Names Britain, France and United States as a Coalition -- Policy of Non-intercourse Would Have Desired Effect--Instances Boxer Uprising in China as What Nations Can Do.

London, Oct. 17.—"Five nations, or even three handed together in a league of peace could banish all war in the future." This opinion was expressed today by Andrew Carnegie in his address to the students of the University of St. Andrew, Scotland. In outlining the plan for the league for peace, Mr. Carnegie said: "Five nations concentrated in quelling the recent Chinese disorders and rescuing their representatives in peril. It is perfectly clear that these five nations could banish war. Suppose even three of them formed a league of peace inviting all other nations to join and agreed that since war in any part of the civilized world affects all nations, and often seriously, that no nation shall go to war, but shall refer international disputes to the Hague conference or other arbitration bureau for peaceful settlement, the league agreeing to declare non-intercourse with any nation refusing compliance."

"Imagine a nation cut off today from the world. The league also might reserve to itself the right where non-intercourse is likely to fail or has failed the military authorities of Britain, the lack of sufficient numbers willing to enter the man-slaying profession, we should soon have the demands formulated for a league of peace among the nations."

"The Emperor of Russia called the Hague Conference, which gave us an international tribunal. Were King Edward or the Emperor of Germany or the President of France acting for their governments to invite the nations or send their representatives to consider the wisdom of forming such a league the invitation would no doubt be responded to and probably prove successful."
