SIR JOHN'S MANIFESTO.

Sir John Macdonald has sent out his appeal to the public. It is a somewhat lengthy document but does not contain in it a single line that can be called statesmanlike. Its importance lies in its omissions. The premier carefully avoids all promises of reciprocity and goes to the country avowedly seeking an endorsement of his policy and a new lease of power to be enabled to continue it. In some respects the manifesto shows ability. It is a clever presentation of a bad case and is a skilful appeal to the unreasoning element of the constituencies. Read in the light of his Albany club speech, and his subsequent declarations, when interviewed, it indicates either that the pressure of the restrictionists has been too strong for to resist, or that his alleged reciprocity scheme was pure and simple humbug. He seeks to persuade the electors that in him and his friends all the loyalty of the country is concentrated and talks about living and dying a British Macdonald is again sustained, the country will have to look forward to a continuation of that condition of things which has closed the United States markets to our farmers and made the maritime provinces tributary to Ontario; that has engendered grave disputes between the dominion and the republic, bringing us result of a new triumph of the restriction- meet the success it deserves. ists, that a new turn will be given to the taxation screw.
