The credit of our Great Western discovery is due to Jefferson, though he never crossed the Alleghanles. When Columbus saw the Orinoco rusiling into the ocenn wlth lrepresslble power and volume, he knew that be had anchored at the inouth of a contiaental river. So Jefferson, ascertaining that the Missunt, though called a branch, at once changed the color and character of the Missls. sippl, felt sure that whoever followed it would reach the lnnemnost recesses of our America. Learning afterward that Capt. Gray had pushed anto the month of the Columbla only after alne days breasting its outward current, he decined that river it Worthy connterpart of the Missouri, and was convinced that thelr headwaters conlid not be far apart lu longitude. Innugurated In 1801, before hls first I'residentini term was half orer he had obtained, as a sort of seerct-service fund, the small sum which suffeed to tit out the expedition. He aad also selected Lewls, his private secretary, for its heal, and put hlm in a course of special tralning. But the netnai voyage up the Missouri, purchased April 30. 1803 Fas not begnu till the mhldle of May, 1804. Fortr-ive persous in three boats composed the purty. . . After 171 days the zenr's ndvance enied with Oc ober, for the river was ready to freeze. The dlstance up stream they reckoned at 1,660 ailes, or little more than 9 miles a day, $n$ joutuey unw made by railroad in forty-four hours, . Winter quarters were thirty mlles above the Bismarck of our day. Here they Fere frozen In nbout five montis. The huts they built and abnudant fuel kept then warm Thanks to thelt hunters and Indian trafle, fool Was scidom scarce. Offlciais of the Hudson's Bay Company (who lud a post within a week's journey) aud nany iuquisitive untlyes pald them visits. From all these it was their tireless cn deavor to learn everything pussible concerning tegreat unknown of the river beyond. Scarcely one conld tell abrout dlstant places from personal ohservation, but some second-hand reports were afterward proved strangely accurate. even as to the Great Falls, which turned out to he a thouand miles away. It was not long, however, before they learned that the wife of Chnboneau. whom they had taken as a local interpreter, wis
a captive whose hirth hai been in the Rocky Mountalns. She, named the BIrd-woman, wa the only person discoverablo after a winter' seareh who could hy jusslbillty eerve them as in. terpreter and guide among the unknown tonguee and labyrintline fastnesses which they must eneounter. Early in April, 1805, the explorern, now numbering thirty two, ayaln began to urge their boats up the river, for thelr lnst year's inbors had brought them no more than hulf.way to thelr first objectlve, Ity source. No more Indian purveyors or pilots: their own rittes were the sole rellanco for food. Many a wlgwam, but no Indlan, was espled for four months and four days after they left thelr winter camp. It was through the great lone Land that they groped thelr dark and perilous way. In tweuty days after the spring start they arrived at the fellowsstone, and in thirty more they tirst slghted the Rocky Monntains. Making the portage at the Grent Falls cost then a munth of vexatlous delay. IRowing on another mouth brought them on Angust 10 to a polnt where one of the men stood with one foot ench slde of the rlvalet, and 'thanked Goil that he had llved to lestride the Missouri, heretofore decmed emuless. They ciragged thelr canoes, however, nu the rivulet for tive days longer. It was 400 days slace they lind left the mouth of the rlver, and thelr mile nge on its waters had beeu 3,096 mlles. A mile further they stood on the great divide, and drank of springs which sent their water to the Paclic. But meantimo they lad been ready to starve in the moutatalns. Thelr hunters were of the best, but they found no game: huffioes had gono down lato the fowlanifs, the blrds of hemven had fled, and edible roots wero mostly unknown to them. For more than four months they had looked, and lol there was no man. It was not thl August 13 thut, surprlslag a squaw so en cumberedi with pappooses that she could not escape, and whning her heart by the gift of a looking.glass nud paintling her checks, they formed friendship with her nation. one of whose ehiefs proved to be $n$ brother of their Bird-woman. Horses were about all they coull obtain of these natlyes, streams were too full of raplds to be navigable, or no thaler fit for canoes was within reach. So the party, subsisting on horse-flesh, and ufterwards on ding-meat, tolled on nlong onc of the worst possible rontes. Fior was It tlli the 7th of October that they were able to emhark in fogs they hadi burned hollow, upon a brauch of the Columbla, which, after manifole portages and perils, loore them to its mouth und the goal of their pilgrimage, hate in November. A. D. 1808-18ro. - Substitution of Nonintercourse for Embargo.- Delnsive conduct of Napoleon.-"All through the year 1808 and the tirst two months of 1809, the henvy hand of the embargo was lald on Ameriean commerce. The close of Jefferson's admhinistration was aig. nallzed by an important eliange tu the polley of the Amcrican Government. Almost the last net whleh Jefferson performed as Ircesthent was to sign the new law wheli repented the cmbargo, anll substituted nou-Intercourse - a law which Instead of unlversal prolibition of trade, necrely prohibited comnoree with Great Britaln mil with the conntries under French control. The statute further mithorized the President to snspend tbls prohlbition as tocither Great Ibritain or France as soon as one or the other shonld desist from violating nentral rights. Au excuse for renewing commerclal relations was not long de. layed. On April $\$ 1$, 1809, Inmediatcly upon the rather nnexpected rovelusion of a liberal and satisfactory diplonatic urrangement with Ersklne, the British minster in Washington, the non-intercourse act was suspended as 10 Great Britaln; and foreigu trade. long dormant, suddeoly sprang into excessive activity: This happy truce was short-lived. Erskine haul effected his arrangement ly a deliberate and alonost defiant disregard of Comblig's instructions; nul his acts were promptly disivowed by his govermbent. His recoll was followed by a reueval of non-intercourse nuler a presidential prochanation of Augnst 9. 1809. But notwith. standing the disinwonl of Erskine, the British Government hal male anapment concession to the E'uited States by the alliption of new orders In council which reiokell the stringent pronithitions of the orders of 1 sir, and substituted a paper blackate of all ports mul phaces mater the govermment of France-a distinction whicla, on the whole, was perlaps without my inportant difference. A. D. 1812 (September - November) - The opening of the war on the New York frontier. -The Battle of Queenstown Heights,-"To put Dearborn [whe commanded in the northern department] In a condition to act with effect. Goveruor Tompkins [of the state of New Fork] mude the greatest cfforts to get out the New York duota of milltia. The Eemocratle Legislatare of Vermont voted to ald to the pmy of their militia lu service as much as was pald by the Cilted States. At the same time they passed a striugent drufting law, and offered $\$ 30$ bounty to volinteers. By the co-operating exertious of these states and of the war department, some 3,000 regulars and 2,000 nilltia were presently assembled on Iake Cliamplain, under Dearhorn's immediate command. Another force of 2,000 mllitla was stationed at different polnts along the sonth bank of the St. Lawrence, their left restlog on Suekett's IIarbor. A third army was collected along the Niagara Ifver, from Fort Niagara to bintialu, then $n$ village of a thousand or two inhabitants, in the maldst of a newly-set. tled distrlet. This latter force of nearly 6,000 men, bulf regulars and volunteers nnd hulf militia, was under the immedlate romnand of Major-general Van Rensselaer, a Federalist.

A.D. 1814 (July-September).-On the Nlagara Frontier, - Chippewa.-Lundy's Lane. Fort Erie.-"After the desolation of the Niagara frontler $\ln 1813$, there appeared to be nothlng for the partles to contend for In that quarter. No olject could be obtalned by a vletory on elther slde, but the temporary occupation of a vacant territory ; yet both parties seemed to have selected thls as the princlpal theatre on whleh to display thelr milltary prowess in the year 1814. Lieutenant General Drummond, governor of Upper Canada, concentrated the forces of that province at fort George, and retalned the possesslon of Niagara. The American Genernls Smyth, Hampton, Dearborn, and Wllkhison. under whose ansplees the campalgns of 1812 nni 13, on the Canada lorder, were conducted, had retlred from that field; and General lbrown was appolnted major general, anl, with the assistanee of Brigadiers Scott and hipley, designated to the eonmand of the Niagara frontler. He left Saekett's Iharbour In May, witha large portlon of the Amerlean troops.

On hls arrival at lluffalo, calculating upon the co-operatlon of the Ontario fleet, he determlned on an attempt to expel the British from the Nlagara peulnsmla. With this vew he crossed the rlver on the 3d of July

On the same day he invested fort Eric, and suminoned it to surrender, allowing the commandant two hours to answer the summons. At tive ln the afterncon the fort surrendered, ant the prisoners, announting to 137 , were removed to Butrulo. General Porter's command gave way. The reserve were now ordered up. and General R1pley passed to the wookls In left of the line to gah the rear of the encmy; but before this was effected, General Scott hail compelled the Brittsh to retire. Thelr whole llne now fell baek, and were eagerly pursued. The British left 200 dead on the ground. The American loss was 60 killeel, and 268 wonnded and missing. After the battle of Chlppewa, the British retireyl to fort George; and Geurral Brown took post it Qucenston, where he remained some time, expertling reinforcements. . . of th Late War, ch. 17. - "Fort Erie was a smal work with twu demi-bantions; ore upon the north and the other upon the south front. It was bullt of stone, hut was not of sufficient atrength to resist ordnance heavier than the fieid artillery of that day. Ripley at once commenced to atreagthen the position. Fortunately, General Drummond delayed his advance for two dsys, giving the Americans an opportunity of which they Industriously availed themselves.

Fort Erie was changed into an entrencbed camp. with its rear open toward the river. Gen. eral Drummond appeared before the fort, on the 3 d of August, with a force of 5,350 men. He established his camp two miles distant. hack of Waterloo, and commenced a double tine of entrenchments within 400 yards of the main work. The same morning he threw a force of abut 1.000 men across the river, and landed them below Squaw Island, wlth the Intention of eizing Buffalo, destroying the stores gathered there, and luterrupting the communications of the Amcrican army. This soldierly plan was happlly frustrated hy Major Morgan with a battalion of the First Ritles, 250 strong.
During the following fortnight several skir. mishes occurred in front of Fort Erie, in one of Which the gallant Colonel Morgan was killed. Gencral Drummond, having been stlll further reinforced, determined not to wait for the slow results of a siege, hut to carry the place hy assault. At two o'clock in the morning of the $3 d$ of August, the British army moved to the attack in three columns. One was ordered to carry the Douglass listtery, upon the extreme right of our position; another column was to engage the fort itself; but the maln attack was directed against the Towson bsttery upon Snake Hill. BrigadierGeneral Gaines, who had lately arrived, was now in commsnd of the American forces. . . The erening before, a sbell had exploded a small magszine In Fort Erie, and General Gaines was apprehenslve that the euemy would take alvan. tage of this dlisaster and attack him, -one-third of the troops were therefore kept at their post through the night, winch was dark and rainy. His precautions were well taken. At half-past two the tramp of a heavy column was heari approaching Towson's redoubt. Instantly a aheet of tire flashed from our llines, lighting up the night, and revealling the enemy 1,500 strong. They had lecin ordered to attack with the bry. onct; sad, to insure obedience, tbe flints had heen remored from their muskets. With complete courage they approachetl to within reach of the light absttis, between Snake Hill and the lake. But after a desperate struggle they fell hack. Agaln they advanced, and thls time succeeded In planting scaling laiders in the ditch in front of the reloubt. But their ladders were too short, sad the assallants were driven off with severe lose. At the fort the contest was more severe. The assailants, led hy Colonel Drummond, an officer of singular determination, advanced through a ravine north of the fort, and attacking simultaneously all tho salient points, they swarmed over the parapet into the north hastion.
The garrison of the fort rallied, and after a severe contest succeeded in regaining possession of the hastion. A second and third time Drummond returned to the assault with no better succeas. But with invinclble tenacity be clung to hls purpose. Moving bls troops, under cover of the night and the dense cloud of hattle which hung along the ramparts, silently round the ditch, he suddcaly repeated the charge. The English ran up their iadders so quickly that they gained the top of the glacis before the defenders could rally to resist them. . . . The garrison of the fort made repeated unsuccessful efforts to retake tio hastlon; hut at day-hreak it was at!ll in the enemy's possession. Powerfui detachments were then hrought up from the ieft and center, and a comhined attempt was made from several different directions to drive the British from their position; hut, after a desperato strug. gle, this likewise falied. The guns of the Douglass battery, and those under Captain Fanning, were turned upon the hastion, and Captain Bla' dle was placing a piece of artillery to enflade it. while several hundred of the American reserve stood ready to rush upon it. At thls moment a loud explosion shook the earth, and the whole hastion leaped into the nir, carrying with it both its assailauts and dcfenders. The cause of thls explosion lias never been accurately ascertained. It is generally supposed to have been accidental. . . . The shattered columns of the foe now retired to their encampment. Tbe Britlsh report stated their loss at 90.5 killed, wounded aud mlssing; of whom 222 were kllled, including 14 othicers; 174 wounded; and 186 prisoners remained in our hands. Our loss, including 11 prisoners, was 84 men. In the bomhardment of the day before we had 45 killed and wounded; swelling our total loss to 129. A few days after thls, Drummond was reinforced by two reglments, and reopened fire along his own line. The bombardinent continned through the remainder of the month of Augnst. On the 2sth. General Galnes was wounded br a shell, which fell into fils quarters, and General IRpley agsin assumn quarcommand, hut was soon superseded hy General Brown, who lund recovered from the wound received at Lundy's Lane. General Porter, hy dint of superhmman efforts, gatbered a consid. erable body of inilitia at Buffalo, to reinforce the fort. . Notwithstanding the victory I have just descrlleel, and the reinforcements hrought by Porter, the American army at Fort Erie was in a very dangcrous situatlon. Their foe was dally increasing in number, and three new hatteries were thrown up, whose fire was rapidly

A. D. 1814 (August-September).-Capture and destruction of the national Capital. Attempt against Baitmore.-Eariy in the "summer of 1814, rumors spread through the capltai of a great Britlsh arnament preparing at Bermuda, some said for an attack on New York, others or Baitmore and Annapoils, while others asserted quite as vehementiy that the national capital was the chosen ohject of Britlsh vengeance. How ensy It would be, they argued, for Admiral Sir George Cockhurn, who had been a year with hls fleet in Chesapeake Bay, when reinforeed by the Bermudia armament to disembark a strong column at any point on the western shore of the Chesapeake - but forty milies distant - and hy a forced marcl capture the city. But by some strange fatuity, the President and his cabinet treated these possihilitles as unworthy of credence. 'The British come herel' a Cahinet officer is reported to have sald, in answer to the representations of cittzens. "What should they come here for?' Sure enough: a provinclai viliage of 6,000 inhahitauts. But then there were the state papers and puhiic buidings, the morai effect of capturing an enemy's capitai, and the satisfaction of chastising the city where a British minister hadi been abllyed to ask for his recali on the ground of in. treatment.

Coionei James Monroe, a gailiant soidier us the Revoiution, was now Secretary of Piate; another Revoiutionary soidier, Generai Armstrong. was Secretary of War, and acting on their ailice, President Madison didi sulistantialiy nothing for the defence of hils capitai. Fort Washington, commanding the Potomac, whlelh Major L'E:afiant had planned eariy in the war, was hurried forward to compietion; hut no defences on the iandward shide were erectel, and no nrmy was called out to defend it. What was dione was this: The Dlstrict of Columhla, Marylani, and that part of Virginin north of the Rappuiannock, were crented a tenth milltary district under command of Gemeral W. II. Winder, a hrave ofleer, who lad seen service in the Northwest, and who had recentiy retarned from iong detentho In Cunada as prisoner of war. Genernl Winter on taking command (June 26, 18it) found for the diefence of Wushington detachmeuts of the 36th and 3sth regulars, amounting to a few hundred men, hut nothing niore - no forts, no guns, muarmy. Parton, Life of Andreer Juckem, r. 3, eh. 20.- $\because$ As monas the issue between hlm and the Ilank of the Enlted States was teclared, Jackson resoived that the bank must be utterjy destroyed. The methond Wan wagested hy Kendali and Biair, of the Kltchec Cahlnet. It was to erfppie the avaliable means of the bank by withdrawing from it and lis hranches the deposits of public funds. In the memage of December, 1882, Jackon had expressed his toubt as to the aafety of the gov. erament deposits in the bank, and recommendeif an investigation. The Ilouse, after inquiry, resolved on Narch 2, by 109 to 46 votes, that the deposits were safe. The bank was at tiat period undoubtedty solvent, and there scemed to be no reason to fear for the safety of the puhtic money in its custoily. Hut Jackan hard made up hia mind that the bank was tioanclally rotten; that It had been employfug its means in defeat his reelection; that It was using the publle funds in buylog up menabers of Congress for the purposes of securing a renewal of its charter, and of hrraking down the adnilnistration; and that thus It had become a dangerous agency of corruption and a publlc enemy. Therefore the pubile funde must we withirawn. whhout regaril to conse. quences. But the law provkled ilmat the public funds shouid be deponited in the Hank of the Cnlted States or its hranches, unies the secretary of the Treasury should otherwlse 'order and dlrect,' and in that case the secretary shoulis report his reasons for such direction to Congress. A willing Secretary of the Treasury was therefore needed. In May, 1833. Jackson reconstructed his Cabinet for tlis second tIme. For the Treasury Departmeat Jackson sefected Willam J. Duanc of Plillalelphla, who was known as on opponent of the hauk. Jackson, no doubt, expected bim to be ready for any measure necessary to destroy It. In this he was mistaken. Duane earuestly disapproved of the rimoval of the depostis as unneresary, anil hlghly dangeruus to the bualnces Interests of the mantry. A majority of the members of thr ('illact thought the rumoral of the depestis unvise. . . In the lusiness communtty there aetimal to he but one volce alout it. The mere rumor that the removal of the depostis was in contemplatlong greatly disturley the money mark.t. But alf this falled to stagger Jacksun'a resolution. . The Cablot, whith the exception of the secretary of the Treasury, bowed to Jackson's will. Bit Hispe wouli not shelter himself behlod the I'realcien' ' nesumed responslhllity to do an act which, MLier the lav. was to be his act. He aloo refused to restgn. A. D. 1850-1851.-The Hulsemann Letter. -Kossuth in America -In July, 1850, Daniel Webster becane Secretary of State In the cabinet of lresident Fillmore and retalined that post until his dcath, in October, 1852. "The best-known incilent of this $j$ erion was that which gave rise to the famnus LIalsemann letter.' President Tarlor had sent in ngent to Hungary to report upon the condition of the revolutionary government, with the intention nf recoguizlng it ff there were sufticient grounds for doing so. When the agent arriverd, the revolution wis crushed, nad he reportell to the President against recognition. These pupars were trinsinitted to the Senate In Mareh, 18.0). Mr. Halsemann, the Austrian Charge, thereupnn enmplained of the actiou of our alministrition, and Mr. Clayton, then Sceretary of state, replied that the mission of the agent had 7 ween simply to gather lnformation. On receiring further linstructions from hls gov. erment. Mr. Hulsemann rejolned to Mr. Clayton, and it fell to Mr. Wehster to reply, which he did on Decemher 21, 1850. The note of the Austrian Cliargé was li a hectoring and highly offensive toue, and Mr. Webster felt the necessity of adninistering a shnrp rehuke. "The IHtlscmann letter,' as it was callend, was, accorilingly dispatcheal. It set forth strongly the right of the lyited States and their intention to recognize any ide facto revolutionary goverument, and to seek infornation in all proper ways in order to guide their retion.

Mr. Welster had two objects. One was to awnken the people of Enrope to a sense of the greatness of this country, the other to touch the national pride nt liome. He did both. . . . The affalr dial not, however, end herc. Mr. IIUlsemann became very mlld, but he soon lost his temper ngalu. Kossutla and the refugees in Turkey were hrought to this country in al Ciled States frlgate. The Iunganan hero was recelred with a hurst of enthusiasm that induced him to hope for suhstantidl aid, which was, of course, wholly vlsionary. The popular excitement nade It difficult for Mr. Wicbster to steer a proper course, hut he succectied, by great tact, in showing lis own srmpathy, anil, so far as possihle, that of the govermint, for the cause of Hungarian Indepenceand for its lender, whthout golng too far.
Mr. W. inster's course. . although carefuliy garded, aroused the ire of Mr. Hulsemann, who left the country, after writing a let-
ter of indlgnant farewell to the Secretary of Statc."-H. C. I.odge, Daniel Webster, ch. 10.

It appenred $\ln 1852$, In the form of a secret, onth-bound orgnuization, of whose naine, uature, and objects nothing was told even to lts inembers until they lad reached its hlgherdcgrecs. Thelr consequent ilcclaration that they knew nothing about it gave the snciety its popular name of Know Nothings. It accepted the name of the American Party. Its deslgn was to oppnse the easy naturalization of forelgners, and to ald the election of natlve-bora citizens to office. Its nomalnations were mnde hy secret conventlons of delegates from the various lodges, nad were voted for by all members under penalty of expulslon in case of refusal. At tirst, by eudorsing the nominations of one or other of the two great partles, it decided many elecions. After the passage of the Kansas-Neliraskn Biil, the Know Notling organization was adopted hy many Southern Whigs who were unwilling to unite with the Democracy, and became, for $n$ time, a national party. It carrled nine of the State elections $\ln 1855$, and $\ln 18.56$ nominated Presidential candidates. A. D. 1852 .-Seventeenth Presidential Elec~ tion.- Franklin Pierce.- "The question of slavery, in lts comprehensive bearings, formed the turnlng point in the presidential canvass of 1859.

The national democrutic conventinn whlch nominated Mr. Pierce, unanimously adnpted a plat form approving the conpromise of 1850 as the final decision of the slavery question. The whig party were widely divided on the questlon of acquiescence in the crmpromise measures, and still more at rariance in regard to the claims of rival caudidates for the presidency. Mr. Seward's friends In the frec states united in the support of General Scott, who had, to a considerable extent, stood aloof from the agitations of the last few years. On the other hand, the cxclusive supporters of the compromlse, as a conlitlon of party alleginnce, were divlded between Nillaril Fillmore, at that time acting president, and Daniel Wehster, sccretary of state. The whig convention met lu Baltimore on the 17 th of Junc, 1852 , two weeks after the democratic convention, and nominated General Scntt as thelr candllate for president. A large majority of the delegates from New York, and a considerable number from other states, malntained their opposition to the test resolutions which were proposed hy the other branch of the party. Tbese resolutious, however, we. adopted, and a platform was thus established resenhling, in its maln features, that of the democrats. . . Supported hy several anlvocates
of thle new platform on the ground of his per conal popularity, General \&cott recelved the nomination. He was, however, regarded with great susplclon by a large number of whigs n the slaveholding states. .. . Many ardent friends of the compromlse . . . refused to rally around General Scott, distrustling hls fdellty to the compromise platform; while a large number of the whigs of the free states, through averslon to the platform, assumed a neutral position or gave their support to a thlrd candidate. Another portion of the whilg party nominated Mr. Webster, who died [October 24, 1852], uot ouly refising to decllne the nomlnation, hut openly avowing hls dlsgust wlth the action of the party."-G. E. Baker, Memoir of Wm. II. Sevard (Sevard's Works, v. 4). -"The Democratlc convention was held, first, on June 1, 1852, at Baitlmore. It was a protracted conventlon, for it did not adjourn until the 6 th of the month, but lt was not very lnteresting. After a short contest, the two-thirds rule was adopted by an overwhelming majority. The struggle over the nomlnatlon was protracted. On the first ballot, General Cass had 116; James Buchanan, 93; Wllliam L. Marcy, 27; Stephen A. Douglas, 20; Joseph Lane. 13; Samuel Houston, 8 ; and there were 4 reaticing. The numher necessary to a choice was 188. . . . On the tweuty-ninth trial, the votes were: for Cass, 27; for Buchanan, 93 ; for Douglas, 91 ; and no other candldate had more than 26. At this point Cass began to recover his strength, and reached his largest number on the thirty-ifth trial, namely, 181. On that same hallot, Virginla gave 15 votes to Franklin Pierce. Mr. Pierco gnined 15 more votes on the thirty-sixth trial; but at that point his lncrease ceased, and was then slowly resumed, as the weary repetition of hallutling withour effect went on. The forty-eiglith trinl resul.ed as follows: for Cass, 73; for Buchanan, 28; for Douglas, 33; for Marcy, 90; for Pierce 55; for all others, 8. The forty-ninth trial was the last. There wns a 'stampede' for Plerce, and ho recelved 282 votes to 6 for all others. Ten candidates werc voted for as a candldate for the vicepresidency.

On the second hallot, Willinin R. King of Alabama was unanimously nominated. . . . The anti-slavery organlzation, the Free Soll Democrats, though a much less important political factor than they had heen four years carlier, held thelr convention In Pittsburg on August 11. Henry Wilson of Massachusetts presided. John P. Ifale of New Ifmmpshire wns nominated for President, and George W. Julian of Indiana for Vice-President.

The canvass was not a - ry spirited one. All the early autumn elections were favorable to the Democrats, and the result In November was a crushing defeat of the Whigs in the popular vote and one still more decislve in the electoral vote.
The popular and electoral votes were as follows." Popular vote: Franklin Plerce, 1,601,274; Winfeld Scott. 1,386.580; John P. Hale, 155.825. Electoral vote: Piercc, 254; Scott, 42,-E. Stanwood, Hist. of I'residential Elections, ch. 18.
A. D. 1852. - The appearance of Uncle Tom's Cabin, and its effect.-"Of the literary forces that aidel in hringing about the immense revolution in putis sentiment between 1852 and 1860, we may aftirm with confidence that by far the most weighty was the influence spread hy this book. This story, when published [1851-2]
as a serial ln the 'Natlonal Era,' an antl-slavert newspaper at Washington, attracted little atten. tion, hut after it was glven to the world in book form In Marcl, 1852, lt proved the most success. ful novel ever written. The author felt deeply that the Fugltlve Slave lav was unjust, add that there was cruelty in lts executlon; this inspired her to pour out her soul ln a protest ngainst slavery. She thought that if sho could only mske ths world see slavery as she saw lt, her objoct would be accompllshed; she would then have induced people to think right on the subjcet. The book was composed under the most disheartening cir. cumstances. Worn out with th. : care of many young children; overstrained $h$; the domestic trials of a large household, worried because ber hushand's small lncome did not ineet their frugal needs; eking out the poor professor's salary by her llterary work ln a house too small to afford a study for the author - under such conditlons there came the inspiration of her life. . . . The effect produced hy the hook was immense. Whittier offered up 'thanks for the Fugltire Slave law; for It gave occnslon for Unele Tom: Cahlu.' Longlellow thought lt was one of the greatest trlumphs in literary history, but its moral effect was a higler triumph still. Lowell descrlbed the lmpresslon which the book made as a 'whirl of excitement.' Choate is reported to arave said: "That book will make two nillions ol aholitionlsts.' Garrison wrote the anthor: 'All the defcnders of slavery have let me alone and are ahusing you.' "-J. F. Rlhories, livet. of the U. S. from 1850. v. 1. pp. 278-280.-Writing only nine montlis after the puhlication of "Incle Tom's Cahln," C. F. Briggs, in Putnam's Monthly Magazine, sald: "Never since lwoks vere frst printed has the success of Uncle Tom lean. eonalled; the history of literature contains nothing narallel to lt, nor npproaching it; it is, in fact, the first real success in bookmaking, for all other successes in literaturc were fallures whet compared with the success of Unele Tom. There have becn a good many books which were consldered popular on their first appearance, which werc widely read and more widely talked about. But what were they all, compured with Uncle Tom, whose honest countenance now orershadows the rendlng world, like the dark cloud with a silver lining. Dou Quixote whs a popular book on lts first eoming ont, anal so was Gil Blas, nod Richardson's Pamela, aml Fiehllog's Tom Jones, nud Hannah Morc's Colebs, aud Glbbon's Decline and Fall; and so were the Ticar of Wakefiell, nnd Rasselas, and the Take of a Tuh, and Evellna, the Lady of the Lake, Warerley, the Sorrows of Werter, Childe ilarold the Spy, Pelham, Vivlan Grey, Pickwick, the Irsterles of Paris, nnd Macaulay's History. These are among the most famous hooks that rose suddenly $\ln$ popular csteem on thcir tirst appear. ance, but the unlted sale of the whole of them, within the first nine months of their publication, would not equal the sale of Cncle Toin in the same time. . . . It is lint nine months since this Illad of the hlacks, as nn English reviewtr calls Uncle Tom, made its appenrance nmong books, and nlready its sale hns excceded a million of copies; author and publisher have male fortunes out of lt, and Mrs. Stowe, who was before unknown, is as familiar a name in all parts of the civilized world as that of Homer or Shakspeare. work hsve been soid in the United States, and the publishers say they are unabie to meet the growing demasd. The book was published on the 20th of last March, and on the 1st of December thero had beea sold 120,000 sets of the editlon $\ln$ two volumes, 50,000 copies of the cheaper edition in one, and 3,000 copies of the costiy iliustrated edition.

They [the publishers] have paid to the author $\$ 20,300$ as her share of the profits on the artusl cash sales of the first nine months. But it is In England where Uncle Tom has made his deepest mark. Such has been the sensatlon produced by the book there, and so numerous have been the editlons published, that it is cxtremciy difficult to collect the statistics of its circulation with a tolerable degree of exaetness. But we know of twenty rival editions in England and Scotlind, and that millions of copies have been proiuced. . .. We have seen it stated that there were thirty different editions published In London, within slx months of the pubiication of the Fork here, and one firm kecps 400 men employed in priatiag aad bindlog it. $\qquad$ Uncle Tom was not loag in making his way across the British Chsnnel, and four rival editlons are claiming the attention of the Parisians, one under the title of ' le Peire Toa,' and another of 'la Case de l' Onele Tom.'"- Lncle Tomitudes (Putnan's Monthly 1ag., Jan.. 1853), - "In May, 1852, Whittier wrote to Garrison: "What a glorious work Harriet Beecher Stowe has wrought. Macaulay Frote, thankiag her for the volume, assuring her of his high respeet for the talents and for the bene colence of the writer. Four years later, the same illustrious author, essaylst, and historian wrote to Mrs. Stowe: 'I have just returned from Italy, whre your fame seems to throw that of all other writers into the shadc. There is no place where Cacle Tom, transformed iato Il Zio Tom, is not to be found.' From Lord Carlisle she received a long and earnest epistle, In which he says be felt that slavery was by far the 'topping question of the world and age, and that he returned his 'deep and solemn thanks to Almighty God, wno has led and enabied you to कrite such a book. The Rev. Charles Klngsley, in the midst of illness and anzlety, sent his thsaks, sariag: "Your book wlll do more to take away the reproach from your great and growlng nation than many plntform agitations and speeehifrings.' Suid Lord Palmerston, 'I have not read a novel for thirty sears; but I have read that book three times, not only for the story, but for the statesmanship of It. Lord Cockiburn declared: 'She has done more for hunianlty than Was erer before aeeomplished by nny siugle book of fiction.' Within a year Uncle Tom's Cabia was scattered ali over the world. Translations Tere made iato all the prineipal languages, and into several obseure dialeets, in number varionsly estimated from twenty to forty. The librarian of the British Duseum, with an interest and enter prise which night well pit our own countrynien to blush, has made a collection which is uaique and rery remarkable In the history of books American visitors may see there thirty-five editions (Cncle Tom's Cabin) of tie original Eng. lish, snd the complete text, and eight of abridgments snd adaptations. A. D. 1854.-The Kansas-Nebraska Bill.Repeal $c$ the Missnuri Cnmprnmise.-The dnctrine nf "Squatter Snvereignty."-" The slavery agitation apparently had ded away both in congress and throughout the country. This calm, however, was doomed to a sudden interruption. The prospect of .. . beneflecut leglslation was destroyed by the introduction of a measure whlch at onee supplanted all other subjects in congress and in the political interests of the people. This was the novel and astonnding proposai of Mr. Dougias [Senator Stephen A. Douglas, of Iilinois], in relation to the Kansas and Nebraska territories. . . . The measure
alluded to . . . was a provision in the bill for the organization of a territory la Nebraska, declaring that the states whleh might at any future time be formed iu the new territory should leave the question of slavery to be decided by the iahabitants theresf on the adoption of their constitution, - [this being in aceordance with the doctriae which its advocates styled ' Popuiar Suvereigaty,' but which took the eommouer name of 'Squatter Sovereignty' from its opponents]. This provision was, as explained bs the bill itself, the application of the compromise policy of 18.50 to Nebraska, and. as was evideat, virtually repealed the Missouri Compromlse of 1820 , which guarantich that slavery should be forever excluded from the territory in question. But, in order to briag the supporters of the bill and its opponents to a more decided test, \&n amendmeat was moved expressly nnnulling that portion of the Missouri Compromlse which related to the subject. Mr. Douglas, after somedeliberation, accepted the amendment and modifled his plan so far as to introduce a new hill for the organization of Nebraska and Kansas within the same limits, instead of tho territory of Nebraska alone, aceording to the original programme. The administration lost no tine in adoptiag this poliey as their own. It was at first proposed to hasten the passage of the bill through both houses so rapidly as to preveat any remonstrauee on the part of the people. But the opponents of the mensure, in eludiny Mr. Seward, Mr. Chase, Mr. Sumner, Mr. Truman Smith, Mr. Wade, Mr. Everett, Mr. Rell, Mr. IIouston, and Mr. Fessenden, eomhined agalnst it sueh an earnest and effective resistance that the attention of the country was aroused, and an indignant protest called forth from the people of the free states. The bill, however, passed the senate on the 4th day of Minrch, 1854 , after $n$ discussion mhich had oucu.

Presldcnt Plerce promptly gave It lils approval, and tho odlous measure became the law of the land. Thus was abrogated the Missourl Comproailse -a law enacted thlry years hefore with all the solemulty of a compact between the free and the slive states-and a territory as large as the thirteen orlginal states opened to slisery. The aet was consummnteel hy the cobyrration of the north. The same report glves a distinction which Senator Dougias drew between " Popular Sovereignty" and "Squattez Soverelgnty", as follows: "The name of Squatter Sovereignty ras first applled by Mr. Calhoun, in a debate In the Coited States Benate $\ln 1848$, between hlmtelf and Generai Cass, In respeet to the right of the ipople of Caiiforna to institute a government for themselves after the Mexican jurisdiction had been withirawn from them, and before the lava of the United States had been ex. tended over them. Generai Cass contended that In such a $c$, re the people had a rigit, an lnherent and inalienahle right, to lnstitute a govermment for themselves and for thelr own protectlon. Mr. Calhol:' repiled that, with the exception of the nutive Californians, the inhabicants of that country were mere squatters upon the publle domaln, who had gone there In vast crowds, without the authority of law, and mere In fact trespassers as weli as squatters upon the pnblie innds, and to recognize thelr right to set np a government for themseives was to assert the doctrine of 'Squatter Sovereignty.' The term had no appiicatlon to an organized Territory under we authority of Congress, or to the powers of such nrganized Territory, but was appled soieiy to an unorganlzed country whose exlstence was not recognlized by iaw. In the Northern States there were Ahoiltionists, Free-Soilers, antl-slavery Whiga, anti-Nebraska Democrats, aus antl-slavery members of the American party, which had just come into existence. . . As the contllet progressel, iarge and increaslng numbers saw that no help couid be reasonably hoped but through the fornation of a new party that could act wit'sout the embarrassment of a Sontinern wing. But the formation of a natlonal and successfui party from materials afforded by the disintegration of hitherto hostie organizations was a work of great delicacy and diffleuity. Such a party could not be made;-it must grow out of the elements aiready exlsting. It inust be born of the natlon's necessities and of lis iongings for 1 ollef from the weakness, or wlckedness, of existing organlzations. But all were conslous that nelther they nor the Free-sollers could succeed except by unlting wlth each other." A partlal cemhlnation of Know Noth. lage with the Repuhllcans was efected at meeting on Friday before the openlng of the sealoa of Congress. "Late in the day a resoludon was Introluced pledglng the members to rote forany man on whum a majorlty of the mem. bern shoald unlte, provided he stood pledged by bis past llfe or present deelaratlons so to arrange the committees of the I louse as to give respeetful uaswers to petitions concerning slavery. This resolation was alopted hy a unanlmous vote of more than 70 members. But the leading nembere of the 'Know Nithlngs' dld not appear at any of the caucuses. It was in thle unorigan. ized form that members opposed to the extenslon of slavery met thelr associates on SIonday In the Hall of Representatlves, to enter upon a contest uaequalled in the prevlous history nf our Governmeat. The Ilouse consisted of 234 members -225 of whom answered to thelr names at the tirst calling of the roll. Tue first husluess In order was the eleetion of Speaker: And the ballots belag counted, it was found that William A. Rlchardson, the democratle candl. date, lind 74 votes; Lewls D. Camphell, of Ohlo, the 'Kaow Nothing' eandidate, had 53 votes; Humphrey Marshall, of Kentueky, the southern Know Nothlng eandlelate, 30 votes; Nathanlel P. Banks, of Jassuchusetts, was supported by those Freesollers or Repuhlleans who refused to support any man placed in nomination by the Know Nothings ; and HIrain 31. Fuller, of Pennsylvanha, received the votes of 17 members of the Know Nothing party who refused to support nay other eandldate. Tlape were several other ballots east during $t$. $y$, with Ilttle change. The voting contln $\mathrm{L}-\mathrm{c}$ a the second, third, foarth and fifth lays, w bout materlaj change, except that Mr. Camphe s vote rose on one occasion as high as 75. After the result of the twenty-third bullot was annouseed, Mr. Campbell withdrew his name from the list of candidates. On the wlthdrasal of Mr. Camp. bell, Mr. Baaks' rose regularly untll the 15 th December, when it reached 107. . . . On the 10th December, the hallot showed Mr. Banks to have 106, and Mr. Rlchardson 75. Messrs. Harshall amd Fuller, with thelr adherents, continuing to rote by themselves. During the debates the Republicaus were constantly assailed, and as the writer [Joshus R. Glddings, of Ohlo] was the uldest memher of that party, be felt constraned to viallcate thelr eause. He assured the Democrats and 'Know Nothlngs ' that the Republicans must soon come into power: Aud when once in power they would not permit southern members to dissolve the Culon. This seemed to arouse much angry feellng. Mr. MeMullen, of Virginia, replled with mueli spirit, deelaring that Whenever a northern President should be eleeted the South would dlssolve the Uinlon. This is believed to he the first distinet enunelation in Congress that the Unlon was to be dlssolved upon the electlon of a nortbern President. Northern Democrata sppeared mortlfied at the imprudence of Mr.

McMullen. Mr. Bank., in a publle speech made some two years prevlously in Malue, had anld, that if we were th extend slavery or flisolve the U'nlon, he would tay, "Let the Unlon allde." Thls enylug was now ecized npon by southera men as an lnsuperalile objectlon to Mr. Banka' electlon: Whlle, at the same tIme, Mr. Brooks. of South Carollna, angured the Ilouse and the country that unless slavery were exteuded he deslred to see the Unlon sllde. Members sppeared hy common consent to enter upon a general dehate, which was suspendel on the 24th so long as to take a mallot, which showed no substantlal ehange In the partles. On the 27th, fuur ballots were taken with a slmillar result.

On the 28th December the ballotlng was resumed, and contlnued through that and the followlag day without material change of partles, and debate was agaln renewed.

The Presl. dent of the Unlted States sent his sunual mesagge to the Senate on the 31st December, ant hls private secretary appeared at the eutrance of the House of Representatlves and annuuneed that he had brought with him the annual message of the Presklent, to be presented to that boly. Aware thint thls was futended to exert an latluence agalust the Republleans, the author at once objected to reeelving lt, as it was an attempt to Introduce a new practlec - for up to that the no Iresldeat land ever presuned to thrust his message upon an unorganlzed borly - ant that it could not constitutloually he recelved by mem. bers untll a Speaker were elected. But a ma. fority voted to recelve lt. The next attempt was to read it to the llouse; but It was agaln objected that it was not addressed to meubers In thelr ilsorganlzed coulltion, but was ad. drussed to the senate and llouse of liepreses. tatlves, whleh had not then been orgmaized. Thls objeetlon was sustalned, and although they had recelved the message, they refused to read It. The new year found the House unorganlzed, whth the Preshlent's message lyiug uphom the Clerk's desk unopened and unread. One ballot was taken. A mutlon was next made to take up and read the President's message; but, after dehate, the motion was lald on the table. Members now hegan to nake arrangements for contlnulng the contest Indetimlely. Most of them bad expected to draw their mlleage to defray their current expenses; but belng unahle to do that untll the lluase were organized, found themselves out of funds. Iu nany IRepublican distriets the people inct In publiciconventions and passed resolutions approving the actlon of thelr Represcutatives, made provisloas for thelr members todraw on their local banks for such funds as they decmed necessary for defray. lng expenses at Washington. To meet these ex. peases, some State Legislatures made appropriations from their State funds. Soon as the republican party becane consolldated, its members beeame more contident. Those of greatest experience assured their fricnds that as the President, officers of government, and the army and navy must go without pay untll tho House should be organized, the pressure would soon be so great upon the democratic party that they would be compelled to suhmit to the eleetlon of a repuhllcan Speaker. Some State Leglsla. tures passed resolutlons sustalning the action of thelr Representatives, declaring the issue invalved to be the exteasiou or zun-cxteasion of
alavery. . . . On the 20th Janumry mevernl proposttona were made for an Immediate organlan. tlon. They were rejectal, hut hy sueh small majortles as windcate an organfation at no very dlatant period; and the Republieans now felt one, aud unly ane douht In regard to suc. cers. The southern 'Ktow Nothing ' hand been Winige, and blteriy bated the Ihemiernts; and the plustlon now prewented wan, whetier they would unlte w lh their old enemles rather than mee a repubilican Spenker eiceted. On the 31 Feb. ruary a remolution was presented, declaring that three noore ballotis should be taken and If no ciection were ind, the candidate having tite ulghest numiver of votes on the 4th ballot should be declared Sienker. Soun after this vote wan antounced the 1 touse ad fourned. Stem. bers now felt that the contest was drawing to a close. The next morning . . . Mr. Alken, of Bouth Caroilnn, was announced as the democratle cundidutc. And the firat bailot, under the realution, abowed ifttic elange of partlea. Banks received 102 votes; Alken, 02; Fulier, 18; Camplell, 4 ; and Welis, 2. By this time the apaclous gallerle were filled with eager apectatora, the lubhles and passagen were erowded by mpn nad ladies anxlous for the resuit. The next ballot wis taken without any change of parties. A motlon wus mude to mijourn, hut it was voted down by 150 to 5\%. Mr. Fuller annobued tiat ine was no longer a candidate. The resuit now appeared to be anticlpated by ali, and as the Clerk commeneal caliing the roil of members for the final vote, there appeared to be the most intense futerest felt on ali sides of the ilouse.

When the roll had been called hrongh therc was so much eonfusion thac it was 1 Blath for auy one to be heurd. But the elerks and teliera procecoind in ticelr dutles, aud wion the eount was completed, Mr. Benson, of Maine - one of the teliers - rose, and in a boud voice proclaimed that 'On tite onc imnired nud thirty. third baiot Nathanied 1'. Banks iasel recelved ios votes; Mr. Aikeu lad recelved 100 votes; Mr. Fuiler iad received 0 rotes; and Mr. Campbeil Lad recelved 4 votes That Jír. Bnnks having recelved the highest number of votes on this buliot, wus declared duiy clected Spasker of the thirty-fourth (io. es. At this annoumecment the spectutors in thac .bluries broke forth iu widi excitencut. Chrer after cheer went up, amhl the waving of hanikerchic fs and demonstrations of unrestrained exultation, winich were responded to by hisses from the Admiuiatration sile of the liunse.

The effcet of this victory was feit througin the country. . . . Sixteen years hefore this orcurrence Mr. Adams and the author of these sketelues were the oniy representatives in Congress of the doctriuea now supported by a mujority of the Ihonse. "The question of negro eltizenship came up in tho conalieration of the question of jurtaliction. For the question of jurialiction was the ques. tlou, whether the plaintif was cltizen of Misoourf, as he had averred in his decisration; and the oaly fact picaderi to disprove hls cltizen. ship wan tho lact that Scott was n negro of Arfican deacent. whuse ancestora had been solid as alaves in tho United States. A. Larned, Segro Citizership (New Enybinmer, Aug., 1857), - Tho decision of the Supremo Court, dellvered by Chlef Justice Taney, March 6, 1857, not oniy ciosed the door of freedom to Dred Scott, hit shut the doors of the United States courts agalast him and all those of his race who were or had been slaves, or who sprang from an anceatry in tho servile state. The oplalon of Chicf Justlce Tauey wan concurred in hy ail the justices ezcept Curtis and Mcleran - Justico Nelson dissentiug on one poict ouly. The arguments and the sentiment in the oplnion which gavo most offenco to the conselence and the reason of the country were the following:
"It beconse our duty to decldo whether the facts wtated in tho plea are or are uot sufficient to show that the pinintiff is not entitled to sue as a citlzen lia court of tho United States. Thls is certninly a very serfous queatlon, and ono that now for tho first thme has beeu hrought for deefsion beforo thls court. But it is brought here by those who have a right to bring it, and it is our duty to meet it a 1 decide ft. The question is shinply this: Can . pegro, whose aneestors were laported into thls country, and sold us slaves, becomo a member of the pollticnl eommunity formed ard brought into existence by the Constitutlon of the United States, and as such become cntitledi to all the rights, and privileges, and Immmulties, guarm. thed by that lnstrument to the cltizen? Ono of which rights is the privllege of sulng in a court of the Linted States In the cases speefficd in tho Constltution. It will be olserved, that the plea applles to that class of persons oniy whose ancestors were negroes of the African mee, aud imported lato this country, nud sold and held as siaves. The only matter in lssuo before the court, thereiore, is whether the descendants of such slares, when they shall be emancipited, or who are lorn of parents who had iecome freo before ilseir listh, ure citlzens of a State, in the sense in which the word citizen is used lu the Consitution of the Enited States. And thls being the only matter in dlspute on the plead. ings, the court must be understood as speaking In this opinlon of that chass only, that is, of those persons who are the lescendints of Africans who Werc imported into thls country, and sold as slaves.

The words 'peonie of the Enlted

Dtates' and ' ', seas' we aranymnin lema, and menn the wo thing. They luth drucribe the poiltical body who, acconilig to our repub Ilcan inettutlons, form the enverelenty, and who hold the power and condu't the dforera ment through thoir reprewentatives. They are what wo ? and every cltizen liw one of thle paiple, and comatitueat member of thim moverolifnty. The question before he is, whethar the chave of pip. sons deacribed In the plea in abntemont compose - portion of this people, and uri convtitient members of this sovereignty ? Wie think they are not, and that they are not inclutenl, and wefo not Intended to be Incluledi, naler the wiml 'citizens 'In the Conmtituton, and can therefom claim none of the rigite and prlvilrgen whet that instrumeat provlicen for anil acones to citl zens of tho Cinted Statem. On the contrary they were at that tine comslitered u4 a sulmadi. nate and inferfor chase of belugen, whon hat beeo subjugated hy tho dominane ruce, ami, whether emancipated or not, yet remulned mulijert to their authority, and had no rights or privilegets hut sucis as those who held the jowire ond the Government might chowne to grant then. It is not the province of the court to declele upon the justice or Injusticc, $t$. ? wolley or lupolicy, of these laws. The decialt of that quesition bolonged to tite poiltical or faw-muking powet

In discussing this questlon, we must bit confound the rights of eitizenshly, whithastate may confer within its own llmits, unil the righ:s ot citizenshlp as a member of the lube it does not hy any mcans follow, le mase be has alt the rights and privileges of a citiren of a state, that he must be a cifizen of thu I'ntteif states Ife may inve ail of the riglits and privilenes of tho cltzaen of a State, and yet nut lee entitled to the rights and privileges of a cllizen in anr other state. The question then urises, whether the provisions of the Constitution, in relathon to the personal rights and privileges to willeh the citizen of a Stato shouid be entlitel, embractil the nego African race, at that time in this country, er who might afterwirds be imported. Who ha* then or shouid afterwards be mante free $\operatorname{los} \sin$ State; and to put it In the power of a sinde Sh te to mako him a eltizen of the "nited states, and endue him whith the full rlyhty of citize ship in every other State whinut thir commat

The court think the uftimalive of these propositions cannot be mutatalaed. Ind it it cannot, the piaintlfif in error could not he cift zen of tho Statc of Missourl, withiu thu of the Constitution of the Cuited star consequeptiy, was not eutitled to str... 3 courts. It is true, every persom, and every chas and description of persons, wha wrer it the tlme of the doloption of the Convinuthon recos. pised as eltizens la the several tated, became also citlzens of this new politleal bedy; but none other.

It becomes uecessary, therefore, to determine who were chtzens of thi severul statis when the Constitution was ndopted. Ind in order to do thls, we must recur to the Gorift ments and institutions of the thirtectl colonits, when they separated from Great Britana and formed new sovereigutles, and took their places in the family of independent nithons. We must inquire who, as that thenc, were recogniset as the people or citizens of II State, whose righte and fiberties had been outriged by the Englith

' vas the man airealy chosen In the hearts of the Republicans of lifinols for the sane oltiee and therefore with singular appropriateness they passed, with $r$ eat unanimity, at thelr couveu tion in Sprins side on the 16th' of June, the churacteristic po ution: 'That flom, Abralazte Lincoln is a Atrst and oaly chofec for United

States Senator to flli the vacancy about to be created hy the explratlon of Mr. Dougias' term of office.' There was of course no surprise ln this for Mr. Lincoin. He had been ail along led to expect it, and with that in vlew had been earnestly and quietiy at work preparing a speech In acknowiedgment of the honor about to be conferred on him. Thls speech he wrote on stray enveiopes and scraps of paper, as ideas suggested themselves, puttling them into that miscellaneous and convenlent receptacle, hls hat. As the conventlon drew near he copled the whoie on eonnected sheets, carefuliy revising every ilne nod sentence, and fastened them together, for reference during the dellvery of the speech, and for publicatlon. The former precaution, however, was unnecessary, for he had studled nad read over what he lad written so long and carefuily that he was ahle to dellver it without the ieast hesltation or dlfficuity. .. Before deilvering his speech he Invited a dozen or 80 of hls friends over to the library of the State Honse, where he read and suhmitted it to them. After the read. lng ho asked each man for hls oplnlon. Some condemned and not one cndorsed it. One man, more forcihle than elegant, characterized it as a 'd-d fool utterance;' nnother said the doctrine was 'ahead of its tlme;' and stlli another contended that It would drive away a good many voters fresh from the Democratic raaks. Each man attacked it in hils critlcism. I was the last to respond. Although the doctrine announced was rather rank, yet lt sulted my views, and I sald, 'Llacoln, deliver that speech as read and it will make you President.' At the time I hardly reaized the force of my prophecy. Ilaviag patiently listened tw these various criticisms from hils friends-all of which wlth a single exception were adverse - he rose from his chair, and after alluding to the carefui study and lntense thought he had given the question, he answered ali their objections suhstautlally as foliows: Frieudis, this thing las heen retardel iong enough. The tlme has come when these sentments shonld he utterel; and if it is decreed that I slould go down becanse of this speeeh, then let me go down linked to the truth - let me die in the advocacy of what ls just and right.' The next day, the 17th, the speech was delivered just as we hal heard it read. [The part of this famons speech which made the profonndest lmpressiou and gave rise to the most discussloa wis the openlug part, contained in the following seutences: 'If we could first know where we are, and whither we are tending, we could better judge what to do, and how to do lt. We are now far into the tifth year since a policy was lnitiated with the avowed ohject and eontilent promise of putting an eni to slavery agitation. Cader the operation of that policy, that agitation hiss not only not ceased, but has constantly angmented. lin my opinion, it will not cease untll a crisis shail have loen reachei aud passed. Lincoin had now created in reality a more profound impression than he or his friends antielpated. Many ikepuhlicans deprecated the nd vanced ground he had taken, the more so as the Democrats rejoiced that it nfforded them an lssue clear and well-defned. Numbers of bis friends distant from Springfieil, ou reading his speech, wrote him censorlous letters; and one well-informed co-worker predicted his defeat, charglng it to the first ten llnes of the speech These complaints, coming appareutly fromevery quarter, Lincoin bore with grent patheace To one complainant who foliowed him into hlsoffice he sald proudly, 'If I had to draw a pen across my record, and emse my whole life from sight and I had one poor gift or choice left as to what I should save from the wreck. I should choose that speech and ieave it to the world uncrased.' Meanwhile Douglas had returned from Wiasling. ton to his home in Chicago. Ilere he rested for a few days until his frlends ant em-workers had arranged the details of a pnhlie reepption on the Oth of July, when he delivered from the balcony of tho Tremont House a speech inteaded as an answer to the oas made by Lincola in Spring. fieid. Lincoln was present at this reception, hat took no part in it. The next day, however, he repiled. Both speeches were dilivercul ut the same place. Leavlng Cinicago, Douylas passed on down to Bloomington aud Springfich, where he spoke ou the 16 th and 17th of July respec. tlvely. On the eveniag of the latter day Lincoln responded again in a most effective and consinclng effort. The contest now took on a different phase. Lincoln's Iepublican friemis urged lim to draw Douglas luto a joint dehite, and be aceordagly sent him a challenge on the ath of July.

On the 30th Douglis tinilly arcepted the proposition to "dlvide time, and indiress the same audlences, , namlug seven different phaes, one ln eath Congresslomal district, ontside of Chlcago ani Springtiele, for joint neetiogs The places and dates were, Ottana, Anrus ?!: Freeport, Angust 27; Joneshoru, N'ptember b: Charleston, September 18; Galonburg wetober i; Qulney, October 13; and Alton, (otom r 15.

Why he lingered, to hrave inevitahie destruction, is not certain; hut it may fairiy be presumed that he had private assurances that the negroes of the surrounding country would rise.

At all eveuts, if his doom was already sealed, his deiay at feast hastened it. Half an hour after noon, a militia force, 100 strong, arrived from Charlestown, the county seat, and were rapidiy disposed so as to command every availahle exit from the piace.

- Miiitia continued to pour in; the telegraph and railroad having been com. pleteiy repaircd, so that the Government at Washington, Gov. Wise at Richmond, and the authorities at Baltimore, were in immediate communication with Harper's Ferry, aud hurrying forward troops from ail quarters.

Night found Brown's forces reduced to three unwounded whites beside himself, with perhaps half a dozen negroes from tive vicinity. Eigitt of the insurgents were aiready dead; another lay dying beside the survivors; two were captives mortaliy wounded, and one other unhurt. Around the few survivors were 1,500 armed, infuriated foes.

During that night, Coi. Lee, with 90 United States marines and two pieces of artillery, arrived, and took possession of the Armory guard, very close to the engine-house.

At seven in the morning, after a pariey which resulted in nothing, the marines advanced to the assanit, hroke in the door of the cngine. house hy using a ladder as a battering-ram, and rushed into the huilding. One of the defenders was shot and two marines wounded; hut the odds were too great; in an instant, ail resistance was over. A. D. 1860,-The Southern view of Slavery. - The stste of opinion and feeling on the subject of alavery to which the people of the southero states had arrived in 1860 is set forth wltb brevity and distinctuess in Claiborne's Life of General Quitman, wbich was published that year: "ly the eariy stages of A frican siavery in the South," says the writer, "lt was by many
considered an evil, that had been inflicted upon the country by British and New England cupldity. The Africans were regarded as barbarians, and were governed by the fash. The very hatred of the 'evil' forced upon us was, in a measure. transferred to the unhappy victims. They were treated with severlty, and no social relations subsisted letween them and tbe whites. By degrees siavery began to be consluered ' a necessary eril,' to be got rid of by gradual emancipation, or perhaps not at ail, and the condition of the siave sensibly improved. Tbe natural sense of justice in the human heart suggested that they liad been brought here by compulsion, and that they siould be regarded not as savages, but as captives, who were to be kindiy treated while iaboring for their uitlmate redemption. The progress of antl-siavery sentiment In the North. ern States (once regarded by the South as a harmiess fanaticism), the excesses it has occasioned, and the unconstitutional power lt claims, at length prompted a general and searciling inquiry into the true status of the negro. The moment that the Southern mind became convinced, that siavery, as it exists among us, instead of being a moral, sociai, and poiltical evil, is a moraj, social, and politicai good, and is tbe natural condition of the negro, as ordained by Providence, and the oniy condition ln whleh he can be civilized and instructed, the condition of the Soutbern slave underwent a thorough change. As a permanent fixture, as a hereditary heir loom, as a human being with an immortal soui, lntrusted to us hy God for his own wise purposes, his $\nabla$ aiue increased, and inis reiation to his owner approximated to the relation of guardian and ward. Interest taught us that it would be wise to cherish what was to be tbe permancnt means of proluction and profit, and religion exacted tbe humane and judicions empioyment of tire 'talent committed to our care. Thus the most powerful influences tbat sway the heart and the judgment are in operation for the benefit of the siave, and hence his present comfortahle and constantiy ameliorating condition. It is due, almost solciy to the moral convictions of the slavebolder. Our daws protect the slave in life and iimb, and against cruci and fuordinatc punishment. Those laws are rigorously applicel, thougb rareiy necessary, for public opinion, more forinidable tban law, wouid condemn to exceration and infamy the unjust aud cruel mastcr. Since these convictions in regard to siavery have heen adopted aimost unanimously in the South, the vaiue of negrops has quadrupled. This, however, is in some mcasure an evil, because the tendency is to concentrate the siaves in the hands of the few, who arc able to pay the extraordinary rates now demanded. It would be better for the commonweaith, and give additional solidity to our system of domestic servitude, if evcry family had an In. terest in It, secured, to a limited extent, against liability for debt. It should eonstitute in the buuth, if praeticabie, a part of evcry homestead, and then interest, and houschold tradition, and the friendly, confidentiai, aud even affectionate relations that in the present state of puhiic feeiIng prevaii between master and slave, would unite ali men in tis defense. Nelther land, nor siaves, which are herc more vaiuabie than land, should, by either direct or indirect iegislation, he concentrated in few hands. Every citizen should have, If possible, that immediate interest in them

Fell, a poiitician of Pennsyivania, says that after the dehates of 1858 [with Douglas] he urged Lincoln to seek the Republican nomination for the presldency In 1060. Lincoln, however, replied curtly that men llke Seward and Chase were entitied to take precedence, and that no such 'good luck' was In store for him.

In the wlnter of 1859-60 sundry 'intlmate friends,' active politiclans of llinois, pressed him to consent to be mentioned as a candidate. Ho considered the matter over ulght and then gave them the desired permlsslon, at the same tlme saying that he would not accept the vlee-presider

Wlth the opening of the spring of i 860 the several partles began the campaign in earnest. The Democratlc Convention met first, at Charleston, April 23; and im. mediately the line of dlsruption opened. Upon the one side stood Dougias, with the moderate men and nearly aH the Northern delegates, whlle against him were the adrocates of extreme Southern doctrines, supported by the administration and by most of the delegates from the 'Cotton States.' The majority of the committee appointed to draft the platform were antl-Douglas men; hut their report was rejected, and that offered hy the pro-Douglas minorlty was suhstltuted, 165 yeas to 138 nays. Thereupon the deiegatlons of Alahama, Mlssissippl, Flortla, and Texas, and sundry delegates from other States, withdrew from tho Conventlon, taking away 45 votes out of a total of 303 . Those who remalned declared the vote of two thirds of a fuli Convention, i. e. 202 votes, to he necessary for a choice. Then during three days 57 hallots were cast, Douglas heing always far in the lead, but never polling more than $152 \frac{1}{2}$ votes. At last, on May 3, an adjournment was had until June 18, at Bultimore. It thls second meeting eontesting delegations aypeared, and the decisions were unlformly in favor of the Douglas men, which provoked another secession of the extremist Southern men. A bailot showed $173+$ votea for Douglas out of a total of $191 \frac{1}{2}$; the total was less than two thirds of the full number of the original Convention, and therefore it was decided that any person recelving two thirds of the votes cast hy the delegates present shouid he ieemed the nominee. The next hallot gave Douglas 1814. Herschel V. Johnson of Georgla was nominated for vlce-president. On June 28, aiso st Baltimore [after a meeting and adjournmezt from Richmond, June 11], there came together a eollection composed of orlglnal seceders at Charleston, and of some who had been rejected and others who hai seceded at Baitimore Very few Northern men were present, and the borly In fact represented the Southern wing of the Democracy. 1living, like its competitor, the merit of knowing its own mind, it promptly nomilnated Johu C. Breckenridge of Keutucky and Josepi Lane of Oregon, and adopted tho radical platform which had been repurted at Charieston. These dolngs opened, so that it
could never be closed, that seam of which the thread had long been visible athwart the surface of the old Democratic party. . .. In May the Convention of the Constitutlnnal Linion party met, also at Baltimore. This organizatlon was a sudden outgrowth designed only to meet the present emergency.

The party died of necessity, upon the diay when Liucoin was eiected, and its members were then tistributel between the Repuhilcans, tho Secessionists, ani the Copperheads. John Bell, of Tennessee, the candidate for the presidency, Jolned the Confed eracy; Fdward Everett, of SIassachusr the candldate for the vlce-presideney, brcuns a Re puhlican. The party never had a hope of elect. ing lts men; hat fis existence incroased the chance of throwing the election lnto Congress and this hope lnspired exertlons far beroad what its own prospects warranted. On May 10 the Republican Conventlon came together at Chicago, where the great 'Wigwam' had been hilit to hold 10,000 persons. . . . Many caudi. dates werc named, chietly Seward, Lincula, Chase, Cameron, Edward Bates of Missunri, and Whiliam L. Dayton of New ersey. Thurlow Weed was Seward's lieutenant. Ilorice Greeley, chiefly bent ugon the defeat of Seward, nould have liked to achlevo it by the success of Bates. David Davis, aided by Julge Logan and a land of personal friends from Hinols, was manager for Lincoin. Primarliy the contest lay brtm en Seward and Lincoin.

thorouglily matured was the protect of secession in the minds of Southern extremists in South Car lina, that they are known actually to have com anced movements looking to this desired end before even the presidentlai eicetlon had taken place, and when the resuit which soon ensuel was yti but a strong prohahlilty. Accordingly we find Governor Gist, as early as the 5th of November, 1860, addressing $n$ measage to the South Carolinn Leglslature, embodying the following bold and explicit dec ${ }^{1}$ aratlons.
'That an exposition of the wlll of the people may be ohtained on a question involving such momentous consequences, I would earnestiy recommend that, in th:e event of Ahrahain Lincoln'selactlon to the presidency, a Convention of the people of this state be immedlately called, :o consider and determinc for themselves the modeand measure of redress. Myrmn opinions of what the Conventlon shonld do are of llttle moment; hut, believing thac the time has arrived when every one, however humhi. he may be, should express his oplnlons in unmlstakahis languge, I am constrained to say that the only alterative left, In my juilgment, Is the secesslon of south Carollas from the Federal Unlon. The Indications from many of the Southern States justify the concluslon thnt the secession of South Carolina will be inmmediately followed, if not adopted shmultancously hy them, and ulthme ${ }^{*}$-iy by the catlre South. . . . I wonld also respectfully recommend a thorough reorganlzatlon of the millitin, so ns to place the whole mbilitary force of the state in a posltion to be used at the slortest notice and wlth the greatest efficiency. . . In additiou to this general preparation, I would recommend that the eervices of 10,000 roluntecrs be inmmediately accepted.' . . I desire not to particularize on this painfui suiject to an extent whtch night now prove annoying, and therefore procecd britgy to state that the Legislature of South Carolina pro lded for the assemblage of a state. Conventlon, the members of which were to be elceterl on the 6in of December, wile the conventionai body itself was to come together on the 19tis of the same month; that the Conrention did nssemble on the iastmentlon ? day, and, after an excitcl dehate of several di ysi coninuance, adopted nn C rance of Secession on the 20th of Dacembr ance missioners were sent with a copy of
$\underset{\mathrm{di}}{\mathrm{m}-}$ nance to cuch of the slave states, in
diquicken co-oprotive action, and notitication was duly mide as to th: eevents to the Fcderal govermant in Wislington City. The next sccession movement it was expected would come of in the State of Gicorgla. A Convention for this purpose hal been already calied. It was known that Alexinuler II. Stopliens I Iersehei Y. Johuson, and other public men, of elevated standiug and of extended lufinence, would be incmbers of
the Conventlon, and It was expected that they would exert themselves to the utmost to prevent the initation by the State of $\mathrm{G}_{\mathrm{e}},-\mathrm{g}$ gin of the rash example which lial Just been set hy South Caroilna; and it was ilkewls known that eminent personages from the State of South Carollna would attend the Conventlon of Georgia, in order to urge immediate co-operation. Under these clrcumstances, I took it upon myseif to persuade the pubiic men of most intluence in the clte of Nashville, where I was then residing, to send ten or fifeen delegates forthwlth to Mialedgcville, respectfinly und carnestly to protest against extreme actlou on the part of Georgla. urged these views forseveral days most zcalousiy: hit, I regret to say, wlthont success; some sut:posing that there was :o scrious dnager of tae Conventlon of Georíis. adoptlig an Ordlnance of Seccsslon, and othe: s that there was renson to fear, if we sho ici sens? delegntes to Milledgeville, It might resuit in fatally compromlsing our own attitudc. The manly opposition made by Mr. Stephens to the attempt to draw Georgla lnto the Secesslon mbeis' com ls well known. Thls want of suce ss ls a circumstance which I shnli evcr deplore as the most unfortunate event of a pulitc nature whiteh has occurred within my recoll ctlon. Abhama, Florlda, Mississippl, Louls ana, and Texas were now som. cnrolled among the seccicd States. Tennessee, North Carolina, Vlrginia, Arknnsas, Kentueky, Mary land, Missouri, and Delaware stil: stood firts, despltc all the efforts essayed to shake thelr constancy. It is Indeed truc, as Mr. Grecley has dellberatciy recorded, that after the secession 'comspiracy had ' cld complete possession of the Southern mind for thrce months, with the Southern memhers of the calsinet, nenriy nh the Federal officers, most of the governors nnd other statc functionnrics, nad seven eighths of the prominent and ective pollticians pushing it on, and no force excrted agaiust nor luany manner threateuing to resist it. a majority of the slavo states, with two thirds of the free population of the entire slavcholding region, wis opeuly and : oltively adverse to it, either because they rcgamell the alleged grievances of the South ns ex , geratel if not unreal, or hecause they helleved that those wrongs would rather he aggravated than cured hy disunion.' "I eclaration of the lmmediate causes which Indu e and justlify the secesslon of South Carollan irom the Federal C'nlon:

The People of the State of South Caroina, In Convention assembled, on the geth day of Apri, A. D. 1852, declared that the frequent vioiatons of the Constitutic of the United States, by the Federai $C$ vernmunt, and its encroachmente upon the reserved rights of the States, fuily jus. thited this State In then withdrawlag from the Federal Unlon; hut In deference to the opinions and wishea of the other slaveholding States, she forbore at that tinc to excrclee thls right. Slnce that tlme, these cacroachments have contlnued to lacrease, and further forbearance ceases to be a virtue. And now the State of South Carollna having resumed her separar. and equal place amoug nations, deems it due to herself, to the remalning United States of Amcrica, and to the nationa of the wurid, that she should declare the immedlate causea which have led to thla act. In tic jear 1765, that portlon of the British Emplre emhraclag Great Britaln, undertook to make laws for the government of that portlon composed of the thirteen American Colonles. A stragg! for the right of self.government ensued, whleh resulted, on the 4th July, 1776, In a Declaration, hy the Colonies, 'that they are, and of right ought to be, free and Indcpendent States; and that, $n=$ iree and independent Statca, they lave flat power to levy war, eonclude peace, contract alliancea, estahliah commerce, and to do all other aets and things which lndependent States may of right do.' They further solemniy declared that whenever any 'form of govcrnment becomes destructive of the ends for which it was estahlished, it ls thic rigitit ot the people to alter or abollsh It, and to instltute a new government.' Dceming the Government of Great Britain to have become destructlve of these ends, they deelared that the Colonlea 'ure ab. solved from all allcglance to the British Crown, and that all politteai conncctlon between them aud the State of Great Britain Is, and ought to he, totally dissolved.' In pursuance of this Dcelaration of Independence, cach of the thirteen Statea proceeded to exerelse its separate sovercignty; adopted for Itself a Constituion, and appointed ollicers for the administration of government ln all its departments - Lcgislative, Executive and Juthiciul. For purposes of defence, they united their arms and thelr counseis; and, in 1778, they cntered into a Leaguc known as the Artieles of Confederation, whereby thicy ugreed to entrust the administration of their external relatiors to $u$ common agent, known as the Congress of the United states, expressly declaring, in the first article, 'that each State retains its sovereignty, freedom and indcpendenee, and cvery power, jurisdletion and right whieh is not, by this Coufederation expressly delegated to the Luited States in Congress assembled. Ender this Confederation the War of the Revolution was carried on, and on the 31 September, 1783, the contest cuded, nuil a definitlve Treaty was signed hy Great Britain, In whlch she aeknowledged the Independenee of the Colonies in the follow. iug terms: • Article 1.-His Britannle Majesty acknowledges the said Cnitell States, viz: New

IIampahire, Masaachusetts Bay, Rhode Iakad and Prorldence Piantatlons, Connecticut, New York, New Jerney. Pennsylvania, llelawate, Maryland, Virginia, North Carolina, South Carollaa and Georgla, to be free, sovereign and independent States, that he treata with them a such; and for himself, hls heirs and suecesonr, ro llaquishes all claims to the government, propriets and territorial rights of the same and every part thereof.' Thus were estabiished the two grat princlyles asserted hy the Coloniea, nameiy: the right of a State to govern itself, and the rightol a peopie to abollsh a Government when it be. comes destructive of the ends for which it was lnstltuted. And concurrent with the estabilish. ment of these principles, was the faet, that each Oolony became and was recognized by the mother Country as a free sovereign and is. dependent State. In 1787, seputies were ap. pointed hy the States to revise the Articles ol Confederation, and on 17 th September, 1is7, these Deputles recommended, for the adoption of the States, the Artclea of Cnion, knuwn as the Constitutlon of the Cnited Sintes. The partles to whom this Constltution was submitted, were the several soverelgn States; they were to agree or ilsagree, and when nine of them nghed, the compact was to take effeet anlong those ons. eurring; and tho General Government, as the common agent, whs then to be invested with thelr authority. If only nine of the thirtetg States had concurred, the other four would have remalned as they were-separate soverelgn states, Independent of any of the provishons of the Constitution. In fact, two of the states did not accede to the Coastltution until long after it had gonc Into opera ion umong the other eleven; and during that $\ln$ crval, they cach cxereised the furctions of an ind spendent nation. By this Coustitu. tion, certaln dutler were Imposed apon esereal States, and the exelcise of certpin of the poners was restrained, which ncceasarliy hiplirid their continued exlstcace as soverelgn Stutes. But, to remove all douht, - amendment was addd, whieh declared that the powers not delegated to the Unlted States by the Constitution, aor prolifblted hy it to the States, are reserved to the States, respectively, or to the people. On 23d May, 1788, South Carolina, by a Convention of her people, passed an Ordinance assentirg to thls Constitution, and afterwards altered her own Constitution, to conform herself to th: obllgations she lad uudertaken. Thus was stablished, by compact between the States, 1 Government, with defined objects and powers, limited to the express words of the gramt. This limitation left the whole remainin? Fass of power sulject to the clause reserving it to the States or to the people, and rendered unnectssary any speclication of reserved rights. We hold that the Government thus cstablishell is subject to the two great principles asserted in the bectsration of Independenee; and we hold further. that the mole of its formation suljects it to s third fundamental principie. naucly: the law of compaet. We mulntain that iu every compacs between two or more parties, the obligation is mutual; that the fallure of one of the contracting parties to perform a material part of the agrcement, entirely releascs the obligation ol the other; and't! where no arbiter is provilped, esch party is ren...ced to his owu judgment to deter uine the fact of faiiure, with all its consequences. fonth Caro. relgn and th them cessors, to , propriety every part two greal amely: the be right ol ben it be hich It was establish. , that each d by the n and in were ap. drticles ol ber, 1887, autoptlon known ates. But, ras added, legatel to nor proved to the - On 28 d onvention sentirg to ltered her to th: obwas stab.

In the prosent case, that isct is entabilahed with certalntr. We assert, that fourteen of the States bave deliberately refused for years past to fulfil their constitutional obligations, and we refer io their own Ststutes for the proof. The Consti. fution of the Uniter States, in its 4th Article, prorldes as follows: ' No pertion held 10 eervlce or labor $\ln$ one State, under the is wa thereof eicapling lnto another, shsll, in consequence of any iaw or reguiation therein, be discharged from auch service or labor, but shall be delivered up, on cialm of the party to whom such service or labor may be due.' Thls stipuiatlon was so materlal to the compact, tha', wlthout lt that compact w uld not have beun made. The greater number of the contrarting partles held slaves, unt they had provlously evlnced their eatimate ol the value of sich atipulation by makling it a conltioa in the Ordinance for the government ol the territory ceded by VIrginia, which now composes the States north of the Ohio Hiver. The same articie of the Constitution stlpuiates also for rendition hy the several States of fugltives from justles from the other States. The General Goverument, as the common agent, passed laws to carry into effect these stlpulatlon: of the States. For many years these laws were esecuted. But an lncreaslng hostillty on the part of tive non-slaveholding States to the Institution of Slavery has led to a dlsregaril of their ob!!gatioas, and the laws of the Gcueral Government bave ceased to effect the objects of the Constitution. The States of Malne, New Ilampthire, Vermont, Massachusetts, Connectlcut, Rhode Ishnd, New York, Pcnnsylvauia, Illi: nols, Indiaaa, Michigan, Wisconaln and Iowa, bare enacted laws which elther nuillfy the Acts of Coniress or render useiess any attempt to exccute them. In many of these States the $f$ itive is dlscharged from the service or labor aimed, and In none of them has the State Government compiled with the stipulation made in the Constltution. The State of New Jerses, at an early day, passed a law in con. formity with her constitutional obligation; but the current of anti-aiaver fecllng bas led her mare recently to enact las's which reader lnoperative the remedies provh'ed by her own law and by the laws of Congress In the State of liew lork even the right of tinslt for a slave has been dealetl by her tribunais, and the States of Olio and Iowa hnve refused to surrender to justice tugitives charged with murder, and wlth inciting servile insurrection In the State of Vlrginia. Thms the constltutional compact has been deliberate!y broken and disregaried hy tife nonslavelolding States, and the consequence follows that South Carolina ls released from leer obliga. tion. The ends for which this Constitution wrid framed are declared by itself to be it form a more perfect ualon, establish justice, Insure domestic tranuuility, provide for the comnon defence, promote the general welfare, and secure the blessings of ilberty to ourseives and our pos tenty.' These euds it endeavored to accomplish hy a Fedenil Government, In which each Stai: was recognized as an equai, and had separate control over lts own institutlons. The right of property in slaves was recogalzed by giving to free persoas distinct political rights, by giving thenthe right to represent, and burthening them with direct taxes for three-fifths of their slaves by authorizing the lmportation of slaves for
twenty ycars; and by silpulating for the rend thon of fugltlven from iabor. We affirm that these ends for which thils Government was insti. tuted have been defeated, and the Government Itself has been made destructlve of them by the actlon of the non-slaveholding States. Those States have assumed the right of declding upon the propriety of our domestlc institutlons: and have denled the rights of property estabilshed in ffteen other States snd recognized by the Constltution; they have denounced as sinful the Institutlon of Slavery; they have permitted the open establishment among them of socleties. whose avowed object ls to disturh the peace and to clalm the property of the citlzens of other States. They have encouraged and assisted housands of our slaves to leave their homes and those who remaln, halis been incled by emissaries, books sand pletures to servlle lnsurrec tlon. For twenty-five years this agitation has been steadily lncreasing, untll it has now secured to its aid the power of the Common Government. Observing the forms of the Constlitution, a sec tlonal party has found within that article establlshing the Executive Department, the means of subverting the Crastltutlon itself. A geographical llne has been drawn across the Cnlon, and all the States north of that line have united in the eiectlon of a man to the high office of Presl. dent of the Inlted States whose oplnlons and purposes are instlle to slavery. He is to be entrusted with tie adminlstration of the Common Government, because he has dcclared that that - Govcrnment cannot endure permanentiy half slave, half free,' and that the publle mind must rest In the beilef that Slavery is In the course of uitimate extlnction. This sectionni comblnatlon for the aubversion of the Constltution, has been alded $\ln$ some of the States by elevating to clitizenship, persons, wiso, hy the Supreme Law of the land, are incapable of becoming citizens: and thelr votes iave been used to Ingugurate a new pollcy, lostile to the South, and destructive of its peace and safcty. On the 4 th March next, this party will take jossession of the Goverament. It has announced, that the Sonth shail be excluded from thic cominon Territory; that the Judiclal Tribunais alail be made sectional, and that a war must be waged ngainst slavery untli It shall cease throngiout the Unlted States. The Guarantics of the Constitution whll then no louger exlst ; the cqual rights of the States will be lost. The aiavchoiding States will no longer have the power of self-government, or self-protection, and the Federnl Government wlll have become their cnemy. Sectionai interest and animosity wlll decpen the lrittatlon, aud all hope of remedy is rendered vain, by the faet that pubile oplnion at the Nortil has invested a great polittcai crror with the sanctions of a more erroncous rellgious belice. Wc, therefore, the people of South Carolina, by our delegates, In Conventlon nssembled, appeaifng to the Supremc Judgc of the worki for the reetitude of our Intention: have solenuly deciared that the Unlon heretofore exlsting letween this State and the other States of North Amcrica, is dissoived, and that the State of South Carolina has resumed her position among the nations of the worid, as a separate and independent State; with fuil prower to levy war, conclude peace, contract ailiances, estahlish commerce, and to do all other acts and thlngs which Independent States may of right do."

A. D. 1860 (December)-President Bnchanas'e aurrender. - His disunion mesacte and lts evil effecte.-Congress met oa the frat Monday of December and recelved from President Buchana. "his mischlevous aad deplorahle mes. ange... - m meseage whone evll effect can never be entmated, and whose evil character can hardly be exaggerated. The Prethent laformed Coagress that the long-contlaued and latemperate laterference $\mathrm{c}^{\prime}$ the Northera people with the questlon of sla very la the Southeru States has at last produced its natural effect.' . . . The Presldeat found thut the ehlef grievance of the South was in the enactments of the Free states kaown as 'persomil Hberty laws' [deslgned to protect free cltizens, back or white, in thelr right to trial by jury, which the fuglive slave law dealed to a black man clatmed as a slave]. Very Ilkely these enactments, lasplred by an earneat spliti of Hiverty, weat In many casea too far, and tended to produce contllets between Na. tloash aad State authority. That wha a questlon to bo determlaed finally and excluslvely hy the Federal Judiclary. Unfortunately Mr. Bucbanaa carried hls argument beyoad that polat. After recling the statutes which he regarded as objectloaable and hostle to the constitutlonal rights of the South, aad after urging their uacoadllioaal repeal upou the North, the Presldeat sald: 'The Southera States, standing on the basls of the Constltutlon, haves right to demand thle act of Justice from the States of the North. Should it be refused thea the Constlitution, to which all the States are partles, will have been willfully volated. . . Ia that event, the lajured States, after having used all peaceful and constltutlonal means to obtaln redress, would be justl. fled in revolutlonary, resistance to the government of the Vnlon. By thls dectaration the President justificd, and in effect advlsed, an ap. peal from the constletuthaal tribunals of the coultry to a popular judgment lu the aggrleved Biates, nnd recognalzed the right of those States, upon such popular judgment, to destroy the Coastltution and the Culoa. . . . Mr. Buchaaau procecded to argue ably and earnestly agalnat the assumpilon by any state of aa mhlereat right to secele from the government at its owis will and pleasure. But he utterly destroyed the force of lifs reasoaiag ly declaring that, "aiter nuch serlous reflection the had arrised at 'the conclusion that no jower has been delegated to Congress, or to any other departmeut of the Federal Goverument, to coerce a Stute into submission which is attennpthg to withdraw, or has actually withdrawn,' from the Unlon.

Un. der these doctrines the Government of the Unlted Stutcs was sborn of all power to preservelts own exlstence, and the Union might crumble and full whlle its coustituted authorities stood paralyzeal and impotent. This constructlon was all that the extremists of the south desired. With so much conceded, they had eviry thing la thelr own hauds... Men who, nader the whole. some ristralnt of executive power, would have refrainel from taking aggressive steps agaiast the National Coverument, were by Mr. Buchanan's action forced Into a position of hostility. Mrn iu the sonth, who weae disposed to nvoud extreme measures, were by taunt and reproach driven latn the rathe of teessluu.

The evil edects of Mr. Buchanan's message were not coa. Hacd to the slave sties. It ilid lacalculable
harm in the free States. It fised In the minds of tens of thnusands of Northern meth who were opposed to the Repubilcan party, the lellef that the South wat jusitited In taklng steps to break up the government, if what they temned a was na southern Inatitutions should lee runtlmed. A. D. 1860 (December).-Major Anderson at Fort Sumter. - Floyd's treachery In the War Department.-Cabinet rupture.-Loyalty re. instated in the nallonal covernment. -"In November, 1860, the fortlileatlons of Charleaton IIarbor consisted of three works - Castle Pinek. ney, an old-fasiloned, elreular brick fort, on Shute's Foliy Island, snd about one mile east of the elity; Fort Monltrie, on Sullivan's Island, still farther to the cast, and famous as being on the site of the oid fort of palmetto logn, where, during the long bombardment by the British feet in levolutionary days, the gallant Willama Jasper fenjed from the low rampart upon the beach below, and selzing the fiag that had been thot down, rehoisted it above the fort; and lastly, Fort Sumter, an unfinlshed fortitication, named after General Thomas Sumter, the fumous partsan leader of the Revolution, and who was familiarly knowu as the 'gamecock of the Carolinas.' The armament of Castle l'inckney con. sisted of 22 cannon, 2 norturs, and 4 light pleces; that of Moultrie of 45 eannen and 7 light pleces; wlille Sumter mounted 78 heavy guns of various calibre. The entire force of United States troups in these fortificatlons wns composed of two weuk companies of arthiery under command of Mitjor lober. Anderson, and a few ensineer employees under Cuptaln John G. Foster. Of these a sergeant and squad of men were stationed at Castle Pinckncy for the eare of the quarters and the guns; a shmllar handful were at sumter: while most of the little force were at Mouitrie, where Anderson had his headquarters. Such was the military situation when South Carolina began to proclaim, without disgnise, her purpose to secede nad to posseiss herself of the fortitications on her eoast. . . Our Governmeat paid uo apparent heed, and yet the authori. ties at Washington were fully nad letimes foreTaruced.

On the files of the Eugineer Deparment 1 found a letter, which still remains there, dated as early as November ${ }^{2} 4,1860$, from Captain Fouter to Colonel De Russy, then the clief of the eugineer corps, in which : captain states that, at the requist of Major Anderson, he has, in company with that oftheer, nunde a thorough aspection of the forts in the harbor; that, in the oplnton of Inderson, oute udhitional company of artillery shonld at once be scut to garrison Castle linckney, wiich In the terse language of the letter, 'commands the city of Charleston.' pon the back of the letter Is the simpie but sig. nificant indorsement, in his own hand-writing himurz iu Guvernor Floyd." You may recali Sovember 30 . Canan's Secretary of War. On November 30, Captain Foster agaln writes to

Colonel De Russy, mying: 'I think that more troops shoukd have been ment here to guard the fortis, and I belleve that no serious demonstration on the part of the populace would have met such a courne.' On this Is Indorsed: 'Colonel Cooper says thls has bewn shown to the Seeretnry of War. 11. G. W:' The Inltials, piaced there by hmmeif, are those of the guifant lloratio. G. Wright, who suceeedel to the command of the Bixth Army Corps after the ioved Nedgwick fuli. On Decentier 2, application wna made hy Captain Foster for the mali supply of foner boses inf muskets and sixty mounds of cartridge per nimin, to arm the few eivilians or hired laborers who constituted the engineer corps. These arms and amminitlon were in the C'alted States aravini at Charleston, a buiding which stili had a Felleral keeper, and over whichatilj flonted the Federal tlag. On this appilcation is the following ln . dorsement, also lid Cencral Wright's handwriting: ' Handed to culjutaut-general, and by film lafd before the Beeretary of Wur on the sixth of De. cember, Ileturned by adjutant-gencral on the Ceventh. Action defermel for the present. See Captain Foster's letter of Decemleer 4 .'
$\mathrm{Se日}$
On Decemier 17, Captain Foster, netlng on his nown patriotic juigment, but without orders, went to Charleston and took from the Firlerai arsun! forty mukets, with which to arm his faborers. Early on the morning of the $19 t h$, he reeeived a telegram from Secretary Fioyd, direeting hims Instantiy to return the arms to the arsenai. On the next day, the 20 th , the Soutit Carolininns dechled, in State corvention, to secede, and proelalmed their Stai $n$ independent soverelghty.

Ail alike we. delirions with the epldemic malness of the hot were hopefni, resolute, enthusiastle. Belis pea. Innd cannon inwoned. But few ventured to breust the storm. There was one, Whose unine should live honored in a nntion's memory, n wise, true man. the greatest lawyer of his State, Janes L. Bettigrew, who, when his minister first lropped from the service the prayer for the I'resident of the U'nited States, rose in hils pew in the midide aisle of C'haricston's most fashionable chureh, and slowly and with distinet volce rejeated: - Most humbly and heartily we bescer'h Thee with Thy favor to behodil nnd bless Thy servant, the I'resident of these Lnited States.' 'Then, phacing his prayer-book In the raek, and druwing his wife's arm within his own, he left the charch, nor eutered it ngain until his bely was borne there for buriai. To their honor be it said, that everu the Carolinians respected his sinecrity inml candor, and never molested him. . . On tite night of L. cember 26. Major Anderson evacuated Fort Honitrie which was mitenable by his smali force, spliked his guns, burned the gun-carriages, nod trans ferred his sumal eommamel in two schoonem to Fort Sumter. This aet was withont orders and against the do-nothing am! hefpless policy which lad thus far coatrollal the Government. But it showed the wisdom and prompt decision of the tratued soldier nad the spirit of the loya! citizen.

Let us recall whe uppearance of Sumter when Anderson trausferred his fereble garrison to its protection. The fort was built on an artiticial island, which had heen ronstructed by dumping stane upan a shatil that lisy un the south side of the principal ship channel to Chnrieston Harbor. Sumter was pentagonal in form, and its tive sides of brick, made solld by
soncrete, row 60 feet above the waker, It was plerced for an armament of 185 guns , whieh were to be placed in three tiers. Two tlers were to be In casemates, abd one 'en barbette,' or on the tup of the wall. The embrasures of the upper tier of casemates were never completed. They wero flled up with brick during Major Andermon's oc. copatlon of the fort, and to remained during all the succeeding operatlons and alege. Soventy. eight guns of various ealibre composed fis then armanient, the most efflcient of whiels were plneed 'en barbette.' On the east and west aides of the parade were barracks for the privatec, and on the gouth alde were the offlecr: quarters. These were all wooden structures. The wharf by whleh aeces was had to tho fort was on the southern she against the gorge wall. Looking from the acn frout, Sumter lay neariy maldwy letween Sullivanis lsland on tho north and the low, sumly rlages of Morris on the south, and about 1,400 yarle from elther. The maln ship channel was between Simter and Sullivan's Island. The water between tise fort and Alorris Islnad was for the most part comparatively shal. low. James Islnnd lay to the west and south. weat, whlle to the northwest, and at a ilatance of three and one-thind miles, rose tho steeples of Charleston. The elty could have been barely reached by the heaviest guns of the barbette bat. tery. Cuatle Piackncy lay in the dlrection of the caty, and was distant about two and onethird miles. Sullivan's, Jorris, and Jumes Islands thus formed a segment of threc-fourths of a circle around Sumter. They were so close under the guns of the fort that, whth the then Ilmited experienec in the construction of eurth. works, no batteries eould have been ereeted under fire from Sumter sufficiently strong to prevent the re-enforecment nnd supplying of the fort, hul Anderson been allowed to open fire at the first npon the rebel working purties. At noon of December 2\%, the flag of the arition was raised over the defenders of the fort. Iryor Anderson kneit, holding the bulifinds, while Rev. Natthew IIarris, an army chapiala, offered fervent prayer for that dear flag and for the loyal few who stoed bencath lts folds. . . . Aall then nll wearly the days and weeks dmgged on. New fortifcations rose day by day on eaeh sandhili about the harbor; vessels of war, bearing the Conferlerate flag, stenmed lasultingiy near, and the islands were white as harvest flelds, with the tents of the fast-gnthoring rebel soldiery; and stlll, by positive onlers, Anderson was bidden to stand In file helplessness beside his silent ludle. aant canaon. The provilions $\ln$ reference to the election of Scnators and Representatives and the powers and duties of each House were unaitered except that the electors of each State were required to be clitizens, and the Senatorn were to be chosen by the Legislaturea of the State at the session next Immediately precedlag the beginning of the term of service. In reference to the general powers of Congress, some of the changes were more vital. The gencral welfare clause was omitted from the taxing grant. Bounties from the Treasury and extra compensation to contractors, officers, and agents were prohibited. - A Protective Tarif' wac so far forbidden that no duties or taxes on lmportations could be lald to promote or foster any branch of industry. Export duties were allowed rith the concurrence of two thirds of both Hownes. Congress was forbidden to make internal improvements except to furnish lights, beacons, buoys, to improve harbors, and to remove obstructions in river navigation, and the cost of these was to be paid by duties levied on the navigation facilitated. That the objects might be better attained, States, with the consent of Congress nnd under certain other restrictions, were nllowed to lay a duty on the sea-going tonnage participatlog in the trades of the river or harbor improved. States, divided by rivers, or through which rivers flowed, could enter lnto compacts for improving their navigation. Uniform laws of naturalization and bakkruptcy were authorlzed, but bankruptey conld not affect debts contracted prior to the passage of the law. A twothirds vote was made requisite to appropriate money unless asked and estimated for by sone one of the heads of the departments. Every law must relate but to one subject, and that was to be expressed in the titic. To admit new States required a vote of two tulrds of each House, the Senate voting by States. Upon the demand of any three Stntes, legally assembled in their several conventions, Congress could summon a convention to considier amendments to the Constitution, but the convention was confinct in its action to propositions suggested by the States making the cali.

The importation of negroes of the African race was forbld den, and Congress was required to pass laws effectually to prevent it.' The right of transit or sojoura with slaves in any State was secured and fugitive shaves - called 'slaves' without the euphemism of the old instrument - were to le delivered up on the claim of the party to whom they belonged. Congress conlid prohibit the in. troluction of slaves from States and Territories not included in the Confederaey, and laws im pairing the right of property in negro slaves were prohibited. Slaves could be carried into any Territory of the Confederacy by clitizens of the Confederate States and be protected as property. This clause was intended to forbid 'squatter sovereignty,' and to prevent ndiverse action against property in slaves, nutil the Territory should emerge from a condltion of pupilage and dependence lnto the dlgnity, equality, and sovereignty of n Stute, when its right to define "property' wonla be beyond the interference or control of Congress."-J. Stepheths, in his "Cunstlutional view of the inte War between the States," ex. presses the opinion that the selection of Jeffer-
son Davis for the Presidency of the Confederacy was due to a misunderstanding. He says that majority of the states were looking to Georgh for the President, and the Georgia delegation had unanimously agreed to present Mr Toombs who would have been acceptabie. But a mumor got currency that Georgia would put formand Howell Cobb, whereupon the other states trok up Davis, and united upon him. 4. D. 1861 (February-March)-The inanearation and the inausural addreas of Prestdeat Lincoln. - "On the 11 th of Fehruary, wlth his family and some personal friends, lincoin left his home at Springtield for Washington.

On his way to Washington, he passed through the great states of Indlana, Ohlo, New York, New Jersey, and Pennsylvania, and was everywhere recelved with demonstrations of loralty, as the representative of the uational gorernment. He addressed the people at the capitals of these states, and at many of their chief towns and clttes. The clty of Washington was surrounded by siave territory, and was really within the lines of the insurgents. Baitimore was not oniy a siaveholding clty, but nowhere was the spirit of rebelifon more hot and ferocious than among a large class of its people. The lower classes, the material of which mohs are made, were reckicss, and ready for any outrage. From the date of his election to the time of his start for Washlngton, there had often appeared in the press and elsewhere, vulgar threats and menaces that he shouid never be inaugu. rated, nor reach the capital allve. Little attention was pald to these threats, yet some of the President'a personal friends, without his knowledre, employed a detective, who sent agents to Baltimore and Washington to Investigate.
The detectives ascertained the existence of a piot to assassinate the President elect, as he passed through Baitimore. The first inteliigence of this conspiracy was communicated to Lincoin at Phlladelphia. On the facts belng Inld before him, he was urged to take the train that night (the 21st of Fchruary), hy which he would reach Tashlngton the next morning, passlng through Baltimore carifer than the conspirators expectei, and thus avoid the danger. Having aiready made appointments to meet the citizens of Philadelphia at, and raise the United States fiag over, Independence Hall, on Washington's blrthday, he iind, and also to meet the Legisiature of Peonsylvaniaat Ifarrisburgh, he declined startlng for Washington that nlght. Finaliy his fricnds persuaded him to allow the detectives and the officers of the railwnys to arrange for him to return from llarrisburgh, and, by special train, 10 go to Washington the alght foliowing the ceremonles at Inrrisburgh. . . . He went to llarrishurgh according to arrangemcut, met the Legislature, and retired to hls room. In the meanmbile, Generai Scott nnd Mr. Seward had learned, through other sources, of the existence of the plot to assassinate him, and had despatched Mr. F. W. Seward, a son of Senator Seward, to upprise him of the danger. Informntion coming to bim from both of these sources, each Independent of the other, induced him to yieid to the wishes of his friends, nad anticipate his journey to Washington. Besides, there had reached him from Baltimore no committee, elther of the municipal authorities or of cltlzens, to tender him the hospitalities, and to extend to him the courtesies of that clty, as had been done by every other city throngh which he had passed. He was persuaded to permit the detectlve to arrange for his going to Washington that night. The telegraph wires to Buitlmore were cut, Harrisburgh was isolatcrl. and, taking a speclal traln, he reached Philadelphia, and driving to the Buitlmore depot, found the Washington train waiting bis arrival, stcpped on board, and passed on
without interruptlon through Baltimore to the national capital. . . He afterwards deciared ' I dld not then, nor do I now believe I should have been assassinated, had I gone through Baltimore as first contemplated, but I thought it wise to run no risk where no risk was necessary.

On the 4th of March, 1861, he was inaug urated President of the Unlted Stutes. . . In the open alr, and with a voice so clear and distinct that he could be heard by thrice ten thousand men, he read hls inaugurai address, and on the very verge of civli war, he made a most earnest appeai for peace."-I. The following is the full text of the inaugural address, from Lincoln's "Complete Works."
"Fellow-Citizens of the United States: In complinnce with a custom as old as the government itself, I appear before youl to address you briefly, and to take, In your presence, the oath prescribed by the Constitution of the Cnited States to be taken by the President 'beforc he enters on the execution of his office.' I do not consider it necessary, at present, for me to dlacuss those matters of ndministrntion about whlch there is no special anxiety or excitement. Apprehension scems to exist nurong the people of the southern states, that, by the accession of a repubifcan administration, their property and thelr peace and personal security nre to be endangered. There has never been any rensonable cause for such apprehension. Indeed, the most ample evidence to the contrary has afl the while existed and been open to their inspection. It is found in nearly all the published speeches of him who now nddresses you. I do but quote from one of those speeches, when I declare that - I have no purpose. directly or indirectly, to Interfere with the institution of siavery in the states where it exists. I believe I have no lawful right to do so, nad I have no inclination to do so." Those who nominated and clected me dld so with full knowledge that $I$ had made this nad many similar declarations, and fiad never recanted them. And, more than this, they piaced in the piatform, for my acceptance, and as $n$ law to themselves and to me, the ciear and emphatic resolution which I now real. - Resolred, That the maintenance invionate of the rights of the states, and especially the right of each state to order and control its own domes tle institutions accorrling to its own judgment exclusively, Is essential to that balance of power on which the perfection nud endurance of our political fabric depend, nud we denounce the fawless invasion by armed force of the soll of any state or territory, no matter under what pretext. as nmong the gravest of crimes.' I how reiternte these sentiments; nud in dolng so I only press upon the public attention the most conclusive evidence of which the case is susceptible, that the property, peace, and security of no section are to be in any wise endangered by the now incoming administration. I add, too, that all the proteetion which. consistently with the Coustitutiou and the laws, can be given, will be cheerfully giveu to all the states when lawfully demanded, for whatever cause - as cheerfully to one section as to another. There ls uuch

controversy about the dellvering up of fugltives from servlce or labor. The clause I now read is as plainiy written In the Constitution as any other of its provislons: 'No person held to service or labor in one state under the laws thereof, escaping into another, shall, in consequence of any law or regulatlon therein, be discharged from such service or labor, but shall be delivered up on clalm of the party to whom such service or labor may be due.' It is scarcely questloned that this provlsion was lntended by those who made lt for the reclaiming of what we call fugitive slaves; and the lntention of the law-giver is the law. Ali members of Congress swear their support to the whoic Constltutlon to this provlsion as much as to any other. To the propositlon, then, that slaves whose cases come withln the terms of this clause 'shall be delivered up,' their oaths are unanimous. Now, If they would nake the cffort in good temper, could they not, with ncarly equai unanimity, frame and pass a law by means of which to keep good that uuanimous oath? There is some difference of opinion whether thls clause shouid he enforced by natlonal or by state authority; hut surely that difference is not a very materlal onc. If the slave is to be surrendered, it can be ' $f$ but little consequence to him or to others br which authority It Is done. And should any one, in any case, be content that this oath shall go unkept on a merely unsuhstantial controversy as to how it shall he kept? Agaln, in any law upon this subject, ought not ail the safeguards of liberty known ln civilized and humane jurisprudence to he introluced, so that a free man be not, ln any case, surrendered as a slave? And might lt not be well at the same time to provlde by law for the enforcement of that clause in the Constitution whlch grarantees that 'the citizens of each statc shall be entitled to all privileges and lmmunties of citizens in the several states'? I take the oftlicial oath today with no mental reservations, and with no purpose to construe the Constitutlon or laws by any lypercritical rules. And whlle I do not choose now to specify particular acts of Congress as proper to be enforced, I do suggest that it whit he much safer for all, both in otticiai and private stations, to conform to and ahide hy all those acts which stand unrepealed, than to violate any of them, trusting to find lmpunity in having them held to be unconstltutional. It is seventy.two years since the first inauguratlon of a President under onr Fational Constitution. During that peritht, tif teen different and greatly distinguished citizens have in successlon administered the executive branch of the Goverument. They have conducted it through many peris, and generally with great success. Yet, with all this scope of precedent, I now enter upon the same task, for the brief constltntional term of four ycars, under great and peculiar difficulty. A disruption of the Federal Union, heretofore only menaced, ls now formidally attempted. I hoid that in the contemplation of uulversal law aud of the Constitutlon. the unlon of these states is perpetual. Perpeculty is implied, if not expressed, In the fundamental law of all natlonal governments. It is safe to assert that no government proper ever had a provision lu its organic iaw for its own termination. Continue to executc all the express provisions of our National Constltution, and the Union will endure forever, it being

Imposslble to destroy it except by some action not provlded for ln the instrument ltseif. Again, If the Unlted States be not a government proper, but an assoclation of states in the nature of : contract merely, can lt, as a contract, be peace. ably unmarle by less than all the parties who made lt? One party to a contract may violate it - break it, so to speak; but does it not re. quire ali to lawfully rescind lt? Descending from these generai principles, we find the proposition that in legal contemplation the Cnion is perpetual, confrmed by the history of the Union ltself. The Union is much older than the Constitution. It was formed, In fact, by the Articles of Associatlon $\ln 17 \pi 4$. It was matured and contlaued hy the Declaration of indepen. dence $\ln 1776$. It was further matured, and the faith of all the then thlrtecn states expressly plighted and ragaged that it should be per petual, by the Artlcles of Confcderation, in 1 is And finally, in 1787, onc of the declared objects for ordalning and establlshing the Constitution Was 'to form a morc perfect Union.' \$3ut if the destruction of the Union by one or by a part only of the statea he lawfully possible, the Cnim Is less perfect than before the Constitition. has ing lost the vital elcment of perpetuity. It fol lows from these vlews that no state, upon its own mere mothon. can lawfully get out of the Union; that resolves aud ordinances to that effect are legally vold; and that nets of violence within any statc or states agninst the authonity of the United States arc insurrectionary or resolutlonary, according to circumstaners. I therefore conslder that, in view of the Constitution and the laws, the Union is unbroken; and, to the extent of my alility, I shall take eare, as the Constitutlon itself expressly enjoins upon me, that the laws of the Unlon he faithfully executed in all the states. Dolng thls I deem to be onlry simple duty on my part ; and I shall perform it so far as practicable, unless iny right ful masters. the American people, shall withhold the requisite means, or in some authoritative manner difeet the eontrary. I trust thls will not be regamiel as a menacc, but only as the deelared purpowe of the Union that it will constitutionally defed and maintaln itself. In dolng this there nethis to be no bloodshed or violence, and there stall be nonc unless it he forced upon the natumed allthority. The power confided to me will be used to hold, occupy, and possess the propert and piaces belonging to the Goverrment, anito collect the dinties and lmposts; bit bryond what may he necessary for these objects there will to no invasion, no using of force arainst or among the people anywhore. Where hosility to the United States In any interior lorality shall fe so great and universal as to prevent competret resident citizens from holding the feleral otfices there will be no attempt to foree obnoxious sirin. gers among the people for that object. While the strict legal right may exist in the Goverumets to euforce the exercise of these ollles, the attempt to do so would be so irritating, and s) nearly lmpracticahle withal, that I weem it butte to forego, for the thac, the uses of such oflices. The malls, unless repelled, will continue to be furnlshed in all parts of the Union. So far as posslble, the people everywhere shall hare that sense of perfect security which ls most tavorabie to calm thought and refection. The course bere Indlcated whil be followed, uuless current events
and experience shall show a modlfication or change to be proper; and ln every case and exlgeacy my best dlscretlon will be exerelsed according to clrcumstances actualiy exlstlog. and with a vlew and a hope of a peaceful solutlon of the natlonai trouhles, and the restoration of frateraal sympathies and aflectlons. That there are persons, in one section or another, who seek to destroy the Union at all events, and are gladi of any pretext to do it, I will nelther affirm nor deny; but If there he such, I need address no rord to them. To those, however, who really love the Unlon, may I not speak? Before entering upon so grave a matter as the destruction of our natcuai fubrie, wlth all its benefita, lts memories, and its hopes, wouid lt not be wise to ascer. tain preclseiy why we do it? Will you hazard so desperate a step, while there is any possihility that any portlon of the llls you fly from iave no real existence ? Wlil you, wilie the certaln ilis jou tly to are greater than all the reai ones yon dy from-wlli you risk the commisslon of so fraffula malstake? All profess to be content in the Unon if all constitutional rights can be maintaiaed. Is it true, then, that any right, plainly written ln the Constitutlon, has been deuled? 1 think not. Happliy the human mind is so coastituted that no party can reach to the audacity of dolng this. Thlak, if you can, of a single iastance ln which a plainly written prorision of the Constltation has ever been denied. lf, by the inere force of numbers, a majority should deprive a inlnority of any cleariy written constitutioaal right, it might, in a moral point of view, jastify revolution-certainly would if such a right were a vital one. But such is not our case. All the vital rights of minorities and of individaals are so plainly assared to them by afirnitioas and negations, gasrantees and prohibitious in the Coustitution, that controversies never arise concerning tinem. Bat no organie law can ever be framed with a provislon specitie ally applicable to every question which may occur ia practical administration. No foreslght can anticipate, nor ayy docnnient of reasomble length coatain, express provisions for ail possible questions. Shall fugitives from inbor be surrendered by natioal or by state anthority? The Ciurtitution dues not expressly say. May Con-

- prohlbit slavery in the Tcrritories ? The custitution does not expressly say. Must Con. gress prutect slnvery ia the Territories? The Cunstitutioa does aot expressly say. From ques. tioas of this chass spriag ali onr constitutional controrersies, and we divide upon them into majorities and miaorities. If the minority wili not acquiesce, th. majurity mnst, or the Guvernmeat aust cease. There is no other alternatlve; for contiming the Goverament is acquiesceace on one side or the other. If a minority in sueh case will secede rather than acyuliesce, they wakc \& precedeat which, in turn, will divide nnd rula thera; for a miuority of thelr own will secede from then whenever a inajority refuses to be coutrolled by such minority. For lnstance, wity may not any bortion of a new Confederacy, a year or two le uce, nrhit mrily seeede ngain, precisely us portions of the present Union now ciaina 6) secede from it? All who cherish disunion sutiments are now being educated to the exnet tumper of doing this. Is there such perfect ideatity of iaterests among the states to compose a new Lnlou as to produce harmony oniy,
and prevent renewed secession? Plainly, the central ldea of secesslon is the cssence of anarchy. A majority held ln restralut hy constltutlonal checks and iimitations, nud nlwnys changing easlly wlth deilberate changes of popular opinions and sentiments, ls the only true soverelgn of a free people. Whoever rejects it, does, of neeessity, ty to anarchy or to despotisin, Unanimity ls lmpossible; the rule of a minorlty, as a permanent arrangement, is wholly inadmissihie; so that, rejecting the maJority principle, anarchy or despotism, in some form, is ail that is left. I do not forget the posltion assumed by some that constitutlonal questlons are to te decided hy the suprene Court; nor do I deny that such decislons must be hindlug la nny case upon the parties to a sult, as to the object of that sult, whlle they are aiso entltled to vary high respect nud consideration in all parallel cases by all other departments of the Governonent ; and whiie it is obvionsly possi. hie that such declsion may be erroneous in any given case, stlll the evil effect foilowlng it, being limited to that particular ense, with the chanee that it may he overruled and never become a precedent for other cases, can hetter be borne than could the evils of $n$ difterent practlce. At the same time the candld eltizen must confess that If tire poilicy of the Governinent upon vital questlons affecting the whole people is to be irrevocably fixed by decisions of the Supreme Coart, the lnstant they are made, lu ordinary iitigation between parties in personal actioas, the peopie will inne ceased to be their own rulers, having to that extent practically resigned their Gorernment into the hanis of that emiaent tribunai. Sor is there in this view any nssault upon the Court or the Jatiges. It is a duty from winch they inay not shriak, to declde cases properiy bronght before them, and it is no fant of theirs if others seek to turn their decis. lons to politieal purposes. One section of our country belieres slavery is right and ought to be extended, while the other believes it is wrong and onght not to be extended. This is the only substintinl dispate. ihe figitive-slave clanse of the Constitution, and the law for the sappression of the foreign slave-trale, nre each as well enforeed, perhipls, as nuy law can ever he in a communaty where the moral sense of the people imperfecty supports the law itself. The grent borly of the people able by the dry iegal obligation in both cases, aad a few break over In each. This, I think, canaot be perfectiy cared; and it would be worse iu both cases after the separation of the sectioas than before. The foreign sla we tralk, now inperfectly suppressed, wouhl be ultimitely revived, withont restriction, In one section; while fugitive slaves, now only partially suriendered, woulil not be surreadered at all hy the other. Physically speaking, we canaut separite; we eauat remove our respec. tive scetions from each other, nor build an im. jassable wall between them. A husband nmi wife nuy be divorced, and go ollt of the pres. enee ami beyond the reach of cach other; but the differeat jarts of our courtry cannot do this. They cunnot hint remain face to face; nnd interconrse, either ninicable or hostile, must coatimme breween theen. Is it posslhle, throt, in make that intercourse more advantagcoas or more satisfactory after separation than before? Can aliens make treatics easier than frlends cay
make laws? Can treatles be more faithfuily onforced between sliens than laws can among friends? Suppose you go to war, you cannot ight always; and when, after much lose on both sides and no gain on elther, you cease fghting, the identical old questions as to terms of intercourse are agaln upon you. This country, wlth lts institutions, beionge to the people who inhabit it. Whenever they shall grow weary of the existing government, they can exercise their constltutional right of amending it, or thelr revolutionary right to dismember or overthrow it. I cannot be ignorant of the fact that many worthy and patriotlc citizens are desirous of having the National Constitution amended. Whlie I make no recommendation of amendments, I fully recognize the rightul authority of the peop. over the whole suhject, to be exercised in elther of the modes prescribed in thic instrument ltself; and I should, under existing circumstances, favor, rather than oppose, a fair opportunity being afforded the people to act upon 1 t. I will venture to add that to me the convention mode seems preferahle, in that it allows smendments to originate with the people themselves, instead of only permitting them to take or reject propositions originated hy others not especlaliy chosen for the purpose, and which mlght not be precisely sueh as they would wish to either accept or refuse. I understand a proposed amendment to the Constitutlon - which amendment, howerer, I hav. ot seen - has passed Congress, to the effe : 1 inat the Federni Government shail never interfere with the domestic lnstitu. tions of the states, iueiuding that of persons heid to service. To avold misconstruetiou of what I have sald, I le;part from my purpose not to speak of particular amendments, so far as to say that, holding such a provislon to now he inplled constitutional law, I have no objection to its heing made express and irrevocahle. The Chlef Magistrate derives nli his authority from the people, and they have conferred none upon him to fix terms for the separation of the states. The people themselves can do this aiso if they C' wose, hut the Executive, ns sueh, has nothiug to du whth lt. His duty is to administer the present government as it came to his hands, and to transmit it unimpaired hi bin to his successor. Why should there not be a patient confdence in the ultlmate justice of the people? Is there any hetter or equai hope in the world in In our present differences is either party without faith of heing iu the right? If the Almighty Ruler of Nations, with his eternai truth and justice, be on your side of the North, or on yours of the South, that truth and that justice will sureiy prevali hy the judgment of this great iribunal, the American people. By the frame of the Government under which we llve, this same people have wisely glven their pubic servants but littie power for mlschief; and have with equai wistom proviled for the return of that Ilttie to their own hands at very short intervals. While the peopie retain their virtue and vigilance, no administratlon, by any extreme of wick. edness or folly, ean very sericusly injure the Government iu the short space of four ycars. My countrymen, one and ail, think calmly and well upon this whole subject. Nothing valuable can be lost by taking time. If there be un ohject to hurry auy of you, lu hot haste, to a step which you would never take deliherately, that ohject
will be frustrated hy taking time; hut no good ohject can be frustrated by lt. Sueh of you a are now diasatistled atill have the okl Constitution unlmpaired, and on the sensitlve polnt, the laws of your own framin's under it; whlle the new administration will have no inmediate power, if it would, to change either. If it were admitted that you who are disaatisfiel hold the right aide in the dlspute, there stlll is no slagle goud reason for precipltate action. Intelligence, patriotism, Christianity, and a flrm rellance on Him who has never yet forsaken thls favored land, are still competent to adjust, in the best way, all our present difficuity. In your hands, my dissatisfled fellow-countrymen, and bot in mine, is the momentous issue of civil wa:. The Government will not assail you. You can hare no conflict without belng yourselves the sggat sors. Dou have no oath registered in besven to destroy the Government, while I shall have the most solemn one to 'preserve, protect, and de fend it." I am loth to close. We are not ede mies, but friends. We must not be eneniles Though passlon may have strained, it must not hreak, our bonds of nffection. The mystic cords of memory, stretching from every battle-tith and patriot grave to every llving hesrt and hearthstone ail over this broad lund, will yet sweli the chorus of the Union, when again touched, as surely they wili be, by the better angels of our nature."
A. D. 186I (March).-President Lincoln and his Cahinet.-Secretary Seward. - Presi. dent Linceln, " in selectlng his cabinet, whlch be did substantially before he ieft Springfeld for Washington,
thought it wise to call to his asslstanee the strong men of inls party, espectally those who had given evidnace of the support they commanded as his competlors iu the Chcago convention. . . This was somal policy uuder the circumstances. It might inded bare been foreseen that among the members of a cabi net so composed, trouhlesome disagreements and rivalries would hreak out. But it was betterfor the Presldent to have these strong and ambitious men near him as his coöperators than to hare them as his critlcs in Congress, where their dif. ferences migit have been composed in a common oppositton to him. As members of his cabinet He could hope to control them, aml to herep them busily employed in the service of a common purpose, if he had the strength to do so. Whether lee did possess this strength was soon tested lslaguiarly rude trial. There can be no d that the foremost memhers of his cabinet. and Chase, the most eminent IRepublicat men, had feit themselves wronge: ly the when in its national convention it prefer. them for the presidency a nian whom, but naturally, they thought greatly their lnferior is ahility and experience as well us in seivice. In that paper Soward actually told the Prealdent that, at the end of a month's administration, the coremment was still without a policy, either domestic or forelgn; that the slavery question ahculd be ellminated from the struggle about the Cninn; that the matter of the maintenance of the forts sad other possestions in the South ahouid be declded with thut vlew; that explanations should be demanded categoricaily from the governments of Spain and Fisnce, which were then preparing, one for the anuexation of San Domingo, and hoth for the in vasion of Jexico; that if no satisfactory explanfitions ware received wa ahouid be declared acaint Spain and France hy the L'nlted States; that expianations should alsc be sought from Russia and Great Britain, and a vigorous contineutal spirit of Independence agalnst European intervention be aroused all over the American contiuent; that this policy shocid be incessantly pursued and directed by somebody; that either the President should derote blrcself entireiy to it, or devolve the directhon on some member of hls cahlnet, whereupon all debste on this policy must end. This couid be understood oniy as a fcrmal demand that the President should acknowledge his own incompetracy to perform his duties, content hlmself with the amusement of distributing post offices, and reslgn his power as to ail important affairs into the hands of his Secretary of State. . . . Had Lincoly, as most Presldents would have done, instsatly dlamlssed Seward, and puhilshed the true reason for that dismissal, it would inevitahiy have been the end of Seward's career, But Lin. coln dil whst not meny of the nobiest and greatest men in history would have been nohle and grest enough to do. He considered : hat Seward was still capahie of rendering great gervice to his country in the place in which he was, if rightly controlled. He ignored the insult, hut firmly eataillshed his superiority. In his reply, Which ie forthwith dispatched, ine told Seward that the admlnistration had a domestic policy as laid down in the inaugural ddress with Sew. ard's approval; that it had a foreign policy as traced in Seward's dispatches with the Presi. dent's spproval; that if any poilcy was to be maintained or changed, hc, the President, was to direct thast on his responsibillty; and tiat in perming that duty the President had a right to . ae adrice of inls secretaries. A. D. 186 (March).-Surrender of Alexsader H. Stephens to Secession. -His "Cor-aer-stone" speech at Savannah. -The following is from a apecech thic hy Alexander iI. Stephens st Ssvanuah, on the evening after the secession of Georgia, which ise had opposed, but to which be now yielded himself without reserve. It is a speech that hecame famous on account of its bold declarition that Siavery formed the "cornerstone" of the New Confederacy. "The new constitution," said Mr. Stephens, "has put at rest. forever, a! the agitatlug yuestions relating to our pecullar Instltution - African siavery as it exists amongst us - the proper status of the
negro in our form of civilization. This was the immediate cause of the late rupture and premint revolution. Jefferson, in his forecant, had anticipated this, as the 'rock upon which the old Union would split.' He wa. right. What wea conjecture with him, is now a realizcil fact But whether he fully comprehended the great truth upon which that rock stood and utands may in doubted. The prevsiling ideas entertained hy him and most of the leading stalesmen at the time of the formation of tho old censtitution, were that the ensiavement of the African was in violation of the laws of nature; that it was wrong In principle, socially, morally, ani pollticaily. It was an evil they knew nint well how to deal wlth, hut the general oplalcas of the men of that day was that, somehow of other la the order of Providcnce, the institution would be evanescent and pass away. This idea, though not incorporated in the constitution, was the prevalling idea at that time. The constltution, it is true, secured every essential guarantee to the instltution whllc it shouid last, and hence no argument can bu' justly urged against tho constitu. tlonal guarantecs thus secured, because of the common sentiment of the day. Those ideas, however, were fundamettaily wrong. They rested ripon the assumptlon of the equality of raccs. 'rhis was an error. It was a sandy foundation, and the goverament huilt upon it fell when the 'storm cane and the wind hlew.' Our new goveriment is founded upon exactly the opposite idea; its founciatlons are laid, lis corner-stone rests upon the great truth, that the negro is not equal to the white man; that slavery - suboriinutlon to the superior race-is his natural and normal condition. Thls, our new government, is the first, in the history of the world, hased upon thls grept physical, phllosophlcai, and nooral truth. 'i his truth has been siow in $t$ ie process of its development, like all other truths in the vurious depietnients of science. It has been so even amongst us."- A. H. Attitude of the Border States. - The circumstances under which the first hlow of the civil wsr was struck by the rebels at Charieston were reclted by Presldent Lincoln, in his Message to Congress, at the speciui scsslon convened July 4, 1861: "On the 5th of March (the present incunibent's first full day in office), a letter of Major Anderson, commanding at Fort Sumter, writen on the 2sth of February snd recelved at the War Depurtment on the 4th of March, was hy that department placed in his hands. Thls letter expressed the professlonai opinion of the writer that reinforcements could wot be thrown into that fort within the time for lils relief, rendered necessary by the ilmited supply of proFlsions, and with a view of holding possession of the same, with a force of less than 20,000 gond auti well-disciplined men. This opinion was concurred in hy all the officers of his com. mani, aud thelr memoranda on the suhject were mase iuclosures of Major Audersons letter. - ith Major Anderson In oplnion. On refection, sowever, he took full the, consulting with other officers, both of the army and the navy, and at the end of for:r days came reluctantly but decidedly to the same corclusion as before. He also stater at the same time that no such suf. Acient force was then at the control of the gov. ernment, or could be ralsed and hrought to the ground withln the thine when the provistons in the fort would be exhausted. In a purely military polat of vlew, thla reduced the duty of the adiministration ln the case to the mere matter of gettlug the garrison safely out of the fort. It was belleved, however, that to so abaadon that positlon, under the elrcumstances, would be utterly ruinous; that the necessity under which it was to he done wonid not be fully understood: that hy many it would be construed as a part of a voluatary pollcy; that at inome it would dls. courage the frlends of the Unlon, embolden its adversaries, and go fur to Insure to the iatter a recognition ahroad; that, in fact, It would be our natlonal destructlon consummated. Thls conld not be ailowed. Starvation was not jet upon the garrlson, and ere it would be reached Fort Pickens might be relnforced. This last wouid he a elear indilcatloa of pollcy, aad would better eaable the couatry to accept the evacuation of Fort Suater as a milltary necesslty. An order was at once directed to he seat for the landlag of the troops from the steamshlp. Brookiyn' into Fort Plekens. This order could not go hy laad, hat must take the longer and slower route hy sea. The tirst return news from the order was recelved just one week before the fall of Fort sumter. The news Itself was that the offleer commandiag the 'Suhine,' to which ves. sel the troops had been transferred from the - Brookiyn. 'acting upon some quasl armistlce of the late adminlstration (aad of the existence of which the preseat alministratioa, up to the time the order was despatched, had only too vague and uncertain rumors to fix attentlon), hadi refused to iaurl the troops. To now relnforce Fort Plekens before a crisls would ie reached at Furt Sumter was imposslble-rendered so by the near exinaustion of provisioas in the latternamed fort. Ia precaution agalast such a conjuncture, the goverameat had, a few days be. fore, commeaced prepariag an expedition as well adapted as might he to reileve fort Sum. ter, whlch expelltion was latended to be uitimateiy used, or not, accordiag to clrcumstasces. The stroagest autielpated case for using it was now preseoted, nud it was resolved to send it formari. As inad been intended in this contingency, it was also resolved to notify the goveraor of South Carolina that he might expect an attempt would be made to provision the fort ; aaif that, if the attempt shonld not be resisted, there would be ao effort to throw in mea, arms, or ammuoltion, without further notice, or in ease of an attack upoa the fort. This notice was accordingly given; whereupon the fort was attackel and bomlarded to its fali, without even awaiting the arrival of the provislonlng expeditlon. It is thus seen that the assanlt upon and reductiou of Fort sumter was in no sense a matter of self-iefense on the part of the assall-ants."-Abrahan Lincoln, Complete Works, r. 2 , pp, 56-57. - The President's delay of actioa in che case of Fort Sumter was maioiy lue, oa the poiitical side of the questlon, to the state of

Ile was ready to make the demnisi, and to back it by force. The city of Cbarieston was full of troops, and, for months, batteries had been in course of construction, with the special purpose of com. pelling the surrender of the fort. Siajor Ander30 h had seen these batteries going up, day after day, without the liberty to fire a gun. He cecllned to surrender. He was enlled upon to state when he would evacuate the fort. He re. plled that on the 15 th he wonld do so, should he not meantlme receive controiling instructions from the government, or adaitional suppiles. The response which he received was that the confederate batteries would open on Fort Sumterlo one hour from the date of the message. The jate of the message was 'April 12, 1861, 3:30 A. IL' Beauregard was true to his word. At half past four the batteries opejed upon the Fort, which, after a iong and terrible bombard. ment, and a galiaut though comparatively fceble defense by a smail and half-starved garrison, Tas surfendered the following day. ... "In view of the subsequent gigantic expan. sion of the civil war, cleventh honr erities contince to lusist that a larger force should have been called at once. They forget that this was nearly tive thnes the then existing regular ormy; that ouly very limited quantities of arms, equip. ments, and supplies were in the Northern nesen als; thit the treasury was bankrupt; and that an Insignifieant eight hillina loan had not two weeks before been discounted neariy slx per cent. by the New lork bankers, some blds ranging as low as elghty five. They forget that the shomeful crents of the past four months 1 elicited searcely a spark of war feeling; that loynl States hind suffered the siege of Sut if and tiring on the 'Star of the West' with a dan gerons iudifference. They forget the donbt and dlsmay, the punic of commerce, the divlsion of counsels, the nttacks from wlthin, the sneers from wilhont - that faith seemed gote uad patrlotlsm dend. Twenty four hours later nl this was measurabiy changed. . . . The guns of the Sumter bombardment woke the country
from the poiltical nightmare which hail so long tormented and paralyzed it. The lion of the North was fuily roused. Betrayed, Insuited, outraged, the free Btates arose as with a ery of pain and vengeance. War cermons from pui. pits; war speeehes In every asembiage; tenders of troope; offers of money; nilitary prociama. tions and orders in every newspaper; every eity radiant with bunting; every village.green a mustering ground; war appropriation in every iegisiature and In every elty or town council; war preparations in every publie or privatc workshop: gun-casting In the grent foundries; cartridge-making in the principal towns; eamps and drits in the fieids; parades, drums, flags, and bayonets in the streets; knitting, bnniage. roiling, and int-wcraping in neariy every household. Before the inpse of forty-cight hours a Inssachusetts regiment, armed and equipperi, was on its way to Washington; within the space of $n$ month the energy and intelligence of the country were simost eompletely turned from the industries of peace to the activities of war."-J. G. Nicolay and J. May, Abraham Lincoln, y. 4, ch. 4-5. - "In intelilgence no army, except per. haps the A thenian, can have crer equalied or ap. pronched that of the North. Most of the soidiers carried books and writing materiais in their knapsacks, and mail bags heavily wcighted with letters were sent from every contonment. Such privates woulid sometimes reason instead of obeying, and they wonlid see errors of their com. maniers to which they ind better have been hilnti. But on the whole, in a war in which much was thrown upon the indilviduai soldier, inteiligence was iikely to prevali. In wealth, in the means of providing the weapons and ammunitions of war, the North had an immense advantage. which, combined with that of numbers, could not fail, if, to use Lincoin's homely phrase, it 'pegged nway,' to teli in the end. It was aiso vastly superior in mechnnicai invention; which was destinedi to piay a great part, andi in me. chanicai skili; nlmost every Tankee reglment Fas fuil of mechnnics, some of whom could devise as weil as execute. In artillery and engincering the North took the lead from the first, having many civil engineers, whose conversion into military civil engineers was casy. The South, to begin with, had the contents of Federai arsenals nnd armourles, which had been weil stocked by the provident treason of Buchanan's Nialster of War.

But when these resources were exhausted, repiacement was difficuit, the biockade having been estabishedi. though extraordinary efforts in the way of mill. tary manufacture were made. To the weaithy North, besides its own factories, were opened the markets of Engiand and the worid. Of the small regular army the Confederacy had carried off a share, with neariy half the regular offlcers. The South had the adivnntage of the diefensive, which, with iong-range muskets nnd in a difticult conntry, was reckoned in battle as five to two. The South had the superiority of the unity, force, nnd secrecy which autocracy iends to the operatlons of war. On the sitie of the North these were comparatively wnnting."Goldwin Smith, The United States, ch. 5.- In six of the elght Slave-iabor States inciuted in the cail, the Preslemt's Proclamation and the requisition of the Secretary of War "were treated by the authorities with words of acorn and deti-
ance. The exceptions were Maryiand and Dela ware. In the other Statea, disloyal Gorernon held the relas of power. 'I ins ye oniy to asy, repiled Governor Letcher of Virginis, thas the militia of this State wili not be furnialued to the powers at Washington for any such purpoes an they have in view. Your object is to subjugate the Southern States, and a requisition made upon me for such an object - an objeet, in my judg: ment, not within the province of the Constitu. tion or the Aet of 1705 - will not be complied with. Governor liector, of Arkan sas, repiled: - 'In answer to your requisitlon for troops from Arkansas to subjugate the Southera States, I have to say that none will be firnlabed. Governor Jackson, of Missourl, res panded:-- There can be, I apprehend, no ciouid that these men are Intentied to make war upon the seceded States. Not one mun will the State of Sissourl furnish to corry on such au neholr crusadie.'

Governor Hicks, of Daryland nppalicd by the presence of great dangers, and sorely pressed by the secesslonists on every shde. hastened, in a proclamation, to assure the peonie of his State that no troops would be sent from Maryiand uniess it might be for the defense of the National Capitai, and that they (the people) would, in a short time, 'have the opportuaity afforded them, in a specini election for members of the Congress of the United States, to express their devotion to the Linioa, or their desire tosee it broken up.' Governor Burton, of Delaware, made no response until the 26th, when be in formed the President that he had no authontry to comply with his requisition. At the same time he recommended the formation of volunteer companies for tic protection of the citizens and property of Delaware, and not for the presers. tion of the Enion. .. Pennaylvania, aithough nearly one-half of her votes had been given for M1. Breckinridge, followed this example: and, owing to ber geographical position, ber volunteers reached the shores of the Potomac in advance of ail the others. After passing through the great city of Baitimore in the midst of an incipient insurrection, they encamped around the Cabitol, on the 18 th of April. The seceders, on their side, had not lost a moment in Virginia. They were in possession of Richmond, where the convention was in session.

The workshops and arsenal of IIarjer's Ferry, situated at the confluence of the Potomac and the Shenandoah, on a spot which was destined to play an important part during the war, were only guaried by a detachment of 64 dis. mounted dragoons; and the Virginia volunteers, assembled in the valieys of the Biue Ridge, werc resdy to tnke possession of them as soon as the ordinance for the secession of Virginia shouid lurnish them a pretext. They were then to cross the Potomac and join the insurgents of Jaryland, for the purpose of attempting the capure of Washington, wisere their accomplices were expecting them. On the morning of the 18th [April], a portion of them were on their march, in the hope of seizing the proy which was to be of so much vaiue to the future armies of tie Confederacy. But Lleutenant Jones, who was in command at IIarpcr's Ferry, had been informed of the approach of the Confederate troops under the lead of Ashhy - a chicf well known since; not withstanding their despatch, they only arrived in sight of IIarper's Ferry in time to see from a distance a large conflagration that was consuming the workshops, store-houses, and the enormous piles of muskets heaped in the yards. while the Frderai soidiers who had just kindied it were crossing the Potomac on their way to Washington. The Confederates found nothing but smoking ruins, and some machinery, which they sent to Kichmond; their ailies from Maryiand had not made their appearance, and they did not feel strong enough to venture alone to the other side of the Potomac. During the last few days the authorities of Virginla had been making preparations for capturing the Norfoik [or Gosport] arsenai (navy-yard). That estab-

Itahment posersed a magnificent grantre basin conatruction docks, and a depot of artillery with zaore than 2,000 guns; itwo-decked remel wa on the stock, two others, with a three.decker three frigates, ateam sloop, and a hrig. But they came too late. Cajuin Paut ding could do nothing except hastily deutroy at far as possilie the sinklng ships and the arsenal huildings, and then retreat. "The Contederates found ahundant resources in artillery and 'ma. teriel of every description in Norfolk; the tre was soon extinguisied, the docks repaired, and they succeeded in raising the Merrimac, which we shall see at work the foliowing year. Fort Monroe had just heen occupied hy a smalt Fed. erai garrison. Its loss would have been even more disastrous to the Federai cause than that of the Norfoik navy.yard and arsenal, because the Confederates, instead of liaring to cover Richmond, would have been ahie to blockade Washington hy sea and besiege it by hand. . . . The exampie of Virginia fired tiec entiauslasm of the secessionists everywiere, and they applied themseives to the task of drawing into tie contict those siave States which were still hesitating.

The sight of the Pennsyivania volunteers had caused a great irritation in Baitimore. That city, the largest in the siave States, . . . warmly sympathized with the Souti. IIer location ou the railway iine witich connects Washington with the great cities of the North imparted to her a pecuilar importance. Consequentiy, the accomplices of the South, who were numerous in Baitimore, determined to seize the first opportunity tiat might offer to drag tiat city into the rehellion. . . The tookeri-for opportunity occurred . A April 19 . When the Sixth Massachusetts Regimeut, witha lew hattaitons of Pennsylvania volunteers, arrived at the northern station, an immense crowd bore down upon them. A line of rails, inid in tite centre of the streets, connected this with tive souticern station, and enahied the cars, drawn hy horses, to pass through the city: The crowd surround the soldiers of the Sixti Dassachusetts, wio occupy these cara Tie last cars are stopped, and the occupants, being obliged to get out, endeavor to make their way through the crowd. But, being hemned in on ail sides, tiey are soon attacked hy a shower of stones, which wound many of them, and injure a few mortally. The soldiers have to defend themsel ves, and the first dischargc of nusketry, which has considcrabie effect, opens them a passage. But the aggressors. heing nrmed, raliy, and a regular battle cnsu. The ground is strewn with the wounded i. parties. At lust, the Massnchusets suldiors join their comrades at the southern station," and are conveyed to Washington. A. D. 1861 (April - May: Maryland).-The ending of rebellious trouhle in Baltlmore and the state. - General Butier In the field. - The Elgbth Jassachusetts Ricglment, Colouel Monroe, arrived at Philiadelphla on the 20 h of April. the day Juliuwing the passage of the Sixth Jassa. chusctis Regiment through Baltlmore, and its buttle with the rebel mab of that clity. The Elghth was accompanled by Gencrai Benjamin
F. Butler, who liad been appolnted by the Gov. ernor of Jassachusetts to command the tirst brl. gade from that state. At Pbladelphln General Butler "Hrst heard of the attack on the Sixth, In Baltimore. His orders commanded hlm to mareh thronglt that elty. It was now imposslble to do so with less than 10,000 armed men. He counselled with Major-General Kobert Patterson, who land just breu appointed eommander of the • De. partment of Wushiugton,' whieh embraced the States of Peansylvania, Delaware, and Mary. laul, and the Distriet of Columbla, and whose had-quarters were at Philndelphia. Commodore Dupont, commundant of the Navy Yard there, was also consulted, and lt was agreed that the troops should go hy water from Perry ville, at the mouth of the Susiquehanna River. to Annupolls, and thenee aeross Jluryland to Washington." This route was aceorlingly tuken by General Butler. Colonel Letferts, who harl reached Philadelphia with the New York Seventh Reglment, preferred to attempt going direetly to Washing. tou by astamer which he seeured for the purpose: but a report of relel batteries on the Potomae turned him buek, and his regiment, likewise, procueded to Annimolis, arriving there some hours after the Eighth Massuchusetts. Despite the protests ame remonstranees of the Governor of Marryand-who was striving hard to put his state in an atitude of " neutrality," and to persuade the national govenment to respeet it by passing no armed troops across Maryland soil buth reciments were landed, and took possession of the town, where the secessionists were making realy to eapture the Naval Aeademy and the training ship Constitution. The track of the railroid from Aunapolis had been torn up und the loemotives disabled. The meelanies of the Massachusetts Eighth procwded quickly to repuir both, and the two regiments moved forward. "Tbe troops reached Anampolis Junction on the morning of the esth, when the co-operation of the two regiments eu:sed, the Sevently Now York going on to Washington, and the Bighth Massachusetts remaining to hold the road they had just opened. Before their departure from Aunapolis, the baltie, a large steamship transport, had urrived there with troops, and others speedily followed. General Scott orlered General Butler to renain there, hold the town and the roal, and supcrintend the forwardlag of troops to the Capital. The ' Department of Anuaplis,' whieh combraced the conatry twenty miles on each sile of the railway, as far as Bladenshurg, was ereated, and Gencral lhuther was pherel in command of it, with muple diseretlou. ary powers to make hitm a sort of military lietaur. At the close of April, General Butler hail fall 10,000 men under his eommand at Ann: 1 ulis, ind an equal number were guarilng the mat of Government [Washington]." Meantime. Baltimore hal been given up to the control of the s.reessionists, thengh the Maryland ['nionists were mumerons and strong and were gathering courage to assert themselves. But the rebellious hut riotoms city was now brought to lis senses. On the 5th of May Gencral Butler sent two regiments to ocenpy the Relay llonse, within nine mifes of Baltimore. On the 9th, a force of 1,200 l'cnusylvania troops and regulars, ordered forwarl by General Patterson from Philudelphia, were huded uear Fort MeHenry. under the guns of a United States vessel, and
marched through the elty. On the nlght of the 13th, General Butler, In person, with alout 1,000 men, Ineluding the Massachusetts Sixth, entered the place and took a commandling posillon on Federal IIII, whleh was afterwal ! permonentr fortified. General Butler reportcd his aetion to the Government, and on the 30th of May the secretary of War wrote to him: " Ionr action in respect to the negroes who eame within your lines, from the service of the rebels, is spproved. . . . Whlle . . . you will permit no interference, by persons under your command, under the relations of persons held to scrvlce under the laws of any state, you will, on the other hand, so long as any state within which your millitary operations are conducted remaln under the control of . . . urmed comhinatlons, refruin from sirrendering to alleged masters any persons who come wlthin your lines." A. D. I86I (May: Virginia).-First Advance of Ellsw Troops across the Potomac.-Death of Ellsworth at Alezandria. - "Already 'Confederate' pickets were occupying Arllngton Hlghts and the Virginla shore of the Long Bridge, which spans the Potomac at Washlngton City; and engineers had been seen on those hights selecting ellglhle posltions for batteries. A crisls was evldently at hand, and the General-In-chlef was now persuaded to allow an immediate lnFaslon of Vlrginla. Ordcrs were at once issued [May 23] for the occupation of the shores of the Potomac opposltc, and also the clty of Alexan. drla, alne mlles helow, hy National troops. General Mansfield was In command of about 13,000 men at the Capital. Toward midnlght, these forces ln and around Washlngton were put in motlon for the passage of the river, at three different points. One column was to cross at the Aqueduct Bridge, at Georgetown; another at the Long Bridge, at Washlngton; and a thlrd was to proceed in vessels, and seize the clty of Alezandrla. The three lnvadling columns moved almost slmultancously.

The troops moving by land and water reached Alexandria at about the same tlme. The Natlonal frigate Pawnee was lying off the town, and her commander had already bcen ln negotlatlon for the evacuatlou of Alexandria by the insurgents. A detachment of her crew, bearlng a flag of truce, now hastencd to the shore $\ln$ boats, and leaped cagerly upon the wharf just hefore the zouaves Tthe New Iork Firc Zouave Reglment, under Colmel Ellsworth] reached it. They were fired upon by some Virglala sentries, who lnstantly fled from the town. Elisworth, lgnorant of any negotiations, advanced to the center of the elty, and took possession of it in the name of his Government, whlle the column under Wilcox marched through different streets to the Statlon of tho Orange and Alexandrla Railway, and seized it, whth much rollling stock. They there captured a small eompany (thlrty-five men) of Virgiula cavalry, under Captain Ball. Other Virginians, who hnd heard the firing of the insurgent pickets, escaped by way of the rallroad. Alexamiria was now in quiet possession of the National troops, hut there were many violent seecssionists there who would not submit.

Anong them was a mau named Jackson, the proprietor of a: Inn ealled the Marshall House. The Confederate tlag had becn fly: Ing over hls premiscs for many days, aud had becn plainly scen from the President's house in Washiugton. It was still there, and Ellsworth went in person to take it down. When descend$\operatorname{lng}$ an upper stalrcase with It , he was shot hy Jackson, who was waiting for hlm $\ln$ a dark passage, with a double-harrcled gun, loaded wlth huckshot. Ellsworth fell dead, and hils murderer met the same fate an lnstant afterwart, at the hands of Francls E. Brownell, of $\mathrm{Tr} \cdot \mathrm{F}$, who, with six others, had aceompanied his conimander to the roof of the house. He shot Jackson through the head with a bullet, and plerced hls lindy several times whth his saber-bayonet.
Ellsw orth was a very young and extremely handsome nian, and was greatly bcloved for his generosity, and admired for hls bravery and patriotisin. Hls death produced grcat cxcitement throughout the country. It was the first of note that hid ocenrred in consequence of the Natlonal troubles, and the very first slnce the campaign had actually hegun, few hours before. It

Intrenching tools were sent over the Potomac early on the morning of the 24th, and the troops immediately commenced casting up intrenchments and redoubts, extending from Roaeh's Spring, on the Washington and Alexandria Road, across Arlington Hights, almost to the Chaln Bridge." -B. A. D. 1861 (June: Virginia),-The fight at Big Bethel.-"Major.Gencral Butler and staff arrived at Fortress Monroe Wedinesdiay afternoon, May 22d.

Colonel Magruder - late Colonel $\ln$ the $\mathbf{U}$. S. servlce, and an ottleer of much dlstinction as an obstlnate combatant was placel in command (rebel) of the Peninsula.

Troops rapldy poured lnto Butler's department, and he soon found himseif in a conditlon to act on the offensive. Magruder's scouts and cavalry reatly annoyed the two camps mentioned. 'ihey had, also, seized several Cnion men. These raldis became so frequent and annoying that a night attaek was concerted upon their poslthons at Little Bethei and Big Bethel - the latter, near the north branch of Back Rlver, where it was understood Magru. der's olltposts were throwing up strong works. Brigadler General Pierce, of the Massachisetts troops, was detailed to command the experlition.

Approaching the enemy's position at Blg Bethel, it was found that their guns commanded all points of approach. The road leading up to the bridge over the creek was swept by their artillery. A thlck wools to the left of the rond afforded some protection to the Federal left. An open fielle on the rlglit of the approach ouly offered a house and out-huildings as a cover. The enemy occupied a hill, beyond the creek, Which almost completely securei their front. At their rear was a dense wooi. This gave them the aivantage of ground, greatly. A reconnoissance would lave demonstrated the futl. ity of a front attack except by artllery. The only hope for the Feierals was $\ln$ a tlank movement, higher up the creek, by which, the stream being passet, the enemy could be assanlted In their works, at the polnt of the bayonet, if necessary. This movement was only attemptet par. tially at a late honr in the day. The rebels were well prepared, and only awaited the appearance of the hend of the Federal advance to open a sharp fire. . . . The flght was, from the Hrst, extremely unequal. A front attark was sheer folly. But, the tlank movement was not or dered. . . . The fortunes of the day needed bit
a master-hand to direct them, to have turned in favor of the Union trcops. i.leutenags. Coionei Washburne had arranged for flank movement wilch, with a combiaed attack from the front, must have ended the struggle; - Hit the order for retreat was given before the movement could be exeeuted.

The Fetleral loss was 14 kllled, 49 woundied and fre missing. Among the killed were two of the most gullant
and noble men in the service - Major Thendire Wind noble men in the service-Major Thipmatire Winthrop. Secretary and Aid to General Butler, and first-Lieutenant John T. ## UNITED STATES, 1861.

Rebels in his front could hardiy muster 10,000 in all. He therefore resolved to advance. The Rebei main force, several thousand strong, under Gen. Robert 8 . Garnett, was strongly intrenched on Laurel Iliil, a few miles north of Beveriy, While a smaller detachment, under Col. John Pegram was intrenched upon the summit and at either base of Rich Mountain
thrce or four milea distant from the Rebel maln budy." Gencral Rosecrans, sent 'is a detour of dight miles through the moumains to Pegram's rear, drove the rehels (July 11) from their position, at the point of the bayonet; and the following day their commander, with ahout 600 men, was forced to surrender. "Gen. MeClellan pushed on to Beverly, which he entered early next morning, flanking Gen. Garnett's position nt Laurel Hill and compeliing him to a precipitate thight northward. Six cannon, 200 lents, 60 wagons and over 100 prisoners, were the trophies of tinis suceess. The Rebel ioss in filled and wounded was about 150; the Cnion about 50. Gen. Garnett, completely flanked, thoroughly worsted, and fearfully outnumbered, abnndoned his camp at Laurei Hiii without a struggle, erossing the Laurel Mountains eastward. by a hy-road, into the narrow valiey of Cheat river. .. At length, having crossed the Cheit at a point known as Carrick's Ford, which proffered an admirable position for defense. Garnett turned [Jniy 14] to tight." But the Énion force which pursued him was overpowering; Garmett himseif was killed in the battie at the Ford and his command ted in eonfusion. Gen. McClellan telegraphed to Wishington, next diay, from liuttonsville: "We have completely an: vililated the enemy in Western Virginin. Our loss is about 13 killed and not more than 40 mounded; while the enemy's ioss is not far from 200 tilled; and the number of prisoners we have takeu will anount to at least 1,000 . We have captured seven of the eneny's guns in ali. A portion of Garnett's forces retreated; but I look for their enphure by Gen. IIli, who is in hot pursuit." "Thls expeetation was not realized. The pursuit was only continued two miles berond the ford; when our weary soldiers haltedi, and the residue of the Rebels, under Col. Rum. Ker, turuing slarply to the right, made their War across the mountains, and joined Gen. Jackson at Monterey." Meantime, simmitaneouslr with General MeClellan's advance on Beverly, another strong Union force, under Gneral Cox, hai moved from Guyandotte to the Kanawha, and up that river to Cinurieston, which it rached on the 35 th of July. Governor Whes, Who combuniedi tie rehels in the Kanawha Faller, rutreated, Geueral Cox pursuing, until the pursuit was checked on the 29th by Wise's destruction of Ganiey bridge. The reheis then made gonl their fiight to Levisburg, in Green. hitr eounty, where Wise was reinforced and superseded by General John B. Flogd. - II. On to Richmond, - The First Battle of Bull Run, or Manassas.-"The Sonthern Government hev. ing inclined to the defensive policy as tinat $u \quad u$ which they shonid act, tieir first ohjeet was to prevent an advance of any Federal force into Virginia. Early in the month of May troops were assembled in Itielimond, and pushed forWard toward the nortlieastern boundiary of the
State, to n position known as Manassus Junction State, to a position known as Manassas Junction.

It is liere that a railroad from Alexandiria, another from stannton up the valiey and tifrough Manassas Gap, and another from Gordousville unite. At Gordonsville the raiiroad from Rich. mond and the line from East Tennessee unite. Is a point for eoncentrathon none more eligibie exists in northeastern Virginia. Tine advantages for fortification ure naturally such that the piaee can be rendered impresnable. Ilere the centre of the $p$ thern force of the Southern army was posted, with the left wing pushedi forward to Winchester [under the command of General Josepli E. Johnston, with the Liniou (veneral Patterson opposed to inm] and the right extenticd to the lotomate, aud sustanined by henry batteries which serveri to blockaie the river. The Federal force, the atramee of which was assembled at Wushinuton for the defenee of that city against any attack by the Sumthern troops, was posted on the Virginia side of the Potomac, on Arlington Ilvights, which were strongly fortifled. Their ripht was pusherl some ristance up the Potomac, anif chietly on the Maryland side, while their left ocenjied Alexandria. The armies of both sirles eonsisted of raw militia hastily brougit together, and of roiunteers who for the first time ladi put on the uniform, and taken up the wenjons of the soldier. On both sides the forces wre constantly aecummintlag. On the inorning of June gith, the eonsolidated report of Gon. Manstield, comonanding the Department of Wishington, gives the number of iroops in that city and vicinity. The privates, including regulars and volunteers present for duty, numbered 22.846 mcn . The grand aggregate of the force, inciuding offcers, ctc., present and absent, was 34,160 men. The force of Gen. Patterson, commanding in Maryiand ahove Washington, and also on the Virginia side of the Potomiac, on the 2stin of June, was returued, emhracing offieers and men enlisted and present for duty, 15,923 . Of these about 550 were reported na siek."- Wis. T. Temnep, Hititary and Jident IVistory of the Ribellion, $p, 67$.-" The return of Johnston's [Confederate] army for June 30 th showed inis total forec present for duty to have
been 10,054 ; but this includen some truops which, though asaigned to his army, did not join him till after Juif 8d. . . A prme object of Johnston in taking post al Winchester was, that he might be enabled to join the army at Managsas in case of need. On June 2d, only a week after Johnston's arrival at Harper's Ferry, Beauregard had reached Manaswas and assumed command. He and Johnston at once communicated with each other, and agreed in their views of the importance of mutual support. . As soon as Johnston ascertained . . . that McClelian [from West Virginia] was not moving on Romney and Winchester, the feasiblity of this movement to Manassas at the right time became greater. The only problem then remaining was to so time it as to arrive just long enough before the lmpendIng battle to take part in it, and not solong as to cause, by the ncws of his arrival, a corresponding tranafer of Patterson. It was for the purper egaining as much start as possible on Pattorsule that Johnston had retired to Winchester, instead of remaining opposite the Northern iorce at Martinsburg. He kept his cavalry well out, in order to be informed as promptiy as possihle of the sitghtest change in Patterson's position. Meanwhile the grand Federal advance upnn Manassas had commenced."-R. M. Hughes, General Johnston, pp. 47-5I. -The adrance from Washington, which began on the 16th of July, and which resuited in the grievous defeat of the Union forces at Bull Run, or Manassas, on Sunday, the 21 st , was undertaken to appease the impatfent, ignorant elmbor of Northern newspapers, and in opposition to the judgment and the pians of Generai Scott, who was then at the head of the National army. The cry "On to Richmond" was taken up by Congressinen and Senators, and the pressure on the government became too strong to be resisted. Instead of kecplng the raw troops, hurricdly gathered at Washingtou, in camps of instruction, until they were properiy drilled and until thelr othecrs had acquired sonic experience in itandling them, they wcre furricdly pushed lnto a serious campaign movement, against an encniy likewise untrifned, to be sure, but who was far better prepared to recelve an attack than the ssspilants were to make one. Generai Irwin McDowell had been recently placed in command of the army intended for the field, with General Mansfiehd eommanding the troops in Washington. Thi former had "entered on hls new and respoasible duties with great alacrity, working night and day to pre. pare his comma ifor the approaching contict.

McDowell was laboring at a great disad. vantage - dvilitag and preparing his troops as best fie could - under the licavy pressurc from the North to deliver battle to the enemy in his front. Sccretary Chase was the champloa, in the Cabinet, of the intense feeling in the North that the war should be pushed at oncc, with a vigor that woukl end it soon. . . . There is no doubt that Geucral scott was weakened witl the admluistration, for the reason that he did not believe in the prevailing opinion that a few days would crush the rebellion; and the more the old hero insisted, or falthfilly stood by his views, the more it antagonized the opinion of tbose who hoped and said it 'vouid end speedily. ist the Cabivet meeting a week lefore, General Hamilton says: 'Gencral Montgomery Blair saiu ae would march to Richmond with 10,000 men,
armed with lathes.' 'Yee,' said Generai Scoth, 'as prisoners of war.' Continuiag Geaera Hamilton's statement of the events which occurred prior to the battle and during it prog. ress, he saya: 'On the Sunday precedlig the battle of Buli Run, Scott directed me, his mill. tary secretary, to say to McDowell that he wlahed him to dine with him without fall at the dinner, at which Generai McDowell appeared, Generai Scott used every possible argu ment to dissuale Generai McDowell from fight ing the first ba:tie of Buil Run under the then existing condition of public affairs.
. He then begged Generai McDoweli to go to Secretart Chase, his kiasman, and aid him (Gcneral Scoti) in preventing a forward movement at that mo ment; one of the arguments used by General Scott being that the Union sentiment of the South had been surprised by the suddenaess and promptitude of the movement fa favor of seces. sion; that he (General Scott) was well adrised that the Union sentiment was recovering ltself, and gaining head in the South; that from the moment biood was shed the South would be made a unft. Generai McDowell regretted that he couid not agree witb Gencral Seott in his views, and arose and retired. . .) In the course of the succeeding week General Mcllowell reported to General Scott his proposel plan of battic. It was hung upon the wall, and if fol lowed with a poir er the positions indleated by General McDoweil as those he lateaded the fnrces under his command should oceupy. After Gen. eral McDoweil had gone through a fetailed statement of his pian, and had finished, General Scott remarked, "General MeDowell, that is as good a plan of battle as I ever saw upon paner." Gencral McDoweil said in reply: "General Scoth, the success oi this whole plan depenils upon Generai Patterson hoiding General Jobnston in check at Whachester." General Scott remarked that Generai Johnston was a very able soldice, that he had a rallroad at hls command with which to move his troops, and If General Mel)owell's plan of battle, which had just been presenteu to him, depended upon Gencral Patterson holding Gen erai Johnston in check, his plan was not worth the paper it was drawn upon.' That ended that intprview."-J. H. Sthnc, IIist. of the Army of the Potomac, $p$. 7-10. - Says Gencral MeDowell, in his subsequent report of the novement and the disastrons battle: "Wben I submitted to the General-In-Cbicf, in compliance with his verbal instructions, the plan of opcrations and estimate of force required, the time I was to proceed io carry ft into effect was fixed for the 8 th of July (Monday). Every facility possible was giren me by the General-In-Chicf and heads of the ad ministrative departments in making the neces sary preparations. But tbe regiments, owing, I was told, to want of transportatiou, came orer slowiy. Many of them did aot come across until eight or niae days after the time fixed upon, and Went forward without niy cver secing them and witiout having been together lefore in a brig, ade. The sending re-enforcements to teners Patterson by drawing off the wagons was a further and unavoidabic cause of delag. Nich withstanding the horeulean efforts of the Quar-termaster-General, and his favoring lae in every possible way, the wagous for unmunition, sith sistence, \&c., and th- horses for the trains and for the artiliery, dic not all arrive for more that

Wi il I did set rat on the 16th I was stlii deffciest in wsgons for subsistence, but I went forwami, trustigg to their belng procured in timo to fol. low me. The trains thus hurriedly gotten together, with horese, wagons, drivers, and wagonmasters all new and unused to each other, moved with difficuity and disorder, and was the cause of a day's delay in getting the provisions forward, making it necessary to make on Sunday the attack we shouid have made on Saturiay. I could not, with every cxertion, get forwand with tho troops eariler than we dld. I wished them to go to Centrevilie the second ciay, which would have tiken us there on tho 17th, and enabled us, so far as they were concernedi, to go into action on the 19 th insterd of the 21 st; but when I went forward from Falrfax Court-IIouse beyond Gcr. mantown to urge them forwari, I was told it Was impossilic for tho men to march farther. Thery hui oniy come from Vlenna, about 6 milies, and it was not more than $6 \frac{1}{2}$ miea farther to Crutreville, in aii a march of $12+$ mifes; but the mea were lont-weary, not so much, I was toid. by the dlstance marched, as hy the time they had betu on foot, canseri by the ohstructlo. sin the roul and the slow pace we had to move to uvold ambusenkes. The men were, moreover, unaccustomed to marchnag, their bodiles not in condition for that klnd of work, and not used to carrying even the load of ilght marching or-der."-Brlg. Gen. I. McDoweli, IReport (Oficial Rowidn, serive 1, v. 2, pp. 323-324). The ndvance of the Unlon Army was made "In five divislons, commanded hy Generals Tyler, II unter, IIelntz. elman. iunyon, andi Mlles. Among the brig. ade commanders that afterward rose to eminence were Whliant T, Sherman. Ambrose E. Burnstide, Erastos D. Keyes, and Oilver O. IIoward. The total force was some what over $34,000 \mathrm{men}$; but ikunyon's division was left to guarif the iine of communication wlth Washington, and tho number that aetually moved against the enemy *as about 28,000 with 49 guns and a battalion of carairy. The tronps marched by the Warrenton turapike, and found themseives ln the presence of the enemy on the banks of Buli IRun on the sots. . The enemy's outposts had failen
back as the army advanced, and the first serlous back as the army advanced, and the first serlous oppreition was met at Biackburn's Ford," where some sharp tyghting occurred between Tyier's divislon ani the Confederate troops under Long. street. "McDoweil, finding that Beauregard Fis rery strongly intrenched on his right, and that the roads in that directlon were not good, changetl his plau aud determlned to attack on the burth or left whyg. Another rcason for doing this lay in the fact that McDoweil had distrusted Patterson from the first, having no falth that he woold hold Inhneton. having no faith ai Liackhirn's Ford had been fought on Thursday. Friday and Saturday were consumed In nconnoissances and searching for a suitabie ford
on the upper part of the stream, where a column could croes and, marching luwn on the right bank, uncover the fords held by the enemy and enabie the remainder of the army to cross. Such a ford was found at length, and on Sunday morning, tho 21st, the army wram put in motion. MeDoweli did not know that Johnston had easily eluded Patterson and with two fifths of his forces folned Beauregard on Saturday.... The Confederute commanders had actuaily orieredi a forward movement of theirown right wing; but as they saw the deveiopment of McDoweli's plan they recailed that, and graiuaily strengthened thelr ieft to meet the onset. . . A. D. 186: (August - October: Missouri).Fremont's premature proclamation of freedom to slaves of rebela and Lincoln's modification of it. - The change of command. - "On the 31st of Angust. General Fremont [commmading in the West] Issued a proclantitfon dectarlng mas. thil law, detialag the lhes of the uring of occus. patlon, and threatening whith leath by the bullet all who should be found within those lines with arius In thelr hands. Furthermore, the real and persmaal property of all persons in the state [Miswnirl] who shouh! take up arms agalnst the Calted states was declared contis. eated to the publle use, and thelr slaves, If they had any, were declared frec men. Thls proclamation produced a strong effect upon the publle mlail. The proclahinging of freedoan to the slaves of rebels struck the popular chorl, partienfarly aanong thoroughly loyal men in the frie nintes. Of course, It maildened all the sympathizers with the relnellton, Infurinted the rehels themselves, aud perplexed those loyal men who hud upon their hands the task of so combucthig ulinirs as to hold to their alleglance the border slave states which had not seceded Mr. Ilacoln did not approve some fatures of Goneral Fremont's proclamatlon. As soon as he read it, he wrote, under date of Septenber 2., to the General. that there were twe points ! it which guve him anxiety. The first was, that. If he shoull shoot a man according to bis procla. matlon, 'the confederates would certulaly shoot our best meu ln their bands in retallatlou, and so
man for man, indefiniteiy.' He therefore ordered him to aliow no man to be shot under the proclamation without first havlug his (the Presi. dent's) approbation or consent. The second cause of nnxiety was that the paragraph reiating to the ennfiseation of property and the ilberation of aiaves of traitorous owners wouid alarm Unionists at the South, and perhnps ruin the fair pros. peet of saving Kentueky to the Union. He, therefore, wished Generai Fremont, as of his own motlon, so to moilify hls procinmntion as to make it eonformabie to the confiscation act just passed by the extra session of Congress, whleh only freed such siaves as were engaged in the rebel scrviee.

- Generai Fremont recelved the Presldent's ietter respectfuliy, and repiled to it September 8th, stating the dlffeuities under whleh he labored, wlth communication with the goverument so difticult, and the development ef perplexing events so rapli in the department under hls command. As to the part of his proc. lamation concerning the slaves, ho wlshed the Iresident openly to order the change deslred, as, if ine should do it of his own mothon, it would imply that he thought hlmself wrong, and that he hid neted without the reflection whleh the gravity of the polnt demanded. This the Presi. dent dhi, In a dispateh under intc of Septem. ber 11th, in the words: ' It is therefore ordered that the saidi clanse of salil prochmation be so mollticd, heid, and eonstructed, as to eonform to, and not to transcend, the provislons on the same subject coataiued In the net of Congress enthied, in act to eonflsente property used for lasurreetionary purposes, approved Xugust 6, 1 1461; and that such act he pubinhed at length with thls order.' Before thls orier had been reccived, or on the day following lts dnte, Greneral Fremont, though aequainted whth the 1'reshdent's Nishes, mannmitted two slaves of Thomas L. Snend of St. Louis, In aeeordanee with the terms of inls proclamntlon. Although Mr. Lineoln desired General Fremont so to modify his proclamation as to make It necoriant With the aet of Congress approved August 6th, it is hardly to be supposed that he ilid it solely out of respeet to that aet. . . . If he had belleved that the time had eome for the measure of 3 lb . crating the slaves of rebels by proclamation, the act of Congress would not have stood in his way. This act was nne onborlment of his poiley at that time, and he used it for hla iminediate purpose.

Complleatlons in the personal relntions of Genernl Fremont und Colonel F. P. Blalr, under Whose personal and fomily lnfuence Generai Fremont had received his posltion, oceurred nt an early day. Colonei Blalr doubtless thought thit he had not suffichent weight In the Generals eounsels, and the General, doubtless, exercised his right ln choosiag hils own eounseiors. It was a very unhappy quarrei, and it is quitn likely that therc was blame upon both sides, though lt oeeurred between men equaily devoted to the sacred cause of saving the country to freedomand justice. . . . Mr. Lincolnaiways gave to ench the credlt duc to his motlves, and so far refused to mingie in the generai quarrei that grew out of the diffeulty, that he kept the good.wili of both sliles, and compelled them to settie thelr own differences. . . Ge al Fremont at jength took the tieldi la person. On the 8th of Oetober he luft Jefferson City for sedalla. As he ad. ranced with his forecs, Price retreated, until it
was wirleiy reported that he would give battie to the nationai forces at Springfifid. Just as Fre mont was making ready to pagage the enemy, he was overtaken by an order rellering him of his command. He was succeeded by Genenil Hunter; but Hunter's command was brict, and was transferred at an early day to General inial ieck. General Fremont was reilleved of hla com mand by the President not because of his proch. nation, not because hic hated slavery, nonl not because he beilieved him corrupt or vindlectre of disioyai. He reileved him simpiy because be believed that the interests of the country, all tbings conaldered, would be suhserved by r . ilieving him and putting another mas in hit plnce. The matter was the eause of grent excitement in Missouri, and of mueh eonuplantnt nomong the radicai anti-sinvery men of the country; buit the imputatlons sought to be east upon the $\dot{\text { Presel}}$ dent were not fastened to Llm ; and dill not, four yenrs later, when Fremont himself lecame a candldate for the presideney, prevent the warm. est antl-aiavery men from giving Mr. Linoln thelr support. The federai nrmy under General Hunter retreated without a battle; and thus the campaign, inaugurated wlth great show and mmense cxpense. was a fint fnilure."-J. G. Ile fully realized he had been sent to West Virginia to retrieve Confederate disasters, and that he had a most diffieult task to perform. The Feleral eommander [his main force at Elk Water] held the eenter aummit of Cheat Mountain pass, the mountaln having three weli dellned summits. ... It was necessary first to carry this weli-seleeted posltion of the Fedeni troops. A eltizen aurveyor, in sympathy with the South and familiar with the mountoin paths, had made a trip to an elevated jolnt where he could cleariy see the Federal positlon, and reported hls observatlona to General Lee. Afterward he made a second reconnolssance, accompanied hy Colonei Aibert Rust, of the Thind Arkansas Regiment, who was anxlous to tee the nature of the gronnd and tine strength of the position for hlmseif. They reported to Generailee that in thelr opinion the enemy's posltion could be nssailed wltil success with troops which couid be guided to the polnt they had reached. R. Jackson in Reynoids's front. Ile proceeded at once to Floyi's command, whieh he reached on September :0th, and then to Wise'a camp, elosely inspecting both. He at once percelved that lise's position was the strongest and offered the best means for successful defense, and promptly concentrated hla forcea at that point. ... Rosecrans had advanced to the top of Blg Seweil Hountain and had placed his army ln a strong positinn. General Lee, with the troops of Whe,

Floyd, and Loring - about 8.000 men - oceupled a poslition on a parallel range. The two armles were now in elo.d proximity to each other, both occupylng strong defensive positlons. Lee and Roseerana, having been offieers of the englneers, were fully aware of the great dlaadFantage an attacklng army would havc, and each walted, hoplng the other would attack. After oceupylng these posltions for twelve daya, Rosecrans, on the nlght of Oetober 6th, retreated. The condltlon of the roada, the mud the swollen atreama, the farge numbers of men wlth typhold fever and measles, the condliton of the horses, of the artillery, nid transporta. tlon, were such that Lee deefded not to pursue.

The rapid approach of wlnter and the ralay season terminated the eampaign ln this seetion.

At the terminatlon of this enmpaign of General Lee's the Confederate Government did not bestow much attention upon this seetlon. The majority of the people seemed inelined to support the Federal side.

It must be ad mltted that General Lee retired from West Virglnia with dlinlnished military reputation. Great results had been expected from hls presence there. A. D. 186: (Septemher-Novemher: On the Mississippi).-General Grant's first hattie, at Belmont.-In August, General Ciysses S. Grant, who had been serving for a few weeks ln Mls. souri, first as Coionei of the 21st liilnols Regl. ment, and later as a brigadier-general, was assigned by Generai Fremont to " the command of the distriet of south-east IIissouri, emhracligg ail the territory south of St. Lonls, iu Missouri, as well as ail southern Iiilnois." On the 4th of September he estahished hls headquarters at Cairo, Illinois, and the next day, having learned from a scont that the rebeis were preparing to selze Paducah, at the mouth of the Tennessee Hiver, he piaced a couple of regiments of troops and a ilgit hattery on hoard of ateamers: and oceupied the piace on the 6 th, - telegraphing meanwhie for orders, hut not waitlng for them. His movement antieipated the enemy hy a few hours, oniy, and secured a command of the Tennessee, the importance of whleh was afterward demonstrated hy Grant, hlmself, when he moved on Forts Henry and Doneison. In hla "Memoirs" (teneral Orant says: "Frunt the occupatlon of Paducah up to the early part of November, nothlag lmportant occurred wlth the troopa under my command. I was reinforced
from time to time and the men were drilled and disciplined preparatory for the service which wat sure to come. By the 1st of November I had not fewer than 20,000 men. About the Ist of November I was directed from department headquarters to make a demonstration on both sides of the Misslsslppl River with the vlew of detalning the rebels withln thelr lines, Before my troops could be got off, I was notlfed from the same quarter that there were some 8,000 of the enemy on the St. Francls River about 60 miles west, or south-west, from Cairo, and was orderel to send another force against them. I dispatched Coionel Ogleshy at once wlth troops sufficlent to compete with the reported number of the cnemy. On the 5 th word came from the same source that the rebels were about to detach a large force from Columhus to be moved hy boats down the Misslsslppl and up the White Rlver, In Arkansas, In order to reinforce Price, and I was directed to prevent thls movement if posslbie." To carry out these orlers, General Grant directed a demonstration to be made from Puducah to wards Columhus, while, at the same tlme, he conveyed some 8,000 troops down the river, in steamers, and attacked a camp of rebels at Beimont, Immediately opposlte Columbus. The hattle was a severe one. " The officers and men engnged at Belmont were then under fire for the first tlme. Veterans," says Gencral Grant, "could not have hehaved better than they did up to the moment of reaching the rebel camp. At thls point they became deinoralized from thelr vlctory and fniled to reap lts full rewarl.

The moment the camp was reached our men lald down their arms and commenced rummaglng the tents to plck up trophies. Some of the higher officers were little hetter than the privates. They galloped about from one cluster of men to another and nt every walt delivered a short eulogy upon the Unlon cause and the nchievements of the command." The result was a rallylng of the defeated rehels and a reinforcement from Columhus which forced the Uuionists to retire with haste. "Our loss at Belmont was 48,5 in kliled, wounded ant missing. About 125 of our wounded fell into the lands of the enemy. We returned with 175 prisoners and two guns, and splked four other pieces. The loss of the enemy, as officlally reported, was 642 men, kilied, wounded and missing. We had engaged nhout 2,500 men, exclusive of the guard left with the transports. The enemy had about 7,000; hut this lncludes the troops hrought over from Colunhus who were not engaged ln the first defence of Belniont. The two ohjects for which the battle of Belmont was fought werc fully aceomplished. The enemy gave up all ldea of detaching troops from Colimhous. . . . If It had not heen fought, Colonel Ogleshy would probably have been eaptured or destroyed with his 3,000 men. Then 1 should have been cal. pable intleed. "-UU. S. A. D. 1861 (Octoher: Virginia).-Confederate project for the invasion of the North vetoed by Jefferson Davis.- - Betweets the Ith of August and the 15 th of October nore than 110 reglments and thirty hatteries, comprising
at least 100,000 men, were added to the force in Washlngton and lis nelghborhood, and there ap peared to be no llmilt to the resources and patrlotism of the North. Moreover, the Northern troops were so well provided for in all respects. owling to the immense resources at the disposal of the Unlted States Government, thit there wa every reason to expect ln the spring of 1802 a decidediy improved conditlon in luculib and vlgor, in self-confidence, and $\ln$ all soidietly quailtles, on the purt of the soidiers. The army at Manassas, on tise other hand, owing to the straitened means of the Confederate Govern. ment, was hnrely kept comfortable in the matter of clothing and shelter, and its chief ofticen iooked forward with undisgulsed apprehension to the coming winter.

IL wus casy for any one Instructed ln military matters to sie that if the Felerai authoritles would only he content to defer actlve operations until the patriotic levles of the North should have learned the trade of the soldler, - should have acquired familiarity with the use of arms, hahlts of obellence, trust In thelr officers and superiors, disciphine, - the Federal general would cnter on the next campalgn wilth all those chnnces of sacress which attend largely superior numbers, hettur arms and equipment, nnd a sound and thorough organiza. tion of his army. Such In fuct was the view of the situatlon taken hy the sagacious ofticer who commanded the lately victorions army at Manassas Junction, Joseph E. Johnston. In his opinlon his two corps commanters, Benuregard nnd G. W. Smith,
entirely concurted. They saw that something must be done to break up this constnntly lncreasing Federal army while It was yet ln tho process of formation. The Confederate generals determined to urge their views upon the President of the Sucthern Cinfederacy. Mr. Davis responded at ouce to their expressed wlsh for a conference upou the military situation, and he reached Manassis on september 30, 1881. The conference was huth the next clay. The generals strongle advinat Mr. Davis to reinforce the army at Manassas so that they might cross the Potomac, cut the commuieations of Washlngton with thic Jorth, and carry the war lnto the enemy's country. dohnston and Beauregard fixed the strength of an army ade quate to these tasks at 60,000 men. smith was content with a force of 50,000 . Allitional trans portation and supplies of annmunitinn were also demanded. The army then at Manasits aum hered about 40,000 men. With the quality of the soldiers the generals seemed to ine perfects content. They only asked that the ahtitinal troops sent shouid be of an cqual tegree of efflemey, - seasoned soldiers' as thistingusbut from 'fresh volunteers.' 13ut l'resilent Invis decided that he could not furnish the repuired reinforeement without 'a totai disregan of the safety of other threatencel positints.' The project was therefore droppel, ant ins further nttempt was made during the ensuing autuman and winter to Interfere with the mainterruped development of the Federal army at and near Washington in organization and ediciencr. A. D. 186 z (October: Vlrginla). - The affir at Ball's Blnfi, or Leesburg.-"The true story of the aftair of Ball's Bluff, is, in brief, as follows: One of Gen. Stone's officers, Capt. Philbrick, of the 15th Masc. thought that he had discovered a camp of the enemy about one milie beyond Harrison's island in the direetion of Leesburg. Having completed the feint of crossing made in the course of the 20th, Gen. Stone at 10.30 P . M. of the same day issued his orders for the surprise of the supposed camp at day. break of the 21st. Coi. Devens, of the 15 th lass, was entrusted with the duty, with four companies of his regiment. Col. Lee, of the 20th Mass., was directed to repiace Col. Deveus in Harrisoa's isiand with four companies of his own regiment, oae of whieh was to pass over to the Virginla shore and hoid the heights there to cover Col. Devens's return. Colonel Devens was directed to 'attack the camp at daybreak, and, haviag routed, to pursue themas far as he deems prudent, and to destroy the camp, if practicable, before returning.'. . 'Having accomplished this duty, Col. Devens wili return to his present positioa, unless he shall see one on the Virginia side aesr the river whieh he can undoubtedly boli until reinforced, and one which can be sue. cessfully held against largeiy superior numbers. In whlch ease be wili hold on and report.' In obedience to these orders Col. Devens crossed about midnlght with five companies (instead of four), aunbering about 300 men, and lualted untli daybreak in an open fieid near the biufis bordering the shore. Whife there be was joined by Col. Lee with 100 men of the 20th Mass., who balted here to eover his return. At dayhreak he adissacel about a mile towards Leeshurg, and then diacovered that the supposed camp did not erist. After examining the vieinity and discovering notraces of the enemy, he determined not to return at onee, but at about haif-past six A. Y. sent a non-commissioned officer to report to Gen. Stone that he thought he eould remain where he was until reinforced. At about seven o'clock a company of hostile riflemen were observed on the right, and a siight skirmish ensued. A company of eavairy being soon observed on the left, the skirmishers were drawn baek to the woxls, und, after waiting haif an hour for attack, the eoinmand was withdrawn to the positioa hehl by Col. Lee; but, after again scouting the woonls, Col, Devens returned to lits adranced position. About eight o'elock the messenger retumed from Gen. Stone with oriers for Coi. Devens to remaln where he was, and that lie Would be reinforced. The messenger was again sent back to report the skirmish that had taken place. Col. Devens then threw out skirmishers and swalted reinforcenments. At about ten oclock the messenger again returned with the informatho that Col. Baker [Senator Edward D. Baker, of California] would soon arrive Fith his brigade nnd take eommand. Beiween nlne and eleven Coi. Devens was joined by Leut. Col. Learned with the remainder of the 15 th, bringing up his eommand to 28 officers and 6is men. Ahout mitday Cul. Devens learned that the enemy were gathering on his left, snd about liaif-past twelve or one he was atrongly attacked; and as he was ingreat
danger of being outfanked, and no relnforcements had arrived, at about a quarter-past two he fell back to the bluf, where he found Col. Baker, who directed him to take tbe right of the position he proposed to oceupy.

At about three o'elock the enemy attacked in force, the weight of his attack being on our centre and left. At about four our artillery was silenced, and Col. Devens was ordered to send two of his companies to support the ieft of our line; shortiy after he learned that Coi. Baker had been kilied. Coi. Coggswell then assumed command, and, after a vain attempt to cut his way through to Edward's Ferry, was ohifged to give the order to retreat to the river-bank and direet the men to asve themseives as best they couid. A. D. 186i (October-December: South Carolina - Georgia). - The Port Royal Expedition. - Capture of Hilton Head. - Extensive occupation of the coast. - Savannah threat-ened.-" On the the 29th of October, another and far stronger narai and military expedition [than that against the Hatteras forts] set forth from IIampton Roads, and, clcaring the capes of Virginia, moved majestically southward. General T. W. Sherman [not to be coufused with General William T. Sherman of the Western armies] eommanded the land forees, consisting of 18 voiunteer regiments, forming three lorigades, and numbering not less than 10,000 men; Whilc the fleet - commanded by Com. Samuel E. Du Pont - embraced the steam-frigate Whhash, 14 gunboats, 22 tirst-class and 12 smailer steamers, with 26 sailing vesseis. After a stormy passage, in which severai transports were disabled and four absolutely lost, Coni. Du Pont, in his tiag ship, came to off Port leynal, S. C., during the night of November $3 i$ and 4 th; and, after proper souudings and reconnoissances, which deveioped the existence of a new fort on eitler side of the entranec, the commodore brought his most effcetive vessels into aetion at 9 . . M., on Thursdiay, Noventer ith, taking the lead in inis tlag. ship, the Walash - the gunboats to foliow at intersals in due orier. Thus the figiting portion of the fleet steamed slowly up the bay by the forts, receiving and returaing the fire of the hatteries on Bay Point as they passed up, und exchanging iike compliments with the stronger fort on Hition Head as they came down. Thus no ressei remained stationary under fire; so that the enemy were at no time enahied to gain, hy experiment and observation, a perfcct aim. The day was lovely; the apectacie magnificent; the

Eght splrited, but most unequal. Desplte the general presumptlon that batteries, well manned and served, are superior to ships when not lronclad, the terrihle raln of shot and shell upon the gunners in the Rebel forts soon proved beyond human endurance. . . . The battle . . . raged nearly five hours, wlth fearful carnage and devas. tatlon on the part of the Rebels, and very llttle on ours, when theovermatched Confederates, ind] themselves slaughtered to no purpose, suddenly and unanimously took to filght. .. The IRebel forts were fully manned hy 1,700 South Carolinlans, with a feld hattery of 500 more statloned not far distant. The negroes, save those who had been driven of hy their masters, or shot while attempting to evale them, had stuhhornly remained on the isles."- II, Greeles, The Amerr. can Confliet, ch. 36.-"The effect of the battle of Port lloyal was as largely felt In the North, Where It revivel the hopes of her people, as In the South, to whose people it revealed the presence of a new and pressing danger. The Federals had conquered a strong hase of operatlons on the cnemy's coast; they had carrled the war Into South Carollna.

- Sherinan mlght, perhaps, at the tirst moment $c:$ hls adversary's dlsorder have been ahle to push his success farther, and to lead his army upon Charleston, or Ssvannah. But he was afraid of risking such a venture.

The occupation of most of the islands in the viclnity of the St. IIelena gronp was the natural consequence of the victory of Hilton Head. It was effected gradually before the end of the year. Among all the points of the coast Which the Federals hal thus selzed without striklng a blow, thanks to the prestige of their success, the most important was Tybee Island, at the entrance of the Savannah liver. Situated on the right hank of the mouth of that river, and lelng the spot where the lighthouse stands, Tybee Island enahled the Fedcrals, as soon as they becane masters of it, to ohstrnct the passage of the hlockade-runners on their way to the great mart of Savannah. At a diatance of about 600 feet from lis borders, on an lslet iuthe mifille of the river, stood Fort Pulaski. . . . A few days after, the navy extended lts conquests stlll farther south," occupying the channel between the Tybee Island group and the Warsaw Islands, " and thus opening a passage for future operatlons, which would enable them to reach Savannah hy turnlng Fort I'ulaskl.

At the end of the Year, Iupont's fieet, supported by detachments from Sherman's army, was in possession of the five large hays of North Edisto, St. IIelena, Port 1Royal, Tybee, Warsaw, and the whole clain of islands whlel forms the coast of Carollna and Georgia between those hays."-Comte de Paris, Hist, of the Civil Warin Am., bl. 4, ch. 3 (c. 1).

A. D. 1861-1862 (December - March : Vir(inis). - Protracted inaction of McCielian. -fis Plan of Campaign and its frustration by the rebel evacuation of Centrevilie.-"When Congress assemhled . . . in the beginning of December, 1861 , so succensfui had been the exertions of the authorities, and so zeaiousiy had the people responded to thelr country's cali, that the consolidated morning reports, furnished your committee by the adjutant generai of the army. thowed that, exciuslve of the command of Genenai Dix, at Baitlmore, the army of the Potomae consisted of about 185,006 men. During the time this large army had been coilectling and or gnalzing, nothing of importance had transpired in connexion with it, except the closing of the asarigation of the Potomac by the rebeis, which four committee treat of mire at iength in another part of this report, and the meianchoiy dls. aster of Ball's Biuff, which is made the subject of a separate report. The weatier during the faii sason, sud for some weeks after the convening of Congress, continued unusually favorabie for active military operatlons. As month after month passed without anything heing done hy the army of the Potomac, the peopie lecame more and more snxious for the announcemeat that the work of preparation had been compieted and actlve perations would soon be commenced. From the iestimony before your committee it appeared hast the arnuy of the Potomne was well armed and equlpped, and hati reaehed a inlgh state of discipline by the last of September or the first of October. The men were ready and eager to commence active operations. The generais in command of the various cilvisions were opposed to going lnto winter guarters, and the most of them declared they had no expectation of dolng so. . . . Your committee endeavored to obtala as accurate information as possibie In reiation to the strength and positlon of the enemy in front of Tashiugton. The testlmony of the officers in our army bere upon that polnt, however, was fur from satisfactors. Early in December an orier bad beeu issued from headquarters prohlbitlng the commanders in the front from examining any persons who shouid come into our ines froan the directon of the enemy; hut ail such persons were to be sent, without examinatlon, to the hend quarters of the army. Restrictlons were aisn placel upon the movements of scouts. The rebuit was, that the generais cxamilned appenred to be almost entirely ignorant of the forec of tie enemp opposed to them, having oniy sueh iufurmation as they were alinwed to ohtain at beaiquartes. The strength of the enemy was ranousir estimated at from 70,000 to 210,000 men. Thuse who formeif the lilghest esthnute hased their opinion upon Informntion received at beadquarters. Subsequent events have provel that the force of the enemy was below eren ihe lowest of these estimates, and the atrengti. of tireir fortificntions very greatly overestimated. Your enmmittee also soughit to ascer taln what pumber of men cuuid be spared from this army for offenslve operations clsewhere, as
suming that the works of the enemy in front were of such a character that it wouid not be ad. visabie to move directly upon them. The estinate of the force nectssary to be ieft in and around Washington toact entireiy on the defenslve, to render the capitai secure against any attaek of the enemy, as stated by the witnesses examined upon thnt point, was from 50,000 to 80,000 men, leaving 100,000 or upwardis that couid be used for expediltions at other polnts. . . . The suhject of the obstruction nf the navlgatlon of the Potomac naturaity demanded the coasifierat lon of your committee. . As was wril urged hy the Navy Department, the whoie questlon amounteci slmply to thls: Wonid the army co-operate with the navy in securing the uanbstrucled aavigatlon of the Poonac, or, hy withholding that cooperation at that time, permit so important a channel of communlcation to be closed. After repeated efforts, General McCielian promisef that 4,000 men shouid be ready at a tlme named to proceed down the river.

The troops did not arrive, and the Navy Department whs in formed of the fact by Captain Craven. Assist. ant Secretary Fox, upoa inquiring of General McClelian why the troops had ont been sent according to agreement, was informed hy inlm that his engineers were of the opinlon that so large a boiy of troops could not he ianded and therefore ine had concluded not to send them Captain Fox replied that the landing of the troops was a matter of which the Navy Department had charge. . . It was then agreea that the troops shoulif be sent the next night Captain Craven was agnln notified, and again had his flotilia in readlness for the arrival of the troops. But no troops were sent down at $\mathrm{th}_{\mathrm{i}} 1$ the, nor were any ever seat down for that pi ; pose. Captein Fox, In nnswer to the inquiry of the committee as to what reason was asslgned fnr not sendlag the trmops according to the sec ond agreement, repied that the only reason, so far as he could ascertain, was, thint Geacral JicCleilan fenred it might bring on a gearal engagement.
cuon the failure of thls plin of the Navy Department, the effective vessels of the Potomac flotillia lift upon the Port Rnyal expedition. The naligation of the river was alnost immediateiy thereafter closed, and remained ciosed until the rebels voluntarily evaeu. ated thelr batteries in the March following, no steps harlug lreen taken, in the neantime, for reopening commmication by that route. On the 19 th of Jamary, 1862, the 1'resident of the Cnited States, as commmmier-In-chlef of the army and unve, lssuen! orders for a generai movenent of all the armites of the Colteis states, one resuit of which was the series of vietories at Fort IIenry, Fort Donelson. \&e., whieh so electrifed the country and revived the hopes of every loyal muu ia the lani. After thls : ong periol of innction of the army ot the Potomac, th. Presl. dient of the L'nited States, on tite 31st of Jamary, 1862, issued the foliowing order: $\qquad$ Ordered Thnt ali the disposable force of the army of the Potomac, after providing safeiy for the defence of Washilngtoa, be formed into an expedition for the immediate object of selzing and occupy. ing a polnt upon the rallmad southest trant if What is known as Mannssas Junction; ail de. talls to be In the discretion of the general.In. chlef, and the expedition to move before or on the 2ed day of February next. Abraham Lin
coln.' To this order General McClelian wrote an elaborate reply of the same date, ohjecting to the pian thereln indicated as invoiving 'the error of dlviding our army hy a very difflcuit obstacle, (the Occoquan,) and hy a diatance too great to enable the two portions to support each other, should elther be attacked hy the masses of the enemy, while the other lis held ln check.' He then proceeded to argue in favor of a movement by way of the Rappahannock or Fortress Monroe, giving the preterence to the Rappahannock route. He stated that 30 days would be required to provide the necessary means of transportation. He stated that he regarded 'success as certain, hy all the chances of war,' hy the route he proposed, whlle It was 'hy no means certain that we can bent them (the enemy) at Manassas.' . . Your com. mittee have no evidence, elther oral ordocumentary, of the discussions that ensued or the arguments that were suhmitted to the consideration of the President that led him to relinquish his own fine of operations and consent to the one proposed hy General MrClellan, except the result of a council of war, held in February, 1882. r'bat council, the first, so far as your committee have been able to ascertaln, ever called by General McCleilan, and then hy direction of the President, was composed of twelve genernas To them was suhnitted the question whether they would Indorse the line of operations which Generai MeClellan desired to adopt. The result of the deliberation was a vote of elght to four In favor of the movement ly way of Annapoils, and thence down the Chesapeake hay. up the Rappahannock, landing at lrbana, and across the country to Riclimond. The four generais who roted agalnst the proposed movement were Generals McDowell, Sumner, Heintzelman, and Barnard. General Keyes voted for it wilh the qualification that no cliange should be made until the enemy were driven from thelr hatteries on the Potomac.

Before the movement by way of Annapolis could be executed, the enemy abandoned their hatterfes upon the Potomac, and evacuated their position at Centreville and Manassas, retlring to the line of the Rapinahannock. When General McClellan, then in the clty of Washington, heard that the enemy hal evacuated Manassas, he proceedel aeross the river and ordered a general inovement of the whole army in the direction of the positlon lately occupied by the enemy. The cnemy moved on the morning of the 10th of March, the greater part of it proceedllig no further than Falrfax Court-House. A sinall foree of the army proceeled to Manassas and beyond to the line of the Rappahannock, ascertaining that the enemy had retired beyond that river and destroyed the railroad hridge acruss it.

On the 13 th of March General Mec'lellan convened at Fairfax Court-House a council of war, consisting of four of the five cominanders of army corps, (General Banks belug absent.) and informed them that he proposed to abandon his plan of movement by way of the lappahannock, and suhmilted to them insteal a plan of movement by way of the York and James rivers." Rep't of Joint Committee on the Conduct of the War, 37th Cong., 3d rese, II. R. Rep. pt. 1, pm, 6-12.-The Joint Cummitue on the Conduet of the War, cousist. ing of Senators Wade, Chandier, and Andrew Johnson, and of Representatives Gooch, Covode,

Jullan, and Odell, was appointed in December, 1881. This Committee "was for four yers one of the mot: lmportant agencles in the country. It sasumed, and was sustaloed by Congreas in asauming, a great range of prerogi. tive. It became a stern and zealous censor of both the army and the Government; it called soldiers and atateamen before it, and questioned them llke refractory schoolboys. . . . It wa oflen hasty and unjust in its judgments, but a/ways carnest, patriotic, and honest.

Gent eral McCleilan and his imnectlate folliowing treated the committee with comething ille cong tempt. But the President, with inls larger com prehension of popular forces. knew that he must take Into account an agency of sueh importance: and though he steadily defended General Micheri: lan and his deliberateness of preparation before the committee, he constantly assured blim in private that not a moment ought to be hist is gettling hinself in readiness for a forwaril more. ment

December was tine fifth month that Generai McClellan bad been in command of the greateat army ever hrought together on this continent. It was impossible to com rince the country that a longer period of preparation wis uecessary before this army could lec led agains one inferior ln numbers, and not superior in dis. cipline or equipment.

McCletlan repures to the Secretary of War, that Johnston's arme, at the end of October, numberefi 150,000 , and that he would therefore require, to muke an ad vance movement with the Army of the Potomac. a force of $\mathbf{2 4 0 , 0 0 0}$. On the 2 d of December a speclfic orter to General Italleck, commanding In the Depart. ment of Mlssouri, authorized the suspenslon of the writ withln the llmits of hls command; and a slmuliar order, long previously, had spectally empowered the commander of the forces of the United States on the coast of Florida to do the same. On the 24th of September, 1862, a gencral proclamatlon by the President subjeeted to marthal iaw "nll rebels and lnsurgents, thelr alders and abettors withln the United States, and all persons dlscournging volunteer enllstments, resisting mliltla drafte. or guilty of any dlsloyal practice afforillne ald and comfort to rebels agalnst the autho.oty of the Cuised states "; and suspendlng the writ of halicas corpus " ha respect to all persons arrested, or wla are now, or hereafter during the telelhim shati lee. imprisoned In any fort, camp, arsenal, milltary prison, or other place of confinement, by any nibitary ali:nority, or by the sentence of any court martial us mill tary commission." On the 3d of March, 1883 the authority of the President to suspenul habeas corpis (wheh sone thought questionable) was confirmed by act of Cougress ; and on the 15th of September in that year unother generai procInmation was lssued, referring to the net and de claring a suspension, of the writ "throughout the tnited States, in the casen whree, by the authorlty of the Preshlent of the Cilted States military, naral, aut ciril oflicers of the l'nlted States, or any of them, hold persons under thelr eommand, or in their enstody, cither as prisoners of war, spies. or aiders or abettors of the enemy or offlecrs, soluliers, or scmmen enrolled or drafted or mastereal or culistel 1 h , or belonging to, the land or naral forces of the United States, or as deserters therefrom, or otherwise amenable to military inw, or the rules and articles of war, or the rules or regnlations prescribed for the mill tary or naval set vice by authority of the Presi dent of the L'nited States; or for resistlng a drift, or for my other offense agalnst the mill tary or naval service, "- A brahan Lineoin, Compute Wirks. er 2, pp, 38, 45, 54, 85, 93, 239, 406. -" Whether it ls the P'resident or Congress that las power under the constitution to suspend the privilege of the writ of habeas corpisa wis a burning question during the clvil war. The case of John Merryman . . . was the first to come up for judlclal lnterpretatlon. Merryman lived uear Baitimore, and appears to have
been surpected of being captaln of a seceston troop, of having masiated in dettroylig railroads and bridges for the purpose of preventing troops from reaching Waabington, and of obstructligg the United States mall. By order of General Keim of Pennayivania he was arreated at night in his own house, and taken to Fort McHeary at that time in command of Generai George Cal. wallader. Taney, who was then chief justice of the United States, granted a habeas corpus, but Cadwaliader refused to obey it, saying thet the privliege had been suspended by tive President. On the return of the writ, the Chief Justice filed an opinion denying that the President had any power to suspend habeas corpus and affirming that such power reated with Congress alone. Lincoin contlnued to arrest and imprison with. out any regard to thls opinlon, and indeed was edvised hy his Attorney. Generai that he was not bound to notice It. ... The i, rit of habeas corpus was. . , not suspended hy Congress unth the rebellion was half over. In other words, Lincoin suspended it for two years of his own accord and without authority from any one; for two years he made arrests without warrants and heid men in prison as long as he pieased. There are few thiuge in American history more wortiny of discussion than the power exercised by Lincoin in those two years. It was absojute and arbitrary and, if unauthorized, its exerclse Fas a tremendous vioiation of the constltution. Whether it was justitiahle and necessarv is another matter. If it was unconstitutional and yet necessary in orider to save the Lnion, it shows that the constitution is defective in not ailowing the government the projer means of protecting itseif. That Lineoin used this power with dis. cretion and forbearance there is no douht. He was the most hunane man that ever wleided auch authority. He had no taste for tyranny, and he knew the temper of the American people. But, nevertheiess, injustice was sometinses done. His subordinates had cot aiways ticir master's nature."-8. G. Fisher, The Suopension of Mubeas Corpus during the War of the Rebellion (Iul. Sci. Quarterly, Sept., 1888). - The view which President Líncoin himself entertained, and wnder Which he assumed and exercised authority to suspend the writ of habens corpus, was suhmitted to Congress in his tirst Message, when it convened in special session, Juiy 4, 1861. He said: "Soon after the first cail for militia, it was considered a duty to authorize the commanding generai in proper cases, aecording to his disere tion. to suspend tife privilege of the writ of habeas corpus, or, in other woris, to arrest and detain, without resort to the ordinary processes and forms of law, such indivituals as he might deem dangerous to the puhiic safety. This authority has purposely iecen exereised but very siaringiy, Nevertheless, the iegality and propriety of what has been done muler it are questioned, and the attention of the country has heen called to the proposition that one who has sworn to "take care that the laws be faithfuily executed should not himseif vioiate them. Of course some consideration was given to the questions of power und propriety before this matter was acted upon. The whole of the laws which were required to be faithfully exceuted were beluy resisted and failing of execution in neariy one third of the States. Must they be aliowed to inally fail of execution, cven had it been per.

A. D. 1862 (Januery - March: Misourl-Arkangas),-Expuision of the Confederates from Misaouri.-Battle of Pea Ridge.-" Late in Deceniler Generai Samuel il. Curtis took cons. mand of 12,000 National troopi at Iloila, ani advanced against Price, who retreated before hlm to tho northwestern corner of Arkansas, where his force was joined by that of Generai MeCuifoch, and together they took up a position in the Boston Mountalns. Curtls crosseci the line into Arkansas, chose a strong piace on I'ea llidge, In the cark Mountains, intreuched, and awaited attack. Beeause of serlous disagremments be. tween Price and MeCulloch, Generai Earl Van Dora, who ranked them both, was sent to take command of the Confederate force, arriving late in January. There is no authentic statement as to the slze of fils army. Ile hlmself tiecifred that he had but 14,000 men, while uo other estlmate gave fewer than twice that number. Among them was a furge body of Cherokee ludhans, recruited for the Conferierate service by Nliert Pike, who thirty rears befori had won reputatlon as a poet. On Darch 5, 1802, Yan Dorn moved to attack Curtis, who knew of hls coming and formed his tino on the bluffs along sugir Creek, facing southwani. lils divhlons were commanited hy Generais Franz Nigel and Alexauder S. Asboth and Culunels Jeiferson C. Davls and Eugene A. Carr, and he had somewhat more than 10,000 men in llue, with 43 guas. The Confederates, findiag the position too strong in front, made a night mareh to the west, with the intention of striking the Sathomals on tive Hight tlank. But cuits discovered thelr movemeut at dawn, promply faced his line to the riglit about, and executed a graud left wheel. D. 18611882 (December-March: Virginia)] and he had Withdrawn behlnd the Mapidan, the Urbana mosement lost much of its promise, as the encmy was now in positlon to reach Ilchmond before we could do so. The afternative remained of maklng Fort Moaroe and lis vleini:y the base of operations. The plan first adopled was to commence the movement with the First Corpe as a Uuit, to land north of Gloucenter and move thence on West Polnt; or, should clrcumstances render it advisable, to iand a ilttle below Yorktown to turn the defensea between that place and Fort Monroe. The Navy Department were confldent that we could rely upon their vessels to neutral. ize the Merrimac and ald materially in reduclag the battcries on the York Iiver. . As trans. ports arived very slowly, especially those for horses, and the great impatlence of the Government grew apace, it became necessary to embart dirisions as fast as veszeis arrived, and I declded to iand them at Fort Monroe, holding the First Corps to the last, stili Intending to move it in mass to turn Gloucester. On the 17 thi of March the leadlag divislon embarked at Alexandria. The campalgn was undertaken with tic intention of takligg some 145,010 troops, to be lncreased by a divislon of $10,0 \mathrm{MH}$ drawn from the troops in the vicinity of Fort Monroe. .. On the 12 h of March I learned that there had appeared In the dally papers the order relleving me from the general command of all the armles and continling my authority to the Department of the Eotomac. I had recelved no previous intimatlon of the intentlon of the Government in thls respect.
On my arrival at Fort Monroe on the ad of April, I found five divislons of infantry, Sykes's hrigado of regulars, two reginients of cavalry, and a portion of the reserve artillery disemharked. Another eavalry reglment and a part of a fourth bad arrived, but were stllt on shipboarl; zompuratively few wagons had come.

The lest Informntion obtainable repre. sented the Confederate tromps nroutul Cinrktown as numbering at least 15,000 , with alsut an equal force at Norfolk; and It was cleur thint the army intely at Mamasas. now mostly near ciordonsville, was lu position to be thrown promptiy to the Penlnsuln. $\qquad$ On my nerivalat Fort Monroe I leurned, In an interview with Fhag-Otticer Goldsborough, that he coald not protect the Jamps ns a liue of sapply, and that he could Purnisla no vessels to take un actire part In the reluctlon of the batteries at York and Gloucestar or tor ran by and gain their rear. ment on the two roads; the result belag that, on the afternoon of the 6th, the Third Corpa was engsged with the enemy's outposts in front of Yortiown and under the artlilery fire of the place. The Fourth Corps came upon Lee's Jills and found It covered hy the unfordahie tine of the Warwict, and reported the positlon so strong as to render It imposaihle to execute its orders to asault. Thus sll things were brought to a stand-stlli, and the intenied movement on the Halfway Ifouse could not be carried out. Just at this moment caine a telegiam, dated the 4tli. informing me that the First Corps [McDoweli's] was withdrawn from my command. Thus, whell too deeply committed to recede, I found that another reduction of alout 43,000 ... dimininhet my paper force to 92,000 , Instead of the 155,000 on which the plans of the campaign had been founied,
which reduced the numbers actu. aliy availabie for battle to some 67,000 or 68,000 . The order withdrawling the First Corps also hroke up the Department of the Potomac, formlag oirt of lt the Department of the Shennmionh. under Generai Banks, and the Department of the IRappabannock, under Generai MeDoweli, the latter incluiling Washlagton. . . . Mountain hy the Federals, the Battie of Boons. boro by the Confederates. At Turner's Gap there was a loss of about 1,500 on each side, and 1,500 Confederates were made prisoners; at Crampton's Gap, the loss in kiled nud wounded was some 500 on each slde, with 400 Confcicrate prisoners taken. The Union nrmy had forced the passage of the mountalns, hut Lee hal galncd time to unlte hils scattered forces. "Ho withirew across the Intletam, and took up a position on high ground betwecn thut stream and the vlliage of Sharpshurg. Lee now had his army together and strongly posted. But it had been so reduced hy losses in hattle nnd strag. gling thnt it numbered hut little over 40,000 combatants. . . . McClclian had somewhat over 70,000 men. . . . The ground occupled by the Confederate army, with looth fianks resting on the Potomac, and the Antictam tlowlng in front, was advantageous. The creck was crossed by four stonc hridges and a ford, nnd all except the northermmost hridge were strongly guarled. The lanl was occupled hy meadows, cornticids, and patches of forest, and was much broken hy outcropplng iedges. McClelian only recon. noltered the position on the 15th. On tue 16th he developed his plan of attack, which was simply to throw his right whog across the Antietam hy the upper and unguariled hridge, nssail the Confederate left, and when this had sufficiently engaged the cnemy's attention and drawn hls strength to that flank, to force the hrldges and cross whith hls lcft and centre. All day long an artlllery duel was kept up. It was late in the afternoon when I'soker's corps rrossed hy the upper hridge, ndianced through the woods, and struck the left flank, which was held hy two hrigades of Ilood's men. Scarcely more than a sklrmish ensucd, when darkness came on, and the ilnes rested for the niglit where they were." At sunrise, next morning, Ilooker nssaulted Jackson and was serlously wounded ln the fightling which followed. Sumuer's corps tinally jolned in the nttnck, and all the foremoon the hattle was desperate $\ln$ that part of the fichl.
"But whille this great struggle was ln progress on McClellan's right, his ccutre and left, uuder Porter and Burnside, dal not make any move. ment to assist. At noon Franklin arrived from Crampton's Gap, and was sent over to help Hooker and Sumner, being just in tlme to check o new ndwauce hy more troops hrought over arom the Confederate right. At clght orelock ln the morning Burnside had been ordered to carry the bridge in his front, cross the stream, and attack the Confederate right. IBut, though commanded and urged repeatedly, It was onen'clock hefore he succeeded in doing this, and two more precous hours passed a way before he had carricd the rldge commanillng Sharpshurg and captured the Confederate hattery there. Then came up the last divislou of Lae's forces (A. P. Ilill's) from llarper's Ferry, 2,000 strong, inlted whth the other forces on hls left, and drove Burnshle from the crest and re-took the hattery. Ilercendel the hattle; not because the day was closed, or nuy apparent victory had been achleved, hut because buth sides had been so severely punlshed that nelther was iuclined to resume the fight. Every man of Lee's force lad heen actlvely engaged, lut not umre than two thinds of McClellan's. The reasou why the Confcderate army was not anuihilated or captured must be plaln to

destroy slavery. If I could save the Cnlon with. out freeing any slave, I would do It. If I could eare it hy freeing all the slaves, I would do lt, and If I could do it by freeing some and leaving others alone, I would nlso do that. What I do about slavery nad the colored race, I do becnuse I believe it helps to suve the Cnion; and what I forbear, I forbear because I do not helleve It would help to sure the Unlon. I shanll to less whene ver I shall bellere that what I am cloing hurts the cause, nod I shall do more whenever 1 hellevedoing more will help the cnuse.' Thus, against all hmportunlties on the one hand and re monstrances on the other, he took the mighty question tu his own heart, nnd, durlug the long months of that terrlble hattle.summer, wrestled with It ulose. But at length he realized the saring truth, that great unsettled questlons have no pity fur the repose of natlons. On the 22d of september, he summoned hls Cnbinct to nnnounce his conclusion. It was my good fortune, on that same day, nod a few hours after the meeting, to henr, from the lhes of one who particpated, the story of the scene. As the ehiefs of the Exccutive Departments came in, one by one, they found the I'resident reading a favorite chapter from a popular humorist. Ile was lightaning the welght of the great :urdea which rested uphn his splrit. IIe finlshe the chapter, realing it aloud. And bere I quote, from the publishexl Journal of the late Chief Justlce, no entry, written lamediately after the meeting, ad bearing unmistaknble evldence that it is almost a literal transeript of Llncoln's word'The President then took $n$ graver tone and said: "Gontlemen I hnve, as you are aware, thought a great deal nbout the relation of this war to slavery; and you nll rensember that, everal weeks ago, I rend to you an orter I had prepared upon the suhject, whleh, on account of objections made by some of you, was not lissued Eter since then my mind has been nuch oceupled with this subject, nad I have thought all nlong that the time for neting on lt might prohably come. I think the time has cone now. I wish It was a better time. I wlsh that we were in a better coulition. The action of the army against the rebels lins not been quite what I should bave best liked. But they have been driven out of Sarylami, aud I'consgivunia is no longer In danger of invaslon. When the rebel army was at Frederick, I determined as soon as it shouli bedriven out of Maryland to lssue a proclana tion of cmuncipation, such as I thought must bikely to bic usefil. I sull nothing to nuy one, but I male a promise to myself aud (hesitutiug s litte) to my Mnker. The rebel army ls now diven cut, and 1 nm golng to fultil that pronise. I have got yon togetber to hear what I linve Tritten down. I to uot wish your nulvice about the main matter, for that I bnve determined for mfself This l say without intendling anything but respect for miny one of you. IBut I nirendy know the views of each on this questlon. They bare ber $n$ heretofore expressed, aud I bave consid. eted them as throroughly nud cnrefully as I can. What I have written ls that which my reflectlons hare determined une to say. If there ls anything in the expresslons I use, or In nny minor matter which any of you thinks had best be changed. I shull he glad to recelve your sug. gestluns. One other observation I will make know very well that many others naight, in
tbls matter as In otbers, do better than I can and If I was satlsfied that the public confidence was more fully possessed by any one of them than ly me, and knew of any constltutional way In wblch he could be put in my wince, he should I ce lt. I would gladly yleld it to hlm. But though I believe I have not so mucb of the conflence of the people as I had some tlase slnce, I do not know that, all thlngs consldered. any nther person bas more; and. however this may he, there is no way ln which I can have any other minn put where I am. I am here. I must do the best I can and hear the responslbillty of titking the course which I feel I ought to toke." The President then proceeded to read lils Emanclpation Proclamntlon, moking remarks on the several parts as be went on, and showing that he had fully considered the subject in all the lights under which it had been presented to hlm.' The Proclamation was amended in a few matters of detail. It was signed mud puhlished that day."-J. A. Gurfield, Works, r. 2, pp. 538-540. - 'I was alone wlth Mr. Lincoln more than two bours of the Sunday next after Pope's defeat $\ln$ August, 1802. That was the darkest dny of the sad years of the war. . . . When the business to which I had been summoned by the Presldent was over - strange huslness for the tlme: the appointment of assessors and collectors of internal revenue - he was kind enourh to ask my oplnion as to the command of the nrmy. The way wns thus opened for conversa tlon, and for me to sny at the eud thant I thought our success depended upon the emmncipation of the slares. To this be said: 'lou would not have It done now, would you? Must we not wait for sometblng like a victory ?' This was the second and most expliclt Intimation to me of his pur pose in regard to slavery. In the preceding July or enrly in August, at an interview upon buslness connected witb my othcial duties. he said, 'Let me rend two letters,' and taking them from n plgeon-hole over his table he proceeded at once to do what he had proposch. I have not seen the letters ln print. Ilis correspoudent was a gentemnn in Lohtsiana, who claimed to be a L'ion man. Ile tendered his advlec to the President $\ln$ regard to the reorganization of that State, and he labord zadously to impress upon him the dangers and evils of emancipation. The reply of the I'resident is only lmportint from the fact that when he came to that part of his eorrcspondent's letter he used this expression: 'You must not expect nie to give up this goverunent without playing my last card." Emancipatlon was his last carl. He waited for the time when two facts or events should eoincide. Mr. IIncoln wis as devoted to the Constitution as was ever Mr. Wehster. In his view, a military necessity was the only ground on which the overthrow of slavery in the States could be justitiel. Next, he wnited for n public sentinent In the loynl States not ouly demanding emancipation but giving full assurance that the net would be sustained to the eud. During this time, he directed the strengthening and remodciling of the fortifications of Corinth.

New works, closer to the town, were erected. . . Van IDorn at last determined to move part of his force (under Price), east of Grant, apparently with a view to crossing the Tenaessee and reenforcing Bragg in the Ken. tulky campalgn. Grant notifled Haileck of the probablity of such a movement, and of his infention to prevent it. . . On the 13 th [of September], Price advanced from the south and selzed Iuka, 21 milcs enst of Corinth.
Gmnt had called in his forces some days before to the viclaity of Corinth, had repeatedly cau. tioned all his commanders to hold their troops in readiness, and when the cnemy's cavalry moved towards Iuka, and cit the rallroud and telegraph wires between that place and Burneville, seven miles to the westward, Grant begau hls operations. Price was at Iuka, ard Van Dorn four days off, to the southwest, threntening Corinth. Grat's object was to destroy Price, before the two coulh concentrate, and then to get hack to Corinth and protect it against Van Dorn. He sccontingly ondered Brigadler-General Rosecrans, whose troops were posted south of Cortoth, to inove by way of Rienzi, along the south dide of the Memphis and Charlestin Railroad, and attack Iuka from that dircetion: while Ifsor General Ori, with a force hrought hurriedly from Bollvar and Jackson, was to push towards Burnsvilie, and from there take roads on the north side of the rallroad, attacking Iuka from that quarter. Ord had 8,000 men, and Rosecrans reported 0.000 , a greater force combined than Price had, according to Grant's estimate." Rosecrans's movemeut was delayed, and he was attacked (September 10) in heavy fore as he acared luke, Ord's advnnce having beea hekl back waltiug for him. The encmy was checked untli morning: but, carly on the th, the whole rebel army, Hushed with the success of the day before, assanited the works. The tighting was fiercc; the rebels charging almost into the town, when nn mexpected fire from the forts drove them back in confusiou. Again and agaln, they advanced to the works, but each time werc recelved with a detcrmination equal to ihelr own. Oncc, the national troops came near givlog way entirely, bu* Rosecrans rallied them in person, and the rele.s were finally repulsed before noon, with a loss admitted by themselves to be double that of Rosecrans. The national loss was 315 khied, 1,812 wounded, and 233 prisoners and missing, Rosecrans reported the rehel dead at 1,423, and took 2.225 prlsoners.

The repulse was complete, hy 11 ocluck in the morning, bit unfortunately was not followed up hy Rosecrans, till the next day. The rebels, huwever, started off in haste and disorder immediately after the fight; and on the 5th, while in full retreat, were struck in tlank, as Grunt had plannedi, hy Hurlbut aud Ord, nnd the dlsaster was rendered tinal. Thls occurred early on the morning of the 5 th, at the crossing of the Hatchle river, abont ten milics from Corinth.

Stoneman crossed the IRappahnnnock at Kelly's Ford on the 29th, and Sedgwick appenred on the 28th on the leights lelow Fredericksburg. These pre paratory measures hnvlng been taken, Hocker proceeded to the execution of his plan, Swinton after a picturesuuc description of the passage of the Inappalannock und the Raphan, tells us - that on the afternown of the 30th of April four corps of the Federal urmy bal gained the posithon of Clanncellorsville, where Hooker at the same tlme established his healquarters.' Chancellorsville ls situated ten miles southwest of Frederickshurg. It is not, as its name lmplies, a town or village, but simply a farm-house with its usual appendages, situated nt the edge of a small teld surrounded by $n$ dense thicket of second growth, which sprang up after the primevni forest liad been cint to furnish fuel to a nedgbboring furnace. This thicket extends for miles ln every direction, and its wild aspect very properly suggests its name, The Wilder. ness. The lntersection of several important roads glves lt the semblance of strategic Importance, while in reulity a more unfavorable place for military operatlons could not well he found. Hooker, however, scemed well pleasel with hls actuisition, for on reaching Chancellorsville on Thursilay night he lssucd an order to the troops in which he nnnounced that 'the enemy must either ingloriously ty or come out from behind his defences and gire us linttle on our own ground, where certain lestruction awnits him."

Genernl Lee was firly aware of the preparatlons that were being made loy his adversary, but calmly nwaited the complete development of his plans before exerting his strength to oppose him.

On the esth
Lee orilered Jackson to concentrate his whole corps in the lmunediate vicinity of Frederiekslurg. Early on the morning of the 39 th Sedgwick crossed the Rappalannnock lelow the month of leep liun, hut male no other agrressive movement on that day or the day following. On the night of the Both, Lec was informed of lionker's arrival at Chancellorsville. Ile had bern prevlously lnformel of Stoneman's movements agalnst hls line of opemtious hy General Stuart, and was now satisflet that the main attack of the cnemy wonld come from the direction of Clancellorsville. Therefure on the morning of the 1st of May he made the newessury preparations to meet lt. Accompunied ly his statf, le took a position on a lheight where one of his hatteries overlooked the Kappahannork. He there olserved carefully the position of Sedgwick, while waitlng for lnformatiou from the direction of Chancellorsville.

Very soon the sound of cannon Indlcated that the work liatl begun. After making a circultons march of 15 miles, Jackson reached a polnt on the Orange Court. honse road three miles in the rear of Chancel. Iorswlle. Had Hooker possessed a handful of cavalry equal in spirit to the 'Virginia horsemen' under W. II. F. Lee that nentruized Stoncman's ten thousand, he might have escaped the perii that uow awalted him. On the arrival of Jackson on the plank rond, Fitz Lce, who bad covercel hits movement with his brigade of cavairy, condincted him to a position from which he obtaine $i$ g vicw of the encmy, winich dls. closed the following scene: - Below and but a few hundred yarts distant man the Federal line of inatle. Delays Incident to combined movements, eapeclally from separate commands, kept his expedllionary column back for six days I commenced the movement from Corinth on the 15th [April]. . On the 17th, Col B. H. Grierson, Slxth Illinois Cavalry, with his own regiment, the Seventh Ililnois, and Secood Iowa, moved from La Grange, by way of Pontotoc, wlth orders, after passing Pontotoc, to proceed atraight down, throwling noe regiment to the left toward Okolona, and to push for and destroy the Chunkey River Bridge and any others they couid reach, and either return, or proceed to Baton Rouge, as mlght be found ad. risable. On the same day. A.pril 17, a column of fofantry 1,500 strong, and one battery, moved hy railroal from Ln Grange to Coldwater, whth orders to push rapidly between Coldwater and the Taliahntchee, and take Chalmers ln flank and rear whilc attacked $\ln$ front hy three regiments, a hattery, and 200 cavairy from Memphls, whlch left here on the 18 th . I consldered that the effect of these movements would be to puzzle the enemy and withdraw his force from the centrai line, whlch has proven to be correct. Grierson, on the 19th, detached the Second Iowa beiow Pontotoc, which fought lis way gallantly back to La Grange and came home wefl mounted. The main cavalry column (Sixth and Seventh llilinois) proceeded, wlthout loss or engagement. to Newton, on the Sonthern Mlasissippi Rallroad, and there destroyed bridges." Col. Grierson, In bis own fuil report of the remarkable expedition thus set on foot, after narrating the proceedings of his command until it struck Newton Station, on the 2th of Aprii, continues: "From cap. tured salis and informatlon ohtained by my scouts, I knew that large forces had been sent out to intercept our return, and having instructicos from Major-General ILurlbut nad Brigadier. General Snith to move ln any uliectiou from this point whlch, in my judgment, wouid be best for the ssfety of my command and the success of the experition, Int once decided to move south, in order to secure the necessary rest and food for men nud horses, and then return to La Grange through Alabama, or make for Baton Rouge, as I might herenfter deem best. After resting about three hours, we moved south to Garlandrifie. At thls polnt we found the citizens, salany of them venerable with nge, armed with shot-guns and organized to resist curapproach, As the advance entered the town, these citizens fired upon them nad wounded one of our men. We charged upon them nad captured severai. After disarming them, we showed them the foily of their aetions, and reicased them. Without an exception they acknowlellged their mistake, and deciared that they had ineen consly deceived as to our reai character. One rolunieerei his services as guide, and upon leav. ing as declared thnt hereafter his prayers should be for the l'uion Army. It was not untll the $2 d$ of May that Grierson and his smail force reached the Unlon llnes at Baton Rouge. The total accompllshments of the expe-ditlon-ashle from the important revelatlon it mnde of the condition of things in that region of the Confederacy - are summed up $\ln$ the Colonel's report as foilows: "During the expeditlon we kilied and wounded about 100 of the enemy. captured and paroled over 500 prisoners, many of them officers, destroyed between 50 and 60 milles of railroad and telegraph, captured and destroyed over 3,000 stand of arms, and other army stores and Government property to an immease amount; we also captured 1,000 horsen and mules. Our loss duriag the entire journey was 3 killed, 7 wounded, 5 left on the route slez; the sergeant-major nud surgeon of the Seventh Ilinois left with Lieutenant.Colonel Blackhurn, and 9 men missing, supposed to have straggled. We marched over 000 mlies in less than sirieen days. The last twenty-eight hours we marched 76 mlles, had four engagements with the enemy, and forded the Comite River, whlch was deep enough to swim many of the horses. During thls time the men and horses were without food or rest. Much of the country through which we passed was almost entlrely deatltute of forage and provislons, and it was hut seldom that we obtalned over one meal per day. Many of the Iniabitants must unduubtedly suffer for want of the necessarles of life, which have reached most fabulous prices."-Official Records, series 1, $r$. 24. pt. 1, pp. 520-529.
A. D. 1863 (April-July: On the Missis-aippi).-Grant's Campaign against Vickshurg. - The final operations.- His personal account of the siege and capture.-" April 30th was spent $\ln$ transporting troops across the river [to Bruinsburg]. The troops were moved out towards Port Gibson as fast as they were landed. On the 18t of May the nd rance met the enemy uader Bowen abont four miles west of Port Gibson, where qulte a severe battie was fought, resuiting in the defeat of the enemy, who were driven from the field. On May ad our troops moved into Port Glbson, and, finding thint the brilges over Bayou Pierre were destroyed, spent the haiance of the day in rebulld$\operatorname{lng}$ and crossing them, and marehing to the North Fork, where we encamped for the night. During the nigit we rebullt the brldge across the North Fork, which had aiso been destroyed, and the acst day (the 3d) pushed on, and, after consilcrabie skirmishing, reached the Big Biack, uear IIankinsou's Ferry, nad the Mississippl at Grand Guif.

Here I [General Grant] received a iettcr from Banks stating thant he could
not be at Port Hudson [which Grant had intended not be at Port Hudson [ which Grant had Intended to jola Banks in attacking, before he turned ngninst Vickshurg] for some dnys, and tien, with an army of oniy 15,040 men. As I did not regard this force of in nuci vaiue ns the time which would be for in walting for it, I determined to move on te Vicksturg. Tie 4th, 5th, nad Bth of May were spent iu reconnoitering towards Vicksburg, and also in crossing Sherman's troops over to Grind Ginif. On the 7th, Sherman having joised the main body of the army, the troops across the Big Biuck were withdrawn, and the movement was commenced to get ia position on the Vickshurg and Jackson rallind so as to attnck Vicksbury from the rear. Thls occupled the army from the 7th to the 12 th, when our
poaition was near Fourteen Mile creek, Raymond being our right lank, our ieft resting on the Big Black. To ohtain thla position we fought the battle of Raymond, where Logan's and Crocker's divislons of McPherson's corps defcated the Confederates under Generai Gregg, driving hilns back on Jackson; Sherman and McClemand boti having some skirmishing where tirey crossed Fourtecn Mlie creek. As the ammy under Pemberton was on my ieft flank, and that under General Joseph E. Johnston on my right at Jackson, I determined to move the army rapidly on Jackson, capturing asd destroying that place as a military depot; then turn west and destroy tho army under Pcmberton, or drive it back into Vickshurg. The 13th was spent in making the first of these moves. On the 14tin Jackson was attacked with Sherman's anii McPherson's corps. The piace was taken, and ali supplies that could be of service to the enemy were destroyed, as weli as the raifroad bridge. On the 15th the troops were faced to the west and marched towards Pemberton. who was near Edwards's Station. The next day, the 16ti, wo met the enemy at Champion's Hili, and, nfter n hari-fought hattie, defeated and drove him buck towards Vlckshurg, capturing 18 guns and nearly 3,000 men. This was the hariest fought battie of the campaign. On the 17 th we reached the Big Black, where wo found the enemy intrenched. After a hattie of two or three hours' duratlon we succeeded in carrying their works by storm, capturing much artiliery and about 1,200 men. . . We crossed on the morning of the 18th, and the outworks of Vleksburg wero reached hefore night, the army taklng positlon In their front. On tho 10 th there was continuous skIrmishing with the eucmy while we were getting into better posltlons. At two oclock I ordered an assauit. It resulted in securing naore advaneed positlous for all our troops, where they were fully eovered from the fire of the enemy, and the siege of Vleksbing began.
Most of the army had now been for three weeks whth oniy five days' rations issued iny the contmlssary. They hui had nn abundance of food. however, hut had hegun to feel the want of hreai.. . By the ulght of the 21st fuil rutions Were issued to nil the troops. . . now de. termined on a secomi assauit.

The nttack rras orlered to commence on ali parts of the line nt ten o'ciock A. M. on the 2 dd with a furions cmanonade from every battery in position. All the corjs commanders set their tlme by mine, so that all might open the congagment at the same nilmute. The nttack was gallime. and portions of areh of the three corps shecereled in getting uj) to the very parupets of the enemy but at no piace were we able to enter. As som as it wastark onr tropps that hanl renchedi the enomy's line nal hat been obliged to reman there for security nhl day were withdrawn, and thus ruled the last nssualt on Vicksburg. A regularsiage was now determined upon.
. The Unlon furce that had crusad the Mississippl river up to this time was less than 43, unt men.

Excited hy such bostigation, the audience passed sundry dumna. wry resolutions and sent them io the President, Cpon receiving these Mr. Lineoln felt that he dust come down into the arenn, witiont regard to official eonventionnlity. (On June 12 fie replied hy a fuli presentation of the case, from his point of view. He had once more to do the same thing in response to another address of fike character which was sent to him on Iune it le the nemuratie state convention of Ohio."-J. T.
 New fork Ibemorats, Mr, Lineoln said: "It is sserted in substance, tiant Mr. Vallandighan *as, ly a military eommander, seizel uni tried for no wher reason than words ndidressed to a pubicemethng in eriticisna of the eourse of the administration, nat in eondemnation of the ar iitury orders of the deneral.' Now, if there be no mivtike about this, if "his wssertion is the tr in wel the whole truti, if there was no other reasun for the urrest, thien I coneefie that the amet was wing. But thearrest, as I undicrstani, mas madie for a very different reason. Mr. Val. badightum ayows hiis hastility to the war on tie part of the linim; and hils urrest was nude because he was laloring, witi some effect, to prereat the raining of troips, to encourage desertions from the arays, unf to leave the rebelion without an aleyumte military force to suppress it. Ho mas wot arreotel because be was dumaging the politicai prospects of the administration or the persunal interests of the eomunuding geveral,
but lecnuse he wras dnmaging the army, upon the existence of whleh the life of the natlon dependis. He was wnrring upon the mlitary, and thls gnve the mlifitry constitutlonal juris. dietlon to lny hnnds upon him. If AIr. Valiar iig. haun was uot dnmaging the military power of tine country, then his arrest was made on mistake of fact, whileh I wouid be glad to correct on rensonabiy satisfactory evidence. I understand the mecting whose resoiutions I am considering to be in fivor of suppressing the rebeifion hy mllitary force - by armies. Long experience Las shown that armles cannot be malntalned uniess desertion shall be punlshed by the severe penalty of deatin. The case requires, nad the law and the Constitution sanctlon, thls punish. nent. Must I shoot a simpie-minded soldir $r$ ooy
 wily agitator wio induces him to desert; This is uone the less Injurious when efeced $r_{y}$ get. ting a father, or hrotier, or friend tnto a publle meeting, and there working upon his feeling tlll he is persuaded to write the soldier boy that he is ttghting in a bad cause, for a wieked administrution of a contempti' le government, too wenk to arrest and punis, ${ }^{\text {him }}$ if he shali desert. I think that, in surh a case, to silence the ngltator and save the boy ls not only constitutlonai, but witial a great mercy. If I be wrong on this question of constltutional power, my orror lies in beiieving that certain proceed. ingu are constitutional when, in cases of rebeifion or Invasion, the public sufety requires them, whleh wonld not be eonstitutional when, in absence of relcellion or invasion, the pubilic safety dyes not require them: in other wo dis, that the Constitution is not in its application in nll respeets :ite same in cases of reheifion or invasion involving the puhiic safetr, as it is in times of profound peace ani public security. The Constitution itsclf makes the cistinetion, and I can no more he rersuaded that the government can constitutionaify take no strong measures in time of rebeifion, becanse it can be shown that the same couil not lee iaw fuliy taken in time of peace, than I ean b ; crsuaded that a particular drug is nut guod mediehe for a sick mun because it can le showr, not be gomi foni for a weli one. Vor an In te to apprecitte the dianger appreflended by the meeting, that the Aneriean people , ill by meams of nititary arrests durlug the rebellion fose the riynt of piblic discussion, the liberty of speech imi the press, the lave of evi lence, trial by jury, mai habuas corpus throughont the ind tinite peacefui future which I trist lies hefore them, any more thim I am able to hefieve thit at man could eontrat so strong an apprtite fur cmeties during temporary iilness as to prowist in fecing upon them during the remula. der of his henttifui life. In giving the resolution:s " earmest consteration whieli you ergues: a, I emnot overlook the fate that the 111 speak as 'ICmoerats' Nor ean I, with $f_{1}$ speet for their known hatelligence, und the firrly presumeti deliberation with which they prepared their resolinions, be permittell to suipuse that this oceurred by icceident, or in any Way other timn that they preferreif to ciesignato themselyes 'I memocrats' rather than 'Aneriean citiaens.' Jut slnce you have denied me this, I wlil yet be thankful for the country's sate that not all Democrats have done so. He on whose discretlonary judgment Mr. Vallardiphas was arrested and itted ls a Democrat, haviag no oit: party affilty wlth me, als.. the juige who rejected the constltutloual vlew expressed in these resointions, hy refusing to discharge Mr. Val. laudlyham on habeas corpus is a Democrat of better dags than these, having recelved hls judlclai mantle at the hauds of President Jackson. And still more, of all those Democrats who are aobiy exposing thelr lives and shedling their blood on the battie-fleld, I have learned that many approve the course taken with 31: Vailandigham, whlle I have not heard of a iugle one condemning It. I cannot assert that there are none such." - Ahrabam LIncoln, Complete Works, v. 2, np. 849-350. - To the Ohlo Democrats, the Presilent wrote as foilows: "You claim, as I understand, that according to my own posltion lu the Aihauy response, Mr. Vailandlg he' 1 shoull be released; and thls leecause, as you (in $n$, he has not diannged the military service by discouraglng enilistments, encouraging deaer. tlons or otherwise; and that lf he had he should have been turned over to the civll authorities under the recent acts of rengress. I certalniy do not know that Mr $\forall$ allandighan has specifienily aml by direct language advised against culistments and in favor of deg rtion and resistance to drafting. We ali know that combina. tions, armed in some instances, to resist the s:Test of deserters began severai months ngo; that more recentiy the llke has nppeared In resistance to the enrolment preparatory to $n$ draft; and tinat quite n number of aasnssinations have cecnrred from the same nnimus. These had to be met by milltary force, and thls agaln has !ed to biomlsied and death. And now, under a sense of respousibility more weights and enduring than any which is mereiy oflicial, I solemant deciare my helicf that this hindrance of the nilitary, fuchading maiming and murier, is due to the eonrse In which Mr. Fulhndigham has been engagedi in a greater degree than to any other cnuse, nud it is due to him persounlly in a erenter degre thun to any other oue man. These things have been notorious, kuown in ali, and of course known to Mr. Valiandigham. IPerimps I woulid not be wrong to say they originated with his speclal friends and adiherents. With jerfect knowlecige of tbe in, he has fre. quently if not constantiy made apreebes in Congress ind before ponular assentblies: and if it can be shown that, with these things staring him in the face, be ins ever uttered a wori of rebuke or conusel againat them, it will tee a fact greaty in his fawn with me, and one of which as yet I mol totally tenorant. When it is known that the whole burden of his specehes has beeu to stir up men against the prosecution of the war, nud that in the mldst of resistance to lt he has not been known in any instance to connsel against such resistance, It is next to impasiblile to repel the Inference that he has commseled directig In favor of lt. With all thls before their cyes, the
conventlon you repretent have nominated y Vallandlgham for goverant of Ohb, and bot they and you have declared the purpmee to ou taln the Natlonal U'nlon by all constltutlona means. It was atrongly fortited and well defended hy Colonel Frank Gariner. The artllery of General Banks opened fire on the 2ith, and at ten oclock the amae day an mssault was mule, in which the colorn i sitiers showed much firmness and bavery. The assantt failial and the losses in it were henvy. " 1 bonmariment of the pofition hai been mado hy the dect uuier Admiral Farragut, for a week previous to this assault. Reconnoissaaces bati siiscovered that the defences mere tery stroag, consistiag of geveral lines of hatrenchments and ritle $\mathrm{l}^{1--}$, with abatis of beavy thes fellend in every dlrexion. The upier batteries on the river were attacised hy the llartford and Albatross, which had run the hlockuie, and the lorer by the Monongalela, Kichmoud. Genesee, and Essex. On the lith of June, after a bumbriment of several days, another assauli on Port liudsou was mode. . Ail the assaulting colamis were compelled to fall hack under th. deady firc of the enemy, and the fightiag finally ceased ainat 11 oclock iu the morning. The lose of Geu. A. D. 1863 (June: Virginla).-Lee's second movement of invasion and the lnducements to it. - Northern invitation and Southern clamor.-The Snuthern vlew.-."The defeat of Gencral llooker at Chancellorsville was the thinlng point of the war, and for the first tlme there was apparently a posslbiiity of Inducing the Federal Government to relinqulsh its oppositlon to the estahiishment of a separate authority In the South. The illea of the formation of a Southern Confederacy, distinct from the old Cnlon, had, up to thls time, been repudiated by the authoritios at Washingtor as a thing utteriy ont of tho question: but the defeat of the Federal arms In the two great battles of the Iappahannock had caused tha most determined ol': "nents of sepuration to de uht whethes the sunth couid be coerced to retarn to the Union: and, what was equally or more important, the proclamations of Presicient Lincoln, declarthe the slaves of the Sonth free, aud placing the United States virtumliy under martinl iaw, aronseci a vioient clamor from the great Demo: crutic party of the North, who loudly asserted that ali constitntional liberty was disappearing. This comhination of non-success in millary affairs audi usurpution by the Governmeut em. boldened the adrocates of peace to speak out plainly, and utte: thrir protest against the continuauce of the struggle, which they dechared had ouly resulted In the prostration of all the liberties of the country. Juuranis andi periodicals, vioiently denunciatory of the course pur sued hy the Goverument, all at ouce made their appearance in New York and elsewhere. A peace convention was called to meet in Philadelphin. Ou all siifes the aivucates of peace on the basis of separation were heuri raislng their impurtunate voices. . . . The plun of moving the Sonthern urmy northward, with the view of invading the Federal territory, seems to have heen the result of many circumstunces. The count.y [Southeru] was elatci with the two great victories of Frederickshurg and Chancellorsville, and tle peopie were clamorous for active operaticas apainst an enciny who seemed powerlese to stand the pressure of Southern steel. The army, which had heen largely aug. mented hy the return of ajountecs to lts ranks, new levies, aut the recali of Longstreet's two d|rlaions from Suffilt, shared the generai enthusiamm andi thus a very bavy pressure was brought to bear upon the authorities and on General Lece, iu faror of a forward movement, which, it was supposel, would terminate in : sigraal rictory and a treaty of perce. Lee flelded to this riew of thiugs rather than urged it. Another important consideration was the ques tiou of supplles. ... Nore than ever before, these supplies were now needed; and when Gen-

The Atlantic portion of the Southern Statcs is separated from the Mississippi Valics by majestic folds of the earthis surface, constitut. ing the Appalachian Ranges. These folds run, in a gencral namuer, parallel to each other, and at intervals are crossed by transverse depressions or gaps. Such passages or gateways are therefore of great counmerelal, political and military importance. Chattanonga, which in the Cherokee language means 'The Hawk's Nest,' is a little town seated in one of these transverse depressions, through which the Tennessee River and a system of railroads pass. . . . ing his rallroal communicatlons, asking for reinforcementa, and waling for corn to ripen for foxl and forage. When he advanced, it wins to turn the left of Bragg's positlon at Chattanenga, and " reach his rear between Dalton and Atlanta. To do this, he had to cross the Tennessce River below Chattanooga, and then pass the three or four successi ve monntaln ridges.

Rosecrans reacherl the Tennessee liver on the evening of the 20th of Angust, and sheiied Chattancoga from the helghts on the north bank on the 21st. Bridges were thrown over the river at Caperton's Ferry, month of Battle Creek, and Shell Mound, and the army, except the cavalry, safely erossed In face of the enemy. By the 8th of September " the several movements planned for Thomas, McConk and Crittender: were successfully accomplisherl, and Chattanooga was abandoned by the Confederates. "Thus the first object of Rosecrang's campaign was aceomplished: the 1 m portant strategle polnt Chnttanooga was obtained. . . . Rosccrans, belleving himself perfectly sceure in Chattanooga, and being convinced that Bragg was tleeing southward, did nothing to fortify himself. Taklng measures to pursue his antagonist, he directed Crittenden to leave one brigade at Chatianooga as a garrison, and whth the rest move forwnrd to Ringgold. Thomas was to march to Lafnyette, and McCook upon Alpine and Summer Criek. But Bragg, so far from continuing, liad stopped his retreat-he was concentrating it Lafarette. Ile had recelved, or was on the pulit of recelving, the powerful re-enforcements directed to join him. Ile was strictiy ordered to clicek the fartber advance of the Army of the Cumberlanil.

Roseerans had separated three corps of his army by mountain ridges and by distances greater than those interrening between each of themand the enemy. Bragg had concentrated opposite his centre, and was holding such a position that he eonld attack any of them with overwhelming numbers. He had cansed dieserters and citizens to golnto Rosecrans's lines to eonflrm him in the inpresslon that the Confederates were in rapid retreat.

On the 11th of Acptember, Crittencien, not stopplag to fortify Chattancoga, pushed on townrd lingegold to cut of buckner, wbo he had heard was coming from East Tennessee to the support of Brngg. A. D. ${ }^{1864}$ (May: Virginla).-Grant's movement on Rlchmond. - The Battle of the Wilderaess. - "The movement of the Army of the Dotomac eommenced carly on the morninis of the 4th of May, under the inmeetlate dirrectlon and orlers of Major General Mead, !ursuant to instructions. Before night the whole ammy was across the liaphlan - the Fifth undi Sixth Corns crossing at Cermanma Ford, and the Seeond Corps at ('nited states' (Ely's) Ford, the ravary, under Major-General siheridan, moving In advance, with the greater part of its truins, numbering about 4.000 wagons, meeting with but sllglit orposition. The average dhatance travelerl by the troops that diy was about 12 miles. This I regarded as a great success, and it removed from my mind the most serious appreliensions I had entertainel, that of crosslng the river in the face of an active, large, well-uppointed, andialy eommanded army, nud how so large a truin wistolve carried through a lostile comentry and protected. Early on the 5th, the advance corps (the Flfth, Maj. Geb. C. K. Warmor commanding), met and engured the enemy whe his intreneliments near lime Run. The untle macel furiously all day, the whole ariny being hronght into the fight as fast as the corps conld the got upon the fleld, which, considering the density of the forest [See above: A. 1). 1863 (April-May: VIrginia)], and narrowness of the romls, was done with eommendable prompthess. Gencral Burnsile, with tho Xinth Corps, was at the tlme the Army of the Potomac moveci, left with the buik of hls corps at the erossing of tho Rappalannock River and Alexandria milroad, lolding the road back to Bull R:an, with instructlons not to move until ha recelved notice that a crossing of the Kapilan was secelred, but to move promptly as soon as such notice was received. This crossing ho was appised of on the nfternonn of the th. Bre oclock of the morning of the 6th he was lealing his corps intu action near the Wilderness Tavem. some of his troops having marched a distauce of over 30 miles, crossing both the Rappahanaock and lapidan Rivers. Cousid ring that a large proportion (probahly two-thirls), of his conmand was composed of bew troops, unacenstomedi to marches and carrying tine nerouterments of a 8ohlicr, this was a remarkable march. The battle of the Witherncss was renewed hy ins at 5 oclock on the morning of the 6th, and continued with unabatnd fury until darkness set in, eneh arny holding substautially the sume position that they had on the evening of the Sth. After dark the enomy made a feride attonpt to turn our right tank, capturing several handred prisoners and creating considerable confusion. But the prom thess of Gecueral Sedgwick, who was per-
sonal, present and comnumuled that part of our sonali, piresent and commumadel that part of our iine, soun reformed it and issturdl oricr. On the morning of the ith reconnaissincers showed that the enemy haul fallen behind has hat renched lines, with pickets to the front, covering a part of the luttlo-tield. From this it was evident to my mind that the troo dhys' tighting had satisfed him of his inability to further maintain the contest in the onpen fieh, not withstanding his advantage of position, and that he would await an attack behinh his works. I therefore deternine $(\mathrm{I}$ to pusil on ind put my whole foree between him and illchnoni, andi ordiers were at once issued for a movement by his right flaht. A. D. 1864 (May; Virginia),-Grant's movemeat upon Richmond: Spottsylvania Court House.-The Bloody Angle. - "Throughout the entire day suececding thls tlrst great conflict [in The Wifderness], General Lee remained quiet, ratching for some morcment of his allversary: His success In the preliminary struggle had becn gratifying, considering the great disproportion of oumbers, but he indulged no expectation of a retrograde movement across the Rapidan, on the part of Genemi Grant. He expected hlm rather कodraure, and analonsly swaited sonse developtreat of this intention. There were no indleadons of auch a design up to the night of the 7th,
but at that time, to uso the woris of a confiden that member of lac'a atnit, " he all at once seemed to eoncelve the hles that his enemy was prepar. $\operatorname{lng}$ tu forsake his pasition, and move toward Ilnnover finction vla the Spottsylvanla Courtllouse, and, lelleving this, he at once detailed Anderson's division with orders to proceed raplilly toward the court-house. General Anderson commeneed his march nbout nlue orelock at nlgirt, when the Federal colirmn was already upor ita way. A mace now began for the coveted position, nnil General Stuart, whth hls dismounted sharp-shooters behind Improvised hreast works, harassed and Imperled the Ferteril ndvance, at every step, thronghout the night. This grently delayed their march, nnd their head of culumn did not reach the viehity of Spotisylvnuia Courtllouse until past aunrise. General Warren, lewding the Federil advanee, then hurried forwarl, followed hy General Ilancock, when suddenly he found himself lu front of lireastworks, and was recelved with a fire of marsketry. Lee had succeeded in interposlug himself between General Grant and Klehmetul. On the same evening the hulk of the two armies were facing ench other on the line of the I'o. . . . General Lee had taken up hls position on the south hunk of one of the four trihutaries of the Mattapony. These fonr stremms are known as the Mat, Ta, Po, and Nige Kivers, and henr the same relation to the main stream that the fingers of the open hand do to the wrist. General Lae was behind the Po, whlch is next to the Sye, the northernmost of these water-courses. Ijoth were ditlicult tu cross, and thelr hanks heavily womled. It was now to be seen whether, elther hy a front attack or a turning movement, General Grant could ourst hils atversary, and whether General Lee would stand on the defensive or atterk. Nll day, diring the Oth, the two armies were ennstruet lng breastworks along their entire fronts, and these works, from the Kipidim to the banks of the Chlckahominy, remain srt [185l] lu existence. On the evening of this day a Federal force was thrown across the l'o, on the Confederate left, but soon withdrawn; and on the loth a similar mowement took place near the sume point, which resulterl in a bricf but blomly conthict, during which the womls towk tire, nnd manys of the assontting troops perished miserably in the thames. The force wits then rectlled, and, during that nlght amp the suecereding day, nothlng of importance necurred, although hes, y skirmishing and an artillery-tire took place along the lines. On the morning of the dith, at the tirst dawn of day, cieneral Grant made a more important nnd diangerous assuult than any yet undertaken in the eampaifn. This was direeted at a salient on General Lee's right centre, occupied by Johnson's elivision of Ewell's corns, and was one of the hordiest and most terrible ineldents of the war. For this assault [umate by threo divisions of IIancock's eorps] Geueral Grant is said to have selected his hest iroops. These advanced In a heary charglag column, through the halfdarkness of dawn, parssed silently over the Confederate skimulshers, scareely firing a shot and, just as the tirst streak of daylight touched the eastern wools, burst upon the salient, which they stomned at the point of the hayowet. The attick was is complete surprise, and cnrried every thing before lt. The Southern troops, aslcep in the trenches, woke to have the bayonet thrust

The remalnder were recalled to their duties on the ontslde blockade. Admiral Farragut was now free to turn his whole atienthina to the coast of tho Gulf, whlther he retarned In January, 1864, after a well-earned rest nt tho Sorth Mobile was now the princlpal port In we possession of the Confedcrates In this quarter, and earnestly did the Admiral desire to attiack and reduce the forts at the entrance of the buy. But troops were required to lnvest the forts after the fleet had passed thein, and at thls moment semed that there were no troops to be aprired. It was also mnch to be desired that at leati a fe'v monitors shonld be added to the fiet, but neither were these as yet avallable. So the time wore on; wlater passed Into spring and spring lnto summer, but still the attack was not mode. were gradually assembled toward the latter part of July. The Admiral's plan of actlon was slm. ple, hut In the highest degree effective. His thert conslsturl of four monltors and fonrteen worlen vissels, seven of the intter Inrge and seven smnll. The woolen vessels were arranged in pairs, as at Port Iludson, eneld of the larger vessels havlug a smaller one lashed to her port side, so that if one was disabled the englnes of the other would carry both past the forts. The four monitors were placed lin a fanklag column inshore, between the flect and Fort Morgan.
At six o'clock on the mornlug of the Sth of Ang. ust the flect started with the floon tide. The Almiral took up hls positlon ln the port main rigging of the Hartford, so that he might have a gernd post of observntion. [According to accounts given by otllcers who were on board the Ilintord, Admiral Farragnt climbed the rigglog, after the bnttle begnn, In orter to get above the thickest of the smoke, and Captaln Drayton sent a man to lash hlm where he stowd, so that, if wounded, he night not :all to the deck].
Above the fort, and just heyond the obstructions, lay the Confederate rain Tennessee and her three attendant gunboats. $\qquad$ Soon after half.past six the Tecunsel [the leading monltor] fired the first two shots at Fort Morgan. For half an lomr after this, the shlips ndvanced in sllence. Then the fort opened on the Brooklyn, and pres ently the whole line of vessels wns hotly engaged Their concentrated fire kept down that of the enemy, and all seemed at thls tlate to be golng well with the flect. The Tecunseh, though all the while adrancing, was now sllent, rescrving her fire for the Tennessee, whlch lay beyond the obstructions. Capınin Craven saw the red haoy, but It seemed so close to the bench that lie thought there must have been a mlstake ln hls orders; and altering his course, he hended stralght for the Tennessee, passing to the west ward of the buoy right over the line of torpetocs. Suddenly there came n friglitful explosion; the lange ninss of Iron gave a lurch first to one slde, then to the other; her bow made one downwnrd plunge, her screw whs seen for a moment revolving liph In alr, and she sank to the bottom of the channel. At that moment It seemed as if thithig could save the vessels of the flect from luint thrown lnto hopeless confaslon, massed tugether as they were directly under the guns of the fort. It was in that moment, at the crisis of the battle, thint the culm and dauntless splrit of thu Admlral rose to lts greatest helght.

To allow their principni Southern army to oust in inne. tivity, was not howerer the intention of the rebel nuthorites

Something must be done, and that speedlly, to arrest the progress of tho Feleral army, or Georgin and perhaps the Gulf States, would bo irretrievably lost.
The whole army of Gen. IIood, it was decided, should rapilly more in a compact body to the rear of Atinnta, and, after breaking up the rallroal between the Chat tahoochee and Chattanonga, push ca to Brhigeport and destroy the grent rallroad bridge spnnning the Tennessee River at that place. Should thls be accompllshed, At lanta would be isolnted from Chattanoogn, and the latter in turn isolated from Nashville, and Gen. During the Summer and Fall of 1668, the Order, both nt the North and South, underwent some modlteatlons as well bs a change of name. In consequence of a partial exposure which had been mailo of the sigiss nnil rltual of the Knights of the Golden Cirele, sterling Yriee hadinstltuted as its suceesswr in Missourl, a seeret polltical nssoclatlon, which he called the Corps de Bel. glque, or Southern Lengne, his priuclpal coadutor belng Charles L. Ifunt, of St. Louls, then Belglan Consul at thit clty. . . The seeret signs and eharacter of the Order having become known to our milltary authorltles, further mollications in the ritual and forms were latroduced, and it name was finally changed to that of the O.S. L. or 'Order of the Bons of Llberty,' or the 'Knlghti of the Order of the Sons of Llberty. These later changes are represented to have been frat Instituted $\qquad$ In Slay last [1804], but the new name was at once generally adopted throughout the West, though in some localities the association Is stlll better known as the 'Order of Amerlean Kinlghts.' Neanwhlle, also, the Order has receired certaln local deslgatlons. in parts of Illinols it has been called at tlmes the 'I'cuee Or. ganlzatlon, in Kentucky the 'Stur Organizatlon,' and In Missourt the 'Amerlcun Organipationt, these, howerer, being apparentl: names used ontslide of the loulges of tho Order. Its members have also been famillarly deslgnated as 'Bottcrnuts' hy the country people of Illmeis, Indinna, and Ohio. . . . The 'Temples' or 'Lulges' of the Order are numerously scattered throngh the States of Indlana, Illinifs, Ohio, Missouri, nad Kentucky. They are also officlally reported as establishled, to a less extent, in Nichigan and the other Western States, as well as ln New Fork, Pennsylvanla, New Ilampshire, Khoe! l land, Commectlent, New Jerscy, Marylaud, Delaware and Tennessee.... It has beren asserted by delegates to the Suprone Cooncil of February last, that the number was there represcuted to be from 800,010 to 1, (M) $(400$; but Vallandighnm, In lis speceh last summerat Divton, Ohlo, plneed it at $50(0,600$, which is probibly mueh nearer the true tutal. . . A. D. 1873.-The so-calied "demonetization of siver."-" We iave heard a great deai in iater years about he surreptitious demonetization of silver in 1873. There was, however, vastiy too much eriticism wasted on the net of 1873: for the reai demonetization of siiver in the Linited states was aceompiished in 1853 . It was not the resuit of nceldent; it was a carefuliy cousidered pinn, deiijerateiy carried into iegisiation in 18is3, twenty y curs before its nominai demonetization by the act of 1873 . . . . In 1853 the singie staudard was golid. This was a situation which no one rebelied against. This new mlleage, moreover, was malnly In the West, where tbe immedlate remuneration was but sllght. Rallroads were belng pushed lorward into reglons whlch could not be expected to return an lacome for twenty years. The cost of railroad construction in this country during the five years precedling September, 1870, was estimated by the Comptrolier of the Currency at no kss thas $\$ 1,700,000,000$. The money to pay for this extravagant building was obtalned, not from the earnings of the old cortlons of the road, but from enormous issues of railroad bonds, piaced to a large extent among the banks of thls country, but stlli more among tbe capltalists of Enrope. In the Northern Pacific Company occurred the most flagrant ahusc of railroad credit the world has ever known. . . . One after anotber of tbe Western roads defaulted ln pay. tng tbe laterest on lits bonds. The result was, thit, by the summer of 18 i 3 , the market for ner issues of ralirond bonds had practlcally disappeared. Meantlme the banks and banker of New York were ioaded down with railroad paper. The railroads had borrowed money for short periofis in tie expectation that before thelr notes feildue tbey would bave raised the money to make payment by the sale of bonds. A temporary relief was felt, In June, 1873, througb the customsry mldsummer ease in money. But this temporary respite only made the difficulty worse. Deluded by the momentary calm, tho New York banka added stiil further to thelr losns. . . Tbe year before, money had grown tight early $\ln$ September, and the more cautlous hanks began gradualiy to call tbelr ioans, fearlng thst the experience of 1872 mlgitt be renewed. But the rates for money did not noticeearly in the mand the oniy cause for excltement early in tbe month was the fallure, on September 8. of the Mereantlle Warebouse and Security Company, owing to advances on bonds of the Missourl, Kansas \& Texas Rallroad. This was followed, on the 13th, by the failure of Kenyon Cor \& Co., of which frm Danlel Drew was a member, caused by loans to the Canada Southern Railroad. By this tlme the sky was heavily orercast. Money was now advancing rapidly, the New York banks wero calling loans on every hand, snd new loans on raliroad paper were sarceiy to be had at all. Suddenly, on the 18tb of September, the tempest burst. On the morning of that dark day, Jay Cooke, the agent of the U. S. Government, with some four millions of deposits from all parts of the country, and his fifteen militions of Northern Paclic paper, declared his lnablilty to meet his dehts. Tbe report flew down 'the street' with the ferocity seycionc. Railroad sinares were thrown upon the market by the bushei, in utter disregard of their intrinsic value.... Stock brokers continued to announce tbeir faliures all day long. Xothing secmed able to withstand the shock, and When, on September 19, the great banking house of Fisk \& Hatch went under, terror becamc universal. $A$ run was started on the Unlon Trust Co, wbich was belleved to have close inFourtion with Vanderbllit's railmaads, and on the Fourtio Nitionad Benk, whowa dealings were
largely with Wall street brokers. The panic was by thls tlme so general that the banks began to refuse one another's certified checks, and on the 20th a conslderable number of the New York banks suspended payment. On that day the Union Trust Co., the Natlonal Trust Co., and tbe Natlonal Bank of the Commonweaith all closed their doors. At $110^{\prime}$ clock on the $20 t h$, tite New York Stock Exehange, for the first time ln its history, closed lits doors, and the Goveraing Committee anyounced that the board high-banded measure till firther notice. This high-banded measure caused an outery for the moment, but on calmer judgment lt was generally conceded tbat the messure was a good one. On the evening of tbat Naturday, September 20, the Clearing Houss Associatlon met and adopted a plan simplar to that adopted in the panle of 1857, and ln substance tbls: Any bank $\ln$ the Clearing House Association mlght deposit wilt a commilttee of five persons, to be appointed for that purpose, an amount of its bills recelvable, or other securitles to be approved by the cominittee, and the commlttee were tben to issue to tbat bank certificates of deposit, bearing interest at 5 per cent. per annum to an amonnt not exceeding 75 per cent. of the seeuritles or hilis recelvable so deposlted. Tbese certiffeates could be used in settiement of baiaaces at the Clearlng House for a perlod not to extend heyond the ist of tbe foliowing November, and they were to he received hy creditor banks during that perlod daily, in t be proportion wbich they bore to the aggregate amount of the debtor balances pald at the Clearing House. $\$ 10,000$ ann of certlficates should not exceed $\$ 10,000,000$. The legal tenders beionging to the assoclated banks were to be considered and treated as a common fund held for mutual ald and protectlon, and the committee were given power to cquailze tho same by assessment or otherwise in thelr discretion. Thls scheme, slmple as it was, proved of the utmost efficacy in mitigating the evils thai must always follow a distrust among banks. Tho lull occasioned by the intervening Sunday was employed by Presi. dent Grant and Secretary of the Treasury Richardson ln a vligit to New York. All day long they gave audlence to business men at the Fifth Avenue Hotel. Suggestlons of every description were offered as a remedy for tbe disease. The most feasthle propositlon, and that wblch was finally adopted, was the purchase of Gov. ernment honds. . . . Sbortiy after hls return from tbe Fifth Avenue Hotel, Seeretary Richardson announced his lntention to buy Government bonds, and, ln a few days, $\$ 13,000,000$ of the U. S. greenhacks were thua absorbed. On Tuesday, September 30, the Stock Exchange was onee more opened. It was expected 0.1 all hands that thls would be the signal for another onslaugbt. But so general was thls expectatlon that most persons refrained for the moment from offerlng their stocks. As a result, tbe market opened a trife hlgher than it had closed ten days hefore. It contlnued to advance, moreover, till October 7. On that day a new decline aet $\ln$, and on October 14 came a fearfui drop, whlch carried prices lower than on September 20. A. D. 1876-1877.-The Twenty-third Presidential Eiection and its disputed resuit. - The Electoral Commission.-Four candldates for the Presidency were namel and voted for hy as many different parties in 1878, although the contest of tbe election was practicaliy between the Repuhiicans and Democrats, as in previous rears. The former, after a prolonged struggie of rival factions, put in nomination ex-Governor Rutherford B. Hayes, of Ohio, witb Wiliiam A. Wheeier, of New York, for Vlce Presldent. The candidates of the Democratle party were ex. Governor Samuel J. Tilden, of New York, for President, and Thomas A. Hendricks, of Indiana, for Vice President. Before these nomlnatlons were made, the Prohibition Reform party sad the party caliing itself the Independent, but popularly known as the " Greenhack party,' bad already hrought candidates lnto the field. The tirst named put Green Cliay Smith, of Kentucky and G. T. Stewart, of Ohio, ln nomination; the nominees of the last named were Peter Conper, of New York, and Samuel F. Cary, of Ohio. "Tbirty-eight States partlcipated in the election. Colorado had been admitted to the Union in August, 1876, and, in order to save an uditional election, the choice of electors for that occasion was conferred upon the legisiature. All the other States appointed them hy popuiar vote. The polis had hardiy closed on the day of election, the 7th of November, when the Democrats began to claim the presidency. The returas came in so untaverahiy for tho Repuhilcans that there whas hard; a newspaper organ of the party v.hle: 'lid not, on the foliowing morning, concede the election of Mr. Tilden. He was believed to have carried every Southern State, as well as New York, Indiana, New Jersey, and Connecticut. The whoie number of electorai votes was 369 . If the ahove estimate were eorrect, the Democratic eandidates wouid bave 203 votes, and the Republican candidates 168 votes. But word was sent out on the same day from Repubilcan headquarters at Washington that Hayes and Wheeler were eiected hy one majority; that tho States of South Curolina, Florida, and Louisiana had chosen Repuhilican electors. Then began the most extmordinary contest that ever took place in the country. The only hope of the Republicans was in the perfect defence of their position. The loss of a single rote wouid be fatai. An adequate history of the four montbs het ween the popular elcction and the fuauguration of Mr. Hayes, would fili volumes. Space can be given here for only a hare reference to some of the most important events. Neither party was over-scrupuious, and no doubt the acts of some numbers of each party were grossly illegai and corrupt. $\qquad$ In four States, south Carolina, Florida, Louisiana, and Oregon there were douhle returns. In Soutb Caroilina there were loud complaints that detaciments of the arruy, stationed near the polis, had prevented a falr uud free eicction. Although the board of state canvsssers certified to the choice of the Hayes dectors, who were chosen on the face of the returns, the Democratle candidates for
eiectors met on the day fixed for the meeting of electors and cast bailots for Tilden and Hen. dricks. In Florida there were ailegations of fraud on both sides. The canvassing board and the governor certified to the eiection of the Hayes electors, but, fortified by a court decis. ion in their favor, tbe Democratic electors aiso met and voted. In Louislana there was anarchy. There were two governors, two returning boards, two sets of returns sbowlng dififerent results, and two electoral coileges. In Oregon the Democratic governor adjudged cne of the Repuhllcan electors ineligitie, and gave a certificate to the highest candidate on the Democracic list. The Repuhilican electors, having no certificate from the governor, met and voted for Hayes and Wheeler. Thu Democratic elector, whose appointment was certified to by the governor, appointed two others to fill the vacancles, when the two Repuhican electors would not meet with him, and the threo voted for Tilden and Hendricks. All of these cases were very compiicated in their incidents, and a brief aecount which should convey an intelligibie ldea of what occurred is impossible. . . . Thus, for the first and only time in the history of the country, the eiection ended in such a way as to leave the result in actual doubt, and in two States the number of legal votes given for the electors was ln dispute.

As soon as the electoral votes were cast it became a question of the very first importance how they were to bo counted. It was evident thit the Senate wouid refuse to be governed by the 22nd joint rulo [under which no eiectoral vote to which any memher of either House objected could he counted unless botb Houses agreed to the connting of it] - in fact the Senate voted to rescind the rule, -and it was further evident that if the count wero to take place in accordance with that ruie it would result in throwing out electoral votes on both sides on the most frivoious pretexts. It was asserted by the Repulilicans that, under the Constitution, the President of the Senato alone had tbe right to count, in spite of the fact that the joint rule, the work of their party, had assumed the power for the two IIouses of Congress. On the other hand, the Democrats, who had always denounsed that rule as unconstitutional, now maintained that the right to count was conferred upon Congress. A compromise became necessary, and the moderate men on both sides determined to effeet the estahishment of a tribunal, as evenly divlded poiltically as might be, which should decido all dlsputed questions so far as tho Constitution gave authority to Congress to decide them. The outcome of their efforts was the Electoral Commission iaw of 1877," by which a Commlssion was created, consisting of fifteen members - the Senate appointing five from its own body, the House five, and four Associate-Justices of the Supreme Court, desig. nated in the hili, appointing a fifth from the same court. The Senators selected were Edmunds, Morton, Frelinghuysen (Repuhilicans), and Thurman and Bayard (Democrats). The Representativcs wcre Payne, Hunton, Abbott (Democrats), and Garfield and Hoar (Repuhlicans). The four Supreme Court Justices designated by the Act were Clifford, Field (Democrats), strong and Miiler (Repuhllcans). They seiected for the fifth member of the Commission Justlce Bradiey, who was a Repuhican. "The
natural cholce of the justices would have been their associate, David Davis; hut he had been elected onif five days before as senator from Iilinois, and It was regurded hy him and hy others stimproper that he shouid serve. Thus the commission consisted of eight Repuhilcans and seven Democrats. If Judge Davis had been seiected, there would have been oniy seven Repuhilicans, and the result of the operation of tise law might have been different.

The count had begun on the first day of February, and the flual vote upon Wisconsin was not reached until the cariy inorning of March 2 . As question after questlon was decided uniformiy in favor of the Repuhicaus, it became evldent to the Democrats that their case was lost. They charged gross partisanship upon the Repuhifcan members of the Electorai Commission, in determin. ing every point lnvoived in the dual returns for their own party, though as a maiter of fact there docs not seem to have been much room for choice between the two partles on the score of partisanship. Each member of the commission favored hy his vote that view which would resuit in adding to the eiectoral vote of his own party. But as the result of the count became more and more certainiy a Repuhlican triumph, the anger of the Democrats arose. Some of them Fere for discontinuing the count; and the symptoms of a disposition to filihuster so that there should be no deciaration of the result gave reason for puhilc disquitetude. But the conservative members of the party were too patriotic to ailow the faliure of a law which they had been instrumentai in passing to lead to anarchy or revoiution, and they sterniy discountenanced ail attempts to defeat the conciusion of the count. The summing up of the votes [Hayes, 185; Tiiden, 184], was read hy Mr. Aitison of Iowa, one of the teliers on the part of the Senate, at a littie after four o'ciock, on the morning of the 2 d of March, amid grcat excitement. Mr. Ferry thereupon deciared Rutherford B. Hayes elected President, and Wililam A. Wheeler Vice-President, of the United States. The de. cislon was acquiesced in peaceahiy hy the whole country, and hy men of every party. But the Democrats have never ceased to denounce the whole affair as a fraud. $\qquad$ It is to be hoped that the patriotism of the American peopie and their love of peace may never again be put to such a severe test as was that of $18: 6$ and 1877." According to the Democratic count, the popuiar vote stood: Tilden, 4,300,500; Hayes, 4,036.298; Cooper, 81,737; Smith, 9,522 . Tise Repuhilcan count gave: Tiiden, 4, 285,992; Hayes, 4,083,768. -E. The act ': called for a er dollars: but The amount
of silver obtalnable with two milllon dollars obrously varies according to the price of the metal in terms of the dollars with which the purchases are made. In Fehruary, 1878, when the first purchases were made, those dollars were the lnconvertible United Stites notes, or grecnbacks, worth something less than their face in gold.

When specie payments were resumed, ou the first of January, 1870, and the greenbacks became redeemable in gold, the measure of value in the United States became gold, and the extent of the coinage of sllver dollars under the act of 1878 becane simply a questlon of how much silver bulion could be bought wlth two million dollars of gold. The price of silver in 1878 was, $\ln$ terms of gold, not far from a dollar for an ounce of standard silver. After 1878 it went down aimost steadlly.

Tie silver dollar of $412+$ grains contains less than an ounce ( 480 gralns) of standard siiver. The monthly purchase of two million doliars' worth of silver thercfore yielded more than two million sliver dollars, the amount belng obvlousiy greater as the price of sliver went lower. On the average, the monthly :rieid was not far from two and a half millions of sllver dollars. So much each month, thereture, or thirty millions of silver doilars a year, was roughiy the addltion to the cnrreney of the community from the act of 1878. sa important provision of the act of 1878 was that authorizlng the lssue of sliver certificates agalust the deposit of siiver dollars. . . . The dollars and certificates between them constitute what we may cail the siiver currency of the act of 1878. The passage of that act was duc to causes easily described. It was part of the oppositlon to the contraction of the currency and the resumption of specie payments, which forms the most important episode of our fnancial his. tory between 1867 and 1879. ...No doubt some additional forcc was given to the movement in favc. of the use of silver from the desire of the sllver-mining States and their representa. tives, that the price of the metal should be kept up through a larger use of it for coinage. But this element, while sometimes prominent in the agitation, was, not then, as it has not been in more recent years, of any great lmportance by ltself. The reai strength of the agitation for the wider use of silver as money comes from the convictlon of large misses of the peopic that the community has not enongh money."- F. W. The so-calied Greenback party (which had sppeared four years before, in the electlon of 1sit), meeting at Chicage on the 9th of June, put in nomination, for President, James B. Wewver of Iowa, and, for Vice President, B. J. Chambers, of Texas. The main object and principle of the Greenback party was set forth in the following deciarations of its piatform: "That the right to make and issue inoney is a sovereign pows to be maintaincd by the peopie for the common benefit. The delcgatlon of this right to corporations is a surrender of the ceniral attctbute of sovereignty. . . . Ail money, whether
metallic or paper, should be lesi:ed and lts volume controlled by the government, and not by or through banklng corporations, and, when so lssued, should be a full legal tender for all debts, publle and private. . . . Legal tender currency [the greenback notes of the clyll-war period] should be substituted for the notes of the pational banks, the national banking system abolished, and the unllmited coinage of silver, as well as gold, estabished by law." The Prohlbltionists (Teliperance), In conventlon at Cleveland, June 17, nominated Neal Dow, of Malne, for President, and A. M. Thompson, of Ohlo, for Vlce President. On the $22 d$ of Junc, at Cincinnatl. the Democratic party held its conventlon and nominated General Winfleld 8 . Hancock, of Pennsylvanla, for President, and William $H$. English, of Indiana, for Vice President. At the election, In November, the popular vote cast was 4,454,416 for Garfleld, 4,444.952 for Hancenk, 808,578 for Weaver, and 10,305 for Dow. The electoral votes were divided briween Garueld and IIancock, belng 214 for thr former and 155 for the latter. Every forraer slave-state was carried by the Democratic party, together with New Jeraey, California and Nevada-E. McPherson, Handlook of Politics for 1880 and 1882.

A. D. 1881. - The brief administration of President Garfieid. - His assassination. "President Hayes had left the new atminlstratlon a heritage of hated from the stalwnte elemicut of the alepublican party. It was I'resident Garticld's chief wish, politicaily, to heal up the chasin winch the past had opened, mill uot to recogaize one faction more than muther. The defeat of the Stalwarts nt Chicago [sec Stalwarts and Ilalf. breeds], by Garfiche, naturally tended to transfer their hostility from the outgoing to the liconing Presiticnt. For months before the inmiguration, the embarress. ment whleb threatened Gartield was L, mesect by the country." The Inevitnble outbreak of hostiiitles occurred the monent that the President made a nomination in Jew York which was distasteful to the arrogant Senator from that State, Iloscoe Conkling, who inperionsly ied tie Staiwart forces. This hapivended upon the presentation of the name of William II. Robertson for Colicctor of the P'ort of New York. In order to foree a dlvision in the lejubblican party upon the quarrel between himself and President Garfiekl, Senator Conkiing resigned his seat In the tinnte of the Luited States and prescated himseif to the Leglslature of Xew York as a caudidate for re-election. Ile counted, without doubt, ufwin an easy triumpin, expecting to be returued to Washington, bearing the mandate of his party, so to speak, und humbling the I'resident fito sulmissive obedience to bis hehests. IIc was disuppinted; bis recection was defeated; hut the furlous contest which went on during some weeks, engentered bitter passlons, will hinad their effect, no doult, in producing the arfui tragedy that soon ensuer. The frat of these was in consequence of an attempt of tha Spanlsh Covernmeut, In 170, to prevent the British from tradling with the natlves of that comst. It was settled liy the Nootka Sound Convention of October 28, 1700, by which the subjects of both powers enjoyed equal privileges of trade to all polnts not already occhuled. The second controversy was the restit of an nttempt of Russin in 8821 to prohlibl Eugland and the Unlted States from trading auywhere north of the slst pnrallel, or to ap. proach whthlu 100 Itainan miles of the coast. But the new act
If erpn mote remarkable than that of 1878. It Is unlique in monetary history. It provides that the Aecretary of the Treasury shanll purchane each month at the market price four und a half gulllon ounce of allvir lulf dhall lssue Treasury notes of the Culleil Ntates in ilemominations of letweed one doller and one thousand dollars. These Treasury notes, unlike the old sllver cerfíficates, are a direct legal tender for all ilebts, pulilic or private, unless a different medlum is exproxaly stifule + d $\ln$ the contract. They ilffer from the wliver cerflifates in another seapert; they are redecmable elther in gohl or gilver coln, at tho discretlon nf the secretary of the Treasury. The lulliect process of redemp. thon which, as we have secn, was applled to the silrer certificates, is replaced for the new notes by direct redemption. Tue avowel olbject is to keej, the sllver money cqual to gold, for It ls declared to tho 'the established polley of the Cuited State to maintalu the two metals at a parity with cacla other on the present legal rutlo. orsuch ratlo as mas 'e proviled by law.' The act of 1878 is repealral; hut the colnage of t vo million ousces of allver into lollurs is to tee contioned for a year (untll July 1, 1891). There. fifter It la directed that only so many sllver dollars shal. he coincd as may le neeted for redermiug any Trcasury uotes proseuted for redempthon. Fractieally, thts meanz that the coln. age shall ceasc; redemptlon in silver dollara will oot lee called for. The colnage of sliver dollars sccordingly w's suspended hy the Treasury on July :, 1501; a change which was the occasion of some vociferous aluse and cqually vociferous praise, but which in reallty was of no consequide whatever. The monthly lasucs of the dew Treasury notes vary, llke those of the ohl allrer certlifates, with the price of shrer. But the new issues vary directly with the prlee of silser, whlle, as we hare seen, the old lssucs saried inversely with the price. The volume of Treasury notes issued is equal to the market price of four and one half million ounces of sllrer. "f sllver sells at $\$ 1.20$ an ounce, the monthly issue of notes will le $\$ 5,400,040$; If at \$1.01 on ounce, $84,500,009$. For a month or two sfter the passage of the act, the price of sllver sufruced rapidly, uud at it highest, in August, 1890, touched $\$ 1.21$. But the rise proved to be

Ht temporary, After Beptember a stendy decline set $\ln$, anil continued almoat without inter. Fuptlon through the rent of 1800 , through 1891 , and through 1802. The year 1891 opened wlth allver at a prlce of about $\$ 1.00$ an ouace; by the close of the year the prtre lind fallea to about 05 ceats. In 1808 a atllf $f$.rthep and more marked decline ret in, and hy the cinee of the year the price had gone as low as 85 cents." $F_{1} W$. Tauasig. The issue of this proclumation was the signal for much exclement among the Populista and in all-ver-proxucing clreles. Sllver conventions were - uld In Denver, July 11, and In Chicago, Augunt $\checkmark$ In which alilrethes were male and resolutions alopted deuouncing with much energy any proposition to repeal the Sherman Act without some provision for the free colnage of sllver, and chalming that the existhg thunclal crifi was a dellberately devisel cheme of British and Amerlan haukers, with I'resldent. The dominant issues in the canvass wern the tariff question and the silver question "The Democrats named no eiectoral tieketa io Coiorudo, Idaho, Kansas, North Dakota, and Wyoming, but voted for the people's party elec tors with the object of taking those Statea amay from the Republicans. They put out an electora ticket in Nevada, but stili voted mostly for the Popuilst electors. In Nortb Dakota also thero was a partial fusion between the Democrats and the Pcople'a party, and in Minnesota a part of the Weaver electoral ticket was accepted br the Democrats. In Louisiana there was a fuslon of the Republicans and the People's psrty, each nominating balf of the 8 electors. In Alsbama there was a fusion of some of the Republicans with the Peopie's party. In Texas a Republlcan ticket calied the Lily White was set up, whlch differed from the reguiar ticket. In Michigan a new electoral law, which was deciared constitu. tional by the United States Supreme Court on Oct. 17, 1892, provided for the separate electlon of a Presidential eiector in each Congressional district, and in consequence the electoral vote of the State was divided. A. D. 1895.-The Status of Civil-service Reform. -Commissioner Rooseveit's Review. "In 1883 the civll service inw was established at Washlugton, and in the inrger post-offices and custom-houses throughout the country, taking in a totai of some 14,000 empioyees. The great extensions since have ail taken place during the last six years, a period which happens to inciude my own term cf service with the Commission, so that I write of them at first hand. In 1889 the railway mali service was ndded, in 1893 nil the free delivery post-offices, and in 1804 ali the bmaller custom-liouses and the internai revenue serviee. Other important but smaller extenslons have been made, nud the lnrger offices have grown, 80 that now about $50,000 \mathrm{cmploye}$ es nre vider the protection of the inw. There are, of course, and there always must be in a body so large, indivilual cases where the iaw is evaded, or even vlolated; and as yet we do not touch the question of promotions and reduetions. But, speaking brondiy, and with due aliowance for sueb comparatively slight exceptlons, these 80,000 pinces are now taken out of the poitleai arena. They cnn no ionger be scrambied for in struggie as ignohie nnd brutai as the strife of plates over plunder; they no longer serve as a vast bribery chest with which to debauch the voters of the country. Those hoiding them no longer keep their poilitical ilfe by the frail ten. ure of service to tho party boss and the party machine; they stand as American citizens, and are allowed the priviliege of earning their own hread without moiestation so iong as they falthfully serve the public. The classitied service, the service in which the merit system is appiled, has grown fast. It is true that the outside ser-

Fice where the spolls theories are still appiled in ali their origiuai nakedness, has grown oniy leas fast. The number of offices under the government has increased very rapidiy during the last twenty years; but the growth of the classifed service has been even more rapid, $s 0$ that a constantiy increasing percentage of the whole is withdrawn from the degrading grasp of the spoils system. Now, something like a quarter of ali the offices under the federai government in point of numbers, representing neariy a haif in point of saiaries, has been put upon the basis of decency and merit. This has been done by the action of successive Preside.its under the jaw of 1883, without the necessity of action by Congress. There stlli remain some things that can be done without further legislatlon. For instance, the jabor force in the nury yards was put on a merit basis, and removed from the doniain of politics, under Secretury Tracy. This was done morely by order of the Seeretary of the Navy, which order couid have heen reversed by his successor, Secretary Ilerhert. Instead of reversing it, however, Secretury Ilerbert has zeaiously lived up to its requirements, and las withstood all pressure for the weakcning of the system in the interests of the locai party machines mind bosses. It is unsafe to trust to niways huving Secretnries of the Nury like Messis. Tracy and EYerbert. The Civil Serviee Commisslon should he giren supervixion over the laborers who come under the direction of Cabinet offleers. Indeed, all the laborlng force and all the empioyces of the District of Columbla cm ployed by the felernl government shoukl he put under the Commission. When this lus heen done, and when a few other comparatively slight extensions have heen made, all that cin be accomplished by the unnided netion of the executive wiil have been nccomplished. Congress must then itself act by passing some such bill as thnt of Senator Lodge in reference to fourth-cinss postmasters; by passing somc bill in reference to the consular service on the outlines of that suggested by Senator Morgnn (but giving power to the Civil Service Commission itself in the matter); and then by providing that ail postmasters and similar officers shail hold office during good behnvior, ineluding as weil those nominated by the President and confirmed by the Senate as those appointed by the President aione. Of ail the offices under the federal government, not one in a hundred can properiy be called political. "-T. Rooseveit. The Present Statusof Civil Service Reform (Atlantic, Feb., 1895).
A. D. 1895.-President Cieveland'a Special Message on the condition of the National Finances.- In a speciul message to Congress, on the 28th of Jnnunry, 1895, Presldent Cleve: innd renewed an earnest appeal which he had made nt the opening of the session, for iegisintion to correct the mischievous working of the existling currency system of the country. The condition of the natlonal finances, produced by unwise laws, was set forth cleariy in this message, as follows: "With naturai resources uniimited in variety and productive strength, and with a peopie whose activity and enterprise seek oniy a fair opportunity to achieve nationai success and greatness, our progress should not be checked by a faise tinancial policy and a heedless disregard of sound monetary iaws, nor should the timidity and fear which thry engeuder ataud

In the way of our prosperity. It is hardiy disputed that this predicament confronts us to day. Therefore, no one in any degree responsible for the mating and execution of our laws shouid fall to see a patriotic duty in honestiy and sincareiy attempting to reileve the situation.
The real trouble which confronts us consists in a lack of confidence, widespread and constantiy increasing, in the continuling ablitty or disposition of the Government to pay its obligations in goid. This lack of confideuce grows to some extent out of the paipable and npparent embar. rassment attending the efforts of tbe Government under existing iaws to procure gold, and to a greater extent out of the impossibility of either keeping it in the Treasury or canccling obilgations by its expendlture after it is obtained. The oniy way left open to the Government for procuring goid is by the issue and saie of its bonds. The only bonds that can be so issued were authorized neariy twenty-five years ago, and are not weil caiculated to meet our present needs. Among other disadvantages, they are male payabio in coin, instead of spectficaily in goli, which, in existing conditlons, letricts largely and in an increasing ratio from their desirability as Investments. It is by no means certain that bonds of this description can much ionger he disposed of at $n$ price credltable to the financial character of our Government. The most dangerous and irritatlug feature of the situat lon, however, remains to he mentioned. It is found in the means by whicit the Treasury is despoiled of the goid thus obtained without canceiling a singie Government obilgation and soiely for the benefit of those who find profit in shipping it abroad or whose fears induce them to hoard it at bome. We have outstandling about five hundred milifons of currency notes of the Government for which goid may be demanded, and, curiously euough, the law requires thint when presented und, in fact, redeemed and paid in goid, they shail be reissued. Thus the same notes may do duty many times in drawing goid from the Treasury; nor can the process be arrested as long as private parties, for profit or otherwise, see an advantage in repeating the operatlon. More than $\$ 300,000,000$ in these notes have aiready been redeemed in goid, and notwithstandling such redemption they are ail still outstanding. Slace the 17 th day of January, 1894, our bonded interest-bearing debt has been increased $\$ 100,000,000$ for the purpose of obtaluing gold to replenlsh our coin reserve. Two issues were madic amounting to fifty mllilons each - onc in January and the other in November. As a result of the first issue there was realized something more than $\$ 58,000,000$ in goll]. Between that issue and the succeeding one in November, comprising a perloi of about ten months, nearly $\$ 103,000,000$ in goid were drawn from the Treasury. This made the second lssue neccssary, and upon that more than fifty-elght milllons lu goid was agnin reallzal. Betweeu the date of this second issue and the present thene, covering a period of only ubout two mouths, more thinn $\$ 09,000,000$ in goid have been drawn from the Treasury. These jarge stuns of gold were expended without any cancellation of Government obligations or in any permunent way benefiting our prople or improving our pecunlary sltuation. The tinanciai events of the past yenr suggest facts nad condi-

UNITED STATES OF AMERICA: Historical Geography.-Betweca the cxterior and the interior historicai geography of the Uuited States the relation differs from that in most other countries. The internal historical geography oi the Old World nations, barring the feudui pen d, involveo so largely questions conceralng mere provincial administration that it has no claim, from a geographical standpoint, to an importance equal to the shifting of the great national frontiers. Examples of this ure found in the loman and Byanntine emplres, and in the majority of the modern states. In our own case however the ordier of interest is reversed. Our internal geogrinphy has attracted the chief attention of the stident, not so much from the greater difflenity of the subject as from its vast inportance in the early history of our governmeut. It is not, indeed, too much to say that the organization of the present goverr zent under the constitution is an event of sca sely greater importance than the determinatios of the fiaal policy of the states aud the nation conceraing the unoccupled western lands. It is this fact slone which gives the higher degree of relative importance to our internal historical geography. The general facts concerning our external geography are quickly told. The ontliues of the entire subject are contained in the ennmeration of the eight cessions, as follows: the original territory ceded by Grcat Britain at the peace of Paris in 1783 (see page 3403); the Louisinna purchase froin Frauee in 1803 (pages 2093. snd 3443 ) ; the acquisition of Fiorida from Spain by the treaty of 1819 (page 1184) : the admission of Texas in 1845 (page 3187); the undisputed acquisition of the Oreyon country by treaty with Great Britain in 1846 (page 2454): the tirst Mexican cession by the peacc of Guadalupe llidalgo in 1848 (page 2219); tite second Mexican cession, known as the Gadsilen purchase, in 18.73 page 140); and the purchase of Alaska from 1Russia in 1867 (page 37). The enumeration of these eight acquisitions, all of which, save the final one, are showit on the first United States map, alfords a complete picture of the successive stages of our territorial growth. The occasion of these different annexutions, as well ns their exact territorinl cxtent, would involve us in 8 series of details which are beyond the purpose of the present nrtlele. It should be observed. however, that in several cascs the map shows the territories in question as timally determined by traty or survey, rather than their actuml extent as uuderstood at the time the nnuexations were male. This is one of the inevitable disalvantages in the purely cartographic treatment of sucl a subject. The historienl map is compellet from its nature to give a tangible appearance to mitters which are ofter very intangibie in fact. In the case, for cxample, of what we may call the tirst United States, the country as recognized bre the treaty of Parls, the western llue of the Misuissippi was the only boundary which was not the subject of future discission. The southern frontier as arranged at Paris was attrmeal by treaty with Spain in 1795. On the other side, however, Great Britain retained a unmber of posts in the Old Northwest np to the Jay traty of 1794 ; the boundary between the :1pper Mississlppi and the Lake of the Wouls, imperfectly described in the Paris treaty, was not settled until 1818 ; the line from the interscc
tlon of the St. Lawrence to the Bault Ste. Marie was estabilsked in 1822 by joint commission under the treaty of Ghent; while the Maine frontier question, the most diffleult and obstinate of all our boundary disputes, was not finally settled until the year 1842. The Louislana purchase of 1803 brought in fresh questions concerning our territorial ilmits. On three sides, the North, West and Southwest the frontlers of this vast area were uadcfined. On the northern side the boundary was settled with Great Britain by the treaty of 1818 which carried the line along the forty-ninth parailel to the Rocky Mountalus, while the treaty of 1818 with Spain. whicin ceded Florlda to the United States, also defined the ilmits of Louisiana on the Southwest. This line of 1819 has an additional importance, in that it drew the frontier between Spain and the United States along the forty-second parallel to the Pacific coast. Tinc importance of this iny in the fact that it gave us a clear title on the Spanish side to the so-called Oregon country. The exact connection, real or supposed, between this territory and the Louislana country was for many years one of the disputed points in Amer. ican historical geography. The belicf in this connection, at one time general, undoubtedly had its origin in the undefined character of Loulsiana at the time of the purchase, and the fact that our government turned this indetiniteness to its own purpose in advancing its Oregon clalms. It is now clear, however, from the cri. dence of the old maps, the oflcial statement of the limits of the ragion, of which there is but one in existence (the Crozat grant of 1712) and lastly the understanding of France herself it the time of the cession, that Louisiana did uot include in its limits any part of the Pacific watershed. A map published in a sulisequeut work of the French plenipotentinry placed the western bonndary of Lonisiana at the onc hundred and tentla meridian. A liuc drawn in this arbitmary fashion and unsauctioned by the terms of the treaty itscif mar be requrted merely as one of convenicncc. If this view is correct it is certainly more convenient and, at the same time. more logical, to consider the western boundary as extending to the Rorky Monntaiu watershed. a line which womld not devlate to any radical cateut from the meridinu in question. The historical connection however between the Louisiam purchase and our subsequent acquisition of the Oregon country is perfectly clear. The exploration of the later followed alnost immedintely but its thal anuexation was clelaycd by the oppowing clam of Gront Britain. Iu thls controversy the claim of the Unitid states was morely relative as opposed to that of Fingland. The just clamant was undoubtedly the king of Spin, whose rights, based on discovery, intelated those of either of the coutesting powers. The Spanish title, however, having, as we hure wern. beeu relinquisised by the trenty of 1819. the issuc between Grat lirituin and the Conited Niates became clearly defined. A jolnt occupation of the disputed terrltory hy the two powers ensued from $1 \times 18$ to 1846 . In the litter ycar was negotiated the compromise trenty, which continued our northern line of 1818 on the forty. ninth parillel from the Rocky Mountalns to the Pucifle cuast. ween Vancouver and the malnland was not settled untll 1872. A few more years witnessed the compietion of our sonthern frontler, as well. In 184.5 Texas was adraittel to the Union. The western boindary of the IBio Grande, claimed by the new state under her coustltutlon of 18:36, led dilrectly to the war wlth Mexlco, aud by that war to the great additional cesslon at Guadaiupe Iliduigo in 1848. The soutisern boundary was fimaily comiveted hy the Gadsden purchase of 18.3. Coming low to the study of our Internal geogruphy, we tind ourselves in contact wlth what ls practienlig a distinct subjeet. Here we encounter a whis serics of those weighty ques. tlons, the solution of willeh figures so proml nently in the enrly history of the dmerican government. We have already noted that the first western boundary of the United States was placed by the treaty of 1784 at the llisslsslppl river. But during the Paris negotiations our aliy France and guasl ally Spaln both opposed thls westwarl extenslon of our territory and it was long an open question, even after our iudependence itself was assured, whether we should not be compeiled to necept a western boundary on the Appalachian runge. Years before the final settioment of the question at Paris, the ex. pectnncy of the Mississippi boundary hal given rise to questions which caused an indercurrent of dissension between the states diuriug the entire periol of the Eevolutionary War. In their relation to the western laudquestion, the thirteen origlnal states divide themselves Into two chasses, the elamaat and non-clainant states. In the first class were Massacinsetts, Conuecticut, New York. Virginia, the two Caroilins and Georgia; in tite second, New Ilaupshire, Rhole Isiand. New Jersey, Pennsylvan:.i, Delaware and Marylaud. The ciaims of the seven first Hamed states coverel every inch of our prospretive western domain and in the conntry north of the Ohio, known as the Oid Northwest, there were opposing claims of two and in some districts of even tirrec states the the same territory. The extent of these claims is lndientel on the mip of the Ferieraterl states in 1783 . They rested for the most part upon the royal grants and charters to the colonies, and, in the case of New York, upon the treaties with the Iroquois. Their relative merits where contlicting. or their collective merit as a whole, ere questions which we wili not attempt to discuss. It is sufficient to ohscrve that if insisted upon lu their entirety they would have presented an lasuperahle olistacie to the formation of an Amcrican federate government. In the proceedings of the Contiuentni Congress, as weli as in the state legislatlve bodics, touching this western domain. we may find the gerins of nearly ali the poitieni and constitutional questions whicit have matic the greater part of our subsequent history. The relative rank and power of the states, the obligation of one state towards abother, the individnal rights of states as opposed to tite collective rights of the Inion; all of these questions entered iut, the great problem which the nation Was now railer upon to soive. The ohjections to the western clitims hy the non-chimant states, thongh urgen with varying degrees of vehe. mence and accompanied with many wilely differfog alternatives, mas be fairiy menl::- ! into tho two following eontentions: that it was unjust that so vast a domaln, whose nequisition at the
peace could only be lasured through the joint labor of all the states, should thereafter breome the property of a certaln favored few, and also that the claims lf aliowed would in the end give the ciaimant states a preponderating poiver whlch woull be extremely prefudleiai it not dangerous to the others. Of all the non-claimant states, Maryiand wus the most determinedi in her opposition, and It is to leer that Professor ller. bert B. Adams in hls monograpin on "Maryianil's Influence upon Labd Cessions to the U'aited States," assigns the chlef crecilt for the final creation of the flrst national domain (see page 3:396). The rlaim though a fust one camnot be asserted without nn Important qualification. The propositlon ndranced by Maryland, that a national titic to the western lands lie asserted by a clause In the Articies of Confederation, Was manifestly one to which the clalmant states wouid never give their consent. It was due, however, to the actlon of Maryland, - whiel re. fused for more than three 5 cars, from Noveniber 1777 to March 1781, to ratlfy the articles. that the questlon was kept open until the elaim. ant states, in order to complete the circle of the Union, found it nccessary to ndopit the jolicr of voluntary cesslons, suggested hy Congress. The history lu detail of the severui state cessions in. volves many questions concerning tive dintribu. thon and sule of public lams wincil heed not concern us. Some of the offers of cession, at first conditioual and partial. Were uade bisolute and finai, ns, one by one, the hesetting liftirulties were cleared away. The dates of the tinal cessions by the seven claimant states in oriler were as foliows: New York 1781, Virginin 1iN:3, Hassachusets 1785, Commectirut 1isiti, sonth Caroina 1787. North Canolina 17!m, (ieorgia 1802. Cortain land reservations north of the Ohio, as shown on the map of the C-nited Statesin 1700, were made by both Virginia and ('ommecticut; but Virginia renounced jurisliction orer these lands in the cession, and Connerticut did llkewlse $\ln 1800$, the two states reserving ureely the property rigits. The territory south of the Ohlo was not incluled In the Virginia rewion of 1783 lut the district of Kיntucky was manle the subject of a secondi cresit,tin ithe. Tla completion of this list rlosed the interesting chapher la our history covered by the state cessions and gave to the Cnited statcs the sovercigntr orer Its first great westem public domain. Before pursuing this suhjeet further, Iet us se in what rointion the cessions stand to the present fam of the thirteen originai states. Some bomdary contentions stifl remuinei, hut these are not of historic importince. The claim of Hisumbur setts ln what is now Western New York was settled hy foint eommission ln 17 NG . While i'rumsylvanla purchased $n$ tract of lami on lakn Erie from the generai government in 10,5 . At the present day sixtecn states stamd upon the territory which remained to the originai thirtern, the three additional ones cach springing from the partliton of one of the older states. In 17 ? Sew York assented to the ladeprudence of Vermont. Which was almitted to the lnion ln the foilowing year ; in 1820 DIalne was separated from Nlassachusetts and admitterl: and tinally, in 1862, West Virginla was set off from Virginis and became a state In 1 kit, Wrath winw resume the suhject of the disposition of the western lands. of that stage of thelr history which involves the territorial clains of Individual states. The second stage concerns ltself with the evolution of whst may be called the American system of teritorial government. The first, indeed, had not reached lts completion hefore the second began to recelve the grenter measure of puhllc attention. The western land cesslons to the government were made wlth the generai understanding, taclt ln most cases, hut in that of Virglnia esplicitly stated, that the ceded territory shoald eventually be formed lnto additlonal states. The first natlonal domaln mny therifore be regancied as a district heid In trust hy the government for a spectal purpose. Thls vlew, which was not only required by the terms of the Virginla cesslon, but also represented the general sentiment of the time, has formed the hasis of our entire suhseyuent poliey ln denling with the natlonal domnin, - a poliey whlch has re . msined unaltered ercn ln the case of the lmmense territorics that aftervonds came into the direct possession of the government hy trenty wlth forelgn powers. The one questlon remalning was the erectlon of the legislative maelinery whic' should provide for the government of the territorles during their preparntlon f. r stat hood. The p:ohlem was finally solved by the Ordlnance of lisi for the government $r f$ the Northwest territory. Thls famous orlluaace, the first oi the long serles of acts concernlng territorial government, was the last noteworthy plece of legislathon ninder the old Articles of Confederntion, and the year which wltnessed both the surecessful ln saguration of our territorial polley nad the adop. tion of the new constitution ls the most memora. ble ta the entirc history of Amcrican lnstitutiona. The listory of the enactment of the Ordinance, for many years veiled in obscuritr, has been fallf eluchlated by the late $\boldsymbol{W}$. F. Poole (monograph on " The Orclnance of 1787 ") ; the fula test is printed $\ln$ its proper place in this ,oork (page 2482). Many of its provislons, suited only for th: speclal occasion of thetr ise, are now antiquated and ohsolete, and neither their letter nor spirit find a place ln suhseritent territorial legislation. But the fact renialns that thls act was In a certain sense: the grent prototype; it was the first to organize and set ln motion the machlnery of our territorial polley. A policy that has provided without friction for the tre. meadons nntional expansion which has ensued dariur the present century may jistly be re. garded as one of the grentest acifievements In the political bistory of the Ameriean governme: :In our own day, when the admission of a now state or the ereci. un of a new territory ls regaried as harlly more than a routhe event ln the werking of our poitical system, it is casy for us to underestimate the vital Importance of the first steps which were taken concerning the regulation of the national ciomain. It was hecause those steps were to determine $\ln$ a ineasure onr eatlre futurc poliey, that the hlstory of the old Contheatal Congriss shomid form an ahsorhing theme for every student of our internal eeng. raphy. Politicai considerathoas have, It is truc, often delayed or prematurely hastened the admleslon of new states, hut there has heen one case only where we huve heen called upon ngaln to face s questhon slmilne to that which wns solved hy the old congress. The clreumstances of the admission of the repuhlle of Texas benr no analogy to that of any other state received Into the Union slnce the formation of the government. There was aiready ln thelr mldst a smali percentage of genthe eitizens, gathered . . . from nearly ahi the civilizend nations of the $\mathrm{P}^{-}$rth. . . . I ot infrequently iltigation arose among the gentlies, or hatween Mormon aud gentlle; ano though strict Justice may have beer, cione by the blahops, It was difficilt for the latter to believe that such was the case. T uus it became advisabie to establish for the benefit of nil some Judicial authority that couid not be questioned by any, whether members of the church or not, and this nuthority must be cye that, belag recognized by the goverument of tas United States, would have the suppoit of its laws and the shleld of its protection. Further than this, if the Mormons neg. leeted to estabilsh such government, the incoming gentlies wouid do so ero iong. Eariy in 1849, therefore, a conventlon was summoned of the inhablunts of that portion of Upper Cail. fornia lying enst of the Slerm Nevada Mountuins,' and on the 'th of Marcil nssembled at Suit Lake City. A commlttee was appolnted to draught a constitution, under which the peopio might govern themseives until congress should otherwise provide by law. A few days later the constitution was ndiopted, and a provislonai gov. ernment $c^{-}$-anizai, under the name of the State of Deseret An immense traet of covitry was clalmed, extending from lithtude $33^{2}$ to the horder of Oregon, and from the Ibicky Mountaing to the Sierra Nevada, together with a section of the territory now included in southern Cuifornia, and the strip of coast iying between Lower Caiifornia and $118^{\circ} 30^{\prime}$ of west longitude. The seat of goverument wns to be at Ssit Lake Clty." In July Amon W. Bahbitt was elected deiegate to Coigress, nnil that body was petitioned to admit the provisionaily organized state into the Uniol. The delegate and his pecition met with a crol reception at Washington; but in September, 1850. Congress passed an act organizlag the Territory of Ctah, and Brigham Tonug was appointed Governor. "The aet to estabish a ter, itoriai government for Utah piaced the southern boundary at the 37th parailel, the seetion between that fimit and the 33d paraliei belng inemderi in the Territory of New Mexico [organized at the same time], with the exceptlon of the part transferred to California, by which Stato Utah was to be bounded on the west. On the nortb. Oregou was to remain as the boundary, and on the east the Rocky Mountains." "The word Utah originated with the people inhabiting that reglon. Early in the 17th century, when New Mexico was tirst much taiked of by the Spanigeds, the principul nations of frequent mention as inhabiting the several sides of the locality about that time occupied were the Navajos, the Fistas, the Apaches, and the Comanches. A. D, 1857-1859. - The Mormon Rebelllon. -"To thls would-be 'State of Deseret ' Presldent Fillmore had asalgned Brigham Young, the spiritual head of the church, as territorial governor; and by 1857, when a Democrstic Prealdent showed the dispositlon to apply the usual temporal rule of rotatlon to the offlce, Young was rebeillous, and the whole Mormon population, refusinm alleglance to any one hut thelr consecrated head, began to drill and glrd on thelr armor for reslstance. Judgen of the territorial courts had to flee for thelrilves; justice, whlch had long been tampered wlth to absolve church members from punishment, was deprived of process. It was charged that the Mormon blerarchy had leagued with Indlan tribes to Impel them to atrocitlen agalnst the Gentlle Inhahitants, whife their own Danltes, or dentroylng angels, were secretly set apart and bound by borrid oath to pillage and marder such as made themselves obnoxlous to the theucracy. Presldent Buchanan appolnted as the new governor of Utah Alfred Cumming, a man comblnIng courage with discretlon, and filied the judicinl and other vacancies whilh exlsted. To protect those new offlecrs and ald them in discharging thelr functions, he ordered a detachment of regulars to accompany them to the Salt Lake reglon. The need of thls was soon apparent. Early in September, 1857, a part of the troops left Fort Laramle, and on the 15th of the tame month Brigham Young, pnrading audaclously the commisslon he still held from the Unlted Statcs, forhade all armed forces from entering the territory, and calied upon his people to defend themseives against the armed mercenary moh ' of lnvaders. His leglslature, meetlng later, sustalned him in hls hitter dlatrlhe agalnst the 'profane, drunken, and corrupt officlals,' whlch a Washington adminlstration was trying to force upon Utah territory at the polnt of the hayonet. A Mormon force hnd meanwhille advanced to lmpede the approach of our regulars, capturing and hurnlng three supply trains of wagous laden with tents and provisions, atampeding the horses, and so cripplling Fort Bridger. Whleh whs distant some twelve days' march from Salt Lake city, as to deprive our arnyy, on Its arrlval, of a proper winter's shelter after its long and fatlguing march, and compel General Johnston, who commanded this Important post, to despatch part of hlls forces upon a dreary and hazardous expedition to New Mexlco for further supplies. Johnston's despatches In October showed the Presldent that unless a large force was quickly sent out, a long confict would be Inevltahle. Buehanan and his Secretary of War asked from thic present Congress ten new reglments, of which tive mlght be used to bring the Mlormons to suhjection. But the Lecompton controversy was raglag; and the use of Federal trowps to put down the free-state movement $\ln$ Kansas had caused such mistrust and irritation that toone hut the Presldent's
unahaken supporters felt Inclined to place mo tmopes at his diapomal. The blil for an army creace was loot, though both Ilouses pased meanure authorizlog the Preaident to accept for the Utah doturbancen two regiments of volus teerm. The volunteers were not called 'it; $h$ Buchanan muatered a millitary force out of th regulars atrong enough to overawe and ove power Utah's rebelllous Inhabltants. Two pem comminaloners also bore to Utah a proclamath from the Prealdent, dated April 6th, whlc offered free pardon, except to those who pe sloted still in disloyal realotance. Govera Cumming, upon his arrival, made a like a nouncement. These conclilatory efforta, back hy an lrealstlble show of military strengti hrought the Mormons to a speedy acknowled ment of alleglance. They fought not a batt hut manlfested a purpose to burn thelr hous and make a new and peaceable retreat lato th wllderness. From thle purpose, after some co ferences, they were at length dlasuaded; and was agreed In June between the Mormon lende and our commlssloners that the Unlted Stat soldlery should be kept out of slght as much poselhle whlle Utah remalned tranqull. On th last day of the same month the new governo accompanled by Brigham Young, came hisck Salt Jake clty to assume functions which wet fully recognized. A few days eariler, and be fore the Mormons had begun to return to the homes, General J ohnston and hle troops, lesvin Fort Bridger, reached the desolate clty, marche through Its streets, and, cromalng Its river Jol dan, encamped on the opposite bank. Whil ahandonlng all further efort at ploicnt real tance, the Mormons stlll clung to the hope 0 belng left to govern themselves and preserv thelr Instltutions against the world's contaminst lng touch, by galalng the lndispensable cond tlon of practical leolation and Independence. T thls Congress In Its next winter's essslon the renewed the former petitlons they had presente for Immedlate admisslon to the Unlon as th 'State of Deserct.' And should thls requeat b denled, they prayed that the organle aet of th territory mlght be so amended as to give the in hahltants the right to choose thelr own gover nor, judges, and othcr officers. All thls Congres quictly Igaored; and In mlititary clrcles it wa stlll generally belleved that, for all this out ward show of loyal acqulescence, the Mormon: feit at heart no more affection for the Cnitec States than for any forelgn natlon; that the only rule they reaily recognized was that of theil rellglon and the wlll of their hlerarchy; and tha force must stlll be used to compel them. Suct vlcws werc entertalned by General Albert Sidnes Johnston, the milltary commander at Utah, deb tined to later distinction In the art of war. UTICA: Origin.-" "The mont anclent Pheenscian colonies were Utica, nearl on the northeramont point of the coast of Africa, and in the mame guif (now known ax the guif of Tunis) as Carthage, over againat Cape Lliybwum In Slcliy, - and Gades, or Gadeira, on the south-weatern conat of Spain; a town which, founded perhapa near one thousand yeara before the Chriatian era, has maintalned a continuous prosperity, and a name (Cadiz) subatantialiy unaltered, longer than any town in Europe. How well the sito of Utica was suited to the circumstances of Phentcian colonists may be inferred from the fact that Carthage was after wards established in the same gulf and near to the same apot, and that both the two cities reached a high pitch of pros-perity."-G. Curio's defeat.-Curio, the legate or lieutenant sent first by Cwar to Afrlca (B. C. 49), to attack the Pompeian forces in that quarter, undertook with two legions to reduce the city of Utica, which had became the capital of the Roman Province. Juba, king of Numidia. who was permonaily hostile to both Curio and Cesar, came to the assistance of the Pompelians and forced Curio to withdraw from Its besieging lines into the neighboring Cornelian camp, which was a famous military entrenchment left by Bcipio Af ficcanus. There he might have waited in safety for re-enforcements; hut the wily Numidian tempted him out by a feigned retreat and then overwhelmed him. Curio and moat of his men were slain.-C. A. D. 1712-1714-- The Treaties which ended the War of the Spanish Succersion, forming the Peace of Utrecht and the Trenty of Rastadt.-The long War of the spanlob Succession was hrought to a close (except as be. tween Germany and France) by negotlations at Utrecht, which resulted in the concluding of s number of treaties between the several powern concerned, constituting collectively what is known as the Peace of Utrecht. Negotistions to this end were begun hy England anil France eariy in 1711, and prellminaries were settled be. tween them and signed in October of thst yesr. This action of the English compelled the other alilea to consent to a gencral conference, which opened at Utrecht January 20, 1718. The dig. cussion of terms laated more than a year, whille the war went on. Between Germany and France the war stili continued and it whs at Rastadt (March, 1714), not Utrecht, that the last named powers came to their agreement of peace. The chief artcles of this memorable paciacation were to the follow. ing purport: It was otipulated that,

Phillp. now cotabilshed on the 8 panish throne, shoulid renounce all right to the crown of France; thet the dukes of EEerry and Orléans, the next heira to the French monarchy after the infant faupisin, should in Ilke manner renounce ail rigit to the crown of 8 pain, In the went of thelr acces. gion to the French throne; that, on the death of Philip, and in defauit of his male lesue, the suc. cesslon of Spain and the Indies should be recured to the duke of Savoy : that the lsiand of Sicily shouid be instantly ceded by his Catholic majenty to the same prince, with the title of king; that France shouid also cede to him the valleys of Prugelas, Ouix, Nezanne, Bardonache, and Cha-teau-Ibuphila, with the forts of Exifles and Friestreiles, and restore to $h i \mathrm{im}$ the duchy of Suroy and the county of Nice; and that the fuli property and sovereignty of brith banks and tho navigation of the Marafian, or river of Amazons. In south America, shouid belong to the king of Portugai. It was declared that the king of Prussla shouid recelve Spanish Guelderland, with the sovereignty of Neufchatel and Valengin, in exchange for the principality of Orange snit the lordship of Chalons, and that his regai thie should be acknowicdged; that the Rhine should form the boundary of the German empire on the slde of France; and that nil fortitications, beyonil that river, ctaimed by France, or In the possession of inis most Christlan majenty, shou'l eitier be relingulshed to the emperor or destroyed; that the klngdom of Naples, the duchy of Mitan, and the Spanish territories on the Tuncan shore, should be ceded to the house of Austha; that the sovereignty of the Spanish Netherlands should like wise be secured to that family; but that the elector of Bararia (to whom they had iseen grante.i by Philip) should retain such places as were still in his possession, until he shouid be relnstated in ali his German dominions, except the Upper Palatinate, and also be put in possession of the 1sland of Sardinla, with the title of kling: that Luxemburg, Namur, and Charleroy should be given to the states. general as a barrier, together with Mons, Menln, Tournay. and other places; and that Lisie, Aire, Bethune, and St. Venant. should be restored to France. It was agreed that the French monarch shoulif acknowledge the titie of queen Anne, and the eventual surnession of the family of Hanover th the British, one; that the fortifica. tiens of I nakirk (the caus of much jealousy to England, and raised at vaat expense to Prance) should be demolished, and tie harbour tilled up; that the island of 8 t. Christopher (whlch had iong been possessed jolntily by the Freach and Engilsh, but from which the French had been expeiled in 1702) should be subject to thls country [England]: that Hudson's Bay and Stralts (where the French had founded a settiement, hut without Ulispossessing the English, and carried on a rival trade during the war), the Lown of Piacentis. and other districte of the isinnd of New. feundiand (where the French had been suffered to entablish themselves, through the negligence of government), and the long-disputed province
of Nova Beotla (into which the Freach had early intrided, out of which they hall been frequentls dri- $\quad$, and which hall been naily concjuered by nu thiny from New England in 1710), should be convidered as the dependencies of the Brittoh crown: that Minorca and the fortrens of Glhral. tar (conquered from 8pain) should remain in the powecsion of Oreat Ifritain; and that the As. siento, or contract for furaishing the Spanish colonies in gouth America with negroes, should beloug to the suhjects of Grent Britain for the term of thirty years. That theme condlitions, especiaily on the part of Great Britaln, were very indiequate to the success and expense of the war, wlil be allowed by every intelligent man whose underatanding in not warped by polletical prejuilices.

The other confecterates had greater cauno to be satisfled, and the emperor Charles VI.] as much as any of thein; yet was he obatlate in refusing to sign the geners pacifcstlon, though two monthis were allowed him to deliberate on the terma. But he had soon reason to repent his rashncis in resolving to contlnue the war aione. . . . Ife forced the patsage of the Ithine . . and reduced Freyburg, the capltal of the Brelogau. Unwliling to protecute a disantrous war, the emperor began seriousily to thlnk of peace; and conferences, which afterward terminated in a pacific treaty, were opened between prince Eugenc and Vlllara, at Ranstadt. The terms of this treats, concluded on the 6th of March (N. S.) 1714 [but ratifled at Baden the next September, and sometimes called the Treaty of Baden], were lesa favouralie to the emp-ror than those which had becn offered at Utrecric. The klog of France retained Landlau, whlch he had before proposed to celic, with several fortreases behind the Rhinc, which he had agreed to demollsh [but restorei Freiburg]. Ile procured the full re-establishment of the electors of Bevaria and Cologne ln their domlnions and dignitles; the former prince consenting to rellnquish Sardinia to the empcror, In return for the Upper Palatinate. . . The principal articies in regard to Itaily and the Low Countries were the same with those settled at I'treçit. Relaxing ln hls obstinacy, the king of Spain also acceded to the general pacification."-W. Russell, Hisl. of Modern Europe, pt. 2, letter 23 (0. 8).

A. D. 432-533.-Ruin of Africa under their dominion. - The Vandais were higoted Arians and their government wat pecuilariy tyrannicai; they aiways treated the Roman inhahitants of Africa as poiltical enemies, and persecuted them as religious opponents. The Visigoths in Spain had occupied two thirds of the suljugated lands, the Ostrogoths in Itaiy had been satisfled with one third; and hoth these penpie had acknowledged the eivil rights of the Romans as cltizens and Christians. The Vandais adopted a different poilcy. Genseric reserved immense domains to himseif and to his sons. He divided the densely pcopied and rich districts of Africa proper among the Vandal warriors, exempting them from taxation and hinding them to military service. . . . They seized ail the richest lands, and the most valuable cstates, and exterminated the higher ciass of the lRomans. Oniy the poorer proprietors were permitted to preserve the arid and distant parts of the country. Stili, the number of the Romans excited tho fears of the Vandais, who destroyed the walls of the provincial towns ln order to prevent the peopie from receiving succours from the Eastern Empire. When Genseric conquered Carthage, his whoie army amounted oniy to 50,000 warriors; yet this amali horde devoured ail the weaith of Africa in the course of a singie century, and, from an army of hardy soldiers, it was converted into a caste of luxurious nohies ifving in spiendid vilias round Carthage. In orier fuily to understand the influence of the Vandais on the state of the country which they occupied, it must he oiserved that their oppressive government had aiready so $\mathrm{f}_{\mathrm{E}}=$ lowered the condition and reduced the numbers of the Roman provineials, that the native Moors began to reoccupy the country from which Roman industry and Roman capital had exciuded them. . . . As the property of the province was destroyed, its Roman inhahitants perished."一G. Finiay, Grece Under the Romane, ${ }^{c}{ }^{2}$. 3, sect. 5 .

A. D. 533-534.-End of the kingdom and nation. - The weakened and disordered state of the Vandai kingdom, concurring with the revivai of a military spirit in the eastirn Roman empire, which the great soldier Belisarius had brought about, encouraged the Emperor Justinian to attempt, A. D. 533, a reconquest of the iost Roman provinces in A frica. With a fleet of six hundred ships, bearing 37,000 men, Belisarius set sali from Constantinople in the month of June and ianded carly in September on the African coast, about tive days journey from Carthage, having haited at a port in Sielly on the voyage. A few days iater, be defented the Vandai king, Gelimer, In a hatic (Ad Decimus) fought it ten miles distance from tids captai, and cntered Carthage in triumpis (Septenber 15, A. D. 533), received with joy hy its Roman and Catholic inhatitants, iong perseenteri and humillated by the Arian Vandais. A secoui and decisive hattie was fought sone weeks afterwaris at Tricamarou, twenty miles away from Carthage, and there and then the Vandal kingdom came to its eni. Gelimer fled into the whiks of Numidia, was pursued, and, having surrendered himseif in the March foliowing, was sent to Constantinople, and passed the remainder of his diays in peace and modest luxury on a comfortabie eatate in Galatia.

The soldiers were aimost wholiy Seandinavians - to a great extent the Swedes of Russia. The reasons against believing Varan. gian to be the same word as Frank, are: 1 The mention of Franei aiong with thens, ns a separate peopie. 2. The extent to which the Varangians were Scandinavians, rather than Germans of the Rhine. In favour of it is: The form of the present Orientai name for Europeans - Feringi. VEHMGERICHTS. - VEHMIC COURTS.-"In times when politlcal, social and legal life are in process of fermentation, and struggling towards a new ordier of things, the ordinary tribunals lose their authority, and from the body of the people men spring up to protect the right in a primitive fashion, and to punish the criminal who has escaped the ordinary penal. ties of the law. Thus, at the close of the Diddle Ages, or, more precisely, the first half of the 10 th century, the Vehmgerichts (or Vehmic Courts, also called Free Courts, Franchise Courts, Secret Courts) rose to an authority which extended all over Germany, which knew no respect of persons, and before which many evil-doers in high piaces, who had bade defiance to the ordinary tribunais, were made to tremble. The name 'Vehme' is derived from the old German 'ver. vehmen,' which means to han, or to curse. The Vehmic courts were peeuliar to Westphalia, and even there could only be held on the 'Red Land' -that is, the district between the Rhine and the Wese.: They were dependent on the German Emperor alone, and their presidenta, the Freecounts, received from the Emperor in person, or from his representative, the Elector of Cologne, the power of life and death. They traced their origin to Charlemagne, who, respecting the legal customs of the old heathen Saxons, introluced county courts among them after they had been converted to Christianity. For, even in the most anelent times, the Sixon freemen used to assem. ble at an appointea season, after they liad held their great sacrifice, and hold a 'Thing' under the presideney of one of their oldest members, called the Grave, or Count, where they inflicted punishment and administered justice. The Vehmic court consisted of a Free-count and a number of assessors, who were ealled 'The Initiated,' hecause they knew the seerets of the holy Vehme. There must be at least fourteen of these assessors, but there were generally twice that number. As it was no seeret whea n man was an assessor, and as it contributed greatly to the safety of his person, since people took good eare not to molest a niember of the holy Vehme, it gradually came about that men from every Germaa province obtained admission into the number of assessors. When the Emperor Sigismund was elected into the number of "The In. itiated st the Franchise Court of Dortmund the number of assessors is sall to have amounted to 100,000 , among whom were many princes and nobles. And about a thousand assessors are said to have beea present when the ban was issued against Duke Henry of Bavaria in 1429. There was a 'secret court' to which only the initiated had access, and a 'public court ' which was held in the moraing in the light of day at a known eourt-house. The presidenta' chairs were always set in the open air under a lime, onk, pear, or hawthorn tree, and often near a town, castle, or village. At Dortmund the president's chair was placed close to the town wail under a limetree, which, thrugh sadly shattered, is stlll standing between the rails inside the railway station. Cenar's campaign. - Casar's third campaign in Gaul, B. C. 56, was directed against the Veneti and thelr Armorican nelghbors. These tribes had suhmltted themselves in the previous zear to Casar's lleutenant, the younger Crassus; but the heavy exactlons of the Romans provoked a generai rising, and Casar was called to the scene ln person. The Veneti were somphlhl ous a race, and thelr towns were generaily placed so much out of the reach of a land army, that he found lt necessary to hulld a fleet at the mouth of the Lolre and hriag it up agalnst them. But the Venetl were hetter sailors than the Romans and their shlps were more strongly built, so that the wdvantage wouid have stlll remalned to them if Roman inventiveness had not turned the scale. Casar armed hls men with hooked knives at the end of long poles, with whlch they cut the rigglng of the Venetian shlps and hrought down their clumsy salls, whlch were of leather. By this means he overcame and destroyed them, in a great naval fight. The Spanish mlsgovernnent left a legacy of 'itterness and anarehy that las heen the cause of much misery. Politlcal passlon runs very high in the country, and lts history for a gencration hetween these two parties has heen a contiumal struggle, always more or less warlike. The exlstence of Ven. czuela in an Independent capac'ty ls due, In a large measure, to the persoril ambitlon of Pacz. by whose intluence the great Llberator was exlled from lils fatherland, and the republic separated from Colomhin. Whatever incy have been the real wishes of the people, the death of Bolivar put an end to all thonghts of re-uniou; and Paez became its first constitutional president. - The second president was the learned Dr. José Maria Vargas, whose election In March 1835 was said to have hecen irregular, and led to the 'levolnelon de las IReformas.' He was deposed and ex. pelled in July, but in August recalled to powerl Generai Paez now took the delel against the 'reformlstas,' and a eivil war ensued, coutinning un-

Now that the grave had ciosed over Simon Bollvar, the passions whilch had prevented the recognitlon of his greatness died also, and on the 17 th of December 1842, the ashes of the lmmortal Llberator were transferted from Santa Maria wlth every mark of publie respect and honour and recelved a magnificent uational funeral, In the Temple of San Francisen, In Caracas. The ffth presldent was Generid Soublette, and the slxth Generai Jose '140 no Monagas, who was elected in 1847. The liberal can. dldate was Antonio Iencadlo Guzman; and it la asserted that he had a majorlty of votes.
Monagas did not have an easy tenure of oftice, for the oppositlon of Paez led to two years of clvll war. Here It may he noted to the credit of the llheral party that, at a time wben many of lts opponents were prisoners, it abolishel the penalty of death for poiitlcal offences. To his brother, General José Gregorio Monagas, after. wards president of the republic, was due the emancipation of the slaves. The famous law of March 24th, 1854, conced ad liberty antl equal rights to all ; but hy a strange lrony of fortune, lie who had given the precious boon of fruednm to thousands dled himself lacarcerated In a politlcal prison. . . . At the beglnnlng of 1859 the discontent of the liberals had reached a pitch Whlcls led to the outbreak of the War of the Fed. eration. It was ln this struggle that the present leader of the liheral party first dlsplayed his mil. ltary skill." A. D. 452. - The origin of the republic. When Attila the Hun, in the year 459, crossed the Aipa and Invaded Italy, " the savage destroyer undedgnedly lald the foundations of a republic which revived, in the feudal state of Europe, the art and spirit of commercial Industry. The celebrated name of Venice, or Vcnetia, was formerly difused over a large and fertile province of Itaiy, from the confines of Pannonia to the river Addua, and from the Po to the Rhetinn and Jullan Alps. Before the irruption of the barharians, afty Venetian clties flourshed in peace and prosperfty. Many families of Aquilela, Padua, anil the adjacent towns, who fled from the sword of the Huns, found a safe though ohscure refuge in the nelghbouring Islands. At the extremity of the Gulf, where the Adriatic feebly imitates the tides of the ocean, near a hundred small islands are separated hy shallow water from the continent, and protected from the waves by several long allps of land, whlch admit the entrance of ves. sels through some secret and narrow channeis. Till the middle of the 5th century these remote and sequestered spots remalned without cultiva. tion, with few inhahitants, and almost without a nsme. Eut the manners of the Venetlan fugitives, thelr arts and thelr government, were gradually formed by their new sltuation; and one of the eplstles of Cassloclorus, which deacribes thelr condition about seventy years afterwards, may he considered as the primitive monument of the repuhlic.

Flsh was the common, and almost the universal, food of every rank: thelr only treasure conslsted In the pienty of salt w'.ach they extracted from the sea."-E Gihbon, Deeline and Fall of the Roman Empire, ch. 35.-"The lahabitants of Aqullela, or at least the feeble remnant that escaped the sworl of Attlla, took refuge at Grado. Concordla mi. grated to Caprularia (now Caorle). The inhahl. tants of Altinum, abandonlng tbeir ruined villas, founded thelr new habltatlons uren seven Islands at the mouth of the Plave, wheh, accordIng to tradltlon, they named from the seven gates of thelr old clty. $\qquad$ From Padua came the larg. est stream of emigrants. They left the tomb of their raytheal aneestor, Antenor, and hullt their humble dwellings upon the lslands of Rlvua Altus and Methamaucus, better known to us as Rialto and Malamoceo. Thls Paduan settlement was one day to be known to the world hy the name of Venice. But let us not suppose that the future Queen of the Adriatle sprang into existence at a single bound like Constantinople or Alexandria. For 250 years, that is to say for eight generations, the refugees on the lslands of the Adrlatle prolonged an obseure nad squalld existence, - fishlng, salt-manufacturing, damming out the waves with wattled vinebranches, driving piles into the sand-banks; and thus gradually extending the area of their vif. fages. Still these were but fishing villages, loosely confederated together, loosely governed, poor and Insignifleant.

This seems to have been their ennditlon, though perhapt gradually growing $\ln$ commereial importance, untll at the beginning of the 8 th eantury the concentration of politcal authority in the hands of the first doge, and the reengnition of the Mlalto cluster of islands as the carital of the confederacy, atarted the Republic on a career of success and

Thls lasted nearly three hundred year When it was found that the rislng nation ha fairly outgrown its institutions. Dangerou rivalries arose among the tribunes. . .. At meeting of the Couneil-General in A. D. 697 the Patilarch of Grado proposed the concentra tion of power in the hands of a singie ehlef under the tltle of Doge or Duke. The proposi tion was eagerly accepted, and they proceedec at once to the electlon of this chief. It wlll b seen (remarks Daru) that the Dogeshlp saved in dependence and compromised liberty. It was veritahle revolutlon, but we are lgnorant by what circumstanees it was brought alout. Many historians assert that the change was no effected tlll tho permission of the Pope nud the Emperor was ohtalned.' The firat cicclee fell on Paolo Luca Anabesto. It was made by twelve electors, the founders of what were thenceforth termed the electoral famliies. The Doge was appolnted for llfe: he named hls own counsellors: took charge of ali public business; had the rank of prince, nud decided all questlons of peace and war. The peculiar title was meant to imply a llmited sovereignty, and the Venetlans uniformly repudlated, as a disgrace, the bare notion of their having ever submitted to a mnn arch. But many centuries passed away before any regular or weli-defined llmits were prae. tieally lmposed; and the proionged struggle between the people and the Doges, dependling malnly on the personai character of the Doge for the tlme being, constleutes the most startlling and exciting portlon of their hlatory." The thlrd Doge, one Urso, alarmed the people br his pretensions to such n degree that they slew him, and suppressed his office for firc years, substtutling a chlef maglstrate called "maestro della mllizia." "The Dogeship was then [it2] re$s^{+}$ored in the peraon of Thendai Urso (som of the last Doge), who quitted Heracica [then the Ye netian capital] for Malamocco, whith thus became the capital." In hls turn, Theodal Crso lost the favor of the pcople and was leposel and bllnded. "It thenceforth beeame the recelved custom in Venlec to put out the eyes of deposed Doges." years are invoived in obacurity. One thing is clear. Pepin, King of the Lombards [son of Chariemagne], either under the pretence of a request for aid from the new Doge, or to en. force some real or asaumed rights of his cwn , declared war againat the Repuhilc, and waged it with such impetuodity that his fleet and army. after carrying ali before them, were oniy sepa. rated from Malamocco, the capitai, by a canai. In this emergency, Angeio Participazio, one of those men who are produced hy great occadions to mark an era, proposed that the entire populatlon should remove to Rialto, which was sepa. rated hy a broader arm of the sea from the enemy, and there hoid out to the last. No sooner proposed than done. They hastliy embarked their ali; and when Pepin entered Malamocco, he found it deserted. After losing a large part of his fieet in an ili-advised attack on Rialto, he gave up the enterprise, and Angeio Participazio was elected Doge in recognition of hls services, with two tribunes for counseliors. One of his first acts was to make Riaito the capltai, instead of Maianoocco or Heraciea, which had each been the seat of Government sit intervals. 'There were round Riaito some sixty islets, which the Doge connected hy hridges. They were soon coverad with houses. They were girt with a fortification; and it was then that this population of fugitives gave to this rislng city, which they had just founded in the mlddie of a morass, the name of Venetia. In memory of the fair countriea from which their fathers had been forcihly expatriated. The province has lost its name, and become suhject to the new Venice.' "-The Republic of Venice Quarterly Fievier, Oct., 1874, v. 187), pp. 417-420. In 803 Chariemagne concluded a treaty, at Alx. la Chapeile, with Nicephorus 1. the Byzantine or Eastern Emperor, estahlishing boundaries between the two empires which disputed the Roman name. "In this treaty, the supremacy of the Eastern Emplre over Venice, Istris, the maritime parts of Daimatia, and the south of Italy, was acknowiedged; while the authority of the Western Empire in Rome, the exarchate of Ravenna, and the Pentapolis, was recognised hy Nicephorus. The comnerce of Venice with the East was already so important, and the Byzantine adminlatration afforded so many guarantees for the securlty of property, that the Venetians, in spite of the menaces of Chariemagne, remained firm in their aliegiance to Nicephorus. Venice, it is true, found itseif in the end compelled to purchase peace with the Frank empire, by the payment of an annual trihute of thirty-six pounds of goid, in order to secure its commercial relations from interruption; and it was not released from this trihute until the time of Otho the Great. It was during the reign of Nicephorus that the site of the present city of Venice became the seat of the Venetian government, Rlvsito (INalto) becoming the residence of the duke and the principai inhahitants, who retired from the continent to escape the attacks of Pepin [king of Italy, under his father, Chariemagne]. Hersciea had previously been the capital of the Yenetian municipality. In 810 peace was again concluded between Nicephorus and Chariemagne, without making any change in the frontier of the two empires. "-G. Finlay, Byzantine Empire, 716-1057, bl. 1, ch. 2, sect. 1.

A. D. $830-961$. Spread of commerce and naval prowess.-Destruction of Iatrian ph rates.-Conquents in Dalmatia.-"During the ninth, and the first alxty years of the tenth centuries, -from the government of Angelo Particlpazio, to the coming into Italy of Otho the Great,-the Venetian alfairs, with brief Intervile of repone, were whoily occupied with civil commotions and naval wars. The dogea of the ropuhilie were often murdered; ite fleets were cometimes defeated; hut, under every ad verne cir. cumetance, the commercial activity, the weaith, and the power of the atate were stili rapldiy in: creasing. In the ninth century the Venetiane, in concert with the Greeks, encountered, though with indifferent success, the navies of the Sara. cens; but the Narentines, and other pirates of Daimatla, were their constant enemies, and wero frequently chastised hy the arms of the repubiic. The Venetian weaith invited attacke from ali the freebooters of the seas, and an enterprise undertaken hy some of them who had estahilshed themselves on the coast of Istria deseaves, from its singularity and the vengeance of the repuhlic, to be recorded in this place. According to an ancient custom, the nuptials of the nobiea and principal citizens of Venice were always celebrated on the same day of the year and in the same church. . . . Tho Intrian pirates, acquainted with the existence of this annuai festivai, had the hoidncess [A. D. 944] to prepare an amhush for the nuptial train in the city itself. They secretily arrived over night at an uninhah. ited isiet near the church of Olivoio, and lay hidden behind it with their harks until the procession had entered the church, when derting from their conceaiment they rushed into the sacred edifice through ail its doors, tore the shrieking hrides from the arms of their defenceiess iovers, possessed themseives of the jeweis which had been displayed in the festai pomp. and immediatciy put to sea with their fair captives and their hooty. But a deadiy revenge overtook them. The doge, Pietro Candiano III., had been present at the ceremony: he shared in the fury and indignation of the a ainanced youths: they fiew to arms, and throwing themselves under his conduct into thelr vessels, came up with the spoliers in the lagunes of Caorio. A frightfui massacre ensued: not a life among the pirates was spared, and the victors returned in triumph with their hrides to the church of Olivolo. A procession of the maldens of Venice revived for many centuries the recoliection of this deliverance on the eve of the purification. But the doge was not satisfled with the punish. ment which he had inflicted on the Iatriots. He entered vigorousily upon the resolution of ciearing the Adriatic of all the pirates who infested it: he conquered part of Dalmatia, and he transmitted to his successors, with the ducal crown, the duty of consummating his design. A. D. 829. - The tranaiation of the body of St. Mark.- The Winged Lion of St. Mark."In the second year of the reign of Doge Glustiniano Particiacio there was hrought to Venice from Aiexandria the body of the huly cvangelist St. Mark. For, as Petrus Damisnus says, Mark was hrought from Alexandria into Venice, that he who had ahone in the East llke the morning
star might shed his rays in the reglons of the West. For Egypt is held to be the East and Veniee the West. There he had held the rule of the Church of Alexandria, and here, belng, as it were, born again, he ohtaived the sover elgnty of Aquillela. Now thls is how the thlng was done. The king of the saracens wishing to huild himself a palace in Babylon, gave command that stones should be taken from the Chrlatian churches and other publle places, that they might bulk him a splendid house. And at that tlme there eame by chance to the Church of Bit. Mark, Bon, tribune of Malsmoceo, and IRustlico da Torcello, who had been forced hy the wlud, contrary to the edlets of Vinice, to put lu to the harbour of Alexanilria th ten ships laden with merchandise, and thi ubserving the sadness of the guardians of t. e church (two Greeks, hy namo Stauratlo, a monk, and Theodoro, a prlest), inquirei the cause. Abd they ausweretl that by reason of the lmplous edlet of the king they feared the ruln of the church. Thereupon they prayed them to give them the holy boily that they might carry it to Venice, promising them that the Doge of Venice would rccelve it with great houour. But the keepers of the chnrch were filled whth fear at thelr peti. tion, and answerel reproachlag thein and say. lng: 'Know ye not how the blessed St. Mark, who wrote the Gospel, St. Peter dletatling at hls request, preached in these parts and haptised Into the faith the men of these reglous? If the fathful should become awnre, we could not escape the perif of death.' But to that they answered: 'As for hls prenehing. We are his firstborn sons, for he first preached ln the parts of Venetla and Aqulleia. And in perll of deuth It is commanded, "If they persecute you in one city, flee ye to another," which the evangellst hlmself oheyed when in the persecution at Alex. andria lie fled to Pentapolls.' But the keep.rs sald: 'There is no such perseeution now tha: wa should fear for our persons.' But whlle thoy spake, came one and broke down the preclous stones of the church, and when they would not suffer it they werc sorely beaten. Then the keepers seelug the devastation of the church, and thelr own great danger, llstened to the prayer of the Venethans and appointed them a day when they should receive the holy body. Now the hody was wrappel in a rohe of silk serled with many seals from the heal to the fect. And they brought the body of St. Claudla, and harlng ent the robe at the back and taken nway the bouly of St. Nark, they placed in Its stead the blessed Cluudin, learlug the seals unbroken. But n sweet olour quickly spread into the city, and all were flled with astonlshment, and not doubting that the body of the evangellst had been ruoven, they ran together to the church. But when the shrlne was opened and they saw the garment whithe seals unbroken, they ret urned quiekly to their homes. And when the body sbould be borne to the hosts, they covered it with herbs and spread over lt pork. flesb for the passers-by to see, and went crying, 'Khanzir kbanzir! which is the Saracen's abomination. Aud when they reached tbe shlps they coverend it with a sail while they passed through the Saracen ships. And as they sailed to Veuice the ship which bore it with many otbers was saved from perll of shlpwreck. For when the sbips had been Iriven in the nlght

Jurlug tbe carlier prexl, the doge was an electlve prince, the limit of whose power was vested in assemblies of the people. It was not tlll luse that le watabligera to eonsult only a counchl, formel froun anougat themost illustrionseltizens, whom he dexíniltenl. Thence came the name glven then of 'pregali' (invilted). Tbe grand eouncil was not furmeal till 112,140 vears later, and was, from thit time, the real soveredigu of the republie. It was mompescal of 480 members, namerl unnunlly ou the last day of september, by $1 \stackrel{2}{2}$ tribunes, or arand electon, uf whon two were chosen by enth of the six sections of the republic: So umore than four members from one family eonle be nimed. The same counsellors might bo re-elected each year. As it is in the splrit of a corporation to tend always towards an aristocracy, the same persons were habitually re-elected: and whea they died their children took their places. The srand council, nelther assuming to itself nor grantlng to the doge the judicial power. gave the first example of the creation of a burly of judges, numerous, independent, nad Irrimovable; such, nearly, as was afterwarils the parliament of Paris. In 1179, it created the criminal 'quarantla'; called, also, the 'vecchia quarantia.' to distlagnesh it from two other bodies of forty judges, ereated $\ln 1229$. The grand council gare a more complete organization to the governineat formed from among its members. It was composed of a doge; of six counsellors of the red robe, who remalned only eight months iu office, and who, with the doge, formed the 'signoris':

In 1249, the sovereign council renounced the electlon of the doge, sud intrusted it to a commlasion drawn iy lot from among the whole council; thls commls. slon named another: whlch, reduced by lot to one fourth, anmed a third; and by thewe alternate operatlons of lot and elcctlon, at length furmed the lant commisslon of $\$ 1$ members, who condd rlect the doge only by a majorlty of 25 suffruges. It was not tlll to wards the end of the 13th ceutury that the penple began to discover that they wero no more than a cipher In the republic, and the doge no more than a eervant of the grand coun. cll,-surrounded, Indeed, with pomp, Lut withont sny real power. In 1280, the people attempted themselves to elect the doge; hut the grand councll obllgal him whom the popuiar suffrages had deslgnated to leave Veulce, and aubstltuted in hls place Pietro Gradenigo, the clilef of the sristocratic party. Gradenlgo undertook tn ex. clude the people from any part In the electlon of the arand councli, as they were alrcady deloarred from any participation ln the election of a doge.

The decree which ho proposed and carried on the 28th of Februnry, 1207, Is famous in the blstory of Veulce, under the namo of 'serrata del magglnr conslglio' (shitting of the grand councii). IIe legally founded that heredltary aristocracy, - so prudent, so fcalous, so amlif. thous, - whlch Europe regarded with astonlshment; immovable in prlaciple, unshaken In power; unlting some of the most odious pructlces of despotlsm with the name of llberty; susplicious and perfidioualn politics; sanguinary ln revenge; lirlulgent to the subject; sumptuons in the publie service, ecnnomicai In the adnilalstratlon of the finances; equitable and lmpartial In the administration of justlce; knowing well how to give prosperity tothe arts, agriculture, and commerce; beloved by the pcopie who obeyed it, willst it made the nobles who partook ita power tremble. The Venetlan aristocracy completed its constitutlon, In 1311, by the creatlon of the Councll of Tcn, which, notwlthstanding lts nanie, was composed of 16 members and the doge. Ten counsellors of the black robe were annuaily elected by the great councll, In the months of August and September; and of the six counseliors of the red robe, composing a part of the signoria, three entere' oftice every four months. The Councii of ien, charged to guard the security of the state with a power higher than the law, had on especlal commisslon to watrhover the nobies, and to punish their crimes asminst the republic. In this tbey were restrnlned by no rule: they were, with respect to the nobility, the deposituries of the power of the great council, or rather of a power undimited, which no people should Intrist to any government. Some other decrees completed the system of the 'serrita dei maggior consigllo.' It was forbid(iln to tbe quarantia to introduce any 'new man' lutu power. In 1315, a register was opened. cullet the Golden Book, in which were inscribed the mames of all those who had sat lu the great coumeit. In 1310 , ali limitation of number was suppressed; aud, from tbat period, it sutficed to prove that a person was the descendant of a counsellor, and 25 years of age, to le by right a member of the grand council of Venice "-J. A. D. 1099.1801,-The first Crusade.-"The movement of the crisades hrings Venlce to the very forefront of European hlatory. Her prevlous devclopment had been slowiy preparing the Way for her emergence. This Couucll, held at Clermunt in 1093, resolvel that the armament should leave Europe early in the following year. The Pope and the leaders of the Crusadea were obliged to turn their attention to the question of transport for the vast and amorphous mob, whlch, without discipline, with an distinction of ranks, with no discrimination hetween soldicr and monk, between merchant and peasant, between master and man, was now hent on reachlng the Holy Land, almost as eager to dle there as to achleve the object of thelr mission, the recovery of the Bepulchre. The three maritlme states of Italy - Genoa, Pisa, and Venlce - were each ready to offer thelr services. Each was jealous of the other, and cach determined to prevent the other from reaplng any slgnal cominerclal ad. vantage from the rellgious enthusiasm of Europe. Venlce was not only the most powerful, Wut also the most eastern, of tho three competlors. It was naturnl that the choico should fall on lier. When the l'upe's invitation to asslst In the Crusade reached the clty, however, It seems that the Government did not at once em. brace the cause offlially ln the name of the whole Repubilc. There was, at first, a tendency to leave the business of transport to private enterprise. But on rccelpt of the news that Jeru. salem had fallen, the Veinethn Government began to take actlve steps in the matter. . . . The Crusade was accepted with enthusiasm. The whole city engaged ln preparing a tleet which should Le worthy of the Republle. Then, after a solcmn mass ln S. Mark's, at which the standird of the Cross and the standard of the Republic were presented to the leaders, the soidiers of the Cross embarked on the fleet whlch uumbered 200 ships, and set sall down the Adri. atic, making for Rhodes, where they were to wiuter. At Rhodes two lncldents of great slgnifleance ln Venetlan hlstory took place. The Enstern Emperors hall never viewed wlth favour the incursion of the Crusaders. The creatlon of the kingdom of Jerusalem was really a usurpation of Imperial territory. Alexlus I. now endeavoured to persuade the Venctlans to withdraw from the enterprlse. In thls he falied: Venice remalned true to the Cross, and to ber commerclal Interests. It Is at this polnt that we Gud the beginnings of that divergence between Constantinople aud the Repuhlic, which eventually deciared ltself In open hostlilty, and led up to the sack of ConstantInople In the fourth Cru-

A. D. s137-1898.-Beginning of quarrels Fith the Byzantine Empire.-" Previous to thls time [about 1127], the Venetian repuhilic had generally been a firm ally of the Byazatline empirc, aud, to a certain degree, it was consid. ered as owing homage to the Emperor of Conatantinople. That connectlon was now diseol ved, and thone disputes commenced which soon occupied a prominent pince in the history of Eartern Europe. The esta'sishment of the Crusaders in Palestine had opened a new field for the commercial enterprise of the Venetians, and in a great measure changed the direction of thelr maritlme trade; while the frequent quarrels of the Greeks and Franks compelied the trading repuhlice of Italy to attach themselven to one of the belilgerent parties, in order to secure a preference in its ports. For a short tlme, hablt kept the Venetians attached to the empire; hut they soon fousd that thelr interest were more closely connected with the Syrlan trade than with that of Constantinopie. They joined the klngs of Jerusalem in extending their conquests, and obtained conaiderahle establishmenta in ali the maritime cities of the kingdom. From having been the customers and aliles of the Greeks, they became their rivals and enemies. The commerclal fleets of the age acted too often llike pirates; and it is not improbahle that the Emperor John had good reason to complain of the aggressions of the Venetians. Hostilities commenced; the Doge Dominico Mlchiell, one of the heroes of the repuhifc, conducted a nu. merous tleet into the Archipelago, and piun. dered the isiands of Rhodes and Chios, where he wintercd. Next year he continued his depredations in Samos, Ditylene, Paros, and Aadros.

Peace was re-estahlished by the emperor reinstating the Venetians in the enjoyment of all the commercial privileges they had enjoyed before the war hroke out. "-G. Finiay, Hivt. of the Byzantine and Greek ETmpires, bk. 8, ch. 2, sect. 2.
A. D. 1177.-Pretended Papal Grant of the sovereignty of the Adriatic.-Douhtful story of the humiliation of Fredericla Barharossan A " notable epoch in early Venetian history is the grant on which she hased her ciaim to the covereignty of the Adriatic. In the course of the flerce struggie between Alezander III. and Fredcrick Barbarusga [see ITaly: A. D. 11it-1183], the Pope, when his fortunes were at the low. eat, took refuge with the Venetians, who, after - vaín eflort at reconciliation, made common
cause with him, and in a naval encounter of talsed so algaal a Fictory that the Emperor we compelled to sue for peace and aubmit to th moat humillating terms. The crowning scene o his degradatlon has been readered famillar b the pencll, the chlsel, and the pen.

Pope, with a freah preasure of his heel. . Slamondi (following a contemporars chronicler מarrates the interview without any circumatance of insult, and describes it as concluding with the kles of peace. There are writers who contend that A:exander was never at Venice, and that the Venctians ohtained no victory on his behalf. But the weight of evidence acuduced by Dare striken us to be quite conclunive in favour of h! veraion. . . In return for the good offices of Venice on this occasion . . . Alexander presented the relgning Doge, Ziani, with a ring, saying - Recelve this ring, and with it, as my donation, the dominlon of the sea, which you, and your succemsors, shall annually assert on an appolnted day, so that all posterity may understand that the possesaion of the sea was yours hy right of victory, and that It is suhject to the rule of the Venetian Repuhilc, as wife to husband. The well-known ceremony of weddling the Adri atlc, religiously observed with all lit original pomp and splendour during aly centurics, wat is fsell proclamation and a challenge to the world. It was regularly attended hy the papal nuncio and the whole of the diplomatic corps, who, year after yeur, witnessed the dropping of a sanctifled ring into the sea, and heard without a protest the prescriptive accompaniment: 'De. sponsamus te, mare, in signum veri perpetuique domini' (we espouse thee, sea, in sign of true and perpetual dominion)."-The Republic of Venice (Quart. A. D. 1201.-Cause of Hostility to Constantinople. -" Of late Fears the Venetians had had difficulties with the New Rome.

These dif: culties arose, in great measure, from the fact that the influence of Venice in Constantinople was no longer sufficient to exclude that of the other Italian repuhiics onstantinople reached its . But the hostility to lans learnop reached its height when the Venened that Alexis had, in May 1201, re. ting with Ottoby from Genoa, and was negou ating with Ottobono della Croce, its leader, for the concession of privilieges for trsde in Romania which Venice had hitherto regarded as exclusively her own. From this time the Doge appears to have determined to avenge the wrongs of his state on the ruler who had vensured to favour his rivale."-E. Peart, The Phan of Oonstantinople, ch. 8.

Which had kept them s whlle employed, now at as end, they next tried their fortune in Romagna, and endeavoured, availligg themselves of the quarrels between the returning nohles and Cear [Borgia, son of Pope Alexander VI.], to become, if not the sole, at all evente the most powerful, vassals of the papal chsir. ...The Venetians prepared to espouse the cause of those whom Cesar had suppressed. The cities reflected how genuine and suhstantial that peace was that the lion of Venice spread over all its dependen. cies. Having appeared in this country at the end of October, 1503, and laving first promised the Malatest other possessions in their own country, they took Rimini, with the concurrence of the prince and citlzens. Without ado they atticked Faenza. . . . They contlnued their conqueats, and, in the territorles of Imola, Cesena, and Forli, took stronghold after stronghold. Then it was that the first minister of France stated his bellef that, 'had tley only Romagna, they would forthwith attack Florence, on account of a debt of 180,000 guilders owing them.' If they were to rake an inroad into Tuscany, Pisa would fall immediately on thelr arrival. Their object in cnlliog the French into the Milanese territory was, that they considered them more fitted to make a conquest than to keep it; and, in the year 1504, they were negotiating how it were posslble to wrest Milan again from them. Could they only succeed in this, nothing in Italy wonld be nble longer to wlthsto 'm. 'They wanted,' as Macchiavelli said, : Pope their chaplain.' 15-17th Centuries. -The decline of Venetian commerce and its canses. - "Commerce was for a long time free at Vcuiee; and the republic only began to deeline when its goverument had cansed the sonrce of its prosperity to be ex. hausteci by mooopoly. At first all the yonng patricians were subjected to the most severe ordeals of a coammercial trainlog. They wro often scut as uovices on board state-vessels to try fortune with it light veuture, so much dhif it enter into the views of the administrathon to drect all citizens toward industrial occupathons? The only reprouch that eau be brought agalast the Venetians, is the effort to exclude foreigners from all competition with them. Althongh eoarmercial jcalousy lad not yet erected prolibitions Into a system, and the ports of the repiblie were open to all the merchandise of the worhi, yet the Venetians ouly permitted its transportation In their own ships; and they reigned as alosolute masters over all the Moritermatesu. Wiar had given them security from the Pisans, the Siclllans and the Genoesc. Spain, loug occupied by the

Moors, gave them little occasion of offence.
France disdained commerce; England had not Fet begun to think of it; the republic of Hiol. land was not in existence. Under cover of the right of so rereignty on the gulf, which she hisd srrogated to herael, Venlce reserved the almost exclusive right to navigate. Armed flotillas gunrded the mouths of all her rivers, and allowed no barque to enter or depart without being vigorously examined. But what protited that jealous solicitude for the interests of her arapatlon? A day came when the Portuguese discovered the Cape of Good Hope, ant all that structure of precautions and mistrust suddeoly fell to pieces. Here begin the first wars of customs duties, and political economy recelves from levelled nll obstacles, but for themselves alooe, and to the exclusion of other nntions. Their tegislation was very strict in respect to foreigners, in the matter of commerce. The laws forhade a merchant who was not a suhject of the repuhlic to be even received on bourd a vessel of the state. Foreigners paid customs-dutles twice as high as nntives. They could neither build nor huy vessels in Venetian ports. The shlps, the captains, the owuers, must nll be Veuctian. Every allance between natives and strangera was interdicted; there was no protectho, no privlleges and no henefits save for Venctinos:
the litter, however, all had the same rifhts. In Fhe litter, however, all had the same rights, In Venlee itself, nud there nlone, was it permitted to negotiate whth the Germans, Bohemians ath
Hungarians. As national manufactures arequird importance, the government departed from the llberal poliey lt had hitherto pursucd, and the manufacturers obtained an absolute prohibitino of such foreign merciandise as they produced. In vain, in the 17th century, did decliuing cum. nierce urge the redstabllshment of former fiberties and tho freetiom of the port: the atteopt was made for a hrief moment, hut the spirit of restriction won the day, nal the prohibitory regline early prepared the way for the death of the repultie. The prople of Italy, however, pardoned the Venetians for their eommercial intolerance, becanse of the moderate price at which they delivered all commorlities. The Jews, Armenhus, Greeks and Gerunns flocked to Venice and engaged with safety in spreula. tlons, which were always advantagrous, because of the security whidh the credit institutions gave and the recoguized probity of the merchants. But soon Tenlee saw numerons mann. factures spring up in Europe rivaling her own, and her comarerec eacountercol most formidable competitlon in that of the Portnguese, Hutch, Spanish and Englisli. The discovery of the Cape of Good Hope [see Poutcoal: d. I) 1463-1498] took nway from lier the mouopoly of the spices of the ladies. The taklug of constantinople, by Mahomet IH, had alremdy de prived her of the mugnifleent privileges which luer subjects enjoyed in that ricll capltai of the Orient. But the dlscovery of America and the vigorous reprisals of Charles V, who. at the eonmencement of his reign, in 1517, doubled the castoms-duties which the Venetians paid in ins states, completed the rula of that fortunate monojoly which had made all Europe (ributary. Charles folsed the lmport and export dutics on all Venctan merchandise to wenty por crot; and thls tarlff, which would to dny appear mod.

A. D. 1508-2509.-The League of Cambrai. -The republic despoiled of her continental provinces. - "The craving appetite of Louls XII., . . sharpened by the loss of Naples, sought to indemnlfy itself hy more ample acquisitions in the north. As fnr baek as 1504 [see Italy: A. D. 1504-1506], he had arranged a plan with the emperor for tie partition of the conthentni possessions of Venice. . . . The scheme is sald to have heen eommunieated to Feriinaud [of Aragon] in the royal interview at Savona [1507]. No Immedlate netion foilowed, sud it seems prohabie that the latter monareh, with his usual eirenmspection, reserved hls decision untli he should be more efeariy satisfled of the ndvantages to himself. At length the projected partition wns diefinitely settled hy the celehrated treaty of Campray, Deecmber 10th, 1508, hetween Louls XII. nud the emperor Maximilian, In which the Pope, King Fcrillnand, and nll princes who had any claims for spoliations by the Venetians, were invited to take part. The share of the spoil nsslgned to the Catholle momareh [Ferdinamd] was the five Neapolitan eittes, Trani, Brimdisi, Gallipoli, Pulignamo, and Otrmito, pleciged to Veuice for consiterahie sums advanced hy her during the iste war. The Spanish conrt, and, not long after, Julius II., ratified the treaty, althongin it was In direet contravention of the avowed purpose of the pontiff, to ehase the 'barbarinns' from Italy. It wis infs hold policy, however, to make use of them tirst for the aggrandisement of the ehurch. sud then to trist to his nugmented strength and more favorable opportmities for eracicatiug them altoget her. Never was there a projert more destinte of principic or sund poliey. There was not one of the eontracting parties who was not at that very the in ehose nllimuce with the state, the dismemberment of wheh he was plotting As a matter of polieg, it weut to break down the primeipat barrier on which ench of these powers could reiy for keeplng In cheek the overweening mbition of its neigiloors, and malntalning the balance of Itaty. The aiarm of Venice wis quicitell for n time hy assurances from the conrts of Frince und Spain that the lcagne was direeted solety agaiust the Turks, aecompanied by the most hyporritieal professlons of good wiil, and smicahle offers to the repuhlie. Tbe preamble of the treaty deelares that, lt heing tho inteution of the allies to support the pape in a crusato fralnst the Infidel, they first proposed to recover from Venice the territorles of whieh she had despolied the chureh and other powers, to the
manifest hindrance of these plous designs.
The true reasons for the confederaey are to be found In a speech delivered at the German diet, some time after, hy the French minister Hélian. 'We,' 1 remarks, nfter enumerating various enormittes of the repubile, ' wear no tine purple; feast from no sumptuous serviees of plate; bave no coffers overflow!ng with gold. We are harharians. S'urely,' he contluues in another place - if It Is derogatory to prinees to net the part of merchants, It is unhecoming in merehants to as sumas the state of princes.' Thls, then, was the irne tey it the eonspiracy agninst Venlee; envy of 'her fall rior weaith and magniflcence, hatred engendel at hy her too arrogant bearing, and listiy th: evll eye with whieh kings naturally rezard de movemints of an aetive, asplring reBbic To seeure the eo-operation of Florenee, ihe kisigs of France and Spain agreed to withdraw thelr proteetion from Pisa, for a stipuiated sum of money [see Pisa: A. D. 1404-1509]. There is nothing in the whole history of the merehant princes of Venlee so mereenary and hase as this bartering away for gold the independence for whieh this fittle republic had heen во nobly contending for more than 14 years. Early in April, 1500, Louis XII. erossed the Alps at the heal of a foree whteh hore down all opposlthon. City and castle fell before him, and his demeanor to the vanquisited, over whom he ind no rights heyond the ordinary ones of war, was that of an meensed inaster taking vengeanee on his rebellious vnssals. In revenge for his detention before Peschiera, he iung the Venctian governor and hls son from the lattiements. Thls was an outrage on the laws of eiivatry, which, however bard they bore on the peasant, respected those of higid degree.

On the 14th of May. 1509, was fought the boody battle of Agnadel, wilieh hroke the power of Venice and at onee lechled the fate of the war. Ferdinand had contrlbuted uothing to these operations, except ly his diversion on the site of Naptes, where he possessed himself withont dilfienty of the eities allotted to his share. They were the eheapest, nnd, if not the inost valuable, were the most permanent acquisitions of the war, being reincorposated in the monarchy of Naples. Then followed the inemorable decree by whieh Venice released her eontinental provinces from their aliegiance, anthorizing them to provide in nny why they contll for their safety; in measuro which, whether originating la panie or policy, was perfectly consomant with the latter. Tho confelcrates, who hadi remained united during the chase, soon quarrelled over the diivision of the spoil. Ancient jealousies revived. The republic, with cool and consummate rolicy, availed herself of thls state of feeling. Pope Jutius, who had gained all that he had proposed, nad whs satistied with the humiliation of Venice, now fett alf his former antipathies and dis. trust of the French return in fuli Poree. The rising thame was dilligently fanneal by the artfuI emissarles of the republic, who at length effeeted a rcconeiliation on her beinalf with the haughty pontif. The I'one, whose quarrels with the Republic were the chicf canse of the creatlon of the otilce of Theological Counseilor, and of Frit Paolo's clection to it, was I anil V. Strined relations . . . [had] existed between Fende and the Vatican during the last years of Clement VIIl.'s l'ontlicate. Ills seizure of the buthe of Ferrura, his conduct in the matter of the l'itriareh Zane's appointurent, hls uttempt to cripple the book-trade of Venice by means of the index Expurgatorins, ali ied to strious disputes. In every one of which he got the worst of it. Pope Paul V., who was then Cardinal Borghese, chafed at what he considered Clcment's pusilhunimity. Taiking of these matters to the Venetlan ambassador at Rome, Leonardo 1) avato, he once suid, 'If I were l’ope, I would phee Venice under an interdict and excommunt-cati-u:' 'And If I were Dogn, was the reply, 'I would trample your luterdict and excommunication under foot. Curionsly enough, both were cailed upon to fill these oftices, and both
proved as good as their words. . . . Paul $V$. found several excuses for quarrel. The Patriarch, Matteo Zane - he whose appointment had been n matter of dispute with Clement VIII. -dled, and tho Senate appointed Francesco Vendramin ns his successor. Pope Paul claimed the right of prescntation, and ciemanded that he should be sent to Rome for examination and approval. The Senute repiled by ordering his investiture, and forbidding lilm to leave Venice. Again, money had to be raised in Brescia for tho restoratlon of the ramparts, und the Senate im posed a tax on all the cltlzens-laymen and eccieslastics alike. Pope Panl V. claimed exemption for the latter, ns belng Ils subjects. The Senate refused to llsten to him.

These Ilfferences were causing both the Pope and the Repubile to look to their armoury and to try the temper of their weapons, when two more serious matters ocenrred which brought them into epen warfare. The prologue was passed, the drama was about to open. First, two priests in high position were leading flagrantly wlcked and criminnl lives. . . . The Senate sent its oflicers, and had tho offenders selzed and? brought to Venlce, and locked up from further mlschief in the dungeons of the Ducal Paiace. Pope Paul V. angrily remonstrated, and peremptorily dc. manded their instant liberatlon, on the ground that being priests they were not ameuable to the secular arm.

Secondly, two ecelesiastical property laws were in force throughout the Re. publle; by one the Church was prohlbited from buiding any new monnsterles, consents, or chmrehes without the consent of the Government uuder penalty of forfciture; aud by the other It was disqualified from retaining property which it might become possessed of by donation or by lnheritance, but was bound to turn it into money. . . Pope laul V. . . . demanded the repeal of these property laws. These two demands, regarding the imprisoned ecciesiastics and the property laws, were tirst put forward in Octoher, 1005. . . . Faily In December, the Pope, impatient to bring the quarred to a heal, threatened to place Venice maler interdlet and excommmication if it did not yleld to hls demands. . . . It was at this acutc stage of the guarrel that the Irepublic lald hold of Fra Panio Sirpl, and, as we hive already noted, made him its Theolngienl Counsclior, and the struggie firmevforth herime, to a large extent, a duel betwern 'linul the Popre, and laul the Friar.' On the very day that I'ra Paolo accepted this ollee he informed the senate that two courses of action were open to them. They eould argue the case either de jure or de facto. First, de jure, that is, they couid njpeal ngainst the julgment of the Pope to a Church Conncil.
Sucoudly, the IRepublic could adopt the de fneto course; that is, it could rely on its own authority and strength. It cound set thesc over against the Pope's, and whilst willing to arguc out the matter in a splrit of reason with lim, yet meet hls force with opposing force. If he turned a deaf ear to right, there was no help for it but to make it a qucstion of might. The de facto conrse was therefore the onc Fra Paolo recom. mended; adding vers significantly, "llc who apieals to a Coundil admita that the righteousness of his cause may be questioned, whereas that of Venice is indisputalle.' The Scaste hailed the advice thus given, and instructed him

VERMONT: A. D. ${ }^{1749-1774}$,-Beginning of settlement. - The New Hampshire Grants and the conflict with New York, - Ethan Allen and the Green Mountain Boys."Among the cnuses of the controversics which existed between the colonies In carly tines, and continued down to the revolntion, was the uncertainty of boundary lines as deschibed In the oll charters.

A diniculty of this kind arose betwern the colony of New York and those of Counceticut, Massachusetts, nnd New IIanpshire. By dee grant of King Charles II. to his hrother, the Duke of Fork, the tract of country called New York was bounded on the east by Connecticut lifer, tius conflicting with the express letter of the Massachusetts and Connecticut charters, which extended those colonics westward to t'se Sonth Sea, or Pacitic Ocean. After a long coatroversy, kept up nt times with a good deal of heat on beth sides, the lime of thivision between these colonies wes fixed by mutual agreement at 20 miles cast of Liudson's IKlver, run.

The Jlassachusett boundary wis decided nuch later to be a continuation of the Connectlcut line to the north, making the western limit of Massa. chusetts also 20 miley from the same river.
Aleantlme New Hampsilire had never be brought lnio the controversy, because the lands to the wesiward of that province beyond (rnnecticut River had been geither settleil nor surveyed. There was Indeed a small settlement st Fort Dummer on the westeru margin of the Ikiver, which was under the protectlon of Das. suchusetts.

Such was the state of thiags when Benning Wentworth became governor of New IIampshire, with authorlty from the Kiag to lssue patents for unimproved lands within the limits of his province. Application wss matie for granta to the west of Connectlcut River, and even beyond the Green Mountalns, sad ln 1849 he gave a patent for a townshlp 6 mlles square, near the north west angle of Massacimsetts, to be so jaid out, that lis western limit shouid be 20 mlles from the Hudson, and colnclde with. the houndary llne of Connecticut and Massaciusetts continued northward. Thla townshlp was caited Benuington. Although the gevernor and councll of New York remonstrated agalnst this grant, and clalmed for that colony the whole territory north of Massachusetts as far eastward as Connecticut IRirer, Fet Governor Wentworth wiss not deterred hy this remonstrance from lesuing other patents, urging ln hls justlficetion, thst New Ilampshire had a right to the same exten. slon west ward as Msssachusetts and Connectlcht." After the Brltish conquest of Cunads, 1760, "appllcatlons for new patents thronged daily upon Governor Wentworth, and within four years' tlme the whole number of townshlps granted hy hlm, to the west ward of Conaecticut Hiver, was 138. The territory Includlag these townshlps was known hy the name of the New Ilampshire Grants, whlch lt retalned till the opening of the revolution, when lts present name of Vermont hegan to be adopted."-J. Sjarks, life of Ethan Allen (Library of Am. He nlso sent a proctsms. tlon among the people, declaring the Connectirut rlver to be tho boundary between New Iork nod New IIampshire. But protesta and procla. mations were alike unheeded hy the governor and the people untli the year 1764 , when the matter was faid before the Klng and coun 1 for adjudication. The declsion was ln favor of New Vork. Wentworth immediately bowed to supreme authority, and ceased lssuing patents for lands west ward of the Connectlcut. The settlers, considering all questions In dlspute to he tinus finally disposed of, were contented, and went on hopefully $\ln$ the improvement of their lands. Anlong these settlers in the Benulngton townsbip were members of the Allen family, In Connecticut, two of whom, Ethan and Ira, were consplcuous in publlc affairs for many years, as we ghall hereafter have occaslon to observe. A. D. 1781 .-Negotiations with the British authorities as an independent State.-Vermont had repeatediy applled for admisslon Into the Culon; hut the opposltion of her nelghbors, who elaimed her territory, and the jealousy of the southern states, who objected to the admalssion of another northern state, preveuted favorable uetion In Congress. In 1780 a fresh appeal was inade with a declaration that if it failed the people of the Gruen Mountains would propose to the other New Eugland states and to New York, "an aliiance and confederation for nuntual defense, lndepeudent of Congress and of the other states." If nelticer Congress uor the northern states would listen to them, then, sald the memoriai, " they are, If uceessitaterl to lt, at ilberty to offer or aceept terms of eessation of hostilitles with Great Britain without the approbation of any other man or body of men." "The British generals ln America had for some thme enter. taiaed hopes of turaing the disputes in relation to Vermont to their own account, by detaehing that district from the American eause aud mak. Ing it a Brltish province. But the first Intimatlon of thelr vicws and wishes wns communicated ln a letter from Colonei IBeveriy Izobinson to Ethan Allen; datel New York, Mareiı 30th, 1780. In July, this let.er was delivered to Niten ln the street ia Arlington, by a Britlsh sohller In the habit of all Alueriean farmer. Robinsou, not recelving a reply to his letter and supposing it to have been misearrled. wrote again to Allen on the 2d of February, 1781, enelosing his former letter. In his secoad letter, after saylng he had receired new ussuranees of the Inellnation of Fermont to join the klag's cause, he said that he conld then write with more authority, and assured Allen that ise and the people of Vermont conid obtain the most favorable terms, provided they would take a declsive and active part In favor of Great Britain. Ile then procceded to justify the conduct of Vermont in as. serting her right to independence, and expressed his determinate resolition to dio every thing in hls power to establish it. $\qquad$ 'I am confident,' said he, 'that Congress will not dispute my aincere attachment to the eause of my country, though I do not healtate to say, I am fully gronnded in opinion, that Vermont has an in Subitable right to agree on terms of a cessation of hostlllies with Great Britain, provided the Cnited States persist in rejecting her application for an lom win wh them.'... During the spring of 1780 , sume of the scontling parties beionging to Vermont hal been taken by the British anil carrled prisoners to C'anada. On the application of their friends to Governor Chittenden, be, in the month of July, sent a flag with a letter to the commaniling officer in Canada, requestlug their relense or exchnnge. In the fall, the Britlsh cance up lake Champlain In great force, and a very favorable answer was returned by General Hidimand to Governor Chlttenden's letter. A flag was at the same time sent to Ethan Alien, then $n$ brigadier general und commanding offleer In Vermont, proposing a cessatlon of hostilities with Vermont, dhring negothations for the exchange of prisoners. " $\mathbf{- Z}$. Thompson, Fiat, of the State of Vermont, ch. 4, sect. 6.-"The immediate resuits were a truce, which eovered not only Vermont but the frontlers of New York to IIud. son rlver; the disbunding of the millia of Vernont; and the retlring of the Britlsh troops to winter quarters ln Cunada. Entil the truce became generally known, the resuits of it oceasioned much shrprlse in New York. It was further agreed, that the commissioners of hoth partles shoull meet on the sninject of the cartel, nud go together to Canada. This was nttempted, but failed on aceount of the difficulty of getting through the lee on Lake Cbamplain. After con. tending several days with the elements, the eommissioners separateif; hut 'while thelr men [wrote Ira Allen] were breaking through the iee. much polltical conversation and exhibits of papers took place.' Williams ['Ilist. of Ver. mont'] is more defintte: 'the Britlsh agents availed themseives of this opportunlty to expiain their views, to make their proposals, and offer as complete an estahlishment for Vermont, from the roval anthority, as should be desired. The commissioners from Vermont treated the propasals with affability and good humor, and though they arolded bringlag anything to a decision, the British concluded they were in a fair way to effect their purposes.' The subsequent negotlations at Isle aux Noix, betweea Ira Allen and the British commissioners, as to matters beFond settling a cartei, werc secret, and even the commander of the post had no knowledge of them, althongh he was associated with the Brit. ish commission rix on the questiou of nn exchange of prisoners. These facts show that the public had no knowledge except of a truce for a humane and proper attempt to melkce citizens of Vermont, and its affeens and soldiers, who were then prisoners $\ln$ Canada; and the conclusion is that all the suspicion that then existed of the patriot-ism and fldeity of the great body of the peopie of the state, and aii the ohioquy since drawn from the negotiation with IIadimand and cant upon the state, were entirely unjust. If any body was realiy at fauit, the aumber implicated
was very small. Wililams asserted that celght persons oniy in Vermont, were in the seeret of thls correspondence; 'and Ira Allen that, in Alay, 1781, 'only elght persons were in the secret, but more wero dided as the circumstances re-quired.'"-Vt. VIENNA, The Congress of.-"At the end of September [1814] the centre of European in. terest passed to Vienna. The great councll of the Powers, $s 0$ long delayed, was at length assembled. The Czar of Russia, the King of Prussia, Denmark, Bavaria, nnd Wurtemberg, and nearly all the statesmen of eminence in Europe, gathered round the Emperor Francls and his Minister, Metternich, to whom hy comrion consent the presidency of the Congress was offered. Lord Castlereagh represented England, and Talieyrand France. Rasumoffsky and other Russian diplomatists acted under the immediato directions of their master, who on some occasions even entered into personal correspondence with the Ninisters of the other Powers. Hardenberg stood in a some what freer relation to King Fred. erick William: Stein was present, but without official place. The subordinate envoys and attachés of the greater Courts, added to a host of petty princes and the representatives who came Irom the minor Powers, or from communitien which had ceased to possess any political exis. tence at ali, crowded Vienna. In order to relieve the antagonisms wiich had aiready come too clearly into view, Metternich determined to entertain his visitors in the most magnificent fasbion; and aithough the Austrian State was bankrupt, and in some districts the peopie were severciy suffering, a sum of about $£ 10,000$ a day was for some tine devoted to this purpose. The spiendour and the gnieties of Metternich were emulated hy his guests. $\qquad$ Tise Congress had need of its distractions, for the dificulties which faced it were so great tint, even after the arrival of the Sovereigns, it was found necessary to postpone the opening of the regular sittings until November. By the secret articles of the Peace of Paris, tho Allies had reserved to themselves the disposai of all vacant territory, although their conclusions required to be formaliy sanctioned by the Congress at large. The Ministers of Austria, England, Prussin, and Russia accordingly determined at the outset to decide upon ali teritorial questions among themselves, and only after their decisions were completeiy formed to subnit them to France and the other Powers. Talieyrand, on hearing of this arrangement, protested that France itself was now one of the Allies, and demanded that the whole body of European States should at once meet in open Congress. The four Courts held to their determination, and began their preliminary sittings without Taileyrand. But the French statesman had, under the form of a paradox, really stated the true political situation. The greater Powers were so deeply divided in their aims that their old bond of common interest, the interest of union against France, was now leas powerful than the impulse that made them acek the support of France against one another. Two men had come to the Congrem with a deanite aim: Alez-

ander had resolved to gain the Duchy of Wareaw, and to form lt, with or without some part of Rusalan Poland, into a Polish kingdom, attached to his own crown: Talleyrand had determined, either on the question of Poland, or on the question of Saxony, whlch arose out of lt, to hreak allied Europe into halves, and to range France hy the slde of two of the great Powers agalnst the two others. The course of events favoured for a whlle the deslgn of the Minlster: Taileyrand himseif prosecuted hls plan with an ahillty which, hut for the untimely return of Napoleon from Elha, would have left France, without a war, the arinter and the leadlng Power of Europe. Since the Rusalan victorics of 1812, the Emperor Aiexander had made no secret of his intentlon to restore a Pollsh Klngdom and a Pollsh nationallty. Llke many other deslgns of this prince, the project combined a keen desire for personsi giorification with a real generosity of feeilng. Alexarder was thoroughiy sincere ln his wish not only to make the Poies again a people, hut to give them a Pariiament and a frec Constltution. The Kling of Poiand, however, was to be no independent prince, hut Aiexander himself: although the Duchy of Warsaw, the chlef if not the sole compouent of the proposed new king. dom, had belonged to Anstria and Prussia after the last partition of Poland, and extended lnto the heart of the Prussian monarchy. Aiexander inslsted on hls anxlety to atone for tho crime of Catherine in dlamembering Poland: the atonement, however, was to be made at tive sole cost of those whom Catherine had allowed to share the booty. Among the other Governments, the Mlnlstry of Great Britain would giadiy have seen a Pollsh State estahlished in a really independent form; failing this, it desired that the Duchy of Warsaw shouid be divided, as formeriy, between Austria and Prussia. M: rnlch was anxious that the fortress of Cracow at any rate should not fall into the hande cf the Czar. Steln and Hardenberg, and even Alexsnders own Russlan counsellors, earneatiy opposed tie Czar's project, not oniy on account of the elalms of Prussia on Warsaw, but from droad of the agitation Illely to be produced hy a Polish Pariament among ail Poles outside the new State King Frederick Wllllam, however, was unaccus tomed to dispute the wlshes of hls aily; and the Czar's offer of sayony in sulstitution for Warasw gave to the Prussian Ministers, who were more in earnest than thelr master, at least the prospect of recelving a valuable equlvaient for What they mlght surrender. By the treaty of Kalisch, made when Prussia unlted lts arms with those of Russla against Napoleon (Feh. 27th 1813), the Czar had undertaken to restore the Prusslan monarchy to an extent equai to that which it had possessed in 1805 . It was known before the openlng of the Congress that the Czar proposed to do thls hy handling over to Kling Frederick Wlillam the whole of Saxony, whose Soverelgn, unilike his colleagues ln the IThenlsh Confederacy, had supported Napolcon up to his fnal overthrow at Leipzig. Slnce that tine the King of Saxong had been heid a prisoner, and his dominions had been occupled hy the Allea. The Sayon questlon had thus already geined the attention of ali the European Governments.

Tailcymand alone made the defence of the King of Sarony the very centre of His poilcy, and cubordinated all other aima to
this. His instructions, ilke those of Cantlereagh gave priority to the Polish questlon; hut Talier rand saw that Saxony, not Polend, was the iever by which he could throw haif of Europe on to the alde of France; and before the four Allled Courts had come to any slngle conclusion, the French statesman had succeeded, on what a frat passed for a subordlnate point, in hreakling up their concert. For a whlle tho Ministers of Austria, Prussla, and England appcared to bo acting in harmony; and throughout the month of October ail three endeavoured to shake the purpose of Alezander regardlng Warsaw. Tuileyrand, however foresaw that the efforts of Prussla in this directlon wouid not last very long, and he wrote to Louls XVIII. asking for hls permisalon to make a detinlte offer of armed assistance to Austria in case of need. Events took the turn which Talleyrand expected. He had lsolated Russla and Prussia, and had drawn to his own side not only England and Austria hut the whoie body of the minor Ger man States. . . . On the 8rd of January, 1815, after a rash threat of war uttered hy Harden. berg, a secret treaty was slgned hy the representatives of France, Engiand, and Austria, piedging these Powers to take the fleid, if neces. sary, agalnst Russla and Prussla ln defence of the princlples of tho Peace of Paris. The plan of the campalgn was drawn up, the number of the forces fixed. Bavaria had already armed; Piedmont, Hanover, and even the Ottoman Porte, were named as future members of the slifance. It would perhaps be unfair to the French Minister to believe that he actualiy desired to kindle a war on thls gigantic scaie. Tailerrand had not, llke Napoleon, a love for war for its own sake. His ohject was rather to raise France from lis position as a conquered and isoisted Power; to surround it with alilies. . . . The conclusion of the secret trenty of Jsnuary 3rd marked the defnite success of his pians. France was forth with admitted into the council hitherto known as that of the Four Courts, and from this time its intluence visihly affected the action of Russia and Prussia, reports of the secret treaty having reached the Czar immediately after lit slgnature. The spirit of compromlse now began to anlmate the Congress. Alexander had already won a virtual declsion in his favour on the Polish question, hut ho ahated something of his ciairs, and while galning the iion'a share of the Duchy of Warsaw, ine ultimateiy consented thst Cracow, whlch threatened the Austrian fronter, should be formed lnto an indepen tent Repuhiic, and that Prussla should recelve tha fortresses of Dantzle and Thorn on the Vistula, wlth the dis. trict iying between Thorn and the border of Silesia. This was ilttle for Alexander to aban. don; on the Saxon questlon the ailles of Taliey. rand galned most that they demanded. The Kligg of Saxony was restored to his throne, and permitted to retain Dresden and sbout haif of his domlnions. Prussia recelved the remainder. In lleu of a further expansion in Saxony, Irussla vas awarded territory on the left hank of the Rhine, which, with its recovered Westphailan provlncea, restored the monarchy to an area snd population equal to that which It had possessed In 1805. But the dominlon given to Prussia beyond the Fhine, though consldered at the lime to be a poor equivalent for the recond balf of Sazony, was in reality a gift of far greater

value. It made Prussia, in defence of its own coli, the guardian and huiwark of Germany against France. . . . It gavo to Prussia something more in common with Bavaria and the South, and qualified it, as it had not been qualified befors, for its future task of uniting Germany under its own ieadership. The Poish and Saxon difficuities, which had threatened the peace of Europe, werc virtuaily settied before the end of the month of January."-C. A. Fyfe, Hist. of Modern E'urope, o. 2, ch. 1.-"Prussia ohtained Posen with the town of Thorn in the east, and in the weat ail that had been lost hy the treaty of Tiisit, tho duchies of Juifich and Berg, the oid electoral territories of Cologne and Trier with the city of Aachen, and parta of Luzemhurg and Limburg. Russia received the whoie of the grand-duchy of Warsaw except Posen and Thorn, and Alexander fuiflied his promises to the Poles by granting them a ilberai constitution. . . . Swedisil Pomerania had been ceded hy the treaty of Kiei to Denmark, hut had long been coveted by Prussia. The Danish claims were bought off with two miliion thaiers and the duchy of Lauenhurg, hut Hanover had to be compensated for the latter hy the cession of the devotediy ioyai province of East Friesland, one of the acquisitions of Frederick the Great. Hanover, wifici now assumed the rank of a fingdom withont opposition. was also ag. grandised hy the aequisition of Hidesheim, Gosfar, and other smali districts. Austria wain naturaily one of the great gainers hy the Congress. Eastern Gaiicia was restored by Russia, and the Tyroi, Saizhurg, and the Inn district hy Bavaria. As compensation for the Netheriands, Venetia and Lomhardy became Austrian provinces. Bavaria, in return for its losses in the east, received Wurzhurg, Aschaffenburg, and its former posstasions in the P-Intinate. Long discussions took piace about the constitution to be given to Germany, and here the hopes of the national party were doomed to hitter disappoinment. .. . Finaily a Confederation was formed [see Germany: A. D. 1814-1820] which secured the sembiance of unity, hut gave ainiost complete independence to the separate states. The memhers numbered thirty-cight, and inciuded the four remaining free cities, Frankfort, ILamhurg, Labeck, and Bremen, and the kings of Denmark and the Netheriands. . . . In Itaiy the same process of restoration and subulivision was carried out. Victor Emmanuei I. recovered his kingdom of Sardinia, with the addition of Genoa as compensation for the portion of Savoy which France retained. Modena was given to a Hapsburg prince, Francis IV., son of the arehduke Ferdinand, and Beatrice the heiress of the house of Este. Tuscany was restored to Ferdinand III., a hrother of the Austrian Emperor. Charies Louis, son of the Bourbon king of Etruria, was compensated with Lucca and a promise of the succession in the duchy of Parma, which was for the time given to Napoleon'a wife, Maria Louisa. Pius VII. had aiready returned to Rome, and the Papal states now recovered their old extent. But Pius refused at frest to accept these terms because he was deprived of Avignon and the Yenaissin, and because Austrian garrisons were m accupation of Ferrara and Comacehio. Napies was left for a time in the hands of Joachim Murat, a a reward for his desertion of Napoieon after the hattic of Ieipzig. Switzeriand was
declared independent and neutral, but its feudal unity was ioosened hy a new constitution (Aug., 1815). The number of cantons were raised to twenty-two hy the addition of Geneva, Wallis (Valiais), and Neufchatel, the last under Prussian suzersinty. The position of capital was to be enjoyed in rotation hy Berne, Zurich, and Lucerne. The kingdom of the Netherlands was formed for the house of Orange hy the union of Hoiland and Beigium and the addition of Luxemhurg, which made the ling a member of the German Confederation. The professed ohject of this artificiai union of Cathoilics and Protestants was the erection of a strong hulwark against French aggressions. "-R. Lodge, Bist. of Modern Ehurope, ch. 24, Rect. 52.

The former was also calied the Virginia Company, and the iatter the North Virginla Company, as the name of Virginia was theu loosely applied to the entire Atlantic coast north of Fiorida. Of these men John Smlth has become famons. He has taken place among the fouuders of sates, and a romantlc interest has attaehed lise If to his name. For centuries hls character med deeds have been applauded, while in late years they have beeome a theme for censure and detraction. Molern investigation has relentlessly swept away the romanec, and torn $\ln$ pleees many of the long aecepted narratives in whleh Sinlth reeoriled hls own gehievements. Let lt was not wholly hy a false and fluent pen that Sinith oltalned and held hls reputation. Ile was somethlug nore than a plausible writer of fictlon. The worthy Ilehard llaklinyt sent them a paper containing inuch goorl alvice and some ingenlous geographical speeulations, and Draston celehrated their departure in elumsy verses illent with hlgh flown eompliments. The advlce of the priest and the pralse of the poet were allke wisted. . .. On the 13th of May, 1607, the settlers landed at Jsmes-town, sent out exploring partles, and began fortlifcations. A fortnight later, under the eommand of Wingfleld, they repulsed an attack hy the Indlans; and on the 22d of June Newport salied for Engiand, and left them to thelr own resourecs. The prospeet must have been a dreary one: nothlog answered to their expectations. Instead of valuahle mines, the adventurers found only a most fertile soll; lnstead of timld, trinting sonth American Indians, they encountered wild tribes of hardy, erafty, and hostile sarages; lnstead of rich, defenceless, and barbarian clities, an easy and splendld spoll, they found a wllderness, and the necesslty of hard
work. From the miserable character of the seltlers, dangerous factlons prevalled from the Arat, unill Smith ohtalned control, and maintalned some sort of order-despotlcally, perhaps, hut stlll effectually. To one would work, nad famine and the Indinas preyed upon them mereliessly. A small fort and a few wretehed huts, bullt after mueh quarrelling, represented for many months all that was accomplished. The only rellef from this dark plcture of lneompetent men perishing, without achlevement, and by their own folly, on the threshold of a great undertaking, is to be found In the eonduet of Smlth. Despite slmost Insurmountable obstaeles, Smith kept the colony together for two years. He driled the soldlers, compelled labor, repalred the fort, traded with the Indians, outwitted them and kept thelr friendshlp, and mado long and daring voysges of discovery. He falled to send home a lump of gold, hut he dld send an excellent map of the Company's territory. He did not dlscover the passage to the South Sea, hut lie explored the great hays and rivers of Virglala. He dld not find Raleigh's lost colonlsts, hut he managed to keep his own from total destruetlon. The great resuit of all Smith's efforts was the eharacter of permaueney he gave to the settlement. Because he succeeded $\ln$ malntainlng an Engllsh colony for two consecutlve years ln Amerlea, the London Company had courage to proceed; and thls is what constltutes Smith's strongest clalm to the admiration and gratitude of posterity. To suppose that he had the qualltles of a founder of a state is a mistake, although $\ln$ some mensure he did the work of one. $\qquad$ His veraelty as a hls. torian ln the later rears of his life has been wellnlgh destroyed. But llttle faith ean be placed in the 'Generall Ilistorle,' and modern lnvestigation has eonchuslvely relegated to the reglon of legend and of fietion the dramatle story of Snith's reseue hy Pocahontas. The shadow of douht reste upon all hls unsupported statemeuts; hut nothing can obscure his great services, to whleh the world owes the foundation of the flrst English eolony lu America. Iet, after all hls struggles, Smlth was severely hlamed by the Company, apparently because Virginia was not Peru. In a manly letter he sets forth the defeets of the eolony, the need of good men with families, industrious tradesmen and farmers, not ' poor gentlemen and libertines.' Before, however, the actual orders eame to supersede him, Smith resigned, or was forced ont of the government, and returned to England. Planters of the City of London for the first Colony In Virginia.' The new Ansocintion, which emhraced representatives of every rank, trade, and profenion, inciuded twenty one peers, and Its iist of names presents an imposing array of weaith and intluence. By this eharter Virginia was greatiy eniarged, and made to compriee the coant-ine and ali indands within 100 miles of $\mathrm{it},-200$ miles north and 200 south of Point Com. fort, 一with aii the territory within paraliel iines thus distant and extending to the Pacific boundary; the Company was empowered to ehoove the Supreme Coun $i$ in Engiand, and, under the inatructions and reguiations of the iast, the Gov. ernor was invested with absolute eivif and miiitary authority. . . . Thomas Weat (Lord Deiaware), the descendant of a long lino of nohie ancestry, received the appointment of Governor and Captain-Generai of Virginia. The first expedition under the second eharter, whieh was on a grander scale than any preceding it, and which consisted of nine vesseis, salied from Piymouth on the 1st of June, 1600 . Newport, tile commander of the fleet, Sir Thomas Gates, Lieuten-ant-Generai, and Sir Ceorge Somers, Admirai of Virginia, were severaiiy authorized, whichever of them might Arst arrive at Jamestown, to supersede the existing administration there until the arrivai of Lond Delaware, who was to em. hark some months iater; hut not being ahie to settle the point of preeedeney among themstives, they emhurked together in the same vessei, Wheh carried aiso the wife and daugiters of Gates. $\qquad$ On the 23d of July the feet was caught in a hurrieane; a smaii vessel was lost, others damnged, and the 'Sea Venture,' which carried Gates, Somers, and Newport, with about 150 settiers, was cast ashore on the Bermudas.

Eariy in August the 'Blessing,' Captain Archer, and three other vesseifs of the delayed feet salied up James River, and soon after the ' Diamond,' Cnptain Rateiffe, appeared, without her maiumast, and she was foliowed in a few days by the 'Swaliow,' In like condition, The Council being aii dead save Smith, he, ohtaining the sympathy of the sailors, refused to surrenier the government of the colouy; and the newiy arrived settiers eiected Franeis West, the hrother of Lord Delaware, as temporary president. The term of Smith expiring soon after, George Percy - one of the originai setticrs, a brother of tho Eari of Northumberiand, and a hrave and honor. ahie man - was eiected president. . . . Smith, about Mlichaelmas (September 29), departed for Engiand, or, as ail contemporary aceounts other thnn his own state, was sent thither 'to answer some misdemeanors.' These were doubtless of a veniui charaeter; hut the iniportant services of Smith in the sustenanee of the colony appear not to have been as highly esteemeri hy the Company as hy Smith himseif. He compiains that his several petitions for reward were disregarded, and he never returned to Virginia.

At the time of lisis departure for England he ieft at Jumestown three shlps, seven boats, a good stock of provisions, neariy 500 settiers, 20 pieces of cannon, 300 guns, with fishing-nets, working. tools, horses, cattle, swine, ete. Jamestown was strongiy fortifed with pailsades, and contained between fift aud sixty houscs. ... Nu elfurt hy tillage belng made to repienish their provis. ions, the stock was soon consumed, and the horrors of famine were added to other calamities.

The Intense sufferings of the coloniats were iong remembered, and this perlod is referred to an' the starving time.' In alx months their number wa reduced to 60 , and sueh was the extremity of these that they must soon have perished hut for apeedy succor. The passengera of the wrecked 'Sea Venture,' though mourned for as lost, had offected a safe landing at the Bermudas, where, favored hy the tropical productions of the isiands, they, under the direction of Gstes sud Somers, constructed for their deliveranee two vesseis from the materlais of the wreek and cedar-wood, the iargest of the vesseis being of 80 tons hurden. Six of the company, in-
eiuding the wife of Sir Thomas Gates, died on
the isiand the isiand. The company of 140 menami women embarked on the compieted vesseis-which were appropriateiy, named the '13utience' nud the - Deilveranee' - on the 10th of Jay, 1610, and on the 23 they ianded at Jamestown. . . . So foriorn was the condition of the settlement that Gates reiuetantiy resoived to ahandon it." The whoie coiony was accordingly embarked and was under sali down the river, when it met a fleet of three resseis, hringing supplies and new settiers from England, with Lord De:aware, who had resolved to come out in person, as Governor and Cnptain-General of Virginia. Gates audi his dishenrtened companions turned haek with these new comers, and ail were set Figorousiy at work to restore the setticment.
"The administration of Deiaware, though is. dierousiy ostentatious for so insignificant a dominion, was get highiy wholesome, and under his judicious discipline the setticment was restored to order and contentment." i is health faling, Lord Deiaware returned to Eugland the foilowing spring, whither Sir Thomas Gites had gone. Sir Thomas Daie hati aireariy been sent out with the appointment of high marsiad. bearing a eode of extraordinary laws winich pratically pinced the coiony under martial ruic. Gates returned in June, 1611, with 300 additionai settiers and a consicierahie stock of cows and other cattie. During that yenr and the next several nuw settiements were founded, ut Dutch Gap. Ilenrico, and Mermuda IIundred, indivifual grants of property began to be made, and many sligns of prosperity appeared. The year 1612 "was a marked one, iu the inaugurntion by John Rolfe [who married Pocahontas two years inter, having lost his Arst wife] of the systematle cuiture of tobaceo, - a stapie destined to exert a controiiing influence in the future welfare and progress of the coiony, and soon, hy the para. mount profit yieided by its cuiture, to subordinate all other interests, agricuiturai ns weii as manufaeturing." In tike spring of 1613, sir Thomas Gates ieft the coiony, finaily, returning to Engiand, and the government feil to the iands of Dule, who remained at the head untii 1616. IR. A. A. D. 1627-1619.-The evil days of Argali, and the better administration that followed. -Meeting of the first proviacial Assembiy."A party of greedy and unprincipled adventur. ent headed hy Lord Rich, soon after the Earl of Warwick, acquired sufficient influence in the Company to nominate a creature of their 0wn an Deputy Governor. Their choice of Argali [Samuei Argail] wouid in itself have tainted their poilicy with suspicion. Whether dealing with the Indians, the French, or the Dutch, he had shown himseif [see Carada: A. D. 1810-1618; and New York: A. D. 16101614] abie, resolute, and unscrupulous. To do him justice, he seems at icast to have understood the principie of Tiberius, that a anepherd should ahear his sheep, not flay them. His arst measure was to provide a sufficient aupply of corn for the maintenance of the colony. With that he appeared to think that his duty to the settiers was at end. . . An event soon occurred which reieased Argaii from the fear of a superior, and probably emboidened him in his evil courses. Lord Deiaware, who had sailed in a in rge vessei witin 200 emigrants," died on the voyage. "Argail now began to show that his care for the well-being of the coiony was no better than the charity of the cannibai who feeds up his prisoner before making a meai on him. Trade with the Indians was withheid from individuais, hat, instead of being turned to the beneffit of the Company, it was appropriated by Argail. The pianters were trcated as a siave-gang working for the Deputy's own private profit. The Company's cattle were soid, and the proceeds neverae. connted for. During thls time a great change had come over the Company at home. An encrgetic and pubilic-spirited party had been formed, opposed aiike to Sir Thomas Snith and to Lord Rich. Their feader was Sir Edwin Sandys, s, iember of thnt country party which wos just - inning to take its stand against the corruptions of the court poiicy. Side by side with him stood one whose name has gained a wider though not a more hononrabic repute, the foliower of Essex, tike idoi of Shakespeare, the briliiant, versatile Southampton. . . The . . . yenr 1619 was re. markahie in tie annnis of the colong. It is bardiy an exaggeration to say that it witnessed the creation of Virginia as nn independent community. From the begiuning of that year we may date the defnite ascendaucy of Saniys and hls party, an ascendaney which was maintained till the dissoiution of the Company, and during which the aftairs of Virginia were administered with a degree of cnergy, unseifishness, nnd statcsminnilikc wisiom, perhaps unparaileted in the iisistory of corporations. One of the first measures was to send out Yeardley to supersede Argail. . . When Yeardiey arrived he found that Argail had escaped. No Purther attempt seems to have been made to hring him to justice. In the next yenr the was commanding a ship sgainst the Aigerines." Soon afterwards, Sir Edwin Sandys was piacell offliaily at the liead of the Company. hy hils election to be Treasurer, in the piace of Sir Thomas Smith. "About the same time that these things were dolng in Eng. iand, a step of the greatest importance was Leing taken in Firginia. Ycardley, in obedience to instructions from the Company, summoned an Assembiy of Burgesses from the various hundreds and plantations. At ose step Virginis,
from being little better than a penal sottlement, ruled hy martial lav, became invented with Im . portant, though not fuil, rights of self-government. Though we have no direct evidence of the fact, there is every prohahility that during the administrations of Yeardiey and Argail the number of Independent planters poseesaing estates of their own, with labourers employed in the service of their masters, not of the Company, had increased. Unless such an influence had been at work, It is scarceiy possibie that the experiment of constitutional government should have succeeded, or even have been tried. On the 80th of Juiy, 1619, the first Astemhly met in the little church at Jamestown. . . . In Eng. iand the Company under its new government aet to work with an energy before unknown to it , to improve the condition of the coiony.
To chack the over-production of tohacco a clause was inserted in ail fresh patents of iand binding the hoider to cuitivate a certain quantity of other commodities. Everything was done to encourage permanent settlers rather than mere traders. Apprentices, unmarried women, and neat cattle were sent out. New forms of industry, too, were set on foot, such as timber yards, silk manufactures, iron foundries, and vineyards. . . . In the year 1619 nione over 1,200 persons were sent out, hall as private settiers or servants, haif at the expense of the Company." -J. A. Doyie, The E'nglish in Am.: Virginia, de., ch. 6.

This is the sad epoch of the introduction of negro siavery; hut the trafic would have heen checked in its infnacy had it remained with the Dutch. a hrave resiatance. But at lat Dennis contrived a stratagen which betrayed the country. IIe hal got a considerahie parcel of goode aboari, which belonged to two of the Councli, and found a method of inforning them of 1 lt . By thin means they were reduced to tho difemma, either of submitting or losing their goods. This oces. sioned factious among thein; so that at last, after the surrender of ail the other Engilah plantations, Sir Wm.was forced to suhmit to the usurper on the terma of a general pardon. Iowever, it ought to be remembered, to his praise, and to the Immortal hunor of that coiony, that it was the iast of ail the king's dominions that suhmitted to the usurpution; and afterwards the Arst that cast it off, and he never took any post or offlee under the usarper. Oilver had no moner subdued the piantations, but he began to contrive how to keep them under, that so they might never be nble for the time to come to giro him fatther troubie. To this end, he thought it necessary to break off their correspondence with sil other nations, thereby to prevent ticir heing furnlshed with srms, animmmition, and other wariko provisions. Accorrling to this design, he contrived a severe act of Pariament [1651], wherehy he prohibited tlic piantations from receiving or exporting any Eirmpean conmodities hut what sionld he carried to them by Englisis. men, and in Eugiish huit ships [see Navig.ation Act, Exglisit].

Notwithstanding this act of narlgation, the Protector never thought the pinntations enough ecured, but frequentiy changed their governors, to prevent their intriguIng with the peopie. So that, during the time of the usurpatlon, they houl no iess than three governors there, nameiy, Digigs, Beunet and Mathews. The strange arhitrary curhs he put upon the plantations execedingly aftlicted tic peopie ... and Inspired them with a desire to use the inst remedy, to relieve themseives from this iawiess usurpation. In a short thoe afterwaris a fair opportunity happened: for Governor Mathews died, and no jeerson was suhstituted to succeed him in the governinint. Whereupon the people applied themseives to Sir Wiiliam Berkeley (who had continued all this timo upon his own piantation in a private capacity) and unanimously chose him their governor again [Mareh, 1660 ]. Sir Williann . . tolid the peopie. . that if he accepted the govermment It should he upon their soiemn promise, after his example, to renture their lives and fortanes for the king, who was then in France. This was no great obstacie to them, ani therefore with an unanlinous voice they toid him they were ready 10) hazard ail for the king. . . . Sir Willian Berkeley embraced their choice, and forthwith prochamed Charies 11. king of Engiand, Scotlani, France, Ireiand and Virginin, and caased all process to be issued in his name. This his majesty was actuaily king in Virginia hefore he whis so in Engiand. But it pieased Goil to resiore him soou after to the thronc of his an-cestors."-lR. Beveriey, IIist. of Via., bk. 1, ch. 4 . -'"The goverament of Virginia, under the Commonweaith of England, was miid and just. While Cromweil's sceptre commanded the respect of the world he exhibited genernug and politic ceniency towaris the infant and loyal colony. She enjoyed during this interval free trade, iegisiative Independence and Internal pence. The gorerners were men who hy their

future. Here wae a atate of things, compriging, in the apprebenalons of the people, many of the elements of the higheat happinemeand prosperity. .. But all thla was hotaliy and suddenly changed, and univeral distrese brought upon the land, hy the new rentrictive cisutee adided to the origlasi Navigation Act, by the Arut Par. liament of Charien. By the act of the long Pariament it had been simpiy provided that for. eign veasels shouid import into England no other prollicts than such as were grown of manufactured in their own country; shaft aimed princlpaily at the Dutch. By panded Into a voluminous code of monopolizins enactmente, hy which the trade of the world was reguiated on the principie of grasping for Eagipad overy powihle commercial advantage, and inflicting $u$ on all other nations the greatest ponibie commercial injury. . . Upon the colonies, one and ail, thia cruel poilcy bore with a weight which almost crushed them. . . From 1600, when titis monopolizing policy took ite beginning, the diecontent of the peopie increased day hy day, as cach new prohihition was proclaimed. Commerce lay dead. Tohacco would no longer pay for its cuitivation, mucil irss enrieh the laborious pianter; manufactures, an that of silk, after heing attempted, failed to bring the hoped-for relicf, and there seemed no prospect hut starvation and ruin. What wonder that mischief fay brewing in the ficarts of a peoplo who, for their aimost siavish ioyalty, met oniy theme thankiess returns of injury and injustice; for the Virginisns of that day were monarchists in the fulf meaning of the tcrm.

Other causes conspired with these purely poititical onea to hring the puhific mind of Virginia into such a state of dcep exasperation as to find its relicf oniy in insurrection. Of these, one was particuinriy a source of irritation namely, the grants of vast tracts of territory, made by the wasteful and profilgate King to his needy and profigate favorites, made whoily irrespective of present owners and oceupicrs, who were transferred, ilke serfs of the soli, to any great patentee to whom the caprice of Charles chose to consign them." The discontent culininated iu 1676, under the influence of an excitement growing out of trouhie with the Indians. After more than thirty years of quite, the natives became hostile and threatening. "Various outrages were first committed hy the Indians, on whom the whites, as usuai, retailated; murder answered to nurder, burning to burning, tiii, throughout the whole horder country, were kindied the flames of an exterminating Indian war, accompanied hy ail its pecuilar horrors. In the excited state of the puliic mind, these new caiamities were laid at the door of the government." Governor Berkeiey was accused of having an Interest in the profits of tradc with the Indians which restrained him from making war on them. Whether the charge was truc or false, he gave color to it by hifs conduct. He took no steps to protect the coiony. Nor would be authorize any seif-def Ive measures on the part of the peopie thems. "s. They "went so far as to engage that, it be Governor would onif commision a general, whomsoever he would, they would 'foliow him at their own charge.' Stili they were not heard. Under such circumstances of negiect andexcessive irri-
tatlon, they took the cave into their own hande. They choo for thoir leader Nathaniel Bacon, Joung Englishman of education, energy und talent, who had been in the colony about three jearr, and who had aiready atianned a rest in the Governor's Councli. Bacon accepted the re. sponsihitity, "commimion of no commiadion," and, in the spring of 1076, put bimeeif at the head 500 men, with whom he marched agninst the Indians. The governor, after formalif prociaiming him a reiel, raised another army and marched, not againat the Indians, but againat Bacon. Ho was hardiy out of Jamentown, how. over, before the peopie of that nelghborhood rose and took possention of the capitai. On learning of thia fresh revoit, be turned hack, and found himseif beiplens to do anything lut suhmit. The resuit was the summoning of s new Assemhiy, to which Bacon was ciected from his county, and the making of come progress, appar. eutly, towardsa curing of abuses and the removing or causes of discontent. But something oc. curred-exactiy what has never been made clear -which led to a sudiden filght on Hacon's part from Jamestown, anif tite gathering of his forcen once more around him. IRe-entering the eapitai at their head, he extorted from Governor Berkeley s commisoion which legaized his military offlee, and armed with this anthorlty he proceeden once more againgt the Indians. "But as soon as he was sufficientiy distant to reifeve the Governorsand his friends from their fears, ail that hal been granted was revoked; a prociamation was issued, again denouncing Bacon as a rebel, settiog a price upon his head, and commanding his followers to disperse." Again, Bacon and bis army retraced their steps and took possemsion of Jamestown, the governor flying to Accounac 1 convention of the inhahitants of the colony ws then calied together, which adopted a Deciara. tion, or Onth, in whieh they fuliy identifled themselven with Bacon in his course, and swore to uphold him. The fatter theu moved ooce more against tie Indians; Berkeicy oncc more got possession of tin seat of government, and, oncc more, Baeon (who had fought the Indians mcantime at Bioody Run and beaten thenl) eame hack and drove him out. "The whole country was with Bacon, and $n$;' 'y a crowd of conwardiy adventurers abol: : Governor. Nothing wouid seem, at thi ment, to hsre stood between Bacon and if fute controi of the colony . diaputeci, abwo. event interpoted, as it did an unforeseen aspect of aflalrs." This unforeseen event was the sudden death of Bacon, whieh oceured in January, 1677, at the house of a friend. "'soms mystery attaches to the manner of it." and there were, of course, sinister witispers of foui play. "But, however and wherever Bacon dien, it could never be discovered where hic was huried, nor what disposition had been made of his. dy.

The death of Bacon was, in effect, the reaioration of Sir William Berkeiey to his lost asthority, and the termination of the war; there being not an individuai, among either bis counseliors or offlcers, of capacity sufficient to make good his piace. $\qquad$ Berkeiey, gradually subduing all opposition, and making prisoners of many of the prime movers of the revoit. in s short time saw the authority of his government completely reestahiisiced.

Woniford, with the secomi Virginia regiment, took posesestion of the cauneway ieading to the Great liflige, which was still held hy Dunmorn's troopa. An attempt to dlaindge the Virglalans having fallet, with loas, Dunmore abmidonell the bridge anil the town, and agaln embarked. Norfolk wan fannomellately necupied by Woolford, who wan promptis jolued by Howe's reglment from North Carolian. After a deacent on the eastern shore of Virginia [January, 1788], to whose ald marched two compantes of Maryland minute men, being re-enforced by the arrival of a Britich frigate, Dunmore bombarded Norfolk. A party landed and net is on tre.

The pare which eacaped vas presently burmed by the provincialn, so prevent it from beconing a shelter to the enemy. Thus perished, a prey to elvil war, the largent and richese of the rising towns of Vif. ghala. Dunmore cuntinued, during the whole sumimer, a predator warfare along the rivers, of whith hls navai superiority gave hion the eonmand, hurnlag hooses and plundering plantathons, from which he carried off upward of 1.000 slavea. Ife was constantly chan ing hls place to elude attack; lime watcheti, parsued, and harasned, he finally found it necessary to retire to Bt. Augustine with his allicrents abil ihls pinnder. "-H. D. 1861 (January - June). - Attempted peace-making. - The State carried into rebei-Ifon.-Separation of West Virginia, which adheres to the Union. -"Eariy in January. 1881, the Virginia Assembly met at IRichmond to determine the action of the Commonwealth In the approaching struggle. It was piain that war was coming uniess the authonties of the United States and of the seceding States wouid listen to renson; and thn first proceedings of the Assemhly looked to peacn and the restoration of fraternal union. Virginia reconmendel to aif thn States to appoint slcputles to a Peace Convention [see (Nited States of Am. : A. I. 1861 (February) Tue Peace Convention]. Thus ended in failure the first attempt of Vir. ginia to preserve the national peace; and the crisls demanded that she shouid promptly decidic upon her course. Un February 18 (1861) a Convention assembied at Klcimond, and a Committee was appointeri on Fcierai Iteiatlons. On March 10 (1861), this Committee reportedi fourteen resolutions protesting against all interference with slavery; declaring secesslon to 're a right; and defluiag the grounds on whlea the Commonwealt:. woudi feel iserself to be jastifled in exereising that right, bameiy: tise failure to ohtain guarantees; the a: ption of a warilkn poilicy by the Government ot tice United States; or the attempt to exact the payment of duties from the seceded States, or to reenforce or recap ture the Southern forts. These resolves clearly deflne tha attitude of Virginia at this critical moment. After proionged discussion, ali but the iast had passerl the Convention when iotelif. gence came that war had begun. The thunder of cannon from (Cliarleston harloor broke up the poiliticul dilscuashon. . . . Mr. IIncoln inad expressed himself in hls inaugural with perfert pialuness. Secession was uniawful, and the Unlon remalned unbroken; it was his duty to execute the laws, and he shoull perform it. To execute the laws it was necessary to have an army; and (April 15. 1861) I'residirat IAlucoin issuci his proclamation calilng for 75,000 troups from the States remaining in the Uuion. Tha direct issuc was thus presentedi, aud Virginla Was cailed upon to decide the momentous guestion whether sise would fight against the South or against the North. $\qquad$ As late as the first week In Aprif the Conrention had refused to secedie hy a vote of 80 to 45 . Virginia was conscientlousiy foilowing her nid trailtions andi woull not move. Now the time had come at last. . . . On the 17th of April. two dingsufter the Federal prociamation, the Conventlon passerl an oriluance of secession and adhesion to the Southern Confederacy, by a vote of 88 to 85 , Which was ratlited hy the people lyy a majority of 96,750 votes, out of a totai of 161,018 . ## WALDENEES.

WALDENSES, OR VAUDOIS, The. -- Let me nt the outset express my conviction thnt the whoie nttempt to nscribe to the Waliensen an earlier date than the istter half of the 12th century, to throw back thelr origin some two hundred yenrs, or sometimes much more than this, even to the times of Cimulius of Turin (d. 889), is one whith wili not stand the test of historicni criticism; whlie the endeavour to vindicate for them this remote nntiquity has intenduced infinito confusion into their whole history. The dnte of Wisdo, who, as I cannot donbt, is rightiy recognized as their founder, we certainly know. When it is songit to get rid of thefr refation to hime as emborifed in the very name Which they bear, nud to clannge this name into Vailenses, thr Men of the Valleys or the Dales. men, it is a transformation which has no iikell. hood, philologieal or historic, to recommend it. - Peter Waldo, - for we wili uot withhold from him this Christian name, nithough there is no authority for it anterior to the beginning of the 15 thi century. - was n rich chitizen and increhant if Lyons [in the later haif of the 12 th century]. Not satisferl with those scanty portions of sicrip. ture doiel out to the faity in divine services, and yearning above ali for a larger knowledge of the Gospels, he rlatained from two frienis among the priesthood a mpy of these last and of some other portions of Scripture trunsiated into the Romsnce langunge: a collection niso of sayings from the Fathers. The whole movement remained to the cnd true to this its first motive - the desire namely for a fulier acqunintauce with the Wiord of Gom. That Wori he now resolved 4 tuate the ruie of his life. . . . Ile . . . , as a tirst step, selis nill that he has, and bestows it upon the poor. In the name which he adopts for himself und for the companions whom he presently assoclates with him, the same fact of n volintary poverty, as that which ulove all they whoult ent. boody in their lives, speaks out. On this side of the Aps they are Poor Men of Lyous; on the Italian, Poor Men of Lombardy. $\qquad$ And now he and his began to preach in the streets of Lyons, to find their way into bounes, to itinerate the conntry round. Waido had no intertion herein of putting himself in opposition to the Church, of leing a ikeformer in noy other semse than St. Francis or St. Bernard wss a lieformer, a quickencr, that is, nai reviver of the Cimirch's spirituai iffe. Ilis protest was agninst praetical mischiefs, against negilgences and omissions on the part of those who should have taugit the peopic, and did not. Dectrinai protest at this time there was nonc. But for liome all forms of religious earnestness were suspicions which did not spring directiy from herseif. . . . In 1128 the Archlishop of Lyons forhale their preaching or expmuning any more. Such as ald not submit had no choice hut to quit Lyons, and hetike themseives eisewhicre. Ainithus it came to pass that not the citt, aiready so iliustrin: 18 in eeclesiastical story, where Irenuens taught and Blandins suffered, $\qquad$ but the Alpine nountains must sheiter these ontcasts, and in turn be made famous by their presence." Cathari and the whole rabble rout of Manicheans and cthers with wiom they have so often since bima confounded. $\qquad$ Enemled have sought to ornfound, that so there might be imputed to the Taldenses any evil which had been brought home to the Albigenses. $\qquad$ Friends hare sought to identify them out of the wish to recrult the scanty number of witnesses for Scriptural and Apostollcal truth in the dark ages of the Church: as certalnly it would prove no small numericai addition if the Alhigenses might be counted among shese." It seems to be certuln that the Waldenses were not apared by the erusaders who exterminated the Albigenses of southern Frauce between 1200 and 1220 . They fled before thnt sturm into the recesses of the Aps. "But they were numerous in North Italy as weil; and far more widely scattered over the whole of centrai Europe than their present dwelling place aud numbers would at all suggest. They had congregations in Florence, in \%enos, in Venice, above all in Minn; there were Waldensian communitien as far south as Calabria; they were not unknown $\ln$ Arragon; atili less $\ln 8$ witzerland; at a later day they found their way to Bohemla, and joiued hnnda with the Hussites there."-R. The rivers swelled thau unusual extent, and the army lost a great part of its baggage by the suddenness of the inundation. The French, tho, sent asslatauce to Glendower, and tesk Carmarthen Castle. Some time afterwards [A. D. 1407] the Klug's son, Menry I'riece of Waies, succeeded in taklng the castle of Aberystwith; but very somn after Owen Gleulower recovered it by. stealth. In short, the Welsh succeeded in maintaining their independence of Engiand during this whole relgn, and Owen Glendower ultimateiy got leave to dile in peace." On the accenalon of Ilenry V. (A. D. 1413), "the Welsh, who hat been so iroublesome to his father, admired his valour and clalmed him as a true grinse of Wales, romembring that he had been born at Monmouth, which place was at that tline within the principailty. They discovered that there was an anclent prophecy that

WALES, Prince of.-"When Edward 1. suldued Waies, he is sald to have prombed the people of that country a native prince who could not speak Engilsh, and taking adrantage of the fact that his queen, Eleanor, was dellvered of a chili at Carnarron Castle, in North Wales, he conferred the principailty upon his infant son Edward, who was yet unabie to speak. By the death of ble eldest hmother Alphonso, Edward became belr to the throne, to whleh he afterwards succeeded as Edward II.; but from this time forward, the princlpality has been appropriated soicily to the eldest soms of the kinge of England, who previous to this perioil had only borne the titie of 'Lord Prince.' Iu 1841, for the arst tlme, the dukedom of Saxony was lntroduced among the reputed tities of the Prince of Wales. This diguity hia lloyal IIIghness derives merely in right of his own paternal descent.

Without any new creation, and previous to his acquiring the titte of Prince of Wales, the heir-apparent of the soverelgn is Duke of Cornwall, the most anclent titie of its degree ln Eng; iand. Elward the Biack Prince. . . was created the arst Duke of Coriwal! in 1337. . . . The dukedom merges in the Crown when there is no heir apparent, and is linmediately Inberted hy the prince on his blrth, or by the aecession of lide father to the throne, as the case may be.
The earidom of Chester is ouc of the titles conferred by patent, but it was formerly a principaity. into which it had been ereeted by the 2 ist of Ikehaml II. In the reign of lienry IV. however, the aet of parliaument by which fi had been constltuted was repeaicd, and it has ever since been granted in the same pateat which confers the tlte of Prince of Wales. As the eldest sons of the kings of scotiand have enjoyed the tities of Incke of lhothsuy, Earl of Carick Bann Reufrew, aul Ilereditary Great Steward of Scotlaud, those diguities are aiso invariahiy aterbuterl th the Prince of Wales."-C. WALLOONS, The. - "in Namur, Liege. and Lorzembourg, the speech is what is called Walloon, the same word as Welsh, and derived from the German ront ' wealh,' foreigner. By this designation the Germans of the Fleminh congue denoted the Romano-Beigic population whow language was akin to the French, and Whom a hilly and impracticahle country (the forest disericta of the Ardennes) had more or less protected from their own arms. Now the Walloon is a form of the Romano-Keltic 20 peculiar and Independent that it must be of great entiquity, I. e., ald as the oldest dialect of the French, and no extension of the dialects of Lor. ralne, or Champagne, from which it difers materially. WAMPUM. -" Wampum, or wompam, ac. cordlng to Trumhuif was the name of the white beads nade from stems or inner whorls of the Pyrula Carica or Canaliculata perivinkle shells so common on all the south coast of New England. When atrung they were called wam. pon or wampom - peage or peske or peg, equivalent to 'strings of white beads, for penge means 'atrung beads.' Color was the fails of the nomenclature, ss well as of the dif. ference in value. 'Wampi' was white; 'Sack!' was black; 'Sucksuhock' was the hlact beade roade from the dark part of the poquauhock, the common quahng, Venus' mercenaria or rouud clam shell. The value of the hlack was gen. erally twice that of the white. . . . The word generally used among the Dutch who led in Introlucing the bead currency of the Indians, Bewan or Zuewand, was more general in its appilcation than wampim But whatever the difficuit Indian linguistic procens may have been, the New England men soon settled on wampum and peage as the workligg namen for

thle currency. The shell cyllnders, black or white, were about one-eighth of in inch la diameter and onequarter long. There were shorter beads usod for ornaments, but there is harily any trace of them in the currency.
The Indlans strung the beads on thres of hemp or tendons taken from the flesh of thelr foreet ment. $\qquad$ The stringe of peage were embroid. ered on atrip of deer-skin, making the ' Michoquoce, ' sirdle of belt 'of Ive lnches thlek. nease, of more, and to the volue of ten pounds aterling or more, which was worn about the Fralat or thrown over the ahoulelers like a scart. More than 10,000 beada were wrought into single belt four inchee wide These belt were In common use like the gold and jewelry of our day. They also played the same symbolle part which survives in the crown jewele and other regalla of civilized nations. Whenever the Indians made an important atatement In their frequent negotiations, ther presented a belt to prove it, to give force to their wonde - It gave to the worde the weight of hard phydeal facts and made the expreasion an em. blem of great force and aignlacance. The philologlets call this literary office, this symbolio function of wampum, an elementary mnemonic record. The eame was fulfilied hy the quippus, knotted atrings or quipu of the anclent Perup). ans.
'Thie belt preservee my worls' wasa common remark of the Iroquois Chief in council.

The Iroquois were a mighty nation, almost an inclplent state. Their only records were in thete mnemonic beal. Tradition gives to the Narragansetts the honor of Inventing these valued articlen, valuable both for use and ex. change. $\qquad$ The Long Island Indians manufactured the beads In large quantities and then Fere forced to pay them away in tribute to the Mohawks and the fiercer tribes of the interfor. Furs were readily exchanged for these trinkete, which carried a permanent value, through tha constancy of the indian deaire for them.
After the use of wampum was estahilshed in colonlal life, contracts were mide psyshle at will in wampum, beaver, or sllver. . . . The use began in New Eingland in 1627 . It was a lugal tender until 1661, and for more than three quarters of a century the wampum was curront in amall transactions."- W. B. Weerlea. Imbion Money ns a Fuetor in Neve Eing. Civilisation. The site chosen on the Potomac by hlmaelf and the comminsioners, in conformity with law [see Unstad Btates of Ax.: A. D. 1709-1792], fay a few milea to the north of Monat Vernon on the Maryjand side of the river, at the contluence of the Eastera Branch, and just below Georgetowa. The traditien goes that, while a young aurveyor scouning the nelghboring country. Washington had marked the allvantages of this apot for a great eity. . . . The entlre soli befonged in large parcels to a few plaln, easy, Maryiand farmers, who rote over to Cheorgetown for their flour and bucon. One of these only. Davld Burns, was ohatinate alout making terms; and the subsequent rise of land In the western quarter of the clty, which hils farmhouse now occupled, rendered his ilttle daughter in time the hefress of Washlngton, and contifmed his cintms to historical consideration as the most conspicuoua grantor of the National Capitai. For procuring thls choice spot on levinalf of hls country. men, the President conducted the nepotlationa in person, and the purchase of the Federal city was concluded upon just snd even generous terms. Each owner surrendered hls real estate to the United States with no restriction except tiat of retaining every alternate lot for himself. The governncent was permitted to reserve all tracts specially desired at $£ 25$ an acre, whilc the land for avenues, streets, and alleys should cost nothing. Thus the Federal Capital came to the Unlted Staten as substantialiy a free converance of half the fee of the soll in conslderation of the eulanced vaiue expected for the other half.

WHITE PENITENTS, OR WHITE COMPANIES.- - The end of the 14 th century witnesmed a profound outharat of popuiar alevo tlon. The miserabie condition of the Church, dlatracted by schiom, and the diaturbed shate of every country in Eurupe, awoke a spirit of penl. tence and rontrilion at the prospect of another great Jublife, and the opening of a new century. Ghanis of penitents wandered from place to place, ciad in whilt garments ; their faces, except
the eyen, were covered with hoods, and on their backe they wone a red croes. They walked two and two, in molemn procesalon, old and young, men and women togeher, alnging hymns of peni. tence, amongot which the and atrains of the 'Stabat Mater' held the chlef place. At tlme ther pauced and flung themselven on the ground, exclaiming 'Mercy, or 'Peace,' and continued In allent prayer. All was done with order and decorum; the procesilons genernlly insted for nine days, and the penitent durlug thls lime fated ngoroualy. The novement seems to have originated In Pruvence, but raplily apread through Italy. Enemles were reconclled, resti. tutlon was nade for wrongs, the churches were crowded wherever the penitents, or 'Blanch!' ['White Pentents," White Companles,' ' Whlte. men' are various English forms of the name] as they were called from thelr ilress, made thelr appearance. The inhabltant of one clty made a pligrimage to another and stirred up thelr de. votion. The people of Mriena went at Bologna; the Bolognese suspenderl all livalness for nine days, and walked til limoln, whence the conta. gion raplily spreal wouthwaris. For the last three monthe of 1309 this enthumasm lasterl, and wrought markel reanlts upon morals and rell. glon for a tlme. Yet enthusiasm tended to create Imposture."-M. Crelghton. tunes of the emplre.
Diring some month fer the first successes of the Tungani, the prople of Kuidja and Kashgnria remained quiet, for the prestige of China's power was stlii great. But when lt became evident to all, that eomnunleation was hopelessly cut of between the Chinese garrisons and the base of their strength in Cbina, both the Tungan element and the native population hegan to see that their masters were ill able to hold their owa against a popular rislng. This oplnlon galned ground daily, and at last the whole population rose against the Chlnese and massacred them.

But nosooner lad the Chinese been overthrown, than the victors, the Tunganl and the Tarantchis, began to quarrel with ereh otiver. Up to the month of January, 1865, the rising had been carried out in a very irregular and indetinite manner. It wns essentinlly a biind and reckiess rising, urged on by religlous antipatioy; and, success ful as lt was, lt owed all its trimmpins to the emharrissments of China. The misfortunes of the Chinese attracted the attention of all those who felt an intcrest ln the progress of events In Kashgnria. Irominent among these wns a brother of Waii Khan, Buzurg Kiban [heir of the former rulers, the exiied Khojas], who resoived to arail himself of the opportunity afforded by the civil war for making a hold attempt to regain the piace of his aneestors. Among his foliowers was Mahomed Yokoob, a Khokandian soldier of fortune, aiready known to fame in the desultory wars and feuds of whleis Central Asia had been the nrena. His prevlous eareer had marked him ont pre-eminently as a leader of men, and he now sought in Eastern Turkestin that sphere of whleh IRussinn conquests had deprired him in its Western region. There ls little to surprise us in the fnet thnt, having won his bittics, Fit koob deposed and imprisoned his master Bu. 2urg. In sereral campaigns between 1867 and $18^{* 3}$ be bent haek the Tungunl from hisconfines, and established an independent government in the vast region from the Pamir to beyond Tur: fan, and from Khoten nud the Karakoram to the Tian Shan. Ile treated on terms of dignity with the Czar, and also with the Government of India. Ile recelved Einglish envoys and Russian ambassadors, aud his paiace was filed with presents from London and St. Petershurg. Urged on by some vague ambition, lie made war upon the Tungani, when every dietate of prudence pointed to an alliance with tirm. Ile destroyed his only possible allies, nn. in destroying then he weakened himself both direct1y and ladirectly. In the nutumn of $18 \% 6 \mathrm{Ya}$. koob Beg liad indeed pusined forward so far to the cast tinat he fancied the heid Barkui nnd IImmil in his grasp; and the next spring would prohabiy have witnessed a further advanee upon these eities had not fate wiiled it otherwise. Whth the eapture of the smail viliage of Cingit. tam, in $92^{\circ} \mathrm{E}$. longitude, lakoobs triumpins closed. Thus far his eareer had beensucepssfui ; it may then be said to have reached is dimit. In the nutumn of $18 \% 6$, the arrival of $n$ Chinege army on his eastern frontier ehanged the current of his thoughts.

From November, 1876, untii March, $18 \% \%$, the Chinese generais were enguged in massing thele tronis on the northern side of the Tian Sian range.

Iakoob's prineipal object was to defend the Devan pass against the Chinese; but, whlle they uttacked it
in front, another army under General Chang Yan was approaehing from Hamll. Thus outflanked. Yakonb's army retreated preelpitateiy upon Turfnn, where he was defeated, and again a second tlme at Toksoun, west of that town. The Chinese then hnited. They had, practirally spenking, destroyed Ynkooh's powers of defence. That prince retreated to the town of Korla, Where he was elther assasslasted or polsoned eariy $\ln$ the month of Nlay. . . . Korla was occupled on the 9 th of Octoher withont reslstance; and townrds the end of the same month, Kucha, once an important clty, surrendered. The later stages of the war were marked by the eapture of the towns of Aksu, Ush Turfan, and Kashgar. Wlth the fall of the capltal, on the 17th of December, 1877, the flghting eeased. The Chinese authority was promptiy estahlished In the conntry as far south as Yarkand, and after a hrief lnterval in Khoten."-D. C. Boul. ger, Centril Asian Questions, ch. 12.

YOUNG MEN'S CHRISTIAN ASSO-CIATIONS.- Aitheugh other and carlier move. ments for the religio:is association of young um are known to have been nule. the existing wide. spread orgniniation of Young Men's Aswociations uppears to have started from work nudertak $n$ In London, Fnglind, in 1N41. by $n$ roung man named George Williaus, who went that year to London from Bridgewater, and found employ. ment in a drapery or clry gools hunse. The story is told in ut sketcit of the London Associa. tion, published in the first volame of the Exeter Hail lectures, by W. E. Shipton, from whicit the foliowing is derived: "in INA1 this young man, not yet twenty one yeurs of uge, left Bridge. water mad went to Loudion, where he obtaiued a situation as junior assistant in the dry goonds es. tabis: went of Jlessrs. IItrhcock \& ( cii. St !aul's Cburcb Yard. . . . II found among his fellow clerks a few professel followers of Christ. These be gathered, for prayer and Bible study. into one of the bed-rooms on the promises, nfter the business of the day was over One by one they lavited their carifess associates to join them. Many were converted nud the belloom soon became too smail to hold those desiring to attend. . . 'To obtain the permanent and malis. turbed use of another room, application to the principal [Mr. Iitcheock] hecrame necessary, aud this was a matter of some diftheutty. Able and energetic us a man of business, ite bad shown no sigus of religious feeling, he had done nothing to secure the comfort or welfare of bis young men, nor didl he circk the eviis which attended the conduct of busiuess iu his estahlishmut, iu common witb many others, at he time. He whs only known as the employrer, aud in that car
city, though no worse. was not better than the rest of his elass. But the young men had waited an God for Ilis direction and heip. nnd In the strength of faith they went forward with their upplication. To thelr surprise it was reecived with sympathy, with tenderness. . . The room was gmutcd, the yuung men were thanked for their past efforts and prayers on belaalf of the estabisislmeut, and the master hecame from that loour the father of his inouselold, joining with his godiy ser rauts in solicitude for its spiritual welfare, reforming every arraugement inconsistent with the conscientious discharge of the dinties or the persoual comfort of those le empicued, and in all things seking to nake that household an nboxle of peace, a patteru of goxiliness, a centre of Christian usefuiness.' 'During the periond of Mr. 1litchcock's religions unxiety, he had sougit the ndvice of Mr. W. D. Owen, tbe priucipil of anotiher large drnpery house, whose relighous character and benevolent efforts on hehalf of their trade had made lum generaily respected, and to him he describel the work of God which had hegun amongst his assistuuts. Mr. Owen mentloned the fact to his priucipal assic*-ant,' Mr. Junes Smith,' Wha inumediately ec imenced similar nectiugs for pmyer nud the st uly of the IIoly scripture nmougst their young men.' In the early stnges of this movement the iate Mr. Edward Benumont. oue of the littie bund who had been converted in the bed room meeting, wrote that one Suaday evening, in the Intter part of Mhy, 1844, le nccompanied Mr. Willinms to Surrey Chapei, and that, on the way, Mr. Willams tolu him that he was deeply impressed with the importauce of introlucing religinns services, such as they were "ujoying, into every large estublisinuent in London. This conversition restalted in a conference between a few of the Cliristian yonug men iu Mr. Ilitelicock's establislument, at the riose of one of their meetings. Ther then lecided to cali $n$ meethig of all the Christian Young urell of the house for Thurstay, June 6, ix44, to consider the importance and practicability of establishing such nn associn. tion. . . . Mr. Wulliams attendeti the meeting and. in response to lils invitation, Mr. Jame's smith was present at the mevting held in the former's befl-room, June 6, 1 N 44 . At this meeting it was decided to organize the Young Men's Cliristian Assoclation. . . Information of the organlaation of the London Association soon reachel America. ZOROASTRIANS.-MAGIANS. - PAR-SEES.-"The Iranians were in anclent times the dominant race throughout the entire tract lying between the Suliman mountsins and the Pamir steppe on the one hand, and the great Menopotamian valley on the other. ... At a time whieh it is diffleult to date, but which thu a best skilled in iranian antiquities are inclined to place before the birth of Moses, there grew up, In the region whereof we are speaking, a form of rellgion mariked by very speclal and unusual features. . . Anclent tradition assoclaces this rellgion wlth the name of Zoroaster. Zoroaster, or Zarathruatra, according to the natlve spelling, was, by one account, a Medlan kling who con. quered Babylon about B. C. 2458 . By another, whieh is more probable, and which reats, moreover, on better authority, he was a Bactrian, who, at a date not quite so remote, came forWard in the broad plain of the middle Oxus to instil into the minds of his countrymen the doctrines and precepts of a new reifigion. . . His rellgion craduaily spread from 'happy Bactra,' 'Bactra of the lofty banner,' first to the nelghbouring countries, and then to ail the numerous tribes of the Iranians, until at iast it became the established religion of the mighty empire of Persia, whieh, in the middle of the 6th century before our era, establlshed itseif on the ruins of the Assyrian and Babylonian kingdoms, and sbortiy afterwards overran and subilued the anclent monarehy of the Pharaohs. In Persia it maintained its ground, desplte the shocks of Grecian and Parihisn conquest, untll Mohammedan Intoierance drove it out at the point of the sword, and forced it to seek a refuge further east, in the peninsula of Hindustan. Here it stiii continues, in Guzerat and in Bombay, the ereed of that ingenlous and inteliigent people known to Angio-Indians-and may we not say to Englishmen generaliy ? - as Parsees [see Par. sers]. The reilgion of the Parsees is contained in a volume of some size, which has recelved the name of 'the Zendavesta.'. . Anquetll Duperron introdueed the sacred book of the Parsees to the hnowledge of Europeans under this name; and tbs word thus introduced ean scarcely be now displaced. Otherwise, 'A vesta.

Zend' might be recommended as the more proper titio. 'Aresta' means 'text,' and Zend means 'comment.' 'Avente u Zend,' or 'Text and Comment,' is the proper titlo, which is then contracted into 'Aventa-Zend.'. . Suhjected for the last afty years to the searching analyais - Arrt-rate orientalitats-Burnouf, Wentergaard, orockhaus, Spiegel, Haug, Wíndischmann, Babechmann, - thls, work has been found to belong in its varioun parts to very difierent dates, and to admit of being so dissected as to reveal to un, not only what are the tenets of the modern Parrees, hut what was the earlient form of that religion whereol theirs is the romote and degenerate descendant. Slgns of a great antiquity are found to attach to the language of certain rhythmical compositions called GAthis or hymns; and the rellgious ideas contained in these are tound to be at once harmonious, and also of a aimpler and more primitive character than those contained in the rest of the volume. From the GAthis chiefy, hut also to some oxtent from other, apparently very ancient, portions of the Zendavesta, the characteristica of the early Iranian reiigion have teen drawn out hy various meholars, particularly he Dr. Martin Haug. The most atriking fenture of the religlon, and that which is generaliy allowed to be its leading characteristic, is the assertion of Dualism. By Duallem we mean the belief in two original uncreated principles, a principle of gocd and a principle of evil. . . . Both principles were real persons, possessed of will, intellgencc, power, consclousness, and other personal quallties. To the one they gave the name of Ahura-Mazda, to the other that of Angro-Malnyus. . . . The names themselves sufficiently indicated to those who first used them the nature of the two beings. Ahura-Mazda was the 'all-bountiful, all-wise, living being' or 'spirit,' who stood at the head of all that ras good and lovely, beautiful and delightfui. Angro-Mainyus was the 'dark and gloomy intelligence' that had from the first been Aliura-Mazda's enemy, and was bent on thwarting and vexing hlm. And with these fundamentil notions agreed all that the ascred books taught concerning elther being.

The two $g$ eat beings who thus divided between them the empire of the universe were nelther of them content to be solltary. Each had called into existence a number of inferior spirits, who acknowledged thcir sovereigaty, fought on thelr side, and sought to execute thelr behests. At the head of the good spirits suhject to Ahura-Mazda stood a hand of sia dignlfled with the title of Amesha-Spentas, or 'Immortal Holy Ones.' . . . In direct antithesis to these stood the hand, likewise one of six, which formed the council and chlef support of AngroMalayus.

Besidea these leadling spirits there was marshalled on either side an innumerahle host of lesser and subordlnate ones, calicd respectively 'ahuras' and 'devas,' who constitu. ted the armies or attendants of the two great powers, and were employed hy them to work out their purposes. The leader of the angelic hosts, ur 'ahuras' was a glorlous being. cailed Sraosha or Serosh - 'the good, tall, fair Serosh,' who stood in the Zoroasirian system where Michael the Archange. stands in the Christian.

Neither Ahura.Mazda nor the Ameshaspentas were represented hy the early Iranlans under any material forms. The Zoroastrian sys-
tem was markediy anti.idoiatrous: and the utmont that was allowed the worshipper was an emhiematic representation of the Supreme Being by means of a winged circio, with which was occaslonally comhined an incomplete human agure, roh 4 and wearing a tiara. . . . The position of man in the cosmic schome was determined hy the fuct that he was among the creations of Ahurn-Mazda. Formed and placed on earth hy the Food Being, he was bound to render him impllcit obedience, and to oppose to the utmont Angro-Mainyus and hin creatures. His duties might be summed up under the four hends of plety, purity, induatry, and veracity. Plety was to be shown hy an acknowiedgmer: of Xhurs-Mazda as the One True God, hy a reverentlal regard for the Amesha-Spentas and the Izeds, or lower angels, hy the frequent offering of prayers, praises, and thanksgivings, the recitation of hymns, the cccasionai sacrifice of animale, and the performance from time to time of a curious ceremony known as that of the Haoms or Homa [see Soma. - Hao: 4]. . . . The purity required of the Iranians was inward as weli as outward. . . . The duty of veracity was inculcated perhaps more strenuously than any other. .. If it be asked what opinions were entertained hy the Zoroastrians concerning man's ultimate destiny, the rnswer would seem to be, that they were devout and earnest bellevers in the immortallty of the soul, and a conscious future existence.

The refigton of the early Iranians became corrupted after a time hy an admixture of forelgn superstltlons. The followers of Zoroaster, as they spread themselves from their original seat upon the Oxus over the regions lying south and south-west of the Caspian Bea, were hrought into contact with a form of falth considerahly different from that io wiuien they had previously been attached, yet well adapted for hlending with it. This was Magism, or the worshlp of the elements [see Magians]. The early inhabltants of Armenia, Cappadocia, and the Zagros mountaln-range, had, uader circumstances that are unknowr to us, developed this form of religlon, and had associated with its tencts a priest-caste. . . . The four elements. fire, air, earth, and water, were recognised as the only proper ohjects of haman reverence. . When the Zoroastrians cane into contact with Magism, it impressed them favourahly. The result was that, without giving up any part of thelr previous creed, the Tranians adopted and added on to it ..ll the priucipal points of the Mas' nn bellef, and all the more remarkahle of thc Magian religtous usages. This rellgious fuslon seems first to have taken place in Media. Tue Magi became a Medlan tribe, and were adopted as the priest-caste of the Median nation." This "produced an amalgam that has shown a surprising vitality, having lasted above 2,000 years - from the time of Xerxes, the son of Darius Hystaspis (B. C. $485-$ 465) to the present day."-G. Rawllnson, Religions of the Ancient World, ch. 8.-"As the doctrines of Zoroaster bear in several points such a strikligg resemhiance w those of Christianlty, it is a question of grave importance to agcertain the age $\ln$ which he lived. . . . Since there can be ao douht that . . . We must assign to Zarathustra Spitama a date prior to the Mcdlan conquest of Bahylon hy a Zoroastrian priest king, the only question remaining to be solved

## 2OROASTRTATS.

f3, whether he Itred ouly a short tume, or loag. before that event. I am inclined to belleve thit be llved ouly about 100 or 900 years before that time, and that the conquent of Bahylon was one of the lat consequences of the great rellgious enthudam kindled by blm. He preacbed, llke Moses, war and deatruction to all idolatere and wlcked men.

## . . . .

 According to this inveatigatlon we cannot acolgn to Zarnthustra Splama a later date than about 2800 B. C. Thus be llven not only before Moses, but even, perhapa, before Abraham. $\qquad$ He was the Arat prophet of truth who appeared in the world, and kindled a Are which thoumands of jeare could not entirely oxtingulah. Writinge and heligion of the Parwes.-"Prof. Darmenteter has puhlished new tranalation fof the Zend A veital with a most ably written introduction, tn which be malntalns the thenla that not a line of our A resta text is older than the tlme of Alexander's conqueat, whlle the greater part belonga to a much later date. We may briefly remind our readerit that, accordlag to the trad. thonal view, the old Zorosatrian books, whlch belong to the times of the Achernenidm, were deatroyed at the Macedonian conquest, hut that portions were preserved by the people, who retained the old falth, during the long perior of the Arancldan rule, though the Court favoured Greek civillization. . . According to this view, we stlll possens the genutne remalns of the old preAlezandrine ilterature, mutlated and corrupted during the period of Areacldan ladifference, but yet, to far as they go, a falthful representative of the eacred text of the A chem. nian time.Prof. Darmesteter, on the contrary maintains that all our texts are poit. ZOUAVES, The.- During the wart of the French in Algeria, tiere arose a body of aoldlen "who, both in the campaign in Algeria and in the conteat in the Crimes, have acquired the very
highest ronown. Th. me of the zouspee will never be forgotten an ...ug ats the atory of the tlege of gebactopol endures. . . . They ware originally Intended to be regimenta composed of Frenchmen who had nettiod in Algerk, or thels dencendanta; but the tatermixture of forelgmers in their ranke ore long bocame so considerable. that when they were trasported to the shores of the Crimen, though the majortty wero French they were mother an asgregate of the 'Duredevils' of all nations. In their ranka at Bebertopol were some that held Oxford degree, many those of Gottingen and Parls, crowds who had been rulned at the gaming-table, not a few who bad fed from justice, or sought encape from the consequences of an amorous ed renture. Yet bed thls motley crowd, composed of the most darIng and recklem of all nationa, become, th the rude sehooi of the wars in Algeris, an incompars. hle body of soldiers, second to none in the world In every millitary duty, perhapa superfor to ant In the vehemence and ruih of an ecmult.
