

REPORT
OF THE
ANNUAL MEETING
FOR THE YEAR 1890

OF THE
Industrial **S**chool **A**ssociation
OF TORONTO

TOGETHER WITH THE
REPORT OF THE BOARD OF MANAGEMENT

TORONTO:
DUDLEY & BURNS, PRINTERS, 11 COLBORNE STREET.
1891.

[COPY.]

EDUCATION DEPARTMENT, ONTARIO,
Toronto, 27th May, 1887.

I have the honor to state that I have received the report of Mr. J. L. Hugnes, Inspector of the City of Toronto, respecting the "Victoria Industrial School," situated at Mimico, a copy of which is sent herewith, and after a careful examination of the said report, I hereby certify that the conditions required by Section 3 of the Act respecting Industrial Schools having been duly complied with, the said Victoria Industrial School is authorized to receive pupils, and is entitled to all the privileges of an Industrial School under the said Act.

GEO. W. ROSS,
Minister of Education.

INDUSTRIAL SCHOOL ASSOCIATION. OF TORONTO.

President :

MRS. G. C. WARBURTON. MISS L. A. BROWN.

ANNUAL MEETING.

The annual meeting of the Industrial School Association of Toronto, was held at the School at Mimico, on 25th October, 1890. In response to an invitation given by the Board of Management, upward of 350 persons availed themselves of the opportunity to visit and inspect the School. A special train provided by the Board of Management carried the visitors to Mimico. On the arrival of the train the band of the School led the procession of visitors to the grounds.

The boys were drawn up in line and under the directions of the drill instructor gave a highly creditable exhibition of their proficiency in drill. Many were the complimentary remarks as they marched past.

After inspecting the boys, the visitors were led by Mr. W. H. Howland to the spot where it is proposed to erect a workshop. Mrs. Grace E. Denison, preformed the pleasing duty of turning the first sod for the building.

The visitors were then given half an hour to visit the various cottages.

The meeting was then organized in the school-room which was tastily decorated with work of the boys. Mr. Alderman Irwin occupied the chair. Rev. John Mutch opened the meeting with prayer.

Mr. W. J. Hendry read the report of the Board of Management.

Mr. Beverley Jones read the financial statement and the auditors report.

Mr. Howland read the report of the Superintendent.

Dr. J. M. Cotton read his report of the health of the School.

The reports were adopted on motion of Mr. Howland, seconded by Mr. Beverley Jones.

Mr. R. S. Baird moved, and Mr. Alderman Score seconded, the

appointment of the Board of Governors and the Board of Management for the ensuing year.

The meeting was closed with the benediction.

The visitors were then invited to partake of a lunch provided by the Superintendent.

ANNUAL REPORT 1890.

The Board of Management of the Industrial School Association, in presenting their Fourth Annual Report have, in the first place, to thank God, the Author and Giver of all good things for the blessings showered upon the work during the past year.

Three years ago at this time we reported that we had 33 boys under our charge. Now we have to report that our numbers have grown to 146 boys, and that 40 boys have gone out from the school to work and to homes, nearly every one of whom is doing well and greatly benefitted by his stay in the school.

The success that has attended the Boys' School and the pressing need for a similar school for girls, have induced your Board to widen the scope of the work. Arrangements have accordingly been made for the early inception of a Girls' Industrial School. Fifty ladies have been added to the Board of Governors of the Association. The Board of Management has been enlarged by the addition of ten ladies. The Mayor of Toronto, the City Treasurer, the Chairman of the Executive Committee of the Council, and the Chairman of the School Management Committee, have been made *ex-officio* members, and the City Council may elect three representatives instead of two as heretofore. The ladies of the Board have been constituted a Committee to direct the affairs of the Girls' School, and a sub-Committee of the gentlemen has been appointed to direct the Boys' School. Each Committee is required to report the action taken to the Board of Management for

confirmation. The Committee of ladies has energetically set to work, and that the importance of the work is growing in the public estimate is shown by the fact that during the past year, the School received a legacy of \$1000 from a friend unknown to any member of the Association, who lived in the wilds back of the City of Belleville, and who only knew of the School by reputation. We have also to acknowledge the receipt of two large donations, one of \$1000.00 from Mr. Henry Goulding, and one of \$500.00 from Messrs. Northrop & Lyman ; also many smaller donations, evincing thereby the interest the public feel in the School.

To the Government of Ontario we are indebted for a grant of \$6000.00, on capital account, in addition to the \$2,500.00 on maintainance account. The most gratifying evidence, however, of the high opinion formed of the School and its work, is the fact of the citizens of Toronto voting \$40,000.00 to the Association, \$20,000.00 for the Boys' School and \$20,000.00 for the Girls' School, which will net to each, after disposing of the bonds, about \$18,600.

The fact that these by-laws are the only money by-laws which have received the approval of the people during the year, shows that the ratepayers are not insensible to the advantages arising from Industrial Schools.

Notwithstanding our success so far, we have still to face the difficulty that there are a large number of boys who should be in the School, who are not here. Two more cottages are needed to accommodate those who are to-day on the list of applicants, and our funds are nearly all gone in connection with the buildings and improvements now in progress.

This Association has also a difficult position to hold, to adjust the difference between the Province and the City. The City is inclined to think that the Government should give more support to the School, as it has a tendency to prevent boys going to the Reformatory at Penetanguishene, where they cost the Government about \$3.50 per week to maintain. The Government on the other hand, are inclined to look upon the School as any ordinary charity. They say Toronto absorbs more than her proportion of money voted for charities. Last year the Government gave us a

grant equal to 60 cents a head per boy per week on maintenance. This would be for 12 boys here what it would cost the Government for two boys at the Reformatory. So far we have adjusted the respective claims of the City and of the Province by reserving twenty-five per cent. of the room for boys outside of Toronto. This the Board thinks is about fair, and seems to be satisfactory both to the Ontario Government and the City authorities.

The Board while gratified for our great success in the main object in improving and up-rearing the boys, must admit that there are many shortcomings which they require time, patience and money to remedy; and while the School is continually building and extending, still many things must look unfinished and incomplete. The necessity of training all our officers makes it also necessary for us not to be too exacting about minor details so long as faithfulness is maintained.

The Board desires to express their appreciation of the kindness of the public in the past, and they trust that the great needs of the School may induce many kind hearts to give liberally for what we may safely say is, in the main, a successful method of redeeming poor lads and girls from almost certain misery and ruin.

W. H. HOWLAND,

Chairman Board of Management.

W. J. HENDRY,

Honorary Secretary.

REPORT OF THE SUPERINTENDENT.

To the Board of Management, Victoria Industrial School.

GENTLEMEN.—I submit the following report of the Victoria Industrial School for the year ending 30th September last :

Number of pupils on the roll, 1st October, 1889.....	108	
Admitted during the year.....	63	
	—	171
Went to farms.....	6	
“ “ trades.....	8	
“ “ other work.....	2	
Returned to their homes.....	2	
Transferred to Penetanguishene.....	1	
Deserted from school.....	1	
Deserted from situations in which they were engaged on probation.....	2	
Died.....	1	
	—	24
On the roll 30th Sept., 1890.		147

Of the 24 who left during the year, I am satisfied that 14 will do well. I feel sure that four of the others left the school meaning to do well—but they are of such weak natures that some of them may, very possibly, yield to temptation. As to the four deserters even, I should be very loth to believe, that when they left us they left behind them all good influences.

I very much regret that we cannot send all or nearly all our boys to the country; but three-fourths of them come from the city and the drawings of “Home, Sweet Home” are strong.

Of the Boys on the roll, the

City of Toronto sends.....	108
County of York.....	11
“ Ontario.....	5
“ Simcoe.....	5
“ Oxford.....	3

County of Brant.....	3
“ Welland.....	2
“ Lincoln.....	2
“ Norfolk.....	1
“ Peterborough.....	1
“ Hastings.....	1
“ Elgin.....	1
“ Peel.....	1
“ Middlesex.....	1
“ Perth.....	1
“ Waterloo.....	1

—147

They are of the following ages :

From 7 to 9 inclusive.....	12
“ 10 to 12 “.....	52
“ 13 to 15 “.....	83

—147

They are employed as follows :

On the farm.....	20
In the carpenter shop.....	11
“ tailor shop.....	13
“ laundry.....	17
“ kitchen, &c.....	15
“ dining-room and house work.....	11
“ superintendent's office and store-room.....	1
“ cottages (house work).....	59

—147

This is the present division of labor. In the winter more boys work inside, as there is less work to be done on the farm.

Their time is spent as follows :

In manual labor in the several departments....	4½ hours
“ the school of letters.....	2½ “
“ play out of doors.....	2½ “
“ washing, dressing, meals, etc.....	2½ “
“ Bible reading and devotional exercises.....	1 hour
“ reading and recreation in cottages.....	1 “
“ sleep.....	10 hours

In the summer time this programme is slightly varied.

The School of Letters.—So we may term the department in which are taught the “three R’s”—for we aspire no higher. Here all is satisfactory. What is taught is well taught, and nothing is better taught than self-government. Only two whippings have been administered in the year, and yet the discipline is as thorough as I have ever seen. The completion of our new school-house will give us every facility for further improvements.

The Farm.—A commodious barn, a silo and a large root-house, have given us much needed accommodation. We have planted about two acres of small-fruits, and 2,000 seedling shade-trees; we are progressing with the under-draining on our land. More than half the farm has been thoroughly manured, and the Farm Report appended, shows that the soil has responded most liberally. Although our efforts have been almost entirely directed to what is useful and profitable, the beautiful has not been entirely neglected. Sixty-four of our boys have flower beds which they cultivated during their play-hours, and the taste exhibited by the majority of them is most gratifying. If we had a green-house we could train some of them to be excellent gardeners.

The Carpenter Shop.—Here some very satisfactory work has been done by our young mechanics, especially towards the close of our year. It is well that every boy should learn to measure accurately and to handle tools with care. We do our own repairs, and even undertake small buildings, but the training of the boys in the use of tools and of their hands, is our main object. A summary of the work is to be found in the appended schedule. Had we a larger shop, we might do more work and train more boys.

The Tailor Shop.—Here too we have been cramped for room, but the Instructor’s report shows more work done by fewer boys than last year. Our accommodation is somewhat improved, so that when winter comes we may draft boys from other departments.

The Kitchen and Dining Room.—During the past year we have produced and used more milk and vegetables than formerly, and hence the cost of provisions purchased has fallen to 56½ cents a week, or about 8 cents a day per boy. In the appended schedule this cost is analyzed. * The boys’ faces will tell how the food agrees with them.

* Besides the ordinary cooking, three boys bake all the bread, averaging 500 loaves a week, and make most of their own butter, averaging of late about 37 lbs. and for the whole year 17½ lbs. a week.

The Laundry.—The work here is the least relished by the boys, and here we therefore place the “new boys,” who are strong enough, and they must earn their way out by good conduct and industry. When a boy “runs away” he is generally sent back to the laundry to work his way up again. Four months ago the laundry instructress was relieved from ordinary housework, and since then the improvement in discipline has been most gratifying. The Laundry, the School of Letters, and the Tailor Shop are the only three departments in the school where all, or most of the work can be done under the eye of the instructor, and in these departments, as might be expected, the training is most thorough and the discipline most exact.

The Cottages.—Here our smaller boys are taught to do something, and in proportion to their age, their strength and their wisdom, they perhaps do as well as older folk. They make beds, scrub, sweep, dust, mend, darn and knit. One cottage boy has knit seven pairs of long stockings since March last, besides doing his regular cottage work.

Religious Teaching.—This takes a high place in our work. Two half hours daily are spent in family worship—Bible reading with conversational exposition, singing and prayer. The boys attend the Village Church, and Sunday School is conducted in our own School-room by myself with the assistance of Mrs. Inglis, Miss Sanderson, Miss McKinnon, Miss Miller and Mr. Burgess.

Amusements.—Our boys play all games as they come in season. When the International League collapsed, they at once dropped base ball, and declared there was no game like lacrosse. Five of them became members of the village lacrosse club and practised with them twice a week. All of these played with the club at different times in matches with the Hamilton Y. M. C. A. Club, and with four Toronto clubs. This is one incident among the many that go to show how little of the prison there is in our school. The annual games instituted last year by the permanent residents and summer sojourners of the village, were again a grand success. Over \$100 worth of prizes were distributed and henceforth the boys will count “Games’ Day” their summer Christmas.

Our Friends.—Those who work for us; those who give to us; those who speak well of us. Those whose talks and readings made last

Winter's Saturday afternoons so pleasant ; those to whose exertions we owe our Midsummer Games Day, those ladies—of St. Peter's Church to again—whose own hands made so many garments for our boys ; those who gave for games, for prizes for Christmas, and those to whose kindly words we owe the generous vote of the Citizens in August—to all of them on behalf of my boys I tender our warmest thanks.

Our Boys.—Let me answer questions often asked. Are they mischievous? Delightfully so. Sharp? Try them. Hot-tempered? Sometimes ; but when a boy learns to keep his hands off the football or go "out," he also learns to keep his hands off other boys when he is angry. Not once a month does it come to blows. Disobedient? Certainly—if you don't expect obedience. Self-willed? The boy who is not will make a "mouse of a man." Selfish? Watch them when the baskets come on "Visiting Day." See the boy who has a mother (and therefore a basket) "divvy" with the boy who has neither. Sulky? Almost never. I have never known a boy punished one day refuse me a smile the next. Deceitful? Oftener than I could wish, but when we remember the "schemes" of our own school-days we can forgive them. Liars? By no means. They may give a false color to the truth, but a "straight" lie is rare indeed. I never before knew boys so ready to "own up." Thieves? Not at all. They have stolen, doubtless, but which of has not? Ask our mother's sugar-bowls and our father's apple-trees of the good old days. To call a boy a thief because he has stolen is much more logical than charitable. Every boy is born a communist. He believes by instinct in the fatherhood of God and the brotherhood of man, and by instinct he likewise believes that all is his that he can reach. Only by good training can the child be brought to understand it wrong to consider "all things common," and good training most of our boys have none till they come here. Hopelessly bad through hereditary tendencies? In very few cases. Our boys have all their fair share of "Original Sin" ; some have more ; a very few are physically, mentally and morally incapable of conversion into really useful citizens. But a bad man's son (not the descendant of evil generations) well-trained, will in most cases do better than a good man's son ill-trained. I am

not so sanguine as to expect ninety per cent. of our boys to make good men, but I do think two out of every three will turn out well. Will they ever be worth what they cost? First tell me what a saved life is worth! Such generous, open-hearted, plucky, tricky, out-and-out boyish boys, you couldn't know without loving, and love asks no such questions. I have been with them now two years, and every day they seem more lovable if not so very much less troublesome. Have we room for all that ask admission? As one goes out we take another in, but we are always crowded. Then why not enlarge? We do as we get the money, but we shall soon be as large as one school should be. Three more cottages will give us room for 250 boys. The Province needs half-a-dozen schools like ours—Farm Schools, Trade Schools and Little Boys' Schools. The Queen City has led the way; Ontario is rich; its people are liberal; why delay?

Respectfully submitted,

DONALD J. MCKINNON,

Superintendent.

MIMICO, 30TH SEPT., 1890.

PHYSICIAN'S REPORT.

To the Board of Management, Victoria Industrial School :

GENTLEMEN,—I have the honor to present my Third Annual Report of the Victoria Industrial School.

Fifty-two visits were made during the year ending Sept. 30th.

We have had an average attendance of one hundred and sixteen boys, and you will notice from the table below we have had comparatively little sickness. A number of cases, such as colds, slight abrasions, etc., etc., not of a serious nature, but requiring some little attention promptly, are not mentioned in table.

Tabulated we had

Incipient hip joint disease	1 Case.
Pneumonia—Inflammation of lungs	1 "
Acute intestinal catarrh	8 Cases.
Acute orchitis (from injury)	2 "
Impetigo contagiosa	20 "
Tinea tonsurais (ringworm of scalp), imported	2 "
Conjunctivitis (inflammation of eyes)	10 "
Obscure brain disease	1 Case.

The first and last cases were sent to the Hospital for Sick Children, where treatment could be carried out more efficiently. The former recovered, but the latter case died. This is, I believe, the first death since the opening of the Institution.

A few boys only escaped the disease known as "La Grippe," that was epidemic during the past winter.

They all recovered without complication. Not so the officers, who had their duties to perform, and for which reason could not take such care of themselves as the boys were made to do.

The care exercised in the preparation of the good wholesome food that the lads consume is one of the factors towards the small amount of sickness we have had.

It is a noticeable fact that for a week or so after the numerous "feeds" given to the boys by the kind friends of the School, when they have sweetmeats, nuts, etc., etc., *ad lib.*, we have always a greater number on the sick list.

Our genial Superintendent, Mr. McKinnon, is becoming quite an adept both in diagnosis and treatment, and with the aid of the telephone we can do the work much more promptly and with greater ease than formerly.

I would like here to acknowledge, and also thank the officers for their kind interest and care for the lads under their respective charge, at all times, and more especially when ill.

In a previous report I suggested the necessity of a more perfect system of isolating cases of contagious disease. I would again further emphasize the want of such space.

Respectfully submitted,

Yours very truly,

J. M. COTTON
