A SERIES OF RESOLUTIONS

Which Strongly Denounce the Formation of Trusts Placed Before the Convention.

W. J. BRYAN AND BOURKE COCKRAN

But the Nebraskan Declined to Be Drawn Into It.

The Committee on Resolutions held its first meeting and organized by electing exGovernor Luce of Michigan chairman, and Ralph M. Oakley secretary. It was decided to name a sub-committee of five to receive and consider resolutions that might be presented, and report to a general complete the presented, and report to a general complete the presented of the committee of the committee are said to aggregate about \$7000, with assets very little, if any, so far as known.

to advance, take away all incentive to invention and improvement, and hold out inducements to deterioration and base imitation. Inspired by no other or higher motive than the insatiable greed of their promoters, they hald the small merchant, the wage-earner and consumer subject to their arbitrary dictates. They are the evil of the hour and their suppression i of momentous importance to the American people. Therefore be it "Resolved, first that we are unalterably opposed to all trusts and monopolies as in derogation of the common right.

Government Ownership Demanded. "Second, that we demand of the several states and cities that they take such action as will lead to the public ownership of all public utilities, and we demand of the Federal and State Government and before the such as the second state of the sec externand of the Federal and State Governments such legislation as will effectually control the railways and prevent extortion and discrimination.

"Third, That we demand of Congress and the Legislatures of the several States that the yabolis all special privileges and take whatever action is required to destroy monopoly.

"Fourth, That in our judgment no candidate for public office is entitled to the suffrages of his fellow citizens who does not earnestly declare his hostility to all combinations in restraint of trade, or the further granting of any special privileges, and openly avow his purpose to favor such legislation as will suppress them.

"Fifth, That it is the duty of the people, by organized effort, to secare the nomination by the political parties of the opponents of trusts, and who have the integrity, courage and ability to defend the rights of the people against impending industrial slavery.
"Sixth, That the growth of private industrial corporations under the general laws of the several States, and the advantages given to such artificial persons by such laws, threaten the extinction of all natural persons, as competitors with them, in every line of business." "We therefore recommend that the everal States take immediate action to limit the purposes for which such corporations may be formed, and discourage their future formation, by the adoption of such measures as their wisdom may advise."

The morning session drew a large audlence, but the program was overshadowed by the announcement that in the evening William J. Byran of Nebraska, and W. Bourke Cockran of New York, would speak from the same platform. The pointical prominence of the two orators gave rise to a general feeling that the night session would be of more political than economic interest.

Mrs. Johns, h. c.ley-street, is one whose confidence was abused. In an interview yesterday afternoon, she said that she judged the mian by his standing in the community and the church, and had lost \$300. She held stock in the Dominion Building & Loan Association, of which Mr. Falcoher has been local and district representative. When these shares matured, she instructed

The Scrimagers and Mrs. Wray handed Mr. Falconer \$1400 and \$400, respectively. At the end of each year they received their interest, but no stock. Mr. Falconer told them the Loan Company would not issue the script until all the money had been used. That was a custom of the company's, he said, and could not be violated. Neither the Scrimagers nor Mrs. Wray were convinced, and yesterday their lawyer visited the company's office in Toronto. He learned, it is reported, that not a cent had reached the company in their names. He returned, the warrant was issued shortly after dinner, and was served while Mr. Falconer was teaching his division.

Mr. Falconer did not give a private note in this case. On the contrary he furnished receipts, and on these the plaintiffs will prosecute. They demonstrate the purpose for which the money was given, and are, in fact, the basis of the action.

LET THE PEOPLE JUDGE.

After the disgraceful revelations that were made of corruption and of election frauds in West Elgin, North Waterloo and South Ontario, there is only one honest thing to do, and that is make an appeal to the people. Still more is it apparent that this appeal should be made in view of the statement of Mr. Hardy that he was ignorant of the petition of the people of West Elgin, asking for the enforcement of the law against the election thieves, until he read it in The World of the day before. The general administration of the Province is on this admission in a disorganized condition; the ministry of the day are demoralized; public confidence in them is utterly shaken, and there is only one way of cleaning up the mess, and that is an appeal to the people. If Mr. Hardy's health is not good we regret the fact, and he is entitled to pass into some kind of retirement. Worse men than he have gone on the bench, but the sore should not be allowed to fester any longer.

Ontario stands to-day disgraced before all her sister provinces, and in view of these facts Mr. Hardy should either resign and make way for a successor who will appeal to the people, or, failing that, then he ought to act on his own responsibility and make a straight appeal to the electorate. To try and snatch one victory here and another there, in the two or three bye-elections that are yet to be held, is only to delay the issue and to make the existing stench still more noisome. To fight the bye-elections, to call a session of Parliament, can only delay and at the same time aggravate the situation. There is, therefore, only one clean, straight, up-and-up way out of the difficulty, a way that will clear the air and restore public confidence, and that is to let the people judge. A general electoral fight in the open must take place.

The World further regrets that Sir Oliver Mowat, the Lieutenant-Governor of this Province, is in feeble health and hardly up to the responsibilities that devolve upon him. If that is the case, Sir Wilfrid Laurier ought to know what to do under the circumstances. But the responsibility rests on the Liberal party under all the circumstances to make an immediate appeal to the people of the Province, and surely men who believe in popular government and the rights of the people ought to have no hesitation in taking the one course that will disinfect the situation. This is clean, and quick, and sweet to anything else that

Lot of Notes Were Carried, the Makers of Whom Are Dead

Montreal, Sept. 15 .- (Special.)-When the was continued to-day Mr. A. L. Kent, one of the liquidators, gave a detailed statement in amplification of the allegation that the current loans of \$1,372,488.41 was inrrect, and that it was less, in fact. When asked by the prosecution if this was the correct sum, Mr. Kent replied that from the books it would appear that it was up of \$35,120.44, which would have gone in A BLUE BOOK ISSUED IN LONDON with the overque accounts; then there was \$38,080.17 in addition belonging to the over-drawn accounts, while the remainder, \$302,-318.34, represented a quantity of notes signed by Mr. W. Weir, for persons, some of whom were dead, some insoivent and some were a mass of paper, not to be called cirrent loans.

Some of the Notes.

The witness produced 29 notes in proof of what he had said. The Desorment estate, for instance, was represented by a promissory note of \$20,222.50, yet it was insolvent for two years, having been made so by the bank. Another note, for \$42,533.31, by the same estate, was also filed. The firm of A. L. Hurtubise & Frere also owed the bank two notes, one for \$1382.15 and the other for \$94,125.38. The witness said liere was such a firm, now insolvent, but he was not sure it was the same as the above. He would nie particulars later.

Another note was made by Louis Perrault for \$11,469.67. The witness said he knew two such persons. One was dead and the other insolvent. A promissory note by the New Glasgow Lumber company for \$12,341.89 was also filed by the witness, who said the firm had been insolvent for several years, and its current when the same in the company for \$12,341.89 was also filed by the witness, who said the firm had been insolvent for several years, and its current when the same in the same in the convention of 1884.

JOHN KAY, SON & CO. "CANADA'S GREATEST CARPET AND CURTAIN HOUSE." A Talk About Carpets and

> "I have been all over," said the head of one of our large colleges, "but I am back here to make my purchase. Only those who have seen your stocks and seen other stocks can appreciate your leadership in carpets and curtains-whether in size, assortment, or prices."

PRICES.

This is the kind of evidence that is coming before us daily. And it is so. On our large and spacious ground floor in this new store, supplemented by reserve stocks on an upper floor, the shopper finds a display of carpets that is simply

wonderful, matched nowhere else in Canada. The wide range shown is one of the most attractive features of the stockso many lines that are seen nowhere else. We have given very special attention to the colorings of carpets and can advise wisely in regard to the carpet that will

conform with your furniture, wall coverings and other appointments. So far as price is concerned, we care not what prices you know of, our prices will discount them. Some evidence:

—In Axminsters we have a very valuable line suited for drawing rooms, in most beautiful that cannot be made in Brussels, recommended for its wear and marked at the

cash price of \$1.20 -We do not know any value anywhere equal to a line of Tapestry carpets in beautiful Brussels effects, a good carpet for wear—that is marked at the cash price of 50c. The run of values throughout the house may safely be gauged by these three

We ask you to inspect, in convenient position on the carpet floor, a new line of carpets, specially made for ourselves, in Mucha designs, very suitable for reception rooms and sitting rooms. In the colorings one sees the eccentricities of this famous artist, as also the faculty he possesses in blending greens and blues.

—A lot on which we lay much stress is a fine 11-wire Brussels carpet, made for the very hardest wear in dining rooms or other much-used parts, in Indian designs, after the best carpets of the Kensington Museum. We have three-quarter borders to match these carpets. Residents out of town are always able to take advantage of our large stocks and special prices in ordering by mail, as we give very careful attention to every

Contractors Disagree.

The case of W. R. Hagen against Hughes Bros. & Bangs, Buffalo, involving \$125,000, was heard by the Court of Appeal yesterday, and was decided in favor of the defendants. Both parties are contractors, and the trouble arose over Hughes Bros. & Bangs purchasing a farm containing limestone deposits, upon which W. R. Hagen had an option. The latter applied for an injunction, which was refused, to prevent them from taking stone out. He then kept account of the stone removed, and afterwards sued for the amount.

"The business now carried on by the Carter-Crume Co. was commenced in Toronto, Ont., in 1882, and at Niagara Falls, N. Y., in 1884, and factories utilizing the same patents and processes have since been established and very successfully operated in London, England; Berlin, Germany, and Melbourne, Australia, in which, however, the Carter-Crume Company retains no interest. In addition to these a factory is operated at Oaklands, Cal., by a company which pays a minimum annually royalty of \$6,000 to the Carter-Crume Company for the privilege of supplying territory west of and including Denver, Col. The business has grown steadily from its commencement until the company now supplies nearly 90 per cent. of all the duplicating and triplicating sales books used in the United States, and has on its books over 25,000 regular customers. On August 1st, 1899, there were on hand orders for SIX MILLION books.

"The letters patent of the Company protect the most valuable books manufactured by it, and, also, important features in the machinery used in the factories. While these patents are of great value, the prosperity of the Company is also due largely to the fact that it has reduced the cost of production to a minimum, and that the product, owing to modern commercial necessities, is a staple article."

Many a girl, bright, capable and interesting, has had her usefulness seriously impaired because of the neglect of the ethical and social in her education. At Alma College these matters receive attention along with the student's mental training. A course in a good residential school best gives that balance of character noticeable in the attractive and accomplished young woman. The College Catalogue will be sent to anyone interested,

EBOR'S IMPARTIAL CRITICISM OF WHAT IS TRANSPIR-

Holldays being over, the pastors have all returned to their flocks. Being Exhibition time, they received hearty greetings, not only from their own members but many visitors who attended to hear old favorites. Bishop DuMoulin had a very large congregation at St. James' Cathedral. He was as eloquent as of yore, but without the objectionable sensationalism without which many ministers seem to think the service rannot be attractive and profitable.

If it my gaze on Thee, Father, Thy face so full of cheer, So full of tenderness and love, Dispels my rising fear, When through the water's turbid flow My trembling feet must onward go, Before and after me May rise the angry sea, I trust it all to Thee

What may be termed the real season of parochial work and domiciliary visitation does not commence until October. I am glad to hear that plans are being made to have this more effective than ever during the coming winter. It is in the homes of the people that the manifestations of practical sympathy, showing that the preacher is really one with his flocu in their sorrows and joys, trials and successes, that more good is probably done than in an hour's discourse from the pulpit.

Connected with this topic the following remarks of The Canadlan Churchman are perfinent: "Whose fault is it that in so many parishes there is no co-operation between the clergy and the laity? Probably there are faults on both sides; clergy are loth to call in the services of lavmen, feeling that in some cases the time and laiver given is grudged; but is this really so? We think that often the coryyman, who wants efficient lay help given, makes the mistake of going first to the leading men of his parish (leading, that is to say, in the social scale), rather than to the more obscure, but no less efficient worker, who, from his own calling, knows how to lay out time and labor to the best advantage, and with the truest economy."

A South London clergyman has devised a novel scheme to catch the "man in the street." Outside St. Mark's, Kennington, on Saturday evenlag, a large sheet stretched between one of the massive pillars caught the eye of the passer-by, and very quickly a crowd gathered to await developments. At 8.30, by the aid of a limelight apparatus a series of pictures illustrative of the life of Christ were projected on the sheet, and presently an audience of several hundred found themselves listening in the churchyard and round the railings to a brief address by Mr. Arthur Nott. A number of popular hymns were given out, and when it was all over the assemblage were invited by one of the clergy to a service in the church. The exepriment proved so successful, says The Dally Telegraph, that it is to be repeated, weather permit'ing, each Saturday evenlag until further notice.

"If I have eaten my morsel alone."

The patriarch spoke in scorn;
What would he think of the church, were

he shown
Heathendom, huge, forlorn,
Godless, Christless, with soul unfed,
While the church's ailments is fulness of
bread,
Eating her morsel alone?

"Freely as ye have received, so give,"
He bade, who hath given us all,
How shall the soul in us longer live,
Deaf to the starving call,
For whom the blood of the Lord was shed,
And His body broken to give them bread,
If we eat our morsel alone?

The Catholic Register says: "Redemptorists in Canada as everywhere throughout the Catholic world will rejoice to know that the memory of the late Father Bridgett, the eminent Redemptorist preacher and theologian, and one of the most learned and popular writers in the Catholic Church in England, is to be perpetuated by a set of mosales to be placed in the new Westminster Cathedral. By the way, it was a pamphlet by Father Bridgett that started the agitation against the objectionable portion of the Coronation Oath, that has now spread throughout Ontario."

In connection with the forthcoming Church Congress an interesting development which was inaugurated at Bradford last year is to be repeated. The Church Congress does not admit any but those in communion with the Church of England to take part in its proceedings, but the committee on the "Christian Conference," an organization of which the Dean of Ripon is the moving spirit, have arranged a series of "united" meetings in the St. Martin's Town Hall for the Monday In Congress week, Oct. 9. In addition to prominent representatives of the various Nonconformist bodies who will take part in the proceedings, Prof. Sabatier, of the Theological Faculty at Paris, will read a paper at the morning conference. In the afternoon the temperance problem will be discussed.

Prof. Goldwin Smith writes in The Weekly Sun: "Rev. W. H. Garth has been fluttering a Montreal audience by advocating Higher Criticism in the pulpit. His doctrine is that the Bible is not infallible, but is inspired. When you ask him what is meant by inspiration without infallibility, he tells you-that he applies the term inspiration to the writings of Paul in the same sense which he applies it to the writings of Shakespeare. What is this but inggling with words? It is only in a figurative sense that we speak of the inspiration of Shakespeare. We mean simply that they display transcendent genius. But was this sall that we meant when we spoke of the inspiration of St. Paul? The very name "Bible," at this rate becomes unmeaning, or, rather, deceptive; it is no more applicable to a miscellaneous collection of Jewish literature than to a similar collection of the literature of any other country.

"Dr. Lyman Abbottt, to whom Mr. Garth seems to look up, is another of those theologians who juggle with words, keeping up the phraseology of orthodoxy when they have abandoned the belief. Our doubts will not be set at rest, nor will thuths be attained in this way. Dr. Abbott clings to the language appropriate to a belief in Revelation; but the revelation in which he believes is one regulated by the law of evolution. In other words, he subjects the self-manifestations of the Delty to the operation of a physical law.

Dr. Garth admits the existence of historical and scientific error in books which he contends, nevertheless, are inspired. Is the error voluntary or involuntary? If you say that it is voluntary, how can the book in which it appears be believed to emanate from omniscience? These theological fire-escapes may be helpful to doubting and perplexed clergymen who are climbing down. To the laity who desire the simple fruth, whatever it may be, they are useless,

"Napoleon, who had himself no religious belief, said that the French people must have a religion, and accordingly restored the Catholic Church. It seems that this sceptical age must have a religion, and its faith in the Deity waving faint, it transfers its worship to the flag. Worship is not too strong a word for the attitude of American Imperialists. They resent the use of the hallowed emblem for the purposes of ordinary decoration as an Israelite might have resented the violation of the ark or as a Catholic would resent the profanation of the Host.

"President McKinley the other day delivered himself of a sanctimonious oration, the gist of which was in effect that the flag cause, and whatever the cause might be, must be borne on to what he called 'triumphant peace.' The belief that the life of a nation is bound up with bunting hardly consists with the fact that within the last century the leading nations on the continent of Europe exchanged their ancient flags for variations of the tricolor. Even our own Union Jack cannot be older than the union with Ireland. The charm as well as the utility of the national emblem and its power of kindling by its presence both the highest and tenderest emotions we all well know and heartily feel. But there are people who would erect it into an idol, to be worshipped with human sacri-

SOUTH AGAINST NORTH.

the Anglo-Saxons.

Rio de Janiero, Sept. 15.—An evening paper, The Noticia, the personal organ of Dr. Campos Salles, President of the Republic, published a few days ago under the heading of "South American Alliances," a noticeable article as follows:

"Telegrams from Rome to Buenos Ayres, and thence to Rio de Janeiro affirm that it is currently reported in the continental capitals that, in case of the reported alliance of republics of Latin America being realized, this fact would have the frank support of Italy, Austria, Germany and France, excepting probably Austria, which it seems to us would be decidedly out of place in this galaxy. The report doubtless would express the real sentiments of the nations named in regard to an agreement of the Latin American countries. Such an alliance, they suppose, could only be engendered to oppose the United States, whose darling energy and spirit of adventure and audacity they dread, especially when that country is in perfect, accord with and, in fact, allied to England.

"Two European matoas for different but not opposite, reasons, Germany and France, feel themselves more than all others theatened by the prospect of an English-American alliance and the vassalage of Latin America by the very powerful Anglo-Saxon mation.

WALSH'S DEATH AN ACCIDENT.

he Coroner's Jury Want the Trol-ley Gong Sounded—The Deceas-ed Was a Veteran Soldier.

ed Was a Veteran Soldier.

In a moment of oblivion with regard to their surroundings, the death of John Walsh was caused, and the life of Elijah Andrews imperilled.

The evidence given at the inquest, held at the Emergency Hospital Jast night, touching the death of the former, all pointed to the carelessness of the hotorman, william Jamieson, and that the two becapants of the wagon were warned, but did not become aware of their danger until its was too late to escape.

In his evidence, the motorman said power was never on coming down the grade at the subway. When coming down the grade at the subway. When coming down the grade at the subway. When coming down the grade in the subway. The bell, but had no time to stop the car.

The evidence in regard to the wagon being driven in front of the car was corroborated by Mrs. and Miss White, who were walking along the street and saw the accident, and by Alex. Banks and John Hopkins, teamsters.

Dr. Primrose; who attended Mr. Walsh, gave evidence that death was caused by fracture of the skull and injury to the briatin.

fracture of the skull and injury to the brain.

The jury were only about 10 minutes in bringing in a verdict that death was caused by accident. Owing to the dangerous crossing at Dufferin-street, and that hither to it was not compulsory for the motorman to sound the gong, a rider was attached, "that all motormen be compelled to sound the gong approaching Dufferinstreet both from east and west."

John Walsh was a member of the Army and Navy Veterans. He was an ex-member of the First Battailon of the 9th or East Norfolk Regiment, and was with his corps at the fall of Sebastopol and elsewhere. He served in all 21 years, and retired with a pension. He was an ideal soldier in physique, standing over 6 feet, and well built.

The funeral, which will be in charge of the Army and Navy Veterans, will be held on Sunday at 3 p.m., from the deceased's late residence.

CLOAKMAKERS ON TRIAL Assault Case, Arising Out of the Recent Strike-Grand Jury

Deliberations. Frank and Samuel Stein, Jacob Machin ist and Nathan Levinter were arraigned and tried in the Criminal Sessions yester and tried in the Criminal Sessions yesterday on a charge of assaulting Seigraund
Labelsky on July 13 last. The alieged
offence was committed when Labelsky was
on his way home from the T. Eaton Company, where he is employed as foreman.
The two Stein brothers were striking
cloakmakers, and Machinist is one of the
men alleged to have been brought here
by Labelsky to take the places of the
strikers. It is said that Machinist, when
he heard a strike was on, refused to go to
work and joined the strikers. Mr. T. C.
Robinette made a strong plea on behalf
of his clients, and was followed by CrownAttorney Dewart. The case will be concluded this morning with His Honor's
charge.

Anglo-Saxon Temperament?

London, Sept. 15.—The Times prints this morning a four-column article from its Rome correspondent on the Pope and Americanism, who says: "The recent conflict was of intense interest for Englishmen because, behind the name of Hecker, and all it implies, lies the wider and weightier question, is Roman Catholicism, with its infallible authority and iron framework of dogma, fundamentally compatible with the virility and independence of the Anglo-Saxon temperament?"

After giving a history of Father Hecker, his movements and of the recent conflict, the correspondent concludes as follows: "So long as the American Catholics formalate no doctrine, claim no liberty and avoid all action which might give a handle to their foes, they may hope to live in peace, yet the question arises, how long will respect for their past, their independence in spirit, and especially the constant infinence of the American environment, permit them to hold their tranquility on sufferance of to enjoy their freedom by stealth? The duel between the Anglo-Saxon temperament and the Jesuit discipline will be worth watching, for the stake of civilization in its outcome is by no means small."

The New Detroit Association football team, which was organized last night, will join the Canadian League. R. A. Graham is manager.

Munro Park.

The Highlanders' Band, assisted by Miss Alice Smith, the sweet girl singer, and Mr. McClellan, will give concerts in Munro Park this afternoon and evening, weather permitting, at 3 and 8.30 o'clock respectively. The program will be an exceedingly good one, as the songs are all new and the band will give some selections not previously heard in Toronto. There will be a good car service for both concerts, and, as this will probably be the closing event of the season in the park, a large attendance may be expected. Munro Park.

sign-Incapacity Charged-Monday's Ceremony.

The chief feature of yesterday's meeting of the Board of Control was the refusal to accept the report of Chairman Frankland of the Fire and Light Committee, that the recent Bay-street fire had been well and properly handled. The Mayor, as an eye-witness, denied that this was the case and rejeated his well-known views that the Fire Department of Toronto needs reorganization, and that the chief step in this direction is the resignation of Chief Graham. No one in Ottawa any more than in any other city in Canada has ever reported that pointreller. Burns was equally strong in stating that a reform is necessary in the appointment of men on the brigade, that the present system of nomination in turn by the efficiency of the force. Hence the matter will come before the City Council on Monday and the whole question, which the two sessions of the investigating committee had supposed to have settled, be reopened.

District and a Residential Town.

Pacific Mining Letter No. 5—Relating to Columbia, B.C.

Columbia, Boundary District, B.C., Sept.

1.—In the acute angle formed by the junction of the north fork of the Kettle River with the main body of that stream, lie two incipient towns, Columbia and Grand Forks, to wit. Each of these places is striving for the position of premier distributing point, for the numerous camps in the eastern half of the Boundary District. A great jediousy exists between the two towns, but my opinion is that the municipalities whose boundary lines adjoin will some day merge into one. In the meantime the latter place has the start in age, population and trade, but the former scored an important point the other day, when the C.P.R. decided to erect its station on the Columbia townsite. By may of compromise the road will call its station Grand Forks, but the Columbia people are satisfied that they have something better than the name, viz., the station itself, with its sidings and freight yards. However, comparisons are odious, and I do not wish to set the points of one town against those of the other. This letter is devoted to Columbia, and in a later communication I will take up Grand Forks.

C. P. R. In Boundary Country.

With the ignoming of the C.P.R. the whole Boundary Country is greatered to commit and its continuous operations, mining matters were never brighter that they are to-day," said Mr. George C. Par they are to-day," said treasurer of the Telford Creeks, als were, secretary and treasurer of the Telford The News.

"They cannot be better, especially wit our company," continued Mr. Parker. "When Mining Company, and treasurer of the Telford The News.

"They cannot be better, especially wit our company," continued Mr. Parker. "When Mining Company, and treasurer of the Telford Creeks, als an option on a very fine paying on Hunker, and a coal property semidistance from here, which I am looking into thoroughly. At the present time, we are writing the paying on Hunker, and a coal property semi

western extension of the C.P.R. the whole Boundary country is awakening to bew energy. A number of properties in Summit, Brown's, Greenwood, Wellington, Central and Deadwood camps have been brought to a shipping basis, and only await the rallway to send their ores to the smelters. This, of course, means that instead of being merely a sink hole for the money spent in development, the region will become a wealth producer. The residents and outsiders realize that the district is thus probably on the threshold of a new era, and a consequent feeling of optimism prevails everywhere one goes.

Properties Ready to Ship.

With such properties as the "B.C." Path-

Properties Ready to Ship.

With such properties as the "B.C," Pathfinder, Ironsides, Knob Hill, City of Paris, Winnipeg, Brandon and Golden Crown, Morrison, Brooklyn and Stemwinder ready to ship ore, smelting men are coming into the district. One plant is in course of erection on the north fork of the Kettle River in Grand Forks. Another is contemplated on the same stream, and a third is in view for Greenwood. Merchants of all classes have caught the fever and a great deal of building is going on at Columbia as well as at Grand Forks and other roints of the district.

To return to the entry of the Columbia and Western, its presence in the district, besides affording ore shipping facilities for the mines, will wholly change the course of traffic. At the time of my arrival here a few days ago, all the passenger and freight business was done via Bossbarg, Wash. Travellers staged it in, and the quantities of mining and general supplies consumed in the district were brought in over a rough 45 miles of mountain road by means of heavy trucks drawn by six-horse teams.

Station at Columbia.

Station at Columbia. But now all is changed, the railway has reached this point and next week coach and freight trains will land passengers and goods right in Columbia. To facilitate its shipping arrangements the railroad has secured a large interest in that part of the townsite adjoining its tracks, and is erecting a station and storehouse and laying out its system of switches.

Basis of Columbia's Horses

Basis of Columbia's Hopes. Now, Columbia having secured a station lays claim to the right to become a distributing point for many of the surrounding camps. The Review, a local newspaper, this week points out that most Canadian and American cities have become such owing to their natural situation as convenient distributing points for great tracts of country adjacent to them, and urges that a city in the forks of the Kettle River has a future based upon the same premises. The Review thinks that Eholt, Summit City, Phoenix and other points between the forks of the Kettle and Greenwood will become purely mining towns, but that a community located between the two branches of the river must always be the residential centre and base of traffic for much of the territory.

Topography of the District.

As regards location, Columbia is well situated to become a distributing point. It lies on a plain at the junction of a series of great valleys which break up the neighboring mountain ranges and converge here. These valleys are four in number, namely: That of the main Kettle River, that of the West Fork of the Kettle, that of the North Fork of the Kettle, and that of the Fourth of July Creek. By the first named of these guiches the railway finds access, and by the other three the passengers and freight brought in by it will be distributed to the surrounding camps. The North Fork of the river is the natural outlet to Summit, Brown's, Seattle, Pass Creek and Knight's camps; the West Fork valley leads to Republic camp, and the Fourth of July gorge points in the direction of Wellington, Central, and Greenwood camps. One can stand in the midst of the plain and look aug through the hills into each of these guiches.

The station at Columbia, besides in the midst of the plain and lock up through the hills into each of these guleter in turn.

The station at Columbia, besidest less the make-up point for trains to the location of the make-up point for trains to the location of the make-up point for trains to the location of the make-up point for trains to the location of trainshipment for passengers and freight bound for Republic, Greenwood, Milway and McKinney.

While thus pointing out its advantages as a centre of traffic, the people of Columbia call visitors attention to the beauty of their townsite. As already indicated the major portion of this site consists of a level plain, the only one, by the way, I have yet seen in British Columbia, some three miles or more in diameter. This little prairie-like tract is surrounded by a series of natural benches or terraces; beyond these rise sloping, grazing lands, and above these again the low ranges of hills rear their wooded crests. As an inducement to prospective residents, the Columbians are laying out a race track, tennis court and a hundred acre park, including a three-dammed to afford sufficient room for a cance and pleasure boat course.

Columbia recently lost its chief hotel by fire, but the Escalet House has been built in its place, and two or three others are in course of construction.

I shall be interested on my return here a few weeks hence to note the effect upon the district of a hundred and Western road. As I have said before, in another letter, I will take up Grand Forks.

WOMEN WHO BET.

one That is Presented Ex-clusively at Famous Saratoga.

04040440404040404040404 At the centre of the long upper promen-ade of the grand stand at the Saratoga race-track is an inconspicuous little room, tucked away from too curious eyes, bearing the non-committal information tacked over the orway, "For use of ladies only." This s the famous "Ladies' Book," the only one of its kind in America. Nowhere is beting on the races so freely indulged in by the gentler and usually wiser sex as at Saratoga, and nowhere is so little money wagered on a race. While at the big city tracks a few women will risk hundreds on their choice, here almost every woman in the stand yields to the temptation to "pur

their choice, here almost every woman in the stand yields to the temptation to "put a dollar on, just for fun, you know." To meet this demand, and, avoid the heavy shaving of odds indulged in by the messenger boys, the "Ladies" Book" was organized at the track two years ago. The association declares that, as a matter of fact, the sums staked are so small that it does not pay fipancially, and is run merely as an accommodation.

Through the door of this little room, perched on the back of the stand like a huge bird cote, a constant stream of gorgeously plumed feminine birds of paradige fly in and out. They are of all sorts sould-rimmed glasses the disappearance of their husbands ringward after imaginary cigars and slip quietly out of their seats to fon the diamond-studded trainers' wives, who boldly enter to play their husbands' "sure things." Here and there a huge negress elbows the trim, quiet maid from Fifth-avenue.

Within the room, behind a long counter, stands the bookmaker, Mr. J. P. Newman. There is practically nothing for him to do until the jockeys' names are posted. A few women play the biggest odds; a much larger number play a pretty name; but nine women out of ten invest on the mounts of their favorite jockey.

As soon as the riders are known the place fills up rapidly. Soon there is a long and anxious line behind a deliberate, grey-haired lady, with the air of a New England "school marm." After carefully adjusting her glasses she looks over the slate with so exact a bargain counter air that one expects to hear her say: "Cut me off two yards of Maher's mount, please." The careful inspection finished, she asks, "How much do you pay on No. 7 here?"

"Just what it is marked, 5 to 1, madam."

"Oh, is that all? I don't think I care for that. Now this No. 2, 'Dear Heart,' that's a pretty name. What kind of a horse is that?"

"All right," replies the "bookie," "Four dollars? You have just given that other lady \$6 to 1."

"Odds have gone down; only 2 to 1 now."

The bookmaker sighs despairingly, knowing what is before him, and starfs in, but to all his demonstrations, arguments and sevilantions comes the unvarying reply:
"But you just gave that other lady 3 to 1."

With a final triumphant citing of the case of the "other lady" she sweeps up her \$2 bill and stalks off with a parting fling about "being robbed."

ered, after telling the name of the author, a borrowed sermon. Months afterward the attendant heard him for the third time, and it struck him that the sermon was by no means like those he had heard before. He doubted that it was the composition of the preacher to whom it was credited. Indeed, his better trained observation told him it was not a borrowed sermon at all. As the speaker came to the peroration, he was convinced this was fully original, although it had been announced as taken from a volume, which, however, no one in the house had ever, before heard of.

When the service had ended the attendant waited and greeted the preacher.

"I have seen you a good many times at the public library," he said. Then he added, so that no one else could hear: "But I don't believe this sermon was taken from a book. I believe it was your own."

"Heavens!" exclaimed the preacher, in the things of the soil, tell them it is my own. They wouldn't respect me at all if they knew I made it up. They think they are listening to a \$10,000 man. I don't cost them a cent."

THE BALLON BURST. Prof. Dennis Dropped 200 Feet to the Earth, the Parachute Fail-

ing to Work. Crawfordsville, Ind., Sept. 15 .- Prof. Dennis, an aeronaut, attempted a parachute drop at the Fair here yesterday, but met with an accident that is likely to cost him his life. Dennis ascended successfully until about 200 feet from the ground, when the balloon burst. The parachute falled to open until within a few feet of the earth, against which the aeronaut was dashed with scarcely diminished velocity. It is feared that his injuries will prove fatal.

Doctor Howard, Manager Orien's Mfg. Co., Carleton Place, Ont.

DEAR SIR,—I have been a great sufferer from Piles. The last attack was the most severe I have experienced. For ten days I could neither sit nor stand, and walking was out of the question, so great was my suffering. I could find no relief anywhere until your Pile Ointment was recommended to me. I got a box. I was relieved by the first application. In two days I was able to resume work and felt perfectly cured within a week. I yolunteer this testimonial. I desire that people who suffer as I have

Devoted Specially to the Interests of our Women Readers.

Always one of the sights while the big liners stop at Queenstown for the mails is the approach of the little boats with the Irish women, who come aboard to sell lace, crochet work, and all sorts of gimcracks and kickshaws peculiar to the beautiful Emerald Isle. Everybody crowds to the side of the ship to see them hauled up the great height to the deck. To see these enterprising women thus fearlessly/ascend the tall ship's side from the little boats below is always an exciting and amusing spectacle. The rope is let down from above, is caught by the woman who comes first, and slipped below her. The word is then given, and, like a youngster on a rope

The word is then given, and, like a youngster on a rope swing, she is hauled up amid the laughter and jokes of the passengers, who are always ready to buy her wares. Smart, alerthooking women they are, these Irish women, with their flashing dark eyes and coal-black hair. Those I have seen were stout elderly women, innocent of corsets, wearing short, tidy skirts, clean white aprons, tied over white cotton jackets. One old woman, I remember, fat and jolly, whose weight mast have been tremendous, came swinging up the dicking her heefs ear the end of a gaily and audaclously blowing kisses to the hundreds of laughing faces above. Oh, she had a way with her, that jolly old dame, and she was received with cheers and open arms. Once aboard, her wares went speedily, she joking and jollying the passengers, charging exorbitantly, and then coming down in her prices as easily and as jauntily as she afterwards descended the great ship's side. FALL OPENING OF NEW FASHIONS IN

Mens Hats

To-day is the climax-and we keep open house until 10 o'clock to-night. The brilliant success of our introductory Opening yesterday presages a greater public interest in the continuation of our Opening displays of new fashions to-day. Selling hats is but a mere incident of the occasion. The chief aim is to emphasize the evident fact that there never was such an immense exhibition of fine hats-in so many different styles-from so many different makers. Intending purchasers will find a special interest in the prices—but our XXXV'th annualfall Opening is mainly designed as a grand exposition of all the new styles, and the store remains open
