## FLOORS

The Eskimo has floors of ice and probably he thinks them nice, and strictly up to date; but if there ever came a thaw they'd be the worst you ever saw and that's as sure as fate.

The Arab has his floors of sand; We have no doubt he thinks it grand, a floor beyond compare; but sand is full of bugs and ants and they climb up a fellow's pants, when he sits in a chair.

The Mexican has floors of dirt and floors of that kind will not hurt, so long as weathers dry; but when there comes a season wet, such floors are not the one best bet, which no one can deny.

In Olden times men built their homes with battlements and towers and stone, and ornaments of gold; but all the floors were made of stone, and they made people sigh and groan, they were so hard and cold.

And then with rushes they were strewn to make them warmer to the shoon, and also to the feet, and these stale rushes decay, their scent would drive the folks away, in agonized retreat.

It took uncounted years of toil and planning by the midnight oil to dope out modern floors; the floors on which we dance and walk, and sigh and cuss, and wildly talk of hounders and such bodes.

The floors on which we spend our lives, and train our kids, and pet our wives, are surely handsome things, be they of color light or dark, we proudly view them and remark—

"They are good enough for Kings."

Your mansion might have Jasper walls, the finest paintings in it's halls that artists can produce, and onyx stairs and marble doors, but if it had no modern floors 't would be a poor excuse.

Good Hardwood floors make life a poem, they beautify your happy home as nothing else can do. WE have the best, the years have given it the test that means so much to you.

**RAILWAY UNIONS**

Chief Problem Is Unfairness of Employers To-day He Says.

CARVELL. Ho R. H. A. (Hartland) Montreal, Jan. 10.—The chief problem of Canadian railways to-day is the unfairness of the employers to the employees to do an honest day's work for an honest day's pay, the chairman, Hon. F. H. Carvell, declared at a meeting of the Dominion Railway commission.

The commission was considering the second shift has to do with the inspection of an electric starting system at a crossing of the Grand Trunk railway at Lacine, and it was being shown that as high as twenty-five times as much was spent in inspection

"The railways are in the hands of these labor unions," said Mr. Carvell. "The railway wanted the municipality to pay for the cost of operating the bell, but the commission refused an order because it might become a precedent, though it was clear, Mr. Carvell said, the railway was spending more for its operation than it was worth."

**SHEDIAE TEAM WINS OUT IN FAST GAME ON TUESDAY**

Score 4-3.

Campbellton and Shediac crossed sticks last night on the latter's ice, which was in bad condition, in a closely contested and speedy game. The Shediac team, at home on their own ice got a good start before the North Shore boys could get accustomed to the small sheet of ice on which the game was played and in consequence, the second period ended with a score of 3-1 in Shediac's favor. But the "mucky Scotmen" as their opponents called them, brought in some brilliant work in the last period as they always do and scored twice in rapid succession.

The lineup was as follows:—  
Campbellton:—Smith, Johnson, Matthews, Shediac:—McArthur, Sharpe, Thomas, P. McArthur, C. McArthur, Campbellton Spares:—Wilkins, Ratzy and Laviolette.

**KINGS COUNTY  
LOSES ITS CASE**

Must Pay \$7,500 for Health Purposes Which Council Refused.

Fredericton, Jan. 10.—In an important judgment delivered in chambers here to-day Mr. Justice Barry upheld the legality of the demands made up on the municipality of Kings county by the department of public health for \$7,500, the amounts unpaid by the municipality of the demands of local boards of health for the county, being part of the amount in the estimate for 1920 and the entire amount for 1921.

Amounts for carrying on the work of the board of health in King county, had been borrowed from the provincial secretary-treasurer, and the case has been regarded as a test of the legality of the demands of local boards of health upon municipalities under the provisions of the Public Health Act, 1918, Queen's Kent, Sunbury and other municipalities in the province have similarly refused to pay the demands of the local boards of health under the act and steps to collect have already been taken by the department of public health in some of these cases.

The mill explosion on Wednesday morning at Foreston on the N. T. R., in Carleton county, reported Thursday, was more serious than first reported.

George Howe Dutcher, son of Mr. and Mrs. John Dutcher, of Newcastle, and Harry Dingee, of Foreston, lost their lives and several were injured. The men were employed in the lath mill of Walsh and Fleming and had just begun the day's operation when in some unaccountable manner the boiler exploded, a large piece of which struck Dutcher in the stomach, killing him almost instantly.

Dingee was struck in almost the

same manner and was seriously injured. The explosion and other employees were cut and bruised by the falling materials, among them being Herbert Condon.

## MEETING OF THE BOARD OF TRADE

Matters Relating to Subway, Matapedia Highway and Employment.

A joint meeting of the Board of Trade and Town Council was held last Friday evening. Mr. D. Champoux, president of the board presiding. A large representation was present and the following matters were taken under discussion:—

The Central St. subway project, the Matapedia Valley Highway and the unemployment situation. The proposed subway was discussed first.

Mayor McKay related in detail the progress the council had made thus far in the matter of the proposed subway. The total cost, according to estimates would approximate to \$80,000. Judging from correspondence with the Railway Dept. and Minister of Labor it would probably be necessary to close up three streets, namely, Andrew, Cedar and Prince William. As far as could be seen no immediate move on the part of the railway could be reasonably expected.

After lengthy discussion on the matter a motion to the effect that the subway project be dropped for the present, was made and seconded. At this point several of the business men present spoke in turn and strongly advocated the importance of optimism in this matter. Many instances were cited by the speakers where in the past pessimism on the part of those in power, had not only cost the town unnecessary expense but had also hindered the town's progress. A motion was finally passed to the effect that a committee of three be appointed from the Board of Trade to confer with and assist in so far as possible, the town council, in their efforts to bring the subway matter to a head.

Those appointed to this committee were Messrs. A. D. McKendrick, W. R. Millican and Geo. G. MacKenzie.

The unemployment situation was then debated upon. All seemed of one accord on the point that immediate action should be taken but in the course of the discussion unemployment became badly tangled up with charity and other matters which are a reflex of the present scarcity of work. These various matters were finally segregated however, and a motion passed. This motion called for the immediate establishment of a bureau, in charge of the Town Council, where all men in search of work could register. This provides a means by which those interested in the disposition of this problem, may ascertain the number of unemployed and other matters which are a reflex of the present scarcity of work. These various matters were finally segregated however, and a motion passed. ## IRISH PEACE TREATY APPROVED

Ireland Shall Have Same Status  
As Canada And Other  
Colonies.

Dublin, Jan. 9.—The peace treaty, has been ratified and prayers of thanksgiving sent up from one part in all the churches Sunday, but Ireland continues to face internal disorganization giving rise to the greatest anxiety.

The split in the Dail Eireann has been heightened and intensified by the vote on the treaty and the future was never more obscure. At different hours Sunday the two factions held conferences at the Mansion House.

Subsequently de Valera summoned a meeting for Sunday exclusively confined to the fifty-seven deputies who voted against the treaty and Sunday at the Mansion House prior to the session of his associates he delivered a speech which was a clear indication of his intention to continue the fight this time, apparently not against the British Government but against their provisional government of the Irish Free State which, he said, he regarded as a usurpation and to which the chief objection is that it derives its authority from the British Parliament.

Provisions of Treaty.  
The new regime for Ireland has now been approved by the British Parliament and by the Dail Eireann. Creation of the Irish Free State is provided for in the treaty signed last month in London after prolonged negotiations for a settlement of the Irish problems. Its provisions in substance are:

Ireland shall have the same constitutional status in the British Empire as the Dominion of Canada, the Commonwealth of Australia, the Dominion of New Zealand, and the Union of South Africa.

Ireland shall be known officially as the Irish Free State, with a parliament having powers for the government of the country and an executive responsible to that parliament. Provisional Government to be Set up. A provisional government is to be set up, to function until an Irish parliament and a government of the Irish Free State shall be constituted but not longer than 12 months at the outside. The treaty stipulates that a representative of the Crown shall be appointed for Ireland in the same manner as the Governor-General of Canada.

Ireland is given control over all government affairs and is entitled to an army which shall, however, not be larger in proportion to Ireland's population than the British army is to the population of Great Britain. One of the first steps by virtue of ratification by the Dail, will be the withdrawal of the British forces from Ireland.

Uster is included within the scope of the treaty, provision is made for her to declare herself out within one month after an act of the British parliament ratifying the treaty and to continue under the present regime as provided in the Government of Ireland Act of 1920. In that case, however, a boundary commission is to be named to determine the boundary between northern Ireland and the rest of Ireland. Safeguards for Freedom of Religion and Education.

The Irish Free State will assume what may be decided by agreement or arbitration as a fair and equitable proportion of the public debt of the United Kingdom and is to afford harbor facilities to British naval forces under terms to be fixed by a convention between the two governments. Safeguards are provided for freedom of religion and education within both the Irish Free State and northern Ireland.

When the ratification of the treaty, shall be at a meeting summoned for the purpose of the members elected under the Government of Ireland Act to sit in the House of Southern Ireland. Those members with a few exceptions, are the same as those of the Dail Eireann. The British parliament approved of the treaty last December 16 by adopting the reply to the Speech from the Throne requesting such approval. Various formalities of formal ratification, however, still remain to be complied with in order to conform to the terms of the document.

"When did you get back, Mrs. Smith? Did you have a good time?" "Why, I haven't been away, my dear."

## WHAT CAUSES HEADACHES?

"Fruit-a-lives" Prevents  
Auto-intoxication

Auto-intoxication means self-poisoning. Many people suffer from a condition known as auto-intoxication. Waste matter which should pass out of the body every day, remains and poisons the blood. As a result, there is a build-up of toxins in the blood, which causes rheumatism and other skin diseases. "Fruit-a-lives" will always relieve auto-intoxication as these tablets, made from fruit juices, act gently on the bowels, kidneys and skin and keep the blood pure and rich. 50c a box, 6 for \$2.50, trial size 25c. At dealers or sent postpaid by Fruit-a-lives Limited, Ottawa.

## IMPERATIVE THAT BRITISH REMAIN

Mohammedan Fanatics Will  
Start Most Horrible  
Massacre

"God keeps the British in India, I believe, in behalf of the Hindu masses—so prevent the most horrible slaughter the human mind could conceive." This is the striking way in which Commissioner Frederick Booth Tucker, of the Salvation Army, expresses his view of the present unrest in India, due to teachings of such men as Gandhi, the apostle of non-resistance as a means of obtaining home rule, and brought to a focus point by the visit of the Prince of Wales. Commissioner Tucker was born in India and spent most of his life there, giving himself to the spiritual service of the native people. His views are not those of the official, but of the friend of the people, and therefore of the greatest importance. In an interview in Leslie's Weekly he speaks as follows:

"If Britain's restraining hand were tomorrow morning, the Mohammedan fanatic would start in on a wholesale massacre, and put every Hindu in India to the sword within a week. That is the one most important fact to recognize in talking about any proposal to set up a native government in India.

"For example, you may have read the other day this cable from Calcutta about the situation in Melatani. 'The rebels are offering Hindu the alternative of death of Islam. If the Indians hesitate to choose, they are ordered to dig their own graves. If they refuse to embrace Islam they then are shot and dragged into their graves.' Or you may have seen this one: 'Refugees report that fifty Hindu homes in Thuvur have been burned by rebellious tribesmen and the heads of thirty-four Hindus and two Mohaphs have been severed and thrown into a well. The two Mohaphs were beheaded for helping the British troops, the refugees say.'

"What do these despatches mean? They are tokens, simply, of the smoldering hatred of Mohammedans for Brahmins—of the flame of religious hatred that would consume more than half of the population of India if it were allowed to flare. These massacres are going on every day. The slaughter of British by British troops dissembling a mob was used to discredit British rule. I do not concede that incident, but I tell you that Amritsar—" he paused and suddenly and most unexpectedly smiled—"was a bit like the ocean as compared with what these Moslem fanatics do; and we are not talking at all of the paraded with what they would do if they had the chance.

Where Gandhi Fails.  
Mahatma Gandhi the outstanding leader in the fight for home rule may sincerely believe that the Mohammedans who profess to follow him are honest in their professions of affection for the Hindu. If he does, that is only another of Gandhi's failures to get a grasp of practical affairs. One can respect Gandhi's character and side with him in some of his contentions—as I do myself—and yet see in his leadership great peril if he succeeds beyond a certain point. He can start things that he can't finish. He can incite where he cannot afterward control. Preaching non-resistance, he cannot even now keep his followers in check, and the result of his pacifist speeches has been riot.

"Where he fails is in practicality. There he will always fail, I believe, but before his ultimate failure he may do India some good if he succeeds in creating an economic awakening. 'But even as an economist his principles are not carried out in a practical fashion. He sets bonfires to foreign-made goods and urges his followers to wear only home-made goods. The bonfires are spectacular and call attention to the fact that India without the protection of a tariff has little chance today, while Great Britain and Japan dump their imported goods upon the country. It is a situation to which London long ago should have given heed. But again Gandhi proves himself impractical when he attempts to fight the invasion of foreign goods by setting up by the roadside thousands of hand looms that Noah's family might have used in the Ark. India has the wool and the cotton and the most skillful weavers in the world. She should fight the foreign competition with modern machinery. She should weave enough for her own people and a surplus to sell to the world markets. But it is silly and merely sentimental to attempt to do this with looms that came out of the Ark, and no boyhood of foreign-made goods even can not anywhere until home-made goods can supply the people's actual needs.

"Then there is another factor in the situation that Gandhi overlooks. If Gandhi is unwittingly the tool of the Mohammedans, he also is deceived by wealthy native aristocrats, who are as cruel and rapacious as the worst of the aristocrats of France in the days before the Revolution—again that quick and unexpected flash of a mile to the finish. They have no more real sympathy for the poor than a fanatic Moslem has for a Hindu. Give these aristocrats their way and you soon would see. 'I wonder, too, sometimes, if Gandhi knows about Bolshevik activities in India and sympathizes with them. For example, the shops in Simla suddenly were closed not long ago on a day when a great number of people were coming to town. We investigated and found that these shopkeepers had been forced to close on the orders of their creditors in Delhi. In Delhi we found that money from Stockholm had brought this about—and that money was being sent to Petrograd.

"Now if there is anywhere in the world that Bolshevism isn't in the least needed it is in India, for the smaller communities of India have worked successfully as communes for centuries, each man to his trade, and do and all sharing in the harvest. The best features of the Soviet idea are realized in India and the bad features of the clumsy Russian plan could have no effect but disorganization. The caste system in India operates as a trades union, well organized and highly perfected. In the main it is to be defended, not attacked. Russia should go to India to learn, not to teach.

"What should I do in conclusion except that I believe that Gandhi will fail, but will do some good, too before he ends and that my hope is, and will be, that the British agents will be able to supply the people's actual needs."

## HELD UP WORK ON ICE-BREAKER

Pre-Election Contract With  
Vickers Limited Has Been  
Held Up

Montreal, Jan. 9.—Canadian Vickers, Ltd., at Montreal, have received instructions from the Department of Marine not to proceed further with the carrying out of work on the ice-breaker, contract for which estimating a cost of \$1,580,000 had been signed by the late government, a few days before it was defeated at the polls.

This was the statement here, Saturday, of A. G. Gillman, managing director of the concern, who expressed the view that it would accordingly be impossible for his firm to mitigate the unemployment prevalent in this city. Speaking on behalf of the Canadian Workers' Federation of Returned Soldiers and Sailors, Bernard Ross stated that organization were all directly affected, they would send a delegation to Ottawa, but lacked funds and therefore appealed to the general public to assist them in that extent. "It looks as though the cancellation has been made in order to ask for new tenders and give Quebec city a chance," Mr. Ross commented.

## OLD MEMBERS GET A COLD SLAP

Independent Order of Foresters  
Insurance Policies Worth  
Little.

Montreal, Jan. 5.—Unpleasant news for many old members of the Independent Order of Foresters is contained in the statement of accounts now being forwarded to all members, for it reports that a large number of men who joined prior to 1909 that the \$1,000 policy on which they have been paying premiums for twenty-three years or more, for twenty-three years or more, is now likely to bring them at death or expiry anything from fifty to \$300.

J. W. Stocks, secretary, has given a lengthy statement of the order's financial situation, in which he explains that the face value of a large number of the older policies has been pretty nearly eaten away by various liens laid against all policies during the past twenty years. The amount of these liens, which were levied so that the order might solve solvent returns, has, he explained, resulted in the above facts.

"Then there is another factor in the situation that Gandhi overlooks. If Gandhi is unwittingly the tool of the Mohammedans, he also is deceived by wealthy native aristocrats, who are as cruel and rapacious as the worst of the aristocrats of France in the days before the Revolution—again that quick and unexpected flash of a mile to the finish. They have no more real sympathy for the poor than a fanatic Moslem has for a Hindu. Give these aristocrats their way and you soon would see. ## EDITOR'S MAIL

Dear Editor:

We predict the defeat of the plebiscite being taken this day, on the general grounds of economy, and that the new Council should deal with this public expenditure; but "lest we forget" it is well to remember at this present time that another cause bearing heavily on the vote, is the remembrance that the last occasion when we were asked to give the Council power to borrow \$20,000 developed into an expenditure of \$50,000.

So the people are somewhat wary, lest the amount asked for will develop into twice that amount.

Our \$50,000 monument testifying to the incapacity, and inexperience in public matters of the Ry. Council, giving us nothing but a fire station, which should have been built for half the money, should cause the electors to do some thinking, before again electing men, who might be very competent in their own calling, that of running Ry. matters.

Yet in the face of all this, the " Tribune" announces for Ward 3 the candidature of two men from the Govt. railways one of whom was chiefly to blame for saddling the town, with that

needless waste, just stated above. Surely there are some self sacrificing competent men in Ward Three who will do their duty to offer their services at this critical time in Campbellton's history.

Yours Etc.,

ELECTOR.

## ELECTION CARD.

To the Electors of the Town of Campbellton.

Greeting:

At the request of a number of ratepayers of Campbellton, I have consented to become a candidate for the Mayorality. I therefore solicit your support and votes for the same on the 24th day of this month.

Between now and polling day I shall try and see as many of the electors as possible, yet I sincerely trust that in the event of my being unable to see all, that you will not consider it a slight on my part, and will vote for me just the same.

I shall not undertake to formulate any definite policy, but I stand for economy in all expenditures, and if elected, shall do my best for the benefit of the town as a whole.

Thanking you in anticipation of a favorable vote on the 24th, I remain, Yours very sincerely,

F. M. ANDERSON.

## ELECTION CARD

To the Electors of the Town of Campbellton.

We have been requested by a large number of ratepayers to offer our services as councillors for Ward One in the Annual Election for Mayor and Councillors to be held on Jan. 24th, 1922.

We believe it is generally known that we are both hard workers, and we also believe that it is an understood fact, that the management of the town's affairs is largely a business proposition. If you elect us to represent you in the management of the Town's affairs we pledge ourselves.

1st.—To give to the affairs of the Town, the same keen and careful supervision which we give the personal business entrusted to our care.

2nd.—We believe the present depression throughout our town, is due to some extent to recent mismanagement of the town's affairs and to over taxation.

3rd.—That the interests of each and every ratepayer throughout the Town are mutual that is what helps one will naturally help his neighbor and that class rule should be avoided.

4th.—That we shall in the future, as in the past, do our utmost to advance industry, and the upbuilding of our Town and we shall always do our best for the advancement of broader and better education.

On Jan. 24th give us both your generous support and help to make Campbellton the best town in New Brunswick to live in.

WILLIAM S. RICHARDS, JOHN HARQUAIL.

## NO PILOT IN NEW AIRPLANE.

Ingenious Devices Invented Which Have Been Tested in France.

Ingenious devices were invented to control the operation of the pilotless airplane which has just been successfully tested in France. Some of these operated automatically and others by wireless.

The airplane, having been started by the mechanic, ascended automatically after it had attained sufficient speed. This was accomplished by increasing revolutions of a small fan located between the wings which put into motion a mechanism which, in turn, placed the control surfaces of the machine into position for ascent. Once in the air, the airplane was operated by wireless and was made to

circle a large flying field and descend.

The descent was accomplished by pressing a wireless key on the ground which released underneath the airplane a roll of wire with a weight at the end. This weight switched off the engine and moved the rear surfaces of the plane into position for a smooth landing.

At another test an airplane was operated by wireless for an hour. It carried a pilot who took no part in its operation until he desired to land whereupon he took control.

## FLOORS

The Eskimo has floors of ice and probably thinks them nice, and strictly up to date; but ever came a thaw they'd be the worst you ever had—that's as sure as fate.

The Arab has his floors of sand; We have he thinks it grand, a floor beyond compare; it is full of bugs and ants and they climb up a pants, when he sits in a chair.

The Mexican has floors of dirt and floor kind will not hurt, so long as weathers dry; there comes a season wet, such floors are not best bet, which no one can deny.

In Olden times men built their homes with ments and towers and stone, and ornaments; but all the floors were made of stone, and the people sigh and groan, they were so hard and

And then with rushes they were strewn them warmer to the shoon, and also to the those stale rushes decay, their scent would folks away, in agonized retreat.

It took uncounted years of toil and pla the midnight oil to dope out modern floors; on which we dance and walk, and sigh and wildly talk of hoarders and such bores.

The floors on which we spend our lives, our kids, and pet our wives, are surely things, be they of color light or dark, we pro them and remark—

"They are good enough for Kings." Your Mansion might have Jasper walls, paintings in it's halls that artists can produce stairs and marble doors, but if it had no more 't would be a poor excuse.

Good Hardwood floors make life a po beautify your happy home as nothing else can have the best, the years have given it, that means so much to you.
