The copy filmed here has been reproduced thanks to the generosity of:

Library of the Public
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

During the year 1872 there will be two Eclipses of the Sun, and two of the Moon, the latter being very insignificant.

1st is a Partial Eclipse of the Moon during the evening of May 22nd, and it will begin at 10.41 p.m., and will end at 11.56 p.m.; about one-ninth part of the Moon will be obscured.

2nd is an Annular Eclipse of the Sun, visible from Asia, part of the Pacific Ocean, the East Indian Archipelago, and the Indian Ocean. It will commence at 1.29 a.m. on the 6th of June, and will end at 5.11 a.m.

3rd is a Partial Eclipse of the Moon. It will begin at 5.2 a.m. on the 15th of November, and will end at 5.37 a.m. The forty-third part of its diameter will be shadowed.

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

ON the recommendation of the Honorable the Minister of Customs, and in pursuance of the provisions of the 11th Section of the Act 31 Vic. Cap. 6, intituled : "An Act respecting the Customs," His Excellency in Council has been pleased to Order, and it is hereby Ordered, that the following Regulations respecting the Coasting Trade of the Dominion, in amendment of the Regulations adopted by Order in Council of 28th July, 1868, shall be and the same are hereby adopted and established :

It having been enacted by Chap. 9, Sec. 22, 23rd Victoria, that the Governor may grant yearly Coasting Licenses to British vessels navigating the inland waters of Canada above Montreal, although such vessels may sometimes make voyages to Foreign Ports, it is hereby Ordered that the Bonds to be given by the Master or Owner of such vessel, on taking out such License shall not contain the condition provided for in Section 3 of said Regulations, "that such Vessels or Boats shall not be employed in the Foreign Trade," but that it shall be a condition of such Bond, that whenever such Vessel or Boat is employed in a voyage to or from a Foreign Port, the master or other proper officer thereof, shall report inwards and outwards, in all respects, as though he had not received such Coasting License.

Provided, that when a vessel shall sail from any place where there is no Custom House or officer of Customs, it shall be sufficient for the carrying out of this regulation that the owner or Master of such vessel, do, as soon afterwards as possible, forward to the nearest Custom House, a similar report in duplicate, or lodge the same at the first Port at which he shall touch where there is a Custom House officer.

8. Goods under a removal Bond from one Canadian Port to another Canadian Port, may be carried in any British registered vessel or boat, trading coastwise, with a proper License and Cargo Book, upon such goods being properly entered in the Cargo Book and in the account of *Transire*, in duplicate, the Collector at the Port from which such goods are removed, being required to forward by Mail, to the Collector of the Port from which the goods are destined all the particulars and description of the goods so forwarded, and the Packages shall be properly marked in red as now provided, but no Goods under Bond shall be carried in any Coasting Vessel or Boat until the Master has delivered an account in duplicate or *transire* to the Collector of Customs at the Port of lading.

9. No Coasting Vessel or Boat to touch at any Foreign Port unless forced by unavoidable circumstances, and the Master of any Coasting Vessel or Boat which has touched at any Foreign Port, shall declare the same in writing under his own hand, to the Collector or other proper Officer of Customs at the Port or place in Canada where his Vessel or Boat afterwards first arrives, under a penalty of \$100.

10. If any goods are unshipped from any Vessel or Boat arriving coastwise, or unshipped or water borne to be shipped, to be carried coastwise on Sundays or Holidays, or unless in the presence, or with the authority of the proper Officer of Customs, or unless at such times and places as shall be appointed and approved by him for that purpose; the same shall be forfeited and the Master of the Vessel or Boat shall forfeit the sum of \$100.

12. No Fishing Boat or boat used in Ferrying under 15 tons burthen, shall, except by special License or permission, carry any goods from a Foreign country, which are liable to duty, under pain of seizure, unless the same (in the case of Ferry Boats) be for the sole use of some passenger then on board.

13. No goods can be carried in any Coasting Vessel or Boat except such as are laden to be so carried at some Port or place in Canada, and no goods shall be taken into or put out of any Coasting Vessel or Boat while on her voyage by River, Lake or Sea.

TO MAKE ICE-HOUSES.

Ice-houses in private residences would be more generally adopted were it known how simple and cheap it is to construct them efficiently. The following may be relied upon :

Any apartment on the ground floor or dry cellar, or portion of either, may be converted into an ice-house at a trifling outlay in rough boards, sawdust, and joiner's work.

1. Drainage must be perfect to permit water to escape and exclude air, by siphon pipe or bell-trap leading to drain.

2. Floor—Thick loose boards to lay the ice upon, forming a floor and leading to the drainage.

3. Walls—Lined with boards, with at least 9 inches of sawdust, and well rammed down between the walls and boards.

4. Door about 2 feet wide, opening on to two sets of loose sliding boards with sawdust between ; these loose boards can be taken down to be level with the top of the ice as the ice is used.

5. Ventilation—A few holes in the top of the door, regulated by corks as may be found to answer ; all below must be perfectly air-tight.

6. The ice to be placed upon a block, and the top row covered with 6 inches of sawdust.

This principle answers for obtaining the greatest amount of cold from a single block, or from large quantities.

One ton of block-ice occupies about fifty cubic feet.

Above the ice, shelves and hooks can be arranged for provisions to receive the benefit of the cold air—wines, &c., on the sawdust over ice, or in contact with ice.

To divide blocks, use a wide-toothed saw for an inch, then a sharp axe with a smart blow on the sawn groove. Any sharp-pointed instrument will break ice into small pieces swiftly ; never use a hammer.—*Land and Water.*

HOW TO TRAP CROWS.

The *Poultry Chronicle* gives the following mode of trapping crows, which will interest boys :—The quickest and surest trap for crows is to place a steel trap in the shallow water of a pond, so that the jaws when open, are just under the water. On the treble place a tuft of grass or moss, making a miniature island, then cut a small stick with three branches, forking in such a manner as to support an

egg on them ; stick this about six or eight inches from the trap, lay a little moss, grass or leaves over it, and place the egg on the fork, so that it will appear as if floating on the water, cover the remainder of the trap lightly with grass so as to hide it from sight. To obtain the egg the crow will light on the "island," and, find, too late, he is caught.

CONVENIENT RECIPES.

To Remove Grease from Coat Collars.—Wash with a sponge moistened with hartshorn and water.

To Prevent Ink from Moulding.—A few cloves added to ink will prevent it from becoming mouldy, and impart an agreeable perfume.

To Extract Grease from Papered Walls.—Dip a piece of flannel in spirits of wine, rub the greasy spots gently once or twice, and the grease will disappear.

To Make Hard Water Soft.—Dissolve one pound of White Rock Potash in one gallon of water, and then use half a gill of the preparation to a tub of water.

To Keep Lemons.—Lemons will keep good for months if sliced when perfectly fresh, and packed in glass jars with a thick layer of white sugar between the slices.

To Extract Stains from Silver.—Sal ammonia, one part; vinegar sixteen parts. Mix and use this liquid with a piece of flannel, then wash the plate in clean water.

Sealing-wax for Fruit Jars.—Take resin eight ounces, shellac two ounces, beeswax half an ounce; melt the resin, then add the shellac slowly, and afterward the beeswax.

To Raise the Surface of Velvet.—Warm a flat-iron moderately; cover it with a wet cloth, and hold it under the velvet; the vapor arising from the heated cloth will raise the pile of the velvet, with the assistance of a rush-whisk.

To Remove Starch or Rust from Flat-Irons.—Have a piece of yellow beeswax tied in a coarse cloth. When the iron is almost hot enough to use, but not quite, run it quickly with the beeswax, and then with a clean coarse cloth. This will remove it entirely.

Novel Butter Cooler.—A simple mode of keeping butter in warm weather, where ice is not handy, is to invert a common flower pot over the butter, with some water in the dish in which it is laid. The orifice at the bottom may be corked or not. The porousness of the earthenware will keep the butter cool.

To Destroy Moths in Carpets.—Wring a coarse towel out of clean water; spread it smoothly on the carpet; iron it dry with a hot iron; repeat the operation on all parts of the carpet suspected with being infested with moths. No need to press hard, and neither the pile nor the color of the carpet will be injured, and the moths will be destroyed by the heat and steam.

How to Bake Griddle Cakes.—A griddle for baking cakes should never be greased, as this destroys the delicate flavor of the cakes. Scour well with a cloth and sand, wash with hot suds, wipe dry, and, just before baking, rub with a coarse cloth and salt. It is not necessary to wash and scour it every time it is wanted; only once to get all grease out; but use the cloth and salt every time you put fresh cakes on, just as grease would be used.

Violin Varnish.—Dissolve gum-shellac in alcohol by a gentle heat, and strain for use. This varnish is best on account of there being no oil in its composition.

To Remove Stains from Broadcloth.—Take an ounce of pipe-clay that has been ground fine, and mix it with twelve drops of alcohol, and the same quantity of spirits of turpentine. Whenever you wish to remove any stains from cloth, moisten a little of this mixture with alcohol, and rub it on the spots. Let it remain till dry, then rub it off with a woolen cloth, and the spots will disappear.

Cleaning Silk and Merinos.—Grate two or three large potatoes, add to them a pint of cold water, let them stand a short time, pour off the liquid clear, or strain it through a sieve, when it will be ready for use. Lay the silk on a flat surface, and apply the liquid with a clean sponge till the dirt is well separated; dip each piece in a pail of clean water, and hang up to dry without wringing. Iron, while damp, on the wrong side.

To Stain Violins.—Take one pound of Brazil wood and boil it in a half-gallon of water, an hour; strain the liquor and add one-half an ounce of cochineal; boil again gently, and it will be ready for use. This will produce a crimson tint. If you wish it darker, boil a small quantity of saffron in a quart of water, and apply it before putting on the crimson stain. If you desire a purple color, boil one pound of log-wood in three quarts of water, then add four ounces of pearlsh and two ounces of powdered indigo.

Cement for Crockery.—To make a good cement for crockery take one pound of white shellac pulverized; two ounces of gum mastic, put these into a bottle, and then add one-half pound pure sulphuric ether. Let it stand half an hour, and then add half a gallon ninety per cent. alcohol, and shake occasionally until it is dissolved. Heat the edges of the article to be mended, and apply the cement with a pencil brush; hold the article firmly together till the cement cools.

Gloss for Linen.—"Starch Lustre" is a substance used for washing purposes, which, when added to starch, causes the linen to which it is applied to assume not only a high polish but a dazzling whiteness. A portion of the size of an old fashioned cent, added to half a pound of starch, and boiled with it for two or three minutes, will produce the best results. This substance is nothing more than stearine, paraffine or wax, colored by a slight admixture of ultra marine blue. The latter may be added at will.

To Remove Ink Stains from Silver.—The tops and other portions of silver inkstands frequently become discolored with ink which it is difficult to remove. It may, however, be eradicated by making a little chloride of lime into paste and rubbing it upon the stains.

To Clean Silks, Satins or Colored Woolen Dresses.—Four ounces soft soap, four ounces of honey, the white of one egg, and one wineglass of gin; mix well together, afterwards rinse the article in cold water and let drain. Iron while damp.

To Remove Wax Spots from Cloth.—Hold a piece of red hot iron within an inch or two of the marks, afterward rub them with a clean soft rag.

Scouring Draps for Removing Grease Spots.—Camphene or spirits of turpentine - three ounces; essence of lemon one ounce; mix well.

Fruit or wine stains that have been long in linen may be removed by rubbing the part on each side with yellow soap. Then lay on a mixture of starch very thick; rub it well in, and expose the linen to the sun and air till the stain comes out, which will be in three or four days.

To clean paint, smear a piece of flannel in common whiting, mixed to the consistency of common paste, in warm water. Rub the surface to be cleansed quite briskly, and wash off with pure cold water. Grease spots will in this way be almost instantly removed, as well as other filth, and the paint will retain its brilliancy and beauty unimpaired.
