DURIE & SON'S

CANADIAN

FARMERS' ALMANAC

FOR THE YEAR OF OUR LORD

1878.

Being the second Bissextile or Leap Year, and until the 20th of June, the forty-first Year of the Reign of Her Majesty Queen Victoria.

Calculated for the Meridian of Ottawa, in Latitude $45^{\circ} 22'$ North, and Longitude $75^{\circ} 43' 22''$ West from the Royal Observatory, Greenwich. Also for the Meridian of Halifax, N. S., in Latitude $44^{\circ} 39' 20''$, and Longitude $63^{\circ} 36' 40''$. But the Almanac is arranged to serve without essential variations for most parts of the Dominion.

OTTAWA, Ont.

PUBLISHED BY J. DURIE & SON.

1878.]

OFFICE OF THE

Canadian Farmers' Almanac.

OTTAWA, December, 1877.

The publishers of this OLD, RELIABLE and STANDARD ALMANAC, with a view to meet the wants of their many patrons throughout Canada, have had the Calculations arranged so as to cover the Provinces of Ontario, Quebec, New Brunswick and Nova Scotia. This has necessitated a slight departure from the old and familiar arrangement of the monthly pages, viz., the absence of the *Weather Prophecies* and *Remarkable Events*, which will now be found at pages 5, 6, 7.

BANK HOLIDAYS IN ONTARIO.

Sundays, Christmas Day, New Year's Day, Good Friday, The Queen's Birthday, and each day appointed by Royal Proclamation as a general Fast or Thanksgiving day.

SCARECROWS.—The first and the best is a suspended looking-glass. Take two small cheap mirrors, fasten them back to back, attach a cord to one angle, and hang them to an elastic pole. When the glass swings, the sun's rays are reflected over the field, even if it be a large one, and even the oldest and bravest of crows that depart precipitately should one of its lightning flashes fall on him. The second, although a terror to crows, is especially well-suited to fields subject to the attacks of small birds and even chickens. It involves an artificial hawk made of a big potato and long goose and turkey feathers. The maker can exercise his imitative skill in sticking the feathers into the potato so that they resemble the head wings and tail of the hawk. It is astonishing what a ferocious-looking object of prey can be constructed from the above simple material. It only remains to hang the object from a tall, bent pole, and the wind will do the rest. The bird will make swoops and dashes in the most headlong and threatening manner. Even the most inquisitive of venerable hens have been known to hurry rapidly from its vicinity, while to small birds it carries unmixed dismay.—*Scientific Amer-*

ECLIPSES DURING THE YEAR 1878.

During this year there will be four Eclipses, viz:—Two of the Sun and Two of the Moon.

I.—On the 2nd of February there will be an Annular Eclipse of the Sun, but not visible in these parts.

II.—On the 17th February there will be a partial Eclipse of the Moon, and partly visible. Begins at Halifax, N. S., 4h. 27m. in the morning, and at Montreal 3h. 47m. It will end at Halifax 9h. 26m., and at Montreal 8h. 46m.

III.—On the 29th of July there will be a total Eclipse of the Sun, visible in North America as a partial Eclipse. It begins on the Earth 3h. 4m. evening, mean time at Halifax in Longitude 144° 50' east of Greenwich, and Latitude 41° 21' north Central Eclipse begins at 4h. 10m. evening in Longitude 117° 42' east, and Latitude 54° 14' north. Ends on the Earth 8h. 1m. evening in Longitude 69° 45' west and Latitude 3° 37' north. This Eclipse begins at Halifax about 5h. 30m. evening and at Montreal about 5h. 10m. The greatest observations will occur a few minutes before the setting of the Sun.

IV.—On the 12th of August there will be a partial Eclipse of the Moon, and it will be visible in part. In Halifax it begins in the evening at 5h. 8m., and in Montreal at 4h. 37m. The Moon rises about 7 o'clock, and the last contact with the shadow will be about 9.

A transit of Mercury will occur on the 6th of May. It will be visible between 11 in the morning and 7 in the evening.

- 8 Somewhat moderated.
- 9 Keen frost this week.
- 10 S. W. wind brings snow.
- 11 N. E. wind fair and frosty.
- 12 Similar weather continues.

.....
13 *1st Sunday after Epiphany.*

- 14 Weather more calm.
- 15 Very pleasant day.
- 16 Changeable aspects.
- 17 Wind and snow.
- 18 *Old Twelfth Day.*
- 19 Unpleasant season.

.....
20 *2nd Sunday after Epiphany.*

- 21 Cold, dull, damp.
- 22 More like rain than snow.
- 23 Changeable.
- 24 Tendency to thaw, but
- 25 There is a delay for heat.
- 26 Sets in hard frost.

.....
27 *3rd Sunday after Epiphany.*

- 28 Another comfortless day.
- 29 A real cold day.
- 30 The aspects are dreary.
- 31 Threatening storm

FEBRUARY.

D.

- 1 The storm rages.
- 2 *Purification of Virgin Mary.*

.....
3 *4th Sunday after Epiphany.*

- 4 Plentiful snow now.
- 5 Wind high, frost keen.
- 6 Somewhat milder.
- 7 Unsettled weather for
- 8 Some days, but now
- 9 Look for high winds.

.....
10 *5th Sunday after Epiphany.*

- 11 Continues unpleasant.
- 12 Some severe cold.
- 13 A little milder.
- 14 *St. Valentine's Day.*
- 15 Young folks visit the post office.
- 16 Sun glistens through frost.

.....
17 *Septuagesima Sunday.*

- 18 Cheerless cold day.
- 19 Not much milder.
- 20 Changeable outlook.
- 21 Pleasant and mild.
- 22 Some thaw but brief.
- 23 Not unpleasant.

.....
24 *Sexagesima Sunday.*

- 25 *St. Mathias.*
- 26 Cold continues but
- 27 The probabilities are for
- 28 More genial weather.

MARCH.

D.

- 1 *St. David's Day.*
- 2 Rough for a beginning.

.....
3 *Quinquagesima Sunday.*

- 4 Winter weather yet.
- 5 More snow and wind.
- 6 *ASH WEDNESDAY.*
- 7 In the East more snow.
- 8 Some pretty high winds.
- 9 General blustery season.

.....
10 *First Sunday in Lent.*

- 11 Milder weather and some
- 12 *St. Gregory.*
- 13 Cold rain with sleet.
- 14 Steadily cold for some days
- 15 But changeable.
- 16 This day is damp.

.....
17 *2nd Sunday in Lent.*

- 18 17th. *St. Patrick's Day.*
- 19 Quite mild, but
- 20 Change comes with heavy winds.
- 21 A regular gale now
- 22 And for some days.
- 23 Rain west, snow east.

.....
24 *3rd Sunday in Lent.*

- 25 *Annunciation of the Virgin Mary.*
- 26 Rather variable, but
- 27 On the whole March
- 28 Has been a hard month.
- 29 This day sunshiny.
- 30 To-day also fine.

.....
31 *4th Sunday in Lent.*

APRIL.

D.

- 1 *ALL FOOL'S DAY*, so called.
- 2 A change all over the land.
- 3 Quite spring like.
- 4 *St. Ambrose.*
- 5 Travelling not pleasant.
- 6 Much snow melted.

.....
7 *5th Sunday in Lent.*

- 8 Weather very unsettled.
- 9 Frost continues,
- 10 But not very severe to-day.
- 11 The sun shines out
- 12 Warm and spring like.
- 13 In the West spring begins.

.....
14 *Sunday before Easter.*

- 15 A general pleasant
- 16 Outlook for some days,
- 17 But rather dull for the
- 18 Farmer who wants to plow.
- 19 *GOOD FRIDAY.*
- 20 Very agreeable day.

.....
21 *Easter Sunday.*

- 22 Some rains with wind.
- 23 *St. George's Day.*
- 24 Very fine days.
- 25 *St. Mark's Day.*
- 26 Bright and cheerful.
- 27 Change to dampness.

.....
28 *Low Sunday.*

- 29 Cool rains with some winds,
- 30 Frosty nights.

MAY.

- D.
 1 *St. Philip and St. James.*
 2 May has opened very fine.
 3 Continues very agreeable.
 4 A fine spring day.

 5 *2nd Sunday after Easter.*
 6 Some showers—cold night,
 7 Mild agreeable weather.
 8 Some farm work done West.
 9 Very backward Easterly.
 10 Foliage develops slowly.
 11 The season agreeable.

 12 *3rd Sunday after Easter.*
 13 Unsettled weather.
 14 Agreeable rain fall.
 15 Now changeable.
 16 Wind and rain now.
 17 Change to fine and
 18 Steady weather.

 19 *4th Sunday after Easter.*
 20 19th, *St. Dunstan.*
 21 A very clear day.
 22 Fine and sunshiny.
 23 Beautiful weather.
 24 QUEEN VICTORIA'S BIRTHDAY.
 25 A very fine day.

 26 *Rogation Sunday.*
 27 26th *St. Augustine.*
 28 Rather dull day.
 29 Not unpleasant.
 30 ASCENSION DAY.
 31 Month ends brightly.

JUNE.

- D.
 1 Cool and pleasant now.

 2 *Sunday after Ascension.*
 3 Warm showery day.
 4 Pleasant and warm.
 5 *St. Boniface.*
 6 Cool for the season.
 7 Bright sunny day.
 8 Fine weather continues.

 9 *Whit Sunday.*
 10 Some frost these nights.
 11 *St. Barnabas.*
 12 The days are pleasant.
 13 A change to heat and
 14 Thus for some days.
 15 A storm of wind.

 16 *Trinity Sunday*
 17 Thunder but not hard.
 18 Very warm again.
 19 Moderately warm.
 20 This day is very fine.
 21 Warm and windy.
 22 Rain is falling to day.

 23 *1st Sunday after Trinity.*
 24 *St. John the Baptist.*
 25 Great heat and dry.
 26 Cooler weather to-day.
 27 Again warm and pleasant.
 28 A very fine day.
 29 *St. Peter's Day.*

 30 *2nd Sunday after Trinity.*

JULY.

- D.
 1 Warm and showery.
 2 Thunder and lightning.
 3 Cool afterwards, but
 4 There will be considerable
 5 Heat and sultriness,
 6 For some days to come.

 7 *3rd Sunday after Trinity.*
 8 Rain is needed, and
 9 It will come to-day,
 10 And also this day, but
 11 Only in showers
 12 With heat and wind.
 13 Heat and thunder.

 14 *4th Sunday after Trinity.*
 15 *St. Swithin's day.*
 16 Rainy days, but
 17 Accompanied with wind.
 18 Quite sultry evenings.
 19 Pleasant but warm.
 20 Unsettled weather.

 21 *5th Sunday after Trinity.*
 22 Heat through the week.
 23 Clear and warm.
 24 Pleasant but hot.
 25 *St. James' Day.*
 26 Not disagreeably hot.
 27 *St. Joseph of Arimathea.*

 28 *6th Sunday after Trinity.*
 29 Sun bright, day sultry.
 30 Somewhat cooler.
 31 But yet warm days.

AUGUST.

- D.
 1 A beautiful day.
 2 Not extremely warm.
 3 Changeable—cloudy.

 4 *7th Sunday after Trinity.*
 5 This day is very fine.
 6 *Transfiguration.*
 7 Thunder—lightning—rain.
 8 Somewhat cool for the season.
 9 Pleasant.
 10 *St. Lawrence.*

 11 *8th Sunday after Trinity.*
 12 More thunder storms.
 13 Settled but still warm.
 14 It is warm with clouds.
 15 Now for thunder and
 16 A violent rain storm.
 17 Fair and bright sun.

 18 *9th Sunday after Trinity.*
 19 The day is very pleasant.
 20 Much cooler, some rain.
 21 Prospect of settled weather.
 22 Very fine and bright.
 23 Very cool at night.
 24 *St. Bartholomew.*

 25 *10th Sunday after Trinity.*
 26 Changeable and dull.
 27 Now very fine.
 28 Another bright day.
 29 *St. John Baptist beheaded.*
 30 High winds and some
 31 Showers all round,

- 12 Changeable and dull.
- 13 Rain and wind
- 14 Much finer weather.
- 15 13th Sunday after Trinity.
- 16 Very unsettled and dull
- 17 Two days occasional
- 18 Cool showers.
- 19 A frost this night.
- 20 But the days are fine.
- 21 St. Matthew's Day.

22 14th Sunday after Trinity.

- 23 Weather changeable.
- 24 Rough days and high
- 25 Night winds may be
- 26 Looked for. Very cool
- 27 Nights and pleasant days.
- 28 Variable season.

29 15th Sunday after Trinity.

30 23th, St. Michael and all Angels.

D.

OCTOBER.

- 1 Cool and pleasant day.
- 2 The sun shines brightly.
- 3 All serene without.
- 4 Not warm, but fine.
- 5 Changeable aspects.
- 6 16th Sunday after Trinity.
- 7 Cloudy and cool.
- 8 Rather heavy frost.
- 9 Rains and quite cold.
- 10 No rain to day, but cloudy.
- 11 Change and sunshine.
- 12 The wind blows hard.

13 17th Sunday after Trinity.

- 14 Cool-cloudy day
- 15 Again hard wind.
- 16 Settled and fine.
- 17 A sunny day.
- 18 St. Luke the Evangelist.
- 19 Sharp frost to-night.

20 18th Sunday after Trinity.

- 21 Wet and dull day.
- 22 Rather cheerless aspects.
- 23 Frost has changed the foliage.
- 24 Rather wintry look,
- 25 But now much finer.
- 26 Bright, cool, fine day.

27 19th Sunday after Trinity.

- 28 St. Simon and St. Jude.
- 29 North-west winds are prevalent,
- 30 With cool rain.
- 31 Snow down East.

NOVEMBER.

D.

- 1 All Saints Day.
- 2 Cold and rainy.

3 20th Sunday after Trinity.

- 4 Some snow falling East.
- 5 Cold rains in the West.
- 6 Rather wintry all over,
- 7 Severe storm of wind.
- 8 Quite frosty nights.
- 9 Clear and cold.

10 21st Sunday after Trinity.

- 11 Milder but not settled.
- 12 Dull, cloudy, cold.
- 13 Rain and wind
- 14 Now for some days.
- 15 Clear and cold, with
- 16 Snowy aspects East.

17 22nd Sunday after Trinity.

- 18 Considerable frost.
- 19 Sunshine but cool.
- 20 Dull and changeable.
- 21 Unpleasant storm.
- 22 St. Cecilia.
- 23 St. Clement's Day.

24 23rd Sunday after Trinity.

- 25 Cold and chilly.
- 26 Frost and snow.
- 27 Unsettled, but quite
- 28 Wintry weather.
- 29 Clear and cold.
- 30 ST. ANDREW'S DAY.

D.

DECEMBER.

- 1 Advent Sunday.
- 2 Cold and cloudy.
- 3 Snow falls in Quebec.
- 4 Rain continues westerly.
- 5 Unsettled season.
- 6 Fair and frosty.
- 7 Winter set in fairly.

8 2nd Sunday in Advent.

- 9 8th, Conception of Virgin Mary.
- 10 Cold and bright.
- 11 Good sleighing in Quebec.
- 12 Poor in Ontario.
- 13 Weather unsteady.
- 14 Hard, cold wind.

15 3rd Sunday in Advent.

- 16 Cold high winds.
- 17 Settled hard frost.
- 18 No change.
- 19 But there is a heavy snow fall.
- 20 Remember the Poor.
- 21 St. Thomas' Day.

22 4th Sunday in Advent.

- 23 The day is fine.
- 24 But the temperature low.
- 25 CHRISTMAS DAY.
- 26 St. Stephen's Day.
- 27 St. John the Evangelist.
- 28 Innocents Day.

29 1st Sunday after Christmas.

- 30 Weather clear and crispy.
- 31 The year ends seasonably.

1st Month.

JANUARY.—We have felt it our duty on more than one occasion to remind our agricultural readers of the great importance which they ought to attach to the preservation and manufacture of manure. On the older farms, much exhausted, the manure heap, properly managed, is a bank of deposit in more senses than one. Let no available material be thrown away or wasted. The liquid manure should never be allowed to run to waste. It is the food of plants and should be preserved in order to mix with earths and decaying substances. Upon a heavy clay soil, liquids may be mixed with sand, and spread over the land. The yield of produce will increase three or fourfold. Farmers should never complain of the want of manure while they neglect to take care of the slops and refuse of the house and of their stables.

FEBRUARY.—About dairy matters, we observe a general disposition the part of skilled workers to give up the old-fashioned small milk pans. Milk pans are prepared oblong in shape, three feet long by two and a half broad and about eight inches deep, always made smaller at the bottom than the top. Each of these is fitted into a wooden frame on four legs, about two feet and a half from the floor. In the bottom of this pan is a hole large enough to receive a common bottle cork. When wishing to take the cream, this cork is withdrawn and the milk received in a pail or other utensil. Just as the last of the milk is about to escape, the cork is replaced and an unbroken mass of cream is left in the basin. Is not this process worth an experiment? We think it is, and recommend a trial.

MARCH.—That very delicious vegetable the cauliflower is very difficult to raise. Early sown they too frequently fail, but those sown or planted late are mostly saved. We are told that the late cauliflowers succeed, because the heat of the sun is gradually growing less, while frequent fogs and cool night dews are favourable to the development of the plant. Cauliflowers will not head in hot weather, in fact the growth is checked altogether and the plants come to a standstill. They may, however, be stimulated by abundant manures in the Spring, and proper protection during chilly nights. Our climate and other conditions demand abundant watering in dry weather, and protection from chills. With a good deal of care and caution this vegetable may be raised.

APRIL.—The ladies will now be thinking and planning about their flower gardens. It is quite as easy to raise young plants as it is to procure slips. A saucer or soup plate partially filled with clean sand, and the water kept above the surface. Set this in a sunny window and insert your cuttings. An ordinary plant will root nearly as readily as in a propagating bed, and may be transferred to small pots of earth. Let the stems of geraniums dry thoroughly on the cut surface. Verbenas may be put in as cut from any or all of the varieties. Pink slips may be pulled, not cut, from the extremities of growing shoots. The begonias, heliotropes, &c., may be inserted at once. Use small pots, with rich earth with dry sand. Give plenty of air and keep the plants pinched.

MAY.—We met with a piece of good advice the other day suitable for all farmers, and especially for the young folks. It was, "be sociable with animals." It is good advice for life in all relations to one another, but we recommend kindness and sociableness with all the creatures usually found in a farm yard. The cows and oxen, the calves, the sheep, the lambs, the pigs, the chickens and ducks, the horses and colts, and why not also the cats and dogs. They are in some respects our companions. They live with us and for us, and with a little familiarity may afford us great pleasure. Boys are often rough in speech and action, and animals know the difference between roughness and smoothness. They are sensitive to kindness and pleasant speech. To cows especially, if you want an increase of milk, be kind and social.

JUNE.—It is not pleasant to have that "thistle" nuisance called the "Canada Thistle," but there may be some good reason for it, although there are plenty of that same in the border States, which it would be hard to trace to Canadian origin. We have them. Let us get rid of them. A practical man says:—"I once killed a patch of these thistles by sowing the land to buckwheat so thick that it completely smothered them." He says also, that "a man who wrote on this subject some years ago said that he had cut thistles several years ago from the 15th to the 25th of August, and they had always died." Another cut the thistles in August close to the ground, and put a tablespoonful of salt upon the head of each stalk. They were not killed, but weakened, so that three plowings next season destroyed them all.

JULY.—The surroundings of a farm house often present a cheerless and unpleasant aspect. This ought not to be so. It need not be so. With a little trouble, and without much expense, a nice lawn of grass may be formed. Ra flowers and choice shrubs are set off to advantage by intersecting plots of grass which has been well called the groundwork of rural beauty. By frequent mowing and topdressing, a rough grass plot may be made soft to the foot and graceful to the eye. Take out the weeds, or they will spoil your work. If, after mowing the cut grass shows, rake it off, but if it be, as it were, unseen, let it remain a mulch for the roots. If there are any bare spots, cut them out, and bring in fresh turf. If you cannot get sod, then seed down, but it will require a couple of years to get it into shape. Be determined to have something handsome and you will accomplish it.

AUGUST.—Insurance companies will, perhaps, thank us for suggesting that every farmer should effect an insurance on his buildings. Uninsured, the farmer runs the risk of losing buildings, tools, implements, live stock and crops. Choose a safe company, but by all means insure. The wise precaution enforced by a company begets habits of precaution and carefulness on the part of the insurer. A policy may be vitiated by a reckless use of lights and fire, therefore caution is exercised. Dangerous and explosive oils are avoided, and, in fact, most people will follow advice from another and readily accept regulations prescribed. Men might exercise their own reason, but they do not, and would often run risks, except for the fact that they are required to be careful. Have an insurance on your property.

Thursday.

SEPTEMBER.—A thresher from his youth makes a note of his observations about clover and clover seed. He says, where there was large yield, it was where seed had been sown one bushel to five or six acres, mown the last days of June and plastered after the first crop had been taken off. This thresher says:—"I have raised seed myself that went four and a half bushels to the acre." He experimented in taking clover from the field in three different conditions, and laid away to dry, for the purpose of knowing when was the best time to cut seed clover. The first was when dead ripe; the second, when handsomely brown; and the third, when still greener. When dry the seed was rubbed out, and in the three could see no difference. This shows that the head receives enough sustenance from the stock after it is cut to *mature* the seed, and when cut a little greener nearly every seed can be saved.

OCTOBER.—An experienced correspondent of the *New England Farmer* gives his opinion on the subject of salting cows, which we give in a condensed form.

1. Cows, and even calves (which are not given credit for knowing much) do know when they want salt, and how much they want.
2. If salt is always kept where they can get it, they will eat the quantity they require and no more.
3. That salt fed to cows has as much influence on the milk and butter as the food and drink.
4. That salt fed to cows in just the right time will affect the time of churning as much as four degrees of temperature, and if not fed at all, more than fifteen degrees.
5. That salt gives to butter a clearer and brighter appearance. Others may think differently, but this is given as the result of experience.

begins on Tuesday

NOVEMBER.—In addition to the trade in cattle for the foreign market, there has been considerable business done in the sale of horses. Last September Messrs. Potter and Stevenson visited Canada for the purpose of exporting horses to England regularly. In that month they shipped eleven fine carriage horses. It is believed a profitable trade may be established between Canada and Great Britain. Canadian horses are greatly admired and prized. We mention these facts to suggest the utility of paying attention to the raising of first class animals. It will not pay to attempt a business of this kind, unless the greatest care be exercised in the choice of mares and sires. Common sense dictates this much, but for further and practical particulars, it would be well to consult the best authorities.

begins on Friday, 878.]

DECEMBER.—Now for a bit of old fashioned advice about the proper method of spending long winter evenings. We are aware there are plenty means of spending time, but we recommend the purchase of a few well chosen suitable books for the cultivation of the mind. Of course, preparations for any special vocation is a primary consideration, but there is a tendency to seek only amusement. That is all very well in its place, but experience has taught many people, once young, that if they had spent considerably more time in solid reading and earnest study of nature and science, it would have been greatly to their advantage. The days of opportunity neglected can never be recalled. Be wise to-day, and the to-morrows granted will be all the happier and better.

MILLER'S Carpenter's and Mavor's Spelling Books.

The Royal Family.

THE QUEEN.

VICTORIA, of the United Kingdom of Great Britain and Ireland, &c., Queen, Defender of the Faith. Her Majesty was born at Kensington Palace May 24, 1819; succeeded to the throne June 20, 1837, on the death of her uncle, King William IV.; was crowned June 28, 1838; and married February 10, 1840, to his late Royal Highness Prince Albert. Her Majesty is the only child of his late Royal Highness Edward Duke of Kent, son of King George III. The children of Her Majesty are:—

Her Royal Highness VICTORIA-Adelaide-Mary-Louisa, PRINCESS ROYAL OF ENGLAND AND PRUSSIA, born November 21, 1840, and married to his Royal Highness Frederick William Crown Prince of Germany, January 25, 1858, and has issue five sons and four daughters.

His Royal Highness ALBERT-EDWARD, PRINCE OF WALES, born November 9, 1841; married March 10, 1863, Alexandra of Denmark (Princess of Wales), born December 1, 1844, and has issue three sons and three daughters.

Her Royal Highness Alice-Maud-Mary, born April 25, 1843, married to H. R. H. Prince Frederick Louis of Hesse, July 1, 1862, and has issue two sons and five daughters.

His Royal Highness Alfred-Ernest-Albert, Duke of Edinburgh, born August 6, 1844, married to the Grand Duchess Marie-Alexandrowna, and has issue one son and one daughter.

Her Royal Highness Helena-Augusta-Victoria, born May 25, 1846, married July 5, 1866, Prince Frederick Christian of Schleswig Holstein, and has issue three sons and two daughters.

Her Royal Highness Louisa-Caroline-Alberta, born March 18, 1848, married March 23, 1871, to the Marquis of Lorne.

His Royal Highness Arthur-William-Patrick-Albert, K. G., born May 1, 1850.

His Royal Highness Leopold-George-Duncan-Albert, born April 7, 1853.

Her Royal Highness Beatrice-Mary-Victoria-Feodore, born April 14, 1857.

NEW FACTS ABOUT BUTTER.—We gather the following interesting facts from the *Agricultural Gazette*:—A report has been made to the Board of Inland Revenue by the Principal of the Chemical Laboratory, Somerset House, on experiments conducted by him for the analysis of butter; 117 samples were tested, the result being that while a few samples were found to be very poor in quality, and a few others exceptionally rich, the great bulk examined were found to possess considerable uniformity of composition, the principal variations being apparently due to a difference in the method of manufacture, the different seasons of the year when made, and the various modes of feeding. As might be expected, some of the poorest butters were produced by and obtained from small farmers in Ireland, at a time when there was very little grass, and food was scarce. It was also noticed that the butter was relatively poorer in its essential constituents when the food was chiefly cotton and oil cake, than was the case when roots and grass formed the staple food. A noticeable feature in the results recorded is the great variation in the quantity of water in the different butters, the lowest being 4.15 per cent. and the highest 20.75 per cent. The Devon and Dorset butters, which usually stand so high in the market, were found to contain in nearly all cases a high percentage of water, and one which was procured from the dairy of a private gentleman contained as much as 16.99 per cent. and a second sample, recently obtained from the same source, contained 15.70 per cent. Another point of interest was in some butters undergo when kept in small quantities in glass or earthenware vessels. It was found that whilst some of the finest and best prepared butters undergo little or no change, there is in others a gradual disappearance of the characteristic principles of butter, and a consequent assimilation to the constitution of an ordinary animal fat. This change, which appears to be due to an incipient fermentation, and is generally accompanied by the development of fungi, is probably caused either by the use of sour cream or by insufficient care in making butter.

DOMINION OF CANADA.

Seat of Government, Ottawa.

GOVERNOR-GENERAL.

His Excellency the Right Honorable Earl of Dufferin and Clandeboye, Governor-General of the Dominion of Canada.

Governor's military secretary, Lieut.-Col. Hon. Edward George Percy Littleton, of the Grenadier Guards; Lieut. F. R. Hamilton, 9th Foot, and Lieut. F. Ward, R.N., aides-de-camp; Lieut.-Col. Bernard and Lieut. Col. Cumberland, extra aides-de-camp; F. Baker, private secretary.

Deputy Governors to sign Money Warrants.—Wm. A. Himsworth and E. A. Meredith, LL.D.

LIEUTENANT GOVERNORS.

Their Honors the hon. D. A. McDonald, Ontario; hon. Luc Letelier de St. Just, Quebec; hon. Adam G. Archibald, Nova Scotia; hon. S. L. Tiley, C.B., New Brunswick; hon. Sir Robert Hodgson, Knight, Prince Edward Island; hon. Joseph Cauchon Manitoba; hon. David Laird, North West Territories; hon. A. N. Richard British Columbia.

COMMANDING HER MAJESTY'S FORCES IN BRITISH NORTH AMERICA.

Lieut. General O'Grady Haly, K.C.B.

PRIVY COUNCIL.

Premier and Minister Public Works, hon. Alexander McKenzie; Minister of Justice and Attorney General, hon. Edw. Blake; Minister of Militia and Defence, hon. W. B. Vail; Minister of Customs, hon. Isaac Burpee; Minister of Finance, hon. Richard J. Cartwright; Minister of Inland Revenue, hon. R. Laflame; President of the Privy Council, hon. ———; Minister of Marine and Fisheries, hon. A. J. Smith; Postmaster General, hon. L. S. Huntington; Minister of Agriculture, hon. C. A. P. Palton; Secretary of State for Canada, hon. R. W. Scott; Minister of the Interior, hon. D. Mills; Receiver General, hon. Thomas Coffin. Officers—Clerk of the Privy Council, Wm. A. Himsworth; assistant, J. O. Coté. Clerks.—F. H. Himsworth, H. Alexander, Wm. Horace Lee, Lewis J. Burpee, and Frank Newby; M. Naughton, doorkeeper and messenger; Benoni Grenier, W. Groom and Wm. Reynolds, messengers. Commissioner *per Dedimus potestatem*.—Wm. A. Himsworth.

HORSE-POX.—This is probably identical with cow-pox, being indistinguishable when inoculated on men or cattle. It most frequently attacks the limbs, but may affect the face or other parts of the body. There is usually some little fever, which, however, passes unnoticed by the owner. Then swelling, heat and tenderness supervene commonly in a heel, and firm nodules form, increasing to one-third or one-half an inch in diameter, the hair bristles up, and the skin reddens unless previously colored. On the ninth to the twelfth day, a limpid fluid oozes from the surface and agglutinates the hairs in yellowish scabs, on the removal of which a red, raw depression is seen with the scab fixed in its centre. In three or four days the secretion ceases, the scabs dry up and the parts heal spontaneously. It is easily transmitted from horse to horse, to man or to the cow. No treatment is required.—*Farmer's Veterinary Adviser*.

Courtesy is a science of the highest importance. It is like grace and beauty in the body, which charm at first sight and lead to further intimacy and friendship, opening a door that we may derive instruction from the example of others, and at the same time enabling us to benefit them by our example, if there be anything in our character worthy of imitation.

RATES OF POSTAGE.

Postage on all matter transmissible by Post—within Canada—to Prince Edward Island, Newfoundland, Great Britain, &c., &c.

LETTER RATES.

Between places within the Dominion.....	3cts per $\frac{1}{2}$ oz.
Between Canada and the United States.....	3cts. per $\frac{1}{2}$ oz.
Between Canada and Newfoundland.....	5cts. per $\frac{1}{2}$ oz.
Between Canada and the United Kingdom.....	5cts. per $\frac{1}{2}$ oz.

Pre-payment must, in all cases, be made by Postage Stamp.

REGISTRATION FEES.

Within the Dominion.....	2cts. each letter.
To the United States.....	5cts. do do
To Newfoundland.....	2cts. do do
To the United Kingdom.....	8cts. do do

These Registration Fees are, of course, in addition to the Postage.

NEWSPAPER RATES.

Between places in the Dominion, to the United States, to Newfoundland, publishers pre-pay their edition in bulk, at the rate of one cent for each pound weight; no further charge on delivery. Transient newspapers within the Dominion, to the United States, Newfoundland, 1c. per 4 oz., to the United Kingdom, 2c. per oz., to be pre-paid by stamp.

ON CANADIAN PERIODICALS.

From office of publication, or from news agencies, for places in the Dominion, to the United States or to Newfoundland, the postage rate is the same as for Newspaper, *i.e.*, 1c. per 4 oz., paid. Transient Periodicals, 1c. per 4 oz.

PERIODICALS AND BOOKS FOR UNITED KINGDOM

Are subject to the British Book Rates, namely:—

Between 1 oz. and 2 oz.....	2c.
do 2 " " 4 ".....	4c.
do 4 " " 8 ".....	6c.

And so on, the scale progressing by a rate of 2c. for every 2 oz.

LOCAL OR "DROP" LETTERS AND POSTAL CARDS.

1c. per $\frac{1}{2}$ oz., to be pre-paid.
Canadian Postal Cards of 1c. each circulate within the Dominion, Newfoundland and United States.

MISCELLANEOUS POSTAL MATTER.

On Books, Pamphlets, Occasional Publications, Printed Circulars, Price-Current, Hand Bills, Book and Newspaper Manuscript, Printers' Proof Sheets, Maps, Prints, Drawings, Engravings, Lithographs, Photographs, Sheet Music, Documents, wholly or partly printed or written, such as Deeds, Insurance Policies, Militia and School Returns, or other documents of like nature, Packages of Seeds, Cuttings, Bulbs, &c., Patterns or Samples of Goods or Merchandize, when posted in Canada, for any place in Canada, the rate is 1c. per 4 oz. in weight, to be pre-paid by stamp.

Miscellaneous matter as above specified for the United States or Newfoundland may also be forwarded on pre-payment of the 1c. per 4 oz. rate, with the exception of packets of samples and patterns of merchandize addressed to the United States, on which a special rate of 10c. has to be prepaid, which must not exceed 8 oz.

KEEPING POULTRY IN LARGE NUMBERS.—Keeping poultry, as a business to support a family, has often been tried in the United States and England, but with very poor success. The difficulty seems to be that the fowls, when kept in large numbers, are much more subject to diseases, and to become infected with vermin. That is the experience of all persons who have kept fowls extensively. Besides these difficulties a large number of fowls cannot be made to extend their foraging over a sufficiently extended surface of land, 20 to 30 rods from their house being about as far as they can be made to roam; and 1,000 or more would soon exhaust their locality of all bugs and worms upon it, eat every spear of grass, and begin to sick-en and fall off in laying egg. If fowls could be kept in lots of about 100 each, 40 rods apart, there might be enough kept on a farm to support the owner, as the profit would average about one dollar per fowl.

MONEY ORDERS.

Every money order office in the Provinces of Quebec, Ontario, New Brunswick, Nova Scotia, Prince Edward Island, Manitoba and British Columbia issues money orders on every other money order office in these Provinces, as well as on every money order office in the United Kingdom. Every money order office in the United Kingdom also issues money orders on every money order office in these Provinces.

All the money order Post Offices are authorized to draw money orders on each other for any sum up to \$100, and for as many orders of \$100 each as the applicant may require, upon the following terms, viz.,

On Orders up to \$4.....	2 cents
“ “ \$10.....	5 “
“ over \$10 and up to \$20	10 “
“ over \$20 “ \$40.....	20 “
“ over \$40 “ \$60.....	30 “
“ over \$60 “ \$80.....	40 “
“ over \$80 “ \$100.....	50 “

MONEY ORDERS ON THE UNITED KINGDOM.

The money order offices throughout the Dominion also draw upon all the money order offices in England, Ireland and Scotland, and the Channel Islands, for any sum up to £10 sterling, and grant as many orders for £10 sterling each as may be needed to make up the amount to be remitted.

The terms are as under:

On Orders up to £2.....	25 cents.
“ over £2 and up to £5.....	50 “
“ over £5 “ £7.....	75 “
“ over £7 “ £10.....	\$1.00

MONEY ORDERS ON THE LOWER PROVINCES.

The money order offices in Canada draw also upon all money order offices in Newfoundland. Orders like those of the United Kingdom are made payable in sterling money, and for sums up to £10 sterling. The terms are:

For Orders up to £5, 25 cents.
“ over £5 and up to £10, 50 cents.

No half cents can be introduced into orders.

ORDERS ON BRITISH INDIA.—On Orders up to £2, 30 cts.; over £2, and up to £5, 60 cts.; over £5, and up to £7, 90 cts.; over £7, and up to £10, \$1.20.

ORDERS ON UNITED STATES.—On Orders up to \$20, 25 cts.; on Orders up to \$40, 50 cts.

No money order exceeding \$100 in amount can be granted in any office in Canada; but Postmasters are at liberty to grant two or more orders for \$100, or for any lesser sum. They cannot, however, grant two or more orders for sums of or under \$30 on the same day to the same applicant in favor of the same payee.

COWS COMING FRESH—Some dairymen insist that the cow, soon after calving, should be allowed to go to the trough and take all the cold water that the appetite craves. We do not approve of this course, preferring to give her a pail of tepid water in which a little bran is mingled, making a thin gruel. Our practice has been to give freely tepid water, or sufficient to satisfy thirst, and not allow cold water from the trough until the third day, and not then if the cow seems to be weak or ailing. It is important that the milk from the udder be completely drawn soon after the cow has calved, and if the bag is swollen or inflamed, it will require attention in this respect, frequently three or four times during the day. So soon as the feverish condition of the cow incident to calving shall have subsided, generous feed should be given, bran mashes at first, which may be increased gradually with additions of oatmeal and rations of roots of which mangolds and carrots are best, as they give no unpleasant flavor to the milk.

POST OFFICE SAVINGS BANK.

1. The direct security of the Dominion is given by the Statute for all deposits made in the Post Office Savings Banks.

2. Any person may have a deposit account, and may deposit nearly any number of dollars, from \$1 up to \$300, or more, with the permission of the Postmaster General.

3. Deposits may be made by married women, and deposits so made, or made by women who shall afterwards marry, will be repaid to any such women.

4. As respects children under ten years of age, money may be deposited—

FIRSTLY—By a parent or friend as Trustee for the child, in which case the deposits can be withdrawn by the Trustee until the child shall attain the age of ten years, after which time repayment will be made only on the joint receipts of both Trustee and child.

SECONDLY—In the child's own name—and, if so deposited, repayment will not be made until the child shall attain the age of ten years.

5. A depositor in any of the Savings Bank Post Offices may continue his deposits at any other of such offices without notice or change of Pass Book, and can withdraw money at that Savings Bank Office which is most convenient to him. For instance, if he makes his first deposit at the Savings Bank at Cobourg, he may make further deposits at, or withdraw his money through, the Post Office bank at Collingwood or Quebec, Sarnia, Brockville, or any place which may be convenient to him, whether he continue to reside at Coburg or remove to some other place.

6. Each depositor is supplied with a Pass Book, which is to be produced to the Postmaster every time the depositor pays in or withdraws money, and the sums paid in or withdrawn are entered therein by the Postmaster receiving or paying the same.

HAY TEA FOR CALVES.—The practice common in most of our dairy districts, of killing calves when only a few hours old, in order to save the milk which they would require in rearing, is, in our opinion, carried to a far greater extent than is either necessary or profitable. It certainly seems to be a needless species of cruelty to both mother and offspring, and while we have no disposition to interfere with the personal rights of dairymen, or force our opinions upon their notice, we are inclined to think there are better ways of disposing of surplus calves than "deaconing." The truth is we have none too many cows, or beef cattle, and it is a shame to destroy tens of thousands of calves annually which bring nothing to the owner except the few shillings received for the skin. It is certainly possible to raise these calves without giving them fresh new milk. With a little skimmed milk and hay tea they will thrive almost if not quite as well as upon the pure lacteal fluid. Fifty years ago Sir James Stewart Denham, of Scotland, instituted experiments in rearing calves with hay tea taken from their mothers when three days old, and those experiments were eminently successful. Two pounds of hay were steeped in twenty quarts of water, and then boiled down one-half, and to this was added a quart of skimmed milk. In some instances molasses was added also to give sweetness, and the calves not only thrived on this diet but preferred it to fresh milk. When calves are taken from their dams immediately, care should be taken to feed them, at first, with their mother's milk, which at the time is peculiarly adapted to act as a gentle purgative which rids the bowels of the calf of the meconium with which they are charged at birth.

Memory is strengthened by exercise, and life by remembrances.

Game of all kinds, birds, rabbit, or deer, can be kept sweet a long time by putting finely pulverized charcoal in a thin muslin bag and placing it inside the game. Change the charcoal every day. It is excellent to keep any meat, fish or fowl pure and sweet. Wash clean before cooking.

"I rise for information," said a member of a legislative body. "I am glad, very glad to hear it," said a bystander, "for no man wants it more."

7. Each depositor's account is kept in the Postmaster General's Office, in Ottawa, and in addition to the Postmaster's receipt in the Pass Book, a direct acknowledgment from the Postmaster General for each sum paid in is sent to the depositor. If this acknowledgment does not reach the depositor within ten days from the date of his deposit, he must apply immediately to the Postmaster General, by letter, being careful to give his address and, if necessary, renew his application until he receives a satisfactory reply.

8. When a depositor wishes to withdraw money, he can do so by applying to the Postmaster General, who will send him by return mail a cheque for the amount, payable at whatever Savings Bank Post Office the depositor may have named in his application.

9. Interest at the rate of 4 per cent. per annum is allowed on deposits, and the interest is added to the principal on the 30th June in each year.

10. Postmasters are forbidden by law to disclose the name of any depositor, or the amount of any sum deposited or withdrawn.

11. No charge is made to depositors on paying in or drawing out money, nor in relation to their deposits.

12. The Postmaster General is always ready to receive and attend to all applications, complaints, or other communications addressed to him by depositors or others, relative to Post Office Savings Bank business.

13. A full statement of the Regulations of the Post Office Savings Bank may be seen at the nearest Post Office.

THE STAMP ACTS.

These Acts impose a duty on every promissory note, draft, or bill of exchange, not exceeding \$25, 1 cent; not exceeding \$50, 2 cents; less than \$100, 3 cents; not less than \$100, if executed singly, 3 cents per \$100, or fraction thereof; if executed in duplicate, 2 cents per \$100, or fraction thereof on each part; if executed in more than two parts, 1 cent per \$100 or fraction thereof on each part.

Any interest payable with note at maturity must be counted as part thereof. The duty is to be paid by *bill stamp* on which the date is to be written. Bank notes, checks, and money orders are exempt. These Acts impose heavy penalties for violation.

FACTS WORTH KNOWING.

Much of the trouble experienced in postal matters arises from carelessness, and a few general hints may be found of value:—

See that every letter, newspaper, or packet is securely folded and sealed, for every such packet has to be several times handled, and in the mail-bag is exposed to compression and friction.

Carefully secure every letter containing money or valuables, first with gum or mucilage and then with wax, and be sure to leave a good impression of a seal.

Never seal with wax letters for East and West Indies, and other hot climates, as the wax melts and letters adhere to one another. The practice gives rise to serious inconvenience and injury.

When letters are delayed or missing, communicate immediately with the Inspector of the Division in which the Post Office is situated. In the case of a missing letter state the exact contents, address, the office at which the letter was posted, the name of the person by whom posted and the name of the person by whom received at the office. In case of a delayed letter or paper, send the envelope or cover in an entire state to the Inspector, so that the place of delay may be ascertained by an examination of the post marks.

In the event of a supposed abstraction of money or valuables from a letter, send the letter and cover to the Inspector for the Division in which is situated the office at which the letter was delivered, stating day and hour on which delivered, name of Postmaster or Clerk by whom delivered, and persons by whom received.

COURTS.

PROVINCE OF QUEBEC.

COURT OF QUEEN'S BENCH.—17th to 27th of every month, except January, July and August.

COURT IN APPEAL AND ERROR.—Montreal, 11th to 22nd March, June, September and December; Quebec, 1st to 8th March, June, September and December.

CROWN SIDE.—Quebec, 27th April and 27th October; Montreal, 24th March and 24th September; Three Rivers, 23rd March and 23rd September; Sherbrooke, 6th March and 1st October; Kamouraska, 23rd March and 18th December; Aylmer, 21st January and first July; Percé, 13th March and 13th August; New Carlisle, 13th January and 13th September; Arthabaskville, 19th February and 19th October; Beauce, 20th June and 20th October; Montmagny, 25th March and 25th November.

TERMS.

MONTREAL.—Hochelaga, Jacques Cartier, Laval, Vaudreuil, Soulanges, Laprairie, Chambly, Vercheres and City of Montreal. Held at Montreal 1st May to 30th June, 1st September till 20th December.

QUEBEC.—Portneuf, Quebec, Montmorenci, Levis, Lotbinière and City of Quebec. Held at Quebec, from 1st to 5th of every month, except January, July, and August.

OTTAWA.—Ottawa and Pontiac. Held at Aylmer, from 13th to 19th February, June and November.

THREE RIVERS.—Maskinongé, St. Maurice, (including City of Three Rivers, Champlain and Nicolet. Held at Three Rivers from 17th March to 22nd of June, September and December.

IMPROVING PASTURES.—In the dairying districts more improved land is devoted to pasturage than to all other purposes, and more income is derived from it annually. Yet there is comparatively little done to improve this branch of husbandry. It is noticeable in passing through the country that pastures as a general rule are growing less productive, and the quality of feed poorer, by reason of foul weeds that are increasing in the soil. Thistles, milkweed, daisies and many other unwholesome weeds, occupy the soil instead of nutritious grasses. To eradicate them and get a clean sward of grass that will pay for fertilizing, keep them from seeding for a season, so their seed will be ploughed under, then cultivate and kill the root and re-seed with a variety of grasses adapted to the soil. Mow the first crop of grass, to give the roots a good spread in the soil before tramping it by cattle, and keep cattle off in the spring till the grass gets sufficient growth to strengthen and protect its root. It will then yield more feed during the season following than if kept closely grazed in early spring. If cattle are turned into large pastures before there is food enough to get their fill, they rove about and cripple the young grass by their travel, and acquire thereby a restless habit of roving which lessens their thrift. Where the sward is not much engrossed with foul weeds, many may be destroyed as follows:—Daisies, Johnswort, and others that are not top rooted, are killed at once by pulling off the top and throwing a handful of salt upon the root bed. The milkweed (so called) is easily kept down by whipping and splitting the leaves late in August; then the thick sap will flow so copiously from the wounded stalk so as to kill the root. No time of the farmer is better employed than in plucking all foul weeds before they go to seed; for if thoroughly done in due time it will enable him to keep master of his soil. No practice will more fully verify the old saying, that one stitch in time saves nine. Dairy farmers especially should war against any plant growth that would injure the quality of milk for butter and cheese, or lessen the growth of others that are more desirable. The quality of milk is varied by the kind of forage eaten. It therefore behoves the milk producer to keep a clean grass sward for grazing with cows.

CIRCUIT COURTS.

JURISDICTION FOR SUMS NOT EXCEEDING \$200.

MONTREAL DISTRICT.—Montreal Circuit, Montreal, 10th to 15th of every month except January, July and August.

QUEBEC DISTRICT.—Quebec Circuit Court, 16th to 21st January and June and 20th to 25th of every month, except July and August.

THREE RIVERS DISTRICT.—Three Rivers Circuit, Three Rivers, 22nd to 27th March, June, September and December.

OTTAWA DISTRICT.—Ottawa Circuit, Aylmer, 7th to 12th February, June and November.

Ottawa County, (2nd), Papineauville, 7th to 10th January, May and September.

Ottawa County Circuit. Held at Buckingham, 19th and 20th January, May and September.

PROVINCE OF ONTARIO.

COURT OF ERROR AND APPEAL.—Constituted for the hearing of appeals in civil cases from the Courts of Queen's Bench, Chancery and Common Pleas and appeals in Criminal cases from the Courts of Queen's Bench and Common Pleas. From the judgment of this Court, an appeal lies to the Supreme Court of Canada, in cases over \$4,000, or where annual rent, fee, or future pleas and appeals in criminal cases from the Courts of Queen's Bench and rights of any amount are effected.

COURT OF QUEEN'S BENCH.—The jurisdiction of this Court extends to all manner of actions, causes and suits, criminal and civil, real, personal and mixed, within Ontario, and it may proceed in such, by such process and course as are provided by law.

COURT OF COMMON PLEAS.—This Court has the same powers and jurisdiction, as a Court of Record, as the Court of Queen's Bench. Writs of summons and capias issue alternately from either Court.

SALT FOR SPRING CROPS.—Many farmers in some towns of this country are using salt on oats and barley this spring. The refuse salt can be bought at about \$2.50 per ton in bulk, and costs little more than gypsum. Salt has been used considerably on winter wheat, and with good results, but is believed to be even better on spring grain. The advantage is greatest in dry seasons, and when sown with wheat, winter snows and rains always intervene before the grain heads. It is found that salt makes the straw of all grain brighter, and the berry plumper. It is claimed especially for its use on barley that it makes the grain fill more slowly in hot and dry weather. At a meeting of the Western New York Farmers' Club, May 2nd, S. Reed and D. E. Rogers said that salt had proven fully as beneficial to all crops, except clover, as gypsum. Now that salt can be procured so cheaply, they, with their neighbors, are sending for it by the boat-load. Much of this refuse salt consists of the scrapings of salt kettles, and I believe contains generally a considerable portion of sulphate of lime.

Some interesting facts were brought out about plaster, or gypsum. It is not usually of much benefit on oats, barley or wheat, excepting where the land has recently been clovered. It thus seems that the affinity of plaster for clover extends to subsequent crops. Fields which have been in clover are usually warm and dry. The soil is also filled with decaying clover roots, which must be giving off ammonia. If one use of gypsum be to fix ammonia and make it available as plant food, its good effects on clover sod may be easily explained. Salt also, like gypsum, appears to be often of more benefit to crops than we could infer from its constituent elements. Undoubtedly salt dissolves certain kinds of plant food, and makes it more available than it could be otherwise. We know, however, that its benefits extend to the second year, as it does nearly as much good to the grass as to the preceding grain crop.

COURT OF CHANCERY.—This Court has the like jurisdiction as the Court of Chancery in England, in case of fraud, accident, trust, executors, administrators, co-partnerships, account, mortgages, awards, dower, infants, idiots, lunatics and their estates, waste, specific performance, discovery, and to prevent multiplicity of suits, staying proceedings at law prosecuted against equity and good conscience, and may decree the issue, repeal or avoidance of letters patent, and generally the like powers which the Court of Chancery in England possesses.

COUNTY COURTS.—Presided over by a resident Judge in each County. Their jurisdiction extends to all personal actions where the debt or damages claimed do not exceed \$200; and to all suits relating to debt, covenant or contract where the amount is ascertained by the acts of the parties or signature of the defendant, to \$400; and to all bail bonds and recognizances of bail given in the County Court, to any amount; but not to cases involving the title to lands, validity of wills, or actions for libel, slander, crim. con. or seduction.

SURROGATE COURTS.—The jurisdiction of these courts relates to all testamentary matters and causes, and to the granting or revoking of probate of wills and letters of administration of the effects of deceased persons having estate or effects in Ontario, and all matters arising out of or connected with the grant or revocation of probate or administration, subject to an appeal to the Court of Chancery.

COURTS OF GENERAL SESSIONS.—The County Judge in each county holds a Court of General Session in his county semi-annually on the second Tuesday in June and December, except in the County of York, in which county said Court is held three times, commencing on the second Tuesday in March, June and December, for the trial of cases of felony and misdemeanor, but treason and capital felonies are exempt from their jurisdiction.

Terms of the Courts.

COURT OF ERROR AND APPEAL.—This Court holds its sittings twice a year at Toronto in the months of January and June, upon such days as it may by rule or order from time to time appoint.

LAW TERMS.—Hilary begins first Monday in February, and ends Saturday of the ensuing week; Easter begins third Monday in May, and ends Saturday of the second week thereafter; Michaelmas begins third Monday in November, and ends Saturday of the second week thereafter.

CHANCERY TERMS.—*Examination Terms.*—From 1st Tuesday of February to the Saturday after the 2nd Tuesday of April; and from 1st Tuesday of September to the Saturday after 1st Tuesday of November. *Hearing Terms.*—From 4th Monday in April until Saturday of the following week, and from 3rd Monday in November until Saturday of the following week. The Court also sits every Tuesday (except during the regular vacations.)

COUNTY COURT TERMS.—The several County Courts in Ontario hold and terms in each year, to commence on the first Monday in January, April, July four October.

SALTING FOR WEEDS.—Weeds may be destroyed by scattering a small quantity of salt regularly over the walk, but this should only be done when the weather is fine, or it may be washed to the sides and do much damage to the verges. By treating walks to a slight dressing of salt every spring and autumn, they may be kept free of weeds at a minimum of the amount of labor and cost that would be required to pull them up, and not only this, but it has such an effect in killing all mossy conifers as to render the gravel always bright and new looking, nearly equaling in that respect any fresh raised from the pit and newly laid down. It may be remarked, however, that it does not do to use salt where the edgings are of box, as that is sure to suffer injury, and perhaps be killed altogether; but grass verges will stand it well if not sown too close to soak the roots, or get washed to them, should rain by chance occur immediately afterwards. Many other remedies have been recommended to extirpate weeds from walks, such as the use of some of the mineral acids, but there is nothing so cheap and simple, or that can be so readily and safely applied, as salt.

Never mind any other dowry if you have industry and economy.

The day of judgment is always nearer the day of promise than it seems.

The rays of happiness, like those of light, are colorless when unbroken.

It is sad but true that we can silence our consciences easier than our desires.

A good constitution is like a savings-box, its value is not known until it is broken.

What a catalogue of social virtues a man requires to make him generally beloved!

What wits we should be if we only uttered the bright things we think of when the occasion has past.

It is man the conqueror, not time, who works so much destruction on the monuments and works of art.

Pleasure is a subject in which we are all interested. At twenty-five we kill pleasure, at thirty we enjoy it, at forty we husband it, at fifty we hunt after it, and alas! at sixty we regret it!

An exchange says that it is very poor practice, indeed, to compel cows to live upon what they cannot eat with a relish. The appetite should be kept keen by a frequent change of food, or by a mixed ration, such as the system requires.

It is a very high mind to which gratitude is not a painful sensation. If you wish to please, you will find it wiser to receive, solicit even, favors, than accord them; for the vanity of the obligator is always flattered, that of the oblige rarely.

It is especially important to breed from first-class stock, since the bull gives character to the progeny more than does the cow. The product of an inferior cow is better from a first-class bull than that of an inferior bull out of a first-class cow.

I will govern my life and thoughts as if the whole world were to see the one and to read the other; for what does it signify to make anything a secret to my neighbour when to God (who is the searcher of our hearts) all our privacies are open?—*Seneca.*

We find in a late experiment, illustrated by Dr. Stephenson of Edinburgh, Scotland, that ewes were selected and taken from each flock that had been some weeks in the table gives the re-

We find in a late number of the North British *Agriculturalist* an interesting experiment, illustrative of the subject, of special feeding and quality of Milk made by Dr. Stephenson Macadam, and reported by him to the Pharmaceutical Society of Edinburgh, Scotland. This experiment was upon ewes. Ten ewes, with lambs, were selected and placed in a pasture with abundant grass, in May. The milk taken from each ewe was kept separate and analyzed separately. After the sheep had been some weeks upon this good grass, the ewes were milked, and the following table gives the results of the analyses of the ten samples :

IN 100 PARTS BY WEIGHT :

Ewe No.	Total Solids.	Fat in Solids.	Solids not Fat.	Ash in Solids.
1.....	17.45	5.02	12.43	0.79
2.....	18.77	6.56	12.21	0.81
3.....	20.25	8.94	11.31	0.82
4.....	21.01	9.56	11.45	0.95
5.....	17.76	5.30	12.46	0.87
6.....	18.76	6.63	12.13	0.81
7.....	18.94	7.37	11.57	0.73
8.....	17.04	5.37	11.67	0.93
9.....	17.44	4.56	12.88	0.93
10.....	20.13	8.46	11.67	0.89
Average of all.....	18.75	6.77	11.97	0.85
Lowest.....	17.04	4.56	11.31	0.73
Highest.....	21.01	9.56	12.88	0.95

These analyses show the remarkable richness of ewes' milk, when fed only upon grass. To test the effect of richer food, arrangements were made to give other food besides the pasture to certain ewes. Numbers 1, 2 and 3 were each fed daily with one pound linseed cake for ten days ; Nos. 4, 5, and 6 with a pound of cotton cake ; Nos. 7, 8, and 9 with a pound of oats ; while No. 10 was given only grass. All ran in pasture except when eating their allowance of other food. At the end of the ten days the ewes were again milked, and the ten samples gave the following results on analysis :

Analysis of milk from ewes fed on artificial food in addition to natural pasture :

IN 100 PARTS BY WEIGHT.

The difference in composition of the milk from the extra feeding is not uniform, but it will be perceived that the average total solids were increased from 18.75 to 20.11 per cent., which may be considered a great change to be made in ten days ; but in what constituent of the milk was the change made ? If we examine the table, we shall find the change to be made almost wholly in the fat ; the average was increased from 6.77 per cent. to 8.27 per cent. But the greatest change was

made by the addition of oats to the grass feed. Here the total solids were increased from 17.81 to 20.50 per cent, or nearly 3 per cent. Here, also, the change is in the element of fat from 5.77 to 8.62 per cent. The linseed cake did not increase the average of the solids in the milk of three sheep but a mere fraction, as the milk of No. 3 seemed to have lost in solids from 20.25 to 16.28 per cent., while the other two sheep gained very much, but this gain was neutralized by the loss of No. 3. The cotton cake also increased the fat $1\frac{1}{2}$ per cent.

A careful examination of these tables will show conclusively, so far as a single experiment can, the effect of extra food of a character rich in oil and albuminoids. Your readers will also be interested in these tables, as giving the fullest information upon the composition of the milk of ewes yet published. It will show a good foundation for the high reputation of the cheese made in France from ewes' milk, and it will also assist in dispelling the erroneous teachings of the German experiments.—*Country Gentleman.*

WHITE HOLLAND TURKEYS—This variety of turkeys is becoming more popular as the public become better acquainted with their excellent table qualities and beauty; for certainly a large, clean, healthy white turkey is as beautiful a fowl as any one could wish to see. They are pure white in plumage, with pink legs, and of good size, though not so large as the bronze, and yet large enough for market; and we are told are as hardy, and stand our severe changes of temperature in winter better than any other variety. The feathers are nearly equal to geese feathers for sale, and will bring almost as much if carefully selected, and the large feathers stripped.

In raising poultry, it is not sufficient merely to provide proper food; but the food must be properly given. Some persons have an idea that if they throw down a heap of corn once or twice a day that is all that is required; but no plan is so extravagant nor so injurious as this. The corn or other food should be scattered as far and wide as possible, that the birds may be longer employed in finding it, to the benefit of their health; and that they may not accomplish in a few minutes that which should occupy them for hours.

A great sale of Canadian short-horns took place in England, on the 4th Sept. at which forty-two head of cattle were sold for eighty-two thousand dollars. Two Duchess heifers brought the large sum of forty-five thousand dollars. This sale will no doubt prove beneficial to Canada, as directing attention to her capabilities for raising the more thoroughbred varieties of cattle, as well as supplying superior beef for the shambles.

READY.—A farmer being provided poorly with materials of sustenance for his men, fed them with pork cooked with rind upon it. A young man of the company not liking that outer portion of the food, was observed by the host to be carefully removing the outside covering, whereupon the latter said: "Young man, we eat rind and all here." To which the young youth replied, "All right, old man, I'm cutting it off for you."

—"And now, Mrs. Sullivan," said the counsel, "will you be kind enough to tell the jury whether your husband was in the habit of striking you with impunity?" "Wid what, sir?" "With impunity." "He wuz, sir, now and thin; but he struck me oftener wid his fisht."

If Canadian agriculture has an unsatisfied need, it is surely the need for more intelligence and more enterprising interest on the part of its working men and women. From one end of the land to the other, its crying defect—recognized by all—is that its best blood—or, in other words, its best brains and its best energy—is leaving it to seek other fields of labor. The influences which lead these best of the farmers' sons to other occupations is not so much the desire to make more money, or to find a less laborious occupation, as it is the desire to lead a more satisfactory life—a life where that part of us which has been developed by the better education and better civilization for which, in this century, we have worked so hard and so well, may find responsive companionship and encouraging intercourse with others.
