DRASTIC ACTION OF COUNCIL FAILS TO DISCOURAGE ATHLETIC CLUB

Severe Blow Struck By Radical Move Of Council—Sport Leaders May Be Down But Not Out—First Meeting Held On Monday—Committee Appointed To Interview Land Owner.

Despite the unexpected blow received through the council's action, the members of the athletic club are not discouraged by any means, and have already formed a committee to interview the land owner, in order to secure a suitable site for the proposed field. These plans were definitely stated at a meeting of the council held in the town hall on Monday night.

Under the authority of the council, Messrs. Moore, MacDonald and Gibson were present. Members of the council were present, and the athletic club was represented in attendance and clearly demonstrated to their satisfaction that the athletic movement should be carried down to a successful issue.

In addition to these matters, Jack Redfern, well-known athlete, athletic instructor and member of the club, was also at the meeting and upon being requested to speak, did so in a most able and convincing manner.

Redfern declared that he had been hoping for some time that there would be an organized movement in behalf of the athletic club in Campbellton. He stated that he had watched our earlier hockey team and also many of our younger boys on their last winter and emphatically declared that he was confident that Campbellton had abundant material which, if properly developed, would bring glory to our town. He further stated that he had been checked and also slightly annoyed to learn that certain grounds in the council here had been instrumental in having the athletic grounds of the newly formed club taken away from them. He stated that he felt it his duty to fight for their rights for in so doing they would be championing the rights of the working man's child.

Several reports emanating from the province of Quebec and Ontario are being sent, and it is stated that these reports are being sent to the athletic club, and that they are being sent to the athletic club, and that they are being sent to the athletic club.

COUNCIL RESCINDS FORMER MOTION

Takes Grounds From Athletic Club Without Even Dictating Any Terms.

The radical element in the local town council gave another demonstration of its alarming capacity for taking unnecessary and needless action in civic affairs on Thursday evening last when, on the motion of Councillor Dunsmuir, seconded by Councillor Gordon, it voted for the rescinding of the motion passed at a council meeting held on Sept. 4th, which gave the former I. N. R. lot for an athletic field.

The motion passed with a majority of two. Councillors Gordon, Gibson and St. Onge voted to rescind the former motion and Councillors Moore and MacDonald voted nay. Thus, without giving the Athletic Club an opportunity to discuss the matter or even listen to a proposition of any kind, the council deliberately nullified an agreement which it had voluntarily made, while in session, some six weeks previous.

Mayor MacKay presided at the meeting and Councillors Moore, MacDonald, Dunsmuir, St. Onge, Macdonald and Councillors Moore and Gordon were present.

The matter of reconsidering the athletic field matter was brought up by Councillor Dunsmuir. He intimated that the I. N. R. property was wanted for a park. He spoke at some length with his usual vindictive method of referring to the great need of beautifying the town. Councillor Gordon seconded his motion and proposed to support it by division and proposed to support it by division and proposed to support it by division.

CASE AGAINST MARTIN DISMISSED

Seven Witnesses Could Not Furnish Any Definite Information.

The case against Peter S. Martin, newly appointed co-inspector with Chas. Gray, charged with illegally selling intoxicating liquor during the recent summer was dismissed by Judge Matheson yesterday in the court here.

John Gammon, prohibition official of Bathurst, was the chief of the prosecution, and he called but not one of them could furnish any useful information. M. A. Kelly prosecuted the case but as no evidence was brought forward the case was promptly dismissed. No counsel was required by the defense as the whole favored strongly of a dismissal.

It was pointed out by local authorities this morning that during the last month the superior inspectors were in office, twenty-three arrests for drunkenness were made here, compared with six during the two weeks the new officials have been on the job.

CAR STOLEN

When about to return home after a social gathering at a home on the corner of St. Onge and St. George streets on Monday evening, Mr. Lyman Gilber discovered that his car, a two passenger touring car, had been stolen from the driveway. The car had been left in the driveway and was found to be missing.

Mr. Gilber immediately reported the matter to the police and a search was made for the car. The car was found to be in the possession of a man named [Name], who was arrested and charged with the theft.

DELEGATES TO GO TO GASPE

Board of Trade Members To Attend Conference On Railway Matter.

At a meeting of the executive committee of the Campbellton Board of Trade held on Tuesday afternoon in the office of E. H. Shannon, secretary of the board, a motion was passed to send a delegation of five members of the board to attend the conference to be held at St. Bonaventure on Thursday, October 27th.

The delegation will consist of Messrs. [Names], and will be led by Mr. [Name]. The purpose of the conference is to discuss the proposed extension of the railway line from St. Bonaventure to Gaspe.

AGRICULTURAL OFFICIALS HAD NARROW ESCAPE

Two officials of the N. B. Department of Agriculture, who were on a visit to a small settlement near the mouth of the St. Lawrence river, were narrowly escaped by a fire which broke out in the building in which they were staying.

The fire started in the kitchen and spread rapidly to the other parts of the building. The officials were able to escape with only minor injuries.

25,000 LUMBERMEN HUGE CONTRACT FOR HARDWOOD TIES IN QUEBEC WOODS

More Than 3,000 Camps Will Be In Operation This Coming Winter.

Quebec, Oct. 18.—The next winter's cut of the Quebec forests is expected to be one of the largest in recent times. Over three thousand lumber camps are due to be in operation, employing in the neighborhood of 25,000 men, according to Chief Forester Piche. He stated there was a scarcity of labor in some sections of the lumber district, and that consequently, higher wages were being offered as an inducement to go out into the woods for the winter. Regarding the situation in the forests of the province, Mr. Piche said that there had been a lot of fog, which, combined with the dry, tended to keep the leaves and grass moist.

LUMBER SHIPMENTS DURING SUMMER

Over 50 Million Feet Long Lumber Exported—24 Vessels Loaded Here.

Although the port of Campbellton has not been the scene of so great activity in shipping this season as was the case last year, some twenty-four sea going vessels have loaded long lumber, laths, shingles and pulpwood for foreign ports during the summer. The cargoes of long lumber shipped, aggregated to 90,123,225 feet. Besides this some 19,870,000 laths have been shipped from the local port, 1,815,000 cedar shingles and many thousand cords of roused pulpwood.

According to the shipping records of the Customs Office here the bulk of the lumber shipped this summer has been for the European and South American markets, large quantities being shipped to Birmingham and Manchester. The territory specified in the contract to be covered by MacDonald and Grier comprises the following districts: From Mont Joli to Moncton on the main line of the C. N. Ry.; from Campbellton to Limerick on the I. N. R. and from Newcastle to Blenheim in the central part of the province. The recently awarded contract further makes the above mentioned districts the sole buyers of hardwood ties in these different districts.

PRESENTATION TO CHOIR LEADER

Baptist Choir Celebrate China Wedding of Mr. and Mrs. H. Currie.

On Monday evening at the residence of Mrs. D. E. Richards, Wellington Street, the choir of the Baptist Church, under the leadership of Mr. and Mrs. Henry Currie, presented a most beautiful and appropriate address, the occasion being the twentieth anniversary of their wedding.

Mr. and Mrs. Currie were taken wholly by surprise as everything had been arranged for a moment the room was shrouded in darkness and when the lights were again flashed on the honored guests began to realize the personal significance of the occasion. While Miss Geneva Rogers played a wedding march which recalled to the happy couple that happy day of yesteryear the choir, formed in procession marched into the room headed by the presentation upon a dainty top-wagon. Little Vivian Stevens made the presentation, while the presentation address was read by Mr. Geo. McNeil.

THE POTATO CROP IN RESTIGOUCHE

Is Of Fine Quality This Year—Much Shipping Already Done.

Despite the dry weather of the past season the potato crop in Restigouche is reported to be of a fine quality and much of it has already been shipped.

The crop is reported to be of a fine quality and much of it has already been shipped. The crop is reported to be of a fine quality and much of it has already been shipped.

LOCAL TRADE HAS BEEN STEADY

But No Rush Yet For Winter Goods—Local Stores Well Stocked.

General business activity throughout the fall has, according to the majority of local merchants, been fairly good in Campbellton. The exception to this is the weather, which has prevailed for the past few weeks or more has, in all likelihood, had much to do with stimulating a slow down in the buying of winter goods. Many shoppers from the outlying districts have been in evidence on the streets.

The annual rush on fall goods however has not yet really begun. The first cold snap will in all probability add zest to the annual quest for winter goods. For those residents of the surrounding country who are contemplating the purchase of their cold weather requirements, the well stocked stores of Campbellton offer opportunities which are worthy of mention. In a numerical sense, Campbellton is only a small town but the stores in every line offer to prospective visitors a range of choice which is seldom exceeded even in the stores of larger cities.

LOST WEEK-OLD SON

Much sympathy is being expressed for Mr. and Mrs. Philip H. Dupond in the death of their one-week-old son, Joseph Louis Gerald, which occurred last night at the Hotel Dieu Hospital. Four doctors attended the child and all efforts to save the little life proved futile.

In an eloquent speech and thanked the members of the choir, on behalf of Mr. Currie and himself for their kindness and expressions of good will. The evening was spent in games and amusements, interspersed with fine instrumental and vocal selections by various members of the choir. The Rev. Mr. Camp was also in attendance and addressed the gathering in a speech very appropriate to the happy occasion.

UNIQUE HAPPENING AT LOCAL PORT

First Time in History—3 Largest Sailing Vessels Afloat Dock at Same Time.

There is the largest that has ever been seen in this port and to have all three in this port at one time is quite together with their registered tonnage and speaks well for the port and its facilities. The three vessels are the *Caladonia*, 3647 tons; the *Marborough Hill*, 2418 tons; and the *Salvation Army Citadel*, 2000 tons.

Canadian National Railways Award Contract For Their Requirements of J. Wesley MacDonald and H. Grier—Transaction Of Much Importance To Farmers Of This District—Contract Holders Sole Buyers Here.

The announcement made yesterday that the Canadian National Railways have awarded a large contract to fill their requirements in hardwood ties to Messrs. J. Wesley MacDonald, local lumber dealer and Herbert Grier, lumber manufacturer, of Montreal is an item of some importance and one that will interest dealers in and owners of hardwood not only in this district but throughout a large area of the province.

SOME PRICES IN LOCAL MARKET

Fine Vegetables On Display—Good Beef Scarce In This District.

Business in the local meat and vegetable markets during the past week is reported by the majority of local stores to have been active and fairly steady during the last week. In addition to the trade of the established merchants in these lines farmers from various outlying districts have been arriving daily with loads of farm produce. The potatoes on the local market speak well for the quality of this fall's crop and the fine variety of other vegetables on display at stores where they are handled appear to be equal if not superior to the root crops of last year. Potatoes are selling here now at \$2.80 per bushel, turnips at 20 cts. per bushel, cabbage 7 cts. per bushel, pumpkins 5 cts. per bushel, parsnips 10 cts. per bushel; lettuce appears to be scarce, is being sold at 30 cts. per bushel; cauliflower, which appears to be scarce, is being sold at 20 cts. per bushel; lettuce appears to be scarce, is being sold at 30 cts. per bushel; cauliflower, which appears to be scarce, is being sold at 20 cts. per bushel.

DETECTIVE EVANS SURE OF MURDER

Official Investigating Goodin Case Declares It Clear Case Of Brutal Murder.

Speaking to the Graphic yesterday Sheriff Blanchard declared that Detective Evans, who is conducting the investigation into the mystery surrounding the death of James Goodin where they are handled appear to be equal if not superior to the root crops of last year. Potatoes are selling here now at \$2.80 per bushel, turnips at 20 cts. per bushel, cabbage 7 cts. per bushel, pumpkins 5 cts. per bushel, parsnips 10 cts. per bushel; lettuce appears to be scarce, is being sold at 30 cts. per bushel; cauliflower, which appears to be scarce, is being sold at 20 cts. per bushel.

SPECIAL S. A. MEETINGS

Beginning Saturday, October 27th, a ten day campaign of special meetings will be held in the Salvation Army Citadel here. Envoy R. A. Osborne of Toronto will conduct the meetings and many timely and interesting subjects will form the thesis of his addresses.

VISITOR TO N. B. TELLS GRAPHIC STORY OF JAPANESE DISASTER

Miss Ruth Parker For Many Years in Japan Gives Lurid Description of the Recent Tragedy.

(Carleton Southall)
The following letter was written by Miss Ruth Parker, of Jacksonville, and will be of interest to many as a reliable picture of the awful conditions in Japan. Miss Parker has been in Japan for some years and was returning from a vacation spent at her home, and in various parts of the province.

Baku, Yochim, Ueda, Sept. 22nd, 1923.

Dear Friends in the Homeland:

Just three weeks from the day and hour I left home, I arrived in Ueda, my new home. We had a most enjoyable trip across the continent, and the ocean, too, was ideal. Travelling was a greater pleasure to me than the joy of it all was somewhat overshadowed on the morning of September 2nd—just one day before we were to arrive at Yokohama—by the news message "Yokohama was destroyed by earthquake and fire at noon yesterday." A startling message, yes, almost an "impossible message." The passengers looked at each other and wondered if such could possibly happen to a city of 2,000,000 people. Then came the exact wireless that various districts of Tokyo had been affected by the earthquake, that fire had broken out and was sweeping over that third city of the world.

Could it all be true or were there exaggerated reports as so many are? We thought of the English-speaking population, our numerous Japanese friends and our Mission property. What of it all? The only thing we could do to comfort ourselves during that long Sunday was to pray and remind ourselves that perhaps it was not so bad as first reported.

What would the morrow bring to us? We waited anxiously.

When morning dawned all were on deck and we found ourselves entering Yokohama Harbor. But while yet quite a distance from the land, the ship cast anchor.

As we looked in the direction of what was once that most interesting city of Yokohama we saw here and there smoke arising and a closer look revealed nothing but frames of buildings and heaps of debris. It was not long ere we saw life-boat loads of refugees coming from the Empress of Australia (which was in the harbor at the time of the quake) towards our boat, and during the day 1400 refugees were taken on. One could read disaster in their appearance and the terror-stricken faces, yes, in some cases, the crazed faces, told of hours of untold agony.

And what awful stories we heard of those who escaped not, and of the many miraculous escapes—as we shared with different ones our supply of clothing, or ministered to the wounded. They told of how the earth rocked, of deep and wide cracks in the earth, of falling timbers, of collapsed houses under which many were pinned (some unable to escape were burned to death) the shrieks and cries for help, and then the sudden outbreak of flames. Nor did they neglect to speak of the faithfulness of their Japanese servants in seeking the safety of those whose servants they were. I remember one old man who had both legs broken, pointing to a young Japanese lad, and with tears streaming down his cheeks he said, "It was that boy who saved my life." Some babies were on board because of the efforts of the Japanese nurse in charge.

As fire broke out thousands of people wended their way over piles of debris to the park where they remained suffering from the intense heat of flames raging on all sides, until the flames died down. Fortunately for them the water-works gave way and flooded the park, thus enabling them by keeping water on the face to ward off the effect of the heat in some small degree.

To feed the flames still more the immense tanks of oil belonging to the Standard Oil Company burst—the oil flowing even into the harbor, where it burned, thus endangering the boats anchored there.

As the opportunity arose many made their way toward the harbor where those who could, swam or went in boats to the larger boats.

For a whole day we were anchored in the harbor, and during the first two or three hours, although we felt nothing there were three earthquake shocks which lowered the floor of the harbor 25 feet.

The morning of the 5th brought us to Kobe which was already crowded with refugees. Learning this, we decided even though travelling was very difficult because of over-crowded trains, we would leave the city as soon as possible.

And I can assure you that more than a day's journey to Ueda was by no means a comfortable one. The night was hot as well as the day, and the train packed to its utmost capacity.

Since arriving in Japan there has been only one subject of conversation—the earthquake. Yokohama is no more, and it will be years before Tokyo can possibly be rebuilt—all the main business section was flattened at the first shock and then the fire burned at least one third of that vast city 90 square miles. Of the thousands who fled, 32,000 gathered in what they thought a place of safety, but soon they were enveloped by the flames and all perished.

It's very difficult unless one was an eye-witness (which experience no one covets) to know just the vastness of the devastation. But also so much we marvel at the miraculous escapes. As for the Mission property, although damaged to a certain extent, all the buildings are standing and not beyond repair.

As for our work, I have heard of none who lost their lives, although some lost everything but life. And so while we mourn with those who have suffered we are grateful for many things.

The loss of property among the Japanese churches has been great and we trust that in this hour of severe trial and distress the church here may have the prayerful sympathy and financial support of the sister church in the homeland.

We are proud of the practical way the governments of the foreign nations have expressed their sympathy and we feel certain that the church will respond in the same noble way, and thus assist the church in the work of reconstruction. Could you have been with us yesterday when calling, and heard the lady, with tears streaming down her cheeks, thank us for what Canada is doing you would feel fully recompensed for any gifts. I understand a special appeal is to be made this year, so this may help to prepare you for it.

We cannot tell why God has seen fit to send such a calamity to this land, but we do hope and pray that out of the ash a greater Japan may arise, that Christians in Japan may not lose faith, but rather their faith may be made stronger through suffering; and that we may be prepared to meet the greater opportunities for service that must necessarily come to us as a result of the disaster. It may not be just the work we planned, but God's plans are greater than ours. May we have the prayers of the church at home during this great crisis.

Sincerely yours,
RUTH A. PARKER

SINGER FEARS A NEW WAR

Returning from Europe on the S. S. "FRANCE," Florence Schacter, vice-president of the Singer Sewing Machine Company, says that there exists the bitterest feeling in France towards England over the Ruhr question and reparations in general, and that the increasing friction may at any moment provide the spark to set Europe ablaze again.

WOULD FORCE AMERICAN PULP MILLS TO LOCATE IN N. B.

Enforcement of Embargo on Pulpwood Would Mean Pulp and Paper Mills Here.

During the hearing before the Pulpwood Commission held recently by Sheldon E. Wardwell, Brookline, Mass., attorney and stockholder in the St. Croix Paper Company, Woodland, Me., said the company employs about 750 men and seasonally as high as 2,000 men. It owned about 176,000 acres in New Brunswick. The company operates its own lands in Canada. If an embargo shut the company from its lands here the company would operate its ground wood mill until worn out and

Then Would Erect a Mill on This Side
Last year \$546,000 were spent in Canada and \$100,000 in freight rates. An embargo would be very unfortunate and he hoped it would not be imposed.

To the chairman he said the operating of a ground wood mill would not result in a greater employment of men in New Brunswick than at the present time.

W. B. Wentworth, Oshkosh, Me., of the Chemical Fibre Company, said his company purchased about 8,000 cords a year of spruce and poplar from New Brunswick. In addition there was a little land the company had in Charlotte county. In addition the company had a permit to cut 25,000 cords in the province in the next five years. There was an obligation of \$50,000 in stumpage to be paid and he did not know what could be done if there was an embargo. Since 1915 the company had spent in the province about \$1,100,000 for farm-wood. The sum of \$250,000 had been spent in labor, \$500,000 to \$900,000 had been spent on freight.

To the commission, he said that at the end of five years he would have no more interest in the land mentioned. In five years there would be taken off about 45,000 cords. People were also crying for fuel while old railroad ties were being burned. Men were getting high

SAW SOMETHING OF PRIMITIVE CANADA

Log Houses and Real Indians Seen By Lloyd George On His Western Trip.

On a 1,400-mile jump from Niagara Falls to Winnipeg, Lloyd George, the war-time premier of Great Britain, in his tour of Canada, went through a region but little removed from the primitive wilderness. Passing on his special train to the north of Lake Superior, he made a few stops at isolated points where the log house is still used and where big game is plentiful. At Hudson company points, there was a little land the company had in silent lines beside the train. In addition the company had a permit to cut 25,000 cords in the province in the next five years. There was an obligation of \$50,000 in stumpage to be paid and he did not know what could be done if there was an embargo. Since 1915 the company had spent in the province about \$1,100,000 for farm-wood. The sum of \$250,000 had been spent in labor, \$500,000 to \$900,000 had been spent on freight.

To the commission, he said that at the end of five years he would have no more interest in the land mentioned. In five years there would be taken off about 45,000 cords. People were also crying for fuel while old railroad ties were being burned. Men were getting high

MAN KILLED IN HIGHWAY ACCIDENT AT ANNUET, QUEBEC
Three Others Injured When Motor Car Was Crashed

Angel, Madawaska County, Quebec, Oct. 22.—Our man was killed here, two crushed skulls and a fourth only other injuries, when an automobile struck a carriage in which the victims were riding yesterday.

Antonio Follis, 16 years of age, son of Napoleon Follis, J. Lapointe and J. Lapointe, two brothers, and Gerald Jans, 16, were driving on the main road in a four wheel driven vehicle when an automobile driven by E. E. Burnier crashed into their wagon. Antonio Follis died while being rushed to the office of a physician nearby.

Milk As a Factor In Feeding The Flocks

That thousands of pounds of skim-milk, buttermilk and other dairy products are thrown away every year in this country is a constant reproach against the dairy industry for permitting the continuance of such waste.

In a trip he made to New Hampshire a few months ago, Professor J. G. Halpin of the Wisconsin college of agriculture, was impressed with the prosperity of farm after farm, in which poultry was kept in large numbers.

He found that almost without exception these farmers were feeding skim-milk buttermilk to their flocks, cheerfully paying the high freight rates from the middle western states for this partially evaporated buttermilk. It was mostly fed at the rate of one pound of the condensed to 100 pounds of live weight in poultry.

It is Professor Halpin's conclusion that the dairy industry should consume or dry more milk products than it does. He fed to livestock, including poultry, or else feed more directly upon the farm. It is his suggestion that dairy farmers invest in the possibilities in a flock of poultry as a profitable sideline, so that surplus milk may be fed to the flocks.

In parts of northern Wisconsin, where the pressure of taxation is particularly heavy, hundreds of farmers would have had to give up but for their hens. Professor Halpin reported. In his own county of Washburn, where dairy farming is carried on at an unusually intensive scale, only a number of the farmers are finding that they can get an income of about \$1,500 a year from a flock of 200 hens. Skim milk in the ration helps increase the profits.

Where there is only a small flock, it is the reason not only of the ration of the laying hens in summer, but in winter, and when chicks are grown in large lots in confinement, such as is necessary if early hatched pullets are to be developed for the winter market, the ration is of extreme importance.

In order to determine not only the part that milk should play in the chick's ration under such conditions, but also to determine what other feeds are needed, Professor Halpin, in cooperation with Professor R. E. Harvey of the agricultural chemistry department, conducted a long series of experiments. These experiments were intended to determine not only the part of the ration, but also to determine what other feeds are needed. Professor Halpin, in cooperation with Professor R. E. Harvey of the agricultural chemistry department, conducted a long series of experiments. These experiments were intended to determine not only the part of the ration, but also to determine what other feeds are needed.

PRIZE WINNERS IN COMPETITION

Good Showing Made by Restigouche Farmers in Field Crop Competition.

Following is the list of prize winners in the Restigouche County 1923 Field Crop Competition:

Potatoes
1st.—D. G. Stewart, Dalhousie, 100.
2nd.—P. E. McNair, River Charles, 95.
3rd.—Dan Hamilton, River Charles, 90.
4th.—Peter Fraser, Charlo, 85.
5th.—A. W. Boucher, Charlo Station, 80.
6th.—J. E. McPherson, River Charles, 75.
7th.—Alex. Giroux, Charlo Station, 70.
8th.—Jas. McNeish, Point St. Nino, 65.
9th.—Arthur Calligan, Colligan, 60.
10th.—Jas. Arsenau, Charlo Station, 55.
11th.—J. T. Hamilton, River Charles, 50.
12th.—Dan M. Currie, Bellefleur, 45.
13th.—D. W. Henderson, Charlo, 40.
14th.—Chas. Chalmers, Charlo Station, 35.
15th.—J. E. McPherson, Charlo, 30.
16th.—John T. Hamilton, River Charles, 25.
17th.—A. W. Boucher, Charlo Station, 20.
18th.—Thos. Hayes, Nash's Creek, 15.
19th.—Arthur Calligan, Colligan, 10.
20th.—D. W. Henderson, Charlo, 5.

Oats
1st.—J. E. McPherson, Charlo, 95.
2nd.—John T. Hamilton, River Charles, 90.

Storing Winter Vegetables

The frostproof pit for storing vegetables should always be placed in as well-drained a place as possible. A shallow excavation should be made from one to two feet deep, four feet wide and as long as desired. Line the pit with straw, hay or leaves, then place the vegetables in a conical pile on the straw. Cover the vegetables with inches of material used in making the lining. This is covered with three or four inches of earth. The straw is allowed to extend up through the earth at the top of the pit, thus assuring ventilation.

When it becomes colder, add more cover to the pit by another layer of straw and a layer of earth. In very cold climates a layer of manure or corncobs will afford protection against frost.

This form of storage is used for beets, carrots, cabbage, parsnips, parsley, vegetable celer, horse-radish and salad.

It is well to make several small pits, each containing a variety of vegetables, rather than one large one for the reason that one pit has been once opened it is difficult to protect the remaining vegetables from frost.

If the smaller pits are used you can take out all the vegetables in the pit and those that are not needed for immediate consumption can be placed in the cellar storage room, or other cool place, until needed. Do not use these pits if you live where winter rains abound as the pits will become waterlogged and the vegetables will suffer more or less decay.

Outdoor cellar or cave storage may be built in any place, but for temporary use, or may be built very expensively of concrete, brick or clay blocks. Of course, the latter are permanent storage places and are not perfect storage for potatoes, carrots, cabbage, parsnips, beets, turnips and salad.

The outdoor cellar or cave is an underground structure, preferably built in a hillside and fully covered with earth, except at one end, where the entrance is located. The cave door should fit perfectly and the cave should be a hatchway or door over the entrance leading down to the cellar.

A very satisfactory, inexpensive cellar can be made by digging an excavation about five feet deep and in this erecting a frame by setting posts in rows near the dirt walls. Saw these posts off at uniform height and place plates on the top. On these plates place rafters. Board completely with the exception of the entrance. Cover the whole with dirt or rock, and in cold climates add a layer of straw or fodder.

A ventilator must be provided in the roof at the back end. A sewer tile with a drain tie to carry it off very good flue. A dirt floor is best as it contains moisture. If there is any seepage use a drain tie to carry it off.

The most pretentious permanent cellars are provided with air spaces to furnish fresh air and have large ventilation shafts through the roof and cold air intakes under the floor. Thorodol is obtained by placing a line of the round the outside, wall and also having the air intake serve as a drain for surplus water that might get in the cave.

The floor is cement or concrete. Such a cave is expensive but is a permanent structure and a good addition to any farm or estate. If properly made it is possible to maintain a temperature of thirty-four to thirty-six degrees without a very dry situation during the winter months. This kind of storage is not only adapted for vegetables but apples as well. When making the cave have it as near as possible to the kitchen door. Sometimes they are made so that they can be entered from the house, cellar or porch. The attic is much better for storing onions than the basement. Squashes are susceptible to cold and moisture, so are suitable for the attic or a warm room. Be very careful in handling the squashes to prevent breaking the stems off. Watch pumpkins and squash carefully, and at the first sign of decay use immediately or can.

Sand boxes in cellars, pits or caves are desirable for beets, turnips, kohlrabi, carrots, winter radishes, and rutabagas. The sand keeps them cold and prevents rotting. Kohl-rabi should be tender when stored.

Where there is no attic or where it is inconveniently reached, the products that are subjected to a very dry place can be stored on the pantry shelves or in a dry cellar near the furnace. They are onions, squashes, pumpkins and sweet potatoes.

The keeping qualities of all these vegetables, no matter what storage is used, depend chiefly upon their condition when placed in storage. All products to be stored must be mature but not overgrown. All vegetables should be washed and dried before placing them in storage.

White or Irish potatoes especially should not be exposed to bright sunlight any length of time. Only vegetables free from disease or injury should be stored. Any that are diseased or injured should be destroyed.

Alberta, according to the last government agricultural report, has 400,000 dairy cows, valued at approximately \$10,000,000. The product of these cows last year was worth \$25,000,000, or \$4,000,000 more than their own value.

NO CHANGE IN CANADIAN WINTER

While Glaciers Are Retreating Northward and North Growing Warmer is Claimed.

Canadians need hope for no great change in the character of the Canadian winter.

It may be true, as Dr. C. D. Walcott, the eminent American geologist says, that the glaciers in the Arctic are retreating northward and the far north is growing slowly but gradually warmer.

But that does not mean any direct change in the nature of our winter, said Sir Frederick Stupart, director of the Toronto Meteorological bureau, in discussing the matter to-day.

"It is undoubtedly true that the glaciers are retreating," he went on, "they have been doing so for some years. But whether it is a long period movement or not, we are not prepared to say. Some of these movements last hundreds of years."

"But I am convinced that it will work no great change in the character of the Canadian winter," prophesied Sir Frederick. "It will not be felt here to any extent."

"Will it be reflected only in the far north?"

"Yes, it may have an influence on the weather in the far north, but there will be little difference in this part of Canada."

RESTIGOUCHE MAN HONORED

Sutherland Organization Arranges Social Event for Retiring Member.

Saskatoon, Sask., Oct. 11.—Mr. N. Hamilton, who has recently retired after 41 years of service with the Canadian Pacific Railway, and who for the past 11 years has been General yardmaster over the Saskatoon yards, was the guest of honor at a social gathering arranged by the Brotherhood of Railway Trainmen in the Oddfellows' Hall, Sutherland, on Friday evening. The following program was prepared by the Ladies' Auxiliary of the brotherhood. Mr. J. Patterson occupied the chair.

Address: Mr. Patterson (on behalf of the Brotherhood of Railway Trainmen); solo, Mrs. Parsons; address, Mr. Fletcher (on behalf of the Brotherhood of Loco. Engineers); duet, Mrs. Barber and Mrs. Magson; address, Mr. Greenway (freight department); solo, Mrs. Webster; address, Mr. Cordingley, chief dispatcher (on behalf of the dispatchers); solo, Mr. Scarratt; address, Mr. Jackson, acting general yardmaster; solo, Mr. Jones; address, Mr. McKay, superintendent, Mr. McKay spoke of Mr. Hamilton's connection with the Canadian Pacific Railway, pointing out that Mr. Hamilton joined the service just one year after the incorporation of the company, and helped to build the wonderful organization which makes the Canadian Pacific the pioneer railroad of the continent. Mr. McKay on behalf of the employees of Saskatoon and Sutherland terminals presented Mr. Hamilton with a purse of gold.

Mrs. Hamilton was also presented with a beautiful bouquet by Mrs. Oliver on behalf of the Ladies' Auxiliary.

Supper was served by the auxiliary and dancing followed.

The Brotherhood of Railway Trainmen wish to thank all those who assisted with the affair. Mr. Nathan Hamilton was born at River Charles in the year 1857, leaving for the west forty-four years ago and has resided in Saskatoon for the past thirteen years.

Inherent Possibilities. Customer—I like that umbrella stand, but I don't think it is worth \$3.00. Salesman—Why, madam, the very first umbrella that is left on it will be worth more than that.

Established 60 Years

Our Dairy Output

While the production of cheese has decreased in Canada during the present century, the making of creamery butter and of condensed milk products has greatly increased. In 1900 the production of cheese in this country was 220,820 pounds; in 1922 it was 124,530,023 pounds. In the first year of the century, 35,000,720 pounds of creamery butter was produced; last year the production amounted to 146,928,517 pounds. In 1910 the condensed milk products amounted in value to \$2,000,000; last year they reached \$7,330,022. The butter output of the Prairie Provinces in the present year is estimated to be 1,000,000,000 pounds.

MOTHER OF LARGE FAMILY

Recommends Lydia E. Pinkham's Vegetable Compound to Other Mothers

Hanford, N. B.—"I am the mother of four children and I was so weak after my last baby came that I could not do my work and suffered for months until a friend induced me to try Lydia E. Pinkham's Vegetable Compound. Since taking the Vegetable Compound my weakness has left me and the pain in my back has gone. I tell all my friends who are troubled with female weakness to take Lydia E. Pinkham's Vegetable Compound, for I think it is the best medicine ever sold. You may advertise my letter."—Mrs. GEORGE I. CAUSAN, Hanford, N. B.

My First Child

Glen Allen, Ala.—"I have been greatly benefited by taking Lydia E. Pinkham's Vegetable Compound for bearing-down feelings and pains. I was troubled in this way for nearly four years following the birth of my first child, and at times could hardly stand on my feet. A neighbor recommended the Vegetable Compound to me after I had taken doctor's medicines without much benefit. It has relieved my pains and gives me strength. I recommend it and give you permission to use my testimonial letter."—Mrs. IDA EYB, Glen Allen, Ala.

Women who suffer should write to the Lydia E. Pinkham Medicine Co., Oubourg, Ontario, for a free copy of Lydia E. Pinkham's Private Test-Book, upon "Allments Peculiar to Women."

True to Life

"The story," explained the author, "departs from the conventional view in its random phrases." "That's interesting," said the editor. "For instance, my lovers, conventionally would marry and live happily ever after." But I have them marry and live with her father until he gets a job.

Sad Confession

Crabshaw—"What's all the trouble?" Mrs. Crabshaw—"That woman who just moved into the next apartment and put on such a style came to borrow our vacuum cleaner, and I had to admit that we didn't own one."

Maritime Life Assurance Company, Halifax, N. S.

Depression Proof:

Every policy holder is familiar with the fact that recent depression did not halt the steady upward swing of life assurance business, that in fat years and lean the number of policies placed increases with corresponding increase in the profits of the company.

Their uniform and unexampled success is based upon the fact that life assurance business is the most scientifically conducted in the world.

For premiums are calculated on actuarial tables established through centuries of experience, tables that give a known margin over mortality.

Coupled with this is the steady intensifying desire on the part of the public for life assurance—a desire particularly to be noted in the Maritime Provinces where annual premiums to outside companies now reach more than \$10,000,000.

Based upon consideration these factors, outstanding business men of the Province have organized The Maritime Life Assurance Company. Other business men in every section of the Province are associating with them as shareholders in the most promising enterprise launched here in a decade.

To fully appreciate why these men of trained business judgment and conservative temperament believe in The Maritime Life, send for informing prospectus, using this coupon or your letter head.

Of Interest to Women

Bewails Conduct Of Cigarette-Smoking American Girl

New York, Oct. 16.—Dr. John Housch Straton has no intention of letting up on New York just because he has discovered that European cities are worse. New York will continue to receive all the chastisement that she needs and when she needs it, for Dr. Straton loves his city and will do all that he can to save it from the painted, cigarette-smoking, dog-loving women that are dragging it down to ruin.

Fish Facts That Every Good Cook Should Know

The economic value of fish is of the utmost importance to the home provider who is interested in making the budget reach as far as possible in feeding the family. There are excellent books on the subject with available markets for practical study where fishermen are always glad to help those who really want to know.

Getting Worse, He Moans

"New York seems to be getting worse and worse all the time," he sadly said yesterday afternoon at his new home at 62 East Seventy-seventh street, "but I love her and I shall not cease to rebuke her for her follies, for she is several million miles yet from Christian ideals."

"Berlin I found to be the worst city in Europe. Somehow, it was worse than Paris, which has always seemed the apex of wickedness. But the French manage to make vice articles, while with the Germans it is gross. In London, which is ponderous and heavy, but it is on the way to being a virtuous, not virtuous, that holds London back."

"The drinking and smoking among European women shocked me profoundly, or, accustomed as I am to cigarette smoking among New York girls, I had never seen it so prevalent in public. And I was shocked that I never saw girls actually taking their fish out of their lips in public. They fish-buyer got to chatting with a good many of the women. They asked it off with the soup and were obliged to make up again between courses."

Criticizes Society Girls

"A visit to London is the best lesson in prohibition for a worried American. There you see the women and little girls drinking into the beer shops with their buckets and drinking side by side with the men. You see women on the streets, not actually drinking, but holding a glass of such cases—but mellow, bleary-eyed and sloshy."

It is not the bootlegger, but the cigarette-smoking, dog-kissing woman, however, whom Dr. Straton finds the greatest menace in New York this autumn.

"I came back on the Berengaria, where fish products are sold fresh from the boat of the wharf," he said, "and there I saw a girl who walked up to photograph me as an example of the degenerate modern so-called society girl. Bobbed-hair, lead-mannered, utterly careless as to the position of her lower limbs, she held in her left arm one of those libels on the name of dog, kissing its nose and mouth and staring at me with a cigarette which she held in the other hand. She didn't know how to blush, and, if she did, it couldn't have been for the pain."

Such a girl, said Dr. Straton, is a menace not for herself alone but because other girls—high school girls—ape her manners and imitate her morals.

Two New Recipes

Rich Fruit Cake. 1 1/2 cups shortening, 2 cups sugar, 4 cups flour, 6 eggs, 1/2 pound blanched and chopped almonds, 1 pound currants, 1/4 pound English walnuts, broken in small pieces, 1 teaspoon salt, 1/2 pound stoned and chopped dates, 1/2 pound Sun Maid seedless raisins, 1/2 pound glacé cherries, 1 teaspoon baking powder, 1 cup New Orleans molasses, 1/2 cup cold black coffee, 1 teaspoon grated nutmeg, 2 teaspoons powdered cinnamon, 1 teaspoon powdered cloves. Cream shortening and sugar together, add eggs, well beaten, beat five minutes, then add coffee, soda mixed with molasses, flour, sifted with salt and spices. Now add raisins, currants, dates, cherries cut in halves, and nuts. Mix carefully and turn into greased and papered tin and bake in moderate oven two and a half hours. Sufficient for one large cake.

Baked Bananas With Saltana Sauce

1/2 cup Sun Maid Saltana raisins, 1 cup boiling water, 1 egg yolk, 1 teaspoon butter, 1 teaspoon vanilla, 5 bananas. Pull down a section of the banana peel, remove the fruit to the original position in the peel, cut the bananas in a regular pattern, into the oven and cook until the peel is blackened and the pulp is soft (about 20 minutes in a moderate oven). Cook the cleaned raisins in the boiling water adding water as needed, salt and sift the sugar and cornstarch and add the raisins, fill until boiling then let simmer for ten minutes, and add butter and flavoring. Remove bananas from the peel to hot plates, pour the sauce over them and serve at once.

Of Interest to Women

The economic value of fish is of the utmost importance to the home provider who is interested in making the budget reach as far as possible in feeding the family. There are excellent books on the subject with available markets for practical study where fishermen are always glad to help those who really want to know.

Anybody who reads that Fifty-seventh Street's Thunderer, on returning from Europe, had found little old New York to be a fairly decent place (by comparison) and thought that his Sunday preachments against the theatre, dance hall and bootlegger were to be abandoned doesn't know Dr. Straton.

We have eaten expensive foods in quantity for too long to make it easy for us to give them up without a struggle, even to advance our own interests. Allowing that fish is troublesome to prepare and cook economically, it is well worth the trouble as a matter of economy. During war stress we learned to do without certain varieties of food and to substitute others, and we found that to do so was extremely difficult.

Let us make a study of the fish in the waters about us and learn when they are to be found in the greatest quantities. We should learn how to select fish, how to keep it, and above all how to cook it in the right way and serve it properly.

Frozen fish when caught and sent to the freezer is an excellent product. It is that which is frozen, thawed, then frozen again that has given fish a bad reputation. Let the fish-buyer get to chatting with a good many of the women. They asked it off with the soup and were obliged to make up again between courses.

Gets Shock in London

"A visit to London is the best lesson in prohibition for a worried American. There you see the women and little girls drinking into the beer shops with their buckets and drinking side by side with the men. You see women on the streets, not actually drinking, but holding a glass of such cases—but mellow, bleary-eyed and sloshy."

It is not the bootlegger, but the cigarette-smoking, dog-kissing woman, however, whom Dr. Straton finds the greatest menace in New York this autumn.

"I came back on the Berengaria, where fish products are sold fresh from the boat of the wharf," he said, "and there I saw a girl who walked up to photograph me as an example of the degenerate modern so-called society girl. Bobbed-hair, lead-mannered, utterly careless as to the position of her lower limbs, she held in her left arm one of those libels on the name of dog, kissing its nose and mouth and staring at me with a cigarette which she held in the other hand. She didn't know how to blush, and, if she did, it couldn't have been for the pain."

Such a girl, said Dr. Straton, is a menace not for herself alone but because other girls—high school girls—ape her manners and imitate her morals.

Their uniform and unexampled success is based upon the fact that life assurance business is the most scientifically conducted in the world.

For premiums are calculated on actuarial tables established through centuries of experience, tables that give a known margin over mortality.

Coupled with this is the steady intensifying desire on the part of the public for life assurance—a desire particularly to be noted in the Maritime Provinces where annual premiums to outside companies now reach more than \$10,000,000.

100 or more beds

General Public Hospital, St. John 50 to 100 beds

Chipman Memorial Hospital, St. John

Hotel Dieu, Campbellton

Miramichi Hospital, Newcastle

Moncton Hospital, Moncton

St. John's Infirmary, St. John

Restigouche and Bay of Chaleur Soldiers' Memorial Hospital, Campbellton

Victoria Public Hospital, Fredericton

The asterisk indicates that certain hospitals have accepted the requirements which result in the best scientific care of patients but have not been included in the list because of space reasons.

General hospitals of fifty beds and over on the approved list have met the following requirements: proper professional organization; satisfactory medical care; adequate laboratory and X-ray facilities; and the enforcement of a ruling which prevents surgeons who carry on the perilous and laborious practice of self-splitting operating within the hospital. M. T. MacEachern, M. D., in charge of hospital activities for the College, in addressing the hospital meeting today said, "This is the greatest hospital movement the world has ever seen or perhaps ever will see. It strikes right at the root of things that have a vital bearing on human life. It is a movement destined to lessen the number of days stay of patients in the hospital through better service—to reduce complications and infections to a minimum through better supervision—to lessen incompetent and unnecessary surgery through better diagnostic facilities, more consultations, and closer check-up—and, finally, greatest of all, to lessen the hospital death rate. These things are notable in standardized hospitals. What a great thing it is

Not to Be Compared

Ralph, aged 17, was afflicted with carbuncle and screamed frantically with pain. "Flash," said the mother, "don't cry so, it only makes it worse. Don't you remember how 'Flash' baby brother behaved when he had the carbuncle? He didn't wail or half as much as you do. He was just making."

"What does the kid know 'bout carbuncles?" asked Ralph. "He can't see 'em, can he?"

Gold Completely Cured

Most colds are the result of a weakened condition of the system. Nothing will undermine your health so quickly as a cold. More consumption results from neglected colds than any other source. When you notice a cold developing build up your system. The most effective way to do this is to take a tonic—Carbol. Mr. Harry Heller, of Regina, cured a cold of two months' standing by taking Carbol. Read what he says:

"After having used two bottles of your Carbol, I find that it has completely removed my cold from which I have suffered since the first week of December last. All other remedies have been failures and I strongly recommend to others who have been suffering from a similar ailment, to try a bottle of your Carbol and I am sure they will regret such a purchase."—Harry Heller, 2125 Broad St., Regina, Sask.

Mr. Heller suggests trying a bottle, but to get the full benefits of this wonderful preparation, you should take a Course of Carbol.

Carbol is sold by all good druggists everywhere.

A Warm Home

Is your house supposed to be "hard to heat"? Is the dining room or bath room or some corner room "always freezing cold"? Do you dread winter because so much of the house can't be heated properly? Don't you long for a furnace that will heat the entire house evenly with clean, humidified air that circulates freely in every room?

Findlay's pipe and pipeless FURNACES

will do this. WHY? Because we install a Findlay Furnace only after we have consulted the heating experts at the Findlay foundries and have designed a complete heating system for your individual home, based on the size and location of every room in the house.

We guarantee to heat your home as you want it heated—and we know that a Findlay Furnace will do it with far less fuel consumption than at present.

There are eight different types, or designs, as well as many different sizes in the Findlay Furnace Family—each one made to meet a specific need.

Whether you burn hard or soft coal or wood, we can give you a choice of pipe and pipeless furnaces which will exactly suit your particular requirements.

And, most important of all, we offer you absolutely free of charge, the services of the best heating experts in the business. The services of Carlton Price, one of the leading heating engineers in the province, will give you a complete plan of heating for your home.

Call and see our new line of booklets and Service Sheets.

MID-OCTOBER
Continued evidence of the top-
turviness of the season—if such a
term is permissible—keeps pouring
into the office of The Evening Times
almost daily. This morning there ar-
rived a cluster of apple blossoms,
fresh and fragrant as those which us-
ually appear on the first Sunday in
June, picked today from trees on the
grounds of H. W. Schofield, Rothsay.

MOOSE ACTS AS
HOLD-UP MAN

Clears Up Mystery of Wire
Across Miramichi Road Re-
ported Last Week.
The "wild" trick of stretching
a wire across the Miramichi Road at
a point about two miles this side of
the Depot Camp last Sunday evening
an act which frightened a passing
motor party so badly that they turned
about to avoid the place, turns out to
be the work of a moose, and not the
sort of a hold-up highwayman as
depicted in the moving pictures of
western life. It appears that the
telephone wire connecting the Depot
Camp with Bathurst was knocked off
by a couple of poles "a moose" show
and was lying close to the ground. A
big moose hurrying away from the
scene had stepped on the wire and in
his frantic efforts to disengage him-
self, pulled the wire completely off
the poles and stretched it across the
road. The automobile broke the
wire and thus released the animal as
well as themselves from what appeared
to be an awkward predicament. The
auto party did not of course use
the device, and the moose was not
trouble to go back to explain to them
that no hold-up was intended. He
left his tracks so plainly however,
that the incident was easily explained
to the Bathurst Light.

ALL PROVINCES ARE EXPECTED TO
IMPOSE TAXES UPON GASOLINE

Victoria, B. C., Oct. 19.—The pro-
vincial governments will introduce an
amendment to the Taxation Act at
the next session of the legislature
providing for the collection of a tax
on gasoline amounting to not more
than three cents a gallon, it was an-
nounced here yesterday by Hon. W.
H. Sutherland, Minister of Public
Works.
Gasoline used in farming and in the
operation of the Amvets, gasoline
sales and fishing boats will be ex-
empt from taxation.
"We haven't decided anything yet,"
was Premier Venko's reply when he
was asked this-morning whether New
Brunswick would also have a tax on
gasoline.

WAKENS TO RICHES
IN POORHOUSE

Pauper to Share Settlement
Of \$5,000,000
Estate.
Bloomburg, Pa., Oct. 23.—Last
night James Henderson, aged 65,
went to bed in the almshouse of the
Bloomburg poor district, a homeless
pauper. This morning he woke to
find himself a comparatively rich
man.
That's fine—guess I will have to
leave here now, but I'll wait until I
get the money," he said when in-
formed that as one of the cousins con-
testing the will of Mrs. Abigail A. Geis-
inger of Danville, he would benefit
from the settlement of the case out
of court.
Henderson did not know the
amount he would receive, but said he
would be glad of anything.
"I really didn't think much about
it," he said. "Of course, they have
treated me good here and I won't
forget that but it will be mighty good
to have some place of my own to
go and know that I don't have to
depend on anybody else for a while, any-
way. I don't know just how much
I will get but it will be enough. I
haven't got the money yet and I will
build a few little arcades while I
am waiting for it. What I do with
it will depend on how much there is,
and I will decide that when the money
comes."
Henderson, a first cousin, had
been cut off without a cent in the will
which left an estate valued at
\$2,000,000 to \$5,000,000, principally to
the Geisinger Hospital and the Geis-
inger Home for Friendless Women in
Danville. With three other cousins,
William Panoost, of Republic, Ohio;
Clara P. Merrill, executrix of Colinda
Runyon, and Ida Sharpless, adminis-
tratrix of Henry C. Patterson of Mar-
ion, Ohio. He started a contest of
the will.

TWO HOUSES BURNT
AT BATHURST

Occupants of One Home Aroused
From Sleep—Make Hasty
Exit.
Bathurst, Oct. 22.—After several
months of freedom from fire, Bath-
urst, broke its encouraging record on
Friday morning, when an alarm about
a o'clock brought out the firemen to
blaze in Fred Chamberlain's house
at the corner of Murray and Munroe
streets. The fire was making great
headway when the firemen arrived
and, with their usual despatch, stop-
ped its advance. The all of the house
was practically ruined by fire and
water, and the main part of the house
suffered severely from smoke and
water.

DEATH OF A
DARLING HEROINE

The amazing story of "The
Wonderful Heroine" in the Family
Herald and Weekly Star of Mon-
day, is creating intense interest in
every part of Canada. "The Wonder-
ful Heroine" is a young and lovely
woman of tragic history whose pic-
ture in colors is being given free to
members of the Family Herald and
Weekly Star. A subscription of two
dollars is little enough to pay for a
whole year's subscription to this
greatest of all farm and family
journals, and with a magnificent pic-
ture thrown in, the value is super-
lative.

OBITUARY
Alexander Calk Ferguson
On September 26th there passed
peacefully away one of the best
known residents of Dalhousie Junction
in the person of Alexander Calk Fer-
guson, after a short illness. Decas-
ed had a stroke of paralysis about
six weeks ago and was taken to the
Soldiers' Memorial Hospital for treat-
ment and shortly before his death he
was removed to his own home, but in
the "silent watches" of the night, the
summons came for him to leave his
earthly abode, for the Heavenly Man-
sions. A very large circle of friends
and relatives assembled on Saturday
afternoon at the deceased's late home,
where the funeral service was con-
ducted by the Rev. E. J. Shaw. The
favorite hymns were sung by "Safe
in the Arms of Jesus" and "The Lord
is My Shepherd" the pall-bearers
were Robert McIntosh, William Mc-
Lester, George McNeil, William Mc-
Curdy, James McCurdy and James
McNeil.

ANDREW'S Clothing Store

THE STORE WHERE QUALITY AS WELL AS PRICE DETERMINES VALUES

The Economy of Quality

When You Purchase Merchandise of any kind are Your Selections Governed by Price and Style alone, or do You Consider Quality. The True Economist looks for Quality First, then Style, and Lastly Price. Quality although Costing More at First is Always Good Economy, Because it looks Better, and Lasts Longer than Cheapness—Quality Remains long after price is Forgotten—on the other hand, Cheapness is Always Expensive.

Look First to Quality—if You are Purchasing Wearing Apparel, Examine the Workmanship—the Stitching, the Button Holes, the Finish—Look for Quality in Workmanship as well as in Material.

This Store Places Quality First in all of its Selections. We have Proven this to be the only Safe Policy. We know that only by Maintaining Right Quality Standards can we give you really Satisfactory Merchandise.

WESTERN TRAINS DELAYED BY SNOW

Drifts Fill Cuts To Depth of Four Feet—Flows Needed.

Cobalt, Ont., Oct. 22.—The season's first interruption to railway traffic by snow was reported Saturday night when the Montreal-bound Continental Limited passed through here nearly two hours behind schedule.

The delay was caused by snow drifts in the cuts between Hearst and Grant, west of Cochrane, according to passengers.

It was stated that in the section affected eight inches of snow fell on the level and this, driven before a strong gale had filled up the cuts to a depth of between three and four feet.

Sudbury, Oct. 22.—A special despatch from Horne Payne, Ont., along the line of the Canadian National Railway dated Saturday night, reports over two feet of snow and a regular blizzard, with heavy snow, far in progress.

An inch of snow fell in this district in the early hours of yesterday, but disappeared soon after daylight.

There was a snow fall yesterday along the main line of the C. P. R. in the Chapeau-White River district, the latter reporting 11 inches. Canadian National divisional offices at Capreol last night reported no snow along Toronto division south and east of Pelee. Snowploughs were out on the Canadian National, but all trains were running on scheduled time up to 8 o'clock last night.

LUMBER SHIPMENTS DURING SUMMER

(Continued from page 1)

ft. long lumber, Rosario, Argentine Republic; Lorents W. Hansen, Norwegian, 1110 tons, 1,960,124 ft. long lumber, Glasgow, Scotland; S. S. Darholm, Norwegian, 2330 tons, 2,605,129 ft. long spent by all.

POPPIE DAY, NOV. 16TH.

Poppy Day will be observed here again this year. The day set aside this year falls on Saturday, November 16th, owing to the fact that Armistice Day comes on Sunday. Poppies made by returned soldiers will be sold under the auspices of the local Red Cross Society which is rapidly identifying itself in various phases of social community work. It is to be hoped that all will co-operate on Poppy Day and make the undertaking the success it's nature warrants.

FORMER LOCAL MAN

Jack Burke, originally of Stanley, York County, formerly a resident of Campbellton and known to the show world as J. H. Barry, is now the owner of Campbell Brothers Railroad Circus, one of the best known railroad circuses in the United States, and expects to bring it down East at some not too distant date. This information had been received by Robert H. Winters, of Fredericton, in a letter from Mr. Burke, who has kept up correspondence with him ever since Mr. Winters acted as his treasurer and ticket seller when he first embarked in the show business. For some years Jack Burke was located in Campbellton as a boxer and instructor in physical culture and he has still many friends here who have watched his career with much interest.

When Wife Smiles.

Every married man knows one woman who by some extraordinary and incomprehensible mischance was women, and he mentions the fact around home, if he is a good husband and a diplomat.

The home of Mr. and Mrs. Frank Blackhall was the scene of a most enjoyable social gathering on Friday evening last when the student of the Académie, Mr. X. called on his son Mowat and tendered him a surprise party. Mowat made a genial and thoughtful host and a most pleasant evening was had, 2330 tons, 2,605,129 ft. long spent by all.

Winter Coats
