stations along the line, &c., is tedious and vexatious to passengers, and in many ways inconvenient and objectionable to persons merely travelling on business or pleasure.

The rate of speed at which the mixed or freight trains run, although far too slow to satisfy the bulk of the passengers, is such as to seriously damage the

road, from the number and weight of cars attached to the trains, and I am of opinion that the running of "a special passenger train," daily, would, in the end, entail but little additional expense, while much more general satisfaction would unquestionably be given.

By reducing the speed of the mixed or freight trains to the rate of ten or twelve miles an hour, it is quite apparent that the wear and tear of the Permanent Way and Rolling Stock would be materially lessened, and the saving thus effected, and the probable increase in the passenger traffic consequent upon this arrangement, would largely meet, if it did not fully cover, the additional expense of running of extra trains. This or tri-weekly freight trains will be found almost indispensable, I think, during the ensuing season.

DAILY MAIL TO ANNAPOLIS.

By the "Special Train" arrangement, I see no difficulty in running a Daily Mail between Halifax and Annapolis; starting the train from Halifax at half-past five or at six o'clock in the morning, on and after the first of May next; and if this arrangement were carried out it would be a great boon to the people west of Kentville, and there seems to be quite enough to warrant a trial of the scheme.

The additional cost would not be very considerable, and the claims of the people in that direction are sufficiently strong to justify the outlay.

NEW STATION BUILDINGS AT RICHMOND.

There is great need of additional Station accommodation at Richmond, and the time has now come, I think, when the present inconvenient and unsightly structures should give place to those more in keeping with the improvements and requirements of the times.

PICTOU EXTENSION.

The progress made with the works on the "Pictou Extension" has been less rapid than was anticipated when the undertaking was begun, owing to embarrassments resulting from the low rate of contract prices for work to be performed, and it is not improbable that the most of the contracts will ultimately be given up; nevertheless, it is the intention of the Government to have that portion of the line, between Fisher's Grant and the "Albion Mines," opened for traffic in the month of September ensuing, and another section to West River by the end of 1866, opening the whole to Truro by the month of May, 1867.

This will tax to the utmost the energies of all concerned; but impressed as the Government is with the importance of opening the line at the earliest possible moment, no pains will be spared in trying to meet every reasonable desire and expectation connected therewith. I am sorry to say that Contract No. 7 has already been given up, and the work thereon is now being carried on by days' works, under the immediate supervision of the Chief Engineer. The same course will probably be pursued with other sections which may be given up, or taken out of the hands of the Contractors; and it is hoped thus to avoid any serious delays in the prosecution of the work. The Chief Engineer expresses himself confident in the belief that the work can still be completed at a cost within the limits of his first estimate; and as the utmost confidence is reposed in his ability and skill, there is good reason to hope that the result will vindicate the correctness of his judgment.

EXTENSION TO NEW BRUNSWICK AND ANNAPOLIS.

The extension of the lines from Truro to the New Brunswick border, and from Windsor to "Annapolis Royal," is anticipated at an early day, indeed, the contract for building the former is already signed, and it is confidently expected that a contract for building the latter will be made at an early day, with a view of beginning operations on both lines early in the ensuing season.

If this is effected, the dream of former years is likely to be much more speedily consummated than the most sanguine could have anticipated a few years ago, and, in a mode, too, which must commend itself to the approval of all.

The advantages likely to result from the successful carrying out of these important enterprises are too obvious to require that they should be pointed out.

The "Annapolis Line" must become the favorite one for travelling between Halifax and St. John and the United States; as not only will the time be shortened by this route, but a voyage of three and a half hours across the Bay of Fundy will be substituted for one of some ten hours via Windsor, with the additional advantage of passing through sections of country the most attractive of any in the Province. It is hoped that the line between Windsor and Annapolis will be built and opened for traffic some time during the season of 1868.

With a view of showing at once the intimate relationship between railways and the general interests and prosperity of a country, and the growing improvement of traffic on several of the Canadian Railways, it may not be amiss (although a little after date) to subjoin the following statements taken from the "Canadian News" of the 21st December last:

"The extraordinary improvement which has been experienced throughout the Province in every branch of business, during the past season, is perhaps better exhibited by the comparative statement of traffic returns published by the several Canadian Railways than by any other means. Taking the Grand Trunk Railways as the first in order, we find that since the 1st of July to the 25th of November, the date of the last traffic returns received, the receipts have amounted to £595,328, or an average of £20 11s. per mile per week, against £507,071, or an increase of upwards of 17 per cent.

"The Great Western, for the same period, shows a gross receipt of £318,663, being £44 per mile per week, and showing an increase over the corresponding period of last year of £76,062, or 31 per cent. The Northern Railway has received, since the commencement of the current half year, a gross traffic of £44,174, equal to £22 7s. per mile, and, as compared with last year, exhibits the gratifying increase of £9,195, or 26 per cent. The other and minor railways show proportionably similar improvements."

What is true of the Canadian is also true of the American Railways, if the following, taken from the "Toronto Globe" of the 29th of December last, is at all to be relied upon:

"THE NEW YORK CENTRAL RAILWAY.

"The Annual Report of the New York Central Railway Company, one of the most extensive Railway Companies in the United States, has just been published. From it it appears that the capital stock of the Company is \$24,591,000, and the funded debt \$14,627,422.77. The cost of the road and equipment is \$33,701,919.56. The earnings and receipts for the past year, (ending the 30th September, 1865,) has been \$13,975,524.39, and the expenses of maintaining and operating have been \$10,382,358.09. The transportation expenses for the year have been 77.87 per cent. of the gross earnings for the same period. The nett earnings for the year are \$1,609,362.81, equal to 6.24 per cent. (and United States tax thereon) on the amount of the capital stock of the Company."

It is gratifying to me to be able to state that the year has been marked with but few casualties, either in relation to life or property, and this is indicative not only of great care on the part of those in charge of the trains, but speaks well of the condition and equipments of the road.

Nearly 142,000 persons have been carried over the lines during the year; out of this number only *three* have received any bodily harm, and two of these were not seriously injured—only one fatally, and even in this case the fault was entirely with the sufferer.

In addition to these, Mr. Loasby, Conductor of a Freight Train, had his leg broken by a fall from the train when in motion, but has since recovered, and will soon be at work again.

In September last I deemed it necessary to issue an order closing all the saloons on the road. I did this because they were the source of immorality, annoyance, and danger,—and more than one fatal casualty may be directly ascribed to their agency, I fear.

I am happy to say that the course adopted has not only met the approval of all the friends of sobriety, but been attended by a marked improvement in the quiet and good order witnessed along the line; and although there were some at first to complain, few are prepared now to condemn the step taken, upon any general principle relating to the safety and welfare of the public.

In conclusion, I have much pleasure in bearing testimony to the efficiency of the officers of the Department, upon whose assistance I have been able always to rely, and whose duties have been performed with a cheerfulness and fidelity scarcely to be excelled.

The services of others have been of great value to the Department; and, generally, there is little cause of complaint as regards the manner in which the Department is served by those in any way connected therewith.

I have the honor, Sir,

To remain your obedient servant,

AVARD LONGLEY.

NOVA SCOTIA RAILWAY.

APPENDIX.

(A.)

HALIFAX, N. S., 31st October, 1865.

SIR,—

I beg to submit my Annual Report of the operations of the Nova Scotia Railway for the fiscal year ending 30th September, 1865, accompanied with the following balance sheets, accounts, and abstracts:

1st.—REVENUE SERVICE.

- A 1. Balance Sheet.
- A 2. Revenue Account with Abstracts.
 - (1.) Locomotive Power.
 - (2.) Merchandize and Passenger Cars.
 - (3.) Maintenance Way and Buildings.
 - (4.) General Charges.
 - (5.) Supplementary Account.
- A 3. Comparative Statement of Locomotive Power, for Nine Months ending 30th September, 1864 and 1865.
- A 4. Do. do. Merchandize and Passenger Cars, do.
- A 5. Do. do. Maintenance Way and Buildings, do.
- A 6. Do. do. General Charges, do.
- A 7. Do. do. Locomotive Power for Twelve Months ending 30th September, 1864 and 1865.
- A 8. Do. Merchandise and Passenger Cars, do. do.
- A 9. Do. Maintenance Way and Buildings, do. do.
- A 10. Do. General Charges, do. do.
- A 11. Quarterly Summary of Receipts and Expenses.
- A 12. Detailed Account of Supplies on hand.

2nd.—CONSTRUCTION SERVICE.

- A 13. Balance Sheet.
- A 14. Capital Account.

3rd.—EXTENSION OF RAILWAYS FROM TRURO TO PICTOU.

A 15. Balance Sheet.

A 16. Expenditure on Extension to Pictou, with Abstracts.

- (a) Engineering.
- (b) Roadway and Works.
- (c) Permanent Way.
- (d) Station and Water Service.
- (e) Sundry Services.
- (f) Commissioner's Department.

The detailed quarterly Accounts, accompanied with the vouchers of the expenditure on all these several services, have been rendered to the Honorable the Financial Secretary, as the law directs.

REVENUE SERVICE.—On referring to Revenue Account (A 2) it will be seen that there has been an increase in the total gross receipts, from all sources, during nine months of the fiscal year, as compared with the same period of 1864, of.....\$15,157 36
An increase in the Working Expenses, including Supplementary Account during same period of.....\$24,031 22

Showing a decrease in total nett Revenue for nine months ending 30th September, 1865, as compared with 1864, of.....\$9,773 86

If, however, the whole twelve months of the fiscal year be compared with the same period of 1864, the result will be shown as follows:—

Total increase on gross Receipts, from all sources, for twelve months ending 30th September, 1865.....\$19,152 83
Increase in Working Expenses, including Supplementary Account, same period..... 24,370 10

Leaving a decrease in nett Revenue of..... \$5,217 27

I have deemed it advisable to have the comparative tables for 1865 made for nine and twelve months, which is rendered necessary in consequence of the fiscal year for 1864 containing only three quarters; therefore all comparisons with the whole twelve months ending 30th September, 1865, are of necessity made with the nine months of last year ending 30th September, and last quarter of 1863, the full details of which will be found in these two last reports, Appendix A.

The gross Receipts from all sources for nine months ending 30th September, 1865, as compared with the corresponding period of 1864, shows an increase of 12.44 per cent. The whole twelve months ending 30th September, 1865, as compared with same period of 1864, an increase of 11.62 per cent.

The Working Expenses for nine months ending 30th September, 1865, compared with same period of 1864 (including Supplementary Account) show an increase of 25.37 per cent. expended in earning an increase of Revenue, for same period, of 12.44; or the whole twelve months, an increase of 18.09 per cent., expended in earning an increase of Revenue of 11.62 per cent., as before stated.

The percentage of Working Expenses for nine months ending 30th September, 1865, on total gross Receipts is 89.97 per cent., as compared with 80.68 for same period 1864.

The percentage for whole twelve months is 86.47, against 81.73 for same period 1864.

The comparative statement of Working Expenses annexed shows the increases and decreases on the several services for nine months ending 30th September, 1865, as compared with same period of 1864, to be as follows:

WORKING EXPENSES.

Particulars.	Increase.	Decrease.
Locomotive Power.....	12060.44	
Merchandise and Passenger Car.....	5634.70	
Maintenance Way and Buildings.....	8570.49	
General Charges.....	\$209.16
	26265.63	
	209.16	
	26056.47	
Supplementary Account.....	1125.25	1125.25
	\$24931.22	

Comparing the whole twelve months of the fiscal year for 1865 with a corresponding period of 1864, gives the following result:—

Particulars.	Whole Year. 1864.	Whole Year. 1865.	Increase.	Decrease.
Locomotive Power.....	\$36473 38	\$47803 55	\$11330 17	
Merchandise and Passenger Cars.....	27420 63	33446 30	6025 67	
Maintenance Way and Buildings.....	58080 47	66247 96	8167 49	
General Charges.....	11524 30	11496 32		27 98
			25523 33	
			27 98	
Supplementary Account.....	133498 78 1200 00	158994 13 74 75	25495 35 1125 25	1125 25
	\$134698 78	\$159068 88	\$24370 10	

The increased expenditure on Locomotive Power for nine and twelve months, as compared with the same periods of last year, is caused by the large advance in price for all stores used in Running and Repairing, and also to the increased amount of Repairs that have been made to the Engines.

The same remarks apply in a measure to Merchandise and Passenger Car Service; but this account is in excess of 1864 by the large amount of \$3386.68, which has been alone expended in building new Platform Cars. As this is the first instance of Renewals being charged to this service, for the purpose of instituting a correct comparison, this amount should properly be omitted. (See A 5 and 8.)

The increase in Maintenance Way Service is owing to the large additional outlays required to be made in upholding the Permanent Way, and to the increased number of Chairs and Sleepers used, and new Fencing erected. Increase in Fencing alone, twelve months ending 30th September, 1865, is \$6009.33.

The cost per mile for maintaining the Permanent Way for nine months, ending 30th September, 1865, is.....\$545.28
Do. for nine months, ending 30th September, 1864..... 452.88

Increase, 1865..... 92.40
The cost for 12 months, ending 30th September, 1865.....\$714.26
Do. Do. 1864..... 626.20

Increase per mile, 12 months, 1865..... \$88.06

The operations of the road from 1863 to 1865, both inclusive, will be found in the following table:—

Specification.	12 Months ending 31st Decr. 1863.	12 Months ending 30th Sept. 1864.	12 Months ending 30th Sept. 1865.
Receipts from all sources	\$149674 42	\$121754 45	\$183953 82
Working Expenses*	127962 58	98242 90	159068 88
Nett Revenue.....	\$21711 84	\$23511 55	\$24884 94

Or for Nine Months ending 30th September.

Specification.	1863.	1864.	1865.
Receipts from all sources.....	\$106627 88	\$121754 45	\$136911 81
Working Expenses*	91506 70	98242 90	123174 12
Nett Revenue.....	\$15121 18	\$23511 55	\$13737 69

The books and accounts of the Storekeeper, Mr. Jones, have been examined and found correct, and stock taken of all supplies on hand at 30th September, 1865, as per Account (A 12).

CONSTRUCTION SERVICE.—It will be seen on referring to Capital Account (A 14) that there has been received—

From the Hon. Receiver General, to 30th Sept., 1864.	\$4,290,891.15
Ditto Ditto 1865.....	20,000.00
	\$4,310,891.15
And expended to 30th Sept., 1864.....	\$4,293,920.77
Ditto Ditto 1865.....	25,806.77
	\$4,319,727.54
Less per credit account.....	220.39
	\$4,319,507.15

Showing a balance of over-expenditure of \$8616.00
which is accounted for in Balance Sheet, (A 13.)

It will be observed that there has been a large expenditure at Richmond and Windsor Junction Stations, at which places operations have been carried on in the building of a new blacksmith shop and tank-house, &c., &c., which are not yet fully completed, and also in the payment of the result of an arbitration on the claims of Messrs. Lithgow and Smith in connection with the old brick engine-house, which is chargeable to this service. Large outlays have also been made in adding to the rolling stock of the Department which is also considered chargeable, sufficient equipment not having been furnished, with the exception of the new platform-cars built, which, as before stated, have been charged to Revenue service.

* Including Supplementary Account.

EXTENSION OF RAILWAYS FROM TRURO TO PICTOU.

The accounts of expenditure on this service (A 16) with abstracts annexed show there has been received—

From the Hon. Rec'r General to 30th Sept., 1864.....	\$21,015.04
Do. do., 1865.....	220,000.00

\$241,015.04

And expended, as certified—

By Chief Engineer to 30th Sept., 1864.....	\$9,862.13
*Do. do., 1865.....	260,728.62

\$270,590.75

Leaving Balance over expenditure, which is accounted for in	
Balance Sheet (A 15) of.....	\$29575.71

I am, Sir,
Your obedient servant,

THOMAS FOOT,
Secretary and Chief Accountant.

To AVARD LONGLEY, Esq.,
Chief Commissioner N. S. Railway.

* A portion of this amount is for work done, but not paid for at this date.

REVENUE SERVICE.

TRAFFIC DEPARTMENT,
Richmond, October, 1865.AVARD LONGLEY, Esq.,
Chief Commissioner of Railways:

SIR,—

I beg to submit my Report and accompanying Returns, showing the operations of the Nova Scotia Railway for the fiscal year ending 30th September, 1865.

RETURNS.

- (B 1.) Superintendent's Account Current.
 (B 2.) Various sources of Revenue and aggregate earnings at each station.
 (B 3.) Mileage of trains, number of passengers, quarterly receipts on Main Line and Windsor Branch, and Summary.
 (B 4.) Number of passengers of each class carried per month, and recapitulation.
 (B 5.) Monthly receipts from local and through passengers at the respective stations.
 (B 6.) Monthly receipts from horses and wagons.
 (B 7.) Monthly freight earnings at each station, freight outward.
 (B 8.) Monthly freight earnings at each station, freight inwards.
 (B 9.) Aggregate freight earnings at each station.
 (B 10 and 11.) Comparative statement of gross earnings on Main Line and Windsor Branch, for 1864 and 1865.
 (B 12.) Quarterly Returns showing the number of first and second class passengers from each station, and the receipts therefrom.
 (B 13.) Total number of first and second class passengers, and receipts from each station.
 (B 14.) Description of freight forwarded from each station.
 (B 15.) Weight of freight received at and forwarded from Richmond.

The following tables will show that the earnings during the past year ending 30th Sept., 1865, amount to the sum of \$180739 45

The other services performed by the Department, not embraced in these returns, amount to the sum of three thousand four hundred and thirty-nine and 3/4 dollars, viz.:

Members of Legislative Council, House of Assembly, and Officers, during the session	\$312 41
Volunteers and Militia attending drill instruction and Militia training, and horses and wagons.....	2878 90
Teachers attending Conference.....	247 96

 3489 27

 \$184178 72

You will perceive from the comparative statement, that the receipts for the twelve months ending 30th September 1865, exceed those of the same period of 1864 by \$19649.89.

COMPARATIVE STATEMENT.

Years.	Passengers.	Horse and Wagon.	Freight.	Total.
1865	\$82073 21	\$18244 24	\$80422 00	\$180739 45
1864	73098 81	16123 89	70966 86	161089 56
	\$8074 40	\$2120 35	\$9455 14	\$19649 89

In reviewing these returns, you will observe that the increase has been general in passengers, horses and wagons, and freight. I find that the per centage of increase in the different branches of traffic, over 1864, is as follows:—

Passenger traffic	10.91 per cent.
Horse and wagon traffic	13.15 "
Freight traffic	13.32 "
or an increase on the aggregate earnings of	12.20 "

PASSENGER TRAFFIC.

This business continues steadily to improve over the entire line.

The "local" increase may reasonably be attributed to the development of the Gold Mines, and other branches of enterprise and industry, situated along the lines, where railroad transport can be made available to advantage. The through traffic also exhibits most satisfactory results, as a glance at the returns from terminal stations, steamboat and stage-coach connections, will show.

The "Bay of Fundy route," via Windsor to New Brunswick, Canada, and the United States, and vice versa, is annually giving strong evidence of its popularity, not only in a commercial point, but also as a pleasant and most desirable journey for tourists or pleasure-seekers. The firm of Messrs. Hatheway, Small & King have just placed on the route a new and powerful first class steamer. This vessel having enlarged accommodation, and being fitted up in a superior style for the comfort of passengers, will be well adapted to meet the requirements of the increasing business, and doubtless will give an impetus to the travel during the present fall; and I have every reason to anticipate a still greater improvement during the coming season. Express trains have been run during the past year, connecting with the steamer at Windsor. These trains appear to have given universal satisfaction to the travelling public.

It is equally satisfactory to notice that the passenger travel from Truro, to and from the eastern sections of the Province, exhibit a favorable increase, although it cannot be expected that the business over stage coach routes can be of such rapid growth as that induced by steamboat communication. Although the stage lines are well managed, they are to a large extent only used as a commercial convenience. The number of passengers carried as per Returns 120972

Members	220
Militia and Volunteers	5582
Teachers	134
Holder's of Season Tickets	2082

8918

Making a total of 129890

or an increase over the preceding year of 16876, besides 11818 teamsters carried free.

HORSE AND WAGON TRAFFIC.

This traffic, although annually increasing, is by no means remunerative. The expenses necessarily incurred in moving it are very heavy, resulting from the mileage of rolling stock. This branch of trade is carried at a low tariff, which may account to a certain extent for the increase; besides, the inconvenience attending the moving of goods from the Richmond Station to the City has been long and seriously felt by the freighting community. This fact no doubt has necessitated the farming population to adopt the system of taking their teams to market, and I am of opinion it can only be remedied by railway extension, or water communication between the terminus and the city. The City Horse Railroad, at present being constructed, may to a certain extent remedy this; but, in consequence of not being conversant with the arrangements, I am not prepared to put forth an opinion.

FREIGHT TRAFFIC.

The steady and regular increase of this traffic which the returns demonstrate, is very encouraging, and you will observe that the increase is principally derived from the intermediate stations. The enterprise, energy and skill displayed in developing the gold mines and other laudable branches of industry, doubtless contribute largely to the present increase, and I think we may reasonably assume that this business will be of a permanent nature, from the success which (with few exceptions) has attended such operations.

I subjoin, for comparison, the aggregate yearly earnings of the line since the opening to Windsor and Truro :

1859.	1860.	1861.	1862.	1863.	1864. Nine months.	1865.
\$102877.57	\$112470.92	\$116028.19	\$132699.33	\$144651.34	\$119602.72	\$180739.45

These figures show that the earnings for the present year 1865 exceed 1859 by \$77861.88, or an increase of 75.68 per cent. in seven years.

The total weight of freight, including loaded wagons, is 62,503 tons; the average receipts per ton moved being \$1.58; and the receipts per ton per mile 5.26 cents.

MAIL SERVICE.

In view of bringing this subject forward for careful consideration, I beg to invite your attention to my letter addressed to you in May last, from which you will perceive since this arrangement was consummated, additional Way Offices have been established from time to time, until the actual service performed has (I may safely say) been doubled.

I have during the past year credited the road with the Express Mail Service performed, at the same rate as in 1864, which amounts to \$160, making a total for the two years of \$380. It would be very desirable to have this matter adjusted as soon as circumstances will permit. The scale of charges recommended in my letter are based upon a very low estimate, and I trust they may be approved, which would only be equitable to this department of the public service.

STATION ACCOMMODATION.

The important subject of enlarged accommodation at Richmond Terminus has been frequently referred to in my reports. The large increase of general business on the line necessitates immediate action being taken in view of meeting satisfactorily the requirements of the community. I would invite your attention to the present passenger station. You are aware this building was only intended for temporary use, and does not now afford that accommodation which the travelling public expect; besides, if allowed to remain another year, it must necessarily undergo very extensive renewals to make it safe.

The rapidly increasing freight traffic requires immediate attention. It is impossible to conduct the business with promptitude and satisfaction, with the present facilities.

The building used for "outward" freight purposes requires to be enlarged, and an additional set of weighing scales erected. An "inward" freight store of sufficient dimensions is also wanted, and a loading bank for live stock and heavy materials, besides additional siding and platform accommodation to ensure punctuality and despatch to the trains.

In considering the above suggestions it should be kept in mind that the completion of the Pictou Branch extension will doubtless bring a large amount of additional business; provision for which ought to be made in due time.

At Rocky Lake Station a Freight Shed is required; the room at present used for this purpose in the station building being too small; the gold mining operations at Waverley are carried on most extensively, which has attracted a population numbering (as I am informed) over two thousand, and this station being situated about two miles from Waverley "proper," I think there can be little doubt but the business will improve. At Windsor Junction a platform has been erected fifty feet in length, and the road completed; the inconvenience hitherto experi-

enced is thereby remedied. At Oakfield, a new Flag Station between Grand Lake and Enfield, a platform has been erected at the expense of Col. Laurie (proprietor) one hundred feet long.

The sidings at Elmsdale and Shubenacadie brick-works have been altered and lengthened to meet the business and expedite the working of the trains.

The plans for a new Station and Freight House at Enfield, recommended in my last report, will shortly be submitted for your consideration.

A temporary siding has been put down at the Stone Quarry recently opened by Mr. Foster, near Wickwire Station, and a large quantity of building material has already been moved.

At Beaver Bank Station, on the Windsor Branch, the loading bank has been lengthened nearly sixty feet, to afford greater facilities to the proprietors of the Pavement and Building-Stone Quarries, which are now extensively operated; the material, I understand, is of a substantial and durable character, and well adapted for paving and building purposes.

The new German settlement between Stillwater and Newport, known as Ellershouse, is rapidly rising into notice; during the past year the enterprising proprietor, Mr. Ellershausen, has finished a handsome private residence, and I understand several others of equal dimensions are in contemplation; besides there are over fifty buildings, comprising dwelling-houses, stores, &c., with a population of several hundred people. The extensive operations at present being carried on in clearing and cultivating land, erecting buildings and machinery (steam and water power) for various manufacturing purposes, indicate a rapid development of our resources, and the prospect of establishing a manufacturing trade. The energy and enterprise displayed are worthy of notice, and all reasonable facilities ought to be extended in view of stimulating and encouraging such undertakings; during the past season a new siding was put down four hundred feet long, for the accommodation of a new steam saw mill, and a platform one hundred feet in length, for public convenience. The travel and transit to and from that place are shown in the returns from Newport and Mount Uniacke. I am of opinion if the business continues to grow steadily as heretofore it will be necessary to put up buildings and make a regular station there; as I understand the road leading to the old Windsor Road has been put in tolerably good repair.

ROLLING STOCK.

Some of the first class cars now require extensive repairs; their exposure to the weather, when not in use, is beginning to tell; two have been thoroughly painted and varnished, and several others cleaned, partially painted and varnished. A Car Shed is much wanted, where the cars could be properly cleaned and protected from the weather, when not required for the traffic. Three of the second class cars have been altered and fitted up as baggage and smoking cars, painted, heated, and made comfortable; by this means the practice of smoking in the second class cars on some of the trains has been abolished. It will be most desirable, as soon as possible, to have similar cars on all trains, as smoking in the cars is annoying to many.

The new combined second class and baggage car, built by Mr. Ward, has been placed on the line, and answers the purpose admirably. Six new box freight, and two cattle cars, have been built and placed on the line.

Two cattle cars have been dismantled, one partially destroyed by fire, and another decayed and unsafe for use.

Twelve platform cars have been built, and are now available for traffic; four have been condemned and broken up.

To meet the requirements of the passenger business, I beg to recommend that two additional first class cars be obtained and placed on the line by the first of June. Two second class, forty feet in length, and other dimensions to correspond, and one combined second class and baggage cars, same as the one in present use. Cars for freighting purposes will be recommended for your consideration as the business may require.

The inconvenience experienced from snow storms was scarcely felt last year; only on one occasion (13th February) was any detention suffered, and that was of a trifling nature. Although a considerable quantity of earth or "slurry" came down, in the cutting, it was not to such an extent as to interfere materially with the running of the trains.

It would be very desirable if a separation of passenger and freight trains could be financially accomplished; but I have some doubt if the present passenger business will warrant it. I am perfectly aware of the fact that upon some occasions the delays in loading and unloading freight is tedious to passengers, but to make an entire separation on both lines would doubtless entail a large additional expenditure. I am of opinion that delays can be largely remedied by putting on an additional regular freight train, to run on both lines tri-weekly, carrying all heavy materials, to and from stations and sidings, in car loads: by this means the weight of the present trains could be very much reduced, and the speed increased to a more uniform rate. It might be desirable to try this for a season, as there can be no doubt but the completion of the "Pictou Branch Extension" will necessitate a thorough revision of the running of the trains.

I regret that I have to report four casualties, viz.: on the 31st October, 1864, a young lady from Kentville had her foot injured in consequence of falling from the platform at Beaver Bank Station, when the train was in motion, but, I am glad to understand, not seriously. The lady was meeting some friends at that Station (Report B, 160, 177). On the 12th May, Mr. Elisha Loasby, conductor of freight train, fell off when the train was running, and had his leg broken and severely fractured, but has nearly recovered (Report C, 106, 108). A little boy, a son of Capt. O'Dell's, got underneath the freight train standing in the siding at Richmond, the party in charge had occasion to move the train, and not observing the boy, he got slightly bruised. I understand he was able to be out in a few days (Report C, 218, 234). And on the 15th August, a Mr. McKenna, in leaping on the train at Bedford Station, when in motion, fell down between the cars, and was very much bruised. He died about two weeks after the accident (Report C, 964, 564). I may state that Mr. McKenna intended to join the train at Bedford Station for Halifax, but was not a passenger previous to the accident.

The fact that nearly one hundred and forty-two thousand passengers travelled upon the Railway during the past year without accident or injury (with the above exceptions) give strong proof of the care and vigilance of the officers and employees in charge of the trains.

I am, Sir, your obdt. servt.,

GEO. TAYLOR, Superintendent.

Locomotive Department, Richmond, October, 1865.

AVARD LONGLEY, Esq.,

Chief Commissioner of Railways.

SIR,—Herewith I beg to submit the returns in connection with the Locomotive and Car Departments for the year ending 30th September, 1865.

Return No. 1 shows the number of miles run and stores consumed by each locomotive.

Return No. 2 shows the number of miles run and the average consumption of stores per mile by locomotives on regular and extra passenger trains.

Return No. 3 shows the total number of miles run, and the average consumption of stores on all services.

Return No. 4 shows statement of mileage, consumption of stores, and cost of repairing locomotives, with the cost per mile run.

Return No. 5 shows the cost of repairing Nos. 1 and 2 Engines, which were damaged when employed on the construction service in the years 1858 and 1859.

Return No. 6 is a list and description of all the Rolling Stock.

LOCOMOTIVE DEPARTMENT.

I beg to make a few remarks on the above returns:—No. 1 shows that 8,080 more miles have been run during the year 1865 than were run during the corresponding period of 1864.

Return No. 2 shows that a less number of miles were run to a cord of wood in 1865 than were run to a cord of wood in 1864. There is a greater consumption necessary, owing to the increase of mileage in the first place, but more on account of the increase in the number of cars per train, and also the increase of weight of freight per train.

Return No. 4 shows that the wood has also increased in price 24 cents per cord; and that the price of oil has increased 31 cents per gallon (and a poor quality at that). The waste has also increased 6½ cents per pound. This has been partly owing to the great drought during the past summer, preventing the possibility of getting the dirty waste washed; and I may say that generally all the stores have increased in price, and consequently has increased the working of this department.

I have to state that considerable repairs have been done to some of the locomotives' boilers, and tenders, tanks and frames, that were in former years not needed to be done; but as some of the boilers showed indications of weakness or fracture, they were put to shunting in the yard, until put into the shop for repairs. One engine is at present undergoing extensive repairs. A good many of the boilers have been tested with water pressure last year, and will now be regularly tested for the future.

The repairs and renewals for the past year have been greater, owing to nearly all the locomotives being put on the road at one time, and consequently having the renewals of tyres and boiler repairs all in one year; and as the trains are increasing in weight, and also in the number of cars, and some of the engines having been running very steady, the wear and tear has increased considerably more than in former years. I recommended the late Chief Commissioner to import four of Naylor & Vickers' cast steel tyres. They were put on to one of the engines, and have run 27,000 miles, and show very little wear. It was therefore that I recommended you to order twelve more, as they will be a great deal cheaper than Lowmoor ones in the end.

It has been necessary to put on sand boxes on those engines that were not supplied with them, as there is difficulty in getting up the grades when the rails are wet, and with heavy trains. Slipping is very injurious to the tyres and the engine generally. Some of the engines have also been supplied with blowers to assist them in getting up steam when the wood is wet.

I am happy to say that with the exception of three of the engines having their crank pins broken, that no serious accident has happened during the past year, through frost or any other cause, and that generally the engines are in good order.

In my last report I urged the great need of a blacksmith's shop. I am happy to say that a *good* one has been erected, which will meet the requirements of this department satisfactorily.

During the last summer great difficulty was found (on account of the very dry season) to get a supply of water to wash out the locomotive boilers; and as the same deficiency existed along the line, it was difficult to keep the boilers from receiving injury. And having called your attention to the fact, I am glad that you had the fountain at Richmond enlarged, and also a better supply of water provided for at Polly Bog; and I presume that there will *now* be a sufficient supply, not only to meet the requirements of the locomotives, but also in cases of fire.

I would now urge the necessity of building a coal store to hold the coal that is required for the use of the stationary engine, to keep it from being exposed to the weather, and other causes of waste or loss. I would also urge the necessity of lighting the workshops with gas, as the present system, during the short days, of lighting with candles and lamps, is not only expensive, but dangerous as regards fire; and with good gas light the men could work much better and more satisfactorily during the short days or when night work is required.

CAR DEPARTMENT.

First Class Cars—10 in Number.

These cars have had general repairs. Two have been painted complete during the year; three have been rubbed down, renovated and varnished; 26 new brass bushes have been put into them, 12 new chilled wheels; and two have been trussed up by iron rods and other repairs. An increase in them in number is required.

Second Class Cars—9 in Number.

These cars have had general repairs. Two have been painted; 8 new chilled wheels have been put under them; also 3 new bushes; and alterations have been made to meet the requirements of the road.

Freight Cars—34 in Number.

These cars have had general repairs. Three have been painted, and they have had renewal in 29 new brass bushes, 12 new chilled wheels, and two repaired wheels.

Horse and Cattle Cars—21 in Number.

These cars have had general repairs in wheels and bushes; 18 new chilled wheels have been put under them, 14 repaired wheels and 19 new brass bushes, and other renewals.

Platform Cars—106 in Number.

These cars have received general repairs in wheels, bushes, and other materials. The renewals in planking, for covering and other carpenter work, have been heavy. There have been 3 painted, 40 new chilled wheels have been put under them, and 78 repaired wheels; 113 new brass bushes have been put into them, and other renewals.

Side Tip Cars—12 in Number.

Eleven of these cars are in working order.

Snow Ploughs—3 in Number.

These are in good order.

I beg to make a few remarks on Return No. 6, which shows the list of Rolling Stock on 30th September, 1864, and also the list of Rolling Stock on hand on the 30th September, 1865. This return shows that 21 new cars have been built during the year; 5 have been broken up; one caught fire when loaded with hay, and the box of it was burned. The iron mountings of the broken up cars were used in the construction of the cars that had to be rebuilt with new wood materials.

I would also state that 12 other new flat cars have been put on the road since the close of the year. It may be necessary to use these flat cars on the Pictou Extension early in the Spring, before we could get any more built. There are also 3 flat and 2 box freight cars that were imported from New Brunswick. They are good cars, and were bought on very favorable terms. They are held in suspense at present.

I would state that the flat cars, on account of their being subjected to a heavy traffic, and exposed to all weathers, are decaying very rapidly; and as the original wheels that were put under them have been repaired two or three times, they are nearly worn out, and for the most part will require new chilled wheels put in their places. A great many of the flat cars have been re-covered with planking during the past year. As the number of the cars in each train is increasing, the tear and wear increases greatly in proportion; and I may state that the repairs of the Car Department, to meet the requirements of the road, have consequently been heavy for the past year.

I would say that an increase in the number of passenger cars is very much required, as at present they have to be run over the road more on account of having so small a number of them, and little time to get them repaired at the proper time; as we cannot get much done to them, except during the winter, and the expense is greater *then* than if they were attended to at the proper time.

A good shed is much required to keep them from being exposed to the weather, and for the purpose of having them washed and kept clean.

I have to say that the cars generally are in a fair state of repair.

Your obedient servant,

W. JOHNSTON,

Superintendent.

Richmond, 30th September, 1865.

W. JOHNSTON.

(D.)

*Maintenance Way Department,**Richmond, 22nd November, 1865.*

AVARD LONGLEY, Esq.,

Chief Commissioner of Railways.

SIR,—

I beg leave to submit the following Report upon the state and condition of the Nova Scotia Railway, ending 30th September:

The general absence of snow during last winter allowed the frost to penetrate so deeply into the slopes of cuttings that the rains in the early spring caused the surface of the slopes to run or slurry down to a larger extent than usual. During occasional soft weather, and in the spring, the thawed part lodges on a bed of frozen earth; it will then easily slip or slide down the sloping face of the cutting, either of its own weight or by the assisting action of the rain, thus filling the ditches or drains, and giving much extra trouble to the upholders.

The ditches in these and other cuttings have all been thoroughly cleaned out, and the material so obtained has been used for widening embankments,—wherever the embankments are not grassed over, the earth of which they are formed, acted on by frost and thaw, (as in the cuttings), always slips down, more or less, towards the bottom of the slope.

On the 14th October, a high easterly wind caused the surf of the Basin to cut the embankment at Pier's Cove, at several places, till nearly perpendicular with inner rail. The damage was immediately attended to, and the embankment widened and strengthened with rocks collected for the purpose at Richmond.

The upper Sackville River Bridge has also been secured, by depositing a quantity of rocks on the embankment.

On the embankments at Rocky Lake, Barney's Brook Bridge, near Mr. Parker's, (Main Line), and several places on Windsor Branch, ballast has been spread and the road bed raised wherever any sinkage had taken place.

The western abutment of the Stewiacke Bridge has settled eleven inches since last repaired, being, on an average, from five to six inches yearly. The portion over the western span thus gradually sinking, causes an undue and severe strain upon the girders; but as Mr. Fleming has examined this bridge, I consider it unnecessary to make any further remarks in reference to it.

The wing wall of Hall's Bridge, near Enfield, having fallen down, has been rebuilt.

A severe freshet in the spring of the year carried away a large portion of the pitching in the bottom of the arched culvert near Truro, and otherwise injured the wing walls. This damage has been repaired, and all the masonry re-pointed.

The masonry and the pitching in the bottom of the culvert under embankment, Little Meadow Brook, (Windsor Branch), has also been repaired, and the masonry of the Bridge near Beaver Bank re-pointed.

Four new cattle guards have been put in at Rocky Lake; also four cattle guards and three open culverts have been taken down and rebuilt on Windsor Branch.

New cattle guards are required at Mr. Andrew's and Polly Bog level crossings, as the present iron castings used are perfectly useless.

Several of the wailings under the longitudinal beams of the Blackburn pile-bridge having broken, they have been repaired, and diagonal struts and new wailings have been put in and securely fastened to the piles with inch bolts. In

making these repairs, it was observed that several of the hemlock piles are becoming rotten, and will require to be carefully attended to.

I have also tested the pile-bridge on the Windsor Branch, near Mount Uniacke, and found the deflection too great. The piles have also sunk at two places. I have raised the road-bed to its proper height, and trussed five of the spans. The piles and wallings are perfectly sound, but the longitudinal beams are fast decaying, and in a very unsatisfactory state. Before making any large expenditure on said bridge, (which was but a temporary one in the first instance), it is a question whether it would be most advisable to truss the remaining spans, or to fill them in with materials taken from the cuttings. The quantity of excavation which will be necessary for this purpose will amount to 14,000 cubic yards, to which add for shrinkage and soft bottom 8000, will make the total about 22,000 yards.

The girders of Sackville and Stewiacke Bridges will require a fresh coat of paint, as they show signs of rust.

The planking and longitudinal timbers of the Rawdon River, Grand Lake, and Hall's Bridges, (Main Line), and the Lakeland Bridge, (Windsor Branch,) have been renewed.

Two small Bridges near Elmsdale, also Barney's Brook and St. Croix Bridges, the planking is entirely decayed, and requires renewal.

There has been a length of 43 miles of fence taken down and rebuilt, and five miles of new fence put up at Grand Lake (Main Line); also, 24½ miles rebuilt and 5½ miles new fence put up between St. Croix and Stillwater,—making in all 77½ miles, and 31,213 new fence-posts have been substituted for decayed ones.

The Permanent Way has been maintained during the present year in excellent running order. Owing to the quick curves at Birch Cove, the rails are fast wearing out; and I would recommend that this portion of the road, from 4th to 6th mile posts, should be relaid with new rails next summer. About one-half of the old rails taken out, if carefully selected, will be found of great service for repairing other portions of the road, and the other half, although they may be considered useless for the Main Line, will, nevertheless, be found very servicable for sidings on the Pictou Branch, by straightening them and cutting off the damaged ends.

The old rails have been taken out at Pier's Cove, and new rails laid over the embankment.

Twenty-eight thousand five hundred and eight new sleepers have been used on the Main Line, to replace decayed ones, and eight thousand seven hundred and fifty-nine on the Windsor Branch,—making a total of thirty-seven thousand two hundred and sixty-seven. This includes also the sleepers used in relaying and extending sidings. The number of sleepers required for 1866 will be about thirty thousand.

Five thousand two hundred and ninety-one joint chairs, and six thousand four hundred and fifty-eight single chairs have been used in repairing Permanent Way. The increased quantity of joint chairs used is partly owing to the single chairs, previously in use in lieu of joint chairs, having been taken off when replacing sleepers.

The siding at Mr. Malcolm's Brick Works has been lengthened 374 feet, and connected with the main road at both ends, so as to give greater facilities to the working of trains. A new siding, 270 feet in length, has been laid down at Limestone Quarry, near Wickwire's, for the accommodation of Mr. Foster. The sidings at Truro road and Mr. Smith's Brick Yard have been taken up; the materials are required for new siding to be put in at Wickwire's Station. Mr. Lang's siding has been altered and lengthened 120 feet for loading brick. A new siding has also been constructed at Mr. Ellershausen's, 402 feet in length, for new Saw Mill lately erected there.

Three new platforms have been erected during the past year, viz.: One at Windsor Junction, 50 feet in length, for loading and unloading freight to and from the German Gold Diggings; one also at Oakfield, near Grand Lake, 100 feet in length, for Colonel Laurie; and one at Ellershausen's Station, 100 feet in length, for landing and taking up passengers, freight, &c.

The loading bank at Beaver Bank has also been lengthened 57 feet.

The platforms at Richmond, Windsor Junction, Shubenacadie, Stewiacke, Truro, and Windsor, have been extensively repaired, and the platform and loading bank at Fletcher's taken down and renewed.

The new wood-shed and tank-house at Windsor Junction are finished. The reservoirs for a more abundant supply of water at Richmond and Polly Bog are being excavated and enlarged, so that they may hold an additional quantity of water to meet the requirements of the running of the trains.

The covered drain carrying the stream issuing from Lily Lake, passes at present under the track for a distance of 1950 feet, and is five feet wide, and from three to three and a half feet deep. The walls are built of dry, rubble masonry, and the drain is covered over with 3-inch hemlock plank. The planking has decayed and broken down in many places, and the whole covering is in a delapidated condition. Stone flags can be procured at Beaver Bank Quarries, of sufficient length to cover the drain with, at 60 cents per foot; but I would recommend the water to be carried under the track to the opposite side of the Railway, by means of an open or covered culvert; then to run down an open ditch on the north side to near lower end of embankment, and then crossed again by drain or culvert to the south side, into the old bed of the stream. At this spot a drain or culvert must sooner or later be opened, as the water is accumulating very fast in a pond on the north side, formed by the embankment of the Railway acting as a dam. The excavations for proposed water-course will be sufficient for refilling drain under track.

A new slip has been constructed for landing passengers and freight at Windsor wharf, and new guards fastened to wharf for steamboat protection.

I have the honor to be, Sir,

Your obedient servant,

WILLIAM MARSHALL,

Road Inspector.

APPENDIX No. 7.

RECIPROCITY TREATY CORRESPONDENCE.

*Government House,
Halifax, N. S., 25th May, 1865.*

SIR,—

I have the honor to enclose the copy of a Memo. submitted to me this day in Council, by my Ministry.

The main object of that Memo. is to bring before me, and through me before Her Majesty's Government and the Governments of the neighbouring British Provinces, the necessity for concerting measures to secure a renewal of the Reciprocity Treaty, on terms equitable to all parties concerned.

In the event of any negotiations being undertaken by Her Majesty's Government with that view, I trust it will not be thought premature in me to express a hope that it may be found possible to consult the wishes of this Province before the final ratification of any renewed treaty, such as that of 1854.

I have, &c.,

(Signed)

R. G. MACDONNELL.

To the Right Honorable EDWARD CARDWELL, M. P.

(Copy of Minute of Council, dated 25th May, 1865.)

The undersigned Members of the Executive Council respectfully call the attention of His Excellency the Lieutenant Governor to the following extract from the Report of the Committee on Trade and Manufactures, adopted by the Assembly at the recent session of the Legislature:

“Your Committee have also had under consideration the correspondence relating to the Reciprocity Treaty and Coasting Trade, and respectfully recommend that the Executive Government should place themselves in communication with the Governments of the other Provinces interested in said Treaty, for the purpose of adopting such measures as may be deemed advisable to endeavour to obtain a continuance of a Treaty under which the people of the United States, as well as the people of these Provinces, have derived material benefits.”

Although no official intimation has been received from the Imperial Government of notice to abrogate the Reciprocity Treaty having been given by the Government of the United States, the undersigned have been made aware of that fact by the published proceedings of the British Parliament, and desire to reiterate the opinions expressed in the annexed Minute of Council, dated Halifax, April 26th, 1864.

The undersigned feel it their duty to draw your Excellency's attention to the strong feeling of dissatisfaction exhibited by many members of the Legislature of this Province when called upon to ratify the existing Treaty, because it had been

matured without an opportunity being previously afforded to make known the views of the Government upon a question in which the rights and interests of the people were so deeply involved, and trust that in any new negotiations upon the subject a similar cause of complaint may be obviated.

CHARLES TUPPER,
W. A. HENRY,
J. W. RITCHIE,
JAMES McNAB,
JAMES McDONALD,
S. L. SHANNON.

(Extract of Minutes—Council Chamber, 26th April, 1864.)

“The undersigned Members of the Executive Council having had under their consideration Lord Lyons' Despatches of April 7th and 8th, covering a copy of the Report of the Committee on Commerce upon the Reciprocity Treaty, and a copy of the Resolutions thereon submitted to the House of Representatives at Washington, on the 1st April, instant; and also a Despatch from Her Majesty's Governor General, enclosing two Minutes of the Honorable the Executive Council of Canada, upon the same subject, beg leave to report as follows:—

“The undersigned are of the opinion that the operation of that Treaty has been mutually beneficial to the United States and the British North American Provinces, and concur with the Government of Canada as to the advantage that would result to all the parties interested from opening negotiations, with a view to the adjustment of the Treaty and arrangement for its continuance, in time to avoid the injurious consequences likely to happen to all parties concerned from notice being given on either side for its abrogation. At the same time it is proper that the undersigned should take this opportunity to express the universal sentiment pervading this Province, that in the construction of that Treaty fair consideration was not given to the interests of Nova Scotia, whose inexhaustible fisheries of priceless value were given away, without the coasting trade or the right to register Colonial built shipping having been secured in return, to these British American Provinces—privileges which the undersigned hope will not fail to be secured in any re-arrangement of the Treaty.”

Government House, Quebec, July 15, 1865.

Sir,—

In a Despatch addressed to me by Her Majesty's Secretary of State, No. 95, of June 17th, 1865,—a copy of which I am aware has been communicated to you,—Mr. Cardwell informs me, in reference to the Reciprocity Treaty with the United States of America, that “Sir F. Bruce had already received instructions to negotiate for a renewal of the Treaty, and to act in concert with the Government of Canada.”

I have the honor to transmit to you a copy of an approved Minute of the Executive Council of Canada, which will shew you the course intended to be adopted by this Government, in order to arrange with Sir F. Bruce the mode in which the Provincial authorities may most advantageously coöperate with him in the management of the proposed negotiations.

It is the intention of the members of this Government who have been deputed to confer with Sir F. Bruce to proceed immediately to Washington, and on their return I shall not fail to give you full and timely intimation of the arrangement agreed on, in order that the Governments of Nova Scotia, New Brunswick, Prince Edward Island, and Newfoundland may have an opportunity of acting in concert with that of Canada, and of asserting in the negotiations the special interests which the inhabitants of these Provinces may have in relation to the subject.

I have the honor to be, Sir,

Your most obedient, humble servant,

MONCK.

Lieutenant-Governor Sir R. G. MACDONNELL, C. B., &c., &c.,
Nova Scotia.

Copy of a Report of a Committee of the Honorable the Executive Council, approved by His Excellency the Governor General, in Council, on the 15th July, 1865.

The Committee have had before them a memorandum, dated this day, from the Honorable the Minister of Finance, submitting for the consideration of your Excellency in Council, that by the Despatch from the Right Honorable the Secretary of State for the Colonies, dated 17th June, 1865, it appears that the British Minister at Washington had been instructed to negotiate for a renewal of the Reciprocity Treaty, and to act in concert with the Government of Canada in reference thereto.

That as it is advisable that no time should be lost in reference to this important subject, he recommends that a Committee, consisting of two members of the Provincial Government, should proceed to Washington, for the purpose of conferring with Sir Frederick Bruce, and of determining, in concert with him, on the steps it may appear most expedient to adopt.

The Committee concur in the above recommendation, and advise that the Honorable the Minister of Finance and Postmaster General be deputed to proceed to Washington on the mission referred to.

Certified.

(Signed)

WM. H. LEE,
C. E. C.

Downing Street, 8th July, 1865.

SIR,—

I have the honor to inform you that Sir F. Bruce has received instructions to place himself in communication with your Government, in order that you may furnish him with such information as he may require when the negotiation for the renewal of the Reciprocity Treaty takes place.

I have the honor to be, Sir,

Your most obedient, humble servant.

EDWARD CARDWELL.

Lieut. Governor Sir R. G. MACDONNELL, C. B.

Downing Street, 22nd July, 1865.

MY LORD,—

I have the honor to transmit to your Lordship the copy of a correspondence which has passed between this office and the Foreign Office, arising out of a representation which has been addressed to me by the Lieutenant Governor of Nova Scotia, requesting that in the event of negotiations being opened between Her Majesty's Government and the Government of the United States, with a view to the renewal of the Reciprocity Treaty, the wishes of Nova Scotia may be consulted before the final ratification of the Treaty.

Your Lordship will see from the letter from the Foreign Office that Lord Russell considers that it would save much delay and difficulty if a Confederate Council, chosen by all the North American Colonies, and presided over by your Lordship, were nominated, for the purpose of expressing an opinion to Her Majesty's Government in the negotiation of Commercial Treaties. I have accordingly to request that your Lordship would communicate with the respective Lieutenant Governors and with the Governor of Newfoundland, with a view to this arrangement being carried into effect, and report the result to me.

I have, &c.,

(Signed)

EDWARD CARDWELL.

Governor The Viscount MONCK.

Downing Street, 22nd July, 1865.

SIR,—

I have the honor to transmit to you the copy of a letter which I have received from the Foreign Office, containing a suggestion from Lord Russell for the appointment of a Confederate Council, chosen by all the North American Colonies, and presided over by the Governor General, with a view to furnishing an opinion to Her Majesty's Government in the negotiation of Commercial Treaties.

I have to inform you that in consequence of this suggestion of Lord Russell's, I have, by this day's mail, addressed the necessary instructions to the Governor General, and have to request that you will coöperate with him accordingly.

I have the honor to be, Sir,

Your most obedient, humble servant,

EDWARD CARDWELL.

Lieutenant Governor Sir R. G. MACDONNELL, C. B., &c., &c., &c.

Foreign Office, July 20th, 1865.

SIR,—

In reply to your letter of the 3rd inst., I am directed by Earl Russell to request that you will state to Mr. Secretary Cardwell that negotiations have not yet been commenced for the renewal of the Reciprocity Treaty.

The interests of Nova Scotia will be duly consulted; but it would, His Lordship considers, save much embarrassment, delay, and difficulty, if the faculty of giving an opinion to Her Majesty's Government in the negotiations of Commercial Treaties were vested in a Confederate Council, chosen by all the North American Provinces, and presided over by the Governor General of Canada.

I am,

(Signed)

A. H. LUGARD.

Sir FREDERICK ROGERS, Bart., &c., &c., &c.

Government House, Quebec, August 14, 1865.

SIR,—

I have the honor to transmit to you copies of a Despatch which I have received from Her Majesty's Secretary of State for the Colonies, enclosing me a letter written by direction of Lord Russell, in which his Lordship suggests, with reference to the proposed negotiation for the renewal of the Reciprocity Treaty with the United States of America, that a Council should be chosen by all the North American Provinces, and presided over by the Governor General of Canada, for the purpose of giving an opinion to Her Majesty's Government in the negotiation of Commercial Treaties.

Mr. Cardwell instructs me to communicate with the respective Lieutenant Governors, and with the Governor of Newfoundland, with a view to this arrangement being carried into effect.

I propose that the Council should be constituted by the appointment of one member of the Executive Council of Nova Scotia, New Brunswick, Prince Edward Island, and Newfoundland, respectively, who should be associated with two members of the Executive Council of Canada—one to represent the Upper, and the other the Lower Province; and I would take the liberty of naming Thursday, the 14th day of September, as the day upon which the representatives of each of the Provinces should meet at Quebec, for the purpose of consulting on this important subject with the representatives of Canada and reporting their joint opinions to Her Majesty's Government.

I have the honor to be, Sir,

Your most obedient, humble servant,

MONCK.

Lieutenant-Governor Sir R. G. MACDONNELL, C. B., &c., &c., &c.,

Halifax, Nova Scotia.

Minutes of the Proceedings of the Confederate Council of the British North American Colonies, on the negotiation of Commercial Treaties, assembled at Quebec, in compliance with the suggestions contained in the Despatch of the Right Honorable the Secretary of State for the Colonies, dated 22nd July, 1865.

FRIDAY, September 15th, 1865.

The Council met in the Executive Council Chamber.

PRESENT :

His Excellency the Governor General.

The Honorable G. E. Cartier,

“ George Brown,

“ A. T. Galt,

“ James C. Pope, and

“ Robert D. Wilmot.

In consequence of the Representatives of Nova Scotia and Newfoundland not having arrived, no business was transacted.

SATURDAY, September 16th, 1865.

The Council met.

PRESENT :

His Excellency the Governor General,

The Honorable G. E. Cartier,

“ George Brown,

“ A. T. Galt,

“ Ambrose Shea,

“ James C. Pope,

“ John W. Ritchie, and

“ Robert D. Wilmot.

W. A. Himsworth, Esq., Acting Clerk of the Executive Council, was appointed Secretary to the Council.

Read the Despatch, No. 122, dated 22nd July, 1865, from the Right Honorable H. M. Secretary of State for the Colonies, suggesting the assembling of a Confederate Council, chosen by all the British North American Colonies, and presided over by the Governor General, for the purpose of expressing an opinion to Her Majesty's Government in the negotiation of Commercial Treaties.

Read the Despatch, dated 7th August, ultimo, from His Excellency the Governor General to the Lieutenant Governors of Nova Scotia, New Brunswick, and Prince Edward Island, and to the Governor of Newfoundland, respectively, communicating to those Governments the suggestion of the Secretary of State for the Colonies, and requesting that the representatives of each of the Provinces should meet at Quebec, on Thursday, the 14th September, instant, for the purpose of consulting on the important matters referred to by Mr. Cardwell, and reporting their joint opinion to Her Majesty's Government.

Read the order of His Excellency the Governor General in Council, of 14th September, 1865, appointing the Honorable John A. MacDonald, George E. Cartier, George Brown, and A. T. Galt to represent Canada in the proposed Confederate Council.

The Governor General communicated to the Council, in explanation of the appointment of four gentlemen, instead of two, to represent Canada, that this arrangement was determined on in consequence of Messrs. MacDonald, Cartier, Brown, and Galt having constituted the Deputation from the Canadian Government which lately had conferences with Her Majesty's Government in relation to this question, and that it was considered desirable that these gentlemen should all

be enabled to take part in the discussions of the Council; but with the distinct understanding that in case of a division in the Council, only one vote each should be allowed to Upper and Lower Canada.

Read a Despatch, dated 7th September, instant, from the Administrator of the Government of Prince Edward Island, intimating that he had appointed the Honorable James Colledge Pope to represent that Colony in the proposed Confederate Council.

Read a Despatch, dated 8th September, instant, from the Administrator of the Government of New Brunswick, intimating that he had appointed the Honorable Robert Duncan Wilmot to represent that Province in the proposed Confederate Council.

Read a Despatch, dated 11th September, instant, from His Excellency the Lieutenant Governor of Nova Scotia, stating that he had nominated the Honorable John W. Ritchie to represent that Province in the intended Confederate Council.

Read a Despatch, dated 4th September, instant, from His Excellency the Governor of Newfoundland, intimating that he had appointed the Honorable Ambrose Shea to represent that Colony in the proposed Confederate Council.

Resolved, That the Honorable Messrs. MacDonald, Cartier, Brown, Galt, Shea, Pope, Ritchie, and Wilmot, be constituted a Committee of the Confederate Council, to report to the Council on Monday, the 18th instant.

The Council then adjourned until Monday, the 18th instant, at Eleven o'clock, A. M.

MONDAY, 18th September, 1865.

The Council met.

PRESENT:

His Excellency the Governor General,
 The Honorable Mr. Cartier,
 “ “ Brown,
 “ “ Shea,
 “ “ Pope,
 “ “ Ritchie, and
 “ “ Wilmot.

The Minutes of the last meeting were read, and approved.

The Report from the Committee appointed on the last day of meeting, was read, and in conformity with its purport, the following Resolutions were unanimously adopted by the Council:—

1st. That the existing Treaty of Trade with the United States is acceptable, and that its renewal, as it now stands, would be assented to by the respective Provinces.

2nd. That in the opinion of the Council, any reasonable proposals for the modification or extension of the Treaty that may be suggested by the United States Government, ought to be entertained by the Provinces.

3rd. That in the event of a new Reciprocity Treaty being negotiated, it would be highly desirable that the Coasting Trade and the Registration of Vessels should be included in its provisions.

4th. That in the event of the abolition of the Treaty by the United States Government, it is the opinion of this Council that all the British North American Provinces should combine cordially together in all commercial matters, and adopt such a Common Commercial Policy as will best advance the interests of the whole.

5th. That in the opinion of this Council, it would be highly desirable that application be made to Her Majesty's Imperial Government, requesting that steps be taken to enable the British North American Provinces to open communications with the West India Islands, with Spain and her Colonies, and with Brazil and Mexico, for the purpose of ascertaining in what manner the traffic of the Provinces with these countries could be extended, and placed on a more advantageous footing.

6th. That in the event of negotiations for a new Treaty of Reciprocity with the United States being opened by Her Majesty's Government, but not concluded before the 17th March next, applications be made to Her Majesty's Government suggesting that an arrangement be entered into with the United States Government for such a continuation of the existing Treaty as may afford time for concluding the pending negotiations.

7th. That Her Majesty's Government be requested to authorize the Members of this Council, or a Committee to be appointed from amongst them, to proceed to Washington, in the event of negotiations being opened for the renewal of the Reciprocity Treaty, in order to confer with the British Minister there, and afford him information with respect to the interests of the British North American Provinces.

The Council then adjourned.

W. A. HIMSWORTH,
Secretary.

DELEGATION TO WASHINGTON.

Government House, Montreal, December 23, 1865.

SIR,—

I have the honor to transmit to you, herewith, a copy of an order of the Executive Council of Canada, to which I last night gave my approval.

I communicate the substance of this order to you to-day by telegraph.

I have the honor to be, Sir,

Your most obedient, humble servant,

J. MICHEL, L. G.,

Administrator of Government.

Lieutenant Governor

Sir W. F. WILLIAMS, Bart., K. C. B., &c., Nova Scotia.

Copy of a Report of a Committee of the Honorable the Executive Council, approved by His Excellency the Administrator of the Government, on the 22nd of December, 1865.

The Committee have had under consideration the Memorandum dated 18th December, 1865, from the Honorable the Minister of Finance, submitting for the consideration of Your Excellency in Council, that it appears from the Report to Congress of the Secretary of the Treasury of the United States, as well as from information obtained by him, the Minister of Finance, in recent conversations had at Washington with the Secretary of State, and the Secretary of the Treasury of the United States, that the American Government are not disposed to submit to Congress any proposal for a renewal of the Reciprocity Treaty, but consider that the commercial relations between the United States and the British North American Provinces, should form the subject of concerted legislation.

That under these circumstances he submits that inasmuch as the Treaty will expire on the 17th March next, there is no reasonable probability that the Congress of the United States will, before that date, decide in any way upon their policy in this respect, while it is manifest that no corresponding legislation could possibly take place in each of the British Provinces; that it is therefore evident that unless some understanding be arrived at with the American Government for a temporary continuance of existing arrangements, the Trade between the two countries must be subject to serious disturbance by the expiry of the Treaty on the 17th March.

That the proposal of the Secretary of the Treasury to substitute legislation in lieu of the Treaty, can only apply to those portions of the Treaty which refer to commercial subjects. That the national rights, involved in the engagements relative to the Fisheries and to the Navigation of the Great Lakes and the St. Lawrence, cannot, he believes, be dealt with otherwise than by Treaty or Convention between Great Britain and the United States.

That the subjects embraced in the Reciprocity Treaty are two-fold. That those relating to Trade and Commerce can, if it be so determined, be reserved

for the action of the respective Legislatures—each country pursuing the policy that is most in accordance with its own interests, while those relating to International engagements must either be continued by Treaty, or each nation will revert to its position prior to the execution of the Reciprocity Treaty.

That as the latter class of subjects has not been referred to by the Secretary of the Treasury, it is possible it has not received full attention in the decision that would appear to have been arrived at for the abrogation of the Treaty, as it can scarcely be supposed that the United States desire to reproduce the state of things which was happily put an end to by the execution of the Treaty.

That the concessions which were considered to be made by Great Britain in relation to the Fisheries question were, however, so intimately blended with the commercial advantages alleged to have been granted by the United States, that it does not, at this moment, appear possible to consent to the concessions by Great Britain being continued and made permanent in favor of the United States by a new Treaty, while the latter country determines to retain within its own control, all the subjects by which equivalents were considered to have been given to the British Provinces.

That if the objections by the United States to a renewal of the Commercial Treaty rest upon its being an unconstitutional act on their part, it no longer becomes a subject of discussion, and some other course must be devised for the division of the subject, dealing with national rights by treaty and with commercial relations by legislation; and he offers as his opinion that no insuperable difficulty need be apprehended in this course, if the subject be approached in a spirit of mutual desire to perfect and perpetuate the friendly intercourse and Trade between the two countries—but that it is manifestly impracticable within the time limited for the termination of the Treaty to give the required consideration to the subject, and to settle all the various details connected with it, and that it is therefore very much to be apprehended that the whole engagements of the Treaty will end on the 17th March, unless the Government of the United States acquiesce in their temporary continuance with a view to negotiations. But in case it should be ultimately found necessary to deal with the question of Trade by legislation, it must be apparent to the United States Government that extreme difficulty must be experienced in bringing into harmony the views of so many different Legislatures, and much time will be required for the purpose. That in view therefore of the proposed Confederation of the British North American Provinces probably taking place at an early day, it would appear most desirable to refer, if possible, any legislative arrangements with the United States to the Legislature of the Confederated Provinces, especially as the earliest duty of that body will be to revise and assimilate the existing separate systems of Finance and Trade now existing in each—thus affording the most favorable opportunity for the consideration of any proposals of the American Government relating to Trade and Revenue.

He, the Minister of Finance, therefore recommends that communication be had with Her Majesty's Representative at Washington, for the purpose of submitting to the Government of the United States a proposal for the continuance of the existing Treaty for such period as may be agreed upon for the purpose of negotiation, and that two members of the Council be instructed to put themselves in communication with His Excellency and (subject to his concurrence) with the authorities at Washington on this subject.

The Minister of Finance further recommends that the action proposed to be taken for the purpose of obtaining delay in the abrogation of the Treaty, be communicated by Your Excellency to the Lieutenant Governors of the Maritime Provinces, and that they be requested to inform their respective Governments that it is not the intention of the Canadian Government to depart from the course proposed by the Confederate Council on Commercial Treaties, or act in any manner separately or distinctly from the other Provinces in the ultimate discussion and decision of the various questions involved, but solely in view of the vast interests in Canada, affected by the possible termination of the Treaty, to use every exertion, in the meantime, to obtain delay, with the intention

hereafter of considering, in connection with the Sister Provinces, any suggestions that may be made on the part of the United States in relation to the future commercial intercourse between the two countries; and that the Maritime Provinces be invited to send Representatives to Washington for the same purpose, and be informed that it is proposed to hold a meeting of the Confederate Council on Commercial Treaties at Ottawa, so soon as the position of the question would warrant it, founded upon the information to be received from Washington, as to the probable extension or final abrogation of the Reciprocity Treaty.
(Certified.)

Halifax, N. S., 3rd January, 1866.

SIR,—

I have the honor to inform you, in consequence of the termination of the Reciprocity Treaty in march next, that, pending the negotiations which of necessity must arise before its renewal, I have, in accordance with the wishes expressed by the Officer Administering the Government in Canada, and with the approval of my Executive Council, appointed the Honorable Dr. Tupper, the Provincial Secretary, as a Delegate to Washington to assist in carrying out an understanding with the American Government for a continuance (as far as possible) of existing arrangements.

I have, &c.,

(Signed) W. F. WILLIAMS.

Right Honorable EDWARD CARDWELL, M. P.

P. S.—In consequence of Dr. Tupper's illness, I have despatched the Hon. W. A. Henry, the Attorney General, in his place.

Halifax, 23rd February, 1866.

MAY IT PLEASE YOUR EXCELLENCY,—

Having returned from the mission to which I was appointed by a Minute of Council approved by your Excellency, on the fifth day of January last, to proceed to Washington to confer with Delegates from other Provinces upon the Reciprocity Treaty, I have the honor to report as follows:—

Learning by telegraph that the members of the Governments of Canada and New Brunswick appointed to represent those Governments would likely be in New York, *en route* for Washington, about the 6th of January last, I availed myself of the opportunity afforded by the calling in here, on her passage from Liverpool, of the steamer "City of London," and proceeded in her to New York, where I arrived on the ninth of that month, and there met the Honorable Messrs. Galt and Smith,—and subsequently our numbers were increased by the arrival of the Honorable Mr. Howland.

After a few days spent in obtaining information bearing upon the subject of our mission, and in making preliminary arrangements, we proceeded to Washington on the fifteenth, where I had the honor of presenting to His Excellency Sir Frederick Bruce, Her Majesty's Ambassador, your Excellency's letter introducing me to him as the Delegate authorized to act on behalf of the Government of Nova Scotia. I had, with the other gentlemen, the benefit of the most free interchange of views with His Excellency on the subject of our mission, which resulted in the unanimous conviction that at present it would be useless to urge upon the United States Government either the extension of the present, or negotiations for the adoption of a new Treaty; and, with his concurrence and advice, we placed ourselves in communication with Mr. McCulloch, Secretary to the

Treasury, who manifested a desire that we should meet and discuss, with the Committee of Ways and Means of the House of Representatives, measures for the future regulation of Reciprocal Trade between the United States and the British North American Provinces, by legislation. This suggestion was adopted by us, and we were by Mr. McCulloch introduced, on the 24th January, at the Treasury Department, to the Committee, having as Chairman the Honorable Mr. Morrill, of Vermont, and in the presence of Mr. McCulloch an exchange of views took place calculated to inspire the belief that a satisfactory arrangement might be made. By an appointment then made, we had formal meetings with the Committee, in their room, at the Capitol, on the 25th and 26th, and discussed at large the present fiscal and commercial position of the countries to be affected by our deliberations; and we were led to believe that the views of the Committee relative to the imposition of duties on articles now in the free list under the Treaty would lead them, as to most of the articles, only so far as was necessary for *revenue* purposes, arising from their present financial position, and the levy of Internal Revenue duties on the same articles produced in the United States, but not such as to disturb the trade much. My colleagues and myself, after mature deliberation as to the application of the principle to the Provinces we represented, and to the trade between them and the United States, felt disposed, if satisfactory agreements on other points were made, to agree to the imposition of duties to the extent of the Internal Revenue tax. We again met the Committee on the 29th, and after some discussion the Chairman requested further time for consideration, until a Report, daily expected from Commissioners appointed under a resolution of Congress on the subject of the Revenue, was received. This being agreed to, the next meeting took place on the 2nd February, at which the views of the Delegates were freely given, and were subsequently embodied and presented in the document marked A hereto appended.

On the 5th, Mr. Morrill called upon and handed us the document marked B, and, at our request, made an appointment with us to meet the Committee on the following day. At the meeting that took place next day, the Delegates, after ascertaining that the Committee viewed the proposition as a whole, and not as containing independent and distinct offers upon the different subjects embraced, had no difficulty in unanimously declining to accept it, or to treat further; and, after giving our opinions fully as to the objectionable protective principle sought to be applied in negotiations having for their object Reciprocal Free Trade, whilst asking valuable fishing and other privileges, and after the expression of our hope that before long they might be disposed to change a policy at least as injurious to their own country as ours, and promising to communicate our decision in writing, we took leave of the Committee,—having first tendered to them acknowledgements due from us for the attention and many personal courtesies paid and extended to us during our visit.

On the following day we had the honor of handing to Mr. Morrill the document marked C hereto annexed, and concluded our mission at Washington by the Report addressed to His Excellency Sir Frederick Bruce, a copy of which, marked D, is hereto also annexed. Before leaving Washington, however, we called upon Mr. McCulloch, and again debated the subject at large with him. He manifested deep regret that an agreement had not been reached, and expressed a hope that before long the subject would be again considered and equitably arranged; and common justice to that gentleman demands the expression of our warmest thanks for the uniform, courteous, and urbane bearing that marked throughout his intercourse with us.

Although regretting that our mission has failed in the accomplishment of immediate practical results, I have every reason to believe it will be hereafter found that our labors have not been wholly unproductive of good, and I doubt not that the exercise of moderation on all sides, and the full consideration of the subject that the threatened breaking up of the Treaty arrangements will force upon the large interests to be affected in the United States, must, before long, produce results much more favorable than is now generally believed to be probable.

In the meantime, it will become the duty of the Government and Legislature, dispassionately, but firmly, to adopt such measures for the due protection of our rights and interests as the altered circumstances shall require, and prevent, as far as possible, the injurious consequences which otherwise may arise from the position forced upon us by the abrogation of a Treaty which, whilst injuring none, has so largely contributed to the welfare of all.

Respectfully submitted,

W. A. HENRY.

His Excellency Sir W. F. WILLIAMS, K. C. B.,
Lieutenant Governor of Nova Scotia, &c., &c.

(A.)

(MEMORANDUM.)

The trade between the United States and the British Provinces should, it is believed, under ordinary circumstances, be free in reference to their natural productions; but as internal taxes exceptionally exist in the United States, it is now proposed that the articles embraced in the free list of the Reciprocity Treaty should continue to be exchanged, subject only to such duties as may be equivalent to that internal taxation. It is suggested that both parties may add certain articles to those now in the said list.

With reference to the Fisheries and the Navigation of the internal waters of the Continent, the British Provinces are willing that the existing regulations should continue in effect; but Canada is ready to enter into arrangements with the view of improving the means of access to the ocean, provided the assurance be given that the trade of the Western States will not be diverted from its natural channel by Legislation. And if the United States are not prepared at present to consider the general opening of their Coasting Trade, it would appear desirable that as regards the internal waters of the Continent, no distinction should be made between the vessels of the two countries.

If the foregoing points be satisfactorily arranged, Canada is willing to adjust her excise duties upon Spirits, Beer and Tobacco, upon the best revenue standard which may be mutually adopted after full consideration of the subject; and if it be desired to treat any other articles in the same way, the disposition of the Canadian Government is to give every facility in their power to prevent illicit Trade.

With regard to the Transit Trade, it is suggested that the same regulations should exist on both sides, and be defined by Law.

Canada is also prepared to make her Patent Laws similar to those of the United States.

WASHINGTON, D. C., Feb. 2nd, 1866.

(B.)

(MEMORANDUM.)

In response to the memorandum of the Hon. Mr. Galt and his associates, Hon. Mr. Smith, Hon. Mr. Henry, and the Hon. Mr. Howland, the Committee of Ways and Means, with the approval of the Secretary of the Treasury, are prepared to recommend to the House of Representatives for their adoption, a law providing for the continuance of some of the measures embraced in the Reciprocity Treaty, soon to expire, viz.:—For the use and privileges, as enjoyed now under said Treaty, in the waters of the Lake Michigan, provided the same rights and privileges are conceded to the citizens of the United States by Canada in the waters

of the St. Lawrence and its canals as are enjoyed by British subjects, without distinction as to tolls, and charging rates proportioned to canal distance. Also for the free transit of goods, wares and merchandize in bond, under proper regulations, by railroad across the territory of the United States to and from Portland and Canada line, provided equal privileges shall be conceded to the United States from Windsor or Port Sarnia, or other Western points of departure, to Buffalo or Ogdensburgh, or any other points Eastward, and that the free ports established in the Provinces shall be abolished. Also that the bounties now given to American fishermen shall be repealed, and duties not higher imposed upon fish than those mentioned in Schedule A. Provided that all the rights of fishing near the shore existing under the treaty heretofore mentioned, shall be granted and conceded by the United States to the Provinces, and by the Provinces to the United States. It is also further proposed that the following list of articles shall be mutually free, viz.:

Burr Mill Stones, unwrought.
Cotton and Linen Rags.
Firewood.
Grind Stones, rough and unfinished.
Gypsum or Plaster, unground.

SCHEDULE A.

FISH—Mackerel	\$1.50 per bbl.
“ Herring, pickled or salted.....	1.00 “
“ Salmon.....	2.50 “
“ Shad	2.00 “
“ All other, pickled.....	1.50 “

Provided that any Fish in packages other than barrels, shall pay in proportion to the rates charged upon similar Fish in barrels.

All other fish..... $\frac{1}{2}$ cent. per lb.

As to the duties which will be proposed upon the other articles included in the Treaty, the following are submitted, viz.:

Animals, living, of all sorts.....	20 per cent. <i>ad val.</i>
Apples and Garden Fruit and Vegetables.....	10 “ “
Barley	15 cts. per bushel.
Beans, except Vanilla and Castor Oil.....	30 “ “
Beef.....	1 ct. per lb.
Buckwheat.....	10 cts. per bushel.
Butter	4 “ per lb.
Cheese.....	4 “ “
Corn (Indian) and Oats	10 cts. per bushel.
Cornmeal (Indian) and Oatmeal	15 “ “
Coal, bituminous.....	50 “ per ton.
“ all other.....	25 “ “
Flour	25 per cent. <i>ad val.</i>
Hams.....	2 cts. per lb.
Hay	\$1.00 per ton.
Hides	10 per cent. <i>ad val.</i>
Lard	3 cts. per lb.
Lumber, pine, round or in the log.....	\$1.50 per M.
“ “ sawed or hewn.....	2.50 “
“ “ planed, tongued and groved or finished.....	25 per cent. <i>ad val.</i>
“ Spruce and Hemlock, sawed or hewn	\$1.00 per M.
“ “ “ planed, finished, or partly finished.....	25 per cent. <i>ad val.</i>
“ Shingle bolts.....	10 “ “
Lumber Shingles	20 “ “

Lumber, all other, of Black Walnut, Chesnut, Bass, White Wood, Ash, Oak, round, hewed, or sawed.....	20 per cent. <i>ad val.</i>
“ planed, tongued and groved or finished..	25 “ “
Ores	10 “ “
Peas	25 cts. per bushel.
Pork	1 cent per lb.
Potatoes	10 cts. per bushel.
Seed, Timothy and Clover.....	20 per cent <i>ad val.</i>
Trees, Plants and Shrubs, Ornamental and Fruit	15 “ “
Tallow	2 cts. per lb.
Wheat	20 cts. per bushel.

(C.)

(MEMORANDUM.)

In reference to the Memorandum received from the Committee of Ways and Means, the Provincial Delegates regret to be obliged to state that the proposition therein contained in regard to the commercial relations between the two countries is not such as they can recommend for the adoption of their respective Legislatures.

The imposts which it is proposed to lay upon the productions of the British Provinces on their entry into the markets of the United States are such as, in their opinion, will be in some cases prohibitory, and will certainly seriously interfere with the natural courses of trade. The imposts are so much beyond what the Delegates conceive to be an equivalent for the internal taxation of the United States, that they are reluctantly brought to the conclusion that the Committee no longer desire the trade between the two countries to be carried on upon the principle of Reciprocity.

With the concurrence of the British Minister at Washington, they are therefore obliged respectfully to decline to enter into the engagements suggested in the Memorandum; but they trust the present views of the United States may soon be so far modified as to permit of the interchange of the productions of the two countries upon a more liberal basis.

WASHINGTON, Feb. 6, 1866.

(D.)

REPORT OF THE DELEGATES TO HIS EXCELLENCY SIR FREDERICK BRUCE
K. C. B., &c., &c., BRITISH AMBASSADOR AT WASHINGTON.

Washington, February 7th, 1866.

SIR,—

We have the honor to inform Your Excellency that our negotiations for the renewal of Reciprocal Trade with the United States have terminated unsuccessfully. You have been informed from time to time of our proceedings, but we propose briefly to recapitulate them.

On our arrival here, after consultation with Your Excellency, we addressed ourselves with your sanction to the Secretary of the Treasury, and we were by him put in communication with the Committee of Ways and Means of the House of Representatives. After repeated interviews with them, and on ascertaining that no renewal or extension of the existing Treaty would be made

by the American authorities, but that whatever was done must be by legislation, we submitted as the basis upon which we desired arrangements to be made the enclosed paper (marked A).

In reply we received the Memorandum from the Committee, of which a copy is enclosed (B). And finding after discussion that no important modifications in their views could be obtained, and that we were required to consider their proposition as a whole, we felt ourselves under the necessity of declining it, which was done by the Memorandum also enclosed (C).

It is proper to explain the grounds of our final action.

It will be observed that the most important provisions of the expiring Treaty relating to the free interchange of the products of the two countries were entirely set aside, and that the duties proposed to be levied were almost prohibitory in their character. The principal object for our entering into negotiations was therefore unattainable, and we had only to consider whether the minor points were such as to make it desirable for us to enter into specific engagements.

These points are three in number.

With regard to the first, the proposed mutual use of the waters of Lake Michigan and the St. Lawrence, we considered that the present arrangements were sufficient, and that the common interests of both countries would prevent their disturbance. We were not prepared to yield the right of interference in the imposition of tolls upon our canals. We believed, moreover, that the privilege allowed the United States of navigating the waters of the St. Lawrence was very much more than an equivalent for our use of Lake Michigan.

Upon the second point, providing for the free transit of goods under bond between the two countries, we believed that in this respect, as in the former case, the interests of both countries would secure the maintenance of existing regulations. Connected with this point was the demand made for the abolition of the Free Ports existing in Canada, which we were not disposed to concede, especially in view of the extremely unsatisfactory position in which it was proposed to place the trade between the two countries.

On both the above points, we do not desire to be understood as stating that the existing arrangements should not be extended and placed on a more permanent basis, but only that, taken apart from the more important interests involved, it did not appear to us at this time necessary to deal with them exceptionally.

With reference to the third and last point, the concession of the right of fishing in Provincial waters, we considered the equivalent proposed for so very valuable a right to be utterly inadequate. The admission of a few unimportant articles free, with the establishment of a scale of high duties as proposed, would not, in our opinion, have justified us in yielding this point.

While we regret this unfavorable termination of the negotiations, we are not without hope that, at no distant day, they may be resumed with a better prospect of a satisfactory result.

We have the honor to be,

Your Excellency's most obedient servants,

A. T. GALT,

Minister of Finance, Canada.

W. P. HOWLAND,

Postmaster General, Canada.

W. A. HENRY,

Attorney General, Nova Scotia.

A. J. SMITH,

Attorney General, New Brunswick.

APPENDIX No. 8.

BOARD OF WORKS REPORT.

OFFICE OF BOARD OF WORKS,
Halifax, October 1st, 1865.

Sir,—

I beg to submit, for the information of His Excellency the Lieutenant Governor, the Report of the Board of Works for the fiscal year ending September 30th, 1865.

The sum required to meet the expenses of the various branches of this Department of the public service for the past year was estimated at \$95,130.00, or \$111,242.23 including additional grants of \$6000.00 for four new Light-houses, and \$4000.00 for two Fog Trumpets, with the sums of \$5,209.07 and \$903.16 expended respectively on St. Peter's Canal and the Buoy Service,—exclusive of the liabilities of 1864, amounting to \$19,207.74.

The whole expenditure for the past year is \$137,517.98, of which \$125,264.42 has been paid, leaving liabilities amounting to \$12,253.56. The actual payments during the past year amount to \$143,433.51. The total receipts from all branches of the Department are \$13,634.27.

There were found to be necessary certain expenditures not anticipated by the Legislature in their estimate, namely—for a main sewer and road to the shore of the harbor at the Asylum, a coal-house at that Institution, and the entire renewal of the schooner "Daring," more fully explained under their respective heads.

There was provided for in the estimate, as above stated, \$111,242.23. This sum was for the following branches, viz.: Light-house Service and Construction and Fog Horns and Buoys, Sable Island, ordinary expenses for sailing the schooner "Daring," Hospital for the Insane, Government House, Penitentiary, Provincial Building, and expenses of Office. For these branches there was expended \$124,383.02. The necessary expenditures above mentioned for emergencies amount to \$13,134.46, making, with the sum spent under the estimate, \$137,517.98 the total expenditure.

HOSPITAL FOR THE INSANE.

The sum estimated for the ordinary expenses of this Institution was \$23,800. There was also the sum of \$30,000 allowed for extension of the building; but as none of this sum has been expended during the period comprised in this Report, it is not my province to deal with that subject now.

The expenditure for the period reported on has been disbursed as follows: \$27,258.29 for ordinary expenses, \$1945 for the construction of a coal and store-house, \$861.19 for a road to the shore, and \$1689.27 for a drain. The amount received for the maintenance of patients was \$10,960.65. There is due from the several counties, private patients, and for transient paupers, to the end of the financial year, \$39,516.99.

Hitherto the coal consumed at this Institution has been landed and stored in an old shed at the head of the Asylum wharf, and carted up to the Institution daily as required, increasing by nearly a hundred per cent. the expense of transit, besides necessitating great inconvenience; moreover, the coal was subject to constant injury from the weather, and was liable to be stolen.

In accordance with the Report of the Committee of the Legislature on Humane Institutions; (Journals for 1856, Appendix 51.) that a "coal-house should be erected at once," the construction of a substantial and convenient coal and store-house has been completed adjacent to the engine-house. The basement of this building is of solid masonry, and the expense has been greatly lightened by the supply of stone procured by the labor of the patients, under the direction of the

Farm Superintendent, in clearing the grounds for cultivation, and also by the excavation for the foundations and cellar having been performed by the same labor.

The Committee above referred to use these words in their Report:—"The Committee would also recommend that a drain should be made from the building to the shore on the best site for a road, and a road made, and thus save considerable expense in the transportation both of fuel and the material necessary for the new erection." There can be no doubt that time and experience have proved that the original road from the shore to the building, and the drain for carrying the sewage from the premises, should both have been in the present position chosen for the new ones. The grades of the new road are much easier, and the expense of constructing it will be more than saved in the transit of materials for the proposed extension of the Asylum alone. By the old sewer it was proposed to carry the sewage into a cesspool in the rear of the building and utilize it as manure; but it has been found that a large portion passed into adjacent lands, rendering the province liable to private persons for damage.

The grounds belonging to the Institution are gradually undergoing improvement by the labor of patients, and will no doubt before long be a source of revenue to the Institution.

Considerable repairs have been required on the main building to remedy defects which constantly appear.

The gasometer, which the Engineer informs me had never worked well, has been thoroughly put in order.

I beg to refer you to the full report of Dr. DeWolf for information concerning the internal economy of the Asylum.

DARING.

In my last report I said this vessel would require new metal sheathing and caulking, and new sails; and I estimated the expense at \$2000. The work of these repairs was commenced as soon as possible in the Spring, and completed at a cost of \$1418. After she was almost ready for sea, while some alterations were being made in the cabin, I was surprised to learn that some of the timbers were discovered to be in an advanced stage of decay. Having caused further investigation by the removal of the ceiling, it was ascertained that most of her timbers were unsound, and that she was entirely unseaworthy. It then became a question whether it would be more economical to renew this vessel than to sell her and provide a new one. Owing to her model she would not be likely to realize even anything like her depreciated value, and it was found that she could be made almost as valuable as a new vessel for this service for a much less sum than her original cost. The Government approved of the course which seemed to me to be most economical, and it was decided to have the Daring hauled up and rebuilt. Her original cost was above \$12,000. She has been thoroughly renewed in the most efficient manner throughout at a cost of \$8639.

On assuming office I estimated that the schooner would not require any very large outlay for repairs to her hull for eight or nine years. She was then but seven years, and is now only nine years old. The rot in this vessel must have been going on ever since she was built. It is not to be wondered at, however, that it was not discovered before, and that the discovery was purely accidental. In the first place, all trace of it was concealed by the ceiling and planking. Moreover, it is a well ascertained fact, that process of rotting in timbers of ships goes on without giving any external signs, the fibres within being often transformed to dust within a sound external shell. There is no doubt that this vessel has been built of green timber; and such vessels have been found sometimes after the first voyage, says Mr. Chapman, a careful and experienced writer on this subject, with the timbers and all the planking, except a thin external skin, completely rotten. For many years much attention has been devoted to the means necessary in the construction of vessels, especially in the Royal Navy, to prevent premature decay, and it has been long known that timber suitable in size for such vessels as the Daring, felled when young, contributes greatly to the early destruction of valuable vessels.

If this vessel had been properly constructed, this sum of \$8639 would not have appeared in the list of expenditure for some time to come.

The *Daring* has made four trips to Sable Island during the year. She has also performed two trips in visiting the different light houses with oil and stores. Her disbursements, including expenses which properly belong to last year, not paid at the time of my last report on account of the change in the financial year, amount to \$6545.84.

Her credits amount to \$24.65. This vessel will require but a small sum for repairs, with the exception of sails, for nine or ten years, if well taken care of.

LIGHTHOUSES.

The sum estimated for this service was \$38,890 for ordinary expenditure, \$6,000 for the erection of new lighthouses, and \$4,000 for two fog trumpets. The sum actually expended for the year amounts to \$50,195.14.

In my last report I stated that a large number of lighthouses required immediate attention. The necessary repairs and improvements have been completed. Four new lighthouses have been nearly finished: one each at Egg Island, Green Island, Flint Island, and Little Hope Island, to be put into operation in the ensuing month.

There have been spent on buoys \$903.16.

In accordance with the recommendation of the Legislature, two efficient fog trumpets have been put in operation,—one on Sambro Island, at a cost of \$4,526.44 and another on Cranberry Island, at a cost of \$3,952.97.

I herewith forward the report of the Superintendent of Lighthouses, which contains detailed information concerning this branch of the service.

PENITENTIARY.

The sum estimated for the ordinary expenditure of this service was \$10,770. The expenses amount to \$13,386.73; \$1,129.50 of which was for the erection of workshops and hospital. The credits to this service, chiefly for shoemaking and blacksmiths' work, are \$1,176.01, of which \$214.37 has been paid.

The number of convicts in the Penitentiary at the end of the year was sixty-six, forty-five of whom have been admitted during the year now reported on. Thirty-four have been discharged,—thirty on expiration of sentence, and four by order of the Executive. Three have escaped, two of whom have been recovered; and one has died.

The workshops and hospital in course of erection at the time of my last report, have been completed.

The expenditure during the past year has been increased by the number of convicts received from the City Criminal Court and from the military authorities.

A new range of cells, to meet the growing requirements of this prison, have been in course of construction since last year. A large quantity of granite has been cut by the prisoners for this purpose, and will be ready for the erection of the walls in the Spring.

A deficiency in the supply of water has been experienced for the first time during the past summer, and new wells or tanks to receive rain will be required.

The late Superintendent, Mr. Chipman, resigned his office in May last, in consequence of ill health; and Mr. George McGregor has been appointed in his place, whose report is herewith forwarded.

It was anticipated that the influx of population caused by the extension of mining operations, would have increased the criminal calendar of the Province. I have made enquiry, and am able to report that no emigrant miner has yet been within the walls of the Penitentiary for crime.

I beg also to transmit the reports of the Medical Superintendent, Dr. Black, and Teacher, Mr. J. E. Cotton.

SABLE ISLAND.

The amount estimated for the humane establishment at Sable Island was \$4,370. The expenditure was \$5,634.21. The credits amount to \$643.46.

The brigantine *William Bennett*, of St. John, New Brunswick, laden with a cargo of produce from Charlottetown, P. E. Island, for New York, went ashore on the north side of the Island on the 20th of December, 1864, at 10 o'clock, A. M. The crew were all saved; but two of the lifeboatmen of the Island, after the most brave and humane conduct, struggling in the midst of surf during an intensely cold day, to connect a line from the wreck with the shore, upon which the crew and a female passenger with an infant, were safely landed, exhausted by fatigue and cold, perished on their way to their respective stations in the evening. The cargo and hull were a total loss; part of the rigging was saved. The crew remained, and were provided for on the Island until the 22nd of March, when they were brought to Halifax by the *Daring*.

The brigantine *Triumph*, of St. John's, Newfoundland, bound from Figueras to that port, with a cargo of salt, struck on the south-east end of the island during the night of the 31st of March, 1865, and became a total wreck. The crew were saved, and provided for on the Island till the 7th of April, when the *Daring* brought them to Halifax.

The ship *Malakoff*, of Hull, bound to Halifax with a cargo of earthenware and salt, was stranded on the south side of the North East Bar, on the 12th of June. The crew were all saved and brought to Halifax. The hull and cargo were a total loss.

It was found necessary in the case of the *William Bennett* for the Superintendent to appropriate the clothing of himself, his family, and his men, for the crew and passengers, whose effects were all lost. Since this I have supplied the establishment with a quantity of clothing, blankets, &c.

A large expenditure will be required to refit the life boats, which were damaged in the attempt to reach the wreck of the *William Bennett*.

PROVINCIAL BUILDING.

The sum estimated for this service for the year was \$4,400. The sum paid out amounts to \$6,526.21, part of which is for payment of accounts not rendered at the end of the last fiscal year, owing to the change in that period. The sum estimated for this service in 1862 was \$5,500, and in 1863 was \$5,670, and the average annual expenditure for these years was \$6,693.16. The average expenditure for 1864 and 1865 amounts to \$5,415.37.

Considering that the growing interests of the Province require a greater expenditure in this department—as exemplified already in the Commissioner of Mines' Office, Education Office, Board of Statistics Department, &c.—and taking into consideration also the deterioration of the Province Building, I do not think it likely the expenditure can be kept for the future, much, if at all, within the average outlay for 1862-3.

Considerable repairs have been required on this building during the year. The greater part of the lead on the roof, being found defective from long use, has been removed and replaced with new lead. The basement windows in the western front have been renewed, a granite sill having been provided for each, with hatch covers and fastenings. The coping of the pediments and the cornices have been pointed with cement. The slating has been thoroughly repaired. The flat portion of the roof will be required to be renewed during the next year.

GOVERNMENT HOUSE.

The sum estimated for Government House was \$4000. The expenditure for the year amounts to \$5,773.30. A large portion of this outlay was expended in renewing the stables, which were unfit for further use.

I have the honor to be, Sir,
Your most obdt. servant,

FREDERIC BROWN, *Chairman.*

The Hon. The Provincial Secretary, &c. &c. &c.

APPENDIX.—(A.)

Office of Board of Works, Halifax, 31st Dec. 1865.

SIR,—

During the present year I have visited all the Light Houses in this Province East of Halifax, the Humane Establishments at St. Paul's and Scatterie, and many of the Lights West of Halifax, and beg to hand you the following Report:—

The contractors for building new Light Houses on Flint Island, Green Island, Egg Island, and Little Hope Island, duly completed their engagements in a satisfactory manner, with the exception of Green Island. It being very difficult for the contractor to procure properly seasoned lumber for inside finishing, I allowed a portion of the work to be temporarily put up, and it will be finished early in the ensuing Spring.

LITTLE HOPE.

The Island has been walled all around with rough stone at high water mark. On the South part, the most exposed to the beating of the waves in gales of wind and high tides, the wall has an exterior slope vertically sheathed with pine deals. A good Landing and Boat House have been built.

YARMOUTH.

The Light House, Dwelling, Wharf, and Boat Slip have been repaired and put in good order. A further outlay of about sixty dollars is still necessary to improve the road from the beach to the light house, which has always been in bad condition.

WHITE HEAD.

This Light House has been repaired, and a new addition built, indispensable for the accommodation of the Keeper's family.

CRANBERRY ISLAND.

The Light House and other buildings have been repaired. The Lantern thoroughly cleaned of rust and fitted with new glass.

BIRD ISLAND.

The Light Keeper's Dwelling has been finished inside and painted, and other necessary improvements have been made about the buildings.

ST. PAUL'S.

The Foundation Walls of the two Light Houses, Keeper's Dwellings and Dwelling House at the Humane Station have been substantially rebuilt, rendered necessary from natural decay and bad masonry. The Superintendent of the Island, Mr. McNeil, has made many improvements to the various landings, and evinces a most praiseworthy interest in the performance of all his duties. I beg to recommend that this establishment be supplied with a large sail-boat for communicating with the main land in case of wrecks, such a boat was formerly kept for the purpose.

ARICHAT.

This Light House is unworthy of the name. The Building was only temporary when first erected in 1851, and is very small, and leaks badly. The Lantern is a wooden box on the top of the building, with small common glass, and burns but

two Lamps. There are no Reflectors, and altogether the Light is very inferior. I would recommend that a new Light House be built at this station next season. A Light House and Keeper's Dwelling in one building would be very suitable, similar to that erected on Green Island during the past season.

LOW POINT.

This important Light is a very poor one. The new Lantern supplied in June, 1863, in my opinion is entirely too small, the sashes being very thick, and the glass too small. It is fitted with only eight Lamps and twelve inch Reflectors. In view of the large fleet of vessels trading to Sydney and neighbouring ports, it must be very apparent that this Light should be second to none in the Province. I would therefore earnestly recommend that this Light be supplied next season with a new Lantern fitted with plate glass, a greater number of Lamps, and new Reflectors. The Lantern and Lighting Apparatus in use will do for a Light of less importance.

FOG TRUMPETS.

Suitable Houses were built at Sambro and Cranberry Islands for the Fog Trumpets erected at these Stations in September last, and each stands about one hundred yards from the respective Light Houses on those Islands. The Fog Trumpet at Cranberry Island is temporarily out of order from the breaking of a shaft, occasioned by a flaw in the casting. This will be remedied as soon as possible. All machinery being liable to accident, I would recommend that a twelve-pounder Gun be supplied at this station, to be fired every four hours during foggy and thick weather, and in answer to signal guns from ships.

BEACONS.

Wesse's Ledge Beacon, Barrington.

The foundation has been built to low water mark. Materials could not be procured in time to complete the work properly in one season, and I deemed it best not to proceed further in building, as the work would probably be carried away by storms and ice during winter. Split granite has been provided to proceed with the work in the Spring.

BUOYS.

Iron case Buoys have been placed as follows, viz.:—One first class at Cerberus Rock, off Arichat; one second class at North Sydney Bar; one second class at the Bar entrance to Big Bras d'Or.

Spar Buoys have been placed as follows, namely:—Four at entrance to Lunenburg harbour; four at entrance to Port Medway Harbour; two at entrance to Ragged Island harbour; one at Nag's Head Shoal, Louisburg harbour; one at the Outer Bass Breaker, off Cape Canso. Those on the Starboard hand, entering harbours, are painted Red; those on the Port hand, Black.

GENERAL REMARKS.

A few more Light Houses are still necessary on our coast; and it is important in my opinion that one should be erected on Green Island, off Country Harbour. The dangers of this part of the coast are too well known to need description. A light on this Island is not only highly necessary for a coast light, but would be a real service for a harbour light, being a good guide into Country Harbour, one of the finest harbours in the Province.

A small light on Mack's Point, Port Medway, is much required, the navigation being very difficult. The light on Admiralty Head does not serve as a guide to the harbour.

A first class Fog Signal is much needed at Yarmouth Light Station; the Bell at this station being of little use as a fog signal.

I am, sir,

Your obedient servant,

JOHN H. KENDRICK.

FREDERIC BROWN, Esq.,
Chairman of Board of Works.

APPENDIX B.

Provincial Penitentiary, October 1, 1865.

SIR,—

I beg to hand you the following report in connection with this establishment for the fiscal year ending Sept. 30, 1865.

Your obedient servant,

GEORGE McGRIGOR,

Superintendent.

FREDERIC BROWN, Esq.,
Chairman Board of Works.

APPENDIX C.

To the Chairman of the Board of Works :

SIR,—

In submitting this my twenty-second annual report, I beg to state, that during the past year there was more than the usual amount of sickness among the prisoners, and that one case of death occurred.

The number prescribed for was two hundred and thirty-five; of these, sixteen were inmates of the Hospital for a longer or shorter period; these latter were the subjects of the following diseases: two of hæmorrhage from the lungs, one of pulmonary consumption, one of hæmorrhage from the stomach, two of heart disease, one of inflamed knee joint, one of epilepsy, one of apoplexy, one of inflammation of the bowels, two of dysentery, two of sporadic cholera, one of caries of bones of the hand, one of wound inflicted by fellow prisoner.

Catarrh, rheumatism, and throat affections were prevalent during the winter months; and in August and the month just ended, diarrhæa, dysentery and sporadic cholera, were the diseases of most frequent occurrence.

The case of death occurred in the person of David Crowe, No. 479, who was the subject of cerebral apoplexy. The post mortem examination revealed an extensive effusion of blood at the base of the brain.

I would respectfully call the attention of yourself and the Board to the case of the prisoner Andrew Campbell, No. 480, who since his admission in June, 1863, has manifested symptoms of insanity, and whom it has been found necessary to confine to his cell for the most part since that time; he is unwilling to work, and at times is violent, and seriously interferes with the discipline of the prison. I would recommend his being transferred to the Insane Asylum at Dartmouth.

Believing that yourself and the Board are desirous of adopting any measures which may conduce to the health of the prisoners, I would respectfully suggest the propriety of introducing some little variety in the prison diet roll. I am persuaded that if there were issued to each prisoner a ration of salted beef or pork one day in the week instead of the soup, and upon the remaining soup days a moderate quantity of vegetables, such as carrots and onions (which would involve but a small additional expenditure), the change would be attended with beneficial results.

There is one other subject to which I would call the attention of yourself and the Board, viz., the necessity which exists of obtaining a supply of water for the use of the Hospital; at present we are without either a water closet or lavatory, appliances so necessary in such an apartment.

I have much pleasure in bearing testimony to the very efficient manner in which the prison is at present managed. The Governor and Matron have ever rendered me every assistance in the prosecution of my duties.

I have the honor to be

Your obedient servant,

September 30, 1865.

R. S. BLACK, M.D.

APPENDIX D.

Halifax, 1st January, 1866.

SIR,—

Agreeable to your orders, I hereby submit a short report of the number of prisoners attending my class at the Provincial Penitentiary, their studies, conduct, &c.

The average attendance has been about twenty-five. Their studies embrace spelling, reading, writing, arithmetic, geography and history. To those far enough advanced I give as a task, to be learned in my absence, a column of spelling with the meaning. In general, it is well learned.

A large portion of my regular scholars is well behaved; but there are others I regret to say, who seem to be impervious alike to kindness and coercion; yet I still hope that even these will ultimately appreciate the good which the Government is desirous of doing them.

Whenever there has been a disposition in any of them to create a disturbance during school-hours, I have only had to call the attention of the Governor of the prison, who has promptly assisted me.

With many thanks for your kindness in the past, and a hope that I may continue to merit your approval in the discharge of my official duties,

I am, Sir,
Your obedient servant,

J. F. COTTON.

FREDERIC BROWN, ESQ.,
Chairman of Board of Works.

APPENDIX No. 9.

FOREIGN TRADE.

Downing Street, 28th October, 1865

(Nova Scotia—No. 65.)

SIR,—

I transmit to you herewith the copy of a correspondence between the Government of Canada and myself, on the subject of extending the commerce of that country, and of all the British North American Provinces, in quarters where it is represented as possible that an active trade may spring up. If your Government should be disposed to avail itself of the opening which is afforded to it of extending its trade, and to send a gentleman to represent its interests on the proposed mission, you will have the goodness to apprise Lieut. General Sir J. Michel without delay of the name of the gentleman so selected.

I have the honor to be, Sir,

Your most obedient servant,

EDWARD CARDWELL.

The Officer Administering the Government.

Extract from the Minutes of the Proceedings of the Confederate Council of the British North American Colonies, on the Negotiation of Commercial Treaties. Dated 18th September, 1865.

“5th. That in the opinion of this Council it would be highly desirable that application be made to Her Majesty’s Imperial Government, requesting that steps be taken to enable the British North American Provinces to open communications with the West India Islands, with Spain and her Colonies, and with Brazil and Mexico, for the purpose of ascertaining in what manner the traffic of the Provinces with these countries, could be extended, and placed on a more advantageous footing.”

Quebec, 23rd September, 1865.

SIR,—

In connection with the contents of my Despatch No. 185, of this date, I have the honor to transmit copies of two approved Minutes of the Executive Council of Canada, suggesting means for carrying into effect the 5th Resolution of the Confederate Council on Commercial Treaties.

I have, &c.,

(Signed)

MONCK.

The Right Hon. EDWARD CARDWELL, M. P., &c., &c., &c.

Copy of a Report of a Committee of the Honorable the Executive Council approved by His Excellency the Governor General in Council, on the 23rd September, 1865.

On a Memorandum dated 23rd September, 1865, from the Honorable the Minister of Finance, submitting that it is most important steps should be taken for the further development of the Trade between the British North American Provinces and the British West Indies.

That the products of the Northern Provinces, consisting of lumber, breadstuffs and fish, can be most advantageously exchanged for the sugar, coffee, molasses, and other productions of the Tropical Colonies; and that a trade which is now almost wholly engrossed by the United States, ought, he believes, be carried on direct to the advantage of British Commerce.

That for the purpose of ascertaining how far it may be possible to promote this most desirable object by mutual commercial concessions, and by corresponding changes in the Tariffs of the several Colonies and Dependencies referred to, the Minister of Finance recommends that a Commission be named to visit the several British West Indian Islands and Demerara. And he further suggests that your Excellency will be pleased to bring the subject under the notice of Her Majesty's Government, with the view of causing an official recognition of the Commissioners by the Imperial authorities in the West Indies, with instructions to Her Majesty's Representatives to afford them all reasonable support and encouragement.

The Committee respectfully report their concurrence in the views and suggestions submitted by the Finance Minister, and recommend them for your Excellency's approval.

Copy of a Report of a Committee of the Honorable the Executive Council, approved by His Excellency the Governor General in Council on the 23rd September, 1865.

On a Memorandum dated 22nd September instant, from the Hon. the Minister of Finance, submitting that in view of the possible abrogation of the Reciprocity Treaty with the United States, it is most desirable that measures should be taken for ascertaining the practicability of developing new markets for the products of Canada and of the Maritime Provinces, which will thus be deprived of admission into the United States.

That an examination of the import trade of the Spanish West Indies, of Mexico and the Brazils, shows that a large proportion of that commerce consists in articles which are abundantly produced in the British North American Provinces viz.: Breadstuffs, Lumber, and products of the Fisheries.

That if it be possible, therefore, to effect Treaties of Commerce for the exchange of these productions for those of the countries above referred to, it is believed that a new and lucrative trade would be developed for these Provinces.

That even should arrangements be effected with the United States for a continuance of free commercial intercourse with that nation, it would still appear most desirable that arrangements should be made for obtaining access, if possible, to new and important markets. He recommends that your Excellency will be pleased to direct the attention of Her Majesty's Government to this subject, with the view of obtaining their consent to the appointment by Canada of Commissioners to visit the Spanish West Indies, Mexico, and the Brazils, for the purpose of endeavoring to effect arrangements for the interchange of the products of these countries with the British North American Provinces; and that for the purpose of aiding in the accomplishment of the design of the Canadian Government, Her Majesty's Government be requested to communicate with the Courts of Spain and Brazil, and to instruct Her Majesty's Representative at Brazil and the Consuls at the Spanish West Indies to co-operate with the Commissioners from Canada.

The Committee concur in the recommendation submitted by the Honorable the Minister of Finance.

Downing Street, 28th October, 1865.

SIR,—

I have the honor to acknowledge the receipt of Viscount Monck's Despatch of the 23rd September, (No. 187) forwarding copies of two approved Minutes of the Executive Council of Canada, suggesting that measures should be taken with a view to the extension of the commerce of Canada in the British and Spanish

West Indies, in Mexico, Brazil, and other places. I request you will assure the Provincial Government that Her Majesty's Government cordially approve the suggestion they have made, and will support it by all the means in their power. The scheme is of course not applicable to Canada alone, but to the British North American Colonies collectively.

On that understanding I shall request the Secretary of State for Foreign Affairs to recommend the object in view at the requisite Foreign Courts, and to introduce to the British Ministers abroad those gentlemen who shall be selected for the mission. I, on my part, shall be happy to instruct the Governors of the British Colonies to afford them every assistance they can. For this purpose, however, it will be necessary that you furnish me with the names of the gentlemen who will undertake this office. I have by this mail sent copies of the correspondence to the Lieutenant Governors of the Maritime Provinces, to Newfoundland and Prince Edward Island, and have instructed them to communicate to you, without delay, the names of the gentlemen who shall be willing to represent the respective Colonies.

On the receipt of this information, and after consultation with your Executive Council, you will inform me of the result. Her Majesty's Government will then take the further steps which I have indicated.

Having been in communication with the Lords of the Committee of Privy Council for Trade upon the subject of this proposed extension of the commercial relations of the British North American Provinces, I have received from their Lordships a letter, of which I think it advisable to send you herewith a copy.

I have, &c.,

(Signed) EDWARD CARDWELL.

The Officer Administering
the Government of Canada. }

Board of Trade, Whitehall, 26th October, 1865.

SIR,—

I am directed by the Lords of the Committee of Privy Council for Trade to acknowledge the receipt of your letter of yesterday's date, and of your previous communication and enclosures, relative to the proposal of the Confederate Council of the British North American Colonies to despatch Deputations to Washington, to the West Indies, and to various South American Countries, with a view to the improvement and extension of the commercial relations of the British North American Possessions with the United States of America and with other countries.

In reply, I am directed to request you to state to Mr. Secretary Cardwell that my Lords fully approve of the object which the Confederate Council appears to contemplate, and they are of opinion that Her Majesty's Government should signify its approval of the step about to be taken.

It appears to my Lords beyond the province of this Department to enter upon the question of the advisability, as a matter of general principle, of separate Commercial Conventions being established between groups of Her Majesty's Colonial Dependencies and Foreign Countries. At the same time, my Lords think it right to call attention to the difficulties which may arise with respect to Foreign Countries having Reciprocity Treaties with this country, if any Colony or Colonies should make arrangements for giving to one Foreign Country advantages which are not given to others. This point was so much discussed on the occasion of negotiating the Treaty between the United States and British North America that it is unnecessary now to do more than express a hope that it may be found possible to avoid similar difficulties in the present case.

The original papers which accompanied your letter of the 25th instant are herewith returned.

I am, &c.,

(Signed)

J. EMERSON TENNENT.

The Under-Secretary of State, Colonial Office.

Government House, Halifax, 14th November, 1865.

SIR,—

I received by the last mail a Despatch from the Right Honble. the Secretary of State for the Colonies, of which the enclosed is a copy, and which, together with the enclosures to which it refers, were duly submitted to my Executive Council; and I have now the honor to inform you that my Government cordially concurs in the proposed mission for the purpose of endeavoring to extend the trade of the British North American Provinces, and that I will be prepared very shortly to communicate to you the name of the Commissioner appointed to represent this Province on that delegation.

I have, &c.,

(Signed) W. F. WILLIAMS.

Lieutenant General Sir J. MICHEL, K. C. B.,
Administering the Government of Canada.

Downing Street, 18th November, 1865.

SIR,—

With reference to my Despatch of the 28th of October last, I have the honor to transmit to you a copy of a letter from the Foreign Office, together with a copy of the reply which I have caused to be addressed to that department, on the subject of the extension of the commercial relations of the British North American Provinces with the British and Spanish West Indies, with Mexico, Brazil, and other countries.

I have the honor to be, Sir,

Your most obedient, humble servant,

EDWARD CARDWELL.

Lieutenant Governor

Sir FENWICK WILLIAMS, Bart., K. C. B., &c., &c., &c.

Foreign Office, November 11, 1865.

SIR,—

I have laid before the Earl of Clarendon your letter of the 7th instant, and its enclosures, relative to the measures proposed by the Government of Canada for the extension of the Commercial relations of the British North American Provinces with the British and Spanish West Indies, and with Mexico, Brazil, and other countries, and I am to request that you will state to Mr. Secretary Cardwell that His Lordship concludes that, as regards Foreign Countries, the Agents who may be sent from the British North American Colonies will not assume any independent character, or attempt to negotiate and conclude arrangements with the Governments of Foreign Countries; but will only, as proposed by the seventh resolution of the Confederate Council on Commercial Treaties, as regards negotiations with the United States, enclosed in Lord Monck's Despatch, No. 135, of the 23rd of September, be authorized to confer with the British Minister in each Foreign Country, and to afford him information with respect to the interests of the British North American Provinces.

A similar process has been adopted in various negotiations for Commercial Treaties in which Her Majesty's Government have recently been engaged with Foreign Powers; and Lord Clarendon, on receiving from Mr. Cardwell copies of the instructions given to the Colonial Delegates, will be ready to authorize Her Majesty's Minister at Madrid as regards the Spanish West Indies, and Her Majesty's Ministers on the Continent of America to communicate with their Colonial Delegates, and, in the first instance, to assist them in their enquiries as to what openings there may be for extending the Trade of the British Colonies, and afterwards to ascertain how far any overtures for that object would be likely to be well received by the Governments to which those Ministers are accredited.

Having thus obtained grounds for further proceedings, Her Majesty's Government might in the next place consider, in communication with the Lords of the Committee of Privy Council for Trade, how far any proposals might be made to Foreign Countries in behalf of the Colonies, consistently with the general Treaty engagements of the British Crown; and this point being satisfactorily ascertained, instructions might be framed in this country for Her Majesty's Ministers in the countries in question, and full powers issued to them by Her Majesty, under which they would endeavor to bring into the shape of international engagements such arrangements as might be ultimately considered acceptable not only to the Colonies themselves, but also to the Foreign Powers with whom they were contracted.

I am, &c.,

(Signed)

E. HAMMOND.

The Under-Secretary of State, Colonial Office.

Downing Street, 18th November, 1865.

SIR,—

With reference to your letter of the 11th instant, I am directed by Mr. Secretary Cardwell to acquaint you, for the information of the Earl of Clarendon, that it was not intended by Mr. Cardwell's Despatch, of which a copy was enclosed in my letter of the 7th instant, nor, as he apprehends, by the Governor of Canada, that the proposed Deputations should enter into any negotiations with Foreign Powers; but, to prevent all chance of misapprehension, a copy of your present letter will be transmitted to the Governors of the Colonies concerned.

I am, &c.,

(Signed)

T. F. ELLIOTT.

E. HAMMOND, Esq., &c., &c., &c.

Government House, Halifax, 7th December, 1865.

SIR,—

I have the honor to inform you that I have appointed Mr. J. McDonald, Financial Secretary, and Mr. I. LeVesconte, late Financial Secretary, by recommendation of my Government, as representatives in the mission for the extension of commerce between the British North American Provinces and other countries, and that these gentlemen leave for England this day.

I have, &c.,

(Signed)

W. F. WILLIAMS.

The Right. Hon. Mr. CARDWELL, M. P.

Downing Street, 20th December, 1865.

SIR,—

I have the honor to acknowledge the receipt of your despatch, No. 8, of the 7th instant, reporting the appointment of Messrs. J. McDonald and I. LeVesconte as Representatives of Nova Scotia in the Commission about to proceed to the Spanish West Indies, Brazil, and Mexico, for the purpose of considering in what manner commerce with those countries may be expected.

I have the honor to be, Sir,

Your most obedient, humble servant,

EDWARD CARDWELL.

Lieutenant Governor

Sir F. WILLIAMS, Bart., K. C. B., &c., &c., &c.

APPENDIX No. 10.

UNION OF THE COLONIES.

[Sir R. G. MACDONNELL to Mr. E. CARDWELL.]

Government House, Halifax, 27th April, 1865.

SIR,—

I have the honor to report, for your information, that the following Resolution was passed by the House of Assembly on the 24th inst. :—“*Resolved*, That in the opinion of this House, the negotiations for the Union of Nova Scotia, New Brunswick, and Prince Edward Island should be renewed, in accordance with the Resolution passed at the last session of the Legislature.”

2. I need scarcely tell you that my Ministry has been most anxious to give the fullest possible effect to the declared wishes of Her Majesty's Government in favor of a general Confederation of the British North American Provinces. It is obvious, however, they would jeopardize the final success of that project, if, in a very divided state of public opinion, they had submitted it to the Legislature or the country at a time when the refusal of New Brunswick to form part of that Confederation had left such an enormous gap as the space occupied by that Province between Canada and Nova Scotia.

3. A decision given at such a time, and under such discouraging circumstances, would probably have greatly increased the difficulty of procuring the adhesion of this Province to the larger Union at some more favorable opportunity.

4. Opponents of the present Government have argued that they had incurred an obligation to stand or fall by the result of an appeal to the Legislature or the country on the larger question. I conceive there might be something more than plausible in such an argument if urged as a duty on the Government of New Brunswick, in case Nova Scotia had been the first to reject the proposal based on the Quebec Resolutions; because the non-adhesion of Nova Scotia could not separate New Brunswick from Canada,—whereas, the refusal of New Brunswick renders the discussion of Nova Scotia's adhesion so evidently fruitless and inconsequential for the time being as seriously to impair the chance of the question meeting a fair reception on its own merits. Whatever the latter may be, it is obvious that opponents of Confederation would say that the General Union having become impracticable for the time, all discussion of its merits was out of season.

5. To such an extent did this feeling prevail that even the following preamble, which originally prefaced the Resolution just passed, had to be omitted, viz. :—“*Whereas*, Under existing circumstances, an immediate Union of the British North American Provinces has become impracticable; *And Whereas*, a Legislative Union of the Maritime Provinces has become desirable, whether the larger Union be accomplished or not.”

6. The feeling of the Legislature and the country seemed to be so unmistakably against the discussion of the Quebec Resolutions, without a hope of any immediate practical result during the present attitude of New Brunswick, that even the introducing resolution thereto in the above preamble was regarded as unreasonable. It was therefore withdrawn, and the Resolution itself in favor of resuming negotiations for the Legislative Union of the Maritime Provinces was thereupon immediately carried without a division.

7. It may be as well to explain here that I have been for some time aware, and indeed was this very day officially informed by the Lieutenant Governor of Prince Edward Island, that his Ministry declines taking any part in the proposed negotiations, which must therefore be regarded as limited to the two more important Provinces of New Brunswick and Nova Scotia.

8. This Province may therefore be regarded as having placed on record no decision, and not even any opinion relative to the merits of the larger question. It has simply recorded its desire *ad interim* to resume negotiations with a neighboring Province, for the purpose of effecting a Legislative Union between the two. The Legislature thereby affirms the expediency of throwing down barriers and distinctions between adjacent Provinces with nearly identical interests and inhabited by the same race. That is in itself a matter of internal improvement and administrative economy, which apparently may be taken up without in the slightest degree impairing the prospects of a plan intended to embrace all the Provinces, inasmuch as consolidation of two members of the proposed Confederation ought rather to give a firmer consistency to the whole.

9. I do not wish to put forward any individual opinion of my own; but confess I see much force in the concluding observations of Mr. A. G. Archibald on that subject, and take the liberty of transmitting this speech, along with those of Mr. Annand and the Provincial Secretary, as good specimens of the debate. Mr. Archibald, who was himself a Delegate at Quebec, winds up by observing that whether the Union shall end with the Lower Provinces or expand to Confederation, it will be alike useful to us; and, if the larger Union is ever to be consummated, there must be an advantage in obliterating all narrow boundaries, whether Legislative or territorial, over so extensive and important a portion of the proposed Confederation as that comprised in the areas occupied by New Brunswick and Nova Scotia.

I have, &c.,

R. G. MACDONNELL.

Right Honorable EDWARD CARDWELL.

[Lieut. Governor Sir R. G. MACDONNELL, C. B., to the Right Hon. the SECRETARY OF STATE.]

*Government House,
Halifax, Nova Scotia, 7th June, 1865.*

SIR,—

In reference to my Despatch No. 75 of the 27th April, apprising you of the steps taken in the Legislature of this Province to revive discussion of the question of the Union of the Maritime Provinces, I have now the honor to transmit for your information copies of the replies which I have received from the Lieut. Governors of New Brunswick and Prince Edward Island.

I have, &c.,

(Signed)

R. G. MACDONNELL,
Lieutenant Governor.

The Right Hon. EDWARD CARDWELL, M. P.

[Lieut. Governor the Hon. A. GORDON to Sir R. G. MACDONNELL.]

Fredericton, 31st May, 1865.

SIR,—

I have the honor to enclose herewith for Your Excellency's information, a copy of an address presented to me by the House of Assembly of this Province,

with reference to the appointment of a Delegation to confer with Delegates from Nova Scotia and Prince Edward Island, with a view to an Union of the Maritime Provinces, as also a copy of my answer.

I have, &c.,
(Signed) ARTHUR GORDON.

Sir R. G. MACDONNELL.

House of Assembly, 25th May, 1865.

Whereas the Lieut. Governor of this Province has received from the Lieut. Governor of Nova Scotia copies of resolutions passed by the Legislative Council and House of Assembly of that Province, expressing a wish to renew the negotiation for a Union of the Maritime Provinces; and whereas it is desirable to ascertain whether a Legislative or Commercial Union of these Provinces on terms advantageous to all is practicable,—

Therefore Resolved, That an humble address be presented to His Excellency the Lieut. Governor, requesting him to appoint Delegates, not to exceed five, to confer with a Delegation to be appointed by the Governments of Nova Scotia and Prince Edward Island, on the subject of such Union.

Ordered, That the Hon. Mr. Smith, Mr. Kerr and Mr. Cudlip be a Committee to wait upon His Excellency with the address.

(Signed) C. P. WETMORE, Clerk.

GENTLEMEN,—

I am fully sensible of the great importance of the subject to which the Address now presented to me relates, and will not fail to appoint Delegates to conduct its discussion on the part of this Province, as therein requested.

[Lieut. Governor G. DUNDAS to Sir R. G. MACDONNELL.]

Prince Edward Island, 30th May, 1865.

SIR,—

In reference to my despatch of the 24th ult., in which I informed you that a minute was being prepared expressive of the views of the Executive Council of this Island on the subject of the proposed resumption of negotiations for Union of the Maritime Provinces, I have now the honor to enclose that Minute.

I have, &c.,
(Signed) GEORGE DUNDAS.

Sir R. G. MACDONNELL.

EXTRACTS FROM MINUTES OF THE EXECUTIVE COUNCIL.

Council Chamber, 18th April, 1865.

His Excellency having laid before the Board a communication from Sir R. G. MacDonnell, Lieut. Governor of Nova Scotia, enclosing certain resolutions proposed by the Government of Nova Scotia to the Legislature of that Province, suggesting the resumption of negotiations for Union of the Maritime Provinces, and also expressing his Excellency's desire to know how far the Government of this Island is disposed to co-operate in effecting the proposed Union.

It was resolved, that inasmuch as the people of this Colony are averse as well to Union of this Island with Nova Scotia and New Brunswick as to a Federal Union of all British N. A. Colonies and Provinces, the Board decline to renew negotiations for the Union of Nova Scotia, New Brunswick and Prince Edward Island, as proposed by the Government of Nova Scotia.

Downing Street, 24th June, 1865.

SIR,—

I have the honor to acknowledge the receipt of your Despatch No. 87 of the 7th June, in which you enclose copies of Despatches addressed to you by the Lieut. Governors of New Brunswick and Prince Edward Island, in reference to a question for renewal of negotiations for a Union of the Maritime Provinces of British North America.

I have the honor to be, &c.,

(Signed) EDWARD CARDWELL.

R. G. MACDONNELL.

Downing Street, 24th June, 1865.

SIR,—

I have the honor to transmit to you the copy of a correspondence between Viscount Monck and myself, on the affairs of British North America, which have lately formed the subject of Conferences between Her Majesty's Government and a Deputation from the Canadian Government.

This correspondence having been presented to both houses of the Imperial Parliament by command of Her Majesty, I have to direct you to communicate it also to the Legislature of Nova Scotia at its next meeting.

You will at the same time express the strong and deliberate opinion of Her Majesty's Government that it is an object much to be desired that all the British North American Colonies should agree to unite in one Government. In the territorial extent of Canada, and in the maritime and commercial enterprise of the Lower Provinces, Her Majesty's Government see the elements of power, which only require to be combined in order to secure for these Provinces, which shall possess them all, a place among the most considerable communities of the world. In the spirit of loyalty to the British Crown, of attachment to British connexion, and of love for British Institutions, by which all these Provinces are animated alike, Her Majesty's Government recognize the bond by which all may be combined under one Government. Such an union seems to Her Majesty's Government to recommend itself to the Provinces on many grounds of moral and material advantages,—as giving a well-founded prospect of improved administration and increased prosperity.

But there is one consideration which Her Majesty's Government feel it more especially their duty to press upon the Legislature of Nova Scotia. Looking to the determination which this country has ever exhibited to regard the defence of the Colonies as a matter of Imperial concern, the Colonies must recognize a right and even acknowledge an obligation incumbent on the Home Government to urge with earnestness and just authority the measures which they consider most expedient on the part of the Colonies with a view to their own defence.

Nor can it be doubtful that the Provinces of British North America are incapable, when separate and divided from each other, of making those just and efficient preparations for national defence which would be easily undertaken by a Province uniting in itself all the population and all the resources of the whole.

I am aware that this project, so novel as well as so important, has not been at once accepted in Nova Scotia with that cordiality which has marked its acceptance by the Legislature of Canada; but her Majesty's Government trust that after a full and careful examination of the subject in all its bearings, the Maritime Provinces will perceive the great advantages which, in the opinion of Her Majesty's Government, the proposed union is calculated to confer upon them all.

I have, &c.,

(Signed) EDWARD CARDWELL.

Sir R. G. MACDONNELL.

(Copy of a Despatch from the Right Honorable EDWARD ORRDWELL, M. P., to Governor General Viscount MONCK.)

Downing Street, 17th June, 1865.

MY LORD,—

I have the honor to inform your Lordship that several conferences have been held between the four Canadian Ministers who were deputed, under the Minute of your Executive Council of March 24, to proceed to England to confer with Her Majesty's Government, on the part of Canada, and the Duke of Somerset, the Earl De Grey, Mr. Gladstone, and myself, on the part of Her Majesty's Government.

On the first subject referred to in the Minute, that of the Confederation of the British North American Provinces, we repeated on the part of the Cabinet the assurances which had already been given of the determination of Her Majesty's Government to use every proper means of influence to carry into effect without delay the proposed Confederation.

On the second point, we entered into a full consideration of the important subject of the defence of Canada, not with any apprehension on either side that the friendly relations now happily subsisting between this country and the United States are likely to be disturbed, but impressed with the conviction that the safety of the Empire from possible attack ought to depend upon its own strength and the due application of its own resources. We reminded the Canadian Ministers that on the part of the Imperial Government we had obtained a vote of money for improving the fortifications of Quebec. We assured them that so soon as the vote had been obtained the necessary instructions had been sent out for the immediate execution of the works, which would be prosecuted with despatch; and we reminded them of the suggestion Her Majesty's Government had made to them to proceed with the fortifications of Montreal.

The Canadian Ministers, in reply, expressed unreservedly the desire of Canada to devote her whole resources, both in men and money, for the maintenance of her connection with the Mother Country; and their full belief in the readiness of the Canadian Parliament to make known that determination in the most authentic manner. They said they had increased the expenditure for their Militia from 300,000 to 1,000,000 dollars, and would agree to train that force to the satisfaction of the Secretary of State for War, provided the cost did not exceed the last-mentioned sum annually, while the question of confederation is pending. They said they were unwilling to separate the question of the works of Montreal from the question of the works west of that place, and from the question of a naval armament on Lake Ontario. That the execution of the whole of these works would render it necessary for them to have recourse to a loan, which could only be raised with the guarantee of the Imperial Parliament. They were ready to propose to their Legislature on their return a measure for this purpose, provided that the guarantee of the Imperial Parliament were given now, and that they were authorized to communicate to the Parliament of Canada the assurance that, the occasion arising, England will have prepared an adequate naval force for Lake Ontario. They thought that if the guarantee were not obtained now, it was probable that the Canadian Government and Parliament would think it desirable that the question of defensive works should await the decision of the Government and Legislature of the United Provinces.

On the part of Her Majesty's Government we assented to the reasonableness of the proposal that if the Province undertook the primary liability for the works of Defence mentioned in the letter of Lieutenant-Colonel Jervis, and showed a sufficient security, Her Majesty's Government should apply to Parliament for a Guarantee for the amount required; and we said that Her Majesty's Government would furnish the armaments for the works. But we said that the desire and decision of the Provincial Legislature ought to be pronounced before any application was made to the Imperial Parliament. On the subject

of a Naval Force for Lake Ontario, we said that, apart from any question of expediency, the convention subsisting between this country and the United States rendered it impossible for either nation to place more than the specified number of armed vessels on the Lakes in time of peace. In case of war it would, as a matter of course, be the duty of any Government in this country to apply its means of Naval Defence according to the judgment it might form upon the exigencies of each particular time, and the Canadian Ministers might be assured that Her Majesty's Government would not permit itself to be found in such a position as to be unable to discharge its duty in this respect. This was the only assurance the Canadian Ministers could expect, or we could give.

Upon a review of the whole matter, the Canadian Ministers reverted to the proposal which has been mentioned above, that priority in point of time should be given to the Confederation of the Provinces. To this we, on the part of Her Majesty's Government, assented. In conformity, however, with a wish strongly expressed by the Canadian Ministers, we further said, that if, upon future consideration, the Canadian Government should desire to anticipate the Confederation and to propose that Canada should execute the works, they would doubtless communicate to Her Majesty's Government that decision; and we trusted that after what had passed in these conferences, they would feel assured that any such communication would be received by us in the most friendly spirit.

On the third point, the Reciprocity Treaty, the Canadian Ministers represented the great importance to Canada of the renewal of that Treaty, and requested that Sir F. Bruce might be put in communication with the Government of Lord Monck upon the subject. We replied that Sir F. Bruce had already received instructions to negotiate for a renewal of the Treaty, and to act in concert with the Government of Canada.

On the fourth point, the subject of the North-western Territory, the Canadian Ministers desired that that Territory should be made over to Canada, and undertook to negotiate with the Hudson's Bay Company for the termination of their rights, on the condition that the indemnity, if any, should be paid by a loan to be raised by Canada under the Imperial guarantee. With the sanction of the Cabinet, we assented to this proposal, undertaking that if the negotiation should be successful, we, on the part of the Crown, being satisfied that the amount of the indemnity was reasonable, and the security sufficient, would apply to the Imperial Parliament to sanction the arrangement and guarantee the amount.

On the last point, it seemed sufficient that Her Majesty's Government should accept the assurances given by the Canadian Ministers on the part of Canada, that that Province is ready to devote all her resources, both in men and money, to the maintenance of her connexion with the Mother Country, and should assure them in return that the Imperial Government fully acknowledged the reciprocal obligation of defending every portion of the Empire with all the resources at its command.

The Canadian Ministers, in conclusion, said that they hoped it would be understood that the present communications did not in any way affect or alter the correspondence which had already passed between the Imperial Government and the Governments of the British North American Provinces on the subject of the Intercolonial Railway. To this we entirely agreed.

I have, &c.,

(Signed) EDWARD CARDWELL.

Governor General Viscount MONCK, &c., &c.

Downing Street, 28th July, 1865.

SIR,—

I have received your Despatch of the 21st June, No. 89, announcing that the Honorable Dr. Tupper, Provincial Secretary, and the Honorable W. A. Henry,

Attorney General, had been appointed Delegates on behalf of Nova Scotia to confer with Her Majesty's Government on the subject of the Reciprocity Treaty, and on other topics affecting the interests of the Colony.

I have had the honor to receive and have conferred with these gentlemen, and have read to them the Despatches which I have addressed to you on this subject.

I have also spoken with them on the proposed Union of the Maritime Provinces, and have taken the opportunity of expressing myself to them on the subject of Confederation in accordance with the Despatches in your possession, in which the views of Her Majesty's Government have been conveyed.

I have stated that Her Majesty's Government can give no countenance to any proposals which would tend to delay the Confederation of all the Provinces, which they are so desirous to promote; and can only aid in the promotion of a closer Union between Nova Scotia and New Brunswick if that closer union be auxiliary to and form part of the scheme for general Union.

I have the honor to be, Sir,

Your most obedient humble servant,

EDWARD CARDWELL.

Lieut. Governor Sir R. G. MACDONNELL, C. B., &c., &c., &c.

Downing Street, 24th November, 1865.

SIR,—

I think it right to acquaint you that I have been informed by the Secretary of State for Foreign Affairs that in the opinion of Her Majesty's Representative at Washington, the necessity of having to submit a Treaty of Commerce to the separate action of the various Provincial Legislatures would be a serious difficulty in his way; and that the Union of the Provinces would afford the best hope of obtaining such a Treaty.

It is evident that if the gentlemen who are now about to proceed to Mexico, the British and Spanish West Indies and Brazil, for the purpose of ascertaining in what manner the trade and commerce of those countries with British North America can be extended, shall bring their journey to a successful conclusion, and shall be able to suggest to Her Majesty's Government, on the part of the British North American Provinces, any new arrangements with the countries in question for the benefit of those Provinces, a similar difficulty may be expected to arise in every such case; and on the other hand, the Union of the Provinces would in every such case afford the best hope of bringing such arrangements to a speedy and satisfactory conclusion.

I have the honor to be, Sir,

Your most obedient humble servant,

EDWARD CARDWELL.

Lieut. Governor Sir W. F. WILLIAMS, Bart., K. C. B., &c., &c., &c.

ADDRESS TO THE QUEEN BY MEMBERS OF THE LEGISLATURE, AND
MINUTE OF THE EXECUTIVE COUNCIL THEREON.

[Sir W. F. WILLIAMS to Mr. CARDWELL, M. P.]

*Government House, Halifax, Nova Scotia,
26th April, 1866.*

Sir,—

In compliance with the request of certain members of the Legislative Council and Legislative Assembly, I have the honor to forward the accompanying address.

Without remarking on the unusual course adopted by these gentlemen, or the tone of their address, I beg to express my entire concurrence with the accompanying Minute of my Executive Council, which I have also the honor to enclose.

I have, &c.,

(Signed) W. F. WILLIAMS.

THE RT. HON. EDWARD CARDWELL, M.P.

To the Queen's Most Excellent Majesty :—

The Humble Address of the undersigned Members of the Legislative Council and House of Assembly of Nova Scotia :—

MAY IT PLEASE YOUR MAJESTY :—

The undersigned desire to approach the Throne with the expression of their loyal attachment to your Majesty's person and Government.

For more than a century the Province of Nova Scotia has enjoyed the advantage of representative institutions, resting on the confidence and respect of her own people, and since 1839 she has possessed entire control over her revenues, trade, appointments, education, and generally exercised, in due subordination to your Majesty's just authority, all the powers of self-Government.

Nor have these privileges been abused. The undersigned venture to assure your Majesty with becoming pride, that in no part of your Majesty's widely extended empire have they been exercised with more justice and discretion.

Our fathers in the American Revolutionary war adhered to the side of England, during the war of 1812-15, the harbors of Nova Scotia formed the basis of operation, and her sons fought to defend the national flag by land and sea. In all the trials of the parent State the people of this Province sincerely sympathize; and, recently when unquiet spirits sought to disturb the frontier, and when angry complications, growing out of national questions, threatened the peace of the continent, the population of Nova Scotia were united in sentiment, and stood prepared to maintain their allegiance and to defend their country.

The priceless blessing of self-government makes the people content, while participation in the civilization, the commercial prosperity, and the glories of the empire render them proud of their connexion with it, and indisposed to try rash experiments, by which their control over their own affairs must be surrendered, and their connexion with the parent State may be ultimately broken.

The people of this country viewed with just alarm a scheme of Confederation, arranged by certain gentlemen at Quebec in 1864, without any authority from the Legislatures or people of the Maritime Provinces, and sought to be forced upon them all with indolent haste, and without that deliberate review and general acceptance which can alone reconcile any free people to great constitutional charges.

That scheme, rejected by the electors of two of the Maritime Provinces and by the Legislatures of them all, we fear has not been abandoned. By the free use and abuse of your Majesty's name, and by threats that your protection would be withdrawn, a resolution has been carried through the Legislature of Nova Scotia giving power to certain gentlemen, to be selected by the local government, to change, modify, or overturn the institutions of this Province at their pleasure, without any reference to the people who for a century have enjoyed them, and who, we venture to assure your Majesty, would deeply resent such a violation of the trust reposed in their representatives and (if measures thus prepared were sanctioned by your Majesty's Government) of the pledged faith and honor of the Crown.

Our prayer to your Majesty, therefore, is that no measure to effect grave changes in the constitution of this Province may be sanctioned by your Majesty or submitted to Parliament, till it has been published in the Province, considered in the Legislature and submitted to the deliberate acceptance or rejection of the people at the polls.

HALIFAX, N. S., April 25, 1866.

The Executive Council beg leave respectfully to offer the following observations upon the Memorial to her Majesty the Queen, signed by five members of the Legislative Council and eighteen members of the Assembly, upon the subject of the Confederation of British North America.

The Council fail to perceive how "the priceless blessings of self-government," which the memorialists profess so highly to value, is to be maintained, if the deliberate action of overwhelming majorities of both branches of the Legislature, taken after full discussion, is to be overruled by the Imperial Government, at the instance of the minority.

The Council cannot concur in the opinion that the control of the people of this Province over their own affairs would be surrendered by uniting the British North American Provinces under one Government, and they confidently expect that this Union, adopted at the earnest solicitation of the parent State, will cement and strengthen the bonds which now connect this Province to the Mother Country.

The statement that the Quebec Conference was held without any authority from the Legislature of this Province can scarcely be considered accurate, when the fact is stated that all of the memorialists who were in the Assembly in 1861,

voted for the following resolution submitted by a Government of which Messrs. Annand and Locke, two of them, were members, and which received the unanimous assent of the Legislature :—

“ *Whereas*, The subject of a Union of the North American Provinces, or of the Maritime Provinces, from time to time has been mooted and discussed in all the Colonies.

“ *And Whereas*, While many advantages may be secured by such a union, either of all these Provinces, or a portion of them, many and serious obstacles are presented, which can only be overcome by mutual consultation of the leading men of the Colonies, and by free communication with the Imperial Government.

“ *Therefore Resolved*, That his Excellency the Lieut. Governor be respectfully requested to put himself in communication with his Grace the Colonial Secretary and his Excellency the Governor General, and the North American Colonies, in order to ascertain the policy of her Majesty's Government, and the opinions of the other Colonies, with a view to the enlightened consideration of a question involving the highest interests, and upon which the public mind in all the Provinces ought to be set at rest.”

The charge of having pressed this matter “with indecent haste,” the Council cannot understand, as more than a year was suffered to elapse after the proposal to unite these Provinces was submitted to the Legislature before any action was invited thereon. The Council emphatically deny that any “use or abuse of her Majesty's name” has been resorted to in carrying this question, which has not been fully sanctioned by her Majesty's Ministers, who in the papers submitted to Parliament by her Majesty's command, declared that it was “the determination of her Majesty's Government to use every proper means of influence to carry into effect, without delay, the proposed Confederation.”

It is quite true that the Council have felt themselves justified in drawing the attention of the Legislature strongly to the following paragraph in the despatch of the Right Honorable the Secretary of State for the Colonies, and in urging upon them the duty of adopting the defensive measures thus emphatically urged upon our attention, least we might imperil the disposition of the Imperial Government to afford us protection :—

“But there is one consideration which her Majesty's Government feel it more especially their duty to press upon the Legislature of Nova Scotia. Looking to the determination which this country has ever exhibited to regard the defence of the Colonies as a matter of Imperial concern, the Colonies must recognize a right and even acknowledge an obligation incumbent on the Home Government to urge with earnestness and just authority the measures which they consider most expedient on the part of the Colonists, with a view to their own defence.

“Nor can it be doubtful that the Provinces of British North America are incapable, when separate and divided from each other, of making those just and efficient preparations for national defence which would be easily undertaken by a Province uniting in itself all the population and the resources of the whole.”

The statement that the action of the Legislature gives power to “certain gentlemen to be selected by the local Government to change, modify, or overturn the institutions of this Province at their pleasure,” is best refuted by the terms of the resolution itself, which are as follows :

“*Whereas*, in the opinion of this House it is desirable that a Confederation of the British North American Provinces should take place :

“*Resolved therefore*, That his Excellency the Lieut. Governor be authorised to appoint delegates to arrange with the Imperial Government a scheme of Union which will effectually ensure just provision for the rights and interests of this Province, each Province to have an equal voice in such delegation,—Upper and Lower Canada being for this purpose considered as separate Provinces.”

It is complained by the memorialists that this action is proposed to be taken without “any reference to the people.” It is declared that they would resent “such a violation of the trust reposed in their representatives,” and it is asked

that nothing shall be done without having the measure first submitted to "the people at the polls."

When the late Government, of which Messrs. Annand and Locke were members, obtained authority to deal with the subject of a Union of the Colonies, they invited the action of the other Colonial Governments by an official communication signed by Mr. Howe, the then Provincial Secretary, of which the following is an extract:

"You will perceive that the Colonial Governments are left free to invite all the leading men of all the Provinces concerned, to a discussion of the question of Union, either of all the Provinces, or the Maritime Provinces only; and her Majesty's Government, it would appear, are disposed to give due weight and consideration to any resolutions in which the *Colonial Legislatures* may concur.

"It must be obvious that there can be no great progress made towards an adjustment of this question unless the resolutions to be submitted to the *Colonial Legislatures* are in substance the same, and in order that uniformity in spirit, and, if possible, in language, may be secured."

It does not seem, then, to have been considered necessary to refer the question to the people at the polls.

The same Government also put on record on various other occasions their opinions as to the legitimate powers of the representatives of the people, as may be seen by the following extracts from Minutes of Council, Nov. 1st, 1860:

"A vast majority of the people of England are not represented in Parliament at all, yet the Executive Council need not inform your Excellency that a public man would be laughed at who claimed to seize the Government because he had their support. Forty counties in England, with a population in 1841 of 9,109,281, had but 143 members, while 187 cities and boroughs, including but 5,879,327, had 323. Now what would be thought of any statesman, with the county members at his back, if he claimed to rule England, or compel the Sovereign to dissolve, with the representatives of the cities and boroughs against him. What representative of the smallest constituency in Great Britain would yield to the member returned by the largest any more influence than he had himself, or admit before a ministry was turned out that it was necessary not only to count the the members in the lobbies, but their constituencies also? * * * At this moment a majority of the people, of the constituencies and of their representatives support the Administration, and we have a larger proportionate majority to sustain us than Lord Palmerston has in the Mother Country. Under these circumstances, we are not very much afraid of the interference of the Imperial Parliament."

January 29, 1861—Minute:

"Mr. Hatfield and Mr. Campbell are the best judges of the soundness of their own views and the propriety of their conduct. They are not delegates but members of Parliament, and from the moment of their election they were bound to represent not only Digby or Argyle, but the whole Province, whose great interests were committed to their care. This doctrine laid down by Mr. Burke at Bristol in 1774, has never been questioned in the Imperial Parliament; and Mr. Horsman, member for Stroud, though recently called on by his constituents to resign, has asserted his rights, and illustrating this sound British doctrine, positively refused. If members were to resign whenever for a moment they displeased their constituents, the calls would be frequent; personal independence would be rare, and questions would be discussed by requisitions rather than by fair deliberation and manly debates. If Parliament were to be dissolved whenever a gentleman changed sides, or a discontented constituency petitioned, free institutions would become an endless distraction, and no man would ever dare to deliberate or run the risk of being convinced."

March 30th, 1861, Lord Mulgrave, by the advice of the Government of which Mr. Howe was the leader, and Messrs. Annand and Locke were members, said in a despatch to the Colonial Secretary:

“ It is the undoubted principle of the British Constitution that a member once returned by a constituency has to consider what he believes to be the *interests* of the whole country, and not the simple wishes of his own constituency. He is elected a representative and not a delegate, and the constituency have given to him for the limited period fixed by law for the duration of Parliament, the power which they possessed. They have a right to represent to him their views, and to refuse to re-elect him at the end of the Parliament, if they are dissatisfied with his conduct ; but they have no right, pending the duration of the Parliament, to coerce his actions ; still less have they the right to expect that the Royal prerogative should be used because they are dissatisfied with the choice they have made.”

In conclusion the Council may state that more than a year since they submitted the proceedings of the Quebec Conference to the Legislature ; that this question of the Union of the British North American Colonies has been a subject of constant discussion in this Province from that time ; yet the opponents of Union were only able to obtain the signatures of 8,085 people out of a population of not less than 350,000 for presentation to the House during the present session, praying that it might be referred to the people at the polls. The foregoing resolution, after full deliberation and discussion, was carried in the Legislative Council by a vote of 13 to 5, and in the House of Assembly by 31 to 19. All the members of the present Government and four members of the late Government, of which Mr. Howe was the leader, united in sustaining the resolution, while but two voted against it.

Under these circumstances, the Council believe they are fully warranted in the opinion that the public sentiment of this Province has been most emphatically expressed on this great question in the manner recognized by the Constitution of this Province and the practice of Great Britain.

APPENDIX No. 11.

MILITIA.

ADJUTANT GENERAL'S REPORT FOR THE YEAR 1865.

OFFICE OF ADJUTANT GENERAL OF MILITIA,
Halifax, N. S., 1st January, 1866.

SIR,—

I have the honor to submit to Your Excellency my Annual Report on the State of the Local Forces, compiled and abridged from the Inspecting Field Officers' records, and the statements and returns made by Officers commanding Regiments and Corps.

TRAINING.

The progress of the Local Forces in the practice of field exercise and evolutions is satisfactory and improving.

Besides the ordinary annual training of Regiments, thirty-eight Adjutants of Battalions were trained during sixty days at Head Quarters with the best results. These officers acquired a competent knowledge in recruit's, squad and company drill, the manual and platoon exercise, company, light infantry, and sword drill; and they left Head Quarters well enough grounded and qualified in battalion evolutions to be of very great service to their regiments.

As Your Excellency witnessed the course of mutual and other instruction practiced by these gentlemen, and approved of their practical acquirements at a final inspection, it is needless to add further particulars on this point.

It is anticipated that more than two-thirds of the Adjutants of all the Regiments will be thus trained at Head Quarters before the commencement of next annual training. The effect will certainly be an immediate and very marked improvement in the drill and discipline of the service.

This consecutive drill at Head Quarters is far more effective than any other method which could be adopted. As the service must hereafter rely in a great measure on this class of officers, it would augment the effective state of the Militia could their military acquirements be maintained and improved by giving them increased employment in their Regimental Districts.

Some encouragement beyond that now afforded seems to be required to get the Adjutants to take a more constant part in the training of the commands to which they belong. It must be borne in mind that they have to attend to all the details of enrolment and the other returns of their regiments, excepting the financial business of the Quartermasters. These duties are very heavy, in most cases complicated and troublesome, and always occupying much time. In the rural districts travelling expenses have also frequently to be incurred. It seems hardly reasonable to call on officers thus engaged, and receiving but \$40 a year, for much extra duty, without additional pay.

Sec. 17 of 28 Vic., cap. 16, gives power to the Commander-in-Chief to employ Adjutants on special duty, with additional pay at \$1.50 per diem, when detailed for duty beyond five miles from their residence.

I respectfully submit that a regular rate of pay for increased regular duties to be performed would be preferable. The allotment of special duties and pay involves a kind of selection likely to appear invidious in too many instances, when other officers not selected might consider themselves more than equally entitled to the same kind of consideration.

The knowledge and practice of drill is now very considerable and extensive in this Province. In further connexion with the same subject, I have the honor to bring to Your Excellency's notice a very cogent requirement also alluded to in a former annual Report. A sound instruction of youth in the first principles of drill, terminating with a brief but effective course of musketry, would have an ultimate effect on the defensive institutions of the country incalculable in extent, and inexpensive to the Province, considering the object to be gained.

An early and consequently indelible acquisition of the principal elements on which all evolutions are founded, impressed habitually on those who will soon be the able-bodied young men of the Province, would very shortly render Nova Scotia as secure from adverse military pressure from abroad as any dependency of the British dominions; and with her geographical position and rapidly increasing population and resources, only second to Great Britain herself in this respect.

The civil authorities in schools where a system of military drill has been tried, agree in their experience that by a reasonable amount of martial training the general discipline of their academies is greatly improved without scholarship being impaired; and practical army instructors training those previously drilled in educational institutions, from the simple fact of their habitual acquaintance with right and left, find them far in advance and much more teachable than adults, whom, if previously untrained, it is sometimes very difficult to teach at all.

The effective Militia of the Channel Islands is a standing example of the value and efficacy of early military education; and the martial character and strength of the French is attributable chiefly to the same system. The Channel Islands, in an exposed outlying position, are accounted very strong posts, because every man is ready clothed, armed, and trained, in youth, so as to require but little drill in after life, when time becomes more valuable to individuals occupied in commerce and industrial pursuits. There could not be a more favorable time for submitting this to your Excellency's notice, and thus bringing it to serious consideration. Many of the Teachers who have left the Normal School are quite capable of introducing military training in the schools in which they are now engaged. Some of the well trained Adjutants of Regiments might be induced to give most valuable aid in carrying out this patriotic object, and many of the Regimental Officers now trained, if invited, might also be inclined to assist. Should adequate encouragement be offered, I believe it would not now be difficult to attach a Drill Instructor to nearly every school in the Province.

The permanent Staff Instructors have now been engaged three years in imparting drill to the Militia, having been occupied about two years previously with the Volunteers, since mostly merged into the Militia. The effects of their efforts and perseverance are equal to anything that could have been reasonably anticipated.

It is now quite time that the trained officers should exhibit that spirit and feeling of self-reliance which, I am very glad to have to report, is being already rapidly developed. Although the aid of the permanent Staff may be occasionally required in certain commands disadvantageously situated, it should be an object of emulation with the Regimental Officers and their subordinates to carry on all their duties well with as little extraneous assistance as possible, or without it altogether.

I am certain that the great efforts now being made by the Officers Commanding and their Regimental Officers, will meet with your Excellency's cordial approval, and that the confidence more than once expressed by the Home Authorities will be still further and fully confirmed. All the Metropolitan Regiments, and a very fair proportion of the well organized country commands, can already dispense with the permanent Staff, whose time can be devoted to bringing on the more backward commands and training detached company posts.

It is sincerely to be hoped that the appointment and training of Non-commissioned Officers will steadily and more speedily progress. I have in former reports dwelt as forcibly as I could on this indispensably essential point. In again bringing it most urgently to your Excellency's notice, I venture to repeat the remark, self-evident to any professional officer, that the service cannot possibly attain to a permanently effective state without competent subordinates of all ranks.

The same remark is no less applicable to the subordinate sub-divisions—the necessity for which has been demonstrated and explained also in previous reports. These apparently minor details are of more consequence now than anything else. If the Squad Organization be carried out effectively, Regimental work will be carried on with comparative ease to all concerned. I believe that most of the commands already recognize this fact.

The revised Provincial Army List, which is now nearly ready for publication, will contain dates of previous commissions, and will show the progressive state of organization since last year. Several attempts were made to compile an unattached list, but it was found to be quite impracticable, as the Commanding Officers of Regimental Districts in the different Counties reported that they could give no reliable information; and the publication of the names of many deceased Officers, in the absence of accurate returns of casualties, would create numerous cases of painful correspondence when too late to correct such errors which would certainly occur. I may, however, observe, that no Militia Army List which I have consulted contains an unattached list, probably on account of the same insurmountable difficulty in the way of gaining proper periodical returns of Officers neither on service nor on pay. The difficulties encountered being insuperable, publication in the *Royal Gazette* must continue to be the authorized record of Officers having unattached rank.

MILITIA ARTILLERY.

The organization of an Artillery Force in the city of Halifax, recommended by Major-General Hastings Doyle, Commanding the Imperial Troops, and carried out under the directions of Sir R. Graves MacDonnell, C. B., late Commander-in-Chief Nova Scotia Militia, is likely to prove very effective, from the great interest and attention manifested by the Officers of that force in learning their duties. The Brigades are well officered by gentlemen reported well acquainted with the drill and other details of that branch of the service. The Metropolitan Officers of Artillery are having the advantage of a course of Lectures during the winter months, kindly volunteered by Captain Hardy, R. A., of which they availed themselves unanimously with their usual spirit.

At Pictou a small but very effective Brigade has been organized, under able command. 32-lb. guns were furnished last Autumn to this Brigade for drill purposes. Guns were similarly furnished for an Artillery force at Digby, and in the adjacent portion of Granville township, in Annapolis county,—the two places lying on either side of the narrow Gut. An effective Militia Artillery force also exists at Sydney Mines, with heavy guns for training. An Artillery force is also in the course of organization at Yarmouth. Other posts have been reported on with this object. Should the Imperial Government at any time determine to place guns at any posts in well settled Districts, Militiamen can be got to man them.

It may be remarked that Artillery and Marine Defences in this Province and its insular and maritime adjacencies will be of paramount importance. The best agricultural districts are flanked or entered by harbors having defensible inlets or channels; the principal mines or country towns are similarly situated. Coast Defences to almost any extent are only a matter of selection and the construction of works. On the Atlantic shores the hardy sea-going population are peculiarly adapted to Artillery training, which would soon render them a formidable Marine force if afloat, as well trained also in small arms and field evolutions for land service as the sailors in Her Majesty's Navy.

Artillery uniforms were imported from the Military Clothing Establishment, Pimlico, at a cost of \$12,504.86. These uniforms did not arrive until after the

year's training was concluded,—consequently, only a small proportion of them has been issued. Before a general issue of this clothing can be made, some reliable guarantee will be requisite in order that reasonable care be exercised by the recipients to maintain the suits in proper condition and repair.

MUSKETRY.

Successive yearly returns show that the interest in rifle practice continues steadily to increase.

The Provincial Rifle Association, inaugurated by His Excellency Sir R. Graves MacDonnell, and supported by an influential committee of gentlemen, has continued to extend its operations since the time of its formation.

At the last Rifle Contest, which took place at Bedford, the uniformed and trained competitors were more numerous than on any previous occasion of the kind, and the progressive improvement in marksmanship was very decidedly indicated.

Cordial coöperation on the part of the different Districts and Counties would render the Provincial Rifle Association proportionally as effective as the National Rifle Association of Great Britain, of which it is now a branch, under the same distinguished patronage—that of His Royal Highness the Prince of Wales, K. G.

To the interest which His Excellency Sir R. G. MacDonnell actively took in the improvement of our Musketry, the Local Forces are indebted for the selection and possession of a very superior Rifle Range at Bedford. In situation, and all other particulars, it is considered the best tract which could have been chosen for the purpose, comprising, as it does, a spacious level area for practice, with high wooded hills in rear serving as natural Butts, and being accessible by Railway from the Metropolis and other parts of the Province.

The annual firing could not have been accomplished at Truro, as that Range was cut up by the Pictou Branch Railway; and Windsor was not considered sufficiently central to attract and accommodate the greatest number of competitors, which the present Range is eminently calculated to do, by its favorable position.

The details of the year's prize firing are to be published in the Proceedings of the Provincial Rifle Association.

ARMS.

Stand Rifles.

3602 are issued to the Officers and Non-commissioned Officers of the Militia.

1180 are in possession of the Volunteer Corps.

3204 have been repaired, re-adjusted, and browned by Military Armorers, at Head Quarters, since the commencement of the year, part since re-issued.

7—The casualties reported last year, viz.: seven rifles destroyed or unserviceable have been replaced at the Provincial expense.

6 casualties of this year.

718 in Armory at Halifax, for issue.

1100 do. Sydney, C. B.

6600 Total.

The arms in use are reported in a good state. Valid bonds for their safety and conservation are executed and filed in this office.

REGIMENTAL FINANCES.

The law has been carried out much more satisfactorily than last year, and Returns have been far more prompt and accurate, shewing that the working condition of the service has greatly improved.

Each Battalion has been provided with proper Regimental Books, which it is anticipated will facilitate the correct recording of accounts, as well as other details.

As some Regiments train later than others, and the statutory limitations thus sometimes run into the next year, the balancing of the Regimental accounts cannot be all included in the returns of any one current year. Sec. 125 28 Vic., cap. 16, allowing six months to complete actions, this seems to be necessary and unavoidable.

VOLUNTEERS.

The Halifax Volunteer Battalion, re-organised after the completion of its five years' term of service, shows an increase of effective strength over last returns. The returns of the training of this fine command are highly satisfactory. The Battalion has been newly uniformed. On account of the lateness of the season when the new clothing arrived, the weather and state of the ground could not be relied on for an inspection with manoeuvres on the Common; but Your Excellency was pleased to express your satisfaction with the fine appearance of the men at muster, and can rely on the continued efficiency of the corps, which now consists of five companies, averaging about 100 effectives of all ranks in each company. The Battalion has furnished many officers for the Militia.

The Halifax Volunteer Artillery has also increased in effective strength, and the returns of this corps are as creditable as they always have been heretofore.

The Drill Building in Halifax was found quite inadequate to accommodate the requirements of increasing numbers belonging to different commands and branches of the service. Much difficulty had always been experienced in apportioning the room to the different Companies of Volunteers, the Volunteer Artillery, and the Militia Officers. When the Adjutants from the country had to be trained, and a considerable force of Militia Artillery was superadded, which must perform a good deal of training in Detachments under cover in winter time, or in bad weather, with their guns occupying much space, it had to be represented that this could not possibly be managed without increased accommodation, which was accordingly conceded. By the extension of the Building, the armory and storage-room so much required will be nearly doubled; with the further advantage of having secure basement room for heavy weights, different classes of drill will be able to proceed at the same time, when required.

With the means now existing in this Province for embodied organization, the effective formation of Regiments for service, if called on, would be very rapid; and after a very short notice, a valuable contingent could be supplied in aid of Her Majesty's Regular Forces for the defence of the Province; whilst the organized force not embodied, if armed, would be available for the defence of their own particular localities, and in support of the embodied force, which might be required in camp or quarters.

I have the honor to be,
Your Excellency's obedient and most humble servant,

R. B. SINCLAIR, *Col. and A. G. M.*

His Excellency Sir W. F. WILLIAMS, K.C.B., Commanding-in-Chief N.S.M., &c.

APPENDIX A. Numerical State of the Militia of Nova Scotia for the year 1865.

Table with columns: Corps by Counties, Lieutenant-Colonels, Majors, Captains, 1st Lieutenants, 2nd Lieutenants, Staff, Sergeant Majors, Quartermaster Sergeants, Sergeants, Rank and File, Total all ranks present, Absent from inspection, Total number of first class all ranks, Government property in charge (Titles, Seats of Accoutrements, Targets, Artillery Guns and Stores), Amount of fines received, Appropriation, Amount of Appropriation, Balance in hand, Fines due not yet collected.

Table with columns: 5th Regiment, Digby; 1st Regiment, Guysborough; 1st Regiment, Halifax; 1st Regiment, Lunenburg; 2nd Regiment, Digby; 2nd Regiment, Kings; 2nd Regiment, Lunenburg. Columns include: Rank and File, Total all ranks present, Absent from inspection, Total number of first class all ranks, Government property in charge, Amount of fines received, Appropriation, Amount of Appropriation, Balance in hand, Fines due not yet collected.

Numerical State of the Militia, &c.—(Continued.)

* The 4th Regiment, Shelburne, was set off in 1863, drilled in '64 and '65 with 3rd Regiment, but now regularly commanded as a separate corps. The 4th Richmond drilled with the 1st during the past year. The Yarmouth Artillery Brigade, 4th Shelburne, 6th Regiment Yarmouth, Digby and Annapolis Artillery Brigades, were formed since annual training.

CORRESPONDENCE RELATING TO MILITIA INSPECTION.

[SIR R. G. MACDONNELL TO MR. CARDWELL, M. P.]

(COPY.)

*Government House, Nova Scotia,
8th April, 1865.*

SIR,—

I have the honor to transmit herewith the report of the Adjutant General of Militia for the year 1864, and doubt not that on the whole it will be considered by you as very satisfactory.

2. In Appendix C. is given a complete table of the numerical state of the Militia, shewing that, of the 1st class *i. e.*, all males between sixteen and forty-five years of age not disabled by bodily infirmity, upwards of 56,000 have been enrolled, and that nearly 42,000 of all ranks attended drill, and were actually present at the inspection parades of their respective regiments.

3. In the preceeding year 1863, there were only 48,075 enrolled, shewing as the result of improved arrangements, and the accession of the first class of men between sixteen and eighteen, an increase last year of 7,436 enrolled, and of nearly 7,000 actually inspected.

4. At the same time it is not to be supposed that the training in question comprised more than turning the men out without arms or uniform and drilling them generally for five, but in some cases for a less number of days, during which they could of course learn little more than to march imperfectly and practice some ordinary battalion movements. Nevertheless, to accomplish even this much, evidences a satisfactory result of a prodigious amount of previous labor, correspondence, and intricate details, as all familiar with the work necessary to enroll, officer, and actually turn out such a large army, even in detached regiments, must well know. Nor is the efficiency attained slight as may be supposed, for there unquestionably exists amongst the hardy settlers of this Province a very great natural military aptitude. Those who have the best means of judging, including Major-General Doyle, an officer of great experience in militia organization, have declared themselves astonished at the comparative progress effected under such limited opportunities.

5. I have not judged it expedient hitherto to make any distinction of classes for active service or otherwise. It appears to me that, so far as may be practicable, it is better to give every man between sixteen and forty-five years of age a chance of learning something of his duty. Whenever hereafter any draught for active service may be required, the necessary ballot and special enrolment for such purpose can be speedily effected, provided the general organization and enrolment has been thoroughly done and been kept well in hand.

6. The machinery for organizing and carrying out all details of discipline, &c., consists of the Lieut. Governor as Commander-in-Chief; the Adjutant General (Colonel Sinclair); and four Inspecting Field Officers (Colonel Laurie, Lt. Colonels Sawyer, Reade, and Milsom.) There is one sergeant-major, and a sergeant acting as clerk at headquarters. There are also now at the disposal of the head-quarter staff, twenty-seven paid drill instructors. The whole Province is divided into four districts, of which Cape Breton is one, and each district is allotted to one inspecting field officer. Independent of the volunteer companies, to which I shall presently advert, and one or two detached artillery corps, there are one hundred and ten regiments; and therefore each inspecting field officer of a district has at certain seasons a very laborious task in attending the inspection and arranging the drills of nearly thirty regiments on an average, involving a large correspondence and a great amount of fatiguing travel. The nature of those duties will be

better explained by the accompanying map, shewing the extent of the districts and the headquarters of the various regiments.

7. I would here observe that in this Colony the Lieut. Governor is not merely theoretically but actually Commander-in-Chief; no interference with his duties in that capacity is attempted by the Ministry of the day. The consequence is, that a considerable portion of my time is occupied with correspondence and inspections connected with the local forces, and details of the discipline and organization of 56,000 men. No subject of greater importance, perhaps, could engross my attention, especially as till that organization be thoroughly cemented, it is very desirable to exclude any disturbing political element. Hereafter it may be a question, whether the immediate charge of the local forces should not be placed under one of the responsible Ministers, acting under the Lieutenant Governor as Commander-in-Chief. At present, however, such an arrangement seems unsuitable and opposed to the general feeling of the various corps.

8. As an instance of the difficulty which any other arrangement would now be subject to, I may mention that it has been my duty to put an end to the former system whereby mere seniority insured promotion to command of regiments. I have had no hesitation in insisting on the command of a regiment being held only by a person capable of leading the regiment on actual service. You can, however, easily understand how changes of that nature could not be so quietly effected by a political Minister as by the Queen's Representative, acting with an admitted absence of all local bias and party feeling.

9. There still remains many changes of that kind to be effected; for it could not be expected, nor would it be possible in so small a community as this, that a sudden demand for nearly 3000 officers could be satisfactorily met. Nevertheless, the greatest difficulty under that head has been already overcome, and none but qualified candidates are ever promoted. No commission has for a long time been issued till the candidate has previously undergone a satisfactory examination, the written portion of which is filed as a record.

10. Drill sergeants visit all regimental headquarters in turn, and a diary is kept of attendance of officers at drill, whilst the reports of the sergeants are tested by the subsequent visits of the respective staff inspecting field officers. Altogether I feel justified in stating that the greatest difficulties in completing the militia organization have been surmounted, and that the subsequent progress and efficiency of the local forces, where the material is so undeniably good, can only be limited by the amount of funds which the Province may place at my disposal for their future training and equipment.

11. I need scarcely say that this latter subject has occupied my most serious attention. I have corresponded with and consulted the General, the militia staff, and a committee of officers commanding regiments, in reference to the best means of rendering the local forces useful auxiliaries to her Majesty's troops at the least cost to the Province. I do not trouble you with any portion of that voluminous correspondence, as it appears sufficient to communicate the results.

12. There seems to be but one opinion on the part of the General and the military authorities as to the primary importance and utility of aiding the defence of Halifax by supplying a large number of men to serve the guns of position in the citadel and numerous batteries by which the harbor is defended. The General was anxious that at least fifteen hundred men should be available for that purpose. I have therefore converted the five Halifax regiments, at the west side of the harbor, into artillery brigades. These number three thousand two hundred and fifty men; and I think it quite possible to drill two thousand of them effectually, to serve guns in position, and ensure a duty quota of fifteen hundred men, when required.

13. Having obtained permission to drill these men at several of the batteries, where in case of attack they would have to serve, it only remains to provide a sufficient inducement for them to attend drill and learn their duty. This I propose to do by giving uniforms to the men of best character and least likely to change their residence. Some companies in each of those regiments will perhaps have to be drilled as ordinary infantry in the first instance, and can act in support of the others. The whole number would be more than required as mere artillery

and could not be counted on as permanent residents whom it would be advisable as yet to supply with uniforms. These details, however, can be best determined after the experience of the present year.

14. I am in hopes, before many months, that within an hour after a given signal, from 1200 to 1500 gunners will present themselves at the various batteries ready for immediate service,—a large and valuable force, if efficient, and all without expense to the Imperial Government.

15. The harbors of Pictou and Sydney, which often contain from 30,000 to 40,000 tons of shipping at one time, loading with coal and exposed to easy attack, are likewise points requiring attention. I have therefore converted a regiment at Pictou into an artillery brigade, as at Halifax, and shall pursue the same system at Sydney. The service is popular, and before long the largest organized local military force in proportion to its population in any part of the British Empire will be that of Nova Scotia.

16. Hitherto, except to the non-commissioned officers in some of the regiments, and the few volunteer companies still existing, no arms have been distributed. I have been most anxious to train them to the use of arms, and the General naturally lays great stress on their learning the platoon exercise.

17. This year I hope to place 10,000 additional rifles in their hands, allotting a certain number to each regiment, for the preservation of which the colonels give security, being secured in their turn by bonds from the captains of the respective companies to whom those weapons are served out, and who need only issue them to men in whom they have confidence. I have preferred in this way allowing any man of respectable character to win for himself the privilege of carrying a rifle to any plan for arming two or more complete companies of each regiment, as the best men might thereby be excluded. At inspection, it will be easy to throw into companies for a time those who have arms, and to test their efficiency in the platoon exercise.

18. For the care, storage, preservation and repair of all damage occasioned by neglect of those rifles, two shillings sterling per annum is allotted, but this sum is not paid till the arms are inspected and passed. Deductions are then made for necessary repairs, and the balance only is paid over to the colonels.

19. Upwards of 1248 rifles recently returned by disbanded volunteers were lately inspected by a board appointed by the General, and I am much gratified at being able to report that their general condition was pronounced highly satisfactory. I am therefore induced to hope that vigilance and frequent inspection by the drill sergeants and headquarter staff, independent of the direct inducement held out by the bonus of two shillings for the care of each rifle, will enable me to give an equally satisfactory account of the general condition of any further arms issued to the militia.

20. As the practical efficiency of a regiment depends greatly on the character and training of its non-commissioned officers, I have been very anxious to hold out some inducement to the sergeants to qualify themselves; and the liberality of the Legislature has enabled me to offer a small sum of five dollars to those who do so. I have estimated that perhaps eight hundred sergeants may qualify during the present year, and have provided \$4000 in the estimate for that expense.

21. The foregoing remarks apply exclusively to the militia. The volunteer force, however, though not so numerous as formerly, still counts several efficient companies, though out of eighty-one companies no less than sixty have been disbanded since 1862, as not having the small number of thirty-five effectives per company required by law. There still remain twenty-two companies.

22. It would, however, be erroneous to infer from the present condition of the volunteer force, that there is less loyal alacrity on the part of every class to come forward and aid in the general defence of the Colony. On the contrary, it is the very extent to which that aid has been given which by a self-exhausting process has broken up or greatly reduced most of those companies. Thus, by a return before me of the Chebucto Greys rifle company, which never numbered more than ninety-six, officers and men, I find that it has given to the militia since 1862, one major, twenty-eight captains, four adjutants, and ten subalterns, or forty-three officers altogether. Another company, the Scottish Halifax Rifles, which never

numbered eighty, has given to the militia, three field officers, four 1st class adjutants, eighteen captains, and four lieutenants,—in all, twenty-nine officers; whilst the military expenditure of the former since 1861 has amounted to £1126, and of the latter to £1571.

23. These and similar volunteer companies may therefore be regarded as having been valuable and effective training schools for officers, maintained by private funds, and whatever there be really efficient in the militia now is in a great measure derived from that training and spirit which the volunteer organization originally infused into the movement. In recognition of those services, it has been determined to give an allowance of five dollars per man to each effective volunteer in companies consisting of sixty effectives and upwards; and the necessary provision has been made accordingly in the estimates.

24. I will next draw your attention to a new feature in the enclosed report. It gives a brief and plain analysis (pages 7 to 17) of the report of each inspecting field officer on the actual condition of every regiment, and even the capabilities of each commanding officer. This is the first year in which such a report was ever given to the public; but I am convinced that in a matter of such interest it is better for both the inspecting field officers and the regiments themselves, that the actual truth should be told and known. Accordingly, as might be expected from the large number of regiments and their very recent organization, the report of some is anything but complimentary. Public attention, however, is thereby drawn to the circumstance, and in almost all such cases I have reason to think that the result next year will show a decided improvement.

25. It only remains to add that the contemplated addition to the staff, the pay to the sergeants, the grant of uniforms to 2000 men, increased transport, issue of arms, and general expenses attending the attempt to give a real efficiency to so large a body of men as that borne on the rolls of the regiments, involve considerable expenditure far beyond any hitherto contemplated by the Province. I enclose the estimates, which I caused to be prepared, and which I laid before my Council. They show an amount of \$81,578 for the current year, independent of more than \$12000 paid for swords. This, with other expenses for which the permanent militia act provides, will raise the total expenditure of the Colony for this year on its local forces to nearly \$95,000,—a very large sum in proportion to the local revenue, however small it may otherwise appear.

26. As there was some discussion on the advantage of forming camps of instruction, I may add that the Nova Scotians are generally more or less accustomed to a rough camp life, and are most of them familiar with the use of fire-arms in some form or other. I therefore felt that the great expense of camps of instruction might be dispensed with, especially as their benefit could so be extended to comparatively few.

27. I have to express my great satisfaction at the cordial assistance which I have received from my Ministry, by whom the enclosed estimates were immediately adopted and laid before the Legislature, where they were passed with scarcely a dissentient voice. I shall be greatly disappointed, therefore, if, with the aid of a very intelligent and able militia staff at headquarters, I cannot give a satisfactory account of further progress at the end of the year.

I have, &c.,

(Signed)

R. G. MACDONNELL.

The Rt. Hon. EDWARD CARDWELL, M. P.

[MR. CARDWELL to Lieut. Governor Sir R. G. MacDONNELL.]

(COPY.)

No. 16.

Downing Street, 29th April, 1865.

Sir,—

I have the honor to acknowledge the receipt of your despatch No. 69 of the 8th of April.

Her Majesty's Government view with great satisfaction the spirit with which your Government, the community at large, and yourself are taking up the important subject of the defence of Nova Scotia.

I have, &c.,

(Signed)

EDWARD CARDWELL.

Lieutenant Governor,

Sir R. G. MacDONNELL.

CORRESPONDENCE RELATING TO ARMS, CLOTHING, ETC.

[Sir R. G. MacDONNELL to Mr. CARDWELL.]

(COPY.)

*Halifax, Nova Scotia,
15th March, 1865.*

Sir,—

I have lately had under my consideration the most effectual means of rendering aid to her Majesty's troops in defending this Province; and after consultation with the Major General commanding and Col. Francklyn, temporarily in command, the Adjutant General, and Inspecting Staff of Militia, I have, among other things, resolved on obtaining a further issue of ten thousand muskets, and training to arms as many regiments as can conveniently be got to use those muskets.

2. The expenses connected with the transport, cleaning, and stowage of those weapons, together with a proposed expenditure of about two thousand uniforms, and the conversion of five Halifax regiments into artillery brigades, has caused the militia estimates for this year to exceed \$80,000, a sum four times greater than was voted last year.

3. The Ministry, nevertheless, in a truly patriotic spirit, have adopted those estimates, and I think I am thereby placed in a position to appeal to you for aid in a matter of minor consequence, but whereby some saving to the Colony may be effected.

4. I am informed by the General that he is not permitted to issue accoutrements with the muskets except on condition of payment. The General has supplied me with a memorandum, stating that there are 12,500 sets of accoutrements, of a new pattern, which might be made available if authority be given from England, and 3890 sets of old pattern, and 511 sergeants' accoutrements, ditto.

5. A Board, some time since, valued the old accoutrements at 4s. 7d. per set; but they would require on an average nearly one shilling per set to clean and repair them. They have been in store here since 1835, and are probably half a century old.

6. I think, under the circumstances, and as these accoutrements can never be made available for her Majesty's troops, it would be well if the military authorities here can be permitted to issue them to this Government, on condition that the latter be responsible for them. I know of no way in which they can otherwise be made useful to any one.

7. I shall therefore feel much obliged by your bringing the subject before the

War Office, as I scarcely think that so trifling a favor will be refused when the Colony is making so unusual an effort to place its local defences on a respectable footing.

8. It might also be found that, without inconvenience to her Majesty's Government, a further supply of old pattern cross belt accoutrements, say 6000, including 600 for sergeants, can be sent out for use in the Colony on similar conditions, and provided the Province pay the departmental expenses and freight connected therewith. If 10,000 muskets be issued, it is of course necessary that a similar number of accoutrements be provided. It would, however, be obviously preferable to authorize the General Commanding to issue at once as many of the ordinary sets of accoutrements as, with the old ones, may be required to arm the proportion of the local forces which the Province is willing to train at the expense of the local treasury.

9. I would respectfully suggest that an early decision on these questions is desirable, as the season for drill will commence in the spring.

I have, &c.,

(Signed) R. G. MACDONNELL.

The Rt. Hon. EDWARD CARDWELL, M. P.

[MR. CARDWELL to Lieut. Governor Sir R. G. MACDONNELL.]

(COPY.)

No. 19.

*Downing Street,
6th May, 1865.*

Sir,—

I have the honor to acknowledge the receipt of your despatch No. 65 of the 15th of March.

The Secretary of State for War informs me that there is no objection to the issue to the Provincial militia, free of charge, of the accoutrements alluded to in the 4th paragraph of your despatch, and that a further supply of 6000 sets have been ordered to be sent to the Superintendent of Stores at Halifax, to enable him to provide any that may be required up to the number specified by you.

I have, &c.,

(Signed) EDWARD CARDWELL.

Lieutenant Governor,
Sir R. G. MACDONNELL.

[From H. TATUM to Superintendent of Stores, Halifax.]

(COPY.)

*War Office,
27th April, 1865.*

Sir,—

An application having been received from the Lieut.-Governor of Nova Scotia for accoutrements for the use of the militia for that Province, and as it appears that there are at present in your stores 511 sets of sergeants' and 3890 sets of rank and file, old pattern, I am directed by Earl de Gray and Ripon to acquaint you that they may be issued from time to time as required, on the orders of the local authorities, and that an additional supply of 6000 sets of used

1850 pattern accoutrements has been ordered to be sent to you from the Tower, to be issued in the same manner as required.

(Signed) H. TATUM.

The accoutrements are to be issued as a loan, and are to be kept in repair at expense of the Colony.

Halifax, 3rd June, 1865.

Forwarded for the information of his Excellency the Lieut. Governor, and with reference to the demand made for 6000 (new) sets of accoutrements, as it is evident old sets only are to be issued on loan, the Superintendent of Stores has been instructed to issue 3890 sets of rank and file (old pattern) only, and the balance of 2110 sets cannot be issued until receipt of the 6000 sets of 1850 pattern accoutrements have been received from England.

By order.

(Signed) H. MERVYN NUGENT,
Assistant Quartermaster General.

The Private Secretary,
Government House.

[Sir R. G. MACDONNELL to Mr. CARDWELL, M. P.]

(COPY.)

Halifax, Nova Scotia, April 27, 1865.

SIR,—

I have the honor to state that the Legislature of this Province has placed means at my disposal for the immediate supply of 2,000 militia artillery uniforms according to the enclosed description. The price of each uniform ought not to exceed twenty-eight shillings. I have therefore the honor to request that the military authorities be communicated with, in order to ascertain whether the suits can be furnished from Pimlico with as little delay as possible on my present guarantee of payment, in accordance with the War Office letter, dated 16th May, 1864, enclosed in a despatch from Mr. Elliot to Lieutenant Colonel Laurie, dated May 27th, 1864. If so, the clothing should be forwarded through Messrs. McIver & Co., Liverpool, by Royal Mail Steamer to Halifax, and should be addressed to the Adjutant General, Militia Department, Halifax, Nova Scotia.

I am anxious to receive the uniforms in Halifax as early as practicable, as the officers of the local artillery force have been for some time actively engaged in training, and both Imperial and Provincial interests will materially suffer unless the clothing be supplied before midsummer, especially as neither raw materials nor operations to make them up quickly can be obtained in the Province. I am therefore compelled to make this especial application, and I trust that the military clothiers employed will exert themselves to secure as prompt an execution of the order as possible as is compatible with their previous contracts with the home authorities.

I have, &c.,

(Signed) R. G. MACDONNELL.

The Rt. Hon. EDWARD CARDWELL, M. P.

[MR. CARDWELL to Lieut. Governor Sir R. G. MACDONNELL.]

(COPY.)

No. 24,

Downing Street, 23d May, 1865.

Sir,—

With reference to your despatch No. 73 of the 27th April last, I have the honor to acquaint you that the Secretary of State for War has apprized me that the 2000 uniforms for the militia artillery of Nova Scotia will be supplied on the understanding that the cost of these uniforms will be defrayed by the Province.

I have, &c.,

(Signed) EDWARD CARDWELL.

Lieutenant Governor,
Sir R. G. MACDONNELL.

(COPY.)

No. 94.

*Government House, Halifax, N. S.,
 20th July, 1865.*

SIR,—

In reply to your despatch No. 32 of the 30th June, inquiring whether badges are required for the uniforms ordered by this Government in my despatch of the 27th April last, I have the honor to state that badges are required to distinguish the various grades of non-commissioned officers as in her Majesty's army, together with the military initials on each forage cape, N. S. A., Nova Scotia Artillery.

It was not thought necessary to specify the usual badges as being required, and I regret the delay which this inadvertent omission appears to have occasioned, for I did not in the least exaggerate the inconvenience and detriment to the service which any delay in supplying the clothing would occasion.

I hope it will now be sent out as soon as possible and by the Cunard steamer from Liverpool, so as to ensure its more speedy transmission.

I have, &c.,

(Signed)

R. G. MACDONNELL,
 Lieutenant Governor.

The Rt. Hon. EDWARD CARDWELL, M. P.

(COPY.)

Nova Scotia, No. 42.

Downing Street, 21st August, 1865.

SIR,—

With reference to my despatch No. 16 of the 29th April on the subject of the militia and volunteers of Nova Scotia, I have the honor to transmit to you a copy of a letter from the War office, from which you will learn that Earl de Gray is of opinion that promotions up to the rank of captain should, in the absence of any reason to the contrary, be made by seniority, and above that rank by selection.

I have, &c.,

(Signed)

EDWARD CARDWELL.

[Sir E. LUGARD to Mr. ELLIOT.]

(COPY.)

War Office, 11th August, 1865.

Sir,—

I have laid before the Secretary of State for War your letter of the 3rd of May last, forwarding a despatch from the Lieut. Governor of Nova Scotia on the subject of the militia and volunteers in that Province, together with the report of the Adjutant General of Militia for the year 1864.

In reply I am to request that you will inform Mr. Secretary Cardwell that Earl de Grey has perused these papers with much satisfaction.

With respect to observations contained in paragraph 8 of Lieutenant-Governor MacDonnell's despatch relative to the promotion of officers to the command of regiments, I am to state that Earl de Grey is of opinion that it would prevent much future misunderstanding, if it were ruled that promotion up to the rank of captain should (in the absence of any reason to the contrary) be made by seniority, and after that by selection.

I have, &c.,

(Signed)

EDWARD LUGARD.

T. F. ELLIOT, Esq.

[Mr. CARDWELL to Lieut. Governor Sir R. G. MACDONNELL.]

(COPY.)

No. 50.

Downing Street, 14th Sept, 1865.

Sir,—

With reference to your despatch No. 94 of the 20th July, and to the previous correspondence respecting the clothing for the militia artillery of Nova Scotia, I have the honor to transmit to you the enclosed letter from the war office and to request that you will furnish us with an explanation of the wishes of your Government on the points to which this letter alludes.

I have, &c.,

(Signed)

EDWARD CARDWELL.

Lieutenant Governor,
Sir R. G. MACDONNELL.

[Mr. LUGARD to the Under Secretary of State for the Colonies.]

(COPY.)

War Office, 9th Sept., 1865.

Sir,—

With reference to your letter of the 29th July last and previous correspondence, I am directed by the Earl de Grey and Ripon to acquaint you for the information of the Secretary of State for the Colonies, that it is presumed forage caps will be required for the staff and other sergeants of the Nova Scotia artillery and badges for the corporals' caps in addition to the privates' forage caps already supplied for that corps; and if such be the case to request a size roll may be obtained for such numbers as may be required, and that the number of corporals' forage cap badges may also be ascertained for the information of this department.

I have, &c.

(Signed)

EDWARD LUGARD.

The Under Secretary of State for the Colonies.

APPENDIX No. 13.

EDUCATIONAL REPORT.

To His Excellency Sir WILLIAM FENWICK WILLIAMS, of Kars, Baronet, Lieutenant-General in Her Majesty's Army, Knight, Commander of the Most Honorable Order of the Bath; Grand Officer Legion d'honneur, &c., &c., &c.; Lieutenant Governor and Commander-in-Chief, in and over Her Majesty's Province of Nova Scotia and its Dependencies, &c., &c., &c.

MAY IT PLEASE YOUR EXCELLENCY,—

I have the honor to present, for the information of both branches of the Legislature, my Annual Report of the Common, Superior, Academic, Normal, and Model Schools in Nova Scotia.

PART I.—GENERAL REPORT.

I. TABLE A.—*Sections, Schools, Time in Session, and Teachers employed.*

1. The number of school sections in the Province was 1421.
2. The number of schools in operation during the first, or winter term, was 763; during the second, or summer term, 989,—increase, 226.
3. The average number of weeks (exclusive of vacations, as far as known) the schools were in session, the first term was 20½; the second term 21½,—increase, ½ of a week. The average for the year was 41½ weeks.
4. The whole number of teachers employed the first term was 801; the second term, 1031,—increase, 230. The number of male teachers employed the first term was 527; the second term, 512,—decrease, 15. The number of female teachers employed the first term was 274; the second term, 519,—increase, 245.
5. The classification of the male teachers employed the first term was, 1st class, 126; 2nd class, 145; 3rd class, 194; unclassified, 62. The second term, 1st class, 157; 2nd class, 167; 3rd class, 160; unclassified, 28,—increase, 1st class, 31; 2nd class, 22; decrease, 3rd class, 34; unclassified, 34.
The classification of the female teachers employed the first term was, 1st class, 70; 2nd class, 85; 3rd class, 86; unclassified, 33. The second term, 1st class, 119; 2nd class, 169; 3rd class, 179; unclassified, 54,—increase, 1st class, 49; 2nd class, 84; 3rd class, 93; unclassified, 21.

REMARKS UPON THE STATISTICS CONTAINED IN TABLE A.

1. *School Sections.*—The number given is that reported in May last. Since that time a few changes have been made by the Commissioners, which have not yet been fully reported. There should be sufficient checks against the undue multiplication of sections. To support efficient schools there is needed a considerable area from which to draw pupils and support. The admirable provisions of the law for the classification of pupils and schools are already telling powerfully in favor of retaining sections of good size, thus increasing two-fold the efficiency of school instruction, and lessening very perceptibly the expenses connected with education.

2. *The Number of Schools in Operation.*—It will be observed that the number of schools reported for the second term is not much over two-thirds the number of sections in the Province. The introduction of a radical change in the entire educational system; the popular misapprehensions concerning the provisions of the law; the frequent failure of the best-intentioned to transact the necessary business legally; the hostility of others to taxation, in the form prescribed, as a mode of support; and the hesitancy of others to organize schools, occasioned by a general expectation that important changes would be made in the law; all combined to unsettle the public mind and retard the organization of schools. It must also be borne in mind that a large number of those sections reported as not having schools in operation, was duly organized and engaged in erecting or thoroughly repairing school-houses. The revision of the school sections necessarily resulted in constituting many new ones which had no school-houses, and in enlarging many which had. To secure school accommodation, therefore, became the first duty of a very large number of sections, and especially so, that the schools were to be free to all. It may, therefore, be considered certain that, if the law be so perfected as to become self-consistent, every section will very shortly have a school in operation. The increase in the number of schools during the second term indicates a good degree of progress.

3. *The Average Length of Time the Schools were in Session.*—The average, shown by the table, is, under the circumstances, most encouraging. Forty-eight weeks must be considered the ultimate in the most favored countries, four weeks at least being devoted to vacations during the year. That the schools in Nova Scotia were in session during the excitements and irregularities of the past year, 41½ weeks on the average, is indicative of zeal and earnestness in the cause of education.

4. *The Number and Class of Teachers Employed.*—The excess of the number of teachers employed over that of the schools in operation is accounted for by the fact that many sections employed assistant teachers in the conduct of their schools. This excess may be expected to increase under the operation of the provisions of the law, which require the grading of the schools.

Of the number of teachers engaged, the very large proportion of first and second classes cannot escape observation. The classification of the teachers is uniform throughout the Province, and the standard prescribed is not inferior in its requirements to that in operation in any part of British America. The various Boards of District Examiners have licensed about 1200 teachers since October, 1864. The number licensed by the Provincial Examiners may be seen in Appendix B. If the mode of support shall be established by the Legislature upon a firm basis, teachers will not be wanting; but if voluntary subscription shall be continued, it will be impossible to induce young men and young women of talent and skill to continue in the profession. The effect of denying to each section the right to assess itself was very apparent this autumn in deterring even licensed teachers from continuing at their work, while many who were qualifying themselves for the April examinations have abandoned the intentions they had formed.

II. TABLE B.—*Pupils Attending School. Percentage of Daily Attendance. Pupils Receiving Instruction in the Various Branches.*

1. The whole number of children at school the first term, was 35,151; the second term, 43,771,—increase, 8,620.

The number of pupils under five years of age the first term was 500; the second term, 1,225,—increase, 725. The number of pupils between 5 and 15 years of age the first term was, 27,241; the second term, 38,562,—increase 11,321. The number of pupils over 15 years the first term was 7,410; the second term, 3,984,—decrease, 3,426.

There was an increase the second term in twenty-nine districts, of 9,648; and a decrease in five, of 1,028,—nett increase, 8620.

2. The gross percentage of daily attendance of pupils registered was, the first term, 62.63; the second term, 58.41,—decrease, 5.22.

3. The number of pupils receiving instruction in Reading the first term was, 28,544; the second term, 35,423,—increase, 7,879. The number of pupils instructed in Writing the first term was, 24,648; the second term, 25,716,—increase, 1,068. The number of pupils instructed in Arithmetic the first term was, 21,728; the second term, 24,641,—increase, 2,913. The number of pupils instructed in English Grammar the first term was, 11,566; the second term, 13,368,—increase, 1,802. The number of pupils instructed in Geography the first term, was 11,428; the second term, 14,123,—increase, 2,695. The number of pupils instructed in History the first term was, 3,474; the second term, 3,699,—increase, 225. The number of pupils instructed in Algebra and advanced Mathematics the first term was, 1,394; the second term, 1,091,—decrease, 393. The number instructed in Navigation and Surveying the first term was, 288; the second term, 124,—decrease, 164. The number instructed in Classics the first term was, 593; the second term, 507,—decrease, 86. The number instructed in Modern Languages the first term was, 587; the second term, 757,—increase, 170. The number instructed in Agricultural Chemistry the first term was, 239; the second term, 236,—decrease, 3. The number instructed in Natural Philosophy the first term was, 697; the second term, 904,—increase, 307. The number of schools not reporting the above facts the first term was, 82; the second term, 77,—decrease, 5.

REMARKS UPON THE STATISTICS CONTAINED IN TABLE B.

1. *The Number of Children at School.*—Although the number of schools in operation was considerably less than during the previous year, yet the number of children attending school was greater. The number during the second term exceeded that ever before in attendance at school in Nova Scotia. That such results have been already achieved points out most clearly the path of duty for the future. Let every hindrance be removed to the universal establishment of Free Schools, and Nova Scotia will speedily enter upon a career of educational progress which shall outrun the predictions of the most ardent advocates of public education. All that is required to wipe out the stain which has so long rested upon the otherwise fair name of our Province, is to amend, without delay, the defects which experience has proved adhere to the present law, by establishing the system of free public education upon such a basis as shall carry its blessings into every section in the land.

2. *The Daily Attendance of Pupils.*—The decrease in the gross percentage of daily attendance, during the second term, resulted from the fact that of the pupils enrolled in the summer, many were very young. This natural source of irregularity was aided, also, during the past summer, by the unusual prevalence in some districts of epidemics. I invite a special inspection of these columns of the Table. The district of Richmond reached the highest percentage, both the first and second term, it being respectively 72.98 and 73.70. The district of North Queens presents the lowest for the first term, and Antigonish for the second. The gross percentage for all the districts is very encouraging. When the stimulus of the apportionment of the county assessment shall have been generally felt, it will undoubtedly tend to increase perceptibly the regularity of attendance. I am aware of certain schools now in operation, in which, under the influence of this and other incitements, the daily average attendance is but a fraction below the number enrolled. Some friends of education have expressed fears lest the freedom of school privileges should tend to increase the irregularity of attendance. There is danger of this; but if the mode of distributing the general funds provided for the support of schools is founded on a proper basis, it will increase the average daily attendance beyond what is possible under any other system short of compulsion. To disburse general funds to sections, without regard to the number of children actually receiving instruction, would undoubtedly have a direct tendency to render inefficient every school

in the land; but the provisions of the law are such as to check materially such a distribution, though there are some amendments immediately needed to guard effectually this very point.

I am unable to compare the percentage of the enrolled pupils in daily attendance with that of former years, because no proper system of registration prevailed in the schools of Nova Scotia previous to last year. I find, however, that it exceeded that reached in 1864 in New Brunswick by 11.63 the first term, and by 6.58 the second term. If the regularity of attendance is dependent upon the existence of school fees, then ought New Brunswick to show an advance on Nova Scotia. But the reverse is the case; and the gap will be found to widen year by year, if the educational policy of one Province establishes, upon a proper basis, free schools, and the other continues to support schools by fees.

3. *The Number of Pupils instructed in the various Branches.*—It is unnecessary to offer any extended remarks upon this exhibit of the Table. The cause of the increase and decrease in the numbers engaged in the different branches during the two terms, will readily occur to all. There is much room for improvement in respect of the higher branches. This will be speedily effected by the classification of the pupils and the grading of the schools, for which the present law admirably provides. The numbers reported as engaged in the study of Geography, as compared with those studying Grammar, are too small. Children can be instructed in the former much earlier, and with greater profit, than in the latter,—though the truth of this remark depends somewhat upon the *mode* of instruction employed. Oral lessons in Grammar can be made entertaining and instructive to very young children, while lessons from a text-book would be worse than useless. But Geography furnishes ready to hand an exhaustless resource for the development of young minds, and by which a thirst for higher and more abstract knowledge can be created. It should, therefore, appear as one of the chief instrumentalities employed in our schools whereby intellectual growth is stimulated and the love of learning begotten. Oral lessons, by qualified teachers, would render this branch of study the delight of the schools. History, also, should occupy a more prominent place in our schools. It is gratifying to know that this branch, which, one year ago, was almost entirely discarded, is beginning to be introduced. The text-books which have been prescribed will do much to enable teachers to bring the facts of History, especially those connected with British America and Great Britain, within reach of their pupils.

Before the study of Agricultural Chemistry, Surveying, Navigation, and Natural Philosophy can become general in the schools, there is needed considerable apparatus. These are branches of the utmost importance to us as a people, and I trust that the recommendations which I shall submit in this report, for enabling the people to secure apparatus at a cheap rate, will be cheerfully seconded by the Legislature. The schools in operation were never before characterized by so much life and earnestness as during the past year. The efficiency of the schools has increased beyond expectation, and the desire to supply all that is needed in the way of equipment, has been almost everywhere manifest.

III. TABLE C.—*Schools Competing for the Superior School Grant, Successful Competitors, &c.*

1. Schools in 17 Counties competed each term.
2. The number of sections which gave the required notice was, the first term, 56; the second term, 69,—increase, 13.
3. The number of successful schools was, the first term, 43; the second term, 57,—increase, 14.
4. The number of schools competing, supported by subscription, was, the first term, 19; the second term, 17,—decrease, 2. The number supported by assessment was, the first term, 37; the second term, 52,—increase, 15.
5. The number of teachers engaged in sections competing was, the first term,

82; the second term, 102,—increase, 20. Further details will be found by reference to the Table.

REMARKS UPON THE STATISTICS CONTAINED IN TABLE C.

1. No schools in the county of Lunenburg competed for the Superior School grant in either term of the year. I find that the grant formerly given to Grammar Schools was frequently undrawn by this county. The town of Lunenburg was not entitled to compete, it being in receipt of the Academy grant. Bridgewater, Mahone Bay, Petite Rivière, and Chester, are each in possession of ample population and resources to enable them to enter upon a successful competition. It is much to be regretted that the people of these sections did not put forth efforts to establish schools of such a character as would have secured to each a portion of this grant. The grant of \$400 remaining undrawn, I placed it at the disposal of the Commissioners, to be distributed to aid poor sections in providing school-houses. It is gratifying to report that during the present term Chester is competing, that section having a graded school, with three departments, in efficient operation.

2. The large proportion of the schools competing which were supported by assessment is worthy of notice, as shewing the vantage ground occupied by the Trustees of such schools.

3. The sum of \$400 was appropriated by the Act to each county, to be divided by the Council of Public Instruction among not more than four schools each term. It was further provided that this sum might be augmented by a portion of the grants to County Academies, in the event of any such grant remaining undrawn. The conditions fixed by the Council for the distribution of the Superior School grant required excellence in respect of buildings, furniture, apparatus, organization, management, discipline, and teaching; and none but holders of first-class licenses were allowed to compete. In a very few cases, where the number of competitors was less than four, I have recommended the suspension of one or other of the regulations respecting the buildings, furniture, or apparatus; but only when it appeared that the Trustees had exerted themselves to the best of their ability in order to as complete a compliance as possible with the published regulations of the Council. The existence of this grant to Superior Schools in connection with the requirements necessary to its reception, has awakened much emulation among both pupils and teachers, and has done more in one year to improve the schools of the Province than the grant previously given to Grammar Schools did in five years. It has encouraged the grading of the schools, stimulated teachers to much zeal and activity, and infused into pupils the desire to excel in their studies. Under its influence, houses have been improved, and furniture and apparatus purchased. I believe no similar amount of public money has, thus far, been productive of equal benefit to the cause of education. The special reports of the Inspectors upon the Superior Schools are educational documents of much value; but their number and length will not allow me to include them in this report.

IV. TABLE D.—*County Academies, Number of Teachers and Pupils, Number of Pupils in the Various Branches.*

1. The number of County Academies in operation the first term was, 3; the second term, 4,—increase, 1. The number of Teachers employed the first term was, 19; the second term, 15; decrease, 4. The number of pupils in attendance on the several departments was, the first term, 1,002; the second term, 829,—decrease, 173. Full details concerning the branches taught, and the number of pupils studying each branch, will be found on reference to the table itself.

REMARKS CONCERNING THE COUNTY ACADEMIES.

1. The Legislature last winter voted a yearly grant of \$1000 to the Yarmouth Academy. The receipt of this grant commenced in May last; consequently this

Academy does not appear in the list of County Academies for the second half year. The decrease reported in the number of teachers employed and pupils in attendance is due to the omission of this institution from the list. Sydney and Digby had each made such preparations as to receive the Academic grant for the second term.

2. The expenditure of considerable time and means is required in order to enable any town to provide suitable buildings and teachers, and carry out a proper system of academic organization. The offer of the academic grants was restricted to the shire towns of the several counties embraced in the schedule, until the first of May last, and afterwards extended till the time fixed for the annual school meeting. Every town was informed that if it should not accept of this offer and act upon it by the expiration of this period, the grant would be offered to such other town or section in the county, and upon such conditions as the Council of Public Instruction might direct. As will be seen by the Table, Arichat, Lunenburg, and Yarmouth accepted of the offer, and, having made arrangements for carrying out the school organization required, at once entered upon the enjoyment of the grant. Digby and Sydney had so far completed their arrangements as to enter upon the receipt of the grant in May. Shelburne decided at a school meeting authorized to be held in May, to erect forthwith a suitable building. This decision was carried into immediate execution, and the new building, furnished with imported desks, was opened early this year. At the last annual meeting, Annapolis, Cumberland, and Guysborough voted to undertake at once the requisite grading of their schools, and provided means for procuring suitable buildings.

Under the conditions prescribed by the Council, Baddeck was virtually excluded from the grant, as intimated in my report of last year. Having learned the destitution of Victoria County in respect of well-qualified teachers, and that the inhabitants of Baddeck were desirous of establishing excellent graded schools, I represented to the Council the desirability of modifying the conditions concerning the number of pupils required, in order to allow the establishment of an Academy in the shire town. The necessary modifications were directed; and at the meeting in October last, the town resolved to establish and support an Academy in accordance therewith. Special privileges are to be accorded those desirous of qualifying themselves to teach. I cannot but regard this laudable effort on the part of the people of Baddeck as one fraught with benefit to the cause of education throughout the entire county.

Port Hood is not in a position to undertake the efficient maintenance of a County Academy; but it has exhibited much interest in the establishment of a graded Superior School. If such a school be well equipped and vigorously sustained, it will do much to stimulate an efficient organization of schools in many sections of the county.

At the annual school meeting of last year, the town of Liverpool voted to accept of the offer of the grant on the conditions specified in the regulations of the Council, and funds were voted for the purpose of erecting a suitable building. The attempt to collect these funds was the occasion of arousing much hostility to the projected Academy. Little or nothing was done towards providing a building. The trustees and people were informed that the time specified by the Council would be extended to October last, in order that the requisite steps might then be taken to insure the establishment in the town of the County Academy. The annual meeting, however, refused to appoint trustees, and was entirely inimical to providing such school accommodation as the wants of the town require. The town of Milton immediately applied for the grant, undertaking to establish and support an efficient County Academy. The application was granted.

3. It will be seen from the foregoing statements that each county, except Inverness, entitled to a County Academy, will soon be in possession of an institution of a high character, the High School department of which will be open, free of charge, to the residents of each. When these Academies shall be fully equipped, their existence will tell powerfully in favor of an advanced education, and awaken a continually increasing interest in the acquisition of the higher branches of learning. Such a result will fill the colleges and higher seminaries of Nova

Scotia with students who have been trained in knowledge from their youth up. Let efficient Common, Superior, and Academic Schools be established throughout the Province, free to all, rich or poor, and the number of those from among whom our colleges are supplied will be increased twenty-fold.

V. TABLE E AND APPENDIX A.—*Provincial Normal and Model Schools—Number of Pupils, Expenditure, &c.*

The Provincial Normal School was in operation, during the past year, from November till the last of March; and from May till the last of September. In the winter term there were 81 pupil teachers enrolled, 45 of whom, after undergoing three days' examination by the Provincial Examiners, received licenses. In the summer term there were 42 enrolled, and 26 licensed. The summer term has seldom exhibited so large an attendance as the winter; while last season the demand for teachers having increased in May, many who desired to attend at Truro were persuaded to engage in teaching.

I beg to refer to the reports of the Principal, given in Appendix A, for the details of each term. There were, however, several matters of much interest connected with the present and future efficiency of this establishment, which are not referred to by the Principal. The Normal School building, in accordance with the recommendations contained in my report of last year, has been considerably enlarged. There are now three excellent school rooms for the use of the teachers and students. Desks, also, have been imported to furnish additional sittings; and a superior theodolite has been added to the apparatus. Both the Normal and Model buildings have been painted; the outbuildings have been repaired; and the well deepened. One-half the sum appropriated by the Legislature for the salary of an English and Classical teacher remaining undrawn, the Council of Public Instruction directed that \$170 of this amount be applied for the purchase of new desks, and that the balance (\$230) be appropriated towards procuring a professional library for the use of the pupil teachers attending the institution. On the first of November, J. B. Calkin, Esq., Inspector for the County of Kings, resigned his inspectorship, and was appointed teacher of English and Classics in the Normal School.

It will appear from the above that considerable pains have been taken to render the Normal School increasingly efficient in its important work. The addition of Mr. Calkin to the staff of teachers, possessing, as he does, a varied and extensive experience of our schools, must materially aid the Principal and his associate in their manifold labors, and be largely conducive to the successful management of the institution.

Never before were well qualified teachers so much sought after in the conduct of our schools, and never before was there so great an appreciation of professional training and skill. I beg to refer to the explicit statements on this point contained in the Inspectors' reports appended to this document, especially to those of Rev. P. J. Filleul, Rev. D. M. Welton, H. C. Upham, and James McDonnell, Esqrs. The exhibit of the Superior Schools also furnishes a striking commentary on the same point. There cannot longer remain any doubt on the public mind as to the great utility of providing means to secure a professional education for those who are to be the teachers of the children of Nova Scotia. If, as a rule, trained teachers have demonstrated their superiority over those who have received no special training for their work, it is unquestionably the dictate of true wisdom not only to provide means whereby this education may be obtained, but efficient means, that nothing be wanting in order to secure a very large and thoroughly qualified corps of teachers.

The present session of the school is attended by a large number of pupil teachers, many of whom will be prepared next spring to engage publicly in their work.

VI. TABLE F.—*Number of Academies (other than County Academies) and Colleges.—Number of Teachers, Professors, and Students.—Indigent Schools.—Provincial Grants.*

This table exhibits such facts as I have been able to gather from the returns forwarded in time for this report. The governing bodies of some of these institutions receiving aid from the Province, were not aware of the nature of the resolution passed by the Legislature at its last session, requiring returns to be made by the first of December. The higher seminaries of learning have, during the past year, been characterized by increased efficiency and energy in the prosecution of the work of instruction, I regret to record the entire destruction by fire of the Mount Allison Male Academy in January of the present year. Energetic measures are being taken for the immediate erection of another building; and, arguing from the liberality and energy displayed in the past by the denomination under whose supervision this Academy has been conducted, there can be no doubt that the measures employed will be entirely successful.

Respecting the indigent schools to which aid has heretofore been granted by the Legislature, I think it a very doubtful policy, now that means have been provided for a system of free education, to encourage such schools by special grants. Every section ought to call into exercise the ordinary means for securing school privileges for all its children. "Ragged Schools" are no part of a system of free public education.

VII. TABLE G.—*Provincial Grants to Common Schools.—Manner of Appropriation.—Support from the People for Salaries of Teachers.*

1. The total grant placed at the disposal of the 34 Boards of Commissioners for Common Schools, during the year was, \$67,085.05, viz.: for the first term, \$33,390.56; for the second term, \$33,671.49,—increase, \$274.93.

2. The bonus to schools supported by assessment was, the first term, \$2,606.56; the second term, \$2,781.49,—increase, \$174.93.

3. Aid to poor sections, for houses, &c., amounted, the first term, to \$5,117.15; the second term, to \$1,764.55,—decrease, \$3,352.60.

4. Appropriated towards travelling expenses of teachers to Normal School, the first term, \$340.30; the second term, \$168.93,—decrease, \$171.37.

Further details will be found by reference to the Table.

REMARKS UPON THE STATISTICS CONTAINED IN TABLE G.

1. The total grant for Common Schools, apportioned to the 34 Boards of Commissioners by Schedule B of the Act of 1864, was \$58,880. The Act further provided for the payment of a bonus of 25 per cent. on the sum received by any section, if the school was supported by assessment; and in addition, the Superintendent was instructed by the Act to increase the grant to any county for Common and Superior Schools, by adding to the grant for each one-half the amount provided for a County Academy, in the event of the latter sum remaining unappropriated. This last provision increased the grant for common schools to the following counties:—The first term, Cape Breton, \$150; Victoria, \$150; Inverness, \$150; Guysborough, \$150; Cumberland, \$150; Annapolis, \$150; Digby, \$150; Shelburne, \$150; Queens, \$150. The second term, Victoria, \$150; Inverness, \$150; Guysborough, \$150; Cumberland, \$150; Annapolis, \$150; Shelburne, \$150; Queens, \$150. Each of these counties received an increase, also, of \$300 during the year to its regular grant for Superior Schools.

Under the provisions of the Act which came into operation last October, the undrawn Superior School grant to the county of Lunenburg was placed at the disposal of its Boards of Commissioners, to assist poor sections in providing comfortable school-houses. The sum of \$200 for Inverness, and \$300 for Victoria, (as yet undrawn) remain to be appropriated in May next.

The following, therefore, are the amounts drawn by the Commissioners for

Common Schools:—Grant under schedule B, \$58,880; bonus, \$5,388.05; increase from the undrawn Academy grant, \$2,400; Superior School grant to Lunenburg, \$400. Total, \$67,068.05.

2. The present Act provides that the Superintendent shall draw from the treasury a sum sufficient to pay five cents a mile towards the travelling expenses of those entering the Normal School in the mode prescribed by the Council of Public Instruction. The Boards of Commissioners will not, therefore, be required in future to meet this expenditure from the regular grant.

3. I am unable to report the amounts expended by the people for school-houses, and other expenses beyond that incurred for salaries. Even this is not complete, since in several districts the returns were imperfect in this particular. I have, however, taken steps by which I hope to gather a complete exhibit of the total expenditures of the people for educational purposes. Such statistics would be of great interest and value.

VIII. *Statistics concerning Apparatus, Maps, New School-houses, &c.*

1. In the schools in operation during the summer term there were reported 143 hand bells, 124 clocks, 141 ball frames, 1,086 blackboards, 1,394 good wall maps, 131 globes, 215 dictionaries, and 15 gazetteers, besides various other pieces of apparatus. A comparison of these figures with those given in Table C of last year's report, shows a very gratifying increase in every instance except in the case of maps. The apparent decrease in the number of maps is owing to the fact that the figures given above include only *wall* maps in good condition, while those of last year included maps of all sorts, paper and canvas, whether in good condition or otherwise. There is still, however, great room for improvement in respect of apparatus, and I am of opinion that such arrangements should be made for its supply as will enable all the schools to secure such articles as are necessary.

Arrangements for School Libraries not having been completed, the Council of Public Instruction authorized the purchase of maps, diagrams, and globes from this fund; and trustees were offered these articles for their schools at half the cost. I supplied on these terms during the year 1,112 wall maps, 4,028 diagrams for oral lessons, and 31 globes. A large number of orders for globes are waiting to be filled, as the supply ordered early in the summer has not yet arrived.

2. There were built during the past year 164 new school-houses; erected and in process of completion, 136; voted to be built at the last annual meetings, 220. Total number of new school-houses undertaken in one year, 520. The number of old houses repaired was 241. These figures include 17 counties only, Queens not having yet reported. The city of Halifax also is not included.

I do not know in what country a parallel can be found to these efforts to provide school accommodation. They speak loudly in favor of free schools, and indicate clearly the necessity of imposing upon all their support. In a short time these heavy expenditures for school-houses will be over, and the support of the schools will not be felt as a burden. Never in the history of education in Nova Scotia was such an immense stride taken in one year, nor in twenty years. It marks the beginning of an era in our history; and when petty jealousies and animosities shall have subsided, the people generally will regard it as the beginning of an era of educational progress unparalleled in our annals. The large number of houses voted at the last annual meeting to be built shows that the principle of assessment is becoming more generally acted upon as it is better understood.

The city of Halifax was excepted from the mode of support prescribed in the law, until November last. The absence of suitable school-houses is felt as a serious hindrance to completeness of school operations. A plan for the systematic organization of the schools of the city was submitted in January to the Board of Commissioners, and it is hoped that immediate steps will be taken to carry it into operation. The outline of the plan will be found in Appendix C.

IX. *School Books.—Probable Number of Schools in Operation in 1866.*

1. The annual grant for school books was apportioned in May last, and the allotment to each district sent forward as early as possible. The grant being insufficient for many districts, that for 1866 was apportioned this autumn, and the books despatched before winter set in. I am of opinion that a considerable improvement could be effected in respect of furnishing these books. The present mode is unsatisfactory, and I solicit the attention of the Legislature to the remedy proposed in another part of this report.

The books prescribed by the Council of Public Instruction for use in the schools are being generally introduced. There exists, nevertheless, far too great a variety of text-books in some of the schools. Until uniformity of text-books prevails, great inconvenience must result to teachers, and repeated expenditures to parents. No less than eight different text-books on arithmetic, eight on general geography, ten series of reading books, and a great variety of writing books, were reported as in use in the schools,—in many instances one school using three or four distinct text-books on the same subject. It is needless for me to point out that such a condition of affairs must seriously impede the course of instruction, and embarrass the teacher in any effort to effect a systematic classification of his pupils.

During the year the Nova Scotia Series of Readers has been published, and the first six books of Mr. Staples' system of penmanship are about ready for sale. A digest of Morell's English Analysis, and an Arithmetical Table book, have also been placed within reach of the schools; and an elementary arithmetic, general geography, outlines of English history, and other books for our schools are being prepared. Arrangements have been made for the issue, in the best style, of a school map of the British possessions in North America. The map will be published in two parts, each 5 ft. x 5 ft., which, hung side by side, will present a continuous view of the territory embraced. A suitable school map of North America is also in contemplation. It is time that Nova Scotians displayed an interest in the nature of the instructions imparted in the school room. Our schools have too long been allowed the unlimited study of foreign text-books and authorities. Our children should not only be taught arithmetic, but the manifold applications of it as practised in the British Provinces; our reading books should contain sentiments calculated to cultivate a spirit of true loyalty to our beloved Sovereign, instead of the reverse; and our geographies should impart especial knowledge concerning the British Provinces, and the Empire of which they form a part. Obvious as these statements must appear, they can never be carried into practice until suitable text-books are provided; and not then in all cases, without the exercise of the most careful supervision. Some teachers still persist in using arithmetics which contain no illustrations of British American currencies, tables, &c., although the Arithmetic prepared by Mr. Mulholland, and prescribed by the Council of Public Instruction, is, for Nova Scotians, superior to any other in use. Should these serious irregularities continue to destroy the efficiency of the schools, I shall deem it expedient to request from the Council the exercise of their authority in this matter.

The demand for the Nova Scotia Readers has exceeded the ability of the publishers to supply. I am informed that the sale of school books last autumn was more than three times in excess of any former year.

2. From information in my possession, I estimate that the number of schools in operation during the year 1866 will not be less than 1000. If this estimate prove correct, the increase over last year will show a more general awakening of the people to the importance of education, and to the exercise of such means as will insure its universality.

X. *The Mode of Support, and Recommendations for certain Amendments therein.*

The law requires that I should not only present a report of the condition of education during the year, but also offer such suggestions in connection with the whole subject as I may judge best adapted to secure completeness in our educational machinery.

It is believed that the present law is, in many respects, a great advance upon that of 1864; yet it is by no means perfect. The result of its imperfection is, that there is inconstancy in its operation. The basis for an enduring structure of free education is scarcely broad enough; and hence, the people in many portions of the Province, instead of building upon it, are occupied in warm debates concerning its defects, and in proposing some more complete and efficient mode whereby a system of free schools may be supported.

In some counties there appears to be a strong desire to raise the whole amount required for the support of education by increasing the tariff. There can be little doubt that the country would, to a large extent, acquiesce, for the present, in such a provision; but I am fully persuaded it would soon be abandoned, if for no other reason, on account of its inefficiency. To say nothing of the inequalities of this mode, nor of the embarrassment that would thus be brought upon the revenue of the country, it would be extremely difficult, if not utterly impossible, to deal satisfactorily with some of the most important questions touching the prosperity and growth of a system of public schools. The amount of salary provided for teachers could not be liberal; it would necessarily be very moderate indeed. As a consequence, the office of teacher would soon be filled by inferior talent. In the same grade of teachers there will always exist marked differences of ability and skill; but the law could not, with any hope of justice, reward the most deserving according to their worth. The people of any section might desire earnestly the services of particular teachers who would be unwilling to labor for the moderate amount given by the Province. There would, therefore, need to be some provision in the law by which the people might be empowered to raise locally such additional amounts as they needed,—the very provision which this plan of government schools is intended to supersede.

But there are graver objections to this mode. No one would desire to see the education of the country prostrated at a blow, yet a system deriving its sole or chief support from the public revenue would be constantly exposed to this danger. A sharp commercial crisis, to which all countries are liable, would in a single year so blight every school in the land, that many years would not suffice for recovery. Were assessment, however, the basis of the system, a universal prostration of one of the noblest institutions of the Province could never occur. In proof of this I need but instance the Northern States of the adjoining Republic, which, during a four years' civil war unparalleled for the lavishness of governmental expenditure, preserved in wonted efficiency their systems of public schools, and in many instances, even surpassed the liberality of former years.

Were the schools of the Province, moreover, supported wholly or chiefly from the public revenue, the education of the country would not, I am confident, exhibit true and lasting progress. The system would be found to disappoint the hopes of its promoters, who suppose that money will secure an efficient system of public schools. There could not be a more fatal mistake. Money alone will not create schools and keep them in vigorous operation. There is wanted an awakening of a universal interest in the education of all, and an abiding conviction of the value and importance of education to society at large; and the securing of a portion of the money needed for the maintenance of schools should tend directly to the creation of this essential condition of educational efficiency. Any system of education that fails to enlist the direct interest of the people, and to make that interest the pivot of local operations, is not adapted to secure permanent progress, and is foreign to the genius of our institutions. Unless the paramount claims of this subject are permitted to rest, to a good degree, directly upon the inhabitants of the several sections, so that a vital connection shall be established between the school system and the people themselves, education will never occupy throughout the Province the commanding position to which it is entitled. If the activities of the people are called forth by the feeling of direct responsibility, they will devise far more liberally than it is possible for any wholly governmental system to do. The inhabitants of each section will regard their school as the offspring of their own exertions; every one will feel that he has a voice and interest in the matter; the schools will be the People's Schools, not Provincial Schools, and will grow with

the growth and strengthen with the strength of each individual community. If, however, instead of a system, the basis of which was assessment,—the direct tendency of which is to infold the interests of all and to unfold the estimate of the value of education entertained by a majority of the people,—a system supported wholly or chiefly from the public revenue were in operation, it would be found almost impossible to create a sound public sentiment which carried with it the acknowledgment of individual responsibility,—the indispensable condition for the maintenance of efficient public schools. Individual interest would dwindle and decay, and public interest would sink to indifference. Better by far that there should be sharp debates and differences of opinion in communities (if certainty of school operations be guaranteed), than that lethargy and supineness should characterize the people. If the system introduced be a sound one, unreasonable opposition will subside, while universal interest will be enlarged and deepened by the temporary struggle.

But a system of schools supported from the revenue would not only be fraught with the destruction of individual responsibility and interest, it would not contain a single element adapted to promote the growth of our infant system of schools. The nourishment or support of to-day would be starvation a few years hence, for public interest not being awakened and fostered by such a system of support, no sentiment sufficiently powerful would be brought to bear upon the question in order that governmental provisions might keep pace with the ever-increasing wants of the Province.

In view of this subject it would, moreover, be the part of folly to ignore the lessons of experience and history. I may be permitted to refer to the views entertained by the Legislature of Massachusetts on the consideration of this question. As early as January, 1828, the Committee of Education declared, "That means should be devised for the establishment of a fund having in view not the *support*, but the *encouragement* of the common schools."

In February of the same year, the same Committee said, "The establishment of a fund should look to the distribution annually, to all the towns, of such a sum for the benefit of the schools as shall simply operate as an encouragement to proportionate efforts on the part of the towns. *A fund which should be so large as to suffice for the support of the whole school establishment of the State, as is the case in Connecticut, would, in the opinion of the Committee, be rather detrimental than advantageous; it would only serve to draw off from the mass of the community that animating interest which will ever be found indispensable where a resolute feeling upon the subject is wished for or expected.* Such a result is, in every sense, to be deprecated, and whatever may tend to it even remotely should be anxiously avoided."

In 1832 the subject was again before the Legislature of Massachusetts. The report of the Committee set forth even more strongly the same views as in 1828. "The dangers of a large fund were presented, and the example of Connecticut, and some States of the West, *where school funds had diminished rather than increased the public interest in education, was tendered as a warning against a too liberal appropriation of public money.*" On the other hand, it was "claimed that the establishment of a fund which should encourage efforts rather than supply all wants, and, without sustaining the schools, give aid to the people in proportion to their own contributions, was a measure indispensable to the cause of education." [Ex.-Gov. Boutwell.]

These views finally became law, and the history of Education in Massachusetts has since amply illustrated their soundness.

For the reasons now advanced, I am decidedly of opinion that, even were the mode a feasible one in other respects, no more fatal mistake could be made in laying the foundations of a system of free education for Nova Scotia, than to provide its entire or chief support from the public revenue. At the same time, I am as strongly of opinion that for the Legislature to withhold from the public schools a liberal amount of Provincial aid, would be well nigh equally destructive to the interests of education.

Having expressed so decidedly my views in opposition to a mode of support which is, in its rough outline, somewhat popular in many parts of the Province, I feel it obligatory upon me to state what measures would be most prudent and satisfactory in order to secure both for the present and future, what all earnestly desire, an effective mode of supporting an efficient system of public schools throughout the entire land. And here I am forced, by the extensive and varied experience of the past year, coupled with the closest observation and the best thought I have been able to bring to the subject, to repeat, substantially, the recommendations contained in my report of last year. A mode of support based upon assessment and liberally aided by a Provincial grant, is, in my view, essential in order to awaken, enlist, and preserve, on a grand scale, the interest of society at large, and to clothe with ever-growing efficiency and strength, the efforts of the Legislature and the people to provide an education for every child in Nova Scotia. There are, however, some matters of detail which experience has shown me could be much improved, and which are necessary to render the mode universally operative and complete. I shall, therefore, consider, in brief, each element of the mode proposed, and endeavor to point out present defects, with the appropriate remedy for each.

1. THE PROVINCIAL GRANT.

From what has already been stated concerning the position which the grants from the Province should hold in the system of support, it is unnecessary in considering this element to do more than to point out fully the mode of distribution which appears to me the most desirable. The present law provides \$90,000 from the revenue in aid of common schools. This sum is, as under former laws, divided among the thirty-four Districts, according to the population of each. The amount allotted to each district is subdivided by the Commissioners among the teachers employed, whether few or many, according to a fixed scale based upon the class of license held by each teacher. While it is, I believe, of the first moment to preserve the above distinction in the rank of teachers, it is certain that population is not the true basis on which to found the first allotment of the Provincial grant, as the following considerations will show:—

(1.) *It is unjust to Teachers.*—All teachers are now examined upon the syllabus prescribed by the Council of Public Instruction, and the requirements are alike for the different classes all over the Province. Each teacher should, therefore, according to his class, receive the same amount from the Provincial fund, no matter in what District he may have taught. But this is not, nor cannot, be the case so long as population governs the apportionment to the Districts. During the last year the teachers in each District received different amounts. The highest sum received in any District from the Commissioners, by first-class male teachers, was \$200, the lowest sum in any District awarded to the same class was \$71.30. The following exhibits the difference in the amounts received from the Commissioners, by teachers of the same class, in the Western, Rural, and Shore Districts of Halifax County, from November 1864, to November 1865:—

DISTRICTS.	1st Male.	1st Female, 2d Male.	2d Female, 3d Male.	3rd Female.
Western	\$124.00	\$93.00	\$62.00	\$46.50
Rural	81.00	60.75	40.50	30.37½
Shore	76.50	57.37	38.25	28.69

A glance at the above, which is a fair specimen of the 34 Districts, cannot fail to show that the present mode of distribution is unjust. These teachers were legally of equal attainments, and every way equally qualified to participate in the public money. All taught under the same law, and some of them within a few miles of each other.

(2.) *It tends to destroy the permanence of schools.*—A teacher in one District discovering that his neighbor in an adjoining District is receiving a much larger amount of Provincial aid than himself, while his class of license is the same, becomes dissatisfied. At the close of his term he refuses to re-engage with his trustees, and seeks employment within the bounds of that District which awards more liberal grants to its teachers. But, in all likelihood, others have adopted precisely the same course. Thus discontent is nourished, and a constant migration of teachers, for years past a crying evil in our educational system, is encouraged. Instead of presenting constant temptations to roving habits on the part of our teachers, it should be the aim to encourage them to remain permanently in one place.

(3.) *It necessitates an unwise expenditure of public money.*—During the past year those Districts which had but few schools in operation had as large an amount to distribute as though every section within their bounds had supported a public school. Such an application of the grant almost ignores the principle of proportionate efforts on the part of the people, and creates unreasonable expectations on the part of all, thus sapping that spirit of self-reliance which it should be the aim of government aid to encourage and develop.

(4.) *It is indefinite.*—Neither Commissioners, Inspectors, nor Superintendent can give a satisfactory answer to this simple but important question, "What amount of Provincial aid will such a section or such a teacher receive?" Teachers and trustees are wholly unable to gain such information as is absolutely necessary in order to an equitable engagement. The whole matter partakes of the nature of a lottery. This has been felt during the past year as a most serious hindrance to school operations, and Inspectors have been baffled in their efforts because they could not furnish the people with accurate information on this important point.

In order to remove these obvious defects in the present mode of disbursing the Provincial grant, I would recommend that, instead of providing a fixed amount every year from the Province, the law be amended by stating the precise sum each teacher shall receive, for the school year, from the treasury, according to his or her class of license. Thus teachers would, as in justice they ought, receive an equal sum from the Province according to their qualifications and labor, whether they taught in Cape Breton, Cumberland, Yarmouth, or any other part of the Province; one existing incitement to a frequent change of locality would be removed, and the permanence of schools correspondingly increased; only such an amount of Provincial money as corresponded, in a general way, with the efforts of the people and the just claims of teachers, would annually be appropriated; while every section in the land would know what amount of the teacher's salary would be received from the treasury. Such a mode of distribution would, in addition, secure a satisfactory and ample provision for the regular increase of schools and teachers. Instead of being obliged every few years to augment the Provincial sum by special legislative enactments, or else suffer the teacher's grant to dwindle to a mere pittance, the extension of educational operations would be regularly provided for by a corresponding increase in the aggregate sum annually drawn, thus making the law a steady pioneer in all attempts to widen the educational domain.

An objection may be made against this plan of distribution, that under its operation some Districts of the Province would receive more Provincial money than others, in proportion to their population. Such would undoubtedly be the case; but under such conditions as would be altogether consonant with the best interests of education. If a large number of sections in any District put forth zealous efforts to secure comfortable and commodious houses and furniture, and the best teachers, that District would receive a larger sum in the aggregate, in proportion to its population, than one in which no such efforts were made by its inhabitants. And why should it not? On what principle of justice or educational polity should individual sections in one District be denied an equal share with similar sections in another; or, rather, on what principle

should sections in one District which have made the most liberal provisions their means will afford, receive less than sections in another District, which have rested in comparative indifference? Not, surely, because their appreciative efforts and liberal devisings have kindled a like spirit and effort among their sister sections, and thus swelled the number of first-class schools! This would be to reward indifference and sloth, and to frown upon zeal and activity. It would, as has our former and present mode, keep away from our educational system a most vital principle of growth and permanency,—the awarding of aid, as far as practicable, in proportion to the efforts of the people. What encouragement, for instance, has the operation of the present mode afforded the Rural District of Halifax during the past year—a District which had the best houses and furniture, and the largest number of well-qualified teachers of either of the four Districts in the County, and which, almost without exception, attempted the support of its schools by assessment—when its teachers received less than two-thirds the amount awarded to teachers of the same class in the District of Halifax West?

But the operation of the present mode fairly comes under the ban of the presumed objection to the mode proposed; for although each district receives, at present, an equal sum according to population, still (perhaps it were better left unsaid) every teacher engaged within its bounds, and every section with a school in operation, has a direct pecuniary interest in keeping other sections vacant, since the more numerous the schools the less money there is for each. Thus, by tending to prevent the universal establishment of schools throughout the District, it actually renders the inequality of distribution according to population so great as to withhold entirely from some that there may be the more for those that remain. This effect, from its procuring causes, is even more objectionable when occurring between sections in the same District than between Districts themselves; and when compared with the relative inequalities in the amounts that would be received by the different Districts under the amendment proposed, must be pronounced an evil of far greater magnitude, if, in truth, any can be found who would regard the rewarding of individual sections according to their own efforts, without respect to districts, an evil at all.

It may, however, be objected by some, that while the mode of distribution is a good one for the country generally, its operation in Halifax City would materially lessen the amount of Provincial aid now received; and for this reason, and the somewhat peculiar circumstances of this District, it should be exempted from the operation of the proposed amendment. The presumed objection proceeds upon the supposition that Halifax is to remain stationary in its school arrangements, while the other portions of the Province are to advance; otherwise there would be no force in it. But why discard the application of a sound educational principle to schools in Halifax, while applying it to all other portions of the Province; and why reward local effort elsewhere, and withdraw this encouragement from the city? If those who have in charge its educational interests establish suitable schools, and provide the means for an effective system of education, they should, with others, receive from the Treasury according to their liberality; but if, on the other hand, they withhold the means of universal education by resting content with a partial and imperfect provision, it would be most unjust to the other Districts of the Province, and, in its results, to the citizens of Halifax itself, that they should receive a premium for their inaction. To exempt the City of Halifax would be nothing less than to offer a bonus to the Commissioners to open but few well equipped schools: while to embrace it will offer an equal encouragement to establish speedily such schools as the interests of the citizens and the importance of the subject demand.

The obvious mode of carrying out the amendment I have proposed would be to require the Superintendent to forward as many cheques to the Inspectors as there were teachers adjudged by the Commissioners to be entitled to their grants, instead of forwarding, as at present, Provincial notes. To enable the

Legislature to provide a sufficient sum in the yearly estimates, the Superintendent would be able, from the Inspectors' and Examiners' reports, to state with sufficient accuracy the amount required.

2.—ASSESSMENT.

It is not my intention to enter at length upon a discussion of the legitimacy and value of assessment as a mode of support, but to offer a few considerations by way of justifying the position which I shall assign to it in the maintenance and conduct of a system of public instruction. In doing so, I may be permitted to instance the views of a distinguished educationist and statesman:—"A system of public instruction implies a system of universal taxation. The only rule on which taxes can be levied justly is that the object sought is of public necessity, or manifest public convenience. It quite often happens that men of our own generation are insensible or indifferent to the true relation of the citizen to the cause of education. Some seem to imagine that their interest in schools, and of course their moral obligation to support them, ceases with the education of their own children. This is a great error. The public has no right to levy a tax for the education of any particular child, or family of children; *but its right of taxation commences when the education or plan of education is universal, and ceases whenever the plan is limited or the operations of the system are circumscribed.*"

No man can be taxed properly because he has children of his own to educate; this may be a reason with some for cheerful payment, but it has in itself no element of a just principle. When, however, the people decide that education is a matter of *public concern*, then taxation for its promotion rests upon the same foundation as the most important departments of a Government. As parents, we have a special interest in our children; as citizens, it is this, that they may be honest, industrious, and effective in their labors. This interest we have in all children. The safety of our persons and property demands their honesty; our right to be exempt from pauper and criminal taxes requires habits of universal industry; and our part in the general wealth and prosperity is increased by the intelligent application of labor in all the walks of life.

If it is the duty of the State to seek its own preservation and prosperity by fostering these elements of the common welfare, and to protect itself against poverty and crime; if it is the dictate of reason and the experience of governments that education is the most effectual method of securing these results; if, as is self-evident, this education must be universal to be thoroughly effective; if, as is generally acknowledged, the State is the only agent or instrumentality of sufficient power to so deal with this whole matter as to secure an education for all; and if assessment lies at the foundation of a system of public instruction, is, in fact, essential to its existence and universal extension; then ought the State without delay to command this means at its disposal for the complete establishment of a system of public schools, and every inhabitant is morally bound to contribute to its support.

I am gratified to state that, so far as I have had the opportunity of learning the views of the people of the Province, there is an overwhelming majority which shares to a large extent these convictions in common with myself; and that the necessity of a system of free education based upon assessment as a sure and equitable mode of support, is almost universally acknowledged. It may be asked,—If such be true, why are not the provisions of the existing law universally received and acted upon? I answer, chiefly for these reasons: (1) the *compulsory* adoption, by *school sections*, of *voluntary* subscription as a partial means of support, in direct violation of the convictions of the people that free schools and assessment are correlatives; (2) the unreasonable liabilities thus imposed upon Trustees, whereby trepidation is engendered, and, as a result, a general refusal on the part of the ablest and most suitable men to assume the responsibility of the conduct of schools; and (3) in some portions of the Province, as in Kings and Shelburne, and perhaps to some extent in

other counties, dissatisfaction with the basis of the Act "Of County Assessments," by which, it is said, an unequal rating of property is occasioned. Concerning the latter, it is not, perhaps, my business to speak; but I would respectfully suggest that if the complaint is well founded, no time should be lost in removing the ground of it, since all must desire that the application of the principle of assessment to the support of education should be as equitable as possible. The complaint is not against the application of the principle, but against the unequal application of it. It is, therefore, if well founded, a reasonable one, and should not, by neglect, be permitted to awaken hostility to a system of universal education. At the same time, it cannot and ought not to be expected that assessment for the support of schools, any more than for other purposes, will fall with scrupulous justice upon individual rate-payers; nor can it be deemed the part of true wisdom to withhold the universal application of the principle to the establishment and equipment of free public schools—"the weightier matters of the law"—until with visionary nicety the Act "Of County Assessments" shall adjust the "title of mint and anise and cummin."

In the support of a system of education, a two-fold application of the principle of assessment has been demonstrated by the experience of Upper Canada to subserve the end in view in a more successful and efficient manner than in any other mode. In this Province we cannot be said to have given this plan a trial. In my report of last year, its adoption as the fundamental part of our school system was urgently pressed; yet the Legislature deemed it prudent to reject a part of the plan, and to substitute voluntary subscription instead. Experience has, I think, abundantly shown that the mode adopted was not the best one; and I would most respectfully urge a reconsideration of this matter, and the adoption in its completeness of a two-fold application of assessment in supporting our educational system. This plan provides for both a county and a sectional assessment, each of which demands a brief consideration.

COUNTY ASSESSMENT.—1. The interests of the inhabitants of each county (or sessional district) are more intimately connected than are those of the residents of separate counties. Each of these communities provides for itself the amount necessary to meet its expenditure occasioned by pauperism and crime; and each receives its own special advantage from the diminution of whatever tends to the corruption of its society, or from the increase of whatever contributes to its purity and prosperity. It will be denied by none that the proper education of all composing these communities is a more powerful means of diminishing crime than punitive measures, however rigorous; and that such education is the most direct and powerful instrumentality in securing industrious and virtuous citizens. Each county, or sessional district, is morally bound, therefore, in its aggregate capacity, to contribute liberally towards the support of public schools within its borders.

2. The inability of many sections in each county to provide from their own resources the necessary means for supporting efficient schools, renders it imperative upon each county to proffer such assistance as, in connexion with the provincial aid and their own efforts, will make it possible for these sections to furnish all with the means of at least the elements of a good education.

3. A liberal amount being provided by each county to aid all its boards of school trustees to secure teachers, the assessment for this, one of the most important provisions for the general welfare, would fall equitably upon the people of the whole county, and would reduce the system of support to as equal a basis as is at present compatible with the diversified needs and desires of its individual sections.

4. As the end aimed at—the universal education of the inhabitants of each county—cannot be realized except by the establishment of schools in each section, and as it is proposed to leave the action necessary to secure this in the hands of the people of each, respectively, it is manifest that a liberal county

assessment for educational purposes would present a very strong inducement to the people of each section to establish schools and keep them permanently in operation. Every ratepayer being a contributor to the general educational fund of the county, would soon be desirous that the section in which he resided should be in a position to receive the benefits of his contributions. Thus local and public interests would coalesce in bringing into play, universally, a system of schools. This provision in our present law has had, in many places, this salutary effect; and as it becomes better understood will be felt for good throughout the entire Province. Despite extraordinary efforts to make this excellent feature of the law plain to all, I am led to believe that not much more than one half of the people had an intelligent apprehension of it at the time of the annual meetings. Many supposed that their liability to contribute to this fund was dependent on the vote of the school meeting. It will thus be seen that the effect of this provision in conducing powerfully to the general organization of schools, has, from the want of accurate knowledge, been but imperfectly felt as yet. But from the immense superiority of the visible operation of the law over every other mode as a means of conveying to the people at large accurate knowledge of its actual provisions, we may fairly expect in the course of the year pretty extensive indications of the beneficial operation of the principle referred to as a means admirably adapted to the necessary multiplication of schools.

5. Since, under the plan I have already recommended, the Provincial contingent would be distributed to teachers, in fixed sums, in such a way as to encourage high qualifications and ardent devotion to their work; and since the object sought by securing a general fund in each county is the education of all its inhabitants, the amount raised by county assessment should be apportioned to the trustees of each section according to the daily average attendance of pupils as shown by the school register, and the length of time of keeping open a satisfactory school during the term. Most important results would thus be secured, among which would be, (1) every section would be stimulated to provide school accommodation for all its children; (2) trustees and people would take steps to secure the attendance of every child at school; (3) great exertion would be made to keep the attendance as regular as possible; (4) arrangements would be made by teacher and people to keep the school open continuously; and (5) a complete system of registration would be carried on in every school in the Province. It will be seen in a moment that these are most invaluable points to secure, and without them all else must be exceedingly imperfect and circumscribed in its operation.

It may be said that one of the arguments used against the present mode of distributing the Provincial grant—that it left the actual amount to be received indefinite—applies with equal force to the plan of distribution proposed for the county fund. It may be replied, that even were such the case, there is this difference: no important end is served by leaving the amount of provincial aid uncertain, but every way the reverse; while, as has just been shown, immense advantages would be secured in the case of the latter. Not, it is true, on account of the uncertainty *per se*, but by a mode which does not admit of a fixedness of amount, and which cannot, from the necessities of the case, be secured apart from a degree of uncertainty as to the exact sum. But if each Inspector has an accurate census of the children in each section of the county, every board of trustees may know, with sufficient accuracy, the *minimum* sum that they will receive from this source. With this view, I directed, some time since, each Inspector to take during the present season a census of every section subject to his inspection; and steps will be taken to lay the information thus gathered, together with contingent deductions touching the county fund, before the several boards of trustees, prior to the next annual school meeting.

The foregoing considerations appear to me to establish beyond question the great value of county assessment as forming a constituent part of the mode of support in a system of public education. It is, however, absolutely necessary,

in order to render it thoroughly efficient in placing education within reach of the poorer sections; in lessening as far as practicable the amount of the sectional assessment, and thus equalizing perceptibly the school rates; in conducting to the universal organization and permanence of schools; in stimulating every section to secure the largest, most regular, and most continuous attendance at school; that the amount thus raised should not be less than \$100,000, instead of \$60,000 as at present. The amount of this fund would then bear a proper relation to the sum secured from the treasury.

SECTIONAL ASSESSMENT.—The amount of money received by the teacher from the Province, and the amount received by the trustees from the county, would make it possible for the various sections to secure the services of third class teachers with but little or no addition from local sources; while it would furnish a substantial basis for the most extended operations which the liberality of the inhabitants of any section might devise. In order, therefore, that the funds provided by the Province and counties may not destroy the very life and soul of a system of universal education, but stimulate it into universal activity and growth, the law must empower the people of each section to raise directly from themselves such supplemental sums of money as shall enable them to give adequate expression to their estimate of the importance and demands of education in their own locality. If the education of all the people is a matter of such transcendent moment as to enlist the interest and direct contributions of the Government of the country; and if the interests of each county in securing the same result are of such increased importance as to demand that every ratepayer shall be subject to a direct county assessment in aid of its support, surely the special interests and advantages appertaining to each section in the education of all its inhabitants, demand that every section be at least empowered to secure the direct contributions of its rate-payers in raising any additional sum that may be needed for its own school.

It may be objected that sectional assessment is unnecessary, that it complicates the whole method of support, and that the whole sum needed to supplement the Provincial grant should be raised by a general rate over the whole country. Such statements have been made by those who have not studied patiently and closely the mode of support adapted to an ever-expanding system of education, in connexion with the condition and wants of the Province. Suppose the Legislature were to enact such a law, the amount raised would at best afford to individual teachers but an average allotment; it would be wholly inadequate to the purchase of lands, the erection of houses, the supply of books, apparatus, and fuel, or even to the payment of such salaries as the noble educational sentiment which already prevails in many sections of the country, at present provides. Such an enactment would, in our present condition, fall like frost upon the entire field of educational operations, shrivelling and blighting every germ of promise for a future harvest. Expansion would be almost impossible, since the mode of support employed would tend directly and powerfully to prevent the growth of a liberal educational sentiment among individuals and communities, as well as to cramp the tangible expression of it where it already exists. It would strike away the only conditions on which, in my opinion, it is possible for us to establish a really effective system of public education, to wit, the creating and expanding of a vigorous and permanent educational sentiment throughout the land by the judicious application of such encouragements as shall call forth the highest effort of the people in connection with their own section and their own school. It would be most unwise and most unjust for the Legislature, while devising measures for the establishment and prosperity of schools, to decree that those sections which are now able to command some of the best talent of the Province, by cheerfully offering salaries of \$500, \$600, and even \$800, shall be content with such inferior teachers as the allotment of a county fund would necessarily impose upon them.

But, it will be said, let the inhabitants of any section who have children to educate increase by subscription the allotment of the general fund by their

own contributions. This proposition deserves a remark or two. And (1) the very proposition necessitates a provision in the law by which a certain amount may be raised directly from the section,—the very provision against which the objection is made, and to obviate which, those who have imperfectly examined the matter, have proposed the raising of all the funds needed for school purposes over and above the provincial grant by one general rate over the whole county. (2) It is at variance with the very principle upon which a system of public instruction rests. Such a system presupposes that the education of all is a matter of *public concern*, and that therefore the right to assess any individual is not dependent upon his having children to educate. (3) Its direct tendency would be to prevent the organization of schools, by throwing upon a few zealous and liberal friends of education in each section the entire cost of school-houses, lands, furniture, books, apparatus, fuel, and whatever of salary might be needed beyond the general allotment to secure the services of the best teachers; thus rendering largely inoperative the whole educational machinery, and frustrating the grand end in view—the education of all.

Without adding to these considerations, enough has been said, I think, to show that the mode of support adapted to the system of schools contemplated by the law upon the statute book, should not only enable, but encourage, each section to call into requisition the direct contributions of its inhabitants for the maintenance of its own school; and that these contributions should not be suffered to fall upon the few, but upon all, by an equitable assessment. I would, therefore, earnestly recommend that the law be so changed in respect of local support, that when the majority of rate-payers assembled at the school meeting shall have determined what amount, if any, will be needed by the trustees during the year for any and all school purposes not provided for by the provincial and county funds, the trustees shall be empowered to raise the same by a sectional assessment. Assessment being fixed by the statute as the mode of raising school funds, the rate-payers of each section, would be left perfectly free to carry on their school in a manner comporting with their sense of the importance of education and the extent of their resources. It will be readily seen that all sections already well equipped would need to raise by sectional assessment little or nothing beyond what they might deem to be necessary in order to secure teachers of the highest grade; while those sections which are not so circumstanced would have it within their power to speedily make such arrangements as might be necessary to enjoy equally with others the benefits conferred by the Province and county.

The substitution, in the act of last year, of voluntary subscription for sectional assessment, has met with all but universal disapproval. It is difficult to conceive how anything else could have been anticipated. As has been already observed, it is incompatible with a system of free schools, and has been so adjudged by the people of Nova Scotia with singular unanimity. Let it, then, give place to something better. At present, trustees, who are charged by the law with the gravest responsibilities, and to whom the people have delegated the organization and conduct of their schools, find themselves crippled at the very outset, and subjected to the anomalous responsibility of providing for the education of all, when neither they nor those who appointed them can command the necessary means by which this may be effected. I dare not conceal from the Legislature my conviction, that if voluntary subscription is permitted to remain in the statute, the most disastrous results will follow. The great advancement which has already been made will be swept away by a speedy retrogression. The towns, villages, and flourishing rural sections will be disorganized, and general demoralization will ensue. It is true that these sections are at the present time organized and have schools in operation; but it is also true that, almost without exception, these sections at their annual meetings protested against the action of the Legislature in depriving them of the privilege of assessing themselves. Organization became possible only under the conviction that subscription would be struck from the law at the present session

of parliament. Unless this conviction shall be justified by the event, it will be impossible to secure good trustees in these sections, if, indeed, they can be secured at all. The progress of education requires that trustees shall be men of sound judgment and business talent; the fact that their services, consuming as they do much time, are gratuitous offerings to the cause, demands that for every duty imposed upon them by law, provision be made for a simple and direct discharge of that duty. But subscription is impracticable, especially so in towns and villages; and trustees are subjected to great annoyance and much embarrassment. *Subscription*, not sectional assessment, complicates the whole mode of support. The latter, by its efficiency and directness, would render operative all other provisions of the law, and would in the trusteeship alone add to the ordinary operation of the law a most powerful element of success. It will be vain to provide a large provincial grant, and a sum equally large from the counties, even though the distribution of these funds be adjusted upon the soundest principles and with the greatest nicety, if the *local arrangements* pertaining to the individual sections are to be so imperfect and weak as to make the conduct of schools an intolerable burden to trustees, and the occasion for every one, whether the friend of public education, or its foe, to ridicule the attempt to rear, upon a foundation which none can fail to perceive is but shifting sand, so magnificent a structure as a system of free education.

SUMMARY OF THE MODE OF SUPPORT.

For the reasons adduced, I beg to recommend the adoption of the following system of support:—

1. The semi-annual distribution from the public revenue of fixed sums to legally qualified teachers, according to their class of license, and the length of time they have satisfactorily taught during the term prescribed in the law; yet subject to no increase, a full term having been taught, for omitting to take prescribed holidays and vacations.

I would recommend that the amounts to the several classes for the whole school year be as follows:—

1st class Male Teachers.....	\$120
1st " Female "	} \$90
2d " Male "	
2d " Female "	} \$60
3d " Male "	
3d " Female "	\$45

Assistant teachers, if provided with class-rooms, and employed at least four hours a day, should receive two-thirds the above sums, according to the class of their license. The amount thus drawn from the Treasury would depend upon the number of schools in operation, the class of teachers engaged, and the length of time the schools were kept open during each term; and, in the aggregate, would increase with the increase of educational operations.

2. The raising by a general rate upon each county (or sessional district) of such an amount as may be considered to be at least equal to that provided by the Province, and which, like the Provincial grant, shall increase, in the aggregate, with the increase of our population.

I recommend that this be effected by requiring each Clerk of the Peace to add to the sum annually voted for other county purposes an amount sufficient to yield, independently of any expense of collection or otherwise, a sum equal to 30 cents for every inhabitant in the county or sessional district, according to the last census preceding the issue of the rate-rolls.

The amount thus raised I recommend to be distributed by the Commissioners, in equal semi-annual portions, to the Trustees, according to the daily average attendance of pupils, and the length of time of keeping open a satisfactory school during the term prescribed in the law; yet subject to no increase, the school having been kept a full term, for omitting to give prescribed holidays

and vacations. The appropriation of the amount received from this source by the Trustees should be restricted to the payment of teachers' salaries.

3. That a majority of the rate-payers present at the annual school meeting be empowered to determine whether any sum shall be raised during the year by the section, to supplement the amounts provided towards the teacher's salary, or for the purchase or improvement of school-grounds, the purchase, erection, furnishing, or repair of school-houses, or for rents, prescribed school-books, maps, or apparatus; and that, if the majority decide to raise any sum for these purposes, the trustees be empowered to assess the sum determined by the meeting upon the residents of the section according to the county rate-roll.

4. Some additional aid beyond that to be received from the ordinary Provincial and county funds, should be provided for very poor sections. This want is recognized in the present law, but the provision whereby the want is to be supplied is not free from objections; while the adoption of the foregoing recommendations would render a change necessary. I would, therefore, suggest that each Board of Commissioners, at the regular meeting in November of each year, be required to determine the number of sections within its limits needing special aid; and that each Board be empowered to direct, through its Inspector, the Clerk of the Peace to add to the ordinary assessment for school purposes an amount sufficient to yield a sum not exceeding \$20 for every such section, for the school year. Whatever sum was thus provided by the county for any destitute section, over and above its ordinary allowance in common with other schools, should be followed by an equal sum from the Province to the teacher in any such section, in addition to his regular grant. The half-yearly portions of these special grants should in no case be paid unless such sections have kept a satisfactory school for the whole term, exclusive of holidays and vacations. In the event of any such funds remaining in the county treasury undrawn, they should not be added to the ordinary school fund of the year, but placed to the credit of the year ensuing.

I am persuaded that the mode of support I have outlined, and which, for the most part, is merely a re-adjustment of that at present contained in the law, would be found to answer the demands of a universal system of public education both for the present and the future. It would be equitable and permanent in its operations, and increasingly efficient. It would remove almost entirely the objections urged against the present law, and by its completeness would speedily establish schools all over the Province. The mode of distribution would increase amazingly the regular attendance at school, and enlarge greatly the power of school instruction. The Superintendent of Education in Upper Canada says, in his last annual report: "As the school fund is designed to aid in *educating youth*, the distribution of it to each school section is made, not according to population, *but according to the educational work* done in it. This provision of the law, in connection with other influences of our school system, has nearly doubled the work done in the schools since 1850, in addition to their improved character and greater efficiency." The Superintendent of Public Instruction in the State of New York showed in his last report that over a million of dollars was virtually lost to the cause of education under the old system of distributing the school fund to school sections according to population, besides the loss arising from the irregular attendance of pupils and the short time of keeping open the schools. He adds: "This subject was more fully discussed in my report to the Legislature of last year. That Legislature, in view of its importance, provided by law that after the apportionment of the present school year, a part of the school moneys should be apportioned to the school districts (sections) *upon the basis of daily average attendance, thus making it the pecuniary interest of every tax payer to induce the regular attendance of his own and his neighbor's children.* I am gratified to be able to report that that simple provision of the law, which went into practical operation in October last, *has largely increased the number of pupils and the regularity of their attendance.*" Some might object to so complete a mode of support as I have

recommended, unless there were coupled with it the compulsory attendance of all the children of school age. While it is freely admitted that the State has the right to exercise this power, it is not my opinion that it would be judicious to bring it into exercise so early in our attempts to secure universal education. If when the people, with the increased facilities which they would be enabled to command under the system of support now proposed, shall have provided ample accommodation, and fully equipped their schools, it shall be found that the schools are not educating all, because parents prefer that their children should be reared in ignorance rather than in knowledge, then will this question present grounds for the exercise of such compulsory measures as the Legislature may deem necessary to secure the end in view. At present, the attendance on most of the schools is beyond the accommodation provided, and I do not hesitate to predict, that if the plan I have recommended were adopted in its integrity, two years would not pass before there would be an attendance at the public schools of 60,000 pupils. The mode of distributing the county assessment, once fully understood, would make every rate-payer a truant-officer paid for his services. Until, therefore, in the conduct of our system of public education such facts shall appear as will, in the public mind, justify extreme measures, I would deem any provision for compelling attendance to be premature, and calculated, at the present time, to retard rather than advance the interests of education.

The foregoing mode of distributing the Provincial grant would deprive the Inspectors of their present commissions as Clerks of the School Boards, and there would be required some provision by which to make up the deficiency. These officers are obliged, by law, to perform an immense amount of labor other than that of school inspection proper. Their services are invaluable to the cause of education; but, as yet, most of them have been very poorly remunerated. Perhaps if each Inspector were allowed from the treasury a sum equal to three dollars for each school inspected half-yearly, the deficiency might be met; or perhaps the Superintendent might be instructed to draw from the treasury a fixed per centage upon the aggregate sum distributed by the Province to common schools, and, under the direction of the Council of Public Instruction, to apportion a certain remuneration to each Inspector, according to the labor performed.

XI.—SUPPLY OF SCHOOL BOOKS, MAPS, APPARATUS, AND EDUCATIONAL JOURNAL.

There is another matter of great importance in connection with a system of schools, and requiring the immediate attention of the Legislature. If it is the duty of the Legislature to promote the education of the people by providing for the establishment and support of public schools, it is equally its duty to provide all possible facilities for rendering those schools efficient. Proper school books, maps, and apparatus, are essential requisites in every school; and it seems to me to be the duty of the Legislature to provide economical and effective means to place all needful appliances within easy reach of every school section. There is at present provided an annual grant of \$2,400 for the purchase of "school books, maps, and apparatus,"—the books to be distributed gratuitously to poor and indigent pupils. This sum has been expended the past two years almost exclusively for books; but the number furnished has proved inadequate to the wants of many of the districts; while as schools become more general, it will dwindle to a mere pittance. This, however, is not the only nor the chief fault with this provision. It is not possible, even with the exercise of the utmost vigilance, to effect the purpose intended by the Legislature in its enactment. It wonderfully increases, in some sections, the number of "poor" children, while in others it stings to the quick that noble pride which should not be wounded—thus rendering on the part of Inspectors and Trustees the exercise of the required discrimination impracticable. But,

worse than all, it has, in the majority of cases, a direct tendency to remove from the inhabitants of each section that responsibility which leads to the putting forth of their own efforts to provide what is necessary for their own school. There is engendered an indefinite notion, readily received, that the Superintendent will supply all the books that are needed; and because I have been unable to fulfil this unfortunate and ill-founded expectation, sections have murmured. But it is not unreasonable that the people should expect some provision to be made in order that they may secure such books, maps, and apparatus, as are recommended for use in the schools. These requisites could be furnished more readily and cheaply by the Province than in any other way. If an arrangement were made whereby sections might obtain their books and apparatus without difficulty and at a cheap rate, they would not be slow to avail themselves of the benefits arising therefrom. It would soon secure a uniform series of text books; furnish the schools with excellent apparatus; share with the people this necessary expense of public education; and not entail upon the treasury a single dollar beyond the annual grant suggested. Such an arrangement, being self-sustaining, would immediately become a most important and valuable auxiliary of our system of public schools, and would offer a most powerful inducement to the people to enter heartily into the work of supporting efficient schools, since the amount to be raised by any section would be materially lessened. With such a provision, every section would soon own, as a part of its school property, all required school books, thus rendering unnecessary any grant to provide such specially for poor pupils, and relieving school officers from the exercise of a most delicate and unpleasant discrimination. But few can have any correct idea of the almost utter destitution of maps and apparatus in the schools of this Province, eighteen months ago. For my own part, I have been astonished beyond measure in this matter; and am unable to account for this destitution, without assigning great weight to the fact that the practice of gratuitously distributing these articles, through the Boards of Commissioners, engendered the habit of overlooking the value and efficiency of proper efforts on the part of the people themselves. With the limited fund at command, and the large field over which it was spread, the articles furnished were necessarily indifferent in quality; maps were on paper instead of canvas, and globes were too expensive to be furnished, unless occasionally. Hence the distributions of one year were destroyed the next. The articles cost the people nothing, and their usage of them was in keeping. Thus there was little or no accumulation of school apparatus; and the people are now, on the organization of a school, required to add this item of expense to others. For the last eighteen months no maps or apparatus have been distributed gratuitously; but from the unappropriated library fund, maps, diagrams, and globes, have, with the sanction of the Council, been purchased, and offered to School Trustees for the exclusive use of schools, at half the cost. The articles furnished have been of good quality, in order that they might become permanent acquisitions to the schools. The desire of the people to obtain these requisites for their schools may be gathered by the facts given in a previous part of this Report. I believe no more useful and judicious expenditure in behalf of education could be incurred.

The publication of a Journal of Education should be connected with the supply of books and apparatus, and a copy should be furnished gratuitously to every Board of Trustees, and where there were more than one Teacher in a section, a copy to every such Teacher. The present Act provides for the free publication of such a journal; but the extraordinary labor entailed upon the Superintendent, consequent upon the introduction of a new measure, has not allowed him sufficient time to undertake its publication. The adjustments I have proposed in the mode of support would remove the means provided for the support of a journal. Great benefit would accrue from its establishment, not the least of which would be the decrease in the amount of correspondence. A journal would supply every Board of Trustees with information which, at present, they are obliged to seek by letter. It would, moreover, advance greatly the entire interests connected with Educa-

tion, and carry to Trustees and Teachers valuable hints for the improvement of their schools.

In order, therefore, to provide these facilities for school instruction at a cheap rate to all, I would recommend that the Legislature make a special grant in aid of the same. From calculations which I have made, I am of opinion that a grant of \$8000, in addition to the sum already voted, would go far towards supplying this universal want. Every Board of School Trustees presenting a certificate that the articles required by them were for the exclusive use of the public school, the Superintendent, under the direction of the Council of Public Instruction, should be required to furnish prescribed school books, maps, and apparatus, *at one-half their prime cost*. Such an arrangement has been in operation many years in Upper Canada, and has been found of great service. In Nova Scotia it would be found equally applicable. Such additional support from the public revenue would be appreciated by the people generally, and would be altogether consonant with the highest interests of a system of public education.

In the foregoing pages I have presented as briefly as possible the condition of education during the past year in Nova Scotia, and offered such suggestions for its improvement as my experience and judgment have determined. While I deeply regret that I have been unable to inform the Legislature that provisions have been made and acted upon for the education of all the children of the Province, I rejoice that I can report the prevalence of a universal interest in this subject of such moment to every citizen, and the almost universal desire to see a system of free education established all over the land. The day of sloth has passed, and that of activity has come. The power which, in one short year, has spoken into existence the means for the erection of a School House in almost every other school section in the Province, will not slumber again. This new energy needs but direction in order to move into harmonious operation every part of an efficient and complete school machinery. There is no desire to impinge upon the freedom of the schools; there is no general desire to do away with assessment as a mode of support; but there is an almost universal desire to see a thorough and vigorous system of free education established on sound and equitable principles. This being effected, Nova Scotia will take her rank beside the favored countries of the earth, and rise to that position of commanding prosperity and influence which the endowments of Nature have so eminently prepared her to occupy.

In Appendix B will be found very copious extracts from the Inspectors' reports. While I do not, of course, hold myself responsible for the opinions therein expressed, I nevertheless invite a careful perusal of these papers as forming an important part of this report. The entire unanimity of sentiment expressed by these gentlemen concerning the embarrassments entailed upon educational progress by voluntary subscription, cannot but add confirmation to the views I have expressed concerning the mode of support. Many of these papers, moreover, furnish much insight into those higher matters that pertain to the internal workings of the schools.

During the year, the Executive have allowed me the use of one of the Committee rooms in the Province Building as an office. Some permanent and convenient office is much needed. Finding that I was utterly unable to overtake the duties imposed upon me, I applied in October to the Executive to place at my disposal a sum sufficient to enable me to obtain the services of a clerk. Six hundred dollars were granted, and I immediately secured the assistance required.

The vouchers connected with the expenditure of the funds entrusted to my charge, will be laid, in due course, before the Educational Committee.

I have the honor to be,
Your Excellency's most humble servant,

T. H. RAND.

PUBLIC SCHOOLS.
Table A.

Shewing the number of Sections in each District, the whole number of Schools, and the average number of weeks the Schools were in operation in each District for both Terms of the School year ended October 31, 1865; also, the number, sex, and class of Teachers employed during the same period.

Table C.

SUPERIOR SCHOOLS.

Showing the Sections and Teachers competing for the Superior School Grant in the several Counties, as embodied in Tables A and B. Successful competitors are marked with an *; Sections supporting their Schools by assessment are indicated by a §.

WINTER TERM.

County and Section.	Names of Head Teachers.	Number of Pupils Registered.	Average daily attendance.	Remarks.
CAPE BRETON — § Sydney	*William Blair	42	33	
VICTORIA..... § Baddeck	J. H. McLeod	48	32	School irregular.
INVERNESS § Intervat, B. Cove	*John Y. Gunn	62	36	
RICHMOND Little Arichat	Angus Cameron	64	37	Building small.
Town of Arichat	R. F. Brino, B.A.	39	30	In sec. with Academy.
§ D'Escouse	*Angus McNeil	54	39	
Head West Bay	*Donald McLenn	40	35	
Grand River	*Hector McQuarrie	68	40	
ANTIGONISH ... § Arisaig	*Lewis Melnits	68	31	
§ St. Andrew's	*Jos. B. McDonald	75	37.6	One assistant.
GUYSBOROUGH... § Guysboro' Town	*John T. Mellish	161	118	Graded. 3 dep. 3 Teachers.
§ Cape Canso	*John Hollies	63	32.5	
PICTOU..... § River John	*Rodk. McLenn	134	79	Graded. 2 Teachers.
Rogers' Hill	Wm. Fraser	70	35	Not qualified.
New Glasgow	*Daniel McDonald	390	231	Graded. 5 Teachers.
COLCHESTER... § Great Village	*Samuel McCully	171	111	Graded. 2 Teachers.
Acadian Mines	*John B. Jefferson	108	60	
Old Burns	*Donald McLeod	57	40	
S. B. Stewlacks	*Rebecca Newcomb	64	36	
Upper Stew. Vill.	Abraham N. Tupper	75	41	House unfit.
CUMBERLAND... § Pugwash	*John Jack	231	160	Graded. 2 Teachers and assist.
Wallace Harbor	*D. J. McLeod	108	63	Graded. 2 Teachers.
Advocate Harbor	*James McCabe	82	40	
Anherst	Donald McAulay	95	55	Graded. 2 depts. but irregular.
Brookville	John G. McLenn	48	24	
HALIFAX..... § Musquod. Harbor	*J. P. Campbell	53	31	
Gladwin Section	*Isabella Kent	62	37.3	
Sudgwick Section	*Annie Archibald	46	28.3	
Archibald Sec.	*Mary Parker	52	28.6	
HANTS..... § Hantsport	*E. M. Rand, B.A.	172	86	Graded. 3 Teachers.
Avondale	*J. Willoughby	85	58	House new.
Poplar Grove	*J. W. Morris	51	35	House old, but repaired.
Brooklyn	Henry McDonald	115	60	Graded. House out of repair.
Walton	*Wm. Shore	111	60	Graded. 3 Teachers.
KING'S..... § Port Williams	*J. M. Harvie	51	38.5	
Randville	*David Webster	50	31	
Lower Ch. Street	Colin Roscoe	48	30.5	
Upper Canard	*George Ross	126	62	Graded. 2 Teachers.
Lower Canard	*J. Borden	123	80.3	Graded. 3 Teachers.
ANNAPOLES Paradise	Jas. Horner	71	40	Not equal to others.
Farmington	Archd. McKinnon	61	34	Do. do.
Rectory	*C. S. Phinney	61	40	
Union	*M. J. Lyons	56	40	
Lequille	*Augustus Fullerton	46	32	
Willet	*C. F. Hiltz	67	35	
DIGBY..... § Bear River	*C. E. Gilliland	189	123	Graded. 3 depts. 3 Teachers.
Beaver River	*F. W. Kelly	130	90	Graded. 2 do. 2 do.
Little River	Hanford Denton	47	31	Deceased.
Digby Town	George Rennels	39	23.35	Below requirements.
YARMOUTH..... Hebron	*John C. Blackadar,	86	50	
SHELBURNE.... § Locke's Island	*Hinkle Condou	67	41	
Clyde River	*Jas. H. Munro	66	32.5	
Barrington Head	*A. C. Doane	46	30.1	
QUEEN'S..... § Liverpool	*T. R. Patillo, B. A.	382	237	Graded. 4 depts. 4 Teachers.
Port Medway	*Aug. Freeman, B.A.	92	64	One Assistant.
Mill Village	*Alfred Smith	121	73	Graded. 2 Teachers.
LUNenburg.... None				

Table C.
SUPERIOR SCHOOLS.

Shewing the Sections and Teachers competing for the Superior School Grant in the several Counties, as embodied in Tables A and B. Successful competitors are marked with an asterisk (*); Sections supporting their Schools by assessment are indicated by a section (§).

APPENDIX No. 14.

HOSPITAL FOR INSANE.

ANNUAL REPORT OF THE MEDICAL SUPERINTENDENT, 1865.

TO THE BOARD OF COMMISSIONERS OF PUBLIC WORKS:

Gentlemen,—

I have the honor to submit the Annual Report of the Provincial Hospital for the Insane for the year 1865.

The number of patients on the first day of the year was one hundred and fifty-four.

The admissions in 1865 have been forty-six, twenty-four males and twenty-two females, making the whole number under care during the year, two hundred.

The average daily number for the year was one hundred and fifty-five.

Twenty-seven males and twenty-three females have been discharged, leaving at the end of the year one hundred and fifty patients.

Of those discharged, twenty-eight have been restored, eight more or less improved, and fourteen have died.

The recoveries, reckoned on admissions, give a rate of 60.86 per cent.; the average of seven years has been 39.13 per cent.

The mortality rate, reckoned on the daily average number, has been nine per cent. The average of the past seven years was 5.64 per cent. The average mortality rate since the opening of the Hospital, *reckoned upon the whole number treated* in each year, has been 4.58 per cent.

The total number admitted to December 31, 1865, has been three hundred and seventy-five, of whom two hundred and twenty-eight have been discharged, including three now absent "on trial."

Table of monthly admissions from January, 1859, to December, 1865.

1859 to 1864.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Males.	Females.	Total.

1865.															
Admitted	2	3	2	3	4	13	5	1	1	3	5	4	24	22	46
Discharged	2	3	2	1	3	6	7	3	7	5	5	5	27	23	50
Remaining	154	154	153	155	156	163	161	159	153	151	150	150	79	71	150

The number of admissions in 1865 is the same as in the previous year, the applications continuing far beyond the accommodation at disposal. Owing to various causes the discharges have been unusually numerous, leaving us, for the first time, with a smaller number on our list at the close than at the commencement of the year.

No less than nine of those admitted in 1865, have, at some former period, been inmates of the Hospital. This fact will serve to answer the objections of those who assert that we retain patients under care that ought to be at home. The probationary plan of discharge enables us to send away all doubtful cases, and out of twenty-four thus conditionally discharged this year, only two relapsed while "on trial." Another returned voluntarily for treatment of a bodily disorder, from which he soon recovered, and, fortunately, continues well. Two others who had formerly been patients here were anxious for re-admission, showing their appreciation of the advantage of Hospital residence.

There is to this day, in many of the rural districts, a surprising lack of information as to the means to be adopted to obtain admission of a patient to the Hospital. Directions on this point are given at the end of every Annual Report of late years, and these are freely distributed wherever information is sought. Letters of enquiry are continually being received, and an impression appears to prevail that when a selection has to be made, a preference is given to the wealthy class of patients. This, however, is not the case. Those who are likely to be benefitted have legally the first claim, and paupers (other things being equal) have the precedence, since the rich can afford to send their friends to other institutions.

Even when crowded to the utmost, we have never refused to admit cases of recent occurrence, whatever may have been their pecuniary circumstances; and it is scarcely necessary to add that when it has become requisite to postpone the reception of comparatively hopeless cases, it has been most unwillingly done. The knowledge of the sufferings of the insane in jails and elsewhere throughout the country, often prompts us to admit patients who have very little prospect of ever being restored.

Alleged ages of all admitted.

	1865.	1859-64.	Total.

82.....		1	1
Unknown.....		18	18
Total.....	46	329	375

The foregoing table merely serves to indicate the ages, as nearly as could be ascertained, at the time of admission. The previous duration of their insanity has varied, from less than a month up to nearly twenty years. Of this latter class, comparatively few are now admitted.

The admissions from the respective counties of the Province, as shewn in the following table, would lead to erroneous conclusions unless explained. The numbers tabulated do not indicate so many separate cases of insanity, but merely the greater frequency of admission from the nearer localities, the same patient having, in many cases, been admitted twice, and in some instances four times.

A much larger proportion of our inmates are of foreign birth than would here appear, one year's residence being sufficient to gain a legal settlement.

Former residence, as stated on admission.

The numbers embraced in the foregoing table are too small, and the period of time too limited, to admit of any correct generalization. The re-admissions, too, being counted here as separate cases, would lead to conclusions not borne out by actual facts. As tending to correct erroneous calculations, the figures from the last census have been once more introduced.

TABLES

Suggested by Her Majesty's Secretary of State for the Colonies, 1864, for publication in Reports of all Colonial Asylums.

Examinations made where practicable. Space in table inadequate to note results. The greater number of the deceased were interred by their friends.

* Nos. 40 and 251 were Negroes.

The column "Duration of Disorder" contains in figures the period of Hospital residence.

DISCHARGED.

Of the two hundred under care in 1865, fifty have been discharged; being not only a larger number than in any previous year; but a greater proportion than usual of those under treatment.

The recoveries and deaths have both been in excess of the former average; the first, owing to the majority of those admitted this year having been less than a twelvemonth insane; the last, it is to be feared, attributable, in some measure at least, to the crowded state of the hospital.

Twenty-eight have been discharged restored, and after various periods of trial, have all continued well. Contrary to our usual experience, more women have recovered than men, namely, sixteen of the former to twelve of the latter.

Seven were discharged improved, and two of these relapsed, one of whom was re-admitted and eventually recovered. Three others were re-admitted; two for want of proper care at home, and one for a temporary bodily disorder.

One only was removed unimproved, and this an idiotic lad.

There are at all times a certain number on our list whom the Superintendent would gladly transfer to the care of their friends, provided these could be induced to give them a trial at home. They are so far restored as to be able to leave if judiciously and kindly treated, but would inevitably relapse if left to their own resources.

Fourteen deaths have occurred. One on the first day of the year from suicide, the day after admission. One, aged seventy-seven, died of Senile Dementia; one of Parosis; one of Acute Mania; one of Enteritis; one of Perineal Abscess; one of Pulmonary Congestion; two of Phthisis; two of Fever; and three of Epilepsy.

These are this year for the first time tabulated in an obituary, as recommended in the circular of January, 1864, from the Colonial Office.

Continued fever has prevailed in several of the wards, and among the domestics, attendants, and officers of the institution. These last suffered severely in the Summer from common or English Cholera, from which the patients were fortunately exempt.

EXTENSION OF THE HOSPITAL.

Through the liberality of the Legislature, a grant was passed at its last session enabling the Government to add largely to the present building. Having in former years strongly advocated Hospital Extension, it affords your Superintendent great pleasure to be able to announce a satisfactory commencement of this important work.

The centre building and two sections of the north wing are under contract. The excavation for the basement has been begun, and materials are being actively collected on the grounds for early construction on the opening of Spring.

The addition now being built will give room for ninety additional patients, besides affording more space for those already in Hospital by vacating the apartments at present occupied by officers of the institution.

The original plan is adhered to, except that a considerable portion in the rear of the centre building is omitted, the necessity for this portion being obviated by the present structure, in which the cooking, washing, baking, &c., are carried on.

It is anticipated that the work now commenced will be completed in two years.

IMPROVEMENTS.

In accordance with the recommendation of the Committee of Assembly on Humane Institutions, extensive improvements have been made on the grounds this past season.

A gravelled road of easy grade has been made from the Hospital wharf to the brow of the hill on the north boundary, and a brick drain of ample dimensions,

about twelve hundred feet in length, has been constructed in the most substantial manner, leading from the rear of the boiler-house to the harbor, opening at half tide. This will prove a most important addition to our former drainage, and will serve also for the new wing, and for further extension as well.

In close proximity to the boiler-house a new coal depot has been built, capable of holding nearly four hundred chaldrons. Besides protecting the coal from rain and snow, to which it was formerly exposed, this building affords space for storage of meat, flour, butter, and other supplies, and serves to shield from the weather all the vehicles in use about the establishment, besides giving room for workshops and for other purposes.

Further progress has been made this year in planting shade and ornamental trees, and otherwise improving the grounds. An unsightly precipitous bank on the harbor side has been sloped off and sown in grass. An additional piece of land has been prepared for cultivation in front of the Hospital, and thoroughly trenched. The new field in the rear has also been much enlarged and effectually drained.

An orchard house for the cultivation of peaches, grapes, &c., has been built by your Superintendent, on the slope overlooking the kitchen garden.

OCURRENCES OF THE YEAR.

The Hospital has been honored by visits from His Excellency Sir R. Graves MacDonnell, who manifested a warm interest in its extension. He was accompanied on one occasion by E. A. Meredith, Esq., Chairman of Board of Inspectors of Prisons, Asylums, &c., Canada, who was pleased to signify his cordial approval of our arrangements and appliances. Medical officers of other Asylums have also favored us with visits of encouragement. The practical sympathy and valuable advice of professional gentlemen versed in the specialty are of essential service.

Through kindness of Dr. J. Bernard Gilpin and Dr. A. J. Cowie, of Halifax, in doing duty for your Superintendent, (which he desires publicly and thankfully to acknowledge,) he was enabled to attend the Annual Meeting of the Association of Superintendents of American Hospitals for the Insane, held at Pittsburg, Western Pennsylvania, in June last. The opportunity of visiting other similar institutions and of frequent consultation with leading men in the specialty, was highly appreciated; and the month's leave kindly granted by your Board for this purpose is gratefully acknowledged, as is also the uniform courtesy and support manifested on all occasions.

The American Institutions for the Insane are patterns of cleanliness, neatness, and good order, and are highly creditable to the several States in which they are situated. The late war, now happily at an end, does not appear as yet to have added to the number of inmates in their Asylums. Doubtless, this effect of so serious a conflict will be clearly manifest in future years.

We have admitted two voluntary patients this year on the male side; one whose insanity (in a legal sense) is very doubtful; and another who has been temporarily received pending the decision as to his real mental condition. These are by no means desirable inmates of an Hospital, but it is not our province to exclude any because they are troublesome or disagreeable. Probably the doubt now hanging over these cases will eventually be removed by such unmistakeable evidence of insanity as will set the matter quite at rest.

Among the females, we have a case of moral perversion, scarcely eligible here, and yet with strong claims on our sympathy. The patient is cheerful, industrious, and well-behaved, manifesting no aberration here; but so outrageous in her conduct and language, both at home and at school, as to have been considered entirely beyond endurance.

The number of private patients bears a fair proportion to the total number of admissions. Every rank in society is liable to insanity, which, like death, is no respecter of persons. Our table, headed "Previous Occupation," shows that we have been called to admit persons of every grade. It has been our aim to adapt the Hospital to the mixed character of its daily population.

One of the noteworthy occurrences of the year was the short supply of water from Maynard's Lake during the hot months of summer. It failed to rise to the hot water tank in the attic, and consequently we were for some time deprived of our usual supply for bathing purposes. The discovery and repair of a small leak near the boiler house had a marked effect in giving an increased pressure to the water, so that it rose to the cistern as before, and has continued to flow ever since.

ACKNOWLEDGMENTS.

Year after year we have the gratification of returning thanks for the numerous kindly expressions of interest in the insane. Without attempting to give undue prominence to the claims upon public sympathy to which the helplessness of this class entitles them, we desire to record their lasting gratitude for favors bestowed, and their correct appreciation of generous acts.

The inmates have this year been favored, for the first time, with an excursion to Windsor, a distance of forty-five miles. The Railway Commissioner, A. Longley, Esq., very kindly placed two passenger cars at their disposal; and John R. Handley, Esq., with his customary liberality, not only provided a steamer to convey the party to and from the station, but ordered a substantial dinner for the excursionists at King's Hotel. The treat was indeed a rich one, and was enjoyed by a large number of the household, no less than sixty having joined in the festivities of the day.

Several musical entertainments have been kindly given during the past year. The first by the "Rosebud Band of Hope,"—singing and recitations; next by Miss Pilsbury (now Mrs. Bourinot) and friends; another by Miss Nordbeck and friends; and one by the celebrated Hoffer family. For these we desire to tender the gratitude of the whole household.

An interesting lecture on the "Pilgrim's Progress," by Rev. John Lathern, and an enlivening reading (the "Wedding Breakfast" and other selections) by F. Sturges, Esq., also demand our thankful acknowledgment. We are likewise under obligation, for recitations, &c., to Dr. J. Stewart of H. M. S. *Sphinx*, formerly of the Belfast District Hospital for the Insane.

We are indebted to the Lord Bishop for a donation of Prayer Books; and to James H. Thorne, Esq., Deputy Provincial Secretary, and Henry W. Johnston, Esq., for copies of the Revised Statutes, Journals of Assembly, and other public documents; and for Church's large Map of Halifax County.

John R. Handley, Esq., besides furnishing the treat at Windsor, already alluded to, has kindly continued to forward regularly the "Evening Mail," "Illustrated London News," and "Punch," with occasional copies of other papers.

We are under renewed obligation to the Press. The "Presbyterian Witness," the "Christian Messenger," the "Provincial Wesleyan," the "Acadian Recorder," the "Morning Journal," the "British Colonist," the "Morning Chronicle," the "Evening Express," the "Sun and Advertiser," the "Halifax Reporter," the "Halifax Citizen," the "Abstainer," the "Eastern Chronicle" (New Glasgow), and the "Colonial Standard" (Pictou), are received regularly as heretofore. To these the "Western Record" (Bridgetown), "Ross's Weekly" (Charlottetown, P. E. I.), and recently the "Acadian" (Wolfville), have kindly been added. As stated in former reports, this continued attention on the part of the Press is very highly appreciated. The papers are eagerly enquired for, and the greatest interest is shown in learning the news of the day, domestic and foreign.

To James Wilson, Esq., late of Newfoundland, we are indebted for a young seal, a most interesting object, (kindly conveyed by Capt. Gulliford); and to C. D. Boggs, Esq., of Boston, for two pairs of Gold Fish, with Globe.

Mrs. H. Y. Mott has continued to send bountiful supplies of cake and fruit for our Christmas and other parties, and in many ways has shown great kindness to the patients.

Miss McMurray has once more presented a box of artificial flowers.

J. R. Woodburn, Esq., of Glasgow, has gratuitously taken photographs of the

Hospital and Detached Building, and has presented us with views of Dartmouth and the Eastern Passage, taken from Mount Hope.

To these and other kind friends who have manifested their continued interest in this Provincial Charity, it is our pleasing duty to return the warmest thanks.

REQUIREMENTS.

We still need, as stated in former reports, an additional Hot Water Tank, an enclosure or airing ground for exercise, and a sun-shade for patients. Our Hot Air Chambers require flooring with brick or cement. A shed to enclose the Gasometer is recommended, and further repairs are requisite in three of the wards.

CONCLUSION.

Anticipating increased difficulties in the management of the Hospital next year, owing to the large number of men to be employed in building operations, we yet hopefully commend the entire institution to Divine protection.

JAMES R. DEWOLF, M. D., Edin.,

Superintendent.

MOUNT HOPE, *January 1st*, 1866.

EXPENDITURE FOR LABOR, AS SHOWN BY THE PAY LISTS; ALSO FOR SALARIES, 1865.

November	324 36	
December	323 79	
Salaries	715 00	
		————	1688 92
			\$6807 29

Owing chiefly to the rise in the contract price of the principal articles of daily food, (as shown by the accompanying table,) the expenditure under this head has been considerably above that of last year. The relative cost of attendance has been slightly diminished. The charges for both these items show \$98.95 per patient, in 1865, against \$91.85 in the previous year.

*Office of Board of Works,
Halifax, N. S., Sept. 30th, 1864.*

*Provincial Secretary's Office,
Fredericton, 30th Sept., 1865.*

SIR,—

Referring to a letter from this office, dated 16th May, 1863, addressed to the Hon. Hugh Munro, and to R. W. Cruikshank's report, dated 23rd August, 1864, copies of which are enclosed herewith, I beg to inform you that no reply has been received, so far as I am aware from your Government to either of these documents.

In the absence of any agreement between the two Provinces, and admitting the correctness of Mr. Cruikshank's report, of which we have no reason to doubt, why should this Province be called upon to contribute in support of your light when the benefit received by Nova Scotia from our lights is greater than that received by New Brunswick from your lights.

The annual grant made for a number of years by this Province for support of Cape Sable and Seal Island Lights, and of Brier Island Light, seems to have been a voluntary thing on the part of this Province (so far as can be ascertained), and the sums *paid* by this Province have never varied in amount since first granted.

Will you please inquire into the matter and inform me of the result for the information of the Administrator of the Government in Council.

I have, &c.,

(Signed) A. H. GILLMORE, JUNR.

The Hon. CHARLES TUPPER,
Provincial Secretary, Halifax, N. S.

*Office of Commissioners Public Institutions,
St. John, 23d August, 1864.*

SIR,—

According to instructions, I have had a map made of the Bay of Fundy, shewing the various light houses, together with the date of erection, on the coasts of Nova Scotia and New Brunswick.

Our Province has for a number of years past contributed to the support of the lights on the Nova Scotia coast, viz., \$400 to Brier Island light, and one-half expenditure of Seal Island light; and at looking at the preponderance of lights supported by our Province, would suggest that the Government take into consideration the propriety of withholding in future such assistance, and in view thereof, beg to bring under your notice the following facts:

The coast of Nova Scotia, on the Bay of Fundy from Seal Island, exceeds three hundred miles, exclusive of Annapolis and Minas Basin.

The coast of New Brunswick, including Grand Manan, is only about 200 miles. New Brunswick maintains on and near her coast *ten* lights and one beacon, *all* of which are useful in the general navigation of the Bay.

Nova Scotia has, exclusive of her inland water, seven lights generally useful, and two breakwater lights; yet New Brunswick has contributed to the support of two out of the seven coast lights. So that New Brunswick really maintains eleven lights, and Nova Scotia six.

If the light houses are to be jointly maintained, the proportion due to the coast line would be, ten for Nova Scotia and seven for New Brunswick.

On this view, so far from New Brunswick paying for Nova Scotia lights, Nova Scotia should defray the cost of three on the coast of New Brunswick.

The map referred to goes forward per mail.

I have, &c.,

(Signed) R. W. CRUIKSHANK,
Secretary.

Hon. S. L. TILLEY, Provincial Secretary.

*Provincial Secretary's Office,
Fredericton, 16th May, 1863.*

SIR,—

I have received through R. W. Cruikshank, Esq., your accounts against this Province for the maintenance of Brier Island and Cape Sable, Seal Island Lights, for the year 1862. Mr. Cruikshank reports that the sum required for the

latter establishment is nearly double the amount which has been remitted in any former year.

I have not been able to ascertain the nature of the agreement between your Province and this in regard to the maintenance of Cape Sable, Seal Island Light. Would you therefore be so good as to furnish me with a copy of it; or inform me where I can find it.

The agreement between the Provinces in regard to the maintenance of St. Paul and Scataric Lights is fully recited in our laws, but not so as to Cape Sable Lights.

I have, &c.,

(Signed) S. L. TILLEY.

The Hon. HUGH MUNROE,
Chairman Board of Works, Halifax, N. S.

*Provincial Secretary's Office,
Halifax, 6th February, 1866*

SIR,—

I have to acknowledge the receipt of your letter of the 30th Sept. last, on the subject of the amount heretofore contributed by the Province of New Brunswick towards the support of Seal Island and Brier Island lights, and also of the two enclosures contained in that letter, the one from the Hon. Mr. Tilley to the chairman of the Board of Works bearing date the 16th May, 1863, and the other from Mr. Cruikshank to the Hon. Mr. Tilley, dated 23d August, 1864.

Brier Island light is of very early origin, and so far back as I can trace it, has been jointly supported by Nova Scotia and New Brunswick. It was rebuilt in the year 1834, at an equal expense to both Provinces, and has ever since been supported by them jointly.

In 1826 our House of Assembly passed the following resolution :

“*Resolved*, That this House will contribute ratably with the Government of New Brunswick for establishing and supporting a light house on one of the Seal Islands, at the entrance of the Bay of Fundy ;”

And in 1830, in committee of the whole House :

“That it appears to the committee that the Legislature of New Brunswick has agreed to pay one-half of the expense of erecting a light house upon one of the Seal Islands, and have already voted the sum of £500 towards it.”

In 1832 the committee report “the building of a light house on Seal Islands for £1009 3s. 8d., one-half of which sum £504 11s. 10d., has been paid by the Province of New Brunswick.”

As I am not in possession of your Journals previous to 1832, I cannot refer to the resolutions of your House on this subject. It is quite evident, however, that half the expense of the building was shared by New Brunswick, and that that Province has ever since contributed towards its maintenance. Though I am unable to find any particular agreement, still I think that after reading the following resolution from your Journals of 1832, page 98, it can scarcely be questioned that a distinct understanding, or agreement must have been entered into between the Provinces. Among the grants for that year appears the following.

“And also a sum not exceeding £200 to enable the said Commissioners to pay to the Commissioners for light houses in Nova Scotia the *proportion which this Province is to pay towards the support of the light house on the Southern Seal Island.*”

The same liability seems clearly recognized in the 5th section, chapter 20. Revised Statutes of New Brunswick, which, in referring to the lights in the Bay of Fundy, placed under the charge of the Commissioners, includes “such as are supported jointly by Nova Scotia and in this Province.”

Mr. Cruikshank, in his letter of 23rd August, 1864, assumes that New Brunswick is unfairly taxed for the support of three lights on the ground of the relative length of the coast line of the two Provinces on the Bay, and the number of their light houses respectively. Any estimate so based, would, I think, prove entirely

unjust and erroneous, for clearly the fair proportion to be paid, irrespective of any agreement or precedent, can only be estimated by ascertaining the relative value to the Trade and Commerce of the two Provinces of the lights in the Bay of Fundy.

The importance of Seal Island Light to vessels approaching the Bay from the Eastward cannot be too highly estimated, and scarcely second to it, is that of Briar Island. To the greater portion of the trade of St. John and other ports on the Bay these lights are indispensable.

To give some idea of the extent of that trade, I would refer you to the following facts taken from your financial statements for 1864, and I will confine myself to the port of St. John alone. During that year, 404,179 tons of shipping cleared from St. John, or more than one half of the entire clearances of the Province, which was some 742,690 tons. Now the greater part of this shipping receives a direct benefit from the lights in question, and as it passes by them without entering a Nova Scotia port, contributes light duty, not to this Province, but to New Brunswick; and accordingly we find that the light duty at St. John alone amounts to \$1,146.40, or more than one-half of the total duty of the Province, and a large proportion of this must have been paid by vessels which had used our lights (to them most important ones), without paying a dollar into our treasury.

The shipping tonnage which, during nine months of 1864 cleared from all the Nova Scotia ports in the Bay of Fundy, and all ports of which that Bay is the outlet, amounted to about 220,000 tons, while that of the whole Province was some 776,000 tons; but out of this 220,000 tons, should be deducted some 86,000 which cleared for ports in New Brunswick, and consequently paid light money there,—a much greater amount of tonnage than enters Nova Scotia ports from New Brunswick.

During the same period the light duty collected from the Bay of Fundy and adjacent ports amounted to about \$3700, or a little more than one-tenth of that of the whole Province which amounted to \$35,875 85.

The foregoing figures will be found if not perfectly exact, at least nearly so.

It seems obvious from the consideration of the preceding statistics that the trifling sum which New Brunswick pays into our treasury for the support of the two lights in question is entirely inadequate to the amount of advantage accruing from their establishment and maintenance to the trade and commerce of its Bay of Fundy ports. This view is entirely in accordance with that taken by a committee of our House of Assembly in 1858, who, on reporting on Navigation Securities, made use of the following language, Appendix 17, page 155:

“Nova Scotia has, as before stated, 38 light houses, besides humane establishments, which, in proportion to population and resources, must far exceed those of any other country, and being as we are the breakwater for nearly all the Lower Provinces, your committee believe the amount contributed by New Brunswick, Canada, and Prince Edward Island, entirely inadequate to the advantages they receive, and that a more equitable adjustment should be agreed on.”

I may add that Nova Scotia has at the present time 51 light houses, costing for their yearly maintenance \$36,742, and that the amount of light duty raised last year was \$35,875. New Brunswick has, I believe, but 13, at a cost of some \$12,000, and the amount of light duty received in 1864 was \$21,363. It will thus be seen that your Province has from this source a considerable net income, while Nova Scotia has to draw on her general revenues for the annual light house expenditure.

The amount due from New Brunswick for the last few years has always been credited in our estimates, and I trust your Government, after this explanation, will transmit the amount to the chairman of our Board of Works.

I have, &c.,

(Signed) CHARLES TUPPER.

Hon. A. H. GILMORE, Junr., Provincial Secretary,
Fredericton, N. B.

APPENDIX No. 16.

MARRIAGES, BIRTHS AND DEATHS.

*Financial Secretary's Office,
Registration Department,
Halifax, 15th Feb'y, 1866.*

SIR,—

In accordance with the requirements of the Registration Act, I have the honor to submit to you a report of the marriages, births, and deaths that have been registered in this province during the financial year, ended 30th September, 1865.

It is necessary to state at the outset, that the fact of the law requiring the registration of all marriages, births, and deaths, having been in operation for a comparatively limited time, and being, consequently, but imperfectly understood by the people, has prevented the attainment either of that accuracy or completeness which is so desirable and so necessary in work of this description.

It is satisfactory, however, to be able to state that a great and rapid improvement is taking place in the character of the returns generally, from all parts of the province, and that those of last quarter exhibit an increase of fully fifty per cent over any preceding one since the act came into force.

Still, though the facts which have been collected and tabulated are not by any means so full as might be desired, or may be expected in subsequent reports, they present an amount of important information which it is to be hoped will enable the people of this province to understand and appreciate its value.

During last year, ended 30th September, 1822 licenses were returned to this office, representing the number of marriages celebrated in this manner. The marriages by proclamation of banns, by similar returns amount to 499, making a total of 2,321. The number given in the tables is only 2,222, but the return of marriages, celebrated in Halifax city by banns, between persons belonging to the Catholic denomination has come in since these tables were made up, raising them to the former number.

The number of births registered throughout all the counties of the province was 2,377, exclusive of 514 children in Halifax in connection with the Catholic church, the report of which was received too late to be included in the tabular statement.

The deaths registered amount to 1590, making the excess of births registered over deaths 787, or something above 50 per cent, which is about the same as in England, and considerably higher than in the state of Massachusetts. In making this statement it is assumed that the same ratio between the number of births and deaths registered would have been maintained had the whole number which took place in the province been actually entered; and there is every reason to believe that this assumption is very nearly correct, seeing that the same ratio is observed with remarkable regularity in nearly all the counties when taken independent of each other.

MARRIAGES.

It has already been stated that the total number of marriages made known to this office, as having taken place in the course of the last financial year was 2,321. There can scarcely be a doubt, however, that a good many of those celebrated by banns have escaped registration from not having been returned by clergymen. Those by license must be correct or very nearly so, and it is to be regretted that through mere oversight the same accuracy has not been reached with regard to the

former. But taking oven the *data*, so far as given, the result is ominently satisfactory as regards Nova Scotia. It is well known that the marriage rate is one of the most reliable tests of the prosperity of a country, as it is found to rise or fall with good or bad years with great regularity.

In 1863, 173,510 marriages were solemnized in England, with a population of 20,554,137, making one marriage to every 118 persons, or 8.44 per cent, while in Nova Scotia, according to the present return, there is one for every 140.

This, however, is not a fair criterion at all, for Cape Breton, with a population of 65,000, makes a return of only 142 marriages, the reason being that the great majority of people in that island, both Catholic and Protestant, are married by banns, of which, but imperfect returns have been made. If, on the other hand, we take the county of Halifax, we find that the rate of marriage is about 1 to each 100 of the population, of Cumberland county 1 to 110, of Pictou 1 to 116, and Kings 1 to 120, which is remarkably high. Perhaps it may be as well to give here the marriage rate of all the counties, from which it will be seen that in most of them it is, compared with that of other countries, very satisfactory.

In Annapolis it is 1 to 128 persons in the county; in Colchester 1 to 128; Digby 1 to 150; Guysborough 1 to 133; Hants 1 to 135; Yarmouth 1 to 104; Queens 1 to 120; Shelburne 1 to 150,—while the remoter counties of Antigonish, Cape Breton, Richmond, Inverness, and Victoria, represent only 1 to 400 of the population. The returns from these districts will in future probably be as full and accurate as the others, and that they are not so now, is owing to causes which can be remedied, and doubtless will be remedied, through the friendly co-operation of the clergymen belonging to the different counties.

Of the 1822 marriages returned as solemnized by license, 428 were Episcopal, and 1394 non-Episcopal; the ratio being Episcopal 23.5 per cent, and non-Episcopal 76.5 per cent of the whole number.

During the October quarter of 1865, 137 Episcopal, and 478 non-Episcopal licenses were returned, being an excess of 76 over the corresponding quarter of the previous year. Of the 1394 non-Episcopal licenses returned for the financial year, 477 were used by the Baptist denomination, 453 by the Presbyterian, 210 by the Methodist, 172 by the Church of Scotland, 28 by the Lutheran, 28 by the Congregational, 6 by the Roman Catholic, 6 by the Universalist, and 1 by the Evangelical Union Body. There were also 23 licenses returned by the Reformed Presbyterians.

In proportion to its population, the county of Cumberland uses the greatest number of licenses, 172 out of a population of 19,533; and Richmond the smallest, being only 8 out of upwards of 12,000 people. We are not, however, to conclude from this fact, that the marriage rate is necessarily lower in Richmond than in Cumberland, as the great bulk of the people in the former county are married by banns.

By taking the relative number of licenses used in the course of the year, we will discover, with tolerable clearness, the actual marriage rate of the province. The Church of England used 428 licenses, which is 1 to 112 of the adherents of that church; the Presbyterians, 1 to 154; the Church of Scotland, 1 to 112; the Baptists, 1 to 132; the Wesleyans, 1 to 162; and the Congregationalists, 1 to 80. The number of the Lutherans and that of the Reformed Presbyterians, being either not given, or not reliably given, in the last census, the ratio in their case cannot be ascertained. It will be observed, from the tables, that only 6 Catholics, out of a population of 90,000, have availed themselves of marriage licenses.

It is to be regretted, that the same minuteness cannot be carried out during the present year, with regard to marriage by banns. The returns are not full, and in many cases it has been found difficult, in consequence of the manner of the return, to determine to which denomination to apportion it. Measures, however, are being taken to prevent a recurrence of this. The Catholic body, as already observed, have marriage solemnized almost wholly by banns. The number of marriages so solemnized belonging to this denomination, so far as returned, are as follows: Halifax city, 93,—county, 26; Antigonish, 39; Cape Breton, 9; Digby, 46; Guysboro, 14; Inverness, 31; Richmond, 14; and Yarmouth, 2;

making a total of 274, which probably does not much exceed one-third of the actual number. The number for Halifax city, however, is correct, and will give a ratio of 1 to 120 of the denomination, which is about the average of the other denominations. Taking the number of Halifax city as the ratio, the Catholic marriages in the province would be about 700, which is probably nearly correct.

It is impossible, for reasons already stated, to give the number belonging to each of the other bodies; nor would it, in the present state of the returns, be of much value. A considerable proportion of the Presbyterian body in Cape Breton, are married by banns; but of the other Protestant denominations throughout the province, the proportion is small, but will, in all likelihood, be ascertained with an approach to correctness in the next annual report.

In table No. II., appended to this report, the returns of marriages solemnized for nine months, ended 30th September, 1865, are interesting and worthy of study. Of the 1,381 marriages returned by clergymen within this period, 1,114 were contracted between bachelors and spinsters; 95 between widowers and spinsters; 35 between bachelors and widows; and 28 between widowers and widows. It will thus be seen that 83 per cent. of the males married were bachelors, 9 per cent. were widowers, while only 4.5 per cent. of females entered the married state for the second time. These proportions are somewhat different from those of England, which show 13.5 per cent. of remarriages by men, and 8.8 per cent. by women. In Massachusetts, the proportion of males remarrying is about 12 per cent.

A belief prevails very generally, that people now marry later in life than they did formerly. The absence of registration tables prevents us from verifying the fact as regards this province, though it is undoubtedly the case in New England. In England, however, statistics prove that the number marrying early in life is annually increasing. In 1863, in every 100 marriages, 6.61 per cent. of the men, and 19.90 of the women, were under 21 years of age, while in 1841 the proportions were respectively, 4.41 and 13.29. In Nova Scotia, only 2 out of every 100 of the males are under 21 at the time of marriage; while the proportion of females is 20 out of every 100. Only 8 per cent. of women are married above 30, and the ratio begins to decrease rapidly after 26. The greatest age of the man and woman respectively, given in the marriage returns, is 72 and 70; the least, 18 and 15. In a large proportion of the returns, the age of the parties is not given. This important omission has rendered it impossible to tabulate, in a satisfactory manner, the marriages according to ages.

Of the 2,762 persons returned as having been married during the last nine months of the financial year, 2,284 were natives of this province; 262 of other colonies or countries; while the nationality of 216 is not given. This gives only 9.5 per cent. to the foreign element, which proves to how small an extent Nova Scotia is affected by immigration. Indeed, the amount is scarcely appreciable in any of the counties, with the exception of those of Halifax, Pictou, and Cumberland; the number not Nova Scotian in each respectively being 140, 40, and 28. In six counties, all the persons married were native born.

The marriage rate in Nova Scotia, as nearly as can be ascertained, is 1.7 per cent., or 1.700 persons to 100 living. In Scotland, the rate is 1.424; in England, 1.688; in France, 1.600; in Austria, 1.734; and in Massachusetts, 1.716.

BIRTHS.

The population of Nova Scotia, as given in the census of 1861, is 330,857. In 1851 it was 276,122; showing an increase of 54,735 in ten years, being equal to about 20 per cent. in that time. Assuming that the same ratio of increase has been going on, the present actual population may be put down at about 364,000. In England, the annual average birth rate is 3.469, or nearly three and a-half to every 100 persons living. In Massachusetts it is only 2.4, and has been steadily decreasing for many years. In 1860, it was equal to nearly 3 to each 100 persons. In France, it is 2.636, and in Austria and Italy 3.9, or nearly 4 to each 100 persons living. Having no previous tables of reference for Nova Scotia, and the returns for the present year being very incomplete, the birth rate in this province cannot be reached. There can be little doubt, however, that it is higher than

in New England, and probably, at least equal to that of Great Britain. In arriving at this conclusion, we have been guided by certain facts, which, to some extent, afford a key to others. The births, or baptisms, for example, recorded in Halifax city in connection with the Catholic Church, during the past year, are 514. The population of this body in 1861 was 11,649; adding 10 per cent. for natural increase, it will now be about 13,000, in which case the birth rate is not only higher than that of England, but equal to the high rate of Italy or Austria. It is highly probable, therefore, that we are safe in assuming the rate to be not inferior to that of the mother country. If such is the case, the number of children born annually in Nova Scotia will amount to 13,000, or about 36 every day in the year. The whole number, however, that has been registered during last year is only 2,377, or very little more than one-sixth of the whole. There are serious difficulties in the way of reaching a complete registration of births and deaths in a sparse and scattered population; but it is of the utmost importance, for many reasons, that it should be as full and correct as circumstances will admit. The birth rate of England has been ascertained only through the medium of registration; and from it we know that it is equal to 1 infant born annually for every 28 persons living. In the same way, we learn by means of registration, that the birth rate in the New England States, or, at any rate, in Massachusetts, is only 1 to 41 persons living. We know more; for by referring to the returns for past years, we discover that in these States the rate is steadily decreasing; having been 1 to 34 in 1860. In England, the excess of births over deaths is 59 per cent. In Massachusetts, it was in 1863 only .205 per cent. The principality of Wales contains about the same population as the last mentioned State; and we find that the births and deaths of the former, in 1863, were 45,755 and 28,159 respectively, while those of the latter for the same year were 30,314 births and 27,651 deaths; that is, the births in Wales exceeded those of Massachusetts 50 per cent., while the death rate in each was not far from an equality. It would thus seem that the vitality of the New England States must be kept up by an influx from without, and should that foreign current cease to flow, the country would begin to lose ground. These facts have been arrived at through data, of unquestionable reliability, and they are of very grave importance, indeed. These data, as regards Nova Scotia, are not within our reach, simply from want of complete registration. Yet we can, with the material under our hand, make an approximation at least to certain desired conclusions.

We have already stated that our tables exhibit an excess of births over deaths equal to 50 per cent, and that there is every reason to believe this to be about the actual ratio. Thus the real excess of births over deaths in Nova Scotia will be about 6,000 per annum, which will, therefore, represent the natural increase of the province; and, so far, this result agrees very closely with the facts brought to light by the census of 1861.

The relative proportion of male and female births is a matter of considerable interest; and it would seem that the ratio, taken upon a scale sufficiently large, amounts to something like a fixed law. In England, it is at the rate of 107 males to 100 females, and this proportion never materially varies. In the New England States, it is very nearly the same; and in Nova Scotia, the returns give a result almost exactly equal to those of Great Britain. The number of males registered last financial year, was 1,220; that of females, 1,149, making the proportion 107.5 males to 100 females, which may be taken as the correct ratio between the number of the sexes in this province. The census of 1861 gives a somewhat different result: 165,233 males, and 164,942 females, or 101 to 100, which can scarcely be correct, seeing that it conflicts at once with the relative proportion of the sexes in other countries, and with the results yielded by the returns of the past year; and it may also be observed that in 14 out of the 18 counties, the same excess of males is maintained.

In all registration reports, the per centage of illegitimate births is carefully noted and given. The proportion given in Massachusetts is 1 to 108, or less than 1 per cent. In England it averages 7 per cent., or nearly 7 to every 100 children born, while in some counties of Scotland it is as high as from 10 to 14 per cent. of the whole birth rate. In Nova Scotia, the returns have been only nominal;

not more than six or eight having been given altogether. The same may be said with regard to still-born infants, of which no statistics have been given. It would be of great importance, in a social and moral point of view, to be in a position to present accurate returns of the comparative number of both classes; but this, for obvious reasons, can scarcely be expected, till the system of registration itself has been better understood and generally attended to throughout the province

DEATHS.

Systematic registration is the only means by which the death rate of a country can be ascertained; and it is by the death rate alone that we can judge correctly of the influence of the climate upon health, as well as the comparative salubrity of particular localities. It is thus evident that this portion of the system is of prime importance to the social well-being of a state, inasmuch as it makes known not only the amount of mortality, but in many cases by pointing out the peculiar habitation and lethality of particular diseases, has led to investigations resulting in remedy, by the application of sanitary measures.

It thus appears in most civilized countries, that longevity, compared with former times, is steadily gaining ground, and that a certain class of diseases, which once swept over a country periodically, as a destroying pestilence, are now confined within limits which are ever becoming narrower. Indeed, it may be said that the death rate of a country is a criterion not only of the character of the climate as regards health, but of the character of the people as regards social progress.

The mortality of England is 2.3 to every 100 persons in it, varying considerably, however, in different counties, the two extremes being 1.7 and 2.6 to 100 respectively, that is while 170 people die in the one locality, 260 die in the other. The low rate is in the retired and rural county of Westmoreland, the high rate in the cotton manufacturing and great commercial county of Lancashire.

The effect of drainage and a good supply of pure water upon the sanitary condition of a town, is shewn in a striking manner in the case of Salisbury, quoted by the Registrar General of England. That town has been thoroughly drained and sewered. Before the drainage the mean annual mortality was 268 out of 9,000. Last year it was only 162, and for the last five years the average has been 185. Many other instances might be adduced, proving to how great an extent both infant and adult life is dependent upon pure air and pure water.

In Nova Scotia 1590 deaths were registered during the past financial year, 847 males, and 743 females, which is probably a little more than one-fifth of the actual number. That number, however, is sufficiently large to afford a tolerably correct ratio of the comparative length of male and female life, and also of the proportion of deaths of the sexes. The number of males exceeds the number of females in the province by 7 per cent; but the death rate of the former is greater than that of the latter by 14 per cent, that is 114 males die for every 100 females. In England the excess is equal to 5 per cent, and in the New England States about 10 per cent. The conclusion drawn from this is, that the unhealthy influences of the atmosphere, or in other words, the liability to contagious diseases is greater at a certain age among males than females.

Of the 1590 deaths registered, the age of 58 of the number has not been given. Of the remaining 1532, 187 died before they had reached the age of one year. Before the fifth year 375 were dead; before the 15th year 426; before the 25th 666; before the 34th year 819; before the 45th 947; before the 60th 1117; and by the time the 70th year was approached only 243 of the original number remained alive; 122 died between the 70th and 80th, 77 between the 80th and 90th, 22 between the 90th and 100th year of their age, while at least 4 either reached or exceeded 100 years. The greatest age recorded is in the city of Halifax, where one individual reached the venerable age of 107.

From the above summary it will be seen that 12 per cent of the population dies before the first year, and that one-fourth of the whole is cut off under 5 years. By the 25th year nearly one-half has perished, and by the time 70 years are reached only one-twelfth is found to survive. If we compare the ratio with that of England, as given by the Registrar General, it will be found that the mortality

in early life is much greater than here. The proportion under one year is nearly a fourth, and under five years it is more than a third, while in Nova Scotia not more than 25 per cent of the population is lost under the fifth year. In all England there are only 213 persons registered as having passed their 95th year in 1863, while the number in Nova Scotia is 10. In proportion to population the former to be on an equality with the latter should have had 556.

Table V., from which these facts have been deduced, is a most valuable and instructive one, and well worthy of attentive study. In point of longevity there appears a marked difference in the various counties. Pictou is perhaps the most remarkable, for out of 125 deaths recorded, 15 are above 80, 7 above 90, and 2 above 100. Those above 90 and 100 were all natives of the Highlands of Scotland. Cumberland also stands well, having 4 above 90, two of whom were 99, all but centenarians.

The registration has not been sufficiently large to enable us to conclude with certainty as to the average age reached in Nova Scotia. It may be stated approximately as being between 31 and 34 years. In Massachusetts it is given as 30.

By reference to Table VI., it will be seen that the diseases to which man is subject are very many, attacking him at every age, and at all seasons. This table is by no means as satisfactory as it ought to be, arising from the absence in many cases of medical certification. In England and the United States this department of registration is very complete, and most valuable. Indeed, the statistical nosology of a country is, perhaps, of more importance than any other portion of its statistics, as it is the surest key to all sound and reliable sanitary science. Accordingly in both countries mentioned, we find that diseases for purposes of registration have been arranged into groups, and these groups are sub-divided into classes and orders. The groups are five. Zymotic, Constitutional, Local, Developmental diseases, and violent deaths. The Zymotic group, which includes all contagious diseases, &c., is the most formidable, destroying about one-half of the human race, while of the Constitutional, consumption carries off the greatest number of victims. In this table it has been found possible to adhere only partially to this very complete and scientific arrangement, in consequence of the imperfect manner in which the diseases in many cases have been certified. The table is given rather as an indication of what might be, than of what has been attained.

Out of 1590 deaths, the cause of death has been given only as regards 1194, and we must refer to the table itself as a sort of guide to the comparative prevalence and mortality of certain diseases in this province. It will be seen that here as elsewhere, consumption is the great destroyer, for if we include under it the kindred diseases of Pneumonia, Bronchitis, and Asthma, about one-fourth of the deaths are to be attributed to its influence. Fever under its various forms would seem to carry off one-twelfth, while Dysentery and disorders of the bowels are still more deadly.

Of consumption, the greatest number of cases, taking population into account, has been returned from the counties of Halifax, Colchester and Kings. Digby has suffered most severely from Diphtheria; Yarmouth from Fever,—while in the small town of Dartmouth, with a population a little exceeding 3,000, 22 deaths were registered during the months of August and September as having been caused by Dysentery, being an annual mortality equal to 1 in every 23 persons; the average number for all diseases in England being 1 in 43.

During the past year 51 persons have been drowned in different parts of the province, 23 have lost their lives by accidents in the form of being crushed by machinery, thrown from waggons, or from the falling of trees. Ten were found dead, the cause being unknown. There were 6 cases of suicide, 3 by hanging, 1 by poison, and 1 by cutting the throat. In England the average proportion of suicides is 66 to 1,000,000 of the population, a rate about four times higher than in this province.

Table VII. gives the causes of death in the county and city of Halifax, arranged according to ages. From this table, the period of life at which certain diseases are most fatal, may be ascertained with some degree of correctness. Cholera infantum, convulsions, diarrhoea, dysentery, hydrocephalus, and scarlatina, have been most fatal to infant life during the past year in Halifax; while 27 out of

38 cases of consumption terminated fatally between the 20th and 40th years of life. If a similar table could be given of all the counties, divided into periods of three months, so as to indicate the season at which a particular disease is most prevalent, data might be gained of the greatest possible value, both to the medical profession and the community at large. It is to be hoped that this may be effected in future reports, but it is only possible through the careful and cordial co-operation of the medical men in all parts of the province. There is great room for improvement in this respect, as is shown by the fact, that in the county of Halifax, the whole number of deaths registered last year was 373, while the number of interments, as shown by the books of the sextons of the two cemeteries connected with the city alone, amounts to 565, which may be taken with tolerable accuracy as the actual death rate of Halifax city during the past year.

The number of deaths registered as having taken place in the poor's asylum of Halifax, during the year is 65, out of an average of 353 inmates. If proper inquiry should be instituted, it would probably be found that this very high rate of mortality is largely owing to crowding and imperfect ventilation. Many of the cases, indeed, were of great age, but the average is not particularly high, being 41. The number of deaths registered as having taken place in the provincial lunatic asylum is 9. The greatest age recorded is 71, the least 28, and the average 40. There was one case of suicide by a male, 60 years of age; three cases of paralysis, three of consumption, one of fever, and one of senile dementia.

Such are the leading facts in connection with the deaths which have been registered throughout the province. Some of them are valuable and important, and others too partial and imperfect to justify very confident conclusions. They go far to show at once the value of registration, and the somewhat crude condition in which it is as yet, during what may almost be called the first year of its existence. It is to be hoped that succeeding years will enable the registrar to exhibit a thorough system of statistics in connection with this department. In Great Britain, it has been carried to a high state of perfection; scarcely a birth, marriage, or death escaping registration; while in the United States it is looked upon by the people as a privilege as well as a duty. In this province, the law and the objects of the law seem to be but imperfectly understood.

Perhaps the facts and tabulated statements contained in this report may go some way in explaining the latter, while it may not be amiss to append here the principal provisions of the former. The object of the Registration Act being to secure an authorised and permanent record of all marriages, births, and deaths, which take place in the province, together with all necessary particulars connected therewith, the provisions for obtaining the necessary information, are mainly as follows:

“Every person recognised as a duly ordained minister may solemnize marriage either by license or after publication of banns.

“Deputy registrars are appointed to take charge of certain districts for registration purposes, whose duty it is to record every marriage, birth, and death that takes place in said district. In all the more important or central districts, the deputy registrars are “issuers of marriage licenses,” who record the issue of every license, with the date, and name of the clergyman to whom it is addressed, as well as the names of the parties about to be married, and their sureties; and he is also bound to see that the license is returned after marriage, duly certified, and sent, at the end of every quarter, to the Financial Secretary's office in Halifax.

“Every clergyman is required to register all the particulars of every marriage solemnized by him, whether by license or banns, in sheets which he will receive on application from the issuer of licenses, and which he is to return at the end of each quarter, properly filled up and signed, to the said issuer. The quarters begin with 1st January, 1st April, 1st July, and 1st October.

“To secure the registration of births, the father of any child born in the province, or the person standing in the place of a parent, shall give notice of a birth and the required particulars to the nearest deputy registrar as soon after the birth as possible.

“In recording an illegitimate birth, the name of the father need not be inserted unless he wish it, and the word “illegitimate” must be written immediately under the name of the child.

“To secure the registration of deaths, some person present at the death, or the occupier of the house in which it has taken place, shall in like manner give all the necessary particulars to the nearest deputy, either before interment or within ten days thereafter.

“If a new-born child is found exposed, notice shall at once be given by the party finding the same to the nearest deputy.

“When an inquest is held, the coroner shall communicate the finding to the nearest deputy, within seven days after the holding of the inquest.

“Every duly qualified medical practitioner is to be furnished with a book of blank certificates, and within seven days after the death of the person he has been in attendance upon, shall transmit a certificate of “the cause of death” to the deputy registrar.

“Every registrar is required to make all reasonable efforts to ascertain, for the purpose of registration, all marriages, births, and deaths in his district.

“Envelopes enclosing papers connected with registration pass free through the post office department.

“Every clergyman shall return every license used by him, with the blank certificate endorsed thereon fully filled in, and subscribed by himself, and with the names of two persons present at the ceremony besides himself. This return must be made within ten days after the celebration.

“Every deputy registrar is required to make quarterly returns to the registration department of the Financial Secretary’s office, of all licenses, bonds, and registers of births and deaths in his possession.

“The deputy registrar is entitled to 25 cents for every marriage license he issues, also a fee of 10 cents for every birth, as well as for every death he registers, to be paid by the county treasurer out of the county funds.

“Every clergyman shall receive 25 cents for each return of marriage made to the deputy registrar, if made within the proper time, and also 25 cents for each quarterly return, on the same conditions, to be paid out of the marriage license fund in his hands.

“In order to secure the due performance of these various duties, certain penalties are attached to neglect or refusal.

“Every person who shall officiate in the solemnization of marriage, not legally authorized to do so, by the provisions of this act, shall forfeit \$200.

“Every officiating clergyman who shall neglect or refuse to give the notices directed in the fourth section of the act, shall forfeit \$200.

“Any clergyman, and all persons instrumental in using a license, not duly filled up and subscribed by the deputy registrar, shall be liable to a penalty not exceeding \$200.

“Every clergyman who shall neglect to return a license within ten days after the celebration of the marriage it authorizes, shall forfeit \$4 to the deputy registrar.

“Every deputy registrar who neglects or refuses to perform any duty required by the act, shall for each offence forfeit \$4, payable into the marriage fund.

“Any person who, being required to notify or enter for registry a birth or death, shall fail to do so, shall be liable to a penalty of \$5.

“Any duly qualified medical practitioner or coroner neglecting or refusing to supply a certificate of cause of death, shall be liable to a penalty not exceeding \$5.

“The above fines, penalties and forfeitures may be sued for in the same way as for a private debt.”

Such are the principal provisions of the Registration Act in a comprehensive form, and it only remains to be considered whether there might not be some alterations made in it, calculated to increase its efficiency.

Experience has shown that the smaller the district, the more likely is the work to be overtaken. The largest districts make the most meagre returns.

It would be well to have the limits of these districts defined, so that each registrar may understand how far his duties extend.

Some more satisfactory arrangement than the present ought to be adopted for the remuneration of deputy registrars.

In order to secure uniformity and perfect marriage returns, the same fee should be allowed to a clergyman for making a return of a marriage performed by proclamation of banns, as is allowed for celebration of it by license.

It would add very much to the efficiency of the registration of deaths were the deputy registrars instructed to take a list quarterly of all interments from the books of the sextons of the cemeteries in their respective localities, a small allowance being made to the latter, for the trouble of writing out or giving the required information. In Great Britain, no interment is allowed to take place without a certificate being shown of the death having been registered. It would be a great improvement, and a general convenience, were each deputy registrar supplied with "recording books," to be kept by him for purposes of reference by the people of the district, and that the names be copied, as at present, upon sheets to be transmitted to this department.

If the district could be made sufficiently small, so that the registrar could go round it once a quarter, to gather up the requisite information, the system of registration might thus be made almost perfect, and the persons qualified above all others for this duty, if suitable in other respects, would be the school teachers in the various districts.

With these suggestions, I now beg to submit my first annual report, which embraces all the material facts at my command, collected and collated with care, and as much accuracy as is attainable under the circumstances, and with the means at my disposal.

I have the honor to be,

Sir,

Your obedient servant,

JOHN COSTLEY,

Secretary to the Board of Statistics.

To the Hon. the Financial Secretary of Nova Scotia.

EXPLANATION OF TABLES.

The columns in Table I. exhibit the population of, and the number of licences returned from each county, showing the whole number, both Episcopal and non-Episcopal, for the first three and the last nine months of the financial year, and also those returned for the first quarter of the present year.

Table II. represents the number of "marriages solemnized," both by license and banns for nine months of the year ended 30th September, 1865, as returned in sheets by the various clergymen throughout the province, containing the particulars, as regards condition, age, place of residence, and of birth. It will be observed, the number in this table differs considerably from that in the previous one, arising from the circumstance that in some places clergymen have neglected to make the required returns in time. For the real number of marriages by license, Table I. must be taken as a guide. The return of marriage by banns is very meagre in this report, which was unavoidable this year, but will probably be remedied in the next report.

By Table III. we find the relative number married by license, according to the religious denomination to which they belonged.

In Table IV., the number of births and deaths registered in each county is given, with the proportion of males and females, as well as the excess of births over deaths in each county.

Table V. represents the deaths in each county at 12 different periods of life, from under 1 year up to 100 years.

Table VI. represents the "causes of deaths," and the number that died, of each disease named in each county.

Table VII. shows "the causes of death" in the city and county of Halifax, arranged in columns, exhibiting the number who died at different ages, from under one year to 100 years of age.

Table VIII. tabulates "coroners' inquests," held during financial year

TABLE I.

Marriages by License registered in Nova Scotia for the year ended 30th. September, 1865, with return for first quarter of 1865-6.

* There is a difference of six between this Table and the number of non-Episcopal in Table I., arising from Roman Catholics not being included in former, who, though an Episcopal Church, are rarely married by license.

† From this county there is one Marriage license returned filled "Evangelical Union Church."

PART II.

REPORT OF POSTMASTER GENERAL.

General Post Office,
Halifax, Jan. 27, 1866.

SIR,—

I have the honor to enclose for the information of the Government, my marriage license account current for the fiscal year ended 30th September, 1865.

The number of licenses issued by me to issuers throughout the province during the year was 2072 ; remaining in hands of issuers on the 1st of October, 1864, 521, making together 2593 licenses. Of this number 1929 have been sold, and 8 defaced licenses returned to me, leaving still in hand of issuers unsold 656.

After deducting the legal fees paid to issuers and clergymen, &c., on the 1929 licenses sold, there remained a balance of \$3,779.75, as will appear on reference to the enclosed account, which sum has been paid by me to the honorable Receiver General.

I would here again beg most respectfully, but urgently, to reiterate my request of last year to be *relieved* of the duties connected with the issuing of marriage licenses, and for the reason assigned in my report of last year, viz. : the proper and efficient discharge of the legitimate duties of the post office department, requiring my whole and undivided attention.

I have the honor to be

Sir,

Your most obedient servant,

A. WOODGATE,

The Hon. C. TUPPER, M. D., M. P. P.

Postmaster General.

F. M. PASSOW,
Examr. Acct. Branch.

APPENDIX No. 17.

IMMIGRATION REPORT.

Halifax, 17th February, 1866.

SIR,—

In presenting my report of the business transacted by the immigration office since February, 1865, for the information of his Excellency the Lieutenant Governor, and the members of the Legislature, I am much gratified by having it in my power to remark a decided gradual progress in this department, with much better prospects of an extended immigration of valuable settlers—mechanics, miners, tradesmen, and laborers—than have hitherto appeared in any previous year.

The arrivals of immigrants *direct* to Halifax since my last report have been by the *Spirit of the Ocean* in May, and the *Forest Queen* in June last, both from London; the *David McNutt* from Glasgow, in October; with the passengers who remained here from the wrecked steamer *Circassian*, instead of proceeding with the others to New York; and those who have remained also from the Hamburg ship *Donau*, which put in here last month on her voyage to New York. Every proper means were taken to induce useful and serviceable persons on board these two last named vessels, to accept of Nova Scotia as their country of adoption, and I trust that the province has been substantially benefitted thereby. The immigrants by the *Donau* are from Mecklenburg, all farm laborers, hard-working and industrious, and fit for any out-door work.

By the *Spirit of the Ocean* there were eighteen passengers.

By the *Forest Queen*, twelve.

By the *David McNutt*, eight.

By the *Circassian*, twenty-eight.

By the *Donau*, one hundred and two; with eight who came to Halifax from Scotland by way of St. John, New Brunswick.

On the 27th September I addressed circulars to the managers and agents of the coal mines, enquiring what prospects they had for employment of additional workmen of every class, the rates of wages they were giving, and the number of dwellings they might be prepared to furnish for families of immigrants within a given period, with any other information that they might consider of consequence to be given in Europe; and on the 1st November I sent circulars to all the mines (both coal and gold mines), also to the proprietors of manufactories, requesting a return of any immigrants who may have come into their service during the course of the year. Also on the same date I sent circulars to the collectors at all the out-ports, requesting a return of any immigrants arriving in their districts during the past year. From the replies received, I am enabled to furnish the subsequent information.

From the coal mines I had generally full and satisfactory replies to my first circular; and the amount is that nearly 600 coal cutters, or colliers, are at present wanted, besides what may be required in summer for mines now opening. Some say, indirectly, that they will have plenty employment for *all* classes of workmen. The wages paid to colliers, or coal cutters, are \$2 per day of eight hours; but good workmen, who work by the piece, or *quantity they turn out*, earn from \$2.50 to \$4 per day. Carpenters and blacksmiths are paid at the rate of \$1.50. Laborers from \$1 to \$1.20, and boys from 40 to 70 cents per day. Masons and bricklayers, too, would be sure to get employment at wages equal to or exceeding those of carpenters and blacksmiths. All the mining companies are

prepared to furnish houses for the families of every man they employ at nominal rents, and several have many houses already built, but not yet occupied; these are reported to be comfortable and commodious. Board and lodging for single men can be had at from \$2 to \$2.50 per week.

At some of the mines the men employed are reported to be very unreliable, and good men are very scarce, and *hard to get*; consequently a better class is much wanted. Some of the mines are situated in the midst of fine agricultural districts, and provisions are cheap at all.

To my circular of 1st November, I had very few replies from the gold mines. I regret to say that by far the most paid no attention to my application; indeed, few did. But many of the agents at the coal mines, and all the collectors at the outports, responded readily.

From the replies, it appears that there are at least twenty-five immigrants arrived this year at the coal mines; but only eleven, with fourteen children, are ascertained to be at the gold mines, and there is no return from any of the manufactories. There have been no arrivals last year at any of the out-ports except Digby, Port Hawkesbury, Margaree, Lingan, Little Glace Bay, and Port Richmond.

Very few of the immigrants who came last year required any pecuniary aid, and those who received such, with two exceptions, have already refunded the trifles advanced. Suitable employment was rapidly found for all, and those who brought means have settled themselves satisfactorily.

At Digby there were only two immigrants.

At Port Hawkesbury, twenty-one.

At Margaree, five.

At Lingan, five.

At Little Glace Bay, eight.

At Port Richmond, two.

The demand for agricultural laborers in the counties mentioned in my last report continues to increase. Female domestic servants are wanted almost everywhere, and boys and girls over fifteen years of age by farmers in many districts for training to farm work. I have had several letters during the course of last year from farmers, mechanics, miners and tradesmen in England, Scotland and Ireland, and a few also from the United States, immigrants there, making various enquiries about the province in regard to their own pursuits; all of which I have punctually and fully answered, and I trust, satisfactorily. I have also had some enquiries about missing relatives, which occasioned a little correspondence with the immigration agent at St. John, N. B., and with the commissioners of emigration at New York. In the months of May and October I had advertisements for miners and laborers inserted in several of the newspapers, circulating in the mining districts of Scotland and England, stating rates of wages and prospects in Nova Scotia. I trust that they have had some good effect, and that the evidence of it may soon be apparent.

A very extensive emigration took place last summer from England and Scotland to the United States. This was induced by agents sent over from America who engaged men and women for special employment, advancing their passage money to America; the amount, by contract, to be gradually deducted from their earnings after arrival. I proposed a similar measure to the contractors on the line of railway from Truro to Pictou in May, offering to place the business in the hands of persons on whom perfect reliance could be had, should it meet their approval; but I received no answer.

I have had many applications lately for shoemakers and tailors, and some from the country for brickmakers. A few of those who wrote from Scotland are of the latter class, and I think are likely to come.

A society was formed in May in Annapolis county, for the purpose of developing the resources of that county and making them known abroad. I offered my services to co-operate with them by forwarding every information with which they furnished me to societies and people of influence in Great Britain. But I had no commands from them.

Now that the Government has appointed emigration agents in London, Liver

pool, and Glasgow, I trust that we shall have this spring and summer a far more extensive immigration of useful people than has ever yet been witnessed in the province. I am in regular active correspondence with these gentlemen, who appear zealously disposed to forward the work committed to them, and undertaken by them, under the facilities afforded for the conveyance of immigrants. But it will be absolutely necessary that the Government should be more liberal in expenditure in the immigration department, and grant such sums as may be found necessary in promoting emigration from Europe. The agent at Liverpool writes me: "It will be absolutely necessary for me to appoint agents throughout the mining districts, to circulate the books and papers that I have prepared, without which I should not expect to get one dozen of emigrants in a year." "Were I not to adopt this course, it would be perfectly useless to think of procuring emigrants. I must have people who will go among the miners, and talk to them, and show them the advantages they may count upon in Nova Scotia, and to keep me constantly advised as to what is doing, without which it would be dangerous to provide a ship for the conveyance of passengers." And the agent at Glasgow says: "I will continue to keep the subject before the public as I have done for some time; but, as I have previously stated, I think the Government of Nova Scotia should at once advance some funds to enable me to make their wishes known, by means of advertisements, lectures, &c. In the mean time, I continue to keep the colony, and its advantages as a home for British emigrants, before the public."

I sent in January 4000 copies of a large poster bill, relating the advantages and requirements of the province, to the emigration agents, to be distributed in London, Liverpool, Glasgow, and Dublin, and throughout the county towns, with the same number of cards, to the same effect, to be hung up in countinghouses, workshops, reading rooms, and bar rooms; also 4000 copies of extracts from the immigration act, relating to the sale of crown lands on credit to immigrants, with 1800 copies of the "Hand-book for Emigrants to Nova Scotia," for distribution. The whole number of these pamphlets, published in 1864, which I noticed in my report last year as having been well received and approved of at home, is now nearly exhausted, and more are wanted in England. I would, therefore, recommend that another edition, with the requisite alterations and some additional information, should be soon published.

The list of properties for sale kept in my office is now attracting more attention; hardly a week passes without some new notices of properties or farms for sale coming in, and frequently persons call to look over the lists, to whom I give every information contained in the letters received, with the names and addresses of the advertisers, with whom they may transact and conclude bargains.

I would earnestly urge on the Government the propriety of having suitable tracts of land for settlement, selected, surveyed, and run out in lots of 100 acres each, as early as possible. I have many applications for lots of 100 acres on the only tract as yet set apart for settlement, which is situated between Musquodoboit and Tangier Harbor. But there are several other districts in which as good, if not better, tracts can be so appropriated in the counties of Digby, Kings, Annapolis, Lunenburg, Hants, Colchester, Cumberland, and in the island of Cape Breton, as mentioned in my report of February, 1864. As there is no officer named in the act on whom devolves the duty of recommending any such lands, I would suggest that in the 3d section it should be stated that "wherever tracts of land are ascertained by the immigration agent to be suitable for settlement, it shall be lawful for the Commissioner of Crown Lands, when so instructed," &c.

Many complaints have been made that natives of the province have been excluded from participation in lands under the revised immigration act of 1864, to which they were entitled by the original act of 1863. I therefore submit that in the 4th section of the act, "natives of the province" may be included with immigrants arriving in the province, and that corresponding alterations may be accordingly made in 7th and 8th sections.

If main roads were made through these lands set apart for settlement under the immigration act, and natives of the province entitled to share in the benefit of the act, many industrious young men would be induced to settle on them; and

not only thereby render the locality more agreeable to strangers, by being in their vicinity, but also be of much service to them, as they will require both instruction and aid in reclaiming land from the forest.

I would also recommend what I formerly suggested, that the Government should have small clearings of one acre made on some of the lots of crown land, and erect on them log houses of cheap construction for immigrant settlers, that the settler might have a shelter for himself and his family on arriving. Great advantages would result from this. There are many competent and industrious people who may have hardly sufficient to secure a passage across the Atlantic for themselves and families, to whom such accommodation would be a very great boon; and the expense necessary to clear the acre and build the log house might be made a charge upon the soil, giving the settler a credit to pay up the outlay thus incurred. One advantage accruing from this plan would be in furnishing farmers in the vicinity with labor, while it would help to smooth the way for the settler and his family, who have much to learn in a new country, and some trials to endure before they can possess a comfortable home.

Before concluding, I beg again to revert to the advantage of dispatching an agent annually to Britain, whose attention should be strictly confined to the duties of emigration agent *alone*. He should possess an intimate knowledge of the views of the Government and people of this province on the subject of immigration. He should traverse the mother country, and by personal representations to individuals, to societies, and to bodies of men desirous to emigrate, might induce valuable settlers to come to Nova Scotia; amongst others, mechanics and small farmers, possessing a few hundred pounds each, who are the people most desirable for us. He could facilitate, in many cases, arrangements for the transit of passengers (acting always in conjunction with the agents now appointed), and in some cases for the purchase of lands in this province. He might also arouse many parties in the mother country to take an interest in the province, or in emigration to it. Resident agents at different ports, who have their own separate business to attend to, cannot be expected to perform these duties; and every effort should be made, as so many inducements are held out by other colonies, several of which give assisted passages to emigrants.

I trust that the advantage of a special agent will be shown by the success of captain F. A. Liebman, who has just left for Germany, for the purpose of procuring able and industrious emigrants from thence for Nova Scotia. I have furnished him with all the necessary papers to aid him in his work, and he informs me that the emigrants by the *Donau* have written to their friends, recommending them to follow them to this country, they being so much pleased with their reception and prospects here.

Annexed are copies of a minute of Council and advertisement respecting immigrants.

I have the honor to be

Sir,

Your most obedient humble servant,

H. G. PINEO.

The Hon. CHARLES TUPPER, M. D., Provincial Secretary.

[*Minute of Council.*]

The Executive Council, in committee on the subject of immigration, report for the approval of his Excellency the Lieutenant Governor, the following minute :

That owing to the great scarcity of labor for mining and agricultural purposes, and in relation to the construction of our public works, the Executive Council are of opinion that the prosperity of the country may be increased, and a large saving of public money effected, by the introduction of able-bodied immigrants at the present time; and with that object, and for the purpose of diffusing information touching the resources of this province, and of contributing to lessen their passage money of immigrants to this country, propose

That an advance be made to Captain Liebman of \$200 towards his expenses in visiting Germany as an immigration agent, and, until further notification, he be entitled to receive \$10 for each able-bodied immigrant landed in this province ;

That Henry Boggs, esquire, in London; Alexander Campbell, in Glasgow; and James R. DeWolf, in Liverpool, be appointed immigration agents for Nova Scotia, with the understanding that they are to receive \$10 for every able-bodied immigrant landed in this province, until notified to the contrary.

All of which is respectfully submitted.

CHARLES TUPPER,
W. A. HENRY,
JOHN W. RITCHIE,
JAMES McNAB,
JAMES McDONALD,
S. LEONARD SHANNON,

To Emigrants.—Tradesmen and Laborers Wanted in the Province of Nova Scotia.

Nova Scotia is the nearest part of the American continent to Europe : about 2230 miles distant from Ireland, and probably 2000 miles nearer than the sections of the United States now open for settlement. It abounds in mineral wealth, of which coal may be considered the most valuable; and the gold mines are likely to prove as remunerative, if not more so, than those of Australia. During the year 1865, the gold produced from the mines, as reported to the commissioner of mines and minerals, averages \$2.13, or 8s. 6d. stg. per day for every man employed.

The soils of the province vary in quality; but the least valuable, which are on the Atlantic coast, still present many attractions to the farmer. Nearly all the interior is capable of profitable cultivation, and the alluvial soils will bear continued cropping without manure for a long period. As a grazing country, it stands unrivalled among the provinces and states of the eastern part of North America.

The climate is agreeable, and extremely healthy, more so than any other part of North America. The weather is warmer in summer and colder in winter than in England. Not so warm as Italy in the former season, nor so cold as Sweden and Denmark in the latter. The province produces all the grain, roots, and fruits which grow in the middle and northern parts of Europe.

The population consists chiefly of the descendants of immigrants from England, Scotland, and Ireland, and partly of those from France and Germany. They are engaged principally in farming and the fisheries, and now mining is becoming a most important branch of business. The commerce of the province is rapidly advancing, and the revenue yearly increasing.

Farming, lumbering, fruit-growing, and the fisheries, have been the most important industrial pursuits, and mining may now be classed with them.

Labor, both at the mines, and for agricultural purposes, is very scarce, and wages are high.

Unoccupied lands are granted by the Government, at the price of £8 16s. stg. for the hundred acres. Immigrants may have them on a credit of two and three years.

Ninety-three miles of railway are completed, and in operation.

Fifty miles are in process of construction; and over

One hundred and fifty miles additional are now under contract. These works are creating an excessive demand for labor, skilled and unskilled. Laborers are paid in specie, at the rate of 4s. stg., a day; masons, 8s. a day, and other mechanics in proportion. Boarding may be had at from 8s. to 10s. stg., per week.

The Queen of Great Britain is sovereign of the province, and the local government is modelled after the British system. The utmost freedom prevails in religion and politics.

For further particulars, apply to the following emigration agents for Nova Scotia:

HENRY BOGGS, Esq.,
8 Crosby Square, London.

J. R. DEWOLF, Esq.,
Tower Chambers, Liverpool.

ALEX. CAMPBELL, Esq.,
Sentinel Office, Glasgow.

APPENDIX No. 18.

PARIS EXHIBITION.

[The Rt. Hon. E. CARDWELL, M. P., to Sir W. F. WILLIAMS, Bt., K. C. B.]

(Circular—No. 3.)

Downing Street, 10th November, 1865.

SIR,—

I have the honor to transmit to you, for your information and guidance, the enclosed copy of a letter from the Lords of the Committee of Council on Education on the subject of the representation of the British Colonies in the Paris Universal Exhibition of 1867. Annexed to the letter are printed regulations in French and English. In the assignment of space their lordships have been guided by the spaces occupied in the Exhibitions of 1855, at Paris, and 1862, at London. The space allotted to the colony under your government is six hundred feet.

It is on every account to be desired that her Majesty's Colonies may be well represented in the approaching Exhibition, and I wish you at once to take such measures as appear to you most calculated to further this object. You will observe that the first step will be to appoint a committee of Superintendence and a special Executive Commissioner, to conduct the correspondence with this country:

I have the honor to be,

Sir,

Your most obedient,

Humble servant,

EDWARD CARDWELL.

The officer administering the Government of Nova Scotia.

(Circular No. 2.)

Downing Street, 21st December, 1865.

SIR,—

With reference to my circular despatch of the 10th ultimo, enclosing copy of a letter from the Lords of the Committee of Council on Education, on the subject of the representation of the British Colonies in the Paris Universal Exhibition of 1867, I have the honor to transmit to you a further letter from the Secretary to that Committee on the same subject, together with plans, &c., which show how it is proposed to arrange the products of Persia in the forthcoming Exhibition, and a list of the animals which the Imperial Commissioners consider it would be of great interest to include in the exhibition of the products of the Australian Colonies. You will perceive that the transmission of these plans, &c., has been

proposed by the Lords of the Committee with the idea that they may be suggestive to the committees formed in the different Colonies for the purpose of carrying out the objects of the Exhibition.

I have the honor to be,

Sir,

Your most obedient,

Humble servant,

(Signed) EDWARD CARDWELL.

Mr. HENRY COLE to the Under Secretary of State for the Colonies.

*Council of Education, Kensington Museum,
October 9, 1865.*

Sir,—

I am directed by the Lords of the Committee of Council on Education to transmit one hundred copies of the general regulations and classification issued by the Imperial Commission for the guidance of intending exhibitors in the International Exhibition to be held in Paris in 1867, and a list of the several amounts of space which it is proposed to allot to each colony.

It being important that the colonies should be well represented, my Lords request that you will move Mr. Cardwell to take, as early as convenient, such steps as he may consider necessary for drawing the attention of each colony to these regulations, &c., and direct me to observe, that in making known the space offered, it should be distinctly understood that the proposed allotment in each case is *nett* space, exclusive of passage room, for which ample provision has been made, and consequently the entire space offered may be filled with goods.

My Lords suggest that each colony should form a committee having sufficient experience, and invested with authority, to secure a due representation of the industry and resources of the colony; and that it should place one special Executive Commissioner in direct communication with the Science and Art Department at South Kensington.

It is desirable that each colony should inform the Lords of the Committee of Council on Education, with as little delay as possible, if it will undertake to fill the space offered; and if not, to state what diminution in the space may be made.

The Imperial Commission having decided upon a particular mode of arrangement into classes and groups, which is set forth in the regulations, the same principle of arrangement will be adopted by Great Britain, and it will be necessary that the colonies also conform to it. My Lords direct me to request, therefore, that the Executive Commissioner from each colony should transmit before the 1st August, 1866, to the Science and Art Department, South Kensington, the space which the colony proposes to occupy, divided into the respective ten groups (which several divisions will be taken as the bases for the final arrangement in the Exhibition building and park), together with a list of the names and addresses of the exhibitors in each class.

My Lords request that all letters from the colonies may be addressed to the Secretary, Science and Art Department, South Kensington, London.

I have, &c.,

(Signed) HENRY COLE.

The Under Secretary of State for the Colonies.

[Mr. COLE to the Under Secretary of State for the Colonies.]

*Paris Universal Exhibition, South Kensington,
9th December, 1865.*

SIR,—

I am directed by the Lords of the Committee of Council on Education, to request that you will move Mr. Secretary Cardwell to transmit to each of her Majesty's Colonies, copies of the accompanying plans, &c., which show how it is proposed by the Imperial Commission to arrange the products of Persia in the Paris Exhibition of 1867.

It will be seen that it is intended to exhibit not only the manufactured products and specimens of the machinery of Persia, but the people at work in their respective occupations, as well as animals useful in manufactures, both alive and stuffed.

The Imperial Commission have also suggested the accompanying list of animals which they consider it would be of great interest to include in the Exhibition of the products of the Australian Colonies.

With the desire of promoting the wishes of the Imperial Commission, their Lordships transmit these plans, &c., thinking they may be suggestive to the committee formed in the different colonies for the purpose of carrying out the objects of the Paris Universal Exhibition of 1867.

I have &c.,

(Signed) HENRY COLE.

The Under Secretary of State for the Colonies.

List of animals suggested by the Imperial Commission as desirable to be included in the Exhibition of the products of the Australian Colonies.

Kangaroo.
Ornithorhynchus (*Platypus*).
Wombat (*Phascolomys Ursinus*).
Opossum (*Marsupiatata*).
Hepona Roo (*Petaurus Australis*).
Lyre Bird (*Menura Superba*).
Black Swan.
Apteryx (*Kiwi Kiwi*).
Cassowary.

APPENDIX No. 19.

SIGNAL STATIONS.

[The Right Hon. EDWARD CARDWELL, M. P., to the Officer administering the Government of Nova Scotia.]

(Nova Scotia.—No. 46.)

(COPY.)

Downing Street, 4th October, 1865.

SIR,—

I have the honor to transmit to you a copy of a letter from the Treasury, with its enclosures, on the subject of the accounts connected with Signal Stations in Nova Scotia; and I have to request that you will take such steps as may be requisite for meeting the wishes of their Lordships for a proper settlement of these accounts.

I have, &c.,

(Signed)

EDWARD CARDWELL.

To the Officer Administering the Government of Nova Scotia.

[MR. HAMILTON to Sir J. ROGERS.]

(COPY.)

*Treasury Chambers,
28th September, 1865.*

SIR,—

I am directed by the Lords Commissioners of Her Majesty's Treasury to transmit herewith copies of the correspondence mentioned in the margin, on the subject of the accounts in connection with Signal Stations in Nova Scotia; and I am to request that you will move Mr. Secretary Cardwell to instruct the Lieut. Governor of Nova Scotia to take such steps as may appear advisable, with a view to a proper settlement of the accounts referred to.

I am, &c.,

(Signed)

GEORGE A. HAMILTON.

Sir J. Rogers, Baronet.

[MR. HAMILTON to Officer in charge of Treasury Chest, Nova Scotia.]

(COPY.)

*Treasury Chambers,
28th September, 1865.*

SIR,—

With reference to your letter of the 28th July last, relative to the Signal Station Accounts in Nova Scotia, I am directed by the Lords Commissioners of

Her Majesty's Treasury to desire that you will place yourself in communication with the Colonial authorities upon this subject as directed in the letter from this Board of the 6th July.

My lords are aware of the result of the arrangement which has hitherto been in force, and it was with the view of being always able to recover the *exact* amount advanced from the Treasury chest that you were directed to take the above step.

My Lords have requested the Secretary of State for the Colonies to address a communication to the Lieut. Governor of Nova Scotia on the subject.

I am, &c.,
(Signed.) GEORGE A. HAMILTON

To the officer in charge of the Treasury Chest, Nova Scotia.

[Mr. HAMILTON to Officer in charge of Treasury Chest, Nova Scotia.]

(COPY.)

*Treasury Chambers,
6th July, 1865.*

SIR,—

I am directed by the Lords Commissioners of Her Majesty's Treasury to transmit herewith copy of a statement received from the Commissioners of Audit, of the receipt and expenditure on account of Signal Stations in Nova Scotia, from which you will perceive that on the 31st March last a balance of £20 13s. 2d. remained in the Treasury Chest at the credit of the Colony.

It would appear to my Lords to be desirable that the vouchers for all advances on account of Signal Stations should in future be submitted by the Controller of the Treasury Chest to the Colonial authorities, with a demand for repayment of the exact amount advanced, and that the present system of quarterly instalments, which may be in excess, or may fall short of the amount actually advanced, should be discontinued. I am to desire that you will communicate with the Colonial authorities upon this subject.

I am, &c.,
(Signed.) GEORGE A. HAMILTON.

To the Officer in charge of the Treasury Chest, Nova Scotia.

[The Deputy Commissary General ROUTH, to Mr. HAMILTON.]

(COPY.)

(No. 266.)

*Commissariat, Nova Scotia,
Halifax, 28th July, 1865.*

SIR,—

I have the honor to report for the information of the Lords Commissioners of her Majesty's Treasury, with reference to your letter of 6th July last, that under the existing agreement with the colonial authorities in this province, the Provincial Government grant a yearly allowance of £250 sterling towards the expenses incurred by the Imperial Government on account of signal stations in Nova Scotia, and this allowance is paid regularly once a quarter into the treasury chest to the credit of that expenditure, which sometimes falls short of the colonial quarterly allowance, and sometimes as exemplified by the statement enclosed in your letter exceeds that allowance.

If the system proposed therefore in your letter should be adopted, and a demand made by the controller of the treasury chest for repayment of the exact amount advanced every quarter for this service, and the present system of quarterly instalments be discontinued, an eventual loss would result to her Majesty's Govern-

ment, as it will be seen by the statement forwarded in your letter, that from 1859 to 1865 that the disbursements have usually been under the colonial grant excepting on two occasions when it was exceeded, and which excess has been covered by the savings on the expenditure of former years from the colonial grant.

Had the system now proposed been adopted, her Majesty's Government would have lost £120 6s. 1d. upon the receipts for the years 1859 and 1863, whilst they would also have had to meet the extra expenditure of £90 12s. 11d. incurred over and above the colonial grant for the years 1863-4, and 1864-5, as the Colonial Government would not have exceeded the annual grant of £250 for those years.

Under these circumstances and pending this reference, I have abstained from communicating with the colonial authorities on this subject, and soliciting your further instructions on the subject.

I have, &c.,

(Signed) L. ROUTH,

D. C. G.

To GEO. A. HAMILTON, Esq., Treasury Chambers, London.

Extract of Commissioners of Audit Report, dated 20th May, 1865.

(COPY.)

We take this opportunity of bringing under your Lordship's notice the present position of the running account between the treasury chest and the colonial Government of Nova Scotia, in regard to the maintenance of signal stations.

From a letter of Deputy Commissary General Graham to Mr. Hamilton, dated 11th October, 1859, and its enclosures forwarded to us by your Lordship's order of 7th February, 1860, it appeared that a new arrangement had been entered into with the colony, by which the Provincial Government made a grant of £250 per annum, to be paid into the treasury chest by quarterly instalments, against which the pay of the signal men issued monthly from the treasury chest was to be charged. This arrangement has been carried out up to the present time, and the result is as follows, viz. :

In the year.	Received.	Paid.	Excess of Receipt.
1859-60.....	£250 0 0	£237 17 0	£12 3 0
1860-61.....	250 0 0	186 11 5	64 8 7
1861-62.....	250 0 0	223 7 9	26 12 3
1862-63.....	250 0 0	} 238 18 0 }	17 2 3
“ Proceeds of sale	4 0 0		
	<u>£1004 0 0</u>	<u>£883 14 8</u>	<u>£120 6 1</u>
	Paid.	Received.	Excess of payment.
1863-64.....	£270 9 11	£250 0 0	£20 9 11
1864-65.....	320 3 0	250 0 0	70 3 0
	<u>£590 12 11</u>	<u>£500 0 0</u>	<u>£90 12 11</u>

Your Lordships will thus perceive that, although for the period ending 31st March, 1863, the quarterly instalments exceeding the issues, the latter have been in excess during the last two years, and that on the 31st March, 1865, a balance of £29 13s. 2d. only, remained in the chest at the credit of the colony.

Both at the Mauritius and in Nova Scotia these signal stations are under the superintendence of the Quarter Master Generals Department, and as the pay and allowances of the non-commissioned officers and privates employed appear to be governed by military regulations, we submit that the proper course would be that these advances and receipts should pass through the military accounts, and that the operation of the treasury chest should be confined to receiving and issuing upon

army orders, the amounts paid by the local Government, and the allowances and contingencies required for the signal stations.

If, however, your Lordships should decide that the detail vouchers both of receipt and payment should continue to form a part of the treasury chest accounts, we would submit that a similar course should be adopted in Nova Scotia to that which has been followed at the Mauritius, viz., that the vouchers for all advances on account of signal stations, should in future be submitted by the controller of the treasury chest to the colonial authorities, with a demand for repayment of the exact amount advanced, and that the present system of quarterly instalments which may be in excess, or may fall short of the amounts actually advanced should be discontinued.

We have, &c.,

(Signed)

W. DUNBAR,

C. MACAULAY.

*Provincial Secretary's Office,
Halifax, Nov. 3, 1865.*

SIR,—

I have the honor to inform you in reply to your letter of Oct. 16th, that his Excellency the Administrator of the Government, in Council, has been pleased to accede to the proposal that this Government should in future pay the exact amount of the expenditure incurred for signals, instead of the £250 per annum as heretofore.

I have, &c.,

(Signed)

C. TUPPER.

Deputy Commissary General L. Routh.

[Major General H. DOYLE to Mr. EDWARD CARDWELL, M. P.]

No. 114.

(COPY.)

*Government House, Nova Scotia,
4th November, 1865.*

SIR,—

I have the honor to acknowledge the receipt of your despatch No. 56 of the 4th of October, 1865, together with the enclosed correspondence from the Treasury, proposing an alteration in the mode of making payments by this Government for the maintenance of Signal Stations, and to inform you that the subject having been duly submitted to the Executive Council, it has been resolved that the proposal of the Lords Commissioners of her Majesty's Treasury be acceded to, and that in future the exact amount of the charge for that service will be paid, instead of the fixed sum of £250 as heretofore.

I have, &c.,

(Signed)

HASTINGS DOYLE,
Administrator.

APPENDIX No. 20.

POSTMASTER GENERAL'S REPORT.

*General Post, Office, Halifax,
January 29th, 1866.*

SIR,—

I have the honor to lay before you, for the information of his Excellency the Lieutenant Governor, my thirteenth annual report, with the accompanying returns, numbered from 1 to 17, shewing the condition of the Nova Scotia Post Office, for the year ended 30th September, 1865.

One post office, and 44 way offices have been added to the number of those established last year, and the site of another changed, (see report No. 7), making in the aggregate 81 post offices, and 513 way, or subordinate offices; two having been discontinued during the past year, (see reports Nos. 2 and 9).

Ten new post routes have been established within the past year (see report No. 8), two discontinued, and 15 altered and improved upon, giving increased accommodation to the public generally, and adding to the contractors' salaries beyond the sums originally stipulated for, as recommended by the Post Office Committee, and as will be seen on reference to reports Nos. 9 and 12.

The mail contracts numbered on the 30th of September last 233, at a total cost of \$45,533.22, (see report No. 5).

The total number of miles embraced in these rides being 4668, and the annual travel of the mail 1,005,078 miles.

These several mail services are being performed generally throughout the province with satisfaction, (fines having been exacted only in a few instances, see report No. 13), and the only one I consider it necessary for me particularly to refer to, is that recommended by the Post Office Committee last year, viz.: the establishment of an additional tri-weekly mail between Antigonish and Sydney, and intermediate places. This extra mail has been placed into the hands of Mr. Thomas Lindsay, the present contractor, who has undertaken to perform the work required, for the amount specified by the committee, viz.: \$2000, the service commenced on the 1st July last.

Sydney is now in possession of a daily mail with the capital.

From information which I gained during my recent visit to Cape Breton, this increased mail accommodation has given much satisfaction, not only to Sydney proper, but more especially to the several coal mining districts, which are becoming places of considerable importance; at present these districts are furnished with a tri-weekly mail, and I beg here to state, that I have suggested to the Government, that the present three way offices at Cow Bay, Little Glace Bay, and Lingan, be made established post offices. The stamps, type, &c., have already been applied for, and the necessary instructions will be issued to carry out the proposition in the ensuing spring, if approved of.

The amount of business and monetary transactions at each place, and the increase of population, will, I am of opinion, by making these localities post offices, augment the postal revenue, and afford greater accommodation and convenience generally to the public at these mines.

This additional mail accommodation will doubtless lead to applications for a further extension in other shire towns of Cape Breton.

LETTERS.

The average total number of letters of all descriptions passing through the several post offices during the past year, was as follows, viz.:

Halifax office,.....	745,000
Country offices,.....	980,000
Total,.....	1725,000

NEWSPAPERS.

The average number of newspapers in the year was,

Halifax,	2,560,000
Country offices,.....	1,663,000
Total,	4,223,000

Being an increase, compared with that of last year, of 282,000, and I here beg to remind the Government, and the Legislature, that not only are all newspapers published in this province allowed to pass free, but the following publications, which, if they were subject to a charge for postage, would help materially to lessen the deficiency which the Legislature is now annually called upon to provide for.

The publications to which I particularly refer, are:—

Religious Pamphlets, published in Nova Scotia, such as *Reports*, and *Minutes of Religious Societies*, &c.

The *Record of the Church of Scotland* and other publications of a like kind.

Everything in connection with the *Registration Department*.

Agricultural Publications published in Nova Scotia.

Murdoch's History of Nova Scotia.

In enumerating this mail matter which has been authorized to pass *free*, I do not for one moment deny that it is a great boon to the public generally of all classes; but I am decidedly of opinion that the department should receive some remuneration for conveying this mail matter, which at present is not taken into account at all, in fact a larger amount of duty is now performed by this department, both in sorting, stamping, conveying, and delivering mail matter of the foregoing description, and for which it receives neither credit nor pecuniary advantage of any kind.

REVENUE.

The gross revenue collected from every source during the year ended the 30th of September last, was \$71,660.02, being an increase of \$6,893.54 over that of the previous year.

The revenue from postage labels sold in the year being \$54,000.80; that from unpaid, and paid letters, and fees, &c., \$17,653.22. Total gross revenue \$71,660.02.

The net available income of the department for the year—after deducting the British portion of packet postage, and the amount of mis-sent, re-directed, and dead letters, was \$62,371.75, showing an increase over the year 1864 of \$6,164.14, a gratifying evidence of the healthy condition of the finances of the office, and the steadily increasing prosperity of the province.

EXPENDITURE.

The expenditure of the department during the year was \$80,947.02, being \$7,783.41 more than that of 1864.

The increased expenditure has been mainly caused by the large additional cost for the carriage of the mails (\$4,500), consequent on the extended mail accommodation which has been afforded to the public by the setting up of numerous (and in some instances unproductive), new post rides, and the alteration and extension of several old ones,—by the establishment of new post and way offices,

and increased pay to postmasters, &c., and by the several large sums which have been paid to couriers, and others, for extra travel, &c., &c., on the recommendation of the Post Office Committee of last session; and also by commissions paid to Postmasters, W. O. Keepers, Stationers and Druggists, at Halifax, for the sale of postage stamps, and by printing, stationery, and other miscellaneous items of disbursement, as will be seen on reference to reports Nos. 1, 4, 5, and 6,—showing an excess of expenditure over the net available income of \$18,575.27, being an increase of \$1500 over the deficiency of last year.

REGISTERED LETTERS.

During the past year 14,456 registered letters have passed through the several post offices in this province, viz. :

Halifax office,.....	4,871
Country offices,.....	9,585

MISSING LETTERS.

In reference to report No. 14, it will be seen that 20 money letters have been reported as missing, and one with a portion of its contents stated to have been abstracted, viz. : 16 unregistered and 4 registered.

Under the heading, "Result of Enquiry," in this return, it will be observed that out of the first mentioned number, five have been duly accounted for, one reported upon by special officer of the department, and is now before the Government, and the remaining ten have not been traced for want of registration.

As regards the five registered letters, two have been made good, one specially reported upon,—report and evidence now before the Government for their consideration,—and in the other case, the enquiry not yet completed.

I cannot pass over this part of my report without alluding more particularly to the subject of *Registration*, and I trust that the remarks which I am about to make may be read far and wide by the public generally in this province.

It is much to be regretted that the public will still continue to send through the post office letters containing money, without either availing themselves of the money order system, or having the letters properly registered.

The department has gone to a great deal of trouble and expense to ensure, as far as it is possible, the sure and safe transmission of money by mail,—the only, proper and safe mode of remitting is by *money order*, when they can be obtained, and in those places where there are no money order offices, the *Registration system* should be taken advantage of.

Notwithstanding the facilities now afforded for the safe transmission of money by the post office department, the public in too many instances forward their letters without taking advantage of either mode, what is the consequence? Suspicion at once rests upon those in the post office department. A letter unregistered, and stated to contain money, goes astray, not only are post office officials, or officials by whom the letter has been handled, suspected; but the sender and receiver also, for it has been known in several instances, that parties owing money, when pressed for payment, in the hope of either evading the debt altogether, or gaining more time in which to pay it, have stated that their remittance had been duly forwarded through the post office, when in reality it has been known not to have been sent at all; and again, a party may receive an unregistered letter containing money, and forget, or *intentionally* neglect to acknowledge its contents, as is sometimes the case, in either case the post office is blamed, when in reality no blame should be attached to it.

In connection with this subject I beg to annex an extract from the last report of the Postmaster General of Canada :

"If the consequences of this procedure were limited to the mere risk of the loss of the money so sent, the senders of money in unregistered letters might reasonably urge, that if they chose to encounter the risk, they should be free to do so; but higher considerations are involved in the question, and the chance of loss to the careless remitter is really but the smallest part of the evil associated with the practice."

After dwelling upon the advantages of registration, the Postmaster General goes on to remark :

“ Against actual dishonesty on the part of the post office employees, a registered letter is incomparably more secure than an unregistered one, for an unregistered letter leaves no trace behind it, whilst passing in the great stream of ordinary correspondence, though its presence as a money letter, and the nature of its contents, are to any person accustomed to handle letters, as manifest, as though the letter had been singled out, and marked by the registered stamp. Moreover, the safety of an unregistered letter is dependent on the integrity of a post office clerk during the whole time it remains in his custody, frequently for hours, and even days, whilst a registered letter will almost invariably have to be acknowledged at the moment of its passing into an officers hands, and cannot therefore be suppressed without leaving him individually accountable for its disposal.”

These remarks are so true and forcible, that I would recommend their attentive perusal by those who are in the habit of sending money by mail in unregistered letters ; and would further suggest that letters containing money should invariably be secured with *wax*, and not by the usual method, by mucilage, or the self-sealing envelope.

PARCEL POST.

During the past year, the number of parcels forwarded from, and received at, the Halifax Post Office, was,	1187
Country offices,	211
Total,	<u>1398</u>

STAMPS.

The amount of stamps sold in the year was,	\$54,408 00
In 1864,	48,756 99½
Increase over 1864,	<u>\$5,651 00½</u>

A further supply of stamps will have to be applied for at an early day, the correspondence being now principally prepaid by postage label.

DEAD LETTERS.

During the year, 7947 dead letters have been received at the dead letter office, and opened and disposed of by Captain Southall, the officer appointed for this particular duty, viz. :

Sent to Great Britain,	920
United States,	3075
Canada,	150
New Brunswick,	680
Prince Edward Island,	56
St. Thomas,	564
Writers in Nova Scotia,	2100
Destroyed for want of name or residence,	240
Remaining in office, unopened,	162
Total,	<u>7947</u>

(See Report No. 15.)

Of this number, 25 contained money amounting to,	\$147 95
13 contained bills of exchange, amounting to, ...	22906 50
	<u>\$23054 45</u>

19 letters registered.

(See Report No. 16.)

MONEY ORDERS.

The Money Order Department has continued to work satisfactorily during the past year, under the superintendence of Mr. Thompson.

This branch of the public service has increased, and is still increasing. I herewith transmit the superintendent's annual report, with returns (No. 17), by which it will be seen that the number of money orders issued during the year was 9286, representing the sum of \$378,716.25, of which sum,

\$36,146 10	was remitted to	Great Britain,
6735 60	“ “	Canada,
1357 50	“ “	New Brunswick,
43 85	“ “	P. E. Island,
469 33	“ “	Newfoundland.

The orders paid during the year numbered 7683, representing the sum of \$335,159.27.

The issued money orders in 1865 over 1864, show an increase of 55 per cent.

The paid money orders in 1865 over 1864, show an increase of 52 per cent.

In my last annual report, I brought prominently to the notice of the Government the large additional duty, and heavy amount of monetary responsibility at present devolving upon the superintendent of the money order office, and urged for an increase of salary, commensurate with his duties and responsibilities. I regret to say, my application has not been granted. I feel it, however, my duty to again advert to this subject.

The present salary of the superintendent is only \$800 a year; a sum, in my opinion, inadequate for the efficient discharge of the onerous and responsible duties attached to this important branch of the public service; and I would, therefore, most urgently and respectfully ask for an increase of \$200.

The duties of the money order office having very largely increased, and the superintendent having been compelled, by press of work, to obtain the unpaid services of his son, the Government have appointed another clerk to this office, with a salary of £150 a year.

I have the honor to be,

Sir,

Your most obedient humble servant,

A. WOODGATE,

Postmaster General.

To Hon. C. TUPPER, M. D., M. P., P.

SCHEDULE.

Accompanying this Report are the following documents :

- No. 1. Statement of Income and Expenditure for the year ended 30th Sept, 1865.
- No. 2. Packet Postage, general account between the United Kingdom and Nova Scotia for the year.
- No. 3. Postmaster General's account current with the province of Nova Scotia for the year.
- No. 4. Salaries A and B in Report No. 1.
- No. 5. Mail carriage C in Report No. 1.
- No. 6. Detailed account of sums paid for incidental and miscellaneous items of disbursement for the year—D to K in Report No. 1.
- No. 7. New Post and Way Offices established in the year.
- No. 8. New Post Routes.
- No. 9. Post Routes discontinued.
- No. 10. Post and Way Offices discontinued.
- No. 11. Curtailment of expenses effected in mail routes in the year.
- No. 12. Allowances made to mail contractors beyond the sums originally stipulated in their respective contracts.
- No. 13. Fines imposed and deductions made from the pay of mail contractors during the year.
- No. 14. Cases of abstraction and loss of money sent through the post office in Nova Scotia in the year.
- No. 15. Dead Letters received, and how disposed of during the year.
- No. 16. Letters of value received at the Dead Letter office Halifax, and how disposed of.
- No. 17. Report of Superintendent of money order office, with returns.

A. WOODGATE,
Postmaster General.

T. SOUTHALL,

Inspector of Dead Letters.

A. WOODGATE,

Postmaster General.

REPORT OF SUPERINTENDENT OF MONEY ORDER OFFICE.

*Money Order Branch, G. P. O.,
Halifax, N. S., 27th January, 1865.*

Sir,—

I have the honor of submitting a report of money order transactions, for the year ending 30th September, 1865, with returns from 1 to 7.

Money order interchange with Nova Scotia includes at the present time thirty-four offices of the Province, all the money order offices of the United Kingdom, Canada, New Brunswick, Prince Edward Island, and Newfoundland.

Two new offices have been added to the list of Nova Scotia money order offices within the year; interchange with Prince Edward Island and Newfoundland commenced in January, 1865, and with New Brunswick in April, 1865.

The transactions of the year exhibit the following particulars:

United Kingdom, orders issued.....	1492	amounting to.....	\$34,259
Canada, ".....	282	".....	7,839
New Brunswick, ".....	145	".....	4,763
P. E. Island, ".....	31	".....	1,011
Newfoundland, ".....	23	".....	632
Nova Scotia, ".....	7313	".....	330,212

Total for the year..... 9286 amounting to..... \$378,716

Exhibiting increase as compared with 1864, of \$133,104, or about fifty-five per cent.

Comparative statements of money order transactions for five successive years:

1861, amount of orders issued,.....	67,212
1862, " ".....	100,706
1863, " ".....	124,833
1864, " ".....	245,611
1865, " ".....	378,716

The Superintendent would respectfully suggest a change in money order transactions, by which other money order offices of the province might have interchange with the United Kingdom direct, except in transmission of advices to the Halifax office for registration and stamping.

Remittances to the United Kingdom for 1865, amounted to \$36,146, and to Canada \$6,735.

The expense of remitting to Canada has occasionally absorbed much of the commissions on Canadian interchange; but by an arrangement made with the Commissariat Department, Nova Scotia is relieved of that drawback. The Commissariat now take all remittances due to Canada, as payable to the United Kingdom account, and credit Canada accordingly.

A statement of contingent expenses of the Halifax Money Order Office accompanies this report.

The commission profits of the year has been sufficient to meet expenses of the office, including salaries and contingencies.

The Superintendent has to repeat experience of former years, concerning absence of loss in the money order department, and of complaint, except concerning occasional delays caused by transmission of advices from the local offices to the chief office, before referring the same to Nova Scotia.

Continued increase of money order business may be expected, as appears from money order transactions of the period from September 30th to January 26th, for the years of 1865 and 1866.

The harmonious co-operation of the various offices of the system have to be repeated of the experience up to the present time.

I have the honor to be,

Sir,

Your obedient servant,

J. S. THOMPSON,
Superintendent.

A. WOODGATE, Esq., Postmaster General.

RETURN No. 1.

Statement of Revenue derived from transactions of the Money Order Branch, for the year ending 30th September, 1865, and Expenditure, from the 1st April to the 30th September, 1865, the term in which the Money Order Branch commenced paying expenses.

Nett revenue from orders issued, and payable in Nova Scotia,.....	\$983	46

APPENDIX No. 21.

FISHERY PROTECTION.

CORRESPONDENCE RELATING TO PROTECTION OF THE FISHERIES.

[His Excellency Major-General HASTINGS DOYLE, Administrator of the Government, to the Right Honorable EDWARD CARDWELL, M. P., &c.]

(COPY.)

(No. 115.)

*Government House, Halifax, N. S.,
4th November, 1865.*

SIR,—

I have the honor to transmit herewith a minute of my Executive Council in relation to the protection of the fisheries on the coasts of British North America after the abrogation of the Reciprocity Treaty, which will expire on the 17th of March next.

Notwithstanding the great commercial advantages which that treaty has conferred upon the United States in common with these Provinces, the Government of that country, acting under the resolutions of Congress, have determined to cause its abrogation.

There can be no doubt that the right to enjoy these fisheries was one of the leading inducements which actuated the Government of the United States in the arrangement of the Reciprocity Treaty, and that there is no way in which they can be made to feel the impolicy of its abrogation more effectually than by the rigorous exclusion of their fishermen from the fishing grounds to which they have had the right to resort during the past ten years.

Independently of the want of any naval force in these provinces, the duty to be performed in the protection of these fisheries will be one of great responsibility and delicacy, in the discharge of which the most serious questions of national interest are not unlikely to arise.

Having reference, therefore, to the character and importance of this service, I trust that her Majesty's Government will be enabled to adopt such measures in this important matter as will effectually protect these fisheries from intrusion, and from the outset assure the Government and people of the United States that they cannot withdraw the commercial advantages conceded to these colonies without losing the privileges which were extended to them in exchange.

I have, &c.,

(Signed)

HASTINGS DOYLE,
Administrator.

The Rt. Hon. EDWARD CARDWELL, M. P.

The Executive Council in committee desire to draw the attention of his Excellency the Administrator of the Government to the great importance of having due preparation made for the efficient protection of the fisheries on the coasts of British North America.

There is but little reason to hope that the Reciprocity Treaty will be renewed, as the Government of the United States have not only given the notice required

to terminate it on the 17th of day of March next, but have, it is understood, declined to entertain any proposals for the renewal of the treaty or the arrangement of another in a modified form.

The right of fishing on the shores of the British North American Provinces conceded by that treaty being highly prized, and having been largely enjoyed during the past ten years by American fishermen, obviously indicates the necessity of prompt and effective measures being taken vigorously to exclude them from our coasts as soon as the treaty terminates, as there is no other mode in which the people and Government of the United States can be made to feel more sensibly the injury they have inflicted upon the commercial interests of their own country by the abrogation of the treaty. It is well known that great difficulty was formerly experienced in protecting the fishing grounds on our coasts from being trespassed upon, and that difficulty must be materially enhanced from the rights enjoyed under the treaty since it came into operation.

As the due protection of these fisheries is of deep importance to the whole of these Provinces, and as the local governments do not possess any naval force, the Council respectfully request his Excellency the Administrator of the Government to bring this matter under the consideration of the Right Honorable the Secretary of State for the Colonies, in the hope that the Vice Admiral on this station may be instructed by her Majesty's Government to detail for this purpose such a portion of the British North American squadron as may be required thoroughly to prevent encroachments within the territorial jurisdiction of her Majesty on the coasts of these provinces.

All of which is respectfully submitted.

 PROCLAMATION RELATIVE TO IN-SHORE FISHERIES.

*Government House, Montreal,
February 20th, 1866.*

SIR,—

I have the honor to transmit for your information a copy of a proclamation, which, with the advice of my Council, I have issued, respecting the termination of the right of persons other than British subjects to use the in-shore fisheries of the Province of Canada, after the 17th day of March next, when the Treaty with the United States of America, under which such rights were enjoyed, will expire.

I have, &c.,

(Signed) MONCK.

Lieut. Governor, Sir W. F. WILLIAMS, &c.

PROVINCE OF CANADA.

Victoria, by the Grace of God, of the United Kingdom of Great Britain and
Ireland, Queen, Defender of the Faith, &c., &c.

To all whom these presents shall come, or whom it may concern,—

Greeting :

Whereas, a certain treaty was made between Her Majesty and the United States of America, on the 5th day of June, 1854, providing for reciprocal trade ;

And whereas, the United States of America have, in accordance with the terms of the said treaty, given notice for the termination thereof ;

And whereas, in consequence of such notice, the said treaty will expire on the 17th day of March, 1866 ;

And whereas, under the said treaty, many persons citizens of the United States of America have invested moneys and fitted out ships for the purpose of carrying on the (in-shore) fisheries within the territory of Canada under the said treaty ;

And whereas, they may be unaware that their right to carry on such in-shore fisheries will end on the said 17th day of March :

We, therefore, in our great desire to prevent injury or loss to our loving subjects or to the citizens of a State with which we are happily in amity, do in this our Royal Proclamation caution and warn all persons not subjects of our realm, that after the said 17th day of March next, no vessels owned and manned in the United States of America can pursue the in-shore fisheries without rendering themselves liable to the confiscation of their vessels, and such other penalties, pecuniary and personal, as are by law imposed.

In testimony whereof, &c.

 REPORT OF SPECIAL COMMITTEE ON PROTECTION OF FISHERIES.

The Special Committee appointed to consider and report upon the question of the Protection of the Fisheries, have agreed to report as follows :

That your Committee regard the efficient protection of the fisheries on the coasts of British America, to be of the most vital importance to the interests not only of these Colonies, but of all subjects of the Crown of Britain, and recommend that the most prompt measures should be taken to secure the cordial co-operation of the British North American Provinces, and the vigorous aid of the Imperial Government, in thoroughly guarding this valuable public domain from intrusion.

For many years some controversy existed as to the exact limits within which the rights allowed by the Convention of 1818 to citizens of the United States of America, to prosecute the fisheries on the coasts of British North America, could be exercised ; but all doubt upon that question appears to have been set at rest by the opinions of the highest legal authorities.

In 1841 Mr. Stephenson, the American Minister in London, addressed a strong remonstrance to Her Majesty's Government against the extent to which American citizens were excluded from those fishing grounds ; and a Case was prepared by the Law Officers of the Crown in this Province, and transmitted to the Colonial Office, and a report was made thereon by the Queen's Advocate and Her Majesty's Attorney General, dated August, 1841, and which may be found on the 34th page of the Journals of the Assembly of 1843.

This report embodies and reiterates the fact, that by the Convention of 1818, "American citizens are excluded from any right of fishing within three miles of the coasts of British America, and that the prescribed distance of three miles is to be measured from the headlands or extreme points next the sea of the coast, or of the entrance of the bays, and not from the interior of the bays or indentations of the coast."

The Law Advisers of the Crown in England also declared : "We have attentively considered the course of navigation to the Gulf by Cape Breton, and likewise the capacity and situation of the passage of Canso, and of the British dominions on either side, and we are of opinion that, independently of treaty, no foreign country has the right to use or navigate the passage of Canso."

The extent of our rights being thus clearly established, their strict maintenance becomes a matter not only of interest, but of imperative duty. In 1851 a memorandum was agreed to by the Hon. Messrs. Bouret, Howe and Chandler, for the protection of these fisheries, under which it was contemplated that Canada should provide a steamer, or two or more sailing vessels to cruise in the Gulf of St. Lawrence and along the coasts of the Labrador, and Nova Scotia was to continue to employ at least two vessels on the same service, and New Brunswick at least one vessel to be employed in the protection of the fisheries in the Bay of Fundy.

The Colonial Minister in a despatch dated May 27, 1852, stated : "Her Majesty's Ministers are desirous to remove all ground of complaint on the part of the Colonies, in consequence of the encroachments of the fishing vessels of the United States upon those waters, from which they are excluded by the terms of the convention of 1818, and they therefore intend to despatch as soon as possible a small naval force of steamers, or other small vessels to enforce the observance of that Convention."

Under the foregoing arrangements, vessels commissioned by her Majesty's Government, and by the Governor General of Canada, and the Lieutenant Governor of this province, were actively engaged in the protection of the fisheries up to the time when happily the difficulties which arose between British and American interests in relation to the fisheries were set at rest by the Reciprocity Treaty of 1854.

The Government of the United States having seen fit to abrogate that Treaty which had been conducive to the harmony and commercial prosperity of both countries in a marked degree, the necessity is again forced upon the British and Colonial Governments to guard this important industrial resource from unauthorized intrusion.

Your committee would therefore respectfully suggest that so soon as the Treaty expires on the 18th inst., proclamation should be issued warning all persons from trespassing on the coast fisheries of British America, that a conference should be held with the honorable the Legislative Council for the purpose of preparing a joint address to her Majesty for Imperial aid in this important service, and that the Governments of Canada, New Brunswick, Newfoundland, and Prince Edward Island, should be requested to co-operate in the protection of the fisheries.

As the abrogation of this Treaty has again brought in force chapter 8, passed in 1836, entitled, "An act relating to the fisheries, and for the prevention of illicit trade in the province of Nova Scotia, and the coasts and harbors thereof"; by which act power is given to his Excellency to commission vessels to be employed in the protection of our fisheries, your Committee recommend the immediate purchase and equipment of a suitable steamer, to be thus commissioned; and they would further recommend that all the vessels commissioned by the various Provincial Governments for the protection of the fisheries, should be so commissioned by the several Governments, as to empower them to act upon any portion of the coasts of British North America.

All of which is respectfully submitted.

CHARLES TUPPER,
W. A. HENRY,
A. G. ARCHIBALD,
WILLIAM ANNAND,
STEWART CAMPBELL,
THOMAS COFFIN,
JOHN LOCKE,
S. MACDONNELL,
HENRY S. JOST,
JOHN TOBIN.

House of Assembly,
Committee Room, March 5th, 1866.

PROCLAMATION!

BY HIS EXCELLENCY

SIR WILLIAM FENWICK WILLIAMS,

[L. S.] *Of Kars, Baronet, Lieutenant General in Her Majesty's Army, Knight Commander of the Most Honorable Order of the Bath, Grand Officer Legion d'honneur, 1st Class of the Turkish Order of Medijee, Lieutenant Governor and Commander-in-Chief in and over Her Majesty's Province of Nova Scotia, and its Dependencies, &c., &c., &c.*

W. F. WILLIAMS.

Whereas, The citizens of the United States, under a Treaty between her Majesty the Queen and the President of that country, signed at Washington on the 5th day of June, A. D., 1854, have since that time, in common with the subjects of her Britannic Majesty, enjoyed the liberty to take fish of every kind, except shell-fish, on the sea-coasts and shores, and in the bays, harbors, and creeks of Canada, New Brunswick, Nova Scotia, Prince Edward Island, and of the several Islands thereto adjacent, without being restricted to any distance from the shore :

And whereas, By virtue of a notice for that purpose, given by the President of the United States, the said Treaty expired on the 17th day of March, instant, and the rights and privileges of citizens of the United States thereunder have ceased and determined,

I do hereby proclaim and make known, That hereafter all vessels and boats belonging to any Foreign Country pursuing the fisheries within the territorial jurisdiction of her Majesty, in the province of Nova Scotia, are by law subject to forfeiture, and the parties engaged therein to penalties, and that the law will be rigorously applied to all cases of trespass on the fishing grounds of Nova Scotia.

Of which all parties will take notice and govern themselves accordingly.

Given under my Hand and Seal at Arms, at Halifax, this
Nineteenth day of March, in the year of our Lord One
Thousand Eight Hundred and Sixty-six, and in the
Twenty-ninth year of Her Majesty's Reign.

By His Excellency's Command.

CHARLES TUPPER.

GOD SAVE THE QUEEN.

[Mr. CARDWELL, M. P., to Sir W. F. WILLIAMS]

(COPY.)

(Nova Scotia.—No. 16.)

Downing Street, 14th April, 1866.

SIR,—

I have the honor to acknowledge the receipt of your despatch, No. 22, of the 15th ultimo, enclosing an address to the Queen from the Legislative Council and House of Assembly of Nova Scotia.

I have laid this address before the Queen, and her Majesty was pleased to receive it very graciously. I have it in command to acquaint you that her Majesty's Government have caused such instructions, as they have deemed necessary and proper, to be issued for the protection of the rights of her Majesty's subjects in respect of the British North American Fisheries.

I have, &c.,

(Signed)

EDWARD CARDWELL.

Lieutenant Governor,
Sir W. F. WILLIAMS, &c., &c.

(COPY.)

(Nova Scotia —No. 18.)

Downing Street, 14th April, 1866.

SIR,—

I have the honor to acknowledge the receipt of your despatch marked separate, of the 29th ult., enclosing a copy of the Report of the Special Committee of the House of Assembly for the protection of the fisheries, with copies of despatches addressed by you to the Governor General of Canada and the Lieutenant Governor of New Brunswick.

You will clearly understand that it is the wish of her Majesty's Government that all Colonial vessels should be placed under the orders of the officer commanding on the station.

I have, &c.,

(Signed)

EDWARD CARDWELL.

Lieutenant Governor,
Sir W. F. WILLIAMS, &c., &c.

APPENDIX No. 22

FISHERY COMMISSION.

(COPY.)

No. 18.

Downing Street, 17th May, 1865.

SIR,—

With reference to my despatch of the 18th March last, No. 13, I have the honor to transmit to you a copy of a letter addressed to Earl Russell by Mr. Howe, the British Fishery Commissioner, reporting upon the proceedings of the Commission, and the time when its labors could be brought to a close.

I have, &c.,

(Signed) EDWARD CARDWELL.

(COPY.)

No. 28.)

Halifax, Nova Scotia, 12th April, 1865.

MY LORD,—

When the Fishery Commission met in January last at Boston, Mr. Hamlin and myself were aware of the action of Congress, and knew that our labors would be brought to a close in March, 1866, should the Reciprocity Treaty expire. We, therefore, arranged the work so as to enable us to furnish by that time whatever was in progress, without embarrassment to either Government; and this, I have no doubt, we shall be able to do.

Since the receipt of your Lordship's despatch, with which I was honored by last mail, a letter dated Bangor, April 5th, has reached me from Mr. Hamlin, who says: "I returned from Washington a short time since. I found that certain persons had made representations to the State Department in relation to the delay of the Commissioners under the Reciprocity Treaty, in not finishing the work. In an interview with the Department, this was explained, and I think the Department was satisfied."

If any impression has prevailed in either Department that there has been unnecessary delay in forwarding the business of the Commission, I beg respectfully to assure your Lordship that there is no foundation for it. My movements to the North have been controlled by the short seasons and by the co-operation of the Admiral in command, and to the South by the disturbed state of the country in the near neighborhood of some of the rivers to be examined.

The Southern coast will now be open, and His Excellency Sir J. Hope has kindly promised to enable me, early in the summer, to complete the examination of the coasts of Newfoundland.

I have, &c.,

(Signed) JOSEPH HOWE.

The Earl RUSSELL, K. G.

(COPY.)

Downing Street, 24th June, 1865.

SIR,—

With reference to my despatch of the 4th of May, I have the honor to transmit to you a copy of a despatch from Sir F. Bruce, enclosing copies of a correspondence with the United States Government on the subject of the fishery commission.

I have the honor to be,

(Signed) EDWARD CARDWELL.

Lieut. Governor R. G. MACDONNELL.

[SIR F. BRUCE TO EARL RUSSELL.]

(COPY.)

Washington, 1st June, 1865.

MY LORD,—

In accordance with the instructions contained in your Lordship's despatch No. 161 of the 28th of April, I communicated to the United States Government the substance of Mr. Howe's letter of the 12th of that month relative to the proceedings of the fishery commission.

I have the honor to transmit the copy of my note to Mr. Hunter, and a copy of his reply on this subject.

I have, &c.,

(Signed) FREDERICK BRUCE.

The Earl RUSSELL.

[SIR F. BRUCE TO MR. HUNTER.]

(COPY.)

Washington, 19th May, 1865.

SIR,—

Her Majesty's Principal Secretary of State for Foreign Affairs has forwarded me a copy of a letter which he has received from Mr. J. Howe, stating that when the fishery commission met last January in Boston, Mr. Hamlin and he arranged the work so as to enable them by March, 1866, (in the event of the termination of the Reciprocity Treaty at that time), to finish whatever was in progress without embarrassment to either Government.

Mr. Howe states that he had no doubt that they would be able to do this.

He then quotes a letter which he has received from Mr. Hamlin, who writes as follows on the 11th of March:

"I returned from Washington a short time since. I found that certain persons had made representations to the State Department in relation to the delay of the Commissioners under the Reciprocity Treaty in not finishing the work. In an interview with the department this was explained, and I think the department was satisfied."

Mr. Howe concludes by declaring that there is no fair foundation for the imputation, if such there has been, that there has been unnecessary delay in forwarding the business of the commission, that his movements to the north have been controlled by the short seasons, and by the co-operation of the Admiral in command, and to the south to the disturbed state of the country in the near neighbourhood of some of the rivers to be examined, that the southern coast will now be open, and that Sir James Hope has promised to enable him early in the summer to complete the examination of the coasts of Newfoundland.

I have, &c.,

(Signed) F. W. A. BRUCE.

The Hon. W. HUNTER.

[Mr. HUNTER to Sir F. BRUCE.]

(COPY.)

*Department of State,
Washington, 30th May, 1865.*

SIR,—

I have the honor to acknowledge the receipt of your note of the 19th inst., informing me, at the instance of Earl Russell, that the labors of the Fishery Commission would probably be completed by the 1st of March, 1866, the time of the termination of the Reciprocity Treaty, and that the climate and circumstances have heretofore prevented the Commissioners from prosecuting the work with that despatch which they would have desired. In reply, I have the honor to inform you that the Department is aware of the difficulties which have existed, and it feels assured by the statements of Mr. Howe, that he will employ every opportunity to accomplish the end for which the Commission was organized.

(Signed) W. HUNTER.

The Honorable Sir F. BRUCE.

APPENDIX No. 23

COLONIAL NAVAL DEFENCE.

(COPY.)

(Circular.)

Downing Street, 19th May, 1865.

SIR,—

I have the honor to enclose to you a copy of the Colonial Naval Defence act, which has recently received the royal assent, and to request that you will bring it under the consideration of your Council.

I enclose also a copy of the regulations at present in force for the Royal Naval Reserve in this country, and a copy of a letter addressed to this office, by desire of the Lords Commissioners of the Admiralty, indicating generally what their Lordships will require as to Colonial ships of war.

You will observe that the Imperial Parliament has not made the adoption, by every colony, of precisely the same regulations as those in use in this country, a necessary condition of obtaining for men raised in the colony, the advantages of the reserve, but has left it to the authorities of each colony to submit for the approval of her Majesty in Council, such regulations as may seem to them expedient. It will, of course, be necessary in every case, that the regulations should be such as to secure the end in view, viz., the training in time of peace of men who may be relied on for service in time of emergency, and it will doubtless be convenient to you to know what regulations have been found, in practice, most convenient for that purpose in this country.

I am sure I need not enlarge upon the importance of the object which Parliament has had in view in passing this enactment, and I trust that your advisers will fully appreciate the advantages which will result from its adoption by the colony under your Government.

I have the honor to be,

Sir,

Your obedient servant,

(Signed) EDWARD CARDWELL.

Lieut. Governor Sir R. G. MACDONNELL, C. B.

ANNO VICESIMO OCTAVO VICTORIÆ REGINÆ.

CAP. XIV.

An Act to make better Provision for the Naval Defence of the Colonies.

[7th April, 1865.]

Whereas it is expedient to enable the several Colonial possessions of Her Majesty the Queen to make better provision for naval defence, and to that end to provide and man vessels of war, and also to raise a volunteer force to form part of the Royal Naval Reserve established under the Act of Parliament of 1859 "for the establishment of a Reserve Volunteer Force of Seamen, and for the government of the same," (hereafter in this Act called the Act of 1859,) and accordingly to be available for general service in the Royal Navy in emergency :

Be it therefore enacted by the Queen's most excellent Majesty, by and with the advice and consent of the Lords spiritual and temporal, and commons, in this present Parliament assembled, and by the authority of the same, as follows :

1°. This Act may be cited as the Colonial Naval Defence Act, 1865.

2°. In this Act—

The term "Colony" includes any plantation, island, or other possession within her Majesty's dominions, exclusive, of the United Kingdom of *Great Britain and Ireland*, and of the islands being immediate dependencies thereof, and exclusive of *India* as defined by the Act of Parliament of 1858 "for the better Government of *India* :"

The term "the Admiralty" means the Lord High Admiral of the United Kingdom, or the Commissioners for executing the office of Lord High Admiral.

3°. In any colony it shall be lawful for the proper Legislative Authority, with the approval of her Majesty in Council, from time to time, to make provision for effecting at the expense of the colony all or any of the purposes following :

- (1.) For providing, maintaining, and using a vessel or vessels of war, subject to such conditions and for such purposes as her Majesty in Council from time to time approves :
- (2.) For raising and maintaining seamen and others entered on the terms of being bound to serve as ordered in any such vessel :
- (3.) For raising and maintaining a body of Volunteers entered on the terms of being bound to general service in the Royal Navy in emergency, and, if in any case the proper Legislative Authority so directs, on the further terms of being bound to serve as ordered in any such vessel as aforesaid :
- (4.) For appointing Commissioned, Warrant, and other officers to train and command or serve as officers with any such men ashore or afloat, on such terms and subject to such regulations as her Majesty in Council from time to time approves :
- (5.) For obtaining from the Admiralty the services of Commissioned, Warrant, and other officers, and of men of the Royal Navy for the last mentioned purposes :
- (6.) For enforcing good order and discipline among the men and officers aforesaid while ashore or afloat within the limits of the colony :
- (7.) For making the men and officers aforesaid, while ashore or afloat within the limits of the colony or elsewhere, subject to all enactments and regulations for the time being in force for the discipline of the Royal Navy.

4°. Volunteers raised as aforesaid in any colony shall form part of the Royal Naval Reserve, in addition to the Volunteers who may be raised under the Act of 1859, but, except as in this Act expressly provided, shall be subject exclusively

to the provisions made as aforesaid by the proper Legislative Authority of the colony.

5°. It shall be lawful for her Majesty in Council from time to time as occasion requires, and on such conditions as seem fit, to authorize the Admiralty to issue to any officer of the Royal Navy volunteering for the purpose a special Commission for service in accordance with the provisions of this Act.

6°. It shall be lawful for her Majesty in Council from time to time as occasion requires, and on such conditions as seem fit, to authorize the Admiralty to accept any offer for the time being made or to be made by the Government of a colony, to place at her Majesty's disposal any vessel of war provided by that Government and the men and officers from time to time serving therein; and while any vessel accepted by the Admiralty under such authority is at the disposal of her Majesty, such vessel shall be deemed to all intents a vessel of war of the Royal Navy, and the men and officers from time to time serving in such vessel shall be deemed to all intents men and officers of the Royal Navy, and shall accordingly be subject to all enactments and regulations for the time being in force for the discipline of the Royal Navy.

7°. It shall be lawful for her Majesty in Council from time to time as occasion requires, and on such conditions as seem fit, to authorize the Admiralty to accept any offer for the time being made or to be made by the Government of a colony, to place at her Majesty's disposal for general service in the Royal Navy the whole or any part of the body of Volunteers with all or any of the officers raised and appointed by that Government in accordance with the provisions of this Act; and when any such offer is accepted such of the provisions of the Act of 1859 as relate to men of the Royal Naval Reserve raised in the United Kingdom when in actual service shall extend and apply to the Volunteers whose services are so accepted.

8°. The Admiralty may, if they think fit, from time to time by warrant, authorize any officer of her Majesty's Navy of the rank of captain or of a higher rank to exercise, in the name and on behalf of the Admiralty, in relation to any colony, for such time and subject to such limitations, if any, as the Admiralty think fit, any power exercisable by the Admiralty under this Act.

9°. Nothing done under this Act by order in Council, or by the Admiralty, or otherwise, shall impose any charge on the revenues of the United Kingdom without express provision made by Parliament for meeting the same.

10°. Nothing in this Act shall take away or abridge any power vested in or exercisable by the Legislature or Government of any colony.

[Mr. ROMAINE to Sir FREDERIC ROGERS.]

Admiralty, 10th May, 1865.

SIR,—

In reply to your letter of the 3rd instant, stating that the Colonial Naval Defence Act has received the royal assent, and requesting to be informed what my Lords Commissioners of the Admiralty would require in regard to colonial ships of war, I am commanded by my Lords to state for the information of Mr. Secretary Cardwell, that they will require, in order that the flag of a colonial vessel of war may be recognized as a lawful cruiser, that she should be commanded by a properly commissioned officer.

To facilitate compliance with this requirement, my Lords will send to the senior officer on the various stations, blank forms of commissions and warrants, signed by their Lordships and their Secretary, in which the names of such commissioned, warrant, or other officers of the royal navy, selected to command or serve as

such officers in the royal naval reserve, or in ship or ships of the colony, may be inserted.

My Lords will, if desired, select from among such officers as may volunteer for the service, those whom they deem fit for these special duties, and who can be spared for a time from service in her Majesty's ships.

In order to obviate any difficulty in bringing the act into operation, my Lords will, under the 8th clause of the "Colonial Naval Defence Act, 1865," authorize the senior officer of any station to exercise in their name and behalf those powers exercisable by the Admiralty, which it may from time to time seem desirable to delegate.

My Lords will, when Mr. Cardwell wishes it, give authority to senior officers to fill up blank commissions and warrants, sent to them by their Lordships, with the names of persons duly qualified to be officers, who may be nominated by the authorities of a colony, and who are not actively engaged in her Majesty's service.

They will further authorize them, if called upon by the proper authorities, to give an acting order to an officer of the royal navy, who may volunteer from any of her Majesty's ship returning to England, and whose services can be spared, or to a properly qualified officer who may be found ready to serve, in order that there may be no delay in fitting out a vessel or in replacing an officer in command, who may die or be removed from the service.

My Lords would suggest that colonial governments should be warned to give the longest notice in their power of their desire for the appointments of officers of any rank to serve in the royal naval reserve, or on board any colonial man of war.

Any vessel of war fitted out by a colony, and commanded by a properly commissioned officer of the Royal Navy, should wear a Union Jack in the usual place, and the white ensign, with either the arms of the colony, or such other distinguishing mark as may be chosen by the colony, and approved by the Colonial Office and the Lords Commissioners of the Admiralty.

My Lords send herewith a copy of a form of appointment of an officer to command, altered as they propose use it, under the 5th clause of the 3rd section of the act; also copy of the Queen's regulations and Admiralty instructions.

They propose to appoint officers for periods of five years, during which time, unless in case of great emergency, they will not be called upon to serve in the royal navy of the United Kingdom.

When any officer receives a commission or warrant, he should also receive a copy of the statute, 28 Vic., chap. 14, the "Colonial Naval Defence Act, 1865."

My Lords send copies of the commissions and warrants for rank in use in the royal navy, which can easily be altered to suit the purposes of the royal colonial navy, and the form of which my Lords suggest should be retained as nearly as may be found convenient.

My Lords would suggest to Mr. Cardwell that, whenever the privileges created by this act are actually conferred upon any colony, due notification should be made to other maritime powers, informing them of the mode in which such colonial vessels will be commanded, and acquainting them with the flag which will be worn by the said colony, and that my Lords have accorded to such war vessels of the colony in question the status and rights of a vessel of war of the United Kingdom of Great Britain.

I am, &c.,

(Signed) W. G. ROMAINE.

Proposed Form of Order to an Officer on Commissioning a Ship of the Royal Colonial Navy.

By the Commissioners for executing the office of Lord High Admiral of the United Kingdom of Great Britain and Ireland, &c.

Having allowed you to volunteer to command the a ship-of-war belonging to the colony of _____, which the Government of that colony has ordered to be fitted, stored and victualled at _____ for service at sea, and manned with _____ men, you are hereby required and directed to cause the utmost dispatch to be used, so far as the same may depend upon you, in getting her ready for sea accordingly, and having so done, you will follow such orders as you may receive from the authorities of the said colony, and in conformity with the provisions of the Act of the Imperial Legislature, entitled, "an Act to make better provision for the Naval Defence of the Colonies," passed in the twenty-eighth year of the reign of her Majesty Queen Victoria.

through the Senior Officer of the Station.

By command of their Lordships,

A. B. (Secretary of the Admiralty.)

(Circular.)

Downing Street, 22nd December, 1865.

SIR,—

With reference to my circular despatch of the 19th May last, enclosing a copy of the Colonial Naval Defence Act, 28 Vic., chap. 14, I have now the honor to inform you that the Lords Commissioners of the Admiralty have laid down the following rules as to the flag to be borne by any vessels maintained by any colony under the clauses of that Act :

1°. That any vessel provided and used under the 3rd section of the Colonial Naval Defence Act, should wear the blue ensign, with the seal or badge of the colony in the fly thereof, and a blue pennant.

2°. That all vessels belonging to, or permanently in the service of the colonies, but not commissioned as vessels of war under the Act above referred to, should wear a similar blue ensign, but not the pennant.

You will take care that these instructions be in future strictly complied with.

I have at the same time to request you to furnish me with a list of any such vessels belonging to the colony under your government, and to send me, for the information of the Lords Commissioners of the Admiralty, a correct drawing of the seal or badge, which is to form the distinguishing mark adopted by the colony of

I have the honor to be,

Sir,

Your most obedient

humble servant,

(Signed) EDWARD CARDWELL.

Lieut. Governor Sir R. G. MACDONNELL.

APPENDIX No. 24.

ST. PETER'S CANAL.

Halifax, N. S., 9th March, 1866.

SIR,—

I have the honor to submit, for the consideration of the Government, the following report upon the progress made up to the 31st December, 1865, in the construction of St. Peter's Canal, C. B., since the commencement of operations by Messrs. Brooks, Foster & Co., under contract dated 6th June, 1865.

Tenders having been invited for the excavation of the earth and rock to the proposed level of the water in the canal, and the offer of the above firm having been accepted, the work was commenced about the middle of July, since which time all the labor that could be profitably employed has been made use of in order to avoid any unnecessary delay in the advancement of the work.

The excavation, for a distance of 600 feet from the Bras d'Or end and 800 feet from the bay end of the canal, has been brought nearly to the level of the tow path, and there remains a length of 900 feet, by an average width of 55 feet and a depth of 24 feet, embracing a quantity of 44,000 cubic yards, still remaining to be excavated prior to the expiration of the contract in June next.

The sides of the cutting have been dressed to a slope of one and a-half feet horizontal, to one perpendicular, for the greater portion of the above length of 1400 feet.

An average force of 63 laborers and 21 teams has been engaged for 139 days in the prosecution of the work, and so anxious are those connected with this undertaking to forward the same with every possible despatch, I would state that operations have been carried on the whole of the winter, which, I am informed, has never before been attempted since the commencement of the work in 1854, with such a force as could be advantageously employed with a due regard to economy.

The following tabular statement will shew the amount of material excavated each month, together with the total expenditure up to the 31st December, 1865 :

Material Removed.	Monthly Expenditure.
During month of July..... 3,000 cubic yards earth,.....	\$960 00
August...10,250 " "	3280 00
September 10,345 " "	3310 40
October... 8,900 " "	2848 00
November } 3,947 " " }	1480 32
} 224 " Rock, }	808 96
December. 2,528 " Earth,	808 96
<hr/>	<hr/>
39,194 cubic yards.	\$12687 68
Engineering, &c.,	854 74
<hr/>	<hr/>
Total Expenditure,.....	\$13542 42

Or at the rate of \$29,247 per annum.

From the above outlay 10 per cent., equivalent to \$1268 76, has been retained as security for the due performance of the contract.

A serious discrepancy exists between the amount of rock excavation represented by Mr. Perley, and that actually to be removed.

The yellow line on the accompanying diagram, shews the line of rock as per borings made by that gentleman at station 900, (the total length of the canal being 2300 feet), at which point there is shewn a depth of 37 feet, with varying inclinations on either side for several hundred feet. The exact depth will not be more than 9 feet, and instead of the total amount of rock being 46,198 cubic yards, I do not anticipate meeting with more than 5200 cubic yards.

I can attribute this discrepancy only to the fact, that in making the borings large boulders were struck at various depths, which led those engaged in the work to believe, and very reasonably too, that they were tracing the surface of solid rock; this will account for the statement made that the rock "dips to the west with varying inclinations."

At the north, or Bras d'Or end, the rock is exposed in the bottom at various points for a distance of 200 feet, and near the centre of the canal there is a ledge extending along the eastern slope for about 225 feet, which dips to the west with so acute an angle that I doubt very much whether it crosses the canal. These are the only points where rock is visible at the surface, and so far as the excavation has already gone, no further appearance has occurred.

The rock consists chiefly of the description known as syenite, which, although an extremely hard material, is more readily affected by blasting than loose rock.

Owing, I may say, to the entire absence of rock, the earth excavation will necessarily be largely increased by reason of the necessity for flattening the slopes, but to reduce it to the lowest possible amount, I propose to build a stone retaining wall, as represented in the diagram, and to bring it to the level of the tow path or 5 feet above the surface of the water; against the back of this wall the slope, indicated by the red line, will abut.

This plan will decrease the excavation by 93,010 cubic yards, or in other words, in substituting the stone wall for the additional excavation which would be incurred were the slopes made according to the blue lines, the estimate is thereby reduced by the sum of \$25,650.

A still stronger reason in favor of adopting the above plan is the greater stability of the material, for if the clay slope were carried to the bottom of the canal an accumulation of mud would in time occur from the earth sloughing after heavy rains, or from the slides caused when the frost is leaving the ground.

I further propose to sow the slopes with grass seed, which will bind the earth together and prevent the surface water from destroying their uniformity.

A steam engine will be required to pump the water from the "chambers" during the under water excavation, and a dredging machine will also be needed to deepen the entrance on either side of the canal. Provision has been made in the estimate for these works.

The materials which have already been excavated are of a very uniform character, and consist of a tenacious clay with gravel and sand intermixed; occasionally boulders of nearly two tons in weight are met with.

The outlay which has been made since the commencement of the work in 1854, and that still required for its completion, naturally causes one to consider whether the undertaking would justify such an expenditure.

Although it cannot be expected that the tolls levied on the shipping would equal the interest on the expenditure or much more than defray the cost of maintenance, for at all events some years to come, the utility of canals in general must be considered as an acknowledged fact, and the following are some of the advantages which, it may fairly be presumed, would result from the construction of St. Peter's canal.

1st. A large extent of crown and other lands at present condemned to solitude, would doubtless be brought into cultivation to the great benefit of the farmer, and to the general advantage of the community, and as communication by water is the cheapest means of transit, the necessaries of life would be equalised throughout the whole island, in other words, the interior of the country would be placed on a level with the maritime parts.

2nd. It would develop the latent mineral wealth of that portion of the island bordering upon the lakes, and would thereby create internal trade.

3rd. The saving in distance which would be effected in the passage from Sydney

and Barra Straits to the westward, that of the former being upwards of 30 miles, and the latter fully 130 miles.

In preparing the estimate for the final completion of the work, I have based my calculations upon the dimensions assumed by Messrs. Talcott & Laurie, which are the same as those decided upon prior to the commencement of operations in July last, they are as follows :

Depth of water	13 feet.
Width of canal at bottom	22 "
at surface of water	28½ "
at level of tow path	31 "
Width of tow path	8 "
lock in clear	22 "
Length of lock in clear	122 "

Prior to the termination of the present contract in June next, I would recommend that tenders for the whole of the works required for the full and final completion of the canal be called for; this is rendered necessary by reason of the large quantity of stone required for the retaining wall, lift lock, &c., which should be quarried during the summer months in order to avoid unnecessary additional expense in procuring it in winter, and to give it the benefit of a thorough seasoning.

There is, in fact, nothing to prevent the balance of the work being commenced early in May, and should I receive the necessary instructions to proceed with the same at that time, I have every reason to believe that the canal will be ready for public traffic by 1st August, 1867.

Sir,

Your obedient servant,

ALEXANDER MACNAB,

Civil Engineer.

To the Hon. the Provincial Secretary.

APPENDIX No. 25.

RICHMOND HARBORS.

*Halifax, N. S.,
1st March, 1866.*

SIR,—

In compliance with instructions received relative to an inspection and proposed improvement of the harbors of Grand River, Little Arichat, Barrassois, and eastern point of Isle Madame, all of which are situate in Richmond County, Cape Breton, I have the honor to submit the following report and estimates :

1st. GRAND RIVER, which has its outlet on the southern coast of Cape Breton, derives its source from Lochs Uist and Lomond, situate 10 and 7 miles respectively from the sea, and possesses all the requirements necessary for a safe and desirable harbor, provided certain artificial means be used in conjunction with the natural advantages which at present exist.

The river is not less than three quarters of a mile in width at its mouth, is for the most part very shoal, and is separated from the sea by a sand bar, which rises to an average height of ten feet above low water mark. Through this bar the river has forced a passage about forty feet wide and two feet deep at low water ; but owing to the tortuosity of the present channel inside the bar (which extends for half a mile up the river, and afterwards runs in nearly a direct line for three miles, with a depth varying from twelve to thirty feet, and a width from forty to one hundred and ten feet), combined with the very unfavorable position of the outlet, and the presence of several rocks on the seaward side of the entrance, it becomes a matter of some difficulty for a vessel, in fair weather, to effect an entrance from the sea, and during a storm, if not an impossibility, it is a work attended with the greatest possible risk to life and property.

To overcome the foregoing difficulty, and to render the river accessible at all times of the tide, as well as during boisterous weather, I would recommend that a new passage be excavated to a depth of ten feet below low water mark, in length three hundred feet, and in width not less than eighty feet, and that the channel of river be deepened and straightened for about fifteen hundred feet, in order to connect with a natural basin, nearly four hundred feet in diameter, formed by the gradual widening of the channel.

To insure the stability of this work, and to prevent an accumulation of sand in the channel proposed to be cut, caused by the continual friction of flood and ebb tides on the sides of the bar, it will be necessary to drive a row of piles on either side, the whole length, and at the seaward entrance to construct a "crib," twenty feet square, which should be filled with stone and bolted to a row of piles placed four feet from centres. By this means the passage would be preserved to its full depth, while the increased velocity of the current, caused by the closing of the old channel, would have the effect of keeping the new channel perfectly free from any deposit of sand or material of even a greater specific gravity.

The current of the river has a velocity of fully $3\frac{1}{2}$ knots, or over a fraction of 4 miles, per hour, which is equivalent to 5 ft. $10\frac{1}{2}$ in. per second.

Every kind of soil has a certain velocity consistent with the stability of the channel. From careful observations made, it is ascertained that a velocity of 8 inches per second will lift sand as coarse as linseed ; twenty-four inches will roll along pebbles an inch in diameter ; and it requires three feet per second at the bottom to sweep along angular stones of the size of an egg. It is universally

found that the velocity of the surface in the middle of the stream is the greatest, and that it gradually diminishes from thence to the bottom and sides. Assuming, therefore, that there is a velocity of only three feet per second at the bottom, or one-half of that at the surface, it will readily be seen that but little difficulty will be experienced in preserving a free and uninterrupted channel; for allowing that a certain amount of sand would be deposited by the flood tide, it must necessarily be removed by the action of the ebb tide, aided by the natural current of the river, which of itself must equal a velocity of at least two knots per hour. In case it should be deemed inexpedient to expend so large a sum of money as will be required for the work already specified, I have prepared and submit an estimate to include the mere opening of said bar to the depth of six feet below low water mark, or to a level with the present bed of river. This would give a depth of twelve feet at flood tide, which, while it would perhaps be sufficient for the majority of vessels frequenting that part of the coast, would prove of no possible use to those of a greater draught than 11 feet. This work would, however, be of immense convenience to the smaller class of coasters, provided the improvements are not carried out on a more extended scale.

ESTIMATE No. 1.—Depth of Water 10 feet at Low Tide.

9,210 cubic yards earth excavations, at 20c.	\$1,842
22,250 " " dredging, at 40c.	8,900
700 lineal feet protection work, at \$6.	4,200
50 " " closing of old channel, at \$2.	100
Contingencies, &c., 10 per cent.	1,504
	<u>\$16,546</u>

ESTIMATE No. 2.—Depth of water 6 feet at low tide.

5,550 cubic yards earth excavations, at 20c.	\$1,110
12,250 " " dredging, at 40c.	4,900
50 lineal feet closing of old channel, at \$2.	100
Contingencies,	611
	<u>\$6,721</u>

2nd. **LITTLE ARCHAT.** This harbor was formerly esteemed one of the most desirable on the southern shore of Cape Breton, owing to the existence of the following very necessary qualifications: spaciousness, depth of water, and good anchorage ground; but all these have of late years been seriously interfered with, by reason of a sand bar, which rose for several feet above high water mark, and connected the mainland with Crighton's island, having been carried away by a violent storm from the south east, thus converting the harbor into an open roadstead, and permitting the heavy surf, during southerly storms, to roll with full force from one end of it to the other.

Fully thirteen years have elapsed since the bar in question, now worn away to the level of low water, was washed away, and the harbor has in consequence gradually decreased in depth, owing to the immense accumulation of sand, which, if allowed to continue, must of necessity eventually ruin the harbor.

To prevent further difficulties, a breakwater of stone and brush should be constructed at the point indicated by the red lines on the accompanying plan, in length 1250 feet, by an average width of 12 feet, and to a height of at least three feet above high water mark.

As this work would require a large outlay, if undertaken and completed at once, I would suggest that it be extended over a period of two or three years, by which means the ultimate cost would be somewhat reduced, and further injury to the harbor would at the same time be averted.

The bar has at present an average breadth of sixty feet, and if upon it be placed a body of material three feet in height and sufficiently solid to withstand the force of the water, the work of restoration will at once have been commenced.

A repetition of this plan will bring the breakwater above the level of high water, and as soon as this is effected the harbor will have regained its former qualifications, and the materials composing the work will be so firmly bonded together, that the most violent storms could have no injurious effect upon it.

There will be fully 8,500 tons of stone, &c., in the foregoing specified work, the value of which being sixty cents per ton, will require an expenditure of \$5,100.

3d. BARRASSOIS HARBOR, formed by an inlet from Rocky Bay, is situate on the eastern side of Isle Madame and within one mile of Arichat by land, but distant by sea fourteen miles.

About thirty years ago a well defined channel of considerable depth connected the harbor and bay; but a succession of easterly storms have since deposited an immense amount of sand at the seaward entrance, thereby rendering the harbor of but little use, excepting at high tide. The "bar" formed by this accumulation extends fully five hundred feet out into the bay, with a depth of water ranging from seven to ten feet, but reduced at low tide to from two to five feet.

The outlay required to render this point accessible at all stages of the tide, and to make it in the least degree serviceable to the coasters frequenting this locality, would be very great, for not only would a large amount of dredging be required, but a strong protection work would be necessary in order effectually to prevent the new channel from being completely closed by the first easterly storm.

ESTIMATE.—Depth of water, 10 feet at low tide.

7500 cubic yards dredging, at 40 cents,	\$3000 00
1000 lineal feet protection work, at \$6,	6000 00
Contingencies, 10 per cent,	900 00
Total,	<u>\$9900 00</u>

That the improvement of this harbor would confer a great benefit upon the few families living in its vicinity, as well as upon the neighboring fishermen, cannot be denied. At the same time, the restricted accommodation afforded by the harbor, it being not more than eight hundred feet long and four hundred feet wide, does not justify me in recommending the expenditure of so large a sum as would be required to carry into execution the foregoing specified work.

4th. Cape LeRonde is situate at the extreme eastern end of Isle Madame, in the vicinity of which there exists a secure harbor, with a depth of water of 24 feet.

This harbor, as in the case of Grand River and Barrassois, is separated from the sea by a "bar," through which a channel, in length 650 feet, by a width of 150 feet, has forced a passage, but in consequence of an insufficiency of water, there being but 18 inches at low tide, vessels are compelled to remain outside until the tide rises, and in stress of weather run the risk of great damage, or even of total destruction.

The inlet formed by Manger's island as represented on plan, extends for upwards of a mile and affords a secure anchorage to vessels drawing 14 feet, for half the above distance; the width of the inlet for a portion of the length is, however, rather restricted, while that immediately inside the bar is not less than 1000 feet. The outlay necessary for the improvement of this harbor is its main objection, but its main advantages as a harbor, compared with those of Barassois, are infinitely superior. It will be seen that the expenditure required on account of this work is equal to $\frac{2}{3}$ of that of Grand River, and more than double that of Little Arichat, while the advantages to be derived are not to be compared to those of the other points.

Owing to the very exposed position of all these places and the delay which would necessarily attend the execution of the work in rough weather, during which time it would be impossible for the dredging to be carried on, the cost of the same would thereby be somewhat enhanced; in estimating the value of the dredging, however, a price per cubic yard has been allowed to cover any such contingency.

ESTIMATE.—Depth of water 10 feet at low tide.

11,500 cubic yards dredging, at 40c.	\$4,600
1,000 lineal feet protection work, at \$6.	6,000
Contingencies, &c., 10 per cent.	1,060
	<u>\$11,660</u>

In the event of any of the foregoing works being carried out, proper working plans and specifications will be furnished.

I have, &c.,

ALEXANDER MACNAB, C. E.

The Hon. Provincial Secretary.

APPENDIX No. 26.

CODE OF SIGNALS.

(Circular.)

Downing Street, March 2, 1866.

SIR,—

With reference to my circulars of the 13th of September and 12th of December, 1864, I transmit to you herewith copies of a correspondence with the Board of Trade on the subject of an alleged omission on the part of several of the Colonial Registrars of Shipping to act upon the instructions issued for their guidance in the use of the new Commercial Code of Signals adopted for the English and French Mercantile Navies.

I have the honor to be,

Sir,

Your most obedient

humble servant,

(Signed) EDWARD CARDWELL.

The Officer Administering the Government of Nova Scotia.

[Sir J. E. TENNENT to the Under Secretary of State for the Colonies.]

Board of Trade, Whitehall, 26th Jan., 1866.

SIR,—

I am directed by the Board of Trade to forward to you herewith, to be laid before Mr. Secretary Cardwell, a copy of a letter which has been received from the Registrar-General of Seamen, in which he reports that several of the Colonial Registrars of Shipping have failed to act upon the instructions contained in the circular (No. 190, of 1st November, 1864), a copy of which is annexed: and I am to request that Mr. Secretary Cardwell will cause the Board of Trade to be furnished with the information which the Registrar-General of Seamen requires, viz., a list of the Colonial ports to which the circular in question was forwarded.

I have, &c.,

(Signed) J. EMERSON TENNENT,

The Under Secretary, Colonial Office.

[Mr. MAYO to the Secretary to the Board of Trade.]

*General Register and Record Office of Seamen,
Adelaide Place, London Bridge, E. C.,
19th January, 1866.*

SIR,—

I beg leave to report that several of the Colonial Registrars of Shipping have failed to act upon the instructions contained in the annexed circular (No. 190), and have continued allotting signal letters to new vessels, according to the old system.

Under these circumstances I have to request that I may be furnished with a list of the Colonial ports to which the circular in question was forwarded, in order that I may communicate with the Registrars upon the subject.

I have, &c.,

(Signed)

JNO. J. MAYO,
Registrar-General.

The Secretary, &c., &c., Board of Trade.

[Sir FREDERIC ROGERS to Sir J. EMERSON TENNENT.]

Downing Street, 7th February, 1866.

SIR,—

In answer to your letter of the 26th ultimo, I am directed by Mr. Secretary Cardwell to acquaint you, for the information of the Lords of the Committee of Privy Council for Trade, that the Board of Trade Circular, No. 190, of the 1st of November, 1864, was sent to all the Colonial Governments, an enumeration of which will be found in the accompanying list, and that it was transmitted in a circular dispatch, of which a copy is enclosed.

I have, &c.,

(Signed)

FREDERIC ROGERS.

Sir J. EMERSON TENNENT, &c., &c., Board of Trade.

List of the Colonies to which the Circular Dispatch of the 12th of December, 1864, was transmitted:—

<i>North America.</i>	Saint Vincent, Grenada, Tobago, Saint Lucia, Leeward Islands— Antigua, Montserrat, Saint Christopher, Nevis, Virgin Islands, Dominica.	Natal, Saint Helena, Heligoland.
Canada, Nova Scotia, New Brunswick, Prince Edward Island, Newfoundland, Bermuda, Falkland Islands, British Columbia, Vancouver Island.		<i>Eastern.</i> Ceylon, Hong Kong, Labuan, Mauritius.
<i>West Indies.</i>	<i>African & Mediterranean.</i>	<i>Australian.</i>
Jamaica, British Honduras, Turks' Islands, British Guiana, Bahamas, Trinidad. Windward Islands— Barbadoes,	Gibraltar, Malta, Sierra Leone, Gambia, Gold Coast, Lagos, Cape of Good Hope and British Caffraria,	New South Wales and Norfolk Island, Victoria, Queensland, Tasmania, South Australia, Western Australia, New Zealand.

[Mr. FARRER to the Under Secretary of State for the Colonies.]

*Board of Trade, Whitehall,
20th February, 1866.*

SIR,—

Referring to your letter of the 7th instant, transmitting a list of the Colonial Governments to which a copy of the Board of Trade Circular No. 190 was sent, in December, 1864, containing instructions relative to the appropriation to British vessels of the Commercial Code of Signals, I am directed by the Board of Trade to enclose, for the consideration of Mr. Secretary Cardwell, the accompanying copy of a report upon this subject from the Registrar-General of Seamen, from which it would appear that either the instructions in question have not reached the Registrars of Shipping at many Colonial ports, or that they have been disregarded if received.

As some Registrars are known to have continued to allot Signals under the old regulations, the Registrar of Seamen has, to prevent confusion, communicated directly with those officers, a course to which this Board presume that Mr. Secretary Cardwell will, under the circumstances, not object.

I have, &c.,

(Signed) T. H. FARRER.

The Under Secretary, Colonial Office.

REPORT OF THE REGISTRAR-GENERAL OF SEAMEN.

*General-Register and Record Office of Seamen,
Adelaide Place, London Bridge, E. C.*

Circular No. 190 directs—

“That, for the purpose of informing the Registrar-General of Seamen when the new principle of allotting Signals is commenced by Registrars of Shipping in the British possessions abroad, each Registrar will, upon receipt of these instructions at *once* forward to the Registrar-General of Seamen, 6 Adelaide Place, London Bridge, a statement of all Signal Letters on his list which remain to be appropriated under these regulations.”

The following ports only have complied with these instructions, viz. :—

St. John, N.Bk.,
St. Andrews, N.Bk.,
Castries, St. Lucia,
Demerara,
Turks' Islands,
Falmouth, Jamaica,

Malta,
Gibraltar,
Cape Town,
Hong Kong,
Melbourne,
Belize, Honduras.

The Registrars at Port Louis, Mauritius, and Montreal, having continued to allot Signal Letters to every vessel registered at their ports, as was formerly the practice, I have called their attention to the new regulations, and forwarded a copy of the instructions, together with some Forms C. C. S. 2.

The Colonial Office having forwarded the dispatch *to the Governors* of the Colonies, it would appear that in many cases it has not yet reached the Registrars at the ports.

(Signed)

J. J. MAYO,
Registrar-General.

15th February, 1866.

APPENDIX No. 27.

GOVERNOR'S PRIVATE SECRETARY.

[Sir R. G. MacDONNELL to Mr. CARDWELL.]

(COPY.)

No. 72.

Halifax, Nova Scotia,
14th April, 1865.

SIR,—

In reference to previous correspondence as to the salary of the Lieutenant Governor's Private Secretary, I have the honor to state that on the 18th instant I gave the Queen's assent to the enclosed bill, entitled, "an act to provide a salary for the Private Secretary of the Lieut. Governor."

2. Her Majesty's Government will no doubt receive with satisfaction the intelligence that the various topics connected with this subject, and which from time to time have furnished matter for discussion, often of an unpleasant character, can no longer be annually brought forward. The act provides for the payment of 1,250 dollars per annum to the Governor's Private Secretary, who may thus be regarded as being added permanently to the Civil List of this Colony.

3. If the public service requires such an officer at all—and it seems generally agreed that some such officer is necessary—his close and confidential position in reference to the Governor renders it particularly desirable that his salary should not become the subject of annual discussion, or be used as a means of directing covert attacks at the Lieut. Governor himself.

4. In your despatch of the 22nd July you remark that the course which I actually adopted was not in complete conformity with previous instructions. I would, therefore, before taking leave of this subject, very respectfully point out that those instructions scarcely contemplated the position in which the Governor would be placed by a sum of £250 being virtually granted or withheld from him each year according to the will of a shifting majority in the Assembly.

5. Nevertheless that was the *only* position in which I could have found myself if the annual vote had been renewed; for the fact of its being once suspended deprived it of the practically permanent character of which grants of money to the Queen's representative should partake. And if a Governor must pay his Secretary, in case a Province omits to do so, voting a salary to the Secretary is *de facto* voting money to the Governor. I therefore felt it an imperative duty to decline absolutely any grant dependent on an annual vote, which had been proved by experience to be liable to fluctuation.

6. It is fit that I should add, in justice to my Ministry, that the question was never discussed between us since my despatch in July last year. I had ceased to suppose it likely that any steps were to be taken in connection with the matter; and when I desired the correspondence to be laid before the House, I did so merely with a view to the country's understanding my own position.

7. When it is considered how seldom even an obvious mistake is candidly admitted by a political leader, and how seldom effectual means are taken to

reverse a mistaken policy at the cost of much unfriendly criticism, I am persuaded that the unselfish and complete manner in which the present Ministry, regardless of the taunts of political opponents, has sought not merely to repair an error, but also to prevent the possibility of its future recurrence, cannot but be favorably viewed by her Majesty's Government.

I have the honor to be,

Sir,

Your obedient servant,

(Signed) R. G. MACDONNELL.

No. 23.

(COPY.)

*Downing Street,
13th May, 1865.*

SIR,—

I have the honor to acknowledge your despatch No. 72 of the 26th April, apprising me that a salary of £250 has been provided for the Governor's Private Secretary by a permanent Act.

I have received this information with much pleasure. The resolution of your Ministry to propose, upon further consideration, a measure to which they at one time were unfavorable, does credit to their candor and regard for the public interest; and I am glad the measure has met with the sanction of the Legislature. I am satisfied that it is one which has only done justice to the Lieut. Governor by providing from the public funds the salary of an officer whose services are not merely requisite to maintain the Lieut. Governor of the Province in a becoming position, but also to enable him to conduct the public business with advantage.

I have, &c.,

(Signed) EDWARD CARDWELL.

Lieut. Governor Sir R. G. MacDONNELL, C. B.

APPENDIX No. 28.

NAVAL CADETSHIPS.

[The Rt. Hon. EDWARD CARDWELL, M. P., to Lieut. Governor Sir R. G. MACDONNELL, C. B.]

(Circular.)

Downing Street, 25th October, 1865.

SIR,—

I find that the Governors of the North American and Australian Colonies have on several occasions omitted to avail themselves of their privilege of recommending periodically a candidate for a naval cadetship, and as my right of nominating lapses unless claimed within the year for which the cadetships are granted, I have to inform you that all nominations for the present year will be considered by me to have lapsed unless made within the year; and that future nominations will be considered as having lapsed unless the name of the nominees reaches the Secretary of State within the first quarter of the year for which it is made.

I have, &c.,

(Signed)

EDWARD CARDWELL.

Lieut. Governor Sir R. G. MACDONNELL.

APPENDIX No. 29.

TREATY WITH AUSTRIA.

(Circular.)

*Downing Street,
March 9th, 1866.*

SIR,—

I have the honor to transmit to you a copy of a treaty of commerce, which was concluded on the 16th of December last, between her Majesty and the Emperor of Austria, the ratifications of which were exchanged at Vienna on the 4th of January last.

I have, &c.,

(Signed) EDWARD CARDWELL.

TREATY OF COMMERCE BETWEEN HER MAJESTY AND THE EMPEROR OF AUSTRIA, WITH THE FINAL PROTOCOL.

Signed at Vienna, December 16, 1865. Ratifications exchanged at Vienna, January 4, 1866.

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, on the one part; and his Majesty the Emperor of Austria, King of Hungary and Bohemia, &c., on the other part; being equally animated by the desire of regulating and extending the commercial relations between their respective states and possessions, have resolved to conclude a treaty for that purpose, and have named for their Plenipotentiaries, that is to say:—

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, &c., the Right Honorable John Arthur Douglas, Baron Bloomfield of Oakhampton and Redwood, a Peer of Ireland, a member of her Majesty's Most Honorable Privy Council, Knight Grand Cross of the Most Honorable Order of the Bath, her Majesty's Ambassador Extraordinary and Plenipotentiary to his Imperial and Royal Apostolic Majesty;

And his Majesty the Emperor of Austria, King of Hungary and Bohemia, &c., Alexander Count Mensdorff-Pouilly, Grand Cross of the Order of Leopold, with the military decoration belonging to the Commander's Cross of the same Order, Knight of the Order of Maria Theresa, and Possessor of the Cross of Military Merit, Knight Commander of the Most Honorable Order of the Bath, Lieutenant-General in his Imperial Majesty's Army, Privy Councillor and Chamberlain, Minister of the Imperial House and of Foreign Affairs; and Bernhard, Baron Wullerstorf-Urbair, Knight of the Order of the Iron Crown of the second class, Rear-Admiral in his Imperial Majesty's Navy, Privy Councillor, and Minister for Commerce;

Who, after communicated to each other their respective full powers, found to be in due and proper form, have agreed upon and concluded the following Articles:

ARTICLE I. During the continuance of the present treaty, the subjects and commerce of Austria shall enjoy within all the dominions and possessions of her Britannic Majesty, including her Majesty's colonies and foreign possessions, the

same advantages which have been conceded to French subjects and commerce by the treaty between her Majesty and the Emperor of the French, signed at Paris on the 23rd of January, 1860, and to the subjects and commerce of the States of the Zollverein by the treaty between her Majesty and his Majesty the King of Prussia, representing the sovereign States and territories under the Prussian system of customs and contributions, signed at Berlin on the 30th of May, 1865; and further, Austrian subjects and commerce shall be placed in all other respects on the footing of the subjects and commerce of the most favored nation.

ARTICLE II. From and after the 1st January, 1867, British subjects and commerce shall, within the dominions of his Imperial and Royal Majesty, be placed in every respect upon the footing of the most-favored nation, and share in all the advantages and favors which are enjoyed by the commerce and subjects of any third power.

From this rule are excepted :—

a. Advantages such as those which, for the sole purpose of facilitating frontier traffic are at present conceded, or may hereafter be conceded, to the States of the German Zollverein, or to other neighbouring States; and also those reductions of or exemptions from customs duties which are valid only at certain parts of the frontier, or for the inhabitants of particular localities.

b. Those advantages which belong, or may hereafter be conceded, to the subjects of the German Confederation, in virtue of Federal Treaties and Federal Laws.

c. Those special and ancient privileges which are enjoyed by Turkish subjects, as such, for Turkish commerce in Austria.

ARTICLE III. The Austrian Customs Tariff (the present system of calculating customs duties by weight being maintained) shall be so regulated that the duty to be levied upon articles the produce or manufacture of the dominions of her Britannic Majesty, upon their importation into the Austrian States, shall, from the 1st of January, 1867, not exceed 25 per cent. of the value, with the addition of the cost of transport, insurance, and commission necessary for the importation into Austria as far as the Austrian customs frontier; and for this purpose there shall serve as basis the average value of the articles included under one and the same denomination in each position of the future Austrian Tariff.

From and after the 1st of January, 1870, the maximum of these duties shall not exceed 20 per cent. of the value, with the additions above defined.

The articles of State monopolies (tobacco, salt, gunpowder), and further, the goods comprised in classes 1 and 7 of the present Austrian tariff, are excepted from these maxima.

ARTICLE IV. Commissioners from both Governments shall meet not later than the month of March, 1866, for the purpose of ascertaining and determining the values and additional charges, and they shall take as the basis of their calculations the average prices at the principal centres of production and commerce of the United Kingdom for the year 1865.

Three years after the duties fixed by treaty shall have come into operation, each of the contracting parties shall have the right to claim a revision of the values.

ARTICLE V. Those duties of the future Austrian tariff to come into operation on the 1st of January, 1867, to which England attaches a special interest, shall form the subject of a supplementary convention to be concluded between the two contracting parties.

The articles of State monopoly, as also the goods subject to fiscal duties included in classes 1 and 7 of the present tariff, remain also here excepted.

ARTICLE VI. Internal imposts which are levied in the territory of one party on the production, preparation, or use of any article, whether on account of the State

or on account of municipalities and corporations, shall under no pretext affect the productions of the other party in a higher or more onerous degree than the same productions of native origin.

ARTICLE VII. The contracting parties agree that every reduction in their tariffs of import or export duties, and every privilege, favor, or immunity which either contracting party may hereafter grant to the subjects and commerce of a third Power, shall be extended immediately and unconditionally to the other contracting party, with a reserve, however, of the exceptions enumerated in Article II, *a* and *b*.

ARTICLE VIII. The subjects of one of the contracting parties shall enjoy in the dominions and possessions of the other, equality of treatment with native subjects in regard to charges on loading and unloading, to warehousing, and to the transit trade, as also in regard to bounties, facilities, and drawbacks.

ARTICLE IX. The subjects of one of the two high contracting powers shall, in the dominions of the other, enjoy the same protection as native subjects in regard to the rights of property in the trade marks, as well as in patterns and designs for manufactures.

ARTICLE X. The high contracting parties reserve to themselves to determine hereafter, by a special convention, the means of reciprocally protecting copyright in the works of literature and the fine arts within their respective dominions.

ARTICLE XI. The present treaty shall remain in force for the space of ten years, to date from the 1st of January, 1867; and in case neither of the high contracting powers shall have notified to the other, twelve months before the expiration of the said period of ten years, the intention to put an end to its operation, the treaty shall continue in force for another year, and so on from year to year, until the expiration of a year counting from the day on which one or other of the high contracting parties shall have announced its intention to put an end to it.

The high contracting parties reserve to themselves the right to introduce, by common consent, into this treaty any modification which is not opposed to its spirit and principles, and the utility of which shall have been shown by experience.

ARTICLE XII. The present treaty shall be ratified, and the ratification shall be exchanged in Vienna in three weeks, or sooner, if possible.

In witness whereof the respective plenipotentiaries have signed the same, and have affixed thereto the seal of their arms.

Done at Vienna, this sixteenth day of December, one thousand eight hundred and sixty-five.

(L.S.) BLOOMFIELD.
 (L.S.) ALEXANDER GRAF MENSdorFF-POUILLY, *F. M. L.*
 (L.S.) BERNHARD BARON WULLERSTORF, *C. Admiral.*

Final Protocol.

Upon proceeding to the signature of the treaty of commerce concluded this day between Great Britain and Austria, the plenipotentiaries of the two Powers made following declarations:

I. The plenipotentiaries of his Majesty the Emperor of Austria declared that in virtue of Article XIII of the Treaty of Customs and Contributions Union of

the 23d December, 1863, between Austria and Liechtenstein, the treaty of commerce concluded this day would apply equally to the principality of Liechtenstein, and the British plenipotentiary accepted this declaration.

II. In order to avoid any future doubt as to the intention of Article III, the plenipotentiaries of the two Powers agreed to the following explanation :

In the construction of a tariff of specific duties by weight within fixed *ad valorem* rates, it is necessary to determine what shall be the unit of value to which each specific duty shall be applied.

In adopting the basis of value established by Article III, it is understood that it is not intended to depart from the general principle of the Article, viz. : the application of certain maximum *ad valorem* rates of duty to all articles of British produce and manufacture, but to guard against the necessity of making separate provision for every variety of each article, thereby creating minute and inconvenient subdivisions in the tariff.

With this view it becomes necessary to group together those different qualities and descriptions of the same article or of similar articles which, from their approximation in value and general resemblance in character, it is found possible to include under one and the same denomination in one position of the tariff.

But it is understood that in fixing the denominations in each position of the future Austrian tariff, they shall be so arranged that the duty affixed to any one position shall not exceed the "maximum" rates fixed by Article III of the treaty upon the average value of any kind of goods of commercial importance included under any one denomination in such position, unless by common consent it is considered expedient or necessary.

III. With reference to Article IV, the plenipotentiaries likewise agreed that if it shall be found that the prices of any kinds or goods have been essentially disturbed by exceptional causes during the twelve months of the year 1865, the commissioners of the two Governments shall endeavor to find such a basis of value as shall be considered to correspond to a fair average value for future years.

In the case of textile manufactures (the prices of which have been seriously deranged during the late war in the United States of America) it is agreed that if the average prices of the year 1865 be taken as a basis of value, either contracting party may claim a revision of such valuation after the 1st of January, 1868.

IV. The British Plenipotentiary then declared that :

Her Britannic Majesty engages to recommend to Parliament the abolition of the duties payable on the importation of wood and timber into the United Kingdom, and also the reduction of the duties payable on wine in bottle to the amount of those payable on wine in wood upon importation into the United Kingdom.

V. The Imperial Austrian plenipotentiaries on their part declared that :

The duty upon the export of rags from the states and possessions of his Imperial and Royal Majesty shall, from and after the 1st of July, 1866, be reduced to two florins the zolcentner ; and that :

The duty upon the importation of salted herrings into the states and possessions of his Imperial and Royal Majesty shall, from the 1st of February, 1866, be reduced to 50 kreutzers per zolcentner, gross weight.

In witness whereof the undersigned plenipotentiaries have drawn up the present protocol in duplicate form, to which, after it had been duly read, they affixed their signatures.

Vienna, this 16th day of December, 1865.

(L.S.) BLOOMFIELD.
 (L.S.) ALEXANDER GRAF MENSENDORFF-POUILLY, *F. M. L.*
 (L.S.) BERNHARD BARON WULLERSTORF, *C. Admiral.*

APPENDIX No. 30.

TREATY WITH PRUSSIA.

(Circular.)

Downing Street, March 8, 1866.

SIR,—

I have the honor to transmit to you a copy of a Treaty of Navigation, which was concluded on the 16th of August last, between her Majesty and the King of Prussia, the ratifications of which were exchanged at Berlin on the 24th ultimo.

I have, &c.,

(Signed)

EDWARD CARDWELL.

TREATY OF NAVIGATION BETWEEN HER MAJESTY AND THE KING
OF PRUSSIA.

*Signed at Gastein, August 16th, 1865. Ratifications exchanged at Berlin,
February 24th, 1866.*

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, on the one part, and his Majesty the King of Prussia, on the other part, being equally animated by the desire to develop the stipulations relative to the reciprocal treatment of navigation now in force under the treaties concluded between them on the 2nd of April, 1824, and the 2nd of March, 1841, upon the basis of the alterations in their navigation laws which have since taken place, have entered into negotiation for that purpose, and have named as their plenipotentiaries, that is to say :—

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, the Right Honorable Francis Baron Napier of Merchiston, a Peer of Scotland, a Baronet of Nova Scotia, a Member of her Britannic Majesty's Privy Council, her Majesty's Ambassador Extraordinary and Plenipotentiary to his Majesty the King of Prussia, &c. ;

And his Majesty the King of Prussia, M. Otto Eduard Leopold von Bismarck-Schonhausen, President of his Ministry of State, and Minister of Foreign Affairs ;

Who, after having communicated to each other their respective full powers, found to be in good and due form, have agreed upon and concluded the following Articles :—

ARTICLE I. British ships and their cargoes shall, in Prussia, and Prussian ships and their cargoes shall, in the United Kingdom of Great Britain and Ireland, from whatever place arriving, and whatever may be their place of destination, and whatever may be the place of origin or destination of their cargoes, be treated in every respect as national ships and their cargoes.

It is, however, agreed that the preceding stipulation shall not affect the rights connected with fishery belonging exclusively to the subjects of either country within their respective marine territorial limits, nor the local immunities enjoyed in Great Britain, not by British subjects generally, but only by certain privileged classes in certain ports.

Every favor or exemption which either of the contracting parties shall grant in these respects to any other power, shall be immediately and unconditionally extended to the other party.

ARTICLE II. The stipulations contained in the preceding article are also to be applied to the colonies and foreign possessions of her Britannic Majesty, as well as to the ships and cargoes of the same; but as regards the coasting trade, only in those colonies and foreign possessions the coasting trade of which shall have been, or shall be hereafter, opened to foreign ships in conformity with the acts of Parliament which govern this matter.

ARTICLE III. If any ship of war or merchant-vessel of one of the contracting parties should run aground or be wrecked upon the coasts of the other, the same aid and assistance shall be rendered to it as to a national vessel, and in such case no other expenses shall be paid by the owners or their agents and representatives for the preservation of the property than would be payable in the like case of a wreck of a national vessel. In case the master of a merchant-vessel should be under the necessity of disposing of a part of his merchandize, in order to defray his expenses, no impediment shall be opposed by the authorities, the master being bound, however, to conform to the existing regulations and tariffs.

The goods and merchandize saved from the wreck shall be exempt from all duties of customs unless cleared for consumption.

The respective Consuls-General, Consuls, Vice-Consuls, and Consular Agents shall, if the owner or master, or other agent of the owner, is not present, or is present and requires it, be authorized to interpose, in order to afford the necessary assistance to those concerned.

ARTICLE IV. The Consuls-General, Consuls, Vice-Consuls, and Consular Agents of each of the contracting parties residing in the dominions and possessions of the other, shall receive from the local authorities such assistance as can by law be given to them for the recovery of deserters from the vessels of their respective countries.

ARTICLE V. The right of acceding to the present treaty is reserved to every state now belonging to, or which may hereafter join, the Zollverein.

ARTICLE VI. The present treaty shall have the same duration as the treaty of commerce, signed on the 30th of May in the current year, between Great Britain and the Zollverein.

It shall come into force four weeks after the exchange of the ratifications thereof.

ARTICLE VII. The present treaty shall be ratified, and the ratifications thereof shall be exchanged at Berlin in six months,* or sooner if possible.

In witness whereof the respective plenipotentiaries have signed the same, and have affixed thereto the seal of their arms.

Done at Gastein, the sixteenth day of August, in the year of our Lord one thousand eight hundred and sixty-five.

NAPIER.

APPENDIX No. 31

TREATY WITH ZOLLVEREIN.

Circular.

*Downing Street,
31st July, 1865.*

SIR,—

I have the honor to transmit to you a copy of a treaty of commerce, which was concluded on the 30th of May last, between her Majesty and the Zollverein, the ratifications of which were exchanged at Berlin on the 30th ultimo.

I have, &c.,

(Signed)

EDWARD CARDWELL.

Lieut. Governor Sir R. G. MACDONNELL, C. B.

TREATY OF COMMERCE BETWEEN HER MAJESTY AND THE ZOLLVEREIN.

[Signed at Berlin May 30, 1865. Ratifications exchanged at Berlin June 30, 1865.]

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, on the one part; and,

His Majesty the King of Prussia in his own name, and representing the sovereign states and territories united to the Prussian system of customs and contributions, that is to say, the Grand Duchy of Luxemburg, the enclaves of the Grand Duchy of Mecklenburg-Schwerin, Rossow, Netzeband, and Schoenberg, the Principality of Birkenfeld belonging to the Grand Duchy of Oldenburg, the Duchy of Anhalt, the Principalities of Waldeck and Pyrmont, the Principality of Lippe, and the Grand Bailiwick of Meisenheim belonging to the Landgraviate of Hesse, as well as in the name of the other members of the German Association of customs and commerce, that is to say, the Crown of Bavaria, the Crown of Saxony, the Crown of Hanover, as well for itself as for the Principality of Schaumburg-Lippe, and the Crown of Wurttemberg, the Grand Duchy of Baden, the Electorate of Hesse, the Grand Duchy of Hesse, as well for itself as for the Bailiwick of Homburg belonging to the Landgraviate of Hesse, the States forming the Customs and Commercial Union of Thuringia, viz.: the Grand Duchy of Saxony, the Duchies of Saxe-Meiningen, of Saxe-Altenburg, of Saxe-Coburg-Gotha, the Principalities of Schwarzburg-Rudolstadt and of Schwarzburg-Sondershausen, of the elder branch of Reuss and of the younger branch of Reuss, the Duchy of Brunswick, the Duchy of Oldenburg, the Duchy of Nassau, and the Free Town of Frankfort, on the other part;

Being equally animated by the desire of regulating and extending the commercial relations between the United Kingdom of Great Britain and Ireland, and its dependencies, and the Zollverein, have resolved to conclude a treaty for that purpose, and have named as their plenipotentiaries, that is to say:

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland; the Right Honorable Francis Baron Napier, of Merchiston, a Peer of Scotland, a Baronet of Nova Scotia, a member of Her Britannic Majesty's Privy Council, Her Majesty's Ambassador Extraordinary and Plenipotentiary to His Majesty the King of Prussia, &c.; and John Ward, Esquire, Her Majesty's Charge d'Affaires

and Consul-General to the Hanse Towns, and Consul-General in Hanover, Oldenburg, &c. ;

And His Majesty the King of Prussia ; M. Otto Eduard Leopold von Bismarck Schoenhausen, President of his Ministry of State, and Minister of Foreign Affairs ; M. Johann Friedrich von Pommer Esche, his Actual Privy Councillor ; M. Alexander Maximilian Philipsborn, Director in his Ministry of Foreign Affairs ; and M. Martin Friedrich Rudolph Delbruck, Director in his Ministry for Commerce, Trade, and Public Works ;

Who, after having communicated to each other their respective full powers, found to be in good and due form, have agreed upon and concluded the following Articles :

ARTICLE I. The subjects of Her Britannic Majesty who dwell either temporarily or permanently in the States of the Zollverein, and the subjects of the States of the Zollverein who dwell either temporarily or permanently in the dominions or possessions of Her Britannic Majesty, shall enjoy therein, in respect to the exercise of commerce and trades, the same rights as, and be subjected to no higher or other taxes than, the subjects of any third country the most favored in those respects.

ARTICLE II. The produce and manufactures of the dominions and possessions of Her Britannic Majesty which may be imported into the Zollverein, and the produce and manufactures of the States of the Zollverein which may be imported into the United Kingdom of Great Britain and Ireland, whether intended for consumption, warehousing, re-exportation, or transit, shall therein be treated in the same manner as, and in particular shall be subject to no higher or other duties than, the produce and manufactures of any third country the most favored in those respects.

ARTICLE III. No other or higher duties shall be levied in the Zollverein on the exportation of any goods to the dominions and possessions of Her Britannic Majesty, nor in the dominions of Her Britannic Majesty on the exportation of any goods to the Zollverein, than are or may be levied on the exportation of the like goods to any third country the most favored in that respect.

ARTICLE IV. The transit of goods to and from the United Kingdom of Great Britain and Ireland shall be free from all transit duties in the Zollverein, and the transit of goods to and from the Zollverein shall be free from all transit duties in the United Kingdom of Great Britain and Ireland.

ARTICLE V. Any favor, privilege, or reduction in the tariff of duties of importation or exportation, which either of the contracting parties may concede to any third power, shall be extended immediately and unconditionally to the other.

No prohibition of importation or exportation shall be established by either of them against the other, which shall not at the same time be applicable to all other nations.

The contracting parties engage not to prohibit the exportation of coal, and to levy no duty upon such exportation.

The preceding provisions respecting the prohibition of exportation shall not invalidate the obligations which the constitution of the Germanic Confederation imposes on the German States which compose the Zollverein.

ARTICLE VI. With regard to the marks or labels of goods, or of their packages, and also with regard to patterns and marks of manufacture and trade, the subjects of the States of the Zollverein shall enjoy in the United Kingdom of Great Britain and Ireland, and the subjects of her Britannic Majesty shall enjoy in the States of the Zollverein, the same protection as native subjects.

ARTICLE VII. The stipulations of the preceding Articles I to VI. shall also be applied to the colonies and foreign possessions of her Britannic Majesty. In those

colonies and possessions the produce of the States of the Zollverein shall not be subject to any higher or other import duties than the produce of the United Kingdom of Great Britain and Ireland, or of any other country of the like kind; nor shall the exportation from those colonies or possessions to the Zollverein be subject to any higher or other duties than the exportation to the United Kingdom of Great Britain and Ireland.

ARTICLE VIII. The present treaty shall come into force on the 1st of July, 1865, and shall remain in force until the 30th of June, 1877. In case neither of the contracting parties shall, twelve months before the last-mentioned day, have given notice to the other of the intention to terminate the operation of the treaty, then the same shall continue in force until the expiration of one year from the day upon which either of the contracting parties shall have given notice to the other to terminate the same.

ARTICLE IX. The present treaty shall be ratified, and the ratifications thereof shall be exchanged at Berlin in three weeks,* or sooner if possible.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed thereto the seal of their arms.

Done at Berlin, the thirtieth day of May, in the year of our Lord one thousand eight hundred and sixty-five.

APPENDIX No. 32.

ABRAHAM LINCOLN.

[Judge JACKSON to Sir R. G. MACDONNELL.]

(COPY.)

*Consulate United States,
Halifax, N. S., 15th April, 1865.*

SIR,—

The sad and startling intelligence has just reached me of the death by the hand of an assassin of his Excellency Abraham Lincoln, President of the United States.

He expired in the city of Washington this morning at 7 o'clock.

I feel too deeply and too keenly the great calamity which has befallen my country in the death of its honored and patriotic chief magistrate, and which awakens the profound grief of the American people, to do more than to announce to you an event which, whilst it has shrouded my own country in mourning, must by all good men in other countries be deeply deplored.

I have, &c.,

(Signed)

M. M. JACKSON,
U. S. Consul.

[Sir R. G. MACDONNELL to Judge JACKSON.]

(COPY.)

*Government House,
Halifax, 17th April, 1865.*

SIR,—

I have the honor to acknowledge receipt of your communication of Saturday, the 15th inst., announcing the atrocious assassination of President Lincoln. I feel that I need not assure you of my own personal sympathy for your countrymen under an affliction so sudden and accompanied by special circumstances so appalling.

The adjournment of both branches of the Legislature on receipt of the melancholy intelligence, the flags hoisted half-mast on all forts and public buildings, together with the unanimous and outspoken feeling of the press, sufficiently attest the profound and painful impression which the intelligence has produced on this community. You thus have at least the sad gratification of knowing that the misfortunes of your countrymen can evoke from their kindred here only feelings of kindly sympathy and good will.

I have, &c.,

(Signed)

R. G. MACDONNELL.

[Sir R. G. MacDONNELL to Mr. CARDWELL.]

(COPY.)

Halifax, N. S., 27th April, 1865.

SIR,—

Before you can receive this despatch the startling and very distressing intelligence of the foul assassination of President Lincoln will have reached you. The details of that outrage, no less disgraceful to our common humanity than injurious in my opinion to the cause of peace and order, cannot fail to have stirred the feelings of the British public with the same strong sympathy for the victim and horror at the crime, which the intelligence elicited here.

2. I have no doubt that her Majesty's Government will be gratified at learning the marked unanimity of feeling which pervaded this community on the subject; a manifestation which has evidently touched a kindred chord in the hearts of the people of the United States.

3. The tidings reached me on the forenoon of Saturday the 18th inst., and I did not hesitate an instant to arrange with the Provincial Secretary for the adjournment of the assembly, and to put off a visit which I had arranged to make to the Legislature for the purpose of giving the Queen's assent to several bills on that day.

4. As the brief letter which I wrote to the President of the Council conveying that decision and further suggesting the adjournment of the Council was immediately telegraphed over the United States and the British Provinces, and elicited their much grateful comment and much hearty spirit, I do myself the honor to enclose a copy of it.

5. I also enclose a copy of a letter received from Judge Jackson the United States Consul, announcing the President's death, and my reply thereto.

6. I likewise directed the flags on government house, the citadel, the forts, and the public buildings, to be hoisted half mast high, a mark of respect and sympathy which was repeated on the 19th inst., the day set apart for the funeral obsequies of the late President.

7. Unfortunately some accidental circumstances had previously led to display of flags on board two or three vessels engaged in blockade running, and at that time lying in the harbor. I therefore requested captain Preston of H. M. S. *Medea* to convey a message from me to the captains of those vessels as to the unreasonable and improper character of such a display. I also authorized the hauling down of the colours by force, if necessary, as I was determined to reserve the people of Halifax from the imputation of sympathizing with a crime which I knew only met their abhorrence.

8. Captain Lockwood of the *Colonel Lamb* waited on me the next day, and it appears from his explanation that the flags had been hoisted before the receipt of the intelligence of the President's death, and although it did not occur to him—as it ought to have done—to take them down when that news reached him, all were immediately removed on the receipt of my message.

9. On the whole I am satisfied that the unpremeditated and prompt display of hearty sympathy and good feeling exhibited by the authorities and this community has been creditable to the province, and will yet bear good fruit. I therefore hope the measures I adopted will meet your approval.

I have, &c.,

(Signed)

R. G. MACDONNELL.

The Under Secretary of State for the Colonies.

[Sir R. G. MACDONNELL to Mr. KENNY, President Legislative Council.]

(COPY.)

*Government House,
Halifax, 15th April, 1865.*

SIR,—

The very shocking intelligence which has just reached me of the intelligence of the murder of President Lincoln by the hand of an assassin, and my sense of the greatness of the loss which the cause of order has sustained by the death of a man whom I have always regarded as eminently upright in his intentions, indispose me to undertake any public ceremony such as I had contemplated in my intended visit to the Council this day.

I beg, therefore, to notify to you the postponement of that visit, and perhaps under the circumstances men of all parties may feel that the suspension of public business for the day would be a mark of sympathy not unbecoming the Legislature to offer, and one which none could misconstrue.

Believe me, &c.,

(Signed) R. G. MACDONNELL.

Mr. Kenny, President Legislative Council.

No. 22.

(COPY.)

*Downing Street,
12th May, 1865.*

SIR,—

I have forwarded your despatch No. 74 of the 27th April to the Foreign Department for the information of Earl Russell.

I entirely approve of the measures which you took to secure a general and becoming manifestation of the sentiments which the startling and very distressing intelligence of the assassination of President Lincoln had aroused in the minds of the authorities and people of Nova Scotia.

I have, &c.,

(Signed) EDWARD CARDWELL.

Lieut. Governor Sir R. G. MACDONNELL, C. B.

[From Judge JACKSON to Sir R. G. MACDONNELL.]

(COPY.)

*Consulate of the United States,
Halifax, N. S., 20th May, 1865.*

SIR,—

I have the honor to enclose herewith a copy of a despatch which I have received from the Hon. Wm. Hunter, Acting Secretary of State, in answer to my despatches Nos. 159 and 160, transmitting to the State Department a copy of the letter of your Excellency of the 17th of April, together with copies of the proceedings of the Legislative Council and House of Assembly of this Province upon receiving intelligence of the death of the late President of the United States.

I have, &c.,

(Signed) M. M. JACKSON,
Consul.

Lieut. Governor Sir R. G. MACDONNELL.

[Mr. HUNTER to Judge JACKSON.]

(COPY.)

*Department of State,
Washington, 12th May, 1865.*

SIR,—

Your despatches Nos. 159 and 160 have been received and read with much interest and gratification.

The sympathy so cordially manifested throughout the British North American Provinces for our national bereavement, is a happy augury of future friendly relations between the two countries.

I am, &c.,

(Signed)

WM. HUNTER.

To Judge JACKSON,
Consul United States, Halifax.

APPENDIX No. 33.

VERIFICATION OF DOCUMENTS.

(Circular.)

Downing Street, 26th December, 1865.

SIR,—

As a misapprehension appears to exist in some colonies respecting the mode of verifying legal and other documents which are forwarded to this department for use in foreign countries, I think it requisite to explain that whenever such documents are either forwarded to you at the request of foreign governments for execution in the colony over which you preside, or are transmitted by you to this country at the request of foreigners or others for verification in England, the last signature attached by way of attestation to any such document, must invariably be one which is known, and can therefore be certified to in this department. If possible it should always be that of the officer administering the Government.

I have to request your particular attention to this rule, as its non-observance has occasionally led to delay and inconvenience.

I have the honor to be,

Sir,

Your most obedient

humble servant,

(Signed) EDWARD CARDWELL.

Lieutenant-Governor

Sir WILLIAM FENWICK WILLIAMS, Bart., &c., &c.

APPENDIX No. 34.

PRIZES.

(Circular.)

*Downing Street,
9th February, 1866.*

SIR,—

I transmit to you for your guidance a copy of a letter in which the Secretary of State for Foreign Affairs has conveyed to me her Majesty's orders that no Chilian or Spanish armed vessels be allowed to bring their prizes into British waters.

I have, &c.,

(Signed) EDWARD CARDWELL.

Lieut. Governor,
Sir W. F. WILLIAMS.

[The Earl of CLARENDON to Mr. CARDWELL.]

*Foreign Office,
February 2, 1866.*

SIR,—

Her Majesty's Government being desirous of observing the strictest neutrality in the contest between Spain and the Republic of Chili, they propose, with the view of more effectually carrying into effect this principle, to interdict the armed ships and also the privateers of both parties from carrying prizes made by them into the ports, harbors, roadsteads, or waters of the United Kingdom, or of any of her Majesty's colonies or possessions abroad.

I have accordingly to acquaint you that the Queen has been pleased to direct that orders in conformity with the principles above stated, should forthwith be addressed to all proper authorities in the United Kingdom, and to her Majesty's naval or other authorities in all quarters beyond the United Kingdom, for their guidance in the circumstances.

I have, &c.,

(Signed) CLARENDON.

The Right Honorable
EDWARD CARDWELL, M. P., &c.

APPENDIX No. 35.

APPOINTMENT OF GOVERNOR.

(COPY.)

(Nova Scotia No. 2.)

Downing Street, 28th October, 1865.

SIR,—

You have received your commission as Lieut. Governor of Nova Scotia.

Since, however, the declared policy of her Majesty's Government will, if successful, lead to the discontinuance of the office as at present constituted, there would be an apparent inconsistency in filling it up in the ordinary way for six years; and I wish it to be understood that you expect to hold the office not for the ordinary period of six years, but only for such shorter period as may be convenient to her Majesty's Government. Meantime I trust that the selection of a distinguished native of Nova Scotia, whose feelings are identified with the welfare of the Province, will be regarded as an evidence of the desire of her Majesty's Government to promote that welfare.

I have, &c.,

(Signed)

EDWARD CARDWELL.

Sir W. F. WILLIAMS, Bart.

THE SECRETARY'S REPORT.

It is with much pleasure that I submit to the committee the following Report relative to our representation in Dublin. It is matter of regret that the Committee and public had no opportunity of judging of the character of our representation by its exhibition in Halifax before its transmission to Dublin. It was found impossible to make such an exhibition, owing to the shortness of the time for preparation, the desultory manner in which the contributions were received, and the necessity imposed upon us of shipping them in portions, and as opportunity presented itself. This is the more to be regretted, as comparatively few here had the privilege of seeing how well Nova Scotia had maintained her position among the other countries of the world. The space that we occupied in Dublin was much smaller than that of 1862; but it was not much smaller than that on the present occasion occupied by the two Canadas; and the Australian representation had to be crowded into less than double the space allotted to us.

There were so many countries represented, and so much space required, that it was with the utmost difficulty that we were able to secure the amount of space that had been promised to us by the Exhibition Committee, and which we were prepared fully to occupy. Another disadvantage under which we labored was, that our representation was divided, our coal being separated from our Court and erected in the garden of the Exhibition. If all our representation had been united, there would certainly have been no department in the Exhibition more imposing. Having the promise of a certain amount of space, a certain plan of arrangement was adopted by our Committee. A typical representation, sufficient fully to occupy our space and nothing more, was secured, and this plan, with some slight modifications, was adhered to in Dublin.

An attempt was made at a tasteful display of our contributions, as far as this could be done with a proper regard to the useful and the convenient. We attempted to make the Court attractive, and at the same time demonstrative and illustrative. The position of our Court was the best in the Colonial division. It was selected by his Excellency's brother, Hercules MacDonnell, Esq. From the front of our Court we had the best and most comprehensive view of the interior of the Exhibition. It was therefore the resort of artists and of visitors generally. It had, however, serious disadvantages, in common with all the positions in the gallery, arising from the intensity of light and heat. These rendered visits to the gallery somewhat short, and constant attendance on the Court uncomfortable and even dangerous, besides being injurious to the articles exhibited. One Colonial Commissioner was sun-struck; and our excellent attendant, whose attendance was constant and prolonged, suffered considerably from the same causes. This state of things was in striking contrast to the advantages of the position of our Court in 1862. In it visitors delighted to linger, and it was resorted to in the heat of summer as a cool and refreshing retreat. The part of the Exhibition of 1862, which our Court in Dublin most nearly resembled, was the main Court. It was bounded by the back wall of the building and two side walls, the one of these being common to us and India, and the other bearing the same relation to us and Lower Canada and Natal, so that here we had extremes meeting. Our Court was about five feet narrower than our London Court, and therefore we had no platform such as that on which our furniture and pianos were there displayed. From this you may understand that we were deficient in accommodation for bulky articles. Even our main Court in 1862 could not accommodate the most of the articles then sent, the carriage, sleigh, ploughs, harrows, &c., having to be placed elsewhere. In fact the whole space that we could appropriate in Dublin, to the part of the representation bearing a general resemblance to our main Court in London, was not more than equal to the one-half, and the front part of the Court was chiefly occupied by the representation of our mineral resources, which corresponded with the second Court in London, which had in its centre our great coal column. The great difficulty then with us was the want of sufficient space and the consequent necessity of *condensation*. We were bound to make the representation of our natural

resources, industry and skill, characteristic, and at the same time portable. We think that we succeeded in the object that we had in view; others were decidedly of the same opinion. Competent judges unhesitatingly affirmed, in my hearing, that in proportion to its extent, our present representation was much superior to that of 1862. The opinion of the British press was that our display was "an effective one," and the report of the juries, to a great extent composed of eminent men who had acted as jurors in former Exhibitions, shows that our Exhibition in Dublin was *singularly effective*. In the official catalogue of Dublin Exhibition, our exhibitors number 69. In the official catalogue of the London Exhibition of 1862, the number is 65. In the Dublin Jury Report we find that we are awarded twenty-one medals and twenty-two honorable mentions; in that of London we had nineteen medals and eleven honorable mentions. Another very marked feature in the present Exhibition is the very small amount of money expended. For certain very obvious reasons the expense is considerably larger than that estimated and submitted to the Government and Legislature at the inception of the project. An examination and analysis of the accounts will, however, be sufficient to show that if we had adhered to our original programme the original estimate would have been sufficient. It is possible, however, that the results might not have been alike satisfactory if that programme had been adhered to. Our grant of money was expended much sooner than we anticipated.

The Executive Committee resolved to pay exhibitors for articles offered as far as their funds would permit, if the articles offered were of a proper kind and of reasonable price; and engagements were made for the production of peculiar works which could not otherwise be secured; and articles which could not be secured by either of these methods were purchased in the market. Offers were made to farmers for special products, which were of so liberal a nature as to be equivalent to premiums.

A uniform set of show cases were made to order. Our money was thus all spent, and chiefly in production, and that too in the Province itself.

Here a difficulty met us which we did not altogether expect. Our Government, however, readily relieved us by giving us letters of credit on Baring Bros. & Co., for the sum of £250, which we considered equivalent for the articles purchased, and which we expected to refund by their sale. When I named the sum of £500 in my estimate, I never for a moment supposed that sum of itself was sufficient to make a proper representation of the resources and industry of our colony.

I considered that, as a matter of course, the influence and exertions of the committee, and the co-operation of public bodies and of public spirited individuals, would be superadded to enable us to make a sufficient and effective display; and I was not disappointed. To his Excellency Sir Richard G. MacDonnell, the Province is altogether and highly indebted for the inception of the project, and for a hearty and vigorous encouragement in its progress. I may be allowed to record my deep sense of his Excellency's great condescension and kindness shown to me while prosecuting my part in the work of preparation here, and continued while I occupied the responsible position of representative in Dublin, by which my stay in Ireland was rendered very pleasant, and at the same time more useful to the Province than it would otherwise have been. To the character of the Committee our project owes chiefly its distinction and public interest; and to the hearty support of the Government and Legislature, and to the members of the Executive Exhibition Committee, the Province is much indebted; to the Chairman for assiduity and counsel; to Dr. Gilpin and his associates, Messrs. Downs and Willis, for an effective presentation of our zoology and animal products; to Dr. Forrester and Mr. Jennings for the representation of our horticulture and agriculture; and to Professor How for his admirable and complete representation of our mineralogy. To the General Mining Association the Province is under peculiar obligations for their readiness in responding to his Excellency's application for a column of coal from the Albion Mines; and also to the Cunard Company for giving a conveyance of our contributions to Liverpool, free of charge. We are also under considerable obligations to Messrs. Hyde and Lindsay for free carriage of articles; to Messrs. Coleman and Sons for the use of a beautiful and complete collection of our furs; to the Manager of the Acadian Iron Works for

the products of mine and works ; and to Lady MacDonnell for the use of a beautiful case of cutlery made from Acadian steel. In order to give some adequate idea of the character of our display, as well as to do justice to the various contributors, I shall proceed to characterize the respective contributions in the order in which we find them classified in the Jury report.

In Class I we have noticed by the Jury "a geological collection, consisting of fossils, sketch maps and sections, giving valuable geological information." I would simply say in regard to the collection, that it was not so large as that which I exhibited in 1862, but it was more select and complete. I had secured two copies of the new edition of Mackinlay's Map. The plain one I used for geological purposes, as far as this could be done with a map on so small a scale. To this I added colored maps of a representative locality which I surveyed in the summer of 1862, and of another which I surveyed when in the service of the Government in 1864. These were accompanied by two colored sections, one embracing three miles and showing the succession of the rocks in the N. E. division of our Province ; and the other embracing 56 miles, extending from the Atlantic Ocean to the Gulf of the St. Lawrence, and showing the relation between the rocks just mentioned and the rocks of our gold fields. These were illustrated by specimens, which were regarded with great interest by the geologists of the Jury and others, partly on account of their novelty, and also on account of their illustrative character. Dr. How is credited with "a complete collection of the minerals of the Colony." This collection was not so large as the collection in 1862, but it was select and thorough, containing choice specimens of all the known minerals of the Colony. It was universally regarded as very beautiful and instructive, and was much coveted for the museums of Great Britain and other countries ; it was openly and unanimously awarded a medal. E. A. Jones, Esq., manager of the Acadian Iron Mines, is awarded a medal "for pig iron, and hematite." It certainly adds to the value of this medal when I inform you that the decision of the Jury was facilitated through the kindness of Lady MacDonnell in permitting us to exhibit a beautiful case of cutlery presented to her by Mr. Livesey, and made of Acadian steel. It was a fortunate circumstance that this case was exhibited, as we did not receive the large case of cutlery from Sheffield which we had expected to receive to add to the attraction and efficiency of our representation. There was another fortunate circumstance connected with this article of exhibition. One of the Jurors adduced the objection and misapprehension in regard to the manufacture and quality of the Acadian iron, which had been offensively set forth by the *Times* in 1862. In this case, however, I succeeded satisfactorily in meeting the objection, and the medal was unanimously awarded, and the Acadian iron restored to its proper position.

In the same class, George Scott, Esq., is awarded a medal for column of coal, a section of the main seam of the Albion Mines, 35 feet 6 inches thick. This column was in the process of being excavated by Mr. Scott's father, in anticipation of a favorable answer being given to his Excellency's application by the Mining Association. During the course of his illness and death, we were uncertain as to whether the column could be obtained. But it appears that during his illness, Mr. Scott manifested a constant interest in the work, and gave all the necessary directions regarding it. After his decease those directions were scrupulously followed out by his son, and at length Mr. George Scott reported to us that it was completed, packed up, and despatched. Nearly a week after, having traversed roads nearly impassable, it reached Halifax just in time for the latest available opportunity for transmission. When I reached the Exhibition Palace in Dublin, I found the coal column was denied a position in the building, and had a place assigned to it in an eligible part of the garden, at the corner of the archery ground, and at the side of the great walk leading from the Harcourt grand entrance to the British corner of the Exhibition. The chief objections that I had to the position were, the distance from our Court, the exposure to which our coal column must necessarily be subjected, and the necessity of greater time, care and expense in its erection. When erected, the Executive Committee in Dublin were astonished at the handsome appearance that it presented, regretted that it had not been erected in the Palace, and resolved to have it removed and erected

in the interior after the close of the Exhibition. The column is not so thick as its predecessor of 1862. It is handsomer, and has been erected with so much care that it appears as one block, and excites wonder on account of its singular height and supposed entirety. Its singular merits, and the energy and skill displayed in its production, at once recommend it to the judgment of the jury; and it remains in the Winter Garden, having its name, origin, height, and honors of 1862 and 1865 properly indicated.

The Waverley Gold Mining Company receives a medal "for a very interesting collection of auriferous quartz and gold produced from it." This quartz is characterized by the Jury as very interesting. It was peculiarly so to scientific men. The geologists of Ireland, and especially those of H. M. Geological Survey of Ireland, examined it with great attention; and specimens have been solicited for the various museums in Ireland, and for museums in other countries.

As for the Bar of Gold, it commanded universal attention. It was for many weeks without a rival in the Exhibition; and even after the arrival of the great collection of Victoria, containing another bar about an ounce heavier than ours, our Ingot to the last continued to be an object of curiosity and interest. The Waverley gold representation was much enhanced by the exhibition of Forshaw Day's beautiful and much admired oil painting of "Waverley in Autumn."

In the same class, we find the coal of Cape Breton distinguished by four "honorable mentions." Hon. T. D. Archibald receives this award "for good sample of Coal"; R. Brown, "for interesting specimens of Coal"; C. J. Campbell, "for a good specimen of Coal"; and Symonds, Kay & Ross, "for a good specimen of Coal." I may here state that no country received so many awards as Cape Breton did for coal, or awards of a higher order. The only medal given by the Jury for Coal is that awarded to our Coal Column.

Our Government receives honorable mention for "an interesting collection of gold nuggets." The large Tangier nugget was the most interesting of this collection. Our Gold pyramid representing the quantity and bulk of the Gold derived from our Gold Fields, was situate behind the case containing the auriferous quartz and gold. It was considered by some here as a somewhat diminutive looking representation, and it was thought that it would appear puny beside the enormous pyramid of Victoria. It was, however, a truthful representation, and was sufficiently explained by the inscription, which read thus: "A Pyramid representing the quantity of Gold extracted from the Gold Fields of Nova Scotia in the years 1862-3-4; the amount extracted in 1862 being 6,737 oz.; in 1863, 14,001 oz., 14 dwt., 17 gr.; in 1864, 20,022 oz., 18 dwt., 13 gr.; total, 40,761 oz., 13 dwt., 6 gr." And as for its puny appearance, it was nearly equal in size to the Pyramid of Victoria. Victoria only sent a *model* of the Pyramid of 1862 and of the bulk added since 1862, leaving visitors to imagine the actual bulk of Gold produced from the model exhibited, and its inscription.

G. Lang was awarded honorable mention "for a well selected series of good Building Stones." The Province is certainly under considerable obligations to Mr. Lang for the spirit and skill which he displayed in preparing so good a collection of our building stones. This, along with Parish's Photographic Views of our principal streets and public buildings, served to give visitors some idea of the aspect of our capital. Mr. J. D. Nash contributed an interesting specimen illustrative of our mineral wealth, for which he has received an "honorable mention."

This large mass of Manganese was unique, on account of its size. The Zollverein exhibited specimens of Manganese of considerable beauty, and apparently equal to ours in quality; but they had nothing to compare with it in size. Its size and position, in front of our Court, secured for it a sufficient degree of attention.

In class 3 we have gained no fewer than fifteen awards. J. Barber secures a second medal "for excellent quality of Preserved Fish." These were thoroughly tested at the great Jury dinner, and were found worthy of their acquired honor in 1862. The mackerel and lobsters were the subjects of special remark,—the former, especially, was pronounced the best article in the Bill of Fare.

J. Crosskill's Wild Cherry Cordial was also much commended, according to

report, and has been awarded a medal "for excellence of quality;" and his other Cordials have been distinguished by an "Honorable Mention."

The same Jury has awarded a medal to Sheriff H. P. Hill, of Antigonish, "for excellent quality of Maple Sugar." This is given as the reason for the award, but I know for certain that it is not the only reason. The sugar, which was certainly excellent, was exhibited in a neat case, and was illustrated by choice specimens of maple wood, rough and polished, of the bird eye variety. This specimen was desired for the Nova Scotian department in the Edinburgh Museum of Science and Art. Medals are awarded to Messrs. P. McNab, of Dartmouth, and H. M. Moyle, "for Cereals of excellent quality." It may appear singular that both should have a similar award for apparently similar products. It is to be understood that the two cases are not altogether parallel. Both exhibited wheat, barley, and oats,—so that both were exhibitors of Cereals,—but McNab's wheat was the best, while Moyle's oats were the best, and the others very creditable.

The same Jury awards to Mr. W. C. Moir a medal "for excellent quality of Biscuits," and Mr. John Watt, "for excellent quality of Tobacco." In consequence of the backwardness of producers of this article to furnish us with a specimen for exhibition, I adopted the expedient of going to one who had the repute of selling a good article, and of purchasing from him a specimen of what was warranted to be an article of first rate quality, and this I entered for exhibition. When the Jury examined it, I informed them of the manner in which it had been procured. The mode of procuring and exhibiting the Tobacco was highly commended—an actual article of sale being considered preferable to a specimen prepared on purpose.

We found great difficulty in prevailing upon producers to furnish peculiar products, and were obliged, in more cases than that just referred to, to have to go to the market. I would recommend a more extensive adoption of this practice on any future occasion. In this way, a more general display of our manufactured articles would be secured, and in many cases a more truthful one. Considering it desirable to have some representation of our Fruit, and the season being too advanced for having a choice of Fruit, I thought upon getting some good Dried Apples for exhibition. After much search in the market, I succeeded in securing the Dried Apples to which the Jury has awarded a medal. I certainly was not prepared for such a result. The apples appeared to be very good, and I thought that my sending a part of them for the Jury dinner would make a little more variety in our contribution to the bill of fare. The apples were considered entitled to a medal, and the Chairman of the Jury, Prof. Wilson, assured me that he would secure a market in Edinburgh for any quantity of such apples. We find an honorable mention awarded to Mr. G. W. Dupe, "for good quality of Cordials." It was impossible for us to do full justice in the way of display to Mr. Dupe's contribution; we tried our best to exhibit his cordials and cider, but our space would not permit us, in justice to other contributors, to exhibit more than a certain number; the remainder had to remain in the boxes under the counters. Mr. P. Costin receives an honorable mention "for well made Cider." The heat was peculiarly destructive to this class of articles. It appears to me astonishing that they were in a condition to secure the commendation of the Jury.

The heat made a great flying of corks and bursting of bottles. One of the night police said that he frequently heard sounds in our corner during the stillness of the night that he could not account for, and that he often went to our department in search of intruders. Mr. J. Dodson receives an honorable mention for "good quantity of Cereals." Messrs. Hutton and Mackay have the same award "for good quality of Garden Seeds"; and Dr. Henry Pryor receives an "honorable mention for quality of Maize." Our display of Maize attracted considerable attention. People marvelled that such an article, and of a quality so superior, could be produced in a country such as they conceived ours to be. The exhibitors of Maize were, Dr. H. Pryor, Dr. Hamilton, and T. W. Chesley, Esq. It appears also that a selection of our Cereals and Garden Seeds, placed in the International Show by Mr. O'Rielly, our attendant, secured another medal. In this class we exhibited Digby Herrings, which were in great demand as usual; and we had also an excellent Annapolis Cheese, which was rendered unfit for exhibi-

tion by the heat, and removed from the Court before the Jurors had begun their work.

In class 4—Vegetable substances, &c., used in Manufacture—we find an honorable mention awarded to Mrs. Begg for Straw Plait and Straw Work. The illustrative card of Straw Plait, with the raw material, was regarded as excellent. It was selected for the Edinburgh Museum of Science and Art. The Bonnets and Hats were admired on account of the workmanship. I find that the only medal awarded for this kind of work was given to Italy.

Miss Turner's Straw Work was also much thought of, although Mrs. Begg's was regarded as superior. The chief drawback on these articles is their cost. It appears to me that they could be produced at a reasonable price. Jurors always attach much importance to this consideration. This matter appears to be worthy of the consideration of the Board of Agriculture. Mr. Moyle receives an honorable mention "for Flax." This is certainly very creditable, when it is considered that it was awarded by a Jury after the examination of the Flax of Ireland, prepared by the most approved processes, and from the best material.

In class 8—Naval Architecture—a medal is awarded to Mr. A. Robinson "for a new and improved plan of setting topsail clews, and patent thimble." These were often examined, and apparently with interest; but I heard no particular observation made regarding them.

In class 10—Philosophical Instruments—an honorable mention is awarded to the Mathematical, Mechanical Scale, invented by A. M. Chisholm, of Antigonish. This invention of our countryman was regarded with great interest by Mathematicians and Educationists—Professors Houghton and Galbraith, of Trinity College, Dublin, and others of the same Institution, one of whom was a member of the Jury, secured copies of the Scale, and one of Her Majesty's Inspectors of Education in England, and the Commissioner for Austria, Herr Von Sybel. It need not be very surprising if Mr. Chisholm's Scale should be adopted and used in those countries before it finds a place in our own Educational system, and then we will have another illustration of the old maxim, "A Prophet," &c.

In class 16 (A)—Saddlery and Harness—Mr. Daniel Chisholm, of New Glasgow, receives a medal "for a set of Harness of excellent workmanship." Mr. Chisholm is entitled to the thanks of the Province for the spirit which he manifested in the preparation of this contribution. It was nearly omitted in the Jury examination. The Jury supposed their work finished when they had examined the British and Foreign department. They did not suppose that there was any article of their class exhibited in the Colonies. They examined the Harness thoroughly, and soon decided on its merits.

In Class 16 (B)—Furs, &c.,—Messrs. W. J. Coleman & Sons receive a medal "for a beautiful and well prepared collection of Native Furs and various Fur Goods"; and Mr. C. Kaizer an honorable mention "for a fine Black Fox Skin." These formed a marked feature in our representation, and were very much admired. It is to be regretted that the unmanufactured Furs could not be exhibited until the close. They made a considerable blank when they were removed. A beautiful Cariboo Skin, belonging to Sir R. G. MacDonnell, was also exhibited; so that that department, although not so bulky as in 1862, was thorough and select in character, and without a rival in the Exhibition.

In class 21—Cutlery, &c.,—Bill & Skerry, of Liverpool, N. S., are awarded a medal. I did not feel altogether satisfied with the decision of the Jury on Bill & Skerry's Cutlery in 1862. The article specially examined then was a small shingle hatchet, which I considered as possibly not an average specimen. I therefore concluded to purchase from Starr & Sons a dozen of axes by these manufacturers, and the result must be regarded as satisfactory.

Starr & Sons are awarded a medal by the same Jury, for Skates. It was rather amusing to hear the Jury maintaining that the skates were Sheffield manufacture. They were much pleased with their mechanism and finish. If they had been for sale there would have been no difficulty in securing for them plenty of purchasers. These have been presented to H. R. H. the Prince of Wales.

In class 22—Iron and General Hardware—Messrs. W. S. Symonds & Co. are awarded a medal "for Stoves manufactured of Acadia with a proportion of Scotch

Iron." The cooking stove was apparently interesting to visitors as an illustration of our kitchen furnishing and operations, and it was acknowledged that we had rather convenient ways of doing things. They appeared to think that we had plenty to cook, and that we knew how to cook it comfortably and conveniently.

In classes 28 and 29, Mr. Andrew Downs receives a medal "for excellence in stuffing and mounting a collection of Native Birds." This is just what every one here and elsewhere would expect, his birds are always so beautiful and life-like. I was sometimes asked if they were hatching. The summer duck is always an object of admiration. It was most amusing to witness the incredulity displayed regarding the inmates of one of the cases. They were maintained to be merely specimens of stuffing—the birds being regarded as tropical; and how we could have birds of so rich plumage, and humming birds in such a cold and foggy country as they conceived ours to be, they could not understand. I was obliged to assure them most solemnly that humming birds could be seen very frequently in our gardens, and that the nest in the case beside those exhibited was a veritable Nova Scotia production. In the same classes, Mary Thomas was awarded a medal "for a collection of Fancy Articles of Indian workmanship." I had not entered these articles in the official catalogue of the Exhibition, as I regarded them rather as curiosities than otherwise. Two Juries were taken with their beauty, and wished to mark their appreciation of the industry and skill displayed in their manufacture. I therefore accredited them to Mary Thomas, the old mother of the family by which they were produced.

In the same class, Miss Kate McDougall receives an honorable mention "for Painted Fancy Work." This was prized on account of the execution and the illustrative character of the work. It was from the contribution of these two exhibitors that the beautiful and acceptable memento of Lady Wodehouse's visit to our Court was selected.

In Class 30—Photography—the Jury awarded to Messrs. Chambers, O'Donnell and Parish honorable mention "for good Manipulation." The only Colony that received a medal for Photography is Victoria. The joint production of Messrs. Chambers and O'Donnell—the Portrait of a Squaw nearly life-size—was regarded with considerable interest, and formed one of the decorative attractions of our Court. This and other works of art were displayed to great advantage in the handsome setting of Messrs. Wetmore. Mr. Parish's excellent life-sized portraits of the Marquis and Marchioness of Normanby were very attractive and decorative. They have been presented by Mr. Parish to the Marquis, and duly acknowledged. O'Donnell's Views of Scenery, and Parish's Views of Halifax Streets and Public Buildings, were very appropriate and instructive.

I have thus noticed the various contributions which have received the commendation of the several Juries. But besides these, I may specify other contributions of decided merit and of equal interest which do not appear in the Jury Report. One of these is Forshaw Day's painting of Waverley in Autumn.

As there was no Jury on the Fine Arts, this beautiful and instructive painting had no judgment passed on its merits. It was, however, much admired by competent judges, and regarded as interesting on account of its illustrative character.

As in 1862, we were much indebted to Captain Littleton for two beautiful Paintings in water colors. The subjects were, "Halifax from York Redoubt," and "Halifax from Dartmouth." There appeared to be but one opinion in reference to the merit of these paintings. They were regarded as interesting and appropriate, as being excellent views of our Capital, its Harbor and surroundings. Our attendant informs me that His Excellency Sir Richard Graves MacDonnell has selected these for purchase as mementoes of Nova Scotia. Another production which may be considered as a work of art was a pen and ink Drawing by Mr. Harding. The subject was, "The Prisoner of Gisors." This was considered by connoisseurs a very creditable work. It was generally mistaken for an engraving instead of a production of the pen.

As there was no Educational Jury, such collections as Mr. Willis' shells of the Edible Mollusca of Nova Scotia, and the Misses Downs' collection of Moths and Butterflies, were not duly examined. These collections were, however, very interesting to Naturalists; and Mr. Willis's collection was solicited for the Edinburgh

Museum of Science and Art. The Embroidered Carpet of the Misses Hill attracted a considerable degree of attention while it was exhibited, which was only on particular occasions on account of want of space. It was regarded as a marvel of industry. We had a good display of home and factory made cloths. Of these, the grey cloths were the most thought of. There was no difficulty in disposing of these, while the other, or fulled cloths, had to be sold at considerable loss or remain unsold. It must be acknowledged that this department of our industry admits of very considerable improvement. It would be well if Nova Scotia could equal Canada in the quality and cheapness of production. An observation is here suggested which I make for the benefit of our manufacturers of woollen cloths. It would be well for them to make it a rule to charge no more for articles sold to Exhibition Committees than to other parties, as the cost of production is taken account of by the Juries in their decisions, as well as the quality of the articles. I would also urge upon Committees and Judges in our Provincial Exhibitions, in their decision of awards, to adopt the practice of Jurors in International Exhibitions. There were many other articles exhibited in our department, which although undistinguished by the Juries, were considered very commendable, and did good service in contributing to the completeness and illustrativeness of our Provincial collection, the contributors of which are respectively entitled to our thanks. Among these contributors are Mr. J. Thompson, who exhibited excellent corn brooms and brushes; Miss H. Jennings, who exhibited autumn leaves and cone work; and the Misses Hill, who exhibited cone cabinets and baskets, bead work and fancy straw work, which the Jury, by an unaccountable mistake, credited to Mary Thomas along with the Indian work. The Exhibition was closed on the 9th of November; and the contributions were finally disposed of. A small sum was realised by the sale of articles, and the greater part of the articles continue to occupy the Nova Scotian Department. The applications for contributions from our department from Museums and other Institutions, British and Continental, were very numerous. It was matter of regret that we could not comply with those requests, especially the applications from the Edinburgh Museum of Science and Art, and the Museum of Irish Industry, or the Museum of H. M. Geological Survey of Ireland.

Professor Archer, of the former of these institutions, was especially anxious to secure certain contributions. He intimated his intention of forming a Nova Scotian department in his noble institution. He has already the moose and fish in jars of our London Department of 1862, which he maintains are yet as attractive in appearance as when there exhibited. He was directed by the Secretary to apply to our Government; and the Government agreed that his request be granted if the directors of the Dublin Exhibition Palace did not wish them for permanent exhibition. The directors made an application for them, and the result is that a representation still continues in the Dublin Exhibition Palace and Gardens of which Nova Scotia has reason to be proud, and which is not surpassed by any surviving memorial of the British Colonies. The Secretary of the Directors, while suitably acknowledging to our Government the gift, expresses also the desire of receiving additional contributions from time to time, in order that the interest in our department may be sustained in time coming. We have thus enjoyed another very excellent opportunity of making our Province distinguished, of informing the representatives of various countries in the Dublin Exhibition, and visitors from those countries, as well as the people of Great Britain and Ireland, in regard to our country, the intelligence and skill of its people, and the character and importance of its natural products and industry.

Our manufactures have secured a proper share of attention and commendation, as the preceding pages show, and a foreign demand for our manufactures of iron and steel has been the immediate result. Our mineral wealth has commanded admiration, and its exhibition will no doubt raise our Province in the estimation of those to whose esteem we are not indifferent; and it may be, direct the attention of British capitalists to the development of our great mineral resources. We have exhibited choice products of the forest, the field, and the garden, and the intending emigrant has been induced to think of our country as his future home. We have also had an opportunity of exchanging our Agricultural products for

those of other countries, and thereby have secured what may prove ultimately largely beneficial to our own Agriculture; and we may have conferred a similar benefit on others. The representation of our fisheries has also secured commendation, which will also doubtless be productive of its proper results. Our whole Exhibition has tended to raise us in general estimation. As an eye witness I can assure you, and a comparison of the jury reports of 1862 and 1865 corroborates the testimony, that with the exception of Ireland, the Kingdom of Italy, and the Isle of Mauritius, the only country that made a representation in 1865 that could compare favorably with its representation of 1862, was Nova Scotia. When we consider the importance of these results, and the comparative smallness of the sum of money expended, and the proportion of money expended at home compared with that expended abroad,—an improvement which is mainly to be attributed to experience in the management of such matters,—a frequent occurrence of such Exhibitions is rather to be desired than otherwise.

Expenditure in Exhibition of London, 1862.

In Nova Scotia.....	\$16,248 09
In London.....	4,117 07
	\$20,366 06

Expenditure in Exhibition of Dublin, 1865.

In Nova Scotia.....	\$3,697 10
Less value on hand.....	326 01
	3,370 19
In Dublin.....	1,195 62
	\$4,565 81

D. HONEYMAN,
Secretary.

M E D A L S.

CLASS 1. — MINERALS, &c.

Honeyman, Dr.—For specimens of Fossils, Sketch maps, and Sections, giving valuable geological information.

How, Dr.—For a complete collection of the Minerals of the Colony.

Jones, E. A.—For Pig Iron, bar and hematite, from Acadian Mines.

Scott, George.—For column of Coal, a section of the main seam of the Albion Mines, 35 feet 6 inches thick.

Waverley Gold Mining Company.—For a very interesting collection of Auriferous Quartz and Gold produced from it.

CLASS 3. — SUBSTANCES USED AS FOOD.

Barber, J.—For excellent quality of Preserved Fish.

Crosskill, J.—For excellent quality of Wild Cherry Cordial and Brandy.

Hill, Sheriff (Antigonish).—For excellent quality of Maple Sugar (illustrative).

McNab, J. C.—For excellent quality of Cereals.

Moir, W. C.—For excellent quality of Biscuits.

Moyle, H. M.—For excellent quality of Cereals.

Watt, J.—For excellent quality of Tobacco.

N. B.—The Exhibitor of Dried Apples is awarded a Medal through the Secretary, the exhibitor's name being unknown.

CLASS 3.—NAVAL ARCHITECTURE, &c.

Robinson, A.—For a new and improved plan of fitting topsail clew and patent thimbles.

CLASS 16 (A).—SADDLERY AND HARNESS.

Chisholm, Daniel (New Glasgow).—For a set of Harness of excellent workmanship.

CLASS 16 (B).—LEATHER, FURS, &c.

Coleman, W. J., & Sons.—For a beautiful and well prepared collection of Native Furs (silver, red and cross Fox, Otter and Mink), and various Fur Goods.

CLASS 21.—CUTLERY, EDGE TOOLS, &c.

Bill & Skerry, Liverpool, N. S.—For Axes.
Starr & Sons.—For Skates.

CLASS 22.—IRON AND GENERAL HARDWARE.

Symonds, W. S., & Co.—For Stoves manufactured of Acadia Iron.

CLASS 28 AND 29.—MANUFACTURES FROM ANIMAL AND VEGETABLE SUBSTANCES, &c.

Thomas, Mary.—For a collection of Fancy Articles of Indian workmanship.
Downs, A.—For excellence in Stuffing and Mounting a collection of Native Birds.

HONORABLE MENTIONS.

CLASS 1.

Archibald, Hon. T. D.—For good samples of Coal.
Brown, R.—For interesting specimens of Coal.
Campbell, C. J.—For good specimen of Coal.
Government.—For an interesting collection of Gold Nuggets.
Lang, G.—For a well selected series of good Building Stones.
Nash, J. D.—For large mass of Pyrolusite, (Manganese).
Symonds, Kay & Ross.—For good specimens of Coal.

CLASS 3.

Croskill, J.—For Cordials.
Costin, P.—For well made Cider.
Dodson, J.—For good quality Cereals.
Dupe, G. W.—For good quality of Cordials.
Hutton, J.—For good quality of Garden Seeds.
Mackay, J.—For good collection of Garden Seeds.
Pryor, Dr. H.—For quality of Maize.

CLASS 1.—VEGETABLE AND ANIMAL SUBSTANCES USED IN MANUFACTURES.

Begg, Mrs.—For Straw Plait and Straw Work.
Moyle, H. M.—For Flax.

CLASS 10.—PHILOSOPHICAL INSTRUMENT.

Chisholm, A. M.—For his Computing Scale.

CLASS 16.—(B.)

Kaizer.—For a fine Black Fox Skin.

CLASS 28.

MacDougall, Miss Kate.—For Painted Fancy Work.

CLASS 30. — PHOTOGRAPHY.

Chambers.—For good Manipulation.

O'Donnell.—For good Manipulation.

Parish.—For good Manipulation.

DUBLIN INTERNATIONAL FRUIT, VEGETABLE, AND CEREAL SHOW MEDAL.

Government N. S.—For a choice collection of Cereals and Garden Seeds from the Court, exhibited by Mrs. O'Rielly for the Government.

APPENDIX No. 37.

REPORT OF COMMITTEE ON PUBLIC ACCOUNTS.

The Joint Committee of the Legislative Council and House of Assembly, appointed to examine the public accounts, have examined the same and the vouchers therewith submitted, and report as follows :

RECEIVER GENERAL'S ACCOUNT.

This account has been compared with the vouchers, and found correct.

Balance in favor of the province on 30th Sept., 1865, \$222,932.97. At the same period in 1864 the balance was \$225,159.96.

Not included in the above balance of 1865, is gold purchased for the Dublin Exhibition, \$11,222—since sold at an advance.

The revenue from Customs and Excise duties collected for 12 months ending 30th September, 1865, was.....	\$1,047,891 08
Same period for 1864,.....	990,169 89
	\$57,721 19
The gross amount of Light duty collected for 12 months ended 30th September, 1865, was....	\$38,944 65
Same period for 1864,	39,975 90
	\$1,031 25
The gross revenue of 1865 from all sources was,.....	\$1,487,305 74

(Appendix A, and Receiver General's Accounts.)

There was due from Collectors of Excise and Light duties on 30th September, 1865,.....	\$67,282 62
Since paid,.....	60,636 20
	\$6,646 42

(Appendix B.)

The casual revenue for twelve months, 30th September, 1865, was..	\$45,752 33
The royalty on coal for same period,.....	\$43,645 08
For the nine months ending 30th September, 1864, the royalty on coal was.....	\$37,867 10

(Appendix C.)

CROWN LANDS.

The Commissioner's accounts have been examined and compared with the vouchers, and found correct.

The gross receipts for Crown Lands for 12 months ended 30th September, 1865, was.....	\$44,186 89
Searches,.....	42 22
Seizures,.....	73 50
	<hr/>
	\$44,302 61
Disbursements,.....	14,328 43
	<hr/>
Net revenue, 1865,.....	\$29,974 18
The net proceeds for 12 months ended 30th September, 1864,.....	18,805 78
	<hr/>
Increase,.....	\$11,168 40
	<hr/> <hr/>

Number of acres granted, 47,157.

(See *Crown Land Report*.)

MINES DEPARTMENT.

The accounts and vouchers of this department have been examined and found correct.

Gold Mines.

The yield of gold for the year ending 30th September, 1865, was,.....	24,867 oz. 5 dwts. 22 grs.
For the previous 12 months,.....	18,744 oz. 5 dwts. 12 grs.
	<hr/>
Increase for the year,.....	6,123 oz. 0 dwts. 10 grs.
The gross receipts from the gold mines for the year were,.....	\$18,058 59
The expenditures were,.....	6,972 32
	<hr/>
Nett proceeds, 1865,.....	\$11,086 27
	<hr/> <hr/>

Coal Mines.

Received for licenses to search,.....	\$10,400 00
" on licenses to work,.....	1,650 00
	<hr/>
	\$12,050 00
Paid expenditure for surveys,.....	\$686 97
Return on licenses to search,.....	800 00
	<hr/>
	1,486 97
	<hr/>
Balance to credit of coal mines,.....	\$10,563 03
	<hr/> <hr/>

Abstract.

Nett proceeds from gold mines,.....	\$11,086 27
Do. coal mines,.....	\$10,563 03
Royalty on coal,.....	43,645 08
	<hr/>
	54,208 11
	<hr/>
	65,294 38
Deduct expenses common to both services,.....	3,830 59
	<hr/>
Nett total,.....	\$61,463 79
	<hr/> <hr/>

POST OFFICE.

The accounts of this department have been examined and found correct.

Total expenditure for the year ended 30th September, 1865,.....	\$80,947 02
Nett revenue,.....	62,371 75
	<hr/>
Deficit,.....	\$18,575 27
	<hr/>
The deficit for 9 months in 1864 was,.....	\$16,956 00
	<hr/>
The gross revenue for 1865 was,.....	71,660 02
Do. do. 1864,.....	64,766 48
	<hr/>
Increase,.....	\$6,893 54
	<hr/>
Balance due Province, 30th September, 1865,.....	\$4,091 56
Postage stamps, do. do.	28,929 48
	<hr/>

BOARD OF WORKS.

Year ended 30th September, 1865—Amount of payments during the year for different services,.....	\$143,433 51
Paid Receiver General,.....	13,954 27
	<hr/>
	\$157,387 78

Receipts.

Balance 30th September, 1864,.....	\$6,155 61
From Treasury,.....	136,500 00
Different services,.....	13,634 27
	<hr/>
	156,289 88
	<hr/>
Balance due Board,.....	\$1,097 90
	<hr/>

The accounts have been examined and found correct. The vouchers for items of expenditure for repairs of schooner "Daring" have not been submitted to us in consequence of not coming in until after the close of the financial year. They will appear in the accounts of the following quarter.

(Appendix D. and Board of Works Report, &c.)

The salaries of the Heads of Departments are not included in the several statements and results furnished.

SAVINGS BANK.

Amount due to depositors, 31st December, 1865, was,.....	£165,111 10 5
Cash on hand,.....	£1537 11 3
	<hr/>
Gain in 1865,.....	£188 8 1
As shewn by the following statement:	
Interest paid depositors on accounts paid up and closed during the year,.....	£221 12 7
Credited to depositors to 31st December, 1865,.....	5,702 9 4
	<hr/>
	£5,924 1 11
Received from Receiver General:	
Interest on \$145,500, at 4 per cent,.....	£5,860 0 0
Do. on £13,500 paid in 1865,.....	252 10 0
	<hr/>
	£6,112 10 0
	<hr/>
Gain during the year,.....	£188 8 1
	<hr/>

The surplus fund is £1,038 10 9—as follows :

Balance 31st December, 1864,.....	£1,774	2	0
Gain in 1865,	188	8	1
			<u>£1,962 10 1</u>
Expenses account,.....	£19	5	11
Deficiency account written off,.....	904	13	5
			<u>923 19 4</u>
Surplus as above,			<u><u>£1,038 10 9</u></u>

IMMIGRATION.

The accounts of this department have been examined and agree with the vouchers.

Amount drawn from Treasury,.....	\$1,200	00
Balance from 1864,.....	269	08
Repayment of sums advanced,.....	11	10
		<u>\$1,480 18</u>
Expenditure, including salary, rent, &c.,..	1,347	18
		<u>\$133 00</u>

(See *Immigration Report*.)

MILITIA.

The accounts examined and agree with vouchers.

Expenditure during year ending 30th September, 1865, viz. :

Staff pay,.....	\$17,474	23
Bills, &c.,.....	16,497	56
Travelling expenses,.....	2,159	12
Contingent, &c.,.....	2,015	54
Bedford range,.....	795	02
Balance at 1st October, 1864,	860	05
		<u>\$39,801 52</u>

Receipts.

Drawn from Treasury,.....	\$33,000	00
Received from militia stores,	2,899	67
Contingent refunded,.....	35	00
Balance,.....	3,866	85
		<u>\$39,801 52</u>

Arms Fund.

Amount arms sold in 1859 and 1860,.....	\$4,480	45
Drawn in 1860,.....	479	55
Balance,	\$4,000	90

TREASURY NOTES.

The sum of \$57,000 old and defaced treasury notes of the denomination of \$4 and \$5 handed to the committee by the Deputy Provincial Secretary have been counted and destroyed. The Commissioners have signed new notes to the amount of \$92,000 00.

Notes in circulation March 5th, 1865,.....	\$487,458 00
New notes issued to March 15th, 1866,.....	92,000 00
	<hr/>
Total,.....	\$579,458 00
Old notes destroyed March, 1866,.....	57,000 00
	<hr/>
Now in circulation,.....	\$522,458 00

Being an increase of \$35,000 over the amount reported last year.

\$5,000 of which is credited by the Receiver General to 30th Sept. last.

(Appendix E.)

PROVINCIAL RAILWAY.

Construction.

Expenditure to 30th September, 1864, independent of extension from Truro to Pictou,.....	\$4,293,920 77
Ditto Ditto for 1865,.....	25,806 77
	<hr/>
	4,319,727 54
Less credit account,.....	220 39
	<hr/>
	4,319,507 15
By cash received from Receiver General to Sep- tember 30th, 1864,.....	\$4,290,891 15
Ditto ditto, in 1865,.....	20,000 00
	<hr/>
	4,310,891 15
	<hr/>
Due,.....	\$8,616 00

Revenue.

For 12 months ended 30th September, 1865, from all sources,.....	\$183,953 82
Expenses,.....	159,068 88
	<hr/>
Net revenue,.....	24,884 94
The net revenue for 12 months ended 30th September, 1864, was,..	30,102 21
	<hr/>
Decrease,	5,217 27

The decrease in net revenue, it appears, was caused by an increase of working expenses amounting in the 9 months to \$24,931 22.

The earnings of the road in 1865 being in advance of 1864, \$19,649 00, as follows :

Earnings in 1864,.....	\$161,089 56
Do. in 1865,.....	180,739 45
	<hr/>
Increase in 1865,.....	\$19,649 89

Extension from Truro to Pictou.

Expended to 30th September, 1864,.....	\$12,347 09
Do. Do. 1865,.....	260,728 62
Total,	\$273,075 71
Received from the Receiver General to 30th Sept., 1865,.....	243,500 00
Due,	\$29,575 71

Statement of Interest.

Paid by Receiver General 12 months to 30th Sept., 1865,.....	\$254,646 50
Do. Do previously,.....	1,681,159 37
Total,.....	\$1,935,805 87

Pictou Railway.

Debenture bonds sold from Jan'y 30th, 1865, to Dec. 31st, 1865,...	\$616,500 00
Interest for expired time on coupons,.....	8,043 88
	\$624,543 88
Paid the Commissioner between 1st April and 31st Dec., 1865,....	450,000 00
Balance,.....	\$174,543 88

Secured as follows, viz. :

Cash in bank of Nova Scotia,.....	\$51,243 88
Cash in bank Halifax banking company,.....	123,300 00
	\$174,543 88

The committee have counted and destroyed the coupons for railway interest payable in Nova Scotia, paid by the Receiver General in 1865, amounting to \$44,400.

INDEBTEDNESS OF THE PROVINCE.

Dr.

To amount provincial bonds, first issue,.....	\$4,000,000 00
Do. do. second issue,.....	495,000 00
Do. of province notes, old and new issue,.....	492,458 00
Do. borrowed from savings bank,.....	640,000 00

APPENDIX No. 38.

GEOLOGICAL SURVEY.

*King's College, Windsor,
March 10th, 1865.*

SIR,—

In the report submitted to his Excellency Sir R. G. MacDonnell on the geological survey commenced by Dr. Honeyman, it was stated that, with the consent of Government, such ores and minerals collected during the survey as it seemed expedient to have analysed had been placed in my hands. I beg now to submit my report on the chemical examination of the ores and minerals received from Dr. Honeyman in addition to those reported on by me in the appendix to the report above mentioned, viz., in the following :

1. Copper ore from Lochaber.
2. Lead ore from Arisaig.
3. Schist, with specks of metallic lustre.
4. "Pencil stone," from Merigomish.
5. Barytes, from Frenchman's Brook.
6. Limestone, from Arisaig,
7. Bog iron ore, from Antigonish.
8. Brown hematite iron ore, from Lochaber.
9. Brown hematite iron ore, from East River, Pictou county.

1. *Copper ore from Lochaber.*—This consists of a mixture of iron pyrites and copper pyrites, the former being the more abundant, distributed through brown hematite iron ore. In the first place, the average per centage of copper in the whole samples received (which weighed about a pound and a half) was ascertained by examining portions from various parts of the masses in the air-dry state. In this way was found

6.11 per cent. metallic copper,

as average of the whole, or in round numbers 137 lbs. metal to the English ton of ore. Ores of this quality are said to be worth about £8 sterling per ton. In order to learn the quality of the ore when dressed, I selected some portions; they contained a considerable amount of iron pyrites which could not be readily separated. From these I obtained

9.08 per cent. metallic copper,

or 203 lbs. to the English ton, which is about half as much again as in the average of the whole. From this result it appears that the copper is not very irregularly distributed through the samples examined. It is not improbable that such a mixture as the present may become much richer in depth, since it is stated that veins of iron pyrites often lead at greater depth to copper pyrites, and that in this case the iron pyrites invariably contain traces of copper. In the Lochaber ore the two sorts of pyrites are so intimately mixed that it is perhaps impossible to separate them completely in order to test the iron pyrites by itself, but the probability is it contains some copper. I may mention that I believe I have seen samples from Lochaber richer in copper than those examined on the present occasion, so that the results now given are not to be taken as shewing an undue richness in the deposit. It must be remembered that pyrites containing an

average of four per cent, copper is profitably worked, the sulphur obtained in burning it being sought as well as the copper. The average amount of copper in ores sold at the ore market of Redruth, in Cornwall, is eight per cent.

2. *Lead ore from Arisaig.*—This is galena mixed with coaly matter imbedded in limestone conglomerate. It was thought desirable to examine it for silver. A careful experiment resulted in failure to obtain any satisfactory evidence of the presence of this metal, so that if present at all it must be in practically unimportant amount.

3. *Schist with specks of metallic lustre.*—It was sought to ascertain the character of the two imbedded minerals; one of these was dull, of dark colour, the other had metallic lustre. The former I consider to be andalusite, a silicate of alumina, the latter is common iron pyrites in very small particles.

4. *Pencil-stone from Merigomish.*—This is the material referred to in the report as "of apparent admirable adaptation for the manufacture of slate-pencil." I found it to contain the following ingredients in proportions represented with sufficient accuracy by the numbers attached; the analysis proved that the elements are difficult of *complete* separation even on fusion in the regular way with carbonated alkalies:—

Water,	4.59
Peroxide of iron,	6.40
Magnesia,	1.44
Alumina,	19.35
Silica,	65.10
Alkalies, by difference,	3.12
	100.00

The mineral is about as soft under the knife as soapstone, but its analysis shows that it approaches pyrophyllite in composition, and is quite different from soapstone, which contains about twenty-five per cent. of magnesia. Its qualities are, however, such that it may be found useful not only in making pencils, but for some purposes to which soapstone is put, as in making backs for fireplaces and linings for stoves. Since it is so difficultly changed in the greatest heat of the blowpipe, only fusing on the edges, it would no doubt remain practically unaltered by exposure to ordinary fireheat, and it admits of the readiest fashioning to any desired shape with common tools. As regards the former application, a mineral resembling the present in characters, and having very much the same composition "has been brought extensively into use in the United States for writing on slates and blackboards," for which purpose it is described "as exceedingly well adapted." I have compared the Merigomish "pencil stone" with "a new sort of slate pencil from the States," obtained at a stationer's shop at Windsor, and probably made from the kind of mineral described in the preceding quotations, and I find them to agree so very closely in character that there can be little doubt of their being essentially the same mineral. Both mark very easily, without scratching, on the slate, but neither makes a useful mark on the blackboard.

5. *Barytes from Frenchman's Brook.*—This consists of white barytes mixed with some colored red by oxide of iron. The broken mineral shows the red color partly in the mass and partly in layers on surfaces of fracture, and when ground gives a powder having a decided pink tinge; the color of the powder is reduced by boiling with hydrochloric acid, but not wholly removed. This impurity is of course unfavorable to the ordinary use of barytes as a white pigment; a purer quality of mineral may exist beneath.

6. *Limestone from Arisaig.*—The object in examining this specimen was to ascertain whether from its composition it belongs to the class of hydraulic lime stones which contain amounts of clay or carbonate of magnesia varying from 10 or 15 per cent of the former to as much as 55 per cent. of the latter. I found it to contain:

Carbonate of lime,	74.64
Carbonate of magnesia,	4.84
Oxide of iron, with a little alumina,	5.05
Water,	0.16
Clay and sand,	13.82
	98.52

The amount and nature of the ingredients, besides carbonate of lime, are in favor of this limestone proving to a certain extent hydraulic.

7. *Bog iron ore from Antigonish.*—This consists of a rather pure ore of its kind. It contains 18.30 per cent. water, about 7 per cent. clay and 5 per cent. organic matter, and a decided but not unusually large amount of phosphoric acid. Oxide of manganese is present in small quantity; the rest of the ore, amounting to about 65 per cent, is peroxide of iron, equal to some 45 per cent metallic iron, a valuable per centage.

8. *Brown Hematite Iron Ore from Lochaber.*—The whole sample of this weighed about a pound. It is not uniform in quality, being composed of a dark brown and a yellow variety of ore; an average of the whole gave:

Peroxide of Iron and traces of Alumina,	68.45
Water,	11.12
Sesquioxide of Manganese,	4.73
Phosphoric Acid,	0.33
Lime,	0.34
Magnesia,	0.32
Silicious Gangue,	13.86
Carbonic Acid and loss,	0.85
	100.00

The amount of oxide of iron found is equal to

48 per cent. metallic iron

in round numbers. This is a rich and valuable ore, the amount of manganese present ought, according to prevailing notions, to be advantageous. Phosphoric acid is not unfrequently present in ores of this class in larger quantity than that obtained above.

9. *Brown Hematite Iron Ore from East River, Pictou.*—The specimen examined weighed above half-a-pound, and was very uniform in appearance. Its analysis gave:

Peroxide of iron, with trace of phosphoric acid,	84.54
Alumina and phosphoric acid,	0.19
Sesquioxide of manganese,	0.76
Magnesia,	0.43
Water,	11.41
Silicious gangue,	2.22
Carbonic acid and loss,	0.45
	100.00

The amount of oxide of iron obtained is equal to a fraction over 59 per cent. metallic iron, or within about one per cent. of what this kind of ore can contain in its purest form. The total phosphoric acid does not probably exceed two-tenths of one per cent. It is obvious that the ore is very rich and valuable.

All which is respectfully submitted by,

Your obedient servant,

HENRY HOW, D.C.L.,
Professor of Chemistry.

To the Hon. CHARLES TUPPER, M.D.,
Provincial Secretary.

APPENDIX No. 39.

LEGISLATIVE LIBRARY.

*Legislative Library Rooms,
19th March, 1866.*

SIR,—

Herewith be pleased to find the usual Annual Report of Mr. James Venables on the subject of the Legislative Library.

The annual contribution of the Legislature is disbursed under the supervision of the joint committee of both branches of the Legislature, and it affords us much pleasure to be enabled to state that these funds continue to supply the Library with a limited number of standard works, and keep the books on hand in repair.

The Library continues to be a place of favorite resort for literary persons, and is open the year round free of charge, and is well patronized by the members of both branches of the Legislature during the session of Parliament.

All which is respectfully submitted.

J. McCULLY, Chairman, } Committee of Legislative
EDW. KENNY, } Council.

S. L. SHANNON, }
A. G. ARCHIBALD, } Com. of House of Assembly.

The Hon. the Provincial Secretary, &c., &c.

*Legislative Library Rooms,
19th March, 1866.*

SIR,—

I have the honor to submit this my fourth Annual Report on the state of the Legislative Library for the year ending the 31st of December, 1865.

The number and value of the books added to the Library during the year have been quite equal to those of the year previous. Having been carefully selected from the works of the best authors in the various departments of history, biography, travels, science, &c., they will, upon inspection, be found to be of as useful and instructive a character as could possibly be obtained.

A list of the same, apart from the catalogue, is kept in the Library in order that the number and nature of the year's collection may at once be seen, instead of resorting to the usual tedious plan of searching through the whole catalogue.

The books received as exchanges and donations during the same time are quite as valuable and numerous as what have hitherto been received in that manner. Among the many additions made during the past year I must not omit to mention that of several valuable maps.

As regards donations, I would particularly bring to your notice one from Judge Jackson, United States Consul at Halifax, consisting of a copy of "American Diplomatic Correspondence" for the years 1863 and 1864 inclusive, numbering six octavo volumes.

From Mr. John R. Willis, late Principal of the National School, has been received a series of Reports of the Smithsonian Institution from 1853 to 1861 inclusive, in number ten volumes.

Through the hands of the honorable Provincial Secretary, have been received, the Imperial Acts of 28 and 29 Victoria, 1865. This series is thereby rendered

more complete ; but I beg to bring to your notice the fact that several volumes of the Acts of the Reigns of George III. and George VI. are required in order that the whole sett may be complete, the missing books having been lost previous to the transfer of all the books from other parts of the building to the Library Rooms.

From the same source have also been received, Hansard's Parliamentary Debates, from number 175 to number 179 inclusive, five volumes, completing that valuable work up to the latest published numbers.

From Canada have been received the Laws of that Province for the year 1865, one volume; Journal of the Legislative Assembly, 1865, one volume; Sessional Papers, three volumes; Journal of the Legislative Council, 1865, one volume; Trade and Navigation Returns for the first half of the year 1864, Debates on the question of Confederation, and the second volume of the "Patents of Canada."

From New Brunswick have been received the Journals of the House of Assembly and the Legislative Council for 1865, and the Laws for the same year.

From Prince Edward Island the Journals of the House of Assembly for 1864 and 1865, Journal of the Legislative Council for 1865, and the Laws for the same year.

From Newfoundland the Journal of the Legislative Council for 1864, and a volume of Laws for 1865.

Accompanying this report is the account of the years expenditure, with the necessary vouchers for the same, all which I beg most respectfully to submit.

JAMES VENABLES,
Librarian.

To the Hon. JONATHAN McCULLY,
Chairman of the joint Committee of the Legislative Library.

Legislative Library in Account with the Bank of Nova Scotia.

AGRICULTURAL REPORT.

APPENDIX No. 40.

Halifax, 18th March, 1866.

SIR,—

We have the honor to submit, for the information of his Excellency the Lieutenant Governor and the Legislature, a report of the proceedings of the Board of Agriculture for the past year.

The matter that first engaged the attention of the Board on its formation under the new Act in 1864, was the organization of county and district agricultural societies throughout the Province. Last session it was reported that 37 societies had been formed in 15 counties, and that 34 of these societies had qualified for participation in the legislative grant for 1864. The Board has continued its efforts in the organization and adjustment of societies, and the Secretary spent some time in visiting the societies in Pictou county last autumn. From the return submitted herewith, showing in detail the present condition of the various agricultural societies of the Province, it will be observed that—

The total number of societies is 48, being an increase of 11 societies during the year.

The number of counties containing societies is 18, so that every county in the Province now contains at least one society.

The present total number of members of agricultural societies (actually attested) is 2198, as compared with 1744 last year, showing an increase of 354 members. The total amount of subscriptions paid by such members is \$2384, being an increase on the amount of the previous year of \$525. The total amount of grants to societies is \$3314, being an increase of \$304.

It is provided by the Act that the grants to societies shall be apportioned to them in rateable proportion to the subscriptions of their members actually paid during the year, at the rate of \$2 of grant for \$1 subscribed, but under the limitation that no society shall draw more than \$200, and that the whole societies of one county shall not collectively draw more than \$240. We have now had two years' experience of the practical working of this system, and the results have been upon the whole satisfactory. There is one feature of the system, however, that requires to be well understood to prevent disappointment to the members of societies. So long as there are few societies in a county, the amount (\$240) appropriated to the county will be sufficient to provide \$2 for every dollar subscribed; but so soon as the collective subscriptions of all the societies in the county exceed \$120, then the grant-rate is necessarily diminished. In 1864, when there were fewer societies than now, the average sum appropriated to each society was \$83; but during the past year the average was reduced to \$69. Thus the societies in one county raise upwards of \$300 by subscription, and those of another county raise less than half that sum; yet both counties receive an equal grant of \$240. The society in one county with few members receives \$2 for every dollar subscribed, whilst a society in the other county receives less than one dollar for every dollar subscribed. Some complaints have been received from parties who had organized societies on the faith of receiving \$2 as a matter of course in return for one subscribed, and cases of apparent inequality may arise; but no real hardship has been experienced, and the restriction of the sum assignable to counties appears to be generally regarded as a just and necessary one.

The annual reports received from the various agricultural societies afford ample evidence of activity and zeal, and (what is of far greater importance) a general desire on the part of members to devote the funds at their disposal to the legitimate objects contemplated by the Act for encouragement of agriculture. Agricultural exhibitions and ploughing matches have been held by some of the societies; but most of them have devoted their funds to the purchase of improved breeds of stock, in accordance with the expressed views of the Board, that the

improvement of stock should be the chief aim of societies under the present circumstances of the country.

In last years' report to the Legislature, the Board pointed out the propriety of taking energetic steps for maintaining and improving the breeds of horses and cattle, by the importation of pure bred animals from England. The Committee on Agriculture of last session reported favorably upon this recommendation; and suggested that whilst the horses should be selected in England, the horned cattle might probably be obtained in our sister Provinces. Accordingly, the Legislature was pleased to vote the sum of \$10,000 to enable the Government to make an importation of suitable animals.

The hon. Dr. Tupper, Provincial Secretary, and the hon. W. A. Henry, Attorney General, having visited England on public business last summer, were requested by the Government to make enquiries and to purchase, if favorable opportunities offered. They found that owing to the season of the year and other circumstances, the time was a favorable one for obtaining valuable horses at unusually low prices. Purchases were made of four entire horses and four mares, all except one of the mares thorough bred; likewise of 25 rams, ewes and lambs, of the pure Leicester breed. The animals arrived by the steamer *St. Lawrence*, in the month of September, 1865, and although in a reduced state, yet in as good condition as could be reasonably expected. A few of the sheep died during the voyage; some others that were in a sickly condition, as well as one or two that seemed to be in good health, died after their arrival. A list of the animals, including the pedigrees of the horses,* is appended to this report, and the accounts of the Board will show the prices paid, expense of transit, and subsequent cost of keep of the horses up to the end of February, 1866.

In order that proper care might be exercised in transporting the horses, and in their treatment after reaching the Province, the services of Mr. George Plumb, an English groom, accustomed to the handling of thorough-bred horses, were engaged for one year. The horses have improved very much in appearance since their arrival, and are all in good health. Under judicious management, these animals may be expected to bring about a speedy and marked improvement in the breed of horses in our Province. It is well known that the blood horses of England excel all others in fleetness and strength; and it is found, as a general rule, that these qualities descend to their offspring with whatever breed they may be crossed. Thus horses of spirit and endurance may now be raised from the mares in the country.

It is but just to observe that much care has been required from members of the Board, in providing in an economical manner for the proper accommodation and management of the horses during the winter; and the Board feel under deep obligation to one of their number, Joseph Northup, Esq., who has not only devoted much valuable time to the requisite arrangements, but has likewise personally overlooked the horses almost daily since their arrival.

With the view of rendering the horses as serviceable as possible, the Board have determined to send them into the country for the ensuing season, under charge of competent and careful men. The number of horses (four) is too small to travel the whole Province, and it is proposed, therefore, to send to counties in rotation in successive seasons; some of the richest agricultural counties in the western, northern and eastern parts of the Province may be supplied this season, and the extreme western, and all the southern shore counties, as far as possible, next year. But the Board have not yet completed their arrangements.

The Hon. Alexander MacFarlane, President of the Board, having visited Canada last summer, was desired to embrace the opportunity to obtain, if possible, some suitable horned cattle and sheep. He accordingly purchased two Durham bulls and one Durham heifer; likewise twenty-eight sheep and lambs of Cotswold and Leicester breeds. The bulls and heifer have been kept at Pictou during the winter. As it is desirable to render these animals available for use during the ensuing season, it is proposed to bring two of the Durham cattle to Halifax, to be sold by public auction during the present sitting of the Legislature.

The sheep imported from England, as well as those obtained from Canada, were sold by public auction with a view to their general distribution throughout the

* Not printed.

Province. The English sheep were sold at Halifax, and the Canadian ones partly at Pictou and partly at Halifax. It will be observed from the returns that the prices realized were very satisfactory, affording evidence indeed of the appreciation by our farmers of pure stock, and of a determination on their part to improve their flocks. In all, 43 sheep and lambs were sold, realizing the sum of \$1340.50, that is an average price of \$31 each. One of the English rams brought \$94, and none of them were sold under \$70; the ewes and lambs of course brought less. One of the Canadian rams was sold for \$66, and another for \$64. The sale of the last lot was rather too late in the season to secure high prices. All the animals have fallen into good hands, and the purchasers are bound to retain them permanently in the Province.

The Board have had under consideration for some time the subject of a stock farm; and it has become obvious that such an establishment is absolutely required in the Province. On a farm of this kind the imported horses and other animals might be kept in safety and health at a moderate expense, and their services given to the country in the season. Pure breeds might be permanently maintained without the necessity of constant importations, and societies or private individuals desirous of such might visit the farm at their own convenience and select such surplus animals as would answer their purpose. Such an establishment would likewise afford scope for introducing to the notice of our farmers some of the more recent improvements in farm buildings and improved modes of cultivation adapted to the country. It is believed that a suitable farm in a central locality may be purchased, and the requisite buildings erected for the sum of \$8,000 to \$10,000; and the Board respectfully recommend that this sum may be placed at their disposal to enable them to carry out the important object in view.

The Board commenced in March last year to issue a monthly "Journal of Agriculture," which is extensively read by the more intelligent class of farmers and members of Agricultural Societies. In consequence of the small size of the Journal the numbers are sometimes barely sufficient to contain the reports of the county and district societies without any other reading matter. It appears to be desirable to enlarge the publication so as to admit of the fuller discussion of general agricultural topics.

During the agricultural season of 1865, the Secretary of the Board applied to many of the leading farmers and officers of societies in the various counties of the Province, for returns of the state and progress of the field crops in their respective districts. Much valuable information as to the peculiarities of the season, and the progress of the principal field crops, was thus obtained and made known to the public, from month to month, through the Agricultural Journal and the leading newspapers of the Province, into which the reports were copied. A brief synopsis of these returns has been prepared, and is herewith submitted as a permanent record of the crops of 1865. A reference to that synopsis shows that favorable reports of the WHEAT crop have been received from six counties, unfavorable reports from four, whilst the others give average returns. Early sown wheat suffered most from the so-called weevil during the past season, some fields being a complete failure. OATS are returned as better than average by eight counties, being heavy and fine with much straw; but in three or four counties the crop was light, caused chiefly by rust. BARLEY is very favorably returned as a "good," "average," "excellent," "unusually good," and "splendid" crop, and in one or two counties only was the crop light. The experience of the last few years seems to offer great encouragement to the more extensive culture of barley, inasmuch as the yield of grain is good, and there is no more suitable crop for laying down land to grass; the only drawback is the small amount and poor quality of the straw. RYE is only partially grown in the Province, but has done well, especially winter rye. BUCKWHEAT is favorably spoken of by the six counties that return it as a crop, but its cultivation is chiefly confined to new clearings. HAY is returned as an average crop by three counties, as above average by eleven counties, and as rather under average by only one county. Hay was not only a large crop throughout the Province, but was everywhere secured in excellent condition, except in the Cape Breton counties. It is to be observed, however, that the "after-grass," in consequence of severe drought, was very poor, and many

farmers had to put their cattle upon hay very early in the fall. In this way more hay will have been used upon the farms than usual, especially as stock generally was not in very high condition at the opening of winter. Root Crops in general suffered more or less from drought, except in rich, well managed lands; but the season was peculiarly suitable for POTATOES, which are returned as an average or good crop by seven counties, and as under average or poor by the same number of counties (seven). This may be taken as indicating the proportion of counties in which potatoes may be profitably grown in favorable seasons. When our farmers adopt a system of thorough drainage, the proportion of counties suited to potato culture will be largely increased. TURNIPS are favorably reported from six counties, and unfavorably from six, the crop being in some cases a total loss. It is feared that the rich soil and ample supplies of phosphatic manures required by this crop are not sufficiently understood. CARROTS, CABBAGES, BEETS, and MANGEL WURZEL are reported rather more favorably than turnips; all require very high cultivation. The crop of APPLES was small, except in the case of individual orchards of young and robust trees.

The calamity to which the potato growers of this as of other countries have been exposed for many years must necessarily claim some attention from every Agricultural Board. In last year's report it was stated that a correspondence with parties in New York State had led the Board to make an importation of several new varieties of potato raised by the late Rev. C. E. Goodrich, and which had been selected from 15,000 seedlings after an elaborate series of experiments extending over the last sixteen years of Mr. Goodrich's life. The seedlings imported were divided into small samples and distributed to various parts of the Province to parties who were requested to experiment with them. Reports of a very satisfactory kind have been received and published at length in the Agricultural Journal. The principal results of the experiments will be found in a tabulated return appended to this report.

The Board likewise distributed a number of samples of field grains that had been grown by the Rev. Dr. Forrester from seeds received at the London Exhibition. The recipients were requested to experiment with them, and report the results; but very few reports have been received. It is feared the samples were too small to induce much care, for farmers in all countries dislike small garden experiments. It may not be amiss to remind them that some of the finest grains now in cultivation in Europe and America have been raised from single ears, and in some cases single grains. Of a sample of wheat sent to H. Davenport, Esq., Sydney, for experiment, he reported that it "turned out a very fine sample, free from every disease, and will, I think, prove valuable." The Canadian peas were prolific, but much injured by insects; the tender pod peas a decided improvement upon the old stock. The Italian barley sent to H. A. N. Kaulback, Esq., M. P. P., Lunenburg, yielded over fiftyfold; it showed much vigour and thickness of stalk, is a six-rowed kind, and averaged about 44 lb. per bushel.

Whilst the improvement of live stock has steadily engaged the attention of the Board during the past year, they are not insensible to the great importance of improved methods of cultivation. Much of our richest land is lying in a comparatively barren state, from want of draining, and the Board have been considering in what way an impetus could be given to thorough drainage in the Province. Many farms, originally fertile, have become barren from a spoliation system of carrying off crops year after year without returning manure to the soil. In these cases probably the most effective application will be found to be some rich form of phosphatic manure, such as bone or fish manure, or superphosphate of lime, for the phosphates seem to be sparing in quantity in our soils. As our farmers have at present great difficulty in obtaining bone dust, although many hundreds of tons of the raw material annually go to waste even in the city of Halifax, alone, the Board have determined to offer a bonus of \$600 to any party who will carry into effective operation in a suitable locality a Bone Mill of sufficient size to supply the wants of our farmers.

The growing importance of flax as a British American crop, has induced the Board to import ten bushels of the best Riga flax seed, which is well known to be greatly superior to the common flax grown from year to year in the country.

Should the results prove satisfactory, a greater importation may be made next season.

It must be gratifying to every well-wisher of the Province to observe that so much genuine interest is being evinced at the present time in agricultural improvement. We have been hitherto dependent upon foreign countries for the supply of a large portion of the common food of our people, and under any circumstances such dependence is not desirable. Without an abundance of the necessaries of life, at reasonable rates, for our laboring population, neither fisheries, arts nor manufactures can permanently prosper. Agriculture is naturally looked upon in every country as the basis of all national wealth, and it is fortunate for the Province that Nova Scotians are day by day realizing more and more fully the opprobrium that attaches to a country that has extensive tracts of waste lands, and yet fails to afford a sufficient supply of food to its people. It is true, indeed, that the great fishing, shipping and mining interests have brought upon our people an embarrassment of riches, and have tended to withdraw both capital and labor from our farms. But the great success that has attended these branches of industry has created profitable markets for farm produce, and given an impetus to agricultural progress that is likely to be productive of the best results. Let us not blame the soil, because we neglect to cultivate it. So surely as the energies of our people are applied to the cultivation of the soil, so surely will a carpet of luxuriant verdure spread over our hillsides, and our deserts blossom as the rose.

ALEX. MACFARLANE, President.

GEORGE LAWSON, Secretary.

Hon. CHARLES TUPPER, M. D., Provincial Secretary.

General Abstract of Accounts, Board of Agriculture, for year 1865-66.

Cr.

By balance from previous year,	\$1426 96
Legislative grants for 1865, viz. :	
For importation of stock,	10,000 00
For agricultural societies,	4000 00
For general purposes, Board of Agriculture,	2000 00
	<u>\$17426 96</u>
Balance brought down,	\$5183 38

DR.

I.—STOCK IMPORTATIONS.

Cost of horses and sheep imported from England, freight and expenses,	\$6540 55
Cost of bulls, heifer and sheep, imported from Canada, freight, &c., ..	1401 10
Expense of keep of horses, wages of groom, harness, &c., up to March, 1866,	1572 51
	<u>\$9514 16</u>
Total expenditure on account of stock,	\$9514 16
Deduct proceeds of sheep sales,	1233 46
	<u>\$8280 70</u>

II.—AGRICULTURAL SOCIETIES.

Amount actually drawn by county and district societies during the year,	\$2922 00
Special grant to Kings county Exhibition,	50 00
	<u>\$2972 00</u>

III.—GENERAL EXPENSES OF BOARD.

Secretary's salary,	\$425 00
Travelling expenses of members attending meetings,	223 83
Seedling potatoes, imported,	38 60
Publication of Agricultural Journal,	\$385 60
Less subscriptions received,	147 00
	<u>238 60</u>
Miscellaneous,	64 85
	<u>\$990 88</u>
Balance in Treasurer's hands,	5183 38
	<u>\$17426 96</u>

List of County and District Societies organized under the Board of Agriculture, in terms of chapter Revised Statutes, "Of the encouragement of Agriculture," with the names of their principal Officers, number of members, amounts of subscriptions raised during the year, (as certified under oath), and sums allowed to each Society and each County, from the Provincial grant to Societies, 1865.

* Return not made in time to entitle to grant in 1865.

Synopsis of Returns received from the various Counties of the Province as

	Annapolis.	Antigonish.	C. Breton.	Colchester.	Cumber-land.	Digby.	Guysboro'.	Halifax.
WHEAT,.....		(26) Early sown a failure; late sown better.	(8) Good, but sparingly sown (25) A good crop.	(10) Failure. (10) Has suffered as usual.	(11) Did well. (17) Average yield.	(30) Grains generally poor.	(12) Better than for many y'rs.	(1) About a failure. (18) About an average over the county.
OATS,.....	(7) 3,110 bush. on 180 acres.		(8) Av'ge., much straw (9) Full average. (24) Heavy in ear.	(10) Half a crop. (10) Light.	(11) Fine crops. (17) Hardly average		(12) Well above average.	(1) Good, light.
BARLEY,.....	(7) 1,060 bush. on 43 acres.		(8) Full average. (25) Splendid crop.	(10) Good.	(17) Not much was raised; about as usual.		(12) Average.	(1) Rather light.
BUCKWHEAT,.....	(7) 280 bush. on 10 acres.		(8) Excellent.	(10) Light. (10) Good, not much sown.	(11) Succeeded well. (17) Above average.		(12) Average.	(1) Very good.
HAY,.....	(20) A full average crop. (31) Abundant.	(26) Average crop.	(8) Good, but heated (24) Harvest late, much got in damaged.	(10) Average. (10) Better crop than even last year.	(11) Very good. (17) Above average.	(30) An abundance of hay.	(12) Far above average.	(1) Very abundant. (18) Above average and well secured.
TURNIPS,.....	(7) 3,000 bush. on 10 acres.		(8) Fair crop. (9) Barley average.	(10) A failure.	(11) Fair crop.		(12) Favorable.	(1) Very light. (15) Suffered from drought.
POTATOES,.....	(7) 7,700 bush. on 70 acres. (20) favorable.	(26) favorable; little or no blight.	(8) Very poor; half a crop. (9) A third of a crop.	(10) Half a crop.	(11) Very light. (17) Less than average, and small.		(12) Fair.	(18) A poor crop generally.
CARROTS,.....				(10) A failure.	(11) Good.		(12) Favorable.	
PEAS,.....					(11) Fall sown ripened early and well.			
RYE,.....	(7) 375 bush. on 30 acres.							
INDIAN CORN,.....	(7) 270 bush. on 14 acres.			(10) Good.				(18) The season was well adapted for this crop.
BEANS, (Kidney).....	(7) 58 bush on 4 acres.							
CABBAGES,.....			(8) A good crop.		(11) Some failures.			(18) Under average.
APPLES,.....	(20) A light crop, except Nonpareil.				(11) Crop one-third as good as in 1864.	(12) Orchards neglected.		(18) Crop small and much of it unsound.
BEETS AND MANGEL WURZEL,.....					(11) Succeeded well.	(12) Favorable.		(18) Heavy crops where well manured.

NOTE.—The numbers refer to the persons in the different Counties who have made the Returns, and of whose names a list, with corresponding numbers, follows

to the produce of the principal Field Crops during the season of 1865.

Hants.	Inverness.	Kings.	Lunenburg	Pictou.	Queens.	Richmond.	Shelburne.	Victoria.	Yarmouth.
(29) Very little sown.	(15) Not successful.	(13) Very far below an average (14) Much injured.	(10) Increase in quantity sown; return better than in former years. (2) Above average.	(3) 50 p. c. un. average (28) straw short. (21) Late sown—a good crop. (8) 50 p. c. un. average (21) Average.				(6) Little sown. [4] Good return. [5] Abandoned.	
(29) Better than common.	(15) More than average and good.	(18) Light crop. (14) Below average, straw short	(2) Above average.	(8) Fall average.				(6) Rusted. [4] Good average. [5] Far above average.	[22] A fair crop.
(29) Unusually good.	(15) A splendid crop, yield nine returns of excellent quality.	(18) Good. (14) Small crop.	(2) Above average.	(8) Fall average.				(6) Fair average. [4] Good average. (6) One-third over average.	
(29) Fair average.	(15) More than average. (28) Average and much better than last year. (15) Nearly a total loss.	(13 and 14) Below average, but of excellent quality. (14) Short. (18) Light yield and indifferent quality.	(2) Above average. (15) 25 per cent above last year.	(8) Near average. (21) At least an average.				(6) Average. [4] Above average. [5] Two-thirds over last year.	[22] Nearly double an average, and well secured.
		(15) Nearly a total loss. (18) Light yield and indifferent quality.		(8) Suffered.			[27] Favorable.	(6) Failure	[22] Favorable.
	(15) Crop not half as large as last year.	(14) Crop good, not heavy. (18) Average crop, secured, free from disease. (14) Short.	(2) Above average.	(3) Near average, no blight.			[27] Average yield.	(6) Much less than average. [4] Yield small. [5] Yield six-fold.	[22] Very light.
		(18) hardly average, winter rye best. (18) More than average. (14) Good.		[3] Suffered.			[27] Middling.	(6) Have done well.	
				[3] Fall average.			[27] Very good.		
							[27] Very good.		
	(15) Crop favorable and of excellent quality.	(14) Very light.	(16) Light crop.						[22] About a failure.
							[27] Middling.		

made the Returns, and of whose names a list, with corresponding numbers, follows

1. John Parker and James Kent, Musquodoboit Agricultural Society.
2. George Duncan, Mahone Bay Agricultural Society.
3. David Matheson and J. McDonald, Pictou Agricultural Society.
4. John Robertson and John Morrison, St. Ann's Agricultural Society.
5. John McLennan, Middle River Agricultural Society.
6. Robert H. Jones, Baddeck Agricultural Society.
7. G. V. Ince, E. Annapolis Agricultural Society.
8. T. S. Bowen and A. G. Musgrave, N. Sydney Agricultural Society.
9. M. McDonald, Boularderie Agricultural Society.
10. James Campbell and D. F. Layton, Upper Londonderry Agricultural Society.
11. T. D. Dickson and J. T. Smith, Parrsborough Agricultural Society.
12. S. Archibald and John A. Kirk, Glenelg Agricultural Society.
13. Dr. C. C. Hamilton, M. P. P., Cornwallis Agricultural Society.
14. George Hamilton, King's County Agricultural Society, Lower Horton.
15. J. Munro, North East Margaree Agricultural Society.
16. H. A. N. Kaulback, M. P. P., Lunenburg.
17. W. F. Cutten, Amherst Agricultural Society.
18. Dr. Lawson, Halifax.
19. F. R. Parker, M. P. P., Shubenacadie.
20. James E. Fellows, Bridgetown, Annapolis.
21. James W. Patton, Maxwelton.

31. Avard Longley, M. P. P., Annapolis.

APPENDIX No. 40.

POORS' ASYLUM.

*Provincial Secretary's Office,
Halifax, 5th March, 1866.*

SIR,—

I am directed by His Excellency the Lieutenant Governor to forward for the information of the Commissioners of the Poors' Asylum, the enclosed copy of an extract of the report of the Committee of the House of Assembly upon Humane Institutions, and to draw the attention of the Commissioners to the great necessity which exists for the organization of proper measures for the treatment of pauperism and disease in this City, which it is believed may be accomplished by a more judicious application of the appropriations made by the Province and the City for those purposes.

The Province owns the valuable property in the heart of the City, where the Asylum for the poor and the old county jail now stand; but the locality and buildings are quite unsuited and insufficient for the necessary accommodation of the inmates of that Institution. The City owns a large Hospital on the South Common with ample space for the erection of a suitable Asylum adjoining, and a large sum is annually expended by both the Province and the City to provide for the poor and the destitute sick, yet without either of these objects being accomplished in a manner creditable to the Provincial and Civil Governments. Under these circumstances, I am directed further to say that the Executive Government are of the opinion that by the sale of the property now occupied by the Commissioners and the erection of a Poors' Asylum adjacent to the City Hospital and by placing both these institutions under the management of one Board of Commissioners, half of whom shall be appointed by the Provincial Government and the other half by the City Council; the important objects above stated may be more efficiently accomplished than under the system hitherto pursued, and His Excellency will be glad to learn that by consultation between the City Council and the Commissioners of the Asylum for the poor, a common scheme may be devised which will place the treatment of pauperism and disease upon a more satisfactory footing than heretofore.

I have the honor to be,

Gentlemen,

Your obedient Servant,

CHARLES TUPPER.

His Worship, the Mayor.

[A similar letter to the above, was sent to P. C. Hill, Esq., Chairman of Commissioners, Poors' Asylum.]

Extract from Report of the Committee on Humane Institutions, 1865.

POORS' ASYLUM.

This institution appears to be as well managed as the extent of the present premises will allow. The large number of inmates render it almost impossible to

avoid excessive and injurious crowding. The present manager, Mr. Shields, deserves great credit for the cleanliness and good order apparent in the institution.

The committee regret exceedingly that a difficulty has arisen between the City Council and the Commissioners, which will probably prevent the proposition made last year from being carried out.

The Government should, in the opinion of the committee, interfere at once in the affairs of this institution, and if no means can be devised for increased accommodation require the city of Halifax to remove the poor chargeable upon the city from the institution, and make the asylum a charge upon the Provincial Treasury.

Halifax, 10th March, 1866.

Sir,—

I have the honor to acknowledge the receipt of your letter of the 5th inst., with the extract from the report of the committee of the House of Assembly which accompanied it.

Your communication has received from the Commissioners of the Poor the most careful consideration, and I am directed by them to convey to you the views entertained by them in reference to its subject matter.

The Commissioners are strongly impressed with a sense of the responsibility devolving on them in connection with the maintenance of the large body of indigent persons now under their care, which they believe to be sufficient to occupy the attention of any one board of management.

The duties of managing an hospital involve equally grave responsibilities and attention, though of an entirely distinct character, and the Commissioners of Poor are convinced that both duties would be discharged with greater advantage to the poor, and to those suffering from disease respectively, by separate and distinct boards. The charge of a hospital would seem to be peculiarly the province of the civic authorities, while the care of transient paupers appears to fall on the Provincial Government as at present. The Commissioners are sensible that the present buildings do not afford sufficient accommodation for the number of inmates (exceeding in the winter season 400 persons); but they believe that the site is eligible in many respects, and that at a comparatively small expense, not perhaps exceeding five thousand pounds (£5000), additional accommodation could be provided sufficient to meet all the public requirements for many years.

If the site of the present asylum is sold, and new buildings erected on the South Common, the Commissioners believe that a sum not less than £15,000 in addition to the proceeds of sale of such site, would be required for the purpose, as the City Hospital is only calculated to receive about sixty patients, and would therefore require a considerable outlay to make it available as a general hospital, while the buildings for the reception of the poor would have to be erected entirely new on a large and therefore expensive scale.

The Commissioners would therefore respectfully suggest that the two institutions should remain distinct and separate; that the hospital should be opened for the reception of patients under the control of the civic authorities, in such mode as the Executive Government may deem best; and that such sum be placed at the disposal of the Commissioners of Poor for the erection of additional buildings on the present site as the Government may deem necessary for that object.

I have, &c.,

P. CARTERET HILL, Chairman.

The Hon. CHARLES TUPPER, Provincial Secretary.

*Mayor's Office, Halifax, N. S.,
10th March, 1866.*

SIR,—

I have the honor to acknowledge receipt of your letter of the 5th inst., addressed to me, and desiring the attention of the City Council to the necessity which exists in this city for increased accommodation for the poor, and an extension of the benefits of hospital treatment of disease.

I have laid this communication before the City Council, and have pleasure in being able to state for your information that the plan indicated by you for the future management of the Hospital and Poor's Asylum, by a joint Board composed of members of the City Council and Commissioners appointed by the Government, appeared to commend itself to the judgment of the Council.

I enclose a copy of a resolution passed by the City Council yesterday, and am authorized to inform you that the Sanitary Committee of the City Council will hold themselves in readiness to meet and confer with the Commissioners of the Poor's Asylum at such time and place as the Executive Council may arrange.

I have, &c.,

M. H. RICHEY, Mayor.

The Honorable the Provincial Secretary.

Extract from Minute of City Council, March 10th, 1866.

Resolved, That a committee be appointed to receive any offer of arrangement which may be made by the Commissioners of the Poor, touching the properties named in the Provincial Secretary's communication of the 5th inst., and report the same to this Council.

Passed.

A true extract.

THOMAS RHIND,
Assistant City Clerk.

*Provincial Secretary's Office,
Halifax, Nova Scotia, 12th March, 1866.*

Sir,—

I am directed to acknowledge the receipt of your letter of the 10th inst., and to express the regret with which his Excellency learns that the suggestions made for the treatment of pauperism and disease in this city, do not commend themselves to the approval of the Board of Commissioners of the Poor; and I am further directed to enclose the within letter received from his Worship the Mayor upon the same subject, together with a copy of a report of the City Medical Officer in 1862, and the observations of the Medical Society thereon, and to express the hope that you will confer with the Sanitary Committee of the City Council, as suggested by that body, in order to ascertain if some common conclusion may not be arrived at upon this important subject.

I have, &c.,

(Signed) CHARLES TUPPER.

P. C. HILL, Esquire,
Chairman of the Commissioners of the Poor's Asylum.

REPORT OF CITY MEDICAL OFFICER.

Halifax, Nov. 1st, 1862.

Sir,—

I have the honor to submit the following report for the information of the Board of Health.

Upon receiving my appointment as City Medical Officer, in February last, I found two convalescent patients in Moran's house, then used as a fever hospital, both of whom were subsequently discharged cured; and another invalid, sent in by your order, was sent convalescent to the Poor's Asylum, on the 3d of April, when that house was returned to the proprietor.

Early in May, Doyle's house in North street was rented as a fever hospital, and Mrs. James was appointed matron. Up to this period, thirty-one patients have been treated in that hospital, seven of whom died, four are now convalescent, and twenty have been discharged cured.

During the early part of the season the town was very healthy, but in August and September a large number of fever cases presented themselves, attributable, I think, to the deficient supply of water, and extensive opening of drains consequent upon the alteration in the Water Works and the noxious effluvia emanating from the slaughter houses, in the vicinity of which fever was especially prevalent.

The general principles of Hygiene are now so well understood, that it will not be necessary for me to make any extended observations upon the importance of cleanliness, abundance of pure water and a thorough system of sewerage, to the public health. When the improvements now going forward in the water works are completed, and a copious supply introduced into every tenement—when that element is used for thoroughly and frequently flushing drains carried through every portion of the city,—when the slaughter houses are removed to such a distance as to prevent the air breathed by the inhabitants from being poisoned by the decaying animal matter connected with these hot beds of malaria, and when the occupation of any dwelling unprovided with the requisite out-building is rigidly prohibited, we may confidently anticipate a great improvement in the health of the city, and a corresponding diminution in the mortality rate in proportion to the population.

I cannot consistently, with what I consider to be my duty to the Board, close this report without making some suggestions which have forced themselves upon my mind in connection with the public health. The humane and enlightened treatment of poverty and disease is regarded as a matter of the highest importance in all well regulated communities. I do not think the treatment of either can be considered satisfactory in this city until a well-appointed Hospital is put in operation. At present the Asylum for the Poor is crowded indiscriminately with those who simply require food and clothing, and those who are suffering from the various forms of disease. A large portion of the three hundred inmates of that establishment are undoubtedly subjects for Hospital treatment, and their removal to a purely medical institution, could not but be attended with highly beneficial results to themselves and to those left behind, whose only misfortunes are their poverty and helplessness. The treatment of contagious diseases under the present system is still more unsatisfactory. During the past summer no less than ten persons, including the Matron and principal Nurse, were lying at one time, in all stages of Fever, in a small, imperfectly ventilated building. The Fever had assumed a highly contagious character, rendering it difficult to obtain suitable nurses. It is impossible that disease can be treated with success or satisfaction under such circumstances. Nor is there any reason why such a state of things should continue. A large Hospital has been erected in a suitable locality. The patients requiring its accommodation are abundant. Medical men, well qualified to discharge the professional duties, can be obtained without difficulty; and the money required to sustain such an institution is now being expended without producing satisfactory results. Two thousand pounds are annually voted by the Legislature to the Poor's Asylum; about fifteen hundred pounds more are provided from the civic funds, in addition to a large sum annually expended in the treatment of contagious diseases; and two salaried medical officers are employed, one for the Poor's asylum, the other for the fever hospital.

Now, I would respectfully submit the propriety of separating the diseased from those suffering from poverty only, and the removal of the former to the brick hospital, one section of which could be devoted to non-contagious and the other to contagious diseases—a plan, with proper care, unattended with any difficulty or danger. The government of the hospital could be vested in the same Board of Commissioners now appointed for the Poor's Asylum, who would then have both institutions under their management. A well qualified apothecary could be appointed as resident steward, whose duty it would be to carry out the instructions of the Commissioners and physicians. Four medical men could be elected annually by the City Council or Board of Health, whose duty it would be to attend three months each in rotation, and to consult with each other in all cases of difficulty or danger, and no capital operation should be performed without the concurrence of a second physician, except in an emergency which admitted of no delay. The regular visit to the hospital should be made say at noon each day, when all the medical men in the city and their students should be permitted to be present and witness the mode of treatment. I have reason to believe that in this way, the services of the ablest medical practitioners in the city may be obtained gratuitously. The salary now paid to the City Medical Officer would thus be saved. Although the efforts to obtain Legislative enactment in support of the hospital as regards seamen were ineffectual last session, I cannot but think a different result may be anticipated so soon as this subject is thoroughly understood. I am well aware that these crude suggestions will be found susceptible of much improvement; but I will be abundantly satisfied if they lead to the adaption of some efficient scheme for the proper management of a subject so deeply affecting the public health, and so deserving of the attentive consideration of all who are charged with the responsible duties which pertain to everything connected therewith.

All of which is respectfully submitted,

By your obedient servant,

C. TUPPER, M. D.,
City Medical Officer.

To his Worship the Mayor,
Chairman of the Board of Health.

At a Meeting of the Medical Society, held on the 24th January, 1863 :

The committee appointed to consider the City Medical Officer's report, beg leave to report as follows :

As the City Medical Officer well remarks in his report, "The humane and enlightened treatment of poverty and disease is regarded as a matter of the highest importance in all well regulated communities, I do not think the treatment of either can be considered satisfactory in this city until a well appointed hospital is put in operation."

He has shown that the treatment of contagious diseases under his care has been very unsatisfactory, and the mortality consequently large owing to the small size and imperfect ventilation of the building at present occupied for that purpose. The Poor's Asylum, at present the only establishment in the city into which cases requiring hospital treatment can be admitted, was never intended to be used as an hospital, and is totally unfitted for such a purpose owing to its being over crowded by those admitted suffering from poverty.

Taking the four rooms in the asylum principally used for the reception and treatment of medical and surgical cases, viz., Leonard's room, Black Hospital, the Nursery, and Virgin's hall, we find that the number of cubic feet of air for each inmate is as follows: Leonard's room, 388; Black Hospital, 310; Nursery, 240;

and the Virgin's Hall (although we have no exact measurement) cannot be more than 200. Old established hospitals in Europe give on an average 1000 cubic feet of space for each patient; and at present all hospital physicians are agreed that each patient should have not less than 1250 cubic feet of space, to allow him the best chance of recovery, all new hospitals in Europe and America being built on this scale.

The average number of admissions into the Poor's Asylum yearly for the last six years is 912. The average number of inmates during the year 1861 was 323, and the average amount of mortality for the last six years is 82. This gives an average mortality for the last six years of nine per cent. on all admissions.

We have thus shown that the unfitness of the Poor's Asylum for the reception of hospital cases is borne out by facts.

We are of opinion that the average mortality for the last six years for the whole number of inmates, has been largely influenced by cases admitted for medical and surgical treatment, and consequently the mortality among these has been excessive, which is mainly to be attributed to the overcrowded and ill-ventilated state of the building.

The hospital should be general in its object; that is, open for the reception and treatment of all diseases to which communities are liable. Pauper cases requiring medical or surgical treatment, should be immediately transferred to the hospital.

One section could be devoted to the treatment of contagious diseases.

Medical men are willing at present to give their services gratuitously.

In our opinion, four medical men should always be in attendance, each to be elected for one year, except two of the first four, who shall retire in six months, and two more elected to fill their places.

Thus two medical officers, well acquainted with the working of the institution, will always be in office on the appointment of the two new ones, who will be elected every six months, the two senior offices retiring. There will also be required a qualified person to reside in the building and act as house surgeon and steward.

We also beg leave to submit a few hints regarding the ways and means by which the hospital can be supported.

Under the arrangements suggested in this report, the office of City Medical Officer could be abolished, and his salary, with the expenses attendant on the present hospital for contagious diseases, transferred to the general hospital fund.

As regards the Poor's Asylum we do not think that the office of surgeon to that institution could be abolished, as the attendance of a medical man will always be necessary among so many pauper inmates.

One or more wards in the hospital could be set apart for paying patients, from which a considerable sum would be raised.

In the large cities of other countries, collections are taken in all the churches and chapels twice a year, and thus a considerable sum is obtained for the support of their hospitals.

This method could be adopted in this Province without any difficulty. Annual subscribers could also be obtained, having the privilege of sending one or more patients into the hospital according to the amount subscribed.

Application to the different societies would no doubt induce them to support a number of beds for cases coming under the notice of their charitable committees.

A grant ought, if possible, to be obtained from the Legislature for the support of cases coming from the different counties, or each county be held liable for all cases coming from it as under the existing arrangements for paupers.

As is done in all other seaport towns possessing hospitals, a tax should be levied for the maintenance of sick sailors on all shipping entering this port, according to tonnage or number of crew.

These different ways and means, many of which were suggested in a former report from the Medical Society to the City Council, together with the amount to be granted by the city for the support of its own pauper cases, will, we think, be amply sufficient to meet all the expenses to be incurred in the working of the hospital.

We do not think it necessary to enter into particulars regarding the internal

administration, such as the duties of officers, nurses, &c., diet tables, bye-laws, for the regulation of the house, &c., as information on these points can but obtained by application to the hospitals in Great Britain or America for copies of their regulations, and such alterations be made as the circumstances of the hospital may demand.

All of which is respectfully submitted.

A. FORREST, Chairman.
 R. J. BLACK, M. D.
 D. McN. PARKER, M. D.
 ED. JENNINGS, M. D.
 C. J. GOSSIP, M. D.
 A. J. COWIE, M. D., Secretary.

*Office of Commissioners of Poor,
 March 16th, 1866.*

SIR,—

I have the honor to acknowledge the receipt of your letter of the 12th inst, with the enclosures which accompanied it.

Immediately on its receipt I directed a special meeting of the Commissioners to be summoned, and I am now directed to inform you that in conformity with the wish expressed by you, the Commissioners have appointed a committee consisting of the chairman and Messrs. Uniacke, Power, Twining, and Mitchell, to confer with the committee appointed by the City Council, on the subject referred to in your communications.

I am further directed by the Commissioners to express the hope that at any conferences which may take place, the Executive Government will be represented, as the Commissioners believe that by so doing the object proposed will be greatly facilitated.

The committee hold themselves in readiness to meet at any time and place which the Government may see fit to appoint.

I have, &c.,

P. CARTERET HILL, Chairman.

The Hon. CHARLES TUPPER, Provincial Secretary.

*Mayor's Office, Halifax, N. S.,
 24th March, 1866.*

Sir,—

I have the honor to inform you that in accordance with the request of the Provincial Government, a committee from the Commissioners of the Poor's Asylum were invited to meet a committee of the City Council to consider the terms of an arrangement for uniting the management of the Poor's Asylum and the City Hospital. The meeting accordingly took place yesterday, but no definite action was taken, and the gentlemen separated with the understanding that each body would be represented before the committee of the House of Assembly upon Humane Institutions, whenever their attendance and the expression of their views should be desired.

I have, &c.,

M. H. RICHEY, Mayor.

The Hon. the Provincial Secretary.

Aggregate list of articles purchased for the use of the Halifax Asylum for the Poor during the year One thousand eight hundred and sixty-five, with the balance due the Bank of Nova Scotia on the 1st January.

1865.

APPENDIX No. 42.

INDIAN AFFAIRS.

Crown Land Office, 2nd March, 1866.

SIR,—

I have the honor to submit, for the information of the Government, the following report of my proceedings as Indian Commissioner for the last year.

The expenditure of the grant for the supply of clothing to the Indians throughout the Province has been conducted with as much care and impartiality as their unsettled and wandering habits would permit, and I have responded as far as I had the means in my power to the various applications for additional relief during the very severe weather of the past winter. The abstracts herewith exhibit the localities to which supplies have been forwarded, and the pecuniary relief which occasionally became necessary from accidental causes.

I failed in my usual application for military coats, which hitherto have afforded a cheap description of cloathing. The Commissariat had none at their disposal, but I was enabled to increase the number of blankets by purchasing a quantity accidently introduced into the market, at a cheap rate; and which, from information received, have proved acceptable, affording a larger number for distribution than usual.

In order to ascertain more correctly the numbers and places of resort during the winter, of the various families throughout the Province, I addressed a circular to each of my Deputy Surveyors bearing upon this enquiry. From several of them I have obtained satisfactory answers, but I am not in a position at present to give a full report of the numbers, accompanied with other information I desire should be made known; but I trust ere long to be able to do so. It is my wish, if possible, to select the most central positions, and in future to make a simultaneous distribution of clothing in each county, so as to avoid the impositions sometimes practised, by obtaining a supply in more than one place.

Complaints are occasionally made of the Indians selling their blankets and thus leaving their families to suffer, but I trust the practice is not very common. In the United States it is customary to have the blankets which are distributed distinguished by a particular mark in the manufacture, and I think it would be advisable to adopt the same course, and by an act impose a penalty upon any white inhabitant who should be found unlawfully in possession of a blanket thus marked.

I regret to notice that the purchasers of Indian lands under the sanction of the Legislature, are very backward in their payments, and that the Indian fund in the Treasury has not much increased since the last year. I have prepared, and am about to forward to the respective purchasers, a printed circular, requiring payment of the balances due, and after the indulgence which has been granted I think payments should be enforced, in order that there may be at the disposal of the Government the means of aiding such as are disposed to occupy and improve the lands which are surveyed and set apart for their use.

The disposition to settle and cultivate the soil is not very general: they prefer wandering about and seeking a precarious livelihood from other occupations, and occasionally cause considerable trouble by selling the wood off the Indian reserves, thus lessening their value, without producing any permanent advantage to themselves. Instructions have been given to the surveyors to check this practice; but either through ignorance or a determination to encourage what is

illegal, there are too many to countenance the traffic. I have also instructed the surveyors to exercise the same vigilance in protecting the Indian reserves from trespassers, as they are required to do by law in the case of Crown lands.

During the year I have had several surveys made of the reserves, so as to define accurately their lines and bounds, and leave no excuse for those complained of as trespassers. This step, I believe, has had a beneficial effect.

I was in hopes to have reported favorably of the division of lands at Escasoni, C. B., and the settlement of some families who expressed a desire to have their lots set apart by actual survey. With this object, the surveyor, accompanied by Mr. Justice Dodd, who has always manifested a lively interest in the welfare of the Cape Breton Indians, proceeded to the settlement. Their efforts, however, were fruitless owing to the extreme violence of some of the men, who had possessed themselves of detached spots, and resisted every attempt to apportion them in such way as would exhibit something like uniformity on the place. In this settlement there appears to be a greater attachment to farming pursuits than in most other localities. They possess stock, are comparatively industrious, and make a comfortable living. There is therefore the greater necessity for perfecting their titles, which would give them more encouragement to persevere. I hope in the course of the season to allay the feeling and accomplish a most desirable object, for the sake of the example it would afford to others.

A number of Indians in Queens County have also expressed a desire to have their lots defined by surveys. I have written the surveyor on the subject, and directed him to ascertain their names and the different localities they have selected, preparatory to issuing the usual orders of survey. I think it would be advisable to sell a portion of these lands and invest the proceeds; but I am restricted by a report of the Committee of last session, and I have not ventured to offer any for sale.

I would respectfully recommend a further grant of two hundred dollars to be at the disposal of the Government as the means of occasional pecuniary relief in cases of accident, extreme sickness, or otherwise, as may seem expedient, the terms of the present grant being limited to the supply of clothing, a small fund for these objects I consider indispensable.

In conclusion I have to remark that there has been every effort used on my part to second the efforts of the Government to advance the interest and welfare of the Indians in every portion of the Province, and to elevate their condition; and although success has not been commensurate with the efforts used, there is some evidence of a disposition to abandon their wandering habits and to take to the more quiet and remunerative occupation of cultivating the soil, and it is to be hoped that the example and success of a few of the tribe, aided by the advice and encouragement of men of influence around them, will tend to encourage the growing spirit.

I have the honor to be,

Sir,

Your obedient servant,

SAMUEL P. FAIRBANKS,

Indian Commissioner.

APPENDIX No. 43.

PRISON DISCIPLINE.

(Circular.—Nova Scotia.)

Downing Street, 17th January, 1865.

SIR,—

I enclose for your information and that of your advisers, should they feel disposed to make themselves acquainted with its contents, a copy of a circular despatch which I have addressed to the Governors of Colonies in which the Government is not responsible to the Local Legislature. You will perceive that the object of the despatch is to obtain, in the form of answers to a series of interrogatories, an exposition of the state of the Colonial Prisons in respect of their construction, discipline and management, with a view to ascertain how far they are in conformity with approved models in this country, and what reforms may be required in them.

The system of Government established in the colony under your Government relieves me from the responsibility under which I lie in respect of the colonies to which the circular is addressed, but I am not the less desirous to afford the authorities acting under you any assistance which they may desire to receive in applying the experience of this country, and the labors of the eminent men who have made that experience their study, the purpose of effecting any amendments which may be needed in the prisons and systems of prison discipline in use in the colony of Nova Scotia.

I beg you, therefore, to make such use as you may think proper and convenient of the papers which accompany this dispatch, and to report to me any steps you may have taken, and their result.

I have, &c.,

(Signed)

EDWARD CARDWELL.

Lieutenant Governor,
Sir R. G. MACDONNELL, C. B.

(Circular.)

Downing Street, 16th January, 1865.

SIR,—

In the Duke of Newcastle's circular despatches of the 19th of August and 19th of October, 1863, the Governors of her Majesty's colonies were furnished with copies of the report and evidence presented by the Committee of the House of Lords on the state of discipline in gaols, and with copies of the report and evidence presented by the Royal Commission on penal servitude. These documents were brought to the notice of the Governors from the desire felt by her Majesty's Government that the results of the extensive experience obtained in this country on these subjects, and the evidence (so laboriously collected) by which those results had been ascertained and brought to light, might not be altogether lost to the colonies; but that, on the contrary, the colonies might be enabled to

share with this country the benefit to be derived from experiments and operations on the largest scale, conducted with care and vigilantly observed, and from the labors of our most enlightened public men in digesting our experience and drawing conclusions from it.

I am not informed whether, in the colony under your government, these documents have obtained the attention which it was hoped that their importance would command; but her Majesty's Government do not relinquish the desire that the state of the colonial prisons and the system of discipline in operation should be investigated with a view to ascertain how far they are in accordance with principles adopted in this country, or how far they are open to objection and capable of improvement.

In order to the institution of such an inquiry, I transmit to you herewith a series of interrogatories, to which I request that you will furnish me with answers as early as you conveniently can, accompanying them with any remarks by which I may be enabled the better to understand the state of the prisons in your Government, the system of discipline pursued in them, and the means by which it may be practicable to effect improvements.

You will observe it to be stated by the Lords' Committee, as their very "decided opinion," that, "having reference to the course of legislation, now extending over many years, and the agreement in opinion and practice of the highest authorities, the system generally known as the separate system, must now be accepted as the foundation of prison discipline." Those of the interrogatories which have reference to this system will, therefore, demand your especial care and attention; and you will bear in mind that no ordinary difficulties from defects in the construction of a prison, nor indeed any difficulties which are not absolutely insurmountable, should be allowed to stand in the way of the establishment of this system; nor will you fail to perceive on examination of the committee's report and the evidence attached to it, that in this country it has been found possible, by zealous and judicious efforts, to effect the introduction of the system, notwithstanding many defects and insufficiencies of construction and means. Should separation be absolutely impracticable in the prisons as they are, it will be for the consideration of the Legislature whether means cannot be found for affecting the alterations required in them.

The question which is perhaps next in importance, is the penal efficiency of the labor exacted from offenders under sentence of imprisonment with hard labor, and the methods by which that efficiency is ensured; and you will observe that the object of the sentence is inevitably sacrificed when industrial and productive employment is substituted in short terms of imprisonment, or in the earlier stages of long terms, for labor strictly penal; whilst it will be found to be a delusion to suppose that any real economy is to be effected by defeating the object of the sentence. On the contrary, the result of all attempts to economise by industrial employment at the sacrifice of effective punishment, is to show that whilst the labor of the prisoners does not repay the cost of their subsistence and supervision their number is the greater in proportion as the labor is less deterrent, and the community is charged with the cost of more prisoners, whilst at the same time it suffers by the commission of more offences. Thus labor enforced by the tread-wheel or the crank for a minimum term of imprisonment or portion of the sentence, is considered by the Lords' Committee to be essential in the case of every prisoner condemned to imprisonment with hard labor.

In the later stages of a long imprisonment a different regimen may be applied. It is, indeed, by severe suffering in the earlier portion of a sentence, rather than by sufferings prolonged through a series of years, that a deterrent effect is produced; for the class of persons by whom offences are generally committed do not look far forward, and they are governed by what is presently, and not by what is distantly, within their view.

Rigorous penal labor, therefore, which is generally of necessity wholly or more or less unproductive, should be enforced at first; and afterwards, in long sentences, it may be possible to combine industrial employment with some relaxation of penal rigour.

It is probably also in the stages of imprisonment subsequent to those which

are most severely penal, that efforts for the reformation of offenders may be made with the best prospect of success; and you will perceive that the division of the prisoners into classes, and their promotion from one class to another (after the severely penal stage of imprisonment has been undergone, but not before), has been found to be of much use in furthering the efforts made for the reformation of prisoners. But the promotion should proceed upon such evidence of self-control as shall be afforded by actual labor performed where the employment is industrial rather than upon more uncertain indications of improvement in character and disposition. Another advantage derivable from this system of classification and promotion is, that the authorities of the prison will find themselves enabled to maintain discipline with less effort, with less irritation on all sides, and with less recourse to methods which are painful to humane officers, and hardening to those to whom they are not painful.

In the same direction, and with the same view, the system may be resorted to which is commonly known as the ticket of leave system. It would seem, indeed, that in small communities, where supervision after release may be exercised more readily and efficiently, and in colonies where labor is more in demand and subsistence more surely obtainable than in this country, the ticket of leave system might be pursued with fewer difficulties and drawbacks than are found to attend it here. But wherever adopted, it is indispensable that its operation should be duly regulated and guarded, so as not to interfere with the absolute certainty that an adequately deterrent punishment will be inflicted, and that no abridgment of sentence will take place till after this punishment shall have been undergone.

With this view a distinct limit should be fixed to the abridgments of imprisonments to be granted in respect of good conduct and amount of labor performed in prison; and the system should be clearly explained to the courts and judges, so that the sentences passed may be adequately penal and deterrent, notwithstanding any possible remissions under tickets of leave. And when legislation is required to adapt the criminal law to the system, the Local Government, with the assistance of the Law Officers of the Crown, should apply for the assistance of the Legislature.

Having thus pointed to the main features to be kept in view in any efforts to be made for the improvement of prisons, I will only add that I feel assured that the importance of the object to the public welfare will command it to your attention as well as to that of the public officers, magistrates, and others, who may have any means of contributing to its attainment; and as the first step must be to ascertain with completeness and precision the state of things now existing, I request you to obtain as fully and exactly as may be in your power, the information sought by the enclosed series of interrogatories.

I have, &c.,

(Signed) EDWARD CARDWELL.

Lieutenant Governor,

Sir R. G. MACDONNELL, C. B.

APPENDIX No. 44.

SCHOOL LANDS.

To His Excellency Sir William Fenwick Williams, Baronet, K. C. B., Lieutenant Governor in and over Her Majesty's Province, Commander-in-Chief, &c., &c., &c.

The report of the undersigned Commissioners appointed to examine the claim of the Society for the Propagation of the Gospel, in respect to school land in this Province.

MAY IT PLEASE YOUR EXCELLENCY,—

The following report of the committee of the House of Assembly on school lands having been made to the House, at the last session, viz.:

“The committee have had before them several bills relative to the school lands at Onslow, Truro, Horton and Digby, and the memorial of his lordship the Bishop of Nova Scotia relative to school lands in this Province, referred to them by the House, and after a careful and protracted investigation, the committee recommend that a commission be appointed by the Government to examine the claims of the Society for the Propagation of the Gospel in respect to school lands in this Province, and to report to this House;”

And the undersigned having been appointed such Commissioners, and executed the duty thereby devolving upon them, beg leave to report as follows:

They have carefully examined the evidence afforded by the various reports, memorials, and official correspondence, extending over a long period, as well as by the tenor of the various grants themselves, together with such evidence of the facts in the various cases as was adduced before them, in order to ascertain, if possible, the true intention of such grants.

There seems to be no dispute as to the circumstances connected with the first of the series of grants embraced in the question now before the commissioners. It appears that in the year 1749, the Lords Commissioners of Trade and Plantations, addressed a letter to the Society for the Propagation of the Gospel, in which they informed the society that his Majesty having given directions to send out a number of persons to Nova Scotia, a particular spot would be set apart in each township for building a church, and 400 acres in perpetuity free from quit rent to a minister and his successors, and 200 in like manner to a schoolmaster. Their Lordships therefore recommended the society to name a minister and schoolmaster for each of the townships, six in number, referred to, hoping that they would give such encouragement to them as the society might think proper, until their lands could be so far cultivated as to afford a sufficient support.

The society accordingly sent out six clergymen and six schoolmasters, and allotted salaries for their support. Instructions were given to the various Governors of the Province from time to time by the Crown, to set apart lots for school lands in the several townships in the same terms and for the same purposes as those already mentioned; and at one time the Society for the Propagation of the Gospel maintained forty schoolmasters in the Province.

The society maintain that under the language of the letter from the Lords Commissioners of Trade and Plantations, already quoted, the proceeds of the lands set apart whenever they became productive, were to be held for their benefit in return for their large outlay during the long period in which the lands were unproductive.

This claim has been recognised by her Majesty's Government so far that the royal assent was refused by Lord John Russell to an act in 1839, and by Earl Grey in 1850 to an act, both passed by the Legislature with a view to divert the school lands from the exclusive possession and control of the society.

In communicating the decision of Lord John Russell, Mr. Vernon Smith, in a letter addressed to the Bishop of Nova Scotia on the 27th September, 1839, says :

“ Lord John Russell is of opinion that the society, although not possessed of a strictly legal right, have established an equitable claim to that portion of the lands already occupied and improved, and the society will therefore be left in the entire and unreserved possession of them for the purposes to which they are already dedicated.”

“ The necessary consequence of this award of a portion of the lands set apart for educational purposes to the use of the schoolmasters employed by the Society for the Propagation of the Gospel, is, that her Majesty has been advised to disallow the act passed by the Legislature of Nova Scotia, entitled, an act to provide for the selection and appointment of trustees of lands granted, reserved, or otherwise allotted as school lands in this province.”

Lord John Russell thus admits the claim of the society to a portion of the lands ; but, as understood by the society, that claim would embrace all the lands reserved or allotted to them, whether the improvements have been made by their own schoolmaster or by masters however appointed, inasmuch as the society alone bore the expense of maintaining the schools for many years without receiving any return from the lands, on the confident expectation that they would eventually receive them, even if the improvements were not made by themselves, as a partial return by the inhabitants of the respective localities in which the lands were situated, for the benefits received by them from the society's schools.

If the principle enunciated by Lord John Russell is correct, it would seem to involve the admission of this claim, also, as a necessary consequence, and the commissioners have therefore adopted it in deciding on the various cases in detail hereafter. In those cases where the improvements have been effected by the society's immediate agents, no argument would appear to be necessary to establish their claim. These lands appear to be divided into two classes, viz. :

First—Those granted for schools without naming any trustees ; and

Secondly—Those granted for the same purpose to trustees.

The former extend from 1761 to 1775, being before the erection of the Bishopric of Nova Scotia in 1787, after which date all the grants from 1797 to 1813 are conveyed either to the rector and wardens of the several parishes, or to the bishop as one of the trustees.

Of the first class are, Horton, Falmouth, Shorcham (Chester), Annapolis, Granville, Barrington, Liverpool, Cornwallis, Truro, Newport, Chiegnecto, Onslow, Londonderry.

Of the second class are, Digby, Aylesford, Yarmouth, Shelburne, Wilmot, granted to the rector and wardens; Weymouth, to the Bishop, rector and wardens; Guysboro, Antigonish, Pictou, Wallace, Parrsboro, Ratchford Harbor, Preston, Clements, New Germany, Douglas, to the Bishop, Chief Justice and Provincial Secretary, of whom the Bishop alone exists as a corporation.

FIRST CLASS.

HORTON.—Of those included in the first class, the first named is Horton, with regard to which the commissioners have to remark that the claim of the society to these lands is fortified by the following circumstances : In the year 1762 the Administrator of the Government wrote to the Society for the Propagation of the Gospel, asking for the appointment of a schoolmaster with particular reference to this lot of land ; again, in 1828, a new commission (under which the present trustees act) was issued, accompanied by a letter from the Provincial Secretary, Sir R. D. George, which begins thus : “ In the year 1761, at the instance of the Society for the Propagation of the Gospel, certain lands were allotted to his late Majesty in the township of Horton for the support of a schoolmaster in the employment of the society ” ; and the commission itself strictly enjoins the trustees

“to apply the proceeds of said lands for the purpose for which they were intended.” This would appear to settle the question, and the Commissioners consider that the trustees have improved the lands for the benefit of the Society for the Propagation of the Gospel, and that they should hand over the accumulated funds, if any, to the Society's agent.

FALMOUTH.—The grant in this township gives two shares “for the use of the church and school forever,” and a school having been maintained there by the Society, the Commissioners consider that their claim ought to be allowed.

SHOREHAM (CHESTER).—No trace can be found of the school land in this locality.

ANNAPOLIS.—In Annapolis the Society appears to have had successive schoolmasters from 1778 to 1832, but their claim appears to be lost by adverse possession.

GRANVILLE.—In Granville the Society maintained masters from 1779 to 1832. The lands were in possession of the rector and wardens, and were by them sold under the act concerning the Church of England in the Revised Statutes, and the proceeds invested for educational purposes.

BARRINGTON.—In Barrington the Society has not maintained any school, and therefore makes no claim to the lands.

LIVERPOOL.—In Liverpool the grant of 1764 gave “one lot for the first minister of the Church of England and one lot for a schoolmaster,” where the identity or connection of the two objects seems apparent. Part of this land appears to have been lost through squatters; part has been run out, and has been occupied by the present rector on behalf of the Society. As to this part, the Commissioners consider that the claim of the Society should be allowed.

CORNWALLIS.—In Cornwallis the Society have maintained teachers continuously from the year 1778, but the land appears to have been specially assigned to the rector and wardens for the support of common schools. The claim of the Propagation Society, therefore, may be considered untenable. It is understood they do not press it.

TRURO.—In Truro the Society have maintained masters since 1804. The Commissioners consider their claim established.

NEWPORT.—In Newport the township grant gives two shares for the “use of the church and school forever.” It appears that in 1821, in consequence of the appropriation of proceeds to other than Church schools, the late Bishop wrote to the Propagation Society, in consequence of which appeal the Secretary of State directed the Lieut. Governor Sir James Kempt to restore the land to the Society. After some delay the trustees who had been appointed by the inhabitants agreed to resign, and to hand over the money in their hands to the new trustees, upon which the Rev. Dr. Porter and Messrs. D. Wier and A. Shaw were appointed by the Governor. In a letter dated the 28th May, 1827, the Provincial Secretary, Sir Rupert D. George, giving the trustees instructions, speaks of the schools to be supported from these lands as “the Society's schools.” The late Mr. Mumford was a trustee, but the present trustees are not members of the Church of England, and the same state of things prevails as in 1821, when the Lieutenant Governor was directed by the Secretary of State for the Colonies to interpose, and did, with the consent of the trustees appointed by the inhabitants, restore the lands to the Society, and the Commissioners can see no reason why any other rule should prevail now; and they therefore consider the claim of the Society to these lands as good and valid.

CHIEGNECTO.—In Chiegnecto (or Patridge Island), the lands having been long in possession of the corporation of the parish of Parrsboro', have been sold, and the proceeds invested for educational purposes. This sale also was under the provisions of the act concerning the Church of England in the Revised Statutes.

ONSLow.—In Onslow the Society for the Propagation of the Gospel appear to have maintained schoolmasters continuously from 1798 to 1832. In the township grant two shares were given for the “use of a church, a school, and glebe forever,” where the connection between the church and school is apparent. So long ago as 1797 the inhabitants recognized the right of the Propagation Society to these lands by applying to the Bishop of Nova Scotia for the appointment of one Green as schoolmaster of the Society; again in 1808 a similar application was made for the appointment of Thos. DeWolfe, and other similar applications appear to have been made at later dates. The late Bishop of Nova Scotia, in a letter dated in 1841, says: “That all rates, including those for dyking and draining, were paid by the Society’s schoolmasters.”

The Commissioners therefore consider that the claim of the Society to these lands should be regarded as well established and valid.

LONDONDERRY.—The school lands in Londonderry appear to have been occupied by squatters, and not to have been in possession of the Society. This claim may therefore be treated as abandoned. The land was reserved, but no grant appears to have passed.

SECOND CLASS.

DIGBY.—Of the second class, the first named locality is Digby, where teachers appear to have been maintained by the Society continuously from the year 1788. The land has been in possession of the rector and wardens, except a portion of 80 acres, which appears to have been subsequently granted by mistake to another person. The Commissioners therefore consider the claim of the Society as well established and valid, except as to the tract of 80 acres subsequently granted.

AYLESFORD.—In Aylesford teachers have been maintained by the Society from 1792, and the land is in possession of the rector and wardens. The claim of the Society to this land is good.

YARMOUTH.—In Yarmouth the lands have been sold by the rector and wardens to whom they were granted, under the provisions of the act already referred to; and the proceeds invested for educational purposes.

SHELburne.—In Shelburne the Society has maintained teachers from the year 1801; the grant was to the rector and wardens; this claim appears to be well established and good.

WILMOT.—In Wilmot the Society maintained masters from the year 1789 continuously. The proceeds of the land which has been in possession of the rector and wardens have been applied to pay legal expenses incurred in ejecting squatters. The claim of the Society to this land is good, and should be allowed.

GUYSBORO’.—In Guysboro’ the Society have maintained teachers from 1794. The land in the grant, which is said to be of little value, was obtained by the first Bishop of Nova Scotia; this claim should be allowed.

ANTIGONISH.—The school lands were granted in the year 1813 to the Bishop, Chief Justice, and Provincial Secretary, of whom, as before stated, the Bishop alone exists as a corporation. The commissioners have no evidence before them that the society has ever supported schools in this locality, and they are unable to decide how far the claim of the society can be considered good.

PICTOU.—The school land in Pictou, situated on the East River, was granted to the same trustees as the foregoing, and having had no evidence of the Propagation Society maintaining teachers, the commissioners are unable to decide on the validity of the claim.

WALLACE.—The land in Wallace (Remsheg) was included in a grant obtained at the expense of the first Bishop of Nova Scotia, and some portions appear to have been leased by the trustees on behalf of the church. The society’s title appears to have been thus recognised, and acts of ownership exercised; and the society’s claim is considered good.

PARRSBORO.—In Parrsboro, teachers were maintained by the society from the year 1794, and the lands have been sold under the Church of England act in the Revised Statutes by the rector and wardens, and the proceeds invested for educational purposes.

RATCHFORD HARBOR.—The lands at Ratchford Harbor were included in a grant obtained at the expense of the first Bishop of Nova Scotia, the presumption arising from which is, that they were obtained for the benefit of the Church Society, the Society for the Propagation of the Gospel; and in the absence of any evidence to the contrary, the commissioners consider this fact as conclusive, and recommend the society's claim to be allowed.

PRESTON.—The school land at Preston was included in a grant to the Bishop, Chief Justice and Provincial Secretary; but no evidence having been submitted to the commissioners of teachers having been maintained by the Propagation Society, they are unable to decide on the validity of this claim.

CLEMENTS.—In Clements schoolmasters were maintained continuously by the society from the year 1789 to 1832. The lands were in possession of the rector and wardens, and under the Church of England act already referred to have been sold, and the proceeds invested for educational purposes.

NEW GERMANY.—The land in New Germany, which is now in the mission of Mahone Bay, has been divided between it and the old parish of Lunenburg, and sold.

DOUGLAS.—In Douglas the society maintained a school for some time; the land was occupied by the society's master, who erected buildings on it. Their claim is considered by the commissioners as good.

The lands included in the above enumeration comprise all the grants for the support of schools, to which, so far as has been made known to the commissioners, the Society for the Propagation of the Gospel lays claim. They do not appear to be of very great extent or value; and when it is considered that for many years during the infancy of the province the inhabitants were indebted to the society for the only educational advantages possessed by them, it would seem unjust to deprive an association to whom our obligations are so great of that which was held out to them by the Government a century ago, as the inducement for so large an expenditure in the various townships and settlements of the province. The Government of the day invited the society to establish their schools; the society did not make any application to the Government. The schools were maintained until the year 1832, when the society withdrew its support on the ground that the lands ought by that time to have become sufficiently productive to sustain them; and the commissioners, after a careful consideration of the whole case, are led to the conclusion that the society are justified in entertaining the conviction that they had justly earned a title to the proceeds of the school lands, where they had become productive, by their long continued and gratuitous labors in the cause of education in the province.

The commissioners have only to add, that in those cases where the lands have been sold, and the proceeds invested, the claim of the society is equally good as to the land itself, and they recommend that in all such cases it be allowed.

All of which is respectfully submitted.

P. CARTERET HILL,
M. H. RICHEY,
B. WIER,
ANDREW MACKINLAY.

Halifax, 17th February, 1866.

INDEX TO THE JOURNALS

OF THE

LEGISLATIVE COUNCIL.

1866.

A.

- Accounts, Poor's Asylum, Halifax: Message from H. E. with, 9.
