The copy filmed here has been reproduced thanks to the generosity of:

Bibliothèque nationale du Québec

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Québec

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

PREFACE

TO

THE THIRTEENTH EDITION.

TWENTY-EIGHT years have now elapsed since the first publication of the "BIOGRAPHICAL TREASURY." That it met a general want, and established itself and has held its ground as a popular favourite, is sufficiently shown by the fact that during that period it has passed through twelve editions, the last appearing in 1862. It has been subjected to several successive revisions, and fresh notices of eminent persons have been added from time to time; the more recent of which formed in the 12th edition two Supplements extending to 100 pages.

Another edition being required, the opportunity has been taken to subject the whole work to a more searching revision than any previous one. This was especially desirable on account of the advance of historical knowledge and criticism. Many new facts have been discovered, many long-standing mistakes have been corrected, and many familiar facts have been set in a new and truer light. More particularly a revolution of thought has taken place with respect to the earliest periods of the history of both ancient and modern nations. For the first time a clear distinction has been critically established between history and legend, and the value of oral tradition as contrasted with the evidence of contemporary written documents; and this necessitates a new treatment of many names in a biographical dictionary.

So numerous and important are the alterations made in this thirteenth edition of the "BIOGRAPHICAL TREASURY," that it is virtually a new work; but little of the original matter having escaped the successive applications of the axe or the pruning-knife. In justice both to the publishers and to myself, it is incumbent on me to state particularly what these changes are.

And first, many comparatively unimportant names, such as were on careful consideration judged unlikely to be asked for, except perhaps by half-a-dozen persons in half-a-dozen years, have been omitted.

The space thus gained is more usefully occupied, partly by re-written and fuller notices of names more generally interesting, and partly by entirely new memoirs. Among those re-written—about 900 in number—will be found the names of many English and foreign sovereigns, and some of the highest names of all ages in literature, philosophy, theology, politics, science, and art: ex. gr.—Homer, Herodotus, Socrates, Plato, Pericles, and Sophocles; Dante, Petrarch, Shakespeare, and Milton;

Preface.

Giotto, Leonardo da Vinci, Michael Angelo, and Raphael; Mohammed, St Dunstan, St Bernard, Wickliffe, Savonarola, Calvin, and Bernard Palissy; Tycho Brahe and Kepler; Montaigne, Leibnitz, Fichte, and Coleridge; Saladin, Bayard, Marlborough, and Washington, &c., &c. And among the new notices—more than 1000—will be found not a few names of historical importance which are not given in some books of higher pretension; and memoirs, as full as space allowed, of the many distinguished men whose deaths have been recorded since the preparation of the last edition. Of these may be particularized—Leopold, king of the Belgians, President Lincoln, Lord Palmerston, Cardinal Wiseman, the Marquis of Lansdowne, Lord Lyndhurst, Lord Canning, Lord Clyde, Lord Seaton, the Earl of Aberdeen, Sir G. C. Lewis, Richard Cobden, Archbishop Whately, Dr Whewell, Father Mathew, Father Lacordaire, Dr Robinson, Isaac Taylor, F. W. Robertson, Horace Vernet, Delacroix, Delaroche, Ary Scheffer, Mulready, Dyce, John Leech, Sir John Franklin, Admiral Fitzroy, Sir J. Richardson, Dr Lindley, Admiral W. H. Smyth, Sir W. J. Hooker, Sir W. R. Hamilton, Sir B. C. Brodie, “Stonewall” Jackson, W. M. Thackeray, W. S. Landor, Mrs Gaskell, A. A. Procter, Varnhagen von Ense, Uhland, and Robert Schumann. The memoirs contained in the two Supplements of the previous edition are of course inserted in their proper places in the course of the work.

The dates throughout have been carefully verified, and many additional inserted; cross-references, it is hoped, are made fairly complete; and great pains have been taken to secure accuracy in foreign names (many of which were previously given in an English form), in the titles of books, and the works of artists. Mention is made in many cases of those works of great painters which are in the National Gallery, of portraits in the National Portrait Gallery, of statues and monuments, and, occasionally, of recent biographical memoirs.

As a general rule, mythical names are excluded. But it is not possible to lay down any rule rigidly applicable to all cases. A few such names therefore still appear, but are carefully noted as mythical or semi-mythical; and, as it is impossible to admit discussion, readers who desire fuller information in such cases are referred, for Greek and Roman names, to Grote's “History of Greece,” and Sir G. C. Lewis's “Credibility of Early Roman History.”

In the task of reconstruction I have endeavoured to give equal attention to distinguished men of all classes, to introduce or approximate to a just proportion in the relative length of the notices, and to treat all subjects in a catholic and liberal spirit, avoiding all political and ecclesiastical partisanship. With this view I have expunged many expressions and epithets which belong to a bygone age and mode of thought.

The small bulk of this volume is not unlikely to mislead many as to the quantity of matter it contains. It may be a surprise to some to hear that the quantity of letter-press on a page very nearly equals that on each page of the one-volume edition of Dr W. Smith's Classical Dictionary; and it contains 297 more pages than that work. The present edition of the “**BIOGRAPHICAL TREASURY**” exceeds the last in bulk by 167 pages. The type, though small, is sharp, clear, and readable with ease. It is sur-

Preface.

prising, too, into how small a space the salient facts of a life may be packed, if disquisition, controversy, and, above all, fine writing are resolutely excluded, and if the account be written at once with clearness and accuracy, and with all possible brevity; a quality daily rising in value.

The process of revision and reconstruction has occupied most of my time during the last three years; and my confident hope is, that having made a new selection of names, having carefully drawn the material from the best sources, and solidified statements of fact with a sufficient number of accurate dates—so far as accuracy is attainable—the “**BIOGRAPHICAL TREASURY**” in its new shape will be found far more complete and trustworthy than ever, as a popular hand-book of biographical information.

That a work consisting of such a mass of names, facts, and dates should be exempt from errors it would be ridiculous to expect. Every one who has tried his hand at work of the kind knows painfully that, whether truth lie hid in a well or not, it is almost always exceedingly hard to get at. And the more pains we take and the farther we go in research the harder, oftentimes, it is to find and to be sure that we have found it. It is no uncommon occurrence for an inquirer to get one statement of fact or date from one book, two if he goes farther, three from three sources, and so on; and in such cases, there is frequently nothing for it at last, but to speak according to the best of his own judgment, and select or make a compromise between conflicting testimonies.

The work is made as nearly as possible complete to the present time, many notices having been added while it has been passing through the press. A Chronological Index of the most important classes of names is added to this edition, which it is hoped may increase its usefulness. The new frontispiece was designed by Mr James Doyle.

NEW DICTIONARY

OF

UNIVERSAL BIOGRAPHY.

AA, PETER VAN DER, an eminent bookseller of Leyden, who, early in the 18th century, compiled and published several extensive collections of voyages and travels, among which was his "Galerie du Monde," an illustrated Atlas, in 66 vols. He also published the great collection of Gronovius on Greek, and of Grævius on Roman, antiquities. Died, 1730.

AARSEN, FRANS VAN, Dutch diplomatist, was born in 1572. Brought up in the household of the Prince of Orange, he was appointed resident of the United Provinces at the French court in 1598, and subsequently ambassador. After temporary disgrace he was recalled to Holland in 1615, when by his support of Maurice of Nassau and his hostility to the noble Barneveldt, in whose prosecution he took a leading part, he rendered himself very unpopular. When Maurice became supreme Aarsen was employed in various missions, and was twice sent to England, in 1626 and 1640. Died, 1641.

AARTGEN, a painter, of very considerable merit, but of low and dissolute habits. He was born at Leyden, in 1498; and is said to have met his death by being drowned in a drunken frolic, in 1564.

ABASSA, or ABBASSA, sister of the caliph Haroun al Raschid, who gave her in marriage to his vizier Glafar, on condition that their marriage should never be consummated; but having broken the contract, the caliph put Glafar to death, and banished his wife from the palace, giving orders that no one should afford her relief. The romantic incidents arising from this strange marriage have furnished themes for many an oriental tale.

ABATE, ANDREA, a Neapolitan artist, who, as a painter of fruit and objects of still life, acquired great celebrity. He was employed, together with Luca Giordano, in adorning the Escorial for Charles II. of Spain. Died, 1732.

ABATI, NICOLO, more frequently, but erroneously, called Dell' Abate, a renowned painter in fresco. Born at Modena, 1512; died at Paris, 1571. Several of his relations also distinguished themselves as painters.

ABAUZIT, FIRMIN, a French author of great merit, and whose modesty was equal to his erudition. His father died in his infancy; and his mother, in order to secure his education in the Protestant faith, sent him, at two years of age, to Geneva. After finishing his studies he went to Holland,

and from thence to England, where he formed an intimacy with Sir Isaac Newton, by whom he was much admired and esteemed. He was also highly panegyrised by Voltaire and Rousseau. In short, though he published little, he had acquired among literary men a character for profound learning, and his correct judgment was universally acknowledged by them. Born at Uzes, 1679; died at Geneva, 1767.

ABHADIE, JACQUES, an eminent Protestant divine, who accompanied Marshal Schomberg to England in 1688, and was present when that great commander fell at the battle of the Boyne. On his return to London he was appointed minister of the French church in the Savoy, and was subsequently made dean of Killaloe. He wrote many works, chiefly theological and in the French language; the most esteemed of which are "Art de se connaître soi-même," and "Traité de la Vérité de la Religion Chrétienne." Born at Noy, in Béarn, in 1658; died in London, 1727.

ABBAS, the uncle of Mahomet, of whom, though opposed to him at first, he became a disciple, and served in his army as a general. He died in the 32nd year of the Hegira—A.D. 653.

ABBAS, SHAH, the Great, King of Persia, succeeded to the throne in 1586. He made war on the Usbeks, and conquered Khorasan. He put an end to the war with the Turks, by ceding to them Armenia and other provinces, first transporting the Armenians into Persia. In 1590 he made Ispahan the seat of government, and greatly improved and adorned it. With the help of the English he drove the Portuguese from Bender-Abassi and the Isle of Ormuz, and by other conquests enlarged his dominions. Abbas had some qualities which justified his title "Great," but these were mixed with other and vicious qualities. While he was brave, a patron of commerce and the arts, and an efficient ruler, he was also cruel, suspicious, jealous of those who served him well, a merciless tax-gatherer, and unscrupulous in putting to death the objects of his suspicion. Died, 1628.

ABBATI, FILIPPO, an historical painter, of considerable eminence. Born at Milan in 1640 died in 1715.

ABBOT, GEORGE, archbishop of Canterbury in the reigns of James I. and Charles I., and one of the most active political characters of that period. He was born, in 1562,

at Guildford in Surrey, where his father was a weaver and clothworker. After receiving his education at the grammar school in that town, he was sent to Hallol college, Oxford; and became successively master of University college, dean of Winchester, vice-chancellor of Oxford, bishop of Lichfield and Coventry, then of London, and lastly, in 1610, primate of all England. Archbishop Abbot was throughout his life the bitter political and ecclesiastical rival and enemy of Laud. Although he at first distinguished himself by a rigorous maintenance of the doctrines of divine right and passive obedience, he became, after the accession of Charles I., whom he crowned at Westminster, a steady and resolute opponent of the despotic measures of the king. In 1622 an event occurred, which for a time caused his suspension from the archiepiscopal office; being at the seat of Lord Zouch in Hampshire, while on a hunting party he accidentally shot one of his lordship's keepers. He was the author of several theological works; and was one of the eight divines, who, in 1604, by the order of James I., made the translation of the Bible now in use. He died at Croydon in 1633, and was buried in his native town, where he had founded and liberally endowed a hospital.

ABBOT, ROBERT, bishop of Salisbury, and elder brother of the above. He was an eminent divine, and famous for his skill in conducting polemical discussions and vindicating the supremacy of kings. Born, 1560; died, 1617. Dr Fuller, speaking of the two brothers, says, "George was the more plausible preacher, Robert the greatest scholar; George the abler statesman, Robert the deeper divine; gravity did frown in George, and smile in Robert."

ABOTT, CHARLES. [TENTERDEN, Lord.]

ABHT, THOMAS, a German writer, was born at Ulm, in Suabia, in 1738. After filling the chair of philosophy at Frankfurt on the Oder, and of mathematics at Hildeln in Westphalia, he was fortunate enough to attract the notice of the prince of Schaumburg-Lippe, by whom he was held in high estimation and effectually patronised. His treatises on "Merit," and on the "Duty of Dying for our Country," are full of talent and promise; but the latter he was not destined to fulfil, as he died at the early age of 28, in 1766.

ABDALLA, the father of Mahomet. Though originally only a camel-driver, it appears that he was held in high estimation by his tribe: indeed, an extravagant is the praise bestowed upon him, that, among other absurdities which are related, it is said that on his wedding a hundred girls died of grief and disappointment, for having lost the honour of being his bride.

ABDOLLATIPH, a Persian historian, born at Bagdad in 1161. He is said to have been a man of great learning and a voluminous writer; but the only one of his works known in Europe is an abridged history of Egypt, entitled "Al-Kitat Alsager," or the little book, which was published from a MS. in the Bodleian Library, by Professor White, in 1800.

ABDUL MEDJID, sultan of Turkey, son

of Mahmoud II., was born in 1823. He succeeded his father in 1839, while Mehemet Ali was carrying on war against him. A few months after his accession he published an edict, establishing certain civil reforms. By the intervention of the chief European powers, Mehemet Ali was reduced to submission and a permanent arrangement of the quarrel effected in 1840. Much opposition was made to the Sultan's projects of reform, especially to his concession of privileges to his Christian subjects, and his position was one of very great difficulty. He obtained great popularity in Western Europe by his courageous and generous protection of the Hungarian refugees, in 1849. The great event of his reign was the Crimean war, in which France and England allied themselves with Turkey against the encroachments of Russia, and which was terminated by the fall of Sebastopol after a long siege, in 1856. Died, 1861.

A HECKETT, GILBERT ABBOT, a distinguished humourist and satirical writer, was born in London in 1811, and educated at Westminster. While engaged in prosecuting his legal studies, he wrote numerous pieces for the stage which were more or less successful, established various journals of a humorous and satirical character, and contributed to some of the most distinguished literary and political journals of the day. In 1841, he was admitted to the bar; but he still continued his literary pursuits, and besides being one of the chief contributors to Punch, produced in succession his comic "Blackstone," and Comic Histories of "England" and "Rome," all of which achieved great success. In 1849, he was appointed one of the police magistrates of the metropolis, an office for which the knowledge of life and law which he possessed, rendered him eminently fitted. Died at Boulogne in 1856.

ABEL, DR CLARKE, was the historian of Lord Amherst's embassy to China, which he accompanied as chief medical officer and naturalist. He was a deep and philosophic thinker, a close observer of the mysteries of nature, and a man of a benevolent mind. Died, 1826.

ABEL, JOSEPH, a distinguished German painter of the present century, born near Linz on the Danube, 1780. Many of his historical pictures are to be seen at Vienna, where he died, 1818.

ABEL, NIELS HENRIK, mathematician, born in Norway, 1802. He studied at the University of Christiania, and in 1825 visited the principal countries of Europe. He contributed to "Crelle's Journal" of Mathematical Science from its establishment. He was an original thinker, and his discoveries on the theory of elliptic functions were eagerly adopted by Legendre. His promising career was cut short by consumption, in 1828. The works of Abel were published in French, by the government of Sweden, about 10 years after his death.

ABELA, JOHN FRANCIS, commander of the order of St John of Jerusalem; author of a valuable and interesting work entitled "Malta Illustrata," which was printed in that island, in 1647. Died, 1655.

ARD, PIERRE, cele-

brated for his learning and his misfortunes, the latter arising partly from his love of the equally celebrated Heloise, was born at the village of Palais, near Nantes, in Brittany, 1079. Having made extraordinary progress at the university of Paris, and surpassed all his masters, he opened a school of theology, philosophy, and rhetoric, which was thronged with pupils, among whom were some of the most distinguished characters of the day. While he was in the zenith of his popularity he became so violently enamoured with the beautiful and accomplished niece of Fulbert, a canon of Paris, as to forget his duty, his lectures, and his fame. Under the pretext of teaching her philosophy, he obtained the uncle's permission to visit her, and at length to reside in the house. Though Abelard was at that time in his 40th year, and Heloise only in her 18th, a mutual passion, fatal to the happiness of both, was encouraged. Fulbert suspecting this, separated the lovers; but the imprudent intercourse had gone too far for concealment; and Abelard, who had retired to his sister's house in Brittany, was followed there by Heloise, who gave birth to a son. He then resolved to marry her secretly; but although the uncle's consent was obtained, Heloise chose rather to be considered Abelard's mistress than his wife, and at last very reluctantly complied. Still she would not own her marriage, and this so greatly incensed her uncle, that he treated her with great severity; and Abelard in consequence determined on releasing her. He accordingly carried her away, and placed her in the convent of Argenteuil, where she put on the religious habit, but did not take the veil. Irritated at Abelard, the canon hired some ruffians, who broke into his chamber, and subjected him to an ignominious mutilation. Filled with shame and sorrow, Abelard now became a monk in the abbey of St Denis, and Heloise took the veil. Just and severe retribution, for the atrocious crime, overtook the canon, his valet, and one of his assistant ruffians. After time had somewhat moderated his grief, Abelard resumed his lectures, but the violence of his enemies increased; he was charged with heresy, and his works condemned by the Council of Soissons, in 1121, no defence being permitted him. He fled from St Denis and erected an oratory in the diocese of Troyes, called the Paraclete, but persecution still followed him; the great St Bernard became his accuser, and succeeded in getting him condemned by the Council of Sens, and afterwards by the Pope. Abelard did not long survive his sentence; but, after a life of extraordinary vicissitudes, died in the priory of St Mareil, near Chalons-sur-Saone, in 1142. On the corpse being sent to Heloise, she deposited it in the Paraclete, of which she was at that time the abbess. The remains of the noble-minded Heloise, who survived him many years, were laid in his tomb. In 1800 the ashes of both were taken to the museum of French monuments at Paris; and on the museum being destroyed, in 1817, they were removed to the cemetery of Père la Chaise. Abelard obtained, in his own day, the most extraordinary reputation by the splendour of his abilities as philosopher, theologian,

logician, orator, and poet. His influence was probably second only to that of St Bernard himself. And as the first who applied philosophical criticism to theology, his name is one of the most important in the history of the development of modern thought. It is worth while to add that through the kindly offices of Peter the Venerable, abbot of Cluny, a reconciliation was effected between Abelard and St Bernard.

ABELLÉ, LOUIS, bishop of Rhodes, and author of "Medulla," and other theological works. Born, 1604; died, 1691.

ABENDANA, JACOB, a Spanish Jew; author of a Hebrew Commentary on some portions of the Scripture. Died, 1685.

ABERCROMBIE, JOHN, M.D., an eminent Scotch physician and author, was born at Aberdeen, Nov. 11, 1781. Having taken his degree at Edinburgh in 1803, he permanently fixed his residence in the Scotch metropolis, where he soon gained the first rank as a practising and consulting physician. But the writings of Dr Abercrombie contributed no less to the maintenance of his fame, than his skill as a physician. His purely professional works procured for him a high place among the modern cultivators of science; but the most permanent monument to his memory are his "Inquiries concerning the Intellectual Powers, &c.," published 1830, and the "Philosophy of the Moral Feelings," published 1833. In these works he has brought all the medical facts accumulated in the course of his extensive experience and research, to bear on the various moral and metaphysical systems in vogue, and constructed out of the whole a view of human nature in which he believed that the facts of science and the revelations of religion are blended in harmony. To his wide range of acquirements he added a piety as genuine as it was unassuming, and he will long be remembered for his large but unobtrusive benevolence. Died, Nov. 14, 1844.

ABERCROMBIE, JOHN, a horticulturist; author of a "Universal Dictionary of Gardening and Botany," and a "Gardener's Calendar," published under the name of Mawe. Died, 1806, aged 80.

ABERCROMBY, Sir RALPH, a distinguished British general, born in the county of Clackmannan, Scotland, in 1734. He was educated at Rugby, and at the University of Edinburgh, studying afterwards at Leipsic, and he entered the army in 1756. After a short service in Germany, he served in Ireland for above 20 years, and from 1783 to 1793 lived in retirement. He then took part in the disastrous campaign in Holland, under the duke of York, and distinguished himself by his very skilful conduct of the retreat. After two years service as commander-in-chief, in the West Indies, he was appointed to the chief command in Ireland, in 1798, but finding it impossible to carry out the reforms he saw to be essential to the efficiency of the army, he resigned this post in a few months. He rendered important service on occasion of the second expedition to Holland, in 1799. But his most splendid achievement was the successful conduct of the expedition to Egypt, in 1801. The landing was effected in the bay of Aboukir, under a terrible fire

from the enemy's batteries, and in the severe engagements which followed the French were repulsed at all points. Sir Ralph, however, received a wound of which he died in a few days, thus closing a long career of duty faithfully done, and showing to the last that tender care for the comfort of his men, for which he was always distinguished. Sir Ralph Abercromby had been a Knight of the Bath since 1793. His widow was created a baroness, and a monument was erected to his memory in St Paul's Cathedral.

ABERDEEN, GEORGE HAMILTON-GORDON, Earl of, prime minister of England, was born at Edinburgh in 1784. He was educated at Harrow and Cambridge, succeeded to the earldom about 1802, travelled in Greece, Turkey, and Russia, and was chosen in 1806 one of the representative peers of Scotland. He was sent ambassador to Vienna in 1813, and in the following year signed the Treaty of Paris. Raised to the English peerage as Viscount Gordon in 1815, he took no part in public affairs from that time till 1828, when he became secretary of state for foreign affairs under the Duke of Wellington. He was in office till 1830, and again held the same post under Sir Robert Peel from 1841 till 1846. On the resignation of the Earl of Derby in 1832, Lord Aberdeen became prime minister at the head of a coalition ministry. The great event of his administration was the Crimean War, into which we "drifted" contrary to his anticipations, perhaps by reason of his horror of war, his old friendship with the Czar, and his too rigid adherence to the doctrine of non-intervention. General dissatisfaction with the conduct of the war led to his resignation in January, 1855, and he lived thenceforth in retirement. He was made a Knight of the Garter, and was honoured by a visit of the Queen in 1857. He was a man of high culture, generally reserved and consequently misunderstood, and though a Tory, liberal enough to vote for the repeal of the Test and Corporation Acts, for Catholic Emancipation, and for the repeal of the Corn Laws. He was long President of the Society of Antiquaries. Died at London, 14 December, 1860.

ABERLI, JOHANN LUDWIG, an eminent Swiss landscape painter. Born at Winterthur, 1723; died at Berne, 1786.

ABERNETHY, JOHN, F.R.S., an eminent surgeon, born in 1764. It is uncertain whether he was a native of Scotland or Ireland, but he went early to London, was apprenticed to Sir Charles Hlick, attended the lectures of John Hunter, and became surgeon to St Bartholomew's Hospital. He was passionately devoted to the study of physiology, and very successful as a lecturer, inspiring his pupils with an interest like his own. He rendered important service to medical science by his work entitled, "The Constitutional Origin and Treatment of Local Diseases." In his intercourse with his patients there was at times an eccentricity and even coarseness of manner, which was strangely in contrast with the gentleness that made him beloved in his home. Died, 1831. He was author of several tracts on medical subjects besides the work above named.

ABGARUS, a king of Edessa, in Mesopotamia, contemporary with Our Saviour, to whom he is said to have written a letter and received an answer to it. Both letter and answer are pronounced by the best critics to be mere forgeries.

ABINGEIL, Lord, **JAMES SCARLETT**, was the second son of Robert Scarlett, of Jamaica, where the future lord was born in 1769. He was early sent to England for education, entered at Trinity college, Cambridge, in 1786, and took his B. A. degree in 1790. In 1791 he was called to the bar, and may be said to have become eminent from his very first appearance in the courts. A fine figure, a singularly familiar and unpretending style of elocution, and an almost unrivalled tact in managing a jury, caused him to have immense business. In 1818, after having twice been defeated in contested elections, he obtained a seat in parliament through the patronage of Earl Fitzwilliam. For very many years Mr Scarlett was considered a Whig, and voted as well as spoke in favour of the various measures proposed by Romilly and Mackintosh for the amelioration of the criminal code. On the formation of a mixed ministry under Canning, in 1827, he became attorney-general and received the honour of knighthood. In 1834, on the formation of the Peel cabinet, he was raised to the bench as chief baron, with the title of Lord Abinger. In his judicial capacity, he gave the highest satisfaction; nothing could be sounder than his law, or purer than his impartiality. Died, April, 1844, aged 75.

ABISBAL, HENRY O'DONNELL, Count of, a celebrated Spanish general, born in Andalusia, 1770. Having entered the royal guards at the age of fifteen, he served in the war against the French republic; and on Napoleon's invasion of Spain, the part he took in the relief of Gerona in 1809, led to his promotion to the command of Catalonia, where he displayed great energy, and reaped much success. Though defeated in the plains of Vich by General Souham, he a month afterwards forced Augereau to abandon Lower Catalonia; and, at the village of Abisbal, he compelled the surrender of a whole French column under General Schwartz. From this action he took his title. Towards the close of the war he commanded with brilliant success at the capture of Pancorvo. In 1819 he suppressed a mutiny of the troops in the isle of Leon; but he fell into disgrace on suspicion of treachery, and it was not till 1823, on the invasion of Spain by the French under the Duke d'Angoulême, that he recovered his position and his fame. After the restoration of Ferdinand, he retired to France, where he resided, almost entirely forgotten, till his death in 1834.

ABNEY, Sir THOMAS, an eminent magistrate of London, lord mayor in 1700, and M.P. for the city. When the king of France had proclaimed the Pretender king of Great Britain, he proposed an address to King William, and the measure having been followed by other corporations, proved of great service to the king, who was thereby encouraged to dissolve the parliament, and take the sense of the people, which was almost universally in favour of the Protest-

an eminent magis- tyor in 1700, and the king of France der king of Great address to King having been fol- as, proved of great was thereby en- parliament, and eople, which was ur of the Protest-

ant succession. He was one of the first promoters of the Bank of England, and one of its earliest directors. Died, 1722.

ABIBABANELI, ISAAC, a Jewish Rabbi, of Portugal, author of Commentaries on the Old Testament, and various other works, theological and controversial. Born at Lisbon, 1437; died at Venice, 1508.

ABRANTES, Duke of. [JUNOT.]

ABUBEKER, father-in-law and successor of Mohammed. His original name was changed to that of Abubeker, or "Father of the Virgin," on the occasion of his daughter Ayesha becoming the bride of Mohammed. On succeeding his son-in-law in 632 he assumed the title of caliph, which signifies both successor and vicar. After suppressing a rebellion in Arabia he conquered, by his great generals, Khaled and Abu-Obeidah, the whole of Syria and part of Persia, the capture of Damascus taking place on the day of his death. It was under the direction of this caliph that the scattered fragments of Mohammedan doctrine and tradition were collected and embodied in the Koran. Died, 634.

ABULFARAGIUS, GREGORY, originally a physician of Armenia, but subsequently a bishop. Of his various works the most esteemed is a Universal History, an edition of which, with a Latin translation, was published at Oxford, by Dr Pococke, in 1663. He eventually became primate of the East, and died in 1286.

ABULFAZEL, vizier to the celebrated Mogul emperor Akbar, and author of "Ayeen Akberry"—a statistical and geographical account of the Mogul empire, and a history of the reign of the emperor Akbar: the former work was translated into English by Mr Gladwin in 1785. Died, by the hands of an assassin, in 1604.

ABULFEDA, ISMAEL, prince of Hamah in Syria. He was distinguished as a military commander, taking part in the expeditions which extinguished the dominion of the crusaders in Syria; but still more as an excellent historian and geographer, being the author of a compendious History of Mankind, chiefly devoted however to the history of Mohammed and his successors; and a work entitled "The True Disposition of Countries." The former has been published with a Latin translation, and portions of his various works have been separately translated into English. Died, 1333.

ABULGAZI, BAYATUR, khan of the Tatars, and author of an esteemed Tatar history. Some Russian exiles in Siberia having discovered the MS. of this work, it was brought to Europe and translated into German and French. Born at Urgens, the capital of Karasum, 1605; died, 1663.

ABU-OBEIDAH, a friend and associate of Mohammed, and the conqueror of great part of Palestine and Syria. Died, by the pestilence, 639.

ABUZAID, MIRZA, a soldier in the service of Ulug Beg, who, taking advantage of the feud between that personage and his son, proclaimed himself sultan in 1450; but after gaining considerable territory, he perished in an ambush, in 1468.

ACCIAIOLI, DONATO, a noble and learned

Florentine of the 15th century; he discharged many public offices, commissions, and embassies, and was distinguished for his commentaries on Aristotle. He died in 1478, and the state charged itself with the maintenance and education of his two daughters. [The name of this family is variously written, ACCIAOLI, ACCIAIOLI, and ACCIAJUOLI.]

ACCIAIOLI, RENATO, a noble Florentine, who, in the 14th century, conquered Athens, Corinth, and Theotia; which he bequeathed respectively to the Venetians, Theodore Palaeologus, and his natural son Antonio.

ACCOLTI, BENEDETTO, an Italian lawyer, born at Arezzo in 1415, and succeeded Pozzolo as secretary to the republic of Florence in 1450. He was the author of many valuable works, among which was a narrative of the wars in Palestine, to which Tasso was much indebted in composing the "Jerusalem Delivered." Died, 1466.

ACCOLTI, BENEDETTO, a relation of the preceding, born in 1497, who was so perfect a master of the Latin tongue, that he was called the Cicero of the age. He was highly distinguished by the popes Leo X., Adrian VI., and Clement VII., the last of whom made him a cardinal. Died, 1549.

ACCOLTI, PIETRO, son of the first-named Benedetto Accolti, abandoned the profession of the law to enter the church; and, as cardinal of Ancona, composed the Papal bull against Luther. Died, 1532.

ACCORSO, or ACCURSUS, FRANCISCO, an eminent Italian lawyer, born at Florence in 1151 or 1182, and died in 1229, rendered himself famous by his "Perpetual Commentary," or "Great Gloss," in illustration of the code, the institutes, and the digests. He left three sons, all of whom distinguished themselves by their legal attainments.

ACH, or ACHEN, VAN, JOHANN, an eminent historical and portrait painter. Born at Cologne, 1566; died, 1621.

ACHÆUS, a Greek poet and satirist, contemporary with Æschylus; but though he is said to have written 40 tragedies, only a few fragments at present exist.

ACHARD, F. C., a distinguished Prussian chemist; known as the first fabricator of beet-root sugar, in 1792; and author of several treatises on chemistry and agriculture. Died in 1821.

ACHERY, J. LUC'D, a learned Benedictine of St Maur, was born at St Quentin in 1609. He published "Veterum aliquot scriptorum spicilegium," in 13 vols. 4to, editions of the works of Lanfranc and Guibert, and largely assisted in Mabillon's "Actes des Saints de l'Ordre de St Benoît." Died at Paris, 1685.

ACHMET I., Ottoman emperor, son and successor of Mohammed III. He came to the throne in 1603, and was a just and humane ruler. Born, 1588; died, 1617.

ACHMET II., succeeded his brother Solyman III. on the throne of Constantinople in 1691. He was made sultan by the influence of the grandvizier Kluperli. The great battle of Salankemen, in which the Turks were defeated by Prince Louis of Baden and the Austrians, and Kluperli killed, was the first of a train of disasters which filled his short reign of four years.

ACHMET III., son of Mohammed IV., was placed on the throne in 1703 by the Janissaries who had deposed his brother, Mustapha II. It was in the reign of this sultan that Charles XII. of Sweden was defeated by the Czar at Pultawa, and took refuge at Bender. Achmet was engaged in wars with the Russians, the Persians, the Venetians, and the Austrians. He was afterwards deposed, and his nephew, Mohammed V., raised to the throne. Died in prison, 1736.

ACKERMANN, RUDOLPH, an ingenious and enterprising tradesman, was born at Stolberg, Saxony, in 1764, and came to England previous to the French Revolution. After following for a time the occupation of a carriage draughtsman, he settled in the Strand as a printseller, where he established a flourishing and extensive concern, furnishing employment to numerous artists, and judiciously catering for the public taste in elegant and ornamental works of art. His "Forget me Not" was the first of that class of "Annuals" which appeared in this country; and to him also are we indebted for the introduction and much of the success of the lithographic art; while the good taste and spirit he evinced in producing the "Histories" of Westminster, Oxford, &c., and other handsomely embellished works, entitle him to the respect of all who know how to appreciate them. Died, 1834.

ACKMAN, WILLIAM. [AIKMAN.]

ACOSTA, CHRISTOPHER, a Portuguese surgeon and naturalist of the 16th century; author of "A Treatise on the Drugs and Medicinal Plants of the East Indies," and other works.

ACOSTA, JOSE DE, a Spanish Jesuit and historian, was born at Medina del Campo about 1539. He held the chair of theology at Oeana, passed in 1571, as a missionary, to South America, and was made provincial of his order at Peru. Returning to Europe after 17 years' service, he became rector of the University of Salamanca. His chief work, which is esteemed and has been translated into Latin, French, English, German, and other languages, is the "Historia natural y moral de las Indias." Died, 1600.

ACTON, JOSEPH, son of a physician, born at Besançon, in 1737. He entered into the French navy, and afterwards into that of the Grand Duke of Tuscany. His rescuing 4000 Spaniards from the Barbary corsairs, made him known at the court of Naples; and through the patronage of the queen, he became minister of the marine, and afterwards of the finances. He was dismissed from the ministry in 1803, and retired into Sicily, where he died in 1808.

ACUNA, CHRISTOPHER, born at Burgos, Spain, 1597, became a Jesuit in 1612, and subsequently a missionary in America. On his return to Spain, he published a "Description of the Great River of the Amazons."

ADAIR, SIR ROBERT, G.C.B., a distinguished diplomatist, was born in 1763. He was educated at Westminster and Göttingen with a view to the diplomatic service; and at the breaking out of the French Revolution, he made a lengthened sojourn in Berlin, Vienna, and Petersburg, to observe the results of that great event on the continental

powers. In 1802, he sat as M.P. for Appleby, and voted with the Whig party; and when Mr Fox was placed virtually, though not nominally, at the head of affairs in 1806, he appointed Mr Adair minister to the Court of Vienna. While in this position, he was frequently the butt of Mr Canning's wit; but when the latter became minister for foreign affairs in 1808, he selected Mr Adair as the fittest person to unravel the tangled web of our diplomatic relations with the Ottoman court; and at the termination of his successful mission in 1809, he was nominated G.C.B. and appointed ambassador at Constantinople, which office he held till 1811. For twenty years the exclusion of Sir Robert Adair's party from power left him unemployed; but in 1831 he was sent by Earl Grey on special missions to Brussels and Berlin, which occupied him till 1835, when he returned to England, and for his diplomatic services was rewarded with an annual pension of £2000. Besides being the author of numerous pamphlets on international questions, he published late in life "An Historical Memoir of a Mission to the Court of Vienna in 1806," and "A Memoir of the Negotiations for the Peace of the Dardanelles in 1808-9." Died, 1855.

ADALBERON, a celebrated archbishop of Rheims, and chancellor of France; who distinguished himself under Lothaire, Louis V., and Hugh Capet. Died, 988.

ADALBERT, archbishop of Prague, in the 10th century. He was one of the first founders of the Christian religion in Hungary; and also preached the gospel in Prussia, and in Lithuania, where he was murdered by Sego, a pagan priest. Boleslaus, prince of Poland, is said to have ransomed his body with an equal weight of gold.

ADALBERT, an ambitious, eloquent, and designing prelate, created archbishop of Bremen and Hamburg, 1043. During the minority of Henry IV. of Germany, he acted as regent, but his despotic conduct rendered him obnoxious to the people. Died, 1072.

ADAM, ALEXANDER, LL.D., well known to the literary and scholastic world by his "Latin Lexicon," "Roman Antiquities," &c.; raised himself to great eminence by almost unprecedented efforts, and became rector of the High School of Edinburgh, an office which he held till his death. Born, 1741; died, 1809.

ADAM, LAMBERT SIGISBERT, an eminent French sculptor, many of whose works were executed for the decoration of Versailles and St Cloud. Born, 1700; died, 1759.

ADAM, NICOLAS SEBASTIEN, brother of the above, and eminent in the same profession. He executed the admired statue of "Prometheus Chained." Born, 1705; died, 1778.

ADAM of Bremen, canon of the cathedral of Bremen about the close of the 11th century; author of an ecclesiastical history, and numerous other works; and indefatigable as a Christian missionary.

ADAM, MELCHIOR, a German divine and biographical author of the 17th century, to whose voluminous writings subsequent biographers have been greatly indebted. Died, 1622.

and F.S.A.; a

celebrated architect, much employed upon the public buildings and noblemen's mansions of London. One of his works, executed in conjunction with his brother, is the range of buildings called the "Adelphi," the name being the Greek word for "Brothers." He at one time represented the county of Kircross in Parliament. Born at Kirkaldy, Fife-shire, 1728; died, 1792. His brother James, the coadjutor in most of his labours, died, 1794.

ADAMNANUS, St. Abbot of Iona, was born about 625, became a monk, and was chosen abbot about 679. He wrote a Life of St Columba, and a work on the Holy Land, from accounts given him by Arculfus, a Gallic bishop. This book was esteemed an authority till the time of the Crusades. Adamnanus died about 704.

ADAMS, Dr FRANCIS, was born in 1797, of humble parents; but his friends supported him at King's College, Aberdeen, where he took the degree of M.A., and adopted medicine as his profession. In the midst of a laborious practice he found time for a zealous study of Greek medical writers, and, being anxious to bring them before his profession by translations, he fixed on Paulus Aegineta, a physician of the sixth or seventh century, as giving the best idea of ancient medicine. This work was published by the Sydenham Society, together with a very learned commentary by Dr Adams. For the same Society he translated Hippocrates and Aretæus, the original text being also given with the latter. Died February 26, 1861, aged 64.

ADAMS, JOHN, second president of the United States of America, and a political writer of considerable reputation. Before the Revolution, Mr Adams attained great eminence as a lawyer, and published an essay "On Common and Feudal Law." On the breach with the mother country, he espoused the colonial cause, and employed his pen with great activity. He was one of the principal promoters of the memorable resolution passed July 4, 1776, declaring the American States free, sovereign, and independent. Mr Adams subsequently proceeded with Dr Franklin to the court of France, in order to negotiate a treaty of peace and alliance with that country. He was afterwards nominated plenipotentiary to Holland, and materially contributed to hasten a rupture between the United Provinces and Great Britain. Lastly, he was employed in negotiating a general peace at Paris; and was the first ambassador received by this country from America after it was effected. This distinguished man also took a great share, in conjunction with Washington, Hamilton, and other federal leaders, in forming the present constitution of the United States, in 1787, when General Washington was elected president, and Mr Adams vice-president. On the retirement of Washington, Mr Adams was elected his successor; and, at the conclusion of his presidency, retired from public life, with the character of an able, active, independent, and upright statesman, even among those whose party views were opposed to his opinions. Born, 1735; died, 1826.

ADAMS, JOHN QUINCY, the sixth presid-

ent of the United States, son of John Adams, the second president, was born at Boston in 1769. His father having been appointed commissioner to France in 1778, embraced the opportunity of securing for his son all the advantages of an European education. When only fourteen years of age he went to Petersburg as private secretary to the American minister, and on his return to his native country he entered Harvard University, where he graduated with honour in 1787, and subsequently commenced the practice of the law at Boston. In 1791 he was appointed by Washington minister of the United States at the Hague; and in 1796 he went in the same capacity to Berlin, which office, however, he resigned on the death of his father, and Mr Jefferson's accession to the presidency, in 1801. Here too he wrote his famous "Letters from Silesia," which were favourably noticed in the Edinburgh Review. After representing Massachusetts in the United States Senate for six years, he went as ambassador to St Petersburg in 1809, and to the influence which his character and abilities procured for him at that court is mainly to be attributed the intervention of Russia which terminated in the treaty of peace between the United States and Great Britain. After the peace he was appointed ambassador to the court of St James's; and he subsequently acted as secretary of state during the administration of Mr Monroe. In 1825 he was himself elected president of the United States. His administration was a perfect illustration of the principles of the constitution, and of a republic purely and faithfully governed. On the expiry of his term of office, he retired into private life; but he was soon elected by his district as representative in Congress, and though he never afterwards held office, he long continued to benefit his country by his speeches and his pen. Manly, straightforward, and independent, he never swerved from what he believed to be the path of duty,—no easy matter in the United States, where party feeling runs so high; and he has left behind him a reputation for purity and disinterestedness of motives, second only to that of Washington. Died, 1848.

ADAMS, JOHN, "the patriarch of Pitcairn's Island," is famous for the share he took in the mutiny of the Bounty, in 1789, and in the subsequent establishment of the colony of the mutineers at Pitcairn's Island. His real name was Alexander Smith. Died, 1829.

ADAMS, SAMUEL, an active member of the first American congress, and one of the most powerful advocates of the political separation of that country from England. Born, 1722; died, 1803.

ADAMS, WILLIAM, an English divine of the 18th century; author of an answer to Hume on the Miracles. Died, 1789.

ADAMSON, PATRICK, archbishop of St Andrew's, in Scotland, and ambassador from James VI. to Queen Elizabeth; but chiefly remembered for his disputes with the presbytery, by which he was involved in ruin. Born, 1543; died, 1591.

ADANSON, MICHEL, a celebrated French botanist, was born in Provence in 1727. His

family was of Scottish origin. He was educated at Paris under Réaumur and B. de Jussieu, and early showed a passionate fondness for the study of nature. He spent five years in Senegal, where he made large collections of natural objects, and accumulated a vast mass of observations. Dissatisfied with existing classifications in botany he proposed a new one, in which he to some extent anticipated the system of Jussieu. He projected an immense work on Natural History, for which he made collections, and to which he devoted himself for the rest of his life; but in the shock of the Revolution he lost his fortune and his places, saw his garden destroyed, and had his health ruined by want and calamity. The Directory gave him a pension, which Napoleon doubled. He was a member of the Institute and of the Academy of Sciences, to which he contributed numerous memoirs. He wrote "Voyage au Sénégal," and "Les Familles des Plantes." Died, 1806.

ADDISON, LANCELOT, an English divine, was born at Crosby Ravensworth, Westmoreland, in 1632. He early distinguished himself by his attachment to the Stuart family, and appears to have supported a consistent and upright character. He held the living of Milston, Wilts, with a prebend in the cathedral of Salisbury, and was eventually made dean of Lichfield. He died in 1703.

ADDISON, JOSEPH, the celebrated essayist and miscellaneous writer, was the son of Dr Lancelot Addison. He was born May 1, 1672, at Milston, in Wiltshire, and after receiving the rudiments of education at Salisbury and Lichfield, was sent to the Charterhouse, where he contracted his first intimacy with Mr, afterwards Sir Richard, Steele. At the age of 15 he was entered at Queen's college, Oxford, where he soon became distinguished for his skill in Latin poetry. At 22 he addressed some English verses to the veteran poet, Dryden: and shortly afterwards published a translation of part of Virgil's fourth Georgic. In 1695 he addressed a complimentary poem, on one of the campaigns of King William, to the Lord Keeper Somers, who procured him a pension from the Crown of £300 per annum, to enable him to travel. On his return home, in 1702, he found his old friends out of place; but, in 1704, he was introduced by Lord Halifax to Lord Godolphin, as a fit person to celebrate the victory of Blenheim, on which occasion he produced his poem entitled "The Campaign," for which he was appointed commissioner of appeals. After this he accompanied the Marquis of Wharton to Ireland, as secretary. While there, Steele commenced the "Tatler," to which Addison liberally contributed. This was followed by the "Spectator," which was also enriched by the contributions of Addison, whose papers are distinguished by one of the letters of the word *Clio*. This publication was succeeded by the "Guardian," a similar work, in which Addison also bore a considerable share. In 1713, his tragedy of Cato was brought upon the stage, and performed without interruption for 35 nights. In 1718, Addison married the Countess Dowager of Warwick; but the union is said to

have been far from happy. The following year he became secretary of state, which place he soon resigned, on a pension of £1500 a-year. In his retirement he wrote "A Defence of the Christian Religion," and also laid the plan of an English Dictionary, upon the model of the Italian Della Crusca. He closed his life in a manner suitable to his character. When given over by his physicians, Addison sent for his step-son, the young earl of Warwick, whom he was anxious to reclaim from irregular habits and erroneous opinions, and grasping his hand, exclaimed impressively, "See in what peace a Christian can die!" but whether this affecting interview had any effect upon the young earl is not known, as his own death happened shortly after. Addison died at Holland House, June 17, 1719, leaving an only daughter, who died, unmarried, in 1797. The poetical works of Addison, on which perhaps his fame at first chiefly rested, are now little read. They are without the deep thought and glowing passion which charm us in the poems of our own age, and are little more than the elegant exercises of an accomplished moralist. But his prose works have a lasting worth, and charm us by their gracefulness, delicate fancy, pure morality, and original humour, probably as much as they did the men and women of the generation for which they were written. As the first and best examples of a new style they hold a high place in the history of English literature.

ADELAIDE, MADAME, aunt to Louis XVI. of France. This princess, in order to avoid the sanguinary fury of the revolutionists, quitted Paris, accompanied by her sister, Mad. Victoire, on the 19th of February, 1791. After seeking protection in Rome, Naples, and other places, they found a temporary asylum in Corfu, from whence they were conveyed to Trieste by the Russian general Outschacoff, and there fixed their residence. Victoire died the 8th of June, 1799; and Adelaide survived her sister only nine months.

ADELAIDE, EUGENE LOUISE, princess of Orleans, and sister to Louis Philippe, ex-king of the French, was born 1777. Educated with the greatest care by Madame de Genlis, the princess passed her childhood in peaceful retirement, till the outbreak of the French Revolution compelled her with her governess to take refuge successively in the Netherlands, Switzerland, and Spain, where she resided with her mother till 1808. She then joined her brother Louis Philippe at Portsmouth, and participated in all the subsequent vicissitudes of his career. After the restoration, she contributed in no small degree to rally round her brother all the leading men to whose wishes for improvement the government of Louis XVIII. made no response; and during the "three glorious days" in 1830, it was mainly owing to her influence that her brother was induced to accept the crown, then offered—since reclaimed—by the people. She subsequently shared and aided the king's high fortune, by her judicious counsels and reflective courage; and it is not perhaps going too far to say, that had she lived to witness the 23rd of

February, 1848, Louis Philippe might not have persevered in a course which ultimately cost him and his family a crown. Madame Adelaide was privately married to Gen. Athalin, a peer of France. Died, Dec. 31st, 1847.

ADELAIDE, queen dowager of Great Britain and Ireland, was born August 13, 1792. She was the eldest child of George, Duke of Saxe Coburg Meiningen, and Louisa, daughter of Christian Albert, prince of Hohenlohe Langenburg. Her father died when she was only eleven years of age, leaving herself and a younger brother and sister under the guardianship of their mother. The early years of the Princess Adelaide were passed in great retirement. On the death of the Princess Charlotte, which took place November 6, 1817, and left the British empire without an heir to the crown in the third generation, negotiations were set on foot for the union of the Duke of Clarence with the Princess Adelaide, and the marriage took place on the 11th July, 1818. Few events of any importance marked the domestic life of the Duke and Duchess of Clarence for many years after their marriage. In March, 1819, a daughter was born, but lived only a few hours; and a second daughter, the Princess Georgiana Adelaide, who was born on the 10th of December, 1820, expired on March 4th, in the succeeding year. On the 26th of June, 1830, by the death of George IV., the Duchess of Clarence passed from the retirement of Bushy Park to the throne. Twelve years had passed since there had been a queen consort to preside over the hospitalities and ceremonials of the court. In reforming the *personnel* as well as the *morale* of the court circles, Queen Adelaide undertook a duty which was in many instances as painful and invidious as it was necessary, and which was accomplished with all gentleness and firmness. After a reign of seven years, Queen Adelaide passed once again into retirement, on the death of William IV., whom she had tended with unwearied care during the tedious illness which closed his life. The Queen Dowager, to whom Marlborough House had been assigned as a residence, with £100,000 a year, thenceforward lived in privacy, avoiding even the honours which might be considered due to her rank and position. Her winters for several years were spent in some climate less ungenial than that of England, and the Islands of Malta and Madeira were successively honoured with her Majesty's residence. But she never fully recovered, and towards the close of 1849, her debility assumed an alarming form, and, after lingering a few weeks, she died December 2, sincerely regretted by the people, to whom she had endeared herself by her numberless acts of public and private benevolence, as well as by her constant practice of all the Christian graces.

ADELER, CURTIUS SIVERSEN, an eminent naval commander, born in Norway, 1622. He went to Venice, where he was made admiral; and, after performing many gallant exploits against the Turks, retired to Constantinople, where he ended his days in honour and tranquillity, being made admiral-in-chief of the Danish fleet, and created a noble. He died in 1675.

ADELUNG, JOHANN CHRISTOPH, a German philologist of great merit; chiefly celebrated for his "Grammatical and Critical Dictionary," 5 vols. 4to. Horn, 1732; died, 1806.

ADEMAR, or AIMAR, a French monk of the 10th century, who wrote a Chronicle of France, published by Labbe.

ADLER, PHILIP, a German engraver of the 18th century, whose style of etching appears to have founded a school which gave rise to the Hoppers and Hollar. He died about 1530.

ADLERFELDT, GUSTAVUS, a Swedish historian in the time of Charles XII., whom he accompanied throughout his campaigns, of which he wrote an esteemed account; and it is not a little singular that his history is continued up to the very day when a cannon ball deprived him of life, at the battle of Pultowa, in 1709.

ADOLPHUS, JOHN, for many years well known as a barrister at the criminal courts of the metropolis, was born in London, in 1766. He was admitted an attorney and solicitor in 1790. Naturally fluent, ready, and acute, he was called to the bar in 1807, where his abilities attracted no decided attention until the year 1820, when his ingenious and elaborate defence of Arthur Thistlewood and the other "Cato Street" conspirators brought him prominently forward. As an historical writer also he obtained considerable reputation. His principal works are "The History of George the Third," 7 vols.; "Biographical Memoirs of the French Revolution," 2 vols.; "Memoirs of John Bannister, Comedian," 2 vols. &c. Died July 16, 1845, aged 79.

ADRETS, FRANÇOIS DE BEAUMONT, Baron des, a Huguenot leader, of a cruel, fiery, and enterprising spirit. It is said that resentment to the Duke of Guise led him to side with the Huguenot party in 1562; and he signalled himself by many daring exploits, the skill and bravery of which, however, were sullied with the most detestable cruelty. He afterwards went over to the Catholic side, and died universally hated, in 1587. It must, however, be admitted, that many of the aspersions with which historians have branded his memory, rest on very doubtful evidence.

ADRIAM, MARIE, a French girl, who, at the age of 16, fought valiantly during the whole time that her native town, Lyons, was besieged, in 1793. After the engagement she was arrested, and being asked how she had dared to use arms? she replied, "I used them to serve my country, and deliver it from its oppressors." She was instantly condemned and executed.

ADRIAN. [HADRIAN]
ADRIAN. There were several popes of this name. The first who bore it was a noble Roman, raised to the Papal chair in 772. Rome being threatened by the Lombards, Adrian obtained the aid of Charlemagne, who in 774 defeated Desiderius, and put an end to the Lombard kingdom. Charlemagne then paid a visit to Adrian at Rome, and a second in 787. Adrian embellished St Peter's church, and expended vast sums in re-building the walls, and restoring the

ancient aqueducts of the city. He died in 795.

ADRIAN II. succeeded to the pontificate in 867. During the five years in which he filled it, his ambitious and intriguing disposition did much towards the subjection of the European sovereigns to the see of Rome. His arrogance received a sharp check from Charles the Bald, king of France, who refused to send Archbishop Hinemar to Rome, as the pope had required. The most important event of his pontificate, perhaps, was the separation of Photius, patriarch of Constantinople, from the Catholic church, the beginning of the separation of the Greek and Roman churches. Adrian died in 872.

ADRIAN III. was elected in 884, and died the following year, while on a journey to Worms, whither he was proceeding to hold a diet.

ADRIAN IV., the only Englishman who has attained the Papal dignity, was born towards the close of the 11th century, at Langley, near St Alban's. His name was Nicholas Breakspear; and, in his childhood, he was dependent for his daily subsistence on the charity of the monastery, to which his father was a servitor. Unable through poverty to attend the schools, he was refused admission into the monastery for deficiency in learning; and went to France, where he became a clerk in the monastery of St Rufus, near Avignon, of which he was afterwards chosen abbot. Eugenius III. made him a cardinal in 1146; and, two years afterwards, sent him legate to Denmark and Norway, where he made many converts. In Dec., 1154, he was chosen pope, and assumed the name of Adrian, on which Henry II. of England sent the abbot of St Alban's with three bishops to congratulate him. The pope treated the abbot with great courtesy, and granted the abbey extraordinary privileges; he also issued in favour of Henry the celebrated bull which sanctioned the conquest of Ireland. In 1155 he excommunicated the Romans, and laid an interdict on the city until they banished the famous reformer, Arnold of Brescia [see Arnold], and put an end to the republic which he had established. He also excommunicated the king of Sicily for ravaging the territories of the church; and, about the same time, the Emperor Frederic Barbarossa having entered Italy with a powerful army, and meeting Adrian near Sutrium, concluded a peace with him. At this interview Frederic, after two days' hesitation and debate, held the pope's stirrup while he mounted on horseback, and received from him the kiss of peace; after which the former was conducted to St Peter's church, and his holiness consecrated him king of the Romans. Adrian retired to Orvieto, was recalled to Rome, and again withdrew to Anagni, where he died in 1159.

ADRIAN V. was a Genoese, and was raised to the pontificate in 1276, but survived his elevation little more than a month.

ADRIAN VI., who succeeded Leo X., in January, 1522, was a native of Utrecht, of mean parentage, and born in 1459. He received his education at Louvain, and suc-

cessively became canon of St Peter, professor of divinity, dean of the cathedral, and vice-chancellor of the university, where he founded a college. Ferdinand, king of Spain, gave him the bishopric of Tortosa; and, in 1517, he was made cardinal. He was also appointed regent during the minority of Charles V., who procured him his election to the Papal chair. Died, 1523.

ADRIAN, DE CASTELLO, an Italian of great learning and ability, was born at Cornetto in Tuscany. By his talents he rose to several employments under Innocent VIII.; and came to England in the reign of Henry VII., who made him his agent at Rome, and gave him first the bishopric of Hereford, and afterwards that of Bath and Wells. Adrian farmed out the latter bishopric to Wolsey, living himself at Rome, where he built a superb palace, which he left to the king of England and his successors; and in 1503 he was made cardinal by Alexander VI. A vague prophecy had gone abroad that Leo X. should be succeeded by an Adrian; and Castello was so far the slave of superstition as to allow this absurd prediction to influence him in organising a conspiracy, the object of which was the dethronement of that pontiff, and his own elevation to the vacant chair. Before the plot was matured, the vigilance of Leo detected his designs, and a fine of 12,500 ducats was imposed upon him, with a peremptory command not to quit the Roman territories. He fled, however, from that city in 1518, and was excommunicated; and it is uncertain what became of him afterwards, though it is supposed he died in Asia.

ÆGIDIUS, DE COLUMNA, a Roman monk of the Augustine order, was a distinguished disciple of Thomas Aquinas, and obtained the appellation of the most profound doctor. He was preceptor to the sons of Philip III. of France, and taught philosophy and theology with high reputation at Paris. He died in 1316.

ÆGINETA, PAULUS, a celebrated Greek physician, who probably lived in the 7th century. He appears to have studied at Alexandria, and to have travelled through Greece and other countries, but little more is known of his life. He was an original thinker and observer, and was especially skilled in surgery. His works have been translated into many languages, and have been frequently republished. An English translation with commentaries appeared in 1844.

ÆGINHARD. [ÆGINHARDT.]

ÆLFERIC, son of an earl of Kent, and archbishop of Canterbury at the close of the 10th century, was one of the most learned men of the age in which he lived. He became a monk of the Benedictine order at Abingdon, under abbot Athelwold, who, on his promotion to the see of Winchester, took Ælfrie with him to instruct youth in his cathedral. Here he drew up his "Latin and Saxon Vocabulary," which was published at Oxford in 1659. He also translated from the Latin into the Saxon language most of the historical books of the Old Testament, and wrote "Canons for the Regulation of the Clergy," which are inserted in

Spelman's Councils. He subsequently became abbot of St Alban's, and composed a Liturgy for the service of his abbey, which was used in Leland's time. In 989, he was created bishop of Wilton; and, in 994, was translated to the see of Canterbury, where he exerted himself with spirit and prudence in the defence of his see against the incursions of the Danes. This active and able prelate died in 1005.

ÆLIANUS, CLAUDIUS, historian and rhetorician, was born in Italy, about 160. All his works are in Greek, which he wrote with the greatest purity. He was surnamed Honeytongue, on account of the sweetness of his style. The two works of Ælian still extant are a "Miscellaneous History," and a book on the Nature of Animals. They are chiefly valuable for the passages taken from other authors which they have preserved to us.

ÆLST, EVERHARD VAN, a Dutch painter, born at Delft in 1602, and died in 1658. He was famous for his skill in painting fruit pieces and dead game. His nephew, WILLEM VAN ÆLST, also distinguished himself as a painter, and studied in France and Italy, where he received flattering marks of favour. He died in 1679.

ÆMILIANI, ST JEROME, a Venetian nobleman, who, being taken prisoner in his youth, made a vow that, on his release, he would devote his life to the care of orphans. In pursuance of this pledge, he laid the foundation of a hospital and religious order, the object of which was to instruct young persons, and particularly orphans, in religion. To this and other pious works he sacrificed his whole income. Died, 1537. He was canonized by Benedict XIV.

ÆMILIUS PAULUS, surnamed MACEDONICUS, a distinguished Roman noble and general, son of Æmilius Paulus, the consul, who fell at the battle of Cannæ, was born about B. C. 230. He served as prætor in Further Spain, and was chosen consul in 181, and again in 168. Sent to conduct the war in Macedonia, he defeated Perseus at Pydna, assisted his proconsul in establishing the Roman government in the new province, and on his return had a very splendid triumph. His public glory had a bitter set-off in private sorrow, for he lost at the same time two of his young sons. He held the office of censor in 164, and died four years later. He was a man of singularly noble and blameless character.

ÆMILIUS, PAULUS, an historian of great celebrity, born at Verona. Thirty years of his life were employed in writing the history of France, from Pharamond down to Charles VIII. Died, 1529.

ÆNEAS, or ÆNGUS, an Irish abbot or bishop of the 8th century, who compiled a curious account of Irish saints in five books, and also wrote the history of the Old Testament in verse. Died probably between 819—830.

ÆPINUS, JOHN, a Franciscan friar, who became a zealous and able follower of Luther, and was appointed pastor of the church of St Peter, at Hamburg. Born, 1499; died, 1553.

ÆSCHINES, a celebrated Athenian orator,

born B. C. 389. He had tried his fortune in various ways before he gained distinction as an orator. He was twice sent on embassies to Philip of Macedonia, and his conduct on the second occasion exposed him to accusations of treachery; first, by Timarchus, over whom he triumphed, and next, by his great rival Demosthenes. His prosecution of Ctesiphon in 330 gave occasion to the famous oration "On the Crown" by Demosthenes. Æschines then left Athens and settled at Rhodes, where he founded a school. Died, 314.

ÆSCHYLUS, the great Athenian tragic poet, was born at Eleusis, B. C. 525. He distinguished himself at the great battles of Marathon, Salamis, and Plataea, and his first fame was that of a heroic and patriotic soldier. He made poetry, however, his choice, and devoted himself to it as his serious business in life. He gained his first prize in 484. He is said to have written seventy tragedies besides satyric dramas, but we possess only seven of them. These are "The Persians," acted in 472; the "Seven against Thebes;" the "Suppliants," one part of a trilogy of which the other parts are lost; the "Prometheus Bound," the only part preserved of another trilogy, and one of his sublimest works; and the complete trilogy of the Orestea, comprising the "Agamemnon," the "Choephoroi," and the "Eumenides." Æschylus was the inventor of the trilogy, i. e. the first who made the three plays represented parts of a grand whole, each at the same time being complete in itself. About 471 he went to Sicily, and spent some time at the court of Hieron. After his return to Athens he had a poetic contest with Sophocles, who won the prize. Soon after the exhibition of his last work, the Orestea, he again retired to Sicily, where he died, B. C. 456. The political principles of Æschylus were conservative, and placed him in opposition to the restless, innovating, and ambitious democracy. Aristides was his ideal statesman. His last grand trilogy was exhibited for the purpose of saving the Areopagus, then threatened by Pericles and the popular party. In all his tragedies he recognizes, with a noble faith, a divine power guiding the course of events to the best issue through all darkness and distress.

ÆSOP, the renowned Greek fabulist, lived in the 6th century B. C. He was a Phrygian by birth, was sold into slavery, but obtained his freedom and went to the court of Cræsus, king of Lydia, where his wit and practical wisdom made him a favourite. He afterwards travelled in Greece, reciting his apologies, and teaching rulers and subjects his home-truths. Sent by Cræsus to Delphi, he in some way offended the citizens, and they killed him by throwing him down a precipice. He did not write his fables, but they were easily remembered, became universally popular, and were passed on from mouth to mouth, and from generation to generation. How much of the original Æsopian fables is preserved in our present collections it is impossible to tell. Æsop was a contemporary of the Seven Sages, and his statue was set up with theirs at Athens 200 years after his death. [HABRIUS.]

ÆSOPUS, CLODIUS, a Roman actor, contemporary and rival of Roscius, and like him the friend of Cicero, to whom he gave lessons on oratorical action. His excellence was in tragedy; and he entered so thoroughly into his part, as occasionally to lose all recollection of his own identity. Plutarch asserts, that once, when performing the character of Atreus, he was so transported with fury, as to strike a servant with his sceptre, which killed him on the spot. Æsopus was greatly addicted to luxury; yet, notwithstanding, so well was he rewarded, that he left a fortune equal to £160,000.

ÆTIUS, a famous Roman general, who lived under the third Valentinian, and nobly defended the declining fortunes of the empire, thrice vanquishing the Burgundians and Franks, and driving the ferocious Attila beyond the Rhine; but having excited the jealousy of the dastardly emperor, he was stabbed by him, in 454.

ÆFER, DOMITIUS, an ancient orator, born at Nismes. During the reigns of Tiberius, Caligula, Claudius, and Nero, he made himself formidable as an informer, and contemptible as a flatterer. Under Caligula he was made consul. Died, A. D. 59.

AFFRY, LOUIS AUGUSTINE PHILIP, Count, a Swiss statesman, appointed chief magistrate of Switzerland after Buonaparte had proclaimed himself protector of the Helvetic confederacy, was born at Freyburg, in 1743. From the commencement of the French revolution, when he commanded the army on the Upper Rhine, till his death, he bore a prominent part in the affairs of his country; but, finding the power of the French irresistible, he endeavoured to promote the views of Buonaparte, by assisting in the formation of the government; while he displayed the skill of an experienced statesman in endeavouring to benefit the interests of his countrymen, and to shield them from the perils of war. Died, 1810.

AFRANIUS, a Latin dramatist, who lived about 100 years B. C., and wrote several comedies in imitation of Menander.

AFRICANUS, JULIUS, an eminent Christian historian of the 3rd century; principally known by a chronological work in five books, which contains a series of events from the beginning of the world to the year of Christ, 221.

AGARD, ARTHUR, an English antiquary of great learning and research, one of the original founders of the Antiquarian Society, was born in Derbyshire, 1540, and died, 1615.

AGASIAS, a sculptor of Ephesus, celebrated for his admirable statue called the Gladiator, which was found with the Apollo Belvedere at Nettuno, the ancient Antium.

AGATHARCHUS, a Greek painter, born at Samos. Vitruvius speaks of him as the first who painted scenes for the theatres. He flourished probably about B. C. 480.

AGATHOCLES, the tyrant of Syracuse, was the son of a potter, and was born at Thermae about B. C. 361. He was remarkable for strength and beauty, and early obtained military distinction and command. By marrying the widow of his patron Damas he acquired wealth and influence, but being suspected of ambitious designs, was twice

banished from Syracuse. He collected forces, defeated the armies of Syracuse and Carthage, and got himself made first protector, and then sovereign of Syracuse, B. C. 317. He is said to have put to death 4000 Syracusans, and to have banished 6000 more. He conquered great part of Sicily, was defeated by the Carthaginians at Himera, and then carried on war with them in Africa. He afterwards suppressed a revolt in Sicily, and made an expedition to Italy. Died, by poison, according to some authorities, B. C. 289.

AGELADAS, an admired Greek sculptor, who lived about B. C. 500. Myron, Phidias, and Polycletus were his pupils.

AGELNOTH, an Anglo-Saxon prelate, promoted to the see of Canterbury in 1020. He distinguished himself by great religious zeal, and still more by the firm manner in which he refused, on the death of Canute, to crown Harold, who had seized the throne in the absence of his brother, Hurdicanute. Died, 1038.

AGESANDER, a Rhodian sculptor, supposed to have lived in the 1st century. He is celebrated for having, in conjunction with Polydorus and Athenodorus, executed that admirable monument of Grecian art, the Laocoon, which was discovered in the 16th century near the baths of Titus.

AGESILAUS II., king of Sparta, succeeded his brother Agis II. He acquired great renown by his exploits against the Persians, and by the successful maintenance of the war against the Thebans and Athenians, whom he defeated at Coronea. The supremacy which he well-nigh recovered for Sparta was finally lost at the battle of Leuctra. Agesilaus afterwards went to assist Tachos in his attempt to take the throne of Egypt, but was bribed to espouse the part of Nectanab, his antagonist. On his return, he died in Africa, 360 B. C., after a reign of 38 years.

AGGAS, RALPH, a surveyor and engraver of the 16th century, who first drew a plan of London, which, although referred to the time of Henry VIII. and Edward VI., appears not to have been made on wood until about 1560. It was re-published in 1618, and re-engraved by Vertue in 1748. He also drew plans of Oxford, Cambridge, and Dunwich, in Suffolk. Died, 1579.

AGILULF, king of the Lombards, crowned at Milan in 591. Soon after his accession, he quitted the Arian communion for the Catholic, in which he was followed by numbers of his subjects, many of whom had hitherto been Pagans. In the third year of his reign, he had to sustain a war against some of his own rebellious dukes, whom in the end he forced to submit; and having secured and augmented his dominions, and employed himself in rebuilding and endowing churches, he died in 619.

AGIS III., king of Sparta, succeeded his father, Archidamus III., B. C. 238. He was a prince of great magnanimity; and, though he detested the Macedonian domination, he would not expose his country to ruin by resisting it, until Alexander was deeply engaged in his Persian expedition; when he raised an army of 20,000 men, which was defeated by Antipater, governor of Macedonia, and Agis himself slain. Being carried

collected forces, Cracuse and Caracuse first protector, Cracuse, B. C. 317. Death 4000 Syracusans 6000 more. He was defeated in Sicily, and then in Africa. He was killed in Sicily, and died, by political intrigues, B. C. 289. Greek sculptor, Myron, Phidias, Praxiteles.

Saxon prelate, Odoacer, in 1020. A great religious reformer in a firm manner in the reign of Canute, to the throne in 1042, Hurdiancane.

A sculptor, supposed to be of the 5th century. He was in conjunction with the Greek art, the first in the 16th century.

Agrippa, succeeded in the great re-est of the Persians, the maintenance of the Athenians, and the supremacy of Sparta was secured. Agrippa, king of Egypt, but was of Nectanab, and died in 38 years.

Agrippa, an engraver who drew a plan of the world referred to the emperor Edward VI., appeared on wood until 1618, and died in 1748. He also was a bridge, and Dun-

Agrippa, crowned king on his accession, and union for the world by numbers of whom had a war against the dukes, whom in 1417; and having dominions, and being and endow-

Agrippa, succeeded his father in 1338. He was a duke; and, though in a state of domination, he was to ruin by re-est was deeply en-est; when he died, which was the error of Mace-Being carried

severely wounded from the field, the soldiers who bore him were on the point of being surrounded by the enemy; on which, commanding them to set him down, and preserve their own lives for the service of their country, he fought alone on his knees, and killed several of the assailants, till he was struck through the body with a dart, B. C. 330.

AGIS IV., king of Sparta, was the son and successor of Eudamidas. His first attempt was to renew the original law for the equal division of land, which was opposed by a party at the head of which was his colleague, Leonidas. The latter was deposed, and the joint sovereignty devolved to his son Cleombrotus, who entered into the views of Agis. Previously, however, to a partition of the lands, Agesilaus, uncle to Agis, who was deeply in debt, proposed the abolition of all debts, which would render the former measure more palatable. This accomplished, the influential and wily Spartans found means to postpone the other change, until Agis was absent on an expedition sent to the aid of the Achaeans. During his absence a conspiracy was formed to restore the deposed king, Leonidas; which succeeding, Agis and his colleague, Cleombrotus, took sanctuary in a temple. The latter was immediately dragged forth and banished, but Agis remained a considerable time in safety, until his friends were bribed to betray him, and he was thrown into prison. He suffered death with great magnanimity, B. C. 240.

AGLIONBY, JOHN, a learned divine, born in Cumberland. He was made chaplain to Queen Elizabeth, assisted in the authorized translation of the New Testament, and died at Islip, of which he was rector, in 1610.

AGNES of Méranie, queen of France, was daughter of Berchtold, duke of Méranie, and was married, in 1196, to Philip Augustus, king of France, who had three years previously married and repudiated the princess Ingelburga of Denmark. The marriage of Agnes being declared void by the pope, and an interdiction being laid on France, in 1200, on account of it, Philip separated himself from Agnes, who soon after died broken-hearted at Poissy, 1201.

AGNESI, MARIA GAETANA, an Italian lady of extraordinary talents, born at Milan, 1718. So profound were her mathematical attainments, that when, in 1750, her father, who was a professor in the university of Bologna, was unable to continue his lectures in consequence of ill health, she obtained permission from the pope to fill his chair. At the early age of 19, she had supported 91 theses, which were published in 1738 under the title of "Propositiones Philosophicae." She was also acquainted with the Latin, Greek, Hebrew, French, German, and Spanish languages. Agnesi retired to the monastery of Blue Nuns, at Milan, where she died at an advanced age, in the year 1799.

AGNOLO, BACCIO, a Florentine sculptor, and architect of great reputation. He was also distinguished for his carvings in wood; and while he lived at Rome, Michael Angelo, Raffaele, and other great artists, were among the visitors to his studio. Born, 1460; died, 1543.

AGORACRITUS, a Greek statuary in the

5th century B. C. He was a pupil of Phidias, and one of the most skillful artists of his time.

AGRICOLA, CNEIUS JULIUS, an eminent Roman commander, born A. D. 37, in the reign of Caligula. His first military service was under Suetonius Paulinus in Britain; and, on his return to Rome, he was made quaestor in Asia, and became tribune of the people, and praetor under Nero. By Vespaasian, whose cause he espoused, he was made a patrician and governor of Aquitania; the dignity of consul followed; and, in the same year, 77, he married his daughter to Tacitus the historian, who has so admirably written his life. Next year he was appointed governor of Britain; extended his conquests into Scotland; and built a chain of forts from the Clyde to the Frith of Forth, to prevent the incursions of the inhabitants of the North. He defeated Galgacus on the Gram-pian Hills, and then made peace with the Caledonians. On the accession of Domitian, Agricola had a triumph decreed him, but was recalled, and, retiring into private life, died, A. D. 93; aged 54.

AGRICOLA, GEORG, the most celebrated metallurgist of his time; born at Glauchen, Misnia, in 1494, and died, 1555.

AGRICOLA, GEORG ANDREAS, a German physician, author of a curious work on the multiplication of trees and plants, of which a French translation appeared at Amsterdam in 1720. He was born at Ratisbon, 1672, and died, 1738.

AGRICOLA, JOHANN, a polemical writer of celebrity, born at Eisleben, Saxony, 1492, and died at Berlin, 1566. From being the friend and scholar, he became the antagonist of Martin Luther, against whom, as well as Melancthon, he maintained a spirited controversy, advocating the doctrine of faith in opposition to the works of the law, whence the sect of which he became leader received the name of Antinomians.

AGRICOLA, RODOLPHUS, one of the most learned men of the 15th century, spoken of by Erasmus with great respect, was born in Friesland, 1442, studied at Louvain and Paris, and then went to Italy and attended the lectures of Theodore Gaza on the Greek language, at Ferrara. He became a professor at the university of Heidelberg in 1482, and died there in 1485. He was known as a poet, painter, and musician. His most important work is his "Dialectics," in which he appears as one of the earliest opponents of the prevailing scholastic system, and which was ordered by Henry VIII. to be used at Cambridge.

AGRIPPA, CAMILLO, a celebrated architect of Milan in the 16th century, who, under the pontificate of Gregory XIII., accomplished the removal of a vast obelisk to St Peter's Square; an account of which labour he published at Rome, 1583.

AGRIPPA, HENRY CORNELIUS. This highly-gifted but eccentric man was born in 1486, at Cologne, of a noble family. He became secretary to the Emperor Maximilian, by whom he was knighted for his bravery in the Italian wars. He next travelled through various parts of Europe, and, while in England, wrote a commentary on St Paul's Epistles. In 1518 he settled at Metz, which

place, however, he was obliged to quit, at the instigation of the monks, and went to Cologne, and thence to Geneva. He next travelled to Antwerp, in 1528, and was taken into the service of Margaret of Austria, governess of the Low Countries. In 1530 he published his treatise of the "Vanity of the Sciences," and soon afterwards his "Occult Philosophy." In 1535 he was at Lyons, where he was imprisoned for defaming the king's mother, but soon obtained his discharge, and died the same year at Grenoble. All his works were collected and printed at Leyden, 1550, in 3 vols.

AGRIPPA I., HEROD, grandson of Herod the Great. He gave great offence to Tiberius, who threw him into prison; but, on Caligula's succession, was not only released, but received from that emperor a golden chain equal in weight to the iron one he had worn in his confinement, as also the kingdom of Judea. He commenced a persecution of the Christians, in which the apostle St James perished; and after a reign of seven years died at Caesarea, as related in the Acts of the Apostles, A.D. 43.

AGRIPPA II., HEROD, son and successor of the preceding, was the seventh and last of the Jewish monarchs of the family of Herod the Great. It was before this prince that St Paul pleaded his cause with so much eloquence that Agrippa acknowledged he had almost persuaded him to be a Christian. He died at Rome about the year 91.

AGRIPPA, MARCUS VIPSANIUS, a distinguished Roman commander, and the associate and friend of the Emperor Augustus, was born B.C. 63. He took a leading part in the civil wars, which followed the death of Julius Cæsar; became consul in 37; obtained a naval victory over Sextus Pompeius in the following year, and chiefly contributed to the victory of Augustus (then Octavius) at Actium, in 31. He was once ædile, consul again in 28 and 27, and three times tribune. He spent large sums on public works, and in his third consulship built the Pantheon. He seemed to be marked out as the successor of Augustus, whose daughter Julia he married on the death of Marcellus. Julia was his third wife. Vipsania, his daughter, by his first wife, was married to Tiberius; and Agrippina, one of his daughters, by Julia, became the wife of Germanicus. Agrippa was twice made governor of Syria, and distinguished himself by his wise and just administration. Died, B.C. 12.

AGRIPPINA, the elder, daughter of Marcus Vipsanius Agrippa, was married in the first instance to Tiberius, who divorced her, and she became the wife of Germanicus Cæsar, whom she accompanied in his military expeditions. On the death of the latter at Antioch, A.D. 17, she returned to Rome with his remains, and took advantage of the public grief for the death of her husband to accuse Piso, who was suspected of having hastened it. The latter was shortly afterwards found dead in his bed; and Tiberius, jealous of the affection of the people for Agrippina, banished her to a small island, where she died of hunger, in 33.

AGRIPPINA, the younger, daughter of Germanicus and the elder Agrippina, and

mother of Nero, was at once cruel and licentious. After losing two husbands, she married her uncle, the Emperor Claudius, whom she poisoned in 54, to make way for the elevation of her son Nero. She ruled in his name, but after a few years he caused her to be assassinated, and exhibited to the senate a list of all the crimes of which she had been guilty.

AGUESSEAU, MARQUIS D'. [D'Aguesseau.]

AGUILAR, GRACE, a pleasing moral writer of the Jewish persuasion, was born at Hackney, 1816. Her first work was the "Magic Wreath;" but this was far exceeded in merit by her "Home Influence" and her "Vale of Cedars," &c., published posthumously. The promising career of this authoress was cut short at Frankfort, July, 1847.

AHMED PASHA. [Jezzar.]
AHRENDT, or ARENTS, MARTIN FREDERICK, antiquary and paleographer, was a native of Holstein. He spent forty years in travelling on foot through Norway, Sweden, Denmark, France, Spain, Italy, and other parts of Europe, in search of Scandinavian antiquities and Runic monuments, and carried on an extensive correspondence with his learned contemporaries relative to the objects of his investigation. He died at a small village near Vienna, in 1824.

AIDAN, St, bishop of Lindisfarne, and the "Apostle of Northumbria," was at first a monk of Iona. When Oswald succeeded to the kingdom of Northumbria, and desired to recover his people from the apostasy into which they had fallen, he sent to the Culdees (monks of Iona), among whom he had been brought up, for religious teachers. Aidan answered to his call, and devoted himself with zeal, patience, and wisdom to the great task. In 635 he settled on the island of Lindisfarne, and there founded a monastery, which flourished about 200 years, and was at last destroyed by the Danes. The see of Lindisfarne was ultimately transferred to Durham. Aidan died, 31 August, 651.

AIKIN, JOHN, M.D., born Jan. 15, 1747, at Kibworth, Leicestershire, was the only son of Dr T. Aikin, a dissenting minister and schoolmaster. In 1764 he became a student in the university of Edinburgh. On his return he went to Yarmouth, Norfolk, where, with little interruption, he continued till 1792, when he removed to London, and devoted himself chiefly to literature, in which he was eminently successful. In 1796 he became the editor of the Monthly Magazine, which he superintended from its commencement till 1806. In 1799, he published, in conjunction with Dr Enfield, the first volume of a General Biographical Dictionary, in 4to, which, however, was not completed till 1815. Dr Aikin was also the author of the well-known and favourite "Evenings at Home," and of a "Natural History of the Year," which has served as a model for subsequent works of the same class. Died, 1822, aged 75.

AIKMAN, WILLIAM, a Scotch painter, born at Cairney, in 1682. He was the friend of Allan Ramsay, the poet Thomson, Pope, &c. Died, 1731.

AILEY, PIERRE D' (Petrus de Alliace), a celebrated French cardinal, born at Conspigne in 1350. He early entered the college of Navarre, Paris, and distinguished himself by his attainments in theology and philosophy. In 1390 he was appointed Grand Master of his college, and contributed greatly to its increased renown. Nine years later he became chancellor of the university of Paris, and confessor to the King Charles VI. In 1398 he was made bishop of Cambrai, and in 1411 cardinal. He took a distinguished part at the council of Pisa, and was president of the Council of Constance, when John Huss was condemned. He was learned, eloquent, and earnest; he advocated a reform of the Church, but stoutly opposed the doctrines of Huss. He acquired the title of the "Hammer of Heretics." Among his numerous works are "Libellus de emendatione Ecclesie," and "Meditationes circa Septem Psalmos Penitentiales." The French translation of the latter was one of the earliest books printed. Died, 1420 or 1425.

AIMOIN, of Aquitaine, author of a legendary history of France, is supposed to have lived in the 9th century. The history is brought down to 1165 by another hand; and is in the third volume of the Collection of Duchesne.

AINSWORTH, HENRY, an eminent biblical commentator and divine among the English nonconformists, flourished at the latter end of the 16th century. His writings exhibited much learning and acuteness, and excited the attention of Hall, bishop of Exeter, who entered the lists against him. He subsequently went to Amsterdam, where he died in 1622.

AINSWORTH, ROBERT, a distinguished lexicographer. His most important work is his well-known Latin Dictionary. He was a native of Woodvale, in Lancashire, and was born in 1660. He died in London in 1743. His Dictionary was first published in 1736, and has passed through many editions, but has long been superseded.

AITON, WILLIAM, an excellent botanist, born in Lanarkshire. He was a pupil of Philip Miller of the Chelsea Physic-Garden, and became a great favourite with George III., who appointed him head-gardener at Kew in 1759. In this situation he formed one of the best collections of rare exotic plants in the world, a catalogue of which he published in 1781, under the title of "Hortus Kewensis," an elaborate work in 3 vols. Aiton numbered among his friends the great naturalist Sir Joseph Banks, and the painters Gainsborough and Zoffany. Died, 1793.

AITZEMA, LEO, an historian of Friesland, born, 1600, and died, 1669. He was author of the History of the United Provinces, from 1621—1668, in 15 vols.; an extremely valuable work, especially for the number and importance of original documents, memoirs, &c., which it contains.

AKHER, sultan of the Moguls, was born in 1542, and succeeded his father Humayun in his fourteenth year. The supreme power was for a time vested in Behram Khan, a distinguished commander; but in 1560 Akher took the government into his own hands. The empire was then in a weak, distracted,

and disorganised state, and the young sovereign at once applied himself with manly energy to the task of its restoration. His aim was to become the head of the whole Indian nation. Revolts of officers in various provinces had to be suppressed, and then the numerous provinces which had been lost had to be reconquered. Thus he was involved in a long course of wars, the result of which was the extension of his empire from the narrow limits of the Punjab and the country round Delhi, till it comprehended fifteen provinces. But Akber is yet more famed for the wisdom and impartiality of his internal policy than for his conquests. He showed a singular spirit of toleration in religion, and would fain have established a new religion, which should be common to all his subjects. He made great reforms in the revenue system and in the army, and provided carefully for the local government of provinces, for the administration of justice, and the regulation of the police. He promoted commerce, and science, and literature, took part in religious and philosophical discussions, and had for his chief personal friend the great scholar Felzi, and his brother, the statesman Abul Fazl. His last years were saddened by the misconduct of his three sons. Died, after a reign of 50 years, in 1605.

AKENSIDE, MARK, poet and physician, was born in 1721 at Newcastle-upon-Tyne. He finished his studies at the universities of Edinburgh and Leyden, in the latter of which he took his degree as a doctor of medicine in 1744. In the same year appeared his principal poem, "On the Pleasures of the Imagination," which immediately attained immense popularity, and long retained it. This was followed by the "Epistle to Curio," a satire; and, in 1745, he published ten odes on various subjects. He continued, from time to time, to send forth his poetical compositions, most of which appeared in Dodsley's Collection. Dr Akenside also wrote a number of medical works. He died in 1770, aged 49. The "Pleasures of Imagination" is scarcely readable now. It is more a rhetorical exercise and a tiresome display of fine writing than a poem.

AKERBLAD, JOHN DAVID, a learned Swede, who accompanied the Swedish embassy to Constantinople, and distinguished himself as an oriental linguist and antiquary. Died, 1819.

ALAMANNI, LODOVICO, a Florentine poet and statesman, was born in 1495. Involved in a plot against the Cardinal Giulio de Medici, he fled to France, and was sent ambassador from Francis I. to the emperor. His works are "La Coltivazione," "Opere Toscane," "Girone il Cortese," &c. Died, 1556.

ALAN, ALLEYN, or ALLEN, WILLIAM, an Englishman of good family, was born at Rossal, Lancashire, in 1531. Educated at Oxford by a tutor warmly attached to popery, he entered upon the world under a strong prepossession in favour of the Catholic faith; and, while very young, became principal of St Mary's College, and proctor of the university. On the accession of Elizabeth, he went to Louvain, and was appointed head of

the English College. He now strenuously exerted himself, both by his writings and example, to advance the papal cause; and by his suggestions Philip II. was induced to undertake the invasion of England; to facilitate which, Alan published a defence of the pope's bull against Elizabeth, with an exhortation to her subjects to rise in favour of the Spaniards. For these services he was made cardinal and archbishop of Mechlin. It is said, that towards the close of his life he repented of the measures he had recommended against his country; and, on his death bed, wished to address the English students at Rome, but was prevented by the ascendant Jesuit. He died in 1594, not without suspicion that he was poisoned.

ALAND, SIR JOHN FORTESCUE (Lord Fortescue), a baron of the Exchequer, and a pious judge of the courts of King's Bench and Common Pleas, in the reigns of George I. and II., was descended from the famous Sir John Fortescue, lord chief justice and lord high chancellor of England in the reign of Henry VI. He was born in 1670, and received his education at Oxford; was an able lawyer, an impartial judge, and well versed in Anglo-Saxon literature. Died, 1746.

ALARCON Y MENDOZA, JUAN RUIZ DE, one of the greatest Spanish dramatists, was born in Mexico. He was of a noble family of the town of Alarcon in Spain, and it is presumed that he came to Europe about the latter end of the 16th century. Almost nothing is known of the events of his life. In 1628 he held the lucrative office of Prolocutor of the Royal Council for the Indies, and the same year published a volume of plays. He published a second volume in 1634. Alarcon was a humpback, enormously concealed, and very unpopular among his countrymen. Though he wrote at least twenty dramas, his name was forgotten and his works neglected for nearly two hundred years; but his fame has now revived, his works have been newly edited, some of them are translated into French, and he is now admitted to rank next to Cervantes and Lope de Vega; and even in one respect to rival them—the delineation of character. The moral tone of his dramas is, for his age, very high, and in his *dramatis personæ* we have specimens of the best Spaniards, both men and women, of his time. One of his best plays is "La Verdad Sospechosa," or Suspected Truth, of which Corneille made a very clever translation and adaptation in "Le Menteur." This was re-translated into Spanish, and became very popular, no one suspecting its origin. Among Alarcon's other plays are "Change for the better," "How to gain friends," and "The Weaver of Segovia." Died, 1639.

ALARIC I., king of the Visigoths, and conqueror of Rome, was descended from a noble Gothic family, and for some years served in the Roman armies; but on the death of Theodosius he put himself at the head of his countrymen, who threw off the Roman yoke, and led them into Greece. In the following year, 396, Stilicho was sent against him, and he was driven out of Greece. In the year 400, being then the acknowledged sovereign of the Visigoths, he invaded Italy. In 402,

he made a second irruption, but was defeated by Stilicho at Pollentia, in 403, and compelled to make peace. After this, he was employed in the service of the Emperor Honorius, but in 408 he again entered the Roman territory, and laid siege to the capital. His terms were complied with, and he retired into Tuscan; but, being joined by his brother, Ataulphus, he returned and besieged Rome a second time in 409, only retiring on his own terms. He renewed the siege a third time in the following year, when the city was taken, and given up to pillage for six days. After ravaging Southern Italy he was preparing to pass into Africa, when he fell suddenly ill and died at Cosenza, in the autumn of 410. His followers deposited the remains of their beloved leader in a grave dug in the bed of the river Bucento, its course being turned a while for the purpose.

ALARIC II., king of the Visigoths, succeeded his father Euric in 485, and reigned over all the country between the Ithone and the Garonne. He adapted to his states the Theodosian collection of laws, and published an abridgment of it as the law of the Visigoths, since known by the title of the code of Alaric. He was slain in battle by Clovis, king of the Franks, 507.

ALASCO, JOHN, uncle to Sigismund, king of Poland, was born in 1499. He was in great esteem with most of the learned men of his day, and enjoyed the friendship of many of them, particularly Erasmus and Zuinglius, through which he became a convert to the Protestant faith; to which he was so zealously devoted as to obtain the title of the Reformer of Poland. He died at Frankfurt, in 1560.

ALBA, Duke of. [ALVA.]

ALBAN, ST, said to be the first Christian martyr in Britain, lived at Verulam, and having given shelter to a priest who was arrested, and refusing to save himself by denying the faith, was beheaded. The abbey of St Alban's was built on the scene of his martyrdom. Died, 304.

ALBANI, ALESSANDRO, an eminent virtuoso, born at Urbino, 1692, raised to the rank of cardinal by Innocent XIII., and died, 1779, aged 87, very highly esteemed. In 1762, his collection of drawings and engravings, consisting of 300 volumes, was purchased by George III. for 14,000 crowns.

ALBANI, GIOVANNI FRANCISCO, nephew of the above, was born at Rome, 1720, and in 1747 was made a cardinal. He opposed the suppression of the Jesuits, as a measure fraught with danger to the church; but, in all other respects, was a most enlightened prelate. He imitated his uncle in his encouragement of letters and learned men; but when the French entered Rome they plundered his palace, confiscated his estates, and reduced him, then in his 77th year, to poverty: his valuable collection was sent off to Paris, and even the plants of his garden were rooted up and sold. Amidst this devastation the cardinal took refuge in a convent, whence he removed to Naples; and returned to Rome, in 1800, where he lived till his death in 1803.

ountess of, was Carolino, who

married Charles Stuart, "The Pretender." She was cousin of the last reigning prince of Stolberg-Gedern; was born in 1733; married in 1772, when she took the title of Countess of Albany; but to escape from the barbarity of her husband, who lived in a continual state of Intoxication, she retired, in 1780, to a cloister. At his death, in 1788, the French court allowed her an annuity of 60,000 livres. She soon after secretly married the poet Alfieri, and settled at Florence. Widow a second time in 1803, she survived the house of Stuart, which became extinct at the death of her brother-in-law, the Cardinal of York, in 1807, and died at Florence, in 1824.

ALBANI, FRANCISCO, a very celebrated painter, born at Bologna, 1578, and died, 1660. Albani studied with Guido under the Caracci, and attained great excellence in delineating feminine and infantine beauty.

ALBANI, GIOVANNI BATTISTA, a younger brother of the above, was also a painter, and excelled in landscape.

ALHATEGNI, a distinguished Arabian astronomer, was born in Mesopotamia, and flourished in the ninth and tenth centuries. His astronomical observations, continued for nearly 50 years, and the important improvements he made in the method and instruments of observation, obtained for him the title of the Ptolemy of the Arabs. He lived chiefly at Baghdad, and died in 929.

ALBERONI, GIULIO, cardinal and first minister of Spain, was born in the Duchy of Parma in 1664. He entered the church, and afterwards became secretary to the duke of Vendôme, then commanding the French army in Italy. He accompanied Vendôme to France and to Spain, was named agent of the duke of Parma at Madrid, ingratiated himself with the king, Philip V., and got himself made cardinal and first minister. He immediately formed, and began to execute, schemes for the extension of the power of Spain, invading Sardinia and Sicily, and carrying on intrigues in France, England, and Turkey; but the alliance of France and England against him defeated his projects, and led to his dismissal and exile. He went to Rome, was subsequently legate to the Romagna, where he indulged his passion for intrigue, spent his last years in retirement, and died in 1752.

ALBERT, FRANCIS AUGUSTUS CHARLES EMMANUEL, Prince Consort of England, the second son of H. R. H. Ernest, Duke of Saxe-Coburg Saal-feld, was born at Erenberg, August 26, 1819. He was educated at the castle under his father's supervision, by masters selected from the College of Coburg, until in May, 1837, he, with his elder brother, the present Duke Ernest, entered the University of Bonn, as a student in law. Here he remained till September, 1838, having acquired a high reputation for his attainments in science and art, together with the esteem and love of the whole people of Bonn for his blameless life and his unbounded charity to the poor. Besides his studies in jurisprudence and history, which were most diligently prosecuted, his leisure hours were devoted to music and painting, in both of which he had great proficiency. His "Savoyard Minstrel Boy," painted during his

student life, now one of the most prized pictures in the Queen's collection, may be mentioned as a proof of his great ability in the latter art. At Bonn his greatest friends were Count Inest and Professor Weleker; he was also most highly esteemed by Schlegel, who, professing to detest "princelings," readily extended his friendship to Prince Albert. In 1838 he visited England with his father for the coronation of the Queen, and remained in Windsor and London longer than the guests of higher rank. In 1839 the visit was repeated; and after it the Queen announced to the Privy Council her intention to ally herself in marriage with Prince Albert of Saxe-Coburg Gotha. When the marriage was notified to Parliament in the Queen's Speech of January 16, 1840, the Duke of Wellington proposed, as an amendment to the address, the insertion of the word "Protestant" before "Prince," as a guarantee for the religious securities of the English people. Thus, in his twenty-first year, Prince Albert, having been naturalized by Act of Parliament, became the second person in the English realm, and entered on a position of unusual difficulty. Precluded from all open interference in the conduct of government, he was yet the nearest adviser of the Crown, surrounded by dangers and temptations which it required the rarest judgment to avoid and surmount. From the first it may be said that he saw the path which he ought to follow, with a sagacity wonderful for one so young; but his whole conduct showed that his choice was prompted not so much by wisdom as by a strict and unwavering conscientiousness. He came amongst a people jealous of all foreign interference, and where, from time to time (as on the occasion of the death of the Duke of Wellington, and during the Crimean war), faction was ready to impute to him a desire to secure to himself the office of Commander-in-Chief, and inaugurate a military despotism. The charge that he interfered in advising the Crown was met in Parliament by the open avowal of its correctness; and the admission that the Prince really took part in discussions with ministers, and that he would persevere in what was at once his duty and his constitutional right, silenced once and for all these unjust insinuations, and went far towards winning for him the general confidence of the nation. But his true glory lies in the disinterested zeal with which he promoted every design which had for its purpose the moral, social, and physical improvement of the people. For the first time it was seen that the life of a family might be as simple and unaffected in a palace as in any private home; for the first time the nation saw her princes trained by their father to value higher things than selfish and idle pleasures. The example thus set by the first household in the land has produced results which can only be appreciated at their true value by contrasting English society now with what it was thirty years ago. Prince Albert availed himself of every opportunity for improving the condition of the poor, as well as for furthering the advancement of art and learning generally. Thus, although in 1847 he accepted from the University of Cambridge

—when ratified by an election—the office of Chancellor, which he had at first declined, he was probably more pleased when in 1859 he was selected as President of the British Association. His interest in agriculture was shown not merely by his masterly speeches at the Royal Agricultural Society's meeting in York (1848) and elsewhere, but by the care with which he superintended his model farm at Windsor. The condition of the labouring classes was the subject of his first important speech in public, in the same year (1848); and this subject lay unquestionably at the bottom of that wise design which was carried out in the Great Exhibition of 1851. The work of 1851 did not fail in its purpose: and the same good energy promoted a second Great Exhibition for the year 1862, at the opening of which his well-known form was missed, and his voice was not heard. On the 25th of June, 1857, he was styled by Royal warrant "Prince Consort," to give him precedence in foreign courts, having received the baton of a Field Marshal, together with the title of "Royal Highness," in 1840. Thus had passed away more than twenty years in a career of uninterrupted usefulness. But just when he had begun to acquire that universal popularity which he had long deserved, he was struck down by a sudden and unforeseen illness. Early in December, 1861, symptoms of indigestion showed themselves in a feverish cold, from which, however, no apprehensions were entertained until the third or fourth day preceding his death; nor was any really serious anxiety felt by his medical attendants till the day before that on which he died. On Saturday, December 14, after an apparent improvement, the announcement of which was eagerly welcomed by the public, he died without suffering, to the profound grief of his family, and the deep and general sorrow of the whole nation. Seldom has a life of greater usefulness been cut short with greater suddenness, and at a time when his sound judgment and his experienced wisdom seemed more than ever needed. And never perhaps in the annals of princes has there been seen a career of more genuine and unselfish devotion to the true interests of his family, and of the nation to which that family belonged. When the English people mourned at the death of the Princess Charlotte, they mourned simply for a promise which had never been realised; at the death of Prince Albert they mourned for the loss of one who fulfilled all the duties of his station with a rare conscientiousness, and whom they justly revere as one of the most generous and self-devoted of men. He died in the 43rd year of his age, and was buried at Windsor, December 23, 1861.

ALBERT, marquis of Brandenburg-Culmbach, surnamed the German Alcibiades, born in 1522, was a principal actor in the troubles of Germany during the reign of Charles V., against whom he made a league and declared war in 1552. After capturing many towns and fortresses, and devastating various parts of Germany, he was defeated in August, 1553, by Maurice, elector of Saxony, and put under the ban of the empire. He fled to France, but was allowed to return, and died at Pforzheim, 1558.

ALBERT, CHARLES D', duke of Luynes, born in 1578. Henry IV. of France, who was his godfather, placed him as a page about his son, afterwards Louis XIII., over whom, by his artful manner, he gained such an ascendancy, that he obtained the highest honours in the state, and was made constable of France: but his ambition and tyranny rendered him odious to the people. Died, 1621.

ALBERT, LOUIS JOSEPH D', son of Louis Charles, duke de Luynes, born in 1672, and died 1758. He distinguished himself in several battles, for which he was appointed field-marshal by the Emperor Charles VII., who sent him ambassador to France, and created him prince of Grünberghen.

ALBERT I., duke of Austria and emperor, was the son of Rudolph of Hapsburg, and was born in 1248. He arrogantly claimed the empire on the death of his father in 1292, but the electors chose Adolphus of Nassau. The latter being deposed in 1298, and soon after defeated and slain by Albert, Albert was elected and crowned the same year. He first joined with France against the pope, and then with the pope against France. He made war on the Netherlands, on Hungary and Bohemia; and by his despotic measures in Switzerland provoked the revolution which led to the formation of the Swiss Confederation. An act of private injustice to his nephew, Don John, occasioned a conspiracy against him, and he was murdered in Switzerland, 1st May, 1308.

ALBERT II., emperor (and V. duke of Austria), was the son of Duke Albert IV., and was born at Vienna in 1357. At seven years of age he succeeded to the dukedom, but did not assume the government till 1411. He took part in the war against the Hussites with the Emperor Sigismund, whose daughter he married in 1421. He succeeded to the throne of Bohemia at the close of 1437, again carried on war with the Hussites, was chosen king of Hungary, and finally emperor. His first measures promised well for the empire; but having set out to repel a Turkish invasion of Hungary he fell ill and died there in October, 1439. He had not been crowned emperor.

ALBERT, archduke of Austria, and governor of the Netherlands, was sixth son of the Emperor Maximilian II., and was born in 1559. At a very early age he was made cardinal archbishop of Toledo. In 1583 he was appointed viceroy of Portugal, and in 1596 governor of the Low Countries, where he married the daughter of Philip II., and carried on the war against the revolted Dutch. He was defeated at Nienport, took Ostend after a siege of three years, and at last was glad to conclude a truce with his brave foes. His government was thenceforward just and mild. Died, 1621.

ALBERT, king of Sweden, was elected to the throne on the deposition of Magnus II. in 1363. The latter, supported by Denmark and Norway, endeavoured to recover his crown, but was defeated by Albert, and taken prisoner. The nobles, however, became dissatisfied with his rule, and applied for aid to Margaret, queen of Denmark and Norway, by whom he was defeated in a bloody battle,

ALBERTI, LEO BATTISTA, an eminent architect, painter, sculptor, and scholar, born at Genoa in the beginning of the 15th century. He was employed in many architectural works at Rome, Florence, Mantua, and other cities of Italy, among which is especially admired the church of San Francisco at Rimini. Besides the important treatise on architecture, entitled, "De re aedificatoria," which was published after his death, he wrote works on painting and sculpture. The invention of the camera obscura has been attributed to him. Died, 1485.

ALBERTI DI VILLANOVA, FRANCIS, an eminent Italian lexicographer of the 18th century. Born, 1737; died, 1803.

ALBERTINELLI, MARIOTTO, a distinguished Florentine painter, born about 1475. He studied under Cosimo Toselli, became assistant to Fra Bartolomeo, whose style he acquired, and some of whose works he completed, and after a dissipated life died about 1520.

ALBERTUS MAGNUS, one of the greatest of the scholastic philosophers and theologians of the middle ages, was born at Lauingen, in Swabia, in 1193 or 1205. He studied at Pavia, entered the Dominican order, and became teacher of philosophy at Cologne. He acquired great renown, and was called to teach in the university of Paris. In 1260 he was named archbishop of Ratisbon, but he soon resigned that dignity. He took part in the council of Lyons in 1274, and died at Cologne in 1280. He was, perhaps, the most learned man of his age, and was accused as usual of magical arts. The famous Thomas d'Aquinas was a scholar of Albertus. His works fill 21 vols. folio.

ALBINUS, BERNARD SIEGFRIED, one of the ablest anatomists of modern times, was born at Frankfort in 1696. He was a pupil of the celebrated Boerhaave, and became professor of anatomy, and subsequently professor of therapeutics, in the university of Leyden, which situations he filled for half a century, during which time he published numerous professional works. Died, 1776.

ALBOIN, king of the Lombards in the 6th century. He succeeded his father, Audoin, in 561; conquered and slew Cunimund, king of the Gepidae, whose daughter, Rosamond, he afterwards married. He invaded Italy in 568, and reached Rome without encountering resistance. He took Pavia after a siege of three years, and made it the seat of government. His valour as a soldier was equalled by his justice and moderation as a sovereign. But at a festival at Verona he incurred the just resentment of his wife, by sending her wine in a cup wrought from the skull of her own father, and forcing her to drink from it, she had him assassinated, A. D. 573.

ALBON, JACQUES, marquis de Fronsac, and marshal de St André, a French general, who acquired great reputation about the middle of the 16th century. Quesnoy, St Quentin, Renti, &c., were the chief scenes

of his exploits. He was deputed to carry the collar of the order of St Andrew to Henry VIII. of England, who made him a knight of the Garter. At the death of Henry II. he was chosen member of the regency, and fell at the battle of Dreux, 1562.

ALBRECHTSBERGER, JOHANN GEORG, a German musician, and one of the most learned of modern contrapuntists, was born at Kloster Neuburg in 1736; became court organist and a member of the academy at Vienna; was the instructor of Beethoven; and died in 1809.

ALBRET, JEANNE D'. [D'ALBRET.] ALBUQUERQUE, ALFONSO D', Portuguese Viceroy of the Indies, was born in 1452. He made his first expedition to the Indies in 1503, and established a fort at Cochín. Three years later he took part in another expedition under Da Cunha and unsuccessfully attacked Ormuz. In 1508 he succeeded Almeida as governor of the Indies, and soon afterwards took Goa, which he held only a few months. A second attack was successful, and made him master of the place. In 1511 he took Malacca, and by his wise and just government did much to establish the power of the Portuguese there. He returned to Goa and defeated the former governor, who in his absence had endeavoured to recover possession. After a fruitless attempt on Aden, he succeeded in taking Ormuz without fighting. The tidings of his recall to Europe reached him when in ill-health, and he died at Goa shortly after, in 1515. The Indians long remembered his just and humane rule, and used to go to his tomb to pray for help against the injustice of his successors.

ALCÆUS, a Greek lyric poet, was born at Mitylene in the Isle of Lesbos, and flourished about B. C. 600. He took an active part in the civil strife of his townsmen, and as an aristocrat was banished. It was for the purpose of preventing the return of Alcæus and other noble exiles that the sage Pittacus was made sovereign of Mitylene in B. C. 589. The odes of Alcæus were greatly praised, but only a few fragments are extant. Alcæus is said to have been a lover of Sappho.

ALCAMENES, a Greek statuary, who was the disciple and rival of Phidias.

ALCIBIADES, the celebrated Athenian general and statesman, the son of Clinias, was born B. C. 450. He was handsome, rich, clever, and dissolute. He early became the disciple of Socrates, who took great pains to form his mind to the love of virtue, and he accompanied that philosopher on several military expeditions. At the siege of Potidaea Socrates saved the life of his pupil, and at the battle of Delium Alcibiades saved the life of his master. In the Peloponnesian war, he was appointed to command with Nicias, in an expedition against Syracuse; but before setting out, a charge was preferred against him of impiety. One night all the Herme, or half statues of Mercury, in Athens, were defaced and mutilated; and information was given that this sacrilege was the work of Alcibiades and his dissolute companions, in one of their frequent moments of revelry and intemperance. For

this he was ordered home; but, fearful of the consequences, he withdrew to Sparta, and stirred up the Lacedæmonians to declare war against Athens. He afterwards went over to the king of Persia, by whose interest he obtained his pardon and recall. He then commanded with success against the Lacedæmonians; and having compelled them to sue for peace, was received at Athens in triumph. The defeat of the Athenian fleet, by Lysander, which took place in his absence, was unjustly attributed to Alcibiades, and he was deprived of his command. On this he retired into Thrace, and afterwards to a small town in Phrygia, where the house in which he resided was set fire to in the night, and when he attempted to escape, he was slain by arrows, B. C. 404.

ALCMAN, a Greek lyric poet, was a native of Sardis, and lived in the 7th century, B. C. He became a citizen of Sparta, wrote songs and choruses, especially love-songs of a too licentious character, and died of the same foul disease as Sulla, the fruit of his corrupt life. Some fragments of his poems are preserved.

ALCOCK, JOHN, successively bishop of Rochester, Worcester, and Ely, founder of Jesus college, Cambridge, and of the grammar school at Kingston-upon-Hull, was a prelate distinguished for his love of learning and of learned men. His temporal honours kept pace with his ecclesiastical dignities; Edward IV. conferring on him the presidency of Wales, and the chancellorship of England. Died, 1500.

ALCUIN, or FLACCUS ALBINUS ALCUINUS, a very celebrated scholar of the 8th century, and the friend of the Emperor Charlemagne, was born, probably at York, about 735. Early distinguished for his piety and learning, he was sent on a mission to Rome, and being introduced to Charlemagne while in Italy, settled on his invitation in France. He earnestly supported the plans of his great master for the restoration of learning, and founded schools at several of the principal cities. In 796 he was made abbot of Tours, quitted the court, and devoted himself to theology alone. His works, including a large number of highly interesting letters, were published by Froben, in 1777, in 2 vols. folio. Died, 804.

ALDEGHEF, a Westphalian, born in 1502, was both a painter and an engraver. His principal work is a large picture of the Nativity.

ALDINI, A., nephew of Galvani; born at Bologna in 1755; author of "Essai Théorique sur la Galvanisme;" and "Account of late Improvements in Galvanism," published in London.

ALDOBRANDINI, CLEMENT. [CLEMENT VIII.]

ALDRED, archbishop of York in the 11th century, was bishop of Worcester in the reign of Edward the Confessor, and was employed in important negotiations. In 1054 he was sent on an embassy to the Emperor Henry III.; four years later he made the pilgrimage to Jerusalem with great pomp; was made Archbishop of York soon after his return; crowned Harold II.; made

his submission to William the Conqueror at Berkhamstead; and the same year, 1066, crowned him at Westminster. Died, 1069.

ALDRICH, HENRY, born at Westminster, 1647, and educated by Dr Busby. From Westminster School he went to Christ Church, Oxford, and was elected student and afterwards canon and dean. He designed, it is said, the elegant chapel to Trinity College, and the beautiful church of All Saints. He had also great skill in music, and composed many services for the Church. Dean Aldrich wrote a System of Logic which was used in the university, and died 1710.

ALDRICH, ROBERT, bishop of Carlisle, was a native of Buckinghamshire, and was educated at Eton, of which college he subsequently became master and provost. In 1537, he was made bishop of Carlisle; a station for which his learning and piety, which are extolled by Leland, well fitted him. Died, 1555.

ALDROVANDUS, ULYSSES, an Italian naturalist, was born at Bologna in 1522. He became professor of Natural History at the university in 1560, and devoted his life and his fortune to the preparation of an immense work on his chosen study. He travelled, made large collections, and employed able artists to draw and engrave illustrations to his work, of which four volumes, folio, were published in his lifetime. He was generously aided in his labours by the senate of Bologna, who also provided for the publication of the posthumous volumes. This great work is invaluable as a treasury of facts. Died, 1607.

ALDUS MANUTIUS, or ALDO MANUZIO, a celebrated Italian printer and author of the 15th and 16th centuries, was born at Bassano, in 1447; became tutor to Alberto Pio, prince of Carpi; and in 1488 established a printing-office at Venice. He printed numerous valuable editions of Greek and Latin classics; compiled Greek and Latin dictionaries and grammars; and claimed to be the inventor of the Italic character, hence called *Aldine*, for the exclusive use of which, for a term of years, he obtained a patent. The real honour of this invention more probably belongs to the great painter Francia, sometimes called Francesco da Bologna, who certainly cut the types for Aldus, and was unjustly prohibited from cutting them for other printers. Died, 1515.—PAOLO MANUZIO, son of the preceding, distinguished as a classical scholar, no less than as a printer, was born at Venice in 1512, and died in 1574.—ALDO MANUZIO, the younger, was a son of Paolo, and equally celebrated with his father and grandfather. He was born in 1547, and died in 1597; and with him expired the glory of the Aldine press.

ALEANDER, JEROME, cardinal, born in 1480, distinguished himself in the 16th century as a violent opposer of Luther and the reformation. He died 1542. His great nephew, of the same name, inherited the ability of his ancestor, and was eminent as a scholar and an antiquary.

ALESIO, METTEO PEREZ D', a painter and engraver at Rome, whose figure of St Christopher, in fresco, in the great church in Seville, is much admired. Died, 1600.

ALESSI, GALEAZZO, architect, born at Perugia in 1500, whose works are spread over Germany and the south of Europe; but his fame principally rests on the monastery and church of the Escorial. Died, 1572.

ALEXANDER THE GREAT, king of Macedonia, was the son of Philip, by Olympias, daughter of Ncoptolemus, king of Epirus, and was born B. C. 356; the same year in which the temple of Diana at Ephesus was destroyed. Alexander received his education under Lysimachus and Aristotle, and gave several proofs of manly skill and courage while very young; one of which, the breaking-in of his fiery steed, Bucephalus, is mentioned by all his historians as an incident which convinced his father of his unconquerable spirit. Alexander was much attached to his mother, and sided with her in the disputes which led to her divorce from Philip. While the latter was making preparations for his grand expedition into Asia, he was assassinated by Pausanias; and Alexander succeeded to the throne in his 20th year. His youth at first excited an inclination in several of the states of Greece to throw off the yoke of the Macedonian usurpation; but the hero soon quelled the design, and was acknowledged general of Greece. He then marched into Thrace, and made several conquests. During his absence Thebes revolted; and when Alexander returned, he took that city by storm, made a dreadful carnage of the inhabitants, and destroyed all the buildings except the house of Pindar the poet. This severe example had its effect on the other states; and even Athens distinguished itself by a servile submission to the conqueror. Alexander next turned his arms against Darius, king of Persia; and, at 22, crossed the Hellespont, at the head of 35,000 men. With this force he defeated the Persians at the Granicus, and made himself master of numerous towns. At Gordium, where he assembled his army, he is said to have cut the famous knot on which the fate of Asia depended. Shortly after this, he again defeated the king of Persia near Issus, and took immense treasures and many prisoners; among whom were the mother, wife, and children of Darius. This victory was followed by the conquest of Phœnicia. Alexander next besieged Tyre, which resisted him successfully for seven months, and, in revenge, he committed horrible cruelties on the inhabitants. He then went, it is said, to Jerusalem, passed into Egypt, subdued it, and founded the city of Alexandria. Darius now collected another army, Alexander rapidly marched to meet him, and the great contest took place at Gaugamela. Darius was defeated and fled, Alexander pursuing him as far as Arbela, distant 50 miles from the field of battle. This great battle was followed by the capture of Susa and Persepolis; the palace of Persepolis Alexander is said to have destroyed at the instigation of his mis-

trous. After pursuing Darius into the deserts of Parthia, marching into Bactria against Bessus, whom he put to death, and completing the conquest of Sogdiana, he prepared for an expedition to India; and after a perilous march reached the Indus, B. C. 327, which he crossed probably at the point where the city of Attock now stands. Alexander received the submission of several of the petty princes of the country, but was opposed by Porus, who valiantly withstood him: and, although conquered and made prisoner, he was restored to his dominions. The conqueror next entered the fertile plains now called the Punjab, took the city of Sangala, penetrated as far as the Hyphasis, and was desirous of advancing still further; from which object, however, he was diverted by the rainy season, and the disaffection of his own troops. He accordingly erected twelve altars of an extraordinary size to mark the limits of his progress, remains of which are said to be still in existence. Alexander, therefore, retraced his steps to the Hydaspes, on the banks of which he had built two cities, Nicaea and Bucephala; and embarked with his light troops on board a fleet he had constructed, leaving the main army to march by land. After a severe contest with the Malli, in which he was wounded and his whole army nearly lost, he proceeded down the river to Patala; and having entered the Indian Ocean, and performed some rites in honour of Neptune, he left his fleet; giving orders to Nearchus, who had the command, to sail to the Persian Gulf, and thence up the Tigris to Mesopotamia. Alexander then prepared to march to Babylon, towards which capital he proceeded in triumphal progress. At Susa he gave his army rest, and carried out one part of his great scheme for the permanent union of the conquerors and the conquered by intermarriage. The nuptial festival lasted five days, and the example set by Alexander in marrying Statira, the daughter of Darius, was followed by about 80 of his generals, and 10,000 of his soldiers, who also took Asiatic wives. At Susa too took place the burning of the Indian philosopher Calanus on the funeral pile. Having quelled a mutiny in his army, and dismissed 10,000 veterans who wished to return home, Alexander continued his march. At length he reached Babylon, where he began to make preparations for future undertakings of great magnitude; when he was seized with an illness, the effect of which was probably aggravated by depression of spirits, and by intemperance, and died in the 13th year of his eventful reign, and the 33rd of his life, B. C. 323. When required to name his successor, he is said to have replied, "to the most worthy." Immediately before he died he gave his ring to Perdiccas. Pursuant to his own direction, his body was embalmed and conveyed to Alexandria.

ALEXANDER SEVERUS, Roman emperor, was born at Arce, in Phœnicia, in 205. He was made Cæsar in 211, and succeeded Elagabalus in the following year. The principal public event of his reign was the war with Artaxerxes, king of Persia,

over whom he gained a great victory in person, and on his return to Rome was honoured with a triumph. He next marched against the Germans, who had invaded Gaul; and, while there, a sedition broke out in his army, headed by Maximin, and the emperor and his mother were murdered, A. D. 235.

ALEXANDER III., Pope, succeeded Adrian IV. in 1159; was a pontiff of great ability, and deservedly popular with his subjects. A rival pope was chosen, who took the title of Victor IV., and Alexander retired into France. Three other anti-popes were elected in succession under the sanction of the Emperor Frederick Barbarossa; but Alexander was at last reconciled with Frederick, and acknowledged sole pope. Becket was supported by this pontiff, and was canonized by him. It was Alexander III. who also canonized St Bernard. Died at Rome, 1181.

ALEXANDER VI., BORGIA, Pope, was a Spaniard by birth, was created cardinal in 1455, at the age of 25, and in 1492 obtained by bribery his election to the papal chair, as successor to Innocent VIII. He was then living in adultery with Vanozza, a Roman lady, by whom he had several children, among them the too celebrated Lucretia, and the infamous Cæsar Borgia. He assumed to divide the Indies between the kings of Spain and Portugal; played a selfish and perfidious part in the wars of Italy and France, as well as in the government of his own states; and after a career marked by all kinds of excesses and crimes, died, not without suspicion of poison, in 1503.

ALEXANDER I., king of Scotland, son of Malcolm III., and Margaret, sister of Edgar Atheling, ascended the throne in 1107; and merited by the vigour and impetuosity of his character, the appellation of *The Fierce*. He vigorously suppressed several insurrections which broke out in his kingdom, and successfully withstood the attempts of the English Archbishops to exercise jurisdiction in Scotland. He married one of the illegitimate daughters of Henry I. of England. Died, 1124.

ALEXANDER II., son and successor of William the Lion, was raised to the throne of Scotland, 1214, being then in his 16th year. He aided the English barons against King John, but made peace with Henry III., whose sister Joan he married in 1221. He has the reputation of a singularly just and wise ruler. Died, 1249.

ALEXANDER III., son of the preceding, succeeded him 1249, when only eight years of age. He married Margaret, daughter of Henry III. of England, and lived upon terms of close friendship with his father-in-law, whom, in his wars with the barons, he assisted with 5000 men. In his reign Scotland was invaded by Haaco, king of Norway, but the invaders were defeated, peace was made, and Alexander gave his daughter in marriage to Eric the successor of Haaco. The rest of his reign was peaceful, and he carried on the plans of his father for the good administration of the laws. Alexander was accidentally killed in 1285.

ALEXANDER, of Paris, a Norman poet

of the 12th century, who wrote a metrical poem called "Alexander the Great," in verses of twelve syllables, which measure has ever since been called "Alexandrine."

ALEXANDER I., NEW-SKY, grand duke of Russia, born 1218. The most noted action of his life was the great victory obtained over the Swedes, the Danes, and the Teutonic Knights, on the banks of the Neva. He also freed Russia from the tribute imposed by the Mongol sovereigns. Alexander Newsky is one of the saints of the Russian Church, and an order of knighthood was founded in his name by Peter the Great. Died, 1264.

ALEXANDER, SOLOMON, bishop of Jerusalem, was born of Jewish parents in the grand duchy of Posen, 1799. Very little is known of his youth and education; but from his Hebraic and Talmudic acquirements he exercised the functions of Rabbi at a very early age. He was baptized in 1826, and his ordination by Dr Whately, and induction to a curacy in Ireland, shortly followed. He subsequently became a home missionary of the Society for the Propagation of Christianity among the Jews, and professor of Hebrew in King's College; and after the mission of Chevalier Bunsen to London for the establishment of a Protestant bishopric at Jerusalem, he was consecrated the first Protestant bishop of Jerusalem in 1841. Bishop Alexander was suddenly cut off during a journey to Cairo, on a mission of sympathy and good-will to the Egyptian Christians. Died, Nov. 23, 1845.

ALEXANDER, SIR WILLIAM, earl of Stirling, a Scottish poet of the 17th century. He was author of four plays, which he named "Monarchie Tragedies," and several poems; pompous, heavy, and now unreadable productions, which nevertheless brought him much praise, and "solid pudding" too. For he became a favourite of James I. and Charles I., received a grant of Nova Scotia to colonize; was made secretary of state for Scotland, and extraordinary lord of session; and obtained various other offices and privileges. Died, 1640.

ALEXANDER, WILLIAM, an ingenious artist, born at Maidstone, 1767. He came to London, and studied the fine arts with so much success, that he was selected to accompany the embassy of Lord Macartney to China. On his return, he published a splendid work on the costumes of China; and, on the formation of the Royal Military College at Marlow, he was appointed drawing-master. At the time of his death, in 1816, he was assistant keeper of the antiquities at the British Museum.

ALEXANDER I., emperor of Russia and king of Poland, eldest son of Paul I., was born Dec. 22, 1777; succeeded, March, 1801; and was crowned at Moscow, September following; when a ukase was published for diminishing taxes, liberating debtors, prohibiting prosecutions for the recovery of fines, discontinuing the mode of recruiting the army, and granting a free pardon to all deserters. In 1803, Alexander offered his mediation to effect a reconciliation between England and France; and in 1805, a con-

to a metrical "Great," in which measure "Alexandrine." The grand duke of noted action of obtained over the Teutonic the Neva. He bute imposed Alexander the Russian ighthood was er the Great.

of Russia and Paul I., was March, 1801; y, September published for debtors, pro- recovery of of recruiting pardon to all r offered his tion between 1805, a con-

vention was entered into between Russia, England, Austria, and Sweden, for the purpose of resisting the encroachments of the French on the territories of independent states. On the 2nd of December the battle of Austerlitz took place, at which Alexander appeared at the head of 50,000 men, but was defeated, and compelled to retreat to his dominions. Ere long, however, he again appeared on the theatre of war, but the scene of it was changed to Poland. On December 26, 1806, was fought the battle of Pultusk; and on the 7th and 8th of February, 1807, that of Eylau, neither of which engagements was decisive; but on the 14th of June the Russians were completely defeated at Friedland by Napoleon. The result of this victory was an interview between the two emperors, which led to the treaty of Tilsit. The seizure of the Danish fleet by the English occasioned a declaration of war from Russia against this country; but hostilities only extended to the cessation of trade between the two nations. A second meeting of the French and Russian sovereigns took place at Erfurt, Sept. 27, 1808; Buonaparte being anxious to secure the friendship of Alexander previously to his meditated subjugation of Spain. While the former was engaged in this undertaking, the latter made himself master of the Swedish province of Finland, in 1809. The interruption of commerce with England now began to be severely felt by Russia, and Alexander determined to throw off the French yoke. On the 23rd March, 1812, an imperial ukase was issued, ordering a levy of two men out of every 500 throughout the Russian empire, and all matters of dispute with Great Britain were pacifically arranged. The invasion of Russia which followed, though the most important event in the reign of Alexander, is not one in which he was so far personally concerned as to require a detailed relation here. On joining his army in Poland, February, 1813, Alexander published the famous manifesto, which served as the basis of the coalition of the other European powers against the French emperor. Germany, and then France, became the scene of hostilities; and the capture of Paris, April 30, 1814, was followed by the abdication of Buonaparte, and the restoration of the Bourbons. After the conclusion of peace, Alexander visited England, in company with the king of Prussia; and, on his return to his own dominions, he employed himself in ameliorating the internal condition of his empire. He obtained the duchy of Warsaw, and was recognized as king of Poland by the congress of Vienna. In November, 1815, he visited Warsaw, and there published a constitution for the new kingdom annexed to his empire. His death took place at Taganrog, in the Crimea, Dec. 1, 1825; and he was succeeded by his second brother, Nicholas, the eldest brother, Constantine, resigning to him the right of succession. Alexander was a sincere lover of peace; vigilant, brave, and active in war; tolerant in his religious principles; mild and amiable in private life, yet strict in the administration of public justice; a patron of literature and the arts; and though as a monarch, ambitious of power, yet recog-

nizing the spirit of the age, and frequently acting in accordance with liberal principles.

ALEXIS MICHAËLOVITSCH, czar of Russia, born in 1650; succeeded his father Michael in 1646; died, 1677. He was the father of Peter the Great, and the first Russian monarch who acted on the policy of a more intimate connexion with the other European states.

ALEXIS PETROVITSCH, only son of Peter the Great, born 1695. This unhappy prince opposed the new policy of his father, and expressed an unalterable attachment to the ancient barbarous usages and customs of his country; for which the czar resolved to disinherit him. Alexis fled to his brother-in-law, the emperor of Germany, and lay concealed for some time at Vienna, until his retreat was discovered by his father, before whom he was conducted as a criminal, and compelled formally to renounce the succession; after this he was tried by secret judges, and condemned to death, 1718. He was found dead in the prison.

ALEXIUS I., COMNENUS, emperor of the East, was the son of John Comnenus, and was born in 1048. He early distinguished himself as a soldier, and when his services to his predecessor, Botoniates, excited jealousy, he revolted and got himself proclaimed emperor in 1081. He took Constantinople and gave it up to pillage. He carried on war with the Turks, and with the famous Robert Guiscard with various fortune. In 1096 the Crusaders passed through his dominions, and the disorders which they caused made them enemies as formidable as the Turks, from whom Alexius had hoped they would deliver him. He made a treaty with them and hastened their advance into Asia; but misunderstanding and mutual dissatisfaction prevailed. Alexis died, 1118. His life was written by his daughter, Anna Comnena.

ALEXIUS II., COMNENUS, succeeded his father Michael on the throne of Constantinople, in 1180, when only twelve years of age; and, with his mother, was murdered two years afterwards by Andronicus, who usurped the crown.

ALEXIUS III., ANGELUS, emperor of the East, 1195, gained that station by the basest perfidy towards his brother, Isaac Angelus, whom he confined in prison, and caused his eyes to be put out. His effeminate reign rendered him despicable, and his capital was besieged and taken, 1203, by an army of Venetian and French crusaders, headed by his nephew, Alexius, son of Isaac. The usurper received the same punishment he had inflicted on his brother, and died a few years afterwards in a monastery at Nice; and the conqueror placed his blind father on the throne, with whom he reigned as Alexius IV.; but his elevation was succeeded by a rebellion, and he was deposed, imprisoned, and put to death, 1204.

ALEXIUS V., DUCAS, surnamed MURZUFFLE, from his black shaggy eyebrows, raised himself to the throne of the East, after the murder of Alexius IV. and his father, Isaac Angelus, but was deposed by the crusaders, who attacked and took his

capital, and he was put to an ignominious death.

ALFIERI, VITTORIO, the Italian dramatist, was born at Asti, in Piedmont, in 1749. He was placed in the college of Nobles at Turin, but appears to have made little progress in learning there. Leaving the college at 16 he led for some years a restless and dissipated life, travelling in Italy, France, England, Holland, and then through the countries of Northern Europe. A new epoch opened in his life in 1775, when he published his first drama, "Cleopatra," which was successful. Thenceforth he was a laborious student and dramatic author, composed fourteen tragedies in seven years, studied Latin, and even at the age of 48 made himself master of Greek. At Florence he met the countess of Albany, wife of Prince Charles Edward, on whose death he married her. Alfieri was at Paris when the revolution broke out, but after the 10th August, 1792, returned to Florence. He worked hard to the last, and died in 1803. His remains were interred in the church of Santa Croce, and a monument by Canova was erected to him. Among his tragedies are "Saul," "Philip II.," "Antigone," "Virginia," "Agamemnon," "Mary Stuart," &c. He wrote also several poems and prose treatises.

ALFORD, MICHAEL, an English Jesuit, born in London, 1582. He died at St Omer's, 1652, leaving behind him two celebrated works, "Britannia Illustrata" and "Annales Ecclesiastici et Civiles Britannorum."

ALFRED THE GREAT. This monarch was the youngest son of Ethelwolf, king of the West Saxons, and was born at Wantage, Berks, in 849. He was sent to Rome when five years old, and three years later went again with his father and stayed a year. On the death of his brother Ethelred, Alfred succeeded to the throne of England, 871, in his 22nd year, at a time when his kingdom was a prey to domestic dissensions, and to the invasions of the Danes, whom he engaged at Wilton and in several other battles during the first year of his reign, but was forced to conclude a treaty on disadvantageous terms. The Danes, however, continued to overrun the country, and conquered Mercia and Northumbria. Alfred defeated them at sea, in 875, again made peace with them in the following year, and in 877 recovered Exeter from them. Soon afterwards he retired to the island of Athelney, and there received information that one of his chiefs had obtained a great victory over the Danes, and taken their magical standard. Alfred is said to have disguised himself as a harper, entered the Danish camp, and gained knowledge of the state of the enemy. Quitting his retreat he besieged the Danes at Ethenandune (Edington) and completely defeated them. Yet the terms of peace included the cession to them of a large part of the kingdom, and prepared the way for the enterprise of Canute. The king Guthrun and his followers professed themselves Christians, and were baptized. Alfred now put his kingdom into a state of defence, increased his navy, and brought London into a flourishing state; but, after a rest of some years, an immense number of Northmen, under the

leadership of Hasting, landed in Kent, and fortified themselves at Appledore and Milton; they were, however, defeated by Alfred, at Farnham, Bemfleet, and Buttington. Thus he secured the peace of his dominions, and struck terror into his enemies, after 56 battles by sea and land, in all of which he was personally engaged. But the warlike exploits of Alfred formed, perhaps, the least of the services he rendered his country. He was so exact in his government, that robbery was unheard of. His great council, consisting of bishops, earls, aldermen, and thanes, was called together twice a year in London, Oxford, or Gloucester, for the better government of the realm. The state of learning in his time was so low, that, from the Thames to the Humber, scarcely a man could be found who understood the service of the church, or could translate a sentence of Latin into English. To remedy this evil, he invited men of learning from all quarters, and placed them at the head of schools in various parts of his kingdom. The laws published by Alfred were chiefly selections from those previously existing, those of Ethelbert, Ina, and Offa. Alfred himself wrote several works, and translated others from the Latin, particularly the General History of Orosius and Boethius's "Consolations of Philosophy." He divided the twenty-four hours into three equal parts, one devoted to the service of God, another to public affairs, and the third to rest and refreshment; his revenue, also, was divided into two equal moieties, one dedicated to sacred, the other to civil uses. To Alfred, England is indebted for the foundation of her fleet. To crown his great public character, Alfred is described as one of the most amiable men in private life; of a temper serene and cheerful, affable, kind, and not averse to society or to innocent recreation; he was also personally well-favoured, possessing a handsome and vigorous form, and a dignified and engaging aspect. Died, October, 901, and was buried at Winchester. We conclude our notice of this great man in the words of Sir James Mackintosh. "Although it be an infirmity of every nation to ascribe their institutions to the contrivance of a man rather than to the slow action of time and circumstances, yet the selection of Alfred by the English people, as the founder of all that was dear to them, is surely the strongest proof of the deep impression left on the minds of all of his transcendent wisdom and virtue."

ALGARBI, ALESSANDRO, a Bolognese sculptor of the 17th century. He studied painting at first under the Caracci, but abandoned it for sculpture. The first work by which he distinguished himself was his monument to San Filippo Neri. The most famous of his works are his Attila and St Leo, the largest alto-relievo existing, his monument of Leo XI, and his group of the beheading of St Paul. The former two are in St Peter's at Rome, the latter at Bologna. Died, 1654.

Great, who delighted in his society, and maintained friendly relations with him till his death. Algarotti wrote "Newtonianism for Ladies," "Letters on Russia," "Letters on Painting," and many other works on a great variety of subjects; but they are now forgotten. Died, 1764.

ALHAZEN, an Arabian mathematician, who was the first that showed the importance of refraction in astronomy. He died at Cairo, in 1038.

ALI, cousin, son-in-law, and vizier of Mohammed, and one of the main pillars of the new faith. He obtained the name of the *Lion of God, always Victorious*; but was opposed in his succession to the caliphate by Omar and Othman, and retired into Arabia, and made a collection of the sayings of the prophet. There he laid the foundation of a new sect, and, after the death of Othman, he was declared caliph, 655; but was murdered four years afterwards in the mosque.

ALI, vizier, nabob of Oude, was the adopted son of the former nabob of Oude, Yusuf al Dowlah, who declared him successor. The English government, however, deposed him in favour of the brother of Yusuf, but settled on him a pension of £25,000. While engaged with the agents of the East India Company, who had been sent to meet him at Benares for the purpose of making arrangements for his future residence, he gave a signal, on which his armed followers rushed in and treacherously murdered the Company's officers. For a time he made his escape, but surrendered on condition that his life should be spared. Died in prison, 1817, aged only 36.

ALI BEG, a man of extraordinary learning and attainments, born in Poland, of Christian parents, but was kidnapped in his infancy by a horde of Tartars, who sold him to the Turks, in whose language and religion he was educated. His skill in languages procured him the post of chief interpreter to the grand signior; while his leisure hours were employed in translating the Bible and the catechism of the Church of England into the Turkish language. The work by which he is principally known to Europeans is an account of the religious ceremonies, &c., of the Turks. Died, 1675.

ALI BEY. [BADIA, DOMINGO.]

ALI BEY, a Greek, son of a Natolian priest, born, 1728. He fell when a child into the hands of robbers, who carried him to Cairo, and sold him to Ibrahim, lieutenant of the Janissaries, who reared and adopted him. Ali soon rose to the rank of sangiak, or member of the council; and when his patron was assassinated by Ibrahim the Circassian, he avenged his death, and slew the murderer with his own hand. This action raised him numerous enemies, and he was obliged to fly to Jerusalem, and thence to Acre: but in time he was recalled by the people, and, being placed at the head of the government, Egypt began to recover its former splendour. In a battle fought against the troops of a rebellious Mameluke Ali was cut down, after defending himself with desperate valour, and died of his wounds eight days afterwards, 1773.

ALI PACHA (or, more correctly, ALI,

pacha of Jannina), a bold, intelligent, and crafty Albanian, was born at Tepelina, in 1741. His father, an Albanian chief, died of grief, in consequence of being stripped of his territories; but his mother, who was remarkable for energy of character, spirited up her son to assume the conduct of a predatory troop of his countrymen. With this band he committed so many depredations, that the adjacent tribes took up arms in their own defence, and carried off his mother and sister, whom they treated with great cruelty. This roused the naturally implacable temper of Ali, and he vowed the extermination of the whole race. He raised a body of 2000 men, assumed great authority, and wreaked his vengeance upon the Sullotes, whom he treated with the most horrible barbarity. During fifty years of constant warfare he brought under his sway a wide extent of territory, which the Porte sanctioned his holding, with the title of pacha. He received agents from foreign powers, and ultimately intrigued with England, France, and Russia. But the jealousy of the Porte was at length excited, and Hassan Pacha was sent to demand his head. On declaring his errand, Ali replied, "My head is not to be delivered up so easily;" accompanying the words with a pistol-ball, which broke his opponent's thigh. He shot two more dead upon the spot, but fell the same moment. His head was severed from his body, and sent to Constantinople, 1822.

ALISON, ARCHIBALD, miscellaneous writer, was born 1757. Educated at Glasgow and Oxford, he entered into holy orders, and obtained successively livings in Durham and at Edinburgh, his native town, where he continued to officiate till 1831, when a severe illness compelled him to relinquish all public duties. Mr Alison was one of the first members of the Royal Society of Edinburgh; and he was intimately associated with most of the men of genius and learning of the present century. His "Essay on the Nature and Principles of Taste" passed through numerous editions, but having no solid worth its popularity was very short-lived. Died, 1839.

ALKMER, HENRIK VAN, the reputed author of the first German version of the world-renowned apologue of "Reynard the Fox." It is written in Low German, and was printed at Lubeck in 1498. Its title is "Reineke de Vos." For a full account of this work, and of the controversy respecting its authorship, see Carlyle's *Essay on Early German Literature*, *Essays*, vol. ii. p. 298, *seq.*

ALLAN, DAVID, a Scottish portrait and historical painter, born at Alloa, 1744. He studied at Rome, and painted there several pictures, which gained him some reputation. He drew and engraved illustrations to Ramsay's poem the "Gentle Shepherd," which became popular. He has been called, very unreasonably, the Scottish Hogarth. There are several engravings from his pictures. Died, 1796.

ALLAN, GEORGE, F. A. S., son of the above, M. P. for the city of Durham, and a principal contributor to Nicholls's *Literary Anecdotes*. Born, 1768; died, 1828.

ALLAN, SIR WILLIAM, an eminent historical painter, was born in Edinburgh in 1782. Of humble parentage, he at an early age showed a decided predilection for art; and, when still a young man, he pursued his favourite study with equal enterprise and ability, visiting Morocco, Greece, and Spain, and penetrating the remote and semi-barbarous territories of Russia and Turkey, that he might familiarize himself with the rude and picturesque aspects of human life there presented. "The Polish Captives," "The Slave Market at Constantinople," and various kindred subjects, testify to his skill in this department of art, but he did much also to illustrate the historic lore of his own land, as his vivid representation of Mary and Itizio, the Murder of Archbishop Sharpe, and the Battle of Waterloo, amply testify. He was an old and attached friend of Sir Walter Scott; and his amiable, unassuming manners, and his vast fund of anecdote, procured him general love and esteem. He was elected R. A. in 1835. In 1841 he succeeded Sir D. Wilkie as president of the Royal Scottish Academy, and was soon afterwards knighted. Died, 1850.

ALLARD, JEAN FRANÇOIS, a French general officer, much distinguished during the Empire. On the final downfall of Napoleon, he entered, successively, the Egyptian and the Persian services, and at length became the confidential adviser of Runjeet-Singh, whose troops he disciplined in the European manner. Born, 1785; died, 1839.

ALLATIUS, LEO, a Greek physician and man of letters, librarian of the Vatican at Rome, and professor in the Greek college there. Died, 1669, aged 83.

ALLEGRAIN, CHRISTOPHER GABRIEL, an eminent French sculptor. Died, 1795.

ALLEIN, JOSEPH, noneconformist minister, known chiefly as the author of "An Alarm to Unconverted Sinners," which has gone through numerous editions. Born in 1623, at Devezes; died at Bath, 1688.

ALLEN, JOHN, M. D., a distinguished writer on historical subjects, was born at Redford, his father's estate, near Edinburgh, in 1771. He studied at Edinburgh, and took his degree in medicine in 1792. But his predilection for politics soon withdrew him from his medical pursuits; and he early connected himself with the movements for Parliamentary Reform, which commenced in Scotland at the outbreak of the French Revolution. In 1802, having been recommended to Lord Holland as a medical friend and companion, he accompanied the noble lord and his family on successive tours through France, Italy, and Spain; and the similarity of their tastes and opinions led to a lasting friendship between them, which death alone interrupted. On his return from the continent, he devoted himself to literary pursuits. The extent and variety of his attainments are shown in his numerous contributions to the Edinburgh Review, chiefly on subjects connected with the British constitution, and with French and Spanish history. But the most lasting monument to his literary fame is his valuable work called an "Inquiry into the Rise and Growth of the Royal Prerogative," of

which a second edition was published after his death. In 1811 he became warden, and in 1820 master, of Dulwich College; but he continued to reside chiefly at Holland House, where the manliness, sincerity, and independence of his character, his kindly nature and extensive information, gained him the esteem of all who were admitted to that "Temple of Wit" and hospitality. Died, April 10, 1843.

ALLEN, THOMAS, an eminent scholar in the reign of Elizabeth, considered the first mathematician of his day. Born, 1542; died, 1632.

ALLEYN, EDWARD, a celebrated actor in the reigns of Elizabeth and James, and founder of Dulwich College, was born in London, 1566. He was the first master of his own college, and, dying in 1626, was buried in its chapel.

ALLIX, PETER, a learned divine, born at Alençon in France, 1631, was minister of the Reformed Church at Rouen and Charenton. On the repeal of the Edict of Nantes, he came to England, was created D.D. at Oxford, and made treasurer of the church at Salisbury. Died in London, 1717.

ALLORI, ALESSANDRU, Florentine painter, born, 1535. He was the nephew and pupil of Angelo Bronzino, and distinguished himself as one of the anatomical imitators of Michael Angelo. He died in 1607.

ALLORI, CRISTOFORO, called also BRONZINO, the son of the above, was also an eminent painter, chiefly distinguished for his portraits and landscapes. Died, 1621.

ALLSTON, WASHINGTON, an American painter, born in 1779. At the age of 22 he visited England, and studied for several years at the Royal Academy. After a short visit to Paris he studied at Rome, and did not return to America till 1809. He gained the friendship of many eminent men in England and France, among others, S. T. Coleridge, Leslie the painter, Lord Morpeth, and M. de Tocqueville. He was chosen A.R.A. in 1819. He was author of "Hints to Young Practitioners on the Study of Landscape Painting." Died, 1843.

ALMAGRO, DIEGO D', a Spaniard of low origin, who accompanied Pizarro in the expedition against Peru, in which his valour, profligacy, and cruelty were equally displayed. In 1525, he took Cuzco, the capital of Chili, by storm, and put Atahualpa, the last of the Incas, to a most cruel death; but quarrelling with the brothers of Pizarro about the division of their spoil, a schism ensued, and Almagro was eventually taken prisoner and strangled, 1538.

ALMAMUN, or ABDALLAH, caliph of Baghdad, son of Haroun al Raschid, born, 786, succeeded his brother Al Amin, 814, and died, 833. The reign of this caliph forms a very brilliant epoch in the history of the Saracens. Its glory was less of arms than of letters and arts. Almamun, who has been compared to Augustus, Leo X., and Louis XIV., promoted literature and science by founding universities and colleges, collecting learned men at his court, procuring the works of Greek philosophers and poets, and having translations made of them, and directing the compilation of valuable Astro-

ALMANSUR, ABU GIAFAR, second caliph of the dynasty of the Abbasides, succeeded his brother Abul Abbas in A. D. 754. He made war on his uncle Abdallah, who claimed the caliphate, but was defeated by Abu Moslem, general of Almansur. The victorious general, who was enormously rich and haughty, was soon after murdered by order of his sovereign. In 762 Almansur, having destroyed the cities of Ctesiphon and Seleucia on the Tigris, founded Baghdad and made it the seat of the caliphate. Two years later he got Abdallah treacherously into his power, and had him murdered. Died near Mecca, 775. Abu Giafar was the first caliph who promoted literature, and thus led the way to the glorious reigns of Harun Al-raschid and Al-mamun.

ALMANSUR, AHU MOHAMMED, regent of the kingdom of Cordova, and one of the most famous captains of his age, was born in Andalusia about A. D. 939. He was educated at Cordova, and soon distinguished himself as a brave soldier, acquiring thus his surname Almansur, the Victorious. His talents raised him to the dignity of grand chamberlain to Al Hakem II., on whose death, 976, he was appointed guardian to the infant caliph and regent of the kingdom of Cordova. He was virtually absolute sovereign for 23 years, was continually engaged in war, and though he undertook above 50 expeditions against the Christian princes of Spain, was only once defeated. He defeated Bermuda, king of Leon, and took Simancas; won a victory over Borel, count of Barcelona, and burnt his capital; took Sepulveda and Zamora; completed the conquest of Castille by a great victory over Count Garcia, and that of Leon by the storming of the capital after a long siege; invaded Portugal and took Coimbra, Braga, and other cities; entered Galicia, took Compostella, and pillaged the famous church of Sant-Iago, and appeared on the point of becoming master of all Spain, when the kings of Leon and Navarre and the count of Castille combined against him, and totally defeated him at the great battle of Calatanazor, A. D. 998. The chagrin which he experienced at this his first personal defeat is said to have caused his death soon after. Almansur was distinguished as the patron of letters, arts, and sciences.

ALMANSUR II., JACOB, caliph of the Almohades, and the greatest prince of that dynasty, succeeded his father Joseph on the throne of North Africa and Mohammedan Spain in 1184. He led back the army from Portugal into Africa, and was for several years occupied in suppressing revolts among his subjects. In 1194 he led his army back to Spain, and gained in the following year the memorable victory of Alarcos over Alfonso III., king of Castille. He took several cities, and erected some fine monuments at Seville and other places. On his return to Africa he tarnished his reputation by an act of perfidy towards the governor of Morocco,

and soon after retired from the government and died in obscurity in 1199.

ALMEIDA, FRANCISCO, appointed, in 1505, the first Portuguese viceroy of India. His government of the colonies was firm and wise, and he successfully opposed the sultan of Egypt and other enemies of the Portuguese power in India. When Albuquerque was sent out to supersede him, Almeida resisted and imprisoned him; but after a few months released him, resigned his viceroyalty, and embarked for Portugal. He was killed on his return in a quarrel with the natives at the Cape, in 1509.

ALMEIDA, LORENZO, son of Francisco, was also an enterprising commander and navigator, and distinguished himself by many expeditions in the Indian seas. Ceylon was by him made tributary to Portugal. Lorenzo lost his life in an engagement with the Egyptian fleet in the bay of Canhaya.

ALOMPRA, the founder of the Burman empire, a man of obscure birth, but who raised himself to independence and sovereign power, and established a new dynasty about the middle of the 18th century.

ALOYSIUS GONZAGA, St. Jesuit, born at Castiglione in 1568, was taken by his father to the court of Spain, but quitted it, and entered the Society of Jesus. He died of the pestilence which desolated Rome in 1591. Thirty years after his death he was beatified by Gregory XV., and was canonized by Benedict XIII. in 1726.

ALP-ARSLAN, sultan of the Seljukide Turks, was born about 1030, became governor of Khorassan, and succeeded his uncle, Togrul Beg, in 1063. He had for his grand vizier Nizam-al-Mulk, who by his wise administration did so much for the interior improvement of the empire. Alp-Arslan distinguished himself as a conqueror, and after great successes, made war on the emperor of the East. After being several times defeated by Romanus, he at last took him prisoner in 1071. In the following year he invaded Turkestan, but was assassinated by the governor of the fort of Berzen, which he had just taken. Died, 1072.

ALPHONSO I., HENRIQUEZ, first king of Portugal, succeeded his father, Henry of Burgundy, as count of Portugal in 1112, his mother Theresa for some years sharing the sovereignty. He carried on war with the king of Castille, and next with the Moors, and in 1139 he obtained a great victory over five Moorish kings. Soon after this victory he was proclaimed king by the army, a title which was confirmed by the states, who at the same time settled the law of succession. War being renewed with the Moors, Alphonso took Lisbon from them, with the aid of a body of crusaders, about 1148, and made it the capital of his kingdom. He was unsuccessful in his attempts on Leon and Estremadura. In 1184 he took part with Sancho, his son, in the relief of Santarem, then besieged by the Moors, from whom he had taken it about 40 years before. Died, 1185.

ALPHONSO III., the Great, king of Oviedo, succeeded his father Ordogno at the age of 18, in 866. He was engaged in almost constant warfare with the Moors, and gained

a great many victories over them. He acquired part of Portugal and of Old Castille, suppressed the frequent revolts of his own subjects, especially one headed by Garcia, his eldest son, and in 910 abdicated the crown. He afterwards made war on the Moors, whom he defeated, and died at Zamora, 912.

ALPHONSO IV., surnamed the Brave, king of Portugal, was the son of King Denis, the Liberal, whom he succeeded, 1325. He was an able sovereign and a brave soldier. He distinguished himself in the wars against the Moors, especially at the great battle of Salado, fought in 1340. His memory is stained by his unjust treatment of his natural brother, and his cruel murder of Inez de Castro, whom his son Pedro had married against his father's will. Alphonso reigned 32 years, and died, 1357.

ALPHONSO V., surnamed the Magnanimous, king of Arragon, born, 1341; succeeded his father, Ferdinand the Just, 1410, as king of Arragon and Sicily, and subsequently, on the death of Joanna, queen of Naples, obtained the crown of Naples. His claim was however resisted for several years by René of Anjou. Alphonso died at Naples, 1458, leaving his Neapolitan dominions to his natural son Ferdinand, and those of Spain, Sardinia, and Sicily to his brother Juan, king of Navarre. This monarch was accounted the most accomplished prince of his time: he gave shelter to the Greek literature expelled from Constantinople, and was in other respects a great patron of learning.

ALPHONSO X., surnamed the Wise and the Astronomer, king of Castille and Leon, was born in 1221, and succeeded his father, Ferdinand III., in 1252. He gained many victories over the Moors, was a competitor in 1257 with Richard, earl of Cornwall, for the imperial dignity, and, though unsuccessful, assumed the title of emperor, which he was compelled to renounce in 1274, in favour of Rudolph of Hapsburg; entertained Edward, Prince of Wales, and gave him in marriage his half-sister Eleanor in 1254; distinguished himself by his love of science, and had the famous Alphonsine Tables prepared; published the collection of Laws called "Las Siete Partidas;" ordered the use of the vulgar tongue in public acts; and had a translation of the Bible published. These services he rendered to his country, notwithstanding that so large a part of his reign was troubled by wars with the Moors, revolts of his subjects, and civil wars respecting the succession. Died, 1284.

ALPINI, PROSPERO, a Venetian physician, born, 1552, and died, 1617. He was the greatest botanist of his day, the first who explained the generation of plants by the sexual system, and is the author of many valuable works on his favourite pursuit.

ALSTON, CHARLES, an eminent Scotch physician and botanist; author of "Tirocinium Botanicum Edinburgense," &c.; and public lecturer at Edinburgh. Born, 1683; died, 1760.

ALSTROEMER, JONAS, a distinguished Swede, born of poor parents in West Gothland, in 1685. After struggling with poverty for a long time, he visited London, and pay-

ing particular attention to the commercial and manufacturing sources of British prosperity, he returned to Sweden in 1723, resolving to carry the plans he had formed into execution. Having obtained a license to establish manufactures in the town in which he was born, it soon became the seat of industry and activity, which afforded an example to the whole kingdom. He established a sugar house at Gottenburg, and traded to the Indies and the Levant; improved rural economy; cultivated plants proper for dyeing; and improved the wool trade by importing sheep from Spain and England, and the goat from Angora. For these important benefits Alstroemer received a patent of nobility, was made Knight of the Polar Star, and honoured with the title of Chancellor of Commerce; the Academy of Sciences chose him a member, and the national states decreed him a statue, to be erected to his memory on the exchange of Stockholm. Died, 1761.

ALTDORFER, or **ALTORF, ALBERT**, Bavarian painter and engraver. He was a native of Altdorf, but settled in early life at Ratisbon (Regensburg). One of the most remarkable of his paintings is the Battle of Arbel, now in the Picture Gallery at Munich. As an engraver on wood Altdorfer almost rivals Albert Dürer. He executed also many engravings on metal. Born, 1488; died, 1538.

ALTEN, General CHARLES, count, a brave and experienced officer, was born at Wilkenburg, at Hanover, in 1764, and in 1781 received his commission as ensign in the foot-guards of the electorate. After taking part in the operations of 1793, against the revolutionary troops of France, he was made colonel of the king's German legion in 1803, and from that time till the end of the war he was almost constantly on service. He was at the taking of Copenhagen, and afterwards served under Sir John Moore as a brigadier-general in the fatiguing and arduous duties of the disastrous campaign which ended in the battle of Corunna. At Walcharen also, and at the siege of Flushing, he distinguished himself; and on his return to England, in 1810, he was promoted to the rank of major-general, and placed in command of the south-west district. From this station, however, he was speedily removed, his brigade being destined for the operations of the Peninsula, where he served under Marshal Beresford at the first siege of Badajoz, and at Albuera. In 1812, Wellington placed him at the head of the light division, which he commanded in the general actions of Salamanca, Vittoria, Pyrenees, Nivelle, Nive, Orthes, and Toulouse. Like that of many of his brave compeers, his active duty closed with the battle of Waterloo; and his services at the head of the third division, during the memorable 16th, 17th, and 18th of June, will ever be classed among the most devoted and glorious on military record. He was now created a count; and when recovered from the dangerous wounds he had received, he took the command of the Hanoverian troops forming part of the army of occupation in France. In 1831, Count Alten was nominated one of the ministers of state,

ALURED, an ancient English historian,
who flourished in the beginning of the 12th
century. His annals comprise the history of
the Britons, Saxons, and Normans, down to
his own time, 1129.

ALVA, or ALBA, FERDINAND ALVAREZ DE
TOLEDO, duke of, the greatest general of his
age and the cruel governor of the Netherlands
under Philip II. of Spain, was born in 1508.
He was present at the battle of Pavia, at the
siege of Tunis, and at the attack on Algiers.
He defeated and made prisoner the elector
of Saxony at the battle of Mühlberg, in 1547,
and assisted at the siege of Metz. In 1555 he
was sent, with the title of vicar-general of
the dominions of Austria in Italy, to oppose
the French there, and to invade the states of
the Church. But he was compelled to make
peace and beg the Pope's pardon. The duke
of Alva took part in the conference of Bay-
onne between the queen of Spain and Charles
IX. of France, and Catherine de Medicis, re-
specting the destruction of the Huguenots
in France. He is, however, chiefly notorious
for the merciless rigour with which he exer-
cised his dictatorial power in the Nether-
lands, where he was sent, in 1567, to carry
out the plans of Philip II. Alarm drove many
thousands out of the country, the prince of
Orange became head of the patriots, and
civil war broke out. Counts Egmont and
Horn were beheaded, a "Council of the Tum-
ults" was established, cities were fortified,
and prisons crammed with victims. Alva's
enormous pride was shown in the erection of
a statue of himself in the citadel of Antwerp,
with nobles and people at his feet, and a
lying, insulting inscription to his praise.
His fortune changed, and by his own wish he
was recalled in 1573. Under his rule 18,000
persons had been sent to the scaffold, and a
revolt was provoked which only ended, after
nearly 40 years of war, in the independence
of the United Provinces. After a temporary
disgrace and exile, Alva was called to com-
mand in Portugal, and rapidly conquered it.
It is said that in 60 years of warfare he was
never beaten nor surprised. Died at Lisbon,
1582.

ALVARADO, PEDRO, one of the Spanish
conquerors of Mexico. He was born at
Badajoz; accompanied Grijalva to Central
America in 1518, and in the following year
took part in the expedition of Cortez. He
was present at all the battles of the cam-
paign, and greatly contributed to its success.
He enjoyed the confidence of Cortez, and
was charged with the command of the city
of Mexico and the care of Montezuma during
the absence of his chief. A severe conflict
occurred on that occasion between the Span-
iards and the citizens, but it is uncertain
which side was at fault. Alvarado was rest-
less and enterprising, subdued Guatemala
and other provinces, was made governor of
Guatemala, and afterwards of Honduras, led
an expedition across the Andes to Quito, and
met Almagro, the general of Pizarro, at Rio-
bamba, where instead of fighting, they made
terms, and Alvarado returned. He explored

California, and was killed soon after his re-
turn in an expedition against the Indians of
Xalisco, in 1531.

ALVARADO, ALFRONSO D', a Spanish
adventurer, who accompanied Pizarro in his
expedition to Peru; and who was equally
distinguished for his bravery and his cruelty.
Died, 1553.

ALVAREZ DE LUNA, a Spanish states-
man, the favourite and first minister of John
II., king of Castille. He was born about 1388,
held the office of chamberlain more than 40
years, was named constable in 1423, and ex-
ercised a complete ascendancy over the mind
of the king. Jealousy of his power led to
the formation of plots against him, and on
two occasions he was exiled, but was soon
recalled. The king at last, instigated by his
young queen, consented to the arrest and
trial of his minister, who was convicted and
beheaded at Valladolid in 1453.

ALVAREZ, FRANCISCO, a Portuguese di-
vino, born at Coimbra towards the end of the
15th century, and died, probably 1540, leaving
behind him in Portuguese an account of his
embassy to David, king of Abyssinia, and a
description of Ethiopian manners and cus-
toms, which had the merit of being the first,
but not that of being an accurate account of
Abyssinia, by a European.

ALVAREZ, MANOEL, a Spanish sculptor,
born in 1727. He studied at Salamanca, his
native place, and afterwards at Madrid, exe-
cuted many works in those cities, at Toledo,
Saragossa, &c., became director of the Aca-
demy and sculptor to the king, and died in
1797.

ALVAREZ, DON JOSÉ, one of the most
eminent sculptors of the 19th century, was
born near Cordova, in Spain, 1768. Patronised
by Charles IV., he proceeded to Paris in
1799, with a view of prosecuting his studies;
and he soon gained himself a name in the
French metropolises. Napoleon presented
him with a gold medal; but his subsequent
conduct towards Spain inspired the artist
with such aversion for him, that he would
never model his bust; and he afterwards was
imprisoned for refusing to take the oath of
allegiance to Joseph Buonaparte, when pro-
claimed king of Spain. Many of his best
works are at Madrid. Died, 1827.

ALVENSLEBEN, PHILIPP KARL, count
of, son of a counsellor of war at Hanover, was
a distinguished diplomatist, in the service of
Frederic the Great and his successor. After
being employed for many years as diplomatic
agent between the court of Prussia and the
electoral court of Bavaria, he was sent am-
bassador to France, to Holland, and, in 1789,
to England. The following year he was re-
called to Berlin, and was placed at the head
of the department for foreign affairs. The
count wrote an account of the war from the
Peace of Munster to that of Ilubertsbourg.
Born, 1745; died, 1802.

ALVIANO, BARTOLOMEO, an eminent
Venetian general, whose exertions against
the emperor Maximilian, in 1508, ensured the
republic to decree him triumphal honours.
In the siege of Padua by the emperor, and
at the battles of La Motte and Marignano,
Alviano displayed the most heroic qualities.
His death was occasioned by excessive fa-

ligue while laying siege to Brescia. Born, 1435; died, 1515.

ALYPIUS, bishop of Tagasta, Africa, and the friend of St Augustine, with whom he was baptized at Milan, in 389. He opposed the Donatists and Pelagians with great zeal; and died after 430.

AMADEUS V., count of Savoy, succeeded to the sovereignty of that state, 1285, to the exclusion of his nephew Philip, the lawful heir. He carried on wars with several of the neighbouring states successfully, but when Philip reclaimed the sovereignty he was compelled to treat with him. Through the mediation of Edward I. of England, a division of the duchy was made between the two claimants. Amadeus afterwards took part in most of the wars and negotiations of France. He acquired the surname of Great from his wisdom and success, and, after a reign of 38 years, died at Avignon, 1323.

AMADEUS VIII., the Peaceful, count and first duke of Savoy, was born in 1383, succeeded his father, Amadeus VII., in 1391, extended his dominions, and received the title of Duke from the emperor Sigismund in 1417. He lost his duchess in 1428, and six years later he retired to the priory of Ripaille, which he had founded, resigned the sovereignty, and led an easy, and some say a voluptuous, life, in company with several of his friends. On the deposition of Pope Eugenius IV., Amadeus was chosen to succeed him, and took the name of Felix V. The schism thus caused lasted ten years, and ended with the second retirement of Amadeus in 1440. Died at Geneva, 1451.

AMADEUS IX., the Blessed, duke of Savoy, was born in 1435, and succeeded his father Louis in 1465. He was feeble in health and in mind, and the regency was intrusted to his duchess Yolande, daughter of Charles VII. of France. A civil war took place, and the duchess was imprisoned, but she was restored to the government. Amadeus was famed for his benevolence and care for the poor. Died, 1472.

AMALASONTIA, regent and queen of Italy, was the daughter of Theodoric the Great, and the niece of Clovis. She was distinguished for her beauty, energy of character, and accomplishments. On the death of Theodoric she became regent and guardian of her son Athalaric, whose education she carefully conducted. Impatient of restraint, he broke away from her, and indulging in sensual pleasures, died at sixteen. She then shared the crown with her cousin Theodatus, and was murdered by him in 535.

AMARA-SINGHA, a Hindoo author of a dictionary or vocabulary, in verse, of the Sanserit language. An entire manuscript copy is in the royal library at Paris. An edition of this work was published, with notes, by Colebrooke, in 1808. The age in which the author lived is quite unknown.

AMATI, ANDREA and NICCOLO, brothers, were celebrated violin-makers, and lived at Cremona, about 1550. They were employed by Charles IX. of France. Several others of the same family distinguished themselves in the same way.

AMATUS, a Portuguese Jew, born, 1511, at Castel Iliauco. He studied medicine with

success at the university of Salamanca, and afterwards gave lectures at Ferrara, Ancona, and other places. For many years he concealed his religion, but at length falling under the suspicion of the Inquisition, he escaped to Thessalonica, and there avowed himself a Jew. He attended Pope Julius III. on several occasions. He published two medical treatises, which were long held in great estimation.

AMAURY I., king of Jerusalem, succeeded his brother, Baldwin III., in 1162. He was chiefly engaged in wars with the Saracens, from whom he endeavoured to take Egypt. In 1168, in violation of a treaty with the caliph, he invaded Egypt, took Helheis, and threatened Cairo; but the destruction of the fleet, sent to his aid by the emperor of the East, compelled him to return. He soon after renewed the invasion, and unsuccessfully besieged Damietta. Saladin in his turn invaded the kingdom of Jerusalem, and took Gaza. Died, 1173.

AMBERGER, CHRISTOPH, a painter of Nürnberg in the 16th century, was a disciple of Hans Holbein. His principal work is the history of Joseph, in twelve pictures. Amberger was called to Augsburg in 1530 by Charles V., who highly esteemed him, and there it is supposed that he died, between 1560—1570.

AMBOISE, GEORGE D', a French cardinal and minister of state, born of a noble family, 1460. He became successively bishop of Montauban, archbishop of Narbonne, and of Rouen. Louis XII. made him prime minister, and he soon acquired great popularity by taking off the taxes which had been usually levied on the people at the accession of every new monarch. The king, by his advice, undertook the conquest of the Milanese, in which he succeeded. Soon after this, he was appointed the pope's legate in France, with the dignity of cardinal, and in that capacity effected a great reform among the religious orders. He died in 1510.

AMBOISE, AMERY D', a famous French admiral, and brother of the above, who gained a splendid victory over the sultan of Egypt, in 1516.

AMBROGIO, TESEO, one of the most celebrated among the early Italian orientalists, was born at Pavia, in 1469, and died, 1510. Leo X. appointed him professor of Syriac and Chaldee at Bologna.

AMBROSE, ST., bishop of Milan, was born about 340, in Gallia Narbonensis, of which province his father was praetorian prefect. While yet a youth he pleaded causes with so much eloquence, that Probus, prefect of Italy, chose him one of his council, and afterwards nominated him governor of Liguria, which office he held five years. In 374, Auxentius, bishop of Milan, died; and so fierce was the contest in the election of a successor to the vacant see, that the governor was called upon to quell the tumult. This he attempted by persuasion in the great church; and at the conclusion of his address, a voice in the crowd exclaimed, "Ambrose is bishop." This circumstance was considered as a divine direction, and Ambrose was declared to be the object not only of the popular choice but of

divine selection. His first efforts were directed to the extermination of Arianism, which was then making great progress. He also successfully resisted the Pagans, who were attempting to restore their ancient worship. When Maximinus invaded Italy, and actually entered Milan, Ambrose remained at his post, to assuage the calamities produced by the invading army. When, in consequence of a tumult at Treassalonica, Theodosius sent an order for a general massacre, Ambrose went to the emperor, remonstrated with him on his barbarity, and prevailed on him to promise that the command should be revoked. The mandate was, however, carried into execution, and 7000 persons were slaughtered in cold blood. Shortly afterwards, when Theodosius was about to enter the great church of Milan, Ambrose met him at the porch, and sternly forbade him to appear in the holy place. The emperor pleaded the example of David:—"You have imitated David in his crime, imitate him in his repentance," was the reply; and Theodosius was excluded from the services of the church for eight months, and then was compelled, not only to perform penance, but to sign an edict, which ordained that an interval of thirty days should pass before any sentence of death or of confiscation should be executed. The works of St. Ambrose are numerous, and fill 2 vols. folio. He died at Milan, in 397.

AMBROSIOUS AURELIANUS, king of the Britons. He came from Armorica to assist in expelling the Saxons, who had been invited over by Vortigern; and on the death of that monarch the sovereignty was vested in him. Died, at Winchester, in 508.

AMELHON, HUBERT PASCAL, a learned Frenchman, born, 1730; author of "Histoire du Bas Empire," of a celebrated work on the Commerce of the Egyptians, and of "Researches into the Mechanical Arts of the Ancients." Died, 1811.

AMELIA, duchess dowager of Saxe-Weimar. [SAXE-WEIMAR.]

AMELOE DE LA HOUSSAYE, NICOLAS, a French historian of the 17th century. He resided for some time at Venice, as secretary to the French embassy, and wrote a history of its government. He also translated the "Prince" (by Machiavel) and other Italian works into French. Died, 1706.

AMERBACH, JOHANN, a celebrated printer of Basel, in the 15th century; the first who used the Roman type instead of Gothic and Italian. He was a man of learning, piety, and wealth, and spared no labour or expense in the production of his edition, the first published, of the complete works of St. Augustine. He had previously published the works of St. Ambrose, and afterwards undertook the preparation of those of St. Jerome; which appeared after his death under the care of his sons. Died, 1515.

AMERBACH, BONIFACE, son of the above, syndic of Basel; he was an intimate friend of Erasmus, and was for 20 years professor of Jurisprudence at Basel, and died, 1562.

AMERIGO VESPUCCI, an eminent navigator, was born at Florence in 1451. After receiving a liberal education he was sent by his father to Spain for the purpose of con-

ducting his commercial affairs; and, being at Seville when Columbus was making preparations for his second voyage, he resolved to quit mercantile pursuits, and enter on the career of discovery. His first expedition to the new continent was in 1499, under the command of Ojeda, a year after the discovery and examination of that part of the coast by Columbus. After this he entered the service of King Emanuel of Portugal, and made two voyages in Portuguese ships; the first in 1501, the second in 1503. The object of this last voyage was to find a westerly passage to Malacca. He arrived at Brazil, and discovered the Bay of All Saints. In 1505 he again entered the service of the king of Spain, but made no more voyages, as appears from memoranda, showing that he was at Seville till 1508, at which time he was appointed principal pilot. His duties were to prepare charts, and prescribe routes for vessels in their voyages to the new world, which soon received his name. This honour certainly belonged to Columbus rather than to Amerigo, for the prior discovery of the continent by the former is not to be questioned. He died at Seville in 1512.

AMES, JOSEPH, the celebrated historian of British typography, was born at Yarmouth, 1689, and died, 1759. His father apprenticed him to a plane-maker in London; and, after serving out his time, he became a ship-chandler at Wapping, which business, notwithstanding his antiquarian pursuits, he carried on until his death. He early discovered a taste for English history and antiquities; and brought out, in 1749, after the labour of many years, "Typographical Antiquities; being an historical account of printing in England, with some memoirs of our ancient printers, and a register of the books printed by them from 1471 to 1600; with an appendix concerning printing in Scotland and Ireland to the same time." It was a laborious compilation, but deficient in point of learning. By the labours of subsequent editors the work, at first published in one vol. 4to, has been improved and extended to 4 vols. 4to. Ames wrote several other works, among which is "Parentalia; or Memoirs of the Family of Wren." He was F. R. S. and F. S. A., and for many years filled the office of secretary to the Society of Antiquaries.

AMHERST, JEFFERY, Lord, a distinguished British officer, was descended from an ancient Kentish family, near Sevenoaks, where he was born, 1717. He entered into the army in 1731, and became aide-de-camp to Lord Ligonier, with whom he served at the battles of Rocoux, Dettingen, and Fontenoy. In 1758 he was sent to America, where he captured Louisbourg, and all its dependencies in the Gulf of St. Lawrence. This was followed by the reduction of Fort du Quesne, Niagara, and Ticonderoga, which paved the way for the entire conquest of Canada. For these services General Amherst received the thanks of parliament, and the order of the Bath. In 1763 he was made governor of Virginia; and, in 1776, created Baron Amherst. In 1795 he resigned the commandership-in-chief to the Duke of York, and the following year received

the rank of field-marshal. He died in 1797.

AMHURST, NICHOLAS, an English political and miscellaneous writer, born at Marden, Kent, and died 1742. He was author of the "Terra Filius," a satirical work on the university of Oxford; and published, with the assistance of Milteney and Lord Bolingbroke, the work by which he is most known, entitled "The Craftsman."

AMIGONI, GIACOMO, a Venetian historical and portrait painter, who visited England in 1729. He afterwards went to Spain, was appointed portrait painter to the king, and died there, 1752.

AMLOT, Father, one of the most learned of the French missionaries to China, born at Toulon, 1718, and died at Peking, 1794, aged 77. This zealous Jesuit, who arrived at Macao in 1750, was invited to Peking in 1751, by the emperor of China, and remained in that capital 43 years. By continued application he became acquainted with the Chinese and Tartar languages; and, from time to time, remitted to France the result of his labours, which afterwards appeared in several publications.

AMMAN. There were three noted physicians of this name. The first, **JOHN CONRAD**, a native of Schaffhausen, was born, 1669, and died, 1724, at Marmund, in the Netherlands. He was chiefly distinguished by his success in teaching persons born deaf and dumb to speak.—His son, **JOHN**, was a fellow of the Royal Society of London, and a member of the Academy of Sciences of Petersburg, where he lectured on botany, and acquired great reputation; he died, 1740.—The third, **PAUL**, was a native of Breslau, who settled in 1674 at Leipsic, where he gave lectures on physiology, natural history, and botany; he died, 1691.

AMMAN, JOST, a famous engraver and painter at Zurich, in the 16th century. He painted with great brilliancy on glass, but excelled chiefly in engraving, both on wood and copper. Died, 1591.

AMMANATI, BARTOLOMEO, a Florentine architect and sculptor of the 16th century. After studying under Baccio Bandinelli and Sansavino, he became an imitator of Michael Angelo. He built the fine Ponte della Trinita at Florence, completed the Pitti Palace, and executed several works at Rome, Venice, and Padua. Born, 1511; died, 1592.

AMMIANUS MARCELLINUS, a Roman historian of the 4th century, born at Antioch. He wrote the Roman history from the reign of Nerva to the death of Valens, in 31 books, of which only 18 are extant; served long in the army, and took part in the Persian war under Julian; then retired to Rome, and died about 390. His history is esteemed impartial and trustworthy, but his style is faulty.

AMMIRATO, SCIPIO, an esteemed Neapolitan writer, born in 1531; author of a "History of Florence," which he wrote at the instance of the grand-duke Cosmo, and of numerous tracts, political and historical. Died, 1601.

AMMONIO, ANDREA, a Latin poet, born at Lucca, in Italy, of whose genius Erasmus made frequent mention. He was sent to

England in an official character, by Pope Leo X., and was appointed Latin secretary to Henry VIII. He subsequently became prebendary of Salisbury, having previously received some valuable church preferment, and was made papal nuncio in England. Died at London, 1517.

AMMONIUS, surnamed **SACCAS**, or **THE PORTER**, a philosopher of the 3rd century, was born at Alexandria, probably of Christian parents, and became the founder of a new school of philosophy, which sought to effect a reconciliation of the Platonic and Aristotelian systems. The great critic Irenæus, the mystic Plotinus, and the great church teacher Origen, were disciples of Ammonius. He died about 243.

AMONTONS, GUILLAUME, French natural philosopher, born at Paris, 1663, and died, 1705. He constructed a new thermometer, hygroscope, and other philosophical instruments, and is said to have been the inventor of telegraphs.

AMORETTI, CARLO, mineralogist, born at Oneglia, in the Milanese, 1740, and died, 1816. He became one of the keepers of the Ambrosian Library at Milan, and published, in Italian, "A Tour from Milan to the Three Lakes of Como, Lugano, and Maggiore." He composed also a great number of memoirs and tracts, for which he was rewarded with the decoration of the order of the Iron Crown.

AMORY, THOMAS, a singular character, was son of Counsellor Anory, appointed by William III. secretary for the forfeited estates in Ireland. He led a very reclused life in his house in Orelard Street, Westminster, carefully shunning company, and never stirring out by daylight. He was a zealous Unitarian, and the author of "John Bunce," "Memoirs," and other eccentric books. Died, 1789, aged 97.

AMPERE, ANDRÉ MARIE, whose name is imperishably connected with the great discoveries in electro-magnetism, was born at Lyons, 1775. In 1804 he was nominated professor in the Polytechnic School of Paris; and here in connection with Oersted, Faraday, and other distinguished men of science, with whom he was in constant correspondence, he paved the way for those brilliant discoveries that have already issued in the electric telegraph, and promise an illimitable extension of the boundaries of science. Died, 1836.

AMPERE, JEAN JACQUES, a distinguished French historian and littérateur, was born at Lyons in 1800. He was the son of the eminent electrician André Marie Ampère, and was educated at Paris, where he was a pupil of Cousin. In 1833 he became a professor at the College of France, was received at the Academy of Inscriptions in 1842, and at the French Academy in 1847. He visited Egypt and Nubia in 1844, and contributed some interesting articles on those countries to the "Revue des deux Mondes." Among his principal works are, "De la littérature Française dans ses rapports avec les littératures étrangères au moyen âge," "Histoire littéraire de la France avant le douzième siècle," "Sur la formation de la langue Française," and "Histoire Romaine à

AMURATH II., one of the most illustrious of the Ottoman emperors, succeeded his father Mahomet I. in 1421, at the age of 18. The empire was disputed with him unsuccessfully by his uncle Mustapha, who was taken and hung; and by his brother Mustapha, who also was taken and strangled. In 1429 he took Thessalonica from the Venetians, in 1435 subdued the despot of Servia, besieged Belgrade, which was successfully defended by John Huniades: defeated the Hungarians at Varna in 1441, and slew their king Ladislaus: abdicated in favour of his son the following year, and retired to Magnesia, but had soon to resume the government, in consequence of the disorders which arose. In 1447 he made war on Scanderbeg, in Albania, and was repulsed. Died, 1451.

AMURATH III., Ottoman emperor, succeeded his father Solim II. in 1574. His first act was the murder of his five brothers, the eldest of whom was eight years old. He carried on war with Persia for eleven years, and acquired several provinces. In 1581 the janissaries revolted, and a great fire broke out in Constantinople. In 1592 Amurath made war on the emperor, and two years after took Raab. He was hated for his avarice, and his sensual excesses made him early old. Died, 1595.

AMURATH IV., Ottoman emperor, succeeded his uncle Mustapha in 1623. The empire was then in a very troubled state. In 1624 he besieged Bagdad unsuccessfully: again, seven years afterwards, with the same result: in 1636 took Erivan: and at length, in 1638, succeeded in taking Bagdad. He then ordered the massacre of 30,000 prisoners. He had many good qualities as a ruler and a soldier, but his debaucheries brought him to a premature end. Died, 1640.

AMYOT, JACQUES, bishop of Auxerre, and grand almoner of France, born at Melun, of obscure parents, 1514, and died, 1593. He left the university of Paris at the age of 23, and was recommended to the duchess of Berri, by whose means he became professor of Greek and Latin at Bourges. He was afterwards appointed preceptor to the sons of Henry II., and while thus engaged he translated the Lives of Plutarch. Charles IX. gave him the abbey of Cornelius de Compiègne, and conferred on him the high offices above mentioned.

ANACHARSIS, a Scythian philosopher, flourished about 600 years B.C. He travelled to Athens, where he was much esteemed by Solon, and was the only stranger the Athenians ever admitted to the honour of citizenship. On his return to Scythia he attempted to introduce some of the institutions and customs of Greece; but while in the act of performing a rite to Cybele, he was killed by an arrow.

ANACOANA, queen of Xiragna, in the island of St Domingo, at the beginning of the 16th century, and one of the victims of Spanish treachery and cruelty. Ovando, the go-

vernor of St Domingo, invited her to a feast, where, at an appointed signal, her native attendants were shot, and she herself was seized, carried off, and executed, about 1506.

ANACREON, the Greek lyric poet, was a native of Teos, in Ionia, which town he is said to have quitted when it was taken by the Persians in B.C. 540. He lived many years at Samos, under the patronage of the tyrant Polycrates, and afterwards at Athens. He died at the age of 85. The poems of Anacreon set forth chiefly the praises of love and wine, and to the enjoyment of which his life also appears to have been dedicated. He is said to have been a lover of Sappho, but the story is rejected as too improbable. Many fragments of his songs are preserved, and a number of odes long passed under his name which are now held to be spurious.

ANASTASIUS I., emperor of the East, born in Illyricum, 430, and died, 518. He was elevated to the throne on the murder of Zeno in 491. Anastasius was excommunicated by Pope Symmachus for his severities towards the Catholics. This was the first instance of the excommunication of a sovereign by the Pope.

ANASTASIUS II., raised to the throne of Constantinople on the deposition of Bardanes, whose secretary he had been, 713, was a man of learning, and a zealous Catholic, yet he did not neglect the defence of the empire, then threatened by the Saracens. On the breaking out of an insurrection in 716 he was compelled to retire to a monastery. When he attempted afterwards to regain his throne, he was seized and put to death by Leo, who had usurped the crown.

ANAXAGORAS, of Clazomenæ, a celebrated philosopher, born B.C. 500. He inherited a considerable estate in his own country, which he relinquished to indulge his thirst for knowledge at Athens, where he applied to the study of poetry and eloquence, and taught philosophy, having among his pupils Euripides, the tragic poet, and Pericles, the great statesman. His reputation, however, created him enemies, and he was condemned to death on a charge of atheism, but the sentence was commuted into banishment. Anaxagoras then withdrew to Lampsacus, where he taught philosophy undisturbed until his death, which happened in his 72nd year, B.C. 429. Anaxagoras is celebrated as the first of the Greek philosophers who taught the existence of a Superior Mind, distinct from, yet pervading and governing, the universe.

ANAXANDRIDES, a Greek comic poet, of the 4th century B.C., said to have been the first who introduced love adventures on the stage. He was a native of Rhodes, and was starved to death at Athens for libelling the government.

ANAXARCHUS, a Greek philosopher of the atomic school of Leucippus and Democritus. He was the friend of Alexander the Great, whom he accompanied on his Asiatic expedition, and who admitted him to great freedom. He was pounded to death in a mortar by the tyrant of Cyprus, B.C. 323.

ANAXIMANDER, the friend and disciple of Thales, of Miletus, born B.C. 610. He had a considerable knowledge of astronomy and

geography, and was the first who noticed the obliquity of the ecliptic; he also taught that the moon receives her light from the sun, and that the earth is globular; and to him is ascribed the invention of the sphere and geographical charts.

ANAXIMENES, the pupil and successor of Anaximander. He maintained that air is the first principle of all things; and Pliny attributes to him the invention of the sundial.

ANAXIMENES, of Lampsacus, a Greek historian and philosopher, son of Aristocles. He was one of the preceptors of Alexander the Great, whom he accompanied in most of his campaigns, and afterwards wrote the history of his reign, and that of his father Philip.

ANCHIETA, **JOS.**, a Portuguese Jesuit, surnamed the Apostle of the New World; born at Teneriffe, 1538, and died, 1597. At the age of 20 he went to Brazil, where he founded the first college for the conversion of the savage natives.

ANCILLON, **DAVID**, a learned French divine, born at Metz, 1617, and died, 1692. On the revocation of the edict of Nantes, he retired from Metz, of which he had been for some time the pastor, to Frankfort, and thence to Hanau, where he attained to great celebrity by his theological writings and discoveries; and he afterwards accepted a situation in the French church at Berlin. His eldest son, Charles Ancillon, obtained through his influence the office of historiographer to the king of Prussia, and was afterwards made inspector of the French courts of justice. He was a man of much general reading, wrote several treatises, &c., and died, 1715.

ANCILLON, **JOHANN PETER FRIEDRICH**, a Prussian statesman and miscellaneous writer, was born at Berlin, in 1766. He early obtained reputation as a preacher and writer, was made councillor of state, minister of education, and finally minister of foreign affairs. Among his works are "Mélanges de littérature et de philosophie," "Essais philosophiques," and "Tableau des révolutions du système politique de l'Europe," the last being his best work. Ancillon was a member of the Berlin Academy of Sciences, and of the French Institute. Died, 1837.

ANKARSTROEM, or **ANKARSTROM**, **JOHN JAMES**, a Swedish military officer, who assassinated King Gustavus III. at a masked ball; for which crime he was scourged on three successive days, had his right hand cut off, and was then decapitated. Born, 1753; executed, 1792.

ANCRE, **MARSHAL D'**. [CONCINO CONCINI.]

ANCUS MARTIUS, fourth (mythical) king of Rome, elected on the death of Tullus Hostilius. During his reign Rome was enlarged by taking in the Aventine Hill, and occupying the hill Janiculum, beyond the Tiber. He also built the bridge called Sublucius, erected a public prison in the forum, extended the territories of Rome to the sea, and built the town and port of Ostia, at the mouth of the Tiber. Ancus died after a prosperous reign of 24 years.

ANDERSON, **ADAM**, a native of Scotland,

was for many years a managing clerk in the South-Sea House, a trustee for the settlements in Georgia, and a member of the court of the Scotch Corporation of London. He wrote a work on the Historical and Chronological Deduction of Trade and Commerce; and died, 1765, aged 75.

ANDERSON, **SIR EDMUND**, lord chief justice of the Common Pleas under Queen Elizabeth, to which office he was promoted in 1582. He sat on the trials of Mary, queen of Scots, and of Davidson, the secretary, for issuing the warrant under which she was executed. Anderson's Reports, folio 1644, is still a book of authority. He was a native of Lincolnshire, and died, 1605.

ANDERSON, **GEORGE**, a young man of extraordinary talents, born at Weston, Buckinghamshire, in 1760, and died, 1796. His parents were peasants, and he worked as a day-labourer in the fields; his genius, however, overcame every difficulty, and he attained so great a knowledge of the mathematics, as procured him a clerk's place at the Board of Control, and afterwards the situation of Accountant-General. Mr Anderson published a "General View of the Affairs of the East India Company, since the conclusion of the War in 1784;" and translated from the Greek of Archimedes, the treatise entitled "Arenarius."

ANDERSON, **JAMES**, an advocate at the Scottish bar, eminent for his learning and antiquarian research, born at Edinburgh, 1622, and died, 1728, through an apoplectic stroke. His first work, "An Essay, proving the Independence of the Crown of Scotland," published 1705, procured him the thanks of the Scottish parliament, under whose auspices he subsequently produced a series of the Charters and Seals of the Scottish Monarchs from the earliest Antiquity down to the Union with England, a book which gained him the greatest reputation, and is entitled "Selectus Diplomatum et Numismatum Scotiae Thesaurus."

ANDERSON, **JAMES**, a Scottish miscellaneous writer, born at Hermiston, near Edinburgh, 1739, and died 1808. He published a series of "Essays on Planting," which procured him much reputation as an agriculturist; and, in 1780, the university of Aberdeen conferred on him the degree of LL.D. In 1783, he removed to Edinburgh, and projected the establishment of the North British Fisheries; for which purpose he was employed by government to survey the coast of Scotland, and received great commendation for his services. Dr Anderson was the author of a number of publications chiefly on agricultural affairs; he also wrote for the Encyclopædia Britannica, and the Monthly Review.

ANDERSON, **JOHN**, **F. R. S.**, professor of natural philosophy in the university of Glasgow, and founder of the useful institution in that city bearing his name, was born in 1726, at Roseneath, in Dumbartonshire. His great characteristic was an ardent desire for the instruction of his fellow-men, and he was indefatigable in studying and exemplifying the application of science to mechanical practice, for which purpose, in addition to his academical labours, he taught his anti-

A New Universal Biography.

[AND

loja-class, as he called it (formed of artisans in their week-day dress), twice every week, during the session to the end of his life. Anderson wrote a work entitled "Institutes of Physics," which passed through several editions. He was F. R. S. L. and E. He died in 1796, directing by his will that the whole of his property should be devoted to the establishment of an educational institution in Glasgow, to be denominated Anderson's University, for the use of the un-academical classes; which may justly be considered as the parent of the Mechanics' Institutions which afterwards sprang up throughout the country.

ANDERSON, JOHN, son of a merchant at Hamburg, of which city he himself became principal magistrate in 1725. He was employed in various negotiations with different European courts; and during his residence abroad he cultivated an acquaintance with all whom he found distinguished for their literary attainments, and kept up a correspondence with them after his return. He died, 1743, aged 79. His principal works, "The Natural History of Greenland, Davis's Straits, and the Countries situated in the Arctic Circle."

ANDERSON, LAWRENCE, one of the chief promoters of the reformation of religion in Sweden. He was chancellor to Gustavus Vasa; but having engaged in a conspiracy, he passed the years of life left to him by the king's clemency, in retirement. Died, 1552.

ANDERSON, ROBERT, M. D., a native of Carnwath, in Lanarkshire; author of numerous works, critical and biographical. Of those most highly valued are the following:—"Lives of the British Poets," in 14 vols., published in 1795; "Works and Life of Tobias Smollett;" and the "Life of Samuel Johnson." He was the friend and patron of genius wherever it appeared; to him Campbell dedicated his "Pleasures of Hope," as it was chiefly owing to him that that poem was brought before the world. Died, 1830.

ANDOCIDES, an Athenian orator, was born B. C. 467. He played a prominent part in the political contests of the Greek states, belonged to the oligarchical party at Athens, and was four times exiled: the first time for profaning the Eleusinian mysteries, and for taking part, it was said, with Alcibiades, in the mutilation of the Herme. He is supposed to have died in exile soon after B. C. 393.

ANDRE, JOHN, a major in the British service in the American war; who, being led to offer his services to negotiate between the noted General Arnold and General Sir Henry Clinton, the former proposing to give up the fortress of West Point to the English, was taken prisoner by the Americans within their lines; and, owing to his disguise and the nature of his mission, was tried and hung as a spy, Oct. 2, 1780. On going to the place of execution his fortitude excited the admiration and melted the hearts of the spectators. When asked if he had anything to say, he replied, "Nothing, but to request that you will witness to the world that I die like a brave man."

A monument is erected to him in Westminster Abbey.

ANDREA DEL SARTO. [SARTO.]
ANDREOSSI, FRANÇOIS, an eminent French engineer and mathematician, was born at Paris in 1633. He assisted Riquet in forming the canal of Languedoc, the sole merit of which stupendous work has been unjustly claimed for him. Died, 1688.

ANDREOSSI, ANTOINE FRANÇOIS, Count, a distinguished French military officer and engineer, and eminent also as a diplomatist, was descended from the subject of the preceding article, and born in Languedoc, 1761. He was a lieutenant of artillery at twenty; served with distinction in Italy and Egypt; and had reached the rank of inspector-general of the artillery when Napoleon ascended the throne. He was successively ambassador to London, Vienna, and Constantinople; and received many marks of the imperial favour. On the restoration of Louis XVIII., in 1814, Andreossi was recalled from his embassy to the Porte, and presented with the cross of St Louis: but on the return of Napoleon from Elba, he again attached himself to his old master; and was one of the commissioners chosen to treat with the allies by the provisional government. He wrote a "Histoire Générale du Canal du Midi;" the "Campaign of the Gallo-Batavian Army on the Maine and Rednitz," &c. Died, 1828.

ANDREOZZI, GAETANO, a celebrated musical composer, born at Naples, 1763; died at Paris, 1828.

ANDREWS, HENRY, a self-taught mathematician, born of poor parents at Fries-ton, near Grantham, 1744, and died, January 26, 1820. Having, while in a menial employment, occupied his leisure moments in the study of astronomical science, he attained therein great proficiency, and for more than 40 years was computer of the Nautical Ephemeris, and the calculator of Moore's Almanack.

ANDREWS, LANCELOT, bishop of Winchester, and one of the most learned prelates of the 17th century, was born in London in 1565. He was educated at Cambridge, early distinguished himself as a preacher, was made chaplain to Queen Elizabeth and dean of Westminster. James I. made him in 1605 bishop of Chichester and lord almoner. He also employed him to answer the work in which Cardinal Bellarmin (Matthew Tortus) had attacked James's "Defence of the Rights of Kings." The answer was entitled "Tortura Torti." Andrews was made bishop of Ely and privy-councillor in 1609, and was translated to Winchester in 1618. He belonged to what is now called the High Church party, but was not wanting in prudence and moderation. His learning was extolled by some of the greatest European scholars, his oratory was irresistibly fascinating, and his moral character was worthy of his fame and office. Among his works are a "Manuum of Private Devotions," Sermons, Lectures, &c. He took part in the authorized translation of the Bible. Died, 1626.

ANDRIEU, BERTRAND, a medallie engraver, born at Bordeaux, 1761, and died at

Paris, 1822; considered as the restorer of the art of engraving medals, which had declined after the reign of Louis XIV.

ANDRIEUX, F. G. J. S., a clever and voluminous French author, dramatist, poet, and politician, born in 1759. He was member of the Council of Five Hundred in 1798; was afterwards librarian to Joseph Buonaparte, Professor of Helles Lettres at the Polytechnic School, and Professor of Literature at the College of France, filling the last chair nearly 20 years. He was also named perpetual Secretary of the French Academy. Opposed to arbitrary power, he advocated warmly the liberty of the press and the system of "Ecoles Primaires." He was one of the projectors and chief contributors of the "Decade Philosophique," and was an active member of the Institute. Among his dramatic pieces are "Anaximander," "Les Etourdis," "Le Vieux Fat," and "Le Jeune Homme à l'Epreuve," &c. &c.

ANDRISCUS, a man of mean extraction, who, pretending to be the son of Perseus, the last king of Macedonia, took the name of Phillip, and was called Pseudo-Philippus. Having obtained a signal victory over Juventius, the Roman prætor, he assumed the kingly power; but in the end was conquered, and served to grace the triumph of Metellus, before whom he walked in chains.

ANDRONICUS CYRRHÆSTES, a Greek architect, who built the famous octagonal tower, known as the temple of the winds, at Athens, which has been used as a mosque by the Turks. He is also said to be the inventor of the weathercock.

ANDRONICUS, LIVIUS, the oldest dramatic author in the Latin language, who flourished about 240 years B. C. Nearly all his works are lost.

ANDRONICUS, of Rhodes, a follower of Aristotle, to whom we are indebted for restoring and publishing the works of that philosopher, about B. C. 60.

ANDRONICUS I., COMNENUS, emperor of the East, was the son of Isaac, and grandson of Alexis Comnenus. He was of an active martial mind, and eloquent; but was profligate, passionate, and cruel. On the death of his cousin, the emperor Manuel, in 1183, he was chosen partner in the government with Alexis II., who, being a mere youth, soon fell a sacrifice to his coadjutor's thirst of power, and Andronicus became sole emperor. The revolt excited by Isaac Comnenus, and supported by the king of Sicily, led to numerous proscriptions on the part of the emperor; but the people, exasperated at his various cruelties, proclaimed Isaac Angelus emperor, and Andronicus, now 75 years of age, after being subjected for several days to the most horrible outrages and tortures, was at last hung by the feet, and then run through with a sword, 1185.

ANDRONICUS II., PALÆOLOGUS, surnamed the Elder, succeeded Michael VIII., in 1283, having been joint emperor with him since 1273. His long reign was troubled by ecclesiastical discussions, the first act of his reign being the revocation of the act of union of the Greek and Latin churches effected by Michael. By the inroads of the Turks, and the revolt of his grandson, who

having been crowned emperor, took Constantinople in 1328, the aged Andronicus, deprived of all but the imperial adornments, and confined to one room in the palace, was glad to find refuge in a cloister, where he died about four years afterwards, 1332.

ANDROUET DU CERCEAU, JACQUES, an eminent French architect of the 16th century, who designed the Pont Neuf, and commenced the building of it in 1578. He was also employed, in 1596, to continue the gallery of the Louvre; but was obliged to quit France during the persecution of the Protestants, and no further account of him is on record.

ANEURIN, a British poet and chieftain of the sixth century, supposed by some authors to be the same with Gildas, the historian. He took part in the battle of Cattraeth, which he made the subject of a poem; this, and a few poetical fragments, form the whole of his known works. The poem entitled "Odes of the Months," formerly attributed to Aneurin, is now considered spurious. Aneurin was one of the noblest poets of the Kymry.

ANGELICO, FRA GIOVANNI DA FIESOLE, IL BEATO, a very celebrated Italian painter, was born at Mugello, in 1387. He entered the order of Predicants at Fiesole in 1407, and is supposed by some writers to have early practised the art of illuminating books. He painted at Cortona, Fiesole, Florence, Rome, &c. Among his finest works are the frescoes in the convent of St Mark, Florence, and those in the chapel of Nicholas V. in the Vatican. He was a man of earnest piety and profound humility, worked always by the aid of divine inspiration, which he sought before commencing, and would never, it is said, alter a picture. His subjects are all religious, his execution most delicate and elaborate, frequently resembling illuminations, and his own character is impressed on all his works. He spent the last eight years of his life at Rome, where he died in 1455. The National Gallery possesses two examples of this master.

ANGELUS, CHRISTOPHER, a Greek, who, being driven from his own country by the Turks, found an asylum in England in 1608; and, under the patronage of the bishop of Norwich, he was placed in Trinity College, Cambridge, whence he removed to Balliol College, Oxford, where he was of great service to the junior students, and where he died, 1638. He published several works in Greek, English, and Latin.

ANGERSTEIN, JOHN JULIUS, a distinguished patron of the fine arts, born at St Petersburg, 1735; died at Blackheath, Jan. 22, 1822. He came over to England under the patronage of Andrew Thompson, Esq., with whom he lived in partnership upwards of 50 years. Mr Angerstein exhibited much public spirit on several occasions, and was the first who proposed a reward of £2000 from the fund at Lloyd's to the inventor of the life-boats. His celebrated collection of paintings, esteemed inferior to none of the same extent in Europe, was purchased by the English government for £60,000, and formed the nucleus of the National Gallery.

MARIO, a Ve-

netian historian of the 15th century. In his youth he was taken captive by the Turks, and made slave to Mustapha. He was released by Mohammed II., and attended him in an expedition to Persia, 1473. Angiolello wrote the history of Mohammed II., in the Turkish and Italian languages; also the history of Ussun Cassan. He died probably about 1530.

ANGLESEY, HENRY WILLIAM PAGET, K. G., G. C. B., &c. &c., marquis of, the eldest son of the first earl of Uxbridge, was born in 1768, and was educated at Westminster, and Christchurch, Oxford, which University he quitted in 1790. Three years afterwards he raised, on his father's estates in Staffordshire, a body of volunteers, numbering nearly 1000, which were embodied in the line as the 80th regiment of foot, or Staffordshire Volunteers. Of this regiment Lord Paget was at once made Lieutenant-Colonel, and, proceeding to Flanders in 1794, one of the few bright spots of that unfortunate campaign was the gallantry he displayed, particularly in the retreat, in which he held the temporary command of Lord Cathcart's brigade. In 1795 Lord Paget was transferred to that branch of the service upon which his name has shed such lustre, and which his ability raised to a degree of efficiency not known before. In 1797 he obtained the command of the seventh Light Bagoons, and in 1799 accompanied the Duke of York in the expedition to Holland, where his dashing exploits at the head of the cavalry rendered him the admiration of the service. For some years afterwards, he devoted himself entirely to the discharge of his regimental duties; and was promoted to Major-General in 1802, and to Lieutenant-General in 1808. In that year he proceeded to the Peninsula in command of two brigades of cavalry, and although his stay there was short, he did not quit till he left behind him the *souvenirs* of Sahagun, Mayorga, and Benevente. In 1809 he returned to England, where he remained for some time, taking no part in the subsequent Peninsular campaign; but attending to his duties in the House of Commons, as M. P. for Milbourne Port, till, on the death of his father, in 1812, he was removed to the House of Lords as Earl of Uxbridge. In 1815 he proceeded to Belgium in command of the cavalry. To narrate Lord Uxbridge's deeds there were simply to revive some of the most brilliant reminiscences of that short but glorious and eventful campaign. It is universally admitted that, next to the great leader of the host, the victory of Waterloo was more indebted to the Earl of Uxbridge than to any other of the warriors of that memorable day. Towards the close of the great encounter of the 18th of June, he received a severe wound in the leg, which rendered it necessary to amputate the limb. For his services he was created Marquis of Anglesey, and received many other marks of gratitude from his country. In 1827 he was appointed Master-General of the Ordnance, and in 1828 proceeded to Ireland as Viceroy, in which capacity he gained the warm affections of the Irish people. But his advocacy of Catholic Emancipation led to his recall within twelve months after his ap-

pointment; and in 1830 he was again nominated to the same office, which he retained till 1833, when Lord Grey's cabinet broke up. In 1846 he was advanced to the rank of Field-Marshal, and the same year once more became Master-General of the Ordnance, which office he held till 1852. Seldom were bravery, gentleness, and generosity combined in such noble proportions as in the Marquis of Anglesey. In his character, says a contemporary, there was not a fold; it was all open as day. His politics were thoroughly liberal; he generally was in advance of public opinion; and all measures of reform, in Church and State, had in him a strenuous and a steady champion. Had his eloquence been equal to his mental powers, he would have achieved as great a name in Parliament as in the camp; for he had a sound, shrewd understanding, a judgment rarely at fault, and accompanied with a moral courage not inferior to his brilliant physical bravery in the field of battle. The Marquis was twice married, in 1795 to a daughter of the fourth Earl of Jersey, but this marriage was dissolved in 1810, and her Ladyship married the Duke of Argyll. In 1810 Lord Anglesey married Lady Charlotte Cadogan, whose marriage with the late Lord Cowley had been previously dissolved. Died April 29, 1854.

ANGOULEME, CHARLES DE VALOIS, duke of, natural son of Charles IX.; born, 1575; and died, 1659. Catherine de Medici bequeathed to him her estates, but the will was set aside in favour of Margaret de Valois. Charles, however, retained the title of count d'Auvergne, and in 1619 was made duke of Angoulême. He gained great reputation as a military commander, taking part on the side of Henry IV. at the battles of Arques and Ivry; but was twice elarged with treason, and the second time condemned to death, which sentence was changed into perpetual imprisonment. He was, however, once more pardoned, and distinguished himself at the sieges of Soissons and Rochelle, and in the campaigns in Germany, Languedoc, and Flanders. His memoirs, written by himself, were published soon after his death.

ANGUIER, FRANÇOIS and MICHEL, sculptors, natives of Eu, Normandy. François, the eldest, was keeper of the royal cabinet of antiquities, and executed several great works, particularly the mausoleum of the Duke of Montmorency. Michel was a member of the Academy, and among his works are the group of the Nativity at the church of Val de Grace, and the bas-reliefs of the gate of St Denis. The former died, 1669; the latter, 1686.

ANGUILLARA, GIOVANNI ANDREA, an Italian poet, was born about 1517. At first employed in a printing-office, he gained some reputation by his translations of Ovid's *Metamorphoses* and other works, and went to Rome; but in consequence of his misconduct, died in misery, 1565.

ANGUISCIOLA, SOFONISBA, an Italian painter, was born of a noble family of Cremona in 1533. She excelled in portraits; went to Madrid on the invitation of Philip II.; was twice married; became blind, and died at Genoa, about 1620. A comparison of

dates throws doubt on the story of Vaudeyk's visit to this artist at Genou; his journey to Italy not commencing till 1623.

ANHALT-DESSAU, LEOPOLD, prince of, Prussian field-marshal, was born in 1676. He entered the army at an early age, and served in the war of the Spanish Succession. He commanded the Prussian forces sent into Italy, where he greatly distinguished himself, and was wounded at the battle of Cassano. He next served in the Netherlands, and in 1715 took part in the war with Charles XII., whom he defeated at the isle of Rugen. The re-organization of the army occupied his attention during a long residence at Berlin. In 1745 he won a great victory over the Saxons and Austrians at Kesseldorf, and assisted at the capture of Dresden. Died, 1747. A marble statue by Schadow was erected to him at Berlin.

ANICHINI, LODOVICO, a celebrated Italian medallist of the 16th century. He executed a medal representing the interview of Alexander the Great and the High Priest at Jerusalem, which Michael Angelo pronounced to be the perfection of the art.

ANJOU, FRANCIS, duke of, who bore at first the title of duke of Alençon, was the son of Henry II. of France and Catherine de Medici, and was born in 1554. A strong dislike existed between his mother and him; he associated himself with the leading Huguenots, and openly condemned the massacre of St Bartholomew. In 1573 he took part in the siege of La Rochelle. A plot to raise him to the throne on the death of Charles IX. failed, and he was imprisoned with the king of Navarre. Retiring afterwards from the court, he joined the Protestants, but soon forsook them, and received from the king Berri, Touraine, and Anjou, the latter being then made a duchy for him. In 1576 he was head of the Catholic party, and in the next year he assisted the Flemings against the Spaniards. In 1581 he was chosen sovereign of the Netherlands. The same year he visited England with a view to negotiate a marriage with Queen Elizabeth, but after a stay of some months he returned unsuccessful to the Netherlands. His despotic interference with the rights of the people produced a revolt, and he was expelled the country. He retired to France, and died in 1584.

ANNA COMNENA was the daughter of the emperor Alexius Comnenus I., at whose death she conspired to place the crown on the head of her husband, Nicephorus Briennius, but without success. She then turned her attention to literary pursuits, and wrote the "Alexiad," a history of her father's reign. Died, 1148.

ANNA IVANOWNA, empress of all the Russias, daughter of the Czar Ivan Alexiowitch; born, 1693; married to the duke of Courland in 1710; succeeded to the crown on the death of Peter II., 1730; and died, 1740. Her favourite Hiren soon attained supreme power, and governed the empire with intolerable tyranny. It is said that ten thousand lives were sacrificed to his violence, and that twice that number of persons were driven into exile. During this reign, Russia was on a peaceable footing with her neighbours, the only hostilities in which she was

engaged being a war to establish Augustus III. on the throne of Poland, and a war with the Ottoman Porte in 1736, which was terminated by the peace of Belgrade, in 1739.

ANNE, of Austria, queen of France, eldest daughter of Philip II. of Spain; born, 1604; married to Louis XIII. of France, 1615, at whose death, 1643, she was declared sole regent during the minority of her son, Louis XIV.; she chose for her chief minister Cardinal Mazarin. Attempts to treat despotically the magistrates, who opposed the measures of the court, gave rise to the famous wars of the Fronde, in which the queen ultimately triumphed over the nobles and the people. Her son Louis assumed the reins of government, 1661. Anne then retired, passing the remainder of her life in pious exercises, and died in 1666.

ANNE, of Cleves, daughter of John, third duke of Cleves, became in 1540, at the age of 25, the wife of Henry VIII. of England, who fell in love with Holboin's portrait of her, but was disenchanted at first sight, and in a few months divorced her. She was of a dull apathetic nature, contented herself with a pension, and died in England, 1557.

ANNE, queen of Great Britain, second daughter of James II., by his first wife, Anne Hyde, was born in 1664; married to Prince George of Denmark, 1683; succeeded to the crown on the death of William III., 1702; and died, 1714, aged 50. Her reign is marked by the great war of the Spanish Succession and the achievements of Marlborough, the accomplishment of the legislative union of Scotland with England, and the dashing exploits of Lord Peterborough in Spain. Anne was of a kind and yielding disposition, and was long entirely controlled, first, by the imperious duchess of Marlborough, to whom she became warmly attached in childhood, and afterwards by her attendant, Mrs Masham. Prince George died in 1708, and their six children died young. The contention of parties during the reign of Anne was extremely violent, in consequence of the hopes entertained by the Jacobites that she would be induced by natural feelings to favour the succession of her brother, the Pretender. Her reign was also distinguished for the number of eminent writers who then flourished, several of whom rose to high stations.

ANNESLEY, ARTHUR, earl of Anglesea, and lord privy seal in the reign of Charles II.; born at Dublin, 1614; and died, 1686. At the commencement of the civil wars he joined the royal party, and sat in the parliament at Oxford, 1643; but having made peace with the republicans, he was sen. commissioner to Ulster, 1645. He, however, took an active part in the restoration of the king, for which he was created earl of Anglesea, made treasurer of the navy, and, shortly afterwards, lord privy seal.

ANQUETIL, LOUIS PIERRE, a celebrated historian, born at Paris, 1723; died, 1808. Having distinguished himself as an able teacher of theology and general literature, he was appointed prior of the abbey de la Roe, in Anjou, director of the college of Seulis, and prior of Chateau Renard. During the height of the revolution he was thrown into prison, where he began his "Précis de

lish Augustus and a war with which was terminated, in 1739.

France, eldest son; born, 1604; died, 1615, at declared sole regent, and his son, Louis XIII., minister of state. He was despotic and despised the means to the famous queen, which the nobles and he assumed the name of Anne then re-ferred to her life in 1666.

of John, third son, at the age of 10, of England, who painted her, and in a picture, and in a picture of herself with a child, in 1557.

Britannia, second wife, Anne, married to Prince George, succeeded to the throne in 1702; her reign is marked by Succession and the union of Scotland and the Scotch, the accomplishment of the Scottish exploits in. Anne was a weak woman, and was persecuted by the imperious to whom she was attached in childhood, and Mrs Masham. and their six children of par-ty were extremely jealous of her hopes of entering the service to favour the Pretender. She was then flour-ishing at high stations. She died in 1702, and was succeeded by Charles II. and died, 1686.

civil wars he was at in the party having made him was seen. He, however, was the son of the earl of Anne's navy, and died in 1702. He, a celebrated admiral; died, 1808. He was an able general literature, and the abbey de la Trinité in the college of St. Bernard. During his life he was through his "Précis de

l'Histoire Universelle," which was afterwards published in nine volumes. At the formation of the French Institute, Anquetil became one of the members. Among his works are "L'Esprit de la Ligne," "Louis XIV. sa cour et le régent," and "L'Histoire de France."

ANQUETIL DU PERRON, ABRAHAM HYACINTHE, brother of the preceding, was born at Paris, 1731; and died, 1805. In order to gratify his taste for oriental literature, he joined the expedition fitting out for India, in 1774, as a private soldier; and employed every moment of his leisure in the study of the Sanscrit. On the taking of Pondicherry by the English, he returned to Europe, visited London and Oxford, and conveyed the various MSS. he had obtained to Paris. He was then appointed oriental interpreter in the king's library, with a pension, and devoted himself to the publication of his researches. The principal fruit of his labours was the translation of the Zend-Avesta, which appeared in 1771.

ANSCILAI, ST. or ANSCARIUS, bishop of Hamburg and Bremen, born in France, 801; died, 861. He preached the gospel to the Danes and Swedes, founded several hospitals, and a library in the abbey of Corvey, and was canonized by Pope Nicholas I.

ANSELM, ST. archbishop of Canterbury in the reigns of William Rufus and Henry I.; born at Aosta, Piedmont, 1033. He was originally a monk, and afterwards superior of the abbey of Bec, Normandy. Visiting England several times during his abbacy, he was called, in 1093, to attend William Rufus in a fit of sickness at Gloucester, and received his appointment to the primacy the same year. But differences arising between the king and the prelate, respecting the temporalities of his see, which the king withheld from him, Anselm left the kingdom. On the accession of Henry I. he was recalled to England, and was well received; but a new rupture arising, in 1103, in consequence of the archbishop's refusing to be re-invested by the king, the dispute was referred to the pope, who decided in favour of Anselm. This was resisted; and at length the pope made a concession, by allowing the English bishops and abbots to do homage to the king for their temporalities. The king visited Anselm, then living at Bec, and their quarrel being terminated Anselm once more returned to England. He died at Canterbury in 1109, and was canonized in the reign of Henry VII. He was a man of great piety and powerful understanding, and is distinguished as the first of the long series of scholastic metaphysicians. In his works, many of which are extant and have been frequently reprinted, we see that he felt the want of a religious philosophy, and endeavoured, though unsuccessfully, to lay the bases of such a system.

ANSON, GEORGE, Lord, a celebrated naval commander, was born at his father's seat in the parish of Colwich, Staffordshire, 1697, and died at Moor Park, Hertfordshire, 1762. He entered early into the navy, and was made post-captain in 1724. Being ordered to the South Carolina station, he purchased land, and built a town there, called after his

name. In 1739 he was appointed commodore of an expedition against the Spanish settlements in the Pacific Ocean; and sailed from Portsmouth the following year with five men-of-war, a sloop, and two victuallers; doubled Cape Horn in March, 1741, after losing two of his ships; and in June following arrived off Juan Fernandez, with only two ships and two tenders. This place he left in September, took some prizes, burnt Païta, and continued on the American coast, in expectation of falling in with the annual Acapulco ship, till May, 1742; when, having only his ship, the Centurion, left, he crossed the southern ocean for China, where he stayed several months, and returned in quest of the galleon, which he fell in with, and captured after a smart action. Having sold his prize in China, he sailed for England, and arrived at Spithead, June 15, 1744, passing in a fog through the midst of a French fleet, then cruising in the Channel. In 1747 he commanded the Channel fleet, and captured six French men-of-war, which were conveying a large fleet bound to the East and West Indies. Two of these prizes were the *Invincible* and the *Glory*, which induced the captain of the former to say to the admiral, on giving up his sword, "Sir, you have conquered the *Invincible*, and *Glory* follows you." For these and other services, he was created a peer, and afterwards made vice-admiral of England. In 1751 he was appointed first lord of the Admiralty, which post he held, except for a short interval, until his death. In 1758, he again commanded the Channel fleet, and was appointed admiral, and commander-in-chief of his Majesty's fleets, for the purpose of conveying her Majesty, Queen Charlotte, from Cuxhaven to England.

ANSPACH, ELIZABETH, margravine of, was the youngest daughter of Augustus, earl of Berkeley. To a good and highly cultivated understanding, this lady joined the most prepossessing manners, and a large portion of feminine beauty. When little more than sixteen, lady Elizabeth married Mr (afterwards earl of) Craven, by whom she had seven children; but after living together thirteen years, they separated from mutual feelings of dissatisfaction. Lady Craven made a tour, and took up her residence in the court of Anspach, where she established a theatre, wrote plays, directed the performance, and became a principal personage with the margrave: the margravine was generally confined to her chamber by ill health, and shortly after died. Lady Craven remained a visitor at Anspach, and accompanied the margrave in his excursion to other courts. Six weeks after the death of Lord Craven, his widow married the margrave, and both came to England. The margrave disposed of his principality to the king of Prussia, and having purchased Brandenburg House, Hammersmith, it became the scene of fashionable dissipation; the queen, however, refused to receive the margravine at her drawing-room, and no other influence could obtain her admission to the British court. In 1806 the margrave died, and after that event the margravine resided generally abroad. At Naples the king gave her two acres of ground,

on which she erected a handsome villa, and there continued to reside until her death, which took place in 1828.

ANSTEX, CHRISTOPHER, poet, was born in 1724; studied at Eton and Cambridge; and on succeeding to his father's property, resided principally at Bath. He wrote the satirical poem, "The New Bath Guide," which obtained a rapid popularity. It is a clever and amusing sketch of an odd phase of English social life, largely mixed with ridicule of the "Methodists," as all earnestly religious people were then called, and of physicians. It abounds in passages grossly indecent and unfit to be republished. Strange to say, the author of this trivial and impure book has a monument in Westminster Abbey. Died, 1805.

ANSTIS, JOHN, antiquary, and the author of various works on heraldry, was born at St Neots, Cornwall, in 1669, and educated at Oxford. He was member for St Germains, and in 1718 appointed garter king at arms. Died, 1744.

ANTAIT, an Arabian chief and distinguished poet, who lived in the 6th century. His works, which form a portion of the famous *Moallakat*, are devoted to the description of his warlike deeds, and his love for the fair *Abila*. The celebrated Arabian romance, entitled "Antar," by Asmal, affords a perfect idea of the manners, opinions, and superstitions of the early Arabians; and of this there is an English version, entitled "Antar, a Bedouen Romance, translated from the Arabic by Terrick Hamilton," in 4 vols. 12mo.

ANTHEMIUS, eminent as an architect, sculptor, and mathematician. He was a native of Tralles in Lydia, and was employed by the emperor Justinian. He is remembered chiefly as the architect of the famous church of Saint Sophia, at Constantinople. It was completed according to his design by Isidorus of Miletus. Anthemius died in 534.

ANTHONY, ST, THE GREAT, the founder of monastic institutions, was born A. D. 251, at Coma, near Heraclea, a town of Upper Egypt. In 305, having sold all his property and given the proceeds to the poor, he withdrew into the desert, whither a number of disciples were attracted by his reputation for sanctity; and thus was formed the first community of monks. He afterwards went to Alexandria, to seek the honour of martyrdom amid the persecutions then raging against the Christians; but as his life was spared he again returned to the desert, and died at the great age of 105.

ANTHONY, ST, of Padua, a learned Franciscan monk, was born at Lisbon, 1195: entered the order when thirty years of age, and went to preach to the Moors of Africa; he was afterwards sent by St Francis, whom he met in Sicily, to teach theology at Bologna, Montpellier, Padua, &c. He offended the general of his order by his severity, and his fearless denunciation of all abuses, and to save him from threatened confinement Gregory IX. called him to Rome. He died at Padua, 1231; and was canonized the following year. His works, consisting chiefly of his sermons and a Moral Concordance

of the Bible, have been frequently republished.

ANTIGONUS, surnamed the One-eyed, was one of the greatest generals of Alexander the Great, on whose death, B. C. 323, he became governor of Phrygia, Lycia, and Pamphylia. After the death of Antipater he made war on Eumenes, and having defeated and put him to death, he carried on war with the other generals who shared the empire, and obtained the sovereignty of Asia in B. C. 311. Five years later he took the title of king: invaded Egypt, and failed, excited the jealousy of his rivals, who combined against him, and was defeated and slain at the battle of Ipsus, in 301.

ANTIGONUS, GONATAS, king of Macedonia, was the son of Demetrius Poliorcetes, and obtained the crown in B. C. 277, six years after his father's death. He was twice deprived of his kingdom, first by Pyrrhus, king of Epirus, and afterwards by Alexander, son of Pyrrhus. His ambitious attempts in the Peloponnesus brought him into conflict with the Achæan League. Died, B. C. 239.

ANTINES, MAUR FRANÇOIS, P, a very learned French Benedictine of the congregation of St Maur. He was born in 1688, and after distinguishing himself by the publication of several important works, projected the great work on chronology, *L'Art de Vérifier les Dates*, the first part of which appeared in 1750. Died, 1745. [See CLEMENCEY.]

ANTIOCHUS III., the Great, king of Syria, was the son of Seleucus Callinicus, and was born about B. C. 238. He succeeded his brother in 223, and after suppressing several revolts, made war on the king of Egypt, but was defeated at Raphia in Palestine, in 217. After a long war in the East, in which he made extensive conquests he again made war on Egypt, and gained the provinces he coveted, Cœle-Syria and Palestine. He was afterwards involved in war with the Romans, gave shelter to Hannibal, unsuccessfully invaded Greece, and was compelled at last to give up to the Romans all his provinces east of the Taurus, and pay an enormous sum of money. He was killed by the citizens of Elymais while pillaging their temple of Jupiter, B. C. 187.

ANTIOCHUS IV., EPIPHANES, king of Syria, was the son of the preceding, and after being many years in captivity at Rome, succeeded his brother Seleucus Philopator in B. C. 175. The chief events of his reign were the war with Egypt for the possession of Palestine and Cœle-syria, which occupied him several years; and his cruel persecution of the Jews, which provoked the insurrection in which the Maccabees distinguished themselves. His cruelty and vices gained him the title of "Epimanes," or "the Mudman." Died, B. C. 165.

ANTIPATER, the Macedonian, was the friend and minister of Philip, and his son Alexander the Great. When the latter set out to the conquest of Asia he appointed Antipater regent of Macedonia and Greece. Dissension between the regent and the queen-mother Olympias led to the appointment of Craterus in his place; but he

Greeks followed, and in B. C. 322 they were
defeated at Crannon. Antipater next made
war on Perdicas, who was soon after slain
in Egypt. Died, B. C. 319.

ANTIPHON, the Rhamnusian, an Athen-
ian orator, born, B. C. 480. He opened a
school of rhetoric at Athens, and is said to
have had Thucydides among his pupils, and
he was the first who laid down rules of
eratory. Having assisted in establishing
the tyranny of the four hundred, he was put
to death on the restoration of the popular
government, B. C. 411.

ANTISTHENES, a Greek philosopher,
founder of the Cynic school. He was a
native of Athens, and after following the
sophist Gorgias for a time, became a disciple
of Socrates, to whom he faithfully adhered.
Antisthenes opposed speculative inquiries,
and limited his teaching to practical morals.
He held that goodness was the one thing
needful, and that mere human comforts and
luxuries were to be despised. He wrote
many dialogues with great vigour and
elegance of style. Died at Athens.

ANTONELLO DA MESSINA, born, 1414;
died about 1495. He is said to have been
the first artist who introduced oil painting
into Italy. Seeing one of the works of
John van Eyck at Naples, he went to Flan-
ders to learn the new method, and spent
several years there. He then returned to
Italy, and taught it at first privately, and
afterwards publicly.

ANTONINUS, a geographical author,
the writer of a valuable Itinerary, whose
age is unknown. Hurton published an ex-
cellent commentary on it, as far as relates to
Britain.

ANTONIUS, MARCUS, a brave and elo-
quent Roman consul, who had been governor
of Cilicia, and subsequently became censor.
He was one of the greatest orators among
the Romans; and, according to Cicero, it
was owing to him that Rome became a rival
in eloquence to Greece. He was slain during
the civil war between Marius and Sulla,
B. C. 87.

ANTONIUS, MARCUS, the triumvir, was
the grandson of the preceding, and was born
about B. C. 85. He was early a profligate.
After gaining distinction as a soldier in
Syria and Egypt, he joined Julius Cæsar in
Gaul, and remained his warm partisan. He
was made questor, augur, and tribune;
contributed to the victory of Pharsalia; be-
came consul with Cæsar in B. C. 44, and of-
fered him the kingly title. After the murder
of Cæsar, Antony was opposed by Octavius
(Augustus), who defeated him at Mutina.
Soon after the two rivals came to terms, and,
with Lepidus, formed the first triumvirate.
In the proscription which followed Cicero
was sacrificed to the long-standing hatred of
Antony. The republican army led by Brutus
and Cassius was defeated at Phillippi, and
its leaders feil. Passing into Greece, and
thence into Asia, Antony met the famous
Cleopatra, queen of Egypt, whose charms
detained him long from Italy. On the death
of his wife Fulvia in 40, he married Octavia,
the sister of Augustus, whom in a few years
he shamefully divorced for the sake of Cleo-

patra. The triumvirate was renewed in 37.
After invading Parthia and Armenia Antony
assumed the airs of a despot, and provoked
the war which ended with his total defeat at
Actium and the triumph of Augustus, B. C.
31. Killed himself in Egypt, B. C. 30.

ANVARI, a Persian poet, born in Cho-
rasan. He was well versed in astrology, and
composed several books on that science; but
having failed in his predictions, he retired
from the court of the sultan Sanjar, and died
at Balkh, in 1200.

APEL, or APELLES, JOHN, a German
lawyer, and one of the earliest preachers of
the Reformation; born at Nuremberg, 1486,
and died there, 1536.

APELLES, one of the greatest of the Greek
painters. His birthplace is unknown, as are
also the dates of his birth and death. He
flourished B. C. 340—320, and was the friend
of Alexander the Great, who, it is said,
would let no one else paint his portrait. He
was especially distinguished for his repre-
sentations of female grace and beauty. His
masterpiece was the "Venus rising from the
sea," which was taken to Rome by Augustus.
His pictures of Alexander and Antigonus
were very celebrated. He wrote a work on
his art, but it is lost.

APELLICON, a peripatetic philosopher,
to whom the world is indebted for the pre-
servation of the works of Aristotle, which
he collected and bought at a vast expense,
about 90 years B. C. They were afterwards
seized by the dictator Sylla, and carried by
him to Rome.

APIAN, PETER, German mathematician
and astronomer, born in Misnia, 1495; died,
1589. Apian was the first who discovered
that the tails of comets are always projected
in a direction from the sun, and records his
observations upon five, which appeared in
the years 1531, 1532, 1533, 1538, and 1539.

APICIUS, a noted glutton in the reigns of
Augustus and Tiberius. It is recorded of
him that he spent £2,500,000 sterling in pro-
viding the luxuries of his table; and finding
his finances reduced to £250,000 he poisoned
himself for fear of starving. There were
two other epicures of the same name; one
who lived in the time of Sulla; and the other,
whose extravagance and gluttonous propen-
sities were less enormous, contemporary
with Trajan.

APION, a learned grammarian and histo-
rian, born at Oasis, Egypt, in the first cen-
tury. He studied at Alexandria, and was a
professor of rhetoric at Rome in the reign of
Tiberius. Apion was head of the embassy
sent by the Greek citizens of Alexandria to
Rome to plead against the privileges enjoyed
by their Jewish fellow-citizens, on which
occasion he was opposed by Philo. In his
"Antiquities of Egypt," he attacked the
Jews, and was answered by Josephus.

APOLLINARIS, CAIUS SOLLIUS SIDO-
NIUS, an early Christian poet, was born at
Lyons about 430. He was carefully educated,
and having married the daughter of Avitus,
who became emperor in 456, followed him to
Rome, where he rose to honour and some of
the highest offices of state, under Avitus,
Majorian, and Anthemius. He wrote paneg-
yrics in verse on each of these sovereigns.

In 472, although a layman, he was appointed bishop of Clermont in Auvergne, and renounced all his civil dignities and estates to devote himself to his spiritual duties. His extant works consist of poems and letters, which are valued for the historical facts recorded in them, and have been frequently reprinted. Died between 480 and 490.

APOLLINARIUS, CLAUDIUS, bishop of Hierapolis, Phrygia, about 177, who wrote an apology for the Christian religion, addressed to Marcus Aurelius.

APOLLINARIUS, a presbyter of Alexandria in the 4th century, who wrote a history of the Hebrews in Greek heroic verse. He died about 382. He had a son who became bishop of Laodicea, and wrote a treatise against paganism, which he sent to Julian.

APOLLODORUS, a famous painter at Athens, *n. c.* 408. Pliny mentions two pictures by him, one of a priest of Apollo at the altar, and the other of the shipwreck of Ajax.

APOLLODORUS, a celebrated architect, was born at Damascus, and lived under Trajan and Adrian. He was employed by the former in building the great stone bridge over the Danube, and other structures; but, falling into disgrace with Adrian, he lost his life through that emperor's caprice.

APOLLONIUS, of Perga, a mathematician of Alexandria, about 240 years *n. c.* He composed several curious geometrical works, of which his book on conic sections alone exists.

APOLLONIUS, RHODIUS, Greek poet, born in Egypt, but long resident at Rhodes, where he presided over a school of rhetoric. He afterwards became keeper of the celebrated library of Alexandria, *B. C.* 149, in which situation he remained until his death. The only one of his works now extant is the poem entitled "Argonautica," which is a narrative founded on the legends relating to the Argonautic expedition.

APOLLONIUS, of Tyana, a Pythagorean philosopher, was born about the commencement of the Christian era. He applied himself to the study of philosophy, and adopted the system of Pythagoras; travelled in the East beyond the limits of the empire; professed himself to be endowed with miraculous powers, and was by some set up as a rival to the founder of the Christian religion. His ascetic life, his reputed miracles and prophecies, and his wise discourses, attracted great numbers, and statues and temples were built to him. Died probably at Ephesus about *A. D.* 97. The life of this sage was written by Philostratus.

APPIANUS, an ancient historian, born at Alexandria, whence he went to Rome, in the reign of Trajan, and became an eminent pleader. He wrote the history of Rome in Greek.

APPIANI, ANDREA, a celebrated Milanese painter, born about 1750. He early showed enthusiasm for art, and attained great excellence as a fresco-painter. When the French conquered Lombardy, Appiani was much courted and flattered by them, and was sent to Paris to assist at the coronation of Napoleon. He became correspondent of the Institute, first painter to Napoleon, and

member of most of the academies of Europe. His chief work is the series of frescoes painted by order of Napoleon in the royal palace of Milan. Died, 1818.

APULIUS, LUCIUS, a Platonic philosopher who lived in the 2nd century, born at Madaura, Africa. After being educated at Carthage and Athens, he undertook extensive travels, and then settled in Africa and married a rich widow. The most celebrated of his works is the romance, entitled "Metamorphoses; or, The Golden Ass," which has been translated into almost all the modern European languages. It appears to be a satire on the crimes, frauds, and follies of priests and magicians, and on the prevalent immorality of the age. Some, however, have found or fancied a moral in the tale; and have believed it was designed to uphold paganism against Christianity. The beautiful story of Psyche forms one of the most fascinating portions of this singular work.

AQUINAS, ST THOMAS, one of the greatest of the scholastic philosophers, surnamed the "Angelic Doctor," and the "Angel of the Schools," was born in 1227, either at Aquino, or the Château of Rocca Secca, near Monte-Cassino. After studying at the University of Naples, he entered the Dominican order in 1243, notwithstanding the most bitter opposition of his parents. He then studied under Albert the Great at Cologne, and went with him to Paris. In 1253 he pleaded successfully the cause of the monks before Pope Alexander IV., and was soon after made doctor in theology at Paris. He refused all dignities, and gave himself to preaching and teaching with all modesty. In 1272 he was called to teach at Naples, and two years later was invited to assist at the council of Lyons, but he fell sick on the way, and died in a monastery, 1274. He was canonized by John XXII. in 1323, and declared a doctor of the church by Pius V. in 1567. St Thomas Aquinas was a man of philosophical genius, of great learning, of fervent piety, and just and moderate in controversy. The great aim of his teaching was to show the accord between reason and the doctrines of Christianity. His chief work is the "Summa Theologiæ," one of the grandest monuments of human thought in the middle ages. One of the leading doctrines of Aquinas, and of his followers, the Thomists, is that of grace and predestination, and this was controverted by Duns Scotus, and his followers, the Scotists. The completest edition of the works of Aquinas is that of Rome, 1570, in 17 vols. folio.

ARABELLA STUART, commonly called the Lady Arabella, was the only child of Charles Stuart, earl of Lennox, the brother of Henry lord Darnley, father to James VI., of Scotland, by Elizabeth, daughter of Sir William Cavendish. This innocent victim of jealousy and state policy, while an infant, lost her father, and thus became heiress to a large estate. Several matches were projected for her at home and abroad; and her cousin, king James, was inclined to marry her to Lord Esme Stuart, whom he had created duke of Lennox, and whom, before his marriage, he considered as his heir; but this union was prevented by Queen Elizabeth,

who held the Lady Arabella under restraint, and regarded her with a jealous eye. On the death of that queen, an abortive conspiracy was formed for setting up Arabella Stuart in opposition to her cousin James. In 1610 she was privately married to Mr William Seymour, grandson of the earl of Hertford; by which union she fell under the royal displeasure, was placed in confinement at Lambeth, and her husband sent to the Tower. Shortly afterwards they separately made their escape; Mr Seymour got safe to the Continent, but the Lady Arabella was overtaken, shut up in the Tower, and passed the remainder of her life in close and melancholy confinement, which finally deprived her of her reason; and she died September 27, 1615, aged 38.

ARAGO, FRANÇOIS JEAN DOMINIQUE, one of the greatest scientific geniuses of the age, was born at Estagel, in the south of France, in 1786. At an early age he was placed at a public school at Toulouse, from which he removed to the Polytechnic School of Paris. Having passed the required examination with honour, he entered upon his studies in 1801, and rapidly rose to distinction. He left the Polytechnic to join the staff of the Observatory at Paris, and shortly after this appointment he proceeded with M. Biot to Spain, there to measure an arc of the meridian. While engaged in this difficult undertaking, war broke out between France and Spain, and, under pretence that the fires which he made on the mountains as signals to his associates, were intended to enlighten the march of the French troops, he was seized and put into prison; but escaping after a brief confinement, he reached the port of Algiers, and after enduring many hardships, and encountering many dangers both by sea and land, he was safely landed in France, in 1809. On reaching Paris, as a reward for his zeal he was elected, at the early age of 23, a member of the Academy of Sciences, in the place of the illustrious Lalande. He was appointed about the same time a Professor of the Ecole Polytechnique; and now commenced that eminent scientific career which he pursued with undiminished vigour to within a few days of his death. We cannot here enumerate the brilliant achievements by which Arago subsequently built up his world-wide reputation. His determination of the diameters of the planets, afterwards adopted by Laplace, the discovery of coloured polarization, and that of magnetism by rotation, which gained him the Copley medal of the Royal Society, are only specimens of his contributions to scientific literature; but the subjects in which he gained the highest distinction are Magnetic and Rotatory Polarization, Magnetism by the action of Currents, and Magnetism by Rotation: and to him we owe the invention of the Polariscopes. In 1830 he was nominated Director of the Observatory of the Bureau des Longitudes; and he succeeded Fourier, whose *éloge* he pronounced as Perpetual Secretary of the Academy of Sciences. The "Annuaire des Longitudes" was under his direction: and he founded, in conjunction with Gay-Lussac, the "Recueil des Annales de Physique et de Chimie." As

a politician, often occupying a conspicuous position, Arago was earnest, simple-minded, and consistent. When a youth, he avowed his republican principles by refusing to subscribe to the constitution of the empire. After the revolution of 1830, which placed Louis Philippe on the throne, he occupied a distinguished place in the Chamber of Deputies. In 1848, on the downfall of the monarchy, he was named a member of the Provisional Government, and as Minister of War and Marine he succeeded in obtaining the adhesion of the whole of that important service to the republic; but after the social outbreak of June, 1848, which ended in the temporary dictatorship of General Cavaignac, he finished his political career. To his honour it must be stated that he was ready to renounce his hardly earned position at the Observatory rather than take the new oath to Louis Napoleon Buonaparte, after the *coup d'état* of December, 1851; and to the credit of the Government, we must add that it consented to forego the execution. "In the History of Philosophy," says a contemporary writer, "the name of M. Arago will have enduring fame, not from the discoveries which he made, but from the aid which he gave to science in all its departments by his prompt and unflinching penetration. A member of nearly all the scientific Societies of Europe, he was the point uniting them in a common bond. In every part of the civilized world his name was regarded with reverence, and all scientific communities felt that they had lost a friend when they heard of the death of the Astronomer of France." Died, 1853.

ARAM, EUGENE, was the son of a gardener, and a native of Yorkshire, 1704. Though destitute of the advantages of early education, he made considerable progress in the mathematics; then applied to the Latin tongue; and afterwards studied Greek. In 1734 he became usher in a school at Knaresborough, where he married. In 1744 he taught Latin and writing in London; and in 1757, he assisted in the free-school at Lynn. During this period he studied history, antiquity, heraldry, and botany, wrote poetry, and became proficient in the Hebrew, Arabic, and Chaldee languages. In the following year he was apprehended at Lynn for the murder of Daniel Clarke, a shoemaker, of Knaresborough, which took place thirteen years before, and for which he was tried at York, Aug. 3, 1759. He made a most skilful defence, but was found guilty. The next morning he confessed his crime, attributing it to his suspicion of Clarke's having a criminal intercourse with his wife. Having ineffectually endeavoured to commit suicide in the night, he was conveyed in a state of stupor to the gallows, and afterwards hung in chains in Knaresborough Forest. The singular discovery of Clarke's mysterious murder, and its commission by a man of Aram's otherwise irreproachable character, learned acquirements, and scholastic habits, together with his remarkable defence, excited a high degree of interest, and the melancholy tale has served as a basis for the enchanting fictions of a novelist and the exquisite pathos of a poet.

ARATUS, Greek poet and astronomer, born in Cilicia, about 300 B.C. He is known as the author of two elegant poems on astronomical subjects, entitled "Phænomena" and "Diosmeia," which became very popular, and were the subjects of many commentaries and translations. The former was translated by Cicero into Latin; and St Paul is supposed to quote a passage from it in his preaching at Athens.

ARATUS, of Sicily, general of the Achaean League, was born B.C. 271. He was brought up at Argos, and first distinguished himself by the surprise of his native city in 231, and its deliverance from the tyranny of Nicocles. The union of Sicily with the Achaean League followed. The return of numerous exiles occasioned some serious difficulties, in the settlement of which Aratus acted a wise and useful part. In 215 he first became general of the League, and soon after he made himself master of Corinth and expelled the Macedonians. Several other cities then joined the League. War with the Ætolians and with the Spartans, under Cleomenes, occupied him next, and Aratus sought the aid of Antigonus, king of Macedonia, who defeated Cleomenes at Sellasia, in 222. Disputes arose between Aratus and Philip, the successor of Antigonus, and Aratus was poisoned by order of Philip, B.C. 213. He was buried at Sicily, and a religious festival was annually celebrated in his honour.

ARAÚJO D'AZEVEDO, ANTONIO, Count of Barea, a Portuguese statesman, was born in 1752. After receiving a good education at Oporto and Coimbra, he was introduced at court, and was sent ambassador to the Hague, in 1789. On his way he visited London and Paris, and became acquainted with many eminent men in both capitals. In 1797 he negotiated a treaty of peace between France and Portugal, which, however, was cancelled by the Directory, and Araújo was for a short time imprisoned in the Temple. He afterwards visited Germany, and became minister of Portugal at St Petersburg. In 1803 he was recalled, and became secretary of state, and soon after minister of foreign affairs and of war. His incapacity for such offices soon appeared; for although he adopted many wise measures for the internal improvement of his country, he appeared totally blind to the projects of Napoleon with respect to the Peninsula. Great indignation was excited against him, and he accompanied the royal family to Brazil, where he retained the favour of the prince, and rendered important services to commerce and manufactures. Died, 1817.

ARBOGAST, LOUIS FR. ANT., a French geometer, professor of mathematics at Strasburg, associate of the Institute, deputy to the National Convention, and member of many learned societies. Died, 1803.

ARBOGASTES, a Gaul by birth, and a soldier of fortune, who raised himself by his merit to the title of count, under the emperor Gratian, after whose death he entered into the service of Valentinian the Younger and Theodosius: by the latter of whom he was sent into Gaul to oppose Victor, son of Maximus, whom he defeated and killed. Arbogastes then ingratiated himself with

the army, who raised him to the post of general, without consulting the court; but, after the departure of Theodosius for Constantinople, he filled every post with his creatures, and reduced Valentinian to dependence upon his will. The young emperor was shortly afterwards found dead; and Arbogastes, not choosing to assume the purple himself, set up the rhetorician Eugenius, whom he had raised to the rank of master of the offices. Theodosius immediately prepared for war against the usurper, whom he totally defeated. Arbogastes escaped to the mountains, where he wandered for some time, and at length put an end to his life, about 395.

ARBORIO DE GATTINARA. [GATTINARA.]

ARBUTHNOT, ALEXANDER, Scottish jurist, was born in 1538, and died in 1683. He became Principal of King's College, Aberdeen, edited Ruchanan's History of Scotland, and was a strenuous champion of the Reformation.

ARBUTHNOT, JOHN, physician and miscellaneous writer, was born in Scotland, in 1675. After obtaining his degree at Aberdeen he settled in London, and in 1709 was named physician to Queen Anne, an office which he held till her death. He was noted as a wit, and was the associate of Pope and Swift. He contributed to the "Memoirs of Martinus Scribberus," wrote a witty political pamphlet, entitled "The History of John Bull," several medical works, and a useful account of Ancient Measures, Weights, and Coins, and died in 1735.

ARC, JOAN OF. [JOAN OF ARC.]

ARCESILAUS, a Greek philosopher, the founder of the second or middle academy, was born at Pitane, in Æolia. He became head of the academy at Athens, about B.C. 241. He maintained that truth is unattainable by man, and rejected as false and delusive the testimony of the senses.

ARCHELAUS, king of Macedonia, natural son of Perdiccas II., whom he succeeded, after murdering his brother Aleetas. He liberally encouraged literature and the arts, and entertained and patronized Euripides and Zeuxis. He died about B.C. 398.

ARCHELAUS, a Greek philosopher, was the disciple and successor of Anaxagoras at Lampsacus, but removed afterwards to Athens, where he is said by some to have had Socrates for a pupil.

ARCHENHOLZ, JOHANN WILHELM VON, a very voluminous German author; born, 1743; died, 1812. His two most important works are "Annals of British History," 20 vols., and a "History of the Seven Years' War."

ARCHILOCHUS, a celebrated lyric poet of Greece, was born in the island of Paros, and though the son of a slave, was descended from a noble family. He chiefly distinguished himself by the vehemence of his satire, and is said to have been the inventor of Iambic verse. He settled with a colony in Thasos, where he disgraced himself by running away in a battle with the Thracians, and justified it. He flourished about B.C. 710—670. Fragments only of his poems remain.

ARCHIMEDES, the most celebrated ma- thematician among the ancients, was a native of Syracuse, and related to king Hieron. He was equally skilled in the sciences of astronomy, geometry, mechanics, hydrostatics, and optics; his aptness in solving problems had become proverbial in Cicero's days, and his singular ingenuity in the invention and construction of warlike engines, is much dwelt upon by Livy. The combination of pulleys for raising immense weights, the endless screw, a sphere to represent the motions of the heavenly bodies, &c., were invented by him; but his genius for invention was never more signally displayed than in the defence of Syracuse, when it was besieged by Marcellus; although the wonderful and well-known story that among other astonishing novelties, he produced a burning glass, composed of reflecting mirrors, by which he fired the enemy's fleet, is most likely a fiction of later times: no mention of such a circumstance occurring earlier than the twelfth century. At length, however, the city was taken by storm, and Archimedes, then in his 74th year, was among the slain, B.C. 212. The neglected burial-place of this great mathematician was discovered by Cicero. Of the numerous works of Archimedes nine have come down to us. They have been translated into French and English.

ARCHYTAS, a Pythagorean philosopher and mathematician of Tarentum, flourished about 400 B.C. He was one of the first who applied the theory of mathematics to practical purposes.

ARCO, NICHOLAS, Count, a Latin poet, born at Arco, in the Tyrol, 1479; died, 1546.

ARCON, IRAN CLAUDE ELEGNORE LEMICHAUD D', a French officer, born at Pontarlier, 1733; died, 1800. He distinguished himself at the siege of Cassel, became general of division, inspector of fortifications, member of the Institute, and senator; and was the inventor of the famous floating batteries used at the siege of Gibraltar in 1782.

ARENDT, MARTIN FREDERIC, a celebrated traveller, whose object was the cultivation of science, was born at Altona, in 1769. He commenced his travels in 1798, visiting the northern parts of Europe, and making researches into the antiquities of the countries through which he passed. He afterwards travelled through Spain, Italy, and Hungary; and it was his practice to carry all his papers with him, live on the charity of others, and sleep in the open air. Died, 1824.

ARETEUS, a Greek physician in the time of Vespasian; his works are held in great esteem.

ARETIN, JOHANN CHRISTOPH FRIEDRICH, Baron von, born in 1773; a laborious German bibliographer, curator of the Royal Library at Munich, and member of the most famous German academies. Among his works are, a "History of the Jews of Bavaria;" "On the most ancient monuments of Printing in Bavaria;" and treatises on mnemonics, a universal language, the divining rod, &c. He edited the "Aurora" in 1806, and published the "Nouvel Indicateur Littéraire," at Tübingen, in 1808. Died, 1824.

ARETINO, GUIDO, or GUIDO D'AREZZO, was born about 995. He was brought up in a monastery of the Benedictine order, where he applied himself to the study of music, and being dissatisfied with the system of notation then in use devised a new one. He had the honour of explaining his invention to the Pope, John XIX. He introduced the use of the lines and spaces, and of the syllables ut, re, mi, sol, &c., and left several works on his art.

ARETINO, LEONARDO, or LEONARDO BRUNI, an Italian historian, born at Arezzo, 1370; died, 1443. He was secretary to several popes, was present at the Council of Constance, and afterwards became chancellor to the republic of Florence. He was a prolific writer, but many of his works were mere compilations and are forgotten. He made translations from many Greek authors, wrote Lives of the poets Dante and Petrarch, and a History of Florence. The last is his most important work.

ARETINO, an Italian satirical writer of great celebrity, was born at Arezzo, in Tuscany, in 1492; and who, though occasionally as just as he was severe, was a thoroughly profligate and selfish man, an unprincipled and obscene writer, and one of the most reckless libellers that ever lived. He obtained a high reputation, was patronized by sovereigns, and enjoyed the friendship of artists and poets, Michael Angelo, Titian, and Tasso. He even wrote several religious treatises, and a Paraphrase of seven Psalms. His bitter satire on the scandalous lives of the nuns, married women, and mistresses of the cardinals, &c., was every where read with disgusting avidity. A multitude of satires on all the European sovereigns, earned him the title of "Scourge of Princes." By some he was bribed to silence; by others, punished. At Venice, where he lived from 1527 till the time of his death, he once received a sound beating at the hands of the English ambassador, whom he had offended by a false charge. He died in 1557.

ARGAND, AIME, the inventor of the Argand lamp, was born at Geneva. His first lamp was however made in England, in 1782. He was involved in several irritating contests to maintain his claim as inventor, against two Frenchmen, each of whom made some modification of form in the lamp. Died in England, 1803.

ARGELLATI, FILIPPO, a very learned Italian printer, born at Bologna in 1685. From Bologna he removed to Milan, to superintend the printing of Muratori's great collection entitled "Scriptores Italarum Kerum," in the preparation and editing of which he took a large and important part. The work was published under the auspices of the Emperor Charles VI., who granted Argellati a pension, and made him one of his secretaries. Many other valuable works issued from his press. Died at Milan, 1755.

ARGELLATI, FRANCISCO, son of the above, a distinguished littérateur and author of a work entitled "Decamerone," written in imitation of Boccaccio. Died in 1754.

ARGENS, JEAN BAPTISTE DE BOYER, Marquis of, French miscellaneous writer, born, at Aix, in 1704. He at first chose the

profession of arms, and was wounded at the sieges of Kehl and Philippsburg, but afterwards turned his attention to literary pursuits; went to Holland, and while there wrote his voluminous "Lettres Juives," "Lettres Chinoises," and "Lettres Cabalistiques." He was invited by Frederic II. the Great, king of Prussia, to his court, and made one of his chamberlains, and director of the Academy. Died, 1771.

ARGYROPIUS, JOHN, one of the learned men who, in the 15th century, under the patronage of the Medici, contributed to the revival of Greek learning. In addition to his exertions as a teacher and lecturer, he published translations from Aristotle, and a commentary on the Ethics of that philosopher.

ARIALDUS, ST. deacon of Milan, who, in 1056, took a leading part in the agitations which arose there respecting the licentious lives of the clergy and the obligation of celibacy. He was excommunicated with his associate Landulfus by a provincial synod, but the pope annulled the sentence and encouraged them to persevere. Embassies and letters were sent by Stephen X., Nicholas II., and Alexander II. to Milan, and serious tumults occurred on several occasions. At length Arialdus procured a bull of excommunication against the archbishop of Milan, who roused the popular indignation by announcing it in the cathedral, and laid an interdict on the diocese. Arialdus fled, but was arrested and murdered on a lonely island of the Lago Maggiore, in June, 1066.

ARIAS MONTANUS. [MONTANUS.]

ARION, an early Greek poet and musician, who flourished in the 7th century B. C. He was a native of Lesbos, lived long at the court of Periander at Corinth, and invented, it is said, the dithyrambic verse. It is of Arion that the graceful story is told of an escape from murder by sailors, by charming the dolphins with his music and riding over the waves on the back of one which bore him safe home.

ARIOSTI, ATTILIO, an Italian musical composer, was born at Bologna about 1660. In 1698 he went to Berlin, where he met Handel, whose friend and rival he became. He visited England in 1716, and again four years later, when he was employed with Handel and Bononcini, at the Italian Opera. He left England in 1728, and nothing further is known of him.

ARIOSTO, LUDOVICO, one of the greatest poets of Italy, was born in 1474, at Reggio, near Modena, of which town his father was governor. He was set to study law, but abandoned it in disgust and gave himself up to literature. After a short residence at Rome, where he composed some comedies, he settled at Ferrara, and entered the service of Cardinal Ippolito of Este, who employed him in political negotiations. It was amidst the constant pressure of official duties that he wrote his great epic, the "Orlando Furioso," which occupied his leisure for eleven years, and was published in 1516. The poet was charged, in 1522, with the suppression of brigandage in some mountain districts, and succeeded well. His next task was the direction of a theatre at Ferrara.

Died, 1533. The "Orlando," which celebrates the semi-mythical achievements of the Paladins of Charlemagne, in the wars between the Christians and the Moors, became immediately popular, and has since been translated into all European languages, and passed through innumerable editions. There are several English versions, of which Mr Rose's is most esteemed for fidelity and elegance. Ariosto wrote also some vigorous satires, several comedies, and other poems.

ARISTARCHUS, Greek critic and grammarian, was a native of Samothrace, and flourished about a century and a half B. C. Having settled at Alexandria, he was made tutor to the son of Ptolemy Philometor. He succeeded his master, Aristophanes of Byzantium, as head of the grammatical school of Alexandria. The chief labour of his life was his revision of the text of the Iliad and the Odyssey. He divided these poems into separate books, and wrote commentaries on them. His critical judgments were very severe, and his principles of criticism were stoutly opposed by many eminent men. He died at Cyprus in his 72nd year; and, as some assert, by voluntary starvation.

ARISTARCHIUS, the Saonian, a Greek astronomer, who flourished about 280 B. C. He is said to be the first who knew of the earth's motion on its own axis; and a work of his, of which an edition in Greek and Latin was published by Dr Wallis, in 1688, treats of the magnitudes and distances of the sun and moon.

ARISTEAS, a Jew, in the employment of Ptolemy Philadelphus. He is said to have assisted in the Septuagint translation of the Bible; and a history of it is attributed to him, but on no satisfactory grounds.

ARISTIDES, an Athenian patriot, whose unbending integrity procured him the name of "The Just." He was a great admirer of the laws of Lycurgus, and opposed to the democratic party headed by Themistocles. At the battle of Marathon he was next in command to Miltiades, and bore himself with great intrepidity. This caused him to be made archon in the following year; but his rigid integrity in this office led to so strong an opposition by the popular party, that he was ostracised. He was recalled from banishment to oppose the Persians under Xerxes, and, both at Salamis and Platæa, exerted himself to the utmost to serve and save his country. A still higher proof was given of his love of justice by his efforts, though ineffectual, to save his rival, Themistocles, from banishment; and by the fact, that though he had borne all the highest offices of the state, he was very poor at his death, which took place in 467 B. C.

ARISTIDES, JELIUS, a native of Adriani, in Mysia; an orator of great ability during the reigns of Antoninus, Aurelius, and Commodus. An edition of his works was published in two 4to volumes, Oxford, 1722.

ARISTIDES, a Christian philosopher, of Athens, in the 2nd century. Jerome praises his "Apology for the Christian Faith," which was presented to the Emperor Hadrian in the year 125; but none of his writings are known to be extant.

ARISTIDES, a painter of Thebes in the 4th century B. C., famous for his power of representing the passions.

ARISTIPPUS, founder of the Cyrenic school of philosophers, was born at Cyrene about four centuries B. C. He became a pupil of Socrates, but his mode of life was luxurious and effeminate, and opposing both the theory and example of his master, he made pleasure the chief good. At Corinth he was the companion of the courtesan Lais; and, at Syracuse, he was favoured by the tyrant, Dionysius, to whom, in common with many other philosophers, he paid his court. It does not, however, appear that he became a mere slave to his passions. He established a school of philosophy at Cyrene, which continued for about a century, when it was merged in or superseded by the school of Epicurus.

ARISTOGITON, an Athenian, the friend of Harmodius, with whom he conspired, B. C. 314, against the tyrants Hippias and Hipparchus. This conspiracy, prompted by the passion of revenge for a personal offence and insult, was only partly successful, Hipparchus being slain, and Harmodius being immediately killed by the soldiers. Aristogiton was afterwards captured, tortured, and put to death by Hippias. After the expulsion of the latter the people, by a strange confusion and perversion of feeling, turned the murderers into martyrs of liberty, made songs and set up statues to their honour, and conferred political privileges on their descendants.

ARISTOMENES, the Messenian legendary hero, a descendant of the royal family of Messenia, who roused his countrymen, in conjunction with the Arcadians and Argives, to commence the second Messenian war, B. C. 685, in order to shake off the yoke of Sparta. Defeated after several years' brave fighting he retired to Ira, and there held his ground for 11 years. At last he was taken by the Spartans, but miraculously escaped, and died in the island of Rhodes.

ARISTON, of Cnidos, a stoic philosopher, B. C. 260, who held logic to be useless, the science of nature unattainable, and morals the only study worthy the pursuit of the wise man.

ARISTON, an Aristotelian philosopher, of Ceos, B. C. 230.

ARISTOPHANES, the Greek comic poet, was born at Athens about B. C. 450. Nothing is known of his life except that he went with a colony to Ægina, and had estates there. He was the contemporary of Socrates, Demosthenes, and Euripides. He is said to have written 54 plays, but of these only eleven have come down to us. With the utmost boldness and licence he directed his terrible satire not only against the chief political and social evils of the time—especially the warlike propensities of the people, the fondness for lawsuits, and the teaching of the sophists—but against the leading men of the day, especially Cleon the popular favourite, and the philosopher Socrates, whom he chooses to ridicule as one of the sophists. His works, therefore, present a vivid, if exaggerated, picture of Athenian life and manners. For purity and elegance of style

he is unsurpassed. The titles of his works are "The Acharnians;" "The Knights" (against Cleon, and the most angry and bitter of his works); "The Clouds" (against Socrates); "The Wasps;" "The Birds;" "The Frogs" (literary criticisms); "Plutus;" &c.

ARISTOTLE, the great founder of the peripatetic school of philosophers, was born at Stagira, in Macedonia, B. C. 381. At the age of 17, he became a pupil of Plato, who called him the "mind" of his school. The fame of his abilities having reached Philip of Macedonia, that prince made him tutor to his son, Alexander the Great; and he so carefully attended the young prince, that Philip rebuilt the town of Stagira, which he had razed, and restored the expelled inhabitants to their town and privileges. When Alexander set out on his expedition to Asia, Aristotle returned to Athens, and obtained leave to occupy the Lyceum as a school of philosophy, over which he presided for 13 years, and which was called, probably from his habit of walking as he lectured, the *peripatetic*. Suspected of political sympathy with Macedonia, he was accused of impiety, and retired to Chalcis, remarking, in allusion to the death of Socrates, that he did not wish to see the Athenians a second time guilty of crime against philosophy. He remained at Chalcis till his death, in the 63rd year of his age, B. C. 322. Small and slender in person, and latterly of feeble health, Aristotle accomplished in his day the task of a giant. His genius embraced all the sciences of his time, and invented new ones. His extant works include treatises on physics, metaphysics, logic (of which he justly claims to be the inventor), rhetoric, politics, ethics, and the natural history of animals. The last-named is one of his most valuable works. His great pupil, Alexander, aided him in his researches by supplying him with funds, and by having collections of foreign animals made and sent to him for study. The philosophy of Aristotle attained immense influence, and was supreme in Europe during the middle ages. His word was another Bible, and to question his authority was heresy. After the revival of literature, and the Reformation, the magic of his name was lost. And now, after that natural reaction and a period of neglect, he is again studied and praised as one of the greatest intellects that has appeared in the world.

ARISTOXENUS, philosopher and musician, pupil of Aristotle. His works are said to have been very numerous, but none have come down to us except his Harmonic Elements, which is considered to be the oldest musical treatise existing.

ARIUS, the celebrated theologian, was a presbyter of Alexandria in the 4th century. Having maintained that the Son and the Father were essentially distinct, and that the Son was created out of nothing by the will of the Father, Alexander, the bishop, in opposition to whose preaching he taught this doctrine, assembled a synod in 321, in which the doctrine was condemned, and Arius, and those who sided with him, excommunicated. Arius then travelled in Asia, and went on preaching. Eusebius, bishop of Nicomedia, was friendly to him,

and convoked a synod in his favour. But in 325 the great council of Nice was held, at which the Emperor Constantine was present, and the great Athanasius took a prominent part. Arius and his doctrine was again condemned, and it was made a capital crime to possess his works. He was, after three years' recalled from banishment by Constantine, presented several confessions of faith, apparently in accordance with the Nicene creed, but Athanasius, now bishop of Alexandria, persisted in refusing him readmission to the church. In 336, however, he was just about to be received again into the pale of the church, when he died suddenly. His friends said that he was poisoned; his enemies, that it was the judgment of God. The controversies growing out of the teaching of Arius, though touching a matter lying wholly beyond the limits of human reason, agitated the church for a century. Arius wrote a book entitled "Thalia," and a collection of songs, by which he hoped to spread his views among the common people, but only a few fragments of his writings now remain.

ARKWRIGHT, SIR RICHARD, the inventor of machinery by which our cotton manufactures have been increased to an almost incredible extent, was born at Preston, Lancashire, in 1732; and his first employment was that of a barber. Notwithstanding the obstacles thrown in his way at first by poverty, and want of mechanical skill to reduce his inventions to practice, and afterwards by the unprincipled invasion of his rights by rival manufacturers, he realized a very large fortune; and his machines, but little improved upon, have been the means of almost innumerable fortunes made by others. Mr Arkwright was not knighted, as many suppose, on account of his inventions, but on the occasion of presenting an address as high sheriff of the county of Derby, congratulating George III. on the failure of the attempt made on his life by Margaret Nicholson. Died, 1792.

ARLAUD, JACQUES ANTOINE, miniature painter, a native of Geneva. After distinguishing himself at Paris, where he taught the duke of Orleans, he came to London, made a fortune by his art, gained the friendship of Sir Isaac Newton, and returned in 1729 to Geneva, where he died. His last work was the "Leda," which he copied from a sculpture of Michael Angelo, and afterwards destroyed by cutting it to pieces. A copy of it was sold in the artist's lifetime for 600 guineas. Born, 1668; died, 1743.

ARMFELDT, GUSTAVUS MAURICE, Count, a Swedish statesman of some note. He held several important offices in Russia. Died, 1814.

ARMINIUS, or HERMANN, who by his intrepidity and success acquired the title of "the Deliverer of Germany," was the son of Sigimer, a chief of the Cherusci. Having been sent to Rome as a hostage, he was there educated, served in the Roman army, and for his valour was raised to citizenship, and admitted to the class of *equites*. But his attachment to his native country induced him to revolt, and he became one of the most powerful leaders of the discontented German tribes.

He drew Varus, the Roman commander on the Rhine, into that ambuscade in which he and nearly all his troops were slain, and for some time baffled Germanicus; but he was twice defeated, and his wife was captured by the Romans. After having for years withstood the vast power of Rome, Arminius was assassinated by one of his own countrymen, in the 37th year of his age, A.D. 19.

ARMINIUS, or HARMENSEN, JACOB, theologian, from whom the sect of the Arminians took its name, was born in Holland in 1560. He was sent at the age of 15 to Leyden, and studied at the university six years, after which he went to Geneva, where Beza then taught theology. After visiting Basel and Rome he became pastor at Amsterdam in 1588. A change soon began to take place in his theological opinions, suspicions of his unsoundness arose, and at length, after being named Professor of Theology at Leyden, he propounded the doctrines distinctive of his sect, and was involved in harassing controversies, especially with his fellow-professor Gomar. He was supported by several eminent men, but his health failed, and he died in 1609. The system of Arminius was a protest against the rigid Calvinistic doctrine of grace and predestination.

ARMSTRONG, JOHN, poet and physician, was born at Castleton, in Roxburghshire, in 1709. In 1760 he was appointed physician to the army in Germany; in 1771 he made the tour of Italy, with Fuseli the painter; and died in 1775. His chief work is the poem on "The Art of Preserving Health," which was once very popular. His medical works and short poems had but limited success even in his own time. He lived on terms of intimacy with the wits and poets of the day, and contributed to Thomson's *Castle of Indolence* the stanzas descriptive of the diseases resulting from indolence.

ARMSTRONG, JOHN, physician and medical writer, celebrated for his researches concerning the causes and phenomena of febrile diseases, was born at Bishopwearmouth, Durham, in 1784. He took his degree of M.D. at Edinburgh, in 1807, and was chosen physician to the Sutherland Dispensary in 1811; but finding that his professional works had made him a name in the metropolis, he resigned his situation in 1818, and commenced practice in London. In 1821 he engaged with Mr E. Grainger in the formation of a medical school in Webb Street, Borough; where he delivered lectures on the practice of physic. In 1826 he joined Dr Boot and Mr E. Bennett in establishing a new school of medicine in Dean Street, Soho, but shortly after relinquished his connection with it. He died in 1829, of phthisis pulmonalis. Few men were ever more anxiously devoted to the duties of their profession than Dr Armstrong, and few have been so successful in their elucidation of medical science. His works are numerous, and highly valuable.

or of the Vaudois,
1641. He formed
their native coun-

try the scattered survivors of the Vaudois, who had been driven away by the persecutions of the duke of Savoy. The enterprise was undertaken in 1689, and notwithstanding the co-operation of a large French force with the army of the duke, was conducted to a successful termination, after nearly a year's struggle. At the last moment a breach occurred between France and Savoy. Eighteen battles were fought, yet with incredibly small loss to the Vaudois. Arnaud distinguished himself in this daring enterprise no less by his earnest piety than by heroic courage and great practical sagacity. He afterwards did good service under Marlborough in the war of the Succession. When the Vaudois were again exiled he accompanied them, and discharged the duties of pastor at Schönberg till his death. He wrote a narrative of his great enterprise. Died, 1721.

ARNAULD, ANTOINE, a French theologian, was born at Paris in 1612. Doctor of the Sorbonne in 1641, he early distinguished himself as an opponent of the Jesuits and a supporter of Jansenius. He was expelled from the Sorbonne and retired to Port-Royal, his sister Anselme being then abbess. He left his retreat in 1668 and was presented to Louis XIV.; but his renewed attacks on the Jesuits brought fresh persecution on him, and he was exiled. He settled at Brussels and kept up his controversial warfare to the end. He was distinguished for his piety, his learning, and the purity and simplicity of his life, and enjoyed the friendship of Pascal, Nicole, Malebranche, &c. Among his numerous works, filling at first 100 volumes, are "De la Perpetuité de la Foi," "Morale Pratique des Jésuites," "Traité des vraies et des fausses Idées," and several of the Port-Royal educational treatises. Died at Brussels, 1694.

ARNAULD, ANGELIQUE, or ANGELIQUE DE ST JEAN, abbess of Port-Royal, was born in 1624. She was educated at Port-Royal, and became one of the nuns at the age of twenty. She was one of the chosen victims of the long persecution carried on under the influence of the Jesuits against the Port-Royalists. In 1669 she was appointed prioress, and nine years later abbess, an office which she held till her death. She was author of "Mémoires pour servir à l'histoire de Port-Royal," and other works. Died, 1684.

ARNDT, ERNST MORITZ, a distinguished German patriot, poet, and miscellaneous writer, was born in 1769. He was a native of the Isle of Rugen, was educated at Greifswald and Jena, and was one of the first to rouse his countrymen to shake off the tyranny of Napoleon. His patriotic songs and eloquent pamphlets appeared in rapid succession, and contributed powerfully to the liberation of Germany. In 1818 he became Professor of Modern History at Bonn, but was soon prohibited from lecturing, and was only restored to his post in 1840. He assisted at the meeting of the National Assembly at Frankfurt, in 1848. Among his numerous works are the "Geist der Zeit," which appeared in 1807, a History of Scotland, History of Sweden under Gustavus III. and IV., "Mährchen und Jugenderinnerungen," and

'Erinnerungen aus dem änszern Leben." One of his best-known songs is, "Was ist des Deutschen Vaterland?" Died, 1860.

ARNDT, or ARND, JOHANN, a German theologian, born in the duchy of Anhalt, 1555. He was pastor at Quedlinburg, Brunswick, and finally at Zell, and superintendent of the churches of the duchy of Lüneburg. He made himself known by a work "On True Christianity," a protest against prevailing laxity in morals, which was translated into Latin, French, and most modern languages. Died, 1621.

ARNE, Dr THOMAS AUGUSTINE, a celebrated musical composer. At the early age of 18, he produced an opera entitled "Rosamond," and shortly afterwards composed the music for a masque, entitled "Alfred," written by Thompson and Mallet. On the masque of Comus being adapted to the stage, Arne's music for it obtained him a high reputation. The most celebrated of his compositions is the opera of "Artaxerxes." He wrote some exquisite songs and glees, and the world-famous chorus "Rule Britannia." His sister was the celebrated Mrs Cibber. Born, 1710; died, 1778.

ARNIM, LUDWIG ACHIN VON, German poet and novelist, was born at Berlin, studied at Göttingen, and passed his life in literary leisure and independence, at Heidelberg, Berlin, and his country seat. His chief works are "Ariel's Offenbarungen," "Der Knabe Wunderhorn," "Der Wintergarten," "Gräfin Dolores," "Die Kronen-Wächter," "Die Gleichen." Died, 1831. His wife, Bettina Brentano, still more celebrated than himself, is the subject of the following notice.

ARNIM, BETTINA (ELIZABETH) VON, a celebrated German litterateur, was born at Frankfurt on the Main, in 1785. She was the sister of the poet Clemens Brentano, and from her earliest years displayed a singular fervour of poetic feeling and eccentricity of imagination. The suicide of her earliest friend, in consequence of a love-cross, affected her very painfully. She read the works of Goethe with infinite delight, and fell in love with the poet, then sixty years of age. She told her love to his mother, and began a correspondence with him in 1807. Part of this appeared subsequently under the title of "Goethe's Briefwechsel mit einem Kinde," and was translated into English by Bettina. She married the poet and novelist Ludwig von Arnim, and was left a widow in 1831. Her correspondence with her early friend, Madame von Gunderode, appeared in 1840. Her other works are, "Dies Buch gehört dem Könige," and "Ilius Pamphilus und die Ambrosia." Bettina died in January, 1850.

ARNOBIUS, an African rhetorician at Sicca, in the 3rd century. He embraced the Christian religion, and published a defence of it, under the title of "Disputations against the Heathen," which has been frequently reprinted.

ARNOLD D'AMAURI, Abbot of Clteaux, was appointed, in 1203, one of the legates of Pope Innocent III., with Peter of Castelnau and Raoul, for the conversion of the Waldenses and other "heretics" of Languedoc. He distinguished himself in his mission by

his pride, bigotry, and implacable cruelty: travelled at first in the utmost pomp, till admonished by (St) Dominic: and after the murder of Peter of Castelnau had the highest confidence of the pope. When the crusade was begun, Arnold was captain-general of the army, and his cry was "Slay all, God will know his own." He was the main instrument of carrying out the pope's policy of deceiving the count of Toulouse by feigned reconciliation, and so leading him on more surely to ruin. In 1211 he was rewarded with the archbishopric of Narbonne, and four years later took a leading part in the Fourth Lateran Council, which deposed Count Raymond and awarded his dominions to Simon de Montfort.

ARNOLD of Brescia, an Italian monk of the twelfth century, who attracted the confidence of the people and the bitter hatred of the priesthood by his earnest preaching against the temporal power and possessions and the corruptions of the church. After an exile from Italy, during which he preached in France and Switzerland, he took the lead in a revolt of the Roman people, and for ten years held his ground as master of the city. At last, terrified by the interdict laid on Rome by Adrian IV., the people banished their chosen chief, and shortly after, 1155, they saw him burnt and his ashes thrown into the Tiber. Arnold had been a disciple of the famous Abelard, looked, however, at the practical rather than the intellectual side of things, and was fiercely opposed, as Abelard had been, by St Bernard, to whose power he fell a victim. He was one of the most distinguished early martyrs of political and religious freedom.

ARNOLD, BENEDICT, an American general, who during the early part of his career devoted his best energies to promote the cause he had espoused, and who afterwards disgraced himself by treacherously betraying it, was bred a surgeon; but on the commencement of hostilities between Great Britain and the colonies, he entered into the service of the latter, and was chosen captain of a company of volunteers at Newhaven. He soon rose to the rank of colonel, and commanded an expedition to Canada. He afterwards distinguished himself by his bravery, when commanding a flotilla on Lake Champlain, and on other occasions, and was promoted to the rank of general. He subsequently entered into negotiations with General Clinton, to whom he proposed to surrender a post of great consequence, with which Washington had entrusted him. But the capture of the officer [see ANDRÉ] sent by General Clinton, caused the plot to be discovered, and Arnold hastily escaped to the royalist quarters. He was employed under General Clinton against his former comrades, and had the rank of brigadier-general, when he retired to England, where he died, in 1801.

ARNOLD, CHRISTOPHER, a German peasant, whose energy and natural genius enabled him to become one of the most accomplished astronomers of his age. Born, 1646; died, 1697.

ARNOLD, JOHN, watchmaker, was born at Bodmin, in 1744. He made great im-

provements in the construction of chronometers, and was assisted in his labours by grants from the Board of Longitude. The detached escapement and the compensation-balance are among the improvements he introduced. Died, 1799.

ARNOLD, SAMUEL, musical composer, was born in 1740. He studied under Dr Nares, became doctor in music, Oxford, organist to the king, and in 1793 organist of Westminster Abbey. He wrote several oratorios, operas, songs, &c., edited the works of Handel, and published a collection of sacred music. Among his works are "The Prodigal Son," an oratorio, and "The Maid of the Mill," an opera. Died, 1802.

ARNOLD, THOMAS, head-master of Rugby School, and Professor of Modern History in the university of Oxford, was born in 1795. He was a native of Cowes, in the Isle of Wight, and was educated at Winchester and Oxford. He was early distinguished by that earnestness of conviction and intellectual courage which characterized him through life. He became fellow of Oriel in 1815, was ordained priest in 1828, and the same year settled at Rugby. For some years previously he had lived at Laleham, in Middlesex, where his time was devoted to the training of pupils for the universities and to literary labours. By his force of moral character and his singular faculty of governing, he effected an immense reform in Rugby School. The political and religious movements of his day engaged his warmest interest. He sought zealously to promote the social improvement of the working classes, opposed the Tractarian movement, and took a leading part in the discussions to which the foundation of London University gave rise. In 1841 he was named Regius Professor of Modern History, Oxford, but only lived to deliver one course of lectures. He left a "History of Rome," a noble work, but unfinished, an edition of Thucydides with notes and dissertations, several volumes of sermons, and a collection of Miscellaneous Works. Died, 1842.

ARNOLFO DI CAMBIO, a celebrated Italian sculptor and architect, formerly called ARNOLFO DI LAPO, and erroneously supposed to be the son of the architect Lapo, was born in 1232. He became a pupil of Nicola Pisano, and worked under him at Siena in 1267. Ten years later he was architect to Charles of Anjou, at Naples. But his greatest works are at Florence, where, about 1295, he commenced building the church of Santa Croce and the Duomo, or cathedral, called Santa Maria del Fiore. During the progress of these churches he undertook also the erection of the Palazzo Vecchio. The church of Or San Michele was built by Arnolfo for a loggia or open grain-market, and was converted into a church by Andrea Orcagna. The tomb of Cardinal de Braye, at Orvieto, is one of Arnolfo's most beautiful sculptural works. Died, 1310, without seeing any of his great buildings completed.

ARNULPH, or ERNULPHUS, bishop of Rochester in the reign of Henry I.; to whom some have assigned the authorship of the manuscript, entitled "Textus Roffensis," an

account of the But it is at Ascelin, and of the cathe Died, 1124.

account of the charters, &c., of his cathedral. But it is attributed by others to Bishop Ascelin, and also to Humphrey, a precentor of the cathedral, in the twelfth century. Died, 1124.

ARLIA, a Roman lady, who, when her husband, Cæcina Pætus, was ordered to put himself to death, for rebellion against the Emperor Claudius, perceiving him hesitate, plunged a dagger into her bosom, exclaiming, "My Pætus! it is not painful."

ARRIANUS, Greek historian, a native of Nicomedia, who took up his residence at Rome in the 2nd century. He studied philosophy under Epictetus, became a citizen of Athens and of Rome, and was made governor of Cappadocia by the Emperor Hadrian. He was subsequently made consul, and died in old age. The younger Pliny addressed to him seven of his epistles. The historical writings of Arrian were numerous, but two of them only remain entire, viz. seven books on the expedition of Alexander, a work highly esteemed for its accuracy, impartiality, and elegant style; and a book on the affairs of India; the latter being a sequel to the former. He published the discourses of his master Epictetus, and also a sketch of his philosophy, entitled a "Manual of Epictetus," which became celebrated and is still extant; a "Periplus of the Euxine," and several other works. There are some historical fragments of Arrian in Photius.

ARROWSMITH, AARON, an eminent geographer and hydrographer. His maps and charts are very numerous, and held in high estimation; and his tract, entitled "A Companion to the Map of the World," contains much valuable information. Born, 1750; died, 1823.

ARTACES I., the founder of the Parthian monarchy, and of the dynasty of the *Artacides*, flourished in the 3rd century B. C. In revenge for an insult offered to his brother by the governor of a province, he raised the standard of revolt in Parthia against Seleucus; and, having succeeded in emancipating his countrymen, they elected him their king. He reigned prosperously for 38 years.

ARTAXERXES I. surnamed Longimanus, was the son of Xerxes, king of Persia. He slew his elder brother Darius on suspicion of his being guilty of the murder of his father. Artaxerxes then ascended the throne B. C. 465, and in his time peace was restored between Persia and Athens, after a war of 51 years. He died B. C. 424.

ARTAXERXES II. MNEMON, king of Persia, succeeded his father Darius II., B. C. 405. His reign is marked by the revolt of Cyrus, his younger brother, who was assisted by the Ten Thousand Greeks, and was defeated at Cunaxa in 401. Wars with the Greeks, terminated by the Peace of Antalcidas; wars with Evagoras of Cyprus, with revolted satraps, and with Egypt, filled up his reign. The misconduct of his son Ochus troubled his last days. Died. B. C. 359.

ARTAXERXES III. or OCHUS, succeeded his father, Artaxerxes II., B. C. 359. He murdered two of his brothers, and afterwards put to death all the remaining branches of the family. In Egypt he slew the sacred bull Apis, and gave the flesh to his soldiers;

for which his eunuch, Bagoas, an Egyptian, caused him to be poisoned, and after giving the carcase to the cats, made knife handles of his bones. This happened B. C. 338.

ARTAXERXES BEHEGAN (in Persian ARD-SHIR), king of Persia, founder of the dynasty of the Sassanids, was the son of Babek and grandson of Sassan. He defeated his predecessor, Artaban, last of the Artacids, and had himself proclaimed King of Kings, B. C. 223. He restored the old religion of the Magi, made new laws, provided for their good administration, and for the education of the people, and then undertook to extend his dominions. A war with the Romans followed, B. C. 232, Alexander Severus leading an expedition into Persia. But after a contest of five years peace was made without gain to either side. Died, B. C. 238.

ARTEAGA, STEPHEN, a Spanish Jesuit of the 18th century; author of a treatise on the Beau Ideal; a history of Italian theatrical music, &c. Died, 1799.

ARTEDI, PETER, a Swedish naturalist, was born in 1705. He was sent to study theology at the University of Upsal, but gave himself up to Medicine and Natural History. He was the fellow-student of Linnæus, whom he assisted in his "Systema Naturæ," and who named a genus of plants after him, "Arteria." Artedi visited England in 1731, and in the following year attended, with Linnæus, the lectures of Boerhaave, at Leyden. He undertook to assist Albert Seba, an old naturalist and collector of Amsterdam, to prepare a description of fishes, but he was accidentally drowned in September, 1735. Artedi's great work, the "Ichthyologia," was edited by Linnæus, and published in 1738.

ARTEMISIA, queen of Halicarnassus, in Caria, and one of the allies of Xerxes at the famous battle of Salamis, B. C. 480.

ARTEMISIA, another queen of Halicarnassus, wife and successor of Mausolus, B. C. 352. She is noted for her love to him, the extraordinary grief with which she mourned his loss, and the magnificent monument which she built to his memory. This monument, called the Mausoleum, was adorned with fine Greek sculptures, portions of which were discovered in 1857, and are now in the British Museum. The monument is described in a splendid work by Mr T. C. Newton. Died, 350 B. C.

ARTEVELDE, JACOB VAN, the celebrated brewer of Ghent, who became governor of Flanders, was born about 1300. On occasion of a revolt against Count Louis, in 1339, he was chosen chief of the insurgents. He afterwards joined with Edward III. against the king of France, and assisted at the siege of Tournai, in 1340. In the truce which followed he stipulated the independence of Flanders, and became its governor. He applied himself to his difficult task with great energy and sagacity, but after several years he thought it best to erect Flanders into a kingdom, and offered the crown to the Prince of Wales. But he was massacred in a popular tumult at Ghent, in 1345.

ARTEVELDE, PHILIP VAN, son of the preceding, was chosen captain by the Ghentese, on occasion of a revolt against Count

Louis II., in 1382. He defeated Louis, near Bruges, took that city, and assumed the state of a sovereign. But Louis having obtained the assistance of France, a French army entered Flanders, led by the brave Constance de Clisson, and in the decisive battle of Roosebeck the Flemings were defeated and their leader slain, 1382.

ARTIGAS, FERNANDO JOSE, born at Monte Video, in 1760; first entered the Spanish service; quitted it, and was foremost among those who fought for independence. He subsequently, however, became an object of suspicion to the government of Buenos Ayres; and, being declared a traitor, took up arms, and possessed himself for some years of the territory called the Banda Oriental; but having sustained a defeat he was compelled to seek refuge in Paraguay, where he died in 1826.

ARUNDEL, THOMAS, archbishop of Canterbury, was born in 1553. He was son of the earl of Arundel, was made bishop of Ely at the age of twenty-two, lord chancellor about ten years later, archbishop of York in 1586, and in 1596 archbishop of Canterbury. In the following year he was impeached of high treason on various grounds, and was banished. He promoted the elevation of Henry IV., and on his accession was restored to his see. He distinguished himself by his persecution of the followers of Wickliffe, prohibited the translation and reading of the Bible, and had a chief hand in procuring the statute "De heretico comburendo." He employed his wealth munificently in the service of the Church. Died, 1614.

ARUNDEL. See HOWARD, THOMAS.

ASCHAM, ROGER, who had the honour of directing the studies of Queen Elizabeth, was born in 1515 near North Allerton, in Yorkshire. At an early age he was adopted by Sir Anthony Wingfield, who educated him with his own sons, and in 1530 sent him to St John's College, Cambridge, to complete his studies. Though brought up in the doctrines of the Church of Rome, he became a Protestant; was nominated Professor of Greek and public orator at Cambridge, and after fulfilling various other offices both in the University and the Church, became attached to the court of Queen Elizabeth as Latin secretary, and tutor to her Majesty in the learned languages. He was a man of rare accomplishments. Of his writings, the most valuable is his treatise, entitled "The Schoolmaster." It is a discourse upon education, abounding in good sense and learning, full of interest, and written in a pithy and vigorous style. A new edition of this work, carefully edited and annotated by Mr Mayor of St John's College, Cambridge, was published in 1863. Ascham wrote also a treatise on Archery, entitled "Toxophilus," for which Henry VIII. gave him a pension. Died, 1568.

ASCHAM, ANTHONY, a member of the Long Parliament, who was sent by Cromwell, in 1650, as envoy to Spain, where he and his interpreter were assassinated by some royalist exiles. He was author of a "Discourse on the Revolutions and Confusions of Governments."

ASCLEPIADES, a Greek physician; one

of many bearing the same name. He was born at Prusa, in Bithynia, and settled at Rome, probably in the early part of the first century B. C. He had a great reputation and was very successful, preferring to cure by regulation of the diet and mode of life, rather than by the administration of drugs.

ASELLI, CASPARE, an Italian anatomist of the 17th century. He was Professor of Anatomy at Pavia, and first discovered the system of vessels called lacteals. Died at Milan, 1626.

ASGILL, JOHN, miscellaneous writer, was brought up to the law, was called to the bar, and went to Ireland, where he obtained a lucrative practice, and was chosen member of the Irish parliament, in 1703. He was almost immediately expelled, on account of a pamphlet, in which he maintained that man may pass into eternal life without dying. The book was burnt by the hangman. Asgill afterwards became member of the English parliament, but was on the same ground expelled, and his book was again ordered to be burnt. He spent the last 30 years of his life in prison for debt, published numerous political and other pieces, and died in 1738.

ASH, JOHN, LL.D., a dissenting divine at Pershore, in Worcestershire, remembered as the author of a Dictionary of the English Language, on a more extensive plan than any previous one, and which is still of considerable value for the large number of provincial and obsolete words contained in it. Dr Ash was author of several other useful works. Born, 1724; died, 1779.

ASHBURNHAM, JOHN, the attendant of Charles I., was born about 1603, was early introduced at court and made groom of the bedchamber. He was a member of the Long Parliament, assisted at the treaty of Uxbridge and in other negotiations, distinguishing himself by his craft and insolence, accompanied the king from Oxford to the Scots army, and assisted his escape from Hampton Court to the Isle of Wight. During the Commonwealth he was several times banished and imprisoned, and at the Restoration entered the service of Charles II. Died, 1671.

ASHBURTON, ALEXANDER BARING, Lord, the second son of Sir Francis Baring, Bart., and for many years the head of the great mercantile house, Baring Brothers and Co., was born in 1774. After due initiation into business in London, he proceeded to the United States to conduct the Transatlantic business of the house. His political life commenced in 1812, when he entered parliament, as member for Taunton, which he continued to represent till 1820; after which he sat for Callington in successive parliament till 1831, and in 1832 he was returned for North Essex. Lord Ashburton commenced life as a Whig. In the House of Commons he spoke frequently on all subjects connected with commerce. On the formation of the Peel ministry in 1834, he became president of the Board of Trade; and in 1835 he was raised to the peerage. In 1842 he was appointed by Sir Robert Peel as a special commissioner to settle the disputes, with the United States, about the

Maine territory, which then threatened to involve this country in a war with America; and the success of his mission was eminently owing to his personal influence. Lord Ashburton continued to support the policy of Sir Robert Peel, until the final measure of free trade in corn was proposed in 1846. To this he was strenuously opposed. During a long and busy life he found leisure to cultivate the fine arts, of which he was a most liberal patron; and his collection of ancient pictures was unsurpassed by any private one in the empire. Lord Ashburton married, in 1798, the daughter of William Bingham, Esq., of Philadelphia, and by that lady, who survived him, he left a numerous family. Died, May 13, 1848.

ASHMOLE, ELIAS, a celebrated English antiquary of the 17th century. He dabbled for a time in alchemy; but fortunately for both his fame and fortune he abandoned that delusive pursuit, and applied himself to the study of Antiquities, and began to collect materials for the "History of the Order of the Garter," which he afterwards published. Having obtained, by deed of gift, the valuable collections of Tradescant, the famous gardener, he presented them, and subsequently his books and MSS. to the university of Oxford; and thus laid the foundation of the valuable Ashmolean Museum. Ashmole's claim to the Tradescant Museum was opposed by Mrs Tradescant, but the Court of Chancery established it. After his death there were published his "Antiquities of Berkshire," and his "Memoirs." Born, 1617; died, 1692.

ASHWELL, GEORGE, an English divine of the 17th century; author of several religious works. Born, 1612; died, 1693.

ASKEW, ANNE, one of the victims of the horrible persecutions in the time of Henry VIII. She was arrested for denying the doctrine of transubstantiation, and was burnt at the stake in Smithfield, having previously undergone the torture of the rack, in July, 1546.

ASKEW, ANTHONY, a physician and classical scholar of the 18th century; he studied at Cambridge, and became a Fellow of the Royal Society. He was the friend of many of the eminent men of his time, and a great lover of rare and curious books, of which he formed a large collection. Born at Kendal, 1722; died, 1774.

ASPASIA, one of the most celebrated women of the ancient world. She was a native of Miletus, and settled at Athens, where she resided in the time of Pericles. She was one of the so-called "hetærae," but was a woman of so remarkable a character and so richly cultivated mind, that she not only attracted but retained the love of the great statesman till his death. The law of Athens prohibited marriage of the citizens with foreign women, but Pericles, after separation from his wife by mutual consent, entered into as close a relation with Aspasia as he might. He was, in fact, married to her, though without the usual legal formalities. The best and highest society of Athens was found at her house, and among her guests, attracted less by her beauty than by her genius, her accomplishments, and the

charm of her conversation, was sometimes seen the wise and good Socrates himself. Pericles had a son by her, who was named after his father, and was declared legitimate by a decree of the people. The dates of the birth and death of Aspasia are not known. Pericles died B. C. 429.

ASSAROTTI, OTTAVIO GIOVANNI BATTISTA, an Italian philanthropist, born at Genoa, in 1733. At an early age he joined a society whose special object was the education of children. The case of deaf-mutes excited his sympathy, and the example of the abbé de l'Épée encouraged him to undertake the task of their instruction. He was the first to open a school for their benefit in Italy. After labouring for some years he obtained from Napoleon an endowment for the school. He devoted his fortune as well as his time to his chosen task, and died at Genoa, in 1829.

ASSCHE, HENRY VAN, a Dutch painter, born at Brussels, in 1775. He distinguished himself greatly in landscape, and became a member of the Society of Fine Arts of Brussels in 1818, and a member of the Academy of Amsterdam seven years later. In 1836 he was made a knight of the order of Leopold. Died, 1841.

ASSELYN, JOHN, a Dutch painter, who excelled in battle-pieces and historical paintings. Born, 1610; died, 1650.

ASSEMANI, GIUSEPPE SIMONE, a very learned Syrian Maronite, born about 1687. He went at an early age to Rome, and became archbishop of Tyre, and librarian of the Vatican. After visiting the East and obtaining many precious manuscripts, he published an account of the Syrian writers, entitled "Bibliotheca Orientalis Clementina Vaticana," in 4 vols. folio. He wrote several other voluminous works, and edited the works of Ephraem Syrus. Died at Rome, 1768.

ASSEMANI, SIMONE, a celebrated Orientalist, born in Syria, in 1752. He was educated at Rome, and in 1807 became Professor of Oriental Languages at the university of Padua, a post which he filled till his death. He was author of several works on Oriental Literature. Died, 1821.

ASSEMANI, STEFANO, nephew of Giuseppe Assemani, was born, 1707; became keeper of the Vatican library, and compiled the "Acta Sanctorum Martyrum."

ASSELL, a rabbi of the 5th century; one of the compilers of the Babylonian Talmud. Died, 427.

ASSER, or ASSERIUS MENEVENSIS, a learned ecclesiastic of the ninth century, a monk of St David's, and, probably, afterwards abbot or bishop, was the tutor, friend, and biographer of Alfred the Great. It is not known whether he was the same person as the Asser, bishop of Sherburne, mentioned in the Saxon Chronicle. His "Annals," notwithstanding the critical doubts which have been raised respecting them, are still believed to contain an authentic account of the life of his sovereign and friend. Died, 910.

ASTELL, MARY, the daughter of a merchant at Newcastle, and a woman of very considerable talent as a polemical disputant.

He obtained great popularity among the high church party as one of the most strenuous impugners of the principles of Locke. Born, 1668; died, 1731.

ASTLE, THOMAS, an English antiquary, was born in 1734. He settled in London, obtained employment in government offices, and became Keeper of the Public Records in the Tower. His principal work is the "Origin and Progress of Writing," which appeared in 1784. He was F.R.S. and F.S.A., and a Trustee of the British Museum. Died, 1803.

ASTON, Sir ARTHUR, a brave commander of the royalist troops in the reign of Charles I., who greatly distinguished himself at the battle of Edge hill, &c. He was governor of Drogheda in 1649, when it was taken by Cromwell, and is said to have had his brains beaten out with his own wooden leg.

ASTUC, JEAN, an eminent French physician of the 18th century. He was professor at Montpellier for thirteen years, and in 1728 went to Paris, visited Poland, and finally settled at Paris as physician to the king and professor at the Royal College. He acquired great reputation by his work "De morbis Venerelis," which was immediately translated into English. He wrote also "Memoirs on the Natural History of Languedoc," and "Memoirs of the Faculty of Medicine of Montpellier," &c. Born, 1684; died, 1760.

ATAHUALPA, or ATABALIPA, twelfth and last Inca of Peru, was made sovereign of Quito by his father, on whose death, in 1523, he contended with his brother Huascar for the throne of Peru. He defeated Huascar and imprisoned him. He is also said to have put to death more than 200 of the royal family. When Pizarro landed in Peru both the brothers sought his friendship. Atahualpa agreed to meet the Spaniards on a friendly visit near Caxamarca, and Pizarro with the foulest perfidy attacked the defenceless multitude, made a horrible massacre, and captured the Inca and imprisoned him. He was soon after tried before Pizarro and Almagro on a false accusation and sentenced to be burnt. As he consented to receive baptism his sentence was softened to strangling. Died, 1533.

ATHANASIUS, St., bishop of Alexandria, and one of the most celebrated doctors of the church, was born at Alexandria about 296. He was educated by his predecessor Alexander, spent some time with St Anthony in the desert, took a leading part at the council of Nice, defending the orthodox dogma (the *Homousian*), and combating Arius with great zeal and acuteness, and was chosen bishop in the following year, 326. For nearly half a century he sustained, with unshaken fidelity through all changes of outward fortune, the part he had chosen of champion of the catholic doctrine. Condemned by councils, thrice exiled, alternately supported and persecuted by the emperors, a wanderer at Rome, at Milan, in Gaul, and in the Egyptian desert, he remained true to himself, exercised an almost unparalleled influence, spent the last ten years of his life at Alexandria, and there died, 373. His works fill three vols. folio. There is no ground for attribut-

ing the Athanasian Creed to this eminent bishop.

ATHELSTAN, king of England, was the eldest son of Edward the Elder, on whose death in 925 he succeeded to the throne. In the following year, on the death of Sihtric, king of Northumbria, he seized his kingdom, and the other kings in the island made peace with him. The great event of his reign was the battle of Brunanburg, at which he won a complete victory over Anlaf, son of Sihtric, and the Anglo-Danes with their allies the Northmen, the Scots, and the Welsh. This battle was fought in 937. Atheistan acquired great influence abroad, and his alliance was sought by several European sovereigns. He ruled wisely, added to the laws left by his grandfather Alfred, and favoured trade, education, and religion. Died, unmarried, 940.

ATHENÆUS, a learned grammarian, born at Nauratis, in Egypt, in the third century. The only work of his now extant is entitled "The Delpnosoplists," and is a kind of commonplace-book, containing a huge collection of facts, anecdotes, and extracts on all sorts of subjects, and from a great variety of sources. Nothing is known of the life of Athenæus, except that he lived at Alexandria and then at Rome.

ATHENAGORAS, an Athenian philosopher of the second century. He became a convert to Christianity, and Clement of Alexandria was among his pupils. He wrote an "Apology for the Christians," and a treatise "On the Resurrection of the Dead."

ATHENAIS. See EUDOCIA.

ATHIAS, JOSEPH, a Jewish printer of Amsterdam in the 17th century; editor of the Bible in Hebrew, English, Spanish, and German.

ATHLONE, GODART DE REFEDE DE GINKELL, earl of, an able and brave Dutch officer, who accompanied the Prince of Orange in his expedition to England, was born at Utrecht in 1640. Some time after William's accession, he was sent to suppress the revolt of some Scotch regiments at Ipswich. He subsequently took a leading part in William's campaigns in Ireland; was at the battle of the Boyne, and after taking Athlone, gaining the battle of Aughrim, and forcing Limerick to capitulate, was rewarded with the title of Earl of Athlone. He afterwards served under William and under Marlborough in the great campaigns on the continent. Died, 1703.

ATHOL, JOHN MURRAY, duke of, is chiefly remarkable for the events which arose out of his hereditary connection with the Isle of Man. In 1781 he petitioned parliament, complaining of his father's transfer of the sovereignty of that island to the English crown in 1765, for the sum of £70,000 and an annuity of £2000, and praying for a bill to amend it. The question was lost in consequence of a counter-petition from the island; but the duke was named captain-general and governor-in-chief of the Isle of Man, from Feb. 4, 1793; and subsequently a grant of one-fourth of the customs was made to him, in hereditary succession, with an increase of the annuity. He died in 1830, aged 75.

ATKYNs, Sir ROBERT, a distinguished

lawyer and patriot, who aided in the defence of Lord William Russell, and conducted that of Sir W. Williams, speaker of the House of Commons, when prosecuted for signing the orders to print Dangerfield's narrative of the Popish Plot. He also distinguished himself by his opposition to the arbitrary measures of James II., and at the Revolution was made chief baron of the Exchequer. He subsequently was made speaker of the House of Lords, which office he held till 1693. Born, 1621; died, 1709.

ATKYNs, SIR ROBERT, son of the above, author of "The ancient and present State of Gloucester." Born, 1646; died, 1711.

ATTALUS I., king of Pergamus, succeeded his cousin Eumenes I. in B. C. 241. He greatly extended the limits of his kingdom, assisted the Ætolians against Philip of Macedonia, and afterwards joined the Romans in their war with the same sovereign. He distinguished himself also by his patronage of literature, and founded a library at Pergamus. Died, B. C. 197.

ATTERBURY, FRANCIS, an English prelate, and a preacher of consummate abilities, was born in 1662, at Milton Keynes, near Newport Pagnell, and was educated at Westminster School, whence he was sent to Christ Church, Oxford. In 1691 he took holy orders, and in 1693 was made chaplain in ordinary to the king, and lecturer at St Bride's. In these situations, and as preacher at Bridewell, he attracted much notice by the eloquence of his discourses; but his constant advocacy of high church principles exposed him to the attacks of Hoadley, and often of others of less repute. In 1700 he began a controversy on the powers and rights of convocations, in which he acquitted himself so much to the satisfaction of the party with which he sided, that he received the degree of D. D., and the thanks of the lower house of convocation. On the accession of Queen Anne, he was made her chaplain in ordinary, and shortly afterwards he received the deanery of Carlisle. His rise henceforth was rapid: he was successively made preacher at the Rolls Chapel, a canon of Exeter, dean of Christ Church, bishop of Rochester, and dean of Westminster, which last preferment he owed to the recommendation of Lord Oxford. Hitherto his course had been invariably prosperous; but the death of Queen Anne altered the whole complexion of his circumstances. His high church principles were sufficiently well known; and it is asserted that he was imprudent enough to boast, that if a sufficient guard could be obtained, he would proclaim the Pretender, and that too in full canonicals. Be this true or false, it is certain that he took several occasions to render himself obnoxious to George I., and was sufficiently active in correspondence with the friends of the Pretender to involve himself in a "Bill of Pains and Penalties." He died an exile, at Paris, in 1731.

ATTICUS, HERODES, son of Julius Atticus, acquired so much reputation as a teacher of eloquence at Athens, that he was invited by Antoninus Pius to superintend the education of his adopted sons Marcus Aurelius and Lucius Verus. He subsequently became

consul, prefect of the free cities of Asia, &c. He employed his great wealth in public works; but at the close of his life he retired to Marathon, his native place, where he died, A. D. 180.

ATTICUS, TITUS POMPONIUS, an illustrious Roman of the equestrian order, especially remembered as the friend of Cicero, was born at Rome, B. C. 109. He was a man of great wealth and also of high intellectual cultivation, and was on terms of friendship with the most eminent men of his time. An Epicurean in philosophy, he maintained a strict neutrality throughout the civil wars of Sulla and Marius, Cæsar and Pompey, Antony and Augustus, and generously gave his aid to the victims of proscription. He spent about 20 years at Athens, returning to Rome, B. C. 65. About nine years later he married and had one daughter, Pomponia, who became the wife of M. Vipsanius Agrippa. None of the writings of Atticus are now extant, but the correspondence of Cicero with him, which was carried on for many years, forms a very valuable record of the time. Died, B. C. 32.

ATTILA, king of the Huns, and one of the most celebrated leaders of the barbarian hosts which overran the Roman empire in its decline. His name and the enormous army at his command inspired such terror that he was named the "Scourge of God." After invading the Eastern empire and extorting a humiliating treaty from Theodosius II., he led his forces into Germany and Gaul, and was defeated in a great battle near Châlons-sur-Marne, in 451, by the combined armies of the Romans under Aëtius, and the Goths under their King Theodoric who fell there. He soon after passed the Alps and made himself master of northern Italy, destroying many of the principal cities. Attila died in his own country in 453. He was acknowledged sovereign of all the tribes between Gaul and the borders of China.

ATTIRET, JEAN DENIS, a French Jesuit and painter. Being appointed missionary to Pekin, he acquired great favour with the emperor Kien Long, of whose gardens he wrote a very amusing account. Born, 1702; died, 1768.

ATWOOD, GEORGE, F. R. S., an eminent mathematician; author of a "Dissertation on the Construction and Properties of Arches," and many other valuable works on mechanical and mathematical science. Born, 1745; died, 1807.

ATWOOD, THOMAS, an eminent Musician and composer, born in London, in 1767; commenced his musical education under Dr Nares, in the choir of the Chapel Royal, where he early attracted the notice and gained the patronage of the royal family. In 1783 he set out for Naples, and after studying there for a time, he proceeded to Vienna, where he reaped great advantages from the instructions of Mozart. In 1786 he was appointed organist of St Paul's cathedral, and composer to the Chapel Royal; he also held the situation of organist at the chapel of the Pavilion, Brighton. His compositions consist of dramatic pieces, numerous services and anthems, songs, glees, sonatas, and other pieces for the pianoforte.

He died March 24, 1838, and was buried in St Paul's.

AUBIGNE, THEODORE AORIPPA D'. [D'AUBIGNE.]

AUBREY, JOHN, an eminent English topographer and antiquary of the 17th century. He was a native of Easton Piers in Wiltshire, was educated at Oxford, and became a fellow of the Royal Society. He left a vast number of MSS., but only published one work, entitled "Miscellanies," a collection of popular superstitions. Some years after his death his "Perambulation of the County of Surrey" appeared, edited by Dr R. Rawlinson. Many of his MSS. are in the Ashmolean Museum at Oxford. Died, about 1700.

AUBRIET, CLAUDE, a French painter of natural history subjects. Died, 1740.

AUBRIOT, HUGUES, an eminent Frenchman, born at Dijon, who was raised to the office of director of the finances under Charles V. He was provost of the merchants of Paris in 1367, when he projected and executed many important public works for the improvement and defence of the city. In 1369 he built the famous Bastille as a fortress against the English. Subsequently he was charged with heresy and imprisoned in the Bastille, but being rescued at the time of the insurrection of the "Mallotins," he retired to Dijon and died there, 1382.

AUBRY, F., one of the French Committee of Public Safety in 1794, who aimed at counter-revolution. He deprived Buonaparte, after the siege of Toulon, of military employments, and reduced him to great distress; the latter revenged himself afterwards, by preventing his return into France, after his deportation to Cayenne.

AUBRY DE GOUGES, MARIE-OLYMPIE, a French republican, celebrated for her beauty and talents, born in 1755. She founded the popular female societies, called Tricoteuses, and was a perfect enthusiast in her political opinions. At length she was put to death by the revolutionary tribunal, in consequence of having denounced them in a pamphlet called "Les Trois Urnes." She died with heroic spirit. She is the author of the "Mémoires of Madame de Valmont;" and of several dramatic pieces.

AUBUSSON, PIERRE D'. [D'AUBUSSON.]

AUCHMUTY, Sir SAMUEL, a distinguished English general. He served with great zeal and ability in North and South America, and when commanding in India, reduced to the dominion of Great Britain the rich settlements of Java and Batavia. On his return to Europe, he was appointed to the command in Ireland, where he died in 1822.

AUCKLAND, WILLIAM EDEN, Lord, an able diplomatist, was the third son of Sir Robert Eden, Bart., of West Auckland, Durham. He was appointed under-secretary of state in 1772; went to Ireland in 1780 with Lord Carlisle, as chief secretary; in 1788 was ambassador to Spain; and in the year following was ambassador to Holland. He wrote "The Principles of Penal Law," "The History of New Holland," and other works. Born, 1744; died, 1814.

AUDEBERT, JEAN BAPTISTE, a cele-

brated French painter, engraver, and naturalist, born in 1759. He studied at Paris, travelled in England and Holland, and afterwards devoted himself wholly to the delineation of objects of natural history. His "Histoire naturelle des singes," and "Histoire naturelle générale des colibris, &c." are among the most magnificent works on Natural History ever published. The plates were coloured after a method invented by the author, and in a few copies the text was printed in gold. After his death another work entitled "Oiseaux dorés," was published from materials which he had collected. Died, 1800.

AUDIFREDI, GIOVANNI BATTISTA, a learned Italian bibliographer, born, 1714. He relinquished the pursuit of astronomy on being appointed keeper of the Casanata Library, at Rome, and published several valuable catalogues. Died, 1794.

AUDLEY, Sir THOMAS, Lord AUDLEY, Lord Chancellor of England, was probably a native of Essex. He became Speaker of the House of Commons about 1529, and after holding several other offices, succeeded Sir Thomas More as lord-keeper in 1532, and was soon after named Lord Chancellor. He was a selfish and unscrupulous man, whose highest ambition seems to have been, to do the will of his master, Henry VIII., and get what he could by it. And in this he succeeded. After the dissolution of the monasteries he received many a rich gift, especially the abbey of Walden, on the site of which his grandson built the mansion of Audley-End. He was raised to the peerage, made a Knight of the Garter, and died in 1544. Lord Audley augmented the endowments of Magdalen College, Cambridge.

AUDOIN, JEAN VICTOR, a French entomologist, was born at Paris in 1797. He early obtained the friendship of Cuvier and other men of science, and in 1826 he was named Professor of Entomology at the Museum of the Jardin des Plantes. His writings consist chiefly of papers contributed to learned societies. Died, 1841.

AUDRAN, the name of a family of French artists, of whom the following are the most eminent—**CHARLES AUDRAN**, the elder, engraver, was born at Paris, in 1594; and died in 1673.—**CLAUDE**, a nephew of the preceding, was born at Lyons, in 1639, and studied under his uncle. He was assistant to Le Brun in painting the celebrated series of the Battles of Alexander at Versailles, and became professor of painting in the royal academy of Paris, where he died in 1684.—**GIRARD**, brother of the last-mentioned, and the most celebrated of the family, was born at Lyons, in 1640; studied under Le Brun at Paris, and afterwards at Rome. He was admitted to the Academy of Painting, and named one of its councilors in 1681. He engraved his master's Battles of Alexander, and a multitude of other works, with great skill, preserving in his engraving the peculiar style of each painter. Girard Audran was one of the greatest of historical engravers, and one of the most amiable and kindly of men. He died in 1703.—**CLAUDE**, nephew of Girard, was born at Lyons, in 1685. He was celebrated for ornamental de-

signs; and in 1734; in 1667; and died

AUDUBON, JOHN JAMES, a distinguished
naturalist, was born of French parents, on a
plantation in Louisiana, near New Orleans,
and from his earliest years he was taught by
them to study nature. After spending his
boyhood in Louisiana, young Audubon was
taken to France, where he received his edu-
cation, and attained considerable proficiency
as a painter under the mastership of the
celebrated David. At the age of 17 he re-
turned from France (then in the midst of its
revolution) to the woods of the New World,
with fresh ardour, and began a collection of
drawings under the title of the "Birds of
America." This collection having multi-
plied upon his hands, after many years of
devoted toil, he was persuaded to undertake
the publication of his great work, and with
the view of obtaining subscribers he visited
Europe in 1824. Everywhere was he well
received. On the Continent, Herschel, Cu-
vier, and Humboldt, whom he had encount-
ered in America, gave him a hearty reception.
In the "Cosmos," distinguished mention is
made of his talents. The publication of his
great work was commenced, and completed
at the end of 14 years. Sir David Brewster,
Sir Walter Scott, Lord Jeffrey, and Wilson
were warm supporters of this magnificent
undertaking, which even exceeded all ex-
pectations. The leading scientific societies
of Europe honoured the author by enrolling
him as a member. In 1839 Audubon re-
turned to America, and established himself
on the banks of the Hudson in peaceful re-
tirement. There he laboured with Dr Bach-
man in preparing "The Quadrupeds of
America," a work published in 1850. He
was assisted in some of his labours by his
two sons. Most of his birds, however, were
painted by himself in the forest while their
plumage was fresh, and he seems never to
have been satisfied with the brilliancy of his
colouring, since it did not represent life it-
self. Died, 1851.

AUENBRUGGER, or AVENBRUGGER,
LEOPOLD, physician, was born at Gratz, in
Styria, in 1722, and became ordinary phy-
sician to the hospitals of Vienna. He is
celebrated as the inventor of the method of
percussion in investigating diseases of the
chest. He published his method in 1761, but
nearly half a century elapsed before it was
generally adopted. Died, 1809.

AUGEL, ATHANASE, a learned abbé,
and professor of rhetoric at the college of
Rouen, was born at Paris, in 1734. He pub-
lished several political works, but chiefly
distinguished himself by his translations of
the works of Demosthenes, Eschines, and
other Greek orators, and of Cicero, the last
appearing after his death. One of his prin-
cipal works is the "Constitution de Rome."
Died, 1792.

AUGEREAU, PIERRE FRANÇOIS CHAS.,
duke of Castiglione, and marshal of France,
was born at Paris, in 1757. Having entered
the army early in life, he distinguished him-
self, and rose to the rank of brigadier-
general in 1794. At the battles of Castiglione

and Arcola, in 1796, his personal bravery
was eminently conspicuous; and, in short,
through all the campaigns of Napoleon from
that time till the memorable retreat from
Russia in 1813, he displayed great skill, and
filled the most important stations; receiving
as a reward for his services the baton of
marshal and a dukedom. On the abdi-
cation of the emperor, he was among the
first to offer his allegiance to the Bourbons,
for which he was amply rewarded; yet, it is
said, he was equally ready on Napoleon's re-
turn from Elba to serve his old master, who,
however, rejected his services, and declared
him a traitor. He died in 1816.

AUGUSTI, CHRISTIAN JOHANN WIL-
HELM, a German theologian, was born near
Gotha, in 1771. He studied at the university
of Jena, where, in 1803, he was named Pro-
fessor of Oriental Literature, and subse-
quently of Theology. In 1811 he removed to
Breslau, and eight years later to Bonn. His
works are very numerous, and arc mostly
historical or antiquarian. The best is, per-
haps, his "Denkwürdigkeiten aus der Christ-
lichen Archæologie." Died at Bonn, in
1841.

AUGUSTIN, ST, bishop of Hippo, the
greatest of the Latin Fathers of the Church,
was born in 354. He was a native of Ta-
gaste, in North Africa. At the age of 16 he
was sent to study at Carthage, where he fell
into immoral habits, notwithstanding the
Christian instruction which he had received
from his mother, the pious Monica. He be-
came a Manichean, and soon distinguished
himself as a rhetorician. In 384 he was at
Rome, whence he was called to Milan, and
there, by the influence of St Ambrose, he
was led to embrace Christianity. He was
baptized in 387, spent some time in retire-
ment at Tagaste, and in 395 was made coad-
jutor to Valerius, bishop of Hippo, who died
in the following year. He laboured inces-
santly as a pastor and a writer till his death,
which took place during the siege of Hippo
by the Vandals, in 430. His remains, re-
spected by the barbarians, were removed to
Sardinia, and afterwards to Pavia. In 1842
some relics of the saint, alleged to have been
discovered in 1695, were reconveyed to Hip-
po. Augustin took an active part in the
church controversies of his age, especially
opposing the Manicheans, the Donatists,
and the Pelagians. His influence over the
western church was immense and lasting;
he completed, it has been said, what Athana-
sius began, and by his earnestness and log-
ical clearness determined the form of the
catholic doctrine. His works are very nu-
merous, but the best known are his "Con-
fessions," and the "City of God." The
writings of this father were the special study
both of John Wickliffe and Martin Luther.

AUGUSTIN, or AUSTIN, ST, styled the
Apostle of the English, was sent by Pope
Gregory I. with a few monks to preach the
gospel in England. He landed in 597; and
so rapid was his success, that the pope made
him archbishop of Canterbury, Kent being
the first scene of his labours. Elated by the
success of his mission, he endeavoured to
bring the Welsh bishops, who were descen-
dants of the British converts of the second

century, under the jurisdiction of the Church of Rome, to which they had never submitted; but they asserted their independence, and 1200 (or 200, according to the Saxon Chronicle) monks of Hanzor were soon after put to the sword by Ethelfrid, king of Northumberland, at the instigation, it was said, of the offended prelate. He died, however, in 605, two years before this massacre took place.

AUGUSTULUS, ROMULUS, the last Roman emperor of the West, was raised to the throne by his father, the patrician Orestes, who deposed Julius Nepos, in 476; but his reign was little more than nominal, and of very short duration; being soon after conquered and dethroned by Odoacer, king of the Heruli, who spared his life, and allowed him a pension.

AUGUSTUS, the first Roman emperor, at first named **CAIUS OCTAVIUS**, was born B.C. 63. He was grand-nephew to C. Julius Cæsar, who named him his heir, and on whose murder he went to Rome to claim his property and avenge his death: aiming secretly at the chief power. He first joined the republican party, assisted in the defeat of Antony, at Mutina, and got himself chosen consul in 43. Soon after, the first triumvirate was formed between Octavius, Antony, and Lepidus, and a frightful proscription followed. Next year Octavius and Antony overthrew the republican army under Brutus and Cassius in the two battles of Philipp. He was next occupied with the wars excited by Fulvia, the wife of Antony, and Sextus Pompeius. Lepidus was deprived of power in 36, and five years later Antony and Cleopatra were defeated at Actium, and Octavius was master of the Roman world. Gradually all the highest offices of state were united in his hands, and the senate gave him the title "Augustus," B.C. 27. He studiously veiled his supremacy under the old republican forms, kept the people amused, carried on wars only to defend the existing frontiers, promoted agriculture, literature, and the arts, and made immense improvements in the city of Rome. Augustus was thrice married, and as his nephew Marcellus and the two sons of his friend Agrippa were dead, he named as his successor, Tiberius, the son of his third wife, Livia. Died at Nola, in August, A. D. 14.

AUGUSTUS II. of Saxony. [FREDERICK AUGUSTUS I.]

AULUS GELLIUS. [GELLIUS.]

AUNGERVILLE, RICHARD, or RICHARD DE HURY, bishop of Durham, and chancellor of England, was born in 1287. He studied at Oxford, and was appointed tutor to Edward III., who afterwards conferred on him many offices, both of church and state. He was twice sent ambassador to the pope, became bishop of Durham in 1333, and chancellor in the following year, and was several times sent to the court of France. He was a very great lover of learning and books, made a large collection of them, and was the correspondent of many eminent men. He left a curious and interesting work, entitled "Philobiblon." Died, 1345.

AUNOY, MARIE CATHERINE, countess of, French novelist, born about 1650. She is

remembered as authoress of several volumes of "Fairy Tales," many of which have been frequently reprinted and translated into many languages. There is an English translation by Mr J. R. Planché. Died, 1705.

AURELIANUS, LUCIUS DOMITIUS, Roman emperor, was the son of a peasant, and was born in Pannonia, about the year 212. Having throughout an active life greatly distinguished himself as a skillful, valiant, and successful general, he was chosen emperor on the death of Claudius II. in 270. He drove the barbarians from Italy, vanquished the celebrated Zenobia, queen of Palmyra, and carried her prisoner to Rome, conquered Tetricus, who had assumed the purple in Gaul; but while on his march towards Persia, in 275, he was assassinated by his mutinous troops. Besides the brilliant military achievements by which Aurelianus restored for a time the prestige of the Roman name, he undertook many great public works, the principal of which was the building of new walls for the defence of the city.

AURELIUS ANTONINUS, MARCUS, Roman emperor, was born at Rome, in 121. He succeeded Antoninus Pius in 161, having been early adopted by him and married to his daughter Faustina. Lucius Verus was at once associated with him in the empire. Great part of his reign was occupied with wars, the sad necessity of the times. Verus conducted successfully a war with the Parthians; both emperors encountered the barbarians on the Danube, until the death of Verus in 169, and then Aurelius carried on the war, and by his success obtained the surname of Germanicus. It was in the course of this war that the remarkable defeat of the Quadi took place, 174, which was attributed to miracle, and respecting which so much debate has been held. After an expedition to the East to suppress the revolt of his lieutenant there, he had to renew the war in Germany; but worn out with incessant exertions he died in Pannonia, 180. Marcus Aurelius was not only one of the wisest and best of the Roman emperors, but one of the noblest and most complete characters of the ancient world. In boyhood he was called "Verissimus" (most true), and this chief of virtues distinguished him through life. He was educated by teachers of the Stoic School, and became himself one of the most eminent members of that school. He acquired the title of "the Philosopher," and has left us in his "Meditations" a most precious record of his moral and religious sentiments and opinions, the rules by which he wished to regulate his conduct, &c., set down in detached notes from time to time, as affairs of state gave him leisure. A new English translation of this book was lately published by Mr George Long. The persecution of Christians in this reign has been urged as a reproach against Aurelius; but it is not known that he ordered it. And it is noteworthy that no persecution took place in Rome or Italy.

AURUNGZEBE, the Mogul emperor of Hindostan, was the third son of Shah Jehan. His early life was marked by gravity and seeming devotion, but these were merely the disguise of an ambitious and crafty spirit.

The perse- reign has been Aurellus; but it d it. And it is tion took place

of Shah Jehan. by gravity and were merely the and crafty spirit.

He deposed his father, put to death two of his brothers, and the son of the elder of them, and assumed the sovereign authority in 1659. He, however, as he obtained his power, he used it with skill and courage. He subdued Golconda, the Carnatic, Hijapur, and Bengal, and routed the pirates who had infested the mouth of the Ganges. His achievements obtained him the respect of European as well as Asiatic powers. But the close of his life was embittered by the rebellious conduct of his sons, who aimed at deposing him, as he had deposed his father. Born, 1618; died, 1707. After the death of Aurangzebe, the might and splendour of the Mogul empire rapidly declined.

AUSONIUS, DECIMUS MAGNUS, a Roman poet of the 4th century; son of Julius Ausonius, a physician of Bordeaux. He early gave proof of genius, and was appointed tutor to Gratian, son of the emperor Valentinian; and when his pupil came to the throne, he made him prætorian prefect of Gaul, and subsequently raised him to the consulship. His poems are various both as to subject and merit; but though they contain much that is beautiful, they are but too frequently deformed by licentiousness.

AUSTEN, JANE, an English novelist, was born in 1775. She was the daughter of a clergyman in Hampshire, and received a good education. Her first novel, "Sense and Sensibility," was published in 1811, and became at once popular. Among her other works are "Pride and Prejudice," "Persuasion," &c. They are all carefully finished delineations of familiar life in England, charming for their healthful simplicity, truth to nature, and freedom from exaggeration. They hold their ground in the face of all "sensational" competitors, and are likely to do so. Died at Winchester, 1817.

AUSTEN, WILLIAM, a distinguished metal-founder, a citizen of London, who flourished in the 15th century. The work by which he is known is the very fine brass tomb of Richard de Beauchamp, earl of Warwick, in St Mary's church, Warwick. He was assisted by other artists whose names are also preserved. The design and workmanship are said to be not inferior to contemporary sculptures of great Italian artists.

AUSTIN, JOHN, a distinguished English jurist, was born about 1790. In his youth he served five years in the army, which he quitted for the study of law, and was called to the bar in 1818. Physically and mentally disqualified for the rough dashing work of the profession, he gave up practice after seven years' struggle. On the foundation of London University in 1826 he was chosen to fill the chair of Jurisprudence, and to fit himself for it went to study in Germany. He enjoyed at Bonn the society of Niebuhr, Brandis, Schlegel, and other eminent men, mastered the German language, and read the most important works on Law. The first success of his career as Professor was soon followed by a mournful failure; such profound exposition of the science of law as he gave not being attractive to those who only wanted to make money by their profession. In 1832 he resigned his chair. It was a heavy blow and a bitter disappointment to

him. He was afterwards a member of the Commission on Criminal Law, and for a short time lecturer at the Inner Temple. In 1837 he was sent with Sir George Lewis as royal commissioner to Malta, and by his love of justice, sagacity, and humanity rendered great service to the island. His health, always frail, grew worse after his return from Malta, and he spent the succeeding years in Germany and France, and finally settled at Weybridge in 1848, and there passed quietly and happily the last years of his life. Died, 1859. His able work, "The Province of Jurisprudence determined," was first published in 1832. A second edition, with two additional volumes of his Lectures and a touching memoir by his wife, was published in 1861.

AVALOS, FERDINAND FRANCESCO D', marquis of Pescara, a distinguished Neapolitan captain, was born about 1493. He early married the celebrated Vittoria Colonna; entered the army in 1512; defeated Aliviano near Vicenza in the following year; took Milan and many other towns; distinguished himself at the battle of Pavia, and was wounded there, and died at Milan, hated for his arrogance, 1525.

AVALOS, ALPHONSO D', marquis del Vasto, nephew of the preceding, was born at Naples, in 1502, and obtained the command of the imperial army at his uncle's death, for the brilliant valour he displayed at the siege of Pavia. He followed Charles V. in all his expeditions, and was made governor of the Milanese. His arrogance, cruelty, and oppressive government made him detested by the people. Died, 1546.

AVENZOAR, or EBN ZOAR, an Arabian physician of the 12th century, born at Seville; author of a medical compendium, entitled "Al Theiser."

AVERRHOES, or IHN ROSHD, an Arabian philosopher and physician of the 12th century. He diligently studied philosophy, Jurisprudence, and medicine, under the greatest teachers of his time, and was the first who translated the works of Aristotle. He also wrote commentaries on them and on the "Republic" of Plato. Of his medical treatises the most celebrated is that entitled "Collyget," or "Kulligut," i. e. the Total. Averroes was made chief judge of Morocco by the caliph, Jacob Almanzor, but being accused of heresy by the Mahometan priests, he was imprisoned. Again, however, he acquired both the royal favour and the popular confidence, and died at Morocco, in 1198, in possession of the highest honours.

AVICENNA, the celebrated Arabian physician and philosopher, was born near Bokhara in 980. He applied himself earnestly to the study of mathematical science, logic, medicine, and theology, held the office of physician to various princes, and died at Hamadan, 1037. He wrote a great number of treatises on philosophy and medicine, the most important of which were his commentary on the "Metaphysics" of Aristotle, and his famous "Canon," the sovereign authority in medical science for centuries.

AVILA, JUAN D', a Spanish priest, who for the space of 40 years journeyed through the Andalusian mountains and forests, en-

foreing by his precepts and example the doctrines of the gospel; on which account he acquired the appellation of the Apostle of Andalusia. Died, 1569.

AVILA Y ZUNIGA, LUIS D', a distinguished diplomatist, warrior, and historian, under Charles V. He was envoy from the emperor to Popes Paul IV. and Pius IV., and attended Charles in his war with the Protestant Princes. He wrote "Commentaries" on this war, which gave him high rank as a historian, and have been translated into various languages. Born, about 1500.

AVISON, CHARLES, a composer and musician; author of "Essays on Musical Expression," &c. Died, 1770.

AYALA, PEDRO LOPEZ D', a learned, brave, and eloquent Spanish statesman, was born in Murcia, in 1332. He was captured by the English at the battle of Nakura (or Najera) when Henry of Trastamere was defeated by Pedro the Cruel, assisted by the Black Prince. He was afterwards released on payment of a heavy ransom, and Henry having triumphed was made his counsellor. Ayala was again taken prisoner at the battle of Aljubarota. He became under John I. chancellor of Castille. After serving under four Castilian monarchs, both in the council and the field, and distinguishing himself also as a man of erudition, he died in 1407. Besides translations of Livy and Boethius, he wrote a valuable "Chronicle of the kings of Castille," first published in 1495, and several other works.

AYESHA, daughter of Abuheker, and second wife of Mohammed, to whom she was married soon after the death of his first wife, Khadijah, and his flight to Medina. Ayesha, only nine years old at her marriage, was exceedingly beautiful, and the favourite of her husband. On his death she resorted to arms to oppose the succession of Ali; but though conquered by him she was dismissed in safety, and died in retirement at Mecca, in 677. The Mussulmans venerate her memory, and designate her *the prophetess*.

AYLIFFE, JOHN, a learned English jurist of the 18th century. He appears to have been a member of the university of Oxford. His most important work is the "Pandect of the Roman Civil Law," one of the best English works on that subject.

AYLOFFE, Sir JOSEPH, an able antiquary of the 18th century. He was educated at Oxford, became keeper of the state papers, and compiled a work entitled "Calendar of the Ancient Charters, &c." He was F. R. S. and F. S. A. Born, 1708; died, 1781.

AYMAR, JACQUES, a peasant of Dauphny, who in the 17th century excited a great sensation in France by his pretensions to di-

vination. By his divining-rod he professed himself able to discover mines, springs, lost treasures, and criminals escaping from justice. At last the Prince of Condé, by various simple tests, compelled Aymar to acknowledge himself an impostor.

AYLTON, EDMUND, a composer of cathedral music, and one of the directors of the Commemoration of Handel. Born, 1734; died, 1808.

AYSCOUGH, SAMUEL, an industrious literary character of the last century. He contributed largely to the British Critic and other periodicals; and compiled a variety of laborious indexes, of which his Index to Shakspeare is the principal. He obtained the appointment of assistant-librarian at the British Museum, and afterwards took orders and became curate of St Giles's, and lecturer at Shoreditch. Born, 1745; died, 1804.

AYSUE, Sir GEORGE, a distinguished admiral in the time of Cromwell, and one of the coadjutors of Blake in his famous action with the Dutch admiral, Van Tromp. At the restoration he was made rear-admiral of the Blue; and being captured in Albenarle's action off Dunkirk, remained many years a prisoner.

AYTON, Sir ROBERT, a native of Fifeshire, in Scotland, a poet of considerable merit, was born in 1570. He wrote in Greek, Latin, and French, as well as English. Died, 1638.

AZARA, DON JOSE NICOLAS D', a Spanish grandee, born in Arragon, 1731; ambassador, first to Rome, where he remained 20 years, and was associated with the most eminent artists and scholars of the time, and next to France; a good writer in Spanish, Italian, and French; a ripe antiquarian, and a great patron of the fine arts. He wrote the Life of the painter Mengs, and translated into Spanish Middleton's "Life of Cicero," "Seneca," and "Horace." He died suddenly, by his fireside, in 1804.

AZARA, FELIX D', a Spanish naturalist and traveller of the 18th century; author of a valuable "Natural History of Paraguay," and other works. Born, 1746; died in Arragon, 1811.

AZUNI, DOMENICO ALBERTO, an Italian jurist, was born in 1749. He was a native of Sardinia, was made a senator, and after the annexation of Nice to France went to Paris, and was employed by the government. In 1807 he was named president of the Court of Appeal at Genoa, an office which he held till the fall of Napoleon. He was chiefly known as author of the "Droit Maritime de l'Europe," which he first published in Italian in 1795, and ten years later in French. Died at Cagliari, 1827.

BAHER, ZAHIR-EDDIN-MOHAMMED, founder of the Mogul empire in Hindustan, was a descendant of Tamerlane, and was born in 1483. The greater part of his life was spent in war. He took Cabul in 1504, Candahar two years later, several times invaded Hindustan, and in 1525 finally defeated the Sultan of the Afghans, and became substantially master of Hindustan. He showed himself no less able as a sovereign than as a soldier, made many improvements, social and political, in his empire, and died, 1530. Baber was also a good writer, and left a valuable autobiography.

BABINGTON, ANTHONY, a gentleman of good family and fortune in Derbyshire, who was detected in a conspiracy to assassinate Queen Elizabeth, for which he was executed in 1586.

BABINGTON, GERVASE, bishop of Worcester, at the end of the 16th and beginning of the 17th centuries. He was a learned and pious man, and a considerable benefactor to the library of Worcester cathedral. He successively held the bishoprics of Llandaff, Exeter, and Worcester.

BABINGTON, DR WILLIAM, an eminent physician, and lecturer on medicine and chemistry at Guy's Hospital, was born in 1797, and distinguished himself by his zeal in the promotion of science, especially the science of geology. He took a chief part in founding the Geological Society, and was elected president in 1822. He was also F.R.S. After a long life of usefulness in his profession, of which he was a distinguished ornament, he died in April, 1833, aged 76. He was the author of "*A New System of Mineralogy*," besides some other scientific treatises.

BABEUF, FRANÇOIS NOËL, a violent partisan of the French Revolution. He conducted a journal called "*The Tribune of the People*," in which he styled himself Caius Gracchus, and the object of which was to overthrow society as at present constituted, and to establish a social equality. He organized a conspiracy against the government of the Directory, and was condemned to be guillotined, 1797.

BARRIUS, a Greek poet, who lived probably about the commencement of the Christian era. He is known by a collection of fables, which he turned into verse, and which were no doubt the basis of all the collections that passed under the name of *Æsop*. A manuscript containing 123 of these fables was discovered in 1842 in a convent of Mount Athos, mere fragments being previously known. Sir G. C. Lewis published a valuable edition of them in 1847.

BACCALAR Y SANNA, VINCENT, marquis of St Philip, an able commander and statesman under Charles II. and Philip V. of Spain; author of "*Memoirs of Philip V.*" &c. Died, 1726.

BACCXYLIDES, a Greek lyric poet, who flourished about 450 years B. C. He was the

nephew of the celebrated poet Simonides, and the contemporary and rival of Pindar. His poetry, like that of Horace, is chiefly devoted to the pleasures of social life, love, and wine.

BACCIO DELLA PORTA, or FL. BARTOLOMEO DI SAN MARCO, one of the most distinguished Italian painters, was born at Savignano in 1409. He was a pupil of Cosimo Roselli, but was greatly influenced by the works of Leonardo da Vinci and Raphael. He was a friend of Savonarola, who prevailed on him to cease painting nude figures, and to destroy many of his sketches at the carnival bonfire. The seizure of his revered friend in the convent and his martyrdom was so heavy a blow to him, that he became a monk and for several years did not paint. He subsequently visited Rome, and again worked at his art with Albertinelli. He was distinguished for excellence in composition, colouring, and delicacy of execution, rivalling Raphael in some of his works. His "*Last Judgment*," in fresco, "*Presentation in the Temple*," "*Mdonna della Misericordia*," "*St Mark*," and "*St Sebastian*," were among his greatest works. Died, 1517.

BACELLAR, ANTONIO BARRONA, a Portuguese poet, historian, and civilian; but who is chiefly remembered for a work in defence of the house of Braganza, which paved his way to fortune, and established him as a favourite at the court. Born at Lisbon, 1610; died, 1663.

BACH, JOHANN SEBASTIAN, one of the greatest musical composers, was born at Eisenach in Saxony in 1685. His family had been noted for musical genius for more than a century, and in him it reached its highest development. Early left fatherless, he earned his living for some time as a chorister at Luneburg, became court organist at Weimar, and in 1717 director of concerts; was chapel-master to Prince Leopold of Anhalt-Coethen, and finally director of music at the school of St Thomas, Leipzig. The works of Sebastian Bach are thoroughly original, profoundly scientific, and most difficult of execution. There is a grandeur and power in them not to be appreciated, or even relished perhaps, except by the highly cultivated ear. The "*Passionsmusik*" is one of his sublimest productions. Bach was almost unrivalled as an organist. He was twice married and left a large family. Died, 1750.

BACHELIER, NICOLAS, a French sculptor, pupil of Michael Angelo. Several of his productions are in the cathedral of Toulouse, his native city. Died, after 1565.

BACHELIER, JEAN JACQUES, French painter, born in 1724, was director of the royal porcelain manufactory of Sèvres, and the discoverer of an encaustic composition for the preservation of marble statues. He established a school for gratuitously teaching the art of drawing. Died, 1805.

BACIOCCHI, MARIE ANNE ELISA BUONAPARTE, Madame, eldest sister of Napoleon I., was born at Ajaccio in 1777. She married

M. Baclochl in 1797, and the next year settled at Paris, where she became the centre of a distinguished circle of literary men, artists, &c. In 1805 Napoleon gave her and her husband the principality of Piombino, and soon after that of Lucca. Three years afterwards she was charged with the government of Tuscany, as grand-duchess. After the fall of Napoleon she led a changeable life, and died at Bologna, in 1820.

BACKER, JACOB, a Dutch historical painter of great ability. Born at Antwerp, in 1530; died, 1560.

BACKER, JACOB, a portrait and historical painter. Born at Harlingen, 1609; died at Amsterdam, 1651.

BACKHUYSEN, RUDOLPH, or LUDOLPH, an eminent painter, whose sea-pieces are worthy of the highest praise. He studied nature attentively in all her forms, and gave to every subject such transparency and lustre, as placed him above all the artists of his time, except the younger Vandervelde. Indeed, it is said to have been his frequent custom, whenever he could procure resolute mariners, to go to sea in a storm, in order to store his mind with images of the angry elements, and to work incessantly on his return, while they were vividly impressed on his memory. Born at Embden, 1631; died, 1709.

BACLER D'ALBE, Baron AUBERT LOUIS, an eminent French military geographer and engineer; author of a "Chart of the Theatre of War in the first Campaigns of Buonaparte in Italy," &c. Born at St Pol, 1761; died at Paris, 1824.

BACON, ROBERT, an English friar; divinity lecturer at Oxford; author of "The Life of St Edmund, Archbishop of Canterbury," &c. Died, 1248.

BACON, ROGER, a celebrated English philosopher, was born near Ilchester, about 1214. After studying at Oxford he went to the university of Paris, where he graduated in divinity. On his return to England he entered the Franciscan order, applied himself to the study of languages, and taught in the university. He enjoyed the friendship of Robert Grossete, bishop of Lincoln, and soon acquired very great reputation for his scientific acquirements. He was bent on the discovery of truth, and was fearless in his inquiries and his teachings. Suspicion soon became persecution; the charge of magic was brought against him, and the superiors of his order prohibited his lectures and the publication of his opinions. About 1267 Bacon sent his "Opus Majus" with the "Opus Minus" and "Opus Tertium" to Pope Clement IV., who had desired to see his writings. The Pope died soon after. In 1278 Bacon was cited, it is said, to Paris by the general of his order, and being condemned was imprisoned. He did not regain his freedom till after the death of Pope Nicholas IV. in 1292, when he is said to have returned to Oxford and died the same year. But there is no contemporary evidence of this imprisonment, nor is it known how long he lived after 1292. Roger Bacon suggested the reformation of the calendar, imagined, though he does not appear to have constructed, a telescope; knew the composition of gunpowder, and gives an account of spectacles.

His principal work is the "Opus Majus," of which he wrote an abridgement, entitled "Opus Minus." The "Opus Tertium" was intended as a preamble to those two works. The three were completed within fifteen months. The "Opus Majus," for its wide views of the reform of philosophy, and the mass of solid knowledge it contains, may be considered, says Dr Whewell, "the *Encyclopædia* and the *Novum Organum* of the 13th century." The "Opus Minus," "Opus Tertium," and "Compendium Philosophiæ" of Roger Bacon were first printed in 1859, edited by Professor Brewer under the direction of the Master of the Rolls. Among his other printed works are "De Mirabili Potestate Artis et Naturæ," "Perspectiva," "Specula Mathematica," "Speculum Alchemicum," &c.

BACON, SIR NICOLAS, lord keeper of the great seal, was born in Kent in 1510. He studied at Cambridge and Paris, and was called to the bar. Henry VIII. gave him several lucrative offices, and after living in retirement during the reign of Queen Mary, he was appointed lord keeper for life by Queen Elizabeth in 1558. He was in disgrace at court for a short time, but regained the queen's favour, and was visited by her at Gorhamburg. Bacon was the intimate friend of Cecil, Lord Burleigh, and took a leading part in the settlement of the difficult ecclesiastical affairs of the time. Died, 1579.

BACON, FRANCIS, Baron VERULAM, the great English philosopher, was born at London in 1561. He was the youngest son of Sir Nicolas Bacon, was educated at Cambridge, travelled in France, and was called to the bar at the age of 21. Though successful in his profession, his advancement was hindered by the enmity of the Cecil family. The earl of Essex was his warm friend and gave him a beautiful estate; but estrangement took place soon after, Bacon condemning his friend's course and appearing against him on his trial. Bacon entered parliament in 1593, was knighted in 1603, and two years later was named Solicitor-General. He had a formidable rival in Sir Edward Coke, but he continued to advance in reputation, and in 1613 became attorney-general and privy-councillor. The office of lord-keeper was given him in 1617, and soon afterwards he was made lord chancellor, Baron Verulam, and Viscount St Albans. But from this time dates the beginning of his miserable fall. Complaints were made of his venality as a judge, which on inquiry by a parliamentary committee were verified; he made full confession, was deprived, fined, and imprisoned during the king's pleasure. He was pardoned, but continued to live in retirement, devoting himself to his favourite studies. The great aim of this extraordinary man was to reform the method of philosophy. He recalls men from blindly following authority to the observation and examination of nature. His great works are the "*Novum Organum*" and the "*De Augmentis Scientiarum*." The former was projected in his youth, was prepared by a series of sketches, revised and rewritten again and again, and finally published in 1620. The latter appeared in 1603, and the English edition

("Advancement of Learning") in 1605. The celebrated "Essays" were first published in 1597, but large additions were subsequently made. Among his other works are the "Wisdom of the Ancients," "History of Henry VII.," "Felicities of Queen Elizabeth," "Of the State of Europe," &c. Died, at Highgate, 1626. The best and best edition of Bacon's Works is by Messrs Ellis, Spedding, and Heath, in 7 vols. 8vo. Some additional volumes will contain his letters and life, with all his occasional works, edited by Mr Spedding.

BACON, ANTHONY, elder brother of the chancellor, a skilful politician, and a friend of the earl of Essex. As he spent the greater portion of his time abroad, and was much devoted to learned pursuits, he became personally acquainted with most of the foreign literati, and was also honoured with the friendship of Henry IV. of France.

BACON, Sir NATHANIEL, half brother of the chancellor. He possessed great ability as a landscape painter. Died, 1615.

BACON, JOHN, an eminent English sculptor, and the inventor of an improved method of copying the clay models in stone. His chief works are a bust of George III., in the hall of Christchurch, Oxford, Lord Chatham's monuments in Guildhall and Westminster Abbey, and those of Dr Johnson and John Howard in St Paul's. Born, 1740; died, 1799.

BACON, or BACONTHORPE, JOHN, called the resolute doctor, an English monk; author of a "Compendium of the Law of Christ," &c. Died, 1346.

BADALOCCHIO, SISTO, or SISTO ROSA, Italian painter and engraver, born at Parma, 1581. He was the pupil and friend of Annibale Caracci, and assisted Lanfranco in executing the etchings from the Bible of Raphael. He painted some fine frescoes in the Verospi Palace at Rome. Died, 1647.

BADENS, FRANS, portrait and historical painter, born at Antwerp, 1571; died, 1603.

BADIA, DOMINGO, a Spanish traveller, was born in 1766. Being well skilled in Arabic, he determined on travelling in the East; and having submitted to a well-known Musselman rite, he was personally qualified for the task, and assumed the name of Ali Bey. Under this disguise he visited Tripoli, Egypt, Mecca, and Syria, undiscovered, and was everywhere received with favour, as a true believer. It is now known that he was employed as a political agent by the Prince of Peace, at the instigation of Buonaparte; and on his return to his native country he espoused the French cause there. After the battle of Vittoria, he took refuge in France, and died in Syria, in 1818.

BAFFIN, WILLIAM, an English navigator of the 17th century, famous for his discoveries in the Arctic regions, was born in 1584. He visited West Greenland in 1612, again in 1613, and made a voyage to Spitzbergen in 1614. In 1616 he ascertained the limits of that vast inlet of the sea, since distinguished by the appellation of Baffin's Bay. He was killed at the siege of Ormuz, in 1622.

BAGGESFEN, EMANUEL (JENS), Danish poet. He usually wrote in the German lan-

guage; and his chief productions are a pastoral epic, entitled "Parthenais, oder die Alpenreise," and a mock epic, called "Adam and Eve," but his songs and short poems are very numerous and popular. Born, 1764; died, 1826.

BAGLIONE, GIOVANNI, an Italian painter of the 17th century, distinguished for his works in fresco; many of which adorn the walls and ceilings of the churches at Rome. He was head of the Academy of St Luke, at Rome, in 1618, and wrote the "Lives of the Painters, Sculptors, Architects," &c. of his own time. Born, 1573; died, after 1641.

BAGLIONI, GIOVANNI PAOLO, an Italian soldier of fortune in the 16th century, who made himself master of Perugia. He was put to death by Leo X., in 1520.

BAGLIIVI, GIORGIO, an illustrious Italian physician, born at Itazusa, and elected professor of anatomy at Rome; was author of a valuable treatise, "De Fibra Motrice," and other medical works. Bagliivi was an acute and careful observer, and an independent thinker, bold enough to differ even with Hippocrates himself. He became a fellow of the Royal Society of London. Born, 1667; died, 1706.

BAGOAS, a eunuch, at first the favourite, and afterwards the murderer of Artaxerxes Ochus, king of Persia. He was put to death by Darius Codomanus, B.C. 336.

BAGRATON, PRINCE PETER, Russian general and councillor, who especially distinguished himself in the campaigns in Italy under Suwarrow, was at the battles of Austerlitz, Eylau, and Friedland, and was mortally wounded at the battle of Moscow in 1812.

BAHRAM, or VARANES, a celebrated Persian general of the 6th century. He was descended from an ancient and princely family, distinguished himself under Chosroes the Great at the siege of Dara, and was made governor of Media. When the Turks invaded Persia, in the reign of Hormisdas, or Hormouz III., Bahram won a decisive victory over them with inferior forces. But his success and popularity excited jealousy among the courtiers, the tyrant insulted him before his troops, and in 590 he revolted, deposed and imprisoned Hormouz, and seized the chief power. Chosroes, the son of Hormouz, escaped to the Romans, and by their aid Bahram was defeated, and Chosroes raised to the throne. Bahram fled to the Turks, and is said to have died by poison.

BAIER, JOHANN JACOB, German physician, and director of the botanical garden at Altdorf; author of several works on medicine, natural history of fossils, &c. Born, 1677; died, 1735.

BAILEY, NATHAN, an English lexicographer, was a schoolmaster at Stepuoy. Besides several school books, he was the author of "Dictionary of Domesticum;" but his principal work was his Etymological English Dictionary, of which the second edition appeared in 1724, and which may be regarded as the basis of Dr Johnson's unrivalled work. Died, 1742.

BAILLIE, JOANNA, dramatist, the sister of Dr Matthew Baillie, and the niece of the celebrated anatomists, John and William

Hunter, was born at the Manse of Bothwell in 1762. Even in her earliest years her inventive faculties were strongly displayed; and as she grew up, she manifested a strong predilection for literary pursuits. In 1783 she came to London to reside with her brother, and prepared herself by hard study of the best writers for the career in which she was destined to reach such eminence. Her first dramatic efforts, entitled "Plays on the Passions," each passion being the subject of a tragedy and a comedy, were published in 1798. A second series was published in 1802, and a third in 1812. But during the interval, she gave to the world a volume of miscellaneous dramas, one of which, the "Family Legend," was brought out in 1809, at the Theatre Royal, Edinburgh, under the auspices of Sir Walter (then Mr) Scott, and played with great success. "De Montfort," one of her "Plays on the Passions," was brought out by John Kemble, in London, and had a run of eleven nights, but has not kept permanent possession of the stage. In 1836 she published three more volumes of plays, which, like her previous productions, are full of the true spirit of poetry, but are essentially undramatic. During the greater part of her life she lived at Hampstead with her sister Agnes—also a poetess, and though she seldom mingled in society, she was visited by men of genius from all parts of the world; and the readers of Lockhart's Life of Sir Walter Scott will remember that many of the great novelist's letters are addressed to Miss Baillie. Her works have been published in one large volume, with a memoir of her life. Died, 1851.

BAILLIE, ROBERT, a Scotch divine, born at Glasgow in 1599. He was one of the deputation sent to London to exhibit charges against Archbishop Laud; and also one of the commissioners sent from the General Assembly of Scotland to Charles II., at the Hague. His letters, and a journal of his transactions in England, were published in 1775. Died, 1662.

BAILLIE, MATTHEW, M.D., a celebrated anatomist and physician. He succeeded Dr Hunter as lecturer on anatomy, in conjunction with Mr Cruickshank, at St George's Hospital; he was also one of the physicians in ordinary to their Majesties George III. and IV., and was held in high esteem among his professional brethren. He was the author of several highly esteemed works, as well as of many important papers in the Philosophical Transactions, &c.; and he presented to the College of Physicians a valuable museum of anatomical specimens. Died, 1823.

BAILLY, JEAN SYLVAIN, a French astronomer, mayor of Paris at the commencement of the revolution, was born at Paris in 1736. He early applied himself to science, distinguished himself by his astronomical calculations and observations, and was admitted to the Academy of Sciences, the French Academy, and the Academy of Inscriptions. His peaceful and honoured career was rudely changed by the revolution. In 1789 he was chosen deputy for Paris to the States-General, was first president of the Assembly, administered the oath at the famous Session of the Tennis-Court, in June,

and was made soon after mayor of Paris. He lost his popularity from the day (17th July) that he ordered a turbulent assemblage in the Champ-de-Mars to disperse, and fired on them. In November he retired from his office and from Paris, devoting himself again to his studies. On the triumph of the Jacobins, in 1793, he was arrested at Melun and taken to Paris. He was examined as a witness on the trial of Marie Antoinette, and soon after, under circumstances of aggravated cruelty, was executed, 10th November, 1793. Bailly was author of a History of Astronomy, which had for a time a great reputation; and several other scientific works. He wrote also "Mémoires d'un témoin de la Révolution."

BAILLY, FRANCIS, famous in the annals of astronomical science, was the son of a banker at Newbury, and for many years well known on the Stock Exchange, in which busy arena he realized an ample fortune. The Astronomical Society was organized by him, and throughout life he was the most considerable contributor to its memoirs. Systematic order and steady perseverance were the secrets of his success. Died, Aug. 30, 1844, aged 70.

BAINBRIDGE, CHRISTOPHER. [BAINBRIDGE.]

BAINBRIDGE, Dr JOHN, an eminent physician and astronomer, born in 1582. He gained considerable reputation by his work entitled a "Description of the late Comet in 1628," and was appointed professor of astronomy at Oxford. Died, 1643.

BAINES, EDWARD, who has secured for himself an honourable place among the friends of civil and religious liberty in the 19th century, was born at Walton-le-Dale, in Lancashire, 1774. At the age of fourteen he was apprenticed to a printer at Preston; but before his term of apprenticeship expired he removed to Leeds, where he found employment on the Leeds Mercury, of which he subsequently became the proprietor. The zeal and ability with which for many years he conducted this paper marked him out as a fit representative of Leeds; and in 1833, on Mr Macaulay's resignation of his seat for the borough, he was elected, and held that position till the close of Lord Melbourne's administration in 1840, when his impaired health induced him to retire. Both in parliament and the press, Mr Baines never ceased to advocate the cause of freedom, good government, charity, and religion. Though decided in his opinions, he was most catholic in his disposition; and he was most ready to co-operate with men of all parties and sects for the objects of which he approved. Besides fulfilling the duties of a journalist, he found time to devote himself to literature; and his "History of the Itziga of George III." and "The County Palatine of Lancaster" are monuments of his patience and research. Died, 1848.

BAIRD, Sir DAVID, a distinguished English general, was of Scottish descent, and entered the army as an ensign in the 2nd foot in 1742. He served in the East Indies for many years; and among other brilliant achievements in which he was engaged, was the taking of Seringapatam, and the siege of Pondicherry. In 1801 he was sent, with a

large body of British and British troops across the passage by the death of the commander who lost his life on this occasion subsequent to the capture of Fort St.

BAJAZET, a Turkish prince, born in 1347, and died in 1389. He was of immense energy, and his name of "Bajazet" was continually repeated especially in the Turkish language. A formed army was fought when Bajazet, king of the Christian number of captives, and ransomed the prevented the in Europe having conducted his arms against the battle of the plains of An Bajazet was and after a ostentatious to several cage, and superior. In Bajazet died in 1403.

has secured for himself a place among the great names of the liberal liberty in the reign of Walton-le-Dale. He was of the age of fourteen when he died at Preston; his citizenship expired ere he found emigration, of which he was the proprietor. The king for many years marked him out as a subject; and in 1833, on the death of his seat for the county, and held that Lord Melbourne's when his impaired health. Both in parliament and in private, Mr Baines never gave up the cause of freedom, of religion, and of opinions; and he was surrounded with men of all ranks and of all ages, to the objects of which he devoted the duties of his life, to devote himself to the study of the history of the County Palatine of Lancaster, and of his patience

distinguished English descent, and was the first to assign in the 2nd volume of the East India Company other brilliant services was engaged, was in the siege of the city, and was sent, with a

large body of troops, from India, to assist the British army in Egypt, and joined General Hutchinson a few days before the surrender of Alexandria. In 1802 he returned with his troops across the desert to India; and obtaining permission to return to England, arrived in 1804, after having been captured on his passage by a French privateer, and retaken. In 1805 he commanded the expedition which took the Cape of Good Hope from the Dutch; and he was subsequently at the siege of Copenhagen, where he was wounded. On the death of Sir John Moore, at Corunna, the command devolved upon General Baird, who lost his arm there. For his gallantry on this occasion he was made a baronet. He subsequently was governor of Kinsale and of Fort St George; and died in 1829.

BAJAZET or BAYAZID I., surnamed ILLDRIM, Sultan of the Ottomans, was born in 1347, and succeeded his father, Amurath I., in 1389. His fiery energy, and the swiftness of his movements from point to point of his immense empire, acquired for him the surname of "Ildrim" or "lightning." He was continually occupied with war, and was especially ambitious of taking Constantinople. A league of Christian powers was formed against him, and the decisive battle was fought at Nicopolis on the Danube, when Bajazet won a great victory. Sigismund, king of Hungary, who commanded the Christian army, escaped, and a great number of the French nobles were slain or captured, the richest only being allowed to ransom themselves. An attack of the gout prevented the conqueror's further progress in Europe, and soon after Tamerlane, having conquered great part of Asia, turned his arms against Bajazet. The memorable battle of these giants was fought on the plains of Angora, in Galatia, in July, 1402. Bajazet was defeated and made prisoner; and after being treated for a time with ostentatious respect, was shut up, according to several credible witnesses, in an iron cage, and so carried in the train of his conqueror. Broken down in mind and body, Bajazet died in the Tatar camp in Pisidia, in 1403.

BAJAZET II., sultan of the Turks. His reign was turbulent; he was much engaged against the Venetians and other Christian powers, and his latter years were embittered by the enmity of his son Selim, by whom, after he had resigned the crown to him, he was poisoned in 1512.

BAKER, SIR RICHARD, author of a "Chronicle of the Kings of England," &c. He was educated at Oxford, knighted by James I., and afterwards, being involved in pecuniary difficulties, was imprisoned in the Fleet, and there spent the last twenty years of his life. Born, 1568; died, 1645.

BAKER, HENRY, a diligent and ingenious naturalist. He was originally brought up as a bookseller, and married one of the daughters of Daniel De Foe. He became F.R.S. and F.S.A., and in 1744 obtained the Copley medal of the Royal Society, for his philosophical experiments on saline particles; and wrote "The Microscope made easy," &c. Born, 1698; died, 1774.

BALASSI, MARIO, a Florentine painter.

His copy of Raphael's "Transfiguration" was astonishingly exact. Born, 1604; died, 1667.

BALBI, ADRIANO, one of the most distinguished geographers of modern times, was born at Venice, 1784. Devoted from his earliest years to geographical and statistical researches, he first gained a prominent place in the literary world by his "Essai Statistique sur le Royaume de Portugal," &c. (1822). This was followed, in 1826, by his "Atlas Ethnographique du Globe," &c., in which he embodied all the researches of the most celebrated German philologists and geographers; and continuing to prosecute his studies with unabated ardour in Vienna and Paris consecutively, he at last gave to the world, in 1832, the "Abrégé de Géographie," a work which comprises the whole compass of geographic science, and has made his name famous throughout Europe and America. His latest years were passed at Padua, in the pursuit of his favourite science. Died at Venice, 1848.

BALBINUS, DECIMUS CÆLIUS, a Roman senator, a man of fortune, education, and refinement, chosen emperor in conjunction with Maximus, in 237; and murdered by the soldiery in the following year.

BALBOA, VASCO NUNEZ DE, a Castilian, one of the first who visited the West Indies. Having accompanied Bastidas and Ojeda in their expeditions of discovery to America, he set out in 1513 on another expedition of the same character. He established a colony on the isthmus of Panama, where he built the first town on the continent of South America, penetrated into the interior, discovered the Pacific Ocean from "a peak in Darien," and took formal possession of the new lands and seas in the name of Ferdinand and Isabella. He also obtained information respecting the empire of Peru. Jealous of his talents and success, rival adventurers accused him of disloyalty, and he was put to death in 1517, by Pedrarias Davila, the Spanish governor of Darien.

BALDI, BERNARDINO, an Italian mathematician and poet; author of Italian poems, lives of mathematicians, &c. Born at Urbino, 1553; died, 1617.

BALDINUCCI, FILIPPO, a Florentine artist and connoisseur; author of a voluminous "History of Painters," &c. Born, 1634; died, 1696.

BALDOCK, RALPH DE, bishop of London, and lord high chancellor in the reign of Edward I.; author of a "History of British Affairs," which was extant in Leland's time, but is now lost. Died, 1307.

BALDUCCIO, GIOVANNI, Italian sculptor, was born at Pisa about 1300. He was a scholar of Andrea Pisano, and after working some time in Tuscany, he entered the service of Azzo Visconti, lord of Milan, and executed many important works in that city. The best of these is the monument to St Peter Martyr, Fra Pietro of Verona, assassinated in 1252. Balduccio also erected the monument to his master, who died in 1339. Died about 1347.

BALDUNG, HANS, or HANS BALDUNG-GRUN, an early German painter and engraver on wood, was born in Suabia, about

1476. He was the friend of Albert Dürer, whom in some points he almost equalled. "The Crucifixion," at Frelburg, is one of his greatest works. He was living in 1534.

BALDWIN, archbishop of Canterbury in the 12th century, was a native of Exeter, and became abbot of the Cistercian house at Ford in Devonshire. He held the see of Worcester four years, and in 1184 was appointed archbishop of Canterbury. He crowned Richard I., and accompanied him on the crusade, but died at Acre, in November, 1191. He left numerous writings, some of which were published in a collection of writers of his order in 1662.

BALDWIN I., first Latin emperor of the East, was born about 1170. He was son of Baldwin, Count of Hainault, and Margaret, Countess of Flanders, and succeeded the latter in 1194, the former in the following year. In 1200 he joined the crusade, went to Venice, took part in the siege of Zara, led the van in the attack on Constantinople for the restoration of the young Alexius, led the assault on the second siege, and was chosen and crowned emperor in May, 1204. But he was defeated and captured by Joannices, king of the Bulgarians, in 1205. Nothing is certainly known of his fate.

BALDWIN II., succeeded his brother Robert as emperor of the East in 1228. He was only 11 years old, and the government was in the hands of John of Brienne till his death in 1237, when Baldwin succeeded alone. He spent years in visiting Italy and France in hope of getting aid in his endeavour to save and strengthen the falling empire. On the taking of Constantinople in 1261, by Michael Palaeologus, Baldwin escaped to Italy, where he died, 1273. He was the last of the Latin emperors of the East.

BALDWIN I., king of Jerusalem, was the younger brother of Godfrey of Bouillon, and having distinguished himself in the first crusade, was made Count of Edessa. Baldwin succeeded his brother as king of Jerusalem in 1100, reigned 18 years, and was constantly engaged in war, and obtained many victories over the Turks, Persians, and Saracens. He made himself master of the principal towns on the coast of Syria. Died, 1118.

BALDWIN II., king of Jerusalem, succeeded the above in 1118; Eustace, brother of Baldwin I., having renounced his claim to the throne. Baldwin II. was taken prisoner by the Saracens in 1124, and gave them the city of Tyre as his ransom. Died, 1131.

BALDWIN III., son of Fulk of Anjou, to whom Baldwin II. had resigned the kingdom of Jerusalem, succeeded to the throne, on his father's death, in 1142. He took part in the disastrous second crusade led by Louis VII. and the emperor Conrad. Died, 1163.

BALDWIN IV., the son of Amaury, succeeded his father on the throne of Jerusalem in 1174. He subsequently resigned in favour of his nephew. Died, 1185.

BALE, JOHN, a Carmelite of Norwich, who embraced the Protestant faith, and became a zealous writer against Popery. In the reign of Edward VI., he was made bishop

of Ossory, in Ireland, and endangered his life by his zealous efforts to reform his diocese. During the reign of Mary, he found safety in Switzerland; and on his return to England, at the accession of Elizabeth, he obtained a prebend of Canterbury. Of his numerous works, the most important is a Latin account of eminent British writers. Born, 1495; died, 1563.

BALECHOU, NICOLAS, French engraver, whose works are held in high estimation. The principal are the portrait of Augustus III. of Poland, after Rigaud, and three subjects after Joseph Vernet. Born at Arles, 1715; died, 1765.

BALEN, HENDRIK VAN, Dutch painter, was a native of Antwerp, and a pupil of Adam van Oort. He studied in Italy, and had Vandyck and Snyders among his pupils. Among the best of his works are the "Judgment of Paris" and "St John in the Desert."—**JOHN VAN BALEN**, his son, was a distinguished historical and landscape painter. Born, 1560; died, 1632.

BALESTRA, ANTONIO, Veronese painter. He was a pupil of Carlo Maratti, and attained great eminence in his art. He was known also as an engraver. Born, 1666; died, 1740.

BALFOUR, SIR ANDREW, an eminent botanist and physician, and one to whom medical science in Scotland owes a lasting debt of gratitude for the botanic garden and museum at Edinburgh, which he took part in establishing. He was born in 1630, at Denmilne, Fife, and died in 1694.

BALFOUR, SIR JAMES, Lord President of the Court of Session in Scotland in the 16th century, was brought up to the church, advocated the reformation, and was exiled with Knox in 1547. On his return he became a Catholic and a persecutor of the reformers; shifted from side to side through the civil war, always contriving to be with the strongest; held the offices of judge of the commissaries court, privy councillor, and lord of session; was implicated in the murder of Darnley; became lord president of the court of session; assisted in the pacification of Perth; and continued his treacherous, intriguing, and infamous practices to the end of his life. Died, 1583.

BALGUY, JOHN, an eminent divine of the Church of England, was born at Sheffield in 1686, and in 1727 became a prebendary of Salisbury. He engaged deeply in the Bangorian controversy; and among his works may be noticed "An Essay on Redemption," a "Letter to a Deist on the Beauty and Excellence of Moral Virtue," &c. Died, 1748.

BALGUY, THOMAS, son of the above, prebendary and archdeacon of Winchester, author of "Divine Benevolence, asserted and vindicated," a sermon on church government, &c. Born, 1716; died, 1795.

BALIOL, SIR JOHN DE, a native of Durham, who, on the marriage of the daughter of Henry III. to Alexander III. of Scotland, in 1251, was made one of the guardians of the royal pair. He founded Baliol College, Oxford; and having sided with Henry III. against his revolted barons, the latter seized upon his lands. Died, 1269.

BALLOL, JOHN DE, son of the preceding, laid claim to the crown of Scotland on the death of queen Margaret in 1290. His claim was disputed by several competitors, one of whom was the famous Robert Bruce. But Edward I., to whom the matter was referred, decided in favour of Balliol, who immediately did homage for his kingdom to Edward. Balliol, however, irritated by the proofs of mastery assumed over him, made an alliance with the French king, and renounced homage to Edward. War followed, and the Scots being defeated in a battle near Dunbar, Balliol was sent, with his son, to the Tower of London. The intercession of the pope having procured his release, he retired to France, where he died in 1314.

BALLOL, EDWARD, son of the preceding, was imprisoned with his father in the Tower of London in 1296, and was permitted to retire to France with him. In 1332 he joined with some English confederates, and invaded Scotland; defeated the Scots, and got himself crowned king of Scotland at Scone in September. Before the end of the year he was defeated, and driven from his kingdom. By the intervention of Edward III., and the victory of Halidon-Hill, he was restored, but in 1331 he hopelessly offended his countrymen by giving up the south of Scotland to the English. He was only maintained on his throne by the frequent interference of Edward. In 1356 he renounced his title and throne for an annuity, and retired to England. Died, 1363.

BALLANTYNE, JAMES, a printer of considerable note in Edinburgh, and at whose press the whole of the works of Sir Walter Scott were printed, was a native of Kelso, where he first opened an office for the "Kelso Mail," of which he was the editor. On removing to Edinburgh, he engaged in various important works, the principal of which were those of the great novelist; and for many years he also conducted the "Edinburgh Weekly Journal." He survived his friend and patron but a few months, dying in January, 1833.

BALLANTYNE, JOHN, brother of the preceding, acted during the early career of the mysterious "author of Waverley" as his confidant, and managed all the business of the communication of his works to the public. He is also remembered by his contemporaries as "a fellow of infinite humour," whose anecdotes were as inexhaustible as his mode of telling them was unrivalled. Died, 1821; aged 45.

BALLIN, CLAUDE, a skilful French goldsmith. He executed some very fine works after antique vases, &c., for Louis XIV. and Cardinal Richelieu, and was made director of the mint for cists and medals. Born, 1615; died, 1678.

BALMEZ, JAMES LUCIAN, a Spanish ecclesiastic, whose political, theological, and philosophic writings have acquired for him a high reputation both at home and abroad, was born at Vich, in Catalonia, in 1810. From his earliest years he was destined for the priesthood, and having in his 16th year entered the university of Cervera, he soon attracted notice by his amiable demeanour, the fertility of his mind, and the universality

of his acquirements. Quitting the university in 1833, laden with honours and matured in learning, he retired to his native town, and in 1837 was there nominated to the chair of mathematics, which he filled with equal zeal and ability. In 1840 he published a *brochure* on the property of the clergy, which made a great sensation at Madrid; and from this time forward his labours in behalf of the cause to which he had devoted himself were indefatigable. He published papers on the condition of Spain, wrote in periodicals, conducted a review at Barcelona, and finally edited at Madrid the abject journal in Spain, entitled "El Pensamiento de la Nacion," wherein his object was to restore the Roman Catholic Church to her former dignity and influence; to reconcile and unite all the friends of monarchy, whether belonging to the Carlist or Christina parties; and to found the institutions of the country on an enlarged and permanent basis. But valuable to his country as were all these and other emanations from his pen, they are far eclipsed by his "Protestantism and Catholicism compared in their Effects on the Civilization of Europe," which has been translated into French, German, and English, and may be safely pronounced to be one of the most elaborate works of modern theological literature. Died at Vich, 1848.

BALNAVIS, HENRY, secretary of state under Mary, queen of Scotland, was a native of Fifeshire. He became a lord of session in 1538, and a member of the Scottish parliament. Five years later he was made secretary of state, but was soon deprived. He was a zealous promoter of the reformation, and took part in several important negotiations with the English government. He was one of the prisoners taken in the Castle of St Andrews and exiled to France, in 1547, whence he was recalled in 1554. He was afterwards engaged in obtaining the establishment of the reformed faith, in revising the Book of Discipline, and other affairs of church and state. Died probably before 1580.

BALSHAM, or BELESALE, HUGH DE, bishop of Ely, and founder of Peterhouse College at Cambridge. Died, 1286.

BALTIMORE, LORD. [CALVERT.]

BALUE, JEAN, a native of France, made a cardinal by Pope Paul II., and imprisoned for 11 years in an iron cage by Louis XI. for having engaged in treasonable correspondence with the Duke of Burgundy. Died, 1491.

BALUZE, ÉTIENNE, French historian and miscellaneous writer; born 1630. He was librarian to M. de Colbert for more than 30 years, and was appointed Professor of Canon Law at the College Royal in 1670. Having offended Louis XIV. by a passage in his History of the House of Auvergne, he was deprived of his post and exiled. His chief works are "Itægum Francorum Capitularia," "Conciliorum nova Collectio," and "Vies des Papes d'Avignon." He died 1718.

BALZAC, JEAN LOUIS GUEZ DE, a French miscellaneous writer of great reputation, which he chiefly owed to the elegance of his style; he was esteemed the reformer of the French language in his own day, and wrote

a great number of works, most of which are now neglected. The most esteemed are his "Familiar Letters," "Le Prince," "Le Socrate Chrétien," and "Aristippe." Born, 1594; died, 1655.

BALZAC, HONORÉ DE, one of the most distinguished as well as prolific novel writers of modern times, was born at Tours, 1799. Having completed his studies at Vendôme, he published, between 1821 and 1829, twenty or thirty volumes under various pseudonyms, with very equivocal success; but after this trying apprenticeship, he put forth all his powers under his own name, with what result those who have read "La Peau de Chagrin," "Les Chouans," "La Physiologie de Mariage," "Le Père Goriot," "La Femme de Trente Ans," &c., can best testify. After that period his productions succeeded one another with wonderful rapidity; and his literary strength grew with his years, for his "Médecin de Campagne," and his "Parcs Pauvres," his last work, bear the impress of genius in every page. In addition to his romances, Balzac wrote some plays, and for some time edited and contributed to the *Revue Parisienne*; but it is only his romances that exhibit unquestionable evidence of his great genius. His design was to make all his productions form one grand work, under the title of the "Comédie Humaine," the whole being a minute dissection of the different classes of society; and for this task he was eminently qualified, possessing, as he did, the secret of probing the human heart to its profoundest depths, and of laying bare with a masterly hand all its mysteries and all its passions. After the revolution of 1848, Balzac was engaged in visiting the battle-fields of Germany and Russia, and in collecting materials for a series of volumes, to be entitled "Scènes de la Vie Militaire." Next to his celebrity as an author, the most remarkable feature in his career was the deep passion which he formed for a Russian princess, who finally compensated him for long years of untiring devotion by the gift of her hand in 1848. Died, Aug. 19, 1850.

BAMBAIA, IL. [BUSTI, AGOSTINO.]
BAMBRIDGE, CHRISTOPHER, made archbishop of York in 1508; was sent ambassador from Henry VIII. to Pope Julius II., who made him a cardinal. Died of poison administered by his servant, 1514.

BANCROFT, RICHARD, archbishop of Canterbury, was a native of Lancashire. He was born in 1544, educated at Cambridge, and after holding various preferments in the church, was named bishop of London in 1597. He had early shown himself a determined enemy of the Puritans, and this he remained throughout his life. He took part, with much arrogance and passion, in the celebrated conference at Hampton Court, and in the following year was raised to the primacy of England. He was charged with the supervision of the new translation of the Bible. Died in 1610.

BANCROFT, JOHN, nephew of the above, bishop of Oxford, and builder of the palace of Cuddesden for the bishops of that see. Died, 1640.

BANDELO, MATTEO, a Dominican monk of Milan. He wrote tales in the manner of

Boccaccio, and proceeding to France, obtained the bishopric of Agen. Died, 1561.

BANDINELLI, BACCIO, a Florentine sculptor. He was a pupil of Rustici, and the rival and enemy of Michael Angelo and Cellini. Among his numerous works at Florence, Rome, and other Italian cities, were the colossal group of "Hercules and Cacus," some fine bas-reliefs in the cathedral of Florence, and statues of Leo X. and Clement VII. His copy of the Laocoon is highly esteemed. Born, 1487; died, 1559.

BANKS, Sir JOSEPH, naturalist and traveller, was born at London, in 1743. His passion for botany and natural history showed itself very early, and after leaving Oxford university he went, in 1766, to Newfoundland. He accompanied Captain Cook on his first voyage, as naturalist, in conjunction with his friend Dr Solander. In 1772, with the same friend, he visited Iceland. He was chosen President of the Royal Society in 1777, of which he had been a fellow above ten years. Honours fell thick upon him: he was made a baronet, Knight of the Bath, and privy councillor. He was a trustee of the British Museum, and a member of the French Institute, and was an active promoter of the interests of science. He formed a very large and valuable library of works on Natural History, of which a catalogue was published in 5 vols. 8vo. Died at London, 1820.

BANKS, THOMAS, one of the most eminent English sculptors, was born at London in 1735. He studied at the Royal Academy, obtained the gold prize, and in 1772 was sent to study at Rome. He afterwards went to St Petersburg, and was employed by the Empress Catherine, but he soon returned to England. Among his finest works are the bas-relief of "Caractacus before Claudius," executed at Rome, the "Mourning Achilles," "Psyche," the monument to Miss Boothby at Ashbourne, and "Thetis with the Nymphs consoling Achilles." Died, 1805.

BANNIER, JOHN, a Swedish general. He served under Gustavus Adolphus; and at the death of that prince became commander-in-chief. Born, 1601; died, 1641.

BANNISTER, JOHN, an admirable comic actor, the son of Charles Bannister, well known as a singer and a wit, was born in London, in 1760. Having been favourably noticed by Garrick, he made his debut at Drury Lane Theatre, when twelve years of age; he then quitted the boards for a time, but obtained a permanent engagement in 1779. At first he aspired to tragedy, and gave it a decided preference; but his talents so clearly lay in the opposite direction, that on the death of Edwin he at once supplied his place, giving proofs of first-rate powers, and establishing himself as a public favourite. To name all the parts in which he excelled his contemporaries, would occupy too much of our space; but we have a vivid recollection of him in Sylvester Daggerwood, Lingo, Trudge, the Three Singles, Bobadil, Dr Pangloss, Job Thornberry, Colonel Feignwell, Walter in "The Children in the Wood," and many others. Being afflicted with the gout, he retired from the stage in 1815, having had the good

having had the good

fortune to earn a competence by his profes-
sion, and the prudence to keep it. He died
Nov. 8, 1836, aged 76, respected and beloved
by all who knew him. Nature had done
much for Bannister, physically as well as
mentally: his face, figure, and voice were
excellent; his spirits exuberant; and an
open manly countenance was a faithful index
to the heart of "Gentleman Jack."

BAPTISTE, JEAN. [MONNOYER.]
BAPTISTE, JOHN CASPAR, born at Ant-
werp, was the pupil of Boschaert; he assisted
Sir Peter Lely and Kneller in painting the
draperies of their portraits. Died, 1691.

BARATIER, JEAN PHILIPPE, celebrated
for his precocity, was born at Schwabach
in 1721. He spoke Latin, French, and Ger-
man at four years of age; could translate
Greek into Latin at six; then studied He-
brew, and at nine compiled a Dictionary of
the most difficult words in that language;
made a French translation of the work of
Benjamin of Tudela at eleven; applied him-
self to theology and ecclesiastical history;
was presented to the king of Prussia and
admitted to the Academy of Sciences, Ber-
lin, at fourteen. He afterwards studied law,
undertook several literary works, and died
in 1740, in his 20th year.

BARBAROSSA. [FREDERICK I., Em-
peror.]

BARBAROSSA, HORUSH, corsair and
sovereign of Algiers, was a native of Mity-
lene. He was born about 1175, became a
Mohammedan, distinguished himself first in
the Turkish naval service, and then as a
corsair. His success attracted many adven-
turers to his service, and he acquired im-
mense riches. After numerous exploits and
a few failures he was invited, in 1516, to
assist Selim, sheik of Algiers, against the
Spaniards; but he usurped the chief author-
ity, and put Selim to death. He made con-
quests and extended his dominion over neigh-
bouring principalities, till the Spaniards took
alarm, and an expedition was sent by Charles
V., under the marquis de Gomarez, governor
of Oran, who twice defeated Barbarossa.
In the second battle the great corsair fell,
1518.

BARBAROSSA, HADHER, surnamed
KHAIR-EDDIN, sovereign of Algiers, was
the brother of the preceding, and succeeded
him in 1518. To secure himself against a
threatened revolt he ceded the sovereignty
to the Porte, and accepted the title of vice-
roy. He captured the fort built by the
Spaniards near Algiers, and had a mole con-
structed by Christian slaves to form a port.
Solyman II. named him admiral of all his
fleets, and opposed him to the Genoese ad-
miral Doria. Barbarossa then ravaged the
coasts of Italy, and returning took Biserta
and Tunis. In Tunis he was besieged by
Charles V., and had to abandon the city.
Again he attacked the coast towns of Italy,
and took Fondi and Castel-Nuovo. He con-
quered Yemen, again appeared in the Medi-
terranean, aided the French against Charles
V., and died in 1546.

BARBAULD, ANNA LÆTITIA, was the
daughter of the Rev. John Aikin, and one
of the best and most popular female writers
of the age; authoress of Hymns, and Early

Lessons for Children. She also edited some
standard novels, &c.; and appended to them
some clever notices, biographical and critical.
Born, 1743; died, 1825.

BARBAZAN, ARNAULD GUILHEM, was a
brave and noble French general, whose
valour, probity, and disinterestedness dur-
ing a long and successful career under the
reigns of Charles VI. and VII. gained for
him the glorious appellation of "the Irre-
proachable Knight." Died, 1432.

BARBEYRAC, CHARLES, a distinguished
French physician, whom Locke compared to
our own Sydenham; author of "Quæstiones
Medicæ Duodecim," &c. Born, 1629; died,
1699.

BARBEYRAC, JEAN, nephew of the
above; professor of law at Berne, and sub-
sequently at Lausanne and Groningen. To
the performance of his duty as professor, he
added most laborious exertions as an author.
He translated the most valuable works of
Grotius, Puffendorf, and other able civilians
into French, and wrote the "Histoire des
Anciens Traités," and the "Traité au Jeu,"
the latter a curious defence of gambling, and
one of his earliest works. Born, 1674; died,
1744.

BARBIERI, GIOVANNI FRANCESCO. [See
GUERCINO.]

BARBOU, the name of a family of French
printers in the 16th, 17th, and 18th centuries.
JEAN JOSEPH was the first who settled at
Paris: died, 1752.—**JOSEPH,** his brother, was
printer there in 1723: died, 1737.—**JOSEPH
GERARD** was nephew of these two brothers,
and bought the business of the widow of
Joseph in 1750. He distinguished himself by
the publication of an elegant series of the
classics, which are named after him.

BARBOUR, JOHN, Scotch poet and divine,
chaplain to David Bruce, and archdeacon of
Aberdeen in 1356. His only known work is
the poem on the Life and Achievements of
Robert Bruce, which is of much historical
value, and has been frequently republished.
Died, probably about 1395.

BARCLAY, ALEXANDER, a writer of the
16th century. It is not known whether he
was a native of England or Scotland. He
wrote "The Mirror of Good Manners," "The
Ship of Fools," the latter partly a translation
of Sebastian Brandt's "Navis Stultifera,"
and other works, chiefly translations. Died,
1552.

BARCLAY, ROBERT, the apologist of
Quakerism, was born in Morayshire in 1648.
Sent to study at Paris, he embraced the
Roman Catholic faith, but after his return
to Scotland joined the Society of Friends.
Continuing his studies, he soon found occa-
sion to apply his faculties and acquirements
to the defence of his sect and the vindica-
tion of their doctrines. His works are, "A
Catechism and Confession of Faith;" "Theses
Theologicæ," the basis and outline of his
most important work, the well-known
"Apology for the true Christian Divinity;"
and a "Treatise on Christian Discipline."
The "Apology" was written in Latin; and
by its intellectual character, logical form,
and lucid style, attracted great attention.
Its propositions excited much controversy,
and most of all its assertion of the necessity

of immediate revelation. Barclay was received as a friend both by Charles II. and James II. He was named governor of East Jersey, but sent a substitute. Died, 1690.

BARCLAY, WILLIAM, a native of Scotland, who emigrated to France, and became professor of law at Angers, where he was considered one of the most eminent civilians of his time. He was the author of various treatises on the rights of popes and kings. Died, 1605.

BARCLAY, JOHN, son of the preceding and an eminent writer, was born in France in 1592; but came to England at the age of nineteen. He was educated by the Jesuits, and remained a Roman Catholic through life. In 1615 he went to Rome, and there spent the rest of his days. His principal work is the "Argenis," a Latin romance of great liveliness and elegance. It attained widespread popularity, and was translated into the principal languages of Europe. Several English translations have appeared. Among his other writings are a satire entitled "Euphormio," a narrative of Gunpowder Plot, and an edition of his father's book "De Potestate Papæ." Died at Rome, 1621.

BARCLAY, JOHN, an eccentric divine of the Church of Scotland, was born at Turriff, in the county of Aberdeen, in 1645. He completed his education at King's College, Aberdeen, and was appointed minister of the parish of Cruden, in Aberdeenshire, in 1675. He was the author of a rare and curious work in verse, now very scarce, called "A Description of the Roman Catholic Church." Died at Cruden, in 1710.

BARCLAY, JOHN, leader of the sect of Bereans, was a native of Perthshire, was born in 1734, became a popular preacher, but being suspected of unsoundness in doctrine, had to leave the Church of Scotland, and take an independent course. He preached for a time in London, and wrote several books. Died, 1798.

BARCLAY DE TOLLY, a Russian general, who, in the German and Polish campaigns of 1806 and 1807, bore a distinguished share, and was made a field-marshal. He succeeded Kutusof as commander-in-chief, headed the Russians at the battle of Leipzig, and led them into France in 1815. He was at one time minister of war, and ultimately was honoured with the title of prince. Died, 1818.

BARCOCHAB, or **BARCOCHERBAS**, a Jewish impostor, who, under the pretence of being the Messiah, obtained many followers, overrunning Judæa, and putting many Romans to the sword: but he was at length defeated and slain by Julius Severus in 134.

BARERE, BERTRAND, one of the most notorious actors in the first French revolution, was born in 1755 at Tarbes in Gascony, where his father possessed the small estate of Vicuzac. He was educated for the bar at Toulouse, practised as an advocate with considerable success, and besides occupying himself with literary pursuits of a trivial character, wrote a dissertation which procured him a seat in the Toulouse Academy of Sciences. In 1785 he married a young lady of good fortune. Three years later he paid

his first visit to Paris; and the states-general having just then been summoned, he went back to his own province, and was there elected one of the representatives of the third estate. Among the crowd of legislators which at this conjuncture poured from all the provinces of France into Paris, Barère made no contemptible figure. His opinions, though popular, were not extreme; and his learning, his manners, his conversation, and his powers of eloquence were all calculated to gain him favour and esteem. But as the monarchial party became weaker and weaker, he gradually estranged himself more and more from it, and drew closer and closer to the Republicans. On the termination of the labours of the national assembly, he became a member of the high court of appeal; and when, in 1792, the legislative assembly invited the nation to elect an extraordinary convention, Barère was chosen one of its members by his own department. He voted for the death of the king, "sans appel et sans sursis," in words that have been oft repeated, "L'arbre de la liberté ne croit qu'arrosé par le sang des tyrans." After the fall of the monarchy, he acted with the Girondists, to whom he made himself useful by the ease and fluency with which he could draw up reports. But ready to slide with the strongest on all occasions, he soon made common cause with the Mountain, whose bloodthirsty designs he remorselessly carried out; and he bore a large share in the infamous schemes subsequently planned during the "Reign of Terror," earning for the levity with which he discharged his disgusting office the nicknames of the Wittling of Terror and the Anæron of the Guillotine. He fawned on Robespierre up to the 8th of Thermidor, and on the 9th he moved that Robespierre should be beheaded without a trial. On the fall of the convention he was sent a prisoner to the Isle of Oleron; but he made his escape to Bordeaux, where he remained four years in obscurity: and on the establishment of Napoleon's government he enlisted in its service, and for some years officiated in the double capacity of a hireling writer and a spy. On the fall of Napoleon, in 1814, he again became a royalist. During the hundred days he was chosen by his native district a member of the chamber of representatives; but on the final return of the Bourbons, in 1815, he was compelled to retire into Belgium, where he resided till 1830. The revolution which then called Louis Philippe to the throne enabled him to return to France; but he was reduced to extreme indigence, and a small pension from the king and the government alone saved him from the necessity of begging his bread. Died, 1841. [Those who wish to see an instance of the literary tomahawk skillfully applied will find it in an article devoted to Barère's life and character in the Edinburgh Review, vol. lxxix.]

BARRETTI, JOSEPH, lexicographer and miscellaneous writer, was a native of Turin. He resided many years in this country, and wrote the English language with ease and purity. Dr. Johnson procured him the situation of Italian teacher in Mr Thrale's family.

He became and retail works are able is his other liari," an of Europe Customs 1789.

Died, see an instance of fully applied will ed to Barère's life inburgh Review, lexicographer and a native of Turin. In this country, and ease and dured him the situa- Mr Thrale's family.

He became secretary to the Royal Academy, and retained that office till his death. His works are very numerous, but the most valuable is his Italian and English Dictionary. His other publications were "Lettere familiari," an account of his travels in the south of Europe; an "Account of the Manners and Customs of Italy," &c. Horn, 1716; died, 1789.

BARHAM, RICHARD HARRIS (better known by his literary name of Thomas Ingoldsby), was a native of Canterbury, in which city he received his early education, and completed it at Brazenose College, Oxford. Although he adopted the clerical profession, and performed the duties of his sacred calling with strict propriety, he was by nature a humourist, and attempted not to restrain the flow of wit and fancy with which his mind was surcharged. He was a minor canon of St Paul's, and occupied the house attached to the canonry of the Rev. Sydney Smith, with whom he was on terms of the most cordial friendship, and whom in many respects he much resembled. His other church preferment was the rectory of St Augustine and St Faith, London. "As an author he contributed much, and during many years, to several popular periodicals, the Edinburgh Review, Blackwood's Magazine, and the Literary Gazette among the number, but his most popular series of papers were given to Bentley's Miscellany, under the title of 'The Ingoldsby Legends,' since collected and published in 2 vols. 8vo. His popular novel, 'My Cousin Nicholas,' was also published in 3 vols. Of his poetical pieces it is not too much to say, that for originality of design and diction, for quaint illustration and musical verse, they are not surpassed in the English language." Died, aged 56, June 17, 1845.

BARKER, EDMUND HENRY, an eminent classical scholar, and one of the most industrious of modern writers. He was a leading supporter of the Classical Journal, the British Critic, and Monthly Magazine; and his articles, chiefly on recondite points of philology and antiquities, were his mere *nugæ delicæ*, with which he amused the intervals of his more serious labour of editing Stephens's "Thesaurus Lingue Græcæ," a gigantic performance. Besides his greater work, he wrote Prolegomena to Homer, and edited Lemprière, and other school books. Born, 1788; died, 1839.

BARKER, GEORGE, F. R. S., of Springfield, Birmingham, a gentleman of the legal profession, whose memory is entitled to respect and gratitude, for the success of many of the excellent institutions which do honour to his native town, and from his zeal in the promotion of the arts, manufactures, and sciences. "He was mainly instrumental in obtaining acts for making what was then called 'that gigantic absurdity, the Birmingham Railroad,' and its confederate line, the Liverpool, Manchester, and Birmingham. He was the bosom friend of Watt and Boulton, and their confidential adviser in the vast projects which have been so productive of honour and wealth to themselves and to this country." He died Dec. 6, 1845, aged 69.

BARKER, MATTHEW HENRY (better known to the public under his assumed name of The Old Sailor), was the author of several naval novels and sketches; among which are "Tough Yarns," "Jem Hunt," "The Victory," "Land and Sea Tales," &c., besides "The Life of Nelson," and numberless communications in prose and verse, to various periodicals. He went to sea at the age of 16, but never arrived at higher promotion than the command of a hired armed schooner; and finding himself unemployed at the end of the war he tried his hand at authorship. His delineation of nautical scenes is allowed to be replete with humour and characteristic truth. Died, June, 1846, aged 56.

BARKER, ROBERT, known as inventor of the panorama, was born at Kells, in Ireland, 1740. While viewing the scenery round Edinburgh, whither he had removed as a portrait painter, he was struck with the idea of representing similar views in a circular painting, in which he ultimately succeeded, and thereby realized a considerable fortune. Died, 1806.

BARLOW, FRANCIS, an English artist; an excellent painter of animals. Died, 1702.

BARLOW, JOEL, American diplomatist, political and miscellaneous writer, was a native of Connecticut, and was brought up to the law. He gained some reputation by a poem entitled, "The Vision of Columbus," and came to England in 1788 as agent of the Ohio Company. In the following year he was one of the deputies sent by the Constitutional Society to address the French Convention. He was also, in 1811, appointed ambassador to Napoleon; and being invited to a conference with the emperor at Wilna, he proceeded thither, but the privations he was compelled to endure on his journey, and the fatigue of travelling night and day, caused his death. Barlow published several political treatises and pamphlets, which had much temporary popularity, and won him the eulogy of Fox in the House of Commons. Born, 1755; died, 1812.

BARLOW, PETER, Professor of Mathematics at the Royal Military Academy, Woolwich, for 40 years, was born at Norwich in 1776. He was a fellow of the Royal and Astronomical Societies, and a member of several government commissions. Among his works are "New Mathematical Tables," "New Mathematical and Philosophical Dictionary," "Essay on Magnetic Attractions," &c. He retired from his professorship in 1847. Died, 1862.

BARLOW, THOMAS, bishop of Lincoln in the reign of Charles II., James II., and William III. He was a man of the most versatile and accommodating principles. Under the first-named king he wrote against popery; under the second he wrote in favour of the royal power to dispense with the penal laws against it; and under the third he was among the most active in punishing non-juring clergymen. He wrote "Cases of Conscience," &c. Born, 1607; died, 1691.

BARLOWE, WILLIAM, son of William Barlowe, bishop of Bath and Wells in the reign of Queen Mary, and of Chichester in the reign of Elizabeth, was himself arch-deacon of Salisbury; he was well-skilled in

natural philosophy, and was the first English writer on the properties of the loadstone. Died, 1625.

BARNARD, SIR JOHN, lord mayor of London, and one of its representatives in parliament for 40 years. He was an able speaker, and a remarkably conscientious and religious man; and so greatly was he respected by his fellow-citizens, that they erected a statue to his memory in the Royal Exchange. Born at Reading, 1683; died, 1764.

BARNAVE, ANTOINE PIERRE JOSEPH, an eloquent and popular member of the French national assembly. He was born at Grenoble in 1761, was trained for the bar, and was deputy to the States General in 1789. He distinguished himself as the opponent of the privileged classes, and sometimes rivalled Mirabeau in eloquence. He was elected president of the Constituent Assembly in 1790, and when the royal family, after their flight from Paris, were arrested at Varennes, Barnave was one of the three sent to accompany them back to Paris. His manly delicacy on this occasion won him the liking and the confidence of the queen, and led to a correspondence between them. Barnave from that time was a defender of the monarchy, and lost his popularity. Though he retired to private life, he was arrested by the Robespierre party in 1792, and guillotined in 1794.

BARNES, JOSHUA, a learned divine, educated at Christ's Hospital, London, and Emanuel College, Cambridge; author of the "Life of Edward III.," and a poem "On the History of Esther," and editor of the works of Euripides, Anacreon, and Homer. Born, 1654; died, 1742.

BARNES, THOMAS, editor of "The Times," which owed much of its celebrity and influence to the political leaders that came from his pen, as well as to his rare skill and discrimination in its general management. Notwithstanding the share he took in the strife of politics, he retained the friendship of all who had once intimately known him, how much soever they might differ on questions of public interest. Mr Barnes was educated at Christ's Hospital and Pembroke College, Cambridge, where he took his B. A. and M. A. degrees. Died, 1841, aged 55.

BARNEVELDT, JOHAN VAN OLDEN, grand pensionary of Holland, was born in 1549. He was of an ancient and illustrious family, studied law at the Hague, and at several foreign universities, and commenced practice as an advocate at the Hague in 1570. He served as a volunteer at the siege of Haarlem, but did not continue in the army. He was chosen pensionary of Rotterdam in 1576. The Spanish arms being every where victorious in the United Provinces, an embassy was sent, with Barneveldt at its head, to offer the sovereignty of the Netherlands to Queen Elizabeth. She declined it, but agreed to send auxiliary forces, and gave the command to the Earl of Leicester. Barneveldt was again ambassador to England in 1590, and to France in 1598. He presided at the congress at the Hague in 1607, obtained from the Spaniards the recognition of the independence of Holland, and after a severe

contest with the Stadtholder Maurice and his party, concluded a truce with Spain. Barneveldt courageously opposed the ambition of Maurice, who aimed at the supreme power: he also supported Arminius against Gomara and the Calvinists, the party to which Maurice belonged; and in February, 1618, he was arrested, with his friends Grotius and Hoogerheets. He was tried by a special commission, and condemned to death. The sentence, both illegal and unjust, was sanctioned by the synod of Dort, and the venerable statesman and patriot, 71 years of age, was executed in May, 1619. The noble and pathetic letter of farewell to his wife is still preserved.

BARNEY, JOSHUA, a distinguished naval commander, was born at Baltimore, in 1759. When a boy he made several voyages to Europe; and in 1776, when not 17, he was presented with a lieutenant's commission on account of his bravery. During the struggle for American independence Barney took several vessels, and performed numerous acts of gallantry; and after various adventures arrived at Philadelphia in 1782, when he again entered on active duty, and continued a successful career till the end of the war. In 1795 he received the commission of captain in the French service, and commanded a French squadron, but resigned his command in 1800, and returned to America. In 1813 he was appointed to command the flotilla for defence of the Chesapeake. During the summer of 1814 he kept up an active warfare with the British; but he was made prisoner. Died, at Pittsburgh, 1818.

BAROCCIO, FEDERIGO, an Italian painter, and an imitator of the style of Correggio. Born at Urbino, 1528; died, 1612.

BARONIUS, CÆSAR, Cardinal and Librarian of the Vatican, was born at Sora, in Naples, in 1538. He joined the congregation of the Oratory, and succeeded St Philip de Neri as superior. He was made cardinal in 1596, and soon after librarian of the Vatican. His great work is the "Annales Ecclesiastice," in 12 vols. folio; a work of immense research, which occupied him for thirty years, and has passed through many editions. Died at Rome, 1607.

BAROZZI, JACOPO. [VIGNOLA.]
BARILLAS, PAUL FRANÇOIS JEAN NICOLAS, Count of, one of the first members of the French Directory, was born in Provence, in 1755. He entered the army, and served for a time in India; was at Paris in 1789; witnessed the fall of the Bastille; joined the Jacobin club, and in 1792 was chosen deputy to the National Convention, of which he afterwards became president. He took part in the siege of Toulon, and in the subsequent proscription and massacre there. He had a leading part in the revolution of the 9th Thermidor (fall of Robespierre, July, 1794); displayed great energy when the Convention was attacked by the people of the faubourgs; was named general-in-chief to oppose the sections on the 13th Vendémiaire (5 October, 1795), and employed Napoleon to command the artillery; and was named one of the five directors. His influence was very great, and he retained his post till the fall of the Directory, and the assumption of supreme

power by Napoleon as First Consul in No-
vember, 1799. He then retired from public
life, lived at Brussels till 1813, when, on a
charge of conspiracy, he was exiled to Rome.
In 1815 he settled at Paris, and died, 1820.

BARRETT, GEORGE, landscape painter,
was born in Dublin, but passed most of his
life in England, and was one of the founders
of the Royal Academy. Born, 1730; died,
1784.

BARRETT, WILLIAM, an English topo-
grapher; author of a "History of Bristol."
Died, 1789.

BARRINGTON, DAINES, an eminent jur-
ist, naturalist, and antiquary, was the fourth
son of the first Viscount Barrington, and
was born at London in 1727. After being
called to the bar he was appointed Secretary
to Greenwich Hospital. He became a fellow
of the Society of Antiquaries, and was made
President of the Royal Society. In his im-
portant "Observations on the Statutes" he
projected the reform of the statute law by
repeal and codification, which is still only in
process of execution. His "Miscellanies"
consist of essays on Natural History and an-
tiquarian subjects contributed to periodical
publications. He was a correspondent of
Gilbert White of Selborne. Died, 1800.

BARRINGTON, SHUTE, bishop of Dur-
ham, was the sixth son of the first Viscount
Barrington, and born in 1734. He engaged
in some controversial disputes both with the
Calvinists and Romanists; but though hos-
tile to the doctrines of the latter, he was a
liberal benefactor of the French clergy who
took refuge in England during the Revolu-
tion. Died, 1826.

BARROS, JOAS DE, one of the best Por-
tuguese historians, was born about 1495.
He was made pge to the king, governor of
a settlement on the coast of Guinea, and
agent-general for the colonies. His great
work is entitled "Asia Portuguesa," and
narrates the discoveries and conquests of the
Portuguese in the Indies. It has been fre-
quently republished, and is highly esteemed,
both for its matter and its style. Died, 1570.

BARROW, ISAAC, theologian and ma-
thematician, was born at London in 1630.
He was educated at Cambridge, and became
fellow of Trinity College. After several
years spent in foreign travel, he was ap-
pointed Professor of Greek at Cambridge, in
1660, and soon after Gresham Professor of
Geometry. He was subsequently Lucasian
Professor and Master of Trinity. He was a
man of great courage, energy, industry, and
disinterestedness; the latter quality shown
by his repeated relinquishment of lucrative
offices for conscience' sake. His works con-
sist of an edition of Euclid, "Lectures Op-
tica," "Lectures Geometricæ," "Lectures
Mathematicæ," and a collection of his Ser-
mons, Addresses, &c. His sermons are full
of original thought, were carefully written
and rewritten, and are still esteemed and
studied. Died, 1677.

BARROW, Sir JOHN, Bart., F.R.S., for
many years secretary to the Admiralty, a
great traveller, and a voluminous writer of
travels, biographies, &c.; was born near
Ulverston, in Lancashire, June 19th, 1764.
At an early age he displayed a decided in-

clination for mathematical pursuits, and
after passing some years as superintending
clerk of an iron foundry in Liverpool, he
became mathematical teacher at an academy
in Greenwich, whence he was appointed,
through the interest of Sir George Staunton,
secretary to the embassy to China, under
Lord Macartney, in 1792. In this capacity
his talents and acquisitions were duly ap-
preciated; and when Lord Macartney was,
in 1797, appointed to the government of the
Cape of Good Hope, he secured Mr Barrow's
services as private secretary, and subse-
quently appointed him auditor-general of
public accounts, an office which he held till
the Cape was evacuated by the English in
1803. In 1804 he was appointed, by Lord
Melville, secretary to the Admiralty; and
with the exception of a few months, during
the Whig administration, in 1806-7, he con-
tinued to fill this office down to his retire-
ment, in 1845. He was created a baronet
during the short administration of Sir Robert
Peel, in 1835. Besides contributing numer-
ous articles on miscellaneous subjects to the
Quarterly Review and the Encyclopædia
Britannica, he published the Lives of Lord
Macartney, Lord Anson, Lord Howe, and
Peter the Great; Travels in China, Voyage
to Cochin China, the Mutiny of the Bounty,
his own Autobiography, &c. The general
aim of his writings was to convey informa-
tion, to promote the arts and sciences, and
to stimulate research and inquiry; and he
had the great privilege to live to see the
most beneficial effects produced by his hos-
te and faithful labours. We should not
omit to state that Sir John was the constant
and successful advocate at the Admiralty
of those voyages of discovery which have
enlarged the bounds of science, and con-
ferred so much honour on the British name
and nation. Died, Nov. 23, 1848.

BARRY, GIRALDUS, see **GIRALDUS
CAMBRENSIS**.

BARRY, JAMES, painter, was born at
Cork, in 1741. He obtained the patronage
of Edmund Burke, and was sent to study at
Rome. He became Professor of Painting at
the Royal Academy, but in consequence of
disputes with the members he was expelled,
after holding the professorship 15 years.
His principal work is the series of pictures
painted for the Society of Arts, to illustrate
the progress of civilization. They represent
Orpheus subduing the Thracians; a Greek
harvest-home; Victors at Olympia; Triumph
of the Thames; the Society distributing
their prizes; and Final Retribution. Died,
in poverty and distress, 1806.

BARRY, MARIE JEANNE, COUNTESS DU,
mistress of Louis XV. of France, was born
in 1746. She was a native of Vaucouleurs,
and went young to Paris. She entered on a
dissipated course, and was presented to the
king in 1769, who had her married for form's
sake to Count Du Barry. She became the
centre of opposing political intrigues, and
her favour was courted by all. The duke de
Choiseul was dismissed from office because
he dared reproach the king for his choice.
She used the public treasury as her own.
After the death of Louis she was placed in a
convent, and being allowed to leave it, she

lived a decent life. She was condemned on ridiculous charges by the revolutionary tribunal and executed, in 1793.

BARRY, MARTIN, an English physiologist, was born in 1802. He graduated in medicine at the University of Edinburgh, but did not practise as a physician. He particularly distinguished himself by his investigations into animal development, and the fruits of his researches appeared in the "Philosophical Transactions." He was a fellow of the Royal Societies of London and Edinburgh, and received the royal medal of the former for his important discoveries. Died, 1855.

HARRY, Sir CHARLES, R.A., was born in May, 1795, and at an early age was articled to an architectural firm at Lambeth. He afterwards travelled in Italy, Greece, and other countries, studying carefully the architecture of each, and returned to England with an evident bias in favour of Italian, in which style he built St Peter's Church at Brighton, the first work which made him generally known. In his subsequent works he employed sometimes Grecian and Italian forms, but gradually acquired a preference for Gothic, which led him to express his strong dissatisfaction with his early work at Brighton. Among the numerous buildings of which he was the architect, the new Palace of Westminster is that by which his name will be most widely known. When the old Houses of Parliament were burned down in 1834, Mr Barry's design was selected, and the result is that magnificent pile which forms the chief adornment of the banks of the Thames. This building has excited much controversy and much hostile criticism. But whatever differences of opinion may exist as to its want of originality, or monotony of design, the great beauty of the work is unquestionable; and in any judgment formed of it careful account should be taken of the many difficulties with which the architect had to contend. When it is remembered that the design was made almost at the commencement of the revival of our national Gothic architecture, the impression will be one of admiration for the architectural genius which conceived such a work, and the conviction will remain that by it Sir Charles Barry has done incalculable service to the progress of English art and the maintenance of its true principles.

BARRY, SPRANGER, a celebrated actor; and, for a time, the rival of Garrick, who, however, in the higher walks of the drama, greatly excelled him. Born, 1719; died, 1777.

BART, JEAN, a distinguished French seaman, born at Dunkirk, in 1651. He served in the Dutch navy under De Ruyter, and at 20 years of age entered the French service. His daring, his intelligence, and his numerous successes obtained him great reputation. He was presented to Louis XIV. in 1691. His most brilliant achievement was the defeat of the Dutch Admiral Vries, and capture of a large fleet of vessels laden with corn, in 1694, for which letters of nobility were granted to him. Died at Dunkirk, in 1702.

BARTHELEMY, JEAN JACQUES, French historian and antiquary, was born in Provence, 1716. He was educated by the Je-

suits, became keeper of the king's cabinet of medals, which he enriched by collections made in Italy; obtained at Rome the friendship of many learned and distinguished men, among others the duke of Choiseul, who, when first minister, gave him several lucrative offices; and was admitted to the French Academy, and the Academy of Inscriptions. At the Revolution he lost his offices and was imprisoned, but was released through Danton's influence. He wrote several learned archaeological works, but won his greatest reputation by his "Voyage du Jeune Anacharsis en Grèce," which was long used as an authority on the history, manners, and customs of the Greeks. Died at Paris, 1795.

BARTHEZ, PAUL JOSEPH, an eminent French physician, was born at Montpellier, in 1734, where he founded a medical school, which acquired great reputation throughout Europe. For many years he practised in Paris, and was consulted upon the most important cases: he also wrote in the *Journal des Savans*, the *Encyclopédie*, &c.; and was a member of almost every learned society. During the Revolution he suffered greatly in his fortune; but Napoleon, who knew his great merits, restored him, in his old age, to wealth and honours. Died, 1806.

BARTHOLDY, JACOB SOLOMON, a Prussian diplomatist, born a Jew, but after travelling in Greece he abjured Judaism, and became a Protestant. In 1807 he served against the French as an officer in the landwehr of Vienna, and wrote a tract called "The War of the Tyrol," which produced a great sensation. Died, 1826.

BARTHOLINE, THOMAS, a Danish anatomist, was born at Copenhagen, in 1619. He studied at the principal universities in Europe, and was appointed Professor of Anatomy at Copenhagen, in 1648. He made many discoveries, among them that of the lymphatic vessels; his claim to which, however, is disputed. His works are very numerous. Among them are his "Anatomia," "Historiarum anatomicarum et medicarum centurie VI.," &c. Died, 1680.

BARTOLI, DANIELE, a learned Italian Jesuit, was born at Ferrara in 1608. He distinguished himself as a preacher in the chief cities of Italy, and was author of numerous works, the most important of which is the "istoria della Compagnia di Gesù." Among the others are "Vita di S. Ignazio," "L'Uomo di Lettere difeso ed emendato," and works on natural philosophy and grammar. Died, rector of the Roman College, 1685.

BARTOLI, PIETRO SANTO, an Italian painter and engraver, was born in 1635. He was a native of Perugia, studied under Nicolas Poussin, and engraved a great number of ancient works of art, chiefly those remaining in Rome. His works are mostly etchings. Died, 1700.

BARTOLOMEO, FRA. [BACCIO DELLA PORTA.]

BARTOLOZZI, FRANCISCO, an engraver of first-rate merit, was born at Florence in 1725 or 1730; came to England in 1764; was admitted a member of the Royal Academy in 1769; went to Lisbon, at the invitation of the prince-regent of Portugal, in 1802; and

 after Carlo Dolci, the "Death of Chatham"
 after Copley, &c.

BARTON, BERNARD, the "Quaker poet,"
 was born near London, 1784. In 1810 he be-
 came a clerk in Alexanders' bank, at Wood-
 bridge, where he served almost to the day of
 his death. His first volume of poetry was
 published in 1811, and this was succeeded by
 numerous others, most of them devoted to
 homely subjects, but all of them animated
 by the purest feeling and the most glowing
 fancy. But it was not only for his merits as
 a poet that Bernard Barton deserves to be
 held in remembrance. His genial good hu-
 mour and vast stores of information made
 him a welcome guest wherever he appeared;
 and the native sincerity of his character,
 which was apparent in every act of his life,
 was enhanced by a benignity, liberality, and
 charity, in entire accordance with the pre-
 cepts of his faith. Died, Feb. 19, 1849.

BARTON, ELIZABETH, "the Maid (or
 Nun) of Kent," was a poor country servant-
 girl, who first attracted public attention in
 the year 1525. She lived at Aldington, in
 Kent. Reduced by long illness to a state of
 great nervous debility, she became subject
 to trances, in which she uttered things that
 seemed beyond the reach of her own know-
 ledge, and which old Archbishop Warham,
 to whom the puzzled parish priest referred
 for guidance, pronounced to be "come of
 God." The tale spread and wonder grew
 rapidly, and the poor girl, though the trances
 ceased, kept up her communications, and
 soon became a tool in the hands of knavish
 monks. They made her acquainted with the
 legends of the saints, and the elements of
 the controversy then going on between the
 church and the reformers, and the stories of
 miracles wrought at sacred shrines. She
 took part in a performance got up in the
 Lady Chapel of the parish, which was at
 once published as a new miracle, and soon
 after entered a convent at Canterbury. Her
 reputation still grew, and people of the
 highest rank had recourse to her, and paid
 her for her counsels and prayers. She was
 led by the monks to pronounce an audacious
 sentence against the divorce of Catharine of
 Aragon, then under discussion; perplexing
 thereby Cranmer and Wolsey, and threaten-
 ing even the pope. Step by step she went
 on, till she became involved in the guilt of
 treason. The king was threatened with
 death, a large and powerful party existed,
 who rejoiced at the message and were ready
 to take part in an insurrection for the queen.
 Among these were Fisher, bishop of Roches-
 ter, and Sir Thomas More. At last the poor
 Nun and her monkish prompters were tried
 and convicted in the Star Chamber. They
 made public confessions of their guilt at
 Paul's Cross, and a bill of attainder having
 been passed, Elizabeth, the parish priest,
 and five monks were executed at Tyburn,
 21st of April, 1534. In a few pathetic sen-
 tences, spoken to the people before her death,
 she confessed the justice of her sentence,
 and showed how the "learned" priests had im-

posed upon her ignorance, and prayed God
 for mercy on herself and them.

BAITRAM, JOHN, an eminent American
 botanist, was born in Chester county, Penn-
 sylvania, in 1701. He formed a botanic gar-
 den near Philadelphia, said to have been the
 first establishment of the kind in America;
 and so intimate an acquaintance had he
 with the vegetable kingdom, that Linnæus
 pronounced him "the greatest natural bot-
 anist in the world." Died, 1777.

BAITRAM, WILLIAM, a son of the pre-
 ceding, was also a distinguished naturalist.
 At the request of Dr Fothergill, he travelled
 through the Floridas, Carolina, and Georgia,
 for the purposes of making researches in
 natural history, and transmitted to his em-
 ployer in London the valuable collections
 and drawings which he had made. His
 "American Ornithology" may be considered
 the precursor of Wilson's invaluable work.
 Died, 1823.

BASAITI, MARCO, an early Venetian
 painter, who flourished in the 15th and 16th
 centuries. He was a good colourist, and in
 some respects was the rival of Giovanni
 Bellini. His "Christ in the Garden," and
 "Calling of St Peter and St Andrew," are his
 finest pictures; both of them now in the
 Academy of Fine Arts, Venice. There are
 two small works of Basaiti in the National
 Gallery.

BASEVI, GEORGE, a distinguished archi-
 tect, was born, 1795. Among the edifices
 built or restored by him are the churches in
 the early English style at Twickenham and
 Brompton, the Norman church at Hove, near
 Brighton, and St Mary's Hall, at Brighton,
 in the Elizabethan style. Belgrave Square,
 in the metropolis, was erected from his de-
 signs; and he was joint architect with Mr
 Smirke of the Conservative Club, in St
 James's Street. His best work, however,
 is the Fitzwilliam Museum at Cambridge.
 Having gone to inspect the West Bell Tower
 of Ely Cathedral, then under repair, he ac-
 cidentally fell through an aperture, and was
 killed on the spot, Oct. 16, 1845.

BASIL, ST, surnamed the Great, bishop of
 Cæsarea, in Cappadocia, where he was born,
 about 326. He was studying at Athens in
 355, and there became the friend of Gregory,
 afterwards bishop of Nazianzus. After ex-
 tensive travels Basil retired to the desert of
 Pontus, and there founded an order of monks.
 He succeeded Eusebius in the see of
 Cæsarea, in 370, and by his opposition to
 Arian doctrines greatly offended the Empe-
 ror Valens. The attempts which Basil made
 to reunite the two hostile churches of the
 East and West were unsuccessful. Died, 380.

BASILILUS I, the Macedonian, emperor
 of the East, was of low origin, but got em-
 ployment at the court of the Emperor Mi-
 chael III, became his chamberlain, murder-
 ed his rival, Bardas, was associated in the
 empire, then murdered Michael, and suc-
 ceeded him in 867. Though he had risen by
 a series of crimes he governed wisely, made
 many reforms in the administration and in
 the army, and compiled a body of laws,
 called the *Basilica*, which, augmented by his
 son and successor, Leo the Philosopher, were
 in force till the fall of the empire. Basililus

deprived Photius of the see of Constantinople, and restored Ignatius; but on the death of the latter he recalled Photius. He carried on war successfully with the Saracens. Died, 856.

BASILIIUS II., emperor of the East; was son of Romanus II., and with his brother, Constantine, was first associated in the empire by John Zimisces, and succeeded him in 976. His long reign was a series of wars with his rivals, Bardas Sclerus and Phocas, with the Saracens, and with the Bulgarians. In 1014, after a great victory over the latter, having 15,000 prisoners, he had ninety-nine out of every hundred deprived of their eyes, and thus sent home. This horrible cruelty caused the death of Samuel, king of the Bulgarians. The war ended in 1019, by the complete conquest of Bulgaria. Died, 1025.

BASKERVILLE, JOHN, a celebrated letter-founder and printer; and one to whom the typographical art is much indebted. By his improvement in the form of the types, and in the various processes of printing, he raised the art to a higher state than it had before reached, but his labours appear to have been but faintly appreciated. It has been remarked, too, that his books are more elegantly than correctly printed. Baskerville's portrait was painted by Gainsborough. He was buried by his own desire in a tomb in his own garden. Born at Wolverley, in Worcestershire, in 1706; died, 1775.

BASNAGE, BENJAMIN, a French Protestant divine; pastor of the reformed church at Carentan more than 50 years. He was a zealous supporter of Protestantism, and took part in several important synods. He wrote a "Traité de l'Eglise." Born, 1580; died, 1652.

BASNAGE, ANTOINE, son of the above; imprisoned at Havre de Grace on account of his religion. Born, 1610; died, 1691.

BASNAGE, DE BEAUVAL, JACQUES, grandson of Benjamin, was a distinguished theologian and historian. He was born at Rouen in 1653, studied first at Saumur under Tannegui Le Fevre, then at Geneva and Sedan, and became pastor at Rouen in 1736. On the revocation of the Edict of Nantes he took refuge in Holland, became pastor at Rotterdam, and afterwards at the Hague, enjoyed the friendship of the grand pensionary Heinsius, and was employed in several political negotiations. The most esteemed of his numerous works are, "La Communion Sainte," "Histoire de la Religion des Eglises réformées," "Histoire de l'Eglise depuis Jésus Christ jusqu'à présent," "Histoire des Juifs depuis Jésus Christ jusqu'à présent," and "Antiquités Judaïques." Died, 1723.

BASSANO, JACOPO, or **JACOPO DA PONTE**, an Italian painter, was born at Bassano in 1510. He was first taught by his father, and then went to Venice and studied the great works of Parmigliano, Titian, and Bonifazio. He spent the rest of his life at his native place. His first productions had much grandeur of conception and excellence of colour, but he afterwards painted in a coarser and lower style. He treated even sacred subjects with a vulgar familiarity.

He worked rapidly, and his pictures are very numerous. There are three of them in the National Gallery. Bassano had four sons, who were also painters. Died, 1592.

BASSANO, HUGUES BERNARD MARET, Duke of, a celebrated French political writer and statesman, was the son of a physician at Dijon. On the first outburst of the French Revolution he enthusiastically embraced its principles, published the *Bulletin de l'Assemblée*, and soon after was appointed editor of the *Moniteur*. He became acquainted with Buonaparte, and was made by him *chef de division* in the foreign office. In 1792 he was sent to England, ostensibly to secure the neutrality of the British government, but in reality to hoodwink that government until the moment should arrive at which it could be securely, as well as efficiently, assailed. But the English minister of that day was too clear-sighted even for French diplomacy. Both Maret and the French ambassador, Chauvelin, were peremptorily ordered out of England; and the former, soon after his return home, was sent as ambassador to Naples, but was captured on his way thither by the Austrians, and detained as a prisoner until 1795. Maret took a bold and active part in the intrigues which were set on foot for the overthrow of the directory and the introduction of the consulate; and when the establishment of the latter crowned the success of those intrigues, he was made secretary to the council of state. Subsequently he was for some time private secretary to Buonaparte, to whose dictation, it is said, not a few of his articles in the *Moniteur* were actually written. In 1811 he was made *Duc de Bassano* and minister of foreign affairs; and in 1812 he conducted and signed the treaties between France, Austria, and Prussia, preparatory to the fatal expedition to Russia. When the emperor was sent to Elba, in 1814, the Duc de Bassano retired from public life; but immediately after the return of the emperor, he joined him, and was very near being taken prisoner at Waterloo. On the utter ruin of Napoleon, the duke was banished from France, but at the revolution of July, 1830, he was recalled, and restored to all his honours. In 1838 he was made minister of the Interior, and president of the council, but the ministry, of which he formed a part, survived only three days. Born, 1763; died, 1839.

BASSI, LAURA MARIA CATARINA, a learned Italian lady, whose singular accomplishments procured her the professor's chair at Bologna, and the title of doctor of philosophy. Born, 1711; died, 1778.

BASSOMPIERRE, FRANÇOIS DE, marshal of France, distinguished both as a soldier and a statesman, and remarkable for his personal attractions and his numerous gallantries, who, after being patronized by Henry IV. and Louis XIII., became an object of suspicion to Cardinal Richelieu, then first minister and master of France, and on account of his connection with the house of Lorraine, and various intrigues against the government, was imprisoned in the Bastille, 1631. He was not liberated till the death of Richelieu in 1643. He wrote

his own memoirs and an account of his embassies. Born, 1579; died, 1646.

BASTIAT, M. FRÉDÉRIC, who has gained a European reputation by his writings on political economy, was born at Paris in 1803. Without being a discoverer of new truths, he possessed the rare faculty of expounding with clearness and vigour the grounds and the effects of complex natural laws already developed by the processes of philosophy. The work by which he is best known in England is the "Sophismes Economiques," which was translated into English by Mr Porter of the Board of Trade. M. Bastiat was a member of the national assembly. He bore the highest character as an able, upright, and zealous servant of his constituents and his country; and did his utmost to spread among his countrymen that new and more liberal philosophy of trade of which he saw the effects in this country. His chief work is the "Harmonies Economiques," a posthumous publication. Died at Rome, 1850.

BASTWICK, JOHN, physician and political writer, was born in Essex about 1593. He studied at Cambridge, travelled over Europe, and settled as a physician at Colchester. In 1637 he was condemned by the Star Chamber for his books against prelacy, "Elenchus Papismi," and "A New Litany;" and was, like Prynne and Burton his fellow-prisoners, sentenced to a heavy fine, to be set in the pillory, have his ears cut off, his cheeks and forehead branded, and be imprisoned for life. He was sent to Sicily, and kept there till released by the Long Parliament. He was living in 1648, but the time of his death is not known.

BATE, GEORGE, physician to Charles I., Oliver Cromwell, and Charles II., and one of the first members of the Royal Society. He was the author of a Latin history of the civil wars, and some medical works. Born, 1593; died, 1669.

BATES, WILLIAM, a nonconformist divine; author of "Lives of Learned and Pious Men," &c. Born, 1625; died, 1699.

BATH, WILLIAM PULTENEY, Earl of [PULTENEY].

BATHORI. [STEPHEN BATHORI].

BATHURST, ALEN, Earl, a zealous opposer of the measures of Sir Robert Walpole, and the intimate friend of Bolingbroke, Pope, Addison, and the other eminent writers of his time. Born, 1684; died, 1775.

BATHURST, HENRY, Earl, son of the above, and made lord chancellor of England 1771; author of the "Theory of Evidence," &c. Born, 1714; died, 1794.

BATHURST, HENRY, bishop of Norwich, was born at Brackley, in Northamptonshire, in 1714; and educated at Winchester, and New College, Oxford. He was presented to the rectory of Witchingham, in Norfolk, in 1770; subsequently became dean of Durham; and, in 1805, was consecrated bishop of Norwich. In the House of Lords, Dr Bathurst was a strenuous supporter of the Catholic claims: in his diocese, an exemplary prelate. He died, April 5, 1837.—The bishop's eldest son, Dr HENRY BATHURST, archdeacon of Norwich, and rector of North Creake, Norfolk, and of Hollesley, Suffolk,

was the author of "Memoirs" of his right reverend father; a work overflowing with spleen and expressions of disappointment, that one so faithful to his old friends, the Whigs, should have never been preferred to a richer diocese! Died, Sept. 1844.

BATHURST, RALPH, dean of Wells; author of some elegant Latin poems, and one of the founders of the Royal Society. Born, 1620; died, 1704.

BATONI, POMPEO GIROLAMO, an eminent Italian painter, esteemed as the restorer of the Roman school. One of his most admired works is the "Fall of Simon Magus," at Rome. Born at Lucca, 1708; died at Rome, 1787.

BATOU KHAN, grandson of Zenghis Khan, and his successor in the northern part of his vast empire. He died, after a long reign and numerous conquests, in 1255.

BATTHYANI, Count LOUIS, a scion of one of the noblest and most ancient Hungarian families, was born in 1809. For many years he was the leader of the Liberal Opposition in the upper house of the Hungarian parliament; and had long been distinguished for his devotion to the cause of Hungary, which he longed to see reinstated in its ancient administrative independence. Summoned in March, 1848, by the emperor-king Ferdinand, to form the first independent and responsible cabinet of Hungary, he strictly adhered, while in office, to the constitution of the country; repeatedly repairing to the emperor-king's court at Innsbruck, to negotiate between the sovereign and the people, and labouring to heal the ruptures that daily threatened to plunge the nation into civil war. Animated by the same views, he left Pesth for Vienna, in September of the same year; but when he saw that all his efforts were likely to be fruitless, he resigned his office, and retired to his estates in Eisenberg. On the invasion of Hungary by Jellachich, the ban of Croatia, Batthyani entered the ranks of the National Guard; but a fall from his horse compelled him to give up all thought of aiding the cause of Hungary in the field. In December he returned to Pesth, and took part in the proceedings of the parliament, labouring as before, despite of calumny and intrigue, to negotiate between the king and the country, and to impress all parties with his own moderate and practicable views. Meanwhile the revolutionary party in the Hungarian parliament having proposed to transfer the seat of government from Pesth to Dobreczin, Batthyani strenuously opposed this measure on the ground of its illegality; and all that he could effect was, that a deputation, of which he formed one, should be sent to Prince Windischgrätz, once more to attempt a compromise between the king and the people. But the deputation failed in its object. This was Batthyani's last public act. On the 8th of January, he was arrested in the drawing-room of his sister-in-law, at Pesth, transferred successively to Oedenburg, Laybach, and Pesth, and, after nine months' imprisonment, was tried by court-martial, declared guilty of high-treason, and sentenced to die on the gallows, Oct. 6, 1849. He heard the sentence with tranquillity and composure. Having taken leave of his wife, he

endeavoured, in the course of the night, to open the veins of his neck by means of a blunt paper-knife, and thus to escape the last indignity of what the Austrians called the "law." But his attempt was discovered, and though he lost much blood, the surgeons succeeded in saving his life. The sentence, as pronounced by the court-martial, could not be executed, and it was commuted to a soldier's death. He died as he lived, calm, majestic, and conscious of innocence. His possessions were confiscated; and his wife (a member of the noble family of Ziehy) and children left the country of their fathers for a foreign land, there to weep, and if possible to forgive. The news of the execution of Batthyani caused astonishment and horror throughout the civilized world. Batthyani had never aimed at the complete separation of Hungary from Austria; he was decidedly opposed to the establishment of a Hungarian republic; and he had, through good and evil report, supported the union between the two countries, on the basis of the constitution of March, 1848. But his devotion to the cause of constitutional government had procured him much ill-will at the court of Vienna, then bent on the restoration of the despotic system, overthrown in 1848; and it is not improbable that, buoyed up by the success that had followed the Russian invasion in 1819, they took occasion to strike, in the person of Batthyani, at all who might be inclined to tread in his footsteps; for *despotic* governments hold in especial abhorrence the moderate reformer.

BAUET, FERDINAND, a German artist, highly distinguished as a botanical painter. He came to England, and made drawings of the exotic plants in the royal gardens of Kew; and was engaged as draughtsman to accompany Robert Brown, in Captain Flinders' expedition to the coast of New Holland, between 1802 and 1805, for the purpose of making drawings there from the living plants, which drawings were afterwards published. Died, at Vienna, 1826.

BAUHIN, JEAN, a French physician and celebrated botanist; author of "Historia Plantarum," &c. Born at Basle, 1541; died, 1613.

BAUHIN, GASPARD, brother of the above; an excellent botanist, author of "Institutiones Anatomice," "Phytopinax," "Pinax," and numerous other works. Born, 1560; died, 1624.

BAUME, ANTOINE, a French chemist, born at Senlis, 1728. He was chosen professor of chemistry at the College of Pharmacy, Paris, and made his laboratories great manufactories. He invented and improved many processes in the useful arts, and was admitted to the Academy of Sciences. He lost at the Revolution the fortune on which he had retired, and bravely began work afresh. He was received at the Institute in 1796, and died, 1804. He left several useful works on chemical subjects.

BAUMGARTEN, ALEXANDER GOTTLIEB, professor of philosophy at Frankfort-on-the-Oder; author of "Metaphysica," "Ethica Philosophica," &c. He is chiefly remembered as the first writer who used the term

"Aesthetics" to designate the science of the beautiful. Born, 1714; died, 1782.

BAUR, FERDINAND CHRISTIAN, a distinguished German theologian and biblical critic, head of the so-called Tübingen School of Rationalist divines, was born in 1792. While holding a professorship at a seminary in Blaubeuren he published, in 1824, his work entitled "Symbolik und Mythologie." In 1826 he accepted a call to the chair of theology at Tübingen, and thenceforward he distinguished himself by his labours and learned productions in the field of biblical criticism, and the history of doctrines. A disciple of Hegel, he applied the principles of his philosophy to the study of theology and the criticism of the earliest Christian literature; with results startling enough, and which are still the subjects of grave controversy. His principal works on the history of Dogmas are—"The Christian Gnosis," "The Christian Doctrine of the Atonement," and "The Christian Doctrine of the Trinity and Incarnation." Of his works of New Testament criticism the most important are—"The Christ-party in the Corinthian Church," an essay in the Tübingen Journal for 1831; "The so-called Pastoral Letters of the Apostle Paul;" "Paul, the Apostle of Jesus Christ;" "Critical Researches respecting the Canonical Gospels," in which he especially attempts to disprove the historical character of the Fourth Gospel; and a work on the Origin and Character of the Gospel of Mark. Died, 1861.

BAXTER, RICHARD, the eminent Nonconformist preacher and writer, was born in Shropshire in 1615. He was ordained in 1638, and after short engagements at Dudley and Bridgnorth, became parish minister of Kidderminster in 1640. He was very laborious and very popular as a preacher, but held an uncertain and fluctuating position between the conflicting parties in the civil war. At one time he was chaplain to a regiment of the parliamentary army, and was present at several sieges. He returned to Kidderminster, took part in the Savoy conference, and drew up a reformed liturgy, and had to quit his living on the passing of the Act of Uniformity. For ten years he was chiefly occupied in writing, but in 1672 he went again to London and preached, though with many interruptions. He was several times the victim of the persecuting enactments of the time, and was tried before Judge Jefferies on a charge of sedition. Jefferies played his usual coarse part, and fined and imprisoned the venerable preacher, then 70 years old. Baxter was a prolific writer, a large portion of his works being polemical and now little read. His most popular books are the "Saints' Everlasting Rest," "Dying Thoughts," and "Call to the Unconverted." His theological views are set forth in the "Methodus Theologiae," and "Catholic Theology;" and he has left an account of the principal passages of his life in the "Reliquiae Baxterianae." Died, 1691.

BAXTER, ANDREW, an eminent metaphysician, and author of an "Enquiry into the nature of the Human Soul," &c. Born at Aberdeen, 1687; died, 1750.

RRAIL, Siegneur

de, named, the "*Chevalier sans peur et sans reproche*," was born at the Château of Bayard, near Grenoble, 1476. He was the descendant of a line of distinguished soldiers, and was early devoted to arms. At first page to the duke of Savoy, he passed into the service of Charles VIII. of France, and followed him in his invasion of Naples in 1494, taking a brilliant part in the battle of Fornova. He followed Louis XII. in his conquest of the Milanese, was captured by Sforza, and given up by him without ransom. One of Bayard's most celebrated actions was his defence, single-handed, of the bridge over the Garigliano against a large body of Spaniards. In the war following the unrighteous League of Cambray, Bayard served again, and by a daring rapid movement decided the victory of Agnadello. He was severely wounded at the attack of Brescia, and being carefully nursed by a lady and her two daughters, he in return protected them from harm to life or honour. Bayard distinguished himself at the "Battle of the Spurs," and finding defeat inevitable, he took prisoner an English knight, and then surrendered himself prisoner to him. The emperor and Henry VIII. received him with the highest honour, and liberated both knights. On the accession of Francis I. the war in Italy was renewed, and at the great battle of Marignano Bayard surpassed himself, decided the victory, and had the honour of knighting his sovereign on the field. The successful defence of Mezières against Charles V. was his next achievement. Two years later, 1524, he served under Admiral Bonnivet in Italy, against the Imperialists under the Constable de Bourbon, and at the passage of the Sesia received his mortal wound. He refused to be carried off the field, saying he would not then for the first time turn his back on the enemy. Set at the foot of a tree, he still urges on his comrades, kisses the cross of his sword, and confesses himself to his squire. The Constable coming up was affected at the sight, and the noble Bayard with almost his latest breath is said to have uttered the rebuke, "It is not me you should mourn for, but yourself, fighting against your king and your country." So he died. In Bayard, more perhaps than in any other man, we may see the "realized ideal" of chivalry; the combination of perfect courage with entire unselfishness, the utmost generosity, and a purity of life wonderful in that age, perhaps in any age. Although he never rose to be general, nor held any independent command, by the power of his character and the lustre of his actions he won a place in the world's esteem far higher and more glorious than titles could ever secure. His life was written by his "loyal serviteur" or secretary, and has passed through many editions.

BAYER, JOHAN, a German astronomer of the 17th century; author of "*Uranometria*," a celestial atlas.

BAYER, GOTTLIEB SIEGFRIED, German philologist, who became Professor of Greek and Roman Antiquities at St Petersburg, and was author of a very curious and able work, entitled "*Museum Sinicum*." Born, 1694; died, 1738.

BAYLE, PIERRE, a French critic and miscellaneous writer, was born at Curliat in 1647. He was educated at the universities of Puy-laurens and Toulouse, and for a short time professed the Catholic faith. In 1674 he settled at Paris, and was soon after chosen professor of philosophy at Sedan, and six years later removed to Rotterdam, where he filled the same chair. Deprived of his post in 1693, he devoted himself to the preparation of his great work, the "*Dictionnaire Critique et Historique*," which at first appeared in 2 vols. folio in 1695-6. Fresh controversies were excited by this work, which engaged him till his death. Bayle was an indefatigable student, and is said to have worked 14 hours a day for 40 years. He wrote a powerful treatise against the persecution of the Protestants, and founded a periodical work, entitled "*Nouvelles de la république des Lettres*." His "*Dictionary*," much enlarged, has passed through many editions. Died, 1706.

BAYLEY, Sir JOHN, a learned and upright judge, was called to the bar in 1792, and appointed a serjeant-at-law in 1799. In 1808 he was made one of the Justices of the King's Bench, and received the honour of knighthood. He was a man of liberal education and enlarged notions; to a most benevolent heart he added the dignified manners of the gentleman, and a degree of professional erudition that placed him in the first rank among his judicial compeers. His work "*on the Law of Bills of Exchange*" has long been a standard book in the profession, and its value in the commercial world is universally acknowledged. On his retirement from the bench, in 1834, he was sworn a member of the privy council, and created a baronet. Died, 1841, aged 78.

BAYLEY, RICHARD, an eminent American physician, was born in Connecticut, in 1745. After studying at home, he completed his professional education in London, and settled at New York. In 1792 he was appointed professor of anatomy in the college of Columbia, where he acquired great celebrity. In 1739 he published his work on yellow fever, wherein he proved it to be a local malady. Died, 1801.

BAYLY, THOMAS HAYNES, a lyrical poet of some merit, and the author of several dramatic pieces, and one or two novels. Though very popular in his own day, he was far too light and merely amusing a writer to have a hold upon posterity; and the majority of his writings are already rapidly passing into oblivion. Born, 1797; died, 1839.

BEATON, DAVID, Cardinal, archbishop of St Andrews, was born in 1494. He became abbot of Arbroath in 1525, lord privy seal three years later, was sent on several embassies to France, made a cardinal in 1538, and in the following year became primate. On the death of James V. he by craft and determination secured to himself the chief power in church and state, being named lord high chancellor and papal legate. He opposed an alliance with England, and especially distinguished himself as a persecutor of the reformers. The trial and burning of George Wishart for heresy took place under his direction, and a short time after he was

assassinated at St Andrews, May, 1546. With his death church tyranny came to an end in Scotland.

BEATTIE, JAMES, a Scottish poet and miscellaneous writer, was born at Laurencekirk in 1735. He was educated at the Marischal College, Aberdeen, where in 1760 he was called to the chair of moral philosophy and logic. With considerable reputation as poet and metaphysician, he visited London in 1771, and in several subsequent years; received a pension, and gained the friendship of Johnson, Sir Joshua Reynolds, and other eminent men. His most admired poem is "The Minstrel," and his principal prose works are, the "Essay on Truth," an attempt to refute the doctrines of Hume; "Elements of Moral Science," and "Dissertations Moral and Critical." His last years were embittered by the loss of his only two sons, and after successive attacks of paralysis, he died in 1803.

BEAUCHAMP, RICHARD, an English prelate, admirably skilled in architecture. He was made bishop of Salisbury in 1450, was employed in various important negotiations, and became chancellor of the order of the Garter. He was subsequently appointed surveyor of the works at Windsor, and superintended the building of St George's Chapel. The great hall in the episcopal palace of Salisbury, and the sepulchral chapel in the cathedral, are also monuments of his taste and science. Died, 1481.

BEAUFORT, HENRY, Cardinal, bishop of Winchester, was the third son of John of Gaunt, by Catherine Swynford, and thus half-brother to Henry IV. He entered the church, was made bishop of Lincoln in 1397, and bishop of Winchester in 1404. He was learned in the canon law, and held the office of chancellor several times. The quarrel between him and his nephew Humphrey, duke of Gloucester, began in 1422, when both were members of the Council of Regency, and only ended with the suspicious death of Gloucester in 1447. Beaufort was created cardinal and papal legate in 1425, and died soon after Gloucester, in 1447. He had acquired immense wealth, lent large sums to Henry V. and Henry VI., founded the Hospital of St Cross at Winchester, and left his riches to various charitable uses.

BEAUFORT, MARGARET, countess of Richmond and Derby, mother of Henry VII. She founded St John's College and Christ's College, Cambridge, and distinguished herself likewise as an author. Born, 1441; died, 1509.

BEAUFORT, FRANÇOIS DE VENDOME, Duke of, son of Cesar, duke of Vendome, was imprisoned by Cardinal Mazarin. On his escape, he took a leading part in the war of the Fronde, and after the conclusion of peace, was appointed admiral of France. He distinguished himself in 1665 by two victories over the Algerine pirates, and passing afterwards into the service of Venice, was killed at the siege of Candia, 1669.

BEAUHARNAIS, ALEXANDRE DE, a French nobleman, born in 1760. He took part in the Revolution, and after having been at one time president of the national assembly, and served in the armies of France with

distinction, was put to death by the revolutionary tribunal just previous to the fall of Robespierre, in 1794. His widow, Josephine, was afterwards wife of Buonaparte.

BEAUHARNAIS, FRANÇOIS, Marquis de, elder brother of Alexander, was born in 1756. He was appointed major-general in the army of the Prince of Condé, in 1792; protested against the unlawful treatment of the king, in a letter to the president of the national assembly; and when Buonaparte became first consul, he exhorted him to restore the sceptre to the house of Bourbon. He was afterwards appointed ambassador to the court of Spain, but fell into disgrace with Napoleon, and was banished. He returned to Paris after the restoration, and died in 1819.

BEAUHARNAIS, EUGÈNE DE, viceroys of Italy and prince of the French Empire, was the son of Alexandre de Beauharnais and Josephine, afterwards wife of Napoleon. He was born at Paris in 1781, and became aide-de-camp to Napoleon in 1796. He accompanied him to Egypt, was wounded at Acre, contributed to the victory of Marengo, was made prince of the Empire in 1804, and afterwards grand officer of the Legion of Honour, and viceroys of Italy. In 1806 he was named governor of the Venetian states, and was adopted by Napoleon. He served in the campaign of 1809, defeated the Austrians at Raab, and distinguished himself at Wagram. He took part also in the expedition to Russia, and in the campaigns of 1813 and 1814. After the fall of Napoleon he retired to Munich. He had married in 1806 Augusta Amelia, daughter of the king of Bavaria, and left two sons and three daughters. Died, 1824.

BEAUHARNAIS, HORTENSE EUGENIE, ex-queen of Holland, and duchess of St Leu, was born at Paris, in 1783, being the daughter of Viscount Beauharnais (who perished by the guillotine in 1794) by his wife Josephine, afterwards the consort of Napoleon. Hortense was married to Louis Buonaparte in 1802, but it was an ill-starred union, and they separated in 1807, after she had given birth to three sons; the eldest of whom died in childhood; the second was killed in an insurrection at Romagna, in 1832; the youngest (Louis Napoleon) became the first president of the French republic, established in 1848; and in 1852 emperor of the French, with the title of Napoleon III. Died, 1837.

BEAULIEU, SEBASTIEN DE PONTAULT DE, a celebrated French engineer and field-marshal under Louis XIV.; author of "Views and Plans of the Battles and Sieges of Louis XIV." Died, 1674.

BEAUMARCHAIS, PIERRE AUGUSTIN CARON DE, a man of singular versatility of talent, politician, artist, merchant, and dramatist. He was author of the comedies of "The Barber of Seville," "The Marriage of Figaro," &c.; but it was to a lawsuit that he was first indebted for his popularity as an author; the memorials and pleadings which he drew up being so full of wit, satire, and sound reasoning, as to attract public attention in an extraordinary degree. Born, 1732; died, 1799.

BEAUVIL St Aignan, so reign of Loui BEAUVIL Aignan, an e governor to t in 1648. He at the age of

English dramatic poet, was a younger brother of Sir John Beaumont, judge of the Common Pleas in the 17th century; and, in conjunction with his friend Fletcher, the author of a number of excellent plays. They were both admirable delineators of human nature, and their contemporaries preferred their dramas even to those of Shakspeare, whom they made their model. The works of these twin poets contain much of the fine gold of poetry, but also very much of the alloy of indecency and obscurity; so that they are not easily presentable to modern readers. Born, 1585; died, 1615.

BEAUMONT, Sir GEORGE, bart., a distinguished amateur painter, and a great patron of art and artists, was born at Dunmow, Essex, in 1753; died, 1827. Sir George took an active part in the establishment of the National Gallery, and contributed to it his own collection of pictures.

BEAUMONT, JOHN THOMAS BARBER, well known as the founder, and many years managing director, of the County Fire Office, &c., was born in London, in 1774, his paternal name being Barber. In his youth he manifested a strong desire to obtain eminence as a painter. He afterwards became an author, and published a "Tour in Wales," besides several tracts upon the best mode of arming the population, so as most effectually to repel the threatened French invasion; and he at length put in practice what he had so strenuously recommended to others, by organizing a matchless rifle corps, known by the name of the "Duke of Cumberland's Sharpshooters," of which corps he was appointed, in 1804, captain commandant. In 1806 he established the Provident Institution, which gave rise to the various similar establishments, now better known as "savings banks," throughout the kingdom. He died in May, 1841, having bequeathed the bulk of his property to his children, except the sum of £10,000 to establish a philosophical Institution in Beaumont Square, Mile-end.

BEAUSOBRE, ISAAC, a French theologian, was born at Niort in 1659. He was of a Protestant family, was educated at Saumur, and became pastor at Châtillon-sur-Indre in 1683. On the revocation of the Edict of Nantes his church was closed, but he made bold to break the royal seals on the gates and preach. He took refuge in Holland, and in 1694 settled at Berlin, where he became pastor and chaplain to the king, and was highly esteemed for his learning and piety. He projected a voluminous History of the Reformation, which he left incomplete. His most celebrated work is the "Histoire Critique du Manichéisme." He assisted in a new version of the New Testament, and published "Remarques, critiques, et philologiques sur le Nouveau Testament." Died, 1738.

BEAUVILLIER, FRANÇOIS DE, duke of St Aignan, soldier, courtier, and poet, in the reign of Louis XIV. Born, 1607; died, 1687.

BEAUVILLIER, PAUL DE, duke of St Aignan, an eminent French statesman, and governor to the sons of Louis XIV., was born in 1648. He entered the service of the king at the age of 18, and in 1685 was named pre-

sident of the council of finance. He accompanied the Dauphin on his first campaign, and in 1689 was appointed governor to the duke of Burgundy. The dukes of Anjou and Berri were also placed under his charge. It was by his influence that Fenelon was chosen to be tutor to the duke of Burgundy, and he remained the firm friend of the noble and proscribed prelate to the end. In 1691 he was named minister of state, and by his wise foresight, sound judgment, and regard for the interests of the people, rendered valuable services on several critical occasions. On the accession of the duke of Anjou to the throne of Spain, as Philip V., Beauvillier was made a grandee of Spain. He reached his highest position when the duke of Burgundy became Dauphin, and was associated with his father in the government. He was the constant adviser and friend of the Dauphin, and shared with him all the toils of state. And when in 1712 the Dauphin died, the blow was terrible to Beauvillier, as it was to Fenelon. In failing health he lingered on, and died in 1714.

BEAUVUOIS. [PALISSOT DE BEAUVUOIS.]

BECCADELLI, ANTONIO, also named **PANORMITA**, an Italian littérateur, was born at Palermo in 1394. He entered the service of the duke of Milan, was named Professor of Belles Lettres at Pavla, and received the poetic crown from the Emperor Sigismund in 1432. He then entered the service of Alfonso, king of Arragon, who sent him on various embassies. He was employed also by Ferdinand, son and successor of Alfonso. He left "History of Alfonso, and other works. Died, 1471.

BECCAFUMI, DOMENICO, whose real name was **MECHERINO**, was one of the best painters of the Sienese school. His style was formed on that of Perugino, but was modified subsequently by the study of other artists. He executed some statues and bas-reliefs in bronze, and completed the mosaic of the pavement in the cathedral of Sienna. Born, 1484; died, about 1550.

BECCARIA, GIOVANNI BATTISTA, an ingenious practical philosopher, whose whole life was devoted to the study of physics. He was professor of philosophy at Palermo and Rome, and published several works of great merit, particularly on the nature of the electric fluid. Born, 1716; died, 1781.

BECCARIA, CESARE BONESANA, Marquis of, an Italian political philosopher, born at Milan in 1735. He is chiefly known as author of the celebrated "Treatise on Crimes and Punishments," which first appeared in 1764, and advocated great reforms in criminal legislation. It passed through six editions in Italy in the first two years, and was soon read all over Europe. It brought, however, a storm of persecution on the author, who was protected by the Austrian governor of Lombardy, and made Professor of Political Philosophy. Beccaria was one of the principal writers in the journal called "Il Caffè," published at Milan, in imitation of the English "Spectator." Died, 1793.

BECERRA, GASPARO, a Spanish painter and sculptor, pupil of Michael Angelo. Died, at Madrid, 1570.

BECHSTEIN, JOHANN MATTHIAS, a German naturalist, was born in 1757. He studied theology at Jena, but abandoned the church for his favourite study. He entered the service of the Duke of Saxe-Meiningen in 1800, as director of a "Forest Academy." Bechstein's "Natural History of Cage Birds" has been translated into English. Among his other works are "True Delineations of Natural History," "Handbook of Forest Science," "Forest Insectology," &c. Died, 1822.

BECK, ANTHONY. [BEK.]

BECKET, ST THOMAS A, archbishop of Canterbury, was the son of a London merchant, his mother being a convert from Mohammedanism. He was born in 1119, and was sent by Theobald, archbishop of Canterbury, to study at Oxford and Bologna. He entered the church, and was much forwarded by Theobald. In 1138 the king made Becket chancellor. In the following year he accompanied the king to France, with a large and splendid retinue. He was elected archbishop of Canterbury, by command of Henry II., in 1162; and soon after he resigned the office of chancellor, thereby giving great offence to the king. Becket now laid aside all pomp and luxury, and led a life of monastic austerity. In the controversy which immediately arose respecting the limits of civil and ecclesiastical authority, Becket asserted against the king the independence of the church, and refused to sign the "Constitutions of Clarendon." By a council or parliament at Northampton Becket was condemned, and suspended from his office. He escaped in disguise to France, and had the protection of the king. In response to his excommunication of the clergy who signed the "Constitutions," and some of the king's officers, the king banished all the relations of Becket, and forbade all communication with him. War with France followed. In 1170 a meeting took place between the king and the archbishop, at Fretville, where they were professedly reconciled, and Becket returned to Canterbury. He at once published the pope's sentence of suspension against the archbishop of York, and other prelates, who had crowned Prince Henry. The king's angry expression on hearing this induced four of his barons to go immediately to Canterbury, and after unsuccessfully remonstrating with Becket, they followed him into the cathedral and murdered him on the steps of the altar, 31 December, 1170. The king denied all share in the murder, and was absolved; but in 1174 he did penance at Becket's tomb. Becket was canonized by Alexander III. in 1173. His remains were translated in 1220 to a splendid shrine, which attracted crowds of pilgrims, and was loaded with rich offerings. The immense treasure was seized by Henry VIII., and the shrine destroyed in 1538.

BECKFORD, WILLIAM, one of the most remarkable men of modern times, was the son of Alderman Beckford, of London, who bequeathed him property, said to amount to upwards of £100,000 per annum. He had a strong passion for building, and in erecting the much-talked-of Fonthill Abbey, spent in a very few years the enormous sum of

£273,000! An excellent scholar, and possessed of a fine taste in almost every branch of art, he collected in the fantastic but costly "Abbey" one of the finest and most extensive libraries in England, and his pictures and curiosities were almost unequalled. His vast expenses, and the loss of a large portion of his West Indian property, rendered it necessary for him to sell the abbey, and, with a few exceptions, all its rich and rare contents, in 1822. When the sale was announced, public curiosity was so generally excited, that 7200 catalogues were sold at one guinea each! But his claim to remembrance rests chiefly upon his wild and singular tale of "Vathek," which is so splendid in description, so true to eastern costume, that Lord Byron said, "Even Russelas must how before it; the Happy Valley will not bear a comparison with the Hall of Eblis." In addition to "Vathek," Beckford wrote a satirical work, entitled "Memoirs of Extraordinary Painters;" "Italy, with Sketches of Portugal and Spain;" and "Recollections of an excursion to the Monasteries of Alcobaga and Batalha." Died, May, 1844, aged 84.

BECKMANN, JOHANN ANTON, a native of Hanover, and a professor at Gottingen, where he lectured for many years on subjects connected with rural and political economy, &c. He was the author of several works, of which his "History of Discoveries and Inventions" is the best known. Born, 1739; died, 1811.

BEDDOES, THOMAS LOVELL, dramatic poet, was born at Clifton in 1803. His father was a physician, and the early patron of Sir Humphrey Davy, and his mother was a younger sister of Maria Edgeworth. Early left an orphan, he was educated at the Charterhouse and at Oxford, where his impetuous, sarcastic, and rebellious disposition involved him in frequent conflicts with the authorities. He left the university, after taking his degrees, wearied and dissatisfied, in 1824. He then went to study medicine at Göttingen, became an enthusiastic student of science, graduated M. D. at Wurzburg, lived afterwards at Strasburg and Zurich, and was several times banished by Prussian, Hanoverian, and Bavarian governments as a democrat, and died at Basel early in 1849. His principal poem, the only completed work of his mature years, is that entitled "Death's Jest-Book, or The Fool's Tragedy." He first made himself known by the "Bride's Tragedy," published in his second college year, and which won him the warm friendship of "Barry Cornwall" and George Darley. After his death a volume of his "Poems," chiefly early ones and mere fragments, with some striking letters, was published, with a memoir by his friend Mr Kelsall. Beddoes was a passionate admirer of the great dramatists of the 16th century, and he showed himself a genius of the same order. "The few poems he has left," says a friendly critic, "are magnificent in diction, terse and close in expression, various and beautiful in modulation, displaying imaginative thoughts of the highest reach, and sweeping the chords of passion with a strong and fearless hand. Plenty of defects may be noted, but never a want of sincerity, never a borrowed trick.

scholar, and almost every branch fantastic but costly and most excellent, and his pictures unequalled. His is of a large portion very, rendered it the abbey, and, with rich and rare contents was announced, generally excited, sold at one guinea remembrance rests and singular tale of splend in descriptive costume, that Lord plas must bow they will not bear a of Ebilis." In adford wrote a satirical-moirs of Extraor-, with Sketches of d "Recollections of asteries of Alrobaa y, 1844, aged 84.

never a gaudy irrelevance, never a superfluous common-place."

BEDD, or BEDA, surnamed "the Venerable," an English monk and ecclesiastical historian, was born in the bishopric of Durham, about 673. He was for twelve years a student in the monastery of Wearmouth, while Benedict Biscop was abbot. He also received instruction from John of Beverley. He was ordained priest about 703, and had already obtained a wide reputation for learning and piety. His whole life was spent quietly in his monastery, devoted to study and writing. His most important work is the "Ecclesiastical History of England," published about 731, and highly esteemed as one of the most trustworthy sources of early English history. It was written in Latin, and was translated into Saxon by Alfred the Great. The earliest printed edition appeared in 1474. Bede wrote many works, among others a "Chronicle" from the Creation to A. D. 725. And he completed a Saxon translation of St John's Gospel the day he died. His end was peaceful and Christian, as his life had been. He died May 26, 735. His remains, at first deposited in the monastery, were afterwards removed to Durham cathedral.

BEDFELL, WILLIAM, bishop of Kilmore, was born in Essex in 1570. He studied at Cambridge and entered the church. He spent eight years at Venice as chaplain to Sir Henry Wotton, and there enjoyed the friendship of Paul Sarpi, the great historian of the Council of Trent. After discharging the duties of parish priest first at Bury St Edmunds, and next at Horningsheath, he was chosen provost of Trinity college, Dublin, in 1627, and two years later was made bishop of Kilmore and Ardagh. He did good service both at the college and in his see, by reforms he introduced. At 70 years of age he was seized with his family by the rebels and imprisoned. Died soon after, in 1642. Bishop Bedell caused the Old Testament to be translated into Irish.

BEDFORD, JOHN, Duke of, regent of France, was third son of Henry IV. and his first wife Mary de Bohun, and was born in 1390. He was knighted on his father's coronation, named constable of England in 1403, created duke of Bedford in 1415, and was sent to succour Harfleur the following year. Henry V. desired that Bedford should be regent of France, and the duke of Gloucester regent of England, during the minority of his son; but by act of parliament Bedford was appointed protector of the kingdom, and Gloucester his substitute in case of absence. In 1422 Charles VI. of France died, and long years of war followed between the rival claimants of the kingdom, Charles VII. and Henry VI. Bedford secured the alliance of the dukes of Burgundy and Brittany, and had a long series of military successes. The tide turned at the siege of Orleans, which was raised by Joan of Arc. The duke of Brittany had previously abandoned the English; the duke of Burgundy did the same in 1435; and the death of Bedford, hastened by disappointment, followed immediately. Died at Rouen, September, 1435.

BEDFORD, JOHN RUSSELL, 6th Duke of, K.G., distinguished for his princely patron-

age of the fine arts, and every branch of social industry. A member of several learned societies, versed in science and fond of literature, he was no less attached to agriculture, to the improvement of which he devoted many years and large sums of money. He expended upwards of £40,000 in rebuilding Covent Garden Market, in such a style as to render it one of the ornaments of that part of the metropolis. In politics his Grace was a Whig; but his whole course and character were such as to procure him the esteem of men of all parties, and to obtain for him emphatically the title of "a good old English gentleman." Born, 1766; died, 1839.

BEDLOE, WILLIAM, Captain, an infamous informer, noted for his perjuries, and rewarded with £500 for pretended information respecting a popish plot, and the death of Sir Edmundbury Godfrey. Died, 1680.

BEDMAR, ALFONSO DE LA CUEVA, Marquis of, cardinal, bishop of Oviedo, Spanish diplomatist, was born in 1572. He was sent ambassador to the republic of Venice by Philip III. in 1607, and in 1618 he took part with Don Pedro of Toledo, governor of Milan, and the duke of Ossuna, then viceroy of Naples, in a conspiracy to overthrow the republic of Venice, by firing the arsenal, pillaging the mint and the treasury of St Mark, and massacring the doge and the senators. The plot failed, and many Frenchmen and Spaniards were arrested and hung or drowned as accomplices. Bedmar was allowed to retire. He was created cardinal in 1622, was afterwards governor of the Netherlands, made himself detested by the Flemings, and retired to Rome. Died, 1655.

BEECHEY, Rear-Admiral FREDERICK WILLIAM, the son of the distinguished painter, Sir William Beechey, was born in London in 1796, entered the navy in his tenth year, and after a great variety of services in all parts of the globe, became a Lieutenant in 1815. In 1818 and 1819 he took part in the great arctic expeditions under Sir John Franklin and Sir Edward Parry; in 1821 he was engaged in the survey of the coast of Northern Africa under Captain (afterwards Admiral) Smyth; and in 1825, having attained the rank of commander, he was appointed to the Blossom to take part in another polar expedition, and the results of this voyage, which lasted three years, were published under the title of a "Narrative of a Voyage to the Pacific and Behring Straits to co-operate with the Polar Expedition in 1825-1828," and contributed largely to the progress of geographical enterprise and physical science. From 1837 to 1847 Captain Beechey was engaged in the survey of the Bristol and Irish Channels; and he was afterwards appointed to constitute and superintend the Marine Department of the Board of Trade,—a service in which he was employed till the day of his death. In 1854 he was promoted to the rank of rear-admiral, and the following year was elected President of the Royal Geographical Society. Died, 1856.

BEECHEY, Sir WILLIAM, R.A., an eminent English portrait-painter, born in Oxfordshire in 1753. He became a student at the Royal Academy at the age of 19, and in 1797 was elected R.A. and knighted. Ho

ainted a few historical compositions of some merit. His chief excellence, however, lay in portrait-painting, to which, indeed, he chiefly confined himself, and in which he surpassed most of his contemporary artists. Died, aged 86 years, in 1839.

BEETHOVEN, LUDWIG VON, one of the greatest musical composers, was born at Bonn in 1770. His genius very early showed itself, and his musical education was begun by his father at the age of five, and continued by the court organist, who introduced him to the works of Sebastian Bach and Handel. He soon attempted composition, and showed wonderful facility in improvisation. About 1774 he was sent to Vienna to study under Haydn, but as Haydn left Vienna soon after, he studied under Albrechtsberger. About 1790 he finally quitted his native town and settled at Vienna, where Mozart quickly recognized his marvellous power. When about 40 years of age, he was attacked with deafness, which became total, and lasted through life. He became more and more the victim of morbid irritability, causeless suspicions, and hopeless melancholy, ending in confirmed hypochondria, and at last dropsy and delirium. He continued to compose, however, long after he ceased to hear himself play, and received homage and all kinds of honours from all parts of Europe. His works are very numerous and in every variety of style: orchestral, chamber-music, pianoforte, and vocal music. Among the most celebrated are the opera of "Fidelio," at first named "Leonora," the oratorio of the "Mount of Olives," the cantata "Adelaide," "Sinfonia Heroica," "Sinfonia Pastorale," "Concerto in C Minor," "Sonata Pathétique," and "Sonata with Funeral March." Vast power, intense passion, and infinite tenderness, are manifest in all his compositions, which abound no less in sweetest melodies than in grand and complicated harmonies. Beethoven was never married. He died in March, 1827.

BEGA, CORNELIUS, Dutch painter, chiefly of cattle and landscapes. He was one of the most eminent pupils of Adrian van Ostade. Born, 1620; died, 1664.

BEGEYN, ABRAHAM, Dutch landscape painter; some fine pictures by him are at the Hague. Born, 1650.

BELAIM, or BELHEM, MARTIN, a celebrated geographer, was born at Nürnberg about 1430. He made several trading voyages, studied mathematics and navigation, and in 1480 went to Portugal. He accompanied Diego Can on an expedition of discovery along the coast of Africa, and rendered valuable services. In 1492 he revisited his native city, and there constructed his famous terrestrial globe. He then returned to Portugal, and soon after to the Isle of Fayal, where he died, 1506. Attempts have been made to prove that Behem was the discoverer of America, but without success.

BELIN, APHRA, a miscellaneous writer in the reign of Charles II., whose works were remarkable for their disregard of decency and morals: they consist chiefly of poems, novels, and plays. She was employed by the government in a secret mission to Holland in 1666, and discovered the intention of

the Dutch admirals to burn the shipping in the Thames. Died, 1689.

BEHNES, WILLIAM, a distinguished sculptor, was of German origin, but was born in England about 1790. The bankruptcy of his father and the death of his mother involved him in difficult and trying circumstances, against which he for a time bravely struggled. Working at his father's trade by day, he studied in the evening at the Royal Academy, in 1816 and several subsequent years. He attained great skill as a portrait sculptor, and executed a large number of busts of eminent men, statues of Gresham at the Royal Exchange, Sir William Follett in St Paul's, Dr Babington, &c.; and also several admired ideal statues, "Lady Godiva," "The Startled Nymph," and "Europa." Pecuniary embarrassments, dissipated habits, comparative neglect on the part of the public, and death in the Middlesex Hospital, whither poverty drove him at last,—such are the sad elements of Behnes's story. Died, January, 1864.

BEHRING, VITUS, a captain in the Russian navy, and a celebrated navigator of the northern seas, who, being cast on a desolate island, perished there, in 1741. This is now called Behring's Island, and the straits between Asia and America have also received his name.

BEK, or BECK, ANTHONY DE, bishop of Durham, a bold and spirited prelate, who united the skill and courage of a soldier to the austerity of a divine. He led the van of the English army under Edward I. in an expedition against the Scots in 1296; commanded one division of the cavalry at the battle of Falkirk, two years later; built Barnard Castle and other fortresses, besides the manor-house of Eltham; received from the Pope the title of Patriarch of Jerusalem. Was excommunicated by the Archbishop of York, and died in 1311. Beck was at the time of his death the richest subject in Europe, and he was the first bishop of Durham buried in the cathedral.

BELIDOR, BERNARD FOREST DE, an eminent French engineer and mathematician; author of "Dictionnaire portatif de l'Ingénieur," &c. Born, 1695; died, 1761.

BELISARIUS, the great general of Justinian, was a native of Illyria. He commanded an expedition against the king of Persia about 530; suppressed an insurrection at Constantinople; conquered Gelimer, king of the Vandals, and put an end to their dominion in Africa; was recalled and honoured with a triumph. In 535 he was sent to Italy to carry on war with the Goths, and took Rome in 537. He was there unsuccessfully besieged by Vitiges, whom he soon after besieged and captured at Ravenna. He was recalled through jealousy before he had completed the conquest of Italy. In 541 he commanded in Persia, and returned to Italy with inadequate forces in 544. He recovered Rome from Totilas in 547, and was recalled the next year. He was afterwards sent against the Huns. He was charged in 553 with conspiracy against Justinian, but was acquitted. That he was deprived of sight, and reduced to beggary, appears to be a fable of late invention. Died, 565.

BELL, ANDREW, D.D. and L.L.D., an English divine, the projector and founder of National Schools; author of "An Experiment in Education at the Male Asylum, Madras;" "Instructions for conducting Schools on the Madras System," &c. &c. Dr Bell had acquired considerable property in the East Indies, and had some lucrative preferments in this country; and he bequeathed nearly all that he possessed to institutions for the advancement of education and literature. Part of his bequests was applied to the foundation and endowment of the Madras College at St Andrew's. Born, at St Andrew's, Scotland, 1753; died, 1832.

BELL, Sir CHARLES, an eminent anatomist and professor of surgery in the university of Edinburgh, where he was born in 1774. In 1806 he came to London, and was soon distinguished as a popular lecturer on anatomy and surgery, at the academy founded by the celebrated Hunters in Windmill Street, where, us subsequently, when appointed a professor at the Royal College of Surgeons, the benches were crowded with attentive auditors. He was the author of many professional works of high repute, on anatomy and surgical operations; but he is chiefly esteemed for his discoveries in connection with the nervous system, which have gained for him an European name. On the accession of William IV. he received the honour of knighthood. As in his professional career Sir Charles was respected for his great talents, so in private life was he admired for the simplicity of his manners. He died, 1842.

BELL, HENRY, the first who successfully applied steam to the purposes of navigation in Europe, was born in Linlithgowshire, in 1767. After serving an apprenticeship to his uncle, who was a millwright, he went to London, and was in the employ of Mr Rennie, the celebrated engineer; but it was not till the year 1812 that he produced a vessel calculated to establish the practicability of steam navigation. Mr Fulton, an American engineer, had launched a boat upon the same principle five years before, which had performed long voyages upon the Hudson river, but Bell must be at least allowed the praise of having done, in his own country, what all other men had failed in doing. He died, at Helensburgh, in 1830.

BELL, JAMES, an eminent geographical writer, was born at Jedburgh, in 1769. He was brought up as a weaver, and became a manufacturer of cotton goods at Glasgow; but left that business, and, being an indefatigable student, became a teacher of the classics to young men preparing for the university. He was the author of "A System of Popular and Scientific Geography," in 6 vols.; "A Gazetteer of England and Wales," &c. Died, 1833.

BELL, JOHN, of Antermony, was born in Scotland about 1690. He was a physician, but spent a large part of his life in travelling. In 1714 he went to St Petersburg, accompanied the Russian embassy to Persia, returning in 1718; accompanied an embassy to China in the following year, and arrived again at Moscow in 1722. He next accom-

panied Peter the Great on an expedition to Ibernia, and in 1737 he was sent on an embassy to Constantinople. Ten years later, he returned to his native land, where, after many years of peaceful and prosperous life, he died in 1780. His "Travels in Asia" abounds in interesting and curious information.

BELL, JOHN, an eminent Scotch surgeon, born at Edinburgh in 1763. He established a school there in which he taught surgery and anatomy, and was at one time assisted by his brother Charles (Sir Charles Bell). After an unsuccessful endeavour to introduce some reforms in the College of Surgeons and the Infirmary, he discontinued teaching. His works are a treatise on "Anatomy," "Discourses on the Nature and Cure of Wounds," and "Principles of Surgery." Died at Rome, 1820.

BELLA, STEPHANO BELLA, a Florentine engraver, whose works are highly esteemed. Born, 1610; died, 1661.

BELLAMY, JACOB, a Dutch poet, whose patriotic songs and other lyrics are highly and deservedly esteemed. Born, 1752; died, 1821.

BELLARMIN, ROBERT, Cardinal, a learned Jesuit, born in Tuscaney in 1542. At the age of 18 he entered the order of Jesuits, was ordained priest by Jansenius at Ghent, and held for seven years the chair of Theology at Louvain. In 1576 he returned to Italy and professed theology at Rome; was created cardinal by Clement VIII. in 1599; archbishop of Capua in 1601; and in 1605 librarian of the Vatican. He was an able and upright man, and is especially celebrated for his controversial writings, which form a complete arsenal for Catholic theologians. He maintains the extreme opinions known as Ultramontane. His works fill several folio volumes. Died, 1621.

BELLAY, JOACHIM DU, often called the French Ovid and Catullus; author of Latin and French poems. Born, 1524; died, 1560.

BELLAY, JEAN DU, Cardinal, archbishop of Bordeaux, was born in 1492. By his great abilities he attracted the notice of Francis I., who made him his adviser and employed him on important affairs of state. Du Bellay was twice sent ambassador to Henry VIII., and took part at Rome in the negotiations respecting Henry's divorce. He was appointed bishop of Paris in 1532, and created cardinal in 1535. In the following year he was left at Paris with the title of lieutenant-general during the absence of Francis I., and for the services he rendered was made successively bishop of Limoges, archbishop of Bordeaux, and bishop of Mans. Through the influence of the cardinal of Lorraine, Du Bellay lost his rank after the death of Francis, and spent the rest of his life at Rome. He was a promoter of learning, contributed to the foundation of the College Royal, and left some Latin poems and a defence of Francis I. Died, 1560.

BELLE-ISLE, CHARLES LOUIS AUGUSTE FOUQUET, Count of, marshal of France, was born in 1684. He distinguished himself in the war of the Spanish Succession, became lieutenant-general in 1732, took part in the siege of Philipsburg, procured the cession of

Lorraine to France, and was made governor of Metz. Created marshal of France about 1740, he commanded in Germany against the Imperialists, took Prague, was sent as ambassador extraordinary to the Diet at Frankfurt, and procured the election of Charles VII. Abandoned by the allies, Prussia and Saxony, he was besieged in Prague by the Austrians, but effected a very skilful retreat with his army from Prague to Egra. Soon after he was taken prisoner by the English and brought to England, where he was confined some months. He was afterwards created duke and peer, admitted to the French Academy, and made minister of war in 1757. Died, 1761.

BELLENDEN, WILLIAM, a Scottish writer of the 17th century, distinguished for the purity of his Latin compositions. In 1602 he was a professor at the University of Paris. His work "De Statu" consists of treatises on monarchical government, and on the consulate and senate of Rome; founded on the writings of Cicero.

BELLIARD, AUGUSTIN DANIEL, Count de, a distinguished French general and diplomatist, was born in 1773, in La Vendée. He entered the military service early, and was soon made an officer of Dumourier's staff; he afterwards served with Buonaparte in Italy and Egypt; and, returning from the latter country, he participated in the victories of Ulm and Austerlitz, and fought in all the great battles in the war with Prussia. He next went to Spain; but in 1812 joined the army destined for the invasion of Russia, and particularly distinguished himself in the battle of Moskwa. At Leipsic, a cannon-ball carried away his arm. After Napoleon's abdication, he was made a peer of France, and major-general of the army under the Duke de Herri. When the Emperor returned from Elba, he despatched Belliard to King Joachim at Naples, but the vessel was intercepted by a British ship, and driven back to France. On the return of the Bourbons, he was for a short time imprisoned, but soon taken into favour again. When Louis Philippe ascended the throne, he sent Belliard to Berlin, to treat respecting the acknowledgment of the new dynasty; and during his embassy to Brussels, he contributed more than any other diplomatist to the formation of the new Belgian government. He died in 1832.

BELLIEVRE, POMPONNE DE, French statesman, chancellor to Henry IV. He was employed in various embassies during the reigns of Charles IX., Henry III., and Henry IV., took a leading part at the congress of Vervins, and held the office of chancellor of France from 1599 to 1605. Born, 1529; died, 1607.

BELLINI, JACOPO, an early Italian painter, was a native of Venice, and excelled in portrait-painting. He was the father of Gentile and Giovanni Bellini. Died, 1470.

BELLINI, GENTILE, an Italian painter, son of the preceding, was born at Venice in 1421. He assisted his brother Giovanni in the decoration of the council-chamber of the ducal palace, and was sent to paint the portrait of the Sultan Mahomet II. One of

his finest pictures is the preaching of St Mark at Alexandria. Died, 1508.

BELLINI, GIOVANNI, the greatest Italian painter of his time, brother of the preceding, was born at Venice in 1426. He was employed with Gentile to paint in the council-hall of the palace, but the works executed there have perished. He adopted the method of oil-painting, executed an immense number of works, had Titian and Giorgione for his pupils, and died in 1516. The National Gallery contains three pictures by this master.

BELLINI, LORENZO, an Italian physician; author of several anatomical and medical works in Latin. Born, 1643; died, 1702.

BELLINI, VINCENZO, a celebrated musical composer, was born at Catania in Sicily, in 1666. He was educated at Naples under Zingarelli, and before he had completed his 20th year he had produced "Bianco e Fernando" at the theatre San Carlo. This was succeeded by various other operas, of which "Il Pirati," "La Sonnambula," "Norma," and "I Puritani," are the best, and have gained for him an undying celebrity. His moral character stood high, and his manners and compositions were in harmonious accordance; agreeable, tender, and elegant. Died near Paris, September 23, 1835.

BELLMAN, CHARLES MICHAEL, a Swedish poet, patronized by Gustavus Adolphus; and the most original, while strictly national, poet of Sweden. His principal poem is the "Bachi Tempel." Most of his subjects are taken from scenes of low life. Born, 1741; died, 1795.

BELLOT, JOSEPH RENÉ, a distinguished French naval officer, was born at Paris in 1826. He was trained in the naval school at Brest, took a prominent part in the expedition to Madagascar in 1845, and was made a member of the Legion of Honour. After serving in South America he joined the expedition under Captain Kennedy sent to search after Sir John Franklin; and in 1853 he accompanied that under Captain Inglefield. He was drowned while crossing the ice in August of the same year. His intelligence, accomplishments, and devotion to duty, had won him great esteem and admiration both in France and England. An obelisk was set up to his memory in front of Greenwich Hospital.

BELON, PIERRE, French physician and traveller; author of some able works on natural history, and of a "Description of Palestine, Greece, and Arabia." Assassinated in France, 1564.

BELSHAM, THOMAS, an eminent Unitarian divine, at one time head of the theological academy at Daventry, and for the last 20 years of his life minister of Essex Street Chapel, London. He wrote many polemical treatises and published a new translation of the Epistles of St Paul. His work on Christian Evidences obtained much popularity. Died, in his 80th year, 1829.

BELSHAM, WILLIAM, brother of the preceding, an eminent writer; author of "Essays, Political and Literary," "History of Great Britain, from the Revolution to the Treaty of Amiens," in 12 vols. 8vo, &c. Died, aged 75, in 1827.

HELZONI, GIOVANNI BATTISTA, an enterprising traveller, whose researches in Egypt have been of great service to those engaged in the study of its antiquities, was born at Padua. He came to England in 1803; and becoming involved in pecuniary difficulties while residing in London, he obtained a livelihood by the display of feats of strength and activity at Astley's Amphitheatre; for which his colossal stature and extraordinary muscular powers eminently qualified him. At length he left this country, and entered on his travels through Egypt, in 1815. In 1816 he sent the busts of Jupiter, Memnon, &c., to the British Museum; published a narrative of his operations in 1820; and in the following year exhibited a model of a splendid tomb which he had discovered near Thebes. But, while making preparations for passing from Benin to Houssa and Timbuctoo, he was attacked with dysentery, and died at Gato, in 1823.

HEM, JOSEPH, a Polish general, was born in 1795. His first service was in the French expedition against Russia in 1812. He was afterwards professor in the school of artillery at Warsaw, took part in the insurrection of 1830, and in 1848 joined the Hungarian army. He obtained several successes against the Austrians and Russians in the following year, but after the defeat at Temeswar, retired into Turkey, and was made a pasha. Died, 1850.

BEMBO, PIETRO, a noble Venetian poet, and miscellaneous writer; secretary to Leo X., and promoted to be bishop of Bergamo and cardinal by Paul III.; author of a history of Venice, an important and esteemed work on the Italian language, &c. Born, 1476; died, 1547.

BENBOW, JOHN, a brave English admiral, born at Shrewsbury, in 1650. His skill and valour in an action with a Barbary pirate of superior force, gained him the confidence of the nation, and he was soon entrusted with a fleet. In 1702, during an engagement with the French admiral, Du Casse, in the West Indies, he had his leg carried away by a chain shot; and at this critical instant several of his captains having signed a paper declaring that "nothing was to be done," the enemy effected his escape. Benbow brought the delinquents to a court-martial, and two were shot; but the effects of his wound, and the vexation he suffered, caused his death.

BENEDICT, ST, the founder of the first religious order in the West, was born in Spoleto, in 480; and, retiring to a cavern when only 14 years of age, his fame for pious austerities brought him numerous followers: the monastery of Monte Cassino, near Naples, was founded by him; and the order of St. Benedict thenceforward established. Died, about 543 or 547.

BENEDICT XIII., Pope (PIETRO FRANCESCO ORSINI), was born in 1649. He entered the Dominican order, was created cardinal in 1671, and archbishop of Benevento in 1685. He succeeded Innocent XIII. in 1724, and displayed throughout his pontificate the same excellencies of character, simplicity, modesty, benevolence, which

had distinguished him in a private station. He had for his chief minister Cardinal Coscia, a selfish and unworthy man, who was ultimately imprisoned. Benedict endeavoured, by the aid of his friend Cardinal de Noailles, to quiet the agitation in France respecting the bull *Unigenitus*. He held a council on discipline at Rome in 1725. Died, 1730.

BENEDICT XIV., Pope (PROSPERO LAMBERTINI), the successor of Pope Clement XII., 1740, was a great patron of the arts and sciences, an enactor of good laws, and one who strove to maintain purity of doctrine and of manners by setting a worthy example in his own person. Born, at Bologna, in 1675; died, 1758.

BENEDICT RISCOP, abbot of Wearmouth, who flourished in the 7th century, was born of a noble family of Northumbria. He was the founder of the monasteries of Wearmouth and Jarrow, for the building of which he procured foreign workmen. He long presided over these houses, and introduced in them the Roman method of chanting. Bede was educated at Wearmouth during the abbacy of Benedict Biscop. Died, 699.

BENDEL, JOHANN ALBRECHT, a German theologian and philologist, was born in 1687. He studied at Stuttgart and Tübingen, and became pastor and head of a school at Denksdorf. He especially applied himself to the critical study of the Greek Testament, of which he published an edition in 1723. Among his other works are, "Apparatus Criticus Novi Testamenti," "Gnomon Novi Testamenti," which has been several times reprinted, &c. Died, 1752.

BENGER, ELIZABETH OGILVY, miscellaneous writer, born at Wells, 1778. She wrote memoirs of Anne Boleyn, Mary, Queen of Scots, and Elizabeth, Queen of Bohemia. Died, 1827.

BENJAMIN OF TUDELA, one of the earliest travellers of the middle ages who visited the central regions of Asia; author of a Hebrew work of travels, which, though interesting and romantic, is remarkable chiefly for its misrepresentations. Died, 1173.

BENNINGSEN, LEVIN AUGUSTUS, Baron, an eminent Russian general, was born in Hanover, in 1745; entered the service of Catherine II., and distinguished himself by great gallantry in the war against Poland. He was commander-in-chief at the murderous battle of Eylau. In 1813, he led a Russian army into Saxony, took part in the battle of Leipzig, and blockaded Hamburg. Died in 1826.

BENSERADE, ISAAC DE, an ingenious French versifier, born in 1612, and patronized by Richelieu, Mazarin, and the king, Louis XIV. His madrigals, sonnets, and songs, as well as his wit and general conversational powers, rendered him a great favourite; and he was called, by way of eminence, "le poëte de la cour." Died, 1691.

BENTHAM, JAMES, an English divine and antiquary, author of the "History and Antiquities of the Church of Ely." Died, 1794.

BENTHAM, JEREMY, an eminent jurist

and political philosopher, was born at London in 1748. He was educated at Westminster School and Oxford University, where he graduated M.A. at the age of 20, and was called to the bar. He visited France several times, and between 1784—1788 travelled to Constantinople, and over great part of Europe. Visiting Paris in 1802 he was received at the Institute, and remarkable honour was shown him there on occasion of his visit in 1825. Bentham lived very much in retirement, and the events of his studious life are his numerous works. In philosophy he is the great teacher of "Utilitarianism;" as a jurist he set himself in earnest to discover and disclose the defects and faults of the then existing system and language of jurisprudence; and to establish something truer and better in their place. Some of his writings were first published in French, under the care of his friend Dumont, then librarian to the marquis of Lansdowne. Some of the most important are the "Fragment on Government," his first work; "Introduction to the Principles of Morals and Legislation," "Treatise on Civil and Penal Legislation," "Theory of Rewards and Punishments," "Panopticon," which treats of prison discipline, "Rationale of Judicial Evidence," and "Plan of a Judicial Establishment." Died at London, 1832.

BENTINCK, WILLIAM, first earl of Portland, a distinguished statesman, and the favourite of William III., was born in Holland, 1648. At an early age he became page to the prince of Orange, served him with the utmost devotion throughout his life, and attended him affectionately on his death-bed. He negotiated with Charles II. the marriage of the Princess Mary to the prince of Orange; was twice sent with offers of aid to the duke of Monmouth; took the leading part in the preparations for the descent of his master on England in 1688, and accompanied him thither; and was made privy-councillor and member of the house of peers as earl of Portland. Bentinck was soldier as well as statesman, and contributed by his good generalship to the victory of the Boyne. He also served in the wars preceding the peace of Ryswick, and negotiated that peace. Much popular ill-will was excited against him by the king's grant to him of large part of a Welsh county, and the grant had to be revoked. He was made K.G., and sent at the beginning of 1698 ambassador to France. He then took a prominent part in the secret treaties for the partition of the Spanish monarchy, and was in consequence impeached of high treason by the House of Commons, but was acquitted. William III. died in the arms of his faithful minister, who then retired to his native country. He returned to England, however, and died there in 1709.

BENTINCK, WILLIAM HENRY CAVENDISH, third duke of Portland, was born in 1738. During the American war he acted with the Opposition, and was appointed lord-lieutenant of Ireland in 1782, but continued in that office only three months, owing to the breaking up of the administra-

tion by the death of the marquis of Rockingham. In 1792 he was appointed chancellor of the university of Oxford, and soon after joined Mr Pitt's party. He held the office of home secretary from 1794 to 1801, and succeeded Lord Grenville as first lord of the Treasury in 1807, but shortly after resigned office, and died in 1808.

BENTINCK, Lord GEORGE, a statesman of great ability and still greater promise, was the second son of the fourth duke of Portland, and was born on the 27th of Feb., 1802. He was for some time at Eton, and completed his education at Christchurch, Oxford. After leaving the University, he obtained a commission in the Guards, and in this corps he rose to the rank of captain, retiring from the army with the rank of major. In 1828 he was elected for King's Lynn; and continued to represent that constituency for 20 years. He had previously acted as private secretary to his uncle by marriage, George Canning, when prime minister. Lord George took great interest in field sports, and for a long time was one of the principal patrons of the turf in the kingdom. On first entering parliament he was one of the moderate Whig school; but after the passing of the Reform Bill, he joined the Conservative party, voting with them on important questions, but seldom addressing the House. In 1846, when Sir Robert Peel gave in his adhesion to free trade, and the Protectionist party was deprived of its head, the earnestness, perseverance, and unflinching courage, which Lord George suddenly displayed, obtained for him the leadership of his party, which under his guidance once more started into life. From that period he abandoned his sporting pursuits, and sold off his stud, devoting himself entirely to politics. His dislike of Sir Robert Peel was decided and undisguised; but his hostility was principally shown in his opposition to the free-trade policy. On other questions Lord George pursued an independent course. He supported the Jewish Relief Bill, his vote on which was followed by his withdrawal from the nominal leadership of the Protectionist party; and he was favourable to the payment of the Roman Catholic clergy by the landowners in Ireland. Few public events occasioned more general surprise than the short period of time in which Lord George Bentinck built up his parliamentary character. The industry, straight-forwardness, and intelligence which he displayed during the brief period of his leadership, warrant the belief that, had his life been spared, he would have gained a distinguished place among the highest of England's statesmen. Died suddenly of disease of the heart, Sept. 21, 1848.

BENTIVOGLIO, GUIDO, a celebrated cardinal, and legate at the court of France. He was an able politician and historian. Among other works he wrote "A History of the Civil Wars of Flanders," "Memoirs," &c. Guido Bentivoglio was one of the seven cardinals who, as Inquisitors-General, signed the condemnation of Galileo. He had been a disciple of the great philosopher. Born, 1375; died, 1641.

matist, was born at Bologna, in 1506, and died in 1573. He was patronized by the princes of Este, who intrusted him with various embassies.

BENTLEY, RICHARD, an eminent philologist, was born in Yorkshire in 1662. He studied at Cambridge, entered the church, and was appointed first Hoyle lecturer. He early distinguished himself by his classical learning, and in 1693 was named librarian to the king. Soon after broke out his quarrel with Hoyle, the main result of which was Bentley's famous "Dissertations on the Epistles of Phalaris." In 1700 he was named Master of Trinity College, Cambridge, and soon after archdeacon of Ely. Working hard as a scholar, and effecting improvements in his college, he nevertheless, by his arrogance, selfishness and offensive measures, involved himself in miserable quarrels and litigation with the college seniors; and after obtaining the Regius Professorship of Divinity, he was degraded and deprived by the senate. This sentence, after years of litigation, was annulled. His writings are very numerous, but we can only name his editions of Horace, Homer, and Terence, his "Remarks on the Discourse of Freethinking," and his extraordinary edition of "Paradise Lost." Died, 1732.

BENYOWSKY, MAURICE AUGUSTUS, Count, a native of Hungary, who, after serving in the imperial armies, joined the Polish nobility, and fought against Russia for the independence of Poland, but was taken prisoner and exiled to Kamtschatka. From that remote region, however, he escaped; and after various fortunes, he was sent out by the French to Madagascar, the sovereignty of which island he afterwards attempted to assume. He was slain in an action with the French, 1786.

BERANGER, JEAN PIERRE DE, the greatest lyric poet that France has produced, was born at Paris in 1780. To his grandfather, who was a tailor living in the Rue Montorgueil, and an aunt by the father's side, he was indebted for his early nurture and education. When he was ten years of age he went to reside at Peronne in Picardy with his aunt, and here he led for some time an indolent and unsettled life, trying several occupations, including that of a pot-boy, and settling in none, till he was at last apprenticed to a printer in the town, and from this period gave himself up to literary pursuits. In 1795 his father took him to Paris, where he wanted his assistance in certain banking operations in which he was engaged; but in 1798 the bank failed, and Beranger bade adieu to financial operations for ever. During the period that followed he produced his best songs, but embittered by disappointment and hopeless of success, he collected all the poems he had written and sent them to Lucien Bonaparte, the brother of the First Consul, who was known to be a liberal patron of literature, and in this instance did not belie his reputation. With the assistance thus rendered Beranger soon found employment for his pen. In 1805-6 he assisted in editing Landon's "Annales de Musée," and in 1809 he was attached to the University with a small salary

of 1200 francs, which, however, sufficed for all his wants. Meanwhile he went on cultivating the Muses, and delighting all who knew him with the songs, chiefly amatory, which he then composed. In 1815 he first came before the world as an author, though many of the poems then printed had been circulated in manuscript, and the sensation produced by this first publication was immense. France hailed in Beranger a poet who was not only able to sing of love and wine, but who gave the noblest and most heart-stirring expression to that sense of blighted glory and humbled pride which then smouldered in the breast of the whole people. His second series of songs, published in 1821, cost him his place and three months' imprisonment in St Pelagie; and for his third series, published in 1828, he was condemned to nine months' imprisonment in La Force, and a fine of 10,000 francs. But the fine was paid by the poet's admirers; while from behind his prison-bars Beranger kept up so deadly a fire on the government that he contributed more effectually to destroy it than all the blows of the heroes of the "Three Glorious Days." After the election of Louis Philippe to the throne, he declined to accept of any reward for his services, and retired first to Passy, next to Fontainebleau, and finally to Tours, where he completed what he called his "Mémoires Chantants," by the publication of his fourth series of songs. Speaking of these masterpieces of poetic skill, Goethe says, "Beranger was never at school, and never studied at a University. But his songs are, nevertheless, so full of mature cultivation, of grace, wit, and subtlest irony, they are so artistically finished, and their language is so masterly, that he is admired not only by France but by the whole of civilized Europe. His songs have shed joy into millions of hearts;—they are familiar even to the working classes, and at the same time they are so high above the level of common-place, that the intercourse with these graceful spirits accustoms and compels the people to have better and more generous thoughts." At the revolution of February, 1848, Beranger was elected to the Constituent Assembly; but after one or two sittings, he sent in his resignation, and finally retired from the storm and turbulence of political life. His last years were solaced by the kindness of numerous friends who admired in him the straightforward honourable man as well as the national poet. Though a republican at heart, Beranger looked upon Napoleon, in his rise from a simple artillery officer to be the Emperor of the French, as an incarnation of the national spirit; and he did so much to perpetuate the superstitious reverence of the people for his name as to pave the way for the advent of his nephew and successor to the imperial throne. Died, 1857. In his "Autobiography,"—a posthumous publication,—Beranger has given a most interesting account of his struggles with fortune, his private adventures, the development of his mind, the origin of his works, the manner of their success, the friendships and the persecutions they brought him, and the reasons of his retirement from public life.

BERCHEM. [BERGHEM.]

BERCHTOLD, LEOPOLD, Count, a distinguished philanthropist, was born in 1758. He spent 13 years of his life in travelling through Europe, and four in travelling through Asia and Africa, for the express purpose of assuaging human misery in its direst forms, and leaving no method unattempted that humanity or patriotism could suggest. He at length fell a victim to a contagious fever, at his palace of Buchlowitz, in Moravia, which he had fitted up as a hospital for the reception of the sick and wounded Austrian soldiers. Died, 1809.

BERENGER, or BERENGARIUS, of Tours, a distinguished theologian of the 11th century. He was born at Tours, long held an ecclesiastical office there, and was afterwards archdeacon of Angers. He was thoroughly versed in the philosophy of the age, and did not hesitate to apply reason to the interpretation of the Bible. He denied the dogma of transubstantiation, and no less than seven councils were held respecting him, at three of which he was condemned, and at four he was prevailed on to make retraction more or less fully. Though failing thus in courage in the presence of his persecutors, he continued to teach what he believed. Died near Tours, 1083.

BERENGER, JACOPO, a celebrated anatomist and physician of the 16th century, born at Carpi, in Italy, and died at Ferrara, 1550. He made several important anatomical discoveries, and is said to be the first who used mercury in syphilitic diseases.

BERENICE, daughter of Herod Agrippa, king of Judea, and wife of her father's brother, Herod, who was made king of Chalcis by the Emperor Claudius. Becoming a widow, A. D. 49, she gave her hand to Ptolemon, king of Cilicia, but she soon deserted him, and became the mistress of Titus, afterwards Roman emperor, who would probably have made her his wife but for the murmurs of his subjects.

HERESFORD, General Viscount, G. C. B., &c., a distinguished British officer, was the eldest of two natural sons of the first marquis of Waterford, and was born in 1770. After receiving the rudiments of his military education at Strasburg, he was appointed an ensign in the 6th Foot in 1785. His first services gave early promise of his future fame. From the time when, as captain of the 69th, he took possession of Toulon, in 1793, to the battle of Toulouse, in 1814, in which he added fresh laurels to his wreath, his military life was an almost unbroken series of successes. In 1789, when lieutenant-colonel of the 58th, he sailed for the East Indies, and from thence by the Red Sea to Egypt, across the desert, in command of a brigade of Sir David Baird's army. He remained in Egypt till its evacuation, as commandant of Alexandria. After some energetic services against the Irish rebels, Colonel Heresford, in 1805, proceeded to the Cape, and shared in the conquest of that colony. From thence he was sent in command of a small force, to seize Buenos Ayres. In 1807, as brigadier-general, he, in conjunction with Admiral Hood, seized upon Madeira, which was thenceforward held by the British in trust for the royal house of

Braganza. In 1808 he joined the British army in Portugal with the rank of major-general. He fought at Corunna, and was most active and efficient in assisting the embarkation of our troops. In 1809 he again proceeded to Portugal, to take the chief command of the Portuguese troops with the rank of marshal. From that time Marshal Beresford's achievements are part of the history of the period, the greatest of them being his victory over Soult at Albuera, one of the most bloody and most glorious of the names inscribed on the list of Peninsular successes. The thanks of Parliament were voted on the 7th of June to "Sir William Beresford and to the army under his command, who fought at Albuera on the 16th of May, 1811;" and in 1814 he was raised to the peerage, with a grant of £2000 per annum to himself and the two next inheritors of his title. In Spain he became duke of Elvas and marquis of Campo-Major, and in Portugal Conde di Francesco. At home the prince regent conferred upon him a cross with seven clasps, and intrusted him with the governorship of Jersey. He sat for the county of Waterford in 1811, and for the borough in 1812, but as he was absent with our armies in the Peninsula, he never either spoke or voted in the House. In 1822 he was raised to the rank of viscount, and received the appointment of lieutenant-general of the Ordnance, and in 1828 became master-general of the Ordnance under the duke of Wellington as premier. Died, 1854.

BERESFORD, LORD JOHN GEORGE, archbishop of Armagh, primate of all Ireland, was born in 1773. He was educated at Eton and Oxford, became bishop of Cork in 1805, archbishop of Dublin in 1820, and archbishop of Armagh in 1822. In 1851, he was chosen chancellor of the university of Dublin, of which he had been vice-chancellor 22 years. He did not distinguish himself in literature or science, but in munificence he had few equals. The chief monument of his liberality is the cathedral of Armagh, which he restored at the cost of nearly thirty thousand pounds. He did much also for the Observatory, the Public Library, and the Royal School. Died at Auburn, Down, in 1862.

BERGHEM, NICHOLAS, an excellent and indefatigable Dutch landscape painter. Born, 1624; died, 1683.

BERGMAN, TORBERN OLOF, an eminent Swedish chemist, was born in 1735. He studied at Upsal University, applied himself to the study of various branches of physical science, became assistant professor of mathematics and physics, and in 1767 professor of chemistry. His discoveries and services to science were very numerous. He proved the acid properties of carbonic acid, discovered oxalic acid, and was one of the first to make chemical analysis of mineral bodies. He made experiments in electricity, and published an "Essay on Elective Attractions." It was Bergman who recognized first the talent of Scheele, then a boy, and did much to forward him. His works form six vols. 8vo. Died, 1784.

historian, was a
educated at the

college of St Omer, in France, and after discharging the duties of a Romish priest in that country for 20 years, returned to England, where he died in 1827. He made himself known by his "Literary History of the Middle Ages," a useful work, but superseded by Hallam's on the same subject. Herington was also author of the "Lives of Abelard and Heloise," and a "History of the Reign of Henry II."

BERKELEY, GEORGE, bishop of Cloyne, an illustrious philosopher, was born in Ireland in 1684. He was educated at Trinity College, Dublin; visited London in 1713, and spent several years in travelling on the continent. He became chaplain to the duke of Grafton, and soon after dean of Derry. In 1728 he went, accompanied by two or three friends, to Rhode Island, in the hope of founding there a missionary institution for the benefit of the Red Indians. His scheme failing, he returned, and in 1734 was made bishop of Cloyne. In philosophy Berkeley is an Idealist, and his doctrines are the natural reaction against the prevailing materialism of his age. His most important works are the "Principles of Human Knowledge," the "Dialogues of Hylas and Philonous," "Minute Philosopher," "Analyst," and "Theory of Vision." His two works on the properties of Tar-water, "Siris" and "Further Thoughts," attracted much attention. Died at Oxford, 1753.

BERKENHOUT, JOHN, an English physician and miscellaneous writer; author of "Biographia Literaria." "Outlines of the Natural History of Great Britain and Ireland," &c. Born, 1731; died, 1791.

BERKHEY, JOHN LE FRANCOY VAN, Dutch physician, naturalist, and poet; named professor at the university of Leyden, in 1773; author of the "Natural History of Holland," "Poems," &c. Born, 1729; died, 1812.

BERKLEY, Sir WILLIAM, governor of Virginia; author of "The Description and Laws of Virginia," &c. Died, 1677.

BERLICHINGEN, GOETZ VON, surnamed "Iron-Hand," a brave and turbulent German noble, lived in the 15th and 16th centuries. He was almost constantly at war, was put under the ban of the empire by Maximilian, and was killed during the siege of a fortress in which he had taken refuge. His story was dramatized by Goethe.

BERNADOTTE—CHARLES JOHN XIV., king of Sweden and Norway, whose original name was JEAN BAPTISTE JULE BERNADOTTE, was the son of a lawyer at Pau in Bearn, and was born in 1764. He received a good education, and was designed for the bar; but he suddenly abandoned his studies, and enlisted as a private in the marines. For nine years from his enlistment, that is, up to the year 1789, the utmost rank that Bernadotte had attained was that of sergeant; but the French revolution, by sweeping away the arbitrary barrier which till then had rendered plebeian merit of little avail in the French service, gave Bernadotte an advantage which he improved so well, that in 1792 he was a colonel in the army of Custine. In 1793 he so distinguished himself under the command of Kleber, as to be

raised to the rank of general of brigade, and, shortly afterwards, of division. On the Rhine and in Italy he more and more distinguished himself; and he showed that his talents were not those of a mere soldier, by his conduct in a somewhat difficult embassy to Austria. Between him and Napoleon there seems to have been a constant distrust, if not actual hatred; nevertheless, Bernadotte had a marshal's staff on the establishment of the consulate, and was created prince of Ponte Corvo in 1806. In all his campaigns Bernadotte was distinguished from the great majority of the French commanders, by the clemency and generosity of his conduct from the moment that the battle was at an end; and it was this conduct, even more than his brilliant reputation as a soldier, that caused him to be put in nomination as a successor of Charles XIII. of Sweden. Napoleon, then emperor, could but with difficulty be induced to consent to Bernadotte becoming crown-prince and heir to the throne. "What!" said Bernadotte, "will you make me greater than myself by making me refuse a crown?" The sarcasm told, and Napoleon merely replied, "Go! our fates must be accomplished!" From the instant that he became crown-prince of Sweden, the fortunate soldier showed a determination to give all his energies to his adopted country; he formed a secret alliance with Russia in 1812, and in 1813 he took command of the combined armies of Northern Germany against France. Never during half a century before his accession had Sweden known the peace or the prosperity in which he left her in the hands of his son Oscar. Died, 1844, aged 79.

BERNARD, ST, abbot of Clairvaux, was born of a noble family in Burgundy in 1091. He was carefully trained by pious parents, and sent to study at the university of Paris. At the age of 23 he entered the then recently founded monastery of Citeaux, accompanied by his brothers and above twenty of his companions. He observed the strictest rules of the order, and so distinguished himself by his ability and acquisitions that he was chosen to lead the colony to Clairvaux, and was made abbot of the new house; an office which he filled till his death. His fame attracted a great number of novices, many of whom became eminent men. Among them were Pope Eugenius III., six cardinals, and many bishops. In 1128 he prepared the statutes for the order of Knights Templars. Popes and princes desired his support, and submitted their differences to his arbitration. By his influence Innocent II. was recognized as lawful pope: he had a public debate with Abelard on some doctrines of his philosophy, and procured his condemnation: courageously opposed the doctrine of the Immaculate Conception of the Virgin and the festival instituted in its honour: was founder of 160 monasteries; and was the chief promoter of the second crusade. At the council of Vezelai, in 1146, he spoke as if inspired before the king and the nobles of France, and with his own hand gave them their crosses. He then preached the crusade in Germany, persuaded the Emperor Conrad to join it, and refused the command which was offered

him. His prediction of success was falsified. St Bernard was the vehement adversary of Arnold of Brescia, and procured his banishment from Rome, and from Zürich. He successfully attacked the doctrines of several so-called heretics. He steadily refused the offers of several archbishoprics and other dignities, preferring to remain abbot only. His character and his writings have earned him the title of Last of the Fathers. The power and tenderness and simplicity that characterize his sermons and other works have secured the admiration of Protestants and Catholics alike. Dante introduces him in the last cantos of the "Paradise" with profound reverence and admiring love; and Luther studied his writings with the same feelings. St Bernard died at Clairvaux in 1153, and was canonized in 1174.

BERNARD, EDWARD, an English philologist and critic; educated at Oxford, where he became Savilian professor of astronomy, and assisted in the republication of the works of the ancient mathematicians. He was author of a learned and valuable "Treatise on Ancient Weights and Measures," &c. Born, 1638; died, 1697.

BERNARD, of MENTION, an ecclesiastic of the 10th century; founder of the well-known monasteries of the Great and Little St Bernard, in the passage of the Alps. Died, 1008.

BERNARD, PIERRE JOSEPH, a French amatory poet, styled by Voltaire, *le gentil Bernard*, an epithet by which he is still distinguished. Born at Grenoble, 1710; died, 1775.

BERNARD, of THURINGIA, an enthusiast of the 10th century, who predicted that the end of the world was at hand, and caused much terror to his ignorant and superstitious believers.

BERNHARD, duke of Saxe-Weimar, one of the greatest generals of his age, was born in 1600. He entered the army, and early distinguished himself. After being engaged in several affairs of minor importance, he joined the army of Gustavus Adolphus in 1631, in the war against the house of Austria. He took part in the siege of Wurzburg, assisted at the passage of Oppenheim, took Mannheim, and drove the enemy from the Palatinate. He commenced the conquest of Bavaria, completed the victory of Lützen after the fall of Gustavus, and drove the Austrians from Saxony. He afterwards had a command subordinate to Marshal Horn, and was harassed by intrigues. He took Ratisbon, which was soon lost, and with Horn was defeated at Nordlingen, in September, 1634. Soon after he accepted a subsidy from the king of France and concerted operations with Richelieu. In 1638, he won the battle of Itzenfeld and took Alt Breisach. Died, 1639.

BERNHARD, SIMON, general of engineers of France, was born at Dôle in 1779. The kindness of the parish priest supplied him with sufficient learning to allow his entering the Polytechnic School at fifteen years of age. La Place, Haüy, and other great men were then at the head of the Polytechnic School, and so well did Bernard avail himself of their lessons, that he not only

became one of the most distinguished engineer officers and aides-de-camp of Napoleon, but, subsequently to the emperor's fall, executed works in the United States, which are undoubtedly unequalled elsewhere; the most distant places being united by canals, actual navigable rivers, and upwards of four thousand five hundred miles of frontier rendered secure against invasion by forts and works. After July, 1830, he returned to France, and was for some time minister of war. Died, 1839.

BERNARDEZ, DIEGO, called by his countrymen the Portuguese Theocritus, was not more eminent as a pastoral poet than as a brave warrior. After numerous deeds of heroism, he was taken prisoner by the Moors at the battle of Alcazarquivir. Died, 1596.

BERNARDIN DE ST PIERRE. [ST PIERRE.]

BERNARDINE, ST, of Siena; born at Massa-Carrara, in Italy, 1380. He retired in 1404, joined the order of Observantines, of which he became vicar-general, refused offers of several bishoprics, and established above 300 monasteries. Died, 1444; and was canonized six years after his death by Nicholas V. The works of St Bernardine fill five folio volumes.

BERNERS, Lord. [BOURCHIER.]

BERNI, FRANCESCO, an eminent Italian poet of the 16th century. He remodelled Bojardo's Orlando Innamorato, and was the author of "Rime Burlesche," and various Latin poems. The gracefulness and purity of his diction have been seldom equalled; his humour, though broad, is not low; and though his themes or allusions are often licentious, his works display many traits of moral feeling, which would do no discredit to a better age. Died, 1536.

BERNIER, FRANÇOIS, a celebrated French traveller, who, after taking his degree as doctor of medicine at the university of Montpellier, went to Palestine and Egypt, thence to India, and resided at the court of Aurungzebe for twelve years as his physician. He accompanied the great Mogul emperor on his expedition to Cashmere, and afterwards returned to his own country. In 1685, Bernier visited England. His "Travels," which first appeared in 1670, became immediately popular, and have been frequently republished and translated into various languages. Died, 1688.

BERNINI, GIOVANNI LORENZO, called *Il cavaliere Bernini*, was born in Naples, 1598, and obtained among his contemporaries the reputation of being the modern Michael Angelo, on account of his success as painter, statuary, and architect. At the age of 18 he produced the Apollo and Daphne, in marble, a masterpiece of grace and execution. He was a protégé of Cardinal Maffeo Barberini, who, as soon as he became pope (Urban VIII.), appointed him his architect. Bernini executed many works in St Peter's, built the Palace Barberini, and the Campanile of St Peter's, executed a statue of Charles I. of England from portraits painted by Vandyck, visited Paris in 1665, his journey being a triumphal procession, at which he erected the monument to Alexander VII., and ten years later sculptured the figure of

BERNIS, FRANÇOIS JOACHIM DE PIERRES, Cardinal, DE, a French poet, patronized by Madame de Pompadour, who obtained for him a pension; he subsequently filled important offices in the state, was sent as ambassador to Rome, and at length arrived at the dignity of cardinal. The French revolution deprived him of his fortune, and reduced him to poverty in his old age, from which he was relieved by a pension from the Spanish court. Born, 1715; died, 1794.

BERNOULLI, JAMES, a distinguished mathematician, one of a family of great mathematicians, was born at Basel in 1654. He indulged his passion for geometry against the will of his father, who wished him to enter the church. He seized quickly on the first suggestions of Leibnitz respecting the Differential Calculus, and zealously pursued the study of it. In 1687 he was chosen professor of mathematics at Basel, and was one of the first foreign associates of the French Academy of Sciences. A painful altercation was carried on between him and his brother John respecting some scientific problems: John displaying much ill-temper, unfairness, and jealousy of his brother's evident superiority. Died, 1705.

BERNOULLI, JOHN, brother of the above, and like him an eminent mathematician. He succeeded his brother as professor of mathematics at Basel in 1705, having previously held the same office at Groningen for ten years. He was fellow of the Royal Society of London, member of the Academies of Paris and Berlin, and was in science the worthy rival of Newton and Leibnitz. Born, 1667; died, 1748.

BERNOULLI, DANIEL, son of the last named; professor of natural philosophy at Basel; and, like his father and uncle, highly skilled in the mathematics. He published several mathematical works, among which is to be noted the "Traité de Hydrodynamique," the first treatise on that subject. He was member of the Academies of Paris, Berlin, and St Petersburg, and F.R.S., London. Born, 1700; died, 1782. [Several other members of this family were also distinguished for their mathematical attainments, and it is stated that the list of foreign associates of the French Academy of Sciences constantly included the name of Bernouilli from 1699 to 1790.]

BERNSTORFF, JOHANN HARTWIG ERNST, Count, a celebrated statesman in the service of the king of Denmark. He was employed on various embassies, and afterwards held the office of foreign minister to Frederick V. for about 20 years, resigning in 1770. He negotiated the treaty with Russia respecting Holstein. Count Bernstorff was the founder of the Danish Society of Language and the Fine Arts, and the Economical and Agricultural Society. Born at Hanover, 1712; died, 1772.

BERNSTORFF, ANDREAS PETER, Count, nephew of the above, and also Danish minister of state. During the American war he effected the armed neutrality of Russia,

Prussia, Denmark, and Sweden, for the protection of the trade of those powers against the belligerents; and it was chiefly owing to his skillful policy that Denmark was prevented from being drawn into collision with either Sweden or Russia, when the war broke out between those powers in 1788. Born, 1735; died, 1797.

BERGALDO, FILIPPO, an Italian litterateur, who long held the chair of Belles Lettres at the University of Bologna, and was for some years secretary of the republic. He published editions of Pliny the younger and other classical authors. Born, 1453; died, 1505.

BERGALDO, FILIPPO, nephew of the above, Italian poet; librarian of the Vatican under Pope Leo X. He published a valuable edition of Tacitus. Died, 1518.

BEROSUS, priest of the temple of Belus, at Babylon, about B.C. 260. He wrote a history of Chaldea, some fragments of which are preserved by Josephus and Eusebius.

BERQUIN, ARNAULD, an elegant French writer; chiefly known as the author of "L'Ami des Enfants," and other interesting works for children. He imitated the works of the German Christian Felix Weisse, giving them however fresh attractions by the charm of his style, and the sincerity of his love for children. Born, 1745; died, 1791.

BERRETTINI, PIETRO. [CORTONA.]

HERRI, CHARLES FERDINAND DE BOURBON, Duke de, second son of the Count d'Artois, afterwards Charles X. of France; assassinated by one Louvel, who attacked him just as he had left the opera-house, and was on the point of stepping into his carriage, Feb. 13, 1820. He shared in common with the Bourbons all the reverses they were doomed to suffer; but he deserved a better fate, if it were only for the benevolence of his character. His son Henri, born posthumously, commonly called the Duc de Bordeaux, or the Comte de Chambord, is the legitimate heir to the throne of France.

BERTHELIER, PHILIBERT, statesman, born at Geneva, about 1470. He distinguished himself by his bold opposition to the ambitious attempts of the duke of Savoy to make himself master of the republic, and to the cruel tyranny of the bastard of Savoy, whom the pope had made prince-bishop of Geneva. Berthelier was at the time member of the Supreme Council. Compelled to fly to Friburg, he negotiated an alliance by which the Genevese and Friburgers became fellow-citizens. The duke in vain attempted to corrupt this noble patriot. When the prince-bishop returned with an army to Geneva, Berthelier refused to fly, and he was arrested, imprisoned, and beheaded, in the autumn of 1519.

BERTHIER, ALEXANDER, prince of Neufchatel and Wagram, marshal and vice-constable of France, was born at Versailles, in 1753, and served with Lafayette in the American war of independence. At the commencement of the French revolution he was made a general officer, fought gallantly in La Vendée, and was at the head of Buonaparte's staff in Italy, Egypt, and Germany. He was, in fact, the companion of Napoleon

in all his expeditions, dining with him and travelling in the same carriage; and his skill in drawing up despatches, joined to his unwearied application and methodical habits, proved of incalculable value to the emperor in the vast pressure of his affairs. On the restoration of Louis XVIII., however, in 1814, he recognized his authority, and was created a peer; but when his former master returned from Elba, he retired to his family at Hamberg, where, as soon as the music of the Russian troops, on their march to the French borders, was heard at the gates of the city, he put an end to his life in a fit of frenzy or remorse, by throwing himself from a window of his palace, June 1, 1815.

BERTHOLLET, CLAUDE LOUIS, Count, one of the most eminent chemists of his age, was born at Talloire, Savoy, in 1748, and studied medicine at Turin. He afterwards settled in Paris, where he became intimate with Lavoisier, was admitted a member of the Academy of Sciences, and made professor of the normal school. He accompanied Buonaparte to Egypt; and, during the emperor's reign, was made a senator and an officer of the Legion of Honour; but he was one of the first to desert his patron when his fortunes were on the decline; for which he received the title of count from Louis XVIII. His principal work is "Essai de Statique Chimique;" but he wrote many other valuable essays, and had also a large share in the reformation of chemical nomenclature. Died, 1822.

BERTHOUD, FERDINAND, a skilful Swiss clock and chronometer maker; author of "Traité des Horloges Marines," &c. Born at Neuchâtel, 1727; died, 1807. His nephew, **LOUIS**, inherited his talents, and was not less celebrated than his uncle. The accuracy of their chronometers is proverbial.

BERTIN, ANTOINE, a French military officer and an elegant poet; author of "Elegies" and other poems, which were greatly esteemed. Born in the Isle of Bourbon, 1752; died at St Domingo, 1790.

BERTRAND DU GUESCLIN, [DUGUESCLIN.]

BERTRAND, HENRI, Count, a distinguished French general, and the companion in exile of Napoleon Buonaparte, would have earned a bright name on the page of history merely by his military achievements during the wars of the empire, were not those achievements cast, comparatively, into the shade by the steadfast fidelity with which he clung to Napoleon. Aiding that great soldier to gain some of his most splendid victories; covering him when in retreat and peril, as after the murderous affair of Hanau; following him to his free exile to Elba; returning with him to share all the perils of "blood-stained Waterloo;" he, the brave and steadfast Bertrand, feared not the imprisonment of St Helena, but voluntarily abode there until he had seen the first obsequies of his sincerely worshipped human idol. Honour to fidelity! Born, 1770; died, 1844.

BERTRANDI, GIOVANNI AMBROGIO MARIA, an eminent surgeon and anatomist of Turin; author of a treatise on surgical operations, and other professional works. Born, 1723; died, 1765.

BERULLE, PIERRE DE, Cardinal, founder of the French congregation of the Oratory. He was employed in many affairs of state in France; and accompanied Henrietta Maria, wife of Charles I., to England as her confessor. Died, 1629.

BERVIC, JEAN GUILLAUME BAYVAY, a French engraver, was born at Paris, in 1756. He was received at the Academy of Painting in 1784, was afterwards a member of the Institute and of the Legion of Honour, and died, 1822.

BERWICK, JAMES FITZJAMES, Duke of, was a natural son of James II. and Arabella Churchill, sister of the duke of Marlborough, and was born in 1670. His first military service was under Charles, duke of Lorraine, in Hungary, and he was present at the siege of Huda, and the battle of Mohacz. He was created duke of Berwick in 1687. He accompanied James II. to France at the revolution, served under him in Ireland, and was at the battle of the Boyne. He became lieutenant-general in the French army, and was naturalized in France. He afterwards commanded in Spain, and by the victory of Almanza, secured Valencia to Philip V. He especially distinguished himself by the defence of Provence and Dauphiny in 1709. He was killed at the siege of Philippsburg in 1734. He left memoirs of his own life.

HERZELIUS, Baron, one of the greatest chemists of modern times, was born in 1773, in Ostgothland, a province of Sweden, where his father kept a village school. After graduating at Upsala in 1804, he repaired to Stockholm, where he became an assistant to Sparrmann, who had accompanied Captain Cook in one of his voyages round the world; and at his death, in 1806, he succeeded him in the chair of chemistry, which he continued to fill for forty-two years. It would be impossible within our limits to give even a summary of his labours during this period; suffice it to say, that in a century which has produced a greater number of distinguished chemists than perhaps of any other class of men of science, Herzelius stood out as a star of the first magnitude. His patient labours, and ingenious investigations, have done more to lay the foundations of organic chemistry, than those of any other chemist. To him pre-eminently belongs the honour of applying the great principles which had been established by Dalton, Davy, Gay-Lussac, and himself, in inorganic chemistry, to the study of the laws which regulate the combinations forming the structures of the animal and vegetable kingdoms; and of thus opening the way for the discoveries of Mulder, Liebig, Dumas, and others. To him chemistry is indebted for the discovery of several new elementary bodies, more especially selenium, morium, and cerium; and to his skill as a manipulator may be traced many of the analytical processes at present in use. Under these circumstances it is not surprising that all the scientific societies of the world contended for the honour of enrolling his name among their members; and the various minor honours which he received from his own sovereign from time to time, were finally crowned by his being made a Knight Grand Cross of the Order of Vasa

rdinal, founder
of the Oratory.

in 1829, and his elevation to the rank of a baron in 1835. Died, 1849.

BESSARION, JOHN, Cardinal, one of the most eminent restorers of learning in the 15th century, and founder of the noble library of St Mark, at Venice. He was a native of Trebizond, and a monk of the order of St Basil. He was drawn from his monastery in the Peloponnesus, where he had passed twenty years, to accompany the emperor John Paleologus to the great council of Ferrara, at which the union of the Greek and Latin churches was formally accomplished. For the zealous service which Bessarion rendered on this occasion he was made a cardinal by Pope Eugenius, and had afterwards the title of patriarch of Constantinople given him by Pius II. He spent the last thirty years of his life at Rome, devoting himself to the promotion of literature, and discharging several important embassies. Disciple of Gemistus Pletho, he became early an admirer of Plato, and he wrote a work in defence of the Platonic philosophy in answer to George of Trebizond. He also translated parts of the works of Aristotle and Xenophon. Born, 1395; died, 1472.

BESSEL, FRIEDRICH WILHELM, one of the most eminent German astronomers, was born at Minden in 1784. His taste for mathematics and extraordinary expertness in astronomical calculations were shown while he was still clerk in a merchant's office at Bremen. In 1806 he was chosen assistant to the astronomer Schroeter at Lilienthal; and four years later he was called to the chair of astronomy and mathematics at Königsberg, and was named at the same time director of the new observatory. By his unwearied and fruitful labours he obtained the highest reputation, and was chosen member of the principal scientific bodies of Europe; among others, of the Royal and Astronomical Societies of London. One of his most memorable achievements was his discovery of the parallax of a fixed star (61 Cygni). He attained a singular mastery of practical astronomy, improving methods of observation, detecting and avoiding sources of error in calculation. His great work is the "Fundamenta Astronomiæ," on which he spent much of his time for ten years. It is founded on Bradley's observations, the reduction of which is a marvel of patient toil and accuracy. His other works are "Tabulæ Regiomontane," "Astronomische Untersuchungen," and numerous memoirs. The loss of his son in 1841 weighed heavily on his mind, and he died in 1846.

BESSIÈRES, JEAN BAPTISTE, marshal of France, and duke of Istria, was born in Languedoc in 1768. He first served in the constitutional guard of Louis XVI.; distinguished himself in the Italian campaign of 1796, especially at Roveredo and Rivoli, and became from that time the intimate friend of Napoleon. He accompanied him to Egypt, contributed to the victory of Marengo, was created marshal in 1804, and soon after grand eagle of the Legion of Honour, and duke of Istria. He overthrew the Russian Imperial guards at Austerlitz, and took part in the battles of Jena and

Eylau. He served in Spain, in the campaign of Wagram, and in the expedition to Russia. He was killed by a shot while making a reconnaissance of the field of Lützen, the day before the battle, May, 1813.

BETHAM, SIR WILLIAM, an English antiquary, was a native of Suffolk. He was born in 1779, went to Dublin in 1805, where he became Deputy Keeper of Records, and member and foreign secretary of the Irish Academy. He was also F.S.A., London. He was author of "The Gael and Cimbri," "Etruria Celtica," "Origin and History of the Constitution of England," &c. Died, 1853.

BETHENCOURT, JEAN DE, a Norman baron, and a military adventurer, who conquered the Canary Islands, and afterwards held them as a fief of the crown of Castile. Died, 1425.

BETHLEM-GAROR, prince of Transylvania, was born of a noble Hungarian family, and by the aid of the Turks got himself proclaimed Prince in 1613. He afterwards made conquests in Austria, and was elected king of Hungary, but had soon after to make terms with the emperor and renounce that title. He was a zealous Protestant, did good service on the Protestant side in the Thirty Years' War, and raised his country to a new importance. Died, 1629.

BETHUNE, MAXIMILIAN DE. [SULLY, Duke of.]

BETTERTON, THOMAS, a very celebrated actor, was born at London in 1635. He was first a bookseller's apprentice, but became a member of Sir W. Davenant's company soon after the Restoration, and earned so high a reputation that the king sent him to France to gather suggestions for the improvement of theatrical representations. He opened a theatre of his own in 1693, but retired in a few years. He acted on several occasions subsequently, the last time in April, 1710, when suffering from gout; and he died a few days after. He was loved and honoured as a man no less than he was admired as an actor.

BETTINELLI, SAVERIO, a Jesuit of Mantua, and a celebrated littérateur. He was an elegant and accomplished writer, epistolary, dramatic, and poetical; his principal work is the "Risorgimento d'Italia," a sketch of the progress of literature, science, and art in Italy. His "Lettere diel di Virgilio agli Arcadi" attracted much attention, but did him little honour. Born, 1718, died, 1808.

BEURNONVILLE, PIERRE RIEL, Count of, French marshal; minister of war in 1793; ambassador at Berlin and Madrid during the consulate, and under the empire grand officer of the Legion of Honour. He voted for the deposition of Napoleon, and attached himself to Louis XVIII., by whom he was rewarded with the title of marshal. Died, 1821.

BEVERIDGE, WILLIAM, bishop of St Asaph, was a native of Leicestershire, and was born in 1638. He was educated at Cambridge, and after holding several parochial charges, in which he distinguished himself by his simple piety and earnest labours, he was made prebendary of St Paul's, arch-

deacon of Colchester, canon of Canterbury, and in 1689 chaplain to the king. In 1704 he was raised to the see of St Asaph. His principal works are a treatise "De linguarum orientalium priestantia et usu, cum grammatica Syriaca," published at the age of 20; "Synodicon," a collection of ancient canons of the church; "Institutionum Chronologicarum libri II.;" "Private Thoughts on Religion," frequently republished; &c. Died, 1708.

BEVERLEY, JOHN OF, tutor to the venerable Bede, and subsequently archbishop of York. He held that see thirty-four years, and was the founder of a college for secular priests at Beverley. He was one of the most learned men of his time, and several of his devotional treatises are still extant. Died, 721.

BEWICK, THOMAS, the distinguished wood engraver, was born at Cherry-burn in Northumberland, in 1753. He is said to have worked when a boy in his father's coal-pit, and he received what small school-learning he could at Ovingham. His fondness for drawing led to his being apprenticed to Ralph Bellby, an engraver at Newcastle, in 1767. He served for seven years, working at the most prosaic tasks for his master, paying ninepence a week for his lodging, and receiving a brown loaf weekly from Cherry-burn. During this period he made his first attempts at wood-engraving on the diagrams for Hutton's "Treatise on Menstruation," which appeared in 1770. Soon after the expiration of his apprenticeship he began to devote himself entirely to wood-engraving, and in 1775 he obtained the premium of the Society of Arts for his cut of the Huntsman and Old Hound, one of a set of illustrations to Gay's "Fables." After a tour on foot in the Lake district in 1776, Bewick spent a year in London, but he lived for green fields and the songs of larks, and went back to Newcastle, where he became Bellby's partner. He continued to practise his favourite art, and rapidly improved both as designer and engraver. He has the merit of introducing a truer method of representing the foliage of trees, and of drawing animals more naturally and characteristically. Many of his cuts display genuine humour and tender feeling. The principal works illustrated by this lover of nature and genuine artist are—Gay's "Fables," 1779; "Select Fables," 1784; "General History of Quadrupeds," the first edition of which appeared in 1790, a second in 1791, and a third in 1792; "History of British Birds," in two vols. 1797 and 1804; and "Fables of Æsop and others." A print of a bull is mentioned as one of Bewick's most capital works. The partnership with Bellby ended in 1797. Bewick was much engaged in teaching engraving during the latter part of his life. He died at Gateshead in 1828, and was buried at Ovingham.—**JOHN BEWICK**, younger brother of the above, was apprenticed to Bellby at the time of the formation of the partnership with Thomas, and assisted his brother in many of his works. Born, 1760; died, 1795.

BEXLEY, Lord. Nicholas Vansittart, whose career, though not distinguished by

striking ability, was highly successful, was the son of Mr Henry Vansittart, Governor of Bengal, who perished at sea when Nicholas was only four years old. The latter in due time went to school at Cheam, in Surrey, to Christchurch, Oxford, where he took the degree of A.M., and ultimately was called to the bar on the 26th of April, 1791. His success was not brilliant. He attended sessions, went circuit, and duly presented himself in the courts at Westminster, with indifferent success. In 1796 he was returned to Parliament for Hastings, which he represented till 1802. By the influence of Lord Addington he then became member for Harwich, a mere Treasury borough, and in 1812 he exchanged it for Old Sarum, so renowned in Parliamentary history, which he represented till 1823. He was made a Lord of the Treasury in 1804, and, after the death of Mr Perceval, was elevated to the post of Chancellor of the Exchequer, which he retained till 1822. He was then created Baron Bexley, and appointed Chancellor of the Duchy of Lancaster, which post he held till 1828. From that time till his death he mingled little in public life. William Cobbett, who addressed many of his pungent letters to "Statesman Vansittart," as he called him, was very fond of describing the marvellous rise and progress of the man who began life as a "Commissioner of Scotch Herrings" and ended in "a peerage and half a million of money." Died, 1850.

BEZA, or BEZE, THEODORE DE, the eminent French Protestant theologian and reformer, was born at Vezelay in 1519. After studying at Orléans and Bourges, he went in 1539 to Paris, where he spent nine years, and then went to Geneva and married a woman to whom he had long been secretly engaged. Soon after he was appointed professor of Greek at Lausanne, a post which he held for ten years. In 1558 he was sent to ask the intercession of several German princes in behalf of the persecuted Huguenots in France. The next year he settled at Geneva, and was thenceforth the associate of Calvin till his death, and his successor as professor of theology and head of the Protestant party. Beza undertook a mission to the king of Navarre, and succeeded in winning him to the side of the reformers. He took a leading part at the celebrated colloquy of Poissy, and was allowed to preach in Paris. He attended the prince of Conde during the civil war, and was at the battle of Dreux. Beza took part in several other synods and conferences between the opposing religious parties. His wife died in 1568, and he married again in a short time. His energy and activity of mind, like his bodily health, continued unabated till he was nearly 80 years of age, and he only ceased preaching in 1600. Among his works are a treatise "De Hæreticis a civili magistratu puniendis," an apology for the death of Servetus; a Latin translation of the New Testament, first published in 1537; "Histoire des églises réformées en France;" and a treatise "De Jure Magistratum." His "Pœmata Juvenilia" were severely censured for their impurity. Died, 1605.

SCISCO, an Italian

archaeologist and astronomer, born at Verona
 in 1602. He settled at Rome at the age of
 24, where his acquirements soon made him
 the friend of the most eminent men. He
 made laborious explorations and drawings
 of many ancient monuments and remains;
 made astronomical observations, and under-
 took to draw a meridian line through Italy,
 which however after years of toil he had to
 leave incomplete. He was patronized by
 Pope Alexander VIII. and his two success-
 ors, was admitted to the French Academy
 of Sciences, visited Paris and Oxford, and
 died at Rome in 1729. He edited the "Lives
 of the Roman Pontiffs" by Anastasius, and
 wrote the first part of a "Universal History
 founded on the Monuments of Antiquity;"
 an account of the Palace of the Caesars, &c.

BIAS, one of the seven sages of Greece,
 and a native of Priene, in Ionia; celebrated
 for his practical knowledge and strict regard
 to justice. He flourished about 550 B.C., and
 died at a very advanced age.

BICHAT, MARIE FRANÇOIS XAVIER, an
 eminent French physiologist, was born in
 1771. He went to Paris in 1793, and studied
 under Desault, who soon made him his friend
 and associate. He was an indefatigable
 student and observer, made very numerous
 experiments and discoveries in anatomy,
 worked hard both as teacher in his school
 of medicine and as author, and died in 1802.
 His great work is the "Anatomie générale
 appliquée à la physiologie et à la médecine."
 He also wrote "Recherches physiologiques
 sur la vie et la mort," "Traité des mem-
 branes," and "Anatomie descriptive."

BICKERSTAFF, ISAAC, a dramatic writer
 of the 18th century; author of "Love in a
 Village," "Lionel and Charissa," &c.

BICKERSTETH, EDWARD, a church of
 England divine, and a prolific writer on
 religious topics, was born in 1786. His
 original destination was the law; but after
 practising for some years as an attorney at
 Norwich, he desired to enter the ministry,
 and obtained ordination from Bishop Lut-
 hurst in 1815. Soon afterwards he was ap-
 pointed secretary to the Church Missionary
 Society in London, and at the same time
 became assistant minister to an episcopal
 chapel in Spitalfields. In 1830 he was pre-
 sented to the living of Wotton, in Hertford-
 shire, where he laboured with great zeal
 and efficiency down to the period of his
 death, 28th February, 1850. Mr Bickersteth's
 first work was his "Help to the Study of the
 scriptures;" and this was followed by many
 other useful works on divinity; and on all
 occasions he exhibited himself as a most
 uncompromising opponent to Popery and
 irreligion.

BIDDLE, JOHN, a Socinian writer of con-
 siderable note in the time of Charles I. and
 during the Commonwealth, and now regard-
 ed as the founder of English Unitarianism;
 author of a "Confession of Faith concerning
 the Holy Trinity," and other works in de-
 fence of his principles. He was frequently
 persecuted and imprisoned, and died of a
 fever caught in gaol in 1622.

BIDDLE, GODFREY, a Dutch anatomist;
 after holding a professorship at the
 Hague, was appointed physician to William

III. of England, and became a few years
 later professor of anatomy at Leyden uni-
 versity. He published a fine collection of
 anatomical plates under the title of "Anat-
 omia Corporis Humani," &c. Born, 1649;
 died, 1713.

BIGLAND, JOHN, a voluminous miscel-
 laneous writer, whose first publication did
 not appear till he was fifty years of age;
 author of "A System of Geography and
 History," "Histories of Spain and England,
 Letters on English and French History," &c.
 Died, 1832, aged 82.

BIGNON, JEROME, a learned French
 writer, born at Paris, 1589. The fame of his
 attainments led to his appointment as com-
 panion to the Dauphin, afterwards Louis
 XIII. In 1614 he visited Italy, and spent
 some time with Father Paul at Venice. He
 was afterwards keeper of the king's library,
 and was sometimes employed in political
 affairs. He published a "Discours de la
 ville de Rome," a "Traité de l'élection du
 Pape," "Traité de l'excellence des rois et du
 royaume de France," &c. Died, 1650.

BIGNON, L. P. EDOUARD, was born at
 Meilleraye, of a respectable family, and
 early entered on the diplomatic career as
 secretary of legation in Switzerland, and
 subsequently in Savoy and Prussia, and was
 made intendant of Berlin after the battle of
 Jena. Ambassador in Poland, both before
 and after the retreat from Moscow, he ren-
 dered the most important services to the
 French army. He subsequently held many
 important offices, was a member of the
 chamber of deputies under the restoration,
 and was made peer of France in 1839. He
 wrote, at the express desire of Napoleon, a
 "History of French Diplomacy." Born,
 1771; died, 1810.

BILDERDYK, WILLEM, a modern Dutch
 poet, born at Amsterdam in 1756; he was
 educated at Leyden and practised as an ad-
 vocate, but was driven from his country by
 the civil war, and lived abroad for twenty
 years. Part of the time he spent in England.
 He returned in 1806, and was made president
 of the Dutch Institute. Bilderdyk, though
 ranking among the chief poets of Holland,
 has little originality or imagination. Many
 of his works are translations or imitations.
 Among these are two of the plays of Sopho-
 cles, and the "Fingal" of Ossian. Of his
 own works the principal are the "Love of
 Fatherland," "Rural Life," and his last
 work, the "Destruction of the First World."
 Died, 1831. Bilderdyk's second wife, CATHE-
 RINA WILHELMINA, was an intellectual and
 accomplished woman, author of two trage-
 dies, some poems, and a translation of Sou-
 they's "Roderic." She died, 1830.

BILLAUD-VARENNES, JACQUES NICOLAS,
 the son of a French advocate at Rochelle,
 was educated at the same college as Fouché,
 and proved himself one of the most violent
 and sanguinary characters of the
 French revolution. He bore a principal
 part in the murders and massacres which
 followed the destruction of the Bastille;
 voted immediate death to Louis XVI.; and
 officiated as president of the Convention on
 the 18th of Oct., 1793. He was afterwards
 deported to Cayenne, and subsisted on a

small pension allowed him by Pethion. Died at St Domingo, in 1819.

BILLINGSLEY, SIR HENRY, was a native of Canterbury, who, as a London tradesman, acquired great wealth, and became lord mayor in 1597. He was educated at Oxford, and was assisted in mathematics by an ex-friar of the Augustine order, to whom he had generously given shelter and support, and he was the first who published Euclid's Elements in English. Sir H. Billingsley was one of the first members of the Society of Antiquaries. Died, 1616.

BILLINGTON, ELIZABETH, the most celebrated English female singer of her time. She was of German extraction, though born in England. Her popularity was equally great in England and on the continent, and remained undiminished to the close of her public career in 1809. Died, 1817.

BILSON, THOMAS, bishop of Winchester, in the reigns of Queen Elizabeth and James I.; author of several theological treatises, and one of the translators of the Bible. He was made bishop of Worcester in 1596, and transferred the next year to the see of Winchester. Bilson took a prominent part in the celebrated conference at Hampton Court in January, 1604. Born, 1536; died, 1616.

BINGHAM, JOSEPH, a learned divine of the church of England, was born at Wakefield in 1668. He was educated at Oxford, became fellow of University College, and graduated M.A. in 1691. Four years later he became rector of Headbourne-Worthy near Winchester, and in 1712 rector of Havant near Portsmouth. His great work is entitled "Origines Ecclesiasticæ, or the Antiquities of the Christian Church." It appeared in 10 vols. 8vo, between 1708—1722. He wrote several minor works, and died in 1723.

BINGHAM, SIR GEORGE RIDOUT, major-general in the British army, was born in 1777. He entered the service in 1793, as an ensign in the 69th foot; and progressively advanced in different regiments, till he became lieutenant-colonel of the 53rd, being present at the most important transactions in the Peninsula, for which services he was rewarded by knighthood. He afterwards had the charge of Buonaparte from England to St Helena, where he remained several years, and was promoted to the rank of major-general and colonel-commandant of the second rifle brigade. Died, January, 1833.

BINGLEY, WILLIAM, miscellaneous writer, was born in Yorkshire and educated at Cambridge. He was chiefly known as the author of "Animal Biography," &c. Died, at London, 1823.

BION, a Greek pastoral poet: his poems, published with those of his friend and disciple, Moschus, are remarkable for simplicity and sweetness. He lived about 280 B.C.

BIOT, JEAN BAPTISTE, a very eminent French mathematician, born at Paris in 1774. After a brilliant course of study he was called to the chair of mathematics at the Central School at Beauvais, whence he removed in 1800 to the College of France, to hold the professorship of natural philosophy.

He was chosen by the Board of Longitudes to make observations along the English arc of the meridian, and for that purpose visited Great Britain in 1817. It was during that visit that Humboldt, Arago, and Biot met at Greenwich Observatory. Biot had previously assisted in measuring the arc of the meridian extended through Spain. He was a member of the French Academy of Sciences, of the Institute, of the Legion of Honour, a foreign member of the Royal Societies of London and Edinburgh, and of many other scientific societies. He is especially celebrated as the discoverer of the circular polarization of light. Besides numerous memoirs contributed to the Academy and to scientific journals, Biot wrote, "Traité élémentaire d'Astronomie Physique," "Traité de Physique expérimentale et mathématique," "Recueil d'Observations géodésiques," &c., &c. Died, 1862.

BIRAGUE, CLEMENT, an engraver on gems, said to have been the first discoverer of the art of engraving on diamonds. He was born at Milan, and flourished about the middle of the 16th century.

BIRAGUE, RENÉ DE, a Milanese of noble family, who sought shelter in France from the vengeance of Lodovico Sforza, and became a cardinal and chancellor of France. He is infamously memorable as one of the authors of the massacre of St Bartholomew. Born, 1509; died, 1583.

BIRCH, THOMAS, originally a Quaker, but subsequently a divine of the Church of England. He was an industrious historian and biographer; took part in the English translation of Bayle's great Critical and Historical Dictionary, and wrote, among many other works, a "History of the Royal Society," to which he was admitted in 1734, and of which he subsequently became secretary. "Memoirs of the Reign of Queen Elizabeth," &c. Born, 1705; died, 1766.

BIRD, EDWARD (R.A.), an English painter, chiefly of familiar and domestic subjects, was a native of Wolverhampton, and settled early at Bristol. He was made, in 1813, historical painter to the Princess Charlotte. Among his works are "Good News," "The Blacksmith's Shop," "The Field of Chevy Chase," and the "Surrender of Calais." In later life he attempted subjects of a higher class, but not successfully. Born, 1772; died, 1818.

BIRD, JOHN, an eminent mathematical instrument maker; author of "The Method of constructing Mural Quadrants," &c. Died, 1766.

BIRDE, WILLIAM, an eminent musician in the reign of Elizabeth. He composed much sacred music; and to him the fine composition "Nou nobis Domine" is attributed. Birde was made organist to Queen Elizabeth in 1575. Born, 1543; died, 1623.

BIREN, JOHN ERNEST DE, duke of Courland, who, though the son of a peasant, by his handsome person and address, obtained such influence over Anne, daughter of Peter I. and duchess of Courland, that when she ascended the throne of Russia, she committed the reigns of government to Biren, made him duke of Courland, and at her death, in 1704, left him regent of the empire. His administration was marked by extreme tyranny and

cruelty. 11,000 persons many of whom were killed to and had fine, in relinquish

an engraver on the first discoverer on diamonds. He flourished about the year 1700.

A Milanese of noble birth in France from Francesco Sforza, and became Chancellor of France, was able as one of the of St Bartholomew.

Finally a Quaker, but of the Church of England, a historical and an English translator and historical among many other of the Royal Society, died in 1734, and of Queen Elizabeth,

1766. An English painter of domestic subjects, was born in London, and settled early in 1813, historical painter of Charlotte. Among his works, "the Blackfield of Chey Chase," "Calais." In later life of a higher class, but died, 1819.

An eminent mathematician and author of "The Method of Quadrants," &c. Died, 1623.

EST DE, duke of Courland, son of a peasant, by his address, obtained the hand of Peter's daughter, that when she was Russian, she committed to Biren, made him at her death, in 1704, empire. His administration extreme tyranny and

cruelty. He is said to have put to death 11,000 persons, and to have sentenced twice as many to exile. He was subsequently banished to Siberia, was recalled by Peter III., and had his duchy restored to him by Catherine, in 1763, but six years afterwards he relinquished it in favour of his eldest son. Born, 1687; died, 1772.

BIRKBECK, GEORGE, M.D., president of the London Mechanics' Institute, was the son of a merchant and banker at Settle, in Yorkshire, where he was born in 1776. In his boyhood he displayed a strong inclination for those mechanical pursuits to which he afterwards became so devoted; but his friends having determined that he should embrace the medical profession, he first studied for this object at Leeds, then removed to London to become a pupil of Dr Baillie, and subsequently went to Edinburgh to complete his education. At the age of twenty-one he was appointed professor of natural history in the Andersonian Institution of Glasgow; and having while there successfully established a mechanics' class, he was induced, in 1822, to found the London Mechanics' Institution in Chancery Lane; to which society he generously lent £3000 for erecting a museum, lecture-room, &c. Of this institution Dr Birkbeck was elected president; and from it nearly all the various mechanics' institutes throughout Great Britain have been established. As a physician, he enjoyed a considerable share of reputation, and as the promoter of mechanic arts, and the warm friend of the industrious artisan, no man could possibly be more generally or more justly esteemed. He also numbered among his circle of friends the most eminent scientific and literary men of the day. Died, Dec. 1st, 1841.

BIRKENHEAD, Sir JOHN, a political writer of the 17th century; several times imprisoned during the Commonwealth for writing in favour of the exiled king. Born, 1615; died, 1679.

BIRON, ARMAND DE GONTAUT, Baron de, marshal of France, was born about 1524. He served as page to the queen of Navarre, and was early admitted to the service of the king of France. He took a prominent part in the civil wars of Huguenot and Catholic, and served at the battles of Dreux, St Denis, and Montcontour. He negotiated the peace of St Germain, and narrowly escaped at the massacre of St Bartholomew. He recovered Guienne and Languedoc from the Protestants, served in the Netherlands against the duke of Parma, and was one of the first to recognize Henry IV. as king. He distinguished himself at the battle of Arques, the first siege of Paris, and the battle of Ivry, and was killed at the siege of Epemay in 1592.

BIRON, CHARLES DE GONTAUT, Duke de, marshal of France, was son of the preceding, and was born about 1562. He entered the army and served at Arques, Ivry, and the sieges of Paris; was made admiral of France in 1592, and marshal in 1594. He cared neither for Catholic nor Protestant, and intrigued with the Spanish court, and the duke of Savoy against Henry IV. The king forgave him, but he continued to intrigue against him, and at last was arrested and sent to the

Bastille, and was there tried and beheaded, in 1602.

BIRON, ARMAUD LOUIS GONTAUT, Duke de, at first known as the duke de Lauzun, was born about 1769; one of the most celebrated men of the French revolution, remarkable at once for his amours, his attachment to liberty, and his military exploits. He served with La Fayette in America, and attached himself to the party of the duke of Orleans on his return. In 1792 he was joined with Talleyrand in a mission to this country; on his return, served under Rochambeau, in Flanders; and perished by the guillotine at the end of 1793, on a charge of counter-revolution. He died stoically, ordering oysters, and drinking wine with the executioner.

BISHOP, Sir HENRY ROWLEY, an eminent modern English composer, was born in London in 1736, and pursued his musical studies under the direction of Bianchi. In 1806 some pieces which he wrote for the ballet of "Tamerlane and Bajazet," brought him into favourable notice; but his first original composition of note was the "Circassian Bride," which was received with great enthusiasm on its first appearance at Drury-lane in 1809, though the whole of the music perished in the great conflagration that destroyed that theatre the very day after its performance. His reputation obtained for him the office of composer and director of the music of Covent Garden Theatre in 1810; and, during the fourteen years that he held it, he produced nearly sixty pieces of greater or less importance; many of which, such as "The Vintagers," "Guy Mannering," "The Miller and his Men," still keep possession of the stage. In 1826, after the success of Weber's "Oberon" at Covent Garden, he wrote "Aladdin" for the rival house, but this composition was received with such coldness by the public that he thenceforward withdrew from the theatre; but, during the next thirty years, he gave to the world numerous songs, glees, and other vocal pieces, many of which enjoy even greater popularity than his larger and more ambitious performances. He also contributed to several valuable publications, especially the "Melodies of Various Nations," the later volumes of Moore's "Irish Songs," and the "Scottish Melodies," published by Mr George Thomson, the friend of Burns. He long held the office of director of the Concerts of Ancient Music, and for a short period was professor of music in the university of Edinburgh. Soon after Queen Victoria's accession he received the honour of knighthood, and at the time of his death he held the chair of music in the university of Oxford. His last days were clouded with disease, both mental and bodily, as well as by pecuniary difficulties, which, however, were alleviated, if not removed, by the kindness of private friends and the generosity of the public. Died, 1855.

BISSET, JAMES, an ingenious artist and amusing writer, was born at Perth, in 1762, but settled early in life at Birmingham, where he established a museum and shop for curiosities, which he afterwards removed to Lambington. He had a remarkable facility in writing rhymes, and being ever ready to make his muse subservient to the cause of

loyalty, or aid the progress of art, his works present a motley appearance, and are often droll and epigrammatic. His "Guides," "Poetic Surveys," "Patriotic Clarions," and "Critical Essays," were indebted for their notoriety to the jingle of rhyme. Died, 1832.

BLVAK, RODRIGO DIAS DE. [CID.]
BLACK, JOSEPH, a celebrated chemist, was born in France, in 1728. He was educated at the universities of Glasgow and Edinburgh, attending at the former the chemical lectures of Dr Cullen. He graduated in medicine, and in 1756, was named professor of anatomy, and lecturer on chemistry at Glasgow. Here he acquired the friendship of Adam Smith. It was during his residence at Glasgow that he made and established his discovery of latent heat. In 1766 he became professor of chemistry at Edinburgh, a post which he filled with great ability and success till his death. Black wrote but little. The most important of his papers is "Experiments upon Magnesia, Alba, Quicklime, and other Alkaline Substances." Died, unmarried, in 1799.

BLACKLOCK, THOMAS, a Scotch divine, poet, and miscellaneous writer; author of "The Graham," an heroic poem; "Remarks on Civil Liberty," &c. Born, 1721; died, 1791.

BLACKMORE, Sir RICHARD, physician and poet, and the author of many works both in prose and verse, the principal of which is his poem entitled "Creation." He made the legends of Prince Arthur the subject of his first poem, and it became sufficiently popular to pass quickly through three editions. Living in the time of Dryden, Pope, and other wits and satirists, to whom he was opposed in politics, he met with unmerciful ridicule; yet he was by no means destitute of talent, and he sustained the reputation of a pious and conscientious man. The willing neglect of posterity, however, goes far to justify the ridicule of his contemporaries. Died, 1729.

BLACKSTONE, Sir WILLIAM, author of the well-known "Commentaries on the Laws of England," was born in London, 1723; educated at the Charterhouse, and at Oxford, where he instituted a course of lectures on the English constitution and laws, and in 1758 was named first Vinerian professor; and after gaining great distinction as a lecturer on law, was made Solicitor-General, and was subsequently raised to the bench. He sat as judge in the Court of Common Pleas from 1770 till his death. Died, 1780.

BLACKWELL, ALEXANDER and ELIZABETH, husband and wife: the latter, in order to procure subsistence for her husband while in prison for debt, published a "Herbal" in two volumes, folio, with 500 plates, drawn, engraved, and coloured by herself, all in the space of four years. The work succeeded, and her husband was liberated; but he seemed doomed to be the sport of fortune; for after having been invited to Stockholm, and pensioned by the king of Sweden, in consequence of his being the author of a work on agriculture which attracted the notice of that monarch, he was charged with being concerned in a plot with Count Tessin for overturning the monarchy, tried, and hanged, in 1747.

BLACKWOOD, Sir HENRY, British ad-

miral, was the sixth son of Sir John Blackwood, bart., and was born in 1770. Having entered the naval service at the age of 11 years, he was present at the action off the Dogger Bank; and on the commencement of hostilities with the French, in 1793, he became first lieutenant of the Invincible man-of-war, in which capacity he acted on the "glorious 1st of June," 1794, with distinguished bravery, and was in consequence promoted to the rank of commander. In 1798, when captain of the Brilliant, of 28 guns, he gallantly maintained a most unequal combat, off the island of Teneriffe, with two large French frigates, each of which was nearly double his own force, and beat them off. After this he was engaged in various services, as captain of the Penelope, of 36 guns, under Lords Keith and Nelson, Sir Sydney Smith, and other eminent men; and it was owing chiefly to his skill and bravery that the Guillaume Tell, of 80 guns, which escaped from Lord Nelson at Aboukir, was captured. The next scene of his naval glory was the ever-memorable battle of Trafalgar, where he performed the most essential service, as captain of the Euryalus, and witnessed the death of his friend and heroic commander, whose last words to him were, "God bless you, Blackwood—I shall never see you more." In 1806 he was appointed to the command of the Ajax, of 80 guns, and joined Lord Collingwood's fleet on the anniversary of the battle of Trafalgar. This, however, was a melancholy event, as the sequel proved; for, during the night of the 14th of February, 1807, the Ajax was found to be on fire, and in a short time went down with half her crew; Sir Henry, like many others, being saved with the greatest difficulty. After this he commanded the Warspite, and was present at the blockades of Brest and Rochfort, and engaged in various enterprises. In 1814, his Royal Highness the duke of Clarence made him captain of the fleet, and he was appointed to bring over the crowned heads from France to this country: on which occasion he was created a baronet, and promoted to the rank of rear-admiral. In 1819, Sir Henry was appointed commander-in-chief of the naval forces in the East Indies, from which station he speedily returned; and in 1827 the lord high admiral raised him to the command at Chatham. He died in December, 1832; leaving behind him the character of a brave, skillful officer, and an amiable man.

BLAINVILLE, HENRI MARIE DUCROTAY DE, a very distinguished French anatomist and zoologist, was born at Arques in 1778. After leading a desultory life till 1805, his career was then decided by his interest in Cuvier's lectures, and he applied himself to the study of medicine. He assisted Cuvier both in his experiments and lectures, was chosen professor of zoology and physiology in 1812, and in 1832 succeeded his master as professor of comparative anatomy at the Jardin des Plantes. He visited England in 1816, was a member of the Academy of Sciences of Paris, of the Royal and Geological Societies of London, and of many other scientific bodies. He contributed largely to scientific journals, and wrote a large number

BLAIR, HUGH, an eminent Scotch divine; author of a "Dissertation on the Poems of Ossian," "Lectures on Rhetoric and Belles Lettres," and "Sermons," in five volumes, which were long greatly esteemed. Born at Edinburgh, 1718; died, 1800.

BLAIR, JOHN, L.L.D., author of the well-known Chronological Tables and of "Lectures on the Canon of the Old Testament;" was a prebendary of Westminster, fellow of the Royal Society and of the Society of Antiquaries, and teacher of mathematics to the duke of York. His chronology first appeared in 1754. Died, 1782.

BLAIR, ROBERT, a Scotch divine; author of the well-known and admired poem "The Grave." He was parish minister of Atholstanford during the last 15 years of his life. Born, 1700; died, 1746.

BLAKE, ROBERT, the great English admiral, was born at Bridgewater in 1598. He was educated at Oxford, and lived in retirement till 1640, when he became a member of parliament. He raised and commanded a troop in the civil war, took Taunton for the parliament, and was made governor of the town. His naval service began in 1649 with the pursuit of Prince Rupert and the royalist fleet, which he ultimately destroyed. After recovering Guernsey and Jersey, he was made councillor of state. His greatest achievements were, however, in the war with the Dutch, which broke out in 1652, and lasted till 1654. He several times defeated Van Tromp, was once defeated by him, paralyzed the commerce of the Dutch, and dispersed their herring fleet in the North Sea. He afterwards commanded with distinguished success in the Mediterranean. In 1656 he captured a Spanish plate-fleet at the island of Tenerife. The thanks of parliament were voted to him on this as on several former occasions. He was a man of singular uprightness, honesty, and courage, totally free from selfishness and worldly ambition, and served his country with a pure heart. Died, on his voyage to England in August, 1657. He had a public funeral at Westminster Abbey, but his body was removed at the Restoration.

BLAKE, WILLIAM, poet, painter, and engraver, was born at London in 1757. Dreamy and visionary even in childhood, he was apprenticed to an engraver, and was employed in making drawings from old monuments in Westminster Abbey and other churches. He afterwards studied at the Royal Academy. In 1789 he published his "Songs of Innocence," written, printed, and illustrated by himself with the assistance of his wife. He became the associate of Priestley, Godwin, Mary Wollstonecraft, and other celebrated freethinkers of the day, and went further than they did in practical defiance of the usages of society. He went on publishing many strange poems, not without flashes of truth and beauty, but mostly wild, obscure, and perplexing. About 1800 he settled at Felpham in Sussex, where he had the society of Hayley. After a few years he

returned to London, continued to see visions and produce poems and designs, began to study Dante at the age of 68, and died in August, 1827. Among his works are "Songs of Experience," considered, with the "Songs of Innocence," some of his best productions; "The Gates of Paradise," "Jerusalem," "Intentions to the Book of Job," and designs to Dante's Vision. The "Life of W. Blake, with Selections from his Poems and other Writings," by Gilchrist, with Illustrations from his Works and a Catalogue of his Drawings, by Mr Rossetti, was published in 1863.

BLANCHARD, FRANÇOIS, a celebrated French aeronaut, born in 1738, was distinguished from his youth by his mechanical inventions. After making his first aerostatic voyage in 1784, he crossed the Channel from Dover to Calais, 1785; for which exploit he was rewarded by the king of France with 12,000 francs, and a pension of 1200 fr. He first made use of a parachute in London, in 1785; went through various countries on the Continent, exhibiting his aeronautic skill; visited America with the same object; and, returning in 1798, ascended at Rouen with 16 persons in a large balloon, and descended at a place 15 miles distant. He died in 1809.—His wife, MADAME BLANCHARD, continued to make aerial voyages; but in June, 1819, having ascended from Tivoli, in Paris, her balloon took fire, at a considerable height, owing to some fireworks which she carried with her, the car fell, and the hapless aeronaut was dashed to pieces.

BLANCHARD, JACQUES, an eminent and indefatigable French painter. He spent several years at Rome and Venice, studying particularly the works of Titian. Born, 1600; died, 1638.

BLANCHARD, LAMAN, a graceful periodical writer, was born at Great Yarmouth in 1803. His father having removed to London when he was five years of age, he received his education at St Olave's School, Lambeth; and here was laid the groundwork of those literary tastes and habits which distinguished him through life. His first occupation was that of reader at Cox and Baylis' printing office in Great Queen Street; in 1827 he became secretary to the Zoological Society; and in 1831 editor of the Monthly Magazine. He subsequently became connected with the True Sun, the Constitutional, the Courier, the Court Journal, and the Examiner; and was a constant contributor to the lighter periodicals of the day. Never was there a writer with a readier pen; but though radiant with wit, it was never dipped in gall; and though his political opinions were strongly marked and maintained through good and evil report, his entire freedom from party bigotry and prejudice gained him the respect even of his most decided opponents. But a series of domestic calamities crushed his buoyant spirit to the earth, and in a fit of temporary insanity he committed suicide, Feb. 15, 1845. A collected edition of his writings, with a memoir of the author by Sir Bulwer Lytton, was published in 1846.

BLANCHE, of CASTILLE, queen of Louis

VIII. of France, was daughter of Alfonso IX., king of Castille, and was born about 1186. She was married to Louis in 1200, was crowned with him in 1223, and on his death three years later became regent during the minority of her son Louis IX., displaying great energy and address as a ruler. She opposed the departure of Louis for the crusade, but accompanied him to Cluni, and carried on the government in his stead. His long absence and the rumour of his intention to settle in the Holy Land caused her great sorrow, and she died in 1252.

BLANE, Sir GILBERT, bart., M.D., was born in Ayrshire in 1743, and, after rendering important services while attending Lord Rodney on the West India station, became successively physician to the fleet, to the Prince of Wales, and to St Thomas's Hospital, and president of the Navy Medical Board. He was a fellow of the Royal Society, member of the French Institute, and was, in 1812, created a baronet. His principal work is his "Elements of Medical Logic." He died in June, 1834.

BLANTYRE, Lord, was born in Edinburgh in 1775, and entered the army in his 19th year. He served in the Peninsular war, at the conclusion of which he received public thanks for his services, and afterwards became lord-lieutenant of Renfrewshire. He was residing with his family at Brussels during the struggle of the Belgians for a separate government; when looking out from a window, to see the Dutch troops who were advancing into the park, he was struck in the neck by a musket-ball, and the effusion of blood was so great that he died a few moments after, Sept. 1830.

BLAYNEY, Dr BENJAMIN, an English divine and biblical critic; royal professor of Hebrew, at Oxford, and author of a "Dissertation on the Seventy Weeks of Daniel," &c. Died, 1801.

BLESSINGTON, MARGARET POWER, Countess of, celebrated for her beauty, accomplishments, and literary productions, was born in the county of Waterford in 1789. At the early age of 15 she contracted an ill-fated marriage with Captain Farner, and soon after his death the earl of Blessington sought and obtained her hand in 1818. After her marriage she passed several years abroad, and formed an acquaintance with Lord Byron, which ripened into intimacy, and enabled her to publish one of her most interesting works, her "Conversations with Lord Byron." Soon after her husband's death in 1829, she fixed her residence in London. Her house became the centre-point of every variety of talent; and there were few literary celebrities, native or foreign, who did not share in the "feast of reason and the flow of soul," for which Gore House will be long remembered. Lady Blessington's contributions to literature were at once numerous and diversified. Besides the "Conversations" above mentioned, she published many novels, besides several works full of personal anecdote, epigram, sentiment, and description, such as "The Idler in Italy," "The Idler in France," &c. For many years she edited the far-famed annuals, "The Book

of Beauty," and the "Keepsake." Died at Paris, Aug. 1849.

BLIGH, WILLIAM, commander of the ship "Bounty," was born in Kent in 1753. He accompanied Captain Cook in his third voyage, and in 1787 was appointed to the command of the "Bounty" and sent to convey bread-fruit and other plants from the South Seas to the West Indies. Having taken the cargo on board at Tahiti, he sailed again in April, 1789. In a few days the mutiny broke out, caused probably by Bligh's harshness and tyranny, and he with 18 companions were cast adrift in an open boat. After an extraordinary voyage they reached England. Bligh was afterwards made governor of New South Wales, but in less than two years his rigorous and arbitrary conduct made it necessary to deprive him. Died at London, 1817.

BLIZARD, Sir WILLIAM, a surgeon and anatomist of considerable eminence, was born in 1742. During a long life of professional activity and experience he maintained a high reputation; and was for many years professor of anatomy to the Royal College of Surgeons, and a fellow of the Royal and Antiquarian Societies. He was also the author of several works, viz., "Suggestions for the Improvements of Hospitals," "Reflections on Police," &c. Died, at the great age of 92, in Sept., 1835.

BLOCH, MARCUS ELIEZER, an ingenious naturalist and physician, and a Jew by birth, was born at Anspach, of mean parentage; but entering into the service of a physician, he studied medicine, anatomy, and natural history with great success, and became particularly eminent in the last-named science. His "Ichthyology," produced at Berlin in 1785, at the expense of the wealthiest princes of Germany, is a magnificent national work. Born, 1723; died, 1799.

BLOCK, JOANNA, a Dutch-woman whose singular talents in cutting landscapes, flowers, portraits, &c., out of paper, entitle her to rank as an artist of no mean skill, so true were her works to nature. Born, 1639; died, 1715.

BLOEMART, ABRAHAM, a Dutch historical and landscape painter, whose brilliant colouring and inventive powers hardly compensate for his mannerism. Born, 1565; died, 1647.

BLOEMART, CORNELIUS, son of the preceding, who became eminent as an engraver, and may be regarded as the founder of a new school, remarkable for the purity and softness of the burin. Born, 1603; died, 1680.

BLOMEFIELD, FRANCIS, topographical historian, was a native of Norfolk. He was born in 1705, educated at Cambridge, entered the church, and became in 1729 rector of Fresfield, his native place. His great work is the "Topographical History of the County of Norfolk," in five vols. folio; the last two being by another hand. The author was also printer and publisher of his own book, and the first part appeared in 1739. Died, 1751.

BLOMFIELD, CHARLES JAMES, Bishop of London, was born, in 1786, at Jury St Edmunds, where his father was a teacher.

...LES JAMES, Bishop
...in 1786, at Bury St
...ther was a teacher.

After attending the grammar-school of his native town for eight years, he removed to Cambridge, and earned great distinction in the field of classical literature. After being admitted to priest's orders he was presented to the rectory of Quarrington in 1810, and the same year he published his edition of the "Prometheus" of Aeschylus, which at once marked him as a scholar of the first rank. This was followed by various editions of the classic authors, and led to his being appointed in succession rector of Chesterford, rector of St Botolph's, Hishopsgate, the richest living in the diocese of London, bishop of Chester in 1824, and bishop of London in 1828. From that period till his retirement, in 1856, he was the most conspicuous member of the English clergy. In all the questions affecting the status of the clergy and the doctrines of the church he took a most active part; but, perhaps, he will be best remembered for the zeal with which he devoted himself to provide church accommodation for the thousands of neglected persons who swarmed in all the large parishes of his diocese. Under his auspices more than two hundred additional churches were built, to most of which schools and savings-banks are attached. In 1856 the bishop's health had become so infirm that he could no longer attend to his duties, and in compliance with his own requisition an Act of Parliament was passed enabling him to resign his see, and to have an allowance of £5000 a-year, together with the use of Fulham Palace for life. Died, 1857.

BLOMFIELD, EDWARD VALENTINE, a distinguished classical scholar, was the brother of Dr Blomfield, bishop of London, and was born in 1788. He received his education at Caius College, Cambridge, where, besides other prizes, he gained, in 1809, a medal for his beautiful ode, "In Desiderium Porsoni." In 1812 a fellowship in Emanuel College was conferred on him. In the following year he visited Germany, and acquired an intimate knowledge of the German language. On his return to England he published in the "Museum Criticum, or Cambridge Classical Researches," remarks on German literature. He translated Matthiæ's Greek Grammar, and began a translation of Schneider's Greek and German Lexicon. Died, 1816.

BLOND, JACQUES CHRISTOPHE LE, a French miniature painter, and author of a treatise entitled "Il Colorito," on a method of engraving in colours. Born, 1670; died, 1741.

BLONDEL, the minstrel and favourite of Richard Cœur de Lion; whom he is said to have discovered in his German dungeon, by singing beneath its walls the first part of a song of their joint composition.

BLONDUS, FLAVIUS, or FLAVIO BIONDO, an Italian archeologist, was born at Forli in 1388. He was secretary to Pope Eugenius IV, and three of his successors, and applied himself chiefly to the study of the topography and monuments of ancient Rome, and the government of the republic. His principal works are "Roma instaurata," "Roma triumphantis," and "Italia illustrata libri tres." Died at Rome, 1463.

BLOOD, THOMAS, Colonel, a bold and desperate Irishman, originally an officer in

Cromwell's army, and notorious in English history for his daring attempt on the life of the duke of Ormond, and for his theft of the crown and regalia from the Tower. For some reason, never yet explained, this desperate was not only pardoned by Charles II., but received from him a pension of £500 per annum. Died, 1680.

BLOOMFIELD, ROBERT, an English poet, was the son of a poor tailor at Honington, Suffolk, and was himself a shoemaker. His principal work is a poem, entitled "The Farmer's Boy," which pleasingly depicts the scenes the author had witnessed while in that humble station, and displays considerable genius; his subsequent publications, mostly short descriptive poems or lyrics, not rising above the level of rural and familiar life, still charm by their sincerity and simplicity. The "Farmer's Boy" obtained very great popularity, and was translated into French and Italian, and even, by an English scholar, into Latin. Although brought forward and patronized by Capel Loft and the duke of Grafton, the modest poet had a large share of the ills which flesh is heir to, and his latter years were embittered by want, ill-health, and consequent dejection. Born, 1766; died, 1823.

BLOUNT, Sir HENRY, a traveller through Turkey, Syria, and Egypt; author of a "Voyage to the Levant." He was knighted by Charles I., whose cause he supported through the civil war, and was afterwards employed by Cromwell on some important affairs, and was rewarded with a commissionership of trade. Born, 1602; died, 1682.

BLOUNT, Sir THOMAS POPE, bart., eldest son of the above; member of several parliaments, and appointed commissioner of accounts at the revolution; author of "Censura celebriorum Auctorum," &c. Born, 1649; died, 1697.

BLOUNT, CHARLES, youngest brother of the preceding, was born in 1651. He attained great notoriety by a series of attacks on revealed religion and popular beliefs. His most celebrated work was "The two first books of Philostratus concerning the Life of Apollonius of Tyana," which appeared in 1680. He wrote an excellent treatise on the Liberty of the Press, "Anima Mundi," "Great is Diana of the Ephesians," &c. Maddened by the refusal of his deceased wife's sister to marry him, he shot himself, 1693.

BLOW, JOHN (Mus. D.), an English musician and composer of great ability; author of anthems, services, &c. and of some secular compositions, which are published collectively under the title of "Amphion Anglicus." Died, 1708.

BLUCHER, Field-marshal LEBRECHT VON, a distinguished Prussian general, whose impetuous intrepidity and eagerness to attack the enemy gained him the familiar appellation of "Marshal Forward." He entered the Swedish service when quite a youth, and in the first campaign was made prisoner by the Prussians, whom he afterwards joined, and rose to the rank of captain; but being discontented with the promotion of other officers over his head, he obtained his discharge from the Great Tre-

derick who dismissed him with the pithy remark, that "he might go to the devil if he pleased," and he afterwards lived many years in retirement. Being recalled by his successor, King Frederick William, he was made major-general after the battle of Leystadt, in 1794; and commanded the cavalry at the battle of Jena, which decided for a time the fate of the Prussian monarchy. When Prussia entered into the coalition against Napoleon, in 1813, our hero, then 70 years old, was made general of the centre of the allied army; distinguished himself at Lützen and Leipzig, pursued the flying French across the Rhine, and, after a year of obstinate conflict in France, headed the right wing of the allied army under the walls of Paris, at the time of Napoleon's abdication in 1814. In England, which he visited with the allied sovereigns, he was received with enthusiasm. Being re-invested with the command of the Prussian army during the Hundred Days, he was defeated by Napoleon at Ligny, on June 16, 1815; on which occasion he was unhorsed, and charged over by both the French and Prussian cavalry. Marshal Grouchy was commissioned by Napoleon to push Blücher's retreat, and check his junction with the British army, which Wellington required. But having deceived Grouchy, by leaving a body of his troops to mask the operation, he retrograded unmolested, by a skilful and dangerous flank movement; and his advanced division, under Bulow, arrived at Waterloo at five o'clock, just as the whole reserved *Elite* of the French army was advancing in dense column to make their last desperate effort to break through the British squares. This fresh flank attack on the advancing column contributed greatly to decide the victory, and Blücher arrived in time to participate in the pursuit. Blücher's conduct afterwards was generally pronounced by the liberals at Paris, especially as regarded the bridge of Jena and the spoliation of the Museum, vindictive and illiberal; but it could not be expected that he should have had any regard for the glories of the French capital. He was a rough and fearless soldier; brave, honest, and free; beloved by his comrades, and a sworn foe to the enemies of his country. Born at Rostock, 1742; died, at his estate in Silesia, 1819, aged 77.

BLUM, ROBERT, German politician, member of the parliament of Frankfort, was born at Cologne in 1807. His thirst for knowledge showed itself from his earliest years, and notwithstanding the pressure of difficulties and hardships, he made considerable attainments, and in 1832 became conductor of several journals at Leipzig. He distinguished himself as an earnest opponent of the superstition displayed in connection with the Holy Coat of Treves, in 1841. But it was not till 1848 that he became known as a politician. In March of that year he was elected member of the parliament of Frankfort, in which he was leader of the party of the Left. On the breaking out of the insurrection at Vienna in October he hastened thither to support the movement by his eloquence. He was, however, soon arrested by the Austrian government, tried by

court martial, and shot. His death caused a profound sensation not only in Germany, but throughout Europe.

BLUMAUER, ALOYS, a German satirical poet; author of a "Travesty of the *Æneid*," &c. Born, 1755; died, 1798.

BLUMENBACH, JOHANN FRIEDRICH, a distinguished German physiologist and comparative anatomist, was born at Gotha in 1752. He became professor of medicine, librarian and keeper of the museum, at the university of Göttingen, in 1778. He made two visits to England, and was admitted to the French Academy of Sciences. His principal works are "Institutiones Physiologicæ," which was translated into English by Dr Elliotson; "Handbuch der vergleichenden Anatomie;" an essay on the Varieties of the Human Race; and works on Embryology and the Bones of the Human Body. He also published a description of the large collection he had formed of skulls of different races. Died, 1810.

BOARDIL, or ABOUAHOULA, the last Moorish king of Granada; he was expelled for the last time from Granada by Ferdinand of Castile and Aragon, in 1491; and afterwards lived in Africa, where he was killed in battle in the service of the king of Fez.

BOADEN, JAMES, dramatic author and critic. His plays are numerous, but we believe there is not one of them that now keeps possession of the stage. Far more important are his dramatic memoirs. In them he has left, probably, the best record that the world can now hope to have of John Kemble, Mrs Siddons, Mrs Jordan, and Mrs Inchbald. His "Inquiry into the Authenticity of the various Pictures and Prints of Shakespeare," and a tract on "the Sonnets of Shakspeare," are also valuable works. Born, 1762; died, 1839.

BOADICEA, or BOUDICEA, a British heroine, the widow of Prasutagus, and queen of the Iceni. Having been ignominiously treated by the Romans, she headed an insurrection against them, attacked their settlements, and reduced London to ashes; but being at length utterly defeated by Suetonius Paulinus, she is said by Tacitus to have put an end to her life by poison, A.D. 61.

BOCCACIO, GIOVANNI, the celebrated Italian novelist, was the son of a Florentine merchant, but was born at Paris, in 1313. His passion for literature led him to abandon first commerce and next the study of law. He spent some years at Naples, and while there, in 1341, fell in love with a beautiful girl, a natural daughter of the king of Naples, for whom he wrote several of his works, and whom he named "Fiammetta." He was afterwards patronized by Queen Joanna, and for her as much as for his "Fiammetta" is said to have written his chief work, the "Decamerone." On his father's death he returned to Florence, where he was greatly honoured, and sent on several public embassies. Amongst others, he was sent to Padua to communicate to Petrarch the tidings of his recall to Florence. He gained the friendship of the illustrious poet, and enjoyed it through life. Boccaccio

His death caused only in Germany,

a German satirical style of the Æneid," 1788.

ANN FRIEDRICH, a physiologist and composer, born at Gotha in 1778. He made himself admitted to the sciences. His institutions Physiological into English (Buch der Verdauung) an essay on the Vaccine; and works on the Human Body formed of skulls, 1840.

ABOUFA, the last in a; he was expelled from Granada by Ferdinand, in 1491; and Africa, where he was in the service of the king of

amatic author and numerous, but few of them that now remain. Far more dramatic memoirs. Inably, the best record now hope to have of Mrs Jordan, and inquiry into the Arts Pictures and Prints a tract on "the Sonnets" also valuable, 1839.

UDICEA, a British of Prasutagus, and having been ignominiously, she headed them, attacked reduced London to length utterly defeated she is said by Tacitus to her life by poison.

NNI, the celebrated son of a Florentine in Paris, in 1313, are led him to abandon next the study of years at Naples, and fell in love with a young daughter of the whom he wrote several m he named "Flammarion" patronized by her as much as for old to have written his "Decamerone." On his returned to Florence, honoured, and sent on his. Amongst others, a to communicate of his recall to Florence. ship of the illustrious through life. Boccaccio,

like Petrarch, contributed greatly to the revival of the study of classical literature, spent much time and money in collecting manuscripts, and was the first to bring into Italy from Greece copies of the Illud and the Odyssey. A solemn message from a dying monk, about 1361, deeply impressed Boccaccio, and led to a remarkable reformation in his manner of life. He was chosen by the Florentines to occupy the chair which was established in 1373, for the exposition of the "Divina Commedia." In the following year he had to mourn the loss of his master and friend Petrarch; and after some months of broken health, he died at Certaldo, in December, 1375. The "Decamerone," on which his fame rests, is a collection of a hundred tales, full of liveliness and humour, but often licentious and indecent. The book was published about 1352, and after two centuries was condemned by two popes and by the Council of Trent, and attempts were made to improve and purify it, but unsuccessfully. Boccaccio wrote "La Teseide," imitated by Chaucer, and several other poems and romances, besides many works in Latin.

BOCCAGE, MARIA ANNE DU PERDU, a French poetess; author of "Paradis," &c. She was much praised by her contemporaries, yet she was little more than a clever versifier, and her works are imitations or translations. Born, 1710; died, 1802.

BOCCALINI, TRAJANO, an Italian satirist; author of the "Political Touchstone," a Satire on the Spanish government, &c. His writings gave much offence to the Spanish court, but there is no ground for the story that it caused him to be murdered. He died at Venice, 1613.

BOCCHERINI, LUIGI, a celebrated Italian musical composer, pensioned for his merit by the king of Prussia, and patronized by the king of Spain. Born, 1740; died, 1805.

BOCCOLD, JOHN. (LEYDEN, JOHN of.) BOCHART, SAMUEL, a French Protestant theologian, was born at Rouen in 1559, studied at Sedan and Leyden, and became pastor at Caen. He obtained much reputation by his public conference with the Jesuit Veron in 1629. He visited Stockholm with Huet in 1652, on the invitation of Queen Christina, and died at Caen in 1661. He wrote several learned works, among which are,—"De Paradiso Terrestri," "Geographia Sacra," and "Hierozoicon."

BODE, CHRISTOPH AUGUST, a learned German linguist and critic; who edited the New Testament in Ethiopic, all the Evangelists in Persian, St Matthew in Arabic, &c. Born, 1723; died, 1798.

BODE, JOHANN ELERT, a German astronomer, was born at Hamburg in 1747. At an early age he became assistant to Ilusch, and in 1772 was called to Berlin by Frederick II. One of his best works is the "Anleitung zur Kenntniss des gestirnten Himmels," which appeared in 1768, and has passed through more than twenty editions. He published also a Celestial Atlas, Astronomical Annals, &c., and was a member of the principal scientific societies of Europe. The so-called "law of the planetary distances," usually called "Bode's law," was first sug-

gested by Professor Titius, of Wittenberg. Died, 1826.

BODE, JOHANN JOACHIM CHRISTOPH, a German miscellaneous writer and translator, born at Brunswick, 1730. He was originally a musician in a Hanoverian regiment; he then became a bookseller, and finally rose to be privy councillor to the Landgrave of Hesse Darmstadt. He translated into German, Sterne's "Tristram Shandy" and "Sentimental Journey," Fielding's "Tom Jones," Goldsmith's "Vicar of Wakefield," Montaigne's "Essays," &c., with considerable taste and judgment. Died, 1793.

BODLEY, Sir THOMAS, a native of Exeter, and educated partly at Geneva and partly at Oxford. He was on several occasions employed on embassies by Queen Elizabeth, and was ambassador at the Hague about nine years; but he is chiefly remembered for having rebuilt the University Library of Oxford, and bequeathed his fortune to its support and augmentation; whence it is called the Bodleian Library. He was knighted by James I. Born, 1544; died, 1612.

BODMER, JOHANN JACOB, critic and historian, was born at Zürich in 1698. He is distinguished for the part he took in conjunction with his friend Breitinger, in exposing the artificial and lifeless state of German literature in his time. The controversy which he thus gave rise to, in which Gottsched, then held as the patriarch of German literature, obstinately opposed him, led the way to a thorough reformation, and the rise of a real living, national literature. He was appointed professor of history at Zürich in 1725, and held the chair for 50 years. He published two collections of the "Minnesinger," translated Homer and Milton into German, and wrote a poem entitled the "Nonchide." Died, 1783.

BODONI, GIOVANNI BATTISTA, the celebrated Italian printer, was born at Saluzzo in 1740. At the age of 18 he went to Rome, and got employment in the printing-office of the Propaganda. He mastered several oriental languages, and acquitted himself well of the tasks entrusted to him. Sorrow for the loss of his friend Ruggieri, the head of the office, who committed suicide, drove him from Rome. In 1768 he settled at Parma, and gained wide reputation by the beautiful works that issued from his press. In 1789 he was invited to Rome, but the duke of Parma, to detain him, allowed him to set up his press in the palace. From that dual printing-office were sent forth the magnificent editions of Horace, Virgil, Tacitus, Tasso, and last of all, Homer, on which his fame chiefly rests. He presented, in 1810, a copy of the Homer, printed on vellum, to Napoleon at St Cloud. He refused all invitations to quit Parma, and died there in 1813.

BOECE, HECTOR, or BOETHIUS, a Scottish historian, born at Dundee about 1465. He was educated at Aberdeen and the university of Paris, held the chair of philosophy at the latter, and was afterwards principal of King's College, Aberdeen. He was a correspondent of Erasmus. He wrote a "History of Scotland" in Latin, which

appeared in 1526, and obtained him a pension from the king; and "Lives of the Bishops of Aberdeen." The History is praised more for its style than for its matter, the author sharing in the credulity of his age. Died, about 1536.

BOEHM, or BOEHMEN, JACOB, the celebrated German theosophist, was born in 1575. He was apprenticed to a shoemaker, and settled to practise his trade at Görlitz. He was of a serious and truthful disposition, studied the Scriptures diligently, acquired some notions of chemistry and natural science, saw visions, as he believed, and in his numerous writings gave utterance to many profound spiritual truths mixed with much that was eccentric and extravagant. He gained many disciples, and was the object of persecution by the clergy. His first work, "Aurora," appeared in 1612. Among his other works are "De tribus Principiis," "Threefold Life of Man," "De signatura Rerum," "Mysterium Magnum," &c. In England his views were adopted by John Pordage, and to some extent by Henry More. His works have been frequently republished. Died, 1621.

BOERHAAVE, HERMANN, the great physician, was born near Leyden in 1668. He was educated at the university of Leyden, and was destined by his father for the church; but at the age of 22 he applied himself to the study of medicine under Drelincourt. He began lecturing in 1701, and was eight years later appointed professor of medicine and botany. The chairs of practical medicine and chemistry were afterwards assigned to him, and he filled them with the greatest distinction. He became rector of the university, and was admitted to the French Academy of Sciences, and in 1730 to the Royal Society of London. He enjoyed a reputation almost unparalleled, his system was generally adopted, and patients went or wrote to him from all parts of Europe. His character was without a stain, and the esteem of his fellow-townsmen was strikingly shown on his recovery from a serious illness in 1723, by a general illumination. His fame rests principally on his "Institutiones Medice," published in 1708, translated into all European languages and into Arabic, and commented on by Haller; and his "Aphorismi de cognoscendis et curandis morbis," also translated as widely and commented on by Van Swieten. Among his other works are "Index Plantarum quæ in horto academico Lugduno-Batavo reperiuntur," and several fine orations and discourses. Died, 23rd September, 1738.

BOETHIUS, ANICIUS MANLIUS TORQUATUS SEVERINUS, a Roman philosopher, whose virtues, services, honours, and tragical end, all combine to render his name memorable, was born A.D. 470; studied at Rome and Athens; was profoundly learned; and filled the highest offices under the government of Theodoric the Goth. He was three times consul, and was long the oracle of his sovereign and the idol of the people; but his strict integrity and inflexible justice raised up enemies in those who loved extortion and oppression, and he at last fell

a victim to their machinations. He was falsely accused of a treasonable correspondence with the court of Constantinople, and after a long and rigorous confinement at Pavia, was executed in 524. His "Consolations of Philosophy," written in prison, abounds in the loftiest sentiments clothed in the most fascinating language. This treatise was one of the most widely read books in the middle ages, and has been translated into many languages. Alfred the Great translated it into Saxon.

BOETTCHER, JOHANN FRIEDRICH, an alchemist, who, in making vain alchemical attempts, was fortunate enough to discover, about 1702, the mode of making the famed and valued Dresden porcelain. Died at Meissen, 1719.

BOGDANOVICH, HIPPOLYTUS THEODOROVICH, a Russian poet; editor of the St Petersburg Courier, and author of "Dushenka," a romantic poem; "Historical Picture of Russia," &c. He filled various official situations under the government of Catharine, and was also employed as a diplomatist. Born, 1743; died, 1803.

BOGUE, DAVID, a dissenting minister of considerable acquirements; pastor of a congregation at Gosport, Hants, where he also directed the education of young men destined for the Christian ministry, in connection with the Independents. He is considered as the father of the London Missionary Society, and he also contributed greatly to the formation of the British and Foreign Bible Society. He wrote an "Essay on the Divine Authority of the New Testament," a "History of the Dissenters," &c. Born, 1749; died, 1825.

BOHEMOND, first prince of Antioch, was son of Robert Guiscard, and distinguished himself in the first crusade in 1096. He besieged and took Antioch, and was made prince. Besieged by the Saracens, he completely defeated them; but soon after was captured, and remained their prisoner two years. He subsequently visited Europe, married a daughter of the king of France, and got the emperor to acknowledge his title. Died in Italy, 1111.

BOHLEN, PETER VON, a German Orientalist, was born in 1796. He was born of poor parents, and grew up without education, but after passing through a series of strange vicissitudes, he became a student at the Johanneum at Hamburg, and afterwards at Halle, Bonn, and Berlin. He was then appointed to teach the oriental languages at the university of Königsberg, where he was named professor in 1828. He visited England twice, and after his second visit did not return to his post on account of failing health. He was author of "Das alte Indien mit besonderer Rücksicht auf Aegypten," of a commentary on the Arabian poet Motenabbi, &c. He also wrote several articles on oriental subjects for the "Penny Cyclopaedia." Died, at Halle, 1840.

BOHUN, EDMUND, a political writer of note in the reigns of James II. and William III.; author of a "Defence of King Charles II.'s Declaration," a "Geographical Dictionary," "Life of Bishop Jewell," &c. He was living at the accession of Queen Anne;

but the exact date of his death is uncertain.

BOIARDO, MATTEO MARA, count of Scandiano and governor of Reggio; author of "Orlando Innamorato," one of the most celebrated poems in Italian literature, the first of a new class, the romantic epic, and the model of Ariosto's greater sequel, "Orlando Furioso." The poem was recast by Berni. Boiardo was author of several other poems in Italian and Latin, and made some translations from the Greek and Latin classics. Born, 1434; died, 1494.

BOICHOT, GUILLEAUME, a distinguished French sculptor; born in 1738, died in 1814. The Colossal Group of Salut Michael and the "Seated Hercules" are among his best works. The bas-reliefs on the Triumphal Arch of the Carrousel are his.

BOIELDIEU, ADRIEN, a celebrated French musical composer, born in 1775; author of numerous well-known operas; "Le Calife de Bagdad," "Jean de Paris," &c. "Télémaque" is thought his *chef-d'œuvre*. His style is characterized by a sweet and natural melody, much imaginative gaiety, and simple but pleasing accompaniments. Boieldieu was a member of the Institute. Died, 1834.

BOIGNE, Count de, a French soldier of fortune, was born at Chambéry, in 1751. When 17 years old, he entered the French army, which he quitted for the Russian service in about five years, and was taken prisoner at the siege of Tentos. After being released he left Russia, and in 1778 passed into the service of the East India Company; but fancying himself neglected, he offered himself to the notice of Mahajee Scindiah, the celebrated prince of the Maharrattas, to whom he was of the greatest service during his campaigns, and who loaded him with honours and riches. Having remitted his vast fortune to England, and wishing to return to Europe for the sake of his health, he left India in 1795, and settled at Chambéry, where he did much good, applying his money to benevolent and patriotic purposes. Died in 1830.

BOILEAU, NICOLAS, sieur Despréaux, the celebrated French poet and critic, was born in 1636. He was brought up to the law, but quitted it for literature. He vigorously attacked the bad taste of the age, and his satires had immense success. A pension was given him, and he was associated with Racine as historiographer to Louis XIV. He spent the last few years of his life in retirement, displaying great fortitude under ill health and the infirmities of age, and died in 1711. His poems consist of "Satires," "Epistles," the "Art of Poetry," &c. Pope was much indebted to Boileau in some of his poems.

BOISROBERT, FRANÇOIS LE METEL DE, a French abbot, celebrated for his wit, and patronized by Richelieu. His poems, plays, tales, &c., are numerous. Died, 1662.

BOISSY D'ANGLAS, FRANÇOIS ANTOINE, Count de, a distinguished French senator and literary character, and a man who throughout the revolutionary frenzy constantly displayed great firmness and a disinterested love of liberty. He was deputy to the States-General in 1789, member of the

National Convention, of the Committee of Public Safety, and the Council of Five Hundred. His courage and presence of mind were particularly displayed on occasion of the irruption of the mob into the hall of the Convention in May, 1795. He took his place in the president's chair after it had been twice vacated, and calmly kept it, undisturbed by the sight of muskets levelled at him, and of the bleeding head of his murdered colleague Féraud. Boissy d'Anglas was chosen president of the tribunate in 1803. By Napoleon he was made a senator and commander of the Legion of Honour; and in 1811 Louis XVIII. created him a peer; but he was, for a time only, deprived of his title, in consequence of his recognition of the emperor on his return from Elba. His writings are on various subjects; among them are "The Literary and Political Studies of an Old Man," an "Essay on the Life of Malsherbes," &c. Born, 1756; died, 1826.

BOISTE, P. C. V., a French lexicographer, born in 1763; author of several valuable dictionaries. The name Buonaparte following the article "Spollateur," in his "Dictionnaire Universel de la langue française," he was compelled by the police to substitute for it the name of Frederick the Great.

BOIZOT, LOUIS SIMON, born in 1713; a French painter and sculptor, but more distinguished as the latter. The "Victory of the Fountain of the Place du Chatlet" is his *chef-d'œuvre*.

BOI, FERDINAND, a Dutch historical and portrait painter, pupil of Rembrandt. Born, 1611; died, 1681.

BOLESLAUS I., became duke of Poland in 992 or 999; had his dukedom raised to a kingdom by the emperor Otho III., and made Moravia tributary to his kingdom. Died, 1025.

BOLESLAUS II., king of Poland, son and successor of Casimir I. In consequence of the severity with which he treated his subjects during a revolt, chiefly caused by his long absence in Russia, and the consequent infidelity of the wives of his soldiers, he was driven away by his subjects, and died in Hungary, 1083.

BOLEYN, or BULLEN, ANNE, queen of Henry VIII., was daughter of Sir Thomas Bullen (afterwards earl of Wiltshire), and was born in 1507. After a residence of some years at the French court, she became maid of honour to Katherine, queen of Henry VIII., and soon attracted the admiration of the king. In 1532 she was made marchioness of Pembroke, and in the following year married to Henry and crowned queen. In 1536 charges of conjugal infidelity were brought against her, on which she was tried and beheaded, May 19, 1536. Anne Boleyn was a promoter of the reformation, and the king's determination to marry her was the occasion of the final separation of England from the Catholic church. She was the mother of Queen Elizabeth.

BOLINGBROKE, HENRY ST JOHN, Viscount, a distinguished statesman and political writer, was born at Battersea, in 1672, and completed his studies at Oxford. He entered parliament in 1700, became secre-

tary at war in 1704; resigned his office in 1708; again formed part of the ministry in 1710, and concluded the peace of Utrecht. In 1712 he was created Viscount Hologbrooke; but, dissatisfied that he had not been raised to an earldom, he quarrelled with his colleagues, effected the dismissal of Harley, and got himself appointed prime minister. The death of Queen Anne, however, took place a few days afterwards. The Whigs having gained the ascendancy on the accession of George I., preparations were made for the impeachment of Hologbrooke, who had fled to France, and being invited to Lorraine by James Edward, the Pretender, he became his secretary of state. For this he was impeached and attainted; and it was not till 1723 that he was allowed to return to England. His estates were restored to him in 1725, but his seat in the House of Lords was still denied him: this raised his indignation; and he exerted all his talents against the ministry, till at length the overthrow of Sir Robert Walpole was effected. In 1735 he again withdrew to France, where he remained till the death of his father; after which event he settled at Battersea, and died, in 1751, after a long and painful disease, in his 80th year. He was the intimate friend of Pope, Swift, and other eminent authors of the time, and his own writings rank among the most eloquent and polished in style in the English language. A collected edition of them was published by David Mallet three years after the death of the author. As a man Hologbrooke was selfish, proud, and profligate; as a politician, merely ambitious and unprincipled; and as a writer, showy, superficial, and untrustworthy. The shallow and impotent attacks on Christianity made by such a man have little interest or importance in the presence of the earnest controversies on matters pertaining to religion, in the midst of which we are living. A new Life of Hologbrooke has been recently published by Mr Macneight.

BOLIVAR, SIMON, the celebrated Liberator of South America was born of noble parents at Caraccas, in 1783. Having acquired the elements of a liberal education at home, he was sent to Madrid to complete his studies; and afterwards visited Paris, where he formed an acquaintance with several distinguished men. He made the tour of Southern Europe, again visited the Spanish capital, and married the daughter of the Marquis de Ustariz del Cro; but soon after his return to his native land his youthful bride fell a victim to the yellow fever; and, as a relief to his sorrow, he once more visited Europe. On returning to South America, in 1810, he pledged himself to the cause of independence, and commenced his military career at Venezuela, as a colonel in the service of the newly founded republic. In 1811 he served under Miranda, and had the command of Puerto Cabello; but the Spanish prisoners having risen and seized the fort, he was obliged to quit the town. At length Miranda was compelled to submit to Monteverde, the Royalist general; and Bolivar, entering the service of the patriots of New Grenada, soon had another opportunity of

assisting his old friends the Venezuelans. For a while he was successful, but reverses followed; and when, in 1815, the Spanish forces under Morillo arrived, he threw himself into Carthagena, and subsequently retreated to St Domingo. The spirit of resistance was, however, not extinguished; and after many desperate conflicts the independence of Columbia was sealed, and Bolivar was chosen president of the republic, in 1821. Every act of his government showed how zealously alive he was to the improvement of the national institutions and the moral elevation of the people. In 1823 he went to the assistance of the Peruvians, succeeded in establishing their independence, and was proclaimed Liberator of Peru, and invested with supreme authority. In 1825 he visited Upper Peru, which detached itself from the government of Buenos Ayres, and was formed into a new republic, named *Bolivia*, in honour of the Liberator, but domestic factions sprang up, the purity of his motives was called in question, and he was charged with aiming at a perpetual dictatorship; he accordingly declared his determination to resign his power, and to retire to his patrimonial estate. The vice-president, Santander, urged him to resume his station as constitutional president; and though he was beset by rival factions, he continued to exercise the chief authority in Columbia till May, 1830. The people ere long became sensible of their injustice, and were solliciting him to resume the government, when his death took place, in December, 1830. In person he was thin, and somewhat below the middle size, but capable of great endurance; his complexion sallow, and his eyes dark and penetrating. His intellect was of the highest order, and his general character of that ardent, lofty cast, which is so well calculated to take the lead among a people escaping from the yoke of tyranny.

HOLLANDUS, JOHN, Jesuit, was born in Belgium in 1596. He is celebrated as the first in the long series of compilers of the voluminous "Acta Sanctorum." The work was projected by Father Roswelda, on whose death, in 1629, it was undertaken by Hollandus. He was afterwards assisted by Henschen and Papebroch. The first five volumes appeared in the life-time of Hollandus, and include the lives of the saints of the months of January and February. The work was continued with some interruptions till 1791, and consists of 52 vols. folio. The continuators are named the Bollandists. A new edition of this immense work is now (1865) in course of publication in France.

BOLOGNA, JOHN OF, one of the most celebrated sculptors of his age, was born at Douai, probably in 1530, or a little later. He went young to Rome, became acquainted with Michael Angelo, and was employed by the Cardinal de Medicis. He afterwards lived chiefly at Florence. Among his masterpieces are reckoned the "Neptune" of the fountain at Bologna, "Mercury," and the "Rape of the Sabinas." He was the intimate friend of Vasari, and one of the first members of the Academy of Florence. Died there, 1608. A group of "Samson killing a

BOLOGNESE, D. [GRIMALDI, FRANCESCO.]

BOLSWERT, SCHELDT, an engraver of the 17th century, a native of Eriesland, but who passed most of his life in Antwerp; distinguished for the excellence of his engravings after Rubens and Vandyck.

BOMBELLI, RAPHAEL, a celebrated algebraist of the 16th century, and the first who invented a uniform method of working equations.

BOMBELLI, SEBASTIANO, an eminent Bolognese historical and portrait painter. Born, 1635; died, about 1716.

BOMBERG, DANIEL, a celebrated printer of the 16th century, was a native of Antwerp, but settled early at Venice. He there published a Hebrew Bible in four volumes folio, a Hebrew Concordance, and the Babylonian Talmud, all greatly esteemed for their accuracy and the beauty of the typography. Died, 1519.

BONASONI, GIULIO, a Bolognese painter and engraver of the 16th century. In the latter capacity he especially excelled; and he engraved many of the chief d'œuvres of Michael Angelo, Raffaele, &c., in a style of great beauty.

BONAVENTURA, ST. or GIOVANNI FIDENZA, surnamed "DOCTOR SERAPHICUS," was born in Tuscanry in 1221. He entered the Franciscan order, studied at Paris, and after some disputes with the university, in which Aquinas also took part, was made doctor in theology, and lecturer in philosophy and theology. In 1256 he was chosen general of his order, and both by word and example re-established discipline in it. He was created cardinal by Gregory X., who had been raised to the papal see by his influence. He wrote commentaries on Lombard, master of the Sentences, and many devotional works. Dissatisfied with speculation and philosophy, he became at last a mystic. His writings were highly esteemed by Luther. Died, while attending the Council of Lyons, 1274.

BONCERF, PIERRE FRANÇOIS, born in 1745; author of the famous pamphlet, "Les Inconvéniens des Droits Feodaux," written while he was secretary to Turgot. Condemned to be burnt, it became the basis of the fundamental decrees of the constituent assembly of 1789. Having been in the service of Egalité, he narrowly escaped the guillotine by one vote, and died from the shock he then sustained.

BONCHAMP, ARTHUR DE, a celebrated general of the Vendean royalists, who had served with distinction as an officer in the American war. In him humanity was not less conspicuous than valour, as the last act of his life amply testified; for it was by his interference that 3000 prisoners, whom the exasperated royalists had taken, were saved from instant death. He was mortally wounded in the battle of Chollet, 1793.

BONE, HENRY, an eminent artist, celebrated for his skill in enamel painting, was born at Truro, in 1755. On coming to London, he was for many years engaged in painting devices in enamel for jewellery; but he subsequently attained the highest excellence

as a miniature portrait painter on ivory and in enamel. Continuing to rise in public estimation, Bone carried his art to the utmost perfection, increasing the size of his plates beyond anything which had before been attempted, and executing in enamel several copies of pictures by the first masters; one of which, Titian's "Jacchus and Ariadne," he painted on a plate 18 inches by 16, and sold it for 2200 guineas. Among his most munificent patrons was the duke of Bedford, for whom he executed a series of portraits of the Russell family from the reign of Henry VIII. to the present time. He closed a long life of persevering industry and integrity in December, 1834.

BONER, ULRICH, the most ancient German fabulist, was a Dominican friar of Herne, in the 11th century. He published his fables under the title of "Der Edelstein" (The Gem).

BONET, or BONNET, THÉOPHILE, a French physician, was born at Geneva in 1620. He shares with Morgagni the honour of founding the science of pathological anatomy. His best works are the "Pluvis Medicorum," several times reprinted with a changed title, and "Sepulchretum, seu Anatomica Practica," in two vols. folio. Died, 1689.

BONIFACE, ST. the Apostle of Germany, was born in England about 680. He became a monk, but under the sanction of Pope Gregory II. he went about 716 to Germany, and there devoted himself for the rest of his life to the task of Christianizing the uncivilized tribes; not without great success. He founded churches, schools, and monasteries, and reclaimed vast tracts of waste, and brought them into cultivation. He was massacred with a band of his converts by the barbarians in 755.

BONIFACE VIII. Pope, **BENEDETTO GAETANO**, was born at Anagni, was made cardinal in 1281, and became pope on the abdication of Celestine V. in 1294. His pontificate was a very troubled one, owing to his determined assertion of papal supremacy over all princes and his interference in political affairs. By his famous bull "Clericis laicos," against taxation of the clergy without consent of the pope, he excited great agitation in France. He quarrelled with the noble family of Colonna, excommunicated and proclaimed a crusade against them and their partisans. He mediated successfully between Philip the Fair of France and Edward I. of England; but soon after, by a bull of excessive pretensions, provoked the famous quarrel with Philip, who burnt the bull. The French demanded a Council, and the pope published other bulls: till at last Philip had him arrested at Anagni by William of Nogaret at the head of a body of troops. [NOGARET, WILLIAM OF.] The citizens of Anagni rescued him a few days after, and he set out for Rome, but died on the way, 1303. It was Boniface VIII. who, in 1300, established the Jubilee.

BONIVARD, FRANÇOIS DE, was born in France in 1496. He became prior of St Victor near Geneva, and acted a prominent part in the support of the republic of Geneva against the tyranny of the Prince-bishop,

and the aggression of the duke of Savoy. He was the friend of Berthelier and other noble supporters of freedom, and negotiated the treaty of fellow-citizenship between Friburg and Geneva. He was twice imprisoned by the duke of Savoy, the second time in the castle of Chillon. His misfortunes are celebrated in Byron's well-known poem. Bonivard was a scholar as well as a politician, and formed a valuable library. This he gave to Geneva, and it was the basis of the public library of the city. Died, probably in 1570.

BONNER, EDMUND, bishop of London, was born in Worcester, about 1495. He studied at Oxford, and became chaplain to Cardinal Wolsey, whom he attended till his fall. He then entered the service of Henry VIII., aided Cromwell in the work of reformation, took an active part in the matter of the king's divorce, and was sent on embassies to the pope, the emperor Charles V., and the king of France. In 1538 he was named bishop of Hereford, but before consecration was translated to London. In the reign of Edward VI. Bonner became the opponent of Cranmer and the reformation, and was imprisoned and deprived. Restored by Queen Mary, he distinguished himself by his zeal in persecuting and burning "heretics," and earned the odium and abhorrence of the people. He refused to take the oath of supremacy on the accession of Queen Elizabeth, and was again deprived and imprisoned. Died, in the Marshalsea, 1569.

BONNET, CHARLES, a Genevese naturalist and philosopher, was born in 1720. He was trained for the law, but was attracted by the works of Réaumur to the study of natural history. He became a member of the council of state in 1752. His sight failing, he was unable to continue his microscopic studies, and applied himself to more general subjects of philosophy and religion. His chief works are "Traité d'insectologie," "De l'usage des feuilles dans les Plantes," "Contemplation de la nature," "Palingénésie philosophique," and "Recherches philosophiques sur les preuves du Christianisme." Died at Geneva, 1793.

BONNINGTON, RICHARD PARKES, a British artist of great merit and of singular precocity. At three years old he could sketch most of the objects he saw, and at 15 was admitted to draw in the Louvre at Paris. After visiting Italy he brought back many able specimens of his works, and finished a successful, though brief, career at the age of 27, in 1828.

BONNYCASTLE, JOHN, professor of mathematics at the Royal Military Academy, Woolwich; author of "The Scholar's Guide to Arithmetic," "The Elements of Algebra," "A Treatise upon Astronomy," &c. Died, 1821.

BONOMI, JOSEPH, an Italian architect, who settled in London about 1767. He enjoyed the friendship of Sir Joshua Reynolds, and was an associate of the Royal Academy. He built the duke of Argyll's palace at Rosemeath, in Scotland, the Roman Catholic chapel near Manchester Square, &c. Died, 1808.

BONONCINI. [BUONONCINI.]

BONPLAND, AIMÉ, an eminent French

botanist and the personal friend of Alexander von Humboldt, was born at La Rochelle in 1773. He studied medicine at Paris, but gave up the profession and accompanied Humboldt to America. During the five years they spent together there Bonpland made a very large and valuable collection of plants, several thousands of which were new to Europe. On his return to France he was appointed by the empress Josephine director of her gardens of Malmaison, a post which he held till her death, in 1814. He went again to America and became professor of natural history at Buenos Ayres. In 1821, as he was proceeding on a scientific expedition on the Parana, he and his party were seized by order of Francia, then dictator of Paraguay, and he was kept prisoner nearly ten years. He afterwards lived in the south of Brazil. Bonpland was author of "Plantes Equinoxiales recueillies au Mexique," &c. "Description des Plantes Rares de Navarre et de Malmaison," and "Monographie des Melastomées." He was also joint author with Humboldt of several voluminous works on the botany, natural history, and monuments of the New World. Died at Monte Video, 1858.

BONTEMPI, GIOVANNI ANDREA ANGELENTI, an Italian musician of the 17th century; was director of music to the elector of Saxony for 40 years; author of "Nova quatuor Vocibus componendi Methodus," &c. Born, at Perugia, 1630; still living in 1697.

BOOLE, GEORGE, a distinguished mathematician, was born at Lincoln in 1815. He early applied himself to the study of science, and after assisting in a school at Doncaster, established himself as schoolmaster in his native town. He took an active part in founding the Library and Museum of the Mechanics' Institute, and gave lectures and instruction in classics and mathematics to the members. During the same period his contributions to the "Cambridge and Dublin Mathematical Journal" attracted great attention, and his great abilities were shown more conspicuously in his "Mathematical Analysis of Logic." About 1853 he was appointed professor of mathematics at Queen's College, Cork, and soon after received the honorary degree of L.L.D. from the university of Dublin. In 1855 he married a lady of great scientific attainments, who became his excellent collaborateur. Dr Boole was a man of wide culture, an earnest lover of truth, delighting in poetry and metaphysics no less than in his chosen science. His modesty especially distinguished him. His most important works are—"An Investigation of the Laws of Thought," and "Differential Equations." The latter is a class-book at Cambridge. Dr Boole was a fellow of the Royal Society. Died near Cork, in December, 1864.

BOONE, DANIEL, one of the first adventurers who penetrated into the wilds of Kentucky, was born in Virginia, and from his earliest infancy was addicted to hunting in the woods. In 1769 he first set out, in company with a few friends; and after numerous perils and adventures, he founded Boonesborough, the earliest settlement in Kentucky, now a flourishing town, though at that time

a wilderness. He was subsequently taken prisoner by the Indians, but escaped; and, being joined by other adventurers, was enabled to repulse them on several occasions, though neither art nor treachery were left unemployed to take him. At length, in 1798, he removed to Upper Louisiana, where he received a grant from the Spanish authorities of 2000 acres of land for himself, and 800 acres for each of his children, friends, and followers. He then settled with them on the Missouri river, at Charette, some distance beyond the inhabited parts of the country, where he followed his usual course of life—hunting and trapping for bears—until Sept. 1822, when he died, aged 84.

BOOTH, BARTON, an eminent actor, was born in 1681. He was educated at Westminster school and the university of Cambridge, but ran away from the latter to join a company of players. After winning a name at Dublin he was engaged by Betterton at Drury Lane Theatre, where he was very successful. Died, 1733, having lost his reason several years before.

BOOTH, SIR FELIX, bart., an eminent London merchant, who, for his munificent donation of £20,000 for promoting the arctic expedition under Sir John Ross, was raised to a baronetcy, and had his name affixed to the country called Boothia Felix. Died, 1850.

BOOTH, HENRY, earl of Warrington, son of George Booth, Baron Delamere, a zealous royalist during the civil war. Having been among those who voted for the exclusion of the duke of York, he was committed to the Tower when the duke became king, and was tried for high treason, but acquitted, in spite of the efforts of the infamous Jeffreys. On the accession of William III., he was made a privy councillor and chancellor of the exchequer. His efforts to limit the prerogative, however, caused him to fall into disgrace; but he was allowed to retire from office with a pension, and the title of earl of Warrington. Died, 1694.

BORDA, JEAN CHARLES, a French mathematician, born at Dax, in 1733. He served in the army as engineer, and afterwards in the navy, and was captured by the English in 1782, but soon set free. He was the inventor of the "circle of reflexion" and of the "principle of repetition," by which errors of graduation and observation in astronomy are reduced to a minimum. He was engaged some years in the measurement of an arc of the meridian, in conjunction with Méchain and Delambre. Among his works are, "Description et usage du cercle de réflexion," and "Tables trigonométriques décimales." Died, 1799.

BORDE, ANDREW, an English physician; author of "The Merrie Tales of the Madman of Gotham," and several other quaint works. He was at first a Carthusian, but after studying medicine at Montpellier and Oxford, went to London and became first physician to Henry VIII. Died, 1519.

BORDE, JEAN BENJAMIN DE LA, a French miscellaneous writer, born at Paris in 1734. He entered the service of Louis XV., and became a favourite; devoted much of his time to music, which he had studied under

Rameau, and on the death of his master became one of the "farmers-general." He was discovered in his retreat in Normandy by revolutionary agents, and guillotined at Paris in July, 1794. Among his numerous writings are, "Essai sur la musique ancienne et moderne," in four vols. 4to; "Description générale et particulière de la France;" "Tableaux topographiques, &c., de la Suisse," &c.

BORDONE, PARIS, a celebrated Italian painter, was a native of Treviso. He was born in 1500, became a pupil of Titian, and then an imitator of Giorgione, spent some time at the court of Francis I., and painted the king and many of the ladies of the court, and died at Venice, 1571. His chef-d'œuvre is the picture of "The Fisherman presenting the Ring of St Mark to the Doge." Bordone excelled in portraits. There are two of his works in the National Gallery.

BOLLELLI, GIOVANNI ALONSO, an Italian physician and mathematician, was born at Naples, in 1608. He taught mathematics at Messina, and afterwards at Pisa, and enjoyed the patronage of the Grand Duke Ferdinand. Suspected of taking part in the insurrection against the Spaniards at Messina, to which city he had returned, he fled to Rome and lived there under the patronage of Queen Christina of Sweden. He is considered head of the school of "Intro-mathematicians," or those who endeavoured to apply mathematics to the phenomena of living bodies. His principal work, which appeared soon after his death, is the treatise "De Motu Animalium." Died, 1679.

BORGIESE, MARIA PAULINE, Princess, the beautiful sister of Napoleon Buonaparte, was born at Ajaccio, in 1780. Her first husband was General Leclerc, with whom she went to St Domingo, but who died in 1802; she became, in the following year, the wife of the Prince Camillo Borghese. Napoleon was much attached to her; and that her love for him was equally sincere, was manifest on many striking occasions, though she frequently disputed with him, and refused to follow the caprices of his policy. When Napoleon resigned his crown in 1814, and retired to Elba, Pauline left her palace in Rome, and followed him to his place of exile. She lived afterwards, separated from her husband, at Rome, and her house was the centre of a most brilliant circle. When she heard of her brother's illness at St Helena, she repeatedly requested permission to go to him; at length her request was granted, and she was just about to depart, when the news of his death reached her. Died, 1825.

BORGIA, CESARE, son of Pope Alexander VI., was made a cardinal immediately after the election of his father to the papal chair. When Charles VIII. invaded Italy, Cesare was given to him as a hostage by his father, but he escaped, and took part against the French. In 1498 he resigned his dignity of cardinal to become a soldier, and the same year was sent to France with the bull of divorce for Louis XII., who gave him the title of Duke of Valentinois, and promised to aid him in his projected conquests in Italy. He then, at the head of a body of mercenaries,

carried on a series of petty wars, made himself master of the Romagna, attempted unsuccessfully Bologna and Florence, seized Urbino and Cambrino, and was flattering himself with the prospect of success, when the death of Alexander and his own illness put an end to his hopes. Revolt in the Romagna was followed by the arrest of Cesare by Julius II. On his liberation he was arrested again and sent prisoner to Spain. He afterwards served in the army of the king of Navarre, whose sister he had married, and was killed at a siege in 1507. Cesare Borgia was one of the most crafty, cruel, and corrupt men of that corrupt age. No crime was too foul for him to perpetrate or be suspected of. He was charged with the murder of his elder brother, Giovanni, duke of Gandia, and of Alfonso, the husband of Lucrezia; with plotting with his father the murder of Cardinal Corneto by poison, and with incest with his sister. In his wars he had garrisons massacred, and carried off bands of women to gratify his passion.

BORGIA, LUCREZIA, daughter of Pope Alexander VI., and sister to Cesare Borgia, was betrothed early to an Aragonese nobleman, but was given in 1493 to Giovanni Sforza, lord of Pesaro. Alexander annulled the marriage, and married her to a son of the king of Naples, in 1498. Her husband was assassinated two years afterwards, probably by order of her brother Cesare; and in 1501 she was married to Alfonso of Este, son of the duke of Ferrara. She led a decorous life at the court, attracted men of letters thither, and was highly praised by a band of poets. Bembo was her special friend and correspondent. Died, 1523.

BORGIA, ST FRANCESCO DE, third general of the order of Jesuits, was son of Juan de Borgia, duke of Gandia, and was born in 1510. He was page to the Infanta Catherine, sister of Charles V., and was afterwards sent to the court of Charles, who greatly esteemed him, made him marquis of Lombay, and grand quarry to the empress. His naturally serious mind was deeply impressed by the death of the empress, in 1539, and his early desire for the monastic life revived. On the death of his wife, in 1546, he entered the Society of Jesus, having corresponded with Loyola for some time previously. He was ordained priest, and preached in the principal cities of Spain and Portugal, visited Charles V. in the monastery of St Just, and was named one of his executors. In 1565 he succeeded Lainez as general of his order, and by his prudent and zealous administration promoted its growth and prosperity. He died at Rome in 1572; was beatified by Urban VIII., and canonized by Clement IX., in 1671. He left numerous ascetic works.

BORGIA, Cardinal STEPHANO, was a native of Velletri. He had an enthusiastic love for art. It was usual with him to change a valuable piece of plate for some rare article to adorn his museum; and on one occasion, to purchase an Egyptian mummy, he parted with the plate from his table, and the buckles from his shoes. Pius VI. created him cardinal in 1789; and the succeeding pope named him president of the council when the French garrison evacuated Rome.

He was author of a work in support of the papal temporalities. Died, at Lyons, 1804.

BORGOGNONE, AMBROGIO, Italian painter, was a native of Fossano in Piedmont, and was also called Ambrogio da Fossano. Very little is known of his life, except that he painted at Pavia and Milan. He flourished between 1490-1522. There is one fine work of his in the National Gallery.

BORGOGNONE, painter, whose original name was JACOPO CORTESI, or JACQUES COURTOIS, was born in 1621. He was a native of Burgundy, studied painting under his father, and then in Italy, where he stayed with Guido for a time, became a monk, and died at Rome, in 1676. His works are chiefly battle-pieces.

BORIS-GUDENOW, Czar of Russia, successor of Theodore Ivanovich in 1593. Having risen to the head of affairs about twelve years before the death of Theodore, he spared no pains and shrank from no crime to secure his own elevation to the throne. He had professed himself the friend, and had become the favourite of the people, and during the first five years of his reign contributed much to the advance of his empire in civilization. But his philanthropy was the mask of his selfishness, and his government became intolerably cruel. In the midst of the consternation excited by his tyrannies, Russia was invaded by a Polish army, headed by a young monk, who pretended to be Demetrius, the deceased brother of Theodore, and Boris, dreading to fall into the hands of a rival, died suddenly, of poison, it is said, in 1605.

BORLASE, WILLIAM, an English antiquary and naturalist, was a native of Cornwall. He was born in 1696, studied at Oxford, entered the church, and became rector of Ludgvan and vicar of St Just, his native parish. He sent various memoirs to the Royal Society, and was admitted fellow in 1750. He wrote "Observations on the Antiquities, Historical and Monumental, of the County of Cornwall," and the "Natural History of Cornwall." The former was published in 1754, the latter in 1758. Died, 1772.

BOROWLASKI, Count, the celebrated Polish dwarf, who, although less than three feet in height, was of perfect symmetry, and attained the great age of 98. He had been prevailed upon by some of the clergy of Durham, who had casually seen him when on his "travels," 40 years before his death, to take up his abode near that city. He spoke several languages, was generally well informed and witty, and his company was accordingly much courted by the gentry of Durham and its vicinity. Died, Sept. 1837.

BORRI (BURRUS), GIUSEPPE FRANCESCO, an adventurer of the 17th century, born at Milan, 1627, who attracted much notice by his fanatical heresies in religion, and by his pretensions as an alchemist and phisiclan. After a long course of impudent imposture, he was imprisoned, at first in the prison of the Inquisition at Rome, and afterwards in the castle of St Angelo, where he died, 1695.

LO, cardinal, arch-

bishop of Milan, was born of a noble family in the Milanese in 1538. He was nephew to Pope Pius IV., and was made cardinal by him in 1561. After the close of the Council of Trent he was charged, with several prelates, to draw up the epitome of catholic doctrine entitled "Catechismus Tridentinus." On settling in his diocese he applied himself to reform the gross abuses, superstitions, and scandalous practices which had established themselves. A monk of the order of "Umiliati" attempted to assassinate him, and the pope suppressed that order. The beneficence and intrepidity of the archbishop were especially shown on occasion of the terrible plague of Milan, in 1576. Died, 1581. He was canonized by Paul V. in 1610.

BORROMEO, FEDERICO, cardinal, archbishop of Milan, was cousin of the preceding, and was born in 1564. He was created cardinal at the age of 23, and was appointed archbishop of Milan, in 1596. He was distinguished for his learning, and founded the celebrated Ambrosian Library, besides various schools and charities. He was no less distinguished for the energy and fidelity with which he laboured in his ecclesiastical sphere, and especially for his noble services during the famine, and the subsequent plague at Milan. He left several works, and died in 1631.

BORROMINI, FRANCESCO, an Italian architect; the pupil of Maderno, whom he assisted as architect of St Peter's at Rome. His best work is the college of the Propaganda. Died, by his own hand, 1667.

BORY DE SAINT-VINCENT, JEAN BAPTISTE GEORGE MARIE, French naturalist, was born in 1780. At the age of 19 he went to the Mauritius, and made a survey of several neighbouring islands. On his return to France he served for a time in the army, and was on the staff successively of Marshals Davoust, Ney, and Soult. He subsequently conducted scientific expeditions to Greece and some of the adjacent islands, during which he devoted himself to botanical researches; and in 1839 to Algiers. Among his works are "Voyage dans les quatre principales Iles des mers d'Afrique," "Expédition scientifique de Morée," &c. Died, 1846.

BOS, LAMBERT, professor of Greek at Franeker; author of the well-known and valuable work on the Greek eclipses, an excellent edition of the Septuagint, with prolegomena and various readings, &c. Born, 1670; died, 1717.

BOSC, LOUIS AUGUSTE GUILLAUME, French naturalist, born at Paris in 1759. He held a government situation for some years, and was a friend of the minister Roland. In 1793 he lost his place and his friend, but had the courage to accompany Madame Roland to the scaffold. She intrusted to his care her own memoirs. He was a member of various scientific bodies, and wrote numerous memoirs on natural history. He also co-operated in the preparation of several dictionaries, and in the "Histoire Naturelle des coquilles." Died at Paris, in 1828.

BOSCAN-ALMOGAYER, JUAN, a Spanish poet, who first introduced into Spanish the forms of Italian poetry. He lived some time

at the court of Charles V., and was the friend of Garcilaso de la Vega. His works are published with those of Garcilaso. Died, 1514.

BOSCAWEN, EDWARD, British admiral, was born in 1711. He early distinguished himself in the navy, and especially at the siege of Carthage, and at the battle with the French fleet off Cape Finisterre, in 1747. He was sent to India as commander-in-chief the same year; received the thanks of parliament for his capture of two French ships of war, in 1755; commanded the expedition to North America, in 1758, and took Louisbourg; and the next year won a great victory over the French fleet in the bay of Lagos, for which he again received the thanks of parliament and a pension, and was made a privy councillor. Died, 1761.

BOSCH, JEROME, a famous Dutch bibliomaniac; born in 1740, died in 1811. His library catalogue was remarkable for the number of *princeps* editions it contained.

BOSCOVICH, ROGER JOSEPH, mathematician, was born at Ragusa in 1701 or 1711, entered the order of Jesuits, and taught at the Roman College. He afterwards became professor at Pavia, and in 1773 went to Paris, where he held a post under the government. He wrote various mathematical and scientific works; among others "Philosophia naturalis theoria," "Opera pertinentia ad opticam et astronomiam," and a poem "De solis ac lune defectibus," without much poetry in it. He assisted in the measurement of a meridian in Lombardy, and died in 1787.

BOSIO, FRANÇOIS JOSEPH, sculptor, was an Italian by birth, but was brought up and constantly lived in France. He was born in 1769, was a favourite with Napoleon I., Louis XVIII., and the succeeding kings of France, who employed him in many public works. He was admitted to the Institute, and made a Baron. Died, 1845.

BOSSI, GIUSEPPE CARLO LAURELIO, Baron de, an eminent Italian poet, born at Piedmont in 1758. He favoured the French interest on the invasion of Italy, and was rewarded by offices and honours in France by Napoleon. He is chiefly known by his exertions in this country in favour of the Vaudois. Died, 1823.

BOSSU, RENÉ LE, an eminent French critic of the 17th century; author of a "Treatise on Epic Poetry," "Parallel of the Philosophy of Descartes and of Aristotle," &c. Born, 1631; died, 1680.

BOSSUET, JACQUES BENIGNE, bishop of Meaux, and one of the ablest defenders of the doctrines of the church of Rome, was born at Dijon in 1627. After studying in the Jesuits' College there he was sent to Paris, and entered the college of Navarre. He soon gained extraordinary reputation for piety, acquirements, and eloquence; numbered among his friends the great Condé, St Vincent de Paul, and Marshal Schomberg, but continued modest, and faithfully devoted himself to the study of the Bible and the works of St Augustin. Ordained priest in 1652, he retired to Metz, where he held a canonry. The great occupation of his life was controversy with the Protestants, and

he was often successful in his attempts to convert them. The great Turenne was among his converts. In 1669 he was appointed bishop of Condom, but resigned the see on being appointed in the following year preceptor to the Dauphin. He was soon after received at the French Academy, and in 1681 he was raised to the see of Meaux. He took the leading part in the assembly of the clergy, in 1682, respecting the limits of the papal and kingly authority in France, and drew up the famous propositions which thenceforth became a law of the state. The pope had them burnt. Bossuet was engaged for some years in discussing with Leibnitz the possible union of the Lutheran with the Roman church, but without result. In his old age he opposed "Quietism," and prosecuted Madame Guyon; and when Fénelon, his old friend, defended her, he grew angry, exiled Fénelon, and after much controversy got the pope to condemn his book entitled "Maximes des Saints." The writings of Bossuet are very numerous. The most celebrated are his "Exposition de la doctrine catholique," which excited the greatest interest, and was soon translated into the principal languages of Europe; "Histoire des variations des Eglises Protestantes;" "Traité de la connaissance de Dieu et de soi-même;" "Discours sur l'histoire universelle," the first great attempt to view history as a whole, and to trace one divine purpose pervading it; and "La Politique tirée de l'Ecriture Sainte," a vindication of the purest absolutism. The three last-named works were written for the instruction of the Dauphin, and present in a very impressive manner a complete theory of life in antagonism to all modern thought and science. Bossuet was a great master of style, and one of the most powerful of modern writers. Died at Paris, April 12, 1704.

BOSSUT, a celebrated French mathematician, the friend and associate of Condorcet, D'Alembert, Bailly, and Lavoisier. He was admitted to the Academy in 1752, and to the Institute at the time of its foundation. His principal works are the "Cours complet de mathématiques," in seven vols., "Histoire générale des mathématiques," and a volume of "Mémoires de mathématiques." Born, 1730; died, 1814.

BOSWELL, JAMES, the biographer of Dr Johnson, was born at Edinburgh in 1740. After studying law at the Scottish universities he travelled on the continent, indulging as frequently as possible his hankering after personal introduction to eminent men. He accompanied Dr Johnson, to whom he had been introduced on his visit to London in 1763, on a tour to the Hebrides in 1773. About ten years later he settled in London, and was called to the English bar. His celebrated "Life of Johnson" appeared in 1790, five years after his friend's death. It had immense success, has been republished again and again, and still remains for its excellence as a biography incomparable. Boswell had previously published a "Journal of the Tour to the Hebrides." He was also author of various political and professional pamphlets, and "An Account of Cor-

sica, with Memoirs of General Paoli." Died, 1795.

BOSWELL, Sir ALEXANDER, eldest son of the preceding, was born in 1775, and succeeded his father in the possession of the family estate. He was a literary antiquary of no inconsiderable erudition, and the author of many popular songs and poetical *jeux d'esprit*. He inherited all the Tory spirit of his father; and some attacks on the character of James Stuart, Esq., having appeared in the Beacon and Sentinel newspapers, which were traced to Sir Alexander, a duel took place between these gentlemen, when the latter fell, mortally wounded in the neck, March 26, 1822. Mr Stuart was tried for this offence, but honourably acquitted.

BOTH, JOHN and ANDREW, brothers, Flemish painters, born at Utrecht about 1610. John chose landscape painting, and took for his model Claude Lorraine, while Andrew studied and painted the human figure; they frequently worked on the same canvas, and their labours harmonized so well, that their pictures could not be suspected of being joint productions. Andrew was drowned at Venice in 1650; John died at Utrecht, 1656.

BOTHWELL, JAMES HEPBURN, Earl of was born about 1525, and succeeded his father in his title and estates in 1556. He took an active part under the queen-regent against the party of Knox, but changed sides on her death, and was one of the envoys sent to France to escort Queen Mary home. In 1562 he fled from Scotland to escape prosecution for conspiracy against the queen, but returned in 1565, and was restored to his place in the privy council. His intercession obtained pardon for the murderers of Rizzio, and he was in great favour with the queen. He was generally believed to be the murderer of Darnley, and was tried for it; he appeared with his friends in arms and was acquitted. He soon after seized the queen and carried her off to Dunbar castle, not without her consent, it was said. She pardoned him, made him duke of Orkney, and married him at Holyrood. The people took up arms, the queen was defeated at Carberry Hill, and Bothwell fled, escaping first to the Orkneys, and thence to Denmark, where he was seized as a pirate and imprisoned. After ten years of wretched life, deprived of all things but the memory of his crimes, he died mad, 1577.

BOTTA, CARLO GIUSEPPE, one of the most celebrated Italian historians, was born in Piedmont in 1766. He graduated in medicine at Turin, and after suffering imprisonment as a partisan of the French, he emigrated and served as physician in the army of the Alps and in the army of Italy through the campaign of 1796. Named, in 1800, a member of the "Consulta" of Piedmont, elected four years later deputy to the French Legislative Body, he settled at Paris, and after the restoration of the Bourbons he applied himself to the composition of his historical works. These are: "Storia della Guerra dell'Indipendenza d'America;" "Storia d'Italia dal 1789 al 1814;" and "Storia d'Italia in continuazione

al Guicciardini, sino al 1789." Botta's History of Italy made him a great reputation, and has taken its place as a standard work. Died at Paris, 1837.

BOTTARI, GIOVANNI, a distinguished Italian philologist and archaeologist, was born at Florence in 1689, and was educated at the university. He was engaged several years in recasting the celebrated Dictionary of the Academy Della Crusca, was made by the grand duke of Tuscany director of his printing-office, and in 1730 settled at Rome. After holding various offices under Clement XII. he became librarian of the Vatican. He was author of a learned work on the paintings and sculptures discovered in the catacombs of Rome; also of "Museum Capitolinum," an account of illustrious men, in four vols. folio; and published a new edition of Vasari's Lives of the Painters. Died, 1775.

BOTTICELLI. [FILIPEPI, SANDRO.]
BOTZARIS, MARCOS, a brave Souliote, who distinguished himself in the Greek revolution. Driven with his countrymen from Epirus by Ali, pasha of Jannina, he subsequently joined the Turks against Ali; but soon took part with him against the Turks. He especially distinguished himself in the defence of Missolonghi, and fell in a combat with a body of Albanians sent to take it in August, 1823.

BOUCHARDON, EDMÉ, French sculptor, born in 1698. He obtained the grand prize of the Academy, studied at Rome, and was admitted to the Academy. He executed busts of Pope Clement XII. and of Cardinals Polignac and Rohan. Died, 1762.

BOUCHER, JONATHAN, an English divine and philologist, was born in Cumberland in 1737. When about twenty years of age he went to America, and there became a tutor and a parish minister. After the Declaration of Independence he was compelled, for his loyalty to the English crown, to quit the country. He subsequently became vicar of Epsom, and there spent the last twenty years of his life. He projected and made large collections for a dictionary of English provincial and antiquated terms, but did not live to complete it. A small portion of the work only has been printed. He was also author of a "View of the Causes and Consequences of the American Revolution." Died, 1801.

BOUCAUT, JEAN LE MAINGRE, Marshal de, one of the bravest and noblest of French soldiers, was born at Tours in 1364. He served his first campaign at twelve years of age, and soon distinguished himself by his great strength, agility, and hardihood. In 1382 he served against the Flemings at the battle of Trosbach; then in Prussia, in support of the Teutonic knights; in Guienne against the English; and in 1396 he commanded, under the count of Nevers, the French force sent to aid Sigismund, king of Hungary, against the Turks under Bajazet. He was captured at the battle of Nicopolis, but was ransomed, and returned to France. In 1401 he was appointed governor of Genoa, a post which he held nearly ten years. He was taken prisoner by the English at the battle of Agincourt in

1415, and brought to England, where he died in 1421.

BOUFLERS, LOUIS FRANÇOIS, Duke de, marshal of France, was born in 1644. He entered the army in 1662, served under Turenne and Luxembourg, in Flanders, was wounded in several battles, and contributed in 1690 to the victory of Fleurus. Created marshal three years later, he defended Namur against William III. of England, but capitulated after several months and was kept prisoner for a very short time. He again served in Flanders in the war of the Spanish Succession, and distinguished himself by his obstinate defence of Lille against Prince Eugene. He capitulated by express order of Louis XIV., who then made him duke and peer of France. His last service was at the bloody battle of Malplaquet, when he conducted the retreat of the right wing. Died at Fontainebleau, 1711.

BOUFLERS, STANISLAUS, Chevalier de, son of the marchioness of Boufflers, mistress of Stanislaus, king of Poland, was born in 1737, and was distinguished for the elegance of his manners and conversation. He was destined for the church, but declared that his love of pleasure would interfere with the duties of this profession, and therefore entered the military service. He emigrated from France in 1792, to Prussia. His works consist of poems, discourses, "Eloges," tales, &c., and have been several times republished. His character has been thus summed up; "A libertine abbé; a military philosopher; a song-making diplomatist; an emigrant republican." Died, 1815.

BOUGAINVILLE, JEAN PIERRE DE, a French miscellaneous writer; author of several works no longer possessing any importance; and editor of Freret's great work on Chronology. He was secretary to the Academy of Inscriptions, and member of the French Academy. Born, 1722; died, 1763.

BOUGAINVILLE, LOUIS ANTOINE DE, a French officer, distinguished both in the military and naval service. When serving in Canada, under Montcalm, he displayed so much bravery that he obtained the rank of colonel, and subsequently became a general. Under the empire he was made a senator, and a member of the Institute. Bougainville circumnavigated the world, and enriched the science of geography by a number of new discoveries. His voyage round the world was undertaken in 1766, and the account of it by himself appeared in 1771. Born, 1729; died, 1811.

BOUGUER, PIERRE, French mathematician, was born in Brittany in 1698. He carried off several prizes of the Academy for scientific memoirs, and having won a great reputation, was sent with Lacondamine to Peru, to measure a degree of the meridian; a very difficult task, made more difficult by the ignorance and absurd suspicions of the natives. He afterwards took part with other mathematicians in verifying a similar measurement in France. Bouguer was a member of the Academy of Sciences of Paris and of the Royal Society of London. His chief works are "Traité de la graduation de la lumière," "Traité du navire," "La figure de la terre déterminée par les

observations," &c. Bouguer was also the inventor of the double object-glass micrometer. Died, 1758.

BOUHOURS, DOMINIQUE, a French Jesuit and critic; author of "Les Entretiens d'Ariste et d'Eugène," "Manière de bien Penser dans les Ouvrages de l'Esprit," &c. Born, 1628; died, 1702.

BOUILLARD, JACQUES, a celebrated French engraver, born in 1744, died in 1806.

BOUILLAND. [BULLIALDUS.]

BOUILLE, FRANÇOIS CLAUDE AMOUR, Marquis de, born in 1759; a distinguished French general, celebrated for his exploits up to the era of the French revolution. He sat on liberal principles in the first Assembly of Notables, and after making excellent, though abortive, preparations to assist the unfortunate Louis XVI. in pursuing his journey from Varennes after his flight from Paris, he quitted France and served under the allies. He died in London in 1800. His "Memoirs of the French Revolution" rank deservedly high.

BOUILLON. [GODFREY OF BOUILLON.]

BOULAINVILLIERS, HENRI DE, Count de St Saire; author of a "History of Mahomet," a "History of the Arabians," a "History of the Peage of France," &c. Born, 1658; died, 1722.

BOULAY DE LA MEURTHE, A. J. C., born in 1761; one of the most distinguished orators of the French revolution, and author of several works on political science. He was president of the civil tribunal at Nancy, in 1793, and had great share in confirming the expatriation of the emigrants in 1793, when a member of the council of the Five Hundred. He was subsequently faithful to Buonaparte through all his changes of fortune; and on that account was proscribed, and banished to Frankfort, by the Bourbons, on their second restoration in 1815.

BOULTER, HUGH, archbishop of Armagh, eminent for his benevolent exertions to alleviate the distress of the Irish during the scarcity of 1740, and for the part he took in establishing schools for the instruction of the Irish children. Died, 1742.

BOULTON, MATTHEW, an eminent engineer, whose spirit and talent improved innumerable mechanical processes, and whose name, with that of his partner, Watt, is inseparably connected with that of the wonderful power of which they made such skilful use, the steam engine, was born at Birmingham, in 1728. Among the many great undertakings in which Boulton and Watt were engaged, one of the most useful and important was the improvement of the coinage, the coins struck at the "Soho" manufactory being rarely surpassed in beauty or accuracy. From some interesting discoveries made at Soho in 1863, it appears probable that Boulton succeeded in taking photographs upon metal plates, and perhaps also on paper. But his discovery excited alarm among interested parties, and the secret of it was lost. Boulton was a fellow of the Royal Society. After a long life uninterruptedly devoted to the advancement of the useful arts, and the promotion of the commercial interests of his country, he died in 1809.

BOURBON, CHARLES DE, the celebrated Constable de Bourbon, was born in 1489. By his marriage with Suzanne de Bourbon he acquired immense wealth, and he displayed it in the maintenance of almost royal state. He accompanied Louis XII. in his invasion of Italy, and diligently studied military affairs. At the age of 26 he was named constable of France by Francis I., whom he accompanied in the campaign of Italy, contributing to the victory of Marignano. He was soon after appointed governor of the Milanese. An act of flagrant injustice, sanctioned by Francis, led to a breach between him and the constable; a claim being set up by the queen-mother to the estates of Bourbon, and decided in her favour. He then entered the service of the emperor Charles V., who gave him the chief command in Italy. At the great battle of Pavia he completely defeated the French army and took Francis I. prisoner. Finding that he was distrusted by the emperor, and being left with means of paying the troops in Italy, he resolved on independent action, and in 1527 led his army to the siege of Rome. Rome was taken and suffered the horrors of a sack, but the constable had fallen early in the assault.

BOURBON, LOUIS HENRI JOSEPH, Duke de, and Prince de Condé, is supposed to have put an end to his existence, Aug. 27, 1830. He fought nobly in the royalist army in the first years of the revolutionary war, and after the campaign in 1800 accompanied his father to England, and was residing with him at Wanstead House in 1804, when his son, the Duke d'Enghien, was murdered. The duke's death is attributed to the excitement of his mind respecting the revolution of July, 1830. His property he left by will to the Duke d'Aniane, third son of Louis Philippe, with the exception of a large bequest to Sophia Dawes, baroness de Feuchères, an Englishwoman, with whom he lived.

BOURBOTTE, PIERRE, a French Jacobin, remarkable for his ferocity and military courage; born about 1765. Being a member of the convention in 1794, and aiming at the dictatorship, on the 1st Prairial he and his colleagues were crushed by Legendre; and after poniarding himself before the revolutionary tribunal, but ineffectually, he was guillotined.

BOURCHIER, JOHN, Lord Berners, a military commander of great repute in the reigns of Henry VII and VIII., by the latter of whom he was made governor of Calais. He assisted in the suppression of the insurrection under Lord Audley in Cornwall, became chancellor of the exchequer, and accompanied the Princess Mary to France. Lord Berners was author of the first English translation of "Froissart." Died, 1532.

BOURCHIER, THOMAS, cardinal, and archbishop of Canterbury. He studied at Oxford, and, after holding the sees of Worcester and Ely, was made archbishop of Canterbury in 1454. He was also for a short time lord chancellor. He crowned three of our kings, viz. Edward IV., Richard III., and Henry VII. Archbishop Bouchier took

BOURDALOUE, LOUIS, a French Jesuit, and one of the most eloquent preachers in France. His sermons even in the prison, deprived as they are of the eloquent eye, the graceful action, and the melodious voice, bear sufficient evidence of his genius to justify the praises that have been bestowed upon him. Born, 1632; died, 1704.

BOURDON, SEBASTIEN, a French painter and engraver; his *chef d'œuvre* is "The Crucifixion of St Peter," which he executed for the church of Notre Dame. Born, 1616; died, 1671.

BOURGEOIS, Sir FRANCIS, a native of England, but of Swiss family; painter to the king of Poland, and subsequently to George III. of England. His landscapes and sea pieces were once highly esteemed. He left his fine collection to Dulwich College, with £10,000 for building a gallery, and keeping the pictures in preservation. He became R.A. in 1792. Born, 1756; died, 1811.

BOURGOING, JEAN FRANÇOIS, Baron de, born in 1748; ambassador to Spain on the part of the French republic, and afterwards of Napoleon, who subsequently sent him to Stockholm, and in 1807 to Saxony. He died in 1811. He has left several approved works, among which are his "Tableau de l'Espagne Moderne," "Mémoires de Pie VI.," &c. Died, 1811.

BOURIGNON, ANTOINETTE DE LA PORTE, a Flemish fanatic. Holding religion to consist in direct impulses from and communion with the Deity, she made many disciples, and wrote numerous books, remarkable chiefly for their absurdity. She was excessively avaricious and penurious. Born, 1616; died, 1680.

BOURMONT, LOUIS AUGUSTE VICTOR DE CHAISNE, Marshal de, a distinguished French soldier, was born in 1773. In the early periods of the revolution, while second lieutenant of infantry, he emigrated from France, joined the Bourbon princes on the frontiers, and afterwards served the royal cause in La Vendée, Bretagne, and Maine with great energy and talent. During the consulate of Napoleon he was arrested on a charge of being concerned in the plot of the infernal machine, but after suffering imprisonment successively in the Temple, and at Dijon and Besançon, he made his escape to Lisbon, whence however he returned to France, and was appointed to various high commands in the Imperial service, and served with great distinction in the Italian and Russian campaigns. On Napoleon's return from Elba, he commanded a division of the corps of Ney. At the commencement of the campaign of 1815, he was appointed to the command of a brigade of the grand army; but on the eve of the battle of Waterloo he abandoned his colours and repaired to Louis XVIII., who was then at Ghent. This extraordinary *coup de main*—famous or infamous as it is designated by different parties—won for him the signal favour of the restored Bourbons. Ten days after the battle of Waterloo he entered France with the title of commander of the northern frontier, and shortly after the execution of the gallant Ney, to whose con-

demnation his evidence mainly contributed, was appointed to the command of one of the divisions of the royal guards. In 1823 he took part in the Spanish campaign under the Duke d'Angoulême, on whose return to France he obtained the chief command of the army of occupation. In 1829 Charles X. having nominated him minister of war, he organized the expedition which finally resulted in the capture of Algiers, for which he was honoured with the baton of a marshal of France. After the revolution of 1830, which placed Louis Philippe on the throne, he was proscribed. He then devoted his services to the cause of absolutism in different countries, especially in Portugal; but he was subsequently permitted to re-enter France, where he continued to live in obscurity till his death, which took place Nov. 9, 1846.

BOURNE, VINCENT, sub-master of Westminster School; he was a man of original genius, and was educated at Cambridge. He made himself known by some Latin poems of singular elegance and purity. Died, 1747.

BOURRIENNE, LOUIS ANTOINE FAUVRELET DE, private secretary and biographer of Napoleon I., was born at Sens in 1769. He was a fellow-student with Napoleon at the military school of Brienne, and there their friendship began. Bourrienne studied at Leipsic, and held several diplomatic posts; was present with Napoleon at the attack on the Tuileries in June, 1792; and after various changes of fortune was chosen, in 1797, by his old friend to be his private secretary. This post he held five years, and was dismissed on account of his connection with some disgraceful money transactions. Charges of a like kind led to his dismissal from a diplomatic post at Hamburg. He followed Louis XVIII. to Ghent; was made councillor of state and deputy to the Chamber of Representatives; fled to Belgium to escape his creditors, and died in a lunatic asylum at Caen, in 1834. His "Mémoires sur Napoleon" appeared in 8 vols. in 1829-30.

BOUTERWEK, FRIEDRICH, professor of philosophy at Göttingen, was born in 1766, and died in 1828. He was the author of many valuable works, of which his "History of Modern Poetry and Eloquence" is the most important.

BOWDICH, THOMAS EDWARD, agent of the English African Company, was a native of Bristol, born in 1793. He was selected to conduct a mission to the king of Ashantee, of which mission he published a very interesting account. He again set out to explore the interior of Africa, and had already reached the river Gambia, when a fever, produced chiefly by anxiety, terminated his life in 1824. He was an excellent linguist and a pleasing writer; and besides the work already mentioned, the public are indebted to him for a translation of Mollin's Travels to the Sources of the Senegal and Gambia; and other works.

BOWDITCH, Dr NATHANIEL, F.R.S., president of the American Academy of Arts and Sciences, was a native of Boston, and, though self-educated, attained great distinction as a natural philosopher and mathematician. When 23 years of age he published

his "Practical Navigator," a work of great merit; but his admirable translation of the "Mécannique Céleste" of La Place, with an elaborate commentary, is the production that is most likely to perpetuate his name. Died, 1838.

BOWDLER, THOMAS, an English physician; author of "Letters from Holland," and editor of the "Family Shakspeare," &c. Born, 1754; died, 1825.

BOWDOIN, JAMES, an American statesman and man of letters, born at Boston, 1727. He was one of the most determined opponents of the right of colonial taxation, insisted on by England, and was one of the first deputies to Congress. He became governor of Massachusetts, and president of the Philadelphian Academy of Sciences; and died in 1790. His "Discourse on the New Constitution of the United States" is deservedly admired.

BOWLES, WILLIAM LISLE, poet, was born at King's Sutton, in Northamptonshire, a parish of which his father was vicar, in 1762. He was educated at Winchester and at Trinity College, Oxford, where he took his degree in 1792. On leaving the university he was appointed to a curacy in Wiltshire; from which he was preferred to a living in Gloucestershire, and in 1803 to a canonry in Salisbury cathedral. His next step was to the rectory of Bremhill in Wiltshire, to which he was presented by Archbishop Moore. Here he remained till his death, unremitting in his professional duties, zealous in the education of the poor, and an exemplary instance of the union of Christian graces with the polish of taste and the amenities of literature. His sonnets were published in 1789, and may be reckoned among the first fruits of a new era in poetry. In these sonnets were observed a grace of expression, a musical versification, and especially an air of melancholy tenderness, so congenial to the poetical temperament, which still preserve for their author a highly respectable position among our poets. The chief of his subsequent poems were "Hope, an allegorical Sketch," "St Michael's Mount," "Coombe Ellen," and "Grave of Howard." His "Spirit of Discovery by Sea," the longest of his productions, was published in 1804. Mr Bowles published also an edition of Pope, which involved him in controversy with Lord Byron, as well as a great variety of tracts, literary, antiquarian, and theological. He was very playful in his habits and conversation, and many anecdotes are told of his Parson-Adams-like forgetfulness. Died, 1850.

BOWLES, CAROLINE. [SOUTHEY, CAROLINE.]

BOWYER, WILLIAM, one of the most learned English printers, was born at London in 1699. He was the son of an eminent printer, and after studying at Cambridge, became partner in his father's business about 1721. He soon attained a very high reputation, both for accuracy as corrector of the press, and for classical and antiquarian scholarship; and an immense number of learned and sumptuous works issued from his press. To many of them he added notes, prefaces, and commentaries, which were

afterwards published in a separate form as "Miscellaneous Tracts." He obtained various lucrative appointments; among them those of printer of the votes of the House of Commons, printer to the Society of Antiquaries, and to the Royal Society, &c. He numbered among his friends many of the most distinguished literary men of the day, and was as much esteemed for his integrity, simplicity, and kind-heartedness, as he was honoured for his learning and skill. His "Critical Conjectures and Observations on the New Testament" were highly commended, and passed through several editions. Died, 1777.

BOYCE, WILLIAM, an eminent musical composer, born at London in 1710. At the age of 26 he became composer to the Chapel Royal, and about twenty years later, organist. He received the degree of Mus. D. from the university of Cambridge. His works consist chiefly of Anthems, which entitle him to a high rank as composer of church music. He also published a magnificent collection of "Cathedral Music of the English Masters," in 3 vols. folio. Died, 1799. He was buried in St Paul's cathedral.

BOYD, ZACHARY, an eminent Scottish divine of the 17th century. After studying at the college of Glasgow he went in 1607 to Saumur, where he became regent of the university. Persecution drove him home in 1621, and he was soon after chosen minister of the Barony parish, Glasgow, an office which he held till his death. He made a Latin speech before Charles I. at Holyrood Palace in 1633, and preached before Cromwell after the battle of Dunbar in 1650. His principal work is entitled "The Last Battell of the Soule in Death." He also wrote "Zion's Flowers," two volumes of curious poems on Scripture subjects, known as "Zachary Boyd's Bible." He left an immense number of volumes in manuscript. This remarkable man was very wealthy, and left a splendid legacy to Glasgow College; not dependent, as is commonly said, on the publication of any of his works. Died, 1653.

BOYDELL, JOHN, an English engraver and liberal patron of art, was born in 1719. He established himself in London as a print-seller, and by his enterprising spirit and the liberal engagements which he offered to artists, contributed powerfully to the formation of a school of English engravers. His famous "Shakspeare Gallery" was a collection of paintings executed at his expense by the best artists of the day in illustration of the works of Shakspeare. The pictures were also engraved, and the "Gallery" was reproduced by photography in 1864. Boydell's name is also associated with the sumptuous edition of Shakspeare in 9 vols folio and with several valuable collections of engravings. Died, 1804.

BOYER, ABEL, a French lexicographer. He quitted his native country after the revocation of the Edict of Nantes, and settled in England, where he remained till his death. He was author of a French and English Dictionary and Grammar, which have had a very extensive circulation; and of

BOYLE, RICHARD, earl of Cork, an eminent statesman in the reign of James I., and founder of a family greatly distinguished in the arts, sciences, and literature. He was educated at Cambridge, filled several government offices in Ireland, and was made in 1629 one of the lords justices of Ireland. He was soon after promoted to the office of lord high treasurer. Born at Canterbury, 1568; died, 1643.

BOYLE, ROGER, earl of Orrery, fifth son of the above. When only seven years old he was created Baron Broghill; and, from an early age, was conspicuous for his zeal in the king's service. But after the king was put to death, the baron transferred his services to Cromwell, by whom he was greatly trusted. At the death of Cromwell he aided in bringing back Charles II., and was created earl of Orrery for his services on that occasion. Born in Ireland, 1621; died, 1679. He was the author of several poems and plays.

BOYLE, ROBERT, the distinguished natural philosopher, was a younger brother of the preceding, and was born at Lismore in 1626. He was educated at Eton, travelled on the continent, and studied several years at Geneva. He afterwards visited Italy, and returned to England in 1644. His life was thenceforth devoted to science and theology. He was one of the first members of the association which was incorporated as the "Royal Society," and was chosen president; an honour which on conscientious grounds he declined. He contributed greatly by his numerous experiments and valuable discoveries to the progress of physical science. He was no less zealous in the defence and propagation of the Christian faith; bore the expense of translating the historical books of the New Testament into Malay, and of the work of Grotius on the truth of the Christian Religion into Arabic; and founded by his will the endowment for the "Boyle Lectures." He enjoyed the friendship of Charles II., James II., and William III., but free from ambition refused the honour of a peerage. His collected works were published in 5 vols. folio in 1744. Died at London, December, 1691.

BOYLE, CHARLES, Lord Boyle, second son of Roger, earl of Orrery, is chiefly remembered in connection with the great controversy between Bentley and the Oxford scholars respecting an edition of the "Epistles of Phalaris," published by Boyle, or in his name, while a student at Christchurch. Although his name was used it does not appear that he took any part in the controversy. He entered parliament in 1700, was afterwards made privy councillor, and employed on a mission to the states of Holland. He was author of some slight literary papers and poems. Born, 1676; died, 1731.

BOYLE, JOHN, earl of Cork and Orrery, only son of the last named; author of a translation, with notes, of the "Epistles of Pliny the Younger," "Remarks on the Life and Writings of Swift," papers in the *Connoisseur* and the *World*, &c. Born, 1707; died, 1782.

BOYLE, RICHARD, third earl of Burlington, and fourth earl of Cork, another member of the same distinguished family. He was an enthusiastic admirer of architecture, and a very generous friend to men of letters. In him Bishop Berkeley found his earliest and most efficient patron; and Pope did him the honour to address to him his fourth epistle. Born, 1695; died, 1753.

BOZE, CLAUDE GROS DE, a French numismatist and archaeologist; he became secretary to the Academy of Inscriptions, member of the French Academy, and keeper of the king's cabinet of medals; and was author of the *Medallie History of Louis XIV.*, &c. Born, 1680; died, 1754.

BRACCINI, NICCOLO. [TRIHOLO.]
BRACCIO FORTEBIACCI, or BRACCIO DA MONTONE, a celebrated Italian Condottiere, who played a prominent part in the civil wars of Italy in the 14th century, was born at Perugia in 1368. He belonged to the party of the nobles, and with his family was exiled in 1393. After distinguishing himself as a commander in the service of various sovereigns, he assisted Ladislaus, king of Naples, in his war with the pope and the Florentines. Forbidden to enter Perugia when it submitted to Ladislaus, he aided the Florentines and the pope. In 1416 he successfully attacked Perugia, and was declared lord. His government was wise and temperate, he introduced a reform of manners, erected noble buildings, and improved the irrigation of the country. In 1417 he took Rome, but did not hold it long; the war which followed was ended by a peace in 1420. He was soon after created, by the queen of Naples, prince of Capua and constable of the kingdom. He undertook the siege of Aquila, and was wounded in a battle with the papal army sent to raise the siege. He refused all food and remedies, and died, June, 1424.

BRACCIOLINI. [POGGIO.]
BRACCTON, HENRY DE, an English law writer of the 13th century; author of the well-known and esteemed treatise "*De Legibus et Consuetudinibus Angliæ*."

BRADDOCK, EDWARD, Major-general. He was commander-in-chief of the British forces in America, during the war with France in the 18th century; and was slain when on the point of investing Fort Duquesne, in 1755.

BRADLEY, JAMES, a distinguished astronomer, born about 1693, at Sherbourn, in Gloucestershire. He studied at the university of Oxford, and entered the church. He was early known as an astronomical observer, and was admitted fellow of the Royal Society in 1718. Three years later he was named Savilian professor of astronomy at Oxford. In 1742 he was appointed astronomer royal. He died in 1762, having enjoyed during the last ten years of his laborious life a pension of £250. The fame of Bradley as one of the most eminent of astronomers rests upon his discoveries of the phenomena called *aberration of light*, and *nutation*, and upon the immense mass of accurate observations made by him at the Observatory at Greenwich. The first of these discoveries is assigned to the year 1728, the latter to the

year 1747. The *Observations* of Bradley form the basis of the great work of the German astronomer Bessel, entitled *Fundamenta Astronomiæ*.

BRADSHAW, JOHN, president of the high court of justice for the trial of Charles I., was born in Cheshire in 1586. He was called to the bar, and was employed by the parliament in several important prosecutions. He was made chief justice of Chester, and in 1648 attained the rank of serjeant-at-law. He was a thorough republican; conducted himself with great firmness as president on the great trial; received a large pension, and several lucrative appointments for his services; took part in some of the plots against the protector; was subsequently president of the council of state, and a commissioner of the great seal, and died in 1659. His body was interred in Westminster Abbey, and was one of those brutally exhumed and hung in chains at the restoration. Bradshaw was a cousin of Milton, who has written his eulogy in an eloquent passage of the "Second Defence of the People of England."

BRADWARDIN, THOMAS, archbishop of Canterbury; author of a treatise "De Causa Dei," directed against Pelagianism; some mathematical tracts, &c. Died, 1349.

BRADY, NICHOLAS, an English divine; translator, in conjunction with Tate, of the Psalms. He studied at Oxford and Dublin, took an active part on the side of the prince of Orange, and became afterwards chaplain to the king. He had influence enough to save, on three occasions, his native town from the destruction ordered by James II. Born at Bandon, Ireland, 1659; died, 1726.

BRAHAM, JOHN, one of the most celebrated singers of the age, was born in London in 1774. His parents, who were Jews, died when he was still a child, but he was confided to the care of Leoni, an Italian singer of celebrity, and made his *début* as a public singer before he had attained his eleventh year, when, from the quality and compass of his voice, he was enabled to sing several *bravura* songs that had been written for Madame Mara. In 1794 he appeared at Bath at some concerts that took place under the direction of M. Rauzzini, who, appreciating his talent, gave him musical instruction for three years. In 1796 he was engaged for Drury Lane theatre, and his *début* (which was in an opera called "Mahmoud") was so successful that in the year following he was engaged for the Italian Opera House. Hoping, however, to achieve a reputation more permanent than could be obtained by any other course, he resolved to visit Italy and there to complete his musical education. On his return to England he appeared at Covent Garden in 1801. This is the point from which may be dated that triumphant career during which he created a constant *fièvre*. Mr Braham was also renowned as a composer. Not only did he write several of the most popular songs, but he composed a tolerably long list of entire operas, as they were called in their time, though, according to present notions, they were merely dramas interspersed with occasional songs. The only vocation which

Mr Braham tried without success was that of manager of the St James's Theatre, which he built as an opera house, and which was first opened in 1836. In private life Mr Braham was generally respected, and among his acquaintance his fame as a man of extensive information and as a humorous retailer of anecdote was scarcely inferior to his reputation as a vocalist among the general public. Died, 1856.

BRAHE, TYCHO, the great astronomer, was a native of Denmark. He was born in 1546, of a noble family of Swedish origin. The passion for astronomy showed itself in him very early, and after studying at the universities of Copenhagen and Leipzig, he visited the principal observatories of Germany, returning home in 1571. His observations on the new star in Cassiopeia, in 1572, attracted great attention, and after travelling again for a short time, he settled in the small island of Hven, which the king gave him, and there had a splendid observatory built, which he named *Uraniborg*. Here he laboured for about 20 years, but when the king died the jealousy of the nobles had him deprived of his appointments and his observatory. He soon after left Denmark, and on the invitation of the emperor, settled in Bohemia. Kepler joined him there, and they worked together till Tycho's death. Tycho is especially celebrated as an observer in astronomy. He made very great improvements in the instruments of observation, and devised additional safeguards against error. He opposed the Copernican system as then understood, discovered the variation of the moon's longitude, showed that comets could not be mere atmospheric bodies, and in short prepared by his accurate and numerous observations the grand discovery of Kepler's laws. Among his works, not numerous, are, "Astronomiæ instaurata mechanica," "Progymnasmatia," "Epistolarum astronomicarum libri," and "Historiæ Cælestis libri XX." Died in October, 1601.

BRAIDWOOD, JAMES, director of the London Fire Brigade, was born in Edinburgh in 1799, and educated in the high school of that city under the well-known Dr Adam. He was appointed, in 1823, inspector of the Edinburgh Fire Brigade; and he at once exhibited, in this office, those high qualities of courage, judgment, and energy which will cause his name to be honourably and gratefully remembered. Soon after his appointment occurred in Edinburgh the great fire of 1824, at which time only the insurance offices possessed fire-engines in that city. The difficulties thus caused in the extinction of fires led him to organize the present fire brigade of Edinburgh. On occasion of a fire in a shop in Hunter's Square, where two kegs of gunpowder were stored in the cellar, Braidwood forced an entrance, with some wet blankets, into the vaults, and returned with the kegs under his arms. As director of the Fire Brigade of London, his services won for him the esteem and gratitude of all, and a life of eminent usefulness and vigour was cut short on the 22nd of June, 1861, by an accident which occurred during the greatest fire that has been known in Lon-

don during the day following. The street near the post office was filled with the ruins of a warehouse into the day following the effects of fire that of the sense of the of Mr Braide

He had posted his men where they could have the best command of the fire, when a terrible explosion took place; and before he could make his escape, he was buried under the ruins of a warehouse wall which fell outwards into the road. His body was found the day following, crushed, but showing no effects of fire. At no funeral, perhaps, since that of the Duke of Wellington, has so great a sense of public loss been shown as at that of Mr Braiddwood.

BRAINERD, DAVID, a celebrated American missionary, who signalled himself by his successful endeavours to convert the Indians on the Susquehanna, Delaware, &c. Died, aged 30, 1747.

BRATHWAITE, JOHN, an ingenious mechanic, constructor of a diving machine, with which he explored the Royal George, sunk off Spithead; the Hartwell, East Indiaman, off one of the Cape de Verd Islands; and the Abergavenny, East Indiaman, off the Isle of Portland. From the first he only succeeded in raising some guns and an anchor; but from the second and third he brought up property to a very large amount. Died, 1818.

BRAMAH, JOSEPH, an English engineer, distinguished for the number, value, and ingenuity of his mechanical inventions. Among these were his invaluable hydraulic press, his safety lock, various improvements in the steam-engine, in the process of making paper, in the construction of main-pipes, wheel-carriages, the beer-machine, &c. Born, 1749; died, 1814.

BRAMANTE D'URBINO, FRANCESCO LAZARI, a celebrated Italian architect, was born in 1444. He first studied painting, but abandoned it for architecture. He was employed at Rome by Pope Alexander VI., but especially by Julius II., for whom he planned, and partly executed, the buildings connecting the Belvedere and the Vatican, and subsequently designed the great church of St. Peter. This however he merely commenced, and the completion was intrusted to Michael Angelo, who entirely changed the plan. Bramante first introduced Raphael at the court of Rome. Died, 1514.

BRAMHALL, JOHN, archbishop of Armagh, was born in Yorkshire at the close of the 16th century, was educated at Cambridge, and after obtaining the degree of D.D., went to Ireland, and was soon appointed bishop of Londonderry. He was the friend of Strafford, then lord deputy, and exerted himself for the advancement of the church in wealth and power. At the commencement of the civil war he was impeached and imprisoned, went abroad a few years later, and after the restoration returned, and was raised to the Irish primacy. His name is remembered as the antagonist of Hobbes in a discussion on fate and free-will. Died, 1663.

BRANCALEONE DANDOLO, a noble of Bologna, who was chosen "senator" of Rome in 1253. By his courage and energy he delivered the city from the distractions caused by the constant conflicts of the rival

nobles, many of whom he summarily executed, and destroyed their fortified houses. He compelled Pope Innocent IV. to return from Assisi to Rome; was deprived for a time of his office, but soon recalled; and died, both hated and beloved, in 1258.

BRANCAS LAURAGUAIS, Duke de, a French nobleman, distinguished for his scientific attainments; discoverer of the composition of the diamond, and a great improver of the manufacture of porcelain. Born, 1735; died, 1824.

BRAND, JOHN, an English divine and antiquary; author of the "History and Antiquities of the Town of Newcastle," "Observations on Popular Antiquities," &c. Born, 1713; died, 1806.

BRANDT, a German chemist of the 17th century; who is said to have discovered phosphorus while attempting to find a solvent by which to convert silver into gold.

BRANTOME, or PIERRE DE BOURDELLES, a celebrated French chronicler. He was a favoured attendant upon Charles IX., Henry III., and the duke of Alençon; and his memoirs, though somewhat too free in their details, are highly valuable as graphic and faithful illustrations of an interesting period of French history. Died, 1614.

BRASIDAS, a Spartan general, who distinguished himself by his skill and courage in the Peloponnesian war. He was wounded and lost his shield at the attack on Pylos; led an army very skillfully and rapidly through Thessaly to Macedonia; took several cities from the Athenians, and especially, in B. C. 422, Amphipolis on the Strymon. He defended the city when besieged by Cleon, and defeated Cleon in a battle outside the walls, but was himself mortally wounded. Sacrifices and games were instituted in his honour.

BRAY, SIR REGINALD, an English statesman, and favourite of Henry VII. He is chiefly memorable for having superintended the erection of the chapel of Henry VII. at Westminster, and for having finished that of St George at Windsor. Died, 1503.

BRAY, WILLIAM, F.S.A., an industrious antiquary; editor of Evelyn's "Diary" and "Memoirs," and a contributor to the *Archæologia*, &c. Died, 1832, aged 97.

BRAYBROOKE, RICHARD CORNWALLIS NEVILLE, Lord, F.S.A., born March 17, 1820, is well known for his contributions to archaeological literature. In 1850 he became one of the vice-presidents of the Archaeological Institute, and contributed many valuable papers on the antiquities of England. Died February 22, 1861, aged 41.

BREAUTE, FULK DE, a leader of mercenaries in the service of King John. He was bailiff of Glamorgan in 1208, and took a prominent part in the barons' war, which followed the king's revocation of Magna Charta, in 1215. He accompanied John on his expedition to the northern counties, ravaging, burning, and oppressing. In the following year he was in the Isle of Ely, and deserted the minister. Under Henry III. he was in possession of the castle of Bedford, and took part in many plundering expeditions. He imprisoned one of the king's justices, but was at last besieged by the

king, and after holding out several months, surrendered, was stripped of his estates and banished. He died by poison soon after in France, 1225.

BREDA, JOHN VAN, a Dutch painter; a very close imitator of the style of Breughel and Wouvermans. Died, 1750.

BREDDOW, GABRIEL GOTTFRIED, a German historical writer, born at Berlin, in 1773. He held the chair of rhetoric at Eutin, and that of history at Ichnstadt, and afterwards at Frankfort on the Oder. He was author of a "Handbuch der alten Geschichte," which passed through several editions and was translated into English; "Historische Tabellen," frequently reprinted, translated into English, and extended; and several other works. Died, 1814.

BRENNBERG, BARTHOLOMEW, a celebrated painter, particularly skillful in small landscapes. Born at Utrecht, 1614; died, 1660.

BREGUET, ABRAHAM LOUIS, an eminent watch and chronometer maker at Paris, by birth a Swiss. Born, 1747; died, 1823.

BREINSLAK, SCIFONE, a celebrated Italian geologist, born at Rome in 1768, who under Buonaparte was appointed inspector of the saltpetre works and powder mills in Italy. He wrote several scientific works, and was intimate with Cuvier, Chaptal, &c. Died, 1826.

BREITKOPF, JOHANN GOTTLIEB EMANUEL, a printer and type founder of Leipzig; he discovered an improved composition of type metal, and wrote a treatise on Bibliography, &c. Born, 1719; died, 1794.

BREMER, SIR JAMES JOHN GORDON, rear-admiral of the Blue, whose name is so well-known for his distinguished services in the war with China, was born in 1786. Entering the navy in 1794, he rose through the intermediate grades with much personal distinction, and in June, 1814, he became a post-captain. When captain of the Tamar, 26 guns, he was despatched to form a settlement on Melville Island, Australia, and joined in the closing scenes of the Burmese war. In 1836, he was created a knight commander of the order of the Guelph (K.C.H.); and in 1837, in the Alligator, of 26 guns, he founded the settlement of Port Essington. He afterwards returned to India, and assumed the command in chief of that station, on the death of Sir F. L. Maitland, at the commencement of the Chinese war. To place on record his various achievements, from the organization of the expedition that left Singapore in 1840, until the final capture of Canton in 1841, would be to compile a history of the war. His services were rewarded with the dignity of K.C.B., and the voice of the country was echoed in a vote of thanks to him from both Houses of Parliament. His last employment was as commodore superintendent of Woolwich dockyard, from which office he retired in consequence of ill health, in 1848. Died, 1850.

BRENNUS, a Gallic chieftain, who figures in the legendary history of Rome. Having obtained, it is said, a victory over the Romans at the Allia, he marched on Rome, which he took and pillaged. After blockading the Capitol for some months he was

offered a thousand pounds weight of gold to spare the city. While the gold was being weighed, he threw his sword and helmet into the opposite scale, exclaiming, "Veni, vici!"—Woe to the vanquished! Enraged at this insolence, Camillus, according to the legend, put an end to the negotiation, gave battle to the Gauls, and totally defeated and destroyed the whole host. This occurred about 382 B.C.

BRENNUS, a leader of the Gauls, who after ravaging Thessaly and Greece, attempted to plunder the temple of Delphi. Being repulsed, he slew himself, 278 B.C.

BRENTON, CAPTAIN EDWARD PELHAM, R.N., an officer whose services at sea during the war with France were scarcely greater than those which he performed on shore and during peace. Gifted with great ingenuity, he made several mechanical improvements connected with his profession, of which naval men spoke in the highest terms. He was the liberal supporter of several of the most useful charities in the metropolis. Of one of these, "the Children's Friend Society," he was, in fact, the founder; and it is not too much to say, that to it hundreds of poor children owe their removal from the horrors of vice and want, to a life of virtuous exertion, and happiness. Captain Brenton was also very favourably known as an author, by his "Naval History of Great Britain, from 1783 to 1822," and a "Biography of Earl St. Vincent." Died, 1839.

BRETSCHNEIDER, HENRY GODFREY VON, a German litterateur, born at Gera, in 1739. He led a very wandering and restless life, served in the Prussian army, held various political offices in Germany and France, was librarian to the university of Buda, and died near Pilsen in 1810. He wrote several satirical pieces on the prominent follies of the age, and contributed numerous papers of a similar character to periodicals.

BREUGHEL, PETER, commonly known as "Old Breughel," an eminent painter; chiefly of common-life subjects, such as rustic merry-makings. Born near Breda, 1510; died, 1570.

BREUGHEL, JOHN, son of the foregoing, called, from his dress, "Velvet Breughel," was an excellent landscape painter. Rubens painted the figures in some of his pieces. Born at Brussels, 1560; died, 1625.

BREUGHEL, PETER, a brother of the above, and also a painter. His fondness for painting horrible subjects procured him the sobriquet of "Hellish." Died, 1642. Another brother, **ABRAHAM**, excelled in fruit and flowers.

BRIDAINE, JAMES, an eminent French ecclesiastic, whose indefatigable zeal, or itinerant propensities, induced him to undertake 256 missionary journeys, so that his powers were displayed in almost every village throughout France. He was the author of "Spiritual Songs," which were extremely popular. Born, 1701; died, 1767.

BRIDGEWATER, FRANCIS EGERTON, Duke of, a nobleman who devoted much attention to, and expended large sums in the improvement and extension of, canal navigation, seconded by the skill of Brindley. Born, 1736; died, 1803.

BRIDGES, EGERTON, his bequest of a collection of Eight distinguished his wisdom. "Bridgewood" in 1758; was the church. **BRIDPO** Lord, a gallant brother part in Lord 1, 1794; in French square; and many other 1811.

skill of Brindley.

BRIDGEWATER, FRANCIS HENRY
EGERTON, eighth Earl of, is remembered for
his bequest of £8000 to provide for the pub-
lication of a work on natural theology.
Eight distinct works were written to carry
out his wishes, and these are the well-known
"Bridgewater Treatises." The earl was born
in 1759; was educated at Oxford; entered
the church; and died at Paris in 1829.

BRIDPORT, ALEXANDER HOOD, Admiral
Lord, a gallant naval officer, and the young-
est brother of Admiral Hood. He bore a
part in Lord Howe's celebrated victory, June
1, 1794; in the following year he defeated a
French squadron, capturing three sail of the
line; and nobly distinguished himself on
many other occasions during the war. Died,
1814.

BRIENNE, JOHN of, king of Jerusalem,
was son of Erard II., count of Brienne, and
was chosen, by Philip Augustus, king of
France, to marry Mary, daughter of Conrad
and Isabella, and heiress of the kingdom of
Jerusalem. The marriage was celebrated,
and John of Brienne was crowned at Acre,
in 1210. He was at once engaged in war
with the Saracens, and in 1219 he joined the
fifth crusade, invaded Egypt, and took Du-
nietta; which, however, was soon lost. His
daughter, Yolande, was married to the Em-
peror Frederick II., who then took the title
of king of Jerusalem. John of Brienne after-
wards joined with the pope in his war
against the emperor. In 1229 he was made
emperor of the East during the minority of
Baldwin II. Incredible accounts are pre-
served of his double victory over the Greeks
and the Bulgarians, who besieged Constan-
tinople. Died, in the dress of a Franciscan,
1237.

BRIGGS, HENRY, an eminent English
mathematician and first Savilian professor
of geometry, at Oxford; author of "Arith-
metica Logarithmica," "Tables for the Im-
provement of Navigation," "Animadver-
siones Geometricæ," &c. Born, 1536; died,
1630.

BRIGGS, WILLIAM, an eminent physician
and oculist; author of "Ophthalmographia,"
an anatomical description of the eye and a
new theory of vision. Died, 1704.

BRILL, MATTHEW, an eminent landscape
painter, employed by Pope Gregory XIII. in
decorating the Vatican. Died, 1584.

BRILL, PAUL, brother of the last-named,
and also eminent as a landscape painter.
Pope Clement VIII. employed him to paint
a landscape sixty-eight feet wide for the
Scala Clementina; it was a representation
of the martyrdom of St. Clement. Died, 1626.

BRILLAT-SAVARIN, ANTHELME, a
French writer, known chiefly from his work
entitled "The Physiology of Taste." Born
1755; died, 1826.

BRINDLEY, JAMES, an eminent English
mechanician and engineer, to whose great
zeal and abilities we owe some of the most
important of our navigable canals. So highly,
indeed, did he estimate their importance to
a commercial nation, that, being jocularly
asked, while under examination before a
committee of the House, for what purpose
he supposed rivers to have been created, he
is said to have quite seriously replied, "To

feed navigable canals." His first great work
was the canal from Worsley to Manchester,
which he executed for the duke of Bridge-
water. He afterwards completed the Grand
Trunk, Birmingham, Chesterfield, and others.
Born, 1716; died, 1772.

BRINKLEY, DR JOHN, bishop of Cloyne,
an able divine, but still more eminent for his
scientific acquirements, was born in 1760.
While a graduate of Oxford he was elected
to the professorship of astronomy in Dublin
University, an honour to which his previous
writings and discoveries in science fully en-
titled him. Died, September, 1835.

BRINVILLIERS, MARGUERITE D'AU-
BRAI, Marchioness of, horribly notorious for
having poisoned her father, brother, and two
sisters. She had formed a criminal attach-
ment for a Gascon officer, named Gaudin St
Croix, and her family caused him to be sent
to the Bastille. There he learned from a fel-
low-prisoner the art of compounding subtle
poisons, of which he and his mistress made
use to avenge themselves on her family.
His mask slipping from his face while he was
distilling poison, he died suddenly; and her
anxiety to obtain a casket that had belonged
to him, led to inquiries which terminated in
her detection. She was beheaded, and her
body burnt, 1676.

BRISBANE, Admiral Sir CHARLES. He
entered the navy, on board the Alcide, in
1779; received a severe wound in Rodney's
fleet on the 12th of April, 1782; and was
promoted to the rank of lieutenant in 1790.
He shared the active services of Lord Hood
off Toulon, and of Lord Nelson during
the siege of Bastia, where he nearly lost an
eye; was made captain in 1795; and the fol-
lowing year received the thanks of the Ad-
miralty for his conduct at the capture of some
Dutch ships in Saldanha Bay. The firmness
with which Sir Charles acted quelled the
disposition to mutiny which then appeared
through the fleet at the Cape. In 1805 he
was appointed commander of the Arethusa;
and in 1807 achieved the capture of the Is-
land of Curaçoa, when he received the hon-
our of knighthood. The following year he
was made governor of St Vincent's, in which
station he remained till his death; being
raised to the rank of rear-admiral in 1805,
and to that of vice-admiral in 1820. Died, 1829.

BRISSON, or BRISSONIUS, BARNABAS,
an eminent French lawyer and philologist;
author of a treatise "De Regio Persarum
Principatu," &c. During the siege of Paris
by Henry III., in 1589, he remained in the
city, and was compelled by the partisans of
the League to act as first president of the
parliament; and his conduct as a magistrate
was made the pretext for putting him to
death, in 1591.

BRISSON, MATHURIN JACQUES, a French
chemist and naturalist; he was in his youth
assistant to Réaumur and afterwards pro-
fessor of physics at the college of Navarre.
He was also a member of the Institute. His
principal works are the "Ornithologie," a
treatise in 6 vols. 4to; "Pesanteur spé-
cifique des corps;" and a "Dictionnaire raison-
né de physique." He also translated into
French Priestley's History of Electricity.
Born, 1723; died, 1806.

BRISNOT DE WAHVILLE, JEAN PIERRE, French miscellaneous writer, was born in 1734. Some of his early writings were obnoxious to the government, and he was a short time imprisoned in the Bastille. To avoid a second imprisonment he fled to England, and then visited America. He returned to Paris just before the outbreak of the revolution and became one of its devoted adherents. Elected to the constituent assembly, he joined the Girondist party: was also deputy to the legislative assembly, and the Convention; procured the appointment of Roland to the ministry of the interior, and was guillotined with the other Girondist leaders, October 31st, 1793. Brissot was a voluminous writer; honest, unselfish, simple in manner and dressed as a Quaker; was a warm admirer of the English Constitution; advocated the abolition of slavery, freedom of the press, and the right of insurrection. Among his works are "Théorie des lois criminelles," "Bibliothèque philosophique du législateur, &c." "Nouveau voyage dans les Etats-Unis," &c.

BRITTON, JOHN, an eminent writer on topography and architecture, was born at the village of Kington, in Wiltshire, in 1771, where he passed the first sixteen years of his life. In his seventeenth year he came to London, and was apprenticed to a wine merchant; became clerk to an attorney in Gray's Inn; and was next engaged at three guineas a week to write, recite, and sing at a theatre in Pantion Street, Haymarket. The passion for theatricals continued with Mr Britton through his long life; but he was soon withdrawn to more congenial pursuits, to which the remainder of his days was devoted. The work which first gained him distinction was the "Beauties of Wiltshire," two volumes of which appeared in 1801, a third being published after an interval of twenty-four years. Of the multitude of works which he wrote, either alone or in conjunction with other authors during the next fifty years, it would be impossible to give even the titles within our limits. They were devoted chiefly to topography, architectural antiquities, biography, and the fine arts; but the most important of his publications are the "Architectural Antiquities of Great Britain," and the "Cathedral Antiquities of England," works of national value, and which will secure for their author lasting fame. A writer in the "Gentleman's Magazine," to which he was a frequent contributor, thus speaks of him:—"To his labours the architecture, and particularly the ecclesiastical and domestic architecture, of the country, is deeply indebted for the restoration of what was decayed, and the improvement of what was defective; and in his beautiful sketches and masterly engravings, extending through many volumes, he has given us a treasure-house of antiquarian art, and made the pencil and the graver not only perpetuate and preserve much that has long been mouldering into shapeless ruin, but has also supplied many a new model of improved beauty, suggested by his own genius, and carried into effect by his own zeal and perseverance." Some years before his death Mr Britton published a portion of his "Autobiography," which is a storehouse of

literary anecdote, and full of interest to bibliographers, antiquaries, and artists. Died, 1857.

BRITTON, THOMAS, a dealer in small coal, noted, on account of his attachment to music, as the "musical small-coal man." His harmless life was put an end to by a silly trick of a ventriloquist, which frightened him so much that he never recovered. Born, 1654; died, 1714.

BROCCHI, GIOVANNI BATTISTA, an Italian geologist and mineralogist, born at Bassano in 1772. He became professor of natural history at Brescia, settled at Milan in 1808, travelled in the Tyrol and in Italy, and in 1822 entered the service of the viceroy of Egypt. The most important of Brocchi's works is the "Conchilogia fossile subapennina," which appeared in 1814. Died in Sennaar, 1828.

BROCKLESBY, RICHARD, an eminent physician, fellow of the Royal Society, and author of some medical tracts, &c. Born, 1722; died, 1797.

BRODIE, SIR BENJAMIN COLLINS, a distinguished English surgeon, was born at Winterslow, near Salisbury, in 1783. He studied at the Hunterian School, in Great Windmill Street, where Abernethy was then a lecturer, and at St George's Hospital. In 1809, he became lecturer at the school and assistant-surgeon at St George's. In the following year he was chosen Croonian lecturer to the Royal Society, and for some elaborate papers which he laid before the society was chosen fellow, and soon after received the Copley medal. In 1819 he became professor of anatomy and surgery to the Royal College of Surgeons, and three years later, full surgeon to St George's Hospital. He continued his lectures till 1830. The appointment of serjeant-surgeon to the king was given him in 1834, and a similar appointment was continued to him by her Majesty, Queen Victoria. In 1844 he became president of the college, and in 1858 president of the Royal Society, being the first surgeon who had that dignity conferred on him. His practice grew steadily and his reputation with it; and amidst all his public and private duties, he found leisure for wider studies than those merely professional, and for the production of several important works. These are—"Pathological and Surgical Observations on Diseases of the Joints;" "Lectures on Pathology and Surgery;" and "Psychological Inquiries." Died at Betchworth, Surrey, October, 1862. Since his death his "Autobiography" has been published.

BROGLIE, FRANÇOIS MARIE, marshal of France, was born in 1671. He entered the army, and as lieutenant-general served under Marshal Villars, in Flanders, in 1710, and distinguished himself on several occasions. In 1725 he was sent ambassador to London, and negotiated a treaty between England, France, and Prussia. He was created marshal in 1734, displayed great intrepidity at the battle of Parma, and took Guastalla. He afterwards served in Bohemia. Died, 1745.

BROGLIE, VICTOR FRANÇOIS, Duke of, marshal of France, was son of the preceding

and was born in Bohemia, in Flanders, at Raucoux near Maestricht. In the year of Louis the victor he was commander-in-chief, and afterwards was minister and took part in 1792. Died, 1792.

BROKE, JAMES VERE, a gentleman of Suffolk, was his naval career. After the usual parts of the law nor upon; but far famed action of Chesapeake, news of a victory such fearful not a match (frigates) of England national prize, congratulatory author of it zeal, courage dignity of a Jan. 2, 1841.

and was born in 1718. He served in Italy, in Bohemia, in Bavaria, and in 1749 passed into Flanders, and took part in the battles of Raucoux and Lawfeldt and the siege of Maastricht. In 1758 he contributed to the victory of Lutzelberg, and in the following year he was created prince of the empire, commander-in-chief of the army of Germany, and marshal of France. He was afterwards exiled, but soon recalled. He was minister of war a short time in 1789, and took part in the invasion of Champagne in 1792. Died, 1804.

BROKE, Rear-admiral Sir PHILIP HOWES VERE, a gallant English officer, the eldest son of Philip B. Broke, Esq., of Nacton, Suffolk, was born in 1776, and commenced his naval career as a midshipman in 1792. After the usual initiation, during which he was present in several general engagements, he obtained the rank of commander in 1799, and post-captain in 1801. The various services he subsequently performed in different parts of the globe, though they were neither few nor unimportant, we shall not enter upon; but he is chiefly celebrated for the far famed action between his ship, the Shannon, of 38 guns, and the American frigate, Chesapeake, mounting 49, in June, 1813. The news of a victory so nobly gained against such fearful odds—at a time when an opinion was gaining ground that our frigates were not a match for the large vessels (misnamed frigates) of the Americans—was hailed in England with every demonstration of national pride, and besides the complimentary congratulations that attended the gallant author of it, he was, for his "distinguished zeal, courage, and intrepidity," raised to the dignity of a baronet of Great Britain. Died, Jan. 2, 1841, at his seat, Broke Hall, Suffolk.

BROME, ALEXANDER, an attorney and satirical poet, whose writings consist of lively songs and satirical compositions directed against the Puritans. In addition to writing satirical songs, he translated from Lucretius and Horace, and wrote a comedy, called "The Cunning Lovers." Born, 1620; died, 1668.

BROME, RICHARD, an English dramatist, contemporary with Ben Jonson, to whom he was originally servant. His comedies were formerly very popular, but they are not now performed. Died, 1632.

BROMLEY, WILLIAM, an English engraver, was born at Carlsbrook in 1769. He settled in London, and was the friend of several eminent artists. He became an associate engraver of the Royal Academy, and was employed to engrave the Elgin marbles for the trustees of the British Museum. Died, 1812. His son, JOHN BROMLEY, was also an engraver; he died in 1839.

BRONSDTED, PETER OLAF, a distinguished Danish philologist and antiquary, was born in 1780, entered the university of Copenhagen in 1798, and took the degree of doctor in philosophy in 1806. In company with his friend Dr Koes he made a scientific expedition to Greece, and in excavating the temples in Aegina, &c., many fine monuments of ancient Greek art were discovered. On his return to Denmark he was assisted with pecuniary means by the government, and

appointed diplomatic agent to the Papal court in 1818. He afterwards travelled through the Ionian Isles, Malta, and Sicily, for the purpose of making additional investigations; he subsequently made Paris his principal residence, coming occasionally to England; and in 1827 he visited his native country, where he received the title of privy councillor of legation, and other marks of distinction. The first part of his principal work, entitled "Travels and Researches in Greece," appeared in 1826, at Paris, simultaneously in the French and German languages; the second part in 1830. Died at Copenhagen, in consequence of a fall from his horse, June 26, 1842, aged 61.

BRONGNIART, ALEXANDRE, the distinguished French mineralogist, chemist, and zoologist, was born at Paris in 1770. His father, an eminent architect, had him well educated and sent him to the school of mines and the school of medicine. At the age of 20 he visited the mining works of Derbyshire. After various other employments he obtained the post of director of the porcelain works of Sèvres, which he occupied till his death, discovering and carrying out many improvements in the processes of manufacture. He wrote a memoir on enamelling, and did much to revive the art of painting on glass. He made scientific journeys in Auvergne, Switzerland, Italy, and Sweden, assisted Cuvier in his studies of fossils, and introduced a new classification of reptiles. Brongniart was author of a "Traité élémentaire de Minéralogie," "Essai sur la Géographie minéralogique des Environs de Paris," "Traité des Arts céramiques" (jointly with Cuvier); "Mémoire sur les corps organisés fossiles nommés Trilobites," &c. He also contributed numerous papers to scientific journals and to the Academy of Sciences, to which he was admitted in 1815. He was a foreign member of the Royal and Geological Societies of London. Died, 1847.

BRONTE, CHARLOTTE, the eldest of three sisters, whose *nom de plume* "Currer, Ellis, and Acton Bell," have become familiar as household words in every English mouth, was born at Thornton, in Yorkshire, of which village her father, the Rev. Patrick Bronte, was rector, in 1816. When she was about four years of age her father removed to Haworth, in the same county, and here, with the exception of a few short intervals, she spent the remainder of her life. At school she was an indfatigable student; constantly reading and learning, picking up every scrap of information concerning painting, sculpture, poetry, and music, as if it were gold. In 1835, when she was little more than nineteen years old, she went as teacher to a Miss W—'s, her younger sister, Emily, accompanying her as a pupil; but she became literally ill from home-sickness, and could not settle to anything; and, after the lapse of three months, she returned home. But she again entered upon this career, though with no greater success. After two years spent in a *pensionnat*, in Brussels, as half-teacher and half-pupil, she returned to Haworth in 1844, and soon afterwards, in conjunction with her sisters Emily, Jane, and

Ann, prepared for the press a volume of poems, which was published in 1846, under the pseudonyms of Curren, Ellis, and Acton Bell, but met with little success; though it was remarkable as being the first efforts of undoubted genius to find some congenial form of expression. At this period the three sisters were harassed by great domestic anxieties, in addition to the ill-success of their poems; but all of them were engaged in another literary venture, which boded no greater success than the former. Each of them had written a prose tale, hoping that the three might be published together:—"Wuthering Heights," by Anne, "Agnes Grey," by Emily Jane; and the "Professor," by Charlotte. The two former found a publisher, though under disheartening conditions, while the "Professor" found no sufficient appreciation among the London publishers to induce them to take it up. But, meanwhile, Charlotte, undiscouraged, was engaged upon another story, to which she gave the title of "Jane Eyre; an Autobiography;" and when this appeared, in 1847, it was welcomed with greater popularity than is accorded to most novels. "This was doubtless due in part to the freshness, raciness, and vigour of mind it evinced, but still more, perhaps, to the moral paradox which pervaded it, and to the hardihood of its assaults upon the prejudices of so-called proper people." In 1848 she lost her sister Anne; and in 1849 her sister Emily, too, was laid in the grave. But, notwithstanding these severe domestic losses, she was still busy with her pen, and in the autumn of 1849 the fame which had accrued to her from "Jane Eyre," was sustained, if not increased, by the publication of "Shirley." Meanwhile, the real name and circumstances of the author of these powerful novels became known in literary circles; and when, in 1853, "Villette," which turned upon her residence in Brussels, appeared, there was no longer an effort at concealment. In 1854 Miss Bronte was married to the Rev. Mr Nicholls, who had long been her father's curate, and a long career of happiness and usefulness seemed before her; but her constitution, naturally feeble, soon showed symptoms of decay, and she died March 3, 1855. The "Life of Charlotte Bronte" has been written by Mrs Gaskell, the well-known author of "Mary Barton," &c., &c.

BRONZINO, ANGELO, Italian painter, was born near Florence in 1502. He was a pupil of Jacopo da Pontormo, painted both in oil and in fresco, was the friend of Vasari, and an ardent admirer of Michael Angelo. His most famous picture is the "Descent of Christ into Hell." He excelled in portrait-painting. Died at Florence, 1572. In the National Gallery are four works of Bronzino, one of them a remarkable allegorical picture of "Venus, Cupid, Folly, and Time," which was painted for Francis I. of France.

BROOKE, FRANCES, a clever novelist and dramatic writer; authoress of "Lady Juliet Mandeville" and other novels, &c. Died, 1789.

BROOKE, HENRY, dramatist and miscellaneous writer; author of several tragedies, "Letters addressed to the People of Ireland,"

the celebrated novel of "The Fool of Quality," &c. Born in Ireland, 1706; died, 1783.

BROOKES, JOSHUA, an eminent anatomist and surgeon, was born in 1761; and after studying under the most celebrated men of his day, commenced his career as a professor of anatomy, pathology, and surgery, when about 26 years of age. His museum was enriched with the choicest anatomical specimens and osteological preparations; and the lectures on anatomy and its kindred sciences, which, during a long life, he was in the habit of delivering to his pupils (of whom he could reckon 7000), laid the foundation of their scientific fame to some of the most distinguished members of the profession. His last appearance as a lecturer was in 1827; and in January, 1833, he died, aged 72.

BROOME, Dr WILLIAM, an English divine and poet. In addition to his own poems, and a translation of Anacreon's Odes, he contributed eight books to Pope's translation of the Odyssey; but having complained of his scanty remuneration, his brother bard rewarded him with a niche in the Dunciad. He was vicar of Eye, Suffolk, and died at Bath, in 1745.

BROSCHI, CARLO. [FARINELLI.]

BROSSES, CHARLES DE, an eminent French lawyer, was born at Dijon in 1709. He was the schoolfellow and friend of Buffon, who has left a flattering record of his great attainments. He was a member of the academy of Dijon, and rose to be president of the parliament of Burgundy. He left among other works "Lettres sur la Découverte de la Ville d'Herculanum," and a "Traité de la Formation mécanique des Langues." Died, 1777.

BROTHERS, RICHARD, a fanatic, who, in 1793, commenced his career as the apostle of a new religion, and announced himself as "nephew of the Almighty and prince of the Hebrews, appointed to lead them to the land of Canaan." He predicted various absurdities, and it is a melancholy fact that his disciples were not confined to the poor and ignorant. The great orientalist, Halhed, and other men of unquestionable ability, became adherents of this mania, whose career at length attracted the notice of government, and he was committed to Bedlam for life as a confirmed lunatic. He published several works, redolent alike of blasphemy and absurdity.

BROTIER, GABRIEL, a learned French Jesuit and librarian to the college of Louis le Grand; known for his excellent editions of Tacitus, and other classics, &c. Born, 1723; died, 1789.

BROUGHTON, THOMAS, prebendary of Salisbury, and a literary character of considerable merit; author of "Christianity distinct from the Religion of Nature," a Dictionary of all Religions, &c. He was also one of the principal contributors to the Biographia Britannica. Died, 1774.

BROUNCKER, WILLIAM, Lord, mathematician, first president of the Royal Society, and author of some papers in the Philosophical Transactions, &c. Died, 1684.

BROUSSAIS, FRANÇOIS JOSEPH VICTOR, a celebrated French physician, the author of some very learned medical works, which,

the Fool of Quality, 1706; died, 1783. An eminent anatomist in 1761; and after celebrated men of his profession as a professor of surgery, when the museum was an anatomical spectratorious; and the kindred sciences, he was in the habit of whom he could find the most distinguished profession. His last years in 1827; and in 1872.

AM, an English politician to his own Anacreon's Odes, as to Pope's translating complained, his brother bard in the Ducal. Folk, and died at

AM, Lord, mathe- of the Royal Society, e in the Philosophical, 1584.

ST JOSEPH VICTOR, a pian, the author of cal works, which,

however, are very much defaced by the crudest and most dogmatical materialism. He is esteemed the founder of the physiological system of medicine in France, and first published his views in his "Histoire des phlegmasies chroniques," in 1808, and afterwards in the "Examen de la doctrine médicale," in 1816. Born, 1772; died, 1838.

BROUSSONET, PIERRE MARIE AUGUSTE, an eminent French naturalist; author of "Ichthyologia," &c. He was a member of the Academy of Sciences. Born, 1761; died, 1807.

BROWN, CHARLES BROCKDEN, an eminent American writer, chiefly known in this country by his powerful novels, "Wieland" and "Edgar Huntley." Died, 1810.

BROWN, SIR GEORGE, British general, was born of an ancient family at Linkwood, near Elgin, in 1790. He entered the army as ensign in 1805, served the same year in the expedition to Sicily, served as lieutenant at the siege and capture of Copenhagen in 1807, and next went to the Peninsula, where he fought till 1811, and again from July 1813 to May 1814. He was at the battle of Vimiera, the passage of the Douro, and the capture of Oporto; was severely wounded at Talavera, engaged had to hand one of the staff-officers of Massena at Busaco, was one of forlorn hope at the storming of Badajoz, and took part in the various actions during the retreat of the French from Spain and Portugal, Fuentes d'Onor, Salamanca, Nive, Nivelle, and Orthes. In 1814 he accompanied Sir Hugh Ross on the American expedition, and was present at the battle of Bladensburg and the capture of Washington. The same year he became major and lieutenant-colonel, but his career in the field was ended till the outbreak of the Crimean war in 1854. In 1841 he was promoted to the rank of major-general, and in the following year was appointed deputy adjutant-general.

He succeeded Sir John Macdonald as adjutant-general in 1850; was made lieutenant-general in 1851; and was called on to command the light division in 1854. He led the advance of the army from Malta to Gallipoli; thence to Varna, and from Varna to the Crimea. He displayed impetuous valour at the battle of the Alma, and had his horse shot under him; was one of the first to engage the Russians at Inkermann, where he was so severely wounded that he had to visit England to recruit himself; soon returned to Sebastopol, and led the troops at the unsuccessful attack on the Redan, and commanded the expedition to Kerch and Yenikale. After this service he retired, and was rewarded with the first class of the Medjidie, the dignity of G.C.B., the grand cross of the Legion of Honour, and the Order of Savoy. He was made general in 1855, held the command of the forces in Ireland from March 1860 to the spring of 1865, and after some months of failing health, died in the house in which he was born, 27th August, 1865. Sir George Brown was latterly distinguished for his "belief in pipeclay." Divisional drill in the field, the leather stock, the pipeclay, and the close shaving, he rigidly enforced.

His 40 years of merely formal military business had led him to lay exaggerated stress on merely mechanic perfection, and he was almost inaccessible to new ideas. But he was a good-hearted man, though he wore a rough cloak, and it was often his own fault that unjust impressions of his character were created.

BROWN, JOHN, D.D., an eminent clergyman and indefatigable writer. He was born, in 1715, at Rothbury, Northumberland, educated at St John's College, Cambridge; and after various church preferments, became chaplain to the king. The chief of his numerous works are "Essays on the Characteristics of the Earl of Shaftesbury," "Barbarossa," a tragedy; an "Estimate of the Manners and Principles of the Times;" a "History of the Rise and Progress of Poetry;" &c. He fell into a state of dejection, and killed himself, in 1766.

BROWN, JOHN, a Scotch painter and author, favourably known in the former character by his painting of the bust of Homer from the Townley marbles, and by his portrait of Pope. As an author he is even more distinguished by his "Letters on the Poetry and Music of the Italian Opera," which he addressed to his friend, Lord Monboddo. Born, 1752; died, 1787.

BROWN, JOHN, a very learned, though self-educated, Scotch divine; author of the "Self-interpreting Bible," "Dictionary of the Bible," and numerous other religious works. Born, 1722; died, 1787.

BROWN, JOHN, M.D., an eminent Scotch physician, and the founder of a new system of medicine, named after him the Brunonian. He divided all diseases into two great classes,—the one including those resulting from deficient excitement, and the other those caused by its redundancy; and though his opinions have not been unconditionally received, they materially influenced the practice of his professional successors. Dr Brown's principal works are "Elements of Medicine" and "Observations on the Old Systems of Physic." Born, 1735; died, 1788.

BROWN, JOHN, an eminent English engraver; his best works are engravings from Salvator Rosa. Died, 1801.

BROWN, LANCELOT, an eminent landscape gardener, whose great merit consisted in imitating nature, and abandoning the stiff and clipped formality once so prevalent in the pleasure-grounds of our nobility. From his constant use of the phrase, "this spot has great capabilities," he was called Capability Brown. Born, 1713; died, 1782.

BROWN, ROBERT, head of the sect of Brownists, was born about 1540. He was a kinsman of Ceell, Lord Burleigh, and was educated at Cambridge. He soon distinguished himself by his vehement preaching in various places against the established church, its discipline and its ceremonies. In 1580 he was arrested at Norwich, but was soon set free. His "Treatise of Reformation without tarrying for any" appeared two years later; he was again arrested, and two persons were hung for circulating his books. He subsequently formed a separate congregation, and went to Holland; but his scheme did not succeed, and he came back to Eng-

land, and was appointed rector of Achurch in Northamptonshire. He did not preach, led an idle life it is said, and after suffering imprisonment above thirty times, was finally imprisoned at Northampton for assaulting a constable, and there died, 1630. His principles were substantially the same as those held by the Independents.

BROWN, ROBERT, the most distinguished botanist of the age, was born at Montrose in 1773. He was educated at Aberdeen and at Edinburgh, where he completed his medical studies in 1795, and the same year joined a fencible regiment in the double capacity of surgeon and ensign. In 1801, on the recommendation of Sir Joseph Banks, he was attached as naturalist to H. M. S. "Investigator," destined for a survey of the coast of Australia; and after nearly four years spent in traversing these regions, he returned to England with nearly 4000 species of plants, a large portion of which were entirely new to science. Having become librarian to the Linnean Society, he devoted some years to the study and the classification of the treasures he had collected; and the first fruits of his researches appeared in 1810, in a volume entitled "Prodronus Floræ Novæ Hollandiæ" (a supplement to which appeared in 1830). This and his "Plantæ Javanicæ Variiores" are the only two great works which he gave to the world; but from time to time he wrote papers on an infinite variety of botanical subjects, and contributed largely to narratives of scientific or explanatory expeditions, such as Salt's "Travels in Abyssinia," Clapperton's "Expedition to Central Africa," Strutt's "Expedition to Central Australia," and many other similar undertakings. He was admitted to the Royal Society in 1811, was at a later period a member of the council, and received the Copley medal in 1839. He was a foreign associate of the Academy of Sciences, Paris, and a member of several other scientific bodies. At the time of his death he was president of the Linnean Society. Died, 1858.

BROWN, THOMAS, the Scottish philosopher, was born in 1778. He finished his education at the university of Edinburgh, where he was a pupil of Dugald Stewart. He was one of the members of the "Academy of Physics," formed in 1797, and one of the early contributors to the Edinburgh Review. He obtained his degree of doctor in medicine in 1803, and soon after entered into partnership with Dr Gregory. In 1810 he became assistant professor of moral philosophy, and held that post till his death. His first work, "Observations on the Zoonomia of Dr Darwin," appeared in 1798. He wrote an "Examination of the Theory of Hume on Cause and Effect," and several poetical works. But his most important work is his "Lectures on the Philosophy of the Human Mind." It did not appear till after his death, became very popular, and has been frequently reprinted. Its florid style gave a novel attractiveness to its difficult theme. Died at London, 1820.

BROWNE, GEORGE, Count de, an Irish officer in the Russian service, who so nobly distinguished himself on many great occa-

sions, that he was rewarded with the government of Livonia; from which, when he had held it 30 years, he wished to retire, but Catherine II. would not accept his resignation, replying, "Death alone shall part us." Born, 1698; died, 1792.

BROWNE, ISAAC HAWKINS, an English lawyer and poet. His best English works are a poem addressed to Highmore, the painter, "On Design and Beauty;" and a shorter one, called "The Pipe of Tobacco," in which he very skillfully imitated the tone of thought and expression of Cibber, Phillips, Thomson, Young, Swift, and Pope. The work, however, on which his reputation chiefly depends, is a Latin poem, on the Immortality of the Soul. Born, 1706; died, 1760.

BROWNE, PATRICK, M.D., an eminent naturalist; author of "The Civil and Natural History of Jamaica," catalogues of the birds and fish of Ireland, and of the plants of the Sugar Islands. Born in Ireland, 1720; died, 1790.

BROWNE, SIMON, born in Somersetshire in 1680, was a disenting minister of considerable ability, but chiefly remarkable for an unhappy hallucination. He imagined that "God had annihilated in him the thinking substance, and utterly divested him of consciousness." This delusion perpetually haunted him, and yet he furnished the completest refutation to it by composing several argumentative tracts, and by some very laborious compilations. Died, 1732.

BROWNE, SIR THOMAS, the eminent antiquary and physician, was born at London in 1605. He studied at Oxford, where he was incorporated M.D., having previously taken the same degree at the university of Leyden. He settled at Norwich in 1636, and resided there nearly half a century. He was knighted by Charles II. in 1671. His principal works are the "Religio Medici," "Inquiries into Vulgar Errors" (both of which have passed through many editions, and been translated into the principal languages of Europe), and "Hydrotophia or Urn-burial." Many miscellaneous tracts are included in the complete edition of his works. His writings are very original in matter and style, full of curious, especially antiquarian, learning not without genuine humour. Died at Norwich, 1682.

BROWNE, ULYSSES MAXIMILIAN, the son of an expatriated Irish officer, entered the Austrian service, and by his great skill and bravery, when employed against the Turks, rose to the rank of field-marshal. He afterwards greatly distinguished himself at Placentia and other places in Italy; and at length died of wounds received at the battle of Prague. Born, 1705; died, 1757.

BROWNE, SIR WILLIAM, an able and eccentric physician of the 18th century. He was the author of numerous optical and other essays; and, at his death, bequeathed a sum of money for the provision of three medals, of the value of five guineas each, for Greek and Latin odes and epigrams by undergraduates of Cambridge. Born, 1692; died, 1774.

BROWNING, ELIZABETH BARRETT, one of the most illustrious of English poetesses, was born in the year 1809. Her early years were spent at her father's country residence, in the county of Herefordshire, in sight of the Malvern Hills. As a child she was very precocious, writing much at ten years of age, and becoming a contributor to periodicals when under twenty. A small volume, entitled an "Essay on Mind, and other Poems," was published in 1826. In it she seeks to prove that "ethical poetry is the highest of all poetry, as the highest of all objects is moral truth." Her health was much shaken by the bursting of a blood-vessel on the lungs in 1836, while she was yet pursuing her studies, which embraced the Greek poets and philosophers, with the early patristic writers of the Christian Church. Her physician recommended change to a milder climate, and she was taken to Torquay. When she had been there nearly a year, her favourite brother was drowned by the upsetting of a boat in her sight, close to the shore. This terrible calamity nearly killed her; and it was not until the following year that she could be removed by easy journeys to her family and home in London, where she continued, in the words of her friend, Miss Mitford, to read "almost every book worth reading in almost every language, and giving herself, heart and soul, to that poetry of which she seemed born to be the priestess." Her health gradually improved, and she subsequently married Mr Browning, and accompanied him to Pisa, whence they removed to Florence. A collected edition of her poems was published in 1844, containing the "Drama of Exile," "Lady Geraldine's Courtship," &c.,—in the preface to which she speaks of her work as a poetess, as an effort to give the completest expression to *her own being*. These words account at once for the defects of her poetry. When she allows herself to use the language and express the thoughts of ordinary men, her poems are both touching and full of meaning; when she withdraws herself to contemplate her own being and analyze her own sensations, she is generally obscure and frequently unintelligible. As a natural consequence, she had persuaded herself that she was charged with a special message from "the Infinite," and that, to discover it, she had only to survey the workings of her own consciousness. Hence resulted an undue excitement of language, which exhibited the most extraordinary conceits, and a settled conviction that all poets were such only by virtue of this excitement, and in the degree in which they dwelt on their own personal sensations. Among her larger works is the poem of "Aurora Leigh," full of her worst faults, yet exhibiting great beauty of thought and force of language whenever she places herself on the level of ordinary humanity. Some of her lesser lyrics, which belong to this class, are very touching and beautiful. After her first departure with her husband, she visited England only at rare intervals.

During her long residence in Florence and Rome, she took a vehement interest in Italian politics, of which the poem of "Casa Guidi Windows," written in 1851, is the impassioned expression. In her "Poems before Congress," published in 1861, she startled even her admirers by the intensity of her eulogium of the French emperor, and by her maledictions on the American States. But no estimate of Mrs Browning would be fair which left out of sight the peculiar conditions of her life. Suffering under long and painful illness, she was necessarily withdrawn to a great extent from the world around her, and thrown back on the examination of her own sensations. So regarded, the effects on herself and her poetry are perfectly intelligible; nor can they weaken the impression that she was a woman of rare powers both of imagination and expression. She had a deep and passionate sympathy with all that was poor and suffering; and her faults were those of her time, heightened in some instances by the peculiar circumstances of her life. Much of what she wrote cannot have more than a passing popularity; yet she has not passed away without achieving for herself a permanent reputation, or without causing a deep regret that her life was closed by a premature decline. She died at Florence, June 29, 1861.

BROWNRIGG, WILLIAM, an ingenious physician and natural philosopher; author of "A Treatise on the Art of making common Salt," treatises on platina and carbonic acid, &c. Died, 1800.

BRUCE, ROBERT, a descendant of David, earl of Huntingdon, and competitor with John Balliol for the crown of Scotland, at the death of Alexander III. in 1286.

BRUCE, ROBERT, king of Scotland, was grandson of the above, and was born about 1274. He substituted for a time to Edward I., but joined the patriots after the victory at Stirling. In 1299 a regency was appointed, Bruce and his rival Comyn being at the head of it. For several years Bruce kept up the appearance of loyalty to Edward; but in 1306 he murdered Comyn, and soon after was crowned king at Scone. He was defeated by an English army and fled to the isles, his queen and family being captured and imprisoned. The war was renewed in the following year, but Edward's death delayed the decision of the struggle. Bruce twice invaded England, took almost all the fortresses in Scotland, except Stirling, and in 1314 totally defeated Edward II. at Bannockburn. Peace was made with England in 1328, and a few months later Bruce died.

BRUCE, JAMES, one of the most celebrated of modern travellers. For a short time he held the post of British consul at Algiers, but resigned it in order to gratify his passion for travelling. After traversing the greater portion of Asia Minor, he set out on a journey to ascertain the source of the Nile. An account of this journey he subsequently published; and some of his statements, particularly those which referred to the manners and customs of Abyssinia, were received with mingled incredulity and ridicule. Though greatly annoyed by the disgraceful illiberality with which he had been treated,

he bore the taunts and sneers of his shallow critics with a taciturn pride, not deigning to satisfy disbelief, or to disarm ridicule, but trusting the day would ere long arrive when the truth of what he had written would be confirmed by others; and it is now clearly proved, from the statements of many subsequent travellers, that he was every way undeserving of the censure bestowed on him. He was born at Kinnaird House, Stirlingshire, in 1730; and died there in consequence of an injury sustained by falling down-stairs, in 1794.

BRUCE, MICHAEL, a Scotch poet. His parents being of the poorest class, his early life was one of considerable privation. This and his ardent attachment to poetry, probably aggravated a constitutional predisposition to consumption, and he died in the 21st year of his age, in 1767. His poems are few in number, but singularly plaintive and elegant.

BRUCKER, JOHANN JACOB, a German Lutheran clergyman; author of the well-known "Historia Critica Philosophia;" an immense and very learned compilation, of which Enfield's History of Philosophy is an abridged translation. Born, 1696; died, 1770.

BRUEYS, DAVID AUGUSTIN, a French dramatic writer; in early life a Protestant, but afterwards a zealous adherent of the Catholic faith. Born, 1640; died, 1723.

BRUEYS, FRANÇOIS PAUL, a gallant French admiral, commanding the fleet which conveyed the army of Buonaparte to Egypt, and killed at the battle of the Nile, 1798.

BRUGNATELLI, LUIGI, an Italian physician and chemist, long teacher of chemistry at the university of Pavia. His reputation rests on his "Pharmacopœia" and "Human Lithology." He was chief editor of the "Biblioteca Fisica d'Europa;" and other scientific periodicals. Born, 1761; died, 1818.

BRUGUIÈRES, JEAN GUILLAUME, a French naturalist and physician; author of many essays on subjects of natural history, the best of which is the "Natural History of Worms" in the Encyclopédie Méthodique. Died, 1799.

BRUHL, HEINRICH, Count of, minister of Augustus III., king of Poland; one of the most artful and expensive courtiers that ever governed a weak and credulous prince. He kept 200 domestics, paying them better than the king his own, and furnishing a more sumptuous table; but, as was natural, he plunged the country into debt and disgrace. The war with Frederick the Great was occasioned by the measures of this worthless dandy, who had in his wardrobe 365 suits of clothes! And the whole army of Saxony was captured at Pirna by the Prussian king, and Dresden itself occupied. Born, 1700; died, 1763.—Various members of this family have attained distinction. FRIEDRICH, a son of the preceding, besides being remarkable for his skill in the fine arts, wrote several good plays. Died, 1793. HANS MORITZ, his nephew, gained some reputation as an astronomer and political economist, and died while Saxon ambassador in London, 1809.

BRULLIOT, FRANZ, born in 1780 at Dü-

seldorf, became keeper of the prints to the king of Bavaria in 1808, and made himself known by a laborious compilation entitled "Dictionnaire des Monogrammes, Marques Figurées, Lettres Initiales, &c., avec lesquels les Peintres, Dessinateurs, Graveurs et Sculpteurs ont désigné leurs noms." Died, at Munich, 1836.

BRUMOY, PIERRE, a learned French Jesuit; author of the "Théâtre des Grecs," a continuation of the "Histoire de l'Eglise Gallicane," &c. Born, 1684; died, 1742.

BRUN, CHARLES LE. [LEBRUN.]

BRUNCK, RICHARD FRANÇOIS PHILIPPE, a profound classical scholar and critic, was born at Strasburg, but educated by the Jesuits at Paris. For some time he was employed in state affairs, but at length devoted himself wholly to study, and produced an edition of the "Greek Anthology," besides valuable editions of Aristophanes, Sophocles, Virgil, &c. When the revolution broke out, he took part in it, and was imprisoned at Besançon by Robespierre, whose death, however, released him. Born, 1729; died, 1803.

BRUNE, GUILLAUME MARIE ANNE, French marshal, born in 1763. Law and literature occupied his attention till the outbreak of the French revolution, when he embraced the military profession, and served as adjutant under Dumouriez, in the campaign of 1792. He afterwards served under Buonaparte, in Italy, gaining rapid promotion; and in 1799 he was commander-in-chief of the French and Dutch forces in North Holland, which successfully opposed the English under the duke of York. In 1803 he was sent as ambassador to Constantinople, and during his absence was made a marshal. On his return he was appointed governor of the Hanseatic cities, in which station he gave offence to Napoleon, and their cordiality ceased. He submitted to the Bourbons in 1814; but on his old master's return from Elba he joined him, and took the command of a division of the army in the south of France; and, on the emperor's second abdication, he was put to death by a royalist party at Avignon, August 2, 1815.

BRUNEAU, MATHURIN, an adventurer, who in 1818 assumed the title of Charles of France, was the son of a clog-maker. After numerous efforts to pass for some person of importance, he was incarcerated; and from his confinement addressed a letter, signed Dauphin Bourbon, to the governor of the Isle of Guernsey, requesting him to inform his Britannic Majesty of the captivity of Louis XVII. This letter being intercepted by the local authorities, Bruneau was transferred to the prison at Rouen: here he engaged a person named Branzon as his secretary, who found means so far to impose on the Duchess d'Angoulême, as to obtain her interest; and at length a party in his favour procured him abundant supplies. This encouraged the enterprise, until the principal, his secretary, and many friends were brought before the bar of justice, where Bruneau was declared an impostor and a vagabond, and condemned to seven years' imprisonment. Finding, however, that the fraud was still maintained by a

BRUNEL, Sir ISAMBARD, the engineer of the Thames Tunnel, was born at Hæqueville in Normandy, 1769. He was intended for the church; but he soon evinced so strong a predilection for the physical sciences, and so great a genius for mathematics, that he entered the royal navy, made several voyages to the West Indies, and returned home in 1792. During the French revolution he emigrated to the United States, where necessity, fortunately, compelled him to adopt the profession of a civil engineer. There he was engaged in many great works; but, determined upon visiting England, he offered his services to the British government; and, after much opposition to his plans for making ship-blocks by machinery, he was employed to execute them in Portsmouth dockyard. With true discrimination, he selected Henry Maudslay to assist in the execution of the work; and thus was laid the foundation of one of the most extensive engineering establishments in the kingdom. The block machinery was finished in 1806; and has continued ever since in full operation, supplying our fleet with blocks of very superior description to those previously in use, and at a large annual saving to the public. On the visit of the Emperor Alexander to this country, after the peace, Brunel submitted to him a plan for making a tunnel under the Neva; where the accumulation of ice, and the suddenness with which it breaks up on the termination of winter, render the erection of a bridge a work of great difficulty. This was the origin of his plan for a tunnel under the Thames, which had been twice before attempted without success. That great work crowned a long life almost wholly devoted to the invention and construction of works of great public utility.

Brunel received the honour of knighthood during Lord Melbourne's administration. He was vice-president of the Royal Society, corresponding member of the Institute of France, vice-president of the Institution of Civil Engineers, and chevalier of the Legion of Honour. Died, 1849.

BRUNEL, ISAMBARD KINGDOM, one of the most eminent engineers of the day, was born in 1806, while his father, the well-known constructor of the Thames Tunnel, was engaged in erecting the great block-factory in Portsmouth dockyard. From the earliest age he showed not merely high mechanical and scientific ability with unwearied industry and devotion to his profession, but a love of art which is exhibited in all his works. Various as these are, they have all the common characteristic of size and grandeur in design. Having taken an active part with his father in the construction of the Thames Tunnel, he was engaged, after the stoppage of that work, in building docks at Sunderland and Bristol. At the latter place (besides the suspension bridge over the Avon, which was never finished) he was engaged as engineer of the line of railroad known as the Great Western. On this line,

following out his ruling idea, he introduced what is called the broad gauge, which has been made the subject of vehement controversy. As an effort of engineering, however, the Great Western railway was remarkable for the magnificence of its works as well as for the speed and security of its locomotion. The South Devon and Cornish railways are not less conspicuous specimens of his wonderful mechanical powers; and the failure of the atmospheric principle as applied to the South Devon railway never shook his belief that it would be hereafter employed with success. Communication with America, as directly connected with the Great Western railroad, suggested the idea of the steamship Great Western, to which he gave double the power and tonnage of any vessel then in existence. His next work, the Great Britain, was more than double the size of the Great Western, and showed conclusively, on the rocks of Dundrum Bay, that ships of very large size can with safety be built only of iron. To him also is owing the introduction and general adoption of the screw, as a method of propulsion, in place of the paddle-wheel. Having carried out this principle with success, he proceeded to work out the idea which found its magnificent realization in the Great Eastern. This idea was that long voyages could only be made economically and speedily by steamers capable of carrying coal for the whole outward voyage, and also for the return voyage, in cases where a supply could not easily be obtained at the outport. This splendid ship was the last triumph of his life. Long and intense exertion had for many years impaired his strength, which failed altogether under his last efforts for the completion of the Great Eastern; and the life of this great engineer, who was not less estimable for his private worth than eminent for his scientific powers, was closed prematurely at the age of 63. He died September 14, 1859.

BRUNELLESCHI, FILIPPO, a very distinguished Italian architect, was born at Florence in 1377. After receiving a good education he learnt the goldsmith's art, practised sculpture for a short time, and finally adopted architecture as his sole pursuit. His enthusiasm for art was intensified by a visit to Rome with his friend Donatello. About 1407 he was chosen to undertake the great task of completing the Duomo of his native city; its noble cupola is his principal title to fame. He built also the Pitti palace and the church of St Lorenzo at Florence. He was a competitor with Ghiberti for the execution of the gates of the baptistry. He was long a member of the supreme council of Florence. Died, 1444.

BRUNI, LEONARDO. [ARETINO.]

BRUNO, St, founder of the Carthusian order of monks, the first house of which he established in the desert of Chartreuse. Born at Cologne, 1030; died in Calabria, 1101.

BRUNO, GIORDANO, an Italian philosopher, one of the boldest and most original thinkers of his age, was born at Nola, about 1550. He became a Dominican monk, but his religious doubts and his censures of the

monastic orders compelled him to quit his monastery and Italy. He embraced the doctrines of Calvin at Geneva, but doubt and free discussion not being in favour there, he went after two years' stay to Paris. He gave lectures on philosophy there, and by his avowed opposition to the scholastic system made himself many bitter enemies. He spent next two years in England, and became the friend of Sir Philip Sidney. In 1585 he went again to Paris and renewed his public lectures. After visiting and teaching in various towns in Germany, he returned in 1592 to Padua, and went afterwards to Venice, where he was, in 1598, arrested by the Inquisition and sent to Rome. He lay in prison two years, and on the 17th February, 1600, he was burnt as a heretic. Bruno was a man of powerful understanding, vigorous and fertile imagination, and rich and diversified learning. His theory of the world was pantheistic. He was well versed in astronomy, and adopted the views of Copernicus. But he was also a believer in astrology. His works in Latin and Italian are numerous, and abound in bold and noble thought and rich eloquence. Spinoza was indebted to Bruno for some of his theories. Among the works of Bruno are the following: "Della Causa, Principio ed Uno," "Dell' Infinito Universo e Mondi," "La Cena delle ceneri," "Spaccio della bestia trionfante," &c.

BRUNSWICK, FERDINAND, Duke of, one of the most distinguished generals in the seven years' war in Germany. He entered the service of Frederick the Great, who gave him liberal praises and large estates, and appointed him commander of the English and Hanoverian forces in the Seven Years' War. He obtained victories over the French at Crevelt and Minden, but he did not resume his service after the peace. Born, 1721; died, 1792.

BRUNSWICK WOLFENBUTTEL, MAXIMILIAN JULIUS LEOPOLD, a prince whose name is revered for his disinterested benevolence and humanity, of which the last action of his life is a striking example:—During a terrible inundation of the Oder, which spread destruction in the neighbourhood of Frankfurt, where the prince commanded a regiment in the garrison, his zeal to save the lives of a family surrounded by the waters, induced him to put off in a boat to their assistance, when he was swept away by the torrent, and perished in the humane attempt. Born, 1752; died, 1785.

BRUNSWICK LUNENBURGH, CHARLES WILLIAM FERDINAND, Duke of, Prussian general. He studied the art of war under his uncle, and highly distinguished himself in the service of Frederick of Prussia. At the commencement of the French revolution he took the command of the Prussian and Austrian forces intended for the liberation of Louis XVI.; but the violent manifesto he published served only to exasperate the republican army under Dumouriez, and he was compelled to retreat. The ill-success of this expedition caused him to resign the command, and occupy himself with the domestic affairs of his new province. In 1806 he was again appointed

leader of the Prussian army, and was mortally wounded at the battle of Auerstadt in that year.

BRUNSWICK, FREDERICK WILLIAM, Duke of, youngest son of Charles William Ferdinand of Brunswick, and brother of the persecuted Queen Caroline of England, was born in 1771. He entered the Prussian army, and took an active part in the war against revolutionary France. In 1809 he raised a body of volunteers in Bohemia; but finding no chance of making an effectual stand against the power of France, he embarked his troops for England, where they were taken into the British service, and employed in the Peninsula. Foreseeing that great changes were likely to take place on the Continent, he hastened to his paternal dominions in 1813, raised a large body of troops, and was among the foremost to meet the French army in 1815, when, two days before the decisive battle of Waterloo, he fell at Ligny, gallantly fighting at the head of his "brave Brunswickers."

BRUNTON, MARY, the daughter of Colonel Halfour, was born in one of the Orkney isles; married a minister of the Scotch church; and is known as the authoress of the novels, "Discipline," "Self-Control," and other works. Born, 1778; died, 1818.

BRUTUS, LUCIUS JUNIUS, one of the most celebrated characters of early Roman history, but whose story is half-mythical, was the son of Marcus Junius, a wealthy patrician of Rome. The father and brother of Lucius Junius were assassinated by order of their relative, Tarquinius the Proud; and Lucius Junius owed the preservation of his life to an assumed idiotism. It was Sextus Tarquinius who, by his criminal outrage on Lucretia, the wife of Collatinus, afforded him an opportunity to arouse the people against the king and his sons. Throwing off his pretended stupidity, he joined with Collatinus; assembled the senate, and caused a decree to be made for banishing the king and establishing a republic. This charge took place, and Brutus and Collatinus were appointed chief magistrates with the title of consuls. The change in the form of government gave offence to many of the patricians; and the two sons of Brutus and three nephews of Collatinus conspired, with others, to murder the consuls and restore the monarchy. The plot was disclosed by a slave; and the conspirators were brought before the consuls for judgment. Brutus, disregarding the entreaties of the multitude and his own feelings as a parent, sentenced his sons to death. Collatinus endeavoured in vain to save his nephews, and retired from the consulship. The cause of the Tarquinius was espoused, according to the legend, by some of the neighbouring cities, and Brutus fell in combat with Aruns, one of the sons of the deposed king. The conflict ended in the victory of the Romans, the body of Brutus was interred with great solemnity, and a statue was erected to his memory.

BRUTUS, MARCUS JUNIUS, an illustrious Roman, one of the murderers of Julius Cæsar. His mother was the sister of Cato. He at first sided with Pompey, but, being treated with great lenity after the battle of

Pharsalia, he attached himself to Caesar, by whom he was greatly caressed and trusted. But the stern republican spirit of Brutus rendered it impossible for all Caesar's kindness to him to reconcile him to Caesar's ambition; and he at length conspired with Cassius and others, and slew him on the ides of March, B.C. 44. Antony succeeded in exciting the popular indignation against the murderers, who fled from Rome, and raised an army, of which Itricus and Cassius took the command; but being totally defeated at the battles of Philippi, where they encountered the army of Antony and Octavianus, Brutus escaped with only a few friends, passed the night in a cave, and, as he saw his cause irretrievably ruined, requested Strato, one of his confidants, to kill him. For a long time his friend refused; but at last presenting the sword as he turned away his face, the noble Roman fell on it and expired, B.C. 42, in the 43rd year of his age.

BRUYÈRE, JEAN DE LA, an eminent French writer, of whose life few particulars are known. He passed the greater part of his life in peaceful literary retirement, and was admitted to the French Academy about three years before his death. His most celebrated work is the "Caractères de Théophraste," a lively and clever satire on various characters and the manners of his time. Of this work Voltaire said, "Its rapid and nervous style struck the public at once; and the allusions to living persons, which abound through its pages, completed its success." La Bruyère also published a translation of the work of Theophrastus, the Greek philosopher, entitled "Characters," and he wrote "Dialogues on Quietism," in which he opposed Fénelon, but which were not published till several years after the author's death. Born, 1644; died, 1696.

BRUYN, CORNELISZ, a Dutch painter and traveller, born at the Hague in 1652. After studying his art at Rome he travelled through Asia Minor, Egypt, and the Archipelago, making numerous sketches of noteworthy scenes and objects. After a short period of study at Venice he travelled again, visiting Russia, Persia, India, and Ceylon. His narrative of his first travels appeared in 1714, that of his second four years later. Both works are illustrated with engravings after his own sketches, abound in curious information, and are on the whole faithful and trustworthy. The time of his death is not known.

RYAN, MICHAEL, a connoisseur of paintings, whose judgment was highly esteemed, though he lost large sums by his own purchases. He was the author of a valuable "Biographical and Critical Dictionary of Painters and Engravers." Born, 1737; died, 1821.

BRYAN, or BRIANT, Sir FRANCIS, a distinguished soldier, statesman, and poet. He served with great credit against the French in the earl of Surrey's expedition, and subsequently became chief justice of Ireland. He is chiefly remembered, however, as a poet; his works being printed with those of his friends Wyatt and Surrey. Died, 1550.

BRYANT, JACOB, a distinguished anti-

quarian and philologist; author of an able, though singular, "Analysis of Ancient Mythology," published in 3 vols. 4to; a treatise on the Truth of Christianity, a work in denial of the existence of Troy, and various other publications of great erudition and ingenuity. Born, 1715; died, 1804.

BRIDGES, Sir SAMUEL EGERTON, bart., a man of versatile talents and eccentric character, was born in 1762, at Wootton Court, in Kent, and was educated at Queen's College, Cambridge. In 1790, after the death of the last duke of Chandos, he induced his elder brother, the Rev. E. T. Bridges, to prefer a claim to the barony of Chandos, the consideration of which was long procrastinated; but at length, in 1803, the House of Lords decided against its validity. On the death of his brother, in 1807, Sir Egerton adhered to his favourite notion, of obtaining a coronet; and he regularly added to the signature of his name—"per legem terræ, B. C. of S."—meaning Baron Chandos of Sudely. He was (1812) returned M. P. for Maidstone, which borough he continued to represent about six years. In 1814 he was created a baronet; and in 1818, upon the loss of his seat in the House of Commons, he visited the Continent. In 1826 he returned to England, but his affairs becoming embarrassed, he removed to Geneva, where he remained in great seclusion until his death. His literary labours were multifarious. His abilities as a genealogist, topographer, and bibliographer, are attested by his "Censura Literaria Restituta," 10 vols.; "Theatrum Poetarum;" "Stemmata Illustrata;" "British Bibliography," &c. Besides these, he published the novels of "Mary de Clifford," "Arthur Fitz-Albin," and "The Hall of Hellingsay;" "Imaginary Biography," 3 vols.; "Recollections of Foreign Travels," 2 vols.; "The Autobiography, Times, Opinions, and Contemporaries of Sir Egerton Brydges," 2 vols.; and numerous other works; independent of numerous contributions to periodicals. Died, September, 1837.

BRIDONE, PATRICK, a Scotch gentleman; author of "Travels into Sicily and Malta," &c. Born, 1741; died, 1819.

BUCER, MARTIN, one of the most eminent of the reformers, was born near Strasburg in 1491. He entered the Dominican order, but became a convert to the reformed faith in 1521. He settled at Strasburg, which owed to his labours as pastor and professor of theology for twenty years the establishment of the reformation there. He took part in the conferences of Marburg, hoping to reconcile Luther and Zwinglius; but refused at the diet of Augsburg to subscribe the famous "Interim" of Charles V. In 1548 he was called by Cranmer, with Fagius, to England, and for two years was professor of divinity at Cambridge. He was most highly esteemed for his piety, learning, discretion, and especially his knowledge of the Scriptures. His writings are very numerous. He died at Cambridge in 1551, and was honoured with a sumptuous burial. In the reign of Queen Mary Cardinal Pole had his body, with that of Fagius, exhumed, and publicly burnt with their books. But

soon after the accession of Queen Elizabeth this savage sentence was repealed, and the memory of those great men restored.

BUCH, Baron **LEOPOLD VON**, one of the first geologists of the age, was born in Brandenburg, in 1774. He was a fellow-pupil with Alexander von Humboldt at the Freiberg School of Mines, then under the direction of Werner. He spent his long life in almost incessant travels on foot through the various countries of Europe, carefully observing geological facts, and drawing from them either satisfactory conclusions or fruitful hints and suggestions, which afterwards might lead others on the way to scientific results. His separate works and scientific memoirs are nearly a hundred in number. Among the most important are the "Physical Description of the Canary Islands," with two supplementary treatises, in which he develops his theory of volcanic action, and of the upheaval of continents and mountain-chains. This work appeared in 1825. His "Travels through Norway and Lapland" contain some of his most memorable discoveries; and we must mention also his "Geognostic Observations on his Travels through Germany and Italy." His scientific memoirs appeared in the "Abhandlungen" of the Academy of Sciences of Berlin, the "Taschenbuch für Mineralogie," and other journals. Von Buch is the only geologist, said Professor Edward Forbes, who attained an equal fame in the physical, the descriptive, and the natural history departments of his science. In all these he was an originator and a discoverer. Born of an ancient and distinguished family, and possessed of an adequate fortune, he remained unmarried, and lived for science only. Honours and titles were given him, for which he did not care too much; and he was happy to aid those who loved science as he did, but to whom Fortune was less kind. He was a member of the Berlin Academy, foreign associate of the French Academy of Sciences, and foreign member of the Royal Society of London, and member of a great many other scientific bodies. He held also a high office in the Prussian court. Died at Berlin, 4th March, 1853.

BUCHAN, Right Hon. **STUART ERSKINE**, Earl of, a nobleman indefatigably devoted to literary and scientific pursuits, and who may be considered the founder of the Antiquarian Society of Scotland. In 1791 he instituted an annual commemoration at Ednam, the birthplace of Thomson, in honour of the poet; and on that occasion Burns composed his "Address to the Shade of the Bard of Ednam." Died, 1829.

BUCHAN, **WILLIAM**, M.D., a native of Scotland, and author of the well-known "Domestic Medicine," &c. Born, 1729; died, 1805.

BUCHANAN, **GEORGE**, the celebrated Scottish historian and poet, was born in 1506. He was educated at St Andrews and at Paris, and for three years was a professor at the college of St Barbe. He was next tutor to the young Lord Cassilis, and in 1537, on his return to Scotland with his pupil, he was named tutor to a natural son of James V. Having attacked the monks in

several Latin satires, he was imprisoned for heresy by Cardinal Beaton; and though he escaped, persecution met him everywhere, and he was driven from place to place through great part of his life. He taught at Bordenaux, at Paris, at Coimbra, and in 1566 was appointed principal of St Leonard's College. Four years later he became tutor to the young king James VI., and had several offices of state conferred on him. His principal work is the "Rerum Scoticarum historia," completed just before his death. He wrote an elegant Latin version of the Psalms, "De Jure Regni apud Scotos," and the satires "Somnium," "Franciscanus," &c. Died at Edinburgh, 1592.

BUCHANAN, **CLAUDIUS**, D.D., a Scotch divine, chaplain at Bengal, and professor and vice-provost of the college at Fort William. Of his numerous works the most interesting are "Christian Researches in Asia," and a "Memoir on the Expediency of an Ecclesiastical Establishment in India." Born, 1766; died, 1815.

BUCHOZ, **P. JOSEPH**, a naturalist and botanist of Metz, one of the most industrious compilers that ever lived, his works forming more than 300 volumes. Born, 1737; died, 1807.

BUCKINGHAM, **GEORGE VILLIERS**, Duke of, the unworthy favourite of James I. and Charles I., was a native of Leicestershire, and was born in 1592. After completing his education in France he was introduced at the court of James I., who took a liking to him immediately. He was knighted, pensioned, made K. G., viscount, earl, and marquis, and was rapidly raised to the highest offices in the state, became the dispenser of all favours and honours, and conducted himself with so much pride and insolence as to excite popular hatred and disgust. In 1623 he accompanied Prince Charles on his romantic journey to Spain, undertaken for the purpose of courting the Infanta. It was Buckingham's influence which led to the war with Spain, and for the failure of the expedition to Cadiz he was impeached. He continued to be the favourite minister of Charles I., and the ready instrument of his tyranny. Selfish and revengeful, his intrigues brought on the war with France. Being intrusted with the command of an army, he lost the flower of it in an ill-conducted attack on the Isle of Rhé, and returned to reft his shattered armament. When he was again about to sail, he was assassinated at Portsmouth, by a lieutenant of the name of Felton, August 23, 1628.

BUCKINGHAM, **GEORGE VILLIERS**, Duke of, son of the preceding, was born in 1627; studied at Cambridge; served the king in the civil wars; was present at the battle of Worcester; had his estates seized by the parliament, which, however, were afterwards restored to him; married the daughter of Fairfax, and was imprisoned by Cromwell; and he eventually became minister to Charles II., and was one of his most profigate courtiers. His political conduct was, like his general behaviour, characterized by unprincipled levity and imprudence; and though his literary and conversational

powers were far above mediocrity, yet he was an object of deserved contempt, and died, unregretted, at Kirby Moorside, Yorkshire, in 1688.

BUCKINGHAM, JAMES SILK, traveller and miscellaneous writer, was born near Falmouth, in 1784. In his tenth year he became a sailor, and after numerous adventures was appointed to the command of a vessel when barely twenty-one, and performed several voyages to the West Indies and America in the double capacity of captain and supercargo. After various abortive efforts to trade to India without the licence of the East India Company, he at last succeeded; but he soon abandoned mercantile pursuits for literature, and established the Calcutta Journal, which brought him a large income and great popularity. But the independence of his opinions and the views he inculcated proved obnoxious to the Company, and after suffering a great deal of persecution, he was ordered to quit Calcutta, and his journal was suppressed. On his return to England, his cause was warmly taken up by parliament, the press, and the public; but his claims for compensation were repudiated by the Company, and his wrongs left unredressed. Finding his return to India impossible, he established the "Oriental Herald," in 1824; and in this paper, and in a series of lectures which he delivered in almost every large town in England and Scotland, paved the way for the abolition of the East India Company's charter, and a revision of the laws and institutions under the Company's rule. From 1832 to 1837 he represented Sheffield in parliament. In 1837 he visited America, where he was received with great enthusiasm. On his return to England he took an active part in the discussion of all public questions, and his latter years were soled by a pension from the East India Company. Mr Buckingham published his travels in various countries of the East; and his last publication was his "Autobiography." Died, 1855.

BUCKINGHAMSHIRE, JOHN SHEPHERD, Duke of, son of the earl of Mulgrave, was born in 1649; served under Marshal Turenne, and took a part in the revolution of 1688. He also distinguished himself as a poet. Buckingham House, in St James's Park, since converted into a royal palace, was originally built for him. Died, 1720.

BUCKINK, ARNOLD, an artist of the 15th century, and the first who engraved maps on copper. He illustrated an edition of Ptolemy, which was printed at Rome, by Sweyheim, one of the earliest printers in Italy.

BUCKLAND, WILLIAM, D.D., a distinguished geologist, was born at Axminster in 1784, received his early education at Winchester, and entered Corpus Christi College, Oxford, in 1801. From an early age he had shown a great predilection for natural science, and on his being appointed to the readership of mineralogy and geology in Oxford university, his profound knowledge of the subject, joined to his powers of exposition, awakened an interest for the pursuits of science, in contradistinction to

those of literature, to which Oxford had hitherto been a stranger. His first work was the "Vindiciae Geologicae, or the Connection of Geology with Religion explained," published in 1820; and the year following he made the discovery of the remains of animals in the caves at Kirkdale, which formed the basis of his work entitled "Reliquiae Diluvianae, or Observations on Organic Remains attesting the Action of an Universal Deluge." From this period his pen was unceasingly occupied with geological subjects; and his disquisitions not only displayed great powers of observation and unwearied industry, but many of the general conclusions at which he arrived became part of the recognized laws of geological science. His "Geology and Mineralogy considered with reference to Natural Theology," which formed one of the Bridgewater treatises, has become a standard work. He was chosen F.R.S. in 1818, and about ten years later became a member of the council; was twice president of the Geological Society, and from 1847 a trustee of the British Museum. In 1825 he was appointed to the living of Stoke St Charity, in Hampshire, and also became a canon of Christ Church; and twenty years later he was nominated dean of Westminster by the late Sir Robert Peel. But his zeal for science suffered no abatement; he continued to take an interest in all questions involving social amelioration; but in 1850 his intellect gave way, and from that period till his death, in 1856, he remained in a state of mental weakness.

HUCKLE, HENRY THOMAS, political and historical philosopher, was born in 1822. He was the son of a wealthy merchant at Lee, and in consequence of his delicate health was educated at home. He gained at an early age the friendly esteem of Hallam and Bunsen, and devoted his short life exclusively to study and writing. In 1858 appeared the first volume of his (projected) "History of Civilization in Europe," which created an extraordinary sensation by its daring speculations and vast learning. A second volume appeared in 1861, which only completed the Introduction to the History. In the autumn of 1861, in the hope of improving his health, he visited the East, but was seized with typhus fever, and died at Damascus, May 29, 1862.

BUDDÆUS, JOHANN FRANZ, a Lutheran divine, was born in Pomerania, 1687, became professor of theology at Jena, and wrote "Historia Juris Naturæ;" "Historia Ecclesiastica Veteris Testamenti," &c. Died, 1729.

BUDDHA, GAUTAMA, also named SAKYA MUNI, the founder of Buddhism, lived probably in the 6th century, B. C. His father was king of Behar, and his mother's name was Maya. Early distinguished both for his personal beauty and superior intellect, he is said to have been deeply affected by the observation of the sins and miseries of the world, and to have retired into solitude for some years. He then appeared as a religious teacher, and went through various provinces of India propagating his doctrines, a kind of reformed Brahmanism. He is said to have lived till his 80th year, and the date usually

given for his death is 543 B. C. But his appearance is by some placed as early as the 14th, and by others as late as the 4th century, B. C. It is certain that his religion was triumphant in Hindostan in the middle of the 3rd century, B. C.

BUDE, GULLAUME, in Latin **BUDEUS**, an eminent classical scholar, was born at Paris in 1467. After attending the universities of Paris and Orleans he applied himself to serious study, embracing a wide range of subjects, but especially the Greek language and literature. He obtained the appointment of secretary to Louis XII., and that of librarian to Francis I. The city of Paris gave him the office of provost of the merchants, and he was sent on several missions to the papal court. Budæus grudged every hour that was taken from his chosen studies, and was fretted because on his wedding day he had only six hours for study! Among his works, which fill four folio volumes, are commentaries (in Latin) on the Greek tongue, a learned treatise, "De Asse," frequently republished, "Annotations on the Pandects," &c. Died at Paris, 1540.

BUDGELL, EUSTACE, a distinguished writer, honoured with the friendship of Addison, and other eminent men of his time, was born at Exeter, in 1685. He studied at Oxford and at the Temple, London, and through his family connection with Addison, became a contributor to the "Spectator." He obtained a valuable government appointment in Ireland, but soon after lost his property in the South Sea scheme. His character did not stand the test of poverty, and in despair he threw himself into the Thames, 1736. Budgell was also author of memoirs of the "Boyles," and numerous papers in the Guardian, and other periodicals.

BUFFON, GEORGES LOUIS LECLERC, Count de, the great French naturalist, was born in Burgundy in 1707. He studied mathematics and natural philosophy, and constructed a large mirror with which he made experiments on the power of burning glasses. On his appointment as intendant of the Jardin du Roi, he projected the great work on which his fame rests, and devoted himself for the rest of his life to its preparation. He was assisted by Daubenton in the purely anatomical portions. The "Histoire Naturelle" appeared in successive volumes between 1749 and 1788, and an extensive supplement was added after Buffon's death. Its reputation was immense, it was translated into the principal languages of Europe, and has been very frequently reprinted. Buffon was admitted to the Academy of Sciences in 1732. Died, at Paris, in 1788. In the Reign of Terror his remains were exhumed, and his monument destroyed. His son, too, perished by the guillotine.

BUGEAUD DE LA PICONNERIE, THOMAS ROBERT, duke of Isly, and marshal of France, was born at Limoges in 1784. By the maternal side he was descended from an old Irish family. At an early age he showed a decided predilection for the army; but his family thwarted his

views, and he only succeeded by running away from home, and becoming a private soldier. He was promoted to the rank of corporal on the field of Austerlitz; and rose through all the grades of his profession, till he reached the rank of general in 1832. His attachment to the cause of Louis Philippe led, in 1833, to his appointment as commandant of Blaye, a fortress in which the duchess de Herri was imprisoned; and his conduct in that capacity having been called in question by Dulong, a member of the opposition, a duel ensued, in which the latter fell. His subsequent exploits in Algeria, whither he was first sent in 1837, and where he conquered Abd-el-Kader, gained for him the baton of field-marshal, and the title of duke from the scene of his victory over the Moors in 1841. He had been named governor of Algeria in 1840. Died of cholera at Paris, 1849.

BULL, JOHN, doctor of music, Oxford, was chamber musician to James I. His compositions were very numerous, and the national anthem "God save the King" has been attributed to him, but without any proof. The time of his death is uncertain, but he was alive in 1622.

BULL, GEORGE, bishop of St David's, a learned prelate, and a very industrious and able theological writer; author of "Harmonia Apostolica," "Defensio Fidei Nicenæ," &c. Born, 1634; died, 1709.

BULLANT, JEAN, a French architect, who flourished about 1540-1598. On his return from Italy he built, with Goujon, the Château d'Ecouen for the Montmorency family; a palace for Catherine de Medici; held the office of Superintendent of the Royal Buildings under several successive sovereigns; and was employed at the Tuilleries and the Louvre. He wrote "Regie générale d'architecture des cinq manières," first published in 1564, and "Recueil d'horlogerie." &c.

BULLER, the Right Honourable CHARLES, a politician of rare promise, was the only son of Charles Buller, Esq., of the East India Civil Service, and born at Calcutta in 1806. He received his education at Harrow, Edinburgh, and Cambridge, and from an early age gave promise of more than ordinary abilities. In his 24th year he entered parliament, on the eve of the passing of the Reform Bill, for the borough of West Looe, which belonged to his family. But family interest was to him as nothing compared with that of the public. He voted for the bill; and the borough of West Looe was consigned to schedule A; but he was subsequently returned for Liskeard, a seat which he retained till his death. In all questions that came before parliament he took an active part; and on many occasions his opinions were far in advance of the Whig party, with whom he subsequently took office. In 1838 he accompanied Lord Durham to Canada as his private secretary; and in this capacity drew up the masterly report upon the affairs of that colony, which is considered as one of the most effective state papers of the age. In 1841 he was appointed secretary to the Board of Control, an office, however, which he relinquished in 1842 on the formation of the Peel ministry. From

ministry. From

that time forward his attention was specially directed to the state of the British colonies and to emigration; and in the mean time he had gained the ear of the House of Commons, which had perceived in the young statesman a desire to achieve something beyond the mere triumph of a party; the playfulness of his manner had become not the mask but the ornament of his political talents, and the attachment universally felt for the man had ripened into confidence in the judgment and courage of the statesman. In 1846, on the formation of the Whig Cabinet, he was appointed judge advocate; in November of the same year he was nominated a queen's counsel, sworn of the privy council in July, 1849, and in November exchanged the easy office of judge advocate for the onerous duties of chief commissioner of the poor laws, an office which he held till his death. Besides discharging faithfully his official duties, he found leisure for literary pursuits, and many able articles in the Globe and the Edinburgh Review emanated from his versatile pen. As a companion and friend in private life no man's society was more enjoyed by persons of all shades of politics. His wit always told, but never offended. With nothing of the cant of patriotism, and little of the creed of party, he lived in singleness of devotion to the public good; and though, from his untimely end, he has left no conspicuous monument of his public labours, few men have descended to the grave more universally beloved and respected for public virtue and private excellence. Died, November 28, 1848.

BULLET, PIERRE, an eminent French architect of the 17th century. He built the church of St Thomas Aquinas, and many other splendid edifices in Paris, and wrote some good architectural works.

BULLIALDUS, ISMAEL, a French astronomer and mathematician; author of "Philolaus—a Dissertation on the True System of the World," "Astronomia Philolaica," in which he propounds a system compounded of the Ptolemaic and Copernican systems, and opposes the theories ("laws") of Kepler; "Tabula Philolaicae," &c. Born, 1605; died, 1694.

BULLIARD, PIERRE, a French botanist; author of "Dictionnaire Élémentaire Botanique," "Herbier de la France," &c. He designed and engraved his own plates. Born, 1742; died, 1793.

BULLINGER, HENRY, a Swiss pastor of the Reformed Church, and the intimate friend of Zuinglius, whom he succeeded in 1531 as pastor of Zurich. His writings were very numerous, but being in great part controversial, they are now little known. Born, 1504; died, 1575.

BULMER, WILLIAM, a celebrated English printer, was born at Newcastle-on-Tyne in 1758. In his youth he enjoyed the friendship of Thomas Bewick, the engraver. He settled in London, and gained so great reputation as a printer that he was named, about 1788, head of the printing establishment projected by Nicol for the preparation of a magnificent edition of Shakspeare. He retired in 1819, and died in 1830. The "Shakspeare" appeared in 9 vols. folio, between 1791—1805. From his press issued

also splendid editions of Milton's Poetical Works, Goldsmith's and Parnell's Poems' the "Bibliographical Decameron," and the "Museum Worsleyanum."

BULOW, FRIEDRICH WILHELM, count von Dennewitz, a gallant Prussian general, whose services were most essential to his country on many perilous occasions. He was actively engaged against the French at the earliest periods of the revolutionary war; and, in 1808, was made general of brigade. His memorable victories, in 1813, at Mœckern, Luekan, Grosbeeren, and Dennewitz, were rewarded by promotion and a title. He afterwards distinguished himself in Westphalia, Holland, Belgium, &c.; and, as commander of the fourth division of the allied army, he contributed to the victorious close of the battle of Waterloo. Born, 1755; died, 1816.

BULOW, Baron HEINRICH VON, distinguished in the annals of diplomacy, was born in 1760, at Mecklenburgh Schwerin, where his father filled a high office. While student at Heidelberg, in 1813, he was summoned home to take part in the defence of his country against the French, and after obtaining great distinction in various engagements under Count Walmoden, he once more returned to Heidelberg to finish his studies, whence he passed into the diplomatic service of Prussia through the influence of Prince Hardenberg and Baron W. von Humboldt, whose daughter he subsequently married. In 1826 he was appointed ambassador of Prussia at the court of St James's; and to his talents were due several of the most important treaties which allayed the warlike spirit of the times. Here he remained till 1841, when he was nominated minister of foreign affairs at Berlin; but the crisis of affairs in Prussia proved too much for his exhausted energies, and the overstraining of his intellect produced a mental alienation, under which he succumbed in 1846.

BUNSEN, CHRISTIAN CHARLES JOSIAS, was born August 25, 1791, at Korbach, in the principality of Waldeck, and was educated at Marburg, and afterwards at Göttingen, where, in 1811, he was admitted into the Gymnasium, and, in 1813, published an essay "De Juer Athenensium Hæreditario," which attracted great attention. In 1815 he became acquainted with Niebuhr at Berlin; and, after a stay in Paris, where he studied Oriental languages under Silvestre de Sacy, he went to Rome, where Niebuhr, then Prussian minister, procured for him the post of Secretary of Embassy. On Niebuhr's retirement, in 1824, he was appointed chargé d'affaires, and afterwards minister, by Frederick III., to whom he had recommended himself by his great theological learning. After a sojourn of twelve years in Rome, he was sent as Prussian minister, first to Switzerland, and then to England. In his official capacity he won the esteem of all, and with this country especially he was connected by many ties. He enjoyed the friendship of Dr Arnold, and one of his sons was educated under him at Rugby, and is now in the orders of the English Church. But his eminence as a scholar and writer will put out of sight

his political character and services. His writings are numerous and elaborate, but they have met with much hostile criticism, and his views have failed to secure any general acceptance in England. He laboured with unwearied diligence in theology, history, and archaeological research. Among his chief works are the "Church of the Future," "Hippolytus and his Age," "Christianity and Mankind, their Beginnings and Prospects," and "The Place of Egypt in the History of the World." On some of these, and other works, he was constantly engaged at Heidelberg, where he chiefly resided from the year 1834 until his death, which took place at Bonn, November 28, 1860, in his 69th year.

BUNYAN, JOHN, author of the "Pilgrim's Progress," was born at Elstow, near Bedford, in 1628. His father was a tinker, but gave his son such education as could be had at the village school, and brought him up to his own trade. The force of his imagination and the influence of the religious excitement of the age early appeared in fits of agitation and religious terror. He had a propensity to profane swearing, but lived a decent and moral life. In 1645 he served a short time in the parliamentary army, and soon after he became the subject of most painful mental conflicts, agonizing doubts and fears, and a strange propensity to speak blasphemy. Time and the friendly counsels and help of religious neighbours brought healing and calm, and he joined the Baptists at Bedford, and soon began preaching. In 1660 he shared the persecution then carried on against Dissenters, and was thrown into Bedford gaol. All attempts to coax or terrify him into promising to preach no more failed, and there he lay twelve years. He preached to the prisoners, made tagged laces for sale, read the Bible and the Book of Martyrs, and at last began to write. He wrote various controversial tracts, and had even to dispute with his own party in defence of "open communion." He was liberated in 1672. His name was then widely known, and his influence great: so that he was called "Bishop of the Baptists." He took cold on a benevolent excursion, fever followed, and he died at London in August, 1688, and was buried in Bunhill Fields. The "Pilgrim's Progress" was partly written in Bedford gaol. It circulated at first among the poor, was soon widely known and greedily devoured. The tenth edition appeared in 1685. No book but the Bible and the "Imitation of Jesus Christ" has been translated into so many languages. And it has long been no less the delight of the educated and refined than it was at first of the poor and ignorant. Bunyan's "Holy War," as an allegory, is only surpassed by the "Pilgrim." His other works are very numerous, the most known being the "Grace Abounding," and "Jerusalem Sinner saved."

BUONACCORSI. (VAGA, FERINO DEL.)

BUONAPARTE, NAPOLEON, emperor of the French, king of Italy, &c., was born at Ajaccio, in the island of Corsica, August 15, 1769. His father, Charles Buonaparte, was an advocate of considerable reputation, and his mother, whose maiden name was Maria

Letitia Ramolino, was well descended, remarkable for beauty, strong minded, and accomplished. Napoleon was their second child; Joseph, afterwards king of Spain, being his senior. He was educated at the military school of Brienne, and entered the army as a second lieutenant of artillery, in 1785. At the age of 20, the French revolution opened a field to the exertions of Napoleon; and during his correspondence with the Corsican general, Paoli, who had vainly endeavoured to enlist him on his side, the germs of future ambition began to be developed. In 1793, during the Reign of Terror, he was actively employed at the siege of Toulon, on which occasion the convention gave him the command of the artillery; and by his courage and exertions the city was recovered from the English and royalists. Subsequently to this he displayed great talents in the army employed against Piedmont; and, in October, 1795, we find him at Paris, commanding the conventional troops which defeated those of the sections, and quelled the revolt. In March, 1796, he married Josephine, widow of Viscount de Brucharnois, who suffered under Robespierre: he was now appointed to the command of the army of Italy, and on the 10th of May following he gained the battle of Lodi. The subjugation of the various Italian states, and his repeated successes over the Austrians, ended in a peace, when he was within 30 miles of Vienna. Thus disengaged, a new theatre for the display of his genius presented itself. With a large fleet, and 40,000 troops on board the transports, he set sail for the intended conquest of Egypt, in May, 1798. On his way thither he took Malta; and on the 22nd of September we find him celebrating the battle of the Pyramids at Grand Cairo, but his progress was checked by the heroism of Sir Sidney Smith and his handful of British troops at St John d'Acree; and the various reverses which the French army continued to meet with, coupled with the fact that his presence seemed necessary at home, induced Buonaparte to embark secretly for France, accompanied by a few officers wholly devoted to him, and to leave his brave but shattered army to the care of General Kleber. He landed at Frejus, in October, 1799; hastened to Paris; overthrew the directorial government; and was raised to the supreme power by the title of First Consul. He now led a powerful army over the Alps; fought the celebrated battle of Marengo, in June, 1800; and once more became master of the whole of Italy. A peace with Austria followed these successes; and, soon after, a brief and hollow peace with England. On the 20th of May, 1804, he was raised to the imperial dignity; and in December was crowned, with his empress Josephine, by Pope Pius VIII. Here, brief as our space is, we must notice an incident too striking to be overlooked:—As soon as the pontiff had blessed the crown, the emperor, without waiting for the remainder of the ceremony, eagerly seized it, and putting it first upon his own head, afterwards placed it on the head of Josephine. He now seriously meditated the invasion of England, assembling a numerous flotilla,

and collecting 200,000 troops, which were encamped in the neighbourhood of Boulogne, ostensibly for that purpose; but Austria and Russia appearing in arms against him, and the battle of Trafalgar having nearly annihilated the French navy, he abandoned the design, and marched his troops to the banks of the Danube. On the 11th of November, 1805, the French army entered Vienna; the memorable battle of Austerlitz took place on the 2nd of December, and the humiliating treaty of Presburg followed. The year 1806 may be regarded as the era of king-making. New dynasties were created by him, and princes promoted or transferred according to his imperial will: the crown of Naples he bestowed on his brother Joseph, that of Holland on Louis, and Westphalia on Jerome; while the Confederation of the Rhine was called into existence to give stability to his extended dominion. Prussia again declared war; but the disastrous battle of Jena annihilated her hopes, and both she and Russia were glad to make peace with the French emperor in 1807. Napoleon now turned his eye on Spain; treacherously causing the abdication of Charles IV., and the forced resignation of Ferdinand, while he sent 80,000 men into that country, seized all the strong places, and obtained possession of the capital; but this was the great error of his life, and one of the main causes which led to his downfall. In 1809, while his armies were occupied in the Peninsula, Austria again ventured to try her strength with France. Napoleon thereupon left Paris, and at the head of his troops once more entered the Austrian capital, gained the decisive victory of Wagram, and soon concluded a peace; one of the secret conditions of which was, that he should have his marriage with Josephine dissolved, and unite himself to the daughter of the emperor, Francis II. His former marriage was accordingly annulled; Josephine, with the title of ex-empress, retired to Malmaison, a seat about 30 miles from Paris; and he espoused the Archduchess Maria Louisa in April, 1810. The fruit of this union was a son, born March 23, 1811, who was named Napoleon Francis Charles Joseph, and styled king of Rome. Dissatisfied with the conduct of Russia, Napoleon now put himself at the head of an invading army, prodigious in number, and admirably appointed, and marched, with his numerous allies, towards the enemy's frontiers, gained several battles, and at length reached Moscow, where he hoped to establish his winter quarters, but which he found in flames. A retreat was unavoidable; and now was presented to the eye a succession of the most appalling scenes recorded in modern history—a brave and devoted army encountering all the horrors of famine in a climate so insupportably cold that their freezing bodies strewed the roads, while an exasperated phalanx of Cossacks hung upon the rear of the main army, hewing down without remorse the enfeebled and wretched fugitives. Buonaparte fled to Paris, partially disclosed his losses, and called upon the senate for a new army of 350,000 men; which was unanimously agreed to, and he marched to meet

the combined Russian and Prussian forces. Victory still for a time hovered over his banners; but Austria having joined the coalition, the great battle of Leipsic, in which he lost half of his army, was decisive as to the war in Germany. Napoleon, however, again returned to Paris, and demanded another levy of 300,000 men. The levy was granted, and the new campaign, 1814, was attended with various success; till the overwhelming number of his enemies, who entered the French frontiers at different points, at length compelled him to abdicate, and accept the sovereignty of the Isle of Elba, with the title of ex-emperor, and a pension of 2,000,000 livres. From this place he found means to escape, secretly embarking on the night of the 25th of February, 1815, in some hired feluccas, accompanied by about 1200 men; he landed at Frejus on the 1st of March, speedily reached Paris, and expelled Louis XVIII. from the kingdom. But the confederated armies were now in motion; and though he marched against them with a large army and an immense supply of stores and ammunition, the ever-memorable battle of Waterloo put an end to his career. He withdrew from the army, and proceeded to the coast, with the intention of embarking for America; but fearful of being captured by the British cruisers, he resigned himself, on the 15th of July, into the hands of Captain Maitland, and went on board the *Bellerophon*. By the joint determination of the allies he was sent to the Isle of St Helena, where, accompanied by several of his old friends and domestics, he arrived on the 13th of October, 1815, as a state prisoner. During his exile he was subject to much annoyance, real or imaginary, and died on the 5th of May, 1821, of cancer in the stomach: a disease which was evidently hereditary, his father having, at about the same age, died of a similar malady. In 1810, in accordance with the request of the French government, the remains of the exile were brought over to France, and with great ceremony laid in the *Hôtel des Invalides*. The story of Napoleon Buonaparte presents probably the most memorable example in the world of the action of great intellect and resolute will unrestrained by conscience; and shows both the possible success which may reward for a time the most unscrupulous selfishness, and also, happily, its certain ultimate failure and overthrow.

BUONAPARTE, NAPOLEON FRANÇOIS CHARLES JOSEPH, duke of Reichstadt, only son of the Emperor Napoleon by his second wife, Maria Louisa of Austria. After his father's downfall, he was wholly under the care of his grandfather, the emperor of Austria. He was from infancy of a weakly constitution, and a rapid decline terminated his life in 1832, at the early age of 21. It would appear, from a work by M. de Montbel, entitled "*Le Duc de Reichstadt*," that the young Napoleon possessed many amiable qualities, and was greatly beloved by those who knew him; while he had all the enthusiasm and passion of youth in extreme force, alternating with a distrust, a caution, and a rapidity in fathoming the characters of the persons with whom he was necessarily

brought into contact, which are the usual qualities of age; and that he took the deepest interest in everything connected with his father's former greatness, or relating to military affairs.

BUONAPARTE, JEROME, the youngest son of Carlo Buonaparte, the Corsican advocate, was born at Ajaccio, December 13, 1784, one year before the second son, Napoleon, was appointed sub-lieutenant of artillery in the army of the French Republic. In 1801 he was appointed by his brother, then First Consul, to command the corvette "L'Epervier," in the expedition to St Domingo. Putting into New York he visited Philadelphia, where he married Elizabeth Patterson, the daughter of a merchant of Baltimore. This marriage gave great offence to his brother, who, after his proclamation as emperor in 1804, made it a part of his policy to promote alliances between his own family and the sovereigns of Europe. After some resistance Jerome yielded to his brother's wishes, and abandoning his first marriage, which had been declared null and void by a decree of the Council of State, he married Frederica Caroline, daughter of the king of Wurtemberg, and was proclaimed king of Westphalia. During the Hundred Days, in 1815, he was present at the ceremony of the Champ de Mail, and was wounded at Bougoumont. From Waterloo he returned with Napoleon to Paris, which he left on the 27th of June. For the next thirty years he resided at Vienna, Trieste, and Florence, and, in 1847, was permitted to return to Paris by the government of Louis Philippe. After the revolution of 1848 he was made governor-general of the Invalides, by his nephew, then president of the Republic, and raised to the rank of a marshal of France. After the coup d'état, in 1851, he was made president of the Senate. He died June 24, 1860, aged 75, and was at his own wish buried in the chapel of the Invalides beside the body of his brother.

BUONAPARTE, JOSEPH, an elder brother of Napoleon, was born in Corsica, in 1768. Educated for the law at the college of Autan in France, he became a member of the new administration of Corsica under Paoli; but soon afterwards emigrated to Marseille, where he married the daughter of a banker named Clari. In 1796 he was appointed commissary of the army in Italy then commanded by his brother Napoleon; and in 1797, having been elected deputy to the Council of Five Hundred by his native department, he repaired to Paris, whence he was shortly afterwards sent by the executive directory as ambassador to the pope. During the revolution which broke out at Rome under Duphot, he displayed considerable energy; and on his return to Paris he was made councillor of state, and was subsequently employed by Napoleon to negotiate the treaties of Lunéville with the German emperor, and of Amiens with England. When Napoleon attained the imperial crown, Joseph was recognized as an imperial prince, and in this capacity he headed the expedition against Naples in 1806, which resulted in his being proclaimed king of Naples and Sicily. Here he reigned till 1808, effecting beneficial changes in the administration of

the law and the institutions of the country. In 1808 he was appointed king of Spain, Murat having succeeded him as king of Naples. But in Spain he encountered much greater difficulties than at Naples; and during the five years of his reign he was thrice obliged by the successes of the allied armies to quit his capital; the last time, in 1813, after the battle of Vittoria, to return no more. He now retired to France. In January of the following year, when Napoleon set out for the army, he was appointed lieutenant-general of the empire and head of the council of regency to assist the empress-regent; but in this capacity he displayed little firmness, and consented to the capitulation of Paris, which resulted in the abdication of Napoleon and his banishment to Elba. He then retired to Switzerland; but he rejoined Napoleon on his return to Paris in March, 1815, and after the defeat at Waterloo he embarked for the United States, where he purchased a large property, and continued for many years to reside there under the name of the Count de Surville. Died at Florence, 1844.

BUONAPARTE, LUCIEN, prince of Canino, the next brother after Napoleon in birth, and after him, too, the noblest of the family. He was born at Ajaccio in 1775; and having quitted Corsica, with his family, in 1793, he became a commissary of the army in 1795, and soon afterwards was elected deputy from the department of Liamone to the Council of Five Hundred. It was here that he first distinguished himself by the energy of his manner, the fluency of his language, the soundness of his arguments, and his apparent devotion to the existing government. During Napoleon's absence in Egypt, he maintained a constant correspondence with him; and, on his return, Lucien was the chief instrument of the revolution which followed. When the sentence of outlawry was about to be pronounced against his brother, he opposed it with all the force of his eloquence; and when he perceived that remonstrances were of no avail, he threw down the ensigns of his dignity as president, mounted a horse, harangued the troops, and induced them to clear the hall of its members. By his subsequent energy, coolness, and decision, he led the way to Napoleon's election as first consul, and was himself made minister of the Interior, in the room of Laplace. But, great as were the services which Lucien had performed for his brother, the latter became jealous of his abilities, and feared his popularity. A coolness between them soon took place; and, with that cunning which marked so many of his actions, Napoleon took care to remove Lucien from the immediate scene of action, by sending him ambassador to Madrid. In the spring of 1802 he returned to Paris, was outwardly reconciled with the first consul, and entered a second time upon the tribuneship. He had married, at an early age, the daughter of a wealthy innkeeper; and, his wife having been now some time dead, he united himself to one Madame Joubertou, the widow of a stock-broker, a woman distinguished for her gallantries. This gave great offence to Napoleon, and

of the country. king of Spain, as king of Naples; and his reign he was ses of the allied the last time, in toria, to return to France. was a severe blow to the system he had long contemplated of forming royal alliances for his relatives. He therefore used every means in his power to induce Lucien to consent to a dissolution of the marriage; but, to his honour be it recorded, he constantly spurned all the proposals that were made to him to sacrifice his wife. For several years he took up his residence in Rome, where he was a welcome visitor, having merited the gratitude of the pope by the zealous support he had given the Concordat; and when, in 1807, he found that the enmity of his brother rendered his stay in that city no longer safe, he retired to an estate which he had purchased at Canino, and which his Holiness had raised into a principality. It was not long, however, before he found that the emissaries of Napoleon were hovering round his retreat, and he fled secretly to Civita Vecchia, from which place he embarked in August, 1810, with the intention of proceeding to the United States. A storm threw him on the coast of Cagliari; but the king of Sardinia refused him permission to land: he was accordingly forced to put out to sea; and being captured by two English frigates, he was conveyed first to Malta and afterwards (Dec. 18) to England. After a time he was permitted to purchase a beautiful estate near Ludlow, in Shropshire, where he spent three calm and peaceful years, completing, during that period, a poem upon which he had long meditated, entitled "Charlemagne, or the Church Delivered." The peace of 1814 having opened his way to the Continent, he returned to his old friend and protector, Pius VII. After the battle of Waterloo he urged the emperor to make a desperate stand for the throne; but the cause was hopeless; and Lucien, having retired to Italy, devoted the remainder of his days to literature and the fine arts. He died at Viterbo, June 29, 1840.

BUONAPARTE, LOUIS, a younger brother of Napoleon and ex-king of Holland, was born at Ajaccio, in Corsica, September 2, 1778. He entered the army at an early age, accompanied his brother to Italy and Egypt, and on Napoleon's successive elevations to the consulship and the empire rose to be a councillor of state and a general of division, and received the titles of constable of France and colonel-general of carabiniers. After having been successively appointed governor of Piedmont, and governor *ad interim* of the capital, in place of Murat, he took the command of the army of the North in Holland; and in 1806 the Batavian republic having been changed into a kingdom by Napoleon, Louis was nominated king at the request of the States of Holland. In this capacity he conducted himself with equal skill and humanity, and such was the affection with which his Dutch subjects had inspired him, that he refused without hesitation the crown of Spain which was offered him by the emperor. In 1810, Louis, having long resisted the emperor's commands to enforce the continental blockade, which would, as he believed, have proved detrimental to his people's interests, abdicated in favour of his son; but the abdication was rejected by Napoleon, who thereupon

united Holland to the French empire; and the ex-king leaving Holland secretly, repaired to Gratz in Styria, where he resided several years under the title of Count de Saint Leu. After the fall of Napoleon, he finally retired to the Papal States with some members of his family, where he devoted himself chiefly to literary pursuits down to the period of his death. His only surviving son, Louis Napoleon Buonaparte, the offspring of his marriage with Hortense Eugenie de Beauharnols (which see), daughter of the empress Josephine, was elected president of the French republic in 1848, and is now emperor of the French. Died, 1846.

BUONAPARTE, MARIA LETITIA, the mother of Napoleon. From the widow of a poor Corsican officer she saw herself elevated to the dignity of being the mother of monarchs; and she lived to witness their removal from the thrones they had respectively usurped. Died, Feb. 3, 1836.

[The most authentic genealogical documents ascribe a Florentine origin to the Buonaparte family, and trace them back to the year 1120, when one of them was exiled from Florence as a Ghibelline; and in 1332 we find that Giovanni Buonaparte was *poderista* of that city. In 1404, his descendant and namesake, who was plenipotentiary to Gabriel Visconti, duke of Milan, married the niece of Pope Nicholas V. His son (Nicolo Buonaparte) was ambassador from the same pontiff to several courts, and vicergerent of the holy see at Ascoli. In 1567 Gabriel Buonaparte established himself at Ajaccio, and for several generations his descendants were successively heads of the elders of that city. But Napoleon Buonaparte ridiculed the pride of ancestry, and was ready on all occasions to declare, that the exalted station he had attained was due to his own merits alone.]

BUONAROTTI. [MICHAEL ANGELO.]

BUONO, a Venetian architect of the 12th century, who erected the well-known tower of St Mark at Venice, a campanile or bell-tower at Arezzo, and several other grand edifices. He is deservedly reckoned among the earliest improvers of modern architecture.

BUONONCINI, GIOVANNI BAPTISTA, a celebrated Italian composer, and one of Handel's most powerful rivals in England. Besides operas, he composed various cantatas and sonatas, and the grand funeral anthem for the duke of Marlborough. He is supposed to have died at Venice about the middle of the 18th century.

BUPALUS, a famous sculptor of the isle of Chios in the 6th century, B. C. He is said to have hanged himself in vexation at a satire written upon him by Hipponax, a poet, whom he had caricatured in a statue.

BURBAGE, RICHARD, a celebrated English tragedian, was the son of an actor, James Burbage, by whom the Blackfriars theatre was built. Richard was the friend and associate of Shakespeare, and was especially in repute for his performance of Hamlet, Lear, Richard III., and other tragic characters in the plays of his friend. Died, at London, 1619.

BURCARD, or BROCARDUS, bishop of

Worms, in the 11th century. Assisted by the abbot Albert, he compiled the famous collection of Canons, in 20 books, entitled "Magnum Decretorum seu Canonum Volumen." Died, 1026.

BURCKHARDT, JOHN LEWIS, a celebrated traveller, was born at Lausanne about 1784. He was educated at Leipsic and Göttingen, and in 1806 came to England. He soon after undertook for the African Association a journey of exploration to the interior of Africa, and prepared himself by a diligent course of study of Arabic and physical science. He set out early in 1809, spent some time in Syria, thence visited Egypt and Nubia; spent several months at Mecca, in the guise of a pilgrim; visited Medina, where he had a long illness; and after a short stay in Egypt, and a visit to Sinal, died at Cairo, just as he was preparing for his African exploration, October 1817. After his death appeared his interesting narratives of Travels in Nubia, in Syria and the Holy Land, and in Arabia. Burckhardt's account of Mecca and Medina was the fullest we possessed till the publication of Burton's Narrative.

BURCKHARDT, JOHANN KARL, a learned German astronomer, was a native of Leipsic, and early devoted himself to the study of astronomy. At the age of 24 he went to France, and became assistant to Lalande, whose works he had well studied. He was soon after naturalized in France, and spent the rest of his life at Paris. He was made a member of the Institute, and honorary member of the Board of Longitudes. Among his works are "Tables de la Lune," and a German translation of La Place's "Mécanique Céleste." Born, 1773; died, 1825.

BURDER, GEORGE, an eminent dissenting minister; author of "Evangelical Truth defended," &c., and one of the editors of the Evangelical Magazine. Died, 1832.

BURDETT, SIR FRANCIS, bart., an aristocrat by birth and fortune, but for a long series of years one of the most popular members of the British parliament, was born in 1770, and received his education at Westminster School and Oxford University. On returning from a continental tour, during which he had ample opportunities of witnessing the progress of the French revolution, he was imbued with some portion of its spirit, which was in no small degree fostered by his friend and instructor, the celebrated John Horne Tooke, the well-known author of the Diversions of Purley. In 1793 he married the youngest daughter of Thomas Coutts, Esq., the wealthy banker, with whom he received a large fortune; and four years afterwards, on the death of his grandfather, succeeded to the baronetcy. In 1796, Sir Francis was returned to parliament, by the interest of the duke of Newcastle, as member for Boroughbridge, his colleague being Mr Scott, afterwards Lord Eldon; and he soon distinguished himself by his resolute hostility to the measures of government, which he denounced as inimical to the liberties of the people. In 1802 he offered himself as a candidate for Middlesex in opposition to Mr Mainwaring, and was returned; but, on a new election in 1804, he was defeated by

Mr Mainwaring, jun., by a majority of five, 2828 to 2823. At the next general election (1806) he again became a candidate for the county, but was defeated by Mr Mellish by more than 2000 votes. At this time Sir Francis was a man of great influence in the city of Westminster; and a vacancy in its representation occurring through the death of Mr Fox, Sir Francis was returned by a vast majority, at the head of the poll, his colleague being Lord Cochrane. His opposition to ministers was now unceasing, and so indiseret, that an opportunity soon presented itself of making his conduct the subject of legal proceedings. In 1810, having addressed a letter to his constituents, in which he declared that the House of Commons had exercised their power illegally by committing John Gale Jones to prison, the publication of this letter was deemed a breach of privilege, and the speaker was directed to issue his warrant for the apprehension and commitment of Sir Francis Burdett to the Tower. He refused to surrender, and barricaded his house; whereupon, after a lapse of two days, the sergeant-at-arms, accompanied by police officers and a military force, succeeded in breaking in, and conveyed him to the Tower. On the return of the military the infuriated mob attacked them, and in their defence they shot one man and wounded several others. The prorogation of parliament put an end to his imprisonment; and recollecting the excitement which prevailed at the time of his committal, he wisely proceeded privately by water to his home, rather than jeopardize the lives of his "friends and supporters," by indulging them, as they wished, with a public procession through the streets of the metropolis. He afterwards brought an action against the speaker, &c., but was, of course, unsuccessful. Though we mention some of the most important events of his life, we cannot follow him through his parliamentary career—his opposition to the suspension of the habeas corpus act, his reiterated speeches in favour of parliamentary reform, his advocacy of Catholic emancipation, &c.; but pass on to the year 1819, when he was prosecuted by the attorney-general for addressing a letter to his constituents, strongly condemning the proceedings of the magistrates and yeomanry at the memorable meeting of the people at Manchester. The letter was pronounced a libel, and he was sentenced to three months' imprisonment in the King's Bench, and to pay a fine of £1000. Sir Francis Burdett had ever been a zealous advocate for parliamentary reform, yet he never desired to see the prerogatives of the monarch, or the privileges of the House of Peers, in the slightest degree invaded. But the turbulence of his earlier years seemed to spring from a restless vanity, while his departure, at a very advanced period of life, from the party of which he had for nearly two-score years been the avowed champion, savoured less of true and high conservative feeling, than it did of petulance. He died, January 23, 1844, aged 74.—**LADY BURDETT**, who had for many years suffered greatly in her health, died the same month.

writer; author of "Materials for Thinking," of which Colton largely availed himself in his *Lacon*; "Thoughts on Politics, Morality, and Literature," "Life and Character of Buonaparte," &c. Died, 1818.

BURGEL, GOTTFRIED AUGUST, a celebrated German poet; well known in this country by his ballad poems of the "Wild Huntsman's Chase" and "Leonora," both of which have been translated into English, and become highly popular. Born, 1748; died, 1794.

BURGESS, THOMAS, bishop of Salisbury, was born in 1756, at Odham, in Hampshire, where his father carried on business as a grocer. He was educated at Winchester; obtained a scholarship at Corpus Christi College, Oxford, in 1775; and, by his talents and diligence, in a short period became logic reader and tutor of the college. He had by this time distinguished himself as a scholar of very considerable pretensions, by the publication of several able works; and he found a patron in Dr Shute Barrington, who collated him, in 1787, to the prebend of Wilsford and Woodford, in Salisbury cathedral, and afterwards preferred him to a prebendal stall at Durham. His next advancement took place under the administration of Mr Addington (who had been his fellow-student at Winchester and Oxford), and who conferred on him, in 1803, the vacant see of St David's. From the moment of his elevation to the episcopal bench, he displayed the most devoted and exemplary attention to the concerns of his diocese; he planned and formed a society for the foundation of a provincial college for the instruction of ministers of the Welsh Church; and the establishment at Lampeter stands as a noble monument of his activity and benevolence. On the death of Dr Fisher, in 1805, he was translated to the bishopric of Salisbury; and throughout the twelve years of his episcopal duties in that diocese, he zealously contributed to promote the interests of those committed to his charge. Among his numerous works are editions of "Burton's Pentalogia" and "Dawes's Miscellanea Critica," "Considerations on the Abolition of Slavery," an "Essay on the Study of Antiquities," "First Principles of Christian Knowledge," "Reflections on the Controversial Writings of Dr Priestley," "Emendationes in Suidam et Hesychium et alios Lexicographos Græcos," 4 vols.; "The Bible, and Nothing but the Bible, the Religion of the Church of England;" with many others, theological, classical, and political. Bishop Burgess was mainly instrumental in founding the Royal Society of Literature, of which, in 1821, he became the first president; but in 1832, on account of his loss of sight, and other infirmities, he resigned the office in favour of Lord Dover. Died, Feb. 19, 1837.

BURCKMAIR, HANS, an early German painter and engraver, was born at Augsburg about 1474. He worked some time in conjunction with his friend Albert Dürer at Nürnberg; painted in fresco and in oil, but obtained his chief reputation by his engravings on wood, several series of which celebrated the genealogy and achievements of

the Emperor Maximilian I. He was living in 1528.

BURGOYNE, JOHN, an English general. During the American war he led the army which was to penetrate from Canada into the revolted provinces. But he encountered difficulties too great for its successful issue, and he was compelled to surrender at Saratoga with all his forces to General Gates in 1777. He was author of "The Maid of the Oaks," "The Lord of the Manor," and some other dramatic works. Died, 1792.

BURIDAN, JOHN, a philosopher of the 14th century. Being expelled from Paris through the influence of his philosophical opponents, he sought shelter in Germany, and was instrumental in founding the university of Vienna. He wrote commentaries on the logic, ethics, and metaphysics of Aristotle, and is said to have been the inventor of the well-known dilemma of the ass between two bundles of hay, by which he used to illustrate the doctrine of free-will. This illustration, however, is not found in any of his works. Died, 1358.

BURIGNY, JEAN LEVESQUE DE, a learned French historian and biographer, was born at Rheims in 1692. He went to Paris in 1713, and pursued his studies in concert with his two brothers for several years. He then went to Holland, and co-operated with St Hyacinthe in the journal entitled "L'Europe Savante." In 1756 he was received at the Academy of Inscriptions, and after a long life of literary labour, which he loved for its own sake, a pension was given him of 2000 francs. His principal works are a "Traité de l'autorité du pape," in which he fearlessly discusses the knotty questions connected with his subject; "Histoire de la philosophie païenne;" "Histoire générale de Sicile;" "Vie de Grotius;" and "Vie d'Erasmus." Died at Paris, 1785.

BURKE, EDMUND, the great statesman, orator, and political writer, was born at Dublin about 1730. He completed his education at Trinity College, having previously studied at the Academy of the Society of Friends at Ballitore. He settled at London about 1750, and soon began to employ himself in literary work. He projected the "Annual Register," and for some years wrote the whole of it. He became private secretary to the marquis of Rockingham, made prime minister in 1765, and the same year entered parliament. There he took a leading part in debate, and especially distinguished himself by his speeches on the great American question, on Catholic emancipation, and economical reform. In 1782 he was appointed paymaster of the forces and privy councillor. The affairs of India, the prosecution of Warren Hastings, and the events of the French revolution were the great subjects which engaged his attention during the following years. His speeches on the opening and conclusion of the impeachment, the first occupying four, and the last nine days, were among the grandest efforts of his oratory. His views on the French revolution occasioned the painful rupture with his old friend Fox, who warmly supported the revolution. He retired from parliament in 1794, and soon after lost his son,

a blow which was too heavy for him. He died at his seat at Beaconsfield in 1797. His principal works are the "Inquiry into the Origin of our Ideas of the Sublime and Beautiful," published in 1756; "Reflections on the French Revolution," in 1790, which had an immense circulation immediately; "Letter to a Noble Lord;" and his "Speeches in the House of Commons." A History of "The Life and Times of Edmund Burke," in 3 vols., was recently published by Thomas Mac-knight.

BURKITT, WILLIAM, an English divine; author of a "Practical Exposition of the New Testament." Born, 1650; died, 1703.

BURLEIGH, WILLIAM CECIL, Baron, secretary of state and lord high treasurer of England, was born in Lincolnshire in 1520. He was educated at Cambridge, and afterwards studied law; but being introduced at the court of Henry VIII., his course was changed. On the accession of Edward VI., the protector Somerset gave him a responsible office, and took him with him on the expedition to Scotland. He was soon after made secretary of state, and did much to promote the freedom of trade. He held no public office during the reign of Mary, and by extraordinary cautiousness escaped persecution. Elizabeth made him secretary of state and privy councillor on her accession, and he remained first minister till his death. In 1572 he became lord high treasurer, having previously been raised to the peerage. Through all the grave religious, political, and international difficulties of his long administration he displayed consummate ability, integrity, sagacity, and moderation; and the Protestant system was firmly established by the measures which he adopted. Died, 1598.

BURMAN, PIETER, a celebrated Dutch critic and scholar; professor of history, rhetoric, and Greek at the university of Leyden. He wrote a variety of dissertations and epistles, philological and critical, and published editions of various Latin classics with notes. Born, 1668; died, 1741.

BURMAN, PIETER, nephew of the above, professor of history and rhetoric at Amsterdam; editor of the works of Claudian, Aristophanes, &c. Born, 1714; died, 1778.

BURMAN, JOHAN, brother of the preceding, and eminent equally as a physician and a botanist; author of "Thesaurus Zeylandicus," &c. Born, 1707; died, 1779.

BURN, RICHARD, LL.D., an English clergyman; author of a "History of the Poor Laws," joint author with Mr Nicholson of a "History of Westmoreland and Cumberland," and compiler of the well-known works "Burn's Justice," and "Burn's Ecclesiastical Law." Died, 1789.

BURNES, Sir ALEXANDER, a lieutenant-colonel in the Indian army, and political resident at the court of the Soojah at Cabool, was born at Montrose, in 1805. Having obtained the appointment of cadet, he arrived at Bombay in 1821; and on account of his proficiency in the Persian and Hindostanee languages, was at first employed as an interpreter and translator. His regiment, the 21st native infantry, having been ordered to Bhoj in 1825, Lieut. Burnes joined it, and

during the disturbances in Cutch was appointed quarter-master of brigade, though at the time he was under 20 years of age. His superior talents and zeal soon attracted the attention of the authorities, and he was appointed Persian interpreter to a force of 8000 men, assembled for the Invasion of Scinde, under the command of Colonel M. Napier of the 6th foot. In Sept. 1829, he was appointed assistant to the political agent at Cutch, and was engaged in surveying the north-west frontier. Early in 1830 a present of horses having arrived at Bombay from the king of England, to be sent to the Maharajah Runjeet Singh, Lieut. Burnes was selected to proceed with them to Lahore, the capital of the Punjab. He was also intrusted with presents to the Ameers of Scinde; but though this was the ostensible object of his mission, the chief motive was to obtain full and complete information in reference to everything pertaining to the geography of the Indus. This extraordinary journey was performed amid delays, obstructions, and difficulties, but with admirable tact and perseverance; and the work recording these travels, which was published some little time after his return to England in 1833, possesses the highest interest. Soon after his return to India in 1835, Lieut. Burnes, in acknowledgment of his diplomatic and other services, was knighted and advanced to the brevet rank of lieutenant-colonel; and on the final restoration of the Shah Soojah, in Sept. 1839, he was appointed political resident at Cabool, with a salary of £3000. But he was not long destined to fill the post which his merits had gained; for, at the very outset of the insurrection in Cabool, it was the melancholy fate of this enterprising and deserving officer—then only in his 37th year—to be assassinated, together with his brother, Lieut. Charles Burnes, and several others. Died, Nov. 2, 1841.

BURNET, THOMAS, an English divine and philosopher, born in Yorkshire, 1635. He studied at Cambridge, became fellow of Christ's College, and subsequently master of the Charterhouse, an office which he held for 30 years. He is distinguished for the bold resistance he made to James II., who wished to make a Roman Catholic a pensioner of that establishment. His first work, and that by which he is chiefly known, was the "Sacred Theory of the Earth," a merely fanciful and ingenious speculation, without any pretension to scientific truth. He afterwards published "Archæologie Philosophicæ," and some heterodox opinions which he plainly expressed in it lost him his post of clerk of the closet to William III. Died, 1715.

BURNET, GILBERT, bishop of Salisbury, historian of the Reformation, was born at Edinburgh in 1643. He studied at Aberdeen, entered the church, and became in 1669 professor of divinity at Glasgow. Five years later he settled in London, and was made preacher at the Rolls Chapel. The offer of a bishopric failed to win him the support of arbitrary power. He was a friend of Lord William Russell, and accompanied him to the scaffold: for which he

was deprived of his preachings. He after-
wards went abroad, was well received by
the prince of Orange, took an active part in
promoting his election to the throne of
England, and came with him as his chaplain.
The next year he was made bishop of Salis-
bury. His great works are the "History of
the Reformation in England," in 3 vols.
folio; and the "History of his own Time,"
in 2 vols. folio. He wrote also an account
of the Life and Death of the Earl of Roches-
ter; "Exposition of the Thirty-nine Arti-
cles of the Church of England;" and the
Lives of Sir Matthew Hale and Bishop
Bedell. Burnet's histories are the works
of a thorough partisan; and bear the marks
of his prejudices, vanity, carelessness, and
inaccuracy; yet they contain much import-
ant information, and throw light on many
otherwise dark matters. A new edition of
the "History of the Reformation," in 7 vols.,
carefully revised and the records collated
with the originals, by the Rev. N. Pocock,
M. A., has recently been printed at the Claren-
don Press. Died at London, 1715.

BURNETT, JAMES, Lord MONBODDO, a
distinguished Scotch judge; author of a
"Dissertation on the Origin of Language,"
and "Ancient Metaphysics." Though both
learned and acute, he exposed himself to
much ridicule by asserting the existence of
mermaids and satyrs, and particularly by his
speculations on a supposed affinity between
the human race and the monkey tribe, a
notion far more startling in his days than in
ours, which have been long familiar with
the kindred speculations of the grave and
learned Darwin, and discuss every day his
"Origin of Species." Born, 1714; died,
1779.

BURNETT, GILBERT THOMAS, botanist
and F.L.S., the lineal descendant of the
celebrated Bishop Burnet, was born in 1800,
and having received a classical and scientific
education, studied with access under medi-
cal and anatomical professors; and ulti-
mately became professor of medical botany
at King's College, London. Died in 1835.

BURNEY, CHARLES, the well-known
author of the "History of Music," and per-
haps still more celebrated as the father of
Madame D'Arblay, authoress of "Evelina,"
&c., was born at Shrewsbury in 1726. He
early showed a taste for music, and having
acquired considerable knowledge of the art
under Dr Arne, he settled in London with
every prospect of success. But his health
failed, and he accepted the place of organist
at Lynn, in Norfolk, where he resided nine
years. In 1760 he returned to London with
his health restored, and he at once obtained as
many pupils as enabled him to support his
family in comfort and independence. His
professional merit obtained for him, in 1769,
the degree of doctor of music from the uni-
versity of Oxford; and his attainments, the
quavity of his temper, and the simplicity of
his manners, not only gained for him admis-
sion to the first literary circles, but his own
house in St Martin's Street, Leicester
square, was long the resort of all that was
distinguished for talent, rank, or fashion. In
1766 he obtained a pension of £300 per
annum. Besides his History of Music, Dr

Burney published "The Life of Metastasio,"
a "Musical Tour through France and Italy,"
and contributed nearly all the musical arti-
cles to Rees's Cyclopadia, for which he
obtained £1000. Died, 1814.

BURNEY, CHARLES, second son of the
above, was a classical scholar and critic of
high reputation. Dr Burney's classical
acquirements were first displayed in the
Monthly Review, and there were few Greek
scholars who could compete with him.
Among his works are an Appendix to Sea-
pula's Greek Lexicon, an edition of the
choral odes of Æschylus, &c. His valuable
library was purchased by parliament for
the British Museum. Born, 1757; died, 1817.

BURNEY, FRANCES. [D'ARBLAY.]
BURNLEY, Rear-Admiral JAMES, eldest
son of Charles Burney, the historian of
music, entered the navy at an early age,
and accompanied Captain Cook on his last
two voyages. After long and arduous ser-
vices, he attained the rank of rear-admiral.
He was an able geographer; and his "His-
tory of Voyages of Discovery" and other
writings show him to have been an accurate
and industrious student and writer. Born,
1750; died, 1821.

BURNS, ROBERT, the national poet of
Scotland, was born in Ayrshire in 1759. His
father was a gardener and very poor, so that
his children had only the scantiest education,
with hard labour and hard living. Robert
worked on a farm taken by himself and his
brother, and maintained himself on the
slenderest income. He was early noted
among his neighbours for his verses and his
social qualities. In 1786 he published his
poems, and was prepared to quit his native
land, when an invitation to Edinburgh
changed his course of life. He was wel-
comed and flattered by the highest society
of the capital, published a second edition of
his poems, for which he received a large
sum, and returned to cultivate a farm in
Dumfriesshire. He was afterwards ap-
pointed exciseman, and gave up his farm.
But he could no longer content himself
without indulgence in sensual and exciting
pleasures, which were naturally followed by
embarrassments, depression, and broken
health. He died at Dumfries in July 1796.
The poems and songs of Burns won im-
mediate and enthusiastic admiration from
all classes of society. His themes are such
as all can comprehend, and his speech simple
and true; and there is no fear of his fame
diminishing. In his poetry, as in his life,
alas, there is much that is impure, the utter-
ance of sensual passion; nothing mean and
ignoble: and some most pathetic penitential
breathings, that may well soften hard
thoughts, and abate the severity of censure.
The centenary of his birth was celebrated in
England by a poetic competition at the
Crystal Palace, when the prize was won by
Miss Isa Craig.

BURRUS. [BORRI, GIUSEPPE FRAN-
CISCO.]

BURTON, ROBERT, an English divine;
author of "The Anatomy of Melancholy;"
was a native of Lindley in Leicestershire,
studied at Oxford University, and became
rector of Segrave. He was a good mathe-

matician and classical scholar, an omnivorous reader, and a merry companion. His book, written, he says, by way of alleviation to his own melancholy, is an immense compilation of quotations on all manner of topics from an infinite variety of sources, familiar and out of the common track. It is described by Archbishop Herring as "the pleasantest, the most learned, and the most full of sterling sense." The archbishop adds, that the wits of the reigns of Anne and the first George were deeply indebted to Burton; and we may venture to say, that the "wits" of the succeeding reigns have been no less so. It was a great favourite of Dr Johnson, who would turn out of bed earlier than usual to read it. Born, 1576; died, 1640.

BURY, RICHARD DE. [AUNGERVILLE.]
BUSNEQUIUS: the Latin name of **AUGIER GHISLAIN DE BUSBECC**, a celebrated diplomatist, who was born in Flanders in 1522. He studied at the principal universities of Europe; visited England in 1554; and in the following year was sent ambassador from Ferdinand, king of the Romans, to the Sultan. He made the long journey on horseback, and succeeded in the object of his mission. Sent to Constantinople a second time, he stayed there seven years, and negotiated a satisfactory treaty. He afterwards became tutor to the sons of Maximilian II., escorted the archduchess Elizabeth to Paris, remained there after her departure as ambassador of Rudolph II., and in 1592 set out for his native country. Attacked by a band of "Leaguers" near Rouen, he fell sick of a fever, and died in a few days. He left an admirable account of the Ottoman empire in his well-known work entitled, "Legationis Turcicæ Epistolæ Quatuor," which has been always highly esteemed, and has been translated into all the European languages.

BUSBY, Dr RICHIARE, the venerable master of Westminster School—celebrated for his abilities as a classical teacher and as an unflinching disciplinarian—was born at Luton, in Northamptonshire, in 1606. He held the situation of head-master from 1640 to the time of his decease, in 1695—a period of 55 years. Dr Busby was a prebendary of Westminster, and is buried in the Abbey.

BUSCHETTO DA DULICHIO, a Greek architect of the 11th century. He erected the cathedral church of Pisa, the first specimen of the Lombard ecclesiastical style of building.

BUSCHING, ANTON FRIEDRICH, a German geographer and littérateur, born in 1724. He was appointed professor of philosophy at Göttingen in 1754; was several years a pastor at St Petersburg; and in 1766 director of a gymnasium at Berlin. His chief work was the "Neue Erdbeschreibung," of which however he only completed the volumes relating to Europe. It was translated into English, French, and other languages. Büsching wrote also many elementary works for schools, a "Character of Frederick II.," &c. He is frequently cited by Carlyle, in his "History of Frederick the Great," with great respect, as a shrewd observer and veracious reporter. Died at Berlin, 1793.

BUSSY, ROGER DE. [RABUTIN.]

BUSTI, AGOSTINO, usually called **IL RAMBAIA**, a distinguished Italian sculptor, who flourished at Milan in the first half of the sixteenth century. Little is known of his life, and few of his works are extant. His masterpiece was never completed, and is now only known from a preliminary drawing recently discovered, and numerous statues, reliefs, and trophies which were to form parts of it. This masterpiece was the monument to Gaston de Foix, commenced about 1513, and, after years of labour, abandoned in consequence of a turn in the tide of war. The fragments of it were seen by Vasari about fifty years later, and excited in him the profoundest admiration and regret. They were carried off, and are now scattered in the galleries of Italy. Five portions have been acquired for the South Kensington Museum. Rambaia was especially noted for the elaborate minute finish of his sculptures, though he wrought in the hardest marble. Died probably about 1540.

BUTE, JOHN STUART, Earl of, British statesman, descended from an ancient Scotch family, was born early in the 18th century. In 1738 he was appointed one of the lords of the bedchamber to Frederick, prince of Wales, the father of George III. Soon after the young king's accession, over whom Bute possessed unbounded influence, he was made secretary of state, and, quickly after, Mar. 1762, first lord of the treasury. Under his ministry, a peace, which disappointed the hopes of the people, was concluded with France and Spain; and what added greatly to his unpopularity, was the marked favoritism he showed for his countrymen, filling the most lucrative offices in the state with Scotchmen. It was against the government of Lord Bute that Wilkes directed his violent attacks in the famous "North Briton" newspaper. He resigned his office in April, 1763, and retired into private life, which he adorned by his benevolent disposition and his love of science. Botany was his favourite study, and he expended vast sums in its pursuit. Died, 1792.

BUTLER, ALBAN, the celebrated biographer, was born in Northamptonshire, in 1710, and was early sent to the college of Douai. He was for some time chaplain to the duke of Norfolk, but at length became president of the college of St Omer. The chief of his works is the "Lives of the Fathers, Martyrs, and other principal Saints." Died, 1773.

BUTLER, CHARLES, an English barrister and a most indefatigable and accomplished scholar. He was born at London, and educated at Douai. His numerous works, with the exception of his "Notes to Coke upon Littleton" and his "Reminiscences," are of a religious or political character; and, indeed, it is as the able advocate of his own religious community, that he is principally to be regarded. Neither the fire of youth, the interruption of business, the variety of his employments, nor the bustle of the world, could ever moderate his ardour for study. He was the author of an "Historical Account of the Laws against the Roman Catholics," a book which greatly served the cause of Catholic Emancipation, "Book of the

BUTLER, JAMES. (ORMOND, Earl of.) BUTLER, JOSEPH, bishop of Durham, was born at Wantage in 1692. His father was a Presbyterian, and sent him to the Dissenting Academy at Gloucester. But he soon conformed to the Church of England, studied at Oxford, and, in 1718, became preacher at the Rolls. In 1724 he was appointed rector of Stanhope, and two years afterwards settled there, renouncing his Rolls preacherhip. Through the influence of Bishop Secker, his fellow-student and friend, he became chaplain to Lord Chancellor Talbot, and clerk of the closet to Queen Caroline. In 1738 he was raised to the see of Bristol, soon after made dean of St Paul's, and in 1750 was translated to Durham. His health soon failed him, and he only held his see two years. Butler's great work is the "Analogy of Religion, Natural and Revealed, to the Constitution and Course of Nature." It was published in 1736. Its admirable argument had been foreshadowed in his volume of "Sermons," published ten years earlier. Died at Bath, 1732.

BUTLER, SAMUEL, author of "Hudibras," was a native of Worcestershire, and was born about 1612. He had only a scanty education in his youth, but afterwards cultivated his mind by study and reading. He held the office of secretary to several eminent persons in succession, and was acquainted with the wits and writers of the age. His witty poem was intended to throw ridicule on the Presbyterian and Independent parties. It appeared in three parts, the first in 1663, the second soon after, and the third in 1678. A subsequent edition, published in 1728-7, was rendered additionally attractive by 18 illustrations contributed by Hogarth. Though sparkling with wit, the poem is hard to read, and is probably seldom read through. It is also defaced by many indecent and filthy passages. Butler died at London, very poor it is said, in 1680.

BUTLER, Dr SAMUEL, bishop of Lichfield, a learned and most exemplary English divine. He was born at Kenilworth, in Warwickshire, and received his education at Rugby School, to which he was admitted in 1783. In 1792 he removed thence to St John's College, Cambridge, where his course was rapid and brilliant, nearly, if not quite, without parallel, his prizes and distinctions far exceeding in number those obtained by any of his contemporaries. In 1798 he was appointed to the mastership of Shrewsbury School, and, about the same time, he was selected for the arduous task of preparing a new edition of Æschylus for the university press. His learning and his indefatigable exertions soon produced for Shrewsbury a very high rank and reputation among our public schools. After receiving several minor preferments, he was, in 1836, promoted to the bishopric of Lichfield. Though a perfect martyr to ill health, he was a very voluminous author. His "Sketch of Ancient and Modern Geography" and his "Ancient and Modern Atlases" long held their ground

as the best works of their kind. Born, 1774; died, 1840.

BUTTMANN, PHILIPP CARL, an eminent German philologist, was born at Frankfort-on-the-Maine, in 1764. He was educated at the university of Göttingen, became assistant librarian to the king of Prussia, in 1788, afterwards professor of philology and member of the Academy of Sciences, Berlin, and finally chief librarian to the king. His health failed after the loss of a favourite daughter in 1820, and he died in 1829. Buttmann edited several classical authors, but he is chiefly known for his Greek Grammars; the "Schulgrammatik," "Griechische Grammatik," and "Ausführliche Griechische Sprachlehre." He published a collection of his essays on history and mythology.

BUTTNER, CHRISTIAN WILHELM, a German naturalist and philologist, whose zeal in pursuit of his favourite studies was such, that, in order to buy books, he restricted himself to what was barely necessary to sustain life, never making more than one frugal meal a day. He was born at Wolfenbüttel, studied at Oxford, and under Boerhaave at Leyden, where he gained the friendship of Linnæus. He was especially devoted to the study of comparative grammar, and although he wrote little, his labours opened and smoothed the way for those who came after him. He was long professor at the university of Göttingen, and titular professor at Jena. Born, 1716; died, 1801.

BUXHOWDEN, FREDERIC WILLIAM, Count of, a general in the Russian army. He entered on a military life at an early age, and was engaged in the war against the Turks in 1769; till, rising by degrees, he, in 1794, obtained the command of Warsaw and the administration of Poland. In 1805 he commanded the left wing of the army at the battle of Austerlitz, which advanced while the centre and right wing were beaten; but, after the battle of Pultusk, he was unjustly superseded by Benningsen. He was, however, again made commander-in-chief, and, in 1808, conquered Finland. Died, 1811.

BUXTON, JEDEDIAH, a singularly gifted man, whose powers of calculation have probably never been equalled. It is said that he was asked this question—"In a body whose three sides are, respectively, 23,145,789 yards, 5,642,732 yards, and 54,965 yards, how many cubical eighths of an inch are there?" and that, amid all the distractions of the labours of a hundred men, he gave the exact answer in little more than five hours! But it was only in calculating that he had any intellectual superiority; in other respects, his mind was rather below than above the average. He had energy enough to accomplish a journey to London on foot, to gratify his wish to see the king. He was himself an object of curiosity to some of the distinguished men of the time. At the theatre he amused himself with counting the words and steps of the actors and actresses. London excited no ambition in his d-ill soul, and he went back to vegetate and count and die at Elmton, his native village. Born, about 1705; died, before 1780.

BUXTON, Sir THOMAS FOWELL, bart. This distinguished philanthropist was born

at Earl's Colne, Essex, in 1766; and received his academical education at Trinity College, Dublin. Having, in 1811, joined the firm of Truman, Hanbury, and Co., the eminent London brewers, his connection with the locality of Spitalfields made him personally acquainted with the sufferings of his poor neighbours; and the powerful appeals he made in their favour in 1816 led to an extensive and well-organized system for their relief. His success in this charitable undertaking induced him (in conjunction with his sister-in-law, Mrs Fry, and his brother-in-law, Mr Hoare) to examine into the state of our prisons, and to publish the result of his labours. This not only led to the formation of the Prison Discipline Society, but was the basis upon which many of the modern improvements in our gaols are founded. In 1818 he was returned M.P. for Weymouth, which borough he continued to represent till 1837, when he was defeated by Mr Villiers. During the time he held a seat in the House, his energies were almost unceasingly directed to ameliorate the condition of the oppressed. He became the recognized successor of Mr Wilberforce, and he had the supreme satisfaction of seeing his efforts for the abolition of slavery crowned with complete success. To other subjects of paramount interest, viz. the reform of our criminal code—the civilization of Africa, by commercial, agricultural, and missionary enterprise—the support of benevolent institutions, particularly such as had for their objects the education and improvement of the poor—to these, and such as these, Sir Thomas Fowell Buxton applied himself with a persevering assiduity that did honour to his name. In 1840 he was created a baronet. Died, Feb. 19, 1845.

BUXTORF, JOHANN, the celebrated Orientalist, and head of a family distinguished for two centuries in Oriental literature, was a native of Westphalia, and became, about 1591, professor of Hebrew at Basel. Besides fulfilling the duties of his chair, he carried on correspondence with many learned Hebraists, and lodged in his own house several Jewish scholars, for the purpose of gaining more perfect acquaintance with Hebrew. His principal works are, "Mannale Hebraicum et Chaldaicum," "Lexicon Hebraicum et Chaldaicum," and "Biblia Hebraica rabbinica." Born, 1564; died, 1623.

BUXTORF, JOHANN, son of the preceding, and his successor in the professorship at Basel; author of a "Lexicon Chaldaicum et Syriacum," &c., besides other classical and theological works. It is recorded of him, that, at the age of four years, he was able to read Hebrew and Latin.—Two others of the same name, his son and nephew, were also noted for their skill in the Hebrew tongue.

BYNG, JOHN, fourth son of Viscount Torrington, was, like his father, an admiral. After having frequently and highly distinguished himself, he was tried by court-martial for alleged cowardice. He was despatched to the relief of Minorena, at that time blockaded by a French fleet; and his hesitation to engage an enemy of superior strength excited the clamour of the nation against him. When the news arrived in

England, the dastard ministry, wishing to avert the public odium from their unsuccessful measures, took advantage of the admiral's unpopularity; and though the court by which the ill-fated commander was tried, recommended him to mercy, they suffered the unjust sentence to be carried into execution. He was shot at Portsmouth, March 14, 1757; meeting his death with the firmness of a hero and the resignation of a Christian.

BYNKERSHOEK, CORNELISZ VAN, an eminent Dutch jurist, was born in 1673, was educated at the university of Francker, and settled at the Hague, where he practised as an advocate, became a member, and in 1724 president of the Supreme Court. He was an indefatigable student, and wrote many learned works; among which are "Observationes Juris Romani," "Questiones Juris Publici," "Questiones Juris Privati," and two collections of miscellaneous writings entitled "Opuscula" and "Opera Minora." Died, 1743.

BYRNE, WILLIAM, an eminent English engraver. His works are very numerous, and remarkable for the excellence of their aerial perspective. Died, 1805.

BYRON, JOHN, an ingenious prose writer and poet, and the inventor of a system of stenography. He was also a contributor to the Spectator, under the signature of "John Shadow." Born, 1691; died, 1763.

BYRON, the Hon. JOHN, an eminent naval commander and circumnavigator, whose sufferings, when wrecked in the Wager, are graphically described in his "Narrative." He rose to the rank of admiral, and commanded in the West Indies during the American war. Born, 1733; died, 1786.

BYRON, GEORGE GORDON BYRON, Lord, grandson of the preceding, born Jan. 22nd, 1788, was the sixth in descent from his ancestor, Sir John Byron, who received the estate of Newstead as a grant from King Henry VIII. The notoriously licentious conduct of his father, Capt. Byron, who had deserted his wife and squandered her fortune, made him an exile from England; and he died in 1791, leaving his widow and son almost destitute. Mrs Byron having previous to this event retired to her native city of Aberdeen, in order to live within the limits of her scanty income, she placed her son early in the grammar school of that city; but when, in 1798, by the death of his great uncle, without issue, he became possessed of the family title and estates, he was placed under the guardianship of Lord Carlisle, who sent him to Harrow. His love of liberty and independence were prominent traits in his disposition, and they grew into a fixed aversion to control. In 1805 he went to Cambridge, and there became chiefly remarkable for his eccentric habits, and his defiance of discipline. On quitting Cambridge he took up his residence at Newstead Abbey, and soon after published his "Hours of Idleness." Although marked by some features of juvenility, this volume gave undoubted indications of poetic genius; but it met with most severe censure from the Edinburgh Review. The ridicule thus cast by the critic on the poet was not suffered to rest there; he amply revenged himself in the cele-

EDON BYRON, Lord, g, born Jan. 22nd, escent from his an- who received the a grant from King oriously licentious pt. Byron, who had quandered her for- from England; and his widow and son Byron having previ- to her native city to live within the ome, she placed her mar school of that ue, by the death of his ue, he became poss- tle and estates, he uardianship of Lord a to Harrow. His pendence were pro- position, and they reion to control. In idge, and there be- ble for his eccentric e of discipline. On took up his residence e soon after published "Although marked enility, this volume ons of poetic genius; vere censure from the eridicule thus cast by as not suffered to rest e himself in the cele-

brated satire of "English Bards and Scotch Reviewers." About that period he experienced a great disappointment in seeing Miss Chaworth, who had been the early object of his love, married to another. His course of life was now marked by extravagance and dissipation, impairing both his health and fortune; and it was probably to extricate himself from the Circean snares by which he was surrounded, that he resolved on an excursion to the Continent. He was accompanied by his friend and fellow-collegian, John Cam Hobhouse, Esq.; and after a stay of two years he returned, and gave to the world the first two cantos of "Childe Harold's Pilgrimage." This was quickly succeeded by "The Giaour," "The Bride of Abydos," "Lara," "The Corsair," &c.; and the noble bard became the poetical idol of the day. In January, 1815, he married Anna Isabella, only daughter of Sir Ralph Milbanke Noel; but the union was not productive of happiness, and they separated soon after the birth of a daughter. This rupture gave rise to many rumours regarding little to Lord Byron's credit, and he again went to the Continent, with a determination not to return to his native country. He often changed his residence; and during his various travels in the south of Europe, his admirers in England were indulged with the productions of his powerful and versatile muse; sometimes soaring into the pure regions of taste, breathing noble sentiments and chivalric feelings; at other times descending to voluptuousness,

or grovelling in vulgarity. Among the poems written during his last stay in Italy are—"Manfred," "Beppo," "Mazeppa," "Cain, a Mystery," the third and fourth cantos of "Childe Harold," several tragedies, and "Don Juan," admitted to be his greatest work, though from its subject, treatment, and tendency unfit for idle readers. In 1823 the state of the Greeks awoke his sympathy; and, with disinterested generosity, he resolved to devote his fortune, his pen, and his sword to their cause. His energies, however, were no sooner called into action, than he was assailed by disease; and he expired, of a fever, at Missolonghi, on the 19th of April, 1824, in the 37th year of his age, to the inexpressible sorrow of the Greeks, by whom he was venerated for his personal exertions and liberal pecuniary aid. Few instances have occurred in which inconsistency appeared so glaring as in the various characteristics of this highly gifted man. With powers of reasoning beyond those of most men, he was capricious and unfixed; and with his fine poetic taste was sometimes mixed a reckless profligacy and sensuality. In proportion as we admire the commanding talents and poetic eloquence of Byron, so are we compelled to deprecate the unholy purposes to which they were too often made subservient. "Prostituted genius is but splendid guilt." His only daughter, Ada, a lady of great accomplishments and rare scientific attainments, was married to Lord King (afterwards Earl Lovelace), and died in 1854.

C.

CAAB. [KAAB.]

CAHANIS, PIERRE JEAN GEORGE, a French physician of considerable eminence. He was born at Conac, showed himself intractable at school, and was sent to Paris at the age of 14, to make his way in the world alone. He at once began a course of earnest study, first of classical literature, and then of medicine. He became the friend of Mirabeau, attended him in his last illness, and published an account of it. He was intimate with Turgot, Condorcet, Diderot, and other distinguished men, and was elected member of the Institute and of the Council of Five Hundred; and under the government of Napoleon he was named senator. His writings are chiefly medical; but in addition to these he published an interesting and remarkable work entitled "Rapports du physique et du moral de l'homme," to which he chiefly owes his fame. Born, 1757; died, 1807.

CABARRUS, FRANÇOIS, Count, a Frenchman, who having settled in Spain in a commercial character, rendered that country

considerable service in establishing a paper currency, when cut off from her resources in America. He was afterwards the Spanish minister of finance; to which office he was appointed by Joseph Buonaparte. Born, 1772; died, 1810.

CABESTAN, or CABESTAING, GUILAUME DE, a Provençal poet of the 13th century, celebrated alike for his talents and misfortunes. Having excited the jealousy of Raymond de Scillans by verses in praise of the Lady Margaret, Raymond's wife, to whose service he was attached, the story is that Raymond had him put to death; and his heart was dressed and served up to the lady, who, on learning the horrible nature of her repast, died of grief.

CABOT, SEBASTIAN, an English navigator of great eminence, was the son of a skillful Venetian pilot, who resided at Bristol, where Sebastian was born, in 1477. He made several voyages with his father (who had obtained from Henry VII. letters patent, empowering him and his three sons to discover unknown lands and conquer them), and

they, in 1497, saw the mainland of America, being the first Europeans who had done so. He was among the first to notice the variations of the needle. Not receiving in England such consideration as he felt due, Cabot went, in 1512, to Spain on the invitation of Ferdinand, but after a few years came back to England. After conducting another voyage of discovery he returned to Spain, and in 1526 conducted an expedition to the river La Plata. About 1548 he was in England again, and received a pension from Edward VI.; and he was consulted on all questions relating to trade and navigation. Cabot then took an important part in establishing the trade with Russia. We know neither the year of the death nor the place of burial of this great discoverer, nor is anything known of what became of his valuable maps and manuscripts. He was living in 1557.

CABRAL, PEDRO ALVAREZ, a Portuguese maritime discoverer, who commanded a fleet sent by Emmanuel, king of Portugal, to the Indies, in 1500, and discovered the coast of Brazil in April of that year. He then continued his course to India, and after making some conquests and treaties returned to Portugal in 1501.

CACCIA, GUGLIELMO, surnamed, from his place of residence, **IL MONCALVO**, a very excellent fresco painter. He executed some fine altar-pieces, and many of his works exist still in the cities of North Italy. One of his finest productions is the "Deposition from the Cross," at Novara. Caccia had three daughters, who were skilled in painting, and assisted him. Died, 1623.

CADAMOSTO, LUIGI, a Venetian navigator, patronized and employed by the king of Portugal. He discovered Cape Verd Islands. An account of his voyages and discoveries was published after his death, which took place in 1464. The narrative of Cadamosto appeared in 1507, and was the earliest account of modern voyages.

CADE, JOHN, better known as **JACK CADE**, was an Irish adventurer, who headed the insurrection in Kent in the reign of Henry VI. He took the name of Mortimer, and encamped with a large body of his followers on Blackheath, 1st of June, 1450. Memorials of the hardships complained of, and the remedies desired, were sent to the king. He defeated Sir Humphrey Stafford and the royal troops at Sevenoaks, and on the 1st of July entered London. He kept his followers from plunder for a day or two; had Lord Say and Sele beheaded; was driven out of London and his followers dispersed; and he was taken and killed soon after in Sussex.

CADET DE GASSICOURT, CHARLES LOUIS. [GASSICOURT.]

CADOGAN, WILLIAM, first earl of Cadogan, a distinguished English general and diplomatist, was born in the latter part of the 17th century, and entered the army at an early age. As brigadier-general he distinguished himself, in 1704, at the battle of Hochstedt. In the following year he entered parliament; took part the same year in the forcing of the French lines, near Tirmont; served at the battle of Ramillies, and, in 1707, was appointed minister plenipoten-

tiary in the government of the Spanish Netherlands. In 1709 he served as lieutenant-general at the siege of Mons, but resigned his employment when Marlborough was disgraced. Various offices were conferred on him. After the accession of George I., he was raised to the peerage, and several times sent ambassador to Holland. In 1722 he succeeded Marlborough as commander-in-chief and master-general of the ordnance. Died, 1726, and was buried in Westminster Abbey.

CADOUAL, GEORGES, a famous Chouan chief, born in 1769. After the ill success of his efforts for the restoration of the Bourbons, he came to terms with General Brune, in 1800, dispersed his troops, and proceeded to London. While there, he was accused by the French government of planning the infernal machine, Georges having avowed a personal hostility to the First Consul. He afterwards, on receiving the *cordons rouges* from Monsieur (Charles X.), and a lieutenant-general's commission, embarked with Pichegru in a secret expedition, and landed at Falaise. It has been said that the object was to assassinate Buonaparte, as well as to excite a counter-revolution; and Pitt was accused of sanctioning the enterprise, by a letter to Lord Hutchinson. That these charges were fabricated by the emissaries of Buonaparte there is every reason to believe. Cadoual was, however, traced by the Parisian police, and put under arrest; and, after a summary judicial process, was executed on the 6th of June, 1804. He died with great courage. The two brothers Poignac were also involved in the same process, and condemned to death, but escaped through the humane exertions of Murat.

CÆDIMON, the most ancient English poet. He flourished in the 7th century, and lived at the monastery of Whitby, though we are ignorant in what relation he stood to the monks. A fragment of a hymn, by Cædmon, is preserved in King Alfred's translation of Bede; and is the oldest specimen extant of English poetry. A Scripture paraphrase in verse is extant, which is also supposed to be substantially the production of Cædmon, though altered by subsequent hands.

CÆSALPINUS, ANDREA, an Italian physician and natural philosopher. This enlightened man in some degree anticipated the grand discoveries of Harvey and Linnaeus; his "Questiones Peripateticæ," containing some hints on the circulation of the blood; and his treatise "De Plantis," giving the first example of a system of botanical arrangement, based on similarity of structure. Died, 1603.

CÆSAR, CAIUS JULIUS, dictator of Rome, was born B.C. 100. At the early age of 16 he lost his father, who was prætor; and very shortly after that event he married Cornelia, the daughter of Lucius Cinna, the friend of Marius. This connection gave great offence to Sulla, who, having vainly endeavoured to bring about a divorce, caused Cæsar to be proscribed. Cæsar, however, escaped, and Sulla was at length induced to exempt him from prosecution, though unwillingly, telling those who interceded with him that he

of the Spanish served as lieu-tenant of Mnna, but when Marlborough received his commission of George II, and several others. In 1722 he was commander of the ordnance. In Westminster

A famous Chouan was the ill success of the revolution of the Bourbons. General Brune, and proceeded to be accused by the king of planning the invasion. He was avowed a first Consul. He had the *cordons rouges* (K.), and a lieutenant, embarked with distinction, and landed in that the object of the expedition, as well as to the king; and Pitt was the enterprise, by a charge that these charges were of Buona-ventura to believe. Caused by the Parisian revolution; and, after he was executed on the guillotine, he died with great honours. Polignac was in the process, and conspired through the king.

A famous English poet, lived in the 17th century, though we are not sure he stood to the king. He wrote the hymn, by Cædmon, Alfred's translation of the oldest specimen of English poetry. A Scripture parallel, which is also the production of subsequent authors.

CÆSAR, an Italian physician. This engraving anticipated Harvey and Linnaeus' "circulation of the blood," giving the system of botanical nomenclature of structure.

CÆSAR, dictator of Rome, in the early age of 16 he was a praetor; and very young he married Cornelia, Mnna, the friend of the king, gave great offence to the king, and endeavoured to cause Cæsar to be executed, escaped, and fled to exempt him from an unwillingly, tell him that he

could see in Cæsar the germ of many Mariuses. Having distinguished himself as an orator in the impeachment of Cornelius Dolabella, he speedily grew a public favourite, and became successively military tribune, quaestor, and ædile. The profusion with which he lavished his liberality while in these offices, involved him very deeply in debt; but having obtained the government of Spain, he contrived to amass money sufficient for their discharge, though they are said to have exceeded a million and a half sterling; a fact which, as he held the government only a year, says but little for his scrupulousness as to the means he used for self-aggrandisement. Having united with Pompey and Crassus in the memorable coalition, called "the first triumvirate," he became consul, and then obtained the government of Gaul, with the command of four legions. And now it was that his genius had ample scope. His military career was rapid and brilliant. Belgians, Helvetians, and Nervians succumbed to him; the German tribes were repulsed, and Gaul was wholly subjected to the Roman power. These transactions and his invasions of Britain, are graphically related in his Commentaries. His success had the effect of exciting the jealousy of Pompey, who had influence enough in the senate to cause Cæsar to be recalled from the government of Gaul. He refused to obey this order, and marched with his army into Italy, Pompey retiring into Greece. Having seized the public treasury, and commissioned Mark Antony to watch over his interests in Rome, he proceeded to Spain, where a large army remained in Pompey's interest, which he defeated, and on his return to Rome was declared dictator. He then followed Pompey into Greece, and defeated him in the memorable battle of Pharsalia, from which Pompey escaped only to be assassinated in Egypt. Having crushed every attempt at resistance on the part of the sons and friends of Pompey, and having been honoured with four several triumphs, he was declared perpetual dictator, a title which some of his friends wished to alter to that of king. And as the great body of the Roman people, dazzled by his military genius, and gratified by the liberality of his largesses, were insensible of, or indifferent to, his insatiable thirst for domination, it is more than probable that he would have become an absolute king, but that Brutus and other republicans penetrated his designs, and sternly resolved to make his life the sacrifice to the freedom of his country. Notwithstanding dark hints had been given to him of his danger, he attended a meeting of the senate without taking any measures for the safety of his person, and fell beneath the daggers of the conspirators on the Ides of March, in the year 43 B.C., and in the 56th of his age. One of the best English accounts of the life of Cæsar is to be found in Mirvald's "History of the Romans under the Empire," vols. i. and ii. A "Vie de Cæsar," by the emperor of the French, Louis Napoleon, has recently (1865) appeared. It is in reality an apology for Napoleonic absolutism.

CÆSAR, Sir JULIUS, an eminent English civilian, who filled various important offices

in the reigns of Queen Elizabeth and Kings James I. and Charles I. His last office was that of master of the rolls, which he held above 20 years. Born, 1657; died, 1636.

CAFFA, MELCHIORRE, an able sculptor, many of whose works adorned the churches of Rome. Died, 1687.

CAFFARELLI, GAETANO MAJORANO, a celebrated Italian singer. He studied under Porpora, who made him practise the elements of singing from a single sheet of music paper for five years. He was so well rewarded for his talent, that he purchased the dukedom of Santo Dorato. Died, 1783.

CAGLIARI, or CAGLIARI, PAOLO, better known as PAUL VERONESE, a celebrated Italian painter, was born at Verona in 1528 or 1532. After acquiring some reputation in his native district he went to Venice, where his style was much influenced by the study of Titian's works, whom he in some respects rivalled. He visited Rome, and was invited to Madrid, but declined to go. "The Marriage at Cana," now in the Louvre, is one of his most magnificent works. The National Gallery possesses four of his pictures; among them the "Adoration of the Magi," and "The Family of Darius at the feet of Alexander," both very celebrated, and of large size. Died, 1585.

CAGLIOSTRO, ALESSANDRO, Count of, the assumed title of the great impostor, whose real name was Joseph Balsamo. He was born at Palermo, and having lost his father at an early age, he was placed under the protection of the friars of Mercy, whose order he entered as a novice. Here he acquired the elements of chemistry and physics; but he speedily made his escape, and committed so many frauds in Palermo, that he was obliged to abscond. After visiting various parts, he at length reached Naples, where he married a woman of abandoned character, with whom he travelled to Spain, Portugal, and England, pretending to supernatural powers, and wringing considerable sums from those who became his dupes. In England this exemplary couple established an order of what they called Egyptian Masonry, and as their dupes were of the higher order, they easily obtained from them the loan of valuable jewels, on pretext of some intended ceremonials. With these they went off to Paris, and lived there in the utmost extravagance. The count, however, was thrown into the Bastille, on a charge of being concerned in the fraud of the celebrated diamond necklace of Marie Antoinette; and when he obtained his liberty, he was compelled to quit France. He then went to England again, and soon after to Italy, where his wife divulged some of his crimes to the Inquisition, and he was confined in the dungeons of the Castle of St Angelo, and died there in 1795.

CAGNOLA, LUIGI, Marquis of, Italian architect, was born of an illustrious family, at Milan, in 1762. He was educated at Rome and the university of Pavia, and renounced the profession of the law for which he was intended to follow the strong bent of his genius for architecture. He was a member of the state council, and was much engaged in political affairs. His most celebrated

works as architect are the Arco della Pace, commenced in 1807, and the Porta Ticinense at Milan, the campanile at Urgnano, completed in 1829, the church of Ghisalba, and a mausoleum for the Metternich family. Cagnola was president of the Institution of Sciences and Arts at Milan, and a knight of the Iron Crown. Died, 1853.

CAILLE, NICOLAS LOUIS DE LA, an eminent French mathematician and astronomer, was born at Rumigny, and became assistant to Cassini at the Observatory of Paris, and afterwards professor of mathematics at the Collège Mazarin. In 1750 he visited the Cape of Good Hope for the purpose of studying the stars of the southern hemisphere, and he determined the position of 9000 previously unknown. The table of eclipses for 1800 years, inserted in the "Art de Vérifier les Dates," was calculated by La Caille. His principal works are, "Astronomie Fundamentale," "Cours de Mathématiques pures," "Cælum Australe stelliferum," &c. Born, 1713; died, 1762.

CAIUS, or GAIUS, an eminent Roman lawyer; author of a valuable body of legal institutes, which formed the basis of the more celebrated Institutes of Justinian. The work of Caius was long lost, but a mutilated manuscript copy was discovered in 1816 by Niebuhr, and by the patient labour of several German scholars the difficult task of deciphering it was accomplished, and the work was published in 1820. Caius is supposed to have lived in the latter half of the second century.

CALAME, ALEXANDRE, an eminent Swiss landscape-painter, was born at Neufchatel, but settled early at Geneva, where he was a pupil of François Diday. Though of weak constitution, he was an indefatigable worker, and applied himself to the study of the magnificent scenery amidst which he lived, and the various and striking aspects of which he has so successfully represented in his paintings. Montblanc, the Jungfrau, Monte Rosa, Morning and Evening, Solitude, Pæstum, and a series of four pictures representing the four seasons of the year, are among his most admired works. Died in the prime of life at Mentone, 1864.

CALAMY, EDMUND, a presbyterian divine. He was educated at Cambridge, and obtained a living; but he resigned it and joined the Nonconformists, rather than comply with the order for reading the Book of Sports. He entered warmly into the religious disputes of the time, and was one of the writers of the treatise against episcopacy, entitled, from the initials of its authors, "Smectymnus." This was replied to by Bishop Hall in his "Defence of the Remonstrance," and the latter brought Milton into the field with "Animadversions upon the Remonstrant's Defence." A "Modest Confutation" by an anonymous writer gave occasion to Milton's vigorous "Apology for Smectymnus." Though Calamy preached before the House of Commons, and was one of the assembly of divines at Westminster, he opposed both the execution of Charles I. and the subsequent rule of Cromwell. At the death of the latter he actively aided in the restoration, and became chaplain to Charles II.

The Act of Uniformity caused him again to secede, and he died in retirement in 1686.

CALAMY, EDMUND, grandson of the above, and a dissenting minister of great note. He was a very voluminous writer. Besides numerous sermons and controversial tracts against Echarde, Hoadley, and others, he published an abridgment of "Baxter's History of his Life and Times," with numerous supplementary articles. Died, 1732.

CALANUS, an Indian philosopher, much esteemed by Alexander the Great. At the age of 73, being afflicted with a painful illness at Pasardaga, he caused a funeral pile to be erected, which he ascended with a composed countenance, and expired in the flames, saying, that having lost his health and seen Alexander, life had no more charms for him, B. C. 323.

CALAS, JEAN, a merchant of Toulouse, memorable as the victim of judicial murder. His eldest son committed suicide; and as he was known to be attached to the Roman Catholic faith, a rabble cry arose that he had on that account been murdered by his father. It was in vain that the unhappy parent pointed out the fact that he had a Roman Catholic servant who was unharmed. He was condemned literally without the shadow of a proof of his guilt, and put to death by being broken on the wheel. Voltaire generously pleaded the cause of the unhappy family, the process was revised, and the widow procured a pension. The unjust and ignominious death of Calas took place in 1762.

CALDARA, POLIDORO, or, as he is sometimes called, POLIDORO DA CARAVAGGIO, Italian painter, of the Lombard school, was born at Caravaggio in the Milanese, about 1495. Employed as a labourer in the Vatican, while Raphael was engaged there, his genius for painting showed itself, and attracted the attention of the great master. He worked afterwards at Naples and Messina, and was on the point of returning to Rome, when he was murdered by his servant, in 1543. One of his best works was a "Christ bearing his cross."

CALDAS, FRANCISCO JOSÉ, a distinguished Spanish naturalist. He was employed by the Congress of New Granada to complete the Flora of Bogota, when the disturbed state of public affairs interrupted the work; and this unfortunate gentleman, and his colleague, Don Lozano, having sided with the patriot party, were put to death by the Spanish general Murillo, in 1816.

CALDERON DE LA BARCA, PEDRO, a very distinguished Spanish dramatist, was born in 1600. He studied at the university of Salamanca, and after a residence at the court, he entered the army and served in Italy and Flanders. In 1640 he settled at Madrid, was made a knight of St James, and director of the court theatre. About 1652 he took holy orders, and was made a canon of Toledo. Calderon was a most prolific writer, beginning at the age of 14, and writing his last *auto* at 80. After he entered the church he wrote only sacred pieces, and became indifferent to his comedies and other earlier works. He had a marvellously fertile imagination, crowds his plays with incident

guage, glorifies the chivalric sense of honour,
and, above all, is animated and inspired by
religion. But it is the religion of his age,
of his country, of the Romish church. He
was, as Simondni pithily says, "the true
poet of the Inquisition." Among the most
admired of his dramas are, "Love after
Death," "The Secret in Words," "The Con-
stant Prince," "The Dawn in Copacavaua,"
"Purgatory of St Patrick," &c. One of the
most celebrated of his "Autos" or sacred
pieces is the "Devotion of the Cross." Died
between 1680—1690.

CALDERWOOD, DAVID, a Scotch presby-
terian divine, born, 1575. His opposition to
episcopacy caused him to be banished, and
he went to reside in Holland, where he pub-
lished his celebrated "Altare Damascenum,"
a detailed critical examination of the system
of the church of England. He subsequently
returned to Scotland, and by his writings
and personal exertions greatly aided in the
establishment of presbyterianism. He pub-
lished a "History of the Church of Scot-
land," for which he collected an immense
mass of materials, still kept in the Advocates'
Library, Edinburgh. Died, 1651.

CALEPINO, AMBROGIO, an Italian gram-
marian and philologist; author of a very
valuable polyglot dictionary, and other
learned and useful works. Died, 1510.

CALETTI, GIUSEPPE, surnamed IL CHE-
MONESE, an admirable Italian painter. His
principal picture is "St Mark with the
Doctors of the Church," in the church of
San Benedetto at Ferrara. In some of his
works he so closely imitated Titian, that
connoisseurs can scarcely distinguish them.
Died, 1660.

CALHOUN, JOHN CALDWELL, an eminent
American statesman, was born in South
Carolina, in 1782. After pursuing his studies
at Yale College and Litchfield, he was ad-
mitted to the bar of his native State in 1807,
elected to the legislature the next year, and
in 1811 was sent to Congress, where he soon
attained great eminence as a speaker. In
1817 he was made secretary of war under
President Monroe; in 1825 he was elected
vice-president of the United States, in 1831
a senator, in 1843 secretary of state, and in
1845 again a senator. In all the political
questions that arose during this time he took
an active part, "generally on the side of ex-
treme state rights;" and the character of his
speeches attained for him a high reputation
both as a thinker and an orator. Died, 1850.

CALIPASA, one of the greatest poets of
India, of whose life we know almost nothing.
It is uncertain whether he lived about 55
B. C. or 190 A. D. His principal poem is
"Sacuntalâ," a drama, first made known in
Europe by the translation published by Sir
William Jones in 1789. It at once excited
general admiration, and was translated into
the principal European languages. An im-
portant manuscript of the original text in
its genuine form was discovered by Brock-
haus in 1835, of which several editions and
translations have since appeared. An Eng-
lish translation by Prof. Monier Williams
was published in 1855. Among the other

works of this poet are the "Meghaduta," or
"Messenger of Clouds," and the "Vikra-
murvaal." The poems of CALIDASA contain
charming descriptions of nature, and his
"tenderness of feeling and richness of crea-
tive fancy entitle him," says Alexander von
Humboldt, "to a high place in the ranks of
the poets of all nations."

CALIGULA, CAIUS CÆSAR AUGUSTUS
GERMANICUS, Roman emperor, began his
reign, A. D. 37, with every promising ap-
pearance of becoming the real father and
friend of his people; but at the end of eight
months he was seized with a fever, which
appears to have permanently deranged his
intellect, for his disposition totally changed,
and he committed the most atrocious acts of
impiety, cruelty, and folly. He caused sac-
rifices to be offered to himself, his wife, and
his favourite horse; indulged in the most
frightful immoralities; murdered many of
his subjects with his own hands; had others
put to the rack while he was enjoying his
meals, or beheld in his presence. One of
his hugest follies was the erection of a
bridge of boats across the sea between Baie
and Puteoli. Its completion was celebrated
by a great banquet, at the close of which he
had a number of the guests, friends, and en-
emies, flung into the sea. He projected ex-
peditions to Gaul, Germany, and Britain,
and having reached the sea he bid his sol-
diers gather shells for spoils, and then led
them back to Rome. But in the midst of
his enormities he was assassinated by a tri-
bune of the people, as he came out of the
theatre, A. D. 41, in the 29th year of his age.

CALIPPUS, a Greek mathematician of
the 4th century B. C., famous for having cor-
rected the cycle of 19 years, invented by
Meton, to show the correspondence of time
in the revolutions of the sun and moon.

CALLCOTT, JOHN WALL, an eminent
English composer. He was born at Ken-
sington, and was intended for the medical
profession, but soon abandoned it for music.
The Nobleman's Catch-club having proposed
a prize, he sent in a hundred compositions!
It was then ruled that no one should send
more than three compositions of a sort; and
Callcott accordingly, in 1789, sent twelve,
four of which gained the four medals! For
many years he carried off at least one annual
prize, until 1793, when the prizes ceased to
be given. In 1790 he was made Mus. D.,
Oxford, and the same year became a pupil of
Haydn, who was then in England. The last
fifteen years of his life, with a brief interval,
were clouded by insanity. He wrote, be-
sides glees, catches, and other compositions,
a "Musical Grammar," and made some pro-
gress with a "Musical Dictionary." Born,
1766; died, 1821.

CALLCOTT, SIR AUGUSTUS WALL, R. A.,
an eminent English landscape painter, was
born at Kensington in 1779, his eldest bro-
ther being Dr Callcott, the celebrated musical
composer. Originally a chorister in
Westminster Abbey, he was induced to try
his hand at portrait painting; and such was
his success that he immediately followed the
now pursuit to which his inclination pointed.
Year after year his reputation increased:
and from 1799, when he first submitted a

specimen of his abilities for exhibition at the Royal Academy, till 1810, when he was elected a Royal Academician, he had advanced almost to the summit of his profession in his own particular branch of art, viz. landscape painting. For many years his pictures of sea-coast views and English inland scenery were in considerable request; nor were they ever deficient in number, his industry being on a par with his ability. On his marriage with the widow of Captain Graham, they made a continental tour, and it was evident soon after his return that his study of Italian scenery and the Italian masters had wrought an entire change in his style of composition. No longer did we see rural scenes of England—mills, market-carts, or ferry-boats; but "Morning" and "Evening," Italian compositions; "Sunset near Carneglia," "Italian Girls at their first Communion," and others of that class. Though for a time, however, he had abandoned, he had not forgotten, the studies of his earlier years; and in 1837 the public were both surprised and delighted with his large picture of "Raffaello and the Fornarina," with figures the size of life. In that year he received the honour of knight-hood. Died, Nov. 25, 1844; aged 65.

CALLCOTT, MARIA, Lady, daughter of Rear-admiral George Dundas, was born 1779. Married at a very early age to Captain Graham, R. N., she accompanied him to India, returned to England, and published her travels in the three presidencies before she was twenty-four years of age! Some years later she accompanied her husband to South America, where he died, and she was in Chili during the terrible earthquakes of 1822-3. Besides the "Travels" above named, she published a "History of Spain," a "Scripture Herbal," and several minor works. Her second husband was Sir Augustus Calcott, R. A., the eminent artist. Died, Nov. 1842, aged 63.

CALLET, JEAN FRANÇOIS, a celebrated French mathematician, hydrographer, and engineer; author of "A Memoir on the Discovery of the Longitude," a "Supplement to Bezout's Trigonometry," and a "Table of Logarithms, from 1 to 108,000." Died, 1798.

CALLICRATIDAS, a Spartan naval commander, who in B. C. 406, during the Peloponnesian war, succeeded Lysander in the command of the fleet. He took Methymne, but refused to sell the citizens into slavery; defeated Conon, and blockaded him at Mitylene; but was soon after defeated and killed in a battle near the Arginusæ.

CALLIMACHUS, a Greek sculptor and architect. He is said to have invented the Corinthian order of architecture, and to have taken the hint of its capital from a plant of the acanthus which surrounded a basket covered with a tile on a tomb. He flourished probably in the 4th century B. C.

CALLIMACHUS, a Greek poet and grammarian. He was keeper of the famous Alexandrian Library for about 20 years; and founded a school there, in which several men afterwards distinguished were trained. The remains of his writings, consisting of elegies, hymns, and epigrams, have been published by several eminent editors, and

translated into English by Dodd and Tytler. Died, about 240.

CALLINUS, a Greek orator and poet, supposed to have lived in the 8th century B. C. Some of his poetry is in the collection of Stobæus; and he is said to have been the inventor of elegiac verse.

CALLISTHENES, a Greek philosopher and poet, a relative and pupil of Aristotle, by whom he was recommended to Alexander the Great. He accompanied that prince in the expedition against Persia, and was at first much esteemed by him. It seems, however, that the philosopher had no small portion of arrogance, a quality not likely to serve him with a despotic and irritable prince. He crowned the offences of his free speaking by boldly reprobating Alexander's assumption of divine honours. For this he was put to death, B. C. 328.

CALLOT, JACQUES, an eminent French engraver, born at Nanci in 1593. He twice ran away from home that he might study art in Italy, and at last was allowed to study at Rome. He lived some time at Florence, patronized by the grand duke Cosmo II., after whose death he returned to Nanci, and there died, in 1633. His scenes from the sieges of Breda and Rochelle, engraved by direction of Louis XIII., are among the most admired of his works.

CALMET, AUGUSTIN, a learned French Benedictine, was born in Lorraine in 1672. He early entered the order of St Benedict, and applied himself diligently to the study of theology, and the Hebrew and Greek languages. He was head of several abbeys in succession, in all distinguishing himself by his profound acquaintance with the Scriptures, and his laborious life. The last thirty years of his life were spent in the abbey of Sémones. His writings are numerous. He is best known in England by his great "Dictionnaire historique, critique, et chronologique de la Bible," first published in 1722, and afterwards greatly extended by a supplement. The first English translation appeared ten years later, and formed the basis of all the lesser Biblical dictionaries for about a century. Among his other works are a voluminous commentary on the whole Bible; "Histoire ecclésiastique et civile de la Lorraine," "Histoire Universelle sacrée et profane," &c. Calmet's vast learning was not coupled with much discretion, and his works are in great part superseded by the advance of philology and sacred criticism. Died in 1757.

CALOMARDE, FRANCISCO TADEO, Spanish statesman, born in Lower Aragon, 1773. He studied law and settled at Madrid, where he married the daughter of the physician to Godoy, prince of the peace, and obtained a government situation. After many changes of fortune, when the constitution was abolished, and Ferdinand VII. restored to the throne, in 1823, Calomarde became minister of grace and justice. The ten years during which his ministry lasted was marked by measures of tyranny and cruelty, the guilt and disgrace of which he fully shares with the king. His ruling passion appears to have been mere selfish ambition and greed of power, and thereby at last he fell. Expect-

ing Don C hastened, bed, to calling, th the Prince arrested of the soldier his life in.

ing Don Carlos to succeed his brother, he hastened, while Ferdinand lay on his death-bed, to court his favour. But his scheme failing, through the energetic conduct of the Princess Louisa of Naples, he was arrested on his flight to France. By bribing the soldiers he escaped, and spent the rest of his life in France. Died at Toulouse, 1642.

CALONNE, CHARLES ALEXANDRE DE, an eminent French statesman, who succeeded Necker as comptroller-general of the finances in 1783; but after four years of incessant endeavours at financial reform, he could do nothing but advise an assembly of the notables, which accordingly met in February, 1787. The alarming financial statement which he then made led to his dismissal, and he was obliged to retire to England. He wrote "Observations sur les Finances," "Tableau de l'Europe en Novembre," &c. Born, 1734; died, 1802.

CALPURNIUS, or CALPHURNIUS, TITUS, a Sicilian Latin poet of the 3rd century. Seven of his eclogues are to be found in the "Poetæ Latini Minores," published at Leyden in 1731, and are clever imitations of the eclogues of Virgil.

CALVART, DENIS, an eminent Dutch painter, who had the honour of giving the earliest instructions to Guido, Albano, and Domenichino. His *chef-d'œuvre* is the picture of St Michael, in the church of St Peter at Bologna. Died, 1619.

CALVERT, GEORGE, first Lord Baltimore, an English statesman, founder of the State of Maryland. He was for some time secretary of state to James I., but was obliged to resign this office on becoming a Roman Catholic. He did not lose the favour of the king, however; but obtained a grant of a valuable tract of country in North America. He died before the charter was completed, and it was granted to his son Cecil. Died, 1632.

CALVERT, CECIL, second Lord Baltimore, son of the preceding, was invested, by royal charter, on the death of his father, with full power over the colony of Maryland. The settlement took place two years later, in 1634, and though Lord Baltimore did not himself join the colonists, he carried out his father's plans and wishes; established freedom of worship and representative government; and died in 1676.

CALVI, LAZZARO, an able Italian painter, who studied under Perino del Vaga. He was of so jealous a disposition, that he poisoned an artist who rivalled him; and, on finding Luca Cambiaso's portion of the decoration of a church preferred to his own, abandoned his profession, and did not resume it for 20 years. He is said to have lived to be 105 years old. Died, 1666.

CALVIN (CAUVIN), JEAN, the great reformer, founder and head of the Genevese theocracy was born at Noyon, in 1509. He was destined for the church and sent to study at Paris, and there he became first acquainted with the doctrines of the reformation. He then studied law at the universities of Orléans and Bourges, and in 1532 returned to Paris, a decided convert to the reformed faith. Compelled to fly from Paris in 1533, after various wanderings he found a pro-

ceptor in Margaret, queen of Navarre. In the following year he went to Basel, and there completed and published his great work, the "Institutes of the Christian Religion." After a short stay at Ferrara he went in 1538 to Geneva, where reform had just been established, and there, on the pressing entreaties of Farel and his friends, he remained. In 1538 Calvin and Farel were expelled from Geneva, in consequence of some changes introduced by them, and Calvin went first to Berne and then to Strasbourg. He was however recalled three years later, and soon proposed and got established his system of church government. He sought to regulate manners, as well as faith, and rigorously censured and punished all who resisted his authority. He applied himself also to reform the civil government; established an academy; fostered literature and science, and made Geneva "the metropolis of the reformed faith."

His personal character was spotless, but austere; his labours as pastor, lecturer on theology, councillor, author, and correspondent were immense and incessant. The terrible rigour of his ecclesiastical rule was most strikingly shown in his treatment of Servetus, who for his theological opinions was burnt at Geneva in 1553. Calvin was not present at the famous conference of Poissy, but instructed Beza and other reformers who took part in it. It was after that conference that the differences between the views of Luther and Calvin became manifest, and that the term *Calvinist* began to be used. The great distinguishing features of Calvinism are the doctrines of absolute predestination, of the spiritual presence only in the eucharist, and the independence of the church. John Knox was the friend of Calvin, and introduced his system in Scotland. Besides the "Institutes" Calvin published commentaries on the Bible, sermons, and various tracts. There is also a valuable collection of his letters. The "Institutes," written in Latin, were translated into French and almost all European languages, and have left such wide and deep impress on society as few books beside have done. Calvin died at Geneva, May 27, 1564. Among recent works illustrating the life of this great theologian are Dyer's "Life of Calvin," Bungener's "Life, Labours, and Writings of Calvin," a new edition of his "Letters" with notes by Bonnet, translated by Constable, and Merle D'Aubigne's "History of the Reformation in Europe in the time of Calvin," in 3 vols. 8vo.

CALVISIUS, SETHUS, a German chronicist and writer on music, born 1556. He became professor of mathematics at Wittenberg, and was author of "Opus Chronologicum," a work much praised by Scaliger and other learned men; a treatise on music; a work against the Gregorian calendar, &c. He also composed several psalms and other pieces of church music. Died, 1615.

CAMBACÉRÈS, JEAN JACQUES REGIS DE, duke of Parma, &c., raised to distinction by the French revolution, was born at Montpellier in 1753, brought up to the legal profession, and by his talents soon attracted the

notice of the Convention, and was appointed to various judicial offices. In the discussion relative to the fate of Louis XVI. although he was one who declared him guilty, yet he disputed the right of the Convention to judge him, and voted for his provisory arrest, or, in case of hostile invasion, his death. For a time he had the management of foreign affairs; and when Buonaparte was first consul, Cambacérés was chosen second consul. After Napoleon became emperor, he was an especial favourite, and was created archchancellor, grand officer of the Legion of Honour, and ultimately duke of Parma, and president of the Chamber of Peers. In fine, he always showed a sincere attachment to Napoleon, and devoted his best energies to his cause; and though he was banished on the second restoration of Louis XVIII., yet he was afterwards allowed to return to Paris, where he died in 1824.

CAMBIASO, LUCA, also called **LUCETTO DA GENOVA**, Italian painter, born at Moniglia, near Genoa, 1527. He painted long at Genoa, and in 1583, on the invitation of Philip II., he went with his son Orazio to Spain, and executed several works in the Escorial, especially a huge fresco of Paradise in the church of San Lorenzo, for which he was paid 12,000 ducats; and (in oil) John the Baptist preaching in the Wilderness. His best works are at Genoa, and among them are the "Martyrdom of St George," and the "Rape of the Sabinés." Cambiaso died at the Escorial, 1585.

CAMBIO, ARNOLFO DI. [ARNOLFO.]
CAMBRIDGE, H.R.H., ADOLPHUS FREDERICK, the seventh and youngest son of George III., was born Feb. 24th, 1774. He received his earliest education at Kew, and having completed his studies at Göttingen, he served as a volunteer under the duke of York, during the campaign of 1793, in Flanders, where he received two wounds; and he bore an active share in the arduous campaign in 1794 and 1795. In 1803 he was promoted to the rank of general, and appointed colonel-in-chief of the King's German Legion; in 1813 he received the field-marshal's baton; and at the close of the war in 1815 he was nominated viceroy of Hanover; an office which he held till 1837, when the death of his brother William IV. opened the succession to the throne of Hanover to the duke of Cumberland. His administration of the affairs of that country was characterized by great discretion; and in 1831, his mild yet firm conduct went far to extinguish the strong party animosities which had nearly kindled the flames of civil war. Since the close of 1837 the duke chiefly resided in this country, where he endeared himself to all classes of the community by his affability and *bonhomie*. He was a zealous supporter of all charitable institutions, and few anniversary meetings or festivals were thought to be complete if the directors had not secured him for the chairman. In politics, the duke was a liberal conservative; but he made a point of never voting, though he might speak, against the ministers of the crown. Besides being patron of the Art Union, he was exceedingly fond of the fine arts, especially of music, and at one

period of his life distinguished himself as an amateur performer on the piano and the violin. On the 7th of May, 1818, the duke of Cambridge married the Princess Wilhelmina Louisa, daughter of Frederick, landgrave of Hesse Cassel, who, with a son and two daughters, the issue of their marriage, survived him. Died, July 8, 1850.

CAMBRONNE, PIERRE JACQUES, Baron de, a distinguished French general, was born at Nantes, 1770. Entering the army in 1790, he served with distinction in the campaigns of the republic and the empire. He accompanied Napoleon to Elba in 1814, returned with him in 1815, commanded a division of the Old Guard at the battle of Waterloo, refused to surrender, though his men were nearly destroyed, and fell into the hands of the English, after being severely wounded. In 1816 he was brought before a council of war; but though unanimously acquitted, he was placed in retirement, and did not re-enter his country's service till 1830. The celebrated words, "La Garde meurt, et ne se rend pas," are attributed to him. Died, 1842.

CAMBYSES, king of Persia, succeeded his father, the great Cyrus, in 529 B.C. He was of a violent and vindictive disposition, which he manifested equally by his invasions of Egypt and Ethiopia, and by his cruel treatment of his own subjects. Died, B.C. 521.

CAMDEN, CHARLES PRATT, Esq., a distinguished British lawyer and statesman, was the third son of Sir John Pratt, chief justice of the court of King's Bench, and was born in 1713. On the advancement of Henley to the House of Lords in 1757, Mr Pratt was appointed attorney-general; and in 1762 made chief justice of the Common Pleas. In 1765 he was created a peer, and the year following advanced to the dignity of lord chancellor. In 1782 he was appointed president of the council, which office he resigned the following year; but he was afterwards re-appointed, and held it till his death in 1794.

CAMDEN, JOHN JEFFREYS PRATT, Marquis, K.G., &c., was born in 1759, being the only son of Charles, first Earl Camden, sometime lord high chancellor of England. He was educated at Trinity College, Cambridge; and in 1780 was returned to parliament as one of the members for Bath; shortly after which he received the appointment of one of the tellers of the exchequer. In 1794 he succeeded his father in the peerage, and the year following he was made lord-lieutenant of Ireland. Besides various other important situations, he held the lucrative office of teller of the exchequer for sixty years; and during almost half that term he had resigned the large income arising therefrom, amounting in the whole to upwards of a quarter of a million of money. This patriotic act alone throws a lustre over the name and character of the noble marquis, which will be remembered long after the splendour attached to his rank and honours shall have faded from the memory. For his eminent services to the state, he was created marquis Camden and earl of Brecknock in 1812. Died, 1840.

received his early education at Christ's Hospital, and subsequently studied at Oxford, where he took his B.A. degree. After filling the situations of second and chief master of Westminster School, his proficiency in antiquarian lore procured him the honourable and lucrative office of Clarendon king-at-arms. In addition to his great and well-known work, the "Britannia," he published "Annals of Queen Elizabeth," a Greek grammar, &c. Camden's "Britannia" was written in Latin, and at first appeared in one volume of moderate size. By the labours of translators and editors it was subsequently enlarged to four volumes folio. Camden was buried in Westminster Abbey, where a monument was erected to him. Born, 1551; died, 1623.

CAMERARIUS, JOACHIM, friend and biographer of Melancthon, and one of the greatest scholars of his age, was born at Bamberg in 1500. He took an active part in the great affairs of the reformation, and long held the office of rector of the university of Leipsic. His most important work is the "Vita Philippi Melancthonis." Died at Leipsic, in 1574.

CAMERON, RICHARD, a Scottish preacher and martyr of the seventeenth century, was born in Fife, and after being school-master in his native parish, became a very zealous preacher among the persecuted Presbyterians. He retired about 1677 to Holland, but returned in 1680, and resumed field-preaching in defiance of the law and the persecutors. In June of that year he put himself at the head of a little band, brave and armed, and declared war on the king. A price was set on his head and on the heads of his followers, and in a month they were defeated and captured at Airdsmoss. Cameron was slain, but his head and hands were taken and fixed up on a public place at Edinburgh. A monument marks the spot where he fell at Airdsmoss.

CAMILLUS, MARCUS FURIUS, an early Roman hero, whose story is semi-mythical, flourished in the 4th century B.C. He was six times appointed military tribune, and five times dictator. Among the exploits attributed to him are the capture of Veii after a long siege, victories over the Faliscans, the Fidenates, and the Volscians, and the deliverance of Rome from the Gauls under Brennus. After the capture of Veii, he was charged with peculation, and banished, but was soon recalled. He was the supporter of the patrician order, and opposed the measures of Licinius Stolo. Died by the pestilence, B. C. 365.

CAMOENS, LUIS DE, the celebrated Portuguese poet, was born at Lisbon in 1517 or 1524. He was educated at the university of Coimbra, and after an exile to Santarem, occasioned by his falling in love with a lady of higher rank than his own, he joined the army and fought against the Moors. Indignant at receiving no recompense on his return, he went to India, and there took part in several military expeditions, enjoying also the opportunities thus afforded of larger acquaintance with nature. He got into trouble several times, and was banished and imprisoned; and in 1569 he returned to

Portugal. After ten years of neglect and want, he died in a hospital at Lisbon, in 1579. His great poem is the "Lusiad," in which he celebrates the principal persons and events of Portuguese History. His other works are very numerous and in various styles: sonnets, elegies, odes, &c. The Lusiad has been translated into English by Mickle and others.

CAMPAN, Madame DE, distinguished no less for her amiability than her acquirements, was born at Paris, 1752. Attached to the court in the capacity of companion to the French princesses, she was particularly distinguished by Marie Antoinette, whose good and evil fortune she shared with affecting fidelity and devotion. After the revolution she established a school at St Germain; she was subsequently appointed by Napoleon head of the school for the daughters of officers whom he had enrolled in the Legion of Honour; but after the restoration of the Bourbons, this establishment was dissolved, and Madame de Campan's relationship to Marshal Ney involved her in various unpleasant investigations which embittered her life. She died in 1822, leaving behind her many educational works (of which her "Education des Filles" deserves particular notice), and memoirs, rich in sketches of the private life of her former mistress and friend.

CAMPANELLA, TOMASO, an Italian philosopher, was born at Stilo in Calabria, in 1568. He entered the Dominican order, studied philosophy, and became an opponent of the scholastic system. Persecution drove him from place to place, and in 1599, on a charge of conspiracy against the Spanish government of Naples, he was imprisoned, and was kept in confinement, more or less rigid, till 1626. After a short residence at Rome, he went to Paris, was protected by Cardinal Richelieu, and died there in 1639. Campanella was the contemporary of Lord Bacon, and aimed like him at a reform of philosophy; asserting the necessity of fresh study of nature. His chief works are "Prodromus Philosophiæ Instaurandæ," "De Sensu Rerum et Magia," "Atheismus triumphatus," "Monarchia Messiæ Jesi," and "Civitas Soli," the last being a sketch of an ideal society in the kingdom of God; "De Monarchia Hispanica Discursus," &c.

CAMPBELL, ARCHIBALD, marquis of Argyle, a zealous partisan of the Covenanters, and the opponent of Montrose. He was born in 1598, was made a lord of session in 1634, and succeeded to his father's title four years later. Called to London with other Scotch nobles the same year, 1638, he had plainly counselled the abolition of episcopacy in Scotland. Charles I. gave him the title of marquis in 1641. Argyle was unsuccessful in his military measures in the civil war, and gave up his command. He acquiesced in the Protectorate of Cromwell, and for this, at the restoration of Charles II. he was committed to the Tower. After remaining a prisoner about five months, he was sent to Scotland, tried for high treason, and beheaded in 1661.

CAMPBELL, ARCHIBALD, earl of Argyle, son of the above, and a most zealous and gallant adherent of the royal cause; so much

so, indeed, that he was excepted from the general pardon issued by Cromwell, in 1654. After the restoration he became one of the lords of council, and unsuccessfully opposed the passing of the Test Act. Condemned to death for treason, he escaped to Holland, but on his return at the head of a body of troops he was captured, conveyed to Edinburgh, and beheaded in 1685.

CAMPBELL, JOHN, duke of Argyle and of Greenwich, was the grandson of the preceding, and was distinguished equally as a soldier and a statesman. He succeeded his father Archibald in the dukedom of Argyle in 1703, and the same year was appointed a lord of session. He distinguished himself in the campaigns of Marlborough, was brigadier-general at the battle of Ramillies, and commanded with brilliant effect at Oudenarde and Malplaquet. In 1711 he was sent to command the English forces in Spain, filling at the same time the office of ambassador. To these services he added that of beating the Earl of Mar at Sherrifmuir in 1715, and compelling the Pretender to quit the kingdom. These actions, and his exertions in bringing about the union, were rewarded with the Garter and the English dukedom of Greenwich. He also held several offices, of which Sir R. Walpole deprived him, but which he regained on that minister's removal. Born, 1678; died, 1743.

CAMPBELL, GEORGE, D.D., a Scotch divine, principal of Marischal College, Aberdeen, and professor of divinity there; author of the "Philosophy of Rhetoric," once a standard work,—a "Dissertation on Miracles," in reply to Hume, "Lectures on Ecclesiastical History," &c. Born, 1709; died, 1796.

CAMPBELL, JOHN, a clever and industrious Scotch writer; author of the "Military History of Prince Eugene and the Duke of Marlborough," a "Political Survey of Britain," the "Lives of the Admirals," which had a great run and was translated into German; he had a large share also in the preparation of the "Biographia Britannica." Died, 1775.

CAMPBELL, THOMAS, LL.D., the eminent poet, was the son of a Scotch merchant, who gave him an excellent education at Glasgow, where he greatly distinguished himself. A translation of his from Aristophanes was pronounced to be the finest college exercise his judges had ever seen: and, when little more than thirteen, he won a bursary in his college from a competitor nearly double his age! Leaving Glasgow at an early age, he settled in Edinburgh as a private tutor; and here, when only in his twenty-second year, he published "The Pleasures of Hope"—one of the most elegant poems in our language. The success of this work was such as to allow of his making a tour on the Continent, whence he gave the world those splendid lyrics, "Ye Mariners of England," "The Exile of Erin," and "Hohenlinden." At the battle of Hohenlinden he was so near, that he could see the returning conquerors wiping their blood-stained sabres upon their horses' rances; a circumstance to which, in after years, he was often heard to allude. His poem, however, is by no means a true

picture of the battle it celebrates. Soon after his return from the Continent, Campbell married and settled in London, employing himself not only in occasional composition of poetry, but also in the hard literary drudgery of mere compilation. To such works he could not judiciously put his name, but from 1803 to 1809 his labours in this way were as intense and extensive as they were creditable to his love of independence. He now published "Gertrude of Wyoming," "The Battle of the Baltic," "Lord Ullin's Daughter," and "O'Connor's Child;" and he was engaged by Mr Murray to write the well-known "Critical Essays and Specimens." Subsequently he edited the New Monthly and the Metropolitan Magazines: and published "Theodoric," a poem, besides editing some reprints and compilations. Early in his career he was relieved from absolute want by the kindness of Charles James Fox, who put him on the pension list for £200 per annum. His health had for some years been but feeble, and in 1843 he retired to Boulogne, where he died: but his remains were conveyed to England and interred in Westminster Abbey. Died, June 15, 1844, aged 67.

CAMPBELL, JOHN, Lord, lord chief justice and lord chancellor of England, was born near Cupar, in 1779. He studied at the university of St Andrews, and in 1800 came to London to study law at Lincoln's Inn. He also obtained employment as reporter and theatrical critic for the *Morning Chronicle*. He was called to the bar in 1806, and with little scrupulousness from delicacy pushed his way into a good practice, both on the Oxford circuit and in London. In 1830 he entered parliament, was made solicitor-general in 1832, and attorney-general two years later. At the same time he was returned to parliament for Edinburgh. He introduced several measures of law-reform, and was engaged in the important cases of *Rex v. Lord Cardigan*, *Hansard v. Stockdale*, and *Norton v. Lord Melbourne*. In 1841 he was raised to the peerage and to the chancellorship of Ireland, but only remained in office a few months. He held the chancellorship of the duchy of Lancaster from 1846 to 1850, when he was made lord chief justice of the Queen's Bench. Three years afterwards he was appointed lord chancellor. Lord Campbell was admitted to be a sound lawyer, an effective advocate, and an able judge. He was ambitious of literary distinction, but his works in that field have received a less favourable verdict. His "Lives of the Chancellors" and "Lives of the Chief Justices" gained the popularity at which their author aimed, but by qualities which drew down on him severe criticisms: superficial knowledge, inaccuracies, plagiarisms, bad taste, unmanly levity—these are the characteristics which have been charged on Lord Campbell as a biographer. Died suddenly at Kensington, 23rd June, 1861.

CAMPEGGIO, LORENZO, born 1474, was originally a professor of civil law at Bologna, but on the death of his wife he entered the church, became a bishop, and at length a cardinal. In 1519 he was sent as legate to

pp, and at length a
as sent as legate to

England, and while here was nominated
bishop of Salisbury. After being for some
time in Germany as legate, and employed in
opposing Lutheranism, he again came to
England to decide on the great affair of the
divorce between Henry VIII. and Catherine
of Aragon, on which occasion he offended
Henry without being of any real service to
the queen. He appears to have been a man
of considerable learning and natural ability;
and he reckoned Erasmus and other eminent
scholars among his friends. Died, 1539.

CAMPER, PETER, a Dutch physician and
naturalist, born at Leyden in 1722. He
studied at the university, travelled through
the principal countries of Europe, visiting
London in 1748, attained great reputation,
and became professor of philosophy, anatomy,
and medicine at the universities of Franeker,
Amsterdam, and Groningen. He made
several important discoveries in anatomy;
was a foreign associate of the French Aca-
demy of Sciences, and a member of the
Royal Society of London. He also took
part in affairs of state as member of the
council of state, and of the assembly of the
states of Friesland. A collected edition of
his works appeared in 1803. Died, 1789.

CAMPHUYSEN, DYKKE, a Dutch land-
scape painter of the 17th century; distin-
guished for the excellence of his moonlight
pieces.

CAMPI, BERNARDINO, an Italian painter,
born at Cremona, 1592. He was a pupil of
Giulio Campi, studied the works of Raphael,
and wrote a treatise on the principles of his
art. Died, 1592.—GIULIO CAMPI, another
Italian painter, also a native of Cremona,
was born about 1600. Taught at first by
his father and afterwards by Giulio Romano,
he became a distinguished master.—Several
other painters of this name are distinguished
in the annals of Italian art.

CAMPIAN, EDMUND, an English Jesuit.
He was educated at Christ's Hospital, and
graduated at Oxford; but on a visit to Ire-
land was induced to turn Papist, and enter
as a Jesuit at Douay. He wrote "Chrono-
logia Universalis," and a drama, called
"Nectar and Ambrosia." Being chosen by
Gregory XIII. to come to England as a
missionary, he was discovered, tried for
high treason, and executed in 1581.

CAMPOMANES, PEDRO RODRIGUEZ,
Count de, a celebrated Spanish statesman,
whose profound views in political economy
obtained him, in 1765, the appointment of
fiscal advocate to the council of Castile. He
was afterwards made minister of state;
wrote many useful works, and died in 1802.

CAMUCCINI, VICENZO, an eminent
Italian painter, was born at Rome about
1775. At first he made himself known as a
clever copyist, but afterwards obtained great
reputation and many honours as a historical
painter in the classical style. He was long
head of the Academy of St Luke, and keeper
of the art-collections of the Vatican. Died,
1844.

CANALETTI, or CANAL, ANTONIO, a
Venetian painter, whose excellence was
chiefly in architectural views. His views
of Venice gained him a great reputation.
Canaletti is said to have been the first to

make the camera obscura useful in painting.
Born, 1697; died, 1768.

CANCELLIERI, FRANCESCO, an Italian
archæologist, was born at Rome in 1751, and
educated by the Jesuits. After publishing
several learned works he became secretary
to the Cardinal Leo Antonelli, and in 1802
director of the printing-press of the Propa-
ganda. He was present with Cardinal
Antonelli at the coronation of Napoleon in
1804, and became acquainted with many
eminent literary men of Paris. His works
are very numerous, and treat entirely of
antiquarian subjects. Died at Rome, 1826.

CANDOLLE, AUGUSTIN P. DE, whose
knowledge of botany has placed him in the
same rank with Linnæus, was born at Ge-
neva, 1778. Having finished his studies at
Paris, he soon attracted the notice of Cuvier
and Lamarck, whom he aided in various
scientific researches; and in 1808 he was
appointed to the chair of botany in Mont-
pellier. Obligated to quit France for having
taken office under Napoleon during the
Hundred Days, he found refuge in his native
city, where a chair of natural history was
expressly instituted for him, and where he
continued, for many years, to extend the
boundaries of his favourite science by his
lectures and publications. His chief works
are a "Théorie Élémentaire de Botanique,"
"Regni Vegetabilis Systema Naturale,"
"L'Organographie et la Physiologie Végé-
tales," &c.; in all of which he adopts what
is called the natural arrangement. Died,
1841.

CANGE, CHARLES DU FRESNE DU. [DU-
CANGE.]

CANNING, GEORGE, a highly gifted
orator and distinguished politician, was
born in London, April 11, 1770. His father,
who was an Irishman, was a man of con-
siderable literary abilities; but he died,
broken-hearted, on the very day that his
infant son was one year old. His widow
married an actor; he also died, and she then
became the wife of a linen-draper of Exeter.
But she had the happiness to live to see the
success of her son, and to receive from him
at all times the tenderest marks of filial
affection. George was first placed at Hyde
Abbey School, Winchester, and afterwards
at Eton, where he greatly distinguished
himself as a scholar, and formed many
connections which were of great service to
him in his after-life. While at Eton, he
contributed to the "Microcosm," a periodical
work conducted by the senior scholars. At
Oxford he also distinguished himself, and pro-
ceeded thence to Lincoln's Inn. Being in-
troduced to the House of Commons by Mr
Pitt, he abandoned the bar, and devoted
himself wholly to politics. His strenuous
and able support of the minister was re-
warded in 1796 with an under-secretaryship
of state; and in the year 1800 he was placed
in influence by his marriage with Miss
Joanna Scott, the daughter of General Scott,
with a fortune of £100,000. He made an
expert use of his talents as a poet and poli-
tical writer in the articles he contributed to
the "Anti-Jacobin," in which the Whigs
were wittily, unmercifully, and in some
cases unjustifiably, held up to popular

contempt. After the death of Pitt, and the dissolution of the coalition ministry of Fox and Grenville, Canning became foreign secretary in Perceval's administration; and to him may justly be ascribed the line of British policy in Spain, which destroyed the hopes of Napoleon, and led to his final overthrow: for, as he once emphatically declared, "his had been the hand which committed England to an alliance with Spain." Having, as it was alleged, unfairly endeavoured to procure the removal of Lord Castlereagh from office, a duel took place, and both parties had to quit office. In 1812 he was elected a member for Liverpool; and in 1816 he again became minister, being appointed president of the board of control. In this situation he made himself extremely unpopular by his defence of the Six Acts, and other obnoxious measures. On the return of Queen Caroline to England in 1820, Mr Canning retired from office, that he might not have occasion to vote against her. This did not prevent his being appointed governor-general of India in 1822; and he had already made preparations for his departure, when the melancholy death of the Marquis of Londonderry caused the seals of the foreign office to be delivered to Mr Canning. In conjunction with Mr Huskisson, he now advocated a course of both home and foreign policy, strikingly at variance with that of which he had for years been the wittiest and readiest, if not the most profound, defender. His new policy was as popular as his old had been obnoxious; and the earl of Liverpool being seized with paralysis from which there was no hope of his recovery, Mr Canning reached the grand object of his ambition—that of being the acknowledged head of the administration. But though the new premier was popular with the country, the party with whom he had in a great measure ceased to act rendered his task a difficult one. The opposition to him was fierce, almost rancorous; and it was soon obvious that he was suffering both in mind and body from over-exertion and constant excitement. These, aggravating the effects of a severe cold, caught while attending the funeral of the duke of York, brought on a most painful inflammatory disease, which terminated his life at the age of 57, in 1827. As an orator, he has rarely been excelled for finished elegance and classical taste; pouring forth his eloquence in a persuasive, impassioned, and fearless tone; or in a happy vein of caustic irony demolishing the arguments of his opponents. That he was ambitious of place and power, and that during his political career he made some sacrifices of principle to expediency, no one will deny; but, as a statesman, his great aim was to uphold the honour of his country, and to pursue a liberal line of policy at home and abroad; while he was a decided enemy to all intermeddling with those institutions which the wisdom and experience of ages had built up and cemented.

CANNING, CHARLES JOHN, Earl and Viscount, viceroy of India, was third son of George Canning, and was born at Brompton in 1812. He was educated at Eton and Oxford, and entered parliament in 1836 as member

for Warwick, but soon after succeeded to the peerage on the death of his mother, the Viscountess Canning. In 1841 he was appointed under-secretary of state for foreign affairs, an office which he held five years, and was then named chief commissioner of woods and forests, with a seat in the cabinet. He retired from office with Sir Robert Peel, was postmaster-general in 1853, and succeeded Lord Dalhousie as governor-general of India in 1856. Soon after the great mutiny broke out, and the enormous difficulties of the position, besides serious political differences, tasked his firmness, patience, and moderation to the utmost. The transfer of the government of India to the Crown took place in 1858, and on the change of ministry at home Lord Derby continued the viceroy in his office. He accomplished several important reforms, social and administrative, and returned to England in April 1862. The Countess Canning died at Calcutta in the preceding November, and the death of the earl took place at London in June, two months after his return.

CANO, ALONZO, a Spanish painter, sculptor, and architect, surnamed the Michael Angelo of Spain. He was born at Granada in 1600, and learnt the rudiments of architecture from his father. His masters in painting were Francesco Pacheco and Juan del Castillo. Having made himself a great name, and enjoying the patronage of the duke of Olivarez, he went to Madrid, and was appointed master of the royal works and chamberpainter to the king. Cano was a man of violent temper, and in the midst of his triumph and celebrity he became the victim of a horrible suspicion. During his absence from home his wife was murdered, and his house robbed by an Italian servant; and Cano, being suspected, was put to the rack. The torture itself could not shake his firmness, and as there was no evidence against him he was released. This story, however, as well as others respecting Cano, rests on very doubtful evidence. He then entered the church; yet his love of the arts was unabated, and the "ruling passion" was still so strong, that on his death-bed he averted his face from the crucifix of his confessor, because it was ill-carved. Died, 1676.

CANOVA, ANTONIO, one of the greatest of modern sculptors, was born at Possagno in the Venetian territory in 1747. His father was a sculptor and architect, and the genius of Antonio began to reveal itself when he was only five years old. He was placed with the sculptor Torretto, and in 1779 was called to Rome. He had already executed the groups of Orpheus and Eurydice and Dædalus and Icarus. In 1783 appeared the group of Theseus and the Minotaur, the foundation of his renown. Two years later Canova was charged with the execution of the monument to Clement XIV. (Ganganelli) for the church of the Apostles at Rome. The Cupid and Psyche, executed immediately afterwards, exhibits the tenderness and grace which were thenceforth the distinguishing characteristics of his style. The colossal monument to Clement XIII. (Rezzonico) in St Peter's church was undertaken at this period, and occupied the artist eight years. With the exception of

visits to Germany in 1798, to France in 1802 and 1809, and again as papal ambassador in 1815 for the restoration to Italy of the ancient works of art which had been carried off by the French, on which last occasion he also visited England to see the Elgin Marbles. His life is marked by no external vicissitudes. He was admitted to the French Institute, but refused the invitations of Napoleon to settle at Paris. The title of marquis of Ischia was conferred on him, but he did not assume it. Canova acquired an immense fortune by his works, and made the most generous use of it. He died at Venice in 1822. A Penitent Magdalene, Hebe, the Graces, Endymion, statues of Napoleon and his mother Letizia, and the great monument to Maria Christina, archduchess of Austria, at Vienna, are among his most highly admired works.

CANSTEIN, CARL HILDEBRAND VON, Baron, a German nobleman, distinguished for an improvement in printing, analogous to stereotyping. He caused Bibles and Testaments to be printed from entire pages, the Testaments being sold as low as fourpence each. How the baron's pages were formed does not clearly appear. Died, 1719.

CANTACUZENE, Prince, a Greek patriot, descended from the famous Eastern emperor, John, and one of the first to join Ypsilanti in 1821, when declaring for the liberty of Greece, afterwards re-established.

CANTACUZENE, JOANNES, emperor of the East. He was an able and vigilant statesman, and having rendered important services as "grand domestic" to Andronicus III., he assumed in 1341, on the death of Andronicus, the title of emperor, acting as the colleague of the young Palæologus, or as regent during his minority. Five years later he had himself crowned and made war on the young emperor. He became master of Constantinople, peace was made, and he endeavoured to heal the wounds which five years of civil war had inflicted on the state; but the jealousy of Palæologus, the rebellion of his own son, and other disasters, induced him to resign the crown and retire to a monastery on Mount Athos, where he employed himself in literary labours. He died in 1411, being more than 100 years old.

CANTARINI, SIMONE, surnamed IL PEFARESE, an Italian painter, born, 1612. His favourite master was Guido, to whom he became a formidable rival. He lived at Rome, Bologna, and Mantua in succession, and died at Verona, probably by poison. Cantarini was a good colourist, and especially excelled in his portraits. He was also a good etcher. But he was enormously vain and arrogant, and quarrelled with everybody. Died, 1648.

CANTEMIR, DEMETRIUS, a Moldavian prince; author of "The System of the Mahometan Religion," a "History of the Rise and Fall of the Ottoman Empire," &c. Died, 1723.

CANTERBURY, CHARLES MANNERS SUTTON, Viscount,—eldest son of the archbishop of Canterbury,—was born in 1780; received his education at Eton and Trinity College, Cambridge; and, being destined for the legal profession, was called to the bar in

1805. He entered parliament in 1807 as member for Knaresborough, which borough he represented till 1832, when he was elected for the university of Cambridge. In 1809 he was appointed to the office of judge advocate general; and on Mr Abbot (afterwards Lord Colchester) retiring from the speakership of the House of Commons in 1817, Mr Manners Sutton was chosen to succeed him. To a commanding presence he added urbanity of manners, particularly when addressing his political opponents; and he conscientiously discharged the important duties of his office. Having taken part in the formation of the Peel ministry in 1834, the adherents of Lord Melbourne put Mr Abercrombie in nomination for the speakership, and he was chosen (Feb. 19th, 1835) by a majority of 10. Mr Manners Sutton was shortly after called to the upper house by the titles of Viscount Canterbury and Baron Botesford. He died July 21, 1845, aged 65.

CANTON, JOHN, M.A., an ingenious English mechanic and experimentalist. The chief of his discoveries was that of the means of making artificial magnets, for which the Royal Society gave him its gold medal, and elected him a member. He contributed some valuable papers to the Transactions of the Royal Society, but published no separate work. Born, 1718; died, 1772.

CANUTE, the Dane, king of England, was the son and successor of Sweyn, king of Denmark, with whom he invaded England in 1013. The next year, on the death of Sweyn, he was chosen king by the fleet. He contested the kingdom with Edmund Ironside, and on his death became sole king, and to strengthen his title, married Emma, widow of Ethelred II. His rule, at first severe, was afterwards mild and just. He several times visited Denmark; made a pilgrimage to Rome in 1027; founded or restored religious houses; and established just laws. Died, 1035.

CAPEL, ARTHUR, Lord, a distinguished royalist, who, in 1648, in conjunction with the earl of Norwich, Sir Charles Lucas, and others, gallantly defended Colchester against the parliamentary troops. They at length surrendered, when two of the leaders, Lucas and Lisle, were shot by sentence of court-martial, and Lord Capel was reserved with the earl of Norwich for trial. The trial took place early in the following year, and Lord Capel was beheaded at London in March 1649. He was author of a moral work, entitled "Daily Meditations."

CAPEL, ARTHUR, earl of Essex, son of the above. His own merit and the memory of his father procured him the honourable employments of ambassador to Denmark and lord-lieutenant of Ireland. He subsequently, for a short time, held the office of first lord of the treasury; but lost his favour at court by voting for the exclusion of the duke of York. Being accused of participation in the Rye-house plot, he was committed to the Tower, where he cut his throat, or, as was suspected, was murdered, in 1683.

CAPELL, EDWARD, a dramatic critic; editor of a volume of ancient poetry, entitled "Prolusions," &c.; but chiefly known for his edition of Shakespeare, a task which is said

to have occupied him more than 20 years. Born, 1713; died, 1781.

CAPELLEN, GODERD ALEXANDER PHILIP, Baron VAN DER, a Dutch statesman, born in 1778, minister of the interior to Louis Buonaparte. On the union of Belgium with Holland, in 1815, he was appointed secretary of state at Brussels by the new king, and in 1815 governor of the Dutch East Indies. Although some of his measures exposed him to censure, he effected a great improvement in the condition of Java. Baron Capellen was sent ambassador to England to attend the coronation of Queen Victoria. His death, which took place in April, 1848, was caused by a blow received in the streets of Paris during the revolution in February preceding.

CAPELLO, BIANCA, at first the mistress, and afterwards the wife of Francisco, son of the grand duke Cosmo de Medici. She was possessed of great ability, but was both artful and cruel, and her memory is detested by the Florentines. The fact that her husband and herself died within a few days of each other, caused it to be surmised that they were poisoned, and rumour charged the dark deed upon the brother of her husband, the Cardinal Ferdinand. Died, 1587.

CAPISTRAN, JOHN, a friar, who distinguished himself in the 14th century by the zeal with which he fought against Turks and heretics. He headed a crusade against the Hussites, of whom he is said to have made many converts. He also took part with Hunlades in the successful defence of Belgrade against the Turks. He died in 1456; and nearly three centuries afterwards was canonized.

CAPO D'ISTRIA, JOHN, Count of, a Greek diplomatist in the service of Russia, was born at Corfu in 1780. He was the son of a physician, who became provisional governor of the Ionian Islands during the Russian occupation, and when that was terminated by the treaty of Tilsit entered into the service of Russia. His son accompanied him, and gradually rose in the diplomatic service. After a mission to Vienna he was employed in connection with the army in Moldavia, and accompanied the emperor Alexander in the campaign of 1812. He was subsequently ambassador to Switzerland, took part in the congress of Vienna, and negotiated the treaty of Paris. About 1816 he was joint secretary of state in the foreign department with Nesselrode, and thenceforth took a leading part in the diplomatic transactions with the Porte. In 1828 he became president of the Greek government, in which office he was very unpopular, and he was assassinated in the autumn of 1831.

CAPRARA, GIOVANNI BATTISTE, Cardinal, born in 1738. He was sent as nuncio to Cologne in 1767, and afterwards in the same capacity to Lucerne and Vienna. In 1792 he was made cardinal. Nine years later he negotiated the Concordat with Napoleon, and celebrated at Notre Dame the re-establishment of religious worship in France. He accompanied Buonaparte, in 1803, to Brussels, and was by him made archbishop of Milan. It was by Caprara that Buonaparte was crowned king of Italy in 1805. He died in 1810.

CARACALLA, MARCUS AURELIUS ANTONINUS, Roman emperor. He was born in 188, and, in conjunction with his brother, Geta, succeeded his father, Severus, in 211. His first wish was to get rid of his brother, and he succeeded in getting him murdered in the following year, as well as many leading men supposed to be friends of Geta. One of these was the great jurist Papinianus. Caracalla indulged in extravagance, extortion, and cruelty without restraint, and went in succession into the various provinces of the empire, laying on all burdens of injustice and cruelty. In 215 he was at Alexandria, and there avenged himself on the people for their free speech of his character and deeds by a massacre lasting several days. After six years' reign he was murdered by one of his guards, in 217.

CARACCI, LUDOVICO, a celebrated Bolognese painter. He studied under Prospero Fontana, Passignano, and Tintoretto, and carried on with his brothers the famous school founded by him at Bologna till 1600, when they were called to Rome, and left him sole head. The principle of this school was eclectic. The works of Ludovico are chiefly to be found in the churches and palaces of Bologna, though other Italian towns possess a few of them. The National Gallery has one, "Susannah and the Elders." Born, 1555; died, 1619.

CARACCI, ANNIBALE, cousin of the above, and still more eminent as a painter. He was born in 1560, and was taught his art solely by his cousin Ludovico. He assisted in conducting the school of painting at Bologna till he was called to Rome, where he was engaged in painting the palace of the Cardinal Farnese, a work which occupied him eight years, and for which he is said to have received but five hundred gold crowns. It is probable, however, that this sum was a gift in addition to the pay agreed upon. There are seven paintings by this master in the National Gallery. Died, 1609.

CARACCI, AGOSTINO, brother of the last named, and born at Bologna, 1558. He, like his distinguished relatives, was an eminent painter, and in conjunction with them taught in the celebrated school. He also assisted Annibale in designing and executing the frescoes in the Farnese palace. The "Communion of St Jerome" is his greatest work. But he was still more distinguished as an engraver. His prints after Correggio, Paul Veronese, and Tintoretto, are greatly admired. Two of his cartoons are in the National Gallery. Died, 1602.

CARACCIOLI, FRANCISCO, an Italian admiral, born about 1748; one of the victims who perished by the sanguinary reaction at Naples in 1799, when the French abandoned the town, and the royal family were restored. Notwithstanding the capitulation with Cardinal Ruffo, which guaranteed his life, he was hanged at the masthead of his vessel, and his body thrown into the sea. Much has been said of the evil influence used by Lady Hamilton over Nelson, then stationed off Naples, to get him to sanction this outrage; but Lady Hamilton vehemently denied it.

whose real name was

CARADOC, was king of the ancient British tribe inhabiting South Wales, called the *Silures*. He gallantly resisted the Romans for a considerable time, but was at length defeated by Ostorius, A. D. 50. When taken prisoner and carried before the Emperor Claudius, his dignified behaviour and noble speech procured him his liberty; but what afterwards became of him is not recorded.

CARADOC, a British historian; reputed author of "Brut y Tywysogion, or Chronicle of the Princes of Wales." Several MS. copies of it remain; and one of them has been continued as far as 1280. This Chronicle is included in the "Monumenta Historica Britannica," vol. 1. Died about 1156.

CARAGLIO, GIANGIACOMO, a celebrated early Italian engraver, was born at Verona about 1500, and studied under Marcantonio at Rome. He distinguished himself as an engraver of medals and gems, as well as on copper-plate, and was called to the court of Sigismund, king of Poland. His prints are after the works of Michael Angelo, Raphael, Titian, and other great masters. Died at Parma, 1570.

CARAUUSIUS, a native of Gaul, who had the command of a Roman fleet against the Franks and Saxons in 286, and who the same year, suspected of treachery, crossed over to Britain, and assumed the title of emperor. He defeated Maximian, and was acknowledged associate in the empire. He held his ground in Britain till 294, when he was murdered by Allectus.

CARAVAGGIO, MICHELANGELO DA, an Italian painter, was born in 1569. He followed through great difficulties his natural bent for art, and attained distinction as a colourist and a close copyist of nature. In character and habits he was coarse and violent, and was continually getting into trouble through his quarrelsome propensities. He was head of the school of so-called Naturalists. Among his best works are the "Deposition of Christ," at Rome, the "Card-players," and "Christ and the two Disciples at Emmaus." The last is in the National Gallery. Died in want and misery, 1609.

CARAVAGGIO, POLIDORO DA. [CALDARA.]

CARDAN, JEROME, Italian physician and mathematician, was born and educated at Pavia. He held successively the chairs of mathematics or medicine at Pavia, Milan, and Bologna, and in 1571 settled at Rome, and received a pension from the pope. He acquired extraordinary reputation as a physician, and was called to Scotland to attend the archbishop of St Andrews. He made some important discoveries in algebra; studied astrology, and pretended to a gift of prophecy, and wrote an immense number of books. Among them are an account of himself, "De Vita propria;" "Ars Magna," his treatise on algebra; "De Rerum Varietate;" "De Rerum Subtilitate," &c. An interesting account of this singular man was published by Mr Morley a few years ago. Died about 1576.

CARDI DA CIGOLI, LODOVICO, an eminent Tuscan painter, and a reformer who opposed the imitators of Michael Angelo. His own style was to a great extent formed

after the style of Correggio and that of the Caracci. The masterpiece of his pencil, St Peter Healing the Cripple, painted for St Peter's at Rome, was unfortunately destroyed by the damp. Cigoli painted many fine altar-pieces. He wrote a treatise on Perspective. Died, 1613.

CARDON, ANTOINE, an eminent Belgian engraver, born in 1739; died, 1822.

CARDON, ANTOINE, son of the preceding, was also an engraver of very considerable talent, many of whose works are well known and esteemed. Born at Brussels, in 1772; died in London, 1813.

CARDUCCIO, or CARDUCHO, BARTOLOMEO, a celebrated painter, was born at Florence in 1560. He was a pupil of Zuccherò, with whom he went in 1583 to Spain, and was employed in the Escorial under Philip II. and Philip III. He painted in fresco and in oil. His chef-d'œuvre is the "Descent from the Cross," in the church of St Philip, Madrid. Died in Spain, 1610.

CARDUCCIO, or CARDUCHO, VINCENZIO, painter, brother of the preceding, was born at Florence in 1568. He accompanied his brother to Madrid, became painter to Philip III. and Philip IV., executed numerous works at Madrid, Toledo, and other cities of Spain, and completed the series begun by his brother at the château of Pardo, and died in 1636. He was author of "Dialogos sobre la Pintura."

CARDWELL, EDWARD, D.D., a learned divine and ecclesiastical historian, was born at Blackburn in Lancashire in 1787. He studied at Oxford university, became a fellow of Brasenose College in 1809, and five years later one of the university examiners. He was appointed Camden professor of history in 1826, and succeeded Dr Whately as principal of St Alban's Hall in 1831. His good business habits acquired for him great influence in the government of the university, in which he filled several responsible offices. He was also private secretary to three successive chancellors. Among his numerous and important works are, an edition of Aristotle's *Ethics* with notes; lectures on the "Coinage of the Greeks and Romans;" a students edition of the Greek Testament; a critical edition of the "History of the Jewish War," by Josephus; and a series of learned works on the history of the church of England, forming parts of a great projected work based on Wilkins' "Concilia Magnæ Britannicæ." The works published include the "History of Conferences and other Proceedings connected with the Revision of the Book of Common Prayer from 1558 to 1690;" the "Documentary Annals of the Reformed Church of England, from 1546 to 1716;" "Synodalia," and the "Reformatio Legum Ecclesiasticarum," &c. Dr Cardwell was the personal friend of Sir Robert Peel and Mr Gladstone and a member of the Society of Antiquaries. Died at Oxford, in May, 1863.

CAREW, THOMAS, an English poet. His masque, "Cœlum Britannicum," was performed before the court at Whitehall in 1633, and greatly admired. Died, 1639.

CAREW, RICHARD, an English writer, chiefly on topography; author of "A Survey of Cornwall," &c. Died, 1620.

CAREW, Sir GEORGE, brother of the above. He was much employed by Queen Elizabeth, who knighted him. He wrote an account of France and the court of Henry IV., which was not published till above a century after his death. Died, 1614.

CAREY, HENRY, earl of Monmouth, an English nobleman, distinguished for his scholarship, and especially for his acquaintance with modern languages. He translated numerous works from the French and the Italian, of which the most important are Blount's "History of the Civil Wars of England," and Paul Paruta's "History of Venice." Died, 1661.

CAREY, HENRY, an English musician and poet. He chiefly excelled in ballads, one of which, "Sally in our Alley," was praised by Addison for its words, and by the celebrated Gemlinani for its music. He was the author of several burlesque and other dramatic pieces highly popular in their day. Died, by his own hand, 1743.

CAREY, GEORGE SAVILLE, son of the above. He inherited much of his father's peculiar talent; and, though intended for the business of a printer, he speedily abandoned it for the stage. His songs, chiefly patriotic ones, were inferior to his father's both in poetry and music. Besides these and some farces, he wrote "A Rural Ramble," "Balnea," being sketches of the English watering-places, &c. Died, 1807.

CAREY, WILLIAM, a celebrated Baptist missionary, was born at Paulerspury, Northamptonshire, in 1761. His father kept a small school in the village, and apprenticed his son to a shoemaker at Hackleton, where his earnest inquiries upon religious subjects attracted the notice, and soon obtained him the friendship, of the Rev. Thomas Scott, of Ravenstone. He joined a congregation of Baptists, and in his 20th year began to preach, which he continued for two years, when he was publicly baptized in the river Nen. In 1787 he was intrusted with the charge of a congregation at Leicester, where, persevering in his benevolent object of converting the heathen (respecting which he had before published his opinions), he induced other ministers to join him; and, in 1792, they formed themselves into a Baptist Missionary Society at Kettering. William Carey was nominated to go upon their first mission, and India was selected as the most desirable field for the commencement of the work. He arrived in Bengal in 1794, but had the ill fortune to lose all his money and effects by the sinking of a boat in the river Hooghly. After patiently enduring severe toils and privations for three years (during which period he acquired the Bengalee), Mr Carey preached publicly; but as the East India Company were opposed to his object of forming an establishment inland, in 1799 he proceeded to the Danish settlement of Serampore. This little missionary settlement, consisting of seven preachers only, with their wives and families, rapidly increased; a school was opened, and type being sent from England, a translation of the Scriptures was printed in the Bengalee language. Mr Carey, having made himself a complete master of the native languages,

was, in 1801, appointed by the governor professor of Sanscrit and other Oriental languages at the college of Fort William, Calcutta. He had many difficulties to contend with, both from the prejudices of the natives, and the political views of influential men at home. But he persevered, and, in 1805, a diploma of D.D. was transmitted to him from one of the American universities. He never relaxed in the work he had begun, but translated the Scriptures into several of the Indian languages, and lived to witness the success of his ardent exertions for their dissemination among the native tribes. Died, 1834.

CAREZ, JOSEPH, a French printer, who made some important improvements in the art of stereotyping. Died, 1801.

CARLETON, Sir DUDLEY, Lord Dorchester, an English statesman during the reigns of James I. and Charles I. He was a man of great ability; but, like Laud and other statesmen of that time, he had a bigoted fondness for arbitrary government. As an author he is chiefly known by the work entitled, "Letters to and from Sir Dudley Carleton during his embassy to Holland, from January, 1616, to December, 1620." These letters, which were edited by Lord Hardwicke, contain much valuable information, though they also display much prejudice. Died, 1632.

CARLETON, Sir GUY, Lord Dorchester, a military officer of great courage and skill. Having passed through the subaltern ranks, he, in 1762, became a colonel, and distinguished himself very greatly at the siege of the Havannah. In 1772 he was raised to the rank of major-general, and intrusted with the important office of governor of Quebec; in which situation he defended Canada against Generals Arnold and Montgomery, whose army he routed, the last-named general being slain. For this General Carleton was knighted, and promoted to the rank of lieutenant-general. He next succeeded General Clinton as commander-in-chief in America; and, at the conclusion of the war there, was raised to the peerage, and made governor of Quebec, New Brunswick, and Nova Scotia. Died, 1808.

CARLI, GIAN RINALDO, an Italian archæologist, numismatist, and economist, was born at Capo d'Istria in 1720. He held for several years a professorship of astronomy and navigation at Padua, and afterwards became president of the council of commerce at Milan. In 1771 he was placed at the head of the council of finance. He rendered important services to his country in commerce, navigation, and finance; and induced the Emperor Joseph to abolish the Inquisition at Milan. His principal works are "Delle Monete e della Instituzione delle Zecche d'Italia," in 7 vols. 4to, and "Antichità Italiche," 5 vols. 4to. He wrote many other works, and died in 1795.

CARLISLE, GEORGE WILLIAM FREDERICK HOWARD, Earl of, lord-lieutenant of Ireland, was born at London in 1802. He was educated at Eton and Oxford, was returned to parliament for the family seat of Morpeth, was afterwards member for York-

by the governor and other Orientalists of Fort William, difficulties to overcome prejudices of the views of influential persons, and, in 1802, was transmitted to African universities. Work he had begun, and was intended to be carried into several of his exertions for their benefit.

French printer, who made improvements in the art, 1801.

CADLEY, Lord Dorsetman during the reign of Charles I. He was but, like Laud and time, he had a history of government. He is chiefly known by his efforts to and from Sir his embassy to Holland in December, 1620. Here edited by Lord his valuable information display much preju-

ice, Lord Dorchester, great courage and through the subaltern name a colonel, and very greatly at the

1795. An Italian architect and economist, was born in 1720. He held the professorship of astronomy in the university of Padua, and afterwards

was a member of the council of commerce. He was placed at the head of the department of finance. He was sent to his country to regulate the revenue, and finance; and, in 1754, he was sent to abolish the

His principal works are the *Instituzione delle Leggi*, 4to, and "Antiquities of the Romans." He wrote many works.

WILLIAM FREDERICK, lord-lieutenant of London in 1802. He was born at Oxford, and was the family seat of a member for York-

shire, and supported Earl Grey in the contest ending with the Reform Act. Lord Morpeth the courtesy title by which the earl was first known represented the West Riding from 1833 to 1841, and again in 1846 till he succeeded to the peerage two years later. He was chief secretary for Ireland from 1835 to 1841; afterwards for several years chancellor of the duchy of Lancaster, and in 1855 lord-lieutenant of Ireland. He filled that office for three years, and was recalled to it on the fall of Lord Derby's ministry. His fascinating manners and his interest in all philanthropic projects made him very popular. His health compelled him to retire in August, 1864, and he died at Castle Howard in the following December.

CARLISLE, SIR ANTHONY, a distinguished anatomist and physiologist, was born at Stillington, Durham, in 1768, and commenced his professional studies at York, under the care of an uncle, at whose death he was transferred to Mr Green, founder of the hospital in the city of Durham. He thence proceeded to London, and became a resident pupil of Mr H. Watson, a surgeon of Westminster Hospital, and one of the court of examiners of Surgeons' Hall, a man of the first rank in his profession. In 1793, that gentleman dying, Mr Carlisle succeeded him in the hospital, and speedily distinguished himself, as much by his invariable humanity to the suffering poor as by his surgical skill. As a man he was upright in his principles, and undaunted in the avowal of his opinions. He was senior surgeon to the Westminster Hospital, one of the council and court of examiners of the Royal College of Surgeons, F.R.S., &c. Sir Anthony contributed many papers to the Transactions of various learned Societies, and also published several independent works on professional subjects. Died, Nov. 2, 1840.

CARLISLE, NICHOLAS, an eminent antiquary, brother of the preceding, was born at York, 1771. After receiving what he himself calls a "humble education," he entered the naval service of the East India Company, and gradually amassed a considerable sum, which enabled him to be of great assistance to his brother, the eminent surgeon, at the beginning of his career. In 1807 he was elected secretary to the Society of Antiquaries, his competitor being the late Dr Dibdin; and in this capacity he found leisure to compile many laborious and useful works. In 1812 he was appointed assistant librarian at Buckenham House; in 1826 he was nominated one of the gentlemen of the privy chamber; and in testimony of the estimation in which he was held, he received orders of knighthood from Austria, Denmark, and Hanover, and from Oxford the honorary degree of D.C.L., in 1835. Died, 1847.

CARLOMAN, son of Pepin the Short, king of the Franks, and younger brother of Charles the Great (Charlemagne), was born in 751, crowned with his brother at St Denis by Pope Stephen II. in 754, and made patrician of Rome, and succeeded his father in 768, as king of Austrasia, Suabia, and Thuringia. He was crowned a second time at Soissons the same year. Suspicion and

discord prevailed between him and Charles throughout his short reign. Died, 771. His widow took refuge, with her sons, at the court of Desiderius, king of the Lombards.

CARLOMAN, king of France, was son of Louis the Stammerer, and with his brother Louis III. succeeded his father in 879. Early in the following year a partition of the monarchy was agreed to, and Carloman had for his share Burgundy, Aquitaine, and the marquisate of Toulouse. The brothers however remained united in action, fought together against Boson, who had usurped Provence, took part in the siege of Vienna held by Ermengarde, wife of Boson, and afterwards encountered the Northmen. Died, 884.

CARLOS, DON, son of Philip II. of Spain, was born at Valladolid in 1545. He was heir-presumptive to the throne, but early showed a very haughty and violent temper, and was an object of aversion to his father, and of reasonable fear to the people. Weary of the rigorous treatment to which he was subjected, impatient perhaps of exclusion from a share in the government, he was suspected of heretical leanings and of an intention to join the revolted Flemings. Philip, with Count Lerma and other courtiers, seized the prince in his bed, took possession of his papers, and had him imprisoned. He died, whether a natural death, or by violence, or by poison, is not known, about six months after, in July, 1568. Two months later died the Queen Elizabeth, married to his father after being betrothed to Don Carlos. There appears to be no basis of fact for the romances that have been written on the fate of this prince.

CARLOS, DON, Pretender to the crown of Spain, was the second son of Charles IV. and brother of Ferdinand VII. He was compelled to join with Ferdinand in renouncing all claims to the throne in favour of Napoleon, and was held prisoner in France from 1808 till 1813. An insurrection in favour of Don Carlos broke out in 1825, but was soon suppressed. On the death of Ferdinand VII. in 1833, a civil war began between the Carlists and the supporters of the Queen Isabella; whose legal title depended on the question whether the Salic law was in force in Spain or not. The war was carried on with great cruelty, and only ended in 1839, with the defeat of the Carlists, to which a British auxiliary force contributed, and the flight of Don Carlos to France. He kept up the pretence of kingship for a time, then renounced his claim in favour of his son, the Count of Montemolin, and died at Trieste, in 1855.

CARLYLE, ALEXANDER, an eminent Scotch Presbyterian minister of the 18th century, was born in 1722, was educated at Glasgow, Edinburgh, and Leyden, and became minister of Inveresk in 1747. He had witnessed the Porteous riots, served as a volunteer in the rebellion of 1745, and was present at the battle of Prestonpans; of which parish his father was minister. He led an active social life, enjoying intercourse with the most eminent Scotchmen of his day, and with some eminent Englishmen. He was the friend of David Hume, Adam Smith, Home, author of "Douglas," Blair,

author of the Lectures on Rhetoric, and other literary men. He got into trouble with the Presbytery for assisting at the first private rehearsal of "Douglas," and published two sarcastic pamphlets on the matter. From his noble head and countenance he acquired the name of JUPITER-CARLYLE, and sat as model for Jupiter, to Gavin Hamilton. In his old age he wrote an "Autobiography," which remained unpublished till 1860. It is a racy volume, full of most vivid pictures of Scottish life, character, and manners, with notices of many remarkable persons, English as well as Scotch. Died, 1805.

CARLYLE, JOSEPH DACRE, an English divine and linguist. He accompanied Lord Elgin on his embassy to Constantinople, and took that opportunity to explore various parts of Asia Minor, Egypt, &c. His specimens of Arabic poetry, and a learned summary of the affairs of Egypt, from the year 971 to the year 1453, were published during his lifetime, and procured him considerable celebrity. After his death a volume appeared of his "Poems suggested by Scenes in Asia Minor, Syria, and Greece." Died, 1804.

CARNARVON, HENRY JOHN GEORGE HERBERT, third Earl of, eminent as an author, a traveller, and a politician, was born in 1800. After finishing his school education at Eton, he repaired to Christchurch, Oxford, and when his university career terminated, he entered upon a well-devised plan of travel, extending over Italy, the Peninsula, parts of Africa, and Greece; and the results of which he from time to time gave to the world in works abounding in animated and picturesque descriptions. His most popular work was his "Portugal and Galicia;" but his "Moor," a poem, and "Don Pedro," a tragedy, evince poetic powers of no mean order. In 1830 Lord Carnarvon, who down to this period had borne the title of Lord Forchester, was returned to the House of Commons, where he made a distinguished *début*; but his father's death, which took place in 1833, led to his removal to the House of Lords. He took an active part in all the proceedings of the upper house, making occasional trips to the Continent in pursuit of health. Died, Nov. 10, 1849.

CARNE, JOHN, miscellaneous writer, was born in Cornwall, 1789. On the completion of his studies he travelled in the East, and we have the fruits of his travels in the volume, entitled "Letters from the East," which originally appeared in the New Monthly Magazine. Subsequently he published "Recollections of the East," "Letters from Switzerland and Italy," "Lives of the most Eminent Missionaries," &c. Died, April, 1844, aged 55.

CARNEADES, an eminent Greek philosopher. He was a pupil of Diogenes the Stoic, and, subsequently, of Egeasius. He was the founder of the New Academy or School of Philosophy at Athens, and opposed the doctrine of the Stoics. The Romans having imposed a fine on Athens, Carneades, with Diogenes and Critolaus, was sent to plead against it. He did so successfully, and so great a sensation did his eloquence make, that Cato feared its effect on the Roman

youth, and urged the senate to expel him from the city. Died, 129, B. C.

CARNOT, LAZARE NICOLAS MARGUERITE, a French mathematician, and war minister under Napoleon, was born in Burgundy, in 1753, entered the corps of engineers, and received promotion from the prince of Condé; yet at the commencement of the revolution he became a decided partisan of the republic, and, as a member of the Convention, voted for the death of the king. During the Reign of Terror he took an active part in public affairs; and on the establishment of the Executive Directory he became one of its five members. In this office he remained till 1797, when, with Barthelemy and others, he was accused as a royalist, and exiled. *Ruonaparte*, on becoming first consul, recalled Carnot, and made him minister of war. He so steadily opposed the establishment of the consulate for life, that he was at length compelled to resign. He subsequently was a member of the tribunate, and on its suppression retired to private life. In 1807 he received a pension of 10,000 francs. Once more, in 1814, he accepted service, and was appointed governor of Antwerp. In the following year, during the Hundred Days, he was minister of the interior, and after the fall of Napoleon, he retired, first to Warsaw, then to Berlin, and finally settled at Magdeburg. There, in the pursuit of science, he passed his last years. As a writer, Carnot is very favourably known by his "Réflexions sur la Métaphysique du Calcul Infinitesimal," "La Géométrie de Position," and other scientific treatises. Died, 1823.

CARO, ANNIBALE, an Italian poet. His parents were very poor, but in early life he had the good fortune to be patronized by Pietro Ludovico Farnese. Subsequently he became secretary to the cardinal Alessandro Farnese, who literally heaped preferments upon him. His original works, both prose and verse, are of a high order; but his chief merit is in his translations from the Greek and Latin. Among these, he obtained the highest reputation by his translation of the *Æneid*. Born, 1507; died, 1566.

CAROLINE, AMELIA ELIZABETH, wife of George IV., king of Great Britain and Hanover, second daughter of Duke Charles William Ferdinand of Brunswick (who was mortally wounded in the battle of Auerstadt) and of the Princess Augusta of England, sister of George III. She was born May 17th, 1768; married the Prince of Wales in 1795, and gave birth to the Princess Charlotte in the year following; but was scarcely recovered from her confinement, when her husband abandoned her without assigning any valid reason. The princess retired to a mansion at Blackheath, where she devoted herself to the arts and sciences, and dispensed no inconsiderable part of her income in acts of benevolence. Meanwhile, the friends of the prince accused her of illicit connections, and even asserted that she was the mother of a boy whom she had adopted, and that the father was Sir Sidney Smith. This led to a "delicate investigation," and on the whole evidence being submitted to George III., he declared himself satisfied of her innocence,

and received her with marks of his especial favour. In 1813 the quarrel was renewed, and in July, 1814, the princess obtained permission to go to Brunswick, and, afterwards, to make the tour of Italy and Greece. On quitting England, she assumed the title of Countess of Wolfenbützel; and, while at Milan, took into her service an Italian, named Bartolomeo Bergami, and appointed his sister one of her maids of honour. For a time she resided at Como; but afterwards visited Tunis, Malta, Athens, Constantinople, Ephesus, and lastly Jerusalem. While there she exhibited extraordinary munificence in gifts to the conventual fathers as well as to the poor; and took upon herself to found a new order of knighthood, entitled the order of St. Caroline, of which she constituted Bergami grand master. Her indiscretion in thus elevating Bergami became a theme of general conversation; and commissioners were secretly sent out to make inquiries and to furnish evidence on which to obtain a divorce. While absent from England, death had deprived her of her friends, George III. and the duke of Kent; of her daughter, the Princess Charlotte; and her brother, the duke of Brunswick, who fell at Ligny, two days previous to the battle of Waterloo. Yet, on the prince of Wales ascending the throne, January 29, 1820, the ministry offered her an income of £50,000 sterling, the title of queen of England, and all the dignities appertaining thereto, on condition that she should continue to reside abroad. This proposal she rejected, accused her enemies of conspiracy against her, and returned to England, cheered by the enthusiastic welcome of nine-tenths of the people. She was then publicly accused by the minister, Lord Liverpool, of adultery; and, after a protracted trial, on which the queen was defended by Mr (afterwards Lord) Brougham, the bill of pains and penalties was passed to a third reading by a trifling majority; but government thought it prudent to withdraw it. After this outrage on public decency, preparations were made for the king's coronation. The queen demanded to be crowned with him; and this being refused, she requested to be present at the ceremony, but was repeatedly turned from the doors of Westminster Abbey and refused admission. The spirit of Caroline sunk under this last effort; and scarcely had a fortnight elapsed when she was taken suddenly ill, and died on the 7th of August, 1821. Having expressed a wish that she should not be buried in England, her remains were removed to Brunswick. On the funeral procession passing through London, a violent conflict took place between the life-guards, who were conducting it, and the populace. To what extent the queen was guilty no one can say, the evidence being most conflicting and unsatisfactory; but seldom has a woman had so many pleas to urge in extenuation of her crime, if really guilty.

CARPENTER, Dr LANT, an eminent theological writer, was born at Kidderminster, 1780. After finishing his education under the care of Mr Pearsall, a relation of his mother, whose zeal in behalf of the Dissenters is well known, he was sent in 1797 to the

academy of Northampton, with a view to the ministry, and on finishing his studies at Glasgow university, he became assistant in a school at Birmingham, subsequently one of the librarians of the Athenæum at Liverpool, where he formed an intimacy with Roscoe, Dr Currie, and other eminent men, and in 1805 one of the ministers of the Unitarian congregation at Exeter. In 1817 he undertook the care of the Unitarian church at Bristol; and here he laboured till 1826, when his health began to decline, and he endeavoured to regain it by travelling in England and on the Continent. He returned to Bristol in 1829, and continued assiduously to promote every good and useful work; but in 1839 his health once more gave way, and while sailing from Naples to Leghorn, whether he had gone for recreation, he fell overboard and was drowned, 5th April, 1840. His body was found near the site of the ancient Antium, and was interred there. Dr Carpenter was a most industrious writer. Besides publishing numerous sermons and polemical pamphlets, he contributed largely to Rees's Cyclopædia and many periodicals; and his substantial works, published both during his life and since his death, are masterpieces of style and argument. His "Apostolical Harmony of the Gospels" is referred to as an authority even by his theological opponents.

CARPENTER, RICHARD, an English divine of the 17th century. He was originally educated for the established church, but seceded from it, and became a Romish priest. He recanted, and obtained a vicarage in Sussex; but at the outbreak of the civil war he quitted England, and again professed himself a Catholic. The restoration caused him to return to England, and turn Protestant. He changed once more, and died a Catholic. The writings of this unprincipled man are, "Experience, History, and Divinity," and "The Pragmatical Jesuit," &c.

CARPI, UGO DA, an Italian painter and wood engraver of the 16th century, to whom is generally attributed the invention of the kind of engraving called by the Italians "chinoscuro." The facts and dates of his life are unknown, and his engravings, chiefly after Raphael and Parmegiano, are few in number and difficult to identify.

CARPI, GIROLAMO DA, an Italian painter of the 16th century, and a very successful imitator of Correggio. Died at Ferrara, 1556.

CARPINI, JOHANNES DE PLANO, a Dominican friar of the 13th century, and one of the embassy from Pope Innocent IV. to the descendants of Zenghis Khan, sent to prevent them from invading Europe, and to induce them rather to turn their arms against the Saracens and Turks.

CARPOCRATES, a Gnostic teacher of the 2nd century, who denied the divine nature of Christ, and made light of morality. His followers were accused of lewd and immoral practices, but Dr Lardner thinks the accusation to have arisen rather from enmity than fact.

CARPZOV, the name of a German family, many of whose members distinguished themselves as jurists, theologians, &c., in the 17th and 18th centuries. Among them were,

JOHANN BENEDICT, born at Lelpsic in 1639, who became professor of theology and Hebrew at the university of his native town, and died in 1699. He left various treatises on sacred philology.—**JOHANN GOTTLIEB**, nephew of the preceding, born at Dresden in 1679. He was author of "Critica Sacra," introductions to the historical books of the Old Testament, and to the New Testament, &c. Died, 1767.—**JOHANN BENEDICT**, philologist, born at Lelpsic in 1720. He was professor of philosophy at Lelpsic, and afterwards of ancient literature at Helmstadt. He wrote many works and published several translations of Greek authors. Died, 1803.

CARR, WILLIAM HOLWELL, an English clergyman, and a distinguished patron of the fine arts. He spent large sums in pictures, which he bequeathed to the National Gallery. Died, 1830.

CASTRANZA, BARTOLOMEO DE, a Spanish Dominican. He distinguished himself at the council of Trent, and had the honour to accompany Philip II. of Spain to England, where he laboured so zealously to establish Popery, that the king made him archbishop of Toledo. Here, however, his success ended; for being accused of heresy, he was imprisoned at Rome for ten years, and subsequently sent to a monastery for the remainder of his life. His chief works are, "Summa Conciliorum" and a "Treatise on the Residence of Bishops." Died, 1576.

CARREL, ARMAND, chief editor of the "National," and a distinguished political writer. He was born at Rouen, in 1801, and served for some years in the army. At the age of 24 he settled at Paris, and applied himself to literature, at first in the service of the historian Thierry, and afterwards as miscellaneous writer and journalist. He became one of the founders and joint editor of the "National" in 1830. Died, of a wound he received in a duel with M. Girardin a few days previous, July 21, 1836.

CARRENNO DE MIRANDA, DON JUAN, an eminent Spanish painter, patronized by Philip IV. In colouring and tenderness of feeling he surpasses all his countrymen, with the exception of Murillo. Died, 1685.

CARRERAS, JOSE MIGUEL, JUAN, and LUIS; three brothers, distinguished in the revolution of Chili; pre-eminent for patriotism, talents, and purity of character; yet, by adverse fortune, they all perished at Mendoza, under the merciless rule of O'Higgins and San Martin. The latter sent their aged father an account of the expenses of the execution of Juan and Luis, who suffered in 1818; with an order for its immediate payment. He paid it, and, two days afterwards, expired of a broken heart. Don Jose Miguel met his unhappy fate in 1822, when endeavouring to take advantage of a popular movement in his favour, he was surrounded, made prisoner, and executed.

CARRIER, JEAN BAPTISTE, one of the most bloodthirsty actors in the French revolution, was born near Aurillac in 1756. He was sent on a mission to La Vendée, where he caused thousands of victims, men, women, and children, to be drowned, beheaded, or shot, the ordinary mode of execution being too tardy for him. Fifteen thousand per-

sons perished in this way; the banks of the Loire were strewed with the dead bodies, and the water was so polluted, that it was prohibited to drink it. On the fall of the party called the Mountain, he was tried before the revolutionary tribunal, and condemned to the guillotine, in 1794.

CARSTARES, WILLIAM, a Scotch divine, but of more influence as a politician, was born at Cathcart, in 1649. In order to remove him from the danger of being led into politics, his friends sent him from Edinburgh, where he had commenced his studies, to Utrecht. Becoming known to the prince of Orange he soon obtained his confidence, and was much employed by him in forwarding his intentions upon England. Being privy to the Rye-house plot he was apprehended, and put to the torture, which he bore with much fortitude, but at length was induced to make a statement, which was afterwards used against his friend, Mr Baillie. On his liberation he returned to Holland, where the prince received him very cordially, and made him his chaplain. He accompanied William to England, and though nominally only his chaplain, was in fact one of the most influential and able of his state advisers. Under Queen Anne he had no political power, but she caused him to be made principal of the university of Edinburgh, in which important post he gave satisfaction equally to her Majesty and to the Scottish public. By the house of Hanover he was equally patronized, and he continued a favourite till his death, which took place, in his 66th year, in 1715.

CARSTENS, ASMUS JACOB, a Danish painter of very considerable merit. His subjects, nearly all taken from the classic authors, exhibit gracefulness of attitude with vigorous expression. One of his largest works is the "Fall of the Angels," which contains above 200 figures. Born, 1754; died, 1798.

CARTE, SAMUEL, an English divine and antiquary; author of a valuable and elaborate work, entitled "Tabula Chronologica archiepiscopatum et episcopatum in Anglia et Wallia," &c. Died, 1740.

CARTE, THOMAS, son of the above, and like him an antiquary, historian, and divine. On the accession of George I., feeling that he could not conscientiously take the required oaths, he abandoned his profession of a clergyman; and during the rebellion of 1715 he was so strongly suspected, that a warrant was issued against him, but he was safely concealed in the house of a clergyman in Warwickshire. He was subsequently involved in political strife, but he escaped by timely flight. As an author he is chiefly known by his "History of England." Born, 1686; died, 1754.

CARTEL, ELIZABETH, an eminent classical scholar, translator, and miscellaneous writer, the daughter of a clergyman residing at Deal, in Kent. Under the instructions of her father she became an admirable Greek and Latin scholar, and was well skilled in German, French, Spanish, Italian, Portuguese, Hebrew, and Arabic. She translated Crousaz's critique on Pope's Essay on Man, Algarotti's Explanation of Newton's Philo-

sophy, and ed during six volumes, published, with higher or more lea. This acc. Dr John the "An other dis 1806; age

ed during her life; and, after her decease,
six volumes of her correspondence were pub-
lished, which are calculated to give even a
higher opinion of her intellect than her
more learned and masculine performances.
This accomplished woman was the friend of
Dr Johnson, Bishop Butler the author of
the "Analogy," Sir Joshua Reynolds, and
other distinguished men. Born, 1717; died,
1806; aged 89.

CARTER, THOMAS, an eminent Irish mus-
ician and composer of vocal music. Among
his compositions are the songs, "Oh, Nannie,
wilt thou gang wi' me!" and "Stand to
your guns, my hearts of oak." Died, 1804.

CARTERET, JOHN, earl of Granville, an
eminent English statesman, was born in
1690. Immediately on attaining his ma-
jority, he took his seat in the House of
Lords. Warmly supporting the Hanoverian
succession, he was noticed by George I., and
employed by him in various posts until 1721,
when he succeeded Craggs as secretary of
state. In 1724 he was appointed lord-lieu-
tenant of Ireland; and though he gave the
irritable natives some offence by prosecuting
the printer of the Drapier's (Swift's) letters,
he was on the whole a popular viceroy. In
the reign of George II. he again held that
distinguished post, and with even more
success than before. On his return to Eng-
land he became a strong opponent of Wal-
pole; and when he had succeeded in remov-
ing that statesman, and procuring office for
himself, he supported measures similar to
those he had formerly condemned. But
though as secretary of state, and as president
of the council, in which office he died, his
conduct was marked by much vacillation,
he retained court favour to the last. Died,
1763.

CARTERET, PHILIP, a distinguished na-
val officer of the 18th century. In conjunc-
tion with Captain Wallis he commanded an
expedition to the South Seas, in 1766. Of
the discoveries they made, some account is
given by Hawkesworth, in the introduction
to his narrative of Cook's voyage.

CARTIER, JACQUES, a French navigator
of the 16th century, who made several voy-
ages of discovery on the coasts of North
America. He was the first Frenchman who
set foot on the soil of Canada, and planted
the French flag there. The accounts of his
three voyages, in 1534-35-36, have just been
re-published at Paris (1865).

CARTWRIGHT, JOHN, an English gen-
tleman, distinguished for his zealous attach-
ment to political reform. Early in life he
served in the navy, but subsequently became
a major in the Nottingham militia; from
which circumstance he was generally known
as Major Cartwright, though he had been
superceded for many years previous to his
death. As an amateur politician he was
before the public for many years, both by his
writings in favour of American independ-
ence, and by his public addresses in further-
ance of a radical reform of the government.
He also displayed great firmness and disin-
terestedness on all occasions when multi-
tudes assembled to advocate and petition
for popular rights. He died in 1824, aged 84.

CARTWRIGHT, Dr EDMUND, brother
of the preceding, and a clergyman of the
established church. In 1770 he published a
pleasing poem, called "Armina and Elvira;"
but he is chiefly known by his valuable
invention of the power-loom, first intro-
duced in 1785, and which, though for some
time violently opposed by ignorant and pre-
judiced men, was at length universally
adopted. He received in 1809 a grant of
£10,000 from parliament as the reward of
his services. Died, 1823.

CARTWRIGHT, THOMAS, an eminent
Puritan divine of the reigns of Elizabeth and
James I.; professor of divinity at Cambridge
university; but expelled for his opinions,
and driven to take refuge in Holland. After
12 years absence he returned, and held the
post of master of a hospital at Warwick.
He was imprisoned by the High Commission
Court in 1590 for three years. Cartwright
was author of some Commentaries on the
New Testament, of which a beautiful edition
was published by the Elzevirs after his
death. He was also author of "Comment-
aria Practica in totam Historiam Evangelicam," a
"Body of Divinity," "Commentaria
Succincta et Dilucida in Proverbia Solo-
monis," &c. Died, 1602, aged 68.

CARTWRIGHT, WILLIAM, an English
divine and poet. Both as a preacher and as
a member of the council of war at Oxford,
he zealously and ably served the cause of the
unfortunate Charles I.; and his exertions
caused him to be for a short time imprisoned
by the parliament. His literary talents must
have been great, for Bishop Fell said that he
was "all that man could arrive at;" and
Ben Jonson, in his familiar way, said, "my
son, Cartwright, writes all like a man." But
the remains of Cartwright are very dis-
proportionate to these high praises, con-
sisting only of four plays and a few poems.
He died, at the early age of 33, in 1643,
having been shortly before appointed pro-
fessor of metaphysics at Oxford.

CARY, LUCIUS. [FALKLAND.]

CARY, HENRY FRANCIS, the well-known
translator of Dante, was born at Gibraltar in
1772. His father was a captain in the army;
but soon after the birth of his son he settled
in Staffordshire, and sent him when eight
years old to Uxbridge School, and afterwards
successively to Rugby and Birmingham. In
1790 he was admitted as a commover of
Christchurch, Oxford, and after finishing
his college studies he was presented suc-
cessively with the livings of Abbot's Brom-
ley in Staffordshire and Kingsbury in War-
wickshire. The delicacy of his health
obliging him to have recourse to the best
medical advice, he came to London in 1808,
and after holding various cures in the me-
tropolis and the vicinity, in 1825 he became
assistant keeper of printed books in the
British Museum, an office, however, which
he resigned in 1837, when his application for
the chief librarianship was rejected. Mr
Cary contributed largely to the Gentleman's
and the London Magazines, produced trans-
lations of the "Birds" of Aristophanes and
the Odes of Pindar, and wrote a series of
Lives of the English Poets, in continuation
of Dr Johnson's; besides editing the works

of Pope, Cowper, Milton, Thomson, and Young; but his chief reputation rests on his admirable translation of Dante, which, though somewhat neglected on its first appearance, has since received the meed of acknowledgment from all competent critics. Died, 1844.

CARY, ROBERT, LL.D., an English divine and writer. During the civil war he left the established church and joined the presbyterian party; and, at the restoration, he re-entered the church. His tergiversation was rewarded by an archdeaconry, from which, however, he was ejected in 1664. He wrote a learned and useful work, entitled "Palæologia Chronica." Died, 1688.

CARYL, JOHN, secretary to Mary, queen of James II. He remained faithful to that prince, and was rewarded for his fidelity with the titles of Earl Caryl and Baron Dartford. In the reign of Queen Anne he was living in England, and was intimate with Pope. He was the author of some poems, translations of psalms from the Vulgate, and two plays—"The English Princess," a tragedy; and "Sir Solomon, or the Cautious Coxcomb," a comedy. Died, 1717.

CARYL, JOSEPH, an eminent Nonconformist divine; author of a voluminous "Commentary on Job." Died, 1673.

CASA, GIOVANNI DE LA, secretary of state under Pope Paul IV. He was distinguished as a statesman, and as an ecclesiastic; but his fame rests upon his writings, which are considered among the purest specimens of Tuscan composition. His poems, both light and serious, are of a very high order, but his chief work is a prose dialogue, "Galateo, or the Art of Living in the World." Born, 1503; died, 1556.

CASANATI, GIROLAMO, Cardinal, librarian of the Vatican, was born at Naples in 1620. He was chamberlain to Pope Innocent X., was created cardinal by Clement X., and became librarian of the Vatican under Innocent XII. in 1693. He was founder of the library which bears his name. Died, 1700.

CASANOVA, MARCO ANTONIO, a modern Latin poet. He imitated Martial in his style, and made Giulio de Medici, afterwards Pope Clement VII., a favourite object of his attack. He at length offended so greatly that he was compelled to quit Rome. Clement, however, was induced to pardon him. But the unlucky satirist escaped execution only to perish still more miserably; for, on the taking of Rome by the Imperialists, he was reduced to the necessity of begging his bread, and at length died of the plague, which followed the sack of Rome, in 1527.

CASANOVA DE SEINGALT, JEAN JACQUES, whose career of adventure and intrigue in almost all the countries of Europe has gained for him the name of the Gil Blas of the 18th century, was born at Venice, 1725. It would be impossible within our limits to give even an outline of his remarkable career; suffice it to say, that he figured as priest, soldier, and statesman, successively; found means to gain the favour of some of the greatest potentates of Europe, among others of Frederick the Great and Catharine II.; and after roaming from place to place

(for his intriguing spirit frequently led to a forced change of quarters) he ended his long life of mingled charlatantry, profligacy, and ability at Vienna, 1803. His love of literature and science, and his proficiency in them, brought him acquainted with Voltaire and other literati of the day; and besides other works, he left copious memoirs of his life and times.

CASANOVA, FRANCIS, brother of the preceding, an eminent painter, chiefly of landscapes and battle-pieces. He was employed by Catharine II., of Russia, to paint the victories of her armies over the Turks. Born in London, 1727; died, 1805.

CASANOVA, JEAN BAPTISTE, another brother of the adventurer, was born in London, 1730. He was a pupil of Mengs, and closely connected with Winckelmann in his antiquarian researches. It is well known that, by way of testing the sagacity of the German antiquary, he sent him two pictures, which he had himself painted in the style of those a short time previously found at Herculaneum, declaring them to be ancient discoveries; and that Winckelmann was so taken in as to insert engravings of them in the first edition of his "History of Ancient Art," with an elaborate commentary upon their merits. Casanova was professor of painting in the Dresden Academy; and his works on ancient art are still cited by the Germans as authorities. Died, 1798.

CASAS, BARTOLOMEO DE LAS, a Spanish prelate, distinguished for his generous and constant, though unavailing, exertions in favour of the natives of South America. He was born in 1474, and in his 19th year accompanied his father, who sailed with Columbus, to the West Indies. On his return to Spain he embraced the ecclesiastical profession, in order that he might act as a missionary in the western hemisphere, "there to spend his days in preaching the gospel to the Indians, and humanity to their oppressors." Never did man more zealously endeavour to effect a great and good object. Twelve times he crossed the ocean, to plead at the foot of the Spanish throne the cause of the wretched Indians, and passed fifty years of his life in attempting, though with little effect, their amelioration. He was made bishop of Chiapa in 1544, but he resigned his see in 1551, returned to his native country, and died at Madrid, 1568, in the 92nd year of his age. Of the writings of Las Casas, the most valuable is his "General History of the Indies."

CASAUBON, ISAAC, theologian and philologist, a native of Geneva, distinguished by his great erudition and critical ability. For several years he held the Greek professorship at Lausanne, and afterwards at Montpellier; but on the invitation of Henry IV., he removed to Paris. There he was made professor of the belles lettres, and afterwards royal librarian, and had a pension, not very punctually paid, assigned him by Henry IV.; at whose death Casaubon came to England, and James I. gave him two prebends. In return, however, the pedantic king required the aid of the great critic in writing against the Roman Catholics. Casaubon's editions of classic authors

are very numerous and valuable. Died, 1614.

CASAUBON, FRANCIS, above. He was his father to Oxford, where M.A. His "ten against" of his father King Charles I. During the execution and shaken in recovered his is a treatise of credibility.

CASIMIR, born in 1309 and distinguished carried on, knights, by the throne exploits were after he had two victories over the conquests a code of law royal authorities against his. He promotes the university of noble qualities. His guality. He many mistrust among the many privileges.

are very numerous, and display immense industry and erudition. Born, 1559; died, 1614.

CASAUBON, MERIC, D.D., son of the above. He was born at Geneva, came with his father to England, and was educated at Oxford, where he obtained the degree of M.A. His "Pietas contra Maledicos," written against the Catholics and in vindication of his father, introduced him to the notice of King Charles I., by whom he was presented to some valuable church preferments. During the commonwealth he was persecuted and imprisoned, but remained unshaken in fidelity. At the restoration he recovered his livings. Among his writings is a treatise concerning Credulity and Incredulity. Died, 1671.

CASIMIR III., the Great, king of Poland, born in 1309, was son of Vladislas Loketek, and distinguished himself early in the wars carried on, especially with the Teutonic knights, by his father. He was elected to the throne in 1333. His chief military exploits were the conquest of Silesia, made after he had ceded it to the king of Bohemia; two victories over the latter; a great victory over the Tatars on the Vistula; and the conquest of part of Lithuania. He gave a code of laws to Poland, which limited the royal authority, and also secured the peasants against the oppression of the nobles. He promoted learning and founded the university of Cracow. Casimir had many noble qualities, and was beloved by his subjects. His great failing was excessive sensuality. He was thrice married, and had many mistresses, a beautiful Jewess being among the latter; for whose sake he gave many privileges to the Jews. Died, 1370. He was the last king of the Piast dynasty.

CASLON, WILLIAM, an English letter-founder, to whom we are indebted for much of the superiority of our printing type. Born, 1692; died, 1766.

CASSANDER, king of Macedonia, was the son of Antipater, on whose death, in B. C. 319, he was excluded from the succession by the appointment of Polysperchon. Assisted by Antigonus, he made himself master of Athens, and soon after most of the Greek cities submitted to him. He invaded Macedonia, and besieged the queen-mother Olympias in Pydna, and had her put to death. His ambition was unchecked by any scruples; and by marriage-alliance, by wars, and by murders of rival claimants, he secured himself on the throne of Macedonia. He took the title of king at the same time with the other generals and successors of Alexander. B. C. 306. Died, 296.

CASSIANUS, JOANNES, a monk of the 4th and 5th centuries, distinguished as the founder or one of the chief promoters of Semi-Pelagianism in Gaul. His youth was spent in monasteries of the East, whence he passed to Constantinople, and became the pupil of Chrysostom, for whom he ever retained the profoundest love. He was sent on a mission to Rome about A. D. 404, and afterwards settled at Marseilles, where he founded two monasteries, one for each sex, and introduced the most austere discipline. He wrote the Monastic Institutes, and

showed himself in that work the opponent of the extreme views of Augustine. He is said to have lived to a great age, and died A. D. 448.

CASSINI, JEAN DOMINIQUE, an eminent astronomer, was born at Perinaldo, near Nice, and studied at Genoa with the Jesuits. His fame reaching France, he was invited to pay a visit to that country, where the kindness shown to him by Louis XIV., and his great minister, Colbert, caused him to remain for the rest of his life. He was the first director of the royal observatory at Paris, and he continued to fill that office for upwards of 40 years. During that time his services to science were such as to do high honour to himself, as well as to the monarch by whom he was patronized. He demonstrated the diurnal motion of Jupiter on his axis, ascertained the periods of rotation of Jupiter, Mars, and Venus, and discovered four satellites of Saturn, in addition to that which Huygens had discovered. Cassini was the first to investigate the zodiacal light, and determine its relations in space. He died in 1712, having previously been for some years deprived of sight.

CASSINI, JACQUES, son of the preceding, and, like him, an eminent astronomer; author of "A Treatise on the Figure and Magnitude of the Earth," "The Elements of Astronomy," &c. Born at Paris, 1677; died, 1756.

CASSINI DE THURY, CÉSAR FRANÇOIS, son of the last named, and his successor in the royal observatory. Like his father and grandfather, he did much to advance science; and, having better instruments than theirs, he was enabled to improve upon their labours. Born, 1714; died, 1784.—The last member of this illustrious family, JEAN DOMINIQUE, whose name is also associated with theirs in the pursuit of science, died in 1845.

CASSIODORUS, MAGNUS AURELIUS, a Roman statesman and historian. He was born in south Italy, about 468, of a noble family, and held some of the highest offices of state, including that of consul. He was in fact first minister to Theodoric the Great and his successors in the Ostrogothic kingdom. He founded a monastery at Viviers, and when 70 years of age he retired to it, and there lived thirty years. His writings are valuable, especially his twelve books of epistles, or rather state papers, on account of the light they throw upon the manners of his time; but his style is condemned by Gibbon as being quaint and declamatory. Died about 570.

CASSIUS LONGINUS, CAIUS, a Roman of the last age of the republic and the associate of Brutus in the assassination of Julius Caesar. He first distinguished himself in the expedition of Crassus against the Parthians, in the year B. C. 53. In the civil war he first joined the party of Pompey, but after the battle of Pharsalia he went over to Caesar, without however ceasing to dread his ambition and supremacy. It was Cassius who devised the plot against the dictator, and induced Brutus to join in it. That his patriotism was sincere may be inferred from his reply to Antony, who, on the

day after the assassination of Caesar, tauntingly asked him if he had another dagger, "Yes," was the reply, "if you become a tyrant." Cassius tried to get possession of Syria, but failed, and then joined Brutus in Greece. At the battle of Philippi he commanded the left wing, and on its repulse he retired to a tent with his freedman, whom he ordered to kill him. Brutus, in lamenting him, called him "ultimus Romanorum." Died, B. C. 42.

CASSIUS, SPURIUS, a celebrated Roman, who was thrice chosen consul, in B. C. 502, 493, and 486. He rendered great services to the republic both as general and statesman. In his first consulship he conquered the Sabines, and took Pometia; in his second he concluded a league with the Latins on very advantageous terms, which lasted for a hundred years, and was only broken by the irruption of the Gauls; and in his third made a league with the Hernici. His most memorable achievement, however, was the carrying of the first agrarian law at Rome, for the division of part of the public lands among the plebeians. The hatred of the patricians expressed itself in his impeachment the following year, and he was put to death on the charge of aiming at sovereign power.

CASSIVELAUNUS, a British prince, who, in B. C. 54, was appointed commander-in-chief of the Britons, and unsuccessfully disputed with Julius Cesar the passage of the Thames. His capital, now St Albans, was taken by Cesar, and he was soon after defeated, and surrendered to the conqueror.

CASTAGNO, ANDREA DEL, a celebrated Italian painter, was born in Tuscany in 1390. He was early left an orphan, and was employed as shepherd-boy by a cousin, but his talent for drawing procured him the patronage of Bernardetto de' Medici, who had him apprenticed. It is not known who was his master. He distinguished himself by a daring realism and energy which often becomes coarseness. Among his works were two Crucifixions; a series of frescos of heroes and sibyls at Legnana; frescos in the hospital and church of Santa Maria Nuova at Florence; and a fine equestrian portrait of Niccolò di Tolentino. He was a man of violent temper, and has for centuries lain under the charge of having murdered a rival, Domenico Veneziano. Of this crime he is now cleared, and is shown to have died in 1457, four years before the death of Domenico.

CASTALION, SEBASTIAN, one of the earliest friends and fellow-labourers of Calvin, born 1515. He became teacher of Latin at Geneva. Unfortunately for Castalion's worldly condition, he differed from the great reformer on some theological questions. He was in consequence deprived of his office of teacher, and repaired to Basel, where he was named professor of Greek, and also occupied himself with preparing Latin and French versions of the Bible. Calvin, unmoved by the indigence to which he had reduced his conscientious and candid opponent, used all his influence to degrade him and thwart his exertions. He had even

the meanness to bring against him a ridiculous accusation of theft. Died, 1563.

CASTANOS, FRANCISCO SAVERIO, a Spanish general, was born about 1736. He entered the army at an early age, and spent some time at Berlin, to study the art of war under one of its greatest masters, Frederick the Great. General Castanos is chiefly celebrated for the victory he obtained over the French under Dupont at Baylen in 1808; which was followed by the expulsion of Joseph Buonaparte, and the temporary restoration of Ferdinand VII. The brave Swiss leader, Aloys Reding, contributed to this victory. Castanos took part in many of the great battles of the peninsula war, but did not greatly distinguish himself. He was created duke of Baylen, and died at the age of 96, in 1852.

CASTELL, EDMUND, an English divine and lexicographer, was a native of Hatley, Cambridgeshire. He spent a handsome fortune and occupied 17 years in the composition of his "Lexicon Heptaglotton," a dictionary in seven languages; but nearly all the copies remained unsold, and for some preferment in the church, and the Arabic professorship at Cambridge, his zeal, learning, and diligence would have been unrewarded. Born, 1606; died, 1685.

CASTELLANUS. [DUCHATÉL.] CASTELNAU, JACQUES DE, Marquis of Castelnaud, marshal of France, was son of Michel de Castelnaud, and was born about 1620. He entered the army, and early distinguished himself in Holland. He contributed to the defeat of the Imperialists at Nordlingen in 1645, had two horses killed under him, and received several wounds. He served at many sieges, and was frequently wounded; commanded in Flanders, in the absence of Turenne, in 1656, and took part in the sieges of Valenciennes and Dunkirk; contributed to the victory over the Spaniards at the battle of the Dunes; was created marshal of France in June, 1658; and was killed by a musket-shot at Dunkirk about a month later.

CASTELNAU, MICHEL DE, Lord of Mauvisière, an eminent French statesman and soldier in the reigns of Charles IX. and Henry III. He was five times in England in the character of ambassador. While thus resident here he acted with great kindness towards Mary, queen of Scots. He left memoirs of his negotiations, of which there is an English translation by his daughter. Died, 1592.

CASTI, GIAMBATTISTA, an Italian poet and miscellaneous writer, was born in 1721. He travelled much, and lived successively at Vienna, St Petersburg, Florence, and Paris. He succeeded Metastasio as court-poet at Vienna. His most admired poem is entitled "Gli Animali parlante," an allegory and ingenious satire on courts and society. Some of his other works are noted for their indecency. Died at Paris, 1804.

CASTIGLIONE, BALDASSARE, an Italian statesman and writer, a native of the duchy of Mantua. Having attached himself to the court of Urbino, he was sent by the duke ambassador to Henry VIII., who made him a knight of the Garter. He was afterwards

ambassador to Leo X., who offered him a cardinal's hat, and to Clement VII., who charged him with an embassy to the emperor, Charles V., on which occasion he displayed great talent and dexterity. After the sack of Rome by the Constable Bourbon in 1527, Castiglione lived in Spain till his death. His poems, both Latin and Italian, are much admired, as are his letters, which throw much light on the affairs of his time. But his chief work is "Il Cortegiano," the *Courtier*. This work is a classic in Italy, has been frequently republished, and is so much admired by the Italians, that they call it "The Golden Book." Born, 1478; died, 1529.

CASTIGLIONE, GIOVANNI BENEDETTO, a Genoese painter, born, 1616. He is surnamed IL GRECCHETTO. He excelled in landscapes and animals, but his picture of "The Nativity" shows that he had power in the highest walk of art. He was also an admirable engraver. Died, 1670.

CASTILLO, BERNAL DIAZ DEL, a Spanish officer of the 16th century, one of the companions of Fernando Cortez in his expedition to South America. He wrote a work, rough in style, but full of valuable information, entitled "Historia Verdadera de la Conquista de Nueva España." Died in Mexico, about 1560.

CASTLEREAGH, Lord. [LONDON-DERRY, Marquis of.]

CASTRACANI, CASTRUCCIO, an Italian general of great skill and courage. He came to England about 1303, and served in the army of Edward I. He next served in France, and after ten years' absence returned to Italy. He belonged to the Ghibelline party, and in 1316 was chosen head of the republic of Lucca. He rendered great service to the emperor, Louis V. of Bavaria, who rewarded him with the title of duke of Lucca. He was excommunicated by the pope, and died soon after the siege of Pistoia, which he took from the Florentines. His name is among the minor Italian poets. Born, 1283; died, 1328.

CASTREN, MATTHIAS ALEXANDER, an eminent Finnish philologist, was born in 1813. He was educated at the university of Helsingfors, and became an enthusiastic student of the language of his native country. In 1838 he visited Lapland; travelled afterwards in Russian Curelia; and in 1845 was sent to Russian Lapland, and the country of the Samoyedes. All these journeys were made for the purpose of acquainting himself with the native languages and legends. He was named professor of the Finnish and ancient northern languages at Helsingfors in 1851. Castren published a Swedish translation of the old Finnish poem "Kalevala," an account of his travels, and several philological works. His lectures appeared after his death. Died, 1852.

CATALANI, ANGELICA, one of the most celebrated singers of modern times, was born at Sinigaglia, in the papal states, 1782. Her early years were spent in the convent of Gubio; and so perfect were her vocal organs even in her infancy, that the sanctity of the church itself was violated by the applause which her choral performances called forth.

Soon after quitting the convent, she made her debut in the theatre *Argentina* at Rome, in 1802; and the immense success which she achieved on this stage, procured her immediate engagements in all the theatres of Italy. At Lisbon, Madrid, and Paris new triumphs awaited her; but even these were fur outshone, in 1806, by the enthusiasm of her reception in England, where she remained eight years, delighting the metropolis at the Italian Opera and reaping large harvests both of fame and wealth in her provincial tours. After the restoration of the Bourbons, she returned to Paris, where she undertook the management of the Opera Buffa; but this speculation was unfortunate, and Madame Catalani, to repair her shattered fortunes, made a professional tour through all the capitals of Continental Europe, and at length returned to England in 1822, when the enthusiasm of her reception suffered no abatement. Here she remained three years. In 1825 she again visited Paris, and after once more going the round of Europe, she retired to Italy in 1830, when she purchased a villa near Florence, and spent the remainder of her life in the bosom of her family. She had been long married to a French captain, named Valabrègue. To an agreeable person and a lively style of acting, Madame Catalani added a voice of extraordinary brilliancy and power; and in this lay its chief merit, for we do not find that she possessed the faculty of calling forth the tenderest and deepest emotions of our nature. Died of cholera, at Paris, 1849.

CATESBY, MARK, an eminent English naturalist, patronized by Sir Hans Sloane and other wealthy lovers of science. He spent many years in America, for the purpose of collecting and describing the most curious natural productions of that country. He fixed his residence in Carolina, whence he made excursions into Florida, Georgia, and the Bahama Islands. The result of his labours was "The Natural History of Carolina, Florida, and the Bahama Islands;" a very splendid work in two folio volumes, illustrated by upwards of 200 plates. Born, 1680; died, 1749.

CATHARINE, St, of Sienna, was born at Sienna in 1347, and when she was twenty years of age became a sister of the order of St Dominic. Having considerable ability and a very lively imagination, she became celebrated as a seer of visions. So great an influence did her pretended visions and revelations obtain her, that she was able to prevail on Gregory XI. to be reconciled to the Florentines, and to remove the papal seat to Rome from Avignon, after it had for 70 years been fixed at the latter place. She wrote various ascetic treatises, and some devotional letters and poems. She died in 1380, and was canonized by Pope Pius II. in 1461.

CATHARINE OF FRANCE, daughter of Charles VI. of France, and the wife of Henry V. of England, who, on his marriage to her, was declared successor to the French crown. Their son, afterwards Henry VI., was crowned in both countries while still an infant. Being left a widow, she privately espoused Owen Tudor, a Welsh gentleman, by whom

she had two sons, the elder of whom, Edmund, earl of Richmond, was father of Henry VII. Born, 1401; died, 1438.

CATHARINE OF ARAGON, daughter of Ferdinand and Isabella of Castile, was born in 1483. In her 18th year she was married to Arthur, prince of Wales, eldest son of Henry VII. The young prince dying in a few months after his marriage, Henry's mercenary dread of losing the rich dowry of Catharine, induced him to marry her to her brother-in-law, afterwards Henry VIII. The vast religious changes to which this marriage gave occasion belong rather to history than to biography. Suffice it, therefore, to say, that after years of anxiety and spirited resistance, she was divorced. But though she was no longer called queen at court, her attendants at Kimbolton Castle, where she took up her residence, were never allowed to address her otherwise than as a queen, as she protested to the last that the divorce was unjust and illegal. Just before her death she wrote so pathetic a letter to Henry in favour of Mary, their daughter, that, stern as the tyrant was, he is said to have shed tears as he perused it. She possessed considerable literary ability, but some devotional pieces, which are sometimes attributed to her pen, were in fact the production of Queen Catharine Parr. Died, 1536.

CATHARINE PARR, eldest daughter of Sir Thomas Parr, of Kendal, in Westmoreland. She was married early in life to Edward Burghes; and, surviving him, she was next married to John Neville, Lord Latimer. Her second husband, too, she survived; and, in 1543, was raised to the throne by King Henry VIII., being his sixth and last wife. If we feel surprise at her venturing to share a throne which had been so fatal to most of those previously raised to it, we cannot deny that she conducted herself with admirable tact and judgment. One proof of this will suffice. Her attachment to the reformed religion gave deep offence to the still powerful popish faction. Gardiner, Wriothesley, and others, determined to remove her if possible from court. Taking advantage of the state of irritability to which continual pain had brought the king, they accused her to him of heresy and treason, and so far wrought upon him, that he signed a warrant for her committal to the Tower. Being informed of this fact, she repaired at once to the king's presence. Henry turned the conversation upon theological topics, and endeavoured to draw her into argument. But she replied with so much tact and good sense that she did away at once with the king's suspicions and anger; and when Wriothesley, attended by some guards, called to convey her to the Tower, he found her in high favour, and instead of making her a prisoner, was sent from the presence of the king with knave, fool, beast, and the like gentle terms. Catharine retained her ascendancy over the king, and at his death he left her £4000 in addition to her jointure, "for her great love, obedience, chasteness of life, and wisdom." She afterwards married Sir Thomas Seymour, uncle of Edward VI., but they lived by no means happily together; and when she died, though

in childbed, it was currently reported that she was poisoned. She was attached to the cause of the reformation; and her letters, some of which have been printed, as well as some devotional treatises, show that she had considerable literary talent. Died, 1548.

CATHARINE DE MEDICI, the wife of Henry II., king of France, was the daughter of Lorenzo de Medici, duke of Urbino, and was born in 1519. In 1533, being then only in her 14th year, she was married to Francis I. of France. Her beauty and accomplishments made her the ornament of the French court; and, young as she was, she had deceit and cunning enough to make herself acceptable to all parties. For ten years she brought her husband no children, but she subsequently had seven, of whom three successively were kings of France. With profound policy she secured the affection and confidence of her children, and she designedly trained her sons in effeminacy and licentious living, reserving thus to herself that influence which she desired to exercise over their maturer age. On the death of her husband, and the accession of Francis II., the Guises had the chief political power; and it is probable that it was in order to avoid collision with them that she joined in their persecution of the Huguenots. But the reign of Francis was very brief; and when Charles IX., then only in his 11th year, succeeded him, Catharine had all the authority of regent, though not the title. The death of the duke of Guise still further increased her power, and she joined heart and soul with the Catholics in persecuting the Huguenots. To characterize her political conduct at this time, we need only name the horrible massacre of St Bartholomew, an atrocity which just and humane men of every creed, country, and age join in reprobating. That Charles IX. was urged to it by the persuasions of Catharine most historians admit; and in less than two years after the massacre he died, worn out in mind and body by the stings of remorse. At the death of Charles, Catharine was declared regent until the arrival of her son Henry from Poland. During her regency she governed rigorously but sagaciously, and delivered up the kingdom to Henry III. on his arrival, in such order as with only common prudence and firmness would have insured him a peaceable reign. But the new king's weakness soon relaxed the bands which his mother had so firmly drawn around faction, and civil disturbances ensued, by which Catharine's later years were much embittered. Admitted by all to be a sagacious, crafty, and courageous woman, but detested by every party in the state, she died, aged 70, in 1589.

CATHARINE OF BRAGANZA, daughter of John IV. of Portugal, and queen of Charles II. of England, whom she married in 1661. The dissolute conduct of her husband, and the shameful openness of his illicit amours, gave her much pain. But though neglected by him, she steadily preserved her own honour, and his so far as it depended on her. After his death she returned to Portugal, and when, in 1704, her brother, Don

Pedro, with firmities held this her conc measures consider the 67th

ANZA, daughter , and queen of om she married duct of her hus- nness of his illicit ain. But though ally preserved her as it depended on returned to Por- ther brother, Don

Pedro, was compelled by his increasing infirmities to retire, she was made regent. She held this office but for a brief space; but her conduct, both as regards her internal measures and the war with Spain, showed considerable political ability. She died, in the 67th year of her age, 1705.

CATHARINE I., empress of Russia, was the illegitimate daughter of a Livonian peasant. After some years spent in the service of a clergyman, she married a Swedish dragoon, who shortly afterwards went on an expedition and never returned. She then lived as servant, or paramour, with the Russian general, Bauer, when Prince Menzikoff became enamoured of her charms, and made her his mistress. Peter I. now distinguished her by his notice, and she became at first his mistress and afterwards his wife. During his lifetime she showed great devotion to him, and at his death she was proclaimed his successor. But her reign was short; for her indulgence in intoxicating liquors produced a disease of which she died in 1727, at the age of 38.

CATHARINE II., empress of Russia, was the daughter of the prince of Anhalt-Zerbst, she was born in 1729, and in 1745 became the wife of the duke of Holstein-Gottorp, afterwards the Emperor Peter III. This prince was addicted to low society and to the most scandalous excesses; and Catharine, even in her youth, was by no means remarkable for chastity. With the usual inconsistency, each reproached the other; Catharine, stung by her husband's brutality, became still more openly indecorous in her conduct, and Peter indulged in low pleasures without restraint. He at length became so infatuated by his disgust for Catharine and his passion for one of his mistresses, the Countess Woronzoff, that he determined to divorce and imprison the former, and make the latter his empress. Informed of his designs, Catharine promptly exerted herself, caused her husband to be seized, and sent him as a prisoner to a small palace about 20 miles from St Petersburg, where Prince Alexis Orloff put him to death, with the connivance, if not at the positive command, of the empress. This occurred in July, 1762, and in the next month Catharine was solemnly crowned empress of all the Russias. Ill as her power was obtained, she used it, with some very grave exceptions, wisely and well. She trod firmly in the footsteps of Peter the Great, aiming at once to enrich and civilize her dominions. Schools and towns were founded, public works of equal magnificence and utility were commenced and finished, and the horrible tortures which had been inflicted on Russian criminals were almost totally abolished. But her disgusting amours in the mean time disgraced her as a woman, and her tyrannous conduct towards Poland, the three partitions of which took place in her reign, is a foul blot upon her escutcheon as a sovereign. Amid all the distractions of business and dissipation she found time to encourage literature. Indeed, she was herself the author of instructions for a code of laws, which she also translated into German; and she wrote some dramatic pieces, and some moral tales for the use of children! Died, aged 67, 1796.

CATHECART, Lieutenant-general the Honourable Sir GEORGE, K.C.B., a distinguished soldier, a younger son of Earl Cathcart, was born in London in 1794, and was educated at Eton and Edinburgh University. In 1810 he commenced his military career in the 2nd Life Guards; in 1812 he accompanied his father as aide-de-camp to St Petersburg, and the following year, having exchanged into the 6th Dragoons, he joined the Imperial head-quarters in Germany, and was present at the battles of Lützen, Bautzen, Dresden, Culm, and Leipzig, and subsequently Brienne and numerous other engagements, and finally at the taking of Paris. Having accompanied his father to the congress of Vienna in 1814, he was appointed extra aide-de-camp to the duke of Wellington, was present at Quatre Bras and Waterloo, and subsequently accompanied the duke to the congress of Aix-la-Chapelle and Verona in the same capacity, meanwhile doing regimental duty with the 7th Hussars, which he had entered in 1819. In 1828 he was appointed lieutenant-colonel of the 57th Foot, and served in Nova Scotia, Bermuda, and Jamaica till 1834, when he retired on half-pay. In 1837, an outbreak having taken place in Canada, he emerged from his retirement, and being placed in command of the troops called out on that occasion, was greatly instrumental in restoring tranquility to the country, both as a soldier and a civilian. In 1844 he returned to England, and again retired on half-pay; but in 1852, at a crisis of great difficulty, he was appointed governor of the Cape of Good Hope, whither he at once proceeded, and where he brought the protracted Kaffir war to a speedy and honourable conclusion. On his return to England in 1854, he again sought the tented field, being appointed to the command of the 4th Division of the British army, serving in the Crimea, and fell in the memorable battle of Inkermann, November 5, personally animating by his example the soldiers whom he led in their career of noble daring. His "Commentaries" on the campaign of 1813-14 (published in 1850), showed that he was endowed with a practical knowledge of his profession as rare as it valuable:—and among the various heavy losses which the British army has sustained in the war with Russia, none was more severely felt by the nation than the loss of General Cathcart.

CATILINA, LUCIUS SERGIUS CATILINA, a Roman, of a noble family and great talents, but of most depraved habits and evil ambition. He was high in favour with Sulla, and succeeded, notwithstanding the foul crimes of which he was commonly accused, in attaining to the quaestorship and other offices of honour and profit. After being tried for oppression in his province of Africa, and being disappointed in his hope of the consulship, Catiline conspired, with other dissolute nobles and their followers, to murder the consuls, but the plot failed. He then formed a more audacious scheme, in which he obtained the co-operation of impoverished and ambitious nobles, greedy restless soldiers, and the whole vulgar mob. It was to upset the government and possess himself of supreme power. Fortunately for

Rome, Cicero was one of the consuls; and he, on being made aware of Catiline's designs, assailed him in the first of those famous orations which alone would suffice to give him the first rank among orators, ancient or modern. Catiline quailed before the indignant eloquence of the consul. He left Rome and went to the camp of Manlius, his confederates in the mean time endeavouring to corrupt the ambassadors of the Allobroges. In this they were defeated by the vigilance and promptitude of Cicero; and Catiline being stopped in his march by the proconsul, Q. Metellus Celer, and at the same time attacked by Antonius, who was sent after him, an engagement ensued, in which Catiline, at the head of his associates, fighting with the most desperate courage, was slain, B. C. 62.

CATINAT, NICOLAS, an illustrious French general, as eminent for his virtues as for his military talents. He was educated for the law, but abandoned the bar for the army, and rose to the highest military honours by his skill and courage. He defeated the duke of Savoy very signally in 1688, and in 1697 he took the fortress of Ath, in Flanders, after experiencing a desperate resistance. In 1701 he was appointed to the chief command of the army in Italy; but either his skill was inferior to that of Prince Eugene, to whom he was opposed, or age had somewhat weakened his high qualities, for he was decidedly worsted and compelled to retreat. Died, 1712.

CATO, MARCUS PORCIUS, surnamed the Censor, an illustrious Roman. He was born at Tusculum, and at the early age of 17 he commenced his career as a soldier, and distinguished himself equally by his courage and by his temperance. After some years passed in rural retirement, he was made military tribune in Sicily, and then quaestor in Africa, under Scipio. In 195 he served as praetor in Sardinia. In these situations his conduct was marked by a rigid and honourable economy of the public money; and, in his 40th year, he arrived at the high dignity of the consulship. He obtained important military successes in Spain and Greece, and in 184 had the office of censor. He strongly opposed the luxury of the Romans, and incessantly endeavoured to animate their hatred of the Carthaginians, by speeches in the senate, usually concluding with "Delenda est Carthago;" "Carthage must fall." He composed many works; but the treatise "De Re Rustica," and some fragments of Roman history, are all that we know of his writings. He was twice married, and had a son by each of his wives. Born, B. C. 234; died, 149.

CATO, MARCUS PORCIUS, surnamed, from his birthplace, "Uticensis," was great-grandson of the last named. Being early left an orphan, he was taken into the family of his uncle, Livius Drusus. He served for some time in the army, and obtained the commission of tribune of the soldiers in the army sent against Macedonia. He then became quaestor, and exerted himself for the reformation of abuses. His conduct in this respect, and the unvarying gravity of his demeanour, rendered him almost proverbial

for integrity; and Cicero, to whose consular exertions he gave his support, called him "the father of his country." Perceiving the designs of Caesar, he had the honesty and courage to oppose him; and considering Caesar more dangerous than Pompey, he ranged himself under the banners of the latter. The fatal battle of Pharsalia compelled him to fly to his native Utica; and when Caesar arrived before that place, Cato calmly retired to his chamber, read Plato's *Phaedo*, the Dialogue on the Immortality of the Soul, and ended his life by falling upon his sword, B. C. 46.

CATS, JACOB, an eminent Dutch poet and statesman, was born in Zealand in 1577. He studied law at Leyden and Orleans, and after some years of retirement, settled at the Hague. He was twice sent ambassador to England, and in 1636 was appointed grand pensionary of Holland, an office which he filled about fifteen years. He spent the rest of his life in retirement and literary labours. His "Emblems," "Country Life," and other poems, are chiefly didactic, and are characterized by singular simplicity, facility, and good-humour. They had a very great popularity, and the general admiration of the author is shown in the term "Father Cats," still applied to him. Died, 1660.

CATULLUS, CAIUS VALERIUS, a Roman poet, was born at or near Verona, B. C. 87. He was a man of wealth and pleasure, and the friend of Cicero, Cinna, and other eminent men. His poems are in various styles, lyric, ode, elegy, and epic; some imitated from the Greek; most of them characterized by ease and simplicity of style, genuine playfulness, and as genuine pathos. Some of them are spoiled by indecency. Died probably B. C. 47. There are several English translations of Catullus.

CAULAINCOURT, ARMAND AUGUSTIN LOUIS DE, duke of Vicenza, a descendant of a noble and ancient family of Picardy. In the early days of the French revolution he was imprisoned as a suspected royalist, but was liberated on entering the republican army. There he rose from rank to rank until he became aide-de-camp to Buonaparte, whom he attended in the campaigns of 1805-6-7. Subsequently he was employed in confidential missions, and in the post of foreign minister. After the restoration he lived in retirement. Born, 1773; died, 1827.

CAVAIGNAC, LOUIS-EUGÈNE, a distinguished French general, was born at Paris in 1802. His father was a member of the Convention, and his brother G. deffroy was one of the most popular members of the republican party in the reign of Louis Philippe. Destined for the army at an early age, he made his preliminary studies at the college of St. Basile, entered the Polytechnic School in 1820, and in due time was made lieutenant of engineers. He went through the campaign of the Morea in 1828, as captain; and on the breaking out of the French revolution of 1830, he was the first officer of his regiment to declare for the new régime; but the year following he was placed on half-pay for signing the project of the national association, and soon afterwards, on being restored to the army, was sent, as to an honourable

banishment. Here, under a number of boundless and his rank of Lamoricière's other distinguished army in Africa during the war was made great distinctions, and perils of Abd-el-Kader. He was promoted to the rank of the province of Fezzan was appointed general; but he was a Constituent member of the Assembly, and was appointed members of the Assembly from time to time up between the two wars, while the approach of the outbreak of 1848 was not regarded in the common estimation. He was a decisive member of the general terror commission, and was declared a member of the Assembly by an unlimited popular vote, during the worst qualities of the society was a member of the Assembly, though which Paris had elected the first president of the National Assembly, he was a member of the National Assembly of his service in the council of ministers. In contact and moderate foreign relations the year he became president of the Assembly, he was elected to the office of minister of the interior while his opposition to the 20th of February functions and the Assembly are during the time of his votes and adherence to the Napoleon per Dec. 2, 1851, he was arrested General, and most distinguished and transferred. On his liberation from the Corps Legislatif, he was elected to the Assembly for the period he lived in the Seine, in 1854; but he suddenly resigned his seat, and

banishment, with his regiment to Algeria. Here, under Marshal Clausel, he gave innumerable proofs of great courage and boundless resources on occasions of peril; and his name became associated with those of Lamoricière, Changarnier, Bugeaud, and other distinguished soldiers of the French army in Algiers. For his gallant conduct during the siege of Cherchell, in 1840, he was made lieutenant-colonel; in 1844 he gained great distinction at Isly under Marshal Bugeaud, and for his large share in the battles and perils that ensued on the enterprises of Abd-el-Kader, was rewarded by being promoted to the rank of general and governor of the province of Oran. When the revolution of Feb. 1848 broke out, General Cavaignac was appointed governor-general of Algeria; but on being elected a member of the Constituent Assembly he returned to Paris, and was appointed minister at war by the members of the executive commission. But from time to time misunderstandings sprang up between the executive and the minister at war, which increased in intensity on the approach of the fatal days of June. On the outbreak of the 22nd, General Cavaignac did not regard it as a mere insurrection, but as the commencement of a civil war, and took decisive measures to suppress it. In the general terror which prevailed, the executive commission resigned their functions, Paris was declared in a state of siege; the National Assembly appointed Cavaignac dictator with unlimited powers; and after a terrific struggle, during which he displayed all the highest qualities both of a soldier and a patriot, society was saved, to use a familiar expression, though at a cost of life and bloodshed which Paris had never witnessed even during the first revolution. As soon as he had pacified the capital, true to his republican principles, he laid down his dictatorship; but the National Assembly, in acknowledgment of his services, nominated him president of the council, with power to select his own ministry. In this office he displayed equal tact and moderation both as regards home and foreign politics. Towards the close of the year he became a candidate for the presidency of the republic; but he only mustered about one million and a half of votes, while his opponent, Louis Napoleon Buonaparte, received nearly six millions, and on the 20th of December he resigned his high functions and took his place in the National Assembly among the moderate republicans. During the three years that followed, both by his votes and speeches, he maintained a firm adhesion to the republic; hence when Louis Napoleon perpetrated his coup d'état on Dec. 2, 1851, one of his precautions was to arrest General Cavaignac, together with the most distinguished members of the assembly, and transfer him to the fortress of Ham. On his liberation he was elected to the "Corps Legislatif," but he refused to take the oath to the new government. From that period he lived in retirement, till June, 1857, when he was chosen one of the deputies for the Seine, in opposition to the Imperial candidate; but a few weeks afterwards he died suddenly, regretted by all classes of the community, and leaving behind him a name

second only to that of Washington for moderation and true patriotism. Died, 1857.

CAVALCANTI, GIULIO, a Florentine philosopher and poet of the 13th century, was a friend of Dante, and, like him, an active Ghibelline. His poems, which are chiefly amorous, are among the most elegant in style of that early age, and were thought worthy of illustration by voluminous commentaries. Died, 1300.

CAVALIER, JEAN, leader of the Camisards in the time of Louis XIV. was the son of a French peasant, and was born in 1679. He became leader of the Camisards, or Protestants of Languedoc, when they revolted against the tyranny of the king; and, led by him, they forced Marshal Villars to make treaty with them. Cavalier then became a colonel in the king's service, but fearing some treachery, he transferred his skill and courage to England, and died governor of Jersey, in 1740.

CAVALIERI, ROVAVENTURA, an Italian friar, who became a disciple of Galileo. He was professor of mathematics at Bologna, and wrote some treatises on geometry, conic sections, &c. Died, 1647.

CAVALLINI, PIETRO, one of the earliest of the modern Roman painters. He was the contemporary of Giotto, whom he assisted in the famous mosaic in St Peter's. His masterpiece is the fresco of the crucifixion at Assisi. Cavallini was also an architect, and it has been conjectured that he erected the shrine of Edward the Confessor in Westminster Abbey, which bears the inscription "Petrus Romanus Civis." Died, 1344.

CAVALLO, TIBERIO, an ingenious natural philosopher, born at Naples in 1749, who, on coming to England for commercial objects, was so struck with the recent discoveries in physical science, that he abandoned his pursuits, settled in London, and devoted his future life to the advancement of science. He was elected a fellow of the Royal Society, and was author of many treatises on electricity, acrostatics, magnetism, &c., and contributed largely to the Philosophical Transactions. Died, 1809.

CAVANILLES, ANTONIO JOSE, a Spanish divine and botanist. After accompanying the duke of Infantado's children into France as their preceptor, and remaining there 12 years, engaged in the study of various sciences, he was appointed director of the royal garden at Madrid, where he died, in 1804. His principal work in botany is an account of the plants of Spain, both wild and cultivated, and is in 6 vols. folio, with 600 plates, designed and engraved by himself.

CAVE, EDWARD, an enterprising bookseller, was born at Newton, Warwickshire, in 1691, and educated at Rugby School. Having been deprived of a clerkship in the post-office, he took a shop by St John's Gate, Clerkenwell, and commenced, in 1731, the "Gentleman's Magazine." The work was highly successful; and among the contributors to it was the subsequently famous Dr Johnson, of whom Cave was one of the earliest friends and employers. Died, 1754.

CAVE, Dr WILLIAM, a learned English divine; he was a native of Leicestershire, and was educated at Cambridge. He be-

came chaplain to the king, obtained the degree of D.D. both at Cambridge and Oxford, and in 1684 was made canon of Windsor. He was author of "Primitive Christianity," "Antiquitates Apostolicæ," or Lives of the Apostles; "Apostolici," "Ecclesiastici,"—these two works containing the Lives of the Apostle and later fathers of the Church, and several other works. Born, 1637; died, 1713.

CAVEDONE, GIACOMO, an eminent Italian painter. He was a disciple of the Carracci; and some of his works are said to be equal to those of his masters. He died in absolute destitution, in 1660.

CAVENDISH, THOMAS, an English navigator in the reign of Elizabeth, was a native of Suffolk, where he inherited a good estate; but having injured his fortune by early extravagances, he fitted out three vessels to cruise against the Spaniards; and sailing for the coast of South America, succeeded in taking several valuable prizes. After circumnavigating the globe, he returned to England with a large fortune. This he soon dissipated, and again went to sea; but meeting with no success, died of chagrin while off the coast of Brazil, in 1592.

CAVENDISH, Sir WILLIAM, a native of Suffolk, was born in 1605. He obtained the office of usher to Cardinal Wolsey; and the fidelity he displayed on the fall of his patron endeared him to Henry VIII., who took him into his service, and knighted him. In the succeeding reigns he was equally favoured, and his son became earl of Devonshire. He wrote the Life of his early friend and patron, Cardinal Wolsey. Died, 1557.

CAVENDISH, WILLIAM, duke of Newcastle, son of Sir Charles Cavendish, the youngest son of the last named. By James I. he was made a knight of the Bath, Baron Ogle, and Viscount Mansfield. Charles I. appointed him governor to the Prince of Wales, and made him earl of Newcastle. The earl proved himself worthy of the favour shown to him; for, when Charles I. resolved on an expedition against the Scots, he contributed £10,000—a very large sum at that time—besides raising a troop of horse. During the civil war he behaved with great gallantry; and when the royal cause became hopeless, he joined Charles II. in his exile. At the restoration, he was created duke of Newcastle. He was the author of several poems and plays, but is now chiefly remembered as an author for his treatise on horsemanship. Born, 1592; died, 1676.

CAVENDISH, WILLIAM, first duke of Devonshire, was the son of William, third earl of Devonshire. He was born in 1640, and attended James, duke of York, as a volunteer against the Dutch; but he soon made himself obnoxious at court by his opposition in parliament. He gave evidence in favour of Lord William Russell, and even offered to exchange clothes with that unfortunate nobleman to enable him to escape. In 1684 he succeeded to the title of earl of Devonshire, and was shortly afterwards imprisoned, and fined £30,000 for striking Colonel Culpepper in the presence chamber. For the payment of this large sum he gave bond, but before it became due, the arrival of the prince of

Orange had put an end for ever to the tyranny of James. The earl now became a favourite at court, and in 1694 his earldom was raised to a dukedom. Died, 1707.

CAVENDISH, HENRY, a member of the Devonshire family, and one of the most eminent natural philosophers of modern times, was son of Lord Charles Cavendish, and was born at Nice. He studied at Cambridge, and afterwards devoted himself exclusively to scientific pursuits, acquiring a distinguished rank among those who have most contributed to the progress of chemistry. By his discoveries relating to hydrogen, carbonic acid, and the formation of water, he laid the foundations of pneumatic chemistry. He wrote but little, but the finished character and accuracy of what he did write is marvellous, and perhaps unparalleled. By the death of an uncle, in 1773, he received a large addition to his fortune; and, being extremely regular and simple in his manner of living, he left at his death the enormous sum of £1,200,000 to his relations. Cavendish was never married, and avoided with singular shyness the society of women. It has been truly said of him, that he was "the richest among the learned, and the most learned among the rich men of his time." Born, 1731; died, 1810.

CAVOUE, Count CAMILLO BENSO DI, born at Turin, August 10, 1810, was the younger son of a noble house long settled in the neighbouring town of Chiavi. His mother was a native of Geneva; and from her he inherited that industry and solid good sense which have always characterized the citizens of that republic. He was born to the enjoyment of wealth and of the highest rank in one of the most exclusive societies of Europe, whose conventional restraints he had to throw off before he could enter with any hope of success on his great task of reforming the Italian nation. Regarded by his kinsmen and fellow-nobles as a renegade to his order, he devoted himself to advancing the real interests of the whole body of his countrymen. Owing to the suspicions thus caused, he was arrested, and for some time confined in the fort of Bard. In consequence of this he threw up his military commission, and spent several years abroad, chiefly in France and in England. With the English constitution, especially, he made himself most intimately acquainted, and always retained the highest sense of the principles on which it is founded. His sojourn in England occurred while the influence of Daniel O'Connell, in Ireland, was at its height; but the keen penetration of Count Cavour enabled himself at once to discern the factitious nature of the cry for Repeal, and he embodied his opinions in a pamphlet which was the most remarkable of the many publications of foreign politicians on the subject. Returning to Turin in 1842, he established a political daily newspaper, called "Il Risorgimento," which became the most influential organ of the middle classes. After the battle of Novara had for the time destroyed the hope of Italian union, Cavour adopted a policy of compromise; and entering the Chambers, in 1849, as member for the first electoral college in Turin, he threw all his

influence on the side of the constitutional party. In 1850 he became a member of the cabinet. At that time Piedmont was undoubtedly the most backward of all the Italian states in its laws and its organization. With incredible labour, sustained without intermission, he reduced the internal management of the country into order, and called forth its resources both civil and military. Fatigue, he said, he never felt, except when at leisure. Rising at five in the morning, he gave audiences from six to eight; after breakfast he went to his offices, where he transacted business without interruption until the evening, except when the Chambers sat. After dinner and, generally, a visit to the theatre, he returned to his office, where he frequently remained until midnight. In 1852 he again visited England, where he opened up his views to English statesmen. On his return a ministerial crisis occurred, and the king intrusted him with the direction of the government. Thus far Piedmont existed almost by itself; it was the object of Cavour to secure to it an entrance into the number of the great European powers. The war of France and England with Russia furnished the opportunity. Strong in the conviction that his country might thus recover all the prestige lost at Novara, he concluded an alliance with France and England; a Sardinian contingent served with success and distinction in the Crimea, and he thus obtained admittance into the Congress at Paris, where he secured the recognition of the existence of an Italian question. After the conclusion of the war he accompanied King Victor Emmanuel to Paris and London, where his power and genius were cordially acknowledged. In 1858 the alliance of Piedmont with France was further cemented by the marriage of Prince Napoleon with a Sardinian princess; and the expenditure of more than 800,000 francs being decreed for fortifying Alessandria, was regarded by the Austrian government as a menace. An ultimatum was presented at Turin, and rejected by Cavour. This was followed by the campaign of 70 days, during which were fought the battles of Magenta and Solferino. The peace of Villafranca was a terrible blow to Count Cavour; and even after the treaty of Zurich, which enabled him to put a different interpretation on the terms of the peace, he could never look back to that time without the deepest emotion. But his work was being carried on by a soldier in another quarter. The landing of Garibaldi in Sicily was followed by the deliverance of that island from the Bourbon rule, and by the expulsion of that dynasty from Naples. The Sardinian army then marched southwards; and the defeat of the Papal troops under General Lamoricière, and the reduction of Gaeta, were followed by the proclamation of Victor Emmanuel as king of Italy. Much yet remained to be done; but his work was practically accomplished, when, in the height of his vigour and his glory, Count Cavour died, after a short illness, at Turin, June 6, 1861, aged 50. Though deficient in the arts of eloquence, his oratory has perhaps never been surpassed in the force of simple language and the invincible strength of logic, which en-

abled him to sway an assembly abounding more than all others in Europe, in rhetorical talent. The publication of papers relative to some passages in his political life, for which he has been censured, will vindicate his name from unjust aspersions, and show the unwearied devotion of his whole life to the cause of his country.

CAXTON, WILLIAM, the earliest English printer, was a native of Kent, and was apprenticed, in 1438, to a mercer in London. Having served his time as a mercer, he went abroad in 1441, and settled in the Low Countries, probably at Bruges. He became governor of the Society of Merchant Adventurers, and afterwards was taken into the suite of Margaret of York, wife of the duke of Burgundy. While residing in Flanders, he acquired a knowledge of the art of printing, probably from Colard Mansion, the first printer of Bruges, and translated and printed in that country the *Recueil* of the Histories of Troyes. Returning to England, in 1476, he set up a press in Westminster Abbey; and in 1477 issued the "Diets and Sayings," the first book printed in England. In the practice of the new art Caxton enjoyed the patronage of the kings Edward IV., Richard III., and Henry VII., and other royal and noble persons. Of the rest of his life we know little more than the titles of the books he wrote and printed, which are too numerous to name here. Died, 1491. A very learned and valuable work on "The Life and Typography of William Caxton," in 2 vols. 4to, by W. Blades, appeared in 1861-63.

CAYLUS, ANNE CLAUDE PHILIPPE DE, Count of, a French writer of great accomplishments and enthusiasm for art; author of the "Description of the Gems in the Royal Cabinet," a truly splendid work; "Dissertations on the Arts," &c.; and founder of a prize for drawing in the Academy of Painting. Born, 1692; died, 1765.

CAZES, PIERRE JACQUES, a French painter, pupil of Bon Boullongne. His principal works are in the cathedral of Notre Dame and other churches of Paris. Born, 1676; died, 1754.

CAZOTTE, JACQUES, a French litterateur, born at Dijon. He held a situation in the naval service, from which he retired and settled at Paris, in 1768. At the revolution, which he opposed with all his power, he was thrown into the prisons of the Abbaye, with his daughter Elizabeth; and when the massacre of the prisoners took place, his daughter threw herself between him and the murderers, thereby preventing the execution of their purpose; but he was again condemned to death, and perished by the guillotine, Sept. 25, 1792, at the age of 72. From the scaffold he cried with a firm voice to the multitude, "I die, as I have lived, faithful to God and to my king." Cazotte was author of "Le Diable Amoureux," "Olivier," and other poems, chiefly of the humorous kind.

CEAN-BERMEUDEZ, JUAN AUGUSTIN, Spanish writer on art, was born in 1749. He began to apply himself to the study of art when about thirty years of age, and through the influence of his friend Jovellanos ob-

tained an office, and afterwards a pension. His principal work is a Biographical Dictionary of the principal artists of Spain, in 6 vols. He wrote also a history of the Seville school of painting, a Description of the Cathedral of Seville, a Life of Jovelanos, &c. He also edited and extended Magano's Notices of the Architects and Architecture of Spain. Died, 1831.

CECCO DE ASCOLI, whose proper name was FRANCESCO DEGLI STABILI, an Italian physician, mechanician, and poet; author of "L'Acerva," a poem, &c. In 1322, he obtained the appointment of professor of philosophy and astrology at Bologna, and subsequently that of physician and astrologer to the duke of Calabria; but being accused of magic, he was condemned by the Inquisition, and burnt to death in 1327.

CECIL, WILLIAM. [BURLEIGH.]

CECIL, ROBERT, earl of Salisbury, was the second son of Lord Burleigh, the great minister of Queen Elizabeth. He was educated at St John's College, Cambridge, and was early knighted. Trained to business under his father, he became first the assistant and then the successor of Secretary Walsingham. On the death of his father, in 1598, he became first minister. Towards the close of Elizabeth's reign he sedulously cultivated the friendship of James VI. of Scotland. The event justified his foresight, for he was continued in his office, and created earl of Salisbury soon after James's accession to the English crown. He held the office of lord high treasurer during the last four years of his life. He was an extremely able, and, generally speaking, upright minister; but he shrank from nothing which was likely to promote his personal success, and the share he had in causing the deaths of Essex and Raleigh disgraced him in the estimation of posterity. Born, about 1565; died, 1612.

CELAKOWSKY, FRANTISEK LADISLAUS, poet and philologist, was born in Bohemia in 1799. He studied with great enthusiasm the Slavonic languages, and obtained a professorship at the university of Prague. Of that post he was deprived in 1831, for writing a severe newspaper article on Russian tyranny in Poland. He was subsequently professor of Slavonic literature at Breslau, and again at Prague in 1859. Besides his original poems he published collections of Slavonic and of Russian National Songs, the latter translated into Bohemian, and of Slavonic proverbs. He was engaged in preparing a Supplement to Jungmann's Bohemian Dictionary at the time of his death in 1855.

CELESTI, ANDREA, a Venetian painter. He executed some beautiful landscapes and some fine altar-pieces. Died, 1706.

CELESTINE I., pope; successor of Boniface I. He became pope in 422, condemned the doctrine of Nestorius in 430, and died in 432, with a high reputation for piety and wisdom.

CELESTINE III., pope, succeeded Clement III. in 1191. He claimed the kingdoms of Naples and Sicily, and conferred the latter on Frederick, son of the emperor Henry VI., on condition that he should be tributary to the holy see. Died, 1198.

CELESTINE V., pope. He was a Benedictine monk, and founder of the order of the Celestines, which was suppressed in France. He led a life of great seclusion, and the fame of his austerity caused him to be elected pope in 1294. Cardinal Cajetan persuaded him to resign, and then, having caused himself to be elected by the title of Boniface VIII., imprisoned Celestine, who died in confinement in 1296. In 1313 he was canonized by Clement V.

CELLARIUS, CHRISTOPHER, a learned German writer, professor of history at Halle; author of "Notitia Orbis Antiqua," "Atlas Cœlestis," &c., and editor of several Greek and Latin authors. Died, 1707.

CELLIER, REMI, a learned French Benedictine; author of an "Apology for the Morality of the Fathers," written against Barheyrac, and compiler of a "General History of Sacred and Ecclesiastical Authors." Died, 1761.

CELLINI, BENVENUTO, a celebrated Italian sculptor and goldsmith, was born at Florence in 1500. His father wished to make him a musician, but he hated music, and apprenticed himself to a goldsmith. The vicious propensities and quarrelsome temper which made his whole life troublesome and drove him frequently from place to place, early showed themselves. About 1518 he went to Rome, and lived there chiefly for more than 20 years, finding full employment in making costly and exquisite articles of goldsmith's work for Pope Clement VII., the cardinals and nobles of Rome. At the sack of Rome by the Constable de Bourbon, in 1527, Cellini commanded the castle of San Angelo and boasted that he killed the Constable. His service on that occasion was rewarded by the pope with his pardon for all homicides he had committed or might commit for the good of the church. In 1538 he was imprisoned at Rome on a charge of theft, and made professions of penitence, which came to nothing. Two years later he went to France, visiting his friend the Cardinal Ippolito d'Este, at Ferrara, on his way. Francis I. greatly admired him as an artist, and kept him in his service five years, rewarding him with rich gifts, a large salary, an ancient "Hotel," and the title of seigneur. Of the house he had to make himself master by violence, and thereby incurred the enmity of the royal mistress, Madame d'Etampes. Among the works executed for Francis I. were a bronze Nymph for Fontainebleau, a silver statuette of Jupiter, and a gold salt-cellar. Cellini returned to Florence in 1545, and there executed for Duke Cosimo his celebrated figure of Perseus, which occupied him four years. He then visited Rome for a short time, and there made the bronze bust of his host Guido Altoviti, which was warmly praised by Michael Angelo. Cellini wrote treatises on the goldsmith's art, and on sculpture, and an Autobiography full of vivid and varied interest, not only personal but historical, and well known through an English translation. One of his finest later works was a marble crucifix, afterwards given by the grand duke to Philip II. of Spain, and now in the Escorial. Died at Florence in

CELSIUS, OLAUS, a learned Swede; the early patron of Linnaeus, and the first promoter of the science of natural history in Sweden. He published various theological and other works, particularly one entitled "Hierobotanicon," an account of the plants mentioned in the Bible. Born, 1670; died, 1756.

CELSUS, AURELIUS CORNELIUS, a Roman physician, probably of the time of Tiberius; author of treatises on agriculture, rhetoric, and military affairs, and of eight books on medicine. All except the last work are lost, but that is used in the medical schools of every nation in Europe.

CELSUS, an Epicurean philosopher of the 2nd century. He wrote a book against the Christian religion. It is not extant, but if we may judge from Origen's reply to it, Celsus was a keen disputant, even with the disadvantage of assailing truth and defend- ing error.

CERINI, GIOVANNI DOMENICO, an Italian painter, chiefly of historical subjects. Born, 1609; died, 1681.

CERINI, GIUSEPPE, an Italian poet and dramatist. Born, 1738; died, 1779.

CERINTHUS, a heresiarch of the 1st century. He was by birth a Jew, and his doctrine was a compound of Judaism, Christian- ity, and the speculations of the Gnostics.

CERVANTES SAAVEDRA, MIGUEL DE, the celebrated Spanish novelist, was born in 1547. He gave early promise of literary talent, and received a careful education, studying at the universities of Alcalá, his native place, and Salamanca, and afterwards, perhaps, at Madrid. He soon became cham- berlain to the Cardinal Giulio Acquaviva, at Rome. He then entered the army, and continued to serve in it during the four years between 1571 and 1575. He took a distin- guished part in the famous battle of Lepanto, where he was thrice wounded, and lost the use of his left arm. After this, he joined the troops at Naples, in the service of the Spanish king; but in 1575 he was taken prisoner by a corsair, and remained in slavery at Algiers five years. When he was at length ransomed, he again served as a soldier for several years, and then settled at Madrid, married, removed to Seville in 1588, and published in the course of ten years about thirty dramas; but, though he showed great genius, he was not so successful as his rival Lope de Vega, and he was driven to various hard shifts to earn a livelihood. Ultimately he abandoned dramatic composition for prose romance, and in 1605 appeared the first part of that extraordinary work, which has immortalized his name—"Don Quixote."

The second part appeared in 1615. Cervantes had in view, by this work, to reform the taste and opinions of his countrymen. He wished to ridicule the silly romances then so popular in Spain, poor, unnatural, exag- gerated imitations of the earlier romances of chivalry, and which were exerting a very mischievous influence. The work was, at first, coldly received, but it soon met with applause, several editions were called for within the first year after its appearance,

and it may now safely be said to be one of the most popular works that was ever writ- ten. In its moral purpose "Don Quixote" achieved a complete success, for it formed an insuperable barrier against the further advance of the deluge of romance. It was speedily translated, and became a classic in most European languages. Eight English translations appeared between 1620, the date of the first, and 1755. Still its extraordinary good fortune did not extend to the author, who struggled on for many years with nothing to console him in his poverty but his genius, and the just consciousness of it. Nearly all the plays of Cervantes are lost. Of his other works the most noteworthy are his "Novelas Exemplares," and his "Viaje al Parnaso," the latter a satire on the inferior poets of the age. It is usually remarked that Cervantes and Shakespeare died on the same day, the 23rd April, 1616; but Carlyle has pointed out that as Spain had previously adopted the new style while the old was retained in England much later, there would be a difference of ten days between the reckoning in the two countries. A magnif- icent French edition of Don Quixote, with illustrations by Gustave Doré, appeared in 1863, in 2 vols. folio. These illustrations have been since reproduced in an English edition.

CESARI, GIUSEPPE, Italian painter, was born at Rome about 1568. He obtained em- ployment in the Vatican, and became a great popular favourite. He had the patronage of several popes, and for many years held his ground against all rivals, including Annibale Caracci and Caravaggio. His principal work is the series of frescoes in the Conservatorio in the Capitol, illustrative of events in Ro- man history. His drawing was spirited, rapid, and inaccurate; executed with great facility and without any regard to the truth of nature. He had many imitators, who were named "Idealists," in contradistinction to the partisans of Caravaggio, the "Natural- ists." Died, 1640.

CESARINI, GILIANO, Cardinal. He was born about 1398, and having been raised to the cardinalate in 1426, was sent to preach in Germany against the innovators in religion. He distinguished himself as president of the council of Basel against the Hussites. Being sent by the pope to Hungary, he persuaded Ladislaus to break truce with the Turks. The battle of Varna ensued, Nov., 1444, and the cardinal disappeared, but it is not known what became of him.

CESAROTTI, MELCHIORRE, an Italian poet, and professor of Greek and Hebrew in the university of Padua; author of "Essays on the Italian Language," and translator into Italian of "Ossian's Poems." His trans- lation of the "Iliad" is a ridiculous caricature. Cesarotti was sent on a political mission to Napoleon, who knighted and pensioned him, in return for which the poet became a servile flatterer of the despot. Born, 1730; died, 1808.

CESPEDES, PAOLO DE, an eminent Span- ish painter. He was a native of Cordova, and studied the fine arts at Rome, whence he returned to Cordova in 1577. He acquired the name of the Spanish Raphael. His prin-

elplai work is "The Last Supper," an admirable picture in the cathedral of Cordova. He was author of a learned treatise on ancient and modern painting, and of several other works. He was a learned orientalist, and the friend of the great scholars and artists of his age. Died, 1668.

CHABERT, JOSEPH BERNARD, Marquis of, a distinguished navigator, astronomer, and geographer, born at Toulon, in 1724. He entered the navy at an early age, performed several distant voyages, and formed the project of a chart of the Mediterranean. But the American war interrupted the work, and called Chabert to his post, where he distinguished himself so highly, that, in 1781, he was made commander of a squadron. The revolution drove him to England, and he was received by Dr Maskelyne with great kindness. In 1800 he lost his sight, in consequence of his intense application to study; and, in 1802, he returned to Paris, where Buonaparte assigned him a pension. Died, 1805.

CHABRIAS, an Athenian general, who distinguished himself in various expeditions between B. C. 392—357. He assisted Evagoras of Cyprus against the Persians, and the Thebans against the Spartans, defeated the latter at Naxos, and while commanding the fleet at the siege of Chios, was killed, B. C. 357. A statue was erected to him at Athens.

CHAISE, FRANÇOIS DE LA, a French Jesuit, confessor to Louis XIV., over whom he acquired a vast influence. Died, 1709. The site of his house and grounds at Paris is now occupied by the beautiful cemetery which bears his name.

CHALCONDYLES, DEMETRIUS, a learned Greek, who, on the taking of Constantinople in 1453, established himself as a teacher of Greek in Italy. He wrote a Greek grammar, and edited the lexicon of Suidas. Died, 1513.

CHALCONDYLAS, NICHOLAS, or LAONICUS, one of the Byzantine historians, flourished in the latter part of the 15th century. He was a native of Athens, and wrote a History of the Turks, and of the Fall of the Greek Empire, from 1298 to 1462.

CHALMERS, ALEXANDER, M.A., F.S.A., was born in 1759, at Aberdeen, where his father carried on business as a printer. When he was eighteen years of age, an appointment of assistant surgeon in the West Indies was procured for him; but instead of sailing for Jamaica he proceeded to London, where he connected himself with the press. He became editor of the Public Ledger and London Packet newspapers, during the period of the American war. Party politics were then running high, and Mr Chalmers obtained much credit as a political writer to other journals under the signature of *Senex*. He was for a long time a contributor to the Morning Chronicle, and afterwards editor of the Morning Herald; he also entered into engagements with several publishers, to edit their books, and published many works in his own name. In 1812 the first portion of the work appeared, which, of all his productions, has the most largely contributed to his fame, namely, "The General Biographical Dictionary," which was completed in

1817; and he continued to occupy himself in literary pursuits till ill-health compelled him to abandon them. Died, 1834.

CHALMERS, GEORGE, a Scotch writer of considerable ability and industry; author of "Caledonia," "An Estimate of the comparative Strength of Great Britain," &c. His statistical ability procured him the situation of chief clerk of the Board of Trade, which he enjoyed for many years. Born, 1742; died, 1825.

CHALMERS, Rev. Dr THOMAS, was born at Anstruther, in Fife, on the 17th of March, 1780, and was early sent to study at St Andrew's University. His college career was distinguished by some of his subsequent peculiarities—energy, good humour, companionableness, and ascendancy over others; and it was then that his passion for the physical sciences was first developed. Besides theology, he studied mathematics, chemistry, and some branches of natural history, with more than youthful enthusiasm, and with such success that, besides assisting his own professor, he made a narrow escape from the mathematical chair in Edinburgh. On the completion of his theological studies he officiated for about two years as assistant in the parish of Cavers, and in 1803 he obtained a presentation to the parish of Kilmarnock in Fifeshire. Here he remained for some years, in the quiet discharge of his clerical duties, when he was suddenly awakened to a knowledge of "vital Christianity," while engaged in writing the article "Christianity" for Brewster's Edinburgh Encyclopædia; and from this moment his quickened and concentrated faculties were intent on reviving the old "evangelism of the Puritans and the Reformers." In 1815 the town council of Glasgow invited him to be the minister of the Tron church. Thither he repaired, and in that city he laboured for eight years. In 1817 he visited London. Here his popularity was not less overwhelming. The churches in which he was to preach were crowded long before the service commenced; and amongst his auditors were a number of the distinguished clergy, peers, members of parliament, and literary characters of all classes and denominations. "All the world," writes Wilberforce in his diary, "wild about Dr Chalmers. Canning, Huskisson, Lords Elgin, Harrowby, &c., present. I was surprised to see how greatly Canning was affected; at times he was quite melted into tears." After continuing about four years minister of the Tron church, he was removed to the new church of St John's. In this new sphere he tried to give practical direction to the theories he had propounded relative to the support and the suppression of pauperism. But the work he had undertaken deprived him of that solitude required for pulpit preparations, especially for such pulpit exhibitions as he was wont to give; and he was fain to seek relief in an academic retreat. In 1824 he accepted the chair of moral philosophy at St Andrew's; in 1828, he was removed to the chair of theology in the university of Edinburgh; and here he prosecuted his multifarious labours, lecturing, preaching, publishing, organizing schemes for the welfare of the church, and taking an active

management in her courts, till the disruption of the Church of Scotland in 1843, when he joined the Free Church, which he had mainly contributed to found, and became principal and professor of theology to the succeeding body. In the spring of 1847 he repaired to London to give his evidence before the sites' committee of the House of Commons. "He preached all the sabbaths of his sojourn in England, willingly and powerfully, and on the last sabbath of May he was again at home. That evening he is said to have remarked to a friend, that he thought his public work completed. Next morning all that met the gaze of love was the lifeless form—in stately repose on the pillow, as one who beheld it said, 'a brow not cast in the mould of the sons of men.'" In this meagre outline of the life of Dr Chalmers, we have not alluded to the many valuable works which from time to time he gave to the world. His works published during his lifetime, in 25 vols., embrace a variety of subjects, chiefly relating to theology and political economy: among these are his "Astronomical Discourses," first published in 1817, when they formed a new era in the history of pulpit oratory. Besides these, 9 vols. of posthumous works, consisting of "Daily Scripture Readings," "Institutes of Theology," &c., have been published by his son-in-law, Dr Hanna, to whose interesting memoirs of Dr Chalmers we must refer the reader for the fullest information concerning the life and works of this illustrious man. In an analysis of his mind, the first power that meets us is his brilliant imagination. It mattered not what the subject might be, each and all he invested with such a splendour of imagination and magnificence of diction, as at once captivated and entranced. But these very powers sometimes led him into seeming inconsistencies. Alive only to the discussion of his present theme, he was apt to forget those which had previously engaged his mind, and how the arguments previously advanced bore upon his present illustration. Hence a casuist might arraign Dr Chalmers at the bar of strict political consistency, and object to the part he took in some public movements during his career; but an acquittal would be given, on the ground, that he never pleaded any cause, unless convinced at the time that it was for the spiritual and temporal welfare of his fellow-men. But such defects in such a character are like notes in a sunbeam. Considered in every view,—the preacher, the philosopher, the philanthropist,—we see one great by intellectual power, great by holiness of life, one on whose like Scotland will not soon look again. Died, May 31, 1847.

CHALONER, Sir THOMAS, an English statesman. He obtained his knighthood by his gallantry at the battle of Musselburgh, and was afterwards sent by Queen Elizabeth ambassador to Spain and Germany. He translated Erasmus's "Encomium Moriae," or Praise of Folly, and wrote "De Republica Anglorum instauranda," &c. Died, 1565.

CHALONER, Sir THOMAS, son of the above, was distinguished as a chemist and natural philosopher. He discovered or first worked the alum mines of Yorkshire, and

was author of a tract on the virtues of nitre. Died, 1615.

CHALONER, EDWARD, an English divine, son of the above, chaplain to James I., and one of the most celebrated preachers of his time. He died of the plague, in 1625.

CHALONER, JAMES, brother of the preceding, a member of parliament, and one of the judges of Charles I. His zeal in the parliamentary cause obtained him the governorship of Peel Castle, in the Isle of Man. At the restoration in 1660, messengers were sent to apprehend him, when he committed suicide.

CHAMBERLAYNE, EDWARD, LL.D., publicist, was born in Gloucestershire in 1616. He was author of several works, the most important of which is one on the ancient and modern state of England, entitled "Anglie Notitia." It ran through nearly 40 editions. This author is a remarkable example of vanity, and the follies to which it leads men. It is related of him that he directed that some of his works, wrapped in cere-cloth, should be buried with him, as (so the monument records) they might be of use to a future age! Died at London, 1703.

CHAMBERS, EPHRAIM, originator and editor of the Cyclopaedia which bears his name, was a native of Kendal, but was apprenticed in London. The first edition of his Cyclopaedia appeared in 1728, and procured him admission to the Royal Society. It passed through six editions in little more than twenty years, and formed the basis of the greater work of Dr Rees, and the model of many others. Died at London, and was buried in Westminster Abbey, 1740.

CHAMBERS, GEORGE, an English marine painter, was a native of Whitley in Yorkshire, and spent his boyhood in a seafaring life. After acquiring some skill as a painter of sea-pieces he went to London, had employment as a scene-painter, and was appointed marine painter to the king and queen. Among his works are the "Bombardment of Algiers," the "Capture of Portobello," and the "Victory over the French Fleet at La Hogue," all in Greenwich Hospital. Died, 1840.

CHAMBERS, Sir WILLIAM, an English architect, born at Stockholm in 1726. He was educated in England, and settled early at London. He was employed by George III. to plan the gardens at Kew, and was afterwards appointed architect of Somerset House, which is his principal work. In his youth he visited China, and acquired a singular taste for the Chinese style of building, which he adopted at Kew, and recommended in his work on "Oriental Gardening." He wrote a "Treatise on Civil Architecture," was made knight of the Polar Star, and died in 1798.

CHAMISSO, ADELBERT VON, son of Louis, Viscount d'Ormont, was born at Roncourt in Champagne in 1761. Driven with his parents from their home by the French revolution, he was educated at Berlin, where he became one of the royal pages, served in the Prussian army till the peace of Tilsit, and then returned to France, where he remained till 1812, as professor at Napoleonville. But his strong inclination for his favourite study,

natural history, and the attachment he had imbibed for the land of his education, once more drew him to Berlin, where he seized the opportunity of accompanying Kotzebue in his voyage round the world in 1815; and on his return, in 1818, he was appointed superintendent of the botanic garden of Berlin, an office which he held till his death. Chaussis's works range over various departments of literature. "His Views and Observations during a Voyage of Discovery" is a very interesting and trustworthy narrative; his poems take rank among his countrymen with those of Uhland; and, as the author of "Peter Schlemil," he has obtained a European fame. Died, 1838.

CHAMPAGNE, PHILIP, an eminent Flemish painter, was born at Brussels in 1602, went to Paris, where he studied under Pousin, and became painter to the Queen Maria de Medici, who gave him the direction of the paintings in the Luxembourg, and he was also made director of the Academy of Fine Arts. His paintings, which are very fine, adorn the dome of the Sorbonne, the Museum of Paris, &c. Died, 1674.

CHAMPEAUX, GUILLAUME DE, French philosopher and theologian of the eleventh and twelfth centuries. He was long a distinguished teacher of rhetoric, dialectics, and theology in the school of Paris. The celebrated Abelard was his disciple, and he became his rival and formidable opponent. After years of stormy controversy Champeaux was made bishop of Châlons-sur-Marne, devoted himself to the duties of his office, entered the Cistercian order, and died, 1121.

CHAMPIER, SYMPHORIEN, a French physician. He wrote several learned works, and founded the Royal College at Lyons. He also served in Italy under the duke of Lorraine, by whom he was knighted for his courage. He compiled several works, of which the most valuable is "Les Grans Chroniqueurs des Princes de Savoie." Died, 1540.

CHAMPLAIN, SAMUEL DE, a French naval officer. He was governor-general of Canada, and founded the city of Quebec; and there is a lake in Canada which bears his name. His "Travels in Canada" contain much curious information. Died, 1634.

CHAMPOLLION, JEAN FRANÇOIS, the younger, a French Egyptologist, was born at Figeac in 1791. His ruling passion was awakened by the sight of some Egyptian figures when he was only twelve years old, and in 1807 he went to Paris to study Arabic and Coptic. He was soon after named professor of history at Grenoble, but his thought constantly turned to Egypt, and he worked at his "Egypt under the Pharaohs." In 1824 he went to Italy, and four years later conducted the scientific expedition to Egypt, returning in 1830 laden with precious fruits of his researches. Champollion devised a phonetic alphabet for the decipherment of the hieroglyphic inscriptions, in which however he had been to some extent anticipated by Dr Young. The "Précis du Système hiéroglyphique" appeared in 1824. His theory was sharply criticised by Klaproth. Champollion also

published "Panthéon Egyptien," 2 vols. 4to.; and in conjunction with his fellow-traveller, Rosellini, the "Monumens de l'Egypte et de Nubie." Died, 1832.

CHANCELLOR, RICHARD, an English navigator, and founder of the English Russia Company. By this company he was sent to Russia a second time, and, while on his return with the Russian ambassador and suite, he perished off the coast of Norway, in 1556.

CHANDLER, RICHARD, divine and antiquary. He was born in Hampshire in 1738, and was educated at Oxford university. He travelled, in 1764, through Asia Minor and Greece, at the expense of the Dilettanti Society; and wrote, in conjunction with his fellow-travellers, Revett and Pars, the "Ionian Antiquities." He afterwards published his "Travels in Asia Minor," and "Travels in Greece." Before setting out on his travels Dr Chandler had published a new and magnificent edition of the "Marmora Oxoniensia." Died, rector of Tilehurst, 1810.

CHANDLER, SAMUEL, an eminent dissenting divine; he was born in Berkshire, and was minister of a congregation in the Old Jewry, London, for forty years. He was author of a "Vindication of the Christian Religion," a "Vindication of the History of the Old Testament," "History of the Life of David," &c. The latter was his most important work, and was occasioned by the publication of a vulgar pamphlet on the same subject, in which the character of David was ridiculously misrepresented. Born, 1693; died, 1766.

CHANDOS, JOHN, an English general of great celebrity, in the 14th century; distinguished not more for his bravery than for his generosity and moderation. He was present at the battle of Crecy, became governor of the provinces of France ceded to England by the treaty of Bretigny; defeated and took prisoner Dugueselin at Auray; served under the Black Prince in Castile; was made constable of Aquitaine (Guienne); and was killed at the bridge of Leusac, near Poitiers, in 1369.

CHANNING, WILLIAM ELLERY, D.D., Unitarian divine and miscellaneous writer, was born at Newport, Rhode Island, U. S., in 1780. His maternal grandfather, William Ellery, was one of those who signed the Declaration of Independence, and his father was a partner in the mercantile firm of Gibbs and Channing, at Newport. Educated at Harvard College, he was early induced to abandon the profession of medicine, for which his father intended him, and to prepare himself for the Unitarian ministry; and in 1803 he commenced his career by taking charge of the congregation in Federal Street, Boston. His eloquence rendered him from that time forth one of the most conspicuous men in America. To assert that his discourses display great genius would be absurd; they are, indeed, striking specimens of pulpit eloquence; but they are the discourses of a mere oratorical moralist rather than those of a Christian preacher. To the honour of Dr Channing it must be said, that he was ever the advocate of peace, and that though he could not but be

CHANTREY, Sir FRANCIS, R.A., F.R.S., F.S.A., &c., sculptor, was born at Norton, near Sheffield, in 1781. When a mere child he discovered considerable talent in drawing and modelling; and during his apprenticeship with Mr Ramsay, a carver and glazier at Sheffield, the whole of his leisure hours were devoted to the study and practice of his favourite pursuits. After a short visit to London, where he attended the school of the Royal Academy, he returned to Sheffield; but his career of fame and fortune was not begun until 1809, when he received an order from Mr Alexander, the architect, for four colossal busts of Howe, St Vincent, Duncan, and Nelson, for the Trinity House, and for the Greenwich Naval Asylum. From this period he was unremitting in his efforts, and continually successful; and, among the productions of his chisel, there appeared, in 1817, that exquisite group of "The Sleeping Children" (the daughters of the Rev. W. Robinson) in Lichfield cathedral; universally acknowledged as "images of artless beauty and innocent and unaffected grace." Orders crowded in upon him in number beyond his ability to execute. Among them we notice his *busts* of Lord Castlereagh, Sir Walter Scott, the poets Wordsworth and Southey, Mr Canning, John Kennele, George IV., William IV., Queen Victoria, Lord Melbourne, Sir Robert Peel, and the Duke of Wellington; and his *statues* of James Watt, Dr Cyril Jackson, Grattan, Washington, Sir Joseph Banks, Spencer Perceval, Canning, Sir John Malcolm, Dr Dalton, Roscoe, General Gillespie, Lady Louisa Russell (when a child), Bishops Bathurst and Ryder, &c. To this list we ought perhaps to add his principal statues in bronze, viz. George IV. at Brighton and in Edinburgh, Pitt in Hanover Square and Edinburgh, and the equestrian statues of Sir Thomas Munro, at Madras, and the duke of Wellington for the city of London. Died, Nov. 25, 1841.

CHAPMAN, GEORGE, dramatic poet and translator of Homer, was born in 1537. He is said to have studied at Oxford, settled at London, enjoyed the friendship of his great contemporaries Spenser and Shakespeare, and the patronage of several eminent statesmen, and died, honoured and beloved, in 1634. His dramas and other works are numerous, but his reputation now rests chiefly on his "Iliads of Homer, Prince of Poets, never before truly translated," which appeared, complete, in 1603. It is written in the old English ballad metre, and is still admired for its vigour, facility, and happiness of expression, although frequently disfigured by carelessness and unfaithfulness. He also translated the *Odyssey*, and portions of the works of Hesiod and Ovid.

CHAPONE, HESTER, miscellaneous writer, was born in Northamptonshire in 1726. She is principally known by her "Letters on the Improvement of the Mind,"

addressed to a young lady, and published in 1773. Died, 1801, aged 74.

CHAPPE, CLAUDE, nephew of the astronomer, JEAN CHAPPE D'AUTEROCHE, was born in 1763. He introduced the use of telegraphs into France; and the first public event communicated by the new method was the capture of Condé, recovered from the Austrians in 1793. The honour of the discovery being claimed by others, his mind was so much affected that he committed suicide, in 1805.

CHAPTAL, JEAN ANTOINE CLAUDE, count of Chanteloupe, a French chemist and statesman, born at Nogaret in 1756. He was destined for the profession of medicine, and had completed his studies when he was induced to accept the professorship of chemistry at Montpellier. His lectures procured him great reputation, and on the breaking out of the revolution he took an active part in it, and was selected by the new government to superintend the manufacture of gunpowder at Grenelle. He became member of the Institute, and professor of chemistry at the Polytechnic School. In 1799 the first consul made him counsellor of state; and, in the following year, minister of the Interior. He held this post four years, and by his zeal and energy rendered very great services to the arts and manufactures of his country. Chaptal lost for some reason the favour of Napoleon, and retired into private life. Yet still honours were accumulated upon him, and he was made grand officer of the Legion of Honour, senator, peer of France, member of the Academy of Sciences, &c. He took a distinguished part in the discussions of the Chamber of Peers, and died in 1832. Among his numerous works are, "Éléments de Chimie," "Traité théorique et pratique de la Culture de la Vigne," &c.; "La Chimie appliquée aux Arts," &c.

CHARDIN, Sir JOHN, a celebrated French traveller, born at Paris in 1643. He went to the East in 1664, spent several years at Ispahan, was well received by the court of Persia, visited India, saw Persepolis, and returned in 1670. He made a second journey to the same countries in the following year, and was absent ten years. In 1681 he came to London, was knighted, married, admitted to the Royal Society, and employed on some diplomatic missions. His "Travels" appeared in 1686—1711, and have been frequently republished. Died, near London, in 1713.

CHARLES, an Athenian general, who lived B. C. 370—333. He was joint commander of the Athenian fleet in 356, and soon after assisted the satrap Artabazus in his revolt against Artaxerxes, king of Persia. He served in the Olynthian war, and was one of the commanders at the battle of Chæronea, B. C. 338.

CHARLEMAGNE, or CHARLES THE GREAT, king of the Franks, and emperor of the West, was the eldest son of Pepin the Short, and grandson of Charles Martel, and was born at Salzburg in 742. He succeeded his father, with his brother Carloman, in 768, and on the death of Carloman three years later became sole monarch. He had previously married and repudiated the

daughter of Desiderius, king of the Lombards. In 772 Charles began his wars with the Saxons, which occupied him year by year till 803. They were pagans, and he sought to convert as well as conquer them. He treated them alternately with great mildness and savage cruelty, beheading on one occasion above 4000 of them. Their most famous leaders were Witikind and Alboin, who embraced the Christian religion. During these thirty years of war Charles had also to fight the Lombards, Huns, Saracens, &c. In 774 he went at the request of the pope to make war on Desiderius; defeated and captured him, and thus put an end to the Lombard kingdom, and assumed the crown himself. At the same time he captured the widow and children of his brother Carloman. The title of patrician was conferred on Charles by the senate and people of Rome. In 778 he went to Spain to assist one of the Saracen chieftains; took Pampeluna and Barcelona, but returning was attacked, and his rear-guard defeated, by the Gascons at Roncesvalles. Here fell the famous Itoland, and other celebrated captains. In 800 Charles was crowned at Rome, emperor of the West, by Pope Leo III., and received the title of Augustus. His empire extended from the North Sea to the Mediterranean, and from the Atlantic and the Ebro, in Spain, to the Raab and the mouth of the Oder. Charlemagne was great not only as a conqueror, but as a legislator, and a promoter of science and literature. He entertained scholars at his court, founded monasteries, churches, and schools, and obtained the praise of statesmen, churchmen, and men of letters. His eldest son died in 810; his second the year following; and he appointed his third son, Pepin, to succeed him. Charles the Great died, and was buried at Aix-la-Chapelle, in 814. We have a trustworthy account of this great man in Eginhardt's "Vita Caroli Magni."

CHARLES IV., emperor of the West, son of John of Luxemburg, king of Bohemia, and grandson of the emperor, Henry VII., ascended the throne in 1346. His reign was distinguished by the publication of the Golden Bull at the diet of Nürnberg, by which the Germanic constitution was established. Died, 1378.

CHARLES V. (I. of Spain), emperor of the West, was born at Ghent in 1500. He was son of the Archduke Philip of Austria, and Joanna, only child of Ferdinand and Isabella, and was brought up in the Netherlands. He succeeded his grandfather, Ferdinand, as king of Spain in 1516, his mother being also recognized as queen, although incapable of governing. Cardinal Ximenes held the regency, but died in 1517, just as Charles arrived in Spain. On the death of Maximilian I. he was chosen to succeed him, and was crowned emperor at Aix-la-Chapelle in 1520. He had just before visited England, and had a conference with Henry VIII. and Wolsey. The period of his reign is one of the most momentous in modern history, and full of great affairs, in which Charles had a large personal share. His rivalry with Francis I. of France, and the wars resulting from it; insurrections in

Spain and in Flanders; the conflict proceeding in Germany and all Europe between the Reformers and the Catholics; the conquest of Mexico and Peru; expeditions against the Moors both in Spain and Africa; these are the main elements of the story, which it is not possible even to epitomize here. In 1525 the generals of Charles defeated and captured Francis I. at the battle of Pavia. Two years later Rome was sacked by the Constable de Bourbon, whom Charles had taken into his service. Charles had several conferences with the pope, and pressed him to call a general council. He afterwards made a league with the pope, and made war on the Protestants, whom he defeated at the battle of Mühlberg, in 1547. In the following year, at the Diet of Augsburg, he proposed the famous "Interim," which was unsatisfactory to both sides, and was soon after annulled. In 1552 he signed the treaty of Passau, which was soon followed by the "Peace of Religion." Wearied with incessant cares and activity, Charles, in 1555, resigned his hereditary states of the Netherlands to his son Philip, in an assembly at Brussels. In the following year he gave up Spain, and a few months after the imperial dignity. He then returned to Spain, and early in 1557 retired to a monastery in Estremadura. In August 1558 he had his own obsequies celebrated, and died a few weeks later. Charles V. was a man of great intelligence and superior culture, had considerable acquaintance with literature and art, and patronized those eminent in either. He was ambitious, but humane, and pursued a temporizing policy in the great religious struggle of his age. His orthodoxy is said to have been called in question by the Inquisition after his death. The well-known "History of Charles V.," by Robertson, which first appeared in 1769, was re-published in 1856, with valuable notes and a supplement by the American historian Prescott.

CHARLES VI., emperor of the West, son of the emperor Leopold, was declared king of Spain by his father in 1703, and crowned emperor in 1711. The taking of Belgrade by his general, Prince Eugene, compelled the Turks to make peace with him; and his alliance with Holland, France, and England enabled him to obtain considerable advantages over Spain. Subsequently, however, he was at war with his allies, and thus lost Naples and Sicily; and was also engaged in an injurious contest with Turkey. The succession to his Austrian dominions was regulated by the Pragmatic Sanction published in 1724. Died, 1740.

CHARLES MARTEL, duke of Austrasia, was a natural son of Pepin d'Héristal or Pepin the Fat, and was born probably about 685. On the death of his father in 715, he was imprisoned by the Queen Plectrude, but escaped, and was proclaimed duke of Austrasia, and was virtually sovereign of France. He is one of the greatest heroes in early French (or Frankish) history, and carried on wars with Chilperic II., king of Neustria, with the Saxons, the Bavarians, and the Saracens. He won a great and memorable victory over the latter in 732, near Tours or

Poitiers; destroying their army and slaying their king Abderahman. In 735 he made himself master of Aquitaine and Gascony. He took Avignon from the Saracens, gained another great victory over them near Narbonne, and with the aid of Liutprand, king of the Lombards, besieged them in that town. Charles had never taken the title of king, but only that of mayor of the palace, but at his death he divided his dominions like a king between his sons Carloman and Pepin. Shortly before his death he received two nuncios from Pope Gregory III., the first that were sent to France. Charles acquired the surname MARTEL (Hammer) from his victory over the Saracens near Tours. Died, 741. He was interred in the church of St Denis.

CHARLES II., or, more properly, **I.,** surnamed **THE BALD,** king of France. He was crowned king in 810, and elected emperor by the Romans in 875. Died, it was supposed by poison, in 877.

CHARLES III., king of France, surnamed **THE SIMPLE.** He ascended the throne in 893. His whole reign was one struggle against the Normans and his turbulent barons, who at length caused Robert, a prince of the blood royal, to be crowned. In the battle fought between the two sovereigns, Robert was slain; but his son, Hugh the Great, pressed Charles so hard, that he sought shelter in the castle of the Count of Vermandois, where he died, in 929.

CHARLES IV., son of Philip the Fair, succeeded to the crown of France in 1322. His reign lasted only six years, and in that brief time he was deprived by England of the province of Guienne. Died, 1328.

CHARLES V., THE WISE, king of France, was born in 1337. He was eldest son of John II., and the first dauphin of France. He was present with his father at the battle of Poitiers, and was recognized as regent during his father's captivity. He succeeded to the throne in 1364. One of his earliest acts was to get rid of the *Grand Companies*, which occasioned so many disorders and miseries in France, and to send them under Duguesclin to fight against Peter the Cruel in Spain. He recovered several provinces from the English, and concluded another treaty with them in 1373. John of Gaunt, however, the same year marched unopposed through France from Calais to Bordeaux. Charles V. was a friend of literature, founded the royal library of France, and had the Bible and St Augustin's "City of God" translated into French. The great fortress of the Bastille was founded by him in 1370. Died, 1380.

CHARLES VI., THE WELL-BELOVED, king of France, was born in 1368. He was son of Charles V., and succeeded him in 1380. The regency was disputed by his uncles, and the young king was therefore declared of age, and ruled by a council. The oppressions of the government caused insurrections in various parts of France, which were severely repressed. In 1382 the young king marched against the Flemings, then in revolt under Philip van Artevelde, and the Constable de Clisson defeated them at Rosbach. The next year he marched again against the Ghentese,

who were assisted by the English under Spenser, the "fighting bishop" of Norwich, and defeated them. In 1385 he had immense preparations made for an invasion of England, but they came to nothing. In 1392 Charles became insane, and with occasional intervals remained so till his death. The jealousies and strifes of his uncles were renewed, and led to the civil wars of the Burgundians and Armagnacs; in the midst of which Henry V. of England invaded France, took Harfleur, and won the great victory of Agincourt, October, 1415. Three years later Henry overran Normandy and took Rouen; married the princess Katharine, and was recognized heir to the crown of France. Charles VI. died in 1422, a few weeks after Henry V.

CHARLES VII., THE VICTORIOUS, king of France, was born in 1403. He was the only surviving son of Charles VI., became dauphin in 1416, and succeeded his father in 1422. Henry VI. of England was also proclaimed king, and the great duke of Bedford was regent of France. War with the English continued, and in 1428 they besieged Orleans, which was saved by the extraordinary intervention of Joan of Arc. After triumphing over the English she conducted the king to Rheims, and there had him crowned. The cause of the English declined until they had lost all they held in France except the town of Calais. The miseries brought on the country by the long-continued wars, and by the disorders and lawlessness of the mercenary bands of troops, were relieved by the reform which Charles effected in the army. He also set a limit to the papal authority in France by the establishment of the so-called "Pragmatic Sanction," published in 1438. The celebrated Agnes Sorel was mistress to Charles VII. Charles died in 1461.

CHARLES VIII., king of France, was born in 1470. He was son of Louis XI., and succeeded him in 1483, under the regency of his sister, Anne of France. The first years of his reign were troubled by the turbulence and revolts of the nobles; and in 1491, in consequence of Charles refusing to marry the daughter of the emperor Maximilian, the latter allied himself with Henry VII. of England against France, and war broke out. Peace was, however, soon restored. The great event of this reign was the invasion of Italy in 1494: when Charles entered Florence, Rome, and Naples, almost unresisted. An alliance was formed against him, and he defeated the allies on his return at Fornovo. Died, 1498.

CHARLES IX., king of France, was born in 1550. He was son of Henry II. and Catharine de Medicis, and succeeded his brother Francis II. in 1560, under the regency of his mother. The civil wars of the Huguenots and Catholics fill up the history of his reign. Intrigues between the nobles and leaders, treaties of peace, partial concessions of religious liberty, assassinations, battles, and above all, the atrocious massacre of St Bartholomew, form the staple of the sad story. The colloquy of Poissy took place in 1561; the edict of St Germain was published in the following year; and soon after the

massacre of a Protestant congregation at Vassy was perpetrated. The defeat of the Huguenots at Dreux by the duke of Guise, the assassination of the duke; the memorable conference of the queen mother and Charles with the queen of Spain and the Duke of Alva at Bayonne; the battle of St Denis; the defeat of the Huguenots at Jarnac; the assassination of the prince of Condé immediately afterwards; the defeat of the Huguenots at Moncontour; and the treaty of St Germain;—these are the leading events that mark the course of the great struggle and lead up to its awful crisis. In 1570 Charles married Elizabeth, daughter of the emperor Maximilian II., and some of the Protestant leaders took part in the celebration of it. In August, 1572, the young king of Navarre was married at Paris to Margaret, sister of Charles, and the leading men of the Protestant party were invited to attend. The assassination of the great admiral de Coligny took place on the 23rd August, and on the 24th the great massacre began. From that time Charles was the victim of the most terrible remorse. Continually haunted by visions of the horrible scenes of those days, he died broken down in mind and body in May, 1574.

CHARLES X., king of France, or CHARLES PHILIPPE DE BOURBON (known as Count d'Artois until the accession of his brother Louis XVIII., and afterwards as Monsieur), was the fifth and youngest son of the dauphin Louis, son of Louis XV., and was born in 1757. In early life he had acquired a character for dissipation, extravagance, and hauteur, which bore a still more unfavourable appearance when contrasted with the conduct of his elder brothers; and such indeed was his unpopularity, that at the very outset of the revolution he found it necessary for his personal safety to quit his native land. In 1773 he had married the princess Maria Theresa, daughter of Victor Amadeus III., king of Sardinia, to whose court he now fled for refuge. He subsequently visited other parts of Europe, and eventually found an asylum with his brother, Louis XVIII., first at Holyrood House, Edinburgh, and afterwards at Hartwell, in Buckinghamshire. On his succeeding to the throne of France in 1824, it was seen that he adhered too much to the exploded dogmas of the old régime to acquire the same degree of popularity that, by good fact and a more complying disposition, his predecessor had enjoyed. On the 25th of July, 1830, in consequence of the result of a general election, Charles X. issued his three fatal ordinances, one abolishing the freedom of the press, and the other changing the mode of election. A popular insurrection, of three days' continuance, which has since been dignified with the title of "the glorious revolution of 1830," took place in Paris, and paved the way for Louis Philippe. The king retreated from St Cloud to Rambouillet, where he offered to abdicate in favour of his grandson, the duke of Bordeaux, and requested from the provisional government a safe-conduct to a sea-port. Embarking at Cherbourg, he sailed for England, and for a time took up his residence at

Lulworth Castle, and then removed to Holyrood House, the scene of his former exile. There he remained about a twelvemonth, afterwards retired to the Austrian dominions; and died, in his 80th year, at Goritz, in Illyria, Nov. 4, 1837. The latter years of this monarch were passed in acts of superstitious devotion; he constantly wore hair-cloth next his skin, he fasted much, and frequently imposed upon himself, as a penance for some hasty expression, an absolute silence for several hours. The Dukes d'Angoulême and de Berry were his sons.

CHARLES THE BOLD, or THE RASH, last duke of Burgundy, was son of Philip the Good and Isabella of Portugal. He was born at Dijon, in 1393, bore at first the title of count of Charolais, under which he distinguished himself on several occasions and especially at the battle of Montlhéry in 1465. He succeeded his father in 1467, and was immediately at war with the people of Liège, whom he subdued and treated with savage cruelty. In the next year he received an immense bribe from Louis XI. not to invade France, and soon after had a memorable interview with him at Peronne. A fresh rising took place in Liège during the conference, at the instigation of Louis, whom Charles disposed to the most violent course, shut up for several days, and then compelled to accompany and aid him in suppressing the insurrection. Liège was taken and sacked, not even the churches being spared. In 1470 Charles received Edward IV. of England, whose sister, Margaret of York, he had married two years before, and aided him with money and ships to return to England. The same year he renewed the war with Louis XI. In 1473 he went to meet the emperor Frederick III. at Treves, hoping to get from him the titles of king and viceroy general of the empire, but the terms could not be settled. He afterwards allied himself with Edward IV. against the king of France, but more pressing affairs prevented his fulfilment of the bargain. He conquered Lorraine and took Nancy in 1475, and then marched against the Swiss, who won two memorable victories over him at Granson and Morat. Chagrin and hopeless melancholy seized and, for a time, paralyzed him. He was roused by the tidings of the loss of Nancy, and set out to retake it. During the siege one of his officers deserted with his troops to the enemy, and in the battle which was fought on the following day, 5th January, 1477, Charles was defeated and killed. His body was found two days after in a ditch, and was only recognizable by the long beard and nails, never cut after the defeat at Morat. His remains, at first buried at Nancy, were removed by Charles V. to Bruges. A new "History of Charles the Bold," by J. F. Kirk, has lately been published.

CHARLES I., king of Naples and Sicily, was born in 1220. He was son of Louis VIII. of France, and was made count of Anjou. By marriage with the daughter of Raymond Berenger, count of Provence, he became heir to his dominions. He accompanied his brother St Louis on the crusade, and was taken prisoner at Damietta. He was crowned king of Sicily at Rome, in

removed to Holy-land, his former exile. In a twelvemonth, Austrian dominion, year, at Goritz, the latter years of his acts of superintendency were bitterly hated much, and himself, as a pensioner, an absolute Duke of Anjou, his sons.

THE RASHI, last son of Philip the Bold. He was born first the title of which he distinguished occasions and in 1465. In 1467, and was the people of Liège, treated with savage cruelty. He received an XI. not to invade a memorable incursion. A fresh rising at the conference, whom Charles, in course, shut up and compelled to suppress the rebellion and sneaked away. In 1474, he had and added his return to England. The war with France, hoping to king and wear the terms could not ally himself king of France. He prevented his full conquest of Lor-1473, and then, who won two him at Granson, heless melancholy analyzed him. He was of the loss of it. During the deserted with his the battle which day, 5th January, and killed. A few days after in a battle by the long after the defeat at buried at Namur. V. to Bruges, the Bold," by published. Charles and Sicily, the son of Louis made count of the daughter of of Provence, he was. He accompanied the crusade, Damietta. He died at Rome, in

1566, and soon after defeated Manfred at Benevento. His tyranny provoked a revolt, at the head of which was Conradin, nephew of Manfred, who was defeated and immediately beheaded. Charles became more and more cruel and oppressive in his rule, and disaffection and hatred increased; till at length, when he was meditating the conquest of the eastern empire, a general revolt of his subjects took place in 1281, and the French in Sicily were massacred. This event is known as the *Sicilian Vespers*. He fought for his throne for several years, and died in 1285.

CHARLES XII., king of Sweden, son and successor of Charles XI., was only 15 years of age when he ascended the throne in 1697, and his youth encouraged Russia, Denmark, and Poland to unite against him. Those powers, however, found him fully equal to the task of humbling them. Denmark being subdued, he attacked Russia; and in the famous battle of Narva, in 1700, he is said to have slain 30,000 of the enemy, besides making 20,000 prisoners, though his own force was short of 10,000. Poland next felt his power; he dethroned Augustus, and made Stanislaus king in his stead. Thus far his whole course had been prosperous; but in seeking utterly to crush Peter the Great, he sustained a terrible defeat at the battle of Pultowa, and was himself so severely wounded, that he was removed from the field on a litter, and compelled to seek shelter in Turkey. Here his conduct was so violent that the grand signior was compelled to besiege his residence. After desperate resistance Charles was overpowered, and for ten months he was kept a prisoner. He no sooner was allowed to return to his own dominions than he commenced an attack on Norway, and in besieging Frederickshall was killed by a cannon-shot, in 1718. Voltaire's "Histoire de Charles XII." is a model of clear, precise, and graphic narration: "a fine-engraving on a reduced scale," says Carlyle, "of that Swede, and his mad life."

CHARLES XIV., king of Sweden. [BERNADOTTE.]

CHARLES ALBERT, king of Sardinia, son of Carlo Emanuele, prince of Carignano, was born 2nd Oct., 1798. At his birth he had but little chance of ever swaying the sceptre, for there were seven male heirs of the house of Savoy, through whom the crown might have descended. His early life was consequently passed in comparative insignificance, and his name was but slightly known to Europe until the revolution of 1821, which broke out in support of the so-called Spanish Constitution of 1812, compelled King Vittorio Emanuele to abdicate in favour of his brother, and led to Charles Albert's nomination as regent of the kingdom. Charles Albert, who had all along been in the secrets of the conspirators, took measures to carry out their designs; but the duke of Geneva, in whose favour King Vittorio had resigned the crown, having refused to sanction the proceedings of the new government, and having taken instant measures to put down the insurgents, Charles Albert fled to Novara, and deserted and betrayed the party with whom he had co-operated. Renouncing the opinions he

had adopted, he acted as a volunteer in 1823, in Spain, under the duke d'Angoulême, and there lent his aid to crush the constitution, the principles of which he had so lately attempted to establish in Sardinia. On his return to Turin he remained in retirement until the death of Carlo Felice led to his accession to the throne, 27th April, 1831. During the first 17 years of his reign few events occurred to give a clear insight into the natural bent of his mind; but in March, 1849, after the Milanese had driven out the Austrians from Northern Italy, he a second time unfurled the revolutionary banner, and in a proclamation to the "people of Lombardy and Venice," espoused the cause of Italian regeneration against Austria. His arms were at first crowned with success; but the Austrian field-marshal Radetzky having regained step by step the positions he had lost, at length compelled the Sardinian forces to evacuate Milan in August of the same year, and in September an armistice was signed by the contending parties. In March, 1849, Charles Albert was forced, by the clamours of his subjects, to renew the war with Austria. But the Sardinian army was defeated at all points by Marshal Radetzky in the shortest campaign on record, four days; and immediately afterwards, on the 24th of March, Charles Albert abdicated the throne in favour of his eldest son, Victor Emmanuel II., now king of Italy, and precipitately leaving Turin, took up his residence at Oporto, where he died, as it is alleged, of a broken heart, July 18th, 1849.

CHARLES, LOUIS DE LOURRAINE, archduke of Austria, a distinguished military commander, son of the emperor Leopold II., and younger brother of Francis II., was born 1771. He first entered on the career of arms under Prince Coburg in 1793; and his great abilities, not less than his exalted rank, rapidly procured his elevation in command. After the battle of Nerwinden, which restored that rich province to the imperial power, he was appointed governor of the Low Countries, and was soon after created a field-marshal. In 1796 he was promoted to the command of the imperial armies on the Rhine, gained some advantages over the republican generals Jourdan and Moreau, whom he compelled to retire across the Rhine; took Kehl in 1797; subsequently commanded in Italy against Buonaparte and Massena; long disputed victory at Caldiero, Eckmühl, and Essling; but lost the decisive battle of Wagram, where he was wounded. After this event he lived in retirement, during which he wrote a luminous and impartial narrative of his campaigns, and enriched military science with the profound views set forth in his "Principles of Strategy." Died, 1847.

CHARLES I., king of England, was born at Dunfermline, in Scotland, in the year 1600. He was the third son of James VI. of Scotland and I. of England, by Anne, daughter of the king of Denmark; and upon the death of Prince Henry, his elder brother, in 1612, was created prince of Wales. A negotiation having been long carried on for the marriage of Charles with the Infanta of Spain, he went in 1623,

attended by the profligate minister Buckingham, to conclude it in person. But the affair came to an end. On the death of his father, in 1625, he ascended the throne, his kingdom being engaged in war with Spain, and the people much embittered against his friend and minister, Buckingham. Immediately after his accession Charles married the Princess Henrietta Maria of France, whose character and influence undoubtedly augmented the troubles and evils of the time. It unfortunately happened for Charles I. that he had as high and exacting a notion of the royal prerogative as either his father or Elizabeth, while he had to deal with an entirely different state of public opinion. From the very first, therefore, he found himself in sharp collision with his subjects: his aim being to rule as an absolute monarch, to hold the purse and the army, and do as he liked with them, and their aim being to prevent all that. Want of supplies on his part, calling of parliaments to grant them, refusal of supplies, and demand of redress of grievances and more just administration, dissolution of parliaments, government without them, and all kinds of illegal and tyrannous measures, no man's life or property being secure,—such are the main elements of the conflict which filled up the years preceding the outbreak of actual war. The parliament impeached Buckingham, and the king supported him; war with France was declared, against the popular wish, because Buckingham so willed it; and while the parliament was firm in its resistance, the king was obstinate and impolitic in his enforcement and extension of his prerogative. The third parliament, called in 1628, passed the famous Petition of Right, to which the king most reluctantly and indeed insincerely gave his assent. After the murder of Buckingham the chief advisers and willing instruments of the king were Laud, then bishop of London, and Sir Thomas Wentworth, afterwards earl of Strafford. Ship money was levied, and the legality of it contested by Hampden. The Star Chamber was active, unwearied in its merciless prosecutions, edicts, and atrocious sentences. In Nov. 1640 the memorable Long Parliament met, and at once secured itself against dissolution except by its own consent. The struggle went on, and at length war was proclaimed by the king, setting up his standard at Nottingham in August, 1642. The first battle between the king's forces and the parliamentary army was at Edgehill, in which neither party had much to boast of. For some time, however, the royalists were generally successful; but the battles of Marston Moor, Newbury, and Naseby were all signally unfavourable to the royal cause. Indeed, after the defeat at Naseby, the king was so powerless, that he took the resolution of throwing himself upon the good feeling of the Scottish army, then lying before Newark; and by that army he was barely sold, and delivered into the hands of the parliament. All attempts to treat between the king and the parliament failed, chiefly from the evident insincerity of the king. It was impossible to rely on his word. For a time he was treated with much outward

respect, but he found means to make his escape from Hampton Court. On arriving on the coast, with the intention of quitting the kingdom, he could not obtain a vessel to go abroad, but crossed over to the Isle of Wight, where the governor, Hammond, confined him in Carisbrook Castle. While there, negotiations were again carried on between him and the parliament, but unsuccessfully. In Dec. 1648 the House of Commons was "purged" by Colonel Pride, the members left forming the "Rump." It was then resolved by the Commons that the king should be tried as guilty of treason in making war on his parliament, and a special high court of justice was constituted for the occasion. The trial took place in Westminster Hall in January, 1649. The king was condemned to death, and on the 30th of January beheaded at Whitehall; his last word to Bishop Juxon being a charge to him to admonish Prince Charles to forgive his father's murderers.

CHARLES II., king of England, son of Charles I., was born in 1630. He was living as a refugee at the Hague when the sentence on his father was carried into execution. He, nevertheless, assumed the royal title, and finding that the Scots had proclaimed him, he left the Hague for Scotland, and was crowned at Seone. Cromwell marched towards Scotland to give him battle, and Charles took the spirited course of passing by forced marches into England. Cromwell, however, whose force was superior, discovering the manœuvre, retrograded in pursuit; and the royal army was overtaken at Worcester, and utterly routed. After difficulties and escapes which have rather the air of romance than of stern matter of fact, Charles escaped to France, where he resided for some years, keeping up the mimicry of a court, but frequently reduced to extreme distress. The death of Cromwell, the general discontent of the people with the narrow-minded bigotry which had thrown a gloom over the whole land, and the dexterous policy of General Monk, restored Charles to his crown and kingdom in 1660; and he reigned with a power far greater than that for which he had been put to death. Untaught by adversity, he was luxurious, selfish, and indolent. The English Nonconformists were treated with jealous rigour, and the Scottish Covenanters were shot and sabred without compunction. And, perhaps, Charles's reply to some complaints made to him of Lauderdale's cruelty in Scotland, will give quite as full a clue to his kingly character as can be required:—"I perceive," said Charles, "that Lauderdale has been guilty of many bad things against the people of Scotland; but I cannot find that he has acted against my interest." Died, 1685. During this monarch's reign, the capital was visited by heavy calamities; the plague in 1665, and the fire of London in the following year; while pretended plots and conspiracies were made pretexs for bringing some eminent persons, who were obnoxious to the court, to an ignominious death. As to the character of Charles II., he was, in the fullest acceptance of the terms, a sensualist and voluptuary; encouraging, by his example, a

taste for dissolute living, and thus poisoning the moral health of society; and though he preserved a degree of popularity with the multitude, from the agreeableness of his manners, yet he was totally destitute of noble sentiments.

CHARLES EDWARD STUART, called the Young Pretender, the grandson of James II., was born at Inverness, in 1721. In 1745 he landed in Scotland, and published a manifesto exhibiting the claims of his father to the English throne. He was joined by some of the Highlanders, and on entering Edinburgh, he caused his father to be proclaimed; on which General Cope hastened towards the capital, but was attacked by the Pretender at Preston Pans, and defeated. Instead of making a proper use of this victory, by advancing into England, Charles returned to Edinburgh, wasting his time in an idle parade of royalty. Afterwards, on being joined by Lords Kilmarnock, Cromarty, Balmerino, and other discontented chiefs, he marched as far as Derby; but hearing that the king was about to take the field, he returned to Scotland, where he defeated the English forces, under Hawley, at Falkirk. In the mean time the duke of Cumberland advanced to Edinburgh, and from thence to Aberdeen, the Pretender retreating before him. At last the two armies met at Culloden, April 27, 1746, when, after an obstinate conflict, in which the Highlanders displayed prodigious courage, the rebel army was signally defeated, and entirely dispersed. Charles, after wandering about in different disguises, chiefly among the Hebrides, effected his escape to France. He died at Florence in 1788.

CHARLETON, WALTER, an English physician, born in Somersetshire, 1619. He was appointed physician to Charles I., resided abroad with Charles II., and returned with him at the restoration. He was admitted F.R.S., and elected president of the College of Physicians. His writings, in natural history, medicine, theology, and natural philosophy, are very numerous and learned, especially his "Onomasticon Zoicon" and "Chorea Gigantum;" the former a classified arrangement of animals, the latter an essay on Stonehenge. Died, 1707.

CHAILEVOIX, PIERRE FRANÇOIS XAVIER, a French Jesuit, and for some time a missionary in America. On his return, he became conductor of the Journal de Trevoux. In addition to his numerous contributions to that work, he wrote "Histoire Générale de Parangay," "Histoire Générale de la Nouvelle France," &c. Died, 1761.

CHARLOTTE AUGUSTA, daughter of George, prince of Wales, and the unfortunate Princess Caroline (afterwards George IV. and Queen Caroline), was born Jan. 7, 1796, and married to Prince Leopold of Coburg (afterwards king of Belgium), May 2, 1816. From her earliest years she gave strong indications of nobleness of mind and great capacity; and as she grew up, a feeling of sincere and ardent attachment for her on the part of the people was universally displayed. She was not merely accomplished according to the common acceptation of the term, but was well acquainted with history, statistics, and

other more abstruse branches of knowledge; spoke several modern languages, and excelled in music, painting, &c.; while her active benevolence and solicitude for the poor rendered her an object of their especial regard. Her marriage with Prince Leopold was the result of mutual esteem. But the hopes of the nation, and the anxious wishes of the husband, were suddenly blighted: on the 5th of Nov. 1817, the princess was delivered of a still-born child; and, in a few hours after, she was seized with convulsions and expired. Never before, perhaps, was national and individual sorrow so strikingly or so sincerely expressed, and never, perhaps, was it more deservedly bestowed. The unhappy dissensions of her royal parents, and the vicious blights of courtly parasites, were strikingly contrasted at Claremont with conjugal affection and the pure pleasures of a virtuous life. No wonder, then, that the people should have looked forward to her reign with delight; nor can it be a matter of surprise that their grief should have been intense when thus bereft of "England's hope."

CHARNOCK, JOHN, an English naval officer and miscellaneous writer; author of a "History of Marine Architecture," "Biographia Navalis," a "Supplement to Campbell's Lives of the Admirals," &c. Died, 1807.

CHARNOCK, STEPHEN, a Nonconformist divine. He was a very eloquent and popular preacher, and advocated Calvinistical doctrines with great force and originality. His "Discourse on Providence" is considered the best of his writings. Died, 1680.

CHARONDAS, an early Greek legislator, who probably flourished in the 6th century B. C. He was a native of Catania, and gave laws to his fellow-countrymen there and in other cities of Sicily and south Italy. It is supposed that his laws were in verse. Charondas is related to have killed himself for having broken one of his own laws, which forbade any one to enter the popular assembly in arms.

CHARON, PIERRE, a French divine, and a friend of Montaigne, who, by will, left him the privilege of bearing his arms; a strong proof, considering the pride of a Gascon, of his personal consideration. His chief works are "Traité des trois Verités," an argument in behalf of religion, Christianity, and the Catholic Church; and "Traité de la Sagesse," which has been frequently reprinted. Born, 1541; died, 1603.

CHASSE, DAVID HENRY, Baron, a brave Dutch general, was born in 1765. After serving a few years in the army he entered the service of France, distinguished himself in the Prussian campaign of 1806, and in many campaigns of the Peninsular war. His most celebrated achievement however was his defence of Antwerp against the French in 1832. He had been governor of the city from 1815. Died, 1849.

CHASSENEUX, BARTHELEMI DE, an eminent French lawyer; author of "Catalogus Gloriae Mundi," "Consilia, or Consultations on Points of Law," &c. It is greatly to his honour that he used all his power as president of the parliament of Provence to

delay the decree issued by that body against the Vandois of Méridol and Cabrières. Indeed, it was suspected that his humanity caused the Catholics to hasten his end by poison. Died, 1541.

CHASTELET, JOHANN GABRIEL, Marquis du, a distinguished Austrian general, born at Mons in 1763. He entered the army early, and served under the prince of Coburg, and soon after in the Russian army against the Turks. He was employed as engineer at Namur and Lille in 1792, assisted at several other sieges, and especially distinguished himself at Wuttignies, where he received eight bayonet wounds. He took part in the battles of Charleroi and Fleurus, at the defence of Liège, and at the taking of the French lines before Metz in 1795. He assisted in the partition of Poland, and in the settlement of the boundaries of Austria and the Cisalpine Republic; served in the Italian campaign of 1799, and was wounded at the siege of Alessandria. He took afterwards a leading part in organizing and conducting the insurrection of the Tyrol. In 1814 he was made governor of Venice, and died, 1815.

CHASTELET, GABRIELLE EMILIE DE BRETEUIL, Marquise du, was born at Paris, and early became distinguished by her scientific attainments. She published in 1740 "Institutions de Physique," with an analysis of the Philosophy of Leibnitz, and subsequently she translated the Principia of Newton. The name of Madame du Chastelet has been chiefly celebrated on account of her liaison with Voltaire. [See **VOLTAIRE**] Born, 1706; died, 1749.

CHATEAUBRIAND, FRANÇOIS AUGUSTE, Viscount de, whose chequered career and numerous productions gained him a prominent place in the history of his time, was born at St Malo, in 1769, the year that witnessed the birth of Napoleon, Mehemet Ali, and Arthur Wellesley. After pursuing his studies at Dol and Rennes, in his 17th year he joined the regiment of Navarre as sub-lieutenant, and repaired to Paris. On the eve of the meeting of the states-general in 1789, animated by a love of adventure, he went to America. Here he spent two years amid the wild grandeur of savage life, "the world forgetting, by the world forgot," when accident threw into his hands a journal which revealed to him the great events which three years had sufficed to bring about in his native country. He at once returned to take part in the great conflict. Wounded at the siege of Thionville in 1792, he was conveyed in a feeble state to Jersey; and after a partial recovery he sailed for England, where he suffered great privations, which a few translations, and, as he subsequently made known, the timely aid of the Literary Fund Society, mitigated rather than relieved. Here he published his first work, entitled "Essai Historique et Politique sur les Révolutions Anciennes et Modernes," 1797. After the 18th Brumaire he returned to France, and contributed to the *Mercur*. His "Atala" appeared in 1801; and was followed in 1802 by his most celebrated work, the "Génie du Christianisme," which became a household word through the Christian

world. Soon afterwards he was appointed by Napoleon secretary to the French embassy at Rome. In March, 1804, he was nominated minister plenipotentiary to Switzerland; but he resigned on learning the melancholy fate of the Duke d'Enghien, and resisted all the overtures which Napoleon subsequently made to him. For a long time he had meditated a grand poetic work founded on the great events of Christianity; and to qualify himself for this undertaking, he visited in 1806 the great scenes of Bible history, and on his return in 1807 he published "Les Martyrs," and four years later his "Itinéraire de Paris à Jérusalem." In 1814, Chateaubriand hailed the restoration in a brochure, entitled "Bonaparte et les Bourbons." At Ghent he was considered one of the ministers of Louis XVIII.; in 1815 he was created a peer of France, and the following year he became a member of the Institute. "La Monarchie selon la Charte," which he published the same year, threw him for some years into discredit with the court; but in 1820 the highest state appointments once more lay open to him, and he became successively ambassador at Berlin in 1820, and at London in 1822, and the same year minister of foreign affairs in the Villèle ministry, when he organized the invasion of Spain under the duke d'Angoulême, and took part in the Congress of Verona, the history of which he afterwards wrote. In 1824, being summarily dismissed from office, he took refuge in the columns of the *Journal des Débats*, where he vigorously attacked his former colleagues; and on their fall in 1828, he was sent as ambassador to Rome, but resigned his office in 1829, on the formation of the Polignac administration. On the news of the outbreak of the revolution of 1830, he hastened to Paris, where he was hailed with acclamation by the people, but after delivering a glowing oration in favour of the duke of Bordeaux, he retired from the Chamber of Peers, never to enter it again. From this period he personally took leave of politics; but he continued to send forth from time to time pamphlets on the government of Louis Philippe, conceived in so bitter and violent a spirit, that he became an object of suspicion to the ministry, and was summarily arrested, but soon discharged. His last years were spent in domestic privacy, cheered by the sympathy of "troops of friends," who looked up to him with respect bordering on veneration; and he expired almost at the moment when some of the most terrible scenes of his early life were renewed in the streets of Paris. Besides the works above mentioned, Chateaubriand wrote "Etudes Historiques," "Essai sur la Littérature Anglaise" (a poor production), and many others, including numerous pamphlets upon historical subjects and the politics of the day. A splendid edition of his collected works was published at Paris in 1826, for which he received £25,000. His "Mémoires," to which great importance was attached during his lifetime, have been published since his death; but even the events of his chequered career, set forth with all the gracefulness of his fluent pen and the fervour of

his glowing imagination, lose much of their interest from the overweening vanity which peers through every page, and which has converted that which might have been a grand "pièce justificatif" of a life, as remarkable for political changes as the era in which it was passed, into a theme for the regret of the thoughtful, and the satire of the scornful. Died, July 4, 1848.

CHATEL, FRANCIS DU, a Flemish painter of the 17th century. His chief work, which is in the town-hall of Ghent, represents the king of Spain receiving the oath of fidelity from the states of Flanders and Brabant.

CHATEL, PIERRE DU. [DUCHATEL.] CHATEL, TANNEGY DU, an able French general. He was in the famous battle of Agincourt; and when the Burgundians surprised Paris, he was fortunate enough to save the dauphin, between whom and the duke of Burgundy he afterwards brought about a reconciliation. Died, 1449.

CHATHAM, WILLIAM PITT, Earl of, one of the most illustrious British statesmen, was the son of Robert Pitt, Esq., of Bocconock, in Cornwall, where he was born in 1708. After studying at Eton and Oxford, he entered the army, but was returned to parliament in 1734 as member for Old Sarum. His talents as an orator were soon displayed in opposition to Sir Robert Walpole, and had so great an effect, that the duchess of Marlborough, who had a deadly hatred to that minister, bequeathed to Mr Pitt a legacy of £10,000. On the change of administration in 1746, he was made joint vice-treasurer of Ireland, and soon afterwards paymaster-general of the army, which place he resigned in 1755; but the year following he was appointed secretary of state. In a few months he was again dismissed from office; but an efficient administration being essential, and the nation being enthusiastically attached to him, he returned, in June, 1757, to his former situation as secretary of state and virtual prime minister. His great mind now revealed its full force, and his ascendancy was complete over parliament no less than in the ministry. He aroused the English nation to new activity, and, in the space of a few years, we recovered our superiority over France, annihilating her navy, and stripping her of her colonies. France was beaten in the four quarters of the world. In 1760, he advised the declaration of war against Spain, while she was unprepared for resistance, as he foresaw that she would assist France. The elevation of England on the ruins of the house of Bourbon was the great object of his policy. But his plans were suddenly interrupted by the death of George II., whose successor was prejudiced against Pitt by his adversary, the earl of Bute, a statesman of limited views. Pitt, therefore, resigned his post in 1761, only retaining his seat in the House of Commons. Foreseeing the separation of the American colonies from the mother country, if the arbitrary measures then adopted should be continued, he advocated, especially in 1766, a conciliatory policy, and the repeal of the stamp act. In the same year he was invited to assist in forming a new ministry, in which he took the office of privy seal,

and was created Viscount Burton, Baron Pynsent, and earl of Chatham; but in 1768 he resigned, partly because of a serious illness, and partly because he found himself inadequately seconded by his colleagues. In the House of Lords he continued to recommend the abandonment of the coercive measures employed against America, particularly in 1774; but his warning was rejected, and, in 1776, the colonies declared themselves independent. He still, however, laboured in the cause, and used all his efforts to induce the government to effect a reconciliation with the American states; and, as he was speaking with his accustomed energy on the subject in the House of Lords, April 7, 1778, he fell down in a convulsive fit. He died on the 11th of the following month, and his body, after lying in state, was solemnly interred in Westminster Abbey, where a superb monument was erected to his memory at the national expense. The fine picture of the "Death of Chatham," painted by Copley in 1779-80, was presented to the National Gallery in 1828.

CHATHAM, JOHN, Earl of, &c., eldest son of the celebrated statesman whose life we have just given, and brother of William Pitt. He was born in 1756, and succeeded to the peerage on the death of his father, in 1778. In the following year he was appointed captain of the 86th regiment of foot, and served in the American war. He was afterwards appointed by his brother (then prime minister) first lord of the admiralty; was sworn a privy-councillor, and elected a knight of the Garter. His promotions, both civil and military, were rapid and numerous under his brother's administration, and he continued to hold office for many years after, under his successors. As lieutenant-general, he commanded the unfortunate expedition to Walcheren, in 1809, and was, three years afterwards, raised to the full rank of general. On the death of the duke of Kent he was appointed governor of Gibraltar, which he held, with other offices, to the time of his death, in 1855. He was the last peer of the Pitt family, whose title has now become extinct, and with it the annual pension of £4000, besides another pension of £3000 per annum, granted to his father for three lives, in 1761. The last earl was married, in 1783, to a daughter of Viscount Sydney, but they had no children.

CHATTERTON, THOMAS, an English poet, whose precocious genius and melancholy fate have gained him much celebrity, was born at Bristol, in 1732. He was educated at Colston's charity school, and then articled to a lawyer; but his taste for literature and distaste for law rapidly grew, and he was set free after serving about half his time. His father was sexton of Redcliff church, Bristol; and young Chatterton professed to have received from him several ancient manuscripts. These he palmed upon the world as the poems of Rowley, a priest of Bristol in the 15th century; and so admirably was his forgery executed, that it is even now rather assumed than proved, though there can be little moral doubt of it, that he did forge and not find the MSS. In 1769, he went to London, trusting to literature for a live-

lihood. Having vainly endeavoured to persuade Horace Walpole and other scholars of the genuineness of the MSS., Chatterton, though still a mere boy, became a party writer; but this resource failed him, and in a state of deep despondency, produced by absolute want, he destroyed himself by poison, in 1770, at the age of 18.

CHAUCER, GEOFFREY, the great early English poet, was born at London, in 1328. He was educated at the universities of Oxford and Cambridge, studied law for a short time, and became one of the pages of Edward III. He gained the favour of the king, and of his son, John of Gaunt, duke of Lancaster, was employed on various affairs of state, and sent ambassador to Genoa, Milan, and France. He served in the expedition to France, in 1359, and was made prisoner. He afterwards fell into disgrace, probably as a friend of John of Gaunt and of Wickliffe, and for some time he was in great poverty. He had a pension from the crown, which was doubled by Henry IV., and he spent the last years of his life in rural retirement. Chaucer is called the "Father of English poetry," and not undeservedly so. But his rare charms and excellencies as a poet are obscured to modern readers who will not be at the pains to master the difficulty of an antiquated form of our language. His principal poem is the "Canterbury Tales," supposed to be told by a party of Canterbury pilgrims on their way. Among his other works are "Troilus and Cressida," "Legend of Good Women," "The Flower and the Leaf," "The Court of Love," &c. Died, at London, 1400. Chaucer's only daughter, Alice, married William de la Pole, duke of Suffolk, and his eldest son, Thomas, was knighted, and held important offices in the state under Henry IV. and Henry V.

CHAUDET, ANTOINE DENIS, an eminent French sculptor and painter. He was born at Paris, 1763, and having obtained the grand prize, studied at Rome. He became professor at the Academies of Painting and Sculpture, and a member of the Institute. Among his works are a colossal "Minerva pointing to the Crown of Immortality," statues of Oedipus, Cincinnatus, Napoleon, &c., and a painting of "Aeneas and Anchises amid the conflagration of Troy." Died, 1810.

CHAULIEU, GUILLAUME AMFREY DE, French lyric poet. His poems, which, with those of the Marquis de la Fare, have been frequently reprinted, are a mixture of Anacreontic sensualism, and the good-humoured philosophy of Horace. Born, 1639; died, 1720.

CHAULNES, ALBERT, Duke de, a French nobleman and man of science. He was well skilled in chemistry, and contributed many valuable papers to the Memoirs of the Royal Academy of Sciences. Died, 1769.

CHAUMETTE, PIERRE GASPARD, one of the most violent and vulgar of the French revolutionists. He was of low origin, and after serving some time on board ship, became clerk to an attorney. At the breaking out of the revolution he became one of the street orators, and was so conspicuous by his violence, that, in 1792, he was made first a member of the municipality of Paris,

and then procureur, or attorney. When the Mountain party, in 1793, wished to overthrow the more moderate Girondists, Chaumette was one of the chief instruments of doing so, and was in consequence extremely popular. During the confinement of the unfortunate Louis XVI. in the Temple, Chaumette and Hébert heaped every indignity upon him; and with them, it is said, originated the most horrible of all the charges made against the queen. He at length met his reward. Robespierre, himself already on the very verge of ruin, threw him into the prison of the Luxembourg, and he was guillotined in 1794.

CHAUNCEY, Sir HENRY, an English lawyer and antiquary. He was knighted by Charles II. in 1681, and in 1688 was made a Welsh judge. Just before his death he published the "Historical Antiquities of Hertfordshire," one of the most valuable of our county histories. Died, 1700.

CHAUSSE, MICHEL MARIE DE LA, a French archaeological writer; author of a learned work entitled, "Museum Romanum," "Pittura antiche delle grotte di Roma," &c. Died, 1710.

CHEKE, Sir JOHN, an eminent English statesman and scholar. Becoming regius professor of Greek at Cambridge, he strenuously laboured to improve the prevailing pronunciation of that language; and the opposition he met with from Gardiner, bishop of Winchester, produced a literary correspondence between them, which was afterwards published at Bnsie. Having taken part in the education of Edward VI., that king, on his accession, granted him some landed estates. He also made him a privy councillor and secretary of state, and conferred the honour of knighthood upon him. Unfortunately for him he engaged, on the death of Edward VI., in the cause of Lady Jane Grey, and was consequently sent to the Tower on the accession of Mary. His life was spared, and he was allowed to leave England; but while he was abroad he gave some new offence to the queen, and his estates were confiscated. Visiting Brussels he was seized by order of Philip II. and sent to England, where, under fear of being put to death, he renounced Protestantism. Having done this, the queen, though she did not restore his estates, gave him some equivalent for them; but she embittered them by compelling him to sit on the bench at the trial of Protestants whose attachment to their faith was stronger than their fears of death. Besides his correspondence with Gardiner, he wrote and translated several treatises. He also left in MS. an English translation of St Matthew, in which no word was admitted of other than Saxon origin. Born, 1514; died, 1557.

CHEMNITZ, MARTIN, a distinguished German theologian, was born in Brandenburg, in 1522. He became a disciple of Melancthon, at Wittenberg, and was for a few years librarian at Duke Albert of Prussia. He settled as pastor at Brunswick, in 1554, and was afterwards made superintendent of the churches of that diocese. He took a leading part in procuring the adoption of the "Formula of Concord" in Saxony and

Suabia among the works of "ai," in and dis doctriin Evangr precip

t Brunswick, in 1551,
de superintendent of
diocese. He took a
ring the adoption of
ord" in Saxony and

Suabia. Chernitz was in great honour
among the princes of Germany for his abili-
ties, learning, and character. His principal
works are the "Examen Concilii Tridentini,"
in 4 vols. folio, esteemed as a solid and
dispassionate refutation of the Catholic
doctrines, "Loel Theologicus," "Harmonia
Evangelica," and "Theologicæ Jesuitarum
præcipua capita," &c. Died, 1586.

CHEMINIZER, IVAN IVANOVICH, a Rus-
sian soldier and poet. He served several
campaigns in the imperial guards, and
afterwards entered the corps of engineers.
When he at length retired he published
various tales and fables, which the Russian
critics compare to those of La Fontaine.
Born, 1741; died, 1784.

CHENEVIX, RICHARD, an Irish gentle-
man of great and versatile ability as a
writer; author of "Remarks on Chemical
Nomenclature according to the System of
the French Neologists," "Observations on
Mineralogical Systems," &c. Died, 1830.

CHENIER, MARIE JOSEPH, a French
poet and miscellaneous writer; author of
"Charles IX.," "The Death of Calas,"
"Timoleon," and some other dramas; of
several patriotic songs, which were very
popular during the revolution, and of "An
Historical Sketch of the State and Progress
of French Literature." He was member of
the Convention, Legislative Assembly, and
Council of Five Hundred, and survived all
the horrors of the "Reign of Terror," retain-
ing his popularity under the directorial, the
consular, and the imperial governments.
He died in 1811.—His elder brother, AN-
DRÉ MARIE, born 1762, perished by the
guillotine, July 25, 1794, for his staunch ad-
herence to Louis XVI. Twenty-five years
after his death a volume of odes, idyls, and
elegiacs from his pen was published, which
place him high in the list of French poets.

CHERUBINI, MARIA LUIGI CARLO ZE-
NOBI SALVADOR, a distinguished musical
composer, was born at Florence in 1760.
His precocious skill in music attracted the
attention of the grand duke of Tuscany,
who gave him a pension, and this enabled
him to complete his studies under Sarti,
whom he afterwards assisted in his com-
positions. In 1784 he repaired to London,
where he produced the "Finta Principessa"
and "Giallo Sabino." In 1786 he settled in
Paris, which thenceforward became his
adopted country; and the scene of his greatest
triumphs. His operas of "Iphigenia," "Lo-
doiska," "All Baba" would alone have
testified to the extent and variety of his
powers; but his fame chiefly rests upon his
sacred music, of which his "Requiem," com-
posed for his own obsequies, deserves par-
ticular notice. He was director of the
"Conseratoire at Paris, where he died, full of
years and honours, 1842.

CHESELDEN, WILLIAM, an eminent
English surgeon and anatomist; author of
a treatise on "The Anatomy of the Human
Body," which passed through many editions,
a treatise "On the High Operation for the
Stone," "Osteography, or Anatomy of the
Bones," &c. He was an admirable oculist;
and though his system of lithotomy involved
him in much controversy, it is undoubted

that he very greatly improved the means of
relieving one of the most terrible complaints
to which we are subject. Cheselden was
elected F.R.S. in 1712. He was born in 1688,
and died, 1752.

CHESTERFIELD, PHILIP DORMER
STANHOPE, Earl of, was born in 1694, and
educated at Trinity College, Cambridge. He
went the grand tour, and acquired the
taste and habits of a gambler: first sat in
parliament as a member for Lostwithiel; and
in 1726, on his father's death, succeeded to
the earldom of Chesterfield. He was a par-
ticular favourite of George II., on whose
accession he was sworn a privy councillor;
was appointed, in 1728, ambassador extraor-
dinary to Holland; made a knight of the
Garter in 1730, and was appointed steward of
the household. The latter office he soon
after resigned, and he continued for several
years the strenuous opponent of Sir R. Wal-
pole, distinguishing himself by his writ-
ings in the "Craftsman," as well as by his
powerful eloquence in the House. In 1745
the government once more availed itself
of his talents, but to remove him from court,
where he had lost favour, he was sent to Ire-
land as lord-lieutenant, where he continued
a year, exercising his power in a manner
calculated to gain the approbation of the
people. He was afterwards secretary of state,
but deafness and declining health induced
him to relinquish office in 1748. Lord Ches-
terfield was a man of brilliant accomplish-
ments, but thoroughly vain, ambitious, and
intriguing. He wrote some papers in the
World, and several poetical pieces, but he is
principally known as the author of "Letters
to his Son," which are more to be com-
mended for their good sense, knowledge of
the world, and pleasant style, than for their
morality. Chesterfield's haughty assump-
tion of the part of great patron towards Dr
Johnson provoked the famous letter prefixed
to the first edition of the Dictionary, "The
Blast of Doom, proclaiming that Patronage
should be no more." Died, 1773.

CHETHAM, HUMPHREY, a wealthy mer-
chant of Manchester, born 1580, to whose
munificence that town owes a college and
library. He left funds to purchase the col-
legiate church, which, being suppressed at
the Reformation, had become the property
of the Derby family. Mr Chetham's trust-
ees having purchased the college buildings
in 1654, the year after his death, removed
the scholars into them in 1656, and nine
years afterwards they obtained from Charles
II. a charter of incorporation. The college
was originally founded for the maintenance
and education of 40 poor boys: their num-
ber however has from time to time been in-
creased, and is now 100. A separate bequest
was made for the founding of the library,
and provision for its yearly increase. It
contains now above 20,000 volumes. Any
one resident in Manchester, or merely a
visitor, has free access, by merely writing
his name and address in a book for that pur-
pose. Another bequest by Chetham's will
was for the purchase of "Godly English
Books" to be chained upon reading desks in
the churches of Manchester, Bolton, and
three other townships. Died, 1653.

CHEVALIER, ANTOINE RODOLPHE DE, French orientalist and tutor to Princess, afterwards Queen, Elizabeth of England. At the death of Edward VI. he went to Germany, and subsequently to his native country, France: was professor of Hebrew at Strasburg and Geneva; but on the breaking out of the civil war in France, again sought England, where he was well received by his former pupil, the queen. When the war seemed to be terminated, he again went to France: but on the occasion of the massacre of St Bartholomew, he left France, intending again to seek shelter in England, but died at Guernsey. He was a good scholar, and published an excellent Hebrew grammar, an improved edition of the "Thesaurus Lingue Sanctæ" of Pagnini, &c. He had commenced a Bible in four languages, but did not live to finish it. Died, 1572.

CHENEYNE, GEORGE, an eminent physician and medical writer. He was born in Scotland, and was intended for the church, but preferring the profession of medicine, he pursued the necessary studies under Dr Pitcairn, and having taken his doctor's degree, settled in London. His first work was the "Theory of Fevers;" his next publication was a mathematical treatise, entitled "Fluxionum Methodus inversa," which procured him considerable reputation, and admission to the Royal Society. Too free an indulgence in the pleasures of the table having rendered him enormously corpulent as well as asthmatic, he resolved on strictly adhering to a milk and vegetable diet; and he experienced so much benefit from this course, that all his principal treatises urge it upon others. His chief works are "The English Malady, a Treatise on Nervous Disorders," "A Treatise on Gout," and an "Essay on Health and long Life." Died, 1743, aged 72.

CHIABRELLA, GABRIELLO, a celebrated lyric poet, sometimes called the Italian Pindar, was born at Savona, in 1552. His life was passed chiefly in studious retirement, and the composition of his voluminous works, among which are mentioned five epic poems, innumerable musical dramas,—the earliest specimens of the opera,—and three volumes of lyrical poems. On the latter his fame rests. He aimed at, and to a great extent succeeded in, catching the spirit of the odes of Pindar and Anacreon. Died, 1637.

CHIARI, PIETRO, an Italian ecclesiastic and poet of the 18th century. He was a rival of Goldoni, and his comedies attained considerable popularity. Those of Chiari were, however, much inferior to those of his rival. Died, 1788.

CHICHELEY, HENRY, archbishop of Canterbury, an able and accomplished scholar and statesman, was born at Higham Ferrers, about 1362. He was educated at Winchester and Oxford, devoting his attention especially to the civil and canon law. He rapidly rose to high place both in church and state. He was sent ambassador to the pope and to the court of France; was bishop of St David's in 1408; took a prominent part in the discussions at the famous

council of Pisa in 1410; was again ambassador to France the same year, and a third time on the accession of Henry V. in 1411. On his return he was made archbishop of Canterbury. The parliament having advised the king to appropriate some of the revenues of the church, the archbishop lent his influence to engage the young king in a war with France, and accompanied him through the memorable campaign of Agincourt. On the accession of the infant king, Henry VI., Chicheley became first privy councillor, and he wisely directed all his attention to church affairs, striving at once to check the progress of Wickliffism, and to moderate the claims of the papal court. In the expenditure of his revenue he was very liberal; he founded and endowed All Souls College, Oxford, made many important improvements in Lambeth Palace, and built the south-western tower of Canterbury Cathedral at his own expense. Died, 1433.

CHICHESTER, Earl of. [PELIAM, THOMAS.]

CHILD, Sir JOSIAH, bart., an eminent London merchant of the 17th century, and author of several works on subjects connected with political economy, among which may be noticed his "Discourse on Trade," &c. Born, 1630; died, 1699.

CHILD, WILLIAM, an English musical composer. He was for many years organist of St George's Chapel, Windsor, and of the Chapel Royal at Whitehall. The simple style of his compositions caused them to be neglected in his own time, but they are now much admired. Died, 1697.

CHILLINGWORTH, WILLIAM, an English divine and controversial writer, born at Oxford, 1602. He studied at the university, and early showed the propensity to disputation which characterized him through life. Lord Clarendon says of him, "he had extracted such irresolution, and such a habit of doubting, that at length he was confident of nothing." In this state of mind a Jesuit convinced him of the truth of the tenets of Romanism, and he went to the Jesuits' college at Douay. While there he meditated the publication of a vindication of his conversion to the Church of Rome, but Laud, then bishop of London, dissuaded him from his purpose. He subsequently returned to England, and not only became a Protestant again, but also wrote and published the celebrated treatise, entitled "The Religion of Protestants, a safe Way to Salvation." Some hesitation about signing the 39 Articles prevented him from obtaining preferment in the church; but he at length consented to sign, and became chancellor of Salisbury, &c. At the breaking out of the civil war, he warmly espoused the royal cause, and published a treatise on the "Unlawfulness of Resisting the Lawful Prince, although most Tyrannous, Impious, and Idolatrous." He accompanied Charles I. to the siege of Gloucester, and invented a machine, or rather imitated one described by ancient authors, for the attack of fortified places. He was taken prisoner at Arundel Castle, which surrendered to the parliamentarians under Sir William Waller, and at his own request was sent to Chiche-

CHLADNI, ERNST FLORENT FRIEDRICH, German natural philosopher, was born at Wittenberg in 1756. He applied himself to the investigation of the laws of sound, made important experiments on the vibration of metallic and glass plates of various forms, and invented two musical instruments, which he named *Euphonia* and *Clavicylinder*. He exhibited these in the principal cities of Europe, and gave lectures on his discoveries. In 1802 appeared his "Treatise on Acoustics," which was translated into French by order of Napoleon, to whom Chladni was presented in 1808. Chladni also occupied himself long with the study of acrotiles, on which he published a treatise in 1794. He was the first to recognize the cosmical character of these bodies, and the connection between them and fire-balls. Died at Breslau, 1827.

CHOISEUL, ETIENNE FRANÇOIS DE, Duke of, first minister to Louis XV. of France, was born in 1719. He entered the army early, and having attained a high rank, was appointed ambassador to Rome and Vienna, and honoured with a peerage. He then became minister of foreign affairs, to which station he was raised through the influence of Madame de Pompadour. Four years later, 1761, he became also minister of war, and soon after exchanged the portfolio of foreign affairs for that of the marine. He made many judicious reforms and alterations in the French army, increased the navy, and brought about the celebrated family compact. On the death of Madame de Pompadour, the duke of Choiseul gradually lost the royal favour, finding a determined enemy in the new mistress, Madame Du Barry. In 1770 he was dismissed from office, and exiled to one of his estates. Though recalled by Louis XVI., he did not again hold office. Died, 1785.

CHOPIN, FREDERIC, a great modern composer and pianoforte player, was born near Warsaw, 1810. Compelled to leave Poland in consequence of political convulsions, he played in public at Vienna and Munich in 1831, and soon afterwards repaired to Paris, where he continued to exercise his art till the revolution of 1848 drove him to England. He returned to Paris in 1849; but his constitution, which had never been robust, sunk under the rude changes of the preceding year, and he died in the autumn of 1849, leaving behind him a reputation, both as a player and a composer, which will not soon pass away. Every note of his music, whether in his concertos or sonatas, or his scherzi, ballades, polonoises, preludes, breathes an unmistakable nationality; and is marked by distinctness, expression, and elegance.

CHRISTIE, JAMES, the son of an eminent auctioneer in London, was distinguished for his critical taste in the fine arts, and his antiquarian knowledge. Though he followed his father's profession, he found time to give to the world some ingenious and valuable works, viz., an "Essay on the Ancient Greek Game invented by Palamedes," showing the origin of the game of chess; a "Disquisition upon Etruscan Vases;" an "Essay on the

Earliest Species of Idolatry," &c. Died, 1831.

CHRISTINA, queen of Sweden. She was the only child of the famous Gustavus Adolphus, whom she succeeded in 1632, being then only six years old. During her minority the kingdom was wisely governed by the chancellor Oxenstiern; and when she was crowned, in 1650, she formally declared her cousin, the count palatine Charles Gustavus, her successor. For four years she governed the kingdom with an evident desire to encourage learning and science; and at the end of that time, weary either of the task of governing, or of the personal restraint which royalty imposed on her, she abdicated in favour of her cousin, and proceeded to Rome, where she surrounded herself with learned men, and busied herself with learned pursuits. She also embraced Romanism, though it would seem that her moral conduct was such as to evince no great respect for religion of any kind. On this point it will suffice to say, that while at Paris, on one of the various occasions of her visiting that city, she had her equerry, an Italian, named Monaldeschi, murdered in her own residence, and almost in her own presence; a crime which seems to have had no other cause than the unfortunate equerry's indifference to the blandishments of his mistress. In 1660, the death of the king, her cousin, caused her to go once more to Sweden; but her change of religion, and the reports which had reached that country of her conduct elsewhere, had so disgusted her former subjects, that they resolutely refused to reinstate her in the sovereignty. Being threatened with the loss of her revenues as well as her crown, she consented to preserve the former by finally renouncing the latter; and she retired to Rome, where she died in 1689. Her Life was written by Archenholz and by Laconbe; and a new Memoir, by Henry Woodhead, has lately appeared (1864).

CHRISTOPHE, HENRY, a negro, one of the leaders of the insurgent slaves of St Domingo. He possessed considerable ability, but his courage was carried to ferocity. He successfully opposed the French, whose perfidious seizure of the negro chief, Toussaint Louverture, he amply revenged, and assumed the title of Henry I., king of Hayti; but he acted so despotically, that a conspiracy was formed against him; and Boyer, the successor of Petion, who had established a republic in the south of Domingo, was invited to take part with the discontented subjects of Christophe, and demanded his deposition. At length, finding that even his body-guard was no longer to be depended on, he shot himself through the heart, October 8th, 1820.

CHRYSIPPUS, a Stoic philosopher, was a native of Cilicia, and became a disciple of Cleanthes at Athens. He was an acute thinker and a voluminous writer, but was fond of paradoxes, with which his writing and discourse abounded. His aim, like that of Zeno, was to check the prevalent scepticism, and to show, in opposition to the doctrines of the Academy, that it is possible to know. Born, about 280, and died, 207, B.C.

CHRYSOLORAS, MANUEL, a learned Greek of Constantinople, who in the last

years of the 14th century was sent by the emperor John Paleologus to Europe, to seek aid against the Turks. He afterwards settled in Italy, and taught Greek at Florence, Venice, Pavia, and Rome; thus satisfying the new eager craving for acquaintance with classical literature, and contributing powerfully to its revival. He had a crowd of scholars, and many of them became men of note. He attended the famous council of Constance (that had John Huss burnt), and died there in 1415. He wrote a Greek Grammar, entitled "Erotemata," which passed through several editions.

CHRYSOSTOM, JOHN, St, patriarch of Constantinople, was called *Chrysostom*, which signifies "golden mouth," on account of his eloquence. He was born at Antioch about the middle of the 4th century, and was intended for the bar; but being deeply impressed with religious feelings, he spent several years in solitary retirement, studying and meditating with a view to the church. Having completed his voluntary probation, he returned to Antioch, was ordained, and became so celebrated for the eloquence of his preaching, that on the death of Nectarius, patriarch of Constantinople, he was raised to that high and important post. He exerted himself so zealously in repressing heresy, paganism, and immorality, and in enforcing the obligations of monachism, that Theophilus, bishop of Alexandria, aided and encouraged by the empress Eudoxia, caused him to be deposed at a synod held at Chalcedon in 403. His deposition gave so much offence to the people, by whom he was greatly beloved, that the empress was obliged to interfere for his reinstatement. He soon, however, provoked her anger by opposing the erection of her statue near the great church; and, in 404, another synod deposed him, and exiled him to Armenia. He sustained his troubles with admirable courage; but being ordered to a still greater distance from the capital, where his enemies still feared his influence, he died while on his journey. His voluminous works, consisting of sermons, commentaries, treatises, &c., abound with information as to the manners and characteristics of his age. Thirty years after his death his remains were removed to Constantinople with great pomp, and he was honoured with the title of saint. Died, 407.

CHUBB, THOMAS, one of the English Deists of the 18th century, was born near Salisbury, in 1679, and was apprenticed first to a glove-maker and afterwards to a tallow-chandler. After he had made himself known by some theological writings, he became steward to Sir Joseph Jekyll, but in a short time returned to his candles. He was of small stature and fat, fond of debate, industrious in writing, but scarcely got a living by his works. Among them are, "The Supremacy of God the Father asserted," "Discourse on Reason as a sufficient Guide in matters of Religion," "Inquiry about the Inspiration of the New Testament," and "True Gospel of Jesus asserted." He published many tracts on similar high subjects. Died, 1746.

CHURCHILL, CHARLES, an English poet,

born, 1731. He was educated at Westminster, but made so little progress in learning, and indulged in such habits of levity, that he was refused admission at Oxford. A marriage, as early as it was imprudent, rendered a profession doubly desirable; and after studying for some time in private, he was admitted to holy orders, and obtained a Welch curacy of about £30 a year. The death of his father, who was curate of St John's, Westminster, brought him once more to London, and he obtained the vacant curacy. Still his income was small, while his love of gaiety was unbounded, and he was on the verge of imprisonment, when Dr Lloyd, of Westminster School, interfered, and effected a composition with the creditors. He now determined to exert the talents he had so long allowed to lie idle; and his first production was "The Rosciad," an energetic satire on the principal actors of that time. Public attention was fixed on this poem by the vehemence with which the players replied to it, and Churehill found it worth his while to give the town a new satire, under the title of an "Apology" for his former one. "Night," "The Ghost"—in which he assailed Dr Johnson, at that time all but omnipotent in the literary world—and the "Prophecy of Famine," followed; and he at length threw aside all regard for his profession, separated from his wife, and became a complete "man of wit about town," and a professional political satirist. He now rapidly produced an "Epistle to Hogarth," "The Conference," "The Duellist," "The Author," "Gotham," "The Candidate," "The Times," "Independence," and "The Journey." The vigour displayed in these poems makes it probable that he would in time have devoted himself to higher subjects than party politics, and have produced works calculated to give him higher and more lasting fame; but a fever hurried him to the grave, at the early age of 34, in 1764.

CHURCHYARD, THOMAS, an English poet; author of "The Worthiness of Wales," "Legende of Jane Shore," &c. He flourished in the reign of Queen Elizabeth, and died in 1604.

CIACONIUS, PETER, an eminent Spanish scholar. Pope Gregory XIII. employed him to superintend an edition of the Bible, the "Decretal" of Gratian, and other works printed at the Vatican press. He wrote some very learned notes on Tertullian, Pliny, Seneca, and other Latin writers; tracts on Italian antiquities; a treatise on the old Roman calendar, &c.; and he aided Clavius in reforming the calendar. Died, 1581.

CIAMPINI, GIOVANNI GIUSTINO, a learned Italian; author of "Vetera Monumenta," "Lives of the Popes," &c. He was one of the literary associates of Christina, queen of Sweden, during her residence at Rome, and was aided by her in forming an academy for the study of mathematics, and another for the study of ecclesiastical history. Died, 1698.

BRIEL, sculptor, was Holstein about 165, about or before the cuted the statues in

the old Royal Exchange, the sculptures on the Monument, and the two figures of Madness, Raging and Melancholy, at the Bethlehem Hospital. He was also employed in decorating the mansion at Chatsworth. He was father of Colley Cibber, the celebrated actor. Died, 1700.

CIBBER, COLLEY, the actor and dramatist, was the son of Gabriel Cibber, the sculptor, and was born in London, in 1671. He was educated at Grantham Free-school, and being disappointed of a scholarship at Cambridge, he entered the army. The military profession did not suit his taste; and when only about 18 years old he quitted it for the stage. For some time he had but little success; but his performance of Foudlewife, in the "old Bachelor," made him very popular, and obtained him the monopoly of parts of that kind at Drury-lane. His first dramatic effort, "Love's Last Shift," appeared in 1695; and it was followed by "Woman's Wit" and "the Careless Husband." His next production as a dramatist was an adaptation of Molière's Tartuffe, under the title of the "Nonjuror," of which the "Hypocrite" of the more modern stage is a new version. The piece was wonderfully popular, and, in addition to the large profits Cibber derived from its performance, it procured him the situation of poet laureate. This appointment drew upon him the rancour of contemporary wits and poets, and of Pope among the number; but Cibber had the good sense to think solid profit more important than the censure of the envious was injurious; and he wore the bays, and performed in his own pieces till he was nearly 74 years of age. Besides tragedies and comedies, to the number of twenty-five, some of which still continue to be played as stock pieces, Cibber wrote an "Apology" for his own life, an "Essay on the Character and Conduct of Cicero," and two expository epistles to his assailant Pope. Died, 1757.

CIBBER, THEOPHILUS, son of the above, an actor and dramatist, but very inferior in both capacities to his father. He was of very extravagant habits, and his life was consequently spent in much distress. He was drowned in his passage to Ireland, 1757.

CIBBER, SUSANNA MARIA, wife of the last named, was sister to Dr Arne, the celebrated musical composer, and was an actress of the highest class. Her union with Theophilus Cibber was productive of both discomfort and disgrace, and she was separated from him for many years. She was as much respected in private life as she was admired on the stage. Her style of acting was well adapted to that of Garrick, with whom she frequently performed. Died, 1766.

CICERO, MARCUS TULLIUS, the prince of Roman orators, was born at Arpinum, B. C. 106. He was the son of noble parents, and at an early age gave such decided indications of his ability, that after having served in a single campaign under Pompeius Strabo, he devoted himself, by the advice of his friends, to the bar. For this purpose he studied under Moio of Rhodes, an eminent lawyer, and Philo the Athenian, then resident at Rome; and, at the age of

26, he commenced practice as a plender; his first important cause being the defence of Sextus Roscius Amerinus, who was accused of parricide by one Chrysogonus, a freedman of the dictator Sulla. He saved his client, but was obliged to withdraw to Athens from fear of resentment of the dictator. As long as Sulla lived Cicero remained in exile, turning even his exile into a benefit by diligently studying under Antiochus and other philosophers. When he returned to Rome he rapidly rose in his profession, and the quaestorship in Sicily was bestowed upon him. In this office he made himself very popular; and henceforth his course was all prosperous, until he attained the great object of his ambition—the consulship. The conspiracies of Catiline made Cicero's consular duty as difficult and dangerous as his performance of it was able and honourable; and he scarcely, if at all, exaggerated his services to Rome when he said that to his conduct "alone was owing the salvation of both the city and the commonwealth." But his popularity declined very soon after the expiration of his consulship, and it was chiefly as an advocate and author that he for some time afterwards exerted his splendid talents. At length the task of averting ruin from his own head tasked even his powers to the utmost. Publius Clodius, who had now become tribune of the people, raised such a storm against him, that he was a second time obliged to go into exile. This time he sought shelter with his friend Planus, in Thessalonica, until the repentant Romans recalled him, making him magnificent recompense for the deprecation and devastation by which he had been impoverished. In the struggle between Caesar and Pompey, Cicero espoused the cause of the latter; but after the fatal battle of Pharsalia, he made his peace with the former, with whom he continued to all appearance friendly, until Caesar fell under the daggers of Brutus and his friends. Cicero now took part with Octavius, and pronounced the philippics against Antony, which at once shortened his life, and added to his fame. Antony, stung to the quick, insisted upon the death of Cicero, and Octavius basely consented to the sacrifice. In endeavouring to escape from Tusculum, where he was living when the news of his proscription arrived, he was overtaken and murdered by a party of soldiers, headed by Popilius Lanas, whose life he had formerly saved by his eloquence; and his head and hands were publicly exhibited on the rostrum at Rome. Cicero perished in his 64th year, B. C. 43. He was a perfect model of eloquence; and, as Augustus truly said, "he loved his country sincerely." Of his works, consisting of orations, philosophical, rhetorical, and moral treatises and familiar letters, all written in the purest and most perfect Latin, all well known and far too numerous to be even named here, there have been almost innumerable editions. Middleton's celebrated "History of the Life of M. Tullius Cicero," appeared in 1741. A new English Life of Cicero, by William Forsyth, published in 1664, has received high praise for scholarship and fairness. More recent is the French work, entitled "Ciceron et ses

Amis," an interesting study on Roman society, by Gaston Klossier.

CICOGNARA, LEOPOLD, Count of, Italian writer on art, was born at Ferrara in 1767. He was educated at the university of Pavia, and after studying the works of art at Rome and other great cities of Italy, he settled at Modena. After the French invasion he took part, for some time, in public affairs, but in 1805 he settled at Venice as president of the Academy of Fine Arts. He travelled through Europe, and formed a valuable collection of works of art, which afterwards became the property of the pope. His chief work is the "History of Sculpture from the revival of the Fine Arts in Italy," in 3 vols. folio. He also published a description of the principal buildings of Venice, a Catalogue of his Library, and an account of the chef-d'œuvre of his friend Canova. Cicognara was a correspondent of the French Institute, and a member of the principal academies of Europe. Died at Venice, 1834.

CID, THE, whose real name was **DON RODRIGO DIAZ DE BIVAR**, the national hero of Spain, was born at Burgos about 1040. The facts of his career have been wrapped by his admiring countrymen in such a haze of glorifying myths that it is scarcely possible to detect them. His life, however, appears to have been entirely spent in fierce warfare with the Moors, then masters of a great part of Spain. His exploits are set forth in a special chronicle, and in a poem of considerable interest, written not long after his death. The story of his love for Ximena is the subject of Corneille's masterpiece, "Le Cid." His last achievement was the capture of Valencia, where he died in 1099.

CIGNANI, CARLO, an eminent Italian painter, born at Bologna, 1628. He was the pupil of Albani, and perfected himself by the study of the works of Correggio, the Caracci, and Raphael. His works, in fresco and in oil, were very numerous, and the subjects of them very various. His principal work is the "Assumption of the Virgin," in the cathedral of Forlì. Died, 1719.

CIGNAROLI, GIAMBETTINO, Italian painter, was born near Verona, in 1706. He worked chiefly at Verona, had many scholars, and obtained a very high reputation. In 1769 he was visited by the emperor Joseph II., who spoke of him afterwards as the first painter of Europe. Cignaroli's style was like that of Carlo Maratti, but inferior in colouring. Died, 1770.

CIGOLI, LODOVICO CARDI DA, Italian painter, born 1559. He was trained by Santo di Titi, studied the works of Correggio, Barocci, and the Caracci, and became a distinguished reformer of the art, especially as an opponent of the imitators of Michael Angelo. One of his greatest works was "St Peter healing the Lame Man," which has, unfortunately, perished. He painted several altar-pieces, and wrote a treatise on Perspective. Died, 1613.

CIMABUE, GIOVANNI, or **GIOVANNI GUALTIERI**, a very distinguished Florentine painter, born in 1240. Very little is certainly known of his life, but he is said to have been a disciple of Giunta of Pisa, and he was one

of the earliest painters who left off copying the hard unnatural drawing of the Byzantine school, studied nature for himself, and contributed powerfully to the revival of art. The colossal Madonna, which he painted for the Rucellai chapel, in the church of Santa Maria Novella, Florence, is said to have excited extraordinary enthusiasm, and to have been carried in procession to the church, where it still remains. A Madonna of this master, formerly in the church of Santa Croce, Florence, is now in the National Gallery. It was Cimabue who first discovered the genius of Giotto. Died, probably, in 1302.

CIMAROSA, DOMENICO, a Neapolitan musical composer. When the army of revolutionized France took possession of Italy, Cimarosa so openly sympathized with revolutionary principles, that, when the French withdrew, he was thrown into prison, and treated with a rigour which is supposed to have materially shortened his life. Of twenty-six operas which he composed, and most of which are comic, "Il Matrimonio Segreto" is the most admired. Born, 1754; died, 1801.

CIMON, a celebrated Athenian general. He was the son of Miltiades, and first distinguished himself at the battle of Salamis, B. C. 480. Aristides the Just thought so highly of him, that he initiated him into public business. After having repeatedly beaten the Persians, especially in 466, when he won two victories over them the same day, one by sea, the other on the banks of the Eurymedon, and having enriched his country by the spoils he wrested from the enemy, the party of Pericles caused him to be ostracized. At the end of five years, which was only half the term for which he had been banished, he was recalled, and again led the Athenians to victory over their Persian foe. While besieging Citium in Cyprus, he died, B. C. 449, having served Athens, not only by his gallantry and prowess in the field, but also by his wisdom and liberality in promoting public improvements.

CINCINNATUS, LUCIUS QUINTUS, one of the most illustrious characters of ancient Rome. He was made consul B. C. 460, when the senate and the people were striving for the ascendancy; and, being much incensed against the latter for having banished his son, he sternly resisted their demands. He was named consul a second time, but refused the office and retired to his farm, whence he did not again emerge until he was saluted dictator, 458, and entreated to lend his aid against the Æqui, who had closely invested the army of the consul Minucius. Stepping at once from the petty details of a farm to the momentous duties of a general and a statesman, Cincinnatus defeated the Æqui and made them pass under the yoke. Having caused his son to be recalled from exile, after the chief witness against him had been convicted of perjury, he laid down his authority and returned to his farm. He was again, though 80 years of age, made dictator, when Mælius was accused of conspiring against the republic.

He was highly distinguished in public business, and was beaten the day when he won the same day, one of the Eurydice, his country by the enemy, the day to be ostracized, which was only he had been banished again led the Persian foe. Cyprus, he died, Athens, not only in the field, but liberality in projects.

QUINTUS, one of the characters of ancient Rome, B. C. 460, when he was striving for a much incensed banished his demands. He refused the farm, whence he was saluted to lend his aid closely invested in the land. Stepping out of a general and defeated the Equi from the yoke. Having been recalled from exile, he had been down his authority. He was again made dictator, when conspiring against

ELIUS, the friend, of Marius. He

it was who drove Sulla from Rome, and recalled Marius from his African exile. He participated in the numerous murders which followed the return of Marius; and when in his third consulship, and while preparing for hostilities with Sulla, was assassinated, B. C. 84.

CINO DA PISTOIA, an Italian jurist, poet, and professor successively at various universities. In addition to some elegant poetry, by which he is chiefly known, he wrote a "Commentary on the Digest." Died, 1336.

CINQ-MARS, HENRY COIFFIER, Marquis of France, was son of the Marquis d'Efflat, marshal of France. He was introduced by Cardinal Richelieu to the notice of Louis XIII., and was for some time a most distinguished favourite of that monarch. Ungrateful equally to the cardinal and to the king, he instigated Gaston, duke of Orleans, the king's brother, to rebellion. They had proceeded so far in their treasonable designs as to set on foot a treaty with Spain, engaging that power to assist them. But the vigilance of the cardinal discovered their plans, and the marquis was apprehended, and beheaded in 1642. Cinq-Mars is the hero of a splendid historical novel by Alfred de Vigny.

CIPRIANI, GIOVANNI BATTISTA, an eminent painter, born at Pistoia, in Tuscany. In 1735 he accompanied Sir W. Chambers to London, and was one of the original members of the Royal Academy. His drawings were greatly admired, and many engravings were made from them by Bartolozzi. Died, 1785.

CIRILLO, DOMENICO, an Italian botanist, born in the kingdom of Naples, 1734. He accompanied Lady Walpole to France and England, studied under William Hunter, and was elected F.R.S. He afterwards became president of the academy at Naples, and professor of medicine in the university of that city. When the French entered Naples, Cirillo took an active part against his sovereign; and when the legitimate government was restored, he was executed as a traitor in 1799. Among the works of Cirillo are, "Fundamenta Botanica," "Plantarum rariorum regni Neapolitani fasciculus," &c.

CISNEROS, FRANCISCO XIMENES DE. [XIMENES.]

CLAIRAUT, ALEXIS CLAUDE, an eminent French mathematician and astronomer, was born at Paris in 1713. He studied the higher mathematics at ten years of age, at thirteen presented a memoir on curves to the Academy of Sciences, and at sixteen wrote one of his most remarkable works, the "Recherches sur les courbes à double courbure." This was published in 1729, and the same year he was received at the Academy, although under age. He took part in the measurement of a degree of the meridian in Lapland, made laborious investigations on the movement of Halley's comet, and predicted the time of its reappearance, made important discoveries respecting the lunar motion and the motions of comets, and died at Paris in 1765. Among his principal works are "Traité de la figure

de la Terre," "Eléments d'Algèbre," "Théorie de la Lune," "Théorie du mouvement des Comètes," &c.

CLAIRTE, MARTIN, a French Jesuit, was born at St Valéry in 1612. He gained great distinction as a preacher; but he is now chiefly remembered for his Latin hymns, written in a pure, clear, and elegant style. Died, 1693.

CLAIRFAIT, Count de. [CLERFAYT.] CLAPPERTON, Captain HUGH, the celebrated African traveller, was born in Annan, Dumfriesshire, in 1788, and at the age of 13 was apprenticed to the sea-service. Having during his apprenticeship inadvertently violated the excise laws, he consented (rather than undergo a trial) to go on board the Clorinda frigate, commanded by Capt. Briggs. Through the interest of friends he was soon promoted to be a midshipman, and in 1814 was raised to the rank of lieutenant, and appointed to the command of a schooner, on Lake Erie. In 1822 he was chosen to accompany Dr Oudney and Major Denham on an expedition to Central Africa, and on his return to England he received the rank of commander. In six months afterwards he was despatched on a second mission for exploring the country from Tripoli to Bornou, but was not allowed to enter the place. It was during the period of his detention that he was attacked with dysentery, which proved fatal, at Sackatoo, on the 13th of April, 1827. His journals, which were all saved, give an interesting account of the central part of Northern Africa, and the manners and customs of its inhabitants.

CLARE, Earl of. [FITZGIBBON, JOHN.] CLARE, JOHN, the peasant-poet of Northamptonshire, was born near Peterborough in 1793. He published in 1820 a volume of "Poems descriptive of Rural Life and Scenery," which attracted much attention. A friendly attempt was made to place him in a better position in life, but it ended in failure, and the pressure of care and want at last deranged his intellect. Additional poems appeared from his pen entitled the "Shepherds' Calendar and other Poems," and the "Rural Muse." The unhappy poet died in a lunatic asylum in 1864. The story of his life is touchingly told in a Memoir by Frederick Martin, published in the following year.

CLARENDON, EDWARD HYDE, Earl of, lord high chancellor of England, was born at Dinton, in Wiltshire, in 1608. He was educated at Oxford, and studied law under his uncle, Nicholas Hyde, chief justice of the King's Bench. During the civil wars he zealously attached himself to the royal cause, being first returned to parliament in 1640. He was made Chancellor of the Exchequer and privy councillor three years later, and was the chief adviser of the king. After the failure of the royalist arms he took refuge in Jersey, and then joined Prince Charles in Holland. Clarendon contributed to the restoration, accompanied Charles to London, and was made lord chancellor. In his judicial capacity his conduct was irreproachable; and as long as he held office, no one could be more decidedly the supporter of the privileges of royalty, or the defender of his country's freedom against the abuses of the royal

power. But he at length became unpopular, and was removed from his high employments, and was banished by act of parliament. He died at Rouen, in 1761. His "History of the Rebellion," long regarded as a first-rate historical authority, has been proved to be not only a partial, but a very inaccurate and untrustworthy narrative. His daughter Anne was married to the duke of York, afterwards James II.; and two daughters, Anne and Mary, the fruit of this marriage, both ascended the English throne.

CLARENDON, HENRY HYDE, Earl of, son of the foregoing, was born in 1633. He was for a short time lord-lieutenant of Ireland, in the reign of James II., and wrote a "History of the Irish Rebellion," &c. Died, 1709.

CLARKE, ADAM, LL.D., theologian and orientalist. He was born in Ireland, and received the rudiments of learning from his father, who was a schoolmaster: but subsequently studied at the school founded by John Wesley, at Kingswood, near Bristol. At the early age of 18, he became a travelling preacher in the Wesleyan Methodist connection, and for 20 years continued to be so. But though he was very popular as a preacher, it is chiefly as a writer that he demands notice here. He published a very useful Bibliographical Dictionary; a supplement to that work; a most laborious Commentary on the Bible; a Narrative of the last Illness and Death of Richard Porson; and Memoirs of the Wesley Family; and edited Baxter's Christian Directory, and several other religious works. His Commentary on the Bible occupied him above fifteen years. But such were his energy and perseverance, that besides the above works and numerous sermons, he wrote four elaborate reports on the State of the Public Records, and edited the first volume of a new edition of Lymer's *Fœdera*. Born, 1762; died, of cholera, 1832.

CLARKE, EDWARD DANIEL, LL.D., a celebrated modern traveller, and professor of mineralogy at Cambridge, was born in 1769. He accompanied Lord Berwick to Italy in 1794; and in 1799 he commenced a tour through Denmark, Sweden, Lapland, Finland, Russia, Tartary, Circassia, Asia Minor, Syria, Palestine, Egypt, Greece, and Turkey, returning, in 1802, through Germany and France. By his exertions the library of Cambridge was enriched with nearly a hundred volumes of manuscripts, and the colossal statue of the Eleusinian Ceres. He also brought to this country the sarcophagus commonly known as that of Alexander, and a splendid collection of mineralogical specimens, which he turned to the best advantage in his subsequent popular lectures on mineralogy, when he was appointed to the professor's chair in 1808. He died in 1821, and a complete edition of his works, in 11 vols., was afterwards published.

CLARKE, JEREMIAH, Mus. D., organist to St Paul's cathedral, and joint organist, with Blow, to the king. His compositions are not numerous, but they are remarkable for pathetic melody. An imprudent and hopeless passion for a lady of high rank so much disordered the mind of this amiable and

gifted man, that he committed suicide, in 1707.

CLARKE, SAMUEL, D.D., a celebrated English theologian and natural philosopher, was born in 1675. He was a native of Norwich, of which city his father was an Alderman; and was educated at Caius College, Cambridge. While at college, he made an improved Latin translation of Robault's treatise on Physics, adding valuable notes in order to familiarize students with the reasonings of the Newtonian philosophy. When he took orders, he became chaplain to the bishop of Norwich, and in 1699 published "Three practical Essays on Baptism, Confirmation, and Repentance." By this work he established his reputation as a pious and able writer; and he now entered the lists as a controversialist, by publishing "Reflections" on a book by Toland, entitled "Amyntor." In 1701-5 he was appointed Boyle Lecturer, and took for the subjects of his sixteen sermons, "The Being and Attributes of God" and "The Evidences of Natural and Revealed Religion." In 1712 he published a valuable edition of "Caesar's Commentaries," and a work entitled "The Scripture Doctrine of the Trinity." This work involved him in a controversy, in which his principal opponent was Dr Waterland; and the heterodoxy of Dr Clarke was made the subject of a complaint in the lower house of convocation. Subsequently he had a controversy with Leibnitz on the principles of religion and natural philosophy; and gave considerable offence by altering the psalms at St James's while chaplain to Queen Anne. Although his alleged heterodoxy had deprived him of all chance of rising in the church, he had so just a sense of what was due to his profession, that when offered the mastership of the Mint, on the death of Sir Isaac Newton, he declined it as incompatible with the clerical office and character. The latter part of his life was distinguished by his letter to Hoadley, "On the Proportion of Velocity and Force in Bodies in Motion," and his edition of "Homer's Iliad" with a Latin version. After his death, his sermons, in 10 vols., were published by his son. Died, 1729.

CLARKE, [FELTRE, Duke of.]

CLARKSON, THOMAS, a man whose whole life may almost be said to have passed in labouring to effect the extinction of the slave trade, was born at Wisbeach in Cambridgeshire, in 1760. He was first brought into notice as the friend and champion of the negro, by a Latin prize essay upon slavery, which was afterwards published in English, and became immensely popular. Associations were formed, and the question was agitated and discussed throughout the country; at length Mr Clarkson having become acquainted with Mr Wilberforce, whose connections and influence were justly regarded as of the highest value, it was agreed that the latter should bring the subject under the notice of parliament. This was in 1787, and it there met with various success until 1807, when the memorable law abolishing the slave-trade obtained the sanction of the legislature. But though Mr Wilberforce, by virtue of his position, was enabled to take a lead in this great measure,

the original promoter of it was still indefatigable; and, outside the walls of parliament, he continued to labour with undiminished zeal. Clarkson's active benevolence, though principally exerted in favour of the enslaved African, was by no means confined even to that wide sphere. He died Sept. 26, 1846, aged 85.

CLAUDE JEAN, an eminent French Protestant divine. He composed a reply to a work of the Port-Royalists on the eucharist, and was involved, in consequence, in a controversy with the Catholic writers, in which he displayed immense controversial power. No better proof, indeed, can be desired of the formidable light in which he appeared to his opponents, than is afforded by the fact, that at the revocation of the edict of Nantes he was peremptorily ordered to quit France in 24 hours, though the other Protestant ministers were allowed 15 days. His learning, eloquence, and strict morality made him a powerful advocate of truth, and his polemical writings show how well qualified he was to be its defender. Died, 1687.

CLAUDE LORRAINE, the great landscape painter, born in Lorraine, 1600. His real name was CLAUDE GELÉE, and he was the son of poor parents, who put him apprentice to a pastry-cook. The love of art, however, prevailed over the circumstances in which he was placed; and having received some instruction in drawing from his brother, who was a wood-engraver, he went to Rome, and was employed as cook and colour-grinder by the painter Tassi, from whom he received instructions in the fundamental principles of his art. He gradually won his way upward to independence and fame, and by 1630 was known as a good landscape-painter. Sandrart was his intimate companion, and first led him to paint from nature. In the study of nature he was unwearied, passing entire days in the fields, noting every change in the aspect of nature from sunrise to sunset. The fruits of this patient observation are seen, especially in his admirable treatment of aerial perspective. Claude also executed a number of etchings. His "Liber Veritatis," or in Italian, "Libro di Verità" is a collection of his sketches and designs for his pictures, and is now in the collection of the duke of Devonshire. It was engraved and published at London in 1777. Died, 1682. The principal galleries in Europe are adorned with his masterly productions, and some of the finest are in the National Gallery. Among these are a "Seaport at Sunset," "Seaport, with the Embarkation of the Queen of Sheba," another with the Embarkation of St Ursula, and several landscapes with figures.

CLAUDIANUS, CLAUDIUS, a Latin poet, whose birthplace is supposed to have been Alexandria. He flourished about A.D. 400, under the reigns of Theodosius, Arcadius, and Honorius; was patronized by Stilicho, and a statue was erected to his honour in the forum of Trajan. His larger poems lose some of their value from the subjects of them being court panegyric; but in all his poems he displayed a brilliant fancy, and much polished elegance.

CLAUDIUS, TIBERIUS DRUSUS, Roman emperor, was born B.C. 9, at Lyons, and was originally called Germanicus. After spending 50 years of his life in a private station, unhonoured, and but little known, he was on the murder of Caligula, his nephew, A.D. 41, proclaimed emperor by the soldiers, and continued in the sovereignty by the senate. At first he performed some praiseworthy acts, but he soon became contemptible for his debauchery and voluptuousness; and he died of poison administered by his second wife, Agrippina, A.D. 54. Claudius came to Britain two years after his accession, and made it a Roman province. He built the port of Ostia, the Claudian aqueduct, and executed other great works.

CLAUDIUS II., MARCUS AURELIUS FLAVIUS, surnamed GOTHICUS, Roman emperor, born A.D. 214, was raised to the throne on the death of Gallienus, in 268; and by his virtues, as well as by his splendid victories over the Goths, he proved himself worthy of his exalted station. Died, 270.

CLAUSEL, BERTRAND, a distinguished French soldier, was born at Mirepoix, 1772. He had already gained distinction in the army of the Pyrenees, at St Domingo, in Italy, and Dalmatia, when he was sent to Spain in 1810, under Junot and Masséna. He besieged Ciudad Rodrigo, was wounded at Salamanca, and having saved during a retreat, memorable in military annals, the army of Portugal, and led it into Spain, was appointed commander-in-chief in the north of Spain in 1813. He was one of the last to lay down arms in 1814; and among the first to declare himself in favour of Buonaparte during the Hundred Days, when he took the command of Bordeaux, and established the imperial government without striking a blow. Banished on the return of the Bourbons in 1815, he retired to the United States, where he remained some years. Immediately after the revolution of 1830 he was appointed commander-in-chief of the forces in Algeria; but in consequence of some misunderstanding with the home government, he returned to France in 1831, received the marshal's baton, and in 1835 returned to Algeria as governor-general of the colony; but the check he sustained at Constantine, in 1836, led to his resignation, and the rest of his days were passed in retirement. Died, 1842.

CLAVIGERO, FRANCESCO SAVERIO, a native of Vera Cruz, in Mexico. Having been employed nearly forty years as a Jesuit missionary in Mexico, and made himself acquainted with the traditions and antiquities of the people, he wrote a very valuable work, entitled "Storia antica del Messico," being a very full account of the geography, natural history, manners and customs, arts, literature, and religion of Mexico, and of its conquest by the Spaniards. It was translated into the German and Spanish languages, and an English translation was published in 1787. Born, about 1718; died, at Cesena, 1793.

CLAVIJO Y FAXARDO, JOSÉ, a Spanish litterateur, born in one of the Canary Islands, about 1726. At the age of 23 he went to Madrid, where he got an appointment in

a government office. The publication of a periodical paper, entitled "El Pensador," after the manner of the English "Spectator," was the beginning of his literary reputation. His name has been most widely known in connection with his dishonourable conduct towards Madlle Curon, sister of Beaumarchais, and the spirited intervention of the latter in behalf of his sister. Ten years afterwards, in 1774, Beaumarchais, in self-defence, published the full story, which excited intense interest, and furnished Goethe with the subject for a tragedy. Clavijo was disgraced and deprived of his office, but was soon restored. He continued his literary labours, translated Buffon's Natural History and was named secretary to the Museum of Natural History. Died, 1806.

CLAVIUS, CHRISTOPHER, a German Jesuit and mathematician. By order of Pope Gregory XIII. he corrected the calendar; and he ably defended himself against the animadversions on his labour of the elder Scalliger and others. He also published many mathematical works, among which was an edition of Euclid, with annotations: a treatise on dialling, and an explanation of the method of reformation of the calendar. Died, 1612.

CLAY, HENRY, a distinguished American statesman, was the son of a clergyman of Hanover county, Virginia, where he was born on the 12th April, 1777. In 1793 he commenced the study of the law, was licensed as an attorney in 1797, and removed to Lexington, Kentucky, where he soon took a high position at the bar, and was at once recognized as one of the most promising men of his country and time. Mr Clay was elected to fill an unexpired term in the United States Senate in December, 1806. In 1808 he was elected to the Kentucky legislature, and in 1810 he was again chosen to fill a vacancy in the United States Senate. In 1811 he was sent to the House of Representatives, and was chosen speaker. He was a warm advocate of the war with Great Britain, and throughout that crisis sustained Mr Madison's war measures with great zeal. In 1814 he was sent to Ghent as one of the commissioners to negotiate the treaty of peace with Great Britain. Returning home, he was again sent to congress in 1815, and was elected speaker during two consecutive congresses. He remained in the House of Representatives till 1821. During the year 1818 he achieved great distinction by his advocacy of the claims of the South American republics to the recognition of their independence by the United States. In 1823, Mr Clay was again elected at congress, and again chosen speaker by a large majority. He distinguished himself in this congress as the advocate of protection to American industry, as well as several other measures. In 1824, Mr Clay was a candidate for the presidency, and, Mr Adams being chosen president, tendered the office of secretary of state, which he accepted, and retained to the close of Mr Adams's administration. In 1831 he was sent to the United States Senate, and in 1832 was a candidate for the presidency, but defeated by General Jackson. During the session of 1833, when the tariff

question was agitating the whole nation to an alarming extent, he brought forward his celebrated compromise bill, which passed both Houses, and restored quiet to the country. Mr Clay remained in the United States Senate until 1842, when, on the 31st of March, he resigned his seat. In 1844 he was the Whig nominee for the presidency, being defeated by Mr Polk. In December 1849, he again took his seat in the Senate, where he remained until 1851, when the encroachments of disease obliged him to tender his resignation. His last service in the Senate was in 1850, when he originated the series of measures known as the Compromise, which rescued the Union from one of its greatest dangers. A long career of 46 years identified him with much of the history of the American nation, and though he was never president, few presidents could hope for greater dignity, or a more enduring fame. Died, 1852.

CLAYTON, ROBERT, bishop of Clogher; author of an "Introduction to the History of the Jews," "The Chronology of the Hebrew Bible Vindicated," "A Vindication of the Histories of the Old and New Testament," written against Hobbinsbroke and other sceptics. The heterodoxy of some portions of his writings gave so much offence, that measures were contemplated for depriving him of his preferment; but he died before his condemnation could be pronounced. Born, 1695; died, 1758.

CLEANTHES, a Stoic philosopher of the 3rd century B.C. He was a native of Assus, in Lydia; but, visiting Athens, he became a zealous disciple of Zeno; and to enable him to attend on that master in the day, he was accustomed to labour by night. His mental and bodily strength was immense, and despite all obstacles, he studied so successfully as to become, B.C. 263, Zeno's successor. Of his writings only some fragments remain, among which is his noble Hymn to Zeus; but his reputation was so great, that, after his death, the senate of Rome decreed him a statue in his native place.

CLEMENCET, CHARLES, a learned French Benedictine, born 1703. He was charged with the completion of the first edition of the great chronological work, "Art de vérifier les Dates," projected and left unfinished by Maur d'Antine. He took part also in several other important historical works, among which were the "Décrétales des Papes," and the "Histoire littéraire de France." He was warmly attached to the Port-Royalists, and wrote the "Histoire Générale de Port-Royal." He also wrote some controversial works against the Jesuits, in which, notwithstanding his natural tenderness and kind-heartedness, he perhaps showed the influence of the *odium theologicum*. He was a man of fervent piety, and cared for the truth above all things. Died, 1778.

CLEMENCIN, DIEGO, a Spanish statesman and littérateur, was born at Murcia in 1765. He became tutor to the sons of the duke of Osuna, and went with him to Paris. At the outbreak of the Peninsular War he sympathized with the insurgents, and narrowly escaped death at the hands of the

French counter a very affairs ment. brarian literary on Don wrote n with va the Cld, 1831.

French. The successive revolutions and counter-revolutions of his country made him a very changing life, alternately active in affairs of state, and driven into rural retirement. In 1833 he was made a peer and librarian to the queen. His most important literary work is his voluminous Commentary on Don Quixote, published in 1833-39. He wrote an Eloge on the great Queen Isabella, with valuable dissertations; a discourse on the Cid, and other works. Died, at Madrid, 1831.

CLEMENS ROMANUS, bishop of Rome in the first century. It is conjectured that he may be the Clement named by St Paul. His Epistle to the Church of Corinth, one of the most precious relics of the primitive church, is to be found in the *Patres Apostolici* of Le Clerc. Clemens is said to have died at Rome, at the end of the 1st century.

CLEMENS, TITUS FLAVIUS, known as Clement of Alexandria, one of the fathers of the church. Of his early career so little is known that it is doubtful whether he was born at Alexandria or at Athens; but about the year 189 he succeeded Pantenus in the catechetical school of the former city, and taught there until 202, when the edict of Severus compelled him to seek a new abode. In 210 he was in Cappadocia, and he was afterwards in Antioch, but where he died is unknown. His chief works are an "Exhortation to the Pagans," "Pedagogus," or the Instructor, and "Stromata;" the last-named of which is a very valuable miscellaneous work, containing facts and quotations to be met with in no other writer. Died, about 220.

CLEMENT VIII., Pope, whose name was PLOLITO ALDOBRANDINI, was made cardinal by Sixtus V. in 1585, and succeeded Innocent IX. in 1592. He received the abjuration of Henry IV. of France, and gave him absolution; honoured Thsso by proposing to crown him at the capitol; had a new edition of the Vulgate published; and seized the duchy of Ferrara for the States of the Church. It was under this pope that the famous congregations *De Auxiliis* were held, for the settlement of the controversy then raging between the Dominicans and the Jesuits respecting grace and free-will. These conferences began in 1598, and were continued at intervals for nine years. Died, 1605.

CLEMENT XI., Pope (GIAN FRANCESCO ALBANI), born in 1649, was created cardinal in 1690, and succeeded Innocent XII. in 1700. His pontificate of 20 years was a troubled one, his measures involving him in grave disputes with the emperor, with the kings of France and Spain, and with the house of Savoy. He published two famous bulls, both against the doctrines of the Jansenists; the first, "Vineam Domini," and the second, "Unigenitus," which caused extraordinary excitement in France. The proceedings of the Jesuits in China were condemned by the bull "Ex illa die," against certain superstitious practices sanctioned by them. Clement protected and assisted the English Pretender in 1715, and after the failure of his projects gave him Urbino for his residence. This pope was a warm friend of literature

and art, and his private character was excellent. Died, 1721.

CLEMENT XIV., Pope, whose real name was GIANNELLI, was a native of St Angelo, near Rimini. In 1759 he was raised to the cardinalate by Pope Clement XIII., and on the death of that pontiff, in 1769, he was elected his successor. He was at first apparently disinclined to the suppression of the powerful but mischievous order of the Jesuits, but he at length became convinced of the necessity of such suppression, and he signed the brief for it in 1773. Shortly after he had signed this important document he was seized with a disorder, supposed to have been the effect of poison; and, after languishing in agonies, which reduced him to a mere skeleton, he died in 1775. Clement was one of the most enlightened and benevolent characters that ever wore the tiara. His manners were lowly and unassuming, his appearance plain and simple; and when he was told that the papal dignity required a more sumptuous table, he answered that "neither St Peter nor St Francis had taught him to dine splendidly." This pontiff was the founder of the Clementine Museum in the Vatican. His monument at Rome is one of the finest works of Canova.

CLEMENT, FRANÇOIS, a learned French Benedictine of Saint-Maur, was born at Bèze near Dijon in 1714. He was educated at the Jesuits' College at Dijon, and entered the congregation of Benedictines in 1731. His incessant application to study injured his health, and he was compelled to relinquish intellectual labour for about 20 years. He then settled at Paris, and was employed first to continue the "*Histoire Littérale de la France*;" then, the "*Iteneil des Historiens de France*;" and finally to prepare a second edition of the "*Art de Vérifier les Dates*." It appeared in 1770. He then devoted himself to the preparation of a third edition, enlarged and extended, making it, as it has been called, "*le plus beau monument d'érudition du dix-huitième siècle*." It was published between 1783 and 1792. Dom Clément was admitted to the Academy of Inscriptions in 1785. At the revolution he was driven from his cloister, but continued his peaceful toils in the house of a relative, and had nearly completed "*L'Art de Vérifier les Dates avant Jésus-Christ*," when he died of apoplexy, March 1793, not long after the execution of Louis XVI., who had taken much interest in his labours.

CLEMENTI, MUZIO, an eminent composer and pianist; the father of pianoforte music, and a genius whose fancy was as unbounded as his science; was born at Rome, in 1752. He early evinced a taste for music, and made such progress in the science, that in his ninth year he passed his examination as an organist, and in his 12th he wrote a mass for four voices. Under the patronage of the highly-gifted Mr Beckford he came to England, lived with him at his seat in Dorsetshire, where he learnt the English language, studied, composed, and gradually arrived at the head of his profession. In the year 1800 he was induced to engage, as the head of a firm, in the music trade; in which he continued, but without any interruption of

his duties as a composer, till his death, in 1832. He was buried in Westminster Abbey.

CLEOBULUS, one of the seven wise men of Greece, was a native of the Isle of Rhodes, and lived in the 6th century B. C.

CLEON, the celebrated Athenian popular leader, was the son of Cleonetus, and was by trade a tanner. He was the opponent of the measures of Pericles, on whose death he became the popular favourite. His character and designs have been represented in the most contradictory colours; and the controversy whether he is to be regarded as an earnest defender of popular rights, or a vulgar, factious mob-leader, is still unsettled. He is severely treated by Thucydides, and is the object of the most merciless satire of Aristophanes. The massacre of the Mitylenean prisoners at Athens, in B. C. 427, was chiefly owing to his influence. Two years afterwards he gained great distinction by his capture of the Spartans in the island of Sphacteria, opposite to the fort of Pylos. In 422 he commanded an expedition against Brasidas in Thrace, and was defeated and killed in the battle before Amphipolis.

CLEOPATRA, queen of Egypt. She was the daughter of Ptolemy Auletes, who, at his death, left his crown to her and her younger brother, Ptolemy; but being minors, they were placed under the guardianship of Pothinus and Achilles, who deprived Cleopatra of her share of the government. Cæsar, however, who had met her at Alexandria, being struck with her youthful charms,—she was then about 17,—took up her cause and proclaimed her queen of Egypt; and for some time Cleopatra made the conqueror the bond-slave of her beauty. She followed him to Rome, and was there at the time of his murder. After Cæsar's death she captivated the triumvir, Mark Antony; who, after marrying Octavia, left her for the sake of Cleopatra. The latter was with Antony at the fatal battle of Actium, and falling to fascinate Augustus, and determined not to be his prisoner, she put an end to her existence by applying an asp to her arm, the bite of which caused her immediate death, B. C. 30, aged 39. Cleopatra had a son by Cæsar and several children by Antony.

CLEOSTRATUS, an eminent Greek astronomer and mathematician, a native of Tenedos. He first arranged the signs of the zodiac, and corrected the error in the length of the Grecian year, by introducing the period termed Octaeteris. He flourished in the 6th century B. C.

CLERC. [LECLERC.]
CLERFAIT, FRANÇOIS SEBASTIEN CHARLES JOSEPH DE CROIX, Count de, an Austrian general, who served with great distinction in the seven years' war, particularly at the battles of Prague, Lissa, &c. From the conclusion of that war till 1788, when he took the field against the Turks, he lived in retirement; but in the war which arose out of the French revolution, he commanded the Austrian army with great credit to himself, in 1793 and 1794, though overborne by numbers, and often defeated in consequence. In 1795 he was made field-marshal, and general-in-chief on

the Rhine, and closed his military career by totally foiling the plans of the French. He then resigned his command to the Archduke Charles, became a member of the aulic council of war, and died in 1798, at Vienna, where a splendid monument is erected to his memory.

CLERMONT-TONNÈRE, ANTOINE JULES DE, cardinal, and dean of the French bishops, was bishop of Chalons in 1782, and was an active member of the states-general. He is chiefly remembered, however, as author of the interesting "Journal of what occurred at the Temple during the Captivity of Louis XVI." Born, 1749; died, 1839.

CLERMONT-TONNÈRE, STANISLAS, Count de, was one of the first among the nobility to side with the popular party in the opening scenes of the French revolution. Having at length given umbrage to his party, he was put to death in 1792.

CLEVELAND, JOHN, a political writer of the time of Charles I. He strenuously supported the cause of that monarch, and when the civil war broke out he joined the royal army, and was made judge advocate to the troops which garrisoned Newark. When that town was surrendered to the parliamentarians, Cleveland made his escape, but was apprehended, in 1655, at Norwich. After a detention of some months he gained his liberty by a temperate but manly letter addressed to Cromwell, in which he justified his opposition to him, on the ground that it was the result, not of any factious or personal motive, but of sincere principle. Of his satires several editions were printed, but they have shared the fate of most works of their class, and are now known to but few. Died, 1659.

CLIFFORD, GEORGE, earl of Cumberland, an eminent naval commander and scholar of the time of Queen Elizabeth. He was present at the trial of Mary, queen of Scots, and in the same year sailed for the coast of South America, where he made himself very formidable to the Portuguese. He was captain of one of the ships engaged against the memorable "Armada" of Spain, and subsequently commanded several expeditions to the Spanish main and the Western Islands; in one of which expeditions he had the good fortune to capture a galleon, valued at £150,000. He was a great favourite with Queen Elizabeth, who conferred on him the insignia of the order of the Garter. It seems, however, that fame and court favour were the chief rewards of his great talent and industry, as he is said to have died poor. Born, 1558; died, 1605.

CLIFFORD, ANNE, daughter of the preceding, was born in 1589. She was married first to Richard, Lord Buckhurst, afterwards earl of Dorset, and second son to Philip, earl of Pembroke. She possessed considerable literary ability, and wrote memoirs of herself and of some of her ancestors. But she was chiefly distinguished by her generosity and high spirit. She built two hospitals, repaired several churches, and erected monuments to the memory of Spenser and Daniel, the latter of whom had been her tutor. She displayed her spirit when Wil-

liamson, secretary of state to Charles II., wished to nominate a member of parliament for her borough of Appleby. "I have been bullied by a usurper," was her reply, "and I have been neglected by a court; but I will not be dictated to by a subject. Your man shall not stand." Died, 1676.

CLINTON, GEORGE, an American general and statesman. He first served under General Amherst against the French, and, after the conquest of Canada, devoted himself to the study of the law. In 1773 he was a member of the colonial assembly; and, being made brigadier-general, he succeeded, though he had a very inferior force, in preventing Sir Henry Clinton from aiding General Burgoyne. Clinton was governor of New York State from 1777 till 1810, and was also made vice-president of the United States. Born, 1739; died, 1812.

CLINTON, SIR HENRY, an English general. He succeeded Sir William Howe as commander-in-chief in America; and his ill success in 1781 and 1782 was so severely animadverted upon, that he thought it necessary to exculpate himself through the medium of the press. After his return from America, he was for some time governor of Limerick, and had just been appointed governor of Gibraltar when he died, 1795.

CLINTON, HENRY FYNES, the distinguished chronologist, author of the "Fasti Hellenici," and the "Fasti Romani," was born in Nottinghamshire, the 14th Jan. 1781; was educated at Westminster School, and passed thence to Christ Church, Oxford, where he was admitted commoner in 1799. Here his diligence and ability attracted the notice of Cyril Jackson, who nominated him to a studentship. He graduated B.A. 1803, M.A. 1805. His family then used the name of Fynes; for it was not till the 25th April, 1821, that the royal licence was obtained to assume the ancient family name of Clinton. In 1806 he entered parliament, and for 20 years represented the borough of Aidborough. He did not, however, take part in the debates. His mind was originally directed to historical and chronological researches by the appearance of Mitford's "History of Greece." Exempted from the lowest cares by the possession of a large fortune, Clinton devoted himself with intense earnestness and perseverance to his chosen task. The extent and quantity of his classical readings were prodigious, and the fruits of his faithful labour appear in the works above mentioned, which have become authorities throughout Europe. The "Fasti Hellenici" (Chronology of Greece) was published between 1824-34, and the "Fasti Romani" (Chronology of Rome) between 1845-50. Useful "Epitomes" of these works were afterwards published. Clinton was twice married, and left, by his second wife, a son and eight daughters. Died, 24th Oct. 1832. A volume of his "Literary Remains" appeared in 1854.

CLITUS, a distinguished Macedonian general, who saved the life of Alexander the Great at the battle of the Granicus, but who, having expostulated with his imperial

master when the latter was in a fit of intoxication, was slain by him, B.C. 328.

CLIVE, ROBERT, Lord CLIVE and Baron PLASSEY, was born in 1725, and in his 19th year went to India as a writer, but soon quitted that employment for the army. Being intrusted with the attack of Devicottah, a fort of the rajah of Tanjore, he performed this important duty so well, that he was shortly afterwards made commissary. The French having artfully obtained considerable territory in the Carnatic, Clive advised that an attack should be made on the city of Arcot, which being intrusted to him, a complete victory was obtained. This unexpected victory drew off the French from Trichinopoly, which they were then besieging, to retake Arcot, which Clive defended in such a manner that they were compelled to raise the siege. This was followed by a series of victories; and in 1753 he embarked for England, where he received a valuable present from the East India Company, and was raised to the rank of lieutenant-colonel in the king's service. After a short stay in England for the benefit of his health, he returned to India, and was shortly called upon to march to Calcutta, of which the nabob Surajah Dowlah had taken possession. He was again successful, and perceiving that there could be no permanent peace obtained until the nabob was dethroned, he made the necessary arrangements, and in the famous battle of Plassey, put the nabob completely to the rout, and established the power of the English more firmly than it had ever before been. As governor of Calcutta, Lord Clive performed great services, both civil and military; and when he returned to England he was raised to the peerage by the titles which stand at the head of this article. He once more visited India, but was called upon only for civil measures, which he took with his usual sagacity. In 1767 he returned to England, having done more to extend the English territory and consolidate the English power in India, than any other commander. But the large wealth he had acquired during his long and arduous services exposed him to an accusation in the House of Commons of having abused his power. The charge fell to the ground, but it hurt his mind so deeply that he committed suicide in 1771.

CLODIUS, whose full name is PUBLIUS CLODIUS (or CLAUDIUS) PULCHER, a profligate Roman patrician, especially known as the enemy of Cicero. He served as a soldier in Asia for some years, and being at Rome in B.C. 65, prosecuted Catiline and took a bribe to drop the proceedings. He became most notorious by his daring entrance, dressed as a woman, into the house of Cæsar during the celebration of the mysteries of the Bona Dea, in B.C. 62. On his trial the evidence of Cicero was decisive against him, and thenceforth his aim was revenge on Cicero. He got himself made plebeian and tribune, and procured the banishment of his great enemy, who was however soon recalled. He afterwards went about the city with a band of gladiators, and had frequent combats with

Milo and his band. He was at last killed in one of these combats, early in 52.

CLOOTZ, JEAN BAPTISTE DE, a Prussian baron, better known as ANACIARSIS CLOOTZ, one of the wildest and most violent actors in the early scenes of the French revolution. He was born at Cleves in 1755, and very early dissipated the greater portion of his fortune. In 1790, being at Paris, he presented himself at the bar of the National Assembly, attended by a number of men dressed to represent various foreign nations; and, describing himself as the "orator of the human race," he demanded the right of confederation. After making himself conspicuous by a variety of foolish projects set forth in no less foolish speeches, he was in 1792 sent to the National Convention as deputy from the department of the Oise. As might be expected from his previous conduct, he was among those who voted for the death of the unfortunate Louis XVI. His course, however, was now well nigh run, for, becoming an object of suspicion to Robespierre, he was arrested, and guillotined in 1794.

CLOSTERMAN, JOHANN, a German portrait painter. He was employed in Spain, Italy, and England; and in this country there are many of his works; among them the great picture of Queen Anne, in Guildhall, London. It is said that when painting the duke and duchess of Marlborough and their children, the disputes between her Grace and the painter were so frequent and so obstinate, that the duke protested he had as much trouble in mediating between them as in winning a battle. Died, 1713.

CLOVIS, king of the Franks, usually called the founder of the French monarchy, was born in 467. He was the son of Childeric I., and succeeded him in 481. During his reign he recovered from the Romans all their possessions in Gaul. He defeated Siagrius, near Soissons, in 486, compelled Alaric, king of the Visigoths, to surrender him, and had him put to death. Clovis married Clotilda, niece of Gundebald, king of the Burgundians, and through her influence was gradually led to renounce paganism, and profess Christianity. His final decision was made after his great victory over the Alamanni, at Tolbiac, in 496; and he was baptized by St Remi, with three thousand of his subjects. In the following year the Armoricans united themselves with the Franks. Clovis pursued a crafty policy with the king of the Burgundians and his brother, on the principle "divide and conquer." In 507 he made war on Alaric II., king of the Visigoths, and totally defeated him at the battle of Vouglé, killing him with his own hand. Clovis thus added the whole south-west part of Gaul to his dominions. At Tours he soon after received ambassadors from Anastasius, emperor of the East, who gave him the titles of patrician and consul. Clovis, about that time, settled at Paris, and made it the capital city. He disgraced himself by the unjust and cruel measures he took to get rid of several of his kindred, possible competitors for the crown. Died, at Paris, in 511, after dividing his kingdom between his four sons.

CLOWES, JOHN, an English divine, rector of the church of St John at Manchester. Embracing the doctrines of Swedenborg, he published translations of a large portion of his theological writings, and wrote several works in exposition and defence of them. Born, 1743; died, 1831.

CLUSTUS (CHARLES DE L'ECLUSE), a celebrated physician and botanist, born at Antwerp, in 1526. He first studied law, but abandoned it for medicine and botany. He went to many of the principal universities of Europe, among them that of Wittenberg, where he attended the lectures of Melancthon. He then travelled extensively in Europe in pursuit of his favourite science, and by over-exertion and numerous grave accidents, he ruined his health and became a cripple. He visited England several times. He became keeper of the Botanical Gardens at Vienna, and in 1593 accepted the chair of Botany at Leyden. His principal works are "Rariorum Plantarum Historia," "Exoticorum libri X.," and "Histoire des Plantes," a translation from Dodoens. Died, at Leyden, 1609.

CLUTTERBUCK, ROBERT, an English antiquary and topographer. He was a native of Hertfordshire, and having an independent fortune, he devoted his time to scientific and literary pursuits. Having collected materials for a new edition of Chauncey's History of Hertfordshire, he changed his plan, and produced a new work instead of re-editing the old one. His work consists of three folio volumes, and is well illustrated. Died, 1831.

CLUVIER, PHILIP (CLUVERIUS), a learned geographer, born at Dantzic, 1580. He travelled through the principal countries of Europe, visiting England also, and published the fruits of his researches in his "Germania Antiqua," "Sicilia Antiqua libri II.," "Italia Antiqua," &c. He is said to have spoken with fluency nine languages. Died, at Leyden, 1623.

CLYDE, COLIN CAMPBELL, Lord, field-marshal, commander-in-chief in India, was born at Glasgow, in 1792. He entered the army in 1808, and first served in the peninsula at the battles of Vimiera and Corunna. In the following year he took part in the Walcheren expedition, and from the fever which struck him there he suffered for thirty years. In 1810 he returned to the peninsula, and served at the battle of Barossa, the defence of Tarifa, and the great battle of Vittoria. He greatly distinguished himself at the first and unsuccessful assault on St Sebastian, in July, 1813, where he received two wounds, and narrowly escaped with his life. He was again wounded at the passage of the Bidassoa. He became a captain by brevet soon after, and obtained no further promotion for twelve years. In 1814 he served in the American war in the West Indies, and was subsequently employed in Ireland on the unwelcome service of enforcing the collection of tithes. Lieutenant-colonel in 1832, he was sent to China in 1842, whence on the outbreak of the second Sikh war he passed to India. He served with great distinction at the battles of Chillianwallah and Goojerat, and in 1851-2

he commanded against the hill-tribes beyond the Indus, showing himself not only brave in the field, but merciful after victory. In 1854, on the declaration of war with Russia, Sir Colin Campbell was appointed to the command of the Highland brigade sent to the Crimea, rendered distinguished service at the battle of the Alma, where he had his horse killed under him, and received the thanks of Lord Raglan, commander-in-chief. He was intrusted with the defence of Balaklava, and with his regiment, the "thin red streak topped with a line of steel," gallantly repulsed a body of Russian cavalry at the battle of the 25th October. Sir Colin was made lieutenant-general in June, 1856, and was soon after created D.C.L., Oxford. On the outbreak of the Indian mutiny in the following year, he was sent to India as commander-in-chief, where he heroically and skilfully applied his vast experience, energy, and decisiveness in quelling, in co-operation with Havelock, Outram, the Lawrences, and other noble men, the formidable rebellion. He directed the relief of Lucknow, and its subsequent siege and capture. And then, after fifty years of service, waiting for the honours and rewards he had so well earned, he was raised to the peerage as Baron Clyde of Clydesdale, made full general, and in 1862 field-marshal. He was also a knight of the Star of India, and a grand officer of the Legion of Honour. Like Wellington, duty was with him the first thing. He loved his profession, loved his soldiers, and was loved by them. He was a strict disciplinarian, but cared little about outward pomp. Though too long neglected and kept in the background, his great ability, knowledge, good sense, modesty, and faithfulness, reaped at last full acknowledgment and reward. Died, in August, 1863, and was buried in Westminster Abbey.

COBBETT, WILLIAM, political and miscellaneous writer, was born in the parish of Farnham, Surrey, in 1762, and brought up from his earliest years on his father's farm. An accident—the mere sight of the stage-coach on its journey to London while he was going to Guildford fair—led him, in 1783, suddenly to quit his home and rustic pursuits, in order to seek his fortune in a wider sphere. His first employment was that of a copying-clerk in Gray's Inn, the miseries of which he eloquently and wittily depicts. After nine months' toilsome drudgery he enlisted as a soldier, and was sent to the depot at Chatham, where he remained about a year, attending closely to his duty, but applying every leisure moment to the improvement of his mind, and particularly to the study of grammar. The regiment at length sailed for Nova Scotia, and was then ordered to St John's, New Brunswick, where he soon attracted the notice of his superiors by his industry, regularity, and habitual temperance; and was appointed serjeant-major of the regiment. After seven years' service the regiment returned to England; and Serjeant-major Cobbett solicited and received his discharge. He next went to France, in order, chiefly, to perfect himself in the language; but seeing that a war with England was inevitable, he embarked for

America; where under the sobriquet of Peter Porcupine, he began to publish his "Observations," and other political pamphlets, all calculated to uphold the dignity of his native country, and oppose the prevalence of French principles. But he found it necessary to quit America; and, on his return to this country, he commenced a daily paper called the *Porcupine*, and afterwards the *Weekly Register*, in which at first he strenuously supported the government. But various articles appeared which were denominated libels, and he was arrested, fined, and imprisoned. From this period a gradual change may be discovered in the tone of Cobbett's political disquisitions, and ere long he was looked upon as the leader of the radical reformers. In 1809 he published a libel relating to the flogging of some men in the local militia, at Ely, in Cambridgeshire; he was found guilty, sentenced to two years' imprisonment in Newgate, to pay a fine of £1000 to the king, and at the expiration of the two years to give security for his good behaviour for seven years, himself in £300, and two securities in £100 each. This severe sentence Cobbett never forgot or forgave. No sooner was he liberated than he reduced the price of his "Register" to 2d., whereby its sale was immensely increased. At length the arbitrary "Six Acts" were passed; and as he firmly believed they were passed for the express purpose of silencing him (particularly the Power of Imprisonment Act), he went to America, and settled in Long Island; from which spot his future "Registers" were dated, till his return to England, in 1819, after that act was repealed. Cobbett brought with him the bones of the celebrated republican, Tom Paine—the man whom above all others he had formerly decried as a regicide and an infidel! and called upon his countrymen to honour them by a magnificent public funeral, and the erection of a splendid monument! In 1820 Mr Cobbett was induced to become a candidate for the representation of Coventry, but met with a signal defeat; and in 1826 he made a similar unsuccessful attempt at Preston. In 1829 and the two following years, the events in Europe gave a more impassioned tone to his writings than they had for some time exhibited. He had the revolutions abroad—the reform bill at home—and the fearful spirit of incendiarism through the agricultural districts, to write about all at once. In consequence of an article which appeared in the "Weekly Political Register" on the 11th of December, 1830, he was, on the 7th of July following, tried before Lord Tenderden and a special jury for the publication of "a libel, with intent to raise discontent in the minds of the labourers in husbandry, and to incite them to acts of violence, and to destroy corn stacks, machinery, and other property." Sir Thomas Denman, then attorney-general, was the leading counsel for the crown; while Mr Cobbett conducted his defence in person; and a more lucid, vigorous, or powerful answer to charges brought by a public prosecution has rarely, if ever, been delivered. The jury deliberated from six o'clock at night till nine the next morning,

and then, stating to the judge that there were six of them of one opinion, and six of another, solicited the court to grant their discharge, and they were discharged accordingly. Thus ended this memorable trial. From that hour till the day of his death he never ceased to hold up those to scorn who had made this last desperate, but impotent, effort to crush him. From the time of his trial, in 1831, up to the passing of the reform bill, in 1832, Cobbett's time was almost equally divided between the three several occupations of writing, travelling, and lecturing; and as his fame was evidently again on the increase, he looked forward to a seat in parliament at the approaching elections. When the proper period arrived (Dec. 1832) he was put in nomination both for Manchester and Oldham; and though defeated at the former place, he gained his election at the latter by an immense majority. In 1833 William Cobbett was a British senator—the long-sought object of his ambition. But it was an element unsuited to his habits; late hours and confinement in a heated atmosphere were never intended for him, who "usually went to bed at nine o'clock and rose at four." During a debate on the malt tax, on the 25th of May, he was suddenly attacked with a disease of the throat, from which he never recovered, and on the 17th of June, 1835, he expired. As an author, independent of his long-continued political pamphlets and periodical works before referred to, he was exceedingly industrious; and in those which relate to rural life he was decidedly the most useful writer of the age, as his "Cottage Economy," "Advice to Young Men," "Rural Hides," &c., abundantly prove. He also wrote Grammars of the English and French languages, which had an extensive circulation; also, "A Year's Residence in America," 20 volumes of "Parliamentary Debates," &c.; but his last work, "The History of the Reformation," is distorted by party views, and does Cobbett more discredit than the coarse invectives and political tergiversations that are to be met with elsewhere in his voluminous writings.

COBDEN, RICHARD, the distinguished advocate and promoter of Free Trade, was born at Dunford, near Midhurst, in Sussex, in 1804. After serving an apprenticeship in a London warehouse, and acting a short time as commercial traveller, he became, in 1830, partner in a firm in the cotton trade at Manchester. Taking a deep interest in the political activity of the time—the discussions on and the passing of the Reform Bill,—he set out in 1834 on a tour through Egypt, Greece, Turkey, and the United States. On his return he commenced his career as political economist by the publication of pamphlets, entitled "England, Ireland, and America," and "Russia." About the same time he took an active part in founding the Manchester "Athenæum," and in procuring the incorporation of the borough. In 1838 the Anti-Corn Law League was formed, and to the furtherance of its object Cobden devoted himself with intense earnestness and unintermitting labour. In 1841 he entered parliament as member for Stockport, for

which he had unsuccessfully stood four years earlier. His mastery of his chosen theme, his full knowledge, logical precision, good sense, and entire sincerity made him at once a man of weight in parliament, and in 1846 he saw the grand struggle ended by the conversion of Sir Robert Peel, and the repeal of the corn laws. He then made a Continental tour, and was received in the chief cities with high honours. His countrymen made acknowledgment of his services by a national subscription, and during his absence he was elected M.P. for the West Riding of Yorkshire, 1847. As a member of the Peace Society he attended congresses at Paris, Frankfurt, and London, and steadily advocated the doctrine of non-intervention. His course in reference to the Crimean war, and the war with China, was opposed to the sentiments of the majority of his countrymen, and on the dissolution of parliament in 1857 he was not re-elected. He again visited America, and while absent was elected for Rochdale. In 1859 he was offered by Lord Palmerston the presidency of the Board of Trade, which he courteously and conscientiously declined. The latest and not the least service he rendered his country was the successful negotiation of the Treaty of Commerce with France. The offer of a baronetcy and a seat in the privy council was made to him, and declined; as was also the offer, made a few months before his death, of the chairmanship of the Board of Audit. His health had been broken for several years, and he died in London, the 2nd April, 1865. The intelligence of his death was received with sincere regret, not only in his own country, but on the Continent.

COBENZEL, CARL, Count von, an eminent Austrian statesman. He was a native of Laybach, and at an early age commenced his public career. During the troubles in the reign of the empress Maria Theresa, his services gave so much satisfaction, that in 1753 he was placed at the head of affairs in the Austrian Netherlands. In this important situation he showed great respect for literature and the arts, and several useful reformations were carried into effect by him. Among his other services was that of founding the Academy of Sciences at Brussels. Died, 1770.

COBENZEL, LUDWIG, Count von, son of the above, and, like him, a diplomatist. At the early age of 27 he was intrusted with a mission to Catharine II. of Russia, and his gallantry and compliance with her taste for theatricals made him a great favourite with her. From 1795 he was concerned in many of the important negotiations between Austria and other powers, until the treaty of Luneville, in 1801. That treaty restoring peace between Austria and France, he was shortly afterwards made minister of state for foreign affairs at Vienna. In 1805 he was dismissed from this office, and he died in 1808.

COLDCASTLE, Sir

TH JOSIAS, duke of
trian field-marshal,
1789 he commanded
the Danube, and, in

connection with the Russian general, Su-
waroff, defeated the Turks, and conquered
Bucharest. In 1793 he defeated the French
at Neerwinden, expelled them from the
Netherlands, and invaded France, taking
Valenciennes, Cambrai, and other places;
but when the English army, under the
duke of York, separated from him, he sus-
tained several defeats, retreated across the
Rhine, and resigned his command. Died,
1815.

COCCÆIUS, JOHN, a Dutch scholar of the
17th century, professor of theology at Leyden.
He taught that the Old Testament was
merely a type of the New; and the book of
Revelation being a principal object of his
attention, he warmly asserted the doctrine
of the Millennium. His followers formed a
rather numerous sect, called Cocceians.
Besides 10 folio volumes on divinity, which
he published during his life, he left a work,
not printed till many years after his death,
entitled "Opera, Anecdota Theologica et
Philologica." Born, 1603; died, 1669.

COCCÆIUS, SAMUEL, son of Henry Coc-
ceius, baron of the empire, who died in 1719,
and successor to his title. He became grand
chancellor of Prussia under Frederick the
Great, and was a chief author of the Freder-
ician code. He also published a valuable
edition of Grotius' "De Jure Belli et Pacis."
Died, 1755.

COCHIN, CHARLES NICHOLAS, an eminent
French engraver and writer of the 18th cen-
tury; member and afterwards secretary of
the Academy of Painting, and keeper of the
drawings of the royal cabinet. Besides his
engravings, which are very numerous, he
published "Lettres sur les Peintures d'Her-
culaneum," "Voyage d'Italie," &c. Born at
Paris, 1715; died, 1790.

COCHLÆUS, JOHANN, an able but bitter
opponent of Luther, Calvin, and other re-
formers, but more especially of the first-
named, whom he censured with great as-
perity in his work, "De Actis et Scriptis
Lutheri." He published, besides this work,
a very curious "History of the Hussites,"
and he maintained a fierce controversy
with Dr Morrison, an English clergyman, on
the subject of the marriage of Henry VIII.
and Anne Boieyn. Died, 1552.

COCHRAN, WILLIAM, a Scotch artist of
considerable reputation. After studying at
Rome, he settled at Glasgow, where he real-
ized a fortune. Of his historical pieces,
"Endymion" and "Dædalus" were held in
high estimation. Born, 1738; died, 1785.

COCHRANE, ARCHIBALD. [DUNDO-
NALD, Earl of.]

COCHRANE, Lord. [DUNDONALD, Earl
of.]

COCHRANE, JOHN DUNDAS, nephew of
Archibald Cochrane, earl of Dundonald, was
an English naval officer. On retiring from
the naval service, he travelled on foot
through France, Spain, and Portugal; and
then through the Russian empire to Kams-
chatka. Of this latter journey he published
an account in two volumes, which contain
much curious information. He was about
to travel on foot across South America, when
he died at Valentin, in Colombia, in 1825.

COCKBURN, Admiral Sir GEORGE, G.C.B.,

a distinguished naval officer, was born in
London in 1771, entered the navy in 1783,
received his commission as Lieutenant in
1793, and as captain of a frigate in 1794.
Appointed to the "Melenger," then cruising
on the Italian coast, he distinguished himself
on several occasions; shared as commander
of the Minerva in the great engagement of Cape
St Vincent, and in 1809, being then commo-
dore, received the thanks of parliament for
the reduction of Martinique, and was ap-
pointed governor of St Pierre. He subse-
quently took an active part in the expedition
to the Scheldt, co-operated in the defence of
Cadiz against the French, and, after cruising
on the Spanish coast for ten years, he was
associated with Sir John Warren as second
in command in the expedition against the
United States, where his operations in
Chesapeake Bay and against Washington
were no less gallant than successful. On his
return to Europe in May, 1815, he hoisted his
flag on the Northumberland; and on the
surrender of Napoleon Buonaparte, he was
selected to convey the ex-emperor to St
Helena, whence he returned the following
year. He now turned his attention to po-
litics; in 1818 he was returned M.P. for
Portsmouth, and appointed a lord of the
Admiralty, in 1820 he sat for Weobly, and in
1826 for Portsmouth. In 1828 he became a
second time a lord of the Admiralty. From
1832 to 1836 he held the command of the
West Indian and North American naval
stations. In 1841 he was returned M.P. for
Ripon; and was appointed senior lord of the
Admiralty, an office which he held till the
resignation of Sir R. Peel's administration,
in 1846. Died, 1853, leaving behind him a
high reputation for gallantry as a sailor, and
efficiency as an administrator.

COCKBURN, HENRY THOMAS, Lord, an
eminent Scotch judge, was born in 1779. He
was called to the bar in 1800, and soon at-
tained distinction as an advocate. He was
the friend of Jeffrey, and one of the first
writers for the Edinburgh Review. In 1830
he was appointed solicitor-general for Scot-
land, and four years later was made a lord
of session. He published the Life of Lord
Jeffrey, and died in 1854. After his death
appeared an interesting volume, entitled
"Memorials of his Time, by Lord Cockburn."

COCKER, EDWARD, arithmetician, was
born about 1632. He was known as a clever
"practitioner in the arts of writing, arith-
metic, and engraving," and published several
books of writing exercises and other school
books. His most popular work, "Cocker's
Arithmetic," was published by Hawkins in
1677, after the author's death. It became
not only the universal text-book in its time,
but long served as the model for others. So
that "according to Cocker" became a pro-
verb. Died, about 1674.

CODRINGTON, Sir EDWARD, British ad-
miral, born in 1770. He entered the navy
at the age of 13, and was present at the
victory of Howe over the French fleet near
Brest in 1794. He took part in the battle of
Trafalgar, in the Walcheren expedition, and
in the Peninsular war. In 1814 he served
in North America, and assisted in the un-
successful attack on New Orleans. The

victory of Navarino and the destruction of the Turkish fleet there in 1827 was his last naval achievement. He was made G.C.B., entered parliament in 1832, and sat there till 1839, when he was appointed commander-in-chief at Portsmouth. Died, 1851.

CODRUS, the 17th and last mythical king of Athens. When the Heraclidae invaded Attica, Codrus devoted his life to save his country. He went, unknown, into the midst of the army of the Heraclidae, and was slain; a sacrifice he was led to make by the oracle, which pronounced that the leader of the conquering army must fall. At his death, it is said that the Athenians, deeming no one worthy to be the successor of their patriotic monarch, established the government by archons.

COEHORN, LOUIS, French general and baron of the empire, was born at Strasburg in 1771. He entered the army early, and served with distinction in the wars of the French revolution. He was at the battle of Austerlitz, was wounded at Auerstadt and at Friedland, distinguished himself at the affair of Ebersberg, took part in the battles of Aspern, Essling, and Wagram, and was made commander of the Legion of Honour and baron of the empire. He died of a wound received at the battle of Leipsic, in October, 1813.

COELLO, ALONZO SANCHEZ, an eminent painter, a native of Portugal, was the pupil of Raphael and of Antonio Moro, whom he succeeded as first painter to Philip II. Some of his works adorn the Escorial. Born, 1515; died, 1590.

COELLO, CLAUDIO, a Spanish painter, born at Madrid in 1621. He was a pupil of Rizzi, and was named painter to the king, Charles II., in 1684. His chef-d'œuvre is the altar-piece in the sacristy of the Escorial, which contains, besides a grand priestly procession, the portraits of the king and his principal nobility. Another fine work is the "Martyrdom of St Stephen," at Salamanca. Died, 1693. It is alleged that Coello died of chagrin at the king's choice of Luca Giordano to paint some parts of the Escorial.

COGAN, THOMAS, physician, born at Kibworth, Leicestershire, in 1736; who, in conjunction with Dr Hawes, founded the Royal Humane Society. He translated the works of Camper, and was the author of several Treatises on the Passions, "Theological Disquisitions," &c. Died in 1813.

COGGESHALLE, RALPH, an English Cistercian monk of the 12th century. He was at Jerusalem when that city was besieged by Saladin; and wrote a "Chronicle of the Holy Land," which was printed in a collection published at Paris in 1725.

COHORN, MENNO, Baron, a celebrated Dutch engineer, who distinguished himself as a military officer at many important sieges and battles, and fortified Namur, Bergen-op-Zoom, and other towns. He was the author of a Treatise on Fortification. Died, 1704.

COKAYNE, Sir ASTON, a poet and dramatist of the 17th century. He was educated at Cambridge; and, after having made the grand tour, fixed his residence at a family estate in Warwickshire. Espousing the cause of Charles I., he was despoiled of his property

by the parliamentarians, to whom he was doubly obnoxious as a royalist and a papist. The collection of his plays and poems is now not often to be met with. Died, 1684.

COKE, Sir EDWARD, lord chief justice of England, was born at Mileham, in Norfolk, in 1532. He studied at Cambridge, and then at the Inner Temple, and was called to the bar in 1578. He rapidly gained a great professional reputation and an immense practice, and was engaged in many cases of great importance. Honours and offices were conferred on him, and in 1592 he became solicitor-general and reader of the Inner Temple. Two years later, notwithstanding the rival claim of Bacon, he obtained the post of attorney-general. He was already a member of parliament and a speaker of the House of Commons. In the numerous prosecutions for treason or sedition in which he was employed, he displayed not only his vast legal knowledge, but his zealous Protestantism, and, too often, excessive bitterness of temper. The last trial in which he took part at the bar was that of the Gunpowder Plot conspirators. He was then made chief justice of the Common Pleas, and seven years afterwards chief justice of the King's Bench. He was the unflinching supporter of the popular liberties, and opponent of arbitrary measures on the part of the king, and thereby fell into disfavour at court. On frivolous pretences he was deprived of his judgeship in 1616, regained, to some extent, the favour of the court, and was member of various commissions, and restored to the privy council. He was again disgraced for his popular sympathies, and imprisoned in the Tower. He sat in the first and third parliaments of Charles I., and took a leading part in procuring the Bill of Rights. He spent the last three years of his long and busy life in peaceful retirement at Stoke Pogis, where he died in 1632. His works consist of the First, Second, Third, and Fourth "Institutes," the first being well known as "Coke upon Littleton," treatises on Copyholds and Fines, and his valuable "Reports."

COLBERT, JEAN BAPTISTE, a celebrated French statesman, to whose talents, activity, and enlarged views, France owes much of its financial and commercial prosperity, was descended from a Scottish family, but born at Rheims, in 1619, where his father was a wine merchant. In 1648 he became clerk to the secretary of state, Le Tellier, whose daughter he married, and through whom he was introduced to Cardinal Mazarin, then first minister. Mazarin took him into his service, and his conduct recommended him to the king as intendant of finances. He was made soon after controller-general of the finances. Subsequently he became superintendent of buildings, secretary of state, and in 1669 minister of the marine; and in every capacity he acted so as to obtain the approbation of the king. To literature and the arts he constantly gave encouragement; he instituted the Academy of Sciences, and that of Sculpture and Painting; and it was at his recommendation that the Royal Observatory was erected. To him, too, Paris owed the erection of many elegant buildings; and, if a

less brilliant minister than some of his predecessors, he certainly conferred more substantial benefits upon his country than most of them. Colbert was a man of resolute will and of manners not likely to win men's liking. The rise of his rival Louvois into the king's favour was an occasion of bitter vexation to him in his latter years, and so strong was the popular feeling against him, that his remains narrowly escaped violence by a night funeral. He died immensely rich, in 1683.

COLBY, THOMAS, superintendent of the Ordnance Survey, was born in 1784. He was a native of Rochester, was educated at the Royal Military Academy at Woolwich, and entered the army. But early in 1802 he was appointed assistant in the Ordnance Survey, and to the discharge of his duties in that field he faithfully devoted himself for the rest of his life. He rose through the successive grades of captain, major, &c. to be major-general, in 1846. He was remarkable for energy, perseverance, patient and cheerful endurance of hardship and privation, and great kind-heartedness. He succeeded General Mudge as director of the Survey in 1820; was a fellow of the Royal Society, and of many other scientific bodies, and assisted in founding the Astronomical Society. Died at Liverpool, 1852.

COLCHESTER, CHARLES ABBOT, Lord, was born at Abingdon, Berks, in 1757; and having received the rudiments of his education at Westminster School, was entered of Christchurch, Oxford, in 1775. While there he was greatly distinguished for his attainments; and a Latin poem on the Czar Peter gained him not only the prize, but also a gold medal from the empress of Russia. After spending some time abroad, he was called to the bar, and practised with every prospect of becoming a popular advocate. His forensic pursuits, however, were but of short continuance, for on entering parliament for Helston he was speedily noticed for his talent and business-like habits, and on the formation of the Addington ministry he was appointed secretary for Ireland, and keeper of the privy seal. He now commenced some useful reforms in Ireland, but before he could complete them he was elected speaker of the House of Commons. In this situation he displayed not only the talent but the tact and address necessary for the duties of his office; and so far was he from being bigoted to his party, that on the division, in 1805, concerning Lord Melville, the numbers for and against that nobleman being equal, he gave the casting vote against him. In 1817 an attack of erysipelas obliged him to resign the office of speaker; on which occasion he was called to the Upper House by the title of Baron Colchester, with a pension of £1000 per annum. Much of the remainder of his life was passed abroad and in Scotland; and he died in May, 1829, leaving two sons. He was chiefly remarkable for his knowledge of the forms of the House, though he was also a fluent and elegant speaker.

COLDEN, CADWALLADER, a Scotch physician and miscellaneous writer. He emigrated to America, and having become a prosperous landowner in New York, he was

in 1761 made lieutenant-governor of that province. In this office, which he held for fourteen years, he displayed great talent. Colden was a voluminous writer, and on a variety of subjects. Among his works are "An Account of the Diseases prevalent in America," a "History of the five Indian Nations," a "Treatise on Gravitation," &c. Linnaeus, to whom he sent many American plants, gave the name of *Coldenia* to a new genus. Died, 1776.

COLE, HENRY, dean of St Paul's, and judge of the arches' court. In the reign of Henry VIII. he held numerous valuable appointments, all of which he resigned on the accession of Edward VI. The reign of Mary restored his prosperity; and it was he who preached the sermon when the venerable Cranmer was burnt. On the accession of Elizabeth, this fact was doubtless remembered to his prejudice; for he was not only stripped of all his preferments, but kept in prison till his death, in 1579. He was the author of some controversial tracts and sermons; and a disputation between him and Cranmer and Ridley is also in print.

COLEBROOKE, HENRY THOMAS, F.R.S., an eminent Orientalist, and director of the Royal Asiatic Society, was the third son of Sir George Colebrooke, bart., a director of the East India Company. He was born in 1765, and in 1782 was appointed to a writership in India. Being sent as one of a deputation to investigate the resources of a part of the country, it led to his publishing "Remarks on the Husbandry and Commerce of Bengal;" in which treatise he advocated a free trade between Great Britain and her eastern possessions. Soon after this he began the study of the Sanscrit language, in which he subsequently became so eminent. The translation of the great "Digest of Hindú Law," which had been compiled under the direction of Sir W. Jones, but left unfinished at his death, was confided to Mr Colebrooke; and while engaged in this work, he was appointed to a judicial situation at Mirzapore, where he completed it in 1796. His other works consist of a "Dictionary of the Sanscrit Language," the "Algebra of the Hindoos," and various treatises on their laws, philosophy, and arithmetic; besides numerous communications to the society of which he was director. He died in March, 1837.

COLERIDGE, SAMUEL TAYLOR, poet, philosopher and theologian, was the youngest child of John Coleridge, vicar of Ottery St Mary, in Devonshire, where he was born in 1772. He was educated at Christ's Hospital and at Jesus College, Cambridge, early distinguishing himself by his classical acquirements, and an extraordinary passion for metaphysical studies. Quitting Cambridge in 1792, he settled soon after at Bristol, projected with Southey and other friends a model colony, "Pantisocracy," on the banks of the Susquehanna, but stayed in England and devoted himself to a literary life. In 1795 he married and removed to Nether Stowey, where he lived three years, and enjoyed the society of Wordsworth. He visited Germany to acquaint himself more fully with the German language and literature, and then settled in

the Lake District. He visited Malta in 1804, and was for more than a year secretary to the governor, Sir Alexander Hall, of whom he gave an interesting account in "The Friend." In 1810 he left his family at Keswick and went to London, and soon after entered the house of his friend Gillman, at Highgate, where he spent the rest of his life. The literary life of Coleridge began with the publication of his poems, in 1794. His first volume was soon followed by others. "Rimorse," a tragedy, "The Ancient Mariner," and "Christabel," are among the best known of his poems. He published also a very admirable translation of Schiller's "Plecomial," and "Death of Wallenstein." He projected a periodical entitled "The Watchman," which did not succeed; preached occasionally, gave popular lectures, and contributed political and literary articles to some of the newspapers. The "Friend" began to appear as a periodical in 1809, and after his settlement in London appeared the completed work, the "Biographia Literaria," "Lay Sermons," "Aids to Reflection," &c. Other works remained unpublished till after his death: these are the "Confessions of an Inquiring Spirit," "Literary Remains," and "Table Talk," edited by his nephew and son-in-law, Henry Nelson Coleridge; and "Essays on his own Times," and "Notes on Shakespeare and the Dramatists," edited by his daughter, Sara Coleridge. As philosopher and theologian the influence of Coleridge has been very great, and probably is so still, notwithstanding the apparent predominance of a less spiritual philosophy than his. Although he did not live to complete the grand system of religious philosophy which he appears to have projected, the "massive fragments" he has left us suffice to show more than the outlines of the vast whole. His writings are pervaded by a spirit not of this world, and for every earnest student they are rich in treasures of truth, wisdom, and faith. Not a few have found in them the special help, guidance, and defence which the critical doubts and discussions of the age make so needful. Churchman and conservative, he was yet a bold speculator on the highest themes, and a genuine liberal in sentiment towards the good and great of all parties. For long years his life was saddened by ill health and pecuniary difficulties. He suffered much, too, from the habit of taking opium, which grew up from an innocent beginning, and became unconquerable. Pure love of truth, rare simplicity of nature, warm affections, love of social intercourse, and a most extraordinary power of eloquent talking without premeditation, were some of his most striking characteristics. He died at Highgate, 25th July, 1834, and was buried in the old churchyard there.

COLERIDGE, HARTLEY, poet and miscellaneous writer, was the eldest son of Samuel Taylor Coleridge, and was born at Clevedon, in 1796. His father soon after settled in the Lake District, and Hartley's mind and heart were cultivated in the constant society of Wordsworth, Southey, Wilson, and other eminent men, and in the midst of the fairest scenes of nature. Imagination was predom-

inant in him, and he displayed it when a boy in the composition of long and extraordinary romances. He entered Oxford University in 1815, and became fellow of Oriel. Unhappily, he soon lost his fellowship, chiefly through a habit of intemperance, and his fortunes were blighted. After a brief stay in London he went back to the north, tried his hand at the task of schoolmaster, and failed, and spent his remaining years in literary labours. His poems, many of which are of rare excellence, and his "Worthies of Yorkshire and Lancashire," with two volumes of "Essays and Marginalia," are the only written remains of his sad life. Died at Iydale, 1849.

COLERIDGE, SARA, sister of Hartley, and only daughter of Samuel Taylor Coleridge, was born at Keswick in 1803. She was brought up in the family of her father's friend, the poet Southey; married her cousin, Henry Nelson Coleridge, in 1829; became a widow in 1843, and died in 1852. At the age of 19 she published a translation of Dobrizhoffer's "Account of the Abipones, an Equestrian People of Paraguay." She wrote an exquisite fairy tale, entitled "Phantasmon," assisted her husband in editing the works of her father, and, on her husband's death, continued the task unaided. Her admirable dissertations and commentaries on those works display a singular mastery of some of the most difficult themes of philosophy and theology, considerable learning, and great logical power. The works edited by her alone are the "Aids to Reflection," "Notes on Shakespeare," and "Essays on his own Times."

COLERIDGE, HENRY NELSON, nephew of Samuel Taylor Coleridge, and editor of several of his works, was born about 1800. He studied at Cambridge and became fellow of King's College. After a visit to the West Indies for the benefit of his health, he was called to the bar and practised in the court of Chancery. In 1829 he married his cousin, Sara Coleridge. He had the profoundest admiration and love for his uncle, S. T. Coleridge, was very much in his society, made notes of his opinions and sentiments, and after his death published specimens of his Table-Talk. He also edited "The Friend," "Confessions of an Inquiring Spirit," and the "Literary Remains" of his uncle; and was author of an "Introduction to the Study of the Greek Classic Poets." Died, 1843.

COLET, JOHN, dean of St Paul's, and founder of St Paul's School, was born at London in 1468. He was educated at Oxford, and then spent several years in completing his studies in France and Italy. He was ordained priest in 1498, and after various preferments in the church, became prebendary and dean of St Paul's in 1505. He had just previously obtained his degree of Doctor of Divinity. Dean Colet was a friend of Erasmus and of many other eminent men of his day; and by his freedom of thought and speech, and his promotion of a spirit of inquiry, he exposed himself to the persecution of the clergy. He founded and endowed St Paul's School in 1512; died in 1519, and was buried in St Paul's Cathedral. He

ELSON, nephew of the poet, and editor of the "Poet" from about 1800. He became fellow of the West of England, he was elected to the court of the poet's cousin, the profoundest of his uncle, S. T. Coleridge, in his society, and sentiments, and specimens, he edited "The Poet's Inquiries" of his "Introduction to Classic Poets."

St Paul's, and was born at Oxford, and was completing his studies in Italy. He was elected after various offices, became president in 1505. He received his degree of doctor, and was a friend of eminent men of thought, and of a spirit of independence and energy; died in 1519, at St Paul's Cathedral. He

left several works, theological and grammatical.

COLIGNI, GASPARD DE, admiral of France and leader of the Huguenots in the civil war, was born in 1517. His father, also named Gaspard, was marshal of France, and took part in the invasion of Italy by Charles VIII., and in the conquest of the Milanese by Louis XII. and Francis I. His mother was a Montmorency. He entered the army at an early age, distinguished himself at the battle of Cerisoles, at the taking of Carignan, and at the battle of Rentil. He was made admiral of France in 1552 by Henry II. At the siege of St Quentin he was taken prisoner by the Spaniards. On the death of Henry II. he retired to his estates, became a convert to the reformed faith, and when the war broke out put himself at the head of the Protestants, with the prince of Condé. They were defeated by the duke of Guise at the battle of Dreux; the indecisive battle of St Denis followed; and the Protestants were defeated at Jarnac and Moncontour. In 1570, after the treaty of St Germain, Coligni was flatteringly received by Catherine de Medici, and a few days later his assassination was attempted by an emissary of the duke of Guise. The king, Charles IX., visited him and professed his regret. On the signal being given for the massacre of St Bartholomew, 24 August, 1572, the duke of Guise with a party of murderers went to the house of the admiral; by these he was stabbed, and thrown out of a window at the feet of the duke of Guise, who had the baseness to kick the still living body. The corpse was exposed for three days to the mob, and then hung, head downwards. It was buried by night in the family tomb, and was in 1786 transferred to the estate of the marquis of Montesquiou-Fézensac, and the monument which he erected was subsequently placed in the museum of French monuments.

COLIN, ALEXANDER, a sculptor of Mechlin, born in 1526, is chiefly known by the beautiful all-reliefs on the sides of the magnificent monument of Maximilian I. at Innsprick, executed in 1563-66 by order of the Emperor Ferdinand I. He was afterwards appointed sculptor to the emperor and to his son, the Archduke Ferdinand. Died, 1612.

COLLIER, JEREMY, an English nonjuring divine and learned writer, was born in 1650. He received his education at Cambridge, and was presented with the rectory of Ampton, in Suffolk: which he resigned on being chosen lecturer at Gray's Inn. At the revolution he refused to take the oaths, and was imprisoned in Newgate for writing in favour of James II. He attended Sir John Friend and Sir William Perkins when they were executed for the "assassination plot." Two nonjuring clergymen who accompanied him on this occasion were taken up, but Collier escaped, and lay hidden until the affair had blown over, when he again made his appearance, and published "Essays on Miscellaneous Subjects." This work, in 3 volumes, obtained him considerable reputation; and his next publication was a spirited attack upon the licentiousness

of the stage. He was, as a matter of course, replied to by many of the dramatic writers of the time; but he had truth on his side, and his works had good effect. He next translated and continued Moreri's Dictionary; and his reputation had now so much increased, that Queen Anne's government offered him valuable church preferment, which, with a rare consistency, he steadily declined. His remaining works were, an "Ecclesiastical History," brought down to the death of Charles II., some sermons, pamphlets, and a translation of the "Meditations" of the Emperor Marcus Aurelius. Died, 1726.

COLLINGWOOD, CUTHBERT, Lord, a celebrated English admiral, was born at Newcastle-upon-Tyne, in 1748. He entered the navy when only 13 years of age, and his services were long, arduous, and valuable. In the action of June 1, 1794, he was flag-captain to Admiral Bowyer on board the Prince; and at the battle of Cape St Vincent, in 1797, he commanded the Excellent. Having attained the rank of vice-admiral of the blue, and being second in command at the battle of Trafalgar, where the hero of England's navy fell, the command of the fleet devolved upon Admiral Collingwood, whose gallant conduct at the onset had called forth an exclamation of delight from Nelson, and to whose admirable skill and judgment, after the battle, the preservation of the captured vessels was chiefly attributable. For this and his other important services he was promoted to the rank of vice-admiral of the red, and elevated to the peerage. He was brave, indefatigable, just, and kind; strictly preserving discipline, while he gained the love of his compatriots, and merited all that a grateful country could bestow on him. His letters, published after his death, which took place while cruising off Minorea, in 1810, show him to have possessed considerable literary ability.

COLLINGWOOD, FRANCIS EDWARD, a captain in the English navy, was a midshipman on board the Victory, at the battle of Trafalgar; and to him is ascribed the honour of being the avenger of Nelson's death, having shot the Frenchman in the maintop of the Redoubtable, who was seen to take deliberate aim at the English hero the moment before he fell. Died, 1835.

COLLINS, ANTHONY, the noted free-thinker, was born at Heston in Middlesex, in 1676. He studied at Cambridge and afterwards at the Temple, became a justice of the peace and treasurer of the county of Essex. He was however chiefly occupied in controversial writing on matters of philosophy and theology. He was the intimate friend of Locke, who very highly esteemed him; he had a long controversy with Dr Samuel Clarke; and provoked by some of his writings innumerable replies. His principal works are "Priestcraft in Perfection;" "Essay on the Thirty-nine Articles;" "Discourse on Freethinking," which was savagely attacked by Bentley; "Philosophical Inquiry concerning Liberty and Necessity;" and "Grounds and Reasons of the Christian Religion." Died at London, 1729.

COLLINS, ARTHUR, a celebrated English

genealogist; author of the English "Peerage" and "Baronetage;" and Lives of Cecil, Lord Burleigh, and Edward the Black Prince, &c. He was rescued from poverty by a pension of £100 per annum, granted to him by George II. Born, 1682; died, 1760.

COLLINS, JOHN, an able English mathematician and accountant. He was for some time in the naval service of Venice against the Turks; but at the restoration he was appointed to the office of accountant to the Exchequer Office, the court of Chancery, &c. He found time to contribute largely to the Transactions of the Royal Society; corresponded with Barrow, Newton, and other eminent mathematicians; and wrote various mathematical works. Born, 1624; died, 1683.

COLLINS, WILLIAM, a highly-gifted but ill-fated English poet; author of odes, elegies, &c. He was born, in 1720, at Chichester, and received his education at Winchester and Oxford. In 1744, he settled in London, but leading a dissipated life, suffered from poverty even beyond the common lot of poets. The death of his uncle, Colonel Martin, who bequeathed him a legacy of £2000, raised him from this abject condition; but his health and spirits were broken, and after lingering for some time in a state of mental imbecility, soothed at last by a sister's love, he died at Chichester, in 1756. His odes, which when published were utterly disregarded, are unquestionably among the finest of English lyrical poems. One of the most celebrated is the "Ode to the Passions." A monument, executed by Flaxman, was erected to his memory by public subscription, and his life was written by Dr Johnson, who loved him, and speaks of him with great tenderness.

COLLINS, WILLIAM, an English painter of distinguished merit, was born in London, 1787. He inherited an enthusiastic admiration for the beauties of nature from both his parents. His father, one of the first picture-dealers of his time, was a man of considerable literary attainments; and his friendship with Morland the painter early led to his son's initiation into the mysteries of the pencil. In 1807 he became a student of the Royal Academy, and having prosecuted his studies with great zeal and success, he was chosen an associate in 1814, and elected an academician in 1820. From this period he continued to produce those coast and cottage scenes which gained for him his early reputation, and marked him out as one of the most thorough English artists of his time. With a view of studying the works of the old masters and of observing nature in new forms, he visited Italy in 1836, and spent two years there. Down to the year 1846 he contributed regularly to every exhibition, attempting occasionally historical painting, but winning fresh laurels chiefly by frequent revivals of those more domestic subjects by which he had won his early fame. True to his "first love," his last production, "Early Morning," was an English sea-piece. Among his favourite works are the "Shrimpers," "Frost Scene," "Cromer Sands," and "Prawn Catchers," the last of which is in the National Gallery. Mr Collins was in-

bued with earnest but unaffected piety; and his death, though not unexpected, caused deep regret to a large circle of attached friends and admirers. Died, 1847.

COLLINSON, PETER, an English botanist, to whom we are indebted for the introduction of many ornamental shrubs and plants into our gardens, was born in 1694. He was intimate with Franklin and Linnaeus, the latter of whom gave the name *Collinsonia* to a genus of plants. Died, 1768.

COLLOREDO, RUDOLPH, count of Waldsee, imperial field-marshal, was born in 1585. He distinguished himself greatly, and was seven times wounded at the battle of Lutzen in 1632. His greatest achievement perhaps was the successful defence of Prague against the Swedes in 1648. He was named governor of the city, and died there in 1657.

COLLOREDO-WENZEL, JOHANN NEPOMUCENE FRANZ, Count of, imperial field-marshal, was born in 1738. He served in the Seven Years' War, became chamberlain to the emperor Joseph II., and was made a knight of the Teutonic order. He served with Marshal Laudon against the Turks in 1789, and distinguished himself at the siege of Belgrade. In 1793 he joined the prince of Coburg in the Netherlands, and took a distinguished part in the battle of Neerwinden. He became afterwards president of the Aulic Council and field-marshal. Died, 1822.

COLLOREDO-MANSFIELD, JEROME, Count of, Austrian general, was born in 1775. He entered the army in 1792, and served in the expedition under the duke of Brunswick against France. Two years later he was taken prisoner by the French, but made his escape. He was severely wounded in the attack on Bregentz in 1796; at Verona in 1809, when he gallantly held his ground against the French, and secured the retreat of the Austrian army; at the battle of Leipzig in 1813, when he had succeeded to the command after the fall of the prince of Hesse-Homburg and the capture of General Merveldt; and at the combat near the bridge of Barce in the campaign of 1814. Died, 1822.

COLLOT D'HERBOIS, JEAN MARIE, one of the most sanguinary leaders in the French revolution, was born at Paris in 1750. Before the revolution he was a clever strolling player. He joined the club of the Jacobins, and soon gained a great ascendancy; won the prize for his "Almanach du Père Gerard;" and became a member of the Convention, and of the Committee of Public Safety. He was charged with several provincial missions, and made himself a name of infamy by his execution of them. In 1793 he went to Lyons, where he had more than 16,000 persons put to death, and made it a capital crime to look sad or pitiful. An attempt was made to assassinate him, which only made him more popular, and he contributed powerfully to the fall of Robespierre. He was soon after denounced, arrested, and in March, 1795, transported to Cayenne, where he died, January, 1796.

in the literary world by their translations from Gesner and Bodmer. He was a pupil of Antony and William Walker, and showed superior talent in the stippled style of engraving; his portraits in that line stand unrivalled. Among them are those of George IV. and the Princess Charlotte. Died, 1827.

COLMAN, GEORGE, a dramatic writer and accomplished scholar of the 18th century. He was born at Florence, in 1733, where his father at that time resided as the British envoy, and his mother was sister to the countess of Bath. Having received his education at Westminster School and at Christchurch, Oxford, he turned his attention to the law as a profession; but his writings in *The Connoisseur* having met with success, gave him a bias towards political literature, and he accordingly abandoned the graver pursuits of legal science. His first dramatic attempt was "Polly Honeycombe," which was performed at Drury Lane with great, though only temporary, success. In the following year, 1761, he produced his comedy of the "Jealous Wife," which at once became popular and has ever since kept the stage. "The clandestine Marriage," "The English Merchant," &c., added to his fame; and he wrote a number of other pieces, which, though inferior to these, were by no means deficient in merit. Lord Bath and General Pulteney, at their deaths, left him considerable legacies, which enabled him to purchase a share in Covent Garden Theatre. Disputes arising between himself and the other proprietors, he very soon disposed of this property, and purchased the little theatre in the Haymarket, which he conducted until an attack of paralysis reduced him to a state of mental imbecility. In addition to his writings mentioned above, he translated the comedies of Terence, and Horace *De Arte Poetica*. Died, 1794. His portrait, painted by Gainsborough, is in the National Portrait Gallery.

COLMAN, GEORGE, THE YOUNGER, an eminent dramatist and wit, son of the above, was born in 1762, and received his education at Westminster School, Christchurch College, Oxford, and King's College, Aberdeen. On his return from college he was entered a student of Lincoln's Inn. Circumstances, however, as well as inclination, led him to abandon the profession of the law. In 1784 his first acknowledged play, called "Two to One," was acted. The success of this exceeded his most sanguine expectations. In 1787 his celebrated opera of "Inkle and Yarico" appeared, and at once stamped his fame. Shortly after this the elder Colman was attacked with paralysis, which terminating in mental imbecility, his son presided over the Haymarket Theatre, and subsequently became its proprietor. The prolific pen of "George Colman the younger" seemed never idle; and yet, perhaps, there was scarcely a man in London who spent more hours in convivial pleasures, or whose brilliant flashes of wit so often "set the table in a roar." His principal works, chronologically arranged, were "The Mountaineers," "The Iron Chest," "The Heir at Law," "Blue Beard," "The Review, or Wags of Windsor," "The

Poor Gentleman," "Love laughs at Locksmiths," "John Bull," &c. Among his other compositions are "Handom Records," "My Nightgown and Slippers," "Broad Grins," &c. George IV. appointed him to the situation of licenser and examiner of plays, an office for which he was admirably qualified. Died, 1836.

COLOCOTRONIS, THEOD., one of the heroes of modern Greece, was born in Messenia, 1770; distinguished himself in numerous engagements with the Turkish oppressors of his country, and contributed, by his heroic conduct during the insurrection, to the final triumph of the Greek cause in 1828. After the death of Capo d'Istria, he became a member of the provisional government; but having conspired against the regency established till the majority of King Otho in 1834, he was condemned to death, and owed his escape to the clemency of the king. Died, 1843.

COLONNA, FRANCESCO, a Dominican monk, born at Venice about 1430; known only as author of a strange book with the strange title of "Poliphili Hyperotomachia," which appeared in 1499, and respecting which the greatest diversity of opinion has existed. A lady is celebrated in it with whom the author was in love, and whose death led him to become a monk. It contains some passages of architectural descriptions, for which some have commended it to students of architecture. It has been several times translated into French. Fra Francesco died in 1527.

COLONNA, FABIO, or in Latin, FABIVS COLUMNNA, Italian botanist, born at Naples in 1567, wrote many botanical and scientific works, was the correspondent of the most eminent naturalists of his time, and died in 1650.

COLONNA, FRANCISCO MARIA POMPEO, born in Italy about 1649, was a student of the sciences and a follower of the alchemists. He wrote "Secrets of the Philosophy of the Ancients," "Abridgment of the Doctrine of Paracelsus," &c. He was burnt to death in his house, at Paris, in 1726.

COLONNA, PROSPERO, son of Antonio Colonna, prince of Salerno, was a distinguished military officer. He assisted Charles VIII. of France to conquer Naples, but subsequently aided in retaking it for the house of Arragon. He served under the great Gonsalvo, and was charged by him to conduct Caesar Borgia prisoner to Spain. In 1513 Prospero defeated the Venetians near Vicenza, was captured by the French two years later, but won several victories over them in 1521 and the following years. Died, 1523.

COLONNA, POMPEO, nephew of the above, a restless and intriguing Roman cardinal, who quarrelled in succession with the popes Julius II., Leo X., and Clement VII., and had part in all the troubles of the court of Rome. When Clement VII. was the prisoner of Constable de Bourbon, Pompeo exerted his influence for his liberation. He at length became viceroy of Naples. Died, 1532.

COLONNA, VITTORIA, marchioness of Pesenra, a celebrated Italian poetess. She married at the age of 17, and was a widow

at 35, when, inconsolable for her loss, she retired and passed the remaining years of her life in solitude. Her poems, "Rime Spirituale," are tender and elegant expressions of sorrow and of religious consolation, and have been frequently reprinted. Born, 1490; died, 1547.

COLOTHES, or COLOTES, a Greek sculptor, contemporary with Phidias, whom he is said to have assisted in the statue of the Olympian Zeus. Several of his works are spoken of in very high terms, especially an ivory figure of Esculapius. Lived, about 440 B.C.

COLQUHOUN, PATRICK, LL.D., a writer on statistics and criminal jurisprudence. He was a native of Dumbarton, in Scotland, born in 1745, and early in life went to America. On his return from that country he settled at Glasgow as a merchant, and became lord provost of the city, and president of its chamber of commerce. Subsequently he removed to London, and in 1792 he was made a police magistrate, in which situation he was distinguished by great ability and untiring assiduity. He published several valuable works, including a "Treatise on the Police of the Metropolis," a tract on the "Education of the Labouring Classes," "A Treatise on the Population, Wealth, Power, and Resources of the British Empire," &c. Died, 1820, aged 75.

COLSTON, EDWARD, an English merchant, memorable for his munificence and philanthropy. During his lifetime he expended upwards of £70,000 in aiding various public charities, and he is supposed to have privately given away an equal amount. Notwithstanding his public and private benevolence, however, he left £100,000 among his relatives and dependants. In addition to his other good works, he founded and endowed St. Augustine's School, Bristol, for the education of 100 boys, besides almshouses in other places. His statue, executed by Rysbrack, stands in the church of All Saints, Bristol. Born, 1638; died, 1721.

COLT, SAMUEL, inventor of the revolver, was born at Hartford, Connecticut, in 1814. He obtained the patent for his invention in 1835, a model of the pistol having been made, it is said, in 1829. His first attempt to establish a factory was not successful, but he ultimately formed a company and carried on a prosperous business at Hartford. Died there, 1862.

COLTON, CALED C., a writer of considerable talent, but of eccentric and discreditable habits, was educated at Eton and King's College, Cambridge, where he graduated and obtained a fellowship. He first attracted notice by the publication of a pamphlet, entitled "A plain and authentic Narrative of the Sampford Ghost," in which he attempted to prove that certain occurrences which took place in a house at Sampford Peverell, near Tiverton, originated in supernatural agency. He also wrote a satirical poem, entitled "Hypocriisy," and another on "Napoleon;" but he obtained his chief reputation from "Lacon, or Many Things in Few Words," which he published in 1820. Though a benefited clergyman, holding the vicarage of Kew with Petersham, in Surrey,

he was a well-known frequenter of the gaming-table; and having absconded, to avoid his creditors, in 1828, a successor was appointed to his living. He then went to America; but subsequently lived in Paris, a professed gamester; and it is said that he gained by this vicious course of life, in two years only, the sum of £25,000. He blew out his brains while on a visit to a friend at Fontainebleau, in 1832. We copy from his own "Lacon" the following apophthegm:—"The gamester, if he die a martyr to his profession, is doubly ruined. He adds his soul to every other loss, and, by the act of suicide, renounces earth to forfeit heaven!"

COLUMBA, ST., an early preacher of Christianity in Scotland, usually called the Apostle of the Highlanders. He was born in Ireland, and is known as the founder of the Culdees, and of the famous monastery of Iona. He lived in the sixth century, and is said to have died about its close. Very little can be certainly ascertained of his history.

COLUMBUS, CHRISTOPHER, the discoverer of America, was born at Genoa, of an illustrious family originally of Piacenza, about 1445. He was sent to study at the university of Pavia, where he showed a strong passion for geographical knowledge, together with an irresistible inclination for the sea. He went to sea about 1460, and passed about thirty years of his life in visiting the various parts of the then known world. His voyages extended northward to Iceland and indeed considerably beyond it, and southward to the coast of Guinea. His imagination was kindled by the geographical discoveries of the Portuguese. He read the Geography of Ptolemy, and the Travels of Marco Polo, pored over the globe of Martin Behaim and the charts of Andrea Bianco, and firmly believed he could reach the half-mythical Cipangu and Cathay by sailing westward from Europe. The use of the astrolabe was proposed by Behaim, and contributed very greatly to the success of such an enterprise as Columbus was beginning to meditate. After many years spent in the active duties of a maritime life, with his mind bent on the acquisition of geographical and nautical science, he went to Lisbon, where an elder brother of his was settled; married the orphan daughter of Palastrello, an Italian navigator; and studied all the maps and charts he could procure, making occasional voyages; in which alternation of theoretical and practical improvement he spent several years. His own reflections, corroborated by facts of which he was informed by various seamen, led him at length to the conclusion, that there were unknown lands separated from Europe by the Atlantic. After vainly seeking aid from Genoa, Portugal, and England, he at length obtained an introduction first to King Ferdinand, and afterwards to his Queen Isabella, and, not without several disappointments, induced them to equip and man three vessels for a voyage of discovery; it being stipulated that Columbus should have a tenth of all profits, and be viceroy of the land he expected to discover. He set sail from Palos, on his grand adventure, on the 2nd of August, 1492; and, after sailing for two

months, the new variation alarmed the point of view was often produced his home they how Guana discovered faith and for his d bent his on the p October, other la mingo or West In ceeded, some of his return with al other va king and cited the sovereign second voyage following voyage, reached in 1499; dispute a our of gl mains wi command various e by his c merely a governor by the co country outrage v return, h sovereign dignities him. COLUMBUS, CHRISTOPHER, celebrated sent by h discovery. Meanwh taken th the hon nobled i accompa where h however and died.

COLUMBUS, a na at Rome dius; ar volumi "De Re farming,

months, was in imminent danger of losing the reward of all his study and toil, the variation of the needle having so much alarmed his crews, that they were on the point of breaking into open mutiny, and he was obliged to promise that if three days produced no discovery, he would commence his homeward voyage. On the third day they were in sight of one of the Bahamas, Guamhani or San Salvador; and the noble discoverer had the sweetest reward of his faith and enthusiasm, the best compensation for his disappointments and trials, when he bent his knees in worship, not without tears, on the promised new land. It was the 12th October, 1492. He then sailed in search of other lands, and discovered Cuba, St Domingo or Hispaniola, and some other of the West India Islands. Having thus far succeeded, he built a fort at Hispaniola, left some of his men there, and then set out on his return to Europe, where he was received with almost royal honours. The gold and other valuables which he presented to the king and queen in token of his success, excited the spirit of adventure in both the sovereigns and their subjects, and in his second voyage he had no difficulty in obtaining followers. It was not until his third voyage, made in 1498, that he saw the mainland of America, which Sebastian Cabot reached before him, and Amerigo Vespucci in 1499; and though there has been much dispute as to the actual priority, the honour of giving a name to the new world remains with the latter. Having assumed the command of the settlement at Hispaniola, various complaints were made against him by his enemies, and Columbus was not merely displaced, but Bobadilla, a new governor, who had been despatched thither by the court of Spain, even sent him to that country in chains. Columbus endured this outrage with noble equanimity; and on his return, having obtained an audience of his sovereigns, was partially restored to his dignities; but full justice was never awarded him. Yet, notwithstanding this shameful treatment, he made another voyage, in which he encountered every imaginable disaster from storms and shipwreck; and two years after his return, his noble mind sunk under the load of injustice, oppression, and poverty. He died at Valladolid, in 1506.

COLUMBUS, BARTHOLOMEW, brother of Christopher, was a skillful cosmographer, and celebrated for his globes and maps. He was sent by his brother to lay his vast project of discovery before Henry VII. of England. Meanwhile the court of Spain had undertaken the enterprise. Bartholomew shared the honours done to his brother, was enabled in 1493, and in the following year accompanied Christopher to St Domingo, where he remained as governor. He made, however, several expeditions of discovery, and died, in St Domingo, in 1514.

COLUMELLA, LUCIUS JUNIUS MODERATUS, a native of Gades, in Spain. He resided at Rome in the reign of the Emperor Claudius; and, besides other works, wrote a voluminous and interesting treatise entitled "De Re Rustica," which embraces not only farming, but many connected subjects, gar-

dening being treated in one book which is written in verse. The works of Columella have been frequently republished.

COMBE, Dr ANDREW, one of the most eminent medical practitioners and writers of our time, was born at Edinburgh, 1797. After studying at the High School, and at the college, he was apprenticed in 1812 to a general medical practitioner. Attracted and interested by the lectures of Dr Spurzheim in Edinburgh, in 1815, he sought his acquaintance, and having in 1817 obtained his diploma from the College of Surgeons, he proceeded to Paris to prosecute his studies in the hospitals of that capital under the advice of Dr Spurzheim. Here he remained for two years; and after a short tour in Switzerland and Italy he returned to Edinburgh in 1819. Soon after he reached home he was seized with symptoms of pulmonary consumption; and from this time, 1820, to the day of his death, he was, though with many intervals of comparative health, a confirmed invalid. Immediately upon his seizure he determined to go to the south of France, but had not got farther than London when he found himself too unwell to travel, and returned home; there he temporarily recovered, helped to found the Phrenological Society, and in the ensuing August set off again to the Mediterranean, on whose shores he spent two years. He then determined to begin practice in Edinburgh, where his high standing among his professional brethren, and general character for good sense, talent, and strict conscientiousness, did not leave him long unemployed. During the next few years he attained great repute from his able papers in reply to the opponents of phrenology, and also rose high in his profession. In 1825 he took the degree of M. D., and two years later was elected president of the Phrenological Society. During these and several following years, he contributed many interesting papers to the Phrenological Journal, and published a work on mental derangement; and in the course of an extensive practice addressed those invaluable letters to his patients, which, combining so happily the earnest and benevolent friend with the able physician and philosopher, must have strengthened his influence as well as greatly added to his usefulness. In 1831 his health again gave way, and he was obliged to pass the winter in Italy, and for some years altogether to abandon the practice of his profession. In 1836 he was appointed physician to the king of the Belgians, but after a short trial he was obliged to resign the resident appointment, finding his strength inadequate to the due performance of his duties. Between the years 1834-39 he published the three great works for which he had been long and carefully collecting and arranging the materials, "The Principles of Physiology applied to the Preservation of Health and to Education," "The Physiology of Digestion," and "The Moral and Physical Management of Infancy." In 1838 he was appointed one of the physicians extraordinary to the queen in Scotland. In the autumn of 1844 his health at last gave way so threateningly, as to oblige him to give up all work, and

to try the climate of Madern. There he passed two successive winters. After this he only left home once again, and that was to make a voyage to America, in the summer preceding his death. Surrounded by attached friends, and tended with faithful and most loving care, his life of usefulness was peacefully closed in the autumn of 1847.

COMBE, GEORGE, the eminent phrenologist, was born at Edinburgh, in 1788. He was the brother of Dr Andrew Combe, with whom he was associated through life in various schemes of moral and social amelioration. After pursuing his studies at the High School and university of his native city, he was articled to a lawyer, and passed as writer to the Signet in 1812. In 1816 he became a convert to the views of Dr Spurzheim, who was then on a visit to Edinburgh, and in the course of three years had so familiarized himself with the subject that he published "Essays on Phrenology," which he afterwards expanded into his "System of Phrenology," and in 1824 founded the "Phrenological Journal," as the means of promulgating his views. In 1828 he gave to the world his ablest work, the "Constitution of Man;" this work excited the liveliest controversy at the time of its appearance, but the validity of the main principles on which it was based has now been generally recognized. During all this period, and for some time afterwards, Mr Combe had followed his professional pursuits: but in 1837 he addicted himself exclusively to literature: visited the United States and Germany, and though himself in delicate health, devoted his whole time to the promulgation of his moral, social, and philosophical views by means of lectures and the press. Besides publishing his "Notes on America," in 1841, his "Notes on the Reformation of Germany," in 1816, "the Life" of his brother, Dr Andrew Combe, and various other works, Mr Combe was one of the clearest expositors of monetary science, and his contributions to the "Scotsman" on this and kindred subjects gave him as high rank as a political economist, as he had before enjoyed as a phrenologist and philosopher. Died, 1858.

COMBER, Dr THOMAS, dean of Carlisle. On the breaking out of the civil war he was deprived of his preferments and thrown into prison; but he lived to witness the restoration of Charles II. Died, 1663.

COMBER, Dr THOMAS, dean of Durham; author of "A Companion to the Temple," "A Companion to the Altar," "An Account of the Roman Forgeries in the Councils during the first Four Centuries," &c. Died, 1698.

COMBERMERE, STAPLETON COTTON, Viscount and Baron, field-marshal, was born at Llewenny Hall, in Denbighshire, in 1769. He was educated at Westminster School, entered the army in 1790, and three years later served under the duke of York in Flanders, in the first campaigns of the long wars of the French revolution. In 1795 he took part in the conquest of the Cape of Good Hope, and went thence to India, where he shared in the final conflict with Tippoo Saib, taking part in the battle of Mallavelly, and the siege of Seringapatam.

In 1808 he was sent to Spain in command of a brigade of cavalry; distinguished himself at Tudavera; obtained the local rank of lieutenant-general, and in 1810 was appointed commander of the allied cavalry under Wellington. In that capacity he served with distinction through the remaining campaigns of the war, rendering important services at Busaco, Fuentes d'Onor, Salamanca, where he was severely wounded, El Bodon, Orthez, and Toulouse. He twice received the thanks of both Houses of Parliament, and was raised to the peerage as Baron Combermere, in 1814. Three years later he was named governor of Barbadoes, and in 1822 commander-in-chief in India, where he won fresh honour by the capture of Bhurtpore, in 1825. In the following year he was created viscount. He held for nearly 40 years the colonelcy of the 1st Life Guards, and was made field-marshal in 1855. Lord Combermere was also G.C.B., G.C.H., knight of the Star of India, and constable of the Tower of London. "For more than 40 years," says the *Times*, "his brilliant sword was sheathed, but the nation did not prove careless of the old soldier's presence." His manly figure was one of the sights of Totten Row, and to the last was seen and welcomed in all state pageants and court ceremonies. Viscount Combermere married, in 1801, the eldest daughter of the third duke of Newcastle; who dying in 1807, he married a second time in 1814; and a third time in 1838. He died, at Clifton, February 21, 1865. The Memoirs and Correspondence of Lord Combermere are announced as in the press (November, 1865).

COMENIUS, JOHN AMOS, a Moravian minister. He for some time officiated as pastor to a congregation at Fulneck, in Moravia, but was driven thence by the invasion of the Spaniards, and settled in Poland, where he published a work, entitled "Janua Linguarum," which obtained him so great a celebrity that he was invited to England; but the breaking out of the civil war rendered his stay both brief and unprofitable, and after visiting Sweden, Prussia, and Poland, where he was engaged in explaining his proposed reform in teaching languages, he settled for the remainder of his life at Amsterdam. Among the other works of Comenius are "Orbis sensualium pictus," "Novissima Linguarum Methodus," &c. Born, 1592; died, 1671.

COMES, NATALIS, the Latinized name of NAFALE CONTI, an Italian poet and miscellaneous writer, was a native of Milan, but settled early at Venice. Besides his poems he wrote a work on mythology, commentaries on the Turkish war in Malta, and a history of his own time. Born, about 1520.

COMINES, PHILIPPE DE, Lord of Argenton, a great French historian, was born in Flanders in 1447. He entered the service of Charles the Bold, duke of Burgundy, and was present at the battle of Montlhéry. In 1472 he was sent by Charles to the French court, entered the service of Louis XI., and remained in it till the king's death in 1483. Litigation then arose respecting some estates given him by Louis, and he was imprisoned. On his release he was made a councillor by

Charles VII., and followed him in his invasion of Italy. He retired in 1498, and died, 1511. His "Mémoires" present a very vivid and authentic portraiture of the court of Louis XI., and of the principal events and general character of the age in which he lived.

COMMANDINO, FEDERICO, an Italian mathematician, born at Urbino, 1509. He made himself a great reputation by his learned and careful translations and editions of Archimedes, Apollonius, and other ancient mathematicians. Died, 1575.

COMMELIN, JEROME, a learned French printer. He established his press first at Geneva, and subsequently at Heidelberg; and published several of the Greek and Latin authors, with notes from his own pen. Died, 1598.

COMMELIN, ISAAC, Dutch historian, was born at Amsterdam, in 1598. He was long engaged in preparing a History of Amsterdam, which he did not live to complete, but which was published by his younger son, Caspar, in 1694. The principal works of Isaac Commelin are, "Lives of the Stadtholders William I. and Maurice," "Life of Frederick Henry," and a collection of Acts of the Government of Holland. Died, 1676.

COMMELIN, JOHN, Dutch botanist, was oldest son of the preceding, and was born at Amsterdam, in 1629. He founded, and was first director of, the fine Botanical Garden of that city. Among his works, the most esteemed is, "Horti Medici Amstelodami rariorum Plantarum Descriptio et Icones." Died, 1692.

COMMELIN, CASPAR, Dutch physician and botanist, was nephew of the preceding, and was born at Amsterdam, in 1667. He became professor of botany there; published "Horti Medici Amstelodami Plantarum rariorum exoticarum," as a continuation of his uncle's work; "Flora Malabarica," &c. Died, 1751.

COMMERSON, PHILIBERT, a French physician and botanist. In the latter character he evinced great zeal and industry, and his collection was immense. He was the friend and correspondent of Linneus, Haller, and Lalande, and was sent as naturalist with the expedition of discovery under Bougainville. He remained in the Isle of France, and died there. He wrote a work on Ichthyology, two quarto volumes; and the "Martyrology of Botany," an account of those who had lost their lives in botanical pursuits. Born, 1721; died, 1773.

COMMODUS, LUCIUS AURELIUS, Roman emperor, was the son of the wise and virtuous Marcus Aurelius, and was born A. D. 161. He was most carefully educated, and accompanied his father on several military expeditions. He succeeded him in 180, and after a short period of orderly government he dismissed his wisest counsellors, and gave himself up to the lowest society, and the most shameless habits. The administration was in the hands of a series of his favourites, and confiscations and murders were the ordinary occurrences of the day. He went so far in defiance of decency as to fight in the circus like a gladiator, and then gave himself out for a god, and would be worship-

ped as Hercules. He was at last poisoned by a concubine, whom he intended to put to death; and then strangled by an athlete, A. D. 192. The vices and misgovernment of Commodus contributed powerfully to hasten the fall of the empire.

COMNENA. [ANNA COMNENA.]

COMNENUS. [ALEXIS COMNENUS, ANDRONICUS I., and MANUEL.]

COMNENUS, DEMETRIUS STEPHANOPOLI CONSTANTINE, the supposed descendant of the celebrated family of the Comneni, which long sat upon the throne of the eastern empire, was born in 1749, in the island of Corsica. Having been driven from their possessions in the East by the Turks, they at length emigrated in the 17th century, and, with a colony of Greeks, settled in Corsica, where their leader inherited the title and dignity of *capitano*, until Corsica became united to France. After studying at Rome, with the intention of becoming an ecclesiastic, Demetrius entered into the service of France, and obtained a captaincy in a regiment of dragoons in 1778. At the beginning of the revolution he fought under the banners of Condé, and went into exile with other royalists; but he returned to France in 1802, and lived on a pension of 4000 francs, assigned to him by Napoleon. Louis XVIII. confirmed this stipend, and made him *maréchal de camp*, and knight of St. Louis. He died in 1821.

COMPTON, HENRY, son of Spencer Compton, earl of Northampton, one of the bravest adherents of Charles I. At the restoration he obtained a cornetcy of dragoons. He soon, however, quitted the army for the church; and, after various preferments, was, in 1675, promoted to the bishopric of London. He opposed the spirit of Popery during the reign of James II., and was one of the most zealous friends of the prince of Orange. When Archbishop Sancroft refused to crown William and Mary, Compton performed that ceremony. Besides many sermons and letters, he wrote a treatise on the Communion, and translated from the Italian the Life of Donna Olympia Maldachini. Died, 1718.

COMTE, AUGUSTE, the founder of the system of philosophy called the "Positive," was born at Montpellier in 1795, and educated at Paris in the Polytechnic School, where he distinguished himself by his love of speculation, and his profound dissatisfaction with the existing philosophical schools and actual social condition of his country. On leaving college he became acquainted with the celebrated Saint-Simon, and being attracted by his personal character, and charmed by the originality of his views, he joined the band of brilliant disciples which the genius and ambition of that distinguished social reformer gathered around him. On the death of its founder in 1825, Comte deserted the Saint-Simonian school, to found one of his own, and during the next twenty years devoted himself to the elaboration of an original system of scientific thought—since known as the "Positive Philosophy." The great text-book of his system, entitled "Cours de Philosophie Positive," extending to six thick volumes, gradually appeared at intervals

between the years 1830 and 1842. During this time he led a quiet, scientific life, as professor of mathematics in the Ecole Polytechnique; and almost immediately after the conclusion of his great work published two popular treatises connected with the subject of his chair, one on Analytical Geometry, the other on Astronomy, both of which were very successful. In 1844 he issued an outline and defence of his system in a single volume, entitled "Discours sur l'Ensemble du Positivisme." Whatever may be thought of the Positive Philosophy, either as to the perfection of the parts or as to its completeness as a whole—and it is undoubtedly open to criticism in both respects—it cannot be denied that to Comte belongs the honour of being the first who grasped the true principle for the co-ordination of the sciences; that in an age of vast speculative and scientific activity he first rose from the empirical classification of facts to a genuine science of principles. Even his enemies allow that he possessed great general force of intellect, rare speculative power, and that he reaches the happiest generalizations in every branch of science he undertakes to expound. The serious defect of his system on the moral side, its omission to recognize and provide for the religious element in man, was felt at last by Comte himself. In his last years he made a desperate effort to remedy it by projecting a new worship. His "Culte Systematique de l'Humanité" is an elaborate attempt to actualize the vague idea of hero-worship. He expounded his views on this worship of man by man still further in the "Catechisme Positiviste" and the "Traité de Sociologie," and gave himself out to be chief priest of the new religion. This strange attempt, though of course a miserable failure, is significant enough as a confession of a solemn truth, denied, or at least unrecognized, by Positivism. The "Positive Philosophy" was first introduced to English students in a series of papers by Mr Lewes, which appeared in the "Leader," and have since been collected and published as a separate volume in "Bohn's Scientific Library." A condensed translation of M. Comte's great work has also been published by Miss Martineau. An important work entitled "Auguste Comte and Positivism," by John Stuart Mill, has recently appeared (1865). Died, 1857.

CONCINO CONCINI (more celebrated and better known by his title of Marshal d'Ancre) was by birth a Florentine, and accompanied Mary de Medici, the wife of Henry IV., to France. He rapidly obtained preferment, and after the death of Henry IV. so much abused the influence he had over the queen regent, that when her son, Louis XIII., became old enough to act for himself, he consented to the assassination of the marquis, which accordingly took place in 1617; and in the same year his wife was burned to death as a sorceress. The judges, who tried her on this absurd charge, demanded of her by what arts she had gained her ascendancy over the queen; when she made the memorable reply, "My only sorcery has been the influence of a strong mind over a weak one."

CONDAMINE, CHARLES MARIE DE LA, French mathematician, was born at Paris in

1701. He served for a short time in the army, and then entered the Academy of Sciences as assistant-chemist. After a visit to the coasts of the Mediterranean, and a stay of several months at Constantinople, he went in 1735 to Peru, where he took part with Bouguer and Godin in the measurement of an arc of the meridian. Painful jealousies and discussions arose between the leaders of this expedition, which only returned to Europe in 1743. La Condamine afterwards visited Italy and England, and was admitted to the Royal Society. He was remarkable for his gaiety, courage, and kindheartedness. His principal works are a Narrative of his Travels in South America, "La Figure de la Terre," "Histoire des Pyramides de Quito," &c. He was a member of the French Academy, and of the Academies of Science of Paris, Berlin, and St Petersburg. Died, 1774.

CONDÉ, LOUIS I. DE BOURBON, Prince of, son of Charles, duke of Vendôme, was born in 1530. He married the grand-niece of the Constable Montmorenci. He served his first campaigns in Piedmont, but first distinguished himself at the defence of Metz, besieged by Charles V. in 1552. Affronted at court, and hated by the Guises, he joined his brother, king of Navarre, at Nérac, and became a Protestant. In 1560 he was arrested and sentenced to death, but was discharged after the death of Francis I. He soon after appeared as head of the Protestants, and was defeated and captured at the battle of Dreux. He was again wronged and insulted by the refusal of the office of lieutenant-general of the kingdom, to which he was entitled. In 1567 he fought the battle of St Denis without decisive result. Two years later the Protestants were defeated, and Condé was slain at Jarnac.

CONDÉ, HENRI, Prince of, who at the request of Henry IV. became a Catholic, was born in 1588. In 1616 he was sent to the Bastille, where he remained for three years. After the death of Louis XIII., the prince was liberated, and was made minister of state to the regent. Died, 1646.

CONDÉ, LOUIS II. DE BOURBON, Prince of, called THE GREAT, was son of the preceding, and was born at Paris in 1621. He married a niece of Cardinal Richelieu, and was at first known as the Duke d'Enghien. His first great achievement was the victory over the Spanish army at Rocroi, in 1643. The capture of Thionville soon followed. The following year is marked by the battle of Frelburg, which lasted three days, and the great victory over the Imperialists at Nordlingen. After taking Dunkirk in 1646 Condé was, through envy, sent into Catalonia, where with inferior troops success forsook him. It was necessary soon to recall him to Flanders, where he won the victory of Lens over the Archduke Leopold in 1648. Having offended the first minister, Cardinal Mazarin, he was imprisoned for more than a year, and after his liberation he led the army of the Fronde, began the siege of Paris, and encountered Turenne and the royalists in the Faubourg St Antoine. Soon after he entered the service of Spain, and contended with varying success against his countrymen in

ort time in the Academy. After a visit to Constantinople, he there he took part in the measurement of the Nile. He was afterwards elected to the Academy. He was afterwards elected to the Academy. He was afterwards elected to the Academy.

RON, Prince of Condé, was born in 1625, and was early made master of the king's house, and governor of Burgundy. He served in the Seven Years' War, and distinguished himself at the battles of Hastenbeck, Münden, and Jönnisberg. He became the associate of the Dauphin, occupied himself with literary and scientific pursuits, and in the perplexities which preceded the revolution advocated the necessity of moderate reforms. After the fall of the Bastille he emigrated, watching every opportunity for assisting the partisans of the monarchy. Having published a manifesto, announcing his intention of rescuing Louis XVI., he was declared a traitor, and his estates were sequestered by the Assembly. The Prince organized a body of troops which was incorporated with the Austrian army, and was afterwards subsidized by England. In 1801 the prince of Condé settled in England. The murder of his young grandson, the Duke d'Enghien, by Napoleon, affected him profoundly. At the restoration he returned with Louis XVIII. to France, lived again at Chantilly, and died at Paris, 1818. He was author of an "Essai sur la Vie du grand Condé."

of, who at the age of 16, was sent to the University of Salamanca for three years. He was afterwards minister of state.

RON, Prince of Condé, was born in 1625, and was early made master of the king's house, and governor of Burgundy. He served in the Seven Years' War, and distinguished himself at the battles of Hastenbeck, Münden, and Jönnisberg. He became the associate of the Dauphin, occupied himself with literary and scientific pursuits, and in the perplexities which preceded the revolution advocated the necessity of moderate reforms. After the fall of the Bastille he emigrated, watching every opportunity for assisting the partisans of the monarchy. Having published a manifesto, announcing his intention of rescuing Louis XVI., he was declared a traitor, and his estates were sequestered by the Assembly. The murder of his young grandson, the Duke d'Enghien, by Napoleon, affected him profoundly. At the restoration he returned with Louis XVIII. to France, lived again at Chantilly, and died at Paris, 1818. He was author of an "Essai sur la Vie du grand Condé."

Flanders. After the Peace of the Pyrenees he returned to Paris, and was employed in the conquest of Franche-Comté. In the war with Holland, in 1672, he was wounded, at the passage of the Rhine, the only time he received a wound. His last great exploit was the victory over William, prince of Orange (William III.), at Senef, in 1674. Martyr to the gout, he retired in the following year to his charming seat at Chantilly, enjoying there the society of some of the most eminent men of letters, among them Racine, Boileau, and Molière. He died at Fontainebleau in 1686. Funeral orations, high-flown panegyrics, were delivered by Bourdaloue and Bossuet. There is a "Life of the Great Condé" by Lord Mahon.

CONDÉ, LOUIS JOSEPH, Prince of, born at Paris in 1736, was brought up by his uncle, the count of Charolais, and was early made master of the king's house, and governor of Burgundy. He served in the Seven Years' War, and distinguished himself at the battles of Hastenbeck, Münden, and Jönnisberg. He became the associate of the Dauphin, occupied himself with literary and scientific pursuits, and in the perplexities which preceded the revolution advocated the necessity of moderate reforms. After the fall of the Bastille he emigrated, watching every opportunity for assisting the partisans of the monarchy. Having published a manifesto, announcing his intention of rescuing Louis XVI., he was declared a traitor, and his estates were sequestered by the Assembly. The Prince organized a body of troops which was incorporated with the Austrian army, and was afterwards subsidized by England. In 1801 the prince of Condé settled in England. The murder of his young grandson, the Duke d'Enghien, by Napoleon, affected him profoundly. At the restoration he returned with Louis XVIII. to France, lived again at Chantilly, and died at Paris, 1818. He was author of an "Essai sur la Vie du grand Condé."

CONDÉ, JOSE ANTONIO, Spanish orientalist, was born about 1765. He studied at the university of Alcalá, and became assistant in the Royal Library at Madrid, where he zealously pursued the study of Arabic literature. During the French occupation he held the post of librarian to Joseph Buonaparte, and in 1813 retired into France, whence he was allowed to return five years afterwards. He was librarian to the Academy of History, and a member of the Spanish Academy. His principal work is the "History of the Dominion of the Arabs in Spain," which has been translated into English. Died, 1821.

CONDER, JOSIAH, a distinguished man of letters, was born in London in 1789. He was the son of Mr Thomas Conder, bookseller, and grandson of Dr John Conder, president of the Old College, Homerton. At an early age he manifested the literary taste which distinguished him through life. His juvenile poetical contributions to the "Athenæum" (Dr Aikin's) and other publications having attracted favourable notice, he published, in 1810, a small volume entitled "The Associate Minstrels," the joint production of several friends. Having succeeded to his father's

business, as a bookseller and publisher, in 1814 he became proprietor of the "Eclectic Review." In 1819 he disposed of his business, and from this period till 1837, devoted himself to the management of the "Eclectic Review," besides publishing several original works, both prose and poetical, and editing the "Modern Traveller," which consisted of 25 vols., and had a large circulation. In 1832 he became the editor of the "Patriot," an office which he held for three-and-twenty years. For many years he took an active part in the public movements of the Protestant Dissenters of the metropolis, without, however, renouncing his attachment to literature. Died, 1855. Memoirs of Josiah Conder, by Eustace Conder, have since appeared.

CONDILLAC, ETIENNE BONNOT DE, French philosopher, was born at Grenoble in 1715. He was early attracted to metaphysical studies, and adopted the system of Locke, carrying however the doctrines of the Sensational School further than his master did. He was of very grave manners, and lived mostly in studious retirement. Rousseau and Diderot were among his friends. He was named tutor to the young duke of Parma, grandson of Louis XV., and was admitted to the French Academy. His principal works are, "Essai sur l'Origine des Connaissances Humaines," "Traité des Sensations," and "Cours d'Etude du Prince de Parme." Died, 1780. A French work, entitled "Condillac: ou l'Empirisme et le Rationalisme," by F. Kéthoré," has been published this year (1865).

CONDORCET, MARIE JEAN ANTOINE NICOLAS CARITAT, Marquis of, a French mathematician and philosopher, was born at Ribemont, in Picardy, in 1743, and educated at the college of Navarre. When only 22 years of age he distinguished himself among mathematicians by the publication of his work "Du Calcul Intégral." Two years afterwards he published the treatise "Du Problème des Trois Corps," and in the following year his "Essai d'Analyse." In 1769 he was chosen member of the Academy, and in 1773 became its secretary, in which situation he distinguished himself by the elegance of his *elogs*. In 1791 he became a member of the National Assembly and of the Jacobin Club; and he soon became as noted for his political violence as he had already been eminent for his scientific genius. When proscribed by Robespierre, he voluntarily left the house of the friend who had received him, and wandered about for some time in the country. He was at last recognized, arrested, and thrown into prison, where, on the third morning, 28th March, 1794, he was found dead in his bed, having taken poison which he carried about him. As a philosopher and social reformer Condorcet was a devoted follower of Voltaire. He expounded his own views in the brilliant "Esquisse historique de l'Esprit Humain."

CONFUCIUS, the Latin form of the name of KONG-FU-TZEE, the celebrated Chinese sage, who flourished probably about B.C. 550. He was the son of a mandarin of the state of Loo, one of the petty kingdoms into which China was then divided. He travelled for

some time through these states, promoting as far as he could the instruction of the people and the improvement of the governments. When past middle age he was appointed chief minister in Loo, but fell into disfavour and went into exile. He died in an advanced age; his fame grew, and his doctrines were recognized and handed down as the highest wisdom. They are of a purely practical character, and do not include any doctrine of religion. His descendants were ennobled, and are still found in his native district. Temples and ceremonies to his honour abound throughout the empire.

CONGLETON, HENRY BROOKE PARNELL, Lord, was the second son of Sir John Parnell, bart., chancellor of the Irish Exchequer, and was born July 3rd, 1778. His elder brother was born dumb, and a cripple, and, by a somewhat unusual stretch of authority, parliament set aside the entail upon the family estates, so that the younger son succeeded to the estates on the death of his father in 1801, and to the title on the death of his brother in 1812. He entered parliament in 1802, but ceased to be a member at the close of the same year. He was again returned in 1806, and retained his seat, in spite of all opposition, until 1832, when he voluntarily retired. From 1833 to 1837 he sat for Dundee; and in 1841 he was raised to the peerage. During his whole parliamentary career he was an extremely useful, though by no means brilliant, member. Finance in all its various branches he was very familiar with, and upon such subjects he very early became a sort of authority to both sides of the House. Died June 8, 1842, aged 65.

CONGREVE, WILLIAM, an eminent English dramatist, was born near Leeds, in 1670, and educated at Trinity College, Dublin. He entered himself as a student at the Middle Temple, but, like many more before and since, abandoned the law for literature. His first piece, written at the age of 17, was a romance, entitled "Incognita, or Love and Duty Reconciled." In 1693, being then only 21 years old, he wrote his first comedy, "The Old Bachelor." This produced him not only great reputation, but also the substantial benefit of a commissionership in the hackney-coach office, which was given to him by the earl of Halifax, who afterwards still further patronized and favoured him. He wrote also "Love for Love," "The Double Dealer," "The Mourning Bride," "The Way of the World," an opera; and some poems. Died, 1729. Witty and spirited as Congreve's plays are, they are too licentious to keep possession of the stage at the present day; and in his own time they received severe castigation from the celebrated Jeremy Collier. A portrait of Congreve, by Sir Godfrey Kneller, is in the National Portrait Gallery.

CONGREVE, Sir WILLIAM, the son of a lieutenant-general, and the inventor of the Congreve rockets, was born in 1772, and entered the military service early, in which he obtained the rank of lieutenant-colonel. He possessed much inventive talent, which he applied to the mechanic arts; and for several years the rocket which bears his name, and

which was first used in the attack of Boulogne in 1806, was considered a grand auxiliary in warlike operations, although it has now fallen into comparative disrepute. Sir William was a fellow of the Royal Society, and represented Plymouth in parliament. Died, 1828.

CONON, an Athenian general, was the son of Timotheus. Having been defeated in a naval engagement at Ægospotamos by Lyfander, he for a time went into exile; but being aided by Artaxerxes, king of Persia, he returned and defeated the Spartans near Cnidus. He then began to rebuild the fortifications of Athens, and restored it to liberty and security; but being sent on a political mission to Tiribazus, a Persian satrap, he was imprisoned, and it is not known what became of him.

CONRAD I., count of Franconia. In 911 he was elected king of Germany, but Arnulf, duke of Bavaria, and Henry, duke of Saxony, disputed his title, and engaged the Huns to overrun Germany. Conrad is said to have received a mortal wound in combat with these revolted chiefs. Died, 918.

CONRAD II., son of Henry, duke of Franconia, was elected king of Germany in 1024. Attempts were made to displace him, but without success, and in 1027 he was crowned emperor at Rome, in the presence of Canute, king of England, and Rudolph, king of Burgundy. As heir to Rudolph, who died in 1033, Conrad became king of Burgundy. Died, 1039.

CONRAD III., duke of Franconia, of the house of Hohenstauffen, and elected emperor, 1138. His title was disputed by Henry the Proud, duke of Saxony, and the rivalry of these two princes was the germ of the factions afterwards so famous under the names of Gueifs and Ghibellines. In 1146, at the diet held at Spire, Conrad was persuaded by the eloquence of St Bernard to undertake a crusade, on which he set out the following year. It was fruitless and disastrous, and Conrad returned with the wreck of his army in 1149. He died, in his own dominions, 1152.

CONRAD IV., duke of Suabia, chosen king of the Romans in 1238, was son of the great Emperor Frederick II., and like him was excommunicated by the pope, Innocent IV., who set up a rival emperor in William, count of Holland. On the death of his father, in 1250, Conrad marched into Italy to recover the towns which had declared against him. He took Naples, but could not get the investiture of the kingdom of Sicily from the pope. Died suddenly in Italy, 1254.

CONRADINO, son of the last named, who left him the kingdom of Naples. Pope Urban IV. gave that kingdom to Charles of Anjou, who defeated Conradino, then only 16 years old, at the battle of Tagliacozzo, and caused him to be beheaded in 1268.

CONSALVI, ERCOLE, cardinal and chief minister of Pope Pius VII., was born at Rome, in 1757. As he had opposed the French party in Rome to the utmost of his power, he was banished when the French took possession of the city. When, however, the papal affairs were in a better condition he returned; and, as secretary of

attack of Boudicca, although it has been disputed. Sir Robert Peel, Secretary of State for the Home Department, in 1841, in parliament.

... was the son of a nobleman, defeated in a battle on the banks of the Nile by Lycurgus, and was banished into exile; but he returned to the king of Persia, and the Spartans near the city of Athens build the temple of Liberty on a political system, he is not known what

... In 911, he was elected king, but Arnulf, duke of Saxony, defeated the Hungarians, and he was obliged to leave his kingdom in combat with them. In 918, he was elected king of France, but he was overthrown by the duke of Burgundy, who died in 924.

... of the kingdom of the Franks, elected emperor in 919 by Henry the First, and he was the rival of the emperor Lothar. Under the name of Charles the Simple, he was elected in 1046, at the persuasion of his nobles to undertake a crusade against the Saracens, and he died in 1056.

... chosen king of the Franks, and he was the father of the emperor Louis the Pious. He was the father of the emperor Louis the Pious, and he was the father of the emperor Louis the Pious.

... named, who was the father of the emperor Louis the Pious. He was the father of the emperor Louis the Pious, and he was the father of the emperor Louis the Pious.

... and chief minister, was born at the city of Paris, and he was the father of the emperor Louis the Pious. He was the father of the emperor Louis the Pious, and he was the father of the emperor Louis the Pious.

state, he concluded the famous concordat with Napoleon, continuing, in fact, at the head of the political and ecclesiastical affairs of the Roman state till the death of the pope, his friend and master. The administration of Consalvi was marked by many important improvements in the law, such as the abolition of torture, monopolies, and the right of asylum, and the promulgation of several new codes. Died, 1824.

CONSTABLE, ARCHIBALD, the most enterprising bookseller that Scotland has produced, was born at Kellie in Fifeshire, 1775. After serving his apprenticeship to Peter Mill of Edinburgh, the friend and correspondent of Burns, he commenced business for himself in 1795; and his obliging manners, general intelligence, and indefatigable activity gained him the esteem of all who came in contact with him. His reputation as a publisher dates from 1802, when he published the first number of the Edinburgh Review; and in 1805 he published, in conjunction with Messrs Longman and Co., "The Lay of the Last Minstrel," the first of that long series of original and romantic publications in poetry and prose which has immortalized the name of Walter Scott. His tact in appreciating literary merit, his liberality in rewarding it, and the sagacity he displayed in placing it in the most favourable manner before the public, were amply rewarded by the unparalleled success of his literary projects; but in 1826 he was overwhelmed by the disasters consequent on the rage for speculation that marked the preceding year, and the fruits of a life of activity, industry, and exertion were all sacrificed in the prevailing wreck of commercial credit. The well-known "Miscellany" that bears his name was his last project; soon after its commencement he was attacked with dropsy, and died in 1827.

CONSTABLE, JOHN, R.A., one of the most eminent landscape painters of our time, was born at East Bergholt, in Suffolk, 1776. Having early displayed a love of art, he visited London in 1795, for the purpose of ascertaining what might be his chance of success as a painter. Encouraged by the flattering commendations of Farrington, himself a landscape painter of some note, and of "Antiquity" Smith, he laboured hard at the mechanical part of his profession, and in 1802 sent his first picture to the exhibition of the Royal Academy. From this period he was a regular contributor down to the year of his death. Few pencils, indeed, have been more prolific; and the works he has left behind him, both in number and excellence, have earned for him a distinguished place among the landscape painters not only of England but of the world. In 1829 he was elected an academicalian. Died, 1837. "Memoirs of the Life" of Mr Constable were published by his friend and brother artist, Mr Leslie, full of interest, and showing that both artists could wield the pen no less ably than the pencil.

CONSTANS I., FLAVIUS JULIUS, one of the sons of Constantine the Great, and his successor in the sovereignty of Africa, Italy, and Western Illyricum. His brother Constantine endeavoured to dispossess him of

it; but being defeated and slain in the attempt, Constans became master of the whole empire. His conduct was, however, so offensive to the people, that the standard of revolt was hoisted, and Constans was put to death. A. D. 350.

CONSTANT DE REBECQUE, BENJAMIN DE, a distinguished orator and author, attached to the liberal or constitutional party in France. He was born at Lausanne in 1767, and, after studying at Edinburgh and Erlangen, at the commencement of the French revolution went to reside at Paris, where he soon distinguished himself, both by his political writings and his eloquent speeches in the senate; and when, under the government of the Directory, he was elected to the office of tribune, he zealously endeavoured to maintain the equality of citizens, the freedom of the press, and the regular administration of justice. His conduct, however, rendered him obnoxious to the first consul, and he was dismissed from his office in 1802. After retiring to Germany, where in 1813 he published his celebrated brochure "De l'esprit de Conquête et de l'Usurpation," he again appeared at Paris in 1814, and publicly advocated the cause of the Bourbons; yet we soon after find him assisting in forming the constitution of the Champ de Mai, embodied in the famous "Additional Act." Though, like many others, he had sufficient cause to retire from France on the second restoration of Louis XVIII., he was allowed to return, and in 1819 was elected a member of the Chamber of Deputies, where he long remained as a distinguished leader of the opposition, particularly in all the discussions relating to the censorship of the press and the rights of the people. He wrote "De la Religion considérée dans sa Source, ses Formes et ses Développement," "Du Polythéisme Romain," and various political brochures, was one of the editors of La Minerve, and a contributor to the Biographie Universelle. As an orator he was eloquent and profound; and as a writer lively, imaginative, and acute. Died, 1830.

CONSTANTINE, FLAVIUS VALERIUS, surnamed THE GREAT, Roman emperor, was the son of Constantius Chlorus, by Helena, and was born A. D. 272. On the death of his father, at York, in 306, Constantine, who had accompanied him to Britain, was proclaimed emperor by the troops. After defeating the Franks, he married Fausta, the daughter of Maximian, but he was soon involved in a war with his father-in-law, who assumed the title of emperor. The usurper's reign was brief; and on his being taken prisoner, Constantine caused him to be strangled. This involved him in a war with Maxentius, son of Maximian, in which the latter was defeated and drowned in the Tiber. It was during this war that the emperor, as alleged by Eusebius, saw a luminous cross in the heavens with the inscription, "In hoc signo vinces." (Under this sign thou shalt conquer.) He accordingly caused a new standard to be made, surmounted by the monogram of the name of Christ; marched to Rome in triumph; and was declared by the senate Augustus and *pontifex maximus*.

In the following year the edict to stay the persecution of the Christians was published at Nicomedia. Constantine had married his sister to Licinius; but the latter, jealous of his fame, took up arms against him, and they met in Pannonia, A. D. 314. Constantine was victorious, and a peace was granted to Licinius; but in 323 he renewed hostilities, was again defeated, and finally, contrary to the engagement of Constantine, was put to death. Thus Constantine became, in 325, sole head of the Eastern and Western empires; and his first care was the establishment of peace and order. He displayed great courage and love of justice, and professed an ardent zeal for the Christian religion. He made Byzantium the seat of empire, naming it anew after himself, Constantinople. But though his actions on the whole entitled him to the surname of "The Great," many acts of cruelty, and, above all, the murder of his son Crispus, have left a stain upon his character alike as a man, a Christian, and a sovereign. Constantine died at Nicomedia, in May, 337, having been baptized only a few days before. His empire was divided between his three sons, Constantine, Constantius, and Constans.

CONSTANTINE, FLAVIUS JULIUS, a private soldier, who was raised by the army in Britain to the imperial dignity in 407, on which he crossed over to Gaul, and conquered that country and Spain. He fixed his court at Arles, where he was besieged by Constantius, the general of the emperor Honorius, to whom he surrendered on the promise that his life should be spared; but it was basely violated, and both Constantine and his son were put to death, A. D. 411.

CONSTANTINE III., emperor of the East, surnamed Pogonitus, or the Bearded, was son of Constans II., whom he succeeded in 668. His two brothers, Tiberius and Heraclius, shared the title of Augustus, but had little or no share in the government, and towards the close of his reign Constantine, under the influence of suspicion, had them mutilated and put to death. Constantinople was unsuccessfully attacked by the Mussulmans in 672 and the six following years; and it was during these wars that the famous "Greek fire" was invented. Constantine convoked and took part in the sixth general council held at Constantinople, at which the doctrine of the Monothelites was condemned. Died, 685.

CONSTANTINE V., emperor of the East, was son of Leo IV., whom he succeeded in 780. Being only 10 years old when his father died, his mother Irene was his guardian and regent of the empire. On arriving at a mature age he wished to assume the government himself; but Irene, made cruel by ambition, had him imprisoned. He escaped in 790, exiled his mother, recalled her, and finally, ruined by his licentious living, and despised by his subjects, a conspiracy was formed against him, Irene taking the lead in it, and being imprisoned, his eyes were put out by her orders. The blind prince languished some time in obscurity, and died in 797.

CONSTANTINE, surnamed **PORPHYRO-GENITUS**, emperor of the East, succeeded

Leo the Wise in 911. He was destitute of energy, and devoted himself chiefly to study. He admitted colleagues to the throne, so that at last five emperors were reigning together. Constantine left a treatise on state affairs, a geography of the empire, and the "Life of the Emperor Basilius the Macedonian." Died, 959.

CONSTANTINE, DRACOSSES or PALEOLOGUS, the last of the Greek emperors, succeeded to the throne in 1449. He was killed in bravely defending Constantinople against Mahomet II., who, in 1453, besieged the city with 300,000 men. The heroic valour displayed by Constantine in this unequal contest demands our admiration; but valour was of no avail, the city was taken by storm, and thus ended the Greek empire.

CONSTANTINE, CÆSAROVICH PAULOVICH, grand-prince of Russia, second son of the emperor Paul, and brother of Alexander, was born in 1779. He attended his brother in all his campaigns, and distinguished himself greatly at the battle of Austerlitz. In 1815 he was made generalissimo or virtual governor of Poland, where he showed that he possessed only the characteristics of a half-civilized ruler, being cruel and tyrannical in his government. He formally renounced his right of succession to the empire in favour of his younger brother, the emperor Nicholas, and was present at his coronation. Constantine married in 1796 a princess of the house of Saxe-Coburg, aunt of Queen Victoria, but soon separated from her, and was afterwards divorced. Died, 1831.

CONSTANTIUS I., surnamed **CHLORUS**, or **THE PALE**, Roman emperor, was the son of Eutropius and Claudia, niece of Claudius II. He distinguished himself as a soldier under the emperors Aurelian and Probus. In 292 he was made Cæsar and governor of the Gauls, Spain, and Britain. He reconquered Britain, long in revolt under Carausius and Allectus; won a great victory over the Alamanni in 300; became Augustus in 305; and died at York in the following year. By Helena, his first wife, Constantius was father of Constantine the Great. Constantius ruled his provinces with great justice and prudence, and won the esteem of all classes of his subjects.

CONSTANTIUS, FLAVIUS JULIUS, Roman emperor, son of Constantine the Great, was born in 317, made Cæsar in 323, and elected emperor in 337. The soldiers, to secure the throne to the three sons of Constantine, massacred the uncles and cousins of those princes, with the exception of Julian, "the Apostate," and his brother Gallus. After this the sons of Constantine divided the empire, Constantius taking the east for his share. Magnentius, governor of Rhætia, murdered Constans, who had reigned over Italy 13 years; on which Constantius marched against the murderer, whom he defeated, and his elder brother being also dead, he became sole emperor. He died on his march against Julian, who had assumed the purple in 361.

QUES, a French
ished for the in-
ontrivances. He

accompanied the expedition to Egypt, where
his services were of the greatest value; for,
the machines and instruments of the army
having fallen into the hands of the Arabs,
he constructed corn and gunpowder mills,
manufactured swords, engineering instru-
ments, telescopes, and, in short, everything
necessary for a military and scientific ex-
pedition. Born, 1755; died, 1805.

CONTUCCI, ANDREA, named SANSAVINO,
a celebrated Italian sculptor, was born at
Monte San Savino in 1460. He was em-
ployed as a shepherd boy, but in consequence
of his skill in drawing was sent to Florence,
where he became a pupil of Pollajuolo, and
studied in the famous gardens of St Mark.
About 1490 he went to Portugal, became
sculptor and architect to the king, and after
ten years returned to Florence. He went to
Rome about 1509, and was employed by
Popes Julius II. and Leo X. His best works
are the monuments of two cardinals in the
church of Santa Maria del Popolo, some bas-
reliefs at Loretto, and the altar in the Cor-
binelli chapel in San Spirito, Florence. Died
at Rome, 1529.

CONYBEARE, JOHN JOSIAS, a learned
English divine, critic, and antiquary; born,
1779. He was educated at Oxford University,
where, in 1807, he was appointed professor
of Anglo-Saxon, and some years later pro-
fessor of poetry. He was author of a volume
of admirable sermons, preached at the
Bampton Lecture; and of various articles
on Saxon literature, contributed to the
Censura Literaria, and the British Biblio-
grapher. He also contributed some valuable
papers, on chemistry and mineralogy, to the
Annals of Philosophy and the Transactions
of the Geological Society. Died, 1824.

COOK, HENRY, an English painter. He
studied in Italy under Salvator Rosa; but
for many years after his return to England
he lived in obscurity and distress. He was
at length employed by William III. to re-
pair the cartoons of Raphael at Hampton
Court, from which time he seems to have
been comparatively prosperous, as Horace
Walpole mentions several public works
which were either wholly or in part per-
formed by him. Died, 1700.

COOK, Captain JAMES, the celebrated
English navigator. He was born at Marton,
in Yorkshire, in 1728; and his parents being
poor, his early education included only read-
ing, writing, and common arithmetic. He
commenced his naval career in the merchant
service, then entered on board the Eagle
man-of-war, and after four years' meritori-
ous service was made master of the Mercury.
This vessel formed part of the squadron
sent against Quebec; and Cook performed
the difficult task of taking soundings in the
St Lawrence, in the very face of the French
encampment, and of making a chart of the
St Lawrence below Quebec. After various
and arduous services he was at length raised
to the rank of lieutenant; and then com-
menced that series of voyages round the
world, the details of which form one of the
most popular and delightful books in our
language. Captain Cook embarked on his
first voyage as commander of the "En-
deavour," in August, 1768, reached New

Holland (Australia) in 1770, and arrived in
England in June, 1771. His second voyage,
in which he commanded the "Resolution,"
and was accompanied by the "Adventure,"
commenced in July, 1772. He visited New
Zealand, passed Cape Horn, and returned
home in July, 1774. He set out on the third
voyage, commander of the "Resolution"
again, and accompanied by the "Discovery,"
in July 1776, discovered the Sandwich Is-
lands, explored the western coast of North
America, and then made further discoveries
in the Pacific. Unhappily, while touching
at Owhyhee, Captain Cook, in spite of the
utmost prudence and humanity, was in-
volved in a dispute with the natives, and
while endeavouring to reach his boat was
savagely murdered, on St Valentine's Day,
1779. Captain Cook was fitted for the post
he filled by a rare combination of intel-
lectual and moral qualities. Naturally quick-
sighted, energetic, decided, yet kindly and
considerate, he could rule men well and
gain their confidence and love. He was
also highly accomplished in the science of
navigation; and to his persevering en-
deavours and watchful care it was due that
the health of his crews was always so re-
markably good. During the interval between
his second and third voyages Captain Cook
was elected F.R.S.—His wife, ELIZABETH
COOK, survived him 56 years! having died
at her residence at Clapham, in 1835, aged
93. But she had to mourn the loss of her three
sons in a few years after the unhappy fate of
her husband. NATHANIEL, their second son,
was lost in the Thunderer, which foundered
at sea, in 1780; HUGH, a student at Cam-
bridge, died in 1793; and JAMES, the eldest
son, was lost, with his boat's crew, while
commander of the Spitfire sloop-of-war, off
the Isle of Wight, in 1794.

COOKE, Sir ANTHONY, an eminent Eng-
lish scholar. He was one of the tutors of
Edward VI., who highly esteemed him. On
the accession of Queen Mary he was exiled,
and only returned after her death. Of his
four daughters, all remarkable for their
character and acquirements, one became the
wife of Lord Burligh, and another the wife
of Sir Nicholas Bacon. Born, 1508; died,
1576.

COOKE, BENJAMIN, Mus. D., Cambridge,
an able musician and composer; born, 1739.
He became organist of Westminster Abbey,
and was author of "How sleep the Brave,"
"Hark, the Lark," and many other beau-
tiful and popular pieces. Died, 1793.

COOKE, GEORGE FREDERICK, an eminent
English actor, was born in 1756. In early
life he was apprenticed to a printer, but his
attention to theatricals so completely ab-
sorbed his mind, that his master soon had
his indentures cancelled. He then tried the
navy with no better success, his inclination
for the stage being unconquerable. After
the usual probation among itinerant com-
panies, he became a star at the larger pro-
vincial theatres, as York, Manchester, and
Liverpool, and was at length engaged at
Dublin for three years. Thence his fame tra-
velled to London; and in October, 1800, he
made his appearance at Covent Garden in
the character of Richard III. His perform-

ance of this character gave him at once a place among the very first actors of the day, and he soon became popular in Macbeth, Iago, Sir Pertinax, Mac Sycophant, Shylock, &c. He afterwards accepted an engagement in America, where he performed with similar success, but his indulgence in riotous and debauched habits completely broke up his vigorous constitution, and he died in 1812.

COOKE, THOMAS, whose versatility of musical talent has had few equals in our time, was born at Dublin, 1781. He evinced even in his infancy a genius for music; and so assiduously did he cultivate his talents, that at the age of 15 he became leader of the band at the Theatre Royal of his native city. His first appearance as a singer was in the character of Seraskier, in the "Siege of Belgrade;" and so well did he fill the part, that he at once took rank as a first-class vocalist. In 1813 he appeared on the boards of the English Opera House, now the Lyceum, in London, where he at once became a public favourite; and having soon afterwards joined Drury Lane, he filled to the entire satisfaction of all parties, private, dramatic, and public, the various situations of vocalist, director of the musical department, composer, and leader of the orchestra. On his retirement from the stage, he became successively connected with the Philharmonic Society, the Catch Club, and other musical associations, reaping fresh laurels every year by his glees, duets, and ballads, and gaining golden opinions by his agreeable manners, ready wit, and kindly disposition. Besides being the leader of the Philharmonic Concerts for many years, and a conductor on many occasions, he was appointed, in 1846, leader of the Concerts of Ancient Music, and was repeatedly engaged in the same capacity for the great musical festivals throughout the country. Died, 1848.

COOMBE, WILLIAM, an industrious and clever writer; author of "The Diaboliad," a satire; "The Devil upon Two Sticks in England," "Tour of Dr Syntax in search of the Picturesque," "History of Johnny Quæ Genus," "English Dance of Death," &c. Died, 1823.

COOPER, ANTHONY ASHLEY, first earl of Shaftesbury, an eminent statesman, born in 1621. He studied for a short time in Lincoln's Inn, but at the early age of 19 he was elected member of parliament for Tewkesbury. From this time his whole life was spent in business or political intrigue. At the breaking out of the civil war he at first sided with the king, but afterwards went over to the parliament, raised troops, and stormed Warcham, in Dorsetshire. After serving in the Convention, which succeeded the long parliament, and being also one of Cromwell's privy councillors, he became one of Monk's colleagues in bringing about the restoration of Charles II. For this important service he was raised to the peerage by the title of Baron Ashley, and made a lord of the treasury and chancellor of the exchequer. As a member of the notorious Cabal ministry, great odium has been thrown upon him by some writers, while others

affirm that he opposed some of its worst measures. At all events, his conduct was satisfactory to the king, who, in 1672, created him earl of Shaftesbury, and raised him to the post of lord high chancellor. This office, however, he held only a year; and on the seals being taken from him he became one of the opposition. In this capacity he was so violent, that he was at length sent to the Tower, where he remained more than a year, and only obtained his release at last by making a full submission. When he again got into power, he had the merit of bringing forward, and causing to be passed, the invaluable law called the *Habeas Corpus* act. His unremitting efforts to exclude the duke of York from the succession, roused that prince to such strenuous exertions, that in four months the ministry was turned out, and shortly afterwards the earl was sent to the Tower on a charge of high treason. On this perilous charge he was acquitted, to the great joy of the people at large; but his triumph was somewhat damped by the withering satire with which his character was depicted in Dryden's *Abraham and Achitophel*. Wearied with incessant toils, much worn in health, and, probably, apprehensive of a time arriving when corruption might render his acquittal on charges, however false, by no means certain, he retired to Holland, where he died in 1683.

COOPER, ANTHONY ASHLEY, third earl of Shaftesbury, and grandson of the last named, was a very eminent English writer, born in 1671. In 1693, after the usual course of education and foreign travels, he was elected member of parliament for Poole, in Dorsetshire; and his parliamentary conduct was marked by an honourable and earnest support of every measure tending to increase the prosperity and maintain the freedom of his fellow-subjects. But his public career was stopped by the delicacy of his health; and from the year 1698 he chiefly resided abroad, devoting himself to study, and corresponding with Bayle, Le Clerc, and other eminent literati. He was the author of various works, the principal of which is entitled "Characteristics of Men, Manners, Opinions, and Times;" but though lively and elegant, they are all tinged with indecorous levity. As a man, however, both in his public and private life, he was beloved and respected by all parties. Died, 1713.

COOPER, SIR ASHLEY PASTON, bart., a distinguished surgeon, was born at Brooke, in Norfolk, in 1768. He was placed with a medical gentleman at Yarmouth, in 1782, but was soon removed to London, in order to attend the hospitals, and was articled to his uncle, W. Cooper, then surgeon to Guy's Hospital. With him, however, he remained but a few months, being transferred to Mr Cline, in which situation his extraordinary aptitude for his profession quickly developed itself. In his twentieth year he visited Edinburgh, and soon after became assistant to Mr Cline in his anatomical lectures at St Thomas's Hospital. In this prominent position he outshone all who had preceded him as a popular teacher. His class of students increased from 60 to 400, which was the largest ever known in London. "He was,"

says Mr Pettigrew, "the idol of the Borough school; the pupils followed him in troops, listening with almost breathless anxiety to catch the observations which fell from his lips upon the several cases presented to his view. But on the days of operation, this feeling was wound up to the highest pitch—the sight was altogether deeply interesting; the large theatre of Guy's crowded to the ceiling—the profound silence obtained upon his entry—that person so manly and truly imposing, and the awful feeling connected with the occasion, can never be forgotten by any of his pupils." In 1792 he visited Paris, and attended the lectures of Desault and Chopart; and on his return he took up his residence in the city, first in Jeffrey Square, and afterwards in Broad Street. His practice had now become immense; and, long before he removed to New Street, Spring Gardens, he was decidedly affluent: while there he for many years realized from £18,000 to £20,000 per annum. Sir Astley Cooper some years before his death retired to the country; but he found that a life of quiescence and retirement would not suit his active mind, and he returned to London, once more to resume his professional avocations. Notwithstanding the immense number of his surgical operations, and the time he devoted to anatomical and physiological inquiries, he found time to publish several works of great utility; but his fame rests mainly upon his accurate anatomical knowledge, and his skill as an operator. The honour of a baronetcy was conferred on him at the coronation of George IV., to whom he had been appointed surgeon. Died Feb. 12, 1841, aged 72.

COOPER, JAMES FENIMORE, the distinguished American novelist, was born at Burlington, New Jersey, on the 15th of September, 1789. His father, Judge Cooper, was a large landholder in Ostego county, in that State, residing alternately at Burlington and Cooperstown, and giving his name to the latter township, which has since been the residence of the world-renowned author. He received the rudiments of a classical education under a private instructor at Burlington, and entered Yale College in 1802. A native passion for the sea, and an unconquerable love of adventure, led him, among other causes, to enter the navy in 1805, as a midshipman. He remained in it for six years; and the influence of this period of his life is indelibly stamped upon his works. In 1810, Cooper resigned his post in the navy, and after a short residence at Westchester, in the vicinity of New York, he removed to Cooperstown, and pursued in earnest his career as a writer of fiction. He had previously published his maiden novel entitled "Precaution," a work of little promise. Within 15 years, he successively produced "The Spy," "The Pilot," "Lionel Lincoln," and "The Last of the Mohicans," triumphantly asserting his claim to the character of an original and powerful novelist. Soon after the appearance of "The Last of the Mohicans," in 1826, Mr Cooper sailed for Europe, where he remained for several years. Dur-

ing this time he wrote several of his most successful works, including "The Bravo," "The Red Rover," and "The Prairie," and soon established a reputation which, with the robust qualities of his personal character and the dignified frankness of his manner, made him a welcome visitant in the most distinguished European circles. His most valuable productions after his return to the United States are, "The Pathfinder," "The Destroyer," "The Two Admirals," and "Wing and Wing," all of which display his admirable power of invention, his bold conceptions of character, and his rare mastery of graphic and impressive portraiture. His more recent performances, in which he endeavours to use the novel as a vehicle for political declamation, are unworthy of his fame, and will only leave a blot on the memory of his genius. Died, 1851.

COOPER, SAMUEL, an eminent English painter, whose excellence in miniature painting gained him the name of the Miniature Vandyke. One of his best works is his portrait of Oliver Cromwell. Died, 1672.

COOTE, Sir EYRE, a distinguished military officer. He was born in Ireland, in 1726, and as early as the rebellion of 1745 bore arms in the king's service. His regiment being ordered to the East Indies in 1764, he greatly distinguished himself at the sieges of Haughley, Chandernagore, and Pondicherry, and at the battle of Plassey, &c. In 1760, Hyder Ally having invaded the Carnatic, Sir Eyre Coote, with a vastly inferior force, arrested his progress, and in various encounters signally defeated him. He died at Madras, in 1783.

COPERNICUS, NICHOLAS, the celebrated mathematician and founder of the modern system of astronomy. He was a native of Thorn, in Prussia, and received his education at the university of Cracow. He then travelled into Italy, for the purpose of becoming acquainted with the great astronomer Regiomontanus, and became a professor of mathematics at Rome. On his return, after several years, to his native country, his uncle, the bishop of Warmia, gave him a canonry; and being thus at ease as to fortune, he diligently laboured to improve the science of astronomy. He studied the various systems of the ancient astronomers, compared them with each other, and astonished and dissatisfied with the complexity and improbability which he found in them, applied himself to the construction of a system at once more simple and more symmetrical. The fruits of his researches appeared in his Latin treatise "On the Revolutions of the Celestial Orbs," in which he represented the sun as occupying a centre round which the earth and the other planets revolve. Aware that bigotry would assail him, he says, in his prefatory address to the pope—"If there be any who, though ignorant of mathematics, shall presume to judge concerning them, and dare to condemn this treatise because they fancy it is inconsistent with some passages of Scripture, the sense of which they have miserably perverted, I regard them not, but despite their rash censure." In fact his great work re-

mained in MS. for 13 years after he had completed it, so different was he as to the reception it might meet with; and it was only a few hours before his death that a printed copy was presented to him, giving him assurance that his opinions would see the light, though he would be beyond the reach of censure and persecution. Born, 1473; died, 1543.

COPIESTON, EDWARD, bishop of Llandaff and dean of St Paul's, was born at Offwell in Devonshire, of which parish his father was at once the patron and incumbent, 1776. His early education was conducted under the paternal roof. When he was 15 years old, he was elected to a scholarship at Corpus Christi College, Oxford. In 1793 he gained the chancellor's prize for a Latin poem; and in 1795 he was elected fellow of Oriel under the most honourable circumstances, became college tutor two years later, and after filling various high offices connected with the university, he exchanged his professional career for the honours of the church, being in 1826 appointed dean of Chester, and in 1827 bishop of Llandaff and dean of St Paul's. At an early period of his life, Dr Copleston gained great distinction by his polemical pamphlets in favour of the university; and besides contributing various articles to the Quarterly Review, gave to the world numerous sermons and charges, all of them distinguished by vigour, clearness, and precision of thought. Died, 1842. *Memoirs and Remains of Bishop Copleston* have appeared since his death.

COPLEY, JOHN SINGLETON, an eminent painter, was born at Boston, in the United States, in 1738; visited Italy in 1774; and in 1776 came to England, and was chosen a member of the Royal Academy. As an artist he was self-educated, and had executed many works of merit before he left America; but his "Death of Lord Chat-ham," now in the National Gallery, established his fame in this country. Many other fine historical subjects were subsequently produced by him, among which were "The Siege of Gibraltar," "Death of Major Pierson," recently purchased for the National Gallery, "Charles I. in the House of Commons," &c. He died in 1815. Mr Copley was the father of Lord Lyndhurst, lord chancellor of England.

CORAM, THOMAS, philanthropist, born about 1668, a man who deserves the gratitude of his country for devoting a long life to the relief of human suffering. After great sacrifices, and persevering exertions for years, he established and obtained a charter for the Foundling Hospital, which, added to other benevolent undertakings, so impaired his fortune, that in his old age it became necessary to relieve his necessities by a public subscription. Coram was the friend of Hogarth, who painted an admirable portrait of him, now in the Foundling Hospital. Died, 1751.

CORBET, RICHARD, D.D., an English divine and poet; author of a spirited "Narrative of a Journey to France," and of various other poems, published under the title of "Poetica Stromata." He was remarkable for wit, and no less so for an eccentricity and

mirthful jocularity, which did not very well accord with the character of his profession. It did not, however, prevent him from being raised, successively, to the bishoprics of Oxford and Norwich. Born, 1582; died, 1635.

CORDAY D'AIMANS, MARIE ANNE CHARLOTTE, a young Frenchwoman of great beauty and courage, who became the murderer of the revolutionist Marat. She was born at St Saturnan, near Seez, in Normandy, 1768, was the grand-daughter of the poet Cornelle, and was gifted with superior understanding and a warm heart, glowing with the passion for liberty. The books she read and the conversation of the persecuted and exiled leaders of the Girondists, roused in her the irresistible desire to save, if possible, her country, at whatever cost to herself. Marat appeared to her the master-spirit of the atrocities perpetrated or threatened, and she determined to rid the country of him. That she was actuated by a sense of duty, and felt that she was about to perform an act of patriotic heroism, there is not the slightest doubt; and as the circumstances attending it possess more than ordinary interest, we give the following detailed account. Charlotte Corday left her home, and on arriving at Paris (July 12, 1793), she went to Marat's house, but was not admitted. On the same evening, she wrote to him as follows:—"Citizen, I have just now come from Caen. Your love for your country no doubt makes you desirous of being informed of the unhappy transactions in that part of the republic. Grant me an interview for a moment. I have important discoveries to make to you." The following day came, and, with a dagger in her bosom, she proceeded to the house of Marat, who, just on the point of coming out of his bath, immediately gave orders that she should be admitted. The assemblies at Calvados were the first subjects of conversation, and Marat heard with eagerness the names of those who were present at them. "All these," he exclaimed, "shall be guillotined." At these words Charlotte plunged her dagger into his bosom, and he instantly expired, uttering the words, "To me, my friend!" Meanwhile the maid remained calm and tranquil as the priestess before the altar, in the midst of the tumult and confusion. She was afterwards conducted as a prisoner to the Abbaye. A young man, who begged to die in her place, was also condemned to death. Her first care was to implore the forgiveness of her father for disposing of her life without his knowledge. She then wrote to Barbaroux as follows: "To-morrow, at five o'clock, my trial begins, and on the same day I hope to meet with Brutus and the other patriots in elysium." She appeared before the revolutionary tribunal with a dignified air, and her replies were firm and noble. She spoke of her deed as a duty which she owed her country. "To stop the anarchy of France," she said she did it. "I have slain one man to save a hundred thousand—a wretch to preserve the innocent. I was a republican before the revolution, and I have never failed in energy." She was condemned, and led to the scaffold;

did not very well of his profession. At him from being bishoprics of Oxford; died, 1635.

retaining her calmness and presence of mind to the last, though pursued by the crowd with yells and shouts of execration. She suffered by the guillotine, July 17, 1793. A young man from Mentz, Adam Lux, saw Charlotte on her way to the scaffold, and was so enthusiastically excited by her beauty, bravery, and fate, that he published an Apology for her deed, and joyfully died for her sake.

CORDINER, CHARLES, an antiquarian and topographical writer, was born at Peterhead in 1716. He completed his education at King's College, Aberdeen, and was soon after admitted to the order of priesthood by Dr Traill, bishop of Down and Connor. He was afterwards appointed to the charge of St Andrew's Episcopal Chapel, Banff. Mr Cordiner was the first of the clergy of English ordination who united with the Scottish Episcopal Church after the abrogation of the severe penal laws passed in the reign of George II., and abolished under the government of George III. He early displayed a taste for drawing and painting, which he cultivated afterwards as an amusement for his leisure hours; and, during his residence at Banff, he designed the paintings of the windows of the mausoleum of Duff House for the Earl of Fife. He was also attached to the study of antiquities, more especially those of the northern parts of Scotland. He was introduced to Mr Pennant, when on his tour through Scotland, and at his suggestion he was induced to write "The Picturesque Scenery and Antiquities of the North of Scotland," 1780, 1 vol. 4to, in a series of letters to Mr Pennant, being a notice of such places as had not been visited by that gentleman in the course of his tour. The engravings which accompany this work are from designs by Mr Cordiner. He died at Banff, 19th November, 1794, aged 48.

CORELLI, ARCANGELO, Italian musical composer, was born in 1653. He was very celebrated for his skill as a violinist, and when he visited Germany, in 1680, was received with the greatest honours, both from sovereigns and people. He had latterly the patronage of Cardinal Ottoboni. His works, especially the Twelve Concertos, are very highly esteemed for the highest qualities of musical composition. Died at Rome, 1713.

CORENZIO, BELISARIO, a celebrated painter of Greek origin, born about 1558. He studied at Venice, under Tintoretto, for five years, and about 1590 established himself at Naples. He chiefly painted in fresco, worked with extraordinary rapidity, and gained great reputation. He allied himself with Caracciolo and Spagnoletto, and attempted by all means to secure to this triumvirate a monopoly of painting; expelling or persecuting all dangerous rivals. One of his largest works is the "Feeding of the Five Thousand," which he executed in less than six weeks. Died at Naples, 1643.

CORLATE, or CORLAT, THOMAS, an English traveller and writer. For a considerable time he held a situation in the household of Prince Henry, son of James I., and was so remarkable for oddity and eccentricity, that, as Anthony Wood remarks, "he was the whetstone for all the wits of

the age." In 1608 he commenced a pedestrian tour of Europe; and having walked 900 miles with one pair of shoes, he hung them up, on his return, in the parish church of his native place, Odcombe, in Somersetshire. This eccentric traveller, who is said to have introduced into England the use of table forks, published "Cruddites hastily gobbled up in Five Months' Travel in France, Savoy, Italy, Rhetia, Helvetia, Germany, and the Netherlands;" "Corlate's Crambe, or his Colewort twice Sodden," "Traveller for the English Wits," and "A Letter from the Court of the Great Mogul." He died while travelling in the East Indies, in 1617.

CORINNA, a celebrated poetess, to whom the Greeks gave the appellation of the Lyric Muse. She composed a great number of poems, of which only a few fragments have come down to us; and five times obtained the poetic wreath from her great competitor, Pindar. She flourished in the 5th century B.C., and a tomb was erected to her memory in her native city, Tanagra, in Bœotia.

CORIOLOANO, BARTOLOMEO, an Italian engraver, born at Bologna, probably about 1590, is supposed to have been the son of Cristoforo Coriolano, also an engraver, who died about 1600. He engraved on wood and executed many prints after Guido, the Caracci, and other painters. The pope made him Cavaliere di Loreto. His prints date from 1627 to 1647. Died, 1654.

CORIOLANUS, CAIUS MARCIUS, a celebrated legendary hero of Rome. The story respecting him is that in a war with the Volscians, the Romans besieging Corioli, the capital of the Volscians, were driven back to their lines, Marcius rallied his countrymen, pursued the enemy, and possessed himself of Corioli; for which he was rewarded with a large share of the spoil, and with the surname of Coriolanus. Subsequently, in disputes which took place between the patricians and plebeians, Coriolanus made himself so obnoxious to the latter, that he was banished. Stung by the ingratitude of his countrymen, he joined the Volscians, and, jointly with Tullus Aufidius, led a numerous army against Rome. He had encamped within five miles of the city, and its ruin seemed inevitable, when, at the urgent entreaties of his mother, Volumnia, he withdrew his army. The traditions differ as to his end; according to some he was assassinated, according to others he went into exile and lived long among the Volscians.

CORNARO, LUDOVICO, a Venetian noble, whose precepts derive great force from the good result of his own practice of them. Having greatly injured his health by too free indulgence in the pleasures of the table, he had the resolution entirely to abandon that indulgence, and to restrict himself to 12 ounces of food and 14 ounces of wine in the 24 hours. Having by this regimen restored himself to health, he wrote various treatises recommendatory of the system from which he had derived so much benefit. Besides these, which are collected under the title of "Discorsi della Vita Sobria," he wrote "Trattato delle Acque." He commenced his dietary rule when he was 40,

and died, it is said, at the great age of 104, in 1566.

CORNEILLE, PIERRE, the greatest of French dramatic poets. He was born at Rouen in 1606, and for some time practised in that city as an advocate. His first dramatic piece was "Mélite," a comedy, which met with such distinguished success, that he was encouraged to devote his rare powers to the drama. The tragedies of "Medea," "The Cid," "The Horatii," and "Cinna," followed, and established for their author a pre-eminent station among French dramatists. Besides the foregoing, he wrote many other tragedies; and translated in verse Thomas à Kempis, "On the Imitation of Jesus Christ." He again turned to the drama, but his last works were unworthy of his name. Corneille was admitted to the French Academy in 1647, and was dean at the time of his death. It is melancholy to reflect that the great Corneille, who had achieved fame equally for himself and his country's literature, ended his days in poverty and distress. Died, 1684. Charlotte Corday was the granddaughter of Corneille.

CORNEILLE, THOMAS, brother of the preceding, and also a fertile dramatist, was born in 1625. Several of his tragedies were very popular; in fact, there seems to be a good deal of truth in Voltaire's assertion, that Thomas Corneille would have had a great reputation, if he had not had a great brother. Besides dramatic works, he wrote a "Dictionary of Arts and Sciences," a "Geographical and Historical Dictionary," and a translation of the *Metamorphoses* of Ovid. Died, 1708.

CORNELIA, an illustrious Roman lady. She was a daughter of Scipio Africanus, wife of Tiberius Sempronius Gracchus, and mother of the two famous tribunes. She was of a grave and dignified deportment, and possessed so great a control over her feelings, that when a friend condoled with her on the death of her sons, she replied, "The woman who had the Gracchi for sons cannot be considered unfortunate." Her literary talents must have been considerable, as Cicero very highly commends some of her epistles. She lived in the second century B. C., and after her death the Romans erected a statue to her memory, bearing the inscription, "To Cornelia, the mother of the Gracchi."

CORNELISZ, or CORNELIUS, LUCAS, a Dutch painter, who came to England, and was appointed portrait-painter to Henry VIII. Died, 1552.

CORNWALL, RICHARD, Earl of [RICHARD.]

CORNWALLIS, CHARLES, Marquis of, son of the first Earl Cornwallis, was born in 1738, and entered the army as soon as he had completed his education at Cambridge. In the American war he acted a conspicuous part, and greatly distinguished himself at the battle of the Brandywine, and at the siege of Charlestown. After gaining the important battles of Camden and Guilford, he determined to invade Virginia; but his plans failing, owing, as he affirmed, to the inefficient conduct of Sir Henry Clinton, upon whom he had relied for support, he and his army were made pri-

soners at York-town. In 1786 he was made governor-general and commander-in-chief in India. The government of Bengal found it necessary to uphold the rajah of Travancore against the sultan of the Mysore, and the first campaign being unsuccessful, in 1791 he invaded the Mysore, besieged Seringapatam, and compelled Tippos Sahib to submit on humiliating terms. Having performed this important service, Lord Cornwallis returned to England, was raised to the rank of marquis, and made master-general of the Ordnance. In 1798 he was sent to Ireland as lord-lieutenant; and in the trying and terrible scenes of the rebellion so conducted himself as to gain the good opinion of the public, while vigorously upholding and vindicating the laws. In 1801 his lord-lieutenancy expired, and he was sent on a mission to France, where, in 1802, he signed the peace of Amiens. In 1804, he was a second time appointed governor-general of India; but his arduous services had now completely worn out his frame, and he died, soon after his arrival in India, at Ghazepore, in the province of Benares, in 1805.

CORR, ERIN, an eminent Belgian engraver, was born at Brussels in 1803. He was the son of an Irishman who took part in the rebellion of 1798, and was expatiated. He attained a very high reputation, and became a member of the Royal Academy of Belgium and director of the School of Engraving of the Royal Academy of Fine Arts of Antwerp. His last work was an engraving on copper-plate of the "Descent from the Cross," by Rubens, on which he spent ten years of labour. Among his other principal works are the "Saviour," after Leonardo da Vinci; "Christ on the Cross," after Van Dyck; the "Queen of Holland," after Scheffer, &c. Died at Paris, 1862.

CORREGGIO, ANTONIO ALLEGORI DA, an Italian painter of transcendent ability, was born about 1494, at Correggio, in the duchy of Modena. He is the founder of the Lombard School, and unrivalled by all competitors for the grace and loveliness of his colouring. An absurd story, since disproved, was long current illustrative of his poverty, and the ill usage he met with from the ecclesiastics of Parma, for the cathedral of which city he painted in fresco the "Assumption of the Virgin." For the church of San Giovanni in the same city he painted the "Ascension." Correggio painted many oil pictures, among which are the "Notte," the "Magdalen Reading," "St George," and "St Sebastian," in the Dresden Gallery, and the "Ecce Homo," "Mercury instructing Cupid," and several others in the National Gallery. Died, 1534.

CORT, CORNELIUS, a Dutch engraver, born at Hoorn in 1536. He went to Venice, and lived with Titian for a time, engraving some of his works. He afterwards settled at Rome, and practised and taught there. His prints are numerous, and are after the works of Raphael, Michael Angelo, Correggio, Titian, and other eminent masters. Cort was the first to engrave Raphael's "Transfiguration." His works were much studied

1788 he was made commander-in-chief of Bengal found the Mysore, and unsuccessful, in the Mysore, and besieged Seringapatam. He was killed at Tipoo Sahib's hands. He was in the service of Lord Cornwallis, and was raised to the rank of major-general and made master-general of the Ordnance. In 1798 he was lieutenant-governor of the Madras Presidency; and in 1804 he was appointed governor-general of India, and was succeeded by Lord Wellesley.

Belgian general in 1803. He was who took part in the expedition to Egypt, and was appointed commander-in-chief of the Army of the Nile. He was an engraver. Descent from which he spent his other principal part of his life in engraving the Cross, after the French Revolution, after 1862.

ALLEGRI DA, an Italian painter, was born in the duchy of Parma, and was the author of many of the most beautiful works of his age. He was an engraver, and was appointed painter to the church of the "Notte," and was the author of many of the most beautiful works of his age. He was an engraver, and was appointed painter to the church of the "Notte," and was the author of many of the most beautiful works of his age.

engraver, and was appointed painter to the church of the "Notte," and was the author of many of the most beautiful works of his age. He was an engraver, and was appointed painter to the church of the "Notte," and was the author of many of the most beautiful works of his age.

by Agostino Caracci, who is sometimes said to have been his pupil. Died at Rome, 1578.
CORTESI, JACOPO, [BORGOGNONE], CORTEZ, or CORTES, FERNANDO, the conqueror of Mexico, was born, in 1485, at Medellin, in Estremadura, and, after studying the law, quitted it for the military profession. In 1511 he went with Velasquez to Cuba; and the conquest of Mexico being determined upon, Cortez obtained the command of the expedition. In 1518 he set sail with 700 men in 10 vessels; and on landing at Tabasco he caused his vessels to be burned, in order that his soldiers might have no other resource than their own valour. Having conquered the Tlascalans, and induced them to become his allies, he marched towards Mexico, where he was amicably received; but having seized upon their monarch, Montezuma, and treated the people with the utmost insolence, the Mexicans first murmured, and then resisted. Cortez besieged the city of Mexico; and in the desperate struggle which ensued, it is said that upwards of 100,000 of the faithful and unfortunate Mexicans were killed or perished by famine. Having reduced the devoted city, Cortez completely overran the Mexican territories; in doing which he committed atrocities which would be incredible if not related on irrefragable testimonies. In reward for the addition he had made to the wealth of Spain, he had a grant of land and the title of marquis; but on returning he found that the court of Madrid were become jealous of his power, and treated him with neglect. Died, 1541.

CORTONA, PIETRO DA, properly **PIETRO BERRUTTINI**, an Italian painter. He was a native of Cortona, in Tuscany, and at an early age was placed under the tuition of Baccio Ciampi at Rome. The Barberini palace, the new works at the Vatican, and many of the churches of Rome, were decorated by him; and at Florence he adorned the Pitti palace for the Grand-duke Ferdinand II. In addition to being an eminent painter, he was almost equally eminent as an architect. Died, 1669.

CORVISART, JEAN NICOLAS, an eminent French physician, was born in 1755. He was intended for the law, but his predilection for medical science induced his friends to change his destination. He was chief physician to Napoleon, who made him a baron, and an officer of the Legion of Honour. Nor was his great merit overlooked by the Bourbons, the place of honorary member of the Royal Academy of Medicine being conferred on him a short time previous to his death, which happened in 1821. He was the author of some valuable medical books, and translated others.

COSIMO, PIETRO DE, Italian painter, was born at Florence in 1460. He was a pupil of Cosimo Rosselli and the master of Andrea del Sarto. He had very eccentric tastes, and indulged them both in life and in art. Died, 1521.

COSIN, JOHN, a learned, pious, and charitable prelate, was born at Norwich, in 1594, and educated at Cambridge. In 1640 he was made dean of Peterborough; but the Puritans deprived him of his preferments, and

even went the length of impeaching him on a charge of being inclined to Popery. On this he retired to France, where he remained until the restoration of Charles II., who raised him to the see of Durham. Among his writings are "A History of Transubstantiation," and "A Scholastical History of the Canon of the Holy Scriptures." Died, 1672.

COSMAS, surnamed **INDICOPLEUSTES**, a celebrated merchant of Alexandria, living in the 6th century; who, after making a voyage to India, and writing several books on cosmography, quitted commerce and became a monk.

COSMO I., grand-duke of Tuscany, born in 1519, was the son of Giovanni de Medici; and on the assassination of Alessandro, chief of the house of Medici, was elected head of the republic of Florence, though strenuously opposed by a party who favoured the Florentine exiles. Cosmo made himself absolute master of Florence, liberty was wholly lost, and terror was inspired by a system of espionage, by torture, and even by secret assassination. While he kept his subjects slaves, he made the state free from foreign interference, and enlarged it by fresh acquisitions, till Tuscany was for the first time united under one ruler. Several attempts were made to shake the power of Cosmo, but he succeeded in defeating them; and it was probably in order to secure himself able and zealous defenders in case of open revolt, that he instituted the military order of the Knights of St Stephen. He restored the university of Pisa, and held out the most liberal encouragement to men of scientific and literary eminence to settle there as professors. He also founded the Academy of Florence, established its gallery of paintings, and performed many other wise and honourable actions; thus procuring himself a celebrity and influence which probably he would in vain have sought by the more dazzling achievements of the warrior. After a prosperous reign of 34 years, he died in 1574.

COSTA, HIPOLITO JOSE, FURTADO DE MENDOÇA, DA, a Portuguese gentleman of scientific and literary attainments, who, being charged with freemasonry, was thrown into the prison of the Inquisition at Lisbon. Here he was repeatedly examined, and his answers not being satisfactory to his persecutors, he was remanded to his dungeon, with little prospect that his sufferings would terminate otherwise than in death. By one of those fortunate accidents which sometimes make "truth stranger than fiction," his cell was left open, and he was enabled to possess himself of a bunch of keys which opened every lock that was between him and liberty. Having taken these keys, and a book which lay beside them, he made his escape; and after lying hidden several weeks in the immediate neighbourhood of his late dungeon, he found means to embark for England. The book which he brought from his prison contained, *inter alia*, notes of his examinations before the inquisitors; and soon after his arrival he published a narrative of the persecutions he had undergone, the account of his ex-

aminations being taken from the official document of which he had thus oddly become possessed. His talents, and the interest excited by his adventures, obtained him considerable notice, and he became foreign secretary to the duke of Sussex, and chargé d'affaires in this country for the Brazilian government. Died, 1824.

COSTANZA, ANGELO DI, a Neapolitan poet and historian of noble birth; author of "Istoria del Regno di Napoli," containing the history of Naples from 1250 to 1489. The preparation of this work occupied him 40 years. Died, 1591.

COSTER, or KOSTER, LAURENCE JANSEN, a native of Haerlem, in Holland, to whom his countrymen ascribed the invention of the art of printing, in the year 1430. His claim rests on the unsupported testimony of Hadrian Junius, and is now generally considered groundless. The fame of Gutenberg, therefore, who, according to Junius, had derived the knowledge of printing from Coster, remains undiminished, as the inventor of the art. Born, 1370; died, 1439.

COSWAY, RICHARD, an eminent English artist. He painted miniatures admirably, and was almost equally great as an oil painter. He was much admired and employed as an artist, and highly esteemed as a man. He was one of the oldest members of the Royal Academy, and died at the age of 80, in 1821. His wife, Maria, was a good painter and musical performer; and her parties were attended by the prince of Wales and all the leaders of London society.

COTES, FRANCIS, an English artist of great eminence as a portrait painter, as well in oil as in crayons. He was one of the first members of the Royal Academy. Died, 1770.

COTES, ROGER, mathematician, was born in Leicestershire in 1682. He studied at Cambridge, became fellow of Trinity College, and in 1706 Plumian professor of astronomy. His early death disappointed the high hopes which his great acquirements had excited, and the only written fruits of his studies are the papers collected in the volume entitled "Harmonia Mensurarum." These, however, exercised great influence on the progress of mathematical science. Died, 1716.

COTMAN, JOHN SELL, architectural engraver, was a native of Norwich, and was born about 1780. His most admired work is the "Architectural Antiquities of Normandy," in 2 vols. folio, published in 1820. He had previously published similar works in illustration of the Architectural Antiquities of Yorkshire and Norfolk, and a volume on the Sepulchral Brasses of the latter county. He spent the latter part of his life in London, and died in 1843.

COTTA, J. G., Baron, an eminent German bookseller, and the proprietor of the Allgemeine Zeitung, a political daily paper, as well as of several others devoted to literature and the arts, was born at Stuttgart, in 1764; for many years carried on an extensive and flourishing concern; became vice-president of the second chamber of the States of Württemberg in 1824, and died in 1832. Cotta was the personal friend of the most distinguished German authors of his

day; Goethe, Schiller, Jean Paul, Wilhelm and Alexander von Humboldt, &c.

COTTIN, SOPHIE, an accomplished French novelist; authoress of "Matiilde," "Claire d'Albe," the well-known "Elisabeth, ou les Exilés de Sibérie," &c. Born, 1773; died, 1807.

COTTLE, JOSEPH, publisher and miscellaneous writer, was born in 1770, carried on business at Bristol, where he became the friend of Coleridge, Wordsworth, and Southey, and published the first poems of Coleridge in 1796. He was author of several poetical and other works, now forgotten, and of "Recollections of Coleridge." Died, 1853.—His brother, AMOS COTTLE, who was also a poet, and published a translation of the Edda, died in 1800. They were both laughed at by Byron in his "English Bards and Scotch Reviewers."

COTTON, CHARLES, an English poet of the 17th century; author of "Scarronides, or Virgil Travestie;" a supplement to his friend Izaak Walton's "Complete Angler;" and a volume of original poems, &c. He also translated Corneille's tragedy of the Horatii and Montaigne's Essays. Born, 1630; died, 1687.

COTTON, NATHANIEL, an English physician and poet; author of "Visions in Verse for the Instruction of Younger Minds." He for some years kept a lunatic asylum at St Alban's, and the poet Cowper was for a time one of its inmates. Born, 1707; died, 1788.

COTTON, SIR ROBERT BRUCE, baronet, a distinguished antiquary, founder of the Cottonian Library, was born at Denton, in Huntingdonshire, in 1570. After graduating B. A. at Cambridge, he settled at London, employed himself in forming a collection of ancient charters, and obtained so high a reputation for antiquarian learning that he was frequently consulted on difficult questions of state. He was a friend of Camden, and gave him some aid in the preparation of his great work. He was knighted, and afterwards created a baronet, by James I. He suffered on several occasions from unjust imputations, and at length, in 1629, on a false charge of having written or circulated a pamphlet hostile to popular liberties, his library was taken from him. The loss occasioned an illness, which terminated in his death, in 1631. His valuable library was kept together in the possession of his family, was afterwards bought for the crown, and was transferred to the British Museum at the time of its foundation.

COUDRETTE, CHRISTOPHE, a French priest, and a very able opponent of the Jesuits; author of "A General History of the Jesuits," "Mémoires relative to the Formulary," &c. His bold and liberal tone of thought caused him to be twice imprisoned; at Vincennes, in 1735, and at Paris, in the Bastille, in 1738. Died, 1774.

COULOMB, CHARLES AUGUSTIN DE, a French natural philosopher and officer of engineers, to whose scientific labours many discoveries in electricity and magnetism are owing. He was born at Angoulême in 1736, and died in 1806.

ANÇOIS LE, a

Norman ecclesiastic, was born in 1681. Although of the Catholic Church, he wrote zealously and ably in defence of the ordinations of the Church of England, which work was formally censured by an assembly of French cardinals and archbishops; and Courayer consequently left France for England. Here he was well received, and the university of Oxford conferred the degree of L.L.D. upon him. Courayer made French translations of Fra Paolo's History of the Council of Trent, and of Sleidan's History of the Reformation. Died, 1776.

COURIER, PAUL LOUIS, a witty and able French writer, was born in 1774. He served for some time as an officer in the army; but his republican principles prevented his advancement under Buonaparte; and, after the battle of Wagram, he threw up his commission, and resided for some time in Italy. On his return to France his name became notorious as the author of several admirable political pamphlets, but his career was cut short by assassination, in 1825.

COURT DE GEBELIN, ANTOINE, a learned Frenchman, born at Nismes in 1725. His father was minister of the reformed church at Lausanne, and he himself held a similar post for a short time. He afterwards settled at Paris, and there published the work entitled "le Monde Primitif analysé et comparé avec le Monde Moderne." It is in 9 vols. quarto, and its vast plan embraces dissertations on mythology, grammar, origin of language, history profane and sacred, &c. The author was appointed censor royal, and twice received the prize of 1200 livres annually given by the French Academy. Died, 1784.

COURTENAY, PETER OF, third of the Latin emperors of the East, was cousin to Philip Augustus, king of France; married, in 1184, Agnes, heiress of the countess of Nevers and Auxerre, and, after her death, in 1192, the princess Yoland, sister of the emperors Baldwin and Henry. On the death of the latter emperor, in 1216, and the refusal of the crown by Andrew, king of Hungary, who had married a daughter of Yoland, Peter of Courtenay was elected by the barons to succeed. He set out at the head of a small army; with some difficulty got himself crowned by Pope Honorius III., outside the walls of Rome; embarked on Venetian vessels, unsuccessfully besieged Durazzo, and on his difficult land journey thence towards Constantinople, was treacherously delayed and made prisoner by Theodore, one of the Comneni, and after two years' confinement, was put to death. Yoland, who with her children had reached Constantinople, carried on the government till her death, in 1219.

COURTNEY, WILLIAM, archbishop of Canterbury, born 1311. He was the fourth son of Hugh Courtney, earl of Devonshire, and Margaret, granddaughter of Edward I. In 1376, then being bishop of London, he distinguished himself by a violent opposition to the king's demand for a subsidy. It was Bishop Courtney who cited Wycliffe to appear before the convocation at St Paul's, in February, 1377; when a war of words took place between the noble supporters of the reformer and the bishop, and the meet-

ing became a tumult and did nothing. In 1381 he became archbishop of Canterbury and lord high chancellor, in which office he showed a rancorous spirit of persecution against the Wickliffites. His character was resolute and arrogant; and though he professed a desire to support the king and the people against the encroachments of the pope, his actions invariably showed that he was in heart a domineering prelate, thoroughly devoted to Rome, and caring little for the dignity of the crown, or the weal of the people. Died, 1396.

COURTOIS, JACQUES. [BORGOGNONE.] COURTOIS, GUILLAUME, brother of Jacques Courtois, and also an eminent painter. He excelled in historical pieces, and assisted his brother in some of his works. Died, 1679.

COUSIN, JEAN, generally regarded as the earliest French historical painter, was born in Champagne, 1530. He chiefly painted on glass, but his "Last Judgment," painted on canvas for the convent of the Minims at Vincennes, is esteemed an excellent work. He was also an excellent sculptor, and author of "Livre de Perspective," and some other treatises connected with the art. Died, 1590.

COUSTOU, NICOLAS, French sculptor, born at Lyons, in 1658. He studied at Paris under Antoine Coysevox, his uncle; won the grand prize, and went to Rome, where he chiefly studied the works of Michael Angelo and Algardi. On his return he was received at the Academy, and was charged with many important works at Paris and Lyons. Among the principal are, "Le Vœu de Louis XIII.," in the cathedral of Notre-Dame; the group of "The Seine and the Marne;" and a group of "Tritons," at Versailles. Died, 1733.

COUSTOU, GUILLAUME, French sculptor, younger brother of the preceding, was born in 1678. He also studied under Coysevox, went to Rome, and was admitted to the Academy on his return. He assisted Nicolas in some of his works; executed various decorative works for the gardens of Versailles and Marly; a bronze figure of the Rhone; the statues for the pediment of the Chateau d'Eau, &c.; and was made director of the Academy. Died, 1746.

COUTHON, GEORGE, a French advocate and president of the court of justice at Clermont. Becoming a member of the Legislative Assembly and of the National Convention, he voted for the trial and death of Louis XVI.; and after hesitating awhile as to the party with which he should act, gave in his adhesion to that of Robespierre. When troops were sent against Lyons, he was commissioner from the Convention, and gave with his own hand the signal for the destruction of the noble buildings of that devoted city. Sharing the power and participating in the atrocities of Robespierre, he was also involved in his ruin. Guillotined, 1794.

COUTO, DIEGO DE, a Portuguese historian, born about 1542. He spent much time in the Indies, and became historiographer of India to Philip II. and Philip III. He was author of a continuation of Barros' "Asla Portuguesa." Died at Goa, 1616.

COUTTS, THOMAS, a London banker, eminent for his wealth and connections. He

came from Scotland at an early age; and from being a junior partner in a mercantile house in the city, rose to be one of the most considerable bankers in England. He was twice married; first to Susan Starkie, by whom he had three daughters; Susan, married, in 1790, to the earl of Guildford; Frances, married, in 1800, to the marquis of Bute; and Sophia, married, in 1793, to Sir Francis Burdett. In 1815 his first wife died; and, three months afterwards, he married Harriet Mellon, an actress of some celebrity, to whom he bequeathed the whole of his immense property, consisting of £600,000 in personalty, besides real estates in lands and houses, to a great amount. He died in 1821, aged 86; and his widow in due time bestowed her hand and fortune on the youthful duke of St Alban's.

COVENTRY, JOHN, a skilful, self-taught, English mechanician. He invented an hygrometer, which met with the approbation of the Royal Society, and was presented to the king. Subsequently he employed himself in drawing micrometers on ivory and glass; and to such a perfection did he bring them, that his squares were only the millionth part of an inch superficial. He also made two chamber organs, telescopes of extraordinary power, and balances for the assaying of gold, of such nicety that they would weigh to the thousandth part of a grain. Died, 1812.

COVENTRY, THOMAS, lord keeper of the great seal in the reign of Charles I., was the son of Thomas Coventry, a justice of the court of Common Pleas. He was born in 1578; educated at Balliol College, Oxford; studied the law in the Inner Temple; and having successively become solicitor-general, attorney-general, and lord keeper, in 1628 he was raised to the peerage; and, according to the character given of him by Clarendon, he was well worthy of his great and uninterrupted success. Died at London, 1640.

COVENTRY, WILLIAM, son of the above. He was knighted in 1665, and made a commissioner of the treasury in 1667; but having offended the duke of Buckingham, he was forbidden to appear at court. On this he retired to his seat in Oxfordshire, and passed the remainder of his life in privacy. He was author of several works of a political character, but not now worth enumerating. Died, 1689.

COVERDALE, MILES, bishop of Exeter, reformer and translator of the Bible, was born in Yorkshire in 1487. He studied at Cambridge, entered the Augustinian order, and was ordained priest in 1514. He afterwards zealously embraced the reformed faith, associated with other eminent men for conference on the Scriptures, aided Tyndale in his translation of the Bible, and by permission of Henry VIII., published his own translation in 1535. It was the first printed English Bible. Three years later, while assisting at Paris in the publication of another edition, he was cited before the Inquisition and the copies printed were condemned to be burnt. He returned to England, was made almoner to Queen Catherine Parr, and, in 1551, bishop of Exeter. He was deprived and imprisoned by Queen Mary, went abroad,

and after many wanderings, reached Geneva, still devoting himself to his chosen task, and contributing his aid to the "Geneva Bible." He returned after Mary's death, and held for a short time a rectory in London. Died there, 1568. The publication of his Bible was commemorated in England in October, 1835, its third centenary.

COWARD, WILLIAM, an English physician, and author of "Thoughts on the Human Soul; demonstrating the Notion of the Human Soul united to the Human Body to be an Invention of the Heathens, and not consonant to the Principles of Philosophy or Reason." This work excited considerable indignation among the more zealous divines, who procured an order to have it burned by the common hangman. He died about the year 1722.

COWELL, JOHN, an English lawyer and antiquary; author of "The Interpreter," a law dictionary, which was burned by the common hangman on account of some unconstitutional doctrines on the king's prerogative, and "The Institutes of the Laws of England." Died, 1611.

COWLEY, ABRAHAM, an eminent English poet, born in London, 1618. Educated as a king's scholar at Westminster, he very early evinced a taste and aptitude for poetry; and, while only in his 15th year, published a volume entitled "Poetical Blossoms," which procured him considerable reputation. In 1636 he was elected a scholar of Trinity College, Cambridge; where he produced a pastoral comedy, entitled "Love's Riddle," and "Naufragium Jocularum," a Latin comedy, which was performed by the members of his college. He resided at the university until 1643, when he was ejected by the Puritan visitors, and became an active partisan of the royal cause. He was much esteemed by Lord Falkland, and accompanied the king in several journeys. When the queen left the country he accompanied her Majesty, and remained abroad for some years; during which time he was chief agent in managing the correspondence between the king and queen. In 1656 he returned to England, and soon after published a volume containing most of the poems printed in the final collection of his works. Being suspected by the party in power, he was thrown into prison, but released on the bail of Dr Scarborough. He again went abroad, and was again employed in aiding the royal cause. On the restoration taking place he was for some time neglected; but at length, by the interest of the duke of Buckingham, he obtained the lease of a farm at Chertsey, which produced him about £300 a year. Died, 1667.

COWLEY, HANNAH, an accomplished English dramatic writer; authoress of "The Itunaway," "The Belle's Stratagem," "More Ways than One," &c., besides some poems and farces. The sprightliness of dialogue, and the variety of characters and incidents, which this lady introduced in her dramatic works, evince much versatility of genius. Garrick, it is said, could hardly be persuaded that her first piece was the production of a mere boarding-school girl. Died, 1809.

versity education, he successively accompanied several young noblemen to the Continent in the capacity of tutor; and on his return obtained various preferments in the church till he became a canon residentiary of Salisbury and archdeacon of Wilts. He was the author of "Travels in Switzerland;" "Travels in Poland, Russia, Sweden, and Denmark;" a "History of the House of Austria," his best work, painstaking, and not very lively reading, but well supported by references to his authorities; "Historical Memoirs of the Kings of Spain;" "Memoirs of Sir Robert Walpole;" and other works equally interesting, and valuable for their research and adherence to truth. Died, 1828.

COYPEL, the name of several eminent French painters. NOEL COYPEL was born in 1628, and died in 1707. He adorned the old Louvre and the Tulleries, painted some fine pictures for the council-hall of Versailles, and executed several scriptural pieces of great merit. His son, ANTOINE, born at Paris, 1661, was the most distinguished of his family as painter and engraver. He studied under his father and at Rome, and became director of the Academy at Paris, and first painter to the king. He painted in the Palais Royal a series of 15 scenes from the *Æneid*. His style was not free from the mannerism of the French school. Died, 1721. NOEL NICHOLAS, usually called *Coppel the uncle*, despised the false glitter of this school, and aimed only at truth and nature. He died in 1735. CHARLES ANTOINE, the son of Antoine, was a decided copyist of his father's manner, and accommodated himself to the prevailing taste of the times for gaudy colouring. Born, 1694; died, 1752.

COYSEVOX, ANTOINE, a celebrated French sculptor, was born at Lyons, in 1640, and died at Paris, in 1720. Among his best works are the monument of Cardinal Mazarin; an equestrian statue of Louis XIV.; the monument of Colbert; Fame and Mercury on winged horses, &c. Coysevox was received at the Academy in 1680, and became professor and chancellor. On account of the beauty and animation of his portrait busts, he was called the *Vandyke of sculpture*.

CICABBE, GEORGE, an English poet, was born at Aldborough in Suffolk in 1754. He was brought up to the medical profession, but from his strong propensity to verse-making he abandoned it, and in 1780 began to try his fortune as litterateur in London. He obtained the friendship and assistance of Burke, published one of his poems, and soon after entered the church. He was for several years chaplain to the duke of Rutland, had the curacy of Stratford and other livings, and in 1813, that of Trowbridge, where he spent the rest of his life. His principal poems are "The Library," "The Village," "The Parish Register," "The Borough," and "Tales of the Hall;" all characterized by homely truthfulness, simplicity, and pathos. His poems are like Dutch paintings in their minute and accurate delineation of persons and scenes of the homeliest, and even of a repulsive, sort. And, like Dutch paintings, they are likely to keep their power to

charm. Died, 1832. An elegant edition of his works, with a Life and Notes, by his son, was published in 1834.

CRAIG, JOHN, a Scotch mathematician of the 17th century; famous for a work entitled "Theologia Christiana Principia Mathematica." The object of this curious tract is to apply mathematical calculation to the credibility of the gospel history; upon which principle he maintains that the Christian religion must end, according to the doctrine of chances, in the year 3150, when our Saviour will make his second appearance!

CRAIG, SIR THOMAS, an eminent Scotch lawyer; author of a treatise on feudal law, which has often been reprinted. Died, 1608.

CRANKHORPE, RICHARD, a learned English divine, and the author of some able works in support of Protestantism. Died, 1624.

CRAMER, FRANCIS, an eminent musician, was born at Mannheim, 1772. Under the direction of his father, formerly leader of the opera band in London, he prosecuted the study of music, for which he had shown an early predilection. In 1799 he succeeded his father as leader of the Ancient Concerts; for many years he was alternate leader of the Philharmonic Concerts with Loder, T. Cooke, Weichsels, &c.; and for upwards of 40 years held the chief place at the great provincial festivals. Died, 1848.

CRAMER, GABRIEL, an eminent geometrician; editor of the works of Wolf and the Bernouillis, and author of several mathematical and algebraic works. Born, 1704; died, 1752.

CRAMER, JOHN ANTHONY, D.D., dean of Carlisle, a well-known writer on subjects of classical antiquity, was born in Switzerland, 1793. He received his education in England, and in 1811 was admitted a student of Christchurch, Oxford, where he greatly distinguished himself, and gradually rose through all the university honours, till, in 1831, he was appointed principal of New Hall Inn. During this period he was actively engaged in literary pursuits; and his descriptions of Ancient Italy, Asia Minor, and Ancient Greece are enduring monuments of his accuracy and research. In 1842 he succeeded Dr Arnold as regius professor of modern history; and in 1844 he was nominated to the deanery of Carlisle. Died, 1848.

CRANACH, LUCAS. [KRANACH.]

CRANMER, THOMAS, archbishop of Canterbury, memorable for the part he took in the Reformation, was born at Aslacton, Nottinghamshire, in 1489, and educated at Jesus College, Cambridge. The opinion which he gave on the question of Henry VIIIth's divorce from his first wife, Catharine of Arragon, recommended him to that monarch, who employed him to vindicate the measure, and sent him, in 1530, with other envoys, to maintain his view before the pope. He took with him the opinions which had been obtained from the foreign universities in favour of the same view. His mission was fruitless. On his way home Cranmer visited Germany, and at Nürnberg married a niece of Osiander. After his return he was raised by papal bull to the arch-

After his re-
ull to the arch-

bishopric of Canterbury, in which office he zealously promoted the cause of the Reformation. Through his means the Bible was translated and read in churches; and he greatly aided in suppressing the monastic institutions. A few weeks after his appointment he pronounced, in a court held at Dunstable, the sentence of divorce of Catharine, and confirmed the king's marriage with Anne Boleyn. In 1538, when Anne Boleyn was destined to lose her reputation and her life, Cranmer meanly stooped to promote the sentence of divorce. This and other compliances with the monarch's will insured him the gratitude of Henry; who upheld him in all his contests with Bishop Gardiner and others who accused him of heresy and faction. By Henry's will he was appointed one of the council of regency to Edward VI.; and as the young king was brought up chiefly under the archbishop's care, it enabled him to further the objects of the Reformation in a regular and consistent manner, by framing the liturgy, the homilies, articles of religion, &c. When Edward was prevailed on to alter the succession in favour of Lady Jane Grey, the archbishop opposed it for a considerable time, but at length consented. On the accession of Mary he was tried on charges of blasphemy, perjury, incontinence, and heresy, and sentenced to be deprived of office. Tempted, however, by the promise of pardon, he signed a recantation of his principles. This was the great object of his enemies. But when Cranmer, who had been sent to Oxford, was brought into St Mary's church to read his recantation in public, he besought the forgiveness of God for his apostasy, and exhorted the people against the errors of the church of Rome, declaring that nothing could afford him consolation but the prospect of extenuating his guilt by encountering the fiery torments which awaited him. This greatly enraged his adversaries, who, after vilifying him as a hypocrite and heretic, dragged him to the stake opposite Balliol College, which he approached with a cheerful countenance, and met his death with the utmost fortitude, exclaiming, as he held out his right hand for the flames to consume it, "This unworthy hand! this unworthy hand!" Whatever may be said with regard to his submission to the will of a despotic sovereign, or his occasional unsteadiness of principles, it is certain that no man contributed so much as Cranmer to the establishment and independence of the English church. Died, March 21, 1556.

KRANZ, or KRANZ, DAVID, a Moravian preacher, born 1723, and resided several years as a missionary in Greenland, of which country he wrote a valuable history; also "A History of the Moravians." Died, 1777.

CRASHAW, RICHARD, poet, born in London, and educated at Cambridge. He was a friend of the poet Cowley; and having embraced the Roman Catholic faith, was appointed to a canonry at Loretto. His poems have considerable merit, and are supposed to have furnished hints afterwards turned to good account both by Milton and Pope. Died, 1650.

CRASSUS, MARCUS LICINIUS, the celebrated Roman consul and triumvir, enormously rich and passionately fond of money, took part with Sulla in the civil war. As prætor, in B. C. 71, he was sent against the insurgent gladiators under Spartacus, and totally defeated them near Rhegium. The next year he was consul with Pompey, and made an extraordinary display of his wealth and hospitality. Pompey and Crassus were, however, personal enemies, and it needed the powerful influence of Cæsar to effect a formal reconciliation between them, which took place in B. C. 60, the first triumvirate being then formed. Consul again five years later, Crassus had Syria for his province, and made war on the Parthians. He was defeated by them with immense slaughter, and was put to death, B. C. 53. It is said that Orodes, king of Parthia, had melted gold poured into the dead mouth, with the taunt "I have your fill now of what you loved best."

CRATINUS, an Athenian poet, to whom the invention of satirical comedy is attributed. His powers of sarcasm are said to have been unrivalled. He was a very intemperate man, and an exception to the rule that intemperance leads to an early grave, having attained the age of 97. Died, B. C. 422.

CRAYER, CASPAR DE, Dutch painter, was born at Antwerp about 1592. He was a pupil of Raphael Coxie, and soon obtained a great reputation. He painted a large number of altar-pieces for Ghent, Brussels, and other cities of the Netherlands, and received high encomiums from Rubens. He lived simply and temperately, preserved his health and faculty to a great age, and painted the "Martyrdom of St Blaise," when 86 years old. Died at Ghent, 1669.

CREBILLON, PROSPER JOLYOT DE, French dramatic poet, was born at Dijon, in 1674. He was intended for the legal profession, but devoted himself to the tragic muse, and produced "Idomeneus," which met with success. This was followed by "Atreus," "Electra," and "Rhadamistus," which were still more successful. He then led a secluded life for many years, but again resumed his dramatic labours, and produced the tragedies of "Catinine" and "The Triumvirate." Died, 1762.

CREBILLON, CLAUDE PROSPER JOLYOT DE, son of the preceding, was born at Paris, in 1707. He was for a time in high repute for his wit and gaiety, which made him a pleasant companion, and for his clever but licentious novels, which are best forgotten. Died, 1777.

CREDI, LORENZO DI, Italian painter, was born at Florence about 1453. He learnt the art of the goldsmith and then studied painting under Verrocchio, and had Leonardo da Vinci for his fellow-pupil and friend. His works resemble in style those of Leonardo. Holy Families, Madonnas, and similar sacred subjects chiefly engaged his pencil. He was living in 1536.

CREECH, THOMAS, an English poet, was born at Blandford, Dorsetshire, in 1659; and after receiving the rudiments of a classical education at Sherborne free-school, finished

his studies at Wadham College, Oxford. He translated into English verse Lucretius, Horace, Theocritus, &c. Died by his own hand, 1700.

CRELLIUS, JOHANN, a German Unitarian divine, was born in 1590, and was one of the ablest advocates of that sect, which he defended against Grotius. Died, 1633.

CREMONESE, IL. [CALETTI, GIUSEPPE.]

CRESCENTIUS, patrician of Rome, who in the year 987 placed himself at the head of the citizens and attempted to shake off the yoke of the emperor and establish a republic. He expelled the pope John XVI. and assumed the government of Rome. Anticipating the intervention of Otho III., he recalled the pope the same year. He renewed his attempt in 997, expelling Pope Gregory V., and setting up a rival, John XVII., who was soon after arrested, imprisoned, and disgracefully treated. Crescentius was besieged in the castle of St Angelo by the emperor, induced to capitulate by a promise of safety, and then hung and beheaded. It is said that his widow, Stephanla, avenged this treachery by first accepting Otho as her lover and then administering poison to him.

CRESCENZI, PIETRO, the restorer of the scientific study of agriculture in Europe, was born at Bologna in 1230. He spent a long life in acquiring and disseminating agricultural knowledge; and his "Opus Ruralium Commodorum" is a masterly production, founded on simple principles, and free from many errors that continued to prevail even for centuries after. The earliest printed edition is of 1471. The work was at once translated into Italian, and in 1486 into French. It has been often republished.

CRESCIMBENI, GIOVANNI MARIA, Italian poet and miscellaneous writer, was born in 1663. He was educated by the Jesuits, and settled at Rome, where he took part in founding the Arcadian Academy, of which he held the office of Custos for nearly 40 years. He was patronized by Popes Clement XI. and Benedict XIII. His "Rime" appeared in 1695. His other works are "Istoria della volgar Poesia," "le Vite degli Arcadi Illustri," &c. Died, 1728.

CRESPI, GIUSEPPE MARIA (LO SPAGNUOLO), Italian painter, was born at Bologna in 1665. He was a pupil of Canuti and Carlo Cignani, and afterwards studied and copied the works of Correggio, the Caracci, and other masters. He painted rapidly, with much caprice and carelessness. Among his works are the "Seven Sacraments," an "Ecce Homo," a "Supper," &c. Crespi was also an engraver. Died, 1747.

CRESWELL, Sir CRESWELL, first judge of the Divorce Court, was born in 1791. After studying at the Charter-house and at Cambridge, he was called to the bar in 1819. He entered parliament as member for Liverpool in 1837. Five years later he was appointed a justice of the Common Pleas, and filled that office sixteen years, distinguishing himself by his acuteness, and the ease with which he unravelled difficult and complicated cases. On the establishment of the Divorce Court in 1858, he was named first

judge. The practice was new, the cases very numerous, and the labour immense; but Sir Creswell achieved a great success. He adjudicated upon more than a thousand cases, and only in one instance was any decision of his reversed. In private as in public life he was very highly esteemed. Died suddenly in July, 1863.

CREWE, NATHANIEL, bishop of Durham. He arrived at his episcopal dignity partly through the influence of James II., then duke of York, and partly through his consenting to be guilty of simony, paying a large sum to one of the king's mistresses. During the reign of James this prelate aided and counselled him in all his most obnoxious measures, and was among the earliest of those who abandoned him, and voted that the throne was abdicated. But his base and time-serving conduct would not have prevented him from losing his bishopric, on the accession of King William and Queen Mary, but that he was spared from degradation at the intercession of Tillotson. Died, 1721.

CRICHTON, JAMES, named **THE ADMIRABLE**, was born in Scotland in 1560. His father was a lord of session, and through his mother he was of royal descent. He was educated at the university of St Andrews, and graduated M.A. in 1575. He was one of the young men selected to be fellow-students of the young King James VI. under the direction of George Buchanan. He then went to France, where he continued his studies, and also, as he held fast to the Romish church, took part in the war carried on by Henry III. against the Huguenots. The beauty of his person, the strength and agility he displayed, joined to his multifarious accomplishments and surprising capacity of eloquent talk, made him the admiration of all. About 1580 he went to Italy, visiting probably Genoa and Rome, and then Venice, where he was warmly received by the great printer Aldus. He was introduced to the Doge and Senate, created astonishment at Venice and Padua, by his brilliant off-hand discourses on philosophy, theology, and other high themes, and his challenge to disputation in any of several languages, and on either side of any controversy. He next went to Mantua, and was appointed tutor to the son of the duke. He was attacked in the streets one night by a party of men armed and masked; overcame them by superior skill, and recognized his pupil, to whom he at once presented his sword. The young prince immediately ran him through with it, 3rd July, 1582. He has left no literary remains of importance.

CRILLON, LOUIS DE BALBE DE BERTON DE, a distinguished French general, was born in Provence in 1541. He distinguished himself during five reigns, Henry II., Francis II., Charles IX., Henry III., and Henry IV., and received from Henry IV. the title of "le brave des braves." In 1557 he became aide-de-camp to the duke of Guise, and distinguished himself greatly at the siege of Calais, where he was the first to mount the breach, as he was at many subsequent sieges. He was wounded at the battles of St Denis and Jarnac, at the siege

BE DE BERTON h general, was He distinguish- gns, Henry II., enry III., and a Henry IV. the es." In 1537 he duke of Guise, greatly at the as the first to s at many sub- ounded at the ac, at the siege

of Poitiers, at Moncontour, and at St Jean d'Angely. Throughout the civil war he was faithful to the monarchy; but was not made privy to the massacre of St Bartholomew. He took a prominent part at the siege of Rochelle in 1573, and accompanied the duke of Anjou to Poland, on his election to the throne. He distinguished himself in the war of the League, and in 1586 commanded under Epemon in Provence. When solicited by Henry III. to assassinate the duke of Guise he firmly refused to stain his name by such an act of infamy. He was at the battle of Ivry and the siege of Paris; followed Henry IV. to Rouen; in 1600 commanded in Savoy; and soon after retired to his estates. The assassination of his beloved master threw him into a melancholy, from which he did not recover. Died, 1615.

CRILLON-MAHON, LOUIS DE BERTON DES BALBES DE QUIERS, Duke de, French general, was born in 1718. He served in the Italian campaign of 1733, in the German campaign of 1742, in which he was taken prisoner, and at the battle of Fontenoy. He was at the taking of Namur, at the battles of Rocoux, Rosbach, and Lützelburg, soon after which he entered the service of Spain. In 1782 he took Minorca, and received the title of duke of Mahon. Died at Madrid, 1796.

CRITIAS, one of the Thirty Tyrants of Athens. He was a pupil of Socrates, but his political conduct was such as to render him by no means a credit to his great master. He is said to have distinguished himself even among the Thirty for cruelty and avarice. When Thrasybulus and his patriotic friends took arms against the Thirty, Critias was slain in an attack made on the Piræus, in the year 404 B. C.

CRÆSUS, the fifth and last king of Lydia. He succeeded his father Alyattes in the year 557 B. C., and was so successful in all his enterprises, that he soon became one of the richest monarchs of that time. The common story respecting him, which is for the most part merely legendary, is as follows. Vain of his wealth, he asked the philosopher Solon what he thought of his good fortune: "I pronounce no man fortunate until his death," was the sage's reply. Subsequently the wealthy and powerful monarch was made prisoner by Cyrus, king of Persia. When bound to the stake and about to be burnt to death, he recalled the words of Solon, and thrice repeated his name. Cyrus demanded an explanation. Cræsus gave it; and Cyrus not only spared his life, but also took him into his favour and protection. At the death of Cyrus he recommended Cræsus to the favour of Cambyses, who treated him with great cruelty, and ordered him to be put to death; but of the time and place of the death of Cræsus nothing is known.

CROFT, WILLIAM, Mus. D., an excellent English musician and composer. He was a native of Warwickshire, and was made organist of the Chapel Royal in 1707, and in the following year organist of Westminster Abbey. His best anthems, and a sublime burial service, were published in 1720 in two

folio volumes, under the title of "Musica Sacra." Born, 1677; died, 1727. He was buried in Westminster Abbey.

CROKER, JOHN WILSON, the Right Hon., who earned great distinction in the fields of literature and party politics, was born in Galway in 1780. He was educated at Trinity College, Dublin, called to the bar in 1807, and sat in the House of Commons from 1808 to 1832, having during that period represented in succession Downpatrick, Athlone, Yarmouth, Bodmin, and the University of Dublin, and gained the reputation of being one of the most eloquent and accomplished debaters in the House. During all this period he held the office of secretary to the Admiralty. But it was more as a political writer than a debater that Mr Croker owed his wide-spread fame. He was one of the founders of, and most frequent contributors to, the Quarterly Review; and the powers of sarcasm which he wielded at a time when party feeling ran high, coupled with the high position which he held among the chiefs of the Tory party, procured for his writings a degree of interest out of all proportion to their intrinsic merits. It would far exceed our limits to mention the various papers and pamphlets that emanated from his fertile brain. The works which are most likely to perpetuate his name are his editions of "Boswell's Life of Johnson," and Lord Hervey's "Memoirs of the Reign of George II., and his "Stories from the History of England," which Sir Walter Scott took as his model for his "Tales of a Grandfather." At the time of his death he was engaged in preparing an edition of the works of Alexander Pope. Mr Croker's long and faithful services to his party were rewarded by his being made a privy-councillor in 1828, and by a pension of £1500 a year, and apartments in Kensington Palace. Died, 1857.

CROKER, THOMAS CROFTON, F.S.A., a distinguished writer and antiquary, was born at Cork, in 1798. When fifteen years of age, he was apprenticed to a mercantile firm; and during his leisure hours he devoted himself to making sketches in pen and ink, in which he afterwards excelled, and in cultivating that taste for antiquities which never left him while he lived. In 1819, through the influence of his namesake, Mr Wilson Croker, the secretary of the Admiralty, he obtained a clerkship in that department; and soon rose to the most confidential employments in the office to which he was attached. But his official duties in no way damped his literary aspirations. Shortly after settling in London he contributed several papers to the "Talisman" on the local antiquities of Ireland. In 1824 he published his "Researches in the South of Ireland," with magnificent illustrations. This was followed next year by "The Fairy Legends and Traditions of the South of Ireland," a work which has frequently been reprinted and translated, and which, among other marks of favour, brought him the personal acquaintance of Sir W. Scott, who was delighted with its style and spirit. Besides contributing largely to the "Annuals," once so fashionable, in 1827 he became the editor of the "Christmas Box," which, however, only

lived two years; and in 1829 he published the "Legends of the Lakes," with illustrations by MacIise, which afterwards appeared under the title of a "Guide to the Lakes." It would occupy more space than we can spare to enumerate the various other works, and papers in journals, literary and antiquarian, which Mr Croker contributed. The reader who is interested in the matter may refer to the "Gentleman's Magazine" for October 1854. Suffice it here to say that they were very voluminous; and that, as a collector of antiquarian and literary curiosities, particularly with reference to Ireland, his reputation is not likely soon to be surpassed. Died, 1834.

CROLY, GEORGE, L.L.D., was born in Dublin, August, 1780, and was educated at Trinity College. He was ordained to an Irish curacy, but, not obtaining any higher preferment, he turned his mind wholly to literature, and contributed very largely to the periodical press, especially "Blackwood's Magazine," and the "Literary Gazette," the "Standard," and the "Universal Review." He was presented, in 1835, to the rectory of St Stephen's, Walbrook, where he discharged the duties of his office with zeal, and attained high reputation as a preacher, while with unabated diligence he continued his literary labours. Among his many works may be mentioned "The Three Cycles of Revelation," "Life of George IV.," "Life of Burke," essays on "The Character of William Pitt and Napoleon I.," the "Angel of the World," and other poems, "Salathiel," "Tales of St Bernard," &c. He died, November 24, 1860, aged 80. "Recollections of Dr Croly," by Richard Herring, have since appeared.

CROMWELL, THOMAS, Earl of Essex, chief minister to Henry VIII., was born near London, about 1490. He was the son of a blacksmith, had but a middling education, and got a clerkship in an English factory at Antwerp, whence he was sent to Italy. He appears to have served in the wars there for a time, and on his return to England entered the service of Cardinal Wolsey, won his esteem, and was faithful to him in his disgrace. He then entered the king's service, and obtained, with his favour, many of the highest offices of state. He was privy-councillor, principal secretary of state, and, about 1536, vicar-general, and vicergerent, in all matters of religion. Cromwell was the friend of Cranmer, and contributed by various measures to the establishment of the reformed doctrines and worship. In 1539 he was created earl of Essex, but he soon lost the favour of the king, and then all was lost. For his elevation, honours, and administration had made him a host of enemies. In 1540 he was imprisoned, attainted on charges of treason, heresy, and extortion, was not allowed to make any defence, and was executed on Tower Hill, July 28, 1540. He did not fall like a brave man, but made the most abject entreaties to the king for his mercy. His character and measures are painted in most unlike colours by writers of different parties.

CROMWELL, OLIVER, Lord Protector of the Commonwealth of England, and one of the

most extraordinary characters in history, was the grandson of Sir Henry Cromwell, and the son of Robert Cromwell, a man of good property, and a brewer at Huntingdon, where Oliver was born, April 25, 1599. Having been educated at the free school of that city, and at Sidney Sussex College, Cambridge, he became a law student at Lincoln's Inn. Here, however, he did not remain long; as in his 21st year he married Elizabeth, the daughter of Sir James Bourchier, and settled at Huntingdon. In his youth he was, by royalist writers, to have indulged in profligate habits, which he soon however laid aside; and that his character and manner of life was such as to obtain the esteem and confidence of his neighbours, is evident from the fact that he was elected member of parliament for Huntingdon in 1628. His first appearance in parliament was in February, 1629. In 1640 he represented Cambridge. In his parliamentary career he was remarkable rather for his business-like habits and energy of character, than for elegance of language or gracefulness of delivery. His appearance and dress, too, were plain and unprepossessing. He notwithstanding acquired considerable influence even in parliament; and in 1642, when it was resolved to levy forces to oppose the king, Cromwell received a commission from the earl of Essex, and raised a troop of horse at Cambridge, of which he, of course, had the command. He soon distinguished himself by his courage and military skill, especially at the battle of Marston Moor, in 1644; he was exempted from the self-denying ordinance, and soon after won the decisive victory of Naseby. In 1648 he defeated the Scots at Preston, and soon after invaded Scotland and took Berwick. He was a member of the High Court of Justice for the trial of Charles I., and signed the warrant for his execution. In August, 1649, he was named lord-lieutenant and commander-in-chief in Ireland, stormed Drogheda, and put to death the whole garrison; and soon after Wexford. Other great towns submitted without resistance, and Ireland was subdued. In consequence of the expected return of Prince Charles to Scotland, Cromwell was recalled, leaving Ireton as deputy. He was appointed lord-general, and set out for Scotland. On the 3rd September, 1650, the great battle of Dunbar was fought, and the Scots were totally defeated. Edinburgh surrendered, and Perth was taken some months later. Charles having marched into England, Cromwell followed him, and on the 3rd September, 1651, won the decisive battle of Worcester. Cromwell took up his residence at Hampton Court in the following month. In 1653, while the Dutch war was going on, he dissolved the Long Parliament, formed a council of state, and had a new parliament called, which soon resigned its power to Cromwell, and by the "Instrument of Government" he was created "Lord Protector." He showed himself equal to the hard task he had undertaken, by sharp decisive means keeping down plotting royalists, jealous presbyterians, and intractable levellers; and by a magnanimous foreign policy making England greater and mor

characters in history, Henry Cromwell, Cromwell, a man of war at Huntingdon, April 25, 1599. honoured than ever. He interfered for the protection of the Vaudois Protestants, cruelly persecuted by the duke of Savoy, and had a large sum raised for their relief. He did not succeed with his parliaments, and had to rule mostly without them. At last care, anxiety, and growing perplexities, wore him out; he became gloomy and suspicious; was overwhelmed by sorrow at the death of his favourite daughter, Elizabeth, Lady Chynpole; fell sick, and died about a month after her, September 3, 1658, anniversary of his two victories of Dunbar and Worcester. He was interred in the chapel of Henry VII. at Westminster; but the body was torn from its resting-place at the restoration, exposed at Tyburn, with those of Bradshaw and Ireton, the head cut off, and the remains buried under the gallows. Cromwell had appointed his eldest son, Richard, to succeed him; but the reins of government were not to be held by one so virtuous and incompetent; and having been compelled by the officers to dissolve the parliament, he abdicated, April 25, 1659, and ended his days in tranquil seclusion at Cheshunt, in Hertfordshire, in 1712. His brother Henry, whose upright administration, as viceroy of Ireland, had gained him many friends, also retired to private life, and died in 1674. The most important contribution to the history of this great man yet made is the "Letters and Speeches of Oliver Cromwell," by Thomas Carlyle: a work which has brought about a revolution in the general way of thinking about its hero. It appeared in 1845, and has passed through several editions. Other valuable works are Guizot's Lives of Oliver and Richard Cromwell, and the Life of Oliver, by John Forster. There are portraits of Cromwell by Walker, Samuel Cooper, and Bernard Lens. Walker's is in the British Museum, and duplicates in some private collections; Cooper's is in the possession of the duke of Devonshire; and Lens' in the collection of the duke of Portland. The National Portrait Gallery possesses a terra-cotta bust, modelled from life by Mierce.

CROMWELL, OLIVER, great grandson of Henry, second son of the Protector. He was for several years a solicitor in London, and held the appointment of clerk to St Thomas's Hospital. He is noticed here chiefly on account of his valuable publication, entitled "Memoirs of the Protector Cromwell, and his sons Richard and Henry; illustrated by Original Letters and other Family Papers." He succeeded to the family estate of Theobalds, which descended to him through the children of Richard Cromwell, above named, and died at Cheshunt Park, Herts, in 1821, aged 79.

CROTCH, WILLIAM, musical composer and writer on music, was born at Norwich in 1775. His musical genius appeared at a very early age, and he became doctor and professor of music at Oxford, in 1797. His compositions, both vocal and instrumental, are numerous, and he was author of "Elements of Musical Composition and Thorough-Bass," and "Specimens of Music of all Ages." He became head of the Royal Academy of Music, and died at Taunton in 1847.

CROWNE, JOHN, a poet and dramatist of the 17th century, and the contemporary of Dryden. He was a native of Nova Scotia, but passed the greater part of his life in England. At the command of Charles II he wrote the "Masque of Calisto;" and subsequently he ridiculed the Whig party, in his comedy of "The City Politicks." He lived in comparative retirement for some time; but having written his comedy, "Sir Courtly Nee," the king had promised to give him a place; but his Majesty died on the very day on which the piece had its final rehearsal. Died, about 1704.

CROZE, MATHURIN VEYSSIERE DE LA, French oriental scholar; born at Nantes, 1681. Author of "Histoire du Christianisme des Indes," "Lexicon Egyptiacum latinum," and other works. He was for some time an ecclesiastic of the Benedictine congregation of St Maur; but in 1696 he quitted the cloister and embraced Protestantism at Basel. He went afterwards to Berlin, and became royal librarian and professor of philosophy at the French College. Died, 1739.

CRUDDEN, ALEXANDER, known during his life by his assumed title of "Alexander the Corrector," was a native of Aberdeen, born in 1701, and educated with a view to becoming a minister of the kirk of Scotland. But he exhibited such an unsteadiness of intellect, that he was not considered fit for the ministry; and, proceeding to London, he for some time maintained himself by giving private lessons in the classics; but in 1732 he commenced business as a bookseller. While thus employed, he devoted his leisure to compiling his useful "Concordance of the Old and New Testaments," which he dedicated to Queen Caroline. Soon afterwards he became lunatic, and was placed in a mad-house. He contrived to make his escape, and brought an action for false imprisonment, but was nonsuited. He subsequently resumed his old employment of correcting the press, but again exhibited marks of a deranged intellect. As a literary man, however, he was extremely industrious; and his "Concordance" holds a high place in the estimation of biblical students. Died, 1770, aged 69.

CRUIKSHANK, WILLIAM, an eminent English surgeon, anatomist, and medical writer; author of "The Anatomy of the Absorbent Vessels of the Human Body," "Experiments on the Insensible Perspiration of the Human Body," &c. Died, 1800.

CSOMA DE KOKOS, ALEXANDER, a Transylvanian traveller and philologist, born about 1790. He was in early life seized by the desire to investigate the origin of the Magyar race, and after a course of study at Göttingen, he went, in 1820, to the East. He visited Egypt and Persia, and spent several years in a Buddhist monastery in Tibet, diligently studying the Tibetan language and literature; imagining he recognized resemblances between the Tibetan and Magyar. He next lived some years at Calcutta, where he compiled his "Dictionary of Tibetan and English," and a grammar of Tibetan; catalogued the Tibetan works in the library of the Asiatic Society; and

enjoyed the friendship of the English orient-
alists, Prinsep and Wilson. Died at Dar-
jeeling, as he was setting out on another
journey into Tibet, 1842.

CTESIUS, a Greek physician and histo-
rian, was a native of Cnidus in Caria. He
was present with Artaxerxes Mnemon at
the battle of Cunaxa, in which Cyrus the
younger was defeated and slain, B. C. 401,
and afterwards lived at the court of Persia.
Ctesias was author of several works, the
most valuable of which was probably his
History of Persia. We possess only frag-
ments of it.

CUDWORTH, RALPH, philosopher and
theologian, one of the most eminent of the
Lattitudinarian divines, was born in Somers-
setshire, in 1617. He was educated at Cam-
bridge, became fellow of Emmanuel College,
and Regius professor of Hebrew. In 1654
he was appointed master of Christ's College,
and in 1678 prebendary of Gloucester. He
was a man of great learning, and in philoso-
phy a Platonist. His principal work is the
"True Intellectual System of the Universe,"
a defence, substantially, of revealed religion
against materialists and atheists. It was
translated into Latin by Mosheim, and has
been several times republished. Cudworth
was also author of a "Treatise on Eternal
and Immutability of Morality," a continuation
of the "Intellectual System;" and several
theological works. Died, 1658. Lady Ma-
sham, the friend of Locke, was the only
daughter of Cudworth. A new edition of
Cudworth's great work was published in
1830, with a Life by Birch.

CUJAS, JACQUES, or in Latin, **CUJACIUS**,
a very celebrated French jurist, was born at
Toulouse in 1520. He was the son of a tan-
ner, but successfully pursued knowledge
under difficulties, and made himself a great
name. He began lecturing on the Roman
Law in 1547, was chosen professor at Cahors
in 1551, and in the following year removed
to Bourges, where with occasional intervals
he taught for the rest of his life. He was
much persecuted by rival professors, and in
the last years of his life suffered greatly from
the distracted condition of his country. He
enjoyed the patronage of Margaret of Valois,
and his fame drew pupils from all parts of
Europe; among them were the critic Joseph
Scaliger and the historian Thuanus. His
works fill 10 vols. folio, and consist of editions
of the original works on the Roman law,
with commentaries and expositions, &c.

CULLEN, WILLIAM, a celebrated phys-
ician and medical writer, was a native of
Scotland, being born at Lanark, in 1712.
After serving his apprenticeship to a surgeon
and apothecary at Glasgow, he went some
voyages as a surgeon. He subsequently
settled at Glasgow, and was appointed lec-
turer on chemistry in the university of that
city; in which capacity he obtained so high
a reputation, that he at length became med-
ical professor in the university of Edin-
burgh. As an author he made himself
known by his "Lectures on the Materia Med-
ica," "Synopsis Nosologicæ Practicæ," and
his "First Lines on Medical Practice." Died,
1790.

CULPEPPER, NICHOLAS, an English

herbalist of the 17th century. He was edu-
cated at Cambridge, and, after serving his
apprenticeship to an apothecary, settled at
Spitalfields, in London. He wrote a "Her-
bal," and translated the Dispensary of the
College of Physicians; but the science and
industry which he indisputably possessed
were in a great degree marred by his absurd
pretensions as astrologer. Died, 1654.

CUMBERLAND, RICHARD, bishop of
Peterborough. He was born at London in
1632, educated at Cambridge, and made bi-
shop of Peterborough about 1689. He was
author of a treatise "De Legibus Naturæ,"
written in opposition to the philosophy of
Hobbes, and translated into French by
Barbeyrac; a translation of Sanchuniathon's
Phœnician History, with critical notes and
disquisitions; an "Essay on the Jewish
Weights and Measures," "Origines Gentium
Antiquissimæ," &c. He was an extremely
learned man, but not more remarkable for
learning than for modest and unassuming
virtues. Died, 1718.

CUMBERLAND, RICHARD, dramatic and
miscellaneous writer, was great-grandson of
the preceding, and born in 1732. From
Westminster School he went to Trinity
College, Cambridge; and was introduced to
public life as the secretary of Lord Halifax,
when viceroy of Ireland. His first literary
efforts obtained for him but little fame; but
on the appearance of his comedy of "The
West Indian," in 1771, his reputation as a
dramatist was at once established. From
this period till the time of his decease he
continued to be one of the most prolific
writers for the stage, though none of his
subsequent pieces were so successful as the
comedy before mentioned. In 1780 he was
employed by the government to conduct a
secret negotiation with the courts of Madrid
and Lisbon, which involved him in great
distress, as the ministry refused to reimburse
his expenses, amounting to £5000, which
compelled him to part with his hereditary
property. To add to his distress, the Board
of Trade was broken up, and he retired, with
a trifling pension, to Tunbridge Wells, where
he devoted himself to literary pursuits. Be-
sides his numerous plays, he published a
collection of essays, under the title of "The
Observer;" also several novels and various
other works, the last of which was his own
"Memoirs." The comic drama was certainly
his forte; but throughout the whole of his
writings there is much merit, and some of
them possess the elements of a lasting vital-
ity. Died, 1811. His portrait, painted by
Romney, is in the National Portrait Gallery.

CUMBERLAND, WILLIAM AUGUSTUS,
Duke of, second son of George II., was born
in 1721, and at an early age entered on the
duties of a military life. At the battle of
Dettingen, in 1743, he was wounded, while
fighting by the side of his father; and in
1745 he signalized himself, when command-
er-in-chief of the British army in Flanders,
at the battle of Fontenoy, where, however,
he was obliged to yield the palm of victory
to Marshal Saxe. On his return to England
he took the field against the Scottish rebel
troops, whom he defeated at the battle of
Culloden; but he stained his laurels by un-

ary. He was educated after serving his theocracy, settled at He wrote a "Her-Dispensary of the t the science and utably possessed rred by his absurd Died, 1654.

AM AUGUSTUS, ge II., was born entered on the at the battle of wounded, while e father; and in when command-ry in Flanders, here, however, palm of victory urn to England e Scottish rebel at the battle of laurels by un-

necessary cruelty. He afterwards served again on the continent, but only to be defeated. His service ended with the capitulation of Closter-Seven, which was disavowed by the government. Died, 1765.

CUNNINGHAM, ALEXANDER, a Scotch historical writer of the 18th century; author of a "History of Great Britain, from the Revolution to the Accession of George I." This was elegantly written in Latin, but a translation of it was published by Dr Thompson in 1787. Cunningham also held some government employments, among which was that of resident at Venice. Died, 1737.

CUNNINGHAM, ALLAN, an eminent poet, novelist, and miscellaneous writer, was born at Blackwood, in Dumfriesshire, in 1765. His parents were in very humble circumstances, and he was taken from school when only 11 years of age, and apprenticed to a stone-mason. These disadvantageous circumstances did not prevent him from acquiring, by great though desultory reading, much information; and in 1810 he went to London, where he at first earned a maintenance by contributing to periodicals, and reporting for the press. At a later period he obtained employment in the studio of the sculptor Chantrey, as principal assistant, which enabled him to prosecute his literary tastes without hazard; and he so well improved his advantages, that he not merely distinguished himself as a critic and historian, poet and novelist, but also as a man of business, and made a fortune. Among his numerous works are "Sir Marmaduke Maxwell," a drama; "Paul Jones," and "Sir Michael Scott," novels; the Lives of Burns and Sir David Wilkie, besides many poems, ballads, and lyrics; but his most important work, and that by which he is best known south of the Tweed, is "The Lives of British Painters, Sculptors, and Architects." Died, 1842.

CURETON, WILLIAM, an eminent orientalist, was born at Westbury in Shropshire in 1808. He studied at Oxford and entered the church. Having applied himself specially to the study of Arabic and other Oriental languages, he was appointed sub-librarian of the Bodleian in 1834, and three years later assistant-keeper of the manuscripts in the British Museum, a post which he held till 1850. He prepared a classed catalogue of the Arabic manuscripts, and in 1841 applied himself to the study and collation of the important collection of Syriac manuscripts, discovered in a monastery in the desert of Nitria, among which were the Epistles of Ignatius, the publication of which in 1845 gave rise to a warm controversy, in which English and German scholars took part. In 1847 Dr Cureton was appointed chaplain to the queen, and two years later canon of Westminster. He edited many other learned works, and in 1858 published, from a manuscript of the 6th century, the remains of an ancient recension of the Syriac Gospels. He was a corresponding member, and afterwards a foreign associate of the Institute of France, a fellow of the Royal Society, and crown trustee of the British Museum. Died in June, 1864, from the effects of a railway accident in the preceding year.

CULL, EDMUND, a bookseller, whose name is handed down, like many others, by the satirical wit of Pope, kept a shop in the purlieu of Covent Garden, and had his ears cut off in the pillory as a just reward for publishing obscene books. Died, 1748.

CURRAN, JOHN PHILPOT, a celebrated Irish barrister, of humble origin, was born near Cork in 1750; received his education at Trinity College, Dublin; and, coming to London, studied the law in the Temple. In course of time he was called to the bar; and though at first he had to struggle with great difficulties, his brilliant talents, exerted in defence of various persons charged with political offences, overcame all obstacles, and he quickly rose to forensic eminence. He became a member of the Irish House of Commons in 1784, and was a powerful member of the opposition until the Whigs came into office, in 1806, when he was made master of the rolls in Ireland. This office he held till 1814, and received a pension of £3000 on retiring, after which period he generally resided in London. His oratorical powers were of the most splendid kind, his wit, pathos, and withering sarcasm being aliko irresistible; and though mean in personal appearance, and not always using his intellectual weapons with good taste, they enabled him to support the character of a popular advocate and an effective debater. Died, 1817.

CURRIE, JAMES, physician and Littérateur, born, 1756. He was a native of Scotland, but settled as a medical man at Liverpool, where he enjoyed an extensive practice. This did not, however, prevent him from devoting considerable time to literature; and he is favourably known as a professional writer by a paper "On Tetanus and Convulsive Disorders," and "Medical Reports," &c. But his literary celebrity rests less upon his professional treatises than upon his excellent edition of the works of Robert Burns, published in 1800, to which he prefixed a short biography, and which obtained him great and well-merited applause. Dr Currie was a fellow of the Royal Society. Died, 1805.

CURTIS, WILLIAM, an eminent English botanist. He was a native of Alton, in Hampshire, and was apprenticed to an apothecary in that place. But his love of botanical pursuits induced him to relinquish his profession to establish a botanical garden, and exhibit as a botanical lecturer. Besides his lectures, which were published with expensive and handsome illustrative plates, he wrote "Practical Observations on the British Grasses," "Flora Londinensis," an accurate and beautiful work; a Botanical Magazine, &c. Died, 1799.

CURTIUS RUFUS, QUINTUS, a Roman historian, who wrote the History of Alexander the Great in ten books, the first two of which are lost. The exact period in which he flourished is not known; for though his style would indicate that he lived in one of the best periods of the Latin language, no writer of any earlier date than the 12th century has made any mention of his work.

CUSA, NICOLAS DE, an eminent cardinal, who took his name from the village of Cusa,

in the diocese of Treves, where he was born. After some minor preferments in the church, he was sent by Pope Eugenius IV. as legato to Constantinople, to endeavour to bring about a union between the Greek and Latin churches. He was made a cardinal by Pope Nicholas V., who also gave him the see of Brixen, in the Tyrol. Besides metaphysical, theological, mathematical, and other treatises, which form three volumes folio, he wrote a very learned and powerful refutation of the Koran. Died, 1464.

CUSNAY, M., the governor of Angers at the time Charles IX. ordered the massacre of St Bartholomew in 1572. He deserves a niche in every biographical work, for having refused to obey the king's inhuman orders, in these memorable words:—"I will not stain 50 years of a spotless life by the most cowardly of assassinations."

CUSTINE, ADAM PHILIPPE, Count de, was born at Metz, in 1740; and having entered the army early in life, attracted the notice of Frederic of Prussia, under whom he served in the Seven Years' War. He afterwards accepted a commission in one of the French regiments serving in the American war against the English; and on returning to France was made governor of Toulon. In 1792 he had the command of the army of the Rhine; but being suddenly summoned to Paris, the tyrants of the hour sent him to the guillotine, August, 1793, there to expiate the crime of non-success.

CUTHBERT, ST, bishop of Lindisfarne, was born in Scotland. After becoming a monk and spending many years in a solitary island, he was appointed bishop of Lindisfarne in the year 685. But he very soon retired, and died in his island on the coast of Northumbria, 687. His remains lie in Durham cathedral, where he is commemorated by a sculptured figure of himself, holding the head of St Oswald in his right hand. Miracles were ascribed to him, and it was long customary to fight under his banner.

CUVIER, GEORGE LÉOPOLD CHRÉTIEN FRÉDÉRIC DAGOBERT, Baron, the great zoologist and comparative anatomist, was born at Montbelliard in 1769. He was carefully educated by his mother; studied a short time at Tübingen and then at the Military School of Stuttgart; diligently pursued meanwhile his favourite study of natural history; and, in 1795, settled at Paris, where he enjoyed the friendship of Geoffroy St Hilaire, and was named professor at the central schools. His lectures, by their novelty of ideas and their brilliancy of expression, excited great interest and enthusiasm. He became assistant director of the Jardin des Plantes, and there began his lectures on comparative anatomy. In 1800 he succeeded Daubenton in the chair of natural history at the college of France: was afterwards made perpetual secretary to the Academy of Sciences, and one of the inspectors-general of public schools. Napoleon charged him with the new organization of the universities in Italy, and made him councillor of state. Cuvier visited England in 1818 and 1830, and travelled also in Germany, Italy, and Holland. He was a member of the French Academy, and an officer of the Legion

of Honour. Louis Philippe made him a peer of France. The loss of his daughter, his only surviving child, on the eve of her marriage, in 1827, was a blow from which he did not wholly recover. He opened his last course of lectures on the 8th May, 1832; spoke in a singularly impressive manner to a very numerous audience; and in five days was dead. Among his principal works are: "Recherches sur les Ossements Fossiles des Quadrupèdes," the introduction to which was separately published as, "Discours sur les Révolutions de la Surface du Globe;" "Leçons d'Anatomie Comparée;" "Le Règne Animal;" "Histoire Naturelle des Poissons;" "Eloges historiques des Membres de l'Académie des Sciences," &c. He was a contributor to the "Biographie Universelle," "Dictionnaire des Sciences Naturelles," and various scientific journals.

CYPRIAN, ST, THASCIUS CÆCILIUS, bishop of Carthage and one of the fathers of the church. He was probably a native of Carthage, taught rhetoric there, and about 246, when nearly fifty years of age, was converted to the Christian faith. He was soon after chosen presbyter, adopted a rigidly ascetic manner of life, and was appointed bishop of Carthage in 248. When the persecution under Decius fell upon the churches, Cyprian ran away and concealed himself nearly two years. He was then received as bishop again, but during the next persecution, under Valerianus, he was arrested and banished. After a year he was recalled, but as he refused to make the required sacrifice to the gods, he was put to death, 258. Cyprian is distinguished for his exaggerated notion of the rights of bishops, and for his severe treatment of the "lapsed." His appointment was the occasion of a schism in the church of Carthage, in which his rival was Felicissimus, and which was terminated by the aid of Cornelius, bishop of Rome. Cyprian also opposed the extravagant honours paid to martyrs and confessors. His works, consisting of letters and sermons, are of great importance for the insight they give into the beliefs, modes of thought, and practices of the early churches. They are written in a rhetorical style, resembling that of Tertullian, whom Cyprian studied and revered, and was accustomed to speak of as "the master."

CYRIL, ST, Patriarch of Alexandria, succeeded Theophilus in 442. He was a man of boundless ambition, arrogant, and headstrong, and displayed these qualities in the persecution of the Novatians; in the expulsion of the Jews from Alexandria; in his quarrel with Orestes, governor of the city; his persecution of the accomplished Hypatia, head of the Platonist school of Alexandria, followed by her brutal seizure and murder; and in his long controversy with Nestorius. He got Nestorius condemned by Pope Celestine and at the Council of Ephesus, in 430, was himself condemned at the Council of Antioch, and with his rival was imprisoned by the emperor Theodosius. His writings, mostly controversial, occupy 7 vols. folio. Died, 444.

Slaves," was
rank at The-

salonica. His first name was Constantine, and he acquired the designation of the *Philosopher*. He was sent to preach to the Chuzavs, and converted the khan and the whole tribe. He afterwards preached to the Bulgarians, founded a school at Buda, and invented the Slavonic alphabet. Several works are attributed to him. Died at Rome, 882.

CYRUS, surnamed THE ELDER, founder of the Persian monarchy, was son of Cambyses, a Persian noble, and of Mandane, daughter of Astyages, king of Media. His story is more than half mythical, and it is impossible to separate fact from legend. The principal exploits attributed to him are the excitement of a revolt of the Persians and consequent defeat of Astyages and the Medes, when he became king, B. C. 559; the conquest of Lydia and capture of Croesus; the siege and capture of Babylon, in 538; and the invasion of Scythia, when he was defeated and slain by Tomyris, queen of the Masagetae, 529. He was interred at Pasargarde, and his tomb was visited by Alexander the Great. Xenophon's "Cyropaedia" is an ideal picture of a good and wise ruler, not an actual history of Cyrus.

CYRUS, surnamed THE YOUNGER, was son of Darius II., king of Persia, and Parysatis. In B. C. 407 he was made governor of the western provinces of Asia Minor. He was of amolitious temper, and was sentenced to death for plotting against his brother Artaxerxes on his accession to the throne, but was pardoned. Still determined to be king himself, he raised an army, including a large bod of Greek mercenaries, crossed the Taurus, marched down the Euphrates, and at Cunaxa encountered the army of his brother, when he was defeated and slain, B. C. 401. Xenophon, who had served as a volunteer among the Greeks, conducted their retreat, and wrote an account of the expedition.

CZACK, THADDEUS, Polish statesman and writr, was born in 1766. He became one of the ministers of King Stanislaus Augustus in 1788, and by his vast knowledge and practical sagacity rendered great and various services to his country. He took a prominent part in the Constitutional Diet, and on the partition of Poland his estates were confiscated. They were restored to him by the emperor Paul. In 1805 he became head of a new school at Krzemieniec, which rapidly grew in importance and popularity. His most important work is a treatise on the laws of Poland and Lithuania. Died, 183.

CZARTORYSKI, Prince ADAM, Polish

statesman and member of one of the most distinguished families of Poland, was born at Dantzic in 1734. He was cousin of Stanislaus Poniatowski, and contributed to his election to the throne. He took part in the Constitutional Diet, which met in 1788; was employed in several missions; suffered much from the insurrection of 1794; was twice visited by the emperor Alexander; and was marshal of the Diet convoked to establish the confederation of 1812. Died, 1823.

CZARTORYSKI, Prince ADAM, a very prominent actor in the Polish revolution of 1830, was born at Warsaw in 1770. He passed several of his early years in England, and studied at the university of Edinburgh. Returning to Poland, in 1793, he joined the forces of Kosciusko against the Russians, and after his failure was sent as a hostage into Russia. In 1805 he subscribed, in the name of Russia, the treaty with Great Britain, in his capacity of minister for foreign affairs. When the revolution of 1830 broke out, he devoted all his energies to the service of his country. As president of the provisional government, he summoned the Diet to meet in December, 1830, and in the following month was placed at the head of the national government. He resigned his post after the terrible days of August 15 and 16, and served as a common soldier during the last fruitless struggle. He was excluded from the amnesty of 1831, and his estates in Poland confiscated. His latter years were spent in Paris, where he died, July 15, 1861, aged 90.

CZERNI-GEORGE, whose real name was HENRI-GEORGE, was long supposed to be a native of Servia, but is now known to have been a Frenchman. He was born at Nancy, served in the army, passed over to the Austrian army during the revolutionary wars, then became a leader of banditti in Servia, and at last raised himself to the rank of hospodar by the force of his natural talents, and a courage rarely equalled. With an ardent desire to liberate Servia from the Turks, he first raised a small troop, was successful in various encounters, and in 1800 made himself master of Belgrade. A long and arduous struggle followed; and though for a time Czerni-George was the acknowledged prince of Servia, his despotism became intolerable, the nobles hated him as much as the Turks, and he was eventually compelled to retire to Russia, where he was received with distinction, and created a Russian prince. But he was still bent on repossessing Servia; and having entered that territory, in 1817, he was taken prisoner and beheaded.

D.

DACIER, ANDRÉ, a French critic and classical commentator of some eminence, born, in 1651, at Castres, in Upper Languedoc. He was made perpetual secretary of the French Academy, and had the care of the cabinet of the Louvre intrusted to him. He translated Horace, Plato, Plutarch, Epictetus, &c., into French. Died, 1722.

DACIER, ANNE LEFEVRE, wife of the preceding, was born, in 1651, at Saumur, at the university of which place Tannequi Lefevre, her father, was a professor. Her love of classical literature was displayed at an early age; and her proficiency was so great, that at the age of 22 she published an admirable edition of "Callimachus," which was followed by various other editions of the classics. She subsequently translated Homer, Anacreon, Sappho, Terence, with some of the plays of Aristophanes, Plautus, &c. In 1683 she married M. Ducier, and soon after they both renounced the Protestant religion. Though her life was spent in constant literary labour, she was far from being ostentatious of her eminent abilities. Died, 1720.

DAGUERRE, M., whose name is associated with one of the most refined applications of Science to the Arts, was born in 1790. From an early period he had been engaged in making chemical researches; but the Daguerrotype process, with which his name is identified, was first made known in the autumn of 1839. The whole of Europe was astonished at the beauty and novelty of the pictures produced by his process; and the French Government granted him a pension of 6000 francs for his discovery. Daguerre was celebrated as a dioramic painter, and by ingenious contrivances he had succeeded in producing many very extraordinary effects in his pictures. His system of opaque and transparent painting was published by the French Government along with the processes of the Daguerrotype. Died, 1852.

D'AGUESSEAU, HENRI FRANÇOIS, chancellor of France, illustrious for his talent, scholarship, and integrity, was born at Limoges in 1668. He was received advocate to the parliament of Paris, for six years; rendered great services to his country during the embarrassments caused by war and famine in 1709; risked disgrace with Louis XIV. by his steady opposition to the famous bull *Unigenitus*; and was named chancellor in 1717. He opposed the foolish schemes of Law, for which the regent deprived and exiled him; but he was reinstated in 1720. Through the influence of Cardinal Dubois he was again exiled, and though recalled after five years, the seals were not restored to him till 1737. At the age of 82 he retired from office with a pension of 100,000 francs. Died, 1751. His works, consisting of his speeches and pleadings, fill 13 vols. 4to.

DAILLE, JEAN, a distinguished French

Protestant divine, born in 1594. He was tutor to the sons of Duplessis-Mornay, and with them visited Italy, where he made the acquaintance of Paul Sarpi. After his return to France, he held the office of pastor of the church of Charenton above 40 years. He wrote several important works, among which are the "Traité de l'Emploi des SS. Pères," "Apologie des Eglises réformées," both which were translated into Latin and English; "La Foi fondée sur les Saintes Ecritures," &c. As a controversialist he was singularly impartial, and is esteemed even by Roman Catholics. Born, 1594; died, 1670.

DALBERG, CARL THEODOR ANTON MARIA, baron of the German empire, prince-primate of the confederation of the Rhine, grand-duke of Frankfort, and, finally, archbishop of Ratibon, was born near Worms, in 1744. He always espoused the new ideas to which the French revolution gave impulse; and though he opposed the invasion of Germany by the French in 1797, he assisted at the coronation of the emperor Napoleon in 1804. Throughout life he was distinguished for industry in the discharge of his official duties, and for an incorruptible love of justice; he was also the encourager of learning and science, and himself the author of several ingenious treatises, legal, scientific, and philosophical. In 1813 he resigned all his possessions as a sovereign prince, and retired to private life, retaining only his ecclesiastical dignity. Died, 1817.

D'ALBRET, CHARLOTTE, sister of Jean d'Albret, king of Navarre, and wife of Cesar Borgia. She was a coetess of a mean power, and as remarkable for virtue as her husband was for vice. Died, 1514.

D'ALBRET, CHARLES, constable of France in the reign of Charles VI. to whom he was related by blood. He commanded in the French army at the famous battle of Agincourt, in which he lost his life 1415.

D'ALBRET, JEANNE, queen of Navarre, was born in 1528. She was the daughter of Henri d'Albret, married Antoine de Bourbon, duke of Vendôme, and became in 1553, mother of Henry IV. She succeeded her father in 1555, and soon after became a Protestant. Being invited to Paris to treat of the marriage of her son with Margaret, sister of Charles IX., she went there, and the treaty was signed, but she died suddenly, June, 1572, two months before the massacre of St Bartholomew.

DALE, RICHARD, an American naval officer, was born, in Virginia, in 1768; was sent to sea at 12 years of age, and in 1789 had the command of a merchant-vessel. While serving as a midshipman on board of the American brig of war Lexington, he was taken by a British cutter; but, after being confined a twelvemonth in Mill prison, he effected his escape into France, where he joined the celebrated Paul Jones, then commanding the American ship Bon Homme

Richard, and was the first man that boarded the English frigate Scorpis, which was captured. In 1801 he had the command of an American squadron, and hoisted his pendant on board the President. He was a brave, honourable, and intelligent seaman. The adventures of his early days were of the most romantic and perilous kind; but his latter years were passed in the peaceful enjoyment of a competent estate at Philadelphia, where he died, in 1826.

DALB, DAVID, a skillful mechanic, and the originator of the well-known Lanark Mills, was born, in 1739, at Stewarton, in Ayrshire. From being a journeyman weaver he became a cotton manufacturer on a most extensive scale, first in conjunction with Sir R. Arkwright, and afterwards on his own account. By his means employment was given to thousands, old and young; nor did he leave the latter without the means of instruction, but provided teachers and established schools at all his works. Died, 1806.

D'ALEMBERT, JEAN LE ROND, a celebrated French mathematician and littérateur, was born, at Paris, in 1717. He was found exposed on the steps of the church of St Jean le Rond, was brought up by the wife of a glazier, and was discovered to be the son of Madame de Tenin, a noted wit and beauty, and of an officer of artillery. He studied at the Collège Mazurin, devoted himself with enthusiasm to mathematics, and was admitted to the Academy of Sciences in 1741. With Diderot he established the famous "Encyclopédie," wrote the Preliminary Discourse, and edited the mathematical portion of the work. He was the friend of Frederick II. of Prussia, who unsuccessfully endeavoured to fix him at Berlin. Catherine of Russia pressed him to undertake the education of her son, but in vain. He loved privacy and independence, rather shunned society, and was indifferent to money and honours. Among his principal works are: "Traité de Dynamique;" "Traité des Fluides;" "Recherches sur différents Points importants du Système du Monde;" "Recherches sur la Précession des Equinoxes;" "Mémoire sur la Suppression des Jésuites;" "Mémoires de Christine, Reine de Suède," &c. Died, 1783.

DALHOUSIE, JAMES ANDREW BROWN RAMSAY, tenth Earl and first Marquis of, born April 22, 1812, was elected M.P. for East Lothian in 1837, but in the following year, on the death of his father, took his place in the House of Lords. In 1843 he was appointed vice-president of the Board of Trade, and president in February, 1845. Having accepted the office of governor-general of India, he arrived at Calcutta in January, 1848. His policy during the first six years of his rule is minutely explained in the well-known minute which he drew up in 1856. His health gave way under his unceasing exertions, and the close of his sojourn in India was occupied with the momentous questions involved in the deposition of the king of Oude and the occupation and settlement of his kingdom. Lord Dalhousie's policy in this matter has been severely criticised by some whose judgment was founded on long personal experience,

and he returned to England not long before his successor had to encounter the great Indian mutiny, which has by some been attributed to the system of his predecessor. Lord Dalhousie never entirely recovered his strength, and died at the age of 48, December 19, 1860.

DALIN, OLAUS VON, called the father of modern Swedish poetry, was the author of many spirited satires, songs, epigrams, and fables. He also wrote "The Argus," a work on the plan of "The Spectator;" "A General History of Sweden;" "Brunnhilda," a tragedy, &c. He was born in 1706, and died, chancellor of the court of Sweden, in 1763. Queen Louisa Ulrica erected a mausoleum to his memory.

DALLAS, SIR GEORGE, lord chief justice of the Common Pleas, was born in London, 1758, educated principally at Geneva, and at the age of 18 he went to India as writer, where his talents soon raised him to high civil offices. He warmly espoused the cause of Warren Hastings when impeached, and in 1789 he wrote a pamphlet, in which he attributed to him the British supremacy in India. In 1793 he published his "Thoughts upon our present Situation, with Remarks upon the Policy of a War with France," which created considerable sensation, and especially excited the admiration of Mr Pitt. He was also the author of various other political works, relating more particularly to the state of Ireland; besides some elaborate treatises on the subject of the East India trade and policy; and, lastly, a "Biographical Memoir of his son-in-law, Captain Sir Peter Parker." The works of Sir George Dallas display a thorough knowledge of the subjects on which he treated. Died, Jan. 1833.

DALLAWAY, JAMES, writer on art and antiquary, was a native of Bristol. He was born in 1763, studied at Oxford, and entered the church. In 1795 he visited Constantinople as chaplain to the embassy, and on his return became secretary to the earl marshal, the duke of Norfolk. Among his works are a "History of Western Sussex;" "Constantinople, Ancient and Modern;" "Anecdotes of the Arts in England," &c. He also edited the Letters of Lady Mary Wortley Montague, Walpole's "Anecdotes of Paintings," and other works. He was a fellow of the Society of Antiquaries. Died, 1834.

DALRYMPLE, ALEXANDER, hydrographer to the Admiralty and the East India Company, was born at New Hailes, near Edinburgh, in 1737, and spent the early part of his life in India, as a writer to the Company. He made a voyage in the Eastern Archipelago for the purpose of studying its geography and opening the way for extended trade. On his return to England he prepared some charts and wrote numerous works, among which are "The Oriental Repertory," "Collections of Voyages," &c. He was named hydrographer to the East India Company in 1779, and to the Admiralty in 1795. He was also a fellow of the Royal Society. Died, 1808.

DALRYMPLE, SIR DAVID, a Scotch judge and antiquary, was born at Edinburgh in 1726, and educated at Eton and Utrecht. On

his becoming a judge of the court of session, in 1766, he took the title of Lord Hailes. His principal works are "Annals of Scotland," which Dr Johnson assisted in revising, "Memorials relating to the History of Great Britain," "Remains of Christian Antiquity," &c. Died, 1792.

DALRYMPLE, JAMES and JOHN. [STAIR, Viscounts and Earls.]

DALRYMPLE, Sir JOHN, for many years a baron of exchequer in Scotland, and the author of "Memoirs of Great Britain and Ireland," in 3 vols. Died, aged 84, in 1810.

DALTON, JOHN, D.C.L., F.R.S., mathematician and natural philosopher, was born at Eaglesfield, near Cockermouth, in 1766, and gave early indications of his future scientific celebrity. We find him teaching a school as a boy in his native village, and at a subsequent period similarly engaged at Kendal; and in 1793, when in his 23rd year, he became professor of mathematics and natural philosophy in the new college in Moseley Street, Manchester, with which he remained connected until the removal of that establishment to York. He made his first appearance as an author in a volume of "Meteorological Observations and Essays," in 1793. In 1808 he published "A New System of Chemical Philosophy," and a second and third part in 1810. He also frequently contributed to Nicholson's Journal, the Annals of Philosophy, and the Memoirs of the Literary and Philosophical Society of Manchester, of which for half a century he was an active member, and latterly the president. In 1826 he was presented with a gold medal by the Royal Society for his scientific discoveries; and in 1833 the sum of £2000 was raised by his friends and townsmen for the erection of a statue (by Chantrey) to perpetuate his remembrance. His "atomic theory" must ever render his name memorable. Contemporaneously with Gay-Lussac, with whose researches many of his own run parallel, he discovered the general law of the expansion of gases; and his contributions to meteorology were also of the most important kind. A severe attack of paralysis in 1837 considerably impaired his powers, and he died in August, 1844. Dalton was a man of thorough independence of mind, thorough truthfulness, and almost childlike simplicity of life. He was a member of the Society of Friends, and a constant attendant at their meetings. His fellow-townsmen showed their sense of his worth by giving him a magnificent funeral attended by an immense number of persons.

DAMASUS I., Pope, succeeded Liberius in 366. A rival was also elected, and disgraceful disorders followed, the hostile parties going the length of fighting and killing each other in the city, and even in the churches of Rome. Damasus was a man of considerable learning, and his judgment was sought on many important matters then in dispute. On one occasion the eastern churches referred a question to him. St Jerome was at Rome during the last years of the pontificate of Damasus. Died. 384.

DAMIANI, PIETRO, Cardinal, bishop of Ostia, born at Ravenna about 988. Left an orphan, he was brought up by one of his bro-

thers and sent to study at Faenza and Parma. He made rapid progress, and became a teacher himself, but his strong religious feeling led him to retire to a monastic life, and in 1041 he became abbot of Pont-Avellana. He rendered important service to several popes, and was created cardinal, against his will, in 1057. His influence was very powerful, and he induced Benedict X., who was irregularly elected pope, to resign in favour of Nicholas II. He was sent as legate to Milan to condemn the simoniacal practices then causing much agitation; supported Alexander II. against the emperor; and then retired, resigning his dignities. He was, however, several times drawn from his cell and sent on important missions to France, to Germany, and finally to Ravenna, to re-establish order after the excommunication of the archbishop. The fatigue of this mission was too much for his diminished strength, and he died at Faenza soon after his return, in 1072. His works consist of Biographies of Saints, Sermons, and Letters.

DAMIENS, ROBERT FRANCOIS, who, owing to his vicious inclinations, obtained the appellation of *Robert-le-diable*, was born in 1715, at Tieuilloy, a village of Artois. While at Paris, in a menial employment, he was accused of having poisoned one of his masters and robbed another; and having evaded the law by flight, he in course of time returned, to practise new enormities. His mind was impressed and irritated by the disputes then going on between the church and the parliament of Paris. With some vague notion that a change for the better might be effected by attacking the king, in January, 1757, he stabbed Louis XV. in the midst of his guards, as he was getting into his carriage. The wound was not mortal, and Damiens was instantly seized; but the most cruel tortures which he was doomed to suffer could not induce him to confess that he had any accomplices; and the horrid sentence, which condemned him, like Ravallac, to be torn in pieces by horses, was executed, March 28, 1757.

DAMOCLES, a sycophant at the court of Dionysius of Syracuse in the 4th century B.C. When he was one day extolling the happy condition of princes, the tyrant invited him to a sumptuous entertainment, but caused a naked sword to be suspended over his head by a single hair; a sufficiently significant symbol of the fear in which tyrants may live.

DAMON, a Pythagorean philosopher, memorable for his friendship with Pythias. Dionysius of Syracuse having condemned the latter to death, he obtained leave of absence to go home and settle his affairs, Damon pledging himself to endure the punishment in his stead if he did not return at the appointed time. Damon was punctual; and this instance of friendship so pleased the king, that he pardoned Damon, and begged, but in vain, to be admitted to their friendship.

DAMPIER, WILLIAM, an English navigator, was born at East Coker, Somersetshire, in 1652, and became a mariner at an early age. During many years of active service in privateers and trading vessels, he

Benza and Parma. He became a teacher of religious feeling led a life, and in 1041 fell ill. He renounced several popes, and against his will, in 1057, he was very powerful, and he was irregularly favoured of Nicholas II. He went to Milan to contest the election then causing the death of Alexander II. He then retired, and he was, however, in his cell and sent to France, to Gerona, to re-establish communication of this mission. He finished strength, and after his return, he wrote several Biographies of popes.

D'ANGLAIS, who, owing to his noble family, was born in the city of Artois. While in the army, he was dismissed and having evaded the course of time he incurred enormities. His conduct by the disservice of the church and the king, in January, 1715. In the midst of his career, he was not mortal, and he was doomed to suffer a sentence that he had received, a horrid sentence, he was executed,

at the court of the 4th century, he was extolling the tyrant in his entertainment, he was suspended, he was sufficiently clear in which ty-

an philosopher, he was with Pythias. He was condemned the leave of absence affairs, Damon the punishment return at the appointed; and so pleased the monarch, and begged, to their friend-

n English navigator, Somerset a mariner at an active service, he

several times visited the South Seas; and the results of his observations were given to the public in a work entitled "Voyage round the World," which for accuracy and interest, as well as for professional knowledge, possesses considerable merit. He died, as is supposed, in 1712, but the exact time is not known.

DANBY, FRANCIS, a distinguished painter, was a native of Wexford. He was born in 1793, and after attaining some reputation at Dublin, he settled in England about 1820. He was elected A.R.A. five years later. His works are mostly landscapes, imaginatively treated, and often invested with the hues of sunset. Their general character may be gathered from their titles: "Sunset at Sea, after a Storm," "Last Moment of Sunset," "Ship on Fire—calm moonlight—far at Sea," "The Minute-Gun at Sea," &c. Among his best works are "Morning at Rhodes," "Delivery of Israel out of Egypt," and "Embarkation of Cleopatra on the Cydnus." Died, in Devonshire, 1861.

DANBY, THOMAS OSBORNE, Earl of, and duke of Leeds, lord-treasurer under Charles II., was born about 1631. His father was a zealous royalist, and introduced him at court at an early age. He was knighted by Charles II., created Viscount Latimer in 1673, and in the following year was appointed lord-treasurer, and created earl of Danby. It was by his advice that Charles persecuted the Non-conformists. He was suspected of bribery, and an impeachment was proposed by Lord William Russell, but was not carried out. In 1678 he was impeached by the Commons, and though pardoned by the king, was committed to the Tower, and was only released in 1684. He joined in the invitation to the prince of Orange, in 1688, was named president of the Council in the following year, and was created marquis of Carmarthen, and in 1693 duke of Leeds. Died, 1712.

DANCE, GEORGE, the elder, an English architect of the 18th century, who held the post of architect to the city of London. His chief work is the Mansion House, which was built about 1740. Died, 1768.

DANCE, GEORGE, the younger, architect, was the son of the preceding, and was born in 1740. In 1768 he succeeded to the office of city architect, and two years later commenced his first and probably his most meritorious work, the famous Newgate prison. He was professor of architecture at the Royal Academy, but did not lecture. Dance built St Luke's Hospital, and the British Institution in Pall Mall. Died, 1825.

DANCER, DANIEL, a noted miser, was born in 1718, near Harrow, in Middlesex. In 1738 he succeeded to his family estate, and led the life of a hermit for above half a century. His only dealings with mankind arose from the sale of his hay; and he was seldom seen, except when he was out gathering logs of wood from the common, &c. As he was frequently robbed, he nailed up his door, and by means of a ladder, which he drew up after him, got into his house through the upper window. This miserable specimen of humanity continued to exist till 1794, when he died, bequeathing his estates to

Lady Tempest, for the charitable attentions she had bestowed upon him.

DANCKERTS, the name of a family of Dutch artists, of whom CORNELIUS, born in 1561, appears to have been the first of any note. He excelled as a portrait and historical engraver.—PETER, son of Cornelius, was born at Amsterdam, in 1600. He was also a good engraver, and his prints after Berghem and Wouvermans are esteemed. His sons, HENRY and JOHN, practised the same art, and the latter came to England and worked with Hollar.

DANCOURT, FLORENT CARTON, a French actor and dramatic poet, was born in 1661, at Fontainebleau, and was originally a barrister, but quitted the law for the stage. He produced an immense number of plays, and was particularly successful in introducing actual occurrences, which gave to his comic pieces great piquancy. Died, 1726.

DANDOLO, HENRICO, a celebrated doge of Venice, to which high office he was chosen in 1192, when in his 84th year. He carried on the war with the Pisans, and closed it by an advantageous peace. In 1201 the crusaders applied to him for assistance, and on their promise to reduce the town of Zara which had revolted, he agreed to help them. He accordingly undertook with them, in 1203, the siege of Constantinople, at which he greatly distinguished himself, and was the first who leaped on shore. It is said that Dandolo had the offer of the Imperial crown and refused it. He was created despot of Romania, and died in 1205, aged 97.

DANDOLO, VINCENZO, a Venetian chemist, descended from the famous doge and captor of Constantinople, was born in 1758. At all times zealous for the independence of Italy, he became a member of the council of the Cisalpine republic, after the treaty of Campo Formio. He died in 1819. Among his works are "Fondamenti della Scienza Fisico-Chemica," &c.

D'ANGHIERA, PIETRO MARTIRE. [MARTYR, PETER.]

D'ANGOULEME, MARIE THERÈSE CHARLOTTE, Duchess, the unfortunate daughter of Louis XVI. and Marie Antoinette, was born at Versailles, in 1778. She shared the imprisonment of her kindred in the Temple; but three years after the murder of her parents, and after she had heard of the cruel death of her brother, she was released from prison, in exchange for some members of the Convention who had been prisoners in Austria. Immediately upon her release, she proceeded to Vienna; but there, where the name of Frenchman was hated, she encountered persecution again; and she quitted the emperor's court to take shelter with the exiled Count de Provence, who had found a temporary home at Mittau. Here she married her cousin, the duke of Angoulême, to whom she had been betrothed early in life, and for whose sake she had refused a promising alliance at the Austrian court. Mittau, however, proved no resting-place. The emperor of Russia, influenced by Napoleon, ordered the wanderers forth. At Königsberg they received permission from the king of Prussia to take up their abode

in Warsaw under painful conditions. But Warsaw soon repeated of its meagre hospitality, and the outcasts were soon travelling again towards Mittau. Meanwhile Alexander, by the peace of Tilsit, having become an ally of Napoleon, the word was once more given to go forth. In August, 1808, the travellers touched the English shore, and remained under protection until the banishment of Buonaparte to Elba opened the road to France and to the throne. The first care of the duchess on her return was to recover the remains of her parents thrown into a dishonoured grave; but the burial was scarcely over before Buonaparte escaped from Elba. The duchess, being at Bordeaux at the time, rallied the troops there, and heroically undertook to lead them against Napoleon, who, remembering her heroism when she defied the artillery of Clanzel, was wont to call her "the only man of the family." Eleven months the devoted woman had been in France when she quitted it sorrowfully again; but the Hundred Days over and Waterloo accomplished, the second restoration took place, and she at once returned. But even in prosperity, calamity qualified her lot. Her brother-in-law, the Duc de Berri, was murdered at the Opera, on the 13th of February, 1820, and in 1824 she lost her fellow-exile, Louis XVIII. Six years afterwards the folly of Charles X. transferred the throne to his cousin Louis Philippe; and during the storm that preceded the change the duchess was forced to travel disguised through the streets in a public vehicle, whose merciful and generous owner contrived to save her from discovery and its too probable consequences. Quitting France with Charles X., she set sail for England, visited Scotland, and for a time sojourned in the palace of Holyrood. Soon afterwards she accompanied her uncle to Prague. In 1836 they established themselves at Goritz, where Charles X. found his tranquil resting-place, and where, shortly afterwards, the remains of her faithful husband were deposited. When residing with her nephew at Frohsdorf she heard of the new French revolution of 1848, which deprived Louis Philippe of his crown. On the 13th of October, 1851, whilst present at the celebration of mass, between nine and ten o'clock in the morning, the duchess fainted away. On the following day she became worse; on the 16th, the anniversary of her mother's execution, she uttered a feeble farewell to the duke of Bordeaux, and never again spoke. Her will had been previously made. She prayed to God, in that document, to shower down his blessings upon France; she pardoned with her entire soul, and without exception, all who had injured and offended her; and she desired to be laid in the grave between her husband and his father, without ceremony or solemn service. Died, 1851. Her Memoirs have been published by Mrs Romer, under the expressive title of "Elia Dolorosa."

DANICIAN, ANDRE. [PHILIDOR.]

DANIEL, GABRIEL, a French Jesuit; author of a "History of France," and a "Voyage to the World of Descartes," a

severe satire on the system of that philosopher. Born, 1649; died, 1728.

DANIEL, SAMUEL, an English poet and historian, born in Somersetshire, in 1562. He appears to have studied at Oxford, became tutor to Lady Anne Clifford, and was afterwards in the service of Anne, queen of James I. It is uncertain whether he succeeded Spenser as poet-laureate. He wrote a poem on the Wars of the Roses; "Cleopatra," a tragedy; "Musophilus;" "The Complaint of Rosamond," and other shorter poems, and also a History of England, down to the death of Edward III. His works are little read, but deserve to be well known. Coleridge calls him "the admirable Daniel," and commends the purity and manliness of his style and language. Many passages of great sweetness and tenderness occur in his poems. Died in his native county in 1619.

DANIELI, FRANCISCO, an Italian *savant* and antiquary, born in 1741. In the Neapolitan revolution of 1799, he joined the French republican party; and on the restoration of the king of Naples suffered the loss of his post in the Academy, and the confiscation of his property. Joseph Buonaparte made him perpetual secretary of the Academy of Antiquities at Naples, and in this post he was continued by Murat. He died in 1812. Among his works are "Le Forche Caudine Illustrate," "Monete Antiche di Capua," "I Regni Sepolcristi del Duomo di Palermo," &c.

DANIELL, JOHN FREDERICK, D.C.L., professor of chemistry in King's College, London, and foreign secretary to the Royal Society; author of "Meteorological Essays," an "Introduction to Chemical Philosophy," &c., besides numerous papers in the Quarterly Journal of Science and Art, and the Philosophical Transactions, was born in London, in 1790. As a proof of the estimation in which his scientific attainments were held, it is only necessary to state that he obtained all the three medals in the gift of the Royal Society, an honour never before conferred on any one. While attending a meeting of the council of the R. S., March 14, 1845, he was seized with apoplexy, and immediately expired. In his official capacity he was zealous and indefatigable; in his private character, irapproachable.

DANIELL, SAMUEL, an artist, who travelled into the interior of Africa, made numerous drawings there, and on his return published a work entitled "African Scenery and Animals." He also spent six years in the island of Ceylon, where he died in 1811. He left an extensive collection of drawings, chiefly illustrative of the natural history of the island; and a volume was published, entitled "The Scenery, Animals, and Native Inhabitants of Ceylon."

DANIELL, WILLIAM, R.A., an eminent draughtsman, born 1769, accompanied his uncle to India, when he was only 14, for the purpose of assisting in depicting the scenery, costume, &c., of that country. Immediately on their return, the large work, entitled "Oriental Scenery," in six folio volumes, was commenced, and continued with the most persevering ardour, until its completion in 1808. lished "A Picturesque Voyage to India," a
work entitled "Zoography," and a great
variety of separate views, &c. In 1814,
he commenced the "Voyage round Great
Britain." Two or three months in each
summer were devoted to collecting draw-
ings and notes, and the work was finished in
1825. In 1832 Mr Daniell, and his friend
Mr Parris, executed the "Panorama of
Madras;" and he subsequently painted two
others, without assistance, namely, the
"City of Lucknow," and the "Mode of
Hunting wild Elephants in Ceylon." He
was particularly successful in depicting
the ocean; and his glowing representations
of Eastern scenery are well known by his
splendid "Oriental Annual." Died, 1837.

DANNECKER, JOHANN HEINRICH, one
of the greatest of modern sculptors, was
born at Stuttgart, in 1758. He early gave
indications of a talent for art; and after
passing some years in the school of design
at Ludwigsburg, he set out for Paris in 1783,
where he studied under Pajou, and sub-
sequently spent five years at Rome, in the
study of the masterpieces of art that adorn
that city. The rest of his life was spent
chiefly at Stuttgart. Among his finest
works are the "Christ," "Faith," "Ariadne
on the Leopard," &c. His female figures
have rarely been surpassed; and his busts of
Schiller, Lavater, Gluck, and many of the
members of the royal family of Wurtem-
berg, are models of artistic skill. Died,
professor of sculpture at Stuttgart, 1841.

DANTE ALIGHIERI, the great poet of
Italy, was born at Florence in May, 1265. He
was of a noble family then attached to the
party of the Guelphs, showed at an early age
a strong passion for learning, and is said to
have studied at the universities of Bologna
and Padua. It is conjectured also that he
visited Paris, and possibly Oxford. When
about ten years of age he first saw, in the
house of her father, Folco Portinari, the
Beatrice whose beauty and goodness inspired
him with a passion of admiring love which
became one of the most potent elements of his
inner life, and the source of some of the sub-
limest and sweetest conceptions of his great
poem. Beatrice died in 1290; and she then
became to him a glorified ideal of wisdom
and purity. A year after her death he mar-
ried Gemma de' Donati, whose family was of
the party of the Ghibellines, and who made
his life a burden by her savage temper.
Dante served in the Florentine army at the
battle of Campaldino, and soon after in the
war with the Pisans. In 1300 he was chosen
first prior, or chief magistrate of Florence,
and from that period began his misfortunes
and wanderings. The Guelphs were then
split into two factions, known as the Bianchi
and the Neri; and Dante, on suspicion of
favouring the Bianchi, was sentenced to
exile, and his estates were confiscated. He
was then at Rome, and thenceforth had to
take refuge at various courts that favoured
the Ghibelline party, which he joined. In
1304 he made, with other exiles, an un-
successful attempt to enter Florence by
force of arms. After many wanderings he
found an asylum at Ravenna, with Guido
Novello da Polenta, and there he died, in

1321. Florence and all Italy then knew and
mourned their loss. A splendid monument
was erected to him at Ravenna, copies of his
works were multiplied, professorships insti-
tuted for expounding them, and voluminous
commentaries written. The Florentines
tried to get the remains of their banished
poet restored to them, but in vain. His bones
were removed by Father Antonio Santi,
chancellor of the Franciscans, in 1677, on the
repair of his monument by Cardinal Corsi.
The coffin was rediscovered in 1865. Dante's
great poem is entitled the "Divine Comedy,"
and in the form of a vision sets forth the
mysteries of the invisible world, of Hell,
Purgatory, and Paradise. It is the first
great work of modern European literature,
and stands alone as a creation of genius:
"a mystic unathomable Song;" greatest
always to the greatest. It has passed through
innumerable editions, and been translated
over and over again into all European lan-
guages. Of English translations Cary's, in
blank verse, and Dr Carlyle's, in prose, are
much esteemed. But several new transla-
tions in various metres have appeared in the
last few years. Among them are Wright's,
Rossetti's, and Mrs Ramsay's. In 1861 ap-
peared at Paris a magnificent edition of the
"Inferno," Italian text and French transla-
tion, with illustrations by Gustave Doré,
2 vols. folio. The illustrations have been
since reproduced in an English edition,
1 vol. folio. Dante's other works are the
"Vita Nuova," lately translated by Theod-
ore Martin; the "Convito," or Banquet;
treatises in Latin, "de Monarchia," and "de
Vulgari Eloquentia," and many smaller poems,
or "Rime." Dante was the friend of most
of the eminent men his contemporaries;
among them, Giotto, whose portrait of him
was discovered in 1840. Aquinas, Roger
Bacon, Marco Polo, Cimabue, and Duns
Scotus died, and Petrarch and Boccaccio
were born, in Dante's lifetime. The Sex-
centenary of Dante's birth was celebrated
at Florence and other Italian cities with
much ceremony.

DANTON, GEORGE JACQUES, born in
1759, was an advocate by profession, but
became one of the most active among the
demagogues of the French revolution. After
the imprisonment of Louis XVI. at Varennes,
he took the lead in the meeting of the Champ
de Mars, which paved the way to the de-
thronement of the king, and ended in those
scenes of blood and cruelty that have for
ever rendered execrable the name of Jacobin.
Well qualified for the position he assumed,
by his colossal figure, stentorian voice, and
fierce demeanour, he became one of the
executive council, and prepared measures
for the defence of the capital when it was
threatened by the Prussian invaders under
the duke of Brunswick. He was afterwards
a member of the Convention and of the Com-
mittee of Public Safety, and was a chief
promoter of all the sanguinary acts of that
terrible period. At length a struggle for su-
premacny took place between him and Robes-
pierre, in which the latter succeeded, and
Danton was sent to the guillotine, in 1794.

D'ANVILLE, JEAN BAPTISTE BOUR-
GIGNON, first geographer to the king of

France, member of the Academy of Inscriptions and Belles Lettres, of the Antiquarian Society of London, and adjoint-geographer to the Parisian Academy of Sciences; born at Paris, 1697; died, 1782. D'Anville devoted his whole life to geographical studies, and the numerous valuable maps and works he published left him without a rival. Among the best of his works are the "Analyse Géographique de l'Italie," "Notice de l'ancienne Gaul," "Mémoire sur l'Egypte Ancienne et Moderne," "Traité des Mesures Itinéraires Anciennes et Modernes," "Orbis Veteribus Notus," and "Orbis Romanus." He published 78 treatises and 211 maps, all of which are distinguished for their accuracy and perspicuity.

D'ARBLAY, Madame (FRANCES BURNEY), was the daughter of Dr Burney, the celebrated historian of music, and may be reckoned among the most distinguished novelists of the last century; her first work, "Evelina," having created a great sensation among the literati of her time. Her other chief works were "Cecilia, or the Memoirs of an Heiress," "Camilla, or a Picture of Youth," "The Wanderer, or Female Difficulties," and "Memoirs of Dr Burney." In 1793 she was married to M. d'Arblay, a French emigrant artillery officer; and having quitted England for a short residence at Paris during the peace of 1802, their detention by Napoleon was the consequence. Her husband afterwards resumed his rank in the army of his native country; and they continued to remain in France till the peace of 1814, when they came to England, and took up their residence at Bath. In that city M. d'Arblay (then a general) died, in 1818. There also died Madame d'Arblay, Jun. 6, 1840. Her "Diary and Letters," published shortly after her death, attained considerable popularity, and is still interesting for its detailed and curious pictures of such phases of English life as the authoress was familiar with.

DARCET, JEAN, a French chemist and physician, who contributed much to the progress of chemical science, was born, in 1725, at Douazit, in Guienne. He made several improvements in the manufacture of porcelain, tried the effect of fire on various minerals, and demonstrated the combustibility of the diamond. During the Reign of Terror his name was in Robespierre's list; but the interest of his friend Fourcroy saved him; and he died in 1801, a member of the Institute and of the Conversative Senate.—His son, JEAN PIERRE JOSEPH, also an ingenious practical chemist, greatly contributed to the improvement of science by a number of valuable discoveries.

DARCY, PATRICK, Count, an eminent engineer, was born at Galway, in Ireland, in 1725, and educated at Paris. He entered the French army, and rose to the rank of major-general. He distinguished himself by his mathematical works, viz., "An Essay on Artillery," "A Memoir on the Duration of the Sensation of Sight," &c. Died, 1779.

D'ARGENSOLA, LUPERIO LEONARDO, a Spanish poet, born at Balbastro, Arragon, in 1565, was secretary of war at Naples, under the viceroy there. He was the author

of three tragedies and various poems. Died, 1613.

D'ARGENSOLA, BARTOLOMEO, brother of the preceding, was chaplain to the empress Maria of Austria, and the writer of some historical works of merit, viz., a "History of the Conquest of the Molucca Islands," "Annals of the Kingdom of Arragon," &c. Died, 1631.

D'ARGENSON, MARC RENÉ LE VOYER, Marquis, a distinguished statesman in the reign of Louis XIV. born at Venice, 1632; died, 1721. He was lieutenant-general of the police in Paris, and the first who introduced lettres-de-cachet: he was subsequently chancellor; but finally retired under some disgrace to a monastery, in which he died.

D'ARGENVILLE, ANTOINE JOSEPH DEZALLIER, French naturalist and littérateur, was born in 1680, at Paris, in which city his father was a bookseller. He was one of the members of the French Academy, engaged in the compilation of the Encyclopédie, and was a corresponding associate of most of the European literary societies. He was author of treatises on "Oryctology" and "Conchology," and of an "Abrégé de la Vie des plus Fameux Peintres." He died, 1766.

DARIUS I., king of Persia, was the son of Hystaspes. He entered into a conspiracy, with six others, against the usurper Sinerdis, and having slain him, they agreed that he should have the crown whose horse should neigh first in the morning. By a well-concerted plan of his groom, the horse of Darius neighed immediately he came to the spot where they were to meet, in consequence of which he was saluted king. He took Babylon after a siege of twenty months, gave permission for the rebuilding of the temple of Jerusalem, and sent the captive Jews to their own country. The revolt of the Greek cities in Ionia was the occasion of the famous Persian war. The army of Darius, under the command of Mardonius, invaded Greece, but accomplished nothing. A second invasion was undertaken, and the Persians were defeated by the Greeks at Marathou; on which he resolved to carry on the war in person, but died in the midst of his preparation, B. C. 485.

DARIUS III., CODOMANNUS, last king of Persia, was raised to the throne by the eunuch Bagoas after the murder of Arsces, B. C. 336. Two years later his dominions were invaded by Alexander the Great, who defeated the Persian army at the Granicus; in the following year won a great victory over Darius himself at Issus, and took his family prisoners; and finally defeated him at the battle of Arbela (Gaugamela) in 331. Darius fled through Media into the Parthian wilds, where he was seized and murdered by Bessus, satrap of Bactria. His remains were treated with all honour by Alexander, and buried with his predecessors at Persepolis.

crime, or not, has not been clearly proved; but there is little reason to doubt that her illicit passion for Bothwell, or resentment for the death of her favourite, Rizzio, might impel her if not to instigate, at least to be an accomplice in the crime.

DARU, PIERRE ANTOINE NOEL BRUNO, peer of France, eminent as a statesman, poet, and historian, was born at Montpellier, in 1767. At the age of sixteen he entered the army, and at the breaking out of the revolution adopted its principles; but though engaged in active service, he devoted much of his time to literary pursuits. He first published a translation of the works of Horace, which, with his "Cléopéde," or Theory of Literary Reputations, established his reputation as a poet. It was not long before Napoleon discovered his abilities, and rewarded him by various official appointments of trust, in which Daru conducted himself with zeal and ability; and at the time of the first restoration of the Bourbons he held the portfolio of the war department. Though his estate at Meulan was sequestered by Blücher, the allied monarchs soon restored it, and he was called to the Chamber of Peers by Louis XVIII. He afterwards wrote the "Vie de Sully" and the "Histoire de la République de Venise," the latter being one of the most important of modern historical works. Count Daru was a member of the Institute, of the French Academy, the Academy of Sciences, and the Berlin Academy. Died, 1829.

DARWIN, ERASMUS, a poet and physician, was born at Eiton, near Newark, in 1731. He was educated at Cambridge, took his doctor's degree at Edinburgh, and settled at Lichfield as a physician till 1781, when he removed to Derby, where he died in 1802. He was a man of great talent, but of remarkably eccentric opinions, as his works abundantly prove. His poetic fame rests upon his "Botanic Garden," the versification of which is highly polished but mechanical, and his work entitled "Zoonomia, or the Laws of Organic Life," which, though ingenious, is built upon the most absurd hypothesis. He also wrote "Phytologia, or the Philosophy of Agriculture and Gardening," several papers in the Philosophical Transactions, &c.

DASHKOW, EKATERINA ROMANOWA, a Russian princess, lady of honour to Catherine II., was born in 1744. She took a leading part in the revolution of 1762, by which Peter III. was deposed and Catherine placed on the throne. Some years later, on the death of her husband, to whom she had been married about 1759, she travelled through the principal countries of Europe, and gained the friendship of many distinguished men. On her return to Russia, in 1782, she was appointed president of the Academy of Arts and Sciences at St Petersburg. She suggested the founding of the Russian Academy, projected and assisted in compiling a Russian Dictionary, and employed herself in other literary pursuits in conjunction with the empress. She was deprived of her offices by the Emperor Paul, and spent the rest of her life in retirement. Died, 1810.

DASSIER, JEAN, a French medallist, who engraved a great number of medals of eminent men of the age of Louis XIV. Died, 1763.

DASSIER, JACOB ANTOINE, son of the preceding, was also a medallist, and engraved numerous medals of illustrious men, in a very superior style of workmanship, preserving the likenesses with wonderful correctness. He was for some time actively employed in the mint of England, but went to St Petersburg, and died at Copenhagen, while on his return to London, in 1759.

DAUBENTON, LOUIS JEAN MARIE, a French naturalist and anatomist, was born at Montbar, Burgundy, in 1716. He was the friend and coadjutor of Buffon in his Natural History of Quadrupeds, the anatomical articles of which were prepared by him with great clearness and accuracy. He held for 50 years the office of keeper of the Cabinet of Natural History at Paris, and was for some time professor of mineralogy at the Museum of Natural History. He was author of "Instructions to Shepherds," "A Methodical View of Minerals," and other works; and at the time of his death, in 1800, was a member of the Senate and the Institute. His wife was the author of a popular novel called "Zélie dans le Désert." She died in 1824.

D'AUBIGNÉ, THEODORE AGRIPPA, French historian, was born at St Maury in Saintonge, in 1550. He was well educated, and displayed extraordinary capacity of learning at an early age. His father was a zealous Huguenot, and the son remained incorruptibly faithful to the Huguenot cause. He took part in the civil war, and entered the service of the king of Navarre (Henry IV.), but his independence and freedom of speech led to his expulsion from court, and though recalled, he was a second time exiled. In retirement at Mullezale, of which he was made governor, in 1588, he wrote his "Histoire de son Temps," a valuable, vivid, and truthful record, which "had the honour to" be burnt by the parliament of Paris. He spent the last 10 years of his life at Geneva, and wrote many other works, both in verse and prose. Died, 1630. D'Aubigné was grandfather to Madame de Maintenon.

D'AUBUSSON, PIERRE, grand-master of the order of St John of Jerusalem, was born in 1423. He was of French origin, served in the armies of the Emperor Sigismund against the Turks, went to Rhodes, and became a knight of St John, and in 1476 was chosen grand-master. He is celebrated for his heroic and successful defence of Rhodes against the Turks, in 1480. He afterwards protected Zizim, one of the sons of Mahomet II., but was compelled to give him up to the Pope Innocent VIII. The grand-master was then made a cardinal. Grief at the failure of his projected crusade against the Turks hastened his end. Died, 1503. D'Aubusson was surnamed "buckler of the church."

DAUDIN, FRANÇOIS MARIE, French naturalist, was born at Paris, in 1774. Lameness from natural infirmity and narrow means made his life a painful struggle. He

found solace in his chosen studies and labours, in which he had the sympathy and aid of his wife. His best work is the "Histoire Naturelle des Reptiles," at the time of its appearance the most complete work on that subject. He contributed memoirs to various scientific journals. Died, in 1804, having lost his wife a few days before.

DAUN, LEOPOLD JOSEPH MARIA, Count von, Austrian field-marshal, was born at Vienna, in 1705. He first served against the Turks under Seckendorf, became chamberlain to the Emperor Charles VI., took part under Archduke Charles in the invasion of Alsace, and at the peace was made field-marshal and privy councillor. In 1757 he gained the victory of Kolin over Frederick the Great, soon after took Breslau, and in October, 1758, defeated Frederick again at Hochkirch, for which rich gifts and flattering words were sent him from the Empress Maria Theresa, the pope, the empress of Russia, and the states of Austria. But he was out-generalled at last, and thoroughly defeated by Frederick, and wounded, at the battle of Torgau, in November, 1759. Daun was afterwards president of the Aulic Council, and died in 1766. His excessive caution in military movements procured him the designation of the new *Fabius Cunctator*.

DAUNOU, PIERRE CLAUDE FRANÇOIS, French statesman and littérateur, was born at Boulogne, in 1761. In 1789 he was professor of theology at Montmorency. He was a deputy to the National Convention, a member of the Committee of Public Safety, and of the Council of Five Hundred. He opposed the measures of the first consul, and removed from the tribunate. In 1804 he was made keeper-general of the archives, a post which he filled till 1816. He subsequently held the chair of history at the College of France, and was a member of the Chamber of Deputies. In 1839 he was raised to the peerage. Among his numerous works are: "Eloge de Boileau," "Essai Historique sur la Puissance Temporelle des Papes," "Cours d'Histoire fait au Collège de France," &c. Died, 1840.

DAVENANT, SIR WILLIAM, an English poet, was born at Oxford, in 1605, and there educated. After having been in the service of the duchess of Richmond and Lord Brooke, he began to write for the stage; and upon the death of Ben Jonson, he was created poet-laureate. During the civil wars he fought for the king, was made lieutenant-general, and received the honour of knighthood. On the decline of the royal cause he went to France, and formed a design for carrying over a number of artificers to Virginia; but his ship was taken by a vessel belonging to the parliament, and brought to England, where an ignominious death would have awaited him, had it not been for the intercession of Milton; an act of kindness which he afterwards returned. On the restoration of Charles II., he obtained a patent for a theatre in Lincoln's Inn Fields. He died in 1668, and was interred in Westminster Abbey. His works consist of plays and poems, which are now forgotten. It was Sir William Davenant who took part with

Dryden in making an improved (!) version of Shakspeare's "Tempest" for the stage, which version was adopted and held its ground till our own time. It is worth while to add that John Davenant, the father of Sir William, was host of the Crown Inn, Oxford, and that Shakspeare used to lodge there on his journeys between Stratford and London.

DAVID I., king of Scotland, succeeded his brother, Alexander the Pious, in 1124. He married Maud, grand-niece of William the Conqueror; and was earl of Northumberland and Huntingdon when called to the Scottish throne. On the death of Henry I., king of England, he maintained the claim of his daughter Maud against King Stephen, and seized Carlisle, but was defeated at the battle of Northallerton in 1138. A negotiation was entered into the following year, by which Carlisle was suffered to remain in the possession of David. He died there in 1153.

DAVID II. (Bruce), king of Scotland, was the son and successor of Robert Bruce, at whose death, in 1328, he was only five years old. On the invasion of Scotland by Ballol, David was sent to France; but his party prevailed, after a bloody contest, and he returned home in 1342. He made several inroads on England, but was taken prisoner at the battle of Nevil's Cross, 1346, conveyed to the Tower, and did not recover his liberty till 1357, on paying a heavy ransom. Died, 1371.

DAVID, FRANÇOIS ANNE, an eminent French engraver, who published many illustrated works, among them "Histoire de France," "Histoire de France, sous le Règne de Napoléon le Grand," "Monumens inédits de l'Antiquité," "Antiquités d'Herculanum," &c. Died, 1824.

DAVID, JACQUES LOUIS, a celebrated French painter, was born at Paris in 1748, and was a pupil of Vien. In 1775 he went to Rome, where his talent for historical painting was quickly developed. On his return to Paris he was received at the Academy, and in 1783 was appointed painter to the king. At the outbreak of the revolution in 1789, David was carried away with the general excitement, and went the greatest lengths with the extreme parties. He joined the Jacobin Club, was deputy to the Convention, sat with the Mountain; and appears to have fancied a similarity between Collot d'Herbois and Marius—between Phocion and Robespierre. He presented paintings of republican heroism to the National Assembly; he depicted, in a funeral oration, the patriotic death of Marat; avowed his destiny as for ever joined with Robespierre; voted for the death of Louis XVI., and for the civic festival in honour of the goddess of Liberty, for some of the details of which he supplied designs. In the sudden changes, however, which at that time took place, he was committed to the Luxembourg, and only escaped the guillotine from the celebrity he had gained as an artist. David exercised considerable influence over the measures adopted under the empire for the cultivation of the fine arts. On the restoration of the Bourbons he was banished from France, and died at Brussels in 1825. His

best paintings are, the Rape of the Sabines, the Oath of the Horatii, the Death of Socrates, Napoleon presenting the Imperial Eagles to the Troops, Mars disarmed by Venus and the Graces, and the Coronation of Napoleon. David's style of painting, formed on a fastidious imitation of the classic models of Greece, has a cold and statue-like tameness in the midst of striking elegance of form, and accuracy of costume and design, being deficient in that vitality which forms the *beau idéal* of the English school. The reputation of this painter in his own day was extraordinary, but it has not proved permanent.

DAVID (of Angers), JEAN PIERRE, a celebrated French sculptor, was born at Angers in 1769. From his earliest years he showed a predilection for art; and, after his preliminary studies were finished, he came to Paris, where he found favour with his namesake, the great painter, who was then all-powerful at the Tuileries, and by whose counsels his studies were regulated. In 1811 his relief, "The Death of Epaminondas," won him the first prize for sculpture in the School of Arts, and, along with it, a pension to finish his artistic education in Italy. In 1826 he became member of the Institute and professor at the School of Arts; in 1828 he went to Weimar, where he modelled Goethe's bust, which, executed in marble, has found a place, since 1831, in the Grand-Ducal Library at Weimar. In 1834 he made his second tour through Germany, modelling on his way, at Munich, Schelling—at Dresden, Tieck—and at Berlin, Rauch. From 1835 to 1837 he was busy with his sculptures for the Pantheon, the great work of his life. His monuments of the great men of France are almost innumerable. In 1848 he was member of the Constituent Assembly; and as an author he is to be named as co-editor of the "Memoirs of Barrère." Died, 1856.

DAVIDSON, JOHN, a celebrated traveller, was a native of Dublin. In 1814 he was apprenticed to Messrs Savory and Moore, chemists, and became a partner in that firm; but his inclination for travel induced him to quit the business in 1826; and from that period up to the time of his death, he was almost constantly engaged in exploring distant regions. He visited Syria and South America, India, Egypt, Nubia, Palestine, Greece, Italy, France, and Germany; enriching his mind with information, and imparting it to the public in his lectures. His last expedition was to Africa, and it proved a fatal one. Whilst attempting to reach the far-famed city of Timbuctoo, and when about 25 days' journey from it (near the southern confines of the district of Egueda), he was robbed and murdered by a party of the tribe of El Harib, Dec. 18, 1836.

DAVIES, SIR JOHN, an English poet and judge, born in 1570, was a native of Wiltshire, and studied at Queen's College, Oxford; from whence he removed to the Middle Temple, and was called to the bar. On the accession of James I. he was created a knight and appointed to the office of attorney-general for Ireland. In 1626 he was made chief justice of the King's Bench, but died during the same year. His principal

poem, entitled "Nosce Teipsum," has considerable merit, and his work on the state of Ireland contains many sound political arguments and reflections.

DAVIES, DR JOHN, a learned Welsh divine; author of a grammar of the Welsh language, and a dictionary, Welsh and Latin. Died, 1644.

DAVIES, ROBERT, a modern bard of Wales, and one whose knowledge and love of Cambrian literature were never exceeded, died at Nantglyn, near Denbigh, on New-year's Day, 1836, aged 66. He gained numerous medals and premiums, at the different Eisteddfodan, for his Welsh effusions on popular and patriotic subjects; and was also the author of an excellent "Welsh Grammar," &c. Among the admirers of the ancient British language, Mr Davies was known by the bardic appellation of *Bard Nantglyn*.

DAVIES, WALTER, vicar of Llan-rhâl-adr, one of the Cambrian patriots, to whom the principality was indebted for a new development of old British literature, and at the same time, of the national life and spirit of the Welsh people; was born at Wern, in the parish of Llan-y-Mechain, in 1761. Though born of poor parents, he could trace his origin through a long line of illustrious ancestors. At the age of 11, he was teacher in a rural school; and afterwards articulated at All Saints, Oxford. Among his countrymen, he ranks with their most distinguished bards, ancient or modern; and besides innumerable minor prose contributions to various Welsh journals, illustrative of the history, topography, and language of his native country, he wrote "A General View of the Agriculture and Domestic Economy of North Wales and South Wales," published by order of the Board of Agriculture, four volumes, 1810—1818: a work full of shrewd observation, lively description, and excellent practical advice; and published an edition of *Haw Morus* and of *Lewis Glyn Cothi*, a historical poet of the 16th century. Died, 1849.

DAVILA, HENRICO CATERINO, an eminent historian, was born in the territory of Padua, in 1576; and being brought up in France, served with reputation in the French army. On his return to his native country, he held several high offices under the Venetian government; but in 1631, while on his journey to take the command of the garrison at Crona, he was assassinated. He wrote "The History of the Civil Wars of France," a work which still ranks among the best Italian productions.

DAVIS, JOHN, an eminent navigator, was born near Dartmouth in Devonshire, and went to sea at an early age. In 1585 he was sent out with two vessels to find a north-west passage, when he discovered the straits which still bear his name. He afterwards explored the coasts of Greenland and Iceland, proceeding as far as latitude 73° N. In 1591 he went, as second in command, with Cavendish, in his unfortunate voyage to the South Seas. After this he made five voyages to the East Indies, in the last of which he was killed in an engagement with some Japanese pirates off the coast of Malacca,

1605. He wrote an account of his voyages, and invented a quadrant.

DAVISON, WILLIAM, an eminent English statesman and diplomatist of the 18th century. After being employed in various important negotiations in Scotland and Holland, he became secretary of state to Queen Elizabeth in 1586. It was Davison who had to present to Queen Elizabeth, by her express command, the warrant for the execution of Mary, queen of Scots, for signature, and then to deliver it to Burghley, to be sent to Fotheringay. After the execution, Queen Elizabeth had her secretary sent to the Tower, tried in the Star Chamber, fined 10,000 marks, and imprisoned during her pleasure. He lay in prison through the remaining seventeen years of her reign.

DAVOUST, or DAVOUT, LOUIS NICOLAS, Prince of Eckmühl, peer and marshal of France, was born at Annoux, in 1770. He was a fellow-student with Napoleon at the Military School of Brienne, and entered the army at the age of seventeen. He served with distinction under Dumouriez, in Belgium, took Luxembourg, and took a brilliant part under Desaix at the passage of the Rhine, in 1797. He followed Napoleon to Egypt, won many victories over the Arabs and the Turks, especially at Aboukir, and on his return to France was made general of division, and in 1804, marshal. He distinguished himself in the German campaign of the following year, and took a prominent part at Austerlitz. By the victory of Auerstadt, in 1806, he contributed to the great victory over the Prussians at Jena, and was created duke of Auerstadt. He shared the glory of Eylau, Eckmühl, and Wagram; was made governor of Hamburg; accompanied Napoleon in the expedition of Russia, and then returned to his government of Hamburg. He made it a vast camp, and defended it against the allies for 10 months. But his treatment of the town, his seizure without compensation of private property, his demolition of large portions of the town and expulsion of 25,000 of the citizens, led to his temporary disgrace and retirement. In 1815 he was made minister of war under Napoleon, and assisted him in the gigantic preparations for the final struggle at Waterloo. Died, 1823.

DAVY, SIR HUMPHREY, bart., one of the most eminent among modern chemists, was born at Penzance, in Cornwall, in 1778. He was intended for the medical profession, and placed with an apothecary for the necessary initiation; but he gave himself up to the study of chemistry, and, with the consent of his master, quitted him in his 15th year, in order to prepare for graduating as a physician at Edinburgh. Indefatigable in the pursuit of his favourite science, his progress in it was most rapid; his friends encouraged the bent of his genius, and he was induced to suspend his design of going to Edinburgh, and to accept the superintendance of a Pneumatic Institution at Bristol. While there he published his "Chemical and Philosophical Researches," the fame of which immediately obtained him the professorship of chemistry at the Royal Institution, where his popularity as a lecturer

was unbounded. In 1802 he became professor to the Board of Agriculture; in 1818 he was created a baronet; and in 1820 he was elected president of the Royal Society; and a series of scientific discoveries and professional honours flowed on without interruption till his death, which took place at Geneva, in 1829. The invention of the safety-lamp, the discovery of the metallic bases of the alkalies and earths, and of the principles of electro-chemistry, and numerous other discoveries and inventions not less important, attest his skill and industry, and give him an imperishable fame. Besides his separate works of a scientific character, he was the author of numerous papers in the Philosophical Transactions; and when, during his illness, he was disposed to divert his mind with lighter studies, he wrote "Salmonia, or Days of Fly-fishing," and "Consolations in Travel."

DAVY, JOHN, a musical composer of some notoriety, was born in 1765, and died in 1821. He was a pupil of Jackson, discovered a very early genius for music, and composed some successful operas and songs.

DAWE, GEORGE, R. A., an eminent painter, who held the situation of first painter to the emperor of Russia, and was a member of the Academies of St Petersburg, Stockholm, and Florence, excelled both in portraits and historical subjects, and for several years was a regular exhibitor at Somerset House. He was author of "The Life of George Morland." Died, 1829.

DAWES, RICHARD, a learned critic, was born in 1708, and educated at the Charterhouse, and Cambridge University. In 1738 he was appointed master of the Grammar School of Newcastle-upon-Tyne. In 1743 he published his "Miscellanea Critica," or a collection of remarks on various ancient authors, a work esteemed of high value when it appeared, but now antiquated. In 1749 he resigned his school, and died in 1766.

DAY, THOMAS, an English writer, was born in 1748, and received his education at the Charterhouse, from whence he was removed to Corpus Christi College, Oxford, after which he entered the Middle Temple, but never followed the law as a profession. His manners were eccentric, and his opinions romantic. He wrote many works, but the only one by which his name will be perpetuated is the "History of Saundford and Merton." Died, 1789.

DE BERNARD, CHARLES, one of the most graceful and lively modern writers of fiction, was born in 1803. His works, "La Femme de Quarante Ans," "Gerfaut," &c., are chiefly illustrative of French domestic life; and some of his most attractive tales appeared in the *feuilleton* of the Journal des Débats. He was of a shy and reserved disposition, and many curious anecdotes are told of his abstraction and absence of mind. Died at Paris, 1850.

DE CANDOLLE. [CANDOLLE.]

tured the *Macedonian*, English frigate, a vessel of inferior class to his own, after an engagement of an hour and a half. In 1815 he endeavoured to elude the vigilance of the British squadron blockading New York, but was captured after a running fight of two hours and a half. He lost his life in a duel with Commodore Barron, in 1820.

DECEBALUS, king of the Dacians, who fought against the Romans in the reign of Domitian. He entered the province of *Moesia*, defeated and slew *Oppius Sabinus*, the Roman commander, and took a number of places. Afterwards he was defeated himself, but still resisted till Domitian agreed to pay him a yearly tribute, which was continued by *Nerva*, but refused by *Trajan*, who subdued *Dacia*, on which *Decebalus* killed himself, A. D. 105.

DECIUS MUS, P., a valiant Roman, who served as military tribune under the consul *Cornelius Cossus*, B. C. 343, and when the army was in danger of being cut off by the *Sannites*, he volunteered his services with his party, and completely routed them. Two years afterwards he was chosen consul with *Manlius Torquatus*, at which time the Romans were at war with the Latins. On this occasion it was agreed between the two consuls, that he whose army first receded from the enemy should devote himself for the good of his country. The division under *Decius* being hard pressed, gave way, on which he stripped himself of his military habit, and, rushing into the midst of the enemy, was slain. The army under *Manlius* then gained a terrible victory, and the body of *Decius* was buried with military honours.

DECIUS MUS, P., the son of the above, was consul four times, and also censor. Being engaged, in his last consulship, B. C. 295, against the Gauls, and victory dubious, he imitated his father by devoting himself, and was slain, after which the Romans defeated the enemy with great slaughter.

DECIUS, Roman emperor, was born in *Pannonia*, and succeeded *Philippus*, whom he defeated, in 249. He distinguished himself by an expedition against the Goths, and by persecuting the Christians. In his march against the Goths he entered a morass, where he and his army perished by the attack of the enemy, in 251.

DECKER, THOMAS, an English dramatist of the 17th century. He was contemporary with *Ben Jonson*, who satirized him in his *Poetaster*, under the name of *Crispinus*, but *Decker* retorted in his *Satyromastix*. He wrote several plays, and contributed portions to many works of other dramatists. *Decker* was also author of a curious work entitled, "Gull's Hornbook."

DEE, JOHN, mathematician and astrologer, was born at London in 1527, and educated at *St John's College*, Cambridge. In the reign of *Mary* he was imprisoned on a suspicion of devoting himself to the "black art," but was in great favour with *Queen Elizabeth*, who is said to have paid him a salary, to have employed him on secret political missions, and to have visited him at *Mortlake*, where he had collected a library. In 1581 he and *Edward Kelly* com-

menced their magical operations, which lasted two years, and in which they were joined by a Polish nobleman called *Laski*, who persuaded them to go to Poland, where they remained some time. The two worthies at length quarrelled, and their adventures abroad made so much noise, that *Dee* thought it prudent to return to England. In 1596 he was made warden of *Manchester College*, and died in 1608. He published several mathematical works in Latin and English, and wrote many more which were never printed.

DEFFAND, MARIE DE VICHY CHAMROUD, Marquise du, who for many years was a conspicuous character among the French literati of the age of *Louis XV.*, was born in 1697. She married early the *Marquis du Deffand*, a man much older than herself, but was soon separated from him, and gave herself up to a life of levity and immorality. Few women possessed more natural talent, and her abode was regarded as the rendezvous of wit and genius; but the laxity of her morals formed a sad contrast to the superiority of her intellectual powers. Among the correspondents of *Madame du Deffand* were *Voltaire*, *D'Alembert*, *Montesquieu*, *Horace Walpole*, &c. Her correspondence throws much light on the times she lived in, and has been several times republished. She lost her sight in her old age, without losing her liveliness. Died, 1780.

DEFOE, DANIEL, a celebrated political and miscellaneous writer, author of "Robinson Crusoe," was born at London in 1663. He took an eager interest in politics, and began his career as author at the age of nineteen. His attempts in business were unsuccessful, and he gave himself up entirely to authorship. As a zealous Whig and Dissenter he was frequently in trouble on account of his writings; and for his clever piece of irony, entitled "The Shortest Way with the Dissenters," the drift of which was mistaken by both Churchmen and Dissenters, he was arrested, set in the pillory, and imprisoned. The book was ordered by the House of Commons to be burnt. It was during his imprisonment that he wrote his "Hymn to the Pillory." Released in 1704, he began the publication of "The Review," which he continued for nine years. He was sent by the government in 1706 to Scotland, to prepare the way for the union. After his return he suffered a second imprisonment on account of some of his political pamphlets. His health being seriously injured by harassing political warfare and persecutions, he found it necessary to choose a less exciting employment for his pen, and during the latter years of his life he published the works of fiction by which he is now best known. "Robinson Crusoe" appeared in 1719, and obtained immediately the popularity which it has never lost. He added a second and a third part to the story. This famous book had been preceded by the "Family Instructor," and "Religious Courtship," and was followed by the "Adventures of Captain Singleton," "Fortunes of Moll Flanders," "History of the Plague," and a host of other works. Defoe took part

in the controversy on Occasional Conformity, and was a warm supporter of the revolution. One of his most successful books was "The True-born Englishman," which appeared in 1701, and procured him an audience of William III. He wrote several books on ghosts and apparitions, and one of them helped to float "Dreilincourt on Death" into public favour. Died at London, 1731. An aged descendant of this active and popular writer was provided for by a public subscription in 1855.

DE LA HECHE, Sir HENRY THOMAS, an eminent geologist, was born in London in 1796, and was educated at the Grammar School of Ottery St Mary, and afterwards at the Royal Military College, then established at Marlborough, and finally at Sandhurst. He entered the army at the age of 18, but very soon afterwards withdrew from the service, and settled in the county of Dorset, in order to give fuller scope to his geological tastes. In 1820, on returning from Italy and Switzerland, he published, in the "Edinburgh Philosophical Journal," a paper on the "Depth and Temperature of the Lake of Geneva;" and in the following year another on the Discovery of a new Fossil Ichthyosaurus in the Bristol Lias. In other papers, published in the interval between this period and 1830, he treated of the stratification of the Dorset and Pembrokeshire coasts, the geology of Jamaica, on valleys, and on the classification of European rocks. His numerous and important contributions to science had given him a European reputation even before he published his "Geological Manual" in 1830, and "The Geological Observer" in 1834. Two years previous to the latter date, Sir Henry arranged with the Government to add geological colourings to maps published by the Ordnance Survey; and, in the course of his subsequent researches, suggested to Mr Spring Rice (Lord Montagu), the expediency of forming a public collection of mineral specimens, and arranging them in a museum for the purpose of public instruction. This museum was first located in a private house near Charing Cross, and after one or two changes was at length permanently established in Jernyn Street, as the Museum of Practical Geology. In 1848 he was knighted, and in 1853 he was elected a member of the Institute of France. Died, 1855.

DELABORDE, JEAN BENJAMIN. [BORDE.]

DELACÉPÈDE, BERNARD GERMAIN ETIENNE DE LAVILLE, a celebrated French naturalist, born in 1756. He held the situation of keeper of the cabinets in the Jardin du Roi at Paris, which he greatly improved; but the events of the revolution interfered with his scientific employments, and he was by no means an inactive spectator of the scene. In 1795 he was appointed professor of zoology at the Museum of Natural History. He was successively secretary and president of the National Assembly, and on the formation of the Institute he was chosen one of the members. Under the régime of Buonaparte he became president of the conservative Sonate, and grand-chancellor of the Legion of Honour; but when, in 1814,

the reverses of the emperor tried the fidelity of his friends, Delacépède appeared to waver. At the restoration of the Bourbons he returned to his studies in natural history, and he died in 1823. His most important works are the "Histoire Naturelle des Quadrupèdes Ovipares et des Serpents," and "Histoire Naturelle des Cétacés."

DELACROIX, EUGÈNE, one of the most celebrated French painters, and head of the romantic school, was born near Paris in 1798. He first studied painting in the school of Guérin, where he had Gériveau and Ary Scheffer for fellow-students. He early distinguished himself by audacious departure from the conventional, classic manner. His first picture was the "Dante and Virgil," and the sensation produced by it was intensified by the "Massacre of Seio," exhibited in the following year, 1823. Delacroix had very delicate health, lived a quiet laborious life, and only left Paris on two occasions, once on a visit to England, in 1826; and again on a visit to Morocco, in 1831. In 1837 he undertook the decoration of the *Salon du Roi* at the Corps Législatif; subsequently the ceiling of the Library; the ceiling of the Apollo Gallery at the Louvre; and the chapel of the Holy Angels in St Sulpice. The last-named work was executed in 1861. Among his separate works, which are very numerous, some of the most celebrated are the "Women of Algiers," "Massacre of the Bishop of Liège," "Entering of the Crusaders into Constantinople," "Wreck of Don Juan," "Medea," and a "Pieta." Delacroix distinguished himself especially as a colourist, by his skill in vast compositions, his fiery passion and imagination. His favourite among the old masters was Paul Veronese, and he confessed the greatest obligations to him. At one period he was employed in making lithographs, and among his drawings are a series of illustrations to "Hamlet," and another series to "Faust." He was admitted to the Legion of Honour in 1831, and to the Institute in 1857. Died at Paris, in August, 1863.

DELABRE, JEAN BAPTISTE JOSEPH, one of the most eminent French astronomers, and a pupil of Lalande, was born at Amiens in 1749. Though he did not commence the study of astronomy till he was 36 years of age, he rapidly acquired fame, and produced numerous works of great value; among which are his "Theoretical and Practical Astronomy," 3 vols. 4to, and a "History of Astronomy," in 5 vols. 4to. Delambre was a member of the Academy of Sciences, and succeeded Lalande as professor at the College of France. He also took part with Méchain in the measurement of a meridian, which occupied them from 1792 till 1798. Died, 1822.

DELANY, PATRICK, a learned divine, was born in Ireland about 1686. He was educated at Trinity College, Dublin, and published, in 1732, "Revelation examined with Candour;" and subsequently "Reflections upon Polygamy," and the "Life of David." Died, 1768.

DELABOCHE, PAUL, one of the greatest French painters, was born at Paris in 1797. He studied landscape-painting for a short

whom he had the honour of giving lessons in that science. Died, 1726.—LOUIS, brother of the preceding, an able astronomer and geographer, made several journeys on the coast of the frozen ocean, to determine the situation of various places in the countries lying nearest to the north pole; after which he traversed Siberia, and in 1741 went alone to Kamtschatka, with the same object, but died the same year.—JOSEPH NICHOLAS, the youngest and most celebrated of the three brothers, was born at Paris, in 1688; visited England, where he formed an acquaintance with Newton and Halley; and in 1726 was appointed astronomer-royal at Petersburg, where he resided twenty-one years, during which he published "Memoirs illustrative of the History of Astronomy," 2 vols. 4to, and an atlas of Russia. On his return to Paris, in 1747, he was appointed professor of mathematics in the Royal College. Died, 1763.

DELSLE DE SALES, whose real name was JEAN BAPTISTE ISOARD, a French miscellaneous writer, was born at Lyons in 1743. He was the author of "La Philosophie de la Nature," which being denounced as immoral and irreligious, he was tried and imprisoned, thereby acquiring a temporary celebrity. He afterwards wrote romances, histories, and other works; was imprisoned during the Reign of Terror; subsequently became a member of the Institute, and died in 1816.

DELOLME, JEAN LOUIS, a native of Geneva, was born in 1740, and bred to the practice of the law; but, taking an active part in the political events of his country, he was obliged to go to England, where he became known by his once celebrated but superficial work on the "Constitution of England." He also wrote a "History of the Flagellants;" and, returning to Switzerland in 1775, died there in 1806.

DELORME, PHILIBERT, French architect, was born at Lyon, about 1518. He studied three years at Rome, and after acquiring some reputation by works in his native city, was called to Paris through the influence of Cardinal Du Bellay, and made almoner to the king. Various works were intrusted to him, and in 1564 he was appointed by Catherine de Medicis one of the architects of the Tuileries. He was assisted in some of his undertakings by his brother, Jean Delorme. He left several treatises on architecture. Died, 1577.

DELUC, JEAN ANDRÉ, geologist and natural philosopher, was born at Geneva in 1727. He was early attracted to the study of geology, and made scientific visits to the Alps and Apennines in company with his brother. About 1771 he settled in England, and was appointed reader to Queen Charlotte. He spent several years subsequently in travels on the continent, made some valuable discoveries in science, improved the barometer, and was admitted to the Royal Society of London and the Institute of France. His works are numerous. The most important are: "Recherches sur les Modifications de l'Atmosphère," "Lettres physiques et morales sur l'Histoire de la Terre et de l'Homme," and "Geological Tra-

vels in the North of Europe and in England." He wrote a Précis of the philosophy of Bacon, and a great number of separate memoirs and dissertations. Died at Windsor, 1817.

DEMARATUS, king of Sparta, who accused Cleomenes before the ephori as the disturber of Greece, for which Cleomenes retorted upon Demaratus the charge of illegitimacy, and having bribed the priests of Delphi, the oracle, when consulted, confirmed the charge. Demaratus then resigned the crown, B. C. 491, entered into the Persian service, and was entertained by Darius and Xerxes.

DEMETRIUS, surnamed POLIORCETES, king of Macedonia, was the son of Antigonus. At the age of twenty-two his father intrusted him with an army against Ptolemy, by whom he was defeated near Gaza. But he soon repaired the loss, and with a fleet of 250 ships sailed to Athens, which he delivered from Demetrius Phalereus. He next took part in the war against Ptolemy, whose fleet he destroyed. In B. C. 305 Demetrius undertook the siege of Rhodes, constructed huge machines for the assault, but after persevering for a year was compelled to relinquish the attempt. He afterwards defeated Cassander at Thermopylae; but was called to aid Antigonus against Seleucus and Lysimachus, in Asia. The two armies met at Ipsus, B. C. 301; and after an obstinate battle, the army of Demetrius was defeated, and his father slain, but he himself fled to Ephesus. He, however, mustered a new army, and in B. C. 295 relieved Athens from the tyranny under which it groaned. He then slew Alexander, the son of Cassander, and seated himself on the throne of Macedonia. At the end of seven years, during which he was constantly at war, he was obliged to quit his dominions and retire into Asia, where he was reduced to great distress, on which he went to the court of Seleucus, his son-in-law; but a difference breaking out between them, war ensued, and Demetrius was defeated. Deserted by his soldiers, he surrendered himself at length to his son-in-law, who exiled him to Pella, in Syria, where he died, B. C. 283.

DEMETRIUS I., king of Syria, surnamed SOTER, was the son of Seleucus Philopator. He was sent hostage to Rome by his father, on whose death Antiochus Epiphanes, and after him his son, Antiochus Eupator, the one the uncle, and the other the cousin of Demetrius, usurped the throne of Syria. He applied to the Roman senate for assistance to recover his rights, but in vain. The Syrians, however, recognized him for their lawful prince, and at last he obtained the throne, B. C. 162. He then declared war against the Jews, and in this war Judas Maccabæus lost his life, bravely fighting for the liberties of his country. A confederacy of the neighbouring kings was formed against Demetrius, who was slain B. C. 150.

DEMETRIUS II., called NICATOR (conqueror), was the son of the preceding. Ptolemy Philometor, king of Egypt, placed him on the throne of his father, after expelling the usurper, Alexander Balas, B. C. 146. He married Cleopatra, the wife of the same Alexander, and daughter of Ptolemy. He

NICATOR (con- preceding. Pto- ypt, placed him after expelling s, B. C. 146. His e of the same Ptolemy. He

was subsequently taken prisoner by the king of Parthia, who gave him his daughter in marriage, which so incensed Cleopatra, that she married Antiochus Sidetes, her brother-in-law. Sidetes, however, fell in battle, and Demetrius recovered his throne; but he did not retain it long, for he was once more expelled by Alexander Zebina, and was killed by the governor of Iyrr, B. C. 125.

DEMETRIUS PHALEREUS, a celebrated Greek orator and statesman, born B. C. 345. He favoured the Macedonian party, and held the office of governor of Athens under Cas-sander for ten years. The Athenians were so charmed with his eloquence and his excellent administration, as to erect 360 statues to his honour. His government terminated in B. C. 307, when Demetrius Poliorcetes restored the democratic form, and the Macedonian representative retired to the court of Ptolemy Lagus, king of Egypt, whose son banished him from his dominions. Demetrius is said to have died by the bite of an asp, about 283 B. C. He wrote many works which are lost, and is said to have done much towards founding the library of Alexandria.

DEMETRIUS, czar of Russia, commonly called the *false* DEMETRIUS, was, according to most historians, a native of Jarowslaw, and a novice in a monastery, where he was tutored by a monk to personate Demetrius, son of the Czar John Basilowitz, who had been murdered by Boris Gudenow. Having learnt his tale he went into Lithuania, embraced the Roman Catholic religion, and married the daughter of the palatine Sandomir. In 1604 Demetrius entered Russia at the head of a small army, was joined by a number of Russians and Cossacks, and defeated an army sent against him. On the death of Boris, the people strangled his son, and placed Demetrius on the throne; but his partiality to the Poles, and contempt of the Greek religion, occasioned an insurrection, and he was assassinated in 1606, after reigning about 11 months.

DEMOCEDES, a Greek physician, who with his family became captives to the Persians, B. C. 522, and were carried to Susa, where he worked with the slaves. But happening to cure Darius, he was liberally rewarded, and admitted to the royal table. He returned to his own country, and married the daughter of the wrestler Milo.

DEMOCRITUS, one of the most celebrated Greek philosophers, was born at Abdera, B. C. 460. Xerxes was once entertained in his father's house, and is said to have left several magi there to be his teachers. On the death of his father, who was a wealthy citizen, Democritus traveled to Egypt, Chaldaea, and other countries, for the sake of enlarging his stores of knowledge; and when he returned to his native city, though at first slighted, his intellectual acquisitions gained the highest respect of his countrymen. He had spent his inheritance in his travels, but instead of seeking public employment and honours, he retired to solitude, devoting himself wholly to philosophical studies. In his system he developed still farther the atomical theory of his master Leucippus, and applied it not only to the formation of

the universe, but to the soul of man, the senses, the elements, &c. He was also a practical philosopher and a moralist, his grand axiom being, that the greatest good consists in a tranquil mind. He has been called the "laughing philosopher" (in contrast to the weeping Heraclitus), which epithet probably originated in his practice of humorously exposing the absurdities of his countrymen, whose stupidity was proverbial. He wrote numerous works, but none of them are extant; and he lived to the great age of 105.

DEMOIVRE, ABRAHAM, born at Vitri, in Champagne, in 1677, was driven from his native country by the revocation of the edict of Nantes, and settled in England, where he obtained a livelihood by his skill in teaching the mathematics. He was undoubtedly one of the first calculators that ever existed; and published "The Doctrine of Chances," "Miscellanea Analytica," &c. Died, 1754.

DEMOSTHENES, the greatest orator of antiquity, was the son of an opulent sword-blade manufacturer at Athens, and was born about 385 B. C. Having lost his father when a mere child, his education was neglected; but at the age of 17 he determined to study eloquence, though his lungs were weak, his pronunciation inarticulate, and his gestures awkward. These impediments he conquered by perseverance, till by degrees he surpassed all other orators in the power and grace of eloquence. When the encroachments of Philip of Macedonia alarmed the Greek states, he depicted his ambitious design with so much effect, that similar orations are to this day called Philipics. When that monarch was about to invade Attica, Demosthenes was sent as ambassador to prevail on the Boeotians to assist them, in which mission he succeeded. He was also at the battle of Chæronea, but his conduct there showed that he was as deficient in personal courage as he was inimitable in the senate. The influence of Demosthenes being on the decline, Aeschines took advantage of it to bring an accusation against him on the subject of his conduct at Chæronea, and his having had a crown of gold awarded him; but the orator so well defended himself in his celebrated oration *De Corona*, that he was honourably acquitted, and his adversary sent into exile. Shortly after, however, Demosthenes was convicted of receiving a golden cup and 20 talents from Harpalus, one of Alexander's generals, who had retired to Athens with a quantity of plunder, which he had gathered in Asia. To avoid punishment, he fled to Ægina, where he remained till the death of Alexander, when he was recalled by his countrymen, and brought home in triumph. But this change of fortune was of short duration. The victory of Antipater was followed by an order to the Athenians to deliver up Demosthenes, who fled to the temple of Neptune, at Calauria, where he poisoned himself, B. C. 322. The speeches of Demosthenes were natural, concise, vigorous, and logical: he was by turns calm, vehement, or elevated, as the case required; in energy and power of persuasion, in beauty and

vigour of expression, and language at once strong and melodious, he surpassed all his predecessors.

DEMOSTHENES, an Athenian general, who commanded several expeditions during the Peloponnesian war. His most famous exploit was the fortification and defence of Pylus, B. C. 425. He assisted Cleon in the attack on the Spartans in Sphacteria. In 413 he commanded the reinforcements sent to Nicias in Sicily; planned the night attack on Epipolæ; but was defeated and afterwards put to death by the Syracusans.

DEMOUSTIER, CHARLES ALBERT, a French dramatist, descended by the father's side from Racine, and by the mother's from La Fontaine. He was born in 1760, and died in 1801. Among his works are "Le Siège de Cythère," a poem, and many successful comedies.

DEMPSTER, THOMAS, a learned Scotch writer, was born in 1579, and studied at Cambridge, from whence he removed to Paris. He led a very restless life, teaching in succession at Paris, Toulouse, Nîmes, and Pisa, and died at Bologna in 1625. He wrote several works, the most important of which are his "Etruria Regalis," not published till 1723; and his "Historia Ecclesiastica Gentis Scotorum." The latter was republished in 1828.

DENHAM, Lieut.-col. DIXON, an enterprising traveller and intrepid soldier, was born in 1786, and entered the army as a volunteer in 1811, serving with honour in the Peninsular war, where he obtained a lieutenancy. In 1821 he was chosen to proceed to Central Africa, in company with Captain Clapperton and Dr Oudney, for the purpose of exploring those regions; his courage, perseverance, address, and conciliatory manners peculiarly fitting him for such an undertaking. On his return to England, in 1824, he published a "Narrative" of his travels. In 1826 he was sent to Sierra Leone as superintendent of the liberated Africans, and in 1828 was appointed lieutenant-governor of the colony; soon after which he was seized with a fever, which quickly proved fatal.

DENHAM, Sir JOHN, an English poet, was born in 1615, at Dublin, where his father was chief baron of the exchequer, but afterwards became a judge in England. In 1641 appeared his tragedy of "The Sophy," and soon after he was made governor of Fareham Castle for the king. In 1643 he published his "Cooper's Hill." He attended Charles II. in his exile, and was sent by him ambassador to Poland. At the restoration he was knighted and appointed surveyor-general of the royal buildings. Died, 1668.

DENINA, CARLO GIOVANNI MARIA, an Italian historian, was born in 1731, at Revello, in Piedmont. For many years he was professor of rhetoric at Turin, and ultimately became librarian to Napoleon. His principal works are "History of the Revolutions of Italy," "The Revolutions of Germany," "The Progress of Literature," &c. He died at Paris, in 1813.

DENMAN, THOMAS, Right Hon. Lord, the son of Dr Thomas Denman, a physician of some eminence in the metropolis, was born in London in 1779. At an early age he was

sent to Palgrave School, near Diss, in Norfolk, which was then under the management of Mr and Mrs Barbauld. He completed his education at St John's College, Cambridge, where he obtained the degree of M.A. In 1806 he was called to the bar at Lincoln's Inn, and engaged in the active pursuit of the law. He entered parliament for the borough of Wareham at the general election of 1818, and at once took his seat with the Whig opposition. In the following year he was elected for Nottingham, for which place he continued to sit, until his promotion to the bench in 1832.

His first speech in parliament was in favour of certain reforms in the law, but it was not until 1820 that the extraordinary occasion of the queen's trial called forth all his energy, and placed him in a more conspicuous position before the country. When Queen Caroline formed the determination of coming to this country upon the accession of her husband to the throne, Mr Brougham at once accepted the office of her Majesty's attorney-general, while that of solicitor-general was filled by Mr Denman. The part taken by Mr Denman in that memorable trial gave the public a high idea of his courage and uprightness, and contributed in no slight degree to its successful result. Mr Denman was appointed to the office of common sergeant by the corporation of London in 1822, probably as a mark of their sympathy for the legal defenders of the queen, in whose affairs Alderman Wood had taken so active a part. It was not until 1828, when Lord Lyndhurst first held the great seal, that the king was induced to grant the patent of precedence to which Mr Denham had long been entitled. In 1830, upon the formation of Lord Grey's government, Sir Thomas Denman was raised to the post of attorney-general, which he held during the debates on the Reform Bill. In 1832, however, upon the death of Lord Tenterden, he was appointed to the chief-justiceship of the court of Queen's Bench, which he held till 1850, having been raised to the peerage in 1834. While not reckoned very eminent in the technical scholarship of his profession, and possessed perhaps of too much fervour of temperament for strictly judicial functions, his abilities, industry, and conscientiousness made him respected, while the dignity and grace which so remarkably adorned both mind and demeanour made him beloved. As a politician, his life from his youth upwards was beyond impeachment, and almost beyond parallel, for purity, courage, and consistency. Died, 1854.

DENMAN, Dr THOMAS, an eminent physician and medical writer, was born at Bake-well, Derbyshire, in 1738. He first served in the navy as a surgeon, and having obtained much experience, on quitting it he commenced practice in London, where he attained great professional celebrity. In 1770 he commenced giving lectures on the obstetric art, and was appointed licentiate in midwifery of the College of Physicians in 1783. He wrote an "Essay on Puerperal Fever," an "Introduction to the Practice of Midwifery," and "Aphorisms" for the use of junior practitioners. His son was the

DENNIS, JOHN, dramatist and critic, was born in London, in 1657, studied at Cambridge, and devoted himself to literature. Throughout life he was almost perpetually in broils with one or other of the wits of the age; and Pope, in return for his animadversions, gave him a conspicuous place in the Dunciad. He originally had a considerable fortune; but having dissipated it, the duke of Marlborough obtained for him the place of land-waiter at the Custom House; this he mortgaged, and his latter days were spent in poverty, aggravated by blindness. Died, 1734.

DENON, DOMINIQUE VIVANT, Baron, was born, in 1747, at Chalons-sur-Saone, in Burgundy. Though originally destined for the law, he was appointed to the office of "*gentilhomme ordinaire*" about the person of Louis XV. He afterwards resided several years in Italy, as secretary of embassy, during which period he applied himself sedulously to the study of the arts. He was so fortunate as to pass through the Reign of Terror without incurring the displeasure of the ephemeral rulers; and having attracted the notice of Buonaparte, he accompanied him to Egypt in 1798, alternately wielding the pen, the pencil, and the sword. On returning to Paris he was appointed director-general of the museums, and had the superintendence of the medallie mint, and all works of art executed in honour of the French victories. After the abdication of the emperor he retained his office, but was deprived of it in 1815, in consequence of having joined him on his return from Elba. He was a man of great and varied talents; and his able work, entitled "*Travels in Upper and Lower Egypt during the Campaign of General Buonaparte*," has gained him an imperishable fame. His "*Monuments of the Arts of Design*," left unfinished at his death, was published in 1829. Died at Paris, 1825.

D'EON, the Chevalier. EON DE BEAUMONT, CHARLES GENEVIEVE LOUISE AUGUSTE D', was born at Tonnerre, in 1728, and known until 1777 as the *Chevalier D'Eon*. He was equerry to Louis XV., chevalier, doctor of law, parliamentary advocate, military officer, ambassador, royal censor, &c.; occupying, in short, during his eventful life, the most varied stations with consummate skill, and involving his sex and real character in unparalleled mystery. Sent as envoy on a difficult mission to the Russian court, his insinuating manners gained him the favour of the Empress Elizabeth, and for five years he was the medium of a secret correspondence between her and the king of France. In consequence of these services, he was made captain of dragoons, and received a pension of 2400 livres. He returned to France in 1758, and subsequently distinguished himself in the military service. After the conclusion of peace, he went to London as secretary of legation, under the duke of Nivernois, and obtained possession of some important papers. On the return of the duke, he remained as resident, and afterwards as minister plenipotentiary, but was finally dismissed from his employment,

and lived 14 years at London in a kind of exile. During this period, suspicions arose as to his sex, which led to several extraordinary wagers. In July, 1777, a curious trial took place before Lord Chief-Justice Mansfield, on an action brought against Mr Jaques, a broker, who had received several premiums of 15 guineas, to return 100, whenever it should be proved that the chevalier was a woman. By the evidence of Louis Legoux and M. de Morande this fact was supposed to be so well established, that Hayes, the plaintiff, obtained a verdict, but it was afterwards set aside on the ground of the illegality of the wager. D'Eon after this put on female attire, and returned to France; but on the commencement of the revolution, which deprived him of his pension, he returned to England. Being reduced to poverty, he supported himself for some time by giving lessons in fencing, and by publicly exhibiting his skill in that art in the principal towns in the kingdom. When age had enfeebled him, and the notoriety of his character had abated, he depended in a great measure for sustenance on the aid of his friends. Among these was Elisee, first surgeon of Louis XVIII., who kindly assisted him till his death, in London, in 1810, and attended the dissection of his body. The account of this witness, with other undeniable evidence, leaves it beyond doubt that D'Eon was of the male sex. What the reasons were that could induce the chevalier, who was undoubtedly a brave soldier and an able diplomatist, to assume female attire, and to join in the deception when there was no *apparent* reason for it, remain undiscovered; but they were probably of a political nature, and might have been suggested by the policy of the French court to attain some particular object. That D'Eon was a man of talent is sufficiently evident by his works, which appeared under the title of "*Loisirs du Chevalier D'Eon*," in 13 vols. 8vo.

DEPPING, GEORGE BERNARD, historical and miscellaneous writer, was born at Munster, in 1784. About the age of 20, he settled at Paris, and spent his life in the pursuits of literature. Among his works are "*Histoire de la Normandie*," "*Histoire du Commerce entre le Levant et l'Europe*," "*Les Juifs dans le Moyen Age*," &c. Died, 1853.

DE QUINCEY, THOMAS, born in 1785, was educated at the Manchester Grammar School and the University of Oxford. In early youth he became an opium-eater, and by this habit ruined his fortune and impaired an intellect which would, in all probability, have secured for him a more solid and enviable reputation than that which he has achieved by desultory contributions to periodical literature. He became the friend of Coleridge, Wordsworth, and Southey, and after leaving Oxford lived for many years at the Lakes. From straitened circumstances he began, when about forty years of age, to contribute to the "*London Magazine*" his "*Confessions of an Opium-eater*," a work remarkable for exuberant although ill-regulated imagination, and still more so for an excessive self-contemplation and minute analysis of his own mental condition and feelings,—characteristics clearly trace-

able to the habit in which he indulged. He continued thenceforth to work at a great variety of subjects; and although his peculiar habits of thought may deprive them of any wide and general interest, to those who can relish his original thought, his genuine wit, and his musically wild discourse, his remains will seem a real addition to the permanent treasures of our literature. In 1832 he went to Scotland, and there lived, not only admired but esteemed by the few who were admitted to his society, till his death, which took place at Edinburgh, December 8, 1859. There is a new complete edition of his works in 15 vols. 8vo.

DERBY, JAMES STANLEY, Earl of, a gallant English nobleman, who in the action at Wigan, in Lancashire, with 600 horse bravely withstood a body of 3000 horse and foot, commanded by Colonel Lilburne. He was taken prisoner at the battle of Worcester, and beheaded, in violation of a promise of quarter which had been given him, in 1651.

DERHAM, WILLIAM, divine and natural philosopher, was born in Worcestershire, in 1657. He studied at Oxford, and became rector of Uppingham, in Essex. He was appointed Boyle lecturer in 1711 and 1712, was subsequently canon of Windsor, and F.R.S. His principal works are entitled "Physico-Theology" and "Astro-Theology," and are attempts to prove the existence, power, and wisdom of God from his works. Derham also wrote "The Artificial Clockmaker," and a great number of memoirs contributed to the "Philosophical Transactions." Died, 1735.

DERMODY, THOMAS, poet, was the son of a schoolmaster, and born at Ennis, Ireland, in 1775. He obtained through Earl Moira a commission in the army; but so confirmed were his habits of intemperance, that he died, a victim to disease, in 1802. His poems, which were written under the pressure of necessity, and often in great haste, possess considerable merit.

DERRICK, SAMUEL, a native of Ireland, who, on the death of Beau Nash, was appointed master of the ceremonies at Bath and Tunbridge Wells. On coming to London he attempted the stage; but being unsuccessful as an actor, he had recourse to his pen. He wrote several books of little value. Born, 1724; died, 1769.

DERSCHAWIN, or DERZHAVINE, GABRIEL ROMANOVICH, a Russian poet and statesman, was born at Cusan, in 1743. In 1760 he entered the army as a common soldier, but soon distinguished himself; and, after a military service of 24 years, entered the civil service, in which he arrived at the important situations of treasurer of the empire and minister of justice. He holds a high place among the poets of his country. Died, 1819.

DERYCK, or DERICK, PETER CORNELIUS, a painter of Delft, born in 1568, and died in 1630. He excelled in landscape and portrait painting.

DESAGULIERS, JEAN THÉOPHILE, an ingenious natural philosopher, was born in 1683 at Rochelle, and educated at Oxford, where he succeeded Dr Keil as a lecturer in

experimental philosophy. He published a "Course of Experimental Philosophy," &c. He was a useful member of the Royal Society, and contributed several papers to their Transactions. Died, 1749.

DESAIX DE VOYGOUX, LOUIS CHARLES ANTOINE, a French general, was born in 1768. In the early part of the revolution he became aide-de-camp to General Victor de Broglie; and aided greatly, by his talents, the famous retreat of Moreau. In the battle of Kastadt he commanded the left wing, and forced the Archduke Charles to retire. He afterwards defended the fort of Kehl for 6 months with great bravery, and was wounded. He accompanied Buonaparte to Egypt in 1798, was appointed governor of the upper part of the country, and signed the treaty of El-Arish, with the Turks and English. He was killed at the battle of Marengo, to which victory he greatly contributed, June 14, 1800.

DESCARTES, RENÉ, a celebrated French philosopher, was born at La Haye, in Touraine, in 1596, and received his education at the Jesuits College at La Flèche. On leaving that seminary he removed to Paris, and applied to the study of mathematics. In 1616 he entered into the army of the prince of Orange; and, while serving in the garrison at Breda, solved a difficult mathematical problem which had been posted in the public streets. This introduced him to the acquaintance of the learned Beckmann, the principal of the college of Dort. While at Breda, he wrote, in Latin, a treatise on music, and projected some other works. He next served in the army of the duke of Bavaria, but soon after quitted the military life that he might give himself wholly up to science and philosophy. He visited the principal countries of Europe, and in 1629 settled at Amsterdam; removing, however, to other towns of Holland in succession, the better to insure privacy. During the twenty years thus spent he published his various works, obtaining immense reputation as a philosopher, and at the same time encountering violent opposition, especially from the side of theology. Rome and Geneva were at one in persecuting the new thinker. His works were condemned, he was prohibited from public teaching, and his life was scarcely safe. At the invitation of Christina, queen of Sweden, he went to Stockholm, where he died in 1650. His principal works are "Principia Philosophiæ," "Discours de la Méthode pour bien conduire la Raison et chercher la Vérité dans les Sciences," &c. The philosophy of Descartes forms one of the great landmarks in the history of free thought. It gave the death-blow to scholasticism, raised a stout opposition to the merely experimental method, and infused a new life and vigour into the sphere of thought and speculative research. Descartes, starting from doubt, finds the first certainty in self-consciousness: *Cogito*. On this he attempts to found and build up a system capable of demonstration. His system, as vehemently opposed by some as it has been eagerly embraced by others, has formed the starting-point for most of the systems that have subsequently appeared.

ch philosopher

of the 18th century, was born at Rennes, 10 January, 1716. He entered the Benedictine order, became purveyor of the convent of Montreuil-Bellay, near Saumur, and died there, 19th April, 1774. He was the correspondent of Voltaire, Rousseau, D'Alembert, and other philosophers of his time, and wrote an Essay against the "Système de la Nature" of Baron d'Holbach, and some Letters on the Spirit of the Age, published at London, in 1769. But his name soon fell into oblivion, and only after three-quarters of a century has been brought to light, in connection with a startling literary discovery. It is now ascertained (1865) that Dom Deschamps was the author of a treatise entitled "La Vérité, ou le Vrai Système," which has remained in manuscript in the public library of Poitiers since the year 1817, when it was acquired from the heirs of Dom Mazet, first keeper of the library after the revolution. In this treatise is contained a system of philosophy in almost all respects identical with the system of Hegel, anticipating all the leading ideas and principles and deductions and distinctions supposed to have been first developed by Hegel. A short analysis of this remarkable work has just been published under the title of "Antécédents de l'Hégélianisme dans la Philosophie Française," by Professor Beausire of Poitiers.

DESEZE, RAYMOND, or ROMAIN, a native of Bourdeaux, and an able counsellor of the parliament of that city, was born in 1750. He afterwards practised at Paris, and his acknowledged talents caused him to be named one of the counsel for the unfortunate Louis XVI., whose cause he most ably defended, after Turgot had declined the dangerous task. He was imprisoned for a time, but escaped the scaffold; and on recovering his liberty, he was never induced to serve the Directory, the Consulate, or the Imperial Government. On the return of the Bourbons he received, as the only survivor of the three selected by Louis for his counsel, the grateful notice of Louis XVIII. for his devotedness to his royal and unfortunate predecessor. He held several distinguished offices; was a peer of France, a knight of the order of Malta, a member of the French Academy, and president of the Court of Repeal. Died, 1828.

DESGODETS, ANTOINE, a French architect, was born in Paris, in 1653. On his passage to Rome, in 1674, he was taken by the Algerines, and kept in slavery 16 months. On being exchanged he repaired to Rome, where he composed a work, entitled "The Ancient Edifices of Rome;" and, on his return to Paris, he was made comptroller of the royal buildings, and architect to the king. Died, 1728.

DESHOULIERES, ANTOINETTE DU LIGIER, a handsome, witty, and accomplished Frenchwoman, and a writer of much versatility, was born at Paris, in 1634; married a gentleman of family, and was introduced at the court of Louis XIV. in 1657, where she attracted much attention, and lived on terms of friendship with the principal literati of the age. She produced numerous plays and operas, few of which were successful; but her "Idyls" are still admired. She died,

after 12 years of suffering, of a cancer in her breast, in 1694.

DESIDERIUS, or DIDIER, the last king of Lombardy, was duke of Istria, and succeeded Astolphus in 756. His daughters were married to the two sons of Pepin, king of France, Carloman and Charlemagne. The latter soon repudiated his wife, and, at the request of Pope Adrian, invaded Italy in 773, dethroned Desiderius, and sent him to end his days in the monastery of Corbie.

DESMOULINS, CAMILLE, one of the leaders in the French revolution, was born at Guise, in Picardy, in 1762. He was a fellow-student with Robespierre at the college of Louis le Grand, became an advocate at Paris, and distinguished himself as an enthusiastic political reformer. He had a stutter in his speech, which, however, sometimes disappeared in his passionate addresses to the people. On the 12th July, 1789, he made a very exciting harangue on the dismissal of Necker, and bade the people arm. This was the beginning of the revolt, which in two days became "Siege of the Bastille." Camille assumed the grotesque title of "attorney-general of the lamp-iron," and published, among other things, "Les Révolutions de France et de Brabant." He took part in the attack on the Tuileries, on the 10th August, 1792. As deputy to the Convention, he co-operated with his school-friend, Robespierre, and promoted the fall of the Girondists. He would fain have checked the excesses of the revolution, and made the attempt with Danton and others. For the same purpose he published his "Vieux Cordelier;" but Robespierre gave him up to the revolutionary tribunal, and they sent him to the Conciergerie, and thence to the guillotine, 5th April, 1794. His young and noble wife, Lucile, hovered about the prison, made vain attempts to save him, and in a few days followed him to the scaffold.

DESPARD, EDWARD MARCUS, an officer in the British army, was a native of Queen's County, in Ireland. At the close of the American war he served in the West Indies, where he distinguished himself by an expedition on the Spanish main. For his services there he was made lieutenant-colonel, and in 1784 appointed superintendent of the English affairs at Honduras; but his conduct giving offence to the settlers, complaints were sent home against him, and he was suspended. He applied to government for an investigation of his conduct, which was rejected, as were also his claims. This naturally irritated him; and conceiving that he was at least entitled to a fair hearing, he became a violent democrat, and for his inflammatory conduct was imprisoned. Nothing being proved against him, he was liberated. In 1802 he headed a conspiracy to murder the king; and it was determined to make the attack when his Majesty went to the parliament house. The plot being discovered, the colonel and several others were taken up, and brought to trial by a special commission, Feb. 5, 1803; when the charge being proved, Despard and seven others were found guilty, and executed.

DESSALINES, JACQUES, originally a slave in St Domingo, but having an oppor-

tunity of showing great courage and talents during the disturbances in that colony, became second in command to Toussaint Louverture; on whose imprisonment he was chosen emperor of Hayti, under the title of Jacques I. This was in 1804; but he retained his imperial dignity only two years, having perished the victim of a conspiracy, provoked by his intolerable cruelties, in 1806.

DESTOUCHES, PHILIPPE NÉRICAULT, an eminent French dramatic writer, was born at Tours in 1680. Being sent to London, in 1717, to assist in the political negotiations then carrying on, he continued there seven years, and married. On his return to France he retired into the country, where he devoted himself to agriculture and the belles lettres. His principal pieces are "Le Philosophe Marié" and "Le Glorieux." Died, 1754.

D'ESTRÉES, GABRIELLE. [GABRIELLE D'ESTRÉES.]

DEVEREUX, ROBERT. [ESSEX, Earl of.]
DEVONSHIRE, DUKE OF. [CAVENDISH, WILLIAM.]

DEVONSHIRE, GEORGIANA CAVENDISH, Duchess of, remarkable for personal graces and mental accomplishments, was the eldest daughter of Earl Spencer; born in 1757, and married to the duke of Devonshire in her 17th year. Her "Passage of Mount St Gothard" bears the impress of a highly cultivated mind. She also had some skill in musical composition, and a taste for the fine arts. Died, 1806.

D'EWES, Sir SIMONDS, antiquary, was born in 1602, and educated at Cambridge, entered parliament in 1640, and was created a baronet in 1641; but on the breaking out of the civil war he espoused the Puritan cause, and died in 1650. He was the author of "The Journals of all the Parliaments during the Reign of Queen Elizabeth." His "Autobiography and Correspondence," first published in 1845, is a curious and interesting record.

DE WINT, PETER, a distinguished artist, whose numerous drawings formed for forty years an attractive feature in the exhibitions of the Old Society of Painters in Water Colours, was born at Stone, in Staffordshire, where his father practised as a physician, 1783. English landscape scenery formed the chief theme for his fertile pencil; and his free and masterly handling of his subjects was only equalled by their truthfulness to nature. Died, 1849.

DE WITT, JOHN, a distinguished Dutch statesman, was born in 1625, at Dort, in Holland. At the age of 23 he published a mathematical work, entitled "The Elements of Curved Lines." In 1650 he was chosen pensionary of his native city; and, after distinguishing himself in public affairs, was elected pensionary of Holland. In that capacity he concluded a peace with Cromwell, one article of which excluded the House of Orange from the stadtholdership. In 1665 war broke out between the Dutch and English, in which the French afterwards joined the former, and in 1667 De Witt sent the fleet under De Ruyter which sailed up the Thames. The peace of Breda was concluded the same year. De Witt

about the same time procured the passing of the perpetual edict for abolishing the office of stadtholder, for which he received public thanks. However, in 1672, when Holland was invaded by the French, and civil dissension overspread the country, both John de Witt and his brother Cornelius were barbarously murdered by the populace, and the stadtholdership was re-established. William, Prince of Orange (afterwards William III. of England), was then called to that post.

DIANA OF POITIERS was born in 1499, and married Louis de Brezé, Count of Maullevrier, at the age of 13. She lost her husband in 1531, and subsequently became mistress to Henry, duke of Orleans, afterwards Henry II. At court she was the rival of the duchess of Étampes, and the hatred of the two for each other gave rise to disgraceful scenes. On the accession of Henry to the throne her influence became paramount, and the great changes then made in the court and in the ministry, the cruel persecutions of the Huguenots, and the train of ills that marked the whole reign, are by some attributed to her influence. In 1548 the king gave her the duchy of Valentinois, and she took the title of duchess. She retained her beauty and her power over the king till his death, retired then to the château of Anet, and died there in 1566.

DIÁZ, BARTOLOMEO, a Portuguese navigator, who, in 1486, with two small vessels, discovered the Cape of Good Hope, which he named the Cape of Tempests. The king, however, changed it to its present name. In 1497 Diaz accompanied Vasco de Gama on his expedition of discovery, and subsequently set out with Cabral for the Indies. He perished by shipwreck in May, 1500.

DIÁZ, JUAN, was a native of Conza, in Spain. He studied at Paris, where he read the works of Luther, and became a Protestant. He then quitted France, and visited Calvin at Geneva; afterwards he went to Strasburg, and lastly to Neuberg, whither he was followed by his brother Alfonso, a zealous Catholic. Alfonso finding his exhortations could not reclaim him, pretended to close his visit and take his departure, but secretly returned at break of day, with a companion, and murdered him with an axe. The assassins were pursued and taken; but as they were about to be brought to trial, Charles V. took the affair into his own hands, and left the murderer unpunished. This horrid deed was perpetrated in 1546. The miserable fratricide afterwards hanged himself.

DIBDIN, CHARLES, dramatist, poet, and actor, but mostly celebrated as a writer of songs and a musical composer, was born at Southampton, in 1745. He was intended for the church, and received his early education at Winchester; but, seduced by his love of music, and relinquishing all thoughts of the clerical profession, he first became a candidate for the situation of organist at a village church in Hampshire, and then took up his abode in London. He made his first appearance as a performer, in 1762, at the Richmond theatre, and two years afterwards appeared on the London boards, as *Ralph*,

in the Maid of the Mill; but he never shone as an actor. He invented a new kind of monodramatic entertainment, consisting of music, songs, and recitations, of which he was the sole author and performer. His sea songs are still popular; some, indeed, are of a very superior character. For a while Dibdin enjoyed a pension of £200 a-year from government, but lost it by a change of the ministry; and so improvident had he been, that in the closing years of his life he would have suffered extreme indigence, had not an annuity been purchased for him by public subscription. Altogether he produced about 1400 songs and 30 dramatic pieces; besides which he wrote "A History of the Stage," his "Professional Life," "A Musical Tour," three novels, &c. He died in 1814.

DIBDIN, THOMAS, dramatic author and song writer, was the eldest son of the above, whose "naval songs" he was engaged in editing at the time of his death. He had Garrick for his godfather; and in 1775, when only four years of age, he appeared on the stage as Cupid, in Shakspeare's "Jubilee," to the Venus of Mrs Siddons. At 16 he was apprenticed to an upholsterer; but born and bred to "the profession," after a few years he quitted the shop, and sought his fortune on the boards of provincial theatres. From that time until 1795 he is said to have performed in every department of the drama, and written more than 1000 songs. He afterwards obtained an engagement at Covent Garden Theatre; and numerous were the operas, farces, and entertainments which were produced by his inventive genius, during half a century. From among them we may select "The Cabinet," "The English Fleet," "Mother Goose" (which yielded more than £20,000 profit to the managers of Covent Garden Theatre), "The High-mettled Racer" (a clear gain to the proprietors of Astley's of £13,000), "The Jew and Docter," "Past Ten o'Clock," &c. But the latter days of his long and active life were uncheered by the result of his previous labours. Died, Sept. 1841.

DIBDIN, THOMAS FROGNALL, D.D., nephew of the celebrated Charles Dibdin, and himself the most zealous bibliographer, and one of the most voluminous writers of his time, was born at Calentta, 1775, and after receiving his education under the care of an uncle at Reading, matriculated at Oxford, as a commoner of St John's College, where his taste for literature and history commenced. The law being his destination, he became a pupil of Mr Basil Montagu; but he subsequently changed his views, and after waiting some time for a degree, he was ordained a clergyman in 1804. His early preferences consisting chiefly of preacher-ships or lectureships in the metro- polis, he was enabled to prosecute his favourite studies with equal zeal and satisfac- tion; and for nearly thirty years the press may be said to have teemed with the works that emanated from his fertile and versatile pen. A bare list of these would inconveni- ently crowd our columns; but we must make room for the "Bibliomania," which was published in 1809, and at once estab- lished the author's fame in this peculiar de-

partment; the "Bibliographical Decamer- on," published in 1817; a "Bibliographical, Antiquarian, and Picturesque Tour," the result of a continental sojourn, in 1818; "Reminiscences of a Literary Life," in 1836; a "Northern Tour," in 1838, besides various sermons and innumerable other works on literary, bibliographical, and kindred topics. Dr Dibdin was one of the founders of the Roxburghe Club, founded in 1812. In 1823 he obtained, through Earl Spencer, whose friendship he enjoyed through life, and in whose magnificent library he could at ease pursue his favourite studies, the vicarage of Exning, near Newmarket; and in 1824 he was presented to the rectory of St Mary's, Bryanstone Square, which he held till his death, Nov. 18, 1847.

DICK, Major-general Sir ROBERT HENRY, was the son of Dr Dick, of Tullimet in Northshire. He entered the army as an ensign in the 75th foot, in 1800; and in 1804 obtained a company in the 78th. He accompanied the expedition to Sicily, and was wounded at the battle of Maida; joined Abercromby, and was present at the battle of Alexandria, and was severely wounded at Rosetta. In 1808 he was appointed to the 42nd Highlanders; accompanied the 2nd bat- talion to the Peninsula, and commanded a light battalion at Busaco and Ciudad Rodrigo, and the 1st battalion of the 42nd at the storming of Fort St Michael, and during the siege of Burgos, &c. He served in the campaign of 1815, and was severely wounded at Quatre Bras while commanding the 42nd. On the restoration of peace he retired to his paternal estate at Tullimet; but his wife dying in 1830, retirement had no longer any charms for him, and he again sought the tented field. He obtained an honour- able command in India, and fell in the me- morable victory over the Sikhs at Sohraon, Feb. 10, 1846, while (as the commander-in- chief expressed it) "personally animating, by his dauntless example, the soldiers of her Majesty's 80th regiment in their career of noble daring."

DICK, THOMAS, a Scottish theologian and miscellaneous writer, was born in 1772. He was at one time a minister in the Seces- sion church, but is chiefly known as the writer of several pleasing and popular works on astronomy, with large theological ad- mixture. They are, "Celestial Science;" "The Sidercal Heavens," "The Practical Astronomer," and a "Treatise on the Solar System." His other works bear the high- sounding titles of "The Christian Philoso- pher," "The Philosophy of Religion," &c. Dr Dick received a small pension from the government a short time before his death. Died, 1857.

DICKSONS, Mrs (whose maiden name was Poole), was a celebrated singer, who, though not equal to Mrs Billington, many years sus- tained the same cast of characters at the opera, and was regularly engaged as a prin- cipal vocalist at the oratorios. She was the pupil of Rauzzini, who also taught Brahm; commenced her professional career at Covent Garden, in 1793; and retired from public life, in consequence of long-continued ill- ness, in 1818. Died, 1833.

DICKSON, JAMES, a Scotch divine, but known chiefly as a writer on agriculture, was a native of East Lothian; and died, by a fall from his horse, in 1776. His "Treatise on the Agriculture of the Ancients" was much esteemed, and was translated into French.

DIDEROT, DENIS, principal editor of the French "Encyclopédie," was born at Langres in 1712. With a passion for books and study, he refused to enter the church, and quitted the law, settled at Paris, and devoted himself to literature. After struggling for some years in obscure laborious ways, he attracted public attention by his "Pensées Philosophiques," which appeared in 1746. It was lifted into greater notoriety by the parliament of Paris, which condemned it to be burnt. Three years later he published his "Lettre sur les aveugles, à l'usage de ceux qui voient," for which he was imprisoned at Vincennes. But Diderot is chiefly remembered as the projector of the famous "Encyclopédie." D'Alembert was joint editor with him for a time. The work was in 17 folio volumes, the first of which appeared in 1751, and the rest during the next 14 years. It made a great noise in the world, but did not enrich the projector, who for want of money proposed to sell his library. The Empress Catherine of Russia paid him a high price for it, left it in his own hands, and gave him a salary as librarian. In 1773 he visited St Petersburg, where he had a very flattering reception. On his return he visited Berlin, where Frederick II. received him but coldly. Diderot was a friend of Rousseau, and one of the band of daring doubters who met at the suppers of Baron d'Holbach. He was author of several works besides those mentioned. Died at Paris, 1784.

DIDOT, FRANÇOIS AMBROISE, a celebrated printer, was born at Paris in 1730. He greatly raised the typographic art; improved the construction of paper-mills; and invented many curious and useful machines, useful in the arts of type-founding, stereotyping, and printing. At the age of 73, he read over five times, and carefully corrected, every sheet of the stereotype edition of Montaigne, printed by his sons. Died, 1804.—His brother, PIERRE FRANÇOIS (who died in 1795), as well as his sons and nephew, have each eminently contributed to the improvement of the arts of type-founding and printing. Nor were their abilities entirely confined to the mechanical part. They paid the greatest attention to correctness as well as beauty; and the elder son, PIERRE DIDOT, is known as an excellent classical scholar, and the author of several works, both prose and verse.

DIDOT, FIRMIN, the most celebrated and skilful of modern printers, and son of François Didot (whose editions, especially of classic works, are in request all over Europe), was born in 1764, and was carefully instructed in both the ancient and the modern languages with a view to succeeding his father. Not only, however, did he prove to be in the highest sense of the word "a learned printer," but he also made some most important improvements in the details of the

art, and invented stereotyping. His editions of Sallust, the Lusiad, and the Henriad, are much sought after. He was an excellent translator, and no mean original writer. Died, 1836.

DIEBITSCH, Count SABALKANSKY, a distinguished Russian general, was the son of a brave officer who had served under Frederick the Great, but who afterwards quitted the Prussian service for the Russian, where he obtained an important command. Through his father's influence and his own talents, young Diebitsch rose rapidly in the army. In the campaigns of 1812, 1813, and 1814, he signalized himself by his skill and bravery, and was advanced to the rank of quarter-master-general to the Emperor Alexander. He displayed great courage in the battles of Austerlitz, Eylau, Friedland, and Dresden. He at length became head of the staff; and in 1829 was intrusted by the Emperor Nicholas with the chief command of the Russian army in the expedition against Turkey. For his brilliant services in that campaign he was promoted to the rank of field-marshal, and rewarded with the title of Count Sabalkansky (or *crosser of the Balkan*), the orders of St Andrew and St George, a million of roubles, &c. Possessing the entire confidence of his sovereign, it was natural that, on the breaking out of the Polish insurrection, he should be selected to command the forces sent thither for its suppression; but a variety of unforeseen obstacles presented themselves, and his plans were in a great measure baffled, when the cholera, which had carried off great numbers of his troops, attacked him, and he died in a very few hours after the first symptoms had appeared, June 10, 1831.

DIEFFENBACH, JOHANN FRIEDRICH, one of the most distinguished surgical operators, was born at Königsberg, in 1795. After studying for the church at Greifswald, he took part in the war of liberation of Germany; and it was not till a year or two after the fall of Napoleon in 1815, that he began the study of medicine and surgery, in which he has secured undying fame. His surgical studies being finished at Vienna and Würzburg, he took up his residence at Berlin, where his operative talents soon raised him to distinction, and in 1832 he was appointed to the chair of surgery. In this capacity he published several valuable works; but his chief fame rests on the skill with which he performed the most difficult surgical operations, such as supplying artificial noses, lips, cheeks, and eyelids; and to him also the world is indebted for a new method of curing or removing the most inveterate cases of strabismus or squinting. Died, 1848.

DIEMEN, ANTHONY VAN, governor of the Dutch East India possessions, was born at Kullenberg, of which place his father was a burgomaster. He went to India, where he was employed as accountant to the government. In 1625 he became a member of the supreme council. In 1631 he returned to Holland as commander of the India fleet, but the year following went out again as director-general; and not long after he became governor-general, greatly extending the Dutch interest in the East. In 1642 he

g. His editions of the *Iliad*, are as an excellent original writer.

BALKANSKY, a general, was the son of a general, served under Napoleon, who afterwards became a general for the Russian, and held a command. He and his own regiment were rapidly in the service in 1812, 1813, and by his skill and courage to the rank of major. He served the Emperor in the campaign of 1812, and was promoted to the rank of lieutenant-colonel. He became head of a regiment, and was trusted by the Emperor with the chief command of the expedition to the East. His brilliant services were promoted to the rank of major-general, and he was rewarded with the Order of St. George (or *crosser of St. George*) by the Emperor. He died in 1831.

FRIEDRICH, a German physician, was born at Greifswald, in 1795. He was a student of Gerhart, or two after that he began his study, in which he was successful. His surgical operations at Württemberg, and at Berlin, raised him to the rank of professor, and he was appointed to the capacity of a professor; but his operations, which he performed with his usual surgical skill, and his method of curing various cases of disease, raised him to the rank of professor, in 1848.

governor of the province, was born in 1750. His father was a general, where he held a command. He returned to the service in 1795, and was promoted to the rank of major-general. He was appointed to the command of the India fleet, and was promoted to the rank of major-general. He died in 1842.

sent Abel Tasman on a voyage to the South, the consequence of which was the discovery of that part of New Holland called Van Diemen's Land. He died in 1645.

DIEPENBECK, ABRAHAM VAN, Dutch painter, was born at Bois-le-Duc about 1607. He studied under Rubens at Antwerp, and was one of his most eminent pupils. He visited Italy and England, was made director of the Academy of Antwerp in 1641, excelled as a painter on glass, and designed numerous illustrations for books. Died, 1675.

DIETRICH, JOHANN WILHELM ERNST, an excellent German painter, was born in 1712 at Weimar, where his father was painter to the court, and celebrated for his portraits and battle pieces. After studying under his father, he went to Dresden, and was instructed in landscape painting by Alexander Thiele. He visited Italy in 1743, and in 1763 became professor in the Academy of Dresden, and director of the School of Painting at Meissen. He died in 1774. For versatility and general excellence few have surpassed him.

DIEZ, JUAN MARTIN, better known as the *Empecinado* of modern Spanish guerilla warfare, was the son of a peasant of Valladolid, and born in 1775. He first served in the regular army as a dragoon; but in 1808, with a chosen band of about 50 brave fellows, he commenced that harassing guerilla system, which so much contributed to the disasters of the enemy in the Peninsula; and the value of his services being properly appreciated, he was at length made a brigadier-general of cavalry. When the duke of Wellington entered Madrid in triumph, Diez attended him, and received his commands to join the army at Tortosa, at the head of 5000 men. On the re-establishment of Ferdinand's government, the *Empecinado* became obnoxious to the ruling powers, who, regardless of his former great services, had him seized on a charge of conspiracy, tried, and executed, in 1825.

DIGBY, SIR EVERARD, an English gentleman, who was born of a Roman Catholic family, 1581; was knighted at the accession of James I., and became a party to the Gunpowder Plot, for which he was executed in 1606.

DIGBY, SIR KENELM, son of the preceding, was born at Gouthurst, in Buckinghamshire, in 1603, and educated at Gloucester Hall, Oxford. He was knighted by James I., and by Charles I. he was appointed to several offices. On one occasion, when some difference existed between England and the Venetians, he was sent with a fleet into the Mediterranean, where he attacked the fleet of the republic in the bay of Scanderoon. About 1636 he quitted the church of England for that of Rome. At the commencement of the civil war he was imprisoned by the parliament in Winchester House, but in 1643 he regained his liberty, and went to France. When Cromwell assumed the government, he ventured to visit his native country, and paid great court to the Protector. He wrote a "Treatise on the Nature of Bodies," "On the Operations and Nature of Man's Soul," and "Peripatetic Institutions." His "Pri-

vate Memoirs," edited by Sir Harris Nicolas, first appeared in 1827. Died, 1665.

DIGBY, JOHN, earl of Bristol, born in 1580, was gentleman of the bedchamber to James I., who sent him to Spain to negotiate a marriage between Prince Charles and the Infanta, and the same year he was created earl of Bristol. When the civil wars broke out he emigrated, and died at Paris in 1653.

DIGBY, GEORGE, earl of Bristol, son of the above, was born at Madrid in 1612. He received his education at Oxford, and became a member of the long parliament, wherein he at first opposed the court, but afterwards joined the royal party, and exerted himself in the service of Charles I. He went afterwards to France, whence he was banished for the part he took in the Fronde. He appeared again in England after the restoration, making himself remarkable by eccentric courses. Died, 1676.

DIGGES, THOMAS, an astronomer and mathematician; author of "A new Scale of Mathematics," "Perfect Descriptions of the Celestial Orbs," "An Arithmetical Warlike Treatise, named Stratilicoes," &c. Died, 1595.

DIGGES, SIR DUDLEY, son of the preceding, was born in 1583, and educated at Oxford. He was knighted by James I., who sent him ambassador to Russia; in the parliament of 1621 he sided with the popular party, and so continued to do till 1636, when he was brought over by the grant of the mastership of the rolls. Sir Dudley was one of the members appointed to support the impeachment of Buckingham, for which he, with Sir John Eliot, was committed to the tower. He died in 1639. He wrote "A Defence of Trade," "A Discourse concerning the Rights and Privileges of the Subject," &c. The "Complete Ambassador," containing documents respecting the proposed marriage of Queen Elizabeth to the duke of Anjou, appeared after his death. His son Dudley, who died in 1643, was a loyal and learned man, and wrote some tracts against rebellion.

DILLENIUS, JOHN JAMES, an eminent botanist, was born at Darmstadt, in 1687, and educated at the university of Giessen. In 1721, he accompanied Dr Sherard to England, where he spent the remainder of his days. Soon after his arrival he undertook a new edition of Ray's Synopsis; and was appointed the first botanical professor at Oxford on Sherard's foundation. He wrote "Hortus Elthamensis" and a "History of Mosses." Died, 1747.

DILLON, WENTWORTH, earl of Roscommon, was born in Ireland about 1633, and educated at Caen in Normandy, by the famous Bochart. After dissipating his property by gaming, he was made master of the horse to the duchess of York. He then married a daughter of the earl of Burlington, and applied to poetry. Died, 1684.

DIMSDALE, THOMAS, a physician, who became celebrated by his successful mode of inoculating for the small-pox. In 1768 he went to Russia, and inoculated the Empress Catharine II., and Grand-duke Paul, for which Mr Dimsdale was created a baron of the empire, physician to her Majesty, and

counsellor of state. A gratuity of £12,000 was given him for his journey, and a pension of £500 a year. In 1781 the baron again visited Russia, to inoculate the two sons of the grand-duke. In the year preceding he was elected into parliament for Hertford, and again in 1794, on which he quitted practice. He wrote several tracts on inoculation, in which is an account of his first journey to Russia. Died, 1800.

DINEZ DA CRUZ, ANTONIO, an eminent Portuguese poet, was born in 1730, and died in 1798. As a writer of odes, sonnets, and lyrical pieces, he holds the first rank among his countrymen.

DINOCHIATES, a Macedonian architect, who was employed by Alexander in building the city of Alexandria. He also rebuilt the temple of Ephesus, and proposed to cut Mount Athos into a statue of the Macedonian hero. He died in Egypt, under the reign of Ptolemy Philadelphus.

DIOCLETIANUS, CAIUS VALERIUS, Roman emperor, born in Dalmatia, 245. He entered the Roman army, distinguished himself under several emperors, and was elected emperor by the soldiers on the death of Numerian, 284. Two years later, to strengthen himself against the numerous enemies threatening the empire both in the east and the west, he made Maximian his associate, assigning to him the charge of the west. A further division was afterwards made by the creation of two new Cæsars, Constantius Chlorus and Galerius, four emperors thus reigning at one time. War was almost continually going on, but Diocletian seldom took any personal share in it. In the latter part of his reign he was induced to sanction a cruel persecution of the Christians, whom he had long protected. In 305 Diocletian abdicated the imperial dignity, and retired to his native country, where he died in 313.

DIODATI, JEAN, an eminent Protestant theologian, descended from an Italian family, but born at Geneva, 1576. He became professor of Hebrew there in 1597, and professor of theology in 1609, holding the latter post till 1645. He was a friend of the celebrated Father Paul, and translated into French his great "History of the Council of Trent." He made also French and Italian translations of the Bible, not without encountering opposition. Diodati attended the Synod of Dort in 1618, and took part in drawing up the deliberations of the synod. He published various theological works, among which are his Annotations on the Bible, which were translated into English. Died, 1649.

DIODORUS SICULUS, a native of Agrigium, in Sicily, who wrote a Universal History, in 40 books, of which only 15 books and a few fragments remain. It is a laborious but uncritical compilation of most heterogeneous materials, and occupied him 30 years. It is still valued for the portions which it has preserved to us of many lost works. He flourished about B. C. 50.

DIOGENES, surnamed **THE CYNIC**, was born at Sinope, a city of Pontus, B. C. 412. He accompanied his father to Athens, where he applied to the study of philosophy under Antisthenes, the founder of the cynic school.

He distinguished himself by the excessive austerity and eccentricity of his manners, with which was blended a great knowledge of human nature, and a zeal for the practical good of men, on which account Plato called him the "mad Socrates." Being on a voyage to Ægina, the vessel was taken by pirates, who sold Diogenes to a rich Corinthian citizen named Xenias, who intrusted to him the care of his sons. His famous interview with Alexander took place at Corinth, where, at the age of 90, he died.

DIOGENES LAERTIUS, a Greek historian, was born in Cilicia. He wrote the "Lives of the Philosophers," in 10 books, an immethodical and uncritical work, valuable, as such books often are, for the fragments they contain of earlier writings which have perished. He is supposed to have lived in the second century.

DION, a celebrated patriot of Syracuse, was the disciple and friend of Plato when that philosopher was at the court of Dionysius the elder, whose daughter Arete Dion married. Being accused of treason, he was banished by Dionysius the younger, and went to Athens, where he acquired considerable popularity; which so provoked the tyrant, that he confiscated his estates, and compelled his wife to marry another man. Dion, irritated at this treatment, resolved to attempt the deliverance of his country; and with a small force he landed in Sicily during the absence of Dionysius, and entered Syracuse in triumph. After various successes he perished, the victim of a conspiracy, headed by one Calippus, an Athenian, B. C. 353.

DION CASSIUS, an historian of the third century, born in Bithynia, went to Rome about 180; was appointed in succession to many high offices; was twice consul; and wrote, in Greek, the History of Rome, from the arrival of Æneas in Italy, to A. D. 229. The small portions extant of Dion's work are highly valued.

DION CHRYSOSTOMUS, THE GOLDEN-MOULDED, a celebrated Greek rhetorician, flourished in the first century of the Christian era. He was a native of Prusa, in Bithynia, but lived mostly at Rome. Suspected of conspiracy by Domitian, he took refuge in the country of the Getæ, returning to Rome on the accession of Nerva. He enjoyed the favour both of Nerva and Trajan, and lived to an advanced age. He left about 80 orations or discourses on morals and politics, which are admired for their elegance of style. Died, A. D. 117.

DIONYSIUS I., the elder, tyrant of Syracuse, was born B. C. 430. He served in the war with the Carthaginians, got himself appointed general, and, in 405, sole general and head of the republic. He formed a powerful body-guard, conquered other cities of Sicily, carried on war with the Carthaginians, and after making peace with them in 392, invaded Italy and subdued several of the Greek cities of the south. He was afterwards again at war with Carthage. Dionysius, like some other tyrants, was a patron of literary men and artists; aspired to literary fame, and contended for the prize at the Olympic games. He erected many fine tem-

ples and a rock near Lautumia "Ear of I

DIONYSIUS II., the younger, tyrant of Syracuse, was son of the preceding, and succeeded him, B. C. 367. Idly brought up, he was for a time restrained from excesses by the influence of Dion and Plato. Many other distinguished men visited him or lived at his court. His subsequent treatment of Dion and his family led to his own overthrow in 356. He went to Italy and obtained the chief power at Locri, and after ten years returned and regained his throne at Syracuse. A final end was put to his tyranny by the noble Greek Timoleon, 343, and he spent the rest of his life in exile at Corinth, wallowing in the mire of sensuality and vice.

DIONYSIUS, an ancient geographer, who was called PERIEGETES, from his poem of "Periegesis," or Survey of the World. He lived probably at the beginning of the 4th century.

DIONYSIUS of Halicarnassus, a Greek rhetorician and historian, who settled at Rome about B. C. 29, that he might study the Latin language, and collect materials for the history which he afterwards wrote. Dionysius wrote many rhetorical and critical works, which are of great value, but his principal work, and that by which he is most generally known, is the "Roman Archaeology." It was in 22 books, of which about 11 are extant. In these he dwells at great length on the early history of Rome, but his want of accurate knowledge, the bias under which he wrote, and the rhetorical character of his style, render his history untrustworthy. Died at Rome, B. C. 7.

DIOPHANTUS, a mathematician of Alexandria, to whom is attributed the invention of algebra. It is uncertain at what period he lived.

DIOSCORIDES, PEDANIUS, or PEDACIUS, physician, was born at Anazarba in Cilicia, in the 1st century of the Christian era; and distinguished himself as the author of a work on Materia Medica, in which all the vegetable substances then used as medicines are described or catalogued. This work held its ground as first and sole authority on the subject of which it treats for sixteen hundred years. Its infallibility and completeness being almost as hard to shake and disprove as that of Aristotle or the pope. It was printed by Aldus in 1499.

DIPPEL, JOHANN CONRAD, a German physician and celebrated alchemist, was born at Frankenstein, in Hesse, in 1672. He led a wandering life, made himself obnoxious to various governments, and was often imprisoned. He pretended to have discovered the philosopher's stone, and prophesied that he would not die till 1808. He, however, falsified his prediction, by suddenly departing this life in 1734; and instead of finding the philosopher's stone, he discovered Prussian blue, and the animal oil which bears his name.

DISRAELI, ISAAC, the illustrious author of the "Curiosities of Literature," the "Quarrels" and "Calamities of Authors,"

and "Illustrations of the Literary Character," was born at Enfield, 1767. He was the only child of Benjamin Disraeli, a Venetian merchant; and was originally destined for his father's occupation; but having shown a premature inclination for literature, he was sent first to Amsterdam, and afterwards to Bordeaux, to be initiated into the mysteries of a mercantile life. But all in vain. Rousseau and Voltaire had superseded the ledger in his estimation; and he returned to England with such an antipathy to commerce, that he at length abandoned it altogether; and he thenceforward devoted his long life to literary pursuits. Besides the works above mentioned, he published "Commentaries on the Life and Reign of Charles I.," the "Amenities of Literature," and was for many years a contributor to the Quarterly Review and the Gentleman's Magazine. Mr Disraeli was smitten with blindness in 1839. Few writers have been so much devoted to literature from a pure love of it for its own sake; and many a mind has been excited to literary effort by his graceful and entertaining works. Died, 1848.

DISSEN, GEORGE LUDOLF, German philologist, was born near Göttingen in 1784. He studied at the university of Göttingen, where, after a short residence at Marburg as extraordinary professor of classical philology, he became professor of classical literature. He was a zealous hard-working student and lecturer, but has not written much. He published editions of Pindar, Tibullus, and the oration of Demosthenes "De Corona." A collection of his minor writings was published after his death. Died, 1837.

DITTON, HUMPHRY, a learned mathematician, was born at Salisbury in 1675; became mathematical master of Christ's Hospital, and died in 1715. He wrote several papers in the Philosophical Transactions; but he is best known by a treatise entitled "The Institution of Fluxions." He also wrote a treatise on Perspective, and "General Laws of Nature and Motion."

DOBRÉNTÉI, GABRIEL, Hungarian archaeologist and miscellaneous writer, was born in 1786. After studying at the university of Leipsic, and residing for some time in Transylvania, as private tutor, he settled, in 1820, at Pesth, where his time was divided between literature and the duties of various offices which he held under the government. During the last 30 years of his life he was principally occupied in the preparation of his great work on the "Ancient Monuments of the Magyar Language," the first volume of which appeared in 1825, and which is a standard authority. Dobréntéi was for several years secretary to the Hungarian Academy; he contributed papers to various periodicals, and carried on an extensive correspondence. Died, 1851.

DOBRIZHOFFER, MARTIN, Jesuit missionary, was a native of Styria. He was born in 1717, entered the order at the age of 19, and went to Paraguay in 1749. He laboured there nearly twenty years, and then returned and settled at Vienna. In his old age he wrote in Latin a curious and prolix account of the Abipones, one of the native nations or tribes of Paraguay. It is

full of interest, not without marvel and probable exaggeration. It was translated into German by Krell, and into English by Sara Coleridge. Died, 1791.

DOBROWSKY, JOSEPH, the celebrated Bohemian philologist and antiquary, was born near Raab, in Hungary, in 1753. He entered the order of Jesuits not long before its suppression, and became tutor to the children of Count von Noltitz, whose protection he enjoyed through life. In 1792 he was sent with Count Joachim Sternberg to Sweden, in search of the literary treasures carried off during the Thirty Years' War. He afterwards visited Russia and Italy. During the last thirty years of his life he was subject to periodical fits of mental aberration, but his studies and labours were continued, and procured him a European reputation. He wrote chiefly in German. His principal works are, "Institutiones Linguae Slavicae Dialecti Veteris," a "Bohemian Grammar," "German and Bohemian Dictionary," "History of the Bohemian Language and Literature," &c. He contributed many important papers to the Transactions of the Bohemian Scientific Society, and was a member of numerous academies. He took a prominent and rather passionate part in the controversy respecting the curious literary discoveries of Hauka, and was irritated to find his judgment generally reversed. Died, at Brunn, in 1829.

DOBSON, WILLIAM, an English painter, who succeeded Vandyke as sergeant painter to Charles I., was born in 1610, and died in 1646. He painted several historical pictures, but was chiefly celebrated for his portraits, in which he remained unrivalled till the time of Sir Joshua Reynolds.

DODD, DR WILLIAM, was born in 1729, at Bourne, Lincolnshire; and after being educated at Cambridge, entered into orders, became a popular preacher in London, and was made one of the king's chaplains. But he kept high society, and was extravagant; and finding himself unable to support an expensive establishment, he endeavoured to procure the living of St George's, Hanover Square, by offering a bribe of £3000 to the lady of the lord chancellor. She was, however, indignant at the offer, and on her informing the chancellor, Dodd was struck off the royal list. The earl of Chesterfield, to whom he had been tutor, afterwards presented him with a living; but being pressed for money, he forged a bond for £4200 on his former pupil and patron, probably intending to take it up before it became due; but the fraud was soon discovered, and he was tried, convicted, and executed at Tyburn, in 1777, notwithstanding great interest was used, and the most extraordinary efforts made to obtain his pardon. He was the author of several works; the principal of which are "Sermons," "Poems," "Reflections on Death," and "Thoughts in Prison."

DODDRIDGE, or DODDERIDGE, SIR JOHN, an English judge, and the author of several works on legal science, was born in 1555, at Barnstaple in Devonshire, and educated at Exeter College, Oxford. In 1613 he became one of the judges of the King's Bench, and died in 1628. His chief works are, "The

Lawyer's Light," "The English Lawyer," "The Law of Nobility and Peccage," "The Complete Parson," &c.

DODDRIDGE, PHILIP, a Dissenting divine, was born in the metropolis in 1702. He was successively minister at Kibworth, Market Harborough, and Northampton, and acquired a great and deserved reputation. He established and presided over an academy for the training of young men designed for the ministry. Being afflicted with a pulmonary complaint, he went to Lisbon for the benefit of his health, but died there in 1751. His principal works are, "The Family Expositor," 6 vols. 4to, "The Rise and Progress of Religion in the Soul," which had an immense circulation, and to which John Foster wrote a remarkable Introductory Essay, "The Life of Colonel Gardiner," and "Hymns." Many of Doddridge's "Hymns" are of a far higher order than the majority of those in his day in common use in public worship.

DODINGTON, GEORGE BURB, Lord MELCOMBE REGIS, a statesman, remarkable for political veratility, was born in 1691, in Dorsetshire, and educated at Oxford. In 1715 he came into parliament for Wychelsea; was soon after appointed envoy to Spain; became a lord of the treasury during Walpole's administration; and, after years of political intrigue, in which the most shameless dereliction of principle was manifest, he was made a peer by the title of Lord Melcombe. Though servile as a politician, he was generous, witty, and hospitable in private life; and had the merit of associating with and patronizing men of talent. His celebrated "Diary," published in 1784, is highly interesting, revealing, as it does, much of the art and mystery of statesmanship. Died, 1762.

DODONEUS, the Latinized name of **RAMBERT DODOENS**, a celebrated Dutch physician and botanist, born at Mechlin in 1518. He studied at Louvain and the principal universities of Europe, and settled at Antwerp. In 1572 he became first physician to the Emperor Maximilian II., and held the same office under his son, Rudolph II. Returning to his country, he held the chair of medicine at Leyden from 1582 till his death. Among his works are "Stirpium Historiæ Libri XXX.," "Medicinalium Observations Exempla Rara," &c. Died, 1585.

DODSLEY, ROBERT, miscellaneous writer and bookseller, was born in 1703, at Mansfield, Nottinghamshire. His parents being poor, he was apprenticed to a stocking-weaver, which trade he left and became footman to the Hon. Mrs Lowther. While in this situation he published a volume of poems, entitled "The Muse in Livery," and a dramatic satire, called "The Toyshop," which being patronized by Pope, and successfully brought out on the stage, enabled Dodsley to commence business as a bookseller in Pall Mall. He still continued his literary pursuits, and produced "Cleone," a tragedy, and four light dramas; many poems; "The Economy of Human Life," &c. He also edited and published a "Collection of Old Plays," in 12 vols.; and was the projector of "The Annual Register." After a

prosperous career, he retired from business, and died in 1761.

DODSWORTH, ROGER, an English topographer, was born in Yorkshire, in 1585, and died in 1654. He collected a large mass of materials for an account of the antiquities of his native country. They form 162 folio volumes, which are now in the Bodleian library, Oxford.

DODWELL, HENRY, a learned critic and theologian, was born at Dublin, in 1641, and educated at Trinity College. In 1658 he was appointed Camden professor of history at Oxford, but lost his office soon after the revolution. He wrote several books on Chronology, a volume of Dissertations, "De Veteribus Græcorum Romanorumque Cyclis," his most important work; and a discourse on the Natural Mortality of the Soul, which occasioned a good deal of offence, on account of a ridiculous speculation on the power of the bishops to confer immortality. Died, 1711.—His sons, **HENRY** and **WILLIAM**, were also both distinguished by their writings; the former, who was bred to the law, by his scepticism; the latter, who was a prebendary of Salisbury, by his orthodoxy.

DODWELL, EDWARD, classical antiquary and topographer, born about 1767. He studied at Cambridge, and spent the greater part of his life in travels and researches in Greece and Italy. The fruits of his labours appeared in the following works: "A Classical and Topographical Tour through Greece," "Views in Greece," and "Views and Descriptions of Cyclopiam or Pelagic Remains in Greece and Italy." These views are from original drawings and sketches by himself. Died at Rome, 1832.

DOEDERLEIN, JOHANN CHRISTOPH, a learned Lutheran divine, professor of theology in the university of Jena. He was the author of several works illustrative of the sacred writings, and enjoyed a high reputation for biblical knowledge. Died, 1792.

DOES, JACOB VAN DER, a Dutch painter, born in 1623, and died in 1673; he studied at Rome, and adopted the style of Bamboccio.—His sons, **JACOB** and **SIMON**, were both good artists; the former, celebrated for his historical pieces, died in 1691; the latter, who excelled in landscapes and cattle, died in 1717.

DOES, JAN VANDER. [DOUSA.]
DOGGETT, THOMAS, an actor and dramatic poet, was a distinguished comic performer at Drury Lane, of which house he was joint-manager. He is now remembered for the legacy he left to provide a "coat and badge," which is rowed for annually on the 1st of August, from London Bridge to Chelsea, by six watermen. Died, 1721.

DOLABELLA, PUBLIUS CORNELIUS, a prodigate Roman of a patrician family, and son-in-law of Cicero, whose daughter Tullia he married, B. C. 51. He joined the party of Cæsar, served under him at the battle of Pharsalia and on other occasions, and was made consul, 44. After the death of Cæsar he had Syria for his province, took Smyrna by stratagem, and put to death the proconsul Trebonius. On the motion of Cicero he was declared a public enemy, and being be-

sieged in Laodicea by Cassius, killed himself, B. C. 43.

DOLCE, LUIGI, a Venetian miscellaneous writer, was born in 1508. He translated into Italian great portions of Horace, Ovid, Seneca, Euripides, &c. He also wrote a Life of Charles V. Died, 1568.

DOLCI, CARLO, a celebrated painter, born at Florence, in 1616. He was a pupil of Jacopo Vignoli, and being of a very religious turn, he limited himself in painting to sacred subjects. He had no strength of character, but was excessively timid and satisfied to be priest-ridden. For grace, tenderness, and finish, his heads of Madonnas, Magdalens, and saints are imitable. Died, 1686.

DOLCINO (DULCINUS), of Novara, a celebrated heresiarch and martyr of the 11th century. Born near Novara, he became the disciple and successor of Gerlard Sagarelle, as head of the Apostolic Brethren. With the courage of a soldier and the earnestness of a prophet he preached and taught, and attracted numerous followers. In 1304 they appear as a regular community in Piedmont. They were orthodox in doctrine, but severely denounced the hierarchy of the church. The Inquisition assailed them, and the little society became an army. A papal bull was published, and a mighty league formed against them. Dolcino occupied a strong but desolate position on Monte Calvo, and, after many deadly combats, on Mount Zerbale. Famine joined its awful forces to those of their enemies, and after two years of heroic endurance they were conquered and most of them massacred. Dolcino and Margarita, the sister whom he had chosen according to the custom of the sect, were burnt with horrid deliberate tortures at Vereelli, in 1307. There is a recent account of Fra Dolcino and his times, by L. Mariotti.

DOLGORUCKI, JOHN MICHAELOVICH, a Russian noble, who greatly distinguished himself in several campaigns against the Turks and Swedes, was born in 1764, and died in 1824. Latterly he held several high offices, and he was also known as a poet.

DOLGORUCKI, VASSILI VLADIMIROVICH, Russian diplomatist and field-marshal, was born in 1667. He entered the army, and was employed by Peter the Great on diplomatic missions to Poland, France, Germany, and Holland, but in 1718 he was disgraced and imprisoned. Recalled by Catherine I., he conducted an expedition against Persia, was made field-marshal and member of the council of war by Peter II., suffered a second imprisonment, was again restored by Elizabeth in 1741, and made president of the council of war. Died, 1746.

DOLLOND, GEORGE, F.R.S., &c., the celebrated mathematical-instrument maker, was born in London, 1774. Having lost his father when very young, his education devolved upon his maternal uncle, Peter Dollond, then carrying on the business in St Paul's Churchyard, to which the nephew ultimately succeeded (on which he took the name of Dollond, his father's name being Huggins). In 1787 he was sent to the manufactory of Mr Fairbone, to learn the trade of a mathematical-instrument maker, and in March, 1788, commenced an apprenticeship to the

business. In 1805 he assumed the position he so long and honourably filled, both in conjunction with his uncle, until the retirement of the latter in 1819, and afterwards on his own account. Of the many instruments by which he maintained the celebrity of his name, the Atmospheric Recorder deserves notice, as the closing effort of his long life, and as having obtained the Council Medal of the Great Exhibition of 1851. He contributed various papers to the "Philosophical Transactions" of the Royal Society. But it is by his connection with the Royal Astronomical Society, of which he was one of the founders, that George Dollond will be chiefly remembered; and to the last he was indefatigable in the interest he took in the advancement of the Society. Died, 1852.

DOLLOND, JOHN, an eminent optician, was born in Spitalfields, London, in 1706, and brought up as a silk-weaver; but, devoting himself to the study of astronomy, his attention became directed to the improvement of telescopes, &c.; and, in conjunction with his eldest son, Peter, he commenced business as an optician. He invented the achromatic object-glass, for which he received the Copley medal of the Royal Society; and he applied the micrometer to reflecting telescopes, &c. Died, 1781, having only a few months before been elected F.R.S.—His son PETER also, who died in 1820, made many valuable improvements in optical instruments, and they both enjoyed a well-deserved reputation.

DOLOMIEU, DEODAT GUI SYLVAIN TANCREDE DE GRATET DE, a French geologist and mineralogist, was born in Dauphiné, in 1750, and entered into the order of Malta. He accompanied Buonaparte to Egypt, and on his return was taken prisoner and confined at Messina. Sir Joseph Banks obtained his release in 1801, but he died during the same year. Dolomieu had travelled, for scientific purposes, in many parts of Europe; and he is especially distinguished for his discovery of the peculiar geological formation of the mountain-ranges of South Tyrol, which have since been named, after him, the "Dolomite Mountains." He was author of many esteemed works, of which his "Mineralogical Philosophy" and a "Voyage to the Lipari Islands" are the chief.

DOMAT, JEAN, a very eminent French jurist, born at Clermont in Auvergne in 1655. He was educated at the college of Bourges; and for nearly 30 years held the office of advocate of the king in the court of Clermont. He was the intimate friend of Pascal, and the associate of the other eminent port-royalists. He made the Jesuits his enemies by his opposition to their efforts to get possession of the College of Clermont. In 1681 he settled at Paris, and applied himself to the completion of his great work, "Les Loix Civiles dans leur Ordre Naturel." It appeared in 1689, has been several times republished, and was translated into English by Strahan in 1726. Domat also wrote a work entitled "Legum Delectus," which appeared after his death. Died at Paris, 1696.

DOMENICHINO, a celebrated Italian painter, whose real name was DOMENICO ZAMPIERI, was born at Bologna, in 1581. He studied first under Denis Calvart, and then in the school of the Caracci. At about the age of 20 he went to Rome, where he acquired a great reputation, especially by his fresco of the "Flagellation of St Andrew." He spent the latter part of his life at Naples. His chief-d'œuvre is the "Communion of St Jerome in the church at Bethlehem," now placed in the Vatican, opposite "The Transfiguration" of Raphael. The "Martyrdom of St Agnes," "Martyrdom of St Sebastian," and his scenes from the Life of the Virgin are among his finest works. Domenichino was one of the victims of the malignant persecuting triumvirate of painters at Naples, where he died, 1641. There are four of his works in the National Gallery. There is a very large collection of drawings and studies by this master in the Royal Collection at Windsor Castle.

DOMINIC, ST, founder of the Dominican Order, and instigator of the crusade against the Albigenses, was born in Old Castile, in 1170. He was ordained priest in 1198, and soon distinguished himself as a fervent and eloquent preacher. With a fiery zeal he laboured in Languedoc for the conversion of the Ynudois and Albigenses, and conceived the project of founding an order of monks for the especial purpose of preaching the Catholic faith and bringing back "heretics" to the church. In aid and support of the preachers he procured the establishment of courts for the trial and punishment of obstinate heretics, who might be put to death as a last resort. The commissioners invested with this terrible jurisdiction were called "Inquisitors." In 1208, at the instigation of St Dominic, the crusade against the Albigenses was proclaimed by the pope, which was carried on mercilessly for years, and involved frightful slaughter. The order of Dominicans, called Preaching Friars, in England Black Friars, and in France Jacobins, was confirmed by Pope Honorius III. in 1216, and spread rapidly in France and Spain. Above fifty houses of this order existed in England at the time of the dissolution of monasteries. Dominic was made master of the Sacred Palace, an office created for him. Died at Bologna, 1221. Canonized by Gregory IX. in 1234.

DOMINIS, MARC-ANTONIO DE, Jesuit and natural philosopher, born in Dalmatia, in 1556. He studied at the university of Padua, entered the Society of Jesus, became a professor at Padua, bishop of Segni, and archbishop of Salatro. He embraced Protestantism, and in 1616 came to England, where he was made dean of Windsor. He, however, returned to Rome and the Catholic faith; was nevertheless suspected and imprisoned, and died in the castle of San Angelo, 1624. He was soon after declared a heretic, and his body was publicly burnt. De Dominis wrote a treatise, "De radiis visus et lucis in vitris perspectivis et iride," in which he for the first time explained the formation of the rainbow. While in England he wrote a work on church discipline, "De Republica Ecclesiastica," once highly

esteemed. History of the Colony of DOMITIAN, second son of Vespasian, was a cruel and malicious man, who succeeded his father in the empire, and was assassinated by his own soldiers in the city of Rome, in the 18th year of his reign. Agricola, a Roman general, was the conqueror of our island in the reign of Domitian. He was in command at length of the province of Armenia, in the 45th year of his reign. DON, DAVID, a Scotchman, was settled at London in 1700, and was the author of many works on botany at King's College, London, and Edinburgh, and the author of the "Flora of North America." DONALD VII., a Scotchman, was called Donald Bane, and reigned on the throne of Scotland in 1093. He was deposed by Duncan, and again by Malcolm, who did not, however, finally dethrone him. DONALDSON, JOHN, a Scotchman, was born in 1812, was educated at Cambridge, and was the author of the classical Triplicate, a tract which attracted the special notice of the press. Within five years he published his "New Series of Works," which were of great eminence in the school of holding for a short time at Trinity College, Hartford, and at Edward's School, New York. Several of his works, published in this post, and devoted to the study of the history of the world, which he exhibited his peculiar views on. As a grammarian, he was unquestioned; his works, especially "Jasher," were severely condemned, and he was associated with his great literary labors, and incessantly publishing, and selling pre-eminently in his own age. In spite of his advanced age, he relaxed not in his literary labors, and was the author of a Greek lexicon, as well as several editions of his classical works, which were prematurely cut off by his death in the year 1861. DONATELLO, GIOVANNI, the greatest Italian sculptor, was born at Florence, in 1386.

esteemed. He also edited Fra Paolo's History of the Council of Trent.

DOMITIANUS, TITUS FLAVIUS, the second son of Vespasian, and the last of the 12 Cæsars, was born A. D. 51, and succeeded his brother Titus in 81. He was voluptuous, cruel, and malignant; and though at his accession he made some show of justice, and even of kindness, to the citizens, yet the cruelty of his disposition was too deep-rooted for concealment, and he was both feared and hated for his tyranny. Wars were carried on in his reign in Britain, in Germany, and in Dacia, but, except in Britain, unsuccessfully. Agricola, who achieved the conquest of our island in this reign, excited the jealousy of Domitian, and was recalled to Rome. He was in continual dread of conspirators, and at length fell by the hands of an assassin, in the 45th year of his age, A. D. 96.

DON, DAVID, a Scottish botanist, born at Forfar, in 1800. At the age of nineteen he settled at London and became librarian to the Linnean Society, and in 1836 professor of botany at King's College, London. He was author of numerous botanical memoirs contributed to the Transactions of the Linnean Society, to the Wernerian Society, Edinburgh, and the Edinburgh New Philosophical Journal. He also published a work on the Flora of Nepal. Died, 1840.

DONALD VII., king of Scotland, commonly called Donald Bane, usurped the throne in 1093. He was expelled from the throne by Duncan in 1094, but regained it again by the murder of that prince. He did not, however, long enjoy it, for he was finally dethroned by Edgar Atheling in 1098.

DONALDSON, JOHN WILLIAM, D.D., born in 1812, was educated at the London University, and afterwards graduated at Cambridge, where he was placed second in the classical Tripos, and his great powers attracted the special notice of one of the examiners,—the present bishop of St David's. Within five years after taking his degree he published his "New Cratylus," the first of a series of works which raised him to high eminence in the science of philology. After holding for a short time a Fellowship at Trinity College, he became master of King Edward's School, in the town of Bury St Edmund's. Several years later he resigned this post, and devoted himself altogether to scholarship and biblical criticism, in both of which he exhibited the highest powers, while his peculiar views were much controverted. As a grammarian and linguist his reputation is unquestioned; his theological works, especially "Jasher," written in Latin, incurred severe condemnation from many who appreciated his great learning. Worn out with long and incessant labour, Dr Donaldson fell pre-eminently the victim of a hard working age. In spite of constant warnings from friends who saw that his strength was failing, he relaxed not in his toil of compiling a Greek lexicon, as well as in preparing new editions of his classical works, when he was prematurely cut off at the age of 48, February 10, 1861.

DONATELLO, or DONATO, one of the greatest Italian sculptors, was born at Florence, in 1386. He studied painting at

first, but gave it up from his preference for sculpture. He enjoyed the patronage of the Grand-duke Cosmo I., executed many fine works at Florence and other cities of Italy, and carried the art to a degree of excellence which it had not previously reached in modern times. Among his best works are the statues of St Mark, David, St John, and St George, the group of Judith and Holofernes, the monuments of Pope John XXIII. and Cardinal Brancacci, a Pietà, and an Annunciation. The South Kensington Museum possesses his fine bas-relief, "Virgin and Child," the Pietà, and the celebrated bronze patera, formerly in the Martelli collection. "The mark of his chisel," says the Baron H. de Triqueti, "is like the footprint of the lion, which can be mistaken for that of no other creature. His innate power and energy are irresistible. He is master of every chord of feeling, and makes them vibrate at his touch." Died at Florence, 1466.

DONATI, VITALIANO, an Italian naturalist, born at Padua, in 1717; author of a "Natural History of the Adriatic." He travelled to the East for scientific purposes, and died at Bassorah, in 1763.

DONIZETTI, GAETANO, a distinguished musical composer, was born at Bergamo in 1798. He was educated under Mayer and Mattei, and before he had completed his 20th year, he had produced "Enrico di Borgogna," an opera in which Madame Catalani sustained the principal character. This was rapidly succeeded by others; and his fertility of invention may be gathered from the fact that, besides other musical compositions, he produced in all 63 operas, many of which, such as "Anna Bolena," "Elisir d'Amore," "Lucia di Lammermoor," "La Figlia del Reggimento," and "Don Pasquale," have taken permanent possession of the stage. His mind gave way in 1844; and after four years' residence in a maison de santé near Paris, he was removed to Bergamo, where he died in 1848.

DONNE, JOHN, an English poet and divine, was born in London, in 1573. He was brought up in the Catholic faith; but after completing his studies at Oxford, he embraced Protestantism, and became secretary to the lord chancellor Ellesmere. After having lost his office, and even been imprisoned for clandestinely marrying the chancellor's niece, he took orders, was made one of King James's chaplains, and became preacher of Lincoln's Inn and dean of St Paul's. Donne was termed by Dr Johnson the founder of the metaphysical school of poetry. His works comprise letters, sermons, theological essays, &c. His prose works show deep thinking and strong powers of reasoning, and many of his poems are rich in original thought, highly imaginative, and full of melody. The Life of Donne is one of those included in Izaak Walton's charming and well-known volume. Died, 1631.

DONOVAN, EDWARD, an English naturalist, author of various extensive works, which were both useful and popular in their time. Among them are "A Natural History of British Insects," "Natural History of British Birds," "An Epitome of the Insects of Asia," &c. He also published a periodical

work entitled "The Naturalist's Repository." Died, 1837.

DOPPELMAYER, JOHANN GABRIEL, German mathematician and natural philosopher, was born at Nürnberg in 1671. He was educated at the university of Halle, visited England and other countries of Europe, and held the professorship of mathematics at Nürnberg for nearly 50 years. He distinguished himself by his numerous and interesting electrical experiments as well as by his skill in grinding object-glasses, and polishing mirrors for telescopes. He wrote a curious work on the Newly-discovered Phenomena of Electricity, Notices of the Mathematicians and Artists of Nürnberg, &c.; and published a Celestial Atlas. Doppelmayer was a member of the Royal Society of London, and of the Academies of Vienna, Berlin, and St Petersburg. Died, 1750.

DORAT, or DAURAT, JEAN, French poet, born in 1507, was professor of Greek at the Royal College, and poet-laureate to Charles IX. He has the reputation of greatly contributing to the revival of classical literature in France, and of having written a host of Greek and Latin verses, besides some French poems. Died, 1588.

DORAT, CLAUDE JOSEPH, French poet, born in 1734. His works are voluminous, and embrace poetry of every class, with dramas and romances. Though popular at the time, they are now generally neglected. Died, 1780.

DORIA, ANDREA, a Genoese naval commander of great renown, was born of a noble family at Oneglia, in 1468. Having distinguished himself in the service of different Italian states, and successfully contended against the African pirates and other enemies of his native country, he entered the French service, in the hope of counteracting the revolution that had broken out in Genoa by putting that city in possession of the French; but failing in his design, he joined with the Imperialists in endeavouring to expel them. This object being effected, he refused to make himself sovereign, as he might easily have done, re-organized the republic, giving it the form which it retained till overthrown during the French Revolution, 1798. The Genoese Senate gave him the title of "the Father and Defender of his Country," erected a statue to his honour, and built a palace for him. His whole life was a series of great exploits and brilliant successes; and he died, at the great age of 92, in 1560.

DORIGNY, MICHEL, a French painter and engraver in aqua-fortis, was born in 1617, and died in 1665.

DORIGNY, NICOLAS, son of the foregoing, born in 1637, spent nearly 30 years in Italy, and while there engraved many great pictures, especially the "Descent from the Cross," after Daniele da Volterra, and the "Transfiguration" by Raphael. In 1711 he came to England, and at once commenced his prints of the celebrated cartoons of Raphael at Hampton Court, for which he received the honour of knighthood from George I. The task occupied him about eight years. Dorigny was a member of the

French Academy of Painting. He died at Paris, in 1746, aged 90.

DORSAY, Count ALFRED, who will be long remembered as a man of fashion and of public notoriety, from his alliance with the Blessington family, was the son of General D'Orsay, and was born at Paris in 1708. He entered the army at an early age, and was quartered at Valence in 1822, when he became acquainted with Lord and Lady Blessington, and renounced his military career for the pleasure of their society. In 1827 he married Lord Blessington's only daughter by a first marriage, but a separation followed at no distant period; and Lord Blessington having died at Paris in 1829, Count D'Orsay returned to England with Lady Blessington, where they became the centre of a circle highly distinguished for art, rank, literature, and accomplishments. In the later period of his life he displayed considerable artistic talent and taste, both as a painter and sculptor. Having shown kindness and hospitality to Louis Napoleon when an exile in London, the Prince President was not ungrateful to his former friend, and in 1852, soon after the *coup d'état*, he was nominated Directeur des Beaux Arts, with a handsome salary; but he did not live to enjoy it. Died, 1852.

DORSCH, EVERIARD, a celebrated engraver on gems, was born at Nürnberg in 1649, and died in 1712.

DORSCH, CHRISTOPH, engraver on gems, and brother of the preceding, born at Nürnberg in 1676, and died there in 1732. He was the pupil of Everhard, and obtained a higher reputation than his master.

DORSET, THOMAS SACKVILLE, Earl of, the son of Sir Richard Sackville, was born in 1536, and educated at Oxford and Cambridge. He was distinguished both as a statesman and an author; having been ambassador to Holland, chancellor of Oxford University, and lord treasurer. He was first created Lord Buckhurst, and subsequently invested with the order of the Garter, and made earl of Dorset. He wrote the "Induction to the Mirrour for Magistrates," and the "Complaint of Henry, Duke of Buckingham," &c. Died, 1608.

DORSET, CHARLES SACKVILLE, Earl of, was born in 1637. He was one of the distinguished wits and revellers at the court of Charles II.; but he was fond of soldiering, and while serving as a volunteer, under the duke of York, in the Dutch war, he wrote on the eve of a battle the song, "To all you ladies low on land." At the revolution he was made lord chamberlain of the household. His poems possess considerable point and liveliness. Died, 1706.

DOSSI, DOSSO, a painter of Ferrara. He was a pupil of Lorenzo Costa, and afterwards studied at Venice and Rome. He was employed by the duke of Ferrara, and enjoyed the friendship of the poet Ariosto, whose portrait he painted. His brother, Giambattista, was also a painter, and his fellow-student and worker. Born, about 1490; died, 1560.

He also contributed various papers to the *Archæologia*, the *Gentleman's Magazine*, &c.; and shortly before his death published a beautiful volume, illustrating the "Dance of Death," by dissertations on the claims of Holbein and Macaber. He was for many years a member of the Society of Antiquaries, and formerly keeper of manuscripts in the British Museum. Died, 1834.

DOUGLAS, GAWIN, a Scotch divine, and poet of some eminence, was the son of Archibald, 5th earl of Angus, and born at Brechin in 1474. After receiving a liberal education he entered the church, was made provost of St Giles's, and eventually obtained the abbacy of Aberbrothock and the bishopric of Dunkeld. Political dissensions induced him to seek refuge in England, where he was liberally treated by Henry VIII., but he fell a victim to the plague of London, in 1522. He wrote "The Palace of Honour," and other works; but his chief performance is a translation of Virgil's *Æneid*, noteworthy as the first translation of a Roman classic into English. It was completed in 1513, but not published till 1553.

DOUGLAS, JAMES, an eminent anatomist, was born in Scotland in 1675; settled in London, and was patronized by the celebrated John Hunter; and died in 1742. He is the author of a "History of the Lateral Operation," a valuable work on the bibliography of Anatomy, and other works on medical science.

DOUGLAS, Sir JAMES, a renowned warrior, one of the associates of Robert Bruce. He took a distinguished part in the battle of Bannockburn, and was made a knight-banneret. On the death of Bruce, he was commissioned to carry the king's heart to the holy sepulchre at Jerusalem, upon which errand he sailed in June, 1330. On arriving off Sluys, in Flanders, where he expected to find companions in his pilgrimage, he learned that Alphonso XI., the young king of Leon and Castile, was engaged in a war with Osman the Moor; and Douglas entered the lists against the foes of Christendom. The Moors were defeated; but Douglas, giving way to his impetuous valour, pursued them too eagerly, and throwing among them the casket which contained the heart of his sovereign, cried out, "Now pass onward as thou wert wont, Douglas will follow thee or die." The fugitives rallied, surrounded the Christian knight, who with a few of his followers perished while attempting the rescue of Sir Walter St Clair of Roslin.

DOUGLAS, ARCHIBALD, brother of the preceding, was appointed regent for Scotland for King David Bruce, and fell at the battle of Halidon Hill, July 22, 1333.

DOUGLAS, WILLIAM, lord of Liddisdale, was a warrior of considerable renown in the 14th century, but whose fame was tarnished by an act of baseness and inhumanity. The brave Alexander Ramsay having taken the castle of Roxburgh from the English, was rewarded with the custody of the castle and the shrievalty of the adjoining district; and while holding his court at Hawick, Douglas suddenly entered with a band of armed followers, slew several of Ramsay's attendants, and having bound him with fetters, threw

him into a dungeon of Hermitage Castle, and left him there to perish. Enormous as this crime was, the king pardoned him; but he was killed by the earl of Douglas, in 1353, while hunting in Ettrick Forest.

DOUGLAS, WILLIAM, first earl of Douglas, was taken prisoner with David Bruce at the battle of Durham, but soon ransomed. He recovered Douglassdale and other districts from the English; afterwards went to France, fought at the battle of Poitiers, and died in 1384.

DOUGLAS, JAMES, second earl of that name, after performing many valorous exploits, was killed at the battle of Otterburn, in 1388.

DOUGLAS, WILLIAM, lord of Nithsdale, called "The Black Douglas," whose very name was said to be a terror to the English, married Egedia, daughter of Robert II.; and after a life of bold and successful warfare, was murdered by the earl of Clifford, in 1390.

DOUGLAS, ARCHIBALD, the fourth earl of Douglas, succeeded his father Archibald in his title and estates, and married Margaret, daughter of Robert II. When Henry IV. of England laid siege to the castle of Edinburgh, in 1400, Douglas successfully defended it; but he lost an eye, and was taken prisoner at the battle of Homildon. He afterwards joined Percy in his rebellion against the king, was taken prisoner at the battle of Shrewsbury, but recovered his liberty and went to France, where he was slain at the battle of Verneuil, in 1421.

DOUGLAS, ARCHIBALD, the fifth earl of Douglas, was the ambassador to England for the release of James I. of Scotland. Died, 1438.

DOUGLAS, WILLIAM, the sixth earl of Douglas, is remembered on account of the tragical fate which awaited him, almost as soon as he came to his family titles and estates. Under the specious pretext that the young earl's presence was necessary at the meeting of parliament, which was about to be held at Edinburgh, after the reconciliation of Livingston and Crichton, he and his brother accepted an invitation to a royal feast at the castle. The entertainment was prolonged with unusual pomp, and every delicacy spread on the table; till at length a bull's head was suddenly placed before the two noble guests, which they knew to be the herald of death. They then hastily sprung from their seats, and made some vain efforts to escape; but a body of armed men, at a given signal, rushed in, bound their hands, and led them to instant execution. This happened in 1437.

DOUGLAS, WILLIAM, the eighth earl of Douglas, was a haughty and ambitious noble, wielding at times an uncontrolled influence over the king, and at others openly bearding his authority. He raised the power and grandeur of the house of Douglas to its loftiest height; and, not content with the sway he exercised at home, caused himself to be received at Rome and in France with those honours which are only due to sovereign princes. Among other despotic acts which he committed, was his beheading Macalain of Bombie, for having refused to join

the earl in his attack on Crichton, between whom and Douglas there was a deadly feud. But the indignation of King James II. of Scotland at this and similar actions, determined him at length to get rid of the opposition of a subject so daring and powerful. The earl was therefore invited to attend his sovereign in parliament at Stirling, which he accepted; and while vainly remonstrating with him on the impropriety of his conduct, the king drew a dagger and plunged it into the heart of Douglas, Feb. 13, 1152.

DOUGLAS, JAMES, brother of the foregoing, and ninth and last earl of Douglas, took up arms to revenge his brother's death, and, assembling all the members of the league, brought a large army into the field. The king, however, being active, and well provided with forces, laid siege to the castle of Abercorn, the best fortified seat of the earl, and the two armies lay encamped within a short distance of each other; but without coming to an engagement, Douglas fled to Annandale, with his brothers, the earls of Ormond and Moray. Thither they were pursued by the king's forces, under the command of the earl of Angus, Moray slain, Ormond made prisoner, and Douglas himself driven to provide for his safety in England. Several years after, Douglas returned with Percy, earl of Northumberland, upon an expedition against his country, in which Douglas was taken prisoner; and James contented himself with sending his rebel captive to the abbey of Lindores, where he died, in 1488.

DOUGLAS, GEORGE, fifth earl of Angus, was commander of the forces that defeated the earls of Douglas and Northumberland, when Douglas was taken prisoner, and his estates forfeited. Died, 1462.

DOUGLAS, ARCHIBALD, sixth earl of Angus, commanded the right wing of the royal army at the battle of Torwood, where James III. lost his life; and at the fatal battle of Flodden Field he endeavoured, though unsuccessfully, to dissuade James IV. from that engagement. His eldest son, George, was there slain; and the earl died in the year following.

DOUGLAS, JAMES, earl of Morton. [MORTON.]

DOUGLAS, JAMES, earl of Morton and Aberdeen, was born at Edinburgh, in 1707. He established the Edinburgh Philosophical Society, and in 1733 was elected president of the Royal Society of London. Died, 1768.

DOUGLAS, JOHN, a learned divine and critic, born at Pittenweem, Fifeshire, in 1721; was educated at Oxford, and became travelling tutor to Lord Pulteney; obtained the deanery of Windsor; was raised to the see of Carlisle in 1787; transferred to that of Salisbury in 1792; and died in 1807. Dr Douglas was a distinguished writer, and the friend of Dr Johnson and most of the eminent literary characters of his day. He vindicated Milton from the charge of plagiarism brought against him by Lauder; entered the lists against David Hume, by publishing "The Criterion, or a Discourse on Miracles," and prepared for the press Captain Cook's second and third voyages. He was vice-president of the Society of Antiquaries,

and one of the trustees of the British Museum.

DOUGLAS, SIR HOWARD, an English general and writer on military science, was born at Gosport, in Hampshire, in 1776. He was son of Admiral Sir Charles Douglas, was educated at the Royal Military College, Woolwich, and entered the army at an early age. He served in the Peninsular war, in 1808-9, and was present at Corunna, took part in the Walcheren expedition, and again served in the Peninsula. At the close of the war he was created K.C.B., and promoted to the grade of G.C.B. in 1811. He was governor of New Brunswick from 1823 till 1829, and lord high commissioner of the Ionian Islands from 1835 till 1840. In 1842 he succeeded, after two unsuccessful contests, in obtaining a seat in parliament for Liverpool, which he kept till 1846. He obtained the rank of general in 1851. His principal work is the "Treatise on Naval Gunnery," first published in 1819, which has passed through four editions. He was also author of an "Essay on the Principles and Construction of Military Bridges," and other scientific treatises. Died at Tunbridge Wells, in November, 1861. A contemporary critic remarks that "the value of this distinguished officer's labours lies in his having always grafted new discoveries on old experience," and in his being at once a conservative and an improver.

DOUSA, JAN, whose real name was VANDER DOES, was born at Noordwick, Holland, in 1545. He was left an orphan at five years old, but through the kindness of his relatives received a first-rate education, studying successively at Delft under Henry Junius, at Louvain, Douai, and finally at Paris. He there became acquainted with several of the most eminent men of the time. On his return to Holland he married. He became eminent both as a soldier and a scholar. After being sent as ambassador to England, in 1572, he was made governor of Leyden in 1574, and heroically and successfully defended it against the Spaniards, who were besieging it; he was also the first curator of the university of that city, and died there, of the plague, in 1604. As an author, Dousa distinguished himself by his "Annals of Holland," as well as by various Latin poems and criticisms. The "Annals" were published in Latin verse, but were immediately turned into prose, and are highly esteemed. Dousa's son, JAN, who died in his 26th year, assisted his father in the Annals, and was an eminent classical scholar and mathematician. He had also three other sons, of great classical attainments.

DOUW, or DOW, GERARD, an eminent Dutch painter, and the pupil of Rembrandt, was born at Leyden in 1613, and died there in 1675, or, as some say, in 1680. For the excellence of his colouring, delicacy of finish, and attention to the minutiae of his art, this master's compositions are unrivalled; and the prices which some of his paintings have obtained are almost without parallel. His portrait, painted by himself, is in the National Gallery. Metz and Mieris were his pupils.

DOVER, GEORGE JAMES WELBORE

AGAR ELLIS, 1757, and completed church, Oxford as member for parliaments here and Oakhampton pointed chief forests. DRAKE, SIR FRANCIS, English navigator and commander of the royal navy under Hawkins; and of value in the unfavourable the Spaniards, in 1570 he went on a cruise against the repeated with success received the commission purpose of attacking Spanish Armada two of their cities booty. On his return, three frigates which he served earl of Essex, as much by his brother Hatton introduced Drake disclosed furnished with force to attack the Spaniards in this expedition settlements, especially coast as far as 46° of New Albion covered. He then and having done returned to Ply

AGAR ELLIS, Lord, was born in the year 1797, and completed his education at Christchurch, Oxford. In 1816 he was returned as member for Heytesbury; in succeeding parliaments he sat for Seaford, Ludgershall, and Oakhampton; and in 1830 he was appointed chief commissioner of woods and forests. But it is as a patron of the fine arts, and as a promoter of literature, that Lord Dover will be chiefly remembered; his acquaintance with the former entitling him to the character of a connoisseur, and his talents as an author being highly respectable. In 1828 he published "Historical Inquiries respecting the Character of Edward Hyde, Earl of Clarendon;" after which appeared the "Ellis Correspondence," which was followed by his "Life of Frederick the Great;" and his last literary task was that of editing the "Letters of Horace Walpole to Sir Horace Mann." He was also an occasional contributor to the Quarterly and Edinburgh Reviews, &c.; and in 1832 he was elected president of the Royal Society of Literature. Died, 1833.

DOYEN, GABRIEL FRANÇOIS, an eminent French painter, born at Paris, 1726, was the pupil of Vanloo. The "Death of Virginia," and "Death of St Louis," are among his best works. He afterwards settled in Russia, and died there in 1806.

DRACO, an Athenian legislator, the extraordinary and indiscriminate severity of whose laws has rendered his name odious to humanity. During the period of his archonship, about B. C. 623, he enacted a criminal code, in which some slight offences were punished with death, no less than murder or sacrilege. Hence it was said to be "written in blood." The laws of Draco, the first written laws of Athens, were for the most part superseded by the legislation of Solon. Draco is said to have been accidentally killed in a theatre in Ægina.

DRAKE, Sir FRANCIS, an eminent navigator and commander, was born at Tavistock, Devonshire, in 1545. He first served in the royal navy under his relative, Sir John Hawkins; and distinguished himself by his valour in the unfortunate expedition against the Spaniards, in the harbour of Vera Cruz. In 1570 he went to the West Indies, on a cruise against the Spaniards, which he soon repeated with success; and in 1572, having received the command of two vessels, for the purpose of attacking the commercial ports of Spanish America, he took possession of two of their cities, and returned laden with booty. On his return he equipped, in Ireland, three frigates at his own expense, with which he served as a volunteer, under the earl of Essex, and distinguished himself so much by his bravery, that Sir Christopher Hatton introduced him to Queen Elizabeth. Drake disclosed to her his plan, and being furnished with five ships, he sailed, in 1577, to attack the Spaniards in the South Seas. In this expedition he ravaged the Spanish settlements, explored the North American coast as far as 48° N. lat., and gave the name of New Albion to the country he had discovered. He then went to the East Indies, and having doubled the Cape of Good Hope, returned to Plymouth in 1580. The queen

dined on board his ship at Deptford, and knighted him. In 1585 he again sailed to the West Indies, and succeeded in taking several places and ships. In 1587 he commanded a fleet of 30 sail, with which he entered the harbour of Cadiz and other Spanish ports, and destroyed an immense number of ships which were preparing for the great attack on England; and, in the following year, he commanded as vice-admiral under Lord Howard, and had his share in the destruction of the Spanish armada. He died off Nombre de Dios, in 1596. Sir Francis represented Plymouth in parliament; and to him that town is indebted for a supply of water, which he caused to be conveyed to it from springs at several miles distance. His victories have been equaled, nay, surpassed, by modern admirals; but his generosity has never been rivalled; for he divided, in just proportional shares, among his seamen, the booty he took from the enemy. Sir John Barrow published "The Life, Voyages, and Exploits of Admiral Sir Francis Drake."

DRAKE, FRANCIS, an eminent antiquary and surgeon at York; author of "Eboracum," or the history and antiquities of that city. Died, 1770.

DRAKENBERG, CHRISTIAN JACOBSEN, a Norwegian sailor, who is said to have lived to the age of 145 years. Born in 1626, he went early to sea, was captured by Algerine pirates, and kept in slavery about fifteen years, quitted a sea-faring life in 1717, and died at Aarhus in 1772. It is said that, hearing his great age questioned, in 1732, he took a long journey on foot from Copenhagen, where he was then in the service of a nobleman, to procure the register of his baptism.

DRAKENBORCH, ARNOLD, Dutch philologist, born at Utrecht, in 1684. He studied at the universities of Utrecht and Leyden, and became professor of history and eloquence at the former. He was author of several learned dissertations on subjects of ancient history, especially "De Præfectis Urbis," several times republished. He also published editions of Livy and Silius Italicus. Died at Utrecht, 1747.

DRAPER, Sir WILLIAM, a military officer, well known also as a controversial writer, was born at Bristol in 1721. He received his education at Eton and Cambridge. Having entered the army, he distinguished himself in the East Indies, was raised to the rank of a colonel in 1760, and in 1763 he commanded the troops at the capture of Manila, for which he received the honour of knighthood. In 1779 he was appointed lieutenant-governor of Minorca; and when that place surrendered to the enemy he preferred charges against General Murray, the governor, but which he failed to substantiate, and was commanded by the court to make an apology to him. He owes his literary celebrity to the circumstance of his having undertaken the defence of his friend the marquis of Granby against the attacks of Junius. He died in 1787.

DRAYTON, MICHAEL, an English poet, was born at Atherstone, Warwickshire, in 1563, and educated at Oxford. He was in-

debted for a great part of his education to Sir Henry Goodere, and afterwards lived for a long time in the family of the earl of Dorset, as it would seem, in a state of dependence. He wrote "The Shepherd's Garland," "Barons' Wars," "England's Heroical Epistles," "Polyolbion," a description of England, "Nymphidia," &c. Of these the "Polyolbion" is the most important. It is remarkable for its combination of great poetical excellence with authentic and minute information. The "Nymphidia" is a singularly pleasing fairy-tale in verse. Drayton held the office of poet-laureate. Died, 1631.

DREIBHEL, CORNELIUS VAN, a Dutch chemist and natural philosopher, was born at Alkmaar in 1572. With a considerable share of charlatanism, he combined real talent, and made several useful discoveries; such as the invention of a thermometer, the method of dyeing scarlet, and the improvement of telescopes and microscopes. He died at London in 1634.

DREILINCOUIT, CHARLES, a French Protestant divine, was born at Sedan in 1593, and died at Paris in 1669. He was the author of several religious books, but the only one by which he is now remembered is that entitled "Consolations against the Fears of Death."

DREW, SAMUEL, M.A., metaphysician and divine, was the son of poor parents at St Austell, Cornwall, and was born in 1765. At ten years of age he was apprenticed to a shoemaker. Though he was almost destitute of education, as he grew up he became a shrewd and subtle disputant among his shopmates; while his jocose manner and vivacious disposition led him, in early life, not only to slight the truths of religion, but to ridicule those of his acquaintance who embraced them. He was at length, however, aroused to a sense of their importance by the preaching of Dr Adam Clarke; and, joining the Methodist society, he determined to abandon his former practices, and devote every moment he could spare to the acquirement of religious knowledge. Indefatigable in its pursuit, he soon appeared as a local preacher, while he still carried on his business; not venturing before the world as an author till 1799, when he published his "Remarks on Paley's Age of Reason." This was very favourably received; but it was to his next production, entitled "An Essay on the Immateriality and Immortality of the Soul," that Drew was chiefly indebted for his reputation.—Quitting trade, he wrote several other works, among which was his "Treatise on the Being and Attributes of God;" and from the year 1819 to his death he edited the Imperial Magazine with singular ability; the careful and dispassionate view he took of every subject under his review eminently qualifying him for the office of critic. He died in March, 1833.

DROUET, JEAN BAPTISTE, was born in 1763. He was postmaster of Menehould when Louis XVI. and his family, in 1791, passed through that town in their endeavour to escape from France; and it was owing to Drouet that they were conducted back to

Paris. For this important service the National Assembly offered him 30,000 francs, which he refused. In 1792 he was nominated deputy to the Convention, in which he distinguished himself by his support of the most violent measures. He was afterwards sent as commissioner to the army of the north, and being taken prisoner by the Austrians, was exchanged in 1793, with others of his party, for the daughter of the unfortunate Louis. He became a member of the council of Five Hundred; and, under the consulate, sub-prefect of St Menehould. In 1815 he was chosen deputy to the Chamber of Representatives; but, being excepted from the amnesty at the beginning of the following year, and condemned to exile, he returned to Macon, where he died in 1824.

DROUET, JEAN BAPTISTE, Count D'ERLON, marshal of France and governor of Algeria, was born at Itennes, 1765. He served in the army throughout the wars of the revolution, distinguishing himself at Hohenlinden, Jena, Dantzic, and Friedland; was severely wounded at the last-named battle, and was named grand officer of the Legion of Honour; served next in the Tyrol and in the Peninsular war, and became aide-de-camp to Marshal Soult. He was appointed governor-general of Algeria about 1834; and in 1813 marshal of France. Died, 1844.

DROUOT, General Count, the well-known commander of the artillery of the guard under Napoleon, was born, as he himself says, "of poor parents, who earned by the sweat of their brow the bread of a numerous family," at Nancy, 1774. Scarcely had he finished his education when the wars of the revolution broke out in 1792. The following year he was admitted into the school of artillery as sub-lieutenant, and gradually rose through the different ranks to that of general of division, which he attained in 1813. It would occupy more space than we can afford to give even an outline of the achievements of this remarkable man. In abilities as an officer of artillery, in bravery and steadiness, and above all in single-minded honesty, staunch fidelity, and unimpeachable virtue, he had no superior and but few equals in all that band of heroes who raised the emperor to his throne. Nor must his fervent piety be overlooked. He always had a small Bible with him; to read this constituted his chief delight, and he did not scruple to avow the fact. His modesty was equal to his skill, and his fidelity to his courage; and he gave a striking proof of the latter by accompanying Napoleon to Elba amid the general defection that disgraced the emperor's protégés. After the defeat at Waterloo, General Drouot was included in the ordinance of proscription; but he immediately surrendered to take his trial, and having been found "not guilty," he returned to his native town, where he "gave himself up to the charms of a quiet private life." The return of the ashes of the emperor in 1840 filled him with great joy; all his last hopes and wishes were fulfilled by this event; and it should seem that from this period he longed for the moment to arrive when he should be admitted "to that everlasting dwelling, where those who have

well loved will meet them.

well loved and well served their country will meet their recompense." Died, 1847.

DROZ, PIERRE JACQUET, a skilful mechanician, was a native of Switzerland, and born in 1721. Among other curious things he made a writing automaton, the motions of whose fingers, &c., corresponded exactly with those of nature. Died, 1790.

DROZ, HENRI LOUIS JACQUET, son of the foregoing, born in 1759, excelled even his father, by whom he was taught, in the construction of mechanical figures. At the age of 22 he went to Paris with some of the products of his ingenuity; among which was an automaton, representing a woman playing on the harpsichord, which followed the notes in the music book with the eyes and head, and having finished playing, got up and made an obeisance to the company. He died at Naples, in 1791.

DROZ, FRANÇOIS XAVIER JOSEPH, French littérateur, was born at Besançon, in 1773. After holding a professorship there for some years he settled at Paris in 1802, and devoted himself to literary work. He became a member of the French Academy, and professor of moral and political science at the Institute. He wrote a "Histoire du Règne de Louis XVI.," a treatise "De la Philosophie Morale," and several other works. Died, 1850.

DRUMMOND, GEORGE, an active, enterprising, and patriotic Scotchman, was born in 1687. When the earl of Mar reared the standard of rebellion in 1715, Drummond was the first to apprise the ministry of it; and, raising a company of volunteers, he joined the duke of Argyle, and assisted at the battle of Sheriffmuir. This loyal conduct he repeated, upon the approach of the rebels in 1745, and was present at the battle of Preston. He held various offices in the excise and customs from an early age; and in 1737 he was made one of the commissioners of excise, an office which he retained during the remainder of his life. He was also six times lord provost of Edinburgh, and to his patriotic zeal the city is indebted for many improvements. He died in 1766, aged 80.

DRUMMOND, THOMAS, mathematician and natural philosopher, inventor of the Drummond or lime light, was born at Edinburgh in 1797. He was educated at Edinburgh, and at the Military College, Woolwich, and entered the army as engineer. In 1819 he became assistant to Colonel Colby in the trigonometrical survey of Great Britain and Ireland. The lime light was first used by him about 1825, in the course of the survey of Ireland. About the same time may be dated his invention of a heliostat. Captain Drummond became subsequently secretary to Lord Spencer, obtained a government pension, and in 1835 was appointed under-secretary for Ireland. He was indefatigable in attention to his various and often arduous duties, and enjoyed the esteem of all parties. Died, 1840.

DRUMMOND, WILLIAM, a Scotch poet, was the son of Sir John Drummond of Hawthornden, and born there in 1585. He was educated at the university of Edinburgh, and studied civil law at Bourges; but poetry had

more charms for him than law, and, on coming to the family estate, he devoted himself, amidst the romantic beauties of Hawthornden, to poetry and polite literature. His poems are replete with tenderness and delicacy. He died in 1649; and his death is said to have been accelerated by grief for the death of Charles I. The most recent edition of his poems is that by Cunningham, published in 1852.

DRUMMOND, Sir WILLIAM, F.R.S., a learned antiquary, statesman, and the author of several works, classical and historical. He was a privy councillor, and at one period filled the office of envoy extraordinary and minister plenipotentiary from Great Britain to the king of the Two Sicilies; and at another (1801), went on an embassy to Constantinople, when he was invested with the Turkish order of the Crescent. His principal works are "A Review of the Government of Sparta and Athens," "Herculanensis," "Odin," a poem; and "Origines, or Remarks on the Origin of several Empires, States, and Cities." He died at Rome, in 1828.

DRUSUS, CLAUDIUS NERO, a distinguished Roman general, was the son of Tiberius Claudius Nero and Livia, and was born B.C. 38. He was much esteemed by Augustus as well as by the people, and early distinguished himself in war. With Tiberius, his elder brother, he defeated and drove out of Italy the Rhæti and Vindelæi. He commanded in four campaigns in Germany with great success, penetrating beyond the Weser to the Elbe; united the Rhine to the Yssel by a canal; was consul B.C. 9; and died in Germany the same year. His body was taken to Rome by Tiberius, who had hastened to see him, and arrived just before he died. Drusus married the daughter of Marcus Antonius and Octavia, and was by her the father of Germanicus and Claudius.

DRYANDER, JONAS, naturalist, was by birth a Swede, but came to England, and was patronized by Sir Joseph Banks. He became librarian to the Royal Society, and vice-president of the Linnæan. Born, 1748; Died, 1810.

DRYDEN, JOHN, one of the most celebrated English poets, was born at Aldwinkle, Northamptonshire, in 1631, and received his education at Westminster School and Trinity College, Cambridge. In 1657 he came to London, and acted as secretary to his relation, Sir Gilbert Pickering, who was one of Cromwell's council; and on the death of the Protector, he wrote his well-known stanzas on that event. At the restoration, however, he greeted Charles II. with a poem, entitled "Astræa Redux," which was quickly followed by a panegyric on the coronation; and from that time his love for the royal house of Stuart appears to have known no decay. In 1661 he produced his first play, "The Duke of Guise," but the first that was performed was "The Wild Gallant," which appeared in the year following. In 1667 he published his "Annus Mirabilis;" and his reputation, both as a poet and a royalist, being now established, he was appointed poet-laureate and historiographer royal, with a salary of £200 per annum. He now

became professionally a writer for the stage, and produced many pieces, some of which have been strongly censured for their licentiousness and want of good taste. In 1681 he commenced his career of political satire; and at the express desire of Charles II. composed his famous poem of "Absalom and Achitophel," which he followed up by "The Medal" and "A Satire on Sedition." His next satire was "Mac Flecknoe;" after which appeared "Religio Lalei," a commendous view of the arguments in favour of revelation. At the accession of James II., Dryden became a Roman Catholic, and, like most converts, endeavoured to defend his new faith at the expense of the old one, in a poem called "The Hind and Panther," which was admirably answered by Prior and Montague, in "The Country Mouse and City Mouse." The abdication of James deprived Dryden of all his official emoluments; and during the 10 concluding years of his life, when he actually wrote for bread, he produced some of the finest pieces of which our language can boast. His translation of Virgil, which alone would be sufficient to immortalize his memory; appeared in 1697; and, soon after, that master-piece of lyric poetry, "Alexander's Feast," his "Fables," &c. The freedom, grace, strength, and melody of his versification have never been surpassed; and in satire he stands unrivalled; but as a dramatic writer, though he has many striking beauties, he does not generally excel. His prose essays afford a fine specimen of composition, and are replete with critical ability. He died in 1700, and was buried in Westminster Abbey. There is a good Life of Dryden by Robert Bell, who has also edited his poetical works.

DU BOIS, EDWARD, who gained a high reputation in the lighter literature of the day, was born 1775. Educated at Christ's Hospital, he was called to the bar at the Inner Temple in 1809, but he took little interest in his profession, though it subsequently enabled him to fill with advantage the only two public offices he ever held, the deputy judgeship of the court of requests, and the secretaryship to the commissioners in lunacy. He commenced his literary career as the editor of the Monthly Mirror, while Thomas Hill was its proprietor, and Theodore Hook was a contributor. He at the same time filled the lighter departments of the Morning Chronicle, under Mr Perry; and he maintained his connection with the press in his latest years. In 1808 appeared "My Pocket Hook, or Hints for a ryghte merrye and conceitede Tour in Quarto," written in ridicule of the books of travels manufactured by Sir John Carr. This little work, which was anonymous, ran through numerous editions. The only works published with his name were the "Wreath," "Old Nick," a satirical story, 3 vols., the "Decameron of Boccaccio, with Remarks on his Life and Writings," 2 vols., and an edition of Francis's Horace. We ought also to add, that among his anonymous writings was a work attributing the authorship of "Junius" to Sir P. Francis, with whom he was, it is said, in some way connected. M. Du Bois' powers of conversation were great,

and his good-humoured pleasantry and knowledge of the world made him the idol of a large circle of friends. Died, 1850.

DUBOIS, GUILLEAUME, a French cardinal and statesman, notorious for his ambition and his vices, was the son of an apothecary, and born at Brive la Gaillard, in the Limousin, in 1656. Having obtained the situation of preceptor to the duke of Orleans, he pandered to the passions of his pupil, and secured his attachment; till at length he became his privy councillor, and overseer of the household; and when the duke became regent, he was appointed to the situation of minister of foreign affairs. The archbishopric of Cambray having become vacant, Dubois, though not even a priest, had the boldness to request it, and succeeded in getting it; and by his consummate address he afterwards obtained a cardinal's hat, and was made prime minister. He had now reached the summit of his ambition, and at the same time its limit. His lust of power, his hungry avarice, his foul debaucheries, his capacity of shamelessly lying, and his ridiculous vanity, remained unaltered to the end. But that end was near. After frightful suffering, the result of his foul life, he died just 12 months after being named first minister, August, 1723.

DUBOS, JEAN BAPTISTE, French litterateur and secretary to the French Academy, was born at Beauvois in 1670, and distinguished himself both as an historian and a critic. He was received at the Academy in 1720. Among his works are a "Histoire de la Ligue de Cambray," "Histoire critique de l'établissement de la Monarchie Française," and "Réflexions critiques sur la Poésie et sur la Peinture." Died, 1742.

DUBY, PETER ANSCHERTOMESSEN, a celebrated Swiss medallist and antiquary, was born in 1721, and died in 1782. He was interpreter to the royal library at Paris, and the author of an able and extensive work on medals.

DUCANGE, CHARLES DUFRESNE, Selgneur, French historian, philologist, and archæologist, was born at Amiens in 1610. He was educated by the Jesuits, studied law at Orleans, and became advocate to the parliament of Paris in 1631. He quitted the bar, however, and devoted himself, at his native town, to literary labours. In 1668 he settled at Paris, and there spent the rest of his life. He is now best known as author of the voluminous and useful "Glossarium ad Scriptores medii et infimæ Latinitatis," subsequently enlarged by Carpentier. He compiled a similar Glossary of mediæval Greek. Of his other works may be named, "Histoire de l'Empire de Constantinople sous les Empereurs Français," "Historia Byzantina Illustrata," and editions of De Joinville's Life of Louis IX., and of the Annals of Zonaras. He left a large number of works in manuscript. Died, 1688.

DUCAREL, ANDREW COLTEE, an eminent antiquary and civilian, was born at Caen, in Normandy, in 1713. After receiving his education at Eton and Oxford, he became a fellow of the Royal and Antiquarian Societies, and held a situation in the state paper office. His principal works are "Anglo-

Norman Antiquary Palace and Died, 1785.

Norman Antiquities," and Histories of Lambeth Palace and of St Catherine's Church. Died, 1785.

DUCCIO DI BUONINSEGNA, a celebrated early Italian painter, head of the Siennese school. His date of birth is not known, but he flourished from 1285 to 1320. Like Cimabue, he set the example of a free study and imitation of nature, abandoning the hard Byzantine style. His chief-d'œuvre is the altar-piece of the cathedral of Siena, still preserved. It was completed in June, 1310, and was carried in procession, with great public rejoicings, from the painter's house to the cathedral. Duccio had long the credit of designing the decorations of the pavement of the same cathedral, but these were executed a century after his death. One of his finest works, a Crucifixion, Virgin and Child, &c., is in the collection of the late Prince Consort, and was exhibited at the Manchester Art Treasures Exhibition. The National Gallery contains a relief by this master. He was living in 1321.

DUCHANGE, GASPARD, a Jevr French engraver, and counsellor of the Academy of Painting. Born, 1662; died, 1756.

DUCHATEL, PIERRE, in Latin CASTELANUS, bishop of Orleans and grand almoner of France, was born about 1495. He studied at the college of Dijon, and then went to Basel, where he gained the friendship of Erasmus and assisted him in some of his works. After visiting the East he was presented to Francis I. by Cardinal du Bellay, and was made bishop of Tulle in 1539, of Mecon five years later, grand almoner in 1547, and bishop of Orleans in 1551. He distinguished himself by his energetic defence of the rights of the Gallican church against the claims of the papacy, and by his patronage of literature. Died, 1552.

DUCHESNE, ANDRÉ, geographer and historiographer to the king of France, was born in 1584, and died in 1640. He was a very learned and most prolific writer, and has been named the father of French history. He published a series of original writers on the history of France in 5 vols. folio; "Histoire des Rois, Ducs, et Comtes de Bourgogne," &c., and he left in MS. more than 100 folio volumes.

DUCHESNOIS, JOSEPHINE RUFIN, a celebrated French actress. She performed at the Théâtre Français from 1802 until 1830. Born, 1777; died, 1835.

DU CIS, JEAN FRANÇOIS, a French dramatist, was born at Versailles in 1733. He took Shakspeare for his model, and the majority of his plays are free imitations of the English poet; though some of them are so altered to suit the taste of his countrymen, that the genius of Shakspeare is but dimly discoverable. He was received at the French Academy on the death of Voltaire in 1778. He died in 1816, aged 84.

DUCLOS, CHARLES PINEAU, a French novelist and biographer, was born at Dinant, in Brittany, in 1705; became secretary of the French Academy, and on the resignation of Voltaire was appointed to the office of historiographer of France. All his writings are lively and satirical, descriptive of love, women, and intrigue; the principal are

"Considerations sur le Méurs du XVIIIème Siècle," "Confessions du Comte de * * * * *". Died, 1772.

DUDLEY, SIR EDMUND, a lawyer of the 15th century, who acquired notoriety as one of the agents of Henry VII. in extorting money by the revival of obsolete statutes and other unjust measures. He studied at Oxford, early entered the king's service, and accompanied him to France in 1492. On his return he applied himself, in conjunction with Empson, to his odious task, and with too great success. In 1504 he was speaker of the House of Commons, but on the accession of Henry VIII., the public voice compelled the king to bring him to trial; he was found guilty of high treason, and executed with Empson, at London, in 1510. The repetition of such proceedings as those of Dudley and Empson was prevented by a special Act of Parliament.

DUDLEY, JOHN, duke of Northumberland, was a son of the preceding, and born in 1502. He was first created Viscount Lisle, then earl of Warwick, and after being appointed lord high admiral, reached his dukedom in 1551. He effected a marriage between his son, Lord Guildford Dudley, and Lady Jane Grey, daughter of the duke of Suffolk. He afterwards prevailed on the young king, Edward, to set aside his sisters, Mary and Elizabeth, from the succession in favour of Lady Jane, whom he caused to be proclaimed at the king's death. But an insurrection being raised in favour of Mary, she was proclaimed in London, and the duke executed as a traitor, in 1553.

DUDLEY, ROBERT, earl of Leicester, a son of the preceding, was born in 1532. Queen Elizabeth proposed him as a husband for Mary queen of Scots, but she rejected him with disdain; and in 1572 he married privately Lady Douglas, but never acknowledged her as his wife. He afterwards married the Countess Dowager of Essex, and finding Lady Douglas intractable to his proposals for a separation, is charged with having poisoned her. For a short time he held the situation of governor of the Protestant Low Countries; but returning to England by command of the queen, he was made lieutenant-general of the army assembled at Tilbury in 1588, and died during the same year.

DUDLEY, SIR ROBERT, the son of the earl of Leicester by the Lady Douglas, was born in 1573. Having commenced a suit to prove his legitimacy, the Countess Dowager of Leicester filed an information against him for a conspiracy, on which he went to Florence, and was appointed chamberlain to the grand duchess, sister to the Emperor Ferdinand II., who, creating him a duke of the Roman empire, he assumed the title of the duke of Northumberland. He drained the morass between Pisa and the sea, by which Leghorn became one of the finest ports in the world. He was the author of "Del Arcano del Mare," and other works. Died, 1630.

DUDLEY, the Right Hon. JOHN WILLIAM WARD, Earl of, a statesman of great talents, but remarkable for his absence of mind and the habit of "thinking aloud," of

which many ludicrous anecdotes are told. The following is recorded as a *fact*. When he was secretary for foreign affairs, in Mr Canning's administration, he directed a letter intended for the French to the Russian ambassador, shortly before the affair of Navarino; and, strange as it may appear, it gained him the highest honour. Prince Lieven set it down as one of the cleverest *ruses* ever attempted to be played off, and gave himself immense credit for not falling into the trap laid for him by the sinister ingenuity of the English secretary. He returned the letter with a most polite note, in which he vowed, of course, that he had not read a line of it, after he had ascertained that it was intended for Prince Polignac; but could not help telling Lord Dudley, at an evening party, that he was "*trop fin*, but that diplomatists of his standing were not so easily caught." His lordship was born in 1781, and entered parliament first for Downton in 1802; he afterwards successively represented Worcestershire, Wareham, and Bossiney. In 1823 he succeeded to the peerage; was appointed secretary of state for foreign affairs, and sworn a member of the privy council in 1827; raised to the rank of an earl in the same year; and died in 1833.

DUPAU, FORTUNÉ, French painter, was a native of St Domingo, who studied under David, and became professor at the school of St Cyr. His "Count Ugolino in Prison," "Gustavus Vasa," and "St Vincent de Paul," are some of his best productions. Died, 1821.

DUPRESNE. [DUCANGE.]

DUPRESNOY, CHARLES ALPHONSE, a French painter and poet, was born in 1611. He was intended by his father for the legal profession; but the sister arts of poetry and painting were more attractive than the law, and he devoted his undivided attention to them. In 1634 he went to Italy, where he completed his Latin poem, "*De Arte Graphica*;" though it did not appear till after his death, when his friend De Viles published it, with annotations. It has been three times translated into English, by Dryden, Graham, and Masou. Sir Joshua Reynolds wrote the annotations to Dryden's translation. Died, 1755.

DUGDALE, Sir WILLIAM, an eminent and most industrious antiquary and herald, was born near Coleshill, Warwickshire, in 1605, and educated at Coventry Free School, and afterwards by his father. He was made Chester herald in 1644; accompanied Charles I. throughout the civil war; and after the restoration, on being appointed Garter king-at-arms, received the honour of knighthood. His chief work is the "*Monasticon Anglicanum*;" but he also wrote "*The Baronage of England*," 3 vols., "*The History of St Paul's Cathedral*," "*Origines Juridicales*," and several other works of merit. The "*Monasticon*" was the joint work of Dugdale and Roger Dodsworth, and appeared in 3 vols. folio; the first vol. in 1655, the third in 1673. A new and considerably extended edition was projected in 1812, and completed in 6 vols. folio, in 1830. Died, 1686.

DUGOMMIER, General, was a native of Guadeloupe, born 1736. He early entered

the army, and after honourable service for which he received the cross of St Louis, he retired to Martinique, where he possessed a large estate previously to the French revolution. He espoused the republican cause, and being nominated colonel of the national guards of the island, he defended it against a body of royalist troops sent from France. He afterwards went to France, and being made commander-in-chief of the army in Italy, he gained many important advantages over the Austro-Sardinian army. He took Toulon, after a sanguinary contest, in 1793. He next commanded the army of the Eastern Pyrenees, and, in 1794, gained the battle of Alberdes, and seized the post of Montesquieu, taking 200 pieces of cannon and 2000 prisoners. He continued his career of victory till he fell in an engagement at St Sebastian, on Nov. 17, 1794.

DUGUAY TROUIN, RENÉ, one of the most celebrated naval officers of France, was born at St Malo in 1673. His love for a maritime life soon showed itself, and at the age of 18 he was the commander of a privateer. At 20, he maintained an action with a 40 gun ship, which he commanded, against six English vessels, but was captured. After a series of gallant exploits, by which he essentially served his country, and raised its naval reputation, he died in 1734.

DUGUESCLIN, BERTRAND, a renowned French warrior and statesman, constable of France in the 14th century, was born about 1314. Though deformed in person, and of a fierce and untractable disposition in his youth, he persevered in his endeavours to eclipse these defects by the brilliancy of his actions; and mainly to him must be attributed the expulsion of the English from Normandy, Guienne, and Poitou. Duguesclin was captured by the brave English commander, John Chandos, at the battle of Auray in 1364, and was ransomed for 100,000 francs. Sent to subdue the roving companies of soldiery then wasting France, he placed himself at their head, and led them to foreign wars. While serving in Spain against Peter the Cruel, he was again made prisoner by the English under the Black Prince, but was soon liberated. He was soon after made constable of France. Suspicion unjustly falling upon him, he proudly resigned, and determined to retire to Spain. Before setting out he went to assist in the siege of the castle of Randam, and there died, 1360. So highly, indeed, was he esteemed even by his enemies, that the governor insisted on placing the keys of the fortress on the coffin of the hero. There are several French Lives of this hero, and a new History of his Life and Times, by D. F. Jamison, was published in 1864.

DUHALDE, JEAN BAPTISTE, a French Jesuit, was the author of "*A Geographical and Historical Description of China*," which he compiled from the records of successive missionaries, and furnished the best account up to that time published of that immense empire. Born, 1674; died, 1743.

In 1697 he resigned his situation in the Academy, to devote himself to theology. His chief works, besides the one mentioned above, are "Regiæ Scientiarum Academiæ Historia," 4to, and an edition of the Vulgate, with notes and tables, chronological and geographical. He died, 1706.

DUHAMEL DU MONCEAU, HENRI LOUIS, an eminent French writer on agriculture, born at Paris, in 1700. His whole life was dedicated to the cultivation of useful science; and besides largely contributing to the transactions of different learned societies, of which he was a member, the following are among his separate works:—"Traité de la Culture des Terres," 6 vols., "Traité des Arbres et Arbustes qui se cultivent en France en pleine Terre," 2 vols. 4to, "Traité des Arbres Fruitières," 2 vols. 4to, of which a new edition, extended to 6 vols. folio, appeared in 1807; besides many other treatises on various arts and manufactures. Duhamel was admitted to the Academy of Sciences in 1728. Died, 1782.

DUJARDIN, CHARLES, an eminent Dutch painter, a pupil of Berghem, was born at Amsterdam, in 1640; and died at Venice, in 1678.

DULON, LOUIS, a distinguished flute-player and musical composer, was born at Oranienburg, near Berlin, in 1769. He lost his sight at a very early age, but evincing a decided taste for music, he was put under the first performers, and soon arrived at singular eminence in his profession. He prepared an autobiographical work, entitled "The Life and Opinions of the Blind Flutist," which was edited by Wieland. Died, 1826.

DULONG, PIERRE LOUIS, a celebrated French chemist, was one of the many pupils of the Polytechnic School, who have done it honour. To him we owe the discovery of the chloride of nitrogen, by an explosion of which dangerous substance he lost an eye and a finger. He was admitted to the Academy of Sciences in 1823. Born, 1785; died, 1838.

DUMARESQU, Lieut.-colonel HENRY, who at the time of his death was chief commissioner of the Australian company in New South Wales, entered the army as a lieutenant in the 9th foot, at the age of 16; and served in 8 campaigns, of which 6 were in the Peninsula, one in Canada, and the last that of Waterloo. He was present in the 13 battles for which medals were bestowed, and at several sieges; attained the rank of lieutenant-colonel after 9 years' service; was employed on the staff upwards of 18 years; and was twice dangerously wounded. At the battle of Waterloo he was on the staff of General Sir John Byng, and was shot through the lungs at Hougoumont; but being at the time charged with a message for the duke of Wellington, he, as if supported by the resolution to do his duty, rode up to the duke, delivered his message, and then, as Sir Walter Scott describes it, dropped from his horse, to all appearance

a dying man. The ball, which was never extracted, is supposed to have eventually induced paralysis, and caused his death, March, 1838.

DUMESNIL, MARIE FRANÇOISE, a celebrated French actress, who rose to the highest eminence as a tragical performer, was born in 1713, first appeared on the stage in 1737, retired from it in 1775, and died in 1803. Like our Siddons, she surpassed all her contemporaries in parts requiring queenly dignity, deep pathos, or the vehement display of the fiercer passions.

DUMONT, JEAN, an eminent publicist, was a native of France, but settling in Austria, became historiographer to the emperor, by whom he was created baron of Cariscroon. He published a voluminous work, entitled "Corps Universel Diplomatique du Droit des Gens," besides "Voyages," &c. Died, 1726.

DUMONT D'URVILLE, JULES SEBASTIEN CÉSAR, one of the most skilful and intrepid navigators that modern France, rich as she undoubtedly is in naval skill and intrepidity, can boast of. He was not merely a good sea-captain; he was a good botanist, entomologist, draughtsman, and writer, as may be seen from his interesting account of the French expedition of 1819-20 to the shores of the Archipelago and the Black Sea. As second in command to M. Duperré, in *La Coquille*, he visited Peru, China, Oceania, &c. and he brought home immense stores of both knowledge and specimens of natural history. In 1828 he was intrusted with a mission to discover, if possible, some traces of the unfortunate *La Perouse*. On his return he published a most interesting account, in which he prettily clearly proved that the shipwreck occurred off an island to the south of Santa Cruz. Being subsequently sent to approach as nearly as possible to the south pole, he acquitted himself with his usual skill. We have from his pen, besides the narrative already mentioned, "A Picturesque Journey round the World." This skilful and brave man was killed, with his wife and child, by the fatal Versailles railway accident, May 8, 1842, aged 52.

DUMONT, PIERRE ETIENNE LOUIS the friend of Jeremy Bentham and editor of some of his works, was a native of Geneva. He was born in 1759, and became pastor there; went to Russia in 1783, and soon afterwards became tutor to the sons of Lord Shelburne. Visiting Paris during the first years of the revolution, he gained the friendship of Mirabeau, of whom he wrote some interesting "Recollections." On his return he became the friend and assistant of Bentham in the preparation of his works on Legislation for the press. He returned to Geneva in 1814, and became a senator. Died, 1829.

DUMOURIEZ, CHARLES FRANÇOIS, an eminent French general, was born at Cambray, in 1739. He entered the army early in life, and at 24 years of age had received 22 wounds, and was made a knight of St Louis. In 1772, Louis XV. sent him with communications to Sweden, but he was arrested, and for a long time confined in the Bastille. However, in 1789, we find him a

principal director of the Jacobin Club, which was composed of all who aspired to be accounted the friends of liberty. He afterwards became a minister of Louis XVI., and he strongly advised the monarch to yield the direction of the interior affairs of the kingdom to the council of the assembly then sitting, and to declare war against the foreign foes of France. The advice was disregarded, and Dumouriez was dismissed. Still determined to devote himself to the service of the army, he proceeded to Valenciennes, where he soon gained immortal fame by his valour and his firmness, displayed at the head of the French soldiers, having succeeded La Fayette in the command of the army of the North. He rendered very important service to his country by the stand he so skillfully made against the Prussian invaders in the forest of Argonne, in September, 1792, the famous "Cannonade of Valmy" taking place on the 20th of the same month. His rapid conquest of Belgium followed. Notwithstanding his success, the Directory entertained suspicions regarding his designs, because it was known that he was desirous of sparing the life of the king, and held that a constitutional monarchy was essential to save France from anarchy. When commissioners were sent to arrest him, he arrested them and sent them to the Austrians, with whom he had been negotiating. He soon had to go over to them himself. Finding that a reward of 300,000 francs was offered for his head, he went to Hamburg, where he lived on a small pension from the landgrave of Hesse-Cassel until 1804, when he accepted an asylum in England, wrote his own memoirs, and employed himself in other literary pursuits, at Turville Park, near Henley-upon-Thames. He was honoured with the friendship of the duke of Kent, with whom he kept up a correspondence. Died, 1823.

DUNBAR, WILLIAM, an early Scottish poet, who flourished about 1480-1520. He graduated M.A. at the university of St Andrews, entered the Franciscan order, and was frequently employed in some subordinate capacity on public embassies. Destined for the church, he was always hoping and trying to get a benefice, but he seems to have failed. The king, James IV., however, gave him a pension, and several times increased it. Dunbar's principal poem is "The Thistle and the Rose," written in commemoration of the king's marriage. Others are "Golden Terge," "Dance of the Deadly Sins in Hell," &c. After lying neglected for 300 years, his writings have for the first time been collected in the present century, and he is now ranked among the best Scottish poets.

DUNCAN, ADAM, Viscount **DUNCAN**, of Camperdown, &c., a gallant and distinguished naval officer, was a native of Dundee, and born in 1731. He went to sea when young, rose to the rank of post-captain in 1761, and steadily advanced till he became admiral of the Blue, and commander of the North Sea fleet in 1795. He was with Lord Keppel at the taking of the Havannah, and had a full share in Rodney's victory over the Spaniards, the relief of Gibraltar, &c. While in command of the North Sea fleet, he had for

two years the tedious duty of watching the movements of the Dutch squadron, and was at length forced to quit the station, in consequence of a mutiny breaking out among his men, during which the enemy put to sea. The gallant admiral, however, after displaying the most undaunted resolution during the mutiny, came up with the Dutch fleet off Camperdown, totally defeated them, and captured 8 sail of the line, June 11, 1797. Upon this he was created a viscount, with a pension of £3000 per annum to himself and the two next heirs of the peerage. Died, 1804.

DUNDAS, Sir DAVID, general in the English army, and a member of the privy council, was born at Edinburgh in 1736, and entered the military service in 1758. He became colonel of the first regiment of dragoon guards, and had the reputation of being a most able tactician. On the temporary resignation of the duke of York, he was made commander-in-chief. His "Principles of Military Movements" and "Regulations for the Cavalry" are both acknowledged as standard works in the army. Died, 1820.

DUNDONALD, ARCHIBALD COCHRANE, Earl of, born, 1749. He became a cornet of dragoons, but exchanged from the army to the navy, and had risen to the rank of lieutenant when he succeeded to the earldom. He now devoted himself entirely to scientific pursuits, with the intent of making improvements in the commerce and manufactures of the kingdom. Among the numerous works published by him in the prosecution of this patriotic intention, were "The Principles of Chemistry applied to the Improvement of Agriculture," "An Account of the Qualities and Uses of Coal Tar and Coal Varnish," &c. He made many useful discoveries, for some of which he obtained patents; but unfortunately, though he did good service to his country, he was so far from enriching himself, that he was at one time obliged to receive aid from the Literary Fund. Died, 1831.

DUNDONALD, THOMAS COCHRANE, tenth earl of that name, was born December 14, 1775, and has left behind a name memorable for the splendour of his exploits, and for an obloquy such as seldom falls to the lot of man, and is yet more rarely silenced before the sufferer sinks into his grave. This good fortune was in his case permitted to gild the closing days of a life long darkened by deep sorrow and suffering. His father had much impaired, by scientific experiments, a property not great when he inherited it; and his son had to commence life, in his own words, "as heir to a peerage without other expectations than those arising from my own exertions." Intended by his father for the army, he succeeded, not without difficulty, in carrying out his own wishes, which led him strongly to the navy. In his 18th year he joined the Hind frigate. His first voyage was to Norway; and he became a lieutenant in 1796. Two years later he was made master and commander, and with the Speedy, a sloop of war of fourteen guns and fifty-four men, which he describes as "the least efficient craft on the station" (the

Mediterranean), he succeeded in ten months in taking thirty-three vessels, for one of which, the Spanish frigate, *El Gamo*, thirty-two guns, taken off Barcelona, he received the commission of post captain, dated August 8th, 1801. On the 3rd of July of the same year the *Speedy* was herself taken by the French fleet, under Admiral Linois; but so great had been his courage that on tendering his sword it was at once returned to him by Dessaix. Being exchanged soon afterwards by Sir James Saumarez, he returned to England, and went upon half pay. It was only by dint of constant requests that, on the breaking out of the war again, he was at length appointed to the *Arab*. In 1805, while in the *Pallas*, he took many prizes; and for the next four years he distinguished himself by brilliant exploits, in cutting out vessels, storming batteries, burning signal-houses, and for that combination of skill and courage which prompted his designs for destroying whole fleets at once. When once more in England he became M. P., first for Honiton, then for Westminster; and by his vigorous attacks on the abuses of naval administration made himself obnoxious to the Admiralty. Still his reputation was such that, in 1809, he was consulted on the subject of the French fleet, which, long blockaded by Lord Gambier at Brest, had escaped into the Basque Roads. While to Lord Gambier the attack seemed to involve too much risk, Lord Cochrane at once undertook to destroy them by fireships. With these, on the night of the 11th of April, he actually destroyed several, and caused a panic so overwhelming that a vigorous co-operation would, as he believed, have enabled him to destroy the whole. For this alleged neglect Lord Gambier was tried by court-martial and acquitted; and Lord Cochrane, although made a K. C. B., became henceforth a "marked man," and was at length superseded. At Malta he boldly denounced the abuses of the Prize Court, which by exorbitant charges exacted for the condemnation of prizes more than the actual worth of the vessels. Possessing himself by force of the official table of fees, which had been hidden away because they sanctioned no such extortion, he was committed to prison by the Court, but succeeded in making his escape. This subject, as well as the treatment of prisoners of war, and other naval topics, he brought before the House of Commons, and thus rendered the government still more persistent in refusing to listen to his plan for destroying the French fleet in the Scheldt. In 1814 he was tried for fraudulent speculations on the Stock Exchange, the charge being that he had caused a rise in the funds by a false rumour of the fall of Napoleon, and then sold out to a large amount. He was found guilty, sentenced to a fine of £1000, to undergo a year's imprisonment, and to stand in the pillory. This last part of the sentence was remitted; but he was deprived of the Order of the Bath, of his rank in the navy, and his seat in the House of Commons. But the electors of Westminster again returning him as their member, he broke from prison and took his seat. He was, however, recaptured and kept in prison

till the expiration of his sentence. In 1818 he went abroad and served in foreign navies, and powerfully aided to establish the republic of Chili and the empire of Brazil. In 1830 the Whig party, to which he had always belonged, restored him to his naval rank, as the opinion was generally gaining ground that he had been unjustly condemned to suit the political purposes of his opponents. In the following year he succeeded his father in the earldom of Dundonald, and became vice-admiral of the Blue in 1841. In 1847 the Order of which he had been deprived was restored to him, and he was made a G. C. B. The remainder of his life was spent chiefly in drawing up his own *Life under the title of the "Autobiography of a Seaman,"* which has triumphantly vindicated his good fame. His daring schemes and brilliant courage left the impression of foolhardiness on minds habituated to the caution of official routine; but there are times when a readiness to encounter the greatest risks is really the highest wisdom, and when the most daring schemes are grounded on the soundest prudence and calculation. The fortunes of Lord Dundonald at once suggest the parallel with Themistocles; but Lord Dundonald has emerged more successfully than the great man whom he so strikingly resembled from the obloquy which for a time overshadowed his name. He suffered much, but he had the consciousness that he was suffering unjustly; and before his eyes were closed in death, he knew that this knowledge of his integrity was shared by all his countrymen. He died October 30, 1860, retaining his full powers of mind, in the 84th year of his age.

DUNN, SAMUEL, a mathematician, who having acquired considerable property in the exercise of his profession, bequeathed it at his death towards the foundation of a mathematical school at his native town of Crediton, in Devonshire. He published an atlas, treatises on bookkeeping, navigation, &c.; and died in 1792.

DUNNING, JOHN, Lord ASHBURTON, a celebrated lawyer, was born at Ashburton, Devon, in 1731. After serving his clerkship in his father's office, he studied for the bar; and rapidly attaining an eminence in the profession, he became counsel for Wilkes, whose cause he conducted in such a manner as to establish his fame as a sound lawyer and adroit pleader. He became attorney-general in 1767, chancellor of the duchy of Lancaster in 1782, and was raised to the peerage, but died in the following year.

DUNOIS, JEAN, count of Orleans and Longueville, an illegitimate son of the duke of Orleans, was born in 1402. So successful was he in his military career, particularly in the share he bore in the expulsion of the English from France, that Charles VII. honoured him with the title of "Restorer of his Country." Died, 1468.

DUNS SCOTUS, JOHN, one of the most celebrated scholastic philosophers, was born probably about 1275. Whether he was a native of England, Scotland, or Ireland, is uncertain. He appears to have studied at Oxford, became a fellow of Merton College, and in 1301 professor of theology. He had also entered the Franciscan Order. He

afterwards taught at Paris, and acquired the title of "Doctor Subtills." He obtained extraordinary reputation by his defence of the dogma of the Immaculate Conception of the Virgin. In philosophy he was the opponent of Thomas Aquinas, and the founder of a school named the *Scotists*; the followers of Aquinas being called *Thomists*. The former were Realists, the latter Nominalists. The works of Duns Scotus form 12 vols. folio. Died soon after his arrival at Cologne, 1308. "Duns," as a term of reproach used by the Thomists, has become, with a modified meaning, the familiar "Dunce."

DUNSTAN, ST, archbishop of Canterbury, and one of the greatest of ecclesiastical statesmen, was born at Glastonbury, of a noble family, and was educated at its monastery, then famed as a seat of learning. His studies and accomplishments were very varied, mechanical, scientific, literary, and artistic. Brain-fever resulted from his over-application to study, and left behind it the belief that he had personal conflicts with the devil. He became a favourite at the court of Athelstan, especially with the ladies, but falling under suspicion of magical arts, was subjected to the ordeal of water and banished. A severe struggle ensued between affection and ambition; he was in love with a lady of the court, and he was urged to become a monk. He resolved to enter the Benedictine order, and became an anchorite at Glastonbury. In 943 he was named abbot, and at once introduced the rule of St Benedict, richly endowed the monastery, and made it at once a house of monks and of scholars. He was soon called to be one of the councillors of King Edmund, and in cooperation with the great Chancellor Thurketul and Archbishop Odo, set himself to carry out his principles of reform in church and state. He was the friend, as well as the minister, of Edred, and his power constantly increased. On the coronation of Edwy he disgraced himself by his violent conduct when sent by Odo to recall the young king to the banquet. He forced the crown on Edwy's head, and dragged him from his wife's bower to the hall. And the subsequent horrible mutilation of the young queen was the work of his agents. A reaction in the popular mind led to his retirement, and not being able to account for monies which had come into his hands as treasurer of Edred, he was banished. Recalled in 957, he was made bishop of Worcester and of London, and in the following year, after two disappointments, archbishop of Canterbury. In the reign of the licentious Edgar, Dunstan was virtually sovereign, and by his wise policy procured for Edgar the title of the Pacific. Many important measures of social as well as ecclesiastical reform were carried out under his direction. But he was not very scrupulous about the means he used; and there seems little doubt that he escaped a defeat in the council of Winchester, on the question of the married clergy, by a trick of ventriloquism, and again at Calne, by a mechanical trick, by which that part of the floor on which his adversaries stood was made to give way, injuring many and killing some. After the accession of Ethelred

Dunstan retired to Canterbury, and devoted himself to his spiritual duties. He left several literary works. Died at Canterbury, and was buried in the cathedral, in 988.

DUNTON, JOHN, a noted London bookseller, was born at Graftham, Huntingdonshire, in 1659. He projected and carried on "The Athenian Mercury," a selection from which, under the title of "The Athenian Oracle," in 4 vols., was reprinted. He was also the author of "Athenianism," consisting of numerous treatises in prose and verse; and a curious work, entitled "Dunton's Life and Errors." Died, 1733.

DUPATY, CHARLES, French sculptor, born at Bordeaux, 1771, his father being president of the parliament of Bordeaux. He studied seven years at Rome, and afterwards executed many beautiful works. Died, 1825.

DUPERRON, JACOB DAVY, Cardinal, was a native of Switzerland. He was sent to study at Paris, and there renounced Calvinism, and attached himself to the service of Henry III., who was not slow to reward him. He served the Cardinal de Bourbon a short time, and then went over to Henry IV., who charged him with several embassies. Duperron at length obtained the bishopric of Sens, and was created a cardinal. He assisted at the States-General of 1614. He was a great admirer of Montaigne and Rabelais, and was himself also author of various works, political, controversial, &c., which fill 3 vols. folio. Born, 1556; died, 1618.

DUPIN, ANDRÉ MARIE JEAN JACQUES, the distinguished French jurist and statesman, was born at Varzy, in the department of the Nièvre, in 1782. He was the son of an eminent lawyer who was a member of the Legislative Assembly of 1791-92, and narrowly escaped the guillotine in the Reign of Terror. He was familiarly known as "Dupin l'aîné," being the eldest of three brothers, all of whom obtained distinction; and of whose mother it is related that she desired no other epitaph than this—"mother of the three Dupins." André was brought up to the law, studied at the Académie de Législation at Paris, and was called to the bar in 1802. Very early in his career he excited the suspicion and anger of the First Consul by a passage in one of his elementary works on law, and the book was suppressed. He rose to high reputation in his profession, and in 1811 was named member of the commission appointed for the classification of the laws of the empire. In May, 1815, he was elected deputy to the Chamber of Representatives, and with great firmness and independence resisted the last efforts of Napoleon and his adherents to save the empire. He supported the restoration, but was soon driven by the follies and tyranny of the government to become its stout and persistent opponent. His greatest reputation as advocate was won in those days when he was the zealous and powerful defender of the freedom of the press, and of the adherents of the fallen dynasty who were subjected to prosecution. Wilson and his

associates who aided the escape of Lavalette; and amongst others General Savary, De Pradt, and the popular poet Béranger. One of his most celebrated efforts was the successful defence of the *Journal des Débats*, in 1829. He remained a popular leader throughout the reign of Charles X.; was the vigorous opponent of the Polignac ministry, and distinctly declared the illegality of the famous ordinances of July, 1830, the immediate occasion of the revolution. In the measures for the elevation of Louis Philippe, duke of Orleans, to the throne, he took an influential part; and the king, whose consulting lawyer he had been since 1820, rewarded him with the appointment of Procureur-Général to the Court of Cassation, which he held for twenty-two years. He was a firm supporter of the government, and made himself unpopular by condemning revolutionary excesses. In 1832 he was chosen president of the Chamber of Deputies, and was annually re-elected till 1840. M. Dupin was generally the opponent of the war party, but he advocated intervention in the East. At the revolution of February, 1848, it was Dupin who presented the young Comte de Paris to the Chamber of Deputies, and proposed his election as king under the regency of the duchess of Orleans. He was an active member of the Constituent, and afterwards of the Legislative Assembly; and was president of the latter. He remained passive at the Coup d'Etat of 2nd December, 1851, but in the following month, immediately on the confiscation of the property of the Orleans family, he resigned his post of Procureur-Général and retired from public life. To the surprise of his friends he resumed it, and became a senator in 1857; thus lending the weight of his name and character to the system of Napoleonic imperialism. He justified his position by saying that he had ever belonged to France, but never to any political parties. In 1864 he made a masterly speech against active intervention in behalf of the Poles; and more recently his earnest brochure against the prevalent extravagances in the dress of women attracted much attention. M. Dupin was Grand Cross of the Legion of Honour since 1837, member of the French Academy since 1832, and member of the Institute. Among his numerous works on law may be named the "Principia Juris Civilis," "Manuel du droit Ecclésiastique Français," and the collection of his Pleadings and Memoirs, in 20 vols., &c. Died at Paris, in his 83rd year, 10th November, 1865.

DUPIN, LOUIS ELLIES, an eminent French historian and ecclesiastic, was born in Normandy, in 1657. He became professor of divinity in the Royal College, but lost the professorship in consequence of his religious moderation. He was the author of an extensive and valuable work, entitled "Bibliothèque Universelle des Auteurs Ecclésiastiques," in 58 vols.; and for the freedom and tolerance of his opinions therein he was exposed to much persecution. He was also the author of various other works on church government and practical divinity. He died in 1719.

DUPLEIX, JOSEPH, was a celebrated French merchant, who, as the head of the factory at Chandernagore, had raised it to such a pitch of prosperity, that, in 1742, he was appointed governor of Pondicherry, and director-general of the French factories in India. In 1748 he successfully defended it against the English, for which he was raised to the rank of marquis; and during his whole administration he displayed first-rate talents, both civil and military. But his valuable services did not shield him from the shafts of envy: he was recalled; and the man who had been surrounded by all the splendour of an eastern court, was left to languish in poverty, vainly solliciting justice from an ungrateful government. He died, the victim of anxiety, in 1763, 9 years after his recall.

DUPLEIX, SCIPION, historiographer of France, was born in 1569. He wrote a "Histoire Générale de France," in 5 vols. folio, and other works, but they have been long forgotten. It is asserted, that, having written a work on the liberties of the Gallien Church, which he took to the chancellor Segulier to be licensed, that magistrate threw it into the fire; which so preyed upon his mind that it caused his death, in 1661.

DUPLESSIS-MORNAY. [MORNAY.] DUPONT DE NEMOURS, PIERRE SAMUEL, a French political economist, was born at Paris, in 1739. Though he twice sat as president of the Constitutional Assembly, and held other high official situations under the revolutionary government, he invariably opposed the anarchists, and narrowly escaped becoming their victim, in 1797, by his timely retreat to America. From that country he returned in 1805, and became president of the Chamber of Commerce; and in 1814 he was appointed secretary to the provisional government. In the following year he finally retired to America, where he died in 1817. Dupont was the author of various treatises on different branches of political economy; he also wrote "Philosophie de l'Univers," and other works of merit.

DUPPA, BRIAN, an English prelate, and the faithful friend of Charles I., was born at Lewisham, Kent, in 1589, and educated at Christchurch, Oxford, of which he was afterwards dean. He attended the king in the Isle of Wight, and is said to have assisted him in the *Icon Basilike*. He was successively bishop of Chichester, Salisbury, and Winchester. Died, 1662.

DUPPA, RICHARD, barrister and littérateur, was educated at Trinity College, Oxford, and took the degree of LL.B. at Cambridge, in 1814. He wrote many works, among which are "The Life and Literary Works of Michael Angelo Buonarrotti," "The Life of Raffaele," "Travels in Italy," &c. Died, 1831.

DUPRAT, ANTOINE, cardinal-legate, and chancellor of France, was born in Auvergne, in 1463. He became an advocate, and in 1507 was named first president of the parliament of Paris. On the accession of Francis I., to whom, and to whose mother, Louis of Savoy, Duprat had warmly attached himself, he was appointed chancellor. He followed the king in his Italian campaign,

tains but one painting of Dürer, a "Portrait of a Senator." Albert Dürer was a friend of Melancthon, and embraced the reformed faith. He was author of several works on fortification, mathematics, human proportion, &c. Died at Nürnberg, April 6, 1528. The sorrows of his married life form the subject of Schefer's charming and pathetic tale, "The Artist's Married Life."

D'URFEY, THOMAS, a facetious poet, once highly popular, but now forgotten, was the son of a French refugee, and born at Exeter in 1628. He abandoned the study of the law for the life of a dramatist, and was author of about 30 comedies, all of which have justly become obsolete from their licentiousness. He was also a writer of songs and party lyrics, which were printed in 6 vols., under the title of "Pills to purge Melancholy;" and being the boon companion of Charles II., his society was courted by the witty and profligate frequenters of his court. Died, 1723.

DURHAM, JOHN GEORGE LAMBTON, Earl of, was the eldest son of W. H. Lambton, Esq., of Lambton Castle, M.P. for the city of Durham, by Lady Anne Villiers, daughter of the earl of Jersey. He was educated at Eton, served in the 10th hussars, and at the age of 20 married Miss Harriet Cholmondeley, by whom he had three daughters, all now deceased. In 1816 this lady died; and in the following year he formed a matrimonial alliance with Lady Louisa Elizabeth, the second daughter of Earl Grey. During the whole of his parliamentary career he denounced Tory influence, and steadily adhered to the doctrine of reform as originally propounded by his noble father-in-law; but in 1827 we find him a supporter of Mr Canning's ministry, and on the dissolution of Lord Goderich's cabinet, in 1828, he was raised to the peerage by the title of Baron Durham. On the formation of Earl Grey's government in 1830, he became a member of the cabinet, as lord privy seal; and to him is mainly attributed the great extent and liberality of the reform bill, and its eventual triumph. He was now hailed as the great leader of the movement party, and became a popular idol; his presence was eagerly solicited at all the great radical meetings, and his admirers were on tip-toe in the expectation that he would be raised to the head of public affairs. In 1835 his lordship went to Russia as ambassador, and remained there till the summer of 1837, when he returned to England; and in the following year he went out as governor-general to Canada, intrusted with extraordinary powers; but finding himself not supported as he expected by the ministry, he returned home the same year. So opposite have been the sentiments with regard to Lord Durham's general policy and his qualifications as a statesman, that to a mind disposed to be impartial it is difficult to form a correct opinion of them; but we believe that we may safely reiterate the following encomium on him:—"From his first appearance on the field of politics to the last, no man ever thought of even doubting his rectitude and determined adherence to his

conscientious convictions." Born, April 12, 1792; died, July 28, 1840.

DURHAM, Admiral Sir PHILIP CHARLES CALDERWOOD, was born at Largo, in Fifeshire, in 1763, and entered the navy in 1777, as a midshipman on board the Edgar, of 74 guns. He was afterwards acting lieutenant in the Viceroy, 104, flag-ship of Admiral Kempenfelt, whom he followed on his removing to the Royal George. When that noble ship "went down" at Spithead, Aug. 29, 1782, the subject of this memoir was officer of the watch; and his miraculous escape on that fatal day is so extraordinary and interesting, that we shall briefly relate the circumstances. Finding the ship was sinking, Lieut. Durham threw off his coat and plunged into the water, where he was seized by a drowning marine, by whom he was twice carried down; on rising the second time, he succeeded in extricating himself from the dying man's grasp by tearing off his waistcoat, and he, with one of the seamen, was eventually saved by seizing the halyards from the mizen-topmast-head, by which they reached the mast-head, from whence they were taken with great difficulty by a boat. The poor marine's body was washed on shore a fortnight afterwards, with the waistcoat by which he had caught hold of Lieut. Durham so firmly twisted round his arm, that a pencil-case, bearing the lieutenant's initials, was found in the pocket, and restored to the owner. When Lieut. Durham had reached a place of temporary security, he observed the captain (Waghorn) holding by the weather mizen-topmast-yard-arm, and sent a boat to his aid; and these two were the only officers saved. Soon after this event he was appointed acting lieutenant of the Union, 98, at the relief of Gibraltar, by Lord Howe; and after various promotions, to which his services well entitled him, he commanded the Defence, of 74 guns, at the battle of Trafalgar, Oct. 21, 1805; but, in fact, he was almost continuously employed from 1780 to 1815, when the last Buonapartean flag that waved in the West Indies struck to him. He was made vice-admiral in 1819, and full admiral in 1820. His last service was that of commander-in-chief at Portsmouth, which post he resigned in 1839. Sir Philip was M.P. for Queenborough in 1830, and for Devizes in 1835. Died, April 2, 1845.

DUROC, MICHEL, duke of Friuli and marshal of France, was born in 1772, and entered the army in 1792. Being subsequently appointed aide-de-camp to Buonaparte, he accompanied him to Egypt, where he eminently distinguished himself, and was severely wounded by the bursting of a howitzer. On the formation of the imperial court in 1805, he was created grand-marshal of the palace; and was afterwards employed in diplomatic missions, though he still took his full share of peril and glory in the wars of France, till the time of his death, which happened at the battle of Wurtzchen, in 1813. Napoleon, who was firmly attached to Duroc, wept over him on his death-bed; and perhaps he never had to lament the loss of a more faithful friend or a braver soldier.

DUSART, CORNELIUS, a Dutch painter,

who excelled in tavern scenes, revelry, &c., was the disciple of Adrian Ostade. Born, 1665; died, 1704.

DUSSEK, JOHANN LUDWIG, an eminent musical composer, was born at Czeslau, in Bohemia, in 1762, and studied at Hamburg, under the famous Emanuel Bach. From the north of Europe he went to France, but being compelled to leave that country during the revolution, he came to London in 1796, and, in conjunction with Corri, opened a musical establishment. In 1799 he returned to the continent, and died in 1812.

DUTENS, LOUIS, miscellaneous writer, was born at Tours in 1730. He became secretary and chaplain to the British minister at Turin, who left him there, on his return to England, as chargé-d'affaires. He afterwards obtained the living of Elsdon, in Northumberland, became F.R.S., and died in London, 1812. His principal works are, "Recherches sur l'Origine des Découvertes Attribuées aux Modernes," "Des Pierres Précieuses et des Pierres Fines," "Mémoires d'un Voyageur qui se Repose," and a good edition of the works of Leibnitz.

DUTENS, JOSEPH MICHEL, French engineer and political economist, was born at Tours in 1765. He visited England on a government mission in 1818, to investigate the canal system and other public works, and published soon after "Memoirs on the Public Works of England." His most important work is the "Philosophie de l'Economie Politique," which appeared in 1835. He wrote several other treatises, was admitted to the Academy of Sciences, and died, 1848.

DUTROCHET, RENÉ JOACHIM HENRI, French physician and natural philosopher, was born in 1776. He studied at Paris, and became physician to Joseph Buonaparte on his accession to the throne of Spain. He soon, however, returned to France and devoted himself to physiological and kindred studies. His most celebrated researches are those on the passage of fluids through a membrane. He published "Nouvelles Recherches sur l'Endosmose et l'Exosmose," and "Mémoires pour servir à l'Histoire Anatomique et Physiologique des Végétaux et des Animaux." Died at Paris, 1847.

DUVAL, whose real name was VALENTINE JAMERAI, the son of a peasant, was born at Artonay, in Champagne, in 1695. Being left an orphan at the age of 10, he was employed as a shepherd's boy, and underwent great privations; but at 18, he became keeper of the cattle belonging to the hermits of St Anne, near Lunville, and by one of that fraternity he was taught to read. Thenceforth he displayed an earnest desire for acquiring knowledge; and being discovered by two noblemen while he was studying geography under a tree, with his maps stretched out before him, they were so pleased with his conversation, that they introduced him to the duke of Lorraine, who sent him to college, afterwards made him his librarian, and eventually procured him the situation of keeper of the books and medals of the imperial cabinet of Vienna. He published several learned works on coins, and died in 1775.

DUVERNEY, JOSEPH GUICHARD, a celebrated French anatomist, was born at Feurs, in 1648; appointed professor of anatomy at the Jardin du Roi in 1679, and died in 1730. He was the author of a celebrated "Traité de l'Organe de l'Ouïe," which was frequently reprinted and translated into several languages. He wrote also other works illustrative of the science he professed.

DWIGHT, TIMOTHY, an American divine, of great reputation both as a pulpit orator and a writer, was born in Massachusetts, in 1752; became president of Yale College in 1795; and died in 1817. His "System of Theology," once regarded as a work of great merit, has been frequently reprinted.

DYCE, WILLIAM, the distinguished historical painter, was born at Aberdeen in 1806. He studied at Marischal College, and thence passed to the schools of the Royal Scottish Academy. He at first painted portraits, but after twice visiting Italy, he applied himself to the higher forms of his art, and showed the fruits of his study and admiration of both German and French historical painters. He was named superintendent of the new Schools of Design, and held that office three years. He contributed greatly both as painter and teacher to foster an intelligent interest in fresco-painting, and he was employed to paint some frescoes in Buckingham Palace, and at Osborne. His most important works are the series of frescoes from the Life of Christ in All Saints Church, Margaret Street, and the unfinished series in the Palace at Westminster. His "Baptism of Ethelbert," in the House of Lords, is considered one of his best works.

Dyce was admitted A.R.A. in 1845, and R.A. three years later. He subsequently painted in the manner of the school known as Pre-Raphaelite, and among his pieces in that style are the scenes from the Lives of Titian and George Herbert, and several subjects from sacred history. Among his cabinet and gallery pictures are a "Madonna and Child," the "Meeting of Jacob and Rachel," "Josh shooting the arrow of deliverance," "King Lear and the Fool," &c. Mr Dyce was especially an educated painter, but he was also a very learned ecclesiastical and theological scholar, an accomplished musician, and an able writer. Died in February, 1864.

DYER, SIR EDWARD, a poet of the Elizabethan age, was born about 1540, and educated at Oxford. He received many proofs of the royal favour after he had returned from his travels, being employed in various embassies by the queen, who conferred on him the chancellorship of the Carter in 1596. His poetical pieces consist chiefly of pastoral odes and madrigals.

DYER, GEORGE, a classical scholar and miscellaneous writer, whose long life of literary toil may be depicted by quoting from the Gentleman's Magazine the following mournful record: "The greatest labour of his life was the share he had in the production of Valpy's edition of the classics in 141 volumes, being a combination of the Delphin, Bipont, and Varlorum editions. With the exception of the preface, Dyer contributed all that was original in this

east work, upon the year 1819 completed this work and shortly afterwards." The writer (the space which he occupies in the paper is a pie), "The never cherished passed through contracted one guileless strip to his friend C. Indeed, indulgence of one venerable innocence that, in doing so familiar to the integrity and so been accustomed patterns of his in 1755; received Hospital and 1814 and died in 1814 varied and not classical, and "History of the Cambridge," 2 legs of the Un vols., are the n

east work, upon which he was engaged from the year 1819 to 1830! *He had scarcely completed this work when his eyesight gave way, and shortly afterwards left him in total blindness.* The writer adds (and let us not grudge the space which the unaffected tribute occupies), "The memory of George Dyer will be ever cherished by his friends as of one who passed through the world without having contracted one blemish of worldliness; his guileless simplicity endeared him especially to his friend Charles Lamb, who would often, indeed, indulge his humorous vein at the expense of one whom he knew to be of invulnerable innocency, but who has also declared that, in doing so, it was his ambition to make familiar to the public a character which, for integrity and single-heartedness, he has long been accustomed to rank among the best patterns of his species." Mr Dyer was born in 1755; received his education at Christ's Hospital and Emanuel College, Cambridge; and died in 1841, aged 85. His writings are varied and numerous; historical, poetical, classical, and political; amongst them his "History of the University and Colleges of Cambridge," 2 vols., and the "The Privileges of the University of Cambridge," &c., 2 vols., are the most important.

DYER, SIR JAMES, chief justice of the Common Pleas, and speaker of the House of Commons, was born in 1512, and died in 1581. Dyer's "Reports" are still highly valued by the profession.

DYER, JOHN, a poet of considerable reputation, was born at Aberglasney, Carmarthenshire, in 1700, and educated at

Westminster School. He was intended for the law, which he abandoned for painting, but not arriving at excellence as an artist, he took orders, and obtained some respectable church preferment. In 1727 he published his poem of "Gronzar Hill," which met with deserved success. He then made the tour of Italy, where, besides the usual study, he often spent whole days sketching in the country about Rome and Florence, and thence derived the hints for the beautiful landscapes depicted in his two subsequent poems. These are entitled "The Ruins of Rome" and "The Fleece." His poetry displays a lively imagination, and combines great originality with the warmest sentiments of benevolence and virtue. He died in 1758.

DYMOND, JONATHAN, an English moralist, was born at Exeter in 1796. He was a member of the Society of Friends, and carried on the business of a draper. He wrote an "Essay on the Principles of Morality, and on the Private and Political Rights and Obligations of Mankind," in which he reasons with much good sense and earnestness against utility and expediency as bases of morality, and maintains that its real foundation is the will of God as made known through the Bible. This Essay appeared in 2 vols. 8vo, in 1829, and has passed through many editions both in England and America. It was reviewed by Southey in the Quarterly Review, No. LXXXVII. Dymond was also author of an "Inquiry into the Accordancy of War with the Principles of Christianity." Died, 1828.

E.

EADMER, a learned British monk and historian who lived in the 11th and 12th centuries. He was the friend of Anselm, archbishop of Canterbury, and was chosen to the see of St Andrews, but refused it in consequence of the Scottish king's objection to recognize pre-eminence on the part of the archbishop of Canterbury over the Scottish bishop. The most important work of Eadmer is his "Historia Novorum," a history of England between the years 1064 and 1122. He wrote also Lives of St Anselm, St Dunstan, St Wilfred, &c.

EARLE, JOHN, an English prelate, was born at York, and entered of Merton College, Oxford, in 1620. He became chaplain and tutor to Charles, prince of Wales, and suffered much in the civil war. At the restoration he was made dean of Westminster and bishop of Worcester, from which see he was translated to Salisbury in 1663. Dr Earle was the author of an ingenious work, entitled "Microcosmography; or, a Piece of the World discovered, in Essays and Characters." He

also translated the Icon Basillike into Latin. Died, 1665.

EARLON, RICHARD, a mezzotinto engraver, who lived in the latter half of the 18th and the beginning of the 19th century. His taste for design is said to have been excited by inspecting the ornaments on the lord mayor's coach, which had been painted by Cipriani. He was employed by Boydell to make drawings from the celebrated collection of pictures at Houghton, which he afterwards engraved in mezzotinto—an art in which he was his own instructor. He also engraved and published two volumes of plates from Claude's Liber Veritatis; several fine flower-pieces from Van Huisum; a tiger hunt, and other subjects, from Zoffany, &c.

EBELING, CHRISTOPH DANIEL, a distinguished geographer, was born in 1741; died, 1817. He long held the post of professor of history at Hamburg, as well as that of city librarian. He made himself known by an extensive work on the history and geography of the United States.

EBERHARD, JOHANN AUGUST, German philosopher, born at Halberstadt in 1739. He studied at Halle, and entered the church, but his advance was hindered by suspicion of his orthodoxy. The influence of Frederiek the Great procured him the post of preacher at Charlottenburg. He afterwards became professor at Halle, and for some time distinguished himself by his opposition to the philosophy of Kant. Eberhard was a follower of Leibnitz. His philosophical works are a "Neue Apologie des Sokrates," "Theorie des Denkens und Empfindens," "Sittenlehre der Vernunft," "Theorie der schönen Künste und Wissenschaften," &c. He was also author of a valuable dictionary of synonyms, "Versuch einer Allgemeinen Deutschen Synonymik," and contributed numerous papers to periodical literature. He was a privy councillor of the king of Prussia, and a member of the Academy of Berlin. Died, 1809.

ECHARD, LAURENCE, an English divine and historian, was born about 1670; received his education at Cambridge; became archdeacon of Stowe, and obtained some valuable livings in his native county, Suffolk. He was a very voluminous writer; "The Roman History," "A General Ecclesiastical History," and a "History of England," were the most prominent of his works. They are now forgotten. Died, 1730.

ECKHARD, JOHANN FRIEDRICH, a learned and voluminous writer on philology and bibliography, was director and librarian of the college of Eisenach; born in Saxony in 1723, and died in 1794.

ECKHARD, JOHANN GEORG, antiquary and historian, was born in the duchy of Brunswick, in 1674, and brought up a Protestant, but abjuring his religion, he was made historiographer and keeper of the archives at Wurzburg. His principal works are, "Corpus Hist. Medii Aevi," "Origines Habsburgo-Austricae," "Commentarii de rebus Franciae Orientalis," &c. Died, 1730.

ECKHEL, JOSEPH HILARY, one of the most distinguished numismatists of modern times, was born in Austria, 1737. He entered the order of Jesuits at an early age, and after visiting Italy he obtained the post of director of the Imperial Cabinet of Medals, Vienna. His fame rests chiefly on his great work entitled "Doctrina Numorum Veterum," which appeared, in 8 vols., between 1792 and 1798. Its fullness of information, excellence of plan and of style, gave it at once a very high place amongst works of its class. Eckhel wrote many other works on his favourite subject, among which are "Numi Veteres Anecdoti ex Musaeis," his first work; a catalogue of ancient coins in the Imperial Museum, Vienna; "Choix de Pierres Gravées du Cabinet Impérial des Antiques," &c. Died, 1798.
