GRATEFUL—COMFORTING.

**EPPS'S COCOA.**

BREAKFAST—SUPPER.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette.  
Made simply with boiling water or milk. Sold only in packets, by Grocers, labelled thus:

*Commercial Summary.*

Merchants, Manufacturers and other business men should bear in mind that the "Journal of Commerce" will not accept advertisements through any agents not specially in its employ. Its circulation—extending to all parts of the Dominion—renders it the best advertising medium in Canada—equal to all others combined, while its rates do not include heavy commissions.

—HAY is selling from the schooners at Indian town for \$6 and \$8 per ton. The demand is poor.

—MR. S. A. McCaw, manager of the Lake of the Woods Milling Company, is authority for the statement that the Manitoba wheat crop, as it appears at present, is the best ever seen in the country.

—THE charge against E. B. Morden, of Galt, laid by the London Life Insurance Co., for the embezzlement of some of the company's money, has been settled by his making restitution.

—THE Mutual Cheese Factory and Creamery Insurance Company, has been incorporated at Ogdensburg, New York.

—A GREAT deal of cordwood was got out last winter along the St. John and Kennebecasis rivers. Very little of it has been sold yet. The demand for Rockland kiln wood is slight and the price very low.

—A VERDICT for \$500 with interest was recently rendered against the New York Morning Advertiser in favor of the heirs of a driver named Brisay, who sued to recover under one of the accident coupons clipped from the newspaper. This accident insurance scheme has now cost the paper \$18,000.

—THE Commonwealth Mutual Fire Insurance Co., of Boston, which have been struggling along since last January endeavoring to collect the assessment which it levied on its policy-holders, has at last been forced into the hands of a receiver. The court has appointed William B. Stevens to the position, requiring a bond of \$50,000. This has been complied with.

The Page Wire Fence Co. of Ontario Ltd.  
WALKERVILLE, Ont.

—At Sault Ste. Marie the operators of the Canadian canal have been ordered to report for duty. This indicates that the lock will be in operation in thirty days.

—The Canadian Rubber Company are preparing a shipment of 30,000 pairs of shoes for Australia. Orders have also been received for many thousand feet of hose and belting and it is expected a large trade can be worked up.

—The lace season has not come up to expectations in most directions, but just now there is a demand for Valenciennes, which has cleaned the market and still left a good many buyers unsupplied.

—GLASGOW cables state that the Scotch oil producers have entered into a three-year contract with the Standard Oil Company, the effect of which is to advance the price of candles and scale the price of oil.

—The present value of the registered tonnage of Canadian vessels is \$26,088,720. Last year 326 vessels, having a tonnage

of 21,243, were built in Canada. There are now on the registry books of the Dominion 7,245 vessels, representing 869,462 tons.

—ACCIDENT insurance policies have become so liberal that one company is said to be considering the payment of a portion of the "principal sum" for "loss of appetite by external, violent or accidental means."

—LATHAM, Alexander & Co., have received replies from 2,141 planters, cotton commission merchants, cotton brokers, banks and bankers making advances to planters, showing "the acreage of cotton planted this year is 17,558,000, a decrease of 2,751,000 acres from last year's—about 13 1/4 per cent."

—An important decision relative to the duty on diamonds going into the United States has been handed down in which the judge reverses the stand taken by the board of general appraisors and holds that diamonds cut, but not set, are not to be admitted free of duty, but are taxable at the rate of 25 per cent. ad valorem.

**E. S. STEPHENSON & CO.,**  
Engineers and Machinists, - ST. JOHN, N.B.

—SALMON-FISHING is reported unusually good along the Saguenay coast. A spell of strong, northeast wind, which occurred some time ago, is the cause of the abundance of fish. At Tadousac fifty salmon were taken at one spot during one tide. At Point au Pic, where salmon are rarely caught, the fish are plentiful.

—MR. P. D. ARMOUR says: "It is to be a great year for the farmer, and ultimately, for that reason, a great year for the merchant. High prices are going to more than compensate for any loss in wheat, and the country is going to get the benefit in a moderate way of rather light crops abroad. There were never such prospects for the Northwest."

—THE anthracite coal agents have agreed to mine during the present month three days out each week, which would result in the product of about 3,500,000 tons. This is the same amount as that mined during May. Prices, although forming a subject of much discussion, were not altered, the May schedule being agreed upon as a good basis for June sales.

—INSURANCE companies are interested in the fact that the low prices quoted on fire crackers in conjunction with the fact that that the season of consumption is at hand has awakened the interest of buyers, and within the last few days a good business has been done. Stocks are reported light.

—It is the intention of the Government to reduce the permanent corps by one-fifth of their present strength, as a measure of economy, to permit expenditure in directions which will be more useful. The strength of the schools of infantry is now one thou-

sand. It will be reduced to eight hundred. This will meet the cost of drilling two hundred companies of volunteer militia.

—THE prospects of an additional representative being given to the Northwest Territories are believed to amount almost to a certainty. The members from the West are urging its claims to two additional seats; and feel certain that it will at the least get one. If this is carried out Western Canada, which now sends a contingent of fifteen to Ottawa, will, after the next general election, send eighteen, as Manitoba gains two by the redistribution.

—CROPS in this district, writes a correspondent at Morden, Man., are looking fine and much in advance of the past few years at the present season of the year. The flax crop, of which there is a large area in this neighborhood, is looking well. It was feared at one time that quite a large amount of the early sown flax was injured by the frost of three weeks ago, but the damage if any is very slight.

—A PENNSYLVANIA sect refuse to shut tramps out of their barns, on religious principles. The tramps take advantage of this liberality and overrun the county in swarms during the tramping season. They are allowed for the most part to sleep in the hay of the barns, both singly and in bodies. Fewer barn fires occur in this section of the State than in any other, and insurance companies are forced to admit that theirs is the only experience on record in which tramps decrease the risk of the insurer.

—A CORRESPONDENT at Gretna, a Manitoba town near the Dakota boundary, writes as follows; "The wheat market con-

tinues to boom. The ruling price is 85 cents, with a tendency still to rise. At Neche, just across the boundary, wheat is 65 cents. American farmers, bringing their grain and selling it on the Gretna market, after paying the customs duty on wheat of 15 cents a bushel, still realize a profit of five cents per bushel over the ruling price in their markets in the United States on the south side of the boundary line.

—It is now said that the examination of the American Fire Insurance Company of New York, shows a 15 per cent. impairment. The reserve was underestimated \$193,000 in the company's statement. The board of directors are strong and are determined to put the company on its feet. The capital of \$400,000 will either be cut down or else fresh capital will be raised. The company has its plant, which is valuable in connection with its continuance in business and there is no reason that its future should not be prosperous.

—ALTHOUGH the mackerel fishing season is barely opened indications are said to point to a small catch, giving a supply for consumption not exceeding that of 1894. The Gloucester fishing fleet has been reduced to about fifty vessels, and so far the reports received from it have not been encouraging. The receipts of mackerel at Boston so far amount to about one-half of those for the corresponding period last year. Bad weather has been against the Irish mackerel fleet so far. However, so far as the catch on the New England coast is concerned, it is too early yet to form definite conclusions as to the final results.

—WITH some amendments the bill to incorporate the Canadian Order of Foresters has passed the Banking and Commerce Committee. A clause authorising subordinate courts to maintain sick and funeral benefit funds was struck out as not a necessary part of the measure. Another clause, providing that the order shall be subject to the provincial laws not inconsistent with the char-

# LYMAN'S FLUID COFFEE

It is fragrant, delicious, and can be prepared in a moment.

It is Economical because there is no waste, as no more need be prepared at a time than is used. 2nd. It requires less sweetening than other coffee, as the bitter part is extracted during process of manufacture. 3rd. One cupful gives more satisfaction than two of any ordinary coffee.

Buy a bottle from your druggist or grocer, and you will never want any other.

ter, was eliminated. At the request of the incorporators, it was enacted that the order shall make a deposit of \$50,000 before obtaining its license.

It will be observed that in 1891, 1892, and 1893 the average trading surplus, after payment of all outgoings, was but a narrow one; and that in those years it would have been impossible to maintain the company's handsome dividends without a liberal contribution from interest account. On the results of last year, however, it has been found possible to pay dividend and bonus of 32s per share, without aid from any other source of revenue beyond the margin produced by the company's ordinary operations.

—INSURANCE now takes a prominent part in fashionable marriages, for when American girls marry foreigners of distinction they are expected to pay roundly for the privilege in the shape of "settlements." For instance, when the Duchess of Marlborough (Mrs. Hamersley) was married to Lord William Beresford, as he has a personal income of only £2,000, she "settled" £10,000 a year upon him. As she only has a life interest in the Hamersley estate there was but one way to secure the permanence of this annuity and that was by insuring her life for a corresponding principal.

—GENERAL Superintendent Whyte has gathered reports from all C.P.R. agents as to the condition of crops from Red River to the Rocky Mountains, and the verdict is unanimous that the crops were never so far advanced at this date in any previous year, and the prospects are good for an early and abundant harvest. The frosts of last month, according to the testimony of farmers, and they should be the best judges, have been a benefit,

having strengthened the roots of wheat and made them stool out better than if there had been no check to the early vegetation.

—IN January 1890 Welsh manufacturers were charging 16s 6d a box for Bessemer coke tin plate. The price was about 17s when the McKinley tariff was passed. The price ranged between 17s and 18s a box, from October until May, 1891, but declined as soon as the new duties went into force to 14s. The price in Wales was reduced practically the amount of increase in the duty here. By the end of the year 1891 the price had fallen to 12s 8d; in 1892 it fell to 12s; in 1893 to 11s; in 1894 to 10s, and the same plates are now selling in Wales for 9s 1½d a box.

—THE report of the Liverpool & London & Globe for last year presents an experience which is in striking contrast to that of its three predecessors, as may be seen from the following comparative figures:

Year.	Premiums.	Losses.	Percentage.
1891.....	£1,146,793	£ 989,706	66.87
1892.....	1,586,196	1,029,568	64.94
1893.....	1,628,225	1,070,585	66.75
1894.....	1,618,128	902,241	55.75

—U. S. CONSUL-GENERAL Penfield, at Cairo, has made a report on the prospective cotton crop of Egypt for the present year, which demonstrates that the Nile country is becoming a serious competitor in this staple. A conservative estimate places the present area at 1,075,000 acres, with a possible crop, under favoring conditions of 1,050,000 bales American standard. Shipments of Egyptian long stapled cotton to the United States continue to increase, and for the commercial year 1894-95 will amount to 47,500, or equivalent to 71,000 bales of American standard. The shipments ten years ago were less than 4,000.

## FOR SALE in FLORIDA.

A FERTILE TRACT OF LAND of 20 to 25 acres between and partly covering the margins of Lakes Florida and Kildee, lying within 1 1/2 miles of Interlachen on the Florida Southern Railroad, and about 17 miles due west of Palatka. Oranges, peaches, sweet potatoes, cotton and all sub-tropical fruits and plants are grown in the vicinity. An orange garden, neglected hitherto owing to distance from owner, is on the place. Returns from a grove of 3 acres at Green Cove Springs, some 23 miles north east, show an aggregate of \$3,000 to \$5,000 a year. The lakes abound with fish. Climate remarkably healthy. Interlachen is a winter resort for many Northerners troubled with lung affections. Several Montreal people permanently reside there.

MONTREAL, FRIDAY, JUNE 14TH, 1895.

### CURRENT EVENTS.

The ceremonies attending the unveiling of the monument to the late Sir John A. Macdonald naturally evoked a number of eulogies upon the dead statesman by Sir Donald A. Smith, the chairman, by His Excellency, Lord Aberdeen, and by those who had been his comrades in the political arena, as well as by those who

had consistently opposed his views. Each speaker dwelt upon some different phase in Sir John's character. Sir Mackenzie Bowell eulogised his political acumen and marvellous powers of organization. Hon. Geo. E. Foster dwelt upon the lessons of toleration and mutual forbearance he always strove to inculcate, while Hon. Mr. Chapleau spoke more particularly of the "spiritual," the magnetic side of his character, and of the affection and esteem in which he was held. Sir Henri Joly de Lotbiniere, one of his life-long opponents, paid a graceful tribute to his qualities as a statesman, and Sir Adolphe Caron, Hon. J. A. Ouimet, and Hon. John Costigan bore testimony to the many good qualities of the dead leader. The ceremonies attending the unveiling were both appropriate and impressive, and the secretary, Mr. Joseph H. Jacob—to whose untiring energy and administrative skill their success was largely due—was deservedly congratulated on the result of his efforts, both by His Excellency in the course of his address, by Sir Mackenzie Bowell and by the others.

The announcement that, thanks to the aid of the Russians, a French syndicate financed by the Banque de Paris et des Pays Bas and the Credit Lyonnais, had succeeded in securing sole control of the Chinese preliminary loan of \$80,000,000 in gold, naturally caused some comment in German and English financial circles. It appears that Russia exacted 1 per cent. per annum, the privilege of placing the loan, and an agreement from China not to float another loan for six months, as the price of her guarantee, and thus, while the Chinese Government pay 5 per cent. interest, the Parisian syndicate receive only 4 per cent. Immediately upon receipt of the news of the Russian "coup," the German bankers communicated not only with the Imperial government, but with the leading English financiers as to the prospects of securing a portion of the main loan of \$150,000,000 to \$200,000,000 which must shortly be placed upon the market, and received prompt assurances that the government would intervene to obtain for them a share in any of the further financial arrangements China may require. The present \$80,000,000 loan guaranteed by Russia, only covers the extra indemnity to Japan for the surrender of the Liao-Tung peninsula. For the larger loan the resources of France and Russia are manifestly inadequate. They must have outside assistance, and this can only be obtained from England, who now exhibits an inclination to boycott the Liao-Tung loan; much to the disappointment of the Banque de Paris, which confidently expected to float its share of the preliminary loan in the London market. For this reason they are anxiously sounding English bankers to know on what terms they will be willing to handle portions of the loan. German financiers are also seeking to form an entente with the English houses on the question, as the political importance of the loan is keenly felt, and it is already uncomfortably apparent to the French houses that they have suffered themselves to become the catspaws of the astute Muscovite for purely sentimental reasons. The Russian government will draw one per cent. on \$80,000,000 annually for a guarantee which, in the present condition of Russian finances, is practically worth nothing, and they themselves will be called upon to take the risk of the transaction. They, of course, hoped to be able, in their turn

## ASSESSMENT SYSTEM.

## MUTUAL PRINCIPLE

## Mutual Reserve Fund Life Association

Home Office, cor. Broadway and Duane St., New York.

**40 MILLION DOLLARS : 40  
SAVED IN PREMIUMS :**

The total cost for the past 14 years for \$10,000 insurance in the Mutual Reserve amounts to less than Old System Companies charge for \$4,500 at ordinary life rates—the saving in premiums being equal to a cash dividend of nearly 60 per cent.

AGENTS WANTED.

to unload the loan upon London, at all events for what they paid for it; but the present outlook is that they may be mistaken.

In estimating crop conditions people are too apt to take into consideration only our own crops, and those of the United States, and to neglect the returns of those countries which, from their propinquity to the centres of consumption, are necessarily of greater importance than our own. Thus the reports of damage to United States crops are apt to sway the local market to an extent out of all proportion to their real importance. It must be remembered that from all the great grain growing countries of Europe accounts are favorable to a large crop. Russia will certainly be up to the average; if not somewhat over. French crops all look well; although somewhat backward. Belgium promises a good yield. In Germany more moisture is wanted, and it is feared the damage to rye in the early spring cannot be repaired. In Hungary wheat is satisfactory; rye is an average; and barley a good medium crop. In the angle of the Danube and Tisza, called the granary of Hungary, crops are in excellent condition, and fall wheat is in an exceptionally favorable state. Both barley and rye are in good shape. In Asia Minor reports are favorable, and the only exception are a few districts where the moisture has been excessive. In Tunis and Algeria the outlook is far more favorable than was anticipated, and all the northern nations look for good yields.

The plethora condition of the money market in Great Britain is the reason why British investors are disregarding the threatened terrors of free silver coinage and the unpleasant results of American investments in the past, and are still purchasing on this side of the water. They are forced to put their money out somewhere; for the rate of discount in London has fallen steadily until it is now under one per cent. on the open market, and the Bank of England rate has been at its minimum of 2 per cent. for over a year,

Loans on call practically command next to nothing, for money for thirty days is eagerly lent at  $\frac{1}{4}$  per cent. The next Chilean loan of \$10,000,000 was subscribed for ten times over, and the only hope is that the Chinese loan may relieve the plethora of gold. Two and three quarter per cent. consols are now 106 for money and 106  $\frac{3}{16}$  for the account, while  $2\frac{1}{2}$  per cents have touched 105; which is equal to 126 for the old three per cents. In fact so serious has this overstock of money in the market become, that one of the leading English financial papers points out that Metropolitan three per cent. consols, with a semi-Socialist Council in power, have risen to 111, and it is exceedingly doubtful, if the India Office had the nerve for a great operation, and a Mr. Goschen to manage it, whether it could not float a really large two and a half per cent. loan at par. The municipal corporations, large and small—sometimes very small—are raising money at less than 3 per cent., and every kind of "trustee stock," including especially railway debentures, is running up within measurable distance of consol price. In fact there are bankers in London who believe that, what with the trustee laws, and with the immense volume of modern accumulations as compared with modern debts, two and a half per cent. consols, in the absence of great wars, or of any totally new kind of speculation, will within a very short period touch 110, thus reducing the "regular" or barometric interest for secure capital to less than  $2\frac{1}{4}$  per cent. Nor is even that rate likely to be permanent. It is not a matter of guesswork, but, of calculation, that unless the people take to wasting their money in masses on a great war, or on some unprofitable speculation, like the Panama Canal, Mr. Goschen's prophecy, made so many years ago, must come true, and the interest on passive capital securely invested be reduced to 2 per cent.

A good deal can be learned, says the *Saturday Review*, of the progress of shipbuilding in the last twenty-seven years by comparing the *Terrible* which was launched in 1868 with the *Terrible* which took the water recently from the Clydebank yard of Messrs. Thompson. The old *Terrible* was a first-class frigate, a paddle-vessel, unarmoured, which was thought to be doing wonders if she steamed 12 knots, and whose heaviest gun was, if we remember rightly a 68-pounder. The *Terrible* of to-day is a first class cruiser of over 14,000 tons. She can steam 22 knots and, though unarmoured, her machinery and magazines are protected by a steel-arched deck of great strength, while her quick-firing guns would alone prove a match for the whole Channel Fleet that sunned itself in Belfast Lough in 1869.

#### U. S. NATIONAL BANKING.

As the time is at hand when the usual annual statements of our banks are published, and reviews made of their business for the past banking year, some extracts compiled from the report of the Comptroller of the Currency respecting the condition of the national banking interests in the United States may be considered in order. In other years the Comptroller has been in the habit of giving the numbers of failed banks, and the causes respectively which led to the failings, but in the year 1893 this was not done owing doubtless to the fact that so many failures occurred the

report would be unduly lengthened. In 1894 the same practice was followed. We cannot, therefore, review however briefly, the causes of the various failures, of which twenty-one occurred during the year ended October 1894.

There are 3,756 national banks in the United States, with an authorized capital of \$673,000,000 owned by 288,000 shareholders. This gives each bank an average of \$179,000 capital and 76 shareholders. The total of loans and discounts was \$2,007,000,000. They had \$1,728,488,000 in deposits, \$172,332,000 in circulation and a cash reserve of \$422,000,000.

During the year 50 banks, located in 22 states, were organized, with a capital of \$5,225,000. This is the smallest number of banks, with the minimum amount of capital organized, in any year since 1879; a clear evidence of depression and stagnation of business. Of the banks organized, 27 were in the northern and eastern states, 10 in the southern and 13 in the western.

Within the year in question 79 banks with a capital of \$10,475,000 passed out of the national banking system by voluntary liquidation, and 21 with a capital of \$2,770,000 failed and were placed in the hands of receivers. Ten banks which had failed in 1893 resumed business. The number of banks which liquidated during the year was the largest in any year during the existence of the system, except in 1885, besides which many active banks reduced their capital. The cause being, probably, reduced earnings and contracted business.

While the average percentage of net earnings on capital and surplus since 1869, when the law was passed requiring banks to publish their earnings and dividends, is 8.2 per cent. and of dividends 6.6 per cent. net earnings for the past year have only amounted to 5.6 per cent. and dividends to 5 per cent. This is the smallest percentage of dividends ever paid, and the percentage of earnings falls below all years except 1878 to 1879. The Comptroller remarks, "The continued stagnation in commercial circles, with its attendant business embarrassments, has in some instances, consumed surplus and undivided profits, and even demanded substantial assessments on shareholders, to provide for losses. Banks find great difficulty in keeping expenses down so as to earn a dividend. There is too much competition amongst national banks—too many banks in small places and too much expense of management." The co-operative system should be more applied to banking.

The banks which failed had total liabilities of \$9,409,000. The number of failures during the year was 0.56 of 1 per cent. of the total number of banks, the capital 0.4 of 1 per cent. and the liabilities 0.27 of 1 per cent. The failures occurred in the following states: Oregon 4, Kansas 3, Nebraska 3, 2 each in Texas and Missouri, and one each in New York, Pennsylvania, Alabama, Michigan, Colorado, S. Dakota and Washington. Since the National Banking system was established 267 banks were placed in the hands of receivers. Of the failed banks, 12 have been restored to solvency, leaving the assets of 255 to be distributed by forced liquidation. The affairs of 130 of these have been fully closed. The total cost of administering the assets of failed banks was 6 per cent. of the amount realized. The average

realized from all the banks was 71.5-7 per cent. Shareholders of failed banks which paid in full had \$1,077,000 repaid them, while assessments against shareholders which did not, realized \$10,119,000, i.e. shareholders had to pay about ten times as much as they received. The average time required to complete the liquidation of the 130 banks finally closed was 5 $\frac{2}{3}$  years; the longest time for any bank was 18 $\frac{3}{4}$  years, and the shortest 4 months and eight days. As experience is gained in the liquidation of banks the periods of receiverships are gradually being shortened, the average term for the first ten years prior to 1874 being 8 years, 1 month and 17 days, for the next decade 6 years, 3 months and 14 days and for the last decade 2 years, 10 months and 24 days.

The number of women employed in national banks is 382. These are probably typewriters and stenographers, and their average yearly salary \$485. The number of shares held by women is 1,733,732, and the value \$130,681,000.

THE EASTERN TOWNSHIPS BANK.

The district which relies mainly for banking facilities on the Eastern Townships Bank is one of the oldest settled parts of the country. It is especially typical of Canada, as its industries are agricultural, lumbering, and manufacturing. The two former have been for a prolonged period sources of wealth, or comfort, the latter has been mainly developed in recent years, at Sherbrooke, which is the capital city of that section, and Magog a thriving industrial centre. The Townships constitute a very self contained community, and the local bank is essentially a local product, which deriving its resources from the section in which it operates, utilizes those resources for sustaining industrial enterprises needing capital for their development, and sustentation. The position is an exceedingly healthy one in an economic sense, as there is marked mutuality of interest in those associated with this bank. Hence we find a natural growth of its business, and a steadiness in its prosperity which is shown by the operations last year, a time of universal depression, having been as profitable as the average. The bank cleared enough to pay its usual 7 per cent. dividend, with a surplus of \$40,000 to add to Reserve Fund—which is nearly half the Capital—and \$8,433 to carry on to credit of Profit and Loss. The growth of this bank in last 10 years is shown by following table.

	1885.	1889.	1895.
	\$	\$	\$
Deposits.....	1,882,375	2,279,130	3,011,048
Discounts.....	3,165,752	3,935,009	5,128,000
Rest.....	375,000	450,000	720,000

It will be noticed how exactly the loans kept step with the advancing deposits, each having increased two thirds since 1885. The Circulation failed to respond to this movement, save very sluggishly for reasons to which we have alluded in other articles. The capacity of every district for absorbing note issues is limited, and once the maximum is reached the absorption ceases automatically. The bank however has notes out to over 50 per cent. of the limit, which is a good average. The report speaks of work being plentiful in the Townships and labor scarce, while we know from direct sources that the mills and factories are well stocked

with orders, which are better stock than goods. The Eastern Townships Bank is a good specimen of a bank growing out of the needs of a district, and rendering it invaluable service. Mr. Farwell, the general manager, is much to be commended for the steady but sure way in which he has built up the business in his charge to its present proportions and stability.

CANADIAN LIFE INSURANCE.

The abstract of life insurance effected in Canada during the year 1894, which appears in our next issue in tabulated form, is a continuous record of progress so far as most of the Canadian companies are concerned, the only striking exception to the general rule being the Sun, whose amount of new policies written fell from \$5,493,109 in 1893 to \$4,687,484 in 1894. The others have all made considerable gains, and the Canada Life continues to stride ahead of all competitors. It now has insurance to the amount of \$61,347,495 in force, or three times as much as its nearest American rival, the New York Life, and has increased its premium income during the year from \$1,694,356 to \$1,803,438 while its total of new policies is \$711,000 larger. Most of the other Canadian companies also show gains; the record of the leaders for the year being as follows:—

	Premium Income.		New Policies.	
	1893.	1894.	1893.	1894.
Canada Life.....	\$1,694,356	\$1,803,438	\$4,044,200	\$3,756,382
Confederation.....	796,505	804,797	3,768,823	3,292,663
Federal.....	236,377	265,504	1,997,633	1,703,700
Manufacturers....	247,698	257,497	2,133,969	2,273,300
North American..	390,439	425,135	2,526,362	2,719,923
Ontario Mutual...	512,518	527,131	2,730,250	2,577,200
Temp. & General.	116,494	129,199	1,755,000	1,870,725
Sun.....	871,165	878,932	5,493,106	4,687,484

In all, the Canadian companies show increases of \$279,032 in their premium income, of \$580,927 in the amount of their new policies, of \$10,035,974 in their net amount of insurance in force, and a decrease of \$5,730 in the amount of policies become claims.

On the other hand, eight out of the fourteen British life insurance companies doing business in Canada have written no new policies during the year, and six of them, the Edinburgh Life Association of Scotland, London Assurance, Reliance, Scottish Amicable and Scottish Provident have abandoned the Canadian field for good. The Standard wrote \$1,618,067 worth of new business, the London and Lancashire \$848,500, and the British Empire \$722,319. But the Star only wrote \$21,535, the North British \$1,795, the Commercial Union \$2,000, while the Royal, and Liverpool and London and Globe did not write a dollar's worth, and the net amount in force with British companies at the close of 1894 was only \$33,911,885.

The American companies show an increase of \$3,495,122 in amount of new business written, and of \$2,034,739 in the net amount in force. Here, again, five companies have dropped out of the field. The Connecticut Mutual, Germania, National Life, North Western, and Phoenix Mutual, wrote no new business in 1894. Indeed, it is only the astonishing figures of the industrial plan of the Metropolitan which enable our cousins across the line to make any showing at all. The new Canadian business of the Aetna has fallen off \$9,000, that of the Equitable \$515,000, and that of the New York Life \$2,055,159. On the other hand the new policies of the Metropolitan have grown from \$694,187

to \$6,132,190, the Mutual Life from \$2,163,336 to \$2,748,461, and the Provident, and Union Mutual, both show small gains.

In fact—of the total amount of \$308,061,436 of life insurance in force in this country Canadian companies now carry \$177,511,846, or nearly 58 per cent., the American companies \$96,637,705, or 31 per cent., and the British \$33,911,885 or 11 per cent. This shows that Canadian insurers have confidence in the integrity and stability of their home companies and that the activity and enterprise of our local managers are bearing good fruit. In fact the Canadian companies are fully the equal of their rivals in energy, fertility of resource, and attractiveness of their forms of insurance, and excel them in their knowledge of the requirements of the home field. Thus, they have been able to gradually gather three-fifths of the whole of the life insurance of Canada into their own hands, and it is possible that the close of 1895 may see them in control of a still larger percentage.

#### COMPARATIVE MORTALITY.

There is no insurance topic upon which so many contradictory statements have been made, or from which so many varying conclusions have been drawn, as that of the comparative death rates of abstainers and non-abstainers. Each of the parties to the discussion have accused their opponents of manipulating the statistics available in the interest of their particular views, and there has been a general impression prevalent that the data given were not reliable. Now, however, insurance men are in possession of the facts elicited by a careful six years examination of both classes of risks made by Mr. Emory McClintock, actuary of the Mutual Life of New York, who undertook in 1889 to investigate the death losses of the company for each class of its customers, and has just completed his labors. As Mr. McClintock's researches cover a large number of lives, and have evidently been conducted in a spirit of absolute impartiality, the deductions to be drawn from them are of the utmost value to the companies as well as to those who make the principles of social economy their study.

As was to be expected, the abstainers make the best showing from an insurance stand point. In the first year the difference between the abstainer and the non-abstainer is 27 per cent. of the maximum expected loss, in the second and third years it is 26 per cent; but curiously enough, it drops to only ten per cent., and in the case of American lives to only eight per cent., in the fourth. There are several conclusions to be drawn from this. In the first place the fact that the percentage of loss falls within 90 p.c. after the fourth year seems to indicate that the excessive mortality during the first three must be ascribed to undisclosed bad habits at the time of entrance rather than to the use of stimulants in moderation, or otherwise it would remain close to the opening figures. We have therefore the difference between 80 per cent. of the maximum expectation of abstainers and 88 to 90 p. c. of non-abstainers to consider. A portion of this must be ascribed to the intrusion of a class of persons whose dissipated habits at the time of their entrance predisposed them to disease and death, a second portion to the small class who drank only in moderation at the time of their entrance and subsequently acquired habits of intoxication, and

a third to that class who, while never approaching habits of intoxication, habitually take more alcohol daily than the amount found to be digestible by the medical authorities. On the medical testimony collected by Mr. McClintock these three classes fully account for the difference of 8 to 10 per cent. in the mortality of abstainers and non-abstainers at the close of the first four years, and besides this it has to be remembered that the class of non-abstainers necessarily reckons among its ranks a much larger proportion of persons naturally weak and vicious who would on the average die earlier than others, even if alcoholic beverages were unknown.

For all these reasons Mr. McClintock is inclined to make the general deduction that the habitual use of alcohol within the medical limit is not injurious in itself, and that the principal danger incurred by that habit is the risk of falling into intoxication, although there may possibly be a tendency to disease in some instances because the medical limit for the safe use of alcohol is necessarily ill-defined, owing to the difference in constitutions, and because those who drink at all are apt to exceed that limit. Finally Mr. McClintock holds that the safety limit for beer, measuring by alcoholic contents, must be placed at a lower level than either wine or spirits, which would seem to imply that there exists an injurious element in beer apart from the alcohol it contains. The general deductions to be made, therefore, are that while it is not safe to say that the excess of mortality among non-abstainers is due to their habits, since the coincidence of lowered vitality and drinking habits may be quite as much due to bad risks taking to drink as to good risks becoming bad on account of drink, there is certainly evidence enough to show that the consumption of alcohol does injury to a sufficiently large number of individuals in each class to make the death loss distinctly higher on the average, and therefore that temperance in their habits must be counted a favorable factor in judging proposals from intending insurers.

#### SUMMER JACKETS.

Short coats or jackets will be worn a great deal this summer and autumn, with plain skirts and blouse bodices, either as part of a costume or as a separate garment. They are made in colored as well as neutral tinted cloths. All the new models are extremely short in the basques, which are very much undulated. The shortness of the basque is their great novelty; for the rest they are very varied in form. There is the usual double-breasted coat, with neat collar and lapels, the former faced in velvet; the double-breasted coat closed up to the throat and finished up with a turn-down collar; the open jacket with shawl lapels faced with faille, fitting almost tightly to the figure, but open in front and with rounded basques; the cut-away coat, fastened on the bust with one or two buttons; besides others partaking more or less of one of these styles. Pockets on the basques are the fashion, and many have also small breast pockets.

As for the sleeves, they are almost without exception of the leg-of-mutton pattern, the fullness reaching somewhat below the elbow, and set into the armhole in regular pleats around two-thirds of its circuit. Some few have small gauntlet cuffs, but plain ends to the sleeves are preferred, and white cuffs are sometimes worn over them, when, of course, the collar corresponds. Fine collars and cuffs of cambric, with narrow Valenciennes lace and insertion, are preferred by Parisians to starched linens.

No coats of intermediate length are to be seen, but for coaching and for the road quite long coats of the redingote form are provided. They are made very wide in the basques, which fall in flutes, like that of an ordinary dress skirt, to the ground, so as to cover the toilet entirely. There is no absolute rule, but most of these garments are made double-breasted and buttoned with a double row of buttons half way down the skirt, coat collar faced with velvet, and more or less pointed lapels.

The sleeves are fuller and more exaggerated in form than those of the short coats, and generally have a couple of large buttons on the outer seam. These coats, being designed for a special purpose, are made of leather-finished cloth of a very light drab or cashmere grey tint; the latest novelty in such cloths being parchment cloth which partakes of the hue as well as the texture of parchment. The bone buttons are always chosen an exact match to the cloth.

An attempt has been made to bring into fashion long redingotes of brocaded silk, made somewhat after the same pattern, but, instead of being double-breasted, finished with a collar and bows of ribbon or a fichu of mousseline de soie. They are very handsome, but are never likely to become very popular on account of their cost, and they are only made of rich figured silks with rather dark grounds.

#### JOHN OSBORN, SON & CO.

William and Robert A. Osborn, doing business under the firm name of John Osborn, Son & Co., wine and liquor merchants in New York and in this city, have made an assignment, although only two years ago they claimed to be worth \$1,350,000, and in January last they stated to the mercantile agencies that they owned their business building valued at \$80,000, that the \$379,000 of the F. P. Osborn estate was still in the business, that they held collateral to the extent of \$150,000, and that they were worth \$100,000 outside of the business altogether.

The assignment followed the unpleasant notoriety given to the firm by the revelations as to the transactions and manner of living of Charles S. Osborn, who was ejected from the firm in November last. He was then senior partner, and was stated to have overdrawn his account by \$44,000. His examination as a judgment-debtor elicited a number of unpleasant details which naturally reacted against the firm, and it was shortly afterwards announced that the two present partners had acquired his interest. This is denied by Col. F. J. Crilley, the manager of the business and the representative of the estate of F. P. Osborn, the elder brother of the present members of the firm. Mr. Crilley states that the two Osborns have no right to make an assignment, and that he is in possession of the assets of the firm and will continue to retain them until the interest of the F. P. Osborn estate in the firm shall be satisfied. He states that William and Robert Osborn have not a dollar in the firm now, although they had an interest in the past. Mr. Crilley said that the brothers had each inherited a fortune from their grandfather, Francis Pares and that Frances Pares Osborn has been the only one to keep his fortune and to add to it. He left property at his death which was estimated to be worth \$700,000, and it was only because Francis Pares Osborn's will provided that his interest in the firm should remain, that it was possible to continue the business. William and Robert had been unable to sign checks or do anything else in the name of the firm, he said, since July 14, 1894.

No doubt the proximate cause of the assignment was the extravagance of Charles Osborn and the free use he made of the firm's credit in order to obtain money to gratify his taste for expensive living; but all the Osborns have been noted for extravagant tastes, and for some time past it has been noticed that they have been slow in settling their private accounts and that the business was gradually dwindling. The two Osborns claim that their present trouble was caused by the high valuation and attempted severance of the interest

of the late Frances Pares Osborn in the firm, and losses sustained by depreciation of the firm's investments. Nearly a year ago, in order to avoid annoying and disagreeable disputes with the executors the survivors of the firm virtually surrendered the direction and control of the business to a manager selected by the executors, who has since directed the policy of the business. While this gentleman has undoubtedly used his best efforts for the benefit of those concerned, the firm does not appear to have prospered since the arrangement was made. The assignees are unable, in the absence of a full examination of the accounts and property of the firm, to state the extent of the liabilities and assets.

In this city the liabilities of the firm are practical nil. Their principal business was the agency for the Piper-Heidsieck champagne, and for a brand of London dry gin; but they also did a general business in wines and liquors which seems to have gradually fallen off during late years in sympathy with the sinking of the firm in New York. In fact they have been gradually winding up their Montreal business for some time past, and only a few weeks ago one of their officers sold out a heavy line of goods to a local firm.

It is now understood that an arrangement will be arrived at between the F. P. Osborn estate and the two Osborns whereby the business can be continued on the old lines.

#### NEW WESTMINSTER NOTES.

Our New Westminster, B.C., correspondent writes that the Westminister and Vancouver Tramway has been sold to the Consolidated Railway and Light Co. mostly made up of Provincial capitalists. The rumour is that they intend to re-sell as soon as they can do so advantageously. The promoters are talking of building a steam railway from Steveston, a small town almost on the mouth of the river, to Vancouver. The object of this is to get a shorter communication with Victoria as this would be a saving of three hours in the run. A good sign exists in the fact that a number of Swedish emigrants—who are good settlers—are settling on land between here and Vancouver. There is abundance of land awaiting opening up and the hardy, thrifty farmer is sure to get along. A new manufactory has lately commenced operations, called the Tuas Lake Ice & Cold Storage Co. Ltd. Their principal object is to land fish on the Eastern market in a well-conditioned state. There is a branch also in Vancouver, The Brunette Saw Mill Co. Ltd., have proved conclusively that the Fraser River is navigable to sea-going vessels as far as New Westminster, if not farther. There have been a considerable number of ships loaded with lumber there and all have successfully reached the open sea again. Several new canneries have been erected this spring, but the salmon run for the next two years is likely to be small, as the run increases and decreases with considerable regularity. The next two years will show a gradual decrease, then the third year will be large, the fourth almost as good and then come the two poor years. Generally the reckoning is done by starting with the bountiful year as number one, thus bringing in the leaner years as Nos. 3 and 4.

#### TYPE-SETTING MACHINERY.

One or two of our daily contemporaries in this city have again taken up the idea of type-casting and type-setting machinery. The agents in Windsor or Detroit appear to have lost none of their preliminary persuasive powers. Perhaps they needed the rest. The engagement of the machines newly ordered is understood to be largely experimental. Any one wishing to take a low-rate trip with them should address this office. One of the machines in this office has what are called New Improvements; the other two are about equally serviceable. Will sell one or two at little over half the reduced price asked by the manufacturers, guaranteed in good order.

## LA BANQUE NATIONALE MANAGEMENT.

In connection with our article in the 7th inst., referring to the management of La Banque Nationale, it is but fair to Mr. Crebassa, the new general manager, to say that his acceptance of the position was determined upon on terms amply satisfactory to himself. For this we have the best assurance. The bank advertised for a manager for the Head Office only.

It may be timely to say here, that a judicious system of pruning has been determined upon, Mr. Crebassa being determined to "saw to the line, let the chips fall where they may," and that the Inspection department is undergoing a thorough course of reform. The Board is complete with the exception of one director who is likely to be appointed from Montreal.

—A. S. WORKMAN, clothing dealer of this city, has succeeded in effecting a settlement with his creditors at 25c in the dollar. He was in trouble in the fall of 1892, when he obtained an extension of time which he has since paid off—P. Slavin & Co. general storekeepers, Deseronto, have assigned. Slavin compromised at Napanee where he had been in business for 19 years, in 1875. Subsequently went to Vancouver and returned to Deseronto in the fall of 1892. His capital was too small to compete with the larger houses.—Anthimo Lemieux general storekeeper of L'Islet, has succeeded in settling with his creditors at 40 cents in the dollar, cash—Alex. Henderson, jeweller, of Arnprior, got an extension last winter from his principal creditors. He finds himself unable to meet the first payment and has assigned. Liabilities will not exceed \$1,700—Chas. May, general storekeeper of Dunnville, Ont., has assigned. He has done only a very small trade of late—Beuthner & Johnson, general storekeepers of Winnipeg have assigned. They bought out A. Gibson in 1892 and had then some means but they seem to have given credit a little too freely—H. J. Cooper succeeded J. S. Virtue in his tobacconist's store, Toronto. He had no previous experience and very little means and consequently his present assignment was a foregone conclusion—Bonard & Boyer started as painters last December in this city. They seem to have tried to do too much and hence they are not able to meet their engagements—F. G. Lajoie, jeweller of this city has assigned with liabilities of \$3,000. He carried too heavy a stock for his capital.

—THE British Columbia Crockery Co. a very small concern with a very large name, was started in New Westminster, B.C., last fall by Bertha V. Johnson and Geo. Cunningham jr. They had very little means, and trade proving dull they have had to assign—A. N. Ouimet, general storekeeper of Farnham, already noted has compromised at 25 cents in the dollar, cash—Leon Falardeau, shoe dealer of this city, has filed a consent to assign. He has been falling behind for some time past—Macfarlane & Patterson, wholesale men's furnishings of this city, whose suspension was chronicled in our last issue, have now assigned. Liabilities, direct \$26,000, indirect \$17,000—Edmund Bennett, a Glencoe undertaker, has assigned. He only started there last summer.—Little & Morrow, harness makers of Shelburne, are trying to settle at 60 cents in the dollar—F. E. Karn started a tobacconist's store in Toronto last winter. He was burned out shortly after, and started again with the assistance of a New York firm. He has not been able to make the store pay, and has consequently made an assignment.

—EDWIN CROSBY, sash and door manufacturer, at Yarmouth, N.S., was formerly a general storekeeper who changed to his present venture some years ago. He has not found it profitable and now assigns owing \$3,200.—Mary L. Jenkins, trader of Trinity, Nfld., has succeeded in settling with her creditors at 30 cents in the dollar—Angus McNaughton, general storekeeper of Huntingdon has secured a settlement at 50 cents in the dollar, cash—R. Smardon & Son, boot and shoe manufacturers of Three Rivers, whose suspension was recently noted in these columns have succeeded in settling at 25 cents in the dollar, cash.—S. W. Cuthbert, grocer of this city is offering 40 cents in the dollar to his creditors. The wholesale house with whom he principally dealt is now in liquidation, and he finds it impossible to go on further without a settlement. It is likely he will give up business.—W. P. Smardon, boot and shoe dealer of this city, has assigned owing to the failure of his principal suppliers. He owes, directly and indirectly \$22,000. At one time he did a large trade, but of late it has fallen off considerably.

—JAS. R. KYLE, shoes, this city, has assigned. He obtained a partial extension from his principal creditors but it was not sufficient relief to enable him to pull through—H. Legault, who bought out a very small grocery in this city last summer has assigned, owing \$600—J. W. Sharp, banker of Dresden, has suspended. He was formerly manager of the Bank of London in that place. When the branch was closed up, he started on his own account as a private bankor, and was believed to be doing well. Hence his suspension is a surprise—V. Raparie, a restaurant keeper in this city has assigned owing \$3,000—C. & M. Mills, general storekeepers at Iroquois, whose troubles have already been fully chronicled in these columns, have succeeded in compromising at 50 cents in the dollar, cash—Hugh Lovelace, cigars, London, is offering 50 cents in the dollar, payable in two and four months on liabilities of \$4,000. He shows assets of \$2,600.

—WE regret to learn that Mr. Evan Fisher Ames, who has been ailing for some weeks lately, as already noted, passed calmly away yesterday afternoon at his residence on Belmont Park, this city, surrounded by sorrowful members of his family, his relatives and connections. The deceased gentleman, whose years extended beyond the limit of the Psalmist, was among our most successful manufacturers, but had retired lately from active business pursuits. He endeared himself to all who knew him by his kind and courteous demeanor. His sorrowing widow, son and daughter have our deepest sympathy in their bereavement.

—THE following list of United States Patents, granted to Canadian Inventors, May 28th, 1895; is reported for this paper, by James Sangster, Patent Attorney, Buffalo, N.Y.—Rufus P. Redmond, and W. Wythe, Toronto, combined whip-socket and reinholder; George H. Millen, Hull, match-box for advertising. Granted June 4th, 1895—James H. Byrne, assignor of one-half to G. W. Booth, Toronto, hand fire-extinguisher; Frederic P. Thompson, Fredericton, dust-guard and oil-saver for car-axle boxes; Helen B. Leadbetter, Kincardine, supplemental stopper for ink bottles; William Hardin g, Orangeville, wrench.

—ACKNOWLEDGMENTS are due a large number of subscribers whose remittances this week are accompanied by kind expressions of appreciation. Among them we may mention C. H. Mitchell, Halifax; J. F. Grant, New Glasgow; E. D. Davidson & Sons, Bridgewater; W. Beatty, Parry Sound; A. Miller, Pembroke; T. Rousseau, Nicolet, &c. We are encouraged to greater efforts by the congratulatory words of our friends and hope long to deserve their plaudits.

—PROPERTY is the name of a new enterprise in journalism, the first number of which, that for June, is just out. The editor and proprietor, Mr. Henry Bragg, was for some years connected with the Montreal agency of the *Empire* of Toronto. The new aspirant deals with land, buildings and shares, and in the issue before us handles the *Empire* and its promoters with barest fists.

—THE sender lately of a package of books by express, addressed to the editor of this journal with the memorandum "Books borrowed from your library herewith returned" and a 25c note enclosed, will kindly send his name. The borrowing is beyond recollection.

—A CORRESPONDENT at Taylor Village, N.B., writes that farmers in that section are putting in good crops and that the creameries and cheese factories are being well patronized. Considerable hay was held over from last year and the quality and promise of the new crop is excellent. If the harvest turns out well trade is bound to improve.

—A CORRESPONDENT at Almonte writes that the late rains have improved the crops, and the prospects as they exist at the present indicate a good harvest in that vicinity. Many farmers who held on to their wheat have taken advantage of the recent advance in price to sell out at a good profitable figure.

—THE Ville Marie Bank will open a branch at Port Neuf about the 20th of this month. It will be in charge of Mr. J. H. Theoret, at present ledger keeper at head office.

—At a recent meeting of the Directors of the Bank of Ottawa, the resignation of the Hon. George Bryson, Senior of Coulonges, Que., as a member of the Board, was submitted, and reluctantly accepted, Mr. Bryson having, on account of advancing years and consequent infirmities felt impelled to press his resignation on the other directors. He has been a director of the bank since it commenced business in 1874, and a name so long and favorably known as his among the people of the Upper Ottawa must have been of material value and strength to the bank in the past. A special meeting of the Board was convened to fill the vacancy, when the Hon. George Bryson, junior, M.L.C., son of the retiring director, was elected.

*Meetings, Reports, &c.*  
EASTERN TOWNSHIPS BANK.

The annual general meeting of shareholders was held at their banking house in the city of Sherbrooke, pursuant to notice, on Wednesday, 5th June instant, a good number of shareholders being present.

R. W. Heneker, Esq., the President, took the chair.

Wm. Farwell, the general manager of the bank, was elected secretary; J. P. Wells and Wm. Morris were elected scrutineers of votes.

Minutes of the last annual meeting were read and confirmed after which the president, on behalf of the board, submitted their

REPORT.

In meeting the shareholders at the close of the 35th year of the bank's operations, the directors have the pleasure to report a fairly profitable year's business, with a somewhat brighter prospect in the near future.

The Balance Sheet and Profit and Loss Statement for the year ending the 15th of May last, now submitted herewith, show the following results, viz.:

The net profit after making provision for all expenses of management, interest to depositors, grant to the pension fund and all bad and doubtful debts, amounts to..... \$158,401.35  
Add thereto the amount carried forward from the previous years..... 5,126.53

An available profit will be seen of..... \$158,527.88  
This has been applied as follows, viz.—  
Dividend 3½ per cent. paid 2nd January, 1895..... \$ 52,406.67  
Dividend 3½ per cent. payable 2nd July, next..... 52,496.67  
Carried to Reserve Fund..... 40,000.00  
Balance carried forward..... 13,534.54

\$158,527.88

The Reserve Fund thus increased, now amounts to \$720,000—within 2 per cent., or \$80,000, of one-half the Capital Stock of the bank.

The directors feel, therefore, justified in claiming for the bank a fairly profitable business for the year, despite many adverse circumstances. There is an increased net return over the previous year of \$18,000, partly applied in increased profits carried forward and partly in the amount credited the Reserve Fund.

Referring to the adverse circumstances above alluded to, the shareholders must have noticed the great falling off in the general trade of the Dominion during the past year, due in part to the want of purchasing power arising from a low price of produce of all kinds; to the stagnation in trade amongst Canada's best customers—Great Britain and the United States, to a stoppage of a large proportion of the great public works which give employment to the people; as well as to other causes.

In 1893 the returns of the two great railways—Grand Trunk and Canadian Pacific, began to show a falling off in traffic, which became more and more apparent in 1894. This loss of traffic was even more noticeable in the great lines of the United States, giving evidence of stagnation in trade. Happily there are now signs of improvement. Trade has taken an upward turn, a more hopeful feeling is manifest in almost all branches of business, and it may be fairly assumed that the tide has turned with a fair prospect of renewed prosperity, if only the coming harvest should correspond with the wishes of the people. The spirit of economy has prevailed throughout the Dominion, noticeable even in the Dominion and local Governments as well as in municipal affairs, and every business corporation, firm, and private dealer has been acting with caution and care. This is the true basis of prosperity. The directors feel justified, from these considerations, while expressing satisfaction at the fair state of prosperity enjoyed by the bank during time of difficulty, in looking forward to even a brighter outlook in the future.

Most of the Eastern Townships industries show increased activity. In agriculture there has been an extension of the dairy industry. In manufactures the mills are running full time, although complaint is still made of low prices. The lumber business presents a favorable contrast to last year. In mining there is, at all events, no falling off, and new workings, new applications of scientific skill and more enterprise are apparent and should produce good results. There is abundance of employment for an increased population, and trade should, therefore, prove more active and remunerative.

The directors, at the request of the business men in the village of Magog, have opened a branch at that important seat of textile manufactures, under the management of Mr. E. P. Olivier, from the head office.

In conclusion, the directors have to report that the several branches have been inspected as usual, and that the whole staff, by their zeal and assiduity in the discharge of their duties, deserve the thanks of the shareholders.

Respectfully submitted.

R. W. HENEKER,  
President.

The president then addressed the meeting, touching upon the various items of the statement, the business of the bank and the country generally, and closed by moving the adoption of the report.

The thanks of the shareholders, on motion of Lieut.-Col. King, seconded by Wm. White Q.C., were voted the president and directors for their watchfulness and successful attention to the interests of the bank during the past year. On motion by A. T. Foster, seconded by Wm. Morris, the thanks of the shareholders were voted to the general manager, managers, and other officers of the bank for the application, and the faithful and zealous manner in which they had performed their respective duties to the institution.

The election of directors was then proceeded with, which resulted in the re-election of old board.

The meeting then adjourned.

PROFIT AND LOSS STATEMENT FOR THE YEAR ENDING MAY 15TH, 1895.

Balance at credit of profit and loss, carried forward from May 15, 1894.....	\$ 5,101.53
Profit of head office and branches, after deducting charges of management, appropriation towards Pension fund, interest due depositors and ample provision for bad and doubtful debts.....	153,426.35

WM. FARWELL,  
General Manager.

THE NEW COLD STORAGE COMPANY.

It is evident that the new system of Cold Storage lately referred to, is to be successfully introduced in this city. The efforts set afoot by Mr. McGregor, the principal promoter of the enterprise here, and his clear explanations have favorably impressed a number of our enterprising citizens, and there is every prospect that the new warehouses will be finished at an early day, probably in time for early fall shipments. Such an establishment in Montreal could not fail largely to benefit this port, which has heretofore, to a large extent, been handicapped by the greater facilities afforded shippers via Buffalo and in New York, as already explained in these columns, and by which route a very large and growing proportion of shipments from Ontario and the west have been directed. It is not only our shipping companies, but everyone who handles produce of any kind, who are likely to suffer from its exposure to, or from want of protection from summer heat, etc., but every business man in the community who is interested in the object which the promoters have in view. Mr. McGregor and our fellow-citizen, Mr. Johnson, are both terribly and commendably in earnest, and it only requires a fair degree of encouragement on part of our moneyed men to bring about the good results which are sure to follow upon this introduction in Montreal. The announcement and prospectus printed in another column should be worthy of individual as well as public attention.

GRAND TRUNK RAILWAY COMPANY.

Return of traffic week ending June 8th, 1895:

	1895.	1894.
Passenger Train Earnings.....	104,047	102,058
Freight do. do. ....	217,816	205,256
Total do. do. ....	\$321,863	\$307,314
Increase 1895. \$14,549.		

LEGAL RECORD, &c.

Week ended June 13th, 1895.

The following is a record of transactions and cases in our Canadian courts of law, comprising Writs Issued and Judgments rendered for sums of \$250 and upwards, and chattel Mortgages and Bills of Sale for sums of \$500 and upwards.

WRITS ISSUED, PROVINCE OF QUEBEC.

Financial.

Thursday, June 13th, 1895

Next week will be bank meeting week. No less than twelve of the chartered banks will meet their shareholders before our next issue—including the Merchants, Commerce, Toronto, Imperial, Ontario, Hamilton, Jacques Cartier, Union, Hochelaga, Ville Marie, Standard and Traders—and the addresses of the general managers will give a tolerably succinct resume of business in their respective localities. Judging from those whose statements of earnings have already reached us, there will be few additions to Rest account this year. The majority of the banks have earned a slight percentage over their dividend payments; but that is all. The Imperial which paid dividends of eight per cent. and a bonus of one per cent., earned 10.8 per cent. on its paid up capital; the Merchants, which paid eight per cent., earned 9.19; the Hamilton, which also paid 8, earned 8.80; the Commerce, which paid 7 per cent in dividends and transferred \$10,000 to the pension fund earned 7.35 per cent.; the Hochelaga earned 11.26 per cent. and was able to carry \$50,000 to the reserve; the Jacques Cartier earned 9.06 per cent.; and the Ville Marie 7.60 per cent. The experience of the other banks is doubtless on similar lines.

The reason is, of course, the unusual cheapness of money all over the world. In London money can be had for thirty days at 1/4 per cent., and three months bills are discounted at 5/8 percent. In New York call money is one per cent.; and for time loans the rate is 1 1/2 to 2 per cent. up to four months, and 2 1/2 to 3 per cent. for five to seven months loans. Commercial paper runs at 2 1/2 to 2 3/4 per cent. for endorsed three months bills, 2 3/4 to 3 1/4 for prime single name paper, and from that up to 5 per cent. for fair single name bills. In this market money is 4 1/2 per cent. on call, and 6 1/2 to 7 per cent. for discount. Silver is quiet and unchanged. The anticipation of the big Chinese loan, and the strength of the bull syndicate, keeps the price at 30 1/2 d in London. In New York the price for commercial bars is 66 1/2 to 67 1/2 and for fine government silver 67 to 67 1/2 c.

Sterling exchange is again strong on the selling of American stocks in New York on foreign account and limited offerings of bills; but owing to the easy money market there is no fear of the export of gold, although rates are now on the usual export basis. Posted rates were 4.89 for sixties and 4.90 for demand. Actual rates were 4.88 1/4 to 1/2 for sixties, 4.89 1/4 to 1/2 for demand, 4.89 1/4 for cables, 4.88 1/4 for commercials, and 4.88 for documentaries. In this market exchange is strong and higher. Between banks sixties were 9 13-16 to 15-16, demand 10 to 10 1/2, cables 10 1/4 and New York funds 1-32 discet. to par. Over the counter rates were: Sixties 10 to 10 1/4, demand 10 1/2 to 1/2, cables 10 1/2 and New York funds 1/8 to 1/4 premium.

An active week, with the "bulls" in full control, can be reported on the Stock Exchange. The hot weather, and consequent increased receipts, sent Street Railway stocks up from two to five points on sales of 11,593 shares. Montreal Street, old stock, closing at 202 1/4, new stock at 201 1/4, and Toronto at 88 1/4. Cable was also active, and some 2,000 shares were sold at a range of from 159 to 161, closing at 160 1/2. The investment demand for the banks was good; but the industrials were neglected, the only transactions being 72 shares Montreal Cotton at 128, 70 shares Dominion at 100 to 101, and \$1,000 in Can. Colored Cotton bonds at 99 1/4 and 75 shares at 60 1/4 to 62 1/2. The following are the transactions of the week as per Chas. Meredith & Co., stockbrokers:—

MONTREAL WHOLESALE MARKETS.

Thursday Evg., June 23th, 1895.

The improved tone noticeable in general trade continues, and what changes in prices are made are all in an upward direction. Failures are few, money is coming in fairly well, and, while there is in no sense a "boom" or rush for goods, orders generally are of a better calibre as country merchants become more confident as to the outlook. The crops certainly look remarkably well at present, and the warm wet weather has brought vegetation forward very fast; so that there is every prospect of an excellent harvest if no untoward circumstances intervene. But no one is inclined to discount the future, and in consequence, although the feeling is decidedly more hopeful, most houses are still operating in the same cautious conservative spirit that appeared during the period of depression. Dairy produce shows signs of improvement, although the movement in cheese is still largely of a speculative character. Butter is quiet, as the very warm weather prevents any free movement and there is an absence of export enquiry. But prices continue firm and well maintained, while the decreasing supplies of eggs have cleared the market and rendered holders views stronger. Iron and hardware show an improved demand and the discount on both wire and wire nails have been reduced. Paris green is very strong. Linseed oil is scarce and expected to go higher. Flour and grain have apparently reached the top of the grade, and both show signs of weakness. It is now evident that the invisible supply in farmer's hands is commencing to come forward and that it is larger than was anticipated. Oats have fallen nearly two cents per bushel during the week, and Ontario millers are ready to cut rates on flours. Groceries are steady under a fair average demand. Teas are quiet, sugars unchanged, and molasses again a cent higher. Sole leather has advanced once more owing to the increased cost of dry

## S. DAVIS & SONS,

The Largest Cigar Manufacturers in the Dominion.

hides. Hay is a little weaker. There is less doing in cement and arrivals are large. Coal oil and salt are unaltered. Dry goods have been active owing to the extremely hot weather and the rush for seasonable fabrics has been unprecedentedly large. In fact the position of trade generally is satisfactory and the improvement in the situation noted last week has been fully maintained.

**ASHES.**—Receipts have been heavier this month. Pots are easier, but still bring \$4.10 @ \$4.15 for first sort, a few brls. excessively light tares sold at a trifle less. Seconds wanted at \$3.80. Pearls have been selling at \$5.50 @ \$5.65 but are now more plentiful and will likely decline. Receipts since 1st January 763 brls pots 180 brls pearls. Deliveries since 1st January 735 brls pots 131 brls pearls. In store 12th June at 6 p.m. 102 brls pots 52 brls pearls.

**BUTTER, CHEESE AND EGGS.**—The change to very hot weather has prevented any free movement in either butter or cheese and the market is extremely dull. There is no export enquiry for butter whatsoever and what trade is doing is solely to city retailers and jobbers to satisfy the local demand. Sales of finest creamery, strictly fresh, have been made at 15½ cents, but the ruling price of the week has been between 14½ and 15 cents. In dairy goods little or nothing has been doing and business has been confined to an odd call for some really choice lot, nearly equal to creamery. We quote 14 to 15c for Townships and 11 to 13 cents for Western. The receipts of eggs are falling off largely, and the market is becoming well cleared of stock. There is a better feeling and best lots move off freely at 10 cents, with culls at 8 to 9 cents. In cheese the situation is largely nominal. No real business is doing, as English offers for straight. June cheese are only 36s 6d, which is equal to 7½c and no really fine Ontario can be got at that figure, and as the stock of old cheese in London amounted to 80,000 boxes it is hardly necessary to say that the English market is not an anxious one. We quote the spot range at 7¾ to 7½ for Quebecs and 7½ to 7¼ for Ontarios. At Utica the market has an appearance of steadiness. Such buyers as have been through the country at all, back up the statements of salesmen to the effect that grass is thin, pastures are poor, cows are getting short rations, with no extra feed in the barn, and there is bound to be a short hay crop this season. Cows have already done their best, and are going back instead of improving or holding their own. It is understood that some buyers

are taking cheese to hold, in the belief that it has seen its lowest notch and must advance before a great while. In New York, receipts are large and in generally better condition than last week, and with the higher cost in the country most holders are firm in their views, and some indifferent about urging their favorite marks, preferring to hold until later in the week, in hopes of doing better, and some lots have gone into cold storage. Small size full cream are in good home trade demand and fancy are firmly established at 7½c. Very few part skims have arrived as yet, but there is a firmer feeling and receivers expect to do better with choice lots when they arrive.

**CHEMICALS.**—Cream of Tartar and tartaric acid are weak as some lots are offering from second hands below manufacturers prices. Bromide of potash is firmer. Crude brimstone is strong. White sugar of lead is somewhat steadier and brown is quiet and unchanged. Dyes are quiet, but in good position. Gaubier, catch and indigo are unaltered. Nut galls are a shade higher for blue Aleppo. London mail advices to date of June 1st report as follows: Shellac continues steady, with a small spot trade in T N orange, livery to good, at 126s to 130s. For delivery the market is extremely dull, with sellers, T N August, at 137s. Rapeseed in less demand. Brown Cawnpore, May-June, to London, 33s 3d old terms, 33s 6d, sellers, Amsterdam, Yellow Guzerat, to London, 84s 6d; May June 84s 6d for Dunkirk; Ferozepore, July-August, to Hamburg and Antwerp, 32s 9d. Ravison to London, 13s 6d. Nitrate of soda—The Permanent Nitrate Committee quote cargoes off coast or due at 8s; do for prompt shipment, 8s 1½d. Poppyseed firm. New crop Bombay, June, 41s 6d. Chemicals—Acids—Citric, 1s 1½d to 1s 2d; oxalic, 1½d; tartaric foreign, 11d; English, 11½d. Cream of tartar, first crystals, 69s; powdered, 71s to 72s. Alum, lump, 5s 4½d to 5s 6d; powdered, in barrels, 15s 3d. Benzole, 50 per cent. 11d, and 90 per cent. at 11½ to 1s. Bleaching powder, Union price, £7. Borax, crystals, £10 10s; powdered, £20 10s. Potash, chlorate, 4½d; bichromate, 4½d to 4¾d; hydriodate, 11s 5d to 11s 9d; prussiate, 8d; lead, 12s 3d, landed. Saltpetre, English refined, in barrels, 22s 6d. Soda, ash, 1½d; crystals 38s, ox ship; caustic, 70 per cent. £7 10s to £8. Sulphate of copper, £15 to £15 10s. Ammonia, 24 per cent. £9 10s. Quinine, 1s 0½d. Sugar of lead, 25s; English 31s.

**CEMENT.**—Business has been somewhat quieter during the week. The arrivals are unusually heavy, comprising 5,200 barrels English and 9,100 barrels Belgian, and this has tended to make buyers hold off. No large sales are reported, but there is a fair demand in medium sized lots at \$1.80 to \$1.90 for Belgian and \$1.90 to \$2 for English. Fire brick are in firm demand and strong at \$15 to \$21 as to quality and brand.

**DRY GOODS.**—The very warm weather has sent in a number of sorting orders for light summer fabrics for which the demand is now exceptionally heavy, and both town and country travellers are doing well. Orders for fall goods are also coming in fairly freely, and the certainty that any change in values must be upwards renders wholesale houses firm in their ideas and unwilling to make any concessions. Money is coming in much more freely than for some months past, and very few houses complain of their remittances, while advices from England all predict higher prices. The city trade, is brisk in summer fabrics and the warm spell has materially helped sales in suburban districts. Manufacturers report a fair volume of orders in sight, and the general outlook for the trade is hopeful. It is reported that the Montmorenci Cotton Co. is severing its connection with the cotton combination on the 31st August next and that it will furnish grey cottons to the trade on

its own account on and after 1st September next. It has fixed no new schedule of prices as yet, and it is believed that it will adhere to those of the larger mills.

**FRUIT.**—The first car lot of California fruit consisting of 800 boxes peaches and 1000 boxes apricots sold on this market this week. The fruit was in good condition and very fair prices were realized; Peaches bringing \$1.85 to \$2.20 and apricots \$1.20 to \$2.10 per box as to quality. A few lots of Western Canadian and Montreal strawberries have put in an appearance but they are of wretchedly poor quality as yet. New Jersey berries are coming along abundantly and are selling at 14 to 16 cents per box and Canadian berries should be in a week later. The shipment of 6000 boxes of lemons from this market to the Western States has cleared up stocks here and prices have already reached \$4 to \$5.50 per box and, if the hot weather continues will be \$6 next week. Oranges sell at \$1.25 to \$1.75 for half-boxes and \$3 to \$4 for boxes. A car of California navel oranges is also in the market. Pineapples are again very scarce and have shot up to 15 to 20 cents apiece. Bananas are less plentiful, and we quote \$1 to \$1.75 per bunch as to quality.

**FLOUR AND GRAIN.**—As stated in our last issue both flour and grain prices seem to have reached their apex for a while. Manitoba grades are still firm at top figures, but the feeling in Ontario grades is easier and holders would shade our figures to make sales, as it is felt that straight roller is higher than it ought to be in comparison with Manitoba flours. There is a growing belief that there is more grain in farmers hands waiting for higher prices than has been reckoned on, and that it might come out with a rush if prices took a tumble and the farmers become convinced that the top had been reached. This has naturally made millers more confident of supplies and hence they are more ready to sell, even if they have to make concessions to do so. We quote Manitoba patents \$5.15 to \$5.50, strong bakers \$5 and straight roller \$5 to \$5.25. Bran and shorts are again weak and lower. Bran has fallen to \$14 and feed to \$16. Oatmeal is easier in sympathy with the decline in oats but \$4 to \$4.05 is a fair range for standard. In the grain market the principal feature is the fall in oats. Sales of No. 2 are reported at 45¼ to 45½ and it is said that two cars sold under this figure. Peas are nominally 75c afloat, but buyers and sellers are apart. The first car of new wheat of the season arrived in St. Louis on Saturday from Coffeyville, Kan., and was graded No. 2. The wheat was auctioned off and sold at 95c a bushel. This is unusually early for new wheat. Cable advices to the Board of Trade are as follows: Cargoes off coast, wheat steady; maize quiet. Cargoes on passage and for shipment, wheat steadier; maize quiet and steady; English country markets steady; French dull; Liverpool spot wheat, quiet and steady; demand poor; spot maize, dull; demand poor; Minneapolis first bakers' flour, 21s 6d. Liverpool futures—Wheat quiet; 5s 11½d June, 6s July, 6s 0½d August, 6s 1d September, 6s 1½d October; maize, quiet. 4s 6d June, 4s 6½d July, 4s 6½d August, 4s 7d September, 4s 7½d October, 4s 7½d November; Wheat in Paris, 19.85 June, 20.15 July; flour do., 45.65 June, 45.60 July.

**FISH.**—There is only a slow jobbing demand for fish and our prices are largely unchanged. The hot weather cut business off and only a few sales are recorded of Cape Breton herring at \$4.50 and Labrador at 25 cents less. No. 1 green cod is offered at \$4.50, large at \$5.50 and draft at \$7. Salmon run at \$10 to \$11 for British Columbia and \$8 to \$9 for Labrador. Fresh fish continue quiet owing to the hot muggy weather. Salmon are coming in now from the Lower Ports but prices have not dropped below 15 to 16c per pound. We quote cod 5c, haddock 4 to 5c. Blue fish

9 to 10 cents. Lobsters are in full supply and easier at 8 to 10c. Halibut 8 to 10c. Shad by the barrel 15c per lb. Roe shads 25 to 30c each, buck shads 20c.

**GROCERIES.**—A fair distributing trade can be chronicled in groceries. No one will buy one cent's worth more than he requires, but stocks are pared down so closely that retailers have to keep buying to remain abreast of the current demand. This renders country traders confident. What they buy is going out week by week. What they have is worth every cent they paid for it, and in some instances perhaps a little more. The outlook for both crops and prices is good, and although rates for dairy produce look low this season compared with last, we must not forget that last year's figures were unusually high ones and that consequently exporters are shy of repeating the experience of 1894. Trade in teas has slackened considerably owing to the warm weather when milk always largely takes the place of tea and coffee. The C.P.R. steamer, now due, has 1500 packages of Japans for this country and 3,000 for the States and we quote common to medium Japans at 14½ to 17c, good medium to fine, 17½ to 20c, choicests 22½ to 25c and fancy from 26 to 36 cents. Congou runs from 10 to 35 cents for common to very finest. Sugars are unchanged and quiet. Stocks in second hands are not yet exhausted, and the refiners have not yet

reached their opportunity. Granulated is at 4¼, and low grade yellows at 3¼ and these prices will probably continue until the supply in second hands runs out. Molasses rule strong, and at a meeting of the Guild another advance of 1c per gallon was agreed on. Barbados are now 37c, and Porto Rico 36c, in spite of the fact that a sale of 200 puncheons of Porto Rico has recently been made at 33 cents. French prunes have advanced in the primary to 20 francs for the four sizes; due to a speculative movement on rumours of a short crop and in California holders have concluded to carry over the old stock in the belief that the coming crop will be light. In this market the demand for dried fruits is very limited and practically nothing is doing in Valencia fruit, owing to bad packing. We quote common Valencia's 2½ cents and selected 4 cents. Currants are dull. Prices may be placed at 4c for Patras, 5 to 5½c for Vostizza, 3½ for Filintras and 3¼ cents for Provincials. Canned goods are quiet; but new lobster is taken up promptly as the demand from France and Germany is so active as to divert supplies from this port. There is a good demand for new low grade peas, but not much interest is shown in the finer brands. Payments are fair. To use the words of an old wholesaler there are some men who always pay and others who never pay, and between these two extremes there lies an infinity of grades. London sugar cables read: Centrifugal, 96 test, 11s, 9d; Musco-

vado, firm; refining, 8s 9d to 10s 9d; beet June, 9s 3¼d; August, 10s.

**HIDES.**—There is very little alteration in the hide market. Butchers are getting 8½, 7½ and 6½c for Nos. 1, 2 and 3, and tanners pay a cent more for sorting and inspection. The market is very strong on a short supply, and dry Cordovas have sold here at 22 cents. Sheepskins are scarce and what few are coming in sell from 75c to \$1 each. Lambskins bring 25 cents. Calf-skins run at 8c per lb. and clips are 15 cents. Tallow is almost unsalable. We quote nominally 4¼ to 5c for rendered and 1½ to 3 for rough.

**HAY.**—The hay crop is being gathered now in the middle and southern districts of England. The weather is warm and clear and the crop exceptionally heavy. As a result cables are weaker and latest advices quote 59s London, 60s Liverpool and 60s Glasgow. Locally the market is lower. For No. 2 export hay \$6 to \$6.25 is paid on track and \$7.50 delivered on board vessel. For No. 1 Timothy for city trade \$8.50 is asked.

**HOPS.**—This is the off season for hops, as all the breweries are closed down. We quote 4 to 7 cents nominally; but there are no large transactions on which to base a quotation.

**IRON AND HARDWARE.**—Without there being in any sense a boom the outlook for

For Durability, Simplicity and perfection, this Brace Buckle stands supreme. It's without teeth and cannot slip, the harder the pull, the tighter it gets. No need to take off the ends to adjust it up or down. A favorite with everyone who wears it, and a seller every time.

52 & 52 1-2 John and  
18 & 20 Jay Sts., Utica., N. Y.

iron and hardware is certainly more cheer-  
ing. Trade is waking up. Orders are of  
much better calibre. Merchants are more  
confident and are ready to buy a little  
more than immediate wants in order to  
forestall any impending advance in prices.  
Our changes in prices this week are  
again upward. The trade discount on  
wire nails which was 75, 10 and 5, is now  
only 70 and 10, while the discount on wire

is reduced from 25 to 22½ p.c. Pig iron  
is firmer and it is claimed that Siemens  
No. 1 cannot be got under \$16, although  
we still retain \$15.50 on the list. Bar iron  
is firm at \$1.60 to \$1.65 for ordinary crown.  
Tin plates are \$2.50 to \$2.85 for cokes and  
\$3.25 to \$3.65 for charcoals. Canada plates  
run from \$2.25. In the United States the  
marked improvement in the iron and steel  
trade that has been so manifest for the  
past few weeks, is not only maintained,

but there has been a decided though small  
advance in prices the past week. Indeed,  
the situation may be summed up as a fair  
healthy demand, with steadily advancing  
prices. Most of the chief iron and steel  
products show this condition. Bessemer  
pig iron is quoted 50c a ton higher than  
at the close of May, and there is no pres-  
sure to sell even at this advance. Syn-  
pathizing with this advance there has been  
a corresponding advance along the whole  
line from muck bar and billets to finished  
iron and plates. The mills and furnaces  
in and near Pittsburg are quite well sold  
up, or at least orders for a large portion of  
their output are placed, so that there is  
no anxiety or rush to secure additional or-  
ders except at rates that are better than  
those ruling at the close of May. The  
whole situation is encouraging, and if no  
labor troubles intervene to unsettle values,  
the near future is full of hope for a large  
business at rates much better than those  
ruling early in May.

LEATHER AND SHOES:—The market is  
very firm and prices are again higher. We  
quote No. 2 B. A. Sole 24 to 25c, and No. 3,  
21 to 23c. Ordinary sole is now 25 to 26c  
for No. 1, 23 to 24c for No. 2, and 21 to 22c  
for No. 3. Slaughter sole 27 to 29c for  
No. 1 and 25 to 27c for No. 2. Splits run  
from 16 to 20c for small up to 23 to 28c for  
light and medium. Owing to its being be-  
tween the seasons not a big business is  
being done but manufacturers are buying  
steadily in moderate lots for immediate re-  
quirements. The reports of the boot and  
shoemen are contradictory. Some state  
that they are getting plenty of orders while  
others complain. The fact seems to be  
that those who have advanced prices the  
least are getting the bulk of the trade, and  
that the others will have to wait until the  
stock manufactured from cheap leather  
has run out. In the United States prices  
of leather are firm, and tanners hesitate to  
buy hides as Western hides are still higher  
and have reached 9½c for bulfs. The ex-  
port demand for splits is growing and hem-  
lock sole sells as fast as it comes on the  
market. In boots and shoes the demand  
is slackening. In boots it has been check-  
ed already by the advance of \$6 per case,  
and it is much reduced for women's grain  
and buff shoes, but there are fair orders  
for glove grain at 30 cents advance, for  
women's light shoes, and large orders for  
oil grain at 25 cents, and for split shoes at  
15 cents advance.

LIVE STOCK—The market for export  
cattle is slow in spite of better advices  
from the other side. Shippers claim that  
it is no use buying cattle only to lose money  
on them at the other side. Holders how-  
ever, continue firm and offers of 5c for best  
were refused at first although there is  
little doubt that they will have to be ac-  
cepted later on. Shippers claim to have  
lost from \$7 to \$15 per head on cattle re-  
cently arrived in London and \$1 per head  
on sheep. As a consequence ship-  
pers have reduced their prices ½  
cent per lb. and are now paying  
4 cents for export sheep. Ocean freights  
are easier in sympathy and we quote Liver-  
pool 40 to 45s Bristol 45s, Glasgow & Lon-  
don 40s. Cables from London last Monday  
were to the effect that there was a firmer  
tone to the market and that prices showed  
an advance of ¼ to ½ cent per lb. on the  
week, notwithstanding the warm weather  
and the fact that trade was slow for heavy  
cattle. Best states are quoted at 12¼c and  
Canadians at 12c. At Liverpool prices for  
cattle are a shade lower than the above.  
The market for sheep was weaker, and  
values show a decline of ½ to 1c per lb.,  
choice being quoted at 13 to 14c. Several  
private cables from Liverpool quote  
choice cattle at 11 ½ to 12c.

PAINTS, OILS AND GLASS—Five hundred  
barrels of linseed oil were received last  
week, but this was only a flea-bite, and  
although fresh lots are expected by the  
SS. "Dominion" and "Austrian" prices  
are stiffening in sympathy with England  
and will soon go higher. Newfoundland

P. J. McNALLY, Esq.	.....	Toronto
[Merchant]		
JAS. MCGREGOR, Esq.	.....	Chicago
[Produce Cold Storage Exchange.]		

Application has been made to incorporate under the Dominion Joint Stock Companies Act, a company, with the object of acquiring the necessary property and buildings for the establishment in Montreal of a Cold Storage business to be constructed and operated on the latest and most improved methods of mechanical refrigeration.

The rapid development during the past ten years of mechanical refrigeration and the practical demonstration of the fact that it possesses great economy and manifold advantages over refrigeration by natural ice have raised this art to one of the leading and best paying industries of the present day, and necessarily impresses itself upon business men and capitalists.

The want of first class refrigeration and suitable Cold Storage facilities, properly located with Rail and Water connections, whereby perishable products, consigned to Montreal for export account or otherwise, can be scientifically frozen or chilled for shipment, transferred from Refrigerator Cars direct to the Cooler, and reloaded on Ocean Steamers without exposure or deterioration, has become a question of National importance. The Dominion Cold Storage Co. has been organized to meet these requirements. Its Directors have secured valuable railroad and other privileges and have perfected arrangements whereby a first-class, well equipped establishment of this kind will be provided under the most experienced management. This will not only prove of great advantage to producers and shippers, but will undoubtedly become a good paying investment.

The property selected and acquired by the Company for this Enterprise is situated on Mill Street, between the Lachine Canal and the River St. Lawrence. It possesses ample water power, rail and water connections, with unexcelled facilities for loading cars and vessels direct from or into the warehouse.

To establish this business on a sound basis 3000 shares of the capital stock at the par value of \$100 per share will be issued. Terms of payment, 10 per cent. on allotment, 20 per cent. on Aug. 1st, and the balance by calls of 10 per cent. each, at intervals of 30 days. One thousand shares of this stock have already been subscribed and the balance is offered to the public.

Application forms for stock, and all other information, can be obtained at the office of the Company.

MOHAWK VALLEY COTTON MILLS,  
UTICA, N. Y.

cod oil is stiff at 37½ to 40c. An improved demand from Mediterranean ports has stiffened cottonseed oil and sales have been made in New York of 600 barrels good off-grade yellow, supposed to go to the Mediterranean at 26½c and 800 bbls. prime yellow for export at 27 and 27½c. The latter price was for strictly prime. White oil had very little call and prices were unchanged at 30 to 31c. Crude was steady at 23 to 24c for prime. Advices from the South reported steady markets. A moderate jobbing business was transacted in rape-seed oil at full values. Coconut, palm and other oils dull. Paints are fairly active and a good jobbing trade is reported. Shellac is notably higher and we advance our inside quotations for orange No. 1 to \$1.90, and for pure to \$2.10. Glass is quiet and steady at quotations.

**PETROLEUM**—The demand is quieting down, as usual at this season of the year, but prices continue firm and unchanged, Canadian sells at 14½c, American at 13½c, and waterwhite at 20c in car-load lots. For single barrels the prices are 16c, 19½c and 21c respectively. Benzine sells at 13½ to 16c, as to size of lot, for Canadian, and 24 to 27c for American.

**PARIS GREEN**—The market continues strong and active under the influence of the American demand which is being quietly worked through the jobbing houses although the manufacturers pretend not to be aware of its existence. Fortunately the May frosts killed a great many of the most troublesome insect pests and hence the demand for this useful poison is less than usual, but prices are still firm at 16 to 17 cents in bulk and 18 to 19 cents in pound packages.

**PROVISIONS**.—There is no change to note in the provision market. A fairly active business is doing in bacon and hams at from 10 to 11 cents per pound; but pork is slow and buyers are inclined to operate cautiously. We quote Canadian short cut at \$17 for clear and \$18 for mess. Lard sells at 7½ to 8 for common refined, and in pails at 10 to 11 cents. In Chicago trade in hogs is slow and the market in consequence was weaker, and prices declined 10c. The closing quotations were:—Light grades, \$4.25 @ \$4.65; mixed packing, \$4.35 to \$4.75; heavy shipping, \$4.35 to \$4.70; rough grades, \$4.35 @ \$4.55. The Liverpool provision market was unchanged. Pork closed at 60s, lard at 33s 6d, and bacon at 32s 6d to 33s 6d.

**RUBBER**.—The rubber market is quiet and featureless in spite of the active market in Para. Latest cables quote 6250 reis, for fine and 3750 reis for coarse with exchange on London at 97-32d. African is dull and unchanged. Central Americans firm and in good demand. Cash prices f. o. b. Boston are quoted as follows:—Fine Para, new, 78 to 75c; old, 78 to 82c; coarse new, island 40c; up-river, 58c; Caucho, strip, 48c; sheet, 46; balls 54c; Nicaragua scrap, 52½ to 55c; strip, 50c; sheet, 46c; Esmeralda, 52 to 54c; Guayaquil 36 to 42c; pressed, 40c; African small ball, 36c to —; do. soft ball, 29c; Congo ball, 48c; No. 2;

# The Kingsley Patent Water Tube Safety Steam Boiler

Is the most Rapid and Economical in the World.

It economizes:—  
 SPACE,  
 FUEL,  
 BRICKWORK,  
 LABOR.  
 It gives absolutely  
 DRY STEAM.

It will pay for itself in  
 in three years in the sav-  
 ing of fuel as compared  
 with any other boiler  
 now in the market.

Satisfactory references to Prominent Steam Users in Montreal, Quebec, St. John, etc., etc.,  
 . . . furnished on application to . . .

GEO. KINGSLEY, Patentee & Manufacturer,  
 ST. JOHN, N. B.

Or to H. McLAREN & CO.,

 Hoffman Brothers & Drescher, Syracuse, N.Y., 1 Boiler.

### THE RANTON PATENT BOILER.—

This boiler comprises the best features of both tubular and water tube boiler. It has been on the market three  
 years, and has given the highest satisfaction wherever used. Its principal points of superiority are . . . . .

#### ECONOMY . . . . .

Experience shows that the Ranton Patented Boiler is an economical one to use; some of our customers claiming a  
 saving of one-third the amount of fuel used under other boilers in doing the same work . . . . .

#### EASE OF CLEANING . . . . .

It will be seen at once that every part of the boiler being easy of access that it is easy to keep it clean. The  
 vertical tubes will neither hold scale nor soot. These are valuable features, which persons in charge of steam  
 plants will appreciate.

#### DURABILITY . . . . .

Every boiler is made under the supervision of the inventor, of the best materials, in the most careful and work-  
 manlike manner. Its construction admits of very strong bracing, and this together with the ease of cleaning  
 ensures the probable life of the Ranton boiler being longer than the ordinary . . . . .

We will submit specifications and prices upon  
 any size from 30 to 250 horse power.

## RANTON BOILER CO.

**SALT**—The salt market continues firm  
 and steady. No outside steamers have  
 arrived to break prices and values will re-  
 main at our figures until the haying season  
 is over. We quote Liverpool at 41 to 45c  
 per bag, and cheese salt at \$1.25 to \$1.50.

**VEGETABLES**—The market is quiet and  
 lower in many lines. Potatoes job at 50c  
 in car lots with smaller lots 10c higher.  
 Cucumbers rule at \$2.75-per basket. As-  
 paragus at 90c to \$1. Butter beans sell at

\$3.25 per bushel and green beans at \$3.  
 Onions are quiet and unchanged at \$4.50  
 to \$5 for Egyptians per bag and \$2.50 to  
 \$3 per crate for Bermudas.

**Wool**—A quiet and unchanged market  
 is all that can be reported in wool, and  
 prices for Canadian fleece are lower. Far-

Highest World's Fair Award on our entire Exhibit of Wheels.

mors are getting 18 to 19c for their wool, and although manufacturers are being charged higher figures little is doing, and our quotations are largely nominal. Capes are selling in small lots at 13 to 15 cents but manufacturers are still uncertain as to orders and hence are buying only sparingly. A sale of low grade wools was held in London on Wednesday at which the offerings aggregated 11,287 bales. The bidding was very tame and much of the wool offered was withdrawn. Prices ruled rather lower than at the last sales. There were sold 1,200 bales of China sheep and lambs wool at 2d to 5½d; 1,400 bales camel hair at 2½d to 3½d; 1,100 bales cashmere at 2d to 9½d; 800 bales East India at ¼d to 2¼d; 2,700 bales Persian at 2¼d to 6½d; 2,100 bales Awasi and Karadagh at 3d to 5½d; 600 bales Turkestan and Khorassan at 1½d to 5½d; and 800 bales of sundries at 1¼d to 2½d.

TORONTO WHOLESALE TRADE.  
(Revised by Telegraph).

Toronto, June 13, 1895.

Wholesale trade continues fairly satisfactory. There is a good demand for summer fabrics, and the feeling generally is hopeful. Payments are improving, with reports for June better than for some time past. The tone of the drygoods market is strong, in keeping with higher prices for raw cotton and wool. Groceries quiet and featureless, while hardware and metals are in better demand and prices firmer. Money is unchanged, with call loans quoted at 4½ to 5 per cent. and prime discounts 6 to 6½ per cent. Sterling exchange stronger in sympathy with the New York market. Stocks are active and

OUR TRAVELLERS ARE NOW ON THE ROAD WITH FALL SAMPLES.  
EVERYTHING NEW, FRESH AND PRICES RIGHT

10 to 10½c per dozen in quantities. Cheese new, 7½c to 8½c in a jobbing way.

DRESSED HOGS.—The market is very dull, and prices are unchanged. They rule at \$5 to \$5.50.

FLOUR AND GRAIN.—Flour is inactive with the feeling unsettled. Holders quote \$4.60 to \$4.75, for straight rollers, and \$5 \$5.20 for Ontario patents. Manitobas are quoted at \$5.25 for patents and \$5.00 for strong bakers. Wheat weaker, with sales of white and red outside at \$1.00 Manitoba No. 1 hard is quoted at \$1.05 Toronto freights. Barley dull and nominal at 52 to 55c for feed. Oats easier, with sales west at 38½c, and on track here at 42c. Peas sold at 62c west, and rye is nominal 62c outside. Bran dull at \$12.50 and shorts at \$17.00, Toronto freights. Oatmeal firm at \$4.25 to \$4.50.

GROCERIES.—Trade quiet, and prices as a rule unchanged. Sugars are selling at 4½c for granulated and 3½c to 4c for yellows ac-

ording to quality. Valencia raisins fairly active at 85c per box. Currants 4½ to 5c. Rio coffee, 20 to 22c. Canned goods in demand. Teas in demand at unchanged prices.

HARDWARE AND METALS.—There is a fair trade, with prices general unchanged.

HIDES AND SKINS.—The hide market is firm, with cured selling at 9c. Dealers are paying 8c for No. 1 green and 7 cents for No. 2. Pelts 15 to 20c, and lamb-skins 25c. Tallow dull at 5½c to 6c with sales in a jobbing way at the latter prices.

LIVE STOCK.—Offerings of cattle liberal and prices rather weaker. Sales of choice shipping at 5c per lb. and ordinary at 4½ to 4¾c. Butchers cattle weaker, with sales of the best at 4¼ to 4¾c per lb.; medium at 3½c to 3¾c and inferior at 3 to 3¼c. Milch cows \$25 to \$40 each and calves \$2 to \$6.00 each. Sheep sell at 4 to 4¼c, per lb., spring lambs at \$3.00

to \$4.25 each. Hogs are lower, the best bacon lots selling at \$4.50 to \$4.55, stores at \$4.50, thick fats at \$4.40, and sows at \$4.

PROVISIONS.—Trade quiet, and prices unchanged. Mess Pork sells at \$15.75 short cut at \$16, and shoulders at \$13.50 to \$13.75; bacon 7¼ to 8c, hams 10½ to 11c, and lard 8¾ to 9½c. Beans \$1.40 to \$1.50 bushel. Hops 5 to 8c. Potatoes easy at 38 to 40c for cars on track, and small lots at 50c. Dried apples 5½ to 6c, and evaporated 6½ to 7c.

WOOL.—Receipts are large for the season, and prices rule firm. Fleece brings 20 to 21c and unwashed 12c. Pulled suppers steady at 20½ to 21c, and extras 22 to 23c.

### SPECIAL NOTICES.

#### THE WILSON PATENT LEVER FLUE CLEANER.

The points on which the Frontier Manufacturing Co., of Buffalo, N.Y., claim superiority for the Wilson Patent Lever Flue Cleaner are, that as it is made of the very best malleable iron, there is no need of steel springs to hold the scrapers in place and press them against the sides of the flues in order to scrap the tubes. There is always a certain elasticity in malleable iron. Heat does not destroy that elasticity but it does take the temper out of steel and as boilers are very often cleaned while quite hot, the temper of the steel is very quickly destroyed and the scraper becomes useless. No such thing can occur with this cleaner. The cleaner has also a set of scrapers at each end so that both act at once and in going through the tubes once accomplish as much as other scrapers do in going through twice. Another point is the follower which removes all the loose soot and scale loosened by the scrapers.

This no other scraper has. Lastly there is but one rivet in this cleaner where others have from 4 to 8 or 10, and the very fact of so many holes being drilled in the iron often causes them to break just at these points.

**LENOX SCOTCH CAP CO.**

The Lenox Scotch Cap Co., the oldest established mill in Utica, N.Y., are makers of fine Scotch caps in all the latest styles and grades. They also make a specialty of Scotch Yachting Caps, Tam O'Shanter's and Toques, and will be glad to receive orders for these from the trade.

**YOUNGLOVE & GERE.**

Younglove & Gere, successors to the firm of Cherry & Younglove, now dissolved announce that they will continue to manufacture the well-known Cherry & Younglove ventilated dynamo brush, for incandescent dynamos, plating dynamos, alternating generators and exciters, electric railway generators, and stationary motors. The new firm will, in addition, handle a few specialties, such as incandescent lamps, shade and shade-holders, lamp cord, wires, tapes, electric bells, batteries, etc., as well as general gas and electric fixtures, both independent and combined. The dynamo brush, with which the success of the name of Cherry & Younglove has been so closely

# JAS. McMILLAN COMPANY

Established 1855.

**SMOKELESS**

## Furnace AND Fuel Saver

**THE OLDEST BOILER SETTERS AND FURNACE BUILDERS in CHICAGO.**

Our Furnace is constructed on scientific principles. It can be put in in one day. No iron to burn out. A great protection to the boiler. Can use any fuel. Perfect radiation and combustion guaranteed.

**JAMES McMILLAN CO.,** 21 So. Canal St. Chicago.

MANUFACTURERS OF **Constant Potential Dynamos and Motors** of all sizes & voltages for lighting and power.

**ADVANTAGES CLAIMED:**

Substantial construction; smooth running and durable; well protected from external injury; parts easily removed for repairs. Automatic Self-Lubricating Journals, wastes no oil; current generated with least sparking; consequently small wear of Commutator and brushes.

Perfectly self regulating and so simple any man of ordinary ability can run them.

**KAY ELECTRICAL MANUFACTURING CO.,** 263 James Street, North, Hamilton, Ont.

### -- Cherry-Younglove Ventilated Dynamo Brush. --

Does not spark, heat or cut the commutator of a dynamo, and operates in the satisfactory manner that a practically operative brush should.

Our PATENTED construction insures requisite ventilation, sufficient elasticity and ready and positive longitudinal adjustment. By the use of these brushes your commutator will last indefinitely; they insure a steady current. Be sure that you secure our PATENT DYNAMO BRUSH, duly marked or stamped with our names thereon (see cut of brush).

CANADIAN AND FOREIGN LETTER OF PATENT FOR SALE.

**Younglove & Gere, SYRACUSE, N.Y.**

### THE DUPLEX BOILER TUBE SCRAPER.

Adjustable in the tube and elastic the full length of springs.

Will do double the work of any other and last longer.

No Bolts, Nuts or Coil Springs to be Affected by Hot Tubes.

Patented Nov. 11, 1890.

Is recognized by Engineers and Guaranteed to be Superior to all Others.

### TELESCOPE FLUE BRUSH HANDLE.

**SOMETHING NEW!**

Fills a Long Felt Want.

Needs Only One-half the Length of Boiler Tubes in Front of Boiler to operate it. Is Easily Lengthened or Shortened in the Tube. Can be Used with Any Scraper or Brush. Flues can be Scraped with One-half the Labor and One-half the Time taken with Link Handles or Long Slimy Rods. Is Compact, Handy and Cheap. In Ordering Always Give Length of Boiler Tubes. Made Only by **SHERWOOD M'F'G CO., 34 WASHINGTON ST., BUFFALO, N. Y.**

associated, is manufactured of the best high conductivity copper gauze, made especially for them from pure lake copper. Their headquarters are 14 Grand Opera House Block, Syracuse, N.Y.

#### MACHINE KNIVES.

The paper-cutting machine knives of the L. and I. J. White Co., of Buffalo, N.Y., are too well-known to the trade to need much attention being called to their excellence. They have been used in this office for a number of years and have always given the utmost satisfaction. They are furnished promptly to fit any style or make of cutter and are all warranted of superior quality. Their advertisement appears in another portion of this issue, and contains a cut of their celebrated Knife Blade for use in union leather splitting machines, scarfing machines, and bark mills.

#### IRRIGATION PUMPS.

The Baldwinsville Centrifugal Pump Works of Syracuse, N.Y., of which Irwin Van Wie is proprietor are manufacturers of Vertical, Horizontal and Suction Centrifugal pumps, as well as of their celebrated Van Wie Triplex Power Pump. Their improved vertical or submerged pump is especially adapted to the use of contractors in draining Lock Pits, Sewers, etc., and also for pumping tan liquor from junks or still slop; in fact, any use where submerged pumps can be used. These pumps are constructed without valves and hence will raise water containing sand, gravel, clay, coal, tan bark, and other impurities. Will also pump still slop and brewers' mash and pump as readily as clear water, and will not clog, and have no close-fitting parts to wear.

#### R. M. WILSON.

One of the most flourishing and enterprising concerns manufacturing copper tub seats and tanks as that of R. M. Wilson at Rome, N.Y. Several years ago he started in a modest way with a few hands making a grade of goods that was appreciated by the plumbing fraternity. His business thrived and expanded under his management until to-day he possesses a custom of a most desirable and enviable nature. He employs one hundred and forty-five hands at the factory and they are working over-time, the capacity of the seat and tank department having been doubled in the last six months. The copper range boiler made by Mr. Wilson is a very handsome article while the solid copper tub which he has the reputation of being the originator of, is having a sale far exceeding his most sanguine expectations. Notwithstanding the amount of factory space now occupied by Mr. Wilson he is looking for more in order to further increase his capacity and consequently his output.

# SUYDAM FLEXIBLE METAL PIPE JOINT

## WHAT IS THIS FLEXIBLE JOINT ?

It is an absolute steam joint under any steam pressure  
 It is a practical flexible coupling for metal pipe.  
 It will allow the joining of iron pipes so that the sections may be easily moved in any direction at will or rotate on a swivel.  
 It is more durable and less expensive than rubber hose

THE GILBERT BROS. ENGINEERING CO., LIMITED, SOLE MANUFACTURERS  
 2666 Notre Dame St., - MONTREAL. FOR THE DOMINION

REID'S PATENT.

## Bent Rim Wood Split Pulleys.

No Glue in Rim like Segment Rim Pulleys, to be affected by Steam, Dampness or Moist Temperature.

THE REID BROS. MFG. CO., LTD.,  
 106 Adelaide St., West,  
 TORONTO, Ont.

R. H. BUCHANAN,  
 Agent, - MONTREAL.

## THE REEVES

## WOOD SPLIT PULLEY IS AS STRONG AS IRON.

It is a dead true, being accurately balanced. Arms are built in such a way that when in motion they do not displace any more air than an iron pulley. Segments are all nailed. These pulleys never go to pieces. Pulleys from 6 inches diameter to 48 inches always in stock. Pulleys as large as 20 feet diameter made to order. Every Pulley guaranteed.

**REEVES PULLEY CO.,**  
 TORONTO, Ont.

**TUBULAR FEED WATER HEATER AND PURIFIER.**

With Seamless Brass Tubes. One square foot of heating surface per horse-power.

Guaranteed to heat the feed water to the Boiling Point (210° or 212°) with the exhaust steam without causing any back pressure. Also to Extract the Oil from the exhaust so that the exhaust steam, after being passed through the heater, can be used for heating purposes and the water of condensation from the heating system be returned to the boilers free from Oil.

These Heaters are shipped on their merits, and if they fail to do all that is claimed for them, parties trying them will be to no expense, as we will pay all expense a trial has cost.

Patented and Manufactured by the

CORNER OF VICTORIA SQ. & CRAIG STREET, is one of the largest and best equipped commercial educational institutions in America. The building it occupies was purchased during the past year for the College at a cost of \$53,000. The permanent teaching staff consists of six gentlemen and two ladies, specially selected for their proficiency. The studies will be conducted under the personal superintendence of Mr. Davis, the principal. The College teaches a thorough commercial course. The type-writing and short-hand course is taught in both languages, by the same system, and includes grammar, letter writing, business forms, etc. The Practical Department for teaching details of office work, is unequalled in the Dominion.

Studies will be resumed on September 3rd. Inspection and correspondence solicited. Write, call, or telephone (No. 2890) for prospectus containing a description of the course of study, fees, terms, etc. Address **MONTREAL BUSINESS COLLEGE,** 42 Victoria Square, - MONTREAL.

James H. Beatty, David Dexter,  
President. Managing Director.

**WORTH KNOWING**

"It is the safest and fairest policy I have ever seen,"

was the remark made by a prominent representative of one of the largest and best American Life Insurance Companies when he had carefully examined the Ordinary Life Policy of the Temperance and General Life Assurance Co.

This is the only policy offered to the Canadian public that can neither lapse nor expire, as to its paid-up value, till death ensues, after three annual premiums have been paid on it.

MONTREAL TORONTO AND VICTORIA.

**JUNE LETTER, 1895.**

MONTREAL, JUNE, 1895.

We feel it due to our constituents to address a brief acknowledgement and explanation in reference to the somewhat unusual pressure of business during May.

In our January letter we gave notice of our increased appliances and preparedness for extended business, and had our statement verified by a prompt handling of the volume of trade entrusted to us up to end of April.

The sudden rush of business in the very beginning of May, which continued throughout the month, tried our resources to the utmost, and during a part of the month we were unable to keep pace with orders, so that many shipments were not made with our wanted promptitude. By way of explanation, we venture to submit report of our Auditor, John Hyde, Esq., Public Accountant and Secretary of the White Lead Association of Canada, certifying that during the month we turned out 233,695 packages of goods, representing 8,988 per working day, during the entire month.

The month closed with only one average day's work on order files, so that our friends have herein an assurance of our ability to maintain our reputation for prompt and careful shipment.

**IN VARNISH GUMS**

we bought heavily before the recent advance and although this department has advanced more than any other, our tankage of fine Varnishes is more than sufficient for all demands.

**IN WHITE LEAD,**

notwithstanding unprofitable prices, we never issued finer paint. Those of our friends who have been testing our product will not object to pay the small advance in price which we hope to announce shortly.

**IN READY MIXED PAINTS**

our plant has never turned out so large a quantity and our testing system has enabled us to give thorough satisfaction. Alike in Villa Paints, Floor Paints, Coach Paints and all ready mixed goods, we claim to make the hardest and most durable Paints sold in the Dominion.

**IN CARRIAGE COLORS**

our success has been complete. Notwithstanding the great increase of business in this department, every batch of Ground Work, Primer, Fine Color and Japan has been proved before shipment. As a result, the leading Carriage Builders have said some pleasant things to us, which we will shortly repeat for the information of and who have not taken advantage of our manufacture in this department.

**OUR 93 P.C. CANADIAN IRON OXIDES AND INDIAN REDS**

are asserting themselves, not only over the Dominion, but in England, Scotland and the United States. They are the finest goods in any market; they are purely Canadian Bog Iron Ore products, which have never reflected beauty until developed by us.

We introduce this month a new feature our **TRIPLE STRENGTH COMPOUND TINTING COLORS**, on the same lines as have been so successfully adopted by the National Lead Association of the United States. Our selection opens with twenty of the choicest tints in triple strength by means of which a desired shade in Pure White Lead Paint can be arrived at with certainty and without any trouble. Special illustration cards will be ready on 1st July for issue to all enquirers.

Another new feature of much importance is our **GRAPHITE PAINT FOR STRUCTURAL IRON WORK**, a paint which cannot be duplicated outside our factories. Our tests indicate that this paint will rival our Magnetic Oxides for this department of work. For the frames and plating of Iron Vessels in course of construction, we have entrusted the Agency for Graphite Paints for the Clyde to our friends, Messrs. Alexander, Fergusson & Co. of Glasgow. All manufacturers of exposed structural iron will find our tests interesting.

The list is too long to admit of special mention of our specialties in a single letter. We labour earnestly and unceasingly to produce, under every heading, thoroughly excellent goods, at the everyday low price of ordinary manufactures, and we invite our friends to continue their confidence, while we give the continued assurance of our best services.

**THE CANADA PAINT CO., LTD.****(AUDITOR'S CERTIFICATE.)**

"The sales books of the Canada Paint Co., Limited, for the month of May, 1895, as audited by me, show the number of packages of merchandise sold and delivered by them during that month to be (233,695) two hundred and thirty-three thousand, six hundred and ninety-five."  
(Signed) JOHN HYDE, Chartered Accountant.
