**1,500,000 ACRES OF LAND  
FOR SALE IN  
CANADA WEST.**

THE CANADA COMPANY have for disposal, about 1,500,000 ACRES OF LAND dispersed throughout most of the Townships in Upper Canada—nearly 500,000 Acres are situated in the Huron Tract, well known as one of the most fertile parts of the Province—it has trebled its population in five years, and now contains upwards of 20,000 inhabitants.

The LANDS are offered by way of LEASE for Ten Years, or for SALE, CASH OR DOWN—the plan of one-fifth Cash, and the balance in Installments being done away with.

The Rents payable 1st February each year, are about the Interest at Six Per Cent upon the price of the Land. Upon most of the Lots, when LEASED, NO MONEY IS REQUIRED DOWN—whilst upon the others, according to locality, one, two, or three years Rent, may be paid in advance.

The right to PURCHASE the FREEHOLD during the term, is secured to the Lessee, and a deed named in Lease, and an allowance is made according to anticipated payment.

Lists of Lands, and any further information can be obtained, (by application, if by letter post-paid) at the Company's Offices, Toronto and Goderich; or R. BRASLAV, Esq., Stratford, Colborne District; Dr. ALLEN, Goderich, J. C. W. DALY, Esq., Stratford, Huron District.

**SPEAK GENTLY.**

Speak gently I say speak gently all,  
Nor cause a sigh or tear,  
Or painful feeling in the breast,  
Throughout our journey here.

Speak gently I say ever long,  
And short may be our stay;  
Then let us strew with gentle words  
Love's flowers upon our way.

Speak gently to each child you see,  
And kindly do them greet;  
And if instruction you'd impart,  
Do it with accents sweet.

Speak gently 'E'en if they should live  
To see a future day,  
There's trouble yet for them to meet;  
Then cheer them on their way.

Speak gently to the young in life,  
Nor grieve the buoyant mind;  
There's nothing kills the heart so much  
As words that are unkind.

Speak gently 'till will pleasure give,  
That bright their hopes 'mongst men,  
But should their path be overcast,  
Oh! I pray speak gently then.

Speak gently to the old in years—  
Their race is nearly run;  
Then try with kind words if you can  
To gladden their setting sun.

Speak gently 'till their ways and whims  
Are alien strange to see,  
Remembering that in future years  
Your ways as strange may be.

Speak gently to the wandering ones;  
Be kind in word and deed;  
Quench not the fire by tones unkind,  
Nor break the bruised reed.

Speak gently 'till perchance your word  
May bring to mind their youth;  
Then try with kindness and with love  
To lead their thoughts to truth.

Speak gently to the poor on earth;  
How low and far the flow'rs  
That bloom upon their path in life,  
Compared with those on ours!

Speak gently to the toiling man;  
Let no harsh word be heard;  
Spare his he has enough to bear,  
Without an unkind word.

Speak gently 'till with anger spread  
Scars upon our path;  
Without a peevish word or look,  
Beach life its toils and bath.

Speak gently 'till that all would grand  
The words their lips let fall;  
We know not what our influence is;  
Oh, then speak gently all!

**MEMOIR OF GEORGE STEPHENSON**

(Abridged from the Derby Reporter.)

verance and stern resolution, might well be a little positive sometimes. Who that had made his way through so many difficulties would not be. But he was kindly withal—how kindly! Who that has been in his society but can recall the beaming smile, the hearty welcome, the most cheerful voice of the man whose vigour and enthusiasm old age had not diminished, who was to the last companion alike to young and old. American Emerson, who saw him a few months since, said he seemed to have the life of many men in him. Also, how suddenly that green old age has closed in death!

We are not sufficiently acquainted with the detail of the early history of Mr. Stephenson's life to give it much space in the short memoir which we are about to furnish. Suffice it to say that about six or eight years ago a small town called Wylam (or Wylm, we are not sure which), nine miles east from Newcastle-upon-Tyne, had the honour of being the birth-place of this wonderful man. His parents, who had long resided in the same locality, were honest and creditable, but humble in circumstances, his father being an engine-builder, and the possibility of their obtaining previously more than a very scanty education. Thus they were deprived of the means which generally contribute materially to the exaltation of those who are destined even to approach that fame and popularity which was acquired and enjoyed by the subject of this notice.

His earliest occupations when a boy connected with the coal pits in the neighbourhood of the town of Newcastle, provided for the introduction of steam power for the purpose of drawing coal out of the pits. He commenced first at 21 per day, progressed to 4d., and then earned 6d. per day in selecting dress from the coal. He was afterwards promoted to the situation of stoker to a stationary engine at 1s. per day. Subsequently, he was entrusted with an engine at the rate of from 12s. to 17s. a-week; and on removing from Willington he was employed in that capacity at Killingworth colliery, the property of Lord Ravensworth and others. On one occasion the skill of all connected with the colliery was completely baffled by the rapid wearing out of the ropes used to draw the coals at one of the pits. So great was the destruction that the best ropes that could be procured were regularly worn completely out in a month, while those employed at the other pits continued in use for three months. This annoyed indicated a serious expense on the proprietors, and caused much inconvenience to the work-people. Experiment after experiment was tried for months, and at considerable expense, but length gave up all hope of a cure. Lord Ravensworth and others, on seeing the enormous extent of the evil, and being aware that there was a cause for it, George began to watch closely the operations of the machines, and soon traced the mischief to its source. He immediately set to work, made the requisite alterations at a trifling expense, and again put the machinery in motion; and to the great satisfaction of all connected with the colliery, the evil was found to be completely removed.

His originality of mind and quick perception of ideas and thought were first brought to light in rather a singular manner. In going to his daily work, he had every day to pass an engine which had been erected for the purpose of pumping water, but would not do its work; it could not be made to pump. Day after day, we believe, he passed this machine, and the engineers were endeavoring unsuccessfully to make it pump. In one of these walks he stopped to look, and made a remark that in a very few hours he could make it pump; and being permitted to make his experiment, he succeeded so completely in the time specified, that his character in his own neighbourhood was established. His attention was next drawn to laying down railways, then introduced for the first time into that district. These railways were sometimes used for drawing coals by horses from the pits to the parts where the coals were shipped, and occasionally by inclined planes worked by steam-engines and ropes, and also by self-acting planes. He obtained considerable celebrity in this branch of his business for the judgment and skill he displayed. Previous to this period of his life, when comparative prosperity was dawning upon him, his evenings were employed, both for amusement and profit, in reading his neighbours' clocks and watches, and occasionally, we believe, in making their shoes. But such a light as this could not be hid under a bushel. With all the best qualities of a man morally, with all the highest powers of an intellectual mind, his progress must be onward to the House of Commons, he confidently affirmed to those incredulous of the truth, that the steam engine would, with a train of carriages, move along the rails at the rate of from twelve to twenty miles an hour. He affirmed this; but he said, "I knew that it would move a great deal faster, though I dare not tell them so, for they would not have believed me." He had been in a hard school, that of poverty. He had worked himself unaided up to the position in which he stood when, before a committee of the House of Commons, he confidently affirmed to those incredulous of the truth, that the steam engine would, with a train of carriages, move along the rails at the rate of from twelve to twenty miles an hour. announcing them. In fact this action of the Government, has been but an effort to make the duties upon imports and other sources of our revenue available before they were collected.

Mr. C. D. Church, a regular Washingtonian, has given three lectures here on the subject of Temperance.

Mr. Church has done what no other man has been able to do in this town, which was to draw out to his meetings those engaged in the traffic.

Mr. Church goes to Toronto, where he is to lecture to-morrow evening. Should he continue his labors in the province a season, it would be the means of giving the cause a start ahead; and it is much needed at the present.

**SEEDS.** - To be shown at General Meeting in February, 1849.  
**HORSE SHOWS.** - For two sets of Horse Shows - one on the horse the other not - to be awarded to maker of the Shows - First, £10. Second, £7.5d.

**HANNESS.** - Best set of Double - First, £1. Second, 15s.

**BY-LAWS.**

1. No animal gaining the first prize one year, can take it with the same character the second or any other year; but may show and be entitled to a Certificate from the Society, or such other honorary reward as may be decided on, excepted from this rule, Hares, and Rams, which may show and carry first prizes for two years.
2. That a Subscriber be only entitled to one Prize for Butter and Cheese, or for Grain of the same kind.
3. That Stallions, Bulls, and Bows, must have served within the Society's District, the season previous to the Show, [excepting in cases provided for by By-Laws,] or be entitled to such to give an obligation that they will serve in their reason.
4. That Bulls must have a ring or screw in their nose, with a rope or chain attached, to prevent accidents.
5. That the prize for Heifers be not awarded to any animal that has previously had a Calf.
6. That the quantity of Grain and Seeds exhibited, (Pease and Indian Corn included,) is not less than Four Bushels, and raised by an exhibitor, from a field of not less than two acres, [unless the quantity of land and grain needs be otherwise specified]; and the Cheese and Butter, or other Farm Produce, exhibited, to be produced from exhibitor's farm, and of stock, and that all Ewes shown (except Fat Sheep) shall have suckled a lamb in the first of August previous to the day of Show.
7. That all competitors for Prizes must give the Secretary notice of the description of Stock, or Produce they intend to show, before, or on the day but one, previous to the day of any Annual or General Show.
8. That all Stock and Produce exhibited, must be on the ground precisely at TWELVE o'clock of the day of Show: the Judges will at that hour enter on their duties.
9. No article or animal can be shown for two prizes the same year.
10. Competitors for Turnips and Potatoes to be shown on the 14th October, or before the last Saturday in September, so that they may be inspected before the Show, and the 3d. of entry to be paid by such competitor for each of such articles.
11. That for the encouragement of those Members who may introduce improved Stock, if any animal entered for competition be deemed to be of the best quality, and well watered, the owner of the same prove to the satisfaction of the Judges that such specimen of Stock has been imported, or pure bred out of Stock imported from Great Britain or Ireland, he shall receive double the amount of premium otherwise awarded, but only for one year.
12. All Stock to be property of exhibitor three months before the Show. Judges will have discretionary power in withholding Prizes; and no person can be Judge of his own property. - [See Rules 10, 11, and 12, F. Rules.]

**PLOUGHING MATCH.**

**PROSPECTUS OF THE VICTORIA MAGAZINE.**  
MR. AND MRS. MOODIE, Editors.  
THE Editors of the VICTORIA MAGAZINE will devote all their talents to produce a useful, entertaining, and cheap Periodical, for the Canadian People; which may afford amusement to both old and young. Sketches and Tales, in verse and prose, Moral Essays, Statistics of the Colony, Seraps of Useful Information, Reviews of new Works, and well selected articles from the most popular authors of the day, will form the pages of the Magazine.  
The Editors feel confident that the independent and rising country to whose service they are proud to dedicate their talents, will cheerfully lend its support to encourage their arduous and honorable undertaking. The low price at which the Periodical is placed, is in order that every person within the Colony who can read, and is anxious for moral and mental improvement may become a subscriber and patron of the work.  
The VICTORIA MAGAZINE will contain twenty-four pages in each number printed on new type, and of good paper; and will form at the end of the year a neat Volume, of 288 pages, together with Title Page and Index.  
It will be issued Monthly, commencing on the First of September, from the office of JOSEPH WILSON, Front-street, Belleville; - the Publisher and sole Proprietor, to whom all orders for the Magazine, and letters to the Editors, must be addressed, (post-paid.) The terms of subscription - ONE DOLLAR PER ANNUM - invariably to be paid in advance.
