

MRS. MABEN WAS MADE WELL

By Lydia E. Pinkham's Vegetable Compound and Wants Other Suffering Women To Know It.

Murfreesboro, Tenn. - "I have wanted to write to you for a long time to tell you what your wonderful remedies have done for me. I was a sufferer from female weakness and displacement and I would have such tired, worn out feelings, sick headaches and dizzy spells. Doctors did me no good so I tried the Lydia E. Pinkham Remedies - Vegetable Compound and Sanative Wash. I am now well and strong and can do all my own work. I owe it all to Lydia E. Pinkham's Vegetable Compound and want other suffering women to know about it." - Mrs. H. E. MABEN, 211 S. Spring, St., Murfreesboro, Tenn.

This famous remedy, the medicinal ingredients of which are derived from native roots and herbs, has for nearly forty years proved to be a most valuable tonic and invigorator of the female organism. Women everywhere bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable Compound.

Why Lose Hope. No woman suffering from any form of female troubles should lose hope until she has given Lydia E. Pinkham's Vegetable Compound a fair trial.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

Guide-Advocate WATFORD, JANUARY 29, 1915.

The Case of De Wet

General De Wet, the South African rebel leader, has been captured by the efficient forces led by General Botha, and is now in safe keeping. The ease with which De Wet and the remnant of his forces were taken suggests the unimportance of the insurrection in South Africa.

An old woman from the remote highlands was taken to Edinburgh, and heard modern singing in a church for the first time. She was asked by the friend who took her what she thought of the music. "It's verra bonny, verra bonny; but, oh, it's an awfu' way of spending the Sabbath."

Indians Growing Fewer

That Canada's Indian population is growing smaller year by year is indicated by the annual report of the Department of Indian Affairs.

would be a good first citizen in the new colony of St. Helena, where the Kaiser is expected to take up residence at some future date.

"Utopia or Hell"

In an article written for the Independent, Colonel Roosevelt says, under the caption, "Utopia or Hell": "To violate these conventions, to violate neutrality treaties, as Germany has done in the case of Belgium, is a dreadful thing. It represents the gravest kind of international wrong-doing, but it is really not quite so contemptible, it does not show so shortsighted and timid inefficiency, and above all such selfish indifference to the cause of permanent and righteous peace, as has been shown by the United States (thanks to President Wilson and Secretary Bryan) in refusing to fulfill its solemn obligations by taking whatever action was necessary in order to clear our skirts from the guilt of tame acquiescence in a wrong which we had solemnly undertaken to oppose."

"If I had for one moment supposed that singing those Hague conventions meant literally nothing whatever beyond the expression of a pious wish which any power was at liberty to disregard with impunity, in accordance with the dictation of self interest, I would certainly not have permitted the United States to be a party to such a mischievous farce. President Wilson and Secretary Bryan, however, take the view that when the United States assumes obligations in order to secure small and unoffending neutral nations against hideous wrong, its action is not predicated on any intention to make the guarantee effective."

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work.

Address: F. J. CHENEY & CO., Toledo, O. Sold by all Druggists, 75c. Take Hall's Family Pills for constipation.

A Smile or Two

"Well, my dear, it may be a very reliable map, but in my young days the town was the other side of the river."

In England it is quite common, instead of saying "Hello" when using the telephone, to ask, "Are you there?" An American who heard it for the first time, thinking some one was endeavoring to have some fun at his expense, replied "No," and hung up the receiver.

An old woman from the remote highlands was taken to Edinburgh, and heard modern singing in a church for the first time. She was asked by the friend who took her what she thought of the music. "It's verra bonny, verra bonny; but, oh, it's an awfu' way of spending the Sabbath."

Wishing to avoid the clerical air which so many ministers assume while traveling, a preacher attired himself in a sack suit of mixed color. He engaged in conversation with a salesman for a book concern, who took him to be a brother knight of the grip. Finally the book-house man said, as conversation lagged, "Let us see, what house are you traveling for?" "For the House of the Lord," replied the minister, gravely. "Never heard of 'em," said the other, shaking his head. "There's a lot of new concerns started up since I first went on the road."

Irishmen are inclined to word perversion; but, says a writer, the following description of slow speech, which often degenerated into a stammer, shows that occasionally they use the best words possible in explaining a thing:

"It's a quare sort uv way Martin talks," said Pat. "It's as if he tuk the words out uv his mou't an' looked at 'em before he gives 'em to yez." - Exchange.

To make colored fires. To make red fire: Mix one part of sulphur, two parts of sulphate of strontium and four parts of chlorate of potash.

To make green fire: Mix equal parts of sulphur, chlorate of potash and nitrate of barium.

To make blue fire: Mix 200 grains of chlorate of potash, fifty grains of sulphur and fifty-nine grains of sulphate of copper. - St. Louis Post-Dispatch.

MIXED METALS.

Some of the Curious Results Shown in Various Alloys.

In the beginning of man's acquaintance with metals only the softer ones, such as copper, gold, silver and tin, were mined and worked up into utensils, weapons, etc. It was early discovered that an alloy of copper and tin produced a reasonably hard metal called bronze, which was suitable for cutting instruments and, although not as hard as flint, was easier to work and did not break. Then began the bronze age of history.

An alloy is a compound of two or more metals. Alloys generally possess properties vastly different from the parent metals. For instance, gold is the most ductile of all metals. It may be drawn into the finest wire or beaten into a transparent film finer than the thinnest tissue, and yet mix the smallest quantity of antimony with gold and it is not ductile at all. Copper and tin mixed together produce an alloy with a higher specific gravity than either of its constituents, and the same weight will occupy less bulk. Copper and antimony produce a beautiful violet blue alloy.

By mixing together eight parts by weight of bismuth, five parts of lead and three parts of grain tin an alloy is produced which will melt at so low a temperature that a spoon made of it will melt when it is immersed in hot tea, and yet the melting point of each of its components is at least twice that of boiling water.

A small quantity of manganese makes iron almost indifferent to magnetism, while a bit of tungsten will increase its magnetic powers. Copper is a good conductor of electricity, but if a little arsenic be mixed with it it becomes almost a nonconductor. A little tungsten makes steel very much harder. Lead and antimony are used for making type metal because the alloy has the peculiar property of expanding as it cools. - New York World.

PLANNED TO LASSO A SHIP.

An Old Time Mexican Scheme to Outwit the Americans.

A leaflet from Don Ramon's folk lore may interest you. When war had been declared against Mexico and the arrival of the American hosts was daily expected in southern California, St. Agnes was in a tremor. Of course, not of fear, but of excitement.

One day the news came that a United States vessel of war was approaching the harbor. A council of the ancients of the city was immediately convened and many plans of offensive and defensive action were proposed and discussed, and finally the following one, designed by a Frenchman, whose brother had commanded a crack regiment under the great Napoleon, was adopted:

He was to take his spyglass and the only available artillery that St. Agnes afforded—a small brass cannon, which had been used alternately with anvils to fire salutes during religious and civic processions (I am unable to say how many of a pounder it was)—to the top of the mountain, a distance of twelve miles in a bow line from the ocean beach. In the meanwhile all the expert vaqueros, the moment the vessel was sighted, were to conceal themselves and horses along the beach.

When the ship had anchored and the proper moment in the judgment of the French commander, had arrived, he was to fire the cannon from the top of the mountain, at which signal the vaqueros were to rush through the surf and lasso the masts of the ship, capsize it into the breakers and harpoon the soldiers and crew as they endeavored to escape to shore. This brilliant coup d'etat was not carried out, only because the ship never came. - From "Romance on El Camino Real," by Jarre T. Richards.

Martin's Way. Irishmen are inclined to word perversion; but, says a writer, the following description of slow speech, which often degenerated into a stammer, shows that occasionally they use the best words possible in explaining a thing:

"It's a quare sort uv way Martin talks," said Pat. "It's as if he tuk the words out uv his mou't an' looked at 'em before he gives 'em to yez." - Exchange.

OWES HER LIFE TO "FRUIT-A-TIVES" Cured Both Stomach Trouble and Headaches

PALMERSTON, ONT., June 20th, 1913.
 "I really believe that I owe my life to 'Fruit-a-tives'. Ever since childhood, I have been under the care of physicians and have been paying doctors' bills. I was so sick and worn out that people on the street often asked me if I thought I could get along without help. The same old Stomach Trouble and distressing Headaches nearly drove me wild. Sometime ago, I got a box of 'Fruit-a-tives' and the first box did me good. My husband was delighted and advised a continuation of their use.
 Today, I am feeling fine, and a physician meeting me on the street, noticed my improved appearance and asked the reason. I replied, 'I am taking Fruit-a-tives'. He said, 'Well, if Fruit-a-tives are making you look so well, go ahead and take them. They are doing more for you than I can'."
Mrs. H. S. WILLIAMS.
 "Fruit-a-tives" are sold by all dealers at 50c. a box. 6 for \$2.50, trial size 25c. or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

CUTTING BACK OLD TREES.

Whether It Be Profitable Depends Upon Their Present Condition.
 Whether it is likely to be profitable to cut back trees and form heads depends entirely upon their condition. If the trees are a good distance apart say thirty-eight to forty feet, and in a favorable location for cultivation and spraying and are fairly vigorous and thorough cutting back and pruning would be likely to be successful and profitable. On the other hand, if the trees are close together, say thirty feet and have lost all of the lower branches because of overcrowding, with many dead and blighted branches, there is considerable doubt whether the cutting back and the forming of a new head would bring the desired results. A tree that is in good condition for improvement should have space enough in which to develop and should have a few live branches within eight or ten feet of the ground. If the trees have a trunk bare of branches to a height of fifteen to eighteen feet it is difficult to develop good low heads upon the trees. If these trees have some fairly vigorous branches within a reasonable distance from the ground the following suggestions for pruning can be made: Remove all dead and diseased branches. Prune out any upright

IN AN OLD APPLE ORCHARD.

growing branches in the center of the tree that exceed a height of twenty feet, or, in other words, cut back the top to side branches so that the tree can be sprayed readily from the tower of a sprayer.

In some cases where the trees have been much weakened there may be water spouts growing upward from the old branches. In cutting back the trees some of these should be saved and allowed to fill the space left vacant by the pruning out of the dead and weakened branches. The lower side branches that may be left upon the trees should be pruned sufficiently to enable one to cultivate and spray the trees well. If these lower branches are very thick they should be thinned out somewhat to permit light to enter, and if they extend to a considerable distance beyond the trunk of the tree some slight cutting back may be required. In a general way the object is to secure a shortened but well balanced framework and to retain as many of the small spurs and side branches as possible. Where a large apple tree is cut back to mere stubs of branches ten to twelve inches in diameter and without any small side branches it is almost impossible to form a strong, satisfactory new top upon the tree.

The pruning should be done during the winter and early spring before any growth takes place. Whether any fruit will be borne the season following the pruning will depend upon condition of the trees. If the lower branches are vigorous enough to carry fruit buds there should be some fruit to mature. If the lower branches that are left after pruning are very weak little fruit is likely to be secured the first season.—M. A. Blake, New Jersey Experiment Station.

SOME FARM NOTES.

Kansas has just taken a silo census. The Sunflower State now boasts 7,137 silos, having a total storing capacity of 900,000 tons. In 1909 there were only sixty silos in the state. The silos are all said to be grasshopper proof, and as most of them are now full Kansas should have very little to worry about.

The potash people are putting up the price on account of the war. A ton of farm manure carries ten pounds of potash, but if it lies in the rain this element will be washed out and largely wasted. Steady the potash market by saving the home supply.
 Cattle will not eat all the alfalfa

stems, but the horses like them. And they are excellent hay.

When you sell a quart of milk for 7 cents you are giving more food for the money than the buyer can get in most other forms. It is twice as cheap as mutton or fresh fish, six times as cheap as dried beef, nearly three times as cheap as beef steak, and nearly three times as cheap as eggs. The staples that cost less in proportion to food value than milk are such things as potatoes, rice, dates, cornmeal, prunes, cheese, wheat bread and beans. The above figures will hold good in the average interior region of the nation.

An Amazing Case.
 "Is there anything specially interesting in the case?" asked the reporter of the bank president whose cashier had stolen \$17.
 "Yes," mused the president, "you may say that we did not trust him implicitly."—Philadelphia Ledger.

Warm Reception.
 Excited Small Boy—Hey, Mr. Tanks, there's a burglar crawlin' up your front steps this very minute. Mr. Tanks—Poor devil! The missus will think it's me.—Sydney Bulletin.

A Medical Need Supplied.—When a medicine is found that not only acts upon the stomach, but is so composed that certain ingredients of it pass unaltered through the stomach to find action in the bowels, then there is available a purgative and a cleanser of great effective ness. Parmelee's Vegetable Pills are of this character and are the best of all pills. During the years that they have been in use they have established themselves as no other will have done.

ALFALFA AND PROSPERITY.

Wherever alfalfa thrives prosperity follows. No other plant has so fattened the soil and made so much of history as alfalfa. The Argentine Republic, in South America, has put itself upon the map almost like a miracle, and alfalfa is probably more responsible for this wonderful growth than any other single thing. The American desert has been made rich and habitable by alfalfa and water. It is the surest thing known that any section which systematically encourages the production of alfalfa on soil well adapted to it has a sure mortgage upon the future.—Rural New Yorker.

PORCHES AND SCREENS.

Their Advantages In Both Winter and Summer Weather.
 [Prepared by the United States department of agriculture.]

In regions where the winter is severe storm porches prevent a great deal of cold from coming in when the kitchen door is opened and can be used to good advantage on the farm. The walls, sides and roof should be tightly made of matched boards, should fit closely together, and if fastened with screws they may be easily taken apart in the spring and stored until fall.

A window should be provided in the door or in one side to admit light. A good plan is to have the storm porch consist of a permanent light wooden framework, to which the solid sides can be screwed. These can be replaced in summer with fine wire screens and the solid door with a screen door.

The doorway into the house should also have its screen door. This will secure the double screening of the kitchen or other outside door, which is so desirable as it is much more efficient than the single screen door in keeping out flies. Such a "screen porch" is particularly desirable in the warmer sections of the country where the "fly season" is long. Where a storm porch is desirable, but not feasible, an extra door of matched boards attached to the outside of the door frame answers the purpose.

There should, if possible, be a screened porch opening off from the kitchen on the side which is not exposed to the sun during the hottest part of the day, where in warm weather much of the kitchen work may be done. There are some advantages in having the screened porch on the side toward the garden and opening into it. But, on the other hand, if it is completely screened, has no outside door, and no openings, excepting into the kitchen, and is large enough to offer a place where dish towels and mops can be dried, supplies stored and garbage and other forms of waste kept temporarily.

the number of times the outside kitchen door must be opened will be reduced and thus the danger of letting flies in will be lessened. In cold weather the screens can be replaced with window sash or solid sides and the porch made use of as an extra storeroom.

All windows and outside doors should be screened. Cloth or wire netting tacked on the outside of windows will serve, but it is much better to have wooden or metal frames the full size of the windows covered with wire netting having sixteen meshes to the linear inch. This will protect against both flies and mosquitoes. Each screen should be fitted to its special window, and both screens and windows should be so numbered that they may be matched up without difficulty. Springs, a weight and pulley, or other self closing devices are very desirable for screen doors, which should close tightly and preferably be latched.

Hog Fences.
 A good permanent fence for a pig lot can be made as follows: Place posts four inches by seven feet high one rod apart. Staple a string of barb wire two inches from the bottom. Two inches above it place a ribbon of twenty-six inch woven wire and six inches above it another string of barb wire. The post will project one and one-half feet above the height of the fence.

MOVABLE HOG FENCE.
 Short posts can be used, but the long posts may be used some time later in case it is desired to place more wires on the fence to keep in cattle or horses. A good movable fence can be made in practically the same way. Use smaller posts, sharpen them and drive them into the ground two rods apart. On the bottom string a barb wire. Stretch the woven wire on the post and staple it tightly to the post so that it can be readily removed and rolled up when you wish to move it. A fence of this kind can be readily moved from place to place and set up without a great deal of labor.

Controlling Plant Lice.
 Many trees and shrubs are loaded each season with plant lice. On those affected last year one is likely to find small black, shiny eggs at the end of the twigs. As soon as the tender leaves begin to unfold on this shrub the eggs hatch and the leaves shortly become loaded with lice. Why not, therefore, trim hedges and shrubs and burn the trimmings, burning as well as pruning fruit trees?

The Terror of Asthma comes like a thief in the night with its dreadful throttling, robbing its victim of breath. It seems beyond the power of human aid to relieve until one trial is made of that remarkable preparation, Dr. J. D. Kellogg's Asthma Remedy. Then relief comes with a rush. Life becomes worth living, and, if the remedy be used persistently, the disease is put permanently to rout. Take no substitute. m

Even Up.
Snobley—Aw—aw—it must be very unpleasant for you Americans to be governed by people—aw—whom you wouldn't ask to dinner. American Belle—Well, not more so, perhaps, than for you in England to be governed by people who wouldn't ask you to dinner.—Christian Register.

Preferring His Suit.
Cynthia—Oh, Tom, think of coming to ask papa's consent in such shabby clothes! Tom—That's right; I had one suit ruined.—Judge.

The surest way not to fail is to determine to succeed.—Sheridan

BADLY WOUNDED
 For severe wounds, cuts, skin diseases, eczema and all skin troubles—for adults or for children, there is nothing to equal the great herbal healer
ZAMBUK HEALS QUICKLY

YOUR BACK is a Barometer. When it hurts, it means that the Kidneys need help. Take Gin Pills—Canada's own remedy for all Kidney and Bladder Troubles. 50c. a box, 6 for \$2.50. "Made in Canada".

Streets are Dangerous Playgrounds

Papers everywhere are full of warnings to parents against permitting their children to play on the streets. Cities where statistics are kept show in every case that the number of automobile accidents increases every year. Public streets are being transformed into thoroughfares dangerous as a railroad right-of-way. The time has come when they must be abandoned as playgrounds. The street is at best a very poor place for children to play and now that the automobile is here to stay, and hundreds of them are on our streets daily, we must take cognizance of the added danger to the little ones and use greater diligence to keep them out of danger. The admonition which makes us careful when crossing the railroad tracks must be repeated with reference to street.

The Profitable Farm

("Farm and Dairy.")
 The basis of successful and profitable farming is a fertile soil. Nature's way is to return to the soil just as much as is taken from the soil. The leaves of the forest trees fall to the ground immediately beneath, carrying back the fertility extracted through the roots. The grasses of the prairie rot back each year, and the rich prairie soil is the result. The pioneer refused to learn from nature. He took liberally from the bounty of the earth, but returned nothing. At first he harvested splendid crops. Ultimately nature shut down on him, and to-day we find ourselves obliged to return to nature's ways in our treatment of the land. First and above all things we must maintain the fertility of our soils.

How Tommy Atkins Got His Name

It is said that the Duke of Wellington was once asked to suggest a name, typical of the British soldier, to be placed on a sample account sheet pointing out to the men where they should sign. After thinking for some time the Duke's mind wandered back to his first engagement. He remembered the bravery of a certain dragoon in that encounter. That dragoon was Thomas Atkins. Hence the so familiar "Tommy Atkins."

Condensed Novel

Husband drinks. Wife bridge fiend. Separated seven years. Little daughter. Isn't she cute? Lives with grandma. Meets daddy on street. Daddy pickled. Takes him by hand. They meet mamma. Bridge club. Just lost twelve dollars. Feeling blue. Contemplating suicide. Sees daddy and daughter. Weeps, joins hands. Not another drop! No more bridge! Tears, Laughter, Gurgles. Everybody happy.

One of the best known of American illustrators living in England at present has just finished a book for which he has also supplied the illustrations. He complains, meanwhile, of hard times; described thus in a letter to a friend: "Me and the kaiser have our hands full keeping the ball rolling. I'm living on wild cabbage and herring cooked over a candle with the smell of a paint rag for dessert."

A former well-known and highly respected resident of Sarnia in the person of James K. Nelson, died on Wednesday at Regina, Sask. Mr. Nelson left Sarnia a few years ago and took up his residence at Regina. He had been in poor health for some time past. During his long residence in Sarnia he was connected with the King Milling Company. Mr. Nelson was widely known in Sarnia and throughout the county, and his death will be learned of with regret by all who had the pleasure of his acquaintance.

It is in Demand.—So great is the demand for Dr. Thomas' Electric Oil that a large factory is kept continually busy making and bottling it. To be in demand shows popular appreciation of this preparation, which stands at the head of proprietary compounds as the leading Oil in the market, and it is generally admitted that it is deserving of the lead. m

Guide-Advocate

HARRIS & CO. PROPRIETORS. WATFORD, JANUARY 29, 1915.

NOTE AND COMMENT

Uncle Sam is beginning to realize that neutrality may not be the popular policy he conceived it to be, and that its promise of dividends is far from being assured.

Detroit Free Press: Lord Kitchener says the war won't begin until May. If the preliminary bouts are any indications the main event is going to be some scrap.

During the coming year, Canada, as the "granary of the Empire," should make such large increases in production as to fulfill her duty and deserve the appellation.

Next year the West will market an extraordinary large grain crop at war prices. A 40 or 50 per cent. increase in acreage warrants this expectation, unless adverse weather intervenes. The agricultural West never before had such a bright outlook before it.—The Financial Post.

The man who is found most frequently on the nail-keg nearest the stove in the village store, does not generally have the fattest cattle in the stable at home. The good farmer has little more time for village gossip in winter than he has in summer, and the nail-keg seat is about the dearest seat he can buy.

Two resolutions favoring free trade between Canada and England were passed by the Manitoba Grain Growers' convention at Brandon, last week. A resolution was also passed upholding the Provincial Government for closing the bars. The Dominion Government was urged to frame a direct taxation on all land values, rural and urban, including all natural resources, so far as these resources are operated by private or corporate interests, with a surtax on all or part of such resources held out of use by private interests for speculative purposes.

Philadelphia Bulletin:—The common drinking glass, the roller towel and the finger bowl having been banished, the Kansas Board of Health now decrees that the public pen-holder must go, because some people have a habit of holding the pen in the mouth while sealing a letter, or collecting their thoughts, and thereby disease germs might be transported to the unwary. Why not abolish the common nickel and dime, and have all the "change" made on the "individual" plan, to be destroyed as soon as used? Some people have a habit of holding a coin between the lips or teeth.

Substantial increases have been made in the Australian tariff, affecting a number of commodities largely imported from Canada. The first increase is the general advance of from five to ten per cent. in the preference upon goods manufactured in the United Kingdom, by advancing the goods imported from all other countries to that extent. The second increase is in the duties from which increased revenue is desired, and the third increase covers the increased protection promised to Australian industries. The principal Canadian products imported into Australia are, in the order named, agricultural implements, motor cars and vehicle parts, printing paper, lumber and tinned fish. Upon these items the duties imposed under the new tariff show substantial increases. On paper, for instance, there has been an average increase of five per cent.

Feeling the War

Canada is about to begin to feel the war. This may sound like a belated statement, but it is true. What we have been feeling is the pinch caused by the dislocation of trade and commerce, which has been common to all nations with large foreign transactions. What we are going to feel is the actual pressure of participation in the war itself. Our men are getting to the front, and casualties lists will be conspicuous in the newspapers at intervals for many months to come; this will be the hardest part of the burden, for the contingents include the flower of our young Canadian manhood. And in another direction, our war bills are beginning to come in. The Govern-

ment is about to ask Parliament for a credit of one hundred million dollars at the session now approaching, and that will be only a beginning. It must be raised, not by the protective taxes to which we have all been accustomed for so long, and which of late years have raised enormous revenues chiefly by increasing the cost of the railways and buildings and machinery and other "plant" which foreign capital has provided—not by these means, but by taxes on the common things of daily consumption, taxes that every Canadian will have to pay out of his daily income.

There is not the slightest fear that either of these war-tolls, the toll of blood or the toll of coin, will in the slightest degree lessen the determination of Canadians to see the fight through to the finish. They will, if anything, strengthen our self-respect and our sense of the value of our contribution to the general cause. We have been making war a little too cheaply thus far.

GHOP STUFF.

175 men are engaged cutting ice on Sarnia bay.

Glencoe's patriotic fund now amounts to \$120.23.

Caradoc potatoes are being shipped in large quantities at 45c. per bag.

H. A. Hamilton, of Strathroy, while curling, slipped and fell on his side upon a stone, fracturing two ribs.

Kingsville council will establish a more efficient fire alarm and has fixed the license fee for selling cigarettes at \$100.

Chas. M. Thomas, druggist, of Amherstburg, has seven sons serving in the three contingents and their daughter is anxious to become a Red Cross nurse.

Captains R. B. Caldwell and Martin McKenzie, of Petrolia, have been given command of companies of the 34th Batt., which is mobilizing at Guelph.

Mrs. Sarah Forkin, wife of Mr. John Forkin, building contractor, Sarnia, was stricken by paralysis while hanging out clothes in her yard on Thursday, and died on Friday morning. Deceased was aged 61 years.

Considerable sickness prevails in the locality of Wyoming among horses. The malady is a form of indigestion, which often proves fatal. Local authorities attribute the cause to straw diet and lack of variety in rations, combined with want of exercise.

The managers of the Glencoe canning factory are contracting with the farmers for a crop of tomatoes. They desire the product of at least one hundred acres for the factory, which is some thirty of thirty-five acres in excess of what was taken last year.

Plympton is sending its quota of volunteers to defend the Empire. Three of her sons have passed medical examinations, and joined the third contingent, namely, J. Fisher, son of Archie Fisher, second line west; and Wm. and Thomas Houghton, of the sixth line.

Rev. G. A. Fraser, of Thamesville, who was elected warden of Kent County at the opening session of the County Council for 1915, in his inaugural address suggested that the Council consider the advisability of employing an expert to investigate the cause of hog cholera, which has caused thousands of dollars' loss in Kent, and if possible suggest some remedy.

Upon recommendation of the Conservative Association the government has appointed the following Petrolia gentlemen Justices of the Peace: George Cary, Thos. Kelly, B. P. Corey, E. Preston and Jas. Hamilton. The appointments were made because of the necessity of calling in outside Magistrates or Justices of the Peace to preside on Petrolia police court cases.

Mr. and Mrs. Jos. McCormick, jr., who returned here from Medicine Hat last fall, and his sister, Miss Ella McCormick, have taken up their residence in Mrs. E. Gammon's house, town, where they will reside for the balance of the winter. Mr. McCormick is at present looking after the affairs of his uncle, Jos. McCormick, of Warwick, the latter being at Carman, Man., visiting his brother George, who is ill.—Forest Free Press.

David Sitter, a pioneer of Lambton, died at his home in Forest on Monday, aged 79 years. Mr. Sitter resided in Warwick township till four years ago, when he moved into town. He leaves a wife, four sons and one daughter, viz.: Harmon, of Sarnia; John and Nicholas, of Besenquet; Arthur, of Wilkie, Sask.; and Mrs. B. Demeter, of Forest. Mr. and Mrs. Sitter celebrated their golden wedding last September.

Mrs. C. J. Kruse, wife of the M. E. minister at St. Johns, Mich., narrowly escaped electrocution when she attempted to wash an electric light bulb with a wet towel. As both hands touched the bulb she was drawn from the floor by the strength of the current which passed through her body, and the circuit was not broken until the cord parted. She was badly bruised by falling against the bath tub and her wrist was sprained. Both hands were burned.

The 27th detachment of 75 men and two officers for the third contingent left Sarnia on Monday for Guelph, where they will form part of the 34th Batt., which is being organized at that point by Lt.-Col. Oliver. The officers with the men are Lieuts. A. D. Williams and J. M. MacAdams, both of whom recently qualified at the school of instruction at London. Lieut. Williams has his captain's papers and also a medal for service through the Spanish-American war, at which time he was stationed in Cuba.

Swifts' Big Sale is a Big Money Saver

E. J. Yorke, of Strathroy, writes: "In re the interest in corn growing that has recently sprung up in Lambton County, I want briefly to say, that after six years experience in Kent as a corn grower followed by about twenty years of like experience in Lambton County, I am fully convinced that as a seed corn growing section in Canada, Kent and Essex are grand counties to live in, but owing to climatic conditions the corn remains juicy and does not harden up so early by one or two weeks time as it does in Lambton. Thus it escapes the danger of early frost. Hence corn grown in Lambton will, if properly handled, be far superior as seed from these more northern sections where corn is grown for stock purposes. If the Lambton Corn Growers' Association manages its case wisely it will experience little difficulty in capturing the seed corn market of Canada and eventually much of that of the U.S. also."

HOCKEY

W. H. S. Invincibles Got Another Scalp

The Star Hockey Club, of Petrolia, sent over a crew of pucksters on Wednesday night to play an exhibition game with the local High School team, and went down to defeat by the score of 8-4 in a fairly good brand of the winter pastime. The half-time score found the locals leading by 4 to 1. The Petrolia boys put up a game fight, McQueen playing a good game, while Stevens in the nets stopped many shots that looked like sure-to-go-jugglers. For the Invincibles, Johnston and Frenitis were in the limelight and their work caught the eyes present. The play was quite clean, only two penalties being handed out, these being claimed by the visitors. The lineup—

Invincibles, Stars, Trenouth, coal, Stevens, C. Roche, defence, Harrison, T. Roche, defence, Thorpe, And, rover, Harding, Frenitis, centre, McQueen, Brown, I wing, Wilson, Johnston, r wing, McRitchie, T. Dodds, referee.

Sound Advice

To the beginners at farming there is no better advice than that of the old Scotch farmer who said to his son when the young man was starting for himself:—"Never go into debt, except to buy manure." A well-fertilized plot of ground, a little common sense, and a lot of elbow grease will go a long way towards enabling a man to produce a living in the country, and when farming for that purpose it is cheaper to hire implements and horses when their assistance is needed. It is time enough to buy land and stock and implements when you have tried yourself and know enough about farming to try to farm for a profit.

Horses Turned Bitter Green

London, Jan. 28.—Chemical blonde horses are not wanted in the British army. It was thought at first that white horses could be utilized at the front by dyeing them a khaki blonde, but the results have been far from satisfactory. A battery of 24 white horses was treated to a coat of yellow lately and sent on duty for ten days in rough weather. On their return they were all a beautiful bottle green. No dye has yet been discovered that will hold its color on a horse that is being worked.

Do You Know Them?

Mr. "Meant-to-be" has a comrade, and his name is "Didn't do". Have you ever chanced to meet them? Did they ever call on you? These two fellows live together, in the house of "Never-win." And 'im told it's always hammed. By the ghost of "Might-have-been."

Lord Roberts' Message

Is Now Being Placed in All Schools of Ontario.

About six weeks before his death the late Earl Roberts wrote a message to the children of the Empire, telling in concise and clear words why Great Britain is at war. This message, which was written at the request of the League of the Empire, is being placed in the school-rooms of Great Britain. The League of the Empire in Canada, with the sanction of the Minister of Education, and with the co-operation of the School Inspectors and County Clerks of Ontario, and through the generosity of some of its friends, has been enabled to do the same work in Ontario. Already over 4,000 schools have received this card, and the league hopes before very long to have placed this message before the eyes of every pupil in Ontario schools. The last message Lord Roberts wrote to the Empire that

he loved so well and served so heroically will serve a useful purpose in these present strenuous days.

Laird—Johns

A pretty wedding took place on the 18th inst., at the home of the bride's parents, Mr. and Mrs. Wm. Johns, of Walshead, when their eldest daughter, Eva Violet, was united in marriage to Alexander Logan Laird, a wealthy young farmer near Watford, by the Rev. Mr. Forster.

The bride entered the parlor leaning on the arm of her father and was attended by her cousin, Miss Leona Wilson, while the bride's brother, Mr. Andrew Johns, supported the groom. The bride wore a gown of blue paillette silk trimmed with shadowed lace. The groom's gift to the bride was a gold watch and chain and to the bridesmaid a gold brooch and to the best man a gold stick pin.
 Only the immediate relatives of the contracting parties were present.
 The happy young couple left for their fine home at Watford amid the best wishes of all.

BABY'S BATTLES

Baby's battles for health can be easily won if the mother will constantly keep at hand the means of aiding her little ones when the emergency may arise. Baby's Own Tablets should be found in every home where there are small children. The Tablets are a gentle but thorough laxative. They break up colds; relieve cramp; prevent constipation; cure indigestion; promote sleep and in fact cure all the minor ills of little ones. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

BORN.

In Brooke, on Tuesday, Jan. 19th, 1915, to Mr. and Mrs. Darwin Oke, a daughter.
 In Plympton, on Monday, Jan. 11th, to Mr. and Mrs. Wm. Allan, a daughter.

DIED.

In Watford, on Saturday, Jan. 23rd, 1915, Francis B. Doan, aged 75 years, 11 months.
 In Oil Springs on Friday, January 8th, 1915, Emma, relict of the late James Herten, aged 55 years, 3 months and 19 days.
 In Ailsa Craig, on Monday, Jan. 18, 1915, Hanna Downham, wife of Chris. Borthwick, aged 78 years, 2 months and 8 days.
 In Forest, on Tuesday, Jan. 19th, Martha Mary, infant daughter of Mr. and Mrs. W. Beach, aged 27 days.
 In Cedar Springs, Mich., on Sunday, Jan. 17th, Dr. John B. Dewar, eldest son of the late Geo. Dewar, of Kertch, aged 61 years.

IN MEMORIAM

In loving memory of Wm. Edward Kearney who died Feb. 1st, 1914.
 Dear husband as the shades of evening gather round our lonely door,
 Silently they bring before us
 The dear face we see no more,
 From our happy home and circle
 God has taken one we loved;
 He is borne away from sin and sorrow
 To a nobler rest above.
 No one knows how much we miss him,
 None but aching hearts can
 Lost on earth, but found in heaven;
 Jesus death all things well.
 From his loving wife and sons,
 Watford, P. O., Ont., Jan. 29th, 1915.

Parkhill Block Burned

Loss May Reach \$20,000—Partly Covered by Insurance.

Parkhill, Ont., Jan. 26.—A disastrous fire occurred in this village to-night, completely destroying the entire block in which were situated B. Lindsay's large general store, and J. B. Lindsay's hardware store. The fire was first discovered in the cellar of the hardware store, and had gained so much headway that before the firemen could reach there, the entire block was in flames, and although a strong effort was made, it was too late to save the block. It is said that the loss will reach in the neighborhood of \$20,000, partly covered by insurance.

Destructive Fire at Alvinston

Alvinston, Jan. 26.—Fire at 2 o'clock this morning completely destroyed the millinery store, with dwelling overhead, of the Misses Wheatley. The Misses Wheatley, clad only in their night dresses, escaped from the upper windows by means of a rope made from their bed clothing.
 There is some insurance on the stock and furniture. The building is owned by J. Cummings.

War Summary

London, Jan. 24.—An attempt by a German cruiser squadron to repeat the attack recently made on Scarborough, the Hartlepool and other English coast towns, was frustrated to-day by the British patrolling squadron, and in a running fight the German armored cruiser Bluecher was sunk and two German battle cruisers were seriously damaged.

The British ships suffered only slight injury. So far as is known only 125 of the Bluecher's crew of 385 were saved.

A battle also occurred between the light cruisers and destroyers accompanying the bigger ships, but the result of this engagement has not yet reached the admiralty.

The British were superior in ships engaged, weight of armament and speed, and the flight of the German ships into the mine and submarine-infested field possibly saved them from further losses.

Jan. 25.—That the revolutionary movement in the Union of South Africa has not been entirely suppressed is indicated by the official announcement from Pretoria that 1,200 rebels under Lieut.-Col. Maritz attacked Upington, Bechuanaland. The rebels were repulsed, but nearly 1,100 of them got away.

While artillery is playing the leading role along the front in Belgium and France, there are reports of vast military preparations in Alsace, where it is thought the Germans are about to inaugurate a strong offensive movement against the French in the Vosges. Heavy German reinforcements are being sent to that district.

Neither the French nor the German official statement recites any incident that materially affects the situation.

Jan. 26.—In actual fighting there is little doing anywhere, but the new troop dispositions in various quarters seem to indicate that shortly big battles again will be waging.

Germany has seized all stocks of wheat in order to insure a supply of bread until the next harvest. Stocks of wheat will be distributed according to the necessities of the various populations.

The British armored merchant steamship Viknor has been sunk with all hands, off the Irish coast. The vessel either foundered or struck a mine.

Amsterdam reports that the five-year-old untrained men of the landsturm in the province of Brandenburg, in which Berlin is located, have been cited to appear for medical examination.

Jan. 27.—In the eastern theatre of the war there is for the time being a lull in the fighting, which has frequently been the case when the opposing forces are preparing for extended movements.

That Great Britain did not lose any ships in the fight in the North Sea last Sunday, as was claimed by Germany, is the assertion of the British admiralty. A report issued by the British admiralty says all the ships engaged have returned to port, but that two of them were damaged and that one officer and thirteen men were killed and three officers and 26 men wounded in the battle.

A Zeppelin airship dropping bombs on Libau, Russia, was brought down in the Baltic Sea and its crew captured. The German protected cruiser Gazelle has been torpedoed in the Baltic Sea by an unknown submarine. She was not too badly damaged, however, to make port.

Copenhagen hears that thirty persons were killed and fifty injured in an Austrian aerial raid over Kielce, Poland.

London, Jan. 26.—It was officially announced in London this evening that the Zeppelin dirigible balloon which on Monday dropped bombs on the Russian port of Libau in the Baltic Sea, was destroyed, and that the members of the crew were taken prisoners.

The admiralty to-night made public the following official statement from the naval general staff at Petrograd concerning the incident:—

"Monday night a Zeppelin appeared above Libau and had time to drop nine bombs on the undefended part of the town. After being fired at by the forts the Zeppelin fell into the water. Small craft were sent out and destroyed the Zeppelin and took her crew prisoners."

Petrograd, Jan. 26.—"The government stands for the scrupulous fulfillment of the emperor's manifesto, issued the day war was declared, that so long as a single soldier of the enemy remains on Russian soil, no peace will be concluded."

Paris, Jan. 26.—The Germans are said to be preparing to give to-morrow, as a birthday present to their emperor, a surprise of great victories. From different quarters, Holland, Italy and Switzerland, come reports for a general offensive on the whole front, Zeppelin and aeroplane raids on London, Calais and Paris, and a sortie of dreadnoughts for a decisive battle.

Ottawa, Jan. 27.—That the Princess Prts have been in action again, not later than January 16, is shown in the casualty list for the regiment, issued by the department to-night. Two privates have been killed in action, and one eas died of wounds, and a fourth death is recorded.

London, Jan. 27.—The first Canadian contingent is getting ready to move to the front. Already the Canadian Army Ordnance Corps have received orders to hold themselves in readiness. All mechanical transports of the Canadian division have been laid up for overhauling.

An official statement issued at London last night said:—"The German light cruiser Kolberg is reported to have been sunk in Sunday's battle in the North Sea."

65 Per cent. Canadians

London, Ont., Jan. 26.—Sixty-five per cent. of the men recruited to date for the London squadron of the Seventh Mounted Rifles of the third contingent are Canadian-born, while another 15 per cent. are old country men who have been living in Canada for many years. Recruiting is proceeding satisfactorily.

Imports From Germany Practically Cut Off

Ottawa, Jan. 26.—The September report of the department of trade and commerce, which is just to hand, shows that during the first full month of the war the imports from Germany fell from \$1,464,483 in 1913 to \$314,992 in 1914. Exports to Germany were \$141,592 in September, 1913, and \$1803 in September, 1914.
 About \$2,000 worth of the imports were German dolls and toys for the Christmas sale.
 It is understood that these came by way of the United States.

Even the Whales are Unsafe

The North Sea is unsafe even for whales. A dead one that drifted on to the Dutch coast was found riddled by three-inch projectiles. Some British cruiser had mistaken it for a German submarine. This incident should make the British view more sympathetically and charitably the mistake of the Russian fleet in the same waters 10 years ago, on its way to fight the Japanese in the Orient, when a Russian officer at night ordered a volley at some British trawlers, thinking they were Japanese torpedo boats. That was the celebrated Dogger

Bank affair, which nearly precipitated war between Russia and England.

John Weedmark, Souris Man., writes:—We have had a lovely winter so far, some cold days but fine and no sleighing until a day or so ago and we have had a little fall of snow. Wishing you have a bright and prosperous New Year.

Blazing Oil Fell Onto Little Girl

Port Lambton, Jan. 26.—Only the prompt and effective action of Mrs. J. P. Collins saved her little daughter Mary from being burned to death while visiting her grandmother, Mrs. Jackson. A lamp was upset off a table and fell upon the child, throwing blazing oil over her clothing. Her mother immediately seized a rug and wrapped it tightly around the little girl, extinguishing the flames, but not before the victim's eyes and face had suffered.

It is feared the eyes may be permanently injured.

There was grave danger of the house being burned, but Mrs. Collins' calls for help brought Bert Woodward, who threw the blazing lamp out of doors and helped put out the fire.

MEN AND WOMEN

The Pearl Scarfpin It Proved a Dead Giveaway. By WILLARD BLAKEMAN

Jack Herkimer was a very pleasant fellow. He was popular with both men and women. Flaxen haired, blue eyed, a boyish face on a massive figure, good natured, careless of everything except the feelings of others, he drew about him so many friends that he found it difficult to avoid distressing them from an inability to accept and return all the favors they lavished upon him.

One day Jack was sitting in a street car when a young lady got in. She sat for a few moments oblivious to the fact that persons are not expected to ride in street cars for nothing, then made a dive for her portmanteau, supposed to be contained in the bag she carried. There was a succession of dives, each more spasmodic than the last; then she arose and started to leave the car without stopping it.

Jack interposed. "Pardon me," he said, placing himself in front of her, lifting his hat and smiling benignly; "if you are without change for your fare I will pay it for you. There is no need to get off."

He held in his hand a quantity of large change and picked out a nickel from among the coins. The young lady, apparently reassured, refrained from her attempt to commit suicide for the want of 5 cents and sat down. But she was still too flustered to thank Jack for the loan. The conductor received the fare, passed on, and the young lady sat trying to regain her equanimity. Presently a thought struck her all of a sudden. It was that it behooved her to make some arrangement for the payment of the debt. She was a young woman and had not the experience adequate to the occasion.

"How am I to—to get it back to you?" she asked Jack. "There's no need to get it back to me at all," he replied, with that winning smile of his. "But if you insist upon doing so"—He hesitated. He would have liked to add, "I'll call for it if you'll give me your address," but it occurred to him that if the young lady did not consider this taking an advantage of her youth there were doubtless members of her family who would, so he finished the sentence by giving his own address, at the same time begging her not to take the trouble to return so small an amount.

By this time the girl had so far recovered her composure as to say, "Thank you very much." She would have liked to return Jack's smile, for it was catching, but she was only sixteen years old and had been brought up to give no encouragement to a stranger.

Jack, who was feasting his eyes on her beauty, passed far beyond the point where he had intended to leave the car. When the girl arose to alight she was apparently in doubt whether

or not it would be proper for her to nod an adieu to the handsome young fellow who had befriended her. She decided in the negative, and Jack, who was about to get out before her in order to hand her off the step, sat still. The episode was ended, but left a very pleasant sensation in the young man's breast.

That night when Jack went to sleep he was paying the girl's fare again and again and assuring her that a nickel was of no consequence and she must not think of returning it to him.

The next day Jack received an envelope addressed in a man's handwriting containing a bit of paper and postage stamps to the amount of 5 cents. On the paper within in the same hand as the address was the word "Thanks." Evidently the girl's father or brother had taken the matter off her hands. Jack felt sorry. He had hoped to receive from the young lady something that would have given him the semblance of an excuse to take another step toward an acquaintance. This return of his loan by one other than the creditor herself ended the matter. And in a week Jack, who had bouquets of smiles thrown at him from pretty girls, forgot all about it.

One day a little box, addressed in a feminine hand, came for Mr. Herkimer by post. Jack was the recipient of so many favors from young ladies that he naturally supposed it to be from some girl with whom he was "spoons." He did not recognize the handwriting, but quite often his favorites who wished to conceal their identity had addressed him through an amanuensis, and he thought nothing of it. Opening the box, he found nestling in cotton a scarfpin set with a single pearl.

Jack ran over all the girls to whom he had recently made love—that is, all he could remember—with a view to getting a clew as to the sender. He formed an opinion that she was one of three, but he could not tell which one. He would await developments, being well aware that no woman was likely so to favor him without in due time getting credit for her gift. Whenever he met a suspect he would put out feelers with a view to testing her as to whether she had sent the scarfpin. But week after week passed and there was no clew. Jack wore his pearl ornament for several years, studying the face of every woman who fixed her eyes upon it, hoping for a betrayal, but found no one who gave any indication whatever that she had bestowed the favor.

One September day Jack, who had gone to Europe with the American summer regtra, was in a compartment of a railway carriage in Germany on his way to Hamburg when an elderly man handed a lady into the car, then got in himself. The girl was a beauty, and it seemed to Jack that he had seen her before. It was some time before the gentleman got his hand baggage stowed away in the racks and the lady had settled herself in her seat. Then she looked about among her fellow passengers. Jack from the time he had received the mysterious scarfpin had never worn any other. He saw the girl's eyes hovering upon him and finally light on the ornament. Immediately the blood left her cheeks, then rushed back a crimson flood.

There was no more doubt in Jack's mind that the young lady was the donor of the scarfpin than that she was present before him. But who was she? Certainly not one with whom he had been on intimate terms. He was quite young enough to remember faces, especially of those with whom he had an acquaintance. But no racking of his brain served to bring forth the identity of this lady who had sent him an anonymous gift. And yet something had passed between them, for he was sure he had seen her before.

The train was an express and connected. As soon as it was well under way the conductor came through for tickets. The first person he approached in the compartment was the young lady in question, who referred him to the gentleman who accompanied her.

If it were not for suggestion our world would be a very dull one. Seeing the girl ask for her ticket brought back to Jack Herkimer a picture of her when, three years younger, she had started to leave a street car in America for last of fare. The riddle was solved. She had rewarded him for what she doubtless considered a favor of importance, sending the reward anonymously.

Jack was a man of quick resource. What he would do flashed upon his brain with electric rapidity. He began to fumble in his pockets for his ticket—that is, in every pocket except where it was. The conductor stood before him, waiting. Jack continued the search until, pretending that the ticket was not forthcoming, he said to the conductor in the only language he knew, English: "I've lost my pocketbook, with my money and my ticket as well."

Naturally, every eye in the compartment was turned to the unfortunate man, the girl's included. She was not the unsophisticated creature she had been when Jack had paid her fare, and

it did not take long for her to become aware that he was enacting this scene on her account. To conceal a smile she turned her face to the window.

"You are an American, are you not, sir?" said the young lady's companion. "I am."

"If you will tell me what you require I will be happy to oblige you." "I need only my fare to Bremen, where I will take steamer for home." "In that case the matter is simple. I sail on the Crown Princess tomorrow morning." "I go by the same steamer. I have the documents by which to obtain all I need from the purser."

The gentleman paid Jack's fare. Jack asked for his name and address and was given a card bearing the name of Farnsworth. Then the passengers, having lost all interest in the matter, settled down to their various ways of passing the time. There was one person who, not being deceived by this audacious imposture, continued to look through the window at the scenery as though she would not lose any of it for a fortune. At last she turned, but carefully abstained from meeting the gaze of the unfortunate man who had lost his valuables.

Americans abroad come at once to a friendly footing. Jack Herkimer was profuse in his thanks to Mr. Farnsworth and, taking a seat opposite him, talked about everything he could think of, expatiating especially on that confidence those born under the stars and stripes have in one another, and so ingratiated himself into the favor of the old gentleman that the latter at last said, "Permit me to introduce you to my daughter, Mr.—"

"Herkimer. I am John Herkimer of Troy, N. Y." "That was the trying moment of Miss Farnsworth's life. She felt a great impulse to fix her eyes on Jack's scarfpin, and Jack threw open his coat that she might get a good view of it. A half veiled, half amused smile played over her features like a fitful breeze among flowers. Jack gave no outward sign of ever having met her before, but there was a happy triumph within that was as plain to Miss Farnsworth as it was unobservable to the others present.

CASTORIA For Infants and Children. The Kind You Have Always Bought Bears the Signature of

Cause For Suspicion. A mother who frequently went out to spend the day with her friends had been accompanied always by her seven-year-old son. One evening on returning home very much bored with the day's experiences, he said to her: "Mother, if you don't stop taking me around with you so much people will think you have married a dwarf."—Harper's Magazine.

His Part in the Drama. Two women who claimed the same man as a husband were airing their troubles in court. "Who's the skinny fellow over there?" asked a visitor. "He's the bone of contention," chuckled the court attendant.

HOW TO CURE A CHRONIC COUGH

Told in the Following Letter by a Jackson Man Who Knows from Experience. His Word Is Good.

Jackson, Miss.—"I am a carpenter, and the gripe left me not only with a chronic cough, but I was run-down, worn out and weak. I took all kinds of cough syrups but they did me no good. I finally got so weak I was not able to do a day's work, and coughed so much I was alarmed about my condition. One evening I read about Vinol and decided to try it. Before I had taken a quarter of a bottle I felt better, and after taking two bottles my cough is entirely cured, all the bad symptoms have disappeared and I have gained new vim and energy."

—JOHN L. DENNIS, 711 Lynch Street, Jackson, Miss. The reason Vinol is so successful in such cases is because the active medicinal principles of cod liver oil contained in Vinol rebuilds wasting tissues and supplies strength and vigor to the nerves and muscles while the tonic iron and wine assist the red corpuscles of the blood to absorb oxygen and distribute it through the system, thus restoring health and strength to the weakened, diseased organs of the body. If Vinol fails to help you, we return your money.

The man or woman who has room for a flower bed, a chicken coop and a play space for the kiddies is apt to have little time or temptation for other affluities.

By the time a man is married his character is formed, and he changes very little. His mother has made him; and no matter how hard she tries, there is very little that his wife can do toward altering him.

"Can you turn the heel yet?" is a frequent query among the new knitting experts who are busy on socks for the soldier boys.

It is generally conceded that to a great extent the mother makes the home, yet altogether too few of us realize this regarding ourselves.

Learn to laugh. A good laugh is better than medicine. Learn how to tell a story. A good story is as welcomed as a sunbeam in a sick room.

Only the uninformed endure the agony of corns. The knowing ones apply Holloway's Corn Cure and get relief.

Private Sidney Bryant, who was married recently with such pomp at Wolsley Barracks, London, has disappeared, together with his bride, formerly Miss Elizabeth Drouillard, of Windsor.

The Reverend William Couden of the Central Universalist Church, of Indianapolis, Ind., said recently that a man who is good in hope of reward is a grater and one who is good from fear is a coward.

MAGIC IN GOLF.

It Looked Like an Impossible Putt, but Travis Mastered It.

"I once saw Walter J. Travis, the veteran, sink the most wonderful putt it has ever been my lot to witness," says Jerome D. Travers in the American Magazine.

"The occasion was a Metropolitan championship at Garden City, with Travis and Wilder of Boston in a hard match. Travis was four down and four to play, hanging on by a thin thread of hope. But Travis settled down and won the fifteenth and sixteenth holes, leaving himself only two down, with two holes left. He had to win both, of course, to even get a half.

"The battle seemed to be over beyond any hope, for Travis was not only thirty feet away, but he had one of the trickiest and hardest greens on the course to putt over. And even if he made the putt the odds were that Wilder would also make his from that distance. Travis had no chance to try for a straight putt. There were two decided breaks in the slope of the green, one to the left and one to the right.

"After a careful survey he walked back to his putt and with a free tap sent the ball spinning along. It took the slope to the right, wound its way along this raised mound and, winding, turning, twisting, up slope and down slope, it broke in at exactly the right spot, about twenty-eight feet away, and it then plumped squarely into the center of the cup, taking its last run from a decided downhill spin where the green sloped off abruptly toward the hole. I've never seen another like it."

Muzzling the dogs of war is not so easy if you haven't got the muzzles.

French court procedure has all the wild strenuousness of a football game.

The average plaintiff in a breach of promise suit prefers the money to the man.

There was a time when a fellow began at the bottom, but he ends there now.

It is surprising what a lot of work a loafer will do in order to dodge work.

"Can't afford it." is a stingy man's excuse, but it seldom leads to bankruptcy.

Nothing makes an angry man so unreasonable as to tell him to be reasonable.

The inventor of the phrase "It's just one darned thing after another" hit it just right.

UGLY DRIVER ANTS

All Living Creatures Fly Before These African Terrors.

THEY BUILD LIVING BRIDGES.

When an Army of These Formidable and Ferocious Insects Want to Cross a River a Suspension Tube of Their Own Bodies Provides the Way.

Why should driver ants cross rivers? The ants of our own woods have no such desire; they are busy little people, too much engaged in the practical task of finding and storing food to have any vagaries of this sort.

The great driver or Bashkoney ant, however, has nothing peaceable in his composition. He is nothing if not aggressive and spiteful; neither is he contented. In the great forests of Africa these insects multiply to an alarming extent. They swarm in thousands, perhaps millions, and, formidable at any time, during the season of migration they are a terror to the whole district in which they live.

Myriads of these insects are seized with a restless desire for change. Obeying some mysterious instinct or following the commands of their queen, they set out upon their travels, and woe betide the man or beast that crosses their path! In a moment the hapless creature is covered with ants, and in an incredibly short space of time nothing is left but bare bones.

The driver ant is so called because it drives away all living creatures. When this most terrible host is on the march men and animals, great and small, take flight. Lions and tigers may be seen rushing along side by side with the timid gazelle. All are too much frightened to dream of attacking or avoiding each other. For once in their lives they are united in their terror of the common enemy. Size and strength are of no avail, and a rhinoceros or an elephant is as much terrified and is in as much danger as a rabbit.

When the vast army of ants arrive on the bank of a river a halt is called. They have no idea of turning back, but to cross that river they must have a bridge, and the making of this bridge takes time, and probably the engineers of the army have to bustle up to the front.

The making of an ant bridge is one of the most wonderful things in the world. The ants swarm on a tree, choosing one which overhangs the river. Upon the bough which reaches farthest over the stream they mass themselves and begin to form a thick rope of their own bodies. This they do by means of holding on firmly with their hind legs, while with the front pair of legs they grasp the bodies of other ants. Constantly fresh ants range themselves in front, and so the rope grows and grows until at last it touches the water.

By and by the floating chain is carried by the current toward the other side where probably grass and great reeds spring out of the water. The foremost ants seize upon the first object they touch, and from one slender foothold to another they climb until at last they reach land. The nearest tree is quickly climbed, the foremost pairs of legs doing all the work, and very soon the living rope is swinging high above the river. The bridge is made, and quickly the army crosses the stream.

Du Chailu, in his African travels, had an opportunity of observing one of these bridges, and he declares that it is made with a hollow center, the living bodies of the ants forming the walls of a tunnel, through which the main body of ants travel safely over the water. When the last ant has crossed and the bridge is no longer needed, the ants in the rear release their hold and the rope or tunnel drops into the river. The ants do not like water, but they are soon released from this position, for the vanguard are dispersing as fast as they can, and the self-sacrificing ants who began the great chain are quickly upon dry land.

It is all very strange and very wonderful. Why do they travel at all? By what direction and by what laws do they act, and how did they learn to make bridges? Our naturalists have learned much of their ways and their doings, but these questions they cannot answer; they are part of the mystery of life and nature of which the wisest knows little.—J. Cutler in London Family Herald.

ULTRA VIOLET LIGHT RAYS.

How Man May Some Day Extract His Food From the Air.

Science begins to dream of a day in which man will gather his food direct from the air and digest it without much aid from the various ferments and juices which are now mainly instrumental in that work.

The chief agent in this mighty revolution, according to no less an authority than Bertholet, will be the ultra violet light rays. These are not visible to the human eye. They do not appear upon the spectroscopic. They affect the photographic plate, however, and are probably discerned by some of the lower animals, whose sense of sight is much more acute than that of man.

Much is known of their chemical effects. Few microbes can long withstand their power. The redness and pain of "sunburn" are their work. They are particularly injurious to the eye, which upon exposure to them becomes totally blind in a little while.

Through the agency of these rays Bertholet has actually combined carbon dioxide and water vapor into sugar and other carbohydrates. He has inclosed carbohydrates, fats and albuminoids in sealed vessels of quartz and has seen them digest under the rays. The process is very expensive, of course, but it is hinted that modern inventive genius will soon cheapen it in time that fields of wheat may be replaced by factories where food is manufactured from the gases of the air.

And should the men of that day be troubled with indigestion the same agent that makes their food will come to their relief. Stomach troubles will disappear at once before a little bulb of light rich in the ultra violet rays.—Boston Herald.

BIFOCAL LENSES.

They Had Their Origin In Ben Franklin's Double Glasses.

Everybody who uses bifocal glasses probably wonders where the idea originally came from. Bifocal glasses are the kind that possess two separate lenses cemented together so that by looking in the upper part one can see at a great distance and by looking through the lower half one can read.

Most authorities are inclined to give Benjamin Franklin credit for the invention. He was, so the story goes, an inveterate reader and could not use his reading glasses when looking any distance away.

Finally the notion came to him that he could combine his glasses, and he thereupon had the lenses cut in half and one-half of each lens placed in the rim of each spectacle rim. The result was that a single pair of glasses was sufficient, though present day oculists state that the sharply drawn line must have affected his eyes.

From this idea the oculists gradually developed a glass in which the lower part was arranged for reading and the upper part for long distance vision, while the annoying "marking line" was eliminated.—Washington Star.

Mount Rainier's Shadows.

There are some wonderful shadow effects produced by and upon the gigantic snowy cone of Mount Rainier. It sometimes happens that the sky as seen from the city of Tacoma just before sunrise is covered with a dome of cloud 15,000 feet or more in height, while behind the peak, toward the east, the sky is clear. In such circumstances the rising sun casts the shadow of the great mountain upon the cloud curtain overhead in the form of a vast blue triangle, the point of which rests upon the apex of the peak. At other times the shadow of the earth can be seen creeping up the cone in a distinct curve, while the flush of sunset stains the snow above the line of shadow to a deep pink.

The British Crown.

The present crown of the English king was originally made for Queen Victoria at her coronation in 1838. The principal jewels were taken from older crowns. The most noted stone is the great ruby which was given to the Black Prince by Peter the Cruel after the battle of Navarette in 1367. It was also worn by Henry V. in the crown encircling his helmet at the battle of Agincourt in 1415.—Philadelphia Press.

Regularity

of the bowels is an absolute necessity for good health. Unless the waste matter from the food which collects there is got rid of at least once a day, it decays and poisons the whole body, causing biliousness, indigestion and sick headaches. Salts and other harsh mineral purgatives irritate the delicate lining of the bowels. Dr. Morse's Indian Root Pills—entirely vegetable—regulate the bowels effectively without weakening, sickening or griping. Use

Dr. Morse's Indian Root Pills

THEY'RE FINE FOR KIDDIES

You should always keep a bottle of Chamberlain's Stomach and Liver Tablets on the shelf. The little folk so often need a mild and safe cathartic and they do appreciate Chamberlain's instead of nauseous oil and mixtures. For stomach troubles and constipation, give one just before going to bed. All druggists, 25c, or send to CHAMBERLAIN MEDICINE CO., TORONTO 10

Federal Assistance to Horse Breeding
The progress that has been attained in the past in Canadian horse breeding has been due largely to individual effort. To the few who have done so much for the advancement of the industry every credit is due. Through the lack, however, of concerted action and co-operative measures on a large scale amongst the breeders the business has not progressed as rapidly as could be desired.
The want of proper organization, except in the more favored districts, has prevented the farmers generally from securing and retaining the services of good breeding sires. In a majority of sections, breeders wishing to grade up their horses are forced to use whatever stallions may, by chance, stand for service in their district. Many of these are faulty in conformation and lack in quality, while others, though of better type, remain either through insufficient patronage or because of failure to leave colts, but a single season in each district. The fact also that there has been no systematic adherence to the use of one breed suggests another reason for the lack of progress in the breeding of high class animals.
It must be recognized, further, that the owner of a valuable horse, after paying for maintenance, insurance, interest on investment and the expense entailed in the collection of his fees, has frequently little left from his outlay, particularly in districts where he has to compete with grade and scrub stallions standing for service at a very low fee. As a result, really high class stallions can be maintained only in districts where the breeding of horses has been given serious and progressive attention.
In view of these considerations the Minister of Agriculture proposes to enter upon a policy which may serve to place the horse breeding industry in Canada in a position comparable to that which it has attained in Great Britain and other European countries. It is believed that by encouraging the organization of breeders' clubs and by enabling such clubs to procure the services of good breeding stallions under favorable financial conditions, the assistance in this direction can best be provided. The encouragement of community breeding will, of itself, be productive of useful results. The payment to community organizations of a part of the service fee will, it is expected, give a permanent stimulus to the hiring of the best stallions that may be procured and, at the same time, promote the development of a comprehensive movement in the interests of this important national industry.

Bridgen's Old Brigade
Most villages, towns and cities have some particular feature that they are proud of and take delight in calling visitors attention to, but it took G. A. Hadden, our local photographer, who comes here every Tuesday from Alvinston, to show the Brigadiers that they have something in their midst that no other village of twice its size can show. We have reference to a large photograph of forty-six men all sixty years of age or over and all living in the Police Village of Bridgen. In this photograph there are nineteen men over the age of seventy and some over eighty, and everyone of them are in good enough health and activity to walk up a flight of 15 steps to the studio to have their photo taken. The photograph is 28 x 38 and is, needless to say, the "centre of attraction," these days in Bridgen. The combined ages of these forty-six men is 3,157 years, or 37,884 months, or 164,164 weeks, or 1,132,305 days, or 27,755,270 hours, 16,653,316,300 minutes, or 99,918,972,000 seconds. Each and every one of the gentlemen in the photograph received one of their photographs on Christmas day with a dainty little yellow card attached conveying the best wishes of the photographer, Mr. Hadden, who made the photograph.—Bridgen Progress.

use I was restored to complete health. I now recommend them to all run down in health as they are the best medicine I know of."
Sold by all medicine dealers, or by mail at 50 cents a box or six boxes for \$2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

A Letter From Corp. Sid. Welch

Mr. F. O. McIlveen, local manager of the Sterling Bank, received the following letter from Bustard Camp. It will be found of interest to many:—
DEAR FRIEND,—Just a few lines to you to wish you a bright and prosperous new year. We are still under canvas Salisbury Plains but expect to move pretty soon. It has been raining pretty near all the time we have been here and we have had anywhere so far as weather conditions are concerned, mud in some places a foot or more deep and continuous rain. Our tents are not the best, so we have a little rain inside as well as out. We get enough to eat of camp fare, of course. The Watford boys are standing it well under the very trying circumstances. We are getting heaps of work. We get a Guide-Advocate sent to us at times, and we are very glad to get our old home paper. Watford people are doing their best to help the Belgians, and I can assure you it is a worthy cause. I have been in conversation with some of the wounded and some of the tales they tell are too horrible to mention. We do not know when we are going to the front, but hope it will be soon, as we are longing for a chance to accomplish what we started out to do. Trusting you are in the best of health and wishing one and all in Watford a glorious new year, I close my short letter.
Remaining your sincere friend,
SIDNEY WELCH.

Death of Charles Thompson at Prince Albert, Sask.

(From the Melfort Times)
The many friends of the deceased were shocked to hear of his sudden death at the Holy Family Hospital at Prince Albert on Monday, Jan. 4th. The deceased and family left home on Thursday, Dec. 29th, for Prince Albert to spend Christmas with his father-in-law, Joseph Coombs, and being taken suddenly ill while there was hurried to the hospital, where he was operated on on Tuesday, Dec. 29th, when it was found that the abscess had burst. Mr. Thompson had suffered from attacks of appendicitis for the past two years and a severe attack in October. Deceased was 36 years of age and had been a resident of Plett's Springs district since 1900, arriving in 1905. He was married to one of Prince Albert's fair ladies, Miss Annie Coombs, and is survived by his wife and one child. Besides these a father, five brothers and two sisters, namely, W. A. Thompson, Watford, Ont.; Dr. John Thompson, Chatham; George and Henry of Birnam; his father and Allan on the homestead; Mrs. Wm. Walden, Forest, and Mrs. Andrew Bell, Virden, Man. The funeral was held at Prince Albert Jan. 7th and a large number of friends left Melfort and Plett's Springs on Thursday to pay their last respects to the deceased. The sympathy of a large circle of friends is extended to the bereaved family in their loss.

Honorable Acquittal

By some mistaken or wilfully misleading information furnished by parties at Watford a charge was laid against Herbert Tait, of Plympton Township, for being in an intoxicated condition in Wyoming and the case was tried before Magistrate Robert Black and Justice of the Peace R. Stirret, at Petrolia.
After some three or four witnesses had been called, not one of whom could give the least jot or tittle of evidence in support of the charge the prosecution decided to withdraw the information and recommended an honorable discharge. The Magistrates thereupon declared Tait to be entirely exonerated from the charge and gave him an honorable acquittal.
Where charges of this kind prove to be absolutely without foundation, there should be, firstly, adequate publicity given to the innocence of the defendant and secondly, some recompense for the slander and the loss involved in defending a false accusation.

Death of Mr. Francis B. Doan

On Saturday, January 23rd, there passed away, at his late residence on John street, Watford, Mr. Francis B. Doan, aged 75 years and 11 months. Mr. Doan was born near Niagara Falls, Ont., and came westward to Brooke township when 13 years of age. After remaining in Brooke for about 30 years he moved to Warwick Township, where he resided on the 2nd line, S.E.R., for a number of years, moving to Watford about 12 years ago. He was married in the year 1869 to Charlotte Temple, of Metcalfe Township by Elder Griffith, who resided at Stratford.
He is survived by one brother, John, of Kerwood, and one sister, Mrs. Margaret Smith, of Warwick Township. Besides his widow, ten children mourn the loss of a loving husband and affectionate father.—Mrs. Albert Clark, of Allan, Sask.; Mrs. Roy Tapp, of Biggar, Sask.; Mrs. Joseph Fuller, of Arkona, Ont.; Mrs. Dan, Roberts, of Watford; Miss Laura Doan, of Detroit, Mich.; William and Ben, of Watford; Rev. Arthur E. of Monkton, Ont.; Samuel, of Saskatoon, Sask., and Orville, of Plympton Township.
A large number of friends and acquaintances gathered at the funeral service, showing the esteem in which Mr. Doan was held. Rev. Mr. Robinson, of the Methodist church, conducted the service, preaching from the text, John

High School Literary Society

The High School Literary Society wish to draw the attention of the public to the following announcement which the Minister of Education has sent out regarding the war and the schools. The society is planning for a public meeting, patriotic in character, at which speeches and essays dealing with the war will be given. If any public-spirited citizen feels disposed to act on the suggestion in the final paragraph, the school will not doubt show its appreciation by entering wholeheartedly into any contest which is arranged. The following paragraphs contain the announcement of the Department of Education:
"As the present war, in which Britain is engaged, is undoubtedly the most momentous in the history of civilization, it is of grave importance that its causes and the interests at stake, as well as the relations thereto of the different nations directly or indirectly concerned, should be fully appreciated by the Dominion of Canada."
"The Minister of Education for Ontario accordingly, directs that the above topics shall form part of the course of study in history in every school in the province, so far as they can be intelligently taken up in the different grades."
"With the same end in view, the Minister strongly recommends that generously disposed citizens, as well as school boards, shall offer, under suitable conditions, prizes for essays on one or more phases of the present struggle. It cannot be too widely known, nor can it be too deeply felt, that while each of the overseas dominions is mistress in her own house, her welfare is bound up with that of the British Islands and that she owes loyal and filial service to the Mother of Nations."
"Any person wishing to offer a prize will kindly communicate with the secretary of the Literary Society.—E. D. Hicks, Sec.-Treas.
