DR. OSLER of Baltimore, a Canadian, now one of the most distinguished physicians of America, writes as follows:

"I enclose my cheque for twenty-five dollars, and you can put me down as an annual subscriber for that amount, as I feel nothing which has been started in Canada will do more practical good."

### SECOND ANNUAL REPORT

OF

# Muskoka Cottage Sanatorium for Consumptives.

ENTRANCE MAIN HALL-WAY.

The Trustees of the National Sanitarium Association, in presenting their Second Annual Report, desire to call attention to the marked success which has so far characterized this undertaking, as shown by the subjoined report of the Medical Superintendent. They desire at the same time

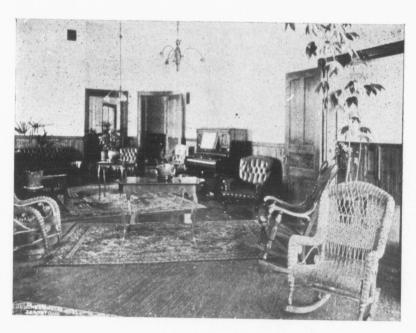

to emphasize the necessity for still more liberal support in order that the Sanatorium may accomplish its perfect work. As in all new institutions, the ratio of the cost of administration to the whole outlay is necessarily high, for the staff

and equipment requisite for a comparatively small one would suffice almost equally well for one a great deal larger.

At present there is accommodation for fifty patients, and as this report goes to press, every available room is occupied. The experience of this institution, as well as

1— WAITING ROOM.

of all others of its class, goes to show conclusively that complete success in the treatment of consumption depends in the first place on its being commenced while the disease is in its incipient stage, and continued for a sufficient length of time. The results would be more satisfactory if the accommodation were so increased as to make it possible to admit new patients, while retaining for longer periods those who are convalescent but not entirely cured. Many who have steadily improved while in the Sanatorium have been forced to leave prematurely because of their inability to pay for longer treatment. A still larger number of unfortunate sufferers, who might be restored to health, are left without hope of recovery because they are unable on account of straitened circumstances to avail themselves of temporary treatment. To assist in arresting this pitiful waste of life is surely one of the noblest expressions of enlightened benevolence.

There is urgent need of a building to be used as an infirmary for the temporary treatment of cases in which consumption may have made such progress that it is not advisable to admit them at once to the Sanatorium proper. Such cases, after being for a time under treatment will

-2-

either improve to an extent sufficient to justify their admission into the Sanatorium, or give evidence that they are incurable.

It is the sad duty of the Trustees to record here their deep sense of the great loss sustained by the Sanatorium in the death of Dr. Jas. E. Graham, one of the visiting physicians. He had taken an active, intelligent, and sympathetic interest in the institution from its inception, and his frequent visits were always helpful to the management. Over three years ago he aided in selecting the present site on Muskoka Lake, and he passed away a few months since while sojourning as a patient in the edifice he had helped to plan. In him the Sanatorium lost a faithful friend, the medical profession in Canada one of its brightest ornaments, and society at large a member greatly respected wherever he was known for his noble professional ideals and high Christian character.

The trustees have much pleasure in bearing testimony to the efficient manner in which the members of the resident staff have discharged their duties. Dr. Elliott, the medical superintendent, has been most unremitting in his watchful care over the patients. Mrs. Hawkins, the lady superintendent, and Miss Breckon, the head nurse, have been assiduous in their efforts to make the institution successful.

To the Visiting Physicians a debt of gratitude is due from the management, for the valuable assistance they have rendered. Dr. Jas. E. Graham, who died recently in the Sanatorium, besides being eminent as a general practitioner, had for many years made a specialty of the treatment of consumption. Dr. Davison, Dr. Powell, Dr. Britton, and Dr. W. P. Caven have all had extensive experience in dealing with the same disease, and Dr. McDonagh and Dr. Wishart are specialists in diseases of the throat. They all have taken a warm interest in the progress of the Sanatorium, and cordially aided it by many practical suggestions.

WILLIAM CHRISTIE COTTAGE.

#### REPORT OF MEDICAL SUPERINTENDENT

FOR THE YEAR ENDED SEPTEMBER 30th, 1899.

1 beg to submit herewith the Medical Report of the Sanatorium for its second year.

It is gratifying to know that our expectations, based upon the results obtained during the first year, have been fully realized.

Since my last report the B. Frank Bull cottage and the Rosemary cottage, the gift of Mrs. Jackson Sanford, which were in the course of erection, have been completed, and presented to the Association furnished throughout by the donors. Both cottages are ideal for the comfort and well-being of patients; light, ventilation, heating and sheltered verandas being special points of care. Each cottage has rooms for four patients. Four rooms have been added to the Wm. Christic cottage, increasing it from a six to a ten room-cottage. Two rooms have been added in the Administration Building. We are now enabled to accommodate 50 patients, 15 more than last year. Tents have been again used to increase the accommodation during the summer, with satisfactory results; they are occupied until the early part of November.

A cottage has been completed during the year, with accommodation for the visiting physicians or members of the Board on their visits to the Sanatorium, and for any friends of the patients who may wish to spend a and

feet,

Sur

of Geo Bui

Bui oper any

bety now boat

this

we Buil few days at the Institution. It is also used as a residence for the Medical Superintendent.

During the year a bequest of \$2,000 has been received from the estate of Mrs. Jessie Mavor, of Pickering, for a cottage to be known as The George Mavor Cottage. This cottage is to the east of the Administration Building, between the Wm. Christie and Rosemary Cottages.

Through the endeavors of Mrs. Geo. S. Papps, of Hamilton, a billiard table has been presented, and placed in a room in the Administration Building set apart for the purpose. The windows in the room are always open, so the patients can while away a pleasant hour without interfering in any way with their requirements for out-door air.

A great deal has been done to improve the grounds, and to give a better outlook from the Main Building. A number of the trees which intervened between the Lake and the main piazza have been removed, so that there is now an unobstructed view of the Lake and Islands, with the large steamboats and smaller craft which are constantly passing.

A breakwater has been constructed along the shore; the ground behind this has been filled in and levelled. In the Spring this will be seeded, and we will then have a terraced lawn, extending from the Administration Building to the Lake front

The system of waterworks has been extended, a windmill erected, and a number of hydrants placed in the grounds for the protection of the cottages. The wharf at the front of the building has been extended sixty feet, so that the largest of the Lake boats can now call at either of the wharves.

ROSEMARY COTTAGE. GIFT OF MRS. JACKSON SANFORD.

ear more ing adv arre wer

exer

in veneral apparand

SITTING ROOM, ROSEMARY COTTAGE.

The upper part of the boat house, which overlooks the Lake and the neighboring islands, is open during the summer to the Lake breezes. It is now arranged so that during the winter it is enclosed with glass, and forms a pleasant shelter from the winds, while the patients may have full benefit of out-door air and sunshine.

A system of electric bells has been put in, by means of which a nurse may be called to any room either in the Administration Building or the cottages.

The cost of lighting the institution has been much lessened through replacing the sixteen candle power lights, which were the only ones heretofore used, by lights of four and eight candle power in the bed-rooms and other parts of the buildings where the brilliant light is not required.

The nursing department has during the year been placed under the excellent management of Miss Breckon, late Superintendent of the Emergency Hospital, Toronto.

The purity of our milk supply has been ensured by frequent tests. The herd has been subjected to the tuberculin test, and I am pleased to be able to report that none of the animals reacted.

In comparing the results of our second year with those of the first, it will be seen that with the average length of treatment increased from 98 days to 128 days there has been a corresponding increase in the percentage of apparent cures, from  $15^{\circ}/_{\circ}$  to  $21^{\circ}/_{\circ}$ , and the percentage of cases in which the disease has been arrested, that is relative cures, from  $27^{\circ}/_{\circ}$  to  $32^{\circ}/_{\circ}$ .

That a longer stay than three months is necessary, even in the earlier cases, is seen in that of eleven incipient cases remaining under three months, only two were apparently cured; while of fourteen cases remaining over three months 12 or  $85^{\circ}/_{\circ}$  were apparently cured. Of the thirteen advanced cases remaining under three months, 5 or  $39^{\circ}/_{\circ}$  had their disease arrested, while of twenty-six cases remaining over three months 20 or  $79^{\circ}/_{\circ}$  were either cured or had their disease arrested.

Most of those discharged with disease arrested have returned to their work, others have taken up life out of doors at farming or some similar occupation, and most of them will be eventually cured if they continue to exercise the same care as during their stay at the Sanatorium.

It is encouraging to know that all of those reported as apparently cured during our first year's work remain as well as on discharge. Of the 23 cases in whom the disease was arrested 20 are still as well as on discharge, nearly all have been at work since their return home, and six are now apparent cures through proper care and attention to the rules of hygiene and health learned at the Sanatorium.

THE WILLIAM DAVIES COTTAGE.

### DEFINITIONS OF TERMS EMPLOYED.

Incipient.—Cases in which both the physical and rational signs point to but slight local and constitutional involvement.

Advanced.—Cases in which the localized disease-process is either extensive or in an advanced stage, or where with a comparatively slight amount of pulmonary involvement the rational signs point to grave constitutional impairment, or to some complication.

 $Far\ Advanced.$ —Cases in which both the rational and physical signs warrant the term.

Apparently Cured.—Cases in which the rational signs of phthisis and bacilli in the expectoration have been absent for at least 3 months, or who have no expectoration at all; any abnormal physical signs remaining being interpreted as indicative of a healed lesion.

Disease Arrested.—Cases in which cough, expectoration, and bacilli are still present, but in which all constitutional disturbance has disappeared for some time; the physical signs being interpreted as indicative of a retrogressive or arrested progress.

Improved.—Cases in which there has been some marked gain in the condition of the lungs, or in which there has been marked amelioration of the constitutional disturbances. Cases with simply a slight gain in weight are not placed under this term.

J. H. ЕLLІОТТ, М.В.,

Medical Superintendent.

A Copy of the Resolution passed by the Trustees of the National Sanitarium Association, and forwarded to Mrs. Graham:

Edesire to express our sincere sympathy with the family of the late

James E. Graham, M.D.

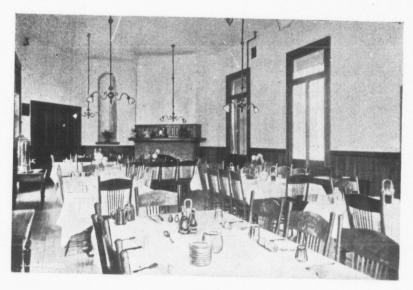

We recognize the great loss the community has suffered through the death of Dr. Graham, whose integrity and goodness of heart endeared him to all that knew him, and who occupied a position of exceptional eminence in his profession, added to which his study of tuberculosis placed him foremost in this special branch.

We desire to place on record our grateful appreciation of the many valuable services rendered by him to this Association, as consulting physician.

It is our earnest prayer that a loving Providence may sustain the bereaved ones, on whom so deep a shadow has fallen.

JAS. E. GRAHAM, M.D.

DINING ROOM.

#### VISITING PHYSICIANS' REPORT.

The Sanatorium has been visited by us during the year at intervals of from three to four weeks.

Graphic records of the examinations made, and of the conditions found, at each visit, have enabled us to keep in touch with the progress of all patients under treatment, and it is a matter for mutual gratulation that the average improvement has been even better than that of last year.

The suggestions made by us in our last report, that cases should be sent in earlier and should remain under treatment for a longer time, have been measurably acted upon, and seem to have been the chief factors in improving our statistics.

Hospitals generally, in this province, are refusing admittance to cases of pulmonary tuberculosis; and pending the erection by the National Sanitarium Association of the Toronto Cottage Sanatorium for the care of patients of all grades of society and in all stages of the disease, we have thought it best to admit a certain number of cases not falling within the class for which the Muskoka Institution was specially established. It has seemed right to sacrifice statistics in the attempt to save or prolong life.

In spite of this the results obtained, and fully shown in the report of the Medical Superintendent, compare favorably with the results of Sanatorium treatment as carried on elsewhere.

The Muskoka Cottage Sanatorium is already an assured success, and as new cottages are built its field of usefulness must become progressively enlarged.

We are glad to be in a position to report that the management has always cheerfully and fully met the suggestions made by the consulting staff. Dining with the patients we have found the food always abundant, excellent in quality, and invitingly prepared.

Decorations and gifts for Christ-

mas tree.

VISITORS' COTTAGE.

ADMINISTRATION BUILDING, MUSKOKA COTTAGE SANATORIUM, Erected through the gifts of the late Hart A. Massey and W. J. Gage.

FOR

# Muskoka Cottage Sanatorium for consumptives.

### It is A National Charity

There are no Shareholders, every dollar received is used to assist in maintaining consumptives or extending the work. Trustees give their services free of charge.

### It is A National Institution

And should have the help of all Canadians.

PI

Yo

Co

The

### It is A Home

For the treatment of Consumption in the incipient stage.

# Money

Is wanted for an Infirmary to treat cases that require close supervision and nursing.

## Money

Is wanted to help to pay cost of maintaining hundreds, who apply but without money must be turned away.

# Nearly 500 Persons

Were refused during the past year, some because there was no Infirmary to receive them, others because they had not the necessary means to pay for their maintenance.

## Your Money

Will help to save the life of some young man or woman.

### One Out of Seven Die of Consumption.

Medical men state that one-seventh of the population sooner or later suffer from the dread scourge of Consumption. In no other way can you help so large a proportion of those who suffer.

### Protect your own life and that of your family.

You will assist in protecting your own life and that of your family. As the disease is contagious, by furnishing a home where patients can be cared for, the spread of the disease is lessened.

### You can help in saving the Lives of one-half of those who suffer.

For years the reports of Saranac Lake and other sanataria show that fully half of the patients treated have been cured or greatly benefitted so that they may return to their work.

#### It is a Disease of the Poor.

You help those who most need help. While all suffer, both rich and poor, Consumption is especially a disease of the poor.

#### A Means of Education.

The Home for Consumptives, will not only assist in curing these treated, but will supply a means of education whereby the spread of the disease may be prevented, thus lessening the danger to the community.

#### Costly to Treat.

Because of the lingering nature of the disease, Consumption is costly to treat, requiring protracted rest, pure air and the best food.

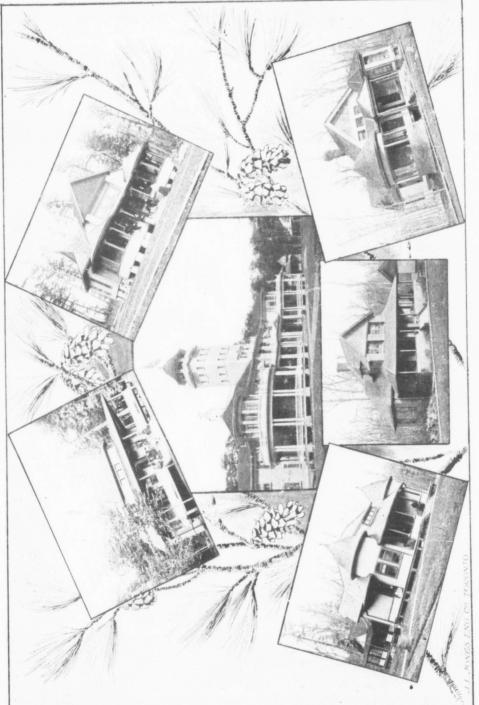

.....

# In Your Will

Remember the National Sanitarium Association, organized for the benefit of Consumptives.

The Association can legally receive any sum which may be given or bequeathed.

The following form will serve:
