KENT & TURCOTTE, Public Accountants & Auditors. 7 PLACE D'ARMES SO. Jacques-Cartier Bank Building, Montreal.

A. L. KENT ALPHONSE TURCOTTE.

431

The business was but a small affair. MESSES. E. L. BONDER D. J. Stewart Browne, two well-known insurance managers of this city, left on Monday last on a business trip to England.

W. GARDINER, Sr., a Toronto confectioner has cleared out, leaving nothing behind except two writs against him and also two executions one for \$25, the other for about \$200.

MESSNS. LETELLER & DUBORD, grocers, Quebec, have compromised with their creditors at 70 cents in the dollar, payable in four, eight and twelve months, secured. Their liabilities are about \$30,000, and principally local.

EDGAR EAKINS, a waggonmaker of Streets. ville. Ont., is reported to have absconded, leaving behind him little or no assets. One creditor is said to have secured his claim in time, but another, less fortunate, issued a capias in vain, as the bird had flown.

The FIRST nickel-plate factory to commence operations in Canada is reported as preparing to open next spring at Beauharnoia, Que., with a capital of \$25,000. It is to cost \$10,000, to be 42 by 80, and four storeys high, and will employ a number of hands.

H. N. CURRER, of Bedford, Que., a dealer in agricultural implements, has left the country, leaving behind, three notes, said to be forged, in the hands of one of his creditors. He is said to have done business re klessly and not over-fairly, and his creditors are now looking into his affairs, the result of which will be made known in a few days.

432

DAVID FALCONER, flour and commission merchant, Hulifax, who failed and assigned on the 5th inst.; is now offering to pay in full, with interest. He was formerly a distiller and retired with ample means; after seven years of inactivity he again entered the arena, but, owing to competition and losses sustained by failures of customers, the business came to a standstill. Liabilities \$13,000; assets are in the form of real estate but are not estimated.

ABRAMS & KERR, machinists, who embarked in St. John, N.B., about seven years ago, and who are reported to have done a fairly careful business, failed and assigned on the 9th inst, but have not yet made any offer to their creditors. Liabilities are \$16,000, and are just covered by the assets, consisting of stock and household property. They had no capital at starting, and their closing down was caused by carrying too large a stock.

E. EDWARDS, harnessmaker, Lucan, Ont., who failed on the 1st inst., assigned in trust on the 5th. Liabilities \$1,200; assets \$350, consisting of harness; hardware, whips; and some doubtful book debts. His failure is attributed to business incapacity, want of capital and selling under cost. He formerly did business in Arva, Ont., where he is said to have been accustomed to auction off goods and stock when pressed to meet his bills.

WM. CROMPTON, Cornwall, grocer and confectioner, who started there about six months ago, has left for parts unknown leaving behind him liabilities of about \$500 and assets of \$200. His business experience was very limited, and his cotton mill wages were depended on to run

the store, his wife taking charge in his absence. His absconding was caused by the temporary shutting down of one of the cotton mills, and he is expected to return when it resumes operations.

TIMOTHY DWANE, a founder of St. Hyacinthe, Que., who formerly did business in this city, and compromised last year at 10 cents in the dollar, failed, and assigned on the 12th inst., through endeavoring to carry on too expensive operations for his capital and capacity. He started five years ago with a capital of about \$5,000 in cash. No settlement or compromise is asked for, or possible, and Dwane is completely discouraged, as he owns property which is mortgaged for its full value.

The sheriff of Hamilton is in possession of the estate of Mrs. W. Bell, a milliner, of that city, doing business under the firm name of W. T. Bell. She has apparently been doing fairly, but claims to have been robbed about six weeks ago of about \$300 worth of feathers at her store and of several hundred dollars a few days after at her house. The circumstances surrounding the alleged robberies were such as to lead some creditors to suspect that failure was not improbable. She is not supposed to have anything outside of the stock, which was of ordinary size.

The Quebec lumber firm of Benson Bros. & Co., who failed about a month ago, have assigned, and are said to be offering 50 cents in the dollar. Their liabilities cannot be computed at present, and their assets are held as security by an English firm who have not yet taken action. Their trouble is supposed to have been caused by the unavoidable absence of both partners. last season, to a bad turn out of logs, and a general depression in prices. One of the firm is said to be possessed of real estate which is, however, mortgaged to the erient of over \$6,000. The exports from Toronto, for October, 1883, were \$312,411, of which \$303,041 were Canadian products. For October, 1882, her exports amounted to \$609,451,0f which \$598,373 were Canadian products. The imports for October, 1883, were \$1,392,471 against \$1,488,075 for October, 1882. For the quarter ending September 30th last, the imports were \$5,319,856; entered for consumption \$5,000,593; duty collected \$1,066,756,83. For the same quarter in 1882 the imports were \$5,903,860; entered for consumption \$5,855,464; duty collected \$1,243,411.29.

DAVID FALCONER, flour dealer and commission merchant, Halifax, failed on the 1st inst. and assigned on the 5th for the first time during forty years of business life. He expects to pay in full the indirect liabilities of \$30,000. The direct amount to \$13,000. Assets \$20,000 in real estate, which Falconer confidently says is worth \$30,000 over mortgages, but this is generally considered an over-estimate. His trouble is attributed to doing business on too small profits, and more particularly to sbrinkage in real estate values, in which much of his capital was invested.

BUSINESS in general is reported fairly good in Strathroy, Ont., and the merchants and others of that town who had been carrying on business through A. Johnston's bank are now, found to have all the facilities they require in the chartered bank branches. A new hardware firm has just been established under the name of "Dumbrill & Nugent," the former of the late firm of Dumbrill & Co., the latter a physician of some means John Robertson's "stove and tinware store " has been enlarged, and more workmen engaged; Edwards & Cross have bought the grocery lately carried on by W. J. Johnson, a brother of A. Johnson, the lately unseated M.P.P. for West Middlesex,

depression in the lumb r business, the demand

from Great Britain and elsewhere having fallen

MR. S. W. BEARD, coal merchant, this city, has

given rise probably to as many suits in the

Superior Court during the last few months as

any man in Montreal. His coul and financial

operations have already been referred to. A

few days ago Mr. Beard was arrested on a capias

and writ of attachment for over \$5,000. The

affidavit alleged that the defendant recently

caused certain of his friends to seize 3,500

tons of coal belonging to him, and to advertise

off to a small proportion of previous years.

uncertainty concerning some recent expenses. Mr. Horsman is not likely to resume business elsewhere.

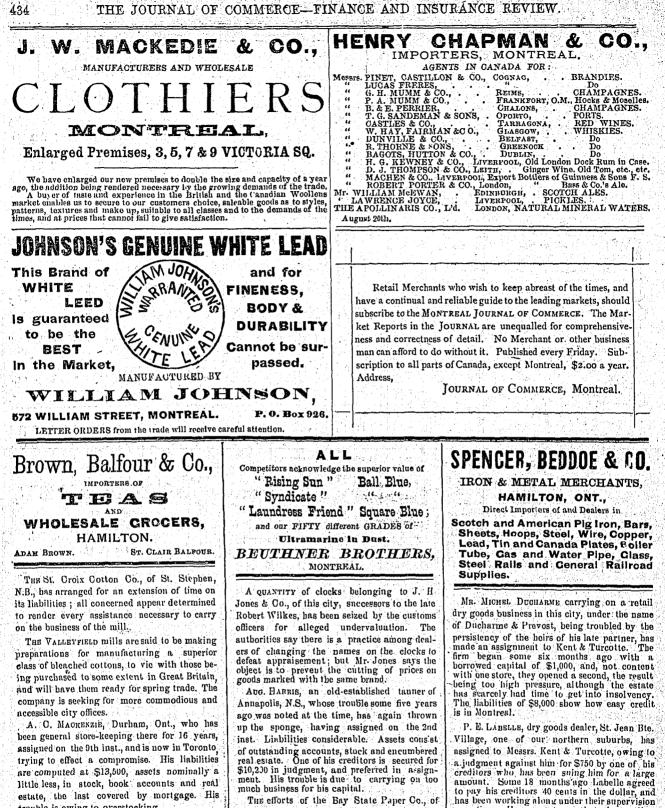

THE LIABILITIES of Field & Davidson, the Hamilton saddlery hardware firm, referred to last week, are estimated at \$50,350; the assets consist of stock inventoried at \$26,400; sundry and open accounts, \$21,700 ; cash, \$50. The real estate, valued at \$14,000, is covered by mortgage. The estate may turn out better than at first supposed.

T. H. LACKEY, a confectioner of Ottawa for the last six years, is now offering to compromise at 40 cents in the dollar, in 3, 6, 9 and 12

o'clock ; that sufficient publicity was not given to the sale, and that the general features led to the suspicion that it was done for the purpose of defrauding the cr ditors. On hearing that the sale had taken place, the coal being sold for \$1,200, a sum considerably below its market value, Mr. Beard was arrested and at last

433

Ont.; who commenced business last fall-failed on the 9th of last April, and assigned on the 25th of that month-have now assigned in trust. with liabilities of \$7,500. The stock of about \$2,200 has been sold at 821c in the dollar ; the book debts, claimed to be worth \$3,000, realized \$200; some ra lroad ties were valued at \$1,500; T 1 y also possessed lands principally unpatent! ed!, About a year and a half ago McRae went to Hamilton to buy goods, and showed a surplus of \$6,000. In the following spring he returned and proposed a compromise with his creditors. who thereupon had him arrested for obtaining goods under false pretences. He was acquitted, and promptly issued a writ against one of his prosecutors, a leading firm in Hamilton, for \$10,000 damages. His suit is now pending.

Springfield, Mass., to enter a large quantity of J A. DEASE, a lumberman and shipowner of writing paper through the customs at a valua-Port Rowan, Ont., who was doing quite a large tion of about 7 cents have been frustra.ed. business, is now compromising with his credi-The goods have been scized, and are held pending the decision of the Ottawa Depart-ment, whither the agent, one Andrews, has gone to plead his case. A sample of the goods a ized was carefully sent to Holyoke, Mass., for tors-a state of affairs brought about by speculation in a steam mill with a large stock of logs, etc., prices going down, and the absence of a market. trouble is owing to overstocking.

all his ussets.

000, assets about \$13,000. IT is with regret that we announce the assignment of Messrs. Willing & Williamson, the well-known Toronto booksellers. Both gentlemen were well adapted to the business; they were economical and industrious, but through

meantime. He now states that the creditor referred to, Mr. P. P. Martin, damaged his

credit by his action, and he seeks satisfaction

in a suit for \$15,000 damages. Liabilities \$11,-

He has a lot of 100 acres near town which is, however, decded to his wife. On one occasion in Winnipeg, partly under the influence of local dispositions, McAlpine invested \$4,500 in real

Action was recently taken in the case of Greenshields vs. Dubeau to test the validity of a seizure made by plaintiffs on behalf of Messrs. Gillespie, Moffatt & Oo., the well-known im-porters, this city. The goods were purchased bility is the remainder will be a total loss. He first arcused the suspicions of his creditors by suing himself in the name of his wife, but the above-mentioned execution for \$1,200 got in ahend of him. From present appearances he has not been solvent for years.

published to the world. Our position is simply this :-- We hold that it is the interest of the Government, as representing the people generally, to aid, so far as in their power, those who have undertaken the construction of a great public work, to which, long before they had anything to do with it, the public faith had been pledged. We hold that there is no question at present of " better terms." We do not ourselves believe that the Globe has any authority for the statement that " those who are building the road were in "such difficulties that they must stop un-"less the Government came to their re-"lief." What we understand is that it was deemed by the parties referred to, situated as they were, and with \$45,000,-000 of unissued stock, to be a wise course to pursue to obtain a Government guarantee of 3 per cent to the whole stock of the Company for a period of ten years. This arrangement the directors of the Canadian Pacific Railway Company deemed to be for their interest, and as it is one involving no risk to the Government, and which can probably be carried out without the least inconvenience, we maintain that it was most desirable to meet their wishes.

We are unable to state how the erroneous statement obtained circulation that the Company were at once to purchase the annuities required to meet the interest on the whole \$100,000,000. As there is no intention of placing more than \$10,-000,000 on the market at present, the presumption is that some one who had got hold of the main fact gave publicity to it under a misconception. With this the Canadian people have nothing to do. The stock certificates are to be deposited with the Government, and as they will not be issued until the value of the annuities has been paid there is no risk. There has been a good deal of speculation as to the policy of the Company paying such a large sum in order to obtain these annuities. On this point we are quite satisfied that the directors understand their own business a little better than those who have undertaken to criticise their policy. As to "stock-jobbing arrangements," it strikes us that it can hardly be called "stock-jobbing" for the directors to endeavor to place the stock on the principal, money markets of Europe and America at such prices as it will fairly command. The term "stockjobbing" may perhaps be applied to the efforts of the "bears " to drive down the stock at a time when there certainly has been no good reason for doing so. It will of course depend on the traffic returns

after 1893 what the value of the stock will be, but meantime the holders have a certainty of a fair return for their investments up to that date, and, judging from present prospects, there will be by the date mentioned a very large population in the North-West, sufficient to maintain a large traffic on a road which will be, so far as we know, the only road between the Atlantic and Pacific ports under one management.

We have no desire whatever to express an opinion, which we admit that we are wholly incapable of forming on any satisfactory data, as to the value of the stock in the future, and, moreover, it is quite beside the question which has led to these remarks. The naked fact is that the Dominion of Canada, having pledged itself to procure the construction of a railroad to the Pacific, and it being the opinion of its Parliament that it was desirable to do so through the instrumentality of a company, entered into a contract with certain Canadian and other capitalists, represented by the present company, on terms which were sanctioned by Parliament. In carrying out their contract the directors of the Company, believing it to be their interest to obtain a Government guarantee for 3 per cent interest on their stock for a period of ten years, made a proposition to buy terminable annuities, calculated on the basis of interest at 4 per cent, and to this the Government has, very properly in our opinion, assented. The arrangement has been carried out for \$65,000,000, which is all that the Government is at present liable for. As to the short delay in paying the balance of the capital, we can only observe that we are not aware whether any specific security has been given, but it is beyond question that the Government has the means in its own hands of compelling the Company to fulfil such an obligation.

We infer from a letter addressed to the New York Times by Mr. Duncan Mc-Intyre, Vice-President of the Company. that the original intention was to have issued only \$25,000,000 of ordinary stock. raising the balance by preferred stock and bonds each to the extent of \$10,000 per mile. We think the directors have acted wisely in placing the entire amount on the same footing. Mr. Mc-Inytre's letter is entirely satisfactory, but we have already brought the leading points to the notice of our readers. It is a sign of the weakness of the Globe's case that he dwells so much on the postponement of the guarantee of thirty-five millions-a most unobjectionable proceeding

on all sides, and not in the least affecting the guarantee of the whole hundred millions which was first announced and which has been agreed to. Another evidence of weakness in the *Globe's* case is the quotation and virtual endorsement of an article in the London Standard, written under a total misconception of facts.

WHOSE BUSINESS IS IT?

[COMMUNICATED.]

No one will dispute a man's right to invest his capital as he pleases so long as it does not interfere with the rights of the people or the liberty of others, to expend their money also in the manner most agreeable to themselves. The selfishness usually attributed to capital disappears as soon as that capital is expended in giving employment to others .-when the home distribution of wealth is no less secure than its accumulationfor whatever hopes of profit there may be, there is always more or less risk in its investment in manufacturing enterprises. Considerable feeling appears to have been aroused of late over the losses reported. as having been sustained by capitalists. and persons of wealth in this city and elsewhere throughout the Dominion, as though these losses had to be borne, by the public at large. A section of the public press has not hesitated to characterize the temporarily unfortunate. investors as persons of whom it is scarcely possible to speak with any degree, of forbearance. If any of these selfconstituted guardians of the public weal were asked in what manner the losses of manufacturers can concern them-the said guardians-or what business it is of theirs so long as the money thus expended in giving employment to tens of thousands of people came out of the pocket of the investor-was honestly acquired in the course of business-they. would be at a loss what to answer. If there has been over-production the loss falls upon none, but those who spent their capital in thus giving employment to the labor of the country, however selfish their motives may have been.

Many persons probably are thrown out of employment for a time, but there are greater numbers who still find remunerative occupation who would be obliged to seek employment elsewhere, had the capitalist been afraid to make the venture, or used his capital, say, in gambling in stocks, an occupation generally confined to himself and his broker. The

condition of things which recently overtook the cotton manufacturing industry in Canada as the result of over-production in the principal staples, although resulting in temporary inconvenience to some of those concerned, is not nearly of as much consequence as though there had been a proportionate over-importation. In the present condition of things the money is not lost to the country; and although "employment is of more importance than cheapness," the people have had-and are still having-the one as well as the other. In former years when over-importation resulted, money to meet it had to be provided for: the lessened demand for sterling exchange during the present season tends to prove that such foreign liabilities have been reduced to a comparatively low figure. While importers may claim some advantage as regards the use of moneys to pay duty as long as goods are kept in bond at their convenience, the contiguity of the home manufacturer enables them to buy if they choose, from hand to mouthaccording as orders come in. Quality, however, is of more importance than price, and no one will gainsay the superiority of the staple goods, bleached or unbleached, turned out by the Canadian mills. It is, of course, difficult to divert trade into new channels; thus, while recognizing the quality of our home goods, some leading firms continue to purchase in other markets where occasional depression or over-production also overtakes manufacturers, and where special inducements can occasionally be had by wealthy firms. Another advantage to the importer lies in the difference of texture which defeats any ordinary attempt at appraisement, enabling the seller to make his own price; while the honest home article is too well-known to carry more than a fair, price, and, as such, is not always so profitable to handle.

THE BANK STATEMENTS.

The usual summary of the assets and liabilities of the chartered banks will be found at foot. There is an increase in the liabilities, caused chiefly by a larger circulatation. The assets also show an increase of over two millions. The discounts are rather less than at the end of September, but the loans to corporations are nearly two millions more. The statement does not seem to call for any special comment. There is a slight increase in the Dominion note circulation, both in the large and small note issues:

LAPSES.

It is melancholy to contemplate the large proportion of life insurance policies allowed to lapse every year. The recent Report of the Dominion Superintendent of Insurance shows that policies covering nearly 63 millions of dollars terminated by surrender and lapse during 1882, an amount almost equal to one-third of the Canadian business of all the companies, Canadian, British and American, during the year, and nearly 41 times the amount terminated by natural causes. There was, however, an evident improvement as compared with the three previous years : the rate per \$1,000 in 1879, was \$109.86; in-1880, \$95.46; in 1881, \$73.60; and in 1882, \$67.18. This would seem to indicate that a considerable proportion of the lapses is due to inability rather than to neglect. There are but few agents who

possess the power to persuade a man into insuring his life at a single sitting, and what a man does deliberately, and after mature consideration, is not likely to be negligently cast aside. On the other hand, the greater the exertions in procuring business, the greater, probably, will be the number of lapses. When reverses begin to overtake a man his insurance policy is generally the last thought in his mind; he must pay his rent and his taxes; these he knows he cannot shirk, and he accordingly provides for them. It is otherwise with the premium on his policy, which gratified him so much in its early days, when he felt he had entered upon a provision for the future of himself or family, or both-an investment hedged around by so many safeguards, that as long as he kept up his annual payment-one usually but a fraction of the amount paid for luxuries-no deposit

in any financial institution could compare with it as regard security and profit. But this must wait, and he promises to renew it another time. Of course the clever and persuasive agent, with all the benefits of life insurance at his fingers' ends, is no longer present to encourage him; hethe agent-is not urged on by regard for the wavering head of the family, but by his commission, and the notice from the head office that the time for payment will expire in thirty days from date is too often looked upon as an unwelcome dun. Were the agent present to explain to him that the same inducements still exist as when his life was insured, that the moral obligation has not ceased, it is more than likely he would struggle to proceed with the good work. Men are rarely influenced for life by a single sermon; they must be preached at again and again to keep them abreast of their resolutions. When times become depressed policyholders are too apt to abandon the whole amount, when probably one-half of it would prove a not unwieldy burden ; or it could be paid halfyearly or quarterly. Companies are not anxious for lapses as lessening their liabilities. On the contrary, every indulgence is accorded the wavering policyholder,lacking, of course, the arguments of the persuasive agent. No less than four or five notices, extending over tseveral months and more, are issued by the company before the policy is wiped out. It is a pity that the good prompter is not more about when the time comes for paying the yearly premiums, for we feel persuaded that a considerable proportion of lapses is also due to discouragement and forgetfulness of the original motives. But most policyholders have always beside them a gentler monitor than the agent. although she persuades rather with the heart than with the head, one whose duty it is to encourage and appreciate the wise endeavor which was undertaken for her and those who do not always perhaps sufficiently consider the tender motives which prompt a man-in this unostentatious manner into leaving an inheritance.

LIABILITY OF MUTUALLY IN-SURED. -

Two decisions, one in Michigan and one in Montreal, in reference to the status and liabilities of members of Mutual Fire Insurance companies, are of such moment to many of our readers as to warrant us in drawing special attention to them. That in the Michigan Supreme Court in the case of Russell vs. Berry, is thus commented upon by the *Insurance Monitor*:

"The insured in a mutual company is liable for his full pro rata of assessments levied by the receiver under the law, although his contract with the company restricted his liability to a certain sum. the court enunciating the doctrine as follows :- The obligation of the insured party is fundamental. It does not depend upon the form which may be given to his promissory " undertaking." It is a positive result of his connection with the company, and the principle which underlies it somewhat resembles that which the liability underlies to taxation, Responsibility is inseparable from the status of an insured member. The organic act made it so, and no kind of a stipulation between the agent of the company and the person who becomes insured can supersede or impair it. It would be just as practicable for a person entering into marriage to provide by covenant against its necessary and imporative duties and obligations.'

The holders of policies in force in mutual companies at the time of the last great fire in Sanilac, Huron and Tuscola counties in Michigan, are thus liable for their pro rata share of the entire loss, no matter if such share exceeds the amount of the premium note Members of mutual fire companies will understand that they go in as insurers as well as insured. They will comprehend that they have embarked in the insurance business, and that a very important part of the insurance business is the payment of losses.

But the more serious case is the one in Montreal, the decision in which follows one which was rendered in this some few years ago. We refer to that of the Hochelaga Mutual Fire Insurance Company vs. Lefebvre, in which the demand was to recover assessments made upon the defendant as member of the company, although he pleaded that he was not liable as a member, because he had insured on the cash system, and not on the principle of mutuality. The decision in this case affirms that the Hochelaga Mutual Insurance Company was incorporated under the Consolidated Statutes of Lower Canada cap. 68, and that section 6 thereof says that the insured shall be members, in the following words :

"Every person who at any time becomes interested in any company incorporated under this Act by insuring therein, shall be a member thereof, during the time specified in his policy, and no longer, and shall during such time be bound by the provisions of this Act."

There is nothing to limit or terminate the liabilities of persons insured. These are liable as members .—Act 40 Vic., p. 72, section 3, provides for the admittance of persons insured who "shall be entitled "to the like rights and be subjected to "the like liabilities as other members,"

LORD LORNE IN THE CONTEM-PORARY.

In considering Lord Lorne's recent. contribution to the Contemporary Review, it is desirable to bear in mind that its. chief object was to convey his opinion that there was no analogy between the position of Ireland and that of Canada, in ... regard to what is termed Home Rule. It is tolerably clear that the Marquis of Lorne has a strong leaning in favor of a federalism, and this is, perhaps, not surprising, considering that his experience, has been entirely that of the representative of the Crown, in a Federal Government. We doubt the correctness of the remark that "it was but the other day , "that the United States fought for a "stronger federal powers." The war, or o rather rebellion, was commenced by the Southern States with the object of establishing a separate federation. The question of State rights did not strictly arise, as it seems likely to do with us. Admitting, as he does, that "local matters may " be safely left to Provincial Assemblies," Lord Lorne has avoided any discussion of. the vexed questions which have of late sprung up, and which there is too much. reason to fear may lead to serious complications. In the class of questions. referred to we do not include the dispute regarding the boundary, which does not involve any question of Federal control -indeed we are not inclined to thinkthat His Lordship had any special case in view, but that he meant generally to give a warning against an assumption of power by the Provinces. It will hardly be maintained by any one that the British North America Act is perfect, and it would have been satisfactory had one who, it will be generally acknowly edged, was strictly, impartial, had dealt with the various points on which differences of opinion have arisen, as to Provincial and Dominion rights.

The most formidable difficulty: is the exercise of the Veto power by the Dominion Government over Acts of the Provincial Legislature. That power has long , been a dead letter as regards Acts of the pominion Parliament. It has long been

439

ter di seconda da seconda

鑞

the established rule that, except in cases in which Imperial interests are involved, there will be no interference on the part of the Crown with Dominion Legislation. Can this be said of the Dominion Government? And yet it is even more important to secure the independence of the several Provinces, owing to the fact that party feeling is necessarily brought into play. We have only to contrast our position in Canada with that in the neighboring republic to be convined that some change is essentially necessary. In both countries there is party government, as there must be in all free countries, and in both the same party organization exists throughout all the States, and Provinces. There may, however, be a a Republican Government at Washington, and a Democratic one in New York or Pennsylvania without any danger of interference by the former with the rights of the latter. There is no veto, but there is a tribunal for annulling any legislation that is ultra vires. Surely it would be desirable that our Provincial Legislatures should be equally independent. So long as the power of disallowance exists, no matter how honestly it is exercised, it will always be imagined that the action of the Dominion Government has been inspired by a hostile party feeling. It is well-known that some recent acts of the Quebec Legislature have been very generally held by the commercial community of Montreal of all parties to be contrary to sound policy, and yet there has been no interference on the part of the Dominion Government, while, in the case of the Ontario Streams Act, although obviously not ultra vires, it was disallowed, on the pretext that it was contrary to public policy.

Lord Lorne has fallen into an error in his remarks on the French Canadian race. It is not the case that the French Canadians are indebted to old treaties for the various guarantees as to their laws, language and religion. They are indebted to the liberality of the Imperial Parliament, and that at a time when such liberality was by no means so common as in the present day. We hope that Lord Lorne is correct in his assumption that the French Canadians are loyal to the frame-work of the power which has guaranteed them their rights. Judging from their own utterances we should imagine that France stood still higher in their regard than Great Britain, while not a few of them would be willing to join the United States. Lord Lorne, however, is of opinion that it would be difficult for any Canadian Province to propose a law which if vetoed by the Government at.

Ottawa, would raise much strong feel ing against the Central Government. His Lordship then selects what, in our judgment, is a most unfortunate illustration, stating that the matters on which interference can arise are small. The case is that of "local option," and it is argued that if legislation on drink be proposed in Ottawa, and resisted in any Province, "it would be difficult to get up a war for whiskey," We can hardly imagine that the term "war" is to be understood literally, but we cannot conceive a question more calculated to produce great irritation in an intelligent community than would be the transference of legislation on such a subject from the representatives of Ontario to those of Quebec, the Maritime Provinces, British Columbia and Manitoba, in addition to their own. Surely such a question ought to be determined by the public opinion of each Province and not by the Dominion Parliament. We do not pretend to discuss the constitutional right of the Dominion Parliament to deal with the license question, but we hold that it ought not to have such a right, and that Provincial rights should be guarded as jealously as State rights.

Admitting that there is no analogy between Canada and Ireland, it seems to us that at a time when the federation of the Australasian Colonies is at least 'a subject for discussion, it is desirable to point out the defects in our system, and it is therefore, in our opinion, to be regretted that our late Governor-General should not only have failed to point out those defects, but should have encouraged the belief that public opinion is favorable to a strong federal power. It has happened, owing in some degree to accident, that the Province whose leaning to Provincial autonomy would naturally be supposed to be the strongest, has been in alliance with the Dominion statesmen who have always been most favorable to the extension of federal power. Whether they have been wise in adopting this policy will perhaps not be ascertained for some time to come, but of one thing we are thoroughly convinced, which is, that in a federation of States or Provinces the wisest policy to pursue is to confer on the separate legislatures the largest powers that are compatible with the common interests of the whole.

THE COTTON INDUSTRY.

When any business is prosperous and begins to pay large profits it is sure to attract further capital, and there is danger of its being overdone; this is especially the case with joint stock enterprises,

the profits of which are generally made public, through the declaration of dividends; thus there is but a very remote a possibility of a monopoly in joint stock manufactures. These enterprises in their early years are themselves liable to be carried away by the buoyancy of youth: it is only when the ardor is at its height and there occurs the almost inevitable reverse, that the business begins to sober down to real, earnest, sensible work. It is so in real estate, in banking, in land companies, - the business is:2 soon overdone. The tariff policy has been the means of starting many new enterprises, and many have advanced with such bounds that it was scarcely possible for all to get through with safety. The result in many such enterprises is a severe check ; but, as a prominent manufacturer and experienced, business man remarked,-"those who pay the penalty are the manufacturers ;---if I make too many goods, it is I who suffer, and not the public." The public benefit by the cheapness resulting from the competition.

Much sentiment has been lavished over the "poor operatives,"-a portion of the. population who, previous to the recent establishment of the various factories. were not worth 25 cents a day, but who now are worth from 75 cents to \$1.25 a. day, adding thus much to their value to the country. Supposing even that one in every three operatives is thrown out of employment, is it of no consequence that the other two remain ? They certainly, earn more than if the manufacturer hadnever invested in the business. At the outset the skilled labor was not to be had. in the country, it had to be imported,or it had to be trained, and during the time of training it destroyed a considerable portion of the fabrics, resulting in considerable loss to the mills. It is stated that a large number of operatives are leaving the country ; we are assured that few or none of the native operators are leaving, those who are going being, chiefly skilled hands from the United States, whose services were indispensible, in the early days of the business. The, operatives from English factories admit they never earned such wages."

It is not for the interest of factories to employ cheap labor. The owners would much prefer to pay more hands at the rate of \$1 to \$1.50 a day. Any man who has his capital embarked in a manufac ture where skill is required is desirous of working his machinery, plant and raw material to the best advantage. The machinery, light, heat and other requisites of a first-class factory are not any cheaper because the labor is inferior;

and therefore cheap labor is something which the manufacturer does not want to employ if he can help it. The operative who earns the most in any mill is the most profitable for the mill to employ. The sanitary appointments in Canadian cotton mills may vie with the best in the world; and there certainly is no city or town house better provided as regards the health of the occupants than are some of the larger mills. Electric lighting (as it has long since in the Canada Cotton Company's mill) is rapidly superseding gas, which, in buildings where so much light is required, vitiates the atmosphere in a comparatively short time. Nothing, in short, is left undone to promote the health and comfort of the operatives not only from humane motives, but for another simple economical reason, that more and better work can be accomplished by people in good health. The cotton mills of the country have been merely passing through an ordeal which should result eventually in benefit to all concerned. Other points remain to be noticed hereafter.

UNITED STATES CURRENCY.

The last number of the New York Bankers' Maguzine contains an interesting contribution from the editor, Mr. A. S. Bolles, entitled "What kind of a currency shall we have ?" and described as the principal part of an address by the editor at a banquet of the bankers of Chicago, on the 23rd October. It is stated that the magazine is not committed to the views expressed by its editor, which, however they may be in the interest of the general public, have not hitherto been countenanced by the bankers of the United States or Canada. The writer commences his paper by criticizing a recent utterance of Mr. Coe, an eminent New York banker, who argued that the true basis of a paper currency was "property and production running concurrently with the paper they represent." Mr. Bolles points out that in England, so long as that rule was followed, there were, from time to time, serious derangements of the currency, causing vexations, and sometimes ruin to business. Due credit is given to the eminent banker, Mr. Jones Loyd, who was raised to the British peerage as Lord Overstone, who is considered one of the highest authorities on the subject, and whose death took place a few days ago, at the advanced age of 88. That: eminent banker pointed out that "Insol-"vency on the part of an issuer affects, "the specific holders of the notes of that "issuer, and those only; but improper

"fluctuations in the amount of paper "issues affect the whole community in "common,—they distract to a greater or "less extent the steadiness of prices, "and the regular movements of trade, "and they tend to derange the equili-"brium of exchange with other coun-"tries. The former evil is local and "partial, the latter is general, affecting "the whole country and every individual "in it."

After discussing one or two plans for improving the National Bank system, Mr. Bolles undertakes to submit a plan of another currency system, differing in some respects from that existing. He thus describes his system : "The central idea "of the plan is for the Government to " issue all the paper notes, the quantity to "he the same as that now existing. Of "this amount we propose that the Gov-"ernment should issue a certain sum "solely on its promise to redeem it, and "every note issued in excess of this fixed "amount to be represented by a similar "amount of coin in the possession of the "Government set apart to secure it and "to be used for no other purpose." Mr. Bolles then asks, "What amount shall be. "issued by the Government solely on its "promises? I reply, the smallest amount "which is likely will ever be needed to "effect our exchanges," and he adds, "this was the principle applied in fixing " the amount for the Bank of England in "1844." After pointing out that the Act of 1844 provided for an issue of \$70,000, .. 000 on securities, and that every additional note must be represented by coin, Mr. Bolles suggests that the United States should issue \$600,000,000 on its promise to pay, holding coin for all above that issue This is based on an assumed aggregate circulation at present of \$698,-000,000. We own that we think it would have been wiser in Mr. Bolles to have named a sum of four, or at the very most five, hundred million dollars as the issue on securities, which would give a large profit to the nation. In England the greatest precaution was taken not to make the issue on securities too great, and the difference between \$75 and \$600 millions is out of all proportion to the relative circulation. The scheme is essentially that which has been so long in operation in England, and which has been so successful.

There is a difficulty in the United States, which does not exist either in England or in Canada, and which Mr. Bolles has exercised his ingenuity in trying to evade. It is held by many that it is not in the power of Congress, unless in a period of emergency, such as war, to de-

clare notes a legal tender, and there is at present a case which has been long pending in the Supreme Court, which it is believed will be decided against the legal tender character of the Greenback. Mr. Bolles does not think that this would impair the circulation of the Government. or, as he proposes to call them, the Treasury notes if all others were suppressed. This, however, is not quite clear. Of course, the notes would be equally valuable, but, if not a legal tender, banks holding them as reserves would be in danger of demands at any moment for coin in payment of deposits. Bankers in New Orleans, Chicago, Boston, etc., would be at the mercy of any one procuring a sight draft or a cheque on them, and although the Treasury notes redeemable in gold in New York would be worth a fraction over. par at all other points, yet so long as they were not a legal tender they would not be available to meet demand liabilities. Now, if the sole issue of a Government currency were adopted, it must be obvious that an immense amount of it would be required for bank reserves, and this very circumstance should convince Mr. Bolles that his proposed issue on securities is much too large. In case of a foreign demand for gold, the banks would have to rely on the national treasury to meet the notes held by them as reserves, and it would be a fearful mistake to reduce so largely the amount now held.

We do not propose to follow Mr. Bolles into his suggestions for the expansion of the currency, as we feel assured that it would be difficult to improve on the English system, which has stood the test of nearly forty years' experience. As to issuing notes in excess of the ordinary. limit during a panic, as loans to the banks, much would depend on the extent of the Government issue on securities. With so large an amount as suggested by Mr. Bolles it would be quite unsafe, but if the coin reserve were very strong such loans might, with perfect safety, be resorted to on the pledge of Government securities. On three different occasions the issue department of the Bank of England was authorized to loan notes to the banking department at periods of panic, so as to enable the latter to assist the commercial community. This has been done by special permission of the Government, which is by no means a desirable mode of procedure. Even in England, however, it. is doubtful. how far it would be prudent to sanction the principle by law, unless the gold reserve of the bank were strengthened, which might be effected very easily by the issue of £1 notes or by making Bank of England notes legal tender in Scotland

and Ireland, which would have the effect of bringing gold from places where it is not wanted to those where it is required. Mr. Bolles' paper ought to be productive of good. The United States must come at last to a truly national currency.

MARRIAGE INSURANCE .- The Marriage Aid Association, with headquarters in Hamilton, has scarcely seen its second autumn when clouds begin to appear on the horizon. The Toronto World paid some attention to the concorn lately, and threw some light on its works. The by laws provide that applicants shall pay a fee of \$6 for every \$1,000 certificate; and, further, that upon the marriage of any member all the others are to be assessed in order to pay off the matured certificate. No person is entitled to receive any benefit from the institution until he or she has been a member for at least 15 months. It seems now that the regular agents of the association represented to applicants that the assessments would not average \$3 per month; but, instead of \$3 for the month of September, members received a notice of seven assessments on forty-eight certificates; and for October it is still higher, the present call being for eight assessments, or \$12.64 for every certificate. This rapid rate of increase can be readily understood when it is remembered that numbers of servant girls and others of limited means, who were induced to become members, were unable to meet the first high assessment. And as they fall out of line the burden must come upon the remaining members. The by-laws provide that a call must be paid within thirty days after mailing of notice, otherwise the certificates become null and void. But now a notice has been sent out to members who failed to meet the call due on October 3, that if their money is not forthcoming by October 19 their certificates will be cancelled without further notice. The following example is given :-- " One person, whose assessment notice we have seen, holds three certificates. On these he is assessed \$37.92 for this month. Now take this as an average and multiply it by fifteen and add to the second the average and multiply it by fifteen and add to the product the annual dues, which would be \$48, and the membership fee of \$18, and the 5 per cent on \$750, which is charged for collecting, which would be \$37.50, and you have the handsome sum of \$672.30, the amount to be paid in, against \$750, the amount the member would receive at end of affeen months. That is, he would receive \$77.70 interest for his money, providing the rate of assessment does not become any higher, which it is sure to do, and always providing that the association is in existence at that time, whith is doubtful. Now this is the scheme which is asserted by its promoters is paying 100 per cent on money invested.

Market Reports.

MONTREAL WHOLESALE MARKETS. THURSDAY, Nov. 22, 1883.

Although the harbor is nearly descried, the weather is as free from frost and the river as clear as in October. Itains have prevailed east and west during the week, and the slight fall of snow has all disappeared. Holiday goods are moving, and toy-shops, bookstores, j.wellery shops, and other retail depots of fancy goods, are beginning to assume their holiday garb. Wholesale houses generally report business quiet, although most of them appear to be kept tolerably busy. Remittances on an average are only fair. There is no change in the market for provisions, hides and skins, and wool. Leading provision merchants complain of some of the smaller banks going into the business in the ordinary indirect way, and, as usual, doing more hurm than good all round. The man who works on his own capital is likely to take more heed of business methods. Money is easy, but there is much less paper being made, many of the banks having placed some salutary restrictions on their customers. The class of dealers, who must pay 8 per cent. is not encouraged. Sterling Exchange quiet, Bank stocks generally have shown a continual tendency towards weakness; but Federal appears to lead the downward movement. The stock of this bank has fallen off nearly 40 points during the recent decline. The drop is doubtless in some degree owing to the comparatively small proportion of the stock in the hands of regular investors; but the character of the "rest" in one or two banks, being made up largely of advances or premiums in values which have long since been reduced, has probably not a little to do with the movement. Union Bank of Lower Canada stock was offered at 69 on Tuesday, without takers, owing, probably, to reports of heavy business troubles in Quebec. Cotton stocks show a slight improvement. The following table gives the number of shares soid and the highest and lowest price since last report :

| | sold. | Highest price. | Lowest price. |

BOOTS AND SUDES.—Trade generally continues fairly good, but is falling off as the sorting-up season is virtually over and travellers going out with new spring samples; owing to the continued mild weather there is little demand for heavy winter goods. Payments reported good.

DAIRY PRODUCE.- A fair trade is doing in all grades of Butter, and quite a quantity has moved during the week, both for foreign and local account. Fine Townships is closely picked up, and there is now a scarcity of this grade in the market, and in fact goods of pleasing quality are hard to be found, any lots to arrive meeting with ready sale at. our highest quotations. Altogether the market has an upward tendency, and the appearance of being in a more healthy state, in sympathy with Eastern and Southern markets. There is considerable more enquiry from our Lower Province buyers for fair to good grades, and we note sales of several car lots at prices ranging from 16c to 19c; 783 tubs of finest Townships at 211c; a very fine parcel of fall selection at 23c; 490 tubs selected Western at $17\frac{1}{2}$ c; 208 tubs do at 18c; 300 of Renfrew District at 18c, and odd lots of medium at $16\frac{1}{2}$ c. In Cheese there is more enquiry for finest White, several large transactions having been made at 111c to 112c. In colored lots there is but little doing, and few sales with a steadier feeling and firm prices for finest makes. Cable reports, 59s.

DROOS AND CHEMICALS.—With the virtual closing of navigation all demand for heavy chemicals has ceased for the present, and very little movement may be expected for the remainder of the year. For fine goods and druggists' sundries, there is a moderate demand, mainly in the way of sorting-up orders. In New York, Oplum and Quinien are a little, weaker, with very little demand. The English Chemical Market is quiet, and prices are steady, with a little weakness in Caustic Soda. Exports to Canada from Liverpool for Oct., 1883. 1151 tons against 1052 tons for Oct., 1882.

Day Goods.—Remittances are not quite up to the usual mark, but, on the whole, we fail to learn of any dissatisfaction among wholesalers, the city retail trade is, however, light, owing, probably, to the change in the weather. Stock, taking is now in order, and travellers sent west by several houses are meeting, with very fair success in orders for prints and other spring staples, and at the same time send in small orders for immediate wants. Quite a number of the trade wind up their year's business at the end of this month, and we are inclined to believe the results will be satisfactory.

FLOOR AND GRAIN.—The flour market is in the dull state which usually characterizes this period. In absence of any domand from Quebee : or points East of Montreal, prices are weaker; but sellers are not disposed to yield to the low bids of local buyers. Superior up to inspector's grades very scarce, although there is little enquiry for them, and common grades are heavy on the market. Wheat.—No change has occurred in quotations, and yery few transactions have transpired. The market has entered on its dormant stage, navigation being about closed. A fow carloads of Peas have arrived, and are going into store to remain over winter.

FRUITS.—Apples are very firm, with few offering, and generally light stocks, and it is estimated that there are not over 7,000 barrels stored here this season. Straight carloads of winter sell at \$4 per barrel, and small lots at \$4.50. Grapes are also firm and advancing in price, and sell at \$5 to \$6.50 per keg Malaga Oranges, \$7.50 to \$8 per case; Havanas \$4.50 per box; Jamaicas, \$6 to \$6.50, per barrel; Malaga Lemons, \$9 to \$10, per case; Californian Pears, \$5 to \$5.50, per box; Cocoanats, \$6.50 for freal; black Dates, \$6 to \$6.50; Onions, \$2.25, per barrel; Cranberries very scarce and high at \$14 per barrel.

FORS AND SKINS.—The mild weather is unfavorable for raw fur arrivals. In dressed furs, good otter is in more demand by retailers for purposes of trimming. We repeat former quotations: Beaver, per pound, \$2 to \$2.50; otter, Se to 11c; fox, \$1 to \$1.25; marten, soc to \$1; Jyax, \$2 to \$3; mink, 75c to \$1.25; muskrats, Se to 10c for fall; kittens, 2c to 5c; racecon, 20c to 75c as to quality; skunk, 20c to \$1; fisher, \$5 to \$7; bear, \$3 to \$10 as to quality; cubs, \$2 to \$5.

GROCERIES.—Sugars, not active, but values show little change. Teas.—Firm for desirable qualities, and report from Japan is to the effect that no lower prices are expected. Demand is of ordinary kind with us. China Green and Black Teas steady. Molasses, dull. Syrups also inactive. Rice.—Firm market in England, with winter rates of freight now on ; with us steadiness prevails. Coffees.—All kinds more but slowly, while prices/continue practically as before. Spices.—Pepper shows in the East some sig os of a drop, but in Britain and this. Continent no special changes from previous high figures. Nutmegs firm. Pimento, Cassia, Cloves, dull. Fruits.—Valentias dull and rather easier. Malaga Fruit steady. Ourrants also, for sound Fruits keep well up, while damaged are dull and lower. Figs, Sultanas and Prunes not active. Almonds firm, as also choice Filberts.

HARDWARS AND METALS.—Business in this department may be considered closed for the season, and stock-taking will be soon in order. There is no indication of change in values unless the lower price of ingot tin in the United States have any significance. Shot is perhaps a shade easier, and may be quoted at \$5.75 to \$5. Nails are unchanged, and likely to remain so till the end of the year. The barbed-wire combination tariff is made the subject of various "asides"; and commissions ranging from 14 per cent upwards are binted at as one of the means to an end. As soon as one member of any such combination begins to employ commission agents, it begins to be time for the other dealers to bid the combination good-bye. Later English advices concerning through freights on hardware and metals to Canadian points indicate a condition of things still worse than that editorially referred to last week.

HIDES AND SKINS.—The market is not essentially changed for either native or foreign hides. The demand from tanners is reported good, and prices rule firm. Sales are reported of several carloads of both *Green* and *Western* within range of quotations. The offerings of *Sheepskins* are becoming large, and sales have been effected at 90c each.

Hors.—Ohoice grades are scarce, and a small transaction occurred in inferior at 17c. In New York the market has gained additional strength and strictly choice qualities are pretty well cleaned up at 28c. Qualities long since considered too poor to be looked at are now bringing loc to 19c. Yearlings stronger at, 27c to 27d for export. The London market is reportr ed firm, with a searcity of fine goods at an actual price of 140s, although quotations as high as 160s have been received.

LEATHER.—There is no change in business or prices; black leathers slightly incline to firmness. The meeting of the trade last Friday was unanimously in favor of the curtailment of credit, twice already referred to, but the absence of one or two large dealers somewhat interfered with the completion of the signatures, to the notarial document submitted and approved. Penalties are rejected as impracticable.

LUMBER. — Trade continues quiet; demand is light, and prices are cut fine. All large transactions have been done on a very small profit this season, and wholesale dealers (outside of the manufacturers) have made little or no money, Payments have been fair and few losses, so that dealers have been able to hold their own. Falures in Quebec and out West, show that the trade is not in as sound condition as could be wished. The middle-men are those who are feeling the depression. Manufacturers have made such large profits during the last. four years that most of them are in an independent position. Every few days we hear of large extensions to mills and new limits purchased at high figures for cush, which shows where the money is concentrated.

PROVISIONS.—In Liverpool yesterday the market was quiet, pork closing at 65s., lard 3d. lower at 40s. 3d., bacon from 37s. to 38s., and tallow 3d lower at 38s. The hog market in Obicago is steady, light grades selling at \$4 to \$1.50, mixed packers' at \$4.10, to \$4.50, and heavy shipping grades at \$4.60 to \$4.95. These figures show an advance of 10c, on mixed packers' and 5c on heavy shipping. To day's receipts comprised about 49,000 head, against yesterday's receipts of 55,849 head, and shipments of 4,870. The receipts of cattle we'e 7,800 head. Pork steady, closing at \$1.15 f. r November. Lard irregular, closing at 7 k

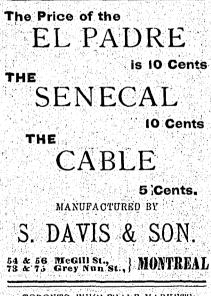

lower. The home market is generally dull, while prices are about steady. No improvement in the demand is expected until sleighing commences, when Western hogs will be sentforward for packing. The present warm weather is very unfavorable for handling dressed hogs, which yesterday offered at S6 75 per 100 lbs., and a few small transactions made at that figure. Eqgs.—Quotations unchanged, with an easier feeling in the market. High prices have brought forth free receipts, and a good deal of stock is now noticeable in the hands of receivers. Strictly fresh is selling. well, but limed and held stock more slowly. Tatlow.—Nothing doing, with purely nominal quotations.

On.s.—The past week has been exceedingly quiet in this line, in sympathy with other branches of business. Prices are firm. Newfoundland *Cod Liver Oil* is firmer, and held in quantity at \$1.90 to \$2 per gal.

TOBACCO.—The tendency towards firmness, and perhaps higher prices, for leaf tobacco is the only noticeable feature in this department.

WINES AND LIQUORS.—There is a fair business being done in sorting-up orders, although Fall stocks are now almost complete. Spring orders have commenced to come forward. Payments, reported fair, and prices remain unchanged.

Woot.—The market remains quiet and nominally unchanged. Stocks are fairly large, and, manufacturers being preity well supplied, business is expected to rule quiet until the close of the year. Latest cable advices from Melbourne report market firm, with upward tendency and large transactions. The leading American markets reported dull, and although the London sales opened on the 21st inst., no cables have yet been received.

TORONTO WHOLESALE MARKETS. (Revised by Telegraph.)

TORONTO, November 22, 1883.

| Banks. | | Bid Nov. 22 | Loan Cos. | Bid Nov 15 | Nov |

FLOUR AND MEAL.—This market is rather quiet, with transactions limited to local demands. The price of flour is low compared with the price of wheat. It is thought that manufacturers will find some way to escape from this embarrassment, and that prices wills be enhanced. As in the case of wheat thil market is not effected by the prices in Liverpool; and will only be kept in line with American prices by adding the 50 cents duty and freight to the American barrel. Prices here enlirely unchanged. Superior Extra is quoted at \$5.15 to \$5.20, according to brand; and Extra at \$5. At the market to day choice Extra sold at \$5. Stock of flour in store here on Monday was 250 barrels. Outneal is still rather quiet, with small enquiry; quoted at \$4.25 for car lots of ordinary, and \$4.50 for Granulated. Corna al nominally at \$3.65 for single barrels. Bran is rather firmer, quoted at \$12 for car lots.

WHEAT.—The markets continue remarkably steady. The opinion now is that there will not be such an abundance as was in 1832, but there will not be any deficiency. Still prices are not what should be expected from the quantity of Wheat known to be available at all points. Prices in the Canadian markets are likely to be steady, owing to the small cropp of the past season. It is calculated that there will not be any Wheat for export this year, and prices will be pretty much what millers will make them. Prices here continue nearly unchanged, but very steady, with small receipts. Transactions are limited to small quantities, and stocks are comparatively small. Prices are quoted at \$1.15 for No. 1. Spring, and \$1.134 for No. 3. Goose sold at 91c at the market to-day. Stocks on Monday were 60,409 bushels, against 138,678 bushels, November 2014, 1882, and 206,380 bushels, November 2014, 1882, and 206,380 bushels, November 2014, 1882, and 519,760 bushels, Novemember 2014, 1882, and 519,760 bushels, Novem-

COARSE GRAINS.—Barley dull, but continues to be of steady value, and the movement is not quite equal to that of the Fall of 1882. Receipts have latterly been pretty liberal, but shipments are far short of what they were last Fall. Prices close steady : No. 1 quoted to-day at 75c; and No. 2 is steady at 69c; 3 Extra at 65c; and No. 3 at 56c. Stocks on Monday were 276,410 bustiels; against 184,667 bushels for Nov. 2010, 1882; and 295,919 bushels, November 21st, 1881; Oats are rather quiet, with sales of Western at 36c and 35¢ on the track. Prices are rather weak, with prospects of large supplies in the country. Peas are not in request, but stocks are increasing. Prices are steady, quoted at 73c to 75c for car. lots of No. 2. There has been no export movement of Peas this Fall. Stocks'on Monday last. were 8,025 bushels, against 3,675 bushels. November 21st, 1881. Rye, nothing doing; prices nominal at 61c to 62c on the track.

COAL OU. — Trade is brisk, and prices are steady. Refineries mainfain the figures recently quoted under a good demand. Canadian refined quoted at 18c for common, 19c for carbon safety ; American refined quoted at 25c for prime, and 28c for water white.

GROCERIES.—The wholesale trade is reported satisfactory. Orders generally are not large, but fairly numerous. Payments also are said to be improving. Quotations :—Sugars.—Porto Rico, dark to fair, 64c to 7c; bright to choice, 7c to 74c; Oanada refined, 74c to 8c; standard granulated, 94c; Paris lump 10c; Scotch yellow, 64c to 7c. Syrups, common, 54c to 56c; amber, 60c to 63c; Molasses, 38c to 40c. Coffees, and other lines unchanged.

THE HOG TRADE.—There has not been an active commencement yet, as operations have not begun in the country. With a possible spell of mild weather yet this season farmers are not pressing to bring their hogs to market. There has been a certain improvement in the Chicago market, but prices there are still below those of our markets, even allowing for the duty on American meats that are brought in here. The prospect at present is that prices here will be considerably lower than they were last year. Manufacturers of meats will be guarded in putting prices up to a figure beyond what must have some profit for themselves in the business. The tone of the Chicago market at latest reports shows a tendency towards higher prices, but it is not looked for that any improvement there will effect prices here. There have been some small lots of hogs sold here at \$5.75 per 100 lbs.; and the opinion is that when the trade opens prices will range from \$5 to \$5.50.

HARDWARE.—Business is not active, but there is a moderate demand for iron from manufacturers and blacksmiths. Prices are generally stendy, at former quotations.

HIDES, ETC.—Supplies are large; Green buying at 74c for cows and 84c for steers; cured selling at 8c for ear lots. Calfskins buying, green, at 13c for No. 1, and 11c for No. 2; selling at 15c for No. 1 cured. There is a fair supply of sheepskins bought at 80c, with advance probable.

PROVISIONS, ETC.—The general markets are very quiet and prices are steady. Bacon is nearly gone, and prices steady at 8c to 8½c for small lots. Lard very dull, selling in small lots at 11½ to 12c. Pork nominul, at \$15 for single barrels. Beef quiet also, at \$14 for mess, and \$15 for plate. Butter is easier. Farmers are bringing in large quantities that were not guessed at till now. Prices rule from 18c to 20c for good to choice dairy; and large rolls 16c to 17c. Chess selling in small lots at 12 to 12½c for good to fine goods. Eggs continue scarce; and dealers pay 22c to 23c for case lots. Apples Dried, in slow demand, and stocks light at 10c for common, and 15c for evaporated. Green Apples, fine cooking sell at \$2.75; ordinary at \$2, for car lots. Beans are scarce and car lots would bring \$1.90 for good quality. Hoys are offered in fair quantity, with good new crop bringing 26c for single bales. Onions, best quality, bring \$2.25 per barrel. Potatoss in fair supply, at 78c to 80c for ear lots. Hogs, small receipts, prices on street \$5.75 to \$6. Poultry coming in freely, box lots selling at 6c to 7c for fowls and geese, and ec to 9c for ducks and turkeys. Pressed hay \$11 in can lots on the track. Wook.—The market is unchanged. Fleece,

WooL.-The market is unchanged. Fleece, Leicester brings 194c to 20c for selections; Uotswold 17c; Southdown 25c; other downs 22c to 24c, according to quality. Factories generally quiet, and demand light. Supers selling at 25c; and Extra Supers at 28c to 29c.

SPECIAL NOTICE.

Attention is directed to the business announcement in another column of Messas. Spencer, Beddoe & Co., of Hamilton, who have commenced business in that city as iron and metal merchants. The firm are direct importers of pig and bar iron, wire, steel, tin and Can-

a da plates, lead, copper, water and gas piping, glass, and also heavy hardware of all descriptions. The firm possess a through knowledge of the requirements of the trade, and will be sure to command an extensive share of patronage.

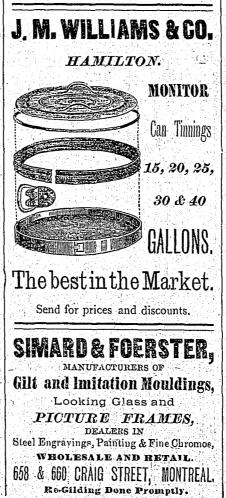

NEW YORK Life Insurance Co.,

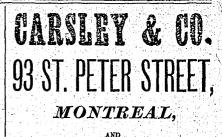

Active and energetic men of good standing are wanted by the New York Life Insurance Company (Invested funds \$52,000,000, Fifty two Million dollars) to take agencies in unrepresented districts throughout the Dominion.

Applications (Confidential if desired) made to

DAVID BURKE, Montreal,

Superintendent of the Canadian Branch of the Company's business, will receive prompt attention.

18 BARTHOLOMEW CLOSE,

London, Eng.

We have much pleasure in announcing that our Stock for the approaching Autumn and Winter Seasons will be one of the most complete in all respects we ever imported. As heretofore, our object will be to have the

LATEST NOVELTIES

in every department; and this season we are safe in saying that we shall far excel all former efforts; so that our customers may rely upon seeing the

VERY LATEST DESIGNS in French, British and other European products.

We beg to call special attention this season to our carefully selected and fashionable stock of

In Cloves, Hosiery, Laces, New Fringes, Trimmings, &c. our stock will prove exceedingly attractive.

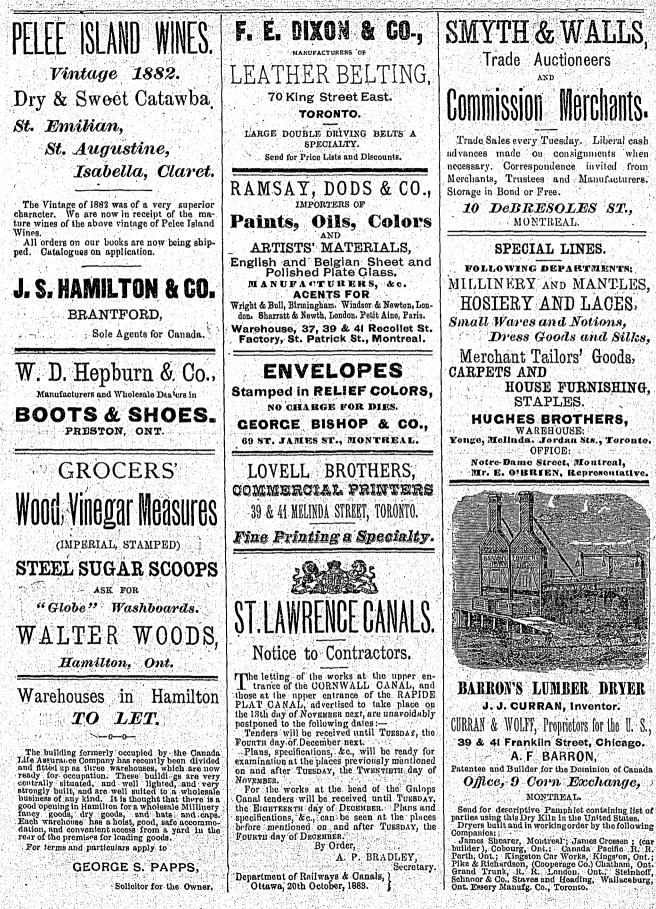

Our Fancy Woclens, Knitted Goods, Ac., have been specially manufactured for us, and we shall be prepared to offer extra value in these goods.

The HABERDASHERY STOCK will, as usual, be, very complete, especially in FRENCH, ENGLISH AND AMERICAN BUTTONS. New designs in Cretonne Fringes, Stylich Plain and Fancy Braids, in Blacks and Colors. Full lines of Men's Silk Handkerchiefs and Braces. Special attention called to our Fingering Wheeling, Shetland, and Berlin Wools:

CARSLEY & CO., 93 St. Peter Street, MONTREAL
