PROFESSOR LEOESTER. Organist of St. Luke's Church, Professor of the PIANO, ORGAN, VOICE PRODUCTION and other organs have taken the highest honors...

Miramichi Advance. PARTIES vs. THE PUBLIC. The Monoton Transcript says: "The Times has boasted very much about the conversion of the Chatham Advance to the Conservative side four years ago..."

Lighthouse Inspectorship. It is rumored that the office of Inspector of Lighthouses is to be revived. It ought not to have been abolished, and, probably, would not have been but for the peculiar circumstances in which the former inspector, James Mitchell, was placed just after his brother, Hon. Peter Mitchell, lost the control of Dominion patronage in Northumberland.

A Much-Needed Work. The inhabitants of Lots Seven and Eight, on the Straits side of Prince Edward Island, are bringing to the attention of the Dominion government their claim to assistance in establishing a place where they may land their fish and other produce.

Miramichi Lumber for 1895. Although about twenty-five millions a foot more of logs will be put into Miramichi waters this year than last, yet the prospects are that the quantity of deals available for shipment in the season of '95 will not be as large as that of '94.

Will There be an Election? Everybody continues to enquire whether there will be a Dominion election very soon and everybody can only say they don't know. The probability is that there will be an election before another session of parliament.

Mr. Powell's Amendment. Mr. Powell's proposition amendment to Provincial Secretary Mitchell's motion to issue Supply appears to have fallen very flat. None of the daily papers thought the debate on it of sufficient importance to publish, and the legislature rejected it by a vote of 24 to 12.

Wood Goods in England. We have Messrs. Farwell & Jardine's annual Timber, Glass and Paper Directory. It presents a very discouraging outlook for the spruce trade of the opening year. Prices are a shade lower than at this time last year, and the stocks on hand are a third larger.

The "Hotel" Wharf near Burnt Church. The plans and specifications of the proposed wharf to be built by the Dominion Government off the Davidson River, a short distance above Burnt Church River, are at the Post Office, Chatham, where persons desiring to tender for the construction of the work may examine them.

COLD FRIDAY—Friday, Feb. 8, 1891, was the coldest cold Friday, so that persons desiring to tender for the construction of the work may examine them. They are said to be the plans originally prepared and they show (on tracing linen) a structure much more substantial and expensive than that at Neguac.

making people feel as uncomfortably cold as that day did.—[Globe 9th.] CHATHAM ALSO.—It is to be hoped that in the redistribution act promised by the local government, Chatham will not be included in the same direction as is now the case.

U. S. LUMBER IN CANADA.—The Winnipeg Commercial states that a peculiar phase has developed in the lumber trade in Western Ontario lately, being the presence on the market of pine lumber from the United States.

A VERY PLEASANT LITTLE AFFAIR was the inspection of the Bordeaux Claret Company's cellars by His Honor Lieutenant-Governor Clouston. The mausoleum had sent out invitations to several prominent citizens, who were in attendance to meet His Honor.

BYRONIA AND CEREY.—A Wilmington, Delaware, despatch of 5th inst. says: "The Very Rev. Father Sylvester Jorg, of the Catholic Church of the Sacred Heart, had a controversy with some of the Wilmington clergy about kneeling."

Archbishop Sattoli on the Press. Archbishop Sattoli was one of the notable guests at the tenth annual dinner of the Grindon Club in Washington on the evening of 5th inst.

Many novel and interesting features of entertainment were introduced, and the speeches were unusually bright and able, notably among them that of Mr. Sattoli, who had his first opportunity since his resignation in the United States of addressing the press.

"Society is an organized body. The government is its head; the people its members; its blood, the wealth, has its beginning in the industry of the people; its morality and religion are its heart; its press may well be termed its lungs since it serves as the organ of public respiration."

A Big Nova Scotia Lumber Company. A big company has taken hold of the spruce trade in Nova Scotia. It is the purchase of 12,000,000 feet of lumber lands in Nova Scotia and the deal is about completed.

"It is not the public press which at the proper time should make known to the makers of law what should or what should not be done, but the common welfare. Can any one deny to the public press the right in matters which concern the people at large to estimate the value of public acts and especially does the public press act as the public conscience since the mass of the people cannot speak and act under the influence of impressions received from their daily papers."

"Up to the fifteenth century there was no vehicle of intellectual and moral light except the manuscript codices for the law and the records of the courts. For the many, and therefore it was more necessary than in our times to have monuments, pictures and statues by the sight of which youth might be inspired to imitate the generous and glorious acts of heroic men."

COLD FRIDAY.—Friday, Feb. 8, 1891, was the coldest cold Friday, so that persons desiring to tender for the construction of the work may examine them. They are said to be the plans originally prepared and they show (on tracing linen) a structure much more substantial and expensive than that at Neguac.

enlightenment and betterment of mankind, bringing with it that reward, richer than the mere accumulation of wealth, the consciousness of being a factor in the onward progress of humanity. If, then, the public press is a kind of social priesthood, one can easily understand that those who administer it should be chosen from their high office and conform to the highest moral and sacred duty. I may not be indiscreet in suggesting that over the door of every newspaper building should be inscribed the words "Truth, Justice, Honesty, Of all for all."

"ADVANCE" Scientific Miscellany. THE DAILY ACTIVITY OF ANIMALS.—THE AIR AS A ROCK CARRIER.—SMALL COOKING SCHOOLS.—TEMPERATURE AND ANOMALY.—SCREENING EFFECT OF ATMOSPHERIC DUST.—STRUCTURE OF THE AIR LIQUID.—A NEW FIBRE PROCESS.—A MAN DISSOLVED IN ACID.

A new species of girdle of a bright chestnut color, with almost invisible white stripes—has been discovered in Smallland by Major Wood, of the British army.

An Inter-Continental Blizzard. The weather of last week was unusually stormy and cold, causing great human suffering and damage to property. It is generally supposed that we, in Northern New Brunswick, are especially visited by snow storms and cold waves, but while we have, of late shared with others of the zone in the former we have been surprised over the fact that the weather has been colder in more southern latitudes of both Europe and Africa.

The air has received too little credit as a geological agent, in the belief of Prof. J. A. Udden, of Augustana College. It is 813 times lighter than water, and exerts its erosive action on the surface of the earth's crust in a far more important way than is generally supposed.

About 120 elephants are now living in Europe, according to Mr. C. J. Cornish. Nearly all belong to the Indian species, the less delicate African elephants numbering only about a half-dozen.

The refinements and changed conditions of modern civilization are transforming man into quite a different creature from that of a few generations ago. The latest developments in the art of the intellect are a certain American instrument for intestinal use 14 to 16 inches long, the London Lancet says.

Cotton and other substances regarded as bad conductors of heat have been tested under great cold at Mr. Ronal's laboratory. At temperatures lower than about 80 degrees below zero C., the substances behaved like perfect conductors of heat radiation and copper cylinders, cooled 170 degrees below zero (274 degrees below zero F.) rose in temperature quite as rapidly when used in cotton wool 20 inches thick as when used in air.

Investigations by Prof. A. Bartoli have proven that atmospheric dust exerts a very considerable influence on the intensity of the sun's rays passing through it. In July 1892, the great eruption of Etna filled the air in the vicinity with an impenetrable dust, which fell gently, and gave the sun a slight reddish tint. On a calm cloudless day it was found that 28 per cent of the heat transmitted by pure air was intercepted by this dust.

Artificial whalbone is made from leather by a German inventor. The material is soaked for three days in sulphate of iron, and then in a solution of soda, slowly dried, exposed to a high temperature, and afterward put under heavy pressure. Genuine whalbone is scarce, and good imitations will find abundant uses.

The formation of the electric arc between carbon rods has been exhibited by Prof. J. A. Fleming in a Royal Institution lecture. Experiment has proven that the arc cannot be started unless either the rods are first brought into contact or the insulating power of the intervening air is broken down by an electric spark. In a magnified image of the arc it is seen that the positive carbon is most intensely hot at the extremity, and is hollowed out into a crater, from which about 80 per cent of the light is emitted. The negative carbon is less hot. The space between the two, the true arc, is filled with carbon vapor, which has the violet color of incandescent carbon, while outside this is an aureole of carbon vapor of a golden color.

ston since 1888 struck here last night; 4' this morning. Hudson, N. Y., Feb. 8.—All business is suspended here on account of the blizzard. Kingston, N. Y., Feb. 8.—Three feet of snow on the ground here and the drifts are immense in many places.

Chicago, Feb. 8.—Fifteen to twenty degrees below zero this morning with a high wind blowing. Railroad travel is paralyzed and trains for the Northwest have been abandoned. To add to the trouble of the Chicagoans a water famine is imminent.

Mobile, Ala., Feb. 8.—A cold wave with high winds struck here yesterday. It was the most severe "norther" in local annals. Nashville, N. H., Feb. 8.—The storm here was the worst of the winter; all schools are closed.

Gloucester, Mass., Feb. 8.—Much damage has been done to shipping by the blizzard, which is the worst experienced here in years. Haverhill, Mass., Feb. 8.—Last night's storm in this section was the worst in twenty years.

London, N. Y., Feb. 8.—The worst blizzard within the memory of the present generation is raging here. Rockville, Conn., Feb. 8.—The most severe blizzard of the winter previous here to day. Many suburban roads are impassable on account of drifts.

Eastport, Me., Feb. 8.—The storm here this morning was one of the most severe on record. The wind attained a velocity of 75 miles an hour. The International line steamer Cumberland arrived from St. John at 5 a. m., and must stay at the wharf.

Revenue steamer Woodbury is plying out the storm at her moorings, but there are few other vessels in port. The damage to shipping along the shore is considerable. Bath, Me., Feb. 8.—The tide today was the highest ever recorded here. Work was suspended in several buildings along the wharves.

Montreal, Feb. 8.—Several persons have been frozen here—two fatally. Toronto, Feb. 8.—An elderly colored man named Richard Carter, a teamster, was found in a lane near the corner of Church and Labella streets last Thursday in a badly frozen condition. Both hands and both feet were frozen, and the poor fellow was in an unconscious condition.

Halifax, N. S., Feb. 8.—[Special.]—The following report was received by mail at Eastport, N. B., from the station agent at South Ingonish, C. B. "The telegraph wires are all down and buried in the snow. From the Ferry to Baker's, the rail mile distance, the poles are broken and have disappeared. Twenty-two houses and stores were washed off the beach. Nothing saved."

Chicago, Feb. 7.—The temperature is at zero. The wind is blowing at the rate of forty to sixty miles an hour, but the fall of snow has stopped, after obstructing the street railway lines and crippling the mail trains on every system running into the city.

All sections of the country heard from so far, report that the cold wave is holding on firmly, with little prospect of cessation. In Kansas and Nebraska, great suffering prevails on account of the severe blizzards which have been general over both states. Illinois and Indiana are in the grasp of snowstorms and business is almost entirely suspended in some of the smaller towns and villages. The storm is due to an exceeding high area which developed in the north-west. Snow accompanied by ice north-west wind, came down the Missouri Valley with a rush. It is good for two days more at least.

THE RED SCOURGE.

On the shores of the great inland sea, Lake Superior, there lived many years ago a tall, bearded Indian and his wife. They had one son, about 16 years old, who had listened to so many of the wild legends of the tribe that the demon had taken form hold of him...

SLUMBER SONG.

Come into my arms, my baby dear, And let me kiss you, soft and low, A little song you'll be glad to hear, And I'll sing it to you as you go.

THE KING'S GOOSE.

In the old, old days—in the days when boys and girls were always having exciting and lovely adventures, and when kings and queens were as much interested in the adventures of their subjects as they were in their own...

THE TWO PEACHES.

Though the son and grandson of government employes, I had no more than a fair share of the same. I was a regular clerk of the old bank, and my father thought nothing of his position...

Miramichi Advance.

THE LEADING NORTH SHORE NEWSPAPER. PRINTED EVERY WEDNESDAY EVENING. TERMS ONE DOLLAR A YEAR PAYABLE IN ADVANCE. D. G. SMITH EDITOR & PROPRIETOR. JOB PRINTING AT LOW PRICES AND THE SHORTEST NOTICE.
