The copy filmed here has been reproduced thanks to the generosity of:

Library of the Public
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

EXHIBITION

OF

INDUSTRY OF ALL NATIONS,

TO BE HELD IN

L O N D O N,

1851.

EXHIBITION OF INDUSTRY OF ALL NATIONS.

TO BE HELD IN LONDON IN 1851.

HER MAJESTY'S COMMISSIONERS for the promotion of the EXHIBITION OF THE WORKS OF INDUSTRY OF ALL NATIONS, to be holden in 1851, having had the various subjects of their enquiry under their anxious consideration, are now prepared to state, for the information of the public, the progress they have made in determining on the different points referred to in their announcement of the 11th January last.

The decisions they have been able to come to have been necessarily limited by their present want of knowledge as to what pecuniary means will be placed at their disposal; and the shortness of the time during which this vast organization will have to be completed renders it imperative upon the Commissioners to make an earnest appeal to the Country, to enable them as soon as possible to know upon what amount of subscriptions they may ultimately rely.

The scale upon which this important Undertaking will be conducted, must depend entirely on the amount of pecuniary support which it shall receive from the public. Her Majesty's Commissioners appeal with confidence to all classes of the community, to enable them to make such liberal arrangements as will ensure the success of this Undertaking, in a manner worthy of the character and position of this country, and of the invitation which has been given to the other Nations of the world to compete with us in a spirit of generous and friendly emulation.

The Commissioners have fixed upon the 1st day of May, 1851, for opening the Exhibition.

The Commissioners will be prepared to receive and take care of, at the expense of the Commissioners, all articles which may be sent to them, and delivered at a place to be named by the Commissioners in London, on or after the 1st of January, 1851, and will continue so to receive goods until the 1st of March inclusive; after which day no further goods will be received.

Her Majesty has been graciously pleased to grant a site for this purpose, on the south side of Hyde Park, lying between the Kensington Drive and the Ride commonly called Rotten Row.

From the approximate estimate which the Commissioners have been able to make, they believe that the Building ought to cover a space of from 16 to 20 Acres, or about One Million of Square Feet.

The Productions of all Nations will be exhibited together, under one General Classification.

The Articles exhibited will be divided into Four Sections, as before announced; and a Classified List, together with General Instructions affecting each Department, are appended. Her Majesty's Commissioners wish to express their grateful sense of the valuable assistance which they have received in drawing up that List from the Members of the Sectional Committees.

The Building will be provided to the Exhibitors free from rent, and will be fire-proof.

Exhibitors will be required to deliver their objects, at their own charge and risk, at the Building in the Park; but no charges of any kind will be made whilst they remain there.

Colonial and Foreign productions will be admitted without paying duty, for the purposes of exhibition, but not for internal consumption. Her Majesty's Commissioners of Customs will consider all such Articles as Bonded Goods; and Her Majesty's Commissioners for the Exhibition of 1851 will make suitable arrangements for their reception.

Her Majesty's Commissioners are desirous that there should be complete local organization, and that the Local Committees, wherever formed, should themselves collect the Subscriptions within their own districts. The Local Committees should advertise all Subscriptions they receive, and defray all local expenses, paying such commission for collection as they may think necessary.

Her Majesty's Commissioners think that the same complete system of organization should be extended as much as possible to the British Colonies.

Subscriptions should be paid to the Treasurers of Local Committees, and by them transferred to the General Fund at the Bank of England, in the names of A. K. Barclay, Esq., W. Cotton, Esq., Sir J. W. Lubbock, Bart., S. M. Peto, Esq., M.P., and Baron Lionel de Rothschild, M.P.

Her Majesty's Commissioners having undertaken the absolute control over the expenditure of all money that may come into the hands of their Treasurers, have made arrangements for auditing accounts, and ensuring the strictest economy.

Her Majesty's Commissioners hope that the funds to be placed at their disposal by voluntary contributions may be such as to enable them so to regulate the amount to be paid for entrance that all classes may be enabled to visit the Exhibition.

Should any surplus remain, after giving every facility to the Exhibitors, and increasing the privileges of the Public as spectators, Her Majesty's Commissioners intend to apply the same to purposes strictly in connection with the ends of the Exhibition, or for the establishment of similar Exhibitions for the future.

However large the Building may be,—the quantity of articles sent for Exhibition may exceed any amount of space that can be provided;—Her Majesty's Commissioners consequently reserve to themselves ample powers of rejection and selection. Upon the amount subscribed must necessarily depend the space which they may be enabled to fill; but under all circumstances they will have to exercise a certain discretion.

Her Majesty's Commissioners also desire that the Local Committees will, as early as possible, procure an inventory or general specification of articles proposed to be exhibited from their Districts, and of the space which will be required for their exhibition, in order to enable the Commissioners to determine as soon as possible the extent and the proportions of the Building.

Her Majesty's Commissioners are in communication with the Foreign Office concerning the means of informing Foreign Governments of the arrangements making for the Exhibition.

Her Majesty's Commissioners are considering the principles upon which the Prize Fund of £20,000. shall be appropriated, and the best mode of adjudication.

If there be any points upon which Local Committees may require information, and will address themselves to the Secretaries of the Commission, Her Majesty's Commissioners will be happy to afford it to them, so far as it may be in their power.

CONDITIONS AND LIMITATIONS.

All Spirits, Wines, and Fermented Liquors, unless derived from unusual sources, are inadmissible, except in special cases, and under special restrictions; and when Oils, Spirits, &c. are exhibited, to prevent accidents, they must be shown in well-secured glass vessels.

All highly-inflammable articles, such as Gunpowder, Detonating Powders, Lucifer Matches, &c.; and all Live Stock, and articles perishable within the duration of the Exhibition, are inadmissible, unless specially excepted.

SECTION I.—RAW MATERIALS AND PRODUCE.

DIVISION (A).—MINERAL KINGDOM.

It is desirable that the Raw Materials should be shown in connection with the produce of the Mineral Kingdom, so as to form a history and explanation of the processes employed to fit them for the useful and ornamental purposes of life. The Exhibition would thus comprehend (1.) Illustrations of the various modes of extracting and preparing the *Raw Materials for Produce*; (2.) Illustrations of methods of reducing, working, or combining Raw Materials, so as to obtain *Products* which may afterwards receive applications to the useful or ornamental purposes of life.

The Specimens fitted for exhibition should include (1.) only those remarkable for their *excellence*, for *novelty* in their occurrence or application, or *economy* of their extraction or preparation; or (2.) those remarkable as *illustrations* of some further processes of Manufacture.

DIVISION (B).—VEGETABLE KINGDOM.

The objects which the Commission is most desirous of receiving, among the products of the Vegetable Kingdom, are such as from their utility, novelty, or practical interest, may appear especially deserving public attention. Particularly fine samples of substances in common use; authenticated samples of substances having similar properties, but derived from different sources—such as Arrowroot, Sago, &c. Dyeing Materials, accompanied by specimens exhibiting the effect of such Materials. Fancy Wood, both in the polished, rough, and manufactured state. All sorts of materials which are applicable to the manufacture of linen, cordage, wicker-work, paper, and the like.

Nothing, however, appears suitable to this Exhibition except such results of human industry as are capable of being preserved without injury through several months.

DIVISION (C).—ANIMAL KINGDOM.

As Illustrations in this Division, the various Processes of Preparation may be exhibited in connection with the Raw Materials; and in some cases a Finished Article may be introduced as the termination of a series of objects in preparatory stages.

Nothing, however, appears suitable to this Exhibition except such results of human industry as are capable of being preserved without injury through several months.

SECTION II.—MACHINERY.

DIVISION (A).—MACHINES FOR DIRECT USE.

Machines will be exhibited in motion, whenever it may be desirable to do so, and it may be found practicable to provide the necessary arrangements for that purpose.

DIVISION (B).—MANUFACTURING MACHINES.

Although in arranging this class for exhibition, it will generally be found advisable to separate the Products from the Producing Mechanism; yet the latter should always be accompanied with sufficient specimens of the Raw Material, in its several stages of manufacture, and of the finished product, to make the operation of the Machinery intelligible.

The complete series of tools and machinery that belongs to the manufacture of any object of common use, such as a watch, a button, or a needle, accompanied by specimens of the object and its parts, in their various stages of progress, is so instructive and interesting, that it is very desirable to obtain several such series for the proposed Exhibition.

SECTION III.—MANUFACTURES.

Manufactures to be exhibited in this Section must be in their *Finished* state, as fit for use.

Designs for Manufactures will be exhibited in this Section along with the class of articles for which they are proposed.

All Articles to be admitted in this Section must exhibit one or more of the following qualifications:—

1. Increased usefulness, such as permanency in dyes; improved forms and arrangements in articles of utility, &c.
2. Superior skill in Workmanship, as in block-printing, etching, &c.
3. New use of known Materials.
4. Use of New Materials.
5. New Combinations of Materials, as in metal and pottery.
6. Beauty of Design, in form, or colour, or both, with reference to Utility.
7. Cheapness, relatively to excellence of Production.

SECTION IV.—SCULPTURE, MODELS, AND THE PLASTIC ART.

Objects formed in any kind of material, if they exhibit such a degree of taste and skill as to come under the denomination of *Fine Art*, may be admitted into this Section.

The Specimens exhibited shall be works of Living Artists.

Oil Paintings and Water-Colour Paintings, Drawings, and Engravings, are not to be admitted, except as illustrations or examples of material and processes, and Portrait Busts are not to be admitted.

FOREIGN AND COLONIAL PRODUCTIONS.

ARRANGEMENTS MADE BY THE BOARD OF CUSTOMS

To admit Foreign and Colonial Productions, for the purposes of the Exhibition of 1851, *without payment of duty.*

- 1st. That all Works intended for the Exhibition should, in the first instance, be admitted into this Country without payment of duty; that the Goods should not be subject to examination at the Waterside, but conveyed to the place of Exhibition, at the expense of the Importer, under charge of proper Officers of the Customs, to be there opened by the Importer or his Agent, and examined in the presence of the proper Officer of the Customs, in order to assess the amount of duty which would become payable thereon if sold in this Country, and such marks attached thereto as may be considered necessary to maintain the identity of the Goods.
- 2nd. That the Goods brought for Exhibition should be considered as warehoused, under the Warehousing Regulations, in the premises appointed for the Exhibition; and that security be given in each case for the due re-exportation of the Goods, or payment of the duty at the close of the Exhibition;—and no Foreign Goods liable to duty to be on any account removed from the premises until the termination of the Exhibition; and then only on payment of the duty, or for re-exportation.
- 3rd. That Goods intended for Exhibition should be imported into one of the following Ports; viz.—
 LONDON,—LIVERPOOL,—BRISTOL,—HULL,—NEWCASTLE,—DOVER,—FOLKESTONE,—and SOUTHAMPTON;
 and the Board of Customs to make such regulations, and appoint such Officers of the Department for taking charge of the Goods at the place of Exhibition, in communication with the Commission for conducting the proceedings, as may be deemed essential for the security of the interests of the Revenue.
