

# The Waterdown Review

THE BIGGEST LITTLE PAPER IN ONTARIO

VOL. 4.

WATERDOWN, ONTARIO, THURSDAY, APRIL 27, 1922

NO. 51.

## Base Ball Items

The Juniors and Intermediates will play a practice game Saturday afternoon. Manager Torrance requests all players to be on the grounds in uniform promptly at 3 o'clock.

The Harvesters and Waterdown will play an exhibition game here Saturday afternoon, May 6th.

Manager Torrance has signed up four speedy pitchers and two catchers with more to follow.

### INTERMEDIATE SCHEDULE

May 13. Waterdown at Imp. Cotton  
20. Harvesters at Waterdown  
24. Beavers at Waterdown  
27. V. Y. C. at Waterdown  
June 3. Waterdown at Dundas  
10. Imp. Cotton at Waterdown  
17. Beavers at Waterdown  
24. Dundas at Waterdown  
July 1. Harvesters at Waterdown  
8. V. Y. C. at Waterdown

## Institute Meeting

The regular monthly meeting of the Waterdown Women's Institute will be held Wednesday afternoon, May 3rd, at the home of Mrs. W. G. Spence, Mill street. As this is the annual meeting and election of officers, a full attendance of members is requested. Papers will be given by Mrs. J. Prudham on "Friendship" and by Mrs. G. H. Greene on "How to retain youth in spirit and appearance". Question drawer conducted by Mrs. A. Newell. Kindly have your questions ready before the meeting. Music committee, Mrs. Jas. Attridge and Mrs. F. Slater.

### CARD OF THANKS

Mr. and Mrs. J. Mount and daughter Jean, wish to thank the friends for kindness shown during their recent illness.

Mr. John T. Smoke has recovered from his recent illness.

## Looking Forward

With the advent of a main Highway through the centre of the village and vicinity it is certainly assured that property in this district will not decrease in value. Therefore it behooves the people of Waterdown to wake up to the fact that we of the present generation, through our selfishness, should provide for the welfare of future generations.

There is no doubt that the district will long remain a mixed farming and gardening community, and what is sorely and sadly needed is a good agricultural grounds. Our Agricultural Show is down about as low as it can get, partly from want of a good grounds. It is up to the good big men of the village and township to get together at the meeting which will be called in the Township Hall on Thursday evening, May 4th for the purpose of seeing what can be done along this line.

The Agricultural Society has as its president one of the big men, physically and mentally, Mr. Chas. Brigger, who is giving his best efforts to this end. But he cannot work alone, and he asks the people of this village and vicinity to come out and put their shoulder to the wheel. All who are interested in the most valuable asset any community has, its youth, should be on hand as they can help in this cause by using these grounds also as an athletic field. Don't forget the date.

## Honorable Appointment

Rev. W. W. Prudham, pastor of Drayton Methodist Church received a letter on Saturday from Rev. James Smyth, B. A., Principal of Wesleyan Theological College, Montreal, apprising him of the fact that he has been appointed a member of the Board of Governors of that institution, filling the vacancy caused by the recent death of Dr. Ross. Rev. Mr. Prudham will have the congratulations of his congregation and many other friends upon his appointment to such an honorable and responsible position.—Drayton Advocate.

## Public School Field Day

The Public School pupils are holding their first annual field day on Friday afternoon, May 5th. There will also be an exhibit of the pupil's work in Manual Training and Domestic Science.

## Greenville

There was a large attendance at the funeral of Mrs. Maria Church which took place on Monday to the Glenwood cemetery. Rev. Mr. C. R. Albright of Millgrove officiated. The pallbearers were six grandsons.

Miss Lizzie Green is spending the week with Miss Nora Sullivan at Dundas.

Mr. W. Morden of Winnipeg is visiting friends and relatives here.

Mrs. Jas. Seddin of Hamilton was the guest of Mr. and Mrs. J. Surerus on Monday.

Mr. Geo. Riley is preparing to move to the city.

Mrs. L. Gravelle spent the week end in Kitchener with her son.

## Successful Concert and Bazaar

On Thursday, April 13th, the Ladies' Aid of the Methodist Church held a very successful bazaar and entertainment. A splendid display of fancy and useful articles was provided by the ladies of the congregation. The confectionary department did a rushing business in candy, home-made baking and ice cream. In the evening a musical and literary program was given to a large audience. At the close of the program Mr. and Mrs. Poole were called to the front of the school room, and Mrs. Neff, Superintendent of the Mission Band, read an address and Miss Eva Griffin presented a beautiful autograph quilt with upwards of one hundred and fifty names and a picture of the church artistically arranged and worked in. The Pastor and his wife were taken completely by surprise, but both replied with words of deep appreciation of the splendid gift. The successful event closed with refreshments and a social time. The proceeds were upwards of \$150.

## Beginner's Class

The beginner's class for the Primary Room opened Monday 24th with an attendance of 12. Parents who wish to start their children this term should do so before May 1st. Pupils can be taken at five years, but from personal experience I advise starting them at six or seven. Old magazines with coloured pictures would be appreciated for busy work for this class.

M. M. Buchanan.

## Carlisle

Miss Gladys Eaton spent Easter week with relatives in Toronto.

Rev. Mr. Cavers, of Lowville, preached in the Methodist church Sunday morning and evening while Rev. Mr. Hendershot preached on the former's charge at Lowville and Zimmerman.

On Thursday evening last the Progression Amateur Athletic Association met in the Labor Temple and organized a baseball team for the coming season, to be affiliated with the Ontario Amateur Athletic Association. They have decided to play under the name of the "Progression Tigers" and we feel sure that they will have as much pep as their name. Charlie Rolt, who last season did such good work, has been secured for the mound, and Tommy LeMessurier will wear the receivers mitts. Tommy Bousfield will defend, the first sack and Peter Green the second. With boys like these on first and second and Hall Gunby on third there seems to be a bright prospect for victory. In all 13 players have signed up and with sports like Ambrose Eaton, Ormsby Gastle, Ebbie Hunt, Rance Morden, Willie Buttenham, Charlie Eaton, Johnnie Scoons and Tudor Eaton to fight it out for the fielders, it looks as if nothing but fortune can come. Charlie Newell with an unanimous vote was elected manager and Willie Hopkinson will act as secretary. The slogan will be "Watch Charlie's Tigers Win."

## Knox Choir Concert

The Presbyterian Church choir delighted a large number of music lovers by the excellence of the concert given last Wednesday evening.

The opening and closing anthems by the choir showed they felt the sentiment of each, without being purely imitative. The solos given by Mrs. Palmer delighted the audience and revealed her command of dramatic intensity and emotional colouring. In the piano solos by Mr. Mitchell one noted his marked feeling for contrasts and good coloured interpretations. The elocution numbers showed careful selection and were greatly enjoyed. The tone of the quartette was notably fine, the smoothly flowing melody of "Just for Today" showing the members to the best advantage. The little solo given by Mrs. Baker afforded an opportunity for the excellent expression which so thoroughly characterizes her singing. The perfect harmony of the voices in the duets rendered were specially pleasing.

An appreciative audience added much to the success of such an entertainment, and such was the audience of Wednesday evening.

After sing "God Save the King" the audience were admitted to the Sunday School room where a pleasant social hour was spent. The tables were spring-like with their lovely sprays of trailing periwinkle and moss baskets filled with hepaticas and violets.

The choir feels that with such a capable leader as Mrs. Baker, this first success will be merely a beginning, and that it will furnish an incentive for many greater attempts in the future.

## New 5 Cent Piece

The new Canadian nickel will soon be in general circulation. It is similar in size to the American nickel. It has the image of King George on one side and on the other the words "Canada Five Cents" and two maple leaves. The edge is not milled.

## Locals

Miss Addie Fox, of Hamilton, spent the week end with Mr. and Mrs. Wm. Langton.

Mr. Chas. Richards was confined to his home a few days this with an attack of the gripe.

Mrs. Geo. Congdon of Hamilton was the guest of Mr. and Mrs. Wm. Attridge last Sunday.

Rev. C. L. McIrvine of Winnipeg occupied the pulpit at the Methodist church last Sunday morning.

Mrs. A. B. Higginson and little son, of Fergus, spent a few days this week visiting relatives in the village.

Mrs. Corral, who has been spending the winter with her mother, Mrs. H. Heatherington, has sailed for England to join her husband.

Miss Nellie McMonies has returned to her duties at Clifton Springs, N. Y., after spending her holidays with her mother and other relatives.

The annual Diocesan meeting of the Women's Auxiliary begins Tuesday morning, May 2nd, at 11 o'clock in Christ Church Cathedral, Hamilton.

## Avonsyde Farms Dairy

Pure Ayrshire Milk of Quality

Drink More Ayrshire Milk — Free from Tuberculosis

Milk For Under Nourished Children

An average gain in weight of three pounds in forty days, as a result of milk feeding, was recorded in the Jesse Ketchum School, Toronto, where 48 under-nourished children were given half a pint of milk a day. The greatest individual gain was 8½ pounds. A marked improvement in appearance, disposition, interest and ability was noticed as a result of the milk diet.

"A pint of Ayrshire milk a day,  
For every child they say,  
Builds bone, tooth and muscle,  
Gives strength for a tussle—  
Of course such food will pay."

**NOTICE**

NOTICE is hereby given that a By-Law was passed by the Corporation of the Township of East Flamboro on the 3rd day of April, 1922, providing for the issuing of Debentures to the amount of \$25,000 for the building of a new Public School on the 8th Concession for School Section No. 5, East Flamboro, and that said By-Law was registered in the Registry Office of the County of Wentworth on the 6th day of April 1922.

Any motion to quash or set aside this By-Law, or any part thereof, must be made within Three months after the first publication of this notice, and cannot be made thereafter.

Dated at Waterdown this 7th day of April, 1922.

L. J. MULLOCK,  
Clerk of Said Municipality.

**NOTICE TO CONTRACTORS**

Pursuant to the requirements of the Canada Highways Act, separate sealed tenders marked "Tender for Contract No. ...." will be received by the undersigned until 12 o'clock noon on Thursday May 11th, 1922, for work on the Provincial Highway.

Contract No. 619. Bituminous Penetration Pavement, Clappisons Corners to Blacks Corners, 3 miles.

Contract No. 544. Concrete Culverts, Abutments and Bridge Floors, Waterdown Bridge.

Plans, specifications, information to bidders, tender forms and tender envelopes may be obtained on and after Monday, April 17th, 1922, at the office of the undersigned, or from G. G. Greig, Resident Engineer, Waterdown.

A marked cheque for \$1,000 payable to the Minister of Public Works and Highways, Ontario, or a Guaranty Company's bid bond for a similar amount must be attached to each tender. A Guaranty Company's Contract Bond for 50% of the amount of the tender will be furnished by contractor when contract is signed. All bonds must be made out on Departmental forms.

The lowest or any tender not necessarily accepted.

W. A. McLEAN,  
Deputy Minister of Highways,  
Department of Public Highways, Ontario

## The Farm

Timely Articles by the Ontario Department of Agriculture, Toronto

### ABOUT THE ATTIC TANK

Useful for Rural and Small Town Houses.

Not an Ideal System, However—Something Better Later On—The Making, Installing and Filling of the Tank Described.

(Contributed by Ontario Department of Agriculture, Toronto.)

My last article described how the farm pump on shallow wells may be located inside the house or stable, thus doing away with the carrying of water. This arrangement, of course, will not provide for water under pressure, and, therefore, a complete plumbing system is not possible, nor is hot water made available. To secure these great advantages, it is necessary to either elevate the water to some form of tank at least a few feet higher than the highest fixture in the house, or pump the water into a strong metal high pressure tank against the enclosed air which when compressed into about one-half to one-third the volume of the tank will create sufficient power to force the water out when the faucets are opened. The first arrangement or system is usually called the Attic Tank water system, the second, the Compressed Water System.

Why Called "Attic Tank System."

This system is popularly known as the Attic Tank System because the water supply tank which supplies water under pressure is usually located in the attic of the house. To get enough pressure to force the water through the hot water boiler and the coils in the furnace or kitchen range and supply any fixture as sink or bath tub with water at a reasonable rate of flow, it is necessary to get the water tank a considerable distance above the highest fixture. To secure say 35 lbs. pressure at the kitchen faucets the tank would need to be at least 80 feet higher than the kitchen, so you see that in order to get any pressure worth while the tank must be located at the highest possible level inside the house, hence the attic location. More pressure, and hence faster flow at fixtures may be had by locating the tank outside the house on the top of a high tower, for example, just above the wind mill, but outside tanks are not popular for evident reasons.

The System Is Not an Ideal One.

The Attic Tank System has given pretty fair satisfaction where properly put in and cared for, and therefore has been really worth while. It

is a useful, however, if many more of this type of water system will be installed, as the more modern ones, which I will describe in subsequent articles, are very much superior. The chief objections to this system are, first, the water tank is liable to freeze unless well protected, the tank may spring a leak and seriously damage the interior of the home and the furnishings, the supply is not high enough to give good pressure, you have to wait a long time to get a pail of water, and as the tank must of necessity be pretty small, pumping must be resorted to very frequently in order to keep enough water on hand; and lastly, the water has to be pumped up to the tank by hand pump and few people enjoy pumping even if the pumping is done indoors.

How to Make the Tank.

The tank itself is usually constructed of pine or spruce plank, tongued and grooved, well held together by iron rods and the inside lined with A1 quality galvanized iron. A tight top should be used in order to keep dust and dirt out of it. On one side near the top there should be installed an overflow pipe leading to the outside or to a sink or some fixture below, preferably in the kitchen, so that the one who is pumping may know by flow from pipe when the tank is full. The tank should be large enough to hold at least three or four barrels of water. In some houses it is possible to arrange for running part of the rain water from the roof into this tank, in which case considerable pumping is eliminated. The tank should be located preferably over a partition so that the weight of water would not cause a sag in the floor of the attic. A tight metal tank about five feet long and two feet in diameter strapped to the ceiling above the bathroom might be used instead of the wooden one in the attic.

The Filling of the Tank.

As stated, the tank is usually filled by a hand pump located in the kitchen or cellar. The pump used for this purpose must be a force-pump in order to lift the water to the required level. If electricity or small gas engine were available either might be used to pump up the water. Sometimes the tank is filled by wind-mill and sometimes by a hydraulic ram operating at the spring a considerable distance from the house. Write the Department of Physics, O. A. C., Guelph, for further particulars. Make modern conveniences for the farm home your special study this winter.—R. R. Graham, O. A. College, Guelph.

Millet is a splendid smother crop and weed seed destroyer, especially when cut thickly for hay and cut early.

## USING ICE ON THE FARM

Helpful Advice as to Storing of a Good Supply.

Dairy Products Must Be Kept Cool—A Variety of Plans for Handling Ice—Good Drainage in the Ice House Necessary.

(Contributed by Ontario Department of Agriculture, Toronto.)

It is a very rare occurrence in Ontario that the winter weather is not cold enough to make plenty of ice on our lakes, rivers, small streams, and ponds. We can, therefore, feel pretty sure of a good crop of ice this winter.

Ice is the only other means of cooling on farms, except in the case of very large dairies where the use of a mechanical system may be warranted. The one chief obstacle to proper cooling of milk and cream by ice that many farmers meet is the lack of a convenient supply in their immediate vicinities. This may not be an insurmountable difficulty, however, as there is always the possibility of ice being shipped in during the winter and stored for use in the summer.

Dairy Products Must Be Kept Cool.

If the quality of our dairy products is ever to become supreme in the world it will be necessary for the producers of milk to get the natural heat out of the milk as quickly as possible after it is abstracted from the cows. This will mean more efficient methods of cooling than most farmers have to-day. There would be required by all dairy farmers, and they would have to secure it either from nearby bodies of water, if present, or through some suitable organization shipping it in as referred to before. The superior article selling at better prices would likely pay the producers to ship in ice if it were necessary. Many farmers now have a household refrigerator or small cold storage plant for keeping the daily food for the table pure, sweet, and fresh, and never fail to store ice for this purpose alone whether needed for other purposes or not. They find by experience that this practice is worth while. If much milk is produced, so much greater is the value of some ice.

Some "Don'ts" for House-Cleaning.

Don't use water on waxed wood-work. Rub with a waxed cloth, then with a clean flannel cloth.

Don't wash all the curtains at one time and don't starch them. Use a little rice water or thin starch in the last rinse water. New curtains are not starched; why advertise that your curtains are old by starching them?

Don't beat rugs such as Brussels or Wilton on the right side. Lay them face down on the grass, beat and sweep on the wrong side. When replaced on the floors wipe the surface with a cloth wrung from hot salt water. This brightens and freshens the rugs.

### DANDELION CONTROL

Four or Five Sprayings With Iron Sulphate Will Do the Trick.

Little attention was paid to the dandelion as a weed thirty years ago, but with the clearing up of lands and removal of obstacles to the spread of the weed great increase of the nuisance is seen in grass land everywhere. The dandelion cannot succeed on land that is well cultivated, but areas of grass, whether pasture fields, roadways or lawns, are usually heavily infested. Large areas cannot well be treated unless the use of the land is such as to permit heavy expenditures. Small areas, such as lawns and portions of golf courses, may under proper management be kept free of dandelions.

Spraying with iron sulphate, four or five applications during one season, will generally free a grass area of the pest. But the treatment must be repeated every third year. The first spraying should be applied just before the first blooming period of the dandelion and followed by two others at intervals of three weeks. Two further applications should also be given during September or October. Spraying should not be done during the hot, dry period unless water can be applied to keep the grass growing vigorously. Grass areas that are sprayed usually blacken considerably after each application, but this burned appearance disappears after a few days. Areas that are being sprayed for the eradication of dandelion should be well fertilized, and grass seed should be applied to keep up the required number of grass plants to form a good turf. White clover is killed by iron sulphate spray, so cannot succeed under this method of dandelion control. The strength of solution to use is 1½ pounds to one gallon of water. —L. Stevenson, Secretary Dept. of Agriculture, Toronto.

Why a \$5,000 Bull Was Sold for \$50.

When a certain farmer a few years ago sold his registered Holstein bull to his local butcher no records had been made by any of the bull's daughters. Within a year eleven of the daughters freshened at the ages of two and three. Records were made of milk and butter-fat production, and to the astonishment of everybody the average milk production was 14,502 pounds and the average butter-fat production was 573 pounds.

But before these records were available the bull was dead and his hide had become leather. Because there were no records, a \$5,000 bull had been sold for \$50.
