Mill Not Suppress the Truth.

M. Lockroy declared that he would never hold back the truth from the Chamber.

"These facts," he continued, "have been obtained after painful inquiries, but there are men behind the guns everywhere now."

France, he went on to assert, must prepare for the future as well as, the present, and all her financial resources should be economically employed to this end. He spoke in high terms of the personnel of the French navy, praising the courage and loyalty of the men and advocating the German system of forbidding all foreigners on warships.

A TERRIBLE HOLOCAUST OCCURS IN NEW YORK CITY.

The Big Windsor Hotel on Fifth Avenue Catches Fire While Hundreds of Guests and Visitors Are Within the Building.

Fifteen People Were Killed or Burned to Death and Two Score or More Were Injured, Many of Whom Will Die.

St. Patrick's Procession Was Passing in the Street and the Hotel Windows Were Filled With Guests and Their Friends.

New York, March 17.—Flames, which originated from the igniting of a lace curtain, burst forth from the second floor of the Windsor Hotel, at 47th-street and Fifth-avenue, shortly after 3 o'clock this afternoon, just as the St. Patrick's Day parade was passing the building, and in a few moments they had leaped up to the roof and enveloped the entire Fifth-avenue and 47th-street fronts of the hotel.

The minutes later the flames were roaring through the interior of the hotel, and all means of escape by way of stairways and elevators was cut off, and there was the wildest scene of excitement within and without the building.

Most Spectacular Affair.

The fire was the most spectacular affair of the kind that could be imagined. When it broke out Fifth-avenue was crowded with people watching the St. Patrick's Day parade, and every window in the front of the hotel facing Fifth-avenue was filled with spectators, watching the marching men and floats in the street. The day was all that could be desired, and an unusually large number of people were on the streets on that account, a fact which interfered not a little with the movements of the firemen and police.

Parade Was "Isbunded. As soon as the flames were first discovered shooting from the windows, that part of the St. Patrick's Day procession which was near the building came to a halt, and in a few minutes the parade was dishanded, for the police came rushing towards the fire from every direction, and, as far as they were able, drove the people from the streets. "In the first place," he began, "there is a tremendous freight tonnage and passenger traffic, and secondly the rates obtained by

"And the public do not kick?"

"No. There appears to be very little trouble on that score," and then the Vice-President proceeded to show how English lines receive a higher figure for even short hauls, but this is greatly increased on long distances.

He was then asked if this would apply to French lines and, although he had not gone fully into the matter, he stated that in that country the freight and passenger rates were a good deal in excess of charges on Canadian railways.

Recent issues of the Winnipeg papers tell of a wonderfully successful piano recital in Westminster Church there, given by the pupils of Frida De Tersmeden, the Swedish Countess, and a musician of unusual talent. A local paper says the church was filled to overflowing, and the excellent manner in which each one filled her part of the program was a delight to all present. The same newspaper tells us that two magnificent Heintzman grand planos were used by the Countess for the recital, and there, as everywhere else, helped largely in the success of the entertainment. Annual of the state of the stat on water, is a most gratifying one. As the crpatain's report shows, the club put to its credit no fewer than fourteen victories at the regattas in which its members participated, eleven banners being added to the imposing array that decorates these wa'ls. This is the best record that the club samade in the twenty-seven years of its history. A departure of importance, not only to the club, but to aquatics in Canada, was made last spring, when the club purchased an eight-oared shell in England, and the remarkable showing made by the crew at the Canadian and National Regattas has done not a little towards adding to the Argonauts' fame and increasing their prestige among the rowing clubs of this continent. In arranging for the purchase of the eight and for the trip of the club's representatives to the National Regatta at Philadelphia many contributions towards defraying the expenses were received, a degree of liberality and kindly feeling being displayed by many whose names are not on our membership roil that proves the growing popularity of the club and of rowing in Toronto. It should be noted that the eight cost the club very little more than \$100.

During the year there have been two at homes and three club regattas, all which were eminently successful, and early in the season an entertainment was given under the auspices of the club and of rowing in Toronto. It should be noted that the eight cost the club very little more than \$100.

During the year there have been two at homes and three club regattas, all with the work of the condition of the club cream operations, entering in the senior and termediate series of the Ontario Rugby tothall Union, and the showing that was the lattice of the condition of the lattice has been promise of greater strength in the cming season.

When Luke Burke and Eddie Lenny, the Philadelphia boxer, meet before the olympic A.C., on Monday night, Enffalo boxing enthusiasts will probably witness a contest worth looking at. According to all reports this boy Lenny is a wonder. He has had 19 battles, and has yet to be defeated. Local sporting men naturally sympathize with Burke. He has made his hom here for two years, and has made many friends. Burke is confident that he is Lenny's master, and Lenny is certain that he can defeat Burke. It is said that Patsey Haley, who was beaten by Terry McGov ern in New York on Tuesday night, will be at the ring-side to challenge the winner.

Red Bird Caged Bearings

With these Special Bearings every ball runs in a separate cage, never coming in contact with its fellows. This cage offers positively no resistance, the balls in a bearing being loaded equally. The revolution of each ball is regular and without any more friction at one point than another. Actual experiments and calculations made by experts have shown that in the working of a bearing equipped with this cage the avoidance or saving of friction reaches a maximum of 40 per cent.

RED BIRDS are made this year in four distinctly different styles and possess more real genuine '99 features of construction than any other wheel on the market. You can have them enamelled either red or black. We will be pleased to have you call and see them.

The announcement of this piece of news yesterday created as much interest in Toronto business circles, as was feit a little over a year ago, when it first became generally known that the elegant new business edifice then in course of erection at the corner of Yonge and Temperance-streets, now famous as the Dineen Building, was being built by Messrs. Dineen for their own business. Every new turn in the course of this firm's career has been conspicuous with evidence of the solid business progress of the house, and its incorporation now, under a special charter, merely illustrates another business necessity of a large, growing house, whose continuous expansion demands a more precisely defined organization than that which served the business before it attained its present greatness.

medical faculty because they know its formula and have confidence in its life-giving virtues.

Paine's Celcry Compound works gloriou and marvelous cures. This is the secret of its success, and accounts for its world-wide and enormous sales.

It is in the spring time—this very month—when men and women are weak, nervous, rheumatic, neuralgic, dyspeptic, have head-ache, kidney and liver troubles, and blood that is sluggish and impure, that the great medicine should be used to restore nervous energy, rich blood, healthy digestion, natural appetite and sweet refreshing sleep.

The winter has been a time wherein men and women have stored ill health instead of keeping the body sound, clean and full of true life. The nerves, blood and digestive organs must be fed, nourished and cleansed by Paine's Celery Compound if true and lasting health is looked for.

At this time we honestly urge the use of the medicine that has restored thousands to full and robust health after medical skill and ordinary medicines failed. One bottle of Paine's Celery Compound will convince the medicine shalled. FOR ERIN'S PATRON SAINT.

The seventeenth of Ireland was celebrated right royally last night at Association Hall by the Irish Catholic Benevolent Union. The program, as befitted the occasion, was redolent of the shamrock and the green fields of Hiberna. F. A. Anglin, who acted as chairman, made a short speech, in which he told how the sons of old Erin, pinning the shamrock to their coat lapels, had gone out and covered themselves with glory on the field of battle and in other spheres of action had won honor and distinction for their country and race. The Irishman, he said, had many difficulties to overcome, but his indomitable pluck always carried him through, and enabled him to attain positions equal to those won by any other nationality.

The program, almost every number of which received a well-merited encore, consisted of plano solos by Miss Birdle McFarlane, a vocal trio by Misses Minnie, Maud and Mr. F. G. Alexander, readings by Miss Mary Thompson and songs by Misses Lillie Kleiser, Alice McCarron, Maud Alexander, Messrs. W. G. Armströng, V. McGuire and Harry M. Bennett, Miss Birdle McFarlane acted as accompanist.

Asthma Cure vs. Asthma Relief.

It is a recognized fact among those suffering from asthma that the longer they use the temporary relief asthma remedies which require to be burned, the worse they become, until it loses its effect entirely. Clarke's Kola Compound is not among this class, but it will permanently cure the worst case of asthma in from 60 to 90 days. Mr. F. J. Painton, proprietor of Painton's Music Store, Vancouver. B.C., writes: "I have been a great sufferer from asthma in its worst form for over 15 years, and had consulted many physicians in both England and Canada, but obtained no relief. A frend of mine who had been cured by the Kola Compound advised me to try it, and three bottles have entirely cured me; it is now over two years since my recovery and asthma has not troubled me since: and previous to taking Clarke's Kola Compound I have many nights had to sit up nearly all might. It is a truly wonderful remedy, and it affords me much pleasure in attesting my appreciation of anything so worthy." Clarke's Kola Compound is sold by all druggists. No one cares to puzzle over his birthplace.

Everyone accepts the fact that he was and worked. In the hearts of all, next to grey-haired Saint Nicholas, Saint Patrick stands enshrined.

Wearing of the Green. Wearing of the Green.

This fact was testified to by half the city yesterday wearing a bunch of shamrocks and a broad smile. The piquante shop-girl pinned a bow of green ribbon upon her neat dress, and the radiant office-box borrowed his elder brother's green puritle, all to do homage to the patron of spring and good feeling. The big stores were decorated with green bunting and evergreen. The college boys remembered the day, and vied with one another in their efforts to do it justice. Their sister collegues seconded their endeavors and the college lecturer looked down upon a ripple of green ribbon as he discoursed upon "The Ethical Question."

A Day of Smiles. There was no marching or counter marching yesterday in the city. The need of it had gone. Everyone knew that it was Saint Patrick's Day, and rejoiced. The different Irish societies in the city had special functions at night, when the history of their patron was re-told and other entertainment indulged in. Irish Loved English.

The speaker deprecated the idea that the Irish displayed feeling when this invasion was spoken of, but thought Englishmen should consider the years of tyranny and oppression an Irishman's forefathers underwent because of it. He was proud to say that no people loved the English more than did the Irish. Yet, the Irish hated the denial of justice of the Irish peasantry that was their due. He was confident the English would have acted as did the Irish in the past, had they been similarly circumstanced. Irish Loved English.

the past, had they been similarly circumstanced.

He declared, in a magnificent burst of impassioned oratory, that many chapters of England's brilliant history were written in the life blood of Irishmen. Ireland had given statesmen, soldiers and publicists who had done their share to bring about that glorious history. He named Wellington, Stewart, Wolseley, Roberts and Kitchener as generals of Irish blood. He wished to add to the list the Lawrences, who saved Irdia; the Dufferins, who kept India. He eloquently asked if the deeds of Irish sons were taken from the history of England, would her record be as great as it was? [Cries of "No! No!"]

A Witty Digression.

He digressed to remark that Kitchener was "an Englishman born in Ireland." [Laughter.] He thought that to make fighters a good many Englishmen required to be born in Ireland. [Laughter.] This emphasized the fact that Englishmen who went to Ireland did not degenerate. He believed a mixture of English and Irish produced good results. He said that at a recent meeting in Montreal the President of the St. Andrew's Society had chaffed him with wanting not only the earth, but also the fulness thereof, the president had declared there was something to be said for the Scotchman. The Irishman alone was not complete as a fighter. To make the best fighting machine, it was necessary to clothe the Irishman with the kilt.

Mr. Fitzpatrick said that would satisfy him. He was willing to send a few more Scotch regiments of Mulvaneys to go through the Pass of Dargal. [Laughter.]

Returning to his subject, the speaker said some of the noblest orators of England were of Irish blood. He named Burke, Grattan, Curran, Shell and O'Connell. He would go further and in Canada point to Baldwin, the Blakes, Davin, Thompson, Meredith, Cartwright and others. These were men any nation might well be proud of. A Witty bigression.

were men any nation might well be prou-

of.

And in this connection, he felt he might be pardoned in referring to the mitred statesman, the late Archbishop of Toronto, whose memory would live long and should be revered by every Irish Catholic in Canada. [Applause.]

In conclusion he declared Canada was a glorious country, well worthy of the af-

My Dear Sir,—In accordance with Mr.

The District Attorney, his assistant, the two clergymen nominated by Mrs. Place and any other witnesses entitled to enter by law, you will see are allowed in. As to representatives of the press, I desire you to have merely one representative of the Associated Press papers, but I wish you also to see that no one of those otherwise admitted is a correspondent of any newspaper. I particularly desire that this solemn and painful act of justice shall not be made an excuse for that species of hideous sensationalism which is more demoralizing than anything else to the mind. Very truly yours,

Enquiry for Ontario Ores.

An enquiry for metal ores in commercial quantities has lately been made by an English smelting firm, through the High Commissioner's office. The ores asked for are zinc, copper, lead, sliver, gold, arsenic, autimony, wolfram and mickel. The smelting company are reported to be large buyers of these materials, and able to pay high prices. They state they would require a sample of the stuff, a mine owner would be able to sell, and after a complete analysis they would be able to make an offer. We have noticed about the Toronto hotels for some time prospectors from the country with small bags of ore, samples they were showing round, and here is a chance for them to get a purchaser. The correspondence has been sent by the High Commissioner's office to C. W. J. Van Sommer, in the Janes Building, and parties with mineral ores on their land to sell can apply to him.

Messrs. Greville's Review.

Messrs. Greville's Co.'s weekly letter on mining stocks says:

The fourth clean-up of the Golden Star is simply unprecedented for a 10-stamp mili. If, the War Eagle had ore of such value and could produce buillon at such a low rate, it would be worth twice what it is now. We presume that the pessimists who have been bearing this Golden Star stock will have had about enough of it by now, and we congratulate our numerous customers who took advantage of the early information we were able to give them and secured this valuable stock. We think it is lower now than it will ever be again, and a good buy as it is now.

The Toronto and Western—We have handled this stock for clients for one year and a half, and at one time we were the only brokers touching it. We strongly recommend it. This company has a number of large, valuable claims.

Republic, having been purchased by a canadian syndicate and capitalized at \$3..000,000, is likely to go considerably higher than at present asked, as it produces about double the amount of buillon produced by the War Eagle at present. We strongly recommend it to our clients' consideration. Rambler Cariboo, as we have already pointed out, has declared a dividend, and accounts tell us that it is likely to continue to be a regular payer. The price, therefore, at which it is now sold is exceedingly low.

Athabasca—We consider that this stock at anything under 60c is very cheap, on the understanding that the company will commence paying dividends in April, as promised.

Noble Five—Reports reach us that this is soling. Send for free map of Republic and Camp McKinney.

A Big Order for Mining Machinery Placed in Portland.

Local Exchange.

During the past few days a rumor has been persistently circulated in local mining circles to the effect that a grand consolidation of the Le Rol, War Eagle and Centre Star mines is to be effected with a view to joint floatation on the English, American and Canadian markets. The story may have its origin in the fact that Governor Mackintosh of the British American Corporation has accompanied Messrs. Gooderham & Blackstock on the same steamship to England, but the report is published for whatever it may be worth, and simply is street gossip.

Mining Exchange for Montreal.

CAMP McKINNEY, B.C.

The WIARTON is located between the properties of the famous Cariboo Company and the Waterloo, which is fast developing into a phenomenal property. The Cariboo ledge passes through the entire length of the WIARTON and into the Waterloo ground. The property consists of about 43 acres, is CROWN GRANTED, and is owned by the CAMP McKINNEY DEVELOPMENT COMPANY, a British Columbia corporation, with a capital of 600,000 shares of \$1 cach. The treasury stock consists of 200,000 shares, which will be treated as a reserve. The owners of the property take 200,000 shares as part payment for the property; the other 200,000 shares will be sold from time to time, and out of the property; the other 200,000 shares will be sold from the company and spent upon the property before any of the treasury stock will be offered for sale.

Active development work has commenced on the property. A competent mining engineer is in charge, and work will be vigorously pushed. Reports from the property since work was commenced have been most favorable, and it is confidently expected that the surface exploration under way will result in uncovering the Cariboo ledge within the next few days.

A limited amount of shares is now offered at 22c, payable all in cash, and subject to advance without notice.

He Handles Republic Stocks.

One of the most enterprising and successful brokers in Toronto is E. Gartly Parker, who was for some time in Rossland. Mr. Parker is making good use of the knowledge he obtained of this country while in Rossland by devoting himself largely to Republic stocks. He takes big advertising space in the Toronto papers, and is making a fine market for the shares of our best properties. His dealings are on a large scale and he is proving himself a good missionary for us.—The Republic Miner, Saturday, Feb. 25, 1899.

Notes.

E. Gartly Parker, mining broker, 12 Adelaide-street east, has issued a neat little booklet, containing a comprehensive description of the Republic mining camp. The book gives, besides a map of the district, showing the location of the different mines, the names of all the companies operating in Republic, the capitalization, the number of shares and the different mines, the names of all the companies operating in Republic, the capitalization, the number of shares and the different mines, the names of all the companies operating in Republic.—The Globe, Toronto, Saturday, March 4, 1899.

Stocks is in receipt of a neat little book and map of the Republic country from Mr. E. Gartly Parker of Toronto, which gives a description of all the mines in that section. We compliment Mr. Parker on the manner and tact shows in the make-up of his book.—Stocks, Spokane, Wash., Wednesday, March 8, 1899.

Mr. Parker on Republic.

Mr. E. Gartly Parker of Toronto hands us a nicely gotten-up little pamphlet entitled "Republic Mining Camp." As a frontisplece the publication has a map, showing the relative positions of the Rosslard, Ymir, Republic and other mining claims of the Kootenay and adjacent portions of Washington State. I am reproducing part of my advertisement which appeared in The World of Saturday, Feb. 18, 1899, for the beneat y numerous cilents. This diagram shows the exact location of

The Reindeer Group and Jumbo,

and may be taken by them and others as being absolutely correct. This is an interesting study to anyone desirous of noting the locality of these two promising properties. The Reindeer Group comprises a large amount of ground on

Republic Hill.

The claims and fractions owned by the company are as follows: The Reindeer, Reindeer Fraction, Edwards and Smuggler claims. In addition to these, I learned by telegram yesterday morning that the company had purchased the North Butte Fraction, lying in between their own logicand the Iron Monitor. Development work is proceeding apace and I look for some intensely interesting results both from the Reindeer and Jumbo, and I advise the investor on no account to let the purchase of these stocks escape his notice. I have very satisfactory news to hand regarding each and can also put in a good word for

Lone Pine, Butte & Boston and Princess Maud,

all of which are most excellent purchases at the present time. Mark my words!

Republic Camp will be the means of enriching many investors this year, and it will be a thousand pities if the reader of my advertisement does not avail himself of this favorable opportunity to add to his bank account. If you want a little information regarding the place and the many properties, just write me a line and I will forward you a copy of

Summit-Republic and Dora Gold Mining Co's.

The favorable location of both properties is shown in the map below made from actual surveys of Henry Carr, Esq. United States deputy mineral surveyor. These properties have every prospect of a great future, being in direct line with the course of the REPUBLIC VEIN and adjoining the great REPUBLIC MINE, as shown by the following map:

THE DORA shaft has cut three feet of quartz averaging \$154 per ton, picked specimens assaying from \$640 to \$1037 per ton in gold. Note that Noble Three and Jumbo veins also pass through this property.

THE SUMMIT tunnel has crosscut 15 feet of quartz at present writing without passing through the vein, the full width of which is therefore not yet determined. The depth is only 20 feet and the values consequently are low, averaging \$5.00 per ton in gold. This is known as the NUMBER SIX VEIN and was encountered just as was predicted from the map above, thus proving the accuracy of the surveys. The main crosscut tunnel is now being crowded ahead to cut the REPUBLIC VEIN, as shown in the map. The management of both these properties is of the highest character, including prominent mine operators, mining engineers, bankers and business men as can be ascertained by investigation, which is solicited. Work is being vigorously pushed to develop these properties rapidly, and the personnel of the management insures results for the best interests of the stockholders. We have a limited amount of stock in each company, as follows: Summit-Republic at 6 cents and Dora at 5 cents per share, and strongly recommend these AS AN INVESTMENT. Dunn won over the Mayor and Ald. Woods, and the bill is to be amended to apply to Stanley Park only.

Proposes to Oppose Revenue Bill. The various other bills in the Legislation Committee's report were sanctioned or opposed as the committee had recommended. Ald. Woods proposed that Council memorialize the Legislature by resolution to throw out the Provincial Treasurer's revenue bills.

They Jollied J. J. Graham.

They Jollied J. J. Graham.

Then they got at the aforesaid committee's chairman, J. J. Graham. He had come down to back up a grant of \$200 for the lacrossists' Good Friday convention, as well as of \$250 for the A.O.F. convention. The Board jollied the chairman for his aggressive encroachments on the civic treasury. The Mayor in a bantering way insinuated that the ultra temperance chairman was making surprising strides in encouraging the "uphand guzzle." The chairman collapsed. He felt real sorry. Instead of defending his committee he expressed sorrow at what they had done. He premised not to be naughty any more and submitted to a cut of \$100 from each of the grants.

We cannot, alas, all have the latter, but we can at least have what is of infinitely more importance, erectness without stiffness, and an easy poise of body. After that, no matter what we wear, we shall always be presentable. No woman need stoop at the shoulders, hurch forward from the walst line or swing the body from the walst line or swing the body from the walst line or swing the body from the walst upward, as though it had a pendulum attachment These are all very bad, easily contracted habits, one of which would ruin any woman's figure: and, having such habits, a woman dresses herself in costly raiment in valn.

The manner of carrying the head in advance of the body is also very common with women, and is literally fatal to what we call presence. Uric Acid is left in the blood by diseased kidneys, which are unable to filter it out.

The only way to cure Rheumatism is to remove the Uric Acid. The only way this can be done is by the Kidneys. The kidneys cannot do it unless they are strong and healthy.

Dodd's Kidney Pills make the Kidneys strong and healthy—make them do their work properly by making them able to do it.

Went Through the Ice.

Firemen W. Davidson and Dan Bailey of Portland-street Fire Hall, while fishing through a hole in the ice on the Humber River, were accidentally precipitated into the water by the ice giving way. The men were rescued by Daniel and William Blea and taken to a nearby house, where their clothes were dried.

Shortly after the case opened, Wilson was discharged, and his evidence put in against the other two. The jury was only out about 15 minutes, and returned with a verdict of guilty. Spring was only releasted from Kingston Penitentiary in November last, where he served a term of seven years for a similar offence. He was also convicted on March 10, 1890, of chicken stealing. On Oct. 28, 1884, he was sent to the Central Prison for six months for cattle stealing. Williams, together with Spring and Watts, has stil another charge of stealing chickens from Arthur Humphrey, also of Scarboro', to answer. While giving his evidence yesterday, Watts admitted serving a term for trespass. W. E. Raney appeared for the Crown and T. C. Robinette for the defence.

INDIAN DUTY ON SUGAR.

Lord George Hamilton Says It is Imposed to Protect the Smaller of Traders.

London, March 17.—The Secretary of State for India, Lord George Hamilton, in answering a question in the House of Commons to-day, said the object of the Indian Government in imposing countervalling duties upon bounty-fed sugar was to prevent the vast indigenous trade, based upon free enterprise and industry, being undermined by subsidized products of foreign countries. He added that if a general disposition was shown to debate the subject fully, he was shown to debate the subject fully, he was even of General Sessions.

chalfman or the Frinting Committee, in presenting their final report, pointed out that a considerable saving might be effected if the annual report were more "bolled down."

Two-thirds of the Immigration report consisted of copies of Dominion reports. This was an example. By judicious curtailment the committee was of opinion that the House could save some thousands of doilars a year.

Col. Matheson suggested that the practice at Ottawa might be advantageously copied—free distribution to members and sale at cost price to the public.

Mr. Pattulio (North Oxford) said the departmental reports would be more useful if carefully condensed.

Mr. Whitney (Dundas) said one prime cause of the big bill for printing, \$80,000 to \$90,000 a year, was the inordinate number of bills introduced. There had been as many as 150 public bills in one session.

Hon. Mr. Harcourt thought the economical suggestions of the committee the more valuable, as two-thirds of the members were practical printers. He objected to the number of assessment and municipal amendment bills. Members seemed always to have these on hand.

Hon. Mr. Hardy thought good would come from this discussion. He saw no reason why all amendments in respect to municipal and assessment law should not be put into one general bill.

Exemptions Once Again.

Gas and Electrical Works.

Mr. James Conmee (West Algoma) moved the second reading of his bill to amend the Municipal Act. The bill, he explained, is to adjust differences that may arise in respect to contracts for light general second on the expiry of these contracts and the terms on which new contracts should be entered into. An amendment had been inserted in the bill that a single arbitrator at a maximum sum should settle differences. This would cheapen the proceedings. Another amendment was that the municipality be not obliged to buy out electric light and waterworks, but only a portion thereof. The arbitrator would settle the amount. Provision is made for the payment of reasonable rent for a certain amount of electric energy, feet of gas or gallons of water.

Municipal Reform.

In reply to Mr. Wardell (North Wentworth), Hon. Mr. Dryden said that W. H. Orr, superintendent of fruit spraying, is not paid a salary, but receives \$5 a day when working in his allotted sphere.

Municipal Reform.

The hon, member announced that he is in favor of municipal reform and that his bill is on this line. It does not disturb existing contracts. With this exception it puts the franchise for all time in the hands of the people. Under the present law if a company does not wish to sell out, the municipality may start a rival concern, to the injury of the company. This, said Mr. Conmee, is practical confiscation.

The Rebeis Are So Shifty.

The rebels shift about so much that it is impossible to estimate their numbers.

The correspondent questioned several generals as to the number of the rebels, and the replies ranged from 20,000 to 100,000. The estimates of the quantity of arms pessessed by the rebels are equally uncertain. The best authorities say 30,000. Large sections of the armed navvies are ignorant of the use of their weapons.

The country beyond the American lines is rice fields, cane and brush. The rebels are familiar with every inch of it and it affords fine hiding places.

The residents say the Tagalos are unahimously rebels, and they predict that the Americans will be resisted at Mindoro and Mindanao, and that they will be obliged to subdue them.

The extent of the support which the condition of affairs, but will not at present discuss details of the degree the regime and mind and any hour. The officials here are very well pleased with the condition of affairs, but will not at present discuss details of the degree that it is impossible to estimate their numbers.

The rebels shift about so much that it is impossible to estimate their numbers.

Some Ammunition Seized.

Manila, March 17.—(4 p.m.)—Company G of the Washington Regiment has captured 150 additional prisoners near Taguig, and also selzed some ammunition. Most of the rebels' arms were hidden or thrown into the rebels' arms were hidden or thrown in The Rebels Are So Shifty.

mindanao, and that they will be obliged to subdue them.

The extent of the support which the other Luzon tribes are giving Aguinaldo is a mystery. It is known that several regiments were under arms before the outbreak, but the majority of them are supposed to be jealous of the Tagalos, who are reported to be treating the other tribes in the fashion of the Spaniards, dominating the island and holding all the officers.

are reported to be treating the other tribes in the fashion of the Spaniards, dominating the island and holding all the officers.

Reports From the Rebels.

Reports from the rebels are to the effect that the recent action of the Americans in retiring to their established lines after pursuing, makes the rebels think they are winning victories. The Oriental character is so deceptive that the residents of Manila are ignorant as to whether their own servants sympathize with the rebels or not. It is known that a rebel organization exists in the city and the evidence is growing that there was a widespread plot to assassinate the Americans, the signal being the commencement of hostilities. The servants were instructed to kill their employers, but they were terrorized by the vengeance dealt out to offenders and they weakened. Every Tagalo would have cut his employer's throat if he dared, or at lenst this is a current saying.

The faithlessness of the native is illustrated by the action of the commissioners

Flags for Protection.

Nearly every house here displays a foreign flag for protection, whether it is entitled to it or not. All flags except the Spanish are seen. From the native huts hang white towels or shirts.

The natives working in the fields plant a white flag on a bamboo, as a protection against being mistaken for active rebels.

Every hut between the city and the American lines is a heap of ashes.

The residents are the chief sufferers from the present state of affairs. Food commodities have doubled and trebled in prices and many lines of business are at a standstill. After 7 o'clock in the evening a deathlike silence prevails in the city, except for the footsteps of the sentries or their challenges as an occasional civilian is halted. Each sentry calls upon the passing civilian to explain his business. The shutters are all closed for fear of shootings occurring in the streets, and the theatres, restaurants and stores are also closed. Uniformed Spanish officers in the public places sneeringly say: "It would be different if we were in control."

situation is the inability of the Americans and residents to estimate the numbers, resources and plans of the Filipinos. Prominent generals think that two or three disastrous battles will break their spirit and make them sue for terms. A majority of the English and other residents are of the opinion that the extermination of the Tagalos is the only guarantee of peace, that they can easily be whipped, if they give battle, but that they will dodge a meeting with the Americans in force. Some people think they will risk battles at Malabon and Paranaque, where they are strongly entrenched, and if they are defeated they will resume bushwhacking as long as any of them are left.

United States Consul Williams said: "I don't expect to live to see the end of the mervous tension prevailing, it is cited that when the sunset gun was fired on Sunday a whole regiment encamped at the Luneta jumped for its arms as if at a word of command. About three hundred new saloons have been opened here since the American occupation, with the result that many drunken on soldiers are to be seen in the streets. The officers, however, say the conduct of the soldiers is better than of those of other hations under similar circumstances. The chief topic of conversation at present is the delay in assigning Major-General Lawton to a command. Everybody expected that he was to take command of the troops, and he is eager to get to work, but he has been a spectator of all the week's fighting, and his staff and 10-year-old son have been exposed to the hottest fire.

There is an impression that Japanese firms are supplying the rebels with arms. The Japanese papers are urging Japanese mediation. Great Nervous Tension.

Washington, March 17.—Advices have been received from Manila, which indicate that the climax may occur at any hour. The officials here are very well pleased with the condition of affairs, but will not at present discuss details of the despatches. The indications are that hostlitties may end within a very short time. President McKinley has been advised.

parted with their locks can have it restored by a remedy that is sent free to all. A Clacinnatt firm has concluded that the best way to convince people that hair can be grown on any head is to let them try it, and see for themselves. All sorts of theories have been advanced to account for falling hair, but, after all, it is the remedy we are after and not the theory. People who need more hair, or are anxious to save what they have, or from sickness, dandraul or other causes below their name and address to the Altenbeim Medical Dispensary, 559 Selves Building, Cincinnatt, O., enclosing four cents in stamps to cover postage, and they will forward prepaid by mail, a sufficient free trial package of their remedy to fully prove its remarkable action in quickly removing all trace of dandruff and scalp diseases, and forcing a new growth of hair. The remedy is not a new experiment, and no one need fear that it is harmful. It cured John Bruner, Postmaster of Millville, Henry Co., Ind., and he strongly urges everyone to try it. A Methodist preacher, Victor & Faignas, of Tracy City, Tenn., was perfectly bald on his forehead for many years, but has now a fine growth. Mrs. C. W. Paralysis of the Legs. There are hundreds of individuals who are going about on crutches to-day whom we could make walk without such aid. There is hardly a case of paralysis that we could not relieve and so support the leg that the individual could walk with perfect freedom.

Miss S. J. Robertson, South Monaghan, from the effects of infantile paralysis, could only walk by supporting her knee with her hand, but now, with the aid of one of our supports, walks well, and is so pleased with the results that she considers it was divine frovidence that sont her to us.

These feelings, feelings which the English seldom appreciate, are a legitimate expression of French patriotism. But they do not seem to pervade France generally. The passions and interests of the people as a whole are not sufficiently engaged in such schemes of imperialism as to let them remain indifferent to the tremendous cost of their colonial establishments, to make them forsake, for the sake of remote and doubtfully profitable enterprises, the hope of regaining the provinces they lost in 1871. Thus one may conclude that in France, as in England, the forces making for peace are the stronger forces, and will avert a conflict, unless either nation should inflict a wound on the sentiment of the other. Several questions are open, among which those of Newfoundland, of Madaguscar and of the delimitation of frontiers on the Upper Nile are supposed to be the gravest. Any one of these might be so managed as to bring about a breach. But both governments, feeling the dangers that surround them, seem anxious to treat one another with prudence and courtesy, and the spirit of both people is for the moment pacific. So, despite the rather gloomy tone of Lord Salisbury's speeches, there is ground for thinking that the relations of England and France are beginning to improve.

London, England.

Meanwhile, fresh difficulties arose with France in other quarters. What has been called "the race for Africa" began between four great powers—Germany, France, Italy and Britain. The success of Britain in establishing colonies, many of which have had a splendid development, had stimulated the other three nations to acquire colonial teritories; and as Africa was almost the only part of the world left mappropriated, it was in Africa that the competition for teritory became most strennous. As the unappropriated parts of that continent were all within the tropies, and nearly all unfit for European settlement, their value, even for purposes of trade, is vastly inferior to the value of temperate regions, and is in some cases most problematical. Nevertheless, the four powers pressed in, each stimulated the four powers pressed in the Upper Nile are supposed to be the gravest. Any one of these might be so managed as to bring about a breach. But both governments, feeling the dangers that surround them, seem anxious to treat one another with prudence and courtesy, and the spirit. So, despite the rather gloomy tone of Lord Salisbury's speeches, there is ground for thinking that the relations of England and France are beginning to improve.

XEGRO INTELLECTU ALITY.

Everybody in America, as well as in Europe, knows what an explosion of English feeling this incident evoked. The vehemence rope, knows what an explosion of English feeling this incident evoked. The vehemence of that explosion, however, was not really due to any hatred of France. It arose from the fact that the English, rightly or wrongly, thought that Lord Salisbury's Government had failed in various parts of the world to duly defend English interests, and that, in particular, too many concessions had been made to France. Things looked for a time very serious. But the French Government behaved with dignity and moderation, and withdrew their expedition from the point in dispute. Partly, perhans, because it was preoccupied by the Dreyfus affair; partly, perhaps, also, because Russia was known to counsel peace, the French Chambers showed similar good sense, and the French press, though a few journals said unwise things, treated the subject at least as temperately as the English press, some few of whose members were, indeed, deplorably discourteous in their references to France. On the whole, the attitude of the French produced a good impression in England, and there is reason to hope that in France, also, no strong feeling of irritation remains behind. The air has been cleared, as sometimes bappens when men who have been nursing a half-concealed resentment liberate their minds by a little strong language.

A TERRIBLE HOLOCAUST IN NEW YORK CITY

Continued from Page 1.

Leaped to Instant Death.

Several occupants of the hotel appeared at the windows of the sixth and seventh storeys, and even on the roof and made their leaps to the streets from those points. Very few of them escaped either irstant death or injuries, which resulted in their death a short time later. Meantime the entire building was being enveloped in flames, which shot out from every window and formed a picture which struck terror to all those who were witnessing it.

Soon the Walls Fell.

Within 40 or 45 minutes after the fire first broke out the walls on the Fifth avenue side showed every indication of falling, and presently, with an awful crash, they struck the asphalt covering of the street in front of the hotel, and caused the hundreds of people who were standing there to scatter nevery direction. This weakened the walls on the 46th and 47th-street sides, and they followed a moment later. When the walls fell the bricks and mortar and twisted girders and corrugated iron filled the streets on three sides of the hotel. The doorsteps and iron fences in front of the houses on the opposite side of the street from the hotel were wrecked by the falling walls, and the amount of debris piled in the literature of the street was so great that travel will be impeded for several days.

Protected Miss Gould's Home.

impeded for several days.

Protected Miss Gould's Home.

The northeast wing of the hotel continued to burn for a field hour after the walls of the other part of the building fell. The firemen continued to play streams upon the fiames, and also upon all the adjoining buildings, including Miss Gould's residence, which seemed in imminent danger of catching fire. But the flames were brought under control before they could reach any of them.

Many Thrilling Scenes.

There were many thrilling scenes in the hotel during the early stages of the fire. As soon as it broke out a hall boy-discovered the flames while passing along the fourth floor. Immediately over the rooms occupied by President McKinley's brother, Abner McKinley, and his family. The boy pulled a chain attached to the fire alarm, but the chain broke, and then he cried out an alarm of fire and ran to the floor below. The blaze was then licking up everything on the Fifthavenue end of the building, and the lad, when he got to the floor above the main hall, ran into the dining room and gave the alarm to the guests there.

A Number Seen to Jump.

A young man, apparently an employe, imped from the roof on the 46th-street side of the hotel. Another unknown man jumped on the Fifth-avenue side and two more were seen to jump from the rear. Shortly after that two women jumped from the roof to the court yard below. It is known that two of these at least are dead. Eyewitnesses say they saw a woman throw a child from a window and fall a moment later herself, just before the collapse of one of the walls. As yet no trace of these bodies has been found.

DEAR SIR,—I have been a great sufferer from Piles. The last attack was the most severe I have experienced. For ten days I could neither sit nor stand, and walking was out of the question, so great was my suffering. I could find no relief anywhere until your Pile Ointment was recommended to me. I got a box. I was relieved by the first application. In two days I was able to resume work and felt perfectly cured within a week. I volunteer this testimonial. I desire that people who suffer as I have done may know where to get such prompt relief as I found in the use of Orien's Pile Ointment.

A Second Disagreement. Twice has the County Court action of George Forman against Firstbrook Bros. been tried, and twice has the jury disagreed. The second trial took place yesterday before Judge Morgan. Forman, who is an insurance agent, sued for \$200 damages for injuries which he received by falling outside the defendants' factory on Oct. 13 last. It was alleged that the sidewalk was defective, owing to its having been moved by the defendants to suit their own convenience. John McGregor appeared for the plaintiff, and D. E. Thomson, Q.C., for the defendants. The suit of Fawkes v. Swazie has been set for trial to-day. Canada Life Building, Toronto
