GERMANS FAIL ONCE AGAIN TO SHAKE BRITISH Hot Attack Between Tower Hamlets and Polygon Wood is Repulsed. POSITIONS ARE INTACT

British Infantry Easily Disposes of Survivors of Intense Barrage.

London, Oct. 3.—An attack by the Germans this morning between Tower Hamlets and Polygon Wood, following a vigorous artillery barrage, was repulsed either by British infantry, according to the report from Field Marshal Haig tonight. All the British positions remained intact.

BOTH PARTIES PREPARE FOR A RECONSTRUCTION

Government Begins Reorganization by Swearing in C. C. Ballantyne as Minister of Public Works—Resignations of Roche and Crothers Reported Accepted—Sir Wilfrid Laurier Said to Have Signified Desire to Give Up Leadership of Liberals.

SIR WILFRID LAURIER Who has offered to resign leadership of Liberal party on eve of election campaign.

Special to The Toronto World. OTTAWA, Oct. 3.—The capital is in a political ferment today over the reorganization of the Borden government and the reported resignation of Sir Wilfrid Laurier of the leadership of the Liberal party.

But almost as significant as the likelihood of some of them going in is the strenuous efforts of certain prominent Liberals and Liberal M.P.'s to persuade them not to go in, and of Conservatives and Conservative M.P.'s to persuade Sir Robert Borden not to continue any further negotiations with them.

But no one can yet say that any outstanding names in Canadian politics have come into the administration as yet. Sir Clifford Sifton, for instance, but he is here and more or less busy with the situation. Nor have any existing leaders in the Liberal organization here consented to join the government.

LAURIER EAGER TO QUIT DECISION IS NOT FINAL

By a Staff Reporter. Ottawa, Oct. 3.—Political events of outstanding prominence developed in Ottawa today. The first step in the formation of the long-heralded union government was really accomplished when C. C. Ballantyne, prominent Liberal of Montreal, entered the cabinet.

Various reasons are assigned for the position which Sir Wilfrid Laurier occupies. He is every expectation, however, that he will retire, and if so, in the course of a week, he will issue a statement setting forth the reasons which have induced him to take that course.

Another reason assigned for the resignation of Sir Wilfrid Laurier is the fact that he has expressed not only a desire, but a strong desire, to quit. He has consulted some of his parliamentary followers at Ottawa and this afternoon he left for Montreal to confer on the question with Lieutenants in Quebec.

What effect upon union government will be exercised by the projected retirement of Sir Wilfrid Laurier is the subject of varied opinions. One is that it will tend to solidify the vote of the party and its platform. It would take almost a fortnight to do this.

FOE STILL FORMIDABLE WARNING OF CHURCHILL

Allies Must Not Falter in Task Until German Power is Completely Broken—Dangers of Inconclusive Peace Emphasized.

London, Oct. 3.—(Via Reuter's Ottawa agency.)—Right Hon. Winston Spencer Churchill, minister of munitions, speaking at a luncheon given in his honor today by the Aldwych Club, said: "We at this moment are actually in the sternest phase of the war. We are entering the phase in which conviction of nations will be the most intense, and when the fruits which we are gathering and gained may be won for ever or imprudently cast away."

GERMANS EXPERIMENT WITH HEAVY NEW TANK

French Front in France, Oct. 3.—The Germans are experimenting with a tank armed with a 3-inch cannon and machine guns. The forward end of the tank is fitted with a spur-like wheel, while the upper part bears a super-imposed cupola and the armor plates descend sufficiently to protect the caterpillar wheels, which are thus exposed, inviolate.

SCAVENGERS STAND BY THEIR DEMANDS

Men Hold Out for Apology and Commissioner's Temporary Suspension.

OTHERS CALLED OUT

Foremen and Shophands Are Ordered to Fall in With Strikers.

Without one dissenting voice, the proposals as put forward at yesterday's meeting of the board of control were voted down at a mass meeting of the striking scavengers and street cleaners in Victoria Hall yesterday afternoon.

When seen by a reporter from The World, W. D. Kennedy had very little to say, simply stating his decision was reached by the men at their meeting, and said that they are still firm in the stand they have taken all thru.

When asked what their future plans were, they stated that beyond retaining their determination to stick by their former resolution there was nothing to say.

Had Piles For Ten Years

And Tried Nearly Everything Except a Surgical Operation Without Obtaining Relief—Tells How Complete Cure Was Effected.

Brantford, Ont., Oct. 3.—There are reported here three cures of chronic cases of piles. In all three cases many treatments were tried before it was discovered that Dr. Chase's Ointment is about the only real cure for this distressing ailment.

Mrs. F. Cousins, Victoria street, Ingersoll, Ont., writes: "About two years and a half ago I was suffering from piles. I had tried many different remedies for this distressing trouble, but nothing helped me. Finally I got a box of Dr. Chase's Ointment, and after using it found that I was completely cured, and have not been bothered in this way since. I can cheerfully recommend Dr. Chase's Ointment to anyone suffering as I did."

they gave the workers, and one of the strikers unfurled a Union Jack and waved it.

Three policemen ordered the men to move on, which order they obeyed, but by this time a crowd had gathered and inquired to the flag, then took a hand and imparted the tale to some returned soldiers.

WILL NOT SUSPEND THE COMMISSIONER

Board of Control Also Refuses to Order an Apology.

MEN ASKED TO RETURN

Are Offered Board of Conciliation if They Go to Work.

The board of control yesterday morning agreed to allow the settlement of the scavengers and street cleaners to go before a conciliation board, but absolutely refused to entertain the resolution of the men so far as it requested the suspension of Street Commissioner Wilson.

The action of the board was opposed by Controller Cameron, who held that the board should take a strong stand and advocated that the board itself should determine whether the grievance of the men were just and fair.

After first selecting Dr. Charles Sheard as the city's representative on the board of conciliation, the board was later changed to John G. Kent, president of the board of trade.

When asked what their future plans were, they stated that beyond retaining their determination to stick by their former resolution there was nothing to say.

YORK COUNTY — AND SUBURBS

WOULD TAKE OVER SUPPLIES OF FUEL

Earlscourt Citizens Ask That Government Supervise Wood and Coal Stocks.

CONSERVATION ADVISED

Speaker Says Food Situation Must Be Met by Carefulness.

A mass meeting of the citizens of Earlscourt was held last evening at Earlscourt School for the purpose of discussing the fuel and food situation.

Conservator Chisholm spoke at considerable length on the fuel problem, and dwelt on the efforts put forth by the mayor and board of control to relieve the coal situation since the outbreak of war.

Referring to the much-discussed trip to the States for the purpose of securing fuel, Mr. Chisholm said: "We thought of our duty to secure, if possible, a supply of coal for the winter, and what happened?"

"We went to Cleveland and tried to purchase bituminous coal, but were not successful. The same thing occurred at Philadelphia, New York, and other conditions prevailed, and we then returned to Toronto and made our report."

The next effort was to try and purchase wood, but this was not successful. The speaker said that the citizens of Earlscourt request Fuel Commissioner Magrath to at once investigate all persons having more than the amount permitted to purchase more than three tons at one time, and also the board of control to see that they require for the winter's needs be compelled to supply the wants of the citizens before being allowed to sell.

Secretary J. Linds pointed out that the citizens should stand until the mass meeting at Massey Hall for the discussion of the wood supply, and that the board of control should be compelled to supply the wants of the citizens before being allowed to sell.

There is only one way to meet the situation, and that is to go as far as we can to conserve our resources. We must not expect the government to rectify things. It is up to us to conserve our resources.

The operation of cold storage plants is a business in itself. We are not going to solve the problem of cold storage by the government. It is up to us to conserve our resources.

The board of control immediately replied in the negative and the commissioner left the room. Controller Cameron stated that the action of the board of control was merely widening the breach between the parties.

He said that Mr. Wilson was a capable official and he should be allowed to do the best he could. The citizens would be better served with a few dirty streets than to have every department in the city hall dominated by the resolution of the men.

Mr. Wilson, when asked if he would be prepared to step out pending the findings of a conciliation board, said he would not. Also, there would be no apology, as there had been no disrespect shown to the flag.

The commissioner defeated the various resolutions that had been adopted by the men, and stated the reasons for them. He also said that he was in receipt of many communications from all over the city endorsing the stand that had been taken.

MANY SMALL CASES IN COUNTY COURT

Major Brunton Disposes of Grist of Charges Covering Wide Range.

The afternoon session of the county police court for Wednesday, October 3, was occupied with petty cases, 12 motorists being fined for speeding or for infractions of the lights bylaw.

In the morning, Major Brunton disposed of a number of cases. Duncan Campbell, a lad of 15, was charged with setting fire to a barn, burning the barn of William Small of Holland Landing.

On September 18, various rumors were set afloat about the affair. Chief Phillips instructed Constable McMillan to investigate, with the result that he did not intend to do the damage, but that he was in the barn and the matches fell out of his pocket, and set on fire the barn.

He was reported that the matches fell on a heap of manure on the floor. He was not seen very feasible. Major Brunton sent him to the industrial school at Mimico until he reaches 21.

Discovered Trespassing. Lewis Brown was up, charged with stealing a hand saw from the Goodwin Rubber Co. of Toronto. He and a man named Bernard Richardson, both discharged employees of the company, were seen on the premises at midnight on the premises.

Robert Plumbadge of 85 Charles street was charged with assaulting a little fellow of eight, named Colin Campbell. The boy had been chasing the man's horse with dogs and Plumbadge said it had become a bad nuisance.

Farmer Had Wage Receipt. Henry Sanders, a farmer of York County, was up for non-payment of wages to a man, Jesse Dodge, who had been helping him with his harvest. Dodge said he owed him \$15 for 12 days' work.

Outlook for the Markham Fair, which opens in that town this afternoon, is brighter than at any period since the inauguration of the society sixty-five years ago. A member of the board of directors stated that the World last night stated that the entries are far in excess of the previous year, and in one department especially, that of cut flowers and beyond the village, and that fact alone shows that the fair is a wonderful show.

MARKHAM FAIR TODAY

Entries Break All Records and Outlook Favors Most Successful Event in Institution's Long History.

The outlook for the Markham Fair, which opens in that town this afternoon, is brighter than at any period since the inauguration of the society sixty-five years ago. A member of the board of directors stated that the World last night stated that the entries are far in excess of the previous year, and in one department especially, that of cut flowers and beyond the village, and that fact alone shows that the fair is a wonderful show.

CONTRACTORS COMPLETE GOOD PIECE OF ROAD

Two and a Half Miles Bituminous Bound Macadam on North Yonge Street Finished.

ANTHRACITE COAL PRICE AS FIXED AT THE MINES

Assistant Fuel Commissioner Writes on Fuel Costs and Rate of Railway Freightage.

Secretary R. Dymont, of the Earlscourt citizens' committee, is in receipt of a citizens' communication from Assistant Fuel Commissioner Chas. Pedersen, at Ottawa, as follows: "The price of anthracite coal fixed by the president of the United States on August 23 at from \$4 to \$5 a ton at the mines, according to the grade of coal. As the United States government, however, cannot interfere with contracts made by individuals, this order only affected contracts for coal made under that date, and, of course, a great bulk of coal was for the present under contract."

LIBERTY LOAN SUCCEEDS.

New York, Oct. 3.—Subscriptions to the second Liberty Loan in the New York federal reserve district have gone far beyond the \$100,000,000 mark. The campaign committee announced tonight.

IT CAN'T BE DONE.

Being Prosecuted by Parents of Young Girl for Non-Support—Indictment is Reserved.

A very pathetic case, which has been before the authorities for some time, came up again before Major Brunton on Wednesday in the county police court.

Practical Housekeeping Hints

HOW TO BUY Go to the store yourself. Select for yourself the article you desire to purchase. Inquire its price.

If quality and price please you, be sure that you get in weight or measure the amount you buy. Watch the scale. Watch the measure.

You are entitled to all the bone and the trimmings of the piece of meat that you buy. You should take home and make use of such bone and trimmings. The fat can be rendered and used for cooking purposes; the bone and trimmings used for soup or stew.

In buying meat, don't go in and ask for 25c worth of meat, and leave the butcher to decide how

much meat you should have for a quarter. Select your piece of meat, ask the price per pound; say how many pounds you want; have it weighed; see that you get your weight and that the butcher's calculation as to how much meat you have, at a certain price per pound, is correct.

Don't buy in small quantities if you can possibly avoid it. Buy for cash and buy in large quantities foods that are not perishable. Buy where you can do the best.

Wherever possible buy in bulk and not in package. You will find it cheaper to buy your vinegar by the gallon than by the bottle.

Have your ever stopped to figure out how much more you would get for your money if you bought

certain articles of food by the pound instead of by the package?

Food that is wrapped and sold in attractive-looking packages must of necessity cost more than the same food sold in bulk, which means sold by the pound. There are several reasons why so many foods are put up in packages.

First. The package looks pretty, appeals to the eye, and makes the food seem more appetizing.

Second. Most of the packages are air-tight and dustproof, and for sanitary reasons a great many people prefer food that is done up in packages.

As a matter of fact, it is possible for your grocer to keep on hand, in bulk, exactly the same foods as the packages contain, and it is also possible for him to keep them in bulk in sanitary, dustproof containers, so that the foods should be clean when they get to you.

Grant That You May Be Worthy of His Sacrifice Live Up To Your Food Service Pledge

ED. MACK, LIMITED.

Popular Clothing Firm Are Showing Many New Styles and Effects in Fall and Winter Garments.

The fall and winter clothing display at the store of Ed Mack, Limited, is unusually interesting at this time. The firm are showing a most comprehensive range of men's suits and overcoats, amongst them many new and striking effects in the foreign weaves.

Ed Mack tailoring has always held a first place, and this season, notwithstanding the difficulty experienced in securing merchandise, the assortments cover a wide range of styles and fabrics. "Dishabers to all mankind" is the slogan of the firm, and an inspection of the present season's lines will give ample evidence of the truth of the phrase.

Many years of a sound business reputation for square dealing and service to the customer stand behind the name of Ed Mack, Limited. Once a customer, always a customer, is one of the foundation stones of this popular ready-for-service clothing house. Courteous attention to the smallest detail, and the customers' interests first. Particular dressers will find all the new ideas of the master designers--exclusive patterns and weaves that cannot be seen elsewhere, while the man with modest income finds wonderful value, and the range at moderate prices for good clothes covers a wide

ILLEGAL LOAD OF GIN.

Conviction Confirmed Against Woman Who Carried Stimulant in Motor Car.

Justice Rose has confirmed the conviction of Mrs. Mary Tugman, who was convicted by the police magistrate at Oakville, and fined \$200 for having a bottle of gin in her possession contrary to the ruling of the Temperance Act. Dr. Cotton, at the trial, testified that he had advised Mrs. Tugman to have a bottle of stimulant within reach. The accused was on her way from Toronto to Niagara Falls and the liquor was discovered when the police searched the motor at Bronte.

FINE IS REDUCED.

On July 18 last Jacob Cohen, J.P., found Eva Echer guilty of having committed an assault on Eva Boales, Lippincott street, and fined her \$20 and costs or fourteen days, and directed that the \$20 go to pay the doctor's bill. Yesterday before Judge Morson the fine was reduced to \$10, but the appeal taken from the decision of the magistrate was dismissed. There was not enough evidence submitted for the crown in the police court.

STREET RAILWAY RECEIPTS.

The city's percentage of the street railway earnings during the past month exceeds that of the same period last year by almost \$2000. The figures are: Gross receipts, 1917, \$534,007.32; city's percentage, \$42,560.63; gross receipts, 1916, \$566,620.87; city's percentage, \$40,529.68.

Washing Won't Rid Head of Dandruff

The only sure way to get rid of dandruff is to dissolve it, then you destroy it entirely. To do this get about four ounces of ordinary liquid arvon; apply it at night when retiring; use enough to moisten the scalp and rub it in gently with the finger tips. Do this tonight, and by morning most, if not all, of your dandruff will be gone, and three or four more applications will completely dissolve and destroy every single sign and trace of it, no matter how much dandruff you may have.

You will find, too, that all itching and digging of the scalp will stop at once, and your hair will be fluffy, lustrous, glossy, silky and soft, and look and feel a hundred times better. You can get liquid arvon at any drug store. It is inexpensive and never fails to do the work.

Baseball Comparing Outfields

OUTFIELDS IN WORLD'S SERIES ARE VERY EVENLY MATCHED

Offense and Defense on a Par, and Outer Garden Work Should Be a Treat in All Games--Giants Have Speed on the Paths.

New York, Oct. 3.—The outfielders of clubs playing a series form the final lines of defence, and much depends upon the ability of the trio of players in the short but the contest staged each season for the baseball championship. Definitely, these outfielders must be fleet of foot, sure catchers of long-driven fly balls, and spinning grounders, which have penetrated thru the infield lines. In addition they must possess powerful throwing arms, accurate eyes for distance and emergency action.

Considered broadly, the outfielders of the Chicago Americans and New York Giants, which are to pit prowess in the coming world series, meet these requirements better than in any two teams which have met in similar series in some years. There may have been one or two years when they were more evenly matched in high-grade outfield combinations than those of the White Sox and the Giants.

Collectively and individually, the guards of the outer lines are star attractions, and the all-around play of these combinations is expected to be a feature of the struggle. The very mention of the names of Jackson, Felch, J. Collins and Leibold for the Chicago Club, and Burns, Kauff, Robertson, Thorne and Murray for the New York team, is sufficient to start controversy among the fans. While there is some possible doubt as to how Manager Rowland will align his outfield in the opening game at Chicago on Saturday, it is likely that the trio will consist of Leibold, right field; Felch, centre field, and Jackson, left field. The Giants' trio will consist of Robertson, right field; Kauff, centre field, and Burns, left field.

GIANTS PLAY CUBS TODAY IN CHICAGO

While White Sox Are Working Out on Their Own Field—An Invitation.

Chicago, Oct. 3.—Bringing with them the first championship Chicago has won in the American League in eleven years, the champion White Sox returned today, to begin final practice for the world's series with New York, which begins Saturday.

Practice will be started tomorrow morning, Manager Rowland announced. The players will be kept on the field practically all day. Rain prevented the practice game today with the Cleveland Americans, and the players spent the afternoon receiving congratulations from Charles A. Comiskey, owner of the club. The New York Giants will play an exhibition game with the Chicago Nationals at Wrigleyman Park tomorrow, but the Giants on edge for the series.

Manager Rowland of the Chicago Club announced tonight that he would send an

SCHUPP IS READY FOR CHICAGO SOX

Works Out Against Phillies, Holding Them Hitless for Four Innings.

At Brooklyn (National).—Brooklyn divided yesterday's double-header, the Braves taking the first game, 3 to 3, and the home team the second, 3 to 1.

Brooklyn pitcher Schupp pitched for the opening contest, until the ninth, when four were bunched for two runs. Boston batted Cheney and Coombs hard, knocking the latter out of the box in one inning, when Covington hit a home run, Smith and Fitzpatrick tripped, Kelly walked and Truesser singled, four runs resulting. Marquard registered his ninth victory in the game, and the Sox lost the second game, 4 to 2.

At Philadelphia—New York wound up its championship season here yesterday by winning two games, the second 1 to 0, and the first 2 to 1.

ED. MACK LIMITED "Clothers To All Mankind" This is a tolerant age, and our business is to please everybody. That is one of the principal reasons why we invite you to come in and see how amply we have provided for every whim and fancy that you might have on the question of fall and winter clothes. No other ready-for-service shop in this city can offer you such tremendous variety. No other assortments begin to be as comprehensive. And this includes styles and patterns, as well as good tailoring. You will instantly recognize the extraordinary values—the style touches that you do not get in most ready-for-service garments, and the visible proofs of masterful tailoring. Hold Up Threatens Mines

Appeal Made to Government to Come to Aid of Mines Using Flotation Process to Recover War Metals-- German-Controlled Organization Prepares to Launch Costly Litigation.

(From The Northern Miner, Cobalt.) (Not long ago Sir Thomas White, minister of finance, stated in the house of commons that "the first business of the United Kingdom, of Canada, of Australia, of the empire, is the war, and when I say that I take second place to no one in stating at the same time that we desire to do everything we can, that we shall omit nothing to promote the prosperity of business in this country. We are fighting to protect Canada, to protect the industries of Canada, including among others the mining industry.")

Right now the mining industry of this country needs the protection of the government, Ontario, Quebec, British Columbia and other provinces where mineral wealth is threatened with a German invasion--an invasion of German intrigue. Should not the government act promptly in connection with lawsuits that are about to be launched by a so-called American corporation, controlled by German money, whereby the mining industry of Canada which has been largely responsible for the successful manufacture of such huge quantities of munitions for the allies, will be mangled in a sum mounting into the millions?

Especially in these times of conflict and struggle, of readjustment and reconstruction, a complete triumph for the allied arms is and should be our sole objective. Everyone is agreed on this point. To win this war men and money and munitions are necessary, and no government should allow any interference in the attainment of these most important essentials. The highest of mining production, which makes munitions manufacture possible, and which ultimately will bring complete success for the freedom, should not be tolerated for one moment.

Hence The Northern Miner is now calling the attention of the government to a plan whereby a German-controlled organization intends to attempt to collect thru the courts a large sum of money alleged to be due as royalties on a process which is being utilized for the recovery of many metals from the ores. But we have before us facts which reveal beyond doubt that the "American" company is on the British black list as a German company, backed up by German money and German brains.

Claim to Control Patents. There is a company known as the Minerals Separation North American Corporation which claims to control patents in this country on a process known as "flotation" which has become one of the most successful methods in use for the extraction of metals from many ores. This company is controlled in North America by Beer, Sondheimer & Company at 61 Broadway, New York City, and, as a number of Canadian mines have adopted flotation to their ore treatment

during the past three years, they are now being threatened with litigation which may prove very costly to the mining industry and to the country at this critical time.

After a thorough investigation into the personnel of Beer, Sondheimer & Company and discovering that it is German from stem to stern, The Northern Miner urges the protection of the government from these enemies of the empire on the ground that if flotation is controlled by patents held by Minerals Separation North American Corporation or Beer, Sondheimer & Company such patents should be annulled forthwith, as apparently their sole aim is to hold up the production of minerals in Canada, thereby blocking the major into litigation and thereby tying it up in the courts, such as was done in the United States. It is interesting to note that any decisions upholding the validity of these patents have been purely technical, and have served no other purpose than to continue the obstruction of the government from these enemies who are unable to collect any claims thru the American courts.

Represents Germany.

We have it on good authority that Beer, Sondheimer & Company of New York City, which is now threatening to hold up the Canadian mines, is in reality Germany's mining and metal representative on this continent. A chart of the German metal buying organization thru the world is published by the federal trade commission of the United States and on which the name of Beer, Sondheimer & Company is prominently mentioned. German influence in the mining world has been very extensive. It was deeply entrenched in Australia, where agents of the Kaiser controlled the zinc production until the government very properly confiscated these holdings.

Considerable suspicion arose in the minds of mine operators in Canada when Beer, Sondheimer & Company were enemies of the empire. One beheld the United States entered the war. Prior to August, 1914, they had been heavy exporters to Germany of ores and metals in different stages of refinement. That they shipped great quantities of metals to Germany, such as lead, zinc, copper and nickel, was generally known, and later these shipments were verified when a black-list was published by the British Government with the name of this company appearing prominently as one of our enemies.

Now we encounter the peculiar paradox of this Hun-branded outfit about to launch action in the courts to obtain money alleged to be due as royalties from Canadian mining companies.

Called to Sped Up. Shortly after the outbreak of the

war, at the time when manufacturers were urged to convert their factories into munition works, it was up to the mines to speed production. The flotation process was installed by a number of companies, and it was decidedly more efficient than any method of metal recovery that had hitherto been tried for many ores. Flotation has therefore been a great deal to do with the largely increased mineral output, especially in view of the tremendous scarcity of skilled labor.

It naturally has always been the aim of Beer, Sondheimer & Co. to discontinue as far as possible the production of war metals in the United States and Canada. Being loyal to the Kaiser, they have worked with all their might and main, with the large coteries of pro-Germans in the United States, to help the fatherland. They did not lend the assistance towards the adaptation of the process which good business most assuredly would have justified. The motive is quite clear.

But American inventors entered the field. They built machinery improving the flotation process. Several large copper companies installed this flotation machinery, and the ratio of recovery of the metal content showed great leaps. But Beer, Sondheimer & Co. were not caught sleeping. They sought action against these copper companies, as they are now contemplating in Canada, claiming such big royalties that many other companies fearing on the installation of the process decided to wait until the litigation was settled. As a result many copper and other mines of the United States and Canada, who could profitably use the process and help relieve the shortage of war materials, are not producing the same quantities as they could if the alleged patents did not exist.

Flotation Process.

It is indeed interesting to note how the flotation process happened to be installed in some Canadian mines. At the beginning of the war history in Cobalt, samples were sent by Cobalt mines to the Minerals Separation American Syndicate Inc., which just a short time ago made a slight change in its name, but after testing the samples submitted, Beer, Sondheimer & Co., the German company which were sole agents of the ore, were so impressed by the flotation process that they decided to produce it.

It is interesting to note how the flotation process happened to be installed in some Canadian mines. At the beginning of the war history in Cobalt, samples were sent by Cobalt mines to the Minerals Separation American Syndicate Inc., which just a short time ago made a slight change in its name, but after testing the samples submitted, Beer, Sondheimer & Co., the German company which were sole agents of the ore, were so impressed by the flotation process that they decided to produce it.

The Cobalt mine managers were aware that the Minerals Separation American Syndicate Inc. had basic patents which they claimed covered the use of the flotation process in the United States, United States mines, which were then in the same position as the Cobalt mines are today, were fighting the German-controlled company in the courts. At the time that Mr. Callow's experiments were successful the

mine managers were on the point of dealing direct with the agents, Beer, Sondheimer & Co. of New York, but before any decision was reached the British Government had black-listed this company as an enemy of Empire. And now after paying no attention to the Canadian mining field for three years, this German outfit has shown the colossal impudence to do with the largely increased mineral output, especially in view of the tremendous scarcity of skilled labor.

The mineral output for the past two years has been restricted and the efficiency of mine operation considerably reduced by the withdrawal for war service of such a large proportion of the more highly-skilled labor and engineering supervision. Higher costs have tended to offset the advantages to be derived from higher prices of outputs and, in the case of gold, mining has become a distinct burden. Nevertheless, despite these handicaps of labor shortages and high costs of materials, the total value of metal and mineral production in 1915 was \$177,557,454, which compares with a production in 1914 valued at \$137,109,171, an increase of \$40,448,283, or 29.5 per cent. The flotation process played a big part in this splendid showing.

CORPORATION'S DEFENCE.

In connection with the charges mentioned above, The World has received the following letter:

Editor World: Your paper has recently made statements regarding the connections of our clients, the Minerals Separation North American Corporation, calculated to injure their business in this country, and we would ask you therefore to give suitable publicity to the following statements:

1. The inventions in question originated in Great Britain; the inventors being British subjects, and the patents thereon were for some years owned by a British company, Minerals Separation, Limited. The Canadian patents later became the property of the Minerals Separation North American Corporation, and in regard to this corporation Messrs. Williams and Pritchard, Messrs. Williams and Pritchard of New York, attorneys for the corporation, have wired the Canadian Mining Journal as follows:

"Statements Cobalt newspapers absolutely false and without foundation. Corporation is entirely owned and managed by British and American interests. Will send you a list of shareholders if you wish, which will speak for itself."

2. Mr. Henry D. Williams, of Messrs. Williams and Pritchard, has advised us to say that the Minerals Separation North American Corporation has no connection whatever with the royalties claimed by us. The charge that the royalties asked are too high, it can only be said that there can be no profit to the patentees unless the royalties are paid. The royalties are paid to the users of the processes as well. The patentees' interests therefore lie in having the invention used as widely as possible in Canada.

OUTSIDE PLACES WILL GET GOVERNMENT FISH

Dealers in Other Towns Will Get Shipments at Eleven Cents.

Government fish will be sold to retail dealers residing in other towns or cities of the province than Toronto at 11 cents per pound and the consumer will be required to pay 14 cents per pound. In Toronto the dealer pays 10 cents and the consumer 12 1/2 cents. The additional cost of shipment from Toronto are there incidental expenses are responsible for the higher price.

Complaints have reached the fisheries department that some dealers are selling fish at a higher price than is allowed by the government. "Any dealer that does that," said Hon. F. G. Macdormid yesterday, "will get no more fish from us. We have fixed the price at which the fish is to be sold, and the dealers must sell at that price or they can't get our fish. It is not fair to the public and it is not fair to the government who are trying to give the people cheap fish, for the dealers to raise the price."

The greater part of a small shipment of fish which reached the city last night was forwarded to London. As a result to supply for the Toronto consumers will be small today. Another shipment will arrive Friday evening which will be sold in the city. The popularity of the fish is apparent from the number of outside orders received by the department. More than 20 towns or cities have sent in orders for varying amounts of fish, the latest request being from C. N. Cledenning, mayor of Niagara Falls, who has ordered 1,000 or 2,000 pounds of fish to be sold to the residents of that town.

What Causes Wrinkles? What's the Remedy?

Stop to consider what produces wrinkles. Premature aging, malnutrition, etc., cause the flesh to shrink, lose its youthful plumpness and firmness. The solution? The fresh, firm, elastic flesh underneath doesn't fit tightly and snugly as it used to--it wrinkles or sags. It must be plain that to tighten the skin, make it fit the face perfectly in every place, will effectively remove the hateful wrinkles and bagginess. This is done by harnessing the power of the skin's own natural elasticity, by disclosing an outcome of powdered soap in a half pint of which alcohol and using the solution as a face wash. The ingredients you can get at any drug store. The results are surprising. The skin firm, elastic, and youthful. It is not as if it is affected at once.

WILLS PROBATED

Miss Ethel S. Staunton, a pupil of Monticello Seminary, Godfrey, Ill., where she took ill and died in March, left an equity of \$20,000 in 24 feet Bay Street, Toronto, and personal property of \$37,696.74 to her friend Hazel B. Halford, of Virginia, and \$10,000 to her friend and attorney, Charles P. Malsbary. The residue is bequeathed to another friend, Margaret Grayson, who was killed in France on July 22, made a will leaving \$6,000 in mortgages, \$1,237 in securities, and \$261 to his mother, Louise Riggs, who has been granted probate.

"In the event of my death, I wish the bulk of my personal effects to go to my brother, Sydney Clarke Bateman, of Ottawa, East," reads the will written on a page of the tax book of L. J. Bateman, 41017, missing since November 18, last, and now presumed dead, which disposed of the \$50 in personal effects, a mortgage of \$182, and \$231 cash, which composed his estate.

By a will to which she affixed her name July 22 last, the day before her death, Elsie Brown, a married woman, left the \$200 to her credit in the bank to her daughter, Jennie Brown, George Chapman has applied for the administration of the \$100 in the bank left by Noah Taylor, a laborer, who died in Toronto on September 11, leaving no will. The parents residing in Newfoundland inherit.

CONVICTION IS QUASHED.

Commissioner Boyd Finds Lack of Jurisdiction in Case of Vincent Davis.

The conviction of Vincent Davis, sentenced to nine months in jail by Commissioner Boyd for contributing to the cause of a three-year-old child becoming a "neglected child" within the meaning of the Ontario statutes, was quashed yesterday by Justice Middleton. The conviction was dated July 31, and at the trial evidence showed that Davis was a frequent visitor at the home of a soldier who had gone overseas in May 1916, and that from June, 1916, he had had improper relations with the mother of the child in question. The conviction was quashed on the ground of lack of jurisdiction.

Lord Northcliffe, head of the British war mission to the United States, was the guest of the members of the cabinet at the beginning of the afternoon at the Speaker's apartment, the party made a tour of the building. Among those present were Sir William Hearst, Sir Robert Falconer, Dr. G. H. Locke, Mr. Justice Maestri, Sir John Wilson, members of the cabinet and others.

WANT SHORTER HOURS.

Drug Clerks Looking for Reduction in Their Time on Duty.

A meeting of the drug clerks has been called for tonight at Victoria Hall to consider shorter hours, and will open at 11.30. It is anticipated that over 300 will be in attendance, and from the favorable reports of the employers, it is expected that a majority of the present hours will be reduced. The drug stores are at many points on 18 hours a day, and many of the clerks work from 12 to 14 hours, but the suggestion from the board of clerks is that the city be divided into four districts, and that one store in each district will remain open after nine o'clock, while signs will be displayed in other stores which will remain open.

WILL RAISE REGIMENT.

Russian Apparently Impressed With Simple Justice of Canadian Courts.

Samuel Borstein, when found not guilty by a jury in the sessions open by Judge Coatsworth, step by step, out of the prisoners' dock and to talk in Russian. Neither the judge nor the jury could understand what he was saying, but after an interpreter was obtained it was learned that he intended to raise a Russian regiment to fight for the allies. The charge arose out of a fight between the accused and an Austrian named Tenenbaum, who, Borstein claimed, abused him.

CHARGED WITH SHOPLIFTING.

Josie Chambers, 422 Church Street, and Etta Glass, 119 Jarvis Street, were arrested in Simpson's yesterday afternoon by Detective Strohm. They are charged with shoplifting and have been searched for a pair of hair brushes and several combs in their possession.

PACKING INQUIRY NOT PROCEEDING TODAY

Commissioner Clarkson is in Ottawa on Paper Price Inquiry--Will Resume Next Week.

The packing house inquiry will not be continued in the city hall today owing to the absence of G. T. Clarkson, one of the commission, who is at present in Ottawa acting on a paper price inquiry. The inquiry will be continued, it is understood, at the city hall one week from today. The accountants investigating the books of the Western Paper Company and Matthews-Blackwell, expect to finish their work this week, and the data charged herein early next week. When the inquiry is resumed W. F. O'Connor, chief of living commissioner, will be present.

TORONTO LEADS IN FOOD SAVING

Returns at Ottawa Show Great Reduction in Meat Consumption.

Ottawa, Oct. 3.—The following are the percentage reductions in the consumption of beef and bacon in hotels and restaurants reported for the month, Aug. 17 to Sept. 17, as compared with the consumption in the same eating places during the preceding month:

Table with 2 columns: Location, Percentage Reduction. Includes Quebec (28.2%), Montreal (49.4%), Toronto (20.8%), etc.

The combined saving for the month in these four establishments alone amounted to 84 tons of beef and 3-5 tons of bacon.

These, of course, represent only a small fraction of the saving in the public eating places of that city alone.

Yet these totals are sufficient to ration a whole division with beef for one day and a division and a half with bacon, using in both cases the liberal Canadian allowance.

A vacuum cleaner that can be placed upon and operated in connection with ordinary carpet sweeper has been invented.

BRITISH-CONTROLLED NICKEL COMPANY

Late in the Field, But Making Great Efforts to Develop Properties.

LOCATED NEAR SUDBURY

Immense Tonnage of Ore Estimated—Interesting History.

World Special Correspondent.

Sudbury, Ont. Oct. 3, 1917.—Almost at the eleventh hour the British Government has acquired an interest in the nickel deposits in this district, now universally conceded to be by far the greatest known in the world.

In 1891, during the premiership of Sir Oliver Mowat, a earnest effort was made by the Ontario Government to interest the government of Great Britain in a joint undertaking to establish nickel refineries and nickel steel works in Ontario with a view of securing a ample supply of nickel for military and naval use.

The government of Great Britain now controls the Dominion Nickel Corporation, Limited, having an authorized capital of \$24,500,000. Of this \$24,500,000 is in stock issued, and \$1,000,000 is in debenture stock.

Very satisfactory progress has been made in blocking out ore at the Murray and Elsie mines belonging to the company, but work has only recently begun on the smelter and refinery.

As stated, the British Government were late in entering the nickel field. Most of the desirable properties had been taken up and partially developed, and the only course was to buy out the existing owners.

The Ontario government purchased from the Murray and Elsie mines in February, 1884, for \$1 per acre. It afterwards fell into the hands of the Vivians, the big smelting company of Swansea, Wales, and they worked it at a loss from 1889 to 1894.

It is generally considered that the nickel-copper ore of the Sudbury district is worth at least \$1 per ton as it lies in the ground, and it is certain that over \$10,000,000, and it is certain that over \$10,000,000, and it is certain that over \$10,000,000.

The Timiskaming property, which, according to Balmer Nielly's report, is nearly thru as a silver producer.

Proven Ore.

Of the positive or proven ore in the Sudbury district the Creighton and the Murray have each about 10,000,000 tons.

Opinions Agree.

There is, however, no divergence of views on the question of depth, and the Murray is a comparatively small tonnage for such a large area.

Few Outcrops.

The outcrop of gossan or iron oxide on the Murray is about 1200 feet long and over 100 feet wide.

ISBELL-PLANT Mining Talks

CHOICE GOLD ISSUES

While the Wall Street market continues to be irregular, the scene of so many complexities and readjusting influences, the precious metals issues of the northern Ontario country are outstanding rocks of refuge.

Since the beginning of the year the gold mining managements of the north have undergone a most conservative change of mind. Deep-level operations have convinced them in both Porcupine and Kirkland Lake that the values are persistent and that profitable mining can be done to depths as great as are worked anywhere in the world.

The north country will one day have shafts right down to 2000, 3000 and 4000 feet, like those of the Lake Superior and the Butte districts, and will not be cursed with the terrible heat, which makes mining operations in the famous Comstock camp of Nevada, for instance, almost prohibitory at any depth in mine operations in the north country.

The Gowganda silver district, five miles west of Cobalt, is now coming in for a good deal of interest, and many mining scouts from Cobalt and engineers from New York and Boston are in the camp inspecting properties under option to various financiers and mine owners.

The gold operators of the north have no contest to make with hydro-metallurgical patents, being entirely removed from this strife. Their ores are reduced in crushing by either stamps (at Hollinger) or ball mills (at McIntyre), and are further treated by cyanide of potassium, the world's control of which market is in the hands of Great Britain, which gives the mines of the north first call upon the cyanide supply, the same as it does to the African and Australian gold fields, which are operated under the British flag.

So that now we have in the north a situation where every incentive is offered to deep and extensive underground exploration. Shortage of labor has been the only fly in the ointment, and the operators of the north have their work cut out ahead of them to go after the ores they know theoretically to be found at enormous depths in the bowels of the earth, where they are sinking their shafts.

Development of the last few months on the Adanac now make it practically certain that the property is actually coming into bloom as a regular shipper of high-grade ore. One ore shoot has been proven to be more than 100 feet long and 40 feet wide, and another ore shoot is being assembled for shipping. This ore shoot is on the 210-foot level about the same relative distance above the surface as the best ore on the Beaver and Timiskaming was found.

Conceding then that Adanac is actually coming into bloom as a regular shipper of high-grade ore, one ore shoot has been proven to be more than 100 feet long and 40 feet wide, and another ore shoot is being assembled for shipping. This ore shoot is on the 210-foot level about the same relative distance above the surface as the best ore on the Beaver and Timiskaming was found.

Work is proceeding on this vein at the rate of about 120 feet per month, three shifts of drillers pounding steadily away. The work is being done under contract and at a very minimum of expense. In the words of Consulting Engineer Neilly, "Every dollar is going underground, where it counts," and not into elaborate surface equipment, which can easily be supplied when the objective—silver in commercial quantities—is reached.

TRADING DU NEW YORK

Chief chemist, chief trader, and chief market maker, trading in the final hour of industrial, caused an unusual period of liquidation in the market.

Notwithstanding the Dome-Dome Extension flurry in the stock market, the ore zone in that section is proving up well and uniformly at depths.

People who allow themselves to be shaken out of dome and dome extension stocks are very foolish, in our opinion. They should be buying rather than selling.

The same statement may apply to other properties in that vicinity, such as West Dome Consolidated, Dome Lake, the Coniags, Anchorite-Maldens-Donald properties down in Deloro Township, etc.

In Kirkland Lake similar conditions as to development policies prevail. The managements of that camp are now centering attention upon developments, rather than production, although the Lake Shore and the Kirkland Lake companies will be added to the producing column in 1918.

The United Kirkland Management is sinking its No. 1 shaft, which will be continued on the recommendation of mining engineers Alderson and Baker, down to 100 feet, where crosscutting and drifting will be begun.

At West Shiningtree, Mr. George R. Rogers, the president and general manager of the Wasapika Gold Mines, Limited, locally known as the "Ribble claims," has completed shaft No. 1 down to 35 feet, where hand work has to be discontinued, and is working in a permanent ore-bearing formation. Mr. Rogers expects to land his mill equipment onto the Wasapika during the fall and winter months and have the mill running by next summer.

WASAPIKA. At West Shiningtree, Mr. George R. Rogers, the president and general manager of the Wasapika Gold Mines, Limited, locally known as the "Ribble claims," has completed shaft No. 1 down to 35 feet, where hand work has to be discontinued, and is working in a permanent ore-bearing formation.

NEWRAY BIG STRIKE. THE STRIKE MADE ON THE NEWRAY PROPERTY AT PORCUPINE WITHIN THE PAST WEEK DESERVES SPECIAL MENTION. IN DRIFTING FOR 75 FEET ON THE HANSON VEIN ON THE 400 LEVEL, SOME 1100 FEET FROM THE SHAFT IN THE CROSSCUT, THE MANAGEMENT HAS OPENED UP AN ENORMOUS BODY OF HIGH-GRADE MILLING ORE.
