VOL. XXIII. No. 17.

MONTREAL, FRIDAY, APRIL 24, 1903.

SINGLE COPY - - 10 ANNUAL SUBSCRIPTION - \$2,00

A table prepared for "Insurance Econo-Interest mics" shows that the rate of interest earned Rates on mean ledger assets, by twenty-eight life insurance companies, during 1902, averag-

insurance companies, during 1902, averaged 4.59 per cent. The average for the six years for the same twenty-eight companies is stated to be 4.74 per cent. On this "The Surveyor" remarks: It seems apparent that the rate of interest obtained on safe investments in this country promises to get down to the level of the rate in England. The fact that some United States bonds are being, or to be, refunded at 2 per cent, forbodes a possibility that the average interest rate on good securities may go even lower still, unless a period of hard times intervenes soon enough to check the tendency which is apparently due to the condition of unparalleled prosperity and the superfluity of money seeking good investments.

Physician Heal Thyself. Rebuking, or advising others in regard to some fault which the censor or adviser himself commits has frequently elicited an amusing rejoinder

of the tu quoque style. The "Insurance Advocate" in its last number lays itself open to such a criticism. On one page it snubs the "Weekly Underwriter" for misquoting Byron and gives this good advice to all writers, "verify your quotations," a phrase which is attributed to a famous Oxford Don. On another page it repeats this advice. Yet, on page 106 the "Advocate" shows itself to be a mere guide post, as it points out the road, but does not proceed thereon. On that page we read: "Critics may as-well save their wind, Oronhyatekha is no Kirke White to die of an article." Now Kirke White did not die of an article, he wrecked his life by overwork. The allusion of the "Advocate" is to a passage in Canto II., v. 60, of Byron's Don Juan, which reads:

"John Keats—who was killed off by one critique, "Poor fellow! his was an untoward fate. "Tis strange the mind, that fiery particle,

"Should let itself be snuff'd out by an article."

Had the "Advocate" taken its own advice this bad break would not have occurred.

New Phases of Trades' Unions. There are signs of conditions developing that will check the arbitrary power of Trades' Unions, Several decisions have been given

in the Courts condemning strikers in penalties for deserting work illegally under pressure of unions. One decision penalizes the obstruction of a public service by the interference of an organized body of men who arbitrarily interfere between the employés and the employer. Another almost amusing incident, that has much significance has been the strike of the members of one Union against those of another rival Union, for the purpose of settling the dispute as to which should have the control of labour in a certain locality. Out of this spirit of independence will come the downfall of the system as it has been carried out, for some form of union amongst those engaged in manual occupations will be maintained, when the organization is operated for legitimate and laudable objects. If the unions had devoted their funds and their powers to the promotion of technical schools, or the promotion of industrial insurance, they would have done an inestimable and lasting benefit to the artisan classes and done more to raise their average income by raising the quality and value of service, than has ever been done by strikes. Another highly significant movement in this connection is the establishment of the "Independent Labour League of America," whose object is to "protect independent workingmen in their independence, and to oppose strikes, lockouts, boycotts and blacklists." It will also seek to obtain higher wages, shorter hours and better conditions "by intelligent application of energies, earnest cooperation with employers and legitimate business methods." It is becoming recognized that, so-called "labour leaders" are professional agitators, usually foreigners, or men who have not acquired that high degree of self-respect which forbids a man submitting his economic conditions to the control of any union.

Shipping Marine insurance circles in London Combination's have been exercised over the decision of the Morgan steamship combination to do a large part of its own insurance. It is understood that the combination will carry its own risks on its steamers to extent of \$1,000,000 on each vessel, and to insure the surplus when the value of vessels exceed that sum. As a total loss by fire in an ocean steamer is very rare the underwriters' risk is very limited, as they evidently think from the low rate at which they are reported to be willing to accept risks on these While then the owners will have only moderate charges to bear for premiums, they will have to stand the brunt of the great bulk of the losses. Another feature in this business is that the vesse's acquired by the combination cost considerably more than their real value, so that, the capital at risk which would be sacrificed by a fire would, occasionally, be in excess of the actual loss, the owners would suffer from over insurance instead of the underwriters as is too commonly the case. It is stated that the Celtic has been insured on a valuation of \$2,500,000, whereas the original owners had only insurance for \$1,750,000. The owner's risk, under above arrangement could be \$1,000,000, which leaves \$1,500,000 for that of the underwriters, or \$250,000 less than what was covered by them before the vessel was taken over by the Morgan combination.

United States

The following statement in relation to organization of national National Banks. banks since the passage of the Act of March 14, 1900, has been issued

from the office of the Comptroller of the Currency: At the close of March, 1903, the law in relation to the organization of banks with a minimum capital of \$25,000 has been in operation three years and seventeen days. During that period there have been added to the national banking system 1,442 associations with aggregate capital stock of \$86,135,500. The additions to the system by conversions of State banks and reorganizations of State or private banks were 179 and 443, respectively, the capital of the converted banks amounting to \$12,226,000 and of the reorganized associations \$29,740,000. banks organized during the period in question deposited as security for circulation bonds to the amount of only \$20,475,500, or a fraction less than 24 per cent. of the capital. During the month (March) 56 national banks were organized with capital stock of \$2,170,000 and bond deposit of \$642,550.

On March 31, 1903, the number of national banks was 4,869 and their authorized capital stock \$730. 178,605. The amount of bonds on deposit as security for circulation has increased since March 14, 1000, from \$244,611,570 to \$342,160,770, or \$07,-549,200, and national bank circulation shows a net increase during this period of \$128,116,528.

The monthly circulation statement issued by the Comptroller of the Currency shows that at the close of business, March 31, 1903, the total circulation of national bank notes was \$382,519,258, an increase for the year of \$25,042,851, and a decrease for the The circulation based on month of \$279,587. United States bonds was \$338,349,814, an increase for the year of \$20,889,432, and a decrease for the month of \$310,547.

The circulation secured by lawful money aggregated \$44,169,444, an increase for the year of \$4,-153,419, and an increase for the month of \$30,060.

The amount of United States registered bonds on deposit to secure circulating notes was \$342,160,770, and to secure public deposits \$134,834,070. The amount of State and city bonds on deposit to secure public deposits was \$18,584,900.

Referring to the serious risks of Fires in fires in small towns the "Boston Small Towns. Herald" remarks:

"These fires which destroy the whole, or the business section, of towns and villages are woeful visitations. They do more harm relatively than the great Boston fire, for they are nearer taking the whole capital of the corporation. They leave it well-nigh destroyed, and in some instances really destroyed past revival. At any rate, the wound is deep and lasting, and the loss, in many cases without proper insurance, destroys the savings of a lifetime, and, what is worse, often destroys hopefulness for the future. It takes much longer than in a city to heal the sores and hide the scars caused by the flames. There is no way of preventing such happenings except by the exercise of constant care-Sometimes carefulness is relaxed, and a combination of circumstances makes a conflagration. These occasions call for sympathy, and perhaps for kindly aid."

The danger of a small town or village being swept away by fire is enhanced by several conditions not common to cities. The main one is the inadequate fire protection, for, however excellently equipped the fire brigade may be, it is usually impracticable to have the men always on hand, or within a short distance of the Fire Hall or depot, where the engine is stationed. We have seen a building wholly destroyed while the fire brigade was being collected. The water service also in small places is rarely adequate when a fire breaks out. Another risk, seldom considered, is the condition of the yards in villages and small towns where wood fuel being so generally used causes masses of chips to be strewn around. The common use of coal oil lamps is another prolific source of danger. Another danger is the small boy's love of a fire, which, with a few choice companions, he lights for fun by piling dry leaves and setting them ablaze near to wooden fences. It would pay such small communities to have one or two men always on hand in charge of the engine, who, in case of fire, could instantly get up steam, or prepare for the men when collected getting promptly to work.

IRON AND STEEL INDUSTRIES.

THEIR IMPORTANCE AND THE NECESSITY FOR THEIR BEING SUPPORTED IN THE INTERESTS OF CANADA.

The Finance Minister is not reported to have made any further allusion to the policy of the Government in regard to the iron and steel enterprises of the Dominion than what appears in the resolution which he introduced as follows:—

"That the following sections be added to the customs tariff, 1897: The Governor in Council may, by order in Council, direct that a duty of seven dollars per ton shall be imposed in schedule A on all iron and steel railway bars, or rails in any form for railways, imported into Canada, and from and after the publication of such order in "The Canada Gazette," such duties shall be levied, collected and paid on all such rails, and thereafter item 238 in schedule A and item 585 in schedule B shall be repealed. Provided, however, that such order shall not be passed until the Governor in Council is satisfied that steel rails of the best quality, suitable for the use of Canadian railways, are being manufactured in Canada, from steel made in Canada, in sufficient quantity to meet the ordinary requirements of the market.'

This resolution is an extension of the policy embodied on the several Acts that have been passed relative to bounties on the production of iron and steel. These were, first, an Act passed in 1894 authorizing a bounty of \$2 on Canadian pig iron, puddled bars and steel billets. In 1897 an Act was passed by which this was repealed and the bounty (1) of \$3 per ton was authorized on steel ingots manufactured from ingredients of which not less than 50 per cent. of their weight consists of pig-iron made in Canada; (2) a bounty of \$3 per ton on puddled iron bars made from Canadian made pig-iron; (3) a bounty on pig-iron manufactured from ore of \$3 per ton on the proportion produced from Canadian ore and \$2 on the proportion produced from foreign ore. By an Act of 1898 these provisions, as above stated, are to be held as having come into

force on 23rd April, 1897. An Act of 1899 provides that, these bounties shall continue to be paid to 30th June, 1907, at a yearly diminishing rate from 1902; 90 per cent. of the bounties to be paid in 1902-3; 75 per cent. in 1903-4; 55 per cent. in 1904-5; 35 per cent. in 1905-6, and 20 per cent. in 1906-7. In the year ended 30th June, 1902, these bounties on iron and steel amounted to \$791,089.

The policy on which these grants are based has been endorsed by the leaders of both political parties, it is, therefore, entirely outside the arena of party politics. Having been established as a national policy and pursued for several years, there is no need for defending this arrangement for developing the iron industries of Canada. There is, however, the question as to whether the real intentions of the Parliament and desires of the country at large are not in danger of being, to some extent, frustrated by the time limit set forth in above schedule being more restricted than was expected. It was anticipated that, the year 1902, which was fixed as the time when the bounties were to commence being lowered, would see the furnaces for making pig-iron, puddled iron bars and steel ingots in full activity, all complete and producing up to their maximum capacity as designed. This was not the case, for, as frequently happens, the construction of the furnaces and equipment of the works occupied a considerably longer time than was expected by the sanguine proprietors. Under such circumstances it would be strictly in accordance with the intention of the Legislature, as expressed in the Acts passed to encourage the development of iron and steel industries in Canada, were the time limit extended during which bounties should be paid, and the date for the commencement of the sliding scale advanced from 1902 to 1904, so that up to 1904 the full bounties be paid, and in 1904-5 the bounties be reduced to 90 per cent. of those stated; 75 per cent. in 1905-6; 55 per cent. in 1906-7; 35 per cent. in 1907-8; and 20 per cent. in 1908-9. This, we believe, would be in harmony with the purposes of the Acts passed, would indeed be far more in accordance with the intentions of the Legislature and with the sentiment of the country than reducing the bounties before the iron and steel furnaces had entered upon their The enormous benefits which in full capacities. course of time Canada will derive from the iron and steel industries of this country can hardly be overestimated. They will greatly enlarge the field for labour, they will increase the internal trade of the Dominion, they will give a stimulus and help to all other industries, of which iron and steel are the No loftier aim can inspire legislative back-bone. action than the development of the natural resources of the country, the providing a sphere for the enlargement of its industrial life, and giving to capital opportunities for profitable employment,

THE BUDGET SPEECH.

An enormous Surplus; Reduction in National Debt; Increased issue of Dominion Notes; Loans maturing; Special duty on Steel Rails; Retaliation against Germany.

The Budget Speech delivered by the Hon. W. S. Fielding, Minister of Finance, on 16th inst., aroused exceptional enthusiasm amongst the supporters of the Government in the House of Commons, and has been more favourably received generally throughout the country than most of its predecessors.

The Speech naturally divides itself into two main sections, the one deals with the financial conditions of the country, and the operations of the Government in the past and future; the other relates to fiscal questions, changes in the tariff at once to be introduced and others under consideration. The questions grouped under the first head include revenue; expenditures; the public debt; loans; appropriation of the surplus; the accounts of the Intercolonial Railway; increased Dominion note issues and the Government Savings Banks. Under the second head fiscal questions are included, proposed changes in the tariff, suggested and probable changes of duties; reciprocity with the United States and concessions by Great Britain, and the entirely new feature in our fiscal policy, retaliation against Germany for the discrimination shown by that Empire adverse to Canadian imports. Each of these sub-divisions is suggestive of comment that would occupy too much space for entering upon in this issue. We propose, therefore, to give at present only a synopsis of the financial aspects of the Budget Speech, with a bare outline of those niatters that are strictly associated with the tariff.

The revenue of Canada since the era of prosperity set in, which the country has enjoyed since 1897, has gone up by leaps and bounds. The complaint is made that this is a reproach to the Government as it merely shows that more taxation has been imposed than is required to meet the annual expenditures. This is a somewhat narrow and ungracious criticism, it is an argument that stultifies itself. When revenue is derived from Customs and Excise the amount of taxation is regulated by the direct action of the people. The increased taxation has been caused by an increased purchase and consumption of foreign dutiable goods, and the increased use of such articles as are subject to excise charges. What the extent of such purchases and such use shall be is not decided by the Government but by the people. Mr. Fielding gave the following table to show the sources of revenue in last two years:

Customs. Excise Post Office. Raitways. Dominion lands.	1901-2. \$32,191,978 11,197,133 3,918,415 5,918,997 1,227,976	1900-1. \$28,425,528 10,318,266 3,441,504 5,213,381 -1,517,319	Increase. \$3,766,694 878 867 476,910 705,616 *289,342
Miscellaneous	3,596,788	3,598,945	*2,656
Total	\$58 000,990	\$52,51 1,701	\$5.526.000

^{*} Decrease.

***************************************			. October
Spirite, gals	\$5,178,275	5,618,113	439,838
Malt, 1b	970,855	1,071,608	100,753
Cigars, No	822,738	881,597	58,859
Ciga ettes, No	362,626	400,035	37,409
Tobacco and snuff, lbs.	2,308,466	2,433,355	124,895
Raw leaf, foreign, Il s	1,026,265	1,137,274	111,014

The Post Office revenue is especially interesting as no other department answers so promptly to or so clearly reflects the improved conditions of trade:—

Year.	Revenue.	Expenditure	Deficit.
1894	\$2,964,014	\$3,665,011	\$700,997
1897	3,202,938	3,789,478	586,539
1898	3,527,809	3,575,411	47,602
1893	3,193,777	3,603,799	410,031
1900	3,205,535	3,758,014	552,479
1901	3,441,504	3,931,446	489,941
1902	3,918,415	4,023,636	105,221

When it is considered that since 1896 the postage on domestic and foreign letters has been reduced and an expensive service established in the Yukon and Atlin districts, it is peculiarly satisfactory to find so large an increase in the Post Office revenue and the deficit diminished from an average in preceding ten years of \$560,650 down to \$105,221.

Mr. Fielding gave the following statement of the revenue and expenditure of the I. C. R. for five different years:—

Year.	Revenue,		Expenditur	e.	Deficit.	
1890	\$2,928,080	92	\$3,481,472	97	\$553,392	05
1895	2,940,717	95	2,950,300	91	9,582	96
1900	4,552,071	86	4,431,404	69	*120,667	02
1901	4,972,235	87	5,460,422	64	488,186	77

The Finance Minister estimated this current year's revenue at 65 millions and the expenditures chargeable to income at \$51,650,000, so that on June 30, next, the surplus is likely to be \$13,350,000, which exceeds any on record. Out of this it is proposed to devote \$5,650,000 to a reduction of the national debt, and so reducing it to extent of \$1 per head of the population. The loans maturing in London and one in Canada are as follows:—

Rat	te of I	nt.	Sinking	
Date of Maturity.	p.c.	Amount.	fund.	Balance.
Oct. 1, 1903	5	£ 500,000		£ 500,000
Oct. 1, 1903	4	1,500,000	969,500	539,500
Apl. 1, 1904	4	300,000	205,000	95,000
May 1, 1904	4	4,000,000	1,024,530	2,975,500
Total		£6,300,000	£2,199,000	£2,101,000
In Canada-				
Nov. 1, 1903	31/2	\$2,852,000		\$2,852,000

In regard to the loan maturing in Canada Mr. Fielding said:—

"As the House will see, one of these loans, which will mature on November 1, next, was issued in 1883, and bears interest at 3½ per cent. My expectation is that we should be able to refund this loan in Canada, by a saving of one-half per cent. interest. A few years ago we looked forward to more favourable terms than this; but for several years the condition of the money market has been one of considerable stringency, and the present indications are by no means favourable to cheap money at an early day. Under these circumstances I have thought it well to provide for this loan by issuing a domestic loan for a short period. The proposal is that the holders of this loan shall receive new stock, running only for ten years, at 31/2 per cent. I have no reason to doubt but that this will be regarded as a fair offer, and that the holders, as a rule, will be glad to renew the loan on those terms. If in any case they are not, I am satisfied that we can easily place the new stock in other quarters at the rate mentioned.

The half million 5 per cent, loan maturing in London on October 1 would have to be provided for. Itali a million pounds would have to be provided to meet the 4 per cent, loan of £1,500,000, and he felt hopeful that by the 1st of October the Government could out of their revenue provide for the 5 per cent, loan of £500,000, and for such portion of the 4 per cent, loan as might then remain outstanding. If they should not be able to provide for the whole of it they could cover the balance by a small issue of treasury bills, which would carry the transaction over into the next spring, when they would have a number of other loans maturing and might expect better conditions of the money market."

The remaining financial feature of the Budget Speech was the announcement that the Government proposed to have the Currency Act amended so as to permit the issue of Dominion notes to extent of \$30,000,000 with a 25 per cent. reserve instead of only \$20,000,000 as at present with the same reserve. The effect of the proposed change will be that whereas under the present act there are \$15,000,000 of notes unsecured and resting upon the general credit

of the country, under the new proposal there may be \$22,500,000 issued under similar conditions, while \$7,500,000 will remain in the Treasury in the form of gold or guaranteed debentures, to form the usual 25 per cent. of reserve on the increased amount. Now that the principle banks have enlarged, or, are about to enlarge their capital and so proportionately enlarge their note issuing powers, it is probable that this will prevent the issue of Dominion notes being increased, but the change proposed will be merely permissory and the enlarged power of issuing Dominion notes will not need to be exercized.

A new feature in the Government's financial policy is to be the provision of a reserve fund against the deposits in the Government Saving's Banks, which now amount to 50 millions of dollars, respecting which Mr. Fielding said:-"As a matter of sound finance, now that these deposits have grown to such a very large sum, I think it well that we should take some steps for the creation of a reserve fund, so that if at any time there should be a special demand upon us for these moneys, we should have a reasonable sum available immediately to respond to the demand. I, therefore, propose to amend the savings bank act by providing that the Dominion shall at all times hold a reserve of gold equal to 10 per cent, of the total amount of the deposits. This reserve, applied to about sixty millions of dollars, will amount to six millions, so that of the seven and one-half millions of dollars for which we ask increased authority under the currency act, six millions will be at once applied, not to the general expenditure of the country, but to the creation of this new, but, as we think, necessary reserve."

The chief interest in the Tariff changes centred in the announcement that steel rails will be subject to a duty of \$7 per ton, which was distinctly declared to be for the purpose of encouraging and protecting the manufacture of steel rails at the Sault Ste. Marie mills and Sydney. Another feature was the declaration that goods from Germany would be subject to extra duty, to a surtax, which policy was in retaliation of the unfriendly tariff of Germany which specially discriminates against Canada.

The three aspects of the Budget Speech most important are, the superabundant revenue having resulted in an enormous surplus; the reduction of the national debt; and tariff changes that commit the administration unequivocally to the policy of protection to native industries.

OUR LADY OF THE Snows has been giving Britishers at home a specimen of her freakishness. Last week there were heavy falls of snow in Great British. With a temperature of several degrees of frost. This is said to be unprecendented, but we recall a fall of six inches of snow on a 12th May in the Midlands, and heavy frost on 6th June that killed hundreds of acres of potato plants,

ALLIANCE ASSURANCE COMPANY.

The Report of the Alliance Assurance Company presented to the shareholders at the Annual General Court held in London, on 8th inst., opens with a narrative of the circumstances under which the amalgamation was effected with the Imperial Life and Fire offices. As a record of a highly interesting event, it may be desirable for future reference to state the various steps of this event in their due Provisional agreements were entered sequence. into on 22nd January, 1902; these were confirmed by the shareholders of the three companies on 3rd February following, and the sanction of the High Court of Justice, as required by the Life Assurance Companies' Act, 1870, to the transfer of the undertaking of the Imperial Life Company to the Alliance was obtained on the 26th July, 1902. The laws and regulations of the Alliance were altered by special resolutions on the 2nd April, 1902, and on the 11th the Company was incorporated under the Companies' Acts, 1862 to 1900, as a Limited Company. As required by the Agreements referred to 250,000 new shares of £1 per share fully paid were created, each new share having the same right to dividend and assets as each original share. Of that number 187,-500 shares were issued to the shareholders of the Imperial Fire office and 28,125 shares to the shareholders of the Imperial Life office, leaving 34,375 unissued. The Report shows that at the close of 1901 the Imperial Fire office had Investments and other Assets amounting to \$9,418,390, and the Imperial Life office on 31st January, 1902, had assets to extent of \$13,941,000.

The result of the amalgamation has been to raise the Alliance Assurance Company into the front rank in regard to extent of business and resources. The statements published on a later page in this issue furnish full information on these points. To exhibit the changes that have been effected the salient features in the Alliance report for 1901 are compared with the same features in the report for 1902 as follows (the sterling £ is converted into currency as equal to \$5.):—

	1902.	1901.
	8	\$
Capital paid up	3,828,125	2,750,000
Fire insurance fund	10,630,820	4,316,960
Total assets	53,097,330	29,477,690
Transferred to profit and loss from Fire		
Account, being underwriting profit	1,327,525	415,825
Net Fire Premiums	4,649,950	2,743,300
Losses incurred	2,176,800	1,403,595
Ratio of losses to premium income	46.82 p.c.	51.16 p.c

Probably the improved loss ratio is partially attributable to the "cleaning up" which accompanied the amalgamation, but in regard to this and to comparative expenses, one broken year's experiences are too narrow a basis for definite conclusions. The Canadian business last year had premiums of \$147,-381 against \$105,469 in 1901, and \$22,399 losses paid

compared with \$150,163 in previous year. Mr. P. M. Wickham had his responsibilities as manager of the Alliance enlarged by the changed conditions, but he is quite equal to the situation and has worthily won the confidence of Head Office. Mr. O. Morgan Owen, who made so favourable an impression during his visit to Canada, is one of the joint secretaries, and upon Mr. Robert Lewis devolved the task of General Manager and Secretary, a position for which he is eminently qualified.

FRATERNAL SOCIETIES.

We give below a few items from official reports for the year 1902, of a few of the leading Fraternal Societies. This will be supplemented a little later on by a table similar to that published by us in August last.

Name.	Total income.	Expenses,	Total
	\$	\$	p. c.
Independent Order of Foresters	3,354,421	755,188	22.51
Modern Woodmen of America	6,466,309	636,087	9.84
Royal Arcanum	7,412,785	207,525	2.80
Knights of Honour	3,177,308	102,834	3.24
Knights of the Maccabees	3,712,708	386,942	10.43
National Union	1,910,362	117,270	6.14
Woodmen of the World	2,739,262	300,464	10.97

28,773,155 2,506,310 ave. 8.71

The figures were obtained from the Preliminary Report of the Minessota Insurance Department.

THE MANCHESTER ASSURANCE COMPANY.

The 70th Annual Report of the Manchester Assurance Co. appears in full on a later page to which attention is invited. At the previous annual meeting reference was made to the management proposing to abandon business in certain unprofitable fields. This policy was carried out, the result being a reduction in the net fire premiums to extent of \$484,-600, leaving the premiums for the past year, \$3,664,-695. The relinquishment of business in areas which have proved unprofitable is a policy by no means agreeable, however necessitated, as it means disappointed anticipations, and the loss of much effort and outlay which were expected to yield good returns. The management is to be commended for taking this drastic course, the lack of courage to adopt which has been disastrous to some companies.

The income was supplemented by \$69,040 from interest and dividends, and by \$24,305 realized from profit on securities, after deducting amounts written off property account, the total income, therefore, was \$3,758,045. The fire losses incurred were \$2,213,970, the ratio of losses to net premiums being 60.4 per cent. The total expenditure being \$3,593.860 against a total income of \$3,758,045 left a balance of \$164,185, out of which \$114,975 was absorbed by the dividend to shareholders and interest on bonds,

thus leaving \$49,210 to be added to the reserve funds. The report claims that while the fire trading surplus was \$76,700, the account is entitled to be credited with at least one third of the reduction in premiums on account of the smaller reserve required against liabilities on current insurances, consequently the real underwriting profit on the year is not less than say, \$235,000. As illustrating this it is pointed outthat the ratio of reserve funds to premiums has increased 6.3 per cent., while the proportion of total funds to premiums has improved 10 per cent. To abandon a large extent of business in an unprofitable field is, however, not an instantaneous operation concluded in an instant, and the economics it ultimately involves require time to fully realize. The Reserve Funds amount to \$1,593,780; the total Assets to \$3,725,455 and uncalled capital of \$9,000,ooo. The company's losses last year were only 38.2 per cent. of the premiums, which was a very gratifying experience after the disastrous records of 1900 and 1901, in which the Manchester participated in common with all the fire companies. Mr. James Boomer, Toronto, is the much respected, capable and energetic representative of the company in Canada, and Messrs. Evans & Johnson are the agents in this city.

TWO FIRES AT ST. JOHN, N.B.

A fire broke out on 16th inst., on the wharf at St. John, N.B., by which two warehouses and their contents were destroyed, probably also a dozen railway cars, and a portion of the C.P.R. elevator chute, besides damage being done to the wharves, railway trestles, the immigration building and three steamers, which narrowly escaped destruction. The sheds of the Elder-Dempster and Donaldson liners are a mass of scorched debris. The terminal facilities of the C.P.R. have been materially injured, the company's loss being estimated at \$30,000 to \$35,000. The property of the city was damaged to extent of about \$25,000. Other losses are on goods in transit, of which heavy quantities were burnt. Had the wind been blowing towards the wharves the steamers in port would have been destroyed, so intense was the heat and furious the flames. This fire is an impressive object lesson as to the necessity of better fire protection in the Harbour of this city.

While the above fire was dying out another one broke out at 10 p.m., in the Canadian Drug Company building. In a few minutes after the fire was discovered it was seen to threaten not that structure only but the adjacent proporties. The chemicals fed the flames and caused alarming explosions. The loss by this fire is estimated at \$100,000.

The following companies are interested in the fire at the Drug Company building:—

THE LATE SIR OLIVER MOWAT, K.C.M.G.

Few men have risen so steadily from the lowest rung of an obscure position to the highest point on the ladder of public distinction as the late Sir Oliver Mowat. No public man ever passed away in Canada more highly honoured by all classes, social and political, or more beloved by those who knew him by personal associations. To claim that he made no slips in judgment, nor ever erred in conduct would be to claim that he was above humanity. But, whatever were those defects, they made such superficial impressions on his record that time has wiped away all traces of these depreciatory marks. The career just closed was one peculiarly valuable as an inspiring example to the young men of Canada. Richter's words in this connection are frequant with wisdom, "Men must have great men or great objects before them, or their powers will degenerate, as the magnet's do when it has lain long without being turned to the right corners of the world." Some men who have risen to eminence are useless as examplars, as their natural gifts were so rare. Sir Oliver, however, was not remarkably endowed. But, he cultivated his talents most assiduously; he sought advancement by showing his fitness for promotion; into whatever work he undertook he threw all his powers; to be a master in his sphere was his early and life long ambition, and he won mastery over, and its resultant distinction amongst his fellow men by the conscientious discharge of all the duties that fell to his lot. He was thus a noble, a practical example and as such his record is a treasure to his country. Born in Kingston, in 1820, the son of one of Wellington's soldiers, he studied law in the office of Mr. John A. Macdonald, the young lawyer with whose career as a political leader his own ran parallel for many years. Having been called to the Bar in his 21st year, he moved to Toronto, where, by dint of hard study and close attention to business, he quickly sprang into prominence and became the partner of Messrs. Burns & Vankoughnet who were raised to the Bench. He rose steadily in reputation until he became recognized as the leader of the Chancery Bar. In 1856 he was a Queen's Counsel, and in 1857 entered public life as an Alderman of Toronto. Next year he became Member of Parliament for South Ontario. From 1858 to 1864 he held office in several Administrations, for changes just than were frequent. He was one of the Committee that prepared the present Constitution of Canada, under which Confederation was arranged. This phase of his life he loved to talk over and took commendable pride in the work he did to establish the Dominion. In 1864 he became Vice-Chancellor of Ontario, which office he resigned in 1872, to reenter the political arena as Premier of Ontario. In 1806 he gave up this position to become Minister of Justice in the Laurier Administration, and shortly afterwards was appointed Lieutenant-Governor of Ontario, thus completing a career of honour by receiving the highest distinction his country can confer.

TRUST COMPANIES AS EXECUTORS.

The appearance in the papers of the usual Executor's notice of a city Trust Company in connection with the Estate of the late Mr. John Crawford, of Verdun, is another indication that the citizens of Montreal are coming more and more to recognize the value of the services of Trust Companies in their capacities of Executors and Trustees. While it is generally the younger generation which takes up new ideas, we see in this instance a very old gentleman, conservative in his methods, making a change from what has been the usual course in such matters. Trust Companies should feel gratified at the results of their educational efforts in this line. The example set by so shrewd and so intelligent a man as was the late Mr. Crawford will have a good effect in this respect.

For quite a number of years it has been in the

United States and the Province of Ontario the usual thing for Trust Companies to be appointed Executors and Trustees under Wills, so much so that it is now rather uncommon for private individuals to be burdened with the responsibilities of administration of estates. The permanency and financial responsibility of Trust Companies and the expert knowledge and constant attention of their officers are unquestionable advantages in connection with the administration of estates and trusteeships that must commend themselves to all.

THE EXPENSE RATIO OF FRATERNAL SOCIETIES.

The table containing information relating to a number of the fraternal societies operating in Canada, which is published on page 574 is a remarkable exhibit. That such a wide variation exists between the ratio of two companies' expenses as 2.80 per cent, in one case and 22.51 per cent, in another, suggests very different methods of administration. If one large society of over quarter of a million members can be managed at an expense averaging 2.80 per cent. of the total income, a society that uses 22.51 per cent. of its total income in expenses would appear to be conducted with great extravagance. This conclusion seems confirmed by the highest expense ratio of the other six companies being only 10.07 per cent., and the average of the whole of these included in the schedule being 8.71 per cent. If, however, we take the other 6 companies by themselves their average ratio of expenses to total income is only 6.90, that is, six fraternal societies administer an aggregate income of \$25,418,734 at an expense of \$1,755,122, while a seventh society spends \$755,-188 in administering \$3,354,421! In view of the boasting of this latter society, that it is managed with exceptional economy, its excessive expense ratio, as compared with other fraternal societies, is open to explanation for the enlightenment of the members and the public.

PROMINENT TOPICS.

"To the West, to the West" seems the inspiration influencing many of our city banks. They are moving "up-town" one after the other in eager haste to secure a location amid the retail stores of St. Catherine Street. It is understood that the banks have picked up a fair amount of business on that street. But, that there is paying business in the locality for half a dozen or more banks is very doubtful, indeed, it is quite dubious whether some of them will make enough to cover the rental. The retailers will find a certain amount of convenience in having a bank at every corner, but, for any more important business than depositing they will prefer to deal with Head Office. Other deposits will be mainly the small savings of domestics. One bank is to provide especial accommodation for ladies, probably a pier looking glass, toilet table, perfume bottles and puff-powder. A free hinch counter for bank customers is among the possibilities. Branch banks are becoming too numerous, some will have to be closed and some members of the over-extended staff will be sent adrift.

The Committee of the Legislative Council, Quebec, has again shown its superiority in common sense and statesmanlike wisdom over the Lower House. The Bill to regulate the affairs of this city by strangers to its conditions, and by those who have no material interests in its welfare, has been amended by the Legislative Council in some features, but, as we said last week, the whole Bill-should be struck.

The City of Montreal has made good, solid progress, in a municipal sense, because of the restrictive clauses of the present Charter. Those clauses were framed by citizens of high business ability who were thoroughly conversant with the city's needs and the city's financial capacities. They were designed to restrain useless and extravagant outlays, so that the monies paid by the citizens in taxes should be dcvoted strictly to their interests and not diverted to the promotion of selfish, untimely, needless schemes. As has been the case since we have any record of human nature, some restless, inexperienced spirits associated with civic management have fretted at and determined to break loose from these wholesome restraints long before the city could safely throw them off.

Enlargement of Bonsecours Market and expropriations are premature. They should be postponed until the city is in a financial position to carry out such costly improvements, as far as they are improvements, without borrowing the needed funds. If the proprietors of Notre Dame East are either legally or morally entitled to damages, these should be settled on an equitable basis, but no expropriations of any kind should be carried out just now, or, in the near future, as the need for them is not so urgent as to justify the borrowing of money to meet the outlay.

Appropriations such as are contemplated are not, and are not designed, in the best interests of the city. Our crying, urgent, universally admitted needs are, better roadways and improved sidewalks; these are necessities, and, until they are provided to an extent worthy of the leading emporium of commerce in Canada, expenditures on incomparably less important projects should be postponed.

* * * *

The best interests of the city demand that the Charter Amendment Bill be struck. Some of those at Quebec who are promoting this measure will realize later on that it would have been wiser to let a Charter remain unaltered for some time to come

which has worked so beneficially. Charter-tinkering has been the bane of Montreal.

King Edward is paying a round of visits to some of the chief potentates of Europe, His mission being in the interests of peace and good-will—the noblest cause a monarch can promote. If the world is not bettered by His reign, as it was by that of-his sainted Mother, it will not be the fault of the King, who is following Her lofty example most commendably, most royally.

The serious accident in this city by horses being frightened by an automobile vehicle calls for action by the City Council. Such carriages are needless in this city of narrow streets, congested areas, and ample supply of passenger transportation facilities. The wretched roadways are already a serious nuisance to drivers of all manner of horse-drawn vehicles, private carriages more especially, but, if automobiles are to go flashing about our streets, like locomotives let loose, the pleasure and convenience of a private carriage, or hired cab will have to be abandoned.

Six workmen riding home a few days ago on the foot-board of an overcrowded car were swept off by coming in contact with a load of furniture. There was room clear for the car to pass the waggon, but not for men standing on the foot-board. This practice has repeatedly been shown to be very dangerous. The Street Railway Company ought to forbid the foot-boards being occupied as they might do under their present powers. The police also have full powers to stop persons endangering their lives, as those do who ride upon the foot-board of a street car.

A stock broker's office is not the place where one would naturally look for a financial incident, one humourous enough to "make a horse laugh," as the late Hon. George Brown used to say of his opponent's proposals, but one occurred in this city a few days ago. An official in a highly respectable position entered a city broker's office and gave him an order to buy 200 shares Dominion Iron and Steel, saving, with his hand in his pocket, "Shall I pay for them now?" as though he were handling a wad of several thousand dollars. The broker said payment would do to-morrow, when the shares were bought, as they were that day at 28. Next morning the buyer entered, and on learning that 200 shares had been bought for him he planted down \$56 saying, "There is 10 per cent. on the purchase." The broker's response was somewhat explosive as he told of the purchase amounting to \$5,600. "What" said the buyer, "I was told that Dominion Iron and Steel Stock was selling at 28 cents per share, and \$56 is all the money I have in the world.

After a sharp rebuke he was allowed to go in peace, as the turn in the market enabled the broker to resell and fully cover himself, with a small profit.

The Canada Permanent and Western Canada Mortgage Corporation is announced to have arranged for taking over the business of the Metropolitan Loan & Savings Company of Ottawa on and after 1st July next. The Metropolitan was originally incorporated in 1870 as the Metropolitan Building & Saving Society, which name was changed by an Order-in-Council in February, 1876, to the Metropolitan Loan & Savings Company, Ottawa. The stock of the company paid up is \$310,591 and reserve fund \$30,000, and deposits, \$30,000. The assets, as reported at the close of 1901, were mortgages \$181,362, debts secured by mortgaged land held for sale, \$128,518, office premises and furniture \$22,300, cash on hand \$48,107. The total liabilities were \$386,162. To the Canada Permanent with its paid-up capital of six millions, deposits of nearly two millions, and mortgages of 20 millions, this transaction is no greater than is done weekly in the ordinary routine of business. It will, however, afford the company an enlarged opportunity for business in the Ottawa district.

* * * * The Government has appointed Mr. W. Mortimer Clark, K.C., Toronto, Lieutenant-Governor of Ontario, in succession to Sir Oliver Mowat, he being the ninth to fill that position since Confederation, and the fifth member of the Bar to occupy the office. Mr. Mortimer Clark has no political record; he has lived a somewhat retired, unostentations life, his tastes being rather literary and studious than those which are gratified by public prominence. Born at Aberdeen in 1836, he was educated at the University of that city and the University of Edinburgh, of which institution he is a life member of the General Council. His father was general manager of the Scottish Provincial Insurance Company and founder of the Caledonian Bank. In 1859 he was admitted a writer to Her Majesty's Signet. In the same year Mr. Clark settled in Toronto where he acquired a hierative practice at the Bar, and has won general esteem from his high character, kindly disposition and devotion to the best interests of the citizens. Mrs. Clark is well known for her earnestness in promoting the welfare of benevolent institutions. The appointment does honour to the Government.

PERSONALS.

In Connection with the Reference made in our last issue to the appointment of Mr. J. B. Morissette, as special agent of the Liverpool & London & Globe, in Quebec, we desire to state that Mr. Wm. Moison Macpherson, who has been the esteemed representative of the Company in that city for a number of years, and who has a very valuable connection, will continue to do an extensive business for them as heretofore.

THE UNION ASSURANCE SOCIETY OF LONDON. Eng., is reported to have secured a controlling interest in the business of the Northwest Fire Insurance Company, Winnipeg. Mr. T. L. Morrisey, Manager for Canada of the Union Assurance Society, has recently been in Winnipeg.

MR. CHARLTON R. BAIN, Secretary of the Scottish Alliance, who was recently in Montreal, was visiting Canada, we understand, with the object of establishing a branch office here. He left for Toronto a few days ago, and sailed for home yesterday from New York it is understood that the Scottish Alliance has purchased the Manitoba Fire Insurance Company.

MR. ROBERT DICKSON, General Manager for the United States of the Royal Exchange Assurance Corporation, was in Montreal early this week, and left for Toronto on the 21st inst.

It is rumoured that the Royal Exchange is about establishing a branch office in Canada.

Motes and Items.

Among the Latest Contributions to the "Insurance Clerks' Orphanage" is £100 from the Commercial Union.

OTTAWA CLEARING HOUSE.—Total for week ending 16th April, 1903: Clearings. \$1,532,551. Corresponding week last year, \$1,834,114.

Imports of Jewels.—The precious stones imported into the United States last month, were valued at \$2,871,645, the largest on record.

MR. WILFRID JACKSON has been appointed inspector to the Canada Life's Northwest London and Home Counties branch. Mr. Jackson has lately been connected with the London office of the Scottish Equitable Life.

Alleged Vandalism at Niagara.—"Engineering News" obliges us with advance proof of article re the works contemplated at Niagara Falls, which threaten to so reduce the flow of water over the cataract, as to destroy its beauty and grandeur for ever. Protests against the utilization of Niagara's power will be in vain. There is too much money in these enterprises, and such vast public services likely to be rendered by them to make other considerations of small account, except to local interests. The power so far developed is a mere fraction of what is possible and contemplated. Even local sentiment against these works is said to have disappeared, owing to greater profits being promised from the electrical works.

UNPROFITABLE UNDERWRITING.—"The Surveyer gives the following from reports of Insurance Department, New York:—

serve. 1899.. .. \$ 6,487,919 \$18,045,939 \$11,500,000 \$19,463,725 1900.. .. 7,622,384 22,867,152 16,377,645 13,500,000 1901.. .. 16.500,000 27,720,327 9,240,109 15,037,405 1902.. .. 31,154,605 10,384,869 15,134,747 19,000,000

Premiums. Expenses, Fire Losses Legal Re-

\$101,205,809 \$33,735,271 \$64,595,736

The percentage of losses and expenses to premiums for four years was nearly 98 per cent. The percentage of profit in four years' underwriting was a little over 2 per cent. Evidently, the fire insurance business was 20 bonanza in New York State in the last four years.

A CASE OF "MIND YOUR OWN BUSINESS."-A field man need not run an actuary shop, says the "Union Casualty Bulletin He need not let any of the vexatious problems of accident and health insurance bother him. He does not have to, and unless he wants to make that feature his home work, he had better let it alone. He should leave that to the fellows at headquarters, who are paid for that sort of thing, and while passing from one prospect to another, figure on whether the next and the next and so on through his list can be insured, and if they are able to pay the premium. Let him talk to all of these to insure them, avoiding reserves of ratios and all of that, but going to work at 8,30 a m. and not quitting until 6 p.m., and he will find that the business has in it all that he expected to find-a wholesome, dignified, money-making, moneysaving occupation.

A CURIOUS INSURANCE CASE is reported in the Toronto papers: Miss Mary Bailey and the Bank of Montreal were the defendants in a suit in the Division Court, brought by Mr. Snow, barrister. The amount in dispute was \$177, the face value of a note, which Miss Bailey had given in lieu of the first year's premium on a policy in the New York Life Insurance Co. She had been examined by the Insurance Co.'s physician, passed muster, and gave the note, which was discounted by the Bank of Montreal. Subsequently, however, she changed her mind about the insurance and dropped the whole thing. In the meanwhile Mr. G. E. Buck, the agent of the Company, assigned the note to Mr. Snow, and he accordingly brought action to recover his money. Judge Morson explained that Miss Bailey or anyone else was at liberty to withdraw from an insurance after the medical examination, but that she must pay damages. He accordingly ordered her to pay the medical fee of \$5 and the costs of the case, the note being cancelled.

A NEW USE FOR ENDOWMENT LIFE INSURANCE has been discovered by a wealthy capitalist, whose method may appeal to others who are inclined to invest money in life insurance of this form, says the "United States Investor." This gentleman carries six or seven endowment policies, managing so that they mature one every three or four years. He has observed that while the security market fluctuates a little from day to day, the fluctuation by long periods is very much more-in fact, at times, so as to constitute a decided depression in the price of certain stocks. He calls the endowment policies his sinking fund. He keeps watch of the stocks which are at a low ebb when his endowment matures, and uses this money in buying the stocks outright, so as to hold them for a rise. He states that out of \$55,000 of matured endowments he has in this way made a gain of \$119,000, and this without speculation, but in bona fide investments. Of course, not every one can afford to use his endowemnt for this purpose, but there are many who can, and thus with a little foresight the endowment policies may be made genuine moneymakers, as well as being good for their face value in case death occurs at any time during the life of the policy.

RECENT LEGAL DECISIONS.

LIFE INSURANCE, RESCISSION OF CONTRACT.—In January, 1891, an Englishman by the name of Foster was induced by one of the London directors of the Mutual Reserve Fund Life Association to insure his life for £6,000 in that company. In 1898 the company began to raise its premiums, and these Foster paid under protest, to prevent the forfeiture of his policy. Then he brought an action to have it de-

clared that the company was not entitled to exact higher premiums than those paid at the beginning, and for repayment of the added amounts. He also claimed to have the contract set aside on the ground of misrepresentation. The trial judge held that there was no misrepresentation, but also held in favour of Foster that the company could not raise its rates. Both parties appealed to the English Court of Appeal, and this court has allowed both appeals, holding that the company could increase its premiums year by year, but setting aside the insurance on the ground of misrepresentation. Lord Justice Cozens-Hardy, in delivering the judgment of the court, said:-Foster paid mortuary calls calculated according to his age on entry until the beginning of 1898. Since then he has paid the increased assessments, which alone the company would accept, under protest. No case of acquiescence or laches is raised against him. The company by their defence asserted that the assessments made on the new footing were authorized, and denied the misrepresentation. Foster was the only witness called, and gave evidence as to what passed at the interview with the director of the company, when the proposal was signed, and there was no cross-examination. During the course of the argument we felt grave doubt whether under this policy the "maximum rate" is fixed once and for all by reference to the age at entry, or whether it increases from year to year by reference to the actual age at the date of assessment. Upon the whole we have arrived at the conclusion that the latter view is correct, and that there is not sufficient in the policy, which in effect incorporates the constitution, to deprive the directors as against Foster of the power which, as already stated, they possess under the constitution. It follows that the judgment at the trial so far as it deals with the construction of the policy must be discharged. But this does not dispose of the case. We are clearly of opinion that the documents circulated by the company are tricky and misleading. "Life insurance at about half the usual rates" was, to say the least, an inaccurate statement. Even if true in the first year, it would not be true in subsequent years, and the time would arrive when the rate would become so excessive that no sane man would care to keep the policy up. The policy granted to Foster was not such a policy as was held out to him. It differs essentially from the representations made before and at the time when the proposal was signed, and upon which Foster acted. The company did not crossexamine Foster upon this part of his evidence, and they cannot be permitted now to challenge its accuracy. Foster by his cross-notice, asks to have the contract of insurance set aside, and we think he is entitled to this relief. This is not an action of deceit, in which fraud on the part of the company's agents would have to be alleged and proved, but an action for rescission, in which such fraud need not be proved. The result is, that in our opinion, the plaintiff is entitled to a judgment for rescission of the policy, and for a return of all moneys paid thereunder, with interest at four per cent., from the dates of payment respectively. The company must pay the costs of the action and of the appeal. Foster v. The Mutual Reserve Fund Life Association, 19 Times Law Reports 342.)

FIRE INSURANCE, RENEWAL, MORTGAGE CLAUSE. -By section 167 of the Ontario Insurance Act a mercantile risk can only be insured for one year, and may be renewed by a renewal receipt instead of by a new policy. The Supreme Court of Canada holds, reversing the Ontario Court of Appeal, that the renewal is not a new contract of insurance, and that, therefore, when the original policy is void for non-disclosure of prior insurance, the renewal is likewise a nullity, though the prior insurance has ceased to exist in the interval. Mr. Justice Girouard dissented from the other members of the court and held that the renewal is a new contact, but that it becomes avoided by non-disclosure of the concealment in the application for the original policy. The Supreme Court also held, that the mortgage clause attached to a policy of insurance against fire, which provided that "the insurance as to the interest only of the mortgagees therein shall not be invalidated by any act of the mortgagor or owner of the property insured, etc., applies only to acts of the mortgagor after the policy comes into operation, and cannot be invoked as against the concealment of material facts by the mortgagor in his application for the policy. (Agricultural Savings & Loan Co. v. Liverpool & London & Globe Insurance Co., 23 Canadian Law Times 133.)

TORONTO LETTER.

The Death of Sir Oliver Mowat—Annual Meeting of Toronto Board—Toronto Dwelling Rates—Political.

Dear Editor:—Flags at half-mast drooping from all flagstaffs in Toronto, the Province, and I suppose in the Dominion generally during the past three days, remind our people and the strangers within our gates that we mourn the loss of a good man. Sir Oliver Mowat, who passed to his rest on Sunday last full of years and honours, has left his mark and impress not only upon his own day and generation, but the reflection of them will also appear upon days and generations of Canadians yet to come. Truly, the good he has done will live after him. Very rightly and worthily our papers are full of tributes to his worth, his rectitude of life, and to his personal character; also his fidelity to the high principles that guide his career and his actions and relations in public and in private life.

The annual meeting of the Toronto Board, on the 16th inst., was a one day meeting of but ordinary interest,

seeing that only matters of routine with a sprinking of special items mostly not new to members, had an airing just to keep the moths out of them, as it were. The reconsideration of rates upon private dwellings in Toronto was one among these latter subjects upon which for the twentieth time, the opinion of the meeting was taken. Sensibly enough and wisely in the interests of offices and their representatives, the item was dropped once more, and nothing done about it.

I feel quite safe in asserting that the public are not clamouring, or asking, or even thinking about getting lower rates for their three year policies on household effects and buildings containing same. It is feit to be a light matter in a prosperous and ever prospering community like ours to agitate for lower rates on such risks The merchant, the manufacturer, the mill-owner, would much prefer to lave their high rated business premises on which the present premiums constitute a heavy annual tax, taken into reconsideration rather than the modest three year rates on their homes, which do not hurt or pinch dem to pay. So much for the public side of the matter. The insurance companies have to consider, should rates on dwellings be reduced, what effect on their revenue from such risks would result. Very surely they would find that they were carrying an inceased volume of liab lity for about the same revenue, when they made estimate at end of a 3 year period. The older companies enjoying the bulk of the dwelling house business, I fancy know this well enough, and do not favour a reduction that is quite uncailed for. I am saying all this for the twentie h time also. Every time I hear of a reduction of the kind proposed, by your courtesy, I desire to raise my voice against it, and I am not alone in my views either.

The recent meeting was in one respect a notable one because of representation at it of every company save one. This is something I expect that has never occurred before. Severa: items of the Agenda were handed over to special committees to confer about and report later.

The newly elected officers for the year are Mr. J. H. Ewart, of National, President; and Mr. R. W. Love, Royal and Atlas, Vice-President; Mr. J. A. C. McCuaig, Secretary.

In the evening of same day a banquet and reunion was held at McConkey's parlours, and a good time as usual, was had under the Chairmanship of the ex-President, Mr. H. D. P. Armstrong.

Politics with us just now are on top of all questions and interests of each day. Everyone has his views, and is ready to do wordy battle for them on the spot. It saves a deal of argument, and is an elegant compromise when one finds one's self drifting into a dispute, to say. "I am no partyman, I am a Canadian, first, and so above all party, let the truth prevail." It is so very safe and reasonable a thing to say, and is, besides, well high unanswerable.

Yours,

ARIEL

April 21, 1903.

NEW YORK STOCK LETTER.

Office of Cummings & Co., 20 Broad St., New York City.

New York, April 22, 1903.

The Northern Securities Merger case, has again been one of the chief factors in the market during the week. Application was made to have the decision modified, so that the dividend which was almost due could be paid, naturally the market became very nervous, as it was generally supposed that the court would refuse the application, so when about noon of Monday the decision was

handed down, modifying the decree, so that the dividend could be paid, it came as a very happy surprise to which the market promptly responded by a rise of from one to 5 per cent., although towards the latter part of the day it fell off a little from the highest.

Counsel for the Northern Securities' Company have also filed their appeal in this case and claim some thirty-four points of error in the case. Under the most favourable circumstances this case cannot come up for argument before next November, so that from this time onward it should have little, if any, influence upon the market. It is quite likely, however, that an investigation may be made regarding some of the coal roads, and we are not sure but that it will be welcomed by the officials of some of the roads, as it will give them an opportunity to get certain matters before the public, which they have not hitherto been able to bring out. This is more especially the case, as there is already a disagreement between the operators and the men over the construction of some clauses of the findings of the late commission. After the first of May, however, the labour troubles should show signs of quieting down. The threatened strike on the Elevated System has been averted, and the matters adjusted, and it is more than probable that some other disagreements in labour circles will be similarly disposed of.

Developments in the Metropolitan Street Railway matter have been highly sensational, and not by any means calculated to reassure investors. It would seem, however, as if about all the bad news which could be told about it had come out, and, consequently, the stock should not show much if any further decline, as a guaranteed 7 per cent. stock it now returns about 5.30 per cent. It is a properly with tremendous earning capacity which is stim growing, and likely to continue to increase for some time to come, and of itself, without the Interurban guarantee, it should be able to earn the dividends which it is now paying. If the charges which have been brought against this Company are false, it is due to the public at large, and more especially the investing public, that the parties making them should be severely dealt with.

Rates for money, as it was expected, would be the case about this time, are tending downward, owing to the return flow of currency from the West, and the heavy export movement of cereals and manufactured goods now under way. The sharp decline in the price of wheat within the past few days has stimulated the foreign demand, and this staple is now going out freely.

Reports from all quarters are to the effect that the condition of the winter wheat crop is excellent and that it has made splendid progress since the first of the month.

The Government report shows that the average condition of the crop on April 10 was 97.3 per cent., as against 78.7 per cent. for 1902; 91.7 per cent. for 1901. and 82.1 per cent. the average for the ten years previous. It is estimated that the wheat crop of 1902 was 756,269.573 bushels, of which it is claimed 155,000,000 bushels were sent abroad. This produced sufficient exchange to go a long way towards paying for the imports, which have come into the country. Reports as to corn oats and spring wheat, are also encouraging.

In pretty much all sections seeding is well under way with a considerable increase in acreage, so that the indications are that unless some unforseen disaster should occur the crops should, at least, equal those of 1902. In fact, the general outlook throughout the country is stated by such men as J. P. Morgan. George Gould and Marshall Field, whose information is from the very best sources, to be most excellent.

Notwithstanding the large increase in operating expenses, returns of net earnings continue to show increases, which are very good; in fact, the limit of business now seems to be set by the available motive power which the roads possess. In this connection the report of the American Locomotive Company possesses special interest. This shows that the earnings for nine months were \$23,-956,345, an increase of \$4,859,607 over the same period last year. The output shows an increase of 35 per cent. since the organization of the Company, and that since June 1, 1901, more than \$3,000,000 has been expended in the erection of new buildings, and the purchase of new tools and equipment, and the works are to be still further enlarged.

Of equal interest is the report just given out of the Pressed Steel Car Company for the quarter ending March 31. In this, the net earnings increased \$44,212, the surplus increased \$45,370, while the fixed charges decreased \$11,651. The corresponding quarters of last year showed unusually heavy revenues, that this quarter should show an increase upon that shows a remarkable condition of affairs.

Gradually, the pessimistic ideas so prevalent of late in and around Wall Street, are giving place to a more cheerful sentiment, as people more fully realize that in most cases there are good values behind securities, and that prices are not too high; but hardly any one expects any very extended buil movement, but all agree that there will be a good trading market.

On account of the ceremonies of the opening of the New York Stock Exchange, there has been no market here today.

LONDON LETTER.

FINANCE.

April 9, 1903,

Easter comes and finds the markets generally better although in no very pronounced degree. At the same time the current events on the continent are by no means reassuring to the investor, Serious disturbances in the Baikan Peninsula, revolution in Morocco, a national strike in Holland, riots in Spain, labour troubles in Italy, are amongst the leading contemporary events.

Still the best is hoped for. At home the pressure of revenue collection is over, National Debte interest has been paid, Consols are on the rise at last, the London County Council has made a huge success of its last loan. Lord Minto has been speaking most hopefully and enthusiastically at Johannesburg, on the future of South Africa, and we are all disposed to welcome the Transvaal loan when it comes

There seems every disposition to run riot with new reef discoveries in the Transvaal. Daily, there are cables of an optimistic nature detailing fresh finds, and an enormous number of new mining companies registered either in London or Johannesburg have come into being. About most of these scarcely any information is to be obtained, and they may generally be described as wild-cats of the worst description—floated only for offloading worthless shares directly the busy times come.

. . .

A class of share which is coming into particular request on the London Stock Exchange at the present time, to judge by the slow but permanent increase in market values, is that comprising the electric lighting. Looking over any number of balance sheets and general accounts one finds a careful avoidance of over-capitalization, excessive expenditure, unduly high dividends, and other common evils belonging to many specimens of joint stock finance. With steady dividends, increasing amounts are put to depreciation accounts in the annual balance sheets.

The tendency to rush up electric lighting share quotations, which manifested itself in the early days of the industry, was bappily checked, The information which came from the Dominion to the effect that judgment had been given against the Canadian Pacific Railway over the question of taxing its lands, was by no means relished by the London market. Generally speaking, however, the view here was that it was sent too early to judge exactly what the decision means.

. . .

There are altogether fifteen British Columbian mining shares usually dealt in here, and their fluctuations in price are wonderful, even in amongst mining shares. The best known share, the Le Roi, has in the last fifteen months fluctuated between 15-16 and 4 3-8. Ymirs have been up to 2 5-16, and down to 1-8 in the same period; Enterprise (B. C.) have moved between 1-16 and 13-16; Camp Bird, 3-4 and 1 5-8; and Le Roi, No. 2, 5 7-8, and 9-16. In the same way, Hall Mining have been priced at sixpence and at ten shillings. At the present time prices of British Columbians approximate generally to the lower levels, and the market is still under a cloud.

INSURANCE.

After a career of barely six months, the Loyal British Assurance Company is threatened with probable extinction. A creditor has presented a petition for its compulsory liquidation. It was formed last September with a nominal capital of \$750,000 to acquire the assets and business of the friendly collecting society of a similar title, and falled to obtain sufficient subscriptions to do so. The subscribed capital has never reached more than about thirty thousand dollars, and not much of this was actually issued against cash.

The method of operation in getting life assurance adopted by such companies as this is unsound. A large body of agents is got together by a promise of high commissions, and people are induced to pay weekly or monthly premiums without in the least knowing what security they are offered.

. .

Amongst the annual meetings of insurance companies held during the last ten days, is that of the Atlas. This company has stood out in the front of the new insurance reform—the reduction of non-participating rates. Life department expenses only run to 13 per cent at the premium income. This company also carefully eschews speculative loan transactions and financial enterprises, thereby steering clear of dangers which some other insurance companies are asserted to invite.

. . .

Mariborough Robert Pryor, the chairman of the Sun Life, had, of course, a word to say about his company's experience of Workmen's Compensation insurance. He asserted that the comparatively high rate then charged had been more than justified by the results. The low priced competitors had fared very badly.

STOCK EXCHANGE NOTES.

Wednesday, p.m., April 22, 1903.

The local market has been working stronger this week, and business shows a satisfactory improvement, both in volume and in tone. To-day's market was particularly firm. The New York market was closed and the influence of that centre was therefore removed. The result was contrary to what was expected. A dull market had

been looked for to-day, but instead quite active trading took place, and prices strengthened throughout the list. One of the features of the day was the sharp advance in Nova Scotia Steel. This stock closed with 97 bld last week, and the only sale yesterday was 25 shares at par. The first sale this morning was made at 101, and the stock sold up rapidly to 1041/4 reacting to 1031/2, at which price the last sale was made. There was no particular reason ascribed for this advance, which was mainly brought about by a few buying orders coming into the market at the same time. Twin City has been a feature of this week's market and was the most active stock in to day's trading. Steel Common has also improved in tone, and scored quite an advance to-day. It was the most active stock of this week, followed by C. P. R. and Twin City. Toronto Railway has also strengthened materially in price, although not very active. Toronto Rails continue to make a fine show in earnings, as do all the traction stocks, those for Twin City for the second week of April being over 25 per cent, in excess of the same week a year ago, Montreal Power has not been active, but is working decidedly stronger, and seems to be one of the firm stocks on the list. There is little offering at present, and a small buying movement would materially strengthen the price. Dominion Coal Common, after selling between 106 and 108 for a considerable time past advanced rapidly to 110 to-day, and closed firm with 1001/2 bid. The transactions were not large but a fair business was done. The Toronto market was closed this afternoon out of respect to the memory of the Late Sir Oliver Mowat, late Lieutenant-Governor of Ontario, whose funeral took place today. The New York market was closed all day, owing to the ceremonies in connection with the opening of the new Exchange on Broad Street, into which they are now

The latest quotation for call money in New York is 3 to 3½, and the rate in London to-day was 3 to 3½. The local quotation remains unchanged at 6 per cent.

The quotations for money at continental points are as follows:—

	Market.	Bank
Paris	. 24	3
Berlin	. 23	34
Hamburg	. 2	3½ 3½
Frankfort	. 2	31
Amsterdam		31 8
Vienna	. 31	34
Brussels		3

C. P. R. shows a good advance in price and closed with 132% bld, a gain of 3% points for the week. The highest touched was 133, and the transactions totalled 6.354 shares. The earnings for the second week of April show an increase of \$205,000.

The Grand Trunk Railway Company's earnings for the second week of April show an increase of \$116,054. The stock quotations as compared with a week ago are as follows:—

Α.	week ago.	To-day
First Preference	1143	1124
Second Preference	99%	98
Third Preference	481	48

The trading in Montreal Street continues very limited, this week's sales totalling 130 shares. The closing bid was 268½, an advance of % of a point. All the recent sales were made at 269. The dividend of 2½ per cent for

the quarter will be payable on 1st of May, and the stock is now selling ex-dividend. The earnings for the week ending 18th instant show an increase of \$5,773.83, as follows.

Sunday	\$5,166.44	Increase. \$1,608.46
Monday	6.250,75	1,109.12
Tnesday	6,093.68	848,44
Wednesday	5,708.47	536.68
Thursday	5,777.20	530.83
Friday	5,681.05	616.03
Saturday	6,102.22	524.27

The closing bid for Toronto Railway was 111, a gain of 2 full points for the week on transactions totalling 751 shares. The recent earnings have been showing heavy gains, those for the week ending 18th instant showing an increase of \$10.575.34, as follows:—

			increase.
Sunday		\$3,323.10	\$1,120.08
Monday		6,201.48	1,627.46
Tuesday		6,410.20	1,9 5.20
		6,396,20	2,127.58
Thursday		5,932.40	1,493.85
		5,707.22	1,201.29
	*******	6,622.63	1,009.88

Twin City has been active this week, and 4.684 shares were involved in the trading. The closing bid was 113%, a gain of 2% points over last week's closing quotation. The earnings for the second week of April show an increase of \$15,112.30.

The transactions in Detroit this week totalled 602 shares, and the closing bid was 84%, a gain of 3% points for the week.

In Toledo Railway 250 shares changed hands, the last sales being made at 32. The closing bid was 31, a gain on quotation of ½ point for the week.

A very small business was done in R. & O., and 99 shares in all changed hands. The closing bid was 93, a nominal loss of 1 point on quotation for the week.

Montreal Power has strengthened materially and closed with 95% bid, a gain of 1% points on transactions of 478 shares.

The Dominion Steel Stocks have all been stronger, the closing bid for Steel Common being 31, a gain of 4% points for the week. The stock touched 32 to-day, but has since reacted. The transactions for the week totalled 5,365 shares. The Preferred also shows a satisfactory gain and closed with 71 bid, an advance of 7½ points over last week's closing quotation on sales of 721 shares. The business in the Bonds totalled \$34,000, and the closing bid was 78%, a gain of 4% points for the week.

Nova Scotia Steel Common sold up to 104¼ this morning, and the last sales to-day were made at 103½. The closing bid was 102½, a gain on quotation of 5½ points points for the week on transactions involving 540 shares.

Dominion Coal Common closed with 100½ bid, a gain of 3½ points over last week's closing bid on transactions of 1.223 shares. The sales in the Preferred Stock amounted

to 30 shares, and there was no bid at the close. The last sales were made at 117.

Thursday, p.m., April 23, 1903.

The market to-day was firm but not very active. Dominion Steel Common, however, reacted quite sharply. After opening at 311/2, it sold down to 291/2 and closed at 29% bid. C. P. R. opened this morning at 133% and sold down to 1321/2, closing with 1321/4 bid. Twin City was quite active and after opening at 1141/4 touched 113%, closing with 113% bid. Toronto Railway was fairly firm, but also reacted fractionally from the highest of the day, closing at 110 bld. Detroit last sales were made at 83%. Dominion Iron Preferred was firm and sold at 72 and 73, the last sales being made at 72, and the Bonds closed with 78 bid, offered at 80. Montreal Power sold at 95% in the morning, and the last sales to-day were made at 95%, and the stock closed with 95% bid. There was a fairlyfirm undertone to the market, but money rates are unchanged and supplies are yet limited.

The Manchester Assurance Company

THE DIRECTORS REPORT OF

The Directors beg to report the following results of the

Company's operations during the year 1902:— The Net Premiums amounted to £732,039 12s. 8d., a reduction of £96,920 3s. 9d. upon the preceding year, due to the abandonment of business in unprofitable fields referred to at the last Annual Meeting of Shareholders. The Losses incurred were £442.794 14s, 4d., or 60.4 per cent. of the net premiums, and the working expenses, including commissions, were £274,804 3s. 10d.

Owing to the difficulty of forming accurate estimates for unsettled claims on the Accident business, incurred prior to its sale, a further sum of £1,173 9s, 1d, has had

to be provided in the annexed account.

The Credit Balance on the Revenue Account is £32,837 5s. 3d., of which £22,995 5s, is absorbed by the Dividend to Shareholders and Interest on Bonds, thus leaving

£9.842 0s. 3d. to be added to the Reserve Funds.

While the actual Fire trading surplus for the year shown by the Revenue Account is £15,340 14s. 6d., Account is entitled to be credited with at least one-third of the reduction in premiums on account of the smaller reserve required against liabilities on current Insurances. Consequently, the real underwriting profit on the year is not less than, say, £47,000, and as illustrating this the Directors beg to point out that the ratio of reserve funds to premiums has increased 6.3 per cent., while the proportion of total funds to premiums has improved 10 per cent.

For the half-year ending 31st December, the Directors recommend a Dividend of Two Shillings per Share, free of Income Tax, payable on the 8th April, which, with the Interim Dividend paid in September, will make a distribution of 10 per cent, for the year.

Owing to the retirement of Mr. T. Barham Foster from

the Chair, the Directors have elected Mr. George Reynolds

Davies as Chairman of the Board.

The Directors retiring by rotation are Messrs, John L. Birkett, E. Tootal Broadhurst and D. E. Glynn, who are eligible and offer themselves for re-election.

The Auditors retire from office, as usual, but are eligible, and offer themselves for re-election.

The Directors acknowledge, with much appreciation, the services rendered by the United States Trustees, and by the various Representatives of the Company at home and abroad.

By Order of the Board.

H. S. MALLETT,

Manager.

Alliance Assurance Company, Limited

EXCERPTS FROM REPORT

For the Year 1902, submitted to the Shareholders at the ANNUAL GENERAL COURT, held at the Head Office of the Company, in Bartholomew Lane, in the City of London, on WEDNESDAY, the 8th day of April, at 12 o'clock at noon.

FIRE ACCOUNT.

The net Fire Premium Income (which does not include premiums in respect of the closed accounts) amounted to £929,900 1s. 4d. for the year, and the losses paid and outstanding to £435,360 2s. 0d. This sum includes the losses incurred in 1902 (except the losses on the closed accounts) under IMPERIAL Policies in force on the 1st January in that year, whether the Premiums on such Policies were brought into the 1902 Account, or had been included in the IMPERIAL Account before the transfer to the ALLIANCE.

After deducting irrecoverable Agency balances (£481 10s. 0d.), Commission and Expenses of Management amounting to £181,214 6s. 1d., there remained an Underwriting Profit of £170,315 17s. 5d. on the account, to which has to be added Interest (less income tax) on the Capital, Fire Insurance Fund and Profit and Loss Account.

making a total profit of £296,889 13s, 6d, for the year.

The Fire Losses amounted to £46 16s, 3d, per cent, of the net premiums; the Expenses of Management, including Commission and irrecoverable Agency balances, to £34 17s. 6d. per cent., leaving an Underwriting Profit of £18 6s. 3d. per cent.

The Fire Insurance Fund (including £1,262,772 9s. 0d. transferred from the IMPERIAL FIRE OFFICE) amounted to £2,126,164 13s. 11d., and the balance of Profit and Loss Account to £374,849 1s. 10d.

The Funds of the Company on the 31st December, 1902. as per General Balance Sheet, stood as follows: Paid-up Capital..... £ 765,625 0 0 Life Assurance Fund...... 3,754,830 15 5 557,909 15 11

JAMES FLETCHER, Tico Directors.

In accordance with the provisions of the Companies' Act, 1900, I certify that all my requirements as Auditor have been complied with, and I report to the Shareholders that I have audited the above Balance Sheet and the several accounts incorporated therein, together with the vouchers relating thereto. In my opinion the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Company's affairs as shown by the books of the Company. The Audit has in-LONDON, 21st March, 1903.

ROTHSCHILD, R. LEWIS.

Chairman. General Manager.

cluded verification of the Bank Balances, inspection of the Company's Stocks, Shares and Deeds, as well as those held as Security, excepting such Securities and Deeds as are deposited abroad for which certificates have been produced. The Funds of the Imperial Life Assurance Company and the Accounts in relation thereto have been kept in accordance with the Agreement between the two Companies of the 22nd January, 1902.

C. L. NICHOLS, F.O.A., Auditor.

MESSES, FETHERSTONHAUGH & Co., patent solicitors, Canada Life Building, furnish us with the following weekly list of patents granted to Canadians in the following countries. Any further information may be readily obtained from them direct. CANADIAN PATENTS-W. Stinson, brick machine, J. Brisson, wood turning machines. R. B. Walker, automatic railway crossing gates and stock guards. G. T. Hyde, neck yokes, whiffle trees, double trees, etc. D. McDonald, digging and loading machine. J. A. Gemmill, curtain display racks. R. Porter, combined wire fence weaver and splicer. C. Lachance, coats and the like. F. X. Gagnon, operating mechanism for saw mill carriages. G. Latourelle, water heater. R. C. Warner, milk cans, C. F. Pym, lasts, G. Racine, fountain shoe brushes. W. Mills, protectors for railway ties. F. McArthur, animal troughs. S. Belanger, grain drills. H. C. Chamberland, draft appliances for stoves. A. L. Schran, covers for jars and analogous vessels. J. Bennitt and J. O. Weldon, sad irons. T. Paul, telephone systems. P. E. Nichol, lung and voice developers. C. M. Armstrong, gas burners. G. ^{*}Guaranty fund. **Company pays stockholders interest on investment of capital stock.

AMOUNT OF ONE PENNY DOUBLED WEEKLY FOR ONE YEAR.-If a person undertook to pay one penny the first week in the year, and to double the amount weekly, each week of the year, the obligation he would lay himself under would be so vast that it could not be discharged by him, even if he became owner of all the gold and other monies in the world! One penny, or say, two cents. doubled weekly throughout the fifty-two weeks of one year amounts to \$51,524,212,990,670.

WANTED :- Competent Bookkeeper for a Fire Insurance office. State age, experience and salary expected

Apply: Box 2353 ost Office.

Notice is hereby given that it is the intention of The Canadian Bank of Commerce, and The Halifax Banking Company to apply to the Governor-in-Council of Canada for approval of an agreement between the said Banks, for the purchase by the Canadian Bank of Commerce, of the entire assets of The Halifax Banking Company.
This notice is given pursuant to section 39 of The Bank Act Amendment Act, 1900, and such application will be made after this notice has been published for at least four weeks, as required by the said section.

AN ADVANTACE.

The Manufacturers' Life offers Total Abstainers special advantages.

They can do this because the death rate in their Temperance section is smaller than in the general section.

This fact gives agents of the Company special advantages in looking for business. Some good fields still open.

THE CANADIAN BANK OF COMMERCE.

NOTICE IS HEREBY GIVEN that it is the intention of The Canadian Bank of Commerce, after publication of this Notice for four weeks in the "Canada Gazetie," and in the "Monetary Times," a newspaper published in the City of Toronto, to apply to the Treasury Board for a Certificate approving of the following By-law of the Canadian Bank of Commerce:

WHEREAS the Capital stock of the Canadian Bank of Commerce is now eight million dollars, and it is expedient that the same should be increased by two million dollars.

BE IT THEREFORE ENACTED as a By-law by the shareholders of the Canadian Bank of Commerce assembled at a special general meeting called for the purpose of considering and, if thought fit, of passing this By-law, and held in the Board Room of the Canadian Bank of Commerce, at the corner of King and Jordan streets, Toronto, on Tuesday, the fourteenth day of April, A.D., 1903.

1. THAT the capital stock of the Canadian Bank of Commerce be and the same is hereby increased by the sum of two million dollars, divided into forty thousand shares of fifty dollars each.

IN WITNESS WHEREOF the Corporate Seal of the Bank has been hereto affixed, and this By-law has been countersigned by the President and General Manager this 14th day of April, A.D., 1903.

(Seal).

(Signatures). GEORGE A. COX. President. B. E. WALKER.
