THE GIANTS OF LILLIPUTANIA ARE HERE TODAY

The most remarkable, thrilling fairy tale and toy ever created. First there is the story of the Giants of Lilliputania, a book of hair-raising fairy tales. Then when you have finished the story, there is the city of Lilliputania for you to build. It is a tremend-

ous city, although it will only cover the top of your table. Every building is there, skyscrapers and office buildings, stores and fire houses, postoffice and drug store and baker shop where Dave Dough, the baker, used to live. All the people are there too, Dave Dough, the Baker; Heave Ho, the Sailor; John Bull, the Butcher; Spaget, the Organ Grinder; Mary Dough, the Baker's Daughter, and Henry Bull, the Butcher's Son, they are all here. Everyone from Professor Plus to Police Chief Dulin and

John Lung, the Laundryman. There are street cars on the streets and steam boats on the river. There are automobiles and fire departments. Even the

street lamps and the trees in the park are here. All you have to do is to cut them out and build the most

beautiful city that ever was dreamed of on a moonlight night.

AT RECRUITING RALLY A Story From Life

About thirty years ago a man of our acquaintance bought a farm. He paid for it with the savings he had on hand, and to put up buildings borrowed \$2,000.00 on a mortgage. Shortly afterwards he died leaving his wife with five sons, the eldest of whom was only ten years of

It was found that he had wisely taken out a life insurance policy equal to the mortgage he had put on his farm. With the money thus London secured, his widow paid off the mortgage and had a free farm with good buildings, on which to support her family. By employing men to Insurance work the farm and paying them from the stock and crops raised, she was able to support her Company family and educate them. At present her five Telleth sons are playing an important part in the life of Canada. One is a banker, one a doctor, one a college professor and two are successful business men. Everyone familiar with the case knows that she could not have supported her children and educated them had it not been for the life insurance policy that left her free

from debt with a good farm. If you have a mortgage on your property you will have no trouble in working out the moral of this little story. We have policies to suit your needs whatever they may be. Send us your name and address and we will tell you about them.

E. W. Wilson, G. O. C., of this military district. They sometimes build them eight feet high and to a depth of many feet, all the tangled mass being affixed to iron

Sometimes the British also have working parties out. There have been cases where watchful flares have disclosed enemy parties silently, bubyily engaged very near each other. Through some unfathomed code trench honor, these parties often are ishes the task it has in hand. Then it is considered entirely ethical for it to attack the enemy and a deadly duel

Sometimes the flares show tell-tale white strips of tape, laid forward in straight lines from a German trench. This generally means an attempted raid, and the tapes are laid to guide the attackers in the dark and prevent them from getting twisted about, for trench lines are not straight. As a matter of fact, they are extremely tortuous, and even in daylight it is difficult to keep positions clearly in

It was found early in trench-warfare that white faces were shown with uncanny clearness, so numerous devices are invented to prevent this. Dawn paints another phase of the ront-line picture. Flares and rockets go ghastly pale and green in the light of coming day. The all-night vigil has made the soldiers "jumpy" and there is the crackle of rifles all along the

line. There are spectres in the dawn and firing rifles seems to give the men a sense of relief and protection. "UP REBELLION." SANG SINN FEINERS

WASHINGTON, Dec. 10.-Offers of mediation or suggestions of peace to the European nations have not been made by the United States, they are not now being borne across seas by Ambassador Gerard, and will not oe broached by this Government in the near future unless there is some quite unexpected turn in world events.

These facts are stated authoritatively by one of the highest officials of the GEORGE S. HENRY, M.P.P. for East | Government to counteract reports to in the Ontario cabinet, ally published, much to the embarrassmisleading of foreign nations.

In official circles it is felt that the increasing and apparently authoritative rumors that the United States is planning some move for peace are calculated above all else to destroy chances of peace, and no matter what their origin, to defeat their own ends. Two cardinal facts stand out in the sinds of officials: First, that many such proposals originate an German circles, and second, that their reiteration has been driving Allied statesmen to an extremity of refutation from which it would be very embarrassing
