

THE people of any city become what they are and from their standards of right and wrong from the teachings of the Mother, the Teacher, and the Press.

# The London Advertiser

THE old newspaper definition of a good journalist was a man with a nose for news, but The London Advertiser's requirement is a man with a passion for the truth.

LONDON, ONTARIO, SATURDAY EVENING, APRIL 29, 1922. TWENTY-EIGHT PAGES PRICE, THREE CENTS

## FEARS LONDON GIRL MET WITH FOUL PLAY

### WILL CONTROL BROADCASTING TO AID STATIONS

### Radio Telegraph Branch of Naval Department Confronted With Problem.

### ISSUE 2 LONDON PERMITS

### Officials Predict 50,000 Sets Will Be Installed Before Year Ends.

BY RANDOLPH J. CHURCHILL.  
Ottawa, April 28.—So rapidly is the use of the wireless telephone spreading throughout Canada, and so numerous are the applications for licenses for powerful broadcasting stations, the radio-telegraph, a sub-department of the naval department, is confronted with the problem of controlling wireless stations so that other waves in certain districts will not become tangled.

At the present time there are between 2,000 and 2,500 licensed receiving stations in the Dominion. Taking the number of applications received daily as the basis of his estimation, an official of the department stated today that 50,000 at least would be in use before the end of the year.

The increasing number of radio-phones has created a demand for broadcasting stations, and already twenty-five or so enterprises have been given permission to build powerful apparatus capable of reaching a radius of 200 miles and more. Several of these stations are already in operation.

No difficulty would have been encountered if the broadcasting stations were located at different points separated by a distance great enough to allow each a field of waves not overlapping the other, however, for in almost every instance the stations are to be installed in bunches, and the department has since been plunged into a serious problem.

London Granted Two.  
In Toronto, for instance, licenses for six sending stations on a commercial basis have been issued, two in each of the city and suburbs, while three stations already have been installed in Vancouver. If these stations, all of them powerful, are allowed to use the same wave length, and are allowed to operate at the same time, the result will be a confusion of messages and sounds within their radius.

## City Building at Highest Peak Since 1914

### Home On Furlough

MISS A. L. ARCHER, home on furlough from Japan after 23 years in mission work, says Japan is forsaking paganism, but must have Christianity in its stead, or the nation will become dangerously materialistic.

## CROWDS SWARM TO TAX OFFICE

### Mark Eleventh Hour Rush to File Income Returns.

### Bags of Mail Are Delivered Every Twenty Minutes.

Hundreds of citizens of London and of the vicinity are today swarming around the doors of the income tax office in an eleventh-hour rush to file their income tax returns and to escape the penalty the government says must be met if the returns fail to reach the office before May 1, or to be mailed before that date.

## The Weather

FORECASTS.  
Friday—Moderate to fresh west to west winds; fair.  
Saturday—Moderate winds; fair; not much change in temperature.  
An extensive area of high pressure centered west of the Great Lakes, and except for a few local showers in the Maritime Provinces, the weather over the Dominion is fair.

## RECORDS SHOW \$368,775 TOTAL IN PAST MONTH

Inspector Piper Issues Permits For 74 New Residences Valued At \$255,100. AVERAGE NUMBER IS 40 Combined Figures For Four Months of 1922 Give \$609,320.

April's building total is the highest since 1914, and is taken as a clear evidence that the city is once again on the upward trend from the war. During the month just ending 236 building permits were issued for a value of \$368,775. This brings the total for the four months of 1922 up to \$609,320, while at the end of April last year the total was \$503,390. The total for April, 1921, was \$246,175.

The greatest record for the month and in the history of London for that matter, is the fact that permits were issued by Inspector Piper for 74 new residences, valued at \$255,100. Mr. Piper says that in the past the largest number of residence permits issued in a month had been around forty.

## LEAVES FORD TO HEAD LOCAL FIRM

Windsor, April 29.—With the Ford Motor Company of Canada 16 years as service manager, J. D. Isaacs of Walkerville has resigned to become president and general manager of Middlesex Motors of London, Ont. Associated with Mr. Isaacs in the London company will be his brother, Frederick D. Isaacs, and A. C. Mitchell, also former employees of the Ford Company.

## Fixes Blame For Brutal Killing of Romanoffs on Moscow

Paris, April 29.—Responsibility for the murder and burning of former Emperor Nicholas of Russia and all the members of his family is placed by the Bolsheviki government in Moscow. He makes his statement after a three-year inquiry officially ordered by the Kolchak government. M. Sokoloff was for many years investigating magistrate under the imperial regime in Russia, and is generally described as the best living authority on the circumstances surrounding the death of the Russian imperial family.

## FIRE DAMAGES TOTAL \$50,000

### Flames Sweep Upper Floor of the National Poolroom Building.

### Four Firms Suffer Heavy Losses in Blaze On Dundas Street.

Fire, originating in a pile of waste excelsior and rags on the top floor of the National Poolroom Building, 167 Dundas street, late Friday night, caused a total estimated damage of \$50,000 to the several business concerns occupying the block, the National Poolroom, the Starr Photograph Company, the Campbell Hosiery Company, and the Owen Shoe Store.

The several losses incurred by the occupants of the building are as follows: Charles Catalano, owner of the National Poolroom, \$25,000; Starr Photograph Company, \$10,000; Campbell Hosiery Company, \$5,000; Owen Shoe Store, \$5,000.

Most of the loss is covered by insurance. The building itself is held under lease by Charles Catalano, who rents the parts of the building not used by bowling alleys and billiard tables to the above-mentioned companies.

## Parisian Scientists Include Seaweed and Turtle Steaks on Banquet Menu

Paris, France, April 28.—Seaweed and turtle steak formed the prime delicacies offered to the epicureans of Paris yesterday at a banquet arranged by an association of about 1,000 persons prominent in the world of science. General Messimy, former minister of war, and Princess Murat sat at the speakers' table. The menu of the banquet read approximately as follows:

## DECLARES UNCHRISTIANIZED JAPAN MENACE TO WORLD

Twenty-three years experience in the mission fields of Japan, has given Miss A. L. Archer, who is spending a short furlough with her brother, H. E. Archer, 455 St. James street, an intimate knowledge of the conditions in that country affecting the political and religious situation.

## WANTS ALLIES TO GUARANTEE RUSSIAN CREDIT

### Tchitcherin Sends Note to Premier Facta of Italy Demanding Assurance.

### FUNDS FOR RESTORATION

### British Propose That Country Recognize All Her Debts.

Genoa, April 29.—Foreign Minister Tchitcherin of Russia today sent Premier Facta of Italy, as president of the economic conference, a note expressing the dissatisfaction of the Russian delegation with the delay in replying to its note of April 20, and saying the note would be withdrawn and the Russians would resume their initial position unless they were assured that the credits necessary to restore Russia would be granted.

## FEAR REPRISAL FROM BELFAST

### Cork Aroused Over Outrages and Government Promises Justice.

### Believed It Is Sequel to MacMahon Killings in North.

Dublin, April 29.—The slaying of several prominent citizens of Cork yesterday has aroused a sensation here equal to that caused when seven members of the family of Owen MacMahon were killed in Belfast last month. The full story of the outrages is still lacking, especially the one in which either Rev. Richard Harbord of the Murrach rectory, or his son was the victim.

**Canadian Railways.**

THE whole railway situation came very close to getting its first hearing at Ottawa on Thursday, but the matter was put over for a few more days.

The more the question is approached, the more it is seen to be one of great complications, and any government dealing with the matter is going to step on some persons' toes regardless of which direction is taken.

It is a western story with a very distinct All-Canada bearing.

Every western member is loaded to the gunwales, and when the discussion comes on the house, either now or later on, much airing of views will be indulged in.

Back in the nineties when development of the Kootenay country was so promising, the government wanted a railway line built into it, and the C. P. R. was equally desirous of getting next to territory so productive, and a line was subsidized, one consideration being an agreement to maintain in perpetuity certain specified rates on basic commodities.

Perpetual agreements from any point of view are imprudent. By neither side can all conditions be foreseen. In this case, the war and all it brought with it entailed such an increase in operating costs that the railways had to get an increase in rates, allowed as a war measure.

The government's powers in war time could override an agreement or anything else. A little later, when the railways act was being revised, they put in a clause, suspending the operation of the agreement in question for three years more, and that period is up on July 7. Now the west wants the low schedule reverted to, as will be the case if there is no legislative intervention.

Briefly stated, the two sides of the argument are these: The west claims that the present scale of freight rates is so high as to constitute an insuperable handicap to agricultural industry and the demand for relief is clamored and insistent.

The particular form of relief that is sought is the scale of rates provided by the Crows Nest Pass agreement.

The railway side of the question is that, while rate reductions on certain commodities may be necessary, the roads would be unable to stand the effects of the cut to the extent proposed.

The C. P. R. says it would clip fifteen millions from receipts in the western territory, to which, alone, the agreement applies. If this agreement is returned to, then the company says compensation must be secured through higher rates in the east, which regards the present scale as the limit.

The east, more probably, would insist upon a scale similar to the Crows Nest Pass arrangement, and this, the railways claim, would spell bankruptcy.

It is fundamentally the funeral of the C. P. R., but the Canadian National joins as well in the procession. Rates on competing lines must be the same, otherwise one would get all the business. Last year the deficit on the government roads was some seventy millions.

What it would be if the rates are cut forty per cent, no one cares to calculate.

As things stand right now, Ontario and Quebec are paying the lion's share of the deficit on the operation of the National Lines. If the rates in these have to be reduced to meet those on the C. P. R., it naturally follows that these two provinces are going to be called upon to dig deeper than ever to make up any increased deficit owing to lowered rates.

It is a bigger question than has faced the house for some time, and the chances are that party lines will be fairly well broken down when the matter comes to a showdown.

**Irish Militarianism.**

THE one-day general strike in Ireland was called ostensibly in protest against the extreme proposals of the army to dictate in affairs. Before that the freed-in mayor of Dublin had freed (and about the military "bullies," her belonging to one faction or other of the Irish army, who terrorizing peaceable citizens threatening to bring civil government into impotence and confusion).

There can be no question of the certainty of the fears which sobered Irishmen are expressing in addition to this peril.

Mr. HORACE PLUNKETT has just intimated the danger of referring to Irish political questions to elements by bombs and bayonets.

The matter must be prominent among the subjects to be thrashed by the conference of Irish leaders of all stripes of opinion now in session at Dublin.

Mr. DE VALERA gave the other day surprising views of his own on use of armed force in politics. A respondent of the *Manchester Guardian* put to him specific questions and his replies were explicit. He declared that, while the mutinous faction of the army had acted entirely on its own initiative, he was content that its "sole desire" was to get the Irish people from being led into what is regarded as a leader of their just claims; to

**PUSSY GETS DADDY UP A TREE!**

- THE CAT GETS DADDY UP A TREE -

complete independence." One question asked of Mr. DE VALERA was as follows:

"Would you consider it justifiable to use these armed forces for the achievement of your political aims in the matter of the articles of agreement (that is, the Anglo-Irish treaty)?"

"Answer: If the army could save the nation from the calamities which are bound to follow the acceptance of these articles of agreement, I think it justifiable for it to use its strength to do so."

Still more astonishing and significant are another question and answer:

"Is the army entitled to use force to prevent the election and suppress free speech, whether viva voce or in the press?"

"Answer: The army, as the last defence of the nation, is entitled, in the last resort, to prevent elections such as those proposed, which may well be regarded as the device of an alien aggressor for obtaining under threat of war an appearance of popular sanction for his usurped authority."

It is not necessary to labor the point that this is pure Prussianism.

In DE VALERA'S mouth it simply shows to what lengths a flaming doctrinaire may be carried by his own passions. Instead of indicating power, it really implies a great want in the influence of the former president of the Irish Republic.

If he were not conscious of being abandoned by the great majority of the Irish people, he would not indulge in such futile talk about imposing his will upon them at the point of the sword.

In DE VALERA'S personality alone there is no actual threat of militarism in Ireland. The evidence indicates that he is more and more being pushed aside by the reckless multipliers in the army. They constitute but a small fraction of the Irish soldiers, though they speak and act like desperate men. Their very extravagance of word and conduct, however, are daily provoking angry resentment among the masses of steady-going Irishmen, and are strengthening the hand of the authorities of the provisional government.

It is not military revolt which is threatened in Ireland, but a demonstration by "corner boys" as they are called—that is to say, unemployed young fellows who have tasted the sweets of army life in Ireland and wish to retain the privilege of swaggering about in uniform, requisitioning supplies, and in general attempting to order people about and tell them what they must say and do.

It is incredible that Irishmen can submit to be tyrannized over by an improvised Irish soldiery, and the probability is strong that, as soon as the Free State is able to improve the discipline and efficiency of its own troops, it will be able to compel these upstart Prussians in Ireland to quit their fooling, or suffer the consequences.

**Trains of Romance.**

EIGHTY women are on the Atlantic bound for Canada, wards of the Society for Overseas Settlement. Some are married and on their way to join husbands, some are awaited in the Dominion by men who have promised to make them wives, but most of the eighty are following the sun toward the great open west without definite plans other than the general plan to make a fresh start in life.

Canada wants and needs population. The western provinces whither most of these newcomers are planning to go will welcome them joyously, whether they are already married, are to be soon or merely hope to be. This plan of sending overseas some of urban England's superfluous women has government backing on both sides of the Atlantic and monthly parties similar to this one are planned.

"Trains of romance" London calls them as they leave the metropolitan terminal for the point of embarkation. It is an adventure in romance,

whether the women marry or not. The habit of western frontier poetry and romance today chooses Canada as its stamping ground, and these women from London are headed straight for it.

It may prove a shock to eighty walled-in denizens of the world's largest city to find how big the world really is and what opportunities for personal growth and usefulness lie so many thousand miles beyond their customary sky line. Sending them over is good policy for all concerned.

**READ YOUR CHARACTER**

(By Digby Phillips.)

NO. 201—PERSUADING MIXED PROFILES.

People whose foreheads slant backward and whose eyes are in the world call "strong" or "aggressive"; that is to say, are square and prominent—form a classification that is different from the pure concave, the pure convex, and the perpendicular profile. But you should keep in mind that the popular understanding of "strong" and "weak" chin is misleading.

The so-called "strong" chin is merely the chin of careful and decisive action. Combined with the slanting forehead of quick thought (and generally, though not always, an aquiline nose), it denotes the kind of person to whom you should always play the practical and personal advantage of the thing you are trying to get him to do. You must talk a trifle of theory to this kind of person, but keep it simple, and don't let it intrude too much. Stick more to facts, and appeal to such a person's love for practical action. If you can't prove that your proposition is in harmony with his own theories, his sentiments, his feelings and his ideals, and your battle is three-quarters won. This type of person is theoretical, thinks slowly and often deeply, is capable of following involved theory, but acts impulsively, as likely as not acting long before he has finished thinking. But don't try to befuddle these people into doing something. You may get away with it once. But they'll never forgive you when they've thought it over and found out you've fooled them into doing it.

**LITTLE 'TISERS**

Russia was admitted to Geneva under shadows of suspicion. In fact, that country was regarded about as favorably as when a man brings in one of his uninvited friends. Russia had no sooner gained admission to the performance than she started in to touch the nations for a loan of some millions in the way of credits. Truly, the Russ are getting along true to form.

**Secret sessions of committees or any other body transacting public business are coming more and more into disrepute. The Bay City Times carries the following: "One of the reforms that Mayor McKERHAN of Flint announces that he will bring about will be open sessions of the council. The one objection to the commission form of government is that the commissioners meet in secret session and go over public matters in a secret way. Then after all commissioners are whipped into line to support this or that measure the commissioners come out into the open and go through the routine work so that the public does not get the inside point of view. The plan of Mayor McKERHAN might well be emulated elsewhere. Secret sessions of a public body do not look well to the people. They are not in the interest of good government."**

Both the photographer and the mother had failed to make the rest-less little four-year-old sit still long enough to have her picture taken. Finally the photographer suggested that "the little darling" might be quiet if her mother would leave the room for a few minutes. During her absence the picture was successfully taken. On the way home the mother asked:

"What did the nice man say to make mother's little darling sit still?"

"He told, 'You thit thitll, you little newthuns, or I'll knock your block off, the I that thitll,' she explained."

**JEST**

"John," asked father, "do you practice on the piano while I am away at business?"

"Yes, father, every day," replied the boy.

"How long did you practice today?"

"Three hours."

"Well, I am glad to hear that you are so regular. And the next time you practice be sure to unlock the piano. Here is the key to unlock the instrument last week and have been carrying the key in my pocket ever since."

the following, per pupil, on education in public schools: Saskatchewan, \$67.79; British Columbia, \$58.73; Alberta, \$52.59; Manitoba, \$48.73; Ontario, \$38.73; Quebec, \$34.65; New Brunswick, \$21.54; Nova Scotia, \$19.69; P. E. I., \$16.25.

**DR. BISHOP'S ADVICE.**

**PREVENTION OF GOUT**

BY DR. R. H. BISHOP.

INACTIVITY and approaching old age find many men unprepared. When a vigorous red-blooded man who has always been very active and busy suddenly retires, and begins a more or less inactive life, he must begin also to watch his health habits. Active men usually can eat heartily and somewhat carelessly, because the exercise which they get daily enables their bodies to throw off their burden of poisons. Inactivity suddenly changes the whole routine. The man who has been used to high living while active forgets that he cannot keep up such habits when he retires. Hence there is a lack of equilibrium which sooner or later shows itself as gout, rheumatism or obesity. Gout is characterized by sudden and painful inflammation of the small joints, particularly those of the great toe, accompanied by a deposit of poisonous

material called sodium urate. Such a deposit proves that the blood is overloaded with such matter, and usually means the liver does not make it ready for elimination by the kidneys, or that the kidneys are not functioning properly. The excess comes from high living, coupled with insufficient exercise. The attacks of gout usually come on at night, and pass away with the return of day. The joint is swollen, the skin darker than usual, and exceedingly tender. Sometimes bronchitis, asthma and indigestion of various kinds attend the attacks. The treatment of the attacks consists in applying warm and moist bandages snugly, having absolute rest and taking analgesics, such as atropine or colchicum. These remedies are only to be administered under the physician's direction, however.

Between attacks, the patient should become, if possible, more active out of doors. Most gouty patients, however, will not do this, and so must be compelled to bring about increased elimination by means of mineral waters, vapor baths and massages.

**The BOOKSHELF**

SLEEPING FIRES. A novel. By Gertrude Atherton. The Frederick A. Stokes Company, New York.

Mrs. Atherton is nothing if not courageous. Caring little for convention, she follows her own whim, and in so doing, usually produces original and striking novels.

In "Sleeping Fires" she has a big theme—that of a wife whose husband frowns upon mentally in a woman, who has no notion of making her his companion and friend, but pets her, admires her pretty face and her pretty manner, permits extravagance, and so feels that he has acquitted himself of all obligations.

Like Ibsen's *Nora*, Madeleine Talbot objected to meaningless coddling, which had its roots in a fixed idea of the inferiority of her sex firmly implanted in the mind of her husband.

Of course, such husbands are as extinct as the dodo in this enlightened age, but in the 1870's they flourished in every land and clime. So when Dr. Talbot brought his New England bride to the city she found little precedent for rebelling at the very secondary place she held in his life. The women who ruled society, prejudiced against an outsider and a northerner—most of them were from the south—soon found Madeleine to their liking and before long she became a popular leader.

But this heroine had a mind of her own—at least Mrs. Atherton says she had. That there is very little evidence of this does not shatter the presumption. Madeleine is represented as being passionately fond of reading. The doctor objected to this, as he did not wish a "blue-stocking" for a wife. So he had her banish her books, which she did with becoming docility.

This in the first exciting days of marriage. In time she began to fret over her frivolous life, to even resent the doctor's preference for masculine society and his many evenings at the club. At this propitious moment comes Langdon Masters, a fascinating newspaper editor who read Browning in his free hours. Soon he and Madeleine began to read together. The inevitable result can be guessed.

Up to this point Mrs. Atherton has written well. Her picture of society of the period, while perhaps not so rich in color and tone as some others she has given us, makes good reading. The character of Dr. Talbot is well presented. Madeleine herself, while a little shadowy, has reality. But from the time of the catastrophe, which sends Masters back to New York, the book drops into the easy melodrama of the cinema.

But Mrs. Atherton has no intention of allowing either her Byronic hero or her shadowy heroine to accomplish self-destruction. With trained facility she pulls both back from the brink and unites them in the holy bonds of matrimony. Madeleine having accepted divorce when it pleased her creator to produce it.

**Pains After Eating**

Today thousands are afraid to eat because of the pains that follow even a light meal of good and wholesome food. Mother Seigel's Syrup, taken after meals, has helped tens of thousands to enjoy their food, and put an end to the pains and miseries of indigestion. Sold in 50c. and \$1.00 bottles at drug stores. 6-921

**Champion Spark-Plug Company of Canada, Limited**

Windsor, Ontario.  
 Feb. 3, 1922.

**Canadian Daily Newspapers Association, 902 Excelsior Life Bldg., Toronto, Ont. Canada.**

Gentlemen:-

In considering our advertising media, we have made a careful analysis of each class, and after several years of continuous effort, we have demonstrated to our satisfaction that for Canadian merchandising the daily newspapers are the basic media through which to educate the users of a product that is sold to the masses.

We feel that the daily newspaper is just as essential to our merchandising as is our sales force and our direct dealer work, for through it we are enabled to tell our story to those whom we desire to reach, at a smaller per capita cost than is possible through any other media, and by mass selling, it has enabled us to reduce our prices.

Manufacturing the highest standard of quality and backing it with our entire organization for performance, we feel that the daily newspaper has been only secondary to these factors in its importance in gaining for Champion Dependable Spark Plugs the enviable position of market domination.

Needless to say, we expect to continue to place daily newspapers first on our lists of media.

Yours very truly,  
 F.B.C. F  
 CHAMPION SPARK PLUG CO. of Canada, Limited.  
 Vice-President & General Manager.

High testimony, this, from the makers of Champion Spark Plugs. They say that Daily Newspaper Advertising has been second only to the factors of organization and management in securing for them domination of the Canadian market for Champion Spark Plugs.

What more convincing testimony could there be to the all powerful influence of Daily Newspaper Advertising?

Issued by The Canadian Daily Newspapers Association, Head Office, Toronto.

# The White Desert

(Continued From Our Last Issue)

She pressed her lips tight. "I'm not going to tell you first. I'm not going to tell you first."

got to do something for me first. She was speaking rapidly now, the words flooding over her lips between gasps, her eyes set, her hands knitting.

"He ran away and left me for three days. The fire went out—my baby— hysterical laughter broke from her dry lips— 'My baby died, and still he didn't come. He—'"

"Agnes!" Houston grasped her. "Maybe he couldn't get back. The storm—"

"Yes, the storm! It's always the storm! We would have been married—but there was the storm."

Then she halted for the briefest part of a moment, to become suddenly madly cajoling, crazily cunning.

"Listen, Barry. You want to know things. I can tell them to you—oh, so many of them. I'll tell them, too—if you'll only do this for me. It's my baby—my baby. Won't you promise for me? Take her to the priest—please, Barry—and have her buried in hallowed ground. Won't you, Barry? Do you want me to live and tell you why I did the things I did? Do you want to know who was back of everything? I didn't do it for myself, Barry. It was someone else. I'll help you Barry, honestly, I'll help you."

"About the murder?" Houston was leaning forward now, tense, hopeful. But the woman shook her head.

"No—the lease and the contract. I'll help you about that—if you'll help me. Take my baby—"

"The man rose, Agnes. If you want to help me afterward, well and good. If not—you are free to do as you please."

The woman had raised eagerly. "Then look in a box in the top drawer. You'll find a crucifix. They—they might want to put it on her."

In a mass of tangled, old-fashioned jewelry, he found the crucifix, its chain broken and twisted, and placed it in a pocket. Then he turned to the grimmer task—and the goodby. A half hour later, white-faced, his arms cupped gently about a blanket-wrapped form, he stepped forth into the storm, and bending against the wind, turned toward the directions of the sobbing woman he had left behind.

The snowfall was lighter now; he could find his way more easily.

Black spots against the snow, two figures had suddenly come out of the sweeping veil—a girl and a man. Something akin to panic seized Houston. The man was Lost Wing. The girl was Medaine Robinette.

Medaine's eyes went with womanly instinct to the bundle in his arms. "A baby!" There was surprise in her tone. Forgetting for the moment her aversion to the man himself,

Houston, then bent to tighten the fastenings of her snowshoes. "I know the way," came quietly. "I have been over it—in summer and winter. I will show you."

"You! Medaine! I—beg pardon— The outburst had passed his lips almost before he realized it. Miss Robinette, you don't know what you're saying."

"I know the way," she answered, without indicating that she had heard his remonstrance. "I am glad to go—for the sake of—" She nodded slightly toward the tenderly wrapped bundle on the pack. "I would not feel right otherwise."

CHAPTER XVIII

AN hour found them in the hills, plodding steadily upward, following the smoother mounds of snow which indicated heavy, secure drifts. As they went higher, and the wind blew against them with its hail of splintered ice particles, Houston gave her heavily gloved hands to her face in sudden pain and remain there. The man went to her side, and grasping her by the shoulder, stopped her. Then, without explanation, he brought forth a heavy bandanna handkerchief and tied it about her features, as high as possible without shutting off the sight. Her eyes thanked him. They went on.

"I understand," came quietly, and in those two words Houston felt that her opinion had been formed; that to her, he was the father; the quiet form in his arms his own child!

"You are asking something almost impossible. The nearest priest is at a settlement near Crestline."

"Crestline?" Houston instinctively turned toward the hills, a bleak, forbidding wall against the sky. "Will bidding me to Lost Wing to run an errand? I want to get Ba'tiste—for me."

"Certainly." She spoke to the Indian in Sioux and drew away. Houston, pointing with his head, instructed the red-skin.

The Sioux started on, soon to be engulfed in the swirling veil of the storm. Barry turned again to the girl.

"Just one more request: I can't carry the child up there—this way. Will you help strap her to my pack?" Silently she assisted him in the grim task of the pass.

"Do you know the Pass?"

He shook his head. She tapped one glove against the other. "It is impossible then. You—"

"I'll make it some way. Thank you—for helping me."

He started on. But she called him back.

"It's dangerous—too dangerous," and there was a note of pity in her voice. "It's had enough on foot when there's no snow—if you're not familiar with it. I—"

"Tell me the way. Perhaps I could find it. It's not for myself. I made a promise to the child's mother. I'm afraid she's dying."

A new light came into the girl's eyes, a light of compassion, of utter pity. Slowly she came toward

TOGETHER THEY WENT ON AGAIN, GRACELESS FIGURES IN FROZEN CLOTHING.

"A mile more." She said no more. He nodded in answer and extended a hand to aid her over a slippery stretch of ice-coated granite. The snowfall ceased, to give way to spasmodic flurries of driving white. And it was in one of the moments of quiet that Medaine pointed above.

Five spots above the mountain side—the roofs of as many cabins; the rest of them were buried in snow. No smoke came from the chimneys; no avenues were shoveled to the doorways.

"Gone!" Houston voiced the monosyllable.

"Yes. Probably to Crestline. It's too late to turn back now."

She looked at him queerly, then turned away. At last they reached the cabins. There was no wood; he tore the clapboards from a nearby cabin and the far paper from the wind-swept roof. Five minutes later a fire was booming; a girl tired, bent-shouldered, her eyes drooping from a sudden desire for sleep, huddled near it. Houston walked to the pack and took food.

"I shall be in the next cabin—awake."

"Awake?"

"Yes. I'd rather—keep watch."

"But there is nothing—"

"Illness—a snowslide—a fresh drift. I would feel easier in mind. Good night."

Then with his snowshoes and his pack of death, he went out the door to plunge through another drift, to force his way into a cabin, and there go suddenly about the duties of comfort.

The wind-swept night became wind-swept dawn, to find him still grim and drawn and haggard with sleeplessness and fatigue. Then he rose at a call from without:

"Are you ready?"

He affixed the pack. Together they went on again, graceless figures in frozen clothing, she pointing the way, he adding her drift, to force his way into a cabin, and there go suddenly about the duties of comfort.

Noon. And a half-hour from both of them, a burst of energy which soon faded. For above was Crestline—even as the little settlement had been—smokeless, lifeless. They had gone from here also hurrying humans fleeing with the last snow before the tempest, beings afraid to remain, once the lines of communication were broken.

Roofless houses met them, stacks of crumpled snow, where the beams had cracked beneath the weight of high piled drifts; staring, glassless windows and rooms filled with white. Gloomily Houston surveyed the desolate picture, at last to turn to the girl.

(Continued in Our Next Issue.)

## Basque Effects Persist in Summer Fabrics

THE basque effect of the very tight and very thin bodies, which has been a popular feature of many dresses during the past winter and spring, bids fair to remain during the coming summer. Many frocks of the sheerest summer fabric are seen with this perfectly plain and snuggest waist.

The skirts, usually rather full, are stretched firmly to the bodice, which opens in the back, and the distinguishing feature of the mode is the absence of sash, girdle or belt.

This popular basque frock, which during the cooler months was stunningly developed in woolen fabrics of any sort, is usually seen with organdy collar or bertha in its dotted swiss or tissue gingham.

Sketched today are two of the basque frocks so modish just now. They are, with straight, snug waists, rather long, in accordance with the last word from Paris.

These types are by no means confined to lingerie frocks, but are equally suitable for very dressy wear, developed in any of the light summer silks, laces and combinations of silk with lace. The trimming may be as elegant as the purse permits, but the simplest lines are the most fashionable.

## CURRENT EVENTS!

Another Discussion of Topics of Interest for Children and Busy Adults. Today's Subjects:

1—THE GENOA CONFERENCE. 2—THE NEW U. S. TARIFF. 3—RUSSO-GERMAN TREATY.

REPRESENTATIVES of every important nation except the United States are meeting today at Genoa, Italy. They are trying to settle the world's money troubles.

The Genoa Conference. This meeting is called the world's economic conference. It was planned by David Lloyd George, British prime minister.

Thirty-four different nations have sent delegates to the conference. Three continents are represented. Every European country, except Turkey, is taking part in the meeting.

Asia is represented by Japan and too late to turn back now.

Russia, Russia, of course, owns Siberia, a great part of the Asiatic continent.

America is represented by Canada. The United States declined an invitation to go to the Genoa conference, believing that the matters to be discussed there would not be of interest to the United States.

The conference opened Monday, April 10. Prime Minister Facta of Italy is the chairman.

The problems before this gathering are:

First, the matter of foreign exchange. Since the war the value of the money of European countries has changed so much from day to day that trade has become almost impossible.

That is because European countries have spent more money than they possessed and made up the difference by printing worthless paper money. This lowers the value of the national money.

Another trouble has been national debt. European countries went so heavily into debt during the war that they are having trouble now even paying the interest.

Still another big commercial problem is the fact that Russia, which formerly bought heavily from other countries, now is buying nothing. Russia is cut off from the rest of the world because other nations do not like the Russian bolshevik government.

A fourth problem is the disturbance caused by the German reparations. The reparations are the billions Germany must pay for destroying the land, factories and ships of other countries during the war.

The Genoa conference hopes to settle these four problems.

Genoa is a very old Italian city, we, as Canadians, are interested in Genoa because Christopher Columbus was born there or near there.

bill places a high duty on 1,400 products. The object of this is to protect American farmers against competition by farmers in other countries, and in large measure this bill was to blame for the failure of Hon. W. S. Fielding's reciprocity trip to Washington.

GERMANY and Russia, the world's two outcast nations, have signed a treaty or agreement. This greatly alarms other European nations.

Ever since the world war ended, Europe has feared an alliance between Germany and Russia. For if these two countries work together, they may become the most powerful nations on earth.

That is because Russia has more land in one piece than any other nation. And it has great riches in natural resources which have not been developed.

Germany does not have much land, but it has many factories, and the German people have great organizing ability.

Now what Europe fears is this: That German organizers will begin to develop the great natural resources of Russia.

## VALLEY OF THE CIRCUS

Twelve Toes and Tricky Trixie and Bena Meena have all gone together to work their wicked magic so that you Twins will have to stop. You'll forget all about your journey to the Kingdom of the Korknots. But Pippety-Flop, a little fairy friend of mine, happens to be here now, and I'll have him speak to you after you have seen the most interesting things. Perhaps the magic will have worn off then enough to let you choose. I'll wait for you on the Hawthorne tree across the valley. There is only one more valley after this, you know, until you reach the end of your journey.

Away flew the dove, and at that moment there was the glare of a brass band.

Nick had just been about to say: "Oh, come on, Nancy. We'll fool the dove, and show him that those three old sorcerers can't boss us any more with their old magic!" when the music started.

Instead he said, in spite of himself: "Oh, look! There are the big tents right ahead of us. Let's go in."

And Nancy, who also had resolved in her own little heart to do just what Nick had made up his mind to do and go straight ahead through the valley on the Fairy Queen's errand, said delightfully, "Oh, yes, come on. We must see this lovely

measurements, however, are by the micro-farad, a millionth part of a farad.

Radio Editor: How far apart should the antenna wires be? H. A. Answer—For receiving only a single wire need be used. Make this as high as possible. If two are used, a four-foot spacing would be practical.

Radio Editor: I have followed with much interest your radio column and have been waiting for the details regarding a moderately priced receiving set capable of picking up radio phone concerts from sending stations within a radius of 200 miles. The signals to be received strong enough to be heard through a horn.

J. M., JR.

Answer—A set such as you mention necessitates a receiving tuner, a vacuum tube detector and at least two stages of vacuum tube amplification, as well as the loud speaker attachment. This set costs approximately \$175 to \$250 and is effective up to several hundred miles under good conditions. The range will not be as great with the loud speaker as with the head phones.

Radio Editor: I made a set. The aerial is five wires, each wire No. 18 single strand. Coil has 250 turns, with taps every fifty turns, crystal detector, 2,000 ohm microphones.

A. C. H.

Answer—For your aerial use a single No. 14 copper wire, 150 feet long, located as high as possible. Use a coil of about fifty turns with a sliding contact, which gives you closer adjustment and a wave length which will receive the broadcast signals. A single layer coil should be used. For a coil of "loop" aerial to be used in the house, wind about fifteen turns of "Litz" wire on a wooden frame about four feet square. A coil aerial gives best results with a vacuum tube detector, and the aerial should be pivoted so as to be turned in the direction of the sending station to receive the strongest signals. If you connect more than one set of receiving telephones connect them in series. The coil aerial should be a continuous loop.

circus! I wonder if they still have Tag Tiger, and Mr. and Mrs. Lion, and Kicky Kangaroo and his mother, and Gyp the Giraffe, and all the others who ran away one time!"

By that time they were inside the gates. The man had let them in for nothing.

Wasn't old Twelve Toes a rascal! It was all his doing, you know.

(To Be Continued.)

## Thin For Years Gains 21 Pounds MASTIN'S VITAMON TABLETS

Now Used By Millions As A Natural, Quick and Easy Way To Help Increase Weight and Energy

So remarkable is the action of MASTIN'S VITAMON TABLETS in helping to increase the nourishing, health-giving power of what you eat, that one woman recently gained 21 pounds after being thin and ailing for years.

Weak, thin, run-down men and women everywhere—victims of undernourishment—are often amazed at the astonishing improvement in strength, health, weight, mental alertness and appearance after only a short course of MASTIN'S VITAMON TABLETS.

MASTIN'S VITAMON TABLETS contain all the necessary lime salts and other vitalizing elements which Nature provides for perfect vigor of body and mind, and to build up that powerful resistance which helps to guard you against the germs of disease.

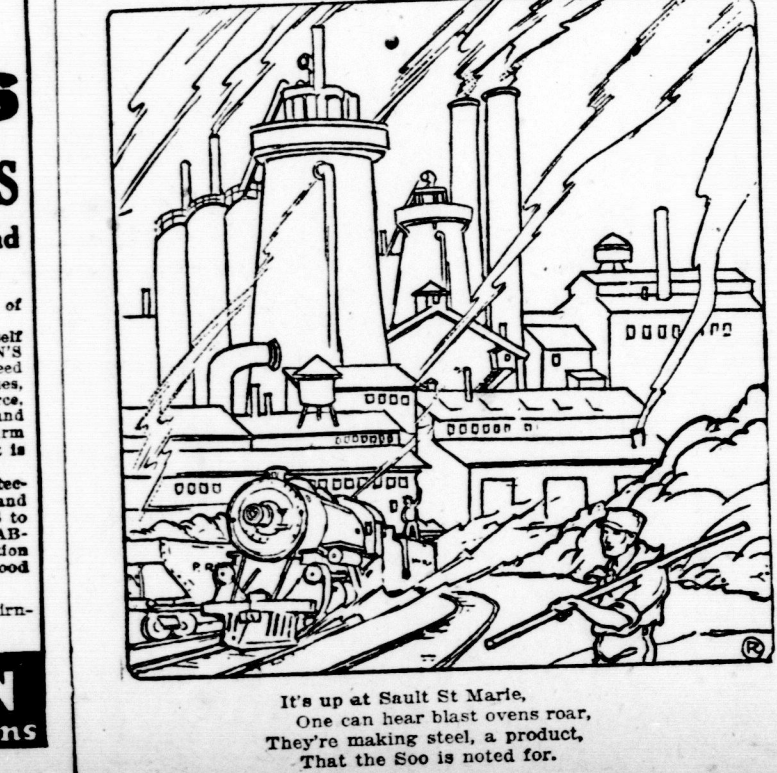

Only by making the best yourself can you fully realize how MASTIN'S VITAMON TABLETS help to feed and nourish the shrunken, wasted, build-up renewed nerve force, strengthen the entire digestive and intestinal tract and help put on firm solid flesh in the places where it is most needed.

For your own safety and protection against cheap substitutes and imitations, insist upon MASTIN'S TABLETS guaranteed to give satisfaction or money refunded. At all good drug stores.

Standard Drug Co., Ltd., Cairncross & Lawrence, Ltd.

It's up at Sault Ste Marie. One can hear blast oven roar. They're making steel, a product. That the Soo is noted for.

## TINTED TRAVELS

## PRUNE DISHES

USE plenty of prunes during these early spring days. From breakfast to dinner there is a place for them in every menu.

Stewed prunes: Peel and wash prunes. If served as plain stewed prunes too often, but if lemon juice be added and the prunes carefully removed from the stones and the whole served in glass as a fruit cocktail, the family won't object to the same old prunes.

Prune whip is a delicious and nourishing dessert. It can be varied in several ways—the sauce can be boiled custard or whipped cream, nuts can be added to the pudding itself.

Children and invalids may be served prune whip quite as happily as well persons.

Prune Whip. Five eggs (whites), 1 cup mashed stewed prunes, ½ cup sugar, ¼ teaspoon salt, ¼ teaspoon cream of tartar.

It will take about one-third of a pound of uncooked prunes to make one cup mashed and stewed prunes. Wash prunes carefully through several waters. Cover with one cup of cold water and let stand an hour. Cook in same water till tender.

Remove stones and rub prunes through a colander. Add sugar and cook till the mixture begins to thicken. Remove from fire and let cool. Add salt, cream of tartar and vanilla to prunes. Add gradually to the whites of the eggs beaten till stiff and dry. This means absolutely "stiff and dry." The whites must stand up. They should be beaten on a large platter with a wire whisk. Put pudding mixture in a buttered pudding dish. Set in a pan of hot water and bake 25 minutes in a moderate oven.

Serve cold with boiled custard or whipped cream. One-half cup of English walnuts may be added the last thing before baking.

Cornstarch Prune Pudding. One-quarter cup cornstarch, ½ pound prunes, 2 cups cold water, ¼ cup sugar, 2-inch piece stick cinnamon, 1-3 cups boiling water, 1 lemon.

Wash prunes through several waters. Add the two cups of cold water and let stand an hour. Boil until soft in same water. Remove stones from prunes and return prunes to the water in which they were cooked. Add sugar, cinnamon and boiling water and simmer 15 minutes.

Mix cornstarch to a smooth paste with a little cold water. Stir into prune mixture and cook, stirring constantly for five minutes. Remove from fire and take out the cinnamon. Add the juice of the lemon and turn into a mold to become firm and chill. Serve with whipped cream. This is a simple, delicious dessert.

Rice Border With Prunes. Eighteen large prunes, 4 tablespoons rice, ¼ cup sugar, 1-3 cup shredded

Genuine

**ASPIRIN**

## BELIEVE MOTOR CAR BUSINESS AGAIN NORMAL

Dealers Report Improved Conditions General Throughout Western Ontario.

### ANTICIPATE SHORTAGE

London Agents Find Difficulty in Supplying Demand For Used Autos.

BY J. L. MIDDLETON.

It is no longer necessary to consider prophetic the statement that 1922 opens to the motor car industry one of the most promising years it has ever known. While some sections of Ontario are somewhat slow to respond to generally improved conditions than others, the upward tendency is noticeable every place, and the larger portion of the province—Western Ontario in particular—seems to be on a normal footing right now, so far as the motor car business is concerned.

**Used Car Situation.**  
Take the city of London, for example. One of the most striking indications of the return of good business is found in the used-car situation. Three months ago it was most widely discussed and threatened to throttle the whole business by requiring so much of the capital of dealers that they would simply be unable to absorb new car production and serve the demands of their buyers.

Today the used-car situation is much less talked about. In fact, so far as London is concerned it has solved itself. In a large number of cases there is actually a shortage of used cars.

**In Fifteen Minutes.**  
The writer stepped into one used-car salesroom the other day, and saw two cars sold in fifteen minutes. Within an hour later at least half a dozen people stepped in there inquiring for some certain make of car which they wanted to buy immediately.

One big distributor of automobiles it may be stated actually has a man out buying used cars of his particular make in order to supply the demand made through his own place of business by local buyers.

If there is any significance to be gained from this, it is in the fact that used-car shortage usually precedes a shortage of new cars. And in view of the difficulties of getting into a production that even keeps pace with present orders, a new car shortage is not beyond reckoning with.

**Find Out Condition.**  
After a three months' survey of the used car business in London and district, the writer finds that before any reliable dealer offers a used car for sale it is the rule that trained mechanics make it their business to find out all about the internal mechanical condition of the car, and that customers get the absolute facts about the things the eye cannot see. If a car isn't right, in all particulars, these dealers put it in shape for good, dependable service. If it can't be renewed and properly tuned—they do not offer it for sale.

London dealers are not in the business to bluff the public. When a motorist buys from a dealer who uses "Advertiser" business columns, he knows exactly what he is getting, inside and outside.

**Keep Customers Happy.**  
Keep your customers happy is their motto. "Keep them smiling and contented. Sell them a real, dependable car; the best that money can buy."

### Auto Notes

**TIME** is drawing near to prepare for week-end and longer touring trips.

That means tuning up the car for long driving and rough wear and preparing for all sorts of emergencies.

Before starting on any trip the automobile should be thoroughly overhauled. All parts should be well lubricated, transmission greased, crankcase and gasoline tank cleaned out and new oil and fuel put in. The gasoline line ought to be blown out, the vacuum tank cleaned and the carburetor put into shape for warm weather driving. A heavier oil should be used for the summer days.

**Avoid Squeaks.**  
Test the wheels for wobbling, tighten up all nuts and bolts to prevent rattling and squeaking, have the engine cleaned of carbon and tuned up.

Besides, there is oiling of springs, adjustment of various parts, tightening the steering mechanism and filling the battery.

After this, the car is fit to leave home for a long drive. But the wise motorist prepares himself for all sorts of needs along the road. He looks over his tool kit and sees that all tools he might possibly use are there.

**Lists of Tools.**  
A complete list of tools includes wrenches, pliers, a hammer, screwdrivers, files, wire, nuts, bolts, cotter-pins, tire valves, pressure gauge, spark plugs, rim lugs, talcum powder, tape, an extra valve and spring, grease gun and an extra spring clip and bolts.

Careful driving and attention to all details in running the car will assure pleasure on long trips.

## Motorists Find Cheap Oil Will Not Do Work of Higher-Priced Lubricant

"Where most motorists make their mistakes," said one of London's best known dealers today, "is in thinking that a cheap oil will do the work of a good oil. Take the average automobile traveling at the rate of 20 miles an hour. Each piston is traveling up and down in its cylinder at the rate of 12 feet a second. If it were not for a little film of oil, .003 of an inch thick on the cylinder walls this speed would produce so much heat because of friction that the piston would almost instantly bind in the cylinder."

"It takes an oil of real body to stand up under the strain produced by the 1,320 strokes of the piston every minute. Cheap oil will not do. It hasn't the body to hold it up and make it a safeguard against friction."

"In addition to this condition, there is intense heat. The temperature of each explosion. The cooling system carries off a part of this heat, but the oil must also do its share. It must be of sufficient character and body to stand this heat without thinning down to a consistency where it will no longer prevent friction. The cheap

oil may stand up under the friction alone, but the intense heat of the engine, so thin that it no longer lubricates properly.

"What results? Burned out bearings, scored cylinder walls, excessive carbon and a number of engine troubles that are expensive to repair. And all the time, friction is wearing away every moving part in your engine."

"There are three things you must do to prevent engine troubles and premature wear of your car.

1. Use only oil that is nationally known as a high-grade oil.

2. Use only the correct grade of this oil for your car.

3. Drain and refill your crankcase at least every 1,000 miles.

"Correct lubrication is one of the most important items in the running of your car. It is more important even than keeping your tires inflated, because the lack of correct lubrication can cause repairs that are much more expensive than tires."

"It always pays to buy only good oil. It may cost you a few cents more a quart, but your saving in repair bills will be many times greater than any money you could save by buying cheap oils."

and a wet sponge and wash it. Go entirely around the car, including the top of the fenders to the left side. BUT DON'T WET THE HOOD, it still may be warm.

## MUST PREPARE CAR FOR LONG SUMMER GRIND

Motorist Must Overhaul Auto To Stand 10,000 or 15,000 Miles.

### SOME NEED ONLY GREASE

Owner Must Understand Parts So As To Intelligently Direct Repairer.

In preparing the car for the months of uninterrupted motoring that loom ahead, the spring overhaul should be made with the idea that the car must stand 10,000, 15,000 or 20,000 miles of service without breaking down or accident, the distance depending on the requirements of the individual motorist. So every part should be scrutinized with that thought in mind.

Usually the car owner will delegate all or most of the work to some good repair man, reserving, perhaps, some of the smaller jobs for his spare moments. Although he may do no work himself it is extremely helpful

for him to understand what attention the car requires, so that he can intelligently direct and check the work done by the repair man.

### Require Greasing.

Some cars will require only greasing to make them ready for another year, but the following items should be checked on the average car:

Clean carbon, grind and adjust valves.

Clean and adjust spark plugs and breaker points and wipe out distributor.

Examine commutator and brushes on starting motor and lighting generator.

Examine battery; fill and charge. Tighten all electrical connections; replace wiring with defective insulation.

Drain radiator and fill with clean water; use washing soda if very dirty.

Drain carburetor, vacuum tank and gasoline strainer; and remove and clean all strainer screens in gasoline line.

Drain old oil from engine, flush with kerosene and fill with clean oil.

Adjust clutch and clean plates.

Drain transmission, clean with kerosene, examine gears and bearings and put in new grease.

Examine universals and lubricate them.

Drain rear axle, clean with kerosene, examine gears and bearings and fill with lubricant.

Wheel bearings should be cleaned, greased and adjusted.

Adjust steering mechanism and put in new parts as required.

Tighten spring bolts and add new

bushings and bolts as required.

Adjust brakes and reline if necessary.

Adjust engine bearings, fit new rings or rebore cylinders.

Examine upholstery, top and paint.

Examine tires.

There are many other items, of course, which may demand attention, but on the whole this list covers the things that the average car is likely to require. More extensive work, such as the replacement of gears and bearings, reboring cylinders, grinding valves, and so forth, may be required if the car is getting old or if it has been abused or neglected.

**Will Be Necessary.**

Removing carbon and grinding valves probably will be necessary unless this work has been done very recently. Even though the engine is

not in bad condition, it adds to one's peace of mind to have this work done so that you can look forward to several thousand miles of motoring with the confident feeling that your engine will develop full power and will not require serious attention during the summer.

If the car has already run 20,000 miles or so, it is likely that new piston rings are needed, and this will be indicated by high oil consumption, some reduction in compression and by a falling off in power and fuel economy. It is desirable to do this work when the valves are being ground because the engine is then partly disassembled and is more accessible.

To install piston rings, the oil pan must be removed and the connecting-rod bearing caps must be taken off before the pistons and rods can be withdrawn. Obviously, connecting-rod bearings can be adjusted with very little trouble at this time if they are likely to require attention within the

next 5,000 miles. It will pay to do the work now. Furthermore, inasmuch as the oil pan is removed, it is advisable to adjust the main bearings, if they need it.

While the oil pan is removed it should be cleaned with kerosene, and the oil pump and its strainer should be cleaned also. Cleaning the oiling system is a very important job, and should not be neglected in any case.

If the storage battery has been carefully treated all winter it may require no special attention, but the chances are that it will need the addition of distilled water and require charging. If it has been neglected or if it is much more than a year old, rebuilding or replacing will be necessary.

Bearings and gears in transmission and rear axle should be examined for wear and adjusted or replaced as required.

Universal joints must be well greased, and if they are very badly worn their replacement should be considered.

## EXPLAINS HOW TO WASH AUTO

Dealer Cites Importance of Keeping Up Neat Appearance of Car.

Declares Water, With Proper Application, Is Best Antidote to Slovenliness.

"An automobile body that has lost its lustre, the paint allowed to become cracked, and the rust of body metal exposed is in the same class with the slovenly appearing man with clothes in need of pressing and run-over heels on his shoes," says a well-known London auto dealer, who cites ways and means of maintaining a bright shiny coat for the car.

"Proof that the average car owner is not familiar with the proper way to wash his car and care for the finish is supplied by the big proportion of 'shabby looking cars that may be seen on any street, road or boulevard."

"There is a proper time to wash an automobile," the dealer continued, "and the mud should be done thoroughly. If mud is allowed to dry on the car, it is harder to get off and stains the varnish. Mud should never be permitted to remain on a car longer than absolutely necessary, not over night by any means. All mud contains alkali, and in some parts of the country is almost clear alkali. Alkali has the same relation to varnish as muriatic or nitric acid has to steel. The antidote is water, plain every day water right out of the tap."

**Wash Off Wet Mud.**  
"If one expects to keep a car looking fine, he must be willing to flush off the mud at night no matter how late it is. This need not take more than half an hour and the work can be done thoroughly in the morning. The chief faults to guard against are—excessive use of soap, using water with too much force, and washing the hood before it is cooled."

"In the old days, no coachman would permit a fine carriage to go unwashed no matter how late he came in to the stable at night. You must treat an automobile the same way if you reach the same standard that the old-fashioned coachman reached."

"There are two things that should be remembered. First, that soap, gasoline or anything like them intended to cut grease will attack varnish if allowed to stand on the car, because oil is an important part of varnish. Second, hot water takes the lustre from varnish."

"First of all a car should not be washed in the sun, because the sun will dry off the water too quickly, leaving water marks. Choose a shady place with plenty of light."

**Dissolve Auto Soap.**

"Dissolve a little good automobile soap in a pail of water so as to make a soapy solution. Have a soft carriage sponge ready. Start with the right hand front wheel and the under side of the fender and that part of the chassis near by. Let the water flow from the hose. In a gentle stream so that it will carry about six inches from the end of the hose. Go over the wheels, etc., first with water from a hose. Most of the mud will come off. There may be road oil or machine oil, which requires soap. In that case put some of the soapy water on these parts, sopping it on freely."

"After that has been done start right in with a hose and sponge and wash it off. Don't let the soapy water stand more than five minutes on the varnish. Now wash off thoroughly with clean water because all of the mud and grease should have come off by this time. Leave it alone to dry. That completes the right-hand front part of the chassis, and the same work should be done on the three other wheels and adjacent parts. That completes the work on the chassis."

"Take another clean sponge and with the water still flowing gently from the hose start at the left-hand front of the body and wash off all the dust. There will be no need for soap because machine oil or road oil is never spattered on the body. After washing off the sand go over the entire body again with a hose

Old Fort Garry, Winnipeg, a sentinel of protection on the old frontier. New Fort Garry Hotel in the background.

### SENTINELS OF PROTECTION

Canadian car owners who equip with Firestone Tires expect mileage, comfort, smooth, steady driving, safety and freedom from tire trouble. Such faith in Firestone performance extends to millions of users. The reason is found in Firestone quality, the record of which goes back twenty years to the original determination of the maker—whose name is on the tire—to give "Most Miles per Dollar".

New proof of Firestone protection is found in the greater mileage this year of Firestone Tires. Their high quality is delivering the miles to a degree that makes them the most economical tire you can buy.

## You Can Own an Automobile!

A new car, at list price, may be too much for your purse. But why give up the idea of owning a motor car? Don't do it. It isn't necessary. Buy one of the Used Cars listed below, and get a new thrill out of life.

### Here Are Some Choice Buys

McLAUGHLIN Light Six Sedan. New paint, engine newly overhauled, and generally in A1 shape. A snap.

McLAUGHLIN Light Six Touring, in excellent condition, for a price that will make you buy.

OVERLAND Touring, upholstery and everything in fine condition.

FISHER Touring Car, in good condition, at a real bargain.

All these cars carry our thirty-day guarantee, and are mechanically correct. We have got to move them, thus the extremely low price.

## EXPERT TELLS WHAT MAKES MOTOR WORK

Advises Owner To Learn Functioning of Engine in Order To Avoid Roadside Waits.

WILL SAVE ANNOYANCE

Urges Close Study of Instruction Provided With Car.

Taking things for granted is a striking characteristic of the human species. A man picks up the telephone and takes it for granted he is going to talk with a friend miles away, even if he has to get the wrong number a time or two in the process. But he has little idea of how the telephone actually puts him in touch with his friend. The average individual takes it for granted that sin came into the world because Eve got Adam into trouble. But how it all happened he has only a vague idea.

The automobile owner who steps on the self-starter of his car or cranks his engine takes it for granted that the machine is going to go. But he usually has no very adequate conception as to what actually happens in the engine to make it go. It may not be necessary for him to know how his telephone works or what Eve did to Adam, but it is a good idea for him to have some idea of how an engine in an automobile functions. It may save him a lot of trouble sometime when, contrary to his expectations, the blooming thing fails to develop any power and leaves him stranded on some lonesome highway.

**Internal Combustion Engine.**  
The automobile engine is known as an internal combustion engine; that is, the fuel which gives power is burned in the engine itself as distinguished from the steam engine where the fuel is burned in a separate boiler to produce the steam required for power.

The fuel used in the automobile engine is gasoline or something that goes by that name. This fuel is put into a tank from which it either flows by gravity or is forced by air pressure to the carburetor or is drawn into a small auxiliary tank by suction from which it flows by gravity to the carburetor.

In order to secure a rapid burning of this fuel it is necessary to mix it with a large quantity of oxygen which is most readily secured from

the air. The carburetor measures out a small quantity of gasoline, just the right amount to charge each cylinder each time and mixes it with the right amount of air to supply the desired amount of oxygen. During this mixing process the gasoline is changed from a liquid to a vapor so that the fuel which goes into the engine is in the form of gas.

The simple engine of one cylinder is arranged so that a piston may move up and down throughout its length and at the same time keep an airtight contact with the sides of the cylinder. This piston is connected with a crank-shaft through a connecting rod, so that the reciprocating or up and down motion of the piston is transformed into rotary motion in the crank shaft. This rotary motion is maintained throughout all the gearing and other driving mechanism of the car to and including the rear

**With Two Valves.**  
The cylinder of the engine is equipped with two valves, one for admitting the charge of gas, and the other for permitting the burned or used gas to escape. These are called the inlet and exhaust valves. The action of the cylinder is this—with the piston all the way up in the cylinder, there is only a small space in which the gas can be contained at the top of the cylinder. When the crank shaft is rotated the piston will travel down the cylinder, greatly enlarging the space at the top. When this upper space is thus enlarged a vacuum is created. A vacuum causes suction, which entirely fills the upper part of the cylinder. The inlet valve is then closed, and as the crank shaft continues to rotate the piston is forced back to the top of the cylinder, compressing the entire cylinder full of gas into the small space at the top. A spark then occurs which ignites the gas and causes it to explode or burn very rapidly.

As this gas burns the temperature rises greatly, causing the pressure to increase in the same proportion. This pressure forces the piston down to the lower end of the cylinder turning the crank shaft and developing the power that is necessary to the operating of the car. This power is imparted to the rear wheels and makes it possible for the car or truck to go ahead or back up.

When the piston again reaches the lower end of the cylinder the exhaust valve opens and as the crank shaft

continues to rotate the piston moves back to the top of the cylinder, pushing the burned gas out of it in the process. This up and down movement of the piston is repeated by the engine and consequently the car takes its owner from where he is to where he wants to go.

**Considerable Pressure.**  
The burned gas, as it goes out of the cylinder is still under considerable pressure, and if it were exhausted into the air would make a loud report. Therefore, it is conducted by a suitable pipe to the muffler, where it is allowed to cool, and is broken up into small streams so that it makes very little noise when reaching the air.

It will be observed that in a simple engine of only one-cylinder power is applied only one-fourth of the time. And during that time its force varies greatly. Consequently, a minimum of

four cylinders is usually used in an automobile engine to give a more steady application of power, and often six, eight and twelve cylinder engines are found in cars to provide an even steadier flow of power.

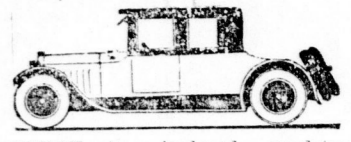

It is necessary to have a cooling system, either of air or water, which will keep the engine from becoming overheated. Otherwise the explosion in the chamber would occur too soon to be most effective, which is known as pre-ignition. It is necessary that the cylinder be lubricated. The oil should have sufficient body to maintain a positive film between the piston and the cylinder walls and yet it must not be too heavy or it will consume a great deal of the power generated. It should not decompose rapidly by heat. The cooling system also helps keep the oil from becoming too hot.

This is a simple story of the automobile engine. It should be supplemented by the owner of a car studying over the instruction book that came with his car.

**QUIET VALVE TAPPET.**  
A light coil spring placed between the valve stem and tappet will take the click out of this part of the engine. As the tappet comes up the spring will absorb part of the click.

Nearly 12 per cent of automobile operating costs goes for gasoline.

### Standardized

**COUPE**—An enclosed roadster. This is the form decided upon by the standards committee of the Society of Automotive Engineers. The coupe has one door at each side and seats two or three persons.

## Justifiable Confidence Rides with the Man who uses "GUTTA PERCHA" TIRES

Who sits by you as you drive? Does Confidence ride with you, that unseen presence which makes motoring an unsullied joy? There's pleasure in driving a car when you know that you are speeding along on four "Gutta Percha" Tires, your spirit full of confidence and your mind free from concern. *Tire-Trouble* is a bugbear that keeps shy of a car shod with "Gutta Percha" Tires.

# SERVICE IS REAL FUNDAMENTAL OF SUCCESSFUL BUSINESS

## Deals With Part Metallurgy Plays In Construction of Autos

Motor Company Issues Instructive Non-Technical Booklet Explaining Elements Necessary in Car Manufacture.

This is a story, shorn of bewildering technicalities, throwing light upon some of the things which herebefore might not have been fully recognized as elements contributing to the accepted standard of quality. It deals with the part played by metallurgy in equating that standard in a lucid, simple manner that a school boy could understand.

It is reproduced from a booklet just issued by the Hupp Motor Car Company of Canada, Limited, and deals specifically with the automobile. It is equally descriptive of the procedure of almost any of the real quality car producers.

**The Use of Metals.**

For many years metallurgy covered only the art of extracting metals from their ores, but the field of knowledge, the scale of operations, and the mechanical appliances involved have become so great that metallurgy now includes the science of adapting metals for use.

And today the science of the use of metals is as important as the science of extracting metals. Where the metallurgical explorer struggled along in the dark, the modern metallurgist now works under the light of knowledge, shaping metals to his need and will.

**Creating the Desired Metal.**

Simply by etching and photographing the surface of steel, which is a compound of iron, the metallurgist has identified its component minerals and has decided how their presence and arrangement affect the characteristics of steel. With this information and the equipment at his disposal, he can practically create the metal he requires for the purpose at hand.

The science of the adaptation and use of metals has been applied in the fullest degree to the development of unusual qualities that last as long as the car itself. Before any part is put into production, before manufacturing can be commenced, the metallurgical department works out in the research laboratories the characteristics that should be possessed by the metal forming the part and then specifies the proportions of the necessary ingredients, and, in addition, controls the heat treatment of the metal.

The metallurgical department functions in four general ways. It works in connection with the engineering department, the purchasing department and the manufacturing department; and, then, it serves directly the owner. The department's threefold

co-operation with the factory is important, because the factory has made it important.

**Supervision Indispensable.**

In the production of cars built to serve and to endure, its exacting supervision is indispensable. For in all its relations it is a safeguard against inferior material and parts, and a positive force in the maintenance of the standard of quality.

Because of its understanding of the use of metals, the metallurgical department is the right-hand man of the engineering department in the designing of motor car parts. Upon completion, the engineers' drawings are studied carefully by the skilled metallurgists, who have but one thing in mind.

**The First Thing Considered.**

Perhaps the first thing to be considered might be its behavior in heat treatment.

Now, heat treatment is merely the method of giving metal the properties that make it useful for specific purposes. These properties are determined by the structure or "grain" of the metal, which depends upon the way it has been heated and cooled.

Heat treatment is in itself an art, calling for the highest type of specialized knowledge and equipment for precise and painstaking workmanship, and to its success in the factory the metallurgical department devotes considerable time and constant research.

With the information at hand, the department knows the nature of the heat treatment to which the proposed part must be subjected and can very

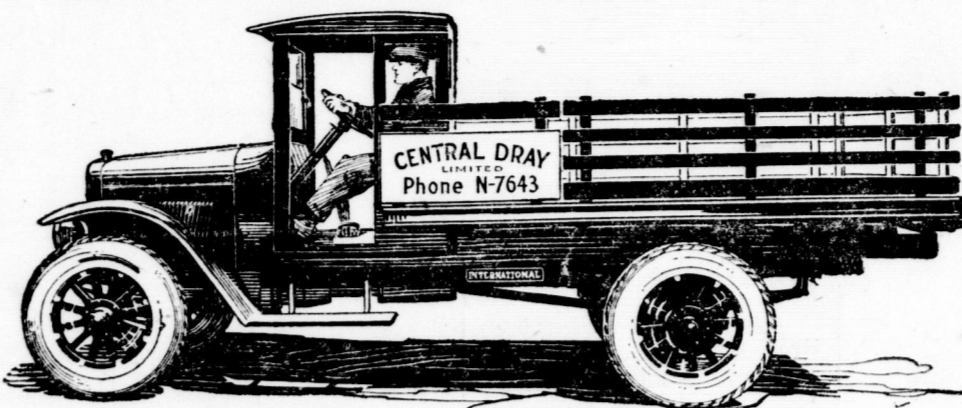

easily foretell its reaction. For instance, there must be no sharp corners left on the part to undergo heat treatment because their response to the process is not uniform with the rest of the part. Sharp

corners cause minute cracks to form when the part is quenched from high temperatures. While these cracks may not be visible to the naked eye and might not cause any undue difficulties, there is the possibility that

when the stresses and strains on the part are not uniform throughout, the piece might fail in service.

Average cost of a pair of motor license plates is about 20 cents.

## INTERNATIONAL SPEED TRUCK

### To Cut the Cost of Hauling

**T**HE International Speed Truck is a real, commercial vehicle into which is built the same, sturdy dependability that has led so many nationally known concerns to standardize on Internationals—plus the necessary speed that saves time when time counts.

It is a "Made in Canada" truck, being produced at Chatham Works to complete the well known line of heavy duty Internationals that for years has been recognized in every Canadian province.

There is real value in the International Speed Truck. The regular equipment includes:

- 34x5 pneumatic cord truck tires all around
- Electric starting and lighting system
- Electric horn and full set of tools
- Power tire pump to save the driver "back-break"

International Motor Trucks are built in five other sizes with capacities ranging from 2,000 pounds to 10,000 pounds. Catalog No. 2 illustrates and describes the full line. Your copy is waiting. Write for it today.

## You Have a Right to Expect More

You pay a good deal of attention to your choice of tires—perhaps because you see them all the time. Have you also determined which is the one best battery for your car?

Be critical of batteries, particularly of the Exide. You have a right to expect more than the ordinary lasting-power from an Exide Battery. It was the first starting and lighting battery for automobiles, and is today standard equipment on more new cars leaving the factory than any other battery.

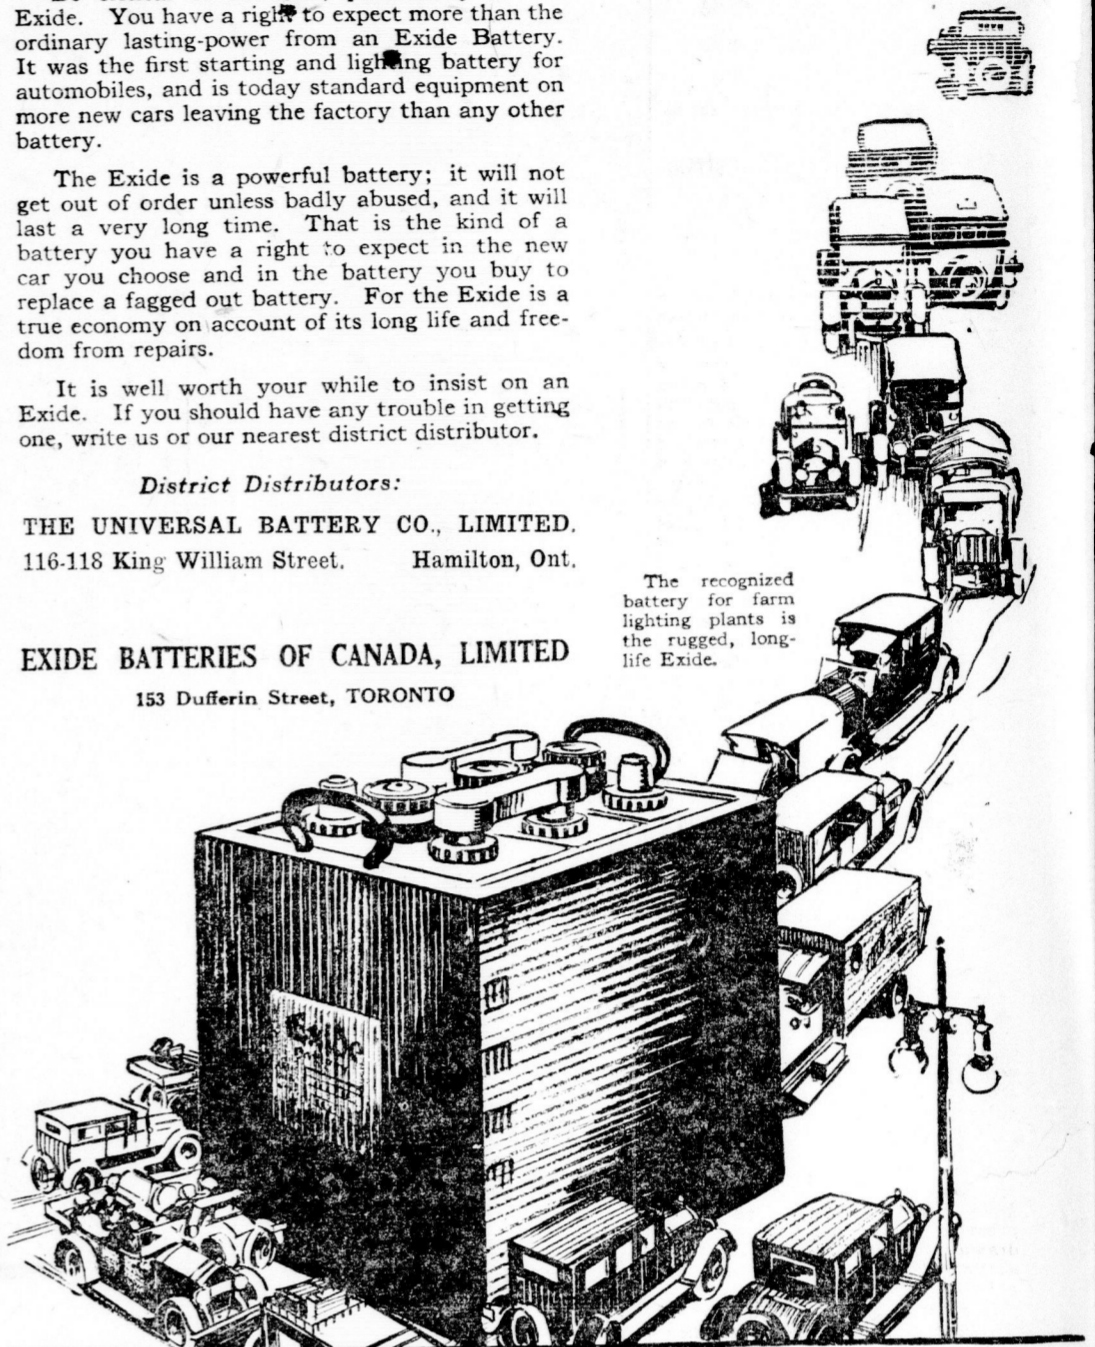

The Exide is a powerful battery; it will not get out of order unless badly abused, and it will last a very long time. That is the kind of a battery you have a right to expect in the new car you choose and in the battery you buy to replace a fagged out battery. For the Exide is a true economy on account of its long life and freedom from repairs.

It is well worth your while to insist on an Exide. If you should have any trouble in getting one, write us or our nearest district distributor.

District Distributors:

**THE UNIVERSAL BATTERY CO., LIMITED.**

346 Dundas Street.  
(Entrance Waterloo Street).  
Phone 5124.  
Belbeck & Smith, Props.

## Simonize

**Y**OU'LL remark at the different appearance your old car will have after you've had it Simonized here. You'll get a new joy out of it; the same joy that came when you first got it. Nothing in an automobile pleases a woman so much as its outward appearance.

Why paint your car when you can have it dry cleaned in a few hours?

SIMONIZE is not a paint or varnish, but a pure vegetable compound. When applied it provides a hard dry velvet veneer or coating over the surface that protects and keeps rain, mud, dust and other destructive elements from reaching the finish. Mud splashes and dust when dry can be wiped off the Simoniz without injury.

SIMONS KLEENER is a neutral compound that removes all stains, scum and dirtiness and prepares the paint or varnish for the Simoniz. Kleener need not be used on a new clean surface.

THE SIMONIZED SURFACE REQUIRES NO WASHING.

Prompt Service. Phone 4628

### Geo. G. Matthews

Cars Washed, Polished and Greased, Upholstering Cleaned. Satisfaction Guaranteed.  
484 TALBOT ST., Near Maple.  
London, Ont.

## Buy An Automobile

**T**HE coming months are the ideal months for touring. If you have been putting off buying a car do not postpone it any longer. We can offer you the best bargains in Used Cars in the city of London.

Each automobile we sell is in excellent shape and can be put to any test.

Before buying elsewhere give us a call. We have cars to sell at a price to suit every pocketbook.

### Dominion Used Car Sales

397 Talbot St. Phone 1373

**A**NY TIME YOU DRIVE INTO our garage you are assured of three important things:

*First*—That whatever is done to your car will be done right by a trained mechanic who knows your car thoroughly.

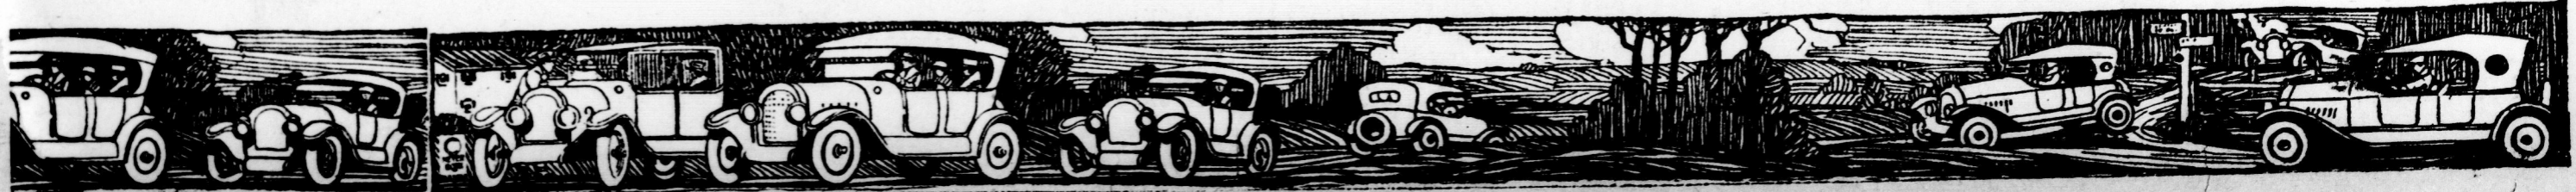

*Second*—That it will be done according to a Ford standardized practice for doing that thing in the quickest and best way.

*Third*—That if any replacement is required it will be made with a genuine Ford part.

These three things mean that the repair will be permanent, not merely temporary. You are assured also of courtesy—and of an honest standardized price, O. K.'d by Ford—that you, as well as your car, will be treated right.

# The PLAYHOUSE and the MOVIE THEATRE

EDITED BY CABR.

## Dumbells Revisit Grand Theatre With Entirely New Production

Show First on Monday — Harry Tate Coming — Fine Vaudeville Bill For Last Half of Week.

THE WELL-BELOVED "Dumbells" are coming back again, this time in an entirely new entertainment known as "The Dumbells' Revue of 1922." The Grand Theatre is the house at which these popular actors will be seen on Monday, Tuesday and Wednesday of next week.

Furthermore, this same theatre is to be shortly favored with a visit from Harry Tate, the inimitable old world comedian. His offering on May 8 and 9 will be a second edition of "Hullo, Canada," in which he will present again his famous skit, "Motoring," his "Fishing" act, and "The Critic," as well as many new numbers.

The latter half of the coming week will see a splendid feature picture and vaudeville bill offered at this theatre.

### DUMBELLS REVUE OF 1922.

Retaining the same old favorite stars, but with a show that is brand new from the rise to the fall of the curtain, the famous Dumbells will return to the Grand Theatre on Monday, Tuesday and Wednesday evenings and Wednesday matinee, in their 1922 revue. In their new entertainment the Dumbells have made a marked departure from the old overseas type of entertainment, and have spent many months and much money in getting together a production that is entirely different from and yet superior to their noted "Biff, Bing, Bang" show.

The new production is brought up to the minute with the shafts of its wit trained on the fads and foibles of the present day. It opens with an allegorical prologue, its setting "somewhere in France," but this one serious bit at the very first of the program is the last glimpse the audience gets of khaki, as the performance then merges into a kaleidoscopic maze of songs, scenery, lights, laughter and lingerie.

Among the gorgeous features of the show are a fashion parade, a miniature Dutch revue and a big Oriental scene introducing the feature song "Incense." There are two satirical

sketches and 20 song numbers, which include: "The Dumbell Melody," "Tally-Ho," "Joshua," "Rushin' Ann," "Mandalay," "Widows Are Wonderful," "K-k-kiss M-m-me Again," "Isle of Dreams," "Say You'll Not Forget," "Dear Old Mammy of Mine" and "I'm a Daddy."

### "HOUSE THAT JAZZ BUILT."

That fat wives make husbands rove is the theme developed in "The House That Jazz Built," the picture feature, starring Wanda Hawley, at the Grand Theatre the last three days of next week. The story was originally published in the Saturday Evening Post under the title of "Sweetie Peaches." and all its entertaining features have been retained, the only change made being those necessary to screen adaptation.

In this picture Miss Hawley has a character of class, in which she always scores, and that it will please the Grand patrons is assured. In addition to "The House That Jazz Built" there will be a Semon film "The Bell Hop," in which the inimitable Larry will be seen in some of his funniest stunts.

### BIG VAUDEVILLE PROGRAM.

As usual, there will be the big vaudeville program, consisting of five big-time acts. This portion of the bill will be headed by Rose Fox and her canines, one of the best dog cir-

## Noteworthy Attractions Come To Grand Theatre

The one and only Charlie Chaplin, who will be seen in his screamingly funny comedy, "The Idle Class," at the Grand Theatre today.

FRED FENWICK and boys singing "Joshua," the big song hit in "The Dumbells' Revue of 1922," coming to the Grand Theatre the first half of next week.

The famous English Beauty Chorus in the second and entirely new edition of "Hullo, Canada," starring Harry Tate, which comes to the Grand Theatre May 8 and 9.

cus acts on the road, appearing this week in Detroit to crowded houses. The Roberts Trio, a novelty variety act, Bailey and McCree, singing and talking, McEvoys and Hamilton, comedy acrobats, and Archie Onri, comedian, competes the bill.

### HARRY TATE RETURNS.

Especially designed for Canadian playgoers, the brand-new revue offered by Harry Tate in his second edition of "Hullo, Canada," containing practically all new features, will be presented at the Grand for two nights, commencing Monday, May 8. There will be no matinee, the magnitude of this new production being such that it has been decided not to play matinees in any except week stands.

The famous chorus of English beauties, such a feature of the original "Hullo Canada" production will be seen in a new series of elaborate musical numbers. The "Bonnet Scene," which in London and Paris was one of the most successful numbers, and "Grandma Days" will constitute some of the outstanding innovations to be presented here.

Mr. Tate has received many requests from admirers to present again his "motoring" skit, and he has consented to do this. He will also be seen in his world-famous "fishing" act, an entirely new creation of his own. "The Critic," a satirical skit on present-day theatrical conditions, will also be offered.

Some of the features that pleased Canadians so hugely on the first tour of "Hullo, Canada" will be retained in the coming show, but aside from these the production will be altogether new.

Elfreda Wynn, an English prima donna, has joined the company since the opening of the theatre's patrons, one of the very best shown at this popular house this season. The feature picture "A Certain Rich Man," tells a strong human story with a vein of absorbing interest which

### Stars At Grand

WANDA HAWLEY, who stars in "The House That Jazz Built," at the Grand Theatre the last half of next week.

its last appearance here, and another new and captivating member will be found in the person of Connie Browning. Among the old favorites to be seen are Deane Tribune, Billy Holland, W. Wainam, Henri Rosen, Harry Gibson, Harry Beasley, Ronald Tate, Len Menze, Isabella Dorothy, Marie Dayne and Molly Monteno.

### FAMOUS CHILD STAR.

The picture and vaudeville bill at the Grand for the last half of the week, closing today, is, by general agreement of the theatre's patrons, one of the very best shown at this popular house this season. The feature picture "A Certain Rich Man," tells a strong human story with a vein of absorbing interest which

fine line of comedy and new songs, while Houplan, the acrobatic funster, offers an entertaining clown novelty.

### SORES SPREAD ALL OVER FACES AND BODIES

Mrs. Howard Houlette, Waskatenau, Sask., writes: "I wish to tell you of the benefit we have received by using your valuable medicine Burdock Blood Bitters."

"My children started to break out on their faces in small white pimples which kept getting larger each day. Pus would form under the scabs, and they would come off, and each time the sores would be larger; some were as large as a twenty-five cent piece, and would spread all over their bodies. I was nearly in despair and sent to the village for a bottle of good Blood medicine. The druggist sent me a bottle of Burdock Blood Bitters, which I commenced giving them at once.

"In about ten days I saw an improvement and they grew steadily better each day, and in one month the sores had all disappeared."  
All blood and skin diseases are caused by bad blood, and to get it pure and keep it pure you must remove every trace of the impure and morbid matter from the system by a blood-cleansing medicine such as  
**BURDOCK BLOOD BITTERS,**  
a remedy that has been on the market for the past forty-five years, and one without an equal for all diseases and disorders of the blood.

## LODGE OBSERVES 50TH ANNIVERSARY

Teeswater Masons Hold Banquet in Hotel Vendome to Celebrate Event.

**DEGREE WORK PUT ON**  
Seventy Brethren With Wives and Friends Take Part in Ceremonies.

Special to London Advertiser. TEESWATER, April 28.—Teeswater Lodge, A. F. and A. M., No. 276, celebrated its 50th anniversary last night by holding a banquet at Hotel Vendome. The reception also being the official visit of the D.D.G. M. Right Worshipful Brother Blackmore of Listowel. After the regular meeting of the court, when degree work was put on and highly praised by the official representative of Grand Lodge, the officers, members and visiting brethren with their wives and friends to the number of 70 repaired to the Hotel Vendome, where tables were waiting.

The table was headed by Wor. Bro. Hiscok, master of the lodge, who also acted as toastmaster. The toast list and the officers of 1872 and 1922 were printed on a folder. "The King

and the Craft" was proposed by Wor. Bro. Richardson; "Grand Lodge," proposed by Right Wor. Bro. Fowler, and was responded to by Right Wor. Bro. Blackmore, D.D.G., who gave a most comprehensive and instructive oration.

"Our Empire" was proposed by Wor. Bro. Moore, and responded to by Wor. Bro. S. R. Brill; "Our Lodge," proposed by Wor. Bro. A. Hiscok, W.M., was responded to by Wor. Bro. Dr. M. H. Gillis, who gave a history of the lodge since its first charter, and a resume of the men who composed the lodge, the places where it had been held, and the fine growth and prosperity of the order. "Visiting Brethren" was proposed by Wor. Bro. Vassiter, H.P.M., and was responded to by Messrs. Lavery and Orr of Listowel. "The Ladies" was proposed by Wor. Bro. Linklater, and responded to by Bro. G. K. Brown.

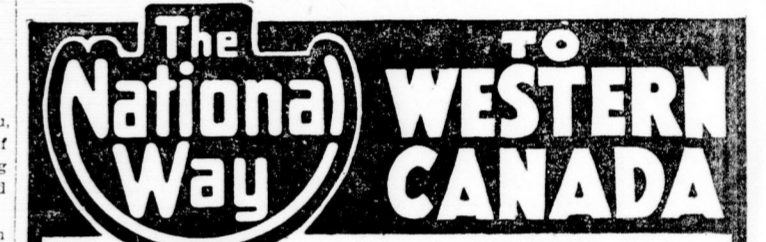

The tables were nicely decorated, and the seven-course dinner supplied by the manager of the hotel was excellent. The fine service was much enjoyed. After the junior wardens' toasts, given by H. Pennington, the happy gathering sang "Auld Lang Syne" before dispersing to their homes.

**TELEPHONE LINE REPAIRED.**  
BELMONT, April 28.—The officials of the Belmont Co-operative Telephone Association state that notwithstanding the extraordinary handicap placed upon them by the count of the recent steel storm, they will have placed the line in full operation again by Monday next.

## Blood-Cleansing, Appetite-Making Strength-Giving

Are the Effects You Naturally Want from Your Spring Medicine? And Hood's Sarsaparilla satisfies these needs as nothing else can. This marvellous restorative tonic and blood purifier has been recognized for nearly fifty years as the best spring medicine for restoring the blood and circulation to their natural richness and vitality. Hood's Sarsaparilla is more than a blood-cleansing, appetite-making food, because it creates an appetite and promotes assimilation of all food taken, thus securing 100 per cent. of nourishment. Thus it contributes to make rich red blood, which carries vitality to all parts of the body and gives the strength and nerve force that nature demands day by day. Take Hood's Sarsaparilla, small dose after each meal, and you will soon note how much refreshed you are, how good your food tastes, and how cheerfully you do your work. Hood's Pills relieve headache, biliousness, constipation.

Indescribable Beauty of Ever-Renewing Youth

A complexion so beautiful it cannot adequately be described. Would you have such a complexion? Then take a lesson from nature.

How does nature renew the complexion? By shedding tiny cutaneous scales day by day, making way for the newer, younger skin underneath. But deficient circulation, or other condition, may interfere with the shedding—the old, worn-out scarf skin remains on too long, causing a "bad complexion." Then nature needs assistance. Such assistance is provided by the mercurized wax process. This actually absorbs the aged, faded or discolored top skin, gently, gradually, without harm or discomfort. Thus the lively, young, healthy-skinned under-skin is brought to the surface. You have a complexion as in robust girlhood—a truly natural complexion—one that can be compared at all with a make-up.

Mercurized wax, obtainable at any drug store in original one-ounce tin, is applied at night, like cold cream, and washed off in the morning. It takes away from, instead of adding to, the complexion. It's a new principle.—Adv't.

# PARLIAMENT TO HAVE DAYLIGHT SAVING MONDAY

### Quiet Session Marked by Brief Exchange Between Meighen and Duff.

### OPPOSE FLYING OF FLAGS

Speed Passage of Estimates of Departments of Works and Justice.

#### BULLETIN.

OTTAWA, April 28.—Ten thousand dollars was voted by the House of Commons today for improvements and repairs to Westminster Hospital at London, Ontario.

The item was contained in the estimates for military hospitals.

OTTAWA, April 28.—(By Canadian Press).—Estimates of the department of public works and the department of justice before the House of Commons today combined to make a quiet afternoon devoted to the steady passing of item after item, although a short exchange between Rt. Hon. Arthur Meighen and William Duff, Liberal member for Lunenburg, lightened the proceedings for a few minutes.

The exchange had its foundation in Mr. Duff's objection, on the ground of economy, to the flying of flags over public buildings. Later, when Mr. Meighen was urging the details of the expenditure in the public works department, Mr. Duff interjected "Hear! Hear!"

"And the objector to flags agrees with me," Mr. Meighen remarked. "I wish to object. I think it is a contemptible remark to make and could only come from a contemptible gentleman, Meighen by name and mean by nature," shot back Mr. Duff.

Items Stood Over. Mr. Meighen observed that he did not intend to "disturb the level of the debate" by discussing the matter, and the contentious items were stood over.

Pace returned with the introduction of the estimates of the department of justice, which were approved in rapid succession. But little criticism was made, although T. L. Church, Conservative, of Toronto North, ventured the opinion that Canada was away behind the times in prison reform.

Sir Lomer Gouin, minister of justice, intimated that the number of prisoners was increasing.

In spite of the fact that the house strenuously debated daylight saving recently and appeared to be fairly evenly divided on the subject, Parliament will conform on Monday with the introduction of daylight saving time in Ottawa. The announcement was made by Hon. W. S. Fielding just prior to adjournment.

Lauds Government. "The government is acting wisely in following the example of the late government in this regard," Mr. Meighen commented.

"If there have been instances where the example of the late government was worthy of being followed," retorted Mr. Fielding, "they are so rare that it is well to mention them."

Mr. Fielding immediately moved the adjournment until Monday afternoon. "The finance minister did well to move the adjournment after the remark he has just made," said Mr. Meighen, who believed that the country would observe with remorse when the government departed from the course of the late administration.

The item of \$5,000 for flags on Dominion public buildings brought a comment from Mr. Church. Apparently, he said, the government had money for flag-waving, but not for the militia.

Dr. J. H. King, minister of public works, made no answer to Mr. Church's comment.

Questions Reduced. Mr. Guthrie analyzed the estimates briefly with a view to calling attention to the "unreal character" of the reductions made. For instance, he said, last year \$57,000 was voted for armories, and this year the item was only \$50,000. But this latter amount was \$40,000 of a revote, showing that the expenditure last year could not have been more than \$17,000.

Mr. Guthrie went on to inquire into an item of \$85,000 for military hospitals, and he was informed by Dr. King that it was for hospitals under the department of soldiers' civil re-establishment.

H. C. Hoeken, Conservative, of Toronto Center, asked where these repairs were to be made. The minister read a list of hospitals where work was required. Right, Hon. Arthur Meighen, leader of the opposition, complained that information as to money which had been spent from last year's vote was not being given to the committee.

Come in Every Day. Hon. Charles Stewart, minister of the interior, rose to declare that it was impossible to give this information fully, as accounts were still coming in every day. The books of the departments were not yet closed, and the accountants themselves did not know what the 1921 accounts totaled. Some of the former ministers should be able to assist their successors, instead of making things worse for them.

Hon. W. S. Fielding also called attention to this condition of affairs, and said that the books of the various departments could not at present be closed up to the end of the fiscal year.

Sir Henry Drayton said the opposition wished to know what had been paid and what the country was obliged to pay. Dr. King stated that the total expenditure on fittings and alterations to armories last year was \$47,000; on experimental farms to Jan. 31, 1922, \$81,000, and for flags on Dominion buildings to the same date, \$25,000.

Items Laid Over. W. C. Good (Progressive, Brant) suggested that the contentious items should be laid over until Dr. King could bring in the desired details. This was agreed to, and the house proceeded to discuss a vote of \$182,000 for harbors and rivers in Nova Scotia.

Hon. Hugh Guthrie said that while the vote for this purpose last year was \$365,000, only \$35,000 was expended. This year the government proposed to spend practically twice that much.

Mr. Meighen asked the minister what amount was spent last year. The minister replied that he had not the information available, but it could be obtained. The item might stand in the meantime.

The next item considered was one of \$39,700 for harbors and rivers of Prince Edward Island. Again Mr. Meighen asked for last year's expenditure, and again he was told that it was not available.

## Milk in Baby's Bottle Saves Life of Mother Poisoning Self

NEW YORK, April 28.—Apparently brooding over her husband's inability to buy her new clothing, Ida Vivian Morelock, 19, drank a quantity of acid, and is in a critical condition in the Jersey City Hospital.

The young mother arose from breakfast this morning with her 22-months-old baby, Doris, and, while still holding the child, drank the poison. Her husband, Charles, 23, called in Mrs. Pauline Willis, a neighbor, who took the nipple from the bottle the baby was nursing and poured the milk down the mother's throat as an antidote.

Mr. Morelock told the police he and his wife had never quarrelled during their married life. Mrs. Willis said that on their way home from a motion picture theatre last night she and Mrs. Morelock were attracted by a hat in a milliner's window. "My husband would buy me that without any question if I asked him," Mrs. Willis remarked at the time, to which the younger woman replied, "You're lucky, my husband doesn't make enough to buy me clothes."

## COUNCIL DECIDES TO DEFEND ACTION

Poolroom Proprietor Wants Damages For Alleged Loss in Tillsonburg Overflow.

Defendant Corporation Shifts Blame to Firm That Built Sewer System.

Special to London Advertiser. TILLSONBURG, April 28.—At a special meeting of the town council it was decided to defend a lawsuit against the town brought on by Harry Minshall, local poolroom and bowling alley proprietor, for \$500 damages caused by water from a town sewer overflowing and flooding his premises on three occasions, April 25, 1921; August 21, 1921, and January 22, 1922.

V. A. Sinclair, K.C., who is defending the town, was present and explained the situation. The general opinion was that the council was responsible as the connection for disposal of surface water should not have been made with the town sewerage system, and was said to have been done without having obtained permission of the council, and Mr. Sinclair was instructed to defend the case.

A great deal of interest is being taken locally in the case, owing to the fact that another merchant across the street on the same sewer was awarded over \$300 damages for the flooding of his basement on a similar date. A Woodslock law firm is looking after Mr. Minshall's interests. The funeral of the late John Inrie, who died in Los Angeles, Cal., last Friday, was held from the M. C. R. train to the town cemetery this afternoon. Mr. Inrie was born in South Norwick, and was the eldest son of the late James Inrie. He resided in his native township and Tillsonburg until about fifteen years ago, when he moved to Detroit, where he was a successful contractor and real estate dealer, and about two years ago he went to Los Angeles, where he had since resided. He underwent an operation about two months ago, but it was of no avail.

He is survived by his widow and two sons, L. W. of Tillsonburg, and Dr. Albert N. of Detroit, also four brothers, Albert of the state of Washington, James and Charles of Tillsonburg, and Horace of Detroit, and two sisters, Mary of Tillsonburg, and Mrs. Fred Young, Detroit. Rev. T. H. Dale, pastor of St. Paul's Methodist Church, conducted the funeral services. The pallbearers were: Jerome Oatman, William Oatman, Edward Lundy, George Buckrell, John Lavin and A. Malcolm.

## TEN INJURED WHEN GAS TANK IN DETROIT BREAKS

Damage to Extent of \$50,000 Caused by Blast at Fisher-Body Plant.

DETROIT, April 28.—Two men were probably fatally injured and burned and eight others badly injured at 2 p.m. Friday, by an acetylene tank explosion and fire which caused \$50,000 damage to the branch plant of the Fisher Body Company, West End avenue and the Wabash Railroad.

The explosion occurred in the metal room where auto bodies are welded and trimmed. It followed the dropping of an ignited oxy-acetylene welding torch by an operator, who thought the gas in a partly-filled tank exhausted and prepared to disconnect the hose. Unscrewing the hose caused gas to escape, the torch igniting it.

The explosion hurled the dozen men employed in the room in all directions, tore out a section of wall and a 60-foot square of roof. The concussion rocking houses for a radius of ten blocks. In a minute the building was in flames. The plant's fire department extinguished them after a half hour's fight.

## MARKS TIME IN MINERS' HEARING

TOPEKA, April 28.—Kansas miners would not go to work under any order made by the Kansas industrial court, even though the wage scale may be higher than ever in effect.

George L. Peck, provincial president of District 14, United Mine Workers of America, testified in the industrial court's hearing on the coal mine strike here today. When the hearing adjourned at noon the court stated no further action would be taken at present.

## PAUL DESCHANEL IS DEAD IN PARIS

Paris April 28.—Paul Deschanel, former president of France, died this afternoon.

Deschanel was president of France from 1898 to 1922. M. Deschanel was taken ill with influenza a few days ago, and on Wednesday it was announced that complications had developed and that his condition was serious. Serious complications set in almost immediately after he was stricken, and his weakened condition, due to the nervous breakdown he suffered while he was president, contributed in lessening his power of resistance. Death came in his home in Paris at 5:30 o'clock this afternoon.

## RHEUMATISM vs. T.R.C.

Lumbago, Neuritis, Sciatica

Rheumatism and similar troubles invariably yield to this T.R.C.'s (Templeton's Rheumatic Capsules) treatment. Many doctors and many hundreds of druggists from coast to coast will confirm this truth. The hundreds of testimonial letters in our files show that T.R.C.'s have successfully treated Rheumatism, Lumbago, Neuritis, Sciatica and Neuralgia of all kinds. But the best evidence is your own experience. If you suffer we want you to try this guaranteed non-injurious remedy at our expense. Druggists sell T.R.C.'s \$1.00 per box. For free trial write T.R.C. Co., 55 Colborne St., Toronto.

## D. C. MACAROW GETS HEARING

Former General Manager of Merchants Bank Appears in Enquete Court.

Witnesses Testify Officers Signed Information Without Personal Knowledge.

MONTREAL, April 28.—(By Canadian Press).—The outstanding feature in the evidence submitted to Judge Cusson, sitting in the enquete court here today, in the charges against Sir H. Montagu Allen, and D. C. Macarow, president and general manager, respectively of the Merchants Bank of Canada, was the fact that the witnesses examined, namely, J. M. Kilbourne, secretary of the bank since 1906; J. Gillespie Muir, chief accountant for the last 35 years, and Henry B. Luecks of the chief accountant's staff, all explained that when the president and the general manager of the bank signed the monthly statements to the government, they had no personal knowledge of the information to which they had testified.

Verification Difficult. Further evidence was to the effect that under the provisions of the bank act, which requires a monthly return to be sent to Ottawa, later than the 30th of the following month, there was no way by which the general manager could obtain such personal verification of the statements he signed.

Evidence further showed that the bank returns sent to the government are made up much in the greater part by merely consolidating the reports of all the branch bank managers by the office of the chief accountant and adding to this a statement of purely headoffice figures, such as value of bank premises, rest and other items belonging to headquarters.

Are Mere Inventory. It was admitted on cross-examination that what the branch bank managers sent in each month to become a part of the general monthly statement sent to the government is merely an inventory, that it is only once a year that there is a reevaluation of the assets held, based upon inspectors' reports.

The case heard today was against D. C. Macarow, former general manager, who was charged with having "willfully made false and deceptive statements" in the monthly statement for October, 1922.

The charge against Sir Montagu Allen of having "negligently" done so, was not taken up today. The case was put over until Monday next, and promises to take several more days' sittings.

## TOWNSHIP SEEKS RELIEF FROM ENGINEER'S AWARD

Ratepayers of Arran Protest Against Heavy Cost of Large Ditch.

CARGILL, April 28.—The township of Arran is interested in a large ditch on the Elderslie-Arran township. The matter has been before the judge on an appeal against the engineer's award. The cost of the ditch to the township will be several hundred dollars, and very much more than anticipated. The ratepayers are much concerned over the large expenditure which will have to be made to complete the ditch and to provide a way out if possible.

The council is obtaining legal advice in the matter with a view to getting some relief from the award.

## Delorme in Luxurious Cell in Jail.

MONTREAL, April 28.—Rev. J. A. Delorme, awaiting trial on the charge of murdering his half-brother, Raoul Delorme, is housed in the debtor's room at the Bordeaux jail. The debtor's room is considered to be the acme of perfection in the matter of luxury as pertaining to jails and is equipped with a private bath and toilet and also furnished with a neat hospital cot with a mattress such as is used in the infirmary.

## COUNCILLORS HOLD SPECIAL SESSION

Mitchell Committee Submit Estimates of Appropriations for the Year.

PROGRESS IS REPORTED

Board of Works Proposes to Issue Debentures for Macadam Road.

Special to London Advertiser. MITCHELL, April 28.—At a special meeting of the town council the various committees for the year 1922 were submitted.

The board of works asked for an appropriation of \$3,000, as crushed stone is to be put on a number of the streets, and there is a lot of graveling to do. It is also proposed to build a piece of macadam road at a cost of between \$3,000 and \$5,000, to be covered by debentures.

So far this year the relief committee has paid out \$186, and it has asked for an additional \$191.14.

The property, park and shade tree committee estimates its expenditure for the present year at \$1,000.

For the year 1922 the public school board asks for an appropriation of \$3,800, and the high school board asks that \$6,000 be placed to its credit.

The electric light and waterworks committee recommends that the finance committee place to their credit the sum of \$9,784.

## ORGANIZES TARA TUXIS 'BOYS' CLUB

Special to London Advertiser. TARA, April 28.—Rev. J. Currie, who has been interested in the Tuxis Boys' Club for some time, has succeeded in organizing a branch in Tara.

The first meeting was held on Tuesday afternoon in the Presbyterian Sunday School, and the following officers elected: Rev. J. Currie, minister; Lewis McAsh, preter; Murray Knox, comptor; Howard Newton, scriptioner.

### True Evidence Of The Marvelous Healing Power Of BUCKLEY'S BRONCHITIS MIXTURE

FROM GRATEFUL USERS

FROM AN INDUSTRIOUS FARMER "I used one bottle of your Bronchitis Mixture last fall and it has almost cured me of a ten year cough. It is worth its weight in gold and I highly recommend it to those with old standing coughs." JAMES BURNS, Vanguard, Sask.	FROM A GREAT ACTOR "I am an actor and singer. Was in Toronto some weeks ago and got a sample of your Bronchitis Mixture and I got such wonderful results from it that I want some more at once. I think every singer should have some of your remedy." WALTER HASTINGS, o. Fenitages Theatre, Spokane, Wash. U.S.A.
FROM A GOOD HOUSE WIFE "Coughed thirteen years, cured by your marvelous medicine." MRS. IRA HOLMES, No. 1, Yorkville Ave., Toronto.	FROM A LIVE BUSINESS LADY "One bottle cured me after doctors failed." MRS. HARDING, 28 Colborne St., Toronto.

It has no equal for COUGHS, COLDS, BRONCHITIS, ASTHMA, AND ALL IRRITATIONS OF THROAT, TUBES AND LUNGS. Relief is guaranteed from the very first dose.

SOLD BY DRUGGISTS EVERYWHERE

REPORTS FIGHT NEAR TIENSIN

Dispatch Announces Continuous Warfare With Artillery Firing During Past 24 Hours.

Manchurian and Central China Forces Represented in Combat.

Peking, April 29.—Fighting south of the Peking-Tientsin railway was still in progress at noon today. The forces of General Chan Tso-lin, military governor of Manchuria, and General Wu Pei-fu, military leader of Central China, were represented engaged along a line extending from Wachang, 20 miles south of Tientsin, to a point south of Peking.

To Seek Protection. The foreign legations here have advised the nationals of their respective countries who are now outside Peking to hasten to the capital as a measure of self protection.

The fighting, which began at dawn this morning at Chang Shihien, 12 miles southeast of this city, was continuing at 3 o'clock this afternoon. There was artillery firing in the vicinity of the Marco Polo bridge, which spans the River Yungtzing near the west gate of Lu-Kou-Chiao. The latter place is a little more than four miles from Chang Shihien.

The Marco Polo bridge is so named because it was mentioned by the celebrated traveler in his account of his journey through China. It is of stone, 900 feet long and 24 feet wide. The firing opened along a front extending from Chang Shihien, twelve miles southeast of Peking, to a point thirty miles due south. Both armies are entrenched along the Peking Hankow Railroad, with Wu Pei-fu's base at Pao Ting-fu. The artillery firing was heard distinctly in Peking, and thousands of people, including many foreigners, mounted the city walls, from which the smoke of the battlefield was visible.

Lament Hostilities. Both Chang Tso-lin and Wu Pei-fu have apparently warned their forces to avoid approaching the city on account of the warning of the legations that they would not tolerate disorder in Peking. The government is prepared to close the city gates at any moment, but this has not yet been deemed necessary.

Foreign observers report that Wu Pei-fu is attempting to turn the light flank of Chang Tso-lin's troops by wedging in between the latter's front and Peking. Feng Yuh Siang, known as the "Christian general," is in command of Wu Pei-fu's operations near Peking.

FEAR REPRISALS FROM BELFAST

Continued From Page 1.

sion of the Dail Eireann was unexpectedly quiet. There was evidently a desire not to pursue yesterday's personal recriminations, and when Arthur Griffith, the president, urged the necessity, owing to the grave state of the country, of the Dail remaining in session from week to week, there was unanimous approval. Later it was decided to adjourn the sessions until next Wednesday, the motion for adjournment being agreed to without division.

The Toll of Death in Russia

TEN MILLION CHILDREN in Russia are doomed to die in the slow agonies of starvation unless the people of Canada awaken in their generosity, and by gifts of food and money, enable the Save the Children Fund to prevent this horror.

The famine in the Volga region is the most appalling in recorded history. Whole populations are exterminated. Children—fatherless and motherless, homeless, with death stalking their steps—wander the highways and byways until they creep into some abandoned hovel to die.

Hundreds of thousands have died from starvation and neglect; but millions can be saved if food is dispatched at once.

Will you give something? Will you save a helpless child from starving to death? What you do give means little to you—yet it means the life of a child!

MAKING ARTIFICIAL ICE IS LONG, EXPENSIVE PROCESS

London Company Predicts Business Will Be Excellent This Year.

When the average person sees a cake of artificial ice, he never realizes the trouble, the expense or the lengthy process that has been necessary before that cake of ice is delivered to the public.

George A. Arthur, a prominent hockey player of this district, and who is also manager of the Artificial Ice Company Limited, stated that business was excellent in 1921, and the indications are at present that it will be even better this year.

The process of making ice is a lengthy one, and a book could be filled on the subject if one wished to pry deep enough into the matter. Most people know that ammonia has something to do with the making of artificial ice, but that is as far as their intelligence goes.

The ground floor of the plant is divided into 34 holes, each about six feet long by four feet wide and 6 feet deep.

At the present time there are 14,000 pounds of natural ice taken from the coves in the storage plant.

More than 150 gallons of water are used a minute in liquefying the ammonia in the condenser, said Mr. Arthur, and one would hardly think it, but there are 144 cakes of ice being frozen at once.

Mr. Arthur stated that few people know or even realize the cost of making artificial ice. Some idea may be gained, however, he said, when a 27-inch leather belt on one of the machines is declared by an appraiser to be worth \$800 after being in service eight years.

Succeed In London

LONDON is a city eminently designed for progress. All indications point to a definite forging ahead in the business life of the city.

Its industrial advantages are superb, for, in addition to its transportation facilities, it combines easy access to an adequate supply of labor and raw material.

Not alone in material advantages, however, is London making progress. These would be of no avail, were it not for the splendid spirit of citizenship, which prevails throughout the city.

Pleasant home surroundings and home life make men certain to put forth their best efforts for themselves and the city.

London is a city destined to become great. It has steadily progressed during the past years from a small group of pioneer homes clustered in a forest to a foremost place in the Dominion.

VULCAN COMPANY BUSINESS INCREASES YEAR BY YEAR

Started in London in 1906—Manufacture Hydrants, Furnaces, etc.

The Vulcan Company, Limited, at 75-77 Fullarton street, manufacturers of lighting standards, fire hydrants, pure air furnaces and builders' supplies.

In speaking of the Vulcan Pure Air Furnace, the manager stated that the furnace first made an appearance in 1906.

"It is very difficult to realize what an uphill fight it was in those years to establish the furnace. To convince a man that our furnace was even as good as another of known quality was indeed hard work.

"Each year breaks up a record not to be attained, let alone broken. That all in the days gone by and almost forgotten, now what a difference. Thousands of good advertisements, satisfied customers, who gladly tell others of the comfort and economy derived from their Pure Air Furnaces.

"We have avoided all technical phraseology so far as it is possible. We do not claim our furnace will heat a home without fuel, any more than an automobile will run without gasoline.

"We do claim that you will get more heat and greater efficiency with less fuel and less ashes to sift and dust and dirt to contend with if you have a pure air furnace," concluded the manager.

BANNER'S BARBER SHOP GIVES BEST SATISFACTION

Convenient For Businessmen. Establishment Has Ever-Increasing Trade.

In the spring a man's thoughts naturally turn to his appearance, and it is his endeavor to make it as pleasing as possible. The slightest detail overlooked is apt to counteract all efforts at improvement.

At Banner's Barber Shop, 417 Talbot street, where five chairs are in operation and a long wait thus avoided, quick service is at the command of all who have yet to receive satisfactory treatment at the hands of their barber.

Banner's Barber Shop is conveniently situated for the businessman to slip out of his office, have his tonsorial needs attended to and return to work in a few moments.

Banner's Barber Shop has won for itself an enviable reputation and has succeeded with London. The cleanliness mirrored in this up-to-date establishment and clean-cut appearance of the five tonsorial artists employed, is in keeping with the excellent work at every man's service.

The prices are moderate, and in comparison to the quality of the work are relegated to the background. Banner's is favorably known throughout the city for its superior methods of honing razors, which are absolutely guaranteed by the proprietor.

More words may not prove convincing, but Banner is satisfied that if the "Man from Missouri" will drop in at 417 Talbot street any time during business hours, the result will prove a pleasure to him, and so long as he may remain in this beautiful city he will be satisfied as to his personal appearance.

HAROLD FINDS ASSISTANT IN CANADA RUG COMPANY

Discovery of Velvetex Rugs Smooths Over Domestic Quarrel.

It was on a lovely spring day, and when Harold returned home after a hard day's work, Mabel did not see why Harold should not take the parlor carpet and the living-room carpet off the floors, carry them into the back garden and beat them.

"But, Harold, the weather is getting warm now, and Mrs. Smith across the street is doing her house-cleaning and Mrs. Lee next door has hers all finished, and if you don't beat those carpets for me tonight it will mean another week before we get the house straight."

"I tell you, Mabel, I will not beat those carpets. I am too tired."

"You are always tired, Harold, when I want you to do any work in the house. I won't ask you any more, if they stay dirty for ever. I am going out to see Mrs. Jones in the next block now."

"When Harold came home the next evening he was jubilant, and walked in the house.

"Oh, Mabel! Come here quickly. I have something to show you."

Mabel was busy getting the supper and called out: "I am too busy. You can show me when you have those carpets beaten."

"No! I tell you, Mabel, those carpets are not worth the time and energy to clean them."

"Well, what are we going to do about carpets? Not have any?"

"Now, Mabel, listen to me. I heard today of a firm at 98 Carling street, called the Canada Rug Company, who takes any kind of faded and worn-out carpets and makes just as lovely Velvetex rugs, equal to any Wilson rugs, as they are so soft, and here is one of their folders explaining everything."

"Oh, Harold, isn't that just lovely. Do let us send our carpets down there, as I am sure those rugs would look just grand on our hardwood floors."

"And the best of it is, Mabel, they will take any old pieces and all kinds. We could put those pieces in we have in the attic, and then there are those pieces the boys have used in their tents."

"I certainly will call and ask them to send their driver up here to get all our old carpets, as it is such a capital way of getting rid of them. Besides, after they are made, they last for years. They told me that Mrs. Jones in the next block has some Velvetex rugs."

"They must have been the ones she was showing me yesterday, Harold. They certainly were grand. She was using them in her hall."

Mabel—Don't waste time and energy cleaning your faded, worn-out carpets. Just phone 2455, The Canada Rug Company, London, to call for them and have them converted into new Velvetex rugs.

FINANCIAL, MARKET AND COMMERCIAL SECTION

LIST AT NEW YORK SHOWS RECOVERY

Better-Known Shares Make Gains of One to Three Points.

NEW YORK, April 28.—Stock market prices today registered many material recoveries from the recessions of the mid-week regardless of a five per cent rate for call loans, the highest quotation for this accommodation in several weeks.

Gains of one to three points were made by the better known shares and several of the oil, food and miscellaneous issues.

Deals were comparatively light in the first three hours, but broadened later on steady absorption of the cheaply offered independent steel, sugar, textiles and miscellaneous shares.

Traders seemed disposed to adopt a more conservative attitude on further consideration of the coal strike situation and the tangle in international affairs as indicated by the course of events at Geneva.

These considerations were swept aside, however, as the list gathered greater momentum and additional railway returns showed increased earnings.

In the steel group where final prices were gained of one to three points an important factor was retention of dividend by American Steel. Sugar dividend was bought on additional price advances, and the favorable quarterly statement of the American Cane Sugar Company stimulated buying of that issue.

Investment falls were little better than firm. Sales of stocks amounted to \$35,669,000.

Money brokers regarded the higher rate for call loans as merely temporary and early due to interest and dividend payments. Time funds were unchanged, but were less freely offered for the longer dates.

The British rate was the only exception to the weaker tone of foreign exchanges holding within a fraction of yesterday's best quotation.

Italian and Belgian remittances eased four to six points, and all the northern and eastern European quotations were lower, the Dutch rate alone showing firmness.

Canadian Grain Markets

WINNIPEG, April 28.—There was only a moderate trade in the wheat market today, and while some reports of export buying created a firmer feeling during the latter part of the session, the market on the whole was of a choppy character, with a nervous, unsettled feeling in the air.

During the early part of the session there was quiet an active trade passing, and the market acted very stubbornly against considerable selling pressure.

The seaboard reported considerable export business tonight, a Greek export order being placed at 1,500,000 bushels of No. 2 Manitoba.

Both May and July futures opened lower, recovered to a high of \$1.40 1/2 for May and \$1.32 1/2 for July, but later lost the advance and closed lower.

There was a fair trade in coarse grains, and considerable shifting of hedges from May to July in the market for oats. Flax was in good demand, but barley and rye were inactive.

There was a fair demand for No. 1 and No. 2 northern wheat and a fair demand for oats, while other coarse grains were not wanted.

Cash grain—Wheat—No. 1 hard, \$1.45 1/2; No. 1 northern, \$1.45 1/2; No. 2, \$1.40 1/2; No. 3, \$1.35 1/2; No. 4, \$1.30 1/2; track, \$1.45 1/2.

Oats—No. 2 C. W., 52 1/2c; No. 3 C. W., 48 1/2c; extra No. 1 feed, 48 1/2c; No. 2 feed, 45 1/2c; No. 3 feed, 42 1/2c; No. 4 feed, 39 1/2c; rejected, 6 1/2c; feed, 60 1/2c; track, 65c.

Flax—No. 1 N. W. C., \$2.46; No. 2 C. W., \$2.42; No. 3 C. W. and rejected, \$2.25 1/2; track, \$2.54; No. 1, \$1.08.

Rye—No. 2 W. W., \$1.08. WINNIPEG GRAIN FUTURES. [Reported by Jones, Easton, McCallum Co., Limited.]

FAVORITES MOVE TO HIGHER LEVELS

Mining Stocks Display More Buoyant Tone on Toronto Stock Market.

TORONTO, April 28.—After a week of almost steady reaction, the stock market today displayed a reversal of form, and the majority of the most active securities closed at higher levels.

The mining stocks likewise displayed a more buoyant tone, and the majority of the favorites moved to higher levels.

The utilities were all steady to firm. Bell Telephone gained 1/2 point to 108 1/2; C. P. R. advanced a point to 143.

Canada Steamships preferred rose 1 1/2 points to 69 1/2; Toronto Railway rose a point to 64 1/2; Twin City was 1/2 point up, and Winnipeg Railway up 3/4 to 41 1/2.

The paper group also tended to higher levels. Abitibi rose 1 1/2 points to 21 1/2; Stantec River common, however, lost 4 points to 77 1/2.

Brompton 1 1/2 points at 116, and in heavy trading Canada Bread rose 2 1/2 to 32 1/2.

Bonds were active and prices generally firm. Among the mines McIntyre was a firm stock, moving 50 points higher to 218.30.

Peck Hughes advanced 4 points to 61. Porcupine Crown rose 1 1/2 points to 28, and International Paper to 29 1/2. Total trading: Listed stocks, 6,512 shares; bonds and war loans, \$271,750.

TORONTO SALES. Sales Stocks, Open, High, Low, Close. 159 Abitibi, 50 1/2, 51 1/2, 49 1/2, 50 1/2.

EGGS SELL WELL ON LOCAL MARKET

Small Offering of Maple Syrup Realizes \$2.50 to \$3 a Gallon.

The attendance at Saturday's market was much smaller than at the previous one.

Butter was not so plentiful, and was offered at 28c for 1 lb wholesale and 42c for retail.

Eggs were in good demand at 25c for 1 dozen wholesale and 25c for retail.

Vegetables were also in good demand. Rhubarb sold at \$1.50 per dozen, and lettuce at 80c per dozen.

There were only a few gallons of maple syrup offered, and the price remained firm, at \$2.50 per gallon.

The season for maple syrup is now practically over. Honey was offered at 75c wholesale and 85c retail for 1 lb.

Oats are scarce. Wheat is firm at \$1.40 per bushel.

Barley, per cwt., \$1.40 to \$1.56. Buckwheat, per cwt., \$1.40 to \$1.60. Oats, per bushel, 44c to 52c.

Wheat, per bushel, 1 1/2 to 1 3/4. Hay, per ton, \$25.00 to \$25.00. Straw, per ton, \$10.00 to \$11.00.

'Equal Racing Rights' Goal of Countess

COUNTRESS OF WILTON.

LONDON, April 28.—Now that the Countess of Wilton, who has her own extensive stable of racers, Her jockeys are clothed in an attractive mauve with silver braid and silver cap, but she bitterly opposes gambling with racing.

Other prominent women racing enthusiasts are Lady James Douglas, Lady Nelson, Lady Nunburnholme, Lady Curfew-Owen, Mrs. Hugh Peel and Mrs. Arthur James.

Wall Street Review. New York, April 28.—The prolonged advance of quoted values in the stock and bond market was checked this week. Prices reacted to technical conditions which bespoke of over-exaggerated reversals.

Primary factors in the setback were the coal strike and the foreign exchange situation, although international currencies showed only occasional unsettlement.

Domestic money rates confidence in the future of the steel and iron trade was demonstrated by the maintenance of Canadian Pacific Railway.

Canadian Stocks. Toronto, April 28.—The following quotations on Canadian stocks in London were received by cable today by A. J. Pattison & Co.

Standard Bank of Canada. London Branch - H. F. Clarke, Manager. GOLD AND SILVER. NEW YORK, April 28.—Bar silver, foreign, 67 1/2c.

HOME BANK OF CANADA. FIFTEEN BRANCHES IN MIDDLESEX AND ELGIN COUNTIES. With the opening of the Market Branch, the Home Bank now has fifteen Branches in Middlesex and Elgin Counties. Branches and Connections Throughout Canada.

When You Clip Your Coupons. WHAT do you intend to do with the interest due very shortly on your Victory Bonds? Let this serve as a reminder—be sure and clip your coupons on the date they become payable, and present them at this Bank, where they can be promptly cashed. You cannot do better than re-employ the profit on your investment, without delay. By depositing the interest in a savings account at our nearest branch, your money will be where it will earn good interest, compounded twice a year, and it will always be available when needed.

Remember To Clip Your 'Victory' Coupons. Bring them in and we will cash them free of charge. Or you can open an account with them. THE STANDARD BANK OF CANADA. London Branch - H. F. Clarke, Manager.

Two Simple Things To do. Two things you must do in order to accumulate savings: 1. Start a savings account. 2. Keep adding to it. A savings account in The Bank of Nova Scotia may be opened with a small deposit. Regular deposits even if not large in amount will soon build up a balance that will stand between you and the needs of the uncertain future. Why not start today? The Bank of Nova Scotia. ESTABLISHED 1827. G. H. MONTGOMERY, Manager, London.

The Ontario Loan and Debenture Co. is our method of making banking easier for relatives or partners, and is particularly convenient for housekeeping accounts. Money may be withdrawn by either party, and it can be arranged that in the event of the death of either the account reverts to the survivor. It is, therefore, immediately available for the heavy expenses incurred at such a time. The delay and embarrassment usually experienced in the case of illness or death of the holder of a one-name account is eliminated. A. M. SMART, President. T. H. MAIN, Manager.

MOTOR OVERHAULED—REPAIRED. ELECTRIC MOTOR REPAIR CO. 349 Talbot Phone 7174. GENERAL CHANGE OF TIME—CANADIAN PACIFIC TRAIN SERVICE EFFECTIVE APRIL 30. Train No. 22, now leaving Detroit at 3:49 p.m., and arriving London at 6:50 p.m., and leaving at 7 p.m., for Toronto, Ottawa and Montreal.

Prince George Hotel. TORONTO. In Centre of Shopping and Business District. 250 ROOMS. 100 Bathrooms. EUROPEAN PLAN. E. WINNETT THOMPSON, MAN. G. DIR.

Victory Bonds. Bought Sold Quoted. We have a special department to take care of Victory Loan trading, and shall be glad to have you correspond, telegraph or telephone for latest quotations received instantly over our Toronto wires. Bonds will be delivered direct or to any bank. JONES, EASTON & McCALLUM CO. LIMITED. Royal Bank Building. 213 and 294, London, Ont.

Butter and Eggs. NEW YORK, April 28.—The raw sugar market is quieter today, and no business was reported after. Prices were unchanged, at 2 1/2c for Cuban, cost centrifugal, equal to 4 1/2c for Philippine Islands at 2 1/2c, with considerable quantities available at quoted prices. The raw sugar futures market was easier under liquidation, and prices at midday showed declines of 4 to 7 points.

NEW YORK CURE. [Reported by Jones, Easton, McCallum Co., Limited.] Bid. Ask. Bid. Ask. Oil—20 20 1/2 20 1/2. Anglo 30 40 30 40. Coshien 5 8. Dominion 1 1/2 1 1/2. Engin's 55 7 1/2. Glen R. 15 15. Int Pete 20 20. Merritt 1 1/2 1 1/2. Midw't 15 15.

NEW YORK STOCKS. New York, April 28.—Wall Street, 10:30 a.m.—Opening prices in today's stock market were firm and further retirement of the short interest and an extension of yesterday's general rally. Oil, rails, steels and coppers were the strongest features. Standard Oils of New Jersey and California, Mexican Petroleum and Texas, Canadian Steel and American Welding and Lake Erie, common and preferred, gained 1 and 1 1/2 points respectively. Bethlehem Steel and American Smelting averaged 1-point gains. National Biscuit was strongest of the specialties, adding 3 points to yesterday's high rise. American Sugar, Corn Products and Industrial Alcohol responded moderately to further buying.

# NATIONAL ATHLETIC MEET

## GREAT SUCCESS

### THURSDAY'S MEET A GREAT SUCCESS

Excitement waxed strong and enthusiasm reached its highest ebb among the younger of London's future fathers when the Trail Rangers of the city congregated in the Armories on Thursday evening to match their brawn and skill with that of meagre youths corresponding in age. Nerves highly strung throughout the ensuing week almost culminated at a breaking point, hearts thumped wildly, eyes shone brightly, and with hands clenched the boys went into the fray.

The aspirants for the mayoralty seat and also for other propitious-looking council chairs were assembled at the main entrance endeavoring to capture the vote of some ballot-caster yet undecided in his various choices. Cards displaying the resemblances of the contestants were distributed right and left. Pandemonium reigned supreme. Their supporters vied with each other in presenting first solicitation cards, and doubtless this rigorous campaigning had the desired effect. One exultant father clinging to his small son, who clasped in his hand a pair of scanty gym trunks, was heard to exclaim when a solicitation card was presented: "Here, here, leave my Jimmy alone; he don't want to buy any cuff links or anything. Come along James. Two obviously critical old maids were shocked terribly when they beheld two boys (fully?) attired for battle standing in the doorway. "Land sakes, Lizzie, ain't it disgustin' the way people do carry on these days. I'd warn that boy if I were his mother." "Awful, ain't it," the other rejoined. "And thus they passed on with averted eyes.

On negotiating an entrance, one was brutally accosted by a large chap with fedora, who demanded ticket and directed you hence. At the next door, despite your sex, size, age or looks, you are asked if you are a Trail Ranger and if you care to vote. When you politely decline the honor conferred upon you, you are permitted ingress. The thing which impresses you most on entering is the vastness of the hall compared with the countless small boys running about. Sweaters of every hue meet your weary eyes, and gym trunks of varied sizes are in view. When you have advanced a few paces, your nostrils are suddenly pervaded by a sickening odor and a nausea gradually creeps over you, which follows in your footsteps with evident vindictiveness. A casual inquiry brings the relieving answer that it is but the sweet aroma which results when numberless liniments, salves, ointments and grease have been applied to invigorate tired muscles. Most noticeable is this pernicious odor at the west end, and it was undoubtedly the reason why the refreshment booth was not more extensively patronized.

Havoc now prevailed as the fateful hour approached. Judges hurried about making eleventh-hour preparations; a few delinquent youths still remained to be weighed, when alas, one hefty youth of wide and fair proportions and said to have been reared at Askin Street Church, fractured the scales. One indicator completed the circuit twice, while the other one only succeeded in making one and one-half revolutions. Finally repairs were executed and the weighing completed.

There is a shrill blast, a few brief words of direction and all prepare for the grand promenade. Led by the Y. M. C. A. band, under the able directorship of Mr. Horwood, the march commenced. The groups assembled together looked very nice and completed the circuit twice for our benefit. They then dispersed into their various divisions. A crack of the pistol and the meet is on. First came the high jump, conducted on the elimination basis. Of course, some youngsters hadn't the least conception of the proper tactics and thus they only succeeded in rendering a fantastical nose-dive or a tail-spin. The majority of the boys, however, jumped well, and some of the less proficient ones at least had the distinction of breaking a scantling. It was impossible to keep an accurate account of the number of poles rent in twain, but it was rumored later that at least four local lumber merchants had sent in their tender for Friday night's supply. Clive Vollick of the Askin Street Hawks was finally acclaimed winner, jumping five feet exactly. He had close competitors in the Knox Wingfoot group, namely Bob Gordon and Ross Jeffries and also numerous other runners-up.

For a little diversion, a basketball game on roller skates between the Meteors and Swastikas was staged. The object of the game apparently was not to secure points but to remain on their feet. Some of the players seemed to have an aversion

### INDIVIDUAL SCORES IN NATIONAL ATHLETIC MEET ARE HIGH

Both Tuxis and Trail Rangers Tallies Show Improvement Over Last Year.

The individual high scores of the contestants in the national athletic meet are as follows:

#### Trail Rangers.

Running high jump—1, T. Reynolds, Hale, 103; 2, C. Vollick, Askin Hawks, 103; 3, E. Hatfield, Askin Hawks, 97.

Standing broad jump—1, J. Jordan, Knox Wingfoots, 112; 2, J. Haylock, Knox Cubs, 98, and T. Reynolds, Hale, 98; 3, C. Speiran, Hawks, 94.

One-potato race—1, H. Pollock, Knox Wingfoots, 109; A. Gurney, Y. M. C. A. Pointers, 96; V. Wong, St. Andrew's Viking, 95.

Three-potato race—1, B. Martin, St. Andrew's Vikings, 105; 2, H. McVicar, New St. James Hornets, 104; 3, T. Milne, Knox Cubs, 101.

Floor push—1, H. Pollock, Knox Wingfoots, 124, and T. Taylor, Wellington Methodist, 124; 2, H. Gray, Askin Senecas, 118; 3, N. Hays, Y. M. C. A. Hurons, 109, and E. Speiran, Askin Hawks, 109.

#### Tuxis.

Running high jump—1, Geo. Wright, Talbot Weiners, 121; 2, Ralph Heddon, Askin Meteors, 106; 3, Dave McLean, St. Andrew's Mic-Macs, 103.

Standing broad jump—1, Geo. Wright, Talbot Weiners, 105; 2, Ralph Heddon, Askin Meteors, 103; 3, Carlton Mathews, Ridout Zetos, 100.

Three-potato race—1, Harley Wilson, Colborne Comex, 96; 2, Bert Wistow, Centennial M. L., 95; 3, Bert Ellyatt, Ridout Zetos, 85.

Five-potato race—1, Ted McCullough, Knox Ahmeeks, 103; 2, Bert Wistow, Centennial M. L., 97; Gordon Cummings, Pirates, 95.

Shot-put—1, D. Westman, St. Andrew's Mic-Macs, 118; 2, Don Foote, 111; 3, L. Spence, Talbot Weiners, 110.

### SCOUTS ORGANIZE AT ST. PETER'S

First Meeting Held Last Monday.

A Scout troop is being organized at St. Peter's Parish. The first meeting was held on Monday, April 24, at which the Scout movement was thoroughly explained to them. A good troop is expected at St. Peter's Parish. The second meeting was held on Friday, April 28.

### TISER— .6 .6 .6 .6 .6 .6 .6 .6 SIGNALERS PASS TESTS

Boys Have Successfully Completed Course.

Several boys of the De La Salle High School took a signaling course at the armories. The following boys took the course: John Uijen, Joseph Raffaele, P. and Fred Miles. On Monday, April 24, they received their certificates, and a check for \$5 for their successful examination.

### TECHNICAL BASEBALL LEAGUE.

There has been an inter-class baseball program arranged in the Technical School. The various classes have appointed captains to have charge of the different teams. A schedule has been drawn up, and the league will be started as soon as possible. The school champions will be decided as a result of these games.

The London Life are employing good jumpers. Witness Bickell and Henderson both cleared at 4.6.

to standing up, because they were incessantly sitting down (for a rest)? They certainly proved that as roller skaters they must be a bunch of aviators. It was a freak of nature that there were no serious casualties. The potato races and broad jumps, along with the floor push, were then rapidly run off, and some of the youngsters surely gave the floor a hard push. It was about this time that the mentors began to have a serious task in keeping their younger boys awake, as they showed an evident tendency toward sleepiness. The spectators were obviously intensely interested in all events, and interest did not lag throughout the whole evening. A number of the contestants were observed quite frequently wending their way toward the gallery where the spectators were stationed. We have a decided impression that it was not their parents they went to visit, so we may only surmise. It recalls to our memory the olden days when the fair ladies journeyed from court to see their noble cavaliers in the ring.

The Wingfoots of Knox Church, who were awarded the laurels as champions of the meet, were the most uniform group of boys on the floor. This possibly accounts for their success, which is a repetition of last year's meet. However, they had unabating opposition from the first, and the outcome was at no time certain.

### NIKATORS INITIATE JUNIOR GROUP'S OFFICERS

Claude Gunther, Mayoralty Candidate, Speaks To Group.

Initiation of Officers of Junior Group.

After a sumptuous repast at 6:30 Thursday evening, the officers of the Junior Nikators were initiated into full membership in the group. The first to be "put through" the impressive ceremony was Allan Grant, the pretor, and after him followed Jack White, deputy pretor; Arnold Ward, scribe, and Wilbur Keenleyside, comptor. After the initiation, all the members present gave audience to Claude Gunther, the mayoralty candidate. After Mr. Gunther's brief address, group games were indulged in, following which the meeting was adjourned.

### PIRATES VS. WINGFOOTS

By defeating the Wingfoots on the Y. M. C. A. floor Saturday afternoon the Pirates added to their list of victories. This list now stands as nine wins and no defeats. They will meet the Maple Leafs in the finals.

The Wingfoots, one of the younger and smaller teams in the league, were victims, but they played very fast for their size. The Pirates were dead shots, and soon had a large score rolled up. The Wingfoots have developed greatly for their first year in basketball. Their minor team was unbeatable, and won the Trail Rangers' C. S. E. T.

The score was lost track of in the excitement, or else the Pirates could not count in the larger numbers.

To the Mother's and Father's of London:

It has been said, "good government must begin at the mother's knee." He might well have said upon the father's knee also, with thought of a father's proper part in counsel and discipline.

In the upbringing of children one of the most indispensable things is discipline—a discipline which teaches willing obedience. A wise man once said, "teach a child to obey the rules of the home and he will not be likely to need a judge and a jury to construe those of the land." Wise rules, rules which have their birth in an understanding heart, are needed by most children of us imperfect mortals. It is not the kind parent who fails to establish and maintain them, but in the establishment and maintaining of them a far-sighted, loving purpose must rule.

Too many parents are too busy with various things to give their boys and girls the consideration and attention that their growing needs require. We need not expect the arrival of the time when life's problems will be solved and the plane of civilization will be raised to the fine, high level upon which it ought to be until the parents do their full duty to their children.

For one thing, there must be some very sensible, frank speaking, by mothers to their daughters, and by fathers to their sons, upon the question of the sex life. Boys and girls must be saved from the evil results of gaining knowledge upon this subject from the impure lips of associates. There is one way to guard against this and that is for parents to inform themselves as to how to proceed and to impart the information in a proper fashion. This should begin even before the boys and girls enter school.

There is no room left to doubt that the great majority of boys and girls who wrong sexually do so because of the failure of their mothers and fathers to do their duty.

Mothers and fathers must very definitely interest themselves in the right development of all four sides of their children's life—the physical, the mental, the social, and the spiritual. A little sober thought will reveal the fact that lacking the development of anyone of these a child will be less than properly developed and unfit to take his rightful place in the world. All too many of us alive today are lopsided because for some reason the full, rounded development did not take place.

Some one has said: "The child is in greater need of models than of critics."

Criticism, which comes from a loving heart, and a desire to help, is needed by all children, but what they need still more is living examples of what is best in life and character. A home is not a real home unless it is pervaded with a true home atmosphere in which love, tenderness, helpfulness, forbearance, and all of the other qualities which make for true happiness are manifested. Parents! Are these qualities manifested in your lives as lived before your children? If they are not, it is time for you to make some new resolutions. —The Boys' Week Committee.

### PIRATES WILL PLAY MAPLE LEAF'S NEXT WEEK FOR CHAMPIONSHIP

Centennial Boys Will Give Pirates a Good Run.

The C. S. E. T. finals have attracted considerable excitement. The Maple Leaf Club and the New St. James Pirates will meet at the "Y" on Tuesday at 6:30 o'clock, and on Thursday at 7 o'clock to decide the champions.

In group A the Pirates have emerged victorious, after severely mauling the other teams. The Comex gave them the hardest battle and even then the Pirates were victors by 40 points.

In group B, the Maple Leafs have been declared the winner, after a hard struggle. The Zetos and Knox Ahmeeks giving them a hard struggle.

The line-up the two teams will display in the final game is as follows:

Maple Leafs—	Pirates.
Rourke . . . . .	Forward. Williamson
Wistow . . . . .	Forward. . . . . Gray
Brown . . . . .	Forward. . . . . Barbour
Wanless . . . . .	Center . . . . . Adams
Hunter . . . . .	Center. . . . . Burton
Tambling . . . . .	Defence. . . . . Upthegrove
Pierce. . . . .	Defence. . . . . Cummings
	Defence. . . . . Anderson

#### Maple Leafs.

Rourke—Fair player, wiry and tough, but plays dirty, and would lose a game on fouls.

Wistow—Short and heavy-built, fair player, lacks experience and speed.

Brown—Short and not very big, fair player, but lacks speed.

Wanless—The big chance for Centennial. Good play, experienced, and carries weight, but has been bested and outjumped by the Pirates' center before.

Hunter—A good player, but is too light for the heavy Pirates team.

Tambling—Short and fairly heavy-built, inclined to play dirty, not fast enough for the Pirate boys.

Pierce—Well-built and good player, but not good enough to keep the Pirates from scoring.

#### Pirates.

Williamson—Fast player, inclined to be light, has proved best shot of the Pirates; plays dirty at times.

Barbour—Fast player, fairly heavy, good shot; plays dirty when sore.

Gray—Fairly good player, on the light side; inclined to be nervous in a game.

Adams—Good player; bested Wanless before; good on following ball into basket; does not play dirty.

Burton—As good as any of the Maple Leafs; good shot; can play dirty when riled and knows how to.

Upthegrove—Fast defence man; plenty of weight; hard check.

Cummings—Not very heavy, but quick; plays dirty game.

Anderson—A new man in basketball; plenty of weight; hard check.

### BASEBALL CHALLENGE.

The Tecumseh baseball team challenge any other junior team in the city, under 16 years of age.

T. BURKE.  
870 William street. Phone 6751W.

The parade started out on Friday night with great gusto. The band, composed of Art Horwood and "Dead" Kay, was exceptionally "punk" (N. B. the "artists" claims the instruments were on the blink). The order of parade was Ahmeeks, Weiners, Invincibles, Hawks, St. Andrew's Comex, Pirates, Meteors and the "band."

A rather usual incident was the regular late arrival of "Bud" Casselman.

Dick Day may be a crack shot with a rifle, but the fact remains, he can't jump.

"Tiny" Fred Rose cleared the bar (no, Marjory, not the one you mean), at four feet.

The committee in charge of the National Athletic Meet, which was held in the armories Thursday and Friday nights of last week, desire to thank the following merchants for loaning supplies:

John A. Nash, "My Jeweler"; Smallman & Ingram; George Wenige, The Bicycle & Motor Sales; Woolworth's, Limited; Cowan's Hardware, Limited; Simeco Roller Skating Rink; R. E. Ruse, Wray's Jewelry, London Collegiate Institute, Western University.

Without the unselfish aid of the above firms, the meet would not have been as successful as it was.

# The Boys Own London Tizer

A Paper By Boys For Boys.

SATURDAY, APRIL 29.

Vol. 1. No. 11.

## BOYS' WEEK IS OUR WEEK

### HUTCHINSON CHOSEN AS NEW MAYOR ELECTED OVER GUNTHER BY 41 VOTES

#### THURSDAY PROGRAM.

##### The Boy in Athletics.

Gymnasiums available: Collegiate, Armories, and two at the Y. M. C. A. Hour of events: 6:30.

Seventy-five per cent of all boys in the 7th and 8th Grades and any below those grades, 12 years of age and over, are eligible to compete.

We hope that each school will try to have every possible boy into the competition.

Prizes—1st, 2nd and 3rd school prizes arranged by taking the highest ten aggregate points of all boys competing for that school. Individual 1st, 2nd and 3rd prizes for each of the five events for every school.

Inclosed is a list of the events, rules and way the boys will be scored.

##### Rules for Event.

All events must be completed by the competitor in the one day.

##### Potato Race.

Potato boxes shall be made as follows: Boxes 4 inches deep placed upon stands 2 feet high, whose base shall not measure more than 12 inches square, shall be placed upon the floor 31 feet apart at their outside edges. The boxes shall not be loaded or fastened in any way to the floor. The base of the box is placed in the center of a 16-inch square (outside measurements) marked on the floor. The competitor shall start with one potato in his hand on a line with the outside edge of the box in which are placed the other potatoes. He shall circle outside the boxes transferring one potato at a time and finish across the starting line. If a competitor knocks over a box or moves a box so that any part of the base projects beyond the square marked on the floor he shall be disqualified, but he may be given one other trial by the judges. No rubber or mats of any similar material shall be placed on the floor but the use of resin will be allowed.

Timers—No city, provincial or national record will be allowed to stand as such unless three stop watches are used in timing.

Where it is not possible for stop watches to be obtained, the committee would suggest the use of at least three ordinary watches, in which case the head timer shall be the starter of the race and another official shall by exclamation or a revolver shot call the finish. This will permit the timers to keep their eye on the second hand of their watches and not on the competitor to see when he crosses the line.

The rules published in the handbook under date of February, 1922, shall supersede the rules in the manual.

In order for the competitors to do their best, boxes should be used instead of attempting to pick the potatoes up from the floor. If boxes cannot be had, chairs without backs might be used to put the potatoes on.

##### The Running High Jump.

The judge shall decide the height at which the jump shall commence, and shall regulate the succeeding elevations. Each competitor shall be allowed three trials at each height, and if on the third trial he shall fail, he shall be declared out of the competition. At each successive height the competitor shall take one trial in his proper turn; then those failing, if any, shall have their second trial in like order, after which those having failed twice shall make their third trial jump. The jump shall be made over a bar resting on pins projecting not more than three inches from the uprights, and when this bar is knocked from its place it shall be counted as a trial jump. Running under the bar in making an attempt to jump shall be counted as a "balk," and three successive "balks" shall be counted as a trial jump. The distance of the run before the jump shall be unlimited. A competitor may decline to jump at any height in his turn, and by so doing forfeits his right to again jump at the height declined. In this indoor contest the jumps shall be taken from the floor, alighting upon the mats. Measurements shall be from the top of the center of the crossbar to the floor and not by the printed figures on the standard.

The crossbar must be a straight stick or bamboo pole, so that no advantage will be gained by jumping over either one end or the other. Under no circumstances is a rope to be used for the competition.

##### Standing Broad Jump.

The feet of the competitor may be placed in any position, but shall leave

#### Is Boys' Mavor

JACK HUTCHINSON.

JACK HUTCHINSON was elected to head Boys' Council by a close vote. He ran on an anti-tobacco platform.

the ground only once in making an attempt to jump. When the feet are lifted from the ground twice or two springs are made in making an attempt it shall count as a trial jump without result. The jump shall be made from a two-inch plank, resting on the floor, placed against the wall, and alighting upon an ordinary two-inch gymnasium mat, made stationary. An interval of at least one foot shall be left between the edge of the board and the mat. Toes of the competitor may extend beyond the edge of the board, but must not touch the floor in making the jump. A strip of carpet or rubber matting may be fastened on the floor under the "take off" board and extend over the mat to facilitate more accurate measurements.

##### The Shot Put.

The shot for this contest shall weigh eight pounds. Buck shot, encased in leather, or a solid sphere, covered with any material may be used. The combined weight shall not be less than eight pounds. The shot shall be "put" with one hand, and in making the attempt it shall be above and not behind the shoulder. The competitor shall stand in a circle, seven feet in diameter, drawn on the floor, no part of the competitor may touch the floor over the line of the circle when making the put. The competitor must leave the circle by the rear half. A put shall be foul if any part of the person of the competitor touches the ground outside the front half of the circle before the put is measured. The measurement of each put shall be from the nearest mark made by the fall of the shot to the circumference of the circle on a line from the mark made by the shot to the center of the circle.

Be careful to differentiate between the throw and the put. A put is clearly defined by the shot being pushed from the shoulder. If it is thrown it invariably will drop behind the shoulder at the start and should not be allowed.

##### The Floor Push.

The competitor shall lie flat on the floor with face down, his feet against the wall, with the palms of his hands on the floor. Only the toes, chest and hands shall touch the floor between each push-up. The elbows must lock each time. That is, the arms should be fully extended. The hips must not be raised, but the body kept as level as possible.

After a competitor has begun his first push-up, no part of the body but the chest, hands and toes may touch the floor. There may only be a momentary pause between each push-up. If body touches the floor he is disqualified, but he may have one more trial.

The judging of this event has been so difficult that it has been almost impossible to find a uniform method of judging and scoring, so that this event may have to be discarded unless during the competitions of 1922 judges are able to secure uniform adherence by competitors to the regulations governing the floor-push.

#### Loses Mayoralty

CLAUDE GUNTHER.

CLAUDE GUNTHER of Knox Ahmeeks defeated candidate in election contest for head of Boys' Council.

#### BOYS' NAVAL BRIGADE PARADE IN HONOR OF CANADA'S DEAD

Battle of Ypres Anniversary Church Service Attended by Boys.

Last Sunday the Boys' Naval Brigade paraded to St. Paul's Cathedral for divine service. The B. N. B. were the only boys' organization in the procession, and consequently feel highly honored. The brigade left their clubroom at 2:45 p.m. and marched to the market square. During the interval between their arrival and the start of the parade several photos were taken by the press and others.

At 3:15 the main parade started. They were reviewed by Major-General Panet, C.B., C.M.G., D.S., L.D.H., etc., at the Public Library. The Very Rev. Dean Tucker addressed the men at the church, his message being much appreciated by the boys.

#### ATTEND SUNDAY MORNING SERVICE

Wingfoots of Knox Church Take Charge of Ki-Y Bible Class—Willard Gray Talks To Boys About the "Athletic Life."

A very interesting service was held at the Y. M. C. A. last Sunday morning, when the Wingfoot Trail Ranger group of Knox Church took charge of the Sunday morning Bible Class of the Ki-Y Club. After the opening song service, conducted by the Ki-Y Club leader, Mr. S. F. Howard, the service was taken in charge by Arnold Ramer, who was assisted by Jack Ferguson, who led the devotions, and Ross Jeffrey and Bob Gordon, who conducted the responsive readings. The address of the morning was given by Willard Gray, who took as his subject "The Athletic Life," which he illustrated by reference to Bible characters. The keen attention with which the youthful speaker was listened to by the boys was a great compliment to his ability as a speaker. This was the second visit of the Wingfoot group to the Ki-Y Sunday class, and the visitors were given a most hearty welcome.

#### STILL ANOTHER CHALLENGE

Look To Your Laurels! Oh, Ye Public School Sharp Shooters.

We, the members of the Winchester Junior Rifle Corps of this city, do hereby challenge any School Cadet Rifle Corps of the city of London to a friendly match, to be shot on any Saturday afternoon, health and weather permitting. Teams to comprise of five men and one spare man. W. J. R. C. rules to govern the matches. For information, phone Chief Recorder Francis Floyd, 2752J.

#### RETURNS FROM ELECTIONS RECEIVED.

An exceptionally large vote was polled by the boys of the city, who were contesting the various seats in the junior city council. The Trail Rangers voted on Thursday night and the Tuxis boys at their meeting on Friday night. The aspirants for the different offices conducted an extensive campaign, both previous to the meets and also on the eventful nights. Keen enthusiasm was evinced by all the voters and friendly rivalry was quite evident. Especially noticeable were the strenuous campaigns conducted by the two mayoralty seat contestants. The final results as they were returned Friday night were:

Mayor—Hutchinson, 199; Gunther, 158. This gave the former a majority of 41.

Todd triumphed over Skinner with a majority of 60 in the contest for city clerk.

The controllers, as the vote finally stood, are H. Wilson, D. Burton, A. Grant and R. Foote. The others were close runners-up and the vote seemed to be evenly distributed.

The successful candidates delivered short addresses, expressing their complete approval as to the way the election was conducted.

#### FRIENDLY RIVALRY IS A GREAT INCENTIVE TO ACTION

Boy Scouts and Boys' Naval Brigade On Very Friendly Terms.

The boys of the B. N. B. held a drill Tuesday evening in signaling and boxing. The B. N. B. have some pretty smart signalers, who go through their work well. Tuesday night drill has been changed to Monday night, so as there will not be three drill nights hard running, and boys who do not attend Monday night drill are not permitted to shoot on Wednesday evening, as several boys prefer shooting to drilling. Scout Leader George Metcalfe sent a polite letter congratulating them on their victory over the junior Winchester rifle corps, and also tells them to keep their target practice, as he is also getting some good shooters. There has always been a close friendship between the Boy Scouts and the Boys' Naval Brigade, and a shooting contest will be welcome.

#### CANADIAN CLUB'S DAY FOR YOUNG JOHNNY CANUCK

Monday's Program Will Form an Incentive For Rest of Week.

##### MONDAY PROGRAM. Patriotic Parade.

3:45 p.m.—Hour to gather at Market Square. Principals directed to have boys assembled early enough to reach Market Square at this hour, a male teacher accompanying the boys.

4:15—Move off. Talbot to Queen's; down Queen's to Colborne; down Colborne to Dundas; up Dundas to Clarence; up Clarence to Queen's Park.

5:15—Have grandstand at park. March past, at city hall, Form up en masse around grandstand. Sing "O Canada," "Maple Leaf" (Will have sheets printed ready for distribution). Address, "Boys' Asset to London. Necessity of preparation. Value of Boys' Week."

6:00—God Save the King.

##### Points to Keep in Mind:

1. Profusion of school colors and decorations.
2. Mounted placards, carrying mottoes and slogans.

#### BOYS' NAVAL BRIGADE DO NOT MAKE APPEARANCE

Winchester Boys Claim a Victory For Bill Galloway.

Owing to the non-appearance of Rifle Cadet Barnes of the Boys' Naval Brigade, in answer to the challenge issued by William Galloway of the Winchester Junior Rifle Corps on Saturday, April 22, the match was awarded to William Galloway by default. The ranges were occupied by about 40 members on Saturday, and three firing squads were in operation.

##### MAPLE LEAFS ISSUE CHALLENGE.

Centennial Maple Leafs challenge any Tuxis group in the city to an outdoor meet at Queen's Park on May 21. Send all answers to Allan Brown, 551 Quebec street, or phone 7416J.

## BOY'S WEEK.

The much heralded Boys' Week is almost here. This celebration is being arranged by London's biggest men's clubs to emphasize on the citizens the importance of the boy to the community. The "boy of today will be the man of tomorrow," is their warning. The older citizens should not turn a deaf ear to this call. Remember this, folks, ten years from now the youth, whom many of you scorn and say, "little boys should be seen and not heard," is the chap who tomorrow may be guiding your destiny and the future of your country. We are reproducing in this column the following summary of Boys' Week:

Monday, May 1, will herald Boys' Week. Now that the eventful day is drawing near, excitement in the city schools is rising sky high. Banners to represent the various schools are being made for the patriotic parade, which takes place on the Monday. Boys of all ages are busy practicing athletics, which take place later in the week, and judging by the enthusiasm already displayed, the competitions should be very hot.

Beginning with Monday, the day on parade, the boys will parade, to start at Market Square at 4:15 p.m. and finish at Victoria Park, 5:15 p.m. for the singing of patriotic songs. All the seventh and eighth grade public school boys will participate, augmented by Boy Scouts and Cadets. The R. C. R. band and their drum band will assist.

On Tuesday, boys' day in schools, addresses will be given by leading businessmen of the city throughout the public and parochial schools.

Wednesday will rank as one of the most interesting days in the week. It is boys' day in industry, and all the seventh and eighth grade, Technical and first year Collegiate boys will be conducted through thirty of our important industrial concerns. There will be a concert, with educational films at the Collegiate auditorium in the evening.

As stated above, the boys' day in athletics, which takes place on Thursday, will be an important one from the viewpoint of the average boy. There will be indoor meets for all the public and separate school boys at the Collegiate and the two gymnasiums of the Y. M. C. A. In addition to these centers, another gymnasium is being arranged for. The events will be as follows: Running high jump, standing broad jump, three-potato race.

These events will be divided into five classes, from boys 12 years of age to those 18 years and over.

In addition there will be the following Trail Rangers' contests: One potato race, floor push.

Both of these events will be divided into three classes, from boys 12 years of age to those 16 and 17 years old.

Friday will be boys' day at home, when it is hoped that boys will make a special effort to be home that night to spend the evening with their parents. Every homeless boy will be invited to spend the evening in a home. Further details are to be arranged.

Saturday, as well as Thursday, will be especially looked forward to, as boys' day out-of-doors. On this day, all public and separate school boys will be entertained at Thames and Queens Parks. There will be bands in attendance and many open air competitions will be staged, such as woodcraft, campercraft, planting of trees, shrubs, model gardens, etc. Provision has been made for the inclusion of the fathers in certain of these events, which should make the afternoon doubly inviting. Prizes will be given for every event.

The Boys' Week ends with Sunday, May 7, which is to be boys' day in the church, when it is hoped that every boy will make a point of attending his own church and Sunday school. The service on this day will be run, with the exception of the preacher, by the boys themselves, as they will have their own ushers.

This is the first time a Boys' Week has been staged in this country, and it surely is the duty and desire of every Canadian boy to put his heart and soul into the job of making the project a tremendous success.

One of a series of articles on "Boy Life," by L. M. Houlding, secretary of the London Boys' Work Board.

"Hey, Bill! Chuck that and come on down to the church." "Naw!" replied Bill. "I'd rather read."

"All right, you bookworm. I'll tell the gang what you said," was Jack's remark as he passed on toward the S. S. room of his church.

"Half a moment, Jack. If the gang's there that's different."

These remarks are common enough, but they reveal the two most potent elements in a boy's make-up—play and friendship.

From the church standpoint we have considered the boy and his friends, so that in this short treatise we must confine our remarks to the boy and his play, keeping in mind the fact that this series is written entirely for the church leadership of boy life.

When we study closely the characteristics of boy life in the 'teen age period we would invariably reach the conclusion which a group of boy leaders discovered last month in this city—a boy is at least 80 per cent physical. The average church says, "We are primarily concerned with the spiritual side of the boy's life—the play life is physical, and we leave that work to the Y. M. C. A. and similar organizations. Any church which has such in its program is using it as a bait for religion." In other words, we must keep our spiritual relationship to the boy in a water-tight compartment in spite of the fact that the boy is 80 per cent physical, and that our church aim is to win the whole boy to Jesus, living his life in sight of God and in friendship with Christ.

## Play is Not a Bait.

Play is not and should not be considered as a bait for religion. "Play," as one religious educator has put it, "is the joyous expression of natural instincts." We have ceased to think of play as frivolous and as merely an indulgence, or even as recreation—it has been placed in the realm of re-creation. We say God is in nature and therefore we cannot logically turn against the fact that the play instinct, being nature's way, must be God's way of developing the body, mind and spirit or character.

What are the religious values which find expression in play-life?

Ideals are the goal of properly supervised play. Then there are qualities of obedience demanded. The development of the muscles of the body is fundamental to self-respect. The sickness and accuracy of perception; self-abnegation, co-operation in team play, self-sacrifice for the loyalty of the team and the church for which they play, co-ordination of the muscles which puts the body at the prompt service of the mind, self-control, respect for others, accuracy of judgments, the ability to be a modest winner and a cheerful loser. All these elements of character are the essence of self-government, good service, loyalty to the cause of fair play and justice and spiritual growth.

Apply these ideals to any games which could be played within the church or out in the civic playgrounds under church leadership, and then ask the church if she cannot use them to develop the spiritual natures of boys.

## Pull Long Faces.

It is so easy to misunderstand the challenge of this new attitude towards play and say that the church should not be made into a gymnasium; that play, with its noise, its fun and its contests, is too hilarious. We therefore swing to the other extreme of masking the joy and freedom of religion by our long faces and our perfunctory devotions.

The play life of boys can be made possible by ever yurchurch if properly understood. The boys do not go to church to break chairs or windows. I have put on group games in numerous churches of London, from the smallest to the largest, and I would rather, many times over, give the boys, in their raw, crude state, expression to their play instincts than run into a church to talk to a few saintly-looking, richly-perfumed, blue-striped tied and manicured boys. Every boy is accessible and attainable if the church shows a willingness to welcome him. "The church that will hold its boys at 16 years of age will do so by beginning to hold them at 12."

## Specialists in Field.

There is a marked change in the vision of the church conference of today. For centuries the boy has been neglected, and save for the coddled boyhood the advancement in the rank of the Kingdom of Christ was slow. Now we have our church boy leaders saying: "Save the boys," and "Give us trained Christian boy leadership." They have put specialists on the field to educate the churches to the challenge of the boy life, and the results in the conversation of boys have warranted an extension of program immediately. London is to be congratulated on having so many churches responding to the need, and the only reason why all the churches have not organized boys' clubs is because of the lack of leadership. Every year the Y. M. C. A. trains more men for church leadership—men of Christian, moral and virile characters, who teach that the way to win life is by living it, and that the virtues of Christian character must be learned not through books but by the boy in action. Little did the Christian teacher of the English schools realize when teaching the cricket game that the fruits of their efforts would be unquestionably borne out in the Battle of the Marne.

Our appeal today is for more men who will be prepared to give up their services and time to supervising the play life of the boys. Men who will by imitation and suggestion help boys to interpret their play expression in terms of the Christian philosophy of life.

That man has had a liberal education who has been so trained in his youth that his body is the ready servant of his will; his intellect in smooth, firm, working order, capable of taking an equal interest in the smaller, as well as the larger things of life; whose passions have been trained to come to heel at the command of a will backed by knowledge and wisdom; one who has learned to love all goodness, whether in nature or art, earth or heaven; to hate all villainess; to respect others equally as he does himself.—Selected.

O wad some power the giffle gi' us,  
To see oorsel's as ithers see us.

## JUVENILE COURT NEWS

EDITED BY L. N. K.

"Inasmuch as Ye Have Done It Unto One of the Least of These." Christ.

EDITOR'S NOTE.—The BOY'S OWN LONDON TISER appreciating that this is a great thing for the unfortunate boys who are gathered into the hands of the law, have arranged to carry this column whenever an item of interest along this line comes up.

A most interesting decision took place yesterday afternoon on the topic of "Children's Courts" in the Public Library. Judge Hardy was the speaker. He introduced the subject by speaking of the great cost to the community of our criminal population. Heredity was not so much the cause of this prevalence of crime as were unfavorable conditions of life and lack of proper safeguards over the youth of the country. We must take advantage of the plasticity of youth to form habits and character that will be as far as possible immune to criminal influences. The juvenile courts are among the most successful of convictive agencies. He then contrasted the old with those new conceptions of crime that have resulted from our immense advance in "scientific humanism." Today the most thoughtful of us treat crime rather as a disease to be cured or prevented than as sin to be visited by retributory justice, and the only penalty now inflicted upon children by the children's courts was consignment to an industrial school. This should be chiefly a means of separating them from evil influence and overcoming the "gang" spirit by healthful influences and pursuits. The police often fail to show a due conception of this kind of treatment, and are too much disposed to think that criminality demands harsh treatment. Judge Hardy is strongly opposed to the infliction of corporal punishment upon delinquents of any age. Those who use their hands to correct children are those whose brains are too inefficient to serve the purpose. The children's courts deal as far as possible informally with cases, and try to win the confidence of the child and to find the hidden motives of his actions and then by the power of suggestion to elevate his thoughts and ideals. The ordinary courts consider the value of property, the children's courts regard rather invaluable lives and thus are doing a wonderful work in social service. Many cases are due to physical conditions, and may be cured by medical or surgical treatment.

Institutions should be established in every city to investigate abnormalities in children. Many children are spoiled by parental mismanagement. Over-severity, puritanism, over-indulgence are practiced by those who regard themselves as ideal parents, and all these modes of treatment are injurious or disastrous to the child. One of the most important functions in the state is that of the probation officer to whom a delinquent child is required to report at intervals. Such an officer can keep in touch with the home and the school and try to find someone who will act as a big brother or big sister to the child. The officer must himself win the confidence of delinquents and carefully avoid creating antagonism by any coercion. Flogging is a crime against criminals. There is no better means of improving children than a public playground system. Play prevents mischief, and is a necessity for normal growth. Such a system introduced in one American city has in five years reduced the work of the children's court there to the extent of 95 per cent.

A lengthy discussion followed upon "gangs," play for old criminals, playing, rather than watching games; corporal punishment and upon educating parents and teachers, all the participants being in full agreement with the judge.

ANYONE CAN CONVICT A BOY,  
BUT ONLY ONE HIMSELF  
CAN REJUVENATE HIM,  
SAYS J. J. KELSO.

Bricks and mortar of fine schools will not reform a boy. When a man puts his hand on the shoulder of a lad and tells him that he is interested in him and is going to be his friend, that is the only saving influence. This was the message brought home to the Kiwanis Club recently at a general and objective committee meeting, held at the Tecumseh House in the form of a supper and smoker, by J. J. Kelso, superintendent of neglected children for Ontario.

It was a mistake, he said, to have one big central institution for boys. Such a place developed into a school of crime. One boy would learn from another facts about crime which he would not obtain were he kept away from such a place. Nobody should be sent to any institution if it could be avoided.

"Anybody can convict a boy," said Mr. Kelso, "but what is best is to get him back on the right track. Be very

patient with a boy. His life is valuable. Boys should not be addressed in groups, for better influence can be brought to bear on them if they are dealt with separately."

## Some Examples.

Looking back over the criminals of the past 25 years, Mr. Kelso said that almost without exception they were at one time occupants of a reformatory school. The Garfield brothers and Hotrum were cited as examples.

In order to get away from the school idea, the speaker urged that Kiwanis in this district get together and purchase a farm where boys could be properly trained. Such a scheme could be financed without great difficulty. In an institution the boy did nothing for himself. If he were outside and at work he would be helping himself and finding the road to a better life.

Mr. Kelso cited several instances where personal influences had made a great change in the life of wayward boys. One case showed that through the influence of a sister of Rev. W. R. McIntosh, pastor of King Street Presbyterian Church, the life of a lad had been completely changed. The result was not learned until 15 years after the boy had left the reformatory.

"The average boy is an idealist," said the speaker. "He likes to imitate and admire. It is wonderful what they can do, and it is remarkable the way they can read character. Boys can tell what kind of men are interested in them."

Tribute was paid to the work being carried on by the local Kiwanis Club. The work was important and was bound to succeed to the extent of the energy and enthusiasm put into it. It was necessary to share the burdens of the lads.

Old methods of treating boys were dealt with, especially at Penetang. Boys used to be chained to adult prisoners and confined to jail for varying periods. The officers who were placed in charge of them to "teach" them were "failures in everything else, so they secured jobs at Penetang through the influence of members of Parliament."

There was no use in trying to do anything with a boy unless he was penitent. While they were boastful, full of lies and under the impression that they were "putting one over on you," nothing could be done with them. Investigation of the Penetang system revealed that 40 of the lads there were motherless and that half a hundred others were from broken homes. Mr. Kelso took these lads and put them to work and in two years only six of them got into trouble again.

**VARIED SENTIMENTS.**

It is with a feeling of deep regret and yet with one of keen enthusiasm that we view the final results of last night's election. We entertain no needless scruples regarding the ability and progressive campaign of the new mayor and his extremely competent council, but we do lament the fact that so few of last year's capable members sought re-election. Contrary to the example set by our more learned and older city fathers, who seldom retire at the end of one year's brief public service whether in their case the job is a better paying proposition or not, the longer it is conducted we are not in a position to definitely state. However, we fully realize what a tremendous intrusion it is upon their valuable time, and what an endless and oftentimes thankless task civic administration becomes. It is hardly possible to enumerate the many and various good deeds committed by last year's organization, and every member should be heartily commended on the propitious impression they created. Few boys' organizations throughout the continent-wide Dominion have enjoyed such a successful, though brief, sojourn, and especially recognizable were their accomplishments, when we consider what a crucial and unsettled period they passed through. Especially noticeable are the merits of our recent mayor, Allan Kay, who sacrificed time, energy and expense on behalf of the boys of London. All of which he received no tangible recompensation for. It is regretted that he saw fit to retire for the time-being from junior city extension, and it would not greatly surprise us to learn, in a few years, of him stepping into senior civic administration with as much pep and enthusiasm as he has recently devoted to boys' work. The other members of the council also conducted themselves in an extremely favorable manner, and we are positive they will never regret the time sacrificed to the extension of young London.

The new mayor, with his progressive campaign and his aggressive tactics, supported by the well-selected council, has but to follow in the steps of his predecessor to receive the co-operation and indorsement of his schemes by all the boys in London. We wish him and his co-workers the utmost success in their venture, and pledge them our unfailing support and ever-existing good wishes.

Ted McCullough was sprint champ.

Gosh! George Wright is only 14 years old, and he cleared 5.4. Wait till he grows up.

**LOCAL BOYS RAISING FUNDS**

Campaign On To Raise \$150 For the Boys of India.

The call for help from the boys of India has again been heard by the boys of our local Y. M. C. A., and they are working hard on a campaign to raise \$150 for this great need.

This year, Mr. Hartley Fowler, the boys' work secretary at the Galt Y. M. C. A., who has recently returned from India, where he was engaged in "Boys' Work," has offered for competition each year a very handsome, hand-carved, and hand-painted brass tray. The tray is made of hammered Indian brass. It measures seventy-two inches in circumference. The design on it is an Indian jungle scene, and shows men hunting tigers from the backs of elephants. It will be a handsome decoration for any boys' department.

The object in presenting the tray is to stimulate interest, prayer and sacrificial giving for our Y. M. C. A. foreign work on the part of the boys. Let us remember that there are 34,000,000 boys in India alone, to say nothing of China, Japan, South America, and other countries, where the "Y" is working. Most of these boys are under-privileged boys. In India, we have only three "Y" boys' secretaries for this vast multitude of boys. Is it fair? We want to raise \$3,000 altogether from the boys across Canada to support the Y. M. C. A. boys' secretary. Will you help us do it, and help to win the tray for your association?

The tray, which will be called "The Canadian Boys' Foreign Work Trophy" will be presented each year to the winners as follows:

(1) From February 1 to August 1, to the boys' division raising the largest amount of money proportionate to membership, as recorded January 1.

(2) From August 1 to February 1, to the boys' division raising the largest amount irrespective of membership.

Let us all help these boys in India and at the same time, endeavor to bring this handsome trophy to London. Your subscription will gladly be received at the boys' division, Y. M. C. A.

**BOYS' GOVERNMENT AT TECH. TURNED OUT**

Opposition Takes Reins of Power Under Carl Kennedy.

The Boys' Parliament of the London Technical High School has been obliged to let the opposition, under the leadership of Carl Kennedy, take power. The government, under Robert Woolford, has been defeated in two debates. The first debate was "Resolved that a year in college is more beneficial than a year of travel," and the second, "Resolved, that motor buses are more beneficial than street cars." It is expected that Carl Kennedy will make a great leader, and be a credit to the London Technical Boys' Parliament.

**THE ANZAC CLUB.**

The Anzac Rifle Club of the Dominion Marksman, have entered a team for the Dominion championship, comprising F. Galloway, W. Galloway, D. Chapman, Charles White and L. Nye. They are putting every available minute on the rangers.

**TO THE EDITOR**

To the Editor Boys' Own Tiser, London:

Dear Sir,—Through the columns of your valuable paper, I wish to thank the boys of London for having appointed me controller to the Boys' Council of this city.

As a controller, it is my aim to aid every Trail Ranger and Tuxis group in this city to carry on the four-fold program of the C. S. E. T., and also to make the Boys' Council of this city the "peppiest and most efficient council of its kind in Canada.

Once again, I wish to thank the boys of London for having appointed me to this council. I remain,  
 ALLAN GRANT.

Every occasion of importance necessitates the use of Flowers. See that they come from

**DICKS FLOWER SHOP**

**DE LA SALLE BOYS BACK AT SCHOOL**

Monday Was Back-To-School Day.

Last Monday the school-bell tolled out once more after the completion of the Easter holidays. A bystander near the school corner would have thought that the pupils of the various schools were going to a funeral judging by the wry expressions on some of their faces. But one consoling feature was that there was less than two months of school until they will once more enjoy the lovely free air of the summer holidays.

**CHURCH OF REDEEMER SCOUTS ARE AFTER STRAY "TRAMPS"**

Any 'Tramp' Reading This Notice Will Be Wise To Keep Away.

On Wednesday afternoon the 1st London Troop (Church of the Redeemer) held a hike to the valley in charge of Scoutmaster Powell. When arriving at the valley and scouting around they found a fire lit and no one near, so they split up and went to round up the lighters of it. It fell to the lot of the Scoutmaster and a patrol leader to discover a couple of hoboes under a tree, and concluding they were the lighters of the fire they chased them out of the valley, then finding they could not run as fast as the hoboes they gave up the chase and returned to camp and made supper. After supper a large campfire was built and stories were told around it. About 8:15 p.m. the troop returned to the city.

**KI-Y CLUB ENJOY WEEKLY SUPPER**

Robert Frith Wins Both Bronze and Silver Medals For Shooting.

Last Thursday night saw the last of this season's weekly suppers for the Ki-Y Club. The supper, which followed a treasure hunt, held from the Y. M. C. A., was largely attended and as usual thoroughly enjoyed by the boys. At the conclusion of the supper the boys were addressed by Kiwanian S. F. Lawrason, who gave an account of his recent trip to various United States cities in the interest of Kiwanis Canadian-American week. Following his address, the bronze and silver medals for shooting were awarded to Robert Frith, who had completed the requisite number of satisfactory targets. After a brief sing-song, the boys broke up into their five Trail Ranger groups with the following as mentors—Jack Hutchison, Leslie Gray, Doug Walker, Alf, Trueman and McGregor.

**AHMEEKS STAGE ROUSING "ENTHUSIASM" MEETING**

Club's Spirit For Athletic Meet Is At Its Best.

With keen enthusiasm, obviously displayed, the members were awaiting the athletic meet. All members were anticipating the participation in the various, well-selected events, and although some expressed unfamiliarity with the shot-put, nothing daunted, and they expressed a desire to compete.

The supper, usually served previous to the club meeting was dispensed with, as a rigorous, final practice in athletics was scheduled for the night, and little can be accomplished on a full stomach. Numerous, minor business details were discussed and dealt with. Arrangements are being completed for the radio concert to be held after the excitement, owing to the athletic contest, has abated. An excellent program is being prepared, and as this is a novel idea the concert should be well patronized.

Claude Gunther, who contested the mayoralty seat of the Boys' Council, received the unanimous indorsement of his campaign by the club and received all their available support.

Baseball practices have been staged, and the members are quickly falling into their old, snappy form. Applications have been received already for games from towns in the proximity, and the members are endeavoring to co-operate with the Thorndale players in staging a game on May 24. Doubtlessly some satisfactory arrangement will be culminated. It is to be hoped that the new Boys' Council, functioning in conjunction with the Boys' Work Board, will arrange and carry through to a satisfactory conclusion, a complete and well-drawn-up baseball schedule.

**DE LA SALLE BASEBALL TEAM.**

E. O'Donnell, manager of the De la Salle high school team, had his first tryout for the baseball team last Tuesday night at the school grounds. Much enthusiasm was shown by the various candidates, and the team promises to be a success.

**NEW R. C. BOY SCOUT TROOP WILL HOLD CHURCH PARADE**

4th London Troop Will Be Addressed By Chaplain Weber.

Tomorrow night a church parade will be held by the 4th London Troop (St. Marys) to their own church where they will be addressed by the chaplain of the troop, Father Weber.

The troop will meet at the armories at 6:30 p.m., when headed by the bugle band of the Boys' Naval Brigade they will march to the church.

The 4th London is one of the newest troops to form in the city. The troop is in charge of Scoutmaster H. Payne and his assistant Jack O'Rourke.

**"CRUSADERS" ELECT OFFICERS FOR YEAR**

Beverley Robinson Is Elected Chief Ranger.

On Monday evening, April 24, at 7 o'clock, a meeting was held in the Colborne Street Methodist Sunday school by the "Crusaders," a recently-organized camp of Trail Rangers.

After an enjoyable supper, the camp elected its officers, as follows: Chief ranger, Beverly Robinson; sub. chief ranger, Bill Allison; tally, Ernest Earbour, cache, Clarkson Wootton.

The mentor, Mr. C. Merkley, took the chair and introduced Mr. Spearman of the Y. M. C. A., who gave an interesting address, setting forth the work of the above-mentioned camp and the duties of a Trail Ranger.

Members of the camp are Beverly Robinson, Bill Allison, Ernest Barbour, Clarkson Wootton, Douglas Henderson, John Moscrip, Clair Atkinson, Gordon Harley, Gordon Wilson, Bruce Ross, Arthur Glen and George Schuster.

**PLAYERS OVER AGE WILL BE ALLOWED TO COMPETE IN C.S.E.T. BASKETBALL**

Entries To Be In by Monday—M. O. League Rules Adopted.

The different representatives of the various C. S. E. T. groups met on Wednesday to draw up the constitution and rules of the new league. A fairly large representation were in attendance and a large entry is looked for.

All entries must be in by Monday evening, accompanied with the usual fee of \$2 for junior and intermediate teams, and \$3 for senior. It was decided that every team should send in along with the entry the names of two possible umpires, from which the umpires of the league will be chosen. The M.-O. rules were adopted as the official rules for the league. It was also decided that each team must have a regulation ball in good condition and acceptable to the referee at each game.

The most important discussion at the meeting was the age question. The dividing lines ruled upon are: For junior, those who have not reached their 15th birthday prior to Jan. 1. Intermediate, those who have not reached their 18th birthday prior to Jan. 1, and for senior, those who have not reached their 20th birthday. It was decided that one player over age be allowed to play on any team of not more than one year over age after application to the executive but player must not belong to the battery. All protests must be handed in 24 hours after the game in writing, and accompanied with \$2.

The officers of the league are: President—A. R. Elliot. Vice-president—Phil Burton. Secretary-treasurer—Lloyd Houlding. Committee—Mr. G. Cannon and Walter Logan.

**THREE-CORNERED TIE FOR KI-Y SWIMMING MEDAL**

The last results of the weekly swimming events of the Ki-Y Club in which Bob Firth secured first place in the swimming on back event has produced an interesting situation inasmuch as three boys are now tied for top place in the number of points gained, Harold Neil, Alf Calhoun and Bob Firth, each having fifteen points to their credit.

As only a few more weeks are left for competition there is likely to be a keen struggle for the medal that is being offered for top place.

While trying for his swimming badge at the last aquatic meet Fred Kerry surprised everyone by floating on his back without movement of hands or feet for 72 seconds. The Trail Ranger test requires that this should be done for 15 seconds, and Fred's effort was certainly remarkable. Can any other Trail Ranger beat it?

## Realty Problems

A Realtor is interested in one thing above all others. He is just as anxious to give you reliable, dependable service as you are to receive it.

His business means more to him than the profits involved. He respects his calling and this respect has created a rigid code of ethics which governs his every business procedure.

If you are in the market for real estate, you can rely, without reservation, upon the advice and counsel of a REALTOR. He knows values, and knows the best properties on the market.

If you have a property to sell, the services of a REALTOR are equally advantageous to you. His familiarity with the market, knowledge of prospective buyers, and his sincerity will guarantee you quick and satisfactory results.

No matter what your realty problems may be, put them up to a REALTOR and know that they will be solved to your entire satisfaction.

## Suggestions To Owners and Investors

- DON'T EXPECT BROKERS TO ASK MORE THAN YOU ARE QUOTING**—A self-respecting agent will not attempt to procure a customer for property at a given price when aware the owner is offering it for less.
- BROKER'S INFORMATION CONFIDENTIAL**—Names of customers and terms of propositions from brokers are confidential. This information is valuable, and if repeated may result in injury to him who entrusted you with the facts.
- EXCLUSIVE AGENCY AND ONE SIGN ONLY ADVISED**—Promiscuous listing does not procure adequate service. A broker will not spend time on property he knows others have made common. One agent and one sign are strongly advised.
- SECURE COMPETENT ADVICE AND SERVICE**—Investors should put their proposition in one reliable broker's hands. Good investments are secured through a knowledge of facts governing development and relative growth of localities which will make and maintain values, or facts regarding building character and cost, problems of rentals, expenses, management and income—truly a complex subject, the only master of which is the agent whose years of study and practical experience have given him the right to high professional standing.
