PREFACE.

One of the most important duties of the state is to provide for the education of the children who will some day be its masters. Democracy with all its good and evil must be accepted as the basis of modern govern-Though here and there a philosopher may seoff at the "suffrage of the plow," yet social order and stability must henceforth depend on either the tolerance or the good will of the masses of the people. The time when a small educated class could safeguard the glories of civilized life and the arts by the use of physical or moral force, is rapidly disappearing. Therefore, it is a self-evident fact that the state ought to teach its future citizens the worth of our civilization and the ways of preserving it from impairment, and of assisting in its progress. We must no longer, as those of an earlier age, walk calmly over the surface underneath which slumbers the volcano of popular passion. The fruits of centuries of toil are too precious to be exposed to any possibility of injury. There must be a means sought for training our people in social and civic responsibility.

Government is the foundation on which the splendid fabric of our civilization is upreared. Therefore, it is a subject about which the pupils in the schools should receive very definite instruction. In the present little book an effort is made to present the elementary facts about our system of government in the simplest form, so that those who do not pass beyond the senior grades of the public school or the junior grades of the high school, may go out into the world with some adequate conception of what will be their duties and responsibilities as Canadian citizens.

CANADIAN CIVICS.

PART I.—NATIONAL AFFAIRS.

TOPIC I.

THE OUTSIDE NATIONS AND THE EMPIRE.

1. The Nations.

When we look abroad upon the world, we observe that it has numerous divisions which bear the name of "countries" and which are occupied by "nations." Some of these divisions are large, such as the United States and Russia, while others are small, such as Switzerland and Greece. But we must not estimate power and importance solely by extent of territory. Thus Germany, though occupying a portion of Europe of only moderate area, is regarded as one of the great nations of the world.

There are, however, very few countries strong enough to defend themselves successfully against a foreign foe. The weaker nations owe their independence sometimes to the sense of justice of the more powerful, but more often to the mutual jealousy existing among these latter. None is willing to see any of its neighbours grow very strong. Consequently, if a smaller country is invaded by a more powerful one there is probability that ontside assistance will be given the former in one way or another.

Thus efforts are constantly being made to preserve what is commonly called the "balance of power." The stronger nations of the world are known as the "great powers." They are Great Britain, France, Germany, Italy, Austro-Hungary, Russia, United States and Japan.

2. The Kinds of Government.

After what has been said, we can describe in a general way what a "nation" is. It is a mited body of people occupying a certain territory which is called a "country." Further, matters are so arranged that one man, or a small group of men, acts as its head, and is its highest representative in its dealings with other nations. Now the question is, how can a very large number of people, in some cases hundreds of millions, be induced to act together so that they will form one nation? The answer

is that this result is brought about by what is called "government," and we shall be studying in this book what our government is and how it holds our nation together.

natural for a number of persons to agree to work together and to help one another in many ways, such as giving aid in defence against enemies, forming treaties with friends, and building roads and bridges or making other improvements. But we learn from history that the present arrangements by which these and many other things are done, were arrived at only after centuries of effort. Moreover, some nations have not made as much progress in government as we, and we ourselves, we shall see, have not yet reached perfection.

a

n

a

is h

n

es.

r

er

If we read history and observe how governments have grown up, we shall be inclined to place them in two classes. One class will include those in which the head of the nation, generally called a king or an emperor, is always a member of a particular family, and in which the son, no matter what sort of man he may be, usually

succeeds the father. This kind of government is called "monarchical," and it is that of Great Britain, Germany and Japan. The other kind of government is the "republican," where the head, often known as the "president," is chosen from the general body of the people by the citizens themselves or by persons directly representing them. This is the form existing in the United States and France. It is worthy of note that often men who are born poor and in a humble position rise to be presidents of the republics.

The better division, however, is into the two classes, "despotie" and "popular." In a despotic government, the ruler and a small group of men associated with him carry on the business of the nation without consulting the wishes of the people, while, in a popular government, the rulers, whoever they may be, must govern as the people wish. The government of Great Britain is monarchical and popular, while that of the United States is republican and popular. There are not many purely despotic governments now in the world, but some of the monarchical

governments of Asia and Africa and some of the republican governments of South America still belong to that elass.

3. The Empire and the Colonies.

The name "Great Britain" is ordinarily used as the short form for the full title, "The United Kingdom of Great Britain and Ireland." Great Britain is the rnling state, or division, in the Empire to which we belong. In dealings with other nations, except in commercial and some other matters, Great Britain acts for the whole Empire. Divisions of the Empire, such as Canada, may have representatives in making treaties and arrangements with other nations on any matter which closely concerns them. But these are appointed as representatives of Great Britain as well, and are considered as such by foreign states.

It is plain that at present a great change is going on in the Empire. Some think that after a time the several divisions that are in the same position as ourselves, will be placed on an equal footing with the ruling division, Great Britain, and that some way will be devised of

ament Great kind e the

the eprethe note
in a

the

iosen

two
des-

of ent, ern eat nat

ar. its

al

making them all work together as one nation, when dealing with the rest of the world. Others believe that this plan of "allied nations" is not practicable, and that, if we try to carry it ont, it will lead to the breaking up of the Empire. Here is one of our great problems and no one yet can see a good solution.

Our Empire is not an "empire" in the strict sense of the term. It has received this name solely on account of its enormous size, for its head is not an emperor but a king. Though the king is called an emperor as well, it is only as the ruler of India that he has a right to the title.

All the divisions of the Empire, except the British Isles and India, were originally called "colonies," or settlements, because emigrants went from Great Britain to take up land, or settle, in them. All of them were at first governed by men whom Great Britain appointed for the purpose. The colonists had very little to do with the management of their own public affairs.

But afterwards those colonies which possessed a sufficiently large and suitable population were allowed to govern themsel 28, and they have all established popular forms of government as much like that of Great Britain as possible. Such colonies have long been known as self-governing colonies, but they have lately received the special name of "dominions." This is the name which we chose when we united the separate colonies of Canada, New Brnnswick and Nova Scotia into one large country, the Dominion of Canada.

The word "colony" we do not like, and we usually speak of ourselves as a "nation." Some object to the name "nation," because it ordinarily means an "independent nation" or "sovereign state," and we do not claim to be that, but desire to be part of the Empire. Its use may be defended, because it is the nearest suitable word for a new condition of affairs, and we give the term a special meaning, just as the people of the United States have given a special meaning to the word "state." A "state" like New York is not an independent state, but is subject to the government of the whole United States at Washington. The chief "dominions" in the Empire besides Canada, are Australia

tion, hers not t, it

oire. one

riet une its the

the

ept illy use

up at ain ad

sed ere

eir

(called "Commonwealth)," New Zealand, Newfoundland, and Union of South Africa.

On the other hand, the colonies which have not a population suitable for self-government, as those situated in the tropics where the native races are not highly civilized, are placed, either wholly or partly, under the administration of persons chosen by Great Britain. Such are called "crown colonies."

But sometimes native races are left under their own rulers, Great Britain maintaining a general oversight through a specially appointed representative. This kind of government is known as a "pretectorate." An example is Egypt, which has its own native under or Sultan, as he is called. This country formerly belonged to Turkey, but was finally made a part of our Empire during the Great War.

It may be said that in the British Empire there is every kind of government, from the most highly popular to the most despotic. But whatever may be the form, Great Britain , New- ende
as t

tion of

known Egypt, Sultan,

rly bemade Great

Empire m the . But

. But Britain endeavours to administer it in such a manner as to make possible for each of the vast mumber of races and tribes under the imperial sway the greatest amount of happiness and prosperity.

Notes.—The name "Great Britain" has been employed throughout. But it is to be observed that the name "England" is often used for the whole "United Kingdem," because of its being that of the largest division. The term "Britain" is also employed. "Imperial Government" is frequently used for "Government of Great Britain" or "British Government," because it is the supreme or highest government of the Empire. "Greater Britain" is a common newspaper term for the colonies. Its origin is obvious. The actual title of the king 1- "George the Fifth, by the Grace of God, of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, King, Defender of the Faith, Emperor of India."

QUESTIONS.

- 1. What nations are called the "great powers"? Why are they so called?
 - 2. What does "government" do for the nation?
- 3. Mention and describe the chief kinds of government.
- 4. What is an empire? Why do we call the British Empire by that name?
- 5. What are "erown colonies," "protectorates," and "dominions"? Give examples of each.
- 6. Read over and try to understand the lines quoted from Shakespeare.

ENGLAND.

This royal throne of kings, this sceptcred isle,
This earth of majesty, this seat of Mars,
This other Eden, demi-paradise,
This fortress built by Nature for herself
Against infection and the hand of war,
This happy breed of men, this little world,
This precious stone set in the silver sea,
Which serves it in the office of a wall
Or as a most defensive to a house,
Against the envy of less happier lands,
This blessed plot, this earth, this reahn, this England

-Shakespeare, King Richard II, Act II, Sc. 1.

TOPIC II.

THE DOMINION AND THE PROVINCES.

1. Federal System of Government.

Our system of government is what is known as a confederation, and in this respect it resembles that of the United States and Australia and differs from that of Great Britain and France. The settled part of Canada is divided into nine provinces, each having a government of its own.

A provincial government has the duty of looking after certain definite matters which concern the province alone, and which it is believed . can best be managed by such a body of local men familiar with local needs. In a country of vast extent such as ours, the provinces differ very much from one another, in their position, some being on the sea and others inland; in their physical features, some being mountainous and others consisting of prairie; and in their inhabitants, some containing ehiefly people whose ancestors eame from the British Isles, others possessing a more mixed population, and onc, Quebee, having a great majority of persons of French descent. Consequently, it is plain that with respect to many things laws must be different in different provinces in order to stit the varying conditions.

On the other hand, all matters which were thought by the founders of our constitution to concern the whole body of Canadians, or those about which it was felt more suitable laws could be made by a group of men representing the entire country, were left to be managed

gland , se. 1.

own t it and itain

a is g a by a central government, usually called the Dominion or Federal Government.

2. Subjects of Dominion Legislation.

Now in order that there should be no doubt as to which government, Dominion or provincial, had the right to make laws in regard to particular matters, it was agreed that the Dominion should deal with everything which was not expressly assigned to the control of the provinces. Then "for greater certainty" there was drawn up the following list of subjects about which the government of the Dominion alone has the power to "legislate" (that is, make laws):

(1) The public debt and property, (2) trade and commerce, (3) the raising of money by any kind of taxation, (4) the borrowing of money, (5) the postal service, (6) the taking of the census, (7) military and naval matters, (8) the payment of the "civil service," that is, the clerks and other officials employed by the government, (9) lighthouses, (10) navigation and shipping, (11) quarantine and marine hospitals, (12) fisheries, (13) ferries, except when

doubt ineial, and to the which or of ainty "bjects minion

d the

trade
by by
ag of
aking
atters,
that
ed by
avigaarine

when

at is,

entirely within a province, (14) currency and coinage, (15) banking and paper money, (16) savings banks, (17) weights and measures, (18) bills of exchange and promissory notes, (19) interest, (20) legal tender, that is, what shall be accepted as money in payment for anything, (21) bankruptey, (22) patents for inventions, (23) copyrights on books, etc., (24) Indians and Indian lands, (25) naturalization, that is, the giving of the rights of citizenship to foreigners, (26) marriage and divorce, (27) the criminal law, except the constitution of the courts of law, (28) penitentiaries, (29) matters expressly stated as not belonging to the provinces.

3. Subjects of Provincial Legislation.

To the provincial governments has been assigned the definite list of subjects given below. They cannot legislate about any matter not mentioned in this list; but they alone can legislate about those which are included in it. The list is,

(1) The changing of the constitution of the province, except in regard to the office of

lieutenant-governor, (2) direct taxation, (3) the borrowing of money for the province, (4) the civil service of the province, (5) the public lands, if the province owns its lands, (6) the prisons and reformatories of the province, (7) hospitals, asylums, and charitable institutions, (8) municipal institutions, (9) licenses such as those of taverns, shops, and auctioneers, (10) local works and undertakings, except lines of steamships, railways, canals, telegraphs, and other works and undertakings extending outside the province, and such works which, although wholly inside the province, are declared by the Dominion parliament to be for the general advantage of Canada, (11) the incorporation of companies for business in the province, (12) the solemnization of marriage, (13) property and civil rights, (14) the administration of justice and procedure in civil matters in the courts, (15) punishment by fine and imprisonment, in case any provincial law is broken, and (16) generally all matters of a mercly local or private nature.

The subject of education must be added to this provincial list. But if a province before establish separate schools, it must always allow these schools to be carried on. Consequently, the Roman Catholies of Ontario and the Protestants of Quebee can never be forced to give up the separate schools which they at present possess. Further, the subjects of agriculture and immigration may be dealt with by both the Dominion and the provinces. But if the Dominion law and the provincial law do not agree in whole or in part, the Dominion law is the one which has force.

What happens if a province enacts a law on a subject with which it has no right to deal? If a person breaks such a law, can he be punished? He can allow the matter to go to trial in a court, and it is there determined whether the province has a right to enact such a law or not. If the province has no such right, the person wins his case and cannot be punished. In very important matters a suit of this kind will be earried from a lower court to a higher, until it is finally decided by the highest court in the Empire, the Privy Council in England.

the olic the (7)

he

of of and ide

as

igh the ral

of the ind

rts, in

16) or

to ore

4. Dominion Control of Provincial Legislation.

But there is another way by which not only a law beyond the right of a province to make, but even one which comes within its right, can be entirely set aside. This is to be found in what is known as the power of "disallowance." The Dominion government may, if it desires, "disallow," or set aside, any provincial law, provided that it does so within a year after receiving a copy of such law from the province. This is a power which should not be used very often, because it is very natural for the people of a province to resent what looks like too much interference with their own local affairs.

5. Imperial Control of Dominion Legislation.

The government of Great Britain has likewise the right to disallow a law enacted by the Dominion, if it is considered that this law will cause injury to the Empire, is contrary to treaties that have been made with foreign nations, or is beyond the right of our parliament to pass.

6. Uncertainties as to Dominion and Provincial Powers.

Now it may seem as if everything had been carefully provided for, so that no dispute eould ever arise between a province and the Dominion in regard to the subjects about which they have a right to legislate. But it is just here that some of the greatest difficulties have been encountered. Many matters were not carefully enough stated in the constitution, and, as a consequence, the courts have had to do a great deal of work in determining whether the Dominion or the provinces have the power to legislate in certain cases. For example, one of the very important questions for a long time in donbt was, how far the provinces could go in making laws about the sale of intoxicating liquors. This question has been at last decided, and it is now known that the provinces are allowed to restrict and practically to prohibit the sale in certain well-defined ways.

In concluding this topie, we may observe that the laws of our province have much more to do with our ordinary life and its happiness than

tion. only a

e, but in be id in nee."

sires, law, after

ince. used the

like local

on. wise the

law z to

eign ient have the laws of the Dominion. For what our city or other local municipality asks from us or does for us, how our schools are conducted, how property is kept or sold, and a vast number of such matters as most intimately concern us, all depend upon the laws, good or bad, which our province makes.

Nete.-The "constitution" is the name given to the whole body or collection of rules in accordance . .th which the government of a country is conducted. In Great Britain these rules are not anywhere written out together in one document. They are gathered from what British governments have done in the past even back to distant ages, and have come to be pretty well understood. If there is doubt as to what to do in a particular case, or if there really is no rule, a certain decisien is adopted by the government as te the matter. This decision may lead up te a new rule for the future, and is called a "precedent." In the United States, however, a great number of the rules of government are written out in a formal document, and are changed rarely and with difficulty. So we speak of Great Britain as having an "unwritten" constitution, and of the United States as having largely a "written" constitution. Canada has a written constitution in the "British North America Act," which was passed by the parliament of Great Britain at our request in 1867, so that the various separate provinces of those days might be formed into a union or "confederation," and be able to work together with a federal government over them all. But there are a multitude of points which our written constitution does not cover, and so we follow and establish precedents as well, and also go back to the precedents set by the governments of Great Britain.

QUESTIONS.

- 1. Why is the federal system of government suitable for Canada?
- 2. Tell in a general way what classes of subjects come under the jurisdiction of the Dominion and of the provincial governments. Illustrate your answer by examples.
- 3. To what extent can the provinces deal with the subjects of education and immigration?
- 4. How can the Dominion control the legislation of the provinces? How can Great Britain control Dominion legislation?
- 5. What difficulty has arisen in the working of our federal system?
- 6. What is meant by the "constitution"? What is a "precedent"?
- 7. Write a composition taking as your subject the thought contained in the following lines:

THE STATE.

What constitutes a state?

Not high-raised battlement or laboured mound, Thick wall or moated gate;

Not cities proud with spires and turrets crowned; Not bays and broad-armed ports,

Where, laughing at the storm, rich navies ride;

Not starred and spangled courts,

Where low-browed baseness wasts perfume to pride.

No! men, high-minded men,
With powers as far above dull brutes endued
In forest, brake, or den,
As beasts excel cold rocks and brambles rude,—
Men wno their duties know,
But know their rights, and knowing, dare maintain,
Prevent the long-aimed blow,
And crush the tyrant while they rend the chain.

-William Jones.

TOPIC III.

How the Laws are Made.

1. Legislation.

In the government of a country there are three kinds of work to be done. One is the making of the laws, and another is the earrying out of the laws. The third kind of work is that which the courts do in deciding what the law is in particular cases that are brought before them.

Let us for the present consider only the first kind of work, the making of the laws. We may well do so, because in our country the men who carry out the laws are also among those who make the laws. In the United States, on the other hand, the men who carry out the laws, namely, the president and his cabinet, have little part in making them.

2. Parliament.

The body of men who legislate for the Dominion is called the "parliament" of Canada. Parliament consists of the king and the two houses of parliament, the Senate and the House of Commons. The king eannot, of course, be present here in Canada, and so some one is appointed to aet for him. This representative of the king is known as the governor-general. Yet it must always be remembered that the king is considered to be the direct ruler of Canada. All laws are made in his name, and not in that of the governor-general. Mereover, the governor-general is said to give not his own but the king's assent to a bill, before it becomes law.

3. Governor-General.

The governor-general is appointed by the British government, and is generally some well known man in Great Britain. He is usually a member of the House of Lords. No Canadian has ever been appointed, but it cannot be said that any rule has been made as yet in regard

'n,

ca,

are the ing

r is m.

rst ay ho ho

he vs, to the matter. Some day the question will come up for decision, and there will be a precedent set either for or against the appointment of a Canadian to this high office.

The governor-general acts towards the houses of parliament of Canada in exactly the same way as the king acts towards the houses of parliament of Great Britain. The king nowadays has no power to do anything but what the houses of parliament wish. If they pass a bill, he must assent to it.

He does not sit in either of the houses, and is quito apart from them. But the leader of the government, that is, the person whom the House of Commons is willing to obey, is expected to tell the king about all important matters that are being discussed in parliament. The king can give advice to the leader of the government, and can warn him, if he thinks that he is leading parliament to make mistakes, but cannot refuse to do what parliament wishes. All discussions between the king and the leader of the government are kept absolutely secret. So nobody really knows what the king's opinions are.

on will be a ppoint-

houses
same
ses of
nowawhat

pass

, and er of the ected that and ling

and ling fuse ons ern-ody .re.

Since he must do what parliament and its leader desire, he is never blamed if a mistake is made. Consequently, there is at the head of the nation a person who is regarded as above and beyond all the fierce struggle of polities. If the nation is dissatisfied, it blames only the leader of the government and those who support him in parliament.

Sometimes, however, our governor-general, when a bill is sent to him after it has passed the two Houses, may say that he does not give the king's assent to it, but reserves it for the king's decision, that is, of course, for the decision of the government of Great Britain. The governor-general will never reserve a bill, unless he has a good reason for so doing, such as, believing that it will be hurtful to the Empire as a whole, that it is contrary to treaties with foreign nations, or that it is beyond the right of our parliament to pass. Two years are allowed for the British government to consider whether the king's assent shall be given to a bill reserved in this way. If it is given, the bill becomes law, but, if not, the bill does not become law.

As has been mentioned before, the British government can likewise disallow a law already passed and assented to by the governor-general. So its powers are very great, but they are used earefully, or there would soon arise much ill-feeling in Canada against Britain. In the same way there would be ill-feeling in the provinces, if the Dominion government used its power of disallowanee without proper care. All trouble is usually avoided, because the governments eoneerned earnestly strive to meet one another's views as far as possible. In the end matters ean generally be arranged in a very friendly way, even when the governments have not at first been in agreement upon certain points.

4. The Senate.

It is in the houses of parliament that the laws are made; for it is now plain that the governor-general, although he is at the head of the nation, has seareely any real power. Of the two Houses, the Senate is very much less important than the Commons. The Senate has, however, the same right of legislation as the Commons, except in one important matter. But usually it

does not try to do much work beyond accepting after more or less discussion and amendment the bills already passed by the House of Commons. Later we shall learn why it is that the Senate is not a more important parliamentary body.

5. The House of Commons.

The laws are really made in the House of The leader of the government is Commons. nearly always a member of this House and guides it in its work. If he should happen to be a member of the Scnate, he must have some one recognized as the leader of the Honse of Commons in his place. But such an arrangement is not a safe one in our parliament. Besides the leader of the government, most of the members of his cabinet, that is, those who are directly associated with him in the government of the country, have seats in the House of Commons. We usually speak of the leader and his eabinet as the "government." They must either have the support of a majority of the members of the House of Commons, or give up their places to those who are able to obtain a majority.

tion, two rtant ever, ons,

ly it

It is their duty, while they are in power, to see that the laws which are necessary for carrying on the work of the nation, are properly passed by parliament. Bills introduced at the wish of the government are called "government measures." They may be brought in either by members of the government themselves or by private members in whom they have confidence. If a government measure does not pass, the government must resign or ask the governor-general to allow a new election to be held. Therefore, the defeat of a government measure in the House is a very serious matter and hardly ever happens. For the government usually finds out beforehand whether its supporters are willing to allow the bill to pass or not.

But sometimes the members of the government may feel that a certain measure which they desire to bring in, is so important that it must be placed before the Honse, and yet that it is in danger of being rejected. What they will probably do, will be to endeavour to put this measure, if possible, in such form

as to render it more acceptable to their followers and induce them to change their minds. Moreover, supporters of the government do not like to see their side beaten, and besides, members of the House do not usually wish to have an election held before the regular time, because elections are uncertain and expensive. Therefore, the government generally finds it an easy matter to persuade its followers to assist in passing all the legislation that is required.

In addition to the measures which the government introduces, a great many bills are brought in by private members. Some of these pass, many do not pass, while others never really come before the House at all. We shall be able to inderstand this part of the subject better when later we study how parliament does its work.

Note.—Before a proposed law has passed the houses of parliament and has been assented to by the governor-general, it is known as a "bill." Afterwards it is called an "act of parliament" or a "statute." An act of parliament may come into force as a "law," as soon as it has passed the Houses and received the royal assent, or it may be intended to come into force at a later time.

TOPIC IV.

HOW PARLIAMENT DOES BUSINESS.

1. The Speaker.

We shall now take up more fully the study of the two houses of parliament, and see how they carry on their work and how the members of each are chosen. We shall speak chiefly of the House of Commons, and mention the Senate only when the latter differs in some important respect from the Commons.

The House of Commons is like any public meeting, and must have a chairman to see that business is conducted in a proper way. The chairman is ealled the "speaker." He is elected by the House, when it first meets after the parliamentary elections. He is one of the supporters of the government, because the government have the majority in the House, and thus can always secure the election of one of their own friends. But as soon as he becomes speaker, he is expected to be impartial, that is, to see that all members are fairly treated in the debates, no matter whether they are supporters of the

government or not. There is also elected a deputy or assistant speaker.

The speaker of the Senate is not elected by the Senate, but is appointed by the "governorgeneral-in-council," which means, as we shall find out later, the government.

2. Other Officers of the Houses.

There are certain other officers in the Honses, who are not members of parliament, but are appointed to help with the carrying on of business. For example, there is a clerk, with many assistants under him, who has charge of the journals or records of what the Honse has done, the translation of documents, and a great many other such matters.

Another officer in the Commons is the sergeant-at-arms, who is in some respects the policeman of the Honse. If a member will not obey the speaker or is disorderly, the sergeant-at-arms arrests him or has him removed. He also looks after the furniture of the Honse, and has charge of the pages, or little messenger boys, who wait on the members, carrying books, taking messages and the like.

ted by ternor-Il find

cted a

ouses, et are on of with ge of has great

the will the re-e of or oers,

ike.

the

It is very interesting to watch these little fellows running about on their various duties, while a meeting of the House is going on. Another duty of the sergeant-at-arms is to walk in front of the speaker on the proper occasions, carrying the mace, the symbol of the House's anthority.

3. The Speech from the Throne.

Parliament must meet at least once a year. The governor-general who, as always, follows in this matter the advice of the leader of the government, sets the day for parliament to assemble. When the day comes, he himself or some person representing him, generally the Chief Justice of Canada, goes in great state to the parliament buildings, accompanied by a bodyguard of soldiers. He takes his seat on a throne in the chamber where the Senate meets, and then sends a message to the members of the House of Commons to leave their own chamber and come to the Senate.

When they arrive, he reads a short address in English and French which mentions what business the government is going to ask parliament to do during the session. This is ealled the "speech from the throne." It is not written by the governor-general, as one might suppose, but by the leader of the government. When this brief ceremony is over, the governor-general goes away, and the members of the House of Commons return to their own chamber. In due time the address is discussed and a reply to it is prepared.

All these doings seem rather strange and formal to us nowadays, but they meant a great deal long ago in England. In those times the speech was a real one from the king himself, and often parliament was very unwilling to do what he desired. So the reply was then a very real thing too, and was drawn up by members sometimes at the risk of their lives. But all this is long since changed, though the old forms are still kept up.

4. Good Manners in Parliament.

While speaking in the House of Commons, a member must always address his remarks to the speaker and not to the other members. He is not allowed to call any member by his name, but called is not a might rument. vernor-of the amber.

e and
int a
those
king
filling
then
p by
lives.
the

s, a the e is but must describe him as "the honourable member for North York," or "the honourable member for Calgary," or whatever the member's constituency may be. This is done so that debates in the House may be as dignified as possible, and that members may be less tempted to say evil things of one another.

It is the duty of the speaker to check the use of all improper terms in debate. For example, no member, no matter who he may be or how much he thinks himself to be in the right, is allowed to call another member a "scoundrel." In moments of excitement members sometimes so far forget themselves as to use such violent language, but the speaker of the House always requires that an apology be made.

5. Debate.

As in any public meeting, a question is brought before the House in the form of a motion made by one member and seconded by another, except that two days before, notice must be given that such a motion will be made. In the debate on a motion each member is

allowed to speak only once. The mover is, however, permitted to reply.

But when a freer and fuller discussion is desired so that all points may be brought out, the House goes into "committee." This is always done in the ease of bills, since it is advisable to have all details studied closely as a means of preventing mistakes. When the House goes into committee, the speaker leaves the chair, and the deputy speaker or a chairman presides in his place. The House may then be said to be in its "working clothes."

6. A Division.

When the debate is over, and it is uncertain whether the majority of the Honse is for or against the motion, a "division" is demanded. All the absent members are called in, for it is the bad habit of some of the members to remain out of the Honse a good deal of the time and, when summoned, to rush in to vote without having heard very much of the debate.

When all are seated, the speaker asks those who are in favour of the motion to stand. The clerks then take down the name of each member

who is standing. Next those who are against the motion are requested to rise, and their names are taken down in the same way. When the names are all counted, the speaker states that the motion has been "lost" or "carried," as the case may be. The speaker himself never takes part in the voting, imless the votes for and against a motion are exactly equal. In that case he gives his vote and decides the question.

7. The Senate and the Commons.

When a bill has passed the House of Commons, it is sent on to the Senate, which considers it in the same way as the Commons have already done. If it passes the Senate, it then goes to the governor-general to be assented to in the name of the king. Sometimes, however, the Senate makes changes in a bill, and if the two Houses cannot agree about these, the bill is dropped. But if the Houses reach an agreement, the bill is sent on to the governor-general as before.

8. Committees.

Besides the "Committee of the Whole House," which has already been mentioned, there are smaller committees, or groups of

er is,

on is out, is is is is is is

the aves man n be

tain
or
led.
t is

nd, out

ose The

er

members, chosen to consider particular bills or other matters and to report their opinion about them to the Honse. Each committee has its chairman, and it does its work in the same way as the committee of the whole honse. If a bill does not pass the committee which has been chosen to study and discuss it, there is little probability that it will pass the Honse, at least during the existing session of parliament. In such a case you will probably read in the newspapers that it has been "killed in committee."

9. Supremacy of the House of Commons.

The Honse of Commons holds the purse of the nation, and this is the true reason why the government must have its support or resign. Unless the Honse is willing, no tax can be collected by the Dominion government, and no money paid out for any purpose beyond a few matters expressly mentioned in the constitution. It is evident that the work of government could not long go on, if there were no money to pay those employed in the public service, such as the clerks in the parliament buildings

and the Dominion officials throughout the country.

A bill that provides for the paying of money or the levying of a tax, must first be passed in the House of Commons. Then it is sent to the Senate, which cannot make any change in it, but must either pass it as it stands, or else reject it altogether. Further, even in the House of Commons, no private member can propose such a bill, but only a member of the government. For the government knows, or should know, how much money it needs and can ask for the proper amount, while a private member could hardly have such accurate knowledge. Besides, if the government did not have this matter entirely in its own hands, it could not fairly be blamed, when mistakes were made in levying too high a tax on the people or in paying out money improperly.

It will be seen from what has been said that the House of Commons is practically supreme. If it does not approve of what the government is doing, it can stop everything by simply shutting up the purse of the nation. But

ney ice, ngs nowadays the Honse has never to resort to such an extreme measure. All it has to do is to show by a vote that it no longer has "confidence" in the government, and the latter at once resigns.

10. Senators.

We shall now study how the members of parliament are chosen. A senator is appointed by the "governor-general-in-council," that is, by the government. He remains a member of the Senate so long as he lives, unless he resigns, stays away from parliament for two sessions together, leaves Canada and becomes a citizen of a foreign country, fails in business, commits a crime, or goes to reside in a province other than the one for which he has been appointed.

Before he can be chosen, he must be at least thirty years of age, be a British subject, be worth at least \$4,000, and live in the province for which he is to be appointed. A Quebec senator must also live in the particular division of the province for which he is selected, or own property there. The number of Senators is:

11. Members of the House of Commons.

Members of the House of Commons are elected by the people of Canada. But not everybody has a vote. The laws about the matter differ in the different provinces, but, as a rule, all men of the full age of twenty-one years, who are British subjects and are not eriminals or insane, have the right to vote. one or two of the provinces it is necessary also to own a small amount of property, or to pay rent to a certain amount, or to fulfil some other conditions before being allowed to vote. Indians do not usually have the right to vote. In 1917 women voted for the first time in parliamentary elections. (See page xv at end of book.)

Before a person can be elected to the House of Commons, he must be a British subject, but need not own property or live in the province or district for which he seeks to be elected. If a man who has committed a crime is elected, the House of Commons will not allow him to take his seat, and the district for which he is elected may just as well be without a representative.

12. The Number of Members in the Commons.

The number of members elected to the House of Commons in the elections of 1917 was:

•

2
}

e House ject, but province elcetcd. elected, him to hich he hout a

mmons. House

: 82 65

.6 2 3

1 5

The question may be asked, how is it that there were just 235 members in the House of Commons in the year 1917? We shall find the answer. The number of members depends on the population of the Province of Quebee. This province must, according to the constitution, always have 65 Then, when Quebee is given 65 members. members for a certain population, the other provinces are given the number that is proper for their population. If the population of another province is greater than that of Quebec, that province will have more members than Quebec. Consequently, the Province of Ontario has always had more members than Quebee. But if the population of any province is less than that of Quebee, it will have fewer members. Province of Manitoba, for example, has always had fewer members than Quebee. So to find the number of members a province may have, is only a question in arithmetic which can be easily solved.

Now, if we take the population of Quebec and that of Ontario as a little smaller than they really are, we shall be able to have easier numbers with which to deal. We shall, therefore, suppose that the population of Quebec is 1,950,000. The province must have 65 members, and, dividing 1,950,000 by 65, we find that it will have one member for every 30,000 people. Further, if we take the population of Ontario as 2,460,000, all we have to do in order to find the number of members to which it is entitled, is to divide this number by 30,000. The result is 82.

In the same way the number of members for each of the other provinces can be found, if we know the population. 30,000 is called in this case the "unit of representation," for it is the number of people who have a right to one member of parliament to represent them. In order to avoid fractions, we have taken an easy example, but when fractions occur, those that are less than one-half are not counted, and those over one-half are reckoned as equal to 1.

The following are additional examples to be solved: 1. The population of Quebee in 1911 was really 2,005,779, and that of Ontario 2,527,292 instead of the easier numbers we

shall, eho Quebec nur ve 65

e find 30,000 ion of order it is

0,000.

abers ound, alled 'for right

1 an

hose

and

to in ario we

ehose. Find the unit of representation and the number of members for Ontario.

2. If the population of Quebee grows to 3,000,000, and that of British Columbia to 1,000,000, what will be the unit of representation, and the number of members which British Columbia will have?

13. Census.

The eensus is taken, that is, the population of Canada is counted, every ten years in those years which end in 1, as 1891, 1901, 1911. After the taking of the census, parliament passes a law to give to each prevince its proper number of members, and this number cannot be changed till after the next census. Some of the provinces may be assigned fewer members as the result of a new eensus, because the population of Quebee is growing fast and so the unit of representation is increasing. Thus Prince Edward Island came into the Dominion with 6 members, and now has only 4. But the western provinces always gain members when a change is made, because their population is increasing very rapidly.

In 1917 the number of members was reekoned according to the census of 1911. On the basis of population, Prince Edward Island should have 3 members, not 4. But by a recent provision, a province is allowed to have as many members in the Commons as it has in the Senate. Yukon Territory is given 1 member.

14. Constituencies.

Having learned how the number of members for each province is determined, we have yet to consider how the provinces are divided into districts for the election of these members. Such divisions for electoral purposes are commonly called "constituencies." Each constituency ordinarily elects one member. But sometimes, as in the case of a city like Ottawa, which is from its size entitled to have two members, no division is made, and the one large constituency is asked to elect two members.

To divide a province into the proper number of constituencies with a fairly equal population, is not an easy matter. In whatever manner it may be done, there is nearly always a great deal of complaint that the government has acted

unfairly. This subject will be taken up more fully under Topie VI.

Notes.—A "bill," before it can pass the House, must be read three times. At the second reading debate upon it takes place.

The "Territorics." Those parts of the Dominion that are not included in any of the provinces are called "territories." So long as a territory has a small population, it is governed directly by the Dominion. But as it becomes settled, it is given more and more power in local matters, until at last it is formed into a province. There are at present two territorial divisions in the Dominion: (1) Yukon Territory, electing its own governing body, the "territorial council," and (2) the Northwest Territories, having as yet no local government. Territories may be given representation in Parliament, but not necessarily on a strict basis of population.

QUESTIONS.

- 1. How is the speaker of the House of Commons chosen? Mention some of his duties.
 - 2. What is the "speech from the throne"?
- 3. How is a question brought up for discussion in the House of Commons? How is a "division" taken?
 - 4. What are the stages in the passing of a bill?
 - 5. Tell why the House of Commons is supreme.
- 6. What are the qualifications necessary for a senator? For a member of the House of Commons?
- 7. In what way is the number of members in the House of Commons determined? What are "constituencies"?

LIBERTY.

On foreign mountains may the Sun refine
The grape's soft juice, and mellow it to wine,
With citron groves adorn a distant soil,
And the fat olive swell with floods of oil:
We envy not the warmer elime, that lies
In ten degrees of more indulgent skies,
Nor at the coarseness of our heaven repine,
Though o'er our heads the frozen Pleiads shine:
Tis liberty that crowns Britannia's isle
And makes her barren rocks and her bleak
mountains smile.

-Addison.

TOPIC V.

The Premier and the Cabinet.

1. Introduction.

Mention has been made many times already of the "government" and the "leader of the government." We shall now try to show what is meant by these terms. The word "government" is here used in a special sense, and denotes the body of men who really rule the nation, for, as we already know, the king or his representative, the governor-general, has no actual power. This body is also called the

"cabinet." Further, it is known as the "executive" or the "administration," because it executes or carries out the laws and conducts the business of the nation, while the duty of parliament is chiefly to legislate or make the laws.

At the head of the eabinet stands the person whom we have thus far ealled the leader of the government, but who is more usually known as the "prime minister," or "premier." The first form of the name, prime minister, is the one always employed in Great Britain, but not often used in Canada except in speaking of British affairs. The second form, premier, is the French word for "first," with the word "minister" omitted, and so means exactly the same as "prime minister," or "first minister." We almost invariably employ the form "premier" in speaking of Canadian affairs.

But why is the word "minister" nsed? "Minister" means a "servant." Formerly the prime minister was the servant of the king, and carried out his commands. Now he is really the servant of the nation, for it is

:

lison.

udy the ow ord

se, he

01°

10

ultimately through its will that he becomes the head of the executive, or cabinet. The other members of the cabinet are likewise ealled "ministers."

2. Appointment of a Premier.

When a new premier is to be appointed, the governor-general sends for the person whom he thinks the majority of the House of Commons will support, and asks him if he will be his adviser and form a cabinet. If the person chosen feels that he can seeme the support of the House of Commons, he sets about the selection of a certain number of men who may be willing to become his fellow ministers.

This is an easy matter, if it is pretty certain that the House of Commons will support the new premier. Otherwise it may be very difficult or impossible. In the latter event the new premier must go book to the governor-general and say that he cannot form a cabinet. He then usually gives the name of a person who he thinks will be able to get proper support in the House. The governor-general will at once send for this person, and ask him to be premier and form

s the other alled

the nons his rson t of the

cain
new
or
nier
say

nay

vill se. his his eabinet. When the latter has his cabinet chosen, he reports the names of the members to the governor-general for approval.

3. Members of the Cabinet in Parliament.

The premier, when he is first chosen, need not be a member of parliament, though he almost always is, but he must become a member as soon as possible. He usually prefers to belong to the Honse of Commons; but though he would be permitted to be a member of the Senate instead of the Commons, such an arrangement would not work well, for in that case he would not be able to take a direct part in what was being done in the House whose support is so necessary to him. The other ministers are chosen, sometimes from among men already in parliament, but nearly as often from among those All ministers must, however, like the outside. premier, become members of either the House of Commons or the Senate. But usually only a few of the ministers are members of the Senate.

It is important to note that, even if a minister is a member of the House of Commons before his appointment, he must be

re-elected to the Honse as a minister and member of the cabinet. The reason is that cabinet ministers get a special salary from the nation for their work, and no member of parliament is allowed to accept any salary from the nation beyond the payment he receives as an ordinary member, unless the people of his constituency express their willingness by re-electing him. The new minister is usually re-elected, because it is considered a great honour and advantage to a constituency to have as its representative a member of the cabinet.

4. Supreme Power of the Premier.

It will be seen from what has been said before, that so long as the Honse of Commons gives its support, the premier is the most powerful man in the nation. The other members of the cabinet are really appointed by him, and, moreover, if he resigns, they too unst resign. The governor-general must, so far as Canadian affairs go, absolutely follow his advice.

The only real check on the premier's power is the Honse of Commons. But the members of the House are not always free to do as they like and
that

e.

 \mathbf{s}

 \mathbf{f}

9

and vote against the premier at any time they may so wish. Nearly all the members of the House belong to one of two political parties. Of one of the parties the premier is the leader, and he is almost sure of being supported by the members of his party on all necessary occasions. How this comes about will be explained under Topic VI. Therefore, with the steady support of his party behind him, the premier can carry on the work of government very much in the way he thinks fit, and is thus the nation's real ruler.

5. Unity in the Cabinet.

But on all important matters the premier consults with his fellow ministers. Regular meetings of the cabinet are held, and after discussion the members come to an agreement on each question. If, however, a member feels that he cannot accept the decision of the premier and the rest of the cabinet on a matter which is regarded as important, he is under obligation to resign. For it was long ago decided that our government cannot proceed in a satisfactory way, unless the ministers are all of the same opinion on essential points. Everything that is

said in the discussions at a meeting of the cabinet, is kept absolutely secret.

6. Order-in-Council.

When the cabinet has reached an agreement about some matter of business, as, for example, the appointment of an official, the acceptance of a tender from a contractor for some public building, or any one of the many other matters that come up in the work of government, the decision is written down in due form and submitted to the governor-general to be signed by him. It is then called an order-in-council and goes into effect.

Notes.—"Governor-General-in-Council." This term is used in the case of all official acts of the cabinet. It denotes that the decision of the premier and his ministers has been communicated to the governor-general, and has been accepted by him.

"Privy Council." This historic body formerly gave advice to the king, when he asked for its opinion on any matter of state. It is still retained, but at the present day has no duties whatever. Each cabinet minister must, however, become a member of it by taking a prescribed oath. Though he may resign from the cabinet, he always remains a member of this ancient and shadowy council. Our privy council is called "the King's Privy Council for Canada," and must be distinguished from the British Privy Council.

The word "crown" is often used instead of the name of the king, and practically means the nation, as, for example, in the term "minister of the crown."

QUESTIONS.

- 1. What position does the premier occupy in the government of the country?
 - 2. How is the premier chosen?
- 3. Why is it advisable that the premier should be a member of the House of Commons?
- 4. How is it that the premier is supreme in the cabinet and the House of Commons?
 - 5. What is an "order-in-council"?
- 6. What is the meaning of "govenor-general-in-council" and "King's Privy Council for Canada"?
- 7. Write an account of a real or imaginary person who rose to the position of prime minister, as described in the following poem:

Dost thou look back on what hath been,
As some divinely gifted man,
Whose life in low estate began
And on a simple village green;

Who breaks his birth's invidious bar,
And grasps the skirts of happy chance,
And breasts the blows of eircumstance,
And grapples with his evil star;

Who makes by force his merit known,
And lives to clutch the golden keys,
To mould a mighty state's decrees,
And shape the whisper of the throne;

And moving up from high to higher,
Becomes on Fortune's erowning slope
The pillar of a people's hope,
The centre of a world's desire;

Yet feels as in a pensive dream,
When all his active powers are still.
A distant dearness in the hill,
A secret sweetness in the stream;

The limit of his narrower fate,
While yet beside its vocal springs
He played at counsellors and kings,
With one that was his earliest mate;

Who ploughs with pain his native lea And reaps the labour of his hands, Or in the furrow musing stands: "Does my old friend remember me?"

-Tennyson, In Memoriam, LXIV.

TOPIC VI.

POLITICAL PARTIES.

1. Public Questions.

There arise from time to time certain public questions about which men have strong opinions. For example, many are in favour of placing heavy duties on goods manufactured abroad, so as to prevent their importation into the country, thus

giving our manufacturers an opportunity of selling more of their goods in the Canadian market. Many other people advocate low duties or no duties at all on foreign goods, so that Canadians may be able to buy what they want as cheaply as possible without regard to the interests of the manufacturer and his workmen. Such is the tariff question which has played a great part in our political history. Other questions which have arisen are, that of separate schools in Manitoba and the new provinces, that of Schate reform, that of the national ownership of railways, and that of the prohibition of the sale of intoxicating liquors.

2. Origin of the Party System.

IV.

lie

ıs.

vy

to

18

It is natural for all who take one side of a public question to form themselves into an association for the purpose of securing the adoption of laws in harmony with their particular views. The way to make sme that certain laws will be enacted, is to bring about the election to parliament of a majority of members in favour of them. Consequently, there is very good reason why persons who agree among

themselves on an important public question, should establish the kind of association which is called a political party.

But we must observe also that it is not often that a political party is successful, if the party is formed solely because of particular views on one question, no matter how important this may be. It is very difficult so to interest the great body of the eitizens in a single question that they will unite on account of it alone aside from other public matters. But, in the course of long years of political discussion, the majority of the people have become separated into two great divisions. These divisions are known as the Conservative and Liberal parties.

The leaders of each, since they are anxious to secure a majority in the House and thus gain control of the government, try by every possible means to persuade voters of the merits of their own side. If they think that a certain public question will "catch" a large number of votes, they will be very ready to take it up, even though personally they might prefer to leave the matter alone. In this way, all important

questions are as a rule brought under the eonsideration of the people, and, in consequence, there is on ordinary occasions no need for forming a special political party. It is only when neither of the old parties will assist in the discussion of a public matter, that a new party may come into existence. There is, however, one great disadvantage in our having these permanent political divisions. Many persons become so much interested in the mere success of their own party, that they seem to care very little whether the public measures which it is advocating, are good or bad.

3. Political Platforms.

Some time before the elections a party usually draws up what is ealled its "platform," that is, a statement of what its views are in regard to the "issues," or important questions before the people. This statement represents the "policy" of the party. Great care is taken to show that this policy is in agreement with the "principles," or general ideas of government which the party is supposed always to follow and to hold sacred. We hear a great deal about these principles

ion, h is

ften urty ews this the

ion ide rse the ced

to in ole

ue

eir lie es,

re it during the "campaign," or period of public discussion that comes just before the elections.

A party usually has a "campaign cry," which is supposed to give the main issue in the most attractive way. These campaign cries sound very strange after all the excitement is over. Some of those which have been used are, "The old flag, the old policy and the old leader," "It is time for a change," "Five years more of the full dinner pail."

4. Government and Opposition.

The political party which has the majority in the House of Commons and of which the premier is the leader, is called the government party, and the other which opposes the government, is known as the "opposition." The head of the latter party has no special name, and is called simply the "leader of the opposition."

5. Nominating Conventions.

One of the first duties of a political party before an election is to endeavour to have suitable men "nominated" in every constituency, that is, to have them put forward publicly for election to the House. These men, when lic

18.

ch

st

ıd

er.

10

 \mathbf{It}

ıe

in

er

d

İs

e

 \mathbf{d}

selected, are ealled "eandidates." The usual way in which a party chooses its candidate, is to ask its friends in each part of a constituency to meet and elect delegates, or representatives, to attend a general meeting, or "eonvention," to be held in some central place.

At the convention a number of names are proposed, and a vote is taken. After voting on all the names, the convention can generally narrow its choice down to two or three that obtain a high number of votes. The person who finally secures the highest vote, is chosen as the candidate of the party. Then the one who comes next to him in the number of votes received, generally moves that the choice of the convention "be made unanimons," and promises that he himself, just as the rest of the convention, will accept the party candidate and will work hard to secure his election to parliament.

Even though it may be well understood that the member at the time representing the constituency in parliament will again be a candidate at the elections, a convention of his party is usually called, and he is nominated or not, as the eonvention thinks fit. Sometimes conventions, when summoned, decide not to put a candidate "in the field," if they see that their party would have little chance of winning.

6. The Campaign.

As soon as a eandidate is chosen, he must set about preparing his "eampaign." A number of the party workers help him, but he must do a great deal himself. He must try to meet as many persons as possible in the various parts of the constituency. For this purpose he goes about speaking at public meetings which are arranged for him, and is introduced by the local party men to individual voters.

He or his friends have to ask a great many directly for their votes or, as it is said, "eanvass" them. It is an unfortunate thing that so many will not vote for a candidate, unless they are personally solicited. They seem to forget that voting is one of the highest duties which they have to perform as citizens, and that they should vote for the candidate they believe to be the best, whether they have ever been canvassed or not.

ite

ıld

rst

er

do

as

ts

es

re

10

ıy

3"

ıy

e.

it

y

d

0

d

Sometimes also money is paid for votes. This "bribing" of electors is one of the greatest erimes that can be committed against the nation, and the person who receives such money, is quite as gnilty as the person who pays it. If bribery were ever to become general, it would mean the end of liberty and good government, and thus what our aneestors toiled during a thousand years to gain would be thrown away. There may be bribery, too, in other ways than by money. For instance, some voters may be promised positions in the public service, grants from parliament, or special favours of various kinds. Such methods are all equally bad from a moral point of view and all equally injurious to the nation.

7. Doubtful and Safe Constituencies.

While the candidate is working in his own eonstituency, the leader and other prominent men in the party make a tour through the country. They address meetings in what are considered suitable places, especially in those constituencies which the party is afraid of losing, though it has won them at the preceding election, or which it does not now hold but

has hopes of winning. In fact, on these "doubtful" constituencies the fate of the party ordinarily depends.

On the other hand, there are some divisions that are almost sure to elect a Conservative as their member, while there are others that are quite as certain to elect a Liberal. Now it is just because of such circumstances that a government may have a great temptation to face. For, when a province is being divided into constituencies, a government, if it likes, can so make the division, that as many as possible of the new constituencies may be "safe" ones for its own party, and as many as possible "doubtful" for the opposition. For example, if a certain constituency is a doubtful one for the government; and there happens to be close by, a district that gives a good majority in its favour, all the government has to do in order to make the constituency probably a safe one, is to add this district. Or the same result may be gained by taking away a part of the constituency that gives a large opposition majority. This unfair way of dividing a province is called a "gerrymander," from the name of an American politician.

Notes.—"Seat" is a term often used for constituency. "Elector" is another word for "voter." "The country" is a term frequently employed in politics to mean the electorate, or the whole body of voters of the nation.

QUESTIONS.

- 1. Mention some important public questions that have arisen from time to time in Canada.
- 2. How do political parties originate?
- 3. Explain the terms, "platform," "issue," "policy," "campaign."
 - 4. What is the "opposition?"

30

ty

t

7

- 5. What is a "nominating convention"?
- 6. Give an account of a political meeting which you have attended.
- 7. Who were the candidates in your constituency at the last Dominion election, and how did they conduct their campaigns?
 - 8. 'Explain "canvass," "bribery," "gerrymander."
 - 9. Learn by heart the following:

FREEDOM.

Her open eyes desire the truth.

The wisdom of a thousand years
Is in them. May perpetual youth
Keep dry their light from tears;

That her fair form may stand and shine,

Make bright our days and light our dreams,

Turning to scorn with hips divine

The falsehood of extremes!

-Tennyson.

TOPIC VII.

HOW THE ELECTIONS ARE HELD.

1. Sessions of Parliament.

According to our constitution, the British North America Act, parliament must meet at least once a year. This meeting together for the purpose of making laws and transacting other public business, is called a "session" of parliament. Besides the one ordinary session in the year, a special session is sometimes held when there is need for it. The session may be long or short according to circumstances. The ordinary length is about four or five months.

Members of the Senate and the House of Commons are each paid a salary, called an "indemnity," of \$2,500 for attendance during a session. If, however, a member is absent from the House a certain number of days, he loses a part of the indemnity. Moreover, if a session does not last longer than thirty days, he receives only a certain sum per day. The salary of the governor-general is \$50,000 per year.

2. Prorogation.

At the close of the session parliament is "prorogned." This term means that parliament is dismissed for the time being, but is to be called to meet again at a certain date, when there will be a new session. As prorogation all bills that have not yet passed the items are dropped, and at the new session they must be presented again, as if they had never been before parliament.

On the occasion of prorogation the governorgeneral comes in state to the parliament buildings, as at the opening, and gives the royal assent to the bills that have been passed during the session. He also reads a short speech, reviewing the business of the session, and thanking the members for the work they have done.

3. Dissolution.

The longest period a parliament is allowed to last is five years; but very few ever continue so long. The ordinary duration is about four years. The government can have a parliament "dissolved," or ended, at any time, if the governor-general consents, and, of course, he

will hardly ever refuse except for the gravest reasons.

If a parliament is permitted to run its full course, there is difficulty in holding a satisfactory session near the end. The opposition can prevent legislation by simply talking away the time in committee of the whole, where any member may speak as often as he likes. This method of delaying business is known as "obstruction." When "obstructing," members only pretend to discuss the bill before them, their chief aim being to keep on talking as long as they can. Therefore, it is plain that, since parliament must come to an end by a certain day, the last session can be made nearly useless and the government be placed in an unpleasant position before the country.

Another reason why a parliament hardly ever lasts its full period, is that the government naturally likes to choose a time for "going to the country," when it feels that the chances of winning are most in its favour. If it should allow a parliament to last into the fifth year, it would have less choice of a suitable

moment for dissolution. This must be regarded as a rather unfair advantage which the government ean take of the opposition. Besides these reasons, there is no doubt always a strong desire in the government party "to have it over" as soon as possible, when in any case election day must come before long.

4. Premature Dissolution.

There are, however, oceasions when the length of a parliament may be much shortened. One occurs when some very important matter comes up for consideration, and the members of the government wish to know whether or not the people approve of their policy with respect to it. The governor-general is asked to dissolve parliament, and the "campaign" is fought chiefly on that one great question. If the government obtains a majority, it knows that the people wish it to carry out its policy. If it is defeated, the opposition comes into power as a new government.

Again, an oceasion for dissolving parliament may arise when the government is defeated in the House of Commons on some

important question, such as a government measure. The government may ask for a dissolution in order to appeal to the country; or it may resign. If it resigns, the governor-general requests the leader of the opposition to form a new government. Should the new premier feel that he can get the support of the House, he may go on with the work of the session. But, if he is aware that he will not secure sufficient support, he asks that parliament be dissolved, and appeals to the people in the hope of obtaining a favourable majority in the new parliament.

5. Official Nomination of Candidates.

When for any reason it is decided to hold the parliamentary elections, writs, or orders, are sent out in the name of the king to special officers appointed in all the constituencies, and known as "returning officers." The writs state when the nomination of candidates is to take place. If only one candidate presents himself in a constituency, he is declared elected. Such an election is known as election by "acclamation." But if more than one candidate is

nt

a

or al

a

el

le

t.

t

nominated, there must be a vote taken one week later throughout the constituency at various places selected for the purpose.

At this regular or official nomination those who have been already chosen by the parties as eandidates, are duly nominated by their supporters. Often no other eandidates come forward, and the voters are foreed to choose between these two. Sometimes, however, a third party, as the Labour party or the Socialist party, may put forth a candidate. Or a person may decide to be a candidate without the support of any party. Such a candidate is usually called an Independent Conservative or an Independent Liberal, as the case may be.

6. Nomination Papers.

The official nomination of caudidates takes place in this way. At the time set by law, twelve o'clock noon, on the day appointed, the returning officer goes to a public hall, and there waits for nominations till two o'clock. A nomination must be in written form, and be signed by twenty-five electors. The person nominated must give his written consent, unless

he is absent from the province at the time. The sum of two hundred dollars must also be handed in to be kept as a deposit and returned, maless the candidate fails to obtain at least one-half of the number of votes polled in favour of the person elected.

7. How the Voting is Done.

A week after nomination day the elections are held. Suitable places are chosen throughout the constituency as voting or "polling" places, and each is put under the charge of a deputy returning officer.

The vote is by ballot and is secret. A ballot is a sheet of paper having a detachable slip or counterfoil at the side, and provided with a stub by which it may be bound into a book containing twenty-five, fifty, or one hundred ballots, as is most convenient. On the front of the ballot appears the name of each candidate, with his residence and occupation. The names are in alphabetical order, numbered, and separated from one another by broad black lines. On the back, the stub and counterfoil have the same printed number, while the body of the ballot

has the returning officer's stamp, the place and date of the elections, and the name of the person who printed the ballots.

b

S

t

S

n

d

e

e

t

If you go to a polling place to record your vote, you notice, as you enter, besides the deputy returning officer and his assistant, known as the "poll clerk," a certain number of men, eommonly called "scrutineers," who have been chosen by the political parties to watch over the interests of their candidates, and to see that persons who have to right to vote are not given a ballot. There is a the room a list of all those who have votes, and, if your name is on it, and the officials present are satisfied that you are the person you claim to be and not somebody else trying to vote under your name, you receive from the deputy returning officer a ballot, on the back of which he has put his initials. On the counterfeil also is written a number corresponding to the number placed opposite your name in the "poll book," in which a record is kept of all those who vote.

You are told to retire to some small room opening from the larger one, or to some space

screened off from it, and there you find a peneil with which you are to mark your ballot. Absolutely all you must do, is to make a cross X opposite the name of the man for whom you wish to vote. If you put any other mark on your ballot, you "spoil" it, so that it will not be counted. Then you should fold your ballot so as to show the initials of the deputy returning officer on the outside.

After that you go with it to the deputy returning officer. He looks at the number on the counterfoil and his initials, to make sure that it is the same ballot as the one which he gave you. Then he tears off and destroys the counterfoil, and puts your ballot in the ballot box that has been provided to contain all the ballots east at this polling place. Meanwhile, the poll elerk records in the poll book the fact that you have voted.

In case the officials are not sure that you have a right to vote, they can ask that you be sworn before receiving a ballot. If you cannot swear that you are entitled to vote, you will not be given a ballot and will be asked to withdraw.

ır

e)

The voting lasts from 9 o'clock in the morning till 5 o'clock in the afternoon. When the poll is closed, the votes are counted as rapidly as possible, and the results are carried by eager messengers to the nearest telegraph or telephone office, so that it is known everywhere in a very short time who has been elected member for the constituency. There may, of course, be mistakes made in this first summing up, and the result is not known exactly, until the returning officer himself a few days later counts again all the votes in the constituency, and makes his official statement.

If the number of votes given for the eandidates is very nearly even, there is usually held what is called a "recount" before a judge. The chief difficulty that usually presents itself, is whether certain ballots are to be counted or not. Some electors may have voted for more than the proper number of candidates, may have placed some marks beside the cross on their ballot, or may have made some other mistake. The judge decides on all these points, and his decision settles the question of the election,

unless there has been bribery or other wrong doing. In the latter event, the case comes up for trial in a court of law.

The elections are held throughout the Dominion on the same day, except in some large constituencies where the population is widely scattered and voters may have to go a long way to vote. Such constituencies are to be found in Northern Quebec and in British Columbia. There are also special arrangements regarding elections in the Yukon Territory.

8. By-Elections.

Elections for the choosing of a new parliament are called general elections. But often vacancies occur in the House of Commons at other times, when a member resigns or dies, or when a scat is declared vacant by a court of law for bribery or some other reason. In the case of a vacancy for whatever cause, the speaker of the House gives his "warrant," or permission, for holding a special election in the constituency concerned. Such an election is ordinarily called a "by-election." It is conducted in exactly the same

g

p

16

10

is

l.

7-

0

way as are the general elections, except in so far as it has to do with one constituency only and not with the entire country. If there are several vacancies at one time, the necessary by-elections are held as far as possible on the same day.

Notes.—The "Closure." This is a means adopted in the British parliament to prevent "obstruction." A time-table is drawn up beforehand, showing how long discussion will be allowed in committee of the whole on each clause or division of a bill. When the time is up, all debate must cease, and the clause is straigthway voted on, and adopted or rejected. Then at once discussion on the next clause begins, and continues for the period allotted for the purpose. Thus it becomes manifestly impossible for members to "talk out" a bill.

The "Ballot." The abbreviations on the back are R.O. (Returning Officer), D.R.O. (Deputy Returning Officer), P.B. (Poll Book).

QUESTIONS.

- 1. What is the meaning of "prorogue" and "dissolve" as applied to parliament?
- 2. What causes may bring about the dissolution of parliament?
- 3. Tell how candidates are officially nominated for election.
 - 4. Describe how an elector casts his vote.
- 5. What are the duties of a returning officer, a deputy returning officer, and a poll clerk?
- 6. Where was the polling place in your neighbour-hood at the last Dominion election? In favour of what

political party did your nunicipality or polling division give a majority?

- 7. What political party is at present in power in the Dominion, and what is its unijority in the House of Commons?
- 8. The following passage contains advice for leaders of political parties who desire the welfare of their country:

Nor toil for title, place or touch Of pension, neither count on praise: It grows to guerdon after-days: Nor deal in watchwords overmuch:

Not elinging to some ancient saw;

Not mastered by some modern term;

Not swift nor slow to change, but firm:

And in its season bring the law.

-Tennyson

TOPIC VIII.

THE DEPARTMENTS OF GOVERNMENT.

1. Ministers and their Deputies.

Thus far we have been studying chiefly how the laws are made, and what share the executive, or cabinet, has in legislation. We shall now learn how the cabinet carries on the general business of the nation. All the immense amount of work that has to be done, is divided among a certain number of departments. At the head of each department is a cabinet minister. He is responsible for the kind of work that is done in his department, and is expected to answer questions about it when they are asked in parliament.

Under him is a deputy minister, who assists him, and has more direct charge of the details of the department and of the clerks and others employed. Though the cabinet minister must change, if the government is defeated and compelled to resign, the deputy minister is a permanent official. If it were otherwise, the public business might be very badly done,

when new men took hold of a department without knowledge of its special work. Cabinet ministers may come and go, but there is still a person left in charge who knows all about the business of his department.

2. List of Cabinet Ministers.

At present the eabinet ministers and their departments are as follows:

The Prime Minister or Premier, we is also head of the Department of External Affairs, having charge of correspondence with the rest of the Empire and with foreign nations.

The President of the Conneil, who presides at meetings of the cabinet.

The Minister of Trade and Commerce, the duties of whose department will be readily understood from the name. He has also charge of the eensus.

The Minister of Justiee, who has charge of legal matters. He sees that the laws are enforced, decides whether a man who has committed a crime shall be pardoned or not, and has the oversight of the penitentiaries of the Dominion.

The Minister of Marine and Fisheries, who has to deal with matters connected with navigation and fishing. For example, he looks after the harbours, the lighthouses, the inspection

of ships. He is also head of the Department of the Naval Service having control of matters that concern the navy and the hydrographic service.

ted

the

on.

zho

ga-

ter ion The Minister of Militia and Defence, whose duties are with regard to our armies, fortresses, schools of instruction and military college.

The Postmaster General, the minister in charge of all the post offices and the mails.

The Minister of Labour, whose duties concern the welfare of the working men. Thus he aids in the settle ient of "strikes" in accordance with an act of parliament which provides for arbitration under certain conditions. The department of labour publishes a paper called the "Labour Gazette."

The Minister of Agriculture, who has charge not only of agricultural affairs, but of many things that have little to do with farming. He deals with matters which concern the health of the people, and the quarantining of ships or their passengers, if any dangerous disease is found on board. He is also the minister who has to do with the granting of patents,

the copyrighting of books, and the registering of trade marks.

The Minister of Public Works, who attends to the erection and repairing of all public buildings and other works (except railways and canals).

The Minister of Finance, who is the most important minister with the exception of the premier. He lays before parliament and the nation the policy of the government in regard to taxation. As the Dominion collects its taxes indirectly by means of customs and excise duties, and not directly, as our cities and towns must do, this policy comes to mean a very great dear in the buying and selling of manufactured goods. The matter will be more fully explained under Topic IX.

The Minister of Railways and Canals, who deals with affairs connected with the railways and eanals of the country. The nation owns all the canals. Of the railways it possesses the Intercolonial and the Prince Edward Island Railway in the Maritime Provinces. It also

owns the National Transcontinental Railway, and is acquiring the Canadian Northern Railway. There is a "board of railway commissioners" appointed by the government to act as judges for the settlement of disputes with respect to railway rates, telegraph and telephone charges, and other matters connected with public services of this kind. The board has six members.

The Minister of the Interior, who has to do with the government of the Northwest Territories, the Indians, and many matters that concern the western provinces.

The Minister of Customs, who has charge of the collection of the customs duties.

The Minister of Inland Revenue, who deals with the collection of the excise duties, and the inspection of weights and measures.

The Secretary of State, who is the minister that acts as the official correspondent in matters in which the whole government is concerned. For instance, he carries on the correspondence

ring

nds blic ays

the the l to

xes ies, ust lear

ds. der

who ays vns ses

and Aso between the Dominion and the provinces. Besides such duties, he issues parsports to Canadians who intend going abroad, puts the great seal of the Dominion on documents which require it, looks after the government printing, and buys and distributes the stationery needed in all the departments. He is also Minister of Mines, and as such deals with the examination of mineral deposits and the exploration of little known parts of the country.

The Minister of Immigration and Colonization, who deals especially with the bringing of settlers

to Canada to occupy the new lands.

In addition to the cabinet ministers, there is a member of the government who is not a member of the cabinet. He is the Solicitor-General, whose duty it is to give legal advice to the government, and to act as counsel when the Dominion has a case in court.

3. Civil Service.

The great army of clerks and other officials, many of them men of highly trained skill, who are required in the various departments of the government, is called by the general name of the "civil service." The name was originally given to distinguish this class from the persons who are engaged in the military or the naval service

of the country. Those who wish to enter the civil service must pass an examination. The governor-general-in-council makes the appointments to the service.

Formerly appointments and promotions were often the direct result of the "influence" of political friends. But it was at last decided to change all this, and to have persons selected because of their ability and fitness. For this purpose the civil service has been placed under the control of a "civil service commission," which is to act independently of politics. The commission consists of two members.

QUESTIONS.

- 1. What are the duties of a deputy minister?
- 2. How many cabinet ministers are there?
- 3. Who is the Premier? Who is the Minister of Finance?
 - 4. What is the Board of Railway Commissioners?
- 5. What are the duties of the Minister of Justice and the Secretary of State?
 - 6. Describe the work of the Department of Labour?
 - 7. What is the "civil service"?

Yet waft me from the harbour-mouth, Wild wind! I seek a warmer sky, And I will see before 1 die The palms and temples of the South.

-Tennyson.

TOPIC IX.

TAXATION.

1. The National Debt.

In order that government may go on, a great deal of money must, of course, he spent. Our nation, like nearly all others, is in debt to a large amount. Debt for a nation is not quite so troublesome a thing as debt for an ordinary person. Nations are expected to live forever or, at least, for a very long time. Consequently, when great public works are to be constructed,

it does not seem necessary or proper that, while these are to benefit future generations, the people of the present time should pay in full for them. Therefore, money is born yed, and interest is paid on it. Moreover, the nation can borrow money at a low rate of interest, and thus the burden of the debt is, after all, not so great.

Still it is unwise even for a nation to assume a very heavy debt. For, in that case, those who lend money become afraid of not receiving the interest promptly or even of losing some of the principal, since a nation, like an individual, sometimes cannot or will not pay its debts. As a result, lenders may charge a high rate of interest or may not lend at all, even when the nation is in great need. Canada has never gone too deeply into debt, and so can borrow money at a low rate of interest, or, as people say, "the credit of the country is good." We have gone into debt chiefly to provide for the construction of public buildings, railways and capals, and to assume the indebtedness of the provinces at the time when they entered confederation.

ıt

n

şе

50

ry

r,

у.

đ,

2. Annual Expenditures.

Each year the interest on the public debt has to be paid. Next come the expenses of parliament and the salary of the governorgeneral. The Dominion must also pay the salaries of the lientenant-governors of the provinces. All the expenses of the departments and the civil service have to be met. The salaries of the judges, the cost of building and managing public works of all kinds, of maintaining the mounted police in the Northwest Territories and of looking after the hidians, and countless other expenses, must all be paid.

3. Sources of Revenue.

Now, the question is how is all this money to be obtained? The answer is that it is paid in the form of taxes by the people. But the Dominion does not levy taxes on the people directly as a municipality does. It seems its revenue indirectly by means of enstoms and excise duties.

4. Customs Duties.

When anything is brought into the country, such as manufactured articles, like cotton or woollen goods, or natural products, like grain or

sugar, it may have a tax placed upon it of so much per cent. according to value, or so many cents per bushel or pound according to the quantity. Such taxes bear the name of customs duties. As goods usually are imported in large quantities by merchants, the duties are paid by them in the first place. But when they are bought by purchasers in the shops and elsewhere, they must be sold at a higher price in order to make up the amount of the duties that have been charged. Consequently, every person in the country pays more or less taxes to t' Dominion government, although he may never realize that he is doing so.

l

t

٠,

a

11

ıe

le

ts

 id

۲y,

OP.

or

Herein lies the objection to such a method of taxation, since one earmot readily discover how much he is actually paying. In fact, it would often seem as if a large part of the nation does not really know that government costs anything, or imagines that the money comes in some miraculous way and not out of the people's own pockets. As a result, public expenditures are not closely enough watched, and administrations are, in consequence, tempted to be wasteful. The nation also falls into the habit of expecting

parliament to authorize improfitable under takings, such, for example, as the construction of public works in places where they are not needed.

5. Protective Tariff.

The rate of duties placed upon imported goods, or the "tariff," as it is commonly called, may lend itself to another purpose besides the raising of revenue for the expenses of government. This we shall now explain. If a country has few manufactures, it must ordinarily have few people living in the cities, because there will be little work for them to do. Therefore, the farmers will find only a small population to buy their grain and other products, or, as it is said, the "home market" will be small. Hence it will be necessary to send a large amount of produce abroad to other countries in order to be able to dispose of it.

Now it is always felt that it would be well to have a large market at home. For, in that ease, the manufacturer could sell his goods to the farmer, and the farmer sell his produce to the manufacturer and his workmen, and everybody find it a profitable arrangement.

nt.

But how can manufactures be built up, when costly buildings must first be crected and workmen trained, while foreign manufacturers who have been years in business are prepared to sell their goods at such low prices as to defy competition?

The easiest way ont of the difficulty seems to be to levy high enstoms duties on foreign goods. As a result, these eannot any longer be sold eheaply in the country. Hence the home mannfacturers will be able to sell their product at a remunerative price, and thus find themselves in a position to build and equip suitable factories and procure skilled workmen. Afterwards when they have had such "protection" against foreign goods, until their business has become prosperous, they will be able to meet all competition and need not complain, if the high duties are This would seem to be an excellent arrangement, for, although the farmers and other purchasers will for a time have to pay more for what they bny, they will be assisting in the creation of a large home market for themselves.

The main difficulty is, that it is not easy for any one to say just how long the high duties

should be maintained. The manufacturers will naturally desire "protection," as long as it can be given, for, if it is removed, they will be compelled to lower the price of their goods. Yet those opposed to protection, called "free traders," would soon persuade the people to abolish the high duties, if foreign nations did not also have their own protective tariffs against us in order to keep out our goods. Thus there exists what is really a sort of war between nations, in which each tries to get the better of the other.

As a consequence, Canada seems to be forced in self-defence to keep up a protective tariff. In fact, there is only one great "free trade" country in the world, namely, Great Britain. The United States has a very high tariff. On the other hand, the Canadian tariff is rather a moderate one. Moreover, we have adopted, in favour of Great Britain and a number of the colonies, what is known as the "British preferential tariff," which permits their manufactures to enter our country at a lower rate than we grant to those of outside nations.

6. Excise Duties.

Besides the customs duties levied on goods brought into the country, there are "excise duties," which are collected on liquors and tobaceo manufactured in Canada. This tax is a heavy one and yields a large revenue to the government.

7. Consolidated Fund.

All sums of money that are contributed for the purposes of government, whether they come from taxes or from some other source, are placed together to form what is known as the "consolidated fund." Then again, all the expenses of government are paid out of the same general fund. In this way it is very easy to discover to what the revenue and the expenditure have amounted during each year. An official, called the "auditor general," has the duty of investigating all payments, so as to make sure that no money has been expended for any purpose beyond what was authorized by parliament.

8. The Budget.

One of the great events of the annual session of parliament is the speech of the Minister of Finance in which he presents the "budget."

vill an be

ds. ree

to did

ust ere

een tter

ced In

itry The the

r a , in

the

eferures

we

This means the statement of the probable expenses of government for the following year and of the amount and kind of taxation that will be necessary to meet these expenses. Therefore, it is in this speech that is explained what will be the rate of duties on imports, and whether the tariff will be "protective" in the ease of certain kinds of goods, or whether it will be one "for revenue only." The budget speech is, or should be, a matter of great interest to farmers, mannfacturers, merchants, and, in fact, to all classes of people, because customs duties affect everybody in the country in some way or other.

QUESTIONS.

- 1. Why should a nation not go deeply into debt?
- 2. How does the Dominion obtain its revenue?
- 3. Mention some of the annual items of expenditure.
- 4. What are "customs duties"?
- 5. What is a "protective tariff"?
- 6. What is the "budget"?

MONEY AND THE BANKS.

1. Money and Barter.

We all know something about "money." When we buy anything, we pay money. When we sell anything, we receive money. Things that are sold and work that is done, are said to cost a certain sum in money. If there were no such thing as money, we should be forced to use what is called "barter." For example, if we wanted to buy a pair of boots, we should have to work a certain number of days for the man who sold them, or give him something that we had, such as wheat, flour or meat. Long ago before there was money, this is what was actually done. But nowadays all kinds of work to be performed and all artines to be sold, are said to cost a certain amount in dollars and cents. One can easily see that this is a nmch more convenient way of doing b siness than if we had to employ barter.

2. Currency.

The form of our money (or our "currency") is very familiar to us. It consists of copper, silver, gold and paper. The copper coin is the one cent piece. The silver coins are the pieces worth 5, 10, 25, and 50 cents. The gold eoins are of the value of \$5 and \$10. The paper money consists of "notes" (usually called "bills"), representing the value of \$1, \$2, \$5, \$50, \$100, \$500 and \$1,000. These coins and notes are issued by the Dominion, and would be worth little or, in the case of the paper money, nothing at all, if the government were not always willing, when asked, to pay the given value in gold.

But just because it is well known that the government will pay in gold, there is considered to be little need of asking for payment. The promise to pay is regarded as of the same value as the gold itself. But, if at any time many persons should come to believe that the government either would not, or could not, pay in gold, our currency would at once lose much of its value. Therefore, the government takes care to issue currency only to such an amount that doubt can never arise as to its being able to "redcem" all in case of necessity.

3. Coinage.

An establishment where gold, silver and copper coins are made is ealled a "mint." Our

mint is situated in Ottawa. It is a branch of the royal mint in Great Britain.

The notes or bills are printed on specially prepared paper, and are signed by officers of the Dominion. Great eare must be taken that no person shall be allowed to imitate, or "counterfeit," these notes, since, in that case, either the government or the persons who happened to accept the "counterfeits," would lose the amount of money supposed to be represented by them.

4. The Chartered Banks.

e

e

e

1-

n

of.

e

ıt

O

ıd

ur

The regular banks of the country, called "chartered banks," perform many important services. Their business is carried on under the terms of a "banking act" which renders them, as far as can be done by legislation, a safe place in which to deposit money. Most of the provisions of the act are too difficult to explain here. But in a general way it may be said that the shareholders (that is, those who own and control the bank) are liable to lose, in case the bank becomes insolvent, not only the money that they have invested, but as much again, should it all be required to pay off the indebtedness. Thus the "double liability" of

the shareholders makes it almost impossible for the depositors to love much in the event of the failure of a chartered bank.

5. Services Performed by the Banks.

The chief services performed by the banks may be described as follows:—

- 1. They issue currency called "banknotes" or "bankbills." None of these notes are below \$5 in value. In most banks they are of such denominations as \$5, \$10, \$20, \$50, \$100. If a bank fails, its notes do not lose value, for the banking act prescribes a way by which they are sure to be redeemed in full without the slightest loss or inconvenience to the public.
- 2. They form a safe place for the deposit of money. The double liability of the shareholders makes it possible to secure funds enough in even the most disastrons failures to pay back nearly in full the amount of the money deposited.
- 3. They finnish money at a reasonable rate of interest to merclants and others for the earrying on of those kinds of business in which large amounts must be paid out for purchases,

before much can be returned through the sale of the goods. An important example is to be found in the case of the money required to pay farmers for their wheat. Most of the wheat must be shipped to Great Britain; hence there must elapse considerable time before it is actually paid for by the purchasers across the ocean. With the aid of the banks, it becomes possible to make each payments to the farmers from whom the grain is bought, and to the railway companies by whom it is transported.

10

Яì

S,

4. All the large banks have many branches throughout the country. Thus there is in nearly every town and village an office of a strong and trustworthy institution, where money may be deposited or borrowed according to the needs of local business.

QUESTIONS.

- 1. Examine a one-dollar bill, noting the place, the date, the number, the "promise to pay," and the signatures. What scenes and persons are represented on the front and back of the bill?
- 2. Examine a copper or silver coin, noting the design on its two sides. Find what the Latin inscription means.
- 3. What is the name of the nearest branch of a chartered bank? Who are the chief officials? What is the rate of interest paid on deposits?

MANITOBA EDITION.

PART II.—PROVINCIAL AFFAIRS.

TOPIC XI.

THE PROVINCIAL GOVERNMENT.

1. Introduction.

There are nine provinces in the Dominion of Canada, and although there is much similarity in their forms of government, there are likewise important differences. We shall find it well to study particularly the government of the province of Manitoba, and refer to that of the others only when some interesting point is to be observed.

Manitoba, with its proposed boundaries, is one of the large provinces of the Dominion, and possesses an area of about 242,000 square miles. It has a splendid commercial position in the very centre of Canada, and, as a natural result, its capital, Winnipeg, is one of the great cities of the Dominion. All citizens of Manitoba, therefore, have reason to be proud of their province, and should take a great interest in its welfare and development.

Manitoba did not exist as a separate province before entering confederation. It was formed in 1870 by the Dominion out of a portion of the territory purchased from the Hudson's Bay Company, and was then given all the provincial powers and rights. Saskatchewan and Alberta were established in the same way in 1905.

2. The Lieutenant Governor and the Premier.

The provincial government is conducted according to the same general principles that we have already studied in the case of the Dominion. The Lieutenant-Governor, who is appointed by the Dominion government, holds in the province a position similar to that which the governor-general holds in the Dominion. The leader of the government is called the "premier," and is at the head of the provincial cabinet, which is known as the "executive council." He is, like the Dominion premier, the real ruler.

3. The Executive Council.

B

1

The following is a list of the members of the executive of the province:—

1. The Premier, who is President of the Council, and Commissioner of Railways and of Provincial Lands.

- 2. The Provincial Treasurer.
- 3. The Minister of Education.
- 4. The Attorney-General, whose dety it is to see that the laws are properly enforced; also Telephones and Telegraphs.
 - 5. The Minister of Public Works.
- 6. The Provincial Secretary, who is also Municipal Commissioner.
 - 7. The Minister of Agriculture.

Each department has a deputy minister who assists the minister in its management. Under them are the clerks and other employees, who compose the civil service of the province.

4. The Legislature.

The representative body which makes the laws for the province and thus corresponds to the parliament of the Dominion, is known as the "legislature." It consists of the Lientenant-Governor and a single House, the Legislative Assembly. Nothing that resembles the Dominion Senate exists in Manitoba.

Aside from the differences that arise from there being no second chamber, business is conducted in the legislature in much the same way as in the Dominion parliament. There is a speaker, a clerk of the assembly, and a sergeant-at-arms. At the opening of a session of the legislature a "speech from the throne" is read by the lieutenant-governor. Debate is conducted in the assembly and in the committees under the same rules as in the Dominion House of Commons. The full term of a legislature is four years. But dissolution may come about sooner, and the elections be held, exactly as in the case of the House of Commons at Ottawa.

0

10

er'

10

VS

he

he

nt-

ve

)o.

Members of the legislature, like those of the House of Commons, do not need to own property. The provincial House has a membership of 48. The sessional indemnity is \$1,500. The salary of the lieutenant-governor is \$9,000 per year.

5. Registration of Voters.

In order that you may have the right to vote at either a provincial or a Dominion election in Manitoba, your name must be registered on the latest revised list of voters of the constituency. To have your name thus registered, it is necessary to be a British subject of the full age of twenty-one years, and to have lived in the province for one year and in the constituency for three months immediately preceding the date of your application for registration. The voters' list is revised each year.

Announcement is made about the first of May with regard to the date and place of receiving applications. When you go at the proper time, the registration clerk writes down your answers to the questions which he asks you as to your qualifications, and requires you to sign a declaration that your answers are correct. If for sickness or any good cause you are not able to be present, you should send the registration clerk notice in proper form or have a friend register your application for you. Some time later a revising officer goes over the list and adds your name to it, unless some one has made an objection. In this latter event, you will have to prove to the revising

officer's satisfaction, that you have the proper qualifications to entitle you to vote.

Judges are not allowed to vote. If an Indian or a person of Indian blood is receiving treaty money, that is, a yearly payment from the Dominion, he cannot vote. Persons of unsound mind and prisoners have no votes.

6. Provincial Elections and Parties.

The elections for the provincial legislature are conducted in much the same way as are those for the Dominion parliament. Equal eare is taken that the voting shall be secret, and there are similar rules in force as to the marking of ballots by the voters.

In provincial matters the names of the two great political parties are the same as in the field of Dominion affairs. But, although such is the ease, the work of the legislature and that of parliament are so different that it is not uncommon for an elector to vote in favour of one of the parties at provincial elections, and in favour of the other at Dominion elections.

the ey the The

is

ull

1

of of the ites nich and

our ood ould orm for goes

less itter

7. The Subsidy.

The money to defray the expenses of the government of each province comes very largely from the Dominion treasury. According to the terms of the British North America Act, the Dominion must pay to each province annually a certain sum known as the "provincial subsidy." It has been necessary to increase the amount of this subsidy more than once since confederation. In fact, the system has been found by experience to be rather musatisfactory. It was adopted originally as a compensation to the colonies when, on entering as provinces into the Dominion, they gave up the right of collecting customs and excise duties.

The provinces that existed separately before the union have an important source of revenue from their public lands, which were retained by them and not given up to the Dominion. Especially is this the case, when these lands happen to be covered with excellent timber or to contain valuable minerals. The province of Ontario, for example, by the sale of its timber obtains each year a very considerable sum of

money. On the other hand, Manitoba, as we know, did not exist as an original province, and, when it received provincial powers from the Dominion, it was not given the public lands within its boundaries but instead an annual grant in money. This latter forms one item in the Manitoba subsidy.

re

10

 sd

n.

 $d\mathbf{s}$

or

of

er

of

At the time of the entrance into confederation the older provinces had public debts which they had incurred in the construction of public works of various kinds. As we have already learned, the Dominion assumed this indebtedness. Manitoba, however, when it was created a province, was without debt and without public works. Therefore, in order to make matters fair for the province, it has been arranged that there shall be paid 5 per cent. on a certain sum of money that is taken to represent what its debt would have been, if Manitoba had been long in existence like the other provinces. We have thus another item in the subsidy.

The remaining items consist of an allowance of 80 cents for each person resident in the province, and a grant to meet the general expenses of government.

The subsidy in 1917 was as follows:	
Allowance in lieu of provincial lands §	409,007.17
5 per cent. on capital of \$7,631,683.85, in lieu of debt	381,584.19
80 cents per head on population of 553,860	443,088.00
Allowance for government	190,000.00
\$1	,423,679.36

QUESTIONS.

- 1. What are the position and area of Manitoba? When did it become a province?
- 2. What are the names of the lieutenant-governor and the premier?
- 3. Of what does the legislature consist? How many members are there in the legislative assembly?
- 4. Which party is in power in the legislature? What is its majority?
- 5. How must one proceed in order to have his name entered on the provincial voters' list? What qualifications are necessary?
 - 6. How is the provincial subsidy calculated?

MANITOBA EDITION.

TOPIC XII.

MUNICIPAL GOVERNMENT.

1. Introduction.

We have up to the present been learning about the government of the nation or of its larger divisions, the provinces. We shall now study the government of the smaller divisions, as, the city, town, village and rural municipality. We have thus far been trying to understand our systems of national and provincial administration. We shall now take up the subject of "municipal government." The word "municipal" is derived from a Latin word which means a town or city having certain special rights of self-government.

2. Kinds of Municipalities.

Municipalities are formed in accordance with laws passed by the provincial legislature. When a large number of people (over 10,000) are living closely together, as in Winnipeg or Brandon, the municipality is called a "city." When the number of people is smaller (over

7

[9

)()

90 --36

n ?

nd

ny

nat

me ca1,500), the municipality is known as a "town." A municipality of a still smaller population (over 500) is named a "village." As the country districts become sufficiently settled, they are formed into divisions of quite a large area known as "rural municipalities." So you see that whether you live in a city, in a small town, or in the country, there is a municipality in which you are interested.

A municipal government deals with matters that concern us very closely. For instance, it sees that roads and streets are made, that bridges are built, that sidewalks are laid down, that drains and sewers are constructed, that parks and pleasure-grounds are provided, that articles of food and drink sold in the shops are of proper quality, and that the lives of citizens are protected by police.

3. Municipal Councils.

The governing body consists in the cities, towns and villages, of a conneil with a mayor at its head. In a city, the councillors are called aldermen. In a rural municipality, the council has at its head a reeve. The council consists, in

cities, of a mayor and 2 aldermen for each ward, in towns, of a mayor and 2 councillors for each ward, in villages, of a mayor and 4 councillors and, in rnral municipalities, of a reeve and 6 or 4 councillors, as may be decided by a by-law passed for the purpose.

All members of councils must be British subjects, by birth or naturalization, of either sex, of the full age of 21 years, and able to read and write English from dictation. In cities and towns, they must be residents of the municipality, and own within it real estate (that is, land) assessed to the value of at least \$500, or be tenants of real estate assessed to the value of at least \$1,000. In villages, they must be residents, and be owners of real estate with an assessment of at least \$300, or tenants with an assessment of at least \$800. In rural municipalities, they must own real estate assessed to the value of at least \$100. No member is allowed to sell goods of any kind to the council or be interested in any contract with it.

A person, in order to have his name placed on the voter's list of the municipality, must be a British subject, and of the full age of twenty-one

n." 'er is-

ed as

ier lie

re

ers ce,

uid ed,

ed,

ps of

es,

ed

eil

in

estate assessed to the value of at least \$100, or (2) be a householder or tenant, occupying real estate assessed to the value of at least \$200, or (3) be a farmer's son who has been living on his father's or mother's farm for one year immediately preceding the time when the assessment roll is made up. Those who own property do not need to be resident in the municipality, but householders and tenants must be resident at least one month before the final revision of the voters' list. No person is permitted to vote whose name is not on the voters' list. Women are allowed to vote.

4. Municipal Elections.

Municipal elections take place annually. They are conducted by secret ballot in very much the same way as those for the Dominion parliament and the provincial legislature. Nominations are held from 1 o'clock to 2 o'clock in the afternoon on the first Tnesday in December, in a rural municipality, and at the same hour on the second Tuesday in December in a city, town or village. The elections take place in all municipalities on

the third Tuesday in December. The clerk of the immicipality acts as returning officer.

When a municipality is divided into wards, each elector has but one vote for mayor, but he may vote for conneillors in all the wards in which he owns property. In cities, one alderman of the two for each ward is elected annually and holds office for two years. Therefore, each year only half of the whole number of aldermen are newly elected as members of the Conneil.

5. Municipal Officers.

t

f

O

y

e

ıt

.e

n

al

ıd

e.

m

The officers of a municipal council are the "clerk," who keeps the books, records and accounts, the "treasurer," who receives and pays ont the money belonging to the numicipality, the "assessor" and "collector" of the taxes, and lastly the "auditors," who examine all the receipts and expenditures of the municipality and make an annual report as to these matters. The clerk and treasurer may be the same person, who in that case is usually called a "secretary-treasurer."

6. Council Meetings.

The "Municipal Act" provides that the first meeting of a newly elected conneil shall be

held on the first Tuesday in January, at 10 o'clock in the morning. But the council itself decides when and how often it shall meet after his first occasion.

The head of the conneil (mayor or reeve) presides as chairman, and sees that business is conducted in an orderly way. He does not vote, unless the number of votes on any question is exactly even. Voting in council is always by open vote and not by secret ballot. If the mayor (or reeve) is not present at a meeting, a chairman is appointed for the occasion.

A committees for the year to have charge of such matters as, for example, the numicipal finances, the public works, the markets, police and fire protection. These committees act as a sort of executive in their particular departments, making reports to council and carrying out its decisions. Special committees are also appointed as required, for the consideration of any important matter. The rules for the conduct of business in municipal councils are, as far as eircumstances permit, the same as those in use in the House of Commons and the Legislative Assembly.

7. By-Laws.

Any legislation passed by a municipal council has the name of a by-law. In order to have force, it must be under the seal of the municipality, and be signed by the head (mayor or reeve) or the chairman of the meeting at which it was passed, and by the clerk, or acting clerk, or secretary-treasurer.

The subjects regarding which a municipal council has power to legislate, are carefully explained in the "Municipal Aet" of the province, and form a very long list which it is not necessary to give here. In general, everything that concerns the unmicipality, and is not otherwise provided for by the statutes of the province, is under the control of the numicipal council.

8. Municipal Taxation.

In order to meet the expenses of municipal government, the commeil imposes a direct tax upon real and personal property in the municipality. As a first step it is necessary to determine what every man's property is worth. Therefore, an officer, called an "assessor," estimates the value in each ease and makes

10 elf

ter

ve)

te,

is

by the

ng,

nae of

pal lice

s a

its,

ted or-

of

as nse

ive

a record of it in a document known as the "ussessment roll." Real property is usually assessed somewhat below its true value, while personal property is rated at the actual price for which it might be bought or sold.

Since the amount of taxes which the owner has to pay depends on the assessed value of his property, it is important that the work of assessment shall be fairly and accurately done. Hence there is a period allowed for appeal against the value set by the assessor. All appeals come before a "Court of Revision," which is appointed by the council from among its members. If dissatisfied with the decision of the court of revision, the owner may appeal to the judge of the county court.

On the assessment thus finally revised the council fixes a rate of taxation which it considers will yield enough revenue to pay municipal expenses for the coming year. This rate is generally stated as being a certain number of mills in the dollar. A mill is the one-thousandth part of a dollar. Thus, if taxes could be so low as one mill in the dollar, a person, with property assessed at \$1,000, would pay one dollar in taxes.

9. Exemption from Taxation.

iin

he

ces

a

ıld

But it must be noted that, although the assessor gives in the roll of assessment an estimate of the value of all property within the municipality, there are certain kinds of property exempt from taxation, as follows: (1) all lands owned by the Dominion and provincial governments, (2) all lands owned by the municipality, (3) all lands reserved for the Indians, (4) schools and hospitals, (5) the property of agricultural societies, (6) cemeteries, (7) property exempted by by-law of the municipality, (8), grain and stock in the warehouse awaiting shipment, (9) agricultural produce before it has been sold from the farm, (10) live stock and farming implements to the value of \$1,500, (11) public libraries, (12) household effects, (13) churches, (14) creameries and cheese factories, (15) ships, vessels and steamboats, (16) (in rmal municipalities) improvements on the farm, including house and barns.

10. Statute Labour and Poll Tax.

Besides the nunicipal taxes that must be paid in money, there is imposed for the maintenance of the roads in the rural districts a tax which may be paid in labour under the direction of a local officer, called a "pathmaster." This is known as the "statute labour tax," and requires from each person one or more days' work according to the assessed value of his property. But any one may pay this tax in money, if he so desires.

In cities, towns and villages, men over twentyone years of age and under sixty must pay an annual tax of two dollars, known as a "poll" or head tax, if they do not otherwise contribute to the revenue of the municipality.

11. Borrowing.

Sometimes in order to earry ont some expensive public undertaking such, for example, as the construction of a system of waterworks or the erection of a town hall, a numicipal conneil may think it advisable to borrow money, instead of meeting the total expense out of the year's taxes. Accordingly, a by-law is passed to this effect, but before it can come into force, a vote must be taken as at an ordinary election, and three-fifths of the ratepayers who vote, must east their ballots in favour of it. No person is

allowed to vote, unless he owns within the municipality property assessed to the value of \$400.

12. City of Winnipeg.

The city of Winnipeg is not under the general municipal law of the province, but conducts its public business in accordance with the provisions of a special statute known as the "Winnipeg Charter." The most important difference between its form of government and that of the other municipalities is to be found in the fact that it possesses a "board of control," consisting of four members and forming with the mayor the "executive" of the council. The board, like the mayor, is elected by the whole city. The aldermen, on the other hand, are elected by the various wards.

13. The Municipal Commissioner.

Municipal affairs throughout the province are under the oversight of a responsible minister, known as the Municipal Commissioner. One of his duties is to levy on each municipality its proper share of the expenses of the law courts.

In general, matters of doubt and difficulty in municipal government come before him for decision.

Nores.—"Real property" includes land and buildings only. "Personal property" is taken to include, among other things, the stock-in-trade of a business, machinery and the like. If a municipality desires, it may receive permission to impose on personal property, instead of the usual tax based on the assessed value, a "business tax," calculated on the annual rental value of the premises occupied.

The treasurer or secretary-treasurer usually acts as "collector" of taxes, but in cities or towns a special officer may be appointed.

QUESTIONS.

- 1. What is the name of your municipality? What kind of municipality is it?
- 2. How many members of council are there? Is your municipality divided into wards? Who is mayor or reeve?
- 3. Who are entitled to have their names placed on the voters' list?
- 4. When do nominations and elections take place in your municipality?
 - 5. Who are the officers of your municipality?
- 6. When are council meetings usually held? Name some of the committees.
- 7. What is the rate of taxation? What taxes does your father pay?
- 8. Mention some kinds of property that are free from taxation.

MANITOBA EDITION.

TOPIC XIII.

THE COURTS OF LAW.

1. Introduction.

We have been studying thus far how the laws are made. We wish now to learn how they are enforced. The enforcement of the laws is the duty of the "judicial" power. We have already found what the executive and the legislative powers are, and how they belong to parliament and the legislature. On the other hand, the judicial power belongs not to parliament but to certain special bodies called "courts of law." A court consists of a judge with or without the aid of a "jury." A jury is a group of men, usually twelve in number, chosen for the occasion from the district where the sittings of the court are held. The highest courts usually have more than one judge and no jury.

2. The English Common Law and the Statute Law.

It is necessary to have laws for the many and complex relations that unite men mour modern

in for

only. ings, If a

e on essed ze of

etor" nted.

Vhat

your r or

the

e in

ame

does

from

civilization, such as their business relations, and their family and social relations. If a man lends money, the law has to state how he shall set about collecting it, should the debtor not be willing to pay promptly; if he desires to make a will, the law must tell in what manner such an act can properly be performed; and, if one man speaks ill of another, the law has to declare in how far the latter may be able to find a remedy.

Our system of law has not been made in a dry, but has grown up gradually through the long course of centuries, according as various customs and precedents became accepted as fair and just. For judges, in dealing with particular cases that came before them, followed certain general principles of justice, and, as a result of their decisions, there has arisen a great body of law which applies to innumerable matters. This law, which we have inherited from England, we call the "English common law." The common law is at the foundation of our legal system throughout the Dominion (except in the Province of Quebec). In order to make the common law suit our own time and

country, parliament and the legislature are, as we have seen, constantly passing new acts or statutes, and these form what is known as the "statute law."

3. Criminal and Civil Law.

There is an important distinction between the laws which the Dominion parliament may make and those which the provincial legislature has power to enact. Parliament alone can make laws that relate to crime and criminals. These are included under the term "criminal law," which has to do with such offences as unrider, forgery, theft, etc. The legislature, on the other hand, enacts laws that affect property and civil rights (Topic II). These come under the head of "civil law."

4. A Civil Suit.

Now, the constitution of the various courts of law, and the powers that belong to them, form a somewhat difficult subject. So it will be better at first to follow the proceedings in two supposed cases, and learn in this incidental way what we can about the courts.

ns, he tor

ner , if to

in
ugh
ions
as

wed as a reat able

rited mon on of nion order

and

Let us take first a civil suit. We shall suppose that we wish to recover a certain amount of money that Mr. B. owes us. We are "plaintiffs," because we enter the suit. Mr. B. is the "defendant," because he is defending his case. We make a statement of our claim to the clerk of the court, and full notice of this is "served on" the defendant, who has to put in a "defence," that is, give a reason why he ought not to pay. If the defendant were not to put in any defence, judgment would go "by default," and we could then proceed to collect our account by having the goods of the defendant seized and sold.

If the "defence" has been properly entered, the snit will come up for trial at the next sitting of the conrt. Although a person may present his own case in court, it is nearly always better to engage a lawyer for the purpose. It is a lawyer's business to know the law; and no one not trained as he, can possibly bring out so well the important points and avoid making disastrous mistakes. A lawyer is usually consulted before any snit is brought at all, and allowed time to study the case fully. Therefore,

we shall suppose that we have engaged the lawyer, Mr. X. The defendant has engaged Mr. Y.

When the day of trial comes, onr case may not be the first one called. Perhaps the jndge may not reach it till the next day. But at last it is called. Our lawyer, or "comsel," opens the case by stating what our claim is. We are asked to take our place as witnesses and give evidence. We are sworn "to tell the truth, the whole truth, and nothing but the truth." Then by questions our counsel leads us to tell all we know about the circumstances and the nature of the claim. After he is done, the defendant's counsel "cross-questions" us, that is, asks us further questions, intending to bring out any point that is favourable to the defendant's side.

If there are other persons besides ourselves who know anything about the matter, they have been ordered to attend the court, and are now sworn, questioned and cross-questioned. When our witnesses have all been heard, the defendant and his witnesses are sworn and give their evidence in the same way. Then the lawyers

all ain We nit.

is of full tho

son ere go

to the

ed, ing ent eter

s a one so ing

ing onand ore, snm up the evidence as a whole, each emphasizing the points that in his opinion favour his side.

With this the case is concluded, and the judge gives his decision at once, or he "reserves" the matter for fuller study, and the decision is given later. The side that loses usually pays the costs of the trial, although this is not so invariably. If the loser is not satisfied, and there is an important point of law in the case, he may "appeal" to a higher court. But appeals are expensive, and are not taken unless there is good reason to hope that in the new trial the decision of the court will be different.

5. A Criminal Case.

Let us now follow the course of a criminal ease in the courts. We shall suppose that a murder has been committed. An officer, ealled the "coroner," looks into the matter and decides that it is necessary to hold an "inquest," or inquiry. He then summons a jury and has witnesses called, sworn, and questioned. After this the jury gives its "verdiet," or opinion, as to how the murdered man met his death. If

the jury is sure as to who the guilty person is, it charges him with the crime.

al-

is

ŢC

10

ın.

ts

y.

m

ıy

re is

10

al

a

 ed

es

or

as

er

as

If

This person is then arrested and brought before a local magistrate. The magistrate may be a "justice of the peace," who is a sort of inferior judge appointed by the provincial government; or, if the crime has occurred in a city or town, he may be a regular officer with the name of "police magistrate." He goes only so far in his trial of the prisoner as to satisfy himself that a case has really been "made out." He then commits the prisoner to jail to stand his trial at the next session of the criminal court in that judicial district.

If it were not a case of murder, the accused man might be allowed out on "bail" during this time. A prisoner is said to be out on "bail," when some persons have promised to see that he is present in court at the proper time or to pay a certain sum of money as a fine. But a man accused of so great a crime as murder nust stay in jail till the court takes up his case.

There is a lawyer specially appointed by the province to arrange for the proper trial of

persons accused of crime. He is commonly called the "crown counsel," and he prepares the charge against the prisoner, which is laid before the "grand jury" at the sessions. This jury does not try the prisoner. It merely examines the evidence against him, and decides whether this evidence is sufficient for sending him for trial. If it decides that the evidence is not sufficient, the accused is set at liberty.

But if it concludes that the evidence is sufficient, it is said to bring in a "true bill," and the accused must go for trial before a "petty jury" (that is, little jury). This jury is one specially chosen for his case and consists of twelve men. Before he can be declared guilty or innocent, all the twelve men have to agree. If the jury cannot agree on a verdict, it is dismissed, and the trial has to begin again before a new jury.

When the prisoner is brought into the court, the charge against him is read to him, and he is asked to say whether he is guilty or not guilty of the crime. Usually he will say that he is S

d

is

ly

:8

30

is

is

a

is of

y

e.

is

111

t,

is

ty

is

"not guilty." Then the members of the petty jury (which has been already referred to), are chosen from lists furnished by the sheriff. Both the prosecuting counsel and the prisoner's counsel have the right to object to any juror, if it is thought that he may not act fairly either from supposed friendship or supposed enmity towards the prisoner, or from some other cause.

After the jury has been chosen, the trial begins. Proceedings resemble in a general way those already described in civil snits. At the close of the addresses of comisel for each side, the judge sums up the case for the jury, carefully stating what questions they have to decide. In a case of unurder it may be that the jury will have to decide whether the accused person is actually the guilty one, and, if he is, whether he committed the murder wilfully or did it, while trying to defend himself against attack from the murdered man.

The jury then retire and discuss the ease among themselves, until they come to a decision. Then they all return to the court room, and their leader, called a "foreman," announces

whether they have found the prisoner "guilty" or "not guilty." The judge, in accordance with the verdiet, either sentences the prisoner or allows him to go.

In ease there is any important point of law involved, an appeal may be taken to a higher court. Until this appeal is decided, the sentence is not carried out. Sometimes, when some serious mistake has been made, a new trial may be ordered.

6. Pardons.

The power to pardon a person convicted of a crime rests with the Minister of Justice of the Dominion. If there is good reason for showing mercy in a special case, the minister recommends to the cabinet that the prisoner receive a full pardon, or that his sentence be made lighter.

7. Summary Trial.

Instead of waiting for the regular sitting of a court, an accused person may, in the ease of lesser crimes, "cleet" (that is, choose) to be tried at once before a judge without a jury. In this event, the matter can be very speedily dealt with.

8. The Manitoba Law Courts.

The courts of law in Manitoba may be briefly described as follows:

th

or

W

er

11-

ne

ay

fa

lie

ng

ids

hll

fa

of ied

his

ealt

- 1. The County Courts are held at various places in each of the judicial districts of the province at dates of which due notice is given. They try suits for damages and debt where the amount claimed is not more than five hundred dollars. Appeals are allowed from their decisions to the provincial court of appeal.
- 2. The Court of King's Bench holds sittings at stated times in the several judicial districts of the province. It conducts the trial of all manner of suits without limitation, whether criminal or civil, with or without juries.
- 3. The Court of Appeal, which sits at Winnipeg, receives and considers appeals against the decisions of the courts of the province.

The judges of all courts are appointed and paid by the Dominion.

9. The Supreme Court of the Dominion.

Above the courts of the provinces come those of the Dominion. Of the latter the one about which it is most important for us to know, is

the Snpreme Court. This court consists of a chief justice and five other judges. Appeals may be taken to it from the higher courts of the provinces where the point of law involved is an important one. It has, moreover, the duty of interpreting our constitution, whenever difficulties arise. The Dominion government may refer any question of the kind to this court in order to seeme its opinion upon it.

10. The Privy Council.

Finally, above all the courts of the Empire stands a court in England called the "Judicial Committee of the Privy Council," or more briefly, the "Privy Council." As may be inferred from the name, the jndges of this court are members of His Majesty's Privy Council in Great Britain (not the Privy Council for Canada described under Topic V.), and are considered to form a division of that ancient body. An appeal to the Privy Council is allowed only when the case involves some very important point of law or the understanding of some provision of the constitution.

Note,—The "sheriff" is the chief officer of a judicial district, who sees that the sentences and judgments of the court are carried out. He also summons the juries and has charge of the jail. A "constable" is an inferior officer who makes arrests, serves summonses or other papers at the order of a magistrate, sheriff or court of law. A "summons" is a written command issued to a defendant or witness to appear before a court. A "warrant" is a document giving authority to a person to do a certain thing. A common use of the warrant is to give authority to a constable to arrest a person accused of a crime.

QUESTIONS.

- 1. What is the difference between the criminal and the civil law?
- 2. Write an account of an imaginary trial in which the plaintiff is suing the defendant for debt. Give full particulars of the case.
- 3. Who is the chief justice of Manitoba? Of what court is he a judge?
- 4. Who has the power to pardon a person convicted of a crime?
- 5. Name the courts of law of the province of Manitoba. Who appoints the judges?

MANITOBA EDITION.

TOPIC XIV.

EDUCATION.

1. The Board of Trustees.

All pupils who read this book will no doubt like to learn a little about the schools, eolleges and university of the province. If you happen to live in the country, you will probably attend a school where there is but one teacher. If you live in a town or city, it is likely that you are a pupil in a large school where there are several teachers. Now, no matter whether your school is large or small, it is managed by a Board of Trustees, who appoint your teacher, pay his or her salary, and build and keep in repair the school building. In rural municipalities the officers of the board are the "ehairman," and the "secretary-treasurer." In villages, towns and eities, the secretary and the treasurer may be different persons. "auditors" are appointed each year for a rural school. Elsewhere, except in Winnipeg, school accounts are examined by the municipal auditors.

2 The School District.

Each rural municipality in the province is divided into a certain number of school districts, and your school, if you live in the country, is in one of these districts. But, if you live in a village, town or city, your municipality forms a single school district.

3. Elections.

 \mathbf{bt}

es en

nd

er.

ely

re

 \mathbf{er}

is

nt

 Id

In

re

ı:."

nd

VO

al

ol

rs.

In a rural sehool district, the board of trustees eonsists of three members. These are elected at a public meeting of the ratepayers, ealled a "school meeting," which is held every year on the third Monday in July. A chairman and a secretary for the occasion are chosen by those present. Nominations are made as in an ordinary public meeting, a mover and a seconder being required in each ease. If no more persons are nominated than there are vacancies to be filled, the chairman declares these to be duly elected. But if there are a number of nominations, a vote is taken by a show of hands. However, if any ratepayer so desires, a poll must be held one week later, and then the voting is by ballot.

Each trustee holds office for three years, and it is so arranged that, under ordinary circumstances, only one trustee is cleeted each year. When the sehool district is first formed, the three trustees are necessarily elected at the same time. But the person who is nominated first, or in the case of a poll, receives the highest number of votes, is considered as elected for three years, the one who is nominated second, or in the ease of a poll, obtains the next highest number of votes, as elected for two years, and he who comes third in the order of nomination or at the poll, as elected for one year. Consequently, unless some trustee dies or resigns his office before the close of his term, there is afterwards only one trustee to be elected each year.

If, however, you live in a village, town or city, that is divided into wards, the board of trustees for your school will eonsist of two trustees for each ward. The trustees hold office for two years, but it is arranged in the ease of these

 nd

m-

ar.

he

he

ed

 \mathbf{st}

or

110

es

m,

be

y,

es

or

vo

se

wards, as in that of school districts in the country, that, under ordinary circumstances, there shall be only one trustee elected each year for each ward. At the beginning, when the two trustees for each ward are elected at the same time, it is decided by lot at the first meeting of the board after the election, which one of the trustees shall be considered as elected for two years, and which for one year. There is no school meeting such as is held in a rural district. The trustees are elected at the same time and in the same way as the mayor and councillors of the municipality. If your village, town or city, is not divided into wards, the number of trustees is three, as in the rural school districts.

A school trustee must be a British subject of the full age of twenty-one years, able to read and write, and a resident ratepayer of the school district. In the case of a rural school, a trustee must own property in the district.

4. The Inspector.

Besides the teacher and the trustees of your district, there is an officer appointed by the provincial government to have the oversight of

the schools in a certain division of the province. He is known as an "inspector," and has many duties to perform. He must visit regularly the schools in his division, examine their work, see whether the school buildings are kept in proper repair, and find out whether everything that is required by the Department of Education is being done. He must also make a report on all these matters to the Department.

5. The Education Department and the Advisory Board.

The Department of Education, with a responsible minister at its head, is in supreme control of all the schools in the province. Besides the Deputy Minister of Education and the other officials of the Department, there is an "Advisory Board" that has important duties. The Board consists of eight members appointed by the Department, two members elected by the public school and intermediate school teachers, once lected by the high school teachers, and one by the inspectors. Two of the members appointed by the Department are chosen from among the rural school trustees of the province. Its members hold office for two years. It has power to make regulations as to school buildings,

e.

apom

iee.

has

igs,

to prescribe what text-books are to be used in the schools, to state what shall be the kind of certificates that must be held by teachers and inspectors, to appoint examiners, and to define the course of study.

6. Support of the Schools.

In order to help pay the expenses of the sehools, the legislature grants seventy-five dollars every half-year for each teacher employed in a school. Besides this sum, the rmal municipality must collect by taxes an amount that will give to each school for each teacher employed twenty dollars per month during all the time that the school is kept open. What money is required for each school in addition to the above grants, is collected by the municipality through a special tax on the school district, the amount of which is fixed by the board of trustees. When a large sum of money is required at one time and it is considered advisable to borrow, as, for example, when it is proposed to erect a new school building, a vote of the ratepayers of the sehool district must be taken. The Department of Education must likewise give its assent.

In case the school district is a village, town or city, the money that is needed in addition to the grant from the legislature, must be raised by a tax on the municipality, which is levied in the same way as the other municipal taxes.

7. Secondary Schools.

Whenever there are a number of pupils who wish to pursue more advanced studies than those ordinarily taught in the public schools, the board may open special rooms and engage teachers for them. Such schools are then known as "intermediate schools." A "high selvool" is a still more advanced institution, with a snitable building and equipment, and is usually established by the Board of Trustees in a town or large village. The studies are particularly the higher English branches, Mathematics and Science. In the cities there are splendidly equipped schools, known as "collegiate institutes," which aim to give a full course in the various higher studies.

8. Training of Teachers.

Those persons who intend to become public school teachers, receive their education in the

public and high schools and the collegiate institutes. After they have passed the examinations, they attend a "normal school," and there secure the special training that is necessary for a teacher. Professional certificates are graded as first, second or third class. The last is the lowest class and allows the holder to teach for three years only. First and second class certificates give permission to teach for life.

9. University Matriculation.

Parallel with the courses of study provided in the high schools and eollegiate institutes for those who intend to become public school teachers, are courses for university matriculation. These embrace, in addition to English, Mathematics and Science, the study of one or two foreign languages. Students take these courses who desire to equip themselves for one of the professions, or who desire a more advanced education without seeking direct training for any professional eareer.

10. The University and the Colleges.

Having passed the matriculation examination, these students attend the university of

wn ion sed

in

vho ian ols,

age
hen
igh
with
ally
own

urly and dly stithe

blie the

Manitoba or one of its affiliated colleges in Winnipeg. Education of university grade is also provided by Brandon College in Brandon, a Baptist institution in affiliation with McMaster University in Toronto. The relation of "affiliation" means that the college prepares its students for the examinations of the university, which, in addition to conducting the examinations, prescribes the courses of study therefor, awards standing to the student, issues diplomas and confers degrees. In recognition of this fact the college is accorded representation on the university council or academie body, which controls and directs the above-mentioned activities of the university. The affiliated colleges of the university of Manitoba are six in number. Four of these are so-called "Arts" colleges, that is to say, they confine their teaching, ontside of theological instruction, for the religious denomination by which they are maintained, to arts subjects. They are (in the order of establishment) St. Boniface (Roman Catholic), St. John's (Chui h of England), Manitoba (Presbyterian), and Wesley (Methodist). These colleges maintain, in addition

in is n, a ster iliaits sity, inafor, mas this on iich iviges ber. ges, ing, the inthe nan ıd),

ho-

ion

to their arts teaching of university grade, preparatory or matriculation departments, in which work of a high school grade is done, in preparation for the university matriculation examination. The university, moreover, through its own faculty, offers instruction in arts (except Philosophy, which at time of writing is still left to the affiliated colleges), Science, Engineering, Architecture, Pharmaey and Medieine (in part). The two remaining affiliated colleges are the Manitoba Medical College, in which those who intend to enter the profession of medicine receive the balance of their training, and the Manitoba Agricultural College, in which, npon a general basis of training in English, Mathematics and Science, young men are instructed in the various phases of the science of agriculture, preparation of soil, rotation of erops, stock raising, dairying, poultry raising, horticulture, forestry, drainage and farm engineering generally; and young women in home economics, which embraces household art (elothing and furnishings), and household science (selection of foods and cooking).

In law, instruction is provided in the Manitoba Law School, which is maintained as a teaching and examining body under the joint anspices of the University of Manitoba and the Law Society of Manitoba, which is the organized body of law practitioners in the province. The three years' course in the Manitoba Law School, when completed, admits, on the one hand, to the practice of law, and on the other, when a few additional subjects are taken, to a degree in law from the university.

The chief degrees conferred by the University of Manitoba are Baehelor of Arts (B.A.), Master of Arts (M.A.), Bachelor of Science (B.Sc.), Doctor of Medicine (M.D.), Master of Surgery (C.M.), Bachelor of Civil Engineering (B.C.E.), Bachelor of Electrical Engineering (B.E.E.), Bachelor of Laws (LL.B.), Bachelor of Pharmacy (Phm.B.), Bachelor of Science in Agriculture (B.S.A.), Bachelor of Home Economics (B.H.Ec.).

Notes.—The studies in Arts are those which do not directly train for any of the professions, but are suitable for all who desire an advanced education. They are, for example, Classics (that is, Latin and Greek), English, Modern Languages, Philosophy, History, Political Economy, Mathematics and Natural and

Physical Science. Students who intend entering special professions, such as medicine and law, often find it helpful to take a course in arts because of the wider knowledge and increased intellectual power they gain thereby.

Manitola College has recently withdrawn from arts teaching (except Philosophy), and has closed its preparatory or matriculation department.

QUESTIONS.

- 1. What is the name and number of your school district? Who are the members of your board of trustees?
- 2. What members of your board were elected at the last election? Who are the chairman and the secretary?
- 3. Who is the inspector of your school, and where does he live?
- 4. Who are the Minister and the Deputy Minister of Education?
 - 5. What are the duties of the Advisory Board?
 - 6. What are the various kinds of secondary schools?
- 7. Name the colleges of the University of Manitoba. Mention some of the degrees granted by the University.

DUTIES OF THE CITIZEN.

You have in this book been studying chiefly the powers and duties of those who govern. But it must always be remembered that the ordinary citizen has powers and duties as well. He must not sit down quietly, and allow the affairs of state to go on, without feeling that he has some responsibility. Therefore, though you may be only one person in the vast total of the population, yet you have your duties to perform.

The first one is to try to understand as well as you can our system of government, and to keep yourself informed as to all the important acts of those who are in authority. In your study of public affairs you will be led beyond the bounds of the Canadian Dominion, for we have the advantage of living in a country which is part of a great empire. As you come to know better the outside world of nations, the more confident you will be of the value of our position.

Since Canada is now assuming in a definite way the duties of empire, there is a certain imperial feeling that we should strive to develop. The British Empire is so vast that it efly

ern.

the

zell.

the

he

you

the

rm.

las

eep

s of

v of

nds

thc

t of

tter

lent

nite

cer-

e to

ıt it

contains within itself nations of all languages and all religions. As a citizen of the Empire you should, therefore, have respect and toleration for the opinions of others. Our Empire cannot long continue to exist, unless it is something for which our brother nations may all have an ardent loyalty, whatever may be their erced, raco or tongue. This imperial feeling will also help us in our national affairs, for it will enable us to be sympathetic with our fellow citizens throughout the Dominion.

In Canada we have what has been said by enthusiastic observers to be the most perfect constitution yet devised by man. It seems to possess all the advantages of the noble constitution of the American Republic, yet with few of the latter's defects. But constitutions are not worth the paper they are written on, and precedents not worth the time spent in remembering and recording them, if the citizens do not take an interest in the affairs of the state. And the same is true all the way down from national government to the management of the public business of the municipality and of the school division. Therefore, your second duty as a

citizen is to put your knowledge of the nation and its government to practical use by taking an active part in politics.

The most effective way to make your influence felt in politics is to become a member of a party and to attend its meetings. Then you will be able to do something to secure the nomination of good, honest men for parliament and the legislature, and to check the tendency to employ improper means in the conduct of an election campaign. There is often so much at stake in an election, that many men are willing to spend a large amount of money and to make use of all kinds of dishonourable methods rather than run the risk of losing. Moreover, various great business enterprises are ready to contribute money lavishly to election funds, if they have hopes thereby of seeuring favours from parliament, legislature, or council. So every citizen who loves his country should try to discover and oppose all tendencies to evil-doing in the party to which he belongs.

A third duty innumbent on you as a citizen is to be ready to assist, so far as you are able,

all good causes. You ought never to oppose them by speaking ill of them or by making them objects of ridienle. One of these causes is the thorough education of all citizens. It is the common, everyday people that make the governments, good or bad. Every person should have in his early life an opportunity to receive all the educational training that is possible for him, and within the power of the state to give. It will be found that the remedies for the evils of government and of society do not lie in the under-education of the masses of the people. On the other hand, there is no need to fear over-education, if the instruction given is of the right kind.

Another good cause of which you should speak no ill, is the effort which is being constantly made to lessen the evil of intemperance in our country. Our race from ancient times has suffered injury from the habit of drinking intoxicants to excess. It has become evident that it is at last possible for us to rid our people of this age-long curse. But the most important of all causes which we should support is that of religion. A nation that scoffs at religion is in

ion ing

rty
be

che loy ion in

of an eat ate

iaen ver

the

zen ole, grave peril. Nothing can be found to take its place in the life of the people. It seems to be the only force strong enough to resist those tendencies which, if unchecked, will bring on rapid national decay and ruin.

The last duty of the citizen which we have occasion to mention, is that of endeavouring to lessen the eruelty of our civilization. When we read the history of early times, we are overpowered at the amount of suffering that seems to have been caused needlessly. In the ordinary pursuit of business and pleasure horrible and unnatural things were done. Probably some time in the future a similar charge will be brought against our own age. It would be well. if each day every one of us would think of the cruel things that we have seen done or that we ourselves have done, and then try to discover how much of the suffering thus caused might have been prevented. There is hardly any doubt that, if such a course were consistently followed, we should soon have a bright and happy world.

d, d. Rear up a nation firm and just,
A shrine of Liberty;
Raise up the earth-trod from the dust,
And make them strong and free,
Till none in all her wide domain
Be overwrought by power,
And they from every clime and strain
May bless her natal hour!
The millions in the future's hand
Look with all hope to you.
It is your duty to your land:
Canadians, be true!

Love her who guards you well and brave.

Unfeigned loyally.

It is your right some day to have
With her th' enthroning sea,
The sway of fertile plain and isle,
The swarming homes of men,
Whom to defend and teach meanwhile
'Twill rest upon you then.
Love her howe'er her fate be east,
And ever faithful do
Your duty to the Empire vast.
Canadians, be true!

APPENDIX I.

PARLIAMENTARY TITLES.

1. Words that Precede the Name.

We speak of "His Majesty the King," "His Exeelleney the Governor-General," and "His Honour the Lieutenant-Governor."

The prime minister of the Dominion and the other eabinet ministers (whether at present in office or retired) have, as members of the Canadian Privy Council, the right to be styled "The Honourable." Some, however, have also been made members of the British Privy Council, and have, therefore, the title, "The Right Honourable."

The provincial premiers and the other members of the executive councils are styled "The Honourable."

A member of the Dominion Senate has the title, "The Honourable Senator."

The speakers of parliament and the legislatures have their names preceded by "The Honourable."

2. Letters that Follow the Name.

A member of the Dominion parliament is entitled to the use of the letters M.P. (that is, Member of Parliament).

A member of a provincial legislature employs the form M.P.P. (that is, Member of Provincial "Parliament"). It may be observed that we do not now apply the term "parliament" to a provincial legislature. Therefore, it would be more correct, if we wrote M.L. (Member of Legislature) or M.P.L. (Member of Provincial Legislature), but these forms have never been adopted.

In the provinces of Quebee and Nova Scotia, where there are two houses in the legislature, members of the legislative council and those of the legislative assembly are sometimes given the distinguishing titles M.L.C. and M.L.A., respectively. Oceasionally but improperly, the form M.L.A. is used with the names of members of the legislature in the other provinces, where there is but one legislative chamber.

APPENDIX II.

SUGGESTIONS TO THE TEACHER.

This book is intended to provide two years' work in the subject. During the first year the pupil should gain a general acquaintance with our government in its many divisions and learn to understand the meaning of the unfamiliar terms. The second year's work may include, in addition to a more thorough study of the topies treated in the book itself, a little independent investigation of questions of a more advanced character. A short list of such questions is given under Appendix IV. Many others will readily occur to the mind of the teacher. order to obtain the necessary information pupils should be encouraged to consult the library (there should be one in every school), the newspapers, reports of governments and municipal councils, and their parents or older friends. It will probably surprise the teacher to find what an interest some will take in work of this kind. If a meeting of a mock council or parliament ean be organized with the help of the senior scholars, the interest will be greatly increased.

There have been inserted in the book the most famous portions of the political poems of Tennyson. Certain lines in them express so perfectly some of the maxims of government that they are becoming part of our ordinary language.

In teaching civies, the purpose is not so much to load the pupil with knowledge, as to inspire within him a never-dying interest in the affairs of the nation. Hence, do not ask him to learn by heart such lists as occur under Topics II and XII. Rather let him acquire, through frequent reference, a practical acquaintance with them.

APPENDIX III.

A BRIEF BIBLIOGRAPHY.

This list may be useful to the teacher, as it includes the names of books very easily obtained.

1. Necessary Books.

How Canada is Governed, Bourinot. Contains the British North America Act in full. Price \$1.00.

Canadian Almanac for the current year. Contains lists of British and Canadian cabinet ministers, of members of parliament and legislatures, of judges and

sheriffs, and of municipalities and their officers, the customs tariff in full, and an account of the British Army, the British Navy, and the Canadian Militia. The volume for the year 1907 has also a brief description of the forms of government throughout the world. Price 50 cents (paper), 75 cents (bound).

2. Helpful Books.

The English Constitution, Bagehot. Contrasts the British and American systems of government. Price \$1.25.

Europe in the Nineteenth Century, Judson. Gives brief accounts of the constitutions of the principal countries of Europe. Price \$1.25.

Canadian Citizenship, Millar. Discusses briefly forms of government and modern social problems. Price 60 cents.

School Civics with Civies of New York State, Boynton. Contains the constitutions of the United States and New York. Price \$1.00.

3. For More Advanced Study.

American Commonwealth, Bryce, 2 vols. Interesting and invaluable. Price \$4.00.

Canadian Annual Review, Hopkins. The volume for each year gives an excellent account of public events. Price \$2.50.

Letters of Queen Victoria, 3 vols. Price \$1.50.

Life of Gladstone, Morley, 2 vols. Price \$3.50.

(These two books shed light on the development of the English constitution in the nineteenth cencury.) The Statutes of the Dominion and the Province. Copies of special statutes may sometimes be obtained from the government offices, either gratis or on the payment of a small sum.

Canada Year Book, published by the Census and Statistics Office, Ottawa. Contains all kinds of statistical information.

APPENDIX IV.

SUBJECTS FOR STUDY.

(For Advanced Pupils.)

TOPIC I.

- 1. Look up in the dictionary or elsewhere the meaning of the following: aristocracy, aristocratic, democracy, democratic, oligarchy, oligarchic, anarchy, anarchist, socialism, socialist, autocrat, autocracy, autocratic.
- 2. Find out the names of the rulers of the great powers of the world.
- 3. Discover something about the government of the countries commonly mentioned in the newspapers.
- 4. Read the lives of Queen Victoria and Abraham Lincoln.
- 5. What do you think is the best form of government? Give your reasons.

TOPIC II.

1. To which of the two, the Dominion or the province, belong those powers which are not definitely assigned in

the constitution? Show how our constitution differs from that of the United States in this respect.

- 2. Discuss the value and dangers of the power of disallowance.
- 3. Give an account of the negotiations that led up to confederation.
- 4. "The laws of our province have much more to do with our ordinary life and its happiness than have the laws of the Dominion." Discuss this statement.
- 5. Find out what you can about the federal eorsticutions of the Commonwealth of Australia and the United of South Africa.

TOPIC III.

- 1. Give a brief account of the governors-general of Canada since confederation.
- 2. Compare the duties of the governor-general of Canada with those of the president of the United States and the president of France.
- 3. What would be the advantages and disadvantages of the appointment of a Canadian as governor-general?
- 4. Would it be advisable to have the governor-general elected by popular vote?
- 5. What are the arguments in favour of retaining the Senate?
- 6. How do you think the Senate could best be "reformed"?

?

7. What difficulties may arise, if the leader of the government or a large proportion of his cabinet belong to the Senate?

TOPIC IV.

- 1. Read over the speech from the throne given at the opening of the last session of parliament, and make notes as to its form and contents.
- 2. What corresponds at Washington to our "speech from the throne"?
- 3. Give an account of the usual proceedings in the House of Commons on the opening day of the session.
- 4. Discuss the question of the supremacy of the House of Commons in our system of government.
- 5. Give an account of the duties of the speaker of the House of Commons.
 - 6. Describe how a debate is conducted in parliament.
- 7. What are the advantages of committees in the work of the House?

TOPIC V.

- 1. Trace briefly the origin of the eabinet in English history.
 - 2. Compare our eabinet with the American cabinet.
- 3. What are the advantages and disadvantages of the Canadian cabinet as an instrument of government?
- 4. What difference is there between the position of a premier under our system and that of a president under the American system?
- 5. What foreign nations have adopted the British cabinet system?
- 6. Why is it necessary that all members of the eabinet should be in agreement on important questions?

TOPIC VI.

1. Make out a list of important public questions now before the people of Canada.

ne

es

ch

he

se

he

at.

he

83

he

a

ler

ish

net

- 2. What would be the result in our system of govern ment, if political parties ceased to exist?
- 3. What are the advantages and the disadvantages of the party system of government?
- 4. What is a coalition government? Have we ever had a coalition government in the Dominion?
- 5. What were the platforms of the two parties at the last Dominion elections?
- 6. Write an article favouring the policy of one of the parties.

TOPIC VII.

- 1. Find how long the last session of parliament lasted. Indicate briefly what business was done during the session.
- 2. On what dates and in what years are federal elections held in the United States?
- 3. What would be the result in our system of government, if elections were held on fixed dates as in the United States?
- 4. How many parliaments have we had since confederation? Find what was the length of each and the year of dissolution.
- 5. What are the names of the premiers since confederation? How did each come to give up office?
- 6. Give an account of a by-election, if one has been held in your constituency recently.

TOPIC VIII.

- 1. What are the names of the present members of the eabinet and their departments?
 - 2. Describe the system of "patronage" and its evils.
- 3. Is management by a board of commissioners an advantage in the case of a public enterprise?
 - 4. Give a brief account of our militia system.
- 5. What difficulties have arisen in connection with the eivil service?
 - 6. Discuss the problem of "strikes."
- 7. Write a brief account of the development of our railway and canal systems.

TOPIC IX.

- 1. What are the dangers of a heavy national debt? What is the amount of the national debt of Canada?
- 2. What is the annual expenditure of the Dominion? Mention the important items of the expenditure.
- 3. Would it be advisable to adopt a system of direct taxation for the Dominion? Give reasons for your answer.
 - 4. Discuss briefly the Canadian tariff question.
- 5. Make a note of the important points in the last budget speech.
 - 6. How are eustoms and excise duties collected?

TOPIC X.

- 1. Tell how you would proceed at the bank in depositing money and in withdrawing it.
 - 2. What are the merits of the Canadian banking system?

TOPIC XI.

e

'n٠

e

?

?

- 1. Who are the members of the provincial executive and what are their departments?
- 2. What are the policies of the political parties in provincial matters?
- 3. What are the merits and defects of the system of Dominion subsidies to the provinces?
- 4. Would it be better if the Dominion and the provincial political parties were entirely separate from each other?

TOPIC XII.

- 1. What is the name, size and population of your municipality?
- 2. Write a brief history of your municipality since its organization.
 - 3. Describe its physical features and its industries.
 - 4. Who are the members of the council?
 - 5. Give an account of the last municipal election.
- 6. What are the important questions in municipal politics?
- 7. Mention some of the property exempt from taxation in your municipality.
- 8. What are the chief items in the expenditure of your municipality? What is the amount of the expenditure. Is your municipality in debt?
- 9. Describe the method of assessment in your municipality.

TOPIC XIII.

- 1. In what judicial district do you live? Who is the sheriff? Who are the judges of the county court? What is the name of the nearest place where court is usually held?
- 2. Write a note on the police force of your municipality,
- 3. Mention an important case that has gone to the Privy Council in England for final decision.

TOPIC XIV.

- 1. Describe your school and grounds. What was the cost of the building? What improvements are most needed, and how much would they probably cost? What has been the cost of the furniture and equipment of your schoolroom?
- 2. How much money does your school district (division or section) receive in grants, and what is its expenditure? What is the rate of taxation for school purposes?
- 3. Where is the nearest high school (collegiate institute or academy)? Tell what you can about it.
- 4. Give an account of the university or universities of the province, and of the agricultural college.
 - 5. What are the advantages of a good education?

THE WAR-TIME ELECTION OF 1917.

1e

is

i-

ie

e

st

t

n

e

f

Owing to the ontbreak of the Great War the Parliament elected in 1911 was not dissolved at the end of five years, but its term was extended to six years. Dissolution took place and an election was held in 1917. For the purpose of this election a special Act, called the War-time Elections Act, was in force. It suspended some parts of the Dominion Elections Act and made certain special provisions. The most important of these provisions were:

No person was allowed to vote, if 'e became a British subject after March, 1902, and was born in a country at war with us, or was born elsewhere in Enrope and his mother tongue was the language of a country at war with us.

A woman having the same qualifications as those required in the case of male voters, was entitled to vote, if she was the wife, widow, mother, sister or daughter of a soldier or murse on active service with the Canadian or British forces.

CANADIAN CIVICS.

Enumerators were appointed under the Aet to enter on the voters' list the names of all persons qualified to vote. Candidates were nominated on November 19th and polling took place on December 17th. In the larger eities the poll was opened at 6 o'clock in the morning and was closed at the usual hour. (See page 73). Polling places were provided overseas to enable the soldiers and nurses to east their votes.
