Nations in Race for South Pole

New York, Jan. 7 .- A report sent out from Washington that an Antartic expedition is to be launched soon under the auspices of the National Geographical Society, is taken here to mean that the end of the year will see three great nations-England. France and the United States-engaged in an exciting race for the South Pole.

France is already represented somewhere within the Antartic zone by Dr Jean Charcot, who sa led south from Rio Janerio on Oct. 22, 1908. Nothing has been heard from him since April 17 last, when his wife received a letter from Deception Island.

England is about to send two expeditions. Yesterday it was announced in London that the British government stood ready to advance \$100,-000 for the expedition to be commanded by Captain B. C. Scott, a veteran Antartic traveller, Lieut, Ernest R. Shackleton, who reached the south ern point on Anuary 9 last, is also that of Captain Scott.

According to the plans, which only await execution until sufficient funds have been raised, the American party will sail south aboard the Roosevelt. the same ship which enabled Comman der Peary to reach the North Pole. It also appears probable that at least three of Peary's most efficient men will be leaders in the search for the earth's southern pole. They are Capt. Robert Bartlett, Professor Donald McMillan and George Drup.

The busiest and mightiest little thing that was ever made is Chamber quire their aid. These tablets change office, and asked: weakness into strength, listlessness ness. Their action is so gentle one premises for damages?" don't realize they have taken a purgative. Sold by all dealers.

"Father Morriscy's No. 10" (Lung Tonic) Goes a Step Further Than Other Cough Medicines.

Left to themselves, most "Common Colds" will run their course and depart. But they leave reminders in the shape of lingering, irritating coughs and weak throats and lungs.

There are many cough medicines on the market that help to stop a cold, but they do it because they contain Opium, Morphine or similar drugs that simply quiet or deaden the irritation, but do not remove the cause. Such medicines do little or no permanent good and often a great deal of harm, particularly to children.

"Father Morriscy's No. 10" is made of Roots, Herbs and Balsams, without a trace of Morphine or any other harmful drug. It goes straight to the root of the trouble and removes the cause of the cough. It restores lungs and throat to a healthy condition, tones them up, and makes them stronger than ever to resist colds and more serious diseases. Trial bottle, 25c. Regular size, 5oc. At your dealer's or from Father Morriscy Medicine Co., Ltd., Chatham, N.B. 12

THE COURTIER.

The influential Briton in Siam flattered himself that he had a very decent knowledge of the language, and was ready to do great things. He had already ordered coffee from his hotel-waiter with success, and asked the boy to bring him up his boots.

Now influential Britons in Siam are not as common as cockroaches, and that afternoon the distinguished vistor was requested by a friend to deliver an address on Britain at the only ladies' seminary in the country. Confidently he accepted.

He begun famously. Everyone applauded and smiled. But gradually, as he proceeded, he noticed consternation overspreading the countenances of his listeners.

"What's the trouble?" he whispered in English anxiously to his friend on

preparing eo head a party to follow hotly. "Why, the trouble is what you "Trouble?" exclaimed the friend.

> 'But' protested the speaker. 'I am saying, 'I am delighted to as so many young ladies rising to intellectual heights, with fine brains and

'Oh! no, you're not!" corrected the friend. "You're saying, 'I am pleased to see so many small lionesses growing large and fat, with big noses and

BOY COUGHED UP A NEEDLE

Pittsburg, Pa., Jan. 10.- Surgeons at Kittanning, Pa., had placed Norman Barnet, the Ittle son of George Barnet, on the operating table today to cut out his append x, but just as the instrument was ready the lad was seized with a fit of coughing which Moses and Young saved him. He coughed up a needle. which is believed to have caused his

Are Overcome By Dr. Morse's Indian Root Pills

The kidneys have a very important work to perform in preserving health. All the blood passes through them over and over again and they filter it, removing all the impurities and worn-out muscle and tissue which the blood gathers up, in microscopic particles, in its flow through the body. These impurities are then expelled through the urinary system.

When the kidneys for any reason fail to perform this function, and the impurities are left in the blood, about the most distressing series of ailments which afflict mankind follow. First there is the aching back and a feeling of weariness, and then, as conditions grow worse, comes Rheumatism, Gravel, Diabetes, Gall Stones, Inflammation of the Bladder or the dreaded Bright's Disease.

The man or woman who allows kidney trouble to develop into any of these diseases is doing himself or herself a grave injustice, particularly when a cure can be had so readily. One of the constituents of Dr. Morse's Indian Root Pills is a Diuretic, which strengthens and stimulates the kidneys, enabling them to do their work thoroughly and with ease. These Pills also increase the action of the bowels and the pores of the skin, which remove some of the impurities, thus lightening the work of the kidneys.

Mr. Geo. Whitney, of Buffalo, N.Y., says they worked wonders for him. He writes:

"Your Doctor Morse's Indian Root Pills have worked wonders in my case. I suffered for six years from liver trouble and kidney ailment. If I tried one medicine I tried a dozen, but without good results. Your pills were recommended and they cured me after using four boxes."

Dr. Morse's Indian Root Pills should be taken at the first sign of back-ache, of rheumatism, or of any difficulty in urinating.

Whence the Wonderful Bread-Life in Five Roses

DO YOU know, Madam, that billowing from the Lake of the Woods clear to the snow-peaked Rockies are the finest wheatlands that ever threw back golden kisses to a smiling sun?

Our selection of a birthplace was indeed most judicious. We cannot too fervently congratulate ourselves over being born Canadians, can we?

All the infinite resources of Provident Nature have concentrated to produce in our own Northwest a perfect food berry.

It is the cream of this Manitoba wheat crop, not the skim milk, that maketh FIVE ROSES quality. And Manitoba wheat, owing to climate and soil is the prime cereal of the world.

Just listen to the explanation of Sir James Grant, a real C.M.G.:

"The intense winter frost penetrates "deep into the ground. In the spring when the soil is ploughed, harrowed and planted, the lower depths are not "greatly disturbed; but in the warm summer months this coid storage "chamber of nature imparts gentle " moisture to the roots of the grain.

" keeping it cool during the intense heat." Therein lies the goodness of the only wheat fit for FIVE ROSES. If you, Mistress Housewife,

with your own white hands, were to pick the very cream of this fine wheat, wouldn't it mean perfect flour?

Review of the Work of Bridgetown Factories During the may not work with hammers or shovels, Year 1909

The year 1909, while not a record ary storage could be provided. year in the history of town's advancement, has been marked with a small degree of prosperity in every indus trial line within the town.

Prominent amidst our many industries is the Bridgetown Larrigan Company. This concern was first established by W lliam H. McKenzie in the year 1892. A few years after its establishment he associated with him the late Wm. E. Crowe of Halifax. and the business was then run in the name of McKenzie & Crowe. The volsary to increase their capital, so decided to incoporate their business under the name of McKenzie, Crowe & Co., Limited, with a capital of \$30, about 20,000 pair over that of last

UNION BLEND TEA the Jea that satisfies 3 7 OU know the kind of tea you like—will you let Union Blend prove its own case? That's all I ask. Simply go to your grocer, order a pound packet—or a half pound if you prefer—and see for yourself if it doesn't make half as many cups again as the kind you are using. Just count the cups. A tea at 40c. that goes half as far again as a 30c. tea is economy, isn't it? Your own teacup can be the judge—I'll stand by the decision it makes. Try it. Union Blend one pound packets—the pound packets only—contain coupons that are worth money to you. But this is merely an advertisement—the tea itself is worth the price, fully

HEALTH, WEALTH, AND WORK.

So long as Nature's laws require that mankind shall work, the necessity of keeping one's self in health and strength is of first importance. Many people believe that men of great wealth do nothing. That is a mistaken idea. They but they work with their nerves, brains and minds. Scores of millionaires have worked themselves into nervous proscration in their efforts to control, to avoid losing, their millions. But it is the

humble workers who suffer most. Mr. Arvez Berten, of Robertville, Gloucester Co., N.B., is a sturdy man of 65, who works in the lumbering districts in winter, and who, therefore, must have good health. Some years ago, he suffered much from Dyspepsia, with headaches, dizziness and rheumatism. In a Adjoining this factory is the evaporating factory owned and managed lishment employed some 20 hands during the working months. The pro-

WEDNESDAY, January 19, 1910

-The attention of our farmer friends is directed to the information given regarding farm help by Staff Captain I. T. Caulston. Jennings of the S. A. Immigration Department, which will be found on our third page. Capable help is the crying need of the farmer, whose bulk of produce is greatly limited by lack of assistance at critical seasons. The immigration department of the Salvation Army undertakes to supply this deficiency along lines already advocated by the Monitor-Sentinel, that is by making permanent arrangements for the housing of farm laborers and their families. The system of living from hand to mouth so much in vogue among this class of laborers is too common and cannot be expected to give satisfactory results. It is a very small or inferior farm that cannot afford to give comfortable housing and constant work with suitable

-We trust our readers will not miss

remuneration to its wage-earners.

the reading of the review of the industrial progress of our town during the past year which appears on page seven of this issue. Although our columns have previously given the gist of the information it is good for us to keep posted on the resources of our town, and to be prepared to give it a "boost" whenever opportunity offers. Only three of these industries were in existence twen- ter ty years ago, and one of them at least, the Bridgetown Larrigan factory, the nucleus of which was the Murdock Tannery, has made remarkable growth E. Slocumb, Wesley Bowlby, E. S. since its inception along its present Dodge. W. M. Bailey, Samuel Dennilines. May they all increase in efficiency

and prosperity during 1910.

somewhat since last week. Mayor Ruggles has decided to withdraw from the candidature for Mayor and has headed the nomination paper of Mr. Karl Freeman who has accepted the urgent request of a number of influential citizens to allow himself to become a candidate for the office of Mayor. Councillor Dixon is also supporting the nomination of Mr. Freeman, who has been a valued and influential member of the council board for the last three years, which leaves Ex-Mayor W. J. Hoyt, as the only other candidate for

-When referring last week to the desirability of closing the stores every night in the week, excepting Saturday, for the winter months, we were not aware that there was already a move among our merchants with that object in view. A petition in circulation has been signed almost unanimously, one or two only protesting against the innovation. Doubtless the hesitaters will fall in line shortly and the closing will become general.

WARD OFFICERS, NO. III. Presiding Officer,- Lawrencetown, Presiding Officer, Port Lorne,-District Clerk,- Lawrencetown, Wm

Ward and County Officers of the FERNIE'S COKE OVENS

GREAT PLANT IS ONE OF THE FEATURES OF THE WEST.

Crow's Nest Pass Coal Co. Has Four Hundred and Fifty Ovens Where Coal Dust or Slack Is Turned Into Valuable Coke-Russians and Slavs Attend to the Furnaces and Manage to Get Rich on Their Wages.

As the eastern-bound flier, with clanging bell and snorting smoke-stack, glides swiftly round the tortuous curve up the incline into Fernie, B. C., the passengers on the observation car see stretching away to their left a long, low line of compact stone buildings, surrounded with a general lurid glow which seems to permeate the atmosphere and partially dispel the murky clouds that hang heavily overhead.

These are the coke ovens owned by the Crow's Nest Pass Coal Co., Ltd., Inspector of Fruit Trees.— E. R.
Stronach, A. P. Bowlby, Allison
Smith.
Inspector of Lumber,— I. T. Coulston, S. Spurr.

the Crow's Nest Pass Coal Co., Ltd., and there are four hundred and fifty of them, in three solid, substantial rows, numbered 1, 2, and 3. Each row contains ovens on either side, and to distinguish these they are re-

and to distinguish these they are reterred to as east and west ovens, respectively, the ovens themselves being numbered individually.

To-day, when nothing is wasted,
least of all precious coal dust, it is
interesting to follow the process
which converts this coal dust, or
"slack," as it is called, into marketable coke, and incidentally gives employment to many foreigners in this
district.

The coal is retired at Coal Greek, a

The coal is mined at Coal Creek, a mining town situated in a deep valley some five miles from Fermie on the Morrissey. Fermie & Michel Railway—the property of the Coal Company—and after being screened on the "tipples," the "alack," or fine stuff, is loaded into special iron cars called slack cars, and which are made with a centre dump and hold thirty tons of slack. A train of some twelve to fourteen cars is then run up the line to the rails over the storage bias, and the dump being opened, the slack drops down into the "larry" beneath; these larries are constructed of iron, and are capable of holding nine to ten tons, if required. The larries are then run from under the storage hins by a circular line right on top of the coke oven between the circular opening of each oven, some fourteen inches across, and, arrived in position, the lever being moved, the slack pours into the oven beneath through the aperture either to the east or

west, as required.

About six and a half tons of slack is put into each oven at a time, and ignites, of course, spontaneously from 1.75.
the greate latent heat, and after 72 Sale Prices 77c, \$1.00, 1.15, 1.25. hours' burning yields four and a quarter tons of coke, the loss being approximately about 35 per cent., the resultant coke making up the balance of 65 per cent.

When the time arrives for the ovens to be drawn, the Russian "drawer" partially breaks open the dried loam and brick door of his oven, and a fierce, blinding heat blares forth into the darkness, silhouetting his stalwart figure as he stands there, water pipe in hand, playing on the fiery mass within, and which, when sufficiently cooled off, he presently rakes out with a huge iron rake some twelve feet in length and weighing 60 to 70

This is hard work, but seems admirably suited to the men who undertake it, mostly Russians and Slavs unable to speak a word of English, but quite happy with their job. For clearing an oven the men get paid \$1, and as when in full work they clear out two and three ovens a night, working six days a week will net them anything from twelve to eighteen dollars. Living as they do in their own style on from fifteen to sixteen dollars a month, they are soon The coke is now loaded into cars bolding from 35 to 37 tons each, and it is quite a sight to see one of these gigantic cars being filled by the pertheir broad sixteen-pronged forks, shovelling away with a steady swing. When full, the cars are deswing. When full, the cars are despatched to Trail and Grand Forks,

B.C., where the smelters of the Consolidated Smelting & Mining Co. and the Granby Mining & Smelting Co., respectively, await their daily arrival. There have been rumors from time to time of smelters being established in Fermie itself, but at present, and until sufficient ore is found adjacent to the ovens, it is more profitable to ship the coke to the existing smel-

ters than the ore to the coke ovens.

The Crow's Nest Pass Coal Co. Ltd., have other coke ovens besides those at Fernie. At Michel there are 486, and at Carbonado 250, making a total of 1,186 ovens at the three

Standing between the rails on top of the ovens calls to mind Dore's picture—the Torture of the Simonists in Purgatory — with the flickering flames lazily licking up and around the sides of the aperture through which the ovens are fed, whilst, again, from the mountainside a most weird theatrical effect is obtained as the dull-red smoke floats in a thick pall over the dark buildings beneath. Except for repairs from time to time, the ovens are never out, and burn with a blood-red heat that would have appalled Shadrach, Me-shach, and Abednego, through the bitter winer weather equally as well as through the torrid days of August, the only difference in the working being that during the summer they are drawn at 9 o'clock at night, whereas in the winter this is done during the

Built about nine years ago at a cost of a thousand dollars apiece, the ovens are practically as good to-day as when first constructed. About 100 men are employed at Fernie alone, the loading being accomplished by Italians, and in the history of the ovens it is gratifying to learn that there has never been a serious accident.

Italy is now building four Dread-noughts, which, it is said, will sur-pass any existing Dreadnought.

TIPS ON SANDWICHES.

How to Make Them Appetizing With Little Trouble.

The housewife who learns the art of making sandwiches is always well fortified against problems when servfor coarse bread will crumble. And these a few tables that may be of in- bread baked in round tins is preferable to that cut into slices and cut with a biscuit cutter, since the baked edges preserve the shape. Moist fillings should be laid between lettuce the moisture cannot penetrate it, making it soggy. Melted butter can 58 be used if it is not soft enough to spread. A salmon sandwich is a tempting article of food and should be half mixed with chopped boiled egg and very thin slices of olives and pickles. The wise hostess will make two different kind of sandwiches, some with the mixture moistened with vinegar or lemon juice, others without, for many persons cannot acids. Practically all meat sandwiches are extremely rich, and strong condiments are noticeable in the filling, especially mustard and catchup. While white meat makes a 12 delicate sandwich, yet the darker 17 meats, mixed with mayonnaise and 15 other relishes, are more appetizing

When hot sandwiches are served at a noonday lunchedn at home the contents of the sandwiches are placed between the layers of bread and fried, or the bread is toasted and covered with a cooked meat filling, then covered with buttered toast and 8 served hot. Peanuts mixed with mayonnaise and sliced egg make a good sandwich. They make a fruit sandwich which is well liked by those who are fond of fruit and bread. The Municipality at 18,000 and deducting filling consists of chopped dates, figs, showing compared, with the death are often used, but often the sandrate in other districts where statistics are available.

The ten most common causes of causes of control of the cause of causes of cause

Magnet vs. Dreadnought.

Naval Constructor Hollman, of the German navy, has taken out a patent for a device to destroy battleships of the Dreadnought class. Compared with this newest engine of war the Zeppelin dirigible airship, which aims, among other things, to drop ex-10 piosives on an enemy's ships and towns, seems harmless. Hollman's device is an enormous dynamo-magnet capable of being charged up to 20,000 volts. With such a magnet, he says, he can attract by a magnetic power any battleship within a radius of seven miles. He believes that a magnet can be made powerful enough to attract a whole fleet of warships and draw them into shallow water, and draw them into shallow water, where they will run aground and be at the mercy of heavy artillery ashore. Hollman declares most seriously that the amount of metal in the battleships of to-day will only intensify the force of his magnets. Anchors and the ships' engines will be powerless, he says, against the magnet's attractive force. The magnet, or a battery of them, should be established according to the ideas of Nav-3 lished, according to the ideas of Nav-3 al Constructor Hollman, at the mouth of a river or in some favorable submerged position along the coast where the enemy could not readily detect it. The rest is easy. Along comes a hostile fleet to blockade a port or bombard a town or even steam up the deaths from this disease occurred be- river. The moment the ships get tween the ages of 20 and 30 and by within magnet-range the operator in charge of the station turns on the power and the ships are drawn to the

shore, to be captured or demolished. There are dynamo-magnets in sev-Your Obedient Servant.

MONITOR OFFICE

HER DEATH WAS HOURLY EXPECTED

Enterprise, Ont., Oct. 1st, 1908.
"For seven years I suffered with what physicians called a "Water Tumor." I could neither sit, stand, nor lie down. Hypodermics of morphia had to be given me to ease the pain.

MRS. JAMES FENWICK

My cure seemed hopeless, and my friends hourly expected my death. I was so bad that I wanted to die, and it was during one of these very bad spells that a family friend brought a box of "Fruit-a-tives" to the house. After much persuation I commenced to take them, ut I was so bad that it was only when I had taken nearly two boxes that I commenced to experience relief. I kept up the treatment, however, and after taking five boxes I was cured, and when I appeared on the street my friends said. 'The dead has come to life,' and this seemed literally true, because I certainly was at death's door." (Signed) MRS. JAMES FENWICK.

"Fruit-a-tives" are sold by all dealers at 50c a box-6 for \$2.50, or trial box, 25c, or sent post-paid on receipt of price by Fruit-a-tives Limited, Ottawa.

DEATH ON THE TOBOGGAN

Montreal, Jan. 10 .- The first fatalher daughter, Mrs. Geo. A. Barrat, was severely injured while making the descent. The party, consisting of Mrs Corner, Mrs. Barrat and Mr. Barrat, were running down the slide, when some boys who were sky-larking on the way up let their toboggan go. It dropped into the chute immediately

the almost instant death of Mrs. Corner, serious injuries to Mrs. Barrat. while Mr. Barrat, who was in the rear steering, escaped with slight bruises.

MINARD'S LINIMENT CO., LTD. Gentlemen,- Last winter I received tack of LaGrippe, and I have. frequently proved it to be very effective eight had read in the original many in cases in Inflammation.

THE GREAT DIPPER

It will come as a surprise to most people that the Big Dipper is going to pieces. Astronomers are now perfectly familiarly termed the Great Dipper are slowly but surely drifting apart.

The breaking up of this partnership Sanskrit. was first detected in 1869. It was found that while five of the stars in the Great Dipper were drifting in one most double, and the Dipper will show its utter lack of utility as compared with a dipper in good condition

ALL HER RELATIVES HAD DIED OF CONSUMPTION

In the year 1890, 18 years ago, Mrs. C. S. Gesner, of Belle Isle, N.S., was in a sad condition. All her relatives had died of umption, and there was every indication

that she was going the same way.
At this point her husband suggested to try
Psychine. The doctor who attended said Psychine was worthless; but it effected a wonderful cure. Eighteen years after in a letter bearing date August 14, 1908, Mrs. Gesner says, "I am better than I have been for years. My lungs have not troubled me since I took your treatment. My physician told me I could not take a better tonic than PSYCHINE, and I recommend it to all who are suffering from Lung Trouble and General Debility."

Before he was twenty Exeter Hall was not large enough to hold his congregations. George Fox, the evangelist and tounder of the Society of Friends, was quite a little boy when he started preaching at a tavern, and George Whitefield and John Wesley both commenced preaching at a very early

It has often been said that the most amazing example of precocious genius record is furnished by John Stuart Mill, who at three years of age was ed from the Old Country, where he learning the Greek alphabet, and at has completed arrangements for the Greek authors. Then he began to learn Euclid, Algebra, and Latin, and before he was twelve was made to teach the younger members of the

The precocity of Sir William Rowan Hamilton, the celebrated mathematician, is often overlooked. He excelled in the study of languages, and is said to have known at least thirteen at the age of twelve. At three years of age he was a very good reader of English and considerably advanced in arithmetic. At four he was a good geographer, and at five able to read and translate Latin, Greek, and Hebrew. Then he added a knowledge of Italian and French to his learning before going on with Arabic and

The Modest Scot.

Love of country is so fine a virtue that it seems difficult to carry it to excess. A resident of a small village in the north of Scotland paid a business visit to London the other day. He happened to call on a merchant was unknown to him, but had made a stay in his native place. In the course of conversation the visimade use of an expression that | that in many cases farmers in these the other to exclaim: "Surely come from Glen McLuskie?' assertion, however, was denied. Presently, to the merchant's surprise, the accommodation of their hired another Glen McLuskie expression was heard. "My dear Mr. McTavish, I feel convinced that you are a Glen McLuskie man after all," insisted

'Weel," returned the other, "I'll no' deny it any longer." "Then why didn't you say so first?" demanded the Englishman. "Weel," was the calm response, "I dinna like to boast o' it in London"

The Art of Food. I suppose none of us recognizes the great part that is played in life by eating and drinking. The appetite is so imperious that we can stomach the least interesting viands and pass off a dinner hour thankfully enough on bread and water-just as there are men who must read something, if it were only "Bradshaw's Guide." But there is romance about the matter after all. Probably the table has more devotees than love, and I am sure that food is much more generally entertain-ing than scenery. Do you give in, as Walt Whitman would say, that you fails. In the stables our teamsters are any the less immortal for that? say that for colic, distempers, swell-The true materialism is to be ashamed ings or sprains it gives results quickof what we are. To detect the flavor of an olive is no less a piece of human perfection than to find beauty in the colors of the sunset.—Robert Louis

Cut Your Soap-Bill in Two

One cake of Taylor's Borax Soap goes twice as far as any other soap. In a year's time that means several dollars' saving. But that isn't all. You save on the clothes, too. For you don't have to rub them so hard nor so long. They'll go more times

to the tub. So Tavlor's Borax Soap saves you money in every way. Make us proveit. Buy a cake today.

TUB TALK No. 4

Soiled ribbon, light colored silk and delicate laces may be very successfully cleaned at home with Taylor's Borax Soap. Shave up fine half a bar of Taylor's Borax Soap, add a little boiling water and let it stand until it forms a thick jelly. Wet the articles to be cleaned with lukewarm water, then spread on a flat surface and run in the soap jelly with a fine, soft old tooth brush. Go over the entire piece in this way without rubbing at all until thoroughly clean.

Rinse and spread on the top of a table, smooth out every wrinkle with the hand, and let remain until dry. A glass wash board and two or three extra small sized tubs will be found a great convenience in every laundry.

Would You Provide for the Care of

MUSKOKA FREE HOSPITAL FOR CONSUMPTIVES

MUSKOKA FREE HOSPITAL FOR CONSUMPTIVES

A national institution that accepts patients from all parts of Canada. Here is one of hundreds of letters being received daily :-

John D. McNaughton, New Liskeard, Ont. : A young man not belonging here, and suffering from, it is believed, consumption, is being kept by one of the botels here. He has no means and has been refused admission to our The conditions where he is offer him no chance. Could he be admitted to your Free Hospital for Consumptives? If not, could you inform me where he can be sent, and what steps are necessary to secure prompt admittance? NOT A SINGLE PATIENT HAS EVER BEEN REFUSED ADMISSION TO THE MUSKOKA PREE HOSPITAL BECAUSE OF HIS OR HER IMABILITY TO PAY.

Since the hospital was opened in April, 1902, one thousand five hundred and twenty-four patients have been treated in this one institution, representing people from every province in the Dominion. For the week ending November 20th, 1909, one hundred and twentyfive patients were in residence. Ninety-six of these are not paying a copper for their maintenance-absolutely free. The other twenty-nine paid from \$2.00 to \$1.90 a week. No

one pays more than \$4.90. Suitable cases are admitted promptly on completion of application papers.

A GRATEFUL PATIENT Norah P. Canham : Enclosed you will find receipt for my ticket from Gravenhurst, hoping that you will be able to oblige me with the fare. I was at your Sanatorium ten months, and I was sent away from there as an apparent cure. I am now working in the city, and I am feeling fine. I was most thankful for the care I got from the doctors and staff, and I must say that I spent the time of my life while I

The Muskoka Free Hospital for Consumptives is dependent on the consumptives is dependent on the good-will and gifts of the Canadian public. Money is urgently needed at the present time to make it possible to care for the large and increasing number of patients that are entering the institution.

Will you help? Where greater urgency? Truly, Canada's greatest charity. Contributions may be sent to W. J. Gage, Esq., 84 Spadina Ave., or J. S. Robertson, Sec'y-Treas. National Sanitarium Association, 847 King St. W., Toronto, Canada.
