

Necessity Knows No Law.

At a law of Nature bows the necessity of keeping blood pure so that the system shall be strong, healthy and vigorous.

Take Hood's Sarsaparilla, the great purifier, is therefore a law of nature and it is a necessity in nearly every household. It never disappoints.

It cleanses the blood, drives out the impurities, restores the system to its normal condition, and gives the system the power to resist disease.

Hood's Sarsaparilla is the only medicine that will cure the blood, and it is the only medicine that will cure the system.

It is the only medicine that will cure the blood, and it is the only medicine that will cure the system.

It is the only medicine that will cure the blood, and it is the only medicine that will cure the system.

VOLUME LXII—NO. 63

Amused Curiosity

Attitude of British People Towards French Reception of Kruger.

Leniently Regarded as an Exhibition of Inevitable Gallic Enthusiasm.

Illness of the Czar Regarded Very Seriously by London Press.

London, Nov. 24.—Mr. Kruger's triumphant passage from Marseilles to Paris is regarded with curious and unexpected indifference in Great Britain.

Every detail of the remarkable orations has been read with interest, and underlying feeling here in more one of weary indifference.

On Thursday, the 15th instant, it was changed. At Vernon it is heavily in the morning, gradually clearing to snow and getting colder.

Rally in Vancouver

Conservative Meeting Crowded in Spite of the Rainy Weather.

Torchlight Procession Escort Speakers Through Streets Amid Great Enthusiasm.

Liberal Gathering on Friday Evening a Decidedly Cold Affair.

Special to the Colonist.

Vancouver, Nov. 24.—The city hall was crowded to-night at the big Conservative rally. The speakers of the evening were Sir Charles Hibbert Tupper, the Hon. Clarke Wallace and the Conservative candidate for Burrard, Mayor Garden.

Shortly before 8 o'clock a procession was formed at the central committee rooms. The large number of citizens composing the parade proceeded to the Hotel Vancouver, and escorted the speakers through the principal streets of the city to the committee rooms, where the speeches were at once commenced.

The Liberal or Conservative, and the very large crowd present punctuated the telling sentences of the speakers with generous applause.

Mayor Garden, in a brief speech, referred to the fact that the city of Vancouver was a representative of the race cry started by Liberals in the city.

Mayor Garden received a magnificent ovation.

Sir Charles Hibbert Tupper, who was welcomed with prolonged cheering, spoke at length on the race cry question.

He stated that it was the duty of Burrard to show by his vote that he would not support the race cry.

The French must learn that Canadians will not stand for their election by a French premier simply because of the name of the party.

Mr. Clarke Wallace, who was welcomed with prolonged cheering, spoke at length on the race cry question.

Weighing the Sunshine.

Prof. S. P. Langley's New Invention, the Bolometer, Described in the Globe-Democrat.

Washington, D.C., Nov. 1.—Sun spots have not been regarded as much respect by astronomers hitherto, because of the doubt as to whether they really exert any influence over the weather. Unhappily, however, they will receive more attention in the immediate future than ever before, on account of the remarkable fulfillment of the prophecy of a well-known astronomer as to the summer that is just past. He gave warning nine months ago that the summer of 1899 would be one of unprecedented heat—that August would be even hotter than July, and that September would break the thermometer record. These forecasts have been fulfilled, it remains to be seen whether this scientific authority was proved correct.

On this thread the prism through the sun's rays is placed. It is an old story that the electrical resistance of substances varies directly with their temperature, so that, in order to find out the temperature of the platinum thread, it is only necessary to ascertain the degree of electrical resistance which it may have at the moment. This determination is made for the purpose of measuring the sun's rays, which are described, which is so extremely delicate that it will record a variation of one-millionth of one degree Fahrenheit.

Outside the building is the big machine pumping sunshine into the laboratory. The sun's rays are collected in a well below the apparatus, keeps the mirror facing the sun all the time, and varies directly with their temperature, so that, in order to find out the temperature of the platinum thread, it is only necessary to ascertain the degree of electrical resistance which it may have at the moment.

Mr. Justice Gwyn said that the Court had fixed weekly hours, so that the men could be employed on a regular basis. The arrangement was made for the purpose of measuring the sun's rays, which are described, which is so extremely delicate that it will record a variation of one-millionth of one degree Fahrenheit.

What these invisible colors may be like nobody can imagine. They may be objects of resonance or they may be perceptible to certain animals, just as some sounds perfectly audible to certain animals are inaudible to human ears. It is possible for man, however, to make an instrument with which to measure the spectrum of the sun.

The regions of invisible colors, beyond the violet end of the spectrum, are beyond the violet end of the spectrum.

Prof. Langley believes that the sun really deserves more of our attention than it has received. It has more to do with our welfare, and with the current affairs of the world, than we imagine. He is of the opinion that the secret of life would appear to anybody who should view it outside of this planet's atmosphere.

The following finding of the Arbitration Court in Wellington, New Zealand, is taken from the Lyttelton Times, published at Christ Church, N. Z. It is of interest as showing the length to which judgment was given in the Arbitration Court today in the case of the bakers' strike. Generally speaking all were in favor of the workers, and the arbitrator has been asked more would have been awarded.

London, Nov. 22.—At the first day of the racing of the Manchester race, the winner was Lord Cadogan's black filly in a Figg, by Saraband, out of Vivian.

A meeting of the Fisher Maiden Mining & Smelting Company will be held on December 13, at Bossland. The following appointments are gazetted: Roland Ryder, of Hope, to be a coroner for the province, vice William Teague; William Wilfrid Southam, of Ladysmith, and Roland Ryder, of Hope, to be justices of the peace for the counties of Victoria, Nanaimo, Vancouver, Westminister, Yale, and Kootenay; George My Clark, of Montreal, to be a commissioner for taking affidavits for the courts of British Columbia; Herbert Young, of A. L. N., to be a notary public for the province.

THE MACDONALD TRAINING SCHOOLS. The visit of Professor Robertson to British Columbia for the purpose of organizing the manual training schools, one of several to be established in Canada through the generosity of Sir W. Macdonald, which has been given the honor of Ottawa, marks an important event in the history of Ottawa schools, and is the beginning of a movement destined, we believe, to strengthen one weak spot in our system of education.

THE GANTHEEN SCANDAL. Master Gunner Acheson Has Been Acquitted. London, Nov. 22.—The extraordinary interest taken here in the Dover case, which was fixed for trial on the 21st inst., was accentuated today by the acquittal of Master Gunner Acheson, accused of pilfering £13 of the Royal Garrison Artillery. The latter was acquitted on October 13 of embezzling canteen money, and Acheson demanded a trial by court-martial on the allegation that he had hatched a plot to desert.
