What is meant by "income" under the bill is it a man's net or gross income, all the crypense connected with his income in-cluded, or only his personal argonuse? Another object that should be aimed at in a bill of this kind was to tax the incomes derived from the big estates, such as the Consolly and Lefurgey estates. Again, there are corporate bodies who have in comes, and there should be a provision in the bill to tax them. Another question is the reacting of a limit. In 1898 the city of Charlottotown fince an incomes tax on \$400, and under the proposed set it is placed at \$600. Now, what is the average income of the farmer and other Classe? A commission of enquiry in the United States shows the average informe \$300, and the articular a \$300.
