THE  
MONTREAL  
ALMANACK,  
FOR THE YEAR OF OUR LORD  
**1822:**

CALCULATED FOR THE MERIDIAN OF MONTREAL,  
LATITUDE 45° 30' NORTH.  
Longitude 73° 22' West of the Royal Observatory, Greenwich.

BY SOLOMON BINGHAM, A. M.

True! wond'rous man, can mount where Science guides;  
Can measure Earth, weigh Air, and state the Tides:  
Instruct us in what Orb the Planets roll;  
But—Can he trace the movements of the Soul?

MONTREAL:

PRINTED BY NAHUM MOWER,  
And Sold by the different Booksellers in this city.

Price 9 Dollars per Groas; 4/3 per Dozen; and 7/4 Single

*P. Wellbrenner*

## EXPLANATION OF ASTRONOMICAL CHARACTERS.

## ECLIPSES IN THE YEAR 1822.

February 6th. the Moon will be visibly eclipsed, as follows, viz :

Beginning of the Eclipse,	0h. 21m. 0sec.	}	Morning.
Ecliptical Opposition,	0h. 47m. 30sec.		
Tabular Opposition,	0h. 51m. 40sec.		
Middle of the Eclipse,	0h. 55m. 30sec.		
End of the Eclipse,	1h. 31m. 00sec.		
Duration.	1h. 10m. 00sec.		

Digits Eclipsed  $4\frac{1}{4}$  on the ☾'s Lower Limb.

February 21st. the Sun will be visibly Eclipsed as follows, viz :

Beginning of the Eclipse,	2h. 1m.	}	Evening.
Greatest Obscuration,	2h. 45m.		
Middle of the Eclipse,	2h. 55m.		
Tabular Conjunction,	2h. 56 $\frac{1}{2}$		
Ecliptical Conjunction,	3h. 00m.		
End of the Eclipse,	3h. 29m.		
Duration of the Eclipse.	1h. 28m.		

Digits Eclipsed  $6\frac{3}{4}$  on the ☉'s Northern Limb.

August 2d, the Moon will be visibly Eclipsed as follows, viz :

Beginning of the Eclipse,	6h. 37m. 30sec.	}	Evening.
Ecliptical Opposition,	7h. 30m. 00sec.		
Tabular Opposition,	7h. 33m. 38sec.		
Middle of the Eclipse,	7h. 37m. 30sec.		
End of the Eclipse,	8h. 37m. 30sec.		
Duration of the Eclipse,	2h. 00m. 00sec.		

Digits Eclipsed on the ☾'s Upper Limb  $8\frac{1}{2}$ .

August 16th, at 6h. 15m. 38sec. afternoon, the Sun will be Eclipsed invisibly at Montreal. The ☾'s Penumbra falls on the Southern and Western Hemisphere.

N. B.—In the columns of the Moon's rising and setting, the small *m* stands for morning or forenoon, and the small *a* for afternoon.

### *Explanation of characters, &c. in the Calendar pages.*

☾ Moon Apogee signify that the Moon is then fartherest from the earth.

♌ Opposition. A planet is said to be in opposition when it is on the side of the earth opposite to the sun. When a planet is in opposition it rise about the time of the sun's setting, sets about the time of his rising, and is on the meridian at midnight.

Aphelion is that point of a planet's orbit which is at the greatest distance from the sun. ♋ Nodes are the two points where the orbit of a planet seems to intersect the ecliptic. That where the planet appears to ascend from the south to the north side of the ecliptic, is called the ascending node; the opposite point, where the planet appears to descend from the north to the south, is called the descending node.

Longitude of a planet is its distance from the beginning of Aries,

reckoned on the ecliptic to the east. *Latitude* of a planet is its distance from the ecliptic either north or south.

*Stationary.* A planet is said to be stationary when to an observer on the earth, it appears for some time in the same point in the heavens.

*Direct.* The motion of a planet is said to be direct, when it moves forward to the east, according to the order of the signs. *Retrograde,* is when a planet appears to move backward, or contrary to the order of the signs.

*Occultation* is the obscuration or hiding from our sight of any star or planet, by the interposition of the body of the Moon or some other planet.

○ *Conjunction.* Two heavenly bodies are said to be in conjunction when they are both on the same side of the earth. When two planets are in conjunction they rise, come to the meridian, and set at the same time.

○ *Greatest Elongation* of an inferior planet, when the planet appears to be at its greatest distance either east or west from the sun, that can be in that revolution.

#### THE SUN TOO FAST OR TOO SLOW.

Most people suppose, that the Sun's apparent motion in the heavens is always; viz. there is always exactly 24 hours betwixt the instant of the Sun's leaving the meridian and his returning to the same meridian again. But this is an entire mistake; "For sometimes the sun revolves from the meridian to the meridian again in somewhat less than 24 hours; and at other times in somewhat more: so that the time shown by an equal going clock and a true sun dial is never the same but on the 14th of April, the 15th of June, the 31st of August and the 23d of December. The clock, or watch, if it goes equally and truly all the year round, will be before the sun from the 23d of December to the 14th of April; from that time to the 15th of June, the sun will be before the clock; from the 15th of June till the 31st of August the clock will be again before the sun; and from thence to the 23d December the sun will be faster than the clock." Betwixt these four periods of the year, the sun is about one half of the time, moving gradually faster and faster every day; and the other half of the time, slower and slower. The greatest difference of his motion from mean equal time is 16 minutes. Many people, not understanding this unequal motion of the sun, are continually regulating their clocks and watches to make them keep pace with the sun; which is totally impossible.— By this constant regulating many good clocks and watches are spoiled.

#### THEOLOGICAL ESTIMATE OF THE WORLD.

DIVIDING the inhabited world into 30 parts, it is calculated that 19 parts are possessed by Pagans, 6 by Jews and Mahometans, 2 by Christians of the Greek Church, 3 by Church of Rome and Protestants. It is supposed the inhabitants of the world amount to 800 millions; 440 millions of whom are in Pagan darkness; 130 millions Mahometans; 120 millions Catholics; 65 millions Protestants; 44 millions of the Greek and Armenian Churches and about one million of Jews.

*A Preparation to preserve Wood from catching Fire, and to preserve it from Decay.*

A member of the Royal Academy at Stockholm, says, in the memoirs of that academy, "Having been within these few years to visit the alum mines of Loswers, in the province of Calmar, I took notice of some attempts made to burn the old staves of tubs and pails that had been used for the alum works. For this purpose they were thrown into the furnace, but those pieces of wood which had been penetrated by the alum did not burn, though they remained for a long time in the fire, where they only became red; however, at last they were consumed by the intenseness of the heat, but they yielded no flame."

He concludes from this experiment that wood or timber, for the purpose of building, may be secured against the action of fire, by letting it remain for some time in water, wherein vitriol, alum, or any other salt has been dissolved, which contains no inflammable parts.

To this experiment it may be added, that wood, which has been impregnated with water wherein vitriol has been dissolved, is very fit for resisting putrefaction, especially if afterwards it is brushed over with tar, or some kind of paint; in order to this, the wood must be rubbed with very warm vitriol water, and afterwards left to dry, before it is painted or tarred. Wood prepared in this manner will for a long time resist the injuries of the air, and be preserved in cellars and other low moist places. It is to be observed, that if a dissolution of vitriol is poured on such parts of timber where a sort of champignons are formed by moisture, and rubbed off, none will ever grow there again.

---

*Composition that will effectually prevent Iron, Steel, &c. from rusting.*

This method consists in mixing, with fat oil varnish, four-fifths of well rectified spirit of turpentine. The varnish is to be applied by means of a sponge; and articles varnished in this manner will retain their metallic brilliancy, and never contract any spots of rust.— It may be applied to copper and to the preservation of philosophical instruments; which, by being brought into contact with water, are liable to loose their splendour, and become tarnished.

---

*Permanent Ink for marking Linen.*

Take of lunar caustic, (now called *argentum nitratum*) one dram; weak solution, or tincture of galls, two drams. The cloth must be first wetted with the following liquid, viz. salt of tartar, one ounce; water, one ounce and an half; and must be perfectly dry before any attempt is made to write upon it.

*Weight and Value of Gold Coins Current in this Province in Currency, and Livres and Sols.*

# MARCH hath 31 days.

1822.

Piping in our ears—  
 The blustering herald of the advancing Spring,  
 Breathes forth his clamors; promising  
 When his career is past, the lovely bloom  
 Of ever-fragrant May.—

- ☉ Full Moon, 7th day, 3h. 24m. evening.
- ☾ Last Quarter, 15th day, 2h. 50m. evening.
- ☽ New Moon, 23d day, 2h. 16m. morning.
- ☽ First Quarter, 30th day, 4h. 59m. evening.

1822.

APRIL hath 30 days.

Mindful of disaster past,  
 And shrinking from the northern blast,  
 The sleety storm returning still,  
 The morning hoar, and evening chill;  
 Reluctant comes the timid spring.

- ☉ Full Moon, 6th day, 7h. 41m. morning.
- ☾ Last Quarter, 14th day, 9h. 51m. morning.
- ☽ New Moon, 21st day, 11h. 20m. morning.
- ☽ First Quarter, 28th day, 11h. 35m. morning.

MAY hath 31 days.

1822.

The solemn murmur of the wood;  
 The bee in yonder flowery nook,  
 The chiding of the headlong brook,  
 The green leaf quivering in the gale,  
 The warbling hill, the lowing vale,  
 These are the charms.

- ☉ Full Moon, 5th day, 11h. 50m. evening.
- ☾ Last Quarter, 13th day, 9h. 50m. morning.
- ☽ New Moon, 20th day, 7h. 50m. evening.
- ☽ First Quarter, 28th day, 5h. 44m. morning.

1822.

JUNE hath 30 days.

See! the teeming months advance;  
 The field, the forest, green and gay,  
 The dappled slope, the tedded hay!  
 See! the reddening orchards blow,  
 The harvest wave, the vintage flow.

# JULY hath 31 days.

1822.

Ever charming, ever new,  
 When will nature tire the view!  
 The fountain's fall, the river's flow,  
 The woody vallye's warm and low!  
 The windy summit wild and high  
 Rudely rushing on the sky!

- ☉ Full moon, 4th day, 6h. 18m. morning.
- ☾ Last Quarter, 11th day, 7h. 54m. morning.
- New Moon, 18th day, 9h. 31m. morning.
- ☽ First Quarter, 25th day, 8h. 32m. evening.

1822.

AUGUST hath 31 days.

But now the sun with noontide ray,  
 Flames forth intolerable day!  
 While heat sits fervent on the plain,  
 With thirst and languor in his train,  
 All nature sickening in the blaze.

- ☉ Full Moon, 2d day, 7h. 55m. evening.
- ☾ Last Quarter, 9th day, 6h. 55m. evening.
- New Moon, 16th day, 6h. 16m. evening.
- ☽ First Quarter, 24th day, 6h. 51m. evening.

SEPTEMBER hath 30 days 1822.

The forest trees see how they court  
 The zephyrs as they stray,  
 And every breeze with which they sport  
 Scatters a leaf away.

- ☉ Full Moon 1st day 7h. 25m. morning.
- ☾ Last quarter 8th day 6h. 25m. morning.
- ☽ New Moon 15th day 5h. 54m. morning.
- ☽ First quarter 22d day 11h. 49m. morning.
- ☉ Full Moon 30th day 6h 17m evening.

# OCTOBER hath 31 days

1822.

How dearly that hollow blast  
Raved round the mountains hoar,  
Ruffled the waves, in fury passed  
The heath, and was no more.

Presage of winter! comest thou not to bring  
 His icy reign? the forest speaks thy power;  
 And the chill air benumbs the genial glow:  
 But short the space, and he, the despot of the year,  
 Shall spread his chains o'er nature's yielding bosom.

# DECEMBER hath 31 days

1822

Oh winter! ruler of the inverted year,  
Thy scattered hair with slut-like ashes fill'd,  
Thy breath congeal'd upon thy lips, thy cheeks  
Fringed with a beard made white with other snows  
Than those of age.

Men from Europe and from the States, who have come into Lower Canada for the purpose of farming, have generally been disappointed and totally failed in their expectations. The reasons are these.—These men have adopted the same system of agriculture, that is practised in the climate from which they came, and have attempted to raise the same crops. Nothing can be more futile, than this mode of procedure. Winter Wheat and Indian Corn will not succeed in Lower Canada, but little better than would the Cotton plant, or West Indian Sugar cane. Still many farmers from the States' persist in their attempts to raise Indian Corn; and are uniformly disappointed of a crop by means of the early frosts in August and September.—Another mistake of these men is, that they universally despise the French husbandry. This is a very fatal error. The French have lived more than two centuries in this country, and certainly understand the climate and soil, and the husbandry suited to it, much better than foreigners. If a stranger comes into this province to get his living by farming, he ought to make himself well acquainted with the French mode of tillage, and the kinds of produce they raise. I have no idea, that the French husbandry is perfect; without doubt great improvements may be made in it: but it is clearly the best for this climate and soil of any yet known. As relates to the two grand objects, market and soil, Lower Canada is, to say the least, as good as any tract of country in North America. All that is wanting is a proper husbandry. I believe the crops most likely to succeed, are spring wheat, rye, barley, oats, buckwheat, peas and potatoes. The land, which is intended for sowing or planting the next spring, ought by all means to be well ploughed the summer or fall before, that the seed may be put into the ground very early in the spring. This is all important. Even buckwheat which is usually put off till July, ought to be sowed by the first of June, that it may be out of the way of the early frosts.

English grasses flourish in this Province; and certainly all that hilly country which composes the southeastern part of the Province, is one of the best tracts of land in the world for grazing, for raising cattle and for dairies. It is much better, than the adjacent parts of Vermont and New Hampshire, as being not so mountainous.

I do not pretend to be master of the subject here treated of; my main object in these hints is, to rouse the attention of farmers and landholders to a subject so deeply interesting.

**RECEIPTS.**

*Methods of stopping the Ravages of the Caterpillars from Shrubs, Plants, and Vegetables.*

Take a chafing-dish, with lighted charcoal, and place it under the branches of the tree, or bush, whereon are the caterpillars;

then throw a little brimstone on the coals. This, however must be done in very small quantities, lest the sulphur destroy the plants. The vapour of the sulphur, which is mortal to these insects, and suffocating fixed air arising from the charcoal, will not only destroy all that are on the tree, but will effectually prevent the shrubs from being, that season infested with them. A pound of sulphur will clear as many trees as grow on several acres.

*To preserve Flowers, Leaves, and Fruit, from Catterpillars.*

These depredators are destroyed by oils, which close the lateral pores by which they breathe. For this purpose it is advised, that on the approach of spring, a cloth dipped in train oil, be laid on such parts of the tree in which there is the least appearance of them.

#### TO DRIVE AWAY CRICKETS.

These troublesome insects, from a superstitious notion that they bring good luck, are frequently preserved. Those who wish to have them removed will find the smoke of Charcoal destroy them, and loud sounds drive them away. Cock roaches are likewise destroyed by the smoke of charcoal.

*To destroy Crickets.*—Mix some roasted apple with a little white arsenic powdered, and put a little of this mixture into the holes or cracks in which the crickets are; they will eat it and perish.

#### REMEDIES AGAINST FLEAS.

Fumigation with brimstone, or the fresh leaves of penny-royal sewed in a bag, and laid in the bed, will have the desired effect.

#### TO DESTROY FLEAS ON DOGS.

Rub the animal, when out of the house, with the common Scotch snuff, except the nose and eyes. Rub the powder well into the roots of the hair. Clear lime-water destroys the whitish flea-worm without injuring the skin or hair. Oil of turpentine will likewise do so; but if there be any manginess, or the skin be broken, it will give the animal much pain.

#### HOLY DAYS OF THE CAURCH OF ENGLAND.

MANY people, in examining the Calender pages of their Almanacks, find several words or phrases there, which they do not understand; particularly the names given to certain days; which days the Church hath appointed to be observed as fasts or feasts. To obviate this difficulty, it is hoped, that the following short explanation of those terms will prove acceptable.

*Advent Sunday.* Advent signifies, a coming; viz. the coming of Christ in the flesh. The Sundays in Advent are the four Sundays that precede the great festival of Christ's Nativity or Christmas; and are appointed by the Church as a preparatory season for the

celebration of  
ces at this tim

tion of the sufferi

*Good Friday.*  
which we derive

celebration of that great event. The ecclesiastical year commences at this time, and the Church then begins the annual course of her Services or Liturgy.

*Christmas Day*, December 25. This is the birth day of our Saviour Jesus Christ. This day has been celebrated by Christians as a festival from the earliest ages of christianity.

The *Circumcision*, January 1st. The Church this day celebrates the Circumcision of our Lord Jesus Christ, who when eight days old, subjected himself to this Jewish rite.

The *Epiphany*, January 6. The word signifies, a manifestation. This day is celebrated in commemoration of Christ's manifestation to the Gentiles.

*Septuagesima, Sexagesima, and Quinquagesima Sundays*; That is to say, the seventieth, sixtieth and fiftieth day before Easter. The design of the Church in these Sundays is, to call us from the feasting and joy of Christmas to prepare for the fasting and humiliation proper for the approaching season of Lent.

*Shrove Tide*; The Tuesday before lent, the time of forgiving and confessing sins.

*Lent*. This is a season of forty days before the festival of Easter. This season is appointed by the Church for fasting and humiliation.

*Purification of the Virgin Mary, or Feast of Candlemas*, February 2. By the Mosaic Law, a woman after the birth of a male child, was unclean forty days, of a female child eighty days; at the expiration of which time she was to offer the lamb and a pidgeon or turtle, when the priest prayed that she might be purified: the Virgin Mary, after the birth of Christ, having complied with the law therein, the Church annually solemnizes this day in commemoration thereof. The purification also more properly refers to Christ's presentation in the Temple.

The *Annunciation*, or delivering of a *Message*. It is applied to *Lady Day*, March 25, from the Angel Gabriel's message to the Virgin Mary, that she should be the mother of Christ. It also more properly refers to Christ's incarnation.

*Ash Wednesday*, or first day of *Lent*. This name is derived from the custom, that prevailed in the primitive Church, for penitents at this time to express their humiliation by lying in sackcloth and ashes.

*Midlent Sunday* is the fourth Sunday during the season of Lent. *Palm Sunday* is the Sunday next before Easter; an appellation in commemoration of our Saviour's triumphal entry into Jerusalem; when the multitude, that attended him, strewed Palm branches in his way.

*Passion Week*. The week next before Easter has received this appellation, because it is particularly devoted to the commemoration of the suffering and death of Christ.

*Good Friday*. This day is so called from the exalted good, which we derive from the suffering and death of Christ: who, by

shedding his own blood, obtained eternal redemption for us. His crucifixion was on this day.

*Easter Even.* The Church on this day commemorates the state in which our Saviour was between his death and his resurrection; namely his decent into hell, or the place of departed spirits.

*Easter Sunday.* This is the great festival which is celebrated in commemoration of that most joyful event of Christ's resurrection from the dead, and has been observed by the Church from the first age of Christianity to this time, and ever will be.

*Easter Monday and Tuesday* and the *Sundays* after Easter, all relate to the same great event of the resurrection of Christ, and the promise of the Comforter.

*Rogation Days* are the Monday, Tuesday and Wednesday before our Lord's Ascension into heaven. Rogation signifies a petition or supplication. The Church enjoins the observance of these days, not only to prepare us properly to celebrate our Saviour's Ascension into heaven, but also to appease God's wrath, that so he may be pleased to avert the Judgments, which our sins have deserved; and that he may vouchsafe to bless the fruits with which the earth is at this time covered.

*The Ascension of our Lord, or Holy Thursday.* The commemoration of Christ's ascension into heaven, at the expiration of forty days after his resurrection, has always been observed as a festival in the Church.

*The Sunday after Ascension.* The Service of this day relates to predicted descent of the Holy Spirit, the fulfilment of which is commemorated on the ensuing Sunday, viz:

*Whit Sunday.* The Church in the festival of this day commemorates the gift of the Holy Ghost, who this day visibly descended upon the Apostles. This festival corresponds to the feast of Pentecost among the Jews.

*Monday and Tuesday* in the Whitsun Week. These days are appointed by the Church for offering up our praises and thanksgivings to God for the display of his grace and mercy in the Gospel; which Gospel was confirmed by the descent of the Holy Ghost on the day preceding.

*Trinity Sunday* is the next Sunday after Whit Sunday. A festival, in honour of the Trinity. The Church, in consequence of the heresies of Arius and others, who opposed this divine mystery of the Trinity, thought proper to order that a day should be set apart for the more solemn commemoration of the same.

*All Saints Day, November 1.* On this day the Church celebrates the memories of all those Christians, who have been remarkably distinguished for goodness and piety, and are therefore, by way of eminence, called Saints.

*Ember Days* are set apart for consecrating to God the four seasons of the year; and for imploring his blessing upon the ordinations of such persons as are admitted into the Ministry, which are performed at those times.

All *Fridays* in the year are considered as fasts, excepting Christmas, when it falls on Friday.

The design of various other days, noted in the Calendar pages of most Almanacks, as the conversion of St. Paul, King Charles' Martyrdom, St. Matthias, St. Mark, St. John, &c. &c. is too obvious to require a specific explanation. These days being observed in commemoration of certain great events, or in honour of those Holy Apostles, and other illustrious Christians and Martyrs.

LIST OF NOTARIES IN MONTREAL.

J. Papineau, J. Gerbrand Beek, J. Marie Mondelet, Thomas Barron, Charles Provost, Louis Guy, N. B. Doucet, Louis H. Latour, F. X. Dezery, J. Marie Cadieux, F. G. Lepallieur, Joseph Roi, Joseph Desautels, Thomas Bedouin, Henry Griffin, André Jobin, Paul Edward Daveluy, Charles Desève, P. Lukin.

THE MAILS.

To and from Montreal, arrive and are sent off, to their respective destinations, as follows:—

The Quebec Mail arrives every day in the week, except Sunday and Tuesday; and is dispatched from Montreal every day, except Sunday and Friday, at four o'clock in the afternoon.

The Upper Canada Mail arrives on Wednesdays and Saturdays; and is sent off on Mondays and Thursdays at half-past ten in the forenoon.

The Mail for the Ottawa, or Grand River, arrives every Friday morning; and leaves every Tuesday, at eight o'clock, in the morning.

The Mail for the United States, by way of Swanton, arrives on Friday mornings, and is made up on Saturday at two o'clock in the afternoon;—and that, by way of Whitehall, and to St. John's and Chambly, arrives on Monday and Friday mornings, and is dispatched on the same days at two in the afternoon, except to Whitehall, which goes on Thursdays, at the same hour.

The Mail for Halifax is made up every Monday fortnight—the periods of arrival are uncertain.

Letters for Great Britain, by way of Quebec, Halifax, or New-York, are sent by the regular Mails, to those places; and the postage must be paid on them to such places.

MAIL AND OTHER STAGES.

MONTREAL TO KINGSTON.

*Mail Stage.*—Horace Dickinson, proprietor—leaves Montreal from C. B. Martin's Union Hotel, McGill street, every Monday and Thursday Morning, at eleven o'clock, and leaves Kingston for Montreal on the same days, at the same hour.

MONTREAL TO ST. ANDREWS AND GRANVILLE.

*Stage.*—E. Cushing, proprietor—leaves Montreal, from Cushing's tavern, McGill street, every Tuesday morning at eight o'clock, and arrives in St. Andrews the same day; leaves St. Andrews for Granville next morning, and returns from St. Andrews for Montreal, every Thursday morning.

There is a winter line of Stages to Quebec and the United States, the times of their departure is always announced in the papers.

ANECDOTES.

An Irishman, in France, drinking with some company, who proposed to toast—the land we live in; Aye, with all my soul, my dear here's poor old Ireland.

A captain of grenadiers died some time since in the West Indies, where his remains were followed to the grave by an Irish-servant, and buried with military honors. Upon the last round, poor Pat, who had hith-

erto observed an awful and melancholy silence, loudly exclaimed, Ah! Master Jewel, that's the last shot your honor will ever hear.

The late Mr. Foote used to pass much of his time at the seat of Sir Francis Blake Deleval. During one of his visits, he happened to be looking at some pigs belonging to Sir Francis, which had, a few minutes before, been served with their mor-

ning's meat, spoon among grunting com than common to go and end and not obscried in a pet what a riot th may, you ja they have bu mongst them

The Bishop one day, that in schools did the better, or was insisted t the utmost s must allow th

ning's meat, and perceived a silver spoon amongst their victuals; the grunting community making more than common noise, caused the maid to go and endeavour to silence them: and not observing Mr. Foote, she cried in a pet, Deuce take the pigs, what a riot they make. Well they may, you jade, cried Foote, when they have but one silver spoon amongst them all.

The Bishop of L. and C. declared one day, that the punishment used in schools did not make boys a whit the better, or more tractable. It was insisted that whipping was of the utmost service, for every one must allow that it made a boy smart.

A thief having stolen a cup out of a tavern, was pursued, and a great mob was raised around him. A bystander was asked, what was the matter? 'Nothing; a poor fellow has only taken a cup too much.

A gentlemen one day took occasion to speak of the married state before his daughter, and observed, that she who marries does well, but she who married not does better. Well then (replied the lady) I will do well; let those who choose do better.

A man seeing in the street an old woman who drove some asses, said, Adieu, adieu, mother of asses. Adieu, adieu, my son, answered she.

A person advertising for a horse, thus concludes his advertisement, it would be needless for a Yorkshire jockey to apply, the person who wants the horse being Yorkshire himself.

An Irish sailor having fallen from the mizen top of one of our ships, was supposed by every one on the quarter-deck, to have been killed by the fall; the poor fellow however got up but apparently little hurt. The first lieutenant, who was near him, inquired, Where he came

from? Please your honor replied Paddy, all the while rubbing his arm, I come from the North of Ireland.

A lady of quality said one day to Mr. Quin, Pray, Mr. Quin, do you ever make love? No, my lady, replied he, I always buy it ready made

When the Custom-house corps first made their public appearance, it was observed by one, that they look like Alexanders. Rather say, said another, they look like *Seizers*.

Lord Evelyn Stuart, son of the Earl of Bute, and an officer of the guards, wore long mustachios, and appeared thus in the house of Commons, of which he was a member. One day, Mr. C—y thus addressed him:—'My Lord, now the war is over, won't you put your mustachios on the peace establishment?' 'I do not exactly know whether I shall do that,' replied his Lordship, 'but I would advise you to put your tongue on the civil list.'

A man in Flanders dreamed one night that he was a cuckold, so he went to a priest to desire him to confess his wife, especially in that point. Well, says the priest to him, because you are my loving friend, I will lend you my gown and hood, and you shall take her confession yourself: so while he was waiting for his wife's coming, the priest went and told her the intrigue, and that her husband was to take her confession. When she came to him, after many simple questions that he asked her, she confessed to him, that she had only lain with three men, that was a young man, an old man, and a friar. He came home, as he thought, undiscovered. As he was at work, he would often be crying, the young man, the old man, and the friar. Troth, husband, I believe the priest has told what I confessed to him, and I did

indeed confess so to him, for I did  
 so, I lay with a young man, an old  
 man, and a friar; and yet, hus-  
 band, these three are but one; for  
 I lay with you when your were a  
 young man, and I lie with you now  
 you are an old man, and are not  
 you the friar which I made my con-  
 fession to? Therefore all these three  
 were only you, my dear husband.  
 It is so, honest and chaste wife?  
 Well by my faith, thou hast given  
 me such great satisfaction in point  
 of thy honesty, that I should be  
 both a fool and knave to question  
 it any more.
