Hams, Bacon, Lard, Tallow, Butter, Flour, &c.

**JOHN RHYNAS,**  
COMMISSION AND SHIPPING  
MERCHANT, Montreal.—Cash advances made  
on Consignments to myself, or to friend, in England.

**TO THE MAKERS AND PURCHASERS OF  
BUTTER THROUGHOUT CANADA.**

At the beginning of another season we take the  
liberty of respectfully reminding our customers  
and the trade generally, that we have for many years  
given special attention to the Butter Trade of Canada,  
no inconsiderable portion of which has passed through  
our hands, and consequently that we have an estab-  
lished connection for the sale of Butter to the best  
advantage, that we have extensive cellars, remarkably  
suitable for the storage and sale of Butter, and that  
our charges are as low as those of any house of standing.  
Consignments are respectfully invited, and will receive  
our best attention.

**JOHN DOUGALL & CO.**  
Montreal, 1st June, 1865.

**JAMES DOUGLAS & CO.,**

Consignments of Flour, Pork, Butter, Lard, Tallow,  
Asbes, and all Descriptions of Produce, promptly  
realized.

**BROWN & CHILDS,**  
MANUFACTURERS OF BOOTS,  
SHOES, AND LEATHER, Montreal.  
OFFICE AND WAREHOUSE—Corner St. Peter and  
Lemoine sts.  
MANUFACTORY—Corner Queen and Ottawa sts.  
TANNERY—Corner Bonaventure and Canning sts.

The articles manufactured by us are under one  
general superintendence during the whole process of  
manufacture beginning with the raw hide, and end-  
ing with the finished boot and shoe. By this arrange-  
ment we secure uniform quality throughout.  
Orders received by post promptly executed and  
should the goods sent not be approved of, they may  
be returned at our expense.  
To occupy the extensive facilities which we have at  
our command for the manufacture of Boots and Shoes,  
it is necessary that we should send goods to all sec-  
tions of the Province, however remote; every induc-  
ement allowable in commerce will be granted to this  
end.

**THOMAS W. RAPHAEL,**  
COMMISSION MERCHANT,  
Montreal Consignments of Flour, Grain, Leather,  
Ashes, Butter, &c. receive personal attention.

**LINTON & COOPER,**  
MANUFACTURERS AND WHOLE-  
SALE DEALERS IN BOOTS AND SHOES,  
306, 308 & 310 St. Paul st., Montreal.

We invite the attention of Merchants, East and West,  
to our large and varied stock of Boots and Shoes now  
on hand, and in process of manufacture for the Spring  
trade. Goods in every conceivable style will be found  
in our establishment, from the finest Kid or Satin  
Gaiter, to the strongest Stoga or Hungarian Boot.  
Men's, Boys', Youths', Ladies', Misses' and Children's  
wear, in over 200 different patterns. Special notice is  
requested to the fact that all our goods are hand-made,  
and of the very best material. The introduction of  
Pegging Machines having thrown a large number of  
workmen out of employment, and consequently re-  
duced the cost of labor, we are thereby enabled to  
manufacture cheaper and more substantial Boots and  
Shoes, at no greater cost than if made by machinery,  
and are prepared to offer the choicest goods at the  
very lowest possible figures.  
Orders personally or by Post, will have our immedi-  
ate and most careful attention.

**J. TIFFIN & SONS,**  
GENERAL MERCHANTS, IMPORT-  
ERS OF TEAS, SUGARS, and GENERAL GRO-  
CERIES, WINES, BRANDY, &c. Nos 184 and 186 St.

**KERSHAW & EDWARDS,**

ESTABLISHED

YEAR 1838.

**IMPROVED FIRE PROOF SAFE.**

The favor these Safes have won by their many  
and severe trials during the last quarter of a century,  
from the fact that not one has ever failed in preserving  
its contents, thoroughly establishes their reliability,  
and with recent improvements made during the past  
two years, we offer them as the most perfect *Fire Proof*  
*security extant*, and free from dampness.

Our *Burglar Proof Specie Boxes* made of combined  
iron and steel in a manner peculiarly our own, the  
steel so highly tempered and placed as to be beyond the  
reach of, and defy the tools of the most ingenious  
burglars, and when placed inside of one of our *Fire*  
*Proofs* produce a most perfect *Fire and Burglar Proof*  
*security*. Merchants having large amounts of silver  
on hand should not be without one.

We also manufacture Patent Combination Bank  
Locks, and the most modern Bank and other securi-  
ties.

Lists of sizes and prices mailed on application.

**KERSHAW & EDWARDS,**

**COMMISSION MERCHANTS AND SHIPPING AGENTS,** purchase and sell all descriptions of Produce on Commission, and likewise advance on consignments of same made to their friends in London, Liverpool, and Glasgow.

Also are prepared to import on Commission and on favorable terms, all description of Groceries, Drugs, Oils and Paints, having first class connections in Great Britain for the execution of such orders.

Montreal, St. Sacrament and St. Nicholas streets.

**THE TRADE REVIEW.**

MONTREAL, FRIDAY, JUNE 30, 1865.

**PRIZE ESSAYS.**

**THE RECIPROCITY TREATY.**

THE Convention of the Boards of Trade from nearly all the cities of the United States and Canada, to be held in Detroit in July next, will afford an excellent opportunity for the dissemination of correct ideas regarding the Reciprocity Treaty. The great importance of the subject to Canada, and the necessity of having the question clearly apprehended by the public mind of the United States, render it essential that this opportunity should be improved.

The publishers of THE TRADE REVIEW, desirous of contributing to the general fund of information upon the subject, offer the following prizes for Essays or Articles on the subject thus stated:—

**RECIPROCITY:**

Its Advantages to the United States and Canada

First Prize..... \$50 00

Second Prize..... 25 00

The articles should not exceed two pages or six columns of THE TRADE REVIEW, and to be published therein. The publishers undertake to circulate, gratuitously, a large number among the delegates to the Convention, and their constituents. The Essays to be sent in to "Editor Trade Review," by Saturday, July 1st.

The following gentlemen have kindly consented to act as Judges.

PETER REDPATH Esq., President Board of Trade

ROBERT ESDAILE, Esq., President Corn Exchange Association.

HON. L. H. HOLTON, late Finance Minister

**COPPER MINING.**

A FEW facts as to the operations of some of the copper mining companies now working on the American shore of Lake Superior, maybe useful. They are worth more than pages of declamation, and may lead to a closer investigation of our own resources. As we have already, more than once, stated in those columns, it is no reason why we should give up in despair of ever making money from the mining resources of the Province because some speculations have proved disastrous. To a great extent many of the losses incurred can be explained—from mismanagement, over-issue of stock, &c. But if we look at what others are doing, how, with no greater advantages, they are making it pay to work mines, how their affairs are conducted, and what profits the investments are yielding, we may learn to reconsider the decision that many appear to have arrived at, of thinking no more about such things, and of refusing to examine for themselves what might be done to make money for them, and, at the same time, to promote the prosperity of the country. We have honestly and fairly warned those seeking investments, against bogus schemes, and we shall continue to do so, but we, at the same time, think it folly for business men to refuse to look for themselves into statements which, in the face of them, are probable, and which, if true, give every prospect of remunerative investments.

Warehouse and Offices, and Office of the Montreal Saw Works, 221 & 223 St. Paul street, Montreal.

Manufactories on Lachine Canal.

The Lake Superior mines have been known for some years back, but few have any idea of the extent of the business done, or of the amount of copper sent to market. In 1830 the total production of the copper mines of the world was 25,000 tons; of this the United States and Canada contributed 60 tons, which in 1853, —twenty-three years later,—had risen to 2,000 tons. From Lake Superior the quantity has increased pretty rapidly. There were in 1845 shipments to the amount of 1900 pounds

Year.	Tons.	Year.	Tons.
1846..	29	1855.....	3,196
1847.....	239	1856.....	5,728
1848.....	516	1857.....	5,769
1849.....	753	1858.....	5,896
1850.....	640	1859.....	6,041
1851.....	872	1860.....	8,614
1852.....	887	1861.....	9,337
1853.....	1,452	1862.....	10,000

the value of the last year being \$5,000,000.

Some of the mines shew, by statements we have received, very large dividends. We have not yet been able to verify these, but give them for what they are worth in the meantime. The Minnesota—the stock of which cost \$56,000—has paid of dividends \$1,600,000, Pittsburg and Boston, costing \$118,000, has paid \$1,200,000. These are the oldest mines there, but some of the newer ones show equally encouraging results. The Quincy, with \$160,000 worth of stock, has given \$280,000 of dividends.

Are we in possession, on the Canadian side, of mineral resources at all approaching to what these shew? If we are, why has no exertion been made to ascertain this? Instead of encouraging, by every means possible the development of our wealth, every successive Government appears to have tried the system of "how not to do it," and has succeeded. It is high time we were awake and alive to our own interests.

**A Good Example.**

Readers of Punch with memories a month long cannot have forgotten the following: "A Canadian editor has become so confoundedly conscientious that he seriously contemplates cutting off the advertising portion of his paper before mailing it, lest the transmission of such matter through the Post Office should be construed into a breach of the regulations, and considered a fraud on the department." Does this refer to the Kingston Daily News, or to the Montreal Telegraph?

**Stock Market.**

The demand for Bank Stocks has continued, and prices generally are in advance of last week's quotations, Bank of Montreal closing at 109½ and La Banque du Peuple at 93½. The market is now bare of Stocks, and prices are hardly so firm as at the beginning of the week. There is not much doing in Government or Corporation Debentures. Exchange has receded to 109½ to 110 for Bank Bills, with little demand. (For quotations see Prices Current.)

**EUROPEAN ASSURANCE SOCIETY.**

WE have received the Directors' Report of the business of this Company for 1864, and we have also read, with pleasure, the Report of the annual meeting of the shareholders which was held in London on the 1st instant. We say that we have read these reports with pleasure, because it is always very pleasing to oneself to be able to say things that must be pleasing to others. There is a large number of people in Canada interested in the "European," and had the Directors' Report been unfavourable, our duty must have been unpleasant.

The following are the most interesting items in the report:

The new premiums on the Life and Guarantee department for the year, amounted to \$15,750.

The premiums from the Fire department for six months (the Society commenced the Fire business in June, 1864) amounted to \$31,330, the losses to \$31,876.

The gross amount received in premiums during the year, from all sources, was \$54,220.

The total amount of claims paid during the year was \$43,585, or a little over one half the receipts.

The progress of the Society's business for the past six years is shown by the following figures:

Year	PREMIUMS RECEIVED.				
	Increase on 1859	Increase on 1860	Increase on 1861	Increase on 1862	Increase on 1863
1859	\$517,250				
1860	57,550	\$60,371			
1861	650,435	133,176	\$2,835		
1862	1,581,815	148,558	64,195	\$15,240	
1863	767,820	2,657	170,679	117,455	\$462,115
1864	818,200	331,031	250,530	17,850	182,473
					487,350

Year	PER CENTAGE INCREASE.				
	Increase p.c. on 1859	Increase p.c. on 1860	Increase p.c. on 1861	Increase p.c. on 1862	Increase p.c. on 1863
1859	\$517,250				
1860	57,550	15 p.c.			
1861	650,435	25 p.c.	9 p.c.		
1862	1,581,815	24 p.c.	11 p.c.	2 p.c.	
1863	767,820	48 p.c.	24 p.c.	18 p.c.	13 p.c.
1864	818,200	61 p.c.	42 p.c.	31 p.c.	27 p.c.

These figures speak well for the prosperity of the Society. In six years the premiums have increased 61 per cent., and, as will be seen by the above table, this has not been the result of a spasmodic effort, but a gradual and comparatively steady growth. In 1859 the increase was fifteen and a half per cent.; in 1861, nine per cent.; in 1862, two and a half per cent.; in 1863, fifteen and a third per cent.; and in 1864, ten and a half per cent. We regret that we have not at hand the amount of claims paid each year for the same period, which, for the sake of comparison, would be very desirable.

In the middle of 1864 the business of the Mercantile Union Fire Insurance Company was transferred to the "European," and the report shows that at the beginning of the present year the British Nation Life Assurance Association also became united with it. This has had the effect of increasing the capital of the European Society to over \$3,500,000, held by upwards of twelve hundred persons. The united income of the three companies for 1864 was a little over \$1,500,000, and the chairman stated that—judging by the result of the first few months of the year—the new premiums for 1865 were expected to reach \$250,000, which would give the Society a gross annual income of a million and three quarters of dollars.

**CANADIAN PETROLEUM.**

THE Petroleum business of Western Canada still continues to afford promise of the best results, although, as some may think strange, we hear as yet of no large shipments, nor of wells pouring out their thousands of barrels a day. This is easily explained. The new proprietors are sound practical men, who will not do their work by halves, and having the means to carry on operations on an extensive and efficient scale, it is evident that they are determined to complete the wells before attempting to "realize." It is not many months since the wells have come into the hands of their new owners; since then a complete revolution has taken place in the system of working. This system involves the widening and deepening of the old wells: it may be said in fact to involve their complete reconstruction, requiring almost as much time and labour as sinking them anew. Of the two hundred and fifty wells in course of construction and reconstruction at Enniskillen, not more than twenty are as yet in working order. These are fair yielding and paying wells, but the amount of oil pumped by them at present is not a correct estimate of

what the same wells will do when the remaining unfinished ones get into operation, as experience shows that the more wells there are at work the more oil is procured from each. So reliable is this rule considered, that the owners of some wells which are ready for pumping are deferring a commencement until some of the adjacent ones are ready also. The reason of this is simple. The water in some places is very considerable, and cannot be exhausted sufficiently to admit of a large flow of oil unless several wells are working at the same time, and uniting their efforts to overcome it. It is easily understood how the yield during this transition state should be very limited, and for the same reason how rapidly it must increase as new wells get to work. In the Bothwell district this same difficulty is met with, but it is overcome to a great extent by the large size of the pumps and engines used,—one well being able to throw a volume of oil and water equal to three such wells as were formerly constructed. The largest well here at present, pumping sixty barrels a day, takes forty-eight hours to overcome the water when pumping alone, but when an adjoining well is at work the oil is reached much sooner and more of it is got. The chief cause of the backwardness of this district is that many of the wells first sunk, being narrow, will not admit pumps of a sufficient size to allow a slow and safe action of the machinery. In order to exhaust the water the machinery has to be driven beyond its capacity. The consequence is that the proprietors do not long enjoy the sight of a dark stream of oil from their wells before the overtaken machinery, nearly racked to pieces, breaks down. Something gives way which cannot be replaced on the spot, and which has to be procured from Buffalo or some distant place. This involves the most vexatious delays and great disappointment. Happily this state of affairs cannot be of long continuance, all the new wells having sufficient capacity,—the proprietors being satisfied that to succeed they must use large pumps, large engines (not less than twenty horse power), and work with a slow action. Wells, with such appliances, must yield large quantities, as it is an ascertained fact, from the results of boring, that the oil permeates the rock for many miles in all directions from this place.

From the above facts we may reasonably conclude that before long petroleum must rank as a most important article of commerce in Canada, and the question naturally arises what will we do with it? In a former number we have shown that circumstances, formerly unfavourable, would now afford us a foreign market except in the United States. Since then, we are informed, that owing to the gradually diminishing supplies in Pennsylvania, and the increasing demand for oil, application has been made to the Secretary of the Treasury to permit Canadian crude oil to be refined in bond in the United States. This application, it is said, has been granted, and already a company is being formed in New York for the purpose of taking advantage of this most liberal concession. This must give an additional stimulus to oil operations here, and places us at least on an equality in every respect with producers on the other side.

Something should be said of the quality and yield from the crude Canadian oil. The gravity is from 31° to 32°. From one hundred barrels distilled the following is an approximate estimate of the yield, viz.:

Illuminating oil	80 brls.
Lubricating oil containing Paraffine	8 "
Benzine	1 "
Refuse	5 "
Waste	6 "
	100 "

The above may be taken as a fair average. Some refiners might, however, get the different products in slightly different proportions, as their processes vary. The lubricating oil is allowed to be equal to any other for ordinary machinery, and will command at least double the price of illuminating oil, and the refuse is valuable as a lubricator for cart wheels and railway cars. It is also used with great success by some refiners in the States for mixing with other ingredients for purposes of distillation.

The number of wells in Canada can not be less than four hundred, of which only about thirty are as yet in working order. Twenty of these are at Enniskillen, and ten at Bothwell. The yield is from five to sixty barrels a day. The price at the wells is from \$1 to \$1.75 per barrel. There are besides these several surface wells at Enniskillen which yield a heavy lubricating oil of a specific gravity of 25°. This oil is now much appreciated, and is similar to some crude oils produced in the United States which readily bring from \$20 to \$25 per barrel.

**THE BRITISH MARKETS.**

ON the 19th inst. the Bank of England reduced its rate of discount to 3 per cent., in accordance with the general tone of the market.

The last statement is a most favorable one, showing the amount of gold had attained the high figure of £13,015,530. Money is now quotable at 3 per cent. in the two chief capitals of Europe, and it is remarkable, as evidence of the altered direction of the bullion current, that the reduction in the rate of discount has been in London, more rapid than in Paris. During the long course of the bullion export movement the pressure was greater in the London market than elsewhere, while, at the present time, the accumulations are productive of greater ease, on account of the payments that have been made abroad—in many cases in anticipation of subsequent arrivals of raw material or produce. The following are the current terms for paper, 31 to 60 days, 5 per cent.; 3 months, 3 per cent.; 4 months, 3 per cent.; 6 months, 4 per cent. The allowance for deposit at the Joint Stock Banks are from 1 per cent. to 2 per cent.

**BUYERS' TIPS.** Liverpool, 19th June.—Canadian No 1 Superior, 23s 6d to 24s 6d per bbl.; Extra, 23s 6d to 25s. Wheat, 8s 3d to 9s 6d per cental. The sales of British Wheat, week ending 19th June, was 57,701 qrs.—average price, 41s 6d.; Barley, 2,751 qrs., 28s 8d. Canada Club Wheat, in London, is quoted 31s 6d. per 49 lbs.

The inanimate feeling, so frequently mentioned of late, has continued to influence the tone of the market during the last week.

"The weather has continued fine during the past week, and all accounts we receive from the country agree that the appearances of the crops were never better, and, should there be fine weather until harvest, we might see again one of the largest Wheat crops ever produced in this country."

We are kindly permitted to take the following extracts from private letters:

"Liverpool.—The quotations remain as at Tuesday's market for both Wheat and Flour. The fine weather is the great thing which kills this market, but we are pleased to see, by telegram, that the London market for English Wheat is rather dearer to-day, owing to small supplies. The deliveries of farmers' Wheat is down to 57,000 qrs.—that is, 13,000 qrs. less than last week, and, from what we learn and see, the farmers' deliveries will fall off, and, should bad weather set in, we may see a very smart advance, as stocks of foreign are not large, and if American shipments keep out."

Another says: "The Wheat continues as fine as ever, and, as far as appearances go, the Wheat crop never looked in a finer state, at the same time there are many things to change the present fine prospect, and we may yet hear as bad a yield as ever we had. The market at present, however, is under influence of their fine appearances, and of considerable receipts from sea, as well as from farmers, and, till the harvest is secured, we could do without the receipt of another bushel of Wheat by sea. The trade, therefore, can only be affected favourably by bad weather."

Lord Stanley, speaking of the advantages of colonies to Great Britain, says:

"If we look to wealth, the colonies receive one-third of our exports, and send us within a fraction of one-third of our imports. If we consider our influence and favour among the nations of the world, it is not due from our army, our diplomacy, our wealth, so much as from the fact that we are at the head of a great confederacy of English speaking nations."

**High Wines.**

There is very little animation in the local trade for High Wines, but considerable sales of round lots have taken place during the week, at a shade under late quotations. Manufacturers are holding stiffly at 80 c. per gal. in car loads.

**Twines and Ropes.**

The decline in the value of Cotton has also affected Hemp and Flax to a considerable degree. All kinds of twines are now lower than they have been, and we understand that Shoe and Linen Threads, as also Gilling Twines, are at least from 2s to 3s a dozen lbs., cheaper. Ropes—Manilla, 13 to 13½ c per lb., do Bed-cord, 72 feet, \$1.70 per dozen, do, 60 do, \$1.40 per dozen, do, 48 do, \$1.20 per dozen, tarred rope, 72s. to 76s. per cwt., Kentucky tarred rope, 62s. 6d. to 65s.; do deep sea line, 13½ c.

**FLAX CULTURE**

**AND OTHER THINGS**

DEAR SIR,—In reading the reports of the growing crop, it is most gratifying to find the prospects of the coming harvest so promising. Although it is admitted, and much to be regretted, that we are not without the ravages of the midge in some descriptions of wheat, and occasionally in the crop of barley, it is nevertheless a source of great satisfaction to know that there are certain descriptions of wheat known as midge-proof, that this destructive insect cannot damage to the same extent as some of the older kinds of grain formerly in use in this country. For the importation of a large quantity of this midge-proof wheat for seed the country is deeply indebted to the enterprising firm of Gooderham & Worts, of Toronto, whose good example in this respect is well worthy of imitation by other capitalists in different sections of the country where but little of this kind of wheat is known.

To those who have been unfortunate in having their wheat injured by the midge or weevil, a word of advice respecting a cure by substitution may not prove inopportune. Strange as it may appear, little or nothing has been said by our papers of the appearance and prospect of the Flax crop, while at this moment there are hundreds of acres sown in the country, and presenting the most beautiful appearance. In the Township of Toronto, where little or none has ever been sown before, some eight hundred acres are under crop, and it would well repay any lover of his country, or zealous agriculturist, to visit a plot of some thirty acres on the model farm of William Gooderham, Esq., Meadowvale. It is now between three and four feet long, and thick in proportion, presenting at this moment the most beautiful appearance, being in full bloom, with that blue-bell peculiar alone to this plant.

Now the advice which I would respectfully tender is this, that other farmers would follow the good example set by Mr. Gooderham, who never grew a stalk of flax before in his life; but is nevertheless so deeply impressed with the importance of the crop and the necessity which exists for encouraging its growth, that his firm is making all the necessary preparation for scutching and preparing the fibre for market; and in all probability we will see, ere the season passes, a linen manufactory started in some of those fine mills on the River Credit, where not only scutching will be carried on, but spinning and weaving to a large extent. Then, I say, if such projects are feasible in one county in Canada, why not in another, and in the name of common sense let us turn our attention to the establishment of manufactories, and let the grumbling system cease, that seems to have got into the mouths of every one of late. A perusal of a letter in the *Globe* of the 21st instant, comparing matters as they stand in Canada and the United States, ought to satisfy any reasonable mind that Canada has still many advantages, if only brought into requisition. What can compare with this country in respect of the water power, the mineral deposits, and the vast amount of valuable timber, from which immense wealth can still be realized?

The advantages of introducing Flax-growing in Canada are numerous; while both seed and fibre are turned to good account; this crop, unlike wheat or barley, is not in any instance liable to the ravages of the midge or weevil, and wherever it is sown is a certain remedy for *live worm*. The manufacture of this article into domestic goods for home consumption, furnishes at the same time employment for a large number of hands, of a class too that could not earn as much at any other work. A great deal of the work, both out and in-doors, can be carried on by girls and young boys, of from 10 to 15 years of age, while the more experienced mechanic will find ready employment at good wages. I may remark that too much attention cannot be given to the harvesting of this valuable plant; and while care is required in pulling, keeping the butt ends as even as possible, still more depends on the attention given while dew-rotting is going on: in this process a difference in value of several pounds per ton may be made. After remaining on the grass eight or ten days, it should be turned over, and allowed to remain until the woody part will leave the fibre freely, which will take place generally in eight or ten days. If allowed to remain too long on the grass it is liable to a deal of waste in the scutching; hence considerable loss; besides, the quality of the fibre is never so good. On the contrary, if taken up too soon a difficulty will be met in preparing the fibre and getting it completely free of the woody

parts; it is, therefore, most essential to have it taken off the grass at the proper moment, which is easily known by rubbing a few stalks between the fingers; and when the fibre leaves the stem freely it is ready to "lift." When parties water their flax, the same rule applies.

It is not anticipated, whatever the failure of wheat may be, to abandon its growth altogether in advocating the growth of flax, but a portion of the farm may, with great propriety, be appropriated for flax. Say from five to ten acres each year, if less than this, proper care and attention is seldom given, and it often happens that after the farmer has taken a good deal of pains to prepare his grounds in the Spring, and sow only an acre or two, the quantity being small, he does not look upon it as of sufficient importance to command that attention in harvest and after harvest it so well deserves, hence he fails to get the return he expected, and flax is put down as an unprofitable crop.

In all cases, the farmer requires to give flax the best of cultivation and attention, both in the preparation of the soil and in the sowing and sowing. The best proof of his success in this particular consists in the fact that when parties who thoroughly understand it and give this crop the necessary attention it requires, a difference of fifty per cent is often obtained over those who are careless in attending it properly.

Trusting, therefore, that these hints may not be altogether unheeded by our agriculturists, and feeling confident we are on the eve of better times in Canada, I beg leave to conclude these remarks, imperfectly thrown together, by stating that although we are only getting about one-fourth of the emigrants arriving in Canada this season, those who do remain find ready employment at good wages at this agency. We have not been able to supply a tithe of the demand we have for good farm labourers and domestic servants. The former can have \$120 a year, with a free house to live in, firewood for nothing, grass for a cow, and a piece of ground for a garden. The latter, that is domestic servants, are much sought after, and can readily obtain from four to five dollars per month. Parties applying at the emigration office, Toronto, will be directed where they can find immediate and permanent employment at these rates.

JOHN A. DONALDSON,  
Gov. Em. Agent.

Toronto, June 26th, 1865

**Spirits of Turpentine.**

This staple rose to a very high price, soon after the sources of supply in the Southern States were cut off by the rebellion. From 20 cents per gallon, it rose to 35c. The high rates stimulated the manufacture of turpentine in other countries. From France, Germany, and Norway, considerable quantities were exported. In the Northern States, in California, and in our own province, the manufacture was carried on. Substitutes were also resorted to, so that the price has gradually diminished, until now good Southern Spirits of Turpentine can be bought for \$1.20 per gallon.

It is not likely that any of the substitutes will be employed while good Turpentine can be had. The Benzole probably answers best in place of turpentine. It is, however, exceedingly dangerous, from its volatility and liability of the vapour to combustion. Serious accidents have happened from paints made with Benzole. As a solvent, it is quite equal to turpentine but painters complain of its want of 'body' in mixing with lead. A new substitute made in the North and in Canada has appeared in market, it is called Spirits of Turpentine, but is very different from the Wilmington, it is not equal in any respect, and is more properly a Spirit of Tar or Wood Naphtha. This is sold at \$1.20 in this market, and meets with ready sale. For the ordinary uses of Turpentine this Spirit, which is distilled from the wood and roots of the pine, will no doubt be useful; but for the manufacture of varnishes and paints it will never come into general use, as its want of uniformity of strength and of specific gravity will render its employment inconvenient, and frequently will occasion serious loss. The Wilmington Turpentine has peculiar properties as a solvent and drier, which will render it always the best to use. The French Turpentine is next to the Wilmington, in value, and has been largely used in the Northern States. By redistillation an article is produced nearly equal to the Wilmington. We anticipate a reduction in price as soon as Northern enterprise shall have provided new works at the South for the manufacture of Turpentine.

**BRIGHT PROSPECTS.**

THE prospects of an unusually good harvest still continue to be most promising. Private letters from various parts of the country, confirms the notices which we find in many of our exchanges, stating that the crops never presented a more flourishing appearance at this season of the year. The wheat is very abundant, and it would appear that it has not been subjected to the ravages from the midge to anything like the usual extent. The hay crop is represented as being exceedingly luxurious, which will probably have an important effect on the Cattle market. All kinds of cereals will give a large yield for the amount of ground under them, and we understand that the flax crop, which is assuming very formidable proportions in this country, is presenting a most prosperous appearance.

Unless some unpropitious circumstance should occur which we see no reason to anticipate, the abundant proceeds of the coming harvest will go far towards counteracting the ill luck which has been dogging us for the last couple of years.

**IMPORTS FOR FIVE MONTHS**

**PORT OF MONTREAL.**

We present herewith a table showing the imports at Montreal of the leading items in trade, from 1st January to 31st June of the present year as compared with the same period last year—

	1864.	1865	Decrease
Cottons.....	\$1,406,620	\$82,402	\$1,038,218 = 55 1/2
Woolens.....	1,569,534	879,287	691,247 = 44
Silks, &c.....	215,085	174,971	40,114 = 18 1/2
Sugars.....	631,962	413,590	218,372 = 34 1/2
Teas.....	1,262,872	689,582	573,290 = 45 1/2
Coffee.....	60,503	20,763	39,740 = 65 1/2
Hardware.....	376,271	193,948	182,323 = 48
Iron.....	383,101	233,922	149,179 = 47

**Varnishes.**

There is the usual amount of business being done in this manufacture. Turpentine is declining gradually as trade with the Southern States resumes its old channels, but even at the old price it cannot supersede Benzine. Turpentine we quote at \$2.00 per gallon and Benzine 50 to 55c.

**Prices' Current Page.**

On the Prices' Current page our readers will find besides correct quotations of most articles of trade, a complete list of the new failures, with notices of meetings of creditors, appointments of assignees, writs of attachment issued, and applications for discharge; also a comparative statement of the receipts of produce at Montreal, from 1st January of 1864 and 1865, together with a valuable table, showing the imports of the leading items of trade at the port of Montreal, from 1st January of the present year, compared with the same period of 1864.

**T**HE demand for goods during the past week has been good, and the greatest difficulty has been found to properly execute orders, which have been coming forward freely. In all reasonable goods the market is more than usually bare. Circumstances have fully borne out our views expressed some time ago. We fully anticipated that there would be a dearth in certain lines of staples. After the first rush of the season, many lines of staples were sold without profit, in some cases at a loss. To-day they would bring paying prices. Cotton fabrics of nearly all classes are very scarce. Of Grey Domestic there is no stock in the market. Cash, in some instances, has been refused for the above goods. White Shirtings are in fair supply, but holders are not so anxious as they were a few weeks ago to close at jobbing prices. Prints of good cloth, fast colours, are not to be had at any price. Some lines in Linens are also scarce and much asked for. Rough Hollands and Logging cloths are at a premium. Of 40 in. baggings there is a fair supply, also of striped Hessians. Muslins of all kinds are scarce. Printed muslins are not to be had. In Tickings the market is badly assorted, also Denims. Gambroons have been much enquired for—none in the market of moment. Hosiery suitable for city trade is very scarce and retailers find it hard to sort. Of 64 or 7-4 Lustres the market is also bare, in low price goods especially. There is a good demand, for nice dress goods cannot be obtained in this market at any price; plenty medium class goods. There is a large demand for hat, bonnet, and dress ornaments, suitable for the season; assortment very poor. Jet buttons and sets are in great request; cannot be obtained. There has also been quite a demand for certain descriptions of ladies' straw goods; of this class of goods the market is also bare. We are quite surprised that no attempt has been made to manufacture this class of goods in Montreal; it is easy of accomplishment, and should be attempted. We have abundance of cheap labor, the cheapest labor in the world, and very suitable for this class of manufacture. Why has it not been attempted? Toronto is in advance of us; the manufacture is being attempted there, skilled hands having been imported from Luton. Our labor is cheaper in Montreal. Who will try the experiment? Give us home manufacture by all means, if possible. In woollen goods the market is firm; fair stocks are held; no disposition to job.

Advices from Britain are favourable to holders of stocks here; there is a growing firmness in nearly all classes of goods. It would not surprise us if the next mail gave us intelligence of positive advance in Cottons and Woollens.

During the past fortnight some very large transactions in Canadian goods have been entered into. In Tweeds the business has been very large. In Hamilton, Toronto, and Montreal, we have knowledge of large transactions. Manufacturers and large holders are firm in their demand for prices, and there is a strong upward tendency in this class of goods. Canadian flannels are much in favour with the consumer. Last season the consumption was large, and imported goods suffered in consequence. They are still in favour, and will be sold in large quantities this season. In coarse underclothing the manufacture is quite equal to the whole consumption, consequently few will be imported. Woollen Yarns, also, are manufactured in large quantities, scarcely in the same proportion as other woollen goods, consequently will not interfere with imported goods so materially. No class of goods in this country leave so small a profit to our Manufacturers as woollen yarns.

Cottons will be made freely this fall. During the week we have seen samples of grey cottons made at Dundas, and certainly they do the enterprise great credit. At this moment, the facilities are small, but efforts are being made to increase the capacity. Before long we hope to see these cottons for sale in this market—they will command steady sale at good prices. Thorold Cotton is at present in the market; it is selling freely. Cotton yarn is still in demand, and is much asked after. Holders of Dundas make are firm; it is a good yarn, and much superior to imported. No stock of moment in this market. Cotton and linen bags are being asked for, and are much wanted. Consumers are putting off their purchases, trusting that prices will recede, of which there is no prospect. The Doon,

or Perrino Mill is making quantities of linen bags. The Dundas Mill is making cotton seamless,—quite a handsome bag.

**THE HARDWARE TRADE.**

Sims, H. P.  
Winn & H. Hand.

**O**UR Spring Trade being now over, we can give a pretty good estimate of the results of the season. The sales throughout have been much less than during same period of former years, but with much more satisfactory results. The importations having been very light, and mostly by the regular houses, prices have been fully maintained. Stocks are now a good deal broken, and will be so till arrival of the fall fleet, when it is anticipated that a much larger amount will arrive than did this Spring. The prospects for sales in Western Canada were never better than at present. In many of the large towns stocks of staple hardware have been allowed to run so short, that in many of them heavy goods are entirely sold out. This is accounted for by the false anticipations of expected fall in prices in this market, induced by reports of lower prices in England, and also by former seasons' operations, and which, in many instances resulted in heavy losses to the importer. We do not anticipate again seeing goods sold in this market at the ruinous rates of last year.

The imports for Western Canada so far have been much lighter than anticipated, and our accounts from there are that they are looking for a good and healthy demand in consequence of the appearance of the crops. Should prices be fair, and a foreign demand spring up for the grain of the West, they will have one of the most profitable seasons that has ever occurred in Canada.

**Iron.**—The market is entirely bare of lots for shipment. All here is now in yard except one small lot of Blair arrived by steamer Ulited Kingdom. The prices are firm at our quotations, and will likely remain so till arrivals during July and August. During these months the shipments from Glasgow and Liverpool are made at the lowest freights, and it is not unlikely that large amounts will be sent out. The demand for the Western States having absorbed fully two-thirds of this Spring's imports, it is likely that much larger lots than usual will arrive for shipment to Chicago and Milwaukee. This demand tends to make prices much firmer here than they would be otherwise, as there are parties here interested in this trade who, if they find a margin of 6c or 10c, are always ready to close the lots. Number four Forge Pig have not been in demand this season in consequence of large stocks being held by the mill makers. These are now getting exhausted, and, therefore, more will be wanted this fall.

**BAR AND HOOP IRON** is still well assorted, but stocks are getting light, and prices have been well maintained so far. But few lots of consignments have so far been received, and these have brought full rates.

**BOILER PLATES AND TUBES.**—The arrivals so far, of these articles have been bought up previous to arrival at our quotations, and any to arrive during the next month, are ordered in advance. In these articles the demand has been steady for making engines and boilers for Oil Springs, and it is likely this trade will continue for some time yet.

**CUT NAILS.**—We publish the new price list this week. It will be noticed that prices remain about the same as before; but the smaller buyers are now placed on the same footing as the trade in the city. This gives our western friends an opportunity of sending their orders direct to the manufacturer, or to the trade, as suits best.

**SHELF GOODS.**—Stocks are more than usually reduced in consequence of short importations, and consequently prices are fully maintained.

**WINDOW GLASS.**—The market is getting bare of some sizes, and large lots left over from last season have been fully disposed of. It is likely that the prices this fall will pay a better profit than has been got the past two years.

**POWDER.**—The market is quite inactive. The stock is much in excess of demand, and prices favour the buyer.

**Price List, Montreal Cut Nails.**

In 112 lbs. kegs inclusive, a fair assortment, with not over one-third Shingles, 18s. 6d. per keg. Shingle Nails, when sold alone, extra over assortment, 1s. per

keg. Two lb. and 5 lb. Nails, when sold alone, 10s. per cent. being allowed in assortment, 2s. per keg.

**Discount.**—On orders of 100 to 500 kegs, will be allowed 6d. per keg; On orders of 500 kegs and upwards 1s. per keg. Terms: four months, or three per cent. for cash.

**B**USINESS has been dull during the week, and in most articles we have no change to note.

**TEAS.**—Business, at private sales, has been somewhat restricted by the auctions taking place this week, and we have only a moderate business to report. At the public sale of Messrs. D. Torrance & Co., on Wednesday, the finer Teas brought extreme rates, and medium and common Greens very low prices. The result of this sale gives a fair index as to the state of this market for Green Teas, fine and choice being very scarce, and held at full prices. The lower qualities are neglected and difficult of sale. At the sale referred to, uncolored Japans, of medium and low grades, sympathized with Young Hysons, and sold below figures previously current for such Teas.

We attach full particulars of Messrs. Torrance & Co.'s

**TRADE SALE.**

June 23.—Sale of Teas on account of David Torrance & Co. John Leeming & Co., auctioneers:—

**IMPERIAL.**—40 hf-chs new season Moyune 45c; 45 do do 45c; 38 do do 41c; 41 do do 57c; 40 do do 55c to 56c; 20 do do 73c; 16 do do 78c; 9 do extra superfine do 76c.

THE PRODUCE MARKET.

**FLOUR.**—The arrivals for the week have been larger than for some time past, greatly exceeding the demand, and notwithstanding the unpromising character of British advices, many receivers have been shipping largely in preference to foreign sales on the spot, fearing that the effort to quit large parcels in the present paralyzed state of the market would only produce greater depression without leading to much business. More is however offered than the wants of the trade can absorb, and sellers of winter flour, being fearful of souring, are eager to realize; while dealers and consumers are for the same reasons interested in keeping their stocks at the lowest possible point. The result is a very limited amount of business, with a generally declining tendency. The higher grades are absolutely unsaleable in round parcels, and even the retail demand is of the most trifling character. The nominal prices may be quoted the same as formerly, viz.:—Superior Extra \$6.10 to \$6.30; Extra \$5.75 to \$5.90; and Fancy \$5.55 to \$5.70. Western States superior, and city brands from western wheat, range from \$1.70 to \$1.90, but the transactions are mostly in the vicinity of inside rates. Canada superfine is in limited supply, and the stronger samples from pure Spring wheat are wanted by bakers. Medium brands range from \$5.00 to \$5.25; and strong \$5.25 to \$5.50, the latter figure being somewhat exceptional, and only obtainable for a few favourite brands. No. 2, and the lower grades, are in full supply—a liberal proportion of the Western States flour recently offered being of this character. We quote No 2 \$1.40 to \$1.60. Fine, \$1.20 to \$1.50; Middlings \$3.50 to \$4, and Pollards, \$3 to \$3.50, according to sample.

**WELLAND CANAL FLOUR.**—There has been nothing done during the week. What has arrived has been stored, there being no sale at present for this description offering. Price \$4.70 to \$4.75.

**BAO FLOUR.**—The high range of prices so long maintained has had the effect of bringing a larger supply on the market, from various sources, than the wants of the trade can absorb, and the anxiety to realize has farther depressed prices; even strong parcels from U. C. Spring wheat which, till recently, have found buyers as offered, have for the past few days been pressed, and though offered at \$2.35 to \$2.50, have only met buyers to a limited extent. The weaker samples are still more difficult to quit, and prices are various, according to quality.

AVERAGE PRICES OF GRAIN.

	Friday June 21	Saturday 21	Monday 23	Tuesday 24	Wednesday 25	Highest price 21	For the week.	Current week (last)

Wheat								
Barley								
Oats								

**WHEAT.**—Arrivals are light, and sales limited. A few cargoes of Milwaukee Spring have changed hands at 98c. to 99c.

**CORNE GRAINS.**—Sales unimportant, and prices on the spot are mostly nominal.

**PORK.**—The market is extremely quiet, and prices of Mess somewhat lower. We quote Mess \$20.50, and other grades nominally unchanged.

**LARD.**—There is little offering, and prices are well maintained.

**TALLOW.**—Is unaltered in price or demand. 8c. to 8 1/2c. is the range for fair to good.

**BUTTER.**—The depressed state of the market for the past few weeks, added to the risk of damage from beating in transit, has limited arrivals. There is, however, no enquiry of consequence, and no improvement to note in prices. Most of what is in stock is unsuited for table use, and not taken for the city trade, and sales of such will be impracticable till some activity for export springs up. The Grand Trunk Co. propose running ice cars from the principal butter stations during the summer months, to facilitate its safe and speedy transit and holders in the west will do well to avail themselves of this, and forward when a fair demand arises, and thus avoid shrinkage and deterioration, with the possible contingency of lower prices when the general rush comes forward later on; but until an export demand arises, no advantage can

be gained by moving it, as in most instances it must lie on hand, pending some opening that does not at present offer.

**ASHES.**—Receipts continue liberal, and notwithstanding the unfavourable British advices, the demand has kept pace with the supply, and prices have varied little since our last. We quote first Pearls \$5.40, and Inferiors \$5.40 to \$5.50 less deductions. Pots bring \$5.17 to \$5.25 for firsts, and \$5.00 to \$5.75 for inferiors.

THOS. HOBSON & CO.

Montreal, June 22, 1865.

THOMAS HOBSON & CO.,  
COMMISSION MERCHANTS,

436 & 438 ST. PAUL STREET, AND  
427 COMMISSIONERS STREET.

CIRCULAR.

Montreal, June 8th, 1865.

Having removed to the more commodious premises (436 & 438 St. Paul street, and 427 Commissioners street), we again, with increased facilities for doing business, offer our services as Commission Merchants, for the sale of Flour, Pork, Butter, Eggs, Ashes, Leather, &c. &c. In doing so, we feel confident that we can offer inducements to consignors surpassed by no other House in the city; we have had many years' experience in the business, we pay strict and personal attention to all consignments, we have an intimate acquaintance with the principal buyers of this and other markets, our premises are admirably located and arranged for a Produce trade, while our financial position is such, that we are not obliged to force sales to meet advances, and, when sales are effected, we make remittances with the utmost promptitude.

We make liberal advances upon all descriptions of Produce, and accept Drafts against Bills of Lading to the extent of two-thirds or three-fourths the value of consignments. Cash advances will also be made against consignments to our correspondents in Manchester and Liverpool, and consignors will have the option of having their goods sold here or in either of the abovementioned markets. Our rates of commission will be as low as any House in the trade, and all other charges will be avoided as far as possible.

We have made special arrangements for doing a large Butter business, and, as this has become one of the staple articles of export, and one of the most valuable products of Canada, we beg to offer the following suggestions:—

**PACKING BUTTER.**—Use none but new packages. White Ash preferable. Let them be well seasoned and thoroughly cleaned and soaked in brine, mark distinctly the correct dry tare on each package. Use fine salt only; pack the butter closely; let the various colors be carefully selected; fill the kegs as full as possible; place a clean linen cloth over the top; carefully tuck it down; then put on a handful of fine salt and a little brine; head up immediately; mark neatly with your own initials and address in full to the Consignee. (A brass stencil-plate is best for marking; if you desire one, by applying to us, we will supply it free of charge.)

**PACKAGES.**—The tinnet holding from 50 to 60 lbs is most suitable; it suits the retailer, and is preferred by English buyers; they also arrive in better condition; they cannot be rolled like kegs, therefore they are generally much cleaner. Kegs with loose or slip covers are also much sought after, and are always taken in preference to the ordinary kegs—where large packages are used, we would also advise that, as far as possible, packages should be given out to the farmer to be filled by one maker, where this cannot be done, and where packing in the store is unavoidable, the butter should never be allowed to remain exposed to the damp atmosphere of a cellar, which, perchance, contains every description of Soap, Candles, Oils, Liquors, &c., but it should be packed the earliest opportunity, and, when packed, should be immediately headed up.

It is expected that the demand from England will be very large this season for FINE QUALITIES, for which comparatively higher prices will be paid; but inferior will probably be a greater drug than ever, so that we would advise great care in taking in Butter.

We also pay special attention to the sale of Ashes, and will furnish circulars with directions for manufacturing, &c., on application to us.

Hoping to receive a share of consignments,

We are yours obediently,

THOS. HOBSON & CO.

THE GREAT 7-30 U. S. LOAN.

THE undersigned, having been appointed Agent in Canada for the sale of this popular Loan, is prepared to receive Subscriptions for the same.

ADVANTAGES OF THIS INVESTMENT:

With gold at a premium of 40 per cent (as at present) \$71.44 Canadian Currency will purchase \$100 of this loan, on which amount the U. S. Government pays \$7.30 interest annually. Should U. S. Currency reach par in two years—and now that the war is over there is every reason to believe that it will do so much sooner—the hundred dollar bond, which to-day costs \$71.44 in gold, will then be worth, interest included, \$115.10 in gold, which would be equal to 30 per cent. per annum on the investment. And for the payment of this the whole lands and other property of the United States are pledged.

DIRECTIONS TO PARTIES WISHING TO OBTAIN BONDS.

Remit the amount you desire to invest to the undersigned, or apply through any of the Banks of Canada, stating the exact amount in U. S. currency you wish Bonds for, the interest on which will date from the day of your order, and the Bonds will be furnished you as soon as obtained from the Treasury Department at Washington.

Cash advanced on Warehouse Receipts and negotiable paper. Collections made in all parts of Canada and the United States.

P. D. BROWNE,  
BANKER AND BROKER.

10 Great St. James Street,  
June 22nd, 1865.

MONTREAL TELEGRAPH COMPANY.

NOTICE IS HEREBY GIVEN, that a Dividend of Five per cent for the half year ending 31st May, has been declared upon the Capital Stock of the Company, and that the same will be payable at the offices of the Company on and after the 1st July.

The Transfer Books will be closed from 23rd June till 1st July.

By Order of the Board,

JAMES DAKERS  
Secretary

**GREAT WESTERN RAILWAY OF CANADA.**

# THE GREAT 7-30 U. S. LOAN.

*Advantages of this investment to Capitalists and the general public in Canada and Great Britain.*

With gold at a premium of 40 per cent. (as at present) \$71.44 Canadian Currency will purchase \$100 of this loan, on which amount the U. S. Government pay \$7.30 interest annually. Should U. S. Currency reach par in two years—and now that the war is over there is every reason to believe that it will do so much sooner—the hundred dollar bond, which to-day costs \$71.44 in gold, will then be worth, interest included, \$115.10 in gold, which would be equal to 30 per cent. per annum on the investment. And for the payment of this—the whole lands and other property of the United States are pledged.

As an example of the large profit that has been made by investors in this currency take the former series of this loan, \$100 of which in July, 1864, cost \$10 in gold, and which now, owing to the increased value of U. S. Securities, is worth \$76.70 in gold, showing a clear profit of \$66.70, equal to 30 per cent. per annum on the amount invested; and if this advance took place while the war was still in existence, it may possibly expect a similar advance now that the war is over.

Parties owing debts in the U. S. for goods, lands, or other securities, by the means are enabled to take advantage of the present premium on Canada currency; and if such debts are not due for some time to come, they are fully gaining interest on the Bonds in addition to the premium on their money.

## DIRECTORS TO PARTIES WISHING TO INVEST.

Remit the amount you desire to invest by mail to the undersigned, or apply through any of the Banks of Canada, stating the exact sum in U. S. currency you wish Bonds for; the interest on which will date from the day of your order, and the Bonds will be furnished you as soon as they are ready to issue from the Treasury Department at Washington.

**H. D. BROWNELL, BANKER AND BROKER,**

Montreal, June 20th, 1895.

100, Grand St., JAMES STREET.

N. B.—Cash advanced on good Promissory Notes, Warehouse Receipts, and other Securities. Exchange on New York, and on England, negotiated. Collections made on all parts of Canada and of all parts of the States.

# INTERESTING QUESTIONS & ANSWERS

Relative to the THIRD SERIES of the

## 7-30 U. S. Loan.

Mr. JAY COOKE, of Philadelphia, who under Secretary CHASE had the management of the popular 500 million 6-20 Loan, and who was afterwards appointed by Secretary FESSENDEN the GENERAL AGENT to dispose of the Loans of the Government, has been continued by Secretary McCULLOCH, the GENERAL SUBSCRIPTION AGENT for the sale of the "SEVEN-THIRTY LOAN" now before the Public.

He desires to answer plainly the large number of questions daily and hourly propounded to him, so that his fellow countrymen may all understand what this "Seven-Thirty Loan" is, what are its peculiar merits, how they can subscribe for or obtain the notes, &c.

**1st Question.** Why is this Loan called the "Seven-Thirty" Loan?

**Answer.** It bears Interest, in currency, at the rate of Seven Dollars and thirty cents, each year, on every hundred dollars; making the interest as follows:

One cent per day on each	\$50	note.
Two cents " " "	100	"
Ten cents " " "	500	"
Twenty cents " " "	1000	"
One dollar " " "	5000	"

The Government, however, reserves the right, at its option, to pay 6 per cent. interest in Gold instead of 7 3-10 in currency. This interest-payment in Gold, if it shall be made, will be equivalent to 7 3-10 in currency. The return to specie payments, in the event of which only will this option be availed of, would so reduce and equalize prices as that purchases made with six per cent. in gold would be fully equal to those made with 7 3-10 in currency.

**2d Question.** Where and how can the Notes be obtained?

**Answer.** They are for sale, at par and accrued interest, by all Sub-Treasuries, National and other Banks, and all Bankers and Brokers.

**3d Question.** When is the interest payable, and how can it be collected?

**Answer.** The coupons or interest tickets are due 15th of January and 15th of July in each year, and can be cut off from the note, and will be cashed by any Sub-Treasurer, U. S. Depository, National, or other Bank or Banker.

**4th Question.** When must the Government pay off these 7-30s?

**Answer.** They are due in three years from the 15th of July, 1865, viz., on the 15th of July, 1868.

**5th Question.** Must I receive back my money as soon as 1868?

**Answer.** Not unless you prefer to do so. The Law gives you the right to demand from the Government, at that time, either your money or an equal amount, at par, of the famous and popular 5-20 Gold-bearing 6 per cent. Loan.

**6th Question.** How much do you consider this privilege of conversion into the 5-20 Loan to be worth?

**Answer.** 5-20s, bearing Gold Interest from the 1st of November, are, to-day, worth a handsome premium. If they are worth no more at the end of the three years, when you have a right to them, than they now are, this premium, added to the interest you receive, will give you at least ten per cent. per annum for your money.

**7th Question.** What other advantage is there in investing in the 7-30 Loan?

**Answer.** It cannot be taxed by States, Counties, or Cities, and this saves you two to five per cent. on your income, as all railroad and other bonds, and stocks, mortgages, &c., are taxed, not only by the Government, but by States, Counties, and Cities.

The above questions and answers, it is believed, will give full information to all. If not, the General Subscription Agent, or any of the Banks or Bankers employed to sell the Loan, will be glad to answer all questions, and to furnish the Seven-Thirties in small or large sums (as the notes are issued in denominations of \$50, \$100, \$500, \$1000 and \$5000), and to render it easy for all to subscribe—thus fulfilling the instructions of Mr. McCULLOCH, who earnestly desires that the people of the whole land (as well as the capitalists) shall have every opportunity afforded them of obtaining a portion of this most desirable investment.

**LET NONE DELAY, but SUBSCRIBE AT ONCE, through the NEAREST RESPONSIBLE BANK OR BANKERS.**

For Sale by JAY COOKE & CO., at their Philadelphia and Washington Offices; and by Banks and Bankers generally throughout the Country.

**8th Question.** How does the Government raise the money to pay the interest, and is it safe and sure?

**Answer.** The Government collects, by taxes, internal revenue, and duties on imports, fully three hundred millions each year. This is nearly three times as much as is needed to pay the interest on all the Debt, and as hostilities are actually ended, the amount not needed to pay the interest will be used in paying off the debt. Our Government has twice paid off all its debt, and can easily do so again. The interest is sure to be paid promptly, and the Debt itself is the very safest investment in the world. It is safer than a mortgage on a good farm, and pays a better interest. It is, IN FACT, A FIRST MORTGAGE ON ALL THE LANDS, ALL INCOMES, ALL RAILROAD AND CANAL BONDS, AND BANK AND OTHER STOCKS, MORTGAGES, &c., IN THE COUNTRY. We are all bound for it, and all that we have is held and firmly bound for the payment of it, principal and interest. How foolish those people are, who keep idle, and locked up, their gold and greenbacks, or purchase mortgages or railroad stocks and bonds, which pay only 5 or 6 per cent. interest, when these Seven-Thirties pay (counting the premium on Five-Twenties) over 10 per cent., and are so much safer and surer.

**9th Question.** Is this new issue in all respects like the one you have been selling for some weeks?

**Answer.** It is precisely like it, save that the period for converting the notes into 5-20 gold-bearing bonds, has been extended one month; and, as already mentioned, the Government reserves the option of paying the interest in Gold at the rate of 6 per cent. instead of 7 3-10 per cent. in currency.

**10th Question.** How many of this new issue of Seven-Thirties are there?

**Answer.** \$230,000,000,—the balance of the amount authorized to be issued by Congress by the Act of March 3, 1865.

**11th Question.** How long will it take you to sell these two hundred and thirty millions?

**Answer.** There are about 1000 National Banks all engaged in selling them; also a large number of the old banks, and at least three thousand private bankers and brokers, and special agents engaged in all parts of the country in disposing of them to the People. The entire amount will probably be absorbed within two months. When this two hundred and thirty millions is disposed of, the last opportunity for these profitable investments in United States Government securities will be gone.

**12th Question.** Is there any other Loan on the market?

**Answer.** No. This is the only Government Loan on the market. The Rebellion is suppressed, and the Government has adopted measures to reduce its military and naval expenditures to the old Peace-footing, and thus to withdraw from market as borrower and purchaser. The Seven-Thirty Notes, therefore, must constantly become more and more desirable.

Gray's Hair Restorer, Cheeseman's Pills.

**HELMHOLD'S FLUID EXTRACT BUCHU** and  
**SARSAPARILLA** for Non-retention or Incontinence  
of Urine, Irritation, Inflammation, or Ulceration of  
the Bladder, or Kidneys, Diseases of the prostate  
Gland, Stone in the Bladder, Calculus, Gravel or Brick  
Dust Deposit, and all Diseases of the Bladder, Kid-  
neys, and Dropsical Swellings.

**HELMHOLD'S FLUID EXTRACT BUCHU,** for  
Weakness arising from Excesses or Indiscretion.  
The constitution once affected by Organic Weakness,  
requires the aid of medicine to strengthen and invigo-  
rate the system, which Helmbold's Extract Buchu  
invariably does. If no treatment be submitted to,  
consumption or insanity may ensue.

**HELMHOLD'S FLUID EXTRACT BUCHU** and  
**IMPROVED ROSE WASH** will radically extermi-  
nate from the system Diseases of the Urinary Organs,  
arising from habits of dissipation, at little expense,  
little or no change in diet, no inconvenience and no  
exposure, completely superseding those unpleasant  
and dangerous remedies, Copalba and Mercury, in  
curing these unpleasant and dangerous diseases.

**USE HELMHOLD'S FLUID EXTRACT BUCHU,**  
in all diseases of the Urinary Organs, whether existing  
in male or female, from whatever cause originating,  
and no matter of how long standing. It is pleasant in  
its taste and odor, immediate in its action, and more  
strengthening than any of the preparations of Bark or  
Iron.

Those suffering from Broken-down or Delicate con-  
stitutions, procure the remedy at once.

The reader must be aware that, however slight may  
be the attack of the above diseases, it is sure to affect  
his bodily health, mental powers, happiness, and that  
of his posterity. Our flesh and blood are supported  
from these sources.

**PHYSICIANS, PLEASE NOTICE.**—We make no  
secret of ingredients. **HELMHOLD'S FLUID EX-  
TRACT BUCHU** is composed of Buchu, Cubeba, and  
Juniper Berries, selected with great care, and pre-  
pared in vacuo, by H. T. HELMHOLD, Druggist and  
Chemist of sixteen years' experience, in the city of  
Philadelphia, and now prescribed by the most eminent  
Physicians, has been admitted to use in the United  
States army, and is also in very general use in State  
Hospitals and Public Sanitary Institutions throughout  
the land.

Price One Dollar per Bottle, or Six Bottles for five  
Dollars, delivered to any address, accompanied by  
explicit directions.
