J. R. ELLIOTT'S THIRD LETTER.

He Visits Some of the Counties and Spends a Couple of Days at one of the Leading Homestead Farms.

DEAR MONITOR.—I made many inquiries in Liverpool before I found where the monument to Mr. Huskinson could be seen; I looked upon it as a great misfortune. A very excellent monument it is, and a really fine and excellent specimen of a white freestone set in a glass dome, and having a panel door with plate glass through which the statue can be well seen. Quite near my hotel in Liverpool is the house in which Mr. Gladstone was born and in which afterwards Lord Leamington lived. The leading number of Mr. Gladstone's first cabinet. Both these gentlemen started in parliamentary life as conservatives.

From Liverpool I go over to the ancient town of Hovey, which has a great good view of the Mersey to Birkenhead. On the moment the train starts and in a few seconds we are under the city of Hovey. When we emerge on the "other side" we are met by a row of gardens and beautiful trees. One thing we soon notice here: if a spot of ground cannot be made good, it is not so much a waste as it is a loss. The railway grounds are all bordered by nicely trimmed hedges and as we near a station, we begin to see the well-kept lawns, and some stations are very pretty. Not only are the grounds well-kept, but the lawns, and some stations are very pretty. Not only are the grounds well-kept, but the lawns, and some stations are very pretty.

On reaching Chester we find we are on the way to the Castle. It is grandly situated on the Horton Collegiate Academy. The whole city follows a bend of the Dee which more than one-half circle around the city. The most notable feature of the castle is the "Tower of the Virgin." It is a fine specimen of the architecture of the 14th century. It is a fine specimen of the architecture of the 14th century. It is a fine specimen of the architecture of the 14th century.

We walk around the city walls and go up into the water tower built upon them. From the top of the tower we have a fine view of the city. The view from the top of the tower is a fine view of the city.
