TREES TURNED TO STONE.

Amethyst, Agate and Topaz Hues Play Through the Several Trunks,

Some years ago, writes Charles Frederick Holder, a party of pioneers was passing through Arizona, and one night the cook, an aged colored man, who previously had never been out of the mountains of Virginia, went out from camp with his axe to find wood. It was not long before the old man ran across several fine logs that looked as though they might have been washed to the spot by a axe, and the next second it flew from the estonished cook's hands into a blaze of glory, as the sparks might be termed. The old man without delay made for the transferred to Andersonville, whence he camp, expressing the opinion that somebody had "hoodooed" his axe, "'case it has struck fire outen a tree." Investigation showed that the tree was

shower of sparks when struck. Upon further investigation it was found that the travelers were in an ancient forest, where uge trees were lying about in every coneivable position. Since then the forest has acquired a national reputation and is known as Chalcedony Park. The park is on the line of the Atchison,

Topeka & Santa Fe road, the nearest stations being Holbrook and Billings, whence the trail or road is taken through without especial notice, but a little examination will show wonders not dreamed of. The ground appears to be covered the amethyst; there the yellow of tapaz, while innumerable tints and hues vie with one another and flash in the sunlight like so many gems. The site of this ancient forest is in

Apache county, Arizona, and it is a park the surface and beneath the ground, all

position, as if some cataclysm had broken them up and turned them to stone. Some are broken off short and are of large size - veritable giants; others still retain almost their full length, and represent trunks one hundred and fifty feet long and ten feet in diameter, so perfectly preserved that the very texture of the wood is seen. Some, lying flat upon the ground, appear to be solid, yet are broken up into very fine selections — results produced by alternate seasons of heat and cold, dryness and moisture. Some project from the soil at an angle of forty-five degrees; others look like old Spanish cart wheels

cut off for use but abandoned. From a hill in the park a good view of these fallen giants can be obtained. One especially attracts attention, having been prostrated when growing. It is about 200 feet in height, with a diameter of eight feet. A small section of this monster. Robes, Mountings, &c. would weigh several tons, and an estimate made gives the weight of trees in sight at 1,500,000 tons.

The various points in the park have been given characteristic names; as, for instance, Amethyst Point, where pieces of this gem are especially fine and numerous; Agate Hill, famous for its remarkable agates; Fort Jasper, Stone Tree Point, the Cart Wheel and Natural Bridge - the last mentioned representing a most interesting specimen, well worth a long journey to see. In the park is a small canyon or arroyo bed about sixty feet wide and forty-five deep. Over this a giant tree fully one hundred and twenty feet long is suspended, and, now, agatized and as hard as rock, it forms a natural bridge over the chasm upon which people pass. The tree bridge is about four feet through at its largest diameter and is very ornamental. gleaming and scintillating in the sunlight where the bark has been chipped away, exposing the many hued stone. The ctual span of this remarkable bridge is about fifty feet, while on either side nearly

ING, at 6.25 St. ndard time. The question that rises in the minds of hose who contemplate this scene of wonders is what caused the destruction of the trees? An examination of the country in the immediate vicinity will suggest the volcano as a cause. Volcanic action has played an important part in the history Reed's Point Wharf, St John, N. B. of the country here. Not far away are lava beds so fresh and distinct that they might have been formed in modern times. The ground from which many of the trees project in Chalcedony park is made up of volcanic ashes and scoria. This in turn has been covered with twenty or thirty feet of sandstone, which is well shown in the canyons and gulches, where sections are laid bare. The convulsion which took place so long ago was undoubtedly due to some volcano in the vicinity that suddenly became active, throwing out millions of tons of ashes and other matter that, settling down upon the forest, had destroyed it. Some of the trees had been buried standing; others For LOST or FAILING MANHOOD, General and MEEvous DEBILITY, Weakness of Body and Mind, Effects of

Unless the government can buy the park it will soon be denuded of its curiosities, as the sections of trees, so beautiful and attractive, have a decided value when used as table-tops, tiles, etc., and when polished make many objects of great beauty, so that many tons of the trunks have been taken away from the park, and several companies are said to be especially interested in its products.

I naturally thought it strange that a man in his apparent condition should be reduced to a one-cent meal, and I hesitated before risking insulting him by offering to pay for a better meal, but my interests were aroused.

"You will pay at the cashier's desk," said the waiter, as with a perceptible sneer, he gave the man a one cent check On the instant I conceived a plan to

THE HERALD.

FREDERICTON, OCTOBER 3, 1891. MERCIER-ANGERS. The whole correspondence between Mercier and the lieutenant governor of Quebec is published in a recent issue of the Montreal Herald and is interesting reading. The impression left on one's mind is not favorable to the governor or his method of conducting the controversy. While the Quebec premier has not apparently a very satisfactory explanation to offer, he has so marshalled his facts as to make a most plausible answer, and withal writes in such excellent temper that he shows to great advantage. The governor is curt at times, almost rude. and his style is wholly deficient in the lofty and dignified phrase which ciated by our people, notwithstanding the we look for in state papers of impormalignant muttering of its opponents. tance. It may almost be inferred that But we may be asked, what is the use of his honor intended, by the rudeness of raising superior horses and cattle for the his tone, to irritate Mercier into rash market when we are surrounded by trade action. He has not only failed in this barriers on this side of the line, and met and failed badly, but he has made by them on the other? Sure enough, political capital for Mercier when it was what is the use? What is the use of the in his power to have carried the whole local government spending large sums of strength of public opinion with him. The controversy, if such it can be present government at Ottawa is such as to render this expenditure abortive? We

called, has no special interest for us in New Brunswick, except as respects its constitutional aspect, the people of the rest of Canada may very well leave the people of Quebec themselves to punish the wrong doing of their own local government, but we are concerned in considering how far a lieutenant governor is justified in setting the advice of his cabinet at defiance. Mercier in the most deferential language, tendered advice to the governor upon two points, which we venture to think the governor unconstitutionally disregarded. He advised in the first instance that the house of assembly should be immediately convened so that the people's representatives, and not the crown, should deal with the wrong doers in the transaction, and failing to weaken, the governor's resolve to appoint a royal commission; he advised as to the construction and composition of the commission. It is clear that Mercier was acting well within his right in so advising, and it is equally clear that the govcedent aside when he disregarded the advice. It is open to suspicion that he would not have ventured to such lengths had he not been encouraged from Ottawa and had good assurance that the dominion government would see him through. It is in this view that the case assumes its serious aspect. Our form of responsible government for the provinces will not endure if the influence of a dominion government of a different political stripe from that of the local government is to be used, though its appointees, the governors, to subvert the local ministers. Our federal vincial governments throughout Canada may have nothing but disapproval for the

We think we discern signs already in this Angers-Mercier incident that the Ottawa government has lost its guiding mind. Sir John Macdonald would not have committed this error. His methods we know to have often been debasing but he was sagacious and would have avoided as a pestilence the doing of an act so likely as this to unsettle the political foundations of Canada. The French of Quebec are a mercurial people, easily wrought upon, much more jealous of encroachments upon their rights as a province, than they are sticklers for purity in administration, and it will not be a difficult thing for Mercier, if so disposed, to play upon their feelings with effect. We cannot help thinking governor Angers has been badly advised by his friends at Ottawa. He has taken up an attitude which cannot be sustained, and although at the moment Mercier may appear to have yielded to the governor's dictation, he is only playing his part and the inci-

dent is by no means over. The Quebec people have not yet begun to realize what is taking place, and when they do, this flagrant attack upon constitutional propriety will tend to, if it does not totally, obscure the ugly features of the transactions out of which this difficulty has arisen. After all the people of Quebec and not Foster, Cl. pleau and Haggart are the persons who ought to deal with Mercier. And we may be asmary treatment at the hands of the people if it is not overshadowed by a glaring attempt to take this power out of their hands.

ANOTHER JEWISH EXODUS.

The Jews have already commenced to leave Russia under pressure of recent edicts and a marvellous departure it is. European papers are describing the movement as a second Jewish Exodus and Baron Hirsch as the modern Moses. The Jewish population of Russia is now estimated at 5,000,000. and has been rapidly diminishing under the influence of repressve laws and popular violence Under the operation of new or revived edicts at least 2,000,000 of persons whose only crime appears to have been that they were Jews, were suddenly deprived of means of support. The learned professions have been closed to these people. They are forbidden to reside except in certain cities and towns; cannot hold real estate, vote or fill public office; are overcoming all other laws.

THE STOCK IMPORTATION

The arrival of the stock imported by the government in the city of Fredericton is an important event to the farmers of This, in addition to the former importations from the old country, ought to give the farmers of this province advantages for the improvement of their stocks the farmers of any portion of the dominion. Already the beneficial results of the policy of the local government is manifest in the superior class of road and draft horses possessed by a great many of our farmers, and as regards speed upon the track, many of our horses are in the front been the centres under the policy of the present local administration, from which its importations have been distributed. and as such agriculturists of all parts of the province have been induced to visit our city and county, and we venture to say that they have gone away favorably mpressed with the varied, natural capabilities of our county and with the opportunities in which our city of Fredericton affords for manufacturing purposes; and evidences are not wanting that this policy of the government of giving our city and county this prominence is fully appre-

NEARLY COMPLETED. - The bridge at Garden Creek on the Springhill road, will be completed in about a week or ten days. The job of rebuilding has been a very difficult one, but under the able superintendence of that master bridge builder, Alfred Haines, when finished the bridge will be a thorough one in every respect.

OPERA. - Dora Wiley, the "sweet singer of Maine," will occupy the city hall on Tuesday evening next presenting the sparkling operatic comedy, Vera. The troupe is very highly spoken of wherever they have visited, and the reputation of Dora Wiley is such that will guarantee the show a large patronage. Tickets and seats at Davis, Staples & Co.

FOR THE WOODS.-Lumbermen are busily preparing for their winter operations, and in the midst of their preparations find a scarcity of men. For several seasons past men have been going to Vermont and New Hampshire where wages are better; and owing to the employes placing more men to attend team, the work there is not nearly so heavy as it is here. A RARITY. - It is seldom one hears of

ripe raspberries in October, but Alfred Haines, of St. Marys, has placed a bunch of the same on our desk. The raspberries were picked on the Marysville road, and beside a number of full ripe berries, there were a number of blossoms and many berries that were hardly ripened. Are we not living in a prolific country?

ALMOST DROWNED. - A little son of Mr. Inglis of the Bank B. N. A., while playing in a boat in front of his home on Saturday fell into the river. But for the bravery of Fred Robinson the little fellow would have been drowned. Robinson plunged into the river and brought the lad from under a raft and thus saved his life. Such an act of bravery should be publicly rewarded.

A GOOD YIELD. - Mrs. James Camber, of Springhill, has the finest crop of Fife wheat and Japanese buckwheat this fall, it is said, that has ever been raised in the province. Last sason she sold two bushels of this which yielded fifty-five bushels of wheat. This has been an exceptionally fine fall for wheat, and many of the farmers throughout the county have the best yield this fall they have had for many

Mr. Wetmore objected to the bear and dog fight, although both animals were muzzled. Hanington wanted to see it and as Mr. Sillick is a Westmorland county hunter, Mr. Hanington told him to go ahead and he would see him through. Sillick went ahead and as a result Mr. Wetmore has lodged a complaint against Sillick for cruelty and against Mr. Hanington for aiding and abeting. SELECT STORY.

MRS. PLUMP'S PLOT.

BY SHIRLEY BROWNE.

"I never, never can tell her in the among the blue larkspurs and tall, red lilies by the garden gate. "She'll say 'I gether, dear little Calla and I." told you so!' And the worst of it all is that she'll be right. If I could only -"

"Shoo - shoo - shoo - oo !" broke in a shrill falsetto - and at that very moment old Mrs. Plump herself bounced out of the kitchen door with streaming capstrings and uplifted broom, driving a flock of marauding ducklings before her.

"Why, Calla is that you?" She lowered the broom and adjusted the cap, while her eyes beamed with welcoming light.

"Good-morning, Aunt Persis, dryly, "I'll bet a big apple I can guess what you've come for." Calla was silent. She dropped wearily

into a splint-bottomed kitchen chair and rested her cheek on her hand. "Lemme see," said Aunt Persis, count ing on her fingers, "you've been married

in the bud by the appearance of Mrs. Plump's face at the window, and Wayne reluctantly presented himself before her. "I wanted to speak to you," said she. "Indeed?" and Wayne mentally prepared himself for the fray.

"About Calla," added Mrs. Plump. Wayne looked surprised. "Charles," mysteriously uttered the old woman, "ain't vou never had no suspici-

"About Calla, Aunt Plump?" Mrs. Plump nodded. "I don't think I understand you," said

FLY BOOTBLACKS.

How They Put in the Time-De Game

The newsboys and bootblacks of Toronto are dead game sports. What they don't know about gambling isn't worth knowing. During these warm days when business is a little slow they retire to some cool retreat in one of the lanes or behind some of the big warehouses and there in their own little Monte Carlo they "play de game" with all the shrewdness of old timers. Of course they are sharks among these juvenile sports, sharpers who have retired from the legitimate business, and who spent their time in luring "de new jays" who have been "holdin' de even ings" for a few weeks only and who are not in it when they try their hand with these alley gangs. They haunt the down town lanes, the docks, vacant buildings, and other retreats where they are safe from the police, and the whole tribe is proud of the reputation of some of its members for handling the cards.

Corky is a Coo-Coo. game's straight," said an enthusiastic onlooker to an EMPIRE reporter, as he stood watching a swift game that was in progress in the Toronto Opera House lane. It was "Nonsense!" exclaimed the young a novel sight. Squatted on the smooth ground were five young sports from 12 to 15 years of age, and the way they handled the dirty cards would make the old-time gambler envious. There was the "sucker" in the party at this little sitting. It was a case of shark watch shark. The personnel of the party was as follows: Against the theatre wall sat "Jimmie" and "Corky" both old timers, and perhaps the slickest pair in the gang. "Jimmie" is the scion Aunt Persis watched him with an inof a famous family whose ancestral halls are situate in St John's ward. He wore a black slouch hat which completely covered his eyes from the scrutinous gaze of the other players, and didn't say two pure, sweet Calla Lily? I wouldn't be- words during the whole game. He simply "played de game" for all it was worth. Corky was a little more garrulous, but he talked for a purpose, and used pretty nearly all the rest of the lane as a spittoon. Bethan usual that Wayne came home that side "Corky" was a tall, slim bootblack who is known in the select circle as head. "Skinny." The game had been in progress

but a few minutes when "Corky" found He Was Out Seven Cents. and he got nervous. He was considered a "boss" player, and had often cleaned out the dock gang, but he was travelling in pretty swift company. "Swoppy" and "Irish" sat on the outside. They are east-enders and their reputation extends from the cow byres to the Winchester figure was seated, its head bowed down street bridge. They came up to "do up" the Yonge street sports, and being loaded down with "stuff," they rushed the game for a while. Select and wealthy, the party had furnished cigarettes, and all except "Corky" were enjoying them. In the midst of all the excitement he remained true to his old love, chewing tobacco. 'Swoppy" was the dude of the party. There were no holes in his pants, and a pair of over-worn tennis shoes gave him a rather aristocratic appearance. His gaudily colored cigarette holder was the envy of every man around the "table." There was considerable discussion as to what game should be played, but pedro was finally decided upon. The game was fast and furious, and the coppers changed

> was sitting in front of Underwood's ink manufactory on Johnson street On the Lookout for Cops He was promised three cents to watch and give warning if necessary. The signal was given once during the game, three shrill whistles, and in an instant the lane was deserted. Another signal, to warn them that the coast was clear brought the party together again, and the game proceeded after the cards had been counted at the request of the east end representatives. Corky had a streak of bad luck. "I aint sayin' that de game's crooked," they so assiduously perform.

he said. "but I aint in de habit of losin' seven cents every five minutes." "Aw, y' allus shoot of yer mouth when yer drop a nickel," retorted Skinny, and after this there was a flow of choice vocabulary that made the odorous atmosphere of the lane almost sticky with blasphemy. Finally the east enders commenced to drop their pile and suspected crooked work. The cards were again counted and the dust rubbed off them. The excitement was too intense, however, and there was nothing for it but a free fight. "Irish" grabbed "Corky," pulled him out in the lane and was about to go through him, when Corky pulled out a jackknife with a vicious-looking blade and kept the Don sport at a distance. A rough-and-tumble fight had just got nicely started when the three whistles were heard again, the lane

was deserted and the game over. Scenes like these are not at all uncommon in Toronto nowadays.

A GHASTLY FUNERAL

stentatious Parade of a Decaying Corpse in Constantinop

CONSTANTINOPLE, Sept. 27 .- The death of the man who calls himself the rightful head of the Christian church universal is rare, because advancing age commonly gives the incumbent of the Greek patriarchal chair time to resign before the fatal hour. Hence the funeral of the patriarch Dionysius called together an normous concourse of people. Along the whole line of four or five miles traversed by the procession, the streets were packed with men, women and children who might not have an opportunity to see this pageant again. Turkish troops formed the escort of the procession, but were not used to prorect it from the mob of Greek sight-seers. It had hardly left the Patriarchal church at the Fanar when its orderly structure was annihilated by the rush of the rabble bent on seeing the awful thing which the priests had brought out of the church. It was nothing that prince and shoemaker, bishop and boatman, diplomat in cocked "I tell yer, der aint a man in dis town hat and pacha in massive gold embroidery that can empty Corky's pockets, if de struggled together and with the pallbearers for the right of way. The awful thing, the haunting horror of the spectacle, was the ostentatious parade of the decaying corpse of the white-haired old man, crowned with gold, bedecked with ecclesiastical finery, tied, like a criminal who has been executed by electricity, into a chair, with head left to hang nodding on one side, with one hand held aloft by strings in grim caricature of the attitude of benediction, and with attendants spraying perfumery over the ghastly thing in order to conceal its odor. As if this was not enough, when after several hours of such exposure in the streets the corpse reached the place of sepulture, proceedings were stopped in order that the robes of the defunct might be saved. The poor dead patriarch was thoroughly stripped of his garments. Dressed in a bare white shroud he was seated on a stone in the corner of his last resting place and the place was closed up. Then at length the men who had taken such liberties with his body retired, satisfied with their last homage to their spiritual

The many victims of ophthalmia to be seen there usually have their open sores covered by sworms of flies, which makes the presence and obtrusiveness everywhere in that country of this nsect pest doubly abhorrent, from the possibilities of contagion by contact with them. The prevalence of opthalmia in Egypt is attributed specially to these swarms of flies, which convey infection from affected subjects to those unaffected. In our own country there is no specific malady which may be thus mainly attributable to the germ-carrying action of flies, but it is quite possible that many hands pretty lively. > > RUSKIN THE ENGINEER.

Very few people are aware that John played with remarkable success the part of a hydraulic engineer. The inhabitants of Filking, a little village in Sussex, not far from Brighton, had for a long time great difficulty in obtaining an adequate supply of drinking water. A hilly gathering ground was near, but nature other localities. All sorts of expedients were adopted to arrest the mountain streams, but one after the other proved failure. It happened that Mr. Ruskin occasionally visited the district, and the idea occurred to somebody that he might be able to assist the villagers in their difficulty. The request was a strange one but Ruskin began to think what could be done, and in the end devised a scheme which has given Filking as much water MPERIAL
