BEFORE THE SEASON. LABOR EXPENDED IN GETTING RACE HORSES INTO CONDITION.

Success on the Turf Comes Only With Care and Hard Work - Popular Methods of Training the Favorites, the Winners and the Scratched - Horses of the Season.

With the advent of spring the horse racing season opens, which is gradually enlarged as the days grow warmer and longer.

Not every horse, of course, stands even the preliminary preparation, for it is this preliminary work which either raises the horse to the top or sends him to the ground.

Trials are among the most important features of training a race horse, but are seldom made of his own accord.

Once a horse has entered upon a course of active training, there is no let up during the racing season, unless, of course, the horse is scratched.

There was an interesting case at the last session of the Division Court in Canton Place.

HEART WEAKNESS. MUST BE TREATED IN TIME OR ENDS IN CERTAIN DEATH.

Some of the symptoms are Palpitation, Rapid Heart, Shortness of Breath, Pain, Dizziness and Fainting Spells.

The Echo has read and has published many statements and from people who have been cured of various ailments by the timely and judicious use of Dr. Williams' Pink Pills for Pale People.

At the least exertion my heart would palpitate violently. I was frequently overcome with dizziness and fainting spells.

An Imperial Funeral. Rosetta Sherwood Hall, M. D.

In 1870, when I first reached Korea, the whole country was in mourning for the old Queen Dowager.

Upon my return to Korea, in 1897, I again found the whole country in mourning, this time for the late Queen Min, whose death occurred Oct. 8th, 1895.

On Saturday evening already, thousands of soldiers and citizens were gathered in front of the New Palace.

To the People of Athens:

We are going out of the Dry Goods business and are

SLAUGHTERING

our stock of Staple and Fancy Dress Goods at 40 per cent off Regular Prices. It will pay you well to give us a look when in Brockville for Dress Goods, Prints, Gingham, Lace, Corsets, Gloves, Carpets, Oil-Cloths, Blankets, Comforters, Etc. Our Entire Stock to be sold before July 1st. We have now in stock the best line of

READY-MADE CLOTHING

ever shown in Brockville—Fit the Smallest Boy or the Largest Man.

W. J. BRADLEY,

KING ST. WEST BROCKVILLE.

BLACKSMITHING WOOD-WORKING AND PAINTING

C. E. Fickrell & Sons have leased from W. M. Stevens his shop, house, etc. on Elgin street, Athens, and beg to notify the community at large that they are prepared to do all kinds of general Blacksmithing, including the repairing of Wood and Iron Work on all kinds of vehicles, implements, machinery, etc. Painting done on the premises. Having worked at the trade for many years, we are capable of giving good satisfaction. We use an axle-cutter for shortening arms where they have too much play. Horse Shoeing will receive special attention. Call and we will endeavor to please you.

There Are No Others

That Offer the Same Value as

The East Lake Steel Shingles

They are reliable and just as represented and have never failed to give durable protection. Their rust-proof, fire-proof, and storm-proof qualities have been well proved.

If you have a house or barn to shingle, get my prices for steel or galvanized iron. Every job is guaranteed against leakage.

W. F. EARL, Athens

Two Ounces of Blood Daily

Are added to your veins by taking one of Dr. Campbell's Red Blood Forming Capsuloids with each meal three times daily. This is the only Natural Iron extracted from Fresh Bullock's Blood.

We do no miracles; all we do is to cure people and give them two ounces of blood daily when they take Dr. Campbell's Red Blood Forming Capsuloids. By enriching the blood they restore its natural iron or Hemoglobin to it. This cures all the chronic blood diseases, among which may be mentioned anemia or paleness; chlorosis, or green sickness; palpitation, rickets, scurvy, consumption or tuberculosis, indigestion, amenorrhoea, pains in the head or back and all monthly irregularities. Physicians will tell you that this is the only iron medicine in the world, which never fails to enrich the blood and thereby cure these chronic diseases. Leading physicians of London, New York and Denmark prescribe them in all such cases. This is not a secret or patent medicine.

DR. CAMPBELL'S RED BLOOD FORMING CAPSULOIDS.

Are sold at 50c a box or six boxes for \$2.50, by J. P. Lamb & Son, Druggists, Athens, or sent by mail on receipt of price by THE CAPSULOID COMPANY, Brockville, Ont.

LOMBARDY.

MONDAY, May 6.—The recent rain did the crops and grass a great deal of good. Miss Lizzy Dobler is seriously ill with a severe attack of pneumonia. She is under the care of Dr. Pratt. Michael Dobler is rejoicing over the arrival of a bouncing young girl. Both mother and baby are doing nicely. Miss Florence Dewey of Smith's Falls was the guest of Miss Bertha Nichols last week. James Miller is the proud possessor of a fine young son. Jefferson Sherman of across the border was the guest of his brother, Frank, recently. Miss Maud Gallagher is rusticiating among friends here. Mrs. B. Bellamy recently visited her relatives at Bellamy's Station, Ont. She was accompanied home by her oldest daughter, Annie, who had spent the past three months at her uncle's there. Erratt & Sons are running their mill full blast at present, manufacturing a No. 1 class of cheese boxes. They make an exceedingly good box for what they charge. They are supplying four factories. A daughter of John Stapleton, about two miles from here, towards Smith's Falls, is confined to her room with a severe attack of pneumonia. She is under the care of Dr. Pratt. James Doobler of Smith's Falls was the guest of relatives here on Sunday.

HARLEM.

MONDAY, May 16.—Mr. John Reason is rejoicing over the arrival of a young daughter. Mr. W. Green, who is the guest of her sister, Mrs. W. Taylor, this week. Mr. Hinks Eaton was in town on Saturday last. Planting is the order of the day with the farmers. The teachers of the Kingston public schools are arranging for an extensive flower show, to occur during September. The children to the number of 2,000, will be provided with six varieties of flowers. These they will cultivate, and when in bloom the competition for prizes will occur with added ceremonies. The proceeds will be used to purchase reproductions of the choicest pictures to be hung in the school rooms. Maine's convict record is lower than that of any other state in the union, and much lower than that of Canada. And its tendency is steadily downward. The State prison report for 1897 says: "The number of convicts has not been so small for many years. The average this year is six, less than last year." This low record would be still lower but that capital punishment was abolished in Maine many years ago, since which time, those who in most other states and in Canada would have been executed, are life convicts in the state prison. There are now forty of them. Deducing these, a comparison of the records of Canada and Maine shows that Maine has in proportion to her population, little more than half as many convicts as Canada. Canada in 1897 had one convict for every 8,989 of population. Maine, in the same year had one convict for every 6,959 of population.

NEW-YORK WORLD THIRDE-WEEK EDITION FOR ONE DOLLAR

Published Every Alternate Day, at 10c per copy. The Three-Week Edition of the New York World, containing the best news of the week, is published every alternate day. It has all the merits of a great daily paper, and is a most valuable acquisition to the home. It is published at a special price of one dollar for three weeks. It is a most valuable acquisition to the home. It is published at a special price of one dollar for three weeks. It is a most valuable acquisition to the home. It is published at a special price of one dollar for three weeks.

LOCAL SUMMARY.

Excitement has been created by discovery of placer mining on the Vermilion River, thirty miles from Sudbury. It is regarded up there as a Klondike in embryo. In this district, during the past few days, American miners have discovered extensively in potatoes and in consequence the tubers have advanced to 40 cents per bushel. Some farmers are holding for a still higher price. A happy event is announced to take place this evening at the home of Mrs. Geo. Tackeberry, Flum Hollow, when Miss Helen, youngest daughter of Mr. James Bullis, will be united in marriage with Mr. Oscar Lillie, also a resident of the Hollow. It is significant and pleasing to note that several of the out-lying cheese-producing sections are seeking recognition as belonging to the Brockville district. It will be only a short time before the Brockville brand on a box of cheese will enhance its value considerably. In Boston, the loaf of bread is to be made smaller on account of the war in the price of wheat. The glass of beer will be made smaller on account of the war in the price of wheat. Thus the burden falls on the just as well as on the other fellow. A fine programme of aquatic and other sports has been arranged for the proper celebration of the 24th at Charleston. Boats rowed or sailed in the races must be owned and sailed in the district. Small bills will be issued in a few days giving full particulars. W. S. Hough hired a nine pound swarm of bees on Sunday last, May 17th, at B. B. McGregor's, North Hampton, N. Y. At present, honey flow is in excellent condition. Especially tame and will. These bees wintered well. The Kingdom of Prussia either forbids the sale of Patent medicines altogether, or makes it a condition of publishing their contents, and it is a common sight to see big posters containing such announcements as "warning against patent medicines."

A Peterboro citizen a day or so ago drove out to his farm, a few rods from the town, to shoot ground hogs which were bothering the crops. He aimed at the burrows but shot his good horse dead. Now the Peterboro Review wants the use of firearms against the public schools and collegiate institutions. After a brief illness, Fossy Goklin died at the home of his father, John Goklin, Pine Hill, on Saturday last. The funeral services were conducted at the Anglican Church of that place on Sunday afternoon, when a procession of carriages a mile in length, filled with friends of the departed, followed the remains to their last resting place. Among the most popular of the evening entertainments enjoyed by Athenians during the past two years have been the musicals given by Miss H. H. H. were among the "bond-joy boys" there were surprised with an invitation to go to Cuba. This tin-soldier business is all very well in time of peace, but when war breaks out—well—ask Frank Chapman of Ogdensburg. He knows all about it, and the fighting members of his military command declare that his children's children, even unto the seventh generation, will possess the same knowledge. This spring Mr. Melvin Trickey moved his family to Lake Ontario, where he has been engaged to work for Messrs. Henderson Bros. On Thursday night Mrs. Trickey was awakened by some unusual noise, and thinking there was a smell of smoke in the room, called her husband to investigate. He found the whole rear of the building to be on fire and the family made a hasty exit, falling to save any wearing apparel excepting what they donned in the excitement of escaping from the flames. A few articles were taken out of one of the rooms, but everything else was consumed, including a considerable supply of potatoes and provisions. The loss is a sad one, well-deserving of the active sympathy which the people of that district invariably manifest on such occasions.

The village council met on call of reveue on Wednesday, May 11th. The minutes were read and confirmed. On motion the resignation of Wm. Karley, councillor, was accepted, and the clerk was instructed to call a meeting of the electors of the village of Athens to nominate a select council in place of Wm. Karley. The clerk was instructed to prepare a by-law to appoint a deputy returning officer for Polling Sub-Division No. 1, in place of Archibald James, who has resigned to be a resident and taxpayer of the municipality. On motion the council adjourned to meet on Monday evening, May 16th, to pass a by-law appointing D.R.O. for F.S.D. No. 1. The village council met on Monday afternoon to consider a petition of Wm. A. By-law was read section 3 of by-law No. 57 as amended three times and passed, appointing H. C. Phillips, D.R.O. for Polling Sub-Division No. 1 in place of Arch. James.

100,000 Salmon. On Monday last 100,000 salmon from the Government hatchery at Ottawa were taken to Charleston and under the superintendence of the local fishery officer, Mr. S. Y. Bullis, were deposited in the lake. The catchers employed in the vicinity of Orange, Beecher's, Saw-and-pigs, and Judson's Island. This commitment, under proper provisions, should add very greatly to the growth of salmon, and though his yield is large compared with other waters, it is not producing nearly the number of salmon that it would if the fry were properly protected. Anyone visiting the section where the young fry were liberated on Monday will find nearly every kind of fish in the lake represented in the great school that are fighting for and feeding upon these little strangers. Pike and perch are the principal offenders, but members of the fishery department do not enjoy a share of the feast. There is manifestly great waste in this method of re-stocking, and a better plan should be at once adopted. Nature has provided just what is required to meet this case. Those acquainted with the lake know that on the west side of the lake there is quite a large body of water known as Slim Bay. The opening to this bay is about thirty feet wide, passing through the high bluff, rocky shore. The bay extends between high granite shores for fully a mile at an average width of about one eighth of a mile. Excepting at one end, there is a depth of about forty feet. This bay appears to possess all the conditions necessary for the growth of the young salmon fry, and could be made available for that purpose at a small expenditure. The depth of water at the entrance of the bay is only about three feet, and the bottom is flat rock, admirably suited for the construction of a wall to separate the bay from the lake. At present, Slim Bay is infested with pike and other coarse fish, and it is feared that the salmon fry, which could be easily done. We believe that the adoption of this plan of re-stocking the lake would result in so increasing the annual catch as to make Charleston known to every lover of the rod and reel in America. We commend the matter to the careful consideration of local anglers, and would suggest that the Anglers' Association be re-formed, if only for the purpose of securing proper protection to the lake against the coming of every summer from Ottawa.

Freeman Halstead. The Canadian before the Spanish Court at San Juan—Miss Tarr's imprisonment for taking a photo. Ottawa, May 17.—Freeman Halstead, the newspaper man arrested in San Juan de Porto Rico as an American spy, probably owes his life to the fact that he is a member of the Canadian Government's intervention with the Spanish authorities in the young man's behalf. Halstead, it will be remembered, was in San Juan as the correspondent of the New York Herald and London Graphic, while taking a photograph of the new forts was arrested on the charge of being a spy. His friends who started on Monday to look for his safety. The last heard of him here was that he had "disappeared." Among those who started on Monday to look for his safety, was Mr. Henderson, member for Halton, soliciting his good offices with the Government in relation to the case of Mr. Henderson is an active member of the Opposition, but this did not prejudice his case with Sir Louis Davies, Minister of Marine, to whom Mr. Henderson submitted the papers. Sir Louis called the British Consul at San Juan as follows: "Please give available information of Freeman Halstead, a Canadian, lately arrested."

Halstead, it will be remembered, was in San Juan as the correspondent of the New York Herald and London Graphic, while taking a photograph of the new forts was arrested on the charge of being a spy. His friends who started on Monday to look for his safety. The last heard of him here was that he had "disappeared." Among those who started on Monday to look for his safety, was Mr. Henderson, member for Halton, soliciting his good offices with the Government in relation to the case of Mr. Henderson is an active member of the Opposition, but this did not prejudice his case with Sir Louis Davies, Minister of Marine, to whom Mr. Henderson submitted the papers. Sir Louis called the British Consul at San Juan as follows: "Please give available information of Freeman Halstead, a Canadian, lately arrested."

Freeman Halstead. The Canadian before the Spanish Court at San Juan—Miss Tarr's imprisonment for taking a photo. Ottawa, May 17.—Freeman Halstead, the newspaper man arrested in San Juan de Porto Rico as an American spy, probably owes his life to the fact that he is a member of the Canadian Government's intervention with the Spanish authorities in the young man's behalf. Halstead, it will be remembered, was in San Juan as the correspondent of the New York Herald and London Graphic, while taking a photograph of the new forts was arrested on the charge of being a spy. 100,000 Salmon. On Monday last 100,000 salmon from the Government hatchery at Ottawa were taken to Charleston and under the superintendence of the local fishery officer, Mr. S. Y. Bullis, were deposited in the lake. The catchers employed in the vicinity of Orange, Beecher's, Saw-and-pigs, and Judson's Island. This commitment, under proper provisions, should add very greatly to the growth of salmon, and though his yield is large compared with other waters, it is not producing nearly the number of salmon that it would if the fry were properly protected. Anyone visiting the section where the young fry were liberated on Monday will find nearly every kind of fish in the lake represented in the great school that are fighting for and feeding upon these little strangers. Pike and perch are the principal offenders, but members of the fishery department do not enjoy a share of the feast. There is manifestly great waste in this method of re-stocking, and a better plan should be at once adopted. Nature has provided just what is required to meet this case. Those acquainted with the lake know that on the west side of the lake there is quite a large body of water known as Slim Bay. The opening to this bay is about thirty feet wide, passing through the high bluff, rocky shore. The bay extends between high granite shores for fully a mile at an average width of about one eighth of a mile. Excepting at one end, there is a depth of about forty feet. This bay appears to possess all the conditions necessary for the growth of the young salmon fry, and could be made available for that purpose at a small expenditure. The depth of water at the entrance of the bay is only about three feet, and the bottom is flat rock, admirably suited for the construction of a wall to separate the bay from the lake. At present, Slim Bay is infested with pike and other coarse fish, and it is feared that the salmon fry, which could be easily done. We believe that the adoption of this plan of re-stocking the lake would result in so increasing the annual catch as to make Charleston known to every lover of the rod and reel in America. We commend the matter to the careful consideration of local anglers, and would suggest that the Anglers' Association be re-formed, if only for the purpose of securing proper protection to the lake against the coming of every summer from Ottawa.
