© 1998

The copy filmed here has been reproduced thanks to the generosity of:

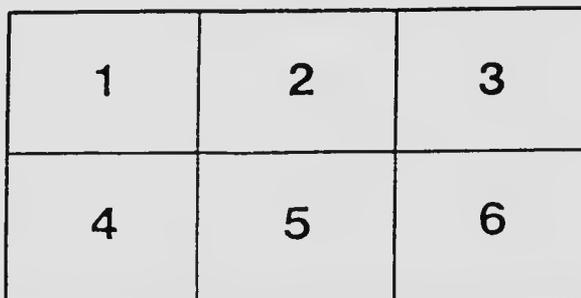

Legislative Library
Victoria

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

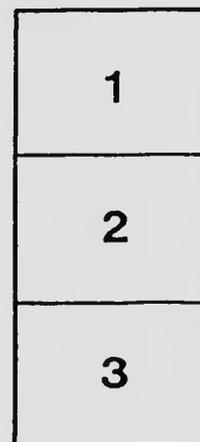

Legislative Library
Victoria

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

AGASSIZ, BRITISH COLUMBIA

Of those who are thinking of coming to Canada to settle, British Columbia should have attractions. One of these is that in many parts the climate is very similar to the British Isles, another is that for those who wish to get their living as farmers there is an ever-increasing market for dairy produce, meat and poultry products. The importations of food stuffs is the evidence of a good market, and those who enter the list as mixed farmers on contra distinction to the grain grower of the Northwest Provinces and fruit growers of Ontario can make a good living. Agassiz, at the head of the Lower Fraser Valley, is a place well adapted for homesteaders with families of growing children, as the climate is bracing and healthy; the water is good and the supply

plentiful; the land is naturally drained with a gravel subsoil and well adapted for vegetables and small fruits. Hops do well here, which shows the richness of the soil and that drainage is good. One can have a garden here similar to one in the Old Country. The industry of hop growing is carried on successfully here and would afford work at nearly all times of the year for many white families, much of the work now being done by Chinese and Hindcos simply for want of white labor. Hop growing is hardly to be engaged in by the small farmer, for a large investment is required and the running expenses heavy. It is carried on here by a limited company, who own and operate areas in other parts of British Columbia.

The Dominion Government Experimental Farm has been established here, giving new settlers every chance to get experience

GROUP OF HOP PICKERS

without buying it too dearly. All branches of mixed farming are carried on by the Superintendent of the Experimental Farm, and records can be obtained for the last twenty years as to weather, crops, etc. At most times of the year there is work for capable people, in fact for years there has been a short supply of good men. The railway company employs men, the hop growers need men, the farmers need men nearly all the year round, and the Government farm needs men. There are openings also for young women who would work as helpers in the homes of the district, and they would obtain good wages and be well and kindly treated. The educational side of life has not been forgotten here. There are schools which are free under Government control, non-sectarian, in all parts of the district, and a higher school for those who wish to give their elder children an advanced education. We have a branch of the Bank of British North America here, one of the oldest chartered banks in Canada, where all financial business with the outside world can be transacted. There is much

land lying idle for want of settlers that can be obtained for reasonable prices and on long terms.

Our railway and transportation business is done by the Canadian Pacific Railway Company, who run two local trains daily to the cities of Vancouver and New Westminster, and on either of which perishable produce can be shipped to market.

We have a Sanitarium just outside the borders of the Municipality where numbers of people go to the celebrated Hot Springs for rheumatic troubles. These people are consumers of fresh eggs, butter, cream and fresh meats, and this fact creates a good market for much local produce. There is a constant demand for poultry at good prices at the St. Alice Hotel, Harrison Hot Springs, where automobiles meet all trains going east or west and who look after their guests admirably.

The Presbyterian, Methodist, Anglican and Roman Catholic sects all have churches and ministers here, and on Sundays nearly all hold two services and a Sunday school.

We are blessed with the presence of two medical men, one in the town of Agassiz

and one at the Harrison Hot Springs, so that one can get a doctor by telephone almost at any time.

The B.C. Telephone Co. have a local office and manager here and nearly all the residents have a telephone in the house. We also get connections anywhere within a radius of 100 miles west. People get it into their head that B.C. is out of the world, but we have many advantages here that residents of older countries do not enjoy.

In speaking or writing of our district we never forget to speak or write of the advantages of the portions east and west of us. Ruby Creek and Hope to the east of Agassiz are both rising places. Hope is to be connected with the outside world by the Kettle Valley Railway, and is already on the main line of the Canadian Northern Railway. It is a starting point for the mining district, and will shortly be connected with many mining camps. It boasts a weekly newspaper, which is a highly creditable sheet. Hope has electric light, and for climate and home making would be hard to beat. It has two fine hotels, where week-ends may be spent very comfortably amongst the finest scenery one could wish for. The Royal Bank of Canada

has a branch there, where any ordinary banking business can be transacted. Hope is one of the old time stopping places when the Cariboo gold mines flourished and when all transportation was by the Fraser river. To the west of the town of Agassiz, some nine miles, lies the Harrison mills, where the Rat Portage Lumber Company has a splendid sawmill, where many car-loads of lumber are cut ready for building houses on the prairies of Manitoba and Alberta, and where the local trade is also supplied. Quite a busy place, where the mails were transferred for many years to Chilliwack and where the Harrison lake empties into the Fraser river, and where the old original first survey was made to the Lillooet district. The first surveyor was sent in from this point up the Harrison river when the country was opened. All the logs cut on the borders of the Harrison lake come down by Harrison Mills. There is quite a stretch of farm land here, and some Indian reserves, which altogether makes the place quite picturesque.

Any information about the district, price of land, stock, employment, homemaking will be cheerfully furnished by the Secretary of the Agassiz Board of Trade. Address P.O., Agassiz.
