To Our Readers!
WE have made arrangements with the publishers of the CORNELL HEARTH, Boston, Mass., to offer the MONITOR with the Magazine this year.
THE COTTAGE HEARTH
Is a well known Family Magazine now in its 13th year, and is a favorite wherever introduced. It has each month a MUSICAL FIGURE, HEALTH ORNAMENT, LATEST FANCY WORK, SABRATH READING, DEMONSTRATION PATTERNS, APPROVED RECIPIES, HOUSEHOLD HINTS, and PRIZE PUZZLES FOR CHILDREN.
This Beautifully Illustrated Monthly Magazine has among its many

EDWARD EVERETT HALE, LUCY LARCOM, CELIA THAYER, LOUISE BRANDELL, MARY MORTON, GEORGE MACDONALD, MARGARET DELAND, AUGUSTA MOORE, ROSE TERRY COOKE
It is a large, elegant, elegantly printed magazine and has attained a large circulation solely on its merits as a family magazine. Its
Price \$1.50 a Year
Is very low for such a desirable home magazine, but we offer it at
FREE TO ANY ONE
Who will send us \$1.50 for a year's subscription to the Monitor and 50 cents additional making \$2.00 for both the Cottage Hearth and the Monitor for a full year.
Sample copies sent free on application to P. P. Shannon, Jr., Boston, Mass. For further particulars address MONITOR, Bridgetown, N.S.

(Established 1843.)
THE SCIENTIFIC AMERICAN,
The Most Popular Scientific Paper in the World.
Weekly, \$3.00 a Year; \$1.50 for Six Months.

This unrivaled periodical, which has been published by Mun & Co. for more than forty years, continues to maintain its position for excellence, and enjoys the largest circulation ever published by any scientific publication. Every number contains sixteen large pages, beautifully printed, elegantly illustrated, it presents in popular style a descriptive record of the most recent, interesting and important advances in Science, Arts and Manufactures. It shows the progress of the World in regard to New Discoveries and Improvements, embracing Machinery, Mechanical Works, Engineering in all branches, Chemistry, Metallurgy, Agriculture, Heat, Architecture, Domestic Economy, Agriculture, National History, etc.
THE SCIENTIFIC AMERICAN should have a place in every Dressing, Shop, Office, School or Library. For names of Dealers, Engineers, Superintendents, Directors, Presidents, Officials, Merchants, Farmers, Teachers, Lawyers, Physicians, Clergymen, People in every walk and profession in life, will derive satisfaction and benefit from a regular reading of the Scientific American.
TRY IT!—It will bring you valuable ideas; subscribe for your sons—it will make them many an self-reliant; subscribe for your workmen—it will please and assist their labor; subscribe for your friends—it will be likely to give them a new idea.
Former price a year, \$1.50 six months. Remits by Postal Order or Check.

PATENTS.
Any person who has made an invention, and desires to know whether it is probably new and patentable, can obtain advice concerning the same, free of charge, by writing to Mun & Co., publishers of The Scientific American, 136 Broadway, New York. For the past forty years we have acted as a branch of their business, the obtaining of patents. Many of the most reliable and successful inventors have been advised through this Agency. The specification and drawings for more than one hundred thousand patents, first-class Co. Patents have been issued through this office. Patents obtained in Canada and all other countries. Hand-book about patents free. Address, MUN & CO., 136 Broadway, N. Y.

THE BACKUS WATER MOTOR
It is the most Economical Power Known
FOR DRIVING LIGHT MACHINERY
It takes but little room.
It never gets out of repair.
It can not blow up.
It runs on fuel.
It needs no engineering.
There is no delay in setting up, no ashes to clean away, no extra labor to pay; no repairing necessary; no coal bills to pay, and no extra cost for fuel.
It is invaluable for moving Church Organs, for running Printing Presses, Sewing Machines, Turning Lathes, Sewing Sew, Grind Stones, Coffee Mills, Sawing Machines, Feed Cutters, Corn Mills, Elevators, etc.
Four-horse power at 40 pounds pressure of water. It is noiseless, neat, compact, steady and above all

IT IS VERY CHEAP.
PRICE, \$15 to \$300.
Send for circular to the Backus Water Motor Co., Newark, N. J., stating paper you see advertisement in.

MANHOOD
How Lost, How Restored!
We have recently published a new edition of Dr. Culver's well-known Celebrated Essay on the radical and permanent cure (not medicine) of Nervous Debility, Mental and Physical Inactivity, Impotence to Marriage, etc., resulting from excesses. Price, in a sealed envelope, only 4 cents, or two postage stamps.
The celebrated author in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured, and the dangerous use of internal medicines or the use of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, vigorously and radically.
The literature should be in the hands of every youth and every man in the land.
Address,
The Culver Medical Co.,
44 Ann St., New York.
Post Office Box, 459.

THIS PAPER
is published weekly, except on Sundays and public holidays, at 11 N. W. 10th St., Bridgetown, N.S., for the Proprietor, J. W. Beall, at the rate of \$1.50 per annum in advance, or \$1.00 per month. Single copies 5 cents. Advertising rates on application.

DR. JOHNSON'S PINK PILLS
These pills were a wonderful discovery. No other like them in the world. Will positively cure or relieve all manner of disease. The information around each box is worth ten times the cost of a box of pills. Find out how to get them, and you will always be thankful. One pill a day. Parson's Pills contain nothing harmful, and are so innocuous—the medicinal power of these pills, they would walk 100 miles to get a box if they could not be had without. Send for 25 cents in stamps. Illustrated pamphlet free, postpaid. Send for the information very valuable. I. S. JOHNSON & CO., 22 Custom House Street, BOSTON, MASS.

Water New Rich Blood!
LAWRENCETOWN PUMP COMPANY,
(ESTABLISHED 1880.)
N. H. PHINNEY, Manager.
THE CELEBRATED Rubber Bucket Chain Pump, FORCE PUMP, with Hose attached if required.
We are prepared to manufacture RUBBER WATER PIPES for use in distilling, conveying water under ground, can be delivered in any quantity on the shortest notice. Send for Price List.

DRYSDALE & HOYT,
MANUFACTURERS OF
MONUMENTS, TABLES, HEADSTONES, Etc.
IN AMERICAN AND ITALIAN MARBLE. Also Granite and Freestone Monuments in the most Graceful Designs.

Curbing and Fencing Lots in Cemeteries
A SPECIALTY.
MANTLES, TABLE TOPS, SOAP STONE, FOR STOVE LININGS, TO ORDER.

WE respectfully beg to solicit a share of public patronage, and hope by strict attention to business, square dealing and promptness in filling all orders, to merit the same.
I have been awarded a reputation throughout this County by my connection with Mr. O. Whitman, as foreman of his marble works, for the excellence and perfection of his work, and all persons favoring us with their orders may rest assured that the same careful attention to all orders will be given.
We will be found for the present
Near the SKATING RINK, BRIDGETOWN, N. S.
A. J. DRYSDALE, W. J. HOYT.

A Letter from Quebec.
(Translated from the French.)
GENTLEMEN,—
I have deferred writing the letter to testify to the benefits derived from the use of your SIMON'S LINIMENT. It has done wonders among all the people who have used it. I can testify that in every case where I have used it myself I have been very well satisfied.
Mr. N. Money of St. Sylvester, had a bad leg, which was said to be incurable. I told him to use SIMON'S LINIMENT, and it has effected a complete cure in a very short time. His neighbor, Mr. John Devlin, having received a serious cut on his leg, Mr. Money took him the Liniment, and, having used it, found himself completely cured.
I have been assured of the cures of these people, and the remedy having become known it has created quite a demand; people coming as far as 35 miles to procure it for themselves. Mr. Wm. Bennett, of St. Ferdinand, has had some time for himself, and he has done it for his friends who suffer from rheumatism, and they have all been well satisfied. I have never known any medicine to have had such good results about here as SIMON'S LINIMENT. Hoping that it will prove as satisfactory elsewhere.
I am very truly,
DAMASE PAGROT, Merchant.
St. Sylvester, Quebec, 27th Dec., 1887.

SUSAN DENNISON, Administratrix.
Bridgetown, Feb. 22nd, 1888.

The Washerwoman's Song.
Wring out the old, wring out the new,
Wring out the black, wring out the grey.
Wring out the white, wring out the blue—
And thus I wring my life away.
An occupation strange to mine;
At least it seems to people round me,
That while I'm working at the line,
I'm going, too, from pole to pole.
Where'er I go I strive to please,
From morn to night I rub and rub;
I'm something like a tub—
I almost live within a tub.
To scrub the wall and spring
To wash the floor and
To make their living in the ring,
And by the wringer I make mine.
My calling's humble 'I'll agree,
But I am no cheap clerk;
And some folks are who sneer at me;
I'm something that will wash, you know.

Select Literature.
A Terrible Ten Minutes.
A STORY OF THE MIDNIGHT MAIL.
It happened one afternoon last year, during the month of November, that I received a telegram calling for my presence in London early the next morning on an important business matter. To such a summons there was but one answer possible, and with a regretful thought for a card party I should have to forego, I wired back this reply:—
"Mr. J. Devon, Anderson's Hotel, London.
I shall leave Bridgetown by the 11 o'clock train, and will call on you to-morrow at 8.15."
Having dispatched this message, I finished off the day's work with all speed, and then returned to my lodgings to make preparations for my journey. These, as the household reader need not be told, consisted principally of cramming a soap cap and a spirit-flask, together with a few other necessaries, into a carpet-bag, after which followed the discussion of a hearty meal, and the delivery of an exhortation to my landlady to feed my fox terrier, Grizby, at his usual hour.
The remainder of the evening was spent in skimming over the morning's paper, wherein I found little to interest me. In disgust, I flung the thing on the floor. It alighted at a graceful angle, on whose apex appeared the heading, conspicuous as a leaded type could make it: "Shocking Wife Murder in Burton's Arrest of the Murderer."
With a mental apology to the publishers of the Chronicle for the injustice I had done them as caterers to the public craving for horrors, I picked up the paper and proceeded to digest the "harrowing details."
But her face, how terribly was I shocked! Instead of the dainty pink flush I had last seen, there was a ghastly whiteness in her cheeks, and her eyes were staring from her head with terror. Holding up one finger, as if to command silence, she passed me the paper, on which were written the following words:—
"Some one is underneath the seat, and has just touched me."
Was it the dream which filled me with the thought that this was an old alarm? I cannot tell; but this much I know, that in an instant there flashed across my mind with overwhelming force the thought of the escaped wife-murderer.
Returning my companion's silence by a gesture of acquiescence, I wrote upon the paper:—
"It is probably only a dog. Shall I look under the seat?"
Her answer was short and to the point: "No; do not look. It was a hand."
Here, then, was a sufficient dilemma; and my companion with what had passed between my fellow passenger and myself, it was a dilemma that I felt almost disposed to welcome. The male sex in my person was about to assume his rightful position of pretension to its weaker would-be independent companion.
I was my revenge; and yet, the reader will be promised to be wholly pleasurable.
My first action was to remove any suspicion that there might be in the mind of the mysterious third occupant of our carriage, through the presumable accidental action of having touched the lady's dress. Giving vent to an audible yawn, as though I had just awakened from sleep, I remarked, in a tone of cool indifference:—
"You really must excuse my addressing you again, madam, but will you permit me to smoke, to enlighten this tedious journey?"
As I spoke I accompanied my words by a meaningful glance, and was favored with the reply:—
"Certainly, if you wish it, I cannot prevent you."
Thereupon I produced my pipe and tobacco-pouch and proceeded slowly to fill the former, as I thought out a plan of action. On reference to my watch, I saw that the train would stop in another ten minutes. Clearly the only thing to do was to wait till the train reached Blackley, and there get assistance to find out who our unknown travelling companion might be.
The longer I pondered over the problem the more anxious for its solution did I become, and thus, heedless of the warning I had received, I struck a match and intentionally dropped it. Steeping down, with a muttered malediction, to pick it up, I cast a searching glance underneath the opposite seat, and then my blood ran cold, as the faint gleam of the taper revealed the back of a man's head with the mark of a tattooed crown upon it.
Chippy Watson, then, was our companion—a dæmon and desperate man, who by a mighty effort, I controlled my voice sufficiently to say:—
"Excuse me for reaching across you, madam, but that was my last match, and I could not get it to go out."
The girl, into whose white cheeks the color showed no trace of returning, murmured some unintelligible reply, and for a moment we sat in silence.
Again I looked at my watch. Thank Heaven, in five minutes we should be at Blackley, and the awful ride would be at an end. Soberly had the thought formulated itself, when the girl opposite me sprang up, trembling like a leaf, and exclaimed:—
"I could not stop her—"
"I could have touched her foot again!"
The moment the words left her lips, I heard a sudden movement under the seat, and quicker than thought, a figure appeared upon the floor. In that moment I flung myself upon the ruffian and clutched his throat with the energy of despair, knowing that the very hands of justice would be all over with me, the lighter and weaker man. Can I ever forget the horror of that five minutes' ride? The whole compartment seemed to be falling upon me. Teeth, nails, feet, all seemed to be attacking me at once, but through all I kept my grip upon the murderer's throat, and though I streamed with blood and almost lost consciousness, still held on, while the girl's screams rang dimly through my ears. Suddenly the train stopped, the struggle ceased, and I fainted across the body of my captive.
When I recovered consciousness at length, I found myself lying on a table in the Blackley Station waiting-room, with a sympathetic crowd around me, and, best of all, I saw a face bending tenderly over me, the face of the girl of my dream and my discomfiter. After making two or three efforts, I managed to ask:—
"Where is Watson?"
"Very high dead," replied a rusty-faced farmer who stood beside me. "You three quarters strangled the life out of his ugly body; he was black in the face when they lifted you off him!"
"Do you know that he is the escaped wife-murderer?" I inquired feebly.
"Yes, we know," responded my honest friend. "The Burton's police telegraphed after the train to have it searched, because a man answering to his description had been seen in the station before it left. The police have got him safe, I say, this time, and no mistake. Why, I saw him handcuffed and his arms pinioned behind him, and he a-ying half dead while they dragged the thralling ass you gave him."
"Do my readers want to hear the rest of my story, now that the catastrophe is told?"
"If so, I will inform them that Watson, on leaving the train, the police, after turning the corner of St. Paul's—where it will be remembered he disappeared—contrived, by an almost incredible effort, to scale a high wall, and so gain the shelter of a railway embankment. Along this he crept until he reached the mid-town tunnel where he had lurked all day, until, late in the evening, he crept into the station, and contrived to secret himself in a carriage of the midnight mail, with the result before mentioned.
There is one more incident in close connection with the journey to be told. It is, that there will be a marriage early this spring. The name of the bridegroom will be Kightly; the name of the bride does not matter. She was informally introduced to her future lord and master, and therefore it is surely unnecessary to tell the same she will soon cease to bear, to a passing acquaintance like the reader—

Picking Up The Rare Coins.
THE WORK OF BANK TELLERS WHEN THEIR DAY'S LABOR IS OVER.
"Do you know what a good many bank tellers and men who handle large amounts of gold and silver coins do at the close of the day? I guard a former bank clerk in conversation with a Chicago Tribune writer.
"Go home, probably."
"Yes; but not until they have looked through their metal cash for rare coins."
"Do they ever find any?"
"Certainly they do sometimes, though not so very often. It is a lottery. The fact that some of the rarest of American coins have been picked up in ordinary circulation keep their eyes peeled. They know value pretty well, and the sanguine church, the hope of something one of the missing dollars of 1834, which are worth \$200 each. In fact, as high as \$300 has been offered and refused. The half-dollar of 1852, representing Liberty seated, is in circulation. It is worth \$1.75. The quarter of 1853, with rays, is also occasionally met. It brings \$2. Among silver dollars of recent coinage, the 1858 dollar, representing Liberty seated, is the most valuable. It is worth \$15. The dollar of 1838 has a flying eagle on the reverse side. It is worth \$10. The dollar without notice. It is worth \$10. So is the same coin of 1839. Both are in circulation. The 20-cent piece of 1877 is worth \$1.50, and of 1878, \$1.25. They are to be met, though rarely. The valuable dime and half dime were all coined before 1836. The silver 3-cent piece of 1873, with the large star, brings 60 cents; the copper 2-cent piece of the same year is worth 10 cents. The flying eagle year of 1855 sells for \$1 each. All the gold coins coined prior to 1833 command premiums."

The Use of Grocery Paper.
I was reading the other day how to use everything that comes into the house. But the book said that there was no use that could be made of coarse brown grocery paper, either for ornament or service. The book is wrong. The coarse brown paper is a great absorber of grease. Keep it in sheets, one above the other, with a board on top. This paper will absorb the grease inside and outside of iron kettles, frying pans and any other article, by making a loose wall and wiping out the grease. In this way much slopping of water, much waste of soap, and terrible dirty dishes and towels may be avoided.
Brown paper laid over and under a greasy spot on a garment, and then passed over with a warm iron, will, at least partially, remove the grease. In the same way it will take up in absorb grease from woollen articles, such as shawls, beards or strained through the soap grease, if it is full of fat and no soap or other particles on it.
I always wipe out the frying pan with brown paper before washing it. I use this paper continually in my little home, and consequently my dishes are clear and dry, my homedish dishes are like new, my kitchen towels are black but clean, and my kitchen paper is as good as new. I use it in the same way it will take up in absorb grease from woollen articles, such as shawls, beards or strained through the soap grease, if it is full of fat and no soap or other particles on it.

Feminine Fancies.
The rage for tinsel has extended to the jerseys. Dark red, blue, and brown jerseys are braided with spiral whorls of tinsel galleons. A gray one is covered with silver braids set on in a semi-circular pattern. A fashion now is to veil the front of delicate bodices with a fichu; this is caught in a sharp point at the back, making the opening V shaped. It does not cover much of the shoulders, and crossing, at the front fastens at the waist in another point. The use of lace for neck and sleeve wear is increasing. Instead of the smooth bands of silk and canvas, which have so long been popular, the dressmakers are sending home dresses with narrow veils of many lace plaited thickly in at the wrist and neck.
The narrowest width of picot-veiled ribbon, too, is forming a large part of the neckwear and appears in a great many of the dainty ribbons, vests and plastrons of transparent materials which are worn with simple costumes to make them more dressy. A ruffling for neck and sleeves is made of many loops of this narrow ribbon set into a band, and though it is frequently made up in colors, white is always prettiest and most effective.
Women who have pretty feet, and who find shoes more becoming to their feet than boots, have most ingeniously solved the difficulty of wearing low shoes in cold weather. They still cling to their dainty little ties, but wear with them thick cloth gaiters, which button half way up the calf, and are not only pretty but very good warm. They are fleece lined, making them warm like boots, and are of dark blue or black cloth.

Some Good Men in Chicago.—Candidates for office are prevailing the voters in such a reckless way already, that it is a great relief to attend the funeral of a citizen, and thus see a man who cannot be suspected of having political aspirations of any sort.—Chicago News.

He Was in Charge.—Inquisitive Irish undertaker—'Mine, sor?'—Life.

WHAT WOMAN OUGHT TO DO.
The most important thing is to look after her health. For her special weakness, Patne's Coler Compound is the best remedy. It builds up her general health, removes acidity, and so keeps her young with her children.

ANOTHER ITEM.
Mr. J. Thompson, of Elm, Ont., writes that he suffered from general weakness and was so reduced that at times he became almost unconscious. Three bottles of Burdock Blood Bitters completely cured him, and he now recommends B. B. to his friends and neighbors.

Washing Woollens.—As woollens are worn so much through the winter I would like to give my way of washing them. I never wash two different colors in the same water, to begin with. Of course it is a trouble, but anything that is particularly troublesome, I use water a little hotter than tepid, and made very soapy, both to wash them and to rinse them, and am careful to preserve the same temperature in both. If it is a garment with a shape to it, I carefully pull it into shape and hang it over the line. I think much of the a ringer is due to hanging them in the cold dry. I never send wool stockings to the 'regular wash,' but make them myself. Longer stockings I roll in a towel till partly dry, and iron immediately. I think a good plan is to leave them for some other day than the regular wash-day.

Two Men of Dearborn County, Indiana.
CUTLER TWO STORIES HORSE.
Quite a novel contest came off at Bright, in Dearborn County, Indiana, recently, William Liddle, a merchant, and Jesse Crim, a blacksmith of the village, offered to wager \$25 that they could outpull any two horses in the township. Steve Cook, a farmer who possessed a fine team, and believed that they could outpull anything from a porous plaster to a steam engine, accepted the bet, and Friday afternoon, in the presence of a number of neighbors and friends of the respective contestants, the trial of strength was made. Liddle and Crim lay flat on their backs with their feet firmly secured against an immovable structure arranged for the purpose, and with their heads pointing toward the horses that were hitched to the ropes, feet away to a piece of timber held firmly in the hands of the prostrate men. The test was to be decided by the horses, either pulling the timber from the hands of the men, or pulling them from the ground to their feet, three trials and three minutes' steady pulling each trial the extent of the contest, while the excited farmers and villagers crowded around the parties to witness this singular feat of strength and endurance.
The horses two different times were whipped into pulling their best, but with distended muscles and swelling veins that told of the terrific strain upon them, the prostrate men held the horses to their position. At the third trial the excited farmer lashed his horses to force them to their utmost, and the excited farmer said the timber in the hands of the resisting men, and to which the horses were hitched, snapped in two pieces, and the piece striking Crim in the side as it broke, rendering him unconscious for nearly an hour. He was supposed to be dead, but finally recovered, and to out of all danger of serious results from the blow.
But now as the third trial was not determined before the accident occurred a dispute has arisen as to whether the contest must be held as soon as the parties are all ready and the weather permits.

RANDOLPH GARDNER'S DEED.—I must go and hang up my hat, says a young Detroit motorist who was entertaining evening company.
"Do her eyes trouble her?" asked one of the friends sympathizing with the mother, laughing. "Just as long as she can see a glimmer of light she will be awake and ask questions, but as soon as I hang up my hat she will be asleep."
"Sure enough, not another word was heard after the little girl's eyes were tied up."
"I never heard of such a thing," said the friend. "Is it a punishment?"
"Not at all. The child likes it. The sensation gives her something to think about, and in a moment she falls to sleep."
"It is an original idea!"
"It is an Indian custom," said the handsome brunette eyes, and a young Detroit motorist who was entertaining evening company.
"Do her eyes trouble her?" asked one of the friends sympathizing with the mother, laughing. "Just as long as she can see a glimmer of light she will be awake and ask questions, but as soon as I hang up my hat she will be asleep."
"Sure enough, not another word was heard after the little girl's eyes were tied up."
"I never heard of such a thing," said the friend. "Is it a punishment?"
"Not at all. The child likes it. The sensation gives her something to think about, and in a moment she falls to sleep."
"It is an original idea!"
"It is an Indian custom," said the handsome brunette eyes, and a young Detroit motorist who was entertaining evening company.

P. O. Byram, of Madawaska, N. B., sends us a letter protesting in strong terms against the proposed extension of the country to be stripped of its forests by the present lumber policy of our Dominion and Provincial governments. He urges that much might be done to avert the exhaustion of our timber supply, if the exportation of the raw or half-manufactured material were prohibited, and that wood were only allowed to be exported in the shape of the fully manufactured article. "From the Atlantic to the Pacific," he says, "we don't want to ship out lumber. It is manufactured to meet the domestic wants of all countries. It could be manufactured in the Dominion and put together at the place of destination. There would be no loss in paying freight on waste lumber, and it would employ an army of laborers, and boom the country. It is Byram's idea is well worthy of thoughtful consideration.—Canada Lumberman.

Almost a Panic.
An examination of the weekly report of deaths for the past month in Boston and other towns and cities of the country, reveals an alarming condition, owing to the great increase of deaths from pneumonia as compared with previous years.
If this increase continues as it has for the last weeks, a panic will certainly result. For example, the weeks ending Jan. 14 and 21, one-fifth of the deaths in Boston from all causes were the result of pneumonia. More than one hundred people died of this dreadful disease in that short time and the mortality all over the country seems rather to be increasing than abating. It is possible that medical skill and science can find no means to battle and cure this terrible plague. There are some powers, and all theories regarding the disease, are broken down by its universal ravages. Neither old, middle-aged, or young persons are exempt. Tendency to lung trouble used to be considered a predisposing cause for pneumonia, but this season the strongest and most healthy lungs in men and women seem to be no safeguard. We believe, however, that it is possible to prevent the disease, and that, too, by a simple remedy within the reach of all. We read lately in a pamphlet published by Dr. I. S. Johnson & Co., Boston, Mass., a method of treating pneumonia by the use of Johnson's Anodyne Liniment.
Certainly the remedy is simple, and can be obtained almost anywhere, and is an absolute fact that no remedy known will break up and cure a cold so quickly as the old-fashioned household remedy. And a severe cold is always without exception the first stage of pneumonia.
Johnson & Co. will send a copy of the pamphlet to any person, free. The directions given for preventing pneumonia are based on sound and common sense, and without a shadow of doubt, would succeed nine times in ten.

Washing Woollens.—As woollens are worn so much through the winter I would like to give my way of washing them. I never wash two different colors in the same water, to begin with. Of course it is a trouble, but anything that is particularly troublesome, I use water a little hotter than tepid, and made very soapy, both to wash them and to rinse them, and am careful to preserve the same temperature in both. If it is a garment with a shape to it, I carefully pull it into shape and hang it over the line. I think much of the a ringer is due to hanging them in the cold dry. I never send wool stockings to the 'regular wash,' but make them myself. Longer stockings I roll in a towel till partly dry, and iron immediately. I think a good plan is to leave them for some other day than the regular wash-day.

Two Men of Dearborn County, Indiana.
CUTLER TWO STORIES HORSE.
Quite a novel contest came off at Bright, in Dearborn County, Indiana, recently, William Liddle, a merchant, and Jesse Crim, a blacksmith of the village, offered to wager \$25 that they could outpull any two horses in the township. Steve Cook, a farmer who possessed a fine team, and believed that they could outpull anything from a porous plaster to a steam engine, accepted the bet, and Friday afternoon, in the presence of a number of neighbors and friends of the respective contestants, the trial of strength was made. Liddle and Crim lay flat on their backs with their feet firmly secured against an immovable structure arranged for the purpose, and with their heads pointing toward the horses that were hitched to the ropes, feet away to a piece of timber held firmly in the hands of the prostrate men. The test was to be decided by the horses, either pulling the timber from the hands of the men, or pulling them from the ground to their feet, three trials and three minutes' steady pulling each trial the extent of the contest, while the excited farmers and villagers crowded around the parties to witness this singular feat of strength and endurance.
The horses two different times were whipped into pulling their best, but with distended muscles and swelling veins that told of the terrific strain upon them, the prostrate men held the horses to their position. At the third trial the excited farmer lashed his horses to force them to their utmost, and the excited farmer said the timber in the hands of the resisting men, and to which the horses were hitched, snapped in two pieces, and the piece striking Crim in the side as it broke, rendering him unconscious for nearly an hour. He was supposed to be dead, but finally recovered, and to out of all danger of serious results from the blow.
But now as the third trial was not determined before the accident occurred a dispute has arisen as to whether the contest must be held as soon as the parties are all ready and the weather permits.

RANDOLPH GARDNER'S DEED.—I must go and hang up my hat, says a young Detroit motorist who was entertaining evening company.
"Do her eyes trouble her?" asked one of the friends sympathizing with the mother, laughing. "Just as long as she can see a glimmer of light she will be awake and ask questions, but as soon as I hang up my hat she will be asleep."
"Sure enough, not another word was heard after the little girl's eyes were tied up."
"I never heard of such a thing," said the friend. "Is it a punishment?"
"Not at all. The child likes it. The sensation gives her something to think about, and in a moment she falls to sleep."
"It is an original idea!"

Almost a Panic.
An examination of the weekly report of deaths for the past month

General News.

It is stated that the construction of Bishop Country will take place on St. Mark's day, Wednesday, 25th April. The new Bishop has four sons and one daughter. The latter is at school in England. It is not yet decided whether the ceremony will take place. -Herald.

Toronto, March 4.—There has been great excitement among the temperance and liquor people over the proposed repeal of the Scott Act. The returns are not yet completed, but the report of the act has been carried by a majority of about 200.

At New Orleans, at the Colonial and Indian Exhibition, at home and abroad, "The Newcomb" has become famous for its purity of tone and general excellence. It has no superior and no equal, price and quality considered. Send for illustrated catalogue of valuable information to Newcomb & Co., Toronto, Ont.

—This is the season of the year when everybody old or young should take a bottle of Dr. Norton's Dock Blood Purifier, which is very popular in this town, as more of it is being taken every day, and the people have proved to be a good appetizer, tonic, and blood purifier. It is a splendid for all diseases of the liver and kidneys.

STRANGE ACCIDENT.—At the Acadia Mines, Londonderry, on Wednesday, a young man named South Davidson was very severely burned by the explosion of a molen chaser, which he was removing from a puddling furnace. As the explosion occurred he was fortunately able to turn partially around, when his head, back and shoulders were almost completely covered with the red-hot iron. He had a rough of water near by, which probably saved his life.
