TREASURER M'ADOO TO **DENY BANK CHARGES**

With Comptroller William Has Filed Long Affidavit in Answer to Injunction Suit

WASHINGTON, May 15.—Secretary of the treasury McAdoo and Comptrol-ler Williams filed in the district su-preme court today an answer to the njunction suit brought by the Riggs National Bank, charging them with onspiracy to wreck the institution.

The answer was a sweeping denial of the bank's charges. Both officials presented long affi-devits that they did not combine nor

conspire to injure the bank, that their actions, which were set forth, are ground for the bank's charge were taken in the exercise of proper discre-tion and because of conditions and ineldents in connection with its manage-ment, the propriety and sometimes the lawfulness of which they questioned.

turned Langton's name down, and now the only question before them is whether they will have a commissioner or not, no name being mentioned. There is no doubt about a commissioner being favor-

dition than ever.

doubt about a commissioner being favor-ed and unless a nomination is made in council and the appointment made, Col. Langton will be again recommended, as a majority of the controllers favor him. There is a movement afoot, however, to make Ald. David Spence commissioner, and it is said that the whole quession has been purposely kept open so that there majority in council to elect Ald. Spence. This may or may not happen on Mon-day, but many of the aldermen think that Ald. Spence would make a good com-missioner. They say he is a good busi-ness man and has shown his interest in public affairs by the time he has given to the city's interests.

bride, who was brought in and given away by her father, looked very pretty in a gown of white satin with over-dress of filet lace, the court train of satin was scalloped at the bottom, the little jacket of the satin was also scalloped at the edge and embroidered with pearls, the corsage was of the filet lace, with high collar, a spray of orange blossom fastening the lace on the shoulder, her long tulle veil was arranged with circular wreath of fine orange blossom, and the carried a shower of lilles, whits sweet peas tipped with mauve and orchids, and wore the gift of the group, a platinum chain ending in two large diamonds. The matron of honor was the bride's sister, Mrs. Leslie Frequeon, and the bridesmaid Miss Frances Gardiner, who were dressed allke in gowns of pale blue chiffon, hats to match the gowns of chiffon with forget-me-nots and pale blue strings. They carried Vic-torian bouquets of Sunset reas dated

sowns of chiffon with forget-me-nots and pale blue strings. They carried Vic-torian bouquets of Sunset roses edged with forget-me-nots, and wore the sroom's gifts, to the matron of honor a gold bracelet, and to the bridesmaid a bar pin of pearls and sapphires. Mr. Lawrence Bragg was his brother's best man, and the ushers were the bride's brothers, the Messrs. Beverley and Harold Bowes, who are leaving with the 35th Brigade, and the Eaton Machine Gun Battery for the front, the groom giving them silver cigaret cases. After the ceremony Mrs. Bowes held Machine Gun Battery for the front, the groom giving them silver cigaret cases. After the ceremony Mrs. Bowes held a small reception at her house in St. George street, when she was wearing a very handsome gown of Parma vio-let velvet brocaded chiffon and satin, with a hat to match, with flowers, and carried a bouquet of pink roses. The bride's table was decorated with white sweet peas and chiffon Mr. and Mrs. Bragg left by the 5.20 train for The Clifton, Niagara Falls, enroute to New York asd Atlantic City, the bride traveling in a tailor-made of dark navy blue with hat to match, trimmed with black and white feathers. After a holiday of three months they will reside in Madison, Wis, U. S.A. Mr. and Mrs. Bragg, the father and mother of the groom, from Illinois, were pres-ent, the latter wearing a gown of ashes of roses satin with a plumed hat to match.

HOW I DARKENED MY **GRAY HAIR**

Lady Gives Simple Home Recipe That She Used to Darken Her Gray Hair.

For years I tried to restore my gray hair to its natural color with the prehair to its natural color with the pre-pared dyes and stains, but none of them gave satisfaction, and they were all expensive. I finally ran onto a simple recipe which I mixed at home that gives wonderful results. I gave the recipe, which is as follows to a

the recipe, which is as follows, to a number of my friends, and they are all delighted with it. To 7 ounces of water add a small box of Oriex Comwater add a small box of Orlex Com-pound, 1 ounce of bay rum and ¼ ounce of glycerine. These ingredients can be bought at any drug store at very little cost. Use every other day until the hair becomes the required shade, then every two weeks. It will not only darken the gray hair, but re-moves dandruff and scalp humors, and acts as a tonic to the hair. It is not sticky or greasy, does not rub off, and does not color the sealp.

proposed line from Georgian Bay to Hamilton and the Niagara peninsula, and which line would also be the means of connecting up the three great lakes—Huron. Ontario and Erie. On Wednesday a conference was held here, at which 150 delegates, re-presenting 'the municipalities in Wentworth and Haldimand Counties interested in the proposed line, were present and discussed the question of having such a 'line constructed. At this convention a branch of the On-tario Hydro-Electric Radial Associa-tion was also formed and will be known as the Greater Hamilton Hydro-Electric Radial Union. Officers were elected and a resolution was passed requesting the Ontario Hydro-Electric Commission to immediately prepare plans and an estimate of the cost of constructing the proposed difficers elected were as follows: Sir Adam Beck, London, honorary presi-dent: Controller Thomas S. Morris, Hamilton. Port Dover J.F. Vance, Waterdown, first vice-president;

where such regulations are not carried Note e such regulations are not carried out. For some months past the city and Township of Barton officials have been considering the question of giving a water supply to the residents of the township on the mountain top, but it seems that there is no possibility of such being done in the near future. be-cause the township residents feel that the cost of installing such a system is prohibitive at the present time. At yesterday's board of control meet-ing Controller Morris asked what was being done in the matter and urged that some immediate action be taken. He stated that people who are unable to sink wells are actually using the water out of the open ditches on the road-side, which practice might easily re-sult in an epidemic of some kind. Controller Cooper stated that the city had done everything it can and that it now rests with the township people re-sarding the installation of a water supply.

supply.

tal paid out of the fund until that date was \$61,614.93. Jitney Question. The regulation of the jitneys is a question being fully considered by Mayor Walters, as a police commis-sioner, and by Deputy Chief of Police Whatley. Both, at the city hall yes-terday, formally stated that the new transportation service hail certain rights on the street, but at the same time should have regular stopping places, so as to relieve the congestion of traffic at the corner of King and James streets. The mayor is more particularly concerned over the city's loss of street railway percentage, fol-lowing the establishment of the jit-meys, while Deputy Chief Whatley is anxious to overcome the crowding on the main streets. Mayor Walters has received a num-ber of communications regarding such services. One came from Milwaukee, Wis., and another from Washington, D.C. Regulations in these places make it filegal for a woman or girl to rest upon a man's lap, or vice-versa, in

D.C. Regulations in these places make it illegal for a woman or girl to rest upon a man's lap, or vice-versa, in street cars or automobiles. This is one of the rules to be adopted here. Ald. Peebles has suggested that the annual jitney fee be fixed at \$5, as in other places. The Hamilton, Grimsby and Beams-ville Electric Bailway must obey the

EARLY HISTORY OF CHIROPRACTIC

The principle or idea of pinched nerves in the spine being the real cause of disease was discovered by D. D. Palmer in 1895, in Davenport, Iowa. A man named Tillard, being very deaf, came to Dr. Palmer for examination, and a bone which seemed to be very prominent in his neck was crudely adjusted by the hand, soon after which his hearing was restored, much to the amazement of both. From this accidental occurrence, experiments and clinical work has proven that 95% of disease is due to vertebral subluxations. What is a subluxation? A bone slightly out of true position, bringing about pressure upon nerves as they pass out from spinal column. This pressure shuts off the nerve forces which control all organs and tissues of the body, bringing about illhealth or disease.

TRUE HEALTH AND HAPPINESS DEPEND UPON NATURE'S UNIVERSAL PROCESSES

The competent graduate chiropractor uses only his hands to adjust the spine to normal alignment. Nature restores health when the nerve forces are passing unobstructed to and from the brain throughout the body.

DESIRE FOR GREATNESS

Russia Had to Protect Serbia -England's Interference

BY ROBERT R. Me'CORMICK. BUCHAREST, May 15 .- The origin of the present great war is found in the treaty of Berlin executed on July 18, 1878.

18, 1875. Russia had come to the resoue of the revolting Christians in 1877, and after a bloody and costly war had practically driven the Turks from Eu-rope, when the other European nations interfered, restored Macedonia to Turkish misrule, and gave the provinces of Bosnia and Herzegovina to Austria to "occupy" and administer in the in-terest of the peace of Europe.

Shortly afterward Bulgaria followed Roumania's example in selecting a German prince for her king. The king of Greece married a sister of the pres-ent kaiser.

Jerman emperors were turned to the

ian Empire sympathized with a war against the Turks, but the Archduke Franz Ferdinand was bitterly opposed to a move which threatened the ex-

part of Albania, or to have access to the Mediterranean.

Serbians are a turbulent people, much given to violence and to plots. The conspiracy of assassination was a logi-cal outcome of the situation.

Prevented Dissolution.

The two most powerful internal influences in continental Europe are separate nationalistic governments and the strengthening of the monarchy Of the first we are unfortunately feeling the effects among our immi-grant population; of the second it is

almost impossible for an American born to have any comprehension. In Italy and Germany the two in-fluences worked together to make great nations. In Austria-Hungary great nations. In Austria-rich has only the strength of the monarchy has prevented the dissolution of the em-

prevented the dissolution of the em-pire. It is significant that all the movements toward the division of Austria-Hungary into a federation have acknowledged the right of the house of Hapsburg to rule over all. It was the monarch who, contrary to the will of both peoples, annexed Bosnia-Herzegovina to Austria-Hun-gary. It is only Bosnia-Herzegovina and neighboring Slavs that wish to leave the dynasty of Hapsburg for that of Kara George. leave the dynasty of Hapsburg for that of Kara George. The two great international policies

THE EAST

This map shows how Germany in her desire for expansion turned east, and thru marital and defensive alliances made Slavic Roumania and Bulgaria her agents in the Balkans, clearing a path to Turkey which was blocked only by Serbia. The shaded portion of the Balkans indicates the territory wrested from Turkey in 1912 and absorbed by the various Balkan countries-Albania being taken under the protection of Austria.

ters of a neutral state. Blockades are of two kinds. It is not

easy to give them precise descriptions, but for the sake of convenience one may be called a "military" blockade and the other a "commercial" blockade.

Both of them are operative in areas of water much less extensive than those in which the right of search may

The military blockade is not a block-ade at all. It does not aim at keeping

an enemy's fleet shut up in his port. What it does aim at is to get that fleet to come out so that it may be brought

to action. The so-called "blockader" endeavors to take up such a position that if the enemy's fleet does come out it will

either have to run back again or fight

a battle. The position referred to is not neces-

sarily close to the port in which the enemy's fleet is sheltering itself. Even

in the old days of sailing ships, when means of communication were much

scantier and much slower than those now available, there was consider-able difference of opinion as to the proper position to be taken up by the "blockading" force.

"blockading" force. For instance, some thought that when the Brest fleet was in question the right position was immediately off Brest; others thought that it was in some British anchorage, with which fairly rapid communication could be been in a by conjugate watching the

to the breakup of the empire---better war in 1914 than later. Ruesia was rapidly recovering from the effects of the Japanese war and building strategic rallways in imita-tion of Germany. France was in-creasing the size and efficiency of its army. Both ware momentarily are stated to go free with as little army and the size and efficiency of the size and efficiency of the army and the size and efficiency of the size and efficiency of the army are stated to go free with as little army are stated to go free with as first and the size and efficiency of the subject to investigation by a prize court. If, being neutral, she has no contraband of war in her cargo, she is allowed to go free with as little army. Both were momentarily embarrassed at home

A DMIRAL Sir Cyprian A. G. Bridge G. C. B., in an article explains the difference between the right of search and a blockade. He says: In naval beligerent procedure there is a wide difference between block-ades and what is called right of search. The right of searching a merchant worsel on the high seas by a properly is a wide difference between block-ades and what is called right of search. The right of searching a merchant vessel on the high seas by a properly commissioned ship of war of a bel-ligerent is of very old standing, and has been exercised by all countries

COMMERCIAL BLOCKADE. The so-called "commercial" block-ade is intended to stop all vessels car-rying cargo from getting into or get-ting out of an enemy's ports. Due warning having been given by the blockading belligerent, neutral vessels trying to evade the blockaders are liable to capture. Of course the

ject them to another, would fight to protect them if it were able—it was of Germany was treaty bound to fight with Austria, France with Russia assainse Germany.

to or on behalf of the searcher's enemy articles denominated contraband of war. If she turns out to be of enemy na-tionality she can be detained as a prize or be brought into port for ad-judication in a proper court. If she is really a neutral and is car-rying contraband of war, her case is subject to investigation by a prize

tions that vessels trying to "break blockade" would run great risk of becontraband of war in her cargo, she is allowed to go free with as little delay as the circumstances admit. The

stoppage and search may take place anywhere outside the territorial wa-

G covered a new method of pro-ducing albumen, which is like-ly to have far reaching results. Its immediate effect in blockaded Ger-many is to increase the consumption of sugar and to make it will of sugar and to make it still more valuable. The discovery is told of in The Kol-

The discovery is told of in The Kol-nische Zeitung of Berlin, which says: "As is known, there are plenty of carbo-hydrates at hand in Germany, derived from potatoes, sugar and food beets. So far, however, foodstuffs rich in albumen, such as barley, we have had to import. Now the Insti-tute for Fermentation-Industrie, at Berlin, has succeeded in inventing a process by which feeding yeast, with more than 50 per cent. albumen, is produced from sulphate of ammonia

WATERPROOF CLOTH FOUND BY ACCIDENT HE waterproofing of cloth. so universal today, was unknown twenty-five years ago. In 1890

Grimsby Beach Thomas Fearnley Wiley of Bedford, Magnificent picnic ground, fine boat service, new anusements, re-modeled park. Spiendid summer hotel, with high-class cuisine, boating, fishing, bathing. Two hours from Toronto. Book now to assure accommode-tion. For booklet write, England, took out the first patent for the process known as "cravenet." He got the idea from an accident in

a Yorkshire dye-house. Certain goods : had been wrongly dyed and the workmen were directed to wash out the surplus logwood color with alum. After the goods had been dried the improvement was so marked that the dyer ordered a repetition of the alum wash-

RECRUITS for OVERSEAS ing. The cloth was sent to the wetting-machine, but the workmen found that they could not wet it. It passed thru the water and came out dry. Thus was the discovery made that cloth Orderly Room, No. 10 Field Ambulance, could be waterproof and yet remain

MONDAYS, WEDNESDAYS & FRIDAYS Looking for Shells

The Borough Engineer of Scar borough has been compiling a most interesting chart, whereon, on larger the acetate of alumina is dried in the scale sheets of the town and sur-rounding land, every single shell which dropped in the naval bombardment is plotted. There are now rather over 500 of the little red crosses which show where a projectile fell. They are still being found, and many, probably, never will be found, for some dropped far out in the country.

but in iron and steel especially we it has cost us enough work to be often figure out the mixtures that worth a ccuple of hundred. must be put into the cupolas." solutely impossible to tell beforehand "A man has to have a good deal of just what it will cost." experience before he can undertake "I did not intend to take up chemi-cxperimental work," he went on. cal analysis when I left college, and Altho there are some men in this started for myself." said one of the Fork who have started in a laboratory prminent druggists, who has for a without any previous training, such as number of years made analytical one would get in a college, who make work an important part of his profesgood, and go on to be analysts, yet it sion. LEFT HANDED **CHILDREN** turn to STAMMERERS until used. As a matter of fact, noth-ing could be farther from the truth.

NO ATTEMPT should be made to teach naturally left handed car when it is in motion, this current children to use their right nands, according to P. B. Ballard,

London County Council Inspector of Schools, as it is likely to make them stammerers. Lecturing recently before the Child Study Society in London. Mr. Ballard adduced the following statistics: Out of one group of 545 left-hand-

ed children one per cent. of pure lefthanders stammered, against 4.3 per cent of 399 being taught to use the right hand. In another group of 207 figures were 4.2 per cent. and 21.8 per cent. respectively. Six out of ten left-handed children who had been taught to use the right hand were practically cured of stammering after being allowed to use the left hand ex-clusivery for eighteen months. There,

were twice as many left-handed boys left-handed girls, and stammering was twice as prevalent among boys.

These depots could always be utilized as labor bureaus. A business

Wiring Guns

house in need of a man or woman could simply telephone to the toy de-pot and the official in charge would In the construction of some guns, says Lieut.-Col. A. S. Hadcock, of immediately post the announcement in the work rooms, and the party who felt they were fit for the position Armstrong, Whitworth, and Co., wire is wound round them. In a 12-in.

could make application either by us-ing the bureau telephone or a perscalibre gun the length of this wire is about 130 miles. A 13-in. calibre gun takes about 140 miles, while in some of The gun The system of checking the workers the latest guns the length exceeds 199 in and out would be a simple matter, miles. Guns are often found to become and would not require a large staff. The factory buildings should be congradually longer after continual firing. The breech mechanism is the importstructed, and the work se arranged ant part of the breech-loading gun. The stress upon it in 12-in. guns often amounts to 2500 tons, that it would permit of almost instant expansion or contraction in the num

in the same way a person lost in a wide expanse of level country will describe a complete circle as he keeps walking on and on. The explanation of this lies in the

propensity of one foot to walk faster than the other or to take a longer strice than the other, causing you to veer to one side or the other. To make assurance doubly sure, try placing two sticks sight fast aparts placing two sticks eight feet apart; then stand off about sixty feet, blind-fold yourself and endeavor to walk between them. It is almost impossi-

Old England in New France

SERGEANT in the Gloucesters sends home the following des-cription of his French billet:

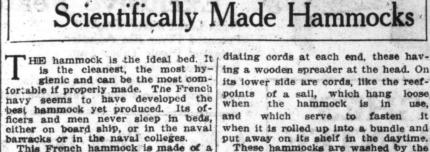

cription of his French billet: "I dined-or rather supped-with the blacksmith and his family last night. I could not possibly imagine I was in France. Everything suggested the Middle Ages in England, especially the grand coup at the end of the meal, when each member assidiously pol-ished his plate with the remainder of the bread! My illusion of the moyen-age was heightened when I stole over this morning to discover them at a breakfast of ale, bread and butter and cheese. You may not perhaps STARS THAT PASS IN

a breaktast of ale, oread and butter and cheese. You may not perhaps find all this so bizaree, as you have probably encountered it in Belgium, but as I gained my first impressions of France in the lazy, sunny Midi, I was very much impressed."

Nicknaming a Gun

too. For when the street-noises begin "Pip Squeak" is the name which the "Pip Squeak" is the name which the British soldiers have given to the lat-est German gun, a small trench can-non. "This creature," writes a pri-vate in The Lendon Scottish, "squirts abomination in the shape of scrap-iron. ginger-beer bottles, and apparently any odd refuse that is at hand." to fall towards midnight, there comes a steady pulse from the heavens, and

Non-Stop Ambulance The Red Cross have recently inaug-urated a system of fast non-stop am-bulances, which convey the wounded from the advance dressing-stations near the firing-line, right back to a principal field hospital. The interme-dlate stop at the field ambulance clearing-station is thus avoided.

Sailors of French Navy Sleep in

ficers and men never sleep in beds, either on board ship, or in the naval barracks or in the naval colleges. This French hammock is made of a rectangle of fine strong canvas, two yards long by eighteen inches wide, with a double bottom into which a mattress is inserted. This rectangle is supported in the ordinary way by ra-

To Destroy Submarines

profitable custom at the time of Wa-terloo, as well as of Rossbach in the Seven Years' War, when Capt. John Grant, of Dunlugas, the favorite aide-de-camp and galloper of Frederick the Great, was presented with that hand-some sum, together with a jewel-hilted sword, by George II., on reaching Lon-don with the news of Frederick's great victory over the French Lisbon papers announce the inven-Carvalho, of a torpedo for sinking sub-marines only, its shock not affecting world, may be reopened, backed by other vessels. Carvelho claims that tion by a Portuguese engineer, Carlos

his torpedo will destroy submarines if it strikes them either on the prow or the periscope. He hopes to sell his invention to the allies.

For News of Victory

The Prince of Wales lately arrived

in London as the bearer of despatches

from Sir John French. If those de-

spatches had included one announcing

a great victory, the Prince-in con-

formity with old war office practice,

which may or may not be still in force-would have been entitled to a

gratuity of a thousand guineas. Such

at least, was the no less pleasant than profitable custom at the time of Wa-

great victory over the French.

The copper mines of Cyprus, in

a steady pulse from the neavens, and belated warefarers —do you realize that one is a "belated wayfarer" at midnight in Paris nowadays?—lift up their eyes to the heavens, from whence comes their protection as well as their danger. And then they see—as I saw

danger. And then they see—as I saw -nothing at all at first, and then a red star marching steadily among the winking white ones. One would say Mars, the red planet, had slipped its moorings and was swim-ming over an embattled Europe. It is an aeroplane on its nightly rounds. tutes an important contribution to the study of electrical conditions at sea, as the observations cover a period of more than two years, and were made on the Pacific, Atlantic and Indian oceans. Combining the results with those obtained by other observers, it may be stated that the potential gradient the mean value found over the specific conductivity. The mean value of the specific conductivity given by the Carnegle observations was 3.07 plus 10—4, E.S.U., which is larger than the mean value found over land. The specific conductivity of the at-mospheric is found to be independent of its radioactivity given by the Carnegle observations is larger than the mean value found over land.

Lets St. Three

On Saturday afternoon at Queen Alex-andra School, Corinthians defeated Fred Victor in their Third Division game of the T. & D. Soccer League by the score of a to 1. The game was the cleansat and fastest seen here in some time, both teams playing exceptionally fast football. Dutton of the Fred Victors scored the only goal of the first haif when he put a neat one into the goal from the ex-treme side. Corinthigns opened up the second half with a rush that almost swept the mission men off their feet, but they soon settled down and play resumed on a more even basis. Thurstane scored the goal in the second half that tied the score, putling it into the net from a scrimmage outside of the goal. The win-ming score was of a rather fluxy nature, it slancing in off of Robinson's less, but al the same Corinthians deserved it, they having much the better of the game, Thurstane and Dagley played a good hard game, while Robinson, Jeffries and putton were best for the losers. The continuings (2)-Goal, Weston: backs

Cedarvale Tied

In the first round of the Connaught Cup on Saturday afternoon Old Coun-try brought off a great surprise by beat-ing Eatons at Eaton's Field. There were over 600 spectators on the grounds. The game was very even all the way thru, but the O.C.C. took advantage of the wind first half and scored two goals, while the big store boys tailled one in the second. All the players went to it in cup-tie fashion and there was little to choose between the teams. Final result: Uniter 2, Don Valley 0.
Prima result: Uniter 2, Don Valley 0.

the centre kick Unity came again and Mann missed by inches with a hot cross shot. Unity are now playing up in surprising style, and are giving the Lance backs a lot of work. Hands against Knowles looked dangerous for Lancs and Richardson forced a corner from the free kick, but Conway cleared this nicely. From now until the end it was a good fast game, the finish arriving with Lancashire deserving winners, by the score of 4 to 1. Steeple-

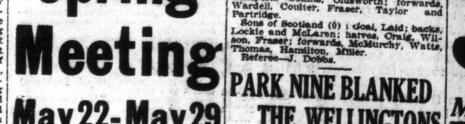

WILL ELECT OFFICERS.

The annual meeting and election of officers of the North Earlscourt and Fair-bank Liberal-Conservative Association will take place Monday evening in the club house, Harvie avenue. Several prom-inent speakers are expected to be pre-sent, and address the members. Presi-dent J, H, Hill will occupy the chair.

Sons of Scotland Down and Out

In a Connaught Cup gaine at Harris perial gave Sons of Scotland a rather by beating them to the tune of 4 to 6. The game was fast and furious and the device forwards of the winners wore down the Scotchmen early. Sons of Scotland should have won if penalty had a dozen, but they failed to find the net at any time. They were, however, and a dozen, but they failed to find the state of the winner early were, however, the British. They were an one-and the British. They were an one-and that the Imperial backs were and their shooting and did not con-tist. By some clever passing the backs at half-time 2 to 0 in favor of the some ten minutes later. They also seen-and had planned another one ball, as only two goals were notched, al-tho chances galore were presented. The half, as only two goals were not the first for the winners Fraser, Taylor, Wardell south played a terrific uphill game with the breaks against them, shill for the British. The the dinger fraser and themilton were the breaks against them, shill for the south Miller, Fraser and themilton were backs deavis and Clements; halves, backs teavis and Clements; halves, backs teavis and Clements; halves, bardell, coulter, Fraser, Taylor and bardell, coulter, Fraser, Taylor, and barde

Groth to Ride For H.P. Whitney

NEW YORK, May 15 .--- H. P. Whitney has retained Jimmy Groth, the clever lightweight jockey of the west, to do part of the riding for the stable this year. Groth rode eighty winners in 1913,

and in 1913 had 106 winning mounts. Last season he piled up a total of 120. Groth rides at 105 pounds. He is wide awake at the post and a strong Joe Notter also is under contract to

Mr. Whitney, but must confine his riding to races in which horses have their weight up.

HOW TO MAKE SANDBAGS.

National Service Committee Appeal For Material For Making Protection.

Official directions to those who wish to make sandbags for use at the front vere issued Saturday by Mrs. Plumptre. secretary of the National Service Committee. These bags are used to strengthen the trenches. They are sent to the front empty and filled with the earth and sand dug out when the trenches are made. Material required is double-width sack-These bags must be strongly sewn with thick thread, or thin twine, and tied in bundles of ten. They can be sent to any depot for receiving field comforts or direct to 77 East King street. Toronto. NEW YORK, May 15.—The biggest prospect in the New York end of the fighting game is the possibility of holding fights in the open air this Billy Gibson, who is impressed with

SAMUEL MAY & CO.,

Warero

NEW YORK, May 15 .- Benny Kauff laughs when he thinks of the National Commission's reason for denying him reinstatement. The commission declared that it wouldn't take him into the organized baseball fold because he is not a desirable, inasmuch as he has broken contractural obligations.

"If that is so," pointed out Kauff. what kind of mental symnastics did they use when they reinstated such players as Marquard, Johnson, Wingo, Killifer, and Caldwell? The National Commission talks thru its official hat when it gives out such a statement. "It has been pointed out that it takes three years before they can reinstate an outlaw. How about Hal Chase's case three or four years ago? He jumped the Yanks and went out to the coast and played outlaw baseball, but they took him back just as soon as he applied for reinstatement."

It is a mistake to suppose Hollinger will long remain the only great mine of the camp. It occupies only 160 acres of the 4500 acres or so mapped by the provincial geologist as gold bearing. Here the rock is all of igneous origin and practically all of the same age, the varying in struc-ture and chemical composition. In places it is very much sheared and schisted, and in these zones the vein systems are found. But there are certain areas of less schistose, or which geologists call massive rocks. Chemically there are slight variations in the percentages of silica and iron found in Probably "the biggest producer now

different portions of the field. But a more important fact is that but a more important last is that there is only one formation, and that is the basement rock of the Earth's crust. There can, therefore, be no change in the character of the rock with depth Where changes occur, where, for instance, a sedimentary or fragmental rock gives way to an igneous one, there is usually a loss of value. But nothing of that kind can occur in the main mining area at Porcupine, for it is all in the basement igneous complex of Keewatia a colossal scale. In fact the Rand has age.

In the development, of the camp the war has deprived us of the benefit of British capital, but that condition will

ebout as it was at Dittingen or Fonta-noy or any of the other battles in which the grenade was used. The ar-tillery pounds the opposing position, in this case a trench, the storming party springs out from cover and, rushing forward with their wire cut-ters, rilles and grenades, shower the op-posing trench with the cylinder bombs attached to their belt or with the round grenades, which are carried in a sack over the shoulder. Success or failure ver the shoulder. Success or failure s all a matter of how accurately and quickly the grenaues are thrown and how soon the enemy in the trench can rush up reinforcements. So far, the British have had considerably, more success than the Germans, thanks to more accurate grenade throwing. As a general rule the Germans accomplish only the slaughter of their own men in this form of attack. Swede Struck Out

The men it the trenches can see the grenades coming and some peculiar incidents have occurred. In some cases men have caught the round gren-ades and thrown them back with deadly effect. A big Swede, one of the Frenci foreign legion, must have the French foreign legion, must have been in a ball game at some time or other. He had an insatiable desire to take a clout at one of the bombs when he saw them coming. Finally, in spite of warnings from officers, he swung his rifle at one and hit it. What kind of a base hit it was good for will never he known. The Swede was blown in be known. The Swede was blown to

It is strange to read of soldiers i the famous grenadier regiments win-ning the V. C. for throwing the gren-ade from which their corps received its name a couple of centuries back. Private Edward Barber, of the First Battalion, Grenadier Guards, won the cross at Neuve Chapelle by running far in advance of his company and Tar in advance of his company and throwing bombs with such accuracy that the men in the nearest German trench surrendered to the number of ninety and many of the defenders lay dead. Barber was alone and unsup-ported when his company arrived on the scene. Lance Corporal Fuller, of the same regiment, won the V. C. in funct the same way. He saw a num much the same way. He saw a num-ber of the enemy trying to escape along a communication trench, killed the leading German with a grenade and the rest surrendered to the number of fifty.

is captured and escapes to Port Said.

Laura and Lenora, his assistants,

Laura's expression was a little dogged. "If he's too elever for you and Mr. Marris," she said, "I can't help that. I only know that he came on board. My eyes are the one thing in life I do believe."

believe." "If you'll excuse my saying so. Miss Laura. "Har-ris ventured, leaving deferentially toward net, "thero isn't a passenger on board this ship, or a servant, or one of the crew, whom we haven't seen. We've been into every state com, and we've even searched the hold. We've been over the ship, backwards and for-wards. The capitain's own steward has been our guide, and we've conducted an extra search or our own account. Personally, I must say I have come to the same conclusion as Mr. Quest. At the pre-sent moment there is no such person as the man we are looking for on board this steamer."

1-Off for the Mongar Camp. 2-"Craig!" she cried, "Craig! I saw his face there!" 3-"'A message from the Hands! Look!"

"Anything wrong with your eyesight?" the cap-tain inquired, blandly. "Nope," Laura assured him. "I saw the man;

"Do you know," the captain persisted, "that Mr., "Do you know," the captain persisted, "that Mr., Quest and Mr. Harris have searched every corner of the ship? They have had an absolutely free hand, and my own steward has been their guide? They have seen every men hov and woman and entired

have seen every man, boy and woman and animal among my crew of passengers." "They've been fooied somehow," Laura muttered. The captain frowned. He was on the point of a sharp rejoinder, when he met Laura's eyes. She was smiling very faintly and there was something in her expression which changed his whole point of

view "T'll go and make a few inquiries myself," he de-"See you at dinner time, I hope, young rea.

"If you keep her as steady as this," Laura prom-

"If you keep her as sleady as this," Laura prom-ised. "there are hopes." He disappeared along the deck, and presently re-entered his room, where Harris and Quest were waiting for film. He was followed by his steward, an un-dersized, man with pallid complexion and nervous manner. He closed the door behind him. "Brown," he said, turning to the steward, "I un-derstand you to say that you have taken these gen-tlement into every corner of the ship, that you have

"if you please." . They looked at him wonderingly. It was evi-dent that the professor was very much in earnest. He, held the book a little way away from him and Rowe. I offer you my apologies, captain. I con-gratulate you upon your library. I have discovered a most interesting book upon the habits of seagulls It kept me engrossed until the very last moment." "Very disagreeable habits, those I've noticed," He, held the book a little way away from him and read slowly and distinctly. "This," he began, "is the diary of a tour made by Craig and myself in northern Egypt some fourteen years ago. Here is the first entry of import:" MCNDAY-Twenty-nine miles southeast of Port Said. We have stayed for two days at a little Mongar Vil-lage. I have today come to the definite conclusion that anthropoid apos were at one time denizens of this counter.

"Very disagreeable habits, those I've noticed," Mrs. Foston Rowe sniffed. "Madam." the professor assured her. "yours is but a superficial view. For myself. I must confers that the days upon which I learn something new in life are days of happluess for me. Today is an ex-simple, I have learned something new about seaguils, and I am hungry." "Well, you'll have to stay hungry a long time at this table, then." Mrs. Foston Rowe snapped. "Seems to me that the service is going to be abominable." if the steward, who had just arrived, presented a

OPRENH

Isn't an ordinary poison, anyway." The professor, who had been standing on one side, suddenly gave vent to a soft exclanation. "Wait!" he whispered. Wait! I hive an idea." He hurried off to his stateroom. The doctor was poring over a volume of tabulated poisons. Quest was still watching his tubes. Lenora sat upon the couch. Suddenly the professor reappeared. Ho was carrying a small notebook in nis hand, his manner betrayed some excitement. He closed the door carefully behind him.

"I want you all," he begged, "to listen very care-ly to me. You will discover the application of

"No reaction at all." the latter muttered. "This isn't an ordinary poison, anyway." The professor, who had been standing on one side suddenly gave vent to a soft exclaration. "I an into Brown here and we both had a shake

up. "But he was there-a second ago!" Laura cried

"But he was there—a second ago!" Laura cried out. "I beg your pardon, miss." Brown ventured, "but the deck's closed at the end, as you can see, with salicloth, and I was leaning over the rail-myself when you shrieked. There wasn't anyone else near me. and no one can possibly have passed round the deck, as you can see for yourself." Laura stood quite still. "What doors are there on the side?" she' asked. "The doors of my room only," the captain re-plied. a little shortly. "It was Brown you saw, of course. He was standing exactly where you thought you saw Craig."

course. He was standing exactly where you thought you saw Craig." Laura walked to the end of the deck and back. "Very well, then." she said. "you people had bet-ter get a strait-walstcoat ready for me. If I didn't see Craig there. I'm going off my head." Quest had disappeared some seconds ago. He came thoughtfully back. a little later. "Captain." he asked, "what shall you say if f tell you that I have proof that Craig is on board?" The captain glanced at Laura and restrained himself.

"I should probably say a great many things which I should regret afterwards," he replied grimly. "Sit down and we'll tell you what has happened in my room," Quest continued. He told the story, calmly and without remark. The captain held his head.

He told the story, calmly and without remark. The captain held his head. "Of course, I'm convinced that I am a sane man." he said, "but this sounds more like a Munchausen story than anything I've ever heard. I suppose you people are all real? You are in carnest about this, aren't you? It isn't a gigantic joke?" "We are in deadly earnest," the professor pro-nounced, gravely. "Twe been down to the pantry," Quest went on. "The porthole has been open all day. It was just possible for a man to have reached the cups of boullion as they were prepared. That isn't the point, however. Craig is cunning and clever enough for any devilsh scheme on earth, and that card proves that he is on board." "The ship shall be searched." the captain de-clared, "once more. We'll look into every crack and every cupboard." "Lenora turned away with a little shiver. It was one of her rare moments of weakness.

Lenora turned away with a little shiver. It was one of her rare moments of weakness. "You won't find him! You won't find him!" she murmured. "And I am afraid!"

Lenora grasped the rails of the steamer and gianced downwards at the great barge full of Arab sailors and merchandise. In the near background were the docks of Port Said. It was their first glimpse of eastern atmosphere and color. "I can't tell you how happy I am," she declared to Quest. "to think that this voyage is over. Every night I have gone to bed terrified." He smiled grimly

night I have gone to bed terrified." He smiled grimly. "Things have been quiet enough the last few days," he said. "There's Harris on this barge. Look at Laura waving to him!" The Scotland Yard man only glanced up at them. He was occupied in leaning over towards Laura, who was on the deck below. "If you said the word." he called out, "I wouldn't be going back, Miss Laura. I'd stick to the ship fast enough." She laughed at him gayly. "Not you! You're longing for your smoky old London already. You cut it out, my friend. You're a good sort, and I hope we'll meet again some day.

PHILLIPS

"Then be either changed on to another one," Laura declared, obstinately. "or else he jumped overboard." Harris, who was a very polite man, gazed thoughtfully out seaward. Quest smiled.

"When Laura's set on a thing," he remarked, "she kes a little moving. What do you think about it, professor?'

The professor laid down his book, Leeping hit finger in the place. He had the air of a man per-fectly content with humself and his surroundings.

"My friend," he said, "I boarded this steamer with only one thought in my mind—Craig. At the pre-sent moment, I feel myself compelled to plead guilty to a complete change of outlook. The horrors of the few months seem to have passed from my brain like a dream. I lie here, I watch these white-winged birds wheeling around us, I watch the sunshine make jewels of the spray, I breathe this wonderful air. I relax my body to the slow, soothing movements of the boat, and I feel a new life stealing thru me. Is Craig really on board? Was it really he whom Miss Laura aw? At the present moment, I really do not I learn from the steward, who arranged my care. bath this morning, that we are bound for India am very glad to hear it. It is some time since bay, and the thought of these long days of complete peace fills me with the most in lescribable satisfaction.

Quest grunted a little as he knocked the ash from his cigar.

"Not much of the bloodhound about the or," he remarked. ."What about you, Lenora?" She smiled at him.

"I agree entirely with the professor," she mur-mured, "except that I am not quite so sure that I appreciate the rhythmical movement of the boat as he seems to. For the rest, I have just that feeling he seems to. that I would like to go on and on and forget all the horrible things that have happened, to live in a sort wake up in a world from which Craig of dream, and had vanished altogether."

"Enervating effect this voyage seems to be having upon you all," Quest grumbled. "Even looks far to well contented with life." "Even Harris there

The detective smiled. He was young and fresh-colored, with a shrewd but pleasant face. He glanced involuntarily at Laura as he spoke.

"Well, Mr. Quest," he said, "I didn't bring you on the steamer so I don't feel any responsibility about it, ut I must confess that I am enjoying the trip haven't had a holiday this year.'

Quest struggled to his feet and threw back the rug in his chair.

'If you all persist in turning this into a pleasure cruise," he remarked, "I suppose I'll have to alter my own point of view Come on, Harris, you and I promised to report to the captain this morning. I don't suppose he'll be any too pleased with us Let's get thru with it."

two men walked down the deck together. They found the captain alone in his room, with a chart spread out in front of him and a pair of compasses in his hand. He turned round and greeted them. 'Well?"

"No luck, sir." Quest announced. "Your steward has given us every assistance possible and we have searched the ship thoroly. Unless he has found a diding place unknown to your steward, and not apparent to us, the man is not on board."

The captain frowned slightly. "You are not suggesting that that is possible, I suppose?'

Quest did not at once reply. He was thinking

of Laura's obstinacy. "Personally," ne admitted, "I should not have be-lieved it possible. The young lady of our party, before the declares that she saw Craig board the teamer, is quite immovable."

The captain rose to his feet. He was a man of medium height, strongly built, with short, brown beard and keen blue eyes.

This matter must be cleared up entirely," hy declared, brusquely. "If you will excuse me for a moment, I will talk to the young lady myself." He walked firmly down the deck to where the two declared, brusquely.

siris were seated, and paused in front of Laura. Bo you're the young lady," he remarked, touch-bis cap, "who thinks that I come to sea with

"minals stowed away on my ship?" "Don't know what your habits are, captain." Laureplied. "but this particular criminal boarded your

ship all right in Southampton harbor."

PAGE FIVE

tlemen into every corner of the ship, that you have ransacked every possible hiding place, that you have given them every possible opportunity of searching for themselves?" "That is quite true, sir," the man acknowledged.

"You agree with me that it is impossible for any-one to remain hidden in this ship?" "Absolutely, sir"

"You hear, gentlemen?" the captain continued. "I really can do no more. It is perfectly clear to me that the man you are seeking is not cn. my Your very charming young lady friend seems ship. to think it impossible that she could have been mistaken, but as a matter of fact she was. If I might take the liberty, Mr. Quest, I would suggest that you ask her, at any rate, to keep her suspicions to herself."

"I'll see she doesn't talk," Quest promised. "Very "It's no trouble," the captain replied, "and apart from the disagreeable nature of your business, I am delighted to have you on board. If you can for your suspicions about this fellow Craig, I shall If you can forget best to make your trip a pleasant one as far as Port Said, or on to India, if you decide to take the trip with me."

"Very good of you, captain, I'm sure," Quest pronounced. "We shall go on keeping our eyes open, of course, but apart from that we'll forget the fellow." The captain nodded.

"I am coming down to dinner tonight," he announced, "and shall hope to find you in your places What the mischief are you hanging about for Brown?" he asked, turning to the steward, who was standing by with a carpet-sweeper in nis haad.

m wants cleaning out badly, sir. "Roc The captain glanced distastefully at the carpet-

"Do it when I am at dinner, then," he ordered, "and take that damped thing away." Quest and Har-

The steward obeyed promptly. ris followed him down the deck, Queer-looking fellow, that," the latter remarked

"Doesn't seem quite at his ease, does he? "Seemed a trifle overanxious. I thought, when he was showing us round the ship," Quest agreed.

"Dead!"

"Mem," Harris murmured, softly, "as the gentle-man who wrote the volume of detective stories I am

early, rose to welcome Quest's little party, and himself arranged the seats. "You, Miss Lenora," he said, "will you please sit

on my left, and you, Miss Laura, on my right? Mr. Quest, will you sit on the other side of Miss Laura, and Mr. Harris two places down on my left. There is an old lady who expects to be at the table, but the steward tells me she hasn't been in'yet." They settled down into the places arranged for

them. Harris was looking a little gluin. Lenora and Quest exchanged a meaning glance.

not sure that I appreciate this arrangement." Harris whispered to his neighbor. "You may be candid," Lenora replied, "but you

aren't very polite, are you?" Harris almost blushed as he realized his slip. "I am sorry," he said, "but to tell you the truth."

he added, glancing towards Quest, "I fancied that you were feeling about the same.

"We women are poor dissemblers." Letora mur-ired. "Do look how angry this old woman seems." An elderly lady, dressed in somewhat oppressive ack, with a big cameo brooch at her throat and black,

a black satin bag in her hand, was being shown by the steward to a seat by Quest's side. Sie auknowledged the captain's greeting acidly.

"Good evening, captain," she said. "I under-stood from the second steward that the seat on your right hand would be reserved for me. I am Mrs. Foston Rowe."

The captain received the announcement calmly. Very pleased to have you at the table, madam

he replied. "As to the seating, I leave that entirely to the steward. I never interfere myself."

Laura pinched his arm, and Lenora glauced away hide a smile. Mrs. Foston Row studied the menu disapprovingly.

'Hors d' oeuvres," she declared, "I never touch. No one knows how long they've been opened. Bouillon—I will have some bouillon, steward." "In one moment, madam."

The professor came ambling along towards the table.

"I fear that I am a few moments late," he re-

The steward, who had just arrived, presented a cup of bouillon to Quest. The others had all been served. Quest stirred it thoughtfully.

"And as to the custom," Mrs. Foston Rowe con-tinued, "of serving gentlemen before ladies. it is, I suppose, peculiar to this steamer." Quest hastily laid down his spoon, raised the cup

of bouillon and presented it with a little bow to his neighbor. 'Pray allow me, madam," he begged. "The stew-

ard was to blame." Mrs. Foston Rowe did not hesitate for a moment,

She broke up some toast in the bouillon and commenced to sip it.

"Your politeness will at least teach them a les-son," she said. "I am used to travel by the P. & O. and from what I have seen of this steamer."" The spoon suddenly went clattering from her gers. She caught at the sides of the table, there was a strange look in her face. With scarcely a murmur she fell back in her seat. Quest leaned hurriedly forward.

"Captain!" he exclaimed "Steward! Mrs. Fos-ton Rowe is ill."

There was a slight commotion. The doctor came hurying up from the other side of the saloon. He He t over her and his face grew grave. "What is it?" the captain demanded

The doctor glanced at him meaningly

She had better be carried out," he whispered. It was all done in a moment. There was nothing but Mrs. Foston Rowe's empty place at the table. and the cup of bouillon, to remind them of what had happened.

"Was it a faint?" Lenora asked. "We shall know directly," the captain replied. "Better keep your places, I think. Steward, serve the dinner as usual."

The man held out his hand to withdraw the cup bouillon, but Quest drew it towards him. "Let it wait for a moment," he ordered.

glanced at the captain, who nodded backfew moments the doctor reappeared. He leaned lown and whispered to the captain.

The captain gave no sign.

"Better call it heart failure," the doctor contin-"I'll let the people know quietly. I don't in least understand the symptoms, tho."

Quest turned around. "Doctor," he said. "I happen to have my chemica chest with me, and some special testing tubes. I you'll allow me, I'd like to examine this cup of bouil on. You might come round, too, if you will."

eaptain nodded. "I'd better stay here for a time," he declared,

"I'll follow you presently." The service of dinner was resumed. Laura, however, sent plate after plate away. The captain

watched her anxiously. "I can't help it," she explained "I don't know whether you've had any talk with Mr Quest, but we've been thru some queer times lately. I guess this death business is getting on my nerves."

The captain was startled. "You don't for a moment connect Mrs. Foston Rowe's death with the criminal you are in search

he exclaimed. Laura sat quite still for a moment

"The bouillon was offered first to Mr. Quest," she murmured. captain called his steward.

"Where did you get the bouillon from you served -that last cup, especially?" he asked.

"From the pantry just as usual, sir," the man answered, "It was all served out from the same cauldron."

"Any chance of anyone getting at it?" 'Quite impossible, sir.'

Laura rose to her feet. Sorry," she apologized; "I can't eat anything.

I'm off on deck." The captain rose promptly. "Till escort you, if I may," he suggested. Harris, too, rose from his place, after a and regretful glance at the menu, and joined

final and regretful glance at the menu, and joined the others. The captain, however, drew Latra's arm thru his as they reached the stairs, and Harris, with a little shrug of the shoulders, made his way to Quest's stateroom. The doctor, the professor, profess Quest and Lenora were all gathered around two little tubes. which the criminologist was examining with an electric torch.

TUESDAY-Both Craig and I have been a little un-easy today. These Mongars into whose encampment easy today. These Mongars into whose encampment we have found our way, are one of the strangest and (lercest of the nomad tribes. They are descended, with-out a doubt, from the ancient Mongolians, who invaded this country some seven hundred years before Christ, but have preserved in a marvelous way their individ-uality as a race. They have the narrow eyes and the thick nose base of the pure Oriental, also much of his cunning. One of their special weaknesses seems to be the invention of the most hideous forms of torture, which they apply remorselessly to their enemies.

"Pleasant sort of people," Quest muttered. "We escaped with our lives," the professor ex-plaine earndestly, "from these people only on ac-count of an incident which you will find in this next paragraph:"

next paragraph:" . WEDNESDAY-This has been a wonderful day for us, chiefly owing to what I must place on record as an act of great bravery by Craig, my servant. Early this morning, a man-eating lion found his way into the en-campurvnt. The Mongars behaved like arrant cowards. They field right and left, leaving the chief's little daugh-ter, Feerda, at the brute's mercy. Craig, who is, by no means an adopt in the use of firearms, chased the ani-mai as he was making off with the child, and, more by good luck than anything eise, managed to wound it mortally. He brought the child back to the encamp-ment just as the chief and the warriors of the tribe re-turned from a hunting expedition. Our position here is now absolutely secure. We are treated like gods, and, appreciating my weakness for all matters of selence, the chief has today explained to me many of the secure mysteries of the tribe. Amongst other things, he has shown me a wonderful secret poison, known on y to this tribe, which they call Veedenzoo. It brings almost instant death, and is exceedingly difficult to trace. The addition of sugar causes a curious condensation and re-solves it almost to a white past. The only antidote is a substance which they use here freely, and which is exactly equivalent to our camphor. exactly equivalent to our campho

The professor closed his book. Quest promptly rang the bell. "Some sugar," he ordered, turning to the stew-

ard. ard. They waited in absolute silence. The suggestion which the professor's disclosure had brought to them was stupefying, even Quest's fingers, as a moment or two later he rubbed two knobs of sugar-together so that the contents should fall into the tubes of bouillon, shock. The result was magical. The bouillon turned to a strange shade of gray and The bouillon turned to a strange shade of gray and

began slowly to thicken. "It is Mongar poison!" the professor cried, with

breaking voice. They all looked at one another.

"Craig must be here amongst us. Quest muttered. "And the bouilion," Lenora cried, clasping Quest's

"And the bouilion," Lenora cried, clasping Queets arm, "the bouilion was meant for you!"... There seemed to be, somehow, amongst all of them, a curious indisposition to discuss this matter. Suddenly Lenora, who was sitting on the lounge underneath the porthole, put out her hand and picked up a card which was lying by his side. She glanced at it, first.curiously. Then she shricked.

"A message!" she cried. "A message from The Hands! Look!" They crowded around her. In that, same fa-miliar handwriting was scrawled across the face of

the card, these few words: To Sanford Quest:

You have escaped this time by a chance of for-tune, not because your wits are keen, not because of your own shrewdness; simply because Fate willed it. It will not be for long. Underneath was the drawing of the clenched hands.

hands.

"There is no longer any doubt," Lenora said calmly, "Craig is on board. He must have been on deck a few minutes ago. It was his hand which placed this card on the porthole. What's that?" Listen! There was a scream from the deck. They all

EGANVILLE recognized Laura's voice. Harris was out of the stateroom first, but they were all on deck within ten EXETER seconds. Laura was standing with one hand clasp-ing the rail, her hand fiercely outstretched towards GODERICH the lower part of the promenade deck. Thru darkness they heard the sound of angry voices. GUELPH "What is it, Laura?" Lenora cried. HARRISTON

She swung around upon them. "Craig!" she cried. "Craig! I saw his face as I sat in my chair there, talking to the captain. I

saw a man's white face—nothing else. He must have been leaning over the rail. He heard me call out and he disappeared." The captain came slowly out of the shadows, LINDSAY

limping a little, and followed by his steward,

How It Feels to Fall and Turn **Upside Down in a Flying Machine**

French Aviator's Remarkably Vivid Story of Upsetting by Accident 7500 Feet Up Among the Clouds.

HAVE listened to what I shall call "the psychology of war fight" by one of the famous military air-

men. It revealed the storm of diverse sensations to which a man may be subjected while carrying out the work of a scout or raider. From the point of view of a medical man it showed in what a remarkable way the nervous system is capable of adjusting itself to new and severe conditions and of preserving its balance even when hope of salvation has been

The airman received orders to go to a particular place and there drop bombs. The route lay along the seacoast over a portion of the country occupied by the enemy and strongly fortified against aeroplanes. Shortly after setting out the zone of fire was entered, and in order to avoid mishap it became necessary to take advantage of such cloud cover as could be obtained.

"I saw," said the airman, "a heavy cloud in front of mc hanging over the sea. It was a gray cloud, or I could not have entered it; black clouds are well known to be dangerous. I was flying at a height of about 7,500 feet. For a few moments all went well and the cover was very welcome. The cloud was of the fleecy order, and I could see my compass and barometer quite clearly. After a while, however, the mist became thicker, and I felt that I was losing my bearing. i was flying quickly, but I did not know in what direction. My compare began to swing around in the most erratic way, and I saw the barometer begin to fall.

"These manifestations did not, however, occasion any alarm, but what followed was unpleasant. Owing to the effect of the strong and contrary currents which are met with in every cloud the machine began to sway about violently. I felt myself knocked from side to side, and had a very difficult task to manipu-late the elevator and rudder. The wind shrilled about me and the density of the cloud increased from moment to moment. Nevertheless, it was still possible to distinguish the position of the machine in Then suddenly everything became quite dark, so that I could not as much as see my hands in front of me.

"I was not frightened so far, at least I do not think so, but I began to think that to have been shot by the enemy would have been the lesser of the two evils. However, thinking was difficult; it required all my wits for the work in hand. I was completely lost. I did not even know at what angle the machine was flying. Then the thought occurred to me that I might side-slip or that the machine might turn over, and I made up my mind to try to rise up out of the cloud. I pulled the elevator for this purpose, and the next moment everything became perfectly

The following was sent from the battlefront in Belgium to one of the London newspapers by a war correspondent: THAVE listened to what I shall call "the psychology shows he would probably slip back or fall over sideways.

"One or the other of these things happened: did not know which. In any case, I felt my holding-in strap tighten, and knew that I was upside down.

"It was still as dark as night. I tried to right myself and failed. . I tried frantically. I began to feel that it was all over with me, and I experienced the most acute agony of mind. But suddenly and quite unexpectedly that feeling passed away. "I had tried everything and failed. I was con-

scious of that.

"Now a wonderful sense of calm took the place of the anguish. It was the most casy and delightful sensation 1 have ever felt. Meanwhile I was falling, I suppose, at the rate of about 200 miles an hour.

"The next thing I remember is that my holding-in belt burst, and that automatically I jammed my knees farther under the indicator board and gripped the seat with my elbows. I had taken my feet off the rudder bar. I was some inches out of the seat, and the machine was upside down. I only knew it was upside down in a vague way because I had left the seat.

"I was quite happy, and I had no anxiety of any kind. I did not feel anything. Then in a moment the arcoplane fell out of the cloud, and I saw the sea rushing up toward me. My hands automatically moved the controls, and at 1,500 feet the machine righted itself.

"Then at intervals I heard a curious snapping sound in my ears, and realized that I was deaf. "I couldn't hear my own engine. My ear-drums had burst.

"The deafness was due to the very rapid descent and consequent suddenly increasing atmospheric pressure. It had a psychological effect, for it helped to accentuate the sense of depression which followed the return to safety. Having passed from violent agitation of mind to the 'calm of despair,' I now suffered a severe sense of shock. But I continued on my way, mastering myself until I was able to launch my bombs. The first of these achieved its purpose, and I saw that it had done so.

"Immediately a reaction of feeling set in. I was so happy that I shouted. I simply could not contain myself. I felt in all my pockets for something else to throw down. All I could find was my matchbox, and so I threw that.

"There was no permanent upset to my nerves, because the next day I was able to carry out my work more or less as if nothing had happened. In proof that the aeroplane had really turned upside down, I discovered that my revolver had fallen from my poc-ket on the machine."

gentleness. In the hearts at peace under an English heaven.

Unusual

A British officer inspecting sentries guarding the line in Flanders came across a raw-looking yeoman. "What are you here for?" he asked,

"To report anything unusual, sir." "What would you call unusual?" "I dunno exactly, sir." "What would vou do if you saw five battleships steaming across that field

fancies take hold and suggest thing entirely disassociated with yonder? "Sign the pledge, sir?"

else. So far

plane looping the loop stands to the credit of Mr. Harry Hawker London, on one of the small fast of Sopwith "tabloids." similar to that on which Mr. Pixton won the Schneider International Cup at Monacco last year. It has always been supposed that the floats of a seaplane would make it dangerous to loop on such a

machine, but now the question is fin-HOW WE GOT BAYONETS.

The bayonet is so called from the fact that the first ones were made at Bayonne, France. The story goes that a Basque'regiment, being hard pressed and its ammunition gone, fixed long knives in their gun barrels and in this memory made the first bayonet charge manner made the first bayonet charge. The charge succeeded and the new implement of warfare was soon after generally adopted.

THE BLACK BOX

When Music Punctuates the Horrors of the War

Continued From Page Five.

"He's got news!" Quest muticred.

With much shouting the boat was brought to the side of the barge. The professor was hauled up. He stumbled blindly across towards the gangway and came up the steps with amazing speed. He came straight to Quest and Lenora and gripped the former by the arm.

"Look!" he cried. "Look!"

He held out a card. Quest read it aloud: There is not one amongst you with the wit of a

Mongar child. Good-by! The Hands!

"Where did you get it ?!" Quest demanded.

"That's the point-the whoie point!" the professor exclaimed excitedly. "He's done us! He's landed That paper was pushed into my hard by a tall Arab, who mumbled something and hurried off across the docks. On the landing stage, mind! The captain came and put his head out of the door

"Mr. Quest," he said, "can you spare me a moment?

"They moved up towards him. The captain closed the door of his cabin. He pointed to a carpet-sweeper which lay against the wall. "Look at that," he invited.

They lifted the top. Inside were several sandwhiche and a small can of tea.

"What on earth is this?" Quest demanded. The captain, without a word, led them into his ler rom. A huge lounge stood in one corner.

He lifted the valance. Underneath were some crumbs. "You see." he pointed out, "there's room there

for a man to have hidden. especially if he could crawl out on deck at night. I couldn't make out why the dickens Brown was always sweeping out my room, and I took up this thing a little time ago and looked at it. This is what I found."

"Where's Brown?" Quest asked, quickly, "I rang down for the chief steward," the captain continued, "and ordered Brown to be sent The chief steward came himself instead up at once. seems Brown went off without his wages, but with a huge parcel of bedding, on the first barge this morning, before anyone was about."

Quest groaned as he turned away.

'Captain," he declared, "I am ashamed. He has been here all the time and we've let him slip thru our fingers. Girls," he went on briskly, turning towards Laura, who had just come up, "India's off. We'll catch this barge, if there's Our luggage can be put on shore when the mme.

The captain walked gloomily with them to, the gangway.

PAGE SIX

"I shall miss you all," he told Laura. She laughed in his face. "If you ask me, I think you'll be glad to be rid

of us "Not of you. Miss Laura," he insisted.

She made a little grimace. "You're as bad as Mr. Harris," she declared. "We'll come for another trip with you some day."

They left him leaning disconsolately over the ls. The professor and Quest sat side by side on rails. one of the trunks which were piled up on the barge. "Professor," Quest asked, "how long would it take us to get to this Mongar village you spoke about?"

"Two or three days, if we can get camels," the er replied. "I see you agree with me, then, as other replied. to Craig's probable destination?" nodded. What sort of fellows are they. anyway?" he

asked. "Will it be safe for us to push on alone?" "With me," the professor assured him, "you will safe anywhere. I speak a little of their language. be safe anywhere. I have lived with them. They are far more civil-ized than some of the interior tribes."

"We'll find a comfortable hotel where we can leave the girls--" Quest began. "You can cut that out," Laura interrupted. don't know about the kid here, but if you think I'm going to miss a camel ride across the desert, you're dead wrong, so that's all there is to it." Quest glanced towards Lenora. She leaned over

and took his arm. "I simply couldn't be left behind," she pleaded.

"I've had quite enough of that." "The journey will not be an unpleasant one," the

professor declared, amiably, "and the riding of a camel is an accomplishment easily acquired. as I am aware, too, the district which we shall have to traverse is entirely peaceable."

They disembarked and were driven to the hotel, still discussing their project. Afterwards they all wandered into the bazaars, along the narrow streets, where dusky children pulled at their clothes and ran by their side, where every now and then a brown-skinned Arab, on a slow-moving camel, made his way thru the throngs of veiled Turkish women, Syrians, Arabs and Egyptians. Laura and Lenora, at any rate, attracted by the

curious novely of the scene, forgot the heat, the street smells, and the filthy clothes of the mendicants and loafers who pressed against them. They bought strange jewelry, shawls, beads and perfumes. The sor had disapeared for some time, but rejoined them later. "It is all arranged," he announced. "I found a

dragoman whom I knew. We shall have four of the best camels and a small escort ready to start tomorrow morning. Furthermore, I have news. Englishman, whose description precisely tallies with Craig's, started off only an hour ago in the same direction. This time, at any rate, Craig can-not escape us."

"He might go on past the Mongar camp," Quest suggested. The professor shook his head.

"The Mongar village," he explained, "is placed practically at a cul-de-sac, so far as regards farther progress southwards without making a detour. It flanked by a strip of jungle and desert on either side, in which there are no wells for many miles. We shall find Craig with the Mongars."

They made their way back to the hotel, dined in a cool, bare room, and sauntered out again into the streets. The professor led the way to a little building, outside which a man was volubly inviting all to

'You shall see one of the sights of Port Said." he promised. "This is a real Egyptian dancing girl." They took their seats in the front row of

They took their seats in the front row of a dimly lit, bare-looking room. The stage was dark and empty. From some unseen place came the monotonous rhythm of a single instrument. They walted for some time in vain. At last one or two lights in front were lit, the music grew more in-sistent. A girl, who seemed to be dressed in a little more than a winding veil, glided on to the stage, swaying and moving slowly to the rhythm of the more than a winding veil, glided on to the stage, swaying and moving slowly to the rhythm of the monotonous music. She danced a measure which none of them except the professor had ever seen before, coming now and then so close that they could almost feel her hot breath, and Lenora felt some what vaguely disturbed by the glitter of her some what vaguely disturbed by the glitter of her eyes. An odd perfume was shaken into the air around them from her one flowing garment, thru which her limbs continually flashed. Lenora looked away.

"I don't like it," she said to Quest, simply. Suddenly Laura leaned forward.

"Look at the professor," she whispered. They all turned their heads. A queer change seemed to have come into the professor's face. His teeth were gleaming between his parted lips, head was thrust forward a little, his eyes were filled with a strange, hard light. He was a trans-formed being, unrecognizable, perturbing. Even while they watched, the girl floated close to where sat and leaned towards him with a queer, mock-His hand suddenly descended upon her e laughed still more. There was a little ing smile ing smile. His hand suddenly descended upon her foot. She laughed still more. There was a little exclamation from Lenora. The professor's whole frame quivered. He snatched the anklet from the girl's ankle and bent over it. She leaned towards him, a torrent of words streaming from her lips. The professor answered her in her own language The professor answered her in her own language She listened to him in amazement. The angepassed. She held out both her hands. The anger passed. She held out both her hands. The pro-fessor still argued. She shook her head. Finally he placed some gold in her palms. She patted him on the cheek, laughed into his eyes. pointed be-hind and resumed her dance. The anklet remained in the professor's hand.

"Say, we'll get out of this," Quest said. girls have had enough."

"The

The professor, made no objection. He led the way, holding the anklet all the time close to his eyes and turning it round. They none of them spoke to him, yet they were all conscious of an imthem mense scnse of relief when, after they had passed into the street, he commenced to talk in his natural voice.

"Cangratulate me," he said. "I have been a lector of Egyptian gold ornaments all my life. This is the one anklet I needed to complete my collection This It has the double mark of the Pharaohs. I r nized it at once. There are a thousand like it I recogwould think, in the bazars there. In reality there may be, perhaps, a dozen more in all Egypt which are genuine.

They all looked at one another. Their relief had grown too poignant for words.

"Early start tomorow," Quest reminded them. "Home and bed for me, this moment," Laura declared.

"The camels." the professor assented, "will be round at daybreak."

Lenora, a few nights later, looked down from the star-strewn sky which seemed suddenly to have dropped so much nearer to them, to the shadows have

across the desert by the dancing flames of heir fire. "It is the same world, I suppose," she murmured

"A queer little piece out of the same world," Quest agreed. "Listen to those fellows, how they chatter! The camel drivers and guides were sitting to-

gether in a little group, some distance away. They had finished their supper and were chattering together now, swaying backwards and forwards, two of them at least in a state of wild excitement.

"Whatever can they be talking about?" Laura asked. "They sound as tho they were going to fight every second." The professor smiled.

"The processor siniled. "The last one was talking about the beauty of his fat lady friend." he remarked, dryly. "Just before, they were discussing whether they would be given any backsheesh in addition to their pay. We are quite off the ordinary routes here, and these fellows aren't much used to Europeans."

Laura rose to her feet. "Say, I'm going to get a drink," she announced. The dragoman who had been hovering around bowed gravely and pointed towards the water

bottles. Lenora also rose. "I'm coming, too," she decided. "It seems a sin to think of going to sleep, tho. The whole place is like a great, silent sea. I suppose this isn't a dream, is it. Laura?" "There's no dream about my thirst, anyway,"

Laura declared.

She took the horn cup from the dragoman. "Have some fourself, if you want to, Hassan," she invited.

Hassan bowed gravely, filled a cup and drank it off. He stood for a moment perfectly still, as the something were coming over him which he failedt o understand. Then his lips parted, his eyes for a moment seemed to shoot from out of his dusky skin. He threw up his arms and fell over on his side. Laura, who had only sipped her cup, threw it from her. She, too, reeled for a moment. The professor and Quest came running up, attracted by Lenora's shriek.

BY E. PHILLIPS OPPENHEIM

ally settled. ,

"They're poisoned!" she cried. "The Veedemzoo!" Guest shouted. "My God! Pull yourself together, Laura. Hold up for a

He dashed back to their little encampment reappeared almost immediately. He threw Laura's head back and forced some liquid down her throat.

"It's camphor," he cried. "You'll be all right, Laura. Hold on to yourself." He swung round to where the dragoman was lying, forced his mouth open, but it was too late the man was dead. He returned to Laura. stumbled to her feet. She was pale, and d She was pale, and drops of perspiration were standing on her forehead. She was able to rise to her feet, however, without assistance.

sistance. "I am all right now," she declared. Quest felt her pulse and her forehead. They moved back to the fire. "We are within a dozen miles or so of the Mongar village." Quest said grimly. "Do you suppose that fellow could have been watching?" They all talked together for a time in low voices. The professor was inclined to scout the theory of Craig having approached them. "You must remember," he pointed out, "that the Mongars hate these fellows. It was part of my arrangement with Hassan that they should leave "You must remember, he pointed that of my Mongars hate these feilows. It was part of my arrangement with Hassan that they should leave us when we get in sight of the Mongar encamp-Mongars hate the dragomen who bring tourists in this direction at ull."

They talked a little while longer and finally stole away to their tents to sleep. Outside the stole away to their tents to sleep. Outside the camel drivers talked still, chattering away, walk-ing now and then around Hassan's body in solemn procession. Finally, one of them who seemed to have taken the lead, broke into an impassioned stream of words. The others listened. When he finished there was a her much become way. finished, there was a low murmur of fierce approval. Silent-footed, as tho shod in velvet, they ran to the tethered camels, stacked the provisions once more upon their backs, lashed the guns across their own shoulders. Soon they stole away-a long, ghostly

shoulders. Soon they stole away a long, should procession—into the night. "Those fellows seem to have left off their in-fernal chattering all of a sudden," Quest remarked, lazily, from inside the tent. The professor made no answer. He was asleep, (To Be Continued Next Sunday.)

Annie Laurie Settles Perplexing Points in The Love Affairs of Girls --- Gives some Plain Advice to Soldiers and Their Sweethearts and Also Answers the Letters of Young Men Who Find It Hard to Make Their Own

Decisions.

DEAR ANNIE LAURIE: DEAR ANNIE LAURIE: I am a girl of thirteen years of age and am very large for my age -everyone takes me to be sixteen or seventeen. Do you think it would do any harm for me to go to a picture show at hight with a boy near my age, and do you think it wrong for me to go to a party at night with a boy?

In Doubt. T all depends upon what your mother thinks, my dear In Doubt-is she willing to have you go or does she very wisely refuse her per-mission for you to go out alone-and is that the reason why you are writing to me? It all depends on what your mother thinks, my dear-ask her. Annie Laurie.

DEAR ANNIE LAURIE: I am a young girl and have been keeping company with a gentle-man friend for the past two years. I am leaving the city shortly and I should like to correspond with atm. Having seen in one of your former answers that it was a gentleman's place to write first, would it not be proper for me to write to him first, as he does not know my address? He is a very shy boy and I know that he would

not like to write first even if he knew my address. Now, dear Annie Laurie, would it not be quite permissible for me to write first?

An English Rose, WHY should it be permissible for you to write first-you only to you to write first-you only in all the world-and wrong for every other girl to take the initiative corresponding with a young man? Perhaps you can get over your diffi-culty and the appearance of seeking too ardently his correspondence if you write to some girl friend whom he knows and ask her to remind him that you still exist.

young?

Annie Laurie. DEAR ANNIE LAURIE:

I am a girl of sixteen and am keeping company with a fellow of **heven** ing the is grand looking, but rather fresh. The other even-ing he took me to the show and held my hand all the time, althe I told him to quit, but he wouldn't. got home he wanted to

Mamie B.

Annie Laurie.

WHAT should you do, my dear Mamie B? You should wait.

my dear, until you are old enough to know your own mind, for

sixteen really is too young to marry, and seventeen is certainly too young

to take up the responsibilities of life.

Will you please give me some good advice on a subject that has

caused me quite an amount of anxiety? I will be brief and to the point. I am nineteen and have

always lived with my aunt. I have not paid much heed to the opposite

sex; but this last summer, while

away on a vacation, I met a very

refined and steady young man whom I correspond with. He comes

over every holiday to visit me. I would so much like to know

what to do, as there is a well-to-do gentleman about thirty-five to

forty who wishes most sincerely

to wed me. He is exceedingly jealous and I do not know if I love

am always delighted to have him

with me. Is that love? It is not his money that influences me, I

T may not be love, my dear Ealine, but it certainly is "liking" to be happy in the companionship of

anyone—and in this case it may be closely akin to love. It is so hard for me

to tell you what is best for you to do because you have given me so little

by which to judge—so really you must decide for yourself, bearing in mind

that no one ever can be happy in mar-

riage unless boundless is the founda-

I have a girl friend that does not prove a friend. She used to

say when she was going out with me that she would disappoint me.

to I started to go with another girl

and she always tries to get the girl

to go with her. What would you

VIVE them both up, my dear Dis-

that neither of them care very

tressed-it is plain to be seen

much for you, and that they like each

other much better than they like you.

So give them up and seek your friends

among those who will not disappoint you.

l am a young girl eighteen years old, and I have been keeping com-

Dany with a gentleman for one Year, who was born in a foreign

country, now at war. He wants me to marry him right away. I

love him-do you think it is right

tor me to marry out of my own re-

am sure.

tion of their lives.

Advise me to do?

DEAR ANNIE LAURIE:

him sufficiently to marry him.

DEAR ANNIE LAURIE:

MY DEAR Anxious May, I am very sorry that I cannot answer your letter, because I never discuss religion with my correspondents. How, am I to know whether you are too young for him, for you have not told me his age? Ask your parents and they will tell you—or perhaps they have al-ready told you what they think. Annie Laurie.

DEAR ANNIE LAURIE: I met a very nice boy and went out with him for a while, and we became very much attached to each other. I also had a girl friend who also liked him. One day he asked me to go to a band concert with him that night, but I refused as I had arranged to go with my girl friend.

When I called for her, I was told she had gone and would see me there. When I arrived at the ap-pointed place to my surprise I saw her talking to my boy friend. I didn't think so much about this, but when I went over and spoke to them I was treated very coldly. It looked as if I wasn't wanted, so I went home. My girl friend never calls for me now, and I'd like to know why he also is so cold, he never speaks. Dear Annie Laurie, please advise me what to do about

Pansy. HAT should you do, my dear Pansy, but say good-bye in your heart to the boy and the

girl friend who were less true than you? Such unhappy disappointing things do happen in this world—but don't let this one unfortunate occurrence make you less true to your friends. You may be sure that they will have much more regret some day because they have treated you this way than you have now or ever will have. Annie Laurie.

DEAR ANNIE LAURIE:

I met a young man lately. One night he took me home and asked me if I would meet him the next night, and we would go for a walk I refused. Do you think I did right? I like

him very much, and respect him. but I know nothing of him person-ally, with the exception of his

Anxious One.

care of their dear little girl. Of course you shouldn't marry a man of thirty-you shouldn't even have the thought of marriage in your little head for years and years to come. It may seem very hard to you to have the thought of giving him up just now. but in after years you will realize that it was the wisest and best thing you have done in al your life to cast away from you so silly and foolish a thought.

Annie Laurie. DEAR ANNIE LAURIE.

I am a girl twenty-two years of age. About two or three years ago I had several beaux and more than one has asked me to marry biim, but I did not care enough for any one of them, so refused. Also, my mother does not allow me even now to have fellows come to see

church every Sunday-he is in the choir. She suffes and carries on

with him, and I really think you can understand how I feel. I do

not know the girl, but have heard

that he takes her to dances every week. My parents know him and

He teases me about another boy,

who is in the choir, and whom

approve of him.

I did have one that I thought a lot about and he did of me. But another fellow came between us and told me he loved me, so I quit going with my steady for him and now he has gone away. I never

traveling and had no permanent address. He is old enough and has enough money to marry and I know she wants him, but, some-times I think he likes me. I half hope so, but ought I cut him out? I'm sixteen and he is either ten or fifteen years my senior (did you think he'd be a junior?).

> Roberta. ELL, Roberta, the best thing you can do is to do nothing. The man will decide the mat-

ter anyway and you will then have no regrets, whereas. if you try to influence him toward you and "get him" there will always be a doubt in your mind as to whether or not you did

Miss Laurie will welcome letters of inquiry on subjects of feminine interest from young women readers of this paper, and will reply to them in these columns. They should be addressed to Miss Annie Laurie, The Sunday World, Toronto.

is to regret the quarrel, but resign yourself to the loss of the friend, for Please don't tell me not to bother. V. I. S. yourself to the loss of the friend, for lost he will be sooner or later.

This young man of whom you write, may have been fond of you, but hart deeply by you at the time you quar-reled, and he may be in dread of placreied, and he may be in dread of plac-ing himself in danger of a repetition of that hurt—this feeling may be more strong than his affection for you. If he really cares for you, he will not let anything keep him for viry long from being with you. I hope it will end happily. Afnie Laurie.

WHEN JEALOUSY CREEPS IN

DEAR ANNIE LAURIE: I go with a boy who has a jealous disposition. I am not en-gaged to him, but sometimes you would think that were so. If I go to a party he expects me to have eyes for nobody clse but him, and I know all the rest of the boys just as well as I do him. Indeed, I went to school with most of them, so they expect me to be at least friendly. My boy friend, however, objects to any little act of friendliness to any of these boys, and more especially one boy, and he repeatedly insults the boy, and quarrels with me all the way home.

I think too much of him to stop allowing him to come to the house over these little quarrels, but he sometimes makes me pretty miserable, and it is very embarrassing for the other boy

concerned. His mother makes a fuss over him, and has led him to believe that everything should go just as he says. I think this is what has spoiled him, and he expects me to give him his own way all the time, and I don't think this is

good for him. What would you advise me to do in a case of this kind? Ought I to threaten him that if he isn't more agreeable I will have nothing more to do with him, or do you think I ought to bear with his little ways, remembering that I think a lct of him?

Prisciila. THE KINDEST thing you can do, both for yourself and for him is to tell him that you will not permit him to treat you so dis-courteously and unkindly. It would be much better for you to give him up entirely than to submit to his selfish domineering ways-which will only

MY DEAR V. I. S., probably by this time you have read your answer and are not worried and anxious any more-still, to make sure that you may not be disappointed, I am writing this special reply. If your girl friend in Detroit is not engaged to the young man who ob-jects to her writing to you, there is no reason at all why she should not write to whomever she pleases-tell her that is is for her to choose her young friends and the ones with whom she cares to correspond, until she is engaged to be married.

Any man who objects to a girl writing an absent friend and still does not love the girl enough to give himself the right to ask her to marry him, should certainly not be considered in such a matter. So write to her, my dear V. I. S., and explain to her as carefully as you can just how you feel about it and how anxious you are to have her write you-then by her de-cision you will be able to tell how much she really does like you. Annie Laurie

DEAR ANNIE LAURIE:

Your advice would be most weicome to me just now. I am an eighteen-year-old boy of refined family, and of excellent social standing, and have recently become somewhat infatuated with a verw nice girl two years my junior. She certainly cared for me for about two months, but now she goes out with other boys a great deal, and I have difficulty In getting her to go out with me. She appears indifferent, and altho she is sweetness personified when she is out with me, and she cares for me very much, she seems to forget me entirely when I am not with her, according to mutual friends. I take her out about twice each week, and go about with other girls, but with none for whom I care as much us her whom I care as much as her. Should I drop her as a serious friend, or still keep up this indifferent friendsbip?

Gloomy Gus. I F I were you Gloomy Gus. I would not listen to the "mutual friends" —they are sometimes anything but friends at heart. Just go right on as you have been doing-the girl may be a little bashful as well as you, and I like her all the better for being 80. Annie Laurie.

DEAR ANNIE LAURIE: I am going to ask for some sisterly advice, as I am in a quandary as to what to do. I am in love with a young lady with whom I kept company for the past six months. Another fellow stepped in and apparently has the inside track on me, and they became en. gaged recently, but he leaves for gaged recently, but he leaves for the old country very soon. Would it be wrong for me to take her out to the theatre and dances, or send her flowers, after he leaves the city? Or will she have to stay at home? I do not feel like giving up the fight just yet. What would you advise me to do? I must win her back, and I think I can if I can give her as good a time as he can give her as good a time as he did Jovful Jim OYFUL JIM, the winning of a wife J OFFUL JIM, the winning of a wife often takes on quite the same as-pects as the winning of a battle —a man struggles for the best posi-tion, the most amunition, the best gen-eralship, etc., etc.—and, alas, I féar it all resolves itself down to the old saying, "All's fair in love and war"— and the strongest one wins, 'if—and here is what you will have really to here is what you will have really to here is what you will have really to consider—the girl is willing. I do not believe there is any reason why you should not try your best to find out how she looks at the matter. Annie Laurie

DEAR ANNIE LAURIE: Some time before Christmas I wrote a letter to you asking your advice on a certain matter. Would you kindly let me know thru the columns of your paper if it has been answered? The letter was signed "Fussy." Fussy.

M^r dear Fussy, so many letters come to me that perhaps yours has been lost—so just write me again, and I will do my very best to make up to you for your disappoint-ment in the letter that was lost. Annie Laurie

DEAR ANNIE LAURIE: We are twins sixteen years of age. We met two boys at a party

last winter, and have been going with them constantly since. Our parents object to these boys, and tell us we must give them up. We have grown very fond of them and cannot ' decide what to do. Kindly advise us.

A Perplexed Pair. OF course your parents know best, and you know that they know best, don't you my dears?--so follow their advice, and give up the boys gladly, happy that you have a father and mother so interested in your happiness. You both bave plenty of time to think of love in the years to come, and all that love, true the love, means.

Annie Laurie.

DEAR ANNIE LAURIE: I am fifteen years old, and I am very fond of a fair boy a year clder than I am. But there is one drawback. There is a certain girl living in the same neighborhood who is also fond of the same boy. She is continually making mischief. I have had him down to the house on different occasions. Would you mind giving me your advice? Would you drop him or stay with him, as I have reasons to think he is fonder of me than the other girl?

Worried Blonde. G OODNESS me, my dear fifteen-year-old Worried Bionde! the

only advice I can give you is not to think so much of the boys until the years have rolled around and made you older. There is plenty of time in life for love and all its problems to come to you, so wait, my dear, and you will be happier in the end. Annie Laurie

DEAR ANNIE LAURIE:

I am sixteen years old I have very dear boy friend, twentytwo years of age, who seems very fond of me At Christmas he gave me a beautiful present, and I have also given him quite expensive gifts. He 'phones me about twice a week, and comes to see me about once every two weeks. But as the Scotchman says "for a' that," I cannot understand him. Another girl friend of his sits either behind or beside me in

PAGE SEVEN .

I generally meet on my way to college. I do not seem to care for any other boy I meet, as I love this one so much. He often speaks about the time when "we" shall take up housekeeping. He is graduating this year as a professional man, and I finish school this year, but expect to study going to be an old maid? music more thoroly in the fall What do you think about it? than I have done. He often buys me popular pieces of music, too. Now, my dear Annie Laurie, please don't think me foolish, but I think it relieves one's mind to write and tell some one about one's love affairs. Should I tell him all my trivial things and build all my castles on him or do

Blondy. O^H, Blondy, why did you go about hurting other people's feelings and expect that you would never have to pay for it? I would not take a pessimistic view of my life, however. It does not seem

to me that there is any way you can win back the friendship of a man you have treated so-better try to forget him and begin to make new friends and, when you have, be loyal-it's such OUR LETTER isn't silly at all, a wonderful crown for a woman's head. my dear Blue Eyes, it does heip Annie Laurie.

THAT PROBLEM

OF THE KISS

a wee bit to write someone of things that are so hard to tell even your dearest friends whom you see every day. If I were you, I don't think I would waste many serious thoughts upon a boy who sits in the choir and flirts with the girl just back of you. Others notice it, you may be sure, and wonder why you DEAR ANNIE ANNIE: permit it.

Blue Eyes.

If he has never asked you to marry him, no matter how often he has spoken of taking up housekeepinghis intentions are not as serious as they should be. Spend less time with him than you have done in the past, and there is no doubt in the world, my dear Blue Eyes, that he will be more anxious to come to an understanding with you, and then you will be "happy ever after." I hope.

you think he is only jollying me

along?

1

Annie Laurie

DEAR ANNIE LAURIE: I am fourteen years old. I am love with a man thirty years old. Do not - think me foolish, but I love him very much. He has another sweetheart, but he says he loves me the best, and says he will give up his sweetheart if I will marry him at once. He makes seven dollars a week, and seems a good steady fellow, and oh, is so kind to me. Please tell me what to do. Should I marry him? Don't tell

me to give him up-it would break my heart. He says he will make me very happy, and buy me everything my heart desires. Perplexed Agnes.

OODNESS, gracious my dear Perplexed Agnes, I only wish J I knew your mother and father so I could tell them to take better

right-whether or not he really did care more for you than for the other hear from him. I would love to win my old beau back. I meet him quite often. We speak, but he girl-and so on. Wait-he'll let you never offers to come with me. know. never seem to be able to get a fellow now. Do you think I should give up thinking about him and settle down and consider myself AFTER THE QUARREL an old maid, for I surely feel I am

DEAR ANNIE LAURIE:

= mullillen

I have a case to put before you, that tho you might view it as simple, it is terribly puzzling to me. This is it.

Annie Laurie.

I have, or rather did have (as you could hardly call him a friend now) a very dear boy friend. I do not profess to be in love with him, but I like him very much. As to his feelings for me, I know nothing of them.

Well, about ten months ago we had a misunderstanding, and I took steps to clear it up, and to appearances at the time, I understood things to be back in their old way. Well, I went on a short holiday, and when I came back I fancied, or do not know whether it was only fancy, that he treated me coolly, and would not acknowledge me. I will tell you a little about our friendship that you may be able to advise me better. We were I am a young girl of eighteen and am considered rather goodon very friendly terms for about three years. He has made me two very handsome presents for the looking, and have been keeping company with a good man for over two Christmases preceding last one, and always remembered my year: he is two years my senior He told me the other night that he loved me and then he kissed birthday with a gift the I do not ever remember telling him the me. Should I let him do that? I think a lot of him and would not date. He made me countless small attentions, and was, indeed, an ideal friend. I never treated him like to hurt his feelings, but I do not like him to kiss me. What as a sweetheart, because I con-sider I had no right as there was no understanding between us, but we have been very close friends HE very next time he kisses you, my dear Hopeless, turn your till this trouble began, and, natur-ally, I miss him, but do not see how I can approach him. In-a-Tangle.

V / ELL, In-a-Tangle, it's a strange

say you are not going to let him kiss you. For, my dear, men like for a time the girl who permits their kiss-es, but they forget all about her and time's a quarrel is as requisite for the the say about the real standing of the "quarrel" in life's list of necessary evils—with many na-ture's a quarrel is as requisite for the heart and mind as bread for the body such liberties when the time comes to I have even heard a man remark that he thought the only excuse for a man get a divorce from his wife would be that she never would let the waves of the family sea get rufiled even a

little-and he was a very responsible and dignified man, too. But, there is the other type of person with whom a quarrel seems like a relentless fate snipping the skein of life-you may try to tie the severed thread togetherand think you have done it very skillfully-but-snip-it is broken again.

THE TORONTO SUNDAY WORLD

bring greater trouble upon you the longer he persists in them. It may be hard to do so now, because you leve him in spite of his faults, but life with him under those circumstances would be larder still. Annie Laurie.

ABOUT SOLDIERS AND FROM THEM

DEAR ANNIE LAURIE:

I have been keeping company with a young man two years my senior. He comes up to see me about twice a week. love him very much, and he tells me he loves me. He sometimes asks me if I care for him, and I do not tell him. I feel it isn't my place to tell him. Will you please tell me if it would be proper for to tell him when he asks me if I love him

He has joined the colors, and is going with the third contingent. have promised to correspond with him, and keep company with him if he returns. I am eighteen years of age.

Canadian.

MY DEAR CANADIAN, I think you are doing just right in not telling him that you love him -so often it is best to keep a young man guessing until the hour comes when he asks you to marry him, and you can tell him you love him without fear he will misunderstand. Annie Laurie.

DEAR ANNIE LAURIE:

Some time ago I kept company with a young lady whom I liked very much. After going together for about eight months, I gave her an engagement ring. Things went all right till shortly after Christmas, and then she asked me to take her home as she was "homesick." This appealing to me to be improper, I objected and explained things to her, at least tried to tell her it wouldn't right. We have not been friends Do you think I did the proper thing? I got the ring back. Did I do right to take it? The young

lady is now keeping company with another gentleman. Do you think she had any love for me? Try and advise me, Annie Laurie, as I feel worried.

Reginald. ES, Reginald, you did right. Now do right again and forget all about that girl and make some

new friends for yourself. You'll be some day-see if you are not. Annie Laurie glad DEAR ANNIE LAURIE:

I wrote to you six weeks ago, but not seeing my letter answered, I thought perhaps you didn't receive it. My girl friend who lives in De-

troit, says she can't write to me any more, because her local gentleman friend objects. They are not engaged. She asked me what she could do? I explained that her friend was in the wrong. With this nature the only thing to do Now, what shall I say to her?

DEAR ANNIE LAURIE: I am a young student, and not in very good financial circumstances. I have been corresponding with a young lady whom I have never seen, but we have exchanged photos with each other. I am nineteen years of age, and she is also of the same age. I have never yet considered matrimony, and do not intend to do so until I complete my course, while she seems to take our correspondence very seriously. She states in her letters that she is desperately in love with me, and wishes me to come and see her during my holidays. I wrote her that owing to my financial circumstances I will not be able to spend my vacation with her, but will have to remain here and work. Not long ago I received a reply from her stating that her parents are quite content to furnish me with sufficient money to cover my entire expense during my visit. Now, Miss Laurie, what do you advise me to do? Should I accept this kind offer? One of my relatives who does not know this young lady very well advised me to discontine this correspondence. I was quite satisfied to do so, but lately she sent me a very valuable gift for my birthday, but I sent her nothing for her birthday. Should I have accepted her gift? Should I.continue this correspondence? Now after she sent me that gift, I don't know how to discontinue our correspondence. What do you think of this young lady?

Please, Miss Laurie, do not dis-appoint me, and give me an ad-vice. Poor Boy.

W ELL, Poor Boy, it's not easy to be poor, but it's far less easy to be pursued by a rich girl and know how to manage such a try-ing situation. If I were as young as you, tho, I believe I would send back all the valuable gifts, and any letters you may have kept and tell her in a good sensible little note that you are going to win a place in the world for yourself first, and then, if she is still free, you will find her out and begin acquaintance-anew. You will have an object then to work for and will have kept your own self respect. which, whether we be man or w is our first and best treasure all thru

life. annie Lanie

marry

should I do?

Annie Laurie DEAR ANNIE LAURIE: I have a friend with whom I correspond. He is across the border. Now, the trouble is-he has a girl friend whom I think he intends to marry and I'm afraid she is jealous of our friendship.

He seems more like a big brother to me than anything else, only she

won't understand. We had quit

THE SMILING FACE CLUB

Directed By C. A. Macphie

--- ADVENTURES OF THE TWINS AND GOOD, KIND, DEAR DOG MUTT ---A HOT DAY COMES AND WHAT HAPPENS TO JOHN

One hot, hot day, John said to Tom; "I'm by this window now, I'll take my blouse and hang it here And cool myself somehow."

And that is just what Johnny did; He took his blouse, I say, And hung it on the window sill To cool himself some way.

A bumble bee was passing by And saw that blouse, "Ho! Ho!" Then right into that blouse he flew, 'Twas odd but it was so.

Then bye and bye the sun went in, And Johnny said to Tom; "I'll put that blouse right on again, Now all the sun has gone.'

Then me; Oh! my! what happened next? "Bizz! Buzz! Oh, WOW it's hot! There's something PRICKING, STICKING me, Oh! No! I can't tell what.'

Oh! Wow! Boo! Hoo! Ah, crickie me!

Who is ever any better for crying?

Poor Pa comes racing in the door; He wrings his hands and cries: "Say! STOP! and tell me what it is, . I'm here before your eyes."

Well, Mutt, good dog, was there, of course, And great was his distress; He showed more brains than Pa or all I really must confess.

For when he heard those Buzz's-say! He just looked 'round you see, Then, grabbed a flower from a vase, As quickly as could be.

Then right in front of John, my dear, Upon his good, kind feet, He stood quite straight and stiff, my dear, And sniffed that flower sweet.

The bee, of course, then smelled it too, And out it flew, pell-mell; And hit the flower, biff! so hard That good Mutt almost fell.

Well, any way, young John was saved, But this I'll have you know; Ouite twenty lumps were on his back, 'Twas sad, but it was so.

UNE is not only rose time, but it is the time of weddings as well. Next to the marriage ceremony itself the most important feature of the wedding is the bride's trousseau. To prepare this for the day of days both mother and daughter have thought and planned in advance, for every bride is anxious to have her clothes lovelier than anybody's else.

The bridal robe is. of course, the pearl of the trousseau, and to my mind should carry with it an atmosphere of girlish charm and delicacy. There should be something ethereal. something fragile about it. like fairy gossamer or moonlight shining on an apple tree in bloom. It is the first gown of a new life full of promise and hope, and it should characterize these elements.

This gown must be totally different from all others in its sparkling, dazaling whiteness

The Modernity of White.

Few brides are aware that white attire for the nuptial ceremonies is of comparatively modern origin. Yellow was the color adopted by the Roman ladies, and even now pink is the color which finds favor with eastern brides.

In the middle ages, and during the Renaissance, brides were frocked in crimson. Most of the Tudor and Plantagenet queens also were married in that vivid hue, which continues to be popular in parts of Brittany.

We are indebted to Mary Stuart for the bridal garment of white. At her marriage with Francis I. of France, in 1558, which took place before the great doors of Notre Dame, she was attired in white brocade, with a court train of pale blue Persian velvet six yards in length. This innovation caused a great stir in the fashionable world of her time. It was not until the end of the 17th century that pure white was adopted. Previous to this time only royal widows wore this color.

The wedding gown of the present season is either stately in line and fashioned of rare lace and rich satin, or it is a simple, girlish frock of tulle, chiffon and lace made in a picturesque, old-fashioned manner that hints of days since gone by. Personally I favor the very simple. very soft and very youthful wedding dress. The ideal sown, as I woul' have it, is a cloud of tulle, layer upon layer of transparency, with the skirt shirred full to stand away from the ankles. for of course the new fashions de-

he Frise ans

Er Grouzzeau Establishing New Traditions

for the Ceremonial Gown and Finding Interesting Variety for the Outfit of Summer Frocks, Hats and Ornaments

mand that even the bridal gown be short enough to show the ankles.

A frock of this type which I saw recently has the uppermost layer of tulle trimmed with a very wide border of silver embroidery in a very delicate, tracery. The bodice was made quite plain, with a rounded neck tine and long tulle sleeves. It was trimmed with motifs of silver embroidery.

The Girlish Effect.

The girlish effect of this gown was further enhanced by a short veil of tulle caught about the brow with a wreath of orange blossoms twined with silver. The elaborate veil of real lace is out of place this year, with hand embroidery and lace. Most and the only contrast to the filmy of them have wide skirts shirred costume is the huge bouquet of orange about the top or joined to snugly fitlev which the bride carries.

Speaking of bridal bouquets, I under-Fland that the very latest novelty is gauze ribbon. I feel sure that this lovely combination will appeal to many of the June brides.

Refore I pass on to the subject of afternoon and street costumes let me beg of you-if you are young-to acteristic feature is simplicity. Why threads. "paint the lily"? No matter how generous your allowance may be, bar Jacket and Skirt. the gorgeous brocaded satin gown from your trousseau. Later on, when

> one can have, and appears well on the street or indoors. Very charming indeed is a frock which I stopped to admire in the window of a smart shop. It was a coat dress, and the bodice was made to simulate an Eton facket. The under bodice was of the finest white batiste trimmed with narrow pleated frills. The wide skirt was gathered about the waist line, and a sash of the silk was knotted low over the right hip.

Fetching Dance Frocks.

The modern bride is very proud of her dance frocks, for she does not intend to forget the "new steps," even of the coat, ornamented with patch if her time is engrossed by the cares pockets. The long sleeves are a conof a home. She is sure to have one of Gros de Londres in a pale tint of but fits snugly about the throat, and blue, pink, mauve or yellow. And it is faced with bright blue velvet will be made with an Empire bodice and a voluminous skirt trimmed with boast of a light-weight evening wrap. pleated ruches or flounces of lace. Then she will have a more elaborate evening gown of chiffon, tulle or rose lace over a foundation of silk. Touches of silver or gold embroidery one-piece frocks of Shantung silk. will ornament the bodice and skirt, and the sleeves will be mere wisps of of narrow ribbon velvet over the the colors of the opal

Example of the Military Gown for Afternoon Wear, with the "Grenadier" Hat.

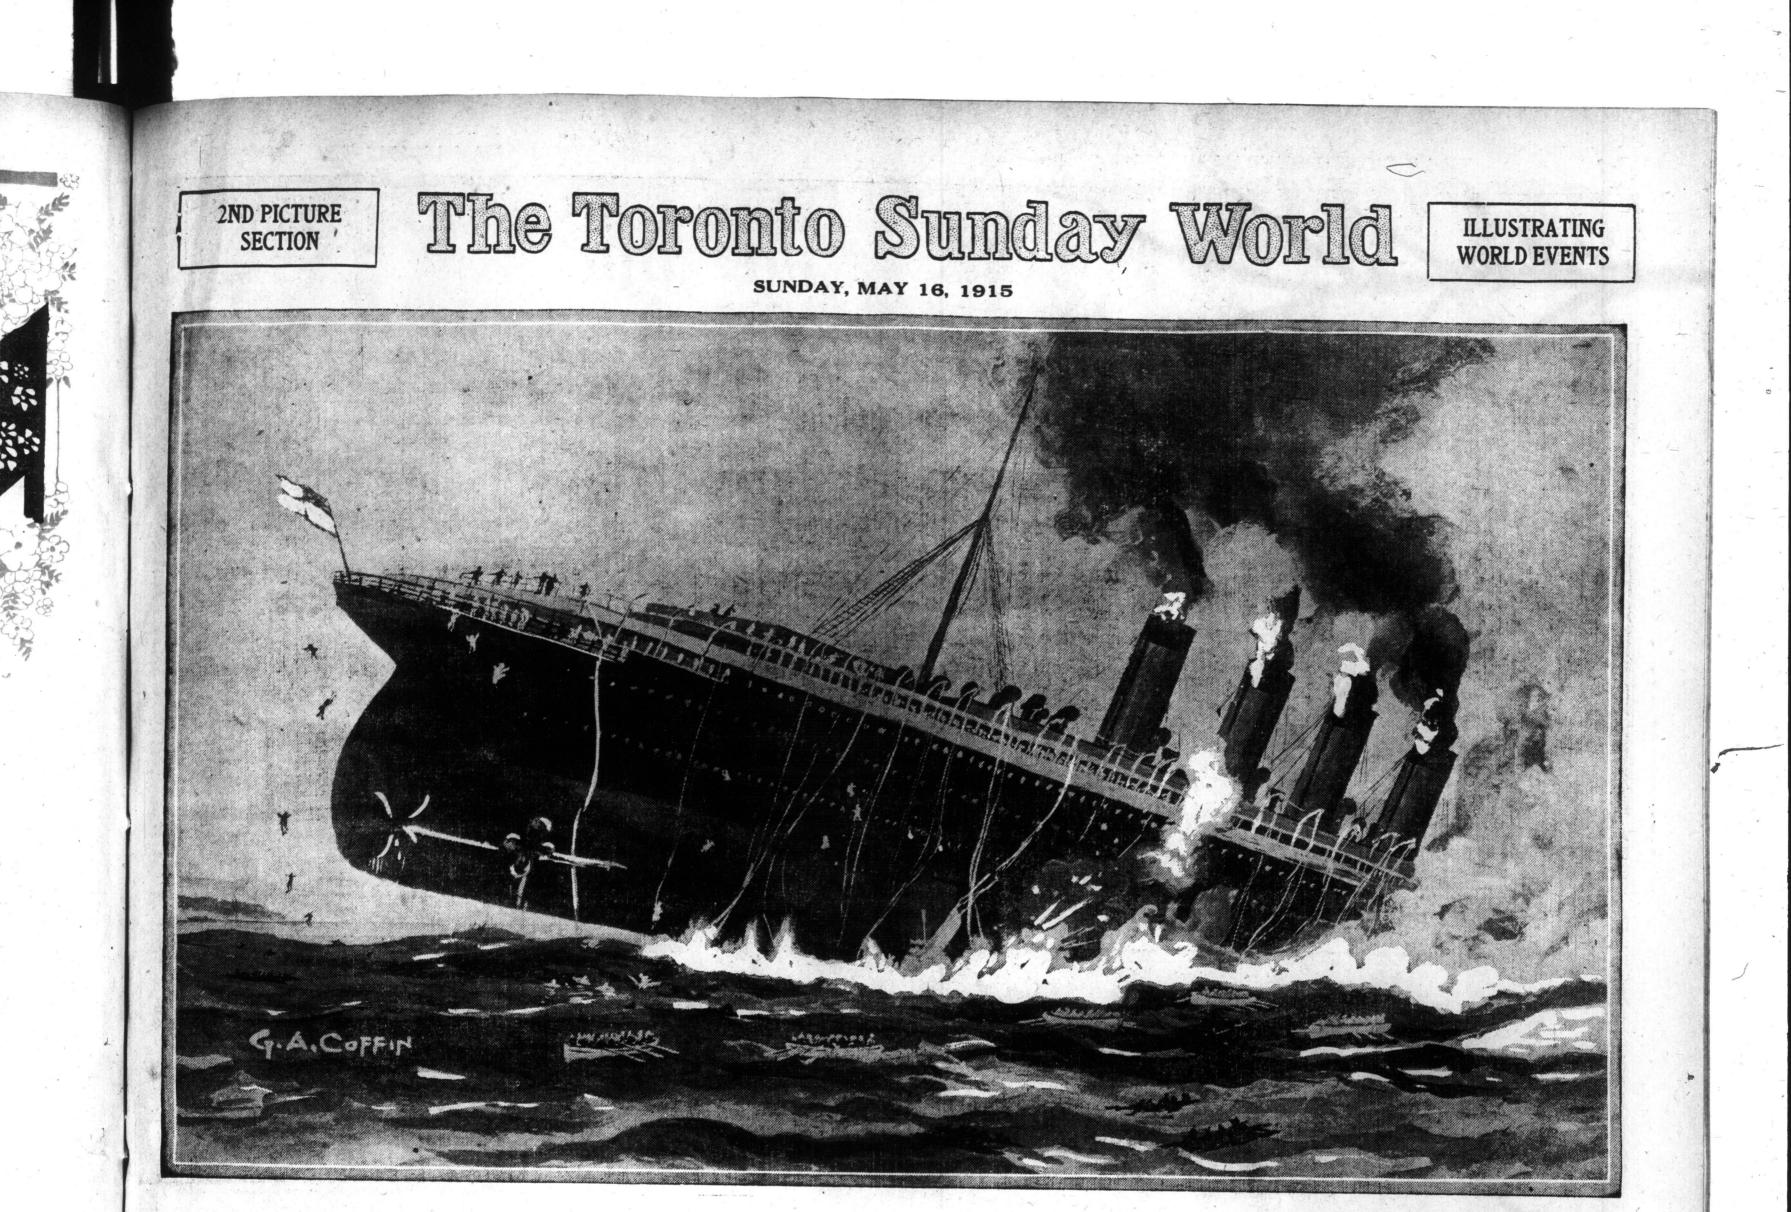

The topcoat is not a dainty garment, but it occupies a well deserved place in the bride's trousseau. You will find many models of serge, gabardine, covert and homespun that are unusually smart. Each bride will aim to discover something new and different, and will know that her search is ended when she finds a coat of bamboo colored cloth cut with an oddly shaped yoke.

From this is hung the ample skirt tinuation of the yoke and the collar,

The class of 1916 going to the railway station in Paris to depart for the training field. With their personal belongings wrapped in newspaper or packed in home made knapsacks, these lads of about eighteen years go merrily away. In a few months they will be in the firing line. They are striking evidence of how our allies are putting forth every resource in a time of peril to all the world.

British soldiers drawing water from a well in the streets of Ypres.

The new field kitchen, filled with removable ovens, by means of which one hundred meals of soups, joints, vegetables, tea, etc., can be served immediately when a halt is called. Very little coal is required, the fire being kept going with wood or dry refuse found on the field. A rack over the stove provides facilities for drying clothes.

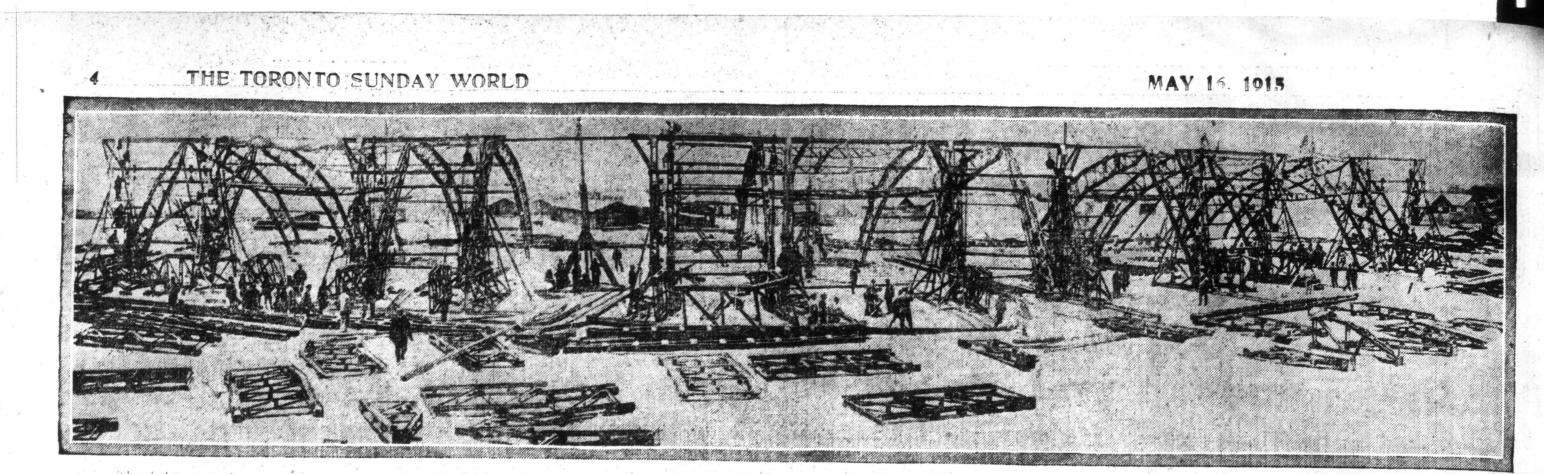

The Grand Duke Michael Alexandrovitch, the only brother of the Tsar of Russia, is on active service in the Carpathians, commanding the Caucasian Native Division of the Russian army. In this exclusive picture, the grand duke is shown at the left on the bank of the upper San River, south of Przemysl.

Two Island Schools

Meanwhile W. A. Dean has wasted no time since he got permission last Tuesday to fly, and is getting his first class and his Curtiss flying boat ready ality, and will be probably dispensed immediate action. His school is the Island, just east of the R. C.

Up in North Toronto, in Lawrence Park, west of Yonge street, Lloyd E. Janney has got his class at work, and is also doing some rapid building on a new muchine.

So it all means that Toronto folks are going to see a lot of aviation this summer. There won't be any "stunts" to gasp at; there will be just a lot of good, sensible flying, the sort one would expect of the courageous young Canadian who realizes that he is en-gaged in serious business of the ut-

For Certificates It is to train a man for an aviator's certificate that the schools in Toronto were opened. They are not under government control, altho the govern-ment can revoke the permission to fly that the schools have received. The institutions are private. This is to correct an impression that has got girl, there was nothing surprising in the stories of devotion to duty dis-played by her sister on the battle-field. It seemed to be but the na-tural thing to expect of the telephone girl anywhere. There was the tele-phone girl of Dahlen, Belgium. She is still among the long list of un-named heroes and heroines of the war, for she died on duty, and the soldiery who swept over the mass of

Canada, four years after that Do-of the "Panhandie." America Proposes

Transfer to Canada

Interest in this strip of territory has been aroused of late by a resolu-tion introduced at the last United war, for she died on duty, and the soldiery who swept over the mass of debris under which her exchange was buried, were too busy with other things to seek to find out who she was. But she lives in the grateful States Congress by Honorable Frank O. Smith, of Maryland, in which it is

for the action of Lord Alverstone,

O. Smith, of Maryland, in which it is proposed that the president of the United States be requested to offer to Great Britain and Canada to negotiate for the transfer of the "Panhandis" to Canada by sale or exchange or both. Innumerable letters, we are told, have been written by prominent Americans in both public and private life endorsing the idea. Many are in favor of a direct gift; some advocate sale, some "swap"; but all agree that the transfer should be made. It would certainly be a movement in the directhe transfer should be made. It would certainly be a movement in the direc-tion of universal peace One ingenious scheme was that British Honduras might be given in exchange for the "Panhandle." and that in turn swap-ped to Mexico for territorial exten-sions on the mainland of America. But large percentase of onlines for the fighting, and now her exchange was been exchange was the fighting and now her exchange was the first of the fighting and now her exchange was the centre of the fighting. a large percentage of opinions favor the centre of their field telephone the direct cession of the Alaska coast service. Undisturbed by the shells

the direct cession of the Alaska coast strip to Canada without a string or a reservation. This would indeed be heaping coals of fire on the head of Canada, four years after that Do-procity from the United States. The importance of the "Panhandle" to Canada is shown in a statement of Mr. Smith, that 600,000 square miles of inhabitable Canadian country, rich Mr. Smith, that 600,000 square miles of inhabitable Canadian country, rich in timber, agricultural, and mining lands, is deprived of its natural sea-board, a stretch of land three times the area of Germany, and ten times pleces, the brave operator going to that of England and Wales together.

her death in the ruins. Change but a few details of time. This innocently imprisoned territory has the same climate as Europe in place and conditions and you have the nickel. Some have to buy because its the only way to be let out from in front. And they have to bustle off to get their feet trodden on, be bumped off the sidewalk and run into in other crowded spots. There isn't anything off the sidewalk and run into in other crowded spots. There isn't anything all Scotland, all Denmark. Sweden and Mrs. Rooke saw the flood coming. and crowded spots. There isn't anything worth seeing in a "cop" arresting a newsboy or some fellow predicting the end of the world from a wagon. We can understand a good fire or a re-spectable dog fight. THE TORONTO SUNDAY WORLD

MAY 16 1915

W E HAD brother with us for din-ner last night—the first time he had come—and I did try my very hardest to prepare what I remembered he liked. He always had a fondness for tea, due, perhaps to the fact that he used to absorb huge guantities of it to keep awake during the periods when he sat up until 2

a.m., cramming for his examinations. So I decided on tea as the beverage remarked.

"Admitted." said brother, "but 'fess for our meal, mentally complimenting up nor myself on my thoughtfulness in re-calling his preference. But pride was I did up now, did you prepare the tea I didn't, but I wouldn't confess

how I had prepared the tea. All these little details of boiling and heating the teapot and so on I had heard of, but to have a fall.

to have a fall. "Sis sure is a hummer of a cook," he agreed with Bob appreciatively. "but I say, why do you make tea?" I looked up astonished. "If you must know, I made it especially because you were coming, and I remembered you preferred tea. Why do you ask? Have you any criticism of tea in general or this tea in particular?"

"Far be it from me to disparage the works of so gracious a hostess," he returned in his best high school or-atory manner, "but if you want to listen to a mere man who doesn't know anything about cooking, except what he once learned about making the while compliance with a humatical school or to be a school or to be tes while camping with a bunch of fellows, I'll be glad to pass on this valuable knowledge to you without harge.

"Don't listen to him, Bubbles." in-terrupted Bob, loyalty. "You make first-class tea, and I'm not going to have this young cub set himself up as

have this young cub set himself up as your guide and counsellor." "Thanks, awfully, for your confi-dence. Bob. but Fm afraid you're not the best judge, considering that you only partake of tea about once in a week. Besides, if this youth has any mysteries to impart about tea making Fm all ears to hear and improve my-self in the grt."

"First be sure that the water is ab-olutely at boiling point and is fresh.

W onstrated, are the unselfish sex. They will sacrifice them-selves and all they hold dearest for the

of making other people happy will refuse to count the cost if is the gain of anyone they love. They will give up life and all that makes life worth living, with a cheerful smile, at the behest of those they want to

They are magnificent in this virtue. There is positively no limit to the un-selfishness of which woman is capable; but even the best of women are not noted for their gratitude.

Noted for their gratitude. It is a curious fact and perhaps it in some measure accounts for it that people who are generous in bestowing are generally ungrateful. They are so used to self-sacrifice that they don't appreciate sacrifices at their full value when other people make them. They take as a matter of course what selfish people would regard with awe and wonder.

Women's ingratitude comes out in even the simplest acts of everyday life. Look at them in traveling. You may get up a score of times to give a wo-**BIG SUCCESS**

man your seat and it is perhaps one time out of twenty that she even troubles to thank you. When she does, it is in the most casual manner, as if she thought your action a matter of

course. Give up your time, your work, your money to her and she will accept it in the same spirit. I think, in a pretty wide experience of life and mannets, I have never known a woman more than twice to endeavor to repay a ser-vice that was done her. She may be graceful in acknowledging it-educa-tion teaches her pretty manners-but it slides off her like water off a duck's back and she is a living example of back and she is a living example benefits forgot.

There is no doubt that the greatest There is no doubt that the greatest compliment any man can pay any wo-man is to ask her to be his wife. He shows by his act that he places her above the rest of the world. He be-stows on her a favor which she might at least appreciate if she cannot ac-cept it; but how many women ever lived upon this terrestrial ball who were grateful to men for having pro-posed to them?

they accept they are not grateful. Pleased they may be elated, gratified, filled with rapture; but the emotion of gratitude is the very last one that presents itself to their minds.

Enough to See it.

not only helps those who help themselves, but also double aid when two living creatures are each helpful besides to each other. Co-operation, however, is of various sorts. Symbiosis is a formidable and terrifying name which means two animalcules or plants living in each other so as to be mutually helpful in each other's growth and well being in no way harmful.

Secrets of Health and Happiness

.The association of two living things of different kinds -different species-is true symbiosis. It is specialism in nature, and may be compared with a legless man with

DR. HIRSHBERG good eyes sitting on an armless, blind man's shoulders Bees fertilize and cross fertilize flowers which are firmly rooted in the ground. The bee, in its turn, gets its proper food and albumen from the pollen of the vegetating thing.

Various Odd Examples.

The lichens, pale, greenish scales which you see picturesquely clinging to stones, barks of trees and old ruins, is a symbiotic association of a fungus or mold and the green water plants calleld algae. The algae cannot obtain their necessary mineral constituents and moisture from the soil, but by virtue of its green stuff—chlorophyl—it makes use of light to evolve albumens for the sustances of both. The mold on the contrary obtains for the mold and the green where prices and moisture from the soil, but by the prices and moisture from the soil, but by the sustenance of both. The mold, on the contrary, obtains from the soil by its acids all the water and minerals necessary for both of them. Lichens are thus among the most interesting of such double creatures. By this curious doub-time up it can get its sustenance either from a barren rock or a dry, hard the soil by its curious in water. The sustenance of both. The mold, on the contrary, obtains from the soil by its fore meals. Exercise in the open air, and take five grains of sodium salicylate every four hours in water.

and the medusa or stinging nettle form a noteworthy one. The fish seeks protection from its enemies beneath the medusa's stinging draperies, while the finny creature, more intelligent than the nettle, compensates for this service by finding the assassins of the medusa and scurrying out of their reach with its gelatinous host.

Symbiosis vs. Parasitism

Nitrogen bacteria which live among the nodules of peas, clover, beans and other legumes, lead this "symbiotic existence." In poor soil the legumes be-come almost as dependent upon these germs-which seize and utilize the nitro-gen in the air-as the alae of the lichen are dependent upon the mold. Parasitism differs extraordinarily from symbiosis. In the latter the two different creatures mayhap plant and animal, dwell in harmony together for their mutual common good. Parasites, however, live upon their hosts. There is no exchange of benefits, only a war to the knife. Bacteria, when they cause disease, are parasites. Pin worms, round worm

Hockworms are neither symblotic or parasites. Fin worms, round worms Hockworms are true parasites, for they live almost upon man's very life blood. Mosquitoes are intermittent parasites, and carry malaria, yellow fever and other animalcules which they inoculate into the blood as permanent parasites.

OF 746 cases of cancer treated at the Radium Institute of London last year there were 69 apparent cures, while 323 were reported im-proved. Many of the cases came to the attention of the institute in too ad-vanced a stage to be remedied.

FOR CANCER IS

The state of tea about once in a week. Besides, if this youth has any mysteries to impart about tea making fm all ears to hear and improve my-risif in the art."
"Mystery nothing." growled brother. "Bet you a box of candy you didn't make this tea right. You know I've partaken of so much of this harmless little beverage that when age makes me useless for my present active mouth, cancer of the mouth, or palate, for instance, can be readily dealt with by radium.
"It's the simplest thing in the world to make good tea. and yet there's nobedy I know makes it right. scopt one girl, and I taught her how to do it."
vanced a stage to be remedied.
The comparatively new curative known as radium is especially useful in dealing with superalical cancers of the skin and with cases that are not easily operable. Conveniently handled, it gets at growths which cannot be reached by means of the X-rays. Because the patient can take radium in the mouth, cancer of the mouth, or palate, for instance, can be readily dealt with by radium.
Those birthmarks commonly known as "port wine stains" seem to be effectively treated with radium. A porter suffering from this disfigurement had repeatedly been refused employment. He went to the institute and

by radium. Those birthmarks commonly known as "port wine stains" seem to be effectively treated with radium. A porter suffering from this disfigure-ment had repeatedly been refused em-ployment. He went to the institute and after a time the mark was entirely eradicated.

lived upon this terresultation who were grateful to men for having pro-posed to them? They take a proposal in a dozen dif-ferent ways. They may shy at it, avoid it, try to escape it. They may re-fuse it with contempt, with indiffer-ence, with indignation; but how often do they feel an emotion of gratitude in connection with it? Nay, even when they accent they are not grateful.

Two years ago Nurse Dowdeswell, of We years ago Aurse Dowdeswell, or M Alfred street, Gloucester, England, wrote to say that Dr. Caseel's Tablets had cured her of acute kidney trou-ble, and saved her from operation, and the now tells her story for the benefit of fellow sufferers in the Dominion. She B.Y.S.:

"I'am pleased to say that I have had the best of health since I told you of my sure by Dr. Cassel's Tablets some two years ago. People remark on how well I look. When I think of what I suffered before I knew of Dr. Cassel's Tablets, I feel I can never sufficiently praise your glandid medicine. Kidney trouble had reduced me to such a state of helpless-mess that I could not walk alone. I had indergone two operations, and taken mess that I could not wais and taken undergone two operations, and taken endless medicine; but nothing helped me Often I was in frightful pain, pain that lasted for hours at a time. I was also a martyr to dyspepsia, and so weak and spiritless that I used to wish I could die back. My head ached fit to split, and I had no heart or energy for anything. I had the best advice, and was told that my kidneys were affected. Medicine after and be done with suffering. Although, as

A maxe said, I was twice operated on for sidney trouble I got no relief at all. I was urged to undergo a third operation on my left kidney, but by that time I was urged to undergo a third operation was taking Dr. Casseli's Tablets, and the accounts related, the operation, and persevered with the been of I began to gain flesh. In a monde and I began to gain flesh. In a work and I began to gain flesh. In a work and I began to gain flesh. In a work and it began to gain flesh. In a semetimes very trying—I juet take a fore or two of Dr. Cassell's Tablets, and the set down, well and strong. Now, if ever I feel a sometimes very trying—I juet take a fore or two of Dr. Cassell's Tablets, and they are just splendid."
 That is the testimony of a trained they never fail to set me up again. They are just splendid."
 Dr. Cassell's Tablets put new life and tiggits and storekeepers throughout the Dominion sell Dr. Cassell's Tablets would keep Dr. Cassell's Tablets would keep Dr. Cassell's Tablets would keep Dr. Cassell's Tablets of the or miling and storekeepers throughout the Dominion sell Dr. Cassell's Tablets is sure evidence of their millow walle.

Dr. Cassell's Tablets put new life and vigour into the kidneys by strengthening the nerves that control kidney action. That is why Dr. Cassell's Tablets cure the main agents for Canada, H. F. Ritchie and Co. Ltd., 10 McCaul street, Toronto, Ont.

The was too weak to walk alone, even very severe cases. Here is another instance which further emphasizes the extraordinary healing and vitalizing newers of the seat British remedy Dr. Cassell's Tablets. at British remedy, D Many Chances Lost Because of ACUTE KIDNEY PAINS One of Parties Was Not Smart

Mrs. Ada Elliot

LARGEST SALE IN BRITAIN

BY LAURA RINGSTON.

Mrs. Ads Elliott, 6 Russell Grove, Regent Park road, Coventry road, Birm-ingham, England, says: "I first of all no-ticed that something was wrong with me when 1 wanted to stay in bed be-yond my usual time. When I got up I trembled from head to foot, and cruel pains caught me in the small of my ANY a man and many a woman for that matter, is pining in the shades of single bleasedness who might have emerged into the sunshine of matrimony long ago if summine of matrimony long ago if they had been quick-witted enough to see their chance, or bold enough to take the advantage of it when they saw it. Tho matrimony is a serious step in life it has often been brought about by a joke, which, if one of the parties had not been sufficiently witty to perpetrate or the other had not been to perpetrate or the other had not been sufficiently smart to see and take ad-vantage of, the happy union would

never have taken place. For instance, a doctor who had been For instance, a doctor who had over attending a lady friend was, on her recovery, asked what his charge would be. He replied that he seldom or never made a definite charge to his patient-friends, being well content to leave the matter, not only to their own time, but to their own sense of what was but to their own sense of what was

"But are you not often very disap-pointed with the result?" asked the send a stamped self-addressed en

ady. "I may say that I never am," said the

"As you are so easily pleased, here, then," said the lady, giving the doctor her empty right hand, while she kept concealed a check for a handsome amount in her other hand. "How easimedicine was tried, but no matter what medicine was tried, but no matter what I took or did the grinding pain went on. All food disagreed with me until E got to dread meal times coming round. "My skin was of a sickly, unhealthy color, and puffy rims formed round my eyres, and I dragged out the miserable days as best'I could. All I wanted was rest, and to be free from the constant pain which was tearing the life out of ly I could have taken you in?" she said a moment later, laughing in the doc-tor's face and showing him the check. "On the contrary," said the doctor, "you have only succeeded in drawing me out. Don't insult me with a check. I am most generously rewarded and could wish nothing better," and he iooked down at the empty hand which he had refused to relinquish. Such a pain which was tearing the life out of "The headaches and backaches became plain hint could scarcely be misun-derstood, especially if the lady was not particularly anxious to misunderstand it, and in this case, at least, it resulted

"The headaches and backaches became worse and worse, until there were days and days when I could hardily stir. I got very little sleep at nights, and this added to my sufferings. I was complete-ly worn out, for my nerves went all to pieces. A few months ago I read a re-port of Dr. Cassell's Tablets having cured a long standing case of kidney trouble and nervous prostration. I started taking the tablets at once, and am delighted to tell you that I am now cured. The wretched headaches and grinding 'back-aches left me, and my health is now splendid." n a happy marriage. A lady with a fine figure, having A lady with a fine figure, having taken a fancy to a ring which she saw ticketed in a fancy shop window, went inside to examine it. "It is exceed-ingly lovely. I wish it were mine," she said satisfying herself. "What smaller figure will tempt you?" "No other figure than the figure be-fore me." he said giving her an ad-

"No other figure than the figure be-fore me." he said, giving her an ad-miring look at the same time. "It is exceedingly lovely. I wish I could tempt you with the ring." "I think I'll take it." she said, lay-

ing down the money amid blushes. "A member of the house of repre-sentatives had been paying attention to the young lady for a long while, and had taken her to attend the house until she was well posted in the rules. On the last day of the session, as they came out, he bought her a bouquet of flowers, and said to her: "May I offer you my handful of flow-

ers?" She replied promptly: "I move to amend by omitting all af-ter the word "hand!" He blushingly seconded the amend-ment and they adopted it unanimously.

soft answer to the camp commandant -because the billet allotted to me was a loft with a Valenciennes roof and a floor like blane mange-is me High Gifts Diverted of those greased lightning stoves that, for some reason you never see at home. There is an iron bowl set out away from the wall, supporting one end of a flat, hollow platform big enough to cook a six course dinner. "They are quick, these stoves. I wake up-the early morning shrapnel fired at the reconnoitring aeroplanes overhead is my alarm clock-and pop nto the bowl two sticks, a lump coal, two bits of cast-off boots and a match. Then I run outside to warn the fire picket that the smoke issuing from my chimney does not really mean the village is on fire. That is a wee exaggeration, perhaps. But my stove is nearly as quick as that. single bar. "Only a passing reference is neces-sary to the trail of ruin left by the war in the destruction or damage of "Then Box and Cox take their turn of duty. Box boils my shaving water; Cox warms my tooth water. Item No. 2:--Dox, properly cleaned up, boils again for my tea, while I take Cox for a walk to get the milk. Cox Boils the Porridge "Now comes a little juggling. The lid of Box takes the milk. Being really a frying pan with a collapsible handle. frying pan with a collapsible handle, this lid is not suitable to fetch the milk in; but ,set firmly on the table, it holds up well enough. Cox, thus emptied, cooks my porridge. "Luxury? Yes; but in this little town, which the Huns could quite easi-ly shell, I dare say, if they wished, you can buy champagne and cigars (this must plque the Germans) and all the groceries and linen drapery you could wish. These Belgians see nothing wish. These Belgians see nothing quaint at all in shopkeeping within shraphel range. One must live, even if one dies in the attempt. "So Cox boils the porridge, and in goes the milk—part into Box, for the tea, and the rest into Cox. Then the lid of Box is free. In goes the bacon, and there you are meal complete. Ontario, but the granter part is shipand there you are—a meal complete. "Afterward Box boils the water for washing up. At funch Box's lid fries the potatoes, Box makes the stew and Cox boils up the dried figs. "I only mentioned them in this de-spatch to show you what a Maskelyne and Devant training you get out here. Give a man a few sticks and one mess tin, and he will turn out a three course meal, juggling with the various courses The fish known as the siscoe herring until some of them seem to rest in midair like Mahomet's coffin or the conjurer's third top hat. "At home an empty biscuit tin is an empty biscuit tin, and you let it go (10 smoked herrings that are now sold the dust bin) at that. Out here you cut two sides round the edges, turn them for siscoe herrings are not the genuine, but are the common lake specie, up to meet, bore a few holes around, and you have a fine brazier, with in The closed season for whitefish and oven underneath good enough to roast trout is during the month of No-vember, and for black bass from May "Mr. Edison Atkins is every bit as much of a handyman as his comrade in the fifteenth until June the fifteenth More game fish are caught along the much of a handyman as his count of Jack arms of the North Sea fleet. If Jack is an able seaman, Tommy is an able Wilness the roads. You northeast shore on Lake Ontario and in the Bay of Quinte district than all landsman. Witness the roads. You never thought a mud lane could be over the province, and these resorts made into a road with twigs and rub-ble They do it in these parts. Fill in are the fisherman's paradise. ble They do it in these parts. Fill in your ditches. Lay across them bun-dles of twigs-miles of them. You would think it needed a forest to sup-ply them, but they find them some-where. Scatter brick rubble over the top, and you have a ready made road that a motor lorry can manoeuvre on. "Watch our khaki Escoffier in the trench. He digs a peg of wood into the mud wall. On it hangs a battered mess tin, picked from a refuse heap-full of holes. In a few moments the charcoal fire is glowing thru the holes. and he is giving his section a meal of Training Naval Gunners At Whale Island, near Portsmouth, the British admiralty maintains a large school where English seamen are charcoal fire is glowing thru the holes. and he is giving his section a meal of fried bacon, fried bread, fried chips, toast and cocca-all done with a fire which you could almost get inte # breakfast cup.

people whom it is given us to rule. for their well-being and the advancement of their material and intellectual interests. And again: I look upon the people and na-

tion handed on to me as a re-sponsibility conferred upon me by God: and that it is, as is written in the Bible, my duty to increase this heritage, for which one day I shall be called upon to give an account; those who try to interfere with my task I shall crush. And again

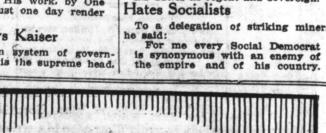

I regard my whole position as given to me direct from heaven, and that I have been called by the Highest to do His work, by One to Whom I must one day render an account

"I'm It," Says Kaiser

FRUI

20

In the German system of govern-ment the kalser is the supreme head,

crown from God's hand and from none other." And, referring to this historical incident, the present kaiser. William II., in a speech, now historic, at the ame place, said: And here my grandfather, again, by his own right, set the Prus-sian crown upon his head, once more distinctly emphasizing the fact that it was accorded him by the will of God alone, and not by

and that he thus locked upon himself as the chosen instrument of Heaven, and as such performed his duties as regent and sovereign.

Beware of Substitutes

It is a fact to be noted that, up to 1898, in the first decade of the Kaiser's rule, more than 1000 years of imprisonment had been served by of-fenders against the law of less majeste, nearly all by Social Demo-crats. Up to 1914 it has been figured that 30,000 years have been served for this offence. thing.

Speaking of his ascension of the throne the Kaiser afterwards said: With grave anxiety I placed the crown upon my head. Every-where I met doubt, and the whole world misjudged me. But one had confidence in me; but one believed in me-that was the army. And relying upon the army, and trust-ing in God, I began my reign, knowing well that the army is the main tower of strength for my country, the main pillar support-ing the Prussian throne to which God in his wisdom had called me. He said in 1891:

The soldier and the army, not parliamentary majorities and de-cisions, have welded together the German Empire. My confidence is in the army—as my grand-father said at Coblenz: "These are the gentlemen on whom I can

And again, asserting his belief in military force as the means upon which the empire must rely to accom-plish its ends at home and abroad, he quoted the saying of Frederick Willlam I

If one wishes to decide something in this world, it is not the pen alone that will do it if unsupported by the power of the sword. And again: The absolutely inviolable de-

pendence upon the war lord (Kreigsherr) is, in the army, the father to son, from generation to generation. • • • So we are ound together, I and the army. Thus we are born for one another, and thus we will hold together in an indissoluble bond, in peace or storm, as God wills.

"He regards his people, the masses as children not yet of age," said Professor Ludwig Gurlitt, a German, "and thinks the government competent to prescribe the course of their social and cultural development-a profound and fatal mistake, a mediaeval idea."

The doctors tell us that tobacco shortens our days. This is absoutely wrong. We trued cutting out the weed and the days were about three weeks long.

. . . Possibly Uncle Sam treats Ger-many's little playful prods in the nature of a spring Teutonic.

it to Toronto and sold it for \$10 and a blind horse. His sentence of one year looks reasonable.

A neutral nation, we suppose, is one that doesn't count for any-

As a prophet in the Lusitania case, Bernstorff turned out to be right. But that kind of a prophet becomes a dead loss to a country even in the patient U.S.A. . . .

Germans were chucked out of the London Stock Exchange when news of the Lusitania arrived. In other words, German stock was beared on 'change and fell rapidly.

.... The Hague to Geneva Con-vention, "Shake, old pard!" . . .

Spain wants Gibralter. Cheer up, Spain, we have that same longing feeling every time we look in the Bank of Montreal window.

New York police search vainly for a "Jack, the Ripper." Probably enlisted in the Kaiser's army by this time. . . .

A Texas League umpire made the league buy him an electric fan. We have a faint idea why only this brand of a fan would appeal to an umpire.

. . . War, we read, is enriching the various languages. Yes, we should imagine it would. . . .

Japan apparently has a deep-seated feeling that China should be hand-painted by Nippon. . . .

The Indian police department claim to have the finger prints of the German Crown Prince. The idea being that they will be able to prove that Willie, Jr., had a finger in the war pie, doubtless.

Our standard of civilization is somewhat peculiar. Japan was not recognized as a civilized nation until she went to war; Germany was always considered civilized until she went to war.

. . . The Turks have met British troops on land for the first time since the Crusades. And possibly decided that its about often enough for their liking.

The Chicago policeman who had his wrist injured when somebody wrapped him on the wrist watch will be losing an eye along with his monocle next thing.

The Kaiser recently referred to his navy as "that trusty shield." The third "t" is surely superflutory over Carranza. How a bush league murderer like Villa expects to receive any attention at this time beats us.

. . .

Woodrow Wilson says that he is too proud to fight. But other Americans, such as Teddy Roose-velt, shamelessly admit that they have red blood in their veins.

A Toronto Chinaman is suing a policeman for trespass and dam-ages to his property. The case of his own country and Japan should convince him that nobody has any right to a home unless they can defend it.

. . . When Norman Angell wrote "The Great Illusion," proving that there could be no war with Ger-many he probably had about as much knowledge of the German character as a pig has about a holiday.

The Kaiser has represented himself as a warrior, a preacher, an artist, an ant critic, a musician. But he has yet to experience being the guest of honor at a necktle social.

"At no previous moment in the his-tory of the world has civilization suf-fered such sore bereavement thru the diversion of the highest gifts to de-structive tasks. In a minor degree it is suffering further from the pressure of this horror upon the minds of men who stay at home, deadening their powers of thought and imagination, and inhibiting the exercise of their ripest talents. One hears of artists who lament that they have almost for-gotten that they once painted pictures, who lament that they have almost for-gotten that they once painted pictures, and of composers who since the war broke out have been unable to write a single har.

the literary and artistic treasures that happen to lie in its path. Every war is waged by vandals, and this one not the least. Here, too, anything like a complete estimate of losses is imposcomplete estimate of losses is impos-sible. The most serious are not al-ways those that are most prominent in newspaper dispatches. The burning of a great library attracts general at-

tention, but it may be that the mis-chief wrought thereby is mainly sentimental.

"The boasted cosmopolitanism science, of art, and of letters has sus-tained a blow from which it will take many years to recover," adds Mr. Hor-

faithfully portrayed. Its stirring in-cidents are arranged in such logical sequence, and are so entirely feasible, that the spectator, the often moved by emotion, is always conscious of the message of truth the play conveys. The author of "The Fight" is Bay-ard Veiller. He is a past-master of dramatic construction, and in this in-stance even surpassed his own previ-ous best effort, "Within the Law." It is enough to say that George Lederer personally supervised the production to convince the theatre-going public that nothing was left undone to make "The Fight" a histrionic success. The interpretation of the play is all The interpretation of the play is all that one may demand. It may be truthfully said that it is even more than that. Margaret Wycherly, in the than that. Margaret Wycherly, in the character of Jane Thomas, acts with the dignity and intelligence that make her one of the foremost exponents of emotion on the stage. John E. Kellerd, as Vance, a crocked dance hall pro-prietor, gives a rendition of villain's part that would be hard to equal for intelligence of conception and artistry of acting. The story is that of a plucky up-hill The story is that of a plucky up-nill fight on the part of a young woman against the corruption, and all attend-ant evils, which fill the city, of which she wants to be mayor. She wants to "clean up" things, and so determined a struggle does she put up for the elec-tion that the crooked element stope at nothing to nut her out of the way

tion that the crooked element stops at nothing to put her out of the way. In spite of the lurid possibilities the plot develops so naturally, and sticks so closely to matters of every-day interest that one instinctively realizes that he is viewing a picture that is absolutely true to life. The last half of the week will be given over to a strong program, which will include comedy, drama and edu-cational. Open events at 105.

cational. Open evenings at 7.15; ma-tinee Saturday only at 2.

THE PHOTODROME "The Spoilers"

Photodrome has secured "The Spoilers," at great expense and will show t all next week, continuously from 10 a.m. to 11 p.m. The story is familiar. It tells of an ambitious but wicked attempt by a corrupt body of Puget Sound politi-clans, in conjunction with a weak judge of the superior court, to oust all the minute about Norme from their the out of the only VICTORIA the miners about Nome from their claims. Glenister and Dextry, part-ners in the Midas Mine come out to Seattle for the winter. Alex McNa-mara, the genius of the conspiracy, goes to Nome, imports his judge, in-Mine into his hands thru a court in-junction. Helen Chester, niece of the judge, and Cherry Malotte, a young

woman of Nome, play important parts in the development of the story. Glenister is a fighter and McNamara s no less fearless, tho far less honor able. It is a struggle to the death in a country where vital questions are settled by the bark of revolvers, and where treachery and deception have cant courtesy. William Farnum plays Gienister; Kathlyn Williams, Cherry Malotte; Bessie Eyton, Helen Chester; Frank Clark, Dextry: Jack McDonald, Slap-Thos Santschi, McNamara; Wheeler Oakman, Broncho Kid; Nor-mon MacGregor, Judge Stillman, and

his selections. "Where E'er You Walk," was, perhaps, the most ambitious was sung with dignity and beauty of tone, and received the usual amount of appreciation that means in the selection of given. If we remember correctly, it is almost twenty years since it was last given here, by Mrs. Caldwell, soprano, with obligato by Mr. Arlidgeprano, with obligato by Mr. Arlidge-Miss Carey also sang with Mrs. Mar-shall the "Barcarolle," from Offen-bach's "Tales of Hoffman," and with Mr. Marshall, "I Feel Thy Angel Spirit," by Graben-Hoffman. Mr. Marshall and Mr. Hodgins, baritone, each sang twice and had to give extra numbers. Miss Spencer, elocutionist, greatly pleased the audience, and showed great command of dialect in her Irish, negro and German selections. Mrs. Marshall, mezzo-soprano, sang the old song, "Daddy," with much feeling and ex-

"Daddy," with much feeling and ex-pression and, as an extra number, Nevin's "Rosary." Mr. Semple, flautist, is recognized in Toronto as standing in the front rank of his profesion and he certainly on this occasion justified his reputation. Both in his solo work and in his obligato to Miss Casey's song he left nothing to be desired. Spe-cial mention should be made of the accompanists, Mrs. Marshall and Mrs. Hodgins, who played thruout with judgment and taste. judgment and taste.

The second of the special series of Commencement Recitais at the Toronto Conservatory of Music took place in the Music Hall of the institution on Wednesday evening last, in the presence of a large and enthusicerto in C minor, op 37; Macdowell's

Macdougall, and Irene Weaver, L. T. C. M., piano pupils respectively of Miss Twohy, Paul Wells, and Eugenie Quehen, were heard in works by Ala-bieff-Liszt, Chopin, Chopin-Liszt, Hen-seit, Leschetitzky, and Grieg Concerto, Og. 15, in A Minor. The vocal staff was represented by Christine Charle-bois and Winnifred Lugsdin and C. W. Dengate and T. Stuart-Stubbs, pupils respectively of Mrs. J. W. Bradley, Jean E. Williams and M. M. Stevenson. Their contributions em-braced compositions by Cadman, Cha-Stevenson. Their contributions em-braced compositions by Cadman, Cha-minads, Rossi and Coleridge-Taylor. Erland Misener, a violin pupil of Mr. Frank E. Blachford, was heard in two movements from Servern's "Italian" Suite. Several genuine successes were won during the evening, and the uniform excellence of the technical work of the performers as well as their

breadth of style and mature musicianship produced a most favorable impression. . . .

Among the many excellent recitals fit siven in the Conservatory of Music by pupils of the various members of the staff, one of special interest was that given by F. S. Welsman's pupils on the Friday evening, May 7. Movements from the Mendelssohn G Minor and the Rubenstein D Minor plano Con-certos were played artistically and with perfect ensemble by Virginia Coyne and Marjoris Harper, with Mr. Welsman at the second plano, Gladys

MUSIC B CYRIL SCOTT ON

occultists that what largely consti tutes a musical genius is the degree of receptivity he possesses for the 'down-**CELESTIAL MUSIC** pouring of this music from subtler planes of thought; and altho he may

not 'hear' it in the manner the Swiss gentleman did. yet nevertheless it filters thru into his mind to some ex-"Music of the Spheres" Is a Reality and Not a Mere

That individual young English com-poser. Cyril Scott, has found in the course of a "somewhat long-extended study of mysticism, theosophy and occultism" that there is a great deal more in music than at first "meet to touch so graphically the great forces of Nature."

more in music than at first "meets An interesting quotation from "Isis the ear," and that "there is a music Unveiled," bearing on the therapeuti- and evenness in both upper and lower to be heard on higher planes by a certain training of latent faculties in people which is of ravishing

As an instance of special interest to the incredulous lay mind Mr. Scott cites the experience of a man he once came across in Switzerland who, tho he had no interest in Theosophy whatever, evidently heard this music. "He was alone, and in a place where anything in the shape of ordinary material music, so to speak, was an impossibility. There was nobody there who could play an instrument two of them were two different va-rieties of wine; in the third, brandy; in the fourth, oil; in the fifth, water. He extracted five melodious sounds from them in the usual way, by merely rubbing his fingers on the cdges of the tumblers. The sound has an attractive property it downs out of the sound has the extractive property it downs out of the sound has the extractive property it downs out of the sound has the extractive property it downs out of the sound has the extractive property it downs out of the sound has the extractive property it downs out of the sound has the extractive property it downs out of the sound has the extractive property it downs out of the sound has the s of any sort, nor was he near any hall where the sounds of orchestral or other music could possibly reach him. And yet for the space of about an attractive property; it draws out ter also new, won more encores and disease, which streams out to encoun- applause. Mr. Alexander Elder, bariten minutes he heard a music of such disease, which streams out to encounerwhelming and celestial loveliness that, to use his own words, he 'nearly went down on his knees in reverence same purpose some twenty centuries ago. He blew a trumpet to cure

filters thru into his mind to some ex-tent and thus gets translated into ordinary music. I was told by a psy-chic of great powers that Wagner was particularly receptive in this way, and hence his music was 'richer' than that of any of his predecessors, es-pecially in those qualities which seem to touch so graphically the great under Mr. Francis Fisher Powers, revealed a voice of splendid richness and timbre, marked by superb control cal uses of music, is given. "From the remotest ages the philosophers have maintained the singular power of music over certain diseases, especially of the nervous class. Kircher remaintained the singular power of music over certain diseases, especially of the nervous class. Kircher re-commends it, having experienced its good effects on himself, and he gives an elaborate description of the in-strument he employed. It was a har-nucnica composed of five tumblers of a very thin glass placed in a row. In two of them were two different va-rieties of wine; in the third, brandy; ter the musical wave, and the two, blending together, disappear in space. Asclepiades employed music for the same purpose some twenty centuries ago. He blew a trumpet to cure sciatica, and, its prolonged sound making the fibres of the nerves to pal-pitate, the pain invariably subsided. Democritus in like manner affirmed that many diseases could he cured by

"GILDED WITH GOLD"

duate Nurses Receive Diplomas Toronto; G. Egan, Mount Forest; H. Walsh, Newton Robinson; L. E. Cas-sidy, St. Antoine Abbey, Quebec; L. Baker, Ottawa; I. Condon; Douro; A. Hayes, Kinkora; E. McKinnon, Angus Graduate Nurses

Flowers and flags in profusion Council Requests adorned the hall of St. Michael's Hospital yesterday afternoon when the

graduation exercises took place and twenty-nine graduate nurses received There are but few but will see wis-

their medals and diplomas. His Grace Archbishop McNeil. ac-companied by His Lordship Bishop Power of St. George's, Newfoundland, was on the platform. Dr. Dwyer pre-sided and short addresses were made by Bishop Power, 'Col. Dr. King, Rev. Dean Harris and Rev. Father Cline. The archbishop in speaking to the graduates reminded them that the spirit with which they performed their work and the sense of duty by which they are actuated are the things that dom in the request of the National Council of Women that black be tabood by the women of the country who suffer thru the loss of any dear ones during the war. Black is most depressing and we are all influenced by surroundings and the things we perceive thru the senses.

Heavy mourning does not make our they are actuated are the things that tell. The medals and diplomas were grief any more sincere and, after all, it is only custom that makes the wear-

conferred by his grace. After the ceremony the large numing of black the orthodox thing for the English-speaking world. In China per of guests were entertained at a

tea. The following is the list of grad-

white is worn as mourning and this is really more in keeping with the Christian idea, which teaches that eternity for the just is something inuates: Misses H. G. O'Connor, Toronto; J. comparatively more happy than any-thing we can imagine in this life, so

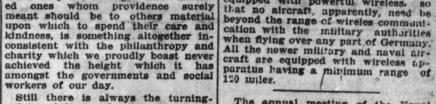

Misses H. G. O'Connor, Toronto; J. Manion, Eganville; L. McCurdy, To-ronto; J. L. Montgomery, Toronto; N. O'Donoghue, Peterboro; C. O'Brien, Peterboro; R. Follis, Nestleton; A. Cosgriff, Toronto; M. Shannon, Mar-mora; M. Desmond, Eden Grove; L. Gignac, Lafontaine; E. MacCallum, Toronto: A. Murphy, Montreal; P. A. Coffey, St. George, N. B.; T. Marrin, Toronto; N. Gartlan, Stayner; J. Egli, Montreal; N. Mogan, Toronto; B. Gib-bons, Gilford; N. Luke, Dundas; E. S. O'Donnell, Phelpston; E. L. Clarkson, why excessive grief? why excessive grief? Still, of course, there is the human side, which does not seem satisfied without giving expression to the sor-row that comes with the loss of a friend. Recognizing this, the National Council does not seek to eliminate all badges of mourning but merely to lighten its depressing effects. The fol-lowing is the nature of the appeal: "The National Council of Women earnestly appeals to those whose dear ones may be killed or who may die in

PARIS PATE PRIZE CONTEST

ones may be killed or who may die in this war to refrain from wearing the conventional mourning, and to wear, instead, a band of royal purple on the arm, to signify that the soldier they mourn died gloriously for his King

and country." It is almost a foregone conclusion that the request will be complied with in a great many instances.

The following were elected to office at the annual meeting of the Gordon W.C.T.U., held in All Saints' Church School; President, Mrs. Forfar; firs vice-president, Mrs. Doran; other vice presidents. Mrs. Cox, Mrs. Greenfield Mrs. Pool, Mrs. Ruthven and Mrs Royce; recording secretary, Mrs. Grey corresponding secretary, Mrs. Carter, treasurer, Mrs. Milloy.

The annual meeting of the Equal Franchise League was held in the Margaret Eaton School on Wednesday, Miss Constance Boulton in the chair. The organization represents a mem-bership of 294 and its object is the study of social, economic and political problems, but during the past season the society has been assisting in these patriotic works of the moment. A par-ticular feature has been the help given to the poor children of London. The treasurer's report showed a balance of treasurer's report showed a balance of \$35.34 on hand. The election resulted as follows:

President, Miss Constance Boulton; first vice-president, Mrs. Erichson Brown; second vice-president, Mrs. R. Davidson; corresponding secretary, Mrs. Laidlaw; recording secretary, Mrs. Fletcher Snider; treasurer, Miss Elizabeth Boulton; committee, Mrs. Bertram, Miss Norah Whitney, Mrs. McGregor, Mrs. Barker, Mrs. Parker.

Since January the Girl Guides have sent over 2500 articles to the Red Cross and a cheque for \$50 for a cot in Cliveden Hospital. Application forms for membership may be had at headquarters, 774 Yonge street. Purple Be Worn

The report of the committee in charge of the Cinderella dance given recently by the chapter at Calgary, Al-berta, showed receipts of \$420. The chapter, after paying expenses, has provided seven beds in the Duchess of Connaught Canadian Red Cross hospital at Cliveden, England, by doing so numbering in size of contribution among the top of the list of sub-scriptions from Alberta.

SUNDAY MORNING

THE TORONTO SUNDAY WORLD

-0-

MAY 16 1915

HE healthiest condition of any industry or profes sion is usually that period during which there is the greater flux or change. This is not always apparent at the time. The conservative element always deplores change. It finds its greatest satisfaction in a stationary condition. But viewed from the perspective of time, no matter whether it be in religion or science, in business or politics, the time during which revolution ary changes are going on is usually the time in which the greatest and most lasting benefits have occurred.

The religious change incident to the replacement of paganism by Christianity, the political changes which, starting with the granting of the Magna Charta have, ar by year, auded to the world's democracy and the freedom of the indiidual, the revolutionary changes in human knowledge and the consequent reedom from bigotry, resulting from the scientific discoveries of the last entury, centreing around Darwin, have all tended to increase liberty and

The above seems a long way from the subject with which this column -motion pictures. And yet it is immediately applicable to the present situation in the motion-picture industry. As a matter of fact, it is something that has characterized the business ever since the first slow start. It is something I have had occasion to refer to, directly or indirectly, in practically every article I have written. Because I can think of no art or profession that has undergone more frequent and more violent changes, in every phase of its existence and every branch of the industry, than that of motion pictures.

Real Reel Stars

Up to comparatively few months ago, the motion-picture companies, re and there an exception, had as their recognized stars, i.e., the men and women playing the best of the leading parts, and on whose individual drawing powers a great deal of the success of the respective comanies depended, people who, without being especially distinguished on the egitimate stage, had joined the screen forces at a time when the art of notion-picture acting was in its infancy, and had, by a peculiar combination of application, genius and personality, achieved to more than ordinary

ersonal success. in this number may be included all that distinguished array of reen stars who are so familiarly known to the "movie" fans in America. Headed, undoubtedly, by Mary Pickford, who is perhaps the most popular woman in the world, and including Bushman, Anderson, Baggott, Alice ins, care The Sunday World, and must bear the name and address of the Joyce, Florence Turner, Dorothy Gish, the many comedians, including the sender, otherwise they will not be recognized. late John Bunny, the character men and women of more than usual ability, these were the people who represented the best in motion-picture acting and enjoyed a vogue and popularity practically unknown to the stage favorite.

There is only one thing we must not forget in this connection. The eccedented vogue of these men and women grew up and continued during the period of the five and ten-cent picture. They appealed to an audi-ence vastly different from that which is the standard of today. This is not meant in disparagement at all, but there is no doubt that the average results. intelligence of the motion-picture audience today is greater, and that they represent a higher social scale than a year or more ago. Besides, their Buleah:-One can never tell what one can do until a fair trial is given. Come to the studio and something to your mazingly. dvantage may result.

So that, as a matter of fact, the average movie star made his first G. Everett:-Only personal application at the local studio would help you. appeal to, and gained his first popularity, among the five and ten-cent

"Reverse the situation." says Mr.

ation and irritation.

But is is undoubted that as the years have passed, all these men Vaudevillian, this issue. women, whose acting at first may not have been the most commendable, who often played directly to the camera, who overacted, and were not truly representative of the type they attempted to portray, have studied themselves and others, with the result that there has been a vast improvement in acting. It has become, as a whole, more subtle, more delicate, the overacting is disappearing and the art is much more satisfying.

How much of this is due to personal observation, natural improvement, and the ranking of the older film stars, and how much to the in-

trusion, if such it is, of the so-called legitimate element, it is hard to de-termine, but certain it is that the latter is a great factor.

MARGUERITE CLARK IN "GRETNA GREEN" ON MONDAY AND

TUESDAY.

AT THE STRAND THIS WEEK

colony behind them, yet contributing not a cent toward American taxes; that not a pound of freight could 1 sent from Pittsburg or Buffalo to New. York or Boston for export except in bond. We should long ago have found

the situation unendurable. "The only gentlemanly course, the only manly course, open to us is to say to the Canadians: 'We will let you have this 'Panhandle.' What will you give us for it?" New Version of Monroe Doctrine Speaking at another time, this U.S. ongressman quoted an editorial from a Vancouver daily, to the effect that Canada cannot tolerate the occupation of Alaska by a foreign power, and

vould be compelled by self-interest, in case of necessity, to permit the trans-portation of United States troops across her territory He further inti-mated that Sir Richard McBride, premier of British Columbia, had publicly stated that Canada would be willing to form a Canadian-American alliance for the defence of Alaska. This is a new version of the Monroe Doctrine applied to Alaska. This preposal is the first instance

on record of a great nation deliberately coming forward with gifts to another nation in the shape of territory. The resolution may not come to any-thing; and if it did, the United States might prove to be so hard a bargainer that it would be impossible for Canada to accept the terms proposed. The significant thing about the resolution is that the mover bases it, not upon the prospect of gain for the United States, but upon the fact that the present arrangement is a disadvantage and an increasing source of irritation to Canadians. Mr. Smith's proposal will be regarded by some as too quixotic for practical statesmanship, but the day is coming when, between man and man, and class and class, and nation and nation, it will be seen that the most practical of all princi-ples is the Golden Rule-

Costly Gun to Fire

the firing of a 12-in. gun, 300 ibs. of powder is required. One shot of a 12-in. gun requires as much powder as 4.000 shots of the rifle an infantry-man uses, or 150 shots from an ordin-ary field gun.

PARIS PATÉ GRAND PRIZE CONTEST -Open to Everyone-

VALUABLE PRIZES FOR CORRECT DEFINITION OF PARIS PATE

DARIS PATE is made at Montreal and has become first favorite in thousands of homes in Canada. Everybody ought to get acquainted with Paris Pate. All who have tried it are enthusiastic about it. We

invite you to enter our big prize contest. It is open to all and every user of Paris Pate is given an opportunity to win one of the following handsome prizes

THIRD PRIZE, - \$10.00 FIRST PRIZE, - \$50.00 SECOND PRIZE, \$25.00 FOURTH PRIZE, \$5.00 And One Hundred Prizes of \$1.00 Each

What You Have to do

F OLLOW these directions and you have an excellent chance of Γ securing one of the above cash prizes. Firstly, order a 10c tin trom your grocer and get familiar with Paris Pate. Then set to work and win a prize as follows:

Look carefully through the different pages of this paper and you will find certain white letters on black squares similar to the reduced illustration shown here. When these letters are placed in their proper order, they compose a sentence which we ourselves have made up as being a good definition of what Paris Pate is. Clip each letter

olei Cut these Letters out

letters will be found in other parts of this

out separately. You will find there are 31 altogether. Now arrange and paste them in their right order on a sheet of paper so as to make a complete answer to the question-"What is Paris Pate?" The correct definition consists of six words altogether. The letters in capitals form the first letters of each word. -CONDITIONS OF CONTEST

Any number of definitions may be sent in by any one person, but the top of a Paris Pate carton must accompany each separate definition.

There are 31 letters altogether and the definition consists of six words. Each letter must be used. The letters must be neatly pasted on a sheet of paper, the name and address of the sender being written plainly on the same sheet.

All definitions must reach our office on or before the 31st of May, 1915.

Send in Your Definition

A^S soon as you have made out the definition and pasted the letters in their correct order, write your full name and address clearly. Then enclose in an envelope with the top of a Paris Pate carton and mail direct to us. This must be done or the answer is disqualified.

All definitions received will be kept together until June 1st. On that date they will be placed before a special committee, who will draw at random from the pile and the sender of the first correct definition opened will be awarded the first prize of \$50, the second opened will receive \$25, and so on through the list. It does not follow that the first letter to come to hand will be the first prize winner. Probably a large number of letters will be opened before the correct solution is found. The correct definition as composed by us, has been placed in a sealed envelope and filed with our solicitors. It is known only to the Manager of Paris Pate and our Advertising Agent.

The 31 Letters on Black Squares, when properly arranged, make up the correct Definition of PARIS PATE. Can you discover it?

Prize Winners' Names will be announced in this paper on June 13th, 1915. **Contest Positively Closes** on May 31st, 1915.

Every Member of the Family may compete.

All Definitions should be addressed to

until August 1.

:0:

Special to Sunday World. The TRUIT, May 15.—No opposition for the predict of the regular ticket of the betroit Section Society of Automobile Engineers at the meeting held Thurs-ak evening, April 23. George W. Dun-ham, consulting engineer, was elected chairman of the Detroit Section; J. G. Vincent, vice-president of the Packard Motor Car Conpany, vice-chairman; Fred J. Fisher, treasurer; W. H. Con-ant, Detroit, manager of the Gould Storage Battery Company, secretary; George M. Holley, of Holley Brothers, Gerburetor manufacturers, executive committee member, and K. W. Zim-member national nominating commit-te. The meeting lasted until long bursts The Lincoln Highway Association has issued the Complete Official Road Guide of the Lincoln Highway, coltain.ng exact up-to-date road and touring information with reference to the transcontinental trail. Every mile of the route from New York to San Fancisco is covered by detailed information

In hampering the operators of jitney bus s as much as possible in San Franc.sco to discourage the opposition to the street car companies, the supertowards morning and proved a very towards morning and proved a very lively and interesting session with numerous papers and subjects for dis-cussion. L. C. Weinberg read a paper on, "Vacuum Gasoline Feed Systems," and A. P. Brush of the Brush Engin-cering Association, a paper on "Scienvisors have adopted a measure pro-hibiting the drivers from smoking and from becoming intoxicated and also requiring a cond and a license fee of from \$10 to \$50 per year, according to the seating capacity of the jitney car lor bus. eering Association, a paper on "Scien-tific Chassis Construction."

The Metropolitan Motor Company has been formed by William Lininger, formerly of Detroit, and recently of Having secured patents on an auto-matic ball bearing headlight bracket, J. R. Coler and R. E. Lee of St. Au-gust.ne, Florida, have come to Detroit Painesville, Ohio, w' re he was sales manager of the Vulcan Manufacturing manager of the Vulcan Manufacturing Company, and A. H. and J. A. Wagner of Akron, Ohio. J. A. Wagner, father of A. H. Wagner, will be indirectly in-terested in the company, which will handle the National car in Detroit, and also the Bessamer truck, made in Grove City, Pennsylvania. Other cars are to be added. Temporary quarters have been taken in the building near Palmer avenue, on Woodward. Mr. Lininger will remain associated in an indirect way indefinitely with the Vul-can Car Company in the sales depart-ment. to place the invention with the manu-facturers. The bracket operates from the steering wheel and takes any light. By means of the novel mechanism the headlight will be automatically turned in the direction the car is going and is so simple that it is not put out of order by jars or jolts, and is inexpen-

A. R. Pardington, vice-president of the Lincoln Highway, and Mrs. Pard-ington, plan to start on a trip over the highway from New York to San Fran-cisco some time in July. On this jour-ney Mr. Pardington will first see the complete results of his labors of many years in giving America a transconti-nental highway. Not over 100 miles per day will be made owing to inspec-tion and camp will be made each night. A special touring car is beiing con-structed with what are, in reality, Pullman berths, which will allow com-fortable sleeping in the car. R. C. Reuschaw, sales manager of the Reo Motor Car Company, and the Reo Motor Truck Company, while present at the commercial vehicle con-vention, said that the pleasure car manufacturing company was now turning out over 125 cars per day and the sunseam cars at Indianapolis and he will sail at once and select his team mate in America, signing one of the American driver, pot encard

E. T. Birdsall, chairman for several years of the Detroit Section Society of Automobile Engineers, upon retirement at the recent election, when George H. Dunham was elected chairman, was presented with a Landsome solid sliver cigaret case lined with gold as an expression of esteem from Detroit friends in the Detroit section. ruption. Both factories are working night and day and the Reo Company will not complete its 1915 output until September

It will take at least \$6000 in postage to return to 300,000 or more owners of Promoters of the Indianapolis 500-1 E. LeRoy Pelletier has formed hi

THE TORONTO SUNDAY WORLD

MOVING 11/2 MILES AN HOUR ON HIGH-GEAR

A powerful seven-seated Hudson Six-40, typical of the popular light six class of the day, demonstrated what these cars can do when traveling on high gear at a speed of only 1½ miles per hour. The boy shown in lad was able to keep in advance of the car without the slightest difficulty. This is indicative of the tremendous advances that have been made the last few years in motor car engineering. Not only is it possible to drive this flexible six-cylinder motor at a speed of only 1½ miles per hour on high gear, but it can be jumped to a speed of 50 miles per hour in a distance of 675 feet, proving that low speed.

In the direction the car is going and is so simple that it is not put out of order by jars or joits, and is inexpensive to make.
 Cash distributions are being received by the Orphans' Automobile Day Association of New York from many people outside New York City, according to S. S. Tobac, chairman of the first six months of the will continue to handle the Reo account with others. Mr. Pelletier orginally formed the firm of Pelletier-orginally formed the firm of Pelletier-orginal the first six months of the war of the first six months of the war with the French artillery and was the sent the first six months of the same set of the solution of the solution of the solutor for skilled mechanics, according to Ralph Hoagland, who de

in employes for the plants. The De-troit demand is greater than the sup-ply and Detroit is advertising for men in at least 12 different cities and with-out success. Unskilled labor is still to be had for the asking but there is pro-mise of a shortage in this field also

There Are Never Enough First-Class Cars in the Spring

They always run out, as you know. Last year, many Hudson enthusiasts had to take second choice. Thousands waited weeks for delivery. This spring, despite trebled output, there will be more delays. Choose your car now, whatever class you are seeking. The leading car has more orders than cars each spring.

Two things are certain: If you buy a class car you will want a Light Six, the latest and coming type. Your first choice will be Hudson.

Hudson-the Ideal

Hudson stands out as the class car in Light Sixes. Its supremacy appears at a glance. It shows in beauty, finish, luxury and refinement. It shows in lightness-2870 pounds. It shows in every part of the chassis.

Hudson is designed by Howard E. Coffin, who created the Light Six It marks his latest achievetype. ment.

This Hudson model is a four-year result. Two years were spent on it before it appeared. Two years have been spent in refining it.

Hudson is built by the leading builder of class cars. Its prestige gives it permanent value. A year after buying the Hudson will be worth more than any other car in its class.

12,000 Road Tests

But the greatest fact is that Hudson is known to be free from mistakes

Over 12,000 Light Six Hudsons are running. In twelve thousand hands they have covered at least 30 million miles.

You know this car is staunch. You know that it nides not a weakness or error. Any owner around you will tell you.

Remember that the Light Six involves a new-type motor. Weightsaving has required changes in every part. New materials were necessary, special steels, much aluminum.

It saves half on lire cost and fuel over old-time Sixes. But, like any new type, it must prove itself faultless.

Hudson has done that. In another year other Light Sixes may have given proof of their staunchness. But today the Hudson is, by all odds, the safest investment in this type. Prove these facts now, while the

car can be promptly delivered.

7-Passenger Phaeton or 8-Passenger Roadster, \$2100.

HUDSON MOTOR CAR CO. Detroit, Mich.

With every Hudson goes the excep-

tional Hudson service. Let us explain how we keep these cars in tune. HUDSON Light Six by Dominion Automobile Co., Limited

A NOVEL RACER. Louis Chevrolet, America's greatest racing sensation, has arrived on the scene of the next Indianapolis 500-mile race with the queerest car the world has ever seen, a Cornelian. Hardly larger than a haby carriege Hardly larger than a baby carriage, it weighs only 1000 pounds, and car-ries a motor of only 103 cubic inches the appetite of the public. If, there-fore, "Velvety" is another word for soap, isn't it a better proposition, on piston displacement, smaller than the smallest Ford. The car has practically the above reasoning, for the sponge man to pay cash for an easily-as-similated, easily-associated name, then to spand probably one hundred no unsprung weight, even the dif-ferential being mounted on the chasthan to spend probably one hundred sis, and the drive taken thru a series of universal joints. The machine is also minus a frame, the weight simply inime corried by the hole hole weight simply being carried by the body, which is a single sheet-steel shell. It's speed is estimated at 100 miles an hour. Then, consciously

A Big Boost. Then, consciously or unconsciously, the sponge wholesaler should get a big What Chevrolet will do with this ar in competition is the question of boost from "Velvety" Soap advertising the racing world today. Being able and selling methods. Most of the latter

to go thru the 500-mile grind, without would be directed to the very mera stop for gasoline, oil, or tires, it chants the sponge man wanted to with the largest cars in reach. If favorably impressed with the field as favorite.

ing star, and a winner of the Vander-bilt Cup race, and of other great races of some years ago, has organized the George H. Robertson syndicate, New York, to market a department entitled "What You Want to Know About Your Automobile." For some time Mr. Robinson, who is a veteran of the automobile business dating back to the earliest importation of cars

back to the earliest importation of cars in America, has been supplying this department to a prominent New York evening paper with success for some timed from the British authorities as tained from the British authorities as to the requirements for these cars,

Co-Utility of Advertising

By A. A. Briggs, Advertising Manager, Dunlop Tire and Rubber Goods Co., Limited, Toronto.

"Co-utility of advertising"—is this new one, Mr. Editor? The idea naturally has to do with the re-directing of created advertising strength.

An advertiser spends thousands in

an attempt to sear a trademark product on the public mind. Another advertiser does identically the same thing; and so it gees. Each manufacturer who enters the publicity arena has his ups and downs. losse and gains. Following individual inclinations, one manufacturer's experience can be of little value to the other because real business ins and

He knew he was getting perpetually peppered with tire interature. As a outs are not paraded around like the tire-maker's efforts were directed abstract advice from the man on the

the dealer felt there was plenty of room for him to spread that "grip-jing" influence over an associated Now, why shouldn't a manufacturer in a co-related line of business profit from the other manufacturers ad-

line at minimum cost. The ultimate buyer could not have one of the articles without the other, and each maker would be glad to see both makers a success The nearest approach to the theory

The theory of co utility has none of these disadvantages. Each adver-tiser runs his own affair. The point is that a new advertiser by purchas-ing the use of the best known name in the closest co-related line, hopes to eliminate the drudgery and expense necessary in the preliminary years of bidding for the favor of the public

the to must be right, or it wouldn't have gone to the front; and that the rame has an intrinsic relationship to his product of the customer-recognition kind.

Obviously, not a great number of manufacturers could carry out the principle herein evolved, but is that number not sufficiently large to warthe actual use of one "Velvety," the rant the experiment?

"How much weight have you on there?" demanded Tom Wallace, thinking of the mud-holes which had stumped him in his own buggy. "You fellows can't be carrying a real load and doing sturis like that, too."

"Can't we!" retorted the engineer in charge of the test. "We've two tons of machinery and two tons of extra weight on board. Watch."

Earlier in the day, a hollow in the field had been filled with soft Sclay. Toward this the car was now directed. The front wneels striking the soft spot sank to the hubs, but plowed steadily ahead, undaunted. The rear

pressed with the other. This contention finds support in a conversation which recently took place between an auto dealer and a the car, which the dealer was selling. The car, which the dealer was selling. "Gee!", said the dealer, "I wish I had the right to make a car and call t. Dunlop. Here you people are toot-the car, which is a light over the country, the car moved forward or backward the car moved forward or backward Ind I could simply 'hook on behind.'" the car moved to make the set of the se seynote of co-utility in advertising.

As all

to popularizing two or three words,

Two in One.

"Climb a stairs," snorted the en-

sincer. "This car can climb steeper than a stails. A forty-five or forty-nine degree slope wont feaze it." It can be operated from either end, backward or forward. Each wheel is geared to the engine independently of the others. Accident might lame two or even three wheels, or their footing might be poor—yet the fourth wheel could drag the monster along.

Owing to the greatly darkened London st eets the kerostones are being whilened both for the benefit of pedestrians and vehicular traffic.

Motorcycle Batteries. motorcycle despatch rider has proven his worth at the front wonderful adaptability of the victory; I cannot explain in writing what it was like, only the noise was deafening and it was terrible. I saw already proven his worth at the front and the wonderful adaptability of the motorcycle is being further demon-strated in the use of Maxim machine gun outfits attached to the wonderful little two-wheelers. The following description of the capture of Hill 60, written by "Eye-Witness," indicates plainly the usefulness of these out-litage pi some of our infantry make a charge: it was splendid. One of the regiments was the 1st Battalion Royal West

"On Sunday night I caught my sec-ond dose. A shell burst on top of a small hill. I was half way up, and a large pile of clay hit me in the back. I was saying good-bye to all, but my luck was in again. I was only un-conscious for about ten minutes."

"Shortly before seven on Sunday "Shortly before seven on Sunday morning the Germans made their real reply with a determined effort. They reply with a determined of the loss

Good Times In Winnipeg. The first run of the season for the Winnipeg M. C. was to Stonewall. There was a good turnout and every-one enjoyed themselves. The club looks for a successful season. A race meet ited in force, coming on in close ations, and hand-to-hand fighting ontinued for some time. At this junc-ure invaluable service was rendered some of our motor machine guns ch were rushed to the front, and ned fire on the masses coming for-d, while our artillery raked thei one enjoyed themselves. The club locks for a successful season. A race meet will be held May 24. The Manitoba motorcycle license fee has been re-duced from \$3 to \$2, while the auto-mobile license has been increased. The next run will be to Portage la Prairie. ward, while our architery taken ther ranks with shrapnel. The counter-attack was beaten off with very heavy less to the Germans, who, as usual, showed no inclination to accept de-

Military Relay Run. The proposed motorcycle military relay run from Windsor to Ottawa, un-der the auspices of the Toronto Mo-torcyclo Club and the C. M. A., has apparently reached a very satisfactory stage of completeness. The officials, Fred Dobson, Jack Scott and Walter Stoner have practically completed all "Thruout the night the fighting continued, culminating early in the morn-ing of the 18th in two massed attacks by the enemy. These were beaten off principally by the fire of machine guns, ne of which had been rushed up on vehicle has yet to be invented

Stoner, have practically completed all arrangements, and the run is expected to take place on June 5 or 12. The riders chosen to carry the mes-sage are all well-known in Toronto, and their ability to do the work is un-doubted which is superior to the motorcycle and sidecar in speed, adaptability, re-

and sidecar in speed, adaptability, re-liability, ability to travel over rough ground, and general handiness, com-bined with the power of carrying a moderate weight and yet occupying a minimum amount of space on the road. Other vehicles may excel in one or two peints, and a motorcycle ridden solo ex-cels in all but weight carrying; but, taking one thing with another, in the points we have mentioned (and all are necessary for our purpose) the motor-cels and sidecar reign supreme. doubted Following is the tentative list of riders and their proposed journeys: Windsor to London, 142 miles: Herb Kipp (Indian), Harry Wilson (Thor). London to Toronto, 127 miles: Wal-ter Andrews (Merkel), Ernie McIntosh (Indian), Tommy Smith (Excelsior). Toronto to Trenton, 112 miles: F. Moritz Excelsior). Harold Code (Cyc. and sidecar reign supreme.

Moritz, Excelsior), Harold Cole (Cyc-lone), Wilf. Morrison (Excelsior or Henderson), Hugh McCrossen (Thor), Herb, Hodgkinson (Yale). Three riders to be chosen from above. The following description of the Battle of "Hill 60" was written by an English despatch rider: "I am writing this in bed. We have get back from the trenches. I suppose yeu will be reading about the big vic-tory of our troops by the time you get Trenton to Kingston, 60 miles: J. A. Lamore (Excelsior), C. Croft (Excel-

"The battle commenced on a Satur-day night at seven o'clock; at five minutes to seven you could hear noth-ing, but we knew what was coming off. Our engineers that mined a hill where the Germans were, and at seven the hill was blown up, and all our guns opened fire. The bombardment lasted ene hour and forty-five minutes before the first break, and kept on all night. One of our officers and a man of our

battery opened fire with two machine guns, and, for a start, wiped out a whole company of Germans. made their counter attack. Our machine guns came into play again, and wiped them down like cutting corn. and wiped them down like cutting corn. Then they found out where our position I was, and shelled us clean out of it. There were four fellows in my battery a wounded, including myself, but my wound is nothing—a piece of shell caught me on the face. But it was a

be delivered in Ottawa to Maj.-Gen-Sam Hughes, minister of militia. T. M. C. Notes.

Today's run is to Orangeville. This is always considered one of the star runs of the year, as the roads are ex-ceptionally good, and the scenery magnificent. The distance is 58 miles. Mr. Motorcycle Rider be at the club-rooms at 9.30 sharp.

Lamore (Excelsior), C. Croft (Excel-sior). Kingston to Ottawa, 105 miles: Percy A. McBride (Excelsior), A. E. Tread-gold (Indian), H. Bysche (Excelsior). According to the schedule arranged for the riders they will be obliged to maintain an average speed of 36 miles: per hour, in order to finish on time. The first relay will leave Windsor at 4 a.m. and the last will arrive in Ot-tawa at 7.18 p.m., if they finish on time. The route thru Toronto will be as follows: Dundas and Bloor to Queen's Park, where the change of riders will take place and the message will be signed. Leaving the north side of the Parkiament Buildings, the riders will travel along St. Albans street, Welkes-ley street, and east on Gerrard. The route thru Toronto will be take is a expected that the message will be the scatter of the state of the riders due of the route thru Toronto will be take is a expected that the message will be the scatter of the club is that they charge 150 a game for pool. We don't scatter an interesting evening the party returned to Whitby Sunday morning, meeting the Toronto party. Dinner was provided at Pickering, and the most vivid remembrance of the trip is that raspberry pie with whipped

cream. President Jones says it's just like he used to eat when a boy (oh, so long ago), only more so.

rain there was only a small attend-ance, but the proceedings proved to be full of interest. Several new mem-bers were enrolled. A report from the membership committee was presented, the principal feature of which was the anouncement of substantial prizes the announcement of substantial prizes

for the most successful canvassers. A Hist follows: For greatest number of new members and renewals: First prize.-Goodyear Blue Streak cover, value \$13.50. Second prize.-No. \$ Old Sol lamp, value \$8.50.

Fourth prize-Pair of combination Old Sol brackets, value \$4.50. Fifth prize.-Goodyear tube, value

2.75.

\$2.75. These prizes were kindly donated by the Goodyear Tire and Rubber Goods Co., and the Hawthorne Manufactur-ing Co., thru the C. M. A. In addi-tion the T. M. C. will give to the mem-ber bringing in 50 or more new mem-bers, the sum of \$15, for 35 members \$10, and for 25 members \$5. Now, boys, get busy. Bert Stillaway has lots of application bianks. Further membership plans include a monster field day, to be held May 29. Further partfeulars next week.

pleaded that her name be not made public, for, she avows that, she did nothing that anybody else would not have done. When fire broke out in that wooden fire trap there were some.

that wooden fire trap there were some 200 guests in various parts of the building. The operator knew that and altho she was threatened by the clouds of suffocating smoke that every few seconds rolled over the switch-board she stuck to her post and sent in first one alarm and then another altho her switchboard was not in good working order. It was not until further assistance was impossible that she consented to run to the street. Then there were the five girls of the exchange at Burlington, New Jersey, who insisted on keeping the service

who insisted on keeping the service open even thd the fire was sweeping

The fire had burst thru the first floor of the building and the operat-ing room on the third floor was full of smoke when the firemen arrived. They learned that the five telephone girls were trapped on the third floor and raised ladders to rescue them. As the firemen burst in thru the windows the girls ordered them out. "We have to keep the service open," said one of them. "This is the busy hour and we can't leave." All the arguments of the firemen failed to influence the girls. They told the firemen to leave a ladder at the window and if things got too hot promised to come down. So the fire-men had to leave and return to their

Some time ago the question of in-creased cost in highway maintenance and motor car taxation was discussed at length, and since then there have been renewed demands in New York forward for taxing gasolene, tires of and other states that mechanically and other states that mechanically is ward for taking gasolene, these driven vehicles shall contribute more largely than they do at present to the expense of road repair. In view of ent system—namely, by horse power largely than they do at present to the expense of road repair. In view of this agitation, it may be worth while only. Regarding horse power, nected is actual, it is probably the most succession is factory standard to take as a basin,

to examine the various methods by which taxation for such purposes is isfactory standard to take as a besta for even experts themselves are wtil groping in the dark to find a satis-factory basis upon which the power of the internal combustion engine can be calculated. Such a system will in-evitably become obsolete in a few years, as further developments and alterations in the explosive engine take place. And in such a method electric and steam have had to be tax-ed upon an entirely different basis. now being made, and will be raised in the future, and to discuss at the same time the more important question of the general principie of taxation for highway purposes. There can be no doubt that the pre-

sent system of collecting moneys from motor vehicles is not entirely an ideal one- It does not, in the first place, insure that every user of the road moving his vehicle thereon shall pay something toward its maintenance. Moreover, the present variation in the charges between the low and high powered motor cars and the failure to differentiate between the broad and narrow tired vehicles leaves much to be desired from the point of view of simple equity.

Simple equity. But, to begin with, it should be stated that the highway maintenance and repair fund is at present provided for in three ways—by appropriations from the state, counties and towns. To deal with the first of these, the state originally took over the construction and direct management of the state highways in 1898, when the Higble-Armstrong act first became effective. Of course, while every per-son in the state indirectly contributes to highway construction, maintenance and repair, motorists alone are the

ation by weight alone has not proven are to be satisfactory, as weight alone is probably not a good criterion, for whe-ther the matter be looked at from the point of view of the ability of the own-er to pay, of the mileage covered in the year, or of the destructive quali-ties of the vehicle upon the road. Weight alone is a very imperfect guide. The More than a century ago the laws of not England recognized this, and by act of parliament it was provided that of parliament it was provided that tolls should vary in accordance with the width of the tires upon the wheels, a very sensible provision. The effect was to encourage broad tires, for there is nothing more destructive to the roads today than the heavily laden, narrow steel tired vehicle, which pays a totally inadequate proportion for the harm it does to the highway. only ones paying a vehicular tax di-rect. Altho in the counties and

ed upon an entirely different basis. But it must be confessed that tax-

ation by weight alone has not proven m

harm it does to the highway. Gasoline Tax Impracticable. There are precedents, therefore, for varying taxation so as to encourage broad tires on vehicles designed to carry heavy loads. Indeed, the whole question of the width of tires on ve-hicles is one which ought to be con-sidered by the legislature in re-sur-veying the question of taxation for road purposes. In theory, at any rate, road purposes. In theory, at any rate, a combination of factors should be taken into consideration, and it is well to discuss how different methods would work:

Injustice Now Done. There is, therefore a kind of rough injustice in the present arrangement, and now that the cost of road main-tenance, especially on the main roads, has risen so much, it is a question whether all vehicles pay in fair pro-portion to the damage they cause and whether the motorists who pay no local personal property tax should not be compelled to pay a somewhat larger proportion toward the general expense of road upkeep. There are various methods which have been suggested for the read-justment of taxation, but probably the most comprehensive and states.

If tires were taken as a basis of

There are various methods which have been suggested for the read-justment of taxation, but probably the most comprehensive and states-manlike scheme ever suggested in this instantiant of taxation, but probably the most comprehensive and states-manilke scheme ever suggested in this direction proposes to levy a gradu-ated tax on all wheeled vehicles, vary-ing with their weight and the use to which they are to be put. The heavy trade vehicles, motor buses, vans, etc., are more destructive to the roads than any other form, even the swift and heavy motor car equipped with steel studded tires. Another method of more equitably Another method of more equitably readjusting the expense of road up-keep would be to set up a national highway department, en-larging the functions of the pre-sent department of roads at Wash-instone which expends our the set of the set o ington, which should take over the care of the main roads thru the se-veral states. The maintenance for these would then be supported largely by the federal government, in a simi-lar way to the Routes Nationales of France, and thus thru traffic would france and the big to the for the formation of the first the formation of the formation of the formation for the set of the set of the formation of the formation for the set of the set of the formation of the formation for the set of the set of the formation of the formation for the set of the set of the formation of the formation of the formation for the set of the se centive to the driver to take undue risks at corners and encourage the tearing up of the roads. But great revenue could not be raised from this source alone, and thus the question is turned back in the direction of a tax, which is to be collected upon the basis primarily of weight, and afterthe ward on more variable factors, such as seating capacity as well as horse-power, the present basis, all com-

Power!!

Few of us have the need or desire for a racing car. But every man wants to sit behind a motor which responds eagerly-buoyantly-to the slightest touch of the throttle.

Steep hills and heavy, clinging sand roads have no terrors for the Paige owner. He knows that he has but to "step on " the accelerator and the hills flatten out like smooth boulevards. From a walking pace to the speed of the winds-this range is at the service of every Paige driver without a change from high gear.

Sit behind the steering wheel of the record breaking Paige Six "46". Sense the flexibility and power under the impressive, deep chested hood just in front of you. Swing blithely up those grades that are the despair of many vastly higher priced automobiles

Then, ask yourself if you could possibly require more of any motor car. And remember that the "Six" belongs to no "school" for it is rapidly establishing a school of its own—the school of 1916.

Consider the following essentials of Paige Value—a combination of high-grade features found on no other light "Six" regardless of price :

The celebrated Paige Continental 3%x5% motor, freely considered as the undisputed leader in Sizes. It is the result of close co-operation between both Paige and Continental engineers. The Gray & Davis electrical starting and lighting system, one of the most expensive systems that a manufac-turer can place on his car. The Paige Cantilever Springs which makes every road ride as smooth as the paved street or boulevard. The Bosch Magneto, known the world over for its reliability and efficiency.

These are but a few of the out-standing features of epoch-making Siz. See this wonderful motor ride in it—drive it. turer can place on his car. The Rayfield Carburetor, admittedly the most efficient and positive carburetor manufactured for Sizes. The Multiple Disc Clutch, with cork inserts,—no better or more dependable clutch can be found on any car at more dependable clutch can be found on any car at

Girls in Louvain. Away up in the "back concessions Louvain was an important strate-gical point for the Belgian army dur-ing the early campaign, and the ex-change in which Valerie di Martin-elli, Marie Joorstens and Leonie von Lint were operators, was used as the central point of the Belgian field com-munications around the city. Service east of Yonge street, a small party of T. M. C. members, including the writer, discovered a most delightful writer, discovered a most dengating piece of country. Shade trees, a pretty little stream, and a string of difficult but interesting hills, combined to please the critical eyes of the much travelled tourists. It is hoped to hold a hill climb in this district shortly, and we can assure the reader that orders to the troops were being sent and we can assure the reader that one or two of the hills compare with the classic "16" and "12" mile hills for over the wires constantly. the classic "16" and "12" mile hills for severity. One of the "general public" who happened to be on one of the hills, expressed his amazement at the climbing powers of the modern mo-torcycle, afterwards remarking: "I suppose you can also climb hills like the one leading up to Sir Henry Pel-latt's." We assured him that even really difficult hills like this could be conquered. The fresh and invigorating air had a rather confusing effect on conquered. The tresh and invigorating air had a rather confusing effect on one member of the party, who on the return journey attempted to reach To-ronto by travelling north. Fortunately discovering that this was the longest way round he turned back just as the ty other members of the party were contemplating sending out a search party.

had to leave and return to their task of fighting the fire and the girls stayed at their switchboard even tho the flames burned in the rear of their the flames burned in the rear of their room and on the roof just above them.

They "kept the service open." They "kept the service open." The story of the destruction of Louvain excited the sympathy of the whole world, but there was a thrill of admiration, too, at the exploit of three Belgian girl telephone operators on the day of the bombardment of the city. Yet it was only the usual story of

then bear a higher proportion of the would Tax All Road Vehicles. In the case of the motor vehicles.

every motor car to be operated upon the public highways must first pay an munications around the city. Service annual tax, fixed according to horse power of the machine and vary-ing from \$5 to \$25, altho commercial cars (motor trucks and delivery wag-ons) pay a flat uniform tax, regard-less of the horse power. Speaking gen-erally, motor cars are the only vehicles

pay their shares

other

over the wires constantly. When the Germans began to bom-bard the city, the Beigians fell back, and it was more than necessary to use the telephone lines for orders. So the girls stayed at their post even tho shells from the German guns were bursting everywhere thruout the town. From their windows the girls could see the houses toppling under the ex-plosions of the shells and in the street below citizens were being struck down erally, motor cars are the only vehicles in this state at present which are com-pelled to pay any tax for the use of the roads, while horse drawn vehicles escape entirely. Whether this propor-tion of exemption is fair or unfair, or should be increased, is a matter which the legislature will have soon to de-cide. If the principle is to be adopted of making vehicles which use the roads pay more heavily for that use, it goes without saying that the present scale of motor car taxation will have to be changed and that all vehicles, motor below citizens were being struck down by the flying bullets. Still they stay-ed, not leaving until their wires were destroyed and they could do nothing more to save the soldiers. Then they dashed out into the street an thru the storm of bullets to a place of safechanged and that all vehicles, motor and horse drawn alike, will have to

Heroines of Regina

Not quite so lucky were the half score telephone operators who lost their lives in the tornado holocaust at Regina, Sask., on June 30, 1912. The offices and exchange of the Saskat-chewan Government Telegraph Service was on the outckirts of the city. For several minutes it seemed certain that the telephone building would be destroyed, and when the full force of the devastating storm finally struck the exchange it carried a thirty ton switchboard from the top floor down to the basement and with it the brave operators who had refused to flee from their duty, but were endeavoring to send warning to those not yet touched by the fury of the elements. When the final balance was checked it was found

that one-quarter of the lost in that catastrophe went crashing thru to the basement with the switchboard. There is nothing in the training of the telephone that It is the story of the telephone girl who could not be driven from her her post that stands out again in the ac-

counts of the German investment of the telephone siri to account for this remarkable record of achievement or to supply her with the initiative and the little village of Novorossysk, in Russian Poland. The village was occupied by Russian troops, and con-sequently became a mark for the German artillery. When the bomwit needed to meet the many emer-gencies she is called upon to face every day. Yet her power seems to com bardment began early in the morning to her as soon as she enters the service, for we find her endowed not only with bravery and devotion but with all the residents fled except Olga Tatcheva, the operator on duty at the village exchange. years of age, the powers entrusted to him by his ancestors. This emperor

was Mutsuhito who died on July 30, 1912. Described by Mr. Crewdson

as one of the greatest and most remarkable rulers the world has ever

seen, he was called on to play the part of the far seeing astute ruler

Of a kind with the act of the	WE K Jake
Shogun was that of the Daimyos or great feudal chiefs who in 1869 surrendered their territories to the central government which undertook the support of the four hun- dred thousand Samurai or feudal retainers. These retainers as a mark of distinction from	Renunciation By the Samurai

the common people were allowed to wear two swords. The Samurai of all ranks agreed to lay aside their swords and commute their hereditary pensions for six years' purchase. This, Mr. Crewdson remarks, is probably the most wonderful fact in the history of any people in the world. Commenting on it, Sir Claude MacDonald says that "this abolition might have given rise to serious trouble, but the statesmen of that time were undoubtedly a shrewd body, possessed of some humor, for when it was found that the abolition was likely to cause trouble, they induced the emperor to publish an edict permitting all classes to wear two swords if they felt so inclined. This edict was found most efficacions and did more to bring about the desired result than sterner measures would have done." Between 1874 and 1877, three civil wars occurred, the last being the most formidable, but was finally suppressed after ten months' fighting. Japan was saved thereby from passing under the rule of a reactionary and military class.

Do It Right If the government is going to operate the National Transcontinental Railway it should put a man

on the job and give him some tools work with. If the road is to pay at all it must depend upon thru traffic between Winnipeg and tidewater. It is the short line between Quebec and Winnipeg and should pick up considerable transcontinental traffic.

But to get passenger traffic the road must furnish up-to-date sertention of the traveling public. That can only be cone by adver-tising, not only thru the newspapers, but thru well-pleased patrons of the road.

Manitoba

The change of government in Manitoba occurred under circumstances almost unique. The legislature was not in session, there had been no recent verdict against the government at the polls, and yet the entire cabinet gave up their portfolios and retired to private life. They even so further and guarantee their former seats in the legislature to opposition candidates by acclamation.

We can only parallel it by imagining the Borden government resigning under circusmtances which would make it quite feasible to return Liberal candidates by acclamation in West Toronto and Dufferin. Naturally the pro-Tince is greatly stirred and speculation is rife as to what has been going on behind the scenes.

The Roblin government has been going down grade since the pro-fincial elections in 1910 and

should have thrown up the sponge after the elections of last July. The scandal in connection with the new parliament building was the final straw. Nevertheless, there will be much dissatisfaction if the investigation into that scandal is quietly hushed up. A change of government should not always result in an immunity ban for evil doers.

Ready for War

A great many people in and out of the United States are belaboring the government of that country because it is not "prepared for war." Of course, a great deal depends upon the point of view. Canada is utterly unprepared for a war with the United States, but no one would seriously propose building fortresses along our 3000 miles of boundary and filling the great lakes with dreadnoughts and submarines. The United States never contemplated invading any other continent and has naturally considered the matter of military preparedness from the defensive standpoint. Her fixed idea has been to keep her nose out of Europe and to insist upon European monarchies leaving the republics of the western world undisturbed.

The one trouble the United States had reason to dread before the outbreak of the present war was an attack upon the Monroe doctrine by Germany and Japan. No doubt in such a war she would have lost the Phillipines, but she would probably in the end, have driven off the German fleet. But to prepare armies of invasion for such a war would have meant keeping at least 5,000,000 men in barracks for three years. That would have meant the militarism which has been the curse of Europe for so many years.

One robin does not make a spring, but one Roblin may bring on a fall.

Manitoba has been doing its best to get into the limelight, but finds it hard to compete with the Lusitania and the Dardanelles.

Mr. Kelly, the Wininpeg contractor, who is said to have collected \$800,000 in extras on a ...,000 contract, objects to having himself investigated by a Royal Commission. He has nothing to conceal, but thinks the law is unconstitutional. Thus do patriots ever spring to the defence of the constitution. . . .

Who was the mysterious man d'scovered bound and gagged by the Ottawa police, who told of a plot to blow up the Royal family at Rideau Hall? Are the police seeing things or has the Mayor of Brockville been visiting Ottawa?

A suggestion that British merchant ships be sent out with a few hundred German prisoners war locked up in the hold might not be a bad idea. The Germans could then have the pleasure of drowning from their own torpedoes. . . .

Turkey is worrying about the We advise Turkey to future. look behind her. . . .

It must be admitted that Turkey holds a strait in the international poker game. The Allies, tho, will be the ones to come thru and raise the ante. . . .

Tut, tut on these professors who advise polygamy. Haven't men got trouble enough?

. . . Archaeologists tell us that the Euphrates flows thru the Garden of Eden. Yes, yes, the British Indian army is surely raising Cain in that vicinity. . . .

Credit Germany with a little forhearance. She hasn't started to eat her prisoners yet.

Humanity may stand aghast at the Lusitania wholesale murder. But the Germans do not care a You see, they don't besnap. long to humanity.

Controller Foster didn't think city representatives should attend the American Waterworks Convention at Cincinnati, even tho Controller O'Neill paid the expenses. Controller Foster is incurably afflicted with economy.

. . . Austria has been calling out the old men. Ah, the Landsoum, no doubt

With provincial premiers resigning and interning themselves all about him, Mr. Scott of Saskatchewan is undismayed. If he es-tablishes prohibition and votes for women in one year he will have made a remarkable record for

Canada.

. . . Isn't there some way in which we can blame the war for the showing of our ball t.am? . . .

We submit that the principle of loving your enemies was outlined some considerable time before the enemy started to drown women and children, poison soldiers and bombard churches.

About the only way we see for the United States to attack Ger-many is to seize the Hamburg-American liners and Milwaukee.

The old American Liberty Bell is falling to pieces. They can get another made in Germany.

A couple of New York business men, who lost relatives in the Lusitania outrage are turning their factory into a manufactory of war material for the allies. This is about as good a revenge as they can possibly take. . . .

In a house occupied by Billy Sunday as his headquarters while in Philadelphia damage to the extent of \$1754 was done. The owners are attempting to collect the bill. "Furniture was smashed, china broken, walls gouged and over a hundred glasses disappear-ed" reads the despatch. Billy must have been rehearsing.

The German National Bank is unable to pay a dividend. Possibly because the people will not, credit any checks.

Driver Wheeler, the Canadian who helped rescue the guns at Langemarck and has been recommended for the V.C., is receiving shoals of letters from admirers in England. With a somewhat dif-ferent meaning than ordinarily we might remark serves him right.

. . . The Conservatives in Manitoba may come back quickly enough if they are not burdened with the load of carrying a lot of ex-ministers. There is a chance for a man with a clean record to trip Premier Norris up before long. Will Hon. Arthur Meighen please come forward and take a seat on the platform.

Both political parties are nominating candidates for the House of Commons as quickly as possible. Perhaps the election is not so far of after all.

"The War has effectually put an end to this crawling before foreigners," declares a German journal. Exactly. Now they find that a quicker pace is required when our lads get behind them.

A couple in the Toronto police court, charged with bigamy, both claimed as an excuse that their life partners had deserted them. United they stood, deserted they fell.

. . . After the war we suppose the British arms will bear an engraving of Lloyd George slaying the Flagon.

. . .

The Italians respect the rules of grammar. Trent, Trieste and Trentino are nouns and Italy wouldn't decline them. . . .

A Boston clergyman advised the unemployed who could not get relief to parade in the down-town streets in a state of nature. The idea being, no doubt, to emphasize naked poverty.

Italy appears to have adopted the watchful waiting policy also.

Wonder what would have happened to any Britisher in Germany rejoicing over the loss of more than a thousand German lives. Sometimes our justice is injustice to our own people.

Had he been spared, Elbert Hubbard's ready pen might have brought further home to the peo-ple of the United States the kind of people the Allies are fighting. The thin veneer of German kulture peeled off readily, leaving the savage, naked and unashamed.

The United States now finds out that she has failed to assimilate the foreigners who have thronged in. Certainly the States has bitten off more Germans than any decent country could chew or

digest. The Liberals were reproached with loading up the mails during the last week of the parliamentary session, but it was their last chance to get out their mail free of charge. The party in power can frank mail the year around.

Would it not be as well to have a 3c stamp. The words "war tax" could be printed thereon if desired.

The "See Canada First" propra ganda is a good one, but it should be taken up by the government which now has control of a transcontinental railway. A beautiful country and an ideal one for tourist traffic lies between Superior Junction and Winniper.

we can learn, so did the rest of the people, pasengers. We are all beginning to whom we are not on terms of intimrealize that the All Father has nothing acy, makes an impression upon us. worse in store for us than the experiences thru which we have to pass HAS any one supposed it lucky to on earth

"THE GHOST BREAKER."

When Paul Dickey and Charles God-

dard, the authors of "The Misleading

Lady." wrote "The Ghost Breaker," the

merit of the piece attracted the atten-

tion of H. B. Warner, the eminent ac-

tor, who was then finishing a notable

engagement with "Alias Jimmy Val-

entine." Mr. Warner saw that it would

make an excellent stage offering, and

accepted it for his next starring tour.

When it was first presented in New

York the press of that city went wild

over it, with the result that it ran for

an entire year there. This was fol-

lowed by a six months' run in Chi-

cago, and seventeen weeks in Boston

afterwards, filling in an extensive road

engagement. It has never been offer-

PALMOLIVE SOAP Appeals to Dainty Women

Dainty women revel in the fragrant, creamy, abundant PALM-OLIVE lather and its wonderful cleansing qualities. Made from palm and olive oils, PALMOLIVE SOAP is delightfully mild. Sold everywhere.

PALMOLIVE CREAM keeps the skin smooth by supplementing the natural oils. Use a little be-fore applying powder. PALMOLIVE SHAMPOO is *liquid* PALMOLIVE. Makes the proper cleansing of the hair easy.

Threefold Sample Offer - Liberal cake of Palmolive, bottle of Shampoo and tube of Cream, packed in sample package, all mailed on receipt of 5 two-cent stamps.

ANIEL WEBSTER says of Hamilton: "He smote the rock of National resources and abundant streams of revenue gushed forth; he touched the dead corpse of public credit and it sprung upon its feet" No man did more to build the Constitution of the United States than did Hamilton. He took a prominent part in every debate, and worked indefatigably on all the important committees. His genius, individuality and daring foresight are indelibly stamped upon every clause of our National Law-the law under which Americans are guaranteed for all time Religious, Commercial and Personal Liberty. During Hamilton's lifetime he used his great influence to encourage and protect the brewing industry. Among all the Fathers of the Republic none knew better than he that honestly-brewed barley-malt beers make for true temperance. This American Colossus, who was second only to Wash ington in the service rendered to his country, drank good beer all his days. We know of no one who has yet dared declare that it injured him in any way. Under the tenets of the Constitution, which Hamilton did so much to make a fact. Anheuser Busch 58 years ago launched their great institution. During these years they have honestly brewed honest beers. To-day 7500 people are daily required to meet the public demand. Their world-famed brand BUDWEISER because of its quality, purity, mildness and exquisite flavor, exceeds the sale of any other beer by millions of bottles.

Visitors to St. Louis are courteously invited to inspect our plant-covers 143 acres.
