County Council Compelled to Adjourn Owing to Sudden Illness of Warden Garlett

Owing to the ill-health of Warden Garlett, the County Council this morning, after a brief session, decided to adjourn until Tuesday, Feb. 2nd.

Mr. Garlett went home to Beamsville last night, but sent word this morning that he would be unable to come to the city today.

The committee which will make an investigation into the Children's Aid Society, will likely make their report next week, so as to be able to report to the County Council when it meets the following week.

The County Council at their session yesterday afternoon instructed a committee appointed with reference to the complaints against the Children's Aid Society to proceed with the investigations without regard to the affiliation of the county with the city and suggest what remedies can be brought about.

The committee is composed of Councillors Richardson, Mitchell, Revelt and Haynes.

Councillors G. A. Welstead and E. W. Fry were appointed on the Board of Management of the Industrial Home.

Capt. A. H. Malcolmson addressed the council on the question of a grant to the Navy League. The matter was referred to the Finance Committee.

A delegation composed of Warden Garlett and Councillors Masters and Welstead was appointed to work on the Educational Department with reference to the resolution passed that every municipality be connected with a high school district.

WARDEN GARLETT

Reeve Charles Edward Garlett of Beamsville, the new warden of Lincoln County, has been a resident of Canada for the past thirty-five years, and he says he has found it the best country to live in under the sun. He came to Canada in 1885, the year Louis Riel was in the spotlight with his Northwest Rebelion.

Being an Englishman, and inspired by the Englishman's desire to help out in an emergency, I thought I'd run over to Canada and kill a few Indians who were fighting against the Canadian forces," said Mr. Garlett. "Unfortunately or otherwise, when I got here I found the rebellion was over. They had caught Riel."

Mr. Garlett has lived in Beamsville and vicinity for fourteen years, and since 1891 has been employed by Senator E.D. Smith. He was born in England in 1869, is an Anglican, and has a wife and two children, his son being a teller in a bank, and his daughter at home. He has had eight years' municipal experience, four in the County Council as Reeve of Beamsville, and the other four as a Beamsville Councillor. He is a kindly man, popular with his associates, and highly esteemed by all he has come in contact with.

First Presbyterian Church Has Had the Best Year in Its History, Reports Showed

The annual business meeting of the First Presbyterian Church was held last evening. Supper was served at seven o'clock by the Ladies' Aid Society to the large number of the congregation who were present.

Splendid reports were presented from all the organizations, showing a year to have been a prosperous one.

During the year a hot water heating system was installed in the Manse, on which a small balance remains unpaid. A granolithic walk was laid from the street to the Manse, greatly improving the Manse lawn.

The session reported the number on the Communion roll to be 358.

The minister's salary was increased to \$2,000, an advance of \$400.

The congregation unanimously decided to raise a fund of from \$30,000 to \$40,000, to be expended on a larger and more up-to-date Sunday School building, and some needed improvements in the church auditorium, of which \$15,000 is already pledged by twelve men. This amount will also cover the congregation's share of the Forward Movement.

The Rev. John Pringle, D.D., Moderator of the General Assembly, will be the preacher at the anniversary services, Feb. 29.

The managers reported an income of \$3388.72, with all charges for maintenance met, and \$352.73 paid for church repairs.

To Grow Seed For Commerce In Quantities

GOVERNMENT TO CO-OPERATE IN RAISING STANDARDS ON ITS OWN FARMS, SAYS A TORONTO REPORT.

TORONTO, Jan. 31.—The two-day conference of men engaged in the seed business and officials of the Dominion and Provincial Governments, which has been in progress at the Parliament buildings, has been concluded with several decisions that will have a beneficial effect on farming in the province for years to come.

The subject was thoroughly discussed in all its phases, after which committees went into the matters further, and made their recommendations to the meeting.

As foreshadowed, a Field Crop Advisory Council is to be created to coordinate the activities of the field crop authorities at Ottawa, Guelph, Kemptville, Northern Ontario, and other seed organizations, including commercial seed centres, to further the producing of first generation seed in commercial quantities.

Such seed will be produced under rigid inspection in field and bin, and where possible placed in sealed packages.

The committee which considered the phase of the subject, decided that the proper place for the bulk production and of first generation seed centres or business organizations able to carry on this work, but such time as there are sufficient centres to produce commercial quantities, the Government farms should make arrangements to produce such seed.

In so far as the distribution of this seed was concerned, it was agreed that the members of the field crop competitions should have first call on the registered seed so produced and in lots sufficient to seed the acreage required in the competition, and that the crops produced from this seed supply should form the basis of the bulk commercial seed supply.

The commercial seed produced by this second class of growers is to be disposed of locally as required by the Co-operative Co. acting as a whole, and the surplus through the U.F.O. sale house.

A permanent committee will be appointed on the standardization of varieties of grain crops, and it will be charged with limiting as far as practicable the number of varieties recommended, and endeavor also to keep to uniform types such as could be handled collectively in commerce.

It was decided to start this year on the production of high grade seed for purposes of multiplication. This will be done on the provincial farms, and the seed will be distributed to farmers, particularly standing field crop competitors, in quantity sufficient to plant five acres.

The conference went on record as of opinion that there is need for a complete experimental station in the southwestern part of Ontario.

Probably the Coldest Night Of the Year, With Mercury Running Below Zero Mark

How cold was it? Various thermometers in the city registered various degrees of cold during last night, and while not many of them agree as to the exact number of degrees of freezing, they generally were satisfied that it was below zero.

Somere ports state that six below was the coldest, and it is probably a fact that was quite as low as the mercury fell.

Out in the country they were willing to agree to almost any depth the fluid went. One prominent U.F.O. member brought in

the word that at his place they had spiced two thermometers together, but it didn't suffice to register the real figure.

Old January is going out with a frosty breath, and while there are no records available, it will probably line up as one of the coldest Januaries in the history of Canada.

Tomorrow is the first of February and Monday is Candlemas Day, when the bear sees his shadow, and everybody will be agog to see whether it's going to be cloudy or sunny that day.

Barnet Darby Dies Suddenly In R.R. Station

Barnet Darby, employed as night watchman at the N.S. and T.R. station at Thorold, died suddenly last night while waiting for his car at the N.S. and T.R. station here.

He was seated in a chair in the waiting room and suddenly collapsed. The deceased was sixty-nine years of age.

When a doctor examined him he pronounced life extinct. Evidently the exertion of hurrying up town from his home on Henry street had over-strained his heart action.

The body was taken to McIntyre's undertaking rooms and afterwards removed to the saddened home, from where the funeral will take place tomorrow.

Mr. Darby leaves three sisters: Mrs. W. Hill, Crowland township; Mrs. George Hitote, Welland; Mrs. A. Blakely, Beeton, Ont; one brother, H. H. Darby, Los Angeles, Calif.; and one son, C. R. Darby, residing at 64 Henry street, this city, who is a member of the grocery firm of Boyle and Darby.

Funeral of Victim Of Train Wreck Remains of Late Charles H. Beall Interred Here

The funeral of the late Charles H. Beall, twenty years of age, one of the unfortunate victims of the train collision which occurred at North Bay on Sunday last, and whose remains arrived in this city by the G.T.R. on Thursday afternoon, was held on Friday afternoon from Grob Brothers' undertaking rooms to Victoria Lawn cemetery. Rev. H. A. Priest of St. George's Church conducted the funeral, reading the Church of England services at both the home and the graveside. Those who acted as bearers were: Ray Jeeves, James Crawford, Charles Housinger, Frank Cornelius, Frank Moore and Peter J. J. J.

The flowers placed on the casket were many and beautiful, testifying to the esteem in which the late Mr. Beall was held.

TO FULL CITIZENSHIP.

Ottawa, Jan. 31.—Ex-employees of the Postoffice Department who went on sympathetic strike at Winnipeg, have, it is officially announced, been restored to full citizenship so far as their further employment by the Government is concerned. They may now re-enter the services as vacancies occur. Application will be made through the Civil Service Commission.

Electric Engines To Conserve Coal

That will likely be compelling factor in effecting change-over.

Notwithstanding the superior performance of the electric locomotive, its cleanliness, and its ability to materially increase the freight capacity of the railroad, the compelling factor in effecting the change-over will, in all probability, be the problem of conserving the coal supply, observes the General Electric Review. It has been conservatively estimated that one pound of coal burned under boilers in a modern electric power house will do the work of three pounds in the steam locomotive, and the showing is even better in such severe climates as that which exists in the Northwest.

On the basis of present consumption this represents roughly a saving of one hundred million tons of coal annually.

Not only does the electric operation permit of the most economical utilization of the fuel, but what is more significant, it makes possible the use of Hydro-Electric power in many localities. It is indeed an unfortunate order of things that requires coal to be hauled half way across the continent to lift a train over the continental divide. When the topography of the divide is ready to provide hydro-electric energy, which itself may be partially recovered on the down grade by means of regenerative braking.

WHERE EXCHANGE STANDS

At present when there is so much talk about exchange being adverse, both to Britain and Canada, so far as the United States is concerned, it is interesting to recall that the money of both Britain and Canada is at a premium in many countries. So far as Canada is concerned there are only a few countries of importance where our dollar is at a discount. The proximity of the United States and the heavy trading with that country lends prominence to the position of Canadian money across the line, but with the exception of Japan, Argentine, China, and the United States, the Canadian dollar, generally speaking, can hold its head well up. Canadian exchange on foreign countries is necessarily computed through New York, and in order to arrive at the figures allowance has to be made for the premium on New York funds, which fluctuates from day to day. At present it is about 11 per cent. As a matter of practical importance, however, the trading between Canada and the countries where Canadian money is at a discount, outside of the United States, is so slight as to be of little interest. Of the countries where Canadian money is at a premium, Great Britain is of greatest importance, and it may be recorded here the pound sterling was quoted on Thursday of this week at about \$3.91 in Toronto.

Electric Engines To Conserve Coal

That will likely be compelling factor in effecting change-over.

Notwithstanding the superior performance of the electric locomotive, its cleanliness, and its ability to materially increase the freight capacity of the railroad, the compelling factor in effecting the change-over will, in all probability, be the problem of conserving the coal supply, observes the General Electric Review. It has been conservatively estimated that one pound of coal burned under boilers in a modern electric power house will do the work of three pounds in the steam locomotive, and the showing is even better in such severe climates as that which exists in the Northwest.

On the basis of present consumption this represents roughly a saving of one hundred million tons of coal annually.

Not only does the electric operation permit of the most economical utilization of the fuel, but what is more significant, it makes possible the use of Hydro-Electric power in many localities. It is indeed an unfortunate order of things that requires coal to be hauled half way across the continent to lift a train over the continental divide. When the topography of the divide is ready to provide hydro-electric energy, which itself may be partially recovered on the down grade by means of regenerative braking.

FIRE FOLLOWS MURDER.

Ottawa, Jan. 31.—Mrs. Irene Russo a widow, and her six children orphaned, when Salvatore Russo, was murdered in broad daylight in Ottawa a few months ago, are now left homeless as the result of fire which destroyed their home at 419 Clarence street. Rocco Baris, who is charged with manslaughter in connection with Russo's death, is still at large.

BORDER LABORERS WILL SELL BY AID AT COST.

Windsor, Jan. 31.—Organized Labor in the Border municipalities, backed by local men, will open bakeries in Windsor, Walkerville and other border municipalities in an effort to cut the cost of bread, which has been increased twice within the last two months.

JAMAICA MAY PUT LIQUOR UNDER CONTROL OF STATE

KINGSTON, Jamaica, Jan. 31.—The Government is considering a proposal to put the liquor traffic under State control. There are numerous American tourists in the island now, the rush being said to be due partly to the enforcement of prohibition in the United States.

AUSTRIAN RELIEF IS NOT DETERMINED

OTTAWA, Jan. 29.—The Canadian Government will contribute toward the relief of Austria, but Sir George Foster stated yesterday that the amount of the contribution had not yet been determined. Washington dispatches state that Canada's contribution is five million dollars, but the Government has not yet decided.

Moving Picture Machine Great Aid To Education, Says Dr. Brittain

Says Every School Should Have One and Every School Will Have One Twenty-five Years From Now and Every Teacher Able to Run It.

Addressing a large gathering of the Women's Canadian Club yesterday afternoon at the Welland, Dr. H. L. Brittain, director of the Bureau of Municipal Research, dealt with education in a considerable degree, using up most of his time in discussing that subject.

He said that forty or fifty years ago Ontario had been given a medal for its educational system, which was spoken of as the best in the world. But today, he said, the Ontario system is full of leaks, its curriculum being so crammed with unnecessary subjects that there is not sufficient time to be given for the things which actually count in the education of a child.

He feared Canadians do not hold education in high enough value, judging by the vast number of children whose education ceases at the legal age of fourteen. The children are taken from school by their parents at that age and put to work, the parents not seeming to realize what a great advantage the next two or three years schooling would be to the children.

Dr. Brittain said the moving picture machine was the most important single invention in modern times for the benefit of education, and he predicted that within twenty-five years not a public school would be without one and there would not be a single teacher who could not run one. There would be text films in the days to come as well as text books. The advantages of education by moving pictures were vast, he said, and he spoke of educational value of a motion picture he had once seen of the rice industry.

A motion picture will hold the attention of the pupils and fix facts in their memory to a much greater degree than will a lecture or an ordinary lesson.

Dr. Brittain had a number of questions to ask the women before him, among them, "How many children of school age are not sent to school in St. Catharines for some reason or another? What are the sanitary and health conditions? How many children go through the full course of education? How many children are working in the city who are under the legal age of fourteen?"

He said these were questions the women could investigate and try and work out the necessary remedies.

Anglicans Are Optimistic As to the Outcome

Those in close touch with the Canadian-wide Forward Movement of the Anglican Church, are becoming more optimistic as the time of the canvass approaches. Never before has an appeal of this kind been placed before the Church of England people in Canada; never before has an opportunity been given to them to rally to the support of the Church as a whole, and to equip her with the funds necessary to enable her to take an adequate part in the great work of building up a Christian Canada.

For Whole Church.

Hitherto Anglican appeals have been for Diocesan, parochial or congregational purposes. The Anglican Forward Movement appeal is for the work of the Church of England in Canada as a whole. Such an appeal comes with force to each Anglican, not as a member of this or that parish, but simply as a member of the Church of England in Canada. This fact will insure a wide and generous response.

Form Capital Fund.

Another feature of the appeal is that the funds raised are not to pay off debts or to be used for current accounts. They will form capital funds, the interest of which will be used for definite purposes, viz.: Pension funds for clergy in newer dioceses and widows and orphans, Missionary and extension funds, diocesan loan needs, religious educational funds and a smaller amount for administrative purposes in connection with the General Synod.

When it is realized that capital funds are sought, more generous and larger subscriptions may be looked for, especially as the payments may be spread over two years.

Welcomed in Canada

The Anglican Forward Movement has been welcomed by members in Canada of the old historic church. It is an evidence of her increasing strength and solidarity in the Dominion and of the determination of her leaders that the Church of England in Canada shall be well equipped with means to face the task of the new day. That a like movement is stirring four other religious bodies at the same time is an evidence of kindly feeling and good will that will have great effect on the influence of religion on Canadian life and seems to point the way to a larger unity of faith and purpose among those who believe in Christ.

Anglicans in the Diocese of Niagara are looked to to do their part and Niagara Diocese looks to Anglicans in St. Catharines and district to more than do their share in this matter.

Challenge to the Church

A great challenge comes to the whole church in Canada for the first time—a glorious program is before us Anglicans that should stir us with enthusiasm.

A financial objective, an appeal for a larger vision of responsibility—a more sincere consecration and a more devoted service to Christ Jesus the King of Kings and Lord of Lords. This challenge surely will gain say or refuse, but each will answer as God has blessed him!

ANOTHER HALF MILLION

Niagara Falls, Jan. 31.—A deputiation consisting of Mayor Stephens, John Logan, W. L. Wilkinson, and Rev. G. B. Gordon, waited on the Provincial Secretary on Thursday, asking for an additional appropriation of \$500,000 for the housing commission here. An allotment of \$300,000 is already used or promised. Hon. Mr. Nixon promised to give an answer soon. He pointed out that the Ontario Government is negotiating with the Dominion Government for an additional grant for housing.

HAVEN'T DECIDED YET

The members of Union Lodge, Odd-fellows, have not yet decided, it is said, whether they will erect a fine new building or not on the property which is being made vacant by the demolition of the old Maple Leaf hotel. The cost of such a business block as proposed is very high under present conditions and the wisdom of the venture is doubted by some of the members.

DIED

DARBY—In this city suddenly on Friday evening, January 30, 1920, Barnett Darby, aged 69 years. The funeral will be held on Sunday, February 1st, at 2 p.m. from the residence of his son Clarence R. Darby, 64 Henry St. to Victoria Lawn cemetery.

SELF PRAISE IN FULL MEASURE.

It is plainly the duty of any administrative and elective body to administer all affairs coming under its jurisdiction while it holds office. It has the right to handle what is properly within its province up till the time it ceases to exist as a board, council or government. To begin two or three months before an election to anticipate that some other body of men is coming into office at a later date is surely not a warrant for responsible men to lay down and fail to initiate or govern.

Why should the members of last year's Public School Board feel that they who were elected to look after all the affairs of the public schools up till the hour they passed out of office, were less capable of transacting business and framing policies than the men who were to be elected after them?

Why should a member of the new Board tell the public that it was all right for the Board of last year to pay salaries, build schools, and study academic problems of all kinds, but the school should not have adopted any new method of paying salaries because another Board was to take office in February of 1920? The inference is obvious.

To content publicly that any change in the method of paying a staff should be left over for the wisdom of this year's representatives is delightfully human thing for a conceited and self-satisfied person to argue, but it does not come with very good grace from one who is to take a seat on the new Board.

And yet this is what the citizens of St. Catharines were told last night in a long editorial, and it is the nasty reflection which is cast on the conscientious and intelligent men who composed last year's Public School Board. Here is one of the paragraphs taken from the columns of our contemporary:

"It will, we think, appear to citizens generally that the Board of Education, elected less than a month ago should have been recognized by the Public School Board as the proper body to deal with so important a matter," and also "a Board which was ceasing to have any formal existence, as was the case here, should have

hesitated before making changes so revolutionary and which are condemned by leading educationists of the province."

Further down in the same article the members of the Public School Board are told that they should have sought to have obtained the views of the members of the new Board etc.

This is a lecture which is a pleasant reward for the men who spent their nights and days during the last year administering the affairs of the public schools to the best of their ability. It is a reward which most men get from the newspaper which seeks to impose its own ideas upon everybody and everything and, failing, uses its columns to cast aspersions on those whom it dislikes. There will be one consolation, however, to those members, as there has been to many other men who have served the public faithfully and well, namely, they will understand that the citizens of St. Catharines have become accustomed to this kind of whipping and don't pay much attention to it.

It is to be hoped that the editor who has done so much to prevent a new Collegiate from being built will bring a great deal of superior intelligence to the new educational body.

OVERSEAS DOMINIONS AND THE MOTHER COUNTRY.

It is significant that in the first speech of his Paisley campaign, Mr. Asquith took occasion to deal with the dominant Imperial question of future relation of the Overseas Dominions to the Mother Country. The former British Premier evidently has set his face against the Empire "re-organizers," says the Toronto Globe in an interesting editorial. He, Mr. Asquith, sees no merit in centralization theories. He recognizes that any attempt to set up in London an Imperial Parliament in which the Dominions would have representation and commit to it great questions of Imperial policy might easily be attended by serious consequences. He urges freedom from "any red tape or parchment conventions." He advocates "a system in which the Empire shall periodically discuss vital questions of Imperial policy that affect the Empire as a whole, a system under which we shall all be free and co-equal partners in that gigantic institution, the British Empire."

The words of Mr. Asquith have weight. He speaks with the knowledge of an experienced statesman and the authority of a great constitutional lawyer. When he says of the scheme for the creation of an Imperial Parliament: "I do not believe it is possible or that the Dominions want it," he voices an opinion matured by years of intimate association with Imperial affairs, and close understanding of Imperial sentiment, supported by exceptional knowledge of constitutional procedure and of the fundamental principles of Parliamentary Government.

There can be no doubt that Mr. Asquith is right when he says the self-governing Dominions do not want the creation of any centralized body to direct their participation in Imperial policy. They are jealous of their autonomy. They believe, with Mr. Asquith, that what needs to be done can be done best by consultation. They would be unwilling to delegate to their representatives in any Imperial Parliament at London authority to act for them in matters of Imperial policy. Particularly would

THE DAILY MISERY OF ILL-HEALTH

Three Years of Suffering Quickly Relieved by "FRUIT-A-TIVES"

MR. GASPARD DUBORD

139 Avenue Pile IX, Montreal.

"For three years, I was a terrible sufferer from Dyspepsia and my general health was very bad. I consulted a physician and took his medicine and faithfully carried out his instructions; but I did not improve and finally the doctor told me I could not be cured.

"At this time, a friend advised me to try 'Fruit-a-tives' and I did so. After taking two boxes of 'Fruit-a-tives,' I was greatly relieved; and gradually this marvelous fruit medicine made me completely well.

"My digestion and general health are splendid—all of which I owe to 'Fruit-a-tives'."

GASPARD DUBORD.
 50c. a box, 6 for \$2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

this be the case when the despatch of troops or the expenditure of money was involved. All such matters would necessarily have to be referred back to the Parliaments of the Dominions for Executive action. It is difficult to imagine Canada, for instance, consenting for a moment to the control of her man-power or to the vesting of the levying and collection of taxes in any Parliament outside the Dominion.

The imperial idea of Empire is not the British ideal. The strength and solidarity of the British Empire is its freedom from rigidly of system and from parchment conventions. It is because its outlying Dominions are "free and co-equal partners in the gigantic institution" that it commands the affection and the loyalty of their citizenship. During the recent years of war and stress this spirit in every patch of red on the map found material manifestation in a manner that thrilled the Empire and confounded its adversaries. The free and co-equal partnership ideal has stood the test of stern trial. It is the ideal which has made the Empire great—and will maintain her greatness.

EDITORIAL NOTES

The January thaw seems to be a February frost.

Why did not the Public School Board have wit enough to remember that a new Board of Education was coming into office with W. B. Burgoyne on it? All matters of real importance should have been left over for him to settle; teachers' salaries among other things.

There should be a great deal more contentment and peace of mind in the Standard office this year. A Mayor has been elected upon whom the dictator of Queen Street can smile and will smile so long as he does what he is told to do. The happy condition should save the editor and his staff a lot of worry from trumping up excuses to be abusive.

It seems rather strange and unusual acknowledgment that a man should make to the public that the intelligence of the Public School Board of last year was not of a high enough order to properly deal with the question of teachers' salaries and other matters of the kind, and yet this is what the editor of The Standard, with his usual egotism, would ask people to understand. Now that a new Board is coming into office, with himself as a member, all real business matters will be handled in a business-like way, of course.

Peace Incomes and War Prices

TEN years ago a Canadian clergyman was forced by illness to retire from active work. The largest salary he had received in the forty years of his ministry was \$1000 and a furnished house. The average did not exceed \$800.

On this sum he had maintained and educated his family. He and his wife were given to frequent hospitality. They supported every good cause, and even contributed to the maintenance charges of the Church they served.

A Minister's Budget

By good management and economy they were able to carry an endowment insurance policy, pay an assessment to their Church Superannuation Fund, and accumulate some small savings. When that clergyman was superannuated in 1909, he bought a house. His income during the first year of retirement was as follows:—

The retiring allowance from the Church (being \$10 for each year of active work)	\$400.00
Interest from investments	100.00
Wedding fees and sundries	75.00
Summer supply work	100.00

Against this total of \$675 stood the charge for taxes, insurance and maintenance of the house; say, \$75, leaving a net annual income of \$600.

The Shrinkage in Values

Before the war, the rise in the cost of living had necessitated careful management of this income. Today, the pressure is too great to be borne. If the statisticians are correct, the dollar of 1913 is worth now in purchasing power about 47c.

Therefore, the real income available to maintain these people of refinement and culture is \$282 a year.

Veterans of the Cross

These men gave a lifetime of unselfish service for their Church, their country, their neighbors; visiting the sick, burying the dead, comforting the bereaved, preaching Christ crucified, and doing their part in making Canada "God's country." In a time when the payment of pensions to old employees is accepted as a reasonable thing by industrial firms, these veterans deserve more consideration than they have been getting from the Christian people of this Dominion.

The Forward Movements

The Superannuation, Beneficiary or pension funds of the five Communions co-operating in the United National Campaign must be largely increased to yield a reasonable and an adequate income for these old heroes of the pulpit.

They ARE heroes. They make no complaint. They still are found doing all that their strength will permit for the great and noble Cause to which they devoted their lives. They still are enduring hardness as good soldiers of Jesus Christ.

National Peace Thank-Offering
 Simultaneous Every-Person Canvass by Each Communion
 February 9-14

What Are You Going To Do About It?

This is not a question of Charity. It is a question of justice, of chivalry, of common honesty.

Your Church is seeking, through the Forward Movement, to do its full duty to the retired clergymen.

Your interest and your subscription are needed.

Tell your Church leaders where you stand. Do it NOW.

THE STABLE IN WINTER

Keep Your Dairy Cows Comfortable and Clean.

Spray the Place With White Wash—Add Some Germicide—All Broken Windows Patched—Provide Other Ventilation of Plants in Winter.

(Contributed by Ontario Department of Agriculture, Toronto)

THE period of long winter is here. Of course our milking cows must have special protection from cold, and at the same time made as comfortable as possible. The whole of the inside of the stable should have a thorough cleaning. The dust and cobwebs should be swept from the walls, ceiling, windows; the windows should be thoroughly cleaned, also the eaves and stalls. Then spray with wash all over the inside, except windows. To the white wash add disinfectant such as a carbolic preparation, or a chloroform killer. This will kill disease germs lurking in dark, damp places, maintain the health of the stock which is at the foundation of a profitable milk production.

The next step is to put in clean window lights, but when the owner thinks he cannot afford the glass at the present high prices, pieces of coarse cloth, such as an sock, may be tacked over the window space. This will provide ventilation in a stable not otherwise ventilated.

Cow stables need ventilation in winter by having the foul air drawn and fresh air introduced by a draft directly on the cows. A simple way to do this is to hinge windows at the bottom and allow them to open inward, so as to let the air toward the ceiling, which should be a V-shaped board at the side or end of the window, to prevent the side-draft. Foul air should extend below the ceiling of the stable, and preferably have a hole for foul air—one near the side and one at the ceiling, as in this way the foul air is removed without closing the top outlet. No special cheap ventilation works automatically. They all require some attention.

Other points in stable preparation are to have all ties secure so the cow may not get loose; repair mangers and gutters should be so that they may be kept clean; sanitary conditions for milking. Litter and feed carriers are great sources of labor in looking after a lot of milkers during the winter.

In a word, make the cows comfortable and lessen the labor of milking by having them as comfortable and convenient, with as much help as possible in the form of cleanliness.—Prof. H. H. Dean, O. College, Guelph.

Care of Plants in Winter

Water growing pot plants when they need it, then water thoroughly. When the soil has become dry, water on the top surface, or when the pot is tipped up the knuckles or a knife handle. It emits a ringing sound, the soil requires water. Give sufficient water so that it runs out through the bottom of the pot. Water plants in morning in cold weather, not at night. Use tepid rain water, or water that has been exposed to air for a day or two. If possible, the water should be lukewarm, about 60 degrees F. in winter.

Humidity in the atmosphere is one of the main reasons for the successful with plants indoors. Pans or saucers of water on the sills or registers. A steaming pot or pot of water on the stove will give great help in this respect.

When the pots become full of roots, or where the soil is poor, water out or exhausted, liquid fertilizer can be given plants. The soil should be moist, not dry, or very wet. The fertilizer, if applied, there are several good plant foods sold at the stores. "Sifting Worth Plant Fertilizer" or "Bonora" are both good. Insect pests in house plants are best in a dry, warm atmosphere. Aphids or green lice, white scale, spider and thrip, "Sifting Worth Soap" is a good remedy. Place 1 lb. of soap in a bucket of water, and every week or two, spray the plants with water will help to keep down insect pests. A fine spray is best applied to all parts of the plant. It is necessary to be careful. Plants having very rough, chiseled foliage, should not be sprayed on, especially in winter, as the plants having glossy, glabrous foliage. Insect pests in house plants are best in a dry, warm atmosphere. Aphids or green lice, white scale, spider and thrip, "Sifting Worth Soap" is a good remedy. Your Dairy Cows Comfortable and Clean.

The Place With Whitewash and Some Germ-Killer - Fill Broken Window Panes, and Provide Other Ventilation Plants in Winter.

Published by Ontario Department of Agriculture, Toronto.

The period of long winter is here. Of necessity our milking cows must have special protection from cold and at the same time must be comfortable as possible. A whole of the inside of the stable should have a thorough cleaning. The dust and cobwebs swept from the walls, ceiling and windows should be thoroughly cleaned, also the stalls. Then spray with all over the inside, except the windows, with a whitewash and germ-killer such as a carbolic solution or a chloride solution. This will kill disease germs in dark, dirty places and gain the health of the animals. It is the foundation of good milk production.

Next step is to put in clean window lights, but where the farmer cannot afford to do this, the present high prices of coarse cloth, such as an old blanket, or a piece of old carpet, may be tacked over the window spaces. This will provide ventilation in a stable not otherwise obtained.

Stables need ventilation by having the foul air drawn off fresh air introduced without directly on the cows. A way to do this is to hang a board at the bottom and allow it to open inward, so as to draw the foul air toward the ceiling. This will be a valuable board at the end of the window, to prevent the side-draft. Foul air outside extend below the ceiling, and preferably have a hole for foul air - one near the top of the ceiling, as in this way the foul air is removed without cooling the stable too much, by simply the top outlet. No system of ventilation works automatically. They all require some attention. See points in stable preparation to have it this secure so that may not get loose; repairs and gutters should be made as they may be kept clean and dry without too much labor and feed cost. It is a great labor in looking after a healthy milker during the winter. A word, make the cows comfortable and lessen the labor of milking cows by having them comfortable and convenient, with an easy way possible in the form of a milking machine. - Prof. H. H. Dean, O. A. College, Guelph.

Care of Plants in Winter.

After growing pot plants, they need it, then water them. When the soil begins to dry and powdery on the surface or when the pot is tipped and rattles or a knife handle hits a ringing sound, the plants are thirsty. Give sufficient water at it runs out through the bottom of the pot. Water plants in cold weather, not in tepid rain water, or what has been exposed to the sun for a day or two, if possible. It should be lukewarm, about 60 degrees F. in winter. Humidity in the atmosphere of the main residence is essential with plants indoors. Pans or saucers of water on the hearth or registers. A steaming kettle of water on the stove will help in this respect. In a dry, cold room, or where the soil is poor, water or exhausted, liquid fertilizer be given plants. The soil should be kept moist, not dry, or very wet. Fertilizer, if applied. There are several good plant foods sold at seed stores. "Sterling Worth Plant Food" or "Bonora" are both good. An ounce of mixture of soda ash in a little warm water and cold water added to make one gallon, also makes a fairly good fertilizer for pot plants. Apply once a week or ten days. Spraying with water will help in insect pests. A fine spray applied to all parts of the plant is necessary to be effective. Insect pests, such as aphids, should not be sprayed on plants, especially in winter, and plants having glossy, glabrous leaves. Insect pests increase and multiply in a dry, warm atmosphere. Parsley or green-fly, white fly, spider and thrips, "Stiphodon" is a good remedy. Black fly is also a good remedy for most insect pests on house plants. Tobacco water are beneficial to insects on plants. Take about one-half pound of tobacco in a half gallon of water, let it settle. Give about a teaspoonful solution once or twice to each plant suffering from earth worms. Frozen plants in a dark place, temperature about 45 degrees F. Do not touch the leaves with ice cold water. - W. Hunt, O. A. College, Guelph.

A Hint About Chickens.

In very cold weather to make them comfortable and to keep their condition good (a little at a time, but often, in dry straw or old hay) some kind of mixed grain, such as corn, or its equivalent in a pound each day, is required to supply the fuel for the building of the egg for twenty hens.

Children Cry for Fletcher's CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for babies. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that is not true for over 33 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort - The Mother's Friend.

GENUINE CASTORIA ALWAYS

"Seen' Things At Night"

TO MOTHERS! Guard your kiddies against torpid liver, sour stomach, constipated bowels which generate poisons. These "inside" poisons circulate to the brain, producing bad dreams, then a feverish head. Unless you "work" out these poisons you will have a real sick youngster shortly. Cascarets are a candy cathartic, ideal for children. Cost only 10 cents a box. Read below!

Children love Cascarets because they taste like candy. When your child has a white tongue, feverish breath, foul stomach, give Cascarets anytime to "work" the nasty bile, souring food and bowel poison from the clogged-up places. You needn't coax even cross, sick children to take these harmless candy "Cascarets." They never gripe - never injure. Cascarets never disappoint the worried mother. Each 10-cent box contains directions and dose for children aged one year old and upwards.

EMPLOYMENT SERVICE OF CANADA. THE EMPLOYMENT SERVICE OF CANADA has been created to grade the various classes of workers - trained and untrained - and to place the best in the country at your disposal, through a system of Employment offices from Coast to Coast. THE PROFESSIONAL AND BUSINESS SECTION exists to place you in touch with Professional, Business and Technical workers. THE INFORMATION AND SERVICE BRANCH DEPARTMENT OF SOLDIERS' CIVIL RE-ESTABLISHMENT has a representative in each of these offices to render whatever special services may be required in the employment of the RETURNED SOLDIER.

BUILDING AN ICEHOUSE

Good Type for Use on the Average Farm.

Every Milk Producer Should Have One - The Work and Cost of Construction Light Compared With the Benefits.

EVERY Ontario farmer who produces milk - and most of the farmers do - should have a quantity of ice each winter in order to make it easier for him to cool the milk down after the evening milking, and to keep it sweet for such short periods, - week-ends for example, - as he may be required to keep it before delivering it to the cheese factory or other point of disposal. In order to preserve the ice satisfactorily some form of ice-house or shelter is necessary. The purpose of this article is to describe in a few words a type of ice-house which will give good satisfaction.

The ice-house does not necessarily have to be expensive, but certain conditions in regard to it must obtain if the ice is to keep well. These I shall emphasize first and they are: protection of ice from sun's rays, this is the wall, good drainage from the bottom of the house, either natural or artificial, free circulation of air through the top, air-tight foundation, plenty of good quality of dry sawdust on all sides of the mass of ice, and close packing of the ice. If these conditions can be secured in a rough bin built under a shed, or a lean-to on the shady side of a building, all well and good unless one has other good reasons for building a more expensive structure elsewhere. The matter of convenience is often a deciding factor in this case, and the type of ice-house I am about to describe is a good illustration of this fact. Only once have I seen it in use, but there is no reason why it could not be used generally.

This particular type consists of a lean-to structure of wood at one end of the barn which has a concrete underneath. The size would vary with the amount of ice required, but probably a building 15 feet square and 12 feet high would be large enough for most farmers' needs. This structure and at the side adjacent to the barn, or rather the basement wall, is built a concrete enclosure about 6 feet square and 6 or 6 1/2 feet high. A door in the side wall admits one to it. In the side opposite to the doorway there is a row of 3 or 4-inch tile near the bottom for letting in the cold air from the ice which is packed closely to the concrete storage on all three sides and over the top as well. Between the top of the storage and the barn there is a narrow passage-way or flue for allowing the foul air used at the get out, hence good circulation in the storage is provided for. In this particular case the farmer has his milk-room containing cream separator, etc., adjoining the storage and whenever he wishes to cool milk or cream or store it he puts it in this storage. Other articles, such as butter and meat, are also stored at times but of course only for a few days at a time. Hence much handling of ice is saved as well as considerable time. The building is made of wood, the studding being boarded on both sides. It would be advisable to fill the space between the two boardings with planer shavings or good quality sawdust. The roof is covered with shingles. The gables are left somewhat open for ventilation. Plenty of sawdust is used around the ice next to the walls, and also a good depth over the top, none however is used between the cakes of ice. If a few cakes of ice are required for household use they may be easily taken out by the sawdust in the top of ice-house or at one side if more convenient.

It will be seen, therefore, that this type of ice-house does many things in a degree, namely, providing a small ice-cold storage room, cooled by the ice mass directly, in addition to housing ice for various incidental uses in the summer-time. In a case like this there would not be much need for taking out ice except for supplying the household refrigerator as the storage-room would take care of the ordinary cooling and preserving of products.

Believing this arrangement to be valuable, and in many cases practicable on Ontario farms, I have much pleasure in recommending it to farmers in general. - R. R. Graham, O. A. College, Guelph.

Still a Place for the Good Horse. Horses have not been in such a keen demand in Canada since the war broke out and have increased about 650,000 since 1914. However, a real good heavy draft horse is hard to find, and if Old Country markets are any criterion of the trend of affairs an awakening in the Canadian Draft Horse market should soon follow. Draft geldings are selling in England for from \$300 to \$500 and even up to \$1,000 each. A returned officer told me recently of seeing a number of Canadian geldings (artillery and transport horses) sold in Old London for \$200 to \$300 each. About one-fifth of Great Britain's ordinary supply of work horses went to the war and a number of useful brood mares were also taken. France, Belgium, Russia and Germany, four of the great horse-producing countries, have lost a heavy percentage of their horse stock during the war. Already a shipment of Percherons has gone from Western Canada to France, and it would seem that during the period of reconstruction our horse market will be East and not West. If it will pay to breed any horse on the Canadian farm the heavy draft of good quality should turn in most money to his owner.

Stops Backache In Few Minutes

RUE LUMBAGO, PAIN, SORENESS, STIFFNESS RIGHT OUT WITH ST. JOE'S LINIMENT

Which your back is sore and lame or lumbago, sciatica or neuritis has you stiffened up, don't suffer! Get a small trial bottle of old, honest "St. Joe's Liniment" at any drug store pour a little in your hand and rub it right into the pain or ache, and by the time you count fifty, the soreness and lameness is gone.

Don't stay crippled! This soothing, penetrating liniment takes back ache and pain right out and ends the misery. It is magical yet absolutely harmless and it does not burn or discolor the skin.

Nothing else stops lumbago, sciatica and lame back misery so promptly and surely. It never disappoints.

The old directors were again returned to office and given the support and backing of the members. The directors are Messrs. J. B. Fairbairn, Wm. Kemp, E. A. Thompson, Wm. Boughner, Jas. Zimmermann, P. Merritt and Levi Meyer.

FORWARD MOVEMENT

Three hundred dollars towards \$4,000,000 will be the gift of a St. Catharines District minister in the Methodist National Campaign. This man has a \$1,200 salary. His salary has averaged \$900 per year during the last twenty-five years in the pulpit. A Brampton layman laid aside for the same fund \$5,000 last November. Such facts are counted on to assist the Hamilton Conference towards a \$600,000 objective. Of this amount the Hamilton district is expected to raise one-quarter, or \$150,000, during the week commencing February the 9th.

The London Conference objective is \$550,000. Greater wealth is counted on to result in an offering of at least \$1,100,000 by the Toronto Conference. Ontario's objective is \$2,800,000. Hamilton enters the drive with one advantage over the others, having more than one thousand minute men or lay speakers to make the appeal. Toronto and London have fallen hundreds short of this total of oratorical forces.

Jimmy Wilde of England knocked out Mike Ertle of St. Paul in the third round of their bout in Milwaukee.

"What Shall I Do Then With Jesus, Who Is Called Christ?"

Pilate's Question Is Yours To-day

THE Church is not impersonal. It is a company of individuals, each of whom has expressed determination to acknowledge Jesus as Lord and God, to accept His teachings and follow His example.

The Active Christians

Those who persist in the Way find their lives radiant with hope. They have an object in living. They are not plunged into hopeless misery by bereavement. They develop character. They learn contentment. Being themselves men of hope and good-will, they are centres of hope and good-will in the world.

The Inactive Christians

Not all continue faithful. Many neglect to keep the Pattern before them. They cease to pray. They forego public worship. They become only nominal Christians. Their sympathies are on the side of Right, but they miss the full-orbed peace that comes from being obedient to the Heavenly vision.

Aiding the Enemy

Apart from their own loss, lukewarm Christians do positive harm to the Faith. Enemies never cite the lives of notable Chris-

tians as a proof of the inefficiency of the Church, or of the Gospel it proclaims. If, therefore, all lukewarmness should disappear the critics of Christianity would be confounded.

Where Do You Stand?

You are a Christian. Are you ardent or careless? Are you whole-hearted or half-hearted? Do you realize that the Church in Canada faces unprecedented responsibilities?

You believe that the Gospel of Christ is an perfect solvent of selfishness and class-hostility. Will you do your part to give it free course?

A Great Possibility

"Righteousness exalteth a nation, but sin is the reproach of any people." If all the Church Members of Canada would begin today to follow earnestly the principles enunciated by their Divine Master; if they would acknowledge their stewardship in full measure, the name of Canada would ring around the world. Therefore, the Question is to you:

"What shall I do then with Jesus, who is called Christ?"

A United Appeal

FIVE Christian Communions—Anglican, Baptist, Congregational, Methodist and Presbyterian—have in Canada ten thousand congregations, over one million communicants, and represent more than half of the population of the Dominion. Under the stimulus of five great Forward Movements, it is in the power of these people to root out the evils of materialism in Canada, and to conserve the spiritual values revealed by the chastisement of War. Are you ready for active service?

The Decision Is Yours

LET Christianity have a fair trial in your own life. Make Jesus Christ master in your home. Test the reality of prayer. It will give your life direction, purpose and power.

You can help to cure the ills of Canada and the world. Be prepared to serve. Begin NOW.

The United National Campaign

Representing the Simultaneous but Independent Forward Movements of the Anglican, Baptist, Congregational, Methodist and Presbyterian Communions in Canada.

All Tendencies Point to High Teas

Higher Prices Are Bound to Rule in the Near Future—London Market Has Opened at Strong Figures—Present Holdings Are Light.

From all sources in the trade, reports to 'Canadian Grocer' are to the effect that not only is the tea market ruling with the continued strong undertone, but the possibility of higher prices is definitely hinted at. The London market has opened and prices there are exceptionally high. Just whether this will have definite effect upon the Canadian situation is not quite clear at the moment, but the trade feels that any effect would be that of firming the market.

Scarcity Prevails

The present holdings of tea by the Canadian trade, are said to be very light. This is true when better grade teas are taken into account and the high grades have been snapped up very quickly when offered. Not only is this true of the Canadian market, but the same situation prevails in the United States, where better grade teas are reported very scarce.

The situation looks as though no drop in price will be possible, and here is strong possibility of advances being made. No one has any tea for

sale, and any teas arriving from abroad are snapped up quickly on arrival. The foregoing statement, as expressed by a large factor in the trade operating throughout Canada, indicates clearly what the situation is with regard to quality teas. It bears out what 'Canadian Grocer' has already pointed out in previous articles on the tea situation, viz.: that importations of tea, and especially high-grade Japans, have been very quickly absorbed. This has caused a situation which may be considered as unusual and has caused a smaller holding of tea stocks than has been recorded for a great many years.

Demands are Heavy

The demands for tea from all sources of the trade has been responsible, in a large measure, for the extensive absorption of tea stocks. Part of the increased demand is traceable to the prohibition legislation, which has been enacted in so many parts of the country. People have had to use something as a beverage, and the enactment of liquor laws has served to make the tea business ex-

ceedingly good. This is a condition that is reported from all sections of the trade and with the demand which has at least kept pace with the offerings of quality tea. This demand is likely to continue, and with the high-grade teas produced in the East very well distributed, and in some cases, already cleaned up entirely, there seems to be little prospect of lower prices obtaining. Of heavier stocks of tea being obtainable for a long while to come.

WINDOW WASHERS WANT \$48 FOR 44 HOUR WORK

CHICAGO, Jan. 31.—The window washers in Chicago have gone on strike demanding \$48 a week for experienced washers who work on tension ladders, and \$44 a week for apprentices—men who have worked less than six months in the business. The washers demand pay for 44 hours a week, regardless of whether any work is done.

MEN, MEN! TRY IT TO-NIGHT—FEEL FINE TOMORROW

Simple Way to Get "Peg" to be Put Right on Your Feet

When a man has lost ambition to "dig in" and stay at things—when he complains or headache, fullness in the right side, pains in the shoulder blade—it's purely a case of "Liver."

These symptoms invariably indicate a clogged inactive liver. The body can't get rid of its wastes, and the whole system is half paralyzed.

Dr. Hamilton's Pills stimulate the liver to activity in one night. Being a mild vegetable laxative they produce results in a few hours. The bilious headache and constipation are cured, spirits rise, complexion clears, animation returns. Nothing in the calendar so efficient for that tired, lazy feeling as Dr. Hamilton's Pills. Very mild, don't interfere with work, invariably do lots of good. Try a 25c box, all dealers.

DOCTOR WARD, The Specialist

SPECIALIST IN THE TREATMENT OF NERVOUS CONDITIONS, NERVE EXHAUSTION, BACKACHE, LUMBAGO, RHEUMATISM, STOMACH AND LIVER TROUBLES, ACNE, SKIN DISEASES, CATARRH, ASTHMA, RECTAL TROUBLES, PILES, FISTULA AND BLOOD CONDITIONS. The knowledge gained from many years' experience in treating diseases just like yours is of much benefit to you and assures the ailing man of prompt relief. When a man knows that he is again feeling well—the he is rid of his ailment—he feels that a heavy load has been lifted from his shoulders. I give every patient the benefit of the knowledge acquired through the long experience of a graduated, licensed and registered specialist, in order to bring about the most satisfactory results in the shortest possible time.

NERVE EXHAUSTION

A CONDITION AFFECTING MANY MEN—THE GREAT AMERICAN DISEASE—IT IS BROUGHT ON BY OUR MANNER OF LIVING—OUR WORRY AND HURRY—AMERICANS EXHAUST MORE NERVOUS ENERGY THAN ANY OTHER RACE OF PEOPLE.

There are a great many men who need treatment for their nervous system. These men do not know what is the reason they don't feel right—why they can't work like they used to—why they tire so easily and why they are irritable, nervous, despondent, weak, pale and lack ambition. These conditions require the expert knowledge and treatment of a specialist who has had many years' experience in just such ailments. A specialist learns by experience to know just the right treatment at the right time so that the patient can be dismissed at the earliest possible time. Men affected with nervous exhaustion have no endurance—no ambition—everything they attempt is an effort. Life to them appears as a long, gloomy future. Their appetite is poor and variable—they become irritable, cross and discouraged. They have pains and aches in various parts of the body and there is often indigestion and pains in the stomach. Sleepless, wakeful and restless nights follow.

RHEUMATIC AILMENTS

SCIATICA AND OTHER FORMS OF RHEUMATISM, LUMBAGO, PAINS IN BACK, SWELLING, ACHING, PAINFUL CONDITIONS IN ANY PART OF THE BODY—INFLAMED AND SWOLLEN JOINTS OF LEGS AND ARMS—MANY OTHER SYMPTOMS.

Hundreds of men are suffering with some form of Rheumatism. Many of these men go from day to day suffering untold agonies thinking they cannot be cured. They have tried liniments, rubbing, massage, salts and other treatments without experiencing any relief, and they are now going through life thinking they are martyrs to that burden called Rheumatism. If these men could only know how easy it is to get rid of many rheumatic conditions I know they would not suffer another single day. Then all sufferers of rheumatism would be strong and healthy if they could get rid of the condition. Rheumatic patients are nearly all strong and robust before being attacked by this ailment, and therefore it is so hard for the man to understand why he should suffer the agonies of such a condition. When a man gets rid of such a condition he feels that a heavy burden has been lifted from his life, and he starts right out to make up for lost time both in money and pleasure. When a man comes to my office suffering with the above condition he is given a most careful examination, and he is given treatment that he feels is giving him great benefit.

Quick and Lasting Results Assured the Ailing Man

BLOOD YOUR WHOLE HEALTH OF BODY AND MIND DEPENDS ON YOUR BLOOD. Any "building process" of the body and mind, of the muscle and tissue formations, of any of the various vital organs, can be accomplished only by working direct through the blood stream.

CHRIST AND THE CHURCH

BY J. E. MIDDLETON

In a recent article, The Woodstock Sentinel Review agreed that if Jesus Christ lived in this day, He would have as much trouble with the church members as He had with the Scribes and Pharisees. The fact that He condescended with "publicans and sinners" and brought His messages even to the women of the streets, disturbed the folk given to the mere religiosity, and rigid orthodoxy. It was a new method of prophecy, even as the Message itself was new. The Sentinel Review wonders if the Son of Man could preach that Gospel and live that life among nominal Christians of today?

It is always the misfortune of the Church to be judged not by its ideals, its aspirations and its principles, but by the actions and words of the inactive and careless members. No one complains of the Church after studying the lives of Bishop Pompas, or Dr. Douglas, or Fanny Crosby, or Dr. Chalmers, or any of a long and notable list of men. They were all trained in the Church. They all had their enthusiasm awakened by the Church. They all served the Church by serving their fellow-man.

of Canada has recognized the breadth and the depth of the Gospel by the establishment of a vigorous social service work. "Publicans and sinners" are eagerly sought. Loose or careless women have the Gospel of rehabilitation preached to them. The Institutional Down-Town Church has come into being, and much of its work is done by volunteers from the comfortable and stately Churches in "residential districts."

The theory of Christianity has not been enlarged. It remains expressed in the marvellous teachings of Our Lord. But the Churches have broadened their conception. More and more they realize that their "job" is to serve. The ideal Church member is and will be the one who lives out his creed rather than the one who merely "enjoys religion."

The aim of the Forward Movement in five of the Canadian Com-munions is to equip the Church for

ONLY TABLETS MARKED
"BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

The name "Bayer" identifies the only genuine Aspirin—the Aspirin prescribed by physicians for over nine-teen years and now made in Canada. Always buy an unbroken package of "Bayer Tablets of Aspirin" which contains proper directions for Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Neuritis, Joint Pains, and Pain generally. (Six boxes of 12 tablets each but of "Bayer Tablets of Aspirin" which is a few cents. Larger "Bayer" packages. There is only one Aspirin—"Bayer"—You must say "Bayer". Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Mono-acetic acid ester of Salicylic acid. While it is well known that Aspirin means Bayer manufacture to most of the public seeing imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross".

Many a man never gets on the popular side until he joins the popular majority.

No organization is perfect, however fine its principles. But Christ, while realizing the imperfections of the Jewish religious order, while denouncing the hypocrites it sheltered, still recognized the Church of His time. He sent the healed leper to the priests that he might observe the necessary ceremonial. He went up to the feasts. He was able, as a boy, to surprise the theologians by His knowledge of the Law. He founded His own Church on Peter, who had been one of the weakest and most unstable of His followers. His association with men and women of bad reputation was solely for their advantage and not for His pleasure.

In late years the Christian Church

Faces Trial For Murder

SIXTEEN-YEAR-OLD GIRL, EXONERATED FOR KILLING FATHER BEING TRIED FOR SLAYING STEPFATHER.

ST. LOUIS, Jan. 30.—The trial of Ursella Broderick, sixteen years old, Pils Lawn, St. Louis County, for the murder of her stepfather, Jos. Woodlock on April 14, last, has begun in circuit court before Judge Klene of the juvenile court. The girl killed her father, Thomas P. Broderick, October 16, 1916, but was exonerated by the coroner's jury on her testimony that she fired in defense of her mother.

The empanelling of a venire of thirty-six men, from among whom the jury will be chosen has been completed. Charles P. Johnson, counsel for the defendant, announces that he will claim the privilege of taking twenty-four hours in which to study the panel with a view of making challenges for the defense. This was granted.

Woodlock was killed at the family home, which was then at 5042 Wells avenue. Her story is that she fired in self defence when he tried to attack her.

Mrs.illian Woodlock, mother of the girl, is charged jointly with her daughter for the murder, but will be tried separately later. She is in court, but sits among the other spectators.

The girl appeared in court with her attorney and took a seat beside him at the counsel table. She wore a black three-quarter coat over a black dress trimmed with fur, a red and green tam o' shanter, black kid gloves and high tan boots and carried a muff.

She presented a childish appearance.

According to Ursella's story, told at the time of the shooting, she occupied the same room with her mother and stepfather. On account of Woodlock's advances, she said, she had armed herself with a revolver and intended to kill herself.

The morning of the killing, she said, after her mother had arisen, Woodlock picked her up and carried her to his bed. She carried the revolver in a wrapper, she said, and fired with her eyes closed.

Woodlock was found dead in bed. He had been shot twice above the right eye and once through the back of the head.

MAY GIVE ASSURANCE OF AMPLE POWER

HAMILTON, Jan. 30.—F. A. Gaby Chief Engineer of the Provincial Hydro-Electric Commission, has asked Mayor Booker to see him or have the city representative go to Toronto, that he might give an assurance that the Hydro-Electric Commission will not be delayed through lack of power.

Religion Is Patriotism

It is the Root of Personal Righteousness, the Mainstay of Social Order, the Bulwark of International Peace

The Makers of Canada

The earliest settlers in Canada were roused by the Call of the Church to develop a noble and useful citizenship. Young and old were invited to turn their eyes from material things, and to regard the splendor of unseen realities. Knowing that Religion is the only true safeguard of stability in the State, they built Churches, Schools and Colleges, to train men for the Christian Ministry, and to spread abroad in the land the benefits of education. This they did in their poverty, and thus directed the course of history in Canada to this day.

The Testing of Canada

Because of such sacrifices, there arose in Canada a public spirit hostile towards all injustice, dishonesty and cruelty. The War tested the moral fibre of the Canadians of a later day. Would they choose material ease and wealth, or would they risk all in defence of freedom and the rights of the weak?

Over 400,000 men voluntarily offered their lives, and endured hardness as good soldiers for the defence of equity and fair dealing in all human relationships, and for the vindication of public right. Nor were the people at home less steadfast. Besides bearing the national cost of the War, they gave voluntarily for the help of the soldiers more than \$90,000,000. Canada nobly stood the great trial.

The Menace of To-day

That conflict is ended. Now comes another test. Not only in Canada, but all over the world, sectional and class struggles for material rewards and for mastery threaten the present basis of Society. The vision of spiritual values gained in the War is in peril of being forgotten. The supremacy of sacrifice, the nobility of service, the reality and glory of the Unseen and Eternal, the promises of Christ; these were the things by which we lived during the War. Now there is great danger that they may fade from view, giving place to selfishness and the love of ease.

The great non-Christian peoples of the world comprise two-thirds of the human race. They are mastering our modern scientific knowledge, and if they remain Pagan may yet turn it to our destruction. Paganism stands for the supremacy of Might, the very ideal

we fought and conquered in more than four years of war.

Victory only through Christ

How can we retain the heavenly vision? How can the world be guarded against another attempt to establish the Pagan ideal? Only through the Church of Jesus Christ. There is no other agency or society that has any possibility or hope of bringing about a full

realization of the brotherhood of all mankind, and the reign of the Prince of Peace.

What the Church Has Done

All the progress of humanity in Civilization for the last 2000 years has been inspired, directly or indirectly, by the Gospel of Jesus Christ. It has ended slavery, protected life, ennobled women, educated the children and safeguarded their lives, sanctified the home, established schools, missions and charities.

The Coming Era

Victory places upon the shoulders of the Allied Nations the responsibility for directing new conditions to right ends. Canada must do her share. The Church must prepare to meet the needs of the new day. Old standards of life with old habits of thinking and of giving will be wholly inadequate. We must do in our day what our fathers did in theirs. The hope of the world is bound up with the strengthening and extension of the Church of Jesus Christ.

The World's Need is Spiritual

I speak as one standing upon the watch-tower, and know what the need of the land is. It is not material, it is spiritual. Get the spiritual, and the material will follow. The wounds of the world are bleeding, and material things will never heal them. And that is why I hail any movement, which brings the great spirit of brotherhood. The one need of England and France today is the healing and the brotherhood of the Cross of Christ.

—Rt. Hon. David Lloyd-George, Before the Brotherhood Convention, London, September, 1919.

Fight the Good Fight

The Forward Movements

FIVE Christian Communions, Anglican, Baptist, Congregational, Methodist, and Presbyterian, are convinced that the time has come to rouse all Christians to a clearer understanding of their calling and stewardship in Christ, their King. They believe that the Church should be equipped adequately with men and money to enable it to meet the needs and opportunities of the New Day.

These five separate Communions are of one mind as to their be-

lief in God, the Father Almighty, Maker of Heaven and Earth, and in Jesus Christ, His Son, Our Lord. They now

EACH of the Communions named is in the midst of a Forward Movement. Each is seeking by prayer and by earnest effort to accept all its responsibilities. Each is striving to extend its activities in Canada and in Foreign Lands.

Your Church needs your help, but, far more, you need the help of your Church to learn the difficult art of living wisely and well.

Consult your Clergyman. He serves you and your children. Ask him how and when you can serve in this day of national emergency. Give yourself to the task. Say: "Here am I, send me."

declare to their respective constituencies, and also unitedly, to the Canadian people, that the only effective method of making good citizens is by urging men to a more faithful practice of Christianity, by inculcating personal faith in Jesus Christ. They insist that there is no other dependable way of correcting evil tendencies in individual and national life. They call the people to repentance. To all Christians their message is, "Awake, Arise. Fight the Good Fight, For Canada and For the World."

THE BAPTIST FORWARD MOVEMENT

Like most of the other similar movements, the Baptist Forward Movement has two principal objects, the spiritual and the financial. As a matter of fact, however, this distinction of objects is solely for convenience of organization, since the whole movement in its beginnings, its progress, and its aims is spiritual. The Baptists of Canada are persuaded that for them any success that might be gained that should not be spiritual, would be failure.

The Baptist Forward Movement is the answer of faith to the call of the hour; it is recognition of the supreme opportunity created by the present world situation; it frankly recognizes the terrible dangers in the collapse of the old order of things, in the rampant and defiant materialism of the day, and in the sweeping away of the old moral standards; but it is the expression of the confident belief that the Church of God holds the solution of every world problem, and that the Baptists have a real contribution to make to the establishment of a new order of things; it is the consecration of a people to the continuation and completion of the sacrifice made by our soldiers in France and Flanders.

Six great spiritual aims have been set before the churches: (1) Personal consecration, with the call for a fresh and more complete surrender to Christ; (2) Prevailing Prayer, with stimulus to individual, family and public prayer in answer to which the local Baptist women are holding many cottage meetings each week; (3) Christian instruction, seeking more general practice of Bible reading and study, together with an intolerance in general religious and denominational matters; (4) Personal Service, enlisting every member, so far as possible, in some form of Christian service, and especially seeking recruits for the ministry and for missionary service; (5) Intelligent Evangelism, using every wise means, both personal and public, to win others to faith in Christ, and especially stressing the aim that each Baptist will seek a commission from God to become His messenger of salvation to

some one soul; (6) Sacrificial Giving.

The financial objective in which the local Baptists will co-operate was set by the Convention of Ontario and Quebec. It should be remembered that there is no national Baptist organization; instead, there are three conventions, the Maritime, the Western and that of Ontario and Quebec, and in many Forward Movements. The Convention of Ontario and Quebec determined last October to raise \$300,000 in the next two years, for the following objects:—

- Foreign Missions, \$110,000.
- Home Missions, \$60,000.
- McMaster University, \$60,000.
- Grande-Ligne (French) Mission, \$40,000.
- Western Missions, \$10,000.
- Sunday Schools, \$10,000.
- Ministerial Superannuation, \$10,000.

Later it was decided that all money raised above that amount and up to \$30,000 additional, should go to Ministerial Superannuation. While the amount suggested seems at first glance to be small, it takes a good place among the financial objectives of the various Forward Movements when estimated on the member-per-year basis.

From all quarters comes evidence that the financial objective will be reached. For in Toronto churches has gone forth the challenge that the rest of the Baptists raise the \$300,000, and that they will then raise dollar for dollar.

Queen Street Baptist Church in this city is organized and in line with all this great undertaking, and will doubtless do its part fully.

The O.M.A. Executive Committee dealt with many important matters at a protracted meeting last night. Some second round games were arranged, but no announcements of the dates will be made for a day or two.

KEEP HEALTHY DURING WINTER

COLDS AND BRUISES MAY BE AVOIDED IF THE BLOOD IS KEPT PURE

Do not let your blood get thin this winter. For people who have a tendency towards anemia, or bloodlessness winter is a trying season. Lack of exercise in fresh air, and the more restricted diet, are among the many things that combine to lower the tone of the body and deplete the blood.

As soon as you notice the tired feeling, lack of appetite and shortness of breath, that are warning symptoms of thin blood, take a short course of treatment with Dr. Williams' Pink Pills. Do not wait until the color has entirely left your lips and your eyes fail. It is so much easier to correct thinness of the blood in the earlier stages. Many later. This is well illustrated in the case of Mrs. E. Williams, E.R. L.M.A., Ont., who says: "I take great pleasure in telling you how the benefit I have found in the use of Dr. Williams' Pink Pills. I was in an anemic condition, and was very weak and run down. The least exertion would leave me breathless and it was with difficulty that I did household work. I was advised to try Dr. Williams' Pink Pills, and after the use of four boxes I felt like a new person. In fact my appetite soon filled with new energy and new life. I strongly recommend this medicine to all who feel weak or run-down."

The purpose of Dr. Williams' Pink Pills is to correct the blood, as ricinemat. They are for this reason an invaluable medicine in diseases arising from thin or deficient blood, as ricinemat. They are for this reason an invaluable medicine in diseases arising from thin or deficient blood, as ricinemat.

You can procure Dr. Williams' Pink Pills through any dealer in medicine or they will be sent you by mail at 50 cents a box or six boxes for \$2.50 by writing direct to The Dr. Williams' Medicine Company, Brockville, Ont.

A local council of Women Workers of Canada was formed in Quebec city.

Childhood Constipation

Constipation, that disordered state of the digestive tract which is nearly always caused by improper feeding—can be readily regulated by the use of Baby's Own Tablets. These Tablets are a mild but thorough laxative. Concerning them Mrs. Joseph Dion, Ste. Peopetue, Que., writes:—"I have nothing but praise for Baby's Own Tablets. When my baby was three months old he was terribly constipated, but the Tablets soon set him right, and now at the age of fifteen months he is a big healthy boy and this good health I attribute entirely to the use of the Tablets." The year esold by medicine dealers or by mail at 25 cents a box, from The Dr. Williams' Medicine Co., of Brockville, Ont.

"A Night in Honolulu," which comes to the Grand Opera House next Monday, February 2nd, is a story of Hawaii, which immediately suggests a myriad of thoughts to the stranger, especially the Canadian. One pictures Hawaii as a land of sunshine, of flowers, and of music. One cannot bring the sunshine of Hawaii to our land, nor the bowers in their glorious radiance, but the music is another matter. The Canadians have taken the beautiful, wistful music of Hawaii to their hearts as they have no other. The quaint "Ukelele" now holds a favored place in our homes. Students of this instrument are as numerous as those of the violin. In "A Night in Honolulu" one may hear the veritable native musicians chant their weird melodies, hear the mournful prayer of death or the grey, care-free hula music. It all has a peculiar fascination for us, and is an opportunity not to be missed.

A SNAP—\$800 will buy my nice building lot, or will exchange for auto in good condition. Lot 35x111 feet. In 2 Sunnyvale Gardens Facer street Clear deeds. Address KNOWLES 88 Cameron Avenue, Windsor, Ont.

"DANDERINE" FOR FALLING HAIR

A small bottle of Danderine costs but a few cents at any store. It stops falling hair, itching scalp and ends dandruff, besides it doubles the beauty of your hair, making it appear twice as heavy, thick and abundant. Try it!
