C. A. Davia, M. D., Supt and Surgeon of the United States Marine Hospital, at Unobea, Mass.
Did space permit, we could give many hundred used names, from all parts where the Pulls have been used, but evidence even more convincing than the certificates of these eminent public men-is shown in their effects upon trial.
These Pulls, the result of long investigation and science can afford. They are compounded not of the drugs themselvis, but of the medica state tast and most complete which the present state of medical science can afford. They are compounded not of the drugs themselvis, but of the medical virtues and the estate of purity and combined together in with a number at big use the best results. This system of comparison for medicines has been doed the drugs themselvis, but of the medicinal virtues and the Oberry Pectoral and Piths both, to produce a upor efficient remedy than had splichto before of table by any proces. The reason is perfectly ob-vious. While by the old mode of combosition, er-ery medicine is burkned with more or less of aeri-monious and injurious qualities; by this, each indi-vidual virtue only that is desired for the curative effect is present. All the inner and olonoxious qual-ities of each substance employed are left behind; the equative virtues only being retained. Hence it is soft-evident the effect should prove as they have, and every intrus only being retained. Hence it is soft-evident the effect should not be the hind. The equative virtues only being retained. Hence it is soft-evident the effect should prove as they have, more powerful antidote to disease thin any other medicine known to the words. the value of your Piils, in cases of dropsy. For mine months, I suffered the greatest ance as a skeleton, and with no more strength in me than a child just both. It was then that I thought of trying your Fils and immediately sent for a quantity, and commenced using them. The result I can scarcely credit even now, although true it is. After using them for four wreks, I felt much better and by persevering with them, at the expiration of two months, 1 was completely curid. I have since enjoyed

incre powerful antidote to disease than any other neclicitic known to the woald. As it is frequently expedient that my medicine should be taken under the counsel of an attending Physician, and as he could not properly judge of a temedy without knowing its composition, I have supplied the accurate Formula by which both my Pertoral and Pills are made to the whole body of Practitioners in the United States should be any prevention of the state should be any new who has not received them, they will be proughtly forwarded by mail to his address.
