"UNB finances tight" say administrators

By DERWIN GOWAN
Managing Editor

Members of the UNB administration convinced about 100 students that the university is in a tight financial situation at a forum in Lady Dunn Hall last Wednesday night.

The forum included university president Dr. John M. Anderson, comptroller Sam Mullin, vice president (finance and administration) James O'Sullivan, dean of students Barry Thompson, dean of men's residences Peter Kent, dean of women's residences Joy Kidd, and was chaired by history professor Dr. Gillian Thompson.

They were particularly concerned that financial cutbacks would adversely affect the quality of education offered at UNB.

Anderson said fee increases would be decided on at the next board of governors meeting planned for April, but he refused to make a prediction as he had no word from the Maritime Provinces Higher Education Commission as to how much the university will get next year.

"It looks like next year will be a pretty tight serious year," he said, predicting Maritime governments would not go for the 12.5 per cent increase in operating grants proposed by Maritime colleges and universities. "I'll tell you what my hope is. It's that there won't be any increase at all."

"We didn't know last year until the middle of February and that was bad enough," said Anderson. "The best I can do is speculate." He said the university was in a particularly tight bind as they are supposed to tell faculty of the amount of salary increases for next year by April 1.

Anderson said that ten years back tuition fees paid for 35 per cent of educational costs next year, and this has been more than halved, despite fee increases. Although Anderson said there was a philosophical argument that students should pay a fixed percentage of university costs, he drew reference to a speech by New Brunswick premier Richard Hatfield in Saint John last week that tuition fees might be eliminated by 1987.

Anderson said "very severe measures" had to be taken this year to make for \$400,000 in revenue the university was short of due on overly optimistic prediction of enrolment figures.

He said the university had to take \$300,000 out of funds allocated for non-space capital expenditures. This category includes capital funds not allocated for new buildings. Items cut back

Photo by Jack Triffts

on include lab equipment, typewriters, books for the library, and more.

Anderson claimed this was not readily noticeable but departmental heads were aware of these cutbacks.

"What we are doing is building up a debt," he said, in terms of depreciation on old equipment, and could affect the quality of education at UNB adversely in five year's time.

"We're very conscious of the fact that at some point, tuition fees don't do anyone any good," Anderson said. He said that Munt Allison University and the University of New Brunswick have the first and second highest fees respectively in Canada, and, although Ontario will approach the same level next year, "There is no question that it's a pretty sizeable sum."

Mullin echoed the same idea earlier in the meeting when he said, "If we push tuition fees up, we will drive you out of here."

Anderson claimed the reason for this situation was the low level of government support given to Maritime universities compared to other parts of Canada.

"Where our money ultimately comes from is from the people," explained Anderson.

All dealings between the university and the government is done through the MPHEC, which since 1974 has been responsible for 24 post secondary educational institutions in the Maritime Provinces. Nineteen of these institutions were universities.

The MPHEC is an advisory committee to the Council of Maritime Premiers. After consulting with the universities, the Commission recommends the level of funding each institution should receive, and the government acts on this advice.

However, said Anderson, "The

operative word is advisory."

Last year the New Brunswick government did not accept the advice of the commission and universities in the province received only half the increases of their Nova Scotia and Prince Edward Island counterparts, he said.

Although the university receives its funds from the MPHEC in lump sums and has no further control over its expenditure, Anderson said the Commission has two forms of control over UNB.

First, operating grants to the university are awarded by a formula based 75 per cent on a fixed grant and 25 per cent on enrolment. Second, the commission has some control over capital expenditure as they must approve new programs. The only other stipulation is that the commission asks the university not to deficit budget.

Anderson said UNB is presently considering offering a doctoral program in psychology and a bachelor of science program specializing in marine biology.

Anderson said the university has three sources of revenue - the provincial government, the federal government, and private sources.

The province is the source of approximately 80 per cent of the university's operating budget via Anderson, and he said this was exclusive of \$1,750,000 in research grants.

Anderson said, however, that between 65 and 75 per cent of the provincial grant comes from the federal government under the Fiscal Arrangements Act which controls federal provincial transfer payments.

He said this act is due to expire March 31 and the new version, Bill C-37 is presently before Parliament.

He said other federal monies come to the university in the form of sponsored research grants from the Canada Council, National Research Council, and some grants from individual federal departments.

Private sources of revenue include tuition and residence fees, endowments and bequests, and services offered to the community.

Endowments and bequests account for about 1.5 per cent of the university's operating revenue, and usually has stipulations controlling its expenditure. Services offered to the community.

Endowments and bequests account for about 1.5 per cent of the university's operating rev-

enue, and usually has stipulations controlling its expenditure. Services offered to the community include use of the computers and work done by the physical plant for Saint Thomas University and the provincial archives. This provides the university with about three per cent of its revenue, said Anderson. Residence fees are supposed to be set on a break even basis, and losses have to be absorbed elsewhere.

That leaves 15.5 per cent of the operating funds to be raised from tuition fees.

Anderson and Mullin agreed that the university's income was relatively inflexible, particularly since the government will not provide funds for ancillary services such as residences and bookstores.

Mullin said it would cost over \$29,000,000 to operate UNB this year. The provincial operating grant was \$25,102,000 and regular session tuition fees amounted to about \$4,350,000.

Mullin said two-thirds of the operating costs are in the academic and related areas. Seventy per cent of this total, he said, was taken up by salaries and a substantial part of the remainder was "out of our control". He said this included such things as employee benefits and lighting bills.

Mullin said this meant the university was limited in the areas where cutbacks could be made if educational standards are to be kept at the present level. The university, he said, was trying to keep these cutbacks to a minimum.

Hatfield offers us nothing

By TOM EVANS

The forty-eighth session of the New Brunswick Legislative Assembly opened on March 1. The Speech from the Throne did little to encourage students in Post Secondary Education. The speech contained three frivolous statements on education. (1) To include a second language as an official part of the school curriculum (still will be optional), (2) Driver education to be expanded (3) To permit school boards to retain fees paid for use of school facilities.

In a news conference held by the Legislative Press Gallery the Premier stated that the government planned no new policies or programs to assist students further their education in New Brunswick. Hatfield, in response to

a question concerning the forecast of high student unemployment this summer said his government will do nothing to improve this potentially adverse situation. He said it is a time of restraint and his government will implement no new employment programs. The regular employment of students by the provincial government will continue during the summer of 1977.

Hatfield gave little moral encouragement to students in the

Province concerning declining student enrolment at most Provincial Universities. It looks like the policies of the Hatfield Government will accelerate this trend.

Other highlights of the Speech from the Throne were similar to a collection of government news releases.

An Introductory Paper dealing with the need for access to Government information by the public, will be presented. A new Police Act will be introduced. Legislation will be presented reducing the speed limit on most sections of Provincial highways to 55 miles per hour.

An Employment standard code covering such matters as minimum wages, wage protection and recovery, vacations, etc. will be introduced. Negotiations will continue with Ottawa on energy conservation programs for the Province. A small business section will be set up in the Department of Commerce and Development and a small business management advisory program will be established. Discussions are being held with Ottawa to establish property register and to provide financial assistance to owners of endangered property of historical significance.

In retrospect the Speech from the Throne gives little leadership in a time of transition.

Calendars for Intercession and Summer Session will be available on March 14, in Rm. 125, MacLaggan Hall.

Registration forms are inside the calendars.

Due to a new policy instigated this year payment for the courses, (\$74 — \$148) must be made upon registration.

Deadlines for registration are April 22 for Intercession and June 24 for Summer Session.

Centre deficit to improve

UNB president John M. Anderson said he was "hopeful" the Aitken University Centre would not operate at a deficit in 1977-1978.

He made the comment last Wednesday at a forum on university financing in Lady Dunn Hall, answering a question by ex-Students' Representative Council member Allan Hildebrand.

"I'm confident that if we can

hang on for three or four years we can make money," he claimed. He added, however, that UNB is not in "the private enterprise business."

He said there were some possibilities of sources of funds to cover the deficit on the initial costs of the building, but that it would be "inappropriate" to make these possibilities public at that time.

He said the centre ran an operating deficit this year.

Anderson under attack about residence fees

By DERWIN GOWAN
Managing Editor

Residence students are worrying over possible fee increases and service cutbacks, and members of the UNB administration were fired with a whole series of questions on this issue at a forum in Lady Dunn Hall last Wednesday night.

Negotiations for next year's food contract with Saga Foods are presently underway and some students, particularly from Lady Beaverbrook residence, are concerned that their dining hall may be closed. Others claimed that if fees go any higher, UNB residences may be priced out of the market.

University vice president (finance and administration) James O'Sullivan defended the deficit budget for the residence system, saying residence fees counted for approximately 88 per cent of the residence costs and even higher for MacGee House, which is significantly higher than the 15.5 per cent of university operating costs covered by tuition fees.

O'Sullivan said the problem with residence financing was that the provincial government allowed no special grants for residence costs. O'Sullivan said increased residence costs, according to official government policy, are supposed to be meant by increased student aid to individuals.

He said the pattern over the last ten years was for a gradual deficit to pile up over a number of years until there was a serious problem. Then there would be a drastic fee increase and the deficit would drop. However, as costs rose, the deficit would build up again. The present debt, said O'Sullivan, was approximately \$350,000.

O'Sullivan said 38 per cent of residence costs are taken up by food costs, 14 per cent by the mortgage, 19 per cent by janitorial services, 11 per cent by maintenance, 8 per cent by security services, and 8 per cent by heat, light and water.

There are two ways to reduce the deficit," said O'Sullivan. We can increase revenue or we can reduce costs. I find that students resist both."

The problem is further complicated by the fact that there are presently about 45 vacancies in the residence system, causing further financial problems. However, Dean of Students Barry Thompson pointed out that other universities in the Maritimes have 100 and 300 vacant rooms, although their costs are slightly less. He said he believed this was because of superior programs offered here.

University president John M. Anderson said enrolment was expected to rise until 1981 and then fall off.

Aitken resident Allan Eddie said a basic problem with residence financing was that mortgage costs continue over a twelve month period while revenue came in for only eight months. O'Sullivan agreed that better use should be made of the residences in the summer if revenue could be realized.

He said any new student housing projects would have to be planned to break even.

Photo by Jack Trifitis

Anderson said no final word on fee increases can be expected until the Maritime Provinces Higher Education Commission lets the university know how much money will be available next year. It is expected that the decision will be made at the next Board of Governors meeting, planned for April.

Residence students at the forum were critical of the prices and services offered by Saga Foods, but O'Sullivan said the university planned on remaining with that company.

O'Sullivan said that even if another company offered a better price, the university would have to take into account the general level of service provided regardless of the price.

If the food contract was put to public tender a lower bid might be received by someone "attempting to get his foot in the door," explained O'Sullivan. However, he said they would probably run at a loss for a year, then demand a price hike, leaving the university where it started.

O'Sullivan admitted to a questioner that after Saga found out last May that the food contract would not be let to tender, they claimed they miscalculated labour costs and demanded a \$50.00 per head increase. This was not resolved, he said.

Eddie, however, claimed the consumer price index showed a drop in food prices, although Saga budgeted for price increases since the increases did not materialize, he said this amounted to a profit for Saga, and suggested the university press the company to moderate any price hikes.

Thompson said later another factor in food costs was the number of meals offered and under what conditions. For example, he said UNB offers resident students 19 meals per week with no limit on "seconds". Others offer 21 meals with no seconds, some 14 with seconds, and so on.

Thompson opposed reducing meals from 19 to 14 per week as it would only amount to a \$20.00 per student price drop. He said Saga takes a missed meal factor into consideration when determining costs, and, if only 14 meals per week were offered, the number of meals missed would drop apprec-

ably, necessitating a price per meal increase. The basis of this system is that students pay for 19 meals per week whether they eat them or not.

Thompson said UNB residence students pay less for food than they would at Mount Allison, Carleton, or Moncton, although some questioners disputed this.

Lady Beaverbrook students are concerned their dining hall may be closed despite the fact that the Board of Dons oppose the idea and the Food Contract Committee passed a resolution making this non-negotiable at their last meeting. Anderson, Thompson, and Dean of Men's Residences Peter Kent said the cut would not be made unless students would directly by reductions in fee increases.

Thompson agreed with Kent that it would be cheaper to have one big dining hall instead of the present seven, but Ken said total costs of the residence system would have to be taken into consideration before it was decided where cuts should be made. Thompson said if a meal hall was closed it would be the one where the least amount of people would be affected.

LBR Food Contract Committee representative disputed the claim

that money would be saved by closing the smaller dining halls, and said if Saga was losing money they would not stay here.

"The lineups at McConnell Hall are long now at lunch," Lynch said, and suggested the fire marshal would not allow more people to eat there.

Food eaten at LBR is prepared at McConnell Hall, he said, so the only saving would be on serving costs.

About 40 people from LBR ate dinner at Maggie Jean on February 24 and at McLeod House on March 8, and Saga manager Bob Lloyd of Lady Dunn Hall had to be called in on both occasions, Lynch claimed.

He said some residents of Maggie Jean had to eat in the lounge, despite the fact that large numbers of them had left for March break. He predicted LBR residents would eat at Maggie Jean should their own dining hall be closed.

Lynch rejected the notion that other residence students subsidize the LBR dining hall, saying that the residence students pay approximately \$230 per head on the mortgage, including Lady Beaverbrook residents, although this residence has no mortgage.

Predicting cuts in services next year, Lynch said, "The whole university position towards running this thing seems to be makeshift. It's rapidly approaching the situation where the residence system is no longer viable due to costs."

Other queries on the residence system included co-ed residences, summer residences for nursing

students, students who move out after first term, and janitorial services.

Anderson said he was "hopeful" that other residences would become co-ed if the experiment at Victoria House works out next year, although it would be "premature" to make predictions at that time.

A nursing student asked why McLeod House and not Maggie Jean was reserved for students of that faculty in May and June, since it was much nearer the hospital. Dean of Women's residences Joy Kidd said this house had already been rented to the learned society for their convention this summer, although she agreed with the nurses' position.

University comptroller Sam Mullin said students moving out of residence at Christmas were entitled to a slight refund and those moving in after had to pay slightly more than half a full year's fee since the first term is slightly longer than the second.

Kidd said proposals for students to take over resident janitorial services were not favourably received in the past as the money saved would be slight as wages would still have to be paid. She added that although some students might be willing to do this one year, this may not be the case five years hence, if it was on a volunteer basis.

She said she would be willing to consider setting up a system like that of Harrison House, where residents have been paid for doing their own janitorial services for the last three years.

Student summer employment looks bad

Student summer employment opportunities for 1977 look to be the same as last summer according to Campus Student Manpower.

Located in Annex B the service has been receiving application forms since early January. Students in the faculties of Arts and Science will be the "hardest hit", while those in Engineering, Forestry and Business Administration stand a better chance.

The two federally sponsored programs, Young Canada Works (YCW) and career-oriented summer employment, programs COSEPS will be hiring students across Canada. The effect this will

have on the Maritime region is uncertain. YCW projects have not yet been confirmed, and the COSEPS hiring cannot be arranged until government departmental budgets are made up in April.

The federal government has been sponsoring the Hire-a-Student advertising the past few weeks and the F'ton Student Manpower will be opening mid-April to help arrange local employment.

Mrs. MacMillan Campus Manpower, urges students who have not yet applied for summer employment to do so immediately. The UNB Personnel Service Office is accepting applications for

work on campus. "Employment in the Library and for the Learned Societies Conference are complete and the Physical Plant and other departments are unsure of how many vacancies are available,"

said Miss Lowe, Personnel Officer.

Several part time jobs (2 or 3 days) are available throughout the summer in various departments and during Registration week. The University pays a minimum 3.10

an hour for students or the present laborers rate depending on skills.

Further information can be obtained at the Personnel Office Administration Complex.

Referendum regulation

Fifty percent 'yes' means 'no'

By DERWIN GOWAN
Managing Editor

What was meant to be a quick meeting turned into a full scale debate on the implications of a resolution to change the regulations governing petitions affecting the student union constitution.

The motion finally passed at the February 24 special Students' Representative Council meeting was the same one given notice at another special council meeting a week before, namely, to empower a two thirds vote of the students' council to require two thirds of the student body to vote on any petition the council considered of especial importance before the results of the petition would be accepted as binding.

Ex-student and ex-councillor Rick Fisher told council that although the motion was correct in principle, there was an "anomaly" in the wording. One third of the student body plus one could effect a constitutional change provided 67 per cent turned out to vote under the proposed regulation, Fisher said, because a decision of a majority of the people voting was to be considered binding.

However, Fisher continued, if only 60 per cent of the students voted, yet 50 per cent took the same side on an issue, the petition would fail.

Councillors Mike Bleakney, Jack Trifts, Jan Trifts, Phil Wong, Andrew Jones and Brent Gilchrist agreed with Fisher.

"I don't think 34 per cent is enough," said Bleakney, and suggested that 50 per cent of the students should have to vote in

favour of any change.

Vice president internal Jan McCurdy said Bleakney's idea was "impractical," but Gilchrist agreed with him.

Union president Jim Murray said, however, that it was important to pass the motion on the floor and make amendments later. "Any change could hurt us," he said. "Any amendments can be made in the future but we've got to put this in."

Law representative Hicks sided with Murray, saying, "I think there's a danger in quantifying these things. We want participation, we want two-thirds of the students to come out and vote."

Fisher replied, "I find it curious that Mr. Hicks, who is about to become a lawyer, will reject a decision of 50 per cent of the students. I find that scurrilous."

Former councillor Allan Hildebrand, who claimed the motion was formulated for the specific purpose of preventing a petition he organized to make student union fees optional (Brunswickan, Feb. 25, 1977), said the motion would make council "by default" the only body at UNB capable of changing the bylaws and regulations.

After the regulation passed Bleakney moved that the regulation be changed to require two-thirds of the campus to vote in favour of any "substantially important change," but this was opposed.

It would be virtually impossible to change anything," Hicks protested.

Jack Trifts responded, "It's just not realistic at all. Two-thirds of

UNB students wouldn't be in favour of anything.

Union vice-president external Alex Kibaki Murithii was also skeptical that two-thirds of the campus would take one side on an issue.

While amendments were being prepared, it was moved and passed that the meeting adjourn.

Kelly new AUC director

Peter C. Kelly has been named acting director of the Aitken University Centre, University of New Brunswick President John M. Anderson said today.

Mr. Kelly replaces D.G. Sedgewick who will return to Africa on assignment with the Canadian International Development Agency (CIDA).

Associated with UNB since 1947 as director of athletics for 28 years and most recently as director of administrative services for the faculty of physical education and recreation, Mr. Kelly will head Aitken Centre activities until a continuing appointment can be made.

Mr. Sedgewick was named director of the Aitken Centre in 1975 after a two-year term for CIDA as bursar at the Gabarone campus of the University of Botswana, Lesotho and Swaziland. He is returning to Africa for CIDA as comptroller of the University College of Swaziland. The term is for two years and is renewable upon negotiation.

F'ton Airport invaded

On Thursday, Feb. 24, Fredericton Airport was the scene of hilarity and havoc as approximately 200 UNB students invaded, suitcase in hand.

The event was the annual Suitcase Social, sponsored by Bridges House with Tibbits appearing as the invited guests. In its sixth year, the Social has always been a popular if not profitable event.

Brian Keirstead, Social Chairperson of Bridges, said that 500 of the 600 tickets printed were sold. Prices ranged from 1 free up to \$4.00.

The money acquired was then used for prizes, and a pub. The main attraction was a 5 day excursion to Tampa, Florida. Airfare and hotel accommodations

were paid for and the winner was supplied with \$150.00 spending money. Kim Weatherby of Tibbits Hall was the holder of the winning ticket this year, and left for Florida Friday morning with a friend.

Other prizes included beer and liquor, supplied in part by Schooner, with the excess paid for from the proceeds of the ticket sales.

The losers returned "en masse" to Bridges House where a pub featuring Red Eye took place. A Disco sponsored by CHSR went on simultaneously in the basement. Keirstead said the pub was "really good." It was subsidised by Bridges.

Despite a small loss, Keirstead termed the event a "success". Tibbits is aiding Bridges in splitting the cost of the loss.

After your 1st degree, then what?

York's MBA is an option

Business Administration - Arts Administration
Public Administration - Joint MBA/LLB

Task force to study energy conservation

The University has established a Task Force on Energy Conservation (a) to study conservation practices here and at other universities across the country, and (b) to recommend immediate, short and long term management measures for UNB.

Conservation depends upon every one of us. If all individuals at

our University became conservation-minded, we could energy waste into additional resources to serve UNB's primary functions as a university.

Students, staff, faculty and administrators are urged to suggest opportunities for energy conservation. Do you know of any

area on campus where lights are left on, or where the room is too hot or where the windows are left open, or where the water tap drips -- in fact, where there is any instance of any kind of energy waste? Then please tell the Task Force about it.

Return the form below today!

SUGGESTIONS: _____

The sixty per cent solution ?

At an "emergency" meeting of the Students' Representative Council last week they "corrected an oversight" in the new union regulations. This "correction" stipulates importance that are to be brought to referendum, when so designated by a 2/3 of the SRC, must be voted on by 2/3 of the student body to make the referendum result valid.

The primary motive behind this change was to prevent the Hildebrand petition to make union fees optional from being successful if voted by a small number of students. A laudable thought, no doubt. This is probably something that should be down on paper in some form. But NOT this form.

One councillor said "If you find a cancer, you cut it out." A more accurate analogy to what this regulation does is, "Cancer? Shoot the patient!"

The first argument against the new regulation is that 2/3 of the students are not very likely to vote on anything. For instance - Be It Resolved That: The student union be permitted to detonate a thermonuclear device in the vicinity of the SUB. Be it further resolved that should this be unsuccessful in stirring student interest that CSL be granted \$2 million to think of a better idea. Would YOU vote on it?(be honest now).

The second, and much more serious problem, is that this SRC does not seem to realize the effect of making a constitutional

rule. They say, "Well of course WE wouldn't do something like that!" when confronted with a hypothetical consequence of the rules they make. And usually, of course, they wouldn't. But that is not the point. The point is that as time goes on things are interpreted differently by people. "Substantial importance", in other words is simply too vague. This could mean anything to 2/3 of a hypothetical Council in a hypothetical mood.

And, although this Council would never stoop to this, an SRC could just conceivably effectively block something ten percent of the students want to take a referendum vote on. In fact, this same hypothetical SRC, given present trends, could be 2/3 elected by acclamation.

A third point is that, under the new regulations, 34 percent of the student body can change the constitution provided 66 percent of the students turn out and vote. However, if 55 percent of us vote a particular way on a referendum but only 60 percent of us turn out, then the referendum fails. Thus the new regulation defies all rationality. But you try to explain that to the SRC. Good luck!

Therefore, as it stands, the Council can now judge something "better" than a substantial percentage of the students as to its importance. Since they regard by-laws and regulations so casually, it shouldn't be too hard to get it changed. Maybe if we made them a substantial bribe.

'Where does our money go?'

Who will answer?

"Where does our money go" was the title of the gathering of heavyweight administrators and students. The purpose was to allow some questions from students as to the running of this university and the residence system in particular.

All in all the presentations on the part of the three principle administrators, the president, the comptroller, and the vice-president were straightforward and to the point. When the questions were asked from the floor,

however, some of the answers were just a little too slick for us simple students.

The real question that all students want the answer to is, "How much do you guess the fees will go up?" We can appreciate that the tuition fees are as yet unknown, but it is hard to believe that the residence fees cannot be estimated at this point.

The vice president, when asked this question, repeatedly chose to side step it by saying that they 'could go up, or could go down'

depending on the university's willingness to allow the deficit to creep up.

Without wishing to pick on the vice president, The Brunswickan would suggest that this sort of thing is what causes problems between students and the administration in the first place. The real principle here is if more of us were involved in the knowledge of the decision making processes, the university would be a happier place.

The Brunswickan would like to

thank president Anderson and company for making a very real effort to communicate some of the problems encountered in running this university to students.

The Brunswickan would also like to agree with Dr. Anderson in confirming the very important fact that a degree from UNB is listed in the top ten in Canada (number six by one report). This, no doubt expresses the feeling shared by the nearly six thousand students here at UNB that we are indeed among the top ten.

The continuing saga of Quebec vs Canada

Canada is falling apart at the seams.

Our nightly news reports are plagued with information concerning a tentative Quebec separation. The newspapers have polls, individual provinces have discussions, and most every law abiding Canadian citizen, however few, have discussed the Quebec situation with another. One must consider, for all of the time wasted on the subject,.... Who is getting all of the publicity from this affair? Well, Quebec is, of course.

So, why doesn't Canada get a little publicity of its own? We must consider Quebec's social donations to our country and ponder whether they should actually be a part of our system. Suppose, that after intense governmental investigations, Canada discovers that it would prefer to be without Quebec. What do we do? Well, we just boot Quebec out of Canada before the Quebecers have a chance to vote on the subject. Now, wouldn't that be a dirty trick to play on Rene Levesque?

We may now consider Quebec as a new country. It would normally retain its provincial name as the name of the newly formed domain. Then again, "Lower France" has a nice ring to it, but we can let the Quebecers name themselves.

As we progress through time, worldwide ignorance and Canadian negligence, plus exceptionally high tariffs placed upon them, cripples the Quebec economy. As Canada is as happy as hell to be rid of the Quebecers, the country must go south for the amounts of economic assistance that it is in need of. One thing may lead to another and Quebec may tentatively become part of the United States of America.

Of course, the Parti Quebecois aren't as stupid as they look. A sizeable contribution to the size of the United States should only be paid back back with an equally beneficial contribution to Quebec. So, perhaps we could expect forced bilingualism on, maybe,

North and South Dakota, a French minister in Plains, Georgia, and the implacement of "Exit-Sorti" signs in every state. However, do the Americans know what they are getting into? We can expect scores of difficulties to a rise in such a situation. Black and white English people may show an apparent dislike to Quebecers, a new prejudicial

fiasco may develop, and the Yanks are bussing Quebecois all over the countryside. The Quebecers

scream about persecution and American governmental policy must be altered every time to suppress time these complaints. St. Jean Baptists day may become an American holiday and Jimmy Carter will take French lessons from Bob Stanfield. Then the Quebecois complain again as they discover that the U.S. has given them only 1/2 of an electoral vote. Once again, policies are realtered, Quebecois given 3/4 of an electoral vote and a French television network is developed in America.

One complaint leads to another, and finally the Americans discover that the benefit of Quebec in their system must be considered. Of course they will find it similar to a historic situation which had occurred in Canada years before. So instead of copying Canadian policy, which is an insult in itself, the rest of the United States votes and the U.S. separates from Quebec.

Once again Quebec is alone, now being the United States of Quebec, which, of course sounds stupid, but that seems to be the way that some politicians are. Well, where do the Quebecois go now? Why to Russia, of course. However, Russians are communists, and everyone knows that

Commies are shifty. So, he Russians imprison all of the top notch French hockey players and proceed to breed them with some of those big ugly Russian women that we've all heard about. They push Quebec aside, and what do we have left? Why, we have a crippled country without a hockey team, that's what.

Of course this article is extremely exaggerated and such a situation will most likely never occur. We must not consider Quebec as being totally radical or of being totally unstable in standing on its own feet as a separate entity. If Quebec feels they would be better off without the rest of Canada, they are entitled to think this way. It is Quebec who must consider the benefits and losses of their separation. Our political system is organized in such a way that Canada cannot rid itself of Quebec, although Quebec has the right to separate if they so choose. However, if we did have the power to rid ourselves of them, would we? Presently there may be a lot of tired Canadians sitting around questioning Quebec's worth.

Should these people try to make Canadians out of the Quebecois or

are they fed up with the Québec-Canada cat and mouse game?

Perhaps a lot of these people are saying "Oh! Piss on Quebec!" now, and are their numbers increasing? If so, they have ascertained the point of this article.

C. Wash

Thanks chief!

Dear Sirs:

I would like a letter to thank the security people here at UNB. I've had two instances to go down asking for their help and they have been very willing to give all the assistance they can. And in fact, they have gone out of their way to do so. So, to Chief Williamson and the rest of your staff, Thanks.

Joan Clogg

Gone to Africa

Dear Editor:

My successive letters to your paper might suggest the Aitken Centre needs a regular column, but with any luck, this may be the last for awhile.

As the first Director of the Centre, I bear some responsibility for its shortcomings and there seems to be enough of these, according to the complaints which have appeared in your paper. I would like to think there are students wandering around this

Campus who think the Aitken Centre has done a few good things and even improve as time goes by.

For the record, I want to state my appreciation to the staff people here; Roy, Mel, Doris, who have helped so much and as well Timmy, John, Jon, who help keep the place moving and I hope they will give their good support to Roy.

There are many students who

who are great people and many others -- Ewan, Trevor, Keith and some of the girls -- Ann, Wendy -- there are simply too many to name but I thank them most sincerely.

To the people who break our chairs, steal our flags, wreck our washrooms, throw-up on our Rinktex, steal our Exit signs, break beer bottles against the building; I forgive you all but I hope that the Aitken Centre will command your respect someday.

To the ubiquitous J. David and the shy but wonderfully competent Douglas B. for your help to the Centre and particularly for the marvelous sounds you created here, my thanks, and you were absolutely right to insist on the best.

Despite number of opinions to the contrary I think the Aitken Centre will do great things as time goes by and alot of students, present and future, will be happy that the President took the gamble in creating a place like John Meagher with his ideas and Eric Garland, who quite literally built the place, will get the credit that is their due.

If anyone of the UNB Campus Community over the next couple of years happens to be in an airplane that, through bad weather, is diverted to Johannesburg, you are only 500 miles from Manzini and if you take the trouble to drive about twenty miles to the Luyengo Campus of the University College of Swaziland, ask the first person you see where the Bursar lives. I might even be home that day.

Sincerely,
D.G. Sedgewick

"Get it together UNB"

Dear Sirs:

What is this university coming to? Teachers missing more classes than students.

This letter concerns particular B.B.A. course which is being offered at UNB. The subject in question is BBA 2302 supposedly

being "taught" by Ms. Brenda

Dunbar.

As of January 11, 1977 to February 17, 1977 Ms. Dunbar has attended only five out of a possible twelve classes for that time period. Her students on the other hand have attempted to attend as many as possible of the same.

My question is: What the hell is going on here? It seems to be writer that a student has a right to what he paid for, that is, two(2) lectures a week in this course instead of an average of .833 per week.

A rather important problem here is the fact that an exam has been scheduled for February 24 on 13 chapters (259 pages) in the course. The students were not informed of this test until February 17. Up to February 17, Ms. Dunbar had attended only four (4) classes.

What are we, as students, supposed to do in such a case? We have not had the benefit of adequate teaching by Ms. Dunbar. It seems such a stupid waste that the University would put up with such absenteeism by a hired lecturer such as Ms. Brenda Dunbar.

Hopefully this will be looked into by the University.

Coffee crunch

Dear Editor:

As most people are aware the wholesale price of coffee has been skyrocketing over the past few months.

We have been absorbing this increased cost, however, recent additional increases have made it impossible for us to continue the current retail price.

We are forced to ask the consumer to off-set a part of this increase by raising the price to \$.25 per cup. Of course tea and hot chocolate will remain the same.

This will be effective Monday, March 21st.

Sincerely,

Frank Gillett
Director Food Service

Stand up Canadians!

Brunswickan:

All right, Canada, let's stand up and be counted! Why should we sit back and pretend that

Levesque & Trudeau have our country to dispose of like some fiefdom in Aquitaine or Italy.

I am a Canadian, not a French Canadian nor an English Canadian. Strictly a Canadian. I was born in New Brunswick on the Miramichi River. I do not ever intend to ask permission from some mini-Hitler if I can visit my birthplace, so -

Let's rifle in hand and ask who stops me! My ancestors shed much of their blood for freedom and the soil of France is well watered with Canadian blood (vive Le Gaulle). Let us remind Mr. Levesque that this is Canada, not his Quebec but our Canada.

I was five years in the RCAF, fortunately I never had to kill anyone, but at 65-plus I am not afraid to die or to kill, which I hope is not needed, but am quite prepared to do so to keep Canada together.

Will some one please speak for Canada?
H.N. Harris

History 77-78

Dear Sir:

On Wednesday, 16 March the Department of History will be sponsoring an information session and reception for students who are interested in taking undergraduate courses in History in 1977-78. The meeting will begin in Tilley 5 at 3:30 p.m.

Information about courses will be available, professors will be on hand to answer questions and refreshments will be served. All interested students will be welcome.

Thank you for help in publicizing this event.

Sincerely,
Gillian Thompson

A retrospective look at some aspects of campus life

By KEVIN GARLAND

Well here I am, the on-the-scene Bruns reporter, at the UNB campus Spring, 1978.

I have been interviewing a number of prominent students concerning campus life, and the following are a few notes on the interview.

The annual Winter Carnival has been termed a financial success by the SRC comptroller. No money was lost and the total cost to the student body was nil.

A view held by a know subversive on campus points out that the reason for the financial success was that there were no events, pubs, parades, movies, variety show, coffee houses, snowsculptures, ice palaces or any other of the frivolities of previous UNB carnivals.

In an attempt to interview the present chairperson in order to clarify the situation, it was discovered that there were no applicants the previous spring, so increasing entrance fees in order no schedules were set up and no organization of any type was evident.

There were mumbblings by a number of known student subversives over the university administration taking over operations of the SUB. Their agreement for doing so relates to the fact that no SUB directors were appointed to the Board, because of lack of applicants. The operations of the SUB is too important to be left to uninterested students.

Another report from the SRC comptroller indicated that the yearbook was financially successful. Another campus subversive credited this to their lack of Editor and staff. Graduates of 1978 will therefore have a financially successful though admittedly non-existent yearbook.

Students were interviewed concerning the recent problems with pubs, varsity games, and movies. This was credited to the absence of Campus Police. The administration is considering increasing entrance fees in order to cover the cost of outside security. It is believed this is due to the folding of CP organization in the spring 1977 when no students were interested in joining or continuing the service.

Here we have seen the effects of what could possibly happen in the coming academic year. A fairer take, you say, but one that could become all too real if the present situation is not rectified. Students are needed to apply for the positions on SUB Board, Winter Carnival Chairperson, Yearbook Editor(s) and CP chief and assistants by the 16 of March, 77.

For further information and applications contact Kevin Garland, Chairperson Application Committee, c/o SRC office.

President Anderson says

UNB in top ten

By DERWIN GOWAN
Managing Editor

Not everybody holds the same opinion with respect to the value of a UNB degree, but there is not mistaking where president John M. Anderson stands on the issue.

In answer to a query by Gwyn Martin at last Wednesday's forum in Lady Dunn Hall on university financing, he told the approxi-

mately 100 people present that UNB is one of the top ten universities in Canada.

"Am I hearing you right in that you said UNB has one of the 10 most coveted degrees in Canada," she asked incredulously.

"That's what I said," he replied firmly.

"I would be horrified that any student at UNB would associate bigness with quality," said the

president when Martin suggested UNB did not compare favourably with larger universities in Toronto and Montreal.

He seemed to take great delight when another person present said she came to UNB so she wouldn't have to go to McGill.

"I think we're a first class institution," he told a Brunswick reporter after the meeting. Anderson added that students come here despite the high fees.

"A lot of student come here because we are small. They don't want to go to the larger institutions," Anderson said.

"I don't want kids who say, 'Oh, what am I doing at this dumb place,'" he said. To them, the president had this to say, "Get to hell out of here! We don't want you!"

The onlookers showed their opinion of the president's stand with a spontaneous round of applause.

More Sound-Off Faces change not attitudes

Dear Editor:

It is becoming apparent that the faces on the SRC may change but the attitude of Council does not. After reading the Brunswickan of Feb 25 I was appalled by the idea of a minimum number of voters necessary to validate a referendum. When I was a Councillor we may have made our fair share of mistakes but never would I have been a party to an action such as this new By-law.

My major concern is how an SRC consisting of seven electees members, the rest being acclaimed to office can justify an action such as this. Especially since those who were elected, were elected by less than 35 percent of the student body.

Jim Murray points out that the SRC is more knowledgeable than the rest of the student's on this campus. This may be true but often when I was a member of the Council I found myself putting the interests of the Student Union as an entity in itself before the interests of the members of the Student Union. The idea behind this new By-law does not serve the interest of the individual students on this campus.

If this By-law is enacted, those members of the SRC who vote in

favour of this motion should resign. None were elected by 2/3 rd's of the student body. Neither have they been granted the Divine Right of King's to the best of my knowledge. In my opinion if the SRC sets a requirement for voter turnout in a referendum it must do likewise for SRC elections.

Sincerely
Steve Berube

Thanks

Dear Editor:

This week of February 6th was White Cane Week. This year was the best White Cane Week ever in the Fredericton area.

The Canadian National Institute for the Blind and the Canadian Council of the Blind would like to express our deepest appreciation to you, and your staff for taking time and space in your University paper for us.

This support means so much as it encourages us to work more each day for the visual handicapped and you and your eyes.

Yours truly,
Guy Woodland, District Admin.

"Techs" play important role

By JOHN MCCLUSKEY

Many Engineering students do not realize the important role that the technicians and maintenance staff play in running Head Hall. These people are the ones who maintain the laboratories, the laboratory equipment, and stocks of extra chemicals and supplies. Without their presence in Head Hall the Engineers' education would be much poorer, based on just 'book knowledge', without the benefit of lab demonstrations and experience. This is a fact that should be remembered as we puzzle over yet another lab report for without the help of UNB's technicians, things would even be tougher than they are now - a truly frightening thought. So next time you find yourself cussing over another lab, give a thought to your

'local' lab technicians for without them things could be worse!

There will not be any EUS elections this year as all the positions were filled by acclamation. Heading up next year's council will be Ken Vaughn as president. Ken is one of the Civil 3 softball pros and has been very involved in the EUS in the past, not only with the Ice Palace and carnival float. Vice president will be Bruce Morrison, who has been working for the EUS since he arrived at UNB. (You'd think he's know better by now...) Motts Mota will be next year's EUS scribe joining a long line of illiterate EUS secretaries. Motts was one of the moving forces behind the Civil 3 softball team, but they won anyway. Finally the EUS will have

Mitch (Mr. 10 per cent) Smith as treasurer. Mitch is another one of the Civil 3 class (which makes it a clean sweep for Civil 3). If Mitch handles money like he hits a softball then the EUS will be broke by Christmas. Actually the new council is a good one and should keep the society in good shape for the upcoming year.

Several of the other EUS positions are ready to be filled. Dave Keer, Roger Jenkins, and Dave Belyea have submitted their bids for the EUS Store. Dave helped run the store with Jack Kipping this year and provided the biggest selection of goods this side of the K-Mart.

The Engineering Week co-chairmen are Chris (Tiger) Hunter and Bruce Morrison. With a duo like that you can rest assured that there will be a rousing Engineering Week next year. The only problem might be recovering afterwards!

The intramural hockey playoffs are nearing their completion and Engineering 2 remains in the thick of the battle. The sophomores are the only Engineering team left in the running for campus champs and deserve congratulations for their play. The boys go against Forestry 3 on Sunday morning at 10:30. A good crowd should get out and support the team as they will be trying to advance into the championship finals.

A final note for all Engineers who haven't lined up a summer job as yet. Check out the student Manpower office for job opportunities. Many of the summer opportunities come in about this time of year and, since the economy is not in the best of shape, it would pay to get your name in early.

Well that's it for this week. If you have any notices you wish to have printed in The Brunswickan drop me a note in Room 306 which is away up in the attic. Don't be shy!

David Miller

Brought up in the knowledge that the government would protect me from the evils of television advertising, I have become quite shocked at some of the television advertising that I have been exposed to lately.

We are told to write the CRTC if an ad implies or states things about a product that are not, if it is in bad taste, or if it implies criticism of any particular race, colour or creed.

I have seen advertising which convinces me that women, or rather wives are second class citizens, who live in mortal terror of their husbands.

Although this perhaps occurs from time to time in real life, there is no excuse for this kind of crap to be broadcast to the millions of little kids sitting in front of the television. No one can doubt that television influences the thinking of children.

In my interation of the reasons one can complain to the government, I failed to list sex discrimination. It may be there, but the people who check these things out surely haven't followed it, if it is.

Consider these three examples: (1) a grown man wakes his wife up in the middle of the night asking her "Are you awake?" and makes her go down to the bathroom and get him some cough sirup. She does, and the scene ends with our man (?) sleeping peacefully and our woman playing solitaire unable to sleep. (2) Man and wife sitting at classic breakfast table setting. He has a newspaper shoved nearly up his nose and is ignoring his wife. The wife is wringing her hands as they chapped, red and sore. Clearly she is in need of some human kindness. After a while he looks over his newspaper and makes the statement that she looks like the wicked witch of the west (or something like that) and resumes reading the paper. Since her lord and master has thus spoken, she realizes it's time for some hand lotion. Next day he peers over the

paper and grunts something to the effect that they're better. End of scene. (3) Wife realizing that her husband's getting a little grouchy from drinking too much caffeine in his coffee switches it secretly to a de-caffeinated brand. She tells the audience that she is afraid that he will beat the shit out of her when he finds out that this secret switch has been made. He doesn't and all's well that ends well.

Pretty sickening when you think about it.

I have always wondered what the real story was on smoking with regard to lung cancer and heart disease. One has been exposed to the continuous message that smoking is dangerous to health, but the real rigorous presentation of information on smoking and death is somewhat scarce.

In the latest number of Environmental Research, (Vol. 12 no 3, 1976) there is a study on cigarette smoking. It is based on observations of over one million men and women over a twelve year period (hard to argue with size of sample). During this time recordings were made of heart disease, and lung cancer for three groups: non-smokers, high tar and nicotine, and low tar and nicotine smokers.

The results are fairly clear cut. Those who didn't smoke showed 34 percent less of a chance of encountering these diseases as compared to low tar cigarette smokers, and more than half of a chance as compared to high tar cigarettes.

But, I'm sure that most smokers would agree that "It can't happen" to me. Us non-smokers can rest easier knowing that we will more likely get snuffed by a car than from lung cancer.

Dear Mariet and Jill "What do you mean pretending I don't know you?"

Goods stolen from Geo.

On Saturday, February 26, the leads in hopes of recovering at Geology common room in the least some of the goods stolen. Forestry and Geology building was broken into and robbed. Approximately \$200 worth of personal property was stolen. The burglary is believed to have occurred between 4:30 and 7 p.m. as previous to and after those hours there were students present.

A filing cabinet and locked room were both broken into and property taken. Security and police were called in and are currently investigating the various

Screenings are:

open to the general public
free of charge
and
take place in the
National Exhibition Centre gallery,
Corner of Queen & Carleton Streets
Each film is approximately one hour in length.

A Penny-to some just luck, to others education

A group of concerned students have again organized a penny drive to support a worthy cause, in this case the Wa Girama tribe in Coastal Kenya.

In 1975, \$1056 was raised to aid a South African orphanage facing eviction, last \$1230 was raised for the earthquake victims in Guatemala. The proceeds from these drives were sent through the Peace and Development Organization.

The Giriama people belong to the largest of the Mjikenda or Coastal tribes and are Bantu in origin and custom. They are warmhearted and stress conformity among themselves. In terms of progress, the Giriama are regarded as being behind other parts of the country in attitudes to health, education and commerce.

They are involved at this time in a project started in 1975 to provide a second-chance institution for drop-outs and adults in

the educational employment system. Previously, the organization The Mwanbayanyundo Community Centre has been supported locally by self help programmes and contributions from overseas. At the moment it can only be considered for government aid if it can survive until next year.

The institution serves two purposes. First, to recuperate drop outs in order to help them back into the mainstream of education and employment. The second aim is to aid those young people leaving education to adjust to employment.

Eighty-five percent of the youth in this area have the stamp of "drop out" attached to them. They then have to drift to Mombasa or Nairobi for work, most of them seldom get. Their education to date has in no way prepared them for employment opportunities in the rural area and in the informal sector.

The young people have reacted to this by organizing themselves into clubs. The aim of which is to plan the parts which the youth can play in community projects, sports and leisure activities. Among the problems these youths face are lack of support by adults, lack of continuity in leadership, peer group pressure to drift to the cities and most importantly inadequate funds.

The Peace and Development Organization feels that these people need help in order to continue their self help project. With additional funding they can continue to be self-reliant.

Collection tables will be set up in the SUB Lobby, the UNB bookstore and the STU cafeteria on March 16, 17 and 18 from 10:00 a.m. - 5:00 p.m. Anyone interested in helping, either sitting at one of the tables or collecting from residences should contact James Krant at 455-7726.

Looking For a Summer Job?

The Canada Manpower Centre on Campus will be registering students seeking summer employment on March 17 & 18, 1977 between 8:30 a.m. and 5:00 p.m.

Our office is located in Annex B, Room 3.

Manpower and Immigration Main-d'oeuvre et Immigration Bud Cullen, Minister

Ted Logan takes over pre-med

Last week UNB's Pre-Medical society had a change in the executive. Stepping down from the President's position was John McClusky replaced by Ted Logan. The society's former secretary treasurer, Miss Tanya Barrett stepped down from the vice-presidents position and Mr. Sean Doland will now take on her responsibilities.

The society's secretary treasurer for the coming year will be Miss

Janet Jones. Tentative plans include a lecture with Dr. Everett Chalmers at the hospital which bears his name here in Fredericton. The public is cordially invited to attend. Further information will be published through the Bruns and on posters. Persons interested in a medical future are advised that information concerning the new Medical College Admission Tests (MEDCATS) can be obtained from the

office of the Dean of Science in the new science complex.

Those interested in applying to the Dental School at Dalhousie University have until May 1, to apply.

This past year Tanya, Ted and myself have enjoyed serving the Pre-Medical Society members. I, and I'm sure I speak for the others, when we took over our respective positions, had a lot to learn but we managed to both learn a lot and at the same time tried to pass on what we learnt to our fellow members. It is with regret that I give up my position for it was a pleasure to try and help out those seeking help or information about the possibilities of a medical career. I extend my best wishes to the new executive for a good year and to all those aspiring students who are applying to medical-dental, or any other medical profession.

This past month members of the society went on a tour of Dal's Medical and Dental facilities. It is unanimously agreed that every one had a very enjoyable and enlightening time. A more complete description of the tour events can be found at the SRC business office or if you are interested, approach one of the society members who attended the tour for a detailed description of what we saw.

Well, that's enough for now, again best wishes to executive members and applicants, see ya later.

The UNB Camera Club will be sponsoring an illustrated presentation by internationally-known New Brunswick photographer Freeman Patterson. Photographic interpretations of Africa and New Brunswick will be presented. The talk will be held Tuesday, March 15, at 7:30 p.m., in Room 146 of Loring Bailey Hall (Biology Building) on the UNB campus.

This will be a rare opportunity for all to meet the highly-acclaimed artist and view some of his work.

Proctorships ready

Candidates for Proctorships in the Men's Residences are available from the Men's Residence Office.

Candidates must be either a graduate, a law student, or a student in his last year of an undergraduate degree programme, but any outstanding candidate may apply. He should

have a CGPA of 2.50, or greater. Exceptions may be made for candidates with compensating abilities in other relevant areas. He should also be an individual with experience in the UNB Residence Programme.

Every applicant is asked to write a letter indicating the ways in which he feels he could best contribute to the Residence programme, and to provide a transcript of his marks. The names and addresses of three people who may be contacted for letters of reference must be included. For resident applicants, these referees must be

- A. a Don or Resident Fellow
- B. a House Committee Member or Proctor
- C. at least one other referee (Preferably from a person who knows the UNB Residence System)

Each applicant will be given the terms of reference for the position of Proctor when he gets his application form. The closing date for applications will be March 8, 1977.

COME ENJOY NOSTALGIA

THE BOYCE MARKET : Fredericton's finest entertainment

By MARICA CUMMINGS

Clarence Wade, secretary-treasurer of the former municipality of York, describes it as "the most harmonious enterprise that was ever started in Fredericton. The spirit is beautiful."

A warm and vivacious atmosphere greets all who enter the market and it is the friendliness of the market folk who lure people back week after week. Dot Howe, one of the stallholders who sells her homebaking smiled and said, "I enjoy seeing my old friends and meeting new ones. When I do my cooking, I keep in mind the particular tastes of my customers." The market environment reassures the city dweller that neighbourliness and humanity have not been completely swept away in this modern technological age. While at the market, people take the time to stop and socialize with each other rather than rush on by in a detached and impersonal manner. The absence of the middle man encourages over-the-counter fraternizing between the customer and farmer or craftsman. Interested customers can

find out first-hand how a lambskin is prepared, why their angel-wing begonias aren't flourishing, or how long it takes to make a leather purse. The market is a very educational and racial-free institution where people of all ages, colour, and class rub shoulders.

Although there was an earlier market place at Phoenix Square, the existing market on George Street was built in 1951 with money bequeathed to the farmers of York, Queen, and Sudbury counties by the late W.W. Boyce. Mr. Boyce had immigrated to Fredericton from England in 1888 to become a feed and fertilizer merchant.

From my visits to the market, I have found the stallholders to be a friendly and agreeable bunch. Most you ask will say that the market is better now than it was in its early years. Many more people attend now, often accompanied by their parents, grandparents, and children. If one were to compare the present-day market with that of 10 years ago, a difference would be noticed in the type of goods sold. Now the Boyce Farmer's Market would more

appropriately be labelled the Boyce Farmer's and Handicraft Market. This influx of handicrafts has only been in the past five years. Most people feel this has enhanced the market with an added variety and flavour that draws those who may not attend if it was solely a "farmer's" market.

One cannot write about the Market without paying tribute to Goofy Roofy's Restaurant whose sales are now double to what they were when Ruth took it over five years ago. Goofy Roofy's is said to consume more eggs on Saturday mornings than some other restaurants in Fredericton do all week. The first restaurant manager used to cater mainly to the farmers, but under new management, the restaurant now directs itself towards the market's visitors. The food is extraordinarily tasty and is a great place for Fredericton's residents and visitors alike to visit.

Boyce Market is presently facing possible relocation problems but meanwhile the market is thriving every Saturday morning on George Street despite future controversies.

photos by Steve Patriquen

Gilbert and Sullivan's 'Patience' - a comic classic

Ever want to sing comic opera? A number of UNB students, faculty, and staff are doing just that this week. Most of them gave up March break to put the final polish on the Gilbert and Sullivan Society's production of *Patience*. It opens a 3-night run at the Playhouse, Thursday March 17.

The Victorian comic classic was a success from its first opening night. W.S. Gilbert wrote some marvellously satiric lyrics and lines for the characters he based on the Rossetti, Swinburne, Wilde, and Whistler aesthetic set from current London society of the 1870's. Sullivan wrote some beautiful music for the opera. The writers expose the ridiculous affectation of the aesthetic cult, its drooping, mournful other-worldiness. Twenty aesthetic lovesick maidens follow the poet, Bunthorne, rapturously idolizing his every movement. The military, here the Dragoon Guards, comes in for satire, too. Its serene self-confidence in believing all women fall for a dashing uniform is sadly shaken. The officers become ludicrous in their attempts to imitate the aesthetic poets and win back the ladies.

Besides a large faculty and student involvement in the choruses and technical aspects of the production, many of the lead roles are played by students. *Patience*, beyond all this aesthetic nonsense, will be sung on the final two nights by Maureen Miller, Arts I. Liz Williams, a student-wife, sings the role for the Open Dress Rehearsal and first night.

Kevin Patterson (Education II) is the poet Bunthorne who worships *Patience* and ignores his train of "20 lovesick maidens". Helen McKinnon (Bachelor of Teaching IV) is one of these languishing ladies, in a smaller solo role. Terry Horner (Arts III) plays the Duke, another satiric figure. He envies the poet his following and

tries to join the military chaps to attract the ladies. Dragoons like David Rimmer (Biology GS), Andy Fox (Comp. Sc. I), and Peter Penny (Arts IV) are dashed when scarlet coats and gold braid are ignored for the delights of Bunthorne's "fleshy poetry".

Film Society

Mireille Dansereau, *La Vie Revee*, Quebec, 1971, starring Lillianne Lemaitre-Auger, Veronique Leflaguais, and Jean-Francois Guite. Colour, 90 mins. will be presented at Head Hall Auditorium at 8 p.m., Saturday, March 12 and 6:30 p.m. & 9:00 p.m. Sunday, March 13.

Several years before International Women's Year put half humanity briefly in the spotlight, Mireille Dansereau wrote and filmed her witty movie of a friendship between two Quebecois; Isabelle and Virginie, who fantasize about a dual relationship with the "perfect man". Satire, parody, and pastiche of elements from other movies all have their place in a film in which roles are deliberately and graphically reversed. Much has been said and written about women as objects of violence, sex, and just plain bigotry, but very little has become the stuff of which dreams are made - on film at least. Isabelle and Virginie fantasize about men as men presumably do about women, but, for all the male and female nudity in both the real and fantasy scenes, this is not a prurient film chiefly because of the basic intelligence at work in Dansereau's handling of her themes.

As the first woman feature-film maker in Quebec, Dansereau stands out in her treatment of her subject for two reasons: first, her images run counter to the established portrayal of woman as

It will be a full production, well costumed and designed, the second one mounted by Fredericton's Gilbert and Sullivan Society. Dr. Ed Mullaly of UNB's English Dept. is the stage director. Last year's three performances were sold out and so was the Gilbert

and Sullivan cabaret in Memorial Hall on its final night. *Patience* is expected to be an equally popular show.

The Open Dress Rehearsal on Wednesday, March 16 has student and children's admission for \$.50, adults \$1. It starts early, 7 p.m.

The regular performances on March 17, 18, and 19 at 8 p.m. have student tickets at \$1.50. Any of the cast have regular show

tickets, and they are available at the Playhouse box office. There are no reserved seats.

Fantasies of "The perfect man"

a necessary victim in a male oriented society. The subject is tackled, among others, by novelist Monique Bosco, who writes more in irony and anger than in jest. Secondly, it is precisely this sense of humour, this lack of solemnity, which illumines *La Vie Revee* in spite of the seriousness of its theme. The film is technically as well as thematically witty; references to cinematic classics such as *Jules et Jim* (the French menage a trois is reversed in the

Quebec film), snatches of theme songs from other movies with analogous subjects, make this what Kay Armatage, writing in *Take One*, calls a "cinema-conscious movie".

Feminism seems, for the moment, to be less hot a subject politically than the escalating urgency of Quebec separatism. But the latter also makes its impact on the film in the scene in which Isabelle is fired from her job at the film company by her English

boss. Finally, as Armatage says, "For Isabelle and Virginie, their fantasies are over ... the problems of achieving liberation are just beginning, but that's another film". If you liked Jutra's *Kamouraskis*, ostensibly behind its time, you may also, paradoxically, like *La Vie Revee*, which is very much in tune with its time. For Mireille Dansereau, the making of the film established her political identity; we could not hope for less for her characters.

Steel band - a versatile group

By ROSEMARIE HOPPS

A band from Saint John played at the Olympics in Montreal. That band was the Lancaster Kiwanis Steel Band. Recently I had a chance to talk to Walter Ball, director of the band, who told me some interesting facts about the Steel Band.

Mr. Ball, a part-time lecturer in music appreciation at UNBSJ, explained that there are actually two bands. The Senior band, which has about 30 members, and the junior band which has about 20 (although memberships will reach 30). There are also elementary bands, in various stages of formation - two from Saint John West and one from the South end. The Kiwanis Steelband has an impressive record of performances.

In 1973, as one of their 40 concerts for that season, they

played for Pierre Trudeau in Saint John.

In 1974 they played at the Christmas concert at the Playhouse, sharing the bill with the Atlantic Symphony Orchestra.

Ellen Rathburn composed a concerto for Steel Band and Symphony called "Steelehenge." The American pop conductor Skitch Henderson conducted "Steelehenge" for the Christmas Pop Tours, which went on tour throughout the Maritime Provinces with the Atlantic Symphony.

In Montreal the Kiwanis Steel Band played at Place Ville Marie and at the Place des Nations (in the Man and his World Pavilion). While in Montreal, Mayor Drapeau entertained the band at the City Council chambers.

Last summer, the Kiwanis Steel Band played for the Queen at Woolastock Park near Fredericton.

Walter Ball, who has been involved with Steel Bands for eight or nine years, prepares the pans (the name given to the steel barrels) himself at his home. Steel barrels are donated to the Band by various oil companies and industries around the city.

The pans are made of 45 gallon steel oil drums, of a specific gauge. With a range of four 2-3 octaves, the band has some 56 notes available to perform every kind of music.

That music includes Shaft, Love Story, Never on a Sunday, Yellow Bird, The Entertainer, Limbo Rock, Girl from Ipanema, Swanee, By the Time I Get to Phoenix and more.

The Kiwanis Steel Band, a group of dedicated youngsters from New Brunswick, deserve to be recognized. For a taste of something different, try one of the Kiwanis Steel Band albums.

OVER THE EDGE!

78 poems

by

LEO FERRARI

with an introduction
by ALDEN NOWLAN

It's a mad mad world

By ROSEMARIE HOPPS

There is a rumour spreading that Leo Ferrari is the last sane man in an insane World. Perhaps his tenuous hold on sanity is preserved by periodical evocations of his muse. The man writes poetry! Following *The Worm's Revenge* or *A Funny Thing Happened to me on the way to the Cemetery* further subtitled "A Bundle of Scurrilous Verse Scribbled in the Back of a Hearse". Ferrari is now prepared to offer to an unsuspecting World a new volume *Over The Edge*.

Mr. Ferrari trades in the peculiar breeds of insanity this flesh is heir to: the possibility of perishing before publishing, dove's searching for cities with a multitude of monuments or the

incongruities of legless men selling shoelaces.

Always there is a razor edge to Ferrari's work. An edge to walk as you read his poetry. To slip to the one side, to claim his work is pure absurdity, is to risk a nasty gash from the cutting edge of his poesy.

Ferrari presents in this volume a group of diverse poems. He includes love poetry, personal meditations, reflections on life's incongruities and philosophical verse. He has an eye for the dichotomies inherent in living, the beauties and the beasts. He has a mind to capture the thoughts that escape the less perceptive.

To return to the basic question of sanity, Mr. Ferrari perhaps has provided the best summation of his philosophy. From *Over The Edge*:

Normalcy

Everyone I've known
Is a bit off base
I alone
Am the Perfect Case.

To delve into *Over The Edge* successfully is to leave behind preconceptions. Ferrari is not a stereotyped man nor a stereotyped poet. Expect nothing. Expect everything. Either way, be sure your mind is open and receptive.

Over The Edge - "poems in grateful celebration of fifty years of life, love and of laughter" with an introduction by Alden Nowlan, is Leo Ferrari's gift to a Winter World. Prepare for a dose of Ferrari-ism. To echo Alden Nowlan, "He was born with the gift of laughter and the belief that the world was mad".

Over The Edge is available at the UNB Bookstore!

Rural carvings featured in Art Gallery display

This exhibition of folk art is outside the mainstream of contemporary art, most of these works come from the still waters of rural Nova Scotia. Four types of work are shown: carving, painting, decorated furniture and textiles.

It is predictable that in a rural setting carvings predominate. A wooden population is here assembled, of people, animals, birds and fishes - all from the familiar world of the artist's experience. Most of the carvings are of pine because it is an available wood and is easily worked. Although these forms come from the forest, few carvers leave the wood in its natural state. Most of the carvings are brightly painted with a palette of colour provided by the hardware merchant. Colour assists the carver in his transformation of a tree into the "reality" of a human or animal figure.

Collins Eisenhauer describes his working technique: "using a chain-saw 'to rough it out', then a plane and a knife 'to smoothen it up'. For the smaller carvings he uses only a jack knife. Of these smaller pieces he says: 'I do them with my hand and my brain'."

The folk artist approaches the task of carving without an

academic knowledge of the craft of sculpture. He solves his many technical problems intuitively and with a simplicity and directness that is part of the appeal of his work.

Since carving is three-dimen-

sional, a carver can copy nature precisely. But despite the subject matter of these works they rarely seem to come from the direct observation of nature. They are memory images. The carver has selected for emphasis those

features that he considers essential. This selection of essential characteristics is one of the strengths of the artist's vision. People interested in the analysis of vision, such as E.J. Land, point out that the eye does

not need, or use, much of the information that flows into it from the everyday world. The images of folk art often reveal this ability to select from a wealth of detail.

A carving such as Collins Eisenhauer's "Fiddler and the Cat" shows the folk artist at work as he says: "with hand and brain" arranging the elements of form and space in his carving. The fiddler sits, a compact, absorbed figure in his chair, separated from the dancing cat by a chequered space while the cat dances on and on to music that we will never hear. We feel that we are spectator in a small world of mysterious and suggestive relationships between people and animals. "I try to make them humorous," the carver says and we can imagine a smile playing around his lips as he works, turning the carving in his hand. We see him at work in one of the larger carvings, his self-portrait.

This art has many styles. "Folk" is not one style of art, folk art is not confined to a certain historical period, folk art is not inevitably rural." In this exhibition appear many works assembled by pilgrim collectors who have travelled throughout the Province to find these evidences of twentieth-century folk art in Nova Scotia.

Presently on display at the Beaverbrook Art Gallery, wood and paint carving by Collins Eisenhauer "Man Playing Fiddle and Cat Dancing."

"Taming of the Shrew" features local talent

By ROSEMARIE HOPPS

Shakespeare, as written, has proved a rock on which many a student has found him or herself stranded, uncomprehending and bored. Shakespeare as performed is entirely another matter.

Shakespeare, probably one of the best known and most often quoted authors, wrote to be performed. Only as his works unfold "on the boards" can the full gamut of his power over the stage and the players on it be fully appreciated.

"The Taming of the Shrew", a Shakespearean comedy, is at present playing at TNB, starting each night at 8 p.m.

TNB has not kept entirely to the text of "The Taming of the Shrew" as Shakespeare wrote it. They have included the induction (which is excluded in the most widely seen film version of "The Taming of the Shrew," that which starts Elizabeth Taylor and Richard Burton) however, they have made Christopher Sly and the hostess of the first 13 lines a modern duo. Starting at line 14, the characters revert to the manner of speech and clothing (except for Sly who remains in contemporary raiments) that we find in Shakespeare's play.

The TNB production had of necessity to move the interruption of the action by Sly, which in Shakespeare's text comes immediately prior to Petruchio's first entrance, to a point earlier in Act 1, Scene i so that Sly could return at the appropriate moment as Petruchio. By the 80th line in Act 1, Scene ii Sly has completely transformed into Petruchio and the action follows faithfully Shakespeare's text.

One other change from Shakespeare's text is introduced in the form of an epilogue wherein

Christopher Sly reverts to the modern character and is taken offstage by a policeman.

I have for the most part only praise for TNB's production of "The Taming of the Shrew". Dan MacDonald, who played Christopher Sly and Petruchio, gave the strong performances his dual roles required. Wilson Gonzalez, a UNB student, played a fine part as the cook in Petruchio's volatile household. Prudence Herber, who

has also taken part in UNB Drama's productions, played dual roles as the barmaid in the induction and epilogue and as "the widow", wife to Hortensio, in the final scene. Prudence is a strong, accomplished actress who carried off her two roles with aplomb.

Lally Cadeau, who played Kate cannot be faulted on her acting ability, however her voice often sounded strained as though she found it hard to project throughout

the entire theatre.

Lighting for "The Taming of the Shrew" was exciting and original. The green and blue lights through which drifted a layer of smoke provided a dream-like, other worldly transition (especially when coupled with the modernistic, synthesized music) between the play and the prologue and epilogue.

Scenery was one basic piece which provided for ease of

location changes and allowed the action of the play to progress smoothly.

Pre-performance music, played by Stephen Peacock, proved a relaxing, authentic entree to the Elizabethan play.

All in all, my judgement is that TNB's "The Taming of the Shrew" is well worth the seeing, whether one is a Shakespeare buff or a novice to the delights of Elizabethan comedy.

"Between Friends" exhibit honours U.S.

For the media, business is booming: no shortage of news-worthy material. Our hundredth birthday party story of ten little provinces and how they grew finds its "happily ever after" challenged to a rewrite by Levesque's Quebec. Our southern neighbour closes off its second century with the dishonourable discharge of one president, the interim appointment of another, and the electorate's displacement of him by a third. The whole face of North America seems ready to undergo political plastic surgery at any moment. The strivings of the press and television cameras to record every crack and fissure of that countenance sometimes overwhelm us.

When this news bombardment begins to wear you down, you might find it refreshing to cast a glance towards Canada's definition in her own eyes and in those of her nearest neighbour. Perhaps if we examine what we are and where we have come from, we will be able to look ahead more insightfully towards where we are going.

"Between Friends/Entre Amis" has this kind of expansive vision

to offer you. A collection of photographs commissioned by the Still Photography Division of the National Film Board, it was issued in special-edition book form as Canada's official gift in honour of the United States' Bicentennial festivities. It is probably as such - billed simply as a volume "about the border between Canada and the United States" - that the work is best known; if its sales record can be taken as any fair indication, it has swept both nations by storm. But these self-same photographs are shortly to become much more widely - and powerfully - accessible to Frederictonians, with their exhibition from March 9 to March 27, 1977, shared "between friends": half of the show will appear at the National Exhibition Centre (corner of Queen and Carleton Streets) and half at the UNB Art Centre (memorial Hall).

Sensitively and captivatingly depicted is the rapport we share with the American people: the nature of the two lands, their inhabitants and their indissoluble bonds. A brief return to the role of our press cameras might help, at this point, to clarify what sets this

exhibit apart. To record the news, certain moments - a grin or a grimace, a shaking of hands or a shaking of heads - are single out, crystallized, preserved for posterity. Pop goes the flashbulb, and the stroke out of time is frozen, a single grain of sand arrested in its tumbling course through the hourglass. But film is sometimes faced with a subtler challenge; causing whole vistas of time and space to open outward from the static image. The finite blossoms beyond its boundaries and strikes a familiar cord in the experience of the beholder. It is this second way of seeing with the lens which is beautifully embodied in "Between Friends/Entre Amis".

National Exhibition Centre hours for March will be Monday - Wednesday from 12:00 noon - 4:00 p.m., Thursday - Friday, 12:00 noon - 9:00 p.m., Saturday 10:00 a.m. - 5:00 p.m. and Sunday 2:00 p.m. - 5:00 p.m., while the Art Centre on campus is open Monday - Friday from 10:00 a.m. - 5:00 p.m. and Sunday from 2:00 p.m. - 5:00 p.m.

Treat yourself to a change in routine, from the diet of doom and gloom you digest every day. Come

feast your eyes!

The largest single work ever undertaken by the National Film Board, the nine-part film series, "Struggle for a Border", will be screened this month at the National Exhibition Centre in connection with the exhibit "Between Friends". The movies, each one hour long, trace the history of border relations between Canada and the United States from the discovery of America to the present. Come dream with the explorers, diplomats and visionaries, Thursday evenings at 7:30 and 8:45 p.m. and Saturday afternoons at 3:00 p.m. No admission charge.

Tall tales and fantastic folklore are the features of this month's Wednesday storyhours at the National Exhibition Centre as the "Tell a Tale" series zeroes in on Canadian and American legends. Glooscap, Babe the Blue Ox, Johnny Appleseed, Old Storm-along, Annie Christmas and a host of others hope you will come share in the fun, March 16 and 23 from 2 to 3 p.m.

- EUS movie *The Shootist* with John Wayne, James Stewart, Lauren Bacall, Ron Howard, Head Hall, rm. C-13 7 & 9 p.m.
- Land a New Priority Sub Rm 26 12:30 - 1:30 p.m. Free admission also on March 18 Friday.

Blue Lounge bridge

By BENTON & FLEWELLING

An excellent way to test your ability to communicate, through bidding, with your partner is the time when faced with an unusual or uncommon hand. A four, a five and even a six card suit it being your biddable suit is far from extraordinary but an eight card suit is. Even more rare is a hand with an eight card heart suit topped by the ace, king and queen, a void in diamonds, a low singleton spade and a four card club suit topped with the ace. What makes this such an unusual hand is plain to see. A hand with nine sure tricks without even asking for support from ones partner. Opening points in high cards alone. The distribution

points raise the value of the hand into the twenties; three points for the void, two points for the singleton also a large number of points for the length in hearts. Hand The opening bid should set the foundation for the bidding of this hand but what should the opening bid be? A pre-emptive bid of three hearts is ruled out immediately because of the strength of the hand. The opening of one heart intending to jump to three hearts displaying the rarity and potential this hand offers could lead to problems. The hand does not consist of a great number of high card points therefore a good possibility of the opposition entering the bidding arises. This would be a wrench in the works

that could cause the slam to be missed. The appropriate bid would be two hearts. The bid would usually discourage the opposition from entering the bidding, also conveying the message of slam possibility and game for sure. From this point, the opening bid decided on, North having thirteen points in high cards with distribution points raising the value of the hand to fifteen would look for slam. North would proceed by asking for aces and kings, finding out South has three aces, one for the void, and one king. For the suit not liking hearts because of his singleton North uses the six club convention. South responds hearts which does not entuse North who responds with a bid of six not trump displaying

his lack of enthusiasm. South has no choice but to bid seven hearts because of distribution. They all pass with North realizing the strength of the two bid lies with the heart suit. Playing the hand presents no problem in fact it is a lay down. There are eight heart tricks, five club tricks and the ace of spades making the bid. The disappointment lies in the fact that Mr. Benton was too conservative in his opening (1 heart) and slam was missed. This hand cost us the win when we were playing duplicate last week.

- All Examinations are three (3) hours in length, unless the instructor arranges otherwise.
- This is a TENTATIVE timetable only. Changes may be necessary. Please check the FINAL timetable which it is hoped will be available on March 25, 1977.
- Any student that is scheduled to write more than one examination in the same time period should inform the Registrar's Office immediately.
- There will be no evening examinations scheduled.

UNB chess team A wins A.I.

UNB team A won the 1977 Atlantic Intercollegiate chess championship held in Halifax on Feb 19-20. This year's event saw teams competing from Memorial University (St. John's, Nfld.) Dalhousie (Defending Champions) UNBSJ, U of Moncton and two teams from UNB Fredericton. Each team consisted of four players, thus four games were played in each match. The UNB teams were: Team A: 1. Charles Graves, 2. Tom Gibson, 3. George Alexander, and 4. Jef Fryer. Team B: 1. Paul Aucoin, 2. Eugene Butland, 3. John Beattie and 4. Robert Langelaan. In Round 1 Team A edged by Memorial (winners in both 1974 & 1975) by a 2 1/4-1/4 score. Team B pulled off a surprising upset by drawing their match with No 1 seeded Dalhousie.

UNB team a and UNBSJ met in round 2 with UNB winning again by a 2 1/4-1/4 score. Team B also played well, defeating U of Moncton 3-1. In round 3 UNB Team A had their third consecutive close match but wound up losing to Dalhousie 2 1/4-1/4. At the same time UNB lost 2 1/4-1/4 to UNBSJ. In the last round the championship was undecided until the last game was completed. It became evident that UNBSJ would beat Dalhousie and that UNB Team A were going to win over Moncton; this would

leave both teams tied for first. In winning a 4-0 sweep over Moncton, however, UNB team A won the trophy on tiebreak by only 1/4 point. Modesty overcame Team B and they lost 4-0 in their match with Memorial, finishing 5th overall.

For anyone interested there will be a small tournament held in March on Monday nights in Rm 26 SUB (one game per week for 4 weeks) There will be two sections: 1) rated - for CFC members; 2) unrated - no membership required. Anyone interested in playing

in this section is welcome to - especially new players. Registration \$1.00 will be in Rm 26 SUB - Monday, March 14 7 - 7:30 p.m.

FINAL STANDINGS

| Team | Match Points | Game Points | Position |
|------------|--------------|-------------|----------|
| UNB Team a | 3.0 | 10.5 | 1st |
| UNBSJ | 3.0 | 10.0 | 2nd |
| Dalhousie | 2.5 | 9.0 | 3rd |
| Memorial | 2.0 | 10.0 | 4th |
| UNB Team B | 1.5 | 6.5 | 5th |
| Moncton | 0 | 2.0 | 6th |

We Need Your Opinion:

The Manager is always ready to hear from you.

It's the UNB Bookstore; always ready to help you; to help you reach publishers who are thousands of miles away!

Help the bookstore to help you! Have you got any opinion as to how the store can be improved in order to serve you better? What books, materials, equipment, etc. would you like to see in the store? Do you care?

I also care.

Bookstore Senate Committee Member (Alex Kibaki M.)

NSTC joins AFS

HALIFAX (CUP) - Nova Scotia Technical College has become the ninth campus to join the Atlantic Federation of Students (AFS). A 75 percent voter turnout on March 3 saw 186 Tech students voting yes while 93 cast a no vote, exactly two to one in favour of membership. N.S. Tech, a school for engineers and architects, is located in Halifax.

"The new council seems very keen on working with the other students in the region," said Keith Anderson, Tech's outgoing student union president. "I think that they will be enthusiastic and active participants in AFS."

AFS/FEA secretary, Don Soucy, was very pleased with the results. "While Tech has always played a cooperative and responsible role working with other Nova Scotian students on student aid, they had declined to take a voting position

at AFS/FEA meetings. We're all extremely glad to see that they will now be official members."

This winter the federation has been running membership referenda across the Atlantic. They are asking students to pledge one dollar to the organization so that

students in the region can work together on their common concerns. The next AFS/FEA referendum is set for March 16 at St. Thomas University in Fredericton, New Brunswick.

MBA

Co-op
Full-time
Part-time

McMaster University now has a third option for students interested in proceeding to a Master of Business Administration degree: a co-operative option, whereby students alternate four-month periods of study and relevant work experience. A limited number of applications will be accepted for the semester beginning in September, 1977.

Co-op

An MBA degree from McMaster could help you to achieve your career objectives in the areas of management, administration, and education because the McMaster MBA program offers a wide range of optional courses (that can be selected to your needs) as well as providing a core of basic knowledge and skills. Although admission is restricted to those who have proven that they have the potential and commitment required to complete a demanding program, graduates in any discipline may be accepted.

Full-time

Academic standing is not the only entry criterion but, as a general rule, you can have a reasonable expectation of completing the McMaster MBA program if you have maintained at least a second-class standing in the last two years of your undergraduate program and if you can achieve a satisfactory test score in the Graduate Management Admission Test.

Part-time

Applicants for the McMaster MBA who have taken relevant course work may be granted advanced standing in our program. If you are interested in exploring this challenging opportunity further, fill in and mail this form.

Solar energy feasible within a few years

HALIFAX (CUP) — Within a few years, solar energy will be an economically sensible energy source for up to 70 percent of a household's energy needs, an undergraduate Engineering-Physics student said Saturday, Feb. 26.

Walter Wardrop said that the principal problem is "educating the people", who don't realize that fossil fuels will be almost exhausted by 2000. Nuclear energy is only a stopgap measure, he told an undergraduate physics conference, organized by the Atlantic Provinces Inter-University Council on the Sciences and Dalhousie University.

Canada has at least 12 solar houses, whose energy needs are met partially or completely by solar energy. But, Wardrop noted, Canada spends far less on solar energy research than the United States.

About 32 percent of Canada's energy needs are for heating air or water to temperatures less than 100 degrees C, the boiling point of water. Solar energy is ideally suited for such heating, he said. For the heating range between 100 degrees C and 140 degrees C, solar radiation must be concentrated, which makes it more difficult and expensive to use solar energy.

Solar energy can be stored by a number of methods, Wardrop noted. The simplest is to let the sun heat water on a wall during the day, and to use the stored heat which is given off to warm the house at night. In New Mexico, Steve Baer uses 91 200-litre (45-gallon) drums partially filled with water as the south wall of his house. During the day, sun shines on the drums and heats the water;

at night, the absorbed heat is given off. Other more complicated systems pump hot water in and out of storage tanks.

In Toronto, the Hooper-Hicks House, which cost \$250,000, can run for an entire year on its stored solar energy, Wardrop said. During the summer, water is heated and stored in a 60 degree C "swimming pool" in the basement. "The idea is good", he

said, but costs become prohibitive when you try to use more than 70 percent solar energy.

An even more ambitious project is Prince Edward Island's ark, a totally self-contained house which provides its own energy and food,

it uses a windmill as well as solar energy. Everything is recycled. The ark is "a bit futuristic, a bit impractical", he noted, but it's a

look at an alternative way of life. "If we go out into space, we'll have to recycle everything."

Hydro-Electric Power is "almost reaching a peak", Wardrop said after his speech. "You can only develop it so far."

Anthro colloquium

The Anthropology Society of UNB, as part of their speaker series, is sponsoring an anthropology colloquium on Monday, the 14th of March in Carleton, Room 217 at 4:00 p.m. Guest speaker at this colloquium will be Lina Brock of Columbia University. She will be presenting a paper entitled, "The

Iwillimiden Confederation: Segmentary Society or Incipient State? In Search of a Theoretical Framework for Analysis of Relations of Dominance and Dependence in Tuareg Society". Lina, while a student at Columbia University from 1968 to 1973, studied under Marvin Harris

The Anthropology Society is certain that, with Lina Brock's recent return from fieldwork and the theoretical approach to her selected problem area, a lively and stimulating colloquium is likely. All students, faculty, and interested persons are cordially invited to attend

and Robert Murphy. In the fall of 1973, she left for Niger to begin 2½ years fieldwork with the Tuareg or "Bluemen". Her intent was to study the political history of the Tuareg, detailing the institution of Tuareg slavery. Her research keyed on the inter-relationship of vassals, slaves, and nobles as part of the historical development of the Iwillimiden Confederation. Lina Brock is now an Instructor, teaching at Rutgers University.

Summer session at Grindstone

The 1977 summer session of the Grindstone School for Peace, Research, Education & Action will be held on Grindstone Island (50 miles SW of Ottawa) from July 31-August 19. The school offers students, teachers and activists an intensive course on major social justice issues with special emphasis on working toward solutions through academic research, public education and community organizing.

The island offers seven rustic buildings as accommodation, provides campfire sites, and volleyball courts, swimming and canoeing.

Participants will be limited to

thirty persons plus resource and staff people. The cost per participant is \$300 for room, board and tuition for three weeks. Limited scholarships are available.

Topics such as the Arab-Israeli Conflict, non-violent social change, sexism, Civil Conflict and Imperialism will be among those to be studied.

For more information and application forms, write Coordinator A, Grindstone School, 562 Johnson St., Kingston, Ontario, Canada, or phone (613) 549-4129.

Space is limited and inquiries should be made as soon as possible.

IVCF annual meeting

The "business" part of the meeting will be followed by a slide presentation on the summer activities of IVCF in Atlantic Canada.

All members are strongly encouraged to attend this very important meeting.

Inter-Varsity Christian Fellowship will hold its annual business meeting tonight at 7:30 p.m. in the Tibbits Hall East Lounge. The major items of business include examining and approving the new

constitution as well as confirming the executive positions for the academic year 1977-78. The tentative slate of executive officers as approved by the nominating committee are as follows:

1. President - Lloyd Reid
2. Secretary - Cheryl Steeves
3. Treasurer - Sharon Austin
4. Literature Co-ordinator - Louise Hayes
5. Publicity Co-ordinator - Jack Watson
6. Special Projects Co-ordinator - Beth Jimmo

NOTICE

Mr. Len Marchand

Minister of State for small business and first Canadian Native Indian to be appointed to the Federal Caucus will be in Fredericton Monday March 14, 1977, from 7:30 p.m. - 8:30 p.m. in Room 102 Tilley Hall to speak to students and the general public.

Mr. Marchand will speak on:

1. The Federal situation in Canada as it stands.
2. His role as minister of small business
3. The youth of our country.

Everyone is welcome and invited to attend.

Student matters decided without them

HALIFAX (CUP) — Nova Scotia Education Minister George Mitchell has refused to tell the Atlantic Federation of Students (AFS) the budgetary recommendations of the Maritime Provinces Higher Education Commission (MPHEC), even though the Association of Atlantic Universities received these recommendations in December.

Mitchell left a Feb. 26 meeting with AFS officials early to attend the Nova Scotia Liberal convention. Deputy Education Minister Carmen Moir refused to answer questions after the minister left, and told the students to submit their questions in writing.

Mitchell's reply, dated March 2, says that answers to questions about MPHEC "are not immediately available" because the Council of Maritime Premiers has not made a firm decision.

"Mitchell knows the answers to the MPHEC questions, he's known since at least December," said Brina Perkins, National Union of

Students (NUS) central committee member for Nova Scotia. "We found out at our meeting with Mitchell last Saturday that MPHEC was going to make the figures public but the government wouldn't let them. Mitchell also knows the regional Treasury Boards' recommendations. He just doesn't want the public to know."

AFS questions about the budgetary recommendations of the provincial Treasury Boards were also left unanswered, as was one asking whether all the tax points transferred from the federal government would be used for post-secondary education.

Diane Wright, the AFS representative for Mount St. Vincent University commented, "This is another example of what the government likes to refer to as 'student participation in the decision-making process'. First the government makes the decision and then they allow the students to participate."

Black Bear wrestles gold from CIAU

UNB's George Pineau copped the gold medal this past weekend at the CIAU Wrestling Championships held at the University of Guelph.

Competing in the 190 lb. category for the second year running, the education sophomore lead the AUAA to a number of firsts in the national competition which involved five conferences.

Along with Pineau's gold, another first came in the form of two silver medals won by AUAA representatives Greg Wilson in the 167 lb. category and Wally Kozakowski at 158. Both are from Dalhousie University.

The national competition is run in a series of dual meets and for the first time ever, the AUAA

succeeded in winning a meet by defeating Ontario "B" Team.

Along with Pineau, other competitors from UNB included Dave Niles in the 142 lb class, Rod Bell in the heavy weight category and Phil Knox at 150. Knox was just edged out of bronze medal contention by a two point margin.

These wrestlers advanced to the national competition by virtue of their first place finishes in the Atlantic Athletic Association Wrestling Championships held the previous weekend at UNB. Dalhousie University defended its championship there, narrowly defeating the host Black Bears 88-80.

St. Francis Xavier had 10 and Holland College of P.E.I. had seven.

Commenting on the performance of the Bears at the regional and national championships, coach Jim Born was delighted with the UNB representation.

"The CIAU was, for UNB, an excellent meet in terms of UNB's representation of the Atlantic conference. We won seven of the 16 fights that the AUAA won — almost half of total wins. Our representatives gave an excellent performance. Born was named Canadian College Coaches Wrestling Association president at the CIAU nationals.

The next competition for the UNB team was the New Brunswick open held this past weekend. This meet served as a prelude to the Atlantic championships.

Annual run coming

The Dr. Love annual cross-country race will be run this year

on Saturday March 12th, in the UNB woodlot on the right side of the New Maryland highway just past the Regent St. Mall. The race, which is open to any university student will start at 11:00 and will be approximately 5 miles long.

Runners should meet at the L.B. Gym at 10:00 and provide their own transportation to the woodlot from there, or meet directly at the woodlot prior to race-time, if you already know all the details of the race.

There is no entry and there is an award to the first place finisher. Results will be in next week's Bruns.

Antiques —

Bonafide Antiques and Collectibles. Several estate items. Unusual collection of good an excellent quality. Viewing from 5:00 p.m. for auction at 7:00 p.m. at Beaverbrook Hotel Ballroom, Friday, March 18. M. Owen-Fekete, auctioneer. See Thursday, March 17th Gleaner for itemized listing.

Strong showing for diving team

By GARY KELLY

In both the men and women division the diving team gave a strong showing. Cathy Walrose placed third on the one meter board and seventh on the three. She received a bronze medal overall in the CWIAU competitions. Sharon Pequette placed 14th on the one meter and 17th on the three.

Dale McLean captured second place on the one meter and second on the three meter while Gary

Kelly placed 6th on the one meter and 13th on the three. Ewen Dickson secured eighth place on the one meter and seventeenth on its three meter.

Overall the team secured sixth place among the ten competing universities.

During the weekend of March 18 John Thompson, Dale McLean and Cathy Walrose will represent UNB at the Canadian Winter National Diving Competition in Winnipeg.

Eastern fencers to fight to finals at UNB

Fencers from universities all over eastern Canada and Maine will be converging on UNB. This weekend as the UNB Fencing Club hosts the 3rd annual UNB Shield fencing tournament. This is a two day event starting on Saturday morning March 12 at 9 a.m. and ending on Sunday afternoon. The fencers will be competing for individual trophies in four weapons: men's and ladies' foil, open epee and open sabre, and the club with the highest ratio of victories to fencers will receive the UNB Shield a trophy donated by Dr. John Anderson.

One of the highlights of the tournament will be the Great Disco Kid Pub on Saturday night in the SUB Ballroom starting at 9 a.m. Entertainment will be supplied by the Disco Kid, a great sound and light show. The admission is only \$1.50 and everybody is invited.

The finals of the tournament will be held on Sunday from 9 a.m. to 2 p.m. This will be an opportunity to see some of the best fencing to come to UNB this year. Programmes will be available to explain a bit about fencing and what to watch for.

Deadline date for receipt of application is March 16, 1977 at 5:00 pm. Direct all applications to Kevin Garland, Chairman Applications Committee c/o SRC Office

Interviews will be arranged

Saltos snare surprise second spot

Last weekend, UNB hosted the CIAU and CWIAU National Intercollegiate Gymnastics Championships, where the fine performance of UNB's squad placed them second.

The Atlantic Men's team, coached by Don Eagle of UNB, was comprised of Ken Salmon, Bert Principe, Bob Johnson, Dan Beaman, Tony Gibson and Randy Thompson of UNB and Shawn Healey and Steve Fraser of Dalhousie. The team represented the Atlantic region very well in accumulating points to set themselves in second place in the team standing with 195.90; this being 49.5 points behind the first place York University team.

The Atlantic team was represented in the finals, by Ken Salmon of UNB, in the Vault event. In this event Salmon obtained the fifth position with a final score of 16.95. The vault event was totally captured by York University represented by Bob Carisse, Dave

Steeper, and Mark Epprecht, respectively.

To make a long story short, the York University team, coached by Tom Zivic, exercised control, flow and strength to gain the majority in all the events, and having Mark Epprecht, Bob Carisse, and Dave Steeper place first, second and third in the All Around, respectively.

The Atlantic women's team represented by Lynn Ferguson, Debbie Peverill, and Cathy Wanlin of Dal. and Janice Garnett of UNBSJ, coached by Vivien Symington of Dalhousie, competed well in all the events. The performance by these competitors from the Atlantic region gives great promise for the future.

The UNBSJ women's representative Janice Garnett made fine performances in the vault, beam, and floor events with scores of 7.00, 7.90 and 7.00 respectively. Garnett's total score was unfortunately not enough to gain a position in the final.

MEN'S EVENT WINNERS

Floor Exercise

- 1 - Bob Carisse - York - 17.70
- 2 - Marc Epprecht - York - 17.55
- 3 - Dave Biddy - Victoria - 17.40

Rings

- 1 - Jennifer Palmer - UBC - 18.55
- 2 - Daniele Bonneton - Ottawa - 16.65
- 3 - Wah-King Ng - Alberta - 16.35

Archers arch under to 'arch' rivals

By HOWARD MYATT

Last Sunday (March 6) the UNB archers travelled to St. John to compete in the St. John Open Archery Tournament. The bowmen of Fredericton had expectations of

capturing a couple of trophies as the day began. But this was not to be, as the day was filled with frustration, disappointment and inconsistency for them. Not all archers shared in the dismal performance of the UNB'ers, Mark

McDonald of Moncton and Mike Cadieux of St. John both shot very well, as each took home their share of hardware. Chris Smith of Harvey set a new Canadian indoor record for junior archers as he scored a tremendous 527.

The Fredericton Bowman will have a chance to redeem themselves next month in the Maritime Open, being held this year in Moncton on April 3. The top archers from New Brunswick, Nova Scotia and P.E.I. will be in

attendance for this Eastern Canadian Championship.

Congratulations to Andy Martin as being named the new president of the local Central Valley Bowman Club.

Burning Blazers blitz Bishop's Bears

UNB Red Blazers skated their way to an easy 10-0 victory over the Bishop's Polar Bears of Lennoxville, Quebec on Friday February 25.

Val MacCullam worked very hard in nets, making some excellent saves, building her

shutout record to two shutouts for the two games she has played in nets. Cheryl Flieger was the top scorer with a hat-trick and an assist, followed by Amy Ramsey who scored two goals, one short-handed, and an assist. Nancy MacLean picked up two points,

and Michele Caldwell and Lola Montgomery each picked up a goal and two assists. Mary Walton netted herself a goal and an assist.

Although the Bishop's Polar Bears tried their best, they just couldn't get it together. Before the

Bears headed back to Lennoxville, a reception was held for them.

Everyone seemed to enjoy themselves tremendously, and the teams parted, both eagerly looking forward to the tournament in Lennoxville next winter.

I can't believe I filled the HOLE thing!
